stake of \$2,000 when carrying weight for age or more to carry five pounds; twice, seven pounds; thrice, ten pounds extra; those not having won when carrying weight for age or more, in 1884, more than \$1,000, allowed three pounds; or, if not more than \$500, five pounds; maidens allowed ten pounds; one mile and an eighth.

**The Palisade Stakes.**  
For three-year-olds, of \$50 each, \$15 f., with \$1,000 added, of which \$500 to the second; winners in 1884 when carrying weight for age or more of \$2,000 to carry three pounds; twice, five pounds; thrice, seven pounds extra; of less than \$1,500, allowed three pounds; of less than \$1,000, five pounds; of less than \$500, seven pounds; maidens allowed twelve pounds; one mile and an eighth.

**The Newark Stakes.**  
For three-year-olds, of \$50 each, \$15 f., with \$1,500 added, of which \$500 to the second; the winner of a three-year-old stake of \$2,000 when carrying weight for age or more to carry seven pounds; twice, ten pounds; thrice, twelve pounds extra; those not having won when carrying weight for age or more, in 1884, more than \$1,000 allowed three pounds; or, if not more than \$500, five pounds; or, if they have not won in 1884, ten pounds; maidens allowed fifteen pounds; one mile.

**The Trenton Stakes.**  
For three-year-olds, of \$50 each, \$15 f., with \$1,000 added; the second to receive \$250 out of the stakes; the winner to be sold at auction for \$5,000, or to carry seven pounds extra; if entered to be sold by 4 p. m. on the day before the day appointed for the race for \$4,000, allowed three pounds; if for \$3,000, seven pounds; if for \$2,000, twelve pounds; if for \$1,000, twenty pounds; one mile and an eighth.

**The Freehold Stakes.**  
Of \$100 each, \$25 f., with \$1,500 added, of which \$500 to the second; horses three years old to carry ninety-seven pounds; four years and upward, one hundred and ten pounds; mares three or four years old allowed three pounds; horses not having won when carrying weight for age or more, in 1884, more than \$2,000 allowed three pounds; or, if not more than \$1,000, five pounds; or, if they have not won in 1884, ten pounds; maidens allowed, if three years old, fifteen pounds; if four years or more, twenty pounds; one mile and a half.

**The Passaic Stakes.**  
For three-year-olds and upward, of \$50 each, \$15 f., with \$1,000 added; the second to receive \$250 out of the stakes; winners in 1884, when carrying weight for age or more, of \$1,000 to carry five pounds; of \$2,000, ten pounds extra; horses not having won in 1884 allowed seven pounds; maidens allowed twelve pounds; three-quarters of a mile.

**The Midsummer Handicap.**  
A sweepstakes of \$50 each, h. f., or only \$10 if declared by 4 p. m. on the day before the day appointed for the race, with \$750 added; the second to receive \$250 out of the stakes; weights to be published two days before the race; one mile.

**The Harvest Handicap.**  
A sweepstakes of \$50 each, h. f., or only \$10 if declared by 4 p. m. on the day before the day appointed for the race, with \$1,000 added; the second to receive \$300 out of the stakes; weights to be published two days before the race; one mile and a quarter.

**The Navesink Handicap.**  
A sweepstakes of \$50 each, h. f., or only \$10 if declared by 4 p. m. on the day before the day appointed for the race, with \$1,250 added; the second to receive \$350 out of the stakes; weights to be published two days before the race; one mile and a half.

Stakes are run, and two days before the race; one mile and a half.

**The Moet & Chandon Champagne Stakes.**  
For two-year-olds, of \$25 each, p. p., with \$500 added by Messrs. Moet & Chandon, of which \$100 to the second; the winner of a stake of \$2,000 to carry five pounds; twice, seven pounds; thrice, twelve pounds extra; maidens not having run second for a stake of \$2,000, allowed seven pounds; three-quarters of a mile.

N. B.—Winner of a certain sum means winner of a single race of that value. In the conditions of the above stakes weight for age means weight for the distance run according to the Rules of the American Jockey Club, or the Rules adopted at the Convention lately held at Louisville. THE GRADE OF THE MONMOUTH PARK COURSE has been lowered, the track widened, and ample provision for starting, especially for races of three-quarters of a mile. Additional Stabling for 200 horses will be completed in May next. Nominations to be addressed to the Secretary, Twenty-seventh street and Madison avenue, New York.

**GEORGE L. LORILLARD, President.**

**J. H. COSTER, Secretary.**

ENQUIRE OF

**HENRY WALSH,**

Sup't Running Horse Dep't

Palo Alto Stock Farm,

THE RIFLE.

At Shell Mound.

Among the leading events of the day was the match last Sunday at Shell Mound, between ten men of the Fifth Battalion of Infantry and ten men of the Second Artillery, commanded, as we have said, by Colonel Russett and Captain Ed. G. Spronl. The contest had excited much interest outside of military circles, and but for the inclement weather would have drawn together a large number of spectators. Nevertheless, considering the pitiless rain that fell at intervals, and the cold wind prevailing all day, the attendance was larger than could have been expected. Having received a personal invitation to dine with the contending teams and assist in doing honor to the losers, we faced the storm, and remained until the 500-yard shooting commenced and then we were "knocked out" in the first round and retreated ingloriously. On such a day, without military reputation to sustain, or personal interest in the contest to sustain us, rifle shooting, especially at the 500-yard target, is not the most attractive amusement in the world, and we make this acknowledgment as an apology for not being present at the dinner as we intended. It would be ridiculous to expect close shooting on such a day, though the teams were composed of our best marksmen, and therefore we can readily understand, how the very best, such for instance as Colonel Kellogg and others made scores so far below their general average. From noon, a fifty-mile gale was blowing right across the target, and at the exposed 500-yard range the tssst of nerve upon all was very severe, upon some demoralizing. Still, under the circumstances, the score is anything but poor, and if it does not show first-class marksmanship, it does show that men who had the nerve to shoot a match on such a day would fight like devils in a battle. In the opinion of many, this match was concluded at the end of the shooting at the 200-yard range, when the infantry men led by a goodly number of points, and so it proved, for at the close of the match their lead had been augmented to 24. The difference in the scores was greater than expected, and must be laid et the door of the artillery man, who made eight consecutive misses at the 500-yard range. The teams and friends, about thirty, sat down to dinner at five P. M., which in its material and preparation reflected great credit on Captain Siebe, proprietor of the establishment, for it included almost everything in the market, from a fat turkey down to a snipe. Hans Kohler, paymaster of 2d Artillery, cent over two cases of his very best vintage, and to this, perhaps, must we look for the number of toasts following from the heart hot and fast until half past nine, when the party broke up. Among the military organizations specially toasted were the 2d Artillery, Fifth Infantry, 2d Brigade, 1st Infantry, and then Colonel Russett, Captain Spronl, Major Kloese, and Captain Siebe were duly honored. A more congenial party was seldom seen. In its results, the match, will do much to encourage a greater activity in rifle shooting throughout our military organizations, and that was its chief object. For many pleasing personal attentions, we have to acknowledge ourselves indebted to Captain Siebe. He never overlooks members of the press visiting Shell Mound. The score

FIFTH INFANTRY TEAM.

Table with 2 columns: Name and Score. Rows include Burrell, Macdonald, Kubhle, Waltham, Pierce, Hovey, Williams, Kellogg, Mason, Brown, and Aggregate.

SECOND ARTILLERY TEAM.

Table with 2 columns: Name and Score. Rows include Lods, Kubls, Warren, Sims, Lanfenburg, Spruill, Pennell, Mangels, Lemcke, Lachmeyer, and Aggregate.

In the principal match Col. Beaver gave a gold medal for the highest score. This was won by Mr. Lode, of Second Artillery, with a score of 88.

At the same time, the following gentlemen threw in a small amount each for a pool match, divided into two purses, five shots each, 200 yards. The scores in this match were the best of the day. Out of a possible 25, the score at the finish stood as follows:

Table with 2 columns: Name and Score. Rows include Hovey, Kellogg, Waltham, Carson, Burrell.

Lient. J. E. Klein and Col. Sam Beaver fired ten shots at the 200-yard target, the latter winning under the rules. The scores were:

Table with 2 columns: Name and Score. Rows include Col. Beaver, Lient. Klein.

During the day T. E. Carson shot five strings of ten shots each at the 200-yard target. Out of a possible 250 he made 229. With one exception, when 230 was scored, this is the largest aggregate ever made on the range.

The match between Lieutenant Brown and Officer Linville, at Shell Mound, to come off a week from to-morrow, 2nd March, is still exciting much interest in all circles. Lieutenant Brown has a slight call in the betting from being considered the more reliable man in a match. The conditions are 100 shots each, 50 at 200 and 50 at 500 yds, for \$100. Brown has already beaten Linville twice before.

We understand the Police Team, according to its expressed intentions, are about to challenge the Fifth Battalion team, the victors last Sunday. We are authorized to say, any communication from Police Headquarters, in that direction will meet with a ready and willing response.

At Alameda.

The California Schuetzen Club held their monthly bullseye shooting at Alameda Schuetzen Park on Sunday, despite the downpouring rain. The following marksmen won prizes for the best centers: Klotz, Utschig, Bertelsen, Bawnet, McLoughlin, Freese, Jacoby, Eckmann, Strecker, Burmeister, Ehrenfort, Standon, Vou der Heyden, Rshwyler, Boeckmann, Smith, Krall, Gluk, Muller, Lingenfeler.

The Turner Sharpshooters also held a prize shooting match on the same day. The following were the winners: John Utschig, Otto Burmeister, D. Schoenfeld, C. Sagehorn, R. Finking, H. Krall. In both of the above cases we have endeavored to obtain the actual scores, but failed. In reference to the Schuetzen Club the secretary was unable to give any information, and the president is never to be found when wanted. There were two friendly matches shot on the same day, and at the same place, between individual members. The first between J. Utschig and Wm. Ehrenfort. The scores were:

Table with 2 columns: Name and Score. Rows include Utschig, Ehrenfort.

The second match was between K. Wertheimer and C. Sagehorn. The latter received 75 rings to start with and won by 15 rings.

THE GUN.

Trap Match at Colusa.

The Colusa Shooting Club gave an invitation clay-pigeon shoot on the 13th inst, in honor of the departure from Colusa of their President, G. W. Beesford. It was an "off" day for the boys as they did not come up to their average, owing, perhaps, to the fact that they had not shot at the trap for some three months past. Below will be found the score: Team shoot, losing side to pay all expenses.

Table with 2 columns: Name and Score. Rows include Porter, Watson, Beesford, Libby, Gilmour, Welch, Niebling, Radcliff, Graham, Total.

The seed time and harvest necessary for human food in another sense stand good also for human pleasures. Thus, when the season for one amusement closes, another opens, at least, with those who seek recreation for its legitimate object—health. It is well this has become so with Americans, for there is no less growing food if we have not strength to eat it, and in no way is that strength obtained so certainly and so thoroughly as by participating in field sports. Yesterday pigeon shooting was inaugurated pretty generally in our State, but as it is our publication day, we cannot give the results until next week. A large attendance is expected at the opening match of the San Francisco Gun Club, for the attractions are greater than usual. In addition to the three club medals, Mr. Ewing, one of our wealthy and liberal lovers of trap sport, donated a \$200 silver pitcher to be shot for on the occasion. Messrs. Orr and Butler, prominent members of the club, were intrusted with the selection of the trophy, and their taste does them credit. This pitcher is a splendid work of art. The man fortunate enough in the end to become its owner, must win it three times, but not necessarily in succession. We predict it will be the reward of a long and brilliant struggle. The first medal of the club has been won seven times by Mr. J. K. Orr; the second medal twice by Mr. Al. Havens. The latter will also be a bone of contention in the first match, for if he wins once more it becomes his private property. He is a hard man to beat at the trap. We shall make a point of being present.

Duck shooting for the season may be considered over, at least by that class who pursue the pastime for pleasure rather than profit. Even if the birds were not miserably poor and without flavor at present, the late intensely cold and wet weather has robbed the sport of its pleasures, and few that we can learn, except the market hunters, have been out this last fortnight. The birds on the marshes and bays were plentiful enough, but they kept so close nothing could be done with them. As an instance, we heard of a party of gentlemen from this city who recently visited the marshes of Suisun for a three days' shoot. When they came to balance the accounts of the expedition it was found that the birds killed cost \$10 each. Pretty expensive shooting. And so we may say farewell to the season of 1884.

A few weeks ago we mentioned the successful prosecution of a marketman in this city for illegally selling doves. We find we ought to have credited the Sportsman's Club of California with bringing this desirable result about. They have a standing reward of \$25, formerly \$50, for every conviction of the kind, and they keep an agent out all the time hunting up violations of the law. We have since seen the agent's receipt for the \$25 reward in Goodman's case. The Sportsman's Club of California is composed of good men and true. They first imported black bass into this State. For all their good and noble deeds let us give them the praise and credit due.

The prospects of a match between Dr. Knowliss, of the Alameda Club, and the two champions Messrs. Robinson and Lambert are not very promising. Mr. Orr at present cannot, of course, shoot such a match, or we are certain he would gladly do so. Still there are Messrs. Nick Williams, Al. Havens, and Pearson, who ought not to allow the Doctor's challenges to pass unnoticed, and whom we hope to hear from without delay. The Doctor only propose to exclude the two champions.

Petaluma is waking up to the sports of the gun as well as earning distinction with the rifle. Mr. B. Franklin, for the Petaluma Sportsman's Club, has commenced to build summer quarters on grounds leased from Dr. Durdell, some five miles below the town. When finished, the building will be substantial, large and convenient. This speaks well for the spirit of the Petaluma sportsmen.

Tomalas has reported to us to be alive with wild fowl, with a large percentage of honkers. The open lands and hills in the neighborhood also abound with quail.

At a late meeting of the Gilroy Rod and Gun Club, J. P. Sargeant and Henry Miller, Jr., were elected members. The admission of these gentlemen will not only strengthen the club and increase its local influence, but it will gladden the hearts of all true sportsmen in the State, as showing that our men of wealth and character are awakening to a living sense of their duties to preserve the game of their country. With others of their class they hold it in trust only for all. There is no throwing off our obligations in this connection if we would be true Americans, and on principle, therefore, we call upon all land-holders in other parts of the State to follow the example of Messrs. Sargeant and Miller, and associate themselves with the gun clubs of their districts. Poaching and illegal, indiscriminate slaughter will then receive a death-blow, chiefly because it will lead eventually to the law being enforced. It will not do young Mr. Murphy, the representative land-owner of the district, any harm to read this paragraph. His hounds may then have less to do.

An eastern paper, says: "Quail shooting will be illegal in Caturagus county, N. Y., for the next four years under a penalty of \$25 for each offense." So the good work of preservation goes on. The sins of the past can only be atoned for by abstinence in future. Why should California be behind her sister states in the good work?

TROTTING STALLIONS.

The Almont Stallion ALTOONA,

BY ALMONT; first dam Theresa B., by Propbet, Jr.; second dam B Molly Floyd, by Mohawk; third dam, by Davy Crockett, a Canadian pacer; fourth dam Puss, a fine road mare imported from Canada. ### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTting PARK.

#### Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

#### Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form PERFECT. As a three-year-old, with eight weeks' banding, showed 2:29 1/2, without a skip.

#### Breeding.

GILT-EDGE, combining, close at hand, Hambletonian. Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

**FRED ARNOLD,**  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasture at reasonable rate. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2), and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:43, and three-fourths sister to dam of Buccaneer, public trial against time 2:24 1/2, and full sister in blood to dam of Fawn, record 2:30 1/2, by Flaxtail, granddam by son of Tully Ho Morgan, great granddam by Irwin's Tuckahoe, and great granddam by Leffer's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.  
**M. W. HICKS,**  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

#### Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

#### Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Ritty, by Owen Dale, son of Belmont.

3rd dam, Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred.

Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.  
**J. J. FAIRBANKS,**  
Oakland, January 18, 1884. Agent.

### The Trotting Stallions

## DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

#### TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasture for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

#### Director, 2:17.

Black horse; foaled July 13, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phyllas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Weimar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

#### Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTting PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Pennieton, Philadelphia, Penn. By HAPPY MEDIUM, dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Heury, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

#### Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasture at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.  
February 23, 1884. **J. B. McDONALD.**

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cahn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

#### TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteoo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

## MAMBRINO WILKES.

**BLACK STALLION, SIXTEEN HANDS IN HEIGHT, by GEORGE B. Wilkes, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christmas by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripton's dam by Potomac.**

This is the largest and one of the best colts of George Wilkes (weighing 1,300 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

#### TERMS.

\$10 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

**A. L. HINDS, Agent.**

### The Trotting Stallion

## STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

#### Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasture \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCreery & Noyes, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

#### Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a spacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

#### Pedigree.

Steinway, by Strathmore; first dam Abbes, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turk, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Clara, 2:17 1/2, and Tucker, 2:19 1/2; Chestnut Hill, 2:22; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlan, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belmor, who trotted a mile in 2:52 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:20; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:26 1/2, but Steinway was lame in this race, and really not in condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address

**GEORGE WILEY,**  
Cook Farm, Danville, Contra Costa Co., Cal.

#### Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbena, Admiration, Mystery, in 2:39, 2:32, 2:31, in 2:46. Memento won the first heat. As three-year-old, at Sharpshooter, Ky., August 8th, 1879, over a miserable half-mile track, he beat Buswhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Buswhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catfish and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:26 1/2, but Steinway was lame in this race, and really not in condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

#### Address

**GEORGE WILEY,**  
Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTting STALLIONS

## SINGLETON AND LA HARPE.

Will make the coming season from February 1st to July 1st, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

#### PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie is son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, granddam by Leffer's Consul, by Shepperd's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

## LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star (son of Platt's Western Star by Blackstone). 1st dam by Boonegrove, 2nd dam by Gallatin (1,081). La Harpe's dam Prairie Bird by Flaxtail (dam of Fuchs, 2:28, and Prompter, 2:33). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leffer's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

#### TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash.

Mares sent to the ranch to either horse will be kept one month free of pasture. Further pasture will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. McINTOSH,** Box 60, Chico, Cal.

FOR SALE.

STALLIONS FOR SALE

HAVING ACQUIRED MORE STALLIONS THAN he has present use for, the owner offers for sale the high-bred and well-known trotters

Inca - AND - Gibraltar.

INCA, RECORD 2:27, FOALED 1874, BRED BY L. J. Rose, got by Woodford Mambino, son of Mambino Chief; first dam Gretchen, by Mambino Pilot; second dam Madame Kintana, by Canada Chief, son of Davy Crockett; third dam by Fanning's Toke; fourth dam by Leviathan.

GIBRALTAR, RECORD 2:22 1/2, FOALED 1872, bred by Geo. O. Tiffany, got by Echo, son of Rye-dyke's Hambletonian; dam the Tiffany mare, said to be by Owen Dale, son of William's Belmont.

For terms and other particulars apply to JOHN A. GOLDSMITH, OAKLAND TROTTING PARK.

FOR SALE

The Trotting Gelding STARR KING.

Record, 2:22. Sound and in fine condition. Sold only for the reason that his owner's business is such that he cannot give attention to the turf. For further particulars address

C. W. Welby, Tenth and Railroad Avenue, San Francisco.

FOR SALE.

THE ALMONT STALLION ALTOONA,

BY ALMONT, FIRST DAM THERESA BY Prophet, Jr., second dam Molly Floyd by Mohawk; third dam by Davy Crockett, Canadian pacer; fourth dam Fuss, a fine road mare imported from Canada. Prophet Jr. by Prophet, son of Hill's Vermont Black Hawk.

Altoona was bred by Gen. W. T. Withers of Fair-lawn; is a dark bay, a little over 15 1/2 hands, of high form and breeding. For particulars apply to A. H. HECOX, Almont Stables, 1352 San Pablo Avenue, Oakland.

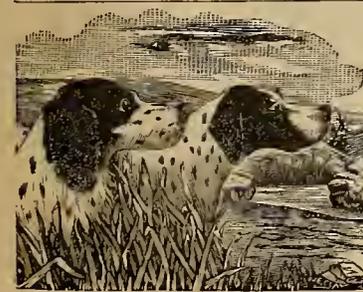

Crown Point For Sale.

This promising Hambletonian stallion, record 2:24, is offered for sale. He is so well known for thorough game and endurance that it is almost superfluous to say anything further. He has defeated Sweetness, 2:23; Starr King, 2:22; Del Sur, 2:24, and others of celebrity. Although having only served one season in the stud, he can show colts of as much promise as any. The dam of Crown Point has two representatives in the 2:30 list. His blood being a combination of Hambletonian, Clay, and other strains, which proves him to be of the very best breeding.

Crown Point is sound in every way, and will be ready to train, with a good show of trotting faster than ever. For further information address G. VALENSIN, Arno Station, Sacramento Co., Cal.

FOR SALE.

An Irish setter dog, three and a half years old, well broken on all kinds of game. Sound in every way, and only sold for want of use. Apply at the Mint Saloon, 605 Commercial St. S. F.

SOUTHERN DIVISIONS, ETC. For points on Southern Divisions and the East, see C. P. R. Time Schedule.

TO Sportsmen & Pleasure-Seekers.

THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR THE MOST CHARMING Summer and Winter Resort of the Pacific Coast,

MONTEREY,

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baccala, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE Southern Pacific Railroad, (Broad Gauge).

Southern Pacific Railroad,

(Broad Gauge). The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at Santa Clara, San Benito, Santa Cruz and Monterey. We would particularly call attention to the unlimited extent of range at and about SAN BERNARDINO and McMAHON'S FOR RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases are taken in Passenger Cars.

TICKET OFFICES. - Passenger Depot, Townsend street, Valencia-station, and No. 613 Market street, Grand Hotel. H. R. JUDAH, Asst. Pass. & Tkt. Agt. A. C. BASSETT, Superintendent.

FAIRLAWN, 1884.

TENTH ANNUAL CATALOGUE

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trolling Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

25 HIGHLY-BRED BROOD-MARES,

Bred to the Fairlawn Stallions, and

130 HEAD OF VERY PROMISING YOUNG STOCK,

Consisting of Young Stallions, Fillies and Roadsters, are offered at Private Sale.

THE ONE PRICE PLAN Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person.

The Stallions in use at Fairlawn are

ALMONT 33.

Represented in the 2:30 list by 24 performers, with records ranging from 2:15 1/2 to 2:30. Limited to 20 approved mares at \$300 the season.

HAPPY MEDIUM 400.

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

ABERDEEN 27.

Having ten of his get with records ranging from 2:15 1/2 to 2:27 1/2. Limited to 40 mares at \$150 the season.

ALECTO 2548.

By Almont, out of Violet, by Ryedyk's Hambletonian. Limited to 30 mares at \$50 the season.

STARMONT 1526.

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters.

Jerseys and Guernseys.

Registered in the A. J. C. C. and the A. G. C. C.

MOTHER.

SON.

The above is a cut of the unequalled cow Jersey Belle of Seftuate that made 25 lbs. 4 1/2 ozs. of butter in one week, and her only living son King of Seftuate.

A GRANDSON OF JERSEY BELLE OF SCOTLAND is now in use in the Yerbu Buena herd. This herd of Jerseys and Guernseys won all the herd prizes for 1882. Since then have been added young animals from Mr. Pierce's valuable herds East.

HENRY PIERCE San Francisco.

# BREEDER AND SPORTSMAN

Vol. IV, No. 9  
NO. 508 MONTGOMERY STREET

SAN FRANCISCO, SATURDAY, MAR. 1, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

ECHO, JR.

In our gallery of portraits have appeared representations of animals that were fairly entitled to the distinction from their family connections. It has long been held of the greatest importance in breeding fast horses that the kindred should be of the right stamp, and no matter how great the individual excellence, without that to back it the chances are that the result will be disappointment.

It is unnecessary to repeat to the readers of this paper the estimation in which we hold Echo. From the first appear-

ance of his colts there were good grounds to warrant the prediction of future excellence. Before his progeny displayed their powers there was sufficient in himself to justify the high expectations that have been fulfilled. By Rysdyk's Hambletonian, his dam by Magnolia, son of Seeley's American Star, and then Kentucky Whip and Shakespeare blood, there was enough to warrant success from the time Dexter, Startle, Jay Gould, Aherdceen, and many others of the Hambletonian-Star combination appeared. The promises of the first members of the family have been sustained by the still

more valuable qualities of procreative ability, and in the next generation are numbers of the first celebrities. There is little necessity for further allusion to the sire of Echo, Jr., as our readers are familiar with the most noted of the class which have appeared in public, though outside of these are many which have fully as good claims for consideration. On the maternal side the subject of Mr. Wyttenbach's pen is a claim that must not be overlooked. His dam Ilia, the Priam, and Priam is a son of Whipple's Hambletonian, Revere, by imported Glencoe, and as a sire he has shown

potency by getting Honesty, four-year-old record 2:25; Mockingbird, two-year-old record 2:33, and several others which are of great promise. The grandam of Echo, Jr., was by Kentucky Hunter, the sire of the dam of Corette, and she was a fast pacer as well as her dam, an Oregon-bred mare. A sister to Ella, called Brownie H., is a double-gaited mare of great speed; all that is necessary to change her from a trot to a pace, or vice-versa, is a little difference in the adjustment of the checkrein. She won a race at the Golden Gate Fair hauling an ordinary road wagon in 2:40, and has shown trials to a "buckboard" weighing 250 pounds in 2:35, and quarters in 36 seconds. Ella herself showed fully as much speed and with the same faculty of changing gaits, but as she was put to hreeding at three years old there was no opportunity to develop it.

As to Echo, Jr., we are informed that all that is necessary for him to prove that he is worthy of his genealogy is the chance to show his capacity. He has trotted to wagon better than a 2:30 gait, and, like the majority of the get of his sire, his action is very fine. As he will not be four years old until the 1st of next May, there is time enough for him yet, and as his owner intends putting him in training as soon as "the season" is over, it may not be long until he places on record the time his private performances indicate that he is capable of doing.

Good likenesses as the pictures of our artist are acknowledged to be, there are features which cannot be represented by the pencil and graver. That Echo, Jr., is a very handsome colt the portraiture shows, and when to that is added that he is a rich, dark bay, with black legs, mane and tail, that he is 15½ bauds in height, and weighs, in ordinary condition, 1,025 pounds, and that there is plenty of bone, tendon and muscle, enough will be shown to give a fair idea of his configuration. His dam is nearly 16 hands, and will weigh 1,100 pounds, and the grandam was nearly as large. The combination of trotting, pacing and thoroughbred blood has proved to be a capital conjunction to establish the fast-trotting propensity, and many of the very fastest of the present time are thus bred. The double cross of Hambletonian in Echo, Jr., is a guarantee that he will perpetuate the characteristics of this grand family of trotters, and on mares of other strains can scarcely fail to give satisfactory results. This is shown, so far as can be determined by appearance, as he was bred to Bonnie H., and though the inbreeding was very close, the foal is remarkably strong and highly formed. There is another quality which must not be overlooked in Echo, Jr. He trots without weights, boots or other appliances on his feet than medium-sized tips, and certainly the power to trot fast without artificial appliances lends additional value to the possessor.

## TURF AND TRACK.

### Chicago Driving Park—Trotting Colt Stakes for 1884-85.

The Trotting Colt Stakes of the above named association closed January 1st with the following entries:

#### Stakes for 1884.

The Chicago Driving Park to add \$2,500. Closed on March 1st, 1883, with 98 nominations, of which the following paid the second installment of \$15 on January 1st, 1884, and remain eligible for the race:

1. H. G. Finkle's b f Queen Medium, by Happy Medium, dam Evangeline, by Almont.
2. L. W. Hess' br c Victor Sprague, by George Sprague, dam Sylvia, by Swiger.
3. H. M. Freese' b c Prestige, by Onward, dam Venice, by Cuyler.
4. E. W. Ayres' b f Vashiti, by King Rene, dam Effie, by Regular.
5. Joe. Harker's b c Expectation, by Gov. Sprague, dam Gazelle, by Rysdyk's Hambletonian.
6. Jos. Harker's blk c Gov. Stanford, by Gov. Sprague, dam Mary Queen, by Alexander's Norman.
7. Caton Stock Farm's b c Almont Cossack, by Don Cossack, dam Surmia, by Almont.
8. H. H. Yates' ch c Hard Hack, by Gen. Grant, dam Kate Hazard, by Kentucky Hazard.
9. S. A. Tanner's b f Verneti, by Manchester, dam Ella Madden.
10. Wm. Manrer's b or br f —, by American Clay, dam Kate.
11. Jno. and Geo. Weedman's b c Wm. B. Sprague, by Geo. Sprague, dam by Goldust.
12. W. J. and W. H. Lewis' b f Nettie, by King Rene, dam Alma, by Almont.
13. G. D. Schenck's b f Ophelia, by Durango, dam Emma S., by Indian Chief.
14. C. T. Bradley's b f Nettie, by Milwaukee, dam Countess, by Corrigan Jackson.
15. R. G. Stoner's b c Bedford, by Strathmore, dam by Mambrino Patchen.
16. Grape Vine Stock Farm's b c A. G. Dewey, by Larry W., dam Achsah, by Matt Duffy.
17. E. T. Billmyer's b f Mabel, by Frank Miller, dam by Pocahontas Boy.
18. R. B. Torri'lla blk c Gambetta, by George Wilke, dam by Gills' Vermont.
19. W. A. Sandborn's b c Larchwood, by Capoul, dam Mary Mason, by Ericseou.
20. W. A. Sandborn's b c Cosher, by Capoul, dam Lola, by Administrator.
21. W. A. Sandborn's ch c Superior, by Egbert, dam Mary, by Woodford Mambrino.
22. Macey Bros.' b c O. F. C., by Onward, dam by Black-

23. C. W. Story's blk g Reference, by Referee, dam Modjeska, by Enfield.
24. Allen Baabford's b c Charley Offutt, by Almont, dam Pearl Leonard, by American Clay.
25. Allen Bashford's h f Clara Leigh, by Almont, dam Madame Finch, by Gen. Lee.
26. J. W. Mackey's b f Aloise, by Sultan, dam Belle, by Belmont.
27. B. J. Treacy's rn g Freedland, by Abdallah West, dam Alice White, by Walker's Denmark.
28. B. J. Treacy's ch c Prince Wilkes, by Red Wilkes, dam by Brown Chief.
29. D. L. Moore's br c Sour Mash, by Red Wilkes, dam by Bourbon Chief.
30. R. P. Pepper's b c Connaellor, by Onward, dam Crop, by Pilot, Jr.
31. Palo Alto Stock Farm's b c Alban, by Electioneer, dam Lady Morgan, by Rysdyk's Hambletonian.
32. Palo Alto Stock Farm's b f Alta Belle, by Electioneer, dam Beautiful Bells, by The Moor.
33. Palo Alto Stock Farm's b c Edos, by Gen. Benton, dam Soutag Mohawk, by Mohawk Chief.
34. Palo Alto Stock Farm's b f Morning Glory, by Electioneer, dam Marti, by Whipple's Hambletonian.
35. J. Cairn Simpson's br c Antevolo, by Electioneer dam Columbine, by A. W. Richmond.

The Chicago Trotting Stake, 1884.—For colts and fillies (foals of 1880); to be trotted when four years old, at the Summer Trotting Meeting of the Chicago Driving Park for 1884. \$100 entrance, of which \$10 is forfeit, and must accompany the nomination; \$15 on January 1st, 1884; \$25 on June 1st, 1884; and the remaining \$50 from those who start only at or before 8 o'clock p. m. of the day preceding that named for the race. The Chicago Driving Park to add \$2,500. Closed on March 1st, 1883, with 59 nominations, of which the following paid the second installment of \$15 on January 1st, 1884, and remain eligible for the race:

1. T. Anglin's br c Wilkes Boy, by George Wilkes, dam by Mambrino Patchen.

Growth of the Turf—Some Interesting Figures.

The report of Secretary Vail to the National Trotting Association at the late bi-ennial Congress was very elaborate and complete, and gives an index to the steady development of the trotting interest, and the commercial value of the sport and its appurtenances. It also gives an idea, incidentally, of the amount of clerical labor and the mass of statistical and other matter that falls to the care of the Secretary of the institution which is growing to be somewhat ponderous and proportionately unwieldy and expensive. Briefly the report showed that the National Association was entering its fifteenth year, the last ten of which have been marked by a steady improvement. In 1870 the association was made up of 51 associate members. In 1883 its roll of members numbered 217, divided as follows: Eastern division, 39, the territory of which includes Canada, Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont; Atlantic district, which includes Delaware, the District of Columbia, Maryland, New Jersey, New York and Pennsylvania, 65 members; Central district, 36 members, which includes Alabama, Indiana, Kentucky, Missouri, Ohio and West Virginia; the Western district, 64 members, located in Colorado, Dakota, Illinois, Iowa, Kansas, Michigan, Minnesota, Nebraska, New Mexico, Texas, Utah and Wisconsin; the Pacific district, 13, all of which are in California. Under the rules, all associate members are required to make a return of all trotting over their several tracks, the reports to include the amount and value of all purses, the names of all contestants, their position in each heat, and the time made. From these reports Mr. Vail was able to present the following official return of the trotting for the past year:

In 1883 217 members were enrolled, of which seven abandoned their meetings owing to bad weather and other causes, and two failed to supply official reports, leaving 208 from whose official reports it is ascertained that they administered 2,244 speed classes, for which they received 15,842 entries, of which entries 9,868 started in contests for the purses and stakes, hung up as follows:

Purses and added money.....	\$924,309.50
Add for stakes and sweepstakes.....	30,352.50
Add for two unreported members amounts ascertained from newspaper reports.....	4,860.00
Add for two meetings omitted by the reporting members, amount, ascertained from publication....	5,995.00

Total value of purses and stakes competed for in 1883..... \$965,517.00  
 This total is an enormous increase for 1883 over previous years. The total for 1882 was \$697,124.32; for 1881, \$639,189.50, and for 1880, \$680,873. The obligations for

entrances-money for the same years are as follows: For 1883, \$664,502.68; for 1882, \$510,070.43; for 1881, \$463,388.25, and for 1880, \$448,384.50. The unpaid entrance-money for the same year, as reported, with suspensions of those failing to keep such contracts, is as follows: In 1883, \$40,209.50; in 1882, \$42,927.75; in 1881, \$38,796.50, and in 1880, \$45,297.50. This is certainly a very creditable showing, for it must be remembered that in nearly all cases the entrance-money is ten per cent. of the purses, and it speaks well for the honor of those engaged in trotting that there is so little repudiation of what many people hold to be but little better than a mere gambling contract.

Another feature in connection with trotting is the comparatively small number of persons and horses that have been punished by expulsion during the fourteen years that the National Association has been in existence. In connection with which due consideration must be given, not only to the vastness of the territory covered by the National Association, but also to the strictness of its rules, and to the temptation that exists in connection with nearly all races to earn money easily by dishonesty than to fight and work hard for it honestly.

Total number of persons expelled during fourteen years.....	297
Number of same restored during fourteen years.....	125
Number of persons under ban of expulsion on Dec. 31st, 1883.....	172
Number of horses expelled during fourteen years.....	172
Number of same restored during fourteen years.....	75
Number of horses under ban of expulsion, Dec. 31st, 1883.....	97

This is certainly an excellent showing, and should go far to remove the opinion of many that trotting for money is akin to stealing. In connection with the above figures the following extract from Secretary Vail's report should be taken into consideration: "When we consider that these figures are made at the end of fourteen years' experience, during the last ten of which the business of the members has been large, we may regard the numbers involved in this severest of our penalties to be really small. It should also be remembered that nearly all these expulsions have been imposed upon the orders of members and their judges, and that in many cases the parties affected by such orders had no previous opportunity to be heard in their defense; thus a reason appears why in some cases the expulsions are removed by the Board of Review upon petition or appeal, when all the evidence is considered, as well as all the reasons for the exercise of a very limited pardoning power."

In the way of contrast an important feature of Secretary Vail's report is his tables showing the number of trotting associations—no doubt principally small agricultural fairsocieties—that held meetings in 1883 outside the rules of the National Association, from which it appears that there are 350 of such associations, and that the total amount of money announced by them in purses and premiums was \$228,444.50; which added to the amount as reported won under the national rules, with the amount reported as won by the runners in the same territory as compiled in "Krik's Guide" for 1883-1884, makes the following grand exhibit:

Trotting—Amount won under National rules.....	\$965,517.00
Trotting—Amount won outside National rules.....	228,444.50
Running—Gross earnings in United States and Canada.....	1,301,210.25

Grand Total..... \$2,495,171.75  
 With so excellent a showing, without taking into consideration the claims of breeders and the influence of racing, both running and trotting, has on horse-breeding from a purely mercantile standpoint, it would certainly seem about time that the law shall cease to regard those engaged either as owners, trainers, drivers or riders as mere gamblers, to be blackmailed by every petty official from Maine to California, and that they shall receive the same protection in law as those engaged in so-called legitimate businesses.

Declarations of the Washington Park Club Stakes.

This following list of declarations has been received from the Secretary of the Washington Park Club of Chicago. The Lakeside, Kenwood and Hyds Park are p. p. stakes; the Egglewood, Drexel and Sheridan h. f.

- Lakeside Stakes.**  
 Gray and Co.'s b f, by Young Billet—Fan Farris.  
 Gray and Co.'s ch f Queen Malloy, by Pat Malloy—imp. Queenraft.  
 W. L. Scott's ch f Radha, by Algerine—Nannie H.  
 W. L. Scott's b f Florio, by Virgil—Florence I.  
 A. Stude's b or br f Sulita, by Rebel—Aurelia Westheimer.
- Kenwood Stakes.**  
 Gray and Co.'s ch g Celsus, by Faustue—Lady Restless.  
 J. T. William's ch c Cridge, by King Alfonso—Britomarte.  
 Milton Young's ch c Doubt, by St. Martin—Perhaps.  
 Milton Young's ch c King Dan, by King Alfonso—Sister to Joe Daniels.
- Hyde Park Stakes.**  
 Gray and Co.'s br g Bill Adle, by Faustus—Lighthouse.  
 W. L. Scott's b c Krishna, by Algerine—Ella T.  
 W. L. Scott's br f Florio, by Virgil—Florence I.  
 Jas. T. William's ch c Cridge, by King Alfonso—Britomarte.  
 Milton Young's ch c Doubt, by St. Martin—Perhaps.  
 Milton Young's ch c King Dan, by King Alfonso—Sister to Joe Daniels.
- Englewood Stakes.**  
 S. Powers and Son's b f, by Aramis—Bedell.  
 W. L. Scott's h f Nirvana, by King Alfonso—Maggie Hunter.  
 W. L. Scott's b f Viola, by Billet—Belle Palmer.  
 W. L. Scott's ch f imp. Lison, by Nonget—Loire.  
 B. C. Thomas' ch f Reverta, by Fellowcraft—Lon Pike.  
 B. Woodford's b f Nettie Howell, by Billet—Nettie Viley.
- Drexel Stakes.**  
 R. C. Pate's ch g Envoy, by Enquirer—Satinet.

 W. L. Scott's b g Wellington, by Billet—Bourbon Belle.
- Sheridan Stakes.**  
 R. C. Pate's ch g Envoy, by Enquirer—Satinet.  
 W. L. Scott's br g Simoon, by Algerine—Tunis.  
 W. L. Scott's br g Tunis, by Algerine—Oleaster.  
 B. G. Thomas' ch f Reverta, by Fellowcraft—Lou Pike.

Mr. E. T. Allen, 416 Markt street, is one of the most enterprising men in his line of business we have in the city, and reliable in his transactions. In another column will be found his advertisement of the Davis breech-loading gun, which has become popular with many. As the trap season has opened, those waiting a new gun, would do well to visit Mr. Allen's establishment, where they will find a full assortment of sportsmen's material.

In a Vancouver Stable.

I spent a couple of days at Vancouver during the fore part of the week, and went out to the pretty little half-mile track that looks down on the lovely Columbia. Here I found John Pender with a dozen head of trotting stock in winter quarters. May Winter and Klamath Maid were not there, being turned out for the season in a pasture below town. But there were seven or eight head in the barn which deserved more than a mere passing mention. First of these was St. Patrick, a large black stallion, bred by H. P. Isaacs of Walla Walla. He is by Dexter, out of a Snow Storm mare, and stands seventeen hands high; and yet he can trot very close to three minutes when in order. He is ranked merely as a horse of all work, and yet it is doubtful if any such horse on the coast can out-trot him. In the next stall to him was a chestnut stallion, Young Kiser, got by the dead hero. He is four years old, sixteen hands high, has four white feet, a blaze face and a perfect temper. He also belongs to Pender.

Lucy S., a rich red chestnut filly, got by Reed's Hambletonian Mambrino out of Bellfounder Maid, by Milliman's Bellfounder, was in the next stall. This filly belongs to Captain Julius Sorenson, of this city. She is coming three years old and has never trotted in a public race. She is marked with the off hind foot and a small star, and it would be difficult to imagine a more bloodlike mare. Her head and neck are finely enough turned to belong to a thoroughbred, while the shoulders rake backward like the masts of a pilot boat. The ribs round out nicely and the loins arch up like those of a four-miler. The hips, however, are more like those of a five-year-old, and the driving power is fairly enormous. The only fault with this mare, however, is in her feet, which are very delicate. Full of high life, and yet tractable enough for a lady's phaeton horse, this beautiful filly is deservedly prized by her owner, who purchased her at Reed's sale in 1881 for a mere song.

Captain Sorenson has also a chestnut colt named John Redmond, got by the lamented Kiser, out of Bellfounder Maid, and now coming two years old. This is a snappy looking colt, very highly turned and very large of his age. He is more lengthy for his height than his half sister, and stands over more ground. He has a large star and two white heels, and will be heard from in the near future. Unlike Lucy S., he has good feet and will be able to stand plenty of work. Another handsome two-year-old was a brown filly belonging Mr. Pender. She is without white, over fourteen hands high, and will not be two years old until June next. She is by Rockwood, out of a Kiser mare, and already shows fine trotting action. Her name is Lady Maid and she has already been broken both to single and double harness. Next came a chestnut filly called Hazel Kirke, owned by E. J. Jeffery. She is two years old and has a blaze face with two white heels.

Captain John T. Apperson, of Oregon city, has three youngsters in Mr. Pender's hands, one of which is called Harold. He is a blood bay, with star and snip and the nigh ankle white. He is by Rockwood, and may be regarded as a very symmetrical colt. In the pasture adjoining the half-mile track we found Edna J., ch m, by Kiser, now in foal to Adirondack; also Abdallah Maid, ch m, by Lakeland Abdallah, owned by Captain Sorenson; also a mare by Blue Mountain Boy, with a two-year-old and a yearling by her side. The former is by Rockwood, and the latter by Hambletonian Mambrino. In a corral were two black fillies just weaned, both the property of E. J. Jeffery, and both by Rockwood. They will make a splendid match team for that gentleman before long. All the colts at Pender's place are wintering well, and when there is no frost on the ground get as much exercise as is good for them.—Oregonian.

Tom Hal, Sire of Little Brown Jug.

It is probably within the mark to say that there have been fifty Tom Halls in Marshall and adjoining counties within the last thirty years. There must now be twenty or twenty-five. Many of them are more or less related to each other; others have nothing of the family but the name. It had been asserted that the sire of Brown Jug, known first as Moore's and then as Gibson's Tom Hal, was by a wagon horse of unknown pedigree, left in the country by the Federals during the war. After spending some time and trouble in investigating this story, I am unable to find any solid foundation for it. I conclude that it originated in the fact that the dam of Tom Hal was bred in June to a horse that had been used in the army, but failing to conceive, was again bred in August to the Kittrell of Kentucky Tom Hal. This is the plain and direct testimony of his breeder and of Col. Thomas Moore, who owned him from two years of age until sixteen. The horse that was claimed as his sire was of Traveller blood, and was ridden for a year in the Confederate service by Col. Wallace Gordon, as I am informed by Col. Moore. The dam of Tom Hal was a roan saddle mare of unknown blood. The Kittrell Tom Hal, his sire, was a large and fine bay horse brought from Kentucky. It is said that he first stood in Wilson county, and there sired Telegraph and Clipper, both of them founders of families of saddle horses. It would be well to probe this statement. After coming to Marshall county, and when quite old, he sired the Moore Tom Hal. This horse is a rather dingy red roan of about 15½ to 15½ hands in height; a plain horse, of immense power and with deep, sloping shoulders, arched loin, and an eye as bright and fiery as a hawk's. He has been a fast pacer of his day, and one of great endurance, able to show a 2:40 gait under saddle, and to outlast any competitor in a fair ring.

He was foaled about 1863, the property of H. C. Sanders, who sold him as a weanling to W. Yowell; from him he passed at two years old to Col. Thomas Moore, who owned him until his wonderful son, Little Brown Jug, began to make a reputation, when he was purchased by Capt. Thomas Gibson of this county, and has since been owned in Manry.

Col. Moore tells me that for years he had a standing offer of a liberal reward for any colt of Tom Hal, by his mother what the breedings or qualities of his dam, that did not have the saddle gait naturally, and that it was never claimed. This shows, at least, that he reproduced those gait to a degree of certainty which justified some boasting. Many of his colts have been fast. One, a gray horse called Locomotive, is believed by many to have had as much speed as Brown Jug. He was owned by a man whose notions on the subject of training and conditioning horses were a little crude. Some years ago he brought his horse to Columbia and entered him in a pacing race at the fair. After winning the first heat he cooled his horse out by leading him into the creek and standing him there in water up to his belly until called for the second heat; it is hardly necessary to say that the other horse won. Brown Hal, full brother to Little Brown Jug, trotted for us last fall as a four-year-old in 2:27, repeating in 2:29½; this was the very first time he was ever called on to go a mile. Later in the fall he trotted a mile in 2:29, the last half in 1:12½, the last quarter in 30 seconds, timed by two watches.

Mr. Miller's Sale.

The sale of the breeding stock of E. H. Miller, Jr., at the San Francisco Horse Market last Wednesday was well attended and quite satisfactory as to results. Most of the stock had been on pasture from two to three years and was not in anything like show condition, but Mr. Fromberg's instructions were to sell without reserve. The buyers present were mainly of those who take little stock in shining coats as indicative of quality in animals, and Mr. Bowley did full justice to all concerned. The horses sold were as follows:

- Berlin, black stallion, foaled April 11th, 1873. Sire Reeves' Blackbird son of Simpson's Blackbird, he by Camden son of Shark—Dam Addie Lee, by Culver's blackhawk. Second dam the dam of Index—H. S. Beale, \$420.
- Lady Hamilton, bay mare, July 20th, 1868. Sire, O'Neil's Horse son of Old St. Clair, dam May Queen, by Old St. Clair, bred by Judge C. H. Swift, of Sacramento—Capt. Hackett, \$340.
- Ariola, black mare, March 20th, 1875; sire Fred Low, by old St. Clair, dam Lady Hubbard, by Benecia Boy; second dam of Morgan blood—Dan McCarthy, \$127.50
- Rubina, black mare, April, 1876; sire unknown (supposed to be thoroughbred, as she was running in a field with a two-year-old thoroughbred colt), dam Ruby, by Fred Low, second dam Lady Robertson—H. Smith, \$112.50.
- Albion, bay gelding, May 6th, 1877; sire Fred Low, son of Old St. Clair; dam Addie Lee—H. L. Van Winkle, \$190.
- Alcin, brown gelding, May 17th, 1878; sire of Berliu, dam Aristola, by Fred. Low—Capt. Hall, \$222.50.
- Zephyr, black gelding, April, 1878; sire Berlin; dam Ledy Zeitler, by Old St. Clair—Capt. Harris, \$167.50.
- Zena, bay mare, April 18th, 1879; sire Berlin, dam Lady Zeitler, by Old St. Clair; unbroken—Mr. Waters, \$160.
- Zaga, bay mare, 1880; sire Berlin; dam Ledy Zeitler, by Old St. Clair—H. E. Corbett, \$155.
- Alima, black mare, April 29th, 1880; sire Berlin; dam Aristola—Dan McCarthy, \$92.50.
- Adella, bay mare, May 4th, 1880; sire Electioneer, by Ryedyk's Hambletonian; dam Addie Lee, by Culver's Blackhawk; second dam, dam of Index—Dan McCarthy, \$335.
- Adina, bay mare, March 7th, 1881; sire Electioneer; dam Addie Lee—Dan McCarthy, \$175.
- Hambena, bay mare, March 9th, 1881; sire General Benton, of Palo Alto Stock Farm; dam Lady Hamilton by O'Neil's horse son of Old St. Clair; second dam May Queen, by Old St. Clair—M. Henry, \$475.
- Hamel, bay gelding, April 11th, 1880; sire Electioneer; dam Lady Hamilton—Acker & Leihy, Portland, Oregon, \$400.
- Granetta, black mare, May 4th, 1880; sire Berlin; dam Nellie Grant, by General Taylor, son of the "Morse horse;" second dam by Old St. Clair—Acker & Leihy, \$82.50
- Grantor, bay gelding, May 10, 1881; sire Berlin; dam Nellie Grant, by General Taylor; second dam by Old St. Clair—Mr. Prew, \$120.
- Alenna, brown mare, April 15th, 1881; sire Berlin, dam Aristola, second dam Lady Hubbard, by Benecia Boy—Mr. Scott, \$170.

Good Prices.

At the San Francisco Horse Market last Wednesday, after the sale of Mr. Miller's horses, some other stock was offered by order of a private party, and the prices realized show remarkably well for this time of the year, and indicate the growing appreciation in which well-bred animals are held on this coast. A pair of black roadsters brought \$500, and six head of other horses were sold for respectively \$96, \$157.50, \$147.50, \$135, \$118, and \$105. Total for the eight head, \$1,229; average, \$153.62. Five head of Jersey cows of approved breeding were also disposed of under the hammer, and realized respectively, \$150, \$130, \$110, \$100, \$100. Total, \$590; average, \$118. The grand total of the day's business was \$5,439.

Winter Betting.

There has been some betting on four of the events for the Spring Meeting of the Louisville Jockey Club, the Derby, Cnp, Merchants' and Turf Stakes. The betting on the Derby creates as usual the most interest, and we have had several queries as to who we think will win the race. It is too far ahead to express a preference, especially as there is no leading and prominent youngster that won a majority of his engagements at two years old. We prefer to wait a little longer to see how they stand their preparation, and what they are capable of doing, for with the exception of Gen. Harding, who is not engaged in the Derby, the in-and-out running of the two-year-olds entered for this race was very marked, and none of them exhibited high Derby form such as has been the case on several previous occasions. Boh Miles, who is the favorite, won eight out of twenty-seven races, and is quoted at from 4 to 6 to 1. Powhatan, who is second choice at 8 to 1, won one race out of twelve. Buchanan started five times and finished second in every race, three times to Gen. Harding, once to Envoy, and once to Bob Miles, is quoted at 12 to 1 by some book-makers and 5 to 1 by others. Banquet, Conking, Eva S., Admiral and Royal Arch run from 12 to 20 to 1, and others from 20 to 250 to 1. Looking at these youngsters' performances dispassionately, at present we cannot recommend a single colt to back with any degree of confidence. If you discuss the chances of any named youngsters with one of his friends and point out where he ran in and out, he will at once explain that the colt was not up to the mark in the race he lost. This may be true, but in estimating chances you have to take the whole of his performances.

If one will look carefully over the winter favorites heretofore for this race, every one of them has been defeated with the exception of Hindoo. We think the odds offered on the different colts entirely too small. We would infinitely prefer to take 6 to 4 about a colt on the day of the race, if fit and well and a good jockey on his back, than to take 6 to 1 three months before the race. Youngsters change a deal from two to three years old, and it is too early in the year to say what colts have improved or gone back from their last season's form.—Live Stock Record.

Namee Claimed.

By J. B. Teunent, Pinole, Cal.  
ADELANTE for bay colt with black points; foaled February 20th, 1884; by Anteeo; first dam Lola, by Pilot; second dam by Williamson's Belmont.

Correction.—In our issue of February 9th Mr. E. Newland of Oakland claimed the name of Midnight for black filly, by Belle Alta. A note from Mr. Newland states that he made an error in the description, and that Midnight is a brown filly.

Leveling the Foot.

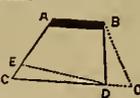

EDITOR BREEDER AND SPORTSMAN:—Some time ago I saw your book "Tips and Toe-weights" advertised in the *Turf, Field and Farm*. Being very much interested in tips and shoeing, I sent to San Francisco for it. Previous to this I had seen the performance of your colt Anteeo, taken from the San Francisco *Call*, which said he trotted the mile shod in tips in the fast time of 2:20, and had never worn shoe.

This was to me most excellent news, for I have contended for several years that our horses were shod to death, and that all that was necessary was to protect the foot from wear at the toe. But when I talked to trotting-horsemen about shoeing trotters in tips, was always laughed at; so I rejoice in your success, and thank you for your valuable book. I have read the book published by "Free Lance" entitled "Horses and Roads," of which I think very highly, and must say I have learned more about shoeing, or, at least, about not shoeing, than from any author I have ever read previous to your work.

But there is one very important point which you both seem to overlook, and that is the proper leveling of the feet and the straightening of the pastern. This, I am satisfied, is the grand secret of driving the horse barefoot, for if he is out of level he will tread on the low side, and thus wear more and more out of level, and soon become sore and lame. Most of the writers on the foot seem to overlook this point. Russell, in "Scientific Horse-shoeing," levels or balances the foot with a pair of compasses. When Mr. Russell was in our town last fall we had some very interesting arguments on shoeing, and I told him it was impossible to level the foot in the manner described by him. I assert, if the foot is level the wear and growth will be even both in the shod or unshod foot. To illustrate, take a shoe that has been worn long enough to show wear, it should be of equal thickness at each heel, the same at the quarters, and the horse go over the toe exactly in the center of the shoe. Nearly all horses in this country, New York, Chicago, and in all parts in which I have been, wear their shoes most on the outside, particularly behind. Have always noticed this to be the case in ankle or knee-knockers.

This, I should judge, was the case of X X, from your description on page 44 of your book, and that accounts for his twisting his foot, and after I show you how I level the foot, think you will clearly understand why the outside tip prevented it. Whenever I have the shoes taken off a horse to be shod under my instructions, I examine the wear very closely. If it is worn the most on the outside I reduce with a rasp the inside, in other words I cut opposite the wear, leaving the outside without touching. This I have found to be an infallible rule, and by following it for a length of time have always got a perfectly round foot, especially when using a bar shoe or tip. In following these instructions you must not let the eye deceive you, for the constant treading on, and the not cutting of the outside will make the angle from coronet to ground surface more oblique, and consequently you will say it is the higher, while on the contrary it is the lower.

I will try and illustrate what I mean by the following diagram. To understand it fully you must know we are standing immediately in front of the horse, and looking at the left or rear front foot at the sides of the toe or ahead of the quarters.

Let the line A B represent the coronet, and C D the ground surface; A C and B D the walls. The lines A B and C D are parallel, and consequently the same distance apart; now, if you use Mr. Russell's instrument of leveling, viz., the compass, or even let the eye decide, you will find you are out, and the balance or level of the foot destroyed, for B D layed on A C equals A E, and E D is plainly out of level, that is to say A C is longer than B D, but of equal height from ground surface, and after the weight or pressure has been brought on the inside of the foot it will spread, and we will have the angle A C O equal B O C, and consequently a perfectly round foot. This I have tried on lots of horses and always succeeded. It is evident this being out of level in the foot will throw the pastern, and sometimes the knee out of plumb, which will add greatly to the difficulty, but by continued application it will, in most cases, effect a cure, particularly if the animal be a young one.

Many of my friends meet me with, to them, the knock-down argument that men do not wear their shoes level, and that it is natural for horses to wear most on one side; my answer is, the cause is the same in both cases, bad shoeing, and if they will have their out-of-level men or horses shod under my instructions I will cure or help them. Persons who do not believe in tips will find this way of leveling an excellent thing for their horses in the manifest improvement in their gait, and in the continued length of time it will take to wear out their shoes. This is self-evident. If the horse treads on both sides alike the wear will be decreased very much. My experience has been that horses scuff out their shoes from soreness, and as you improve their feet you get longer wear from the shoe.

Your allusion to the measurement of Anteeo's foot, on page 68, in which you say, "A circle from the intersection of these two lines struck the toe, outside quarter and the heels, but came a little outside of the inside quarter; otherwise the foot was nearly round," and then follow on page 69 by saying, "He throws the most stress on the outside," is to me still further proof of the correctness of my manner of leveling, and if you will cut the foot down on the inside, or, if you prefer, make the tip thicker and set it very full on the outside, you will find he will soon have a perfectly round foot both in front and behind. This will also remedy the "peculiarity in action" described on page 71, while the weight on the outside had nothing to do with it. Hoping you will try this I will close. If agreeable, I may at some other time write more on the art of driving horses barefooted.

JOHN H. FRENCH.

Pleinfield, New Jersey, Feb. 11th, 1884.

Foals.

Property of J. B. Chase, San Francisco.  
Feb. 20th, Electra, by imp. Eclipse—Heunie Farrow, by imp. Shamrock, a bay filly, one white hind foot and star in forehead; by Wheatley.

Sudden changes of weather are productive of throat disease, coughs, colds, etc. There is no more effectual relief in these diseases to be found than in the use of Brown's Bronchial Troches. Price 25 cts.

Breeding Carriage Horses.

The New York Sun in a recent article on this subject publishes a series of interviews from which we extract the following:

Mr. George W. Bishop, a well-known dealer in native stock, and who crosses the ocean frequently to purchase European horses, said, during a recent chat about American coaches: "There is a remarkable call for fine coach horses. We can't supply one-quarter of the demand. Down in Maine they are beginning to breed horses again that were in fashion twenty-five years ago. Maine horses step through the snow so much that it causes them to move their shoulders more freely than those raised in warmer climates. This makes their chests broader and their muscles stronger and more flexible, and imparts great knee action. They make the best coaches of any country. They have wonderful high action, are always level headed, and possess remarkable intelligence, without any foolishness. You rarely find out that a lady can't drive. Kentucky contributes some very fine horses, but they have not the intelligence and even disposition of Maine horses. They are now breeding Hambletonian with thoroughbred stock. This makes a more symmetrical and finer type."

"Mr. Pierre Lorillard has made crosses on different forms. He has crossed thoroughbreds with large Norman mares. He is now crossing thoroughbred mares with a horse named Howe's Bismarck, a son of Gen. Knox. I believe that in four or five years he will show us finer coaches than have ever been seen in this country. They will combine style and form, and have quite a turn of speed withal. Mr. Lorillard is now working a coupe horse of his own breeding from this cross. He is a chestnut, and, I think, the finest coach horse in New York. I have seen the best four-in-hands in England and France and I can confidently say that no team has ever been shown in Europe equal to Mr. Lorillard's four browns. They are Maine horses. Every one of them can trot better than three minutes."

"Mr. George I. Seney has the finest shaped trotting stallion in this country. He combines the elegance of the thoroughbred with the true form of a coach horse. I never saw but one other horse, Mr. P. Lorillard's Mortimer, that I thought his equal. Prices for carriage teams range from \$800 to \$2,500. Several sales have occurred in which \$5,000 has been paid for high-stepping, fancy teams. This is the market of the world."

Mr. Isaac Dalhman a veteran dealer of imported and native horses on a large scale, from coos to Percherons and Clydesdales, also imparted interesting information regarding carriage horses. Among other things he said: "New York is not what it was twenty-five years ago. With its enormous growth men have become richer, and in place of hundreds of wealthy men there are thousands now. As a necessary consequence there is 60 per cent. more demand for coaches and 50 per cent. less stock. Formerly many farmers bred line carriage horses. Then came the craze for trotters. Breeders thought they saw more money in raising fast steppers than in carriage horses. Narrow-chested animals appeared that had to be sent along with toe-weights and boots. One in forty, perhaps, would be sold for first cost. If farmers had continued raising coach horses, all of them would have made money. Some breeders are beginning to realize this fact, and the breeding of coach horses is increasing. We get our best native horses from Kentucky, Ohio, Michigan, Illinois, Indiana, Iowa, Wisconsin, Maine and New York. But the demand is immense, and can't begin to be supplied. If a rich man desires to purchase a pair of perfectly matched steppers, with style and action, he can't procure them at any price. I could readily dispose of 300 pairs at home and 200 teams for European customers if I had them. The most stylish and fashionable teams bring from \$3,000 to \$5,000. The average teams run from \$500 up. But, as I remarked before, there is a demand for stylish horses that cannot be supplied at present. That is the reason I am importing stallions of style and high action from France for breeders in this country. They are as short of carriage horses in Europe as they are here. They prefer American bred horses to their native stock, because ours are better broken, easier to handle, and more intelligent."

"Mr. C. J. Hamlin, the grape sugar millionaire, of Buffalo, has purchased the majestic trotting stallion Mambrino King, and I have sold him several large French coaching mares. His idea is to cross the mares with Mambrino King and other great American trotters. The sire will give them style, and the dams will impart size and action."

How It Will Be.

The following short but pointed disquisition of breeding trotters is by Dr. L. Herr, of Kentucky:

I will make a guess to see how it will be in 1890. Now the record is in favor of high-bred ones—Maud S., 2:10, and Jay-Eye-See, 2:10, grandams thoroughbred—and I predict that in 1890 the credit of the best record in repeating heats will still be in favor of a high-bred one, that either the dam or grandam will be thoroughbred.

Some who are fighting high breeding may argue that the above were mere accidental hits, but the dam of Maud S., 2:10, also produced Nutwood, 2:18, and other good ones by different sires. Many others could be named that have a thoroughbred cross, either in the dam or grandam. There is no use squirming, it can't be got over; Maud S. and Jay-Eye-See (grandams thoroughbred) have beaten all the theories and crosses that have been made since the world began, either by judgment or accidental hits, to say nothing of the innumerable chances against it, very few until late years having had confidence to breed so high in blood. If the number of chances stood as much in favor of high breeding for the last fifty years, it would make a vast difference in favor of high breeding. It is like one chance against five thousand, and still the short side has beaten the long one. Some have tried and failed breeding thoroughbred unres for trotters, starting all pedigree and no mare.

My favorite foundation for trotters is a tried trotting sire to a thoroughbred mare of the right form and square gait, and that has produced a trotter herself in 2:30 or under, then we have a strictly thoroughbred mare to start on, and a good prospect for a trotter in the first or second produce. I have now a select number of brood-mares who have either dams or grandams thoroughbred, and in quality are an ornament to any breeding establishment.

A cablegram from London, under date of February 20th, says: Mr. Tom Cannon made a very good beginning at Sandown Park to-day with the American-bred horse Schem, which he purchased last summer from Mr. Pierre Lorillard, by winning the Sandown Grand Prize, to which the nice little eum of 500 sovereigns had been added. It was a handicap at two miles, over eight hurdles. The betting was 3 to 1 against Schem.

## Effect of Soil on Breeding.

That veteran writer upon live-stock topics, A. B. Allen, says that horses which are bred on flat, soft, rich soils never grow the clear, tough hoof, ivory-like bones, and powerful muscles that do those which are reared on a dry and somewhat hilly region. This agrees with the observations of many breeders, and the facts may furnish a valuable hint to purchasers of horses. It is well known that the horse of the plains and the hills of the far west has in the highest degree the good qualities of hoof, bone and muscle mentioned. Any lack of size and symmetry which these horses may show can doubtless be remedied by judicious breeding, retaining the good qualities already possessed.

## CRICKET.

## The Grass Valley Cricketers.

The Union Cricket Club of Grass Valley, recently held their annual meeting at Van Hotten's Building, Mill street. The Secretary's report showed that out of the nine matches played throughout the season the club had won five, lost three, while the remaining match was drawn.

Date	Score	Winners
March 18th	Won by 52 runs	Unions
May 22d	" " 58 "	Unions
June 13th	" " 13 "	Grass Valley Club
July 5th	" " 7 "	Unions
July 29th	" " 13 "	Unions
Aug. 6th	" " 7 wickets	Grass Valley Club
Aug. 19th	" " drawn	
Sept. 3rd	" " 109 runs	Merious
Sept. 4th	" " 5 wickets	Unions

The large attendance of members, and the great interest displayed at the meetings speaks well for the success of the approaching season. The following gentlemen were elected officers for the year: President, George Fletcher; Vice-President, O. H. Reynolds; Secretary, Thomas Luke; Treasurer, T. Wilson; Captain, N. Veale, Vice-Captain, R. Shugg; Committee on Membership, O. H. Reynolds, T. Wilson, and R. Hathon; Committee of Arrangements, N. Veale, T. Luke and J. Oliver. Having secured club rooms which are suitable for athletic exercises, the officials have wisely determined to add that branch of physical education for the benefit of the members, and for the purpose of securing new members. The members of the Union Club have been practicing hard since their defeat by the Merious last September, and according to private information with very great success, and as the Unions are to play with our clubs early this season, some very interesting contests may be looked for. It affords us great pleasure to notice the advancement of the club in the past. With such a genuine sportsman as George Fletcher as President, backed up by the enthusiastic officers just appointed, the future success of the club is assured.

## In the Colonies.

The annual Intercolonial Cricket match between New South Wales and Victoria came off on December 26th, at Melbourne.

The N. S. Wales team was the first to handle the willow, and before the fall of the last wicket, had compiled the splendid total of 412: Murdoch, 158; Jones, 52; Evans, 33, and Garret, 64, being the principal scores. The Victorian contingent responded with 420, thanks to Horan and Scott's large scores of 126 and 114 respectively. The second innings of New South Wales only totaled 143; this left the Victorians 136 runs to win the match, which they obtained with the loss of 7 wickets. McDouald, 42, was the highest contributor. The N. S. Wales team was very weak, and after the first day's play lost the services of Evans, owing to domestic affliction in his family. Immediately after the conclusion of the Intercolonial match, at Melbourne, the management of the fourth Australian team selected eleven out of the thirteen players who are going to England to battle for Australia. They are as follows: Murdoch and Bannerman, of Sydney; G. Giffen, of Adelaide; Alexander, Bonnor, Boyle, Blackham, Palmer, McDonell, Cooper, and Midwinter, of Melbourne; Evans, Massie, Garrett and Horan were unable to go. Spofforth is on a ranch in Queensland and is very uncertain, but it is thought when the time arrives for starting, Spofforth will go, and in that case one more man will be required to complete the team, and recent performances justify the selection of Scott.

The bowling department will be represented by Spofforth, Palmer, Cooper, Giffen, Boyle, Scott, Midwinter, and, if necessary, Bounor will be able to take a turn. All the players have been to England before except Cooper and Scott (if he is selected). The Australian team will meet the All-England Eleven three times. It is believed that the Australians will go back home through America, consequently, twenty-two of our local players will have an opportunity of meeting these formidable opponents and, of course, will suffer defeat, although a stronger team can be selected than the last one that represented San Francisco.

The new Australian team started in a match on January 1st, against a team consisting of Bruce, Horan, McShane, Scott, Turner, Walters and Lewis, of Melbourne; Jones, of Sydney; Jarvis, Noel, and W. Giffen, of Adelaide. The new Australian team were the first to defend the wickets, and at the end of the day's play the score had reached 328 runs and only three wickets down. At the end of the second day the gigantic score of 619 was reached for the loss of 9 wickets. The following is a complete score of the two day's play: Bannerman, 11; Giffen, 53; Midwinter, 9; McDonell, 111; Bonnor, 2; Palmer, 5; Blackham, 0; Alexander, 50; Cooper, 52; Boyle not out, 40; Murdoch not out, 279. Murdoch's score of 158 in the Intercolonial Match, and his unfinished innings of 279 in the present match, conclusively demonstrates his right in the title of the greatest batsman of the world. On the arrival of the next boat we give our readers the finish of this remarkable game.

It is stated on reliable authority that every preliminary is arranged for a visit of an English professional team of cricketers to Australia. The promoters of the team are Alfred Shaw, Arthur Shrewsbury and James Lillywhite. Barnes and Gunn have consented to join, and there is every prospect that the team will be a very strong one. They will leave for Australia in September; it is not yet arranged whether they will come out through San Francisco, but it is to be hoped they will, so that our cricketers can once again test their skill for leather hunting against these great foemen as on the last never-to-be-forgotten occasion.

## HERD AND SWINE.

## Seasonable Pig Points.

As the time draws near when breeding-sows are due to farrow, increased care should be taken that they do not suffer from neglect. Usually, if allowed to have her own way a sow will absent herself from the herd for a day or so before farrowing, and seek a retired place in which to make her bed. But it is not always possible for her to get away from her companions; and it often happens that she is injured by being required to fight her way in the herd, when heavy with pig, before she is prompted by nature to retire from the jostle and activities of life, common among even the best bred hogs.

The right way, and that almost universally recommended by experienced hog-raisers, is to place the sow in a yard by herself where she will be safe from injury by other hogs or other farm stock. In all well-managed breeding establishments, suitable yards and pens for sows at this time are provided, and they are placed in them several weeks before farrowing. This allows time for them to become accustomed to the change of living apart from the herd. They are more contented, and less apt to be cross and savage when their pigs come. Their diet can be better regulated so as to have them in the best possible condition of health. This latter point is of greater importance than is often supposed. Not only will the sow farrow more safely, if in good health, but the pigs will be stronger and more thrifty. The milk of the dam will be more abundant and more healthful, thereby causing the little pigs to thrive well from the very start.

Although the sow should be kept from the herd at this time, she should not be too closely confined. It is better that she be allowed all the exercise she may be disposed to take. When the weather is favorable she will go to the pasture or orchard, if near by, with much advantage from the exercise thus had. She will soon learn to return to her own yard and pen when called at feeding time.

Men of experience in the management of sows at farrowing time, differ greatly as to the amount of hedging they should have; but nearly all agree that a railing, or guard, should be placed on two sides of the pen in the corner where her bed is made. This guard may be a six-inch fencing board set on edge, the lower edge being seven inches above the floor, and the board itself seven inches from the wall, or side of the pen, with proper supports at ends to keep it in place. Beneath and behind this board the little pigs can slip when the sow lies down. Otherwise they are liable to be crushed against the wall. This guard, however, will be of little use if the sow be allowed too much bedding, or if the material be too long or coarse. In such cases the space becomes filled with the bedding and the pigs have no way of escape, unless the sow lies down very carefully.

Young pigs are very sensitive to the cold, and if allowed to become chilled before they have learned to suck it is very hard to save them. For early spring litters, it is best, therefore, that the pens be well protected from cold winds, and even from frost. Banking up on the outside with stable manure is sometimes practicable. Good success is had with pens on hillsides. The best pen for early spring farrowing we ever had was made by digging into a steep hillside and roofing it over with poles and straw, and then with earth over all. The basement of a hank barn is also a good place, if not too dark and damp.

The careful breeder—the one deserving of success, and the most sure to win it—will know from his breeding register at what time to expect each sow to farrow, and when the time comes he will be ready for whatever emergency may arise. If the weather is extremely cold he will have a fire at the hog-house, the barn, the shop, the wash-house, or even on the kitchen hearth; and be prepared to sit up half the night, if need be, with lantern, basket and blanket, ready to remove the pigs as fast as they come, to a warm place. By taking them away at once the sow will not be annoyed by their cries, and they will not be chilled to death, as they most surely would be in less than an hour if uncared for. Soon as all have come, the sow should have a warm drink of scalded bran and shipstuff. If then the pigs are brought her, she will lie down and allow them to suck.

If all has gone well to this time, the little fellows will soon nestle by her side, and both sow and pigs will sleep quietly for an hour or more. A huddle of dry straw should be thrown over the pigs to help keep them warm. Should the weather be mild, or the pens well sheltered and warm, the removal of the pigs as they come is not so necessary, although it is not a bad plan, in any case, if carefully done.

Spring pigs being, as a rule, worth more than any others, it is a matter of the greatest importance that as many of them as possible should be saved. If lost, the main profits of the year are gone. When we consider their importance, therefore, as a source of wealth to the breeder and the nation at large, we cannot be too careful in providing for their safe delivery, and in so arranging that they may thrive and do well from the first. Let no one, therefore, having sows in farrow at this time, allow them to be neglected.—*Breeders' Gazette.*

## Heavy Loss of Sheep.

[Red Bluff Sentinel.]

The cold dry weather, and the recent storms that followed, have killed thousands of sheep in Colusa county. We learned this morning that Hugh Logau has already lost over 3,000 head. It is also reported that Mr. Stoveall has lost heavily and may lose all he has. N. S. Nye and Milt. French have also lost a great many and their sheep are still dying. These gentlemen graze their sheep on the plains and foothills west of and between Willows and Williams, the atack having a large territory to run over, as far west as the mountains. Colusa county farmers and sheep raisers have no doubt done the same thing that many farmers and wool growers in Tehama county have done—burned hundreds of tons of good, clean straw, which, if it had been stacked and sheep allowed to feed on it, would have saved the lives of nearly all that have died from cold weather and starvation.

Sheep raisers must learn by sad experience, if no other way, that they will have to prepare hay and straw for their flocks for emergencies—cold, dry winters—such as we are now passing through, if they would avoid a large death rate among their flocks.

Not only is the death rate large, involving a heavy loss of sheep, but the spring clip of those that "pull through" the winter, is not near as good and will not bring as good a price, as the wool clipped from sheep that have been in good condition all winter.

The loss of sheep in Tehama county so far has been comparatively small, but from information obtained from sheep raisers the percentage of lambs raised this spring will not be as large as last spring.

Again we say to farmers, don't burn your straw; and to sheep raisers, put up stacks of straw for your sheep during the winter. It is said that straw, properly stacked, like old wine, improves with age.

## To Close To-day.

Stakes and purses of Pacific Coast Blood-Horse Association.  
Stanford Stakes 1884. See Advertisement.

## THE DRAMA.

## California Theatre.

During the week, to houses somewhat diminished in numbers, though not in intelligence, culture, or wealth, Mr. Sheridan has been playing the leading characters of Shakespeare—Hamlet, Iago, and Richard III. Of his Hamlet, we forbear to express an opinion, because no two leading actors in this world are agreed upon the exact interpretation of this strictly ideal and mythical character. Hence, we have a score of Hamlets to choose from as the correct one. It is enough to say Mr. Sheridan's Hamlet is good as most and scholarly as any, but it remains doubtful yet, whether Shakespeare's Hamlet has ever been or ever will be given to the world by any actor. We regret we cannot say as much for his Iago. The conception is good and well given, but it is not snakey enough, and in his method of speech he is altogether too stogy, and too identical. Perhaps, no man but old Fagan ever could give us a true Iago. The character is too much over-rated, and should never be preferred by great actors to Othello, which is one of the most perfect ever written for the stage in any age. In ambition, war, love, jealousy and death, Othello is great, but Iago is simply a snake and nothing more. We could never understand the precedence given to the one over the other by leading actors. Mr. Aveling's Othello was good in many respects, the limited capacity of his voice being the greatest drawback. Miss Henrietta Osborne's claims as Amelia were often and emphatically recognized. Next week Miss Lewis appears here, opening with Article 47.

## Oakland Theater.

The houses during the week, to witness Under the Gas Light, have been large and enthusiastic. Miss Charlotte Tittle played Louisa Courtland with her usual grace and power, extracting emphatic recognition from the Oakland and city press for her performance. There is scarcely any character beyond the abilities of this rising young actress, and we hope soon to see her in the highest walks of her profession. Mrs. Ward and the company generally acquitted themselves with great spirit, little Minnie Tittle, as Peaut, and in her character songs especially, proving her popularity and talent. Red Pocket-Book occupies the stage next week.

## The Vienna Garden.

During the week, Mr. Walters never gave a more popular entertainment than the present since he has been at the head of the establishment. Among the best pieces, we have to notice the acrobatic talent of the Marvels of Peru, who, in their comical act of Sullivan and Slade, kept the house in convulsions. Of the kind, it was certainly one of the best caricatures we ever saw. The Tyrolese singers were again very well received, and their performance is musically good in every respect. Miss Louise Dittmar's cornet solos have only one fault—they are too short. She is a thorough musician on almost every wind instrument known. Miss Nelson with her conjuring, trained dogs and pigeons, is quite a feature of the performance, and always received with marked applause. Next week the programme will be quite as varied and interesting, so all wishing to pass a pleasant hour cannot do better than visit the Vienna Garden.

The pooling and hook-making privilege for the inaugural meeting of the Washington Park Club, Chicago, has been awarded to Charlie Bush at \$4,405 per day. For the eight days the aggregate will be \$35,240. It is understood that Ira E. Bride is an equal partner with Bush. The pool-men will be allowed 3 per cent. on auction pools and 5 per cent. on French mutuals, which will necessitate an average sale of \$110,000 per day to make the pool-sellers whole.

Granddaughters of Vermont Black Hawk have produced forty-four trotters, with records from 2:17 to 2:30. His great-granddaughters have produced sixteen, with records from 2:19½ to 2:30, his great-great-granddaughters five with records from 2:20 to 2:30; his great-great-great-granddaughters one with a record of 2:24½.

L. L. Smith, Lexington, Ky., has sold to S. C. Wells, L. Roy, N. Y., the bay colt Indicator, two years old, by Dictator (sire of Jay-Eye-See, 2:10½, Phallas, 2:15½, and Director, 2:17), dam by Monroe Chief, (record 2:18½) and two miles 4:46), second dam by Mambrino Medley; third dam by Joe Downing (sire of Ahe Downing, 2:20½), for \$2,000.

The Paris correspondent of the London Field, in his report of the Lagrange sale, says: "The seventeen three-year-olds fetched £3,154 or £303 each, but this average would have been just double if Archiduc had not been sold privately to Baron de Rothschild."

The stable of Mr. J. R. Keene, wintering at Sheepshead Bay, is now in charge of Harvey Welch, the well-known colored trainer. Harvey learned his business under Col. McDaniel, and as a whole has been fairly successful.

Great things are expected of the Fleetwood Stable's chestnut filly Fac Simile, three years old, by Enquirer—Faraletta. She is a full sister to Falsetto, and will make her debut at the Lexington Spring Meeting.

The first of the get of Luke Blackburn was dropped at Belle Meade on the 1st inst., by the mare Silver Maid, by Bonnie Scotland. It is a bay colt, with a star and stripe.

George P. Carpenter, who drove Thomas Jefferson in the great Buffalo Stallion Race, ten years ago, died in a Hartford (Conn.) hospital recently. His real name was Luther Cochrane.

General Topics.

Even the argonauts have deigned to enlorge the weather-lately, and at this time of writing, Wednesday the 27th of February, there has been such a succession of days of sun shine and balmy air that the most inveterate grumbler was forced to admit that there was nothing to find fault with thermally. February ended its reign with more than lambl-like docility. It may be that March will "come in like a lion," but that is hardly possible, and if it should, the remembrances of those glorious days will make amends for whatever rigor is in store. To properly portray how delightful they were would require pages of description, and so to abbreviate we can summarize under the word perfection. Let our readers on the other side imagine the finest May days they can remember, and our Iowa friends those in June, the early part of the month, and they will not be far away from the glorious week in this lisp-year month. Immediately after the rain were two mornings when there were slight frosts. A light coating of white on the sidewalks visible to those who rose with this sun, but since then the mornings and evenings have been of the pattern of the summer openings and endings of the days in Sacramento, which means that finer it is impossible to imagine.

These fine days, of course, set the trainers to work. The horses, too, appeared to be imbued with the same spirit, galloping and trotting with a resolution that shows the exhilarating effects of the warmth and enshrine, and were glad to elow it. There is life on the tracks these grand mornings, and in the afternoons there is a fine cavalcade to join in the walks. The race-horses occupy the most of the attention at present, owing to the rees being so close, but the trainers of the trotters are also busy, making the most of the favorable change in the weather. The latter have to go through a longer course to fit them for the duties of the track, and though there may be no expectation of trotting for years, even the education to be successful must be continuous. The English trainers of race-horses claim that a horse cannot be gotten in first rate condition in shorter time than six months, and they also claim that the acme cannot be retained for only a short period. That a race-horse when fat must be carefully haudled until a good deal of the superabundant adipose tissue has been removed is beyond contradiction, and that "making heste slowly" time is gained is also true, but that there should be a point of perfection that only can be retained for a few hours, is not so clear, and this is shown by the many races which the horses of the present take part in, and in which they perform so well as not to show much variation.

The young race-horse has to acquire the proper step as well as the young trotter. While the gallop is the natural fast pace of the horse there is an artificiality in racing that must be taken into consideration. To fly over the ground untrammelled and unhampered by weight is an endowment of nature that is shared by all animals which have a gift of speed; to carry weight, and handle it in the most effective manner for a distance is a part that has to be taught, and there are bright and dull pupils among thoroughbreds as well as in the ranks of the trotters. The variations are not so great, however, and the scale in one case will mark a difference of a very few seconds, in the other there will be so wide a gap that between two young trotters of nearly the same breeding twenty seconds in a quarter are frequently witnessed. In both instances the sluggish may improve so much as to pass the one which starts with so much more brilliancy, and even the twenty seconds between the trotting colts he wiped out in the course of one season.

There are good news from the private training grounds, and though the reports vary all the visitors agree that there is less trouble than usual, and an immunity from disease that may be called remarkable. Distempers, influenzas, epizootics, and ailments of those kinds are not heard of, and insilligence of casualties has not yet rasched us. The rains, by compelling slow work, must be credited with aiding to keep the limbs sound, though dampness is thought to be conducive to troubles of the respiratory organs, and a potent cause of the diseases above named. Among the horses we have seen there is an absence of colds and coughs, and in a tonr of the stables at the Oakland Trotting Park, among the many horses domiciled there, the ailments were of a trifling character. At the most a few cases of cracked heels, and to get through the mud of the past month with so little trouble from this source is truly a source of gratification.

There was one benefit from the comparative illeness of the past thirty days. In the meantime the horses "took up flesh," and though this accumulation might be injurious hereafter, it gives a basis for the fast work which is to come. An increase of flesh means that there has been a building up of the muscular tissue as well as an addition to the fat, and one of the great secrets of training is to eliminate the oleaginous without reducing the fibres which convey the power to the framework. Only the right proportion of the fat, however, must be got rid of, as should the waste be carried to an excess there is not enough left to lubricate, and "muscle-honud" is the result. Internal fat is to be guarded against, and a surplus enveloping the heart and surrounding organs is a great drawback to speed. But flesh made in a short "let up" is mainly muscular growth, and the fatty portion is the superabundance beyond the present wants, which is not deposited until there is a surplus. Therefore, the rains came opportunely, and with fine weather for the next month the trainers will have the best opportunity to get their horses in order.

This track could not be in better shape, as there is plenty of loose dirt for the gallopers on the inside, a smooth surface and elastic for the trotters to work upon outside of the strip reserved for the race-horses. A visitor must get there early these fine mornings to see all that is going on. It is long odds that one or more of the flyers has hed a hrush before hreskfast, and a few mornings ago one of them came tearing through the homstretch in twenty-three seconds. Which one of the fearfully fast divisions which ars now stalled on the Oakland Park ws will not divulge, though it is no breach of confidence to state that there ars three which can show twenty-three seconds, or better down the hackstretch, and it may be that there is more than one that can surmount the grade of this homstretch in that fast time. Lula Riggs, Red Oak, Della Walker, Patsy Duffy, Jocko, Haddington, Blarney, Sir Thad and Cito are the gallopers at work there, and in a few days it is expected that there will be a large delegation from the upper and lower country to give still greater briskness to the scene.

The trotters are in full force. John A. Goldsmith, in addition to those owned by M. Salishury, has a few of the Arno colts in his charge, and these ars sure to call attention to the anction sale of Mr. Valensin on the 1st of March. In the Goldemith string are Director, Romero, Monros Chief, Nutwood, Santa Claus and Gihraltar colts; the Arno colts being a three-year-old by Len Rose, and two two-year-olds by Buccaneer. Goldsmith is also driving James Garland's Regina, by Electioneer, a four-year-old engaged in the Chicago Stakes, and it is very likely that she will show enough to warrant transportation to the "city on the lake." William Donathan has Allan Roy, a sister to that horse which is of promise, Boh Mason, a black filly by Nutwood, and a pacer by that noted stallion which is likely to make a good mark. E. Downer has Tump Winston and a highland grey, and Lee Shaner has Moscow and a green one which has a handy gait. Quite a number of others are exercised on that track, the fast pacing mare Corette being among them.

This fast mare, which got a record of 2:19, and made a public trial in 2:17, the first and only season she was paced, is exercised by being led by the side of a saddle horse, and it is safe to say that there is not a trotter or pacer in the United States that can beat her "that way rigged." In her hrushes she pulls the saddle horse along and goes at a 2:10 gait or faster with so little effort that it is difficult to estimate what her speed is. From all that can be gained by watching, this kind of training is likely to beadvantageous, as when harnessed to a sulky she is somewhat willful unless permitted to go at her fastest. By the side of the saddle horse she is not only easier controlled, but also carries her head straight, and there is no breeching or girth to chafe her. That she will be worthy of making the eesteru tour is the general opinion, and it will probably be the decision that she shall be given a chance to meet the giants of the lateral motion on their own ground.

THE RIFLE.

Matches.

To-morrow will be a gala day with the riflemen at Shell Mound. First, the much-talked-of match between Lieut. Brown, Officer Linville and Sergeant Nick Williams will take place, the latter having been admitted since the match between the former was made. It will now be a sweepstakes, and the man who makes the highest score at both ranges will take the purse, \$300, and pay expenses of marks and target. The interest in this match increases as the day approaches, and of itself will doubtless draw together a large number of spectators. It is not, however, the only matter of interest there to-morrow. There will also be a match between N. Fields and P. Fields, of the police force, and Lieutenant Townsend and James Treadwell, of the N. G. C. All these four men, like the other three, are very evenly balanced in their percentages, and their friends look to their making at least 230 points each out of a possible 250. This match is for \$20 a side; 50 shots, at 200 yards; military rifles. The shooting will commence at 10 A. M. sharp. While on the subject of matches we may state the Police Team have taken the initial steps to shoot the winners of the military trophy, but at present it looks anything but a certain thing either for the Field and Staff or Company A team. By to-day's report it now looks as if Petaluma had a mortgage on the handsome silver trophy. Hence nothing definite can be said on this matter.

At Harbor View.

On Sunday the Swice Rifle Club held their regular monthly meeting, at which the following won prizes for best center shot. The rotation was as follows: Theo. Wetsell, first prize; F. Hugsten, second prize; J. Bachman, third prize; J. Leeman, fourth prize; P. Croce, fifth prize; M. Steuber, sixth prize; H. Bruner, seventh prize. During this shooting—20 shots, 200 yards, off-hand—Wetsell made 6 hull's-eye, Bachman 5, Leeman 6, and Croce 4. The attendance was small.

At the same time and place the Eintracht Riffls held a practice at which the following scores—20 shots were made: Stamer..... 372 Tapken..... 265 Gumbel..... 357 Schwartz..... 264 Bourke..... 343 Hartnug..... 245 Klare..... 310 Kruger..... 230 Hagerup..... 281 Wertner..... 201 Shuck..... 272 Wolf..... 133

Messrs. R. C. Hauson and F. Cummings of this city have a series of matches on the tapis to settle the difference of opinion that exists between them as to superiority of certain rifles. Mr. Hauson uses the Ballard, and Mr. Cummings the military arm, and the conditions of the outest are that three matches shall be shot at 500 yards, 40 shots each, Hauson to concede Cummings ten points in each match. Time not yet fixed, as both parties desire a little practice before proceeding with the serious business.

At Shell Mound.

The regular practice of the military organizations took place at Shell Mound on Sunday last, at which some very fine scores were made. First, members of the Fifth Infantry Battalion, compsting for places in the hattalion team, made the following score:

	200 yds.	500 yds.	Total.
Private Pierce, Co. A.....	45	46	91
Lieut. Brown, Staff.....	44	46	90
Private Burrell, Co. A.....	44	46	90
Lieut. Kellogg, Staff.....	45	45	90
Sergt. Sherman, Staff.....	43	45	88
Private Waltham, Co. A.....	45	42	87
Sergt. McDonald, Co. A.....	45	42	87
Sergt. Williams, Staff.....	43	40	83
Total.....			706

This shooting is 88, 25 per cent. At the same time and place, Sergt. Hovsy, made the remarkable record of 93 out of a possible 100. In 20 shots, off-hand, at 200 yards, he made 13 bull's-eyes, and 7 fours, nine of the former being consecutive. If the "little Sergeant," were as good at the 500-yard range, he would be the boss rifleman of the coast.

Regimental Team of 2d Artillery, for the Month of March.

At the same time and place, this team also made a good score, averaging upon the whole as high as 83, 9-10 per cent.

Private Lods, Co. A.....	88	Lieut. Sime, Co. B.....	84
Private Notte, Co. B.....	86	Sergt. McClintock, Co. B.....	83
Private Kulbs, Co. C.....	85	Sergt. Beatty, Co. B.....	82
Captain Sprowl, Staff.....	85	Lieut. Lohmeyer, Co. D.....	81
Private Thierback, Co. C.....	65	Lieut. Warren, Co. A.....	80
Total.....			859

At Petaluma.

On Washington's Birthday, Company C at Petaluma made the following good shooting at 200 yards, 10 shots each:

Corporal Wallace.....	46	Private Zartman.....	42
Captain Fairbanks.....	45	Private Vestal.....	42
Private St. John.....	45	Private Arnill.....	41
Private Fox.....	44	Corporal Brink.....	41
Lieut. Zartman.....	43		
Total.....			389

This score make a percentage of 86%. If continued it will be difficult to wrest the Battalion Trophy from them. On the same day the company made a fair record at 500 yards. They have not hitherto practiced much at the latter range, but they intend to do so in future. The score at this range was:

Private Smith.....	45	Captain Fairbanks.....	39
Private St. John.....	41	Captain Wallace.....	39
Total.....			164

To-morrow at Petaluma there will be a match, 50 shots at each range, between Kuhnie and Fairbanks vs. St. John and Wallace.

Captain Whitton, of Company B, San Jose, has promised to entertain the officers of the company and team at a champagne dinner, if the trophy goes to San Jose. We hear some thing of the same from Capt. Fairbanks of Petaluma. This makes our chance of seeing the silver pitcher filled with punch by the Field and Staff team very much mixed up, and in the agony of soul we may exclaim "So near and yet so far!"

General Forman, commanding the Nevada militia, has given a series of gold medals to encourage company practice at the target. In mentioning the fact, the Chronicle calls him Colonel Formen. Was this intentional discourtesy?

The California Schuetzen Club will hold a grand prize match at Alameda Schuetzen Park on the last Sunday in March. A large number of prizes will be offered, the match to be open to all.

THE GUN.

The Trap at Gilroy.

BREEDER AND SPORTSMAN—The pigeon match so long talked of came off yesterday, and was in every sense of the word a success. Messrs. Loupe, Lipsert and Eustice, the managers of the affair, acquitted themselves finely, and came out covered with glory. The best of good feeling prevailed, and nothing occurred to mar the day's enjoyment, except a painful—though, I am happy to state, not serious—accident that befel Mr. P. W. Robinson, caused by a runaway horse. Besides the many sportsmen from Gilroy, there were present several members of the fraternity from San Jose and Watsonville, Hollister, of course, not being represented. Pools were sold on Gilroy, San Jose and Watsonville, Gilroy and San Jose being the favorites.

The first match was at 12 single birds; 21 yards rise; plunge traps; \$5 entrance; money to be divided in three purses, 50, 30 and 20 per cent.; California State Sportsmen's Association rules. Messrs. H. D. Bartlett and Sandy Cameron acted as judges, and P. W. Robinson referee. Their decisions, except in two instances, were entirely satisfactory to all. Following is the score:

O. P. Wilcox.....	1000 w - 2	H. Frutig.....	000 w - 0
F. Coykendall.....	1111 1-6	W. D. Fishale.....	000 w - 0
B. L. Dunham.....	0111111111	H. G. Coykendall.....	10100 w - 2
H. S. Fletcher.....	00110 w - 2	Dan Gilroy.....	0110110 w - 5
John Patue.....	000 w - 0	Geo. Eustice.....	10011111111111
Ben. Roundtree.....	111101111000	E. Leavesley.....	01100 w - 2
J. Frizzell.....	101111111010	A. Lipsert.....	0111010 w - 4
B. M. Pyle.....	301010 w - 3	F. R. Payne.....	11011011111111
W. G. Fuddleson.....	10011110 w - 6	J. S. Delmas.....	1111101100 w - 6
W. B. Hobson.....	1000 w - 1	Geo. White.....	11111100 w - 6

Dunham of Gilroy won first; Payne and Eustice of Gilroy, and Frizzell of Watsonville divided second and third.

Second Match—Double hirde; freeze out; \$2 entrance; one money.

F. E. Coykendall.....	1 1 1 1 1 - 6	J. Lillard.....	0 1 - 1
B. Roundtree.....	1 1 1 1 1 - 6	B. Dunham.....	1 1 0 - 3
H. S. Fletcher.....	1 1 1 1 0 - 5	H. Frutig.....	1 0 - 1
J. Delmas.....	0 0	W. B. Hobson.....	0 1 - 1

Roundtree and Coykendall divided.

Third Match—3 double hirde; \$2 entrance; one money.

F. E. Coykendall.....	1 1 1 1 1 - 6	J. S. Delmas.....	1 1 1 1 0 - 5
W. B. Hobson.....	1 1 1 1 0 - 4	B. Roundtree.....	1 1 1 1 0 - 6
H. S. Fletcher.....	0 1 1 1 0 - 4	D. L. Dunham.....	1 0 1 1 0 - 4

First tie: F. E. Coykendall..... 0 0 - 0 B. Roundtree..... 1 1 - 2

Fourth match—Double hirde; freeze out; \$2 entrance; one money.

F. E. Coykendall.....	1 0	W. B. Hobson.....	1 0 - 1
H. S. Fletcher.....	0	D. L. Dunham.....	1 0 - 2
J. Delmas.....	1 1 1 1 - 4	J. Frizzell.....	1 1 0 - 2
B. Roundtree.....	1 1 1 1 - 4		

Delmas and Roundtree divided.

Fifth match; 12 clay pigeons; single riss; \$2 entrance; first and second money; 21 yards rise.

F. E. Coykendall	101111 111111	1118	B. Roundtree	110101 100011	7
H. S. Fletcher	100000 010101	53	J. Frizzell	000100 000101	3
W. C. Haddison	00 withdrawn	0	J. R. Payne	01110 111010	3
W. B. Hobson	01050 01001	0	J. R. Payne	01101 100111	8
W. D. Tisdale	000101 111111	8			

Coykendall won first.  
Tie on second:  
Tisdale.....1 1 1 1 0-5  
Delmas.....0-0  
Payne won second money.  
Sixth match—12 clay pigeons; single risee; 21 yards; \$2 entrance; one money.  
F. E. Coykendall.....0 0 1 w-7  
W. B. Hobson.....0 0 0 1 1 1 1 1 0 w-4  
W. C. Haddison.....1 1 1 1 1 0 1-8  
J. R. Payne.....0 1 1 1 1 0 0 1 0 w-5  
J. Delmas.....0 0 0 w-0  
A. Herald.....0 0 1 0 1 0 1 1 w-5  
Tisdale won.

Seventh match—12 clay pigeons; \$2 entrance; 21 yards; one money.  
F. E. Coykendall.....001011 101110-7  
D. M. Fyle.....011100 010110-6  
W. D. Tisdale.....111010 100011-7  
Coykendall and Tisdale divided.  
\* Fell out of bounds.

The day's sport concluded with a trotting race, best 3 in 5; half-mile heats between Paine's Pinto and Remington's Alma, which was won by the former. Time, not known.  
Gilroy, Feb. 24th, 1884. J. R.

**A Dispensation of Dampness at Los Angeles.**

EDITOR BREEDER AND SPORTSMAN.—How do you like it? The rain, we mean. We have had all we want and some to spare; in fact, it is getting rather monotonous. Even our duck hunters, who have been imploring Jupiter Pluvius for his dispensations of the moistening fluid, are now calling for an injunction on the above-named prodigal weather clerk, lest the more than abundant supply will obliterate all traces of "blinds" so carefully prepared weeks ago. In fact, the last party who visited the duck "ground" (that is, one of them visited the ground by stepping out of the boat and going in up to his neck) reports the only ground to be seen in a radius of many miles is the half acre on which the house and stable stand, and that only accessible by floundering through mud and water belly deep to a horse. But it is fun for the ducks, giving them an immense lake to sport in out of the reach of even a Chesapeake, while the hunter has no means of approach except in his boat.

It is said of a party who visited the "grounds" last week, and who, after staying all night, came home with bags represented by double goose eggs, that a big mallard, that had been watching their futile efforts for some time, on seeing them hitch up to return home, raised himself up in the water, flapped his wings, and in a very jocular manner remarked, in the deepest of bass—haw, haw, haw, while he tantalizingly placed the rear claw of his left foot to his proboscis appendage. The balance of his remarks were not so well understood on account of the pattering of the rain, but he was thought to have remarked that he would "take a little more water in his."

The young bloods of the town are also swearing like troopers, because they cannot exercise their fast young colts, a goodly number of which can be seen on our streets any fair afternoon, gennine steppers, too, of no mean promise. In fact, Los Angeles is fast coming to the front as a breeder of fine colts. A span of iron grey beauties, by the famous Richmond, sold by our popular literary man Nick Covarrubias to Gen. W. H. L. Barnes, will soon grace the streets of your city.

The Lonisa Rial Dramatic Company, notwithstanding the rain, have been playing to good houses during the past week, placing on the boards "Taken from Life," "London Assurance," "Camille," and "Ticket of Leave Man," all of which were remarkably well rendered.

Some time in the distant future when the bow of promise shall have again appeared in the heavens, the clouds have rolled by, the waters have subsided, and the dove has returned with the olive branch or other evidence of dry land, we will have a hunt and report the condition of game, and the effect of the plenteous downpour. Until then, we remain  
Yours, submerged,  
P.

Los Angeles, Feb. 17th, 1884.

**Opening Day.**

On Friday, as we stated last week, the San Francisco Gun Club opened the season with a live pigeon match at Bird's Point. The day was everything that could be desired, a soft, warm, balmy day of California, perhaps unequaled in the world, and just such a day as should honor the anniversary the people celebrated. It was the intention of the club to have held the match at the Oakland Trotting Park, and here, perhaps better than anywhere else, we may remark, that if Mr. Bird will not put his ground in good shooting order, which could be done with a trifling outlay of labor and expense, we advise them to prefer the park in future. Bird's Point could be easily made a very fine ground for pigeon shooting, but it is not so at present. The match was the regular medal contest, 12 birds each, 30 yards rise, with the use of both barrels, McShane, on account of his gun, being allowed four yards. Besides the first-class gold medal which always excites the ambition of the members, Mr. Thomas Ewing's handsome \$200 silver pitcher was added as an incentive, so the honors of the day were well worth struggling for. Mr. Ewing's present was worthy his reputation as a gentleman, a man of wealth, and true sportsman. In design and execution, it also does honor to the committee selecting and the manufacturer making it. As we said last week it has to be won three times before it becomes private property. Seventeen members entered the contest, Ramon Wilson leading off and killing with his second barrel. We may remark the second barrel was used a good deal all through the day, and in our opinion while the ground is left so full of dips and rises it will always have to be used frequently at Bird's Point. Although the shooting was generally good for the opening day, the chief interest of the contest lay between Messrs. Orr and Gordon, who tied each other up to the last bird. Mr. Orr came nearly losing his eleventh bird, making two very poor shots, but though challenged it was retrieved. The last bird caused considerable betting, both gentlemen being strongly backed by their friends. Mr. Orr missed with the first barrel, shooting right under, but he succeeded better with the second, and with the fall of the bird made a clean score. The moment, however, was too much for Mr. Gordon, and making a very bad miss with each barrel lost both silver trophy and gold medal. For opening day, we repeat the score generally was good.

Wilson	010101 010111	8	Orr	111111 111111	12
Berry	111101 010111	9	Butler	110101 101111	9
Randall	111010 111111	10	Gordon	111111 111111	11
Crandall	010101 010111	8	Havens	010111 101110	8
Babeock	111011 111111	11	McShane	101101 111110	8
Fulter	010101 111111	9	Howard	010111 101111	8
W. J. Goler	010000 101010	4	Hansen	110010 111111	9
Black	011111 111100	8	Bacon	111101 111110	10
Ewing	110111 111100	11			

\*Second barrel used.  
After the grand opening several pool matches were inaugu-

rated, in which, as usual, the shooting was much better. The first purse with \$32.50 "miss and out" was divided by Black, Hansen and Babeock tying at the end on seven birds each. The second purse with \$27.50 "miss and out" was divided by Ewing, Black, Butler, Gordon and Babeock tying on four each. The last with \$17.50 "freeze out" had seven entries, and was divided by Gordon and Butler on four each.

The birds supplied by Burbank, upon the whole were a good lot, and assisted in no small degree to the pleasure of the day, both to the members and spectators.

**Shooting at Gridley.**

A gathering of the best shots of Butte county was held at Gridley on the 22d ult., and they made a grand day of it. For the subjoined report we are indebted to the courtesy of Mr. C. N. Reed, of the Gridley Herald:

The first event was pool shooting. There were twelve entries, at \$2.50 each. First money 50 per cent.; second, 30; third, 20. Six single birds each, 21 yards rise. The score was as follows:

L. D. Freer	1 0 0 1 0	1-3	N. B. Scott	1 0 1 1 1	0-4
C. S. Quimby	0 1 1 0 1	0-3	N. A. Harris	1 1 1 0 0	0-3
G. Herring	1 1 0 1 1	1-3	Lon Rose	1 1 0 0 1	0-3
Briggs	1 1 0 0 1	1-3	H. Briggs	1 1 0 1 1	0-3
W. J. Morgan	1 0 0 1 1	1-3	Ed. Looney	1 0 1 0 1	0-3
R. W. Smith	1 0 1 1 1	1-3	H. J. Robinson	0 0 1 0 1	0-2

Messrs. Herring and Smith divided first money, taking \$12 each; Scott and Briggs doing likewise with second and third moneys, getting \$3 each. An adjournment was then taken for dinner. Upon re-assembling, the regular match came off. There were twenty-two entries, at \$5 each, \$50-purse added, making a pool of \$160. First money, 40 per cent.; second, 30; third, 20; fourth, 10. Conditions—21 yards rise, single birds, two rounds of six birds each. For convenience the shooters were divided into teams. Following are the names of the participants and the score of each:

FIRST TEAM.		SECOND TEAM.			
E. Looney	010011 000111	9	W. J. Morgan	101101 110110	8
F. Peters	001101 101111	8	L. Rose	011111 110110	10
C. C. Epperson	101100 110111	8	S. J. Clements	001101 101111	7
H. Briggs	101100 110111	8	H. J. Robinson	110110 101111	8
V. Bunnell	100011 100111	8	H. Brittan	011111 110110	10
C. S. Quimby	010010 100000	8	R. W. Smith	101010 111111	8
N. B. Scott	001110 100111	7	J. Looney	000011 101111	8
W. J. Boase	111110 110111	10	G. Herring	100011 101000	5
L. D. Freer	000010 100100	10	H. Latham	000110 110111	8
G. R. Summy	010011 100001	8	G. Ditzler	011000 000011	3
N. A. Harris	111110 100001	8	A. A. Scott	111110 110111	9

Messrs. Boase, Rose and Brittan divided first, second and third moneys, taking \$45 each, E. Looney and A. A. Scott doing likewise with fourth money, taking \$8 each.

L. D. Freer and S. Davidson then shot at five birds each. They tied on three, and settled the matter by a "freeze-out" in which Mr. Freer killed his first bird and his opponent missed, thus giving Freer the victory.

Another pool match followed. Six single birds each; \$2.50 entrance; first money, fifty per cent.; second, thirty; third, twenty. Twenty-two entries. Resulted as follows:

Morgan	1 1 0 1 0	1-4	Rose	1 1 1 0 0	0-3
Quimby	1 0 0 1 1	1-4	Smith	0 1 1 1 0	1-4
Harris	0 1 1 1 0	0-2	Bunnell	1 1 0 1 0	1-4
Peters	0 1 0 1 1	1-4	Brittan	1 1 1 1 1	1-6
Herring	0 1 1 0 0	1-3	N. B. Scott	0 1 1 0 0	1-3
Ditzler	1 0 1 1 0	0-3	C. E. Beemer	1 0 0 0 1	1-3
Freer	1 1 0 1 0	1-4	Boase	1 1 1 1 1	1-5
E. Looney	1 1 0 1 0	0-4	Robinson	1 1 0 1 0	0-4
Latham	1 0 1 1 0	0-4	W. J. Waldren	1 1 0 1 0	0-3
Davidson	1 1 1 1 0	1-4	Clements	1 1 0 0 1	1-5
Briggs	1 0 1 0 1	1-4	Epperson	0 0 0 1 0	1-5

Brittan got first money, \$27.50; Boase and Clements divided second and third moneys, taking \$13.75 each. This terminated the day's sport, it being nearly half-past five in the evening when the match was concluded. The poor scores made by so many really good shots is due to the fact that the birds were healthy, vigorous and very strong flyers. Many were fatally hit but managed to get out of bounds before dying. Many of the participants had to do lively work retrieving in order to win. A better conducted or more successful match has never been held in northern California.

**At San Bruno.**

To-morrow a very interesting match will take place at San Bruno, open to any who may desire to enter. The conditions of the match are ground trap or English rules, which permit of the use of both barrels. Twenty-five birds to each shooter; entrance fee \$25. S. A. Tucker of Meriden, Conn., will be among the contestants. Crittenden Robinson, Frank Maskey, Dr. Knowles, Mr. Lambert, and others of our best shots will doubtless enter in the match. At his last visit to California Mr. Tucker got away with our local cracks. On this occasion we hope he may find that he is not the best man in America at the trap.

It has been contemplated to run a special train on the North Pacific narrow-gauge railroad for the convenience of our Sunday hunters during the summer. A very bitter opposition to this arrangement will come from the owners of good hunting grounds along the road, and very properly so. A miscellaneous and disreputable crowd of men calling themselves hunters, have for two years invaded this section on Sundays, who pay no regard to private rights, but who seem to go out especially for wanton mischief. Their vandalism, has been criminally outrageous, and excited intense bitterness among the local land-owners and farmers. There are a number of gentlemen in this section who have striven faithfully to preserve and increase the game on their lands, whose property rights have been shamefully outraged, and whose pockets have been heavily assessed by these Sunday vandals in the past. These gentlemen never refuse the privilege of a day's shooting if properly asked for and properly observed, but they are determined to resist the ravages of the hordes who claim to own their property. We advise the railroad men to attend to this matter, or there will be serious trouble. We shall keep a watch on the lawless brigade during the summer, and expose them without mercy if they give us opportunity to do so.

Our legislators, who in their collective wisdom or folly allowed wild ducks in California to be shot all the year round "according to law," may, perhaps, blush when they read the following, taken from an eastern exchange this week: "The sportsmen of Harrisburg, Pa., are much pleased with the new clause relative to duck shooting in the Pennsylvania game law, which allows this sport only on Mondays, Wednesdays and Fridays of each week. This will greatly benefit the waters of the Susquehanna in the neighborhood of their city, and attract many fowl from below. At one time the best of duck shooting could be had in this section, but the sailing on them with tugs and boats of all sorts (which is now also illegal) and the continual harrasing of them by night and day has almost ruined the sport." We have had pretty much the same experience in some parts of California this year. We may have to fall back upon the Pennsylvania policy before we reach the natural end of our legislative tomfoolery.

Yesterday closed the quail season for 1884. No person, between the 1st of March and 1st of October, can hunt, pursue, take, kill or destroy quail, partridge or grouse. These are the words of the law, and this year the poacher had better heed them.

**BICYCLING.**

Prince still hopes to get on a race against horses. He claims that his proposition is as near an even thing as is possible to make it, with the odds, if any, in favor of the horsemen, if the stories he bears of the staying qualities of the California vaqueros have any foundation in truth. He does not doubt that twelve horses can beat the wheel in a seven-two-hour race, but believes in himself and his partner that they can stand the wear better than the opponent in the saddles. The test in the race is one of endurance on the part of the riders. According to Prince's calculation a horseman who can ride fifteen miles an hour for twelve hours a day, and keeps the pace for six days can surely win the match. We do not believe it would be any great feat for some of our long-distance riders, and the challenging wheelman ought to find acceptors without delay.

Fred Jenkins, the Secretary of the League of American Wheelmen, is under suspension for alleged abuse of his office. He was referee at the great wheeling tournament, at Springfield, Mass., last September. The affair was supposed to be a great success and he charged \$100 for his services. The Springfield Club refused to pay that amount and also claimed the lost money on the tournament. A war ensued between Jenkins and the club, and he and the President of the club, H. E. Ducker, and A. L. Fennessy, its Secretary, are suspended until an investigation is made.

The Boston Herald says that the older bicycle riders in the states have come to realize that lightness, combined with strength and rigidity, is more to be desired than any certain weight. The popular fancy that heaviness is an essential to the roadster is radically incorrect. Corey, on his twenty-four hour ride, was mounted on a thirty-one-pound machine, and went over some of the worst roads that could be found, with better results than he accomplished on a forty-five-pound machine two years previous.

Philadelphia is to have a grand bicycle tournament next June. Arrangements are already being made to make it one of the grandest affairs in the history of bicycling. Prizes to the amount of \$5,000 will be given, which will undoubtedly bring out the best talent from Europe and America. Arrangements are being made to have a special race between Robinson of England and Frazier of Philadelphia, for a medal valued at \$500 and the championship of the world. A half-mile track will be made for the occasion.

The twenty-six-hour race at the Mechanic's Pavilion closed last Friday evening, and was a success in all respects. The records made were: Higham, 286 miles; Prince, 282; Armaido, 258; Hull, 205; Hart, 169. Higham, Prince and Armaido eclipsed all previous records; Higham by 29 miles, Prince by 25, and Miss Armaido by 1 mile. The attendance was liberal, and the riders had no fault to find with the result. They received sixty per cent. of the gate-money, divided.

The Marblehead (Mass.) Bicycle Club have a road-riding record of 12,850 miles for the past season, the leading contributors thereto being: Peabody, 2,530; Shirley, 2,151; Chinn, 1,711; Hathaway, 1,000; Dolifer, 952; Schoff, 920.

The establishment of agencies for the hiring of bicycles and tricycles has become a feature of the trade in England, and the business bids fair to soon become as necessary as that of the livery stable keeper.

Prince and Higham will run twenty miles to-morrow for a small purse. Higham proposes to return to the east in a few days, and this will probably be his last appearance in this city.

G. W. Waller recently rode 200 1/2 miles without a dismount or stop of any kind, Agricultural Hall, London, England.

**A Bull's-Head Dinner.**

On Sunday, the 24th, a party of about eighty gentlemen met at the Davy Crockett saloon, at the junction of Eddy and Market streets, and proceeded from there to the six-mile house, on the San Bruno road, to attend a bull's-head dinner given by Messrs. Geo. A. Jennings, of the Davy Crockett, and Chas. Johnson, of Batchertown. The dinner proved a success and was an enjoyable affair, and although the attendance was much larger than anticipated, so liberal had been the provision made that there was enough and to spare for all. The menu consisted of barbaques of beef, veal and mutton, with roasted pigs, turkeys, chickens, etc. Van Valor and Pete Walsh were the caterers, and they acquitted themselves nobly. The amusements were various, consisting of horse racing, difficult feats of horsemanship, throwing the riata, a sparring match between Messrs. J. Murphy and Frank Frayne, the whole winding up by a song and dance by Professor I. H. Hopkins, of the Waltham Fishing Club. A pleasant feature of the trip out and back was the remarkable skill displayed by Charlie Johnson in handling his six spirited horses. Altogether, the affair was a grand success.

A furore was caused in Kentucky last week by the assignment of Mr. James A. Grinstead in favor of his creditors, giving preference to Mr. John T. Shelby, including all his real and personal property, except such as is by law exempt from execution. Mr. Grinstead has for many years past been actively identified with breeding and racing, and time was when his "green with pink ash" was well known through the efforts of Crockett, Waverley, St. Martin, D'Artagnan, Mistake, and others. Old Lightning, one of the first and best of Lexington's sons, stood at Mr. Grinstead's Walnut Hill Stud, and Gilroy, Alarm, Waverley, St. Martin, and Thunderstorm have succeeded him. As a breeder Mr. Grinstead was highly successful. In addition to those mentioned above, he bred Grinstead, Danger, Decoy Duck, Gabriel, Wallenstein, and many other good ones. Probably no man in Kentucky enjoyed a greater share of popularity. His wealth made him sought frequently by his fellow citizens under financial embarrassment, who never found a deaf ear. His pocketbook was always open, and hence it is probable he has often been imposed upon. His estate covers the Keene Richards farm of eighty-five acres, at Georgetown, valued at \$125 per acre, and the old Coon's estate in Woodford Co. 234 acres, valued at \$200 per acre; two fine residences in Lexington, and a large number of race-horses, all of which will probably be sold, and the proceeds applied to his debts.

Oakland Trotting Park.

Two weeks ago there was a short article in this paper in relation to the purchase by a joint-stock company of the Oakland Trotting Park. Since, there has been a good deal of talk in relation to it, and the project has elicited almost universal commendation. At the present time we do not know of anything that has a greater bearing on the horse interests of California, and if carried to a successful termination will add largely to the value of thoroughbred and trotting stock. Not only to these classes of horses, for the breeders of all kinds of domestic animals are interested, as on this scheme depends the future of the Golden Gate Fair. This is not an idle statement, as it is susceptible of proof that must carry conviction. To obtain an eligible situation for a fair ground in the vicinity of San Francisco or Oakland, the location must be convenient. That is accessible to both cities, the trip from the former not occupying too much time. In these hurrying days minutes are of more consequence than dollars, and though cheap fare is also an important factor in the calculation, no matter how cheap, if there is not rapid and comfortable transit, large attendance is out of the question. There is not a plot of land suitable for the construction of a race-course a mile in circuit, with room for the other accessories of a successful fair ground, and at all to be compared in the conveniences of the Oakland Trotting Park in this respect that can be purchased for the same amount of money. In fact, none other is in the market on either side of the bay, and even when several miles are added to the distance from the City Hall in Oakland and the foot of Market street in San Francisco, there is only a small diminution in the cost of the land, while the other advantages are nearly lost. To give a fair understanding of the situation to those who are not familiar with the location, it will be necessary to give a brief

description. The park is just outside of the city boundary, being the eastern portion of Mr. Wiard's property, which extends from the bay to within a short distance of San Pablo avenue. The track of the Central Pacific runs through the property, and the local trains to East and West Berkeley run over the track, there being a station on it—Shell Mound. This station is not far from the entrance gate on the west side of the course, the time from San Francisco being thirty-five minutes, and the only change is from the ferry boats to the cars at the end of the mole. On the south side is another entrance, and that is one of the termini of the Broadway street cars, which run from Broadway and Seventh streets following San Pablo avenue to Park avenue, and from thence to the track. Thus, on both sides are public conveyances occupying little time in the journey with almost nominal fares. The drives from Oakland are capital, and with Hollis street, from where it intersects Peralta and Park avenue from San Pablo, graded and macadamized, there will be no trouble in the wettest weather.

Therefore, the main feature in fair ground and race-course could scarcely be improved. The "lay of the land" is superb. It is safe to say that the south entrance gate has a higher elevation than any part of Oakland from Lake Merritt to the bay, and there is a gradual slope to Temescal creek, which runs across the grounds insuring perfect drainage. The portion which Mr. Wiard offers for \$80,000 is bounded by Horton street on the west, the other boundaries being the limits of his property. This embodies a good deal more ground than is taken up by the track and buildings, and on it are 186 lots, all of them having a frontage of 50 feet, and in most of the blocks a depth of 125 and 133 feet. A few of the lots are curtailed by the eastern boundary lines running at a different angle from the streets, while others are so much enlarged that the frontage is increased and the depth so much greater that the average will be far beyond 56 by 125. Thus in one block are six lots fifty feet in width, the shortest line 200 feet and the longest 270 feet. There are 186 lots on the plat with wide streets. To arrive at a valuation, actual sales of contiguous property is the best standard. For the lot 50 by 125 on Park avenue and Hollis street, the adjoining block to the race-course, Mr. Emery received \$1,200 in cash, and we learn that the lowest price sold for was \$750. Thus at the minimum price the 186 lots will be worth \$139,500, and here is a basis to build upon that all will acknowledge is a substantial groundwork. We have not space at present to permit the advantages of the location as they should be set forth, though this short description will be sufficient to show that there is an actual, real value in the ground itself. The track is as good as there is. The shape is that which is the most highly approved, viz., stretches of one quarter of a mile each connected by semi-circles of the same length in the turns. Thousands of wagon-loads of manure, sand and sediment have been put on it and incorporated with the soil so that it is all that can be desired. A greater portion of the grading is done on an inside track, and a small comparative outlay will complete it, so that this valuable adjunct to a course where runners and trotters are exercised can soon be constructed. The water facilities are good. On the backstretch is a large tank and windmill with an un-failing well, near the house is another, with horse-power attachment and pipes laid to stables. There are box stalls, a number of open stalls and pens for cattle, sheep and swine, and stands with a seating capacity of 3,000.

Then in addition to the value of the bare land, there are improvements which are worth at least \$20,000, having cost about twice that amount, and which can be rendered available. Now the plan is to issue two thousand shares of stock at \$50 each, which will leave \$20,000 to make additional improvements, and this sum judiciously expended will do a vast deal towards making it one of the finest places in this or any other country. Say \$10,000 for a hotel and clubhouse, \$6,000 to rebuild the stands, and \$4,000 to finish the inside track, and for ornamentation in the shape of planting trees and shrubbery, etc. With these improvements completed, the property will rent for enough to pay six per cent. on the investment, and at the end of ten years, in all probability the property will be doubled in value. In order to disseminate the shares as widely as possible, the plan proposed is to limit the number which each subscriber can hold to ten. This will extend the interest in the meetings and fairs, every share-holder being an active agent for the association.

It is manifestly too important a scheme to treat in one article, and all that can be done now is to call attention to it in this brief manner. Before the next issue of this paper, it is likely the preliminary steps will be taken to organize, and a definite plan of action marked. We have the greatest faith that it will be carried through, as nearly every man we have conversed with has signified his approbation, and very many of them agreeing

to take the full limit of shares. If not greatly mistaken, by the first day of next May every share will be subscribed for, and the matter settled that this opportunity of securing the best location for the purposes intended taken advantage of. The time which has been spoken of that it shall be kept for the specified purpose is ten years, and though we are of the opinion that it would be better to extend the period, have little fear that when that period arrives it will be surrendered. In place of that, we shall look for a park which many citizens of the district will take pride in, and though the value may be quadrupled, it will be retained as a park for many years to come.

The Arno Auction Sale.

It is seldom that there is such an opportunity to get trotting stock at public auction as is presented by the coming sale on March 11th next. It embraces the entire stock of trotting horses, mares and colts owned by G. Valensin, Esq., and which were gathered by him in many years of careful selection and the payment of large prices. Mr. Valensin is an enthusiastic admirer of fast trotters, and being thoroughly versed in the blood lines of the most celebrated, a capital judge of the proper form for a fast trotter to possess, he was peculiarly fitted to make the right selections. The loss of his stallion Buccaneer, and a desire to make a European trip which will take up his time for several years, in a measure compelled him to break up his breeding establishment, and though there was a strong temptation to retain a portion of the stock, he came to the conclusion to sell all. There was another difficulty. In looking over the list in order to choose which to retain, he marked so many that there was not enough left to warrant the expense attending a sale, and the only way out of the dilemma was to sell the whole band. While, of course, there are animals among them which a large majority of experts would express a preference for, there are few which can be denominated culls. There are usually suspicions, when a "draft" is offered that only the poorest comprise the lot, when there are no reservations it is manifest that there is no cause for that kind of charges, and the "picking" left to the judgment of the buyers. In the sale catalogue are sixty-six of such a variety of blood that there is a chance for gratifying the fancy in the lines which suit. Thirty are classified as brood-mares, among them some which are tried matrons, others which can scarcely fail unless blood, form and performances are of no avail. There are three stallions, at the head of which is Crown Point, a horse of established reputation, and Arno and Punch, sons of Buccaneer from finely bred mares. There are seven two-year-olds, eighteen yearlings, and eight others classified as "trotting colts and fillies." Of the latter J. A. Goldsmith has several in charge at the Oakland Trotting Park, all of which show speed of a high character, and some of them that may be termed phenomenal. It always appears invidious to make selections and give prominence to those the writer has the most fancy for, as others may not agree in the award, and then, too, when the preferences are put in print there is a good chance that the future will not sustain the prophet in his vaticinations. That several of the youngsters offered will sustain the most highly colored prognostics, we have not the least hesitation in claiming, and as the opportunity is offered of making a close survey before the day of sale, those who contemplate purchasing can be guided by personal observation.

The sale is set for the 11th of March, at the Oakland Trotting Park, commencing at 11 A. M. Killip & Co. have charge, and of them at 116 Montgomery street, and G. Valensin, Arno Station, Sacramento Co., catalogues can be obtained.

Spring Race Meeting.

Everything is progressing favorably for the Spring meeting on the Bay District Course. In the first place the track will be in such order that the most inveterate growler will be without ground to sustain his snarling. The thorough soaking has "fixed" it so that without other moistening than a surface application, it will be easily kept as soft as it is desirable to have it. There is not a better race-course in the United States; the turns being remarkably easy for a horse to get around, and there is width enough for good starting places whatever the distance to be run. Colonel Dickey will give his attention to this important feature, and there is no risk in stating that there is not a man in California who has had more experience in this particular line. The course will be fitted for galloping upon, whenever the horses make their appearance, and it is always preferable that the finishing touches of the "grand preparation" should be given on the ground where the running has to be done. It may be considered premature to make statements on the day in which the stakes and purses are to close, but for all that we cannot resist the temptation to predict that the

coming meeting will be the most brilliant ever held on the Pacific coast. The reasons for this sanguineness will appear in proper time, and, calling upon all who have horses and colts not to forget that this is the closing day, we will defer further remarks until the entries appear.

### The Stanford Stake.

It may be thought that we are over pertinacious in calling attention to this stake, but feeling that it is of major importance to the trotting interests of California we cannot forego making an effort which is at all likely to aid in obtaining nominations.

There are so many reasons why this stake should receive the support of every one engaged in breeding and rearing trotters, that, at times, it appears supererogatory to do more than call attention to the time of closing. That the main danger lies in overlooking the time for making nominations is very likely, and in that case repeated warnings are in order. Besides this, there is supineness in some, in others a fear that their colts are not good enough to compete with those which are likely to be named. But if not good enough to run the risk of a small sum in comparison with the amount to be won, will it pay to breed and rear those which the owners admit are inferior? Failure to make entries by those who are engaged in breeding trotters to any extent is an acknowledgement of inferiority which cannot be removed by any amount of talk, especially when the pecuniary circumstances are such as to warrant the outlay. This is the last chance, however, to urge that there shall be a worthy support for the Stanford Stake of 1885. It closes to-day, but a great number of our readers will receive the paper in time. A telegram sent before 11 P. M. that the nomination is on the way will be in accordance with the rules, and a letter hearing the post-mark March 1st is also good.

### To Close To-day.

Stakes and purses of Pacific Coast Blood-Horse Association. Stanford Stakes 1884. See Advertisements.

### The Pacific Cup.

It must be borne in mind that the Pacific Cup is a handicap, and that it is not an absolute essential that a horse should be first-class to merit being named in it. As the cost is only \$20 to "declare out," it is well worth that for a chance to win first, second or third money. More than that every one interested in racing will be benefited by a good field to start for the cup, as that will show that there are horses in California the owners of which think that they can go a cup distance. There should be at least twelve nominations, and very few of these to decline the hattle, as we feel confident that the allotment of weights will be satisfactory. Do not make the mistake of neglecting to make the entry to-day, and then regret that you did not avail yourself of the opportunity.

### Book Betting.

As will be learned from an advertisement in the proper column, Killip & Co. have opened a "book" on the coming races, and will publish their rates as soon as the entries are known. This will give "hackers" an opportunity to place their money before the opening of the pool-sales, and this is quite an advantage at times to owners and those who have the cue to what the horses are doing. It often happens that the "long odds" obtainable a month before the races take place get shorter and shorter as the weeks pass, and in this as in other cases the early bird picks up the fattest worm. The rates will be published every week in the *Breeder and Sportsman*, so that our readers will be informed of the state of the market. We are well pleased that this step has been taken, as it will enhance the interest of the public in the races, while it gives the speculators a chance to "back their fancy."

### A Good Chance.

It must be an utterly "no account" race-horse that cannot find a place in the programme of the spring meeting. Distances graded from five-eighths of a mile to two miles and a quarter. Stakes, purses, selling races and handicaps, and then the consolation for those which have not been successful in any of the fifteen that have preceded the purse for beaten horses. To add to the inducements there is free entrance in purses for starters, and it is certainly better to gallop in public with a chance to win than the tiresome monotony of training.

Carefully scan the bill and remember that this day, Saturday, March 1st, is the last opportunity.

### Meeting of Board of Trustees P. C. B. H. A.

On Wednesday next, the 5th inst., at 2 P. M., will be held a meeting of the Board of Trustees of the Pacific Coast Blood-Horse Association, at the editorial rooms of the *Breeder and Sportsman*.

### Alameda County Sporting Club.

The annual meeting of the Alameda County Sporting Club was held in Oakland on the evening of the 28th, for the election of officers for the ensuing year, which resulted as follows: President, H. A. Mayhew; Vice-President, W. W. Haskell, (second term); Treasurer, W. D. Heaton; Secretary, C. R. Yates. Directors, C. A. Edson, A. F. Adams, Thos. Bennet. The club will no doubt hold its first monthly pigeon shoot on Saturday next (March 8th) at Bird's Point; notice, however, will be given as to which place the shoot will take place. The club have closed their club grounds at Mallard Station for the season from March 1st to October 1st, although the birds are very plenty there at present.

## ATHLETICS.

### Advice to Young Athletes on Training.

[L. E. Myers in N. Y. Sportsman.]

**One-Mile Running.**—The work necessary to run a good mile is entirely different from that prescribed for any other event I have taken up. At half a mile it is necessary to know how to sprint, and generally the man with the most speed wins at the finish, but at a mile it is quite different. Most of our best milers are men who cannot sprint at all, and when a sprinter wins at this distance it is an exception. W. G. George, the English champion, is a very poor performer at anything under six hundred yards, yet at a mile he is probably the best man in amateur ranks. It is decidedly staying power that enables a man to run a good mile. Of course the beginner cannot expect to beat five minutes the first time he tries this distance. If he can show five minutes fifteen seconds he is doing well, and there is a chance that he may become a George over a distance of ground. To run a mile it is decidedly necessary to have your stomach in good condition or else you will be sure to suffer with a stitch, in which case your chances to win will be very slim.

Long walks for men who run this distance are often a great benefit, and in any event will do no harm. In practice, I should say run half a mile every other day, and on the intervening days go about half a mile at nearly full tilt. Jogging is also very beneficial, as it helps to harden the muscles and gets you used to going a distance. You will readily see that by thus taking both fast, or half-mile running, and a long distance at a slow pace, that you will be able to strike a gait between the two, and be able to finish well.

It is a serious thing that a great many young athletes, just beginning to run, will insist on trying this distance, thinking that it is an easy thing to run at a slow pace for along while. When they come to the race they find it quite different from running to a fire, or running from, say, Fortieth to Fiftieth street. Most of our good distance men have been or are reformed walkers. The training necessary to walk well is probably the hardest a man can go through, and besides, the men get used to going a distance (no walk being less than a mile), and when they come to run, if they have any ability in this line, they find that it comes quite easy. A prominent runner, who was once a walker, said to me not long since, that when he was walking a mile it seemed a terrible distance, but that now he had the privilege "to get up and git," that a race at this distance seemed hardly anything at all. This goes to show that the idea I have advocated all the way through these articles of a man going beyond his distance is the proper thing, for it is apparent to any one that walking a mile at a stiff pace requires more work than running the same distance.

**Five-Mile Running.**—The same is true of this distance what has been said of the mile. Delaney, our five-mile champion, commenced his career as an athlete by competing in one-hour runs, which were so common and popular several years ago. But I should not advise any young athlete to try such a distance until his bones are thoroughly set. Delaney has passed through the fiery ordeal, but he is an exception. If a young man of, say, eighteen or nineteen years of age has a desire to become an athlete, let him try any other game rather than distance running, and especially should he avoid a distance if his lungs are not perfectly sound. A good many mothers and fathers speak against athletic sports because they have had a son thrown into consumption, or made a wreck, as they term it, by his having undertaken something he was physically unfit for. This mistake is just as liable to occur in the ordinary course of life as it is in athletics. There are hundreds of young men to-day who are gradually dying of various diseases, and who could be thoroughly restored to perfect health by a judicious course of training. John Frazer's wife refused to sanction his training me when I first went there to be looked after, because she thought I was certainly in the first stages of consumption, if not worse off. She still thinks I have consumption, but it is a different kind, i. e., of food. But there is not the least doubt in my mind that but for my timely taking up outdoor sports I would not now be alive. I shall next week take up walking, and added to my personal observations I shall give the ideas of such men as Murray, McEwen and others.

### The American Team for England.

The team to represent America at the next English championship meeting will consist of L. E. Myers, Arthur Waldron, Harry Fredricks, Frank P. Murray and probably Thomas F. Delaney. The three former will represent the Manhattan and the latter two the Williamsburg club. Myers will probably repeat his successes of 1881, and Murray will show English pedestrians the fairest and fastest walking they have ever seen. The whole strength of the combination is in the abilities of those two men. The others cannot hope to obtain better than third place in any race in which they start, and in good company they will be unable to do so well. Waldron is a fast sprinter, but his being champion at 100 yards is not due to his merits. He is not as fast as was La Montague Wilmer, Lee or Stuart, and probably Wendell and Jack White, when thoroughly wound up, would beat him. He is most nervous on the mark, and though very speedy for seventy-five or eighty yards, he does not finish strong at 100 or 125 yards. He is not able to run heats, and other men with less speed repeat much better than he.

As for Fredricks, he never will "be in the hunt" at any distance over half a mile, as George, Snook and a half dozen others can give him yards and a beating under almost any circumstances. Fredricks going to England, while Delaney will probably remain at home, is most unfair to the latter. Delaney is five-mile champion; he beat Myers with ease in

the 'cross-country championship in fast time; he met George when the latter was in this country and beat the English crack a minute actual time (irrespective of his handicap), and when a match race at one mile between him and Fredricks was arranged the latter failed to appear at the mark and the Williamsburger walked over for the prize. On this showing he is certainly a better man than Fredricks, and he should be sent to England as America's representative distance runner.

The team will be numerically stronger than in 1881, but its strength, from an athletic stand point, is but a little greater. Then Myers and Eugene E. Merrill represented this country, and the pair suffered but two defeats. Myers was beaten in a 100-yard race and Merrill lost the seven-mile walking championship to Raby, who is now, and probably was then, a professional. Merrill fainted from exhaustion, produced by excessive training, or he would probably have won. Myers fell shortly after starting in the 100-yard race, and thus they suffered the only defeats in a campaign lasting nearly two months. Myers and Murray may be able to do better this year, but they will be handicapped by anxiety for the success of their companions.

### The Gaffney-Eisman Match.

About one hundred people were present to witness the one-fourth-mile walking match between Gaffney and Eisman at the Recreation grounds, Washington's Birthday afternoon, for a gold medal. After an inexcusable delay of one hour and a half past the announced time both men appeared at the mark. P. Jacoby acted as judge for Eisman while De Alton acted for Gaffney. Edwards, the celebrated walker from Australia, was selected as referee. The race needs little description as at report of pistol both men moved off at a rattling pace, Eisman leading the first 30 yards, at which point Gaffney assumed the lead which varied throughout from 1 to 3 feet up to within about 5 yards of the winning post, when Eisman sprinted and just managed to breast the tape first. Time 1 min. 27.4-5 secs. At least three-fourths of the track is down grade, and as the Recreation ground is not a properly surveyed track, no record can be allowed. Gaffney's judge claimed that Eisman broke and of course the other judge said he did not, and the referee being called into requisition decided Eisman's walking square and consequently the winner of the event. A great many present claimed that they both ran while others contended that they both walked square. At any rate, Gaffney walked square which he most certainly did not do at the last Olympic sports. The whole affair from beginning to end was most unsatisfactory. It is to be hoped that we have heard the end of both their respective abilities, and it is well known that both men can get all the satisfaction at a regular meeting of one of our clubs, at a distance which would really show what stamina is possessed in either man without issuing boastful challenges in the daily papers.

A protest has been lodged against L. E. Myers by two gentlemen well known in eastern athletic circles, Messrs. G. H. Badeau and G. A. Avery, who aver that he is not an amateur, but a professional, and has caused great excitement. For some weeks the amateur status of Mr. Myers has been discussed in certain quarters. At a meeting recently held in Toronto, to establish a Canadian Athletic Association, it was said that Mr. Myers was considered a professional, but the person alleged to have made the statement afterwards qualified his remarks. Then the New York correspondent of the *London Sporting Life* took up the affair and a recent issue of that paper contained an article virtually accusing the champion of being a professional. These statements it is understood are based on the knowledge that Mr. Myers has received a salary as Secretary of the Manhattan Athletic Club, and that he ran at various athletic games throughout the country, when it was known that he was not working for a livelihood. How it will be decided that he had no right to receive payment for his services as Secretary to his club is difficult to understand. Mr. W. Wood, the Secretary of the New York Athletic Club, has been paid for his services, and his predecessor, Mr. C. A. Mahoney, also received a small compensation. Neither of them have ever been charged with violating the Amateur laws. As to Myers running a Fullman, Ill., Pittsburg, Pa., or Boston, he ran there as other athletes did, and the clubs for whom he ran probably paid his expenses.

The protest lodged against Myers was at his request and done in order to have his status satisfactorily established before leaving for England. The National Association of Amateur Athletes will take action in the matter at its next meeting.

The athletic exhibition arranged by the Manhattan Athletic Club of New York, for the purpose of raising funds to defray the expense of the gentlemen selected to go to England to represent their clubs this season, was held on the night of February 16th at Madison Square Garden, and the large place was crowded to excess. The *New York Herald* says "that a more respectable and orderly concourse of people never assembled inside of Madison Square Garden." The bad condition of the track prevented good time being made in the races, all of which, however, were keenly contested. M. W. Ford of the N. Y. A. C. succeeded in beating all previous records at three standing jumps without weights. His three jumps were 32 feet 10 inches, 33 feet 7 inches, and 33 feet 3 inches. The best previous record was made by F. Larkiu, 32 feet 4 inches, at Princeton, N. J., June 17th, 1878.

At last advices Weston had completed 2,950 out of the 5,000 miles he is to walk over the roads, byways and in various halls in England. On Saturday, the 26th ult., after a spell of spring-like weather, he started out from Blackburn (Lancashire) at 6.25 A. M. in an almost hindling swoon and with a very heavy road, his route laying to St. James a Hall, Manchester, a distance of twenty-four miles, which he reached at 1 P. M. He then put in eleven more miles and at 4 P. M. took dinner. After an absence of two hours and a half he resumed his journey, recording 40 miles at 7.45 and 50 miles at 10.16 P. M. As usual he rested on Sunday and on Monday added 50 miles more to his score, making a total of 2,950 miles.

The football match to take place this afternoon at the Recreation Grounds between the University and a picked team of players promises to be unusually interesting. Both teams will be very strong, particularly the picked team which includes all the best Wanderer and Phoenix players left from the old clubs. A large attendance is anticipated.

At a conference of delegates from the faculty of twenty-two colleges, held at New York February 1st, Regulations for Intercollegiate Athletic Sports was unanimously drawn up.

The American amateur athletes will make their first appearance in England, at the Lillie Bridge Grounds, on the 5th of July.

## OUR NEW YORK LETTER.

New Race Course Near Paterson—Wagering on the Spring Stakes—Racing at New Orleans—Gebhardt and Hunter's Dispute—James Keene's New Trainer—Eastern Stake Open—General Notes—Sporting, Theatrical, etc.

Time draws on apace, and yet it is still "the winter of our discontent". Turfmen in this vicinity are, therefore, fain to be content with discussing the entries to the Spring Stakes, and analyzing the thousand and one rumors that are flying around this metropolitan circuit, of which Jerome Park, Fleetwood, Monmouth, Brighton and Sheepshead Bay are the enclosing lines. Still another race-course is projected in this vicinity for 1884. At Paterson, New Jersey, not on the site of the famous old Passaic track, where noble Norfolk galloped away with the first Jersey Derby, but at a point near the falls, about equi-distant between the two converging lines of railway, the Lackawanna and Erie roads, on a direct line from Jobstown, near which Rancocas is situated. It is intimated Pierre Lorillard is to be the heaviest supporter of the new enterprise, but this latter report lacks confirmation. The new course will be within thirty minutes of Jersey City—very handy indeed for New Yorkers. Betting on the future events is getting quite active. A local hook-maker lest week bet one of the Dwyers \$1,000 even that the latter's lot (six horses) in the Suburban Handicap, at Sheepshead Bay, would be beaten by the Rancocas lot (five horses) in the same race. After the wager was recorded, the horse-owner offered to go on and bet the book-maker \$5,000 more that Barnes, four years, 131 pounds, beats Iroquois, six years, 130 pounds, in the same race. Barnes is said to be looking in splendid shape, and this grand out of Billst is a race-horse that fills the eye such as no horse but the thoroughbred of high class can. He was retired early last summer, and is expected to come out this spring a giant refreshed. And if he can give Iroquois two years and one pound over the mile-and-a-quarter course, it will be the greatest achievement of his career, if, of course, the Derby winner is right. In the latter case, many who prefer the chance of Iroquois, for it was claimed last fall that he could have beaten Miss Woodford in the contemplated match, she to receive \$ lbs. In the Kentucky Derby hitting Bob Miles, Powhatan, Louisville and Buchanan are the favorites here, while in the west several dark colts have been backed heavily. The Corrigan colt Ten Full, by Ten Broeck, out of the dam of Checkmate, is one of these. At St. Louis he has been backed down to low figures, 3 to 1 being accepted there, while here 20 to 1 goes begging. In the same city Freeland has been warmly supported to win the Merchants' Stake, and April Fool to win the Louisville Cup. The latter four-year-old is by imp. Intruder, and last October beat Apollo and John Davis three miles in 5:43. Lida Stanhope, last year's winner, is also supported by many, while Leonatus, the ostensible favorite, has hardly a wager recorded to his name, the opinion gaining ground that he will never race again. Not so Gen. Harding, his younger companion in misfortune during 1883. This big son of Great Tom and Eliza Davis is said to be doing splendidly, and great things are expected of him this year. Unfortunately Gen. Harding, is but very heavily engaged, his owner S. Bryant having been on the black list when the Yearling Stake closed in 1882. The Withers' Stakes, in this city, has Burton and Reveller for the favorite, with Himalaya next in favor. Leo is also well thought of, but there is just a suspicion in certain quarters that the Rancocas stable will not come to Jerome this spring, owing to the bad luck of 1883 at that period. Many of the horses from Sheepshead Bay, however, including the Dwyers' formidable string, will go to Jerome next month, the Coney Island track not being fit to work on by reason of the changes going on there. Mr. Keene's horses will also go in all probability. This stable, now in charge of the noted colored trainer Harvey Welch, vice J. Barry Blgrave (of the firm of Barry & Co.) is said to be in poor fix just at present, and the late trainer has considerable sympathy from the fact that the fault for this state of affairs is not considered to be his. This is by most persons outside of the immediate Keene faction. In fact, it is an open secret that trainers generally have had a hard time of it to please Messrs. Keene and Bathgate, and between the two the trainer is like the small stone ground down by the large one. Still, perhaps, Harvey can evolve order out of chaos, and as his place is worth \$1,500 for the year, and 10 per cent. on the winnings of the stable, it may be a good investment for him. He gives up his small, but select public stable to his assistant James Smith, who has been connected with him for twelve years. Of Keene's lot the best are Dutch Roller, three years, Sinaloa, three years, Burgomaster, three years, and the King Alfonso—Janet Colt, two years. This colt who took a prize at the Horse Show last November is a magnificent looking youngster. There is some little talk of a rupture between Arthur Hunter, the noted gentleman rider (and son of the well-known turfman Mr. John Hunter), and "Freddie" Gebhardt regarding the partnership known to exist between them with the race-horse Eole. If the young gentlemen are wise they will settle it among themselves, and thereby save scandal, preserve their own dignity, and keep out of the mire of petty squabbles the name and fame of the great horse mentioned. It is asserted that Hunter has made charges against Gebhardt to the Coney Island Jockey Club, which if proved will probably result in, for the second time of late, "Freddie's" being left out in the cold. In other words, expelled from membership. The gist of the matter is set forth below:

Near the close of the season of 1882 Gebhardt gave Arthur Hunter, who was then the chief manager of the Pelham stable, under whose colors Eole was racing, \$5,000 for the privilege of racing the horse under his (Gebhardt's) name. All he desired was the honor of having the horse entered in his name, he agreeing to give the net earnings to Mr. Hunter. Eole won \$12,000 while running under Gebhardt's colors, and Mr. Hunter says that when he claimed this money Gebhardt denied the agreement and refused to pay over the winnings. Hot words have passed, and now the Coney Island Jockey Club is asked to settle the matter. Mr. Hunter is well known as a skillful gentleman jockey, who has won more races than any other gentleman rider in the country. Gebhardt took great pride in Eole last year, and was happy when Mrs. Langtry was present to see the horse carry his colors to the front.

Racing at New Orleans, since my last letter, has been another series of postponements, but they are plucky down there and will "stick it out in that line if it takes all winter." Mardi Gras begins on Saturday next, the 23d, and that is expected to bring balmy skies once more, and large crowds of visitors. A letter received from Wren's Nest, Harrisonburg, Va., where Mr. F. A. Daignerfield has Sam Purdy in the stud, say that the foals of the game from son of George M.

Patchen and Whisky Jane all show the time and square trot of their famous sire, and that the game old hero of many a hard fought battle of protracted heats is in robust health. Mr. D. also has standing at the same place Dan Sparling by Glenelg, the winner of the Withers' Stakes of 1879, from his stable companion Spendthrift, Harold, and others. A notable stake is now open to close for stallions on April 1st with the Monmouth Park Association of this city. The Champion Stallion Stakes for two-year-olds, foals of 1883, will be run in August, 1885. It is six furlongs, and only the get of those stallions can compete whose owners have entered them on or before April 1st next. \$5,000 is added to the stake by the Monmouth Park Association, and if fifteen stallions enter at \$500 each, and ten horses start at \$250 each, the aggregate value of the stake will be over \$15,000. Of this the owner of the winner will get \$7,250, the breeder of the winner \$4,750, the owner and breeder of the second horse each \$1,000, and the owner and breeder of the third horse each \$500. This is, therefore, a stake well worthy of the attention of the breeders of the entire country. Consult the advertising columns of the BREEDER AND SPORTSMAN, and read the conditions in full. The Pacific coast should send six or seven entries to this rich stake, namely, Grinstead, Rutherford, Wildfire, Kyrle Daly, Joe Hooker, Norfolk, Monday, etc. On March 1st the entries close to the stakes of the Monmouth Park Association, embodied in the advertising columns of the BREEDER AND SPORTSMAN. Entries postmarked on that day will be in time.

On the 30th of April Belle Meade Stock Farm, near Nashville, will hold its annual yearling sale. Forty-nine yearlings, the get of Great Tom, Bramble and Enquirer, will be sold. This great farm also has Luke Blackburn in its list of stud sires, and its advertisement in the BREEDER AND SPORTSMAN shows their fees of service, etc. These four stallions are among the best in the world, and though Bramble and Blackburn are untried, there is no doubt that they will both be worthy successors of their sire the dead son of Iago and Queen Mary, famous old Bonnie Scotland.

The theatres here are all booming, "making hay while the sun shines," albeit that we have only had two days of sunshine here in nearly four weeks. Leut will soon be at hand, and then comes the wail of the professionals. Alps Roses, at the Madison Square Theater, is in for a run, and good houses have been the situation of affairs from the opening night. The scenery is superb, and the well-trained company at this house leave nothing to be desired in the score of acting. Mrs. Langtry is making the circuit of the town by slow stages. Commencing at Wallace's, she then went to Stetson's Fifth-avenue Theatre, from there down town to Niblo's Garden, and next Monday she opens up town at the New Park, under the auspices of Mr. John A. Stevens. This gentleman and his popular assistant Mr. F. B. Murtha have taken a new lease of fortune since their being burnt out at the Windsor. Their plan of powerful attractions for short periods is proving successful, and for the first time since the theatre has been opened the business is on a paying basis. Mr. Daly's Country Girl is the talk of the town, and is a genuine success, while Modjeska's powerful acting in Maurice Berrymore's Nadjezda is drawing crowds to the Star Theatre. Lady Clare, at New Wallace's, is also received with favor, but the funniest hit of *potpourri* on the stage is Mes tayer and Barton's Wanted a Partner, or Have I Your Eye? New York, February 18th, 1884. PACIFIC.

## FISH.

## Hints to Trout Fishers.

Of course, I cannot fish at this season, but there's nothing to hinder me from tying leaders, and in otherwise preparing myself for the summer trout campaign. Last season I used Orvis' leaders with tinted loops, and never saw anything better than they were, but I had used them all up before I struck the big fish at Tillamook, and was compelled to fall back upon leaders of my own make before I could strike any of the finny monsters that lurked in the deep pools of Wilson river. On the day that we were to break camp I sent our boys into town early in the morning to tell Mr. Hayes to come at noon with the wagon to move us to the steam-boat landing. The boys came back and said Mr. Hayes could not possibly get there before three o'clock, and here was everything packed up and ready to leave. The Conroy split bamboo rod leaned out against the tree, its nickel joints glittering in the mellow sunlight that streamed downward through the maple boughs. I gave a second glance at it, rose up and put on my wading shoes. I made up my mind to go down to "the big whirl," half a mile below the camp, as the walk was an easy one. On the first day I struck the river I had caught a half-pounder there, and never got a rise there since. The big whirl was soon reached, and I got behind the great fallen spruce that gave the water its peculiar twist. The first cast hooked a handsome fish which I soon landed. The second took a monster, who vaulted two feet into the air in his frantic efforts to shake out the hook, and as he went down, up jumped three other gallant fellows of about the same size. I became so excited that I trembled like a leaf. In half an hour I had the last fish out of that pool, eight trout weighing seven pounds dressed. All those big fish I caught on a single gut leader tied by myself, but I shall be careful to have a few Orvis leaders with me when I get down there again. They are very handy things to have in the house on occasions of that sort. Of your line parting there is but little fear, for nearly all the trout lines now in use are tapered silk, and they generally are good for three seasons fishing, at least. Nor is there much danger of your rod letting go. Most of the better class of fishermen use split bamboo. Conroy's or Leonard's are the best that you can get ready made, but if you insist on having one made to order, now is the time to order it. Sanders of Brooklyn made a compound rod for Judge Whalley on a draft made by me. The butt is twenty-eight inches, and cane-wrapped, of course. There are two middle joints, one thirty-four inches in length and the other forty-two, and there are four tips, one of thirty-four inches, one of thirty-seven, and two of forty. Now you can have a rod either eight feet, eight feet three inches, eight feet nine inches, or nine feet two inches. The ferrules of all this compound are interchangeable, so that the proportions of the rod are perfect in either of the above. If you have to fish a narrow or brushy stream, you use the short parts and fish with an eight-foot rod. The cost of Judge Whalley's rod was \$45, including the handsome solo leather case in which it was packed, and when he got to his native England he satisfied some of his early acquaintances that they had been fishing for years with very common tackle, compared with what our American shops can turn out. For a shop rod I like my old Conroy as well as any I have ever seen. It has had three seasons of very hard usage, and I can see no good reason why it is not as good as the first day that I joined it together. Well, the only way I can judge of anything of this sort is by its actual service, and if the next rod that I buy serves me as

well as this one has done there will be no good cause for a growl. It will have about nine additional wraps of silk put on its tip (the spring before varnishing, and then I think I will be good for my share of sport. A man cannot expect much of a split bamboo rod for less than \$20, although I have seen one for \$16, made by Cruttenon of Cazenovia, which is the best for the money yet seen hereabouts. It is made by a practical fly-fisher, who knows just where the strain comes, and just how to equalize it. A lancewood rod costing \$6, made by the same man, was tried right along side of me last year at Tillamook by Tom Morgan, and I really believe he killed more big fish with it than I did with my own bamboo. I saw him on a half-dozen occasions, when I would not have given a quarter of a dollar for the chance of his rod, play the great Zoroaster of the pool till he wearied of the unequal struggle, and then landed him, panting and dying on the gravelly beach.

And while on the subject of rods, let me say that I have seen a good many broken ones, and for every bad rod that I have seen there have been a dozen bad anglers. Of course, no two men handle a fish alike after hooking them. There is your sanguine-nervous man who strikes so hard when he gets a bite that some part of the tackle must of necessity go apart. No matter whether the fish weighs two pounds or two ounces, he must come out at the very first jerk. Then there is your man who is of lymphatic temperament, and he insists on playing the fish till he is absolutely lifeless; and it is ten to one that he loosens his hold of the trout's head, and the fish winds his strong tail about the line and walks off with a leader and three flies. Last of all comes your cool and clear-headed angler who plays the fish till he can get him tolerably tired, when he runs him into shallow water and shoves the landing net under him. And he is the man who gets the best sport and generally brings to camp the largest number of fish. But it is absolutely indispensable that you have good leaders and that your flies are likewise well tied. Soft and mushy flies will soon get whipped out of all shape. The hardest finished flies are always the best and last the longest. You can buy flies for 52 per cent gross, but what are they worth when you get them? The first time you get on a big fish away he goes with your fly, and the consequence is that you don't get the fish, while on the other hand he is apt to die from pain caused by the hook. You may pull through with a different line or an off-color rod, but a bad leader and ill-tied flies will surely result in your overthrow. I prefer to carry as many backies in my hook as anything else. Have your gray backies tied with yellow bodies as well as green, and that will save you from buying either professor or grizzly king flies. Have your black backies tied both with red and black bodies, and you will want neither gnats nor hawthorn flies; have your brown backies tied half green and half red, and they will be as good killers as any in the cast.

For dress, let me recommend a tan-colored canvas jacket over and above any other style of coat. It is not only the best, but a long way the best. A canvas vest is also preferable to any other. And now as to your nether habiliments, don't throw away any old pantaloons, but cut off the legs at the knee; and if they are badly worn in a portion where your eyes do not usually reach, from your sedentary and observing habits, patch them in the seat with what you cut off at the legs. Sew a strong button on each side of the leg at the knee, and have long woolen stockings reaching up so high that they can be attached to the buttons by short pieces of elastic. Then pull a pair of rough socks over these stockings, and wear a pair of low shoes, cut full of holes to let the water out as fast as it runs in. Be careful to wet your head before wading into the water, and you will never take cold in this rig. I use it for fishing in the summer and for duck shooting in the winter, and I have yet to find its equal as a woodland dress. As for gum boots and wading stockings, I would not buy them if they were sold for two bits a pair. I used to wear them years ago, and always had a bad headache to pay up for my fun. Since I have discarded them and taken to knickerbockers, I have never had a headache no matter how hot the weather. The rig looks a trifle outlandish, but what are looks compared with comfort.

And that's what you go camping for. You go for a comfort that your home does not afford you during the heated term. You go for the *dolce far niente* of a noonday under the alder and vine maples, and for the delicious sleep that follows in the train of bodily fatigue, and of all sleep there is none that so rejuvenates your frame as that which you get with your blankets spread upon the fir bough, with a top layer of moss between the boughs and the blankets. You wake up in the morning, after having inhaled the delicious odor of the fir boughs, and there is no soreness in your lungs nor catarrh in your nostrils. You feel that fatigue of the body has produced repose in the brain, and that your man's shoulders have suddenly become refurbished with a hoy's head. Then, too, you are not troubled with indigestion, for your hearty exercise has set the once sluggish blood to coursing anew through your veins, and you will fancy the figures have been turned around, and that you are fifteen years of age, instead of fifty-one. Remember that your camp must be a model of cleanliness, and your blankets must be aired every morning from 10 o'clock till the meridian, as an absolute guarantee of good health. If you go to the coast, you will need a tent, but in the mountains it is wholly superfluous, unless there are ladies in the party.—Tom Merry.

Joseph Anderson, a resident of the Napa Redwoods, caught a number of small trout one day last week in a brook near his home, and was himself caught by a person who was on the watch for violators of the fish law. He was tried before Justice Robinson and fined fifty dollars. A number of the law-abiding sportsmen of Napa have organized a club, at the suggestion of M. M. Estee, for an aggressive campaign against the violators. They employ an officer at a stated salary, and this was their first case. They feel encouraged by their success, and expect much from the moral effect of the conviction.

A tradesman of Gilroy has evolved an outfit of tackle that includes some novel features. The rod is made out of thin cast steel, not thicker than letter paper, bent and soldered in the shape of a rod. The tip is solid steel. It weighs twelve or thirteen ounces, and has several devices that would make it more acceptable to a disciple of Isaac Walton than the split bamboo, or any other valuable rod. The reel holds line more than any other of a similar size, and is provided with a brake which can be operated while the reel is running.

The members of the Sportsmen's Club of California last year took some 320 black bass from Lake Temescal, and planted them in Lake Merced. We understand the fish have multiplied wonderfully in Merced. No fishing will be allowed for two years to come, when, from present indications, there will be an overabundance for every one. The reasons for non-success in Temescal are evident enough, and the success of the Merced experiment, we hope, will lead to many others. We cannot have too large a supply of this grand fish.

Some peppery criticisms on the peculiar position of the majority of the Fish Commission in regard to the trout law have appeared in the dailies during the last week, and from indications the solid duo feel a little uncomfortable. The provocation was the statement by Commissioner Buckingham that there was no law that protected trout. We are assured, however, that at their next meeting the erring majority will set themselves right by affirming their belief in the validity of the law, and announcing their determination to enforce it. We shall see.

The rise in the Ohio river forced those who had charge of Mand S. and several other noted trotters to leave their comfortable quarters and camp for a time on higher ground.

STALLIONS THOROUGHbred.

BELLE MEADE

1884 STALLIONS. 1884

BRAMBLE,

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Anstralian.

ENQUIRER,

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Burch, etc.

Imp. GREAT TOM,

The sire of Gen. Harding, Thackeray, Swift, Tennyson, Trombone, Tarquin, etc. And the grand Race-horse,

LUKE BLACKBURN,

By imp. Bonnie Scotland, dam Nevada, by Lexington. Each of these horses will be bred to a limited number of approved mares, at

\$100-The Season-\$100

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearlings, 49 in number, will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

W. G. HARDING, Nashville, Tenn.

The Thoroughbred Stallion

HUBBARD,

Chestnut foaled in 1869, bred by R. A. Alexander of Woodburn Stud Farm, Kentucky.

- Sired by PLANET. First dam, Minnie Mansfield, by imp. Glencoe. Second dam, Argenti, by Bertrand. Third dam, Allegranti, by imp. Young Truffle. Fourth dam, imp. Phantonia, by Phantom. Fifth dam, by Walton. Sixth dam, Allegranti, by Pegasus. Seventh dam, Orange Squeezer, by Highfyer. Eighth dam, Mop Squeezer, by Matchem. Ninth dam, Lady, by Turner's Sweepstakes. Tenth dam, Sbnittle and Syphon's dam, by Patriot. Eleventh dam, by Crab. Twelfth dam, Sister to Sloven, by Bay Bolton. Thirteenth dam, by Curwen's Bay Barb. Fourteenth dam, by Curwen's Spot. Fifteenth dam, by White-Legged Lowtber Barb. Sixteenth dam, Old Vintner Mare.

Some of his Winning Performances:

1872, Baltimore, Md., Oct. 22a-Dixie Stakes for three-year olds. Ninety nominations. Won by Hubbard beating Joe Daniels, True Blue-Woodbine, Mate, Silent, Friend, Wheatley, Experience, Oaks and Brook, land. Won by six lengths.

1873, Long Branch, N. J., July 10th-Grand Sweepstakes, four-mile heats, won by Hubbard distancing Wheatley and Essie Lee in the first heat.

1873, Saratoga, N. Y., Aug. 2d-For all ages; dash of three miles; won by Hubbard beating Harry Bassett, Wanderer and King Harry.

1873, Saratoga, N. Y., August 9th-For all ages; dash of two miles and three-quarters; won by Hubbard beating Katie Pease and Boss Tweed. Total winnings in 1872 and 1873 \$22,950.

Will make the season at the DALE BREEDING FARM, Mountain View, Santa Clara County, commencing February 10th, and ending June 10th, 1884.

Terms, \$50. Mares not proving in foal can be bred the next season free of charge. Good pasturage at \$5 per month. No responsibility for escapes or accidents. Full pedigrees can be had by applying to

T. J. DALE, Mountain View, Cal.

The Thoroughbred Stallion

WILDIDLE.

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPELBY, Supt., Santa Clara, Cal.

P. O. Box 228.

STALLIONS

-AT-

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

Imp. KYRLE DALY.

- Bay horse, by ARTILLERY. First dam, Colleen Rhine, by Gemma-di-Vergy. Second dam, Princess, by Retriever. Third dam, Echidna (the Baron's dam), by Economist. Fourth dam, Miss Pratt, by Blacklock. Fifth dam, Gadabout, by Orville. Sixth dam, Minstrel, by Sir Peter. Seventh dam, Matron, by Florizel. Eighth dam, Maiden, by Macheu. Ninth dam, (Pumpkin's dam), by Squirt. Tenth dam, (Lot's dam), by Mogul. Eleventh dam, Camilla, by Bay Bolton. Twelfth dam, Old Lady (Starling's dam), by Palleine's Chestnut Arabian. Thirteenth dam, by Rockwood. Fourteenth dam, by Bustler. At \$100 the season, due at the time of service.

LONGFIELD.

- Chestnut horse, by MONARCHIST, be by Lexington. First dam, Dame Goulay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of Imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantbs' dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents. John Mackey, Superintendent, Sacramento, Cal.

THOROUGHbred STALLION

X X,

Pedigree.

- X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets' Blue, by Sir Charles. Fifth dam, Beality, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janns. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Antee. Her dam Young Fashion, was the dam of Surprise, Scotland, Wamaita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding basas much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition. Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON, Oakland nr 908 Montgomery Street, San Francisco.

PACIFIC COAST

Blood Horse Association

Spring Race Meeting.

BAY DISTRICT COURSE, San Francisco.

First Day-Saturday, April 12th.

M. No. 11-Handicap Stake-For three-year-olds; 1 1/2 miles; \$25 each; \$10 declaration; \$200 added; weights announced at the same time as the cup. No. 12-Purse, \$300; \$50 to second; for all ages; beats of three-quarters of a mile.

Third Day-Saturday, April 19th.

- No. 13-Gano Stake-Dash of three-quarters of a mile for two-year-olds. Closed with 23 nominations. No. 14-"Spirit of the Times" Stake-Dash of one and three-quarter miles for all three-year-olds. Closed with 31 nominations. No. 15-Purse, \$300; \$50 to second; heats of three-quarters of a mile; for all ages. No. 16-Consolation Purse, \$200; \$50 to second; for horses that have run and not won at the meeting; five pounds allowed for each defeat; dash of a mile.

Conditions.

Entries to stakes and purses not marked closed will close March 1st, 1884. Races to close will be run under weights adopted at the annual meeting 1881.

Starters in all races must be named at 6 P. M. the day preceding the race.

Entrance free for starters in purses. Non-starters can declare out at 6 P. M. the day preceding race, by paying five per cent. After that time can only be excused by Presiding Judge, and in such case, ten per cent. on amount of purse must be paid.

Non-members will be placed on the same footing as members of the association in regard to the payment of purses and stakes advertised; and should there be a deficiency, the winners will receive a pro rata division.

Parties making nominations will be required to record colors at time of making entries, and will not be allowed to ride in other colors. This rule will be strictly enforced.

All nominations in stakes and entries in purses must be made on or before the first day of March next, 1884, directed to Jos. Cairn Simpson, Secretary, 508 Montgomery St., San Francisco. To be valid, they must be delivered to the Secretary personally or plainly postmarked on or before that day, March 1st.

JAS. V. COLEMAN, President. JOS. CAIRN SIMPSON, Secretary.

State Agricultural Society.

TROTTING AND RUNNING PURSES

To Close March 10th, 1884.

- No. 1-Trotting Purse \$1,000; mile heats for two-year-olds. No. 2-Trotting Purse \$1,000; mile heats, three in five, for three-year-olds. No. 3-Trotting Purse \$1,000; mile heats, three in five, for four-year-olds. Entrance ten per cent., five percent of which to accompany nomination, remaining five per cent. payable July 15th, 1884. Those not making second payment forfeit first, and cannot start in the race; five to enter and three to start. If more than ten make second payment, \$200 additional will be added; four moneys. The meeting having been extended to nine days, these races will be arranged as to permit the colts entered in other stakes to trot in these purses.

Running.

- No. 4-Running Purse \$1,000; one-mile dash for two-year-olds. No. 5-Running Purse \$1,000; one mile and repeat for three-year-olds. Entrance ten per cent., five per cent. of which must accompany nomination, the remaining five per cent. to be paid July 15th, 1884. Eight entries required to make first payment; four moneys. If more than ten make second payment, \$200 will be added.

EDWIN F. SMITH, Secretary. P. A. FINGAN, President.

MONMOUTH PARK.

Long Branch, New Jersey,

The Following Stake is Now Open.

THE CHAMPION STALLION STAKES for 1885, for colts and fillies two years old (now yearlings), to be entered at the course by 1 o'clock P. M. on the day before the day appointed for the race, of \$250 each, with \$500 to the Monmouth Park Association to a subscription of \$500 each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of his sire each to receive \$1,000; the third horse and the subscribing owner of his sire each to receive \$500; the winner to receive the stakes of horses entered for the race, and one-half of the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify the get of his horse, if the subscription be paid; each subscription to be accompanied by a contract in the form subjoined, which, if not fulfilled punctually by the subscriber, may be transferred to and fulfilled by any owner or owners entering in the race the get of the stallion, and such owner or owners shall in that case be entitled to start and to the benefit accruing to the subscriber from first, second or third place in the race, and to recover from him the money contracted to be paid, if no benefit accrues; fifteen subscriptions to fill. Three-quarters of a mile.

Form of Contract.

In consideration of the money to be added by the Monmouth Park Association to the Champion Stallion Stakes for 1885, and in further consideration of the increased value given to the get of any stallion by the right of entry therein, which right of entry is not to be invalidated by any decrease, (1) I agree to pay to the Monmouth Park Association, on or before the 15th day of July, 1884, the sum of \$500 in full, or in installments, as follows: \$100 on the first day of July, 1884, at its office in the city of New York.

The subscription of stallions to the above stakes will close and name of stallion to be subscribed to be addressed to J. H. Coster, Secretary Monmouth Park Association, Madison Avenue and Twenty-seventh Street, New York.

Mr. Lorillard continues his gift of \$5,000 to the Lorillard Stakes. The Champion Stallion Stakes and the Lorillard Stakes are intended to be permanent.

The Lorillard Stakes for 1886, with the following conditions, will close and name on August 15th, 1884. The Lorillard Stakes for 1886, for three-year-olds, of \$500 each, to be run only \$10 if declared by January 1st, 1885; or \$50 if declared by January 1st, 1886; or \$100 if declared by June 23rd, 1886; with \$5,000 given by Mr. Morris Lorillard; the Association to add \$1,000 for the second; the third to save his stake; horses bred in the United States are not eligible for the stake unless their sires are represented by subscription to the Champion Stallion Stakes for 1885. One mile and a half.

GEORGE L. LORILLARD, President. J. H. COSTER, Secretary.

Every mail lately received from Alhion has something to say regarding the Archer-Wood-Walton muddle. The investigations of the English Jockey Club in the case of Charles Archer, the young ex-trainer, have developed a strange state of affairs, not the least singular fact being the arrangement said to exist last season between Lord Ellesmere and his trainer. It seems that Charles Archer and the "noble Lord" had mutually agreed that the plebians was to charge the aristocrat nothing whatever for his services as trainer, in consideration of which—and here comes the point—Lord Ellesmere was to leave the entire management of the stable to Archer's discretion. After discharging stake accounts, etc., all responsibility of the owner as to expenses was to cease. Now, this contract is not particularly new. Other trainers have frequently been entrusted with full and entire powers for similar considerations. The late Joseph Dawson trained Prince Charlie, Lord Gough, and many others with the same understanding. But when trainer so entrusted is a mere lad in years, and with comparatively very little experience in his adopted profession, criticisms cannot well be withheld on the impropriety of so injudicious a course.

A mysterious disease has broken out among the horses in the Medina district of Texas. The horses when first taken seem to be drawn together, as if in loin distemper, and appear to suffer greatly, virtually walking on the tips of hind hoofs. Then they gradually pitch forward, fall to the ground, and never get up again. The affliction does not relate to the condition of the animals in any respect, as some of the fattest horses in the county have fallen prey to the malady.

As Archiduc could not be declared a sound horse by the Messrs. Barrow of Newmarket, Baron Rothschild (of Paris) refused to take him. Whereupon the representative of the estate of the late Count Lagrange served a legal notice on him compelling the Baron to take the colt, as he was sold without a guarantee.

Calmar, 2:22, by Bourbon Chief, dam by March's Bolivar, died at Cleveland, O., Feb. 12th, the property of Warren Chisholm. Calmar was foaled in 1866, and when the property of Col. Wm. Edwards in 1881, was driven to his record by George Whitney.

J. Lucas Turner, proprietor of the new Kinlock Stud in Missouri, has entered into negotiations for the purchase of the English racehorse Skylark, a bay, bred by Lord Falmouth in 1878, by son of King Tom, from Wbeatnar, by Young Melbourne.

The trotting mare Phyllis, 2:17, owned by Chas. Wagner, of Dickinson's Landing, Can., has been barred out of the Ottawa races. Mr. Wagner was offered the handsome sum of \$10,000 for Phyllis a few days ago.

## Notice to Breeders —AND— Turfmen in General.

For the benefit of those desirous of taking the advantage of long odds on the coming meeting of the Pacific Coast Blood-Horse Association, and before pool-selling is opened, we, the undersigned, will open book-betting on the different events previous to said meeting. Books will be opened, and a list of prices advertised as soon as all nominations are made. Odds subject to a change at any period.

Killip & Co,  
116 Montgomery Street.

## THE STANFORD STAKES 1885.

A SWEEPSTAKES FOR TROTTING COLTS AND fillies of 1883, each \$25 payable on the 1st of March, 1884, at which time the stake will close, \$50 on the 1st day of January, 1885, and \$100 ten days before the day fixed for trotting, whatever amount up to be considered forfeit, and the neglect to pay at the stipulated time incurring forfeiture of the previous payments. The race to be heats of a mile, best three in five, to harness. First to receive six-ninths of the whole sum, the second two-ninths, the third one-ninth. In addition to the stakes and forfeits, the proportion of the gate money, profit on pool sales and all other sources of emolument will constitute the gross amount to be divided in the foregoing proportion. Five or more subscribers to fill. The race to be trotted in 1885, not sooner than the latter part of August. The exact date to be fixed and announced on the 1st of January, 1885 or sooner.

Race to be governed by the Rules of the National Trotting Association. Nominations to be made to N. T. SMITH, Treasurer, S. P. Railroad office, Fourth and Townsend streets, or JOS. CAIRN SIMPSON, Secretary, BREEDER AND SPORTSMAN office, on or before the 1st day of March, 1884. The colts must be named, the name and pedigree, so far as known, given.

Under the new trotting rules letters legibly post-marked March 1st will be eligible. Breeders of trotting horses will see that it is greatly to their interest that this Stake should not be allowed to lapse, and now that the first payments are made so light it comes within the reach of everyone. It is the main trotting stake of California, and is fully entitled to support.

N. T. SMITH, Treasurer.  
JOS. CAIRN SIMPSON, Secretary.

## THE NEW ZEALAND

# Stud and Pedigree Stock Co.

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

### Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darrivell (5 years), carrying 102 ponnd ne, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary,

Auckland, New Zealand.

The New Zealand Loan and Mercantile Agency Co., Limited.

412 California Street, San Francisco.

HUGH CRAIG, Agent.

## OLIVE And Other Fruit Lands FOR SALE

In ten, fifteen and twenty acre lots, at one hundred dollars an acre, at Sunol Glen, in Alameda county, on the Livermore, or old overland route, thirty miles from Oakland, or thirty-six miles from San Francisco, four trains a day; excursion tickets, \$1.50. Terms, \$25 an acre, or 25 per cent. cash, deed given, balance to be paid in three annual instalments. Trees furnished at fifteen cents a piece, land plowed, trees planted and well cultivated for one year, at \$20 an acre; well cultivated each succeeding year at \$5 an acre; ninety per cent. of trees warranted to grow, or will be replanted without extra cost. Choicest vineyard land on the same terms. This land is situated in a warm belt, exempt from the prevailing coast fogs, and is well supplied with wood and water. The situation is picturesque, and the climate is equal to that of Santa Barbara. Reference, by permission, is given to W. F. Goad, 603 Montgomery Street; J. A. Robinson, 509 Montgomery Street; J. F. Gawthorne, 444 California Street; Hon. C. N. Felton, 123 California Street; C. W. Crane, 318 Pine Street, room 39; Captain H. H. Ellis, T. F. Batchelder and Chas. Hadsell, Sunol Glen. Field Trial Winners of America.

(CONTINUED FROM FEBRUARY 23d.)

Fourth Tennessee Field Trials, Nashville, Tenn., November 12th-16th, 1877, under the auspices of the Tennessee State Sportsmen's Association. Judges for the Puppy Stake: D. C. Bergundthal, Gen. W. H. Jackson and Dr. J. B. Alexander. For the Brace and St. Louis Kennel Club Stakes: Gen. W. H. Jackson and Dr. Alexander.

Puppy Stakes.—For setter and pointer puppies under 18 months; \$150 to first; \$100 to second; \$50 to third. Eleven entries—ten setters, one pointer. 1st, Gladstone (Dan—Petrel), black, white and tan setter dog, owned by P. H. Bryson; 2d, Champ (Jep—Flouces), red Irish setter dog, owned by W. W. Tucker; 3rd, Ida, Jr., (Erin—Ida), red Irish setter bitch, owned by G. W. Campbell.

Champion Stakes.—For pointers and setters of any age; \$250 to first, \$150 to second, \$100 to third. Twenty entries. 1st, Joe, Jr., (Elcho—Buck, Jr.), red Irish setter dog, owned by Geo. W. Campbell; 2d, Pride of the South (Leicester—Dart), black, white and tan setter dog, owned by Capt. Patrick Henry; 3rd, Countess (Joe—Kate), red Irish setter bitch, owned by W. A. Wheatley; and Nellie (Belton—Dimple), black and white setter bitch, owned by D. C. Sanborn—divided.

Brace Stakes.—Known as the Dupont Powder Company Stakes for braces; \$150 to first, \$75 to second, \$25 to third. Nine entries. 1st, Clip, setter bitch, owned by L. H. Smith, and Pride of the South, English setter dog, owned by Capt. Patrick Henry; 2d, Buck, Jr., setter bitch, and Joe, Jr., setter dog, owned by Geo. W. Campbell; 3d, Dogwhip, English setter dog, and Gladstone, English setter dog, owned by P. H. Bryson.

Puppy Stakes.—Known as the St. Louis Kennel Club Stakes; for puppies under 12 months; \$50 silver cup to first; four entries. 1st, Rill (Dogwhip—Fanny Kean), black, white and tan setter bitch, owned by J. H. Dew.

Fifth Tennessee Field Trials.—Nashville, Tennessee, December 2d-6th, 1878. Judges, Gen. Jackson, Dr. Young and Gen. Churchill.

Puppy Stakes.—For pointer and setter puppies under 18 months; \$150 to first, \$100 to second, \$50 to third; eleven entries. 1st, Maury (Luke—Daisy Dean), black and white setter bitch, owned by Jos. H. Dew; 2d, Fannie (Light—Buck, Jr.), white setter bitch, owned by Geo. W. Campbell; 3d, Dan (Rake—Fanny), black, white and tan setter dog, owned by D. C. Sanborn.

Champion Stakes.—For pointers and setters; open to all; \$250 to first, \$150 to second, \$100 to third; twenty-two entries. 1st and 2d, Drake, (Prince—Dora), black and white ticked setter dog, owned by Luther Adams; and Joe Jr., Elcho—Buck, Jr.), red Irish setter dog, owned by M. C. Campbell, divided; 3d, Dog Whip (Rake—Dart), black, white and tan setter dog, owned by P. H. Bryson.

Brace Stakes.—Open to all; \$150 to first, \$75 to second, \$50 to third; ten braces entered—nineteen setters, one pointer. 1st, Dash III (Bue Prince—Kate), white and black setter dog, owned by Harvard Kennel Club, and Drake (Prince—Dora), black and white ticked setter dog, owned by Luther Adams; 2d, Lincoln (Dan—Lill II), white and lemon setter dog, owned by John E. Higgins, and Gladstone (Dan—Petrel), owned by P. H. Bryson; 3d, Paris (Leicester—Dart), blue belton setter dog, and Clip (Leicester—Dart), black, white and tan setter bitch, owned by L. H. Smith.

First National Kennel Club Trials.—The inaugural field trials of the National American Kennel Club were held at Patoka, Illinois, November 24th-29th, 1879. The heat system was here adopted in place of point judging which had previously prevailed.

Puppy Stake.—For pointer and setter puppies under 18 months; \$150 to first; \$100 to second; \$50 to third; six entries, setters. 1st, Count Fred (Count Wind'em—Nora), black and white setter dog, 17 months, owned by Montview Kennel, 2d and 3d, Countess May (Dash III—Countess Ada), black and white setter bitch, 13 months, owned by Harvard Kennel Club, and Marchioness Peg (Dmid—Peg), black, white and tan setter bitch, owned by Dr. N. Rowe; divided.

Free-for-All Stakes.—For setters and pointers, any age; \$250 to first; \$150 to second; \$100 to third. Napa B. pointer dog pup (Prince Ranger ex Josie Bow) to H. A. Bassford, Vacaville, Cal.

Dotsy B. pointer bitch pup (Prince Ranger ex Josie Bow) to Charles Pearch, Napa, Cal.

Leua B. pointer bitch pup (Prince Ranger ex Gracie Bow) to P. Adams, McMinnville, Or.

Lemmie B. pointer dog pup (Prince Ranger ex Gracie Bow) to J. M. Bassford, Jr., Vacaville, Cal.

Bee B. pointer bitch pup (Prince Ranger ex Gracie Bow) to Dr. W. H. Boyd, McMinnville, Or.

Bessie B. pointer bitch pup (Prince Ranger ex Gracie Bow) to Jos. McKenna, Suisun, Cal.

Yuba B. pointer dog pup (Prince Ranger ex Josie Bow) reserved and now in trainers' hands for Pacific Coast Field Trials this fall.

The California Coursing Club will meet at the club rooms, 539 California street, on next Wednesday evening at 8 o'clock; every member is requested to be present, as important business will come before the meeting. All arrangements for the Spring open meeting to take place at Merced 27th-28th, will be perfected. Quite a large number of entries for this meeting are expected from all parts of the State.

"Cornkrake" has despaired of getting a match and withdrawn his deposit.

The Dominion Kennel Club will hold its second annual bench show of dogs at Toronto, Ont., March 25th and 26th. Mr. Charles Lincoln will act as superintendent, and Mr. Hendrie, of Hamilton, Can., James Watson, of New York, and Major J. M. Taylor, of Lexington, Ky., have been selected as judges.

The courting match held at Bridgeport, under the auspices of the Vallejo Club, did not give much satisfaction. It was late when the train arrived at the grounds, and very few hares were started.

The Pacific Coast Coursing Club will meet to draw the dogs this evening. Their spring meeting begins at Merced next Wednesday.

BASE BALL.

At the Recreation Grounds last Sunday play was resumed, with the Haverly and Occidental nines engaged. The score:

Table with columns for Haverly and Occidental teams, listing players and scores for various innings.

First base on errors—Haverly, 3, Occidental 2. Left on bases—Haverly, 4, Occidental, 3. Struck out—Haverly, 9, Occidental, 13. Three base hit—Sweeney. Two base hits—Taylor and Sweeney. Double play—Fisher alone. Passed balls—McDonald, 4, Creggan, 3. Time of game—1 hour 55 minutes. Umpire—F. Mitchell.

Ed. Morris and Fred. Carroll have gone to Columbus where they will train in a gymnasium until the middle of March. They will then play a number of games preliminary to the ones of their club against the League clubs of 1884.

John Carroll, a good general player, and at one time manager of the Redington Club, has been playing in a nine at Dallas, Texas. He entered into a running contest recently and carried off the prize, said to be \$500.

Fogarty, of the Haverly Club has accepted an offer of the manager of the Philadelphia Club, and will soon depart for the East.

BILLIARDS.

Tom Foley of Chicago is canvassing the opinions of the experts on his tournament proposition, and it meets with general favor. His plan is to divide the players into two classes, and thus make the chances even—Slosson, Schaefer and Vignaux in one class, and Sexton, Dion, Daly, Morris, McLaughlin, Catton and Wallace in another. The first class can play for the championship of the World, and the second for the championship of America. The game to be balk-line. A series of contests with the experts classified as proposed would exhibit quite interesting, earnest play, and no doubt would attract the presence of all the patrons of the game that would be in the vicinity of the contests. As regards the three great players Vignaux, Slosson and Schaefer, a tonanament between them in, say, 1,800 point games, played in three evenings, 600 at each seance, would give entertainment for nine evenings, and would be a grand test of skill between the world champions.

Lou Morris has as yet received no reply to his challenge to any man in the United States, except Slosson and Schaefer, to play 3,000 points for \$1,000. His offer of \$300 allowance of expenses, he thinks, ought to induce an acceptor from the other side of the Rockies, as the trip hitherward would be a delightful excursion combined with a little matter of business.

A Paris cablegram of February 16th says "Mr. Jacob Schaefer, the champion billiard-player, will leave Paris for America the 26th inst. In several private encounters with M. Vignaux since the public contest Schaefer has been victorious. His play has improved with his French practice. He intends to return to Paris, having renewed his challenge to Vignaux."

The table on which the second match of 3,000 points was played by Vignaux and Schaefer was purchased by Baron Rothschild. It was of the J. M. B. & Co. make, with the Monarch cushion, and was shipped to Paris from New York.

Peace and quiet pervades billiard circles in this city at present. Morris' unconditioned defi to play any man pu pool seems to have no effect except to silence some usually voluble experts.

Frank Maggioli, the local champion of New Orleans, and a specialist at pin pool, is on a tour, and expects to visit San Francisco before he returns to the Crescent City.

In a recent practice game at the Colleder Hall, George Slosson made a run of 395 points at the eight-inch balk-line.

The President of Mexico has ordered a Colleder table of special design to be made for his house.

TROTTING STALLIONS.

The Almont Stallion ALTOONA,

BY ALMONT; first dam Theresa B., by Propbet, Jr.; second dam Molly Floyd, by Mohawk; third dam, by Davy Crockett, a Canadian pacer; fourth dam Puss, a fine road mare imported from Canada. Propbet, Jr., by Propbet, son of Hill's Vermont Black Hawk. Altoona was bred by Gen. W. T. Withers, of Fairlawn, is a dark bay, a little over fifteen and three-quarters bands, of high form and breeding.

He will make the season of 1884, ending July 1st, at the ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

Terms, \$30 for the season, due on or before July 1st. For further information apply to or address A. H. HECOX, ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

ELECTOR, 2170.

STANDARD—See Wallace's Register Vol. V.

By ELECTIONEER, his dam Gilberta by Fred Low, son of old St. Clair. Second dam Lady Gilbert by Gen. Knox.

Will make the season of 1884, commencing March 1st, and ending June 1st.

Elector is a mabogany bay, both hind feet touched with white, 15 3/4 hands high, weighs 1,650 pounds.

Terms \$30 the season. Mares from a distance properly cared for and pastured at \$3.00 per month. Due care taken but no responsibility for accidents or escapes. For further particulars address C. E. PERKINS, Stockton.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.  
Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

#### Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 10th, 1882.

#### TERMS.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 $\frac{1}{2}$  hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:23 $\frac{1}{2}$ , without a skip.

#### Breeding.

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 $\frac{1}{2}$ .

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.  
Terms \$50.

**FRED ARNOLD,**  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agri-cultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 $\frac{1}{2}$ ), and dam of Flight, five-year-old record 2:22, and three-fourths sister to dam of Pride, yearling record 2:44 $\frac{1}{2}$ , and three-fourths sister to dam of Buccaneer, public trial against time 2:24 $\frac{1}{2}$ , and full sister in blood to dam of Fawn, record 2:30 $\frac{1}{2}$ , by Flaxtail, granddam by son of Tally Ho Morgan, great granddam by Irwin's Tuckahoe, great granddam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 $\frac{1}{2}$ .

For extended pedigree and further description of the above horses send for circular.  
**M. W. HICKS,**  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

#### TERMS.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

#### Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 $\frac{1}{2}$  hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:24 $\frac{1}{2}$ ), by McCracken's Dave Hill, he by Red Lion, and by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.  
Dam of Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred.  
Dam of Dave Hill by Vermont Hambletonian.  
Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,**  
Agent.

Oakland, January 18, 1884.

### The Trotting Stallions

## DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

#### TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

#### Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 $\frac{1}{2}$ ; Phyllis, 2:15 $\frac{1}{2}$ ); first dam Dolly (dam of Thorndale, 2:22 $\frac{1}{2}$ ; Onward, 2:25 $\frac{1}{2}$ ), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiener.

Thorndale, 2:22 $\frac{1}{2}$ , is the sire of Edwin Thorne, 2:16 $\frac{1}{2}$ , and Daisy Dale, 2:19 $\frac{1}{2}$ .

#### Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very likeable portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTTING PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Peniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.  
Brigadier will make the season of 1884 from February 10th to July 1st.

#### TERMS.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.  
February 2d, 1884.

**J. B. McDONALD.**

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Erastus.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

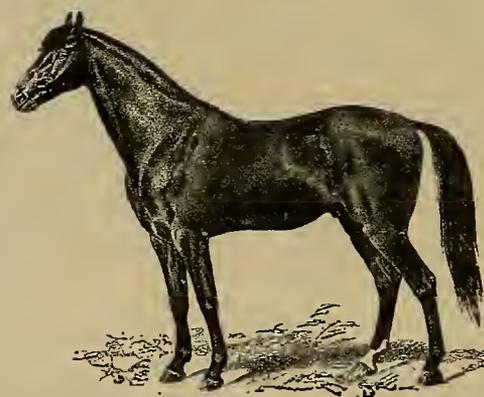

#### TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteoo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living: He has shown a mile in 2:20 $\frac{1}{2}$ , and at the same time demonstrated that he was capable of trotting way down in the tens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

## MAMBRINO WILKES.

**BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES,** son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christiana by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:15 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

#### TERMS:

\$40 for the season, or \$25 single service.  
This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at one or two hundred dollars. For further particulars address

**A. L. HINDS, Agent.**

### The Trotting Stallion

## STEINWAY,

With two-year-old record, third heat, of 2:31 $\frac{1}{2}$ , and three-year-old record, fourth heat, of 2:25 $\frac{1}{2}$ .

#### TERMS.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smealley's Stable, Haywards, will be forwarded immediately to the farm.

#### Description.

He is a bay, 15 $\frac{1}{2}$  hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece; plenty of bone and substance; his gait is big and square; his disposition is the very best.

#### Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall New, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 $\frac{1}{2}$ , winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 $\frac{1}{2}$ ; and Tucker, 2:19 $\frac{1}{2}$ ; Chestnut Hill, 2:22 $\frac{1}{2}$ ; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 $\frac{1}{2}$ ; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28; Henderson, 2:28; Strahlan, three-year-old, 2:23 $\frac{1}{2}$ ; and Smart, three-year-old, 2:28. Smart is full brother to Belnor, who trotted a mile in 2:52 $\frac{1}{2}$  at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 $\frac{1}{2}$ ; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 $\frac{1}{2}$ ; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:20 $\frac{1}{2}$ ; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

#### Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbea, Admiration, Mystery, in 2:39, 2:32, 2:31 $\frac{1}{2}$ . Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:35, Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25, 2:30 $\frac{1}{2}$ , 2:30 $\frac{1}{2}$ ; Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 $\frac{1}{2}$ , 2:23, 2:26 $\frac{1}{2}$ , but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 $\frac{1}{2}$ , 2:23 $\frac{1}{2}$ , 2:27 $\frac{1}{2}$ .

Address

**GEORGE WILEY,**

Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte County, California.

#### PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Bessie's, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44 $\frac{1}{2}$ ) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, granddam by Lefler's Consul, by Shepperd's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

## LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star (son of Platt's Western Star by Blacknose). 1st dam by Bonanza, 2nd dam by Gallatin (4:08 $\frac{1}{2}$ ). La Harpe's dam Fannie Bird by Flaxtail (dam of Flight, 2:29, and Prompter, 2:30). 2nd dam Fashion, by John Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

#### TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash.

Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. McINTOSH,** Box 60, Chico, Cal.

FOR SALE.

STALLIONS FOR SALE

HAVING ACQUIRED MORE STALLIONS THAN he has present use for, the owner offers for sale the high-bred and well-known trotters

Inca -AND- Gibraltar.

INCA, RECORD 2:27, FOALED 1874, BRED BY L. J. ROSE, bred by Woodford Mambrino, son of Mambrino Chief; first dam Gretchen, by Mambrino Pilot; second dam Madame Kirkman, by Canada Chief, son of Davy Crockett; third dam by Fanning's Tobe; fourth dam by Levittian.

JOHN A. GOLDSMITH, OAKLAND TROTTING PARK.

FOR SALE

The Trotting Gelding STARR KING.

Record, 2:22. Sound and in fine condition. Sold only for the reason that his owner's business is such that he cannot give attention to the turf. For further particulars address

C. W. Welby, Tenth and Railroad Avenue, San Francisco.

Crown Point For Sale.

This promising Hambletonian stallion, record 2:24, is offered for sale. He is so well known for thorough game and endurance that it is almost superfluous to say anything further. He has defeated Sweetness, 2:23; Starr King, 2:22; Del Sur, 2:24, and others of celebrity. Although having only served one season in the stud, he can show colts of as much promise as any. The dam of Crown Point has two representatives in the 2:30 list. His blood being a combination of Hambletonian, Clay, and other strains, which proves him to be of the very best breeding.

Crown Point is sound in every way, and will be ready to train, with a good show of trotting faster than ever.

For further information address G. VALENSIN, Arno Station, Sacramento Co., Cal.

S. C. BOWLEY & CO.,

GRAND COMBINATION SALE.

Commencing April 10th, 1884,

AT THE

Bay District Race Track, AND CONTINUING SIX DAYS.

Thoroughbred Horses and Standard Trotters.

Roasters, Jersey, Durham, and Devon Cattle, Spanish, Merino, and Leicestershire Sheep, from all the principal breeding estab.

Shipments on the Pacific Coast.

750 HEAD OF STOCK

Have already been entered for sale and further instructions from leading breeders are daily arriving. Breeders and owners desirous of entering stock for this sale should apply at once to

S. C. BOWLEY, 33, 35 and 37 New Montgomery St.

The benefit of the combination sale to breeders and stockmen cannot be too highly estimated. Combination sales have been found of immense advantage in the East, and such a sale as this, comprising, as is anticipated, not less than 3000 head of fine stock from all the leading breeders of the Coast, cannot fail to attract a large number of buyers from Honolulu, Australasia, and the East. The fame of California trotters is worldwide, and when it is known that for this sale already entered the get of Electioneer, The Moor, Almont, Nutwood and all the best known stallions on the Coast, the advantages to both breeders and purchasers must be obvious. Large or small lots will be taken for sale. As soon as the catalogues can be prepared they will be distributed all over the world; so it is necessary for those desirous of taking advantage of the sale to send in their lists of stock, with complete pedigree, at an early date.

S. C. BOWLEY & CO.

FOR SALE.

An Irish setter dog, three and a half years old, well broken on all kinds of game. Sound in every way, and only sold for want of use.

Apply at the Hunt Saloon, 605 Commercial St. S. F.

PURE-BRED POULTRY

O. J. ALBEE, Santa Clara, Box 229.

FOR SALE - 1 Cock, 4 Hens and a fine lot of Stags, Pitt-Games Imported from McDougall, warranted dead game; also all leading varieties thoroughbred Poultry.

KILLIP & CO., LIVE STOCK AND GENERAL AUCTIONEERS,

HAVING CONDUCTED SOME OF THE MOST successful sales, notably those of Messrs. Whipple, Colgrove, Dietz, Conits, Dougherty, Newland & Hammond, Daniel Cook and others, we feel assured of our ability to give satisfaction in all business entrusted to our care. Sales will be made in all cities and counties in the State. We have in contemplation a series of combination or breeder's sales, similar to those so successfully held at the East. We will be pleased to enter into correspondence with parties desiring to participate in such sales. Private purchases and sales of improved live stock of all descriptions will be made on commission and stock shipped with most care. Several fine ranches at private sale. Purchases and sales made of land of every description.

KILLIP & CO., 116 Montgomery street.

PURE-BRED JERSEYS FOR SALE.

For sale, to close an Estate, Ten Head of Pure-Bred Jersey Cattle, Registered in A. J. Herd Book and A. J. C. H. R. - Cows, Heifers and Calves.

All superior animals both in breeding and quality. Also a number of

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again. I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I warrant my remedy to cure the worst cases. Because others have failed is no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you. Address Dr. H. G. ROOT, 183 Pearl St., New York.

LINES OF TRAVEL.

Sportsmen & Pleasure-Seekers.

THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES

AFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Inoted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Barracuda, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ,

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakea PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PIRISIMA, SAN GREGORIO and PE-CADREO. We would particularly call attention to the unlimited extent of range at and about SAN BENITO and McMAHON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle may be carried about in Charge, Gun taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

TICKET OFFICE (Passenger Depot), Townsend street, Valencia Station, and No. 613 Market Hotel. A. C. BASSETT, H. R. JUDAH, Superintendent, Asst. Pass. & Tkt. Agt.

25 HIGHLY-BRED BROOD-MARES,

Bred to the Fairlawn Stallions, and

130 HEAD OF VERY PROMISING YOUNG STOCK,

Consisting of Young Stallions, Fillies and Roadsters, are offered at Private Sale.

THE ONE PRICE PLAN Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person.

The Stallions in use at Fairlawn are

A L M O N T 33.

Represented in the 2-30 list by 24 performers, with records ranging from 2:15 1/4 to 2:30. Limited to 20 approved mares at \$300 the season.

HAPPY MEDIUM 400.

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

ABERDEEN 27.

Having ten of his get with records ranging from 2:15 1/4 to 2:27 1/4. Limited to 40 mares at \$150 the season.

ALECTO 2548.

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

STARMONT 1526.

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2-30 list. The sons of each of these stallions are siring trotters.

IMPROVED HORSE CLOTHING.

Secured by Letters Patent ISSUED MAY 27, 1879. REISSUED MARCH 29, 1881.

- 1. An improved blanket or covering, consisting of the body-piece A, flap C, and the extension B, formed or united together, so as to cover the body and legs of the animal, substantially as herein described.
- 2. The blanket or covering A, having the flap C, and the extension B, to fit the fore and hind legs of the animal, front fastenings FG, and the permanent straps or bands E, substantially as and for the purpose herein described.
- 3. The blanket or covering A, with its extensions B, permanent securing-bands E, and the front fastenings FG, in combination with the elastic neck-extension H, substantially as and for the purpose herein described.
- 4. The blanket A and hood J in combination with the elastic connecting-strap I, substantially as described and for the purpose set forth.
- 5. The close-fitting hood J, having the elastic band L, beneath the jaws, so that they may be allowed to move without disturbing the fit, and adapted to be secured to the cover by means of straps, substantially as here in described.
- 6. The improvement in covering-blankets for animals, consisting of the blanket A, having the flap C, and permanent straps or bands fixed to it to secure it around the body, whereby the use of loose cinchings is avoided, substantially as herein described.

The right to make clothing in the United States will be sold on a royalty. Apply to the patentee,

FIVE DOLLARS A YEAR.

STANFORD.

## Stanford, By Electioneer—Annie Lawrie.

To the above admirable likeness and the name of the sire, Electioneer, there is little necessity to add more than the blood of the dam to place this young stallion in a "good light." The representation is as nearly perfect as can be, and to state further that he is of the very best color, a deep bay, or that shade of brown which is seen in the lighter shades of rosewood, with black legs, mane and tail, without any white markings, our readers can form a correct opinion of his appearance. He is an Electioneer all over, and those who have

the BREEDER AND SPORTSMAN of July 22d, 1882, and will compare the pictures of sire and son, cannot fail to notice the "striking resemblance."

His dam Annie Lawrie was by McCracken's Dave Hill, Jr., the sire of George Treat and other celebrities, and his second dam Kitty was by Owen Dale. Annie Lawrie was a chestnut 16 hands high, fine fashioned and very spirited, but was never handled for speed. She could, and did show a three-minute gait on the road double. Kitty could also trot in 2.50. The Vermont Black Hawk blood has proved one of the very best crosses in trotting pedigrees, and when "backed" by that of Vermont Ham-

bletonian, as is the case with Dave Hill, Jr., it is truly a potent mixture, and then the Owen Dale is of the "tried and true" strains of Belmont and American Eclipse. Form and blood are the chief anchors to rely upon in breeding ventures, and people are realizing the importance of proper selection when the object is to obtain fast trotters, as has been so long the case in the rearing of race-horses. Supplemented by performances there is nothing lacking, although of the three attributes of a trotting sire, viz., blood, form and performance, the two first named are the major points. That Stanford will make a fast trotter is reasonably certain, and that he has never had even the preliminary lessons in a trotting education, he shows a fine gait which proper tuition will

bring speed. His temper is excellent, and this quality Electioneer appears to stamp his progeny with. As a rule, the Electioneers are the most "level-headed" trotters ever seen upon a track, the youngsters being as steady as old campaigners, and not to be thrown out of balance by influences which usually disturb the veterans. When taught that fast trotting is required, they stick to that method of progression with a pertinacity that is surprising at even the earliest ages. The weanlings at Palo Alto, after a few lessons on the miniature tracks, are not overcome by the exuberance of animal spirits so far that the motion of the whip or hand is not obeyed, and they will bound from a run into a fast trot, and with such true and rapid action, that the display to the admirers of fast trotting is more attractive than their elders when under the control of bit and rein. The dam of Stanford was bred by James B. Chase, who also owned the grandam. George Faylor bred the colt which R. P. Clement purchased when he was three years old. He was foaled in 1879. Judge Clement has several yearlings by him which bear so close a resemblance to the get of their grandire that would be readily mistaken for the "old horse's" colts by the shrewdest observer.

OUR NEW YORK LETTER.

Spring Signs and the Spring Stakes—Revival of the Albion Jockey Club of Gallatin, Tenn.—Good Prospects for the Southwestern Spring Meetings—The New Orleans Meeting—General Racing Notes, etc.

Judged by the signs of the seasons, an early spring is an event to be anticipated by New Yorkers, for heavy thunder storms of late, and the almost continuous rainy, moist weather of the past three weeks has about driven all the frost out of the ground. Up the Hudson blue-birds have made their appearance, along with other varieties of the bright-hued, feathery harbingers of spring, although the river has only been a few days clear of ice. Less than ten days ago the writer was at Scarborough, only forty miles north of Manhattan, and the icy hammocks of the Hudson extended almost the entire width of the stream, which is there (at the Tappan-Zee) over two miles across. And yet this same day, on shore, the birds of bright plumage were fitting to and fro as mentioned.

Among turfmen in this vicinity to-morrow, stake day, is the all-absorbing theme at present. Six associations at Washington, Baltimore, Jerome Park, Chicago, Monmouth Park and Saratoga close their books for their spring events on this 1st of March, and the same will distribute over \$250,000 to turfmen throughout the country. The next great racing event to close, of interest to California turfmen, is the Champion Stallion Stakes, to be run at Monmouth Park in the summer of 1885. It closes for stallions on April 1st next, and from the conditions advertised in the BREEDER AND SPORTSMAN will be worth not less than \$15,000. As owners entering stallions will get \$6,250 of this amount, in first, second and third monies respectively, it can readily be seen that your State and its thoroughbred sires should be well represented, for no colt or filly can compete next year whose sire has not been entered; and in the Lorillard Stakes for 1886 for three-year-olds, foals of 1883, with \$5,000 added, also to be run at Monmouth Park, no colt or filly can be entered in August next, when this rich stake closes, unless their sire has been entered in the Champion Stallion Stakes of 1885, which closes April 1st as above. This latter condition, however, will not extend to foals bred in a foreign land.

Turfmen throughout the country generally will be gratified to hear that measures are actively under way at Gallatin, Tenn., for the revival of the famous old Albion Jockey Club of that section, and there is every probability of a fall meeting there in next October or November. It is indeed rather strange that Sumner county, Tenn., famous a century ago for its fine race-horse, did not seek to maintain its local race-course, but was contented, seemingly, to confide its energies to breeding, and to the sending out of its horses to win honors in other tracks throughout the country. This, however, has not been from any lack of appreciation of the turf, but rather from the changes consequent on the war, the losses of estates and the death of many of the old turfmen of ante-hellum days. But now recuperation is well under way, prosperity is universal throughout that section, and with the natural increase in population and the presence of a comparatively new generation comes a desire to revive the sports of their ancestors. With increased facilities, Gallatin becomes every year more easy of access, and there is no reason why in future years the meetings of the Albion Jockey Club, spring and fall, should not be among the most interesting in the southwestern racing circuits. Such Tennesseeans as Generals Harding and Jackson of Belle Meade, the brothers Frankliu, Gen. V. L. Kirkman and others are foremost in the new enterprise, and also Mr. Charles Reed late of Saratoga, N. Y., whose Fairview Farm, near Gallatin, is already booming up as a prominent breeding center. Subscription lists are now in the hands of Dr. Lampkin, the former vice-president of the old Albion Jockey Club, and the improvement of the grounds, new stands, and stables are already under way. The old track is one of the fastest in America, and its picturesque surroundings of forest and blue-grass, with pure water for the horses, simply perfect. At other points in Tennessee, from Memphis and Nashville, come good reports of the stakes lately closed at both places. Good entries have been received to a majority of the events, and over two hundred horses are expected to take part in these meetings. They will be important, as being about the first line turfmen will get as to the capabilities of several of the most fancied candidates for the Louisville Derby and other events. The Nashville track was a foot under water two weeks ago, but was dry again at last accounts. New Orleans has been having some very good racing since my last letter. On Saturday, the 23d, the first important event of 1884 was run, the Mystic Krewo Handicap one mile and a half. The best attendance of the winter meeting was at hand, Mardi-Grave having drawn thousands of visitors to the Crescent City. In the judges' stand with Col. Simmons and Maj. Wheeler were Mr. A. J. Cassatt (Mr. Keleo) of Philadelphia, Maj. Elias Lawrence of the Latonia Jockey Club, etc. A heavy track somewhat marred the sport, but few good races were run, notwithstanding Caroon, by Glennary, won the first—a mile dash, from a fairly good field, and then Mareh Redan, late the Julietta Colt, beat nine others six furlongs in a gallop. This five-year-old seems to be in his old form of

1882, when he downed the shifty Barret at Sheepshead Bay. The race of the day came next, and eight horses started. The betting was the heaviest of the meeting, five horses selling nearly even up in the pools, but at the finish Wallensee by Waverly and Foster by Foster, both five-year-olds, fairly run down all opposition, the two stable companions galloping in almost alone from Brmswick, Princess, Slocum and others. Wallensee, the winner, was a good horse last year, and at Saratoga beat Gleaner, Lord Raglan, Nettle, and others in a fast-race. Black Jack won the last event of the day, and the racing closed until to-day when it was resumed again.

An ancient tradition is resurrected regarding racing on Hempstead Plains, L. I., over two hundred years ago, for cups given by Governor Nichols, one of which is now said to be owned in this city. This was in 1663, only a year after New Amsterdam had been wrested from the Dutch, and the track is said to have existed where Garden City now stands. That section was then a plain, level as a barn door, sixteen miles long by four broad, and there was not a single tree on the wide expanse. Neither bush, tree nor shrub would grow there, it was said, and the plains were given over to sheep pasturing and these cup races, the courses being called at the time the Newmarket and Ascot courses. The British officers had fox hunts on this Ascot Heath during the Revolutionary War, and Hempstead Plains was the gayest of the gay. Now market gardens cover the spot, and in 1821 the establishment of the Union Trotting Course there removed the last vestiges of the old-time racing plains of Hempstead.

The Gebhardt-Hunter squabble is to be settled by arbitration, it seems. Mr. J. G. K. Lawrence, Secretary of the Coney Island Jockey Club, Mr. Henry I. Nichols and Judge Vanderpool, all of this city, are the arbitrators. Mr. Hunter claims that "Freddie" owes him some \$12,000, and certainly there must be some foundation, in fact, for the claim, or Freddie Gebhardt would not so readily submit to arbitration. Some capital is being made by a certain weekly sheet in this city, announcing that most of Pierre Lorillard's race-horses are for sale, giving many persons the idea that he is going to quit the turf, etc. So they are, on the principle of the man who once declared that he would sell anything he had, even his wife, if the purchaser would pay his price. I saw the price list of Ranocosa a day or two since, and such figures as \$15,000 for Leo, \$10,000 for Young Duke, \$7,000 for Huron, \$5,000 for some of the yearlings, and others equally fabulous, are equivalent to no offer at all. The same paper that publishes these items, some weeks ago gravely printed in its advertising columns the stake advertisements of a prominent Racing Association long in advance of its being issued in the regular way. This is simply a species of blackmail, but the shaft fell short of its mark, the sheet in question being notified by the Secretary of the Association in question that they could expect no revenue from their self-imposed labor of love. If you, Mr. Simpson, don't locate the paper I mean, I lose my guess, that's all. Belle Meade Farm, Tennessee, the home of the noted stallions Enquirer, Great Tom, Bramble, and Luke Blackburn, will hold their annual sale of thoroughbred yearlings on the 30th of April next. Forty-nine head will be disposed of—twenty-three colts and twenty-six fillies, and the lot is described as an unusually fine one. The day prior to the Belle Meade sale, Charles Reed, of Fairview Farm, will hold a sale of yearlings, the get of imp. Fechter, Highlander, etc.

The declaration due February 20th to the great race for the Suburban Handicap run at Sheepshead Bay, June 10th, are all in, and only fourteen out of the 74 entries have declined their weights. This leaves sixty horses in the contest, and there is certain to be twenty or more starters. It promises to be a great betting race, several New York book-makers having already opened books on it, 200 to 1 being laid against some of the entries. The coming horse show in this city during the last week in May is already beginning to engross public attention. The list of purses has been increased 75 per cent. to \$17,500. Five hundred dollars will be given to the best trotting stallion. There will be 121 classes of exhibits in all, and entries must be made by May 1st to W. F. Wharton, 48 Broad street, N. Y. From over the water comes the intelligence of several American victories in England, all over hurdles. On February 6th Bolero, by Bonnie Scotland, won at two miles, on the 9th Golden Gate, by King Alfonso, another race at the same distance, and last week by cable was reported Schem's win for the Sandown Grand Prize, worth about \$4,000. His new owner Tom Cannon has commenced the year well. Another item from abroad shows that American stallions do not go unappreciated there, when at that date (February 10th) Foxhall's hook of mares was already full. His fee was 30 guineas (\$150) a mare.

The sad death of Salmi Morse, and the collapse of the play "On the Yellowstone," under Miss Blackburn's management, is the absorbing topic in theatrical circles here. The deceased author of the Passion Play was a man not thoroughly understood by the general public, and his friends are unanimous in speaking well of him. His life and dramatic end show that truth is sometimes stranger than fiction. At the theater, the Country Girl at Daly's has scored an instantaneous success. Well put on, well acted, and of clear construction, it has been witnessed by crowded houses since the opening night. Lady Clare, at Wallack's, is also having its share of favor, and Modjeska, in her new piece Nadjesda, has evoked much criticism for and against. The play is too intense and gloomy to suit the average theater-goer. Alpine Rose, at the Madison Square theater, bids fair to run through the season. The piece has a charming flavor of rusticity throughout, and the scenery, with the acting of every member of the cast, could not be improved upon. Separation, at the Union Square, is another to wheel into line with the above successful pieces, and "standing room only" has been the rule at this house. At the New Park Theater, Mrs. Langtry is doing good business. Yours, Pacific.

New York, February 29th, 1884.

The Santa Claus Fillies.

The race between the two two-year-olds by Santa Claus came off at the Bay District Track on Wednesday of last week, and all bets that Lem Ullman would fall out of the sulky were bad investments, for he not only kept his seat, but won the match in good style. The betting favored Mr. Fry's colt, the odds being two to one that she would carry away the money.

SUMMARY.

BAY DISTRICT COURSE, match for \$100.	
L. Ullman's (E. M. Fry's) b f Santa Rosa, 2 years.....	1 1
H. Scott's br f Josephine, 2 years.....	2 2
Time—3:26, 3:20.	

The brown gelding Great Eastern, by Walkin Chief, record 2:18, owned by John Fox of Pearsalls', Long Island, is matched to trot Gabo Case's bay gelding Big Fellow, by Edward Everett, record 2:23, in June next for \$1,000 a side, mile heats, best three in five to harness. Each horse stands seventeen hands high.

TURF AND TRACK.

Racing and Trotting at Oakland.

Last Saturday witnessed the resumption of business on the Oakland Trotting Park, the rain having put a stop to the weekly "trials of speed," which had been a feature of the winter while the track was good. There could not be a more auspicious day, as the "weather" would have been voted beautiful at any season of the year. It does not require many words to describe the beauty of the afternoon. Sunshine, warmth, a total absence of anything to mar the pleasure of those in attendance. The track was also in fine condition, the inner portion being just right to gallop upon, and though the most favored of the trotters had to go "a long mile" from the necessity of swinging wide on the turns, the outer portion of the track was firm and smooth. The first race to be decided was heats of half a mile for a purse of \$100, the entries Haddington, Red Oak, and Della Walker. That it was a queer race all through was the impression of a large majority of the spectators. In the first place the betting was queer. Haddington was the favorite before the start and as the selling progressed he increased in favor. It was still queerer that after losing the first heat, the winner of which showed no signs of distress, that the loser was in greater favor than ever, and that when to an ordinary observer Red Oak should have been at long odds, there were only "suckers" supporting him. It must be born in mind that Red Oak is credited with the fastest record at heats of half a mile, having run in 48½-49, and though it is not to be expected that a horse is capable of repeating his best performances every time he runs, he won the first heat so handily in 49½ seconds that his loss of ground in the betting thereafter was inexplicable on any other hypothesis than prearrangement. At all events, men wagered their money on the point that the betting indicated a "fixed fact," and there was little disappointment at the result.

The trotting race was very different. It was well contested throughout, although the third and fourth heats was comparatively an easy task to the winner after the homestretch was reached. Regina is sure before the season is ended to add another Electioneer to the "list," and as she is not yet four years old, she has plenty of time to drop into a low notch.

SUMMARY.

OAKLAND TROTTING PARK, March 1st. Purse, \$100; half-mile heats.	
J. McM. Shafter's b h Haddington, by imp. Haddington—Prairie Flame.....	3 1 1
C. Hoffman's Red Oak, by Red Oak.....	1 3 3
—gr in Della Walker, by Jim Clean.....	2 2 2
Time—49½-50.	

The second race was trotting for a purse of \$150, the starters being Ed to wagon, Regina, Fannie Burns and Roanoke in harness. Ed was the favorite, bringing \$26, the "field," Regina and Fannie Burns, \$20, and Roanoke \$9. The first heat Fannie Burns took the lead, Ed being second, and Regina third, until Fannie broke at the three-quarter pole, when Ed and Regina passed her. The latter broke about the distance-stand, regaining her trot in time to be within a neck of Ed when he crossed the score, and as he had made several runs in the heat it was awarded to the filly, Fannie Burns being third and Roanoke last. Time, 2:43. Still Ed was the favorite, bringing \$25 to \$17 on all the others, though the result of the second heat was rather a damper on those who supported him. In that Roanoke and Regina fought for mastery, the others never in the hunt. Roanoke led by several lengths at the quarter and half, from which point the filly kept gaining, and at the wire she was so close that the judge announced a dead heat, the time, 2:40; Ed third and Fannie Burns fourth. After that the field was the favorite at \$20 to \$12, and the third heat was won by Regina so handily in 2:41½ that it was evident that only an accident could prevent her winning. In that Ed was second, Fannie Burns third, and Roanoke distanced. The fourth heat was still easier for Regina, as there was nothing fast enough to place her first position in jeopardy, winning in a jog, with Fannie Burns second and Ed third. Time, 2:40.

SUMMARY.

OAKLAND TROTTING PARK, Saturday, March 1st, 1884—Purse \$150; heats of a mile; best three in five.	
James Garland's br f Regina, in harness.....	1 0 1 1
W. E. Jackson's b g Ed, to wagon.....	2 3 2 3
Mr. Burns' b m Fannie Burns, in harness.....	3 4 3 2
Mr. Clauson's b g Roanoke, in harness.....	4 0 dis.
Time—2:43, 2:40, 2:41½, 2:40.	

Presented to Lord Falmouth.

The scandalmongers, who wished to attribute Lord Falmouth's retirement from the turf partially to his want of confidence in the honesty of his first rider, Fred Archer, will scarcely read with pleasure of the presentation of a massive silver shield to Lord Falmouth by Matthew Dawson and Fred Archer, bearing the following inscription: Offered for the kind acceptance of the Right Honorable the Viscount Falmouth by his trainer and jockey Matthew Dawson and Frederick J. Archer, as a token of gratitude and esteem to the best, kindest, and most generous of masters, on his retirement from the turf, January, 1884. Around the headed outside circle are recorded the classic triumphs achieved by his Lordship's horses since they were trained by Mat. Dawson, viz.: Kingcraft and Silvio's Derby, Spinaway, Jaunette and Wheel of Fortune's Oaks; Silvio, Jaunette and Duteh Oven's St. Leger; Atlantic, Charibert and Galliard's 2,000 Guineas; Spinaway, Cecilia and Wheel of Fortune's 1,000 Guineas; Jaunette's Champion Stakes, and Busybody's Great Challenge Stake. Archer rode all of the winners named except Kingcraft for the Derby, who was ridden by Tom French; Cecilia for the 1,000 Guineas, was ridden by Morris; while Fordham rode Busybody for the Great Challenge Stakes, for which she only carried 104 pounds, or about 16 pounds less than Archer can ride at.

### Status of Oakland Park.

The following letter from Secretary Vail surely settles the question, if ever there was a question in the case.

HARTFORD, Conn., Feb. 25th, 1884.

L. WALKER, SECRETARY: *Dear Sir*—I have your favor of the 15th, and reply that our members are not allowed to sublet their authority; neither is one member allowed to occupy two or more different tracks during the same season without procuring separate membership for each locality administered under its membership; that is to say, a member is understood to represent the use of a trotting park either as owner or lessee during the season of enrollment, not for an entire twelve months, for the season with some members may date from the spring, and with others from some time in the fall, depending upon the time of their enrollment. The membership dues are renewable on or before the 1st of April, and consequently the right of membership will expire on the 1st of April. In your locality racing occurs during the winter, and reasonably you would have the right to exercise the authority of membership down to the 1st of April, so if you should become enrolled early in January you would practically get more than twelve months covered by the single membership, and if you should become enrolled in the fall you would get only a few months of the season in that membership. If a man should lease the track at Oakland and procure membership as lessee of that track, he would have no right to lease another track at San Francisco and claim membership for that because he had procured membership for the one at Oakland; but if he desired to administer the track at San Francisco as a member he would be required to procure enrollment for that track when under his control. Then again, we have had two or more different members using the same track in the same season; one year we had three members who occupied the Mystic Park in Massachusetts, near Boston. The track itself, independent of the management, is not considered to be in membership, but it is covered by the membership procured by the management; that is to say, if a lessee procures membership for the track it is covered by our rules during the time of his membership as such lessee, but another lessee of the same track would receive no protection by reason of the membership of the first lessee, neither would the proprietor of the track possess any rights under our rules, because his tenant, as lessee of the track, had become enrolled.

From these explanations you will observe that your Association, being enrolled with the declaration that you would use the track at Oakland, could have no right to use an additional track under that membership, but you have the right at the time of enrollment to name any track which you have procured the use of.

The proprietor of the Oakland track can not avail himself of the authority of our rules because of your membership and of your occupying the track as a lessee.

Yours truly,

T. J. VAIL, Sec'y.

### Abdallah—Bellfounder.

The following description of Abdallah was written by Wm. T. Porter, the editor of the old *Spirit of the Times*, and which appeared in that paper in 1842. This was seven years before Ryedyk's Hambletonian was foaled, and though the rat-tailed celebrity was then well along in years, there was plenty of vitality as his greatest son demonstrated. In another number of that paper Mr. Porter designates Andrew Jackson as the most blood-like trotting stallion he ever saw, with the exception of Abdallah. Whatever the blood of Amazonia was, the highbreeding of his sire Mambrino was likely to give him as much finish as he is credited with, and accounts for the thoroughbred characteristics so well portrayed by the "Tall Son of York."

The account of the ancestry of Bellfounder, copied from the *Turf, Field and Farm*, comes in appropriately, these two horses representing three-quarters of the blood of Hambletonian. That Bellfounder was also a finely shaped horse is shown by contemporaneous accounts, and in addition to the high blood which he derived from his paternal ancestry, according to Mr. Jacques, who owned Bellfounder at one time, his dam was also well-bred. That the greatest of all the progenitors of trotting horses unite these strains, gives an interest to them which will never flag as long as fast trotters are held in such high estimation.

You have in some recent number mentioned Abdallah as being a trotting horse of peculiar form. Will you oblige a large portion of your readers by stating in few words, if you have not time for many, what are his peculiarities and characteristics? G. B.

NOTE BY THE EDITOR.

By "Rat Tailed" we meant to convey an idea of weakness in the caudal, sacral, and lumbar vertebrae. If the bones of the tail (usually thirteen in number) are light, it naturally follows that the portions of the spine belonging to the haunch (consisting of five pieces) and those belonging to the loins, are likewise deficient in power. Few horses with "light docks" can go a distance; at least none have fallen under our observation. First-raters, like Fashion and Boston, invariably have stout docks, denoting great strength of loin. Nullifier—a fair second-rate horse only at best—is said to have been the only rat-tailed one in this country that ever distinguished himself on the turf. Indeed we never saw even a fair performer, whose tail was very thinly covered with hair, with the single exception of Job. With trotting horses, not infrequently, the case is somewhat different; Edwin Forest, Paul Fry, Beppo, and others, for example. Dutchman, Lady Suffolk, Ripton, Americus, and other cracks, however, are not deficient in this respect. It does not necessarily follow that because the tail of a horse is slightly covered with hair that he lacks power in the lumbar region. Neither Americus nor Abdallah have much hair, yet their caudal vertebrae denote the possession of unusual strength in the bones of the haunch, loin and back.

The general characteristics of Abdallah are fresh in our memory, but as we hope to see him again in the course of a few weeks we will only undertake to say at present, that he is a rich mahogany bay, and measures about fifteen hands three inches under the standard. He has a star, and very possibly one white foot. He is presumed to be thoroughbred, but the pedigree of his dam is lost. He was bred by the late John Tredwell, Esq., at Salisbury Place, Long Island, and was got by Mambrino (a fine son of the renowned imp. Messenger—grand sire of Eclipse and a host of good ones) out of Mr. Tredwell's celebrated trotting mare Amazonia, by Messenger. He is probably now in his teens. His action is en-

perh; in his three-year-old form Mr. Tredwell considered him equal to a mile inside of three minutes, but as there were no public purses offered at that time for trotting horses, Mr. Tredwell resolved, in consequence of his form and blood, to offer his services to breeders; consequently his abilities have never been tested on the course; in the stud, however, his success has been most remarkable—equal to that of Medoc, Leviathan, and Friem, on the race-course. A great number of his get have been trained, and on our trotting courses they nearly equal in number that of all the other sires of trotting horses whatever. Abdallah's great excellence of form consists in this, that he is a "pony built horse" of nearly sixteen hands high. Without an ounce of superfluous flesh, his bone, muscle, and strength, are placed precisely where each are wanted. Of course his loins are well arched, and supported by strong filets; his quarters are broad and deep, his second thighs running quite down into his gaskins; his thigh and stifle unusually muscular, and his limbs are broad and flat in an eminent degree, the tendons standing out in bold relief; his hocks, like his knees, are very broad, and he stands clear and even on feet of admirable form, joined to oblique pasterns of the utmost flexibility. His barrel is a model of beauty and strength, being of good length and ribbed out strongly from the elbow to the stifle; he is well let down in the flank also, so as to present no indication of "tuck," or what is sometimes termed "hiddle-thanked;" many horses that have wide hips—an excellent "point" in itself—present such an appearance; no man or horse can sustain great exertion for any length of time that has not ample space for the carriage of his breakfast. One of Abdallah's best points is his deep and capacious chest, which allows the utmost freedom to his respiratory organs; "through the heart" he will measure with almost any crack on the turf. His fore-arm and second thigh are made up of long, dry muscle; there is nothing "beefy" about him. His neck and head, though well shaped and properly set on, are rather heavy, like most of the Messenger stock; still, his eye denotes good temper combined with a high degree of intelligence. As it is some time since we have seen Abdallah, and we have no notes whatever to refer to, our correspondent, for the present, will be kind enough, we hope, to take the will for the deed, and accept the above, which we have written from memory—for we never forget a horse that has once engaged our attention—as the best description of him we can give off-hand.

### The Ancestors of Bellfounder.

The Charles Kent mare, dam of Rysdyk's Hambletonian, was a daughter of imp. Bellfounder. In 1822 Bellfounder was purchased in England by James Boott, of Boston, and imported into the United States. He was a beautiful bay, scant fifteen hands, and a member of the tribe known as Norfolk trotters. As his blood figures so prominently in our greatest trotting progenitor, we have read with interest a sketch in the London *Live Stock Journal* of the Shalee stock. Jenkinson's Fireaway, a grandson of Old Shales, foaled about 1780, was the first to make one line of descent famous. His dam was a daughter of Joseph Andrews, a thoroughbred of some celebrity in his day. Report says that Fireaway trotted two miles on the Oxford road in five minutes, and was sold for \$5,000. His most successful son was Wroot's Pretender, foaled in 1788. He won a great reputation in Norfolk, extending over many years, and in 1806, when eighteen years old, was sold at auction to Robert Ramsdale, of Market Weighton, and became equally famous in Yorkshire. "If the advertisement of the sale be trustworthy, his dam was a half sister of the dam of Jenkinson's Fireaway, both being said to be by Joseph Andrew. Among Pretender's famous descendants are the Performer horses in Yorkshire and the Bellfounder horses in Norfolk." Wroot's Pretender, founder of the Bellfounder line, to which the Charles Kent mare belonged, was, it would seem, inbred to Jenkinson's Fireaway. It is reported of Black Fireaway, son of Jenkinson's Fireaway, that he trotted, February 25th, 1805, two miles on the Boston road in 6:03, and that the second mile was done in 2:50. West's Fireaway, by Jenkinson's Fireaway, out of a mare "which trotted sixteen miles within the hour, carrying eighteen stone," was the sire of Burgess' Fireaway, also called Kirby's Wildfire, who left much good stock in Norfolk, Yorkshire, London and Scotland. In July, 1819, he trotted on Sunbury Common, two miles in 5:21. "His dam's sire was a thoroughbred—Skyscraper—whose sire was Highdryer, and dam by Eclipse. The most famous son of Burgess' Fireaway was the celebrated Norfolk Cob, who, through his son, Bond's Norfolk Phenomenon, greatly influenced hackney stock in all parts of England, but especially in Norfolk and Yorkshire."

Marshland Shales, a descendant of Old Shales, from whom also descended the Fireaway stock, was a hickcy chestnut with a blaze face and right hind leg white to the hock. When eight years old he trotted seventeen miles in fifty-six minutes. He died at the advanced age of thirty-three, and was cared for by Mr. Siday Hawes, of Colts Hall. When thirty years old the stallion was shown at Tomhall Fair, and George Borrow, who saw him, wrote: "There is something remarkable about that horse; there is something in his action in which he differs from all the rest." Having asked what horse it was, an old man replied: "The best in mother England. He is old, like myself, but can still trot his twenty miles an hour. You won't live long, my swain; tall and overgrown ones like these never does; yet if you should chance to reach my years you may boast to thy great grand-boys thou hast seen Marshland Shales." As Old Shales was highly bred, his descendants were noted for great staying power. The Bellfounder, who was brought to this country in 1822, had the round barrel, the short legs and heavy but long neck of Marshland Shales. The sire of the Charles Kent mare was a horse of individuality, and he came from a district which for over a century has been celebrated for trotters. Although his blood cannot be definitely traced, it is reasonable to infer that he was a direct descendant of Jenkinson's Fireaway, the grandson of Old Shales. Through breeding the daughter of imp. Bellfounder to Abdallah, son of Mambrino, son of imp. Messenger, a horse was produced who founded the great light harness family of America.

At the Four Oaks Park Meeting (Birmingham, England), on the 13th inst., Lord Wolverton's aged mare Lady Jaue, late Susquehanna, by Glenelg, won the Laugley Handicap Hurdle race at two miles. She carried 146 pounds. She started the favorite, and won by four lengths. Pasaic ran twice at the same meeting. The second time he was second for a Selling Handicap Hurdle Plate, carrying 171 pounds, and was sold after the race for fifty guineas.

The three-year-old filly Rosebud, by Gen. Washington, dam Goldsmith Maid, is said to be a perfect picture of the former queen of the turf, while in action she shows her ability to trot as fast as she likes.

### Chinn & Morgan's Sale.

Meers. Chinn & Morgan sold their stable of stock, in training at Lexington, Kentucky, at auction on the 27th ult., and the prices realized were good on the average. The sale was held at the stable of Tracey & Wilson, and the list reads as follows:

Markland, h c 4, by Springbok—Lorena; E. Heffner, Sheepshead Bay, L. I., \$3,025.

Sudie McNairy, ch f 4, by Enquirer—Nannie McNairy; George W. Bowen, Shawhan, \$1,880.

Banquet, ch f 3, by imp. King Ban—Belle Boyden; R. Roche, St. Louis, Mo., \$1,600.

Harpoon, h c 3, by Harkaway—Sunlight; Marshall Wooding, Cincinnati, O., \$550.

Hennibal, b c 3, by Harkaway—Lizzie Vic; J. W. McClelland, Brighton Beach, N. Y., \$1,950.

Royal Arch, ch g 3, by Fellowcraft—Bonnie Mey; T. Barrett, Jeffersonville, Ind., \$190.

Bay gelding 3, by War Dance—Bank Stock; J. W. McClelland, \$190.

Le Logos, h c 2, by Lelaps—War Reel; E. Heffner, \$1,905.

Fellow Tyler, ch c 2, by Fellowcraft—Rosaline; R. Puryear, Cincinnati, \$900.

Grace J., ch f 2, by Austral—Ella Breckinridge; J. H. Miller, Lexington, Ky., \$500.

Brdette, ch c 2, by Ten Broeck—Endless; R. Roche, \$1,150.

Four Tens, b c 2, by Ten Broeck—Lorentie; J. T. Williams, Eminence, \$490.

Long Diamond, h c 2, by Longbow—Sewell; J. Rodes, Burgin, Ky., \$525.

Martini, ch f 2, by St. Martin—Bobadilla; G. D. Wilson, Lexington, Ky., \$500.

Fonda, ch c 5, by Fonso—Serenade; T. Barrett, \$325.

Brown colt yearling by Longfellow—Endless; Appleby & Johnneon, New York, \$1,000.

Chestnut colt yearling by Fellowcraft—Bonnie May; R. Roche, \$1,400.

Chestnut filly, foaled in 1882, by Ten Broeck—Belle Boyden; Appleby & Johnson, \$750.

Bay filly, yearling, by Longfellow—Vexation; Dallas Chinn, Harrodsburg, Ky., \$300.

Bay colt, yearling, by imp. King Ban—Bobadilla; E. G. Thomas, Lexington, Ky., \$900.

Chestnut colt, yearling, by imp. King Ban—Ella Breckinridge; Woodward & Brassfield, Lexington, \$360.

Aggregate, \$21,125; 21 head averaged \$1,010.

### Stallion Show at Livermore.

A stallion show, after the manner usual in the east during the season, was held at Livermore last Saturday, and was quite a notable gathering of farmers and others interested in stock. The display of horses was fine, and the awards were accepted with good grace by the owners, without the controversies commonly met with at such a time. The exhibition was intended as the initiatory to the organization of a Stock Show Association in the Livermore Valley, in which all the prominent breeders of the district will be interested. The judges were J. F. Black, W. H. E. Smith, J. S. Moore, H. O. Weiler, Geo. Croppy, Mile Knox and G. J. Vandervoort. Theo. Gomer presided as Chairman, with Geo. B. Shearer of the *Livermore Review* as Secretary, and C. J. Pullen as Marshal. The total entries were thirty-one, and awards were as follows:

Aged Draft—1st to Adolph, shown by D. Lafrenz, Jr.; 2d to Starlight, shown by A. Schack; 3d to Rudolph, shown by J. M. Allen.

Half-bred Norman and Clyde—1st to Eugene, Jr., shown by Ed. S. Allen; 2d to Sam Patch, shown by E. H. Frick; 3d to Rock, shown by H. Martin.

Four-year-old Draft—1st to Forest King, shown by J. Donnelly; 2d to Adolph, Jr., shown by S. Laughlin.

Three-year-old Draft—1st to Gen. Sheridan, shown by T. Egan; 2d to Sam, shown by M. Rogan.

Two-year-old Draft—1st to Garfield, shown by A. Block.

Horses of All Work—1st to Raven, shown by J. Jones; 2d to Geo. Irwin, shown by Thos. Bonner; 3d to French Spy, shown by Tim. Hayes, Jr.; 4th to Flying Morgan, shown by C. Munch.

Four-year-old, All Work—1st to Billy, shown by T. B. Downing; 2d to Gen. Marion, Jr., shown by R. Christensen.

Three-year-old, All Work—1st to Livermore Boy, shown by John Beck; 2d to Ben Butler, shown by R. McGlashan.

Roadsters or Trotters—1st to Belmont Chief, shown by Thos. Bonner; 2d to Startle, shown by J. D. Smith.

Three-year-old Roadsters or Trotters—1st to Tambolain, shown by M. Mendenhall. No competition.

Two-year-old Roadster or Trotter—1st to Grand Moor, Jr., shown by M. Mendenhall. No competition.

Runnets—1st to Lancaster, shown by Thos. Bonner; 2d to George, shown by Albert Clark.

Jacks—1st to Blue Grass, shown by C. Munch. No competition.

Walking Stallions—1st to Rudolph, shown by J. M. Allen; 2d to Comet, shown by P. Harrington.

### The English Hackney Horse.

This is the same kind of horse that we Americans call a roadster, and I think it unfortunate that the English bestow this improper name on the animal which is so generally useful, for hackney is derived from the French, and literally signifies "a hired horse." Roadster is much more appropriate, and covers the whole ground of his various uses, whether under the saddle or in harness.

A Hackney Stud Book is now being made up in England, and, I understand, is to be published within this year. The preface to the first volume will be mainly a history of this sort of horse, in which, doubtless, will be embodied much curious and useful information. We have an inkling of this in some contributions that the editor, Mr. Henry F. Euren, is now giving occasionally to English journals.

In speaking of Goldfinder, a brown 16½-hand horse, he says his grandsire Volunteer walked 5 miles in 53 minutes and 2 seconds, carrying fifteen stone and a half (217 pounds), and the same day trotted one mile in 2 minutes 58 seconds, carrying the same weight. With all our improvements in the trotting horse during this century, have we one that can trot as fast as Volunteer did, and carry the same great weight? I much doubt it.

His grandsire was Trotting Jalap, got by the thoroughbred horse Jalap, out of a Yorkshire mare, which, like most of the horses of this country, was probably sired by a thoroughbred. He trotted sixteen miles within the hour, carrying sixteen stone weight (224 pounds). Years ago there were many such horses in Yorkshire bred in a similar manner, of which there is no record, but they were unquestionably a powerful and very useful class, either as roadsters or for general farm

Later in this century the horse breeders there much oftener than formerly crossed their cold-blooded mares with thoroughbred stallions, which depreciated the progeny for roadsters; and then, to recover their former good traits, they resorted to Norfolk trotting stallions, of blood similar, I presume, to Bellfounder, imported into Massachusetts many years ago, from which state he was soon transferred to New York, and there gave his blood as a part of the composition of our very best trotting stock.

When breeding roadsters, my brothers and self in Western York used two stallions called Bellfounder and Bellport, got by imp. Bellfounder, out of a high-bred mare belonging to Mr. Kissam, on Long Island, N. Y.—*Live Stock Journal*.

It is rather singular reasoning to claim that the good qualities came from the thoroughbred, and then there followed "depreciation" from the same mixture.

### Foals.

Property of J. B. Cbase, San Francisco.  
March 1st, Wild Rose, by Norfolk—Mayflower, by Eclipse, a chestnut colt, two white hind feet, six or forehead, by Wheatley.

Property of John G. Dnuu, Merced, Cal.  
February 25th, Sierra Belle, by Nephew; first dam by Gen. Dana; second dam by Lorenzo Dou, a bay colt, left hindfoot white, by Mambrino Wilkes.

At Wildside Farm, Santa Clara, property of H. C. Judson.  
January 14th, Nettie Brown, by Rifleman, her dam Kate, by imp. Sovereign, a bay filly, by Wildside.

February 12th, Sonr Grapes, by Norfolk, her dam Shingo Rector, by Lodi, from Becky Rector, by Jim Brown, a bay colt, by Wildside.

February 14th, Bonanz, by Lodi, her dam Brigantine; by Billy Cheatham from Eva Ashton, by Ashland, a chestnut filly, by Wildside.

February 24th, Lizzie Brown, by Rifleman, her dam Kate by imp. Sovereign, a chestnut filly, by Wildside.

February 29th, Susie Williamson, by —, a bay filly, by Wildside.

February 29th, Monday—Mary Givens mare, a brown colt, by Wildside. (Mare owned by Henry Williamson).

At Palo Alto Farm. Property of Hon. L. Stnsford.  
Thoroughbreds—February 16th, Demirep, by Melbonrue, Jr., dam Methilde, by imp. Seythian, from Peggy, by Boston, a bay colt, small snip, by Flood.

February 18th, Planetia, by Planet, dam La Henderson, by Lexington, from Kitty Clark by imp. Glencoe, a chestnut filly, one hind foot and ankle white, by Flood.

February 19th, Riglu, by imp. Glengary, dam Rigamarole, by imp. Australian, from Rescue, by Berthune, a brown filly, strip, small snip, near fore-foot and ankle white, off hind leg white, by Shannon.

February 29th, Helpmate, by Planet, dam Full Cry, by Vandal, from Springbrook, by Lexington, a bay colt, small strip, off hind-foot and ankle white, by imp. Young Prince.

March 1st, Frolic, by Thunder, dam imp. Siskiu, by Muscovite, from Little Finch, by Horusea, a dark bay colt, small star, by Flood.

Trotters—February 9th, Gertie, by Baird's Hambletonian Prince, dam Gazelle, by Rysdyk's Hambletonian, from Hattie Wood, by Sayre's Harry Clay, a bay filly, by Gen. Benton. (foal died on the 12th).

February 10th, Clarabel, by Abdallah Star, dam Fairy, by Rysdyk's Hambletonian, from Emma Mills, by Seeley's American Star, a chestnut colt, by Piedmont.

February 12th, Mills, by Whipple's Hambletonian, dam San Jose Damsel, a bay colt, by Gen. Benton.

February 16th, Mohawk Waxey, by Mohawk Chief, dam Waxey, by Lexington, a bay filly, by Gen. Benton.

February 20th, Irene, by Mohawk Chief, dam Laura Keene, by Rysdyk's Hambletonian, from Fanny, by Exton Eclipse, a bay colt, by Piedmont.

February 26th, Jnniatta, by Fred Low, dam Maid of Clay, by Henry Clay, a bay filly, by Gen. Benton.

February 25th, Elaine, by Messenger Duroc dam Green Mountain Maid, by Harry Clay, twins (dead), by Piedmont.

February 28th, Miss Peyton, by imp. Glengary, dam Romping Girl, by Jack Malone, from Fanny McAllister, by O'Meara, a bay colt, hind feet white, by Electioneer.

March 1st, Alvaretta, by George Lancaster, dam Melinche, by St. Clair, a bay filly, by Electioneer.

March 2d, Nettie Benton, by Gen. Benton, dam Nellie Walker, by Thorndale, from Rosalind, by Alexander's Abdallah, a brown colt, by Clay.

March 2d, Cecil, by Gen. Benton, dam Cuba, by imp. Australian, from Bettie Ward, by Lexington, a bay filly, by Fallie.

March 3d, Prima Donna, by Mohawk Chief, dam Mater Occidentis, a chestnut filly, by Piedmont.

### Breeders and Stallion Stakes.

An incident illustrating the shortsightedness of a few breeders has recently been brought to our attention. The American Stallion Stakes, to be run at Louisville in the fall of 1885 received on January 1st, 1883, sixteen stallion subscriptions whose get alone would be eligible for competition in the race. Mr. F. B. Harper entered Longfellow, but omitted Ten Broeck. This was a great injustice to those gentlemen who had sent their mares to that horse, and whose produce had been dropped right and left in profusion. No less than twenty-three foals by Ten Broeck were dropped by mares owned by other gentlemen. Added to this lot were six owned by Mr. Harper himself. Only eight mares foaled to Longfellow. We know that the immediate pecuniary benefit to breeders from a stallion stake is not large, but any turfman who contemplates buying yearlings invariably looks up their engagements. Among the most desirable are stallion stakes, which are valuable, in addition to which they are usually won without very severe exertions being necessary. To be eligible in stallion stakes is, therefore, to be especially desirable. So thought Mr. Harper himself, evidently, for when the time came to nominate the yearlings in this stake we find that gentleman entering three by Ten Broeck, when that stallion's get are not eligible. This will hardly be pleasant news to Green Morris, who undoubtedly bought Biersau, Froeman and Ten Stone, partly because they were entered in this American Stallion Stakes. It deprives him of an extra good chance to win some \$4,000. If Morris' three Ten Broecks really cost \$15,000, Mr. Harper ought, in common fairness, to remit about \$4,000.—*Sportsman*.

J. H. White of Lakeville, was on last Monday evening elected President of the Sonoma and Marin Agricultural Society in place of A. P. Whitney, deceased. John E. Gwin was also elected to the directorship made vacant by the promotion of Mr. White.

### A Spirited "Kick."

"If it is considered essential to the welfare of the turf that the gambling element should be increased, then the shortening of courses will have the desired effect; but such a policy, instead of improving the thoroughbred race-horse and heightening the tone of the turf, will certainly cause a deterioration in the horse and in the noble sport also."

Thus speaks a recent number of the *Australasian*. Were we to preach a sermon on racing we should certainly take the above as our text, for, in view of the tendency to constantly decrease the distances here in America, it is most pertinent, apropos as to time, and its statements as true as Holy Writ.

We do not desire to pose as a moral philosopher. We are not opposed to betting. We recognize the fact that under the new system there must be a greater number of races, and hence that the distances must be shortened. But we cannot see all the great weight-for-age races over a distance of ground, all the great cup races, which furnish the highest test of racing merit, abolished without entering our protest. It is time to protest when our Maturity Stakes have ceased to exist; the Monmouth Cup is reduced to two miles; the Westchester Cup, of glorious memory, is not reopened; and all the leading stakes are being cut down by quarters and half miles at a time. It is all very fine to glorify "the rapid growth of racing;" but has any one of our sporting scribes ever pondered over the physiological fact that rapid growth is not a healthy growth? The great trouble with racing is that it is depending too much upon betting for its existence. There is too much public money run for, and not enough of the owners' private subscriptions. This public money is derived from pool-selling and book-making privileges, in order to give value to which as many races as can be given are necessary, hence they must be at short distances.

The system of short sprints, which is fast monopolizing our tracks, are not the kind to develop the highest powers of the race-horse, and they are uninteresting to all save those who follow racing merely for the speculation. But our leading turfmen disclaim so unworthy a motive. They claim to race for the pleasure and excitement they derive from it, and a personal pride in the prowess of their horses. We believe there are many of them who would prefer the honors of the distance races, but they cannot indulge the humor. In order to win their share of races they are obliged to breed, select, and train with the one purpose of intense speed only in view. If they do not, they need not expect success, for, as to distance races, there are now almost none. A real stayer, such as Kentucky and Monarchist was, and Eoleis, has no field for his ambition—his occupation has gone. We still have plenty of stayers, but as we shall be obliged in future to breed for T. Y. C. flyers, such a thing as a stayer must become more scarce each season.

You cannot breed a John L. Sullivan from a patient in the consumptive ward of an hospital. If evidence of this were wanting we have only to turn to the English turf of to-day. The stont race of the West Australians, Stockwells, and Kingstone are not to be seen. Occasionally one, in the shape of an Isomomy appears, but it is the result of chance. Roarers rule the roost, the short back-ribbed brute, with an undue tendency to make gross flesh as soon as he is let up, has taken the place of the moderate-sized, hard-muscled stayer, and Irishquois, who was able to win their Derby and St. Leger, a feat performed by only nine horses in over a century, has shown himself unable to stay a mile and a half with the horses of his native land.—*Veritas, in N. Y. Spirit*.

## THE KENNEL.

### Field Trial Winners of America.

(Continued from March 1st.)

Trials on Prairie Chickens.—Fairmont, Minn., Sept. 4th-11th, 1882, under the management of the National American Kennel Club. Judges, E. C. Sterling, Theo. Morford, and D. C. Bergundthal.

American Derby.—For setter and pointer puppies whelped on or after March 1st, 1881; \$200 to first; \$125 to second; \$75 to third; \$50 to fourth; sixteen starters—fifteen setters and one pointer. 1st, Prince Noble (Count Noble—Nellie), black and white setter dog, owned by H. Widdicombe; 2d, Pink B. (Gladstone—Countess Key), black and white setter dog, owned by W. B. Mallory; 3d, American Dan (Lincoln—Daisy Dean), black, white and tan setter dog, owned by Jos. H. Dew; 4th, Gilderoy (Druid—Princess Draco), blue belton setter dog, owned by George C. Marsh; and Scott (Rob—Flash), red Irish setter dog, owned by A. M. Decker—divided.

Free-for-All Stakes.—Open to all setters and pointers; \$250 to first; \$125 to second; \$75 to third; \$50 to fourth; twenty-eight entries—twenty-four setters, four pointers. 1st, Don (Bang—Peg), liver and white pointer dog, owned by R. T. Vandervost; 2d, Sue (Druid—Ruby), black, white and tan setter bitch, owned by P. H. Bryson; and Dashing Novice (Dash II—Novel), black, white and tan setter bitch, owned by D. C. Sauborn, divided; 3d, Gertrude (Gladstone—Nellie), black, white and tan setter bitch, owned by J. W. Orth; Count Noble (Count Wind'em—Nora), black, white and tan setter dog, owned by D. C. Sauborn; and Bessie (Dash III—Countess II), black and white setter bitch, owned by Luther Adams, divided; 4th, Biz (Dash—Flora), red Irish setter dog, owned by J. S. McIntosh; and Prairie Ranger (Charm—Pearl), orange and white setter dog, owned by Sportsman's Kennel, divided.

Fourth.—Grand Junction, Tenn., December 4th-7th, 1882. Judges, Major J. M. Taylor, Dr. Rawlings Young, and Capt. W. H. Kay.

Champion Stake.—For setters and pointers which have won first in any Free-for-All Stake. Two entries—setters. 1st, Sue (Druid—Ruby), black, white and tan setter bitch, owned by P. H. Bryson; and Gath (Count Noble—Peep-o'-Day), black, white and tan setter dog, owned by W. J. Crawford.

The Eastern Field Trials.—Inaugural trials of the Eastern Field Trials Club, Robins Island, Long Island, December 10th-13th, 1879.

Puppy Stake.—For setter or pointer puppies; Field Cup, with \$25 added to first, \$40 to second, \$20 to third; four entries—setters. 1st, Grouse-dale (Waters' Grouse—Daisy Dale), orange and white setter dog, fourteen months, owned by J. B. Goodwin; 2d, Bessie (Ranger II—Mallard's Belle), white and orange setter bitch, ten months, owned by J. O. Donner; 3d, Banquo (St. Elmo—Flora), white and black setter dog, eleven months, owned by Dr. S. Fleet Speir; and Daisy, black and white ticked setter bitch, owned by E. A. Spooner—divided.

All-Aged Stake.—Open to all setters and pointers; Turf, Field and Farm Cup, with \$50 added to first; \$50 to second; \$25 to third. Nineteen entries—eighteen setters, one pointer. 1st, Jennie (Lathrop's Dick—Harrington's Gyp), black and

white ticked setter bitch, owned by W. Tallman; 2d, Raleigh (Elcho—Rose), red Irish setter dog, owned by Dr. Wm. Jarvis; 3d, St. Elmo (Fride of the Border—Jessie), white and black setter dog, owned by Dr. S. Fleet Speir.

Brace Stakes.—For braces of setters or pointers; \$100 to first; \$50 to second; four entries—setters. 1st, Glen and Ned, setter dogs, owned by Dr. H. F. Aten; 2d, Grouse-dale and Smut, setter dogs, owned by W. Tallman.

Free-for-All Stake.—Open to all setters and pointers; \$250 to first; \$150 to second; \$100 to third; eighteen starters—seventeen setters, one pointer; 1st, Sue (Druid—Ruby), black, white and tan setter bitch, owned by D. Bryson; 2d, Peep-o'-Day (Gladstone—Clip), blue belton setter bitch; owned by D. Bryson. 3rd, American dam (Lincoln—Daisy Dean) black, white and tan setter dog, owned by Jos. H. Dew, and Carrie J. (Count Noble—Peep-o'-Day), blue belton setter bitch, owned by W. B. Gates—divided.

American Derby.—Open to setter and pointer puppies whelped on or after April 1st, 1881; \$250 to first; \$150 to second; \$100 to third; twelve starters—setters; let, Carrie J. (Count Noble—Peep-o'-Day), blue belton setter bitch, owned by W. B. Gates; 2d, Pink B. (Gladstone—Countess Key), black and white setter dog, owned by W. P. Mallory; 3d, Bessie A. (Dashing Lion—Armida), lemon and white setter bitch, owned by J. M. Avent.

Fifth.—Grand Junction, Tenn., December 3d-7th, 1883. Judges, Capt. Patrick Henry, Maj. Key, and Dr. Wm. Jarvis.

Free-for-All Stake.—Open to all setters and pointers; \$250 to first; \$150 to second; \$100 to third. Twenty-one starters—nineteen setters, two pointers. 1st, Sue (Druid—Ruby), black, white and tan setter bitch, owned by P. H. Bryson; 2d, Gath, (Count Noble—Peep-o'-Day), black, white and tan setter dog, owned by W. J. Crawford; 3d, Forcman (Dashing Mouch—Fairy II), black, white and tan setter dog, owned by C. F. Crawford.

Fourth American Derby.—Open to setter and pointer puppies whelped on or after January 1st, 1882; \$250 to first; \$150 to second; \$100 to third. Twenty-one starters—nineteen setters, two pointers. 1st, Rush-Gladstone (Gladstone—Donna J.), black, white and tan setter dog, owned by J. M. Avent; 2d, San Roy (Count Noble—Spark), lemon and white setter dog, owned by H. H. Matlock; 3d, Paul Gladstone (Gladstone—Lavalette), black, white and tan setter dog, owned by W. B. Gates.

Second.—Robins Island, L. I., November 29th to December 4th, 1880. Judges, Col. Jas. Gordon, Dr. Rawlings Young and Justus von Lengerke.

Nursery Stake.—Open to pointer and setter puppies under twelve months; \$60 and 2,000 Winchester paper shells to first; \$40 to second; \$20 to third. Five entries—four pointers, one setter. 1st, Belle (Sensation—Grace), lemon and white pointer bitch, ten months, owned by D. S. Gregory, Jr.; 2d, Jennie II (Scranton's Patch—Jennie), black and white setter bitch, eight months, owned by W. Tallman; 3d, Rover, liver and white pointer dog, eleven months, owned by J. R. Raymond.

Puppy Stake.—Open to pointers and setters under eighteen months; \$100 to first; \$50 to second; \$25 to third; \$15 to fourth. Six entries—four setters, two pointers. 1st, Chief (Berkley—Duck), red Irish setter dog, fifteen months, owned by Max Wenzell; 2d, Jersey Queen (Ranger II—Silk), black, white and tan setter bitch, thirteen months owned by J. O. Downer; 3d, Baronet (Rush—Rose), lemon and white pointer dog, twelve months, owned by H. W. Livingston; 4th, Belle (Sensation—Grace), lemon and white pointer bitch, ten months, owned by D. S. Gregory, Jr.

All-Aged Stake.—Open to all setters and pointers; \$200 and fox gun to first, \$100 to second, \$50 to third, \$25 to fourth. Twenty-seven entries, twenty-two setters, five pointers. 1st, Gladstone (Dan—Petrel), blue belton setter dog, owned by P. H. Bryson; 2d, Dashing Monarch (Dash II—Countess Moll), black and white setter dog, owned by John C. Higgins; 3d and 4th, Sensation (Jim—Nell), lemon and white pointer dog, owned by Westminster Kennel Club, and Glen (Colburn's Dash—Mullin's Belle), black and tan setter dog, owned by Dr. H. F. Aten—divided.

Third.—Robins Island, L. I., November 24th-30th, 1881. Judges—T. F. Taylor, Justus von Lengerke and Washington A. Coster.

Eastern Field Trials Derby.—For pointers and setters whelped on or after April 1st, 1880; \$150 to first, \$100 to second, \$50 to third. Nine entries—eight setters, one pointer. 1st, Pollux (Dash III—Diana), black and white setter dog, eighteen months, owned by E. E. Hardy; 2d, Ferida (Ranger II—White's Daisy), lemon and white setter bitch, sixteen months, owned by John G. Heckscher; 3d, Sensation, Jr., (Sensation—Grace), lemon and white setter dog, nine months, owned by Luke White.

All-Aged Stakes.—Open to all pointers and setters; \$250 to first, \$150 to second, \$50 to third. Twenty-one entries—seventeen setters, four pointers. 1st, Grouse-dale (Waters' Grouse—Daisy Dale), orange and white setter dog, owned by Wm. A. Buckingham; 2d, Maida (Dick—Clio), black, white and tan setter setter bitch, owned by Dr. S. Fleet Speir; 3d, Lizzie Lee (Druid—Millie), black and white setter bitch, owned by Dr. S. Fleet Speir.

Members' Stake.—Open to members of the club only; \$100 to first; five entries—setters.

Fourth.—High point, N. C., November 17th-27th, 1882. Judges, Col. James Gordon, Jos. H. Dew, J. J. Sullenburg and Hon. J. McKinney.

Members' Stake.—Open to members of the club only; Eastern Field Trials Cup, value \$100, and Challenge Cup, value \$250, to first; ten starters—nine setters, one pointer. 1st, Don, black and tan setter dog, owned by C. P. Stokes.

All-Aged Stake.—Open to all pointers and setters; \$250 to first; \$150 to second; \$100 to third. Thirty-three starters—twenty-seven setters, six pointers. 1st, London (Paris—Lill), blue belton setter dog, owned by H. Baily Harrison; 2d, Crowth (Young Bang—Jane), liver and white pointer dog, owned by E. A. Godfrey; 3d, Gladstone (Gladstone—Leila), blue belton setter dog, owned by Capt. J. W. Foster; and Lalla Rookh (Sensation's Son—Grace) lemon and white pointer bitch, owned by Luke White—divided.

Eastern Field Trials Derby.—Open to pointers and setters whelped on or after January 1st, 1881; \$250 to first, \$150 to second, \$100 to third; sixteen starters—thirteen setters, three pointers. 1st, Darkness (Chippis—Nettie), black pointer bitch, owned by E. S. Waunaker; 2d, Tick (Bob—Dido), liver and white pointer dog, owned by G. W. Post; 3d, Lalla Rookh (Sensation's Son—Grace), lemon and white setter bitch, owned by Luke White; and Byron (De Jonce—Jane), red Irish setter dog, owned by Wm. Mahone, Jr.

Fifth.—High Point, N. C., November 19th-29th, 1883. Judges, Luther Adams, B. F. Wilson and D. C. Bergundthal.

Members' Stakes.—Open only to members of club; piece of plate, value \$100, to first; eight entries—five setters, three pointers. 1st, Rue (Snapshot—Ruby), lemon and white setter bitch, owned by Bayard Thayer.

All-Aged Stakes.—Open to all setters and pointers; \$300 to

first, \$200 to second, \$150 to third; forty-two starters—twenty-three setters, nineteen pointers. 1st, Gath (Count Nohle—Peep-o'-Day), blue belton setter dog, owned by W. J. Crawford; 2d and 3d, Grossdale (Waters' Grouse—Daisy Dale), orange and white setter dog, owned by Wm. A. Backingham, and Don (Bang—Peg), liver and white pointer dog, owned by R. T. Vandervoort.

Eastern Field Trial Derby.—Open to all setters and pointers whelped on or after April 1st, 1882; \$250 to first; \$150 to second; \$100 to third. Twenty starters—twelve setters, eight pointers. 1st, Sen Roy (Count Nohle—Spark), lemon and white setter dog, owned by H. H. Mallock. 2d, Poarter (Gladstone—Reed), black and white setter dog, owned by J. M. Avent; 3d, Drake (Croxeth—Lass), liver and white pointer dog, owned by A. E. Godeffroy.

#### Pacific Coast Coursing Club.

This club left the city last Tuesday for Merced to hold their spring meeting, and report fine sport. The air was cool, the plains in first-class condition for running, and hares quite plentiful. Coursing began on Wednesday morning, and the result is as follows:

First Ties—M. Mercedite's American Girl heat John McCormack's Robert the Devil; T. Cronin's Chicopee heat J. Dugan's Sadie; Thomas Hall's Fannie heat W. Halpin's Lady Place; J. Eagan's Teubroek beat T. Cronin's Marlin Flynn; J. Eagan's Moll Roe heat P. A. McDonald's Antrim Maid; T. Hall's Gliding Maud beat J. L. Nickels' Sybil; C. Fowler's Longfellow heat W. J. Helm's Staten Island; M. Mercedite's King John heat T. Brady's Wee Nell; M. Devlin's Culverine heat J. McCormack's Posey Mack; M. Devlin's Chief of the Canyon beat J. L. Nickels' Diana; T. Callahan's Sierra beat J. Baker's Tornado; W. Dunphy's Pennie heat T. Hall's Modesto Belle; W. T. Rodgers' Lady Flood beat Roach's Lihator; Patrick M. Jabove's Lord Dugan beat T. Hall's Quantrell. Templar and Sallie Henry ran hys.

Second Ties—Chicopee heat American Girl; Fannie heat Teubroek; Gliding Maud beat Moll Roe; King John heat Longfellow; Sierra beat Culverine; Pennie beat Chief of the Canyon; Templar heat Lady Flood. Lord Dugan and Sallie Henry ran an undecided course, and an adjournment was taken to Thursday.

The Napa Reporter of Saturday has the following: The Vallejo Coursing Club have accepted the challenge given by the Napa Coursing Club, and the race will take place near Bridgeport, on the 2d day of March, for a \$20 silver collar. Following are the names of the five Napa greyhounds: Ned McElhorne's Jangler; Mike O'Day's Garfield; Pat McCue's Ben, and J. C. Talbot's Tip and Fly. Vallejo sportsmen will have to pick out five lively dogs if they expect to get away with the prize, as those mentioned above are not slow in a chase by any means. Much sport is expected.

The Vallejo coursers went to the Bridgeport grounds again last Sunday, but had little sport on account of the scarcity of hares. Only two were started, and the merits of the dogs remain undecided.

An inquiry will be found in our advertising column for a pair of greyhound puppies.

## ATHLETICS.

### A Record With an If.

The amateur race at the Recreation Grounds last Sunday between Moriarity and Molloy for a gold medal, value \$100, distance one-half mile, resulted in favor of the former. Time, 1 minute, 59 seconds. Our eastern friends will no doubt think we have another wonderful runner, but as Moriarity and Molloy both reckon about 750 yards to the half mile, the time will be easily accounted for. The Recreation track is always reckoned as three laps to the mile, consequently any school-boy knows that one and a half laps would make a half mile, yet these runners measured one and about a quarter lap as the half mile, and ran the distance in the time given above, and yet nearly all our daily papers gave them credit for a half mile in 1 minute, 59 seconds, which, by the way, is only three seconds slower than the best English record, and that Myers obtained last visit to England. This is the second time these men have run, and on each occasion it has been given out that the race was for a \$100 medal. Molloy, immediately after the conclusion of the race, in response to the question, stated that they each put up \$50, and the winner was to get a \$100 medal. Now this statement ought not to carry much conviction with it, as when amateurs run the winner generally gets the medal at the expense of the losing man for whatever value agreed upon. It is not likely the winner of the race will put up \$50 towards the \$100 medal. We will try to solve this mystery before the \$100 medal winner competes in any amateur meeting of our clubs.

### Kittleman Heard From.

Advices as to the whereabouts of M. K. Kittleman have been received at this office and it appears that he was neither lost in a washout or knocked out by a blizzard. On the contrary he is alive, well, and in good humor with himself and all the rest of the world, with some trifling exceptions. He left this city the day after his race with Harmon for New Orleans, in response to a summons from his friend and backer Armstrong, who sent word that he had a match on hand. Kittleman expected to return in a few days, but found, on his arrival at the Crescent City, that the match was for \$2,500 a side, with Harry F. Johnson, of Pennsylvania, at 125 yards. Johnson has a record of 12, and is accounted first-class at the distance, and Kittleman declined to start against him without some time for training. So the race was set for Feb. 24th, when it was run at the Fair Grounds. Kittleman had his man beaten at the 100-yard mark, and struck the tape at the finish first by ten feet. Time, 12. The betting was not heavy, Kittleman being favorite two to one.

The amateur fifty-mile race between John Gassman of the North-Side Athletic Club, and P. Golden of the Gramercy Club, was held at Wood's Gymnasium, Williamsburg, New York, on Washington's Birthday. Both men were in splendid condition, but soon after the start it became apparent that Golden was overmatched, as his opponent gradually drew away, and when 34 miles was reached by the North-Side representative, Golden left the track, being almost three miles in the rear. Gassman continued till he had completed 35 miles, when he was declared the winner. At the eighteenth mile Gassman beat the best previous American record of W. C. Davies by 31 seconds, and continued breaking American records till he left the track on the completion of 35 miles, having accomplished the distance in 4 hours 22 minutes and 42 seconds, which is 13 minutes 16 seconds better than the previous American records.

Seventeen contestants took part in a snow-shoe race at La Porte, Sierra county, last Thursday. The first race was won by Matt. Judge of Gibsonville, prize, \$70, distance, 1,800 feet, and time 15 seconds. Parsons from La Porte, Gibsonville, Port Wins, Scale's Diggings, and Property Hill took part in this race. 1,800 feet in 15 seconds, or 7,200 feet in one minute is faster traveling than most people in the valley, at least, are accustomed to.

Hane Rink, claiming to be the champion wrestler of Switzerland, has arrived in New York, and has deposited \$100 in support of a challenge to wrestle Bibby, catch-se-catch-can style, for \$500 a side. If Bibby does not accept the challenge the Swiss champion is willing to try conclusions with any other wrestler in America.

Gibson, the noted if not famous sprinter, has expressed his willingness, even anxiety, to run Kittleman 150 yards for a stake, but a proposition from Thompson to make the match and allow Gibson two yards in the 150 seems to have terminated the negotiations suddenly.

Harmon is talking of another match with Kittleman at 75 yards, but there is little probability of any such race. At 75 yards the odds would be in Harmon's favor, against Kittleman or any other sprinter in the world.

Weston is now on his last one thousand miles, having left four thousand behind him, and the English papers report that enormous crowds gather to see him pass.

At the Caledonian games held at Sydney, January 1st, A. Renfew pole-vaulted 10 feet 10 inches.

## BICYCLING.

### The Records Beaten.

There was a breaking of records at the Recreation Park last Sunday. Alf. Bennett in a five-mile bicycle race defeated T. W. Eck, the Canadian. The contest was to decide the merits of the riders, and an attempt was also to be made to heat the best five-mile coast record made by H. C. Finkler on last Thanksgiving day. The men were sent off, and glided away over the track swiftly and almost noiselessly. The riders alternated in taking the lead, they being so close to each other most of the time that a blanket would have covered them. The time made, considering the roughness of the track and the up grade in the hacketretch, was very fast. Following is the correct figures: 1 mile, 3 min. 12½ sec.; 2 miles, 6 min. 33½ sec.; 3 miles, 10 min. 3 sec.; 4 miles, 13 min. 26½ sec.; 5 miles, 16 min. 5 sec.

The most interesting and best contested race on bicycles, that has ever taken place on this coast, was that between John S. Prince and Henry W. Higham. It was current previous to the race that there was an old account between the two, and that it was about to be settled. Prince took part in a twenty-mile race at a tournament in Springfield last September, in which were also Higham, Keen and James. It was a most trying contest, and the men rode as if for life. At the critical moment, when Prince expected to make a dash for the lead, he was placed in a pocket, and Higham won by three lengths in one hour six minutes and thirty seconds. Prince has since that race considered himself Higham's superior on the wheel, and the trial yesterday was a genuine test of what both men are capable of doing.

The spectators had been half in doubt as to whether this race would take place, and when the men went to the scratch there was a dash for places from which a good view of the track could be had. After the men had got away Higham cut out the work and Prince contented himself with keeping within a few feet of him. The first mile was rattled off in 3 min. 17 sec. Six minutes and thirty-seven seconds was the record for two miles, 10:17½ for three miles, 14:30 for four miles. Prince on the last lap went to the front, and Higham allowed him to lead in the fifth mile, which was made in 16:51½. The men changed positions in the last lap of the sixth mile Higham going to the lead. The record at the end of the sixth mile stood 20:14½, and as each mile was told off 23:45½, 27:10, 30:54½ and 34:21½ were recorded. Prince went to the front in the beginning of the eleventh mile, at the close of which 37:4½ was recorded. The twelfth was made in 41:27. Higham led in the thirteenth, fourteenth and fifteenth miles, 45:1½, 48:37 and 52:13 going to the record as the miles were rolled off. The men changed several times in cutting out the work from this on to the last few laps, and the figures for the distance from the sixteenth to the nineteenth miles were as follows: 55:47, 59:22, 65:57½ and 66:35. On the first lap of the twentieth mile the speed of each was increased. Higham led, but Prince pressed him close. The struggle was kept up until the first half of the last lap had been made, when Prince put on a spurt. Higham answered, and they swept down the hacketretch like a whirlwind. Higham kept close to the inside of the course and took no unfair advantage. Prince lapped him, and they swept along to the finish. The last turn was a hard one for both, but Prince gained a few feet before it had been made, and he sped over the line a winner, his adversary lapping on his smaller wheel. The twenty miles were made in one hour ten minutes one and a half seconds, the fastest time on record for the distance.

After the race Mr. Eck announced that Prince had beaten the record, and that he would match him against any trotting horse in the State for a twenty-mile race for \$500 or \$1,000.

During the afternoon Mile. Louise Armando went over two miles to beat her record of 7 minutes, 35 seconds. She accomplished her undertaking in 7 minutes, 22½ seconds.

### Prince Gets a Race.

A tonney of bicycle races will be given at San Jose on next Saturday, the 15th inst., at the track of the Fair Association. Prince will be pitted against E. H. Stedaker's brown roadster Capt. Lewis, ten miles out. Mile. Armando will also ride against a trotting pony, mile heats, and there will be an amateur race for the Association's medal. These events will be under the management of the Fair Association. Prince has been somewhat anxious to match himself against horses, and he has got a race at last. It is an undertaking that will call for his best condition, and no trifling. If he does not win, it will hardly be his fault, for his reputation as a rider in this sort of race would be in a measure at stake.

The San Francisco Bicycle Club had a run to the park and ocean beach last Sunday. One of the members rode in the ranks on a Rugby tricycle. The day was pleasant and the spin was enjoyed by all who participated.

It is rumored that a party of four prominent French professional bicyclists will visit America next year.

Higham left for the east last Tuesday.

## FOOTBALL.

### University Again Victorious—A Splendid Contest.

The first match between the University and Wanderer Clubs was played at the Recreation Ground last Saturday afternoon. Both clubs brought their strongest team into the field, and a great amount of excitement was evinced by the spectators as to the result. The Wanderers appeared heavier and stronger than their opponents, but lacked condition lamentably, as was demonstrated very early in the game. Bosse, the University captain, winning choice, decided to kick down the ground, and at 3 o'clock the Wanderers kicked off from the center, and work began in earnest; after one or two scrimmages the ball was brought dangerously close to the University goal, and the only time through the game that the University goal was in danger; but the Wanderers failed to take advantage of this opportunity, and the ball, till half time, was generally inclined towards the Wanderers' goal. After the usual rest the ball was once again set in motion, and the superior condition of the University soon asserted itself; after a scrimmage or two Putnam, by a very good run, got a touch down, but Palache, who was entrusted with the kick, failed to kick it over the beam. Sutton, the half-back of the University, was playing magnificently, and well backed up by Ramm and Bosse, kept the backs of the Wanderers lively. McKee made a great many runs, which, however, did not help his side much, as he invariably runs across the ground, generally bringing the ball from the extreme left of the field to the right without getting much nearer his opponents' goal. Just before time was up Waterman got the second touch down for the University, and Palache on this occasion kicked the ball well over, thus securing the only goal of the match for the University, the University thus winning the game by one goal, and a try to nil. Sutton's play was generally admired, particularly his brilliant dodging. Ramm and Bosse did good service, and made some capital runs. Rowell tackled in splendid style, and all the rest of the team worked hard for their very substantial victory gained over a strong team like the Wanderers. For the losers Finlayson and Deane worked hard; Peterson and Coben tackled very well a few times. Folemo, who is just from Yale University, worked very well and did some excellent collaring. A great many young ladies honored the ground with their presence, and of course lent eclat to the occasion.

Wanderers.—Cohen, back; Woolsey, Peterson and Sime, three-quarter backs; Deane and O'Kell, half back; Folsom, quarter back; Campbell, Finlayson, Theohald, Heathcote, Page, Goddard, Woodward and Beazley, forwards.

University.—Rowell, back; Woolley, three-quarter back; Sutton, Ramm and McAllister, half backs; McKee and Bosse, quarter backs; Dunne, Palecha, Rothganger, Blanchard, Gallardo, Waterman, Turner and Putnam, forwards. Bosse captained and Power umpired for the University, while O'Kell captained and J. Sanderson umpired for the Wanderers.

## BILLIARDS.

It will be remembered that one month ago Lon Morris, when he took the management of the Exchange's Pin and Fifteen Ball Pool Tables, inaugurated the money prize system, which made those games so popular in the east. He offered a one hundred-dollar bill at each of those tables, as a prize to be raffled off among the players, who, during the month would have earned chances in said raffle, in the following manner: At the Fifteen Ball game, the player had to pocket a ball from the first stroke to get one chance, and two balls to get three chances; the fortunate man at the end of the term to be decided with the dice. At Pin Pool, it was necessary that the player, to earn a chance, had to make either a rampe, thirty-one with the sixteen ball or knock out the five pins on the opening stroke. Up to date there are but sixty-five chances in the Pin Pool game and the month will be up on the 12 inst. There are some two hundred chances at the Fifteen Ball game, and the month being up this day the raffle will take place during the afternoon. This liberal policy has had the effect of creating quite an increase around the pool tables throughout the city, over the attendance of a few weeks ago.

The cushion carom hiliard match between Carter of Cleveland, and Gallagher of St. Louis, for \$500 a side, 400 points up, was played in Baldwin's Turf Exchange, February 20th, and was won by Carter by a score of 400 to 327. The winner was favorite at \$100 to \$80. Carter's play was extraordinary, comparatively writing, for cushion carom play. He has succeeded in placing on record the highest average on a 5x10 table in 400 points up. Score 400 to 327. Average of winner, 4.8-23; of loser, 3.54-91. Best run by winner, 33; by loser, 31. Referee, William Catton, of St. Louis, Mo.

George Slosson and Thomas Foley, of Chicago, have purchased the rooms of Michael Honaban, in the city mentioned, which contains nine tables, and will open in a short time a first-class hiliard parlor, entirely renovated and newly fitted up with furniture, mirrors, fixtures, and new Colander tables of the latest design. The sale was consummated February 18th.

Carter challenged the whole earth at cushion caroms after defeating Gallagher. Sexton responded by instructing Roche of St. Louis, to make the match. Forbes of Cleveland, Carter's hacker, telegraphed the alert Baldwin of St. Louis, the next day, to cancel the challenge.

Immediately after Lent the Grand Army of the Republic Posts of Oakland and this city are to give an entertainment for the benefit of the Veterans' Home. On this occasion Alonzo Morris and J. F. McCleery will give an exhibition of their wonderful fancy playing.

The next tournament in order is that of the "Parisian Pool," which is to take place in about ten days, under the auspices of the "The J. M. Brunswick & Balke Co." This is the new game, a local invention, after the style of the Rudolph and the Morris patents.

Schaefer is understood to have sailed for New York. He had intended to make a continental tour and give exhibitions, but evidently concluded there was "nothing in it."

Sexton received recently a check for \$500 in settlement of his suit for \$5,000 damages against the Bleecker Street Horse-car Railroad for being put off a bob-tail car after he had paid his fare.

The \$400 freeze out at Pin Pool, between Morris and McCleery, will probably not take place until next week.

The late President Garfield was fond of pool, and somewhat skillful with the cue.

THE RIFLE.

At Shell Mound.

The beautiful weather on Sunday, added to the matches for the day, drew together an unusually large crowd of people to Shell Mound who are interested in rifle shooting.

Table with 2 columns: Name and Score. Rows include Linville, Brown, and totals for 200 and 500 yards.

Brown's percentage was 87, which must be considered very fair in such a long match. The proposed match, to come off at the same time and place, between Lieutenants Townsend and Treadwell of the National Guard, and Messrs. Fields of the Police, was postponed until to-morrow on account of Mr. Treadwell's sickness.

A Friendly Test.

Nick Williams of Oakland and Edward Hovey of this city shot a friendly rifle match over the Shell Mound range yesterday, the result showing some admirable marksmanship.

Table with 2 columns: Name and Score. Rows include First round, Second round, Third round, Fourth round, Fifth round, and Total (possible 250).

Sergeant F. M. Haight, of Company B, Fifth Infantry, San Jose, was at Shell Mound on Sunday, and participated in the practice. For a new beginner with the rifle the following score promises well:

Table with 2 columns: Name and Score. Rows include 200 yards, 500 yards, and Total.

At Petaluma.

The match last Sunday at Petaluma, for a champagne dinner, between Captain Fairbanks and Lieutenant Kuhle, and Privates St. John and Wallace of Company C, was a close and interesting contest resulting in favor of the officers by seven points.

Table with 3 columns: Name, 200 yards, 500 yards, and Total. Rows include Knuble, Fairbanks, St. John, and Wallace.

Matches.

Officer Linville, we understand, seeks another contest with Lieutenant Brown of the Fifth Infantry. This time Linville names "ring target," and the accuracy of measurement which determines the count in this case, we think, will beat him worse than ever.

Another Match.

The regular rifle team of the Police Force have officially challenged the Fifth Infantry, without waiting to see which team of that organization wins the Military Trophy.

While on the subject of matches we may state nothing definite has been reached about the time of the next shoot for the Military Trophy by the Fifth Infantry. It will be recollected that Company C., of Petaluma, won the last match.

Challenges from Lillian F. Smith.

EDITOR BREEDER AND SPORTSMAN:—In your paper of the date of November 24th, 1883, you remarked that at present there were in California two young ladies that were professional rifle shots—Miss Lillian F. Smith and Miss Hartman.

Challenges.

I hereby challenge any man, woman, or child on the Pacific Coast or in the world to shoot either of these proposed matches with my daughter, Lillian F. Smith, champion rifle shot of the world (12 years of age), with the Ballard Rifle, single bullet, for from five hundred to one thousand dollars (\$500 to \$1,000) on a side.

1st. At 60 glass balls, thrown in the air by hand, distance fifteen feet (15 feet), using Ballard Rifle, single bullet. This match to be shot on time.

2d. At 100 stationary glass balls, distance 50 yards, using the Ballard Rifle 22 cal., single bullet. This match to be shot on time.

3d. At 300 glass balls in motion, distance 30 feet. This match to be shot on time, using Ballard Rifle 22 cal., single bullet.

4th. I will also match her against any one in the world in her great combination feats that she performs on the stage with the rifle.

In shooting either of the above matches only one Ballard Rifle shall be used, 22 cal., single bullet. One-half minute will be allowed between each twenty shots, for the purpose of cleaning the rifle, which will be deducted from the time of shooting.

5th. I will also bet that she can break more glass balls in 20 seconds, in motion, with the Winchester Rifle, than any other lady in the world.

In case of either or all of these proposed matches are accepted by any one on the Pacific Coast, or in the world, satisfactory arrangements will be made, as California proposes to back the little champion for from \$1,000 to \$5,000 to shoot against any one in the world. LEVI W. SMITH. Oroville, March 4th, 1884.

To-day the Presidio Rifle Club will hold its second rifle tournament for the year at the Presidio range, the shooting to commence at 9 A. M. The Silver-Cup Trophy will be the object of contention by teams of five men each, open to any regiment of the regular army, the National Guard of California, the police of San Francisco, or any organized rifle club.

Eastern Targets.

We recently culled the following from the Forest and Stream, published in New York, for our rifle readers, as an instance of fine shooting. If off-hand, like California shooting at 200 yards, which, however, is not probably the case, it would be a wonderful score:

Table with 2 columns: Name and Score. Rows include Bull's-head Rifle Club, G. Zimmermann, M. Dorrier, C. Rein, H. Holzmann, A. Lober, H. Hackmann, V. Steinbach, G. F. Schroeder.

We regret the paper did not give details sufficient to estimate the accuracy of this shooting precisely, and thus enable us to reach a correct comparison with our own highest scores. While we admit the general excellence of the above shooting we think if we could get at our different records, especially the California Schmetzen, it is possible we could find something as good, or nearly as good. At all events we are able to state at the Alameda range, 200 yards, off-hand, James Standon of the Schuetzen Club has made 122 out of a possible 125, and recently Otto Strecher, at the same target and off hand, made 449 out of a possible 500.

As a spur to our military riflemen we also give the following scores which speak for themselves without any comment from us.

Table with 2 columns: Name and Score. Rows include Saratoga Springs, Feb. 2, 1884, listing various shooters and their scores.

The Coming Rifle.

We call the following from the Forest and Stream as interesting to the riflemen of this coast. Without accepting the final conclusion of the writer, there is, nevertheless, much good sense in his ideas.

"The gun of the future must be one that does away with percussion primers, which, in the magazine of all repeaters, will explode by sudden jars or friction. To that alone can be referred all of the explosions of magazine guns. It seems to me that in this electric age any manufacturer of guns could produce a gun with a battery concealed in the stock, which, by pressure of the trigger, would send a direct current into the center of the cartridge as soon as one was thrown into the barrel, and explosion would follow.

We have also a rifle recently manufactured by Mr. Snyder of this city, which, in its way, promises to work great changes. The inventor claims, with much less powder than common, his gun will shoot effectively farther than any rifle known. Some of our local cracks think there is nothing in this new gun. Others do. For instance, Mr. Leeman, of the Swiss Rifle Club, says he has been out with Mr. Snyder trying his new arm; and at 1,200 yards he says he saw it do better work than he ever knew any rifle do before.

FISH.

The Alameda Sportsman's Club are considering the propriety of paying a constable to patrol Alameda and San Pablo creeks, with a view of arresting all parties, no matter who they are, who violate the fish laws of the State.

We are daily receiving names of parties who ought to know better, who leave this city every Saturday, and who, under the pretence of tide-water fishing, whip every trout stream within a radius of fifty miles from the city.

The Martinez Gazette says: "Several fine salmon trout have been caught in the San Ramon creek this week." We fail to see any record of the arrest and punishment of the person who caught these fish.

The Walton Fishing Club of San Francisco, Clem Dixon, President, are out with very neat cards of invitation for their first trip of the season to-morrow. This club is celebrated for its pleasant parties. We regret we cannot accept the invitation for the opening day.

A devotee of the gentle sport, who lives in East Tillon, N. H., says that he has been fishing 258 times in 13 years, his catches amounting to 3,309 pounds. Come to the front gentlemen, with statistics.

Lake county, according to the local papers, is reported to be a paradise for the lovers of fishing. Since the late rains, the Bulletin says, trout, catfish, suckers, silver-sides, chapsals, and black fish are crowding all the streams and afford no end of sport.

The Red Bluff Cause says the boys are catching fish by the basketful from the Sacramento river. The fish include pike, catfish, white-fish, suckers and other varieties. Two boys there recently caught a ten-pound pike.

Last week Mr. Van Dyke Hubbard caught a five and-three quarter-pound flounder at Saucedo. He had some trouble in landing the beauty.

A six-pound salmon-trout was caught last Sunday at Ross' Landing by Mr. Cook, of the Custom house.

Smelt, in moderate numbers, are beginning to run at Saucedo.

Mr. H. H. Briggs has received from Mr. Jss. H. Corbin a devoted student of ornithology, of Sacramento, a very large Golden Eagle. The bird measured, eight feet two inches over its extended wings, was three feet seven inches in length, and weighed thirteen pounds seven ounces.

Messrs. David and Ally Bonner of New York, have purchased from S. Malcolm Forbes, Mass., the gray mare Day-break, by Harold, dam Midnight, by Pilot, Jr. Daybreak, with very little work, has shown a mile in 2:30, and a quarter in :37. She will probably be handled for speed the coming season.

Mr. Lewis Stewart, of New Jersey, has sold to Captain Cottrell, of Mobile, Ala., the chestnut horse Miser, by Imp. Australian, and a full brother of Rutherford, Spendthrift and Fellowcraft. He will shortly be sent to the Magnolia Stud, Kentucky.

Five hundred dollars will be the first prize for trotting stallions at the National Horse Show in New York, to be held from May 27th to May 31st.

Judge Fullerton, record 2:18 is to be disposed of by sale for \$5 a chance.

THE Breeder and Sportsman.

Spring Race Meeting.

The following list of nominations in the stakes, and entries in the purses, places the success of the Spring Race Meeting of the Pacific Coast Blood-Horse Association beyond doubt. There is little necessity for adding to that forcible testimony further than to state that so far as reported the horses and colts are all doing well. Even horses which were "complaining" at the close of last season have "rounded to," so that the elder division will play their part as well as the youngsters. Having to give so much space to the list, comments will be deferred. In all probability there are entries which have been delayed from the break in the southern railway, and these may come before the paper goes to press.

- No. 1—California Stake—For two-year-olds; dash of half a mile. Closed with 23 nominations.
1. Theo. Winters' ch c, by Norfolk—Lady Jane.
2. Theo. Winters' b f, by Norfolk—Ballinette.
3. Theo. Winters' ch f, by Hooker—Puss.
4. Theo. Winters' b f, by Hooker—Abbie W.
5. Theo. Winters' b f, by Hooker—Countess Zeika.
6. Theo. Winters' b f, by Hooker—Illusion.
7. Theo. Winters' b f, by Hooker—Kitten.
8. J. E. Chase's h c Hidalgo, by Joe Daniels—Electra.
9. G. Pacheco's ch f, by Wheatley—by Lodi.
10. J. W. Adams' br c Common Sense, by Hardwood—Conita Peggy.
11. James Mee's ch f Mischief, by Thad Stevens—Katie Pease.
12. Jas. Mee's ch f Mistletoe, by Thad Stevens—Mistake.
13. E. J. Baldwin's br f, by Grinstead—Blossom.
14. E. J. Baldwin's br c, by Grinstead—Mollie McCarthy.
15. E. J. Baldwin's br f, by Rutherford—Glenita.
16. Palo Alto's b c, by Shannon—Robin Girl.
17. Palo Alto's b c, by Shannon—Sallie Gardner.
18. Palo Alto's b c, by Shannon—Miss Peyton.
19. Palo Alto's b c, by Flood—Planetia.
20. Palo Alto's b c, by Shannon—Bettie Bishop.
21. Palo Alto's br c, by Shannon—Riglin.
22. Palo Alto's b f Monday—Plaything.
23. Hill & Gries, b c Arthur H., by Hock Hoeking—Maid of the Mist.
No. 2—Herald Stake.—For all ages, of \$25 each; \$10 forfeit; \$200 added, second to save stake; dash of three-quarters of a mile.
1. Delaney & Ayres' b g Joe Howell, aged, by Bonnie Scotland—Eva Shepherd.
2. Delaney & Ayres' ch m Trade Dollar, aged, by Norfolk—Eva Ashton.
3. Theo. Winters' ch b Junbo, five years, by California—Big Gun.
4. Palo Alto Stock Farm's b g Jou Jou, three years, by Monday—Plaything.
5. George Green's b g Panama, four years, by Shannon—Abbie W.
6. H. C. Judson's blk c John A., three years, by Monday—Lady Clare.
7. Jas. B. Chase's ch f Susan, three years, by Warwick—Folly.

- 8. John Mackey's ch m Premium, aged, by Castor—by St. Louis.
9. John Mackey's h f Lina, three years, by King Alfonso—Titania.
No. 3—Winters' Stake.—For three-year-olds; dash of one and a half miles. Closed with 23 nominations.
1. J. K. Gries, San Buenaventura, b f Nettie Hill, by Joe Daniels—Mary Wade.
2. E. J. Baldwin, Santa Anita, b c, by Rutherford—Maggie Emerson.
3. E. J. Baldwin, b f, by Rutherford—Glenita.
4. E. J. Baldwin, ch f, by Grinstead—sister to Clara D.
5. E. J. Baldwin, ch f, by Grinstead—Josie C.
6. E. J. Baldwin, br f, by Grinstead—Mollie McCarthy.
7. Theo. Winters, El Arroyo, ch c Prince of Norfolk, by Norfolk—Marion.
8. Theo. Winters, ch f Callio Smart, by Norfolk—Mattie A.
9. Jos. Cairn Simpson, Oakland, b c Sir Thad, by Norfolk or Thad Stevens—Lady Amanda.
10. R. J. Shafter, Genoa, b f Bonita, by Shannon—Napa Queen.
11. Palo Alto, Menlo Park, b c, by Norfolk—Boyardana.
12. Palo Alto, b c, by Norfolk—Nova Zembla.
13. Palo Alto, h c, by Shannon—Demirep.
14. Palo Alto, br f, by Monday—Riglin.
15. Palo Alto, s f, by Norfolk—Glenew.
16. Palo Alto, bl f, by Wildidle—Frolic.
17. Palo Alto, br f, by Norfolk—Lizzie Whippis.
18. Palo Alto, s f, by Norfolk—Frou Frou.
19. W. L. Pritchard, ch f, by Leinster—Flush.
20. J. B. Haggin, El Paso, b c Winnemucca, by imp. Billet—Lottie.
21. J. B. Haggin, h f, by King Alfonso—Miranda.
22. J. B. Haggin, b f, by Pat Malloy—Glenue.
23. J. B. Haggin, b f, by Monarchist—Heliotrope.
24. J. B. Haggin, b f, by Monarchist—Alert.
25. J. B. Haggin, b f, by imp. Glenelg—Edna.
26. J. B. Haggin, ch f, by imp. Glenelg—Susie Linwood.
27. J. B. Haggin, br f, My Love, by Virgil—Lightfoot.
28. J. B. Haggin, b f, by King Alfonso—Titania.

- No. 4—Selling Race.—Purse \$200, \$25 of which to second; one and one-eighth miles; winner of California stakes to carry the rule weight; second to be sold for \$1,000, and to carry the rule weight; third to be sold for \$500, and to carry the rule weight; and three pounds added for every \$100 above.
1. Delaney & Ayres' ch m Laura, four years, by Shannon—Folly, \$1,000.
2. Thomas H. Williams, Jr.'s, br c Bryant W., four years, by Monday—Bebe, \$600.
3. George Green's b g Panama, four years, by Shannon—Abbie W., \$600.
4. T. F. Lynch's b c Blarney, three years, by Wildidle—Blarney, \$1,000.
5. Caleb Dorsey's b g Chris, six years, by Specter—by Veto, \$600.
6. H. C. Judson's b m Neilson, three years, by Wildidle—Susie Williams, \$1,400.
7. L. Rose's s g Harry Rose, three years, by Rutherford—Aileen Oge, \$1,000.
8. John Mackey's ch f Assyria, three years, by Lever—Asia, \$1,500.
9. G. L. Richardson's b g Billy the Kid, aged, by Leinster—Lily Simpson, \$600.
10. Thos. Hazlett's ch g Jubilee, aged, by Norfolk—by Lodi, \$700.

- No. 5—Purse, \$200; for two-year-olds; \$25 to second; dash of five eighths of a mile; winner of California stakes to carry seven pounds extra, second five pounds above rule weights.
1. Jos. Cairn Simpson's ch g Cito, two years, by Joe Hooker—Too Soon.
2. Palo Alto Stock Farm's b c Peyton, two years, by Shannon—Miss Peyton.
3. Palo Alto Stock Farm's ch c Planter, two years, by Flood—Planetia.
4. H. C. Judson's h f Billy Ayres, two years, by Shannon—Lady Clare.

- No. 6—Purse, \$200; \$50 to second; one mile and a furlong; for three-year-olds; maidens, colts and fillies that have not won a race.
1. Jos. Cairn Simpson's h c Sir Thad, three years, by Norfolk or Thad Stevens—Lady Amanda.
2. Palo Alto Stock Farm's b g Jon Jon, three years, by Monday—Plaything.
3. W. M. Murray's—c Col. Jack Hayes, three years, by Joe Daniels—Liberty.
4. H. C. Judson's h f Neilson, three years, by Wildidle—Susie Williams.
5. Jas. B. Chase's ch f Susan, three years, by Warwick—Folly.
6. Jas. B. Chase's ch f Gloriana, three years, by Joe Daniels—Rebecca.
7. John Mackey's b f Rosa Bella, three years, by King Alfonso—Miranda.
8. John Mackey's b f Faustina, three years, by imp. Glenelg—Marmot.

- No. 7—Purse, \$200; \$50 to second; dash of one mile.
1. Delaney & Ayres' b g Joe Howell, aged, by Bonnie Scotland—Eva Shepherd.
2. Delaney & Ayres, ch m Trade Dollar, aged, by Norfolk—Eva Ashton.
3. Theo. Winters' ch f Callie Smart, 3 years, by Norfolk—Mattie A.
4. Theo. Winters' ch c Prince of Norfolk, 3 years, by Norfolk—Marion.

The Arno Sale.

We always feel a deep regret when from any cause a stock-breeding farm is broken up. While it is a source of sorrow, in one way, there are features which allay the bitter feeling, and a gratification that the segregation of animals, that have been secured with so much trouble, may end in advantage to the interests at stake. In the case of the sale of stock of G. Valensin, which will take place at the Oakland Trotting Park on Tuesday next, there are regrets and anticipations. An enthusiastic admirer of fast trotters, Mr. Valensin labored for years to get together a stud, the ownership of which was a pride and pleasure to any gentleman who had a fancy that way. It was such as to give reasonable grounds for the belief that the progeny would be able to compete successfully with those of the great breeding farms of California, and success here means ability to cope with the best of any country.

But there is an element in all human affairs that is more potent than judgement, an influence which cannot be overcome by the acutest mind. That is "luck." "The best laid schemes gang a' agley," and, works as we may, plan as we will, the efforts are rendered nugatory by the frowns of the dame when in a sullen mood. There were a series of misfortunes to the Arno stock, culminating in the death of Buccaneer. In this horse Mr. Valensin took especial pride. Of a great family, a great performer, handsomely formed, all these qualities were overshadowed by the promise of his sons and daughters. What was shown in public was enough to make the reputation of any sire; privately there were exhibitions which threw the others in the shade. Speed is a natural inheritance of the Buccaneers, and the owner had good cause to think that he had the peers of the best.

The loss of the stallion so highly valued determined Mr. Valensin to hasten a trip which had been planned for the future, a journey that would occupy so much time as to preclude the idea of keeping up the breeding operations on the farm by the Sacramento. There would be no pleasure, even under the blue skies of Italy, when the pets were so far away, and hence, reluctantly however, the order was given to Killip & Co. to sell.

We cannot give the space to enter into details, for to select and give preferences would entail going through the whole of the catalogue, and of the sixty-six animals offered there are so many worthy of "special mention," that a full page would be inadequate to portray their merits. For this information we must refer our readers to the catalogues, which can be obtained from Killip & Co. at this office, and of John A. Goldsmith at the Park. Those desiring hood-mares can choose among thirty of the highest breeding and of such a variety hood as is rarely found. There are three stallions, Crown Point at the head, with two Buccaneers from good dams. Crown Point is well worthy of attention on every score, a grandson of Rysdyk's Hambletonian, his dam by George M. Patchen, Jr., second dam by Washington, a horse with a double cross of Mambrino, and his third dam by Abdallah, a son of Mambrino. Elsewhere we write of the potency of this foremost son of Messenger, and to give it still greater

force there is that of Andrew Jackson and Bellfounder. With a record of 2:24 to his credit, good form and capital action, Crown Point is a desirable acquisition to any stud-farm.

As the stock are now domiciled at the Oakland Trotting Park, there is no lack of opportunity for critical examination before the day of sale. Should the rain stop in time to permit driving on the track the speed shown by the colts under the charge of Goldsmith will satisfy the most exacting, and will convince anyone that the claims made are not unwarranted. The gratifying portion is that in all probability a majority of the animals offered will remain in California, and though disseminated over the coast will be on hand to aid in sustaining the reputation of "our" trotters.

Member or Not?

Some one took the trouble to write to Secretary T. J. Vail of the National Trotting Association, to learn whether the Oakland Trotting Park was a member of the society. This probably arose from the action taken by the District Board of Appeals in holding a three-day's trial of a case which was based on a race paced on that track, and the display of ignorance on the part of the questioner is not so surprising when that is taken into consideration. If otherwise we should feel ashamed that there was any one in California so stupid as to trouble Mr. Vail with a question so verdant and simple as that propounded to him. Inasmuch as the then chairman of the Board contended that it was a member, and there being still a few who credited him with some ability, it is not wonderful that a moiety of those who adhered to the belief that he had some knowledge of trotting rules fell into the error. The "Committee on Nominations" at the late convention must feel highly honored by their selection of this astute member, and though it is not to be expected that these gentlemen had any knowledge of the utter incompetency of the man, the President and Secretary of the N. T. A. should certainly have possessed information sufficient to exclude him from another term. Fortunately, there is little for the District Board of the Pacific Coast to do, and as long as the other members (better cannot be found) attend to their duties, there is little to fear. If, however, they permit autocratic domination, bamboozling and imbecility to take the lead, they cannot complain if the Board shares in the obloquy.

Since the above was put in type Mr. Walker handed us the reply of the Secretary of the N. Y. A., and it seems that the query was sent at the request of others.

The Stanford Stake—Entries for 1884.

Though the nominations in the Stanford Stake are scarcely up to the expectations of what should have been the showing, but taking into consideration the erroneous impressions that prevailed for a time it is not had. We have not the least hesitation in predicting that this stake will grow in favor, until in a few years the nominations will include every colt of promise on the Pacific coast.

1. Palo Alto's Stock Farm's h c Azmoor, by Electioneer, dam Mamie C., by imp. Hercules.
2. Palo Alto Stock Farm's b f Wino, by Electioneer, dam Winona, by Almont.

Sacramento and Stockton Purses.

Next Monday the purses offered by the State Agricultural Society, and those of the San Joaquin Association close. These are so nearly alike that the remarks applicable to one place will apply to the other. They are certainly liberal in amount, and the conditions are such that only five per cent. has to be risked at the time of making the entry. At Sacramento the time will be fixed so as not to interfere with the Occident and Two-year-old Stake, and as the fair extends over nine days there is plenty of time to separate them. The advertisements giving full particulars, it is only necessary to call attention to the date of closing, Monday, March 10th.

The Old-time Sires.

Elsewhere will be found a description of Abdallah, written in 1842 by William T. Porter, and accompanying it a sketch of the ancestry of Bellfounder copied from the *Turf, Field and Farm*. Very interesting to the student of trotting-horse breeding is everything pertaining to the horses which stands prominently in the pedigrees of the fastest trotters, and as long as the fancy for fast harness horses exists there will always be an interest felt in the patriarchs of the track. For many years we have regarded Mambrino as the great "fountain head" of American trotters, if any one animal can be awarded the preference. To claim that he is more worthy of the place than his illustrious sire may be regarded as a rash assertion, but when due consideration is given to the fact that from him descended the Hambletonians and Mambrino Chiefs, and that through other channels his blood has won great distinction, he is so justly entitled to a very high place, that it will be conceded by every man, who is at all reasonable, and is not carried away by obstinacy. This brings the thoroughbred one degree closer to the modern sires of the family. Had the blood of the turf been so "pernicious" as the advocates of the dunghill claim, there should have been a greater son of Messenger than Mambrino; Andrew Jackson a failure from the Barh blood derived from his sire.

A Baseless Fabric.

The proposition to match the two-year-olds Tyrant by Great Tom and Harry White by Virgil, owned respectively by Mr. J. B. Haggin and Green Morris, for \$5,000 a side, is still being discussed by the eastern sporting press. The gossip has been kept alive first by the offer of Ed. Corrigan to name a colt and make the match triangular, and afterward by the statement that several other gentlemen were desirous of taking a chance on the same terms as the first named. Mr. Corrigan, in a letter to the *New York Spirit* writes in a defiant way, and the *Spirit* adds editorially "If Messrs. Morris and Haggin mean business they cannot now recede." As far as Mr. Haggin is concerned he has nothing to recede from. He never contemplated matching his colt; neither does he propose to allow any one else to make races for Tyrant. The match appears to be one of those "around the bar-room stove" affairs, so easily arranged by people who have no interest in or connection with the horses, and if any attache of the Del Paso Stable has countenanced or encouraged the idea, he has done so without the authority or sanction of his principal. As Mr. Morris personally is nowhere observable in the business, it is reasonable to assume that he misunderstands the situation. Mr. Corrigan has been misled by rumor, and is not unlikely a little nettled by the silence with which his offer has been received at headquarters.

The Get of Anteeo.

We are extremely gratified to hear that the foals of Anteeo are fully coming up to expectations. In a letter from H. W. Seale, dated March 6th, is the following: "Accident dropped a fine colt last evening. I think if you saw it you would pronounce him as finely a formed colt as you ever looked at. He is a hay without white, excepting a few white hairs in forehead."

As Accident is the dam of the Electioneer filly Regina, it is not out of the way to build very high anticipations on this youngster. All that we have heard from make the same report, and though prepared to receive such, it is a pleasure to have the hopes confirmed. Captain John Hackett's mare, by Mambrino Rattler, had also a fine horse foal, which was found dead in the box in the morning. She is also a very fine mare, her dam being by Belmont, and it is safe to say that, had it lived, Captain Hackett would not have taken \$1,000 for him.

Of five foals we have heard from four are males. The only one we have seen is a filly from a Hambletonian, Jr., mare, and that will bear extolling. We will be obliged to those having Anteeo foals to report them, when the whole list will be published, so that every one interested can know exactly how they stand.

Echo, Jr.

There was an omission in the description of Echo, Jr., in the paper of last week, the name of his owner and breeder not appearing under the picture. In the first place it was our fault in not embodying that necessary information in the manuscript, and again it was overlooked in the office. Suffering from a severe attack of epizooty we were unable to cross the hay last week, so that the paper was out before the mistake was noticed. Echo, Jr., is owned by L. Hewlett of Santa Rita Farm, Alameda county, and will be located in Stockton during the season of 1884. The portrait shows that he is a very handsome colt, and his breeding and promise warrant giving him a high place among the get of his distinguished sire.

False Rumors.

As the races draw near there are always plenty of reports which are apt to mislead the unwary. It has frequently appeared in the papers that the Rancho del Paso borses were to leave for the East soon, and that is undoubtedly the reason why the odds against Duke of Monday in the Louisville Cup have dropped to one-half that was offered on the opening of the books. We understand that it is somewhat doubtful about Mr. Haggin's horses making the eastern trip.

AQUATIC.

The Oxford-Cambridge Boat-Race.

After their two weeks' rest the Cambridge crew went into active training about the 8th inst. On the 11th they did good work over the Ely course, rowing two stretches of a mile and a half each at a stroke, averaging 23. The wind was strong and the water rough. The crew was made up as follows:

Bow, W. K. Hardacre, Trinity Hall.....	154
No. 2, E. W. Haig, Third Trinity.....	161
No. 3, F. Straker, Jesus.....	163
No. 4, S. Swann, Trinity Hall.....	183
No. 5, F. E. Churchill, Third Trinity.....	191
No. 6, J. C. Brown, Lady Margaret.....	178
No. 7, C. W. Moore, Christ's.....	168
Stroke, F. Pittman, Third Trinity.....	167

Mr. Heape, who acted as coxswain, coached from the stern of the boat. Of the gentlemen named, Churchill and Moore rowed in last year's race and were badly beaten.

The Oxford crew did nearly the same amount of work the same day, finishing with a stroke of 30, it being noted that "the rowing during the journey was very uniform and the feather as level as possible." The crew and weights were as follows:

Bow, A. G. Short, Christ Church.....	159
No. 2, C. R. Carter, Corpus Christi.....	180
No. 3, H. H. Wolroad, Exeter.....	187
No. 4, R. W. Taylor, Lincoln.....	182
No. 5, D. H. McLean, New.....	186
No. 6, A. E. Paterson, Trinity.....	188
No. 7, W. C. Blandy, Exeter.....	183
Stroke, W. D. B. Curry, Exeter.....	142
Coxswain, W. D. Heelas, Wadhama.....	118

This is a very heavy crew, especially the forward half, and will, no doubt, be materially changed. Paterson and McLean are the only members of last year's crew.

A four-oared race in barges took place Sunday afternoon last, over the Loug Bridge course, the start being from the foot of Third street. The crews were amateurs—never having competed in a race before—and were chosen from members of the Golden Gate and South End Clubs, whose names have only recently been on the rolls of membership. The race was from a point opposite the South End Club's boathouse, to and around the buoys opposite the Rolling Mill wharf. The contest for the first mile was a lively one, the Gates soon after the start getting the lead, which, notwithstanding the struggle of their opponents they held to the finish, winning the race by about a minute.

There is on the stocks at the boat-builders of South Beach three pleasure boats that promise to prove quite lively in the next mosquito regatta, should there be one. The largest of these is being built for Alfred Desmond, and is 29 feet over all, and has a beam of 13 feet. One being built by Collins is next in size, and measures about 24 feet over all. D. Murphy has the third and smallest, an 18-footer, under way, and by the outline, although the smallest of the trio, she promises to be the prettiest in shape.

The Wherry races of the Triton Club, which have had to be postponed twice for reasons beyond the prevention of those having charge of the affair, will take place in about three weeks. There will be about twenty competitors entered for the several events, for which will be offered medals of gold and silver. The Tritons do not take part in the contests for money, but the affairs heretofore given under their auspices have not been wanting in interest on account of lack of competitors.

Hamilton Dobbin, Leander Stevenson, William Growney and several other notable South Beach oarsmen have signified their willingness to enter into a sweepstake shell race, \$20 or \$30, entrance divided into two prizes, to take place at the Oakland mole at an early date. Such a race would prove very interesting, as the scullers, being from different rival clubs, would try to win as much for the sake of their clubs as for the stakes.

There is at present very little being said in regard to the four-oared shell race between crews of the Ariel and Pioneer Clubs. Mr. Lyze, of the latter club, who was in the shell crew, injured his knee so badly that it was impossible for him to train for the event, and the club not having a suitable man for his oar, a postponement of further negotiations was deemed the best thing that could be done, for the present, at least.

A meeting of the San Francisco Yacht Club was held at the Palace Hotel on Tuesday evening, John D. Spreckels presiding, to decide what to do with the club-house at Saucelito. Several propositions were considered, and it was finally determined to purchase three of the water lots situated near the house for \$1,200, and fill in under the building with rock, which, it is stated, a contractor had agreed to do for \$1,150.

"Parson" Davies has received word that John Teemer will issue in a few days a direct challenge to Edward Hanlan to row any distance for any amount from \$1,000 to \$5,000 a side. Teemer has good financial backing, and would he well trained for the match. If he is in proper shape he can give Ned Hanlan a hard race and come nearer than any other man in America to defeating the champion.

There is prospect of the annual Harvard-Yale eight-oared race becoming a thing of the past, as Yale seems disinclined to indorse the new resolutions of the inter-collegiate athletic conference. The resolutions, among other things, forbid assistance from professional in training and a longer race than three miles.

Henry Peterson is almost as fine in condition as he can expect to be, but he takes exercise in his shell daily, and often walks out to the Mission and runs a mile or two at Recreation Park. His race with Lee will take place on the 16th instant.

Lee is training in Oakland, and is said to be in good trim for his race with the San Francisco man on the 16th. The race promises to be the most interesting event since the Peterson-McInerney race in May, 1883.

James Gordon Bennet has been elected Commodore of the New York Yacht Club for the season of 1884.

## HERD AND SWINE.

## The Cow, the Calf, and the Pig.

[Read before the North-western Dairymen's Association at Mankato, Minn., by H. B. Gurler, of DeKalb, Illinois.]

I have taken these animals in connection, for the reason that they naturally go together in dairying. I have named them in the order of their importance in the new parts of the West. If I were talking before Illinois dairymen, I should change the order to read the cow, the pig, and the calf.

The cow, if properly cared for, is the most profitable animal on the farm, but if left day and night around the straw stack, and is compelled to go 40 to 80 rods for ice cold water or go without, she will not be profitable.

When I commenced dairying, my cows would average only 150 pounds of butter to the cow annually, which I could not figure in a way to satisfy me, and I commenced to test my cows by weighing the milk and testing it for cream, by setting some of each cow's milk in test tubes or per cent. glasses. I found the weight of milk to range from 15 to 40 pounds per cow, and the percentage of cream to range from 7 per cent. to 20 per cent.

I learned that the cow which produced 40 pounds of milk per day, produced 1 pound of butter per day. She was the 7 per cent. cow.

I learned that the cow which gave 18 pounds of milk per day produced more butter than the cow that gave 40 pounds of milk per day.

This butter test I applied to all the cows in my dairy, and I think it is the only reliable butter test. If a farmer is selling cream by the gauge, the weight of milk and the percentage of cream would be a sufficient test. But I predict that cream will soon be bought mostly by its butter value, and there is a great difference in the butter value of cream.

But I must return to my dairy. I commenced to weed out the unprofitable cows, and I found that I had some that would not more than pay for the feed they consumed, and that I had others that would pay \$60 per year after paying for their feed. How does that compare; nothing against \$60? It certainly set me to thinking, and to selling cows to the butchers, and to buying cows, and to raising heifer calves from my \$60 cows. In this way, and changing from summer to winter dairying, I increased the butter yield of my dairy in a few years from 150 to 266 pounds of butter per cow, and the profit after paying for food consumed was increased from \$15 to \$45 per cow, an increase of 200 per cent.

For the year ending June 1st, 1880, I received \$2.23 worth of milk from every dollar's worth of feed consumed by my cows.

I felt paid for the time and labor spent in this work. I thought better of myself. I began to look upon farming as a business that had as great opportunities as mercantile business. And I still think there is more room to improve and do better on the farm than in any other line of business in the West. I am fully convinced that there is more profit in winter dairying than there is in summer dairying, if the dairyman has comfortable quarters for his cows. By having your cows calve in the fall, you are milking them when the milk is of the greatest value. You have the least milking to do in the summer months, when the labor of securing the crops is driving. You have more time to test your cows, which you should certainly do. And when you find a cow that is not making you a reasonable profit, feed her what grain she will eat, and milk her at the same time, get her fat for the spring market, when she will sell for a better price than at any other time in the year. This is the only way I have found for disposing of my discarded cows at a profit. For grain feed I use mostly corn meal and wheat bran, one-half of each by measure. I feed some wheat middlings and some rye feed. For hay, early cut clover and timothy, and I think the more clover the better, if cut when in full blossom, and is well cured. I feed wild hay, oat straw, corn stalks, or any other coarse fodder in the racks in the yard. I find that my cows will eat considerable coarse fodder in the yard, if they have all of the best hay they will eat in the barn. A plenty of fresh-pumped water is essential. Ice water does not increase the flow of milk. Several years ago, one of our most successful steer feeders proposed to argue with me that there was as much profit in feeding steers as there was in feeding cows. I gave him the figures of my previous year's work with my cows, when he admitted that he could not show a profit to compare with it, and make no further talk upon the subject.

We have one patron that we paid \$87.09 per cow last year. The time was two days less than a year.

One of our patrons kept an accurate account of the feed consumed by his dairy of fourteen cows last month. For grain feed, \$42.00; for hay, \$21.70. Total cost of feed, \$63.70. The cows produced 7,700 pounds of milk, worth \$1.50 per 100 pounds, or \$115.50, leaving a surplus after paying for feed of \$51.80, or, in other words, one dollar's worth of feed produced \$1.31 worth of milk. Feed is very high with us. The frost nearly ruined our corn crop and we have to import feed from Minnesota.

Let me repeat. Keep the cows comfortable, feed well, furnish plenty of water minus the ice, weed out the unprofitable cows. You might as well pay a man \$20 per month that can only earn his board, as to keep a cow that will only produce enough milk to pay for her food. It does not require any great amount of skill to test your cows; the greatest point is to decide to do it and then go about it.

I am not living on my farm now, but I have my cows tested once per month, the 15th of each month the test is made. Each cow is numbered, and a record kept. My foreman takes great interest in this part of the work, in fact, I seldom had a man when I lived on my farm who did not take an interest in my experimental work.

I wish to state here that I have had trouble with abortion in my dairy, and I believe I have checked it by the use of home made fed to the cows with their salt. I feed one-quarter home meal and three-quarters salt, and let them eat what they will of the mixture.

The calf is certainly a much more important animal with the dairyman of this section than it is with us in the Elgin section. We find but little profit in growing a steer from weaning to the butcher. But I think there is here with your cheaper feed, both summer and winter, a nice profit in steers. In fact, I suspect that is one-half the inducement for you to keep cows.

I will give you some of my experience in raising calves: I have my cows calve in the fall or early winter. I always let the calf have its mother's milk for two or three days and then commence to feed it warm, sweet skim milk, and teach it to get a little corn meal or other grain feed as soon as we can; also hay. I warm the milk for my calves all winter, and do not wean them until turned to pasture in the spring. I have had Durham grade calves gain two pounds per day in the winter time. I have had better success in raising fall and winter calves than with spring calves.

The fall calf, if fed milk all winter, will be a large, strong animal in the spring, and by the following winter, or when a year old, will not need much more care than the older young stock. The spring and summer calf will be weaned in the fall, and the chances are it does not get the extra care it needs the first winter. I am a strong advocate of early cut clover hay for calves, as well as cows. My remedy for acorns is boiled sweet skim milk, and I have found this remedy good for other farm animals. I have had my grade Durham calves weigh on an average over three hundred pounds when three months old. I cannot make grade Jerseys grow so fast, but they do make splendid butter cows.

The pigs I have tried as hard to make some money out of, as I have with my cows, and I have probably done as well with them as the average farmer, but the balance, after paying for the feed, does not compare well with the cows.

I have made many experiments in feeding hogs and pigs, and have learned this: that to have an experiment reliable, they (and all animals) must be fed on the food to be experimented with a few days before the experiment is commenced. Some of my earliest experiments were made to learn the value of skim milk for pork making, or the number of pounds of skim milk it required to produce a pound of pork.

I always attended to all my experimental work personally. The first experiment was with milk alone, and the pigs on a floor, so they could get no food except what I gave them. The result showed that it required sixteen pounds of skim milk to produce a pound of pork, live weight, or six and one-quarter pounds increase from one hundred pounds of skim milk, which with pork worth four cents per pound would make the milk worth twenty-five cents per hundred pounds.

These pigs weighed fifty to sixty pounds when the trial was commenced. I afterwards experimented with a lot of shotes weighing one hundred and thirty pounds, by dividing the lot as evenly as I could, and feeding one lot corn and water, and the other lot corn and skim milk. I first weighed up the lot fed corn and water, and found what the corn had produced. Then weighed the lot fed corn and milk, and credited the corn with the same increase it made in the other case, and the milk with the balance of the increase. The result was the same as in the other case, namely: 6½ pounds increase from 100 pounds of milk. This trial was during colder weather than the first, and with larger animals, both points against the last experiment.

In December, 1873, 22 July and August pigs, weighing 117 pounds, gained 1-6 pounds per day, were fed corn and skim milk. Allowing the milk to make 6½ pounds of pork to 100 pounds of milk, the corn made 13 84-100 pounds from 60 pounds of shelled corn.

In February, 1874, 46 June, July and August pigs, weighing 200½ pounds each, fed on cooked corn meal and ear corn, made an increase of 12-4-10 pounds per bushel of feed.

In January, 1875, 30 May and June pigs made 9 42-100 pounds increase from 60 pounds of corn meal fed dry, with water for drink, and the thermometer ranging from zero to 18 below zero.

The following month the same lot of pigs made an increase of 9 74-100 pounds from 60 pounds of shelled corn. The weather was much milder than during the previous experiment.

In December, 1875, 54 pigs, 7 months old, averaging 242 pounds made an increase of 10 3-10 pounds from a bushel of corn.

In January, 1876, the same 54 pigs produced 8 pounds increase from one bushel of corn.

In October, 1877, 54 old hogs, that had been at pasture with no other food all summer, made an increase of 2 54-100 pounds each per day, and produced 12 1-5 pounds increase from a bushel of corn.

In October, 1877, 58 July pigs fed ear corn, skim milk, and corn and oat meal made an increase of 14 97-100 pounds from a bushel of corn, after allowing for the milk what previous experiments had shown it to produce.

In July, 1878, 29 hogs, averaging 170 pounds, made an increase of 11 pounds per bushel of corn.

In 1878 I made a series of experiments to learn at what age a pig would make the largest increase from the food consumed. The first experiment was made with the sow and her eight pigs, when the pigs were 13 days old. In this experiment the sow and pigs made an increase of 14 pounds from a bushel of feed.

June 8th, the eight pigs weighed 327 pounds. June 21st, they weighed 423 pounds, a gain in 13 days of 96 pounds. They were fed 439 pounds of skim milk, and 217 pounds of corn, crediting the milk with 6½ pounds per 100, would make 27½ pounds increase, leaving 68½ pounds increase to credit the corn with, or 19 pounds increase from 60 pounds of shelled corn. Figuring the milk at 25 cents per 100 pounds, and the corn at 30 cents per bushel (which was the market price at that time), the pork cost 2 27-100 cents per pound.

In August the eight pigs weighed 126 pounds each, and produced 15 1-9 pounds increase from a bushel of corn, after allowing for the milk fed.

My experience is that with proper food the first 100 pounds increase of weight on a pig costs less than the second 100 pounds, and that each succeeding 100 pounds costs more than the preceding one.

I wish to compare my most successful pig-feeding experiment with my most successful calf-feeding experiment.

February 22d, 1881. Two grade Durham calves, about 5 months old, weighed 732 pounds. March 1st, they weighed 767 pounds, a gain of 35 pounds in 7 days. Gain each per day, 2½ pounds. They were fed as follows: 280 pounds skim milk at 25 cents, 70 cents; 44 pounds corn meal, 25 cents; 70 pounds hay at \$10 per ton, 35 cents. Total feed expense, \$1.30.

Cost per pound increase 3 7-10 cents to compare with 2 27-100 cents in the pig experiment. The feed was figured at the same price in both cases. The point is here. The pig will consume a larger percentage of feed per day than the calf, and consequently must make a larger increase from the food consumed.

I feed my hogs some wheat middlings all the time when fattening. My breeding stock I feed but little other food. I think it is much better than to feed corn.

I would like to impress upon every dairyman's mind the importance of testing his cows separately. I hope you will remember this if you forget all the rest I have said to you.

Professor Henry, of the Wisconsin Experimental Farm, at Madison, Wisconsin, holds that it is wise economy on the part of the farmer who has a great straw stack, and small herd of cattle, and some hay, and who will not enlarge his herd, to sell the hay at \$7 or \$8 per ton, and spend the money in buying straw at \$11 and \$12, and feed it with the straw, together with some oil-meal. Good bright straw is made equal to hay by the addition of the protein in the bran and meal, and the whole is thus made into a far better quality of manure than usually comes from the usual way of feeding the hay and half wasting the straw.

The Dairy says small cows are sometimes thought desirable for family use. The small rough Shetland cow is now proposed as a subject for importation and hooding. This cow has no claims we should respect. It is a creature of untoward environments and hard fortune. It was born of sorrow and grief, and reared in misery and starvation upon storm-swept rocks and moors where no tree can survive, and where the coarse heather is its bed and food, and the lee side of a rock its shelter. It is small; very small; thirty inches high or thereabouts; but where a goat can be kept, this would make a better family cow than the Shetland. There is some poetry in this, but more truth. But we should not be surprised that it got an importation boom, all the same.

There are many kinds of concrete stone, cement, and patent floors for milk houses. The only proper material for such a purpose is one that will not absorb grease. The simplest and surest is a neatly matched pine floor, well painted. This can and should be scrubbed up every day. Mopping will not answer; nothing but hot water and a thorough rubbing. Even in a cellar this is the best kind of floor.

The American Dairyman says there is one point that should be deeply impressed upon the dairyman's mind, and that is, if he wants to make a first-class article of butter he must churn often. Never let the cream get over three days old, no matter how cold it may be kept. If cold it will get old, flat and rinky. If sour, the whey will eat up the best butter globules. Churn as often as you can.

## POULTRY.

## Selling by Weight.

EDITOR BREEDER AND SPORTSMAN:—The storm continuing is my excuse for coming before you again with the hope of getting the breeders to come out through the columns of the SPORTSMAN, by the permission of the editor, on a friendly discussion as to the feasibility, ways and means of taking a departure from the custom, now prevailing on this coast of selling poultry and eggs by the dozen, and sell by weight, more especially fowls. That is the practice throughout the east, fowls sold by weight, and they must find it satisfactory, otherwise they would adopt our method of selling by the dozen. I cannot see why it would not be a benefit to all concerned here as well, we, Pithin of San Jose, has expressed himself as in favor of it, and I would like to hear from all the breeders. We constantly hear complaints from the public of the poor quality of poultry found in our city markets, and if we don't try to improve the quality, I am not sure but they will be importing dressed poultry (by the use of refrigerating cars) to San Francisco, as well as eggs. I am not prepared to say the blame lies at the door of the breeders proper, as all, or nearly all, keep the large varieties more or less, consequently have the material at hand of which to grow a good quality of market fowls, it being the general opinion there is more profit in the egg trade than breeding for market purposes. It seems to me the inferior quality of market poultry is owing to the fact of so many keeping flocks of mongrels with a smattering of Leghorn blood, chiefly for the production of eggs, the cockerels being selected out very young, without any extra feeding, and sent to market to save room and feed for the pullets, in order to force them to lay as early as possible. If poultry and eggs were sold by weight, would it not be an incentive to such to keep those breeds which lay larger eggs, and take on flesh more rapidly, thereby making it more satisfactory to the producer as well as the consumer? To such I would say, if they would only try even a small pen of thoroughbred fowls, they could soon convince themselves there was more profit in them than in mongrels, to say nothing of there being far more pleasure and satisfaction in caring for a flock all uniform in size and color than one composed of all sizes, grades and color. Some advance the idea that even if the small breeds lay such small eggs, they produce enough more of them to equal the layer of the large eggs, and the feed to sustain one of the latter would keep two of the former. That may be so in some varieties, for I have often heard the remark that the Buff Cochins was capable of stowing away enough grub to keep any ordinary hog, and all they were good for anyway was to set, but they were experts in that line. But that is not the case with the Wyandottes or Langshans. They consume no more food than the Leghorn, and nearly equal them in numbers of eggs, while the quality of their egg is much superior. Methinks I hear the defender of the mongrel say that is all hoax; an egg is an egg whichever he lays it. Therein lies their mistake. There is a vast difference in the richness and flavor of eggs. Last, but not least, when you sit down to dine off a nicely roasted Langshan or Wyandotte you have something worthy to be called chicken. O. J. A.

Santa Clara, Feb. 17th, 1884.

The poorest and lightest sandy soil is better for fowls than any other. The rains carry downwards all the impurities, and such soil is always hard and free from mud, becoming dry in a short time. Diseases are not so frequent on light soils, especially roup, and gapes in young chicks seldom occur. This enables those possessing poor, sandy soils to utilize those for poultry raising, and in a short time the land may be fitted for growing crops. Trees are benefited by poultry, not only from the droppings left on the ground, but also through the destruction of insects. Poultry and fruit should be the object, and there are many locations that could be made serviceable in that respect.

I have tied my hens that have chicks for the last five years, and never have seen any way of confining them that suited me as well. I select a place where there is nothing in which the hen can get entangled, and tie her to a tenpenny nail, which I drive into the ground full length. I set the coop just far enough away so that the hen cannot go around it. I use a noose to go around the hen's leg made of soft leather—an old boot leg is good. A swivel is quite as useful in tying a hen as in staking out a cow.

It is a good plan to let hens run among currant bushes. We have known of patches to be always free from the currant worm from this cause, when neighboring patches were annually defoliated.

As hens require a deal of water, drinking only a small quantity at a time, it should be supplied abundantly, and kept clean and fresh.

A few fowls in separate pens are much more profitable and more easily kept healthy than in large numbers.

There is more food raised in the poultry yards of France than in the stalls and pastures of England.

Pumpkins boiled and mixed with corn meal make good poultry food.

About Mules.

It is only among some of the Latin races, as in Spain and Portugal and in the East, that the mule and his sire the ass is appreciated at his true value.

There was a time, however, a few centuries since, when even in England the mule was the peer of his aristocratic half brother the horse; when, cled in magnificent housings, he proudly bore upon his back the abbots, the bishops and the princes of the all-powerful Roman church.

Even as late as 1530 the mule was held to be an indispensable part of the appendage of the Bourbon dynasty of France, and whenever the court of Charles X moved from the palace of the Tuileries to Compiègne or Fontainebleau, it was in coaches drawn at a gallop of ten miles an hour by superb teams of Spanish mules, and such mules!

But to see the mule at his best we should go to the sunny shores of the Mediterranean, to Spain and Portugal. The Arabian domination of eight hundred years on that great peninsula filled it with horses of Arabian and Barb blood, and this blood, to which we attribute the best qualities of the modern race-horse, and paradoxical as it may seem, the sweet temper, the broad forehead, the expressive eye and beautiful ear of the massive Percheron flows, and freely, too, in the veins of the Spanish mule, and imparts to him an appearance as superior to American mules bred for the drudgery of our southern plantations, as is that of the king of the turf to the coarsest Coneyote.

Whoever has had the good fortune to have seen the high-strung and highly bred mules harnessed to the traveling equipages of the Spanish gaily dashing through the Puertadel-Sol at a ten-mile gait, or has encountered the interminable processions of gaily caparisoned mules, bearing the names of all the saints in the calendar, threading with unerring feet the dangerous defiles of the Pyrenees and the Sierra Morena, to the sound of innumerable tinkling bells, will cease at once and forever to object to the mule on the score of his appearance; and whoever has seen the large, dark-eyed, brown, dirty, ragged, but beautiful children of Andalusia gamboling fearlessly and with as much impunity under the heels of the mules with which they were brought up as do the children in the tents of the Arab among the mares, will be compelled to admit that with the same kind treatment the mule, too, will develop traits as near akin to humanity as the dog and the horse.

We are inclined to believe that well-bred mules possess undeveloped qualities for both quick draft and the saddle for which the general public is not inclined to give them credit, and we are convinced from actual observation that for light, quick draft over long distances and continuous from day to day, and for saddle gait, mules out of thoroughbred mares by the best Maltese jacks are fully equal and perhaps superior to our average light draft and saddle horses.

We remember a pair of mules, bred by one of the Shelbys in Kentucky, that drew a carriage containing five heavy men forty miles over an ordinary road in five hours without turning a hair or crack of the whip, and returned the next day with equal ease and in the same time.

In 1836 we saw on Red River, La., \$700 paid for a saddle mule that could pace at the rate of ten miles an hour for hours together.

We have a friend in Rappahannock, Va., Tom Hughes, a regular son of Anak in size, six feet five in his stockings, high in proportion and tipping the beam at over 200 pounds, who, for several seasons, rode in the first flight to hounds hunting a country that was nearly all mountain on a mule that never made a misstep or refused a leap over fence or wall.—Turf, Field and Farm.

"Brown's Bronchial Troches" are excellent for the relief of hoarseness or sore throat. "They are exceedingly effective."—Christian World, London, Eng.

STOCKTON FAIR.

SPECIAL PURSES OFFERED BY THE

San Joaquin Valley Agricultural Association for the Fair of 1884.

OPEN TO THE WORLD.

\$3,000—Trotting.

For two-year-olds or under, Purse \$1,000 per conditions. For three-year-olds or under, Purse \$1,200 per conditions. For four-year-olds or under, Purse \$1,000 per conditions.

\$2,000—Running.

For two-year-olds or under, Purse \$1,000 per conditions. For three-year-olds or under, Purse \$1,000 per conditions.

Conditions.

If more than 10 paid up entries, \$200 added to each purse; \$100 of purse goes to winner's sire if standing in the State. Four moneys in each race, viz: 30, 25, 15 and 10 per cent.

Six or more entries to fill, three or more to start. Only two entries allowed from any one breeding farm. Entrance 5 per cent, positively payable with nominations, which close March 15th with the Secretary, 5 per cent additional of purse payable to Secretary July 15th, 1884, or colt is declared out and first 5 per cent forfeited.

This Association's rules of 1883 to govern, except as specified above. Weights of the Pacific Coast Blood-Horse Association to be carried in running races.

L. U. SHIPPEE, President.

J. M. LA RUE, Secretary. P. O. Box 188, Stockton, Cal.

The following trotters and trotting stallions have died during the past year: Abdallah West, 2:16; Almont Pilot, Bazer, 2:27; Belle of Toronto, 2:30; Bonnie Wood, 2:32; Betsy Trotwood (dam of Phallas), 2:15; Billy Ray, 2:23; Columbia Chief, 2:29; Colonel Moulton, 2:28; Chosroes' Castle Boy, 2:21; Daisy Burns, 2:29; Fletbush Meid, Fred Goldust, 2:27; Governor Sprague, 2:20; Happy Traveler, 2:27; Idol, 2:41; Keno, 2:30; Lady Martin, 2:23; Lady McNair (dam of Rose of Washington), 2:21; Mejolica Maid, Mamie B., Maud K., 2:34; Pemberton, 2:29; Polka Dot, 2:28; Pride, 2:33; Rowdy Boy, 2:25; Slow Go, 2:18; Sam H., 2:32; Sue Dudley, Tom Walter, 2:29.

D. S. Terry's Old Bones won a trotting race with S. W. Henry's black horse at the Fresno Fair Grounds one day last week. Best time, 3:04.

MONMOUTH PARK.

Long Branch, New Jersey,

The Following Stake is Now Open.

THE CHAMPION STALLION STAKES for 1885, for colts and fillies 1 to 2 years old (now yearlings), to be entered at the course by 4 o'clock P. M. on the day before the day appointed for the race, of \$50 each, with \$5,000 added by the Monmouth Park Association to a subscription of \$500 (each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of his sire each to receive \$500; the third horse and the subscribing owner of his sire each to receive \$500; the winner to receive the stakes of horses entered for the race, and one-half of the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify the get of this stallion, if the subscription be paid; each nomination to be accompanied by a contract in the form subjoined, which, if not fulfilled punctually by the subscriber, may be transferred to and fulfilled by any owner or owners entering in the race the get of the stallion, and such owner or owners shall in that case be entitled to start and to the benefit accruing to the subscriber from first, second or third place in the race, and to recover from him the money contracted to be paid, if no benefit accrues; fifteen subscriptions to fill. Three-quarters of a mile.

Form of Contract.

In consideration of the money to be added by the Monmouth Park Association to the Champion Stallion Stakes for 1885, and in further consideration of the increased value given to the get of (my) Stallion by the right of entry therein, which right of entry is not to be invalidated by (my) decease, (I) agree to pay to the Monmouth Park Association, or order, five hundred dollars on the first day of July, 1885, at its office in the city of New York.

The subscription of stallions to the above stakes will close and name on April 1st, 1884. Subscriptions to be addressed to J. H. Coster, Secretary Monmouth Park Association, Madison avenue and Twenty-seventh street, New York.

Mr. Lorillard continues his gift of \$5,000 to the Lorillard Stakes. The Champion Stallion Stakes and the Lorillard Stakes are intended to be permanent.

The Lorillard Stakes for 1886, with the following conditions, will close and name on August 15th, 1884.

The Lorillard Stakes for 1886, for three-year-olds, of \$500 each, h. f., or only \$10 if declared by January 1st, 1885; or \$50 if declared by January 1st, 1886; or \$100 if declared by June 25th, 1886; with \$5,000 given by Mr. Pierre Lorillard; the Association to add \$1,000 for the second; the third to save his stake; horses foaled in the United States are not eligible for this stake unless sired in a foreign country, or by a stallion represented by subscription to the Champion Stallion Stakes for 1885. One mile and a half.

GEORGE L. LORILLARD, President.

J. H. COSTER, Secretary.

STALLIONS THOROUGHbred.

Good care will be taken of mares during the season at \$8 per month, after the season \$10 per month will be charged, but no responsibility for escape or accidents.

John Mackey, Superintendent, Sacramento, Cal.

THOROUGHbred STALLION

X X,

Pedigree.

X X (Doublecross) bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets of Blue, by Sir Charles. Fifth dam, Reilly, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janns. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Antee. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwata, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hook Locking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON,

Oakland or 208 Montgomery Street, San Francisco.

Horse Fever.

Many diseases in horses have been called fever simply because feverish symptoms were present and the fact of a further examination of the animal having been absent is sufficient to justify us in assuming that those who have made this mistake were either ignorant or careless. Doubtless large numbers of horses has been lost from this cause. All the real fevers of the horse may be comprised in two: first, the pure or simple fever, constituting of itself an entire disease; and second, fever which is occasioned by inflammatory action in some part of the body, constituting itself rather the attendant of a disease than the disease itself. But it must be noted that fever cannot be present without disease being found somewhere or another. The pulse or the rapidity of breathing may be quickened by exertion or other causes, but the increase of temperature of the body can only be the result of disease.

It may be stated that fever, pure and simple, known as idiopathic fever, is comparatively infrequent in occurrence. But it requires the attention of all persons who have horses under their care, and its general tendency to degenerate into local inflammation and symptomatic fever seems to arise less from its own nature than from foul air, vicissitudes of temperature, and general bad management. If idiopathic fever is not easily reduced, the blood accumulates in the lungs, the viscera, or some other internal part of the body, and provokes inflammation; or, if a horse, while suffering under this fever, be kept in a foul or ill-ventilated stable, or be exposed to alterations of heat and cold, he speedily becomes locally inflamed from the action of the filth or exposure. The symptoms of idiopathic fever are shivering, loss of appetite, dejected appearance, quick pulse, hot mouth, and some degree of debility; generally, also, costiveness and scantiness of urine, and sometimes quickness of breathing, with such pains of the bowels as accompany colic. The surest sign is the rise of the temperature, which can be told partially by the hot mouth, but it is best to use the chemical thermometer, which should be inserted in the mouth between the cheek and molars, taking care to keep the lips well closed and to avoid the instrument getting crushed between the teeth. If the temperature is normal it will read at 100 degrees, and above that will reveal the state of the animal. A horse cannot live long if the temperature is above 105 degrees, for the heat at 106 degrees paralyzes the heart. Simple fever, unless it rises to this height, never kills, unless it passes into inflammation.

When a horse shows the symptoms we have described, it is necessary to send at once for a "vet.," but there are times and places where it is impossible to get speedy assistance, and in that case a horse may be saved by knowing what to do. If the skin is dry and burning, remedies are required to depress the circulation, and this may be done by the administration of aconite or ordinary tartar, or by bleeding. But when the skin is moist and perspiring, we must then endeavor to reduce the production of heat. For this there is nothing better than the application of cold water, but this must be applied cold at first. Water at blood heat—98 degrees—should be poured over the horse from a watering can with the rose on, and then gradually reduce the temperature of the water to 60 degrees—gradually but rapidly. The horse should be well drenched with water at 60 degrees, and scraped, hot fannels being then used to dry the skin quickly, and afterwards dry rugs and bandages put on. This may have to be repeated two or three times a day to keep the temperature down, but need not unless it begins to rise again. The bowels must be kept open, and the system supported by nourishing diet, and stimulants, if necessary, but these the "vet." will prescribe in accordance with the special requirements of the case.

Death of Caller Ou.

This well-known brood-mare was shot on the 1st inst., at the Iverue Minster Stud Farm, in consequence of her having become seriously crippled by rheumatism. She was bred by the late Mr. W. Fanson in 1853, and was by Stockwell out of Haricot, by Mango or Lanecost out of Queen Mary, by Gladiator. She made her appearance on the turf as a two-year-old, and in a dozen essays scored three successes, none of them, however, being of much account. The following year she competed seventeen times, and was the sensational heroine of the Doncaster St. Leger, for which she started at 1,000 to 15, and got home by a head from the Derby winner, Kottedrum, who was first favorite at 6 to 4. She won the Northumberland Plate in 1863 and 1864, carrying on the first occasion 120 pounds, and on the second 122 pounds, but in attempting in the following year to rival the feat of Underhand she failed to give the weight away to Brown Bread, and was beaten a neck, the winner (then a three-year-old) carrying 89 pounds, and Caller Ou 126 pounds. As a winner of Queen's Plates the daughter of Stockwell and Haricot stands out prominently, she having been credited during her career with no fewer than thirty-four, one of which she won as a three-year-old, three as a four-year-old, fifteen as a five-year-old, ten at six years, and five at seven. At the stud, perhaps the best of her produce were The Pearle, who was a smartish mare in her time, and Roysterer, who, it will be remembered, won the City and Suburban last year, and was at one time thought of in connection with the blue ribbon of the turf. We learn that Caller Ou leaves behind her a promising yearling colt by Altyre.—London Sportsman.

Dark Horse.

The story of the origin of the phrase "the dark horse" is as follows: Years ago there lived in Tennessee an old chap named Sam Flynn, who traded in horses and generally contrived to own a speedy nag or two, which he used for racing purposes whenever he could pick up a "soft match" during his travels. The best of his flyers was a coal-black stallion named Dusky Pete, who was almost a thoroughbred, and able to go in the best of company. Flynn was accustomed to straddle Pete when approaching a town, and ride him into it to give the impression that the animal was merely a "likely hoss," and not a fast stepper. One day he came to a town where a country race meeting was being held, and he entered Pete among the contestants. The people of the town, not knowing anything of his antecedents, and not being overimpressed by his appearance, hacked two or three local favorites heavily against him. Flynn moved among the crowd and took all the bets offered against his nag. Just as the "flyers" were being saddled for the race, old Judge McMinamee, who was the turf oracle of that part of the state, arrived on the course, and was made one of the judges. As he took his place on the stand he was told how the betting ran, and of the folly of the owner of the strange entry in backing his "plng" so heavily. Running his eye over the track the judge instantly recognized Pete, and said, "Gentlemen, there's a dark horse in this race that will make some of you sick before supper." The judge was right. Pete, the "dark horse," lay back until the three-quarter pole was reached, when he went to the front with a rush, and won the purse and Flynn's bets with the greatest ease.

Tommy Dodd, 2:24, is being driven as a mate to Frank L., at Salt Lake City. The team is owned by Mr. E. J. Travia.

Dave Muckle will handle Wilson, record of 2:16, next season, and Mr. Simmons expects some fast work out of the horse.

SEND FOR CIRCULAR OF THE LIGOWSKI FLYING CLAY PIGEON. PIERCE & CO. OAKLAND, CAL. AGENTS FOR THE PACIFIC COAST.

The Firm also carries a large stock of HARDWARE, RIFLES, GUNS, PISTOLS, Of every make CARTRIDGES, FISHING TACKLE, RODS and FLIES, in every variety, and all articles belonging to the Sportsman's outfit on REASONABLE TERMS.

THE NEW ZEALAND Stud and Pedigree Stock Co. LIMITED. AUCKLAND, NEW ZEALAND.

The objects of the New Zealand Stud and Pedigree Stock Company, Limited, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30 1/2, by Dariwell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary, Auckland, New Zealand.

The New Zealand Loan and Mercantile Agency Co., Limited. 412 California Street, San Francisco. HUGH CRAIG, Agent.

LITTLE'S SHEEP DIP. CHEMICAL FLUID. Price Reduced to \$1.25 Per Gallon.

Twenty gallons of fluid mixed with cold water will make 1,200 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect; is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

LIVE STOCK AND GENERAL AUCTIONEERS. No. 116 Montgomery Street, S. F.

BREEDER'S SALE

BY DIRECTION OF

G. VALENSIN, ESQ.,

ARNO STOCK FARM.

We will offer for sale at the

OAKLAND TROTTING PARK,

TUESDAY.....MARCH 11, 1884.

At 11 A. M.

His Entire Stud of

Brood Mares, Trotting Stallions, Colts and Fillies.

Among them are the famous stallion CROWN POINT and Brood Mares of the most fashionable strains of blood.

The colts and fillies are mostly sired by the celebrated stallion BUCANEER. Among the trotters is the well-known mare SISTER and several three and four-year-olds heavily engaged in the various stakes to be trotted this Fall, both in California and the East.

Catalogues will be ready February 25th, giving full description and pedigree of all animals offered.

The sale will be absolute, as Mr. Valensin contemplates an extended tour to Europe. The young horses entered in Trotting Stakes are now at Oakland Park and may be seen upon application to Mr. John Goldsmith, trainer, who has them in charge.

For other information apply to KILLIP & CO., Auctioneers.

STABLE AND PADDOCK.

Racing Points.

In a late number of the *Asian* there is an article on "Arabian horses in Egypt," in which appears the following translation from a small manual in Arabic, which an experienced purveyor compels his agents to commit to memory before permitting them to buy on their own judgment. There is not a great deal of variation from the form which is the most fancied in the thoroughbred in this country, and in the main the "points" ordered to be memorized are in accordance with our ideas. Not exactly, however, as the belly might be too close to the ground, and very large fetlock joints would not be in harmony with the "fiuish" a race-horse should possess. While there might be considerable discussion in regard to some of the points, in the whole this brief description will not be found far out of place.

ADVICE TO THE PURCHASER OF HORSES FOR RACING PURPOSES FROM THE ARABS.

CHAPTER I.—AS TO THE PEDIGREE. (*Asl*.)

If the tribe would use him as a stallion, ask no more; that is enough, and inquiry will establish the point. The marks of pure breeding (*asalat*) will, moreover, be written on his exterior, by the pen of his maker, particularly on his skin, tail, coat, face, way of moving, and eyes.

God bear witness to the foregoing!

CHAPTER II.

AS TO GENERAL APPEARANCE.

Lengthy, like a boat, or a serpent. Low on the leg. Knit together like a wrestler; not spread out like a spider, or the stork. Eyes large and projecting. Disposition quiet and patient. Standing over much ground.

CHAPTER III.

AS TO THE NECK.

Throat (*mizbah*), lit, place the knife is applied to in slaughtering) large, open and clean. Neck long and strong. Wind-pipe free and pendulous.

CHAPTER IV.

AS TO THE BODY, OR MIDDLE-PIECE.

Belly near ground. Withers (*harik*) depressed. Shoulders very long and oblique. Great girth, and deep like the greyhounds. Back not long, but in proportion, and rising like a steep road. Broad strong loins, elevated like a mountain ridge. Ribs arched like a bow or a cask, not flat, like a wall. Ends of barrel (*shaklani*) near haunch bones (*hibalani*), making the waist (*khasirah*) short between last rib and haunch.

CHAPTER V.

AS TO THE QUARTERS. (*Kital*)

Broad, and spread out like the gateway of a town, with the space between them deep, and as broad as a road, having the end of the gut deeply buried at the head of it. Croup greatly elevated, compared with withers, haunches wide and broad, and their muscles strong and outstanding, not rounded, but resembling plates cut from stone or iron. Great length from croup (*majma*) to hock. If quarters sloping, no matter, provided hips are broad and open.

CHAPTER VI.

AS TO FORE EXTREMITIES.

Arms long, and their muscles great and strong. Knees powerful, with certain bones projecting laterally, like horns. From knee to fetlock, straight, short and substantial, with great well-defined sinews, like sword blades, perfectly sound, and free from all doubtful signs. Fetlock joints very large.

CHAPTER VII.

AS TO HIND EXTREMITIES.

Great long stiff thighs, well-clothed with muscle, inside and out, like a gamecock's. Straight like a camel's, not in the least sickle-shaped like the new moon. Very large clean hocks, with plenty of space between point and main part, and all the principal bones standing out under the skin, like bricks in a wall. From hock to ground, short, and inclined well forward, so as to form angle with hock.

CHAPTER VIII.

AS TO ACTION.

In galloping, brushes ground like the swallow, without raising high the forelegs, or bending the knees. In walking, hind foot falls in front of the fore one, and to the outside of it, showing the breadth of the quarters, and spread of thigha.

Foul Air Beneath the Stable.

There is usually but a very imperfect conception of the amount of foul air given off under a stable that has been standing upon the same ground for a period of years. Where it is possible to do so, the surface beneath the stable should have good, natural drainage. Where the ground does not admit of this, thorough artificial drainage should be provided, and the floor of the stable should be tight enough to prevent the foul air beneath from passing up into the apartments occupied by the stock and the hay supply. This is especially important during the winter, as the stock is then presumed to be kept within doors, and the frozen condition of the surface without forces all foulness in the neighborhood of the stable, even for some distance beyond its walls, to pass towards the stable, as beneath, where there is no frost, there is opportunity for escape upward, while any opportunity of this kind is denied without, owing, as stated, to the impenetrable nature of the frozen earth.

There is in the soil, especially in porous soil, what is called "ground air"—the term having reference to such air as is beneath the surface and above the water line—that is, supposing that water is standing beneath the surface. Where, for want of drainage, water stands beneath a stable, it cannot be otherwise than damaging, creating dampness in addition to other contaminating influences. To show how poisonous gases seek for an outlet, and how they find it when confined beneath a frozen surface, we will mention a case where a leak occurred from a gas pipe twenty-five feet away from a house occupied by three persons. A sharp frost having shut off escape upwards, over the broken pipe, the gas permeated the soil, entering beneath the house, thence up through the floor, two of the three persons mentioned being found dead and the third in an insensible state. When the ground freezes, we see upon our wooden sidewalks an illustration of what is here referred to, namely, a free escape of vapor from

the unfrozen earth beneath the walk. It does not follow, because animals are dumb beasts, that they are exempt from influences that would be damaging to the health of their owner. An important influence in the direction of the results mentioned above, rests in the fact that the warmth within a dwelling house, and the like condition in a stable pretty well filled with stock, causes the air to spend itself in the direction of this warmth, on the principle that cold air rushes rapidly towards a warmer. Carbonic acid is very abundant in ground air, and is delivered with great freedom with this current that goes under the stable and house.—*Live Stock Journal*.

Mr. J. B. Haggin's late acquisition Kyrle Daly gave his groom a sample of his quality at Rauch Del Paso a few days since. He is kept in a box stall, the door being as usual double. The upper half was open, and directly in front of the door stood a breaking cart, but the Irishman taking a notion to go out, jumped through the open upper half of the door clear over the breaking cart without touching anything or scratching a hair. As it was necessarily, almost a standing jump, it indicates what a powerful fellow he is. What a gallant timber topper he would be in a cross country run.

THE DRAMA.

The California Theatre.

During the week Article 47, by Adolphe Belot, has occupied the stage here, in which Miss Lewis has earned great distinction by her acting. In principle the play is somewhat after the model of *Camille*, though in associations, contrasts, details and plot, infinitely more dramatic and consistent. It is violent contrasts that really test the power of the actor. Thus judged, we assert, Miss Lewis as Cora is greater in Article 47 than Madame Ellenrich ever was in *Camille* or any other of her favorite roles. It often happened that Madame Ellenrich was weak both from inanition and exaggeration, but Miss Lewis is never so from either cause. Her great power is in her perfect fidelity to nature, and in love, passion, rage, jealousy, anger, vengeance, madness, she is just what nature requires, nothing more or less. Perhaps she is to-day the most uniform, intense, best-balanced actress on the American stage. In action, mannerism, look, attitude and costume she is faultless, and her English in every way is superb. The houses during the week have not been numerically strong, but they have been enthusiastic and appreciative. It is a great reflection upon the taste of San Francisco that this really gifted actress is not more generously patronized. Let us wipe out this disgrace next week. Grismer as George Duhamel, and Phoebe Davis as Marcelle de Rives, both acquitted themselves with effect. On Monday Alix will be presented, in which the cast will be still stronger than in Article 47.

Oakland Theater.

For the week Red Pocket-Book has been the attraction, and we are glad to say has drawn good houses. There is little in this play for the critic to deal with, for it is not a powerful production, by any means, but Miss Charlotte Tittel as leading lady in *Clarise* made all of the character that could be made, and the company also did well. We sincerely hope Mr. Bert will soon find it to his interest to place Miss Tittel on the California stage in company with Miss Lewis and other stars that she may have a correct standard to guide her studies and imitations. On Monday, *Fairfax* by Bartley Campbell, with Miss Tittel as Gladys the heroine and her popular little sister Minnie as Verzie. The other leading characters will be taken by competent artists, so our Oakland friends may anticipate much pleasure next week.

The Vienna Garden.

Although there has been no material change in the talent during the week at this establishment, and no great change in the programme, there has been no diminution in the patronage, the house being filled every night. As we have said before, this fact occurring time after time, proves the Garden to be a most popular place, and while deserving will receive patronage. The Tyrolean singers have given several new songs of late, and are really worth hearing. The *Marvels of Peru*, Miss Nelson with her trained pigeons and dogs, and a good orchestra are the other attractions. We find, however, a growing desire in the public for the re-formation of the *Ladies' Orchestra*, and we give the information to those most interested, just for what it is worth.

TROTTING STALLIONS.

The Almont Stallion

ALTOONA,

BY ALMONT; first dam Theresa B., by Prophet, Jr.; second dam Molly Floyd, by Mohawk; third dam, by Davy Crockett, a Canadian pacer; fourth dam Puss, a fine road mare imported from Canada. Prophet, Jr., by Prophet, son of Bill's Vermont Black Hawk. Altoona was bred by Gen. W. T. Withers, of Fairlawn, is a dark bay, a little over fifteen and three-quarters hands, of high form and breeding.

He will make the season of 1884, ending July 1st, at the ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

Terms, \$30 for the season, due on or before July 1st.

For further information apply to or address

A. H. BECK,

ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

ELECTOR, 2170.

STANDARD—See Wallace's Register Vol. V.

By ELECTORNER, his dam Gilberta by Fred Low, son of old St. Clair. Second dam Lady Gilbert by Gen. Knox.

Will make the season of 1884, commencing March 1st, and ending June 1st.

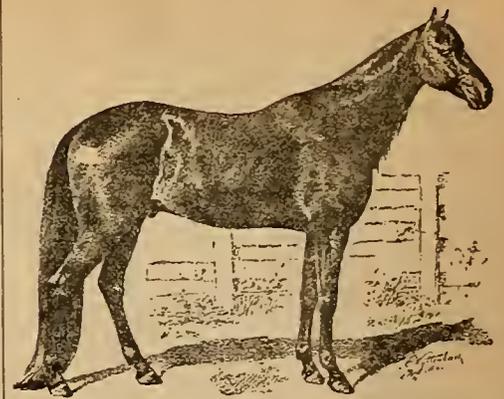

Elector is a mahogany bay, both hind feet touched with white, 15-3/4 hands high, weighs 1,050 pounds.

Terms \$50 the season. Mares from a distance properly cared for and pastured at \$5.00 per month. Due care taken but no responsibility for accidents or escapes. For further particulars address

C. E. PERKINS,

Stockton.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. R. WHIPPLE, San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino; his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Pavmaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When sired by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Conroy 2:22 1/2; Magenta 2:24 1/2; Manfred 2:25; Pancoast 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McPartridge 2:29; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princes, the sire of Trinker 2:11. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,333 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:19 1/2; Commonwealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent,

San Mateo, Cal.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 1st, and ending July 1st, at the corner of Third and Empire streets, San Jose.

BAYWOOD

Is five years old, dark bay, with black points, 15 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover. Sired by Nutwood; first dam by Geo. M. Patchen; second dam b Champion; third dam by Belmont.

FLEETWOOD

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms, \$25 for the season, or \$40 to insure.

E. S. SMITH, San Jose.

The Trotting-Bred Stallion

A. T. STEWART,

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an Inbred Mambrino. Sired by Mambrino Patchen (full brother of Lady Thorn, record 2:18 1/2), sire of Katie Middleton, 2:23, and nine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maid S., 2:10 1/2. Mambrino Patchen sired by Mambrino Chief, he by Mambrino Pavmaster, and he by Mambrino, thoroughbred son of imported

Terms for the season, \$30.

Address

SOMERS & A

### Wren's Nest Stallions.

THE CHAMPION TROTTING STALLION OF THE PACIFIC SLOPE"  
**SAM PURDY,** - - - - - \$50  
 (Magony bay, black points, sixteen hands, 1,200 pounds), by GEORGE M. PATCHEN, JR., ("California Patchen"), dam Whiskey Jane, by Illinois Medoc. Record, 2:20, Buffalo, N. Y., August 2d, 1876. Public trial two-mile heats, on Bay District Course in San Francisco County, Cal., 4:43-4:46.

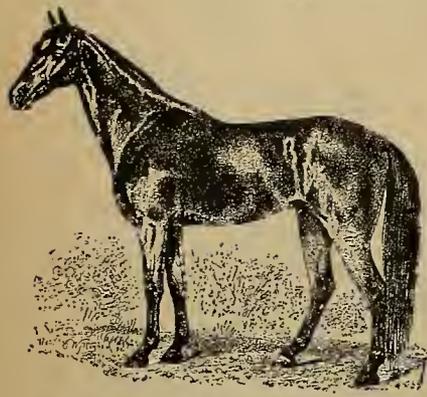

#### Thoroughbred

**DAN SPARLING,** - - - - - \$25  
 (Blood bay, black points, sixteen and one-quarter hands), by imp. Glengel, dam Item (own sister to Tom Ochiltree). Item is also the dam of Adalia, Bob Woolley, etc.

**FOXHALL A. DAINGERFIELD, Owner.**

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of Improved Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.  
 Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

#### Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 10th, 1882.

#### Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

#### Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:29, without a skip.

#### Breeding.

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Manbrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

**FRED ARNOLD,**  
 Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2), and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30 1/2, by Flaxtail, grandam by son of Tally Ho Morgan, great grandam by Irwin's Tuckahoe, great great grandam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Manbrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.  
**M. W. HICKS,**  
 Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

#### Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

#### Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.  
 Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.  
 Dam of Dave Hill by Vermont Hambletonian.  
 Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,**  
 Agent.

Oakland, January 18, 1884.

### The Trotting Stallions DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

#### TERMS.

Director \$20, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

#### Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Orward, 2:23 1/2), by Manbrino Chief; second dam by Potomac; third dam by Saxe Wiener.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

#### Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1879, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Manbrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the following number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address  
**JOHN A. GOLDSMITH,**  
 OAKLAND TROTTING PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Peniston, Philadelphia, Penn. By HAPPY MEDIUM, dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Heury, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.  
 Brigadier will make the season of 1884 from February 10th to July 1st.

#### Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.  
**J. B. McDONALD,**  
 February 2d, 1884.

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

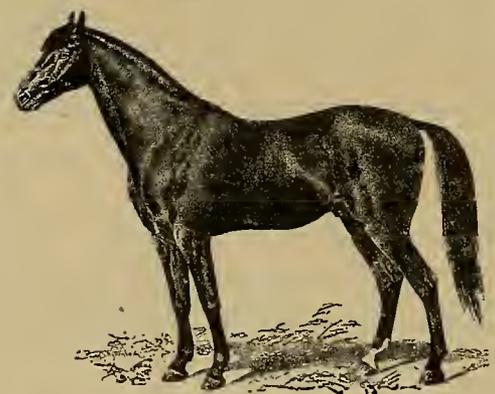

By ELECTIONEER.  
 First dam, Columbine, by A. W. Richmond.  
 Second dam, Columbia, by imp. Bonnie Scotland.  
 Third dam, Young Fashion, by imp. Monarch.  
 Fourth dam, Fashion, by imp. Trustee.  
 Fifth dam, Bonnets of Blue, by Sir Charles.  
 Sixth dam, Reality, by Sir Archy.  
 Seventh dam, by imp. Medley.  
 Eighth dam, by imp. Centinel.  
 Ninth dam, by Mark Anthony.  
 Tenth dam, by imp. James.  
 Eleventh dam, by imp. Monkey.  
 Twelfth dam, by imp. Silvereye.  
 Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

#### TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:29, and at the same time demonstrated that he was capable of trotting way down in the tens.

For further particulars address,  
**M. ROLLINS, Agent.**  
 Santa Rosa.

## MAMBRINO WILKES.

**BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES,** son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christmas by Todhunter's Manbrino, son of Manbrino Chief. Second dam by Pilot, Jr. Todhunter's Manbrino son of Manbrino Chief, his dam Ripton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Manbrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the coming season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

\$50 for the season, or \$25 single service.  
 This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address  
**A. L. HINDS, Agent.**

### The Trotting Station

## STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

#### Terms.

He will serve mares the present season, commencing February 1st, and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable in variably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McLevery & Nolte, Fashion Station, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

#### Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

#### Pedigree.

Steinway, by Strathmore; first dam Abess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyan, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 15th, 1882.

Strathmore is the sire of Santa Claus, 2:17; and Tucker, 2:19; Chestnut Hill, 2:22; Alice Stoner, 2:24; Steinway, three-year-old, 2:25; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28; Henderson, 2:28; Strathlan, three-year-old, 2:29; and Stuart, three-year-old, 2:29. Stuart is full brother to Belmont, who trotted a mile in 2:52; at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23; and he in turn got Governor Sprague, record 2:20; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

#### Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verona, Admiration, Mystery, in 2:39, 2:32, 2:31. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25, 2:30, 2:30; Steinway winning fourth, fifth and sixth heats, beating Jewett, Cathey and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26, 2:23, 2:24, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27, 2:23, 2:27.

 Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO July 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.  
 Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

#### PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Manbrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Esiris, thoroughbred (No. 37). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44 1/2) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, Irwin's Tuckahoe, grandam by Lefler's Consul, by Shepper's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Manbrino, he by imp. Messenger. Fame's dam Glory by Jackson's Western Star (son of Matt's Western Star by Blackness). 1st dam by Boucree, 2nd dam by Gallatin (1st dam of Prairie Bird by Flaxtail (dam of Flight, 2:29, and Prompter, 2:30). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

#### TERMS.

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.  
 La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. MCINTOSH,** Box 60, Chico, Cal.

FOR SALE.

STALLIONS FOR SALE

HAVING ACQUIRED MORE STALLIONS THAN he has present use for, the owner offers for sale the high-bred and well-known trotters

Inca -AND- Gibraltar.

INCA, RECORD 2:27, FOALED 1874, BRED BY L. J. Rose, got by Woodford Mambrino, son of Mambrino Chief, first dam Gretchen, by Mambrino Pilot; second dam Madame Kirkman, by Canada Chief, son of Davy Crockett; third dam by Fanning's Toke; fourth dam by Levitation.

GIBRALTAR, RECORD 2:24, FOALED 1872, bred by Geo. O. Tiffany, got by Echo, son of Rysdyk's Hambletonian; dam the Tiffany mare, said to be by Owen Dale, son of Williamson's Belmont.

For terms and other particulars apply to JOHN A. GOLDSMITH, OAKLAND TROTTER PARK.

S. C. BOWLEY & CO.,

GRAND COMBINATION SALE.

Commencing April 10th, 1884, AT THE

Bay District Race Track, AND CONTINUING SIX DAYS.

Thoroughbred Horses and Standard Trotters, Roadsters, Jersey, Durham, and Devon Cattle, Spanish, Merino, and Leicestershire Sheep, from all the principal breeding establishments on the Pacific Coast.

750 HEAD OF STOCK

Have already been entered for sale and further instructions from leading breeders are daily arriving. Breeders and owners desirous of entering stock for this sale should apply at once to

S. C. BOWLEY, 33, 35 and 37 New Montgomery St.

The benefit of the combination sale to breeders and stockmen cannot be too highly estimated. Combination sales have been found of immense advantage in the East, and such a sale as this, comprising, as is anticipated, not less than 3,000 head of fine stock from all the leading breeders of the Coast, cannot fail to attract a large number of buyers from Honolulu, Australasia, and the East. The fame of California trotters is world-wide, and when it is known that for this sale already entered the best of Electioneer, The Moor, Almont, Natwood and all the best known stallions on the Coast, the advantages to both breeders and purchasers must be obvious. Large or small lots will be taken for sale. As soon as the catalogues can be prepared they will be distributed all over the world; so it is necessary for those desirous of taking advantage of the sale to send in their lists of stock, with complete pedigree, at an early date.

S. C. BOWLEY & CO.

FOR SALE. Thoroughbreds OF ALL AGES.

ENQUIRE OF HENRY WALSH, Supt Ranning Horse Dept Palo Alto Stock Farm.

FOR SALE.

An Irish setter dog, three and a half years old, well broken on all kinds of game. Sound in every way, and only sold for want of use. Apply at the Mint Saloon, 605 Commercial St. S. F.

PURE-BRED POULTRY

O. J. ALBEE, Santa Clara, Box 229.

FOR SALE—1 Cock, 4 Hens and a fine lot of Stags. Pitt-Games imported from McDougall, warranted dead game; also all leading varieties thoroughbred Poultry.

SOUTHERN DIVISIONS, TO Sportsmen & Pleasure-Seekers.

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Front in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracoda, Pompano, Spanish Mackerel, and Flounder. The well-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE "HOTEL DEL MONTE," ARE UNSURPASSED, having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Resorts, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAHON'S OF RIPLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Gun tackle will be securely packed in wood or leather cases taken in Passenger Cars.

SAN FRANCISCO, SATURDAY, MAR. 15, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

**BUCCANEER.**

The postponement of the Arno sale till next week, Tuesday, was made necessary by the unfavorable weather. The number of intending buyers from the interior of the State, who have inspected the stock, and stated their intention of attending the sale, evidences the value of the form and pedigree that is characteristic of all the horses to be sold. We present herewith a "speaking portrait" of Buccaneer, whose death was one

of the principal causes that operated to bring about the sale and the closing of Mr. Valensin's establishment. Buccaneer was bred by Dr. M. W. Hicks, and if he had lived would undoubtedly taken high rank as a sire. During his brief career in the stud he got Flight, five-year-old record, 2:29; Pride, yearling, 2:41½, two-year-old, 2:33; Privateer, yearling, 3:05¾; Cora, two-year-old, 2:44; Flirt, three-year-old, 2:35, and many other young-

sters equally as promising, who only await opportunity to make their debut to show their high quality. Buccaneer was sired by Iowa Chief, son of Green's Bashaw, he by Vernal's Black Hawk. Green's Bashaw has eleven representatives in the 2:30 list, and his grandson, backed as he was by the Blue Bull strain on the side of his dam came directly in the line of trotting inheritance.

## TURF AND TRACK.

## Conditional Entries.

Conditional entries are unknown on this coast, but the fashion does prevail somewhat east of the Rockies, and at the late meeting of the National Association a rule was proposed to prohibit it. Mr. Geo. F. Stearns, of Mass., made a speech on the subject which is reported by Veritas in the New York Spirit. We give it herewith as it contains a graphic though facetious description of how the thing works.

"I think this is the most radical change proposed by the Committee on Rules, and, inasmuch as I was the serpent that lurked in that garden and disturbed the comparative peace which reigned there, I feel bound to explain the scope and purpose of this amendment. To begin, some of you may not be aware that the public regard racing as a skin game. They say, and I believe often justly, too, that it is not honorably conducted. I know it is the truth that the associations down our way will placard, '120 entries—the most magnificent meeting ever held! 22 entries in the 2:30 class; 17 in the 2:18 class! All the great trotters and pacers!' Anything to catch the crowd and boom the meeting along. They'll give some of the reporters—a very honorable body, but, like all the rest of us, subject to the temptations that assault our natural frailty—they give them abundance of tickets and other inducements, and the whole press begins to swoop it up. 'The most magnificent meeting that was ever held, or ever will be. All the great stars and the biggest of purses.'

"Well, now, the public come to see this grand array, and out of the 22 entries in the 2:30 class four or five appear, and out of the 17 in the 2:18, three, perhaps, old campaigners, who've been trotting in together all summer long. Instead of cracks, they are turf backs, that everybody has seen and known for years, and are tired of looking at. What is the consequence? Why, the public go away growling, and say, '—the business. We'll never go there again as long as we live.' And they stick to their resolutions; so that you may take a horse-trot down our way, and you can almost count on your fingers and toes the number of people in the grand stand; but when they announce a bicycle race—and I had as lief see a cat straddle a shingle at any time—(laughter) our parks will be chock-full of people. Well, why? 'Good gracious,' they say, 'there's no long scoring; the wheelmen are there, and the performance goes right along as agreed.'

"Well, now, you've got this rule. Any poor cuss of a driver makes a conditional entry. The association sits back and says, 'All right; we'll take it; and they hold this poor devil for it as a straight entry. They drive him through the rack, and the association takes what money he has got as a compromise. There's another way in which it works. The association takes all these conditional entries, and they don't even attempt to make the driver settle. I agree to that; but they'll have fifty or sixty good straight entries, and thirty or forty conditional rat entries. (Laughter.) Then they will publish the whole number as a magnificent spectacle, that is to be held before the admiring, horse-loving American public.

"Now, what I want to get at is that no association shall take a conditional entry, and that every entry they receive and publish shall be a genuine one, and I want to undertake to do it by punishing the association that takes one, and not to deal alone with the impudencies cuss who makes one. As you've got your rule now, it is a perfect haven of rest and peace for both the driver and the association. In other words, you cork the crime up at both ends, and you've fixed it so that nothing in the world interferes or can interfere with swelling the lists with bogus entries. Now, if you adopt the amendment, it will place the punishment on the association, where it rightfully belongs, and as all members will then be afraid of the penalty, none but bona fide entries will be accepted, and the business will rest on an honest basis.

"I suppose the associations will oppose this, and many of you will jump up and swear you never took a conditional entry, but the facts remain as I've stated them. A lot of sham entries are on the bills, and the association that does not follow suit gets left. Those who are caught by flaming posters will not go to, say, Hampden Park; they'll go to a place where the show outfits and outpictures us. But, in point of fact, such place has not got any more real entries than we have. Again, representatives go off on the Circuits soliciting entries. They report fifty or sixty entries secured. Great luck. We feel rich—don't we? But when we come to settle up we've to take a little on this or that account. Another says, 'Your agent said if I didn't start I needn't pay,' and, in the end, the meeting closes with dissatisfaction all round."

Here President C. J. Hamlin of the Buffalo Association, inquired, "Will your plan prevent advertising dead horses?"

The speaker resumed: "In Massachusetts and its borders it won't prevent anyone advertising all the dead horses in the world, or from publishing a list and putting it out to the public—a list of noted trotters that they've not even the shadow or pictures of the horses to enter or show, and if the real list was known beforehand—being a lot of old screws—the entries and parties would be kicked out of town by dead spiders. (Laughter.)

"But, joking aside, as it is now, the associations make a pretense that they had good grounds for supposing the conditional entries would appear and start, when they know better; but I say, for goodness sake, if you're going to have your Massachusetts and Connecticut folks lie, make them lie out of whole cloth, and punish them for it by passing the amendment." (Applause.)

## An Oregon Stallion Purse.

When the season opened this spring Jay Beach offered a purse of \$500 for the get of his horse Altamont, foals of 1885, to be trotted for in 1887. \$20 entrance, \$10 forfeit; all entrance and forfeit money to be added to the purse. Messrs. Lindsey & Galloway, owners of Hambletonian Mambrino responded by making a similar offer to breeders who patronized their horse. Since then the suggestion has been made, and agreed to by the gentlemen named, that it be changed to a general proposition, open to the get of all stallions in the State that would contribute a like amount to the purse. With the two above named the money to be trotted for would amount to at least \$2,000, and with the other prominent trotting sires of Oregon represented in the purse the amount would be swelled to \$5,000 or \$6,000, perhaps more. If stallion owners have a little nerve, this proposition of Mr. Beach's, intended originally only to attract business to his stable, will result in the largest purse ever hung up for a trotting race on the coast, and the establishment of a great annual colt contest as a fixed event.

Misner Bros. of Portland, Or. have bought of J. G. Scooby the hay gelding Stranger, by Signal, dam Breeze, by Geo. M. Patchen, Jr. He will most likely be trained this season.

## Clark Chief's Descendants and their Performances.

There is no doubt that Clark Chief was the most prepotent as well as the most successful son of Mambrino Chief, and in his early death the trotting interests of the country sustained a loss not easily to be estimated. Foaled in 1861, his death occurred ten years later, and during the greater part of his life the section of country in which he stood was involved in civil war, and as a necessary consequence the breeding of trotters as such was practically abandoned, and a more unfortunate time for a horse to demonstrate his value as a sire could not have been selected. And yet, in spite of all this, and the further fact that he died before reaching his prime, Clark Chief, with only seven years of stud-service sired seven sons and daughters that have records of 2:30 or better, and two of these seven—Tony Newell and Croxie—have beaten 2:20. This is certainly a remarkable showing, but to it there is still something on the credit side to be added, as he is also the sire of the dams of two horses with records below 2:20, they being Phallas, 2:15, and Majolica, 2:17. There has certainly never been a horse of the age of Clark Chief at the time of his death in whose behalf such a showing can be made, and to award him the foremost position in the family founded by his sire is not in any way an overestimation of his merits.

In the maternal line Clark Chief was not a particularly high-bred horse, when the blood lines of his pedigree are taken into consideration, his dam being by Downing's Bay Messenger, and his grandam Miss Caudle, a mare whose breeding has never been established, but who became celebrated as the dam of Ericsson, another son of Mambrino Chief, and that was not only a trotter at an early age himself, but the sire of several that came to their speed in colthood. And it is, perhaps, this unknown quantity in the blood of his grandam that made Clark Chief so successful on mares with a strong dash of thorough blood in their veins, although it is far more probable that it was the strong trotting instinct that came to him from his sire that enabled him to overcome the running tendencies of these mares. From a mare by Embury's Lexington he got Tony Newell, a horse that was very successful on the turf last season, starting in with a record of about 2:30, and closing the year with 2:19 to his credit. But although Newell is the fastest by the record of the get of Clark Chief, it is not at all certain that he is the best of the family. Among horsemen the almost universal verdict on this point is that the place of honor should be given to the stallion Woodford Chief, record 2:22. This horse was in every sense a first-class performer, having plenty of speed and the battle-to-the-death quality of the game-cock. Foaled in 1872, he began his turf career in 1876, being then a four-year-old, and in October of that year trotted and won at Lexington, Ky., the best race ever trotted up to that time by a horse of his age. His chief competitor was Eric, also a four-year-old, by Ericsson, and thereby related to Woodford Chief, both colts being by sons of Mambrino Chief; and the second dam of Woodford Chief's sire was the dam of the sire of Eric. The first and second heats were won by Eric in 2:28, 2:33, the time of the first heat being the best on record for a four-year-old at that time; but the next three heats and race were won by Woodford Chief in 2:31, 2:31, 2:31, the last quarter of the fifth heat being trotted in 3/4 seconds—a 2:18 gait. This performance was enough to stamp Woodford Chief as a horse of more than ordinary merit; but he showed in the following season that it was not all he was capable of, as at Lexington, October 13th, he won over a good field in 2:25, 2:22, 2:25. Three days later he started at Cincinnati against Calmar, who was a remarkably good horse that fall, and trotted him to a head in 2:24 over a half-mile track that was anything but fast. Early the following spring Woodford Chief died, and it is a somewhat singular circumstance that both sire and son should have been lost to the breeding interests at so early an age.

The fastest of the daughters of Clark Chief is Croxie, but for all her speed and gameness she was an uncertain performer, and her record of 2:19 was made at a time when there was not the slightest expectation of such a feat being accomplished. This was in 1877, and at the close of that trotting season she was purchased by Mr. W. S. Gurnee, of New York, and bred to King Phillip, 2:21, by Jay Gould, by whom she produced a colt foal. In 1882, after four years of retirement, she was again put in training, making her first appearance in a "made-up" race at Chicago, the other starters being Overman, Abe Downing and King William. There was no betting on the event, it being universally conceded that Croxie could win, and in order to make the matter sure the drivers of two of the other horses had taken the pains to ask Turner, who was driving Croxie, if the mare had all her speed, and were assured that she had. In the first heat she could not, or would not, go at all, and the other drivers were obliged to exercise considerable ingenuity to avoid beating Turner, Croxie winning the heat in 2:23. In the next heat her speed returned as miraculously as it had departed, and some close observers of the race were surprised to notice that Overman and Abe Downing were just as close to the winner in 2:22 as they had been in 2:23, and that the last half of the mile had been trotted by these horses in about 1:10. The truth of the matter was that both Hickok and Johnston, who drove Overman and Abe Downing, were trying to ascertain how fast the other's horse could go. The result was that each thought he could win when the two animals came together at Cleveland the following week, and a fierce contest occurred at that place, both Overman and Abe Downing getting a record of 2:20; and to make matters even all around, King William duplicated their performance at Buffalo the next week, so that all three of the starters against Croxie at Chicago, and that were beaten by her in 2:28, were in the 2:20 class before a fortnight had passed.

The other horses sired by Clark Chief that have entered the 2:30 list are Blanche Amory, 2:26; John E., 2:28; Governor, 2:30, and Lady Prewitt, 2:30. This last-mentioned animal was out of a thoroughbred mare, Lady Wallenstein, by Lexington, and it is worthy of note that she also produced Wallenstein, by Waverly, that was not only a first-class performer on the running turf here, but was so well thought of by Mr. Pierre Lorillard as to be sent by that gentleman to England, where he won a number of important races, and was conceded at the close of 1882 to be the best horse in training in England—certainly a very flattering acknowledgment to make concerning a foreign-bred horse. The average speed of the seven Clark Chief representatives in the 2:30 list is 2:25.—Breeder's Gazette.

The movement to organize a fair association at Gilroy is making favorable progress, and a permanent organization will be effected at once.

For throat diseases and coughs. Brown's Bronchial Troches, like all really good things, are frequently imitated. The genuine are sold only in boxes.

## Curiosities of Trotting Statistics.

To the thoughtful student, capable of generalizing from tabulated facts, there are many singular deductions to be gleaned from the trotting statistics of the year 1883, which have filled the turf journals of the country for the past month. There is much of sameness in these tables. They have been compiled by different authorities from the published accounts of the various race meetings, and they so nearly agree that there is little fear of mistake, either from omissions or erroneous statements, no matter which table is selected for speculative deductions.

Swift-trotting horses have been multiplied so rapidly within the past decade that it is uninteresting to consider records slower than 2:20, for performers above this mark can in no manner be regarded as first-class trotting horses for present turf purposes. Fourteen years ago the peerless Flora Temple was the only trotting horse that had dropped below the twenties. She was fourteen years old when she thus reached the zenith of her fame by eclipsing all turf records. Now three baby four-year-olds (to wit, Bonita, 2:13; Jay-Eye-See, 2:19, and Trinket, 2:19) and five trotters during the first year of their horsehood (namely, Jay-Eye-See, 2:10; Santa Claus, 2:18; Trinket, 2:19; Romero, 2:19, and Dr. Norman, 2:19) have performed the same wonderful feat, which has ceased to make a sensation in the trotting-horse community. Now one-hundred and nineteen horses of all ages have scored records in 2:20 or better, and twenty with the ninety and nine left out have trotted better than 2:17, the best one making a mile in the marvelous time of 2:10.

These statistics illustrate more forcibly than emphasized words the rapid progress in the breeding and development of the trotting horse, which includes the important accessories of improved race-courses, more skillful equipment of both harness and sulkies, and the more scientific conditioning and training of the horses. It is not a matter of wonderment, in view of this remarkable showing, that enthusiastic theorists should have reached the conclusion that the trotting horse will eventually make as swift a record as the thoroughbred racer, although handicapped with the greater burden of pulling a wheeled vehicle, and a driver much heavier than the rider which the thoroughbred carries close to his carcass, directly in the precise location of his center of motion. If the fast trotter, with these extra burdens, can ever equal the records of first-class running horses, then the trotting action will cease to be artificial, because it will be a more speedy movement than the run, attendant circumstances considered, and the trotting horse will therefore never break into the gallop, because, when urged, the horse does not break from a faster to a slower gait. But until all these obvious impossibilities become tangible possibilities, the run will ever remain the swiftest motion of which the trained horse is capable.

For the purpose of our generalizations, we will take trotting performers in 2:20 to 2:17 as second-class, and in better than 2:17 as first-class. All these classifications are merely arbitrary, yet they are valuable aids when considering the mathematics of trotting lineage. Taking the records of those that have trotted in 2:20 or better, Volunter stands out as the most prominent sire, for he alone has five of his produce that have beaten 2:20. It is a singular fact that all these are geldings, and his male produce overwhelmingly outrank his daughters in speed. Next to him comes his half-brother, that remarkable anomaly as a performer and a sire, George Wilkes, who is only one below Volunter. The four trotters from his loins that have records below 2:20 are Wilson, So So, Rosa Wilkes and Joeunker—two daughters sandwiched between two sons—and this is a striking peculiarity of his produce. He sends winners to the turf from both sexes almost equally, while his sire and nearly all of the other sons of his sire seem to be decidedly pronounced in the successful performances of their male produce. This has generally been regarded as an evidence of greater vitality, as the controlling of the sex, as well as perpetuating the other peculiarities of the sire, undisturbed by the many influences of the maternal out-crosses of the produce, certainly indicate intense individuality. But it is questionable whether the general success of the sons as performers is any more indicative of prepotency and individuality than the equally uniform success of the daughters of some sires in the harem whose sons rarely rise to the dignity of great performers. Glencoe produced a few great sons, but his fame rests upon the produce of his daughters, such as the remarkable brood-mare Reel. War Dance is another case in point among thoroughbreds, while Seeley's American Star, Pilot, Jr., and Mambrino Patchen among trotting sires, will be perpetuated in trotting history more honorably through the produce of their daughters than by the performances of their sons.

## Dictator's Book.

Dictator's book is full, the limit of sixty mares having been reached. Regarding the breeding of these mares Maj. McDowell writes:

About one-third of these sixty engagements are made by breeders without naming the mares, but of those named all are remarkable in point of breeding, or performance, or both, and many are noted. More of the daughters of Clark Chief are represented than those of any other stallion, and included among them is Croxie, 2:19. George Wilkes furnishes six very highly bred mares, one of them being out of the dam of Phallas. Among the Harolds are two bred just as Maud S. is, that is out of Pilot, Jr., mares, and they out of thoroughbreds, and one also out of the dam of Phallas. Pilot, Jr., himself, is credited with but one, she being out of a thoroughbred, but six are engaged out of Pilot mares, including one out of the dam of Maud S, and another out of the dam of Jay-Eye-See, and Naiad Queen, 2:20, out of Tackey. Some of the foregoing are producers themselves; but among the producers, not otherwise described, are Old Ned, the most distinguished of all brood-mares, the dam of Clemmie G. and the others in the list; Alma Mater, the dam of Alcantara and Alcione, and the dam of Eudymion. In the list is a full sister to Jerome Eddy, a full sister to Catch-fly, a sister in blood to Trinket, and a half sister to Mohawk Chief. And among the performers are Croxie, 2:19; Naiad Queen, 2:20; and Cora Belmont, 2:23, as stated, and also Belle Brasfield, 2:20; Police Gazette, (Emma B.), 2:22; Lucrece, 2:23; Carrie, 2:24; Magenta, 2:24; Largesse, 2:28; Romance, 2:29, and probably Clemmie G., 2:17, will fill one of Mr. Gordon's engagements. Two fast mares are now here from Pennsylvania, to be bred in '84, '85 and '86, and one from Tennessee, to be bred in '84 and '85.

Dictator is in fine condition, and although twenty-one years old he has none of the indications of age, but would readily pass for a horse eight or nine.

Phil Ready, of San Luis Obispo county, is the owner of a very superior young stallion sired by Altoona, first dam a very fast mare brought from New York, and supposed to be a Hambletonian. His horse shows a remarkable gait for his handling. He is now being jogged slowly.

## The National Trotting Stud-Book.

[Turf, Field and Farm.]

The burning question before the Turf Congress' last week was the establishment of a National Trotting Stud-Book. The proposition was earnestly discussed by the committee on rules, and finally it was agreed to recommend to the Congress a resolution committing the Association to the supervisory control of a stud-book. The resolution provided that a committee of seven should be appointed by the president to consult the views of breeders of all sections, and to agree upon a standard of registration. The committee was instructed to report its conclusions to the Board of Review at Chicago, in May, and power was given to the Board to approve the report and appoint a Board of Censors. The resolution also provided that all questions affecting the records of horses in connection with their eligibility to registration should be determined by the Board of Review, and that the written evidence upon which registration was based should be filed in the office of the Secretary of the National Trotting Association. The division which objected to the funds of the National Association being used to publish a stud-book was led by Messrs. L. J. Powers, William Edwards and Burdett Loomis, and to meet the objection Major McDowell, acting for the other party, added a clause to the effect that the funds of the National Trotting Association should not in any manner be devoted to the cost involved in the compilation and publication of the stud-book. Even after this concession the opposition talked fight, and each side made a determined effort to influence wavering votes. The Congress adjourned for dinner, and during the recess several little conferences were held. Mr. Powers came to us and proposed an easy way to avoid a wrangle. His suggestion was that the measure should be referred to a committee of seven, and that four of the committee should be satisfactory to himself. Major McDowell was called, and he agreed to the proposition. The following names were written on a slip of paper and pronounced satisfactory: H. C. McDowell, L. J. Powers, Edwin Thorne, L. Brodhead, William Edwards, Alex. Harbison and George H. Bailey. As Mr. Powers is a fair-minded man, open to conviction, he readily accepted the names suggested because they were the names of men of character. When Major McDowell, as Chairman of the Committee on Rules, read the resolution which we have summarized to the Congress, a few who knew nothing of the compromise, but who had been importuned to vote this way or that way were surprised at the calmness with which it was received. Mr. Powers took the floor, but his eyes beamed with peace and his voice was mild. He wished to amend the McDowell resolution by referring it to a committee of seven to be named by him, and to lodge final action in the Board of Review. This was agreed to, but Mr. Alden Goldsmith went through a prepared speech, although he confessed that there had been a sudden change of sentiment, and that he stood almost alone. The Congress patiently listened to him, and then voted as if he had argued in favor of instead of against the proposition. Mr. Oyster, the Washington delegate, manifested some temper. He insisted on calling the roll, and recording the ayes and nays, although he knew that he was in the minority with Mr. Goldsmith. His explanation was that he wanted to put those on record who experienced a remarkable conversion within less than half an hour. After the Congress had adjourned the Committee of Seven held a meeting, and a plan was mapped out which was carried into execution on Saturday. Messrs. Edwin Thorne, David Bonner, J. B. Honston, Shepherd F. Knapp and H. C. McDowell signed papers for the incorporation of the Trotting-Horse Breeders' Club. The capital is \$10,000, divided into shares of \$25 each, and the money is to be used in compiling and publishing the National Trotting Stud-Book. In a down town office on Saturday subscriptions amounting to over \$3,000 were tendered to the incorporators. All legal measures have been complied with, and the organization has been perfected with Edwin Thorne, president; Shepherd F. Knapp, vice-president, and James B. Honston, secretary and treasurer. Maj. McDowell and Mr. Bonner were appointed a committee with power to select a competent person to act as compiler. A standard of registration will be decided upon before the May meeting of the Board of Review, and then, with the approval of the Board, a compiler will be set to work under the direction of a board of censors. In this little contest the *Turf, Field and Farm* was as usual on the winning side.

The petitions asking the National Trotting Association to take charge of an impartial stud-book were signed by something like five-hundred prominent breeders. Mr. A. J. Alexander wrote a letter expressing the opinion that the National Trotting Association should control and direct a trotting stud-book, and Col. West went upon record: "In my judgment this body (N. T. A.) can do nothing that would tend more to elevate and promote the breeding interest than the publication of this work." Mr. J. C. McFerran warmly commended the enterprise. "The fact that this (N. T. A.) Association is beyond all question, a national organization, and one that has steadily grown in favor, and the further fact that whatever it has undertaken to do has been well done, would insure for its rules and register public approval and confidence. It would determine the requisite standard, now unsettled by two or more sets of rules, and place the matter of registration beyond the control of individual prejudice, or the opinion of a few breeders." Similar expressions of opinion came from various sections of the country. Mr. Woodmansee, who manages for Com. Kittson, and Mr. De Graff, one of the largest breeders of the northwest, strongly favored the movement.

## Rank of Trotting Sires.

Rysdyk's Hambletonian, by Abdallah, dam by Bellfounder, remains at the head of the list, with thirty-six performers to his credit, two of them having beaten 2:20. The extraordinary success of the pacing stallion Blue Bull commands a close second place, his quiver being filled with thirty-four sons and daughters, one of them having a record of 2:19. The Hambletonian and Clay stallion, George Wilkes, stands third, with twenty-six representatives, being eight less than the pride of Indiana, but as four of them have trotted in the teens, many thinkers will place him co-equal with his sirs and Blue Bull. The fourth on the list, and the first of living sires, is Daniel Lambert, who bears the highest honors of his sire, Ethan Allen, and his dam, Fanny Cook, by Abdallah. He has been credited in our table with twenty-six, but since then it has been shown that Belle Shackett is his granddaughter, and the record of W. H. Arnold is not verified, so that his real number is twenty-four, all of them good performers, however, and one of them first-class. Volunteer, by Hambletonian, dam by Young Patriot, at the time of his sire's death was generally regarded as the most prepotent living stallion. Although he is now only fifth on the list, with twenty-three trotters under his name, he has not outlived his reputation, for five of them have beaten 2:20, which is an un-

equaled number. The union of Alexander's Abdallah with a daughter of Mambriño Chief resulted in the production of Almont, and he has got twenty-one performers, three of them of extreme speed, which effectually establishes his fame as a sire, and it is rapidly growing as the years roll on. Happy Medium, by Hambletonian, out of the celebrated trotting mare Princess, competitor of Flora Temple, unites the blood of Messenger through Abdallah and Bishop's Hambletonian. He has got seventeen good and true trotters to his credit, from all classes of mares, and seven of them have beaten 2:25. Mambriño Patchen is the eighth on the list, and the first in the male line from Mambriño Chief. He is a son of this horse, dam Lady Thorne's dam, by Gano, son of American Eclipse. He has twelve performers of unquestionable merit, and has been wonderfully successful in perpetuating speed through his sons and daughters. Gooding's Champion is the Emperor of the Champion tribe, with a dozen in the 2:30 list. He is a highly bred horse, got by Kings Champion, Jr., son of Grinnell's Champion, dam Cynthia, granddaughter of imp. Trkr. The pride of New England breeders, Gen. Knox, by Vermont Hero, dam by Sencer, son of Barney Henry, is the next in order, with a brilliant galaxy of eleven performers, who are doing him honor on the turf and in the stud. Two of them have beaten 2:20. Edward Everett, by Hambletonian, dam said to be by imp. Margrave, now claims mention, having also eleven to his credit, eight of the number having records better than 2:23. In point of real worth he should perhaps occupy a higher place in this category, as he was sold to Mr. Robert Bonner in 1869, and consequently kept as a private stallion the rest of his life. Strathmore, too, has eleven representatives, two with records better than 2:20, and four of them entered the list last season. He is a son of Hambletonian, dam Lady Watermire, by North American.

The two remaining sires contributing eleven each to the list are Green's Bashaw, by Vernal's Black Hawk, dam by Tom Thumb, a Canadian (grandam the Charles Kent mare, dam of Hambletonian), and Young Columbus, by Columbus, dam Black Maria, by Harris' Hambletonian. Both these sires have evinced great prepotency with but limited advantages. The latter is the only horse (except Hambletonian) that comes into prominence in this article as having a son just as prepotent, viz.: Phil Sheridan, dam Black Fly, by a son of Tippto, he has ten performers, and two of them of the first-class; Whipple's Hambletonian, by Guy Miller, dam by Burr's Washington; Winthrop Morrill, by Young Morrill, dam by a son of Royal Morgan, and Woodford Mambriño, by Mambriño Chief, dam Woodbine, by Woodford (thoroughbred son of Kosciusko), having each placed ten representatives in the 2:30 list, making a total of eighteen sires entitled to classification in our present statistical view. Our article begins with Hambletonian, and ends with Woodford Mambriño, but leaving its fixed limits and throwing the sword of age and opportunity into the scale, we may record our conviction that future years will place the son of Woodbine far higher up in the scroll of fame.—*N. Y. Spirit.*

## The Coming Trotter.

In height 15½ hands, weighs 1,000 pounds, with the thoroughbred's neck and head, wide between the jaws, eyes full and brilliant, fleshing with nervous energy, long, strong arms, flat legs, prominent stifles, length from hip to hock 46 inches, coat dark in color glowing like the rich tints of polished satin; in motion 19 feet every stride—Time 1:35. Don't smile, dear stranger, for it will be done as surely as the world lives. It may not come in ten years or in fifty, but the law of evolution will as surely bring this result as that of steam, as a motive power will be superseded by some power now not fully known. I am an old man fast "falling into the sere and yellow leaf." I have watched and participated in the training and the great races of this country since trotting was first looked upon as a test of a horse's endurance and speed. I remember when to be known as a man fond of race-horses, or of driving a fast horse, was social ostracism, and no business man dare to own a horse who would show ambition enough to keep his head in front of his fellow. I was once asked to take a hand in a social game of cards but declined, stating I did not know the game; with a burst of astonishment, the gentlemen said: "Well, you are an anomaly. I always supposed that a man who runs to horses was necessarily an expert card-player." "Yes," I replied, "or in other words a 'Blackleg.'" Now, as the gentleman had been educated for a minister of the Gospel, it was equally strange to me that he should be so conversant with the game, and I think it was universally considered by nearly all society that a man who spent his time and money in the pleasure of developing a trotter's speed was linked with the vices. But now, how changed.

One of the noblest men in this country, one who by his industry, intellect and genius has made a colossal fortune and an honorable reputation—makes use of his wealth to gratify his inborn taste for the horse, and developed him into the instrument of pleasure, health and the willing slave of his master—man. Robert Bonner has never lowered his dignity, and no one dares to question his integrity or honesty of purpose. His action, in this particular, has done much to elevate and foster that which will bring out to their fullest extent the powers of the trotter. With the advent of trotting the thoughtful brains of some of the best men, with large expenditures of money, sought to develop the capabilities of the horse, to confine his gait to the trot, and show great flights of speed. Then commenced the evolution.

When I was a boy the trainer of the stallion Henry Clay gave him sixteen miles before breakfast every day, at a good stiff gait. Horses then could go two or four-mile heats, but did not possess so much speed as now. The modern trainer would be looked upon as crazy if he should work his horses that way. We have shortened up the work and distance, bred for years to a certain standard, cultivated the muscles where they were needed, given more play to the shoulders and action to the knee, balanced the form, developed the brain power, perfected the stride and opened the stifle action. Look at Jay-Eye-See when he is going his best clip. See that wonderful hock motion; every touch of the ground shoots him into the air like an arrow from the bow.

There are some who do not like our present mode of training, saying we are sacrificing everything to speed. Perhaps we are, but we are getting a higher order of animal life. The old stage coach has given way to the palace car, and the steam engine will give way, in time, to that power which will be as much superior as steam is to the old coach. With all these changes the horse will no longer be needed as of old. His usefulness as a coacher, plow horse, or for long journeys, will be obsolete, and nature, with man's intellect will make for him a new existence. The amphitheatre as large as the Coliseum of Rome will hold its thousands to watch the marvelous flights of speed shown by the American trotter, and the equine hero, who will be crowned with laurel, will make a record many seconds below two minutes.—*Telemaque, in Western Sportsman.*

## The Future of Trotting in Victoria.

[Melbourne Leader.]

We much regret to observe that, from present indications, trotting is not progressing in the opinion of those who delight in sports wherein our equine companions and servants play so prominent a part. For some time past a club has been in existence in Melbourne with the avowed object of promoting the sport and encouraging people to breed, keep and train trotting horses. This they have endeavored to do by getting a trotting track and holding periodical meetings, in which trotting events were made the chief features. Thus the club tried to popularize the sport, but so far with but little success. The simple cause was that there were not enough competitors to render a contest either close or worth going to see from a spectacular point of view. Remembering that trotting events in this colony have to be compared with the splendid and exciting displays of summer flat racing and winter steeple-chasing, such as we have been accustomed to, it is not surprising that the public thought nothing at all of such trotting contests as have taken place at Elsternwick Park. In fact they cannot imagine that trotting could ever be made half so beautiful and exciting as some of our racing finishes, and the only conclusion they can come to, when the great popularity of the sport amongst Americans is quoted, is that Americans cannot know what racing really is. In the present state of opinion amongst supporters of the turf, we may safely assert that if Jay-Eye-See and Mand S. themselves contested a match in the vicinity of Melbourne it would be the novelty of the display, and that alone, which would attract an attendance; and as soon as it had worn off we would want our flat racing finishes and pounding-match steeple-chases and hurdle races again. Another cause which has militated against trotting being looked upon with favor here is the number of harassing peculiarities and "Yankee notions" by which it is surrounded. Horses are fixed up with all kinds of arrangements which the general public neither knows nor cares anything about. It is not the custom of the sporting public to make a study of technicalities; and there is but little likelihood of widespread interest being taken in the sport which abounds with them. Only the few who are "up" in the business will feel great interest in the results. For a sport to be popular it must be easily understood, and it is absolutely essential that it must be exciting. This refers more particularly to amusements in which the performers are horses and professional jockeys. In such games as cricket and football, of course, the number of amateurs who take part assist, by means of friends who are interested in their individual doings, in spreading a feeling of enthusiasm on behalf of one side or the other. Horse-racing is simple, and is therefore thoroughly understood by the large majority of spectators. Also, the excitement is pleasantly worked up to the starting time, from whence to the finish of the race it is short but incisive. It is our opinion that no trotting event in the world could produce momentary—but all the more thrilling—excitement equal to that experienced by the watchers of a Melbourne Cup race, or the second round over the five jumps in front of the stand in a steeple-chase. If this opinion is right, our kind of sport will always remain the more popular. There are other causes which have done much to prevent trotting growing into favor with the public here. One of these is the fact that so many of the results at Elsternwick Park and elsewhere have been eminently unsatisfactory. It is but seldom that the public were satisfied that the best horse won. For this the club have not been at all to blame; it is to be said to their credit that they have rigorously punished anyone suspected of working a dodge whenever the evidence would justify them in proceeding to extremes. That section of "sports" connected with the turf who are always on the lookout to make money—honestly if they can but anyhow to make it—do not yet seem to understand that the lynx-eyed judges at Elsternwick are able to see through certain little games which have been tried there, and that the stewards are prepared to punish offenders. At the last meeting the trotting events were of such a questionable character as to disgust the public who would be willing to support trotting for the good it is calculated to do our breed of light-harness horses. The other cause alluded to as aiding in keeping trotting, as a sport, unpopular, lies in the fact that there are but few trotters here to compete. If we had a few dozen good horses to bring to the post and make a good finish for a race, there would, of course, be more enthusiasm raised, and even if some of the starters were not run on their merits their want of success would not be so glaring, and, therefore, would not produce the same effect on the public mind as at present. However, we have not got many trotters, and those we have we do not seem to know how to handicap properly, and until these things are improved public interest in trotting will remain in a state of stagnation. There is but little doubt that many of our thoroughbred or half-bred mares, who might be useless for breeding either racers or good hacks or harness horses, would probably breed stock of the latter description if mated with English or American trotting stallions; and this being admitted the American institution of trotting if fostered here may assist, as we have already stated, in materially improving the paces and physique of our harness horses. Thus there is cause for regret that trotting shows no sign of becoming more popular amongst us; but things being as we have endeavored to outline in this article, the fact is not to be wondered at. As a sport trotting will not "go down" with the Australian patrons of the turf; and if it is ever to occupy the place which its admirers think it deserves, we are strongly of opinion that it must be conducted apart altogether from flat, hurdle and steeple-chase racing, for it only suffers by comparison with them.

## Sale of Trotters in Australia.

Messrs. Campbell, Pratt & Co., on January 3d, offered for sale, at Kirk's Bazaar, several young trotting horses, on behalf of Mr. J. A. Roberts. There were two colts and one filly, each two years old, and sired by Mr. Roberts' well-known American sire Boccaccio. There was only a moderate attendance, and biddings fell considerably below the owner's idea of the value of his animals. King of Bronte, h. c, was passed at 110 guineas, the reserve being 200. Bronte Boy, h. c, was passed at 40 guineas, the reserve being 100; and Queen of Bronte, ch. f, was passed at 75 guineas, the reserve being 150 guineas; Patchen Chief, a chestnut colt, three years old, by San Jose Patchen, an imported American stallion belonging to Walter Lamb of New South Wales, was also offered, but was passed at 50 guineas, Mr. Roberts' reserve being 150 guineas.—*Melbourne Leader.*

Dr. C. L. French, of San Luis Obispo, has sold to Gen. P. W. Murphy his brood-mare Flora, by Chieftain, and a yearling colt by Nutwood, Jr. The Doctor has also sold to Maj. Hollister a very promising colt by Duke McClellan, dam by San Francisco Patchen, second dam by Kentucky Hunter, third dam by Belmont.

## Longfellow and Harry Bassett.

[N. Y. Spirit.]

"I will never forget," says Mr. Wheatly, "as long as I live, his first Saratoga Cup—the one with Kingfisher. We started them, you know, at the head of the stretch. When the flag dropped Kingfisher shot away first; as he did so the big brown horse wheeled and gathered himself for a spring. He seemed to rise into the air as he made his bound, but it was the most awful one you ever saw, and in an instant he was past Kingfisher as they went off. In the last time round, as they raced between the half and three-quarter poles, I never saw such a thing in my life—Longfellow seemed to run faster than anything I can compare it to. He must have strided twenty-six feet. No one will ever know how good Longfellow was."

Kingfisher's heart broke after running the first mile in 1:40. But his party was not satisfied. They began hawtering for a match, but Mr. Harper refused. He wanted to return to Kentucky, but he was bantored, and almost bullied into staying for the four-mile dash, which closed the meeting. Meantime Kingfisher let down, and it looked as if Longfellow would have a walk-over, and Mr. Harper indulged him. In doing so he made a fatal mistake, for at the eleventh hour "the tough customer," Helmbold, appeared upon the scene as a contestant. The night before the race a heavy rain fell, and although Longfellow ran a dead game horse, Johnny McClellan, who rode Helmbold, never let him get his breath, and beat him badly. Longfellow then returned to Kentucky, and at Lexington had an easy victory over Pilgrim, at two-mile heats.

Mr. Harper had quite made up his mind to retire Longfellow to the stud, but the amazing form of Harry Bassett, as a three-year-old, placed a new champion in the field. Harry Bassett had won every race for which he started in 1871, in a common canter, from a mile and a half upwards, and only capped the climax by beating the seasoned old four-miler, Helmbold, at four-mile heats in mind. The eastern men believed him unbeatable, and began bantering for a match. Mr. Harper never made matches, but sent word that he would be at Monmouth Park, and if Bassett's friends wished to meet him in the cup, he was prepared. It is doubtful if any race during the century has attracted greater attention, not excepting the Eclipse-Henry or Boston-Fashion contests of olden time. The Monmouth Cup became the absorbing theme in racing circles, and people whose knowledge of racing was limited to newspaper reading talked of Harry Bassett and Longfellow with scarcely less interest than of "the Liberal movement," and the prospect of Mr. Greeley's endorsement by the Baltimore Convention. Harry Bassett seemed none the worse for his three-year-old labors when he began his preparation at Jerome Park, and we can never recall without a smile the persistency with which we touted his gallops. They had Tubman and Abdel-Koree at him by turns, but he could always do them, although McDaniel did not hurry him.

When Longfellow came east it was in great state. A special car was reserved for the "select party," consisting of he, Lytleton and Platina. The car bore the device, "Longfellow on his way to Long Branch to meet his friend Harry Bassett." The stable reached Monmouth safely about the end of May, and shortly after Lytleton and Platina were sent to Jerome Park. Mr. Harper had purposely engaged Lytleton in the Westchester Cup, knowing that Bassett would start for it, and thus enable him to get a "line" through Lytleton of Bassett's real form, as he had tried Lytleton with Longfellow, and had a pretty clear idea of their respective merits. "That frightens me, Uncle John," remarked McDaniel, pointing to Lytleton's superb condition when the brown arrived at Jerome; but, "Oh, I guess you'll have your horse all right when the time comes," was the only answer the old Kentuckian made, but he looked thoughtful when Bassett cantered away from the brown.

At last the eventful day dawned. It was one of the warmest of the season. As usual the accommodations were totally inadequate, and how the 30,000 people who gathered there ever did so without an accident is a miracle, for the push and crush on boats and cars was something dreadful. The seating capacity of the Monmouth stand was not what it is now, and threw the people out into the grounds, and hence showed the attendance to splendid advantage. All the way along the rails there were a heavy black fringe of people, and inside the field the crowd was great. Longfellow was the first to show, and was heartily received, but when Harry Bassett came out, with Jimmy Roe in the "blue and red," the applause was terrific, causing the glorious chestnut to arch his neck and dance nervously. The horses took their places amid suppressed excitement. They got off together, and ran yoked for three-quarters of a mile, in 1:18½, amid terrible cheering, and the mile in 1:44, nor was there any difference a quarter of a mile further, in 2:10½. But opposite the stand Longfellow drew away, and the wild yell of the Kentuckians fairly reverberated among the sands of Sandy Hook. The race was over, for Bassett sulked and Longfellow drew away, and won as he liked. Of course the eastern men were amazed, and of course there were plenty to hint about a "bucket of water," and other dark insinuations. Two days later Longfellow defeated his future consort, Susan Ann (who was destined to breed Thora to his cover), in the mile heats, three in five. Harry Bassett had gone to Saratoga, and thither Longfellow followed him, and July 16th, or fourteen days after their last meeting, they again faced each other for the Saratoga Cup, which has become memorable as one of the most savage struggles in racing annals. Bassett dashed off like a quarter-horse, setting a mad pace, as may be judged when the two miles was timed in 3:30. Here Longfellow drew up to him. It was at this point that Roe has often related that as they entered the straight he saw Longfellow change his feet and disappear. Longfellow's colored jockey roe in his stirrups, and began flogging, and, like the Old Guard at Waterloo, the magnificent brown answered every call with a courage which was extraordinary; but it was Bassett's day, and the chestnut won by a length, in 3:56. Longfellow pulled up a magnificent ruin. He was completely broken down, and had lost half of one of the plates on his fore-foot. Whether the accident happened at the three-quarter pole, where he was seen to falter, or in pulling up after the race, has always been a debated point. That he struck himself was clear. His faltering at the head of the stretch gave color to the belief that he hit himself at that point, hence his courage in finishing upon three logs has often been compared for gameness to Dundee's memorable finish for the Derby, as the pain he endured must have been intense. Others claim that it was his jockey's suddenly pulling him up at the finish too abruptly that caused him to grab his plate and hit himself. At all events, in defeat Longfellow scored his greatest victory. While Bassett's victory was well received, the great popular heart went out to the brown, whom it had adopted as its idol, and cheered him tumultuously.

Longfellow was led back to his stable a splendid wreck. Old John Harper felt it keenly, and, with a heavy heart, re-

turned to Kentucky. He, however, had long cherished the hope of seeing his pet at the head of his stud, but it was not to be, for when the spring came the aged Kentuckian succumbed to age, disappointment and the domestic affliction which had weighed upon him for more than a year. His nephew, Mr. Frank Harper, assumed control, and one of his first acts was to name the old farm the Nantura, in honor of the brood-mare whose sons had made it noted throughout the country by their conquests.

## State Fair Colt Entries.

Entries to the purses offered by the State Agricultural Society for two, three and four-year-olds closed on the 10th. The running events failed to receive the number of nominations required by the conditions, and were declared off. The entries in the trotting purses were as follows:

No. 1.—Trotting; purse \$1,000; mile heats, for two-year-olds.

Palo Alto's b c Azmoor, by Electioneer, dam Mamie C.

Palo Alto's b c Norval, by Electioneer, dam Norma.

John Mackey Sacramento, b c Lohengrin, by Echo, dam Vixeu, by Patchen.

L. J. Rose, San Gabriel, b f Reina, by Sultan, dam by Mambriño Patchen.

L. J. Rose, San Gabriel, b s Kismet, by Sultan, dam by Sampson, son of Hambletonian.

No. 2.—Trotting; purse \$1,000; mile heats, three in five, for three-year-olds.

Palo Alto Stock Farm's br f Alta Belle, by Electioneer, dam Beautiful Bells.

Palo Alto Stock Farm's b f Argo, by Electioneer, dam American Girl.

J. Sorensen, Portland, Or., ch f Susie S. by Hambletonian Mambriño, dam Bellfounder Girl.

G. W. Trahern, Stockton, br c Voucher, by Nephew, dam by Vermont Patchen.

Jos. Cairn Simpson, Oakland, br c Antevolo, by Electioneer, dam Colombine.

John Mackey, Sacramento, ch e Robert Lee, by Nutwood, dam a Blackbird mare.

J. A. Goldsmith, Oakland, ch c Judge S., by Nutwood, dam by Volunteer.

E. Giddings, Lemoore, b c Bay Rose, by Sultan, dam by The Moor.

D. S. Rosenbaum, Stockton, br f Tabbie Rosenbaum, by Nutwood, dam a Blackhawk mare.

John Williams, Stockton, ch f Leleups, by Nutwood, dam a Clay mare.

L. J. Rose, San Gabriel, b c Bedouin, by Sultan, dam by The Moor.

No. 3.—Trotting; purse \$1,000; mile heats, three in five, for four-year-olds.

Palo Alto Stock Farm's b f Helen, by Gen. Benton, dam Alameda Maid.

John F. Shaffer, Gridley, ch c Happy Jim, by Brigadier, dam Snip, by Norfolk.

E. H. Miller, Jr., San Francisco, blk g Thapsin, by Berlin, dam Lady Hubbard.

Fred Arnold, Stockton, br s Ha Ha, by Nephew, dam by McCracken's Blackhawk.

J. H. Tennant, Pinole, b f Twinkle, by Echo, dam by Ethan Allen.

James Garland, Oakland, br m Regina, by Electioneer, dam by Elmo.

James Cropsey, Pleasanton, ch c Redwood, by Nutwood, dam Alice R.

John Williams, Stockton, br m Lucille, by Nephew, dam by Gen. McClellan.

L. J. Rose, San Gabriel, ch g Don Carlos, by Del Sur, dam by The Moor.

L. J. Rose, San Gabriel, g g Centaur, by Sultan, dam Belle View Maid.

## Names Claimed.

By Huntley & Clark, River Side Stock Farm, Montana, 1883.

BECKEY BISHOP, for bay filly foaled June 2d, by Bishop, dam Becky Bird, by Balsora.

RIVER SIDE PATCHEN, for black colt foaled April 27th, by Mambriño Patchen, dam Bell Dair, by Ward's Flying Cloud.

RIVER SIDE MAID, for sorrel filly foaled June 4th, by Kentucky Volunteer, record 2:32, dam Blackhawk Maid, by Tip-top Saib.

NORMA PATCHEN, for bay filly foaled May 19th, by Mambriño Patchen, dam Blaze Face, by West Wind.

WYOMING, for colt foaled June 11th, by Victory, dam Cicada, by Clermont, record 2:30.

ETHEL WEST, for black filly foaled April 13th, by Abdallah West, dam Ethel, by Contractor.

HAMBLETONIAN BISHOP, for bay colt foaled May 12th, by Bishop, dam Eugenie, by Rysdyk's Hambletonian.

REALITY, for brown filly foaled June 16th, by Bishop, dam Ideality, by Cuyler.

TULL, for bay colt foaled April 3d, by Victor Von Bismarck, dam Indian Queen, by Indian Chief.

HALL STORM, for brown colt foaled June 21st, by Bishop, dam Lady Graves, by Smuggler, record 2:15.

BISHOP'S HERO, for bay colt foaled June 7th, by Bishop, dam Lida Kendall, by Hero of Thorndale.

MARIE WILKES, for bay filly foaled April 19th, by Geo. Wilkes, record 2:22; dam Marie, by Long Island Patchen.

ABE, for bay colt foaled May 9th, by Aberdeen, dam Mag, by Mambriño Pilot, Jr.

R. DEAN, for bay filly foaled May 9th, by Aberdeen, dam Mag, by Mambriño Pilot, Jr.

DELLA DEAN, for bay filly foaled May 28th, by Bishop, dam May Bonner, by Robert Bonner, Jr.

JUNIETTA, for bay filly foaled June 2d, by Kentucky Volunteer, record 2:32; dam Mollie Cole, by Cardinal.

KENTUCKYANNA, for bay filly foaled April 28th, by Indianapolis, record 2:21; dam Molly Goldsmith, by Goldsmith's Abdallah; record 2:30.

BELLE BISHOP, for bay filly foaled July 23d, by Bishop, dam Ristori, by Northland.

ADDIE D, for black filly foaled June 13th, by Kentucky Volunteer, record 2:30; dam Stella McDonald, by Clark Chief.

TINY TIM, for bay filly foaled April 24th, by Victor Von Bismarck, dam Tunica, by John Morgan.

CLIFFER, for bay filly foaled April 29th, by Steamboat, dam Belle M, by Commodore Belmont.

MATTIE BISHOP, for bay filly foaled May 31st, by Bishop, dam Mattie, by Bill Cook, by Geo. Wilkes.

Mr. W. H. Wilson's first annual sale, at Paris, Ky., in spite of the floods, was a success; sixty-four head fetched \$18,350, or an average of \$282. The brown stallion Cyclone brought the highest figure of the sale, \$3,000.

## How to Buy a Horse at Auction.

There can no longer be any doubt that breeders are sending more of their best trotting stock to auction than formerly. The admirable system of combination sales has opened a way for small breeders to appear in sales of sufficient size and variety to draw a full public attendance, which formerly could only be commanded by those who bred on a large scale. Many land-owners take pleasure in breeding a few trotters, who have not the peculiar faculty of effecting favorable sales, and some of them breed exceedingly well. Hence it has resulted that many capital horses for both road and track have been secured at auction, usually at prices that favored the buyer.

Some buyers have obtained several prizes, showing that other elements than more luck enter into the question of success in buying at auction. The mistake made by many is in not taking sufficient time to examine the horses before the days of sale. Owners who have good horses usually have them on hand in good season for this purpose. Those who have much to conceal usually send in their horses at the last moment, giving little time for examination before they are up for sale. The buyer who makes no examination before the sale opens, finds it impossible to do so as it progresses, and, by hiding haphazard on what appears to be selling low, seldom gets a prize. It is usually wise to avoid bidding on animals that there has been no opportunity to examine before the sale. Another mistake frequently made is in not buying early enough in the sale. By this we mean, that having a limit in price, many buyers wait for a favorite animal, that finally sells, as it should, at two or three times the amount of their limit. They then regret, too late, that they did not purchase earlier lots within their limit, richly worth far more than they brought. Then, as the sale progresses, and many buyers begin to realize this fact, and bid on animals more nearly corresponding to their limit, prices commence to strengthen, and at the last end of the sale, as a horseman puts it, "things bring every dollar they are worth, and some of them more."

At the combination sales many horses have been purchased on the first day, and resold before the sale was over, at an advance, hence the first day has come to be called "bargain day." Owners prefer to avoid it, but the rule of apportioning each consignment equally between the several days of the sale, always causes some excellent offerings to be placed on the first day, and a large proportion of the best horses that have been secured at auction were sold on the first day. As not one owner in twenty warrants a horse, though he may know him to be worthy of warrantee, buyers will see the necessity of examining before the days of sale, and of avoiding animals that are not there two or three days in advance, for that purpose. This takes a little time, but it is time well spent, considering that it takes more time still to look about at private purchase. Examinations should be made before the sale opens. The detail of conducting the sale, prevents showing horses while the sale is in progress, and it then becomes necessary to close the stable doors against visitors.—N. Y. Spirit.

## Caller Ou.

As a two-year-old she ran twelve races, winning three. Caller Ou's "salad days" were full of promise. She could gallop clean away from anything in the paddock, and the veteran trainer, John Scott, was so impressed by her that he assured T'Anson that he had another Blink Bonny. In her trials she was always ahead, and could outdo the entire stable for work. As a two-year-old she was tried at even weights with the four-year-old Douati, and beat him so badly that T'Anson could not believe it, and tried them over again with the same result. In the Oaks she was beaten, owing to Challowen's not understanding her, but, previous to the St. Leger, Harry Grimshaw, who had ridden her, liked her so well that he backed her to win him three hundred. Still T'Anson offered her to Mr. Robinson of Australia for fifteen hundred, and Grimshaw took a change of fancy, and a day or two before, came to Doncaster and begged T'Anson to release him from the mount. The night before the St. Leger Lord Stamford had the refusal of her for £1,200, and Challowen was again given the mount, to "let her do what she liked with her head." He did so, and at the Red House she was going so well that he felt sure of a place. Then Kettledrum joined her. It was nip and tuck, but Challowen sat perfectly still, and outpaced the Derby "crack," notwithstanding his tremendously game finish. She was, indeed, the most sensational of St. Leger winners, as she started at 1,000 to 15. In all she ran seventeen races that year. She won the Northumberland Plate in 1863 and 1864, and in 1865 was beaten only a neck by Brown Bread, who had 89 pounds to her 126 pounds. As a winner of Queen's plates Caller Ou is credited with no fewer than thirty-four, one of which she won as a three-year-old, three as a four-year-old, fifteen as a five-year-old, ten at six years, and five at seven. Altogether she ran ninety-eight races, and won forty-nine. When Blair Athol made his debut in the preliminary cauter for the Derby, T'Anson sent Caller Ou to lead her gay nephew, the appearance of the pair creating great enthusiasm, as she was the pride and pet of the northerners.

## Retired Drivers.

"Superfluous lags the veteran on the stage," said the poet. In borrowing the quotation we do not mean to say that the veterans of the sulky are superfluous; on the contrary, many of them are well able to give their youthful opponents many useful hints pertaining to the art. We were led into this train of thought by the report that the veteran Wm. H. Doble intended to return to active service this season. "Uncle Billy" is a performer himself, and a sire of performers. Like the actor who has spent the best years of his life in the glare of the footlights, the driver who has made a competence feels unhappy away from the old life. Of all the occupations of man, the profession of handling horses is conducive to longevity, provided the vices of the turf are steered clear of. The open air and healthy excitement incident to a race are stimulants that leave no bad after effects.

Dan Mace, when enjoying an income which would be satisfactory to most men, could not allow a year to pass by without driving a race or two, to save his life. Dan Pifer, another of the Old Guard, is still open for engagements. Jarvis Joslyn, in spite of his years, can drive a good race. Uncle Jack Bachelor has his time taken up with the runners at present, but his hands have not lost their cunning, and Woodmansee pere, who piloted old Peachontas years ago, only last summer placed a sister of Doxter in the 2:30 list. So it goes. They cannot keep away. There is no such thing as absolute retirement, unless through death or physical disability.—Sportsman.

At Dilley, Oregon, Messrs. Hallett & Beach are building a covered half-mile track, and have it about half roofed in.

## ATHLETICS.

## Advice to Young Athletes on Training.

[L. E. Myers in N. Y. Sportsman.]

Walking.—As everyone knows I am not much of a walker, and am, therefore, unable to give from experience any ideas of my own. I have, therefore, secured the ideas of three of the best amateur walkers of modern times on the subject, and give herewith their ideas. Eugene E. Merrill of Boston, Mass., says: Nearly every athlete with a will of his own has his particular ideas of training. It is just possible that my ideas may conflict with those of other prominent athletes, but I shall give them to you for what they are worth.

First.—When I am training for a three mile race, for instance, I go different distances on different days. To-day I may walk one mile very fast, to-morrow one and a half or two miles at a fair rate of speed, and then again, if I am not feeling well, I may only go half a mile. Of course this work is done after I have gone through my slow work and the process of getting my stomach in good condition.

In practice I believe in doing pretty fast work, but not to walk as fast as you can. The last hundred or two hundred yards should be finished with a spurt, as in this way you will be enabled to respond to the spurt of your opponents at the finish, and think nothing of it.

Second.—I do not believe in going the full distance in practice. If you are asked to go the distance too often you will grow tired of it, and will not, therefore, take the proper interest in your work. In fact, you will find yourself making excuses for leaving off your work altogether. I believe that by practicing shorter distances you will get strong and fast, and that on the day of the race you will be able to go the distance as well as if you had gone it nearly every day in practice. I used to walk from 100 to 200 yards nearly every day, after finishing my regular day's work, as fast as I possibly could. Another reason for not having a man go his distance too often is that it is more or less a trial, and trials are a great deal worse than the races themselves, as in the former case there is no excitement to help carry you along, and it is pound, pound, with the thoughts of "what's the use?" ringing in your ears the whole way.

Third.—The arms should be swung across the chest, but not as high as most walkers do.

Fourth.—I believe in swinging the arms well back, so that when one arm is back it causes the opposite hip to be thrown well forward, thus lengthening the stride.

I do not believe in the stiff arm motion you refer to; I think it tires your arms, and when the arms are tired your body follows suit. I think it is better that the arms should have a free swing, and the hips be called upon to do the most work. A person can readily see that this should be the case, as the hips are the seat of power. This throwing the arms in the air with a wild, spasmodic movement, is no doubt the cause of most of our walkers going to pieces before they are half through their races.

Frank P. Murray, our present representative walker agrees with Merrill's ideas in most respects. He also believes in going from about one-half to three quarters of your distance at a faster rate than could be maintained for the whole distance. He says: "It's just as I feel as to my work in practice. If I'm feeling well after doing half a mile, I'll say to myself, 'Well, I guess I can manage three-quarters; it's only two laps more, and after I go these two extra laps, if I'm still not at all distressed, why I finish out the mile.' It's just as I feel, but as a general thing I only go about half the distance of my race." Murray, unlike Merrill, believes in the stiff arm motion, as anyone who has seen him walk can testify. He often gets his arms above his head when he is finishing a race. T. A. McEwen is almost entirely unknown to the athletes of to-day as a walker, although some of our skippers have known him to their sorrow as judge of walking.

There are a good many gentlemen who are now interested in amateur athletics, and who claim that McEwen was the fastest and fairest walker that ever trod the cinder-path, either amateur or professional. His style when in form is described as simply perfect, and one old-timer, who can now be seen at every athletic entertainment given in or around New York, declares that McEwen could at one time walk below 6m. 20s. without a skip or a break.

McEwen believes in going alternately over the distance at a slow pace, and under it, or say from half to three quarters of the distance, at a fast pace. He believes in the stiff arm motion, and when spurring carries his arms well up. McEwen always wound up his daily practice with a burst of from 100 to 200 yards as fast as he could walk. G. D. Baird, who won our three-mile walking championship, has the queerest notions of walking of any of our walkers. He says: "If you are fast, practice a distance, and if you have staying qualities and no speed, practice speed." He is a great believer in trials, and says that the knowledge of what he can do to almost a yard gives him confidence. He also believes in walking according to a schedule, which he almost invariably does. He has tried both the loose and stiff-arm motions, and found it made no difference to him. His natural style, however, is the stiff-arm motion, which is most jerky in appearance, owing to the fact that he is so very short in stature that he is required to take about seven steps to most of his opponents' six, to go or the same rate of speed. W. H. Parry also walks with a stiff-arm motion. W. H. Meek and W. H. Purdy swing their arms somewhat alike, that is between the style of Merrill and Murray.

It will thus be seen that walkers of prominence differ as to style. Unlike running, walking when practiced to race, is in an acquired gait. I would, therefore, suggest to young walkers to try the different styles, and to adopt the one that comes easiest and at which he can walk the fairest. By stiff-arm motion is meant that the arms should be held stiff at the elbow and swung from the shoulder across the chest. Those athletes in or around New York who desire to become walkers can at any time during the coming season have an opportunity of seeing the different styles of progression as practiced by our different representative walkers. They can choose for themselves. Walking means that both feet shall be on the ground at the same time, that is, while the heel of the foot thrown forward is on the ground the toe of the other foot shall also be on the ground. Contrary to general opinion, I maintain that a man can walk fairly with a bent knee; but as this style is always questioned by our judges, the beginner had better practice at the outset to throw the knees well back. Just as it is possible that a man can walk with a bent knee, so is it possible to run with a stiff one. This latter style is known as the stiff-legged run, and is the style of most of our walkers of to-day. For the sake of knocking a few seconds off their records this trick is often resorted to, and, I am sorry to say, often passes muster. I can count on my fingers the men whom I think fair walkers that amount to anything at all. Most of our walkers would make good hurdlers, and one of them has recently become an adept at this latter game.

There has appeared in the daily papers various paragraphs which lead to the conclusion that Jos. Masterson will shortly desert the amateur ranks. Of course not very much confidence is to be placed in these statements of the daily press, yet rumors have been current of late that point to that end. The running season is rapidly approaching, and there is every prospect that R. S. Haley will again join the cinder path, and as there are at the least two men who will, after their season's rest, be worthy foemen for our best sprinters it would be expedient for Masterson to wait a few months before joining the professional ranks, if he seriously intends doing so. A great amount of difference of opinion exists regarding the speed of our best sprinters, and now as there is every prospect of bringing all the men together this season it is to be desired that the competitors will not place any obstacles in the way of their meeting.

At the regular meeting of the trustees of the University of Pennsylvania, held March 4th, at Philadelphia, the rules adopted at the conference of the colleges of the eastern and middle states for the government of inter-collegiate athletic sports were submitted to the board and rejected. By adopting the rules the Pennsylvania University would be debarred from contesting in a cricket match with the many clubs of Philadelphia, and the rejection of the rules of this alone is justifiable.

The Midland Counties cross-county championship of England brought twelve clubs in competition on February 9th. W. C. George of the Mosely Harriers led the whole field home, followed by his club-mate Carter, notwithstanding this Birchfield Harriers secured the championship with the small total of forty-four.

The return football match between the Wanderer and University Clubs will take place to-day week at the Recreations Grounds. This will give the Wanderer Club plenty of time to get in condition, and a splendid contest for superiority will, no doubt, be witnessed by the spectators.

The fifth annual Boxing and Wrestling Championship Meeting was held March 1st at Tammany Hall, New York, under the auspices of the New York Athletic Club. Large and enthusiastic audience. Boxing very poor on the whole; wrestling only fair.

The challenge of George Smith to run any other sprinter in the country 100 yards, for from \$1,000 to \$5,000 a side, has been accepted by M. K. Kittleman. The principals will meet shortly to complete arrangements for the race.

The 100-yard foot-race between George Cahill of Galveston, and Lonis Peco of Houston, Texas, the champion sprinter, for \$1,000 a side and the championship, was won by the former. Heavy odds had been laid in Peco's favor.

The Birchfield Harriers won the Midland Counties cross-county championship February 9th, by 23 points, the Mosely Harriers gaining second honors. There were 120 competitors.

Regis Senac and Albert Vaughn are matched to fence for the title of "Champion of Arms," and a gold medal valued at \$125. The competition will take place at Tammany Hall on April 5th.

At Phoenix, Arizona, on the 27th ult, three amateurs ran a race of 5 miles and 300 yards. The scores were: Jackson, 34:20; Agard, 35:50; Recarte, 33:16.

J. McLaughlin defeated R. Prescott in a catch-as-catch-can wrestling match for \$400 and gate at Streator, Illinois.

Mr. Folsom, of the Wanderer Football Club, was stroked for four years in the Yale College crew.

## CRICKET.

The Secretary of the Portland Cricket Club in a communication to a gentleman of this city, states that their cricket team is desirous of arranging a match with a San Francisco eleven the coming season. A cricket match between Portland and San Francisco would give the game a great amount of impetus on the coast, and it is to be hoped that our cricketers will try to arrange the match as soon as possible so that both teams will have plenty of time to get in good form. There is no reason why we should not have an annual match with Portland; when the ball is once set rolling, each succeeding match will create a public feeling in the game hitherto unknown on the coast. Cricket, is now one of the few games which is played for love of sport alone and consequently ought to take a leading place on our coast among gentlemen who appreciate manly exercise.

A cricket match was played at Lima, Peru, on December 22d, 1883, between H. M. S. Swiftsure and H. M. Fleet. H. M. Fleet scored 66 runs in the first attempt and 41 in the second. H. Dawson secured 12, and Lieutenant Evan-Thomas 6 of the wickets. H. M. S. Swiftsure made the fine score of 114 in their first essay. E. H. Neat, 9; C. Henderson, 17; H. Dawson, 30; Captain Aitchison, 12, and Lieutenant Knapton, 12, being the chief run getters. The Swiftsure team thus winning by an inning and 7 runs.

On December 26th, 1883, a representative team of Lima opposed a team selected from the H. M. Ships Swiftsure, Satellite, and Constance, and which resulted in the defeat of the Lima team on the first innings by 14 runs. H. M. Fleet, first innings, 77 runs, second 87. Lima in their only innings compiled 63. H. Dawson again bowled remarkably well. The principal scores from the Swiftsure delegation were Lieutenant Evan-Thomas, 29; E. H. Neat, 15; J. S. Luard, 21, and Captain Aitchison, 8.

At the annual meeting and dinner of the Portland, Oregon, Cricket Club, held February 7th, the following officers were elected for the ensuing year: President, Wm. M. Molson; vice-president, John Cran; secretary, J. E. Greame; treasurer, John Andrew; executive committee, J. Readman, Jr., A. L. Rome and W. H. Kinross; captain, A. L. Rome. A number of new members were proposed and elected.

John S. Prince, the bicyclist, has been fraternizing with our local cricketers. Prince was a professional player for some years in England.

The turf is about to receive a new acquisition in Senator McPherson, of New Jersey. Already the Senator is celebrated as a breeder of fine Jersey cattle, but he is becoming infected with the prevailing fondness for racing, and is about to establish a breeding-stud, and also meditates maintaining a select racing stable. Being a gentleman of wealth he will be able to form both upon the proper principles, since in these days of fancy prices it requires capital in order to secure the proper building material.

## BICYCLING.

A decided boom will be inaugurated in college bicycle-riding during the coming summer. Claflin, of Harvard, who is said to be the fastest of the college racing men, will compete at the inter-collegiate games at Mott Haven on May 21st. As he will probably meet Norton, of Harvard, Maxwell, Hamilton and Crawford, of Yale, Reed and Load, of Columbia, as well as representatives of Princeton, Amherst, University of Pennsylvania, and other colleges, it is highly probable that the two-mile college record, 6 minutes and 51 seconds, will be reduced nearer the amateur record—6 minutes and 2 seconds.

Bicycles and velocipedes are allowed to roll through the streets of Paris, Munich, Pesth, Brussels and other large European cities, subject in some of them to more or less regulation and restrictions on the part of the police authorities; but in Vienna they are rigidly excluded from the streets. Several Viennese clubs, devoted to bicycle and tricycle propulsion, are now agitating for a repeal of the regulations, and are getting up petitions on the subject.

The bicycle races at San Jose, in which the *piece de resistance* is Prince's attempt to beat the roadster, Captain Lewis, ten miles out, have been postponed till next Saturday the 22d, as the association desired more time in which to get the track in order and properly advertise the events.

The bill prohibiting bicycles on the pikes in Jefferson county, which has been in the Kentucky House of Representatives for some time, was decided in favor of the bicyclers.

Some of the big daily newspapers of London are using tricycles for their city deliveries.

A coat of vaseline makes an excellent rust preventive for wheels.

Louisville, Ky., now has three clubs, and a fourth is talked of.

## THE DRAMA.

## The California Theatre.

During the week the Jeffreys Lewis Company, one of the best general companies, by the way, we have had on our local stage for some time, have been principally occupied with *Alixé*, a French production. The piece is essentially emotional. In construction it is faulty, but contains some fine dramatic scenes, and a moral that ought to come home closely to many people in San Francisco. Considering the foundation of the plot, the leading characters especially, *Alixé* and her half-sister *Lurienne*, and *Madame Vallory*, the mother of both, are brought together in a strained, unnatural manner, which makes the piece sometimes heavy, and its performance difficult and trying. Still, in pure as in unholy love, *Miss Lewis* is as excellent in *Alixé* as she was in *Coré*, and repeatedly drew tears from the audiences. *Miss Phoebe Davis* *Lurienne* had many strong claims to recognition. Although she has matured, or rather matronized greatly since her marriage, the old lovely voice, bewitching eye, and graceful manners are still prominent in her. Of the male characters *Frank Wright's Duc de Mirandol*, was far the best, though *Thayer's Count de Somerville* gave us some chaste and exquisite elocution in the interview with his faithless wife, *Madame Vallory*, after a separation of twenty years. The recital of his wrongs was a rich scholarly test. *Grismer's* voice, attitudes and walk on the stage will bear much improvement. Altogether the company is worthy of patronage. *Alixé* was admirably mounted. The attractions next week are very strong, especially for St. Patrick's Day.

## A Prospective Treat.

Somewhere on or about the 27th of April, a marvelous musical combination will appear in this city, for which we predict the greatest popularity, far exceeding that of the Spanish Students. This musical novelty is styled the Arch-Duke Joseph's Hungarian Gypsy Band. Before coming to California they will appear only in Boston and along the route. The orchestra contains thirteen performers, some of whom use instruments never yet heard in America, the leading one of these being the Schlag-zither, and almost as large as a piano. The performance and music of this organization is said to be wonderfully beautiful, and far superior to that of the popular Spanish Students. The leadership is entrusted to the celebrated violinist C. T. T. Barath, who also plays the Schlag-zither. They will appear at popular prices either at the California theater or the Grand Opera House.

## The Vienna Garden.

There has been a strong addition to the stock company at this place of amusement this week in the persons of Courtwright, Hawkins and Dixon, the minstrels, who will be strongly reinforced next week by others of prominence in their line. As a tenor singer Dixon has a grand voice, but his immense lungs at times carry him away, and he is altogether too loud. Courtwright and Hawkins were warmly received on their reappearance. The Tyrolean singers, and the Marvels of Peru in their specialties are still prominent and meritorious features of the programme. Great changes and great attractions next week. The houses during the week have been very large in proportion, about the best we saw in the city.

## Oakland Theatre.

The attendance during the week to see *Under the Gaslight*, though somewhat threadbare, has been up to the average standard. We understand it was not the fault of the management that *Fairfax* had to be withdrawn after being advertised. Next week *My Geraldine*, by Bartley Campbell, will occupy the boards with *Miss Tittel* as *Geraldine*, and *Minnie Tittel* as *Little Geraldine*. The cast generally is strong.

Regarding the weather in Kentucky this spring the *Live Stock Record* of the 8th, says: March has come in like a lion, and there is no change for the better in the weather. Snow fell Friday, Saturday and Sunday to the depth of some eight inches. The weather was quite cold Monday and Tuesday. On Wednesday a cold rain began to fall which turned into sleet, and while we write the houses, ground and trees are covered with a heavy coating of ice, the trees look like they were encased in glass. This weather prevents horses from even taking walking exercise except under shelter, and almost suspends training operations.

## General Topics.

Where do the California weather El Mahdis stand now. The "knowing ones" who, a few weeks ago, were predicting aridity and desolation, and sending hay and oats up, up, up, until another week of delayed rains would have sent these mainstays of the stable out of sight, were joyously wrong. Gloriously came the rain that set the keynote for the frogs, and equally glorious was the extra fine weather which followed. Never were May or June days finer than those which February wound up with. The grass grew apace. When the boys led out the horses on these bright afternoons the wild oats and alfalfa were up to the eyes of the steeds, when they buried their noses in the sweetly scented herbage. March, for three days, cut the cloth from the same web, and then to put the croakers to an abject surrender the rains came again. There was devastation in places, and the southern rivers overflowed the banks, and from the canyons came torrents which washed out embankments, and railway trains were derailed. But these later rains ensured that there would be no frosts, and the bursting of flower buds on the fruit trees did not terrorize the horticulturalists, as it gave a reasonable assurance that the bloom would be followed by fruit.

Nevertheless, the trainers became uneasy, and there were murmurs that on other courses there would be a good chance to gallop. Not a few pondered over the wet weather track at Palo Alto, and imagined that all that Walsh had to do was to stand under an umbrella and watch the colts breezing over as good footing as anyone could desire. They are not aware that the thoroughbreds are domiciled at Matadero, and the galloping track is not a whit better in rainy weather than either the Bay District or Oakland courses. But, after all, these warm rains are not so bad, even to the trainer of race-horses, and though such a down-pouring as came on last Sunday may be somewhat trying, there are lots of such days in the east at the most favorable season of the year.

The worst feature of the storm, to those who are training on the Oakland course, was the raising of the flood-gates at Lake Chabot, and, consequently, a torrent in the creek which crosses the track, resulting in slight damage. This was soon repaired, and the chances are, that before this paper goes to press the course will be in the best order. After the many pessimistic prophecies that there would be a "water famine" in Oakland owing to the reservoirs being so scantily filled, the necessity for disposing of the surplus as early as before the middle of March will make amends for the washing away of a few yards of dirt.

The channel of Temescal creek is so deep now that the only harm from even so violent a storm as that of Saturday night and Sunday is the cutting away of a portion of the earth from the abutments of the bridges. The overflows in former years, when the water spread over the low lands adjoining, left a valuable legacy. This is in the shape of "sediment," a fine kind of deposit, the very best material for the top coating of the track. It is a light soil, a small proportion of which will correct the most stubborn adobe, the mixture being easily handled, and at the same time not inclined to "cup." On either side of the creek there is an accumulation from previous floods, so that the furthest distance to haul is a quarter of a mile, as the creek divides the track in nearly equal parts.

Owing to the California tracks being kept in such good order the trainers in this country are somewhat hypercritical in relation to having the best ground to work upon. The peculiarities of the climate entails the necessity for almost daily sprinkling during the summer, and sprinkling renders compulsory the harrow and leveler. The services of one man and a pair of horses have to be called into requisition with, at times, additional help. Water tanks and sprinkling wagons are part of the paraphernalia of every course in the State, and an expenditure of at least \$1,000 a year is obligatory to keep each of them in order. A trifle too hard, any unevenness of the surface, call for remarks that are anything but pleasant, and some of the trainers are prone to account for defeat on the score that the state of the ground forbade getting their horses in condition.

When a "natural method" of treating the feet of horses comes into vogue there will be less growling about "hard tracks." The present practice of cutting away that which was intended for support, weakening the structure further by soaking, stuffing and the application of hoof ointments that are detrimental, is bad enough. When that treatment is supplemented by placing a narrow band of metal to accentuate the blow on the weakened part, it is not surprising that there should be finching when the two solids are brought together. In that case there is no chance for the frog and sole to do their part, and there is a decided improvement in having a soft surface which will permit the shoe to sink so that the natural guards against concussion can exert an influence.

The pernicious practice of handgaging aids in crippling the feet. The horn is supplied from the vessels which form a network around the coronet, these are united above the ankle into a few ducts that convey the fluid. Bandaging retards the flow, and in a measure cuts off the supply. Bandages may be used advantageously, though the common practice of enveloping the leg from the knee to the foot rigidly when the animal is warmed by exercise, is certainly injurious. Confining the vessels which deposit the horn interferes with the growth of the foot, and the supply being inadequate the diminution ends in contraction. The quality of the horn is impaired as well as the quantity. Elasticity

gives way to brittleness, handgaging and shoe completely foiling the efforts of nature.

There are cases where artificial pressure assists Nature in performing a cure; and wrappings which prevent evaporation and retain the heat may be beneficial. Indiscriminate use, however, is not in accordance with sound reasoning or the results of practice, and many animals have been ruined by the ligatures which are so unskillfully applied. There are other bad effects beside those which restrict the deposit of horn. The evils of tight lacing by females have been oftentimes so graphically depicted that there is little necessity for repetition. People understand the danger there is from undue pressure on what is considered the vital portion of the frame—human and animal—but the extremities are thought to be exempt from injury from that source of trouble. Tight boots give pain, and to add to that acknowledged feature it is safe to assert that if Kittleman were to wear a compressor of the metatarsals for any length of time he would soon lose his hold of the championship.

A tight bandage on the limbs of horses is only admissible as a part of surgical treatment. Pressure may assist the absorbent to get rid of that which is injurious, or the support may be required to tendons that are not in a normal condition. The advocates of the actual cautery justify the treatment on two grounds. One is the counter-irritant, the other that the cicatrix forms a permanent bandage. On the theory that two violent inflammations cannot exist in juxtaposition, that which results from the hot iron may overcome the more deeply seated. Grant this, and admit that the cautery has remedied the hidden trouble, and what necessity is there for temporary or permanent bandage? There are many cases when "bowed" and "sprung" tendons have become sound from allowing Nature to work a cure, and in every case there has been no thickening of the skin. It is just as elastic as it was before the injury, and without rigid bands such as follow the artificial method of cure.

To retain heat, and as a preventive of evaporation, bandages are useful. To obtain these benefits without injury it is essential that they should be applied as loosely as can be and retain the place. An expert will apply them so that there is scarcely any pressure, and yet they will keep the desired position better than when hung loosely put on, if even drawn tight. For this purpose bandages should not be elastic to any great degree, as the rolling around the leg will stretch the fabric if it gives easily, and of course followed by contraction. If there are abrasions of the skin, woolen bandages are inadmissible.

To those who are commencing to learn the art of training horses, advice may be given with some hope that it will be followed; many of the old professors are loth to forsake the paths they have trodden for so many years, and look upon innovations with horror. A safe plan is to adopt suggestions, and those only that appear to have a common-sense basis, and when advice is not supported by reasons that seem just be careful in accepting it. There are some things that have been found beneficial difficult to account for, others which have an appearance of plausibility fail. There is no "royal road" to success; in this, as well as other pursuits, diligent study is the only thing that will lead to knowledge, and that accompanied by practice. Theories, however plausible, are of "little account" unless supported by the tests of actual trials, and the reverse is nearly always true, that success can be demonstrated to result from known causes.

Already there are surmises and arguments regarding the weights that should be allotted in the handicaps. Fortunately there are only two in the programme, one of these restricted to three-year-olds. We say fortunately, as there is bound to be carpings, growlings and fault-finders, and some there are so prone to criticize unfavorably whatever is done that they denounce without reason, and grumble when they are aware that they are wrong. There is another class who assume knowledge of what horses should carry, when they know little of the effects of weight. Every tyro who makes pretensions to turf lore, thinks that he can adjust the weights in a handicap far more equally than some old hand at the business. Admiral Rous, Wetherly, Dowling, Wbeatley, and others of the Nestors are held to be far inferior in penetration to the critic, who, perhaps, does not know a horse-shoe nail from a the position they take. Differ they must. It is essential that carpet tack, and cannot advance an argument to sustain they emulate knowledge, and the easiest way to impress those who are equally ignorant with the vastness of their acquisitions is by finding fault. The task is not a hard one for them, though it has tried the capacity of men who have given a life study to the subject, and yet not feel competent.

The Cup is more trying to the handicapper than when the ages are the same. In the former there may be doubts whether the regular schedule is a fair apportionment or not, and there is age to govern as well as capacity. In order to equalize the chances the handicapper may be compelled to impose a heavier "topweight" than he would otherwise, as a good aged horse and a poor three-year-old could not be brought together without. Still, for two-and-one-fourth miles the task is easier than for a shorter distance, and it is not likely that there will be much trouble in fixing the weights without putting on a crusher.

D. Cole of Portland, Or., has sold to J. W. Myers of Dallas, Polk county, the trotting stallion Magna Charta, by Old Magna Charta, dam by Vermont Hero.

## THE RIFLE.

## A Long Range Shot at Dr. Pardee.

EDITOR BREEDER AND SPORTSMAN:—I have, within the last year, received several copies of your paper, evidently sent to me by Dr. Pardee, and presumably for the purpose of having me read his articles on the subject of "Ancient and Modern Arms." Having been an afore-time correspondent of his, I took occasion to thank him for his kind remembrance of me, and (presuming he would expect it) I made some comments upon various points embraced in his articles. These were made in a rather jocular and careless manner, and never designed for publication, else I had been more particular in my choice of words. I had no desire to publicly criticize his work, and did not ask him to explain (either publicly or privately) any points therein contained which to me appeared obscure. In his article No. 21 he has seen fit to publish an extract from my private letter. His only inspiration for doing this must have been a desire to parade me before your readers as a man lacking in "genius and the higher grades of mathematics." Possibly I deserve this ridicule, Mr. Editor, for being unable to grasp all the ideas presented by your learned contributor. In fact, I am beginning to suspect that I have but a poor comprehension of the English language. For instance, in concluding his article, No. 19, the doctor makes a "statement," and then rather jentilly invites "the owner of Old Pioneer" (or any other man) to take the affirmative of that statement, when he will be glad to reply, etc. Being of a combative disposition I felt inclined to take the affirmative, but, upon studying his statement to ascertain what the affirmative really meant, I confess I found myself at fault. In this dilemma I come to you, Mr. Editor, for assistance, and, to save you the trouble of looking up the doctor's statement, I will here quote it.

"In concluding this article, Mr. Editor, I have not yet stated the maximum working of a cannon, but will state, that the gun with a new projectile force are yet to be married that will throw a shot twenty-four miles, and if the owner of the Old Pioneer long range rifle, made by Remington & Son a score of years ago, will take the affirmative, I will gladly reply," etc. "Or the champion of small bullets, who lives way up on the Sacramento river, with a shop full of old rusty muzzle-loading guns," etc, and finally winds up by saying, "Let your voices be heard, gentlemen, from the Sierras to the sea."

Now, what does he want the owner of Old Pioneer (or any other man) to affirm? Does his statement mean that such a gun and force as he refers to will yet be developed, or does it mean that they never have been and, per force, never will be? In either case the doctor intimates that he is prepared to demolish the arguments of any person who will take the affirmative of a statement which he himself makes, and apparently in accordance with his convictions. There is little doubt of his ability to maintain his position on either side of a question if permitted to formulate the argument for the opposite side also, as instanced in his article No. 20, wherein he discusses the relative merits of cylinder and choke-bored guns, and puts the makers and advocates of choke bores in the position of saying that the guns are so made in order to obtain the maximum of friction, and thereby secure the proper upset of the bullet. As though, the makers of that style of rifle considered friction and upset indispensable in the make-up of a good shooting rifle. I have been a maker of rifles for thirty-eight years, mainly of the choke-bore variety. Have conversed with many other gun makers upon this topic, and do not remember ever having heard one of them advocate friction as a desirable feature in any gun. To a certain extent it cannot be avoided. The best that can be done is to reduce it to its minimum, and this, I try to do by the very means which the doctor most condemns; namely, by giving to the inside of the gun a moderately coarse finish rather than the extremely high polish which he so strongly advocates. Most mechanics know that two pieces of metal may be so closely fitted to each other that when placed squarely in contact the air becomes excluded from between them, and it will require much force to slip one along the surface of the other, or to force them apart; also, that a metal pulley highly polished, will adhere better to a smooth-surfaced belt, than would the same pulley with a coarser finish on its surface. The same principle holds good in a rifle with a smooth and highly polished interior, and having a patched bullet perfectly fitted to this surface. The utter exclusion of air between the adjoining surfaces creates a tendency to stick (one to the other). I get best results from a coarser grade of finish, and, with me, it is no longer a question why? The idea of a continuous upsetting of the bullet from breech to muzzle of gun may have been entertained by some rifle makers, but the doctor is hardly fair in attributing such belief to all of them. In my opinion, the ordinary long-range bullet will be as effectually upset in a 6-inch barrel as in one of 36 inches, and that, too, without regard to inside polish of barrel. There are several other points raised by the doctor in his articles, and quite unmanly disposed of, which, to my mind, could yet be discussed with advantage to the science (or practice) of gunnery. But as I have no desire to play the role of critic, I will close by suggesting to the doctor that he should brush up his common arithmetic a little. For I noticed that in his article No. 21, after making one correction of the footing of the strings made with his cylinder-bored pet, he still makes the aggregate three-eighths (3/8) of an inch longer than it should be. He also refers to two occasions when he had made strings of 10 shots aggregating under 4 inches, but immediately following he gives the measurements of them respectively as 4 1/4 and 4 1/2 inches. Now I apprehend that this is not as the doctor would have it, and I can only account for this discrepancy by the supposition that he did his figuring by algebra, or some other high grade of mathematics. WILCOX GUNMAKER.

Wilcox, Penn., February 28th.

## At Harbor View.

The Eintracht Rifle Club met at this range on Sunday to hold their regular monthly medal match. Twenty-seven members faced the pitiless storm, which speaks well for their enthusiasm. Out of the list we have selected the following score as standing the highest:

Fred Kubis, Champion Medal	391	Schubert	256
Stamf	245	Schwartz	255
Rinke, First Class Medal	345	Hagerup	275
Klufe	313	Schneck, Third Class Medal	304
H. Gumbel, Second Class Medal	334	Salzman	293
G. Becker	293	Kruger	265
Hartmannsen, Last Best Shot	24	Leu	283
Hugs	209	Wolf	190
Streuter	312		

There are no end of matches on hand and in prospect. In some the time is the only thing not definitely fixed.

At Shell Mound.

Notwithstanding the extreme inclemency of the weather on Sunday, our gallant riflemen, both civil and military, faced the storm at Harbor View and Shell Mound, and considering the disadvantages under which they labored, did some very creditable work.

Table showing scores for A. T. Fields, N. T. Fields, Jas. Treadwell, L. R. Townsend, and Aggregate.

At the same time and place Battery B, of Second Artillery, had their regular company shoot, and making the same allowance for the weather in their case, as above, their shooting also was quite creditable.

Table showing scores for Private Nolte, Sergeant Beatty, Lieutenant Sims, Private Darcy, and Private Cummings.

Colonel Ranlett end a portion of the battalion, also facing the storm, were out for practice, and, taken all round, made the best shooting of the day.

This is good shooting for the day, and gives each a good percentage. Taken in rotation, as named, the percentage will be 83, 90, 87, 84.

In qualifying for the match with the Police Team, Kellogg made a grand score, considering the inconvenience of shooting at the 500-yard range. He was the only one who tried that range.

Kellogg, 200 yards, 45, 47; 500 yards, 44, 45. This is a total of 181 out of a possible 200, or 90 1/2 per cent.

It was the intention of Company C, First Infantry, to have had their regular medal shoot on Sunday, but as they could not use the 500-yard range they postponed the contest until to-morrow.

The third competition between the Field and Staff and the companies of the battalion will also take place to-morrow.

Matches.

The California Schuetzen Club, the most distinguished of our citizen clubs, will have a grand gala day at Alameda Schuetzen Park to-morrow. A large attendance is expected.

Since writing the above we have received the programme of the day. There will be thirty money prizes given altogether; the highest \$25, the lowest \$1.50, the first and last bull's-eye in forenoon and afternoon \$4 each.

Lieutenant Fred Kuhls, president of the Eintracht Rifle Club, is out with a challenge against any rifleman who dares meet him under certain conditions. The Lieutenant, who is known as one of our leading shots, and a great bull's-eye man with military rifle at the ring target, 200 yards distance, is willing to meet any man who is willing to accept his terms.

On Sunday, 30th inst., Company C, Fusiliers, of Second Artillery, and Company C (the Nationals) of First Infantry, will have a match at Shell Mound. The conditions are 25 men in each team, 200 yards, 10 shots each.

We also acknowledge Capt. Siebe's card of invitation for the Thirteenth Annual Picnic of the Bremervoerde Verein at Shell Mound to-morrow. There will be shooting, dancing, prize-rolling and all sorts of fun.

The match at the Presidio, mentioned last week to have taken place last Saturday, was postponed until to-day, when, according to programme published, the Silver cup will be again contended for.

Battery B of Second Artillery, and Company B of First Infantry are also anxious to test their superiority. All that remains is to arrange the details for a match between them.

The match between the Police Team and Fifth Infantry is all arranged. The date is fixed for Sunday, 23d inst. This is expected to be a close and exciting contest.

The Directors of the National Rifle Association met in New York on the 4th inst. Col. John Ward was elected Secretary. A Finance Committee, consisting of Col. J. H. Cowperthwaite, Major Ackerman and Major Fincke, was appointed, as was also a Range Committee composed of Col. Joseph G. Story, Gen. Charles H. Robbins and Capt. C. L. Zahinski.

THE GUN.

International Gun Trials.

The Turf, Field and Farm announces a series of gun trials to take place on the grounds of the Carteret Gun Club, Bergen Point, N. J., beginning on Thursday, April 3d, at 10 A. M., the entries for which will close March 25th.

Both barrels must be loaded and at full cock each time the gun is fired. The guns will be shot in order drawn by lot, using a tripod muzzle-rest; each competitor to be allowed four shots from each barrel, and to have the privilege to reject one target.

Table showing various metrics for gun trials: Pattern, Penetration, Evenness of distribution in charge, Breech action, Locks strength, Quality of barrels, Workmanship, Poise, Total.

The following gentlemen have been invited to act as judges: Prof. A. M. Meyer, Dr. Wm. Crenshaw, T. C. Abbott, John McFarlane, Wm. Hoey, F. P. Sands, and Col. H. G. Litchfield, and Maj. Geo. Shorkey of the United States Army.

Analytic Scoring.

Some years ago we endeavored to obtain a change in the scores kept at pigeon matches, and drew up something of the subjoined form. The total number of birds killed, according to the old form, gives us the winners of the prizes, it is true, but it gives us no information of the true character of the birds, which after all determines the true character of each man's shooting.

Table for Analytic Scoring with columns for Name, Number of Trap, Tailors, Indifiers, Quarterers, Tailors, Indifiers, Quarterers, Total, Killed, Total.

In sending us the analysis, Dr. Knowles made the accompanying remarks which, we think, will be interesting to all. He says: "The unequal distribution of the traps amongst the different shooters, which depended wholly upon chance and the large percentage of tail birds, are especially noticeable."

Notice.

In another column will be found the advertisement of the Messrs. Pierce, 969 Broadway, Oakland. In hardware for houses, and implements for gardens, the firm claim to have the finest assortment in the State, and a personal inspection we made this week of the stock seems to confirm their claim.

The firm are the sole agents on this coast for the Ligoweky Clay Pigeons, of which they have an immense stock, and which they sell to clubs at \$30 a thousand.

The Slade-Maskey match is fixed for Sunday the 23d inst., one week from to-morrow, most probably at the Oakland Trotting Park. The conditions of the match do not bar any man from entering, except the champion Robinson and Lambert, although we cannot hear of any third man being so disposed.

The California Gun Club will not have their medal shoot until Sunday, 30th inst.

Straight Stock, a prominent writer in the eastern papers, speaking of the proper load for guns, says: "The term 'express' would hardly apply to a 40-90-500 cartridge. The 500-grain bullet might be best for the grizzly bear (grizzly bear hunters are rather scarce), but I think that 300 grains of lead in the right place is better than 500 grains somewhere else, and it is large enough for any game in the United States."

Another writer, speaking of loading for clay pigeons, says: I use a Lefever hammerless gun, 10-bore, full choked, weight, 9 1/2 pounds. I always use paper abella. For glass balls I use 3/4 drachms of F. F. Hazard or No. 3 ducking powder, two No. 9 pink edge wads over powder, 1 1/2 ounces No. 9 chilled shot, card wad over shot.

From all parts of the State we hear pleasant tidings of the rapid increase of deer. This certainly is owing to our wise laws of preservation. At Storm's ranch, a very public thoroughfare near Nevada and Grass Valley, a dozen or more have been seen lately, some of which, the narrator says, were the largest he ever saw.

At the same time, we regret to hear of violations of the game laws from all parts of the State where birds are concerned. Two-thirds of those owning guns seem determined to be vagabond poachers. From Butte county word comes to us that while hunters generally spare the quail, they are exterminating the doves, the close season for which commenced 1st January and will continue to 1st June.

The Alameda County Club have accepted the challenge from the gun club of San Francisco to shoot their second match for the silver cup presented by the Messrs. Pierce of Oakland. The time of the match is definitely fixed for the 22d instant, a week from to-day.

Last year we had a tale of several hundred wild ducks going through a broken pane of glass in one of the grain warehouses of Chico, and falling victims to their rapacity. We remarked at the time that going through a broken pane of glass in the window was rather a shrewd thing on the part of the birds, and something we could not quite understand.

The Kansas City Journal remarks: "If other cities are equally supplied, the number of hunters in the field must amount to an army, and the slaughter going on must be immense. No country can stand such a drain as is now going on, and unless more stringent measures are taken for the protection of game in the west all kinds must soon be extinguished. Too little attention is paid to game laws, and more stringent ones should be enacted."

As we have already stated, the Tehama County Gun Club will hold a grand pigeon shoot on St. Patrick's day, 17th inst. The prizes are large and the tournament open to all. We hope some of our crack shots will be present, but we doubt whether Frank Bassford, Frank Maskey or Golcher, Sr., will venture an appearance in that district.

The weather last Saturday and Sunday interfered with the trap shooting more than it did with the rifle engagements, and consequently several matches appointed for those days were necessarily postponed until to-day and to-morrow.

A writer in Hygiene Practique states that boots and shoes may be rendered waterproof by soaking them for some hours in thick soap water. The compound forms a fatty acid within the leather, and makes it impervious to water.

It is said that the last cold blizzard in southern Oregon killed thousands of robins and blue-jays, which usually winter in that latitude with safety. The birds have had no such experience since 1862. We can stand the loss of the squaking blue-jays, but the loss of the useful robins is another thing.

The first monthly shoot of the Pacific Gun Club will be held at Bird's Point, Alameda, to-morrow, Sunday, March 16th, 10 A. M. Members and visitors will please take 9:30 Narrow Gauge boat from San Francisco.

On Whidby's Island, in Puget's Sound, are found numbers of white deer. Scarcely a season passes without two or three being killed, and that is the only place in the territory, so far as known, that they have been seen.

the chances of the various stables, and confident prognostics we seldom indulge in, either written or oral. Not emulous, therefore, to acquire renown as a prophet, at no stage will any "plumping" be undertaken, and still we have no hesitation in predicting that the coming meeting will be superior to any of its predecessors. By turning to the list of entries in the stakes and purses, those who have the least acquaintance with turf sports will not require additional proof of the correctness of the assumption; those who do not possess the requisite knowledge can feel assured that never before in California has there been such a brilliant array of young aspirants for turf honors. The great breeding farms of the State show in full force, and outside of these nurseries of flyers are some that may be troublesome competitors. The prospects of an extraordinarily good meeting are so generally acknowledged that already there is more talk about it than is usually the case when the meeting is close at hand, and guided by this general and absorbing interest, we hazard the prophecy that more people will assemble on the Bay District Course on the racing days than have been seen on a track for many years. Fortunately the means of conveyance are adequate, no matter how many thousands desire to go, and the accommodations on the grounds will ensure their comfort.

#### Race Meeting—Oakland Trotting Park.

The P. C. B. H. meeting closes on April 19th; the following Saturday, April 26th, another opens on the Oakland Trotting Park. Thus there will be time enough for the horses to recover from the tasks finished, with renewed energy for those that are to come. There are six days' racing on the programme with an aggregate of thirteen stakes and purses. These are well arranged so as to give all ages a good chance and with varying distances to add to the interest. It is unnecessary to recapitulate what appears in the advertisement as that gives full information, and the inducements to owners to make engagements are also apparent.

It is virtually a series of races at home, the horses being practically on the ground when the distance to be overcome is the short route between the two parks. The date of closing is March 28th, and by that time trainers will be enabled to give a shrewd guess where to place their horses and colts. The lessee, M. M. Allen, has had so many years experience in all pertaining to racing that the track will be in prime condition, and the details carried out in a satisfactory manner. We anticipate a long list of entries.

#### The May D. Stake.

A letter from William Appleby brings the intelligence that the Sonoma and Marin Associations have sent Mr. Judson, the owner of May D., \$375, which is the aggregate of the stakes and added money in the race which the mare won at Petaluma at the last fair. We felt positive that the Association was not at fault in the matter, and when convinced that Mr. Judson was entitled to the amount, it would be paid. The members we have met of the Association are fair-minded, liberal men, and had they not been led astray by a man who was considered competent to advise, there never would have been any trouble in relation to the matter. It is safe to assert that if Donathan had appealed to the Directors the fine imposed on him would have been remitted. It is not likely that they will be led into these mistakes hereafter, and those who determined not to take the chances of similar treatment in the future will change their views when they learn of the action. We are much pleased that it has been settled satisfactorily to the owner of May D., as it also re-establishes a confidence in the Sonoma and Marin Association which was shaken by the rulings at the last fair.

#### Elaine's Twins.

It was altogether too bad that Elaine lost her foals. We cannot recall an instance when sire and dam had as fast a record. Smuggler, Phallas, Jerome Eddy and Director are the only stallions with a faster record than Piedmont, and there are so few mares that have a lower mark than Elaine, that without other data than that which memory supplies, it is altogether likely that the twins were entitled to the first place in this respect. It is singular that dual foals at a birth should be so certain to die. Probably in ninety-five cases in a hundred one or both are fated, and the only instance that has come under personal observation where both lived was the Albert W. foals owned by H. Scott. In that case it was fortunate that there was a man in attendance who knew what to do, as without proper care it is nearly certain that there would have been the usual fatality. The best care, however, does not succeed in averting the tendency to loss of one or both, and hence it is unfortunate that there are cases of double conception. Especially so from parents of the stamp of Piedmont and Elaine.

#### Racing, Trotting and Pacing—Capital Turf Club.

Still the games go on. Three days after the Oakland Meeting comes to an end that of the Capital Turf Club at Sacramento begins. Again it is only a question of a few hours to journey from Oakland to Sacramento, and the railway station is convenient to both tracks. It is well worth a long journey to visit the capital city in the merry month of May, without other enticement than the beauty of the place at that enchanting season, and when to this is added the attractions of the race-course the cup of enjoyment is well filled. It is a very pleasing bill that is offered, as in the fine days there is an opportunity to witness all of the fast gait of the horses, running, trotting and pacing being duly provided for. The entries close on April 5th, and as the conditions are fully set forth in the advertisement, there is no necessity for rehearsal at this time. That there will be a full response is certain, as the meetings of this club are always popular, and by the date fixed, May 6th, the new track will be in prime shape.

#### State Fair Trotting Entries.

The published list of entries in the trotting purses for colts at the State Fair show that quite a number took the hazard of a chance, and the liberality of the Association has elicited a correspondingly liberal response. Eleven in the three-year-old, ten in the purse for those a year older, and though the youngest class is restricted to five, the aggregate is so satisfactory that the wisdom of offering these large purses for trotting colts is fully vindicated.

That the running did not fill is due, in a measure, to the greater uncertainty attending the training of gallopers, the chances of going wrong being much increased, and a forfeit of \$50 too much for the amount to be won. Then again, there was an uncertainty about what rules would govern, not recognizing the fact that the code in force at the time of making the entry would obtain, unless there was a specific condition to the contrary.

#### The Stockton Purses.

Owing to the advertisement not being in the number of the *Breeder and Sportsman* which laid on our home desk there was a mistake made in stating that the closing day was the same as those of the State Agricultural Society. Reference to the advertisement in the same number, however, showed that it was wrong, and that to-day, March 15th, is the correct date. By again consulting the paper of last week the conditions will be learned. Letters plainly postmarked to-day will make the entry valid.

#### Speed Programme State Fair.

The speed programme of the California State Agricultural Society came too late for extended comments this week. That it will be found in the main satisfactory we are inclined to think, from a hasty glance of the copy, as all the classes appear to be provided for. Hereafter we will give a thorough analysis, as so much depends on this programme for the government of the District Fairs.

#### State Fair Speed Programme.

At the meeting of the State Board of Agriculture last Wednesday evening, the following speed programme for 1884 was submitted and adopted. The purses and added money foot up \$16,650.

##### First Day, September 11th—Trotting.

- No. 1.—Occident Stake. Closed in 1882 with 30 nominations.  
No. 2.—Purse \$1,000; 3-minute class.  
No. 3.—Pacing; purse \$1,000; 2:25 class.

##### Second Day, September 12th—Running.

- No. 4.—Introduction Stake, for two-year-olds; \$25 entrance, \$10 forfeit, \$200 added; \$50 to second horse, third to save stake; three-quarters of a mile dash.  
No. 5.—California Derby Stake, for three-year-olds; dash of one and a half miles. Closed in 1882 with 16 nominations.  
No. 6.—Del Paso Stake, for all ages; \$50 entrance, \$15 forfeit, \$200 added; \$75 to the second, third to save stake; three-quarter mile heats.  
No. 7.—Selling purse \$200; entrance free; second horse \$50. Fixed valuation \$1,000, two pounds off for each \$100 below, and two pounds added for each \$100 above fixed value. Dash of one mile and an eighth.

##### Third Day, September 13th—Trotting.

- No. 8.—Purse \$1,000, for four-year-olds. Closed March 10th, 1884, with ten entries.  
No. 9.—The Annual Two-year-old Trotting Stake. Closed January 1st, with 21 nominations.  
No. 10.—Purse \$1,200; 2:27 class.

##### Fourth Day, September 15th—Running.

- No. 11.—Maturity Stake; dash of 3 miles. Closed in 1883 with four nominations.  
No. 12.—Premium Stake, for all ages; \$25 entrance, \$10 forfeit, \$200 added, of which \$50 to the second, third to save stake; dash of three-quarter mile.  
No. 13.—California Annual Stake, for two-year-olds. Closed in 1883 with 19 nominations.  
No. 14.—Free Handicap Stake; \$50 entrance, \$25 forfeit, \$15 declaration, \$350 added, \$75 to second, third to save stake; dash 2½ miles. Weights announced September 5th; declarations to be made by 8 P. M., September 8th.  
No. 15.—Free purse \$300, for all ages; \$50 to second, \$25 to third. One mile and repeat.

##### Fifth Day, September 16th—Trotting.

No. 16.—Purse \$1,000; for three-year-olds. Closed March 10th, 1884, with 11 entries.

No. 17.—Purse \$1,200; 2:40 class.

##### Sixth Day, September 17th—Running.

No. 18.—Orange Stake, for two-year-old fillies; \$25 entrance, \$10 forfeit, \$150 added; \$50 to the second horse; dash of five-eighths mile.

No. 19.—Breeders' Stake for three-year-olds; dash of one and one-half miles. Closed in 1883 with 17 nominations.

No. 20.—Selling purse \$250; entrance free; for all ages; \$50 to the second horse; dash of 1½ miles. Fixed valuation \$1,000, two pounds off for each \$100 below, and two pounds added for each \$100 above, fixed value.

No. 21.—Free purse \$400, of which \$100 to second and \$50 to third; for all ages; one and one-half mile and repeat.

##### Seventh Day, September 18th—Trotting.

No. 22.—Purse \$1,200; 2:25 class.

No. 23.—Purse \$1,200; 2:30 class.

##### Eighth Day, September 19th—Running.

No. 24.—Sunny Slope Stake, for two-year-olds, \$50 each \$10 forfeit, \$200 added; \$75 to second, third to save stake dash of one mile. Winner of ¾ mile dash on second day penalized five pounds; of California annual stake on fourth day, five pounds, of both, ten pounds.

No. 25.—Shenandoah Stake, for three-year-olds, \$50 entrance, \$15 forfeit, \$250 added; \$75 for second, third to save stake; dash of 1½ miles. Winner of the California Derby on the second day penalized five pounds; of the Breeders' Stake on the sixth day, five pounds; of both, ten pounds.

No. 26.—Nighthawk Stake, for all ages; \$50 entrance, \$15 forfeit, \$200 added; second horse \$75, third \$50. If the best time in the State (1:41½) is beaten, \$200 additional will be added, and if Nighthawk's time (1:42½) is beaten, stake to be named after winner.

No. 27.—Pacific Coast Handicap, \$100 entrance, \$50 forfeit, \$20 declaration, \$400 added, of which \$150 to second, \$100 to third; dash of three miles. Weights to be announced September 16th; declarations to be made September 17th, by 8 P. M.

##### Ninth Day, September 20th—Trotting.

No. 28.—Purse \$1,000, for two-year-olds. Closed March 10th, 1884, with five entries.

No. 29.—Purse, \$1,500; free for all. Director to wagon.

## BILLIARDS.

The coming "Parisian Pool" Tournament is attracting such attention that a description of the game and the board on which it is played is apropos. The latter, like the Morris Patent, has a brass plate which permits the ball to leave the head of the table to that of the board which extends the entire length of the short rail and is nine inches deep. On the surface of this board are distributed twenty-five holes in two rows, each cup or hole being numbered and situated so that a ball can be driven to a cushion and made to return, with a true stroke, of course, to any particular one without touching and being thrown out of direction by another. It is in the happy distribution of these numbered cups that the inventor, Mr. Emmanuel Brunswick deserves credit, as he has overcome the evil of the chance spots so prevalent in the other patents of this kind. This being a new game, certain rules to govern the players were adopted after mature consideration as to the necessities of the play. The tournament to be held is simply to arrive at a conclusion as to who may claim the palm as first in the science of this interesting game. The rules governing the tournament will be much like those of Pin Pool, thirty-one being the number played for to win. Any player making more than that will be declared "hursted."

Morris, in reply to a letter from Thomas Foley, the veteran billiard manager of Chicago, asking his views on the Sexton Classification System, and his intentions in regard to entering in the proposed tournament, has answered his approval of the system, and said that he would enter if the management would allow those players who happened to be away from Chicago at the time their fare to and from that city. It is customary, and Morris says that in both the challenges he issued a short time since he offered to allow his opponent \$300 for traveling expenses.

A. B. Cole and C. Montgomery having made a tie in the Ball Pool raffle for \$100, which took place last Saturday afternoon, wisely concluded to divide the prize. On Wednesday the second hundred at the Pin Pool table was won by Charles O'Neil, who was fortunate enough to shake three sixes. As usual, dame fortune smiled upon the holder of but a solitary chance, leaving the possessors of six and eight chances out of 67 in the raffle out in the cold.

Benjamin Saylor and J. F. B. McCleery are to come against each other for the fourth time. The match will take place, and inaugurate the elegant parlors to be opened this evening by the Saylor Brothers. This game, though only spoken of as an exhibition of fine playing will no doubt be very interesting, as Professor McCleery has never been in better condition to make the score, even with his younger opponent.

Last Wednesday evening the Grand Army of the Republic, represented by delegates from the Lincoln, Garfield, Meade, and Thomas Posts met, to make arrangements about bringing to a successful issue the proposed billiard exhibition. It was decided that April 19th would be the best evening, and that a general admission of one dollar would be charged to enter the Metropolitan Temple on that evening.

It is probable that Schaefer and Slosson will be matched to play a five-nights' contest, in Central Music Hall, Chicago, upon the return of Schaefer from abroad. New York would turn out en masse for the privilege of witnessing such a contest, because Slosson has been ostracized for the past two years, and both have shown great form and improvement in play during that time.

The entries for the Detroit Pool tournament, which will begin March 19th, are Malone, Frey, King, Sutton, Manning, Knight, Lambert, Dankleman, Leonard, Burleigh, and Bes-sunger. Mr. Jas. Kelly will officiate as referee. The new championship rules will be enforced by the Messrs. Armstrong Brothers.

In her morning mail, the other day, Mme. Patti found a circular sent by one of our local and enterprising professors at billiards, soliciting the pleasure of teaching her that game. It is a well-known fact that the diva is quite an expert.

Daly is traveling about, and was last heard of in Naples, where he had been dangerously ill with gastric fever, but through that great medicine, a faithful wife, he was so far restored as to prepare for a direct return to home.

Sexton is said to have declared his preference for the pin-pion's game. He never did like the balk-line. Reason? To use his own words, "because I can't win at it."

## HERD AND SWINE.

### Test of Cooked and Uncooked Food for Swine.

In January, 1883, Messrs. D. R. Sperry & Co. of Batavia, Ill. offered a prize of \$50 for the best test in feeding pigs for three months on cooked and uncooked food. It was understood that the award would be made by the Illinois State Board of Agriculture, full particulars to be forwarded to them by the parties competing for the prize. For some reason, however, they did not take charge of the matter, and the award was made by Messrs. D. R. Sperry & Co. to Mr. H. Ginsback of Le Mars, Iowa, who gives the following particulars in reference to the test:

I put ten hogs in each of two pens. They were all barrows, between five and six months old. I put them in on January 15th, all in one stable, a partition between them. I send the city weigher's tickets, which show that the pigs fed on cooked food weighed, at the commencement of the test, January 15th, 1883, 860 pounds, and those fed on uncooked food, 960 pounds. April 14th, at the close of the test, those fed on cooked food weighed 2,300 pounds, and the others 1,620 pounds. I fed of cooked food 3,535 pounds, and of uncooked food 4,005 pounds. The feed was corn meal, bran, and shorts, mixed in about equal parts, and was all weighed correctly. The hogs were about the same age and size. Those fed on uncooked food were heavier at the commencement than those fed on cooked food, but the latter soon went far above the former. I could see the difference after they were in about four weeks. From January 15th to March 1st I let the water boil in the kettle, then put the feed in and boiled it from eight to ten minutes. I had to stir it to prevent the feed burning; then I dumped it into a barrel, and covered it and let it stand about twelve hours. After March 15th I boiled the water in the kettle, and then poured it on the meal in the barrel, and, as before, let it stand twelve hours. I think the first way is the best, but the latter the easiest. The fuel I burned was cobs and slack coal. I did not test it, but I think the cobs from the corn would cook the feed if two or three kettle-full were boiled in succession, so as not to let the kettle get cold.

I am glad that I have made the test, so I can see at least what is made by cooking feed.

This experiment presents some remarkable results. The ten pigs fed on cooked food gained 1,440 pounds in 89 days, on 3,535 pounds of corn meal, bran and shorts. This is one pound gain in live weight to 2.42 pounds of food or equal to a gain of 23 pounds to a bushel, if we consider the food equal to corn meal.

If there is no error in this statement, it is the largest gain to the amount of food on record. It has heretofore been considered a maximum result, in the best method of cooking, to make a gain of 16 pounds to the bushel, or a gain of one pound live weight from 3.5 pounds of food. These ten pigs average a gain of 1.6 pounds in live weight per day on 3.97 pounds of food.

As a method of cooking is given, we must say that it would not be considered very thorough. Eight to ten minutes is not long enough to burst all the grains of starch in a mass of corn meal, and when the meal was put into the barrel, and boiling water poured over it, it did not raise the temperature of the meal above 110 degrees after it was all stirred together, and this would be pretty poor cooking. It would warm it so as to ferment somewhat rapidly, and thus soften and render it more digestible. If there is no error in these figures, as we have them, it is certainly the most remarkable result yet reached. The experiment should be repeated with great care for accuracy in details, and if such a result can be reached as a reliable standard, then the profits of pig-feeding will be established in spite of an adverse market.

The other ten pigs fed upon the same kind of food uncooked came up to the ordinary standard—they gained 660 pounds on 4,005 pounds of food; this is one pound gain to a little over six pounds of food, or 9 1-3 pounds to the bushel. This is a fair result, but is only two-fifths the gain of the other pen.—*Live Stock Journal*.

### High-Grade Swine for Profit.

Many farmers are of opinion that it is more profitable to raise and fatten high-grade hogs than the full-bred. Except in the largest breeds, like the Great Yorkshire and the Red Jersey, or Duroc, and the Berkshire—which latter is wanted pure for choice hams and bacon—this may be so; because the lesser breeds, like the Suffolk, Prince Albert, Small Yorkshire, and Essex, cannot usually be grown large enough in eight to ten months for salting and barreling, for which purpose, owing to the fatness of their pork, they are so suitable. The hogs of small breeds are admirable for crossing on good-sized common sows. The produce of these are hardy, grow rapidly, and fatten kindly. Well fed and cared for, they may attain about 300 pounds weight, or a little more or less, at the age of nine to ten months. This is now thought the most profitable weight for slaughter, as a general rule, although there are instances where larger hogs are wanted for salting and barreling for a particular purpose. But surely the pork of the smaller ones is sweetest and most tender. Boil this after salting, let it stand in a cool place over night, and then set it on to the breakfast table the next morning. Cut it in thin flakes, and spread on thin slices of bread, and for delicacy and sweetness it is not inferior to good butter. Not so the pork of the larger breeds, which are unfit to slaughter till sixteen to eighteen months old. This is, coarse and rank, in comparison with the smaller sort.—*Live Stock Journal*.

The *Sydney Mail* says: "The mail steamer City of New York brought to this colony ninety-seven American sheep. Including this shipment, since last January, no fewer than 537 of such sheep have been landed on these shores. In February, twenty-four came, and these were followed closely by a lot consisting of about a dozen. These realized very high prices, being bought for the greater part by breeders who wished to try an experiment. The results of the sale returns were quickly telegraphed to the States, and flock-owners there immediately jumped to the conclusion that a great market had been opened." The *Mail* compares this to sending coals to Newcastle, pointing out that the numerous wool exhibitions must have taught Americans that there are no better Merinos than those of Australian breeding. It would also appear, from American papers, that in order to push the Australian trade, American breeders are seriously weakening their own stand-flocks. The *Mail*, in conclusion, says: "If the experiments made in crossing, with a view of increasing the weight of fleece without lessening quality, prove successful, it is probable that there will be a slight demand for American rams of the best quality; but in the meanwhile the market must remain slack, and we counsel our friends across the water to wait further advice before again trying it."

### Testing Individual Cows.

In this time of unusual interest in improvement of dairy cows, when tests are made for extraordinary yields of milk and butter, the owner of common herds should not neglect to do his part in improving the dairy.

In listening to the remarkable stories now afloat of the productions of certain Jerseys, people are apt to forget that a great producer may be found in many herds supposed to be very common. Dairymen know so little of their own cows, except what they learn by massing the milk of the whole herd together; in delivering the milk at the factory, the cows are all lumped off together; no effort is made to find out individual excellence or individual worthlessness. There are few herds of twenty cows that do not contain three to five worthless cows that do not pay their keeping, although having the same care and expense bestowed upon them as the rest. We have often greatly wondered at the absolute neglect of the general dairyman to learn the individual character of his cows. If he knows of a cow that yields, through the season, a large amount of milk, he holds her of very exceptional value, and still is not prompted to take the small amount of labor required to learn the yield of each cow in the herd.

With a pair of accurate spring scales (which most dairymen have) hung in the stable, the milk of each cow may be hung on and weighed in a moment. A small hook is kept with the name or number of each cow in it, against which the weight of the milk is placed. This weighing is done one day in each week, say on Wednesday. These several weighings being added together, and divided by the number of weighings, give a sufficiently accurate average yield of milk through the season. And if the dairy is kept wholly for quantity, being delivered at the factory for cheese, this will be all that is required.

Who does not believe that after this simple test had been made in a dairy of ten cows some would not be for sale, and some would be much better appreciated? In a dairy of twenty cows it has often been found that the profit was all paid by seven or eight cows, three to five being kept at a constant loss, amounting sometimes to the whole profit on two of the best cows. These poor cows must be got rid of. It would be better to give them away than to keep them. If they have been in the herd three years they have eaten their heads off.

The dairyman may find six or seven cows that are neither good nor bad. They do not pay much profit nor incur loss. Such cows may, perhaps, pay to test with better keeping. Sometimes the cows lack such liberal feeding as will show their best. But the preliminary to knowing what to do with a herd is to know what each cow produces. After testing his herd the dairyman will soon have a standard below which he will not keep a cow.

The above testing has been for simple quantity of milk, which would be all that is required if designed for the cheese factory only; but suppose the herd is kept for butter, or is used for butter for some four or five months, and the milk sent to the factory through the hottest part of the season?

It now becomes important to know the quality of the milk for butter. This test can only be made by churning the cream of each cow separately. The hulk of cream is no test. It will be a sufficient test to learn the particular quality of the milk of each cow by setting her milk for two or three days by itself, and then churning the cream by itself. The amount of milk set should be weighed. This test may be as well made two or three weeks after calving. A small churn is easily made by taking a small crock and making a dasher for it. Such cream will usually churn to butter in ten to fifteen minutes, so that the labor is not great. In this way you will get the actual richness of milk.

And when this test is made the dairyman will sometimes find the middling cow, that yields a moderate quantity of milk, the best cow in the herd for butter. This, of course, is not always the case. When this butter test is made the dairyman will know both the quantity and quality of the milk from each cow in his herd, and he can, without mistake, select those he wishes to keep and those he wishes to sell. And by such selections, and building up his herd with the best, he will soon find the profit doubled, or even trebled. Let not the dairyman wait to change the blood of his herd, but make the best of the blood he has. He will, of course, find it profitable to seek a full-blood sire of the breed he desires to cross on his selected herd, and then he will be able to perpetuate their good qualities.

### Hog Quinsy.

Reports of a troublesome disease among hogs have come from several localities lately, and from description of the symptoms the complaint is the same in all these cases, a species of quinsy. An experienced hog breeder discourses as follows to the *Reuo Gazette*, and there is no reasonable doubt that the trouble he mentions is the prevailing epidemic: I have had considerable to do with the disease; I have seen it over fifty times in our hands in Missouri, Illinois and Arkansas several years ago. Some people called it one thing and some another, but quinsy is, I think, the true name for it. The symptoms are a swelling in the throat, bunches will form about the tonsils, and I have seen hunches form behind the shoulders. The animal will wheeze and cough, a heavy fever sets in, and unless relieved soon is sure to die. I think it is epidemic, but the remedy which I have used with success is very simple. It is simply feeding the sick animal cracked grain, either barley or wheat, with charcoal mixed in the proportion of one-quarter in hulk. The hogs will readily eat it, and relief is almost immediate. I have seen them eat the charcoal without the grain, taking in chunks as large as my fist. I have used this simple remedy in over fifty instances, and never knew it to fail. The diseased animals should be kept in a dry place, on ground, which is just as well if not a little better than flooring. The charcoal may be mixed dry with the feed. It is also good to give hogs which show no signs of the disease. Another expert says that powdered sulphur will cure hog quinsy. He says to give about two ounces per day to hogs of a year and over, and half the amount to younger animals, mixed in their feed.

The expected departure of Wm. Donohue to ride F. T. Walton's horses in England attracts some little attention in turf circles. That it is a wise move on the part of the Plunger is more than evident, for at least one of his racers abroad, Girofle, will be greatly assisted by "Billy's" familiar form in his accustomed place once more. It is our opinion that in spite of all the talk of the hostility likely to be shown to Donohue from other jockeys in England, Girofle, if right, will do better under his guidance than she has yet shown in Albion, for if ever there was a hit of nervous, fretting horse-flesh, ill-suited to be the mount of every jockey willing to take "a leg up," she is one. But Donohue and Girofle were inseparably connected during the mare's career here in the same manner as Isaac Murphy and Checkmate, McLaughlin and Hindoo, Barrett and Parole, and others that could be named. —*Sportsman*.

## FISH.

### Salmon or Salmon Trout—An Angler's Theory.

EDITOR BREEDER AND SPORTSMAN:—Anglers are in high glee down here over the fishing prospects for the coming season. The creeks are all "booming," and it is claimed by the "knowing ones" that they will be full of trout in consequence. Am sorry to say that I don't feel so hopefully my experience is that there are very few, if any, real trout in this section, the fish called trout being nothing but young salmon, or salmon trout, as one of our local anglers persists in calling them. Whether there is such fish as salmon trout or not I am not sufficiently versed in fish lore to say, but certain it is that the salmon, so called, that come up the small coast streams in no wise resemble the salmon caught in the Columbia, Sacramento and San Joaquin rivers. On the contrary they are almost the very picture of the trout that inhabit the Truckee river, differing only in respect to thickness. Now it is from this salmon or salmon trout, as you please, that we get our supply of trout, and as very few of them have been permitted to pass the nets at the mouth of the Pajaro river for the past three or four years, and as ninety-nine out of every hundred that do succeed in evading the nets are killed with spears and other infernal contrivances before having an opportunity to deposit their spawn, it naturally follows that the supply of young salmon will be very light. Three years ago it was an easy matter to catch a nice string of these fish in a few hours in any of our small streams, but since the beginning of net fishing at the mouth of the river angling in this vicinity has been getting poorer each year. Last year I visited every stream in this section, and didn't catch as many as two dozen fish the entire season, and I am by no means a "slouch" at the business either. It being clear, then, to my mind, that the so-called salmon that come up here from the ocean and our trout are identical, I think they ought to be protected. The only way it can be done is for the Legislature to enact a law prohibiting the use of nets, traps, spears, etc., in any except navigable streams, both in and above tide water. A law of this kind would be of benefit to all, and would work a hardship to none except to a few mercenary fishermen, who have no interest in this country beyond that of filling their pockets with our coin. I would like for the Sportsmen's Club of California to take this matter under consideration. I mention that club more particularly because I have been informed that its members are enthusiastic anglers, and have and are still doing good work for the cause. If some gentleman connected with it will send me his address, with a promise to interest himself in the matter, I will send him a few specimens as soon as it is lawful to wet a line, and he will then be better able to judge as to the correctness of my theory. J. R. Gilroy, Cal., March 8th, 1884.

An interesting case in maintaining the Trout law of the State, has recently occurred at Napa. Our readers will recollect that a man named Anderson some two weeks ago was arrested, tried, convicted and fined \$50 for the violation of this law. The culprit was arrested through an association of private gentlemen of that district, who pay a man \$2.50 a day to patrol the Napa Valley district in search of such offenders. It appears there was some informality in Burrow's appointment made by the sheriff, and so the poaching culprit, Anderson, since his conviction, has charged him with personating an officer, battery and false imprisonment. The first two charges have been dismissed in the justice's court, but up to writing the third was still under investigation. Senator Spencer is defending the private agent, and the State Sportsman's Association is aiding the defence by every means in their power. The private association of Napa gentlemen, who instigated this movement against the systematic poaching which has so long disgraced their district, deserve every credit for their enterprise and firmness.

The *Martinez Gazette* informs us San Ramon creek is so full of suckers that numbers are caught with the hands. It also says, Mr. Frank Wehls has a dog which takes great delight in plunging into the stream and bringing out the fish with his paws, not jaws. If all this be true the fish must be veritable suckers, and it is to be regretted they are not more generally to be met with. We make no attempt to explain how the dog gets out of the water with his paws full of fish.

In a private letter recently received, we understand, shad have become very numerous in our waters, and that they are also of finer flavor than those in our southern waters. The transplantation of shad by our old commissioners has proved a grand success, and is an honor to their memories. All the present commissioners have done, or the majority, is to expend \$9,000 without results, and mortgage the State appropriation for a long time to come.

In the Big Meadows the Indians are reported not to have waited for the ice to disappear, but have been taking trout, with the thermometer down to zero. A fine chance for the white man's enjoyment and food when the season opens. Is it not time some change should be made governing the liberty of the red man to do as he pleases?

The Truckee papers say the ice in the river is fast disappearing, and the fishermen of that section, in consequence, are already going into camp. This information should stir up the Commissioners. If it did no other good, to make proper examination into the case would give them \$10 a day, anyhow.

The officers in the employ of the Commission have been active of late among the fishermen on the Sacramento river, and within ten days fourteen violators of the law have been arrested and convicted. The guilty parties were all Chinese, Greeks and Italians.

J. C. Frazier, of Placer county, will have charge of the State fish hatchery at Shesley's, the present season. A consignment of 50,000 trout eggs are expected to arrive in a few days from Cloud river, and other shipments are to follow.

The Walton Fishing Club of this city wisely postponed their opening party for the season from last Sunday until tomorrow. Members are requested to be at the wharf in good season.

United States Fish Commissioner Ellis is distributing from the National Fish Hatchery at Northville, Mich., 75,000,000 whitefish minnows for the chain of great lakes.

The *Reno Gazette* says: George D. Winters will plant 18,000 young eastern brook trout in Smoke creek, in a few days.

The Fish Commissioners will hold their regular monthly meeting at Sacramento next Monday.

**A Plea for the Ass.**

Devoted as you are to the horse and his achievements upon the turf and the road, the admission to your columns of a plea for the mule exhibited a degree of liberality which warrants the hope that you will do the same for the mule's progenitor, the ass.

Buffon, the father of modern natural history and the most eloquent writer of his day and nation, asserted that if the same loving labor which has been for ages bestowed upon the breeding and education of the horse had been devoted to the ass, the latter would have proved the equal, if not the superior of the former, in all those useful qualities for which both are so highly prized.

As the lion figures so prominently on the escutcheon of our old Mother England as typical of the attributes which have placed her in the forefront of nations, so ought the ass, as progenitor of the mule, to figure on the heraldic shield of Kentucky as the chief factor of the agricultural wealth of the great Blue-grass State.

Through a prejudice due to ignorance of the real nature of the animal, and altogether unfounded in fact, the unfortunate ass is held by a majority of civilized nations to be the emblem of indolence and stolid stupidity; but we should bear in mind that this false judgment is pronounced upon a creature degenerated and brutalized through long ages of a domesticity darkened by neglect and ill-usage. How different the wild ass! What a noble image of freedom he is made by the inspired poet who composed the book of Job!

"Who has sent out the wild ass free? or who has loosed the bonds of the wild ass?"  
 "Whose house I have made the wilderness, and the barren lands his dwellings."  
 "He scorneth the multitudes of the city, neither regardeth he the crying of the driver."  
 "The range of the mountains is his pasture, and he searcheth after every green thing."

There is neither poetical license nor exaggeration in this description of the poet, for it is fully confirmed by recent explorers of central Africa, who describe the wild ass as dwelling in the remotest recesses of the desert, and galloping daily twenty miles to water, and returning with the ease and almost swiftness of birds upon the wing, and so astute and wary as to defy the stratagems and pursuit of the most cunning hunters.

Xenophon, in his Anabasis, written more than two thousand years ago, tells of the great herds of wild asses ranging the plains of Mesopotamia, "so fleet that the horsemen could only overtake them by dividing themselves into relays, and succeeding each other in the chase." In our own time, Layard, who, while engaged in revealing to the world the buried secrets of ruined Ninevah, had rare opportunities of studying the habits of wild asses, describes them as "equal to the gazelle in fleetness, and to match them is a feat which only one or two of the most celebrated mares have been known to accomplish."

Sir John Chardin, in a narrative of his travels published in 1686, tells us that the wild asses of the Steppes of Asia, spirited, fleet and wary, were held by the Persians as the noblest objects of the chase, and that a superior breed of domesticated white asses was reserved for the exclusive use of the nobility and dignitaries of the state; and now in our day there is a noble variety of white asses bred near Mecca, in Arabia, so spirited and yet so gentle, so swift and yet so easy under the saddle, as to command such prices as to put them beyond the reach of all but the very wealthy. At the sale of the effects of a deceased pasha at Cairo in 1863, three of these Mecca-bred asses brought, under the hammer, fifteen hundred dollars each, but they could for days together cover eighty miles between sun and sun, without a stumble, and at a gallop as easy as the motion of a boat on smooth water.

In parts of the east, as in Syria, four distinct breeds of asses are recognized, and the pedigrees of the noblest of these are as carefully registered by the natives as are those of our own blood-horses.

With the very slight effort given to breeding asses in Kentucky they have been greatly increased in size, in some instances attaining nearly, if not quite, sixteen hands; but this breeding, like that of hogs and cattle, was for mere bulk, to the neglect of the more desirable qualities which we carefully cultivate in the horse. The concurrent testimony of the Bible, of such writers as Xenophon and Chardin, and of modern travelers in central Asia and Africa, certainly justifies the opinion of Buffon, that in a state of nature the ass is quite the equal of the horse, and that under similar treatment he would develop qualities equally valuable.

That diminutive variety of the ass known as the donkey, unfortunately so rare in North America, is of incalculable value where he is more numerous and better known. In those countries he is the friend and companion of the poor man and the partner of his toil, while he is the playmate and living hobby-horse of his children, and those who know him best cannot defend themselves from a kindly regard for him.

Who that has read the immortal work of Cervantes has not had his merriment checked by the homely pathos of poor Sancho's address to his donkey, when he advocates the government of his island and retires to private life: "Coming to Dapple, he embraced the quiet animal, gave him a loving kiss on the forehead, and with tears in his eyes, 'Come hither,' said he, 'my friend, thou faithful companion and fellow-sharer of my trials and miseries. When thee and I consorted together, and all my cares were but to mend thy furniture and feed thy little carcass, then happy were my days, my months and years. But since I forsook thee and clambered up the towers of ambition and pride, a thousand woes, a thousand torments and four thousand tribulations have worried my soul.'"

In the towns and villages of the east, and notably in Egypt, the small donkey supplies the place filled by the cars and the hacks of Christian cities, and there are but few travelers who have threaded the narrow and intricate, but picturesque, streets of Cairo on the backs of these jiggling, but easy-going and indefatigable little creatures, who do not retain them in kindly remembrance. Independent of his value as a beast of burden and a drudge, the donkey is actually good to eat, though few Christians are prepared to admit the edible excellence of his flesh as exceeding that of the ox. Xenophon extols it as resembling that of the red deer, but far more tender, juicy and palatable, and our modern hippophagians, growing so numerous in the capitals of Europe, concede the flesh of the mule to be much superior to that of the horse, and attribute this superiority to the mule's paternity.

Little does the unphilosophical feeder, who revolts at the idea of eating the flesh of an ass, know that when he is devouring with gusto the popular sausage of Bologna, and the yet more delicate saucisson of Aarles, that the excellence of both is due to the flesh of young donkeys which is their chief constituent.

Nor is it generally known that the diminutive donkey possesses a degree of combative courage which should give dignity to any creature, however humble.

To within a very few years back there existed at Paris the Queen of modern refinement, an institution as inhuman as disgraceful to modern civilization, called the Barriere-du-Combat, where on each recurring Sabbath a variety of animals, such as red deer, bears, wolves, and even donkeys, were baited by savage dogs, trained for the purpose; the only one of the victims to the inhuman sport which invariably came off victor, was a small donkey, who, while trotting rapidly around the arena, fought with teeth and hoofs with the courage and skill of a trained gladiator. In the combats in the wilderness between the stallions and the wild donkeys, the latter are described as invariably the victors, seizing their antagonists by the throat, and holding on with the tenacity of a vise until life is extinct.

In the "Zoo" at Cincinnati, the keeper proudly exhibits the skin of a lioness fairly killed in single combat by a small donkey belonging to that institution.—*F. G. S., in Turf, Field, and Farm.*

On the first day of the Croyden, England, March meeting, on the 4th, the Grand International Hurdle race was the principal feature on the cards. The distance was two miles and a quarter, over nine flights of hurdles. It had eleven starters, including Mr. Tom Cannon's American-bred horse Sachel, who, with a penalty of twelve pounds, incurred by winning the Sandown Grand Prize, carried 173 pounds. He ran a grand race, but was not quite equal to the occasion. Mr. W. Gregory's four-year-old Chicard, at 143 pounds, winning by four lengths, with Sachel second and Mr. J. L. Davis' five-year-old Freney, at 141 pounds, third.

The trotting stallion Poscora Hayward has been shipped to Humboldt county, where he will make the season in charge of W. H. E. Smith.

**MONMOUTH PARK.**

Long Branch, New Jersey,

The Following Stake is Now Open.

THE CHAMPION STALLION STAKES for 1885, for colts and fillies 1 to 2 years old (now yearlings), to be entered at the course by 1 o'clock P. M. on the day before the day appointed for the race, of \$250 each, with \$3,000 added by the Monmouth Park Association to a subscription of \$500 each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of his sire each to receive \$1,000; the third horse and the subscribing owner of his sire each to receive \$500; the winner to receive the stakes of horses entered for the race, and one-half of the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify the get of this stallion, if the subscription be paid; each nomination to be accompanied by a contract in the form subjoined, which, if not fulfilled punctually by the subscriber, may be transferred to and fulfilled by any owner of owners entering in the race the get of the stallion, and such owner or owners shall in that case be entitled to start and to the benefit accruing to the subscriber from first, second or third place in the race, and to recover from him the money contracted to be paid, if no benefit accrues; fifteen subscriptions to fill. Three-quarters of a mile.

**Form of Contract.**

In consideration of the money to be added by the Monmouth Park Association to the Champion Stallion Stakes for 1885, and in further consideration of the increased value given to the get of (my) stallion by the right of entry therein, which right of entry is not to be invalidated by (my) decease, (I) agree to pay to the Monmouth Park Association, or order, five hundred dollars on the first day of July, 1885, at its office in the city of New York.

The subscription of stallions to the above stakes will close and name on April 1st, 1884. Subscriptions to be addressed to J. H. Coster, Secretary Monmouth Park Association, Madison avenue and Twenty-seventh street, New York.

Mr. Lorillard continues his gift of \$5,000 to the Lorillard Stakes. The Champion Stallion Stakes and the Lorillard Stakes are intended to be permanent.

The Lorillard Stakes for 1886, with the following conditions, will close and name on August 15th, 1884.

The Lorillard Stakes for 1886, for three-year-olds, of \$500 each, h. f. or colts, to be declared by January 1st, 1886; or \$250 if declared by January 1st, 1886; or \$100 if declared by June 25th, 1886; with \$5,000 given by Mr. Pierre Lorillard; the Association to add \$1,000 for the second; the third to save his stake; horses foaled in the United States are not eligible for this stake unless sired in a foreign country, or by a stallion represented by subscription to the Champion Stallion Stakes for 1885. One mile and a half.

GEORGE L. LORILLARD, President.

J. H. COSTER, Secretary.

**STALLIONS THOROUGHBRED.**

**BELLE MEADE**

1884 STALLIONS. 1884

**BRAMBLE,**

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.

**ENQUIRER,**

The sire of McWhirter, Forinna, Harkaway, Falsetto, Blue Eyes, Pinefire, Getaway, W. P. Burch, etc.

**Imp. GREAT TOM,**

The sire of Gen. Harding, Thackeray, Swift, Tennyson, Trombone, Tarquin, etc.  
 And the grand Race-horse,

**LUKE BLACKBURN,**

By imp. Bonnie Scotland, dam Nevada, by Lexington.  
 Each of these horses will be bred to a limited number of approved mares, at

**\$100 - The Season - \$100**

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearlings, 49 in number, will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

W. G. HARDING,  
 Nashville, Tenn.

**The Thoroughbred Stallion**

**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington.  
 This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:32, at two years old), May D. (with a record of one and one-half miles in 2:26, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal.

Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or  
 W. L. APPELBY, Supt.,  
 Santa Clara, Cal.

P. O. Box 223.

**STALLIONS**

—AT—

**RANCHO DEL PASO.**

For the Season of 1884.

**Thoroughbreds.**

**LONGFIELD.**

Chestnut horse, by MONARCHIST, he by Lexington.  
 First dam, Dame Gourlay (Blue Gown), by Planet.  
 Second dam, Flora G., by Lexington.  
 Third dam, Fanny G., by imp. Margrave.  
 Fourth dam, Lances, by Lance.  
 Fifth dam, Aurora, by Aratus.  
 Sixth dam, Paragon, by imp. Buzzard.  
 Seventh dam, Indiana, by Columbus (son of imp. Pantaloon).  
 Eighth dam, Jane Hunt, by Hampton's Paragon.  
 Ninth dam, Moll, by imp. Figure.  
 Tenth dam, Slamerkin, by imp. Wildair.  
 Eleventh dam, imp. Cub Mare, by Cub.  
 Twelfth dam, Aruanabms' dam, by Second.  
 Thirteenth dam, by Starling.  
 Fourteenth dam, by Croft's Partner.  
 Fifteenth dam, by Greyhound.  
 At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, he by Lexington.  
 First dam, Flush, by Hiawatha.  
 Second dam, Fanny Bagg, by imp. Ambassador.  
 Third dam, Ida, by imp. Belshazzar.  
 Fourth dam, Madame Bosley, by Sir Richard Tonson.  
 Fifth dam, Nancy Nichol, by imp. Eagle.  
 Sixth dam, Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by Jolly Roger.  
 Twelfth dam, by imp. Partner.  
 Thirteenth dam, imp. Monkey.  
 Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.  
 At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN.  
 First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
 Second dam, by Webster's Kentucky Whip.  
 Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger.  
 At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Aldallah, son of Rysdyk's Hambletonian.  
 First dam, Emma Kinkead, by Consort, son of Cassins M. Clay.  
 Second dam, Ellie Dean, by Mambriro Chief.  
 Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
 At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER.  
 First dam, by Washington, he by Geo. M. Patchen.  
 Second dam, by Williamson's Belmont.  
 At \$50 the season, due at time of service.  
 The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.  
 John Mackey, Superintendent,  
 Sacramento, Cal.

**THOROUGHBRED STALLION**

**X X,**

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
 First dam, Columbia, by imported Bonnie Scotland.  
 Second dam, Young Fashion, by imported Monarch.  
 Third dam, Fashion, by imported Trustee.  
 Fourth dam, Bonnets of Blue, by Sir Charles.  
 Fifth dam, Reality, by Sir Archy.  
 Sixth dam, by imported Mealey.  
 Seventh dam, by imported Centinel.  
 Eighth dam, by Mark Anthony.  
 Ninth dam, by imported Janus.  
 Tenth dam, by imported Monkey.  
 Eleventh dam, by imported Silvereye.  
 Twelfth dam, by Spanker.  
 See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.  
 X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the grandam of Antelope. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwatta, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hoekling, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Saganora, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.  
 Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.  
 JOSEPH CAIRN SIMPSON,  
 Oakland or 508 Montgomery Street, San Francisco, Cal.

When litter has been properly churned, both as to time and temperature, says an expert, it becomes firm with very little working, and it is tenacious, but its most desirable state is waxy, when it is easily moulded into any shape, and may be drawn out a considerable length without breaking. It is then styled gilt-edge. It is only in this condition that litter possesses that rich nutty taste and smell, and shows up a rich golden yellow color which imparts so high a degree of pleasure in eating it, and which increases its value many fold. It is not necessary, when it smells sweet, to taste butter in judging it. The smooth, unctuous feel in rubbing a little between the finger and thumb expresses at once its rich quality; the nutty smell and rich aroma indicate a similar taste, and the bright, golden, glistening, cream-colored surface shows its height of cleanliness.

Many notice at this time of the year, says a dairymau, an unaccountably bitter taste in their cream. You feel that you have done your duty in keeping your cream vessels scalded, and have had a nice sweet place to keep it in. This bitter taste is produced by keeping your cream too long at a low temperature. It is claimed that the acid that produces this taste will not form when the cream is kept above 45 degrees; hence we often find our patrons' cream better, who think they are taking the best of care by keeping it "cold and sweet." The remedy, then, would be, as to temperature, to keep your cream a very little above 45 degrees at all times, if you wish to furnish the best cream.

The commissioners appointed to examine the swine industry of the United States report emphatically that there is no condition surrounding the industry that tends to propagate disease or render pork unhealthful. Examination has shown that the greatest care is taken in every department of packing, transportation, and that all stock-yards are fully and rigidly inspected. Hog cholera is not dangerous to human health, and the meat cannot be cured to deceive the most superficial examiner. Our pork is fully equal, if not superior to that of France or Germany. No general disease exists, and the occasional presence of trichinae is comparatively unimportant.

Notwithstanding low prices in England, Australian farmers are shipping grain in large quantities. In January, from Melbourne, Adelaide, Sydney and Queensland was shipped 420,000 bushels of wheat and 800 tons of flour. For corresponding period last year 40,000 bushels of wheat only were forwarded, though prices were then higher. This increase is significant.

Hens cannot make eggs out of nothing any more than your tailor can produce a suit of clothes from your shadow. To give good returns in eggs the fowls must have more than barely food enough to sustain life. Feed them liberally and remember that they are as fond of a variety as you are. Bones and oyster shells pounded fine supply a needed element for egg production.

In ancient times among the Slavonic tribes which inhabited the Steppes of Russia horse-stealing was considered such a crime that the punishment inflicted was loss of liberty for life and a confiscation of all the property of those found guilty. If such views were taken in modern times it might have a tendency to lessen such work.

Every farmer should grow his own grass seed as far as practicable, and thus avoid this channel for the introduction of foreign weeds. If you must buy grass seed select the very cleanest you can find even though you pay double for it. Better to put the money into keeping the weeds off the farm than to spend it in getting rid of them when introduced by using cheap seed.

### TRY AN ADVERTISEMENT IN THE BREEDER AND SPORTSMAN

## THE NEW ZEALAND Stud and Pedigree Stock Co. LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best hull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

### Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and beating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darriwell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

Field Trial Winners of America.

[CONTINUED FROM MARCH 9TH.]

Nebraska Field Trials.—Milford, Neb., September 30th to October 2d, 1880, under the auspices of the Nebraska State Sportsmen's Association. Run on prairie chickens and quails. Judges, B. E. B. Kennedy and Gen. R. R. Livingston.

All-Aged Stake.—Open to all setters and pointers. Ten entries—setters; 1st, Lizzie (Druid—Millie), English setter bitch, owned by George Waddington; 2d, St. Elmo (Pride of the Border—Jessie), English setter dog, owned by Dr. S. Fleet Speir; 3d, Dorr, Gordon setter dog, owned by Fred. A. Taft.

Pennsylvania Field Trials.—Held at Lancaster, Pa., October 26th-29th, 1883, under the management of the Pennsylvania State Field Trials Association.

All-Aged Stake.—For setters and pointers owned in the State of Pennsylvania; \$100 to first; \$50 to second; \$25 to third. Thirteen entries—twelve setters, one pointer: 1st, May Laverack (Thunder—Spot), black and white setter bitch, Snellenburg; Thunder (Pride of the Border—Fairy II), blue belton setter dog; Button (Bob—Fan), liver and white pointer dog—all owned by J. J. Snellenburg, and Belton III (Belton—Floss), black and tan setter dog, owned by I. R. Stayton—divided, race being unfinished; 2d and 3d dash-roan setter dog, owned by S. S. Brown; Doctor (Ranger—Pera), white, black and tan setter dog, owned by Wm. Seager; Pat II (York—Connets), red Irish setter dog, owned by H. C. Steadman; Roney (Leicester—Nellie), black and white setter bitch, and Connets (Leicester—Pocahontas), black and white setter bitch, both owned by I. Yearsley, Jr.; King Dash (Belton—Floss), setter dog, owned by J. R. Henrick; Biddy (York—Connets), red Irish setter bitch, owned by H. C. Steadman; Little Lady (Leicester—Nellie), owned by I. Yearsley—divided, race unfinished.

Puppy Stake.—Divided equally among dogs not withdrawn. Nursery Stake.—Same as above.

Second.—The second annual field trials of the Pennsylvania State Field Trials Association, Grand Junction, Tennessee, December 12th-15th, 1881.

Members' Stake.—Open only to members of the association; piece of plate, value \$100, to first; silver cup to second. Six starters—setters. 1st, May Laverack (Thunder—Peers), lemon belton setter bitch, owned by J. J. Snellenburg, and Biz (Dash—Flora), red Irish setter dog, owned by J. S. McIntosh—divided. 2d, King Dash (Belton—Floss), lemon and white setter dog, owned by J. R. Henrick.

All-Aged Stake.—Open to all setters and pointers; Westley Richards gun, value \$415; Parker gun, value \$225, to second; \$50 to third. Thirteen starters—setters. 1st, 2d and 3d, Nellie (Belton—Dimple), black and white setter bitch, owned by D. C. Sanborn; Count Noble (Count Wind'em—Nora), black, white and tan setter dog, owned by Mr. Sanborn, and Dashing Monarch (Dash II—Connets Moll), black and white setter dog, owned by J. C. Higgins; Grouse (Water's Grouse—Daisy Dale), orange and white setter dog, owned by J. C. Higgins, and King Dash (Belton—Floss), lemon, white and tan setter dog, owned by J. R. Henrick—divided.

Derby Stake.—For setters and pointers whelped on or after January 1st, 1880; silver set, value \$100, to first; breech-loading gun, value \$75, to second; \$25 to third. Fifteen starters—fourteen setters, one pointer. 1st, Dashing Novice (Dash II—Novel), black, white and tan setter bitch, 16 months, owned by D. C. Sanborn; 2d, Kinnicknick (Druid—Bessie Lee), black, white and tan setter dog, 23 months, owned by George Knowles, Jr.; 3d, Pet Laverack (Thunder—Peers), black and white setter bitch, 20 months, owned by J. J. Snellenburg; and Mack Laverack (Thunder—Peers), orange and white setter dog, 20 months, owned by D. McK. Loyd—divided.

The Louisiana Field Trials.—Inaugural trials of the New Orleans Gun Club, Amite City, La., November 25th-27th, 1881. Judges—Col. James Gordon, M. M. Bankson, Judge Thompson.

All-Aged Stake.—For setters and pointers owned in Louisiana that never won a prize at a field trial; solid silver cup to first, gold medal to second, silver medal to third. Eight starters—five setters, three pointers. 1st, Flossy (Rake—Daisy), black and white setter bitch, owned by J. K. Renaud; 2d, Gordon, (Rupert—Whip), black and tan setter dog, owned by C. B. Maginnis; 3d, Dot of Dixie (King Philip—Ada), liver pointer bitch, owned by W. C. Percy.

New Orleans Gun Club Stake.—For setters and pointers whelped after November 1st, 1878 (owned in the State), that have not won a prize at any previous field trial: gold medal to first, silver hunting watch to second, fine collar and chain to third. Three starters—pointers. 1st, Spot (Dick—Vic), liver and white pointer dog, 11 months, owned by J. K. Renaud; 2d and 3d, Marquia of Lorne (Fanst—Jane), liver and white pointer dog, 24 months, and Hector (Tasso—Di), 16 months, owned by J. L. Harris.

Arcola Kennel Club Stake.—For setter and pointer puppies whelped after April 1st, 1881, owned in the State of Louisiana. Five entries—three pointers, two setters. 1st, Spot (Dick—Vic), liver and white pointer dog, 11 months, owned by J. K. Renaud; 2d, Dash II (Dash—Di), black setter dog, owned by G. S. Watson; 3d, Tip (Dic—Vic), liver pointer dog, owned by J. G. Watson.

Second.—Opelousas, La., December 11th, 1882. Judges, Col. Jas. Gordon, J. M. Thompson, and M. D. Wallace.

New Orleans Gun Club Stake.—Open to club members only; silver cup to first; game bag to second. Twelve starters—seven setters, five pointers. 1st, Flossy (Rake—Daisy), black and white setter bitch, owned by J. K. Renaud; 2d, Tyler (Uno—Flirt), lemon and white pointer dog, owned by H. S. Humphria.

Opelousas Derby.—Open to setter and pointer puppies whelped on or after April 1st, 1882; \$150 to first, \$100 to second, \$50 to third. Eight starters—seven setters, one pointer. 1st, Pink B. (Gladstone—Countess Key), black and white setter dog, 19 months, owned by W. B. Mallory; 2d, Countess Magnet (Count Noble—Spark), liver and white setter bitch, 18 months, owned by D. C. Sanborn; 3d, Nellie Bly (Count Noble—Nellie), black and white setter bitch, owned by J. M. Avent.

Free-for-All Stake.—Open to all setters and pointers; \$200 to first, \$150 to second, \$75 to third. Twenty-two starters—seventeen setters, five pointers. 1st, London (Gladstone—Clip), blue belton setter dog, owned by M. Coleman; 2d, London (Paris—Lill), blue belton setter dog, owned by H. Bailey Harrison; and Foreman (Dashing Monarch—Fairy II), black, white and tan setter dog, owned by C. Fred Crawford—divided; 3d, Count Noble (Count Wind'em—Nora), black, white and tan setter, owned by D. C. Sanborn, and Flossy (Rake—Daisy), black and white setter bitch, owned by J. K. Renaud—divided.

Third.—Canton, Miss., December 10th-14th, 1883. The Southern States Field Trials, under the management of the

New Orleans Gun Club. Judges, Maj. W. H. Key and Hon. Jas. M. Thompson; referee, C. B. Whitford.

New Orleans Gun Club Stake.—Open to members of the New Orleans Gun Club; silver cup and gold collar to first. Eight starters—six setters, two pointers. 1st, London (Gladstone—Clip), black, white and tan setter dog, owned by W. H. Coleman.

The Waterloo Cup.

This principal coursing event in England was run over the grassy meadows of Alcar, near Liverpool, on the 20th, 21st and 22d ult. As usual, it attracted enormous attention, and as often has been the case, it was won by a rank outsider. The favorites were all beaten before the deciding round was reached. The winner was Mr. John Mayer's black and white dog Mineral Water, by Memento, out of Erzeroum. He was bred in England and represented an English nomination made by Mr. C. E. Marfleet. On the first day Mineral Water beat the English dogs Fitzfulke and Quickline, on the second day he beat the Irish dogs Royal Stag and Pinkerton and on the third day he beat the English dog Middleton and the Scotch dog Greenstick. The last-named is also a black and white dog and had run remarkably well up to the deciding round, when he showed so tired that Mineral Water won easily. The owner of Mineral Water, a dog never before very successful, did very well, for in addition to the £500, his share of the stake, he won £6,000 in bets. The odds against Mineral Water during the contest were 1,000 to 12 on the evening of the 19th. After he had won two courses 18 to 1 was offered; when only four dogs were left in 4 to 1 was offered and taken, while for the final 9 to 4 was laid on him. That outsiders have some show for the Waterloo Cup it may be said that last year 100 to 1 was offered against the winner, Wild Mint, on the night of the draw. Wild Mint in turn was beaten easily in the first round this year.

The conditions of the contest are 64 subscribers at £25 each, the winner to receive £500, the second £200. The two dogs beaten in the fifth round to receive £50 each; the four in the fourth round £30 each; the eight in the third round £20 each and the sixteen in the second round £10 each. The thirty-two beaten in the first round for the cup run for the Waterloo Purse dividing £215, of which £75 to the winner, the others to receive £30, £15, £10 and £5 each. The sixteen defeated in the second round for the cup to run for the Waterloo Plate, dividing £145 pounds, of which the winner received £75, the others £30, £10 and \$5 each, which uses up the £1,000 obtained by the original subscription. The only subscribers not receiving some portion of the stake being the owners of the sixteen dogs beaten in the first round for the purse. The final result for the purse was its division by the owners of the English dog Escape and the Scotch bitch Gladys, the plate being won by the Scotch dog Cocklaw Dean.

The Pacific Coast Coursing Club returned to the city last Sunday and Monday, the storm having put an embargo on coursing. The prizes were distributed as follows: Old Dog Stake—T. Cronin's Chicopee, Thomas Hall's Fannie and Ghiding Maid, M. Mercedite's King John, F. Callahan's Sierra, William Dunphy's Pennie and E. Talbot's Templar, \$20 each; P. K. Jacoby's Lord Dugan and John Dugan's Sallie Henry, \$10 each. Sapling Stake—D. L. Levy's Pacific Life and Mardi Gras, Thomas Hall's Mndoon, J. O. Bliss' Vanity and T. Cronin's Thornhill, \$5 each.

A San Luis Obispo paper describes a good dog they have down there of the Collie species. He can overtake any coyote, and like St. Paul "fight a good fight." He is a good watch-dog, sleeps in the day time, and guards all live stock, from cattle to chickens, in the night. He is equal to two men at driving and herding stock.

Capt. A. J. Hutchinson, of Los Angeles, has a fine deer-hound bitch, by the champion dog of England, on the way to this country, and she is expected to arrive in a few days. She will be bred to Sheik.

It is not unlikely that the California Coursing Club will omit their usual spring meeting this year. The stormy weather, and consequent floods in the upper San Joaquin are the impelling causes.

At both the Cincinnati and Cleveland bench shows, which will be two of the most important in this country during 1884, the Malcolm Standard has been adopted for judging the Gordon setter.

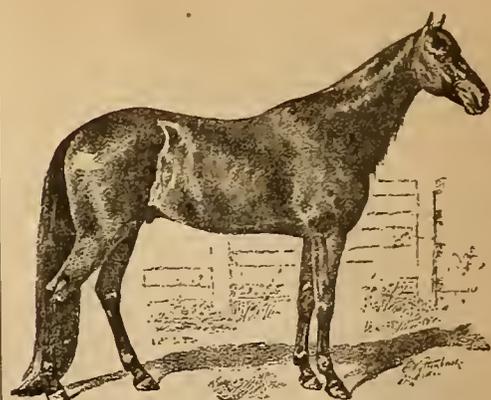

The greyhound Snowdight, winner of the Waterloo Cup, (the dog Derby) in England in 1882, and second for it last year, has been sold in England for \$2,500.

Arrangements are being made for a bench show at Washington, D. C. The time has not yet been announced. Mr. Lincoln has been applied to manage.

Geo. W. Ellery, of Sacramento, has sold his Llewelin bitch Topsy (Dan ex Sybil) to Lieut. J. E. Barber of this city. Price \$145.

A movement is on foot in Boston, Massachusetts, looking toward the organization of a New England Kennel Club.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1/2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Welgewood, 2:19, by Woodford, son of Kocinsko, by Sir Arch).

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbottsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convo 2:22 1/2; Agents 2:21 1/2; Manfred 2:22; Panscott 2:23 1/2; Rachel 2:23 1/2; Inca 2:27; Lady McFatridge 2:29; Dacia 2:29 1/2; Geo. A. Aver 2:30; Woodford Mambrino was also the sire of Pinups, the sire of Trinket 2:34. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,200 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian. Young Columbus, by Old Columbus, dam Black Maria, by Barrie's Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Hyman Woodruff 2:23; Valley Chief 2:23; Faustina 2:23 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent.

San Mateo, Cal.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

BAYWOOD

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

Sired by Nutwood; first dam by Geo. M. Patchen; second dam h Champion; third dam by Belmont.

FLEETWOOD

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model horse; free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms, \$25 for the season, or \$30 to insure.

E. S. SMITH, San Jose.

The Trotting-Bred Stallion

A. T. STEWART,

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette county, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Patchen (full brother of Lady Thorn, record 2:18 1/2), sire of Katie Middleton, 2:22, and mine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn, second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maud's 2:1 Mambrino Patchen sired by Mambrino Chief, by by Mambrino Paymaster, and he by Mambrino, thoroughbred son of imported M.

Terms for the season, \$30.

Address SOMERS & A

TROTTING STALLIONS.

Standard Trotting Stallion

BILLY HAYWARD, 489,

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

The Almont Stallion

ALTONA,

BY ALMONT; first dam Theresa B., by Prophet, Jr.; second dam Molly Floyd, by Mobawk; third dam, by Davy Crockett, a Canadian pair; fourth dam Puss, a fine road mare imported from Canada. Prophet, Jr., by Prophet, son of Hill's Vermont Black Hawk. Altona was bred by Gen. W. T. Withers, of Fairlane, is a dark bay, a little over fifteen and three-quarters hands, of high form and breeding.

He will make the season of 1884, ending July 1st, at the ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

Terms, \$30 for the season, due on or before July 1st.

For further information apply to or address

ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

### Wren's Nest Stallions.

THE CHAMPION TROTTING STALLION OF THE PACIFIC SLOPE"

**FOXHALL A. DAINGERFIELD, Owner.**

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 bands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' banding, showed 2:23, without a skip.

Breeding.

GILT-ENG, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

Terms \$50.

**FRED ARNOLD,**  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen bands high, and weighs 1,150 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2, and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30 1/2), by Flaxtail, grandam by son of Tally Ho Morgan, great grandam by Irwin's Tuckahoe, great great grandam by Leffer's Consul.

**Privateer** is four years old, a beautiful brown with tan shades, over sixteen bands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.

**M. W. HICKS,**  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 bands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), by McCracken's Dave Hill, by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.  
Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.  
Dam of Dave Hill by Vermont Hambletonian.  
Dam of Red Lion by Vermont Hambletonian.

**J. A. FAIRBANKS,**  
Agent.

Oakland, January 18, 1884.

### The Trotting Stallions

## DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:1 7/8.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phyllis, 2:15 1/2); first dam Dolly (dam of Thorudale, 2:22 1/2; Onward, 2:25); second dam by Potomac; third dam by Saxe Wiener.

Thordale, 2:22 1/2, is the sire of Edwin Thorue, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1/4.

Two-mile record, 4:45.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTTING PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:24 1/4.

Bay horse, bred by R. Penniston, Philadelphia, Penn.

By BAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr.

Bappy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 2d, 1884.

**J. B. McDONALD.**

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by Imp. Bonnie Scotland.

Third dam, Young Fashion, by Imp. Monarch.

Fourth dam, Fashion, by Imp. Trustee.

Fifth dam, Bonnets o' Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by Imp. Medley.

Eighth dam, by Imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by Imp. Janus.

Eleventh dam, by Imp. Monkey.

Twelfth dam, by Imp. Silvereys.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

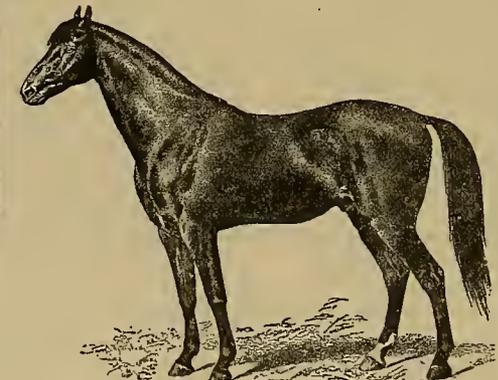

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

## MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treney of Fayette County, Kentucky. Dam Lady Christian by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prominent sire.

Will make the coming season, commencing February 1st, 1884, at the Drew stable, STOCKTON, and L. M. Morse's near LODI.

Terms.

\$40 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

**A. L. HINDS, Agent.**

### The Trotting Stallion

## STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McClevery & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or of D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 bands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Stratmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Fur, Field and Farm" November 16th, 1882.

Strathmore is the sire of Santa Clara, 2:17 1/2, and Tucker, 2:19 1/2; Chestnut Hill, 2:24; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28; Henderson, 2:28; Strathlan, three-year-old, 2:29; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second best in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Governor Sprague, record 2:26; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

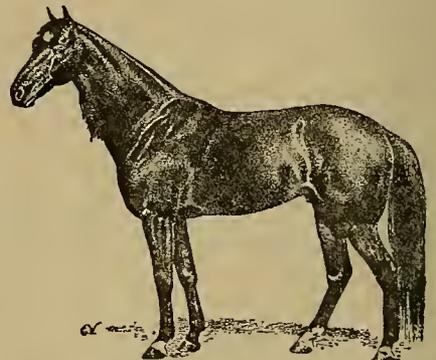

Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Admiration, Mystery, in 2:39, 2:32, 2:34. Memento won the first heat. As three-year-old, at Sharpshury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Busbywhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35, Busbywhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:29 1/2, 2:29 1/2, 2:29 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address

**GEORGE WILEY,**  
Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

Pedigree.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by Imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:45) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Leffer's Consul, by Irwin's Tuckahoe, grandam by Leffer's Consul, by Schepper's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

Terms.

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. McINTOSH, Box 60, Chico, Cal.**

## MAMBRINO WILKES.

Our old friend, Charles J. Foster, never wavered in his allegiance to the noted stallion who was the sire of the subject of the present illustration. From the time when he first made his acquaintance—and that was a long time ago, until he went the way of all horses, he was ready to take up the cudgels in his defense. He had predicted a glorious career; when a foal he was nonrished on cow's milk with a dash of old rum to give it flavor, and gloriously the colt fulfilled the promises. He was the foremost trotting stallion of his day, and after giving due weight to the circumstances attending his life, it can be safely said that he ought to rank with the best of any day.

George Wilkes, first called Robert J. Fillingham, was bred by Harry Felter, Newburgh, N. Y. He was foaled in 1856, by Rysdyk's Hambletonian, his dam Dolly Spanker, by Henry Clay, his second dam by Baker's Highlander. His trotting record is brilliant, obtaining a score of 2:22 in 1868, and in a well-attested trial he made two miles in 4:44. A horse of fine action, although he had a peculiar method of moving his hind legs, given them such a long sweep that at the furthest rear extension the foot was further back than in any other horse we ever saw. A long, easy stride, and yet with so much energy of action that there cannot be a question that with the improved training of the present time his mark would have been in the lowest notch for entire horses.

Mambrino Wilkes is very like his sire in conformation, excepting that he is a good deal larger. He is black, with a tinge of tan color, sixteen hands in height, with fine length and great substance. In fair condition he weighs over 1,200 pounds, and much of this is owing to his fine muscular development. His "middle piece" is capital, showing a large girth around the chest, with corresponding length of back, ribs, quarters and shoulders well clothed with muscles. He has a very handsome head and a clear eye, with the kindest expression. He was bred by B. J. Treacy, of Fayette county, Ky., foaled April, 1874, and his dam combined Mambrino Chief and Pilot, Jr. "hacked with thoroughbred."

## OUR NEW YORK LETTER.

## The March Stakes—Walton and the English Campaign—Betting on the Spring Fixtures—Racing at New Orleans—Notes from the Training Quarters—General Sporting News.

On the 1st instant no less than six racing associations closed their books for the summer races, Washington, Baltimore, Jerome, Chicago, Monmouth Park and Saratoga having "hung up" as added money to the same no less a sum than \$240,000. That these magnificent offers to turfmen have been appreciated the long list of entries received by Secretaries McIntyre, Ferguson, Coster, Hall and Wheatley show most clearly, and also that the great progress made by the American racing turf is onward, still upward. Over two thousand nominations have been made to the above stakes, and such a showing as this will speak for itself in any part of the world, wherever racing is carried on. It looks to be only a question of time when racing stakes in America will be of higher value than those in the old country even. Monmouth Park, Saratoga and Chicago, of course, have the bulk of this large aggregate. At Long Branch several California stables have entered, Palo Alto having in half a dozen of its best three-year-olds, and E. J. Baldwin's Santa Anita Stable making a number of entries. The Stallion Stakes for 1885, at the popular track, is still open, to close April 1st, and your State should, after consulting the conditions of the stake as set forth in the advertising columns of the BREEDER AND SPORTSMAN, send on at least half a dozen subscriptions. The stake will be worth over \$15,000, and no colt or filly can compete whose sire has not been entered by the 1st of next month.

The departure for England on Saturday last of Wm. Donohue, the famous middle-weight jockey, in the interest of F. J. Walton the Pinner is exciting no little interest in turf circles. His intimate acquaintance with the peculiarities and eccentricities of the famous Lemington mare Girofle is so well known—as also the fact that she won all her great races here under his pilotage—that it will be a great advantage to Girofle in her races this spring to have Donohue in the saddle. She is a very nervous, high-strung, excitable bit of horse-flesh, and not one jockey in a hundred can do as much with her as Donohue can. Girofle is nicely handicapped in the City and Surburban at 105 pounds, and if she cannot absolutely win at that weight, she ought to come very near doing so. It is arranged for Donohue to return to New York in May, in time for the spring races here. He will carry with him many good wishes for his and Girofle's success.

Betting on the Surburban Handicap at Coney Island has opened with much animation. From 10 to 200 to 1 is laid against each of the sixty entries, and it is the best evidence of the impartial handicapping that all the subscribers have taken. Those most in favor at present appear to be Barnes 131, Iroquois 130, Parole 120, Gen. Monroe 117, Jack of Hearts 114, Bella 103, Thules 90, Vibrator 85, and Sandoval 85. The betting thus far is confined to the middle and light weights exclusively, the heavy bettors and the backers of the light weights having yet to show their hands. About Sandoval, a three-year-old for whom \$10,000 is asked, \$1,000 to \$4 was laid this week, and it looks as if the taker of the odds has a long way the best of it; \$600 to \$40 about Gen. Monroe; \$500 to \$20 Jack of Hearts, \$500 to \$15 Bella, are some other wagers recorded. On Louisville events some big bets have been made here; \$6,000 to \$1,000 was laid against Boh Miles for the Kentucky Derby, the taker being in the interest of J. T. Williams, the owner; \$4,500 to \$150 was laid against Exploit; \$1,000 to \$100 against Powhatan; \$1,200 to \$100 Buchanan, \$1,000 to \$50 Conkling, and smaller amounts for Tenfull, Eva S., Kosincso, Richard L., Eneign, Loplin and others. It is a very open race this year, more so than ever before, apparently, and at least a dozen horses are finding strong backing. For the Louisville Cup \$1,400 to \$200 was laid recently against Harry Gilmore, and his price is now 6 to 1. Leonatus is not looked upon as a portable starter. The opinion seems to be general that this famous horse has run his last race. Lida Stanhope, April Fool and John Davis are next in favor, the gelding Duke of Monday, from the Haggin stable, is at 20 to 1. If any of your readers desire to invest on any of these races they can write or telegraph the writer, who will cheerfully undertake any commissions entrusted to him. Wallense is at 20 to 1. In the Merchants' Stakes, Queen Ban, Gleaner, Freeland, John Davis, etc., are most sought after, while about Sweet-hair and Winnemucca, your two three-year-olds, 25 to 1 can be had. Altogether, the betting promises to be very heavy this spring.

Racing at New Orleans has been going on steadily during the last ten days and some exciting struggles have taken place. Morris' stable has regained some of its lost prestige through the doings of Fellowship, Manitoba, Zamora and Slocum. Athlone, six years, by Dickene or Narragansett, has loomed up with Marsh Redon and Wallense as the equals of the best. His mile and three furlongs in 2:24 has only once been beaten in a public race. The weather has got settled at the Crescent City now, and on Saturday Fellowship ran a mile in 1:42, the race being one of a mile and half a furlong, run in 1:49. Richard Lond, the Derby candidate now at New Orleans, is progressing so well that there has been quite a run on him in the books. Lida Stanhope, in the same stable, the last year's winner of the Louisville Cup, is in her old form again. If so, she is very likely to credit her name with the Cup for this year also. Susan Beane, the dam of Sensation, died last Friday night. Also Redowa, the dam of Montreal, etc. Father John, three years, by Glomig, has been sold by C. Reed of Gallatin, Tennessee to W. L. Casey of St. Louis, for \$3,000. Horses are now held at high figures, anything with four good legs and a pedigree is eagerly snapped at, especially in this vicinity. The Chiu & Morgan sale in Kentucky week before last drew a large crowd of buyers, and the twenty-two head brought an average of over \$1,000 each, larger figures than was anticipated by the most sanguine. At the same sale Ring-master sire of Hock-Hocking was sold for \$40. Certainly the yearling sales in Tennessee and Kentucky are more than likely to realize larger amounts than ever before from the way thoroughbred stock is held just now. The supply, owing to the great increase in racing, is not equal to the demand, and breeders have matters all their own way as regards high prices. They deserve their success, however, for most of them are gentlemen who contribute largely toward the turf in more ways than one. Future years will no doubt see more horses in training if the present racing boom keeps on. Training here and in Kentucky has been a dead letter lately. A foot of snow and ice on the ground, and the mercury near zero every other day has made enforced inactivity a necessity. Yours, PACIFIC.

New York, March 10th, 1884.

## TURF AND TRACK.

## Imported Medley.

As few horses imported to America did more for the improvement of our race-horses than imp. Medley, his memoir we feel assured will be most acceptable to our readers.

Imp. Medley, gray, foaled 1776, bred by Mr. Medley, and imported by Mr. Malcolm Hart into Virginia about 1784; by Gimcrack, 1st dam Arminda by Snap; 2d dam Miss Cleveland by Regulus; 3d dam by Midge (by a son of Bay Bolton); 4th dam by Bartlett's Children; 5th dam by Honeywood Arabian; 6th dam dam of the two True Blues.

Gimcrack, sire of imp. Medley, was a gray, foaled in 1760, bred by Mr. Green; by Cripple, out of Miss Elliott by Grise-wood's Partner, her dam Caelia by Partner, out of Gray Brockleshy by Bloody Buttocks, etc.

Gimcrack made his first appearance at four years old, when he ran seven races and won seven. At five years old started six times and won five. At six years old he was sent to France and we are unable to say what he did that year. At seven years old he returned to England, started in seven races and won four. At eight years old started six times and won three. At nine years old started six times and won four. At ten years old started three times and won once, and at eleven years old started once and won. Most of his races were over a distance of ground from two to four miles heats, and it will be seen his career was remarkably long and successful.

The following are among the best of his get: Imp. Clock-fest, Comedy, Grey Robin, Knick-Knack, Little Gem, Maiden, imp. Medley, Photon, Scramble, Surprise, Vestris, etc. He died somewhere about 1779, as he was not advertised after that year.

Arminda, the dam of imp. Medley, ran some five races and walked over for one.

Snip, the sire of Arminda, the dam of Medley, was a brown, foaled in 1750, by Snip, out of Sister to Slip by Fox, her dam Gipsy by Bay Bolton, 3d dam by Duke of Newcastle's Turk, etc. Snip did not start until he was six years old, and won four races, all he started for, two of them matches in which he beat Mask for 1,000 guineas each, won a four-mile heat race, and walked over for 50 guineas at Durbam.

At seven years old beat Sweepstakes, 126 lbs. each, Beacon Course, for 1,000 guineas and was retired to the stud.

The following are among the best of his get: Snappina, Roxana, Havaunab, Snap Dragon, Snip, Specimen, Harold, Druid, Hecate, Snipe, Prutocio, Tartuffe, Tortoise, Metaphysician, Darling, Goldinder, Torch, Virago, Creden de Burbade, Susan, Paggergill, Lady Jane, Snorum, Titus, Tetotum, Ancient Pistol, Nosegay, Fiddlestrung, Almira, Gnat-post, Golden Fleece, Juniper, Barbara, Raton, Cockspur, Maria, Papillon, Count Hussar, Mexico, Slyheots, Speculator, Ratacatcher, Mexican, Sarpedon, etc.

Snip died in 1777, aged 27 years.

Medley was a gray, not exceeding 15 hands high. He is described by old turfmen as a horse of uncommon heauty and great appearance of blood, to which he united such just symmetry, that although of great substance for a horse of his size, yet, on a cursory view, he seemed light; still all his parts were strong.

He started once at three years old, at Newmarket, Medley, three years, 113 lbs., and Post Boy, three years, 109 lbs., ran a dead heat across the Flat for 50 guineas.

At four years old started six times and won three. Newmarket, Medley, four years, heat Hymen, four years, 112 lbs. each, Beacon Course, for 100 guineas. Same place for Fortesque Stakes of 30 guineas each, ditch in (11 eubs.), for four-year-olds, colts 119 lbs., fillies 116 lbs., won by Imperator; Buccaneer second, Hugh Capet third, Medley fourth, and three others. Same place, second spring meeting, for £50 for all ages, Duke Course, over 2 miles, won by Guildford, five years, 118 lbs., Fierifacal, four years, 103 lbs., second; Wickham, four years, 103 lbs., third; Medley, 103 lbs., was fifth in a field of eight. Same place, first October Meeting, Medley, four years, 114 lbs., beat Jockey, 118 lbs., Beacon Course, for 100 guineas. Same place Medley, four years, 112 lbs., beat Leapfrog, 121 lbs., Beacon Course, for 100 guineas. Newmarket Hongton Meeting, Reputation, 112 lbs., beat Medley, 114 lbs., ditch in, for 200 guineas.

At five years old started seven times and won six. Newmarket, Medley, five years, 112 lbs., heat Farmer, 108 lbs., Duke Course, for 100 guineas. Same place Medley, five years, 113 lbs., received 20 guineas compromise from Marygold, 97 lbs., Beacon Course. Same place, Medley, 111 lbs., beat Bridget, 118 lbs., Beacon Course, for 200 guineas. Epsom, for a sweepstakes of 100 guineas each, four miles, Medley, 107 lbs., first; Golden Dnn, 100 lbs., second; Fame, 114 lbs., third; Guildford for Members' Plate, £50, four-mile heats, Medley, 119 lbs., 1st 1st; Sir J. Shelley's bay filly, four years, 102 lbs., 2d 2d; Sportley, five years, 116, 3 dr. Same place for Town Plate, £50, two-mile heats, Medley, five years, 119 lbs., 2d 1st 1st; Telamen, five years, 119 lbs., 5th 3d 2d; Mercury, five years, 119 lbs., 3d 4th 3d; Ulysses, four years, 110 lbs., 1st 2d 4; Drousy, six years, 125 lbs., 4th dr.; Lilly of the Valley, four years, 110 lbs., distanced. Bath, for the Cup, by subscription of 10 guineas each, four miles, (13 eubs.), Burrington, five years, 119 lbs., first; Medley, five years, 119 lbs., second.

At six years old started six times and won two. At Newmarket Medley, 110 lbs., heat Fame, 112 lbs., ditch in, for 100 guineas. Same place for £50, Duke Course, Boxer, 119 lbs., first; Medley, 119 lbs., second; Clandon, 119 lbs., third. Reading for £50, four-mile heats, Staudby, aged, 134 lbs, 2d 1st 1st; Medley, six years, 124 lbs., 1st 2d dr. Egham for £50, four-mile heats, Copperbottom, six years, 119 lbs., 1st 1st; Medley, six years, 119 lbs., 2d 2d. Aylesbury for 50 sovs., four-mile heats; Slender, four years, 102 lbs, 4th 1st 1st; Starring Tom, six years, 123 lbs, 2d 2d 1st; Medley, six years, 121 lbs, 3d 3d dr.; Copperbottom, six years, 126 lbs., fell. Epsom, Medley, 116 lbs., heat Hesodina, 108 lbs., two miles for 50 guineas.

At seven years old started four times and won two. Carlisle for 50 sovs., four-mile heats, Smart, five years, 118 lbs, 3d 1st 1st; Medley, aged, 130 lbs., 1st, fell; Golden Dnn, six years, 128 lbs., 2d dis.; Pinks, six years, 128 lbs., distanced. Reading for 50 sovereigns, four-mile heats, Medley, aged, 4th 2d 1st; Copperbottom, aged, 3d 1st 2d; Frecholder, aged, 4th 3d dr.; Omen, aged, 2d dr. Canterbury for £50 plate, four-mile heats; Sussex, five years, 115 lbs., 1st 1st; bay mare, five years, 112 lbs., 2d 2d; Medley, aged, 126 lbs., 4th 3d, grey colt, four years, 101 lbs., 3d dr. Newmarket, Challaby beat Medley across the Flat for 50 guineas.

This ended his racing career, and he was imported to America, and he made some eight seasons in this country, and died the property of James Wilkinson, Southampton county, Va., in 1792, aged sixteen years. According to the number of mares put to imp. Medley, and the number trained, he sired more successful race-horses up to this day than any horse that preceded him in America. From his

mares and sons we are indebted for some of our best thoroughbreds. Virginia, Maryland, Tennessee and Kentucky, the four great breeding states up to within the past twenty years, are mainly indebted for some of their best stock to the Medley cross. The following will give some idea of the part that imp. Medley hood has played in our thoroughbred stock: Arminda by Medley, left a great family who has come down through Dido (dam of Dunganon), Grey Fanny, (dam of Gray Medco), Blue Bonnet (dam of Little Arthur, Nebula, Alice Jones, Lightning, Thunder, Loadstone and Laneshoro), Kate Anbrey, Minnebeha, Asteroid, Sue Lewis, Jonestor, Longstreet, Mary Martin, Annette, Cariboo, etc. Atlanta by imp. Medley, is represented by Bet Bonnoe, Flora, Coquette by Sir Archy, Arab, Tariff, Brilliant, Eliza Riley, and Gen. Brooks. Coquette was the dam of Janet (Virginia Lafayette), Virginia Taylor, Bonnie Bess, etc. Calypso, by imp. Medley, was the dam of Malvina by imp. Sterling, Surprise by Americans, Julia M. by imp. Spread Eagle, Rosalie by imp. Knowlesly, and Trafalgar by imp. Mufli. Helen by imp. Medley was the dam of Thornton's Medley by imp. Punch. Little Moll by imp. Medley was the dam of Cora by imp. Bedford, and Wiltona by imp. Stirling. A Medley mare produced Miss Jefferson by imp. Diomed, Carolina by imp. Saltram, Roanoke by imp. Magic, Carolinaiu by imp. True Blue, Vanity and Reality by Sir Archy. Reality was the dam of Bonnets O' Blue, the dam of the renowned Fashion and Mariner. Fanny Blue by imp. Medley, produced Fanny Archibald, dam of John Randolph by Gracchus. Pandora by imp. Medley was the dam of Greybound by imp. Spread Eagle. Vixen by imp. Medley was the dam of Ogle's Oscar. Yareco by Medley was the dam of Hebe, by Dare Devil, who produced Medley by imp. Bedford. The race-horse and sire Bellair was by imp. Medley. Jones', White's, Wilkerson's and Ridgley's Medleys were sons of imp. Medley, and Little Medley was by him also. Grey Diomed, the sire of Amanda, the dam of Duroc, who sired American Eclipse, was by imp. Medley. Boxer, Melzar, Lamplighter, Wild Medley and Barry's Grey Medley were sons of imp. Medley. It will be seen that the blood of imp. Medley is mingled with the best and most successful strains of blood in this country. It was said of Medley that he seldom failed to get a race-horse, and the qualities which marked his stock made them known wherever seen. They were remarkable for clean, bony legs, short backs, and good loin, round barrel-like body, large sinew, and solid hully tendons. Monsieur Tonson, Sir Richard Tonson, Sir Henry Tonson, Champion Jerry, etc., who did much for the stock of Tennessee, descended from imp. Medley, through his son Barry's Grey Medley, who sired their grandam. Gimcrack, Randolph's Roan, Quicksilver, Opemeco and Fitz's Medley were sons of his. A great number more of successful race-horses might be given having a cross of Medley, or of imp. Clockfast who was by the same sire, but the above is sufficient to establish the fact that a large majority of our earlier (and at the present day) most distinguished race-horses are deeply imbued with the Medley blood, showing its great value and superior character over any of the earlier importations.—Live Stock Record.

## Calling on Tom Cannon.

[Correspondence N. Y. Spirit.]

"Very glad to see you if you care to come down and have a look at the horses," Tom Cannon had written to me, and it was in answer to this invitation that I found myself at Stockbridge station a few mornings since. A brougham with a good-looking horse in the shafts is waiting for me, and I am soon on my way along the ups and downs of the Hampshire road, the windings of the river Test making a picturesque feature as we drive along. An abrupt turn presently shows a glimpse of white rails marking a track on the green downs; the stands of the Stockbridge race-course are visible on one side, and on the other are the many roofs of Danebury, which, with all the stabling and out-buildings surrounding the house, looks quite like a little village in itself.

As I drive up some of the horses are filing out of the stable-yard on to the adjoining downs—Stockbridge race-course extends to the very doors of Danebury—but before looking critically at these to recognize old friends on which I have won or lost money, I have to exchange greetings with the genial Tom, who receives his guests with the hearty Hampshire welcome.

"It's very good of you to think of giving me this treat, Tom," I say, and I mean it, too, for I do not know a pleasanter place to visit.

"Very pleased to see you down, Mr. R.," he replies, and then follow the questions about "talking something," a ceremony which they think should be often repeated in this south country; but I propose to get up a tremendous appetite for lunch, and proceed at once to make inquiries about the horses.

"We'll go and see them now, if you like," Tom Cannon says, "they are all out—all the morning lots, at least." They have not been very bright, some of the young ones," he continues, as we stroll across the yard towards the downs which open beyond. "I've had several of them out of sorts, but they're all well now, or getting well, I'm glad to say."

"And the Derby colt, how's Fritz?" I ask, for Cannon's own colt, a brother to Bean Brummel, who would have won the Derby last year for Lord Hastings if he had stood his preparation, is a subject of much interest at present, and is backed already for the great Epsom race.

"He's been laid up, too, but he's coming on well again. Ah! there they are!" he adds, and I see a long string of sheeted horses walking about in a circle under the supervision of Olding, Tom Cannon's head man.

"That's Sachem, isn't it? How well he looks! And isn't that Pontiac?" I inquire, as Olding rides up to receive instructions.

"Let them all enter, and then we'll see about the jumpers. Sachem must go over the hurdles with The Dethroned, and we'll have Jolly Sir John, Beechfield, Nosegay and Saville over the steep-chase course."

Olding rides off to give the necessary instructions, and Mr. E. M. Owen, a gentleman who lives at Danebury, and helps in the management of the horses, as well as riding them over a country or over hurdles, canters off to see the jumpers properly booted, for they do not want any over-reaches or cut legs to interfere with preparation. Meantime the others come cantering towards the spot where Cannon and I stand.

"There's Picador."

"Well in the Lincoln handicap?"

"Yes, he is. He'll probably run second or third, as he has done in the last five races he has been for, but something always comes and beats him at the finish," Cannon remarks. "Yes, that's Rollo," he continues, in reply to my observation. "I thought well of him last year, just as you did, but I could not train him; however, he's all right now. There's Fritz. Look well, too, doesn't he? Not grown much? No, but he's big enough if he's good enough, and I dare say he'll go ahead now that he's well again."

"Well, Tom, I'd like to see him win. I suppose he won't be out till the Derby?" I say.

"No. He's not in the Two Thousand. Ah! it's a difficult thing to win the Derby! I should like to win it on my own horse, but I don't quite see how I'm to beat some of the rest. There's the Adelaide filly, for one. Jewitt was down here the other day, and he gives a good account of her. And there are some other good ones, too, but I mean to have a try, if the colt has kept his form. I don't know more than you do about that at this time of year. There's Pontiac. He disappointed me at the Houghton meeting last year. I did think he'd have won that Nursery! I'd rather win a race for Mr. Lorillard than for myself. I would, indeed; but I can't do it if he doesn't send me the horses."

So the string went by, some five-and-twenty in number, and we drolled through the plantation, which crowns a rise in the towns so as to afford shelter for the horses whichever way the wind is, and took up our station by one of the hurdles. Here Cannon got on Mr. Owen's horse and galloped off, while Owen and I waited to see how Sachem would jump. Presently we heard the thud of hoofs on the turf.

"Quadrupedante putrem sonitu quatit ungula campum," to quote Virgil's famous onomatopoeic line, and round the corner of the plantation comes the chestnut, one of the best-looking horses in the country, with the sun touching his golden chestnut coat, and that disappointing beast, The De-throned, second heat, though placed third to Corrie Roy in the last Goodwood Stakes, and formerly known as the Monarch, till the fact of his "not behaving as such" seemed to make a change of name desirable.

On they rush to the hurdle where we stand. Some dozen feet from it Sachem takes off, I can hardly say rises, for he scarcely seems to do that, and rapping it a hit lands a dozen feet from it on our side, and away without a pause.

"Look out. I'm coming!" Cannon shouts, and we, who have been examining the hoof-prints, clear the way as the great jockey, the master of Danebury, canters up and larke over the jump.

After that we trott up to one of the steeple-chase jumps, and see the four come safely round, and then turn towards home. A rabbit scurries across the green lane, intersected by the low fences over which the jumpers are taught the rudiments of their business, from one strip of plantation to the other.

"We'll bring our guns this afternoon, and see if we can get one or two of those," Cannon remarks, as he notices Bunny scuttle away.

I readily acquiesce in the suggestion that we should go round the stables as soon as the horses are done up, as I wanted to tell you about Mr. Lorillard's contingent.

"I've only six of the American's here now," Cannon says, arming himself with a pair of scissors, for he has noticed that some of the tails looked ragged, and thinks he will utilize his time by trimming them up a bit. "I couldn't recommend him to keep ones that were no use. There's De Soto," and he stopped at the commodious box (the Danobury stables are remarkably spacious and airy), wherein was a chestnut with three white legs. "Never been tried. Too ill all the summer. A long and low animal, you see, with good legs and feet. There's Pontiac. Yes, I fancy he's the best. He ran well in the Woodcote at Epsom, and in the New Stakes at Ascot, but he had the bad luck to meet Wild Thyme in both races, and she was a bit better than he. I certainly thought he would have won that race at Newmarket in the autumn, but we'll hope for better luck this year."

Out of one stable into another, along row after row of boxes we pass, and presently come to Fritz's residence—one must use respectful terms in writing about such colts as this.

"Not much the matter with him," his master says, as he proceeds to trim his tail with the scissors.

"We'll make him look like a hunter, and then we'll get a longer price about him," Cannon jocularly observes, and I take a look of the clippings to have something made of it, if, after all, Fritz should get his head in front on the 28th of May next, which, however, I fear is too much to be reasonably expected.

There is no mistaking Sachem, whose box we soon entered. It is padded all round to the height of four or five feet. Cannon looks at him critically.

"Here, boy; just trim his tail a bit," he says, handing the scissors to the horse's attendant, and looking slyly at me. "If I went near him in this long coat he'd kick me to the other side of the Grand Stand," he says, as the lad cautiously makes the chestnut's tail square, Sachem squirming and lifting up his feet uneasily meantime.

"That's another of Mr. Lorillard's—Comanche. He's grown and thickened, and isn't at all a bad-looking horse. That's one that would do well over hurdles, if Mr. Lorillard cared for it. There's Emperor. He was very hard work. He can stay a hit, I fancy, from a rough up he had in the autumn, but he's got no speed. Choctaw's bigger—he's grown, certainly; whether he's better I can't tell yet. The other one of Mr. Lorillard's is Nirvana. She comes out with the afternoon horses."

In the afternoon I see her being led about, and passing a good deal of time on her hind legs. "Very moderate; little speed," is her trainer's verdict.

A question which I do not feel quite justified in putting to Cannon, but which I should like to have answered, was about the younger Loates, who has been Cannon's boy for the last two years. Rumor has it that S. Loates has ceased to go straight, and has joined "the school," as the little clique of untrustworthy jockeys is called. The lad is, thanks to Cannon's instruction, a remarkably good rider, and if he has gone wrong it is a sad pity. Seeing, as he must have done during his residence in Cannon's stable, how much respect and esteem straight running earns for a jockey, and, in addition, what wealth his master has honestly acquired, Loates must be an idiot if he has done wrong. All this I thought it more delicate not to introduce as a subject of conversation as we sat and smoked after dinner, and after Cannon, Owen and I had heated the covers and got some of the rabbits we saw in the morning, or at any rate, some of their relations, I have no authority for saying anything of the sort, but I shall be surprised to see Loates in the popular crimson and white hoops which he has worn constantly since the beginning of his short career.

As we chatted, I took up a piece of what looked like ivory from the mantel-piece.

"A horse's tooth, Tom?" I ask. "Yes; Bay Middleton's," he replies, and I see the name written on it in ink. Bay Middleton, who won the Derby and Two Thousand for Lord Jersey in 1836, lies buried, with Crucifix, at Danebury, and many still declare that Bay Middleton, in his best days, was as good a horse as ever lived. With the tooth in my hand, I reflect on "the brave days of old," and I am enre it is the wish of every man who wishes well to the turf that another horse, as good as Bay Middleton, may issue from the Danebury stable.

It is reported that W. J. Gordon recently offered \$25,000 for Director, but Mr. Salisbury holds out for \$35,000.

Monmouth Park Association.

The Monmouth Park exhibit of entries for the stakes which closed last year, together with those that closed on March 1st, is the largest ever made by a racing association in this country, a feat that is not at all surprising, considering that three of its associate members are Mr. George L. Lorillard, Mr. Pierre Lorillard, and Mr. D. D. Withers, and that several other large owners confine their entries for the summer meetings exclusively to that of the Monmouth Park Association. In the matter of racing no association in the country constructs its programmes with greater skill, looking alike to the fact that the number of starters shall be large enough to furnish good sport both to the betting and non-betting element of the daily attendance, and at the same time not put owners to any severe test in training their horses for long distances. That the admirers of old-fashioned races should find fault and regret the decadence of American thoroughbreds is not surprising. But owners like the Dwyers very naturally say that those who find the most fault never paid for a bag of oats in their lives, and that they would quickly alter their minds if they had two or three horses break down while they were being prepared for races at two miles or over. No doubt with this idea the Monmouth Park Association reduced the distance for its cup race to two miles, the entries for which are as follows: Clipsiana Stables's Sandoval; Dwyer Brother's Checkmate; Barnes' George Kinney and Miss Woodford; F. Gehhard's Eole and Eoleet; C. Littlefield's Free Gold; G. L. Lorillard's Monitor, and Pierre Lorillard's Herbert, Pinafore, Drake Carter and Haron. The full entry for the stakes to be run during the meeting is as follows:

Table listing various horse races and their participants, including 'FOR TWO-YEAR-OLDS' and 'FOR THREE-YEAR-OLDS' with names like Hopeful, Barneget, and others.

Grand total of entries.....2,194

In addition to the above stakes there is the Champion Stallion Stakes for two-year-olds at \$250 each, with \$3,000 added, at three-quarters of a mile, the entries for which will be made the day previous to the day designated for the race, which entries are confined to the "get" of the following twenty-two sires entered at \$500 each, all of which will go to the winner, less \$3,000 to be divided by the second and third for the race:

- List of sires including E. Baldwin's Grinstead, Belmont's Kingsber, and others.

Another feature of the meeting will be the races for the Ocean and Champion Stakes. The former is at a mile and a furlong, and will no doubt be a Fourth of July fixture, and as Iroquois, Eole, the Dwyer cracks Barnes, George Kinney and Miss Woodford, and the best of the three-year-olds are entered, a specially grand race may be expected, which will be renewed later in the meeting for the Champion Stakes with perhaps Monitor and Boh miles as additional starters.

Pony Trotters.

A writer in the Texas Live Stock Journal eulogizes the Texas ponies for speed. He mentions the following performance:

Last fall, a four-year-old colt was taken up off the grass, never having been under shelter even before, and in about a month's time paced three heats a good second, time 2:57, 2:56, 3:04. This was in September. In October, at the regular meeting here he paced fourth, three heats, time in two of them, 2:28 and 2:25.

The colt is not five years old yet, and is said to have paced a mile in 2:26.

Texas Bill, gray gelding, no pedigree, hought for a trifle on the street, trotted November meeting, 2:30 class, first heat 2:29, fourth heat 2:29, and seventh heat 2:29. At the Dallas meeting he trotted in 2:26. He is a Texas horse, branded with a heart.

The horse Keno, which Campbell campaigned all through the northern grand circuit in the 2:25 class, was bought out of a delivery wagon in Denison, Texas, for \$140. He was a Texas horse, had speed, and was a stayer.

Brown Jug, Jr., is another little Texas pony that with a little handling developed wonderful speed, yet sold after pacing a mile down in the twenties, for less than three hundred dollars.

Kentucky thoroughbreds ran at the fall meeting a half mile in 51 1/2; the cow ponies, same conditions, 52 1/2. The pony Cyclone who, third time he was hitched and after six miles of hard work, paced a quarter in 40 sections. He has done a great deal better since and goes the full mile with less than one month's handling. Noyes hitched a mixed gaited cow pony to a cart February 3d, and putting on what he calls his "pacing harness," trotted him a quarter in 39 seconds. He commenced driving another mixed gaited brown Texas horse less than a month ago and now trots him in 2:35 easy.

Tips in Chicago.

Mr. J. L. Day of Chicago, in a private letter to the editor of this paper, makes the following reference to tips:

Col. R. S. Withers of Kentucky wants to know about tips. I can say that our North Side Street Car Company has been using tips on all of its horses for a year or more. They travel on cobble stones day in and day out. I have watched their horses, and think they go better by far than ever before. They have used them all winter, and we have experienced a hard, cold winter, with plenty of snow. I am a friend of the tips, and hope to live long enough to see every man using them on his driving horse, should he own one. I am driving my mare Kate Allen the pacer, a six-year-old, harefoot now on the snow; as soon as spring opens up shall put the tip on for road use.

Leonatus is being slowly trained for his engagements. It is reported that his leg is all right and that he will surely run barring any unforeseen accidents.

California Abdallah.

In response to numerous requests we reproduce the following description and pedigree of the first son of Rysdyk's Hambletonian that made the journey to the Pacific coast, called at the time of his importation simply Abdallah, but since generally known as California Abdallah. We quote from an advertisement printed in 1860, at which time the horse was owned by Ben Fish and was in the stud at the owner's stable.

DESCRIPTION.—Abdallah was raised by Charlee Hultz, of Orange county, New York; sold and went to New Jersey, where he took the first premium as a yearling and as a two-year-old at two successive fairs in that state over all competitors from that end other state. Abdallah stands sixteen hands and half an inch high, mahogany bay, black mane and tail, clean head, well set on, beautiful neck and dloping shoulders, well ribbed up and very heavily quartered, tremendous stifle and gaskin, short canon bone and sound feet. In short, a perfect picture of magnificent horse-flesh. A good one to look at and a good one to go; has a remarkable turn of speed, with a very level and square gait, gentle and kind in saddle and harness of any kind, and high courage; as fast if not faster than any horse in the country at trotting, and can out-walk them all. Abdallah has never been trained, but trots his mile in 2:50 to harness.

PEDIGREE.—Abdallah was foaled March 29th, 1854; was sired by Hambletonian, he by Abdallah, he by old Mambrino, he by imp. Messenger. Hambletonian's dam was the Charles Kent mare, by imp. Belfounder, grandam old One Eye, by old Hambletonian, he by imp. Messenger, his dam also by imp. Messenger, and the dam of old One Eye by imp. Messenger. The dam of Abdallah was sired by imp. Roebuck, his grandam by Sir Henry, the celebrated race-horse that ran Eclipse. The pedigree of all Abdallah's ancestry is pure.

William M. Ryadyk, of the town of Chester, Orange county, state of New York, being first duly sworn, says that the above pedigree is true to the best of his knowledge and belief.

Sworn to this 4th day of February, 1858, before me F. A. OLMSTEAD, Justice of the Peace.

A Little Mistake.

During the late meeting at New Orleans Stoval the jockey incurred the displeasure of his employers by making the mistake of winning a race. In the Mystic Krew the Louisiana Stables had two starters, Wallensee and Fosteral. The owners backed both entries, but stood to win much the larger sum on Fosteral. They officially notified the judges that Fosteral was to be the winner, if possible, and instructed Stoval, who rode Wallensee, if he saw that Fosteral could win, to let him do so. In the race, at the end of a mile or so, Fosteral made a determined move for the front, but it was quite apparent to everybody that he could not get there, seeing which, Stoval, who was lying close behind with Wallensee, at once set sail for the lead, and soon had everything behind him. In the meantime, Fosteral had crept up to second place, and when the run for home was fairly begun the race was virtually between the two stable companions. About the eighth pole Stoval looked back to see who was next him, but apparently he did not know it was Fosteral, for Wallensee continued on and won. After dismounting Stoval said that so much mud had been thrown in his face (the track was had) that he actually did not know that Fosteral was second on the homestretch. There is no question at all that Fosteral could have won if Wallensee had been pulled back near the string, and it doubtless was Stoval's duty to let him do so if he knew how matters stood on the homestretch. While this is so, if the backers of Wallensee had seen Stoval deliberately pull him in front of the grand stand, would there have been a howl? The luckless jockey was bound to come in for censure, no matter what he had done.

Sale of Thoroughbreds.

In connection with the numerous sales of thoroughbred yearlings which will shortly take place in this country, together with the very important sale of the horses in training, the property of Lord Falmonth, which will be sold at Newmarket, England, on the 28th prox., it is announced that Mr. Wm. Easton, late Superintendent of the American Horse Exchange, and Col. S. D. Bruce, the compiler of the American Stud-Book (the fourth volume of which will be ready in a few days), have formed a copartnership for the sale by auction and at private sale, and for the purchase on commission of both thoroughbred horses and cattle of all kinds. They have taken offices at No. 4 West Twenty-fourth street (Fifth Avenue Hotel), where information concerning thoroughbreds generally will be furnished. The rooms will also be made attractive in a general way for those who wish to discuss "horse" from a racing standpoint.

Archer and the Grand National.

During the week ending the 23d ult. there was a left-handed rumor afloat in England that Fred Archer might wear his brother's colors, and ride Dog Fox in the forthcoming Liverpool Grand National Steeple-chase. Dog Fox is nominated by Charles Archer. He is five years old, by Xenophon, and is handicapped at 145 pounds. He won the Second Royal Oak Steeple-chase at Liverpool last November, and was subsequently purchased by Charley Archer for 230 guineas. It is scarcely possible, even if Dog Fox runs for the Grand National, that Fred Archer will ride him. If he does, he will not be the first Archer that has rode over the Liverpool course, for in 1855 William Archer, the father of Fred and Charles, rode the winner, Little Charley, at 147 pounds. He heat a field of fifteen in 11 minutes 5 seconds. The odds, at last advices, were 33 to 1 against Dog Fox.

The Turf in Mexico.

The breeding of thoroughbred and American stock in Mexico has greatly increased. The programme of the Mexican Jockey Club devotes \$7,950 for purses. The races that are interesting to foreign-breds are as follows: First meeting—Sunday, April 20th, purse of \$1,000, for Mexican half-bred horses, four-year-olds; a purse of \$800, for thoroughbred three-year-olds; a purse of \$300, for trotters, to ensly, 3,000 metres distance. Second meeting—April 27th, purse \$300, all-aged handicap, half-breeds, 1,500 metres distance; purse \$2,500, for thoroughbred three-year-olds. Third meeting—May 4th, purse \$1,000, all-aged handicap, for thoroughbreds, 2,400 metres distance; a selling purse, \$500, 1,500 metres distance. The Jockey Club proposes to give two meetings more, and will devote \$5,000 to purses for foreign-breds.

Bodine, the old time campaigner, is now doing duty on the road at Worcester, Massachusetts.

important matter was to feed him; and if after giving your opinion you should deem it prudent to indict this on your readers, I shall fondly hope that while, perhaps, a few will kindly give the result of their comparative tests, some of the shrewd attorney, failing to bring out the point he wants, expersertes him with something like the above, and he "kicks" out just what is wanted.

Respectfully,

Deer Lodge, Montana, Feb. 27th. DYE A. MONDE.  
P. S. A friend at my elbow says: "Incorporate somewhere in the communication the query how much seed should be used to the acre where the wheat is to be used as hay?"  
D. A. M.

### Care of Colts.

I have experienced fifty years of farming, and can look back and see where many mistakes were made in the care of stock, and in not giving each feed and care as the best interests of both stock and owner required to accomplish the best results. It has been said if farmers would publish their failures, the reading farmer would see and note them, and so avoid them in his practice, which is true in many cases, no doubt. I will cite a few such cases.

I had a fine colt in the fall when it came into winter quarters, that was hooked by some horned animal, a cow, as was supposed; it was called an accident; the colt died. A neighbor lost one last fall in the same way; an accident, of course. The writer called his simply carelessness, and for years past has taken care that colts and horned cattle do not run in the same yard together, so no such loss has occurred in that way. Many colts at this season of the year are exposed to storms day and night, except, perhaps, a shed open to the weather or the sides of a barn or a stack of hay or straw. Many such colts are lost during the winter or spring and if not, are very poor, and in many cases covered with vermin; it takes quite a portion of the following summer to get them growing as they should do if well fed and protected during the winter.

The writer has tried both methods, that is a careless and scant feeding and housing, and also good feeding and housing, and finds it pays much better to feed liberally and house carefully from all cold, wet storms in the fall and early spring, also all snow storms and cold weather in winter. They should have plenty of room to exercise in, and plenty of time to do it in during all fair weather, as sunshine in winter is both life and health to all farm stock. We now have a box stall about twelve feet square for our colts to be wintered in, where they are kept nights and stormy days, and with such protection, and two quarts of oats and two quarts of shorts mixed, and fed one-half at night the other half in the morning, our colts grow finely during the winter, end go into the pasture in the spring as yearlings strong and healthy, and with good care during the summer following they will make a fine growth that any farmer might well be proud of.

I will mention an instance of a colt my son wintered one year ago for a neighbor; the colt was offered for sale in the fall for \$40, without a purchaser. My son, having a suckling colt to winter of the same age, was persuaded by the neighbor to winter his, he supplying oats to feed his colt night and morning, two quarts at each feed, with hay and a box-stall as mentioned. Some of our other neighbors said we would spoil the colt under such feed and treatment. Both colts had a stall side by side; both were turned in a yard all pleasant days. The summer past the neighbor hired his colt pastured on an adjoining farm with four other colts that had been well wintered, all of the same age; his outgrew them rapidly, and this fall when he brought his colt from the pasture, the writer weighed him; weight 950 lbs.; he had gained one pound daily both winter and summer, and the past summer here was one of extreme drought; consequently the feed was very poor the last part of the season. Had the usual rains fallen and the pasture been good, the colt would have weighed more than 1,000 lbs. at the close of the pasturage season. The price of the colt now is \$200, even at half that it has paid extra well to give him the good care he has received.—*Mirror and Farmer.*

A real good horse never lacks for a purchaser. Everybody who sees him wants to buy him whether he is for sale or not. All people like a fine horse. If he is of good size, well proportioned, stylish, he appeals to that innate sense of beauty, planted by the Creator in every human being. The horse has been made beautiful to cause people to love and admire him, just as flowers have been made beautiful that men and women may love them and cultivate them.

But all horses are not beautiful, because no pains have been taken to make them so. They have not been properly mated. No care or skill has been exercised in their breeding. Fine, stylish mares have not been selected, and the cheapest stallions have been secured, and thus farmers, by their lack of judgment, have got on their hands horses difficult to dispose of that will not command half the prices they would if properly bred.

The value of the horse stock in this country might easily be more than doubled by the exercise of more care and skill in breeding, and at this season of the year farmers should ask themselves what they can do to improve their horse stock. They should ever bear in mind that great law of breeding, that "like produce like"—that to have fine horses they must breed to them, that to obtain the best, they must breed to the best.

A Belgian veterinary surgeon reports to the Minister of Agriculture that he has cured confirmed glandere by giving at first five and then three granules of the sulphate or arseniate of etrychine every two hours for ten days; the dose was then reduced to two granules. A solution of sulphate of zinc was injected into the nostrils, and the farcy balls canterized. There had been no return of the disease for a year the time the report was made. Distinguished veterinarians, however, inform us that they should hesitate to pronounce the case a cure. They seem to think the disease liable to reappear at any time, and that the only safe course is to kill an animal known to be suffering from this malady. It is to be hoped, however, that experiments with the treatment of the Belgian will be continued until the truth is demonstrated beyond cavil. If the results are confirmatory the life of many a valuable horse may be saved.

A correspondent of the *Breeders' Gazette* says: In answer to inquiries I will give a sure remedy for lice on colts. I have used it on a two-year-old colt, the worst case I ever saw, with perfect success. I used Insect Powder (for sale by all druggists). Apply liberally with a bellows used for that purpose; it blows the powder among the hair to the skin. I applied it four times at intervals of two days. The little pests were all killed or disappeared. The colt received no injury from biting, and thereby eating more or less. It is harmful only as regards insects, and can be used in the coldest weather when you can not use liquid washes. I have recommended it in many cases with equally good results.

At this season of the year there is no doubt more mares to be found throughout the country that are heavy with foal than at any other time, and at no other time should they receive more attention. Their feed is no insignificant matter. The condition of the colt no doubt depends very much upon the nature of the food the mother receives during the time of pregnancy and especially during the last few months of this stage. Nature does not provide the amount of milk, nor is the milk of as rich a quality in the mare as it is in many other animals, hence the necessity of food which tends toward increasing or enriching the supply. This matter should be thoroughly studied by every one who has the care of a brood-mare.

## HERD AND SWINE.

### Our Particular Friend.

The cow leech, or common cow doctor, is a funny fellow, whose ways are as odd and unreasonable as they are cruel and barbarous. Withal he is a wise man, not only in his own imagination, but is thus regarded by his unsophisticated neighbors or townsmen, who resort to him as to an oracle, and place unlimited faith in his ability to cure any and all diseases of live stock clesed under his limited vocabulary, which is as droll as it is fantastic and void of common sense. He is the fellow who knows all about "hollow-horn," "teal-slip," "tail-ail," "mad-itch," "bloody murrain," "the humps," and,—end,—etc., etc.

Well, to digress from our customary dry, scientific lore, let us trespass on the domain of the man who knows more about it, and possesses more secret cures than we do, of course. He may laugh at our ignorance, or threaten us with dire consequences for so doing, but imagining ourselves secure behind our fighting editor, we will proceed to discuss the pet subject of "tail-ail," at least we will give another version of it than he does.

If a cow or an ox become afflicted with a chronic disease of any of the internal organs—with loss of appetite, of flesh, of vigor, or of strength—the tail is examined (by our wise friend), and the disease is pronounced to be the tail-ail or tail-ail. Are the secretions of the milk glands diminished or suspended—the disease arises from tail-ail. Has paralysis of the extremities commenced—it is produced by the tail-ail. Nay, even if the poor beast has been "witched," it is the tail-ail. We are informed that this disease originated in or is located in the end of the tail; that unless something is done, it soon passes along the cow's tail to the back, and the animal must then lose the use of her legs; she falls off in appetite, the milk ceases to flow and she will soon die, unless some remedy is applied for the tail-ail. And what is that remedy? Why, cut off the cow's tail, and you then get rid of the disease and the part affected. Some, however, less cruel or more scientific in their treatment, simply make an incision into the under surface, allow the wound to bleed freely, and then bind up the part, filling the wound with a mixture of tar, salt, etc. The disease in ordinary cases is said to consist in a softening of the bones about the extremity of the tail, and is to be distinguished by the point of the tail being easily doubled back upon itself, and having at this doubling a soft and rather crenitating feel.

But let us inquire what is the healthy state of this organ, and what is its use? The tail is lengthened out to the extent of about three feet, and is formed like a common whip. Towards the extremity the bones terminate gradually, becoming insensibly smaller as they approach to their termination. At this point is found a soft space, which is said to be the seat of this disease; beyond this, again, a firm swelling cartilaginous portion is found, covered with hair, to brush off the flies within its reach. Now, why have we the long column of bones, the termination with a soft space of a few inches, and this thickened, hard, cartilaginous part of the very extremity, and that extremity covered with hair? Why, but with a view to form a whip to drive off, with the greatest possible effect, the insects which wound and torment the animal. Here the column of bones form the shaft or handle of the whip; the soft part the connection between the handle and the thong—the coupling; while the thickest extremity may be easily recognized to represent the thong, and the hairs to form the lash or point. They have thus a whip to drive, and a brush to whip off their enemies as these make their attacks, and so complete a whip is it, and so readily wielded, that one is led to think that even the coachman himself has borrowed a lesson from its flourishes. The softness of the extremity of the tail, then, is not a disease, for every cow would otherwise be diseased; it is the natural structure, intended to allow a free and extensive motion. In some cases mortification may have attacked the extremity of the tail, as the result of violence or local external injury, or from being frost-bitten, but this is not the kind of tail-ail to which the cow leech has reference when he talks about tail-ail.

### Successful Dairying.

[San Luis Obispo Tribune.]

Mr. A. Tonini paid us a visit on Saturday last. He is engaged, in company with his brother, in dairying, owning a tract of 1,730 acres of the Corral de Piedra Rancho, upon which he grazes 140 cows and a small number of young stock cattle. Mr. Tonini usually milks 100 cows, and makes an average of two boxes of butter to each cow, which he says is the usual average in this county, although one box and a half was thought a good average in Marin county, where he was engaged in the same business for a number of years previous to 1872, when he came to San Luis Obispo. Mr. Tonini usually receives very near the highest price for his butter in San Francisco, which is his market, the price averaging him over 30 cents per pound, or about \$30 a box of 92 pounds. He raises upwards of one hundred calves each year, worth \$20 each when one year old, and a small number of ewine, and all this is done by the family's work with the hiring of one and sometimes two men. His place is on the eastern part of Corral de Piedra in the foothills of the Santa Lucia, he purchasing a number of years ago, when the rates of land were much less than at present, but the fancy prices now ruling do not disturb him. He cultivates no land but a small garden for household purposes, saying it does not pay to feed cows, that when the grass is insufficient the cows should be given a rest from milking, and that when they again commence giving milk they do much better than if kept up by being fed and milked later the preceding fall. This is not what is generally advocated by the best farmers who cultivate mangel wurtzel, carrots, pumpkins, corn and hay, and make silos and ensilage, and import meal and oil cake, and sow alfalfa and evergreen millet, and Australian rye grass, and do many other things for their cows, but the object of all is to make money, and this Mr. Tonini has done. With 1,730 acres of hilly land without cultivation, 140 cows and the labor of six persons, an income of eight or nine thousand dollars, of which—not counting interest—

seventy per cent. is profit or pay for the family's labor. We do not advocate the style of dairying that never provides other than grazing for cows, and would like to compare the result with dairies of equal capital, where improved stock and the most advanced methods of cultivating and importing feed, patent machinery, etc., are employed.

### Feeding Young Pigs.

A correspondent of the *Rural and Stockman* says: Please tell your friends that sweet milk is not good for pigs. For the first day or two new milk may be good with occasionally a very little molasses in it. Put this in if the excrement is hard and then perhaps in proportions of a teaspoonful of molasses to a quart of milk. But never give sweet milk longer than two or three days. And here I will mention some other facts that some readers may not know. The important point in feeding sows with pig is to feed light, loosening food to a great extent. More than one-half the pigs lost at birth are victims of the feverish condition caused in the sow by too exclusively feeding of corn and other heating food. Sows are often furious and refuse to let the pigs suck from the same teat. Therefore first and foremost keep the howels moderately loose during the period of pregnancy. And I may here mention that the same is true of all animals and especially horses. Remember, too, never to let a sow, either when with pig or with suckling pigs, have any milk from a cow freshly come in, until the milk is good. It is almost sure death to the young.

### Hog Quinsy.

Remedies for this disease multiply. It is stated by breeders who have had experience with the trouble that sulphur and pine tar mixed and given to the hogs is an almost certain cure. It may be put into the feeding troughs, and there is no danger from overdoses. Others have used sulphur and slacked lime sifted over the feed in the troughs with complete success. The disease requires strong antiseptic treatment, and while charcoal will answer in the earlier stages, the sulphur and lime will be most satisfactory as to results in advanced or well developed cases.

Hogs are expected to live in, be surrounded by and thrive upon more filth than any other of our domestic animals. Indeed many people never think of cleanliness in connection with hog-raising. This is a mistake which reveals itself very strongly in the sanitary condition of our swine. It is well known that hogs are more liable to epidemics than any other stock, and this fact is to be accounted for largely by the fact noted. A writer on the hog says that impure water has destroyed more hogs than any other one thing. They can be induced to drink filthier water than other domestic animals, and they get it. They are made to drink the least desirable water and get least of it, when in fact they need a great deal of water. During dry seasons swine diseases prove quite fatal along water courses, because the water becomes stagnant and impure. Many diseases are due to minute disease germs, the vitality of which is preserved for some time in water. Swine ranging in low, swampy lands, where vegetable growth decays, are subject to this decay and the heat and poisonous gases in connection therewith.

A correspondent of the *Germantown Telegraph* recommends the following to restore healthy action after calves have been suffering from ecour: "Take powders of rhenbarb, carbonate of potash, dry or green peppermint plant and powders of cinnamon—of each equal quantity by weight. Pour on these boiling water to make a strong decoction, and give in repeated small doses every hour, or several times a day, according to urgency, until the discharges become natural, or discharges of digested food instead of ferment discharges." It is generally known that scalding the milk before feeding will usually remedy ecours in calves if taken in time. Checking the discharges too suddenly is a common mistake, as the drugs usually given for this purpose permanently injure the digestion, which is all important for the animal either for beef or milk.

The grass crop is by far the most valuable grown in this country, or, for that matter, in almost any other; and yet how many farmers are able to tell just what grasses are produced on their premises, and whether substitutions could not be made which would be beneficial? The man who knows all about the varieties of wheat, corn and oats which he is growing is frequently at sea in respect to his pastures and meadows. This is not to be wondered at, inasmuch as our grasses are so largely a natural product, and the selection of seed has received so little attention. However, it is undoubtedly true that increased pains can be devoted to this department of farming with fully as much profit as to any other.

Two or three cows in even a large dairy will often so reduce the average production of the entire herd as to render a business unprofitable which would otherwise yield satisfactory returns. With the same amount of labor, care, food, etc., necessary for the maintenance of a poor cow as for a good one, it is not difficult to see how some men make money when similarly circumstanced with others who complain of loss. Have productive cows even at double the cost at which mean ones can be procured.

The fact that a boom in a breed of fine stock may expend itself, and prices sink to a lower level, is not to be taken as evidence that it is falling off in public favor. It often only indicates that it is really getting within the people's reach, the reduction only adding to its availability and popularity. This is well illustrated in the history of the Shorthorn in America. It was after the great Shorthorn craze had spent itself that this stock came to be so widely and thoroughly disseminated as it now is.

*Bakersfield Californian*:—A great many fat sheep are shipped from here to the San Francisco and other markets. Buyers are here constantly. One of these informs us that he has shipped to the San Francisco market, since the 26th of last month, 18,000 head, Messrs. Williams & Kerr, within the same period have shipped 4,000 head, and smaller lots have been sent away for slaughtering purposes by other parties. Fat mutton sheep constitute one of our principal exports.

Hog cholera prevails to a considerable extent in the western part of Iowa, where many fine herds have succumbed. Farmers along the Missouri river are becoming considerably alarmed, fearing a repetition of the devastation of 1877.

The American Government has received an invitation through the Imperial German Legation in Washington to participate in the exhibition of dairy products at Munich, from the 2d to the 12th of October, 1884.

General Topics.

The advance guard of the swallow regiment has appeared. Tuesday afternoon the welcome visitors alighted on the eaves of the stable, fluttered about the nests in careful survey, and twittering their approval in cheerful notes sailed away to report.

Hirondelles bring the comforting assurance that the long rains have come to an end, and that from now until the haymaking showers there will be only a slight dispensation from the clouds.

There was some damage done to the tracks. At the Bay District the big tank fell, and a part of the bulkhead on the first turn gave way. That damage was soon repaired by laying pipes to connect with the Spring Valley mains, and there was only a trifle of sand which slid into the course.

Three weeks yet to the opening day of the spring meeting, and if the omen of the swallows is a true token there will be eight breaks in the exercise in these twenty-one days.

There have appeared in the Eastern papers many paragraphs alluding to the withdrawal of George Lorillard from the turf. That these have been premature is evident from the following copied from the N. Y. Herald of the 12th inst.:

No gentleman is held in higher respect on the American turf than the popular President of the Monmouth Park Association, whose blue jacket with orange sleeves and the horse in training have been borne first past the post so many times to the gratification of the thousands who patronize our race tracks.

The prospects for a successful season for the Westbrook stable were never better than at present, and the horse in training are reported as being in excellent health and ready for the opening of the track exercise.

This popular turfman is not so easily dismayed by a little adverse turn in the luck that followed the Westbrook colors a few years ago, when first, second and third in the same race was the announcement of the telegraph board.

would prove more beneficial than on the southern peninsula. Located in the neighborhood of Santa Anita and Sunny Slope, there will be no danger from the malarial troubles of the present retreat, and there will also be the further benefit of outdoor life induced by overlooking the breeding and training of his favorites.

There are times when we are impressed with the idea that our southern breeders have advantages which must give them the pull over those that are north of Santa Barbara. Then, when we take into consideration the "stern logic of facts," theories are dispelled, and the conviction that any portion of California from Chico southerly can successfully compete with the more favored region.

Romero, Gibraltar, Sweetheart, Belle Echo, Echora, Del Sur, Eva, Ruby, Neluska, Len Rose, and many others testify that wine and fruits are not the only products of that country that merit celebrity, and then among the gallopers are Gano and Lucky B., the first named being regarded by many as the best race-horse ever bred in California.

That before this mooted point is near a settlement, we have full faith that California will have established the claim of being par excellence the race-horse region of this continent, and that by testimony that will be clear and convincing.

There is no question that valitudinarians are benefited by spending as much of their time as possible in the open air. That is when the atmosphere is of suitable temperament, and with plenty of sunshine. There is nothing so likely to give a relish to outdoor life as the breeding and training of horses.

There are very many days in southern California when it is compulsory for an invalid to stay within doors, and for that matter it is not necessary to go far from San Francisco to find a climate which will be suitable.

Such being the case, it is readily admitted that a score or more of miles must have still greater influence in moderating

the harshness of the trade winds. We beg pardon for calling them harsh, as on "our side of the bay" that is altogether too harsh a term to apply. From Pleasanton we hear that there has been scarcely a day during the winter when the track was not in order to exercise upon, though that is owing to the character of the soil.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

At Alameda.

On Saturday last the Alameda Sportsman's Club had its first medal match of the season, and the attendance was quite up to the membership, twenty-five gentlemen facing the trap.

Taken altogether, the score makes a poor percentage, and the club must shoot better to-day if it means to score another victory for the Silver Trophy.

Table showing scores for individuals: Precht, A. Scherwin, Stewart, T. Scherwin, O. Brown.

After the above shoot Haile and Edson shot a match at three pairs of double birds, which was won by Edson.

Precht and Brown then put up \$25 each for a match of five birds, thirty yards rise, Hurlingham rules.

Mr. N. E. White, for several years editorially connected with the Sacramento Bee, and widely and favorably known as a sporting journalist, has resigned his position in the Bee office.

The Gilroy Rod and Gun Club will hold their first clay pigeon shoot of the season next Friday 28th instant.

The white quail has long been spoken of as a rara avis seldom met with. Now comes a story that a jet black quail was lately seen in a heavy in Calaveras county, by a citizen who is quite reliable and sober.

The Tournament at Red Bluff.

Our readers are aware the Tehama County Gun Club were to have a live pigeon tournament at Red Bluff on 17th and 18th of this month. As the event was a novelty in the county, the entrance open to the State, and the prizes large, it proved, as it ought to do, a perfect success in every respect, and reflected great credit on the committee of management. The attendance was very large, embracing many of the best shots from many sections of the State. In some cases the hotel proprietors had to procure beds in private houses for the accommodation of their guests. The hospitality and kindness of the Tehama Gun Club towards the visitors, are warmly commended. Among the leading spirits of the trap present, we notice the names of Crittenden Robinson of San Francisco, Merrill of Stockton, the Bassford brothers of Vacaville, McIntosh of Chico, Magonigil of Arbutuck, Scott of Chico, Hopping of Petaluma, and Mr. Tucker, the popular Parker gun agent. The day was everything that could be desired, excellent for the contestants and enjoyable to the spectators.

By ten o'clock, the hour appointed for the match to commence, the grounds were covered with vehicles, pedestrians, and refreshment tents, where the wants of the inner man were amply supplied on reasonable terms. Forty-five gentlemen entered the lists. Messrs. Edward Landis and Oscar Robinson were appointed judges; Jackson Hatch and L. C. Kersey scorers, and Michael Barnes trapper. The decisions of the judges were acceptable to all, and perfect harmony prevailed throughout the match. It was determined the forty-five contestants should shoot in squads of nine, the position of each squad and the men forming it to be decided by lot, each man to have four birds, and that the rules of the State Sportsman's Association should govern. The shooting was very good, no less than fifteen men out of the lot making a clean score of four, and seventeen killing three birds. The following is the score of the first shooting:

Table with columns for names and scores. Includes sections for First Squad, Second Squad, Third Squad, Fourth Squad, and Fifth Squad.

We now come to the shoot-offs for the different prizes. For the first money, \$150, there were four contestants. Contrary to first report, Merrill of Stockton beat Frank Bassford, the latter missing his two last birds. The score was:

Small table showing scores for Merrill, Bassford, Magonigil, and Morgan.

This closed the first day, with Merrill taking first prize, \$150; Bassford second, \$100; Magonigil third, \$75; Morgan fourth, \$50.

The second day opened inauspiciously, the rain commencing at 8 o'clock in the morning, and continuing nearly all day. The shooting began with those with eleven birds to their credit, and the following nine men faced the trap in spite of the rain.

Table showing scores for various shooters on the second day.

The result gave Mr. Hopper of Petaluma fifth prize, \$40; Crittenden Robinson sixth, \$20; Crothers seventh, \$15. Much excitement prevailed while Hopper and Robinson were shooting, but they were too evenly matched to encourage large bets. For some reason we have not learned, Robinson did not shoot at his two last birds.

This closed the regular shooting, but the day was finished with several outside matches at pigeons and glass balls. We have not space to give the full details of all these, and must content ourselves with the names of the winners. In the live-bird matches, the first six double birds Simpson, won with five birds, taking \$15, with Hareison second, taking \$5. Then came an unfinished double bird match, commenced the day before, between Lopez, Deveney, Hareison brothers, Simpson and Parker, for a \$35 prize. A. J. Hareison won with a clean score. The concluding match was a freeze-out for \$35, which Clements won with a clean score. The records of the glass-ball matches, received by this morning's mail, must be laid over until next week. The shooting was good in these matches.

In reference to the general management we have only heard one complaint, viz., that there was a great deficiency of birds. The local papers say the county was scoured for birds, and all obtained that possibly could be obtained for love or money. Perhaps, therefore, the Committee of Management is not so much to blame in this matter as some appear to think. During the tournament only one man was seen under the influence of liquor. We record this fact with much pleasure, for it upsets the doctrine of the Salvation Army folks, that legitimate sports encourage dissipation and immoral practices. The tournament wound up with a grand ball at the Opera House, which is said to be the very finest ever given at Red Bluff.

The Parker Gun Club, containing a number of promising young shooters who only want a little experience to make a name, met last Sunday at Colma, for a practice, preparatory to shooting for the club gold medal. Colma, is spoken of as a pleasant place for such meetings.

There will be no trap shooting at San Bruno until Sunday, 30th inst. Then the crack California Wing Club will hold its opening medal match for the season. Owing to the inclemency of the weather this match has been postponed two weeks in succession.

To-day, at Bird's Point, Alameda, the second match between the Gun Club of San Francisco, and the Alameda Sportsman's Club, for the silver cup given by the Messrs. Pierce of Oakland, takes place. It will be remembered, that last year the Alameda Club won, contrary to general expectation, as the Gun Club contains some very fine shots. This year, of course, the latter are the challengers, and it is quite an open question, whether they will not get beaten again, as the Alameda Club is strengthened by the addition of some very steady shooters. Both clubs have put forth their best men to-day, and whichever win they will make a close and exciting contest. Betting is about even on both, with a slight preference for the Gun Club. The teams are as follows:

The Gun Club.—H. Babcock, Thos. Ewing, Ramon E. Wilson, C. W. Randall, C. P. Gordon, A. W. Havens, W. H. Hanson, W. J. Golcher, J. K. Orr, and F. S. Butler. We presume Mr. Orr will captain the team.

The Alameda Club.—Knowles, Upham, Crellin, Edson, Wadsworth, Williams, West, Haile, Mayhew and Adams, with four good men as reserve to choose from, viz.: Goodall, Edwards, Norton, and Haskell. Mr. Thomas Bennett will act as captain. Those taking pleasure in trap shooting should certainly attend Bird's Point to-day.

To-morrow, at the Oakland Trotting Park, Messrs. Slade and Maskey will shoot their much-talked-of match, the conditions of which have been so often given that it is unnecessary for us to repeat them now. We may, however, give some specialties mutually agreed upon. The match will be shot under the Association Ground Trap rules, with these exceptions: A shooter killing a bird on the ground with his first barrel is allowed another bird; a shooter has a right to "no bird" a non-flyer, before half a minute has elapsed from the word pull being given. After that time the judges are compelled to order him a fresh bird. There is little use in speculating on the winner in this match. Both are known to be able men at the trap, and both have a host of staunch friends and admirers who will listen to no compromise in supporting their favorite. Hence, betting in the match is unusually brisk, both sides offering odds, pretty large ones too, on their choice. If Maskey is in form and shoots up to his record, he is always a dangerous man to meet at the trap. Slade has the reputation of being very uniform in his shooting, and at the distance stipulated may have perhaps a slight advantage. Now, gentlemen, on the outside, take your choice.

At the Montgomery Market, on the Market-street side, we saw the largest black bear, on Wednesday, it was ever our lot to see. When dressed it weighed 872 pounds, and was very fat. The brute had a history which we got from Hoffman and Wienne, who keep the market. For a long time he had been committing depredations in Mendocino county, on a large scale, and at last the Supervisors offered \$100 reward for his carcass, dead or alive. This started out a hunter named Dennis on the bear's haunts, who followed him up for nine months, pinging him at times with balls, but never fatally until a few days since. As the carcass hung up dressed we counted seven bullet holes quite plainly to be seen, four in the head and three in the body. Two holes in the back were very large, but sending a bullet into that mass of fat was little better than sending a bullet into a bale of cotton. Finally Dennis found a soft spot, and got his \$100. Mendocino rejoices at being free from that big black bear.

THE RIFLE.

At Alameda, Schuetzen Park.

The event of the week was the gathering of the California Schuetzen Club, last Sunday at the Alameda Park for their first festival of the year, and the number of members present, and the scores made were worthy the occasion. Over one hundred members contested for the eighty prizes provided, which, in cash and articles of value, amounted to over \$750. If anything were wanted to prove the healthy condition of this distinguished organization, these two facts do it completely. The number of spectators not participating in the shooting was greater than the number of members, another fact that must have been gratifying to the club, as showing the interest taken by the general public in the festivals of the Schuetzens. A better day for good rifle shooting could not have been enjoyed. The atmosphere was clear and cool, without sufficient wind to interfere with the accuracy of the shooting. While the old leading shots of the club, such as Messrs. Stanton, Jacoby, Kuhl, Strecker and others, sustained their reputation by making fine scores, it was noticeable they were crowded closely this year by several younger members of the club, whose shooting is of the highest promise. The latter were neatly complimented by President Jacoby on Monday evening, as each received his prize at the distribution. At noon, as usual, the shooting was suspended to partake of the elegant lunch always served at the festivals. On this occasion, Mr. Philo Jacoby, as president, entertained some distinguished guests who were present, viz: H. L. Childs, president of the Bodie Rifle Club; Thomas H. Rule, a member of the same association; Captain Greiner, who commanded the California team at Philadelphia in 1876; H. C. Smith, who won the diamond trophy in the same year, and several other gentlemen. At 1 o'clock the contest was resumed, and the firing became more rapid as the hour of closing approached. On Monday evening we accepted the president's invitation to be present at the distribution of prizes. The money prizes for the greatest number of rings came from the entrance-money of the contestants, and ranged from \$25 to fifty cents. The prizes of silver-ware, jewelry, watches, pictures, etc., for highest scores at the honorary target were presented by outside friends and members of the club, and generally were wisely selected both for ornament and use. After the distribution was over the grand goblet of the club, won at Philadelphia in 1876, as usual was filled with champagne, and every one present took a hearty draught in commemoration of that great triumph and in wishing the club prosperity. Then followed a general lunch and general fun, good-natured jokes flying round hot and fast on all sides. Before closing we ought, perhaps, to state the shooting was off-hand at 200 yards; all rifles not over 45 caliber, and all sights except the telescope were allowed. A bull's-eye counted either 24 or 25. Strecker, on receiving his \$25, first cash prize, was warmly greeted, all present testifying to the grand character of his shooting. The score:

Table listing names and scores for the rifle competition.

The prize-winners of the honorary target number 65 in all. The following twelve made the highest scores, as here seen, together with prizes selected:

- First—W. Ehrenpfort, 71 rings, silver soup spoon.
Second—Philo Jacoby, 70 rings, beautiful painting, called "Schentzen Lisel."
Third—H. C. Smith, 70 rings, silver watch.
Fourth—J. Utsehig, 69 rings, cameo ring.
Fifth—J. Fischer, 68 rings, silver goblet.
Sixth—J. Stanton, 68 rings, set of silver spoons.
Seventh—A. Strecker, 68 rings, set of silver spoons.
Eighth—L. R. Fuller, 67 rings, set of silver spoons.
Ninth—A. Rahwyler, 67 rings, gold sleeve-buttons.
Tenth—C. Sagehorn, 66 rings, luxury robe.
Eleventh—F. Kuhl, 66 rings, china tea set.
Twelfth—F. Boeckman, 65 rings, gold ring.

At the Presidio.

The postponed match between the two Police Teams and Troop M, 1st Cavalry, came off at the Presidio last Saturday, ending in a victory, this time, for Police Team No. 1. The next match will most probably settle the ownership of the Silver Trophy, as it has now been won twice by Troop M, twice by Police Team No. 1, and once by Police Team No. 2. The contest, on Saturday, was not all close, No. 1 beating No. 2 by 25 points and the Cavalry Team by 48. The score:

Table showing scores for Police Team No. 1, Police Team No. 2, and Troop M, First Cavalry.

Presuming some members of the police teams engaged last Saturday will shoot again to-morrow at Shell Mound in the match with the Fifth Infantry Team, the above record becomes interesting as a guide to gauge to-morrow's struggle. The percentage of No. 1 was 85 7/10ths; of No. 2, 78 4/10; together the records reached \$1.73 which is quite good, but it is not good enough, as we show below. Yet, although the Fifth Infantry Team appear, at present, the stronger, whoever may be selected in the Police Team, we do not regard it as a "dead thing" for either side by any means. To win will require some very good shooting.

At Shell Mound.

Colonel Ranlett and his command were out on Sunday shooting for positions in the match to-morrow, and all parties did good work. The Colonel has fourteen good and true men from whom to select his team, and their practice on Sunday shows the following scores. The first ten shots at 200 and 500 yards were as follows:

Table showing scores for various shooters at Shell Mound.

This score gives each of the eleven men an average of 42.8, or a percentage of 85 6/10ths, or in putting them all together it gives the good percentage of 85 6/10ths. In addition, St. John and Wallace of Co. C., Petaluma, have to be heard from. Afterwards, the following eight men, of the Field and Staff alone, had a practice with equally satisfactory results:

Table showing scores for Field and Staff members.

We have been careful in selecting the last shooting of the contestants for to-morrow that the public may reach a fair estimate of their strength. The match is exciting much interest and speculation, with the "brave soldier boys" a little ahead in popular favor.

At San Jose.

Under the rules of Fifth Battalion for marksmen making first-class, 90 to 100 per cent.; second-class, 80 to 90, at 200 yards, the following members of Company B, San Jose, have reported as qualified for January and February in first ten shots in competition, viz:

Table showing names and percentages for Company B marksmen.

This battalion is becoming so conspicuous for good shooting, that it is to be hoped that the members of Company B will imitate the example of Sergeant Haight, their comrade, and qualify now at 500 yards as sharpshooters.

So far Lieutenant Fred Kuhl has heard of no acceptance of his challenges to the police riflemen. Like the Lieutenant, we do not think he will. What between Ranlett and Kuhl, who mean what they say, it will not be wise, in future, to use an idle hunter of shooting any man in the State at any distance. Such talk does not sound well to some men. Kuhl makes the eighth man in this neighborhood who is ready to accept the banter. Surely that's plenty to choose from, if it is not too dainty in his taste.

Busy Days.

We have a number of letters from warm friends, that remain unanswered, and, try as we will, there is an absolute necessity to defer replies until the spring meeting comes to a close. They demand other attention than curt notices of having "come to hand," and the pleasure of receiving them would be marred if only brief acknowledgments were tendered. To give an idea of the reasons for the delay it may be proper to state how the hours are occupied. Breakfast at six o'clock, and from then until half-past seven, writing. Living about three-quarters of a mile from the track, and with only one jockey, Sir Thad and Cito compel a double trip, and before they are attended to it is within an hour of high noon. Antevolo has to be looked after, though his work is mostly confined to jogging on the road under the care of the man who has him in charge. Then there are buildings going up, improvements of the little place, especially superintending the erecting and finishing of the shop and the machinery therein, planting trees, shrubbery, etc. Before noon luncheon, and then the trip to the city, which in many instances has to be given up. Back in time to see the colts after their walk, and, if possible, oversee them during that part of their exercise. Dinner at six, though with a hearty appetite the noon-day meal is the mainstay, and from that time a glance over the papers, and write until bedtime at ten o'clock. There are, of course, experiments going on, and the personal care of the feet of the colts, and new boots to try, that is new patterns for the horses, and a new device in saddles, and tests of the malleable tips, etc. The secretaryship of the Pacific Coast Blood-Horse Association, dictating letters on that and other business, and yet the sketch is incomplete, as there are a few mares of our own and those of others on a visit to XX to look after. The

eight years' fight in relation to the use of tips has not ended, and there is not a day when that and the proper treatment of the feet does not claim a good portion of thought and study. When there is any variation from ordinary procedure the whole is carefully noted in the daily journal, nothing being left to memory, and this at times entails retrospection, and looking over old volumes of manuscript to learn what former trials have been shown. As we have frequently stated, little faith is put in theories until verified by actual practice, and we trust that these busy days may prove beneficial to others, and make amends for the negligence which unanswered correspondence implies. "After the races" we shall endeavor to bring up the work, and make visits so often promised.

Elaine's Twins.

In the short article in relation to the death of the twins from Elaine, some thought that there was an implied charge of want of attention as being the cause of their loss. This was far from our intention, and such a construction could only be based on the statement that in one case the saving of life was due to the care bestowed by the attendant. Whoever is acquainted with the admirable system that prevails at Palo Alto need not be informed that such a thing as lack of care is out of the question, and that mares which rank many degrees lower than Elaine are as carefully looked after as it is possible to have them. The object in referring to the case of the Alhert W. twins was to show the remarkable escape from the usual course, and the lives of these lung in the balance for many hours. Had they been deprived of the care awarded even the great luck of living after birth would have been of no avail. In thirty years close attention to the breeding of horses this is the first instance we have known twins to live, and in conversing with men who have had still longer experience, the chances of both living are rated as being less than one per cent. of the number born. There are some strange instances. A year ago a mare we bred and brought to California had twins. One was evidently a month further in advance than the other, and the double conception and the appearance of the foals agreed with the services which were thirty days apart. The most careless would give proper attention to as distinguished a brood-mare as Elaine. With the system and perfect arrangement at Palo Alto neglect is out of the question, and the least deviation from the requirements ensures instant dismissal.

Champion Stallion Stakes.

A reference to the advertising column will give the particulars of the Champion Stallion Stakes, Monmouth Park for 1885, and from that it will be seen that it is of importance enough to warrant several of our California sires being named in it. In the first place it is one of the largest stakes in the country, aggregating for this year \$16,000 besides the stakes of the colts which will be entered, and then again the right to name in the Lorillard Stakes is restricted to the get of those named in the Champion Stallion Stake. Having received numerous enquiries regarding this stake the conditions may be more clearly understood by repetition, and some change of phraseology. Thus an owner of a stallion or those interested in his get signs a contract after the form given in the advertisement, filling the blank with the name of the horse, and the other spaces with the singular or plural, as the case demands. The amount of subscription is due on July 1st, 1885, and this renders all of that horse's get of the proper age foals of 1883 eligible. The Association adds \$5,000; \$3,000 of which is divided between the owner of the stallions whose colts run second and third, and the men who name them in the two-year-old stake, that nomination being open until the day before the race. For instance A, B and C are the stallions named, and the colts which rank first, second and third in the race are in the same order as written above. The winning colt receives the whole amount of the stakes excepting \$3,000. Of this the stallion B gets \$1,000, the colt of B \$1,000, C gets \$500, and the colt of C \$500. Should B be the sire of second and third, B would get \$1,500, and his colts the same amount. But a subscription in the Champion Stallion Stakes also entitles the right to name in the Lorillard Stakes for 1886. This is a stake of \$500 each, to which \$5,000 is added by Pierre Lorillard, with only \$10 forfeit if declared by January 1st, 1885, and \$50 if declared January 1st, 1886. The Stallion Stakes close on the 1st of April next, and the Lorillard on the 15th of August next. The Association adds \$1,000 which goes to the second in the race, so that there is a liberal return for the investment, when both these stakes are taken into consideration. It is also manifest that the get of a stallion named in the above has an increased value, and this is well understood in the East that men who do not race enter into the engagement for the purpose of enhancing the price of the

colts they rear to sell. It is beyond question that to make the breeding of race-horses profitable in California there must be other ventures than those offered at home. To attract purchasers it must be made palpable that the breeders have confidence in the stock they are rearing, and this strong enough to name them when they will come in competition with the best of the land. Even that will ensure the attention of those who are ready to pay large prices for those which are likely to prove winners, and when the superiority of California-bred colts is established by actual performances on courses where buyers congregate, there will be a demand far beyond the supply of many years in the future. We have such an abiding confidence in the advantages that California presents for the breeding and rearing of race-horses, that we consider it as nearly certain as anything not yet decided, that the superiority will be placed beyond dispute if the chance be given to bring it to a test. There is nothing like these important stakes to make excellency manifest. The winning of a score of purses or that many minor stakes will not make the impression that victory in the Champion or Lorillard will ensure, and if a fair proportion of California sires are represented, one shall feel like "shouting" whenever the returns show that this has been done. There are seven sires here, at least, well worthy of being named, and the investment of \$3,500 will be worth many times that sum to the racing interests of California.

Book-Betting.

Killip & Co. make public the rate of which they are willing to lay against any named colt or horse winning the stakes and purses in the list. These are, of course, subject to be changed owing to the support given, and odds may be increased or shortened as the races approach. Book-betting is a comparatively new feature of racing in California, and it will take time to educate the general public to regard it with much favor. As an adjunct to pool-selling it is valuable, giving people an opportunity to make investments previous to opening the pools, and those who cannot be present can "hack their fancy" by letter. In that case it is necessary to be explicit and instructions given, if the public rates are changed, what to do. That the odds will appear "short" to those who are familiar with what is offered in countries where this kind of wagering prevails is certain, but when there is scarcely a chance for support of more than a few it is a necessity if the hook-maker desires to be at all conservative. There is a good feature, however, that if the odds are not satisfactory there is no law which will compel backers to accept the offer, and in that case they can "fix them" in the pools. This is the advantage which pools have over hooks, as the rates are made by those investing, and in place of having to accept the offer of an individual, the prevailing opinion is the governing power.

There is no necessity for commenting on the rates, as we have not the least desire to criticize or give opinions as to chances of winning. Necessarily this form of speculation has to be p. p., and those who take the offer of the hook-maker must bear in mind that their money is lost if the animal supported does not start, unless there is an express stipulation to the contrary.

Belle Meade Sale.

This important sale of thoroughbred yearlings will come off on April 30th, Belle Meade being within six miles of Nashville, Tennessee. So many of the crack race-horses of the past twenty years have been bred on this celebrated stud-farm, that to give their names would seem like copying a chapter from "Krik's Guide," and that this was to be expected is manifest when the pedigrees of sires and dams are studied. There are forty-nine in the catalogue, copies of which can be obtained at this office, and in the whole lot of dams there is not a pedigree that will not bear inspection. The favorite strains of fifty years ago are blended with the best of the present, and the combination of speed and stoutness in the parents cannot fail to ensure excellency in the progeny. The breeding of a large number of the yearlings offered is peculiarly adapted for this coast, being just the strains that are needed to mingle with those already here. We sincerely trust that our folks will avail themselves of the opportunity to secure the blood, and some of the very best are the get of Bramble, and as he yet ranks as "untried" it is a fair inference that they can be obtained for prices that will make the investment surely profitable.

Mr. J. B. Haggin will hold the first auction sale of Rancho del Paso yearlings early in May next. Only trotting colts will be offered at this sale, and all of the get of Echo, Algonia and Alaska, foals of 1883, will be on the catalogue. These colts are from selected mares, and will be a superior lot.

## Oakland Race Meeting—Closing of Stakes.

Next Friday the stakes and purses of the race meeting close, and though this is not very long to keep it in mind, there is apt to be a lapse of memory unless there are constant reminders not to forget. There is scarcely ever a stake in which, after the closing, but what some one, and generally a number, desire to get in, and the Secretary is put to the trouble of writing to each subscriber to obtain consent to the addition of the "sleepers." As there are thirteen stakes and purses an opportunity is given for choice of distance, and varying conditions which give a chance to all. That the track will be in first-rate condition is a foregone conclusion, and the only thing necessary to ensure a successful meeting is the co-operation of those having horses to engage.

## FISH.

## The Fish Commission.

The commissioners held their monthly meeting at Sacramento last Monday. The following is the *Bee's* report:

The Secretary read a communication from R. A. Smith, of Navarro Ridge, Mendocino county, complaining of the inability of the Commissioners to protect the fish in that county from sawdust and improperly constructed dams. The writer was somewhat caustic in his remarks about the powers of the Board, and said that if the Commissioners had no power to protect the fish, the people were taxed needlessly for their support, as they (the Commissioners) took from the people and gave nothing in return. The writer, whose letter was written previous to the calling of the extra session, thought that perhaps Governor Stoneman could be prevailed upon to make fish preservation a portion of the "extraordinary occasion" for convening the Legislature.

Commissioner Dibble said the matter had already been considered by the Commission, and they had arrived at the conclusion that action by them had been throttled by the work of the last Legislature on the sawdust question. He thought, however, that the question could be dealt with under the Sawyer decision. By complaining of the dumping of sawdust into the streams as a nuisance, and the District Attorney of Mendocino county would be so advised. Mr. Dibble also stated that since the last meeting he had written to the District Attorney of Solano county urging him to prosecute those persons who were violating the fish laws in the straits of Mare Island.

Commissioner Buckingham said that he had been in Vallejo himself looking after the wrongdoers. Five Chinamen were arrested, who were taking fish of all sorts and sizes with a crionly constructed line 3,000 feet in length, and which contained 8,000 hooks. They were tried by jury and found guilty—the first conviction for violating the fish laws which had ever taken place in Vallejo.

Secretary Dibble informed the Commissioners that he had written to E. A. Brackett, Fish Commissioner of Massachusetts, for plans and specifications of the fish ladders in that commonwealth. He thought they were the best in the world, and recommended that upon the arrival of the plans copies thereof should be mailed to all mill owners and dam proprietors. Commissioner Redding stated that some one had written him an anonymous letter charging that the dam of the railroad company in Monterey county, built to supply the Hotel del Monte with water, was not constructed so as to be passable to fish. On investigation, he had found the dam supplied with the most perfect fish-ladder he had ever seen. Moreover, the railroad company has, at its own expense, hired a gentleman who was formerly in the employ of the Fish Commission to foster and protect the fish interests in that locality, and under his supervision a large number of trout eggs had already been distributed thereabouts. Mr. Redding thought the company should be applauded for their good work in that direction, and the other two Commissioners concurred.

R. McIntosh, Superintendent of the Glenn Box Manufacturing Company, at Camp 25, on the Truckee river, wrote to the Commission that it was the desire of the company to aid in the protection of fish in that stream.

W. B. Bradford, representing the Sacramento Packing Company, wrote a letter replacing a lost draft for \$200 contributed by that company, and took occasion to compliment the Commission upon its work.

President Buckingham informed his brother Commissioners that 30,000 land-locked salmon eggs had just arrived for this State, from the United States Fishery at Bucksport, Maine, and are now at the express office.

Commissioner Dibble made announcement of the appointment of one Frazier to the Superintendency of the Shebley hatchery in Nevada county, and said that everything there was progressing favorably and satisfactorily.

Commissioner Buckingham said that he had received a communication from Livingston Stone, in which that gentleman stated that if a United States fishery car visited this coast this year he would send a lot of black bass.

Commissioner Redding said that a parcel of black bass had been placed in the Crystal Springs reservoir in San Mateo county, by the former Commission, and the last he heard from them they were doing nicely.

President Buckingham stated that there is at present a growl among local Sacramento fishermen over the use of spike-nets in the river. These nets were now in use in considerable number on private lands where the river had overflowed. He did not think the subject a serious one, however, and the Commission took no action in the matter.

A long and informal discussion then ensued regarding carp as a food fish. Commissioner Dibble thought them of little value, and said that he knew of a gentleman in Grass Valley who had 10,000 of them in private fish ponds, and could not get rid of them, because nobody wanted carp.

Commissioner Redding thought that the prejudice which has arisen against carp as an article of food was in a great measure due to the fact that the people did not understand how to cook them properly. He then proceeded to give his way of cooking a carp, and the description was so tempting, and the deliciousness of the carp so effectively drawn out, as to disarm Mr. Dibble's carping criticism, and make his mouth water.

President Buckingham then spoke of the outlook for the coming spawning season. He said it should be a most successful one, as the fish had had wide range, and no fishing had been indulged in up to the present. "From this time on, however," said he, "the fish will have to run the gamut

let, for there are 1,300 nets in the Sacramento river between the Straits of Carquinez and this city."

There being no other business before the Board, it adjourned until the time of its next regular meeting.

## The State Fish Hatchery.

Mr. J. C. Frazier, who has charge of the State Fish Hatchery at Shebley's on the line of the Nevada County Narrow Gauge Railroad, has made improvements in the establishment which will largely increase its hatching facilities, and will enable him, if the spawn can be procured, to hatch as many as 1,000,000 young trout in a single season. He finds that there is an abundance of pure water for all the purposes of an extensive hatchery, and considers the location on this account excellent, together with the facilities for railroad transportation by which spawn can be received with the least liability to injury, and that the young trout can be shipped when ready for distribution to any part of the State. Mr. Frazier is making arrangements to secure spawn of Lake Tahoe trout, and will go up to the lake in a few days to attend to the forwarding of the same. A shipment of land-locked salmon is also expected soon from the East, and besides these the Fish Commissioners are endeavoring to secure several shipments of spawn of the Modoc or Rainbow trout. Mr. Frazier is confident that he will be able to obtain sufficient spawn to hatch out at least 500,000 young trout of different kinds the present season.—*Grass Valley Union.*

## More Illegal Fishing.

We learn that on Monday Frank Derriman, of Soscol, came into town and lodged a complaint against four Chinamen for fishing in Soscol creek for trout, and for using a net. Officer Baddeley immediately started after them and brought them into town. One of them exculpated the others and pleaded guilty to two charges. He was fined by Justice Hunt \$50 on each charge, which he paid. Half of this amount will go to the informer, and the other half to the district attorney. The great trouble in these cases so far as activity in our district attorney's go, is that they are only paid for their trouble if the prosecution is successful. The law should certainly be altered in this respect. We intend to agitate the question when the proper time arrives. If the district attorney had sufficient inducements to prosecute all such offenders, poaching would soon become a losing business.

## California Trout Distributed.

A dispatch from Chattanooga, Tenn., states that the United States Fish Commissioners' car from the Wytheville, Va., hatchery had arrived with four thousand California trout to be distributed in the streams of East Tennessee, Alabama and Georgia. It is the most valuable lot of fish ever sent south.

Fish Commissioner Blackford shipped Friday last from New York, by steamship Maine, ten thousand California trout eggs, which have been presented to the Deutsche Fischer Verein at Gesteinnnde, Germany.

In order to encourage the healthy sentiment now coming to exist in the public mind in reference to the illegal and vagabond destruction of fish during the close season, we think it our duty to reproduce the following letter of D. N. on the subject. Almost every day we hear complaints of the same nature, and are assured the rascality prevails in almost every county in the State. As we have no hope of redress from the Fish Commissioners and county officers, we refer the Wildcat stream depredaters to the Alameda County Sporting Club. It will do no harm to extend the circulation of the subjoined letter.

Being a lover of angling, and consequently a protector of the finny tribe, I thought it but just to call the Fish Commissioners' attention to the depredations committed daily—especially on Sundays—by vandal poachers. In open violation of the law, poachers are depleting the streams of Wildcat in Alameda county, San Lorenzo creek and the San Mateo creek in San Mateo county. If the Sportsman's Club, which is supposed to protect game and fish in these counties, would trouble themselves a little and visit the above streams any Sunday, they would find a splendid harvest to swell the treasury of the county.

The officers in the employ of the commissioners are credited with much activity of late in hunting up violators of the law on the Sacramento river. While we rejoice the alien brigands and thieves are being properly attended to near home, we think the commissioners might extend their sphere of action and look after the white American citizens guilty of the same crime all over the State. A case in point came to our knowledge this week. Last Sunday, a score of shameless fellows stationed themselves at the junction of San Rafael creek and slough, and as it was too muddy to fish in the latter, slaughtered the salmon going up to the spawning grounds with shotguns, spears and clubs. A nice occupation this for white American citizens. Surely the commissioners might look after the miscreants capable of such barbarity.

The Sierra Valley *Leader* says, trout are now biting voraciously in Independence Lake. How is that fact known except by violation of the law? Is Sierra Valley an independent country governed by its own laws, or is it within the jurisdiction of California? We should like to hear from the law officers of the district upon this point. Of course, when once elected and safely in office, the judges, district attorney, sheriff, and constables are under no obligations to the people to enforce the laws. Some day before long there will be a shaking up among the dry bones of insolence and negligence of duty that will astonish a good many people.

Trout are reported plentiful in the streams of Mendocino county. How this fact comes to be known there, as elsewhere, without a violation of law, we cannot understand. If the streams all over the State remain high, as is now most likely, the prospects for a good trout season are promising.

Referring to the report of the Fish Commissioners, which we publish in full, we regret, they did not give their promising declaration of the validity of the trout law. The public are anxiously waiting for that declaration.

On Sunday last a gentleman caught a basketful of sea trout off the Lighthouse, Point Bonita. The fish ranged from half a pound to two and a half pounds each. The sea trout is a fine table fish.

Some fine flounders were caught on Sunday by private parties at different points on the bay, but all seemed inclined to keep the locality to themselves.

The Walton Fishing Club will not have an excursion party until next month, when the weather will have settled.

Smelt now give good sport off Saucelito. The run was strong on Sunday, and the fish large.

## ATHLETICS.

## A Funny Wrestling Match.

The *World* gives this description of the second tilt between Bibby and the Jap, which came off on the evening of the 10th inst.

Four hundred persons attended a wrestling exhibition according to Japanese rules at Clarendon Hall. They were at once disappointed and amused. They had expected to see a wrestling match, but they saw instead an affair which was neither a pitting nor a battling contest, though it had the general characteristics of both. Matsada Sorakichi and Edwin Bibby were the contestants. Matsada is a Jap, twenty-three years old, 5 feet 7 inches tall and weighs 185 pounds. He was stripped to the waist, wore red trunks and had his hair done up after the fashion of a car-horse's tail on a muddy day. Bibby is an Englishman, who looks something like Charles Rowell. Prof. Hoeffler seconded Bibby and Steve O'Donnell waited on Mr. Sorakichi. They wrestled according to Japanese rules, which Bibby did not understand. He was thrown at the first assault, as he put his hands on the floor. He denied the Jap's claim for the fall, but as the Jap is as ignorant of the English language as Bibby was of the rules, a wrangle ensued and the crowd roared with laughter and ventred advice to the principals.

A pantomime in which Pop Whittaker the referee and the principals were the actors followed, and at its termination the Jap seemed to have the better of the argument. The fall was not allowed. Then they were ordered together again and the same tactics were displayed by the Jap as in the preceding round. He clapped his thighs, stamped his feet and then sat down on his "hankies" and the crowd roared. Then Matsada sprang at Bibby like a "streak of greased lightning," butted him on the head and rolled him over, his hands touching the floor. Everybody laughed again, and Bibby laughed the loudest. Then "Pop" Whittaker said: "Mr. Sorakichi wins a fall," and Mr. Sorakichi raised himself on one leg and slapped his breast.

In the next buckle the men hopped around for 26½ seconds before Bibby's hands touched the floor. Matsada hit him a resounding thwack on the back, and looked pleased. Bibby looked scared. The crowd yelled.

In the fourth bout Bibby went on his hands in 10½ sec., but it was decided no fall. Then they struggled for what proved to be the final fall. Bibby butted the Jap and the Jap butted Bibby. The yells of the crowd were deafening. At the end of 52 seconds the Jap knocked the champion of Jersey City on his face and hands and won the match. As an exhibition the affair was amusing; as a match contest it was a hoax.

## Kittleman's Race with Johnson.

The New Orleans *Picayune* of February 25th, gives this report of the Kittleman-Johnson race:

About five hundred people assembled at the Fair Grounds yesterday evening to witness the great running match between M. K. Kittleman and H. M. Johnson. The match was one hundred and twenty-five yards, mutual consent start, for \$2,500 a side. The hard part of the track was rolled and prepared for the race, the course measured off, and the track divided by a string into a track for each of the runners. The run was toward the grand stand, and Kittleman had the side of the track nearest the stand.

W. R. Armstrong, Kittleman's backer, acted as his judge, and E. C. Howard acted for Johnson. These gentlemen also acted as timers. Pat Duffy was the stake-holder and referee.

The men appeared on the track very near 3 o'clock. Both were dressed in white tights and undershirts. Johnson wore dark blue trunks, and Kittleman's trunks were of a brighter shade of blue. The men made several unsuccessful breaks, and finally succeeded in starting themselves. Kittleman was the quickest in getting away and took the lead. Johnson ran close behind him, and the pace for the first one hundred yards was a rattling one. After this Kittleman increased his lead perceptibly, and Johnson seeing he could not win, slackened up. Kittleman won easily by six or eight feet. The time was announced as 12½ seconds, and none of the watches held by outside parties made the time longer. Kittleman displayed the qualities of a great sprinter, and if he goes to Europe will doubtless prove a match for the crack professionals there.

Both men were in fine physical condition, Kittleman weighing 166 pounds and Johnson 172 pounds. The muscular development of the men was the subject of much admiration. Kittleman's muscles seemed more compact and better knit together. The betting before the race was 2 to 1 in favor of Kittleman.

The Merton College sports of Oxford University were held February 28th, and were remarkable by the splendid performance of M. H. Paine, who won no less than six events: 100-yards race, 11 seconds, won easily; high jump, 5 feet 4 inches; 150-yards race, 13 3-5 seconds; 120-yards hurdle race, 10 1/2; 20 3-5; wide jump, 19 feet 3 inches; throwing the cricket ball 105 yards. Every event is a creditable performance, taking in consideration the bitter cold weather which prevailed on the day of the sports. Paine is the gentleman who ran so brilliantly against Macaulay of Cambridge at Lillie Bridge last year.

We have been informed by a gentleman who measured the track at the Recreation Grounds just prior to the Meriou games on Washington's birthday, 1883, and who is in every way competent to know, that three times around the track is a trifle over a mile; hence the writer of the letter to Tuesday's *Chronicle* from Tacoma, W. T., is entirely ignorant of the measurement of the track at the Recreation Grounds.

The wrestling match between Muldoon and Whistler takes place Monday evening. The sale of seats began Thursday morning and by evening everything was marked off except the main floor. It will doubtless draw an immense house.

The Williamsburg Athletic Club have secured a new ground. A fifth of a mile cinder track with easy raised corners will be made at once.

Archibald Maclaren died recently at Oxford, England. Maclaren's works on training are the very best ever published.

We understand that Ross and Peter McIntyre have arranged a three-mile race to take place shortly in this city.

The old bay stallion Tom Bowling, by Lexington, dam Lucy Fowler by imp. Allion, has been sold to N. Armstrong of Glendale, Montana, and will do stud duty in the territory. He is fourteen years old.

Caldwell will be the starter at the Chicago Driving Club both at the regular and mid-summer meeting.

## THE KENNEL.

## Field Trial Winners of America.

[CONTINUED FROM MARCH 15TH.]

**Puppy Sweepstakes.**—For setters and pointers whelped on or after January 1st, 1882; \$40 to first, \$30 to second, \$10 to third. Eight entries—setters. 1st, Countess C. (Dashing Lion—Armida), black, white and tan setter bitch, owned by J. M. Avent; 2d, Rush Gladstone (Gladstone—Donna J.), black, white and tan setter dog, owned by J. M. Avent; 3d, Pointer (Gladstone—Ress), black and white setter dog, owned by A. G. Renand, and Pride of Dixie (Gladstone—Countess Dinid), blue helton setter dog, owned by C. E. Wallin—divided.

**All-Aged Stake.**—Open to all setters and pointers; \$250 to first; \$150 to second; \$100 to third. Nineteen starters—eighteen setters, one pointer. 1st, Sue (Druid—Ruby), black, white and tan setter bitch, owned by P. H. Bryson; 2d, Gath (Count Noble—Peep o' Day), blue helton setter dog, owned by W. J. Crawford; 3d, London (Gladstone—Clip), black, white and tan setter dog, owned by W. H. Coleman; Foreman (Dashing Monarch—Fairy II), black, white and tan setter dog, owned by C. F. Crawford; and Grosnedale (Water's Grone—Daisy Dale), owned by William A. Buckingham.

**Champion Stake.**—Open to winners of first in any free-for-all stake; \$250 and silver cup to first. Two entries—setters. 1st, Gath (Count Noble—Peep o' Day), blue helton setter dog, owned by W. J. Crawford.

**Gilroy Field Trials.**—Inaugural field trials of the Gilroy Rod and Gun Club, Gilroy, Cal., November 7th—8th, 1881. Judges, C. Robinson, H. H. Briggs.

**All-Aged Stake.**—Open to all setters and pointers; silver cup and bamboo fly-rod to first; gold medal and Frank Forester's sporting work to second; silver medal and five sacks of shot to third. Six entries—setters. 1st, Rock, English setter dog, owned by Mr. Whittier; 2d, Sam, English setter dog, owned by C. Miller; 3d, Juno, English setter bitch, owned by E. Leavesley.

**Puppy Stake.**—For setter and pointer puppies; silver cup and bull-dog pistol to first; gold medal and Stonehenge's "Dogs of the British Islands" to second; silver medal and five sacks of shot to third. Five entries—setters. 1st, Phil, black and tan setter dog, owned by M. W. Stackpool; 2d, Juno, English setter bitch, owned by E. Leavesley. 3d, Joe, English setter dog, owned by J. W. Orar.

**Second.**—Gilroy, Cal., November 27th—29th, 1882. Judges D. M. Pyle, H. Horton, H. D. Bartlett and H. H. Briggs.

**All-Aged Stake.**—For setters and pointers, any age. Seven starters. 1st, Daisy, setter bitch, owned by E. Leavesley; 2d, Belle, setter bitch, owned by H. H. Briggs; 3d, Count Warwick, setter dog, owned by H. H. Briggs.

**Puppy Stake.**—Ten starters. 1st, Scott, owned by F. G. Ahell; 2d, Duke, owned by E. Leavesley; 3d, Bess, owned by F. G. Ahell.

**Third.**—Gilroy, Cal., December 3d—6th, 1883. For dogs owned in California, Nevada, Oregon and Arizona.

**All-Aged Stake.**—For pointers and setters, any age. 1st, Queen (Belton II—Belle), black and white setter bitch, owned by E. H. Farmer; 2d, Ola (Count Warwick—Leah), black, white and tan setter bitch, owned by P. G. Anzar; 3d, Cap (Count Warwick—Flora), lemon and white setter dog, owned by L. G. Horton.

**Puppy Stake.**—For setter or pointer puppies. 1st, lemon and white setter dog, owned by L. G. Horton; 2d, Fannie (Fred—Gypsey), black, white and tan setter bitch, owned by C. B. Kadung; 3d, Mande (Joe—Juno), black and tan setter bitch, owned by J. M. Donahue.

**Robins' Island Club Field Trials.**—Inaugural field trials of the Robins' Island Club, Robins' Island, L. I., November 27th, 1882. Judges, C. E. Pratt and H. D. Polhemus.

**All-Aged Stake.**—Open to members of the club only; dog collar to first; engraved dog whip to second; dog whistle to third. Twelve starters—setters. 1st, Fred, setter dog, owned by A. T. Plimmer; 2d, Romeo, setter dog, owned by Dr. S. Fleet Speir; 3d, St. Ives, setter dog, owned by L. Waterbury.

**Second.**—Robins' Island, L. I., November 20th—21st, 1883. Judges, Dr. S. W. Bridges and C. W. Pratt.

**All-Aged Stake.**—For setters and pointers owned by members of the Robins' Island Club; silver goblet to first, silver goblet to second, silver-mounted whip to third. Sixteen entries—fifteen setters, one pointer. 1st, Maida (Dick—Clio), black, white and tan setter bitch, owned by Dr. S. Fleet Speir; 2d, St. Ives (St. Elmo—Maida), lemon and white setter dog, owned by L. Waterbury; 3d, Don, liver and white pointer dog, owned by W. B. Dickerman.

**Brace Stakes.**—For braces of pointers or setters owned by club members. Two braces entered—setters. 1st, St. Ives, lemon and white setter dog, owned by L. Waterbury, and Doctor (Sid—Fan), setter dog, owned by W. H. Force.

**Robins' Island Club Derby.**—For pointers and setters. Six entries—five setters, one pointer. 1st, General Arthur (Emperor Fred—Wanda), blue helton setter dog, owned by Dr. S. Fleet Speir.

**First Pacific Coast Field Trial.**—Walltown Timbers, near Sacramento, Cal., November 26th—28th, 1883. Judge F. W. Dunn.

**Puppy Stakes.**—For setters and pointers owned on the Pacific Slope whelped on or before April 1st, 1882; \$25 to first, \$15 to second, \$10 to third. Six nominations—five starters. 1st, Bette Bow (Ranger Boy—Josie Bow), liver and white ticked pointer dog, owned by H. A. Bassford; 2d, Beatrice (Shokoe—Clark's Nellie), red setter bitch, owned by H. C. Chipman; 3d, Bow Jr. (Ranger Boy—Josie Bow), liver and white pointer dog, owned by G. B. Cosby.

**All-Aged Stake.**—Open to all setters and pointers owned on Pacific slope; \$25 to first, \$15 to second, \$10 to third. Thirteen entries—seven starters. 1st, Dorr (Dou—Lady), black and tan setter dog, owned by F. A. Taft; 2d, Beautiful Queen (Dilley's Ranger—Queen), liver and white pointer bitch, owned by J. M. Bassford, Jr.; 3d, Belle, native Irish red setter bitch, owned by H. H. Briggs.

We learn that the membership list of the Pacific Coast Field Trials Club is growing, and that indications point to a good trial this year. The Derby will have a large list of entries and many of them the peers, in natural qualities, of any dogs in the world. Mr. Bennett, the President of the club, is actively at work, and is determined to place his club on a par with the best of the older clubs in the eastern states. The estate of D. C. Sauborn has sold to Mr. G. W. Watson of Sacramento, a brace of Count Noble—Dashing Novice puppies which will start in this year's Derby.

Mr. Thos. Bennett, President Pacific Coast Field Trial Club, has presented to Mr. Walter W. Haskell a black, white and tan dog puppy, whelped February 12th, '84, by Bennett's Regent ex Royal Duke—Gift, out of Waddington's Daisy ex Carlowitz—Truc.

## The Waterloo Cup.

The following is the *Sporting Life's* account of the meeting:

After the result of the Waterloo Cup the glorious uncertainty of coursing, of which certain sporting scribes are so fond of prating, may for the time being at least take a back seat. As most people who know anything about coursing are aware, the Waterloo Cup is a sixty-four dog stake, and is justly regarded as the blue ribbon of the leash, just as the Derby represents the highest possible honor attainable by an owner of horses. On last Wednesday night, when in accordance with the time-honored custom the drawing took place at the Waterloo Hotel, 12 to 1 was still forthcoming against the favorite nominations of Messrs. Pilkinton and Miller. As, however, all the favorites were done with long before the fifth round was coursed, I need only refer at present to the odds forthcoming at the outset against each of the nominations that fought on the final phase of the battle. Against Mr. Deighton's representative, Middleton, who ran gallantly through the stake until the continuous victors were reduced to a quartette, and then only succumbed in the fifth round to the ultimate winner, Mineral Water (Mr. Marfleet's nomination), 40 to 1 was freely laid. Lord Sefton's nomination, Petrarch, who only just failed to get into the final, being cleverly defeated in the same round by the representative of Mr. Carnthers, Greentick, was almost friendless at 50 to 1. Of the two greyhounds that met in the deciding course, Greentick was thought so little of at the start of the coursing that 66 to 1 was to be had about the nomination for the asking, while as for the actual winner, Mineral Water, Mr. Meyer, who owns the dog, although he was nominated by Mr. Marfleet, had no difficulty in securing the nice bet of \$20,000 to \$200 about him, and 100 to 1 was freely laid against the nomination until Mineral Water had won his first course. The Waterloo Purse was divided between Mr. J. Evan's bk d p Escape, by Hubert—Evangeline, and Mr. R. Jardine's bk d Gladys, by Misterton—Annie Macpherson. The Waterloo Plate was won by Mr. Gibson's (Mr. J. R. Marshall's) r w t k d p Cocklaw Dean, by Lindahl—Blawearie, heating Mr. J. Winder (Mr. J. T. Crossley's) ns bk d p Cyril, by Humbert—Meg. Although backers fared shockingly as far as their operations went in taking the long odds, those who traveled to Alcar probably got their money back and a bit besides, as the results of the individual courses were, on the whole, considerably against the layers. If people must bet on coursing events, they had better confine their operations to speculation on the individual courses. "But," says the bold hacker in reply to my well-meant caution, "I cannot get away from my business to attend coursing meetings, and a man wants to be on the spot to bet on the courses if he is to have any chance of coming ahead." To which I make answer by quoting the dictum of a veteran sportsman who played the game both high and low in his time, and who some few years ago retired with a princely fortune, "there are only two classes of men that have any right to bet at all. Those who have no other business that makes any demand upon their personal attention, and those who are sufficiently wealthy to be able to lose every bet they may make without feeling the loss." For my own part, while I am an ardent admirer of the leash, and can enjoy a day's open coursing, when the hares are strong and the country free from those wretched drains that have proved the grave of many a good greyhound, I look upon any trifle I may be persuaded by kind, but invariably too sanguine friends to invest on the "longtails" on much the same principle that I regard an investment in Mexican mines or Transvaal gold-field shares. By-the-by, the Queen, who abhors horse-racing, takes something more than a languid interest in coursing, and when Lord Lurgan's Master McGrath won the Waterloo Cup in 1871 for the third time, Her Majesty issued her royal mandate that the clever brute should be brought before her. The greyhound was duly presented to the Queen and received sundry pats from the royal hand with much equanimity, but to tell the truth McGrath was sufficiently imbued with the spirit of democracy to fraternize with evident delight with the domestics in the servants' hall, where he was subsequently hospitably entertained with chicken boues and other unconsidered trifles dear from immemorial to the canine palate.

The pedigree of the winner is thus given by *Belle's Life*:

At last we have got back to a dog winner again for the Waterloo Cup, and this is fortunate, as for the last three years the other sex have had the best of it, through Princess Dagmar, Snowflight and Wild Mint, and in ten years six bitches have won it against four dogs. If only one of the last four, Middleton, had pulled through it would have been a very notable instance of high-breeding by the Waterloo Cup winner, Misterton, out of a double Waterloo Cup winner, Coomassie, and at no long interval, as Coomassie won in 1877 and '78, and Misterton in 1879. A Waterloo Cup has never yet been won by a combination of such great winners, the nearest approach to it being when Cock Robin, by King Death out of Chloe, was the runner up to Master McGrath in 1868. Mineral Water, the last addition to the greatroll of winners, has nothing like such honorable parentage to boast of, though he has a lot of good blood in him, and traces in somewhat remote ancestry to Waterloo winners of the highest order. He is by a dog that belonged to his nominator, Mr. Marfleet, namely, Memento, an ordinary runner only, by Blackburn out of Miriam. Blackburn was also the sire of Mr. Brigg's Braw Lass, the runner-up for the Cup in 1877; but he was not a first-class runner, though a well-bred one, by Lancaster, a very fast son of Cardinal York, and the dam of Blackburn, Kitty Malone, was by Canarado, the Waterloo winner of 1861. Here was the close hitting of Canarado and Cardinal York. Then the dam of Lancaster was Hurrara, by Sackcloth, who won the Waterloo Cup for Lord Sefton in 1854, and another well-known name appears in Mineral Water's pedigree, namely, Sencombe, the sire of Wee Nell, the dam of Brigadier, winner of the Waterloo in 1863, as Miriam, the dam of Memento, was by Mustapha out of Minnet, and Mustapha was by Seacombe out of Bribery. Ezeroun, the dam of Mineral Water, was by Peasant Boy, the sensational runner-up for the Waterloo Cups in 1873-4. The Waterloo Cup has been by no means remarkable in giving additional lustre to fashionable sires, although, of course, there are a good many that have belonged to that category. Dervock, the sire of Muster McGrath, was by no means well known, and few had heard anything about Celebrated, the sire of Coomassie. Snowflight brought Bothal Park into notice, and now there is Memento made famous for the first time, though we fear, from the time that has elapsed since he appeared on a coursing field, that he must have gone over to the majority.

Judge Gale's Laverack setter dog Prince, died at Oroville, last week. Prince was by Pride of the Border—Fairy II, and was imported by Judge Gale at a cost of about \$350.

## AQUATIC.

## Petersen Defeats Lee.

A more orderly and better natured crowd of spectators than assembled on the new wharf of the South Pacific Coast Railroad Company, last Sunday, to witness the Lee—Petersen shell race, could hardly be found in any city in the Union on a similar occasion. Mostly composed of young people there was no lack of enthusiasm, and the confidence they manifested in the ability of the San Francisco sculler to out-row his rival was something most remarkable; it appeared to be more the expression of feeling, however, than the result of cool calculation. There were older heads present, and judging by the appearance of those who invested in the pools, it was the possessors of these who ran up the figures on the eastern man until he brought two to one on the San Franciscan. There were few pools sold at such odds, however, the oarsmen and city-front boatmen, with their small amounts, advanced their favorite a few points so that fifteen was bid for him against twenty for his opponent. Considerable money changed hands at these figures.

The course chosen for the race was the strip of water just north of the railroad wharf and between it and the breakwater, but a south-west breeze blowing roughed it up to such an extent that only a man accustomed to rowing a shell in rough water could hope to make any headway in it. Lee protested to the referee to having the race take place over the course named in the articles, and Petersen was asked to row on the north side of the breakwater. He was willing to do this, but could do nothing unless his backer was consulted. After a long delay the latter was found, and when told that Lee would not row unless the course was changed to the smooth water he consented; he ordered the stakes to be set in the channel. This change necessitated a long delay, and it was nearly half past four o'clock before the course was cleared, and the men took up their positions at the starting point for the world. Lee appeared to be in very fine condition, and sat his boat in a manner that convinced one that he was thoroughly at home in it. The fact that he had a shell just suited to him, and that his race was against a man not nearly so well heated, led many to think he could not fail to win.

Petersen had made all possible of the time he had had to train in, and he showed to great advantage the result of having a trainer well posted on all the fine points known to trainers of athletes. Although Petersen has scarcely gained his majority, being merely a boy in years, in stature and strength, his superior could scarcely be found.

There was a hush on the wharf as the men were seen to take position at the line for the send-off. Petersen had won the choice of position and chose the south side, the one nearest the railroad wharf.

On the Referee giving the word the men caught the water with their sculls almost at the same instant, but Lee was the more lively in getting away. Petersen quickened his stroke after he had covered a short distance, and at a point about two hundred yards from the start he took the lead. Lee made a great struggle to hold him, and Petersen redoubled his efforts to outpace him, and the struggle was a desperate one for both until the turning stakes were reached. Petersen turned his stake first about six lengths ahead of his competitor, and set out at a lively rate for the starting point, cheer after cheer going up from the multitude on the wharf as he bent his sculls. Lee turned his stake and set out after his rival, but he soon comprehended that he was beaten and settled down to a steady stroke, the slowness of which plainly indicated to his friends that he had met with an oarsman who had proven more than his match.

Amid cheers and waving of handkerchiefs by the ladies, Petersen crossed the line two hundred yards in advance of Lee, who was also cheered when he had reached the referee's boat. The time made by Petersen 21 minutes 3 $\frac{1}{2}$  seconds was not as fast as it would have been had he been forced to exert himself more. The course was fully three miles having been carefully measured and marked off a few days previous to the race. James Cochrane and Albert Branch acted as judges for Petersen and A. Stevenson and John Cotsford for Lee. Charles G. Yale officiated as referee.

After the contestants had rested a few moments they rowed to the boat-house above the bridges, where the friends of Petersen warmly congratulated him. His coolness throughout the race was remarkable. One of his admirers remarked that throughout he seemed to have no more concern than if it was an every day affair for him. Many expressed the belief that if Hanlan were here a match would be made and the champion would have to row as he never rowed before to get away from the California oarsman.

The happiest man in California after the race was Con. Lynch, Petersen's trainer. He has an affection for the boy equal to that of a father for a son, having been his adviser since Petersen, when a boy, derived his greatest pleasure in racing in Whitehalls. Petersen will probably go east during the summer, but whether he will try conclusions with any of the leading oarsmen while there is yet a matter of conjecture.

The paper shell rowed by Petersen last Sunday was owned by J. E. Gohle. Gohle ordered a shell through the agent of the eastern builder in this city, but when he received it he was surprised to notice that its measurements were not as he had ordered. The builder had got his order mixed up with that of some other oarsman. The agent of the builder, to satisfy Gohle, traded off a boat he had received for his own use, and then sent back for a new shell for himself. This shell was shipped on the railroad, but when it had got to this city it was found to have been so badly broken on the way that it was useless. The paper shell loaned Petersen by Gohle proved a pretty good one, after all, and should there be another race between the easterly man and the California boy, which seems at present likely, Petersen may stick to the boat that has already done such good service, instead of sending east for a wooden one.

Four scullers have entered for a sweepstake race to take place at the new course near the South Pacific Coast Railroad wharf, Alameda, on the 30th inst. Leander Stevenson and Samuel Watkins will row the first trial heat, Robert Christie and William Growney the second, and the winners of these two heats the third. These trial heats will be over a one-mile straight away course, and the winner of the last event will be required to row against Austin Stevenson in a three-mile race, the Vallejo oarsman to allow his rival one minute. There are two prizes to be competed for, one of \$150 and one of \$50.

The Sacramento Yacht Club has elected the following officers for six months: H. G. Blackman, president; F. F. Tehlerts, vice-president; P. J. Shields, secretary; Colonel E. R. Hamilton, treasurer; L. P. Martin, J. T. Griffiths, W. E. Osborn, P. M. McKeever, and H. W. Rivett, trustees.

The race between Wallace Ross and George Bnbear was a slow affair after the prognostications of some of the English sporting writers as to the capacity of "the best oarsman in England." It was rowed over the Thames Championship Course, from Putney to Mortlake, 4 miles 440 yards, on the 10th. Ross pulled in his Ruddock boat, and although conceding Bnbear ten seconds start, was even with when the course was half covered and finished as he liked, winning by fifteen lengths in 26:10. Betting about even. It would seem that England is without a first-class sculler at present.

The Stockton Yacht and Boat Club christened their new four-oared barge last Sunday and named her Van R. Paterson, after a well known citizen of the windmill city. The barge was built by J. D. Griffin of this city, and is thirty-five feet six inches long, three feet four inches wide, and weighs 245 pounds. The newly-organized club now has three good boats—the L. Howard, a single scull; the J. D. Peters, a double scull, and the barge Van R. Paterson.

George H. Hosmer of Boston, says he will give odds in the stake money to get on a race with Charles E. Courtney and will give George W. Lee five seconds start in a race of three miles, for \$500 a side. Hosmer considers Lee and Courtney third-class men, and rates Ross, Teemer, Hamm, Conley and himself inferior only to Hanlan.

George H. Hosmer and Albert Hamm have arranged to row a three-mile race for \$500, the course, date and referee to be decided on May 12th. The articles call for a race not later than June 20th. Hosmer, it is said, thinks seriously of selecting the Charles river, Boston, as the place for the race.

The eighteen-foot sloop Lark was thrown on the rocks of the breakwater last Sunday by the swell of a ferry-boat. Her planking was broken, but the injury was not serious enough to make her unsafe to sail across to her moorings in Mission bay.

The schooner yacht Virginia, until recently the Con. O'Connor, has had a thorough overhauling. New state-rooms have been arranged in her cabin, and inside she has been greatly changed in appearance.

The Fleur de Lis has been at Sancelito during the past week. The sails have been scrubbed, and the yacht has been put in fine order. She will be brought to this side of the bay to-day.

Jim Pilkington now offers to back Wallace Ross to row any man in the world for \$1,000 a side, or he will back Ross and a mate against any pair in a double sculling match, for \$2,000 a side.

The sloop Hattie, the largest and finest craft owned by any resident of Stockton, will be ready for her first sail of the season in a few days.

James A. Ten Eyck of Poughkeepsie, offers to row James H. Riley of Saratoga, a three-mile with turn race for any reasonable amount.

John Kennedy, who rowed Hanlan at Point of Pines, will this year train and coach the crews of the Potomac Club of Washington.

The Lively is at Stockton. She will be in readiness for the season's commencement in about a week.

James Gordon Bennett left Nice on the 16th inst, in his yacht, for a six weeks' cruise in the Levant.

**SHEEP.**

**Management of Pregnant Ewes.**

The Merino ewe is something like the Texas cow—not the best of mothers. A native of the desert, she still retains in her blood a remnant of nomadic, oriental wildness. An industrious, insatiable feeder, accustomed to rove widely in search of her living, not tranquil and sedentary like the large-headed English ewe, she is apt to abandon her young, like the ostrich, to take care of itself. She needs watching, she needs a certain pressure to be brought to bear upon her too feeble maternal instincts.

Extended experience has taught me that a Merino ewe which has a copious flow of milk is seldom failing in duty toward her offspring. The first and paramount duty of the shepherd, therefore, is to pursue such a preliminary course as will best secure this desideratum. A regimen of roots, oil-cake meal, bran, fodder, clover hay, etc., will readily suggest itself; but, valuable as these are, they are not for the Merino ewe of the very highest importance. The article which, in my opinion, holds this rank is grass, and (perhaps scarcely secondary in value) the exercise which is necessary to obtain it. There is no other domestic animal which so eagerly craves and industriously searches for a morsel of green food cropped directly from the surface of the earth. And it is this restless, vagabondizing, gormandizing propensity of the Merino which the shepherd can take advantage of and promote to the end, that he may develop the rather feeble maternal instinct. It is as profoundly and universally true of the lower animals, and especially of the pregnant ewe, as of man, that they ought to work for their living. Pasture (that is, a daily run on a sod, whether it furnishes much or next to nothing) means work, and work means health; while roots mean cold-blooded and watery idleness. There is nothing else which so strengthens the frame and enriches the system with warm, red blood (and, by necessity of the inseparable relation between them, that of the unborn lamb also) as a frequent ramble over the pasture lot. Even when quite sedentary, the ewe may be made to give milk with tolerable success by judicious feeding on oil-cake meal (perhaps as good a way as any is to make it into a slop with wheat bran, a tablespoonful of oil-cake to a pint of bran per head); but unless she has frequent and abundant exercise, the lamb will be weak, and will need close watching if dropped on a frosty night. In the course of my experience, I have had large, rangy grade ewes—and a grade is popularly supposed to be harder than a full-blood—which had been full fed and warmly housed, drop large, finely formed lambs, which yet were so flaccid and so nerveless that it would be hours before they could stand alone, and that only after the most assiduous attentions of the shepherd, warming them before the fire, rubbing them with wisps of straw, etc. On the other hand, I have had full-blooded ewes, which had roved nearly all day during the winter through a corn stubble, getting next to nothing in it but the exercise, drop lambs on so cold a night that their feet were frozen and deformed; yet they got up, snaked, and were lively as crickets in the morning, without having received a particle of assistance from the flockmaster.

The English sheep books abound in directions for the making and administering of cordials, syrups, etc., and for rendering assistance to ewes in labor, but a few teaspoonfuls of grass-made milk are worth more than all the nostrums ever compounded. Neither is it necessary to defer the season of lambing until grass has grown green in April, though

I steadfastly hold that for the average wool-growing flock in the latitude of southern Ohio April is the best month in which lambs are to be dropped. But if the owner wishes them to come earlier, a good orchard grass rowen preserved for the purpose, with its admixture of weather-beaten berbage and green beneath, is well adapted for the purpose. Of course the flock must be watched when turned afield on the windy days of March, lest lambs should be dropped and chilled before assistance can be rendered. If the paddock is distant from the sheep-house—which it should not be—on very blustering days it may be necessary to deprive the flock of their exercise altogether.

So important do I hold the matter of exercise that in very cold, snowy seasons during the winter I have my shepherd chase the breeding ewes about in a large, roomy sheep-house or in the feeding yard. A great part of the time I have them driven some distance every day—first making a stont, dry flock break the road through the snow—to a brook to drink, as I consider ice water with exercise much preferable to cistern water without.

The pregnant Merino ewe needs to "rough it," but always with a wholesome, dry place to sleep in at night. She wants plenty to eat, but especially plenty of water and exercise. Move them about and stir their blood. If in rushing pell mell through a gap to the feeding yard one falls down and a half dozen pile together in a heap above her, no harm will be done. If one is doubled to a right angle around the door-post, she will snifer no injury.

I said they need always a wholesome, dry place to sleep in. When ewes range on an old sod or a piece of rowen, through February, March and April—it is best to reserve the best rowen for the latter stages of pregnancy—they void much more urine than when confined to dry feed, compelling the master to clean out the sheep house oftener. But this extra labor will have its reward in the prosperity of the ewes and lambs. The ammonia must be kept down at all hazards. There is no one thing incident to the artificial house life of the sheep which is a more deadly enemy to it than ammonia. —Country Gentleman.

**MONMOUTH PARK.**

Long Branch, New Jersey,

The Following Stake is Now Open.

THE CHAMPION STALLION STAKES for 1885, for colts and fillies two years old (now yearlings) to be entered at the course by 4 o'clock P. M. on the day before the day appointed for the race, of \$500 each, with \$5,000 added by the Monmouth Park Association to a subscription of \$300 each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of his sire each to receive \$1,000; the third horse and the subscribing owner of his sire each to receive \$500; the winner to receive the stakes of burser entered for the race, and one-half of the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify the get of this stallion, if the subscription be paid; each nomination to be accompanied by a contract in the form subjoined, which, if not fulfilled punctually by the subscriber, may be transferred to and fulfilled by any other owners entering in the race the get of the stallion, and such owner or owners shall in that case be entitled to start and to the benefit according to the subscriber from first, second or third place in the race, and to recover from him the money contracted to be paid, if no benefit accrues; fifteen subscriptions to fill. Three-quarters of a mile.

**Form of Contract.**

In consideration of the money to be added by the Monmouth Park Association to the Champion Stallion Stakes for 1885, and in further consideration of the increased value given to the get of my Stallion by the right of entry therein, which right of entry is not to be invalidated by (my) decease, (I) agree to pay to the Monmouth Park Association, or order, five hundred dollars on the first day of July, 1885, at its office in the city of New York.

The subscription of stallions to the above stakes will close and name on April 1st, 1884. Subscriptions to be addressed to J. H. Coster, Secretary Monmouth Park Association, Madison avenue and Twenty-seventh street, New York.

Mr. Lorillard continues his gift of \$5,000 to the Lorillard Stakes. The Champion Stallion Stakes and the Lorillard Stakes are intended to be permanent.

The Lorillard Stakes for 1886, with the following conditions, will close and name on August 15th, 1884.

The Lorillard Stakes for 1886, for three-year-olds, of \$500 each, h. f., or only \$100 if declared by January 1st, 1885; or \$50 if declared by January 1st, 1886; or \$100 if declared by June 25th, 1885; with \$5,000 given by Mr. Pierre Lorillard; the Association to add \$1,000 for the second; the third to save his stake; horses foaled in the United States are not eligible for this stake unless sired in a foreign country, or by a stallion represented by subscription to the Champion Stallion Stakes for 1885. One mile and a half.

GEORGE L. LORILLARD, President.

J. H. COSTER, Secretary.

**STALLIONS THOROUGHbred.**

**BELLE MEADE**

1884 **STALLIONS.** 1884

**BRAMBLE,**

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Anstralian.

**ENQUIRER,**

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Barob, etc.

**Imp. GREAT TOM,**

The sire of Gen. Harding, Tbackeray, Swift, Tennyson, Trombone, Tarquin, etc. And the grand Race-horse,

**LUKE BLACKBURN,**

By imp. Bonnie Scotland, dam Nevada, by Lexington.

Each of these horses will be bred to a limited number of approved mares, at

**\$100-The Season-\$100**

\$5 to the Groom.

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearlings, 49 in number, will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

W. G. HARDING, Nashville, Tenn.

**The Thoroughbred Stallion**

**WILDIDLE.**

By Imp. AUSTRALIAN. Dam Idlewild, by Lexington.

This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidle, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal.

Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

W. C. JUDSON, Owner, or W. L. APPLEYBY, Supt., Santa Clara, Cal.

P. O. Box 223.

—AT—

**RANCHO DEL PASO.**

For the Season of 1884.

**Thoroughbreds.**

**LONGFIELD.**

Chestnut horse, by MONARCHIST, he by Lexington.

First dam, Dame Gourlay (Blue Gown), by Planet.

Second dam, Flora G., by Lexington.

Third dam, Fanny G., by imp. Margrave.

Fourth dam, Lances, by Lance.

Fifth dam, Aurora, by Aratus.

Sixth dam, Paragon, by imp. Buzzard.

Seventh dam, Indiana, by Columbus (son of Imp. Pantaloon).

Eighth dam, Jane Hunt, by Hampton's Paragon.

Ninth dam, Moll, by imp. Figure.

Tenth dam, Slamerkin, by imp. Wildair.

Eleventh dam, imp. Cub Mare, by Cub.

Twelfth dam, Aramantus' dam, by Second.

Thirteenth dam, by Starling.

Fourteenth dam, by Croft's Partner.

Fifteenth dam, by Greyhound.

At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, he by Lexington.

First dam, Flush, by Hiawatha.

Second dam, Fanny Bagg, by imp. Ambassador.

Third dam, Ida, by imp. Belsbazzar.

Fourth dam, Madame Bosley, by Sir Richard Tomson.

Fifth dam, Nancy Nichol, by imp. Eagle.

Sixth dam, Bet Bosley, by Wilke's Wonder.

Seventh dam, by Chanticleer.

Eighth dam, by imp. Sterling.

Ninth dam, by Clodius.

Tenth dam, by imp. Silver Eye.

Eleventh dam, by Jolly Roger.

Twelfth dam, by imp. Partner.

Thirteenth dam, imp. Monkey.

Fourteenth dam, an imp. mare from the stud of Harrison of Bra don.

At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETIONIAN.

First dam, Fanny Felter, by Magnolia, son of Seely's American Star.

Second dam, by Webber's Kentucky Whip.

Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger.

At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.

First dam, Emma Kinkaid, by Conscrip, son of Cassius M. Clay.

Second dam, by Manbrino Chief.

Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.

At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER.

First dam, by Washington, he by Geo. M. Patchen.

Second dam, by Williamson's Belmont.

At \$50 the season, due at time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.

John Mackey, Superintendent, Sacramento, Cal.

**THOROUGHbred STALLION**

**X X,**

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.

First dam, Columbia, by imported Bonnie Scotland.

Second dam, Young Fashion, by imported Mounarch.

Third dam, Fashion, by imported Trustee.

Fourth dam, Bonnets of Blue, by Sir Charles.

Fifth dam, Reality, by Sir Archy.

Sixth dam, by imported Medley.

Seventh dam, by imported Centinel.

Eighth dam, by Mark Anthony.

Ninth dam, by imported Janna.

Tenth dam, by imported Monkey.

Eleventh dam, by imported Silvereye.

Twelfth dam, by Spunker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, he by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anleo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwata, Bonnie Kate (the dam of Bonnie Lizette), Ames, Buck Hocking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has come much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON.

Oakland or 508 Montgomery Street, San Fran.

Reminiscences of John Murphy.

Murphy first became famous after riding Dexter against time, to heat 2:19, which he did (with a break in it) in 2:18. He was then with the king of drivers Hiram Woodruff, since which time Murphy's services as a driver have been greatly esteemed, more especially by New Yorkers among whom he has always lived. To undertake to name the many noted horses Murphy has driven would be a difficult task, while a few will not be amiss. Mr. Bonner's horses are mostly driven by Murphy; he drove Mr. Work's great team Swiveler and Edward to record of 2:16. He drove Frank with running mate in 2:08, the fastest mile heat any man ever rode behind a trotter or pacer, and among his last not least great ones was Majolica, which he drove last summer (his first season out) in 2:17, and he assured me that if Majolica had kept all around he expected to make him trot considerably faster at either Pittsburg or Cleveland, but he was so discouraged with his being lame at Pittsburg that he determined to ship him home, but after considerable coaxing he was persuaded by the management to stay and trot him against Jay-Eye-See. But after all, he said he did not like Pittsburg, as he did not dare to go to bed barefooted, on account of the coal dust on the carpet sticking to his feet. On one never-to-be-forgotten night he hatched his feet previous to retiring (allow me to explain to your readers that it is not the fact that Mr. Murphy hated his feet that is never to be forgotten, but the sequel to that event), looking round he could see no means of reaching his luxuriant couch, without again falling a victim to the contamination of coal dust. With him to resolve is to do, so with the graceful agility of a frog he gave one jump and alighted on the doomed bed, when crash, down it went, "and great was the fall thereof." One grand trait in Mr. Murphy's character as a driver is, that it matters not to him whether his employers are millionaires or people with little or no money, he treats them all alike, kindly and honorably. All the money in the world would not make him swerve from the right when his honor is at stake. It is to be hoped that he may make his appearance this season with a successful string of horses, and that he will not confine his exploits to Gotham alone, but seek a wider field and visit the west, where laurels are always to be won, and honesty never fails to be appreciated.

How to Tell Good Eggs.

It is impossible to tell whether eggs are fertile or otherwise before putting them under hens or into an incubator, except by breaking them. Then if one be an expert, he can tell for a certainty whether the eggs would have hatched. The proper way is to set the eggs, and within a week (and with some varieties sooner) the fertilized eggs can be selected from the barren ones. The eggs that will hatch will appear dark; there will be a dark spot that may readily be distinguished when held against a strong light, and that spot is the embryo chick. On opening a fresh egg that is fertilized the germ can be discovered on the yolk. It is about the size of a small pea, and frequently, not always, floats to the top on opening. When within the shell this germ is supposed always to remain uppermost, and during the period of incubation receives the greatest amount of warmth.

The examination of eggs against a strong light is the safe guide as to their condition. When the whole shell is full and dark, the egg is within a day or so of hatching, and if the chick is alive it may be heard if placed to the ear. If all is still and dark, the chick is dead. Often the little thing dies owing to the toughness of the shell, or to a sudden blow that may have been received. Eggs for hatching must be handled with care, and should be slightly moistened when hatching, if set in a dry place. If on the moist earth it is unnecessary. Fresh eggs may be separated from stale ones by examining or "candling." If fresh, the air bladder is small, no larger than a pea; if stale, it will be the size of a nickel, or if very old, an old-fashioned copper will barely cover the air space. The general gritty feel of the shell is sometimes a guide, but not always correct. In selecting eggs for incubation, choose rather those of medium size and pointed or tapering to the small end; an unusually large, or an exact oval egg seldom hatches. If the fowls are in a healthy, vigorous condition, there is little doubt.—C. B., in Country Gentleman.

Major Adam Lilburn, of Haverstraw, who bred Edward Everett, formerly called Major Winfield, and sold him to Mr. Robert Bonner, remarked in our office yesterday that he saw Seely's American Star driven double with one of his daughters at Goshen, when he was twenty years old, a mile in three minutes. He was a long-bodied horse of low action, and looked like a thoroughbred. He was greatly ahead during his life time. He was frequently driven on the ice of Orange Lake, back of Newburgh, until he was almost ready to drop. He was broad between the eyes and had any quantity of nerve force. Major Lilburn also remembers the Charles Kent mare, the dam of Ryalyk's Hambletonian. He says that Dr. George Gordon, who was well acquainted with Charley Kent, a dissipated butcher, told him that Kent knew nothing of the breeding of the mare. The dam of Hambletonian was driven on the streets of New York to a butcher's cart, until she became lame, and then was bred to Abdallah.—Prof. Field and Farm.

Beys to gallop the horses in training are wanted at almost every stable in the land. No one has exercising leads enough to train his horses properly. The pay of a good boy for this purpose is more than any laborer can earn.

The harness should never fit horses so illly that it will shave the hair off where it touches them. If the harness is kept properly oiled as it always should be, this trouble is not liable to occur.

Thoroughbred SETTER PUPPIES.

ENGLISH SETTERS, finest breed imported, Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed. \$25.00 each at six weeks old. Apply to E. LEAVESLEY, Gilroy.

THE NEW ZEALAND Stud and Pedigree Stock Co.

LIMITED. AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

Fastest Time on Record.

Martini-Henry, by Musk—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and heating a field of nine in 2:39, thus lowering the previous record of 2:41; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30, and heating a field of twenty-nine, thus lowering the previous best record of 3:30, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musk—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary, Auckland, New Zealand.

The New Zealand Loan and Mercantile Agency Co., Limited. 412 California Street, San Francisco. HUGH CRAIG, Agent.

PROGRAMME OF RACES

The Capital Turf Club, COMMENCING MAY 6, 1884.

FIRST DAY.

- No. 1. RUNNING—Half-mile dash; free for all two-year-olds. Purse \$20. Winner of half-mile dash at P. C. B. H. Meeting to carry 5 pounds extra.
No. 2. RUNNING—Three-quarters of a mile and repeat; free for all. Purse \$30.
No. 3. RUNNING—One and one-quarter miles; free for all. Purse \$250.

SECOND DAY.

- No. 4. TROTTING—Mile heats, two to three, for two-year-olds, for horses owned in Butte, Colusa, Tehama, Sacramento, Yolo and Yuba counties, on January 1st, 1884. Purse \$20.
No. 5. Trotting—2:35 class. Purse \$500.

THIRD DAY.

- No. 6. RUNNING—Sacramento Derby; free for all three-year-olds; one and one-half mile dash, Purse \$300.
No. 7. RUNNING—One mile and repeat; free for all. Purse \$100.
No. 8. RUNNING—Consolation purse for beaten horses; dash of one and one-half miles. Purse \$200.

FOURTH DAY.

- No. 9. PACING—For horses that never beat 2:20. Purse \$500.
No. 10. TROTTING—Free for all. Purse \$300.

FIFTH DAY.

- No. 11. TROTTING—2:27 class. Purse \$500.
No. 12. PACING—For pacers owned in Sacramento county January 1st, 1884, which have never beaten 2:30. Purse \$300.

CONDITIONS—All trotting races are three in five, unless otherwise specified; five to enter and three or more to start; National Association rules to govern; all purses divided at the rate of 90, 30 and 10 per cent. to first, second and third horses. All running races, five to enter and three or more to start; Pacific Blood-Horse Association rules to govern, where not otherwise specified. In all races where entries exceed ten \$20 will be added. Entrance to all races, 10 per cent. of purse, money to accompany nomination. All entries to be made in writing, giving name, color and sex of horses, also name and residence of owner. Entries in all races to close with the Secretary on Saturday, April 5th, 1884. Write "Entries to Races" on outside of envelope. By order of

J. W. WILSON, President. C. H. TODD, Secretary, P. O. Box No. 42, Sacramento.

ADMISSION FREE.

**BILLIARDS.**

The opening of the Saylor Brothers' new parlors, which took place last Saturday evening, was an undoubted success. The initial attraction was a game in 500 points between Benjamin Saylor and J. F. B. McCleery. The reputation that these two players have earned by hotly contested matches, whenever they have met over the green cloth and ivories, attracted as large an audience as could possibly enter the rooms. Saylor won the lead off and missed. In the 6th inning he scored 23, followed by a neat run on the rail which was suddenly brought to a close by a miscue on the 43d carom. McCleery seemed to be laboring under great difficulty, the cushions on the new table appearing a little too lively for him who had become habituated with the slow "Monarch" and the consequence was that at each cushion carom his ball which would have the proper direction on a slower table would rebound, after taking the cushion, with too much rapidity to be affected by the English, and a miss would follow. The 11th inning showed: Saylor 75, McCleery 12. At this stage the latter by elegant play managed to get the balls on the long right rail, and the way his points rolled up made many believe that his assertion, "If I ever get them on the rail, the game will be mine," made before the game began, was about to come true. When the callers sang out 55, McCleery stopped to chalk up, at the same time offering to wager \$25 to \$20 on the result of the game. There were no takers and he continued his play, but it was evident his interest was flagging. Four more counts were scored when he missed the second object ball by not giving enough force to his. In the 19th inning Saylor scored 47, and after McCleery's miss he followed up with a beautiful rail run almost making the circuit of the table and counting 109 points. No doubt his run would have been much higher had he paid less attention to the deafening cheers which accompanied the completion of his 100th point. From this on Saylor had it all his own way. McCleery did succeed in holding the rail once more, when he made 58 points and missed, leaving the balls in such good position that Saylor counted up 111 points more, and in the 46th inning completed his 500 points with an unfinished run of 74 points, McCleery having but 263. Winners' average 10 20-23. William Roach acted as referee.

A word of praise should be said about the fancy shots with which Mr. McCleery entertained the large audience which assembled at the Saylor Parlors last Saturday. He was unusually successful, as the many rounds of applause he received will attest, and held the people there more than an hour, practically demonstrating the unlooked-for curves and angles a skillful player can command the ivories to take.

W. R. F. Lowry, the ex-champion of the Pacific coast, has returned from a long trip through the country. He has been giving exhibitions in most of the small towns of the coast; his report of the billiardistic condition where he has been is "that things are booming." Inducements have been offered him to give entertainments in Santa Cruz, and it is probable he will depart for that place before long.

The amateur billiard tournament, at Chico, proposed by Tom Foley, began last Monday with eight contestants. The first prize is \$40 and an emblem suitably inscribed, the second \$30, third \$20, and the fourth \$10. The game will consist of 150 points.

The billiard rooms of the Palmer House, Chicago, recently refitted, are pronounced the handsomest hotel billiard rooms in the world.

Mme. Adelina Patti has had a table placed in her apartments at the Palace, by the J. M. Brunswick & Balke Co.

The J. M. Brunswick & Balke Co. and the H. W. Collier Billiard Co. have been consolidated.

**THE DRAMA.**

**The California Theater.**

During the week the Lights of London, has been played in a very creditable manner by the regular company of the establishment, and embellished with the original Union Square scenery. The play itself needs no comment from us, as its principal features, merits and demerits are familiar to our public. It is one of those stage productions in which we take but little pleasure, and with which we have but little sympathy. There is too much vice, suffering and folly in it to suit us, with too little intellectual power to suit a San Francisco audience. Still, it cannot be denied, it contains some fine dramatic scenes, which the company made the most of. Of the male characters Grismer as Seth Preen, and Simms as Joseph Jarvis of the legitimacy, were decidedly the best, and more than good all through. The best female character beyond question was Misa Barry's Hetty Preen. In the interview with her father after her fall, in which a sense of duty and the attractions of dress and jewelry incident to a life of shame struggled for mastery, was a fine piece of acting, faithful in spirit and true in conception, though she was sometimes at fault in the tone and expression of voice. This young lady is certain to rise in her profession. Miss Phebe Davies and Miss Fanny Young also acquitted themselves with ability, as usual. The gem of the performance, however is little Minnie Tittle's Tim, a poor outcast waif of London. How this child only seven years old comes to have such a correct conception of the various characters she plays is something really wonderful, and can be ascribed only to real native genius. She was regularly applauded and called back to make her salutation to the audience. But this is generally the case whatever character she plays. Next week the attractions at this theater will be very great, and we expect to see crowded houses. Beginning on Monday night, for one week only, the Great European Specialty Company will appear. The performance of this troupe will be well worthy the patronage of San Francisco.

**The Vienna Garden.**

The audience during the week have been very large and enthusiastic. They were, however, nothing more than the excellent performance merited, for it contained varieties enough to suit all classes and all tastes. The Marvels of Peru with Siegrist as Clown appear to grow in popularity, as their engagement continues. Courtwright and Hawkins, in their amusing specialties, comic sketches, songs, duets, dances and lectures, give universal satisfaction. Then last, though not least, is the elegant ballet of Mlle. Rose, assisted by four young ladies of established reputation as danseuses. It is true the stage is not large enough to do full justice to their performance, but nevertheless it is evident they are all artists of ability and thorough training. Altogether, Mr. Walters gives an excellent entertainment, and deserves his success. The attractions next week will be equally strong.

**Oakland Theater.**

The beautiful and touching Irish drama of My Geraldine has run to very good houses all the week, and will be continued for one week more. The cast is very strong. Miss Charlotte Tittle is gaining golden opinions among the Oakland people. Some ladies at the head of households object strongly to our suggestion that Mr. Bert should bring her to the California in order to give her better chances to improve herself by playing with artists of national reputation. Having had the good fortune to aid and advance her professional career, we are well pleased to hear these expressions of approbation, and are content for the present she should bide her time. It will most surely come. My Geraldine as presented at Oakland is well worth seeing.

**BICYCLING.**

W. Snook, a prominent amateur bicycle rider of England, is on his way to this city where he purposes following his profession as a surveyor and architect. Mr. Snook has a great reputation for long distance riding, and will be a great acquisition for our local wheelmen.

Anderson, the long distance rider, is in the city and will accept Prince's challenge for a seventy-two-hour race if the terms are made to suit him. His objection to the conditions published are not serious, and there is a prospect that the race will be made.

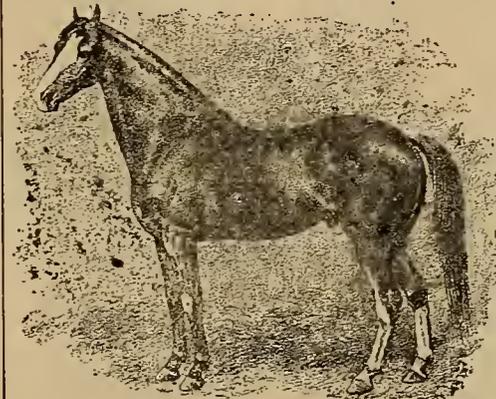

John S. Prince has made a match with R. M. Burns for a twenty-mile race, to take place at the Oakland Trotting Park on Sunday the 30th inst. Prince to ride his bicycle and Mr. Burns to drive Jackson's roadster Ed. to harness. Stake \$250 a side.

The Capital Bicycle Club of Washington have issued a general invitation to all wheelmen of the United States to visit them during their races which occur May 16th.

Brown's Bronchial Troches will relieve bronchitis, asthma, catarrh, consumptive and throat diseases. They are used always with good success.

Schaefer has arrived from Paris and expresses himself pleased with his trip. Maurice Daly is much better and will return home in a few days.

**The Thoroughbred Stallion**

**JOE HOOKER, BY MONDAY.**

- First dam Mayflower, by imp. Eclipse.
- Second dam Hennie Farrow, by imp. Sbamrock.
- Third dam Ida, by imp. Belshazzar.
- Fourth dam Gamma's dam, by Sir Richard.
- Fifth dam, by imp. Eagle.
- Sixth dam Bet Bosley, by Wilkes' Wonder.
- Seventh dam, by Chanticleer.
- Eighth dam, by imp. Stirling.
- Ninth dam, by Cladius.
- Tenth dam, by imp. Silver Eye.
- Eleventh dam, by imp. Jolly Roger.
- Twelfth dam, by Partner.
- Thirteenth dam, by imp. Monkey.
- Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

**TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding.** Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Benwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1883.

**THEO. WINTERS, Sacramento, Cal.**

**TROTTING STALLIONS.**

**Standard Trotting Stallion**

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

**JAS. J. MARTIN, Agent.**

**The Almont Stallion**

**ALTOONA,**

**BY ALMONT:** first dam Theresa B., by Prophet, Jr.; second dam Molly Floyd, by Mobawk; third dam, by Davy Crockett, a Canadian pacer; fourth dam Puss, a fine road mare imported from Canada. Prophet, Jr., by Prophet, son of Hill's Vermont Black Hawk. Altoona was bred by Gen. W. T. Withers, of Fairbank, is a dark bay, a little over fifteen and three-quarters hands, of high form and breeding.

He will make the season of 1884, ending July 1st, at the ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

Terms, \$30 for the season, due on or before July 1st.

For further information apply to or address **A. H. HECOX, ALMONT STABLES, 1352 San Pablo Avenue, Oakland.**

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1-2.

**WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.**

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Koschicko, by Sir Andy. Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better: Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convoy 2:22 1/2; Magenta 2:24 1/2; Manfred 2:25; Hancock 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McFaridge 2:29; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:11. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,330 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Pbyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:25 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

**WASH JAMES, Agent, San Mateo, Cal.**

**The Trotting Stallions**

**Baywood and Fleetwood**

**WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.**

**BAYWOOD**

Is five years old, dark bay, with black points, 15 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover. Sired by Nutwood; first dam by Geo. M. Patchen; second dam by Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripes face; 15 1/2 hands high, and weighs close to 1,300 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms, \$25 for the season, or \$40 to insure.

**E. S. SMITH, San Jose.**

**The Trotting-Bred Stallion**

**A. T. STEWART,**

**WILL STAND FOR MARES AT THE FRESNO FAIR GROUNDS during the season.**

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Sired by D. L. Harris of Fayette County, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Patchen (full brother of Lady Thorn, record 2:18 1/2), sire of Katie Middleton, 2:23, and mine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maud S. Mambrino Patchen sired by Mambrino Chief, he by Maud S. master, and he by Mambrino, thoroughbred son of Imported.

Terms for the season, \$30.

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 10th, 1882.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**WM. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:23 1/2, without a skip.

Breeding.

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record, 2:34.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

Terms \$50.

**FRED ARNOLD,**  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,450 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2), and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30 1/2, by Flaxtail, grandam by son of Tally Ho Morgan, great grandam by Irwin's Tuckahoe, great grandam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.

**M. W. HICKS,**  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1873; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), by McCracken's Dave Hill, he by Red Lion, and by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.

Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.

Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,**  
Agent.

Oakland, January 18, 1884.

### The Trotting Stallions DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

## Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2; first dam Dolly (dam of Thornado, 2:22 1/2; Onward, 2:22 1/2), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiemar.

Thornado, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief), second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the copy number of THE BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTTING PARK,

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM, dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

**J. B. McDONALD.**

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Castro Sharpston, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteoo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

## MAMBRINO WILKES.

**BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES,** son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christian by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Tenth dam by Mambrino son of Mambrino Chief, his dam Ripston's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several prominent crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prominent sire.

Will make the coming season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

Terms:

\$50 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose service are held at One or Two Hundred Dollars. For further particulars address

**A. I. HINDS, Agent.**

Oakland, January 18, 1884.

### The Trotting Stallion STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

Terms.

He will serve mares the present season, commencing February 1st, and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McEvers, L. Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Ahness, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Haleson, a pacer; he by Virginian, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Fair, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2, and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbot, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlin, three-year-old, 2:29 1/2; and Stuart, three-year-old 2:28. Stuart is full brother to Belmont, who trotted a mile in 2:23 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Governor Sprague, record 2:30 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

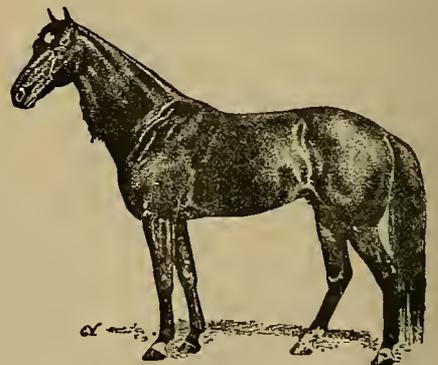

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Administration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2. Steinway winning fourth, fifth and sixth heats, beating Jewett, Catfish and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stake for two-year-olds he was beaten in three heats by Jewett, in 2:36, 2:28 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23, 2:27 1/2.

Address

**GEORGE WILEY,**

Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15TH, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nettie by son of Vermont Black Hawk, grand dam by Inisris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:41 1/2) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Lefler's Consul, by Shipp's Tuckahoe, great grandam by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

Terms:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash.

Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

**J. T. McINTOSH,** Box 60, Chico, Cal.

LITTLE'S SHEEP DIP

CHEMICAL FLUID

Price Reduced to \$1.25 Per Gallon.

Twenty gallons of fluid mixed with cold water will make 1,200 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect; is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

ASHLAND PARK TROTTER STUD NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR. THIS IS STRICTLY A BREEDING FARM, FOR THOUGH TRAINING IS DONE, IT IS ONLY FOR THE STOCK BELONGING TO THE PLACE, OR THOSE PURCHASED FROM THE PROPRIETOR. THE PROPRIETOR OF ASHLAND PARK HAS NO PET TROTTER FAMILY; HIS AIM IS TO SECURE AND HAVE AT ALL TIMES FOR SALE CHOICE REPRESENTATIVES OF EACH OF THE LEADING FAMILIES, THESE BEING THE HAMBLETONIANS, MAMBRINO CHIEFS, CLAYS, PILOTS, BLACK HAWKS. AT ASHLAND PARK MAY NOW BE SEEN splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Bakors, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2-17yl B. J. TREACY, Lexington, Ky.

HARNESS AND SADDLERY.

John A. McKerron,

FINE HARNESS

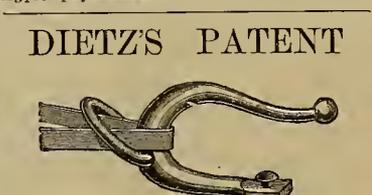

AGENT FOR Famous Whitman Saddle and Halter Bridle.

HORSE BOOTS AND TRACK WORK A Specialty. 232 Ellis St., opp. Fashion Stable, San Francisco.

J. O'KANE,

767 Market Street, San Francisco. WHOLESALE AND RETAIL dealer in Harness, Saddles, Blankets, English Race Goods, And everything necessary for horse or carriage use. Horse Boots a Specialty. Agent for Dr. Dixon's Condition Powders. Repairing promptly attended to.

DIETZ'S PATENT CHECK HOOK.

Simple in its Structure and Practical in its Use. The horse never loosens the check-rein when this Check Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook. Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal. Will receive prompt attention. When ordering state whether gold or silver plate required.

IN THE STUD.

Advertisement for a Gordon Setter dog named 'DORR'. Six years old, V. H. C., and winner of medal and special money prize at Boston as a performing dog. Winner in Nebraska field trials, and winner of first prize Pacific Coast field trials, also winner of second prize as a Gordon, and first as the best performing dog at San Francisco, 1883. Fee, \$25. FRED. A. TAFT, Truckee, Cal.

IN THE STUD.

Advertisement for a Llewelin Setter dog named 'CARL'. Color, Black, White and Tan; aged five years. Bred by L. H. Smith, of Stratford, Ontario, Canada; broken by R. B. Morgan, now of Akron, Ohio; also handled one season by N. B. Abbott, of the Harvard Kennel Club, at Storm Lake, Iowa. Will be bred to a few first-class bitches. Fee, \$40.00. Address W. W. MOORE, Oakland, Cal., or J. Y. ROSS, 123 California Street, San Francisco.

Found at Last! GOLD SEEKERS FRIEND. If you will send us TEN CENTS Silver, we will mail you our NEW CASE & CONTENTS that will help you to more READY CASH AT ONCE, than any other method in the world. It never fails. World N 1/2 Co. 122 Nassau St. New York.

OLIVE And Other Fruit Lands FOR SALE

In ten, fifteen and twenty acre lots, at one hundred dollars an acre, at Sunol Glen, in Alameda county, on the Livermore, or old overland route, thirty miles from Oakland, or thirty-six miles from San Francisco, four trams a day; excursion tickets, \$1.50. Terms, \$25 an acre, or 25 per cent. cash, deed given, balance to be paid in three annual installments. Trees furnished at fifteen cents a piece, land plowed, trees planted and well cultivated for one year, at \$20 an acre; well cultivated each succeeding year at \$5 an acre; ninety per cent. of trees warranted to grow, or will be replanted without extra cost. Choice vineyard land on the same terms. This land is situated in a warm belt, exempt from the prevailing coast fogs, and is well supplied with wood and water. The situation is picturesque, and the climate is equal to that of Santa Barbara. Reference, by permission, is given to W. F. Goad, 603 Montgomery Street; J. A. Robinson, 509 Montgomery Street; J. F. Gawthorne, 444 California Street; Hon. C. N. Felton, 123 California Street; C. W. Crane, 318 Pine Street, room 39; Captain H. H. Ellis, T. F. Batchelder and Chas. Hadsell, Sunol Glen. For further particulars apply to

J. A. JOHNSON, Sunol Glen, Cal. P. S.—LOANS MADE, and FARMS BOUGHT and SOLD, on commission at moderate rates in Alameda county.

Notice to Breeders

Turfmen in General.

For the benefit of those desirous of taking the advantage of long odds on the coming meeting of the Pacific Coast Blood-Horse Association, and before pool-selling is opened, we, the undersigned, will open book-betting on the different events previous to said meeting. Books will be opened, and a list of prices advertised as soon as all nominations are made. Odds subject to a change at any period. Killip & Co., 116 Montgomery Street.

FAIRLAWN, 1884.

TENTH ANNUAL CATALOGUE Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage. 25 HIGHLY-BRED BROOD-MARES, Bred to the Fairlawn Stallions, and 130 HEAD OF VERY PROMISING YOUNG STOCK, Consisting of Young Stallions, Fillies and Roadsters, are offered at Private Sale.

THE ONE PRICE PLAN

Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

- The Stallions in use at Fairlawn are ALMONT 33. Represented in the 2-30 list by 24 performers, with records ranging from 2:15 1/2 to 2:30. Limited to 20 approved mares at \$300 the season. HAPPY MEDIUM 400. Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season. ABERDEEN 27. Having ten of his get with records ranging from 2:15 1/2 to 2:27 1/2. Limited to 40 mares at \$150 the season. ALECTO 2548. By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season. STARMONT 1526. By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season. Ethan Allen, Jr., 473, used as a Private Stallion. The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address Lock Box 392. WM. T. WITHERS, Lexington, Ky.

# BREEDER AND SPORTSMAN

Vol. IV. No. 13.  
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, MAR. 29, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

BOB MASON.

In the BREEDER AND SPORTSMAN of September 16th, 1882, there is an illustration representing Exile, and the above representation is that of his "full" brother. It is rather a singular phrase which horsemen have adopted of denominating colts of the same parentage as full brothers, but inasmuch as a query oftentimes follows the omission of the adjective, it is interpolated to express the idea that Exile and Boh Mason are by Echo from Belle Mason by Belmont. It is no mean praise to state that Echo and his sons and daughters have furnished five illustrations for this paper, and others of his get are well deserving of a niche in the pantheon of equine notabilities. Neither is it a rash assertion to state that, for harmony of proportions and beauty of color, the trio which have appeared would be hard to excel if shown among a picked hundred of the whole country. Belle Echo is nearly a model of the highly bred trotter, and so are the

brothers. The three are alike in combining the blood of Echo and Belmont, so that it is not surprising that there should be a likeness, and the "happy nick" has not only given good looks, but the still more highly prized qualities of speed and endurance. Back of the Belmont in Boh Mason are the stoutest of thoroughbred strains. His grandam was Lucy Johnson by the Poney, a son of imported Leviathan, and a game, honest runner, with stamina to carry him over the longest courses. Leviathan was one of the most successful stallions ever imported into America, and in his day stood at the very front of the sires of the period. The stars of the southern courses were chiefly Leviathans forty years ago, and his daughters proved as successful in the stud as they were on the turf. They were generally large, "roomy" mares, and their produce had the faculty of running to the end of the route as well as a great flight of speed. Peytona, who wou

the great etake at Nashville, heats of four miles, and who beat Fashion two years afterwards at the same distance, was by Glencoe from a Leviathan mare Giantess, and there is scarcely a doubt that she was the best mare of her size that ever faced the starter in this, or, in fact, all countries. The third dam was Catalpa, by Frank, and Frank was a son of Sir Charles, and his dam was Betsey Archer, by Sir Archy. The fourth dam was by John Richards, so that there is a preponderance of Diomed blood, which many of the most thorough students of trotting lines hold to be as good as that of Messenger; not a few consider it superior. Frank being a "double Archy," and John Richards a son of the "patriarch of the American turf," there are three strains from these sources alone, and were the pedigree carried out on both sides, it will be found that there are few who have so much of it. The junction of Messenger and Diomed blood has many exemplars of the potency of the mixture that it is well to have plenty of both, and this Boh Mason has.

TURF AND TRACK.

Stockton Colt Races.

Entries to the purses offered by the Stockton Fair Association to two-year-old, three-year-old and four-year-old trotters closed on the 15th with the following nominations:

Two-year-olds.

- E. Giddings, Lemoore, b c Promise, by Prompter, dam by Weyland Forrest.
- S. K. Trefry, Sacramento, b c Apex, by Prompter, dam by Flaxtail.
- G. W. Trahern, Stockton, b c Paul Shirley, by Nephew, dam by Messenger Duroc.
- Ira L. Ramsdell, Los Angeles, blk f Luella, by Sultan, dam Ella Lewis, by Vermont.
- W. B. Todhunter, Sacramento, ch c Cannon Ball, by Prompter, dam by Buccaneer.
- Palo Alto, b c Azmoor, by Electioneer, dam Mamie C., by imp. Hercules.
- Palo Alto, h c Noval, by Electioneer, dam Norma, by Alexander's Norman.
- L. J. Rose, San Gabriel, blk f Reina, by Del Sur, dam Vashfi, by Mambrino Patchen.
- L. J. Rose, San Gabriel b c Kismet, by Sultan, dam Ssucebox, by Samson.

Three-year-olds.

- E. Giddings, Lemoore, b c Bay Rose, by Sultan, dam by The Moor.
- A. A. Yeager, Snisun, b f Nona Y., by Admiral, dam Flora.
- J. A. McCloud, Stockton, b c Mt. Vernon, by Nutwood, dam Daisy, by Chieftain.
- G. W. Trahern, Stockton, br c Voucher, by Nephew, dam by Vernon Patchen.
- D. S. Rosenbaum, Stockton, br f Tabbie Rosenbaum, by Nutwood, dam by Blackhawk.
- J. A. Goldsmith, Oakland, s h Judge S., by Nutwood, dam Kate, by Volunteer.
- John Williams, Stockton, H. C. Smith's s c Lelaps, by Nutwood, dam a Clay mare.
- J. C. Simpson, Oakland, br c Antevolo, by Electioneer, dam Colombine, by A. W. Richmond.
- Palo Alto b f Argo, by Electioneer, dam American Girl, by Torcato Sontag.
- Palo Alto, br f Alta Belle, by Electioneer, dam Beautiful Bells, by The Moor.
- J. E. Durham, Pacheco, b c McVeagh, by Conductor.
- C. Thomas, Oak Grove, g c Pope Leo, by Romero, dam by Crichton.
- L. J. Rose, San Gabriel, br c Bedonin, by Sultan, dam Gertrude, by The Moor.
- L. U. Shippee, Stockton, b f Quaker Girl, by Nutwood, dam by Henry Clay.

Four-year-olds.

- E. Giddings, Lemoore, b g, Alphas, by Algona, dam by Hinman's Consul.
- James Garland, Oakland, br f Regina, by Electioneer, dam by Elmo.
- W. F. Smith, Sacramento, blk g Thapsin, by Berlin, dam Lady Hubbard, by Benicia Boy.
- John Williams, Stockton, Mrs. Lucy Goff's br m Lucilla, by Nephew, dam by General McClellan.
- George Crospey, Pleasanton, ch c Redwood, by Nutwood, dam Alice R., by Nanbu.
- Palo Alto, b f Helen, by General Benton, dam Alameda Maid, by Whipple's Hambletonian.
- L. J. Rose, San Gabriel, g g Center, by Sultan, dam Belle View Maid, by Idol.
- L. J. Rose, s g Don Carlos, by Del Sur, dam by The Moor.

A Backward Year.

[New York World.]

That the weather has scarcely been fit for training is perhaps only too well known, seeing that scarcely a day passes without more or less rain or snow, and that the mud is almost bottomless. But with St. Patrick's Day checked off the stable's calendar, owners and trainers know that with a few warm and spring-like days the winter will have been forgotten, and that before one can scarcely realize it May will be here, and with it racing both east and west. Then the advantage that wealthy owners and large stables have in being able to exercise their horses all winter under cover, with the ground covered knee deep with straw, will be shown, as a month of brisk work out of doors will put a majority of their horses in a condition for the opening races. Under such favorable circumstances it is not surprising that the horses owned in such stables as the Brooklyn, Rancocas, Westbrook, Brookdale, Erdenheim, Chester Valley, and the Preakness, are monopolizing the attention of the speculative public, not only of this city but in all large cities.

In the west, owing to the absence of inclosed gallops, the horses are said to be fully a month behind in their work, which is not surprising in view of the following weather and training report from Kentucky and Tennessee in the current issue of the *Live Stock Record*:

"There has been little or no change for the better in the weather during the past week. We have had either rain, sleet or snow. The horses in central Kentucky, as we have said before, are fully from four to six weeks behind. During our visit to Tennessee last week we found the horses fully as backward as those here, owing to continued bad weather. There are some one hundred and thirty-three horses at Louisville, and trainers there have the same complaint—continued bad weather. The horses trained in the south this season will certainly have a great advantage over those in Kentucky and Tennessee."

From such a report it will be seen why such western racing events as the Kentucky Derby, Louisville Cup, and Merchants' have so far failed to attract the attention usually given them early in the season. So far—at least so several of the New York commission firms report—the only horses backed for the Kentucky Derby are Bob Miles, Buchanan, Powhatan, Louisville, Conkling, Richard L., Exploit, Ten Full and Eros II, with occasional inquiries for some "dark" candidate. The current odds obtained both in New York and the west against the horses named range from 5 to 15 to 1. But, as backers generally ask for more, they will probably let the race alone for a few weeks until something tangible is learned of the doings of at least the prominent candidates. In the meantime backers in this vicinity can either turn their attention to the Suburban Handicap at Sheephead Bay, which will be the largest betting race of the spring season in the east, or they will take a "flier" at such immediate English races as the Lincolnshire Handicap, Liverpool Grand National Steeple-chase, or the City and Suburban Handicaps, with occasional ventures at the Withers' Stakes, as they hear good or bad reports.

The New Orleans Row.

The recent scandal at New Orleans in regard to the poisoning of Carson has created something of a stir in the turf circles of that locality, and has led to the ruling off of several parties. The New Orleans *Picayune* of March 12th gives the following account of the trouble:

On Saturday, March 1st, Athlone won a dash of a mile and a quarter, in which Carson finished behind Princess and John Sullivan. Carson was the favorite in a number of pools and in the books. He had been thought in good condition for the race, and his running fourth was a surprise.

Mike Welsh, his trainer, claimed the horse was poisoned. For some days there was no proof against any one in connection with the affair, but suspicion fell upon Dick Parks, a negro employed as Carson's rubber, in whom great confidence had been reposed. There was no other evidence against him except his sudden departure, and it was claimed that he had spoken of going for several days previous, his month having expired. Nevertheless a telegram was sent to the Chief of Police at Mobile to arrest Parks if found on the train and search him. No answer was received to the dispatch.

The judges received testimony that Thomas Redmond, formerly a jockey and now said to be a "tont," went to a grocery in the vicinity of the Fair Grounds on the night before the race and sent for Parks. The two were in consultation and were again together the next morning. The night after Redmond had money, while Parks seems to have had sufficient money to buy a railroad ticket, although Mike Welsh claims that no wages were due Parks and he gave the negro one dollar, out of kindness, before he left.

A veterinary surgeon was called to examine Carson, but as it was two or three days after the race he could not state positively that the horse had been poisoned. The horse, however, had a sore throat, emitted a disgusting odor and showed other signs of suffering. He has not yet recovered from his illness.

The investigation by Colonel Simmons and Major Wheeler developed the evils of the touting system, and it was determined to wage war against the set of touts infesting the Fair Grounds. Captain Ed. Flood, the guardian of the track, and Sergeant O'Rourke, the commander of the police of the precinct, were kept busy in one of the intervals between the races hauling up persons singled out to the judges' stand. Thos. Durham, Wm. Mahoney, one of the brothers who formerly owned Lute Fogle, C. Smith, Jno. Riley, Edward Wallace, John Conrad and Jas. Hedrick were warned to keep off the track. They will doubtless obey the warning after the statement that if caught on the track they will be fined off of every race track in America, and lodged in jail for trespass besides. Hedrick is a negro, better known as Longfellow, who formerly trained Carter Harrison for Mr. Whalen. The latter suspected that Carter was stuffed in a race he lost to Princess and discharged Hedrick.

Dick Parks was ruled off, while Redmond was given a chance until to-day to clear his character. He does not deny having won on the race, but says it was upon his own judgment. He denies having met Parks the night before or having been near the Fair Grounds. On the morning of the race he went to the Fair Grounds, claiming that he had the right to do so, and saw Tilford beat Carson a half a mile. He knew that Carson could not be right, and therefore bet against him.

Another phase of the case is Beardslee's note to Regan, guaranteeing that Carson would best Athlone, which Carson did not do. Beardslee is out of town and could not be examined. "Tiny" Quantrell, the jockey who rode Athlone to victory, said Beardslee did not give him any instructions, except to ride to win. Beardslee is said to claim that he had seen Carson go a fast trial; thought that Athlone could not beat him, and therefore advised his friends to back Carson.

The investigation was a thorough and commendable one, and will do much towards retaining the confidence of the public in the fairness of the sport provided for their amusement.

Duncan's Mac.

A correspondent at Salem, Or., sends us the following, cut from a Tacoma, W. T., paper, and asks if the statements as to pedigree and record are correct:

"P. D. Forbes has sold his celebrated stallion Mac to Thos. J. Edmondson of Portland, for \$2,000; record 2:26, at Bay View Park, San Francisco. Mac is from celebrated stock, as the subjoined pedigree, copied from Wallace's Trotting Register, testifies: Mac was sired by Sawyer's Colt, he by Stockbridge Chief, he by Vermont Black Hawk; Stockbridge Chief's dam by Sir Charles, he by Durdock Messenger, he by Diomed, son of Duroc, his dam by Messenger, he by imp. Messenger, he by Mambrino, his dam by Turf, grandam by Regulus, he by Starling, he by Fox. Dam of the Sawyer Colt was San Jose Damsel, by Easton's David Hill, he by Vermont Black Hawk, his dam the dam of Dashaway, the celebrated two-mile horse. Mac's dam was by General Taylor, out of a thorough mare imported to the state from Missouri by—Haskell, Esq.; General Taylor, by the famous Morse Horse, he by imp. Norman (from France); dam of Morse Horse by Ogden's Messenger, he by imp. Messenger, his dam by Katy Fisher, by imp. Highflyer, grandam by Jersey Eclipse."

This horse was known in California as Duncan's Mac. There are some errors in the foregoing extract, none of which are material ones, however, except that in regard to record. Mac has no record of 2:26. Mr. Duncan used to claim that he could show a 2:40 gait, but never, to our knowledge, was any such showing made in public. The horse does not figure in the records at all, but may have done such a thing as a mile in 2:46. Possibly it was a typographical error that reduced it suddenly to 2:26. The sire of the Sawyer Colt was not Stockbridge Chief, but a son of that horse called by the same name. Old Stockbridge Chief was a chestnut horse, and was never in California, Wallace's Register to the contrary notwithstanding. The Stockbridge Chief that sired the Sawyer Colt was a gray horse, bred by Fance Patten of Troy, N. Y., from whom he was purchased by P. G. Vibbard, who brought the horse to California. He was a son of Old Stockbridge Chief, his dam Fanny Dawson, a mare that was called a "Messenger," but we know nothing further of her breeding. Mac loses by this error of omission. There are also some variations in the pedigree of the Morse Horse, but they are not of great moment.

The editor of the Toledo *Journal* is in receipt of a letter from a prominent breeder in Olean, N. Y., under date of February 20th, which gives some sensational points on some of Smuggler's colts. It is claimed that Pilgrim trotted in private last year in 2:12 and Hugenot, another of Smuggler's sons in 2:14. It is also claimed that Ilka trotted a mile in 2:18, and another Smuggler filly, Smuggler's Daughter, a trial in 2:16 on a half-mile track. This gentleman claims all these sons and daughters will be out loose this year. If so, Jay Eye Case may go into a state of chronic despondency.

The Breeding of Wilson's Blue Bull.

The *Turf, Field and Farm* in reporting a recent conversation with R. J. Wilson regarding Wilson's Blue Bull, said: "The suggestion that his sire was Pruden's Blue Bull was made by Colonel R. S. Strader, and then the stallion was christened Blue Bull."

Now comes editor Randall of the *Western Sportsman*, Indianapolis, Ind., and tells a straightforward story about what he knows of the subject and promises to explain some more interesting facts in the near future. He says:

Now, the truth is that the sire of the great Indiana horse was not called Pruden's Blue Bull, nor anybody else's Blue Bull, but he was a sorrel horse with enough white hairs in his coat to be called by some a roan, brought from somewhere in Ohio to Petersburg, Ky., by a man whose name has slipped our memory at this writing, in 1856 or '57. He was a very fast pacer to saddle, and was never known by any other name than Old Sau. In 1857 Old Sam stood for mares at Petersburg, Ky., and Rising Sun, Indiana, dividing his time equally between the two places, and it was during this season that Dan Dorrel bred a mare to him that he always claimed to be by Blacknose, and the produce was a sorrel colt, a natural pacer from the moment he was able to stand alone. This colt Mr. Dorrel named Little Sam, under which name he was shown at fairs in Kentucky and Indiana. When old enough to break to saddle he never failed to win a premium for speed, but was never shown in harness. When five years old Mr. George Loder farmed him, and he made a season at Petersburg, Ky., under the name of Little Sam, where he sired Purity, the first of his get to trot in 2:30. After he was sold to Mr. Wilson he paced a race at Indianapolis against old Red Buck, being named in the entry "Wilson's sorrel horse Sam," and he was never known by any other name until about the time his daughter Mila C. made her debut in trotting circles.

More than once the late James Wilson assured the writer that when he bought the horse Dan Dorrel told him his name was "Sam;" that he was got by a pacing horse owned in Kentucky, and that he was out of his Blacknose mare. Mr. Wilson also declared with a good deal of "emphasis" that his name was not Blue Bull; but that name had been applied to him by others, and as the newspapers were speaking of him as Blue Bull, and strangers therefore knew of him only by that name, he did not think it of enough consequence to go to any trouble in correcting the error, though he regretted that he had not done so. He added that there was a family of horses in Rnsh county before he purchased Sam that were called Blue Bull; they were almost universally of a blue or mouse color, with a black stripe along the back, and generally pacers. To this fact he attributed the application of the name to his horse, as he did not know of any other circumstance that could possibly have suggested it.

The facts with regard to breeding and history of the horse before he came into Mr. Wilson's hands were furnished us by reliable citizens of Petersburg, Ky., who were intimately acquainted with Dan Dorrel, and familiar with both sire and dam as well as with "Little Sam" himself. We believe every word they told us, and feel confident their assertions will be confirmed by further investigation which we intend to make in the near future.

The English Season.

The official English season under the rules of the Jockey Club began at Lincoln last Monday and will continue with scarcely a day's intermission to the last Saturday in November. As usual, the first week will be divided with three days at Lincoln and three at Liverpool. At the former the Lincolnshire Handicap, one mile straight, to be run on Wednesday, the 26th, is the principal event, while at Liverpool the Grand National Steeple-chase, about four miles and a half, to be run on Friday, the 28th, will as usual command the most attention. Up to within the last three weeks the weather in England had been very mild and open, but just as the real hard training work began for the early events the weather changed, and at last advices there was a general report of unfavorable weather with considerable rain and snow. As has been the case for the last three or four years, an American-bred horse is holding a somewhat prominent position in the Lincolnshire betting. This year it is Lord Elsmere's Abbotford—known a few years ago as Mr. P. Lorillard's Mistake, by Waverly. He is in the hands of Charley Archer, and with 101 pounds is thought to have a very good chance by several usually good authorities. Readers must not forget, however, that Abbotford is a patched up cripple that is likely to break down entirely at any day, although on the 3d he did a mile and a quarter in good style. The favorite for the race is R. C. Naylor's Fulmen, by Galopin. He was bred by Prince Bathyaun and was sold by reason of the Prince's death for 5,000 guineas. He had a great reputation, but was a disappointment, and he ran three times last year without being placed, but as Archer has been engaged to ride him that is some reason for his popularity. Mr. J. W. Smith's Tonans, the second favorite, is another horse of great expectations, for after running fourth for the Cesarewitch he was second both for the Cambridgeshire and Liverpool Autumn Cup.

Trotting at the Bay District.

The first of the two matches between Vanderlynn and B. B., for \$500 a side, was trotted at the Bay District last Saturday. The morning opened with rain, and an impression was abroad that the race would be postponed, which caused the attendance to be only moderate. The conditions required both horses to draw 170 pounds, which is the amount of pressure Mr. Farrell puts on his sulky when in his average condition of health and appetite. The track was fair for the season. Pools favored Vanderlynn, the average rate being \$55 to \$40.

SUNDAY.

BAY DISTRICT COURSE, March 23—Match for \$500 a side.	
P. Farrell's b g Vanderlynn.....	2 1 1 1
Geo. Lethy's blk g B. B.....	1 2 2 2
Time—2:35, 2:31, 2:31, 2:37.	

After this race had been disposed of a match was trotted between the roadsters with this result.

SUNDAY.

SAME DAY—Match \$— a side, to road carts, heats of a mile.	
Mr. Burn's b m Fannie Burns.....	2 1 1
Mr. Fletcher's g Pilot.....	1 2 2
Time—2:47, 2:43, 2:44.	

The workmen who tore up the flooring of the old book-makers' hall at Sheephead Bay Track found the business quite profitable, five men engaged in the work divided \$40 in gold and silver coin at the end of the first day. Several bank notes were also discovered, but the rats and mice had cut the money for building their winter quarters, which rendered it unfit for anything else.

Unless & Co. have leased the Petaluma fair ground, and are putting the track and accessories in condition for the season's business.

### The Height of the Race-horse.

The best part of a century and a half has elapsed, generations of turf celebrities human and equine have come and gone since that experienced breeder and sportsman Bracken pronounced his famous dictum—"A great good horse must be a little good one." Since speed depends mainly on length of stride, and the frequency with which it can be repeated, it stands to reason that it must be so. The dictum, therefore, is as true now as then; but, reasoning from experience, it would, perhaps, be more in accordance with fact to say that a good little horse will always beat a bad great one at any weights over any distance; and, it might be added, that to one great good one there are to be found ten medium-sized good ones—that is to say, animals ranging between the respective heights of 15 hands, and 15 hands 3 inches.

Bracken's dictum tended to incite breeders to aim at size and size only, and from that time to this size has been considered the *summum bonum* in the race-horse, until we have attained it with a vengeance, in such animals, for instance, as Prince Charlie, Wild Oats, Rayon d'Or, Ambergris, Ronnd Shot, and a host of others. Trainers will tell us that the T. Y. C. is the distance most suitable to animals such as these. Veterinary surgeons will tell us that nine roasters out of every ten are big, over-grown, long-necked horses. Rayon d'Or had to be starved, or he would have roared in his box when the Yankees came to look at him.

It would seem, therefore, that we have somewhat overshot the mark in the competition for size, that we should cry content with 15:3 or 16 hands at the most, and persuade ourselves that every inch over that height represents so much loss of power. If, while adding to the supports, we could at the same time be adding to the framework of the machine, we should soon produce a colossal race-horse, but it cannot be done. Man is concited, and thinks he can twist and turn nature's work, according to his fancy; but Darwin tells us of a power over which we have no control. It is called correlative variation, and while we are at work in one direction this power set in motion by our interference is at work in another, counteracting our efforts, and rendering them useless.

There is another power that can save us and help us to retrace our steps, and that is selection. Select the median-sized animals for stud-purposes. Discard the camel. Small mares will throw quite large enough foals, often too large ones. What then can we expect if we invest in what are falsely termed "great roomy mares," but which are in reality great coarse-boned brutes. There are many such at the stud, but one could count on one's fingers those of them which produced good runners.

It is interesting to trace the steps by which the race-horses of the last century attained their size. There were two agents at work effecting this object. The one was the selection by breeders of the finest specimens for stud purposes, assisted by the natural propensity of the eastern horse to expand under the influence of climate and good keep, and this was the most powerful; it worked slowly but surely. The other was the use of common blood infused into the race-horse of that day through the native English mares. For it is inexplicable how any one who has studied the subject can conceive that our race-horse is "the pure eastern exotic, whose pedigree may be traced for two-thousand years, the true one of Arabia Deserta, without a drop of English blood in his veins."

Very few eastern mares were imported to this country, and it is extremely doubtful if all the mares imported by Charles II, and called royal mares were of eastern blood. Some, it is reported, came from Hungary, and we know that the term "Turkish horse" at that day included many different breeds. What, then, were the unknown mares to which we come if we trace back the most fashionable pedigrees of to-day? They were undoubtedly English mares improved by eastern blood from the reign of James I downward.

Berenger tells us that there were English horses on the turf when horse-racing was still in its infancy; he names several that could go fast enough to heat Irish hobbies, and imported Barbe. These were undoubtedly common brutes—a mixture of every kind of horse under the sun, and the majority of them must have been little better than ponies, for we find their descendants at the beginning of the last century, after many infusions of eastern blood, averaging about 14 hands in height; and the eastern horse would have increased rather than diminished their size. The importation of the Darley Arabian at the beginning of the last century, and his use as a stud-horse did a great deal to increase the size of these Gallo ways, and even where he was put to mares entirely of eastern blood, such as Betty Leeds, the dam of the two Childers, a gradual increase in size was noticeable.

The Darley Arabian himself was 15 hands, and was a pure Arab horse of the family called Kehilan Rasel Fedawi, which signifies the Arabian horse of the family called the headstrong. His son Flying Childers was the same height. Al-manzor and Aleppo, sons of his, are described as being fine horses, which at that time meant 15 hands or more. Shakespeare, a great grandson of the Darley Arabian, through Aleppo and Hohobin was 15:3, Marske, the sire of Eclipse, another of his great grandsons was 15 hands. The Godolphin Arabian next gave a further fillip to size; he was himself 15 hands, and his stock averaged about that height, among them being Lath, Regulus, Cade and Matchem. The Beyerly Turk's line had in the meanwhile reached the same height evidenced by Tartar, the sire of King Herod. Immediately after this our horses seem to have rapidly increased in size, for we find Eclipse 15:3 or 16 hands, the result of a combination of the Darley and Godolphin Arabian's blood; King Herod, 15:3, a combination of that of the Beyerly Turk and Darley Arabian, and not many years later another hand was added by the sons of Herod and Eclipse.

There were some horses by small eastern stallions, whose sudden increase in stature is not easy to be accounted for, except on the supposition that their dams were big, common mares, and it is noteworthy that these were all out of dams with many flaws in their pedigrees, suggesting the introduction of English blood. Among such may be enumerated Bay Bolton, foaled in 1775, a half-bred horse of whose stock Osmer says, "They were victorious on the turf, masters of any weight in the chase, and fitter for the coach, too, than any horses I ever saw"; the large Hartley mare, foaled in 1740, the dam of the giant Bahrahm, who stood sixteen hands; Sampson and his stock who are described as large and of great bone, though inferior race-horses, especially under heavy weights. Mambrino was a grandson of his, and certainly from Stuhbe's portrait of him he appears to be a common brute, more fitted for harness than anything else. Mackless, by the Oglethorpe Arabian, out of an unknown mare, must have been a big horse, judging from the size of his stock.

This common blood we must blame for the common, coarse individuals which are to be met with now and then among our race-horses; positively ugly some of them are, with narrow foreheads, small, dull, vicious-looking eyes, Roman noses, ewe necks and drooping croups—these are not heirlooms derived from the eastern ancestor. Thus it will be

seen that between the years 1715 (the birth of Flying Childers) and 1745 (the birth of Shakespeare) the stock of the Darley Arabian had gained three inches in height, notwithstanding the fact that most of the brood-mares at that time were little more than ponies.

There are many persons at the present day interested in the welfare of the thoroughbred who assert that he has deteriorated, and the assertion is by no means new; it was made early in this century soon after the effects of increased size on the powers and constitution of the race-horse began to make themselves known.

These alarmists base their argument on the fact that out of the enormous number of thoroughbreds annually produced so many turn out useless and unsound, and of those who do stand training so few can stay. A combination of speed and stamina, and the ability to transmit these qualities to the offspring has always been the test of purity of blood. It is said our thoroughbred cannot stand this test, that even if a genuine animal himself, his stock are frequently useless; that his unsoundness and want of constitution can only be remedied by fresh infusions of Arab blood.

Experiments have been tried in this direction, but have in most instances failed owing to the consequent loss of size and speed.

In one instance success resulted. Lilius, winner of the Oake in 1826, was out of a mare called Fair Ellen, by the Wellesley Grey Arabian, from Maria, by Highflyer, and moreover, this Grey Arabian, although a fine animal, was not a pure Arabian.

Our horses are accused of being wanting in symmetry and true proportion. It is asked how many race-horses must be visited before one can meet with a Barcadine, a Reputation, or a Galliard; and are we not in such a search far more likely to stumble upon a Macheath?

A frequent answer to the charge of want of stamina is that the animal really can stay, but is trained for short courses, and never gets a chance of exhibiting his powers. But the trainers tell a different tale. Take a good-looking horse like Whitechapel, by Cremorne, for instance. He is a stayer, if appearances go for anything, but his trainer could tell that it is useless running him over a distance of ground, as he would never win. None of our race-horse's most enthusiastic supporters will dare to stick up for him in the hunting-field, or as a hackney on the hard high road. Any one who has had experience of him could give heaps of reasons. And as a sire of hunters and roadsters he is not all that could be desired.

The question then is, whence is the regenerating fluid to be derived? Mr. W. S. Blunt of Crabbet Park, Three Bridges, Sussex, is attempting to solve the difficulty. Mr. Blunt accompanied by Lady Ann Blunt, who is also an excellent judge, has been to Arabia, and purchased some pure Arab horses. As he is conversant with the language, manners and customs of the Arabs, and is on intimate terms with some of their sheiks, he has had opportunities which have been afforded to few Englishmen, and has been able to persuade them to part with some of their best animals. Mr. Blunt has at Crabbet eighteen brood-mares and a stallion; most of them come from Northern Arabia, and belonged to the Anezah tribe of Arabs, who possess the finest animals of the breed, and the most likely from their superior size and length to get race-horses. The Anezah have possessed the best horses in Arabia from time immemorial. They are nomads; a nomadic life suits the Arabian horse; whenever he finds his way into some town and he, like his master, deteriorates. The excellence of the Anezah horse has been maintained by repeated selection, and it may not be generally known that the first selection of five Arabian mares called Kehilets was made by a certain Salaman, a descendant of Ishmael, about the year 1635 B. C., 600 years before the time of David, King of Judah, so that an authentic family of horses is known to have been preserved by the Arabs for 3,500 years.

Mr. Blunt's stallion, called Kars, is a bay horse 14 hands 3 inches in height, foaled in 1874. He is of the family called Seglaw Jedran. He is a beautiful horse, and is kept in good, hard-working condition. In winter he carries Mr. Blunt, who is by no means a feather-weight, to honours. His condition presents a great contrast to some of our pampered stallions who not infrequently fail to stut their mares, and are so loaded with fat that they can barely carry themselves, much less anyone on their backs.

We often hear it said of one of them: "He is a bit light and shelly at present, but after he has been at the stud a bit he will let down into a magnificent horse." Don't believe it, breeder; his shelly may, but his back ribs never. Mr. Blunt's mares are all good. The white Sherifa's head is perfectly lovely, and defies description. We English are inclined to attach little importance to a horse's head. We say, "He doesn't go on his head." "We don't want him to be too clever, the brains should be in his rider's head." We forget that cleverness and cunning are not necessarily synonyms; that the brain, besides being the seat of reason, is the centre of the nervous system—the mainspring of motion. A breeder who was lamenting some coarseness or deficiency in the head of a colt of which he had expected great things, in reply to the consolation a friend was offering by pointing out the colt's otherwise almost perfect form, remarked: "Never mind the rest of the body; if the head had only been all right the body would have grown to it, but now his body can never get beyond his head." Most of Mr. Blunt's mares range between 14:2 and 15 hands, and they possess every point that could be wished for in a turf horse.

The chestnut Rodania, of the family called Kehilet Ajuz, foaled in 1869 and bred by the Roala tribe, is a splendid mare of perfect symmetry. One forgets one is not looking at a big one. Her chief characteristics are great depth, very lengthy quarters, short, strong limbs. She stands over a great deal of ground, at the same time having a short muscular hack. The main deficiency Mr. Blunt has to contend with in producing a rival to our race-horse is want of size. He does not admit a deficiency in speed. Speed, he says, is inherent in the Arabian horse. Make him as high as our race-horse and his speed will not be inferior. But it would be strange if in the course of two centuries selection and education have not increased the speed of our horse. Be this as it may, Mr. Blunt is speedily mastering the other difficulty—want of size. Good keep without undue forcing has already done wonders. He has now at Crabbet a chestnut filly two years old, by Kars—Hagar, measuring already close on 15 hands. Her sire is 14:3, her dam just about 15 hands, so that if she makes 15:1, which she will do at the least, Mr. Blunt will have gained an inch in one generation.

This is wonderful, and goes far to show us of what worthless stuff the majority of the imported horses of the last century were. Few of them were pure Arabs; most of them stunted ponies, lacking that capacity to expand so noticeable in the Anezah horse. No wonder, then, that increase in height was in those days gradual.

Mr. Blunt thinks that the pure Arabian can be enlarged without fear of losing those qualities inherent in his nature, such as indomitable courage, a generous disposition, a good

constitution, stamina, soundness of wind and limb, and that superior density of bone, muscular and horn fibre which marks his race. And he maintains that if our race-horse had been bred entirely from pure stock there would now be no fault to find with him. It is to be hoped Mr. Blunt may be rewarded; his object is certainly a patriotic one. It is probable that before long a race for pure-bred Arabs will be re-established at Newmarket; race-goers will then have an opportunity of inspecting some of Mr. Blunt's productions, and judging for themselves whether they will not make as good instruments of gambling as the plater of to-day, while at the same time they are serving other useful purposes.—*Darley, in Land and Water.*

### The Champion Family.

There has been, at one time and another, a large number of trotting stallions to whom the name "Champion" has been given, but of the entire lot only two, Gooding's Champion and King's, have become noted as the sires of a sufficient number of horses that have entered the 2:30 list to entitle them to be ranked among the leading sires of the country; and even of these two it can not be said that their get have been particularly successful on the turf.

Gooding's Champion, now in his thirty-fourth year, is a son of King's Champion, and has sired twelve horses with records of 2:30 or better. Of these the fastest is undoubtedly Naiad Queen, whose record of 2:20 is the best ever made by a member of the Champion family in any of its branches. But all the credit of her speed should not by any means be given to her sire, as her dam, Tackey, was a famous trotter in her day, and made a record of 2:26 as long ago as 1867, and in those days a 2:30 horse was far more of a rarity than is one that trots in 2:20 at the present time. Tackey was by Pilot, Jr., a horse whose blood has done much for the trotting interests of the country, and it was natural that after being retired from the turf she should achieve distinction in the breeding ranks. But her daughter, Naiad Queen, while having plenty of speed, has not yet shown herself to be a first-class performer; and in these days the mere ability to trot one mile at a high rate of speed does not at once place any horse among the number of those considered first-class. Jack Phillips, who developed Naiad Queen and drove her to her record, is a thorough horseman, brought up in the school which produced the Dobles, father and son, John Turner and others, and it is doubtful if in other hands Naiad Queen would have been as successful. Phillips has always been a good man with nervous, flighty animals, and his handling of Etie Jones, whom he gave a record of 2:20 after others had pronounced her too uncertain in temper to ever be of value on the track, was a masterpiece in its way.

Another champion that was a good one in his day was Castle Boy, that died in New York city a few weeks ago, and in Mike Roden's hands he achieved a measure of success that would not be accorded him at the present time. His record was 2:21, and he and Naiad Queen are the only Champions that have beaten 2:23, although from that point to 2:26 the family is quite well represented, York State, Novelty, St. James, Elmer and Swallow having records from 2:23 to 2:25. None of them were distinguished on the track, however, either for speed or gameness, and in the last-mentioned particular there has always been a suspicion that the Champions were not all that could be desired. A great fuss was made over St. James the first year or two he trotted, and he was sold at a long price to a Californian, but after reaching the Pacific Slope did nothing to enhance his reputation. Novelty got her record two seasons ago, but that she will ever beat it is not probable, and Billy Weeks, in whose charge she was last year, has no very high opinion of her. The rest in the 2:30 list—York State, Elmer, Eva, Schnyball, Lady Sargent, Edwin A., Champion Girl and Chancey M. Bedle—have never done anything to distinguish themselves, and may justly be dismissed with this brief mention.

King's Champion, who was also commonly known as Champion, Jr., was by Grinnell's Champion, a son of Almack, he by Mambrino, son of Messenger, and on his dam's side the blood lines were mostly those of the thoroughbred. His representatives in the 2:30 list are eight in number, they being Nettie Brulew, 2:24; George B. Daniels, 2:24; Charley B., 2:25; Golden Girl, 2:25; Myrtle, 2:25; Mollie, 2:25; Col. Barnes, 2:28; and The Auburn Horse, 2:28. Of all these the last-named will no doubt be remembered when the others are forgotten, as he was without question the fastest of his sire's get, and by many thought to be the fastest trotter of his day. Being owned during the latter part of his life by Mr. Robert Bonner, his speed was, of course, not shown in public contests where a record could have been obtained, but so cautious and competent a man as Hiram Woodruff states in his book that The Auburn Horse drew him faster than any trotter he had ever ridden behind, and the force of this statement is enhanced by the fact that Woodruff was at that time training Dexter, and considered him capable of beating 2:20. The breeding of the dam of The Auburn Horse was unknown, and this may be said regarding the dams of many of the Champions. Nettie Brulew was a remarkably fast little piece of horseflesh, but an uncontrollable tendency to pull seriously impaired her value as a trotter, and she was early put to breeding.—*Breeders' Gazette.*

### The Legal Phase of Racing Forfeits.

The question of the legality of obligations created under turf rules is about to be tested in Kentucky. Tom Bowling, recently purchased by Mr. N. Armstrong, of Montana, has been attached in a suit of Col. F. Waters against Mr. Armstrong, for forfeit due on the filly Annie Louise, and for which Col. Waters holds an order from the Louisville Jockey Club. Mr. Armstrong claims that having retired from the turf, he is not liable for the forfeit, which would not seem to exonerate him. In the suit is involved the questions whether at law forfeits can be collected, and whether the law against gambling will invalidate the contract. The progress of the case will be watched with a good deal of interest by turfmen, and the precedent established by the decision of the court will be a valuable one as a guide for similar cases in future. By apparent general consent the penalty of non-payment has been only that declared by the rules; that is, suspension until the forfeit is paid. That an entry under published and well-understood conditions as to amount to be paid and the time of payment is a contract, cannot be questioned, but whether courts will hold it to be one of those that are deemed to be "against public morals," is the question in the case. Mr. Armstrong's claim, that as he has retired from the turf he is not liable for the forfeits, has no moral merit, and he might as justly set up that if he sold his horses he thereby would cancel all liabilities he might have incurred with trainers and feed dealers.

The purses offered by the Stockton Association for running colts did not fill, and have been declared off. The programme for 1884 will be issued during the coming week.

## Closing of Stakee.

Champion Stallion Stakes, 1885, Monmouth Park, April 1st, Tuesday next.  
Capital Turf Club, Sacramento, racing, trotting and pacing, April 5th, Saturday next.  
See Advertisements.

## Foale.

At Rancho del Paso, 1884. Property of J. B. Haggin.  
January 13th, b c, star in face, by Echo, dam by Belmont.  
January 29th, b f, by Algona, dam Flora by Benton out of Flora McDonald.

February 3d, ch c, star in face, by Algona, dam by Whipple's Hambletonian, grandam by Chieftain, great grandam by Billy Wallace.

February 19th, b f by Algona, dam Oak Leaf, by Gen. McClellan (Stockton).

February 19th, b c, near hind foot white, few white hairs in forehead, by Exile, dam Columbia filly, by General Dana, grandam Columbia, by Belmont.

February 27th, b f, by Norwood, dam Weasel, by McCracken's Black Hawk.

March 3d, b f, by Algona, dam Drew Girl.

March 8th, ch c, few white hairs in forehead, hind feet white, by Kilrush, be by Whipple's Hambletonian out of Lady Livingston; dam by Alexander; grandam by son of Owen Dale out of Little Blossom.

March 9th, b f, few white hairs in face, by Exile, dam Kate Hays.

March 10th, b c, strip in face, by Exile, dam Queen Bess, a Kentucky mare of Deumark stock.

March 12th, h c, little white on both hind feet, by Echo, dam Dido, by Whipple's Hambletonian; grandam by Chieftain, great grandam by Billy Wallace.

March 12th, cb c, by Algona, dam Sally Berubardt, by Governor Booth (Pilgrim); grandam sister to Western Girl, by Richard's Bellfounder.

March 14th, cb c, star in face, near fore and near hind foot white, by Algona, dam by Gray Eagle, he by Geo. M. Patchen, Jr., out of Fanny Harper, grandam by St. Clair.

March 16th, b f, by Algona, dam by Geo. M. Patchen, Jr., grandam Old Nell, by Morse Horse.

March 18th, h f, by Echo, dam Victoria, by Geo. M. Patchen, Jr., grandam Victress, by Williamson's Belmont.

March 20th, h c, off hind foot white, by Echo, dam by Winthrop Morrill.

At Palo Alto Stock Farm. Property of Hon. L. Standford.

March 8th, Maggie Mitchell, by Clay Pilot, her dam Mignonne by Dr. Spaulding's Abdallah, a light hay colt with star, by Electioneer.

March 10th, Fairest, by Kentucky Prince, her dam Fairy by Rysdyk's Hambletonian, a brown colt, near hind foot white, by Gen. Benton.

March 10th, Lily B., by Homer, her dam Maggie Lee by Blackwood, a brown filly, off hind foot white, by Electioneer.

March 10th, Prussian Maid by Signal, her dam Lady Jasper, a bay colt, by Electioneer.

March 12th, Guess, by Electioneer, her dam Gazelle by Primua, a bay filly, by Gen. Benton.

March 12th, Brunette, by Rysdyk's Hambletonian, her dam Kate by Bellair, a bay filly, small snip, hind foot white, by Gen. Benton.

March 12th, McCa, by Almont, her dam Dolly (dam of Director) by Mambriño Chief, a bay filly with star, by Clay.

March 16th, Nancy, by John Nelson, her dam by Illinois Medoc, a bay filly, large star, by Piedmont.

March 16th, Julia, by Fred Low, her dam Lady Hawkins by Jeff Davis, son of Argyle, Jr., a brown colt, star and snip, by Bentonian.

March 16th, Glencora, by Mohawk Chief, her dam Lady Gilbert, a brown colt, near hind foot white, by Gen. Benton.

March 17th, Addie Lee, by Culver's Black Hawk, her dam the dam of Index, a chestnut filly, blaze face, by Gen. Benton.

March 18th, Fidelia, by Volunteer, her dam by Roe's Abdallah Chief, a bay filly, star, white feet, by Electioneer.

March 19th, Sontag Mobawk, by Mohawk Chief, her dam Sontag Nellie by Toronto Sontag, a brown colt, by Piedmont.

March 21st, Sister to Irene, by Mohawk Chief, her dam Laura Keene by Rysdyk's Hambletonian, a bay filly, small spot in forehead, by Fallis.

March 21st, Mozelle, by Monday, her dam Camilla Urso by Lodi, a bay filly, blaze face, by Fallis.

March 23d, Uraia, by Kentucky Prince, her dam Lady Belmont by Rysdyk's Hambletonian, a bay colt by Gen. Benton.

March 23d, Mohawk McCa, by Mohawk Chief, her dam McCa by Almont, a bay filly, by Fallis.

## Thoroughbred.

Rancho del Paso, 1884.

January 3d, Gipsy, by Lodi, ch c, no marks, by imp. Time, he by Cambuscan.

February 9th, Irene, by Leinster, ch c, star and snip in face, hind legs white half way to hocks, by Longfield.

January 20th, Rebecca, by Hubbard, b c, white face, little white on underlip, near fore foot and pastern white, off hind foot and pastern white, extending higher up in front than behind, by Wheatley.

March 1st, Wild Rose, by Norfall, ch c, off hind pastern white above ankle, large star in face, snip on nose, by Wheatley.

Property of J. B. Haggin, (foaled at Major B. G. Thomas' Dixiana Stud, Lexington, Kentucky).

March 8th, Lady Middleton by imp. Hurrah, dam Lady Lancaster by imp. Monarch, foaled a bay filly with blaze face and four white feet, by imp. Kyrie Daly. Mare will be bred to imp. King Bau.

March 15th, Bonnie Kate, by imp. Bonnie Scotland, her dam Young Fashion by imp. Monarch, from Fashion, by imp. Trustee, a bay colt, small star, right hind foot white, by imp. Kyrie Daly. Mare will be bred to imp. King Bau.

At Palo Alto Stock Farm.

March 8th, Frou Frou, by Asteroid, her dam Dunctoon by Wagner, from Picayune by Medoc, a chestnut colt, by imp. Young Prince.

March 13th, Lady Amanda, by imp. Hurrah, her dam Lady Lancaster by imp. Monarch, from Lady Canton by imp. Tranby, a bay colt with star, by imp. Young Prince.

March 21st, Tippera, by Tipperary, her dam Vic by Ansterlitz, from Mary K. by Oliver, a bay filly, by Dou Victor.

At the Washoe Valley Farm of Theodore Wintere.

March 2d, 1884, Feralone, bay mare, by Norfolk, dam Golden Gate, by imp. Leamington, bay colt, white face and two hind feet white, by Joe Hooker.

March 21st, bay mare by Norfolk, dam Kitten, by imp. Eclipse, hay cott, star and snip, one hind foot white, by Three Cheers.

At Santa Anita, 1884. Property of E. J. Baldwin.  
February 21st, gr m Ophir, s c by Rutherford, both hind feet white up to ankles.

February 27th, s m by Lexington, dam Kate Beler by imp. Glen Atbol, s c by Grinstead. Marks, white strip in face, right hind leg white to hock, left fore leg white to ankle.

March 13th, br m Maggie Emerson, hr c by Grinstead. Marks, small snip on point of nose.

March 23d, Clara D., b f by Grinstead. Marks, little white on coronet of left hind foot. Died March 24th, after living 24 hours.

February 28th, h m, owned by J. W. Adams, s c by Rutberford. Marks, star in forehead and strip in face.

## Names Claimed.

By F. W. Loehner, Vineland, Cal.

DIA BUTZ, for bay colt foaled April 11th, 1882, by Guss, son of Millimau's Bellfounder, dam Princess, by Woodford Mambriño.

BANKER, for bay colt foaled May 9th, 1883, by Whippleton, dam Belle, by Belmont.

GENZLE L., for brown filly foaled April 9th, 1883, by Whippleton, dam Lady Lincoln.

EMMALITA, for black filly foaled March 13th, 1883, by Whippleton, dam by Black Hawk.

WHIPPLESS, for black filly foaled February 13th, 1884, by Whippleton, dam Princess, by Woodford Mambriño.

FREE WILLEY, for brown colt with star, and hind pasterns white, foaled March 9th, 1884, by Whippleton, dam Sally Gorbam, by Weruer's Rattler, grandam Lady Rotan.

HELENA, for black filly foaled March 22d, 1884, by Whippleton, dam by Black Hawk.

By John W. Williams.

ALMONT, for bay colt foaled April 15th, by Abbotsford, dam by Belmont.

## The Saddle-Horse of Tennessee.

Tennessee was settled mainly from Virginia and North Carolina, and the pioneers brought with them a strong fondness for the contests of the turf. At the time when General Jackson was carrying on his unsuccessful struggle with Haynie's Maria (the only opponent that he never succeeded in overcoming), racing was probably more popular than it has ever been seen in Tennessee. Not only did the wealthy and influential citizen own his thoroughbreds and back them with a recklessness that seems to us incomprehensible, but almost every cross-roads or village had its quarter-patch, and every farmer was ready to bet on his favorite quarter-horse.

These quarter races were seldom under three hundred or over six hundred yards. They were run under a sort of unwritten code, which left ample room for jockeying, and success in them often depended more on the shrewdness and patience of the owners or the intelligence and good temper of their horses than on mere speed. In a race for so short a distance nearly everything depended on the start; hence it was necessary for a successful quarter-horse to combine great quickness with docility and even temper—or as we now say, "level-head." It was found that the thoroughbred, bred as he was for the long distances and heat races then in fashion, and often uncertain in temper, was not so good a quarter-horse as the half or three-quarter bred. It became, and for that matter still continues, a favorite practice of farmers to breed their saddle-mares to the nearest thoroughbred stallion, provided always he was sound, for they will have nothing to do with an unsound horse. Activity was and still is a second indispensable qualification for a successful saddle stallion. It is easy to see why more stress should be laid on these points here than in the northern and eastern states. No man is willing to risk his neck day after day by riding a clumsy or unsound brute, while such horses will occasionally make fair roadsters. Even now, when we leave the main thoroughbreds, we must travel on horseback to get along with either speed or comfort. Forty years ago this was still more emphatically true. Of course, no one who could buy a smoothly gaited animal would have a rough one.

If this account of the origin of our saddle-horses and of the circumstances which made them what they are is correct, two or three things should naturally follow; one is that they should be characterized by general soundness and freedom from hereditary disease; and just here I am going to make a strong assertion—that is, I believe the Tennessee saddle-horse to be the soundest horse in the United States to-day.

He ought also to be intelligent, being descended from several generations of animals kept for daily use under the saddle because of their docility; and in fact, it is rare to find one vicious or flighty. Great obscurity and confusion would naturally envelop many pedigrees, the carelessness of the average farmer in such matters being proverbial everywhere. And this is also true; when I was a boy there was in every country neighborhood an endless string of Eclipses, Lexingtons, Copperbottoms (all roan horses were either Copperbottoms or Tom Hals), Clippers, etc. These names by no means indicated any relationship to the families from which they were selected, and usually evidenced nothing more than the taste or caprice of the owners; but some pedigrees can be traced with accuracy and these almost always run into some of the older thoroughbred families after the second or third cross, but not at all in the sense of going to an absolutely thoroughbred mare; usually one or two such crosses terminate the pedigree.

About the year 1840 several saddle stallions were introduced into Middle Tennessee, as appears from Kentucky. One of these was Kittrell's Tom Hal, and another was Pilot, sire of Brooks.

The Vallejo Chronicle advocates a summer meeting over the Vallejo track, and adds: Not very long ago meetings were held at Agricultural Park several times a year, and a large number of visitors were in attendance, who patronized our hotels and left considerable money in our town. Of late years the track, which has cost a large sum of money, has been allowed to go to ruin, but if the proper men should make a start in the matter new life could be infused into it and successful race meetings held here. We do not have to depend on this immediate neighborhood for patronage, as we have Napa, Sonoma and the northern part of this county to rely on for assistance. If the track had been located at Napa we have not the least doubt but that it would have been a success, as the citizens of that place would not allow the interest to die out. Every horseman who has visited our track say that it is one of the best in the State; yet, with all this recommendation, it remains idle year after year, with the exception of exercising a few colts.

Nine yearlings by the celebrated horse Hermit have been sold for a little over \$42,000. This is the best record of any horse on the English turf last year.

## CRICKET.

## Australian Team vs. Fifteen of New South Wales.

This match was unfinished on January 28th after three days' play, and consequently was drawn. New South Wales Fifteen compiled 374 runs in their first inning; Moses, A. Gregory, Evans and Powell were the principal scorers, with 149, 49, 39 and 35 respectively. Australian Eleven responded with 272 runs—McDonnell 57, Murdock 52, Griffin 21, Midwinter 43 and Boyle not out 44, headed the list. The Australian Eleven lost six wickets for 356 runs in their second inning. The betting in this inning was very consistent, all securing double figures as follows: McDonnell 24, Murdock 22, Giffen 53, Midwinter 17, Bouour 64, Bannerman 81, Blackham not out 45, Boyle not out 16, sundries 29. Total for six wickets 356 runs. Match drawn. The Sydney Fifteen made a splendid abowing with their not very strong team.

## New South Wales vs. Victoria.

The thirty-second intercolonial cricket match between Victoria and New South Wales took place on the 8th, 9th and 11th of February, at Sydney, and resulted in favor of the New South Wales team by 201 runs. New South Wales first innings 169 runs—Murdock 25, H. Moses 43, Evans 23, P. Marr 29, were the heaviest scorers; second innings 289 runs—Massie 21, Bannerman 91, H. Moses 85, Evans 23, did the run-getting.

Victorians in their first attempt only reached 102, and in the second 154 runs. Evans, of the New South Wales team, secured in the two innings ten wickets at the cost of 91 runs, and bowled throughout both innings of the Victoria team without being taken off.

## Australian Eleven vs. Combined Eleven.

This match was commenced February 15th at Sydney. The Combined team were all Sydney players, with the exception of Lewis of Melbourne. Australian Eleven first innings 315 runs—McDonnell 61, Mardock 83, Bonner 67, Midwinter 46, Palmer 24, being the chief contributors. Combined team first innings 220 runs. Jones played brilliantly for 88. Second innings 113. The Australian Eleven soon compiled the necessary 16 runs, but not before Giffen lost his wicket; the Australian Eleven thus winning by nine wickets. Giffen secured the whole ten wickets in the second innings of the Combined team.

## THE DRAMA.

## The California Theatre.

During the week the European Specialty Company have occupied the boards, and given an entertainment that for variety and excellence ought to have drawn crowded houses and delighted everybody. It is seldom so many specialities are given with each excellence, such good taste and judgment. We are bewildered where to begin or where to end in selecting the most deserving of praise. But certainly among the best, most racy, and entertaining are the bicycle riders, with the little female child phenomenon Lolo; Daly's comic talk and wonderful concertina playing; and Wainratta on the wire. Then comes admirable dancing, character sketches, comic songs, and caricatures of living artists that extort the constant laughter of the audience. The endurance and poetic motion of Lottie Elliott, with her skipping rope is worth the admission fee itself. Altogether, it is a most enjoyable performance, and those who have not seen it should make a point of doing so either to-night or to-morrow. On Monday night the great Kiraly Excelsior Combination opens in its entirety, with original company, scenery, and effects. The success of this great combination is already assured for everybody speaks of going to see them. Those who appreciate intellect and talent on the stage will be foolish, indeed, if they do not go. We doubt if there is another company existing with the same claims to patronage.

## The Vienna Garden.

It will, perhaps, cause regret in some to learn that this week closes the engagement of the Marvels of Peru, Courtright and Hawkins, and Mlle. Rose's ballot, at this popular establishment. The minstrel leaders, with a strong company, and under an able manager, take the road, not like Black Bart, to rob, but to please the intellect and make people bappy. The destination of the Marvels we did not learn. On Monday night, until further notice, the lovers of good music will be pleased to learn that the Ladies' Orchestra re-occupies the stage, interlarded by the New York Lyric Quintette in classical selections, and other performances of a pleasing character. Miss Bertha Neuber, the distinguished violinist, will not resume the leadership of the orchestra, but her place will be well filled by Prof. Louis Ritzau, whose violin solos during the week were so much admired and applauded. Ritzau is a genuine and accomplished musician capable of filling any position. Mr. Walters is exerting himself to justify the flattering patronage he has received, and we have no doubt he will succeed.

## Oakland Theatre.

During the week the regular California Theater Company, with Grismer and Phebe Davies in the leading roles, have played Chispa to the usually good houses that have distinguished the Colosseum since Bert assumed its management. On Monday, for one week only, Jay Rial's Mammoth Double Dramatic Company will give the popular drama of Uncle Tom's Cabin. This combination is now in its seventh year, and is allowed by all critics to be greater than ever. It is unnecessary to say a word of recommendation in behalf of this great sensational drama, only that never before in Oakland has it been produced on so magnificent a scale. Popular prices will continue, and no additional charge for reserved seats.

One of the unpleasant episodes of winter racing at New Orleans occurred on the 18th, when business was suspended on account of the rain, three parts of the track and the center-field being under water. Several stalls, including those occupied by Morris & Patton, C. H. Pottigill and J. J. Merrill had to be abandoned, and the horses quartered in Machinery hall.

For coughs and throat disorders use Brown's Bronchial Troches. "Have never changed my mind respecting them, except I think better of that which I began thinking well of."—Rev. Henry Ward Beecher. Sold only in boxes.

## OUR NEW YORK LETTER.

Climatic Influences—Jerome Park in March—  
Training Notes from Louisville—Death of  
a Promising Derby Colt—Closing Days  
of the New Orleans Winter Meet-  
ing—Betting in New York—Gen-  
eral Sporting News, etc.

At last the hour of our deliverance from the thralldom of winter is at hand. St. Patrick's Day has come and gone, and with that always famous display of Celtic enthusiasm and antiquated tall hats, New Yorkers generally associate the coming of spring, inasmuch as the March rains of these latitudes (nine times out of ten the precursors of a disappearance of frost), in just the same proportion, dampen the ceremonies of the noted street parade, the bulk of the processionists being then wet inside as well as out. This year, however, the jovial Knights of St. Patrick were favored with a fine day and good going, with no "casualties" to speak of. Since then, however, incessant rain has greeted the passage of the sun across the equinox, and to-day the downpouring of the elements is very great. This has again stopped any attempted work of the racing clans at the various race-courses, and all the horses are from five to six weeks behind in condition. Jerome Park is in better order, just at present, than any of our metropolitan race-courses. Last Monday the horses were working on it in quite the old accustomed style, and a few day's sunshine will place it in fine condition. New animals are coming in at this course every day. On Sunday the Kittson string of fifteen horses arrived from Erdenheim farm, near Chesnut Hill, Pa., in charge of James Lee, formerly trainer of the Saratoga stable of Mr. Charles Reed. The best looking of the lot are the three-year-olds Panique and Issaquena, both by Alarm. They were superior two-year-olds last year, and bid fair to sustain their reputation in the colt and filly stakes of 1884. Five two-year-olds are in this string, and as they are of good size, and the get of Alarm and Reform, these two noted stallions will doubtless have more than one win to their credit during the coming racing season. Duchess, three years, in Snedecker's string looks a worthy daughter of Kingfisher and Lady Blessington, and a much improved filly from last fall. The Wizard of Westchester, also surnamed Ephraim the Silent, has taken already much pains with Duchess, and evidently thinks well of her now that they have taken his pet Girofle across the water. A trio of fine-looking brothers are Eole, six years, Eolist, four years, and Eolite, three years, the property of "Freddie" Gehhardt. The former great horse is in splendid robust health, and his superfluous adipose tissue has increased so much during the winter's intermission that it will take many a stiff gallop before Snedecker can get him in proper fix for the June races. His younger brothers, especially Eolist, are very promising, but as their turf careers are yet to be accomplished, we will spare them any encomiums until they earn them in actual warfare. The latter part of the week the Dwyers' horses are expected at Jerome from Sheephead Bay. A year ago this formidable stable reached Jerome in such an acme of condition that the other trainers there declared "they make one's horses look sick." This season's backwardness will put all hands on more of an equality. Gen. Monroe is another horse now at Jerome that will, if looks go for anything, outdo this year even his former fine record. A powerful brown, with a white face, this best son of Tom Bowling, with his short, daisy-cutting action, is likely to be a hard nut for the best to crack in the races to come, and he should carry his 117 pounds in the Suburban Handicap like a bird, provided he earns no penalties beforehand. Just now old Checkmate, 117 pounds, is most in demand for this race, parties that ought to know, as to the old gelding's likelihood to stand training, being eager to take him at the prevalent odds, twelve to one. Barnes, 131 pounds, Iroquois 130 lbs., Parole 120 lbs., Monitor and Monroe 125 lbs., are also supported among the heavy weights in the great handicap, and Bella 103 lbs., Eolist 107 lbs., Jack of Hearts 114 lbs., Hilarity 109 lbs., Thules 90 lbs., and Sandovar 85 lbs., among the middle and light weights. The handicap is certainly the best effort to bring a lot of horses together ever made in America. It is the work of Mr. J. G. K. Lawrence, the Secretary of the Coney Island Jockey Club, and this usually very successful handicapper has cleanly outdone himself on the present occasion. From Louisville the news of the training stables there is not very startling. None of the horses have had much chance to do any work and, of course, they are generally very backward. Bob Miles and Powhatan the Derby candidates, look well, but there is just a slight suspicion that Loftus, the stable companion of Powhatan, is the better of this pair. Many good judges in Louisville is inclined to this way of thinking, notwithstanding the fact that Powhatan showed best in 1883. As regards Boh Miles, however, there is nothing now the matter with him, all reports of his recent sickness to the contrary notwithstanding, and he is certain to be, harring accident, a hard horse to beat in the Derby. One of the prominent candidates for the race, Ten Full by Ten Broeck, the property of E. Corrigan, died on Saturday last of lung fever, after a bad attack of influenza. He had been well backed to run the Derby, and Mr. Corrigan had refused \$7,000 for him. He was heavily engaged in nearly every three-year-old stake at Memphis, Nashville, Lexington, Louisville, Latona and Chicago. This makes his loss particularly hard, as his owner will have some \$1,200 forfeit to pay. Leonatus and Gen. Harding are in fine health. Diverse opinions are prevalent regarding the former's ability to stand a preparation, but as regards the other horse it is almost certain that he will. The son of Great Tom was a magnificent two-year-old, and his appearance at the post in 1884 will be marked with interest. The trials and tribulations of the management of the winter meetings at New Orleans are not yet over it seems. Very heavy rains there this week have flooded the track and several of the stables, and the racing will probably be abandoned until April 14th, when the regular spring meeting will begin. The last day's racing was on Saturday last, when four events were run over a heavy track, the winners being Jerry Black, John Sullivan, Queen Esther and Mart Boorham. Sorrel Dan, a very fast half-miler, has been purchased at New Orleans to take to Los Angeles. He can run heats in about forty-eight seconds. Speculation there is lately confined to the Kentucky Derby and the English Spring Handicaps, the first of which the Lincolnshire will have been run before this reaches you. Abbotsford, formerly Mistake, is doing such good work for this race that its being credited to an American horse for the first time in its history is not beyond the bounds of possibility. C. W. Bathgate, of the Keene stable abroad, sailed for Liverpool yesterday per steamer Republic, to look after the interests of his four-footed charges in England. Blue Grass, the Pat Malloy four-year-old of this stable, is well into the City and Suburban at 110 pounds, and his chance ought to be a good one at the weight. With Girofle and Blue Grass in this race 1884 may witness a repetition of Parole's triumph in 1879.

The board of arbitration, to which the claims of Mr. Hunter to a share of the winnings of the horse Eole while the latter has been in Gehhardt's hands were submitted, have not yet decided the matter. It is expected that it will be settled some time in the next few weeks, certainly before the spring races begin. PACIFIC.

New York, March 20th, 1884.

## FISH.

## How to Choose Gut.

In choosing gut of any kind be not too much guided by an apparent thickness, but, as far as your time and patience will permit, select such as is perfectly round; and to prove it so try each piece by turning it quickly between the forefinger and thumb, for if it be in anywise flat this will only be effected with difficulty, and then you may safely condemn it. Each piece or length should be also to the teeth hard, like wire, colorless and transparent as glass, which testifies strength, free from unraveled fibres, which are attended with an inclination to split or peel; knotted roughness, which shows almost actual rotteness; the spaces between the knots when pulled lengthways between the fingers being soft and weak, or flashing lights, when seen in a slanting direction, which indicate flatness, and consequent weakness. It should possess stiffness in bending, and with this should be combined elasticity, so that after being doubled upon itself—in the shape of a loop, for instance—if in thus doubling it assumes anything like an angularity it will not do, for it surely possesses unequal degrees of strength, even if, where it forms into such angles, it be not absolutely rotten. Salmon gut may be in substance as thick as you can find it, and you will possess a treasure if in one hank many lengths are as thick as a middling-sized pin or stout knitting needle. In length, the part for use should run from sixteen to eighteen inches at least, and the longer the better, provided the substance be uniform. The thicker trout gut should be of the diameter of ordinary sewing silk, whilst the thinner sort may be almost the very finest you can procure, provided it be "round and sound," and keeping in view all other requisites for strength. Ten to sixteen inches is the usual length of each strand.—*Chitty's Flyfisher's Text-book.*

## A New Fish.

During the past week a new fish has been brought to the attention of the wholesale trade in Boston. Its appearance here is the result of the United States Fish Commission's efforts to bring to public notice such newly discovered fish as are marketable for food. This fish is commonly known as the black codfish, and is found in great abundance in Puget Sound, and may be very easily taken.

Outside of its dark color the fish closely resembles our own cod, but is rather smaller, if those shown are of average size. It has an oily taste that would hardly make it popular, in our market at least, if prepared for the table as our codfish are. The specimens were dry salted, as they would most naturally be marketed in that way. But coming at this time, when our market is unusually full of native cod and with no especial fear of a scarcity for years to come, the Puget Sound cod is very likely to receive little attention. It is well, however, to know of its existence as a food fish.—*Boston Bulletin.*

Our readers will recollect the reference we made a fortnight ago to the case of Burrows, the especial agent of certain gentlemen, in Napa valley, who made up a purse to pay him for watching the trout streams of the district, and protect them from poachers in the daily habit of violating the law. From some informality in Burrow's appointment by the sheriff, and perhaps some slight irregularity in his own conduct, he was afterwards charged by a colored man living in the district, whose boy and girl, mere children, he caught fishing and with trout in their possession, with falsely personating an officer, battery and false imprisonment. The last charge was sustained in the Justices' Court, and Burrows, under bonds, committed for trial at the next sitting of the Superior Court. We have, during the week, been informed how this retaliatory proceeding was instigated by two local lawyers, who felt much joy in the prospect of getting some ham for a square meal, to the injury of law and order in the district. If the facts coming to us be true, they are disgraceful indeed, and as soon as we have satisfied ourselves of their truth we shall ventilate the case thoroughly, no matter who suffers, for it has become of public importance. It is notorious half the crime of the State is committed by the mercenary interference of lawyers for a contingent fee, and the evil can only be stopped by exciting public opinion against them. We propose to make this a test case if it proves to be as reported to us, to see whether society is to be governed by wise laws, or the shameless effrontery of designing men, who, by such acts, disgrace their manhood and profession.

We have read the last report of the Fish Commissioners, which we published in full last week, very carefully over, and fail to find in it a single word that gives us hope of better things from them in future. We understand, at the last meeting, they were to give a distinct official announcement of the validity of the trout law and their determination to enforce it. True, such a declaration might not amount to much, but in the wholesale, illegal fishing going on every day in all parts of the State, it would have had a good effect, in alarming some and encouraging others. In their wisdom or indifference they deny us this small boon, and throw the responsibility of protection upon the individual, who also pays his quota of the \$5,000 annual appropriation. We feel like making another suggestion for consideration at their next meeting in order to test their fidelity to the public. Supposing the Commissioners to be aware of the constant complaints from all parts of the State of illegal trout fishing, we suggest they give up their junketing trips at \$10 a day, and thus make a fund to pay Constable Jones to visit different localities in search of offenders. The fact that the intrepid Jones might be here, there, or anywhere, at any time, would do more good in a month than the Commissioners can hope to do in a lifetime, if judged by their official shortcomings. This is a fair proposition, and its adoption or rejection will test their fidelity to the people. It is, perhaps, asking too much. We shall see.

Mr. John Millzner of Kearney street, at Saucelito, last Sunday, caught twelve fine flounders, ranging from two to three pounds each. The largest, however, turned the scale at six pounds three quarters. This is said to be the largest flounder yet caught at Saucelito. It took Millzner nearly an hour to land the fish. There is no killing a flounder by the usual rod and line tactics, and so it just takes time to land one of that size. Millzner lost four others so large that, he says they looked like halibut. Perhaps there may be a halibut bed off Saucelito.

Of all the provoking things I ever had, that four-dollar fly-rod was the poorest and the meanest. Something was eternally giving out, either in the guide rings or the ferrules, and there was work for the repairer eternally. At last came the point of culmination. I went out to Bear valley, Grant county, near the soda springs, for a week's camping, with Dau Reamer and Tony Hachenev, and the fishing was simply glorious to relate. On the fourth day I was whipping a broad rifle overgrown with some sort of grass or weeds at either side, when suddenly out of the weeds darted a trout not over ten inches in length, and grabbed the fly with the voracity of a shark. Never did I see a fish make the fight that fellow did, and I gave him the line, but it fouled in the guides, and before I could say "Jack Robinson" he had "got in his work" on that wretched rod, and completely unjointed it, having split the ferrule of the butt so that the second joint fell out completely. The line held him, however, and I played him about until I worried him out altogether and landed him on the bank. But from that time to this hour I have had no use for anything in the shape of cheap rods, yet if a man is wholly without experience in fly-fishing, he had better learn casting with one of these cheap ash rods, and either give it away or throw it away at the end of the season.—*T. B. Merry.*

The effect of saw-dust on fish is thus explained by an observer who has seen much of it. He says: "We all understand that the salmon, as well as other fish, go into the smaller streams to spawn, in many instances where saw-dust is abundant. The large salmon (as well as the small as soon as they are hatched) come in contact with the saw-dust in the water, and in their breathing the saw-dust is drawn into their mouth. Then, in discharging the water and saw-dust through their gills, the splinters work into the soft membranes of the gills, which causes the gills to inflame and fester and rot out, and the consequence is the fish perishes. The little fishes suffer more than the larger ones, from the fact that they like to get into the eddies of the streams, and the saw-dust finds its way in large quantities into the eddies."

Some two years ago Mr. John Bird, of Bird's point, Alameda, caught a fine silver eel on the mud flats near his place that measured some twenty-seven inches or more. This, we believe, was the first evidence of the success of the Eastern silver eel plant made in the bay by the late Fish Commissioners. Since that time other people have often caught eels at the same place when the tide is out. About ten days ago a young boy gathered in at least half a water pail full of young eels ranging from fifteen to twenty inches. These Mr. Bird wished to purchase to plant in a private pond, but he was too late, the boy having got away with them. We have arranged to have a day's fishing for eels with Mr. Bird as soon as convenient. We confess, once more in life, we wish to have a four-round knock-out with a good old-fashioned eel pie.

From different exchanges, we find several large whales have recently been stranded along the coast, some of them being quite valuable. Three large ones were captured lately at San Diego. This, it is held, indicates severe wind-storms at sea. Whether the fact has any value as an "earthquake sign," we leave the Academy of Science to settle.

If J. R., our correspondent from Gilroy, speaking of the fish found in the local streams and known as "trout," will send us one preserved as soon as legal, we will submit it to the Academy of Sciences, that its identity may be established.

We may add, letters like his last will always be welcome.

Charley Ohm, of Market St., a man as expert with the gun as with the rod, caught a salmon trout weighing 8½ pounds. Ohm, however, never will tell his favorite localities. As he always brings home a fine lot of fish, it will pay to watch him.

In return for giving our readers fond of fishing all the "points" we know about the best localities, we hope those taking advantage of them will act on the square, and furnish us the results of their weekly trips.

We only heard of one solitary smelt being caught at Saucelito last Sunday. It was a large-sized one, and so full of spawn that the catcher returned it to the water as it was not hurt by the hook.

Charles Shuppert, caught a codfish on Sunday, at Kirshaw Point, opposite Saucelito, that weighed over 14 pounds.

## Closing of Stakes.

Champion Stallion Stakes, 1885, Monmouth Park, April 1st, Tuesday next.  
Capital Turf Club, Sacramento, racing, trotting and pacing, April 5th, Saturday next.  
See Advertisements.

## Foreign Turf Notes.

The race cups won by the late Count Lagrange were recently sold at auction in Paris for £1,392, or about one-fifth of their reputed value. For instance, the Goodwood Cup, valued at £300, won by Monarque in 1857, when he beat the English horses Fisherman, Gemma di Vergy, Gunboat, Arsenal, Reseber, Melessa and Anton and the American horse Pryor, brought £63. Among the other things sold were Gladiator's bit and bridle, which brought £21, while twenty pictures by Harry Hall realized £307. The highest-priced picture was Gladiator, with Tom Jennings at his head, which sold for £97. It was presented to the French Jockey Club.

Of Mr. Walton's horses in training at Epsom, Sutler, Deceiver, Mr. Pickwick and Girofle did a mile at a good pace on the 31. None of them have as yet been quoted in the betting. The next mail or two will probably show Girofle quoted on the strength of money sent late in February, providing the odds asked for were obtainable.

The latest quotations for the Two Thousand Guineas (run April 30th) is 100 to 8 against Beauchamp. For the Derby (run May 28th) 20 to 1 against Cambusmore, 25 to 1 Beauchamp, 50 to 1 Garb 'Or, 50 to 1 Prince Henry, and 100 to 1 each against Sevenoaks, Lord Sefou and the colt by Hermit out of Departure's dam.

The "Low Tout" of the *Sporting Times* says that neither Fulmen nor Touans will win the Lincolnshire, but that Mr. Adrian's Prince (112 pounds) will heat all the top weights. He also favors Abbotsford and Picador.

All chances for Tom Cannon to win the Derby with Fritz, the once promising brother of Beau Brummel, are at an end. The illness he had during the winter has left him a roarer.

During the coming season no gambling of any kind will be allowed on the grounds of the Narragansett Driving Association. If no pools are sold, a small attendance will be expected.

General Topics.

The "procession of the equinoxes" is nearly forgotten since we have been a resident of California. The sun crosses the line on this longitude without kicking up the bobbery that his journey occasions in the East, and it is fair to infer from the past that the inhabitants of this coast are under the especial protection of his majesty, and so much in favor that neither vernal nor autumnal visits are made in anger. Friday, the 21st inst., the sun entered the first point of Aries and a finer day could scarcely be. The days in that week which preceded that important date were also beautiful, and the Saturday following was the only reminder of the boisterous wester of the orient. The morning was grey, warm showers fell until midday, and then the wind veered into the north and there was an unpleasant commotion in the atmosphere. The harrow did the work finely on the Oakland Course, and the dampened soil fell free from the teeth, making a soft bed for the feet of the horses.

Enough rain fell in the forenoon, so that many supposed the Bay District Course would be too wet to permit the match between Vanderlynn and the Oregon champion Ben B. A. to come off. This was an erroneous calculation, however, and as will be seen elsewhere, the race was trotted and a victory won by the horse of the long name. The slowness of the time was in all probability not entirely owing to the state of the track. This was the third time the race had been advertised, the breaks having been caused by bad weather. With horses "pointed" for a certain day, and then come interruptions so that neither the race can be decided or work given, there is a certain loss of condition and inability to perform according to expectations based on previous capacity. Postponed races are nearly sure to be unsatisfactory, and when more than one interruption intervenes the trouble is aggravated. The horse is prepared to trot on the day selected, rains come, and it is some time before the exercises can be resumed. Laid over for a week, from Saturday until Saturday, and it will not answer to give hard work only a day or two before that fixed for the race. Thus condition is lost, and with trotters there is apt to be waywardness and incapacity to show the speed that is expected. That neither Vanderlynn or Ben B. A. could trot within ten seconds of what is within their limit was apparent, and those who never take into consideration the causes which occasion the difference are prone to ascribe it to unworthy motives.

We have good reason to think that Kittleman and Harmon can hold a good position with the best of the English sprinters, though the following paragraph, cut from the Referee, shows that the task is anything but an easy one.

Admirers of high-pressure rates may be interested to learn that at Newhall Grounds, Sheffield, on Monday, Hutchens ran 127 1/2 yards in 12 seconds. This was not so good as he has done; I once saw him beat evens by, I think, 8 1/2 yards, and two years ago he was said to have beaten it by 9 yards, when he won the Sheffield Shrovetide handicap. Hutchens is a phenomenon; although 127 1/2 in 12 seconds does not seem so very much after his other shows, no other man has ever succeeded in doing it. Sprinters are vastly different now from what they were twenty years ago, when even-time was a term supposed to be expressive of all known as well as of all unknown ability. The knowledge that Hutchens was in fairly good form and intended trying, took thousands to the ground on Monday and Tuesday, where otherwise there would only have been hundreds. It was pretty well known that Hutchens would not win—could not, if two of the others kept on their legs—and this was proved in the final. He had to give Tattersall of Clitheroe, a man who can always run 121 yards in 12 seconds, 7 1/2 yards. To Ratchiffe of Huddersfield, well known as better than quarter-second, he had to give 9 1/2 yards. So, remembering the old saying, that in races of this sort, you have not only to catch your man but to pass him if you want to get in front, it was not difficult to foresee that Hutchens, wonder as he is, must finish behind both these leniently treated rivals. He did finish behind them, but was close enough up to secure the third money, £5. It is to be hoped the proprietors of the ground did not forget in their most practical manner how valuable Hutchens had been to them as a gate-money attraction.

Hitherto we have noted the inconsistency in our trans-Atlantic consular placing so much importance on the time records when it related to pedestrians, and totally ignoring it in the case of horses. That not so much dependence can be placed on the watch on the race-courses of England as on the "tracks" of this country, is evident to those having the least acquaintance with the difference. There the training is done on heaths, and the galloping grounds are as widely different as ours are uniform. Up and down grades, the start and finish a long way apart, the sod on one day springy, so elastic that there is scarcely any concussion, the next, perhaps, so soft that the feet sink, and then again times when it is so hard that the clatter of the feet is heard for more than a quarter of a mile away. A mile there may be so trying that 1:50 is a first-class run, and in other situations with advantages which enable the same animal to subtract a good handful of seconds from the time.

A circular course, or one of any shape that is connected so as to bring start and finish at the same point, must have the ascents and descents equal. When there is much difference in the grade, the point of starting has a good deal to do with the time record. Thus at Fleetwood a horse could make the mile in less time if start and finish was at the half-mile pole. Before the late improvements were made there was twenty-one feet fall from the judges' stand to the 850-yard mark, and horses accustomed to the course would go down the grade many seconds faster than they could come home. The down accelerated the speed, the up retarded the horse so much more that Fleetwood was held to be three or more seconds slower than a majority of the eastern courses.

Now-a-days more care is observed in bringing the surface to a uniform grade, and a few feet, in some cases a few inches, mark the elevation above the depressions. Then if the soil is not snitsble, the proper material is crsted on, and the latest improvement is to cover with sods set on edge, and this plan has proved so successful at Providence that it is likely others will follow the example.

The track at Dexter Park, Chicago, was only eight inches from a "dead level," and it was proposed to build a rim on the inside and outside, so as to flood it for ice driving in the winter. As the turns were "thrown up," so as to make the outside four feet higher than the inner and general level of the track, the plan was given up, as the inner embankment on the curves and heth on the stretches would necessarily have to be that height in order to flood the whole of the track. Twenty years ago there was grand sport for the trotting men during the winter in Chicago. At that time the river was frozen solidly from mouth to the city limits, and on a sunshiny afternoon the bridges would be crowded with spectators to witness the exciting contests, which rarely ended until the day came to a close. When the manfactories of various kinds multiplied on the banks, and the sewage was so loaded with filth that the stench was strong enough to keep it from freezing, driving on the ice came to an end. Ice that was formed under a temperature at times within a degree, or two of that which would congeal mercury was too brittle for safety, and the only chance to use the light and skeleton sleighs was when there was snow enough on the avenues, and there were no such vantaage points for the sightseers as the bridges afforded.

We shiver now as we think of the times when so much delight was felt at being slid through the keen air, notwithstanding the heard was a mass of frozen vapor, and it might be a tiny icicle pendant from each eyelash. Not so long ago either. The winter of 1869-70 we drove A. W. Richmond, the favorite course being the "slongbs" that cut up the big island above Sahula, Iowa. A cutter which, shafts and body, weighed forty pounds, and with only a trifle more than the regulation weight in the seat, there was scarcely more resistance than the quick flight through the air offered. Jernealem! how he could trot in that rig. A two-minute gait sure. The straight-away work did not effect the bad leg, and when assured that there was no danger of a break the reins could be dropped on his back, and though a "longstrider" there was a quickness of action that made the rip-rip of the sharp calkine cutting into the ice come as rapidly as the roll on a snare drum. Should he ponder over the past, as unquestionably horses do, the old horse must think it strange that winter is so long coming, and it may be with all the comforts of the glorious climate he has enjoyed for the past ten years there are yearnings for the old times, and the frantic rush over the ice of the Mississippi is still remembered with pleasure.

It will soon be twenty-two years since we saw Richmond for the first time. It was the early part of April, when an eight-days-old foal, he made his first visit to Bird Farm, and was black all over as the typical raven's wing. His mother was entirely white so that there was plenty of contrast in color, and his owner was startled when we prophesied that he would eventually turn grey. He was shown at the Davenport the fall after he was a year old and then he was as handsome a steel grey as could be conceived. At four years old he was dappled and when he came to this country nearly white, with a tendency to "fleshiten" on his neck and shoulders. A photograph which his owners sent us last September shows that the specks are still there, and, though difficult to tell as the picture is very light, probably cover the whole body. While his dam's coat was nearly a pure white, her skin had a bluish tinge, and two of her colts were white with black spots resembling the picture of a horse which graced the advertisements of "Mexican Mustang Liniment." Her last foal is Nourmahal, now owned at Rancho del Pso, sister to Richmond and a year younger. The "reversion" in her case was, doubtless, to her maternal great grand sire called Spotted Ranger, probably an Opelousas horse though called an Arabian, and her filly by Steinway is marked much as Nourmahal was at the same age.

The union of Old Blackbird and the white mare with the skin that denoted "blue blood" is likely to result in something more than ordinary excellence, through the son and daughter which came to this coast. It is something to have a scion in the teens, and that when a five-year-old, though we have great faith that there are higher honors in store. A son of Romero is named in the three-year-old pures at Sacramento and Stockton, and as the entry comes all the way from San Diego he must have shown capacity more than ordinary ability, to be thought worthy of the honor of meeting the cracks that were sure to be in the field. As we are personally interested in another grandson of the horse which went at such a merry clip on the ice of the Mississippi, we cannot write that we hope Pope Leo may win. But this much we can say in good faith, that if unable to get to the winning score first there will be a great deal of satisfaction in witnessing the victory of one of the clan. When a filly by Len Rose shows that she has inherited the family traits, and not only trots fast for a three-year-old, but displays a "manner of going," that is a promise of future speed. That the Richmond mares will prove as good as the sons there is not the least doubt. Columbius is the only one that we are acquainted with that the progeny has been trained, and her sons certainly justify awarding her as high a place as any mare that has been no longer in the stud.

THE RIFLE.

At Shell Mound.

The event of the week in our rifle world was the match between the Fifth Infantry and Police Teams, the challenge coming from the latter. The men of the gallant Fifth, including some fifteen crack shots, have chiefly risen into reputation by the competitive practice enforced by Col. Ranlet as far as he can in his command, have been very successful in their private and public shooting of late, the crack Police Team under Captain Douglas, itself one of the most distinguished in the State, determined to test their mettle without waiting to see which team of the Fifth won the military trophy as first determined upon, and so the match on Sunday came to take place. The terms were 10 men with military rifles, each man to shoot 10 shots at the 200-yard, and 10 shots at the 500-yard target, the losing team to provide a dinner for all. The day was everything that could be desired; the wind, though strong all the time, not being sufficient to interfere with the accuracy or convenience of the men. There was very little betting on the result of the match, but the respective scores of Linville and Brown, who are old opponents at the target, caused several good purses to be made, this time in favor of Linville. At the close of the 200-yard shooting the military team were only a few points ahead, but the tug of war was well known to be at the 500-yard target, and so at that point things were about even. It was only as the end approached that victory seemed to prefer the military, but only through accident. Police officer Hook is known to be one of the best marksmen at 500-yards in the State. On this occasion, however, he made five consecutive misses at his favorite range, and thus lost the honors of the day. It is impossible to say whether the blame lay with the man or the gun, but Hook himself blames the man, though after the match at the same range he made 47 out of a possible 50, a performance that cannot be gainsayed. There was one thing in this match that must be avoided strictly in future, or some day in a closely contested match it may cause unpleasantness. Both parties on Sunday violated the rules governing such matches—Colonel Ranlet in changing McEwen's "coach," and Captain Douglas in changing Hook's gun. Both these things are forbidden by the rules. We thought, in at once receding from a false position, the Colonel showed a better spirit than the Captain. As we have often been asked about the rules we shall endeavor to publish them next week. In reference to the result, we never like apologies for defeat in any case. It will come at times in spite of all man can do to avoid it, and therefore it should be accepted gracefully. In this case it was accepted in such a generous and proper spirit as to reflect credit on the Police Team. An analysis of the score will show that, allowing for Hook's misses, five in succession, a thing that probably will never occur again, the match one way or the other would only have been won by some three points. This fact gives additional interest to the next contest between the same teams, which is certain to take place in a short time. The score:

Table with 2 columns: Rifleman Name and Score. Includes Fifth Infantry—200 Yards and 500 Yards, and Police Team—200 Yards.

Table with 2 columns: Rifleman Name and Score. Includes Police Team—200 Yards.

Table with 2 columns: Rifleman Name and Score. Includes Police Team—200 Yards.

Table with 2 columns: Rifleman Name and Score. Includes Police Team—200 Yards.

The total gives a good percentage on both sides, though by no means as high as expected.

After the match came the dinner, the pleasant part of the affair, at the expense of the losers. Of course lots of toasts were given and speeches made, but in a crowd of jolly spirits as were present fun could not be controlled by courtesy, and the cross-firing, at very short range at times, called forth peals of laughter. At dinner Captain Douglas presented Peckinpah with the handsome revolver presented by Col. Beaver to the officer in the force making the largest score of the day. Peckinpah said he was prouder of the reward coming from Col. Beaver than he was of the score winning it. He well might be. The dinner did Captain Siehe much credit, and we can testify how amply it was done justice to. We found ourselves thinking several times whether riflemen always eat so voraciously. However, we hope the same good spirit will always prevail in such matches, for it is the spirit of the generous and true man.

To-morrow Company C of Second Artillery and Company C of First Infantry will meet at Shell Mound. The range will be confined to the 200-yard target; 25 men in each team, with ten shots to the man. The losing party pays for the dinner.

At Harbor View.

The Eintracht Rifle Club had a practice last Sunday at Harbor View range, under the usual conditions, 20 shots each at 25-ring target, making a possible of five hundred. The score was:

Table with names and scores: Mr. Stamer 369, Mr. Hartmannsen 253, Mr. Kopke 248, Mr. Hagerup 245, Mr. Streuber 338, Mr. Wirtner 239, Mr. Gunabel 335, Mr. Klare 239, Mr. Schubek 304, Mr. Wolf 204, Mr. Tapken 252, Mr. Lotz 151, Mr. Schwartz 257, Mr. Eff 148.

To-morrow being the last Sunday in the month, the Swiss Rifle Club will have their regular shoot at Harbor View.

Another Richmond.

We understand Lieut. Geo. W. Strong, rifle inspector of First Regiment, proposes to organize a regimental team, to commence practice next month. Here comes another Richmond in the field, which neither the Fifth Infantry nor the Police must deal with slightly, for it will bring a strong force and recognized power to the range. This is the true spirit which should animate our militiamen. Drilling, of course, is well enough in its place, but a soldier, after all, doesn't amount to much if he cannot shoot well.

The time for the contemplated match between Hanson and Cummings has not yet been definitely fixed. Both are long-range shooters, and represent different arms. Mr. Hanson says he desires a little more practice, and that he prefers the Presidio range. It will not be long, however, before the match comes off.

THE GUN.

The Game Law.

Table showing hunting seasons for various birds from January to December. Blank indicates open season, Star (\*) indicates close season.

Pigeon Shooting at Bird's Point, Alameda.

The two principal events of the week were the inter-club match between the Alameda County Sportsman's Club and the San Francisco Gun Club, and the private match between Slade and Maskey, bringing together, as the contests did, men distinguished as sportsmen and shooters. In reference to the former it looked on Saturday morning as if the match were again to be postponed on account of the weather, but this time the fates were generous. About noon the rain cleared off leaving a bright sky and cold wind, which, on the grounds, later in the day, amounted to a young hurricane, and gave the birds such a twist on starting, and such a speed when fairly on the wing, that it was two to one against the gun all day. As our readers know the trophy shot for on Saturday was the silver cup given by the Messrs. Pierce of Oakland, which, last year, in the first match, the Alameda team won by two or three birds only. The clubs now stand even, a fact that will invest their next meeting with additional interest. The conditions under which the match was made were ten men from each club, twelve birds, thirty yards rise, Hurlingham rules. From the evenness of the score up to the tenth round, the teams regularly alternating two or three birds ahead, the betting was lively, but only among the partisans of the teams and the friends of individual members backing their favorites. A harder day to shoot on, owing to the wind from the north-west, or a better lot of birds to shoot at, we have seldom seen, and every man in the team, except two, who, by the way, are reliable and safe men to back, made some remarkably fine shots at long ranges. Some of the long shots indeed, on Saturday, will bear comparison with any ever made at the trap. Many, owing to the high wind, lost birds out of bounds, especially Mr. Orr, who had two just float a few inches beyond the boundary, without apparently moving a wing. As will be seen by the asterisk the second barrel was much needed and much used to count a score. As we have said, on the opening of the tenth round the match was virtually over, for the Gun Club could not lose unless by some unusual mishap. The best shooting of the day was done by Messrs. Orr, Babcock and Gordon for the Gun Club, and Messrs. Knowles, Mayhew and Haile for the Alamedans. It is not our place, perhaps, to characterize the style of individual shooting, but we thought Messrs. Gordon and Haile handled themselves about as neatly at the trap as any men we ever saw. We shall be much mistaken if both these gentlemen next year do not rank with our local champions. Among others, on Saturday, viz., Wadsworth, Randall, Ewing and Havens in short shots, who were called upon to exert their abilities to the utmost, Ramon E. Wilson was also conspicuous for several very fine, clean kills. Although the general score was not large, owing to the gale, the shooting all through was creditable to both clubs. The judges were Messrs. Putzman and Ault, with H. H. Briggs as referee. Mr. Bird deserves credit for the improvements he has made on his grounds. The accommodations are now very complete. All parties commended the excellence of the clam chowder served to the hungry crowd about 2 o'clock P. M. The praise was not exaggerated. Owing to the late hour at which the match closed there was no pool-shooting afterwards, as usual on such occasions. The score:

Score table for Harbor View and Alameda matches, listing names and scores for various categories.

Wild pigeons, we learn, are beginning to arrive in the foothills of Mendocino county, especially in the vicinity of Ukiah.

At the Oakland Trotting Park.

The much-talked-of and interesting match between Messrs. Slade and Frank Maskey came off on Sunday at the Oakland race track, in the presence of some three hundred persons, friends of the contestants and outsiders interested in shooting. Frank Maskey has long been known in the community as one of our best and most successful short range shots, while Mr. Slade's power, gradually becoming thoroughly recognized, lies at the long range, and it was perhaps in the nine yards' difference that the popular Maskey found his Waterloo. The match was the result of Mr. Slade's hold challenge in the BREEDER AND SPORTSMAN some weeks ago to shoot any man in the State for \$100 a side, twelve birds each, thirty yards rise, Hurlingham rules, except the two established champions Messrs. Robinson and Lambert. Burlbank was commissioned to secure one hundred of the best birds he could obtain, and he filled his order so well that both contestants assured us personally on the ground that they never stood before better birds in their lives. The small scores attest the character of the birds. Before end at the start Maskey had the call in the netting, and for some time he felt sure he had the match secure. At the fortieth bird they stood even, with twenty-seven kills each on the record. Before this, however, the betting had changed to even from Slade's determined fight, and then Maskey broke all to pieces, and the match ended in favor of Slade with three birds ahead, the final score being Slade thirty-five to Maskey thirty-two. Both men did fine execution with the second barrel, and made long-range shots that drew forth loud plaudits from the spectators. In point of luck, there is always some allowance to be made in this respect; the odds were against Maskey, no less than six of his birds falling a few feet out of bounds, after being cut all to pieces. No one will deny this always discomposes a man at the trap more than anything that can happen him. But then, we must recollect it's dead birds that tell, and the man whose birds drop inside are evidently better shot than the birds of the man that drop outside the magic circle. The fact of birds dropping outside the bounds is the poorest apology and the poorest consolation that can be offered the loser in a match; yet it ought to be recorded. Remon E. Wilson acted as referee, W. L. Eyre as scorer. On examining the analysis below it will be seen that Slade had the advantage with the center trap, having it twice as many times as Maskey. This is a great advantage, and it is great luck also, for it is above any act of volition on the part of the shooter. Tom Pearson will now have a chance to test the powers of the "coming man." The score:

Table with columns: NAME, Number of Trap, Tufters, Killed, Missed, Quarters, Killed, Missed, Indys, Killed, Missed, Killed, 1st bbl., Killed, 2d bbl., Total Killed, Total Missed.

After the match two sweepstakes, at 30 and 21 yards respectively, brought such cracks as Crittenden Robinson, Frank Bessford and Mr. Hopper, the "little giant" of Petaluma, together. Robinson sustained his reputation, and came out ahead with clean scores. The betting was very lively on the gun.

Red Bluff Tournament.

We find we have unconsciously fallen into an error in reporting the opening shoot of the tournament at four birds instead of twelve, the usual number on such occasions. We were led into this error by the report of the local papers, the Cause and Sentinel. On Wednesday following the match we obtained a copy of the Cause from Mr. Fisher's office, and copied our figures from its columns. This paper, in its report, said: "The Secretary reported that forty-five had entered the contest. It was decided by lot in what order they should shoot, and that they should be divided into squads of nine, each member of the first nine to shoot at four birds, to be followed by the other nines in succession in like manner, the match to be conducted under the rules of the State Sportsman's Association." In reference to the number, this statement does not say that each man in each squad should go on shooting until he had twelve birds, but that each squad should succeed each other with four birds to the man. That was our interpretation. On Thursday we got a copy of the Sentinel from Mr. Hopper of Petaluma, but there was no difference in the figures given by the Cause, except that the Sentinel added the details of the shoots-off by the ties on four and three birds. We were led to accept the unusual number of four birds to the man, because it would take 540 birds to supply the forty-five entries at twelve birds each, and we felt quite certain the managers could not get 1,000 birds together, and thus, as it happened, there would be a deficiency of birds before the tournament ended. It was only on receiving the Weekly Sentinel, after our paper had gone to press, we became aware of the mistake. We gladly correct the error as far as possible by publishing the full score of the first shoot at twelve birds:

Score table for Red Bluff Tournament, listing names and scores for various categories.

Before the Red Bluff tournament ended there were two glass-ball matches owing to the deficiency of live pigeons. The conditions were 12 balls to the man; entrance, \$2.50; the usual distance; revolving trap. Mr. Tacker did not enter. Messrs. Landers and Hatch of Colusa were judges, and Mr. O. Robinson referee. The score was:

Score table for Harbor View match, listing names and scores.

H. Bassford had Scott divided first and second prizes.

Second Match.

Score table for Second Match, listing names and scores.

H. Bessford and Morgan divided first and second money. If our country friends again fall short of live birds in their tournaments, we advise them in that case to use the clay pigeon which the Messrs. Pierce of Oakland supply to clubs at \$30 a thousand. They are as far superior to glass balls as live pigeons are superior to glass balls.

A True Sportsman's Warning.

EDITOR BREEDER AND SPORTSMAN:—Last Friday, March 21st, 1884, I went to my blind at Alvarado to have a little duck shoot and pack up boat, decoys, and clothes for the season. I succeeded in bagging ten ducks, and among the number there was a female mallard, and as usual I plucked it with the rest as soon as I reached my cabin, but greatly to my surprise I had an opportunity to inspect the first shelled mallard's egg taken prematurely. So by this, fellow sportsmen, you can see that I did wrong in hunting after March 1st, 1884, and I only hope you see my fault and not do as I have done in the future. I hope all lovers of wild fowl will have the ducks protected by putting their heads together and have a protective law passed in the coming Legislature, if possible. DIS-REMEMBER.

A correspondent from Texas to an eastern paper says: "Texas, at present, is indeed a fine field for the sportsman. Game of all kinds is abundant. Of the feathered class, we have the wild turkey, prairie chicken, geese, ducks, innumerable both as to quantity and kind, plover, various species of snipe, and two species of quail—the Bob White and blue quail, as he is called here. The Bob White is the most abundant end by far the best game bird, indeed with me he is the ace of all birds. The blue quail is about one-third larger than the Bob White, bluish color, with speckled breast and crested head, presenting a handsome appearance. They are usually found in coveys ranging from twenty-five to sixty, are feet of foot, and will not take to wing except when hard pressed. While the covey remains unbroken they will not lie to a dog or anything else. When broken and very much scattered, if they have good cover, they will sometimes lie, though are quite unreliable. They are 'no good' for the sportsman, but are the chief delight of the pot-hunters who frequently kill as many as a dozen at a shot. As a table bird they are about the same as the Bob White. They inhabit only the extreme western part of the state. Plenty of them in this immediate vicinity, and pot-hunters are now daily bringing in large quantities. "M. M."

We give this for perusal as we find it verbatim, because there is some prospect of the Texas quail being introduced into California, if he is not already here. Grand bird as our own quail is in many respects, there is a heap of the Indian in him in other respects, and the inter-mixture of the Texas bird, we think, is not likely to improve him. We have lately heard the Arizona quail compared with his Texan brother for his good qualities. We give these opinions as they come to us, that those who seek the introduction of either bird amongst us may make due inquiries as to their correctness before spending money on the enterprise. That is all we seek.

The Missouri game law says: No person shall catch, kill or injure, or attempt to catch, kill or injure any wild huck, doe or fawn, between the 15th day of January and the 1st day of September, or any wild turkey between the 1st day of March and the 15th day of September, or any pinnated grouse, commonly called prairie chicken, between the 1st day of February and the 15th day of August, or any ruffed grouse, commonly called pheasant, or any quail, sometimes called partridge, between the 1st day of February and the 15th day of October, or any woodcock between the 10th day of January and the 1st day of July, or any turtle dove, meadow lark or plover, between the 1st day of February and the 1st day of August. This is a bright example set by Missouri to her sister states, and we are glad to find it followed by many in every part of the Union. There are fools in California, rogues, if not fools, who claim our laws are too stringent in protecting doves from indiscriminate slaughter, which means speedy annihilation. But to the dove Missouri adds the lark. Good, indeed, for that grand state. We hope, our country papers will copy this statement.

Mr. James McIntosh, president of the Butte County Sportsman's Club, and one of the truest sportsmen we have in California, informs a local paper that his club will meet next week to arrange for a live-pigeon tournament to be held at Chico on or about 25th April. Prizes to the amount of \$500 will be given. This tournament is being gotten up at the earnest solicitations of some of the best shots in the State, who desire to visit that locality. We advise brother McIntosh to commence early in getting his birds for he will have a large host of visitors. If live birds in abundance cannot be obtained, then again we advise him to use the swift flying, whirring, clay pigeon. Any blind man can break a glass ball, but it takes keen shooting to capture the imitation fellow. Under Mr. McIntosh's management this will be a tournament of the year.

Dr. Carver, in his match to shoot 1,000 bats in eighty minutes, which took place at New Orleans on the 9th instant, won, with nine minutes to spare. He killed 1,003 bats in seventy-one minutes. The bats were thrown into the air two at a time by a negro attendant, the doctor standing at a distance of eighteen yards. He used two guns, including his famous "Old Widow" built by Greener.

A match for \$100 between Frank Haile of the Alameda Sportsman's Club and W. L. Eyre has been arranged, and \$25 forfeit put up. The match is to be at thirty yards' rise, Hurlingham rules, and will, in all probability, be shot at the Oakland race track to-day. Mr. Haile is rapidly rising into prominence as a trap shot, as we said elsewhere. It takes a good man to beat him now.

The opening pigeon shoot of the California Wing Shooting Club, postponed from time to time on account of the weather, will take place, we understand, to-morrow, at San Bernardino, weather permitting.

Champion Stallion Stakes.

Last week we referred to the above stake and the great importance it is to the breeders of thoroughbreds. Distant as California is from the course where the stake will be decided, there is no section of the country which will derive more benefits from the engagement. Breeding thoroughbred horses so far from the principal markets can only be made remunerative by bringing the stock prominently before the men who will pay the longest prices. Engagements in Eastern stakes give publicity, winning some of them ensures still more favorable estimates, and the excellence established in this way overcomes the drawback of thousands of miles between buyer and seller. It will not require many victories to cause purchasers to look to this part of the word for racing colts. There is a growing tendency among men who, in a measure, make a business of racing to purchase in lieu of breeding, and breeders are turning their attention to a separation of the branches in order that there may be full confidence that none are withheld in the public sales of yearlings. In some respects the division is beneficial, as it enables the breeder to give his whole attention to production, and, per contra, the buyer is benefited by having a wide field for selection and without the expense of keeping up a stud-farm. As the yearling sales in the East are held before the closing of the main stakes, the purchaser can make the engagements. But in the case of Stallion or Produce Stakes the breeder takes the risk—if risk it can be called—in order to enhance the value of the colts. Naming a stallion gives all of his get a chance to participate, and though one representative may appreciate in value to many times the cost of the engagement, there is not one that will not rate higher than if the sire was left out. There is another advantage in subscribing to the stake under consideration.

At Monmouth Park there is an assemblage of those who will pay a great deal of money for a promising colt, and any animal which displays capacity will find many eager to purchase. Should the owners of California stallions enter generally into this stake we have the strongest faith that the two-year-old of 1885, and the Lorillard of 1886 will be placed to our credit. If only half a dozen are named that faith will be firm, and even when restricted to the get of three, confidence will not be shaken. Norfolk, Kyrle Daly, Monday, Wildidle, Joe Hooker, Grinstead, Rutherford, Wheatley, Shannon, Flood and Lexington possess the necessary qualifications in their individual right, and sufficient mares have been bred to each to warrant the outlay. There are others that could be added although their foals are limited. With ten nominations the outlay will be \$5,000, and without taking into consideration the chances of winning, the advertisement of California stock would warrant the expenditure. As the stake closes next Tuesday this will be the last opportunity for us to urge through the *Breeder and Sportsman* the importance of making the engagement. We do so sincerely, as there is not a doubt that if the advice is followed that the investment will pay."

The Turf in Tasmania.

From the following account of the opening of the race meeting at Elwick, Tasmania, which is copied from the *Federal Australian*, it will be seen that the "royal sport" is a popular institution so far south of the equator. In all the colonies of Australia it is the pastime above all others, and as has been oftentimes stated in these columns, the breeding, rearing and training of thoroughbreds has been carried to such perfection that it is doubtful if any country can surpass them in the quality of the product. In the first place, the best stock were purchased for progenitors, these were scientifically mated, good care taken of parents and offspring, and then the superiority of the climate "put on the polish." The purpose in view in publishing the quotation, however, was not to panegyrize the horses, but rather to lay before our readers a pleasantly written interlude to the description of the racing, and also to show that our system of mutual pools was growing in favor in other countries. The title has been changed to totalisator, and that is certainly a better name than the one in vogue here. There is another thing we desire to call attention to, that being the "chronograph at the back of the judges' box, immediately opposite the grand stand." The large dial enables the spectators to mark the speed of the fractional parts of the race, as well as the whole of the distance, and is far better than the blackboard and chalk, while it puts an effectual stop to tampering with the time. As it is placed on the back of the judges' stand it also shows that the official who occupies it is on the right side of the course to observe, viz., on the outside.

"Ay, that's a colt indeed, for he doth nothing but talk of his horse," was the fair Portia's contemptuous appreciation of a horse, although princely, suitor in the middle ages. But *tempora mutantur, et nos mutantur in illis*, and to profess now-a-days an ignorance of, or an indifference to, the national sport would be sufficient to relegate an embryo lover to the shades of "grim and comfortless despair." That the denizens of the island colony are in no whit behind their continental brethren in their love for the national pastime was demonstrated at the annual carnival held here within the current month, and of which Wednesday the 13th was the opening day. The weather had been singularly unpropitious for the previous week, but Jupiter Pluvius relented at the last, and the morning of the 13th ushered in as brilliant a day as it was possible to imagine. Too brilliant, indeed, for comfort, for the burning midsummer sun poured down his rays unchecked by even a passing friendly cloud, untamped until the hour for his setting was at hand by even a whiff of the customary sea breeze, which usually comes rippling up the broad estuary of the Derwent, and converts a dog day into one of comparatively *tranqui de froid*. The *habitués* of the turf, and the votaries of pleasure generally, sought the trying-ground by the various modes at disposal. Road, rail and river each were largely indented on. From the well-appointed and remarkably neat four-in-hand of the Hon. John Lord, M.L.C., president of the club, and others of the same description obtained for the occasion, to the humble cart of the itinerant fruit-vendor, was the six miles of road which led to the course well occupied by. The four steamers which plied were well patronized, while the Main Line Railway, which runs trains at intervals of half an hour, discharged cargoes of living freight. On the whole the attendance is stated not to have been up to the mark of previous years. The railway returns show 3,676 passengers booked from Hobart, against 3,887 last year, the freight of the up trains being estimated at about equal for the two years, and there was a slight falling off shown by the other returns.

His Excellency, the Governor, accompanied by several ladies and Commodore Erskine, drove up in a four-in-hand before the racing commenced, and was received by the committee and conducted to that portion of the grandstand set apart for the Government-house party. The large amount of rain which had fallen had made the "going" excellent, and had given a freshness and a verdure to the surroundings not usually to be met with at this season of the year. A new feature at the meeting was the addition of a handsome chronograph, presented to the club by Mr. W. Golding the well-known jeweller in this city, placed at the back of the judge's box, immediately opposite the grand stand. It is worked on the same principle, and is of the same description as the one at Flemington, and, therefore, demands no particularising here. The gift is a costly one, and Mr. Golding further devoted a considerable amount of time to the erection of this instrument, and to the perfecting of the mechanism after he-

ing placed in position. Through his liberality Tasmania can boast of being one of the only two colonies possessing such a convenience. Another novelty was the introduction of a totalisator on the lawn, and worked under the authority of the stewards. This innovation was bitterly inveighed against by the talent, who complained of a considerable falling-off in whilom constituents. Be this as it may, certain it is that the totalisator in question received considerable support, £2,165 being the total of the three days' takings, the percentage on which supplemented the funds of the club by \$104 5s. Equally certain it is that many who profess to regard the ring with abhorrence, and to view betting as a snare of the Evil-one, have no such qualms when risking a modest sovereign in the totalisator. Staid distinguished members of the medical profession, high legal luminaries, Ministers of the Crown, ay, even occupants of the Beuch itself, were to be seen among the worshippers at the shrine of the fickle goddess, as represented by her high priest, the manager of the totalisator, conducted under the auspices of the club. Without the charmed circle was another similar instrument, equally well patronized, to which many from within resorted to for hedging purposes. One gentleman effected an extraordinary *coup* in connection with the two. The totalisator without announced payment to the first horse past the post, while the one working under the control of the stewards displayed a written notification from the secretary that payments would accompany stakes. In the steeple-chase the gentlemen referred to backed Shamrock in the official machine, and Tandstickor in the one without the pale. Tandstickor won the race, and his number went up; but he was subsequently disqualified on a protest that he had run inside a post, and the race was awarded to Shamrock, the second horse. Consequently the lucky investor received from both totalisators under the rule each was working under.

Closing of Stakes.

Champion Stallion Stakes, 1885, Monmouth Park, April 1st, Tuesday next.

Capital Turf Club, Sacramento, racing, trotting and pacing, April 5th, Saturday next.

The Spring Race Meeting.

Barring the rains, which have delayed the trainers in completing the grand preparation, everything is progressing favorably for the Spring Race Meeting of the Pacific Coast Blood-Horse Association. As the opening day is yet two weeks off it may prove that with fair weather from this on the horses can be got in fine condition, and it is not entirely out of the question that the "order" may be better than if there had been no break in the work. Very frequently the trials of a month previous have been superior to the actual racing as every trainer is well aware, and in other cases, when it was thought that the work had been altogether too light for success, the animal has made the best race of his life. In a short article elsewhere, copied from the *New York World*, the writer claims that the large stables have a great advantage over those which have not the same facilities for winter exercise. The superiority consisted in straw gallops laid under cover, and on which only slow exercise could be given. In this country there has been scarcely a day when the horses were confined to the stable, and very few when they were restricted to walking. We imagine that those at the Oakland Trotting Park have labored under greater difficulties than at any other training grounds, and yet it has been possible to give some kind of exercise. The roads in the neighborhood of the Sacramento Course are capital to gallop upon, and we will venture the assertion that Henry Walsh has had his string moving up the nice park from the San Jose road to the bridge across the creek near the trotting stables of Palo Alto. From a drive across "the grant" we are of the opinion that Patsy Duffy has kept the colts at Rancho del Paso moving, and that after two weeks' sharpening they will render a good account of themselves. What little we have seen of Santa Clara, there is little doubt that Appleby has not been idle, and certainly the Alameda gives an opportunity for work in any weather. There has been a good deal of inquiry lately on the part of those who desire to speculate in the book of Killip & Co., and questions of "what are the horses doing?" have been frequently repeated. There are few fast brushes and runs to report by the most diligent investigator, and so previous performances and pedigree have to be depended upon for a guide. The largest wager reported is \$100 to \$500 on Glorienne for the maiden three-year-old to be run on the extra day, and the backwardness to back others is doubtless due to the uncertainty prevailing on account of the absence of information. It is surprising how much importance is given to reports from the training grounds. A "breeze" of a mile is magnified by the distance the rumor travels into a wonderful run, and "brushes" are colored by the pigment of a rosy imagination until the original hue is entirely lost.

While the copious rainfall has retarded training, it has assured a track to run upon which will be as good as as can be provided the coming month is of the usual character. As a general rule a wet March is followed by little rain in April, and the abundant supply of the past forty days gives reasonable expectations that the following thirty days will be all that can be desired. Should not another drop fall, the Bay District Course has been so thoroughly saturated that a slight sprinkling of the surface will be all that is needed to put it in such

order that it cannot fail to please the most exacting of trainers. Then, with the bright sunshine of the middle of April, and an immunity from the trade winds that prevail during the later season, the coming meeting will be so attractive that any one at all interested in turf sports cannot afford to stay away.

### California and Australasia.

As nearly as anything in the future can be foretold, there must be a community of interest between this country and the Australian colonies, and which, in the course of a few years, will insure an exchange of products to the advantage of both parties. The interchange of live stock can be made mutually profitable. From this section trotting and carriage horses, and cattle of breeds that are not as yet plentiful on that side of the equator, will go from here, and in return thoroughbred horses and Hereford cattle, etc. In another article we allude to the superiority of the race-horses of Australia, and we consider the excellence so well established that all who are acquainted with the history of the antipodean turf will concede the merit claimed without a dissenting voice. These will be of immense value in the California breeding-studs, and in lieu of importations from England preferable animals will be obtained with less trouble and at smaller cost. While our breeders of thoroughbreds are benefited, the interchange of blood-stock will also be beneficial to them, the mingling of the best blood of the two countries giving promise of a still higher degree of excellence than has yet been attained. Live stock will not be the only interchangeable commodity. There is a wide field in that country for American machinery, and many kinds of goods that America has become celebrated for fabricating, but were the trade confined to horses and cattle, and the fittings that belong to the light-harness horse, there is enough in it to attract attention. On this account we take pleasure in calling attention to two advertisements which appear in this paper, and to which we call especial attention. One is that of the New Zealand Stud and Pedigree Company of Auckland, New Zealand, and the other of Brown Bros. & Co. of Sydney, New South Wales. From the most reliable sources of information, the fullest dependence can be placed on the company and firm, and every claim is based on substantial grounds. The thoroughbreds of the New Zealand company have achieved distinction, and the wonderful performances of Martini-Henry have given a world-wide renown to the produce of Musket and the finely bred mares in the paddocks. Clydesdale horses are so well and favorably known here that the only requirement is to state that those belonging to this company are as good as can be found in any land, and for heavy draft purposes they have no superiors. While their power in the collar is granted, it is not generally known that a portion of the blood is of great value in the coacher. Three-quarters thoroughbred and one-quarter Clydesdale will give an animal of size and weight enough, and many of them possessing quality sufficient for the purpose, and all thus bred being valuable for heavy work on the streets. There is a happy combination of activity, size and strength, and as "general purpose" horses, they deservedly rank high. Every one of our acquaintance who has seen the Hereford cattle which have been imported from Australia speak in the highest terms of them. That this breed of cattle is worthy of a foremost place in the ranks of beef-producing animals has been established beyond cavil. It is the only one that has been able to come into successful competition with the Shorthorn, and taking into consideration the large numbers of the improved "Teeswater," it is surprising that the "white-face" has come out so well. For the first time in California there will be a show of Herefords at the autumn fairs, and we have no hesitancy in predicting that the display will gain them many friends. Our old friend Sotham, after a war of fifty years, had the satisfaction to know that their merits were appreciated before he died, and this main object of his long life appeared to sustain him and give him the nerve to carry over fourscore winters and summers as jauntily as most men of middle age. When our people see more of the Herefords there will be a desire to purchase, and there is no market where they can be obtained with as little trouble and as little cost, for really good animals, as in the colonies. The trustworthiness of the parties can be implicitly relied upon, and orders to either the New Zealand company or Brown Bros. & Co. will be carried out as satisfactorily as though a special agent was sent, and thus save a large portion of the expenses.

The auction sale of trotting colts at Rancho del Paso will be held about the middle of May. The catalogue is now in preparation, and will contain a list of yearlings and two-year-olds of a very high order of breeding.

Imp. Kyrle Daly's hook is full, and no more mares will be accepted for him this season.

### Early Training.

The miniature race-courses at Palo Alto, in which the weanlings are given their first lessons, were thought to be the earliest method of commencing the education known, but Captain Hutchinson informs us of a still earlier plan of trying the quality of racing colts. Near his place of residence live a number of old Californians, who were under the impression the native horses were more than a match for any other breeds, and thought the superiority could be shown while the colts were still sucklings.

Captain Hutchinson is the owner of Hock Hocking, and the first of his get were by the side of their dams. There were only three from thoroughbred dams, while there were bands of the natives to select from. A smooth piece of road was the race-course, the foals being held while the dams were led away a few hundred yards. The colts were slipped after the manner of greyhounds, and even at the first trial there was excitement enough to bring out the speed. Succeeding trials increased the ardor, and after a few runs there was an evident disposition to heat each other, besides the motive to reach the mother. Each of the Hock Hockings could down the best of the natives, and one of the trio was the superior of his companions. This was St. David, and to prove that the early trials was a "true line," he has been victorious whenever they met on the course. It was by these performances the present owner of St. David was guided in the purchase, and as he has been offered a large advance on the price paid in that instance, the judgment was correct.

### Two Commotions.

Tuesday last we were treated to two startling events, one not unusual here, the other the first that has occurred since our residence in California. The "trembler" was only ardent enough to shake the upper stories, little damage being done. A half dozen of telegraph poles shattered on the mole gave the young men who travel on the local trains their first sight of the result of a thunderbolt in the way of "knocking out." Should the latter be the means of introducing the lightning-rod fiend to the notice of California, we can never forgive old Jove for allowing the random dart to fly in this direction, and hope in that case that the gnome who has charge of the subterranean dynamite will scare the glit-tongued advocate of points and insulators out of the country. As the poles struck were only a little over a mile from where we were the flash and report were close together, so that it recalled the old days in a forcible manner. The dogs were sure there was necessity for their vigilance, and the terrier that stays in the barn rushed to the door to repel the intruder which he supposed was making a determined attack. We were in hopes that the thunderstorm was an indicative that the rain was ended, especially when the following day the sky was clear and the wind came from the west, and then this idea was proved fallacious when from early on Thursday morning until the middle of the forenoon there was the heaviest fall of the season. In regard to the weather we will be well suited without eastern innovations, at all events until the race meeting comes to a close.

### Santa Anita Troubles.

A letter from Alhert Cooper, trainer of the Santa Anita Stable, gives the reasons for not making entries "up country," as Alhert terms it, and worse than that the storms had such a depressing influence on the mares that quite a number of them "slipped" their foals. In this and the "barren" list are Blossom, Glenita, Jennie D., Jennie B., Josie C., Experiment, Katie Beler, Santa Anita, and Sister Annie, and this is not only a great loss to Mr. Baldwin, but is a serious mishap to the racing interests of the coast, as the progeny from any of these mares by the Santa Anita stallions could scarcely fail to prove race-horses that would be a credit to the State. To use Alhert's words, "The reason we did not enter up country was on account of the weather. Our track was washed away, the horses were taken sick, and at one time it was nearly three weeks before we could get out of the stables to gallop. Work we could not, as it was impossible to get on the roads that were suitable to exercise upon. We have fourteen horses in training so far off from being fit that it will be two months from now before they are in any condition to run. We were all disappointed, as the programmes are satisfactory, and had the dates been later would have been pleased to participate."

For once in the ten years of our experience in California the "lower country" has been troubled in this way, and the only time that winter training has been hindered. The previous immunity has caused the people to neglect making provisions to guard against a contingency that was thought to be beyond probability, and it is safe to say that even a repetition of the phenomenal weather of this year will find them guarded at all points.

### Closing of Stakes.

Champion Stallion Stakes, 1885. Mounmouth Park, April 1st, Tuesday next.

Capital Turf Club, Sacramento, racing, trotting and pacing, April 5th, Saturday Next.

See Advertisements.

### Silverheel.

Twelve years, when associated with D. A. Gage at Atwood Place in horse-breeding, we held a public sale. Among the fillies was a very handsome one by Logan, the dam Fanny Stratford, and as she was a "full sister" to John A. Rice was held in high esteem. Little did we imagine that in the "whirligig of time" a son of hers would be met in California, and that, too, by the great Indiana sire Wilson's Blue Bull. The filly was named Maggie Rice, and the purchaser R. B. Chisholm, the locator of the celebrated Ennua Mine in Utah, and now R. B. Chisholm, Jr., of Oakland, is the owner of the son which he has christened Silverheel. He is a very handsome colt, and as with a short training when a four-year-old Simon Anderson drove him in Chicago three heats inside of 2:40, he has the trotting step of the family. We copy from the *Western Sportsman* a short history of Blue Bull, and inasmuch as the editor, N. A. Randall, has been in the best position to know of what he writes, his statements are more reliable than the guessing of others.

### Stockton Colt Races.

It is sufficient to call attention to the list of entries published elsewhere in the Stockton purses for trotting colts, as in addition to the number the very best blood of the trotting world is represented. Nine in the two-year-old; fourteen in the three-year-old, and eight in that for four-year-olds, must certainly gratify the managers, and also satisfactory to breeders. As we have oftentimes stated, the great feature of California track-sports hereafter will be the trotting of youngsters, and this view is becoming so well fortified by the best of evidence that few will dispute the correctness of the prophecy.

### AQUATIC.

In anticipation of witnessing the wherry races of the Triton Club at North Beach, last Sunday, the Golden-Gates and the South Ends rowed around from the South Beach, the former in the Perkins and the latter in the barges Garfield and Flyblister. The oarsmen had accomplished most of the distance without mishap, but on turning the corner of Meiggs Wharf they encountered a heavy ground-swell, and notwithstanding their efforts their barges were carried inshore, where the breakers were rolling with considerable force and swamped. The racing barge of the South-End Club collided with the barge of the Dolphin Club, and was stove in about four feet from the bow. There seems to be considerable surprise among the members of the North Beach Clubs that such an accident could have occurred, but the barges used by them in their rowing are much better sea boats than the low racing boats of the South Beach Clubs, being deeper and of heavier construction. The South-End Club are not placed *hors de combat* by the accident to their barge, for should there be a race gotten up it will be for best and best boats, in which event they will enter their four-oared shell crew.

The affair gotten up and called a sweepstake race in which a few oarsmen have joined their fortunes with a manager of a sporting resort, is denounced by the leading spirits of the boat clubs as a scheme for securing gate-money. There may be a great many such races if this one enables the venturesome capitalist to take in at the gate ten times as much coin as he promises to give those who help to get his chestnuts out of the fire. The public have heretofore held the boating fraternity in high esteem, but if the pastime is turned into a means of money getting and placed on a level with slogging matches, respectable young men will avoid having their names coupled with those who take part in the sport only for the sake of what can be made out of it.

There was a strong nor'west gale on the day Wednesday, and but few vessels were out under sail. A small sloop-yacht, which appeared to have a pleasure party aboard, beat down the channel under one reef. Sailors aboard of the vessels in the stream watched her closely, evidently thinking she would capsize or get swamped. The seas swept over her so that at times her hull was lost to view. The sloop was put about when off the Presidio, and as she was afterwards safe at anchor in Mission Bay, those who saw her will entertain no fear that she met with any mishap.

A challenge has been sent by Tom Flynn, who backed Petersen in his race against Lee, to Hosmer, offering to make a match for one thousand or two thousand dollars. Hosmer has not sent a reply but it is expected he will accept, as he recently offered to give Lee a long start in a three-mile race. If Hosmer should accept an effort will be made to have the race take place on this coast.

There is nothing being said regarding a second race between Petersen and Lee. Lee has evidently come to the conclusion that he underrated the California sculler, and prefers not to hazard the chance of being a second time defeated.

Walter Blake, of the Ariel Club, has just received a new wherry from the shop of Al. Rodgers. The boat is a very handy one, and while too heavy for racing will be found to be just the style of a wherry for ordinary use about the bay.

The Lolita was launched from the ways at Hunter's Point last Wednesday. She has been overhauled and painted, and her cabin neatly fitted up.

The races of the Triton Club, which had been put off several times for various reasons, were again postponed last Sunday.

The Magic has been taken to Antioch, where men will set to work fitting her up for the season.

## STABLE AND PADDOCK.

## Ergotism.

The late sensational reports of the appearance of the foot and mouth disease in Kansas having been satisfactorily exploded by the surgeons who investigated the matter, the following notes of the real trouble may be of interest to stock raisers. The examiners decided that the direct cause of the loss of feet and limbs is from freezing, being rendered sensitive to the cold for want of circulation in the extremities, which was retarded by the ergot-poison contracting the blood vessels. The highest authorities agree that ergot, when taken as a poison, produces the disease known as ergotism, and this disease is of two kinds—spasmodic or convulsive, and the gangrenous. The symptoms in man of the spasmodic form are, irritation of the skin, coldness of the body, cramps and numbness of the limbs, and pains in the head and back, followed in from one to three weeks by gastralgia, giddiness, fainting and convulsive movements of the muscles; frequently the skin becomes spotted with vesicular eruption. Great exhaustion and craving for food ensue. The gangrenous ergotism begins with weariness and pain of the limbs; the skin grows dull in hue, and at length dry gangrene attacks the extremities, and when death does not supervene, the parts affected are generally lost. The poisonous action of ergot on various animals has been shown by the celebrated chemists, Boujean, Diez, Gross, Parola, Wright and others. Boujean was the first to produce the extract known as "ergotin," used in medicine to check hemorrhage. Ergotism in animals is found to produce the following symptoms. It causes first: redness of the eyes and ears, then coldness of the limbs and swelling of the joints, and finally gangrene of the extremities and intestines, and death during convulsions. The highest authority on the subject is that in animals gangrene always attacks the legs, resulting, whether in warm or cold weather, in the sloughing off of the parts affected—the same as the telegraph has informed us is the case with the cattle disease in Kansas. Ergot is of a parasitic origin, attacking rye principally, but also some other starch-producing cereals. When this vegetable parasite begins to perform its work in the ear of rye a fermentation takes place, and there exudes from it a sweet yellowish mucous, which after a time disappears, the ear loses its starch and ceases to grow, and thus by a chemical change the rye is transformed into ergot which, according to the same authorities, has power of reproduction, especially when it falls upon wet earth. Hence it may be scattered and spread in various ways—in the shipment of hay or grain in which it is found, or the moving of cattle which have fed on it. The ergot grains have usually marked features which distinguish it from rye, principally in this—the entire absence of all starch, it is hard and brittle, it has two lateral furrows, while rye has only one, a disagreeable rancid taste, and it has a faint fishy odor. Many of the most serious epidemics in both man and beast have been traced to ergot poisoning, the latest of which among the human family, of which medical authority gives an account, was in Loraine and Burgundy, in 1816, which swept off thousands of their inhabitants. This epidemic was directly traced to ergotized rye flour. The rye being raised in damp, cold soil, which condition of the soil is found to be particularly favorable to the reproduction of ergot. Whether "gangrenous ergotism" is contagious or not, that is, whether it can be transmitted by contact, carried in the clothes, or by contact between animals, is, according to the latest authorities, left in doubt. All agree it is epidemic, however, attacking large numbers at a time, and covering large areas of territory.

## Successful Lithotomy.

The Portland Oregonian records the following case of a successful operation performed by a veterinary of that city. The operation of lithotomy, or cutting for stone in the bladder, was performed after urination, on Wednesday last, by Dr. McLean, a veterinary surgeon of this city. The animal was a brown mare, nine years old, the property of Harrison B. Oatman of this city, and the operation was effected without administering chloroform. The mare has been troubled for nearly two years, and as she was rapidly growing worse, her owner conceived the idea of having this operation performed upon her. The surgeon found the stone to be in a solid mass, and was obliged to remove it in fragments, which he accomplished by breaking it up with a pair of forceps. The pieces removed weighed a trifle over three ounces, and were evidently formed of fine particles of mica and sand. Only a few minutes sufficed to perform an operation which alleviated pains of two years' duration, and the mare stood up almost exhausted. She rallied quickly, however, and the doctor told Mr. Oatman he could drive her on the following day, but Harrison preferred to take the safe side of the case and let his mare become thoroughly rested up before he would risk driving her. This is apt to occur to animals kept in pastures at the foot of mountain ranges, and I have known several such cases in northern California. One was a stallion and another a gelding, both of which died under the knife.

French doctors assert that horses are liable to typhoid fever; that they suffer very much as men do, and are cured by a similar treatment. The chief difference is that with horses the disease is infectious—it is so also with donkeys—but it is not with men. The period when they are most liable to typhoid is when they have attained their full growth, and country horses are especially liable to it the first winter they spend in town. The symptoms are painfully identical—loss of strength and appetite, listlessness, prostration and bleeding of the nose. Sometimes the horses get nearly bald before they recover. Then there are the same complications of lung and larynx.

No animal should be kept too fleshy when in foal; a thrifty condition is all that is necessary and required during this period. Where the animal supports too much flesh it makes parturition difficult, and in some cases the lives of both dam and progeny are sacrificed at this time. You must certainly feed your mare on nutritious food, but not in too great quantities, during her present condition. The food fed should be sound and sweet, and of that character that agrees with the stomach and bowels, both of which must be kept in a normal condition, or as near to it as possible.

The annual fair of the Sonoma County Agricultural Association will be held on August 18th to 23d, 1884, inclusive. The committee appointed on premium list is Guy E. Grosse, Edward Pitton, J. H. Laughlin, B. M. Spencer and E. W. Davis. Committee subject to call of Guy E. Grosse, chairman.

The Petaluma Horse Show has been set for next Saturday, April 5th, unless the weather again compels a postponement, which is not likely. The exhibition will be varied by some races for local roadsters.

## HERD AND SWINE.

## What and When to Feed Hogs.

[An address read before the recent meeting of the Wisconsin Swine-Breeders' Association.]

This is a question I do not feel able to handle, and when I see around me some of the best breeders and feeders in the State, men that have grown grey on the farm and have fed hogs and pigs for a life-time, I feel diffident in giving the method I would or do pursue. However, I am willing to give my ideas on the subject, and if wrong hope to be shown the error of my ways.

I will commence with young pigs from three to four weeks old, when we first commenced to feed them separate from their dam. As soon as they are three weeks old, and sometimes sooner, they will begin to look around for something to eat besides what they get from their dam. At this age I would build a small compartment that they can run in and out at pleasure, so that the sow cannot disturb them, and commence feeding them a little skimmed milk, also some shelled corn which has been soaked at least twenty-four hours, and a few unground oats; and after feeding in this manner for perhaps a week would put ground oats or wheat middlings into the milk, never feeding at one time more than they will eat up clean; at the same time feeding the sow three times a day all she will eat up clean of equal parts or soaked corn, bran and ground oats, and plenty of good pure, clean well-water, and, if possible, let them run out in clover or blue-grass pasture. If you cannot let them run in the pasture they must have a large yard where they can take plenty of exercise, and all the fresh-cut grass they will eat given them at least once a day. This kind of feed will produce plenty of bone, muscle, blood and fat. They will thrive, and you will be surprised at the rapidity of their growth. At the age of about two months I would wean them from the sow, continuing about the same kind of feed, and increasing the quantity as the pigs increase in size and their appetites increase, being careful to never give so much that any is left in the trough. If, whenever you go to feed your pigs, there is any left in the trough take it all out and give it to some of your older hogs, and feed them less. If it is left in the trough it gets sour and sours the fresh feed, and by having it constantly before them they soon lose their appetites, and also lose flesh, so that it will take quite a number of days to get them back to the same good condition. I would continue this course of feeding through the summer, shoving them along as fast as possible. If they are not quite fat enough to suit you increase the proportion of soaked corn.

It is supposed, of course, that you have planted a nice lot of sweet corn for your pigs, as there is nothing they like better or will grow more rapidly on. I would commence feeding it as soon as the kernel begins to form, cutting up and feeding stalks and ears, all they will eat up clean. I would feed the stalks until the ears get quite hard, and then, if you have plenty of it, feed only the ears, snapping them off and letting them husk it themselves.

I would feed hogs in this manner, shoving them along as fast as possible, whether for breeders or pork, until they are at least seven or eight months old; but if for pork, I would then feed them all the soaked and new corn they would eat, with some bran and a little ground oil-cake in their drink, getting them as fat as possible, and selling at about ten months old. With this course of feeding they will average about 250 pounds. If they are to be kept for breeding I would not feed so heavily of fat-producing food, but more of the muscle and bone-forming food. Avoid keeping in small pens. Let them have a large yard—a pasture is better. I do not think heavy feeding injures pigs for breeding if they have plenty of exercise.

When the winter sets in our hogs get a large feed of roots once a day, a little corn twice a day, and plenty of bran or middlings in their feed. These are brood-sows I am now speaking of. We think a great deal of roots for brood-sows, as it keeps them from becoming constipated and makes them healthy; they are also cheap feed. By manuring freely 800 to 1,000 bushels can be raised on an acre of ground. When farrowing time comes I would put the sow by herself a few days before I expect her to farrow, so that she would get accustomed to her pen, feeding her nothing but bran or middlings, with a very little ground oil-cake and water. Usually, for twenty-four hours after farrowing, I would feed nothing but water or swirl; then for a week or ten days feed very light, increasing their feed only as their appetite increases, as it always does. Under this plan I never had but one sow that refused to breed, never lost a sow in farrowing pigs, and have never had to help or assist a sow in farrowing.

I want to say just a word about feeding hogs and pigs for the show-ring. About all there is to it is to get them as large and fat as possible, observing that they do not get down on their feet, which they will not do if they have plenty of exercise. The fatter you get your hogs for show purposes the surer you are of the prizes, notwithstanding it is a detriment to the hog. If your hogs are to show, and you get them so fat that they can scarcely walk or breathe, nine times out of ten you will get the first premium. I do not care who the committee is. I find the practice of quite a number of breeders is to fit their hogs for show in this manner, and when through to sell them for pork; but if you say anything to them about it they say, "Oh, no, they are not fat; they are in just breeding condition, that's all!" Well, how can you blame them for doing it? They have got to do it if they want any premiums, and they always will do it as long as the committee give prizes for fat, no matter what you say in the premium lists about it.

## "Mavericks."

All range cattle are branded with the private mark of the owner. This is chiefly done while they are calves, the ownership of the young animal being determined by the brand given its mother. In Texas it was once a legitimate and universal practice to capture any animal unbranded and affix your own to it, no matter to whose herd it belonged so long as it was one year old and unbranded. During the year just following the break-up of the war branding "Mavericks," as these young unbranded animals were termed, was the most profitable business a cattle man could follow. Their attention was chiefly directed to females, which was found in great abundance ranging from one to five years old. The queer title then bestowed upon these unbranded animals still clings to them. It is derived from an old Frenchman named Mauvric, who began stock raising in that section with a very few head of cattle, and in a remarkably short space of time had secured an enormously large herd. It was finally discovered that he actually branded fifty head for each cow he owned.

A careful flockmaster in Tulare county reports 1,048 lambs from 1,240 ewes, an increase of nearly 85 per cent.

## County Fat-Stock Shows.

It is not claiming too much to say that the show held at Chicago has been more useful than any other one exhibition of an agricultural nature held in the United States. But it needs no argument to prove that its direct influence has reached only a small percentage of the meat producers of Illinois even. Indirectly, vast numbers have been benefited; directly, only a small percentage have attended or even read carefully of this exhibition. Many farmers have the feeling that this great show "isn't practical," that it is mainly for fancy breeders and rich amateur farmers.

It is believed to be easily practicable to secure good displays of fat-stock in many counties, or comparatively small districts in the leading breeding districts; collections which will do honor to the exhibitors and to the county, and which will also do much to stimulate the less progressive farmers of the region round about—teaching them to study animals carefully, and to compare them with others. Object lesson teaching is wonderfully effective. We remember what we see better than that which we hear about. We are more influenced by example than by argument or exhortation.

Such an exhibition need not be very large, and the expenditure necessary is small. It is not probable that at the first there would be a great attendance. Either from the funds of the society, or from a reserve contributed by farmers and citizens, butchers, shippers, etc., the greater part of the cost would probably have to be paid. In many county towns a good stable with adjoining sheds could be secured for the exhibition, needing little to fit it for the purpose. In other places a large building can be found vacant. The season for holding the show would make the fair grounds unsuitable, usually.

Large premiums would not be necessary. My plan does not contemplate a "great show," nor that exhibitors will have gone to much additional cost in fitting the animals for exhibition or in getting them to it. On the other hand, it is a not unimportant part of the merit of the shows, as I think of them, that they would not only be instructive but pleasant; not only would they give successful exhibitors honor and some money, but that they would make an exceptionally good market for some "holiday fat stock," giving butchers in the smaller cities opportunity to secure such stock, and shippers opportunity for collecting them for shipping to the great markets.

In most cases I would not advise making distinct classes for the different breeds. Either very small premiums would have to be given, or the footing of the prize list would be large. For the purpose of such an exhibition a fat steer of any breed might be shown with those of like age, and we may say "a hog is a hog." In regard to sheep, the case is somewhat different. It is hardly practicable to compare Merinos and the Down breeds. Probably where the different classes of sheep are fed it would be better to make two or three classes. In Champaign county there would be little breed rivalry in cattle, most of the better fat stock being grade Shorthorn. With a satisfactory committee, I do not think exhibitors of different breeds of hogs would much object to competing together.

I would suggest an arrangement something like the following: In cattle have classes for animals three, two and one year old, letting those of either sex compete; fourth class for cows three years old or over. The premiums might be \$15 and \$10 in each class, with a sweepstakes for best beast of \$25; one for best three or five, of like amount. Where suitable arrangements could be made, prizes for carcasses might be offered, but there would be difficulties about this in shows held only a day or two. With hogs, there might be simply classes for those over one year and under two; and those under one year, allowing sexes to compete together with prizes of, say \$3 and \$5, and sweepstakes for best animal, and for best lot, of \$10 or \$15 each. A somewhat similar classification might be made for sheep, with or without division into general classes. The total for such a list need not be over \$250 to \$300, even if poultry were included; and it is probable better success might attend a poultry show in a county exhibition than has been true of the attempts at Chicago.

These suggestions are given in the belief that a show conducted in the line indicated would be useful in a high degree. Of course there may be indefinite enlargement. Classes may be multiplied; premiums made larger; special prizes offered to any extent. In some localities it might be advisable to add space and convenience for the exhibition and sale of other classes of stock. These side features, however, should never be permitted to overshadow the main purpose of the meeting.

## Silo Rules.

The experiments with the silo in British India have been attended with the most complete success, and the following simplified rules have been evolved, which apply directly in the climate of California, notably in the southern part of the State and in the upper valleys where the summer heat is intense:

1. It has now been ascertained that freshly cut, green forage of all sorts, when still wet with rain or dew, can be preserved in silos for many months, or years.

2. Fodder thus preserved is found to contain about twice as much nourishment as the same amount of grass, etc., made into hay, and to be more easily digested than green fodder.

3. To insure success in the preservation of green fodder, the air must be almost entirely excluded from the silo, and great pressure must be applied from above.

4. When opened after many months the ensilage generally has a brown, mossy, and sometimes mouldy appearance, and a vinous or sometimes a sour smell. Horses and cattle eat it greedily, preferring it to any other forage.

5. A silo may be made in the form of a trench or pit, wholly or partly underground, or in the form of a building. The sides and ends of a silo must be smooth, and the upper portion of them (for about five feet) should be perpendicular, the lower part of them should slope slightly upwards, to cause lateral pressure as the fodder subsides.

6. When the silos are constructed wholly above ground, and not inside barns or other buildings, it is desirable, if possible, to give them a northern rather than a southern exposure, and to avoid one's self of any shade that is to be obtained. Hot weather prejudicially affects the ensilage, and it tells most on silos above ground.

7. Walls should be smooth, to facilitate settlement. When pits are dug in strong soils, where there is no fear of flooding, the walls may, nevertheless, be smoothly plastered with advantage or lined with planed boards set up on end, which is better than having the boards laid horizontally.

8. When the fodder is cut it should be got into the silo as soon as possible. The longer it is allowed to lie and wither in the field, the less likely it is to keep well.

9. Crops for the silo are best cut when young and succulent. Cereals should be cut about the time when the head begins to be formed; vetches, clovers and grasses as soon as they come into flower.

10. The stronger and more elastic the stems of the plants, the more weight will be requisite to compress them. When crops such as Indian corn, etc., are allowed to stand till the stems become old and woody, it may be preferable to pass them through a chaffing machine, as they would then pack well, with less weight.

11. It is not necessary, with our ordinary fodder plants, to mix straw, or other dry material to absorb the moisture. Indeed, such admixture would be likely to do more harm than good, so far as regards the preservation of the ensilage.

12. If you have dry fodder that you wish to make more palatable to the stock, a small quantity might, for the purpose, be mixed with very succulent crops; but you must be careful not to add too much, or you may endanger the condition of the whole. Few of our crops would admit of the addition of a tenth part of dry fodder.

13. Rain need not prevent the storage of crops in the silo. More damage is likely to arise from letting the crops lie long on the ground than from pitting them in a moist or even wet condition, but for all that an excessive quantity of water should be avoided.

14. Salt is not required for the purpose of preserving the fodder, but a moderate quantity may be useful to the stock.

15. Weight amounting to 200 pounds to the square foot should be placed on the top of the silos.

**Milking Cows at a Loss.**

The statement made at the recent meeting of the Northwestern Dairymen's Association, that one-third of the cows are milked at a loss, another third with neither profit nor loss, and the other third make up the losses of the first and provide the profits of the business, doubtless does not accurately represent the real proportions, but is nevertheless in the main correct. A very considerable proportion of the profits made by the farmer from good cows is consumed in supporting the poorer cows in the same herd that do not produce enough to pay for their care and keep. But the scales are handy, cream tubes and test churns are inexpensive, and beyond his own attention to the details of his business, there is no reason why any one should maintain an unprofitable dairy cow. If any one feels any great desire to know which ones are unproductive he can very easily ascertain, and it is not difficult to weed them out and supply their places with others which may prove better. The ease and promptness with which an exact knowledge of profit and loss can be arrived at whenever it is thought worth while to examine the question, is one of the advantages of the dairy business, but with a little more figuring and careful observation it is possible to ascertain the profits and losses in all the other departments of the farm. And in all departments these should be studied and understood. Poor dairy cows are not the only class of live stock sometimes maintained on the farm at a positive loss or with negative results. Indeed, considering the value of the labor employed on the farm, the expense in keeping it up, taxes, and interest on the investment, it is probably true that a very considerable proportion of the live stock consuming farm products do not pay for their care and keep. This is, unfortunately, too seldom appreciated. The farmer puts in his own labor, and his farm being all paid for he does not feel under obligation to consider the item of interest, and not being in debt at the end of the year, or perchance having a few dollars in his pocket, is satisfied with his lot, and makes no inquiry as to whether he has lost or made any money, or in what direction. Unprofitable live stock consumes so nearly the entire product of his labor and capital, that notwithstanding the continual practice of small economies, year after year passes with no improvement in condition. This is not right; the cost should be ascertained and the element of profits considered. It is not enough that one hand wash the other in farming, that the dollar lost in the feeding lot is replaced by a dollar made in the field. Weigh and figure, and weed out the unprofitable stock, whether it be individual animals in the dairy or classes of animals in the pasture. And if there be any department of farm industry that continuously does not pay, either improve its methods or drop it. Do not undertake to support it by profits realized in other directions.—*Breeders' Gazette.*

Abortion in cows is generally accredited to that persistent old enemy "bad luck," but in a great majority of cases it is but the result of bad management or no management at all. Very many instances have been noted of abortion from a cow being hooked by another, and during the brief period of danger the unruly and vicious ones should be kept apart from their better disposed companions. A cow has been known to lose her calf from fright, on being attacked by a savage dog. In fact, external causes are much more frequent and fatal than internal ones, and a little care will make abortion so rare in the herd that it will never be a reasonable risk to be anticipated in calculating the chances of increase.

It is well known that good, steady feeding gives an even fibre to the wool, and that poor feeding, even for a few weeks, changes the fibre and produces what is called a "break" in the wool. Uniformity of feeding is most important to the even quality of the wool. Poor pasture should be counteracted by extra feeding at once. Uniformity in feeding is the most important point in wool growing. All good feeders know the effect of sudden change in feeding on wool, but it would be an interesting point to study the effect of yolk upon the wool during a period of poor feeding. An excessive amount of yolk might be supposed to furnish pabulum for the wool during this lack of full rations.

In many places milk is so valuable that it sends many calves to the butcher that should be saved for cows. With milk until it is a week old it may be largely dispensed with thereafter. We have found nothing better for young calves than finely-sifted oatmeal boiled into a thick porridge and diluted with water, and, if possible, a little milk. At two weeks also the calf will begin to nibble at clover hay, and a little should be given daily. Even when we have had plenty of skim milk we have sometimes economized in its use by feeding oatmeal in order to save the milk for fowls. There is nothing better at this season to make hens lay than wheat bran mixed with skim milk.

One important advantage in growing cows on a farm is that they lose nothing in becoming wonted to the place, will always eat well and be quiet. It is true the farmer can often buy cows cheaper than he can grow them, but he cannot be so sure of their quality as when he raises a heifer calf from a good milking strain on both sides. A heifer will pay her way and something more after she has her first calf, and for several years will increase in value, especially if she proves desirable as a cow.

An observing breeder of pigs has discovered that it is unsafe to allow them to run on sawdust. He lost some from causes that were not clear until a post mortem examination revealed that they had eaten sawdust enough to cause death.

A good cow should not be fat, even when not giving milk. Her sides should appear flat, but rather by the deepness of her body than by its narrowness. Her head should be small, neck thin and flat and chest deep. In a very young heifer it is impossible to decide what her bag and teats will be, but an animal that shows these points is worth saving and trying as a cow. One that has a round body and a coarse, bull-shaped head will be worth more for beef than for milk.

Mrs. E. M. Jones of Belvidere, Ontario, was in poor health a number of years ago, and her husband gave her a few Jersey cattle, on condition that she should superintend their care. From this small beginning she has become an enthusiastic Jersey breeder, her health is restored, and she warmly advises her lady friends to take the same course that has proved so successful with her.

Phil Sheridan, the sire of nine horses with records better than 2:30, including Adelaide and Phyllis, died at the home of his owner, Robert Dalzell, Washington, N. J., on February 27th. Phil Sheridan was by Young Columbus, out of Black Fly, a Canadian mare, by a two-year-old son of Tippeco. He made his first appearance on the turf in 1870, and obtained a record of 2:35, which he reduced to 2:26 in 1874, and in the fall of the year he forced Sunnigler to trot in 2:23 at Mystic Park, Boston, and won the second premium in that champion stallion race.

Chestnut horse, by FOSTER, he by Lexington.  
 First dam, Flush, by Hiawatha.  
 Second dam, Fanny Bang, by imp. Ambassador.  
 Third dam, Ida, by imp. Belshazzar.  
 Fourth dam, Madame Bostey, by Sir Richard Tonson.  
 Fifth dam, Nancy Nichol, by imp. Eagle.  
 Sixth dam, Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imp. Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imp. Silver Eye.  
 Eleventh dam, by Jolly Roger.  
 Twelfth dam, by imp. Partner.  
 Thirteenth dam, imp. Monkey.  
 Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.  
 At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN.  
 First dam, Fanny Felter, by Magnolia, son of Seely's American Star.  
 Second dam, by Webber's Kentucky Whip.  
 Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messenger.  
 At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.  
 First dam, Emma Kinkead, by Conscript, son of Cassius M. Clay.  
 Second dam, Elie Dean, by Mantrino Chief.  
 Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.  
 At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER.  
 First dam, by Washington, he by Geo. M. Patchen.  
 Second dam, by Williamson's Belmont.  
 At \$50 the season, due at time of service.  
 The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$8 per month after the season \$10 per month will be charged, but no responsibility for escape or accidents.

**John Mackey, Superintendent,**  
 Sacramento, Cal.

**THOROUGHBRED STALLION**

**X X,**

**Pedigree.**

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.  
 First dam, Columbia, by imp. Bonnie Scotland.  
 Second dam, Young Fashion, by imp. Monarch.  
 Third dam, Fashion, by imp. Trustee.  
 Fourth dam, Bonnets of Blue, by Sir Charles.  
 Fifth dam, Reathly, by Sir Archy.  
 Sixth dam, by imp. Medley.  
 Seventh dam, by imp. Centinel.  
 Eighth dam, by Mark Anthony.  
 Ninth dam, by imp. Jansie.  
 Tenth dam, by imp. Monkey.  
 Eleventh dam, by imp. Silvereye.  
 Twelfth dam, by Spanker.  
 See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 59.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imp. Bonnie Scotland, his dam Columbia, also by imp. Bonnie Scotland. Hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteeo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwalia, Bonnie Kate the dam of Bonnie Lizzie, Autos, Fockling, Thee Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario the dam of McWhirter, Bug-out, Lady Fairwell, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.  
 Will make the ensuing season, 1884, from February 15th to June 1st at the Oakland Trotting Park. Terms, \$50 the season.  
**JOSEPH CAIRN SIMPSON**  
 Oakland or 508 Montgomery Street, San Fran.

Distinguished Visitors at Belle Meade.

The Southern Immigration Association adjourned to visit Belle Meade, by invitation of the proprietor of that historic place.

Among others availing themselves of the opportunity were Gov. T. T. Crittenden, the distinguished and popular Chief Executive of Missouri; Gen. W. H. Sebring, of Florida; Col. Charles E. Hooper, of Mississippi; Col. Thos. Essex, of Arkansas, and Col. S. H. Nowlan of the same state.

The party arrived at the Belle Meade mansion about 4 o'clock P. M., and having met Gen. Jackson and lady, and the venerable but still active Gen. Harding for a few moments in a pleasant manner, time being short, the whole body of the visitors proceeded to the fields and stables under conduct of the accommodating and very hospitable proprietor. The first round taken was to examine the forty-nine thoroughbred yearling colts which are to be sold at the annual sales the 30th of next month. Gen Jackson's memory of pedigrees places the lineage of every animal on the place trippingly upon the end of his tongue, and the readiness with which he ran back upon the genealogies of Bramble, Lunke Blackhorn, Enquirer and Great Tom was the marvel of all present. Gen. Harding, though seventy-five years of age, accompanied the party in their rounds, and took as much delight in the gambols of Enquirer and Great Tom, who were turned loose by the grooms in their paddocks, as any man present. It struck the writer as being something remarkable to see a man of seventy-five looking at and enjoying the very supple caperings and elegant movements of a horse of fourteen years old. Enquirer, the celebrated beater of Longfellow, and the breaker of old man Harper's heart, is fourteen years old, and cost his present owner \$10,000, not very long since, and it was the same noble old horse prancing and capering about his grass lot, upon which Gen. Harding looked yesterday with almost youthful glee.

Returning to the house the party were introduced to a most lovely hevy of littlemisses, and, as usual, Gov. Crittenden's magnetism and handsome physique carried off all the favors. Mrs. Jackson's health was then heartily subscribed to in a parting glass, and the visitors bid their hospitable entertainer good-bye in time to reach the city by dark.

Mr. Bonner's Horsses.

Mr. Robert Bonner returned last Tuesday from his breeding-farm, where he had been making a visit of inspection. He informed a Herald reporter that he has found his horses in excellent condition, and had to report the first foal of the season, a colt by Eldridge, dam Lady Stont, the mare that startled the trotting world in 1874 by trotting a mile in 2:29 when three years old. Eldridge is one of the three sires kept at Mr. Bonner's farm, and is by Edward Everett out of the dam of Majolica. The other sires are Startle, the first horse to turn Fleetwood track in 2:19, and Anthonne, by Belmont, dam Miss Russell, the dam of Mand S. Among the long list of trotters on the farm are Manetta by Woodford Mambrino, who has trotted her mile in 2:16 1/2; Moley, with a public record of 2:21 1/2, and who has shown a trial in 2:18 3/4; Convoy, with a public record of 2:22 1/2; Maybird, 2:21; Mand Macy, who has shown a mile in 2:16 1/2. In addition to those named, there are many who have shown great speed, and others valuable for their choice breeding. At Mr. Bonner's town stable in Fifty-fifth street there are eight trotters located. Dexter looks as fresh and clean about the limbs as a three-year-old, although now twenty-six years of age. This winter he has not been driven on the road, but has only been given walking exercise. It is his owner's intention, however, to drive him as soon as the roads are in good condition. "I have also got Rarus," continued Mr. Bonner, "Edwin Forrest, whose mile to wagon in 2:14 has never been beaten; Pickard, Music, Keene Jim, a greatly improving horse; a young mare of rather strong breeding, being by the sire of Mand S. out of the dam of Jay-Eye-See; and the eighth and last is Schuyler. That is the horse that trotted to the half-mile at Fleetwood in 1:05 the day that Majolica made his record. It was to top wagon, and I think Schuyler the fastest horse of all I own or have seen for that distance. He cannot go the full mile, but for half a mile his speed is phenomenal."

John Wesley Johnson, colored, who died suddenly on the sidewalk of Park avenue on Thursday from a hemorrhage, was once well-known in turf circles. Over forty years ago he rode Black Maria to victory in a sixteen-mile race at Seldner's race-course on the Franklin Road, about six miles from the city. The contest was in four four-mile heats, and the excitement when Black Maria won, beating Trife and Collier, was tremendous. The day after Black Maria's victory Trife ran and won a match race with a horse called Scrimmers, and the day following that again Trife beat Black Maria in a four-mile race. A ball was given in honor of Black Maria in the old Assembly Rooms, and a large picture of the animal was chalked upon the dancing floor. Black Maria was owned by John C. Stevens of Hoboken, N. J., the owner of the yacht Maria, famous in its time.—Baltimore Sun.

Thoroughbred Short-Horns for the Musselshell.

[Rocky Mountain Husbandman.]

Mathew Ryan, of the firm of Ryan Bros., Leavenworth, Kan., writing from that city under date of March 2d, concludes his letter as follows:

"I am glad to know cattle has done so well on the Musselshell this winter. Will send out in April two hundred head of thoroughbred Shorthorn bulls to put with the cows there, as we want to bred up so Montana can show as good cattle as old Kentucky. There will be a good many Texas cattle go into Montana next summer. Stock cattle are very high here as well as there. I like your paper very much."

Mr. Ryan's herd ranges on the Musselshell, where the fall of snow has been light, and the cattle have, no doubt, come through in good condition. His stock were wintered on Snake river and driven to the Musselshell last summer. So far as we can learn it is the pilgrim cattle that arrived too late last year that have suffered most. His proposed addition of two hundred Shorthorn bulls will be a great acquisition to the Musselshell range.

Skylark, the well-known English race-horse for which J. L. Turner of St. Louis was in treaty will not come to America. Mr. Turner has received a reply from England that Lord Falmouth will not part with him at private sale, as he has not stated to the public that his entire stud will be offered at public auction.

Charles Wagner has recently refused \$10,000 for Phyllis, 2:17 1/2, from parties in New York, and a like offer was made by a gentleman in Canada.

There are now 119 horses that have scored records in 2:20 or better, twenty of which have trotted better than 2:17.

George Wilkes was the sire of four trotters with records below 2:20—Wilson, So So, Rosa Wilkes and Joe Bunker.

There will be over 800 entries at the Midsummer Meeting of the Chicago Driving Park.

BIRCHES WILKIND AND NOT WEAR CUT SOLD by watchmakers. By mail 25c. Circular free. J. S. Birch & Co., 28 Dey St., N. Y.

Thoroughbred

SETTER PUPPIES.

ENGLISH SETTERS, finest breed imported. Irish Setters, from Champion stock imported by R. W. Hill of Oregon. Pedigrees guaranteed. \$25.00 each at six weeks old. Apply to E. LEAVESLEY, Gilroy.

THE NEW ZEALAND Stud and Pedigree Stock Co.

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best hull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This hull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

Fastest Time on Record.

Martini-Henry, by Musket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41 1/2; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30 1/2, and beating a field of twenty-nine, thus lowering the previous best record of 3:30 1/2, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

P. H. BOURKE, Secretary,

Auckland, New Zealand.

The New Zealand Loan and Mercantile Agency Co., Limited.

412 California Street, San Francisco. HUGH CRAIG, Agent.

FOR SALE

DANVILLE MAID, dark brown mare, 15 hand and 4 inch high, six years old, by Speculation, dam by Niagara. A fine and fast roadster, sound, and of the best disposition. In foal to Belmor by Steinway. Also an eastern-made buggy and a Hill barness, nearly new and in complete order. Will be sold low, as the owner is about to leave for the East. Mare and other property can be seen on application to Bridge's Stable, 212 Sutter street, above Kearney.

Farmer and Dairyman.

A thoroughly instructed Farmer, having managed a large estate and made his Agricultural studies in Europe, wishes a situation as Superintendent of a first-class farm. Dairy matters a specialty. Highest references offered. Address L. K. Nevada Block, San Francisco.

G. F. WALTER, Sole Proprietor.

ADMISSION FREE.

**ATHLETICS.**

Athletes will be pleased to know that the track of the Olympic Grounds, Oakland, is to be put in order next week so that all may start in training for the opening meet of the season, to be held by the Olympic Club on Decoration Day, May 30th. The meeting this year will no doubt excel in merit, competition and attendance any athletic meeting ever held on the coast. Judging by the great number of new men who are going to take part in the different events, it will not be surprising if some latent talent is developed, particularly in the shorter races. It is a peculiar fact that nearly all men try sprint running on this coast, and as the competition is always a great deal more keen than in the longer races, this is a matter to be wondered at. There is a great opening at our meetings for well-trained men at long distances.

It was announced in the Australian papers that Joseph O'Brien would attempt to run against all previous records from 1 to 10 miles on March 17th at Melbourne, Australia.

On a fifth of a mile gravel track O'Brien made a mile in 4 minutes 18 1/2 seconds, running through a large field of competitors, and the Melbourne Sportsman claims that he ran a three-quarters of a mile race in 3 minutes, but the track must have been short as the time is altogether too fast. At any rate, O'Brien is a wonderful runner, and there is every reason to believe that on a good track and under favorable circumstances he can beat Cummings' record of 4:16 1-5 for 1 mile.

On February 16th, at Sydney, Australia, J. W. Byrne cleared, with apparent ease, the great height of 5 feet 3 inches in a standing high jump in a match against J. A. Byrne. This performance is tie with the best previous record, and which was made by E. W. Johnston in Baltimore, May 27th, 1878. In another match, the week following this event, Byrne essayed to beat the record, but owing to a severe strain he did not jump up to his record of the previous week.

The only two football matches played this season have been won by the University team. No doubt the other clubs are beginning to find out that they cannot defeat the University without a great amount of practice, and as they do not particularly care to practice there would appear little hope of any more games this season.

T. M. Malone, the once famous amateur runner of Ireland, is now a professional runner in Australia. Malone defeated Myers in the great international race at Birmingham, England, 1881, after an exciting finish by one-half a yard, and was the first amateur that ran even time for 120 yards.

The professional events held at the Recreation Grounds last Sunday were all very uninteresting, the time in all cases being slow, and the competitors were very unevenly matched.

Weston completed his 5,000-mile walk on March 15th. The last mile was made in 9 minutes 17 seconds, and which was the quickest mile in the whole walk.

At a football match in England between two schools S. Brutton, fourteen years old, kicked thirteen goals out of fourteen attempts.

J. Robinson defeated R. Ashworth in a 150-yards foot-race at Bathurst, Australia, for \$500 a side, in the alleged fast time of 14 4-5 seconds.

A. E. Nuttall and T. H. Mersh both cleared 5 feet 7 1/2 inches running high jump at the Cambridge Sports, March 3d.

**National Cross-Country Championship.**

The eighth annual contest was held at Four Oak Park, near Birmingham, Eng., March 1st, and resulted in the victory of the Mosely Harriers' defeating Buchfield Harriers, South London Harriers, Cheshire Tally-ho Hareand Hounds, and the Small Heath Harriers. This is the fourth year running that the Mosely Harriers have carried off this championship. W. G. George was the first home in 64 minutes 47 seconds, and was followed a minute later by his club-mate Carter.

**BILLIARDS.**

An interesting game of three-ball billiards was played a few days since at the Palace hotel, the contestants being Mme. Adelina Patti and Signor Nicolini, and it is absolutely as that gentleman expressed himself in regard to his opponent, "She has a genius for everything." The game has few intricacies Madame cannot master, and after winning the lead-off she continued to play with that perfect grace she displays all her undertakings on and off the stage. In the third inning Mme. Patti, after making a couple of caroms, with a delicate draw shot succeeded in cornering the balls by driving the first object one the whole length of the table, making it return almost dead to the lower rail. After this masterly stroke on the part of a lady she turned to her adversary, her large eyes fairly sparkling with pleasure, and said: "I will surely win now," and her confidence was not amiss.

As the time rolled on so did the score, the run netting her 17 points, the largest that lady has ever completed. M. Nicolini held his own from this on, but Madame with runs of 3, 5 and 8, and very few misses, managed to reach her fiftieth point and game, leaving him with only 41 points to his credit. Madame Patti is a great lover of this game, and frequently practices until the small hours in the morning after coming from the opera, and she never misses an occasion to do so between visits during the day.

The billiard table on which the game took place is situated in a room adjoining Madame's parlor, which is ornamented with the necessary racks, cues, markers, etc. The table itself is of a small pattern of the Brunswick make, and Mr. Nicolini says that if it were possible to have an addition to the bondoir car he would take it along to relieve the monotony of the travel across the continent.

Jacob Strahle & Co. have offered a purse of \$50 to be played for this evening by Benjamin Saylor and J. F. B. McCleery. It is very probable that now that the Saylor Brothers are no longer restrained by feelings of delicacy that stopped them from accepting McCleery's bets during the last game they played will come forward in side issues on the result of this game. Of course, McCleery then could have no excuse of a lack of interest in the play.

The game between W. R. F. Lowry and McCleery, which took place in the first part of the week, in Watsonville, was won by the latter, the score standing 400 to 395. Winners average 10 1/2.

Billiards in all the hotels except the Occidental seem to have taken a little livelier turn within the last few days.

The Chico Record quotes Charley Sherman as saying that he did not think there would be any spring meeting at Chico this year.

**THE KENNEL.**

**Visits.**

To Fred. A. Taft's Gordon setter Dorr. January 14th, 1884, Gordon bitch owned by F. W. Dunn of Battle Mountain, Nev.

February 28th, 1884, English setter bitch Queen, owned by A. E. Brown of Rocklin, Cal.

March 24th, 1884, Irish setter bitch Daisy, owned by E. J. Heins, of Carlin, Nev.

Mr. Neil's splendid Irish red setter bitch Lena whelped twelve puppies on 22d inst, by his dog Pet O'More, which with Lena he recently imported from a celebrated eastern kennel. There were five bitches and seven dogs in the litter. Four of the former were drowned, Mr. Neil keeping only one for his own kennel. There are, perhaps, no better bred dogs in the State than the sire and dam of these puppies. Mr. Neil is a young enthusiast in thoroughbred dogs. In forming a kennel which he intends at a later date to make prominent, he has commenced well. We hope he will have good luck in raising this first and fine litter. They are all beauties.

Mr. Jones of this city, who recently imported a brace of pure English spaniels, we understand, has been out on an extended hunt in Humboldt county to try them, and returns thoroughly satisfied with the work that they performed. We are endeavoring to obtain the pedigree of these spaniels. Some day before long the spaniel in California, as in England, will become a great favorite with gun men. It only needs his many good qualities to become known. There is no more keen, enduring, faithful or attractive dog.

A number of dogs have been poisoned in St. Helena and vicinity in the last few days, no less than a half dozen dying from the effects of the fatal dose. Some of the dogs were quite valuable. We should like to know whether this comes from carelessness in some or villainy in others.

Farriers will please notice an advertisement of a red Irish setter pup for sale in another column.

**MONMOUTH PARK.**

Long Branch, New Jersey,

The Following Stake is Now Open.

THE CHAMPION STALLION STAKES for 1885, for colts and fillies 1 & 2 years old (now yearlings), to be entered at the course by 1 o'clock P. M. on the day before the day appointed for the race, of \$250 each, with \$5,000 added by the Monmouth Park Association to a subscription of \$500 each by owners of stallions, whose get alone shall be qualified to start; the second horse and the subscribing owner of his sire each to receive \$1,000; the third horse and the subscribing owner of his sire each to receive \$500; the winner to receive the stakes of horses entered for the race, and one-half of the money remaining after the foregoing deductions; the other half to go to the subscribing owner of the sire of the winner; the death of a subscriber not to disqualify the get of this stallion, if the subscription be paid; each nomination to be accompanied by a contract in the form subjoined, which, if not fulfilled punctually by the subscriber, may be transferred to and fulfilled by any owner or owners entering in the race the get of the stallion, and such owner or owners shall in that case be entitled to start and to the benefit accruing to the subscriber from first, second or third place in the race, and to recover from him the money contracted to be paid, if no benefit accrues; fifteen subscriptions to fill. Three-quarters of a mile.

**Form of Contract.**

In consideration of the money to be added by the Monmouth Park Association to the Champion Stallion Stakes for 1885, and in further consideration of the increased value given to the get of (my Stallion) by the right of entry therein, which right of entry is not to be invalidated by (my) decease, (I) agree to pay to the Monmouth Park Association, or order, five hundred dollars on the first day of July, 1885, at its office in the city of New York. The subscription of stallions to the above stakes will close and name on April 1st, 1884. Subscriptions to be addressed to J. H. Coster, Secretary Monmouth Park Association, Madison Avenue and Twenty-seventh Street, New York.

Mr. Lorillard continues his gift of \$5,000 to the Lorillard Stakes. The Champion Stallion Stakes and the Lorillard Stakes are intended to be permanent.

The Lorillard Stakes for 1886, with the following conditions, will close and name on August 15th, 1884.

The Lorillard Stakes for 1886, for three-year-olds, of \$500 each, h. f., or only \$10 if declared by January 1st, 1885; or \$50 if declared by January 1st, 1886; or \$100 if declared by June 25th, 1886; with \$5,000 given by Mr. Pierre Lorillard; the Association to add \$1,000 for the second; the third to save his stake; horses foaled in the United States are not eligible for this stake unless sired in a foreign country, or by a stallion represented by subscription to the Champion Stallion Stakes for 1885. One mile and a half.

GEORGE L. LORILLARD, President.

J. H. COSTER, Secretary.

**TROTTING STALLIONS.**

**THE TROTTING STALLION**

**SILVERHEEL**

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh Street, between Franklin and Webster streets, Oakland.

Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan; grandam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2-40 gait when two years old.

Logan by Ryedyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

With little training when four years old, Silverheel showed three heats inside of 2:40.

**TERMS.**

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKBIDER & CHISHOLM.

Standard Trotting Stallion

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

The Almont Stallion

**ALTOONA,**

BY ALMONT; first dam Therea B., by Prophet, Jr.; second dam Molly Ford, by Mohawk; third dam, by Davy Crockett, a Canadian pacer; fourth dam Puss, a fine road mare imported from Canada. Prophet, Jr., by Prophet, son of Hill's Vermont Black Hawk.

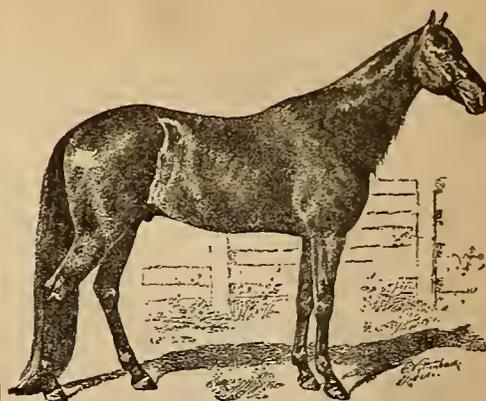

Altoona was bred by Gen. W. T. Withers, of Fairlawn, is a dark bay, a little over fifteen and three-quarters hands, of high form and breeding.

He will make the season of 1884, ending July 1st, at the ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

Terms, \$50 for the season, due on or before July 1st. For further information apply to or address

A. H. HEXOX, ALMONT STABLES, 1352 San Pablo Avenue, Oakland.

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino; his dam Columbia, by Young Columbus Woodford Mambrino; by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, dam of Wedgewood, 2:13; by Woodford, son of Kosciusko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/4. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/4; Manetta 2:19 1/4; Mambrino Dudley 2:22; Convor 2:22 1/4; Magenta 2:24 1/4; Manfred 2:25; Pancoast 2:25 1/4; Rachel 2:25 1/4; Inca 2:27; Lady McFarriage 2:29; Dacia 2:29 1/4; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:34. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,330 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:29 1/4; Commonwealth 2:32; Hiram Woodruff 2:35; Valley Chief 2:35; Faustina 2:35 1/4; Phil Sheridan, Jr., 2:39 1/4; Tom Malloy 2:36.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent, San Mateo, Cal.

The Trotting Stallions

**Baywood and Fleetwood**

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover. Sired by Nutwood, first dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky.

Terms, \$25 for the season, or \$40 to insure.

E. S. SMITH, San Jose.

The Trotting-Bred Stallion

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, six-sixteen, and a high level head, and weighs over 1,200 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Patchen full brother of Lady Thorn, record 2:18 1/4, sire of Katie Middleton, 2:25, and also in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young America Plot, Jr., brother in blood to the sire of the dam of Maud S. A. T. Stewart was bred by Mambrino Patchen, sire of Mambrino Chief, he by Mambrino Chief, and he by Mambrino, thoroughbred-son of imported Mambrino.

Terms for the season, \$30.

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

**Description.**

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 29th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

**Terms.**

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.**  
**W. L. DONATHAN, Agent.**

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:29 1/2, without a skip.

**Breeding.**

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

**FRED ARNOLD,**  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2, and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24 1/2, and full sister in blood to dam of Fawn, record 2:30 1/2), by Flaxhall, granddam by son of Tally Ho Morgan, great granddam by Irwin's Tuckahoe, great great granddam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.  
**M. W. HICKS,**  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

**Terms.**

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

**Pedigree and Description.**

Stanford was bred by George Fryler, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.

Dam of Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred, Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,**  
Agent.

Oakland, January 18, 1884.

### The Trotting Stallions

## DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

**TERMS.**

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

**Director, 2:17.**

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2; first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:22 1/2), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wilmar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

**Monroe Chief, 2:18 1-4.**

Two-mile record, 4:45.

Brown horse, foaled 1879, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the thirty number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

**JOHN A. GOLDSMITH,**  
OAKLAND TROTTING PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Peniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

**Terms.**

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

**J. B. McDONALD.**  
February 23, 1884.

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cain Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Mouchar.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bonnets of Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silver.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

**TERMS.**

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteoo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent.**  
Santa Rosa.

## MAMBRINO WILKES.

**PALM STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES,** son of Rysdyk's Hambletonian, bred by E. J. Greacy of Fayette County, Kentucky. Dam Lady Christiana by Toddhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Toddhunter's Mambrino son of Mambrino Chief, his dam Rippton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several important crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 37 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 2 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this present sire.

Will make the ensuing season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near I.O.D.I.

**TERMS.**

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

**A. L. HINDS, Agent.**

### The Trotting Stallion

## STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25 1/2.

**Terms.**

He will serve mares the present season, commencing February 1st, and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of Mc Cleverly & Nohlet, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Haywards, will be forwarded immediately to the farm.

**Description.**

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

**Pedigree.**

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertram, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Naunie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlan, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belton, who trotted a mile in 2:52 at fifteen months old. Belton trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Gouverneur Sprague, record 2:24; and he got Kate Sprague, record 2:18. The dam of Scott's Thoms, record 2:21, and Scott's Chief, record 2:25, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

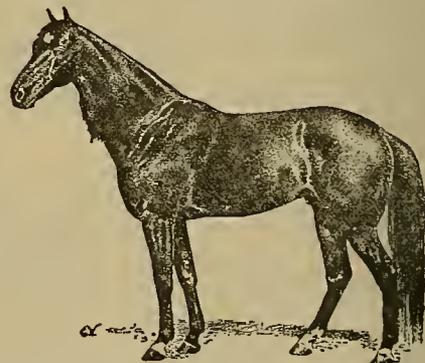

**Performances.**

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbera, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento, 2:31 1/2. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2. Steinway winning fourth, fifth and sixth heats, beating Jewett, Cahaly and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:24 1/2, but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

Address

**GEORGE WILEY,**  
Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

**PEDIGREE.**

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Basiris, thoroughbred (No. 378). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44 1/2) by Flaxhall, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, granddam by Lefler's Consul, by Schepper's son, Cahaly and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Dioned.

## LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks and foaled in 1879. La Harpe was sired by Fame, he by Alexander's Belmont (sire of Nutwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino Chief, sire of Fame. Fame's dam Glory by Jackson's Western Star (son of Platt's Western Star by Blacknose). 1st dam by Bonner's, 2nd dam by Galatin (1843). La Harpe's dam Prairie Bird by Flaxhall (dam of Flight, 2:23, and Freedom, 2:30). 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Lefler's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Dioned.

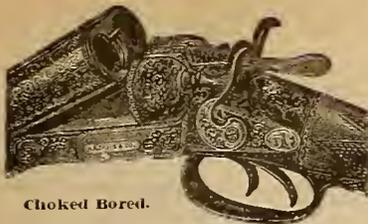

**TERMS.**

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

Sportsmen & Pleasure-Seekers.

THE SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for

Sea Bathing, Shooting and Fishing.

TRAINS LEAVE SAN FRANCISCO DAILY FOR

MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Poupino, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains

SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with

ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SEQUEL AND SANTA CRUZ.

IS VIA THE

Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety, notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Retreats, PURVISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited extent of range at and about SAN BRUNO and McMAILLON'S for RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

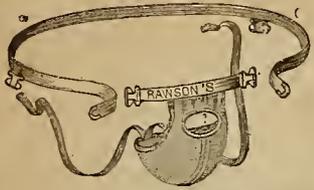

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

For in order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing tackle will be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.

Sprung Knees

Cockled-Ankles

Which does not blister nor interfere with the horse's work. It strengthens the joints and tendons, restoring the limbs to their normal condition. Has cured many cases of chronic lameness and muscular rheumatism after other treatment had failed.

Testimonials:

From O. A. Hickok, Esq., San Francisco, Cal., June 8, 1881. I can with confidence recommend Sparkhall's Specific to any one owning a knee-sprung or cockled-ankled horse, being fully convinced that it will cure those deformities without injury to the animal.

From Hon. C. M. Pond, Breeder of the celebrated trotter "Clingstone." Hartford, Conn., March 29, 1882. This may certify that I have used Sparkhall's Specific in my stables, and consider it an extraordinary remedy, accomplishing in most cases all that is claimed for it.

The Specific is sold in quart bottles—price, \$2.00, by WAKELEE & CO., Montgomery and Bush Sts., under Occidental Hotel, San Francisco.

ASHLAND PARK TROTTER STUD

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Baisora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2-17yl B. J. TREACY, Lexington, Ky.

WHOLESALE AND RETAIL dealer in Harness, Saddles, Blankets, English Race Goods, And everything necessary for horse or carriage use.

Horse Boots a Specialty.

Agent for Dr. Dixon's Condition Powders. Repairing promptly attended to.

DIETZ'S PATENT

CHECK HOOK.

Simple in its Structure and Practical in its Use.

The horse never loosens the check-rein when this Check Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind.

There being no springs or hinges to break connected with it, makes it serviceable and easily appended, as the check-rein passes through a solid ring attached to the front of the hook.

Orders sent to A. C. DIETZ, No. 9 Front St., San Francisco, Cal.

Will receive prompt attention. When ordering state whether gold or silver plate required.

IN THE STUD.

Gordon Setter "D O R R."

Six years old, V. H. C., and winner of medal and special money prize at Boston as a performing dog. Winner in Nebraska field trials, and winner of first prize Pacific Coast field trials, also winner of second prize as a Gordon, and first as the best performing dog at San Francisco, 1883. Fee, \$25.

FAIRLAWN, 1884.

TENTH ANNUAL CATALOGUE Now ready for distribution. Contains descriptions and pedigrees of 250 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

25 HIGHLY-BRED BROOD-MARES, Bred to the Fairlawn Stallions, and

130 HEAD OF VERY PROMISING YOUNG STOCK, Consisting of Young Stallions, Fillies and Roadsters, are offered at Private Sale.

THE ONE PRICE PLAN

Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are ALMONT 33.

Represented in the 230 list by 24 performers, with records ranging from 2:15 1/2 to 2:30. Limited to 20-approved mares at \$300 the season.

HAPPY MEDIUM 400. Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

ABERDEEN 27. Having ten of his get with records ranging from 2:15 1/2 to 2:27 1/2. Limited to 40 mares at \$150 the season.

ALECTO 2548. By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

STARMTON 1526. By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion. The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 230 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. For further information, and catalogues containing full particulars, address

WM. T. WITHERS, Lexington, Ky. Lock Box 392.

# BREEDER AND SPORTSMAN

Vol. IV. No. 11.  
NO. 508 MONTGOMERY STREET.

SAN FRANCISCO, SATURDAY, APRIL 5, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

JOE HOOKER.

Joe Hooker, chestnut horse, foaled 1872; bred by A. Mailiard, Marin county, California, by Monday.  
 First dam, Mayflower, by imported Eclipse.  
 Second dam, Hennie Farrow, by imported Shamrock.  
 Third dam, Ida, by imported Belshazzar.  
 Fourth dam, Gamma's dam (Mad. Bosley), by Sir Richard.  
 Fifth dam, by imported Eagle.  
 Sixth dam, Bet Bosley, by Wilkes' Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by imported Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by imported Silvereye.  
 Eleventh dam, by imported Jolly Roger.  
 Twelfth dam, by Partner.  
 Thirteenth dam, by imported Monkey.

Fourteenth dam, imported mare from stud of Harrison, of Brandon.  
 To those who are well up in the genealogy in race-horses this is sufficient, but it does not tell the whole story only to the few. It is a rare combination of the best blood, Monday by Colton, his dam Mollie Jackson by Vandal, and the second dam Emma Wright by imported Margrave. Colton by Lexington, his dam Topaz by imported Glencoe, second dam Emerald by imported Leviathan, and the third the imported mare Eliza by Reubens. Imported Eclipse by Orlando, his dam Gaze by Bay Middleton, second dam Flycatcher by Godolphin, and the third the sister to Cobweb by Phantom. This is one of the best pedigrees in either country, and the descendants of Prunella by Highflyer have been the star performers of nearly every era. Orlando was by Touchetone

from Vulture by Langar. Then the second dam of Joe Hooker is Hennie Farrow, the dam of Privateer, Shannon, Mollie McCarthy, Ralston, Flood, Electra, etc.; Mayflower was also the dam of California and Warwick. The sire of Hennie Farrow was imported Shamrock, and her dam Ida by imported Belshazzar.

To present a little of the claims these animals have would require chapters, and these condensed into so little space as would not do justice to their merits, embracing so many of the late celebrities on the turf and in the stud, and these backed by the stoutest and speediest of the old-time strains. When Mr. Winters first got Hooker he bred him to four mares and sent him to his ranch in the upper country. Every one of these colts could run, and as has been stated before there never was one of his colts trained that had not a fine turn of speed.

## John S. Prince.

Of the many professionals of the various forms of athletics who have appeared among us, few have made for themselves so enviable a name for genuine ability and manly qualities as the subject of this sketch. Physically of a powerful mold, years of activity in his chosen profession have developed him into a fine specimen of manhood. His correct personal conduct and candid, genial manner have been a passport to the respect of all classes of our citizens. He has been an athlete from boyhood, having been a professional cricket player of acknowledged ability when seventeen years of age. Three years later he transferred his affections to the silent wheel, and from that time to the present his career has been one of continued success. He won the first race he started for, and after proving his superiority by defeating the best men in England, he migrated to the United States in 1881 and expects to remain here for the rest of his life. He has beaten all comers in this country except in a few instances where circumstances were unfavorable. He defeated Rollinson five times for the championship. He has repeatedly beaten Woodside champion of Ireland, and Morgan champion of Canada, and is open to run them any day in the year. As he holds nearly all the professional records from one mile to one hundred, and never was so full of vigor and "speed" as now, he would be more than pleased to meet either or both of them. Prince began his American career in Boston, where he created a lively interest in wheeling, and conducted a flourishing school for bicycle instruction until the attractions of the arena induced him to travel. He trained Hendee for his great races at Springfield, and predicted his victory over Robinson, as he early recognized in Hendee a rider who would become famous in bicycle annals if he persevered. Prince established himself in the good graces of the Bostonians, and has had several urgent requests to return there and train the candidates for bicycle honors in the coming inter-collegiate meeting. As a rider, Prince is graceful and steady, with great powers of endurance, and a marked ability to spurt quickly and fast. As a man he is affable, honest and unobtrusive, an every-day acquaintance in disposition, a gentleman always. He once ran a six-day race against horses, in Boston, and was beaten, the score being 736 miles for the horses to 717 for the wheelmen. This was Prince's first attempt at this style of race, and he knows now that he did not do himself justice. He ran a six-day race in Chicago, against men, which he won with a score of 889 miles, Morgan second, and Woodside third; but ever since that Boston affair he has been fighting for vengeance on the horse. His first demonstration after his arrival in San Francisco was aimed at our California mustangs, which he had heard were the toughest in the world, and that was the sort he was looking for. He has made a series of races that promise to give him plenty of the severest kind of work. He rides to-day (Saturday) at San Jose against a stout road horse, ten miles out, and hopes to win. To-morrow (Sunday) he will ride his wheel twenty miles against a trotter at Oakland Park, and on the 16th inst. he will begin a seventy-two hour race against Anderson, the famous long distance rider at the Mechanics Pavilion. Anderson will have fifteen horses and Prince will be relieved by Armaido, who will take his place every alternate hour. From Anderson's experience in long distance racing and his knowledge of the sort of horses required it is almost a certainty that all former records will be left far in the rear. Prince will depart for the east soon after the finish of the race to attend to his summer engagements there.

A ladies' tricycle club was organized last month in New York. The officers are Mrs. Fred G. Bourne, president; Mrs. Elliot Mason, vice-president; Miss Anna Babetta-Huss, secretary and treasurer. The club which numbers 10 members have secured club rooms. This is the first ladies' tricycle club formed in America.

President Hodges, of the Boston Bicycle Club, left Boston yesterday week for a trip to California. He is accompanied by Louis R. Harrison.

T. W. Eck offers to run any wheelman in America, except Prince and Higham, five miles, for any reasonable stake.

In the cup at Louisville Harry Gilmore is still the money favorite in spite of the favorable reports from Leonatus. If the latter famous horse does come to a race this spring, the Merchants or Turf is more likely to be his effort than a bruising race over two miles and a quarter for a first effort. George Rice, the trainer of Harry Gilmore, and his friends are very confident of the chances of the son of Buckden, and the "Count," a short time since, put \$200 on with Riley of Chicago at 6 to 1. Certainly his Garden City Cup last year in 4:04, beating Lida Stanhope, John Davis and others, looks like winning form for the Louisville Cup of this year. Wallace and Arcino are the best liked of the others, judging by market movements, the St. Louis pair, Davis and April Fool, not being in quite such good favor.

The first of old Glenmore's get was dropped at the farm of Mr. Wm. Jennings in Maryland last week. It was a chestnut filly out of Slipper Dance, by War Dance out of Slipper (dam of Loug Taw), by Planet. There are other mares in foal to the renowned chestnut.

## Licensing Jockeys.

[N. Y. Spirit.]

Prominent members of the American Jockey Club are seriously agitating the expediency of adopting a new rule similar to that enforced in England, compelling jockeys to take out a license to ride at the beginning of each successive racing season. The English rule, which forms part of Rule 54 of the Rules of Racing, reads as follows:

No jockey shall ride in races on Newmarket Heath, or elsewhere where these rules are in force, until he shall have obtained a license from the Stewards of the Jockey Club, on application at the Registry Office, but no rider will be required to take out a license until the last day of the week in which he shall have ridden a winner for the first time.

Every jockey shall, on application for a license, furnish Messrs. Weatherby with his full name and address. A list of the licensed jockeys shall be published annually in the "Racing Calendar."

Any rider who shall infringe these rules will be reported to the Stewards of the Jockey Club, who may suspend him from riding.

Any owner or trainer, or both, who shall knowingly employ an unlicensed jockey, shall be fined not less than £25 each.

The arguments advanced by those favoring the adoption of this rule, or one embodying its provisions, are that it will have a tendency

would be easier than to refuse him a license upon his application the following season. This would make the Jockey Club master of the position, for jockeys could only follow their calling at the pleasure of the Jockey Club, which could snuff itself in the matter.

But we are mistaken if such a measure as that proposed has any likelihood of adoption during the present season. The chief difficulty lies in the want of officials who will sufficiently interest themselves, and another obstacle is the want of concerted action on the part of the jockey clubs. In England the case is very different, for there all the meetings of importance are under the jurisdiction of the jockey club. Here there is too great a conflict of interests and conflict of authority, for while, as a rule, there has been a sort of reciprocity in regard to forfeits and disciplinary measures, it exists only by courtesy, and is not mandatory upon the different clubs. Some time since we questioned Mr. Withers in regard to the probability of the adoption of the rule, when he stated these facts, and while impressed by the value of the proposed rule, feared that in consequence its adoption was unlikely. Mr. Withers stated that himself and those associated with him in racing could speak but for two clubs, the American Jockey Club and the Mounouth Park Association. The Coney Island Club might ratify their action, but he had no assurance that it would. Allowing that it did, there would be but three clubs out of the score of similar or-

## John Splan's String.

John Splan has the Kittson group of horses at Cincinnati. One day last week, says the Cincinnati News-Journal, a countryman saw a dark bay horse in the yard of Splan's stable and said: "That 'ere hoss has the makings of a darned clever buggy animal, and I think I could gin \$150 for him."

This last remark settled Splan. It caused a rupture in his heart large enough to allow the passage of a load of hay through it. "Well, blast your buttons! Do you know that horse?" "Can't say that I do," retorted the buccolic. "That, sir, is Johnston, the greatest pacer in this country. He has covered a mile in 2:10—the best time on record." "Oh, say, Cannel, that's all right. Perhaps you can force that down some people's gizzards, but I'm out of the question. I suppose that 'ere old gray draught horse over there could beat Dexter, couldn't he, too? I hain't got much money, but I'll bet \$25 that both of them 'ere horses are driv on milk wagons." The mention of the gray brought poor Dnnn into the altercation, and the fact that Cincinnati's favorite (Joe Bunker) should be thus maligned caused the latter to shed tears, and, gathering the countryman by the horny fist paw, he said: "Stranger, you may know all about pumpkins and radishes, but you are off on horses. I'll take you over to a place where you can buy a green mare for \$10 that you might use as a 'buggy animal.'" And Dunu and his new-made friend started for Maud S.'s quarters.

"So that's Johnston, is it? Small, isn't he?"

"No, he is about medium, but one of the cleverest horses I ever handled."

"What will be done with him this season?"

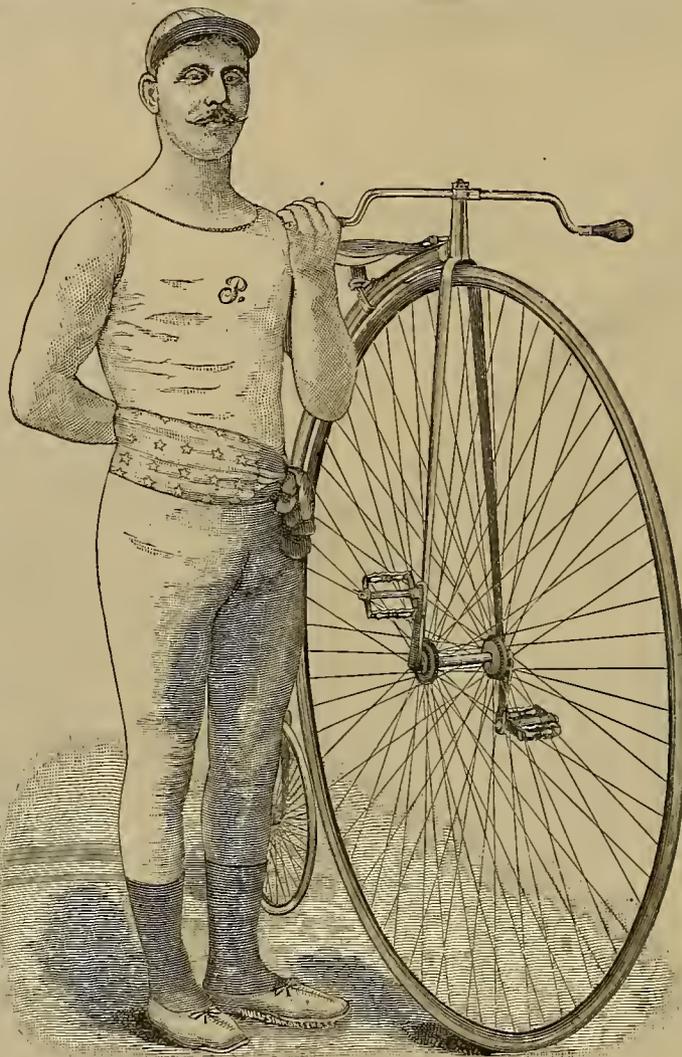

"Well, Mr. Woodmansee, who manages Mr. Kittson's horses, has had a great deal of correspondence in regard to pacing him on exhibition, and it is about decided that that will be his summer's work. There has been a great deal of talk about matching him against Rich Rall for \$10,000, but there is nothing in that. Mr. Woodmansee, having already given his word to exhibit him, could not very well throw up those engagements to devote his time to one race. Still we do not feel at all afraid of any horse in the world, and I am confident that he is the greatest of them all. Another thing that leads us to pace him against time is that Mr. Robert Bonner, who has had Little Brown Jug—up to last year the fastest pacer in the country—in his care all winter, believes that his lameness, which was in his feet, is all gone, and if so we will put him in the free-for-all pace. If he is himself I shall keep all those other sidewheelers well to their work. Then we have Gem, who has paced a mile in 2:13, to start in the same race if Jug is off."

"How much of a string will you have this season?"

"I have here, in addition to Gem and Johnston, Minnie R., record 2:19; the stallion Von Arnim, 2:19; Fannie Witherspoon, 2:17, and Pilgrim, an untried stallion, for whom Commodore paid \$13,000. This is quite a stable, as you can see. If Witherspoon had Von Arnim's head she'd be the greatest mare in the world."

The Rocky Mountain Husbandman is quite enthusiastic over the horse outlook in that territory. It says: Our trotting-bred horse interest of Montana is fast coming to the front. We have a number of intelligent breeders devoting their time and ample means to it who may yet be expected to contribute many promising youngsters to the charmed 2:30 list, and furnish many gentlemen of leisure hack east with a stepper or team that will carry them to the front while on the road. There is no longer doubt about our pure water, pure air, strengthening hunch grass, dry and limestone soil producing horses second to none. By natural exercise on our hillsides their muscles will be developed, and by running on our dry ranges their hoofs will be hard, and a flat, soft foot will never be found or heard of. To take in sufficient of our very light atmosphere their lungs must naturally be expanded and their nostrils large. To build upon we already have nearly every fashionable family represented, and good individual stock horses from nearly every leading stallion in the states. We boast of horses in our studs by such sires as Old Volunteer, Mambrino Patchen, George Wilkes, Cuyler, Gen. Knox, Indianapolis, Victor Von Bismarck, Messenger Duroc, Almont, Belmont and Dictator, besides youngsters from many other good sires not so well or favorably known. All we ask to prove our assertion is a few years to develop the youngsters.

Commodore Kittson's chestnut colt Sir Hercules, two years, by Alarm—Susan Beane, died at Jerome Park on the 25th of March. His loss following so closely upon that of his dam is a severe blow to the hopes of Commodore Kittson and Major Hubbard, who regarded the colt as the apple of his eye. He was a rich golden chestnut, with the family blaze and white feet, and although he resembled his dam in color he had none of her raggedness but had the rotundity of his sire, and was a colt of faultless action and high promise. On the 26th the stable met with another loss in the two-year-old half-brother to Spinaway known as Sibley, being by Reform out of Megara, by imported Eclipse. Like Sir Hercules, Sibley was very promising and was heavily engaged.

to check fraud, if not to render it impossible. They hold that under our present rules fraud may ride triumphant over every course unless the judges are in possession of positive proof, which is seldom the case. The judges may have a moral conviction that a jockey has prevented a horse from winning by pulling him or otherwise, but they are powerless to interfere, unless they have proof that he did so, and such proof is seldom forthcoming. His fellow villains are not going to expose him, and unless he pulls the horse so openly as to remove all doubt, the case is one which cannot be reached. People may talk as they will, but he can stand that; his purpose is to keep the judges off him. It is held that an artistic jockey, who is able to pull a horse so expertly as to escape detection, and secure from impeachment among his clique, is thus enabled to defy all reformatory or disciplinary action on the part of the Jockey Club officials. The promoters of the new law claim for it that it will successfully combat this abuse and kill it. As it is, rning off is the only method of punishment, but, as has been repeatedly stated above, it is impossible to rule a jockey off unless there exists some tangible proof. You cannot rule him off on mere suspicion, however well founded that suspicion may be. But under the license system the Jockey Club would have matters in its own hands. If a jockey was suspected of wrong-doing, nothing

organizations in the country, and the singular spectacle would be presented of a jockey outlawed at these meetings riding unrestrained at the others. Again, Mr. Withers claims that a very different state of affairs exist in this country as compared to England in respect to the jockey club officials. There the stewards, who have sole power, are either noblemen or gentlemen of wealth and leisure. To them racing is a pleasure, to which, having abundant time, they can devote it, but here our racing men are preoccupied. Nearly all of them are engaged in business; racing is merely a recreation, and they have no leisure to devote to its legislation, nor have they the inclination. Here the matter stands, and, to say the least, it is to be regretted that a piece of legislation so appropriate and important should suffer neglect, for, while we could vainly hope that the jockey club will not be ultimately driven to it, we have our own fears that such will be the case, and its prompt adoption now would be of a nature so admonitory as to check the evil which, sooner or later, must provoke prompt action.

In the list of distinguished trotting representatives, Volunteer, thirty years, is the oldest living stallion; Lucy, twenty-eight years, the oldest mare, and Dexter, twenty-six years, the oldest gelding.

**TURF AND TRACK.**

**Entries at Oakland Park.**

The entries for the meeting to be given at Oakland Park by M. M. Allen, commencing on the 26th inst., closed with the following nominations.

- No. 1. Ferry Stake—For two-year-olds; half a mile. Did not fill.

- No. 13. Selling Purse—Did not fill. Trotting races will be substituted for the numbers that failed to fill.

**The National Trotting Association Incorporated.**

The General Assembly of the State of Connecticut has granted the following charter:

Section 1. That James Grant, William S. Tilton, George Sturges, John Shepard, George M. Stearns, Lewis J. Powers and Thomas J. Vail, together with such other persons, corporations, associations and organizations as shall hereafter become associated with them as members, their successors and assigns forever, be and they are hereby created and made a body politic and corporate by the name of the National Trotting Association.

Sec. 2. The object of said corporation shall be the improvement of the breed and the development of horses by the promotion of the interests of the American trotting turf, the prevention, detection and punishment of frauds thereon, and uniformity in the government and rules of trotting and pacing. And for those purposes it shall have power to make all needful contracts and agreements, and all necessary by-laws, rules and regulations not inconsistent with the laws of this State, and enforce them by fines and penalties, which it shall have the right to collect or enforce by suit or by suspension, or expulsion from the membership or privileges of said corporation or of any of its members; and it may hold and own personal property or real estate necessary for or incidental to the above purposes, not exceeding at any one time the sum of \$100,000, and shall have power to sue and be sued.

Sec. 3. Said Thomas J. Vail may call a meeting of said corporators hereinbefore named by giving a written notice of the time and place of said meeting, by mail, to each of them at least fifteen days before the time of said meeting, at which meeting a majority shall be a quorum, and whenever a certificate of the acceptance of this charter, signed by a majority of said specified corporators, shall be filed in the office of the Secretary of State, said corporation shall have authority to perform all acts authorized by this charter. Said corporators at said meeting or any adjournments thereof may choose proper officers, pass and enact the rules, regulations and by-laws hereinbefore authorized, and elect or admit and provide for the future admission of all such additional members of such corporation as they may think fit.

Sec. 4. The office of said corporation shall be at Hartford, in this State. It shall be lawful to hold meetings of said corporation elsewhere than in the State of Connecticut, in the manner and at the times provided for in the by-laws.

Sec. 5. This resolution may be amended or repealed at the pleasure of the General Assembly.

**Suggestions for New Features at Trotting Meetings.**

[New York World.]

Dates claimed for trotting fixtures during the coming season make an imposing display in the sporting weeklies. They show, as do the running lists, that associations at every point are willing to cater to the public taste, and that there is a large increase in the number of meetings. They also show that the "circuit" business is on the increase, a feature that is almost a necessity to trotting, as it is impossible for owners to leave the regular lines of travel for a meeting of any single association, whether the programme is a paying one or not. Thus the first circuit organization, which included the Cleveland, Buffalo, Utica and Poughkeepsie Associations, has grown until it is now "The Grand," with some dozen or more of lesser importance in all sections of the country to claim the attention of owners with purses varying in amounts from one hundred to ten thousand dollars.

Naturally, with such an impetus it is not surprising that the breeding of trotting horses has increased enormously during the last ten years, that special papers team with the announcements of the services of scores of stallions and the sales of horses for breeding, for the road and for the track, while so numerous are the improvements in the way of vehicles, harness and labor-saving appliances that before the newness of some is fairly worn off they are relegated to the store-rooms of old-fogyism.

In connection with public trotting it was demonstrated during the recent Congress of the National Association held in this city, that there is a feature in the circuit business not quite agreeable to all, especially for the associations so located that they are the tail end of the circuit. It was found that after the first three or four meetings that the public have so thoroughly learnt the "form" of the horses that even the races for classes under "twenty" fail to attract, for the simple fact that, barring an accident or an occasional "job," there is no doubt as to the result, whether three, five or more heats are trotted. In this respect the running associations are vastly better off, as they can vary their programmes with races at every distance and under every imaginable condition as to weights. In trotting it is not so. It is one everlasting round of mile heats, three in five, with "time" as the handicapper. Consequently, trotting associations are at the mercy of the half dozen owners of trotting stars who, knowing that the public will not turn out *en masse* unless some of them are to show a fast mile, are able to dictate terms as to compensation, and to violate all manner of rules by making as many conditional entries as they like, to which associations must give way to or see a rival association, by not being quite so particular, capture all the money in the country and fill its stands to overflowing.

Various remedies have been suggested, but in preparing programmes for the coming season it would seem that associations can materially help themselves by varying their programmes in such a way that the public will see new interests. Instead of two or three contests each day at mile heats, why not have one at mile heats, three in five, under the time classification, one at a mile and a quarter or a mile and a half, best two in three, and a dash of two or three miles. As now conducted, owners have no encouragement to either breed or train horses to go a distance. With such a programme some of the great mile stars that have almost annihilated time would find themselves badly beaten at two miles, or utterly unable to repeat in thirty minutes after a fast mile and a half. We certainly do not lack horses able to go a distance; the road shows that. Thus by introducing such special features on one or more days of the meetings, associations can give the public a new sensation in trotting. With the small agricultural associations it will give young horses ample chances to show their speed without obtaining what seems to be a handicap to many a mile record, for they can trot three-quarter-mile heats, and not tempt the honest deacons of the town church to lie by announcing the time several seconds slower than the watches they hold in their hands show. How little has been done in trotting at a distance of late is shown by the dates when the best records were obtained, viz.: Two miles in harness, 4:46, by Monroe Chief in 1881; two miles under saddle, 4:56, by George M. Patchen in 1863; two miles to wagon, by Dexter, 4:56½, in 1865; three miles in harness, 7:21½, by Huntress in 1872; three miles under saddle, 7:32½, by Dutchman in 1839; three miles to wagon, 7:53½, by Prince in 1857.

**"Fashionable" Pedigrees.**

Pedigree, unsatisfactory and imperfect as it is, is the only standard by which the breeding world, shut off from personal knowledge of the individual merit, can arrive at any estimate of the value of animals. It gets abroad slowly throughout the land, after a time, that there is a bull down in Kentucky which has become noted through all that favored section for his excellence as a sire, and breeders scan the pedigree, and do not regard it as mere paper, to see that they are getting for their own use the offspring of the allied blood of this distinguished sire; and the inquirers may be many, and the animals to supply them few. But is it proper to say that, because in their anxiety to secure representatives of this good blood breeders pay more than the so-much-per-pound which a vulgar butcher would pay, "they are votaries of fashion," "given over to whims and fancies" and "their own delusions?" Rather should we not ascribe something of their anxiety to a commendable and honest desire to improve or maintain the excellence of their own stock by an infusion of the same blood which had proved so potential for good in other herds. Somebody, of more than usual skill or good fortune, brings out a "family which, in his hands, and in those who first come into possession of it from him, proves to be almost universally "good ones," and people buy and the sort becomes a favorite one, because the breeding public have reason to believe that it possesses unusual merit. And because more is paid for them, in proportion to live weight or merchantable beef or butcher's estimate, than is paid for common average Short-horns, shall we ascribe it to fashion merely, and deny that breeders are actuated under any circumstances by a sincere desire for improvement? And is it not a fair and reasonable presumption, that if one secures animals of blood and breeding closely allied to these "good things," a proper selection of crosses will secure some of their excellence? or are not the chances better of securing good things in this way than by the selection of cattle at random, none of whose "uncles and aunts or cousins" were ever known to hold up their heads in public? And if so how can it be pretended that a pedigree is a mere meaningless piece of paper? "Piece of paper," or whatever it is, it is all the public has or can have under the present order of things.

Muybridge is about to resume his experiment of photographing animals in motion, under the auspices of the Pennsylvania University at Philadelphia. Fast trotting horses and well-bred cattle, as well as wild animals from the Philadelphia Zoological Gardens, will be utilized.

**The Ethan Allens.**

In the present era of phenomenal speed at all ages, Ethan Allen would not be regarded as a particularly successful sire, altho he has nine representatives in the 3:30 list, because none of them were particularly speedy—the fastest being just able to beat 2:24—and with the exception of Hotspur, none were noted for gameness. And these admitted defects in them as track horses may fairly be laid to their sire—certainly with as much fairness as are their merits—as their dams were, with three exceptions, well bred. Ethan Allen himself was without question one of the most remarkable horses that this country has produced, and when we consider the treatment to which he was subjected, both in the earlier and later years of his life, the wonder is that he ever managed to accomplish as much as he did, both in the way of trotting himself and in founding a family of trotters. His harness record of 2:25½ was a creditable one, for in 1865 the 2:30 list was not the cumbersome document it has now become, and stallions capable of beating those figures were not to be found standing for mares in every state in the Union, as is now the case. And, although the mares that were sent to Ethan Allen were, as a rule, well bred, the continuous training to which he was subjected, even during the years when some of his best ones were got, undoubtedly operated against the ultimate success of the horse as a sire, and hence it is not a matter of surprise that the fame of the Ethan Allens has been perpetuated and kept bright by a son of the founder of the family, and certainly no one will dispute that had it not been for Daniel Lambert and the twenty odd trotters with records better than 2:30 he has sired, there would be very little indeed said about the Ethan Allen blood in these days, because, with the exception of the horse known as Woodward's and Cornell's Ethan Allen, no son of the old horse save Daniel Lambert has sired six or more 2:30 horses.

Woodward's Ethan Allen has six in the 2:30 list, and it is a curious fact that the dams of none of them have been traced. The fastest of the lot, Sheppard Boy, 2:23½, was out of a grey mare owned by Bryan Wadden, of this city, but all that is known concerning her is that she was used in her early days as a short-distance runner, and won a number of races of that character. Sheppard Boy was never able to duplicate his record after making it, and it may therefore fairly be assumed that the figures to his credit represent the greatest speed for a mile of which he was capable. One fact about the get of Woodward's Ethan Allen worthy of note is that they were all handicapped with the fatal gift of being able to break from a trot to a run and back again at the pleasure of their drivers, and it is doubtful if anything will more surely prevent a horse from becoming a first-class trotter than this.

There have been plenty of "handy" horses possessed of great speed, but the universal experience of drivers with them has been that when hard pressed in a race the inclination to indulge in a run is too strong to be overcome, and it is a universally admitted fact that no trotter, "handy" or otherwise, can go as fast a mile with a break as without one. And this handiness in recovering from a break is not confined to the particular branch of the Ethan Allen family that is under consideration, but pervades all its members to a greater or less extent, and no doubt this characteristic is in some measure responsible for the reputation generally given them of being quitters. That they have this reputation is not to be denied, but it does not necessarily follow that it is deserved. A "handy" horse is always placed at a disadvantage by his facility for skipping and taking little runs during the mile when he is called upon to meet a horse that is about his equal in speed, and the "handy" fellow is asked to win.

But in the matter of going with a running mate the Ethan Allens have always led the way, and they stand to-day without equals at this somewhat hasty style of trotting. Ethan Allen himself became famous in his old age by beating Dexter a match over the Union Course, and trotting a mile with running mate in 2:15, and that record stood from the time it was made until 1851, when Billy D., a grandson of Ethan Allen, reduced the figures to 2:14½. In 1852 Yellow Dock went a mile in 2:11 with running mate, thereby transferring the honors for the time being to the Morgan family that descended from Long Island Black Hawk. Last year, however, the Ethan Allens were after first place again, and the battle between H. B. Winship, a grandson of the old horse, and Frank, a great-grandson, was a fierce one, finally culminating in Frank getting a record of 2:08½ and Winship one of 2:10½. —Breeder's Gazette.

**Man's Ingratitude.**

"Hopeful," writing of the recent sale of Small Hopes, says: "But if we take age, tracks, circumstances, etc., into consideration there is one that stands far ahead of all others, and that is Small Hopes. As there never was a horse that ever lived that could have stood the hanging about from Dan to Beersheeba on railroads and across country, trotting as many races a week as he did, but what he could beat and beat easily; still I do not think it fair to claim that he could beat Maud S.'s record, 2:10½, although I have repeatedly said that he could trot, everything favorable, in 2:10. But at that time so few believed that 2:14 would ever be beaten that there was hardly any reply to my assertion, only 'you are crazy.' On several occasions I assured Mr. Vanderbilt (his owner at that time) that the horse could trot a mile in 2:10, as I had seen him go at that rate. This was shortly after Mr. V. had driven him and Lady Mack in 2:23 to huggy over old Fleetwood, a very slow track at the time, and Small Hopes drew Lady Mack, wagon and all, the last quarter, which not only made himself the greatest pole horse living, but made his owner and driver famous as a double-team driver, before which time he was only known as about a third or fourth-class road driver, but since that time he has not only stood at the head of road drivers, but at the head of professionals as well. Mr. W. H. Vanderbilt assured the writer that he would not sell Small Hopes for \$250,000, as he was such a wonderful horse, either double or single; but how things are changed! Poor old Small Hopes has been sold in his decline of years for, no doubt, a very small amount. When I first read the account of his sale I laughed at it, and said it was all hosh, that Mr. V. was not so hard up but that he could feed poor old Small Hopes the remainder of his life for the good he had done in making him first noted as a driver; but now, I am sorry to say, it is too true. The old horse is sold, and, quite likely, will be sold and resold until he will be the property of God only knows who, to be starved and abused in his last days. Alas! for the ingratitude of man; Maud S. may meet the same fate when she is no longer Queen of the Turf."

E. Corrigan's three-year-old Ten Full, by Ten Broeck, dam Full Cry, and consequently half brother to Checkmate, died recently at Louisville. He was thought to have had an outside chance for the Kentucky Derby, and had been backed to win some money at 10 to 1.

The Petaluma Argus gives it as a probability that Nellie will make a tour of the eastern circuits this year.

Dexter's Early Days.

I fell into conversion lately with Isaac Woodruff, who has experienced many ups and downs in the pursuit of his calling. He has both ridden and driven trotting horses all his life, and also brought thoroughbreds to the post, fit to give battle long and well; besides he is an intelligent, steady man, and a worthy brother of the lamented Hiram. He possesses an extraordinary fund of turf information, and I generally get an unwritten chapter from him in relation to some famous horse. In this instance our talk drifted on Dexter's early days. Said he: "I remember well the day Mr. Alley and Mr. Bradford drove up to Hiram's house, with Dexter hooked double. Mr. Alley said: 'I wish you would drive that horse to a sulky and tell me what you think of him.' Hiram put his finger alongside of his nose, and sort of cutely answered, 'No, no, George; he dumped you out twice. I don't take no chances with him.' Then Mr. Alley turned to me and said: 'The, will you do it?' I told him I would, as I took a sort of fancy to the little fellow right there. He was a d—n pretty little horse with a whalebone look about him, quick to notice what was going on, even to a butterfly passing before him, and at the same time no fool. At this Hiram put in: 'You take your own sulky and chances,' which I did, and jogged him out on the track. I found he was chock full of go, but I coaxed him back until I got him in a quieter humor, and then let him step off about a half. I thought I never drove one that appeared to sey so plain. I can trot as fast as you want me to."—*Veritas, in N. Y. Spirit.*

Foals.

At Rancho del Paso. Property of J. B. Haggin.  
 March 22d, ch filly, strip in face, hind legs white, by Exile, dam by Langford.  
 March 22d, h c, star in face, both hind legs white, by Exile, dam Pet Throckmorton by Yellow Jacket.  
 March 23d, h filly, no marks, by Echo, dam Hathaway by Belmont.  
 March 27th, b filly, no marks, by Algona, dam Martin Mare by St. Clair.

Thoroughbreds.

At Rancho del Paso. Property of J. B. Haggin.  
 March 22d, ch filly, star and snip in face, by Longfield, dam Sophie by Bazar, out of Sophie Jennison.  
 March 22d, ch filly, no marks, by Longfield, dam Belle S. by Bazar, out of Avallib Leinster.  
 March 23d, h c, star and snip in face, by Jim Brown, dam Maggie O'Neil by Lodi, out of Mary O'Neil by St. Louis.  
 At Rancho del Rio, property of Theo. Wintere.  
 March 24th, Golden Gate by imp. Leamington, her dam Naphtha by imp. Eclipse from Echo, by Lexington, bay colt by Norfolk.  
 March — Neopolitan, by War Dance, her dam Eliza Davis, by imp. King, out of St. George, from imp. Melrose, by Melbourne, a bay filly by Norfolk. The name of Chatelain is claimed for this filly.  
 At Walla Walla, W. T. Property of J. S. Trask.  
 March 16th, April Fool, by Waterloo, her dam Fanny Daily by Blacknose, from Ann Harper by imp. Luzborough, a brown filly, by Marmaduke.  
 March 15th, Victoria, by Vanderhilt, son of Norfolk, her dam April Fool as above, a bay filly with star, both hind feet white, by Marmaduke.  
 March 15th, Viney, by Vanderhilt, her dam April Fool as above, a bay colt, with star, left hind foot white, by Marmaduke.  
 March 22d, Georgie A., by Longfellow, dam by Knight of St. George, a dun filly, by Steamhoat Charley, full brother to Oregon Manda. (Mare owned by Joseph Lamar).

Scratchings.

Notification has been filed with the Secretary of the following scratchings for the entry list of the spring meeting of the Blood-Horse Association.

The California Stake.

Theo. Wintere's ch f, by Joe Hooker—Puss.  
 Theo. Wintere's h f, by Joe Hooker—Abbie W.  
 Theo. Wintere's h f, by Joe Hooker—Conness Zeika.  
 Theo. Wintere's h f, by Joe Hooker—Illusion.  
 Theo. Wintere's b f, by Joe Hooker—Kitten.

The Hearst Stake.

Theo. Wintere's ch h Jumbo, by California—Big Gun.  
 No. 9. Purse for two-year-olds; five-eighths of a mile.  
 Theo. Wintere's b f, by Joe Hooker—Abbie W.

The Gano Stake.

Theo. Wintere's ch f, by Joe Hooker—Puss.  
 Theo. Wintere's b f, by Joe Hooker—Abbie W.  
 Theo. Wintere's b f, by Joe Hooker—Conness Zeika.  
 Theo. Wintere's b f, by Joe Hooker—Illusion.  
 Theo. Wintere's b f, by Joe Hooker—Kitten.

The Secretary of the Washington Park Club of Chicago forwards the following as having been struck out from the American Derby:

Chinn & Morgan's (Theo. Barrett's) Royal Arch.  
 Mr. Kelso's Equipoise.

Sales at Fairlawn.

Gen. W. T. Withers, Fairlawn Stock Farm, Lexington, Ky., has sold the following trotting stock:  
 Helen Hendard, h m, foaled 1863, by C. M. Clay, Jr., dam by imp. Champion. Fred Hardwick, Liverpool, O. . . . . 200  
 Monticello, h c, 1882, by Almont Lightning, dam by Country Gentleman. T. W. McDermott, Leroy, O. . . . . 400  
 Agatha, h f, 1883, by Happy Medium—Allena, by Almont. Captain W. F. Anderson, Macon, Ga. . . . . 750  
 Fortuna, b m, 1879, by Almont, dam by Sentinel. George B. Loring, Phoenix, Arizona. . . . . 400  
 Alladin, hr h, 4 years, by Almont—Madam Cogar, by Mambrino Chief. F. B. Rix, Topeka, Kan. . . . . 1,250  
 The following brood-mares were sold to John B. Robertson, Amherst C. H., Va.:  
 Chicita, h m, 8 years, by Crittenden, dam by Alexander's Abdallah. . . . . 300  
 Parthenia, b m, 5 years, by Lakeland Abdallah, dam by Mambrino Chief. . . . . 500  
 Drusillo, gr m, 10 years, by Belmont—Dahlia, by Pilot Jr. . . . . 400  
 Hopvine, h m, 7 years, by Melbourne, Jr.—Hopsie, by imp. Mickey Free. . . . . 300  
 Mahlette, rn f, by Limestone—Emmah, by imp. Fysaul. 350  
 Total, \$4,850.

Names Claimed.

By E. Newland, Oakland.  
 CHISPA, for chestnut filly, star in forehead, foaled March 2d, 1884, by Poscora Hayward, dam Lady Lightfoot by California Abdallah.

The Latest Arrival from England.

"Vigilant," in the New York Spirit, gave the following description of Characus, the latest importation from England: Characus is a deep bay, with a star and a slight snip of white above his nostrils, and black legs. His mane and tail are a clear roan, which gives him a rather odd appearance. He is of the English type of horse, standing about 15.3, with a handsome head and neck, and stands well on his feet. He has some daylight under him, but has fine quarters. His legs were swathed in budages, and presented no opportunity for an examination. In 1878, as a two-year-old, he ran five times, winning once the Liverpool Nursery, heating six. In 1879 he ran nine times, winning three, viz., the Worcester Welter Cup, the Alexandra Handicap, at Alexandra Park, and the Shohdon Welter Cup, at Nottingham. In 1880 he started three times, without winning. In 1881 he ran eight times, winning three, viz., the Herefordshire Cup, at Hereford, heating six; the Birmingham Autumn Plate, at Four Oaks Park, heating six; and the Worcester Autumn Handicap, at Worcester, heating three. In 1882 he ran twenty-three races, winning seven. These were the Easter Handicap at Four Oaks Park, heating six; a Welter Handicap at Bath, heating three; a Welter Race at Croyned, heating four; the Worcestershire Stakes, at Worcester, heating four; at the same place the Tradesmen's Cup, heating four; at Kempton Park the Shipperton Handicap, heating seven; and the Queen's Plate, at Hampton, two miles. Last season, 1883, he started seven times, winning but once, viz., the Craven Stakes, at Goodwood, one mile and a quarter, heating Piræus, Pasaic, Suter, Frontier, Louis d'Or, and two others. In the Trial Stakes, at Newmarket, Houghton, he ran third to Geheimene and Toastmaster, with Lowland Chief and three others behind him. He is by Distin, from Sappho, by Kingston; 2d dam Sacrifice, by Volnreter; 3d dam Virginia, by Rowton; 4th dam Puella, by Mulley; 5th dam Medora, by Selim. This is a family of great excellence. Virginia was the dam of the famous Virago, by Pyrrhus the First.

The two-year-old bay filly by Scottish Chief—Acacia, which sailed with him, died during the passage. He is imported by Mr. Sandys, of Roanoke county, Virginia, and will be trained by Mr. Edward Day.

Wales in Person.

Great Britain is to be congratulated upon the fact that the Prince of Wales is about to go into business. It is called that in the forthcoming Grand National Steeple-chase Wales will come out in his own colors, and run his horse Scot. The attempt to run a candidate of the same name in a grand national steeple-chase in this country some years ago was a dead failure, but Wales may be more successful. He has tried the turf before, not under his own colors, by considerable, but in a very shady sort of way with the fear of his august mother before his eyes. For a series of years he had his friend Chamberlain and others to help him to lose. But now that he is going in horse-racing as a matter of business, and with his past and bitter experience, he ought to make money. Plunger Walton and other experts get rich, and a prince should do as much as a plunger. Wales' debts are now estimated at £2,000,000, and if he should succeed in making enough from the turf to pay even a portion of the amount he need not longer wait impatiently for his mother to make her final family dividend, nor call on Parliament for a special appropriation to wipe out his indebtedness. The colors worn by the rider will be purple, with gold braid, scarlet sleeves, and black velvet cap with gold fringe. These colors are the same that the horses of George IV and William IV raced under when each of those sovereigns was Prince of Wales.—*World.*

Trotting at Oakland.

The second of the series of matches between Vanderlynn and B. B. was trotted at Oakland Park last Wednesday. The track was soft and Vanderlynn's handicap of a wagon rather broke him up, and the account between the two was squared to date by a win for the Oregonian.

**SUMMARY.**  
 OAKLAND TROTTING PARK, April 2d.—Match for \$500 a side.  
 Geo. Lelhy's blk g B. B. (harness) . . . . . 1 1 2 1  
 P. Farrell's b g Vanderlynn (wagon) . . . . . 2 2 1 2  
 Time—2:35, 2:29, 2:34, 2:36.

A second race followed with Nellie Burns and Tump Winston to ride carte, and Ed to sulky. Drivers were changed on both Burne and Winston before the race was finished, and there were many disgruntled pool buyers when the purse was finally awarded to old Tump.

**SUMMARY.**  
 Same day; purse \$—  
 E. Downer's ch g Tump Winston . . . . . 2 1 2 1 1  
 R. E. Burns' b m Nellie Burns . . . . . 1 3 1 2 3  
 E. T. Jackson's b g Ed . . . . . 3 2 3 3 2  
 Time—2:37, 2:35, 2:39, 2:35, 2:40.

It would be difficult to find a prettier eight than that of Tom Cannon making friends with one of his young ones. It seems to be his rule never to go up to the horse, but to let the horse come to him. Some of the high-bred, sensitive little creatures are extremely nervous. When their master goes into their box they get as far from him as possible, and eye his proceedings suspiciously. They show a disposition to start from his hand, however gently it is outstretched, and this they watch at first with apprehension. Presently they look up to his face, see the kindly smile, hear the persuasive tones of his voice, and by degrees, with their soft little muzzles outstretched, only showing slight timorousness by the movement of their ears, they approach him. A sniff seems to have a wonderful reassuring effect. I never saw one that was not very soon nestling its dainty little head and rubbing its nose confidently against its master, evidently appreciating his caresses and soft words. The spectacle is delightful for a man who loves animals. I feel certain that if Sachem had been at Danebury—or rather at Houghton—when he was a foal, there would have been no occasion to pad his box. Who can say, too, what effect this mutual confidence between man and horse may not have when the race comes to be run? That young horses invariably do their best when Tom Cannon ridee them is notorious, yet he treats them as carefully as if they were children. If in all stables the young ones were treated as they are at Danebury, there would be fewer rogues and cowards when it comes to racing.—*London Sporting News.*

At the raffle for Judge Fullerton, record 2:18, which occurred March 15th, at Phil. Milligan's hall, Broadway, New York, each ticket-holder was allowed three throws with three dice, the highest possible being fifty-four. Several throws of forty-four were made, and near the close one of forty-five for Mr. Ira McClellan, a hotel proprietor of Gettysburg, Pa. The winning throw, however, of forty-seven was made by Mr. H. B. Wiuehip for the ticket No. 287, owned by himself, and W. H. Smith of the Hoffman House. Five hundred tickets had been sold in all.

Wanderer, the sire of One Dime, Lizzie S., Wakefield and other race-horses, seems to impart all of his well-known eccentricities, nervousness, etc., to his progeny. As affording an instance of this the case of the last-named horse, now known as Weasel, can be cited. The well-known "beach-comber" is noted for the singular fact that he will only eat at night. This was ascertained about a year ago when the horse had run down in flesh for apparently no known reason, and day after day he would refuse his feed, until his trainer almost gave him up as a hopeless case, but one night by accident the horse gave evidence of his nocturnal feeding propensities, and since then he was humored in this respect, and steadily made flesh and improved. Neither will he accustom himself now to any other stable than his own at Coney Island. When taken south this fall he fretted and worried himself completely off, and could not run a hit at Washington and Baltimore, and at Jerome, also, he was of no account from the same reason.

The current issue of the *Live Stock Record* speaking of the weather and training in Kentucky, says: There has been a very welcome improvement in the temperature of the weather in Central Kentucky, it having turned warm and springlike, and under a few and scattering bright days of sunshine the fields and woodland pastures are carpeted with green; still for training operations we have had too much rain, the track being deep in mud and slush. Trainers have been exercising to a limited extent upon the grass, and we hear that at Louisville some of the horses have been moving along rapidly. The report is that Powhatan and Loftin moved a mile in 1:50. The elements are beyond human control, and we can only hope for more genial weather, and if we can have a few days of bright, warm sunshine, the tracks would soon be in good condition for galloping.

The Executive Committee of the Brighton Beach Association have had submitted to them a case which is of considerable interest at this time. Mrs. Daly, wife of W. C. Daly, has made certain entries of two-year-olds in several stakes at the track, and the entries have been received subject to the action of the committee. Mrs. Daly also wrote to the committee of the Coney Island Jockey Club on the same subject, and has been assured that no one can object to her entries, providing she can show receipts testifying to her ownership of the two-year olds. As she is no doubt prepared to do this, we really cannot see any objection to her entering and running her property. The only thing to regret in the matter is the necessity which has arisen requiring Mrs. Daly to come forward openly as a horse-owner.

The Liverpool Grand National Steeple-chase, run on March 28th, was won by Mr. Boyd's six-year-old Volnptuary, carrying 145 pounds, with Mr. Mather's Irish mare Frigate, at 157 pounds, second, and Captain Fisher's Roquefort, at 145 pounds, third. The odds were 10 to 1 each against Volnptuary, Frigate and Roquefort. Among the other starters were Captain Macchell's Regal, the winner in 1876, and Lord Rossmore's Cortolvin. The Prince of Wales entry, The Scot, started, but was not placed. It was a little singular that the Prince should in his first appearance in this race be so emphatically beaten by a scion of his august mother's stud, for Volnptuary was bred by the Queen at the Hampton Court Paddocks, whence he was sold as a yearling to Lord Roseberry.

The legitimate English racing for 1884 opened at Lincoln on Monday, March 24th, and the Lincolnshire Handicap, the first important event of the year, was run on Wednesday, March 26th, and won by J. W. Smith's chestnut gelding Tomans, six years old, by Thunder, out of Splash by The Spy, her dam Breakwater by Buccaneer, out of Surf by Storm, etc., carrying 116 pounds; Lord Zetland's brown horse Toastmaster, seven years old, by Brown Bread, dam Mayoress by The Marquis, 116 pounds, second; and J. C. Murphy's brown colt Boulevard, four years old, by Uncas, dam Madeline by Plum Pudding, 94 pounds, third. Twenty-nine started.

The affairs of the Kentucky Horse Breeders' Association were in an unsettled and unsatisfactory state when the new officers took charge, some time since, but they have employed an expert to balance the books and ascertain the exact indebtedness, which will be paid by assessment on the stockholders. New measures will be taken to put the Association's fall funds on such a prosperous footing as the great breeding interests of the State demand.

Mr. Charles Hoppin, of Yolo, Yolo county, has purchased from James E. Clay of Paris, Ky., the brown colt Cubit, full brother to Cyclone, 2:26, foaled 1882, by Caliban, dam Camerole by Hamlet; price, \$1,000. Caliban is by Mambrino Pilot, dam Cassia by Strader's Cassins M. Clay, Jr. He is also the sire of Coaster, 2:26. Cubit comes from a good family, and from his excellent pedigree, should make his mark in California.

Jim Renwick has been taken east to fill his numerous engagements there, and if we do not hear a good report of him we shall be disappointed. He will be managed during the season by Walter J. Welch.

A. H. Hecox has sold his Almont stallion Altoona to Geo. Steele, of San Luis Obispo, and the horse will remain permanently in that county where his colts show the highest promise.

Goldsmith Maid has been stinted to General Washington, the son of her old rival, Lady Thorne. She has been barren for three years.

Shyness and Timidity.

In common "horse language," these propensities are confounded one with the other, or else no proper and right distinction is made between them. A horse may be timid without being shy, though he can hardly be said to be shy without being timid. Young horses in their breaking are timid, frightened at every fresh or strange object they see. They stand gazing and staring at objects they have not seen before, fearful to approach them, but they do not run away from or shy at them; on the contrary, the moment they are convinced there is nothing hurtful in them, they refuse not to approach or even trample upon them. This the shy horse will not do. He cannot be persuaded to turn toward or even to look at the object he shies at, much less to approach it.

Timid horses, through usage and experience, get the better of their timidity, and in time become very opposite to fearful; but shy horses, unless worked down to fatigue and broken-spiritedness, rarely forget their old sins. The best way to treat them is to work them, day by day, moderately, for hours together, taking no notice whatever of their shying tricks, neither caressing nor chastising them, and on no account whatever endeavoring to turn their heads either towards or away from the objects shied at.

## Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

H. W. P., Healdsburg.

1st. What stock is "Telegraph?" a horse owned near Chico, I believe. 2nd, I have upon pasture two colts. Pasture located within three miles of town—rolling meadow interspersed with large oaks. At eight or nine months old I took the colts home (during the late heavy storms) and kept them there until the cold, protracted rains had ceased. When I took them from pasture I noticed several small warts about their noses. I turned them out again, and about a month ago went to see them. The warts upon one had not visibly increased, but the other one's nose was fairly coated with them—looked absolutely like a multitude of little pearls set solid into some surface. I have a trotting horse in the same field—none are to be seen on his nose. None of the aged horses seem to be so affected. I also looked at a yearling half Normau, owned by the proprietor of the farm. His nose was perfectly clean—not even a small wart on it. Now, what's the cause of this thing? Is it a contagious disease? Is it something in the feed? Some contend one thing, some another. Have you witnessed it yourself? An old horseman told me said warts would go away themselves by the time the colts were three years old. It is extremely annoying to me. I have a two-year-old now home that spent some time in the same pasture. She had several warts around the nostrils and lips; they have partially gone since then. Colts in other pastures in this neighborhood do not have warts, that I am able to ascertain. A two-year-old, the property of the proprietor, was the first animal I noticed in the band that showed any sign of warts. He had a solid palmar around one nostril, rather, under the nostril. Since then the wart business has spread considerably. Pardon me for particularizing, but I am anxious to ascertain the cause of this thing, and I am not anxious in the desire. 3d. In working a biting-harness on a colt (a two-year-old say) if they are bitten rather high the first few times, their necks will swell slightly, from the ears back, eight inches to a foot. What is the cause, and how long should the swelling last, and would any other application than cold water be advisable? If so, what? 4th. State the pedigree of Whipple's Hambletonian. 5th. What was the best record of Alameda Maid? 6th. Is the breeding of Col. Lewis known? 7th. How is the age of a colt figured by trotting or racing rules? For instance, if a colt was foaled the 15th of April, 1883, would he be a yearling the following 1st day of January?

1st. Telegraph is by Tilton Almont; the breeding of his dam has never been reported. Tilton Almont, by Almont, dam by Clark Chief.

2d. The small warts mentioned frequently are seen on young colts, and in every case that has come under our observation the excrescences have disappeared when the animal reached maturity and generally before. It is not likely that the pasture field mentioned has anything to do with the growth of warts, and the abnormal appearance is not due to locality. Never having thought that these small warts were of any consequence, we have not sought for the causes which produced them, and, therefore, cannot give an opinion that would be entitled to any weight.

3d. The swelling is due to the constrained position of the muscles, the same effect following as in violent exertion, like the "cording" in race-horses; warm water with cloths to retain the heat and moisture is better than cold. "Biting rigging," viz., that which is left on while the colt is left to itself is injurious, especially if the check and side reins are drawn tight. The better method is to confine the lessons to when the animal is under the direct control of the educator.

4th. By Guy Miller, his dam Martha Washington by Burr's Washington, granddam by Abdallah; Guy Miller by Rysdyk's Hambletonian.

5th. 2:27½.

6th. It is fully authenticated that Colonel Lewis was by Rifleman, son of imported Glencoe, and his dam probably of Oregon "short stock," i. e. horses that could run fast for short distances.

7th. Trotting and racing rules are alike. Foals rank as yearlings the first of January that follows the birth, and, of course, a year is added for each first of January succeeding. Thus a foal dropped in any month of this year will be called a yearling, January 1st, 1885, and retain the appellation until the first of January, 1886.

Waikapu, Hawaiian Islands.

Waterford gr h foaled 1871, bred by Theodore Winters, by Langford. First dam Margratta, by Lexington; second dam Eleanor Margratta by imp. Margrave; third dam Fanny Wright by Silverheels; fourth dam Anora by Lloyd's Ving'ua; fifth dam Pandora by Grey Diomed; sixth dam by Hull's Union; seventh dam by Leondas; eighth dam by imp. Othello; ninth dam by imp. Juniper; tenth dam by Moreton's imp. Traveller; eleventh dam imp. Selma by the Godolphin Arabian.

Record—Sacramento, Cal., May 4th, 1874, won Golden Eagle Hotel Plate for three-year-olds, mile heats, beating Woodbury, Electra and a colt by Norfolk. Time—1:46, 1:47, 1:49. Sacramento, September 21st, 1874, won purse for three-year-olds, one mile and a half, beating Electra, Belle Mowry, Lady Amanda and Bill Hazel. Time—2:42. San Francisco, April 24th, 1875, won a race of two-mile heats, taking second and third heats in 3:37, 3:30, beating Woodbury and Hock Hoeking. Woodbury won the first heat in 3:36½.

J. R. K., Fort Jones.

Keystone was bred by Jas. A. Douglas, of Woodland and Mr. Douglas' stock record describes him as a brown colt with no marks. He was a light-bodied, leggy colt. Mr. Douglas sold him when three years old to H. S. Brown of Modoc county, and we have no knowledge of his whereabouts since. He was atricly thoroughbred. Sired by Langford, first dam Yolona by Norfolk; second dam Mary Longstreet by Ashland; third dam Lola Montez by Grey Eagle; fourth dam Corinna by Trumpator; fifth dam Directress by Director; sixth dam by Old Potomac; seventh dam by Gimcrack; eighth dam by imp. Flimnap. Keystone was foaled May 4th, 1876.

Platt Bros., Los Angeles.

Patchen Vernon was by Geo. M. Patchen, Jr., dam Lady Vernon. The breeding of Lady Vernon has never been established. She was bred in the East, and had a record of 2:29½, made over the old Union Course, Long Island. She was the dam of Oakland Maid, record 2:22, by Speculation. Patchen Vernon made several seasons in the stud and was sold to go to the Sandwich Islands where he now is. The best of his get is the grey gelding Allou Roy, record 2:23, made last season.

E. H. P. Carpenteria.

Any claim that Gen. McClellan was sired by Whipple's Hambletonian is untrue. McClellan was by North Star, a

son of Bullrush Morgan, dam by Brown's Bellfounder, son of imp. Bellfounder; second dam by Sherman Morgan. 2nd. The pedigree you inclose is a good one, and a horse so bred ought to be a first-class sire for roadsters.

J. G. D. Merced.

Idol and Todhunter's Mambrino are different horses. Idol (Peck's) by Mambrino Chief, dam by American Eclipse. Todhunter's Mambrino by Mambrino Chief, dam by Potomac.

Charles S. Napa.

We are unable to say what year Bullett first trotted in 2:38. The other records you mention were made as follows: Annie Lanrie 3 years, Belle Echo, 4, Echora 8, Gibraltar 6.

## BILLIARDS.

## Saylor Defeats McCleery.

The match game of billiards, in 500 points, which took place last Saturday night for a purse of \$50, between J. F. B. McCleery and Benjamin Saylor, was the best attended affair of this sort which has taken place here in a long time. Before banking McCleery made his usual offer to wager on the result of the game. This time Benjamin, who was in no way backward, immediately took up \$50 of the \$150 which his opponent desired to bet, the balance being divided between a few of the spectators. The game opened well with a cross hank, McCleery winning the lead off and scoring five points, followed by Saylor with thirteen. On the fourth inning each had 48 caroms to his credit. On the seventh inning, however, Saylor forged ahead with a run of 80, the greater part of which was made around the table. The score stood, on the tenth inning—McCleery 62, Saylor 126, and the latter increased the gap between them in each successive play. At this stage of the game the players were most unfortunate with their cues. Saylor, who was using an old stick, had had the tip sand-papered almost to a wafer, and McCleery had brought in use two new tips, very high and round, but the result for each player was the same, a succession of mis-cues. Saylor had the benefit of this, he only making five to McCleery's eight. Of course this kind of play had the effect of reducing the average as well as the necessary confidence of the contestants. Benjamin, whose forte is the right rail, never could bring the balls to that position. Twice he reached the left rail, scoring 74 and 98, but always at the critical moment when he attempted to reverse the mis-cue would have its effect. McCleery did a great deal of line-around-the-table play, but had not a single opportunity of displaying his skill in close work. Taking all in all, the game was perhaps more pleasing to the spectator, on account of its difficult positions, than if fine nursing had been done; but neither of the players felt satisfied with his showing, the balls having broken so poorly. At the close the game stood—McCleery, 262; Saylor, 500; winners' average, 10 30-47; losers' average, 5 27-47.

## The Veterans' Home Benefit.

Great interest is being taken in the billiard entertainment to be given on the 19th of this month for the benefit of the Veterans Home. Each Post of the Grand Army of the Republic of the California department has appointed a committee of three members to visit the community for subscriptions, and to judge by the lists we have seen the Metropolitan Temple will never have held as large an audience as it will on that evening. It is to be regretted, however, that those who will be most benefited by the favorable re-action this exhibition will have on billiards, are those who are the slowest in helping along the affair. The manufacturers and keepers of billiard halls are certainly not acting exactly right in this matter. The players on that evening will be Messrs. Alonzo Morris and J. F. B. McCleery, the former handicapping himself 300 points in 800. After the game Lon will execute his brilliant fancy shots, and it is expected that, as he is in excellent play, he will be still more successful than he was at the Mechanics Pavilion last year, when, for two hours he held an audience of two thousand people watching his masterly efforts with fingers and cue.

Jacob Schaefer says the challenge from Slosson means nothing. Slosson wants to make the game 500 points for the balk-line championship, and names Chicago as the place for the match, whereas it is settled under the rules that the game must be 800 points and played wherever the champion designates. Schaefer says he will go to Chicago shortly and endeavor to make a match with Slosson, but will not play any other games until the balk-line championship has been settled, which must be before April 6th, as the championship emblem will be his property after that date.

This evening a 1,000 point game will be played by McCleery and Benjamin Saylor for \$300 a side, with the privilege of a \$200 increase of stakes before the game takes place. McCleery seems indefatigable, and he certainly deserves credit for putting as much life in billiards as he does. This branch of sports would be lively indeed, if other billiardists followed his example.

Lon Morris has heard no direct answer to his challenge. Eastern players seem to think the distance out here too great to travel. As the stakes he offers to play for is a pretty good sized one, (\$1,000 a side) and \$300 expenses allowed, it strikes us one of them ought to make an effort and brave the tedious journey if he were not uncertain as to the result.

W. R. F. Lowry is in town; he seems to have retired from match playing here to give his cue full sway through the country.

William Roach is thinking of challenging one of our local ball pushers; more will be said of this later on.

The English jockey Gifford arrived at New York city on March 26th, with the imported race-horse Charaxas, bay, foaled 1876, by Distia, dam Sappho by Kingston, her dam Sacrifice by Volunteer, out of Virginia by imp. Rowton, etc. He was a fair race-horse, running some fifty-eight races from two to seven years old, winning fifteen. It is reported that he will be taken to Virginia and placed in the stud.

Mr. Henry Jones of East Portland, Or., has sold to T. W. Slusher, Jr., of Wasco county, the black stallion Black Stranger, Jr., by Black Stranger, dam by Milliman's Bellfounder, grandam by Dr. Lindsey. Terms not reported.

Mr. Theo. Winters' bay mare Golden Gata by imp. Leamington, dam Napha by imp. Eclipse, dropped a fine bay colt on the 24th ult., her first foal in four years. Mr. Winters has named the youngster Extra Session.

A cough, cold, or sore throat should not be neglected. Brown's Bronchial Troches are a simple remedy, and give prompt relief. 25 cts. a box.

## FISH.

## A Scotch Fish Story.

A friend sends us the following clipping from an English paper, showing the quality of the sport, and also the sportsman in that country.

Mr. Coliu Wood, one of the best rod-fishers in Scotland, exceeded a few days ago in hooking a salmon, considered to be the largest that has ever been hooked in the North Esk. The skilful manoeuvre of the angler were brought into play, but hour after hour wore away, and still the fish was as strong as ever, the moon rose and set, and still the fish was master of the situation. All arts had been tried, but the enemy was too wary. Mr. Wood had held his rod and kept his tackle fast for ten and one-half hours, but the work proved too much for him, and he relinquished his rod with great reluctance into the hands of Mr. A. Bower, in order to allow of a little repose. Subsequently, Mr. Wood got the rod into his hand again that he might have the honor of lauding him, while another party went for the clip. But all these preparatory wars of no avail. The salmon returned to his old abode, and disputed the victory for long hours. As gentleman after gentleman came on the ground in the morning they were astounded to hear that such a contest had been going on all night. At nine o'clock there was still no appearance of the fish surrendering, and several meetings of rod-fishers were held to consider what should be done in the circumstance. But master salmon struggled manfully, and baffled all the combinations that were formed against him until one o'clock, when he made a clean run into the stream, and the hook came out of his mouth with a piece of the fish attached. For nineteen hours and forty-five minutes, with the exception of one brief hour, did the salmon contend with one of the keenest and best fishers in the three kingdoms, and, to the great mortification of Mr. Wood, eventually escaped. The fish was twice or thrice seen, and, by men well able to judge, he was supposed to be about sixty pounds weight. We remember an instance some years ago of the late Mr. Henry Haden of Nottingham, hooking a salmon in one of the Scotch rivers, and playing him throughout the night. When finally the fish succumbed it was found that he had been hooked "foul." The weight was twenty-eight pounds.

The close season for trout ended last Tuesday, but we find the lovers of the rod and line did not avail themselves of it to the extent of preceding seasons. Several good reasons may be assigned for this apparent apathy. In the first place, the weather has been so uncertain and inclement that it required more than average devotion to the sport, glorious as it is, more than the average courage of the amateur sportsman to face the inconveniences of a trip to the interior under such conditions. So far as we learn, our best city anglers have postponed their first trip to the streams until May, which, by the way, is as early as most of them ever venture out. For next month we hear of several parties being formed. Another reason is the high water at present in our streams. For ourselves, we congratulate the true sportsmen of the State that the waters are so high. This will preserve the trout in every section from the rascally and criminal maraudings of thieves and poachers who claim to have the right to steal and destroy State property by any and every available means. From this time until the end of the season, according to the abundance of feed, trout will grow from one to two inches a month, so that fish caught now, mere fingerlings, unworthy the true angler's skill or a place at his table, will next month and afterwards be worthy of both. For this reason we hope the water will remain high in our streams. It is better a few true men should be delayed in the enjoyment of legitimate pleasure, than trout, as a public property, should be criminally slaughtered by vagabonds without principle or conscience, no matter what class of society either belong to.

During the week, Mr. Geary, well known in legitimate sporting matters, accompanied Messrs. J. C. Moore, formerly sporting editor of the *Dublin Freeman's Journal*, and J. Tobin of the Dublin Athletic Club, to San Mateo creek for a day's trout fishing. The party were reasonably successful both in the number and size of the day's catch. They returned to town with about four dozen nice trout in their keel. We bid our visitors a hearty welcome to California, and on their return from Los Angeles, whither they have gone for a short sojourn, we shall be glad to receive a call from them and exchange the courtesies of the profession, as well as ideas on the sport of the old and new worlds. This is the only party we could hear of.

## American Cricketers in England.

A London correspondent of the Philadelphia Press announces that the following games have been officially arranged for the Philadelphia eleven to play in England, next summer:

June 10th, at Dublin, vs. Gentlemen of Ireland; 12th, at Dublin, vs. the University; 16th, at Lorde (London), vs. Gentlemen of Marylebone Club; 20th, at Stockport, vs. Gentlemen of Cheshire; 23d, at Leicester, vs. Gentlemen of Leicestershire; 27th, at Southampton, vs. Gentlemen of Hampshire; 30th, at Cheltenham, vs. Gentlemen of Gloucestershire. July 3d, at York, vs. Gentlemen of Yorkshire; 7th, at Liverpool, vs. Gentlemen of Liverpool C. C.; 10th, at Newcastle, vs. Gentlemen of Northumberland; 14th, at Derby, vs. Gentlemen of Derbyshire; 17th, at Oval (London), vs. Gentlemen of Surrey; 21st, at Brighton, vs. Gentlemen of Sussex; 25th, at Maidstone, vs. Gentlemen of Kent.

A series of one-day matches with the elevens of several public schools (Eton, Harrow, and others) will also be arranged. In the matter of bowling the writer says:

I understand that Alfred Shaw, whose bowling proved so destructive in the matches Daft's team played a year or two ago in Philadelphia, has received a letter from Daniel T. Newhall, inviting him to pay a visit to Philadelphia before the team leaves for England, bringing with him the best left-hand, round-arm bowler whose services are to be obtained. This is, no doubt, a wise move, as the Philadelphians are undoubtedly placed at a great disadvantage in meeting foreign elevens, because year after year they bat the same bowling, while their opponents, in the course of a season are opposed to every variety of pace, delivery and pitch. I do not, however, think that Shaw will be able to cross the Atlantic this spring, as he is just bound by an engagement to Lord Sheffield, a young nobleman, who takes a very lively interest in the English national game. The Nottingham player has, however, recommended Pate and Flowers as two professionals perfectly well qualified to coach the Philadelphians, and as the first-named bowler was undoubtedly the champion performer in his line last season, having taken 214 wickets at an average cost of but a trifle over eleven runs per man, while Flowers took over a hundred wickets at an expense of 14.2 each, I do not see how "our boys" could have any better mentors.

THE RIFLE.

At Shell Mound.

One of those friendly competitions of skill with the rifle, which do so much good in a variety of ways, but chiefly in fostering a kindly feeling between contending parties, took place at Shell Mound on Sunday. The match was between 25 men from Company C of First Infantry (the National Guard), and 25 men of Company C, Second Artillery Regiment (San Francisco Fusiliers), the losers, to pay for a dinner. The conditions were ten shots to the man, at 200 yards, two sighting shots allowed; Springfield rifles. This is the third contest between the two corps, and as was generally expected the result was again in favor of the National Guard, though, upon the whole, on Sunday their shooting was not up to their average standard, nor as uniform as the shooting of their opponents. This was evidently from the want of regular practice, for the Nationals are known to be strong men with the rifle, a defect which, as we stated last week, Lieutenant Strong intends to remedy by forming a regimental team who will practice regularly at the range, commencing early this month. The men shot in pairs, as indicated by the score. The strongest rivalry, but accompanied by the best of feeling, prevailed throughout the match, a condition of things we always hope to see in such contests, for it is the only thing that can make them successful or beneficial in the end. Private Carson, in the Infantry with 46, and Lieutenant Mangels and Private Tiberbach of the Artillery with 42 each, head the score. Captain C. L. Tilden was judge for the Nationals, and Lieutenant M. N. Lanenburg of Company C of the Second for the Fusiliers. Rifle Inspector Major A. F. Klose of the Second Brigade acted as referee. The defeat was rather a bad one, being 950 for the Nationals against 904 for the Fusiliers.

Table with columns for National Guard and San Francisco Fusiliers, listing names and scores.

Table with columns for National Guard and San Francisco Fusiliers, listing names and scores.

As might be expected from the good feeling shown during the match, the dinner proved a very happy reunion. As at the dinner with the Fifth and Police, each man showed up in splendid condition for slaughtering the good things provided by Captain Siebe. Whether this was from previous dieting as with Parsons and Kellogg the week before, or from the bracing breeze that comes up to the range so refreshingly from Golden Gate across the bay, we cannot tell. Still, it is a fact, our riflemen show fine form at a good dinner. There is no tumbling down there before the round is fought out. We are glad to hear the Fusiliers, like true soldiers, intend to have another contest.

The Military Trophy Again.

This coveted trophy will be shot for again on Sunday, 13th inst., a week from to-morrow, each company shooting at its own range, the Field and Staff and Company A of Oakland at Shell Mound, Company B at San Jose, and Company C at Petaluma. The Field and Staff have won two matches, Company A two and Company C one. All calculations and hopes were so thoroughly upset by the Petaluma men winning last time that it is now too open a question to speculate upon the winners next time. If San Jose wins, Captain Whetton, the commanding officer, offers to entertain his officers and the team to a champagne dinner, and we hope the inducement offered will be sufficient to secure a victory, though it will prolong the time of the cup being filled with champagne. As this may be the final contest, by either the Field and Staff or Company A winning, each team on the 13th will be the strongest that can be formed. If the day be fine we may expect some good scores, as each man will do his best to win.

At Harbor View.

On Sunday last the members of the Swiss Rifle Club had their regular monthly prize shoot, though, as of late, the attendance was again much smaller than ought to have been. The shooting on the average was good. The following is the list of prize winners, with the most bull's-eyes made during the day. Each man had twenty shots.

BEST CENTER SHOT. First prize, J. Hnguenin; second prize, P. Croce; third prize, T. Wetzell; fourth prize, J. Leeman; fifth prize, M. Stuber; sixth prize, P. A. Giannini; seventh prize, J. Bachman.

MOST BULL'S-EYES. First prize, Giannini 8; second prize, Hnguenin 7; third prize, Bachman 6; fourth prize, Croce 5; fifth prize, Leeman 4; sixth prize, Mariani 3; seventh prize, Stuber 3.

After the shooting the members of the club adjourned to Mr. Harmon's house and partook of their regular dinner which is always well served and very social in character.

On Sunday the members of the Eintracht Rifle Club had a practice shoot at Harbor View, when the scores made in some cases were good. The shooting, as usual, was 20 shots each, 25-ring target, 200 yards.

Table listing names and scores for Harbor View shooting.

To-morrow, the 6th inst., the above distinguished club have a match at Shell Mound with the German Guard Fusiliers, for a handsome silver cup presented for competition by Captain Stettin, commanding the German Guard Fusiliers. The Eintrachts meet their brother riflemen at the

steamboat wharf, and escort them with military honors to Shell Mound. In such cases the Eintrachts never do things by halves, and their guests on this occasion may be assured of a royal entertainment.

At the Presidio.

On Friday of last week, too late for insertion in our paper, there was another, a second match, between Lieutenant Townsend and Corporal Jas. Treadwell, of N. G. C., and the Fields brothers of the San Francisco Police. The conditions were 30 shots each at 200 and 500 yards. The Pöbemen again won by 26 points.

Table with columns for 200 yards and 500 yards, listing names and scores.

One Eye or Two.

The old controversy about using both eyes in rifle shooting has again sprung up with considerable vigor, this time in England. The originator of the renewed controversy is a Mr. McDongall, head of a well-known gun and rifle manufacturing firm, who occasionally take contracts to supply the English army with arms. He contends simply that the reason soldiers in battle are so deficient in slaughering their enemies is because they do not use both eyes while shooting, and that this want of slaugher will continue until soldiers in battle are taught to use both eyes while firing. Mr. McDongall wrote quite a long letter to the English Government upon the subject which some friend was kind enough to send to us personally.

We give the following quotation, as it explains Mr. McDongall's position and ideas sufficiently. He says: "When I first began to ventilate the subject (but by no means claiming that I had invented the 'two-eye' system) in the London press, about the years 1855-56, I was received with a shout of derision. But the derision has passed away, and all the best shots whom I have had the opportunity of consulting tell me that they now never think of closing one eye. This is not done in driving a nail, in playing at cricket or billiards, and why is it done in rifle shooting? Because we have got into a wrong groove and think it is the proper thing to do, not knowing that, as the cookery books say, there is 'another way,' and a better one.

"The subject is too serious to be briefly discussed, and I fear to intrude unduly upon your space. To enter upon the whole question is not beyond my ability; but I should prefer, before doing so, that some experienced military men would give this short letter their consideration. In the first place, I would suggest that military rifles be fitted with plain folding 'leaf sights,' say, for 100, 200, 300 and 400 yards, and without complications. Beyond 400 yards, I fearlessly assert that much more deadly fire would be delivered upon a moving or shifting enemy by the judgment and common sense of the soldier, trained to keep both his eyes open and to exercise his faculties, than by the use of fine mechanical adjustments, which (be being taught to depend on them) can only puzzle and bewilder him when there comes the real tug of war. 'Our grandfathers drew a good bow at Hastings,' but I never heard of any bowman, from Robin Hood down to the still existing and highly expert Royal Scots Archers, voluntarily depriving themselves of one-half of the ocular powers granted them by nature."

As a settlement of the question may be useful to our riflemen, we have made it our business during the last three weeks to find out the opinions of our local crack marksmen, and we find the majority largely in favor of using both eyes while firing, the only prominent man dissenting being our old friend Dr. Pardee, who probably will have a close-range shot at us on account of this article. We find Colonel Fletcher and Beaver, Fred. Kuhnle and Fred. Kuhnle, Crittenden Robinson and Frank Maskey, who are both as proficient with the rifle as with the gun, distinctly in favor of using both eyes, with many others equally well known in our rifle circles. Fred. Kuhnle, of all we have consulted, gives the best and most philosophic reason. He says he only used one eye for years until he found always shutting the left eye affected the nerves of the right eye so much that the target would at times jump up and down before him, and make his shooting quite uncertain. Since he has had an equal strain on both eyes all this, he says, has ended. In pigeon or field shooting it is only when the bird has got over the usual distance, or has been missed with the first barrel, that a good marksman especially uses his right eye only. How far and how much the left eye may be made a factor, or is naturally a factor in rifle shooting, is proved by one of Lillian Smith's best exhibition tricks. At times she puts a card over the barrel of her rifle so that the sight is obscured entirely from the right eye, and still breaks all the balls aimed at as easily as if shooting in the common way. This shows conclusively she does so by the use of the left eye only, that the organ, if left open, will always form an exact angle with the sight on the rifle, and that it must, therefore, when used alone or in conjunction with the right eye, become an important auxiliary in accurate shooting. While we are prepared to believe a good deal in the two-eye theory, we altogether differ with Mr. McDongall when he cites a man playing at billiards, cricket, and when driving a nail into wood. These are not parallel cases, and can have no weight in the argument. There is, however, more in this two-eye theory than is, perhaps, generally imagined. Its discussion may do good in the revival of rifleism among us. We shall be glad to receive any letters on the subject that may tend to its elucidation.

On the 13th inst. the river at Nashville rose so high that it flooded the race-course and compelled the stables quartered there to leave. Two were shipped to Louisville and one to Gallatin. The others went to the Nashville fair grounds.

At a meeting of the State Board of Agriculture last week a purse of \$1,200 for the 2:22 class was added to the programme.

THE GUN.

The Game Law.

Table showing game law seasons for various months from January to December.

Pigeon Match at San Bruno.

The California Wing Shooting Club, after several postponements, had their first medal shoot for the current year, on Sunday, at San Bruno, and with their appearance at the trap, the work of the season may be considered fully inaugurated. It is pleasant to record the interest of the members of this prominent club in its success for the season, as shown by the attendance on the opening day, no less than thirty members being present, most of whom took part in the events of the day. The weather was propitious, what wind there was being in favor of the birds. Among the spectators, who were quite numerous, several ladies were to be seen, drawn thither, perhaps, as much by the pleasures of a fine day at San Bruno as by the excitement of the sport, and the exploits of their relatives and friends at the trap. The three club medals were the prizes of the first match, the conditions being 12 birds each, 21 yards, 80 yards boundary. At the commencement the shooting was under the usual system, each man coming to the trap on his name being called. As the large number of nineteen members had entered, it was soon found this system would occupy too much time, so after a few rounds, by a vote of those interested, they shot in squads of four. As the change enabled every man to know the trap from which his bird would come, we did not use the new and comprehensive system of scoring, which we have lately given in several cases. The birds generally were strong and flew high, causing some remarkably fine shots to be made by different members, especially in the second match, when Messrs. Jellett and Fay did the best work under adverse circumstances. The shooting on the average was good. The record shows two clean scores, seven elevens, two tens and five nines. The percentage of birds killed was a fraction over eighty-three. There is, perhaps, no man among us with a longer list of eleven birds killed to his credit than Mr. Golcher, senior. By some fatality, difficult to understand, he always losses one bird, and this time it was the fourth. The man, however, who is good on the average for eleven kills out of twelve shots, is worthy of contending with the very best men of any country. The first medal fell to the lot of Mr. Walsh, who is a keen and steady man at the trap; Mr. Lauenstein took the second; Mr. Brand third. The score:

Table listing names and scores for Pigeon Match at San Bruno.

Dr. Hayes, formerly of this city and a member of the club, but of late a resident of Grass Valley, was present, much to the pleasure of his old companions. The doctor is a true and thorough sportsman.

The second match at seven birds each, thirty yards, both barrels, was the most interesting of the day from the remarkable shots made in it. Jellett, as we said above, did good work, and took the purse with a clear score.

Table listing names and scores for second match.

The last match, both barrels each, 30 yards, ground traps, both barrels, 10 entries, and, considering some of the contestants were getting tired called forth some good shooting. Robinson won with a clean score; Graham second with three; Hopper third with two. This closed the opening day, which, though unfortunate for the champions, was much enjoyed by all, and, perhaps, as much on that account as any other.

At Oakland Race Track.

The match announced for Sunday, at this place, between Messrs. Haile and Eyre for \$100 a side, did not take place, owing to the former not putting in an appearance, but there was one in which Messrs. Jones and Eyre were opponents. We need scarcely say Jones is an assumed name by a gentleman prominent among our trap-shooters. The conditions were 18 birds each, 30 yards rise, both barrels. The score was:

Table listing names and scores for Oakland Race Track match.

Then came a sweepstake, 6 birds, 30 yards, with five entries at \$5 each, divided into purses of \$17.50 and \$7.50. Jones was again successful with a clean score for first money, Stuart taking second with five birds.

Table listing names and scores for sweepstake.

A similar match as to conditions closed the day here with Golcher, Jr., winner with a clean score, and Jackson second, with five birds. The score:

Table listing names and scores for similar match.

In these matches Pearson, one of our best men at the trap it will be seen, could do nothing. To-morrow at the same place he meets Dr. Slade in a \$100 match, and we hope he will be in his usual form.

Good pigeons for the trap are already getting scarce. What will it be as the season advances. At present prices, it would certainly pay people who have the proper accommodations to raise pigeons for this purpose.

Bears are said to be getting numerous and often seen around Olema, Marin county. We bear the same thing from several other localities. Where are the mighty nimrods who delight in bear hunting?

## Match To-morrow.

When Dr. Slade and Frank Maskey made up their match, which ended in favor of the former, Mr. Tom Pearson wished to come in, but Maskey objected on the ground that he understood it was to be an individual between himself and Slade. As we intimated in our last issue, Pearson would soon have a chance to meet the coming man. Without delay, on coming out winner, Slade wrote to Pearson, according to promise, and offered him a match on the same terms, which offer was at once accepted. The match will come off to-morrow at Oakland Race-track, the shooting to commence at 10 o'clock A. M. The match is exciting much attention, with Pearson slightly ahead in the betting, though he shot so badly last Sunday. Some remarks have been made about the small number of birds killed by Slade and Maskey. This was natural. Most of them were raised near the track, and as soon as they took their surroundings in they started for their old homes like a flash of lightning. Burbank informs us he has just such another picked lot of birds for to-morrow. If all goes well the match will be well worth seeing.

## At Bird's Point, Alameda.

A very pleasant return match for honor took place on Saturday, at Bird's Point, between six members of the San Francisco Gun Club. In the former match between the same parties, Mr. Ewing's side won by a small majority of three or four birds. This time Mr. Orr's side won, so another match must decide the final victory. Each man had 15 birds, 30 yards, both. The score:

Orr.....	14	Ewing.....	10
Butler.....	12	Gordon.....	13
Babcock.....	12	Havens.....	9
Total.....	38	Total.....	32

Two freeze-outs concluded the day's sport in which Messrs. Orr and Ewing divided first, and Messrs. Ewing and Eyre the second.

Mr. Taft, of Truckee, made us a call this week on his way home from a visit to the Bassford brothers, in search of a goose hunt. He reports no geese and no ducks near the ranches. The *Yolo Mail* makes the same statement, and further, that it never knew such a scarcity of such birds in that vicinity, concluding by adding the farmers are proportionately happy. Is not this a cutting satire upon the tomfoolery of those legislators who last session voted for killing ducks all the year in order to relieve the farmers from their ravages? When there are no ducks to eat grain, why protect the farmers against them? It was only a miserable plea for pot-hunting and poaching. Such men should be sent to Stockton instead of Sacramento. The lunatic asylum, not the Legislature, is their proper place. All this proves that wild ducks should be protected by law after 1st of March.

The *Portland Oregonian* says: "On Wednesday evening about dark, as Dick Long was going home to Canemah, he saw an animal, which he thought to be a cat, standing on the walk by the Imperial mills. He spoke to it, when the animal made as if to attack him. He kicked it away, but it renewed the attack. Mr. Long succeeded in killing the beast. It proved to be a muskrat of the largest size, its body proper being thirteen inches in length and its total length from tip to tip twenty-three inches." Once when camping out in the mountains near Centerville, on a hunting excursion, we had a similar experience with a common large rat that interviewed the party while under the blankets. At the second charge, or jump, he sent his teeth through our cheek. Rats of all kinds will fight.

Messrs. Ewing and McShane went to the Twelve-Mile House below San Jose a week ago to have some snipe shooting. They found the usual haunts either overflowed or too wet for the birds and had no sport. From this cause it is likely the spring flight of snipe will be much below the usual average. While out one day on the swamps a mallard duck rose up a few yards before them. Proceeding on they came to her nest with twelve eggs in. This is another instance of the criminality of shooting ducks after the 1st of March. The incident gives additional force to the letter from a sportsman of Alvarado which we published last week. Let all true sportsmen, and the vagabond slaughterers also, bear this in mind.

The ingenuity of man never rests, especially when a few dollars may reward the production of novelties. The last case of the kind comes to us through an exchange in the following shape. It says: The kind-bearded sportsman of the future is to be equipped with a dry-plate, instantaneous picture-taking breech-loader in the outline of a double-barreled shotgun. If he aims correctly, he can bring home a photograph of the grouse on the wing. If he misses, his dry plate will show nothing but the surrounding trees and hills.

All persons, we presume, are familiar with the old tale of the "three black crows," illustrative of the growth of a tale by circulation. Some two or three weeks ago we stated a black quail had been seen in a bevy in Calaveras county. A local daily fond of using our sporting items made it a "bevy of black quail," and so the item has been generally copied. Those who desire to have correct news on sporting news should take the BREEDER AND SPORTSMAN. It is the only reliable journal of the kind in the State.

Mr. E. H. Farmer of Gilroy, has turned out two pair of pheasants on the Sargent ranch in that district, to try the experiment of propagation. If such a thing be possible, Mr. Sargent, who is a member of the Gilroy Rod and Gun Club, will see these birds are protected from vagabond marauders who shoot everything they meet with. We suppose they are Japanese pheasants. We wish the experiment all success.

The Lakeport Bee—Democrat says: "A resident of Scotts Valley informs us that it is a very common thing to hear hounds belonging to residents of the valley running deer in the neighborhood. Persons owning hounds addicted to such habits are requested to keep them under control, as a number of gentlemen have decided to kill hounds found running deer. A hint to the wise ought to be efficient."

The California Wing Club had a meeting this week for the election of officers and the transaction of other business. We shall publish a full account next week. We are glad to learn the association is in a flourishing condition and that several new members were admitted, with several others seeking admission. This is as it should be.

The San Jose Sportsman's Club have made a new but good departure. At a late meeting it was decided to admit ladies. Things will now be kept straight in that club, and we predict for it greater success in future than it has had in the past.

We hope Mr. McIntosh of Chico will keep us informed of the progress of his pigeon tournament at that place.

## THE KENNEL.

## Trick Dogs.

The following article, copied from the *New York Herald*, is worthy of attention were it for no other reason than the inculcation to observe kindness, and this advice is adapted to the breaking of all kinds of animals. Although there has been great improvement on this score in late years the necessity for kindness cannot be too firmly impressed on the minds of those who profess to be educators, and when the opposite prevails the tutor is wanting in the main characteristics of a successful trainer. We cannot agree in the statement that cross-breed animals are the most intelligent. The two most intelligent trick dogs that we ever saw, were a white poodle and Captain Harris' coach-dog. Outside of those which come under this designation it has been the same, and through five generations of incestuous crosses may result in idiocy. Scientific inbreeding intensifies mental as well as physical powers. "Once in and twice out" is an old maxim among the breeders of race-horses, but it must be born in mind that the out-crosses are of the same blood, if removed for several generations. Then it is considered an out-cross to breed from Hambletonian and Mambrino Chief strains, and yet the heads of these two families had the same paternal grandsire. Apart from the advocacy of the intelligence of mongrels the article is instructive as well as interesting.

"He's in here, a trainin' 'em," said the call boy of a well-known theater, showing the reporter into a small, dingy dressing room behind the scenes.

The visitor had just managed to hold his breath long enough to squeeze himself through the half closed door, when suddenly what appeared to be a small avalanche fell from the ceiling on the back of his neck, producing a smarting sensation as if he had been struck simultaneously by four pin cushions.

"She's a jumper, ain't she?" smilingly said Professor Parker, as he disengaged the claws of a ten-pound snow white female cat from the reporter's shoulder, which he then shunt up in a little box. "I was just putting the finishing touches on her. She's a flyer from Flyville and no mistake, but it's almost broken my heart to train her. She can jump twenty-five feet without trying, and the Lord only knows how much further if she took a notion. She's never appeared in public yet, but her mother here is an old stager. It took me four solid months to break the old one. I've been putting 'six months' work on this one. She's exactly opposite in disposition to her mamma. The old lady was always holding back; the young 'un would rather jump than eat. It's impossible to keep her quiet.

"How are cats broken to go through a hoop of fire? Why, I put the cat in a small box open at one end, where the hoop is held. The other end of the box is movable, and when pushed in the cat is so crowded that it has to get, so it goes through the fire. She soon gets used to it, and don't mind the fire in the least. Yes, 'cats are ten times harder to break than dogs', and unless perfectly broken they are always acting mean and uncertain. I have only broken two. Dogs," continued the Professor, "are far more satisfactory to work with than any other kind of animals. Since I first exhibited at the Tivoli I have broken a great number, some eighty dogs in all. Sixty of them were for my own use. I have now four troupes—one with Ross at Savannah, Ga., valued at \$2,100; one in charge of Wingfield, with Doris' circus in Texas, and another with Charles J. Gregory, in Michigan."

"A breaker of trick dogs must find it difficult to make a proper selection of stock?"

"Yes. In the first place, I never touch a dog until he is between one and two years old. He has then had the distemper, and his body and mind have matured. I have tried all breeds, and my experience teaches me that the most discouraging dogs to teach are black and tan terriers. Pugs are always idiots. Setters and pointers are mean dogs to rely upon, and so are Scotch and Skye terriers. So no more of these kinds for me."

"What are the easiest dogs to break?"

"Why, Russian poodles, caniche, spaniels, greyhounds and all cross breeds."

"Mongrels?"

"Certainly. I can almost always get good work out of the cross-bred dogs. Why? Simply because they are generally very intelligent. I know mongrels are despised, but it is wrongfully. They have twice the brains and pluck of most of the 'pure bloods' that are frequently stupid and timid from inbreeding. Take a collie, for instance, the most intelligent dog in the world, and by inbreeding for five generations you produce an idiot. This has been demonstrated in England.

"When I began to break dogs years ago I used a whip, but I at once discarded it for fear I might lose my temper some day and intimidate my pupil. One thing I can also say, I never once kicked a dog, as hundreds of dog owners do. Had I done so I could never have lifted my foot to walk that the dog would not have shrunk from me. I do all my breaking with a light check cord fastened to the dog's collar. It takes me from one to six months to thoroughly break a dog, the length of time depending entirely upon the disposition of the dog in hand. Some dogs are wonderfully quick to learn and immensely intelligent. I divide dogs in my business into two classes—jumpers and trick dogs. The former must have short backs, good loins and long legs. I have found greyhound hitches easy to break, even more so than the dogs of the same species, as the bitches seem to possess better dispositions. The trick dogs are selected for the act they are intended to do.

"Dogs to walk on their forelegs, for instance, must possess a natural balance. This is not found in but one dog out of three hundred. For clown dogs I always use poodles. They are always broken to work simply by the sight of certain objects, not by any special routine of programme. When my clown sees the hurdle he knows he is to crawl under it; when he sees the wicket hoop he knows he is to creep through it, and so on. Some tricks are very easy to teach, while others are very laborious. Now, the strange thing of it is that the very hardest acts to teach a dog are those that are least appreciated by the audience. For instance, it takes a long time to perfect a dog in putting on a collar and taking it off. But the most difficult of all is to break a dog to jumping on its hind legs, or walking on a moving object like a barrel. It has taken me months to put a dog in show order for the jumping act. It is far easier to break a dog to walk up Broadway on two feet than to get one to jump a hurdle or skip a rope on its hind legs. I have spent whole weeks in teaching a dog to jump a hurdle standing up. I begin by making it stand on its hind legs and follow me walking everywhere. I then place a low hurdle between me and call

the dog to me, holding at the same time a piece of food high in the air. The dog will jump, but naturally tries to alight on all four feet. Before it can do so I catch it under the chin with one hand and give it the scrap of food with the other. This is repeated thousands of times, until the dog alights in a standing position."

"But one would think," said the reporter, "that the noise and confusion behind the scenes and the glare of the footlights and applause of the audience in front would distract the attention of the dogs?"

"So it would if I did not accustom the dogs to noise and the gas beforehand. After I have gotten a dog perfect in his business I take him on the stage, light the footlights and have two men with big drums and cymbals pounding away in the orchestra. At each exit in the wings I have a man stationed with a whip. Should the dog try to leave the stage he has to confront a man with a whip. He don't fancy this, and back he comes, thinking I am his best friend in the world. He never attempts to run away again.

"Dogs can be taught anything if the breaker only uses kindness and judgment. I am now breaking two dogs to spar with boxing gloves. I call one Sullivan and the other Slade. They sit up and knock each other out in the square style. It seems strange to me that sportsmen, as a rule, do not see better broken dogs. I am fond of shooting, but I rarely see a dog whose education has not been sadly neglected. But it's time for me to go on," said the Professor, bidding the reporter good afternoon, and the reporter went to the front of the house, where he soon heard the audience applauding vigorously the scenes in their wonderful performance.

## Another Bench Show.

In answer to letters asking about the responsibility of those who are now professing an intention to conduct a Bench Show in this city in April or in May, we may say that in our opinion the professions are made by people who have no reason to expect the confidence and support of sportsmen in such an exhibition. There is no Kennel Club now in existence on this coast, and in so far as we know, no prospect that one will be formed.

The old Pacific Coast Kennel Club was made up largely of lovers of greyhounds, and of the various breeds of non-sporting dogs. In greyhounds this coast has dogs equal in blood and superior in ability to those of any portion of the world, unless it be the dogs of England and Ireland. In the non-sporting classes there are few or no good specimens. A bull or two, a few guided terriers, a crossed St. Bernard, a few graded mastiffs, with a rough stag-hound brace, and the list is completed. A bench show cannot depend for sustenance and interest upon the exhibition of dogs of these classes, even in localities where there are many and good representatives. Least of all here, where there are so few of the dogs and those so inferior. The pointer and setter men are in greater number and have some well-bred dogs, there being, perhaps, thirty or forty good dogs of these breeds in this State, and scores of dogs showing more or less quality derived from some fixed blood strain. But the owners of these dogs are so scattered over the State, and many of them so remote from San Francisco as to make it unlikely that more than a fractional part of the number would be present with their animals at a bench show, even if it was given under decent and proper auspices, while at a show organized by a man speculator, such as the one mooted for April would be, it is fair to presume that the exhibition would include none but the common "curs of low degree," such as have disgraced the shows previously given here. We disclaim all desire to ruffle the silken locks of any admirer of a bad dog, but we believe it true that the bench shows heretofore given in San Francisco, while they have catalogued a few good dogs, have yet done their best work in demonstrating the ignorance and fatuity of most of our self-styled connoisseurs in dog flesh. The ignorance of these local lights was shown by the character of their entries, and their fatuity by their persistence in adhering to dogs of no form. The lesson was a bitter one to many, but it has been salutary. And while making this demonstration our former shows, the last one particularly, have taught that the best results can not be reached, as long as a bench show is conducted by one whose executive ability is slight, and whose sole aim is to get as much ad give as little as may be. It is unfortunate that our initiatory show should have proved so disastrous, because the experience has influenced about all owners of really good dogs in California to withdraw from participation in what might and should be most pleasant and profitable events. We are ready and willing to forward in any way the best interests of sportsmen, but appreciating as we do the gravity of the evils certain to result from a repetition of the wretchedly conducted affair of a year ago, we feel compelled to advise owners of good dogs to refrain from co-operation with the speculator who proposes to get up a show this year, unusually under the auspices of some club, but really under his own control and for his personal aggrandizement.

The life of John Calhoun Kay came to an end at Sheeps-head Bay when Saturday morning, March 22d, was twenty minutes old. His trouble was malarial fever, which effected the kidneys. He was sick only a few days, and, as he had always been looked upon as a sort of pine knot, his death was a surprise to his friends. He was born in Fayette county, Ky., and after an eventful career he passed away on his fifty-eighth birthday. He was in the Mexican War with Gen. Scott, and was a Captain of Artillery in the Confederate Army. A nomadic life seemed to suit him best. He chafed under the restraints of the drawing-room, and was happier in the freedom of the camp fire. From boyhood he was associated with the thoroughbred horse, and years ago he became a professional trainer. He took pride in his work, and always slept within call of his horses. He had been on all the race-tracks of the country, and was widely known. Prominent among the racers educated by him were Morgan Scout, Sam Harper and Pilgrim. He was a keen observer and not a stranger to philosophy. He was among the earliest contributors to this paper, and several articles from his pen the past winter were extensively copied. He always had something striking to say, and he said it with that directness which is certain to arrest attention. He lived frugally, and he attributed his long enjoyment of good health to the fact that he spent so much of his time in the open air. He was buried on Sunday at Gravesend.—*Turf, Field and Farm.*

Mr. Isaac Cohuefield's Helene, 2:21, has a penchant for dainties. She is reported as having indulged, with evident relish, on various occasions, in ham and eggs, broiled beef-steak, fried oysters, and sponge cake.

Geo. Breck of Helena, Montana, has lost the thoroughly filly Miss Harper by Harper, son of Longfellow, dam Sny by imp. Scythian. She slipped on the ice and broke a leg.

Some Advantages Recognized.

Mr. H. D. McKinney (Mambrino) has the following proposition in the current issue of the *Breeders' Gazette*:

We noticed recently in one of the turf papers a communication from Mr. A. G. Danforth, of Washington, Ill., recommending colt stakes for Illinois-bred colts. Now what is really needed is a North-western Breeders' Organization, embracing the states of Michigan, Illinois, Nebraska, Wisconsin, Minnesota, Iowa and the territories east of the Rocky Mountains.

The breeders of these states should meet at an early day in the city of Chicago and organize under a code of laws similar to those governing the National Breeders' Association, which is practically an eastern association.

Our seasons are unfavorable to the early maturing and development of the speed of our colts without forcing them too much, and we can make races suited to their age. We certainly cannot compete with California, where, as may be seen in the California turf papers, foals are dropped in January on the leading stock-farms of that state. Either can we fairly compete with Kentucky. While that state has but little advantage in the spring it has a month or two the advantage of us in the fall.

In the matter of aged horses in open classes we will ask in favor of any section, for we have as good blood from which to breed in the states mentioned as can be found in the Union, and slow maturity may, and undoubtedly will, give us a harder and more enduring aged animal than the more early maturing of the warmer climates. The blood that has made Kentucky and California famous came originally from the northern states and Canada—Pilots, Hambletonian, Mambrino Chief, American Stars and Clays, all of northern origin. If the climatic effects, as claimed, have had such beneficial influences in Kentucky and California, why may we not look for continued improvement in the "climatic cross," when our breeding animals, bred in Kentucky, are brought under the influences of the dry and bracing atmosphere of the higher latitudes. The fastest pacer upon the turf is a Wisconsin-bred horse (Johnston). The two fastest trotters in the world (Maud S. and Jay-Eye-See), although bred in Kentucky, were developed north of the Ohio. The three fastest stallions on the turf were either bred or matured north of the Ohio river (Smuggler, Phallas and Jerome Eddy), but they became prominent only as aged and matured horses.

Undoubtedly the effect of such a movement, inspired by the reasons set forth by Mr. McKinney, would have the effect of inducing similar organizations in other sections

not now so represented, and finally in the arrangement of the breeding interests into good divisions with climatic lines of separation. While California, of course, prefers the "competition open to the world" plan, from the manifest and acknowledged superiority of the horses bred here, we cannot expect it in all cases, and must be satisfied to allow others to take such measures of protection as the circumstances may demand. This plan of marking the map will eventually redound to the benefit of the Pacific coast. The hattle of hreds and crosses will be heightened by the additional element of a conflict of sections, and we go into such a competition with the fullest confidence. The tendency of the times, both with trotters and thoroughbreds, is to separate breeders and turfmen into two distinct classes. The first named find it profitable to hred for the market and let the turf alone. By giving his entire attention to the farm with the records and the lessons of the circuits before him he is enabled to go steadily forward, all he asks is a market for his young stock to prevent undue accumulation and make the business pay. On the other hand the active turfman finds it greatly to his advantage to purchase highly hred young horses and develop them on the track, rather than maintain an expensive breeding establishment for the purpose of producing them. He is given a greater range of selection and the expense is less, for one large establishment can be conducted with less outlay than many small ones. He huys only the best offered, and is not encumbered with that certain percentage of useless colts that go to make the breeder's loss. The patron of the turf who huys his horses wants the best. He has no prejudices of state, county, or climate. California proposes to supply this class of horses, and can afford to be set off as a separate jurisdiction. Further than that this coast will be able to supply the proposed North-west Association with breeding stock as well, for the climatic effects which so overshadow their home-hred stock becomes a fixity in a short time and precocity an inheritance.

Two Codes.

There is danger in too much law. The old saying that the best government is that which governs least is applicable to the turf as well as general interests. Terse rules that cover all necessary points are far better than those which amplify until in the multitude of words there are so many meanings that even "Philadelphia lawyers" are puzzled to give anything like correct definitions of the import.

Two codes in force must double the danger and lead to endless disputes and quarrels. Some few weeks ago we called attention to the wish on part of a few to amend the present rules, or rather to throw aside those which have proved satisfactory for the past six years, and adopt others which, in lieu of being an improvement, are conspicuously faulty, the main reason urged being that it was beneath the dignity of the California State Agricultural Society to work under other laws than those promulgated by it. At the best this is peurile reasoning, and scarcely worth answering in a single paragraph. To be consistent the laws of the National Trotting Association should also be discarded and a new set adopted for the government of the harness division. Were there a likelihood that the gratification of this fancy—peculiar though it he—would not be detrimental to turf interests, we would not write a word in opposition. But though the intention of a majority of the directors of the State Society is undoubtedly good, it has a hearing which will certainly be inimical, and engender bitter feelings. The ignoring of the laws that have been in force since 1878, laws which have not only been satisfactory to those who hear the hurden of buying, breeding, rearing and training race-horses, but under which the old-time corrupt practices have been obliterated, and the confidence of the public established on the plea offered, can only result in the antagonism of the people who own nine-tenths of the thoroughbred stock of the State. It will inaugurate war when it is essential there should be peace; induce rancor when there should be friendship.

The California State Agricultural Society is in no sense a "jockey club." While racing is a prominent feature of the annual exhibitions, and the managers have done all in their power to foster the breeding of the highest type of the horse, were it to assume the functions that by right belong to a turf organization, or should it take the place of the National Trotting Association in supervising all of the trotting in the State, its main purposes would have to be surrendered. As adjuncts to a successful fair, racing and trotting are of great importance. That those should be governed by proper rules is also manifest, but that the laws to govern should bear the imprint of the society, and these alone, is as absurd as to claim that the only Stud and Herd Books which could be consulted were those printed under its auspices, and with its great seal attached. Then again it is not shown that the rules which have controlled the racing at the fairs for several years past do not answer the purpose,

and that it is necessary to supersede them by another code. The set which has been so far sanctioned as to have been printed twice over is certainly inferior, the first issue being so ludicrously absurd that had it been adopted the society would have incurred the derision of everyone who had the least knowledge of racing law. The second proof-sheet is somewhat better, and though the comical parts have been eliminated, the innovations are, to say the least, grave mistakes. It is not our intention at present, however, to enter into an analysis or institute comparisons. That will be attended to when there is more time to give and more space at command. The inconvenience of two codes does not require long arguments to show, and we will not so far underrate the sense of our readers as to present that phase of the question at length.

The Spring Race Meeting.

One week from the day this paper is dated the Spring Race Meeting will open. That it is sure to be successful in every respect we fully believe. For a time, when rain followed rain, and the bright days were few and far between, there were misgivings and dire forebodings. When the horses were wallowing through the mud or pounding over the macadam on the Oakland streets, and the wind hung in the wrong quarter, and the visages of the trainers were elongated, and, sanguine as we are, the outlook was gloomy enough. But the break came. March "went out" lamblike and bland, and the first of the April mornings saw hazy life on the track. At this time there could not be a better prospect for favorable weather, and the chances are that the rains are over until the usual pluvial visitation when the hay is in the swarth. From what we have seen the horses are not so badly off as was thought. As an illustration, Wednesday morning one of them that had no work, according to the belief of his trainer, whirled around the turn in 25½ seconds, to the half in 51½, and to the three-quarters in 1:20. The trainer telegraphed to the jockey, and he galloped home in 1:50¼, and when pulled up there was not the least sign of fatigue. The track was deep, and he ran very wide on the turns so that the "breeze" was quite a stiff one. Now this working in the mud at a slow pace and trotting on the road may prove equivalent to ever so many hushes and runs on a good track, and, with the "sharpening" that will be the rule the coming week, the racing is likely to be of the best order. The course is sure to be in the best condition, and everything else appertaining in prime fix.

It is useless to offer speculations regarding the chances of the horses which will take part. Predictions as to the winners are usually of little value so far in advance of the time, and how some "newspaper men" can be so confident in their assertions is puzzling. The fields are likely to be so strong that the sharpest of the trainers can only hazard a guess, and in a majority of the races there will be "hot-and-hot" fights from start to winning score. Notwithstanding all the drawbacks that were deemed so serious, we will venture the prophecy that the coming meeting will be a very fine exhibition, and that the racing will be of the best character.

Yearling Sales.

Colonel S. D. Bruce, of the *Turf, Field and Farm*, has attended the sales of thoroughbreds for many years, and given his attention to executing commissions. There is not a better judge of race-horses in this or any other country, and in forming estimates of what youngsters are likely to do he is without a peer. As evidence of this, he selected Harry Bassett, Monarchist, Preakness, Joe Daniels, Huhhard, Foxhall, and many others when yearlings, and some of the earlier, too, when other good judges did not concur in the opinion. His knowledge of the bloodlines, familiarity with the great horses of the turf for the past forty years, and correct judgment of form, give him a peculiar adaptability for the business. He will leave New York April 21st, after which time his address will be Maxwell House, Nashville, Tennessee, and Phoenix Hotel, Lexington, Kentucky. We trust that several of those offered at the coming sales will be purchased by Californians, and guarantee that if Colonel Bruce is intrusted with the selections, the animals will sustain all that we predict.

Capital Turf Club.

The entries for the stakes and purses of the Capital Turf Club close to-day, and those who have delayed until the last must see that their letters are postmarked plainly. Under the trotting rules, an entry mailed on the day of closing is valid, provided the stamping is plain, but it must be borne in mind that the letter must be deposited in the P. O. in time. This has always been the rule in racing, and letters should be in the P. O. not later than 2 p. m. as the mail goes at 3 p. m. It will be safer not to wait so long and attend to the business before noon.

### The Death of Lodi.

Two months ago we received a memorandum from a friend at Napa, to the effect that Lodi was reported to have died some time in November of last year, in Washington Territory, of pink eye. The report was so meagre, with no date or locality given, that we waited for further confirmation. We thought it strange Tom Merry, located at Portland, should not know it if it were true. Indeed from his interest in old-time horses, we should expect him to detect a funeral note in the atmosphere, even if no one told him that Lodi was dead. But Tom made no sign. Shortly after the receipt of the memorandum referred to we met Mr. J. S. Trask of Walla Walla, and spoke to him about it. He had never heard it before, although he considered himself well posted in the equine matters of the territory. He promised to investigate as soon as he should reach home, and this week we received a letter from him that the report was correct. But beyond the bare facts that the horse died and was buried he could learn nothing. The evil star that chose the old brown as the *locus* of its malign influence followed him to the end, and conspired to obscure even the time and place of his taking off. He was brought to this State in the hope that he could lower the colors of Norfolk. It was a vain hope, but the spirit that prompted it must needs be satisfied, and Lodi was the victim of a sacrifice. His performances might have illumined the turf records of California if he had lived in some other time. It is something to his credit that to defeat him, Norfolk set a mark on the record that has stood unbeaten for twenty years and is likely to stand till the end of the century. But defeat is apt to throw a shadow on all else, and Lodi is known generally as a racer who could not win. He was relegated to the stud, but was there again confronted by his victorious opponent. He had few opportunities, but it is questionable if he would have proven a great sire even if differently situated. Some of the cherished blood of this coast is that of sires who had as few or fewer opportunities, but they possessed a superabundance of quality that asserted itself even under adverse circumstances. He drifted north, and was lost to view. The same blood that flowed in his veins has reached the Pacific slope through other channels and proven its eminent merit. His sire, imported Yorkshire, was also the sire of the dam of Marion, the royal matron that has produced to the cover of Norfolk, the Duke, Duchess and Prince of Norfolk. His dam, Topaz, was a daughter of the patriarch Glen-coe, and will always have a place in the regard of the horsemen of California, because she was the grandam of Monday. But Lodi lacked the individuality that characterizes these other descendants of the same ancestry, and fate ever pursued him proclaiming his failures. But he will always retain a place in the annals of the turf, for one of the brightest pages in Norfolk's history is his early races in California, and that story can never be told without some slight tribute to the sturdy racing qualities of Lodi.

### Mr. Bowley's Sale.

S. C. Bowley's first combination sale begins next Wednesday the 9th inst., and continues four days, commencing at 11 o'clock each day. The catalogue contains seventy-seven numbers of well-bred and desirable horses, including Fred Arnold's brown stallion Ha Ha by Nephew, and the get of such sires as Whipple's Hambletonian, Steinway, Nutwood, Grand Moor, Newland's Hambletonian, Thad Stevens, Joe Daniels, Belle Alta, Eugene Casserly, Alexander, Abbotsford, Elmo, and others of lesser note. Mr. Bowley announces that there will also be offered some 250 head of horses not catalogued and a long list of thoroughbred Jersey cattle and Merino sheep. The horses to be sold comprise roadsters, saddle horses, double teams, trotting stallions, colts, fillies, mares, draft stock, general utility horses; in fact, the variety is so extensive and infinite that something will be found to meet every conceivable want in the horse line. Catalogues may be had by application to Mr. Bowley, at 33, 35 and 37 New Montgomery street, or at this office.

### Oakland Race Meeting.

As will be seen from the entries in another column there is a fine prospect for the meeting on the Oakland Trotting Park, which will follow that of the Pacific Coast Blood-Horse Association. It does not follow that the winners at the Bay District will be able to repeat the performance at the second meeting. The defeated at the first may be so much improved by the races as to turn the tables, and the "glorious uncertainty" is always still more glorious in the springtime.

Mr. Hickok will leave for the East with his stable of trotters on the 20th inst., and Mr. Haggin's runners will go in the same car. No recent advices have been received from Andy McDowell, but we presume he will go by the southern route, probably in company with the Santa Anita stable.

The Secretary of the Pacific Coast Blood-Horse Association has been notified to strike out all the Palo Alto nominations for the Spring Meeting of the Association. The horses have all been thrown out of training, and will start in no races until after the return of Gov. Stanford, and the funeral of his son.

The regular annual meeting and election of Directors for the ensuing year of the California Rifle Association will take place Friday, April 11th, 1884, at the armory of Company B, Second Artillery Regiment, N. G. C., No. 590 Mission street, at 8 o'clock P. M.

## ATHLETICS.

### Advice to Young Athletes on Training.

[L. E. Meyers in New York Sportsman.]

**Broad Jumping.**—This game, when indulged in by athletes who know how to perform, is undoubtedly one of the most fascinating events that appear on our programmes. Unfortunately, most of our broad jumpers know very little about the game—in fact, the average athlete who tries it generally gives it up after a trial or two.

A few years ago a man could take off from where he pleased, the jump counting from toe to heel. The English rule has always been that he must take off from a line, on the same principle as a man jumping a brook. It can be readily seen that if a man were asked to clear a brook and he should step over the brink, his jumping ability would be of little use. Or, on the other hand, if he should fly taking off three feet too far back land three feet short, the result would be very little better. I explain why the rule is from a scratch line instead of from toe to heel, because it is a question very often asked.

When I was in England, in 1881, I noticed that the "take off" at all the grounds was from a board imbedded in the ground with a slight ditch in front of it. I also noticed that competitors were allowed to toe over this board as long as the foot did not touch the ground. By this jumping from the edge of the board the jumpers got several inches the best of the measurement, besides an extra good take off. The jumper who was fortunate enough to strike this board just right generally made an extraordinary jump. This seemed to me very unjust, but again the brook argument was brought in, and I had to admit that the theory advanced was very good. Our association has since adopted this rule, and all broad jumping governed by N. A. A. A. rules must be measured in this way where the ground will admit of it, or from a scratch line where this is not possible. Probably the best amateur broad jumper that the world has ever seen is J. S. Voorhees. He introduced a novel and effective way of coming up to the scratch at full speed. He found by measuring his strides that at a certain point from the take-off he was in full stride, and that by running through he would reach the mark with the foot he jumped from almost to a dot. He measured off this distance and found it to be about 86 feet. On the day of a competition he could always be seen measuring off this distance, and very seldom indeed did he foul or miss the mark more than an inch or two, and this, too, at full speed.

It is very necessary for a jumper to have speed. All jumpers of any note, both in this country and England, have been more or less noted for their sprinting ability. I should advise a beginner to first practice sprinting until he has acquired a good style and a fair amount of speed before trying to jump. Besides helping him in his jumping it will also help to set the muscles, and thereby prevent strains and sprains, which are very likely to occur if the beginner starts out with such violent exercise as jumping.

### A Great Race Proposed.

M. K. Kittleman, having had his attention directed to the offer to admit him to the Smith-Broadhead race at Echo Park, Philadelphia, is of opinion that it offers nothing but glory, and authorizes us to make for him the following proposition: He will enter in a race with Smith, Geo. H. Johnson, and H. M. Rodgers (open also to Fred Harmon if he desires to participate) for a stake of \$2,500 each; heats of 100 yards, best 2 in 3, Sheffield rules. The race to take place in this city, and M. M. Allen will add \$2,500. Second man to save his stake, all the rest of the money to go to the winner.

In case the proposition is not accepted, Mr. Kittleman will run either Smith or Johnson 100 yards for \$5,000 a side, and will give or take \$500 for expenses.

The first of these challenges if accepted would result in the greatest athletic event the world ever saw. With four of the best men at the distance in America engaged, and a prize of \$10,000 to the winner, it will be a red-letter day in the annals of sprint running. As a betting proposition it would undoubtedly exceed any sporting event that ever took place on this coast, if not on this continent. Kittleman desires to make and run the race before he leaves for England, and would be pleased to hear from the parties named as soon as convenient. As California has a reputation for big things to sustain, we hope they will reply affirmatively.

### Olympic Spring Meeting.

The Olympic Club have announced the following events for the spring games to be held at their grounds, Oakland, May 30th.

1. One hundred yards maiden race, open.
2. One hundred yards scratch race, open.
3. One hundred yards handicap race, open.
4. Two hundred and twenty yards handicap race, open.
5. Four hundred and forty yards scratch race, open.
6. Five miles scratch race, open.
7. Fencing sixteen-pound shot, open.
8. Running wide jump—Hailey and Masterson barred—open.
9. Obstacle race, open.
10. One mile handicap walk, open.
11. One mile maiden scratch bicycle race, open.
12. One-half mile scratch bicycle race, open.
13. Five miles handicap bicycle race, open.

Gold medal to the first and silver medal to the second in each event. Entrance-fee fifty cents for each event. Entries will be received up at the Olympic Club rooms up to 9 P. M. May 16th; handicaps announced May 19th.

At the annual athletic exhibition of the American Athletic Club at Tammany Hall, New York, on the 19th ult., Malcolm W. Ford cleared 29 feet 2½ inches at standing broad-jump, beating the record 11 inches.

William B. Curtis, athletic editor of the New York *Spirit*, is probably the best-known athlete in the world. In 1868, while living on Sixth avenue, in that city, he rigged up a frame upon which to lift heavy weights, at which he was unrivalled. He lifted a dead weight of 3,239 pounds, the best on record. He also lifted 3,300 pounds and 3,500, but the latter performances were done in practice, and do not form records. He has the best recorded "hand-lift," lifting 1,230 pounds, or thirty pounds more than Dr. G. W. Winship, and eighty pounds more than H. Buermeyer. He was also a most remarkable oarsman, and previous to removing to New York was a member of the celebrated North-western Crew of Chicago. While in Chicago in 1874 Mr. Curtis rowed a fifty-mile race against time. He completed the distance in 10h. 11m. 55s. The course was on the Calumet river, and was one mile in length, to be rowed up and down until the distance was completed. Mr. Curtis was President of the New York Athletic Club for several years, but is now a member of the American Athletic Club. He was a member of the champion tug-of-war teams of 1877, 1879 and 1880; won the championship at throwing the 56-pound weight in 1878; was champion hammer thrower in 1876, 1878 and 1880. In 1874, with Frank E. Yates, he won the double-scull championship. In 1873 and 1874 he won the senior single-scull championship of the Harlem river, at the spring regatta. In 1870, 1873 and 1874 he won the senior single sculling championship of the Northwest at Chicago.

Kittleman and Harmon have signed articles for a race of heats; distance 75 yards, best two in three, for \$1,000 a side, the race to take place at the Oakland Trotting Park on Sunday the 13th inst. There will be no pistol business, as the agreement is for a mutual start. At this distance it can only be a question of a few inches between these men. Harmon should win the first heat if in equal condition, but the handicaps of a repeat will bring the chances of final victory so nearly even that he must be a keen observer who can select the winner before the start.

Malcolm W. Ford of the New York Athletic Club, on the 23d ult., accomplished the feat of clearing 5 feet 3½ inches at a single hand-vault. The best previous record was 5 feet 2½ inches. The trial to beat the record was made by Ford in the gymnasium of the Crescent Club. Mr. Ford afterward vaulted 5 feet 5½ inches, but as his body touched the bar in going over, was decided no vault. George D. Phillips and A. H. Curtis were the judges and measurers, and they measured the jump from the center of the bar to the floor with a new steel tape.

March 22d, at the armory of the 14th Regiment, Brooklyn, L. I., on a hoard floor, in a 50-yard handicap run, M. W. Ford won his first trial heat in 5-3-8 s., his second trial in 5½ s., and ran the final, which he did not win, in 5-5-8 s. The fastest previous record was 5-7-8 s., by G. G. Neidinger, made April 24th, 1880. Referee, W. B. Curtis; starter, J. MacMasters; timekeepers, G. H. Badeau, L. E. Myers, and W. B. Curtis.

Arrangements have been concluded for a general athletic competition between M. W. Ford, New York A. C., and J. C. Keane, Pastime A. C. Nine events will constitute the programme, viz.: 100-yards race, 120-yards hurdle race, high jump, long jump, pole vaulting, running hop step and jump, putting 16-pound shot, throwing the 16-pound hammer, and throwing the 56-pound weight.

"Blower" Brown, the somewhat famous English go-as-you-please pedestrian, died at Fulham, England, on the 19th ult. It will be remembered that he was third in the first contest for the Astley Belt in 1878, won by O'Leary, and that in 1879 he won the second Championship of England held with a record of 542½ miles, which record he subsequently beat by covering a tripe over 533 miles.

All arrangements have been perfected for a visit of a Lacrosse team to England. The players will be chosen from the clubs of the United States, and will be under the immediate control of the United States National Lacrosse Association of America. A series of matches against the most prominent clubs in England is already arranged for, and the team will start in May.

The three-mile race between Peter McIntyre and W. A. Ross, for \$250 a side, will take place to-morrow afternoon at the Recreation Grounds. The wonderful improvement shown by Ross of late is sufficient proof that if McIntyre is to hold the championship of the coast he will have to run a great deal faster to-morrow afternoon than he has yet run in public.

The Pythian Athletic Club have organized with the following officers: president, W. T. Welch; vice president, James A. Low; recording secretary, Henry Smith; financial secretary, J. Williams; treasurer, James McGovern; board of directors, P. Torney, J. T. Smith, R. C. Keut; sergeant-at-arms, J. N. Petersen.

The following gentlemen have been elected as officers for the Nautilus Swimming Club for the ensuing year, viz.: president, Fred E. Miller; vice-president, Louis Cooper; treasurer, George T. Bran-h; secretary, Chas. H. O'Connor; sergeant-at arms, William Arnold.

After forty years' service on the staff of *Belle's Life*, the veteran Ned Smith has been compelled to abandon his professional duties on account of declining health. Mr. Smith has always been regarded as the authority on trotting and pigeon shooting in England.

Chas. Rowell, Patrick Fitzgerald, Robert Viut, George D. Noremac, D. J. Hertz, Frank W. Hart, Peter Napoleon Campana and the half-breed Nitow Eglov will compete in the six-days go-as-you-please match to be held in New York the latter part of this month.

One thousand five hundred people witnessed the winter meeting of the Harvard Athletic Association at Boston, March 22d. Athlison '83 cleared 7 feet 3¼ inches in the two-handed vault thus beating the amateur record ¼ inches.

R. S. Haley is rapidly convalescing. In a trial run last week the affected leg acted splendidly, and there is every reason to hope that the fleet-footed Bob will again lead many a large field home this season.

M. W. Ford is credited with running fifty yards in the best amateur time of 5-5-8 seconds at the spring games of the Adelpia athletic held March 22d, at Brooklyn.

### Fine Birds.

By the Steamship Idaho, which arrived this week, we received a fine addition to our stock of Japanese pheasants. Two pair arrived, one silver and one golden, consigned to Messrs. Goodall & Company. Governor Perkins takes the golden pair to his private residence, and Captain Goodall the silver pair to his. The male of the silver pheasant is a magnificent bird. They reached San Francisco in splendid condition.

**POULTRY.**

**Raising Ducks With Profit.**

Ducks can be kept and raised quite as profitably as chickens, with only water sufficient for drinking purposes. Indeed, they become a greater source of profit if limited in their rans. They consume a large quantity of food if allowed access to it, but after a certain amount the surplus food is rather a disadvantage, and should be kept from them, for it is consumed at a waste. Ducks should be kept separate from the other fowls, as they are apt to create disturbances. Ducks are great foragers and will live largely on insects, like other fowls, if kept from the neighborhood of running streams. When once given access to a running stream they become difficult of control. If kept like other fowls they give no more trouble.

There are many varieties of ducks, but the common gray duck is about as profitable as any. They are good layers, and the young mature early, and are fit for market by mid-summer, when they bring good prices. A duck will lay from fourteen to sixteen eggs, when she will sit. The period of incubation varies from twenty-six to twenty-eight days, according to the weather and the steadiness of the siter. Ducklings are not hardy; indeed, I think they are more delicate than our common chickens, until fully feathered. The growth of young ducks is very rapid where well fed, in which case they are quiet, and are little trouble if given a place of resort where they can do no mischief. They are mischievous if allowed access to the garden, as they will destroy the young vegetables. If given a place by themselves, with a shallow trough of water to bathe in, renewed daily, they will give no trouble when well fed. The mother will lay two, and where well kept, three clutches of eggs, which may be put under hens if it be desired to keep the ducks in laying, which they will do if well fed, and also mother the ducks of the first hatching. Ducklings that are raised by the natural mother are the more profitable, as she leads them in ways agreeable to the instincts of their nature.

Ducks' eggs always command high prices in the market, and are valuable for home use. Ducks do not pine in confinement, but take to their quarters naturally, providing they are kept furnished with food and water regularly. The feathers of ducks are worth more than those of the turkey or fowl. When given full run of all the premises they, as well as other fowls, become a nuisance. There is no need of it. Ducklings should be fed much the same as young chickens, and like them are fond of green food.—Country Gentleman.

**Hatch Early.**

*Poultry Monthly*.—You know the proverb of the early bird? Well, say you do. You know early hatching is advised by the majority of veteran poultrymen under certain conditions and facilities, for they know by practical observation and experience that it pays to do so. It is not a very difficult task to get the chicks safely out of the shell, but from that time till the birds lose their downy coats and put on their dress of feathers, they require extra care, food and attendance to bring them safely through the usually inclement days of early spring.

As spring time has come again, bringing along the experience and wisdom of the past year to poultry breeders, we suggest to the thousands of farmers, cottagers and artisans scattered over our vast country, to improve their stock and rid themselves of the mougrels, or common fowls, kept by them for generations. To procure eggs from pure-bred stock to begin with, or some good birds for the same purpose, for a single trio will, in only one season, produce quite a flock of young chicks, enough to start a fair sized yard of pure breeds the next year. Early hatching is desirable, particularly with the large breeds, in order to enable them to make large and heavy birds by fall. They take longer time to mature, and they must be well developed before cold weather or they will fail to meet our expectations in the show room or in egg product. But, with the Leghorns, Hamburgs, Polish and such like small breeds, early hatching is not so especially desirable, as the weight of flesh is not so much an object. They being quick growing fowls, show precocity at a very early age if proper care, food, and attention are given them right along.

After much experimenting with the various popular breeds of poultry, the *Rural New Yorker* concludes that for eggs black Hamburgs or white Leghorns are the first preferred. For table, market and eggs, Plymouth Rocks; second choice, light Brahmas. The same authority mentions wheat as the best food but favors giving corn twice a week during the winter.

A Missouri poulterer is of the opinion that it pays better to feed grains ground and cooked, claiming that he has found that a smaller quantity satisfies the hens, and that they fatten faster and lay more freely than when it is given to them uncooked. He feeds it to them warm, but not hot, and only in such quantity as they will pick up clean.

Coal ashes may be utilized to good advantage in the hen house by sifting them around on the floor. The fine dust that flies about and settles on every exposed surface will do no harm, and that which falls on the floors and under the roosts will act as a disinfectant and deodorizer.

A hen-house arranged with a sloping floor would add much to the convenience of saving the droppings, as these could easily be scraped out. This should be done every week, and the inside frequently whitewashed and kept scrupulously clean.

Eggs are sent by mail in England, under the parcels post system. They are placed in boxes specially prepared for keeping the eggs separated from each other, and it is claimed that none are broken.

Hot food for laying hens during cold weather will increase the yield of eggs.

There will be no rivalry between the Rancocas and Dwyer Brothers' stables for the principal events of the June meeting at Sheephead Bay. The Dwyers have Barnes, Checkmate, Miss Woodford and Burton in their Brooklyn stable, and among the Rancocas lot are Iroquois, Drake Carter, Pizarro, Parolo and Aranzo. The Dwyers have bet \$1,000 that their stable will beat Rancocas, and \$500 that Checkmate will beat Iroquois.

Bnford, Farris & Co. of Townsend, Montana, have lost two fillies from distemper, viz: Sawyer's Actress, 3 years, by Tom Sawyer, dam Actress by imp. Harrington, and Lucid, 2 years, by London, dam by Glencoe.

There are 1,150 horses nominated for the great stakes at Jerome Park, Mountmou Park, Sanitogo, (Chicago), Baltimore and Washington, against 954 last year and 927 in 1882. Most of the increase is in the two-year-old events.

The fact that a stallion is registered in some stud-book, or is eligible to registry, does not always guarantee him an animal of merit. While this is a consideration of great importance, there are other points of paramount value that should be looked up before selecting. A breeder of individual merit is preferable to a stallion with nothing but his pedigree to recommend him.

S. E. Larabee, Deer Lodge, Montana, has purchased from T. Anglin, Lexington, Kentucky, the black colt Patchou Wilkes, foaled May 10th, 1882, by George Wilkes, dam by Mambrino Patchen. Patchou Wilkes stands 15 hands 1 inch high and is very promising. His dam is the dam of Anglin, 2:27½, and Wilkes Boy, 2:30½ at three years of age on a half-mile track.

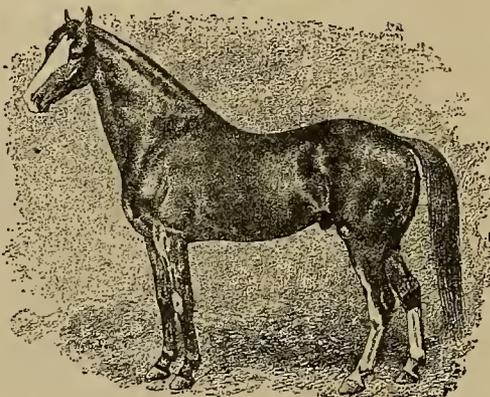

Russian Spy, 2:26½, a thirteen-year-old Canadian trotter has been purchased by a Toronto dealer for, and shipped to, Mr. Henry Geddings, formerly of Toronto, but now of Vienna, Austria; \$1,800 was the price paid.

O. W. Dimick, of Lexington, Ky., the oldest driver of any note in the United States, is seventy-four, and says he can handle a trotter and drive a race as well as he ever could.

The directors of Charter Oak Park, Hartford, Conn., will offer a \$10,000 purse for the 2:20 class, the race to be on the programme of their regular circuit meeting this season.

**STALLIONS THOROUGHBRED.**

**The Thoroughbred Stallion**

**JOE HOOKER, BY MONDAY.**

First dam, Mayflower, by imp. Eclipse.  
Second dam, Hennie Farrow, by imp. Shamrock.  
Third dam, Ida, by imp. Belshazzar.  
Fourth dam, Ganama's dam, by Sir Richard.  
Fifth dam, by imp. Eagle.  
Sixth dam, Bet Bosley, by Wilkes' Wonder.  
Seventh dam, by Chanticleer.  
Eighth dam, by imp. Stirling.  
Ninth dam, by Clodius.  
Tenth dam, by imp. Silver Eye.  
Eleventh dam, by imp. Jolly Roger.  
Twelfth dam, by Partner.  
Thirteenth dam, by imp. Monkey.  
Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

**TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding.** Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1882.

**THEO. WINTERS, Sacramento, Cal.**

**BELLE MEADE**

1884 **STALLIONS.** 1884

**BRAMBLE,**

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.

**ENQUIRER,**

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Birch, etc.

**Imp. GREAT TOM,**

The sire of Geu. Harding, Thackeray, Swift, Tenuyson, Trombone, Tarquiu, etc.  
And the grand Race-horse,

**LUKE BLACKBURN,**

By imp. Bonnie Scotland, dam Nevada, by Lexington.  
Each of these horses will be bred to a limited number of approved mares, at

**\$100-The Season-\$100**

**\$5 to the Groom.**

Mares will be kept at reasonable charges during the season. The annual Sale of Belle Meade Yearlings, 49 in number, will take place April 30th. Catalogues of the sale will be issued to the public in due time. Address,

**W. G. HARDING, Nashville, Tenn.**

**The Thoroughbred Stallion**

**WILDIDLE.**

By imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Jadsen's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:30, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

**Terms** of season, \$75, payable at time of service, and in all cases before removal.

Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

**H. C. JUDSON, Owner, or W. L. APPEBY, Supl., Santa Clara, Cal.**

**RANCHO DEL PASO.**

For the Season of 1884.

**Thoroughbreds.**

**LONGFIELD.**

Chestnut horse, by MONARCHIST, he by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by imp. Buzzard. Seventh dam, Indiana, by Columbus (son of imp. Pantaloon). Eighth dam, Jane Hunt, by Hampton's Paragon. Ninth dam, Moll, by imp. Figure. Tenth dam, Slamerkin, by imp. Wildair. Eleventh dam, imp. Cub Mare, by Cub. Twelfth dam, Aramantus' dam, by Second. Thirteenth dam, by Stirling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

**JIM BROWNE.**

Chestnut horse, by FOSTER, he by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bagg, by imp. Ambassador. Third dam, Ida, by imp. Belshazzar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nichol, by imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by imp. Sterling. Ninth dam, by Clodius. Tenth dam, by imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by imp. Partner. Thirteenth dam, imp. Monkey. Fourteenth dam, an imp. mare from the stud of Harrison of Brandon. At \$50 the season, due at time of service.

**Trotting Stallions.**

**ECHO.**

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespear, son of Duroc, and out of a mare by Plato, son of imp. Maresse. At \$100 the season, due at time of service.

**ALGONA.**

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rydyk's Hambletonian. First dam, Emma Kinkead, by Conscript, son of Cassius M. Clay. Second dam, Effie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

**ALASKA.**

Brown horse, by ELECTIONEER. First dam, by Washington, he by Geo. M. Patchen. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per mare will be charged, but no responsibility for escape or accidents.

**John Mackey, Superintendent, Sacramento, Cal.**

**THOROUGHBRED STALLION**

**X X,**

**Pedigree.**

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1873, by MALCOLM. First dam, Columbia, by imported Bonnie Scotland. Second dam, Young Fashion, by imported Monarch. Third dam, Fashion, by imported Trustee. Fourth dam, Bonnets' Blue, by Sir Charles. Fifth dam, Bonny, by Sir Archy. Sixth dam, by imported Medley. Seventh dam, by imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by imported Janns. Tenth dam, by imported Monkey. Eleventh dam, by imported Silvereye. Twelfth dam, by Spunker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Antero. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wammita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hawk Hoeling, Thres Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition. Will make the ensuing season, 1881, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

**JOSEPH CAIRN SIMPSON, Oakland or 308 Montgomery Street, San Francisco.**

**HERD AND SWINE.**

**Baby Beef and Pig Pork.**

Too many hold the ancient and erroneous opinion that an animal must have completed growth of frame before it can be profitably fattened. This may be true of some coarse breeds of swine and cattle, or of scrub stock, and wild hogs, but it is not true of well-bred cattle or swine. Nature teaches us, in the calf and pig, that so long as the dams furnish enough milk to meet the young animals' wants, they make rapid growth, and it is uniform. Bone, muscle, fibre, and fat are produced at the same time, and the young are plump, fat and thrifty, so long as the supply of milk is ample. This shows that when the food is adapted, in quality and quantity, to the wants of the animal, a harmonious development of the carcass follows. As soon, however, as the milk supply shrinks, the young animals shrink in flesh, and growth is checked.

We may conclude, first, that when the food is adjusted to the wants of the animal, it will thrive and fatten at any age from one week upward. Second, that if the food supply is not so adjusted, the animal of any age will shrink. Milk and grass in abundance make the young and old grow rapidly and symmetrically. This proves that it is more a question of food than of age. The problem, then, of early maturity of animals intended for beef or pork is rather one of suiting the food to the wants of the animals. Milk is a perfect food; that is to say, it contains every element required to build up the animal's body. Whatever food we substitute for it, when the milk supply fails, must possess its chief elements and in like proportions so far as possible. No one grain contains them all or so nearly all as to make it a complete substitute, but experience and analysis of the cereals show that by a combination of the cereals and grasses in a manufactured or dry state, a mixture may be made which will meet the wants of the animal economy so completely, that in a change from milk to other food there is no need of shrinkage or check in growth.

It has been shown by the experiments of Lawes, Sanborn, Miles and various experiment stations, that the older and larger an animal becomes, the more food it requires to make a pound of growth. If this be accepted, it follows that the farmer cannot afford to neglect feeding his cattle and shoats well until they have made desired growth of bone or frame. It has been proved that it takes 18 pounds of good hay per day to keep alive a steer weighing 1,000 pounds. A 2,000 pound steer will take 36 pounds to keep him alive and from ablinking; or in other words to furnish heat, and repair the waste of tissue that is constantly occurring in the animal economy. It will be seen here that the longer an animal is kept, the larger the per cent. of its food which goes to furnish merely the food of support. It is also evident that the per cent. diminishes as the days of existence are lessened.

In the case of pigs the food of support, up to 16 months, is found to be 2 1/2 pounds of meal daily. If we make a 300-pound pig in ten months, or 300 days, the food of support will be 700 pounds of meal. If, however, we make it weigh 300 pounds in 20 months, the food of support will be 1,500 pounds, a difference of 800 pounds of meal. It is evident then that we cannot make pork as cheaply from pigs 20 months old, as from those 10 months old. The keep of one has been 700 pounds of meal and of the other 1,500 pounds. Now the quality of young beef and pork is in no way inferior to that of the older animals, and then as the risk and interest increase with their age, we reduce these greatly by bringing our meat producing animals to the block as soon as the animals can be developed for it.

With breeds that lay on flesh early, and with food so adjusted to meet the wants of nature that there shall be no check in growth from infancy to maturity, there is far greater profit in feeding for early maturity. The report of the agricultural farm at Guelph, Ont., shows a gain of 30 per cent. in favor of two-year-old steers above those fed till three years old. It is about time that the farmer woke up to the facts, and quit consuming four years of time and many more tons of food in producing a 1,500-pound hullock, when a better one can be made in half the time on less food. The baby beef and pig pork are the cheapest and best meat.—*Country Gentleman.*

**A Condensed Code.**

The Wisconsin Dairymen's Association last year offered prizes for the best essays on butter-making, the essays not to exceed 250 words. Competition was active, and many valuable little treatises was the result. The first prize was won by D. W. Curtis, of Fort Atkinson, and reads as follows:

**Cows.**—Select cows rich in butter-making qualities. **Feed.**—Pastures should be dry, free from slough-holes, well seeded with different kinds of tame grasses, so that good feed is assured. If timothy or clover, cut early and cure properly. Feed corn stalks, pumpkins, ensilage and plenty of vegetables in winter.

**Grain.**—Corn and oats, corn and bran, oil meal in small quantities.

**Water.**—Let cows drink only such water as you would yourself.

**Care of Cows.**—Gentleness and cleanliness. **Milking.**—Brush the udder to free it from impurities. Milk in a clean barn, well ventilated, quickly, cheerfully, with clean hands and pail. Seldom change milkers.

**Care of Milk.**—Strain while warm; submerge in water 43 degrees. Open setting 60 degrees.

**Skimming.**—Skim at twelve hours; at twenty-four.

**Care of Cream.**—Care must be exercised to ripen cream by frequent stirrings, keeping at 60 degrees until slightly sour.

**Utensils.**—Better have one cow less than he without a thermometer. Churns without inside fixtures. Lever butter-worker. Keep sweet and clean.

**Churning.**—Stir the cream thoroughly; temper to 60 degrees; warm or cool with water. Churn immediately when properly coned, slowly at first, with regular motion, in 40 to 60 minutes. When butter is formed in granules the size of wheat kernels, draw off the buttermilk; wash with cold water and brine until no trace of butter-milk is left.

**Working and Salting.**—Let the water drain out; weigh the butter; salt, one ounce to the pound; sift salt on the butter, and work with lever worker. Set away two to four hours; lightly re-work and pack.

To fatten a hog speedily and cheaply give him the most comfortable and cleanly quarters you can. Undoubtedly cooked food will cause a more rapid increase of fat than uncooked. Take especial care to keep them in good health. It is well to mix a little sulphur in their food occasionally.

To make economical pork the pig should be kept in a continually growing condition from the day of his birth until he is delivered into the hands of the butcher.

**Packing Butter in Brine.**

A method of packing butter for its more perfect preservation, and one which is very effective, has long been in use in England. It has been recommended in this country, but has not been adopted so far as we know. It is to pack the butter in cylindrical bags of muslin, which are put in a mould for the purpose. These bags hold about two pounds, and when filled are tied tightly and packed away in brine in tubs, pails or casks, and are headed up just as pickled pork is. The butter will absorb no more salt; is perfectly free from atmospheric exposure; is enveloped in an antiseptic fluid; and is therefore entirely safe from change, excepting so far as this may occur internally by the natural process called ripening, and which is due to the change of the milk sugar (lactose) in the butter into milk (lactic) acid, this into butyric acid by a well understood chemical transformation of the elements. But this change goes on so slowly that the butter merely acquires a high and agreeable flavor, and no strong scent or taste is developed which would approach rancidity.

This manner of packing butter has long been in use in some districts of England, and the supplies furnished at the large universities at Oxford and Cambridge have been put up in a similar way for many years. The butter is made in long rolls about two inches in diameter, and these are wrapped up in muslin and the edge secured by some stitches, the ends being tied. This form of roll is well known as "college butter," and is found very convenient for use by cutting off thin slices, each of which is a single ration for a student. It might be found very convenient here for the use of hotels and caterers, who would be relieved of the trouble of moulding their own cakes, which to some extent injures the quality of the butter.

**Holsteins for Crosses.**

The value of the Holsteins as dairy cattle has been fully set before the public within the last year. A correspondent of the *Country Gentleman* gives the opinion that aside from their high excellence as a distinct class they are among the best available crosses for Jerseys and other butter strains. He says: I am individually acquainted with two persons in this vicinity, each of whom has a cow crossed between Holstein and Jersey. They certainly are very fine-looking cows of good size, and are regarded by their owners as being the very best of cows for milk and butter. There is no doubt that if unregistered or high grade Jersey cows were crossed with a thoroughbred Friesian or Holstein bull they would produce one of the most valuable herds for dairying purposes. As regards the progeny selling to better advantage, of course either breed (if thoroughbred) would command a higher price than crosses; but high grade Holsteins or Friesian to-day command double and triple the price of natives. Nearly all the surplus male calves of this breed are sold for this purpose to good advantage.

The following waterproof brauding ink is good for marking sheep: Shellac, two ounces; borax, two ounces; lampblack sufficient. Boil the borax and shellac in water till they are dissolved, and withdraw from the fire. When the solution becomes cold complete twenty-five ounces with water, and lampblack enough to bring the preparation to a suitable consistency. When it is to be used with a stencil it must be made thicker than when it is applied with a brush. The above gives a black ink; for red ink substitute venetian red for lampblack; for blue, ultramarine; and for green, a mixture of ultramarine and chrome yellow.

The *American Dairymen* says: "The art of butter-making will never reach perfection until we stop putting salt in the butter. It is a depraved taste that requires a salt taste in butter. The most critical judges in the old country never think of allowing salt to come near the butter, and after getting accustomed to it there is all the difference between the two that there is between salt and fresh fish, flesh or other dried or prepared food. The true epicure could eat a pound of unsalted butter at a sitting. It will be money in the dairyman's pocket when salt is abandoned in the dairy."

Where hogs cannot be allowed to run at large, as is the case on many farms, F. D. Curtis, an excellent authority, favors the planting of artichokes and sweet corn, or the sowing of oats, rye and alfalfa, the object being to secure more green food than is given in the common way of raising hogs.

It is probable that appetites vary as much in animals as in human beings. This makes it very essential that frequent changes of diet and a considerable variety of food should be provided in order to avoid a continued sameness which tends to dull the appetite and thus injure the general health.

The *Colorado Live Stock Record* says: "Mr. George Bartholomew will have a great attraction to present to the eastern race-tracks the present year. It will be a tandem trotting team, consisting of an ox, an elk and a camel. The three will draw a chariot weighing ten hundred pounds, and will be backed to trot a mile in three minutes and a half or better. The ox is of the Texas breed, and was raised at Deer Trail, Colorado. The elk came from Wyoming, and the camel was bred in Arizona."

**TROTTING STALLIONS.**

**THE TROTTING STALLION  
SILVERHEEL**

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland. Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan; granddam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old. Logan by Rysdyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

With little training when four years old, Silverheel showed three heats inside of 2:40.

**TERMS.**

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

**SACKRIDER & CHISHOLM.**

**Standard Trotting Stallion**

**BILLY HAYWARD, 489,**

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1/2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE, San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino; by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19); by Woodford, son of Kosciusko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convoy 2:22 1/2; Magenta 2:23 1/2; Manfred 2:23; Falconet 2:25 1/2; Rueloff 2:26 1/2; Inca 2:27; Lady McPartridge 2:28; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinker 2:14. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,320 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:19 1/2; Commonwealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent.

San Mateo, Cal.

**The Trotting Stallions**

**Baywood and Fleetwood**

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover.

Sired by Nutwood; first dam by Geo. M. Patchen; second dam by Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model perfect horse; high life, fine style and action, and looks like thoroughbred.

Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was ported to have been bred in Kentucky.

Terms, \$25 for the season, or \$10 to insure.

E. S. SMITH, San Jose.

**The Trotting-Bred Stallion**

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Eclipsed full brother of Lady Thorn, record 2:15; sire of Katie Middleton, 2:25; and note in 2:30 list. Dam by Mambrino Chief, sire of Lady Thurn, second dam, by Young's Plot, Jr., brother in blood to the sire of the dam of Maud's master, and he by Mambrino, thoroughbred son of Imported Mambrino.

Terms for the season, \$30.

Address SOMERS & AYER

### STOCK AGENCY.

S. D. Bruce of the TUNF, FIELD AND FARM, and author of the American Stud Book, offers his services in the purchasing of thoroughbreds and stock of all kinds. He selected and purchased Harry Bassett, Monarchist, Freakness, Joe Daniels, Hubbard, Katie Pease, Foxhall and many other good ones as yearlings. He will attend the sales of Chas. Reed, Belle Meade, Woodburn, Elmendorf and Runnymede. Address at New York, Box 274, until April 20th, Maxwell House, Nashville, to May 3d, and Phoenix Hotel, Lexington, Ky., until sales end.

S. D. BRUCE.  
Box 274, New York City.

The Firm also carries a large stock of **HARDWARE, RIFLES, GUNS, PISTOLS,** Of every make **CARTRIDGES, FISHING TACKLE, RODS and FLIES,** in every variety, and all articles belonging to the Sportsman's outfit on REASONABLE TERMS.

Pill-Box; Weight 1,160 and 1,180  
respectively; Seven years (7) old;  
Perfect in all particulars.

## THE NEW ZEALAND Stud and Pedigree Stock Co.

LIMITED.  
AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of especial mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

### Fastest Time on Record.

Martini-Henry, by Mnesket—Sylvia, was bred by this Company and sold when a foal to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41½; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30½, and beating a field of twenty-nine, thus lowering the previous best record of 3:30½, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

### Hambletonian Trotting Stallion

## BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of Imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTTING PARK.

#### Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 23th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

#### Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner.  
WM. DONATHAN, Agent.

### Fast Trotting Stallion

## HA HA.

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:23, without a skip.

#### Breeding.

GILT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

FRED ARNOLD,  
Stockton, Cal.

### Trotting Stallions

## Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Fine Bull, dam Prairie Bird (four-year-old pacing record 2:28), and dam of Flight, five-year-old record 2:22, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30 1/2, by Flaxtail, grandam by son of Talky Ho Morgan, great grandam by Irwin's Tuckahoe, great great grandam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.

M. W. HICKS,  
Sacramento, Cal.

### THE ELECTIONEER STALLION

## STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

#### Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

#### Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vermont Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont.

Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred.

Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS,  
Agent.

### The Trotting Stallions

## DIRECTOR AND MONROE CHIEF

Will make the season of 1884 at

### Oakland Trotting Park,

Commencing February 1st and ending June 1st.

#### TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

#### Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallas, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:22 1/2), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiemar.

Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

#### Monroe Chief, 2:18 1-4.

Two-mile record, 4:46.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performances, see the holiday number of the BREEDER AND SPORTSMAN, issued December 23, 1883.

For further information address

JOHN A. GOLDSMITH,  
OAKLAND TROTTING PARK.

### The Trotting Stallion

## BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By BAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

#### Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 24, 1884.

J. B. McDONALD.

2:20 1-4.

### The Fast-Trotting Stallion

## ANTEEO.

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cain Simpson, Oakland, California.

- By ELECTIONEER.
- First dam, Columbine, by A. W. Richmond.
- Second dam, Columbia, by imp. Bonnie Scotland.
- Third dam, Young Fashion, by imp. Monarch.
- Fourth dam, Fashion, by imp. Trustee.
- Fifth dam, Bonnets of Blue, by Sir Charles.
- Sixth dam, Reality, by Sir Archy.
- Seventh dam, by imp. Medley.
- Eighth dam, by imp. Centinel.
- Ninth dam, by Mark Anthony.
- Tenth dam, by imp. Janus.
- Eleventh dam, by imp. Monkey.
- Twelfth dam, by imp. Silvery.
- Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fat Grounds at Santa Rosa.

#### TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent,  
Santa Rosa.

## MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, by GEORGE WILKES, son of Rysdyk's Hambletonian, bred by E. J. Treacy of Fayette County, Kentucky. Dam Lady Christmas by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr. Todhunter's Mambrino son of Mambrino Chief, his dam Rippon's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several of the noblest crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 11 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the coming season, commencing February 1st, 1884, at the Drew Stable, STOCKTON, and L. M. Morse's near LODI.

#### TERMS.

\$50 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. HINDS, Agent.

### The Trotting Stallion

## STEINWAY,

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

#### Terms.

He will serve mares the present season, commencing February 1st, and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County,

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McLevery & Co., Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Haywards, will be forwarded immediately to the farm.

#### Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

#### Pedigree.

Steinway, by Strathmore; first dam Abbess, by Allion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Abbess by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31 1/2, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882 in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Claus, 2:17 1/2; and Tucker, 2:19 1/2; Chestnut Hill, 2:22 1/2; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlin, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belmont, who trotted a mile in 2:52 1/2 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17 1/2; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23, and he in turn got Governor Sprague, record 2:24; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

#### Performances.

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verlena, Admiration, Mystery, in 2:30, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 8th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:48, 2:55, 2:30, 2:25, 2:30 1/2, 2:30 1/2. Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26 1/2, 2:23 1/2, 2:24 1/2; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

#### Address

GEORGE WILEY,  
Cook Farm, Danville, Contra Costa Co., Cal.

### THE TROTTING STALLIONS

## SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15TH, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

#### PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Euris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:41 1/2) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Lefler's Consul, by Shepper's Consul.

Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

#### TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. MCINTOSH, Box 60, Chico, Cal.

LITTLE'S SHEEP DIP

CHEMICAL FLUID

Price Reduced to \$1.25 Per Gallon.

Twenty gallons of fluid mixed with cold water will make 1,200 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect; is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

I CURE FITS!

When I say cure I do not mean merely to stop them for a time and then have them return again, I mean a radical cure. I have made the disease of FITS, EPILEPSY or FALLING SICKNESS a life-long study. I want no remedy to cure the worst cases. Because others have failed I see no reason for not now receiving a cure. Send at once for a treatise and a Free Bottle of my infallible remedy. Give Express and Post Office. It costs you nothing for a trial, and I will cure you. Address Dr. H. G. ROOT, 183 Pearl St., New York.

LINES OF TRAVEL. C. P. R. R.

TIME SCHEDULE.

FRIDAY, FEB. 15th, 1884.

Trains leave, and are due to arrive at San Francisco as follows:

Table with columns: LEAVE (FROM), DESTINATION, ARRIVE (FROM). Lists various routes and times for trains from San Francisco to destinations like Antioch and Martinez, Benicia, Colfax, etc.

Train leaving San Francisco at 4:30 P. M. can meet Pacific Express from Ogden at Benicia; and that leaving at 8:00 A. M. can meet Pacific Express from The Needles and El Paso at Oakland Pier.

LOCAL FERRY TRAINS, VIA OAKLAND PIER.

From San Francisco Daily.

Table listing train times for local ferry routes: TO EAST OAKLAND, TO FRUIT VALE, TO ALAMEDA, TO BERKELEY, TO WEST BERKELEY.

TO San Francisco Daily.

Table listing train times for routes from various locations to San Francisco: FROM FRUIT VALE, FROM EAST OAKLAND, FROM BROADWAY, OAKLAND, FROM ALAMEDA, FROM BERKELEY, FROM WEST BERKELEY.

CREEK ROUTE.

Table listing train times for the Creek Route: FROM SAN FRANCISCO, FROM OAKLAND.

\*Daily, except Sundays, †Sundays only.

\*Standard Time\* Furnished by RANDOLPH & CO. Jewelers, 101 and 103 Montgomery St. S. F.

A. N. TOWNE, Gen. Manager. T. H. GOODMAN, Con. Pass. & Tkt. Agt.

LINES OF TRAVEL.

WINTER ARRANGEMENT.

COMMENCING SUNDAY, NOV. 11, 1883, AND UNTIL FURTHER NOTICE.

Passenger Trains will leave from, and arrive at, San Francisco Passenger Depot (Townsend Street, between Third and Fourth Streets) as follows:

Table with columns: LEAVE S. F., DESTINATION, ARRIVE S. F. Lists routes to Santa Mateo, Redwood and Menlo Park, Santa Clara, San Jose and Principal Way Stations, Gilroy, Pajaro, Castroville, Salinas and Monterey, Hollister and Tres Pinos, Watsonville, Aptos, Sausalito (Camp Capitola) and Santa Cruz, Soledad and Way Stations.

\*Sundays excepted. †Sundays only (Sportsmen's train).

Stage connections are made with the 10:40 A. M. Train, except Pescadero Stage via San Mateo, and Redwood, which connects with 8:30 A. M. Train.

SPECIAL ROUND-Trip TICKETS, at reduced rates to Monterey, Soquel and Santa Cruz; also to Parisano and Paso Robles Springs.

EXCURSION TICKETS, issued Saturday and Sunday - good to return on Monday - to Santa Clara or San Jose, \$2.50; to Gilroy, \$1; to Monterey or Santa Cruz, \$5, and to principal points between San Francisco and San Jose.

TICKET OFFICES - Passenger Depot, Townsend street, Valencia-street station, and No. 613 Market street, Grand Hotel.

FOR SOUTHERN DIVISIONS, SEE C. P. R. R. TIME SCHEDULE.

SPORTSMEN & PLEASURE-SEEKERS.

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES AFFORDED BY ITS LINE FOR REACHING A with speed and comfort the best places in the State for

MONTEREY, THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAGNIFICENT BEACH of pure white sand for sunbathing.

THE BATH-HOUSE contains SPACIOUS SWIMMING TANKS (150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places, APTOS, SOQUEL AND SANTA CRUZ, IS VIA THE

Southern Pacific Railroad, (Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety, notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily from San Mateo for those well-known retreats, PILARCITOS, SAN GABRIEL and PILARCITOS. We would particularly call attention to the unlimited extent of range at head of SAN BRUNO and McMAHON'S for RIFLE PRACTICE.

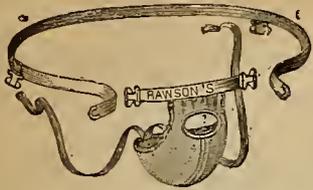

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE.

Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

In order to guard against accidents to dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Gunstaken apart and securely packed in wood or leather cases may be taken in Passenger Cars. TICKET OFFICES - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. & Tkt. Agt.

SAN FRANCISCO, SATURDAY, APRIL 12, 1884.

SUBSCRIPTION  
FIVE DOLLARS A YEAR.

## ATHLETICS.

### Kittleman's Reasons.

LICK HOUSE, April 12th, 1884.

TO EDITOR BREEDER AND SPORTSMAN: *Dear Sir*—In answer to some articles in the *Clipper and Turf, Field and Farm*, in which my name is mentioned, please allow me space in your valuable paper to make a few propositions, and state on what terms I will accept the offers held out to me to compete in some eastern races.

First, Rogers and Broadbent are to run at Echo Park, Philadelphia, this month, for \$1,000, and the notice given that it is open for Harmon, Smith, Johnson and myself, but on what terms it fails to say. But in either event, whether it is a purse or \$500 a corner, I could not compete, as it is now too late. The second proposition is a purse to be given at Alleghany City, Penn., July 5th, for a dash of 100 yards, \$500 to first, \$200 to second and \$100 to third; and further, "a solemn oath is required from each entry that he will run to win." Now, Mr. Editor, this may be a very good way of determining which is the fastest sprinter in the United States, provided all the men considered champions should run, and it certainly deserves credit for its novelty, but in my opinion a money consideration is a much better incentive for men to "run to win" than an oath, and I don't feel willing to run against such contestants for such an amount; although not objecting to hindering each man by an oath, no such proceeding would be necessary in the following proposition made by M. M. Allen, Esq., a popular and responsible sporting man of the Pacific coast, who offers to give a purse of \$2,500 for a race open to the world at \$2,500 "a corner" or stake each, 100-yards heats, best two in three, Sheffield rules, for four or more entries. With four entries this would make ten thousand dollars clear to the winner, who would feel well paid in showing himself up as the champion of the United States. A competent pistol fencer could be brought from the east for a fee of \$500 and expenses. L. E. Meyers, W. B. Curtis, any first-class man who fills that place at the Philadelphia handicaps, would be sure to give satisfaction to all, and insure every man a square, fair start. 20 minutes to be allowed between heats. Another thing in favor of this race taking place in California is that sprinting and every kind of legitimate sport is better patronized here than anywhere in the United States, and the climate is particularly adapted to outdoor sports. This race can be arranged without doubt, and Mr. Allen only awaits replies from the numerous champions to place satisfactory deposit.

But in the event of this race not filling, my money and man is ready at the BREEDER AND SPORTSMAN'S office to make a match with either Smith, Rogers, Johnson, Broadbent, "or any other man," 100-yards dash, or best 2 in 3 heats, Sheffield rules govern, for from \$2,500 to \$5,000 a side, and I will give or take \$500 for expenses, for choice of ground, and state. Hoping to hear from some of them soon. I remain,

Most respectfully yours,

M. K. KITTLEMAN.

### Ray Locke.

Has any of our clubs taken steps to find out the representations made by Ray Locke to the N. A. A. A. regarding his reinstatement? Locke's professional escapades were numerous, and are well known to many of our readers. It is hardly probable that the N. A. A. A. would re-instate Locke if they were fully informed of his performance. It is no use disguising the fact that a great many athletes will not compete against Ray Locke in the five-mile race at the Olympic Meeting. It is manifestly unfair that amateur runners who have never tried this distance will have to meet a professional runner of the experience of Ray Locke. The attendance and patronage of the general public last season showed a very gratifying increase, and there is every indication that the approaching meeting will be the most successful ever held on the Pacific slope, but the Committee of Athletic Clubs can rest assured that if the antics indulged in at the last Olympic meeting by the winner of the mile race are not nipped in the bud, the confidence of the public will soon disappear. Conduct unbecoming a gentleman at amateur meetings needs prompt and decisive action.

The fastest time ever made for three miles is 15 minutes 12 seconds, *Daily Papers*. Sporting scribes on the daily press always look up the records and don't take the statement of spectators.

William Steele and T. C. Herbert have been matched to run 10 miles for \$1,000 and the Championship of America.

### Another Sprinting Event.

M. M. Allen has decided to offer a purse of \$500 for a handicap race of 150-yards heats, \$300 to first and \$200 to second man, to be run at the Oakland Trotting Park two weeks from to-morrow. Entrance free. The handicapping will be carefully attended to, and starters will be brought as near together as possible. The race is a genuine free-for-all, and Mr. Allen invites the attention of Harmon, Kittleman, Geary, Masterson, McIntyre, Gihson, Lewis, Ross, Ryan and Thompson. Here is an opportunity which these runners should have no hesitation in availing themselves of, for they can lose nothing except their time and trouble, and may make a handsome winning. The \$200 to the second man increases the chances of pulling down a piece of the purse, and if some of them mean what they say they will enter at once.

### McIntyre vs. Ross.

According to the scribes of the daily press both men stripped in excellent condition for the three-mile-race for \$250 a side. To our thinking Ross was too fine, and before the finish of the race this fact was very apparent. McIntyre kept with his man till the last quarter of a mile, the pace up to this point being of a very ordinary description, and when the speed was increased Ross was very soon in difficulties, leaving McIntyre finish alone in 16 minutes 26 seconds. Ross will no doubt run McIntyre a five-mile-race, when a little more judgment thrown into his training will help him considerably.

### A Splendid Performance.

By cablegram we learn that W. G. George ran ten miles in 51 minutes 20 seconds. The event most probably occurred at the London Athletic Club games, held on April 5th at Stamford Bridge grounds. The general opinion prevailed that George would lower his own record of 52:53 this season, but few expected that the Mosely Harrier champion would beat the best professional time ever made. The best previous time for ten miles was made by L. Benett (deerfoot) 51 minutes 26 seconds, on April 3d, 1863. Wm. Steele holds the American record with 52 minutes 10 1-5 seconds.

### Cross-Country Running.

Both the Olympic and Merion Clubs have announced their intention of holding a cross-country run. The Merions will hold their run on the afternoon of Saturday May 3d, and all arrangements will be completed very early next week, when a meeting of all participants is to be held in order to explain details. It is absolutely necessary that participants start in and do a little exercising, and the sooner the better. No untrained man should take part in this exhilarating exercise.

Nearly all our athletes will, no doubt, find something to snit in the varied and liberal programme of the spring meeting of the Olympic Club, and published in the last issue of the BREEDER AND SPORTSMAN. It is sincerely to be hoped that the Bicyclists will take advantage of the liberality of the Olympic committee and fill up the three events set apart for them. A very important event omitted from the programme is the mile race. When this event could be won in 6 minutes, we always had one in the programme, and now when we have the material of making the mile well under 5 minutes, it is omitted. This is much to be regretted.

Some unusually good performances were made at the Leys School Sports, England, held March 19th. E. A. Bainbridge, who is only seventeen years, cleared 5 feet 6 1/2 inches in the high jump, and secured second place in the running jump with 17 feet 10 inches. M. H. Horsley who is but sixteen years old, in his first attempt at running long jump, registered 19 feet 10 1/2 inches, in the second 20 feet 1 1/2 inches, and the third 20 feet 8 inches. The latter jump was, however, not allowed. On the same day the 150-yards Stranger's race was captured by C. H. Lowe in 15 seconds after a hard finish with Tindall.

Oakdale *Wheat Grover*.—A base ball club has been organized and games are played every Sunday upon the common. The nine contains two or three players of considerable local fame. We think it will be conceded by all that R. H. Parkison is "the boss." He has played in several games against noted San Francisco clubs, and has each time distinguished himself for brilliant catches and swift running. Parkison is a pretty good all-around athlete, and we should not be surprised if he was some day offered a position in some club east of the mountains.

The "Putting Weight" contest" between D. A. McMillan and M. Keenan was the opening event at the Recreation Grounds last Sunday. McMillan allowed his opponent ten feet in the aggregate of the best throw with the 20, 25, and 30-pound weight.

McMillan.....	20 lb.	25 lb.	30 lb.
M. Keenan.....	30 ft. 9 in.	35 ft. 8 in.	40 ft. 7 in.
	26 ft. 9 in.	31 ft. 11 in.	35 ft.

It will be seen that McMillan won notwithstanding the handicap.

At Los Angeles, last Sunday, a sprinting event came off between a recent arrival from the east, calling himself Harry C. Taylor, and a local runner Andreas Ybarra. The stakes were \$200 a side, genuine cash, and Taylor conceded Ybarra 12 feet in 100 yards. The Los Angeleno won easily by three feet and a half in the slow time of 12 seconds. The track was fine and fast, and if "Taylor" was preparing the way for future matches he overdid the business.

At the next athletic meeting a face very familiar with the patrons of our club games will be greatly missed. We refer to one of our best all-round men, C. Slater, who will shortly leave the city on a business trip to Washington Territory, for an indefinite time. We are sorry to lose such a staunch supporter, and only hope that the trip will be financially successful. Drop us a line occasionally concerning the athletic prowess of our northern friends.

The third annual entertainment of the Nemean Athletic Club will take place next Friday evening at their club room corner Twenty-first and Howard streets. A varied athletic programme has been arranged, and as a great many prominent performers of the other clubs will participate, a splendid evening's entertainment may safely be anticipated.

The Cornell athletes believe in plenty of physical exercise. Their gymnasium is lighted by electricity, and consequently the most popular time for exercising is during the evening.

The Harmon-Kittleman race, set for to-morrow at the Oakland Trotting Park, has been postponed till Sunday the 20th, on account of the bad condition of the track.

The Portland Lacrosse Club have just received from the east all the necessary implements for the playing of the game, and will very soon start in practicing.

Six representatives of Cambridge University defeated a like number of the Blackheart Harriers at a cross-country run, March 15th.

The initiation fee of the New York Athletic Club will be increased from \$25 to \$50. The annual dues are to be \$30 instead of \$25.

Scotland defeated England by one goal to nothing March 15th, and on March 17th England defeated Wales at Association football.

Bell's Life is now issued twice a week, Wednesday and Saturday.

A Mr. Riley is reported as catching a trout on the headwaters of Pescadero creek weighing nine and a half pounds. There must have been an earthquake on the Pescadero about then. Such things will happen.

Van Dyke Hubbard reports good sport on San Mateo creek during the week. One day he himself caught 160 trout, some weighing a pound. The same report comes from other anglers.

The best fishing on Paper Mill creek is between Taylorville and Oisma. There are also small streams in the vicinity of Ross station where fair catches may be made.

The bay fishing was not very good during this week. Large flounders at Saucelito were again the order of the day.

Mr. P. Lorillard has the largest collection of two-year-olds of any turfman in the world.

The Gallatin Jockey Club, Tenn., now in process of reorganization, possess in the famous old Albion course one of the fastest tracks in the country. It is admirably situated near Gallatin, within easy reach of the railroad station of the L. & N. R. Surrounded by beautiful scenery of field and forest, with good water. It is in the midst of great turf interests.

Captain Lewis 2:20, owned in Rochester, N. Y., who has been kept quiet since the season of 1882 on account of a sprain, is now pronounced to be all right again.

Coughs. Brown's Bronchial Troches are used with vantage to alleviate coughs, sore throat and bronchial tions. Sold only in boxes.

TURF AND TRACK.

Imported Margrave.

This distinguished horse did much to improve the stock of the country, and while we do not expect to throw any light upon his breeding, performances and his get, we may instruct some whose connection with the turf bears date since he and his get figured upon the turf.

Margrave, bred by Mr. J. Dilly, in 1829, was by Muley, dam by Election; second dam Fair Helen by Hambletonian; third dam Helen by Delphini; fourth dam Rosalind by Phenomenon; fifth dam Atalanta by Matchem; sixth dam Lass of the Mill by Oroonoko; seventh dam by Old Traveller, eighth dam Miss Makeless by Young Greyhound; ninth dam by Old Partur; tenth dam Lambton's Miss Doe, dam by Woodcock; eleventh dam by Croff's Bay Barb; twelfth dam Desdemona, dam by Makeless; thirteenth dam by Brimmer; fourteenth dam by Dickey Pierson; fifteenth dam by Burton's Barb mare.

Muley, the sire of Margrave, was a bay, foaled 1810, bred by Sir T. C. Bunbury, by Orville out of Eleanor, by Whiskey, her dam Young Giantess (Sorcerer's dam), by Diomed out of Giantess, by Matchem.

Muley did not run at two, three or four years old. He started four times at five years old, and won twice. Newmarket Second Spring Meeting, for a Handicap Plate, £50, for three-year-olds and upwards, across the Flat, Muley, 5 years, 122 pounds, beat Castrella, 3 years, 88 pounds, and ten others. Same place, Second October Meeting, for a sweepstakes of 25 guineas each, for five-year-olds and upwards, Beacon Course, Idle Boy, 5 years, 120 pounds, beat Cwrr, 6 years, 126 pounds, second, and Muley, 5 years, 120 pounds, third. Same meeting, for a Subscription Plate, 50 guineas, across the Flat, Anticipation, 3 years, 100 pounds, beat Muley, 5 years, 123 pounds; Streamlet, 3 years, 100 pounds, third, and eight others. Same place, for a Handicap Plate, £50, for all ages, ditch in, over two miles, Muley, 5 years, 124 pounds, beat Emily, 5 years, 114 pounds, second; Caper, 3 years, 103 pounds, third, and four others. This ended his racing career, and he was retired to the stud.

The following are among the best of his get: Little Wonder, winner of the Derby in 1840; Vespa, winner of the Oaks, 1833; Margrave, winner of the St. Leger, 1832; Hassan, Amy Hutness, Mito, Monimia, Morisco, Neil Gow, Leviathan, Muleteer, Purcelle, Lucy, Vicar, Dandina, Tommy Tickle, Columbus, Gazelle, Winton, Atlas, Marpessa, Muley Moloch, imp. Britannia, Salute, Musselman, Lansdowne, Malibran, maid of Underley, Cantata, Dick Gilbert, Gurney, King of Clubs, Manfred, Ratsbane, Gibraltar, The Plover, Hantboy, etc. Muley died in 1837, after covering a few mares, aged 27 years.

The dam of imp. Margrave never appeared in public, and was put to the stud in her fourth year, and the following is a list of her produce.

- 1820—Brown colt Chatham, by Waterloo or Blucher.
- 1821—Principessa, by Blucher.
- 1822—Chestnut colt, by Soothsayer.
- 1823—Foal, by Rainbow. Died.
- 1824—Chestnut filly, by Corriuo.
- 1825—Bay colt, by Walton.
- 1826—Bay colt, by Orville.
- 1827—Bay colt, by Orville.
- 1828—Chestnut colt, by Muley.
- 1829—Chestnut colt Margrave, by Muley.
- 1830—Chestnut colt, by Muley.
- 1833—Bay colt, by Muley.
- 1834—Bay colt Marquis, by Muley.
- 1835—Chestnut filly, by Muley.
- 1836—Bay filly Marchioness, by Muley.
- 1837—Brown colt Meerut, by Muley.
- 1838—Chestnut colt, by Peter Lely.
- 1840—Chestnut colt, by Phylisian.

Baren in 1831, 1832, 1839, 1841 and 1842, and died in the spring of 1843.

Election, the sire of Margrave's dam, was a chestnut, foaled 1804, bred by Lord Egremont, by Gohanna out of Chestnut Skin, by Woodpecker, her dam Silver's dam, by Herod out of Young Hag, by Skim, etc.

Election started once at three years old, and won the Derby, 1 1/2 miles, colts 119 pounds, fillies 114 pounds; hay colt by Sir Solomon second, Coriolanus third, and eleven others.

At four years old started eight times and won six. Goodwood for the Ladies' Plate, 60 guineas, for all ages, two-mile heats, Election, 4 years, 144 pounds, 1, 1; Epsom, 4 years, 144 pounds, 2, 2; Tom Piper, aged, 167 pounds, distanced. Ascot for Swinley Stakes, 25 guineas each, 15 f., for all ages, 1 1/2 miles, Election, 4 years, 122 pounds, first; Stripping, 4 years, 122 pounds, second. Lewes for His Majesty's Plate, 100 guineas, four-mile heats, Election, 4 years, 144 pounds, 1, 1; Bob Booty, 4 years, 144 pounds, 2, drawn. Same place, for Ladies' Plate, 60 guineas, for all ages, 4 miles, Election, 4 years, first; Bob Booty, 4 years, second. Newmarket for His Majesty's Plate, 100 guineas, Beacon Course, Election, 4 years, 144 pounds, first; Rambler, 4 years, 144 pounds, second; Sung, 5 years, 160 pounds, third. Same place Eaton beat Election, 115 pounds each, across the Flat, for 200 guineas. Same place for Oaklands Stakes, of 30 guineas each, Bunbury mile, 7 furlongs 208 yards, Election, 4 years, 119 pounds, first; Weaver, 3 years, 100 pounds, second; colt by Hambletonian, 3 years, 91 pounds, third, and three others. Same place, Deceiver, 1163 pounds, beat Election, 4 years, 121 pounds, Abingdon mile, for 200 guineas.

At five years old started five times and won three. He was unplaced for Oaklands Stakes, ditch in, over 2 miles, won by Bachanal, 4 years, 115 pounds; Election, 5 years, 125 pounds; nine started. Same place, Newmarket, was unplaced to Subscription Plate, T. Y. C., won by Agnes, 3 years, 126 pounds; Hyman, 3 years, 119 pounds, second; Election, 5 years, 126 pounds, and four others unplaced. Brighton for Pitworth Stakes, 10 guineas each, 4 miles, Election, 5 years, 119 pounds, first; Nymphania, 5 years, 116 pounds, second. Lewes for His Majesty's Plate, 100 guineas, four-mile heats, Election, 5 years, 160 pounds, 1, 1; Sunbeam, 4 years, 144 pounds, 2, 2; Hippomonas, aged, 170 pounds, 3, 3; same place, walked over for the Ladies' Plate, 60 guineas, four miles.

At six years old started seven times and won seven. At Goodwood walked over for the Ladies' Plate, 10 guineas each, 20 guineas added, two-mile heats; 3 subs. Guilford for His Majesty's Plate, 100 guineas, four-mile heats, Election, 6 years, 168 pounds, 1, 1; Guotho, aged, 170 pounds, 2, 2; Brighton for a Plate, £100, 4 miles, Election, 6 years, 124 pounds, beat Gandy, 5 years, 118 pounds. Lewes for His Majesty's Plate, 100 guineas, four-mile heats, Election, 6 years, 168 pounds, 1, 1; Discount, 5 years, 160 pounds, 2, drawn. Same place, for a sweepstakes of 10 guineas each, 20 guineas added, 4 miles, 7 subs., Election, 6 years, 124 pounds, first; Gandy, 5 years, 114 pounds, second. Same

place, walked over for the Ladies' Plate, 60 guineas, 4 miles. Egham for Gold Cup, 100 guineas, by subscription of 10 guineas each, 4 miles, 13 subs., Election, 6 years, walked over.

At seven years old started three times and won once. Guilford walked over for His Majesty's Plate, 100 guineas, four-mile heats. Lewes for His Majesty's Plate, 100 guineas, four-mile heats, Wild Boy, 4 years, 144 pounds, 2, 1, 1; Election, aged, 100 pounds (rider fell), 1, 2, dis. Same place, for Ladies' Plate, 60 guineas, 4 miles, Scorpion, 6 years, 121 pounds, first; Election, aged, 123 pounds, second.

This ended his racing career, and he died in June, 1821, aged 17 years. The following are among the best of his get: Elector, Leah, Manfred, winner of the Two Thousand Guineas in 1817, Motley, Annabel, Barleycorn, M. P., Admiral, Hospitality, Lovemore, Gustavus, winner of the Derby in 1821, Electress, Blood Royal, Plumper, Tipsy, Regent, Aaron, Don Carlos, Haja Baba, Minima, Cramer, Gavotte, Rufus, Tontine, Waltz, Nigel, Pigmy, Freeholder, the dam of Margrave, etc.

Description of imp. Margrave. Margrave was a rich dark chestnut, without white, and stood full 16 hands high. He was a horse of immense substance and power, with large bone, good action, excellent constitution, which he imparted to his stock, excellent temper, and a sure foal getter. He was not what would be called a handsome horse in his general contour, still highly and powerfully formed, and would strike one a horse capable and suitable to get horses for all purposes.

Performances of imp. Margrave. At two years old started four times, won three and second once, Stockbridge for sweepstakes, 50 sovs. each, h. f., for two-year-olds, colts 119 pounds, fillies 116 pounds; three-quarters of a mile, Margrave first, Eleanor second; Revealer third; Nannette fourth. Winchester for sweepstakes, 50 sovs. each, h. f., colts 117 pounds, fillies 115 pounds; T. Y. C. Margrave walked over. Newmarket, for Clearwell Stakes, 30 sovs. each, 20 f., colts 117 pounds, fillies 115 pounds; T. Y. C. Emiliana first, Margrave second, and eleven others unplaced. Same place, for the Criterion Stakes, 30 sovs. each, 20 f., over five furlongs (36 subs.), Margrave first, Archibald second, and seven others unplaced.

At three years old started five times and won three. Epsom, for the Derby Stakes, 50 sovs. each, h. f., colts 119 pounds, fillies 114 pounds, mile and a half (101 subs.), St. Giles first, Perion second, Trustee third, Margrave and eighteen others unplaced. Doncaster, for the Great St. Leger Stakes, of 50 sovs. each, h. f., colts 118 pounds, fillies 115 pounds; about one mile and three-quarters, 73 subs.; Margrave first, Birdcatcher second, and fifteen others unplaced. Same place, for Gascoigne Stakes, of 100 sovs. each, 20 f., for three-year-olds, St. Leger Course, 11 subs.; Margrave 122 pounds, first; Julius, 118 pounds, second. Newmarket, for the Grand Duke Michael Stakes, 50 sovs. each, colts 119 pounds, fillies 115 pounds; across the Flat, 15 subs.; Margrave first, Salute second, Oalata third, and two others.

At four years old started twice and won once. Newmarket, for Claret Stakes, 200 sovs. each, h. f., colts 119 pounds, fillies 114 pounds, ditch in, 2 miles and 97 yards; 8 subs; Trustee first, Minster second, Beiram third, Margrave fourth. Same place, Margrave, 4 years, 121 pounds, received 100 guineas forfeit from Bassetlan (dead), 114 pounds, Abingdon mile.

Margrave went to the stud in 1834, and made the season of 1835 in England. In the fall of 1835 he was purchased by Messrs. Merritt & Co., and imported into Virginia. The following are some of his get in England; Margravine, Mulberry Wine, Percy, Fame, Mazznika and Margaret, the latter the best. Margrave made his first season in Virginia, in 1836; he also stood at Nashville, Tenn., at Lexington, Ky., two or three years, and the last place we find him published as a stallion was Selma, Ala., at T. B. Goldsby's, and he died in 1852, aged 23 years, at Selma, Ala., the property of Major Gee of Alabama.

The following are among the best of his get in this country: Alamode, Blue Dick, Brown Dick, Doubloon, Crisis, Emma Wright, Eleanor Margrave, Florin, Fanny G., Henry Perritt, Highland Mary, Landscape, Mark Young, Patsey Hatcher, Tom Payne, Lady Margrave, Uilla, Yellow Rose, Gosport, and Earl of Margrave. Of his sons none were very successful as sires, Brown Dick and Doubloon being the best, but his mares have left a number of first-class descendants. Countess was the dam of Katona by Voncher, from whom Tom Ochiltree, Metairie, Item, Bob Woolley, Idalia, etc., have sprung. Crisis was the dam of Donerall, an excellent race-horse by Lexington. Ellen Hoe produced Grace Darling and Katy Darling, from the latter came Derby, a good hurdler and steeple-chaser. Emma Wright is the dam of Lanra Farris, Mollie Jackson, Miss Doyle, Earring, Woodcock, Jerseyman, George Wilkes and Emeti. Mollie Jackson is the dam of Monday, sire of Mollie McCarthy, Sne Morrissey, the granddam of the great Foxhall, etc. Fanny, by Margrave, was the dam of Edward Everett, the sire of Judge Fullerton, record 2:18. Fanny G. produced Liz Mardis, Endorser, Lady Dan Bryant, Emma Maratta, Estella (grandam of Alcantara, four-year-old record 2:23, and Aleyone 2:27) and Vidette (the dam of Camargo). Lady Margrave was the dam of Undine, Levine, etc., the former the dam of Uncle Vic, who raced well and proved a good sire. Margaret Hunter was the dam of Kate Bateman by Glencoe, Sally by Sovereign; Greek Slave by Glencoe, Stumps by Lexington, Roxana by West Roxbury, etc. From her have descended Sarong, the dam of Aristides, Eaglo, Maggie Storm, Long Nine, O'Malley, La Reive, Lampi, Strychine, Arsenic, Punch, Tipperary Girl, Gus Matthews, etc., an excellent racing family. The dam of Iceberg, Fatima, Rebecca T. Price (dam of Mablstiek and Apollo), Capitola (dam of King Alfonso), Mary Churchill (dam Nettie Viley, Florence Wallace, Hamburg, Wade Hampton, etc.), Versailles, The Grand Duchess by Vandal, Oakland, Leisnre, etc., were by imp. Margrave. Margravine was the dam of James A. Connelly, a great race-horse, Blind Tom, etc. Uilla was the dam of Young Uilla, Ulverston and Ultima; the latter dam of Anorra Ruby (dam of Bill Bruce, Charley Gorham, Respond, etc.), Nuisance, Sunrise, Atilla, etc., Victoire was the dam of Omer, Zaideo (dam of Dublin, Naunie McDouald, etc.), Lilla (dam of Gen. Duke, Cibilicothe, Lilly Duke, etc.), Vandalia (dam of Ceylon, Volusia, etc.), Estella by Star Davis (dam of Henry Owens, etc.).

It will be seen from the above though Margrave, like Leviathan and many other imported sires, left no sons to perpetuate their line, his mares have been of the greatest benefit to the stock of the country. The great mistake made with Margrave was the same as that made with Leviathan; they were not, as a rule, crossed with the proper blood. Marpessa by Muley was bred to Glencoe, and produced the great Pochontas, who, in turn, crossed with The Baron and Harkaway, gave England some great stallions in Stockwell, King Tom and Rataplan. The Muley blood crossed upon Sultan, and that again topped with Whalebone blood, as found in The

Baron, Harkaway, Touchstone, etc., has been one of the most successful ever made in Great Britain. We have always believed that the successes of both Margrave and Leviathan would have been greatly increased by crossing them on Sultan blood, as found in Glencoe, his sons and daughters; and if the late A. Keene Richards had selected Margrave and Leviathan mares for Knight of St. George, who was a compact, short-muscled horse, his success at the stud would have been greater, they would have lengthened the muscles and reach of his get, which they so much required. It will not do to breed race-horses either from prejudice, economy, or convenience. If you wish to be successful examine the breeding of the winning horses, ask yourselves how these strains are to be had, and when the answer is obtained breed your mares as near as you can to their standard.—Live Stock Record.

Lord Falmouth's Sale.

On the 28th an event will take place at Newmarket, England, equal in importance to any event of the month, viz., the sale by auction of Lord Falmouth's horses in training. The sale is not a winnowing out of the chaff from the grain, but a genuine one of all the horses that Matthew Dawson is now training with as much care as if it was intended for them to carry the famous magpie jacket and cap. Among those to be sold is one of the favorites for the 2,000 Guineas—Harvester—who is also highly thought of for the Derby. There is also a choice lot of two-year-olds, equal in breeding to those which, for the last ten years, have put Lord Falmouth's name among the largest winners on the English turf. For the information of those who may not be able to obtain a catalogue of the sale, they are given herewith as follows:

Four-year-olds.

Ch c Graudmaster, by Kingcraft, dam Queen Bertha.  
Ch c Prince Maurice (own brother to Dutch Oven), by Dutch Skater, dam Cantinere.

Three-year-olds.

B c Titark, by Skylark, dam Placentia.  
B c Harvester, by Sterling, dam Wheatear.  
B f Lady Bonntilly, by Silvio, dam Lady Golightly.  
B f Busybody, by Petarch, dam Spuiaway.  
B f Baloon, by Queen's Messenger, dam Whirlwind.  
Ch c Woodpecker, by Petarch, dam Gertrude.  
B c Gyrstler, by Skylark, dam Mavis.  
Ch c Sogth, by Queen's Messenger, dam Lady of Mercia.  
Ch c Littlejohn, by Kingcraft, dam Jannette.  
B c Lillibullero, by Silvio, dam Lilian.

Two-year-olds.

B e Louisbourg, by Hampton, dam Chevisancee.  
Ch f Jael, by Silvio, dam Jannette.  
B f Estber Faa, by Skylark, dam Wheel of Fortune.  
B f Lady Chataleine, by Silvio, dam Lady Golightly.  
Ch f Armida, by Childerie, dam Mavis.  
Ch c Palladio, by Albert Victor, dam Placentia.  
B c Tiverton, by Honiton, dam Ante Diem.  
B c Occoanut, by Silvio, dam Palmflower.  
Ch c Tressillian, by Silvio, dam Lilian.  
B f Themisto, by Childerie, dam Hurricane.  
Ch f Queen's Color, by Queen's Messenger, dam Cecilia.  
B f Vivacity, by Childerie, dam Agile.

A glance at the breeding of these horses is almost a condensed history of the Derby, Two Thousand Guineas, One Thousand Guineas and the St. Leger for the last fifteen years, these events having either been won by the sires and dams represented, or by some of their progeny. All the horses in the catalogue are engaged in the most prominent stakes, and will be sold under Lord Exeter's conditions. It is understood that several American owners will be represented at the sale through Messrs. Bruce & Easton, of New York, as the representatives of the Messrs. Tattersall. There has also been some discussion as to the prices likely to be realized, and in one quarter 1,000 guineas is the price fixed for Harvester. And it is not unlikely that such a figure will be obtained should the Duke of Portland, Sir Frederick Johnstone, the Duchess of Montrose, Lady Stamford and other wealthy owners enter into competition for him.

Downing the Favorites.

At New Orleans, on the 1st, occurred one of those rare bettor's benefits which are so cheering to the small investor. In three races out of four the favorites were beaten. Book-makers were not so badly scorched as the report of the result would seem to indicate, for although they offered 15 to 1 against P. Line, the unexpected winner of the second event, there were few takers even at those odds, and the books were won nearly clean.

The weather was clear and warm, but somewhat windy, which made the track fast and dusty. The details are as follows:

FIRST RACE.—Purse \$—, for all ages; three-quarters of a mile.  
H. Ellsworth's cb g Boz Sedam, 5, by Hurrah, dam Albion, 85 lbs.  
L. Massey Bros.' b m Little Buttercup, aged, by Hurrah, dam Bonnie Kate, 65 lbs.  
D. L. Bergamin's ch f Gilt, 4, by Tom Sawyer, dam by Girey 75 lbs.  
D. L. Bergamin's b f McCarty, 4, 93 lbs.  
D. L. Klaberg's b g Allanoke, 4, 78 lbs.  
Time—1:16.  
Pools.—Gilt, \$40; Boz Sedam, \$26; Little Buttercup, \$4, and Allanoke, \$4. Post odds 8 to 5 against Boz Sedam.

SECOND RACE.—Purse \$—, for all ages; selling allowances; five furlongs.  
P. Bouché's cb g P. Line, 5, by Pat Malloy, dam Mary L., 91 lbs.  
L. Massey Bros.' cb m Little Dale, aged, by Young Australian, dam Lizzie Palmer, 94 lbs.  
E. Green's b g Claude Brannon, aged, by Buckden, dam Lucy Dndley, 100 lbs.  
E. Green & Todd's ch g Sorrel Dan, aged, 100 lbs.  
M. T. Danaber's b f Matrimony, 4, 93 lbs.  
J. J. Carroll's b f Polonia, 4, 104 lbs.  
T. H. Dillard's b g Nat Trimble, 6, 94 lbs.  
Time—1:33.  
Pools.—Field, \$20; Sorrel Dan, \$15. Post odds 15 to 1 against P. Line.

THIRD RACE.—Purse \$—, for all ages; selling allowances; seven furlongs.  
F. Berninger's cb g Riddle, 5, by Lelaps, dam Puzzle, 88 lbs.  
J. J. Carroll's cb g Bagdad, 6, by Ventilator, dam Queen of Scots, 104 lbs.  
H. Ellsworth's br m Ida B., 5, by Monarchist, dam Katinka, 101 lbs.  
J. Gray's cb g Joe Cooper, 5, 91 lbs.  
Time—1:30.  
Pools.—Riddle, \$20; the field, \$10. Post odds 2 to 1 on Riddle.

FOURTH RACE.—Purse \$—, selling allowances; seven furlongs.  
J. W. Thayer's cb b Mart Boorheun, 5, by Jack Rowett, dam by Capt. Elgee 91 lbs.  
M. T. Danaber's ch g Callao, aged, by Planet, dam Betty Ward 109 lbs.  
M. T. Danaber's ch m Queen Estber, aged, by Bulletin, dam Glendary, 94 lbs.  
W. B. Jenkens's ch g Torrid Zou, aged, 85 lbs.  
Time—1:30.  
Pools.—Queen Esther, \$20; Mart Boorheun, \$11; Torrid Zou, \$10; Callao, \$9. Post odds 2 to 1 against Mart Boorheun.

The Chicago Handicaps.

The weights assigned the two principal handicaps to be run during the inaugural meeting of the Washington Park Association at Chicago, between June 28th and July 28th, are as follows:

The Great Western Handicap.

A sweepstakes for all ages, at \$100 each, half forfeit; \$15 only if declared by May 1st, 1884, with \$1,500 added, the second to receive \$300 and the third \$150 out of the stakes; winners of any race after the publication of the weights on April 1st of the value of \$1,000 to carry 5 pounds; of \$1,500, 7 pounds; of \$2,000, 10 pounds extra; mile and a half.

Table listing horse names and weights for the Great Western Handicap, including Force, Patsy Duffy, Gen. Monroe, Apollo, Lida Stanhope, Harry Gilmore, Duke of Monday, Duke of Montalban, Wedding Day, Boatman, April Fool, Wallansee, Topsy, Alimude, Barney Aaron, John Henry, Grismer, Matt McGinness, Markland, Hilarity, Little Ruffin, Vera, Queen Ban, Fair Count, Monogram, Lizzie, Cardinal McCloskey, Barnum, Slocum, Joe Mitchell, Dave Yandell, Brad, Bonero, Mandamus, Northland, Annie G., John Sullivan, Avalon, Chantilly, Taxgatherer, Sovereign Pat, Bob Pate, Aleck Ament, Ascalon.

The Oakwood Handicap.

A sweepstakes for all ages, at \$50 each, half forfeit; \$10 only if declared by May 1st, 1884, with \$1,000 added, the second to receive \$200 and the third \$100 out of the stakes; winners of any race after the publication of the weights on April 1st of the value of \$1,000 to carry 5 pounds extra; mile and a furlong.

Table listing horse names and weights for the Oakwood Handicap, including Mediator, Force, Jim Renwick, Gen. Monroe, Fellowplay, Harry Gilmore, Mammonist, Duke of Monday, Freeland, John Henry, Ascender, Saunterer, Markland, Wedding Day, Wallansee, Disturbance, Grismer, Monogram, Hilarity, Topsy, Barney Aaron, April Fool, Lizzie, Long Knight, Vera, Fair Count, Aretino, Brunswick, Ada Glen, Princess, Cardinal McCloskey, Queen Ban, Brad, Mattie Rapture, Wapackonia, Joe Mitchell, Chantilly, Olivette, Bonnie Bird, Avalon, Gus Matthews, Taxgatherer, Finality, Boz Sedam, Sovereign Pat, Sadie McNairy, Dave Handall, Nellie Peyton, Richard L., Glengarine, Carley B., Polonia, Aleck Ament, Rosaline.

Palo Alto Stock Farm has sold to T. F. Lynch and Lee Shaner the bay gelding Jon Jon, by Monday, dam Plaything by Alarm, from The Pet by Vandal. Jon Jon is three years old, and a clinking good colt, but being a gelding had to give way in the process of relieving the crowded quarters now going on at Palo Alto.

Townsend Bros., of Wheatland, Oregon, have purchased of E. J. Dawne, Salem, the chestnut stallion Albate by George Wilkes (son of Asteroid), dam Sparrowhawk by Humboldt. The consideration was \$1,500.

Trotting Horse Breeders' Club.

An association has been formed in New York under the above title, for the purpose of compiling a trotting stud-book. The following prospectus has been mailed to breeders, owners and others interested in the matter.

This club has been recently organized under articles of incorporation by virtue of a statute of the state of New York.

The trustees to manage this business for the first twelve months are the undersigned incorporators, from whom Edwin Thorne has been selected as president, Shepherd F. Knapp as vice-president, and James B. Honston as secretary and treasurer.

Its principal place of business is the city of New York. The capital is \$10,000 (to be increased if deemed advisable) in shares of \$25 each. All subscriptions to be paid in full as made.

The object is to compile and publish a Trotting Horse Stud Book.

It is proposed by this organization to purchase, if practicable, the two existing stud-books, and discontinue their publication, substituting "The National Trotting Stud Book," a work to be compiled, owned, controlled and published by this club.

The primary object hoped to be obtained is the improvement of the breed of trotting horses by an elevation of the standard, by the truthfulness of the pedigrees, and accuracy of the records required for admission to registration. Trotting horses have been long enough bred on scientific principles for breeders to realize that certain strains of blood are recognized, and that to educate the public and protect buyers from imposition breeders should make some standard that would eventually lead to as well established class of the trotting horse as that of the thoroughbred running horse. To do this a standard based on the 2:30 list is deemed the best plan, and the rules adopted in The Breeders' Trotting Stud Book approximate what is desired by those taking the most interest in this movement.

But in order to obtain the views of as many breeders as possible we ask you to write to Mr. L. Brodhead, Spring Station, Woodford county, Ky., making such suggestions as may present themselves, and we further ask that you will attend a meeting to be held at Chicago, at Grand Pacific Hotel, on the 12th of May, at 12 m., to consider this matter.

It is expected that this club will be admitted as a member of the National Trotting Association, and that as such it will have access to its accurate and valuable official records for use and publication in the stud-book, and what is of even more importance, to its well-organized and able tribunals for a hearing and decision of such questions as may arise between the breeder and the compiler, on the refusal of the latter to record a pedigree or acknowledge a record.

The Board of Appeals of the National Trotting Association is, as a general rule, composed of men of recognized position, good judgment, accustomed to hear and decide kindred questions to such as will arise here, and above all, men that are free from prejudice and theories.

The fact that this court meets often, and at different and convenient points in the country, and that in the exercise of its discretion it can so punish a wrong-doer as to impair the value of his property (the animal sought to be wrongfully registered), makes it the best, and in fact, the only competent tribunal for such questions.

That the National Trotting Association will lend its aid in this much-needed and good work was shown by the overwhelming vote at its last congress.

Should you desire to subscribe to the capital stock of this club, a letter addressed to "J. B. Houston, secretary, Mills Building, New York city," enclosing a check for the amount of stock desired will receive attention.

The object in laying this before you is not so much to get pecuniary aid as that breeders throughout the whole country may become interested in this movement.

Edwin Thorne, David Bonner, Shepherd F. Knapp, James B. Houston, Henry C. McDowell, incorporators.

Ages of Noted Thoroughbred Brood-Mares.

The annexed table shows the years foaled and ages of mares which have been reared distinguished by the performances of their produce. There are many noted mares in the stud-book, the dates of foaling and death of which are not known, in consequence of the carelessness with which records were kept in former times. We glean from an examination of the produce of the mares mentioned below another very interesting feature, in being able to ascertain at what age the best foals were produced, and we find that the majority of the best race-horses were dropped when their dams were over nine years old. Imp. Batta foaled Glenelg at 8 and Cleopatra at 13; imp. Bernice dropped Electra at 10 and Bertram at 15, both by Kentucky, and good race-horses, and at the advanced age of 22 she foaled Bella, by Fiddlesticks, a very speedy lily. Voncher, by Wagner, was foaled when his dam, imp. Britannia, was 11, and Verona by imp. Yorkshire, the dam of Vanhall, was foaled when Britannia was 22. At the age of 5 Cairngorm produced Coral by Vandal, the dam of Wanderer, Anstral, Uncas and Rambler, and Eltbam Lass produced Kingfisher at 8. When the great imp. Australian saw the light, his dam imp. Emilia had reached the ripe old age of 18, and her last foal Ulrica was dropped at 23. Imp. Filagree became the dam of Fiddlesticks at 14, and imp. Gallopade, the fountain-head of the great Danca family, produced the world-renowned Reel, by Glencoe, at 10, and imp. Maud produced Alarm at 10; imp. Target was 15 when she dropped Creedmore, imp. Weatherwitch was 19 when Fonso was foaled and 11 when Florence, the dam of Hindoo, came into being. Alabama had reached 15 when she gave birth to Madge, by imp. Australian; Alice Carneal was 14 when Lexington, the emperor of stallions, was foaled, and at 19 produced Lavender, by Wagner, the dam of Helmholt and Baden-Baden, two of the best race-horses this country has produced. Old Balloon, by imp. Yorkshire, foaled Trne Bull at the age of 17, and Revolver at 10. Bay Leaf was one of the most famous brood-mares of this or any other country having had thirteen foals, the majority of which were good race-horses. At 8 she produced Beacon, 10 Bayswater, 12 Bayonet, 14 Preakness, 15 Bingaman, and at 19 Bay Final—all good race-horses. At 10 Bonnets o' Blue gave birth to Fashion, by imp. Trustee, the sensation of her day and the conqueror of Boston, and King Alfonso came into the world when Capitola was 14. At the age of 15 Dollie Carter dropped the phenomenal Joe Daniels, by imp. Australian, and Hennie Farrow produced Mollie McCarthy when 20 years old. Hymenia was 13 when Virgil was foaled, and Idlewild 11 when she gave birth to the illustrious Wildside.

Tom Ochiltree was foaled when Katona was 15. Lanra, by Leviathan, foaled Harry of the West at 16. Lavender was 11 when Helmholt was foaled, and 19 at the birth of Baden-Baden. Levity dropped Lightsome at 10; Mildred, the dam of Monarchist, Minx, Stamps, etc., at 11, Lever at 18, and Legatee at 21, her last foal. Lucy Fowler at 13 foaled Tom Bowling, at 14 Aaron Pennington and at 15 Calvin; and

Madeline was 16 when she produced Maggie B. B., the dam of Iroquois. Magnolia, by imp. Glencoe, one of the best brood-mares this country has ever had, died at the age of 23, having placed to her credit thirteen foals; at 15 she produced Daniel Boone, at 19 Skeddadd, 20 Kentucky, about the best son of Lexington, 21 Gilroy and 23 Victory. But few mares have ever lived which left a brighter escutcheon than that of Magnolia. Mildred produced Minx at 10, Monarchist at 12, Sultana at 17, and Frederick the Great at 18. Miller's dam, Selma, produced American Eclipse at 12. At 12 Nantura had Longfellow. Reel was 12 when she produced Leecompte, 15 when Priores was foaled, and 21 at the foaling of War Dance, who was her last. Tokay gave birth to King Lear at 12 years of age, and St. Martin at 21. Topaz was 10 when she produced Waterloo, foaled Colton at 13 and Lodi at 16. Zero was foaled when Zenobia was 10, and Jerome Edger when she was 19. Novice produced Norfolk at the age of 8. Nina was 7 when Planet was foaled, and left to her credit fifteen foals. Resene, by Bethune, was 21 when Abd-el-Kadee was foaled, and 24 at the birth of Abd-el-Koree, her last and best foal. Maiden was 11 years old at the birth of Parole, 17 when she dropped Powhattan, and 18 at the birth of Partenia, her last. We might give instances of living mares that have produced race-horses comparatively young, and some whose first foals were their best, yet in the majority of instances the best horses have been foaled when their dams were well along in years. Of the mares which have produced their best foals early, Jamaica is the most noticeable example. Foxhall, one of if not the best horse of the present age, was Jamaica's first foal, and was dropped when she was only 7. Lyttleton was foaled when Fanny Holton was only 5, and Ten Broeck, her last foal, at the age of 10, when she died. The above facts seem to indicate that the breeding capacity of mares improves as they grow older, if they have been kept breeding regularly. Below we give table of ages:

AGES OF PROMINENT THOROUGHBRED MARES.

Table listing mare names, foaling years, and ages of foals, including Allegrante, Batta, Bernice, Cairngorm, Eltham Lass, Emilia, Filagree, Gallopade, Heads or Tails, Maud, Target, Weatherwitch, Alabama, Anna C., Ariel, Balloon, Bay Leaf, Belle Brandon, Blue Bonnet, Bonnets o' Blue, Capitola, Dolly Carter, Fashion, Heiress, Hennie Farrow, Heraldry, Hymenia, Idlewild, Katona, La Henderson, Lanra, Lavender, Lilla, Lucy Fowler, Maiden, Magnolia, Margaret Wood, Mildrid, Miriam, Nantura, Nina, Novice, Peytona, Peayune, Reel, Rowena, Susan Beane, Tokay, Topaz, Volga, Verona, Zenobia.

The Dwyer Two-year-olds.

"A Veteran" correspondent writing to the Brooklyn Eagle gives some interesting details of the Dwyer stables, including the prices paid for the two-year-olds now in training, and as the information was, no doubt, obtained from one of the brothers, it will be found of interest. Names and prices paid are as follows:

Table listing horse names and prices, including B c Elmendorf, Blk g Electric Light, Er c Emmet, B c Richmond, B c Petersburg, Br f Miss Palmer, B c Executor, B c Lennox, Blk c Detective, Ch c Greenfield, Br c Sumner, Ch c Sea Foam, Ch c Botter, Ch f Rippalette, B c Col. Clay.

As to the prospects of these youngsters the writer says: "They are all untried, but out of the above there four who will make their mark this season. One of the fillies will be as good as, if she does not excel, even Miss Woodford in speed. I think she will be one of the grandest two-year-olds I ever put eyes on. Another of the fillies, although somewhat under size, I think will turn out to be another Katie Pease. A more racing-like nag it would be hard to find. I think this is one of the most formidable racing stables ever got together in this country, and one it will be very hard to beat this year. Well may Brooklyn be proud of the Brooklyn Stable." In New York there is an opinion that the cheapest in the lot—Col. Clay—will be found to be as good as any of them.

Santa Claus and Overman are in the stable of J. Turner at Philadelphia.

Capital Turf Club.

Entries for the Spring Meeting of this association closed last Saturday. The following is the list:

No. 1. Running—Purse \$200; free for all two-year-olds; half-mile dash. Winner of half-mile dash at P. C. B. H. meeting to carry five pounds extra. This race did not fill, and the club substituted a prize of \$250 for all two-year-olds; five-eighths of a mile. Entries to close April 21st.

No. 2. Running—Purse \$300, for all ages; three-quarters of a mile and repeat.

Lee Shaner's h g Jon Jon, three years, by Monday—Praying.

Lee Shaner's b e Haddington, aged, by imp. Haddington—Prairie Flame.

John Mackey's h f Susan, three years, by Warwick—Folly.

John Mackey's b f Mileta, three years, by Lever—Malta.

M. M. Allen's br c Bryant W., four years, by Monday—Bebe.

W. L. Pritchard's b h Frank Rhoads, aged, by Leinster—Ada A.

Delaney & Ayres' s m Trade Dollar, aged, by Norfolk—Eva Ashton.

Fred Bridges' s g St. Patrick, aged, pedigree not given.

No. 3. Running—Purse \$250, for all ages; one and one-quarter miles.

L. J. Rose's s g Harry Rose, three years, by Rutherford—Aileen Oge.

John Mackey's b f Rosa Bella, three years, by King Alfonso—Miranda.

John Mackey's ch m Glorienne, three years, by Joe Daniels—Rebecca.

M. M. Allen's h s Joeko, aged, by Cariboo—Reply.

W. M. Murry's hr s Birdcatcher, aged, by Spectre—Pet.

W. L. Pritchard's ch f Lizzie Dunbar, three years, by Bazar—Tibbie Dunbar.

W. B. Todhunter's b s John Funk, five years, by Monday—Susie B. Moore.

Delaney & Ayres' ch m Laura, four years, by Shannon—Folly.

4. Trotting—Purse \$200; for two-year-olds owned in Butte, Colusa, Sacramento, Tehama, Yuba and Yolo counties on January 1st, 1884; mile heats, 2 in 3.

S. K. Trefry's b c Apex, by Prompter, dam by Flaxtail.

Worth Ober's br c Reveille, by Admiral, dam by San Bruno.

John Mackey's b f Visalia, by Echo, dam Dolly Varden.

John Mackey's gr c Eagle, by Echo, dam Sally-Come-Up.

R. H. Newton's h k c Sur Del, by Del Sur, dam by Black Ralph.

W. B. Todhunter's s c Cannon Ball, by Prompter, dam Gazelle.

No. 5. Trotting—Purse \$500; 2:35 class.

W. F. Smith's blk g Thapsin, four years, by Berlin, dam Lady Hubbard.

L. H. Todhunter's b g Mack, by Gen. Reno, dam by Norfolk.

L. N. Billings' blk g Slim Jim, by Tyler's Black Hawk.

J. T. McIntosh's b g Telegraph, by Tilton Belmont.

J. W. Donathan's b s Bob Mason, by Echo, dam Belle Mason.

No. 6. Running—Sacramento Derby; purse \$300; free for all three-year-olds; one and one-half miles.

L. J. Rose's s g Harry Rose, by Rutherford—Aileen Oge.

P. Siebenthaler's b c Philip S., by Leinster—Lily Simpson.

John Mackey's b f Faustina, by Glenelg—Marmot.

John Mackey's ch f Assyria, by Lever—Asia.

W. M. Murry's s c Col. Jack Hays, by Joe Daniels—Liberty.

W. L. Pritchard's ch f Lizzie Dunbar, by Bazar—Tibbie Dunbar.

No. 7. Running—Purse \$400, for all ages; one mile and repeat.

Lee Shaner's b h Haddington, aged, by imp. Haddington—Prairie Flame.

John Mackey's ch f Glorienne, three years, by Joe Daniels—Rebecca.

John Mackey's b f Rosa Belle, three years, by King Alfonso—Miranda.

M. M. Allen's h s Patsy Dunfy, aged, by Leinster—Ada A.

Delaney & Ayres' s m Trade Dollar, aged, by Norfolk—Eva Ashton.

No. 8. Running—Consolation purse.

No. 9. Pacing—Purse \$500, for horses that have never beaten 2:20.

Henry McConn's br g Fairmount.

S. C. Tryon's br g Prince, by Missonri Chief, dam by Belmont.

M. M. Allen's dn g Johnny Weigle.

J. T. McIntosh's b g Fred Ackerman, by Washington.

M. F. Odell's b g Shaker.

No. 10. Trotting—Purse \$800; free for all.

A. Waldstein's b s Albert W.

J. A. Goldsmith's gr e Romero.

P. Farrell's b g Vanderlynn.

This race failing to receive the requisite number of entries the Secretary was ordered to correspond with each nominator, stating that the club will give a purse of \$500 for the three horses named, if it will be satisfactory.

No. 11. Trotting—Purse \$500; 2:27 class.

George Leiby's blk g B. B., by Millman's Bellfounder.

W. F. Smith's h g Adair, by Electioneer.

M. M. Allen's ch g Tamp Winston, by Primrose.

J. A. Goldsmith's h m Sister, by Admiral.

This race fell short one entry, but the club decided to offer the purse for the four entries.

No. 12. Pacing—Purse \$300; for pacers owned in Sacramento county, January 1st, 1884, which have never beaten 2:30.

F. H. Slack's br g Gen. Garfield, by Tecumseh, dam a Nelson mare.

Worth Ober's b g Johnny Catch'em, by Primus.

L. H. Todhunter's g r Evre, by Ulster Chief, dam Marysville Queen.

Albert Teitjen's b m Patti, by Crisman's Patchen, dam by Gen. Knox.

J. W. Wilson's h g Roden, pedigree not given.

P. Potter's ch g Ned Forrest, pedigree not given.

Lem Ullman is arranging the programme for the Blood-Horse Meeting at the Bay District. He will leave for the east soon after the close of the meeting, about the 20th, to attend to the programming in the circuits, commencing at Philadelphia. Lem has enjoyed himself since he arrived in San Francisco, and will return next fall at the close of the eastern season, and continue the experiment of wintering on this side of the continent.

Dr. L. Herr, Lexington, Ky., recently sold six yearling trotting colts for \$5,200.

George Wilkes.

It is doubtful whether a more thoroughly representative trotting sire appears on the records to day than Geo. Wilkes. He was a trotting-bred horse, a trotter of exceptional merit at all ways of going, and with a comparatively brief period of years in the stud, part of the time under circumstances not the most favorable to a stallion's success, he has already to his credit in the 2:30 list twenty-seven sons and daughters with records ranging from 2:16 1/2 to 2:29 1/2. Four of these have beaten 2:20, three others have beaten 2:22, and there are fourteen of his get with records better than 2:25. This is certainly a grand showing for any horse to make, and to it must be added the fact that the fastest of the Wilkes have been the best—something not to be said of the get of many horses.

As stated above, Geo. Wilkes was a trotter both by inheritance and performance, being a son of Rysdyk's Hambletonian, and out of Dolly Spanker by Henry Clay. This breeding, as the merest tyro in horse lore knows, includes two strains of blood that have always been recognized as possessing great individual excellence, and their union has, in almost every instance, been attended with the most successful results. While the Clays have not, as a rule, been trotters of the highest type, the daughters of the family have added greatly to the reputation of their sire by producing many noted winners and sires of winners, and the Hambletonian blood has been that with which they have nicked most successfully, as witness Gazelle, Geo. Wilkes and James Howell, Jr., by Rysdyk's Hambletonian, with Clay dams; St. Julien, Bodine, Unalala and St. Reno, by Voltinoteer out of Clay mares, and many other instances that might be given. With this combination of blood lines, therefore, it is not strange that Geo. Wilkes should have been a trotter, and he was one of the best as well as one of the earliest of the Hambletonians to appear on the turf. Naturally a precocious horse in point of speed, there is little doubt that too much was asked of him ere his bones were made solid by age and his muscles hardened by careful development. But for all this he got a record of 2:22 in 1863, and, at that time, horses that could do this, were anything but plentiful. He was also a rare good one in the matter of pulling weight, and an old-time trotting-wagon, with a good-sized man in it, would not stop him. His action, while good, was peculiar, especially behind, Wilkes throwing his hind feet out when at speed in much the same manner that a duck does when swimming, and this peculiarity has been inherited in a marked degree by several of his get.

The fastest of the family, Wilson, 2:16 1/2, is not by any means the best, and it should not be forgotten that his record was obtained in a race which he lost to Director at Cleveland last summer, and in which he had the help of all the other starters in the race, barring the black stallion. In appearance Wilson is a horse that strikes one favorably, having plenty of size, a well-modded body set on legs that are not bad. And in these respects he has greatly the advantage of most of the family, the chief fault with Wilkes as a sire being the fact that his get came in all sizes, and that none of them were particularly handsome or well-proportioned. Lumps, 2:21, a mere pony, is probably the fastest trotter of his inches ever foaled. So-So, 2:17 1/2, on the other hand, is a most ungainly animal, with a head that is almost a deformity. But in the great points of getting a uniform high rate of speed, siring level-headed trotters and that come to their speed at an early age, Wilkes is, perhaps, the best of modern trotting sires, Electioneer always excepted. Joe Bunker, 2:19 1/2, who was got by him out of a mare by Seely's American Star that was famous around New York as a roadster a generation ago, was about the hardest horse in the country to beat during the latter part of 1882 and the spring of 1883. Always a horse of great speed, he was uncertain in temper and performances until a driver who possessed intelligence and sympathy took him in charge, and then his career was one of almost uninterrupted success, until a complete loss of form after his race at Chicago last July retired him for the season. Whether Bunker will be one of the trotting stars of 1884 remains to be seen.

May Bird, one of the first of the family to trot, was also one of the best, and as an "all-round" trotter it is doubtful if she ever had an equal, when her best rate of speed is considered. Her strong point was in being an exceedingly consistent performer, and with anything but the best of attention and care she made in one season a record of 2:21 in harness, 2:19 1/2 under the saddle, and 2:24 to wagon. Mr. Robert Bonner was not long in discovering what a really good one she was, and her purchase by him deprived the turf of a trotter that, had she been allowed to remain in active service, would no doubt have added materially to the fame of her sire.—Breeders' Gazette.

McDowell's Patent.

Habitues of the Los Angeles race track have noticed lately that Andy McDowell drives all his horses with close-fitting hoods on their heads. It was noted as somewhat curious as none of them had the epizootic or any other affliction, except voracious appetites, but questions failed to bring satisfactory answers. Finally it percolated that McDowell had devised some new arrangement of bridle, bits and reins, and used the hood to hide it and protect his genius from people too lazy or too stupid to do anything in the discovery line themselves. A gentleman who spied the whole thing out has described it to us, and with a distinct understanding with the reader of this that he will keep it to himself, we will impart the great secret. He takes the near rein and makes a loop around the horse's nose, passing the rein through the ring of the bit and back to the sulky. With this half hack-moor arrangement he manages his horse with the one rein, like the captain of a prairie schooner. He keeps the off rein in his right hand, slack, to be ready for emergencies, and at the same time urges his horse along by thumping his or her ribs with the slackened rein, after the manner of the ancient granger. There are advantages in the plan, while horsemen can readily perceive if they try it. We would not give this "new process" away now if we did not feel sure it must soon become generally known. The season is advancing, and when old Sol lolls in a lurid sky and the mercury bumbles in the thermometer those hoods must come, and then everybody can see for himself. In the meantime it is probable that the protection of the United States will be thrown around the idea, and when his patent steering gear is fairly on the market McDowell expects to wear a velvet vest all the year round.

The Cook stock farm has lost two highly prized fillies by death. Princess, 3 years, by Administrator, dam Priceless by Volunteer, stopped on a snag and died of lockjaw. The other, Collette, by Steinway, dam Nourmahal by Simpson's Blackbird, was taken off in a mysterious way. She was found dead in the pasture with nothing to indicate the cause of death except a mark between the eyes suspiciously like the impress of a hammer.

Occasionally From Chico.

EDITOR BREEDER AND SPORTSMAN:—Horse news up here is very scarce, although there are quite a number of colts being worked. Mr. Jas. Hasty is breaking a fine two-year-old, by Singleton, dam by Gen. Reno, weighs 1,040 lbs., and can trot quarters in 45 seconds. Palmer Garrett has a colt, by Tilton Belmont, they say can show a forty gait, a Buccaneer three-year-old, owned by Jas. Abrams of Chico, and a colt of his own by Pinmas or Prompter, dam Princess, by a son of Ethan Allen. At Mr. McIntosh's ranch they have built a mile track and a row of stalls 14x14, with lattice-work shed to cool out under and walk horses in during stormy weather. Singleton and La Harpe are looking fine and are being well patronized, Singleton having served thirty mares up to date. Jas. Sullivan is working the trotters at this ranch. His string consists of Ackerman (pacer, record 2:26 1/2) by Washington, dam by Signal, second dam by John Nelson; Telegraph, by Tilton Belmont, dam by John Nelson (Sullivan is quite sweet on this big fellow); the two-year-old bay filly Delight, by Singleton, dam by Volscian, and a two-year-old gelding, bay, white face, four white legs, named Signet. He is named in the Stanford Stakes for 1885, and is as fine, rangy a colt as one would wish to see. He is by Singleton, dam Kate Signal, by Signal, his dam by Illinois Medoc, and if nothing happens him I am sure someone will find he will be a bard one to heat. C. L. Denman is jogging his black filly Starlight by Singleton, dam by Reave's Blackbird. I suppose you have already received an ad. from the Butte county Sportsman Club. Mr. McIntosh informs me that the club have made arrangements for 1,500 pigeons and that they will be sure to arrive in time. It is the intention of the club to make this the tournament of the season, and every one interested in this exciting sport will find that no obstacles will prevent this from being what it is intended. This club knows no such word as fail.

I have noticed several articles in your paper lately in regard to the duck law. Now, Mr. Editor, why would it not be a good idea to let those counties have a law protecting ducks that wish it, and no law where they, the ducks, are worse than a nuisance. If some of those gentlemen who write so ably in defending the ducks were losing two or three thousand dollars a year from ravages made by ducks, I think they would hesitate before censuring others for protecting their property. I think the law should be general in protecting the mallard.

I see you quote an article in your last issue from a Tacoma, W. T., paper in regard to the stallion Mc, or, as you write, Mac. Your version of his pedigree is correct, but I think you err as to his record. In the winter of 1875 Budd Dohle had him at the Bay District race-track, and started him in a race against Alameda Maid, Denver Dan and some others whose names will not come to memory. Mac won two heats, if my memory serves me right, one in 2:36 1/2. Denver Dan won two heats. Race postponed, rained next day, and I think it was three or four days before the race was finished. Mr. Hinchman should be able to give you his record, as he was secretary at that time.

Foals.

- At Bay Stock Farm, Chico, Cal. Property of J. T. McIntosh. February 25th, black colt, by Singleton, dam by Buccaneer. March 16th, black colt, by Singleton, dam Bessie, by Reavis' Blackbird. March 25th, black filly, by Singleton, dam by Henry Wilson. April 1st, chestnut filly, by La Harpe, dam by John Nelson. April 6th, chestnut colt, by Singleton, dam by Reavis' Blackbird. April 8th, chestnut filly, by La Harpe, dam by Ophir, son of Kentucky Hunter. February 3d, black colt, by Singleton, dam by Lanet (property of Wm. Mathewson). April 2d, chestnut filly, by La Harpe, dam not traced (property of Wm. Mott).

Crown Point Destroyed.

Mr. Valeusin's chestnut stallion Crown Point, by Speculation, was destroyed at Arno Farm a few days ago, all hope of his restoration to health having been given over. The horse had been ailing for some months, and there have been various opinions as to what the trouble was. We are informed that the veterinary in attendance diagnosed it as a form of distemper. From the evidences obtainable it would appear that the horse took a severe cold which resulted in lung fever and finally in quick consumption. In the latter stages other complications set in as is usually the case. It was found that treatment was of no effect to avert the collapse, and the horse was shot to end his suffering. The mortality among stallions at Arno Farm has been somewhat remarkable.

Races at Oakland Park.

Table with race results: OAKLAND TROTTING PARK, April 5th. Purse \$500. Geo Leiby's blk g B. B. 4 1 1 1; J. A. Goldsmith's h f Sister 1 3 5 2; E. P. Dwyer's ch g Pump Winston 2 2 2 3; P. Farrell's b g Barney B. 5 4 4 4; L. Shaner's ch g Frank Moscow 3 5 3 5. Time—2:30 1/2, 2:27 1/2, 2:29, 2:30 1/2. SAME DAY—Running—purse \$75; five-eighths 2f a mile. Foster Bros' gr m Della Walker 1; L. Shaner's br h Haddington 2; ch g Red Oak 3. Time—1:03.

The transfer of Leander calls to mind an incident in his turf career when, not under the name of Dr. Lewis, but Flexible, he appears on the old trotting park in this city (Manchester, N. H.), and made strange havoc among the betting fraternity, who hought heavily of Ed Chapin or Chas. R., in a slow class, trotted October 5th, 1875. There were twelve starters, and Flexible drew ninth position. The chairman of the judges, who has a keen eye for a ringer, called the attention of one of his colleagues to the well-drilled manner of the brown horse when the bell to recall the field to score again was sounded, and then let them go. Flexible got a bad send-off, but he was fully equal to it, for he handily trotted around every horse ahead of him in the race, winning the heat in 2:35, though his actual time from wire to wire was 2:29 1/2. He easily won the next two heats in 2:37 and 2:37 1/2. Later on in the meeting he won another race in straight heats, but the boys who got caught in the first instance placed no money on him in the second. Some time afterwards he was sold as Dr. Lewis to Vanderhilt, who changed his name to Leander. So says the Mirror and Farmer.

**BICYCLING.**

Mlle. Armaido.

The accompanying portrait of this lady will be recognized as an excellent presentation of the distinguished original. Few of her sex have made a name for themselves in the athletic world, beyond that based on suffering, or sort of tacit permission induced by the natural gallantry of the eternal half of creation; but Mlle. Armaido asks no such favor for herself. She holds the title of champion bicyclienne by a claim so thoroughly established that it no longer finds challengers, and she has won almost equal credit in contests when the masculine element was in determined opposition, and represented by stars of the arena. Mlle. Louise is something of a phenomenon. Physical power came to her as an inheritance, and nature made her an athlete without unsexing her in the least. In adopting an athletic profession she but follows in the path nature plainly marked out for her, and from her notable ability and unbroken success hers is evidently not a case of mistaken calling or lost opportunities. While she can drive a bicycle at a whistling pace, her singular strength is not alone of the flexor muscles. She has with one hand raised and put to arm's length over her head a 90-pound dumb-bell, and has raised an 85-pound bell in the same manner seven times. These may not in some quarters be deemed feminine accomplishments, but how many of her sex there are who would gladly exchange the smiles of a hountiful fortune for the title of the muscled and nervous energy concentrated in Mlle. Armaido. Her bicycle career began about two years ago. She placed herself under the instruction of the since unfortunate Prof. F. W. Rollinson, and was so apt a scholar that in two days she had mastered the machine, and in three weeks could run a mile better than four minutes. Four months later she appeared as a professional, and her first race was a handicap in which she met and defeated her teacher. All the lady riders she has beaten in the most hollow manner, and she is the only woman who ever won a championship race from men in any athletic contest. She holds one of the most important records, that of seventy-two hours. This was made in Chicago in May of last year, when Mlle. Armaido ran 843 4-13 miles, winning the race handily, with Woodside and Morgan in the ruck behind her. She has appeared in all the principal cities of the Union, and has many handsome and valuable evidences of her personal and professional popularity. Mlle. Louise will assist Mr. Prince in the race against Anderson and his horses at the Mechanics' Pavilion next week, riding each alternate hour, and will do her share towards making that event notable, by reason of the skill and endurance exhibited and the record made.

The Alameda Bicycle Club will shortly be organized. Four of the club members are to engage in a Mile Handicap Bicycle Race for a gold medal, and as all the participants are satisfied with their handicap a more than ordinary finish will be the result. The race will probably take place at the Olympic meeting.

**Bicycling at San Jose.**

The Two-mile Amateur Bicycle Race resulted in a victory for F. Gibson of this city, in the slow time of 9 minutes 1 second. Louise Armaido defeated a trotting pony 2 miles in 7 minutes 31 seconds. T. W. Eck is credited with riding one-half a mile in 1 minute 27 1/2 seconds, which is the best time made on the coast. The ten-mile race, J. S. Prince against Mr. Snedakin's trotting horse must have been a very soft thing for the bicyclist, judging by the time made, viz., 39 minutes 16 seconds.

**The Six Days' Race.**

Prince and Armaido start for their 72 hours race against Anderson and his 15 horses, at the Mechanics Pavilion, next Monday at 12 o'clock noon. How the contest will result it is impossible to predict, but the prospect is excellent for a great score of miles and a hard fought battle. Prince is quite confident that the wheel has the best of it, but from Anderson's known ability, and the character of his horses, we opine that the wheelman underestimates the probable number of miles that will be covered. He effects to believe that 1,150 miles will take the money, but Anderson ought to ride 1,200 if his past performances are any index to what he can do. Prince and Armaido may be able to do as well as that if occasion requires.

The Massachusetts Bicycle Club have taken measures for the formation of a corporation, with a capital of \$10,000.

**Bicycling at the Oakland Trotting Park.**

Louise Armaido defeated Mr. Jackson's Tom in 22 minutes 17 seconds, for the 5-mile event, and the 20-mile race between Prince and the trotting horse Ed was secured by the bicyclist in 1 hour 21 minutes 50 seconds.

**BILLIARDS.**

**Saylor and McCleery—A Notable Game.**

The match game of billiards, 1,000 points up, for \$500 a side, between J. F. B. McCleery and Benjamin Saylor, took place last Saturday evening before a very large and enthusiastic audience. On the strength of Saylor's previous victories over this opponent, he was the favorite in the betting; in some cases odds as high as two to one being offered. No such offers, however, were refused by McCleery while his bank roll lasted. Before the opening stroke, which scored a goose egg for Saylor, there was over \$1,400 up pending the result of the game. All in all, this was one of the hardest-fought battles which has ever taken place over the green cloth in this city. During the entire game, and especially at the beginning, the balls broke wretchedly for McCleery; his splendid execution around the table won great applause, but the points were hard earned, and it was very slow work. In the eighth inning Saylor reached the right rail, and it was astonishing with what ease and rapidity his points rolled up. He froze on the 52d carom, and missed the spot shot. A few innings later he reached the left rail, ran the balls the length of the short one, where he got them in excellent position on the right rail; a few more caroms, and he had

the table presumably to continue his rail run, or to play the spot shot according to the decision that would be rendered. The referee thinking that McCleery was satisfied the balls were tight without examining them himself picked them off the table to place them on the spots before McCleery's cry of "don't touch them" reached his ear. McCleery insisted that the balls did not touch, Saylor insisted on the contrary, and for a moment it looked as if the referee was in an embarrassing position, as the mistake was undoubtedly his, as he should have looked at the balls before moving them. After twenty minutes of pretty hard talking, and the referee not having yet rendered a decision, Saylor was prevailed upon by his friends to do the right thing, and allow the player in hand the benefit of the doubt. The balls were replaced as near as possible to their original rail position, and McCleery allowed to continue.

Another interesting game is on the tapis, to take place this evening at No. 8 Sixth street, between W. R. F. Lowry and McCleery. These two gentlemen are very evenly matched, and have not crossed cues for many months in this city. The game is to be in 500 points for a purse of \$50. After the game McCleery will give a fancy shot exhibition.

Messrs. Troesher and Bensinger of the New York and Chicago houses of the J. M. Brunewick and Balke Company are here at present on a visit. They intend returning about the 1st of May.

Both Schaefer and Sloeson will do the bulk of their practicing in private rooms.

The death of a veteran English nobleman and turfman is announced—Lord Mostyn, who recently died at the advanced age of ninety. He owned the famous mare, Queen of Trumps, by Velocipede, who won the Oaks of 1835, in grand style, and followed it up by winning the St. Leger. Queen of Trumps was the great-granddam of Mr. Belmont's Fair Barbarian, by Hermit. It was Lord Mostyn who bought Lord George Bentinck's entire racing stud at a bargain. Among this lot was the famous mare Crucifix, and her then yearling son, Surplice, who in due time won the Derby for Lord Mostyn, an honor Lord George Bentinck had never achieved.

One of the most successful trotting horse trainers on Long Island was asked a few days ago if the present backward spring would not interfere with the drivers of trotting horses in preparing their animals for the spring meetings. "Well," said he, "don't mind what the trainers say. I tell you a matured horse can be put in condition in about two weeks. I am out of the business now, and I can speak plainly. I used to ask for six months to get a horse fit, but if a horse has been regularly exercised he will trot as fast after two weeks' preparations as he ever will."

**AQUATIC.**

In the friendly race between the crews of the Alert Boat Club of Vallejo, last Sunday, the old four won very handily. The race was three miles with a turn, and the winners covered the line in 21:45, the looser time being 22:15. The personal of the crew was: Seniors, George Roe, stroke; Henry McManne, 1st waist; James Keyes, 2d waist; Frank Davis, bow. Juniors, Henry Lazelle, stroke; C. B. Rand, 1st waist; James Jackson, 2d waist; J. J. Smith, bow.

On Sunday afternoon Alfred Tuckey, who is regarded as the Hanlon of the Triton Boat Club, had a narrow escape from drowning. He was out in his shell, and on rounding Black Point was capsized. But for the efforts of two of his friends, who put out to his assistance, he would certainly have been drowned.

An eastern writer declares that the best mule that can be imagined may be had by breeding a race-horse to a Percheron or Normau mare, and using the offspring as a brood-mare for mule colts. The colt, however, out of a heavy, dull mare by a jack, would not be termed first-class in the mule-growing states. An infusion of racing blood is necessary for spirit, stylish carriage and those characteristics which make a mule bring fancy prices.

There is no better food for horses than oats. A mixture of oats and bran is healthy and strengthening, and is better than any other known food for horses. An exchange says: "Chemists have long ago discovered avenin, a very powerful laxant, in oats, and to this may be attributed its good effects on horses. Farmers had long ago discovered the same, but only they had not given it a name."

turned to the long rail, where, with a circuit and a half of the table, he completed 223 points, the largest run ever made in a match game by a local player. The audience had not come prepared for such a run; their plaudits began with the first 50 points, and grew louder at each additional half hundred until 200 points were reached; then the crowd quieted down, keeping in its boisterous feelings, being anxious to see the player outdo himself. The balls froze on the 221st carom, and when Benjamin succeeded with the spot shot the people for quite a distance must have wondered if they were still in a civilized community. The score stood: McCleery 70, Saylor 354. It was a settled thing in the mind of those present who was to be the winner. Mac was making desperate efforts, and in the face of repeated frozen balls and the greatest of ill-luck he succeeded in reducing the gap between the two scores to 102 points, when Saylor completed his five hundredth point in the thirty-seventh inning. An intermission was allowed the boys, after which the play was something grand. Saylor's first two runs netted him 140 points; Mac's next two amounted to 187. The score stood in the thirty-ninth inning: McCleery 558, Saylor 642. By this time considerable hedging was going on among the betting people. Saylor reached the right rail again in the fortieth inning, and scored 131 points more, followed by Mac with 60. A few minutes later Benjamin rolled off another run of 105, answered by Mac with 103 in the fifty-seventh inning. Saylor completed the 1,000th point in the sixty-first inning, McCleery having but 868 points to his credit. Winner's average, 16 24-61; loser's, average 14 7-15; time, 4 hours 3 minutes. William Roach acted as referee. In the 59th inning, a most embarrassing technical point rose for the referee to decide. McCleery was in hand, the balls were on the long right rail, 100 caroms had been counted when Saylor claimed that the balls were frozen. McCleery examined them, said nothing, but walked to the other side of

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, etc.).

Pigeon Match.

The match, for \$100 a side, between Dr. Slade and Mr. Tom Pearson, which sprang out of the match between Messrs. Slade and Maskey, the week previous, excited much interest...

Table showing names of participants (Pearson, Slade) and their scores in various categories (Fallers, Missed, etc.).

After the event of the day, which was over in good season, the sport was continued with sweepstakes matches. The first was at six birds with two purses \$15 and \$10.

The next was similar in conditions, with the entrance raised to \$10, the whole divided into two purses of \$27.50 and \$12.50.

The shooting concluded by a match at 21 yards between Fay and Walsh, resulting in the victory of Walsh, with sixteen kills out of 20 birds, to Fay's 14 kills.

At Bird's Point, Alameda.

The Alameda County Sportsman's Club had their regular monthly medal shoot on Saturday last, at Bird's Point. The conditions of the match were as usual, 12 birds each 30 yards rise, 80 yards boundary.

Table listing names of participants (Adams, Edson, Knowles, etc.) and their scores in a medal shoot.

In reference to the above club we find a number of its members met last week and formed another club without separating from the present club, and gave it the name of the Neophyte.

The Butte County Sportsman's Club have definitely arranged their tournament for Monday, 21st instant, and the following day. As announced, the tournament is open to all, and the prizes are certainly large enough to attract the best shots in the State.

Mr. McIntosh of Chico, who is at the head of the tournament, is already collecting pigeons, and says he thinks he can guarantee 1,500 birds.

Every true sportsman will be glad to hear that the California Wing Shooting Club, in spite of its defeats by the old Cosmopolitan Club, in the latter days of its existence, is in a better condition than it has ever been before.

Chas. S. Hopper, of Yountville, proposes to arrange a shooting match to be held on the 26th of April at St. Helena, about the 1st of May in Napa, under the following conditions: He has a fine large mule, well broken, and valued at \$300, which he proposes to offer as a prize.

It seems to us it would have been better and more consistent with the purpose if the mule in question had been guaranteed as free from gun-shyness.

To-day the S. F. Gun Club will hold their regular monthly medal shoot at Bird's Point, Alameda. Besides the gold medal the silver cup presented by Mr. Ewing, will be again shot for.

A pigeon-shooting match took place at Petaluma last Saturday between Henry Hopper and W. F. Timms, 15 birds each, 21 yards rise, 80 yards boundary, for \$50 a side.

W. H. Pomeroy, in a letter in the New York Spirit of the Times, warmly supports Captain Stubbs, the famous wing-shot, who is about to challenge Carver and all comers.

The next match between the Alameda County Club and the San Francisco Gun Club, for the silver cup given by the Messrs. Pierce of Oakland, will come off about the end of the month or the beginning of May.

The San Francisco Gun Club hold their annual picnic shoot on the 30th of May next, Commemoration Day. The old grounds will probably be selected.

A genuine vampire was recently captured in Los Angeles. The only way to account for its presence is that it was brought from South America on some vessel and escaped.

The great Northamptonshire Handicap, run on the 2d, was won by the Duke of Hamilton's bay colt Loch Ranza, three years, by Wild Tommy—Loch Tanna, carrying 103 pounds; P. Lorillard's bay colt Comanche, four years, by Virgil or Gleanly—China, 107 pounds, second, and Lord Ellesmere's brown filly Lizzie, four years, by John Davis—Voedlist, 116 pounds, third.

THE RIFLE.

The California Rifle Association.

The leading event in our rifle world is the spring meeting of the above Association, which takes place at Shell Mound on Sunday the 27th. As the events of the day are numerous, the shooting will commence at 9 A. M. sharp.

The medal has been won as follows: November 21st, 1880, Captain J. Robinson, score, 47; May 29th, 1881, Sergeant, N. Williams, 47; October 16th, 1881, Lieutenant F. E. Kuhnle, 48; October 29th, 1882, Lieutenant F. E. Kuhnle, 48; May 26th, 1883, Lieutenant S. I. Kellogg, 48; October 23d, 1883, P. D. Linville, 49.

Second match, short range—Open to all members of the association, the National Guard of California, army and navy; distance 200 yards, seven shots with any military rifle at a ring target; entries unlimited; entrance-fee \$1; nine cash prizes—\$15, \$10, \$7, \$6, \$5, \$4, \$3, \$2, \$1.

Third match, for the California Powder Works Medal—Open to all members of the Association, the National Guard of California, army and navy; distance 200 and 500 yards; seven shots at each distance, with any military rifle; entries limited to one each; to become the property of the marksman who shall first win it three times at regular meetings of the California Rifle Association; competitors for this trophy to use powder manufactured by the California Powder Works; four cash prizes, namely, \$5, \$4, \$3, \$2; entrance-fee \$1. Won October 28th, 1883, by Private George C. Thaxter—30, 34, 64.

Fourth match, team match—Open to teams of six representatives from any military company, Field and Staff, Board of Officers, Police Department or rifle club now in existence; with any military rifle at 200 and 500 yards, seven rounds at each distance; individual prizes, \$5, \$4, \$3, \$2; entrance-fee \$10.

Fifth match, team match—Open to teams of six men from any company of the National Guard, with Springfield rifles, at 200 and 500 yards; rounds, seven at each distance; individual prizes, \$5, \$3, \$2; entrance-fee \$10; Company C, First Infantry, will not enter in this match.

Sixth match, team match—Open to teams of six men from any company of the National Guard who have never made more than 70 per cent. in any of the California Rifle Association matches; individual prizes, \$5, \$3, \$2; rounds, seven, with Springfield rifles, at 200 yards; entrance-fee \$6.

Seventh match, team match—Open to teams of six men from any company in the National Guard who have never made more than 60 per cent. in any of the California Rifle Association matches; individual prizes, \$5, \$3, \$2; rounds, seven, with Springfield rifles, at 200 yards; entrance-fee \$6.

Prizes in each team match for teams and also for individuals will be given; they are not announced because of lack of time to select them.

Pool shooting—200 yards and 500 yards, rifle pools; 10 cents a shot; 60 per cent. divided among bull's-eye holders. A pistol match, under the auspices of the association, will be held at a date to be hereafter announced.

The rules are as follows: Rule 1. Creedmoor rules are to govern in all respects. Rule 2. All teams must be certified to by their officers. Rule 3. Two sighting shots allowed in all 500 matches. Rule 4. Weapons must not be loaded until at the firing point.

Rule 5. Teams may be entered at any time at 402 Montgomery street, room 17.

Rule 6. Entrance of teams will close at National Guard Armory, 318 Post street, at 10 P. M., April 26th. Post entries can be made up to the opening of the match upon the payment of \$2.50 extra.

Rule 7. All matches will be called at 9:30 A. M. Teams not answering to forfeit entrance-money.

Rule 8. Dues to the Association may be paid on the grounds, and must be paid before shooting, to entitle winners to receive prizes in competition where membership is required.

At Harbor View.

On Sunday last the Eintracht Rifle Schuetzen section had their medal shoot at this range. Upon the whole the record shows a good average. The winners were as follows:

Table showing names of winners (Mr. Stamer, Mr. Ropke, etc.) and their scores in a medal shoot.

Table showing names of participants (Mr. Stamer, Mr. Ropke, etc.) and their scores in a general score.

In our last issue we spoke of the match which this whole-club had with the German Fusiliers, for the Cup presented by Captain Stettin of the latter. We then made an error in the time of the contest. The match will be tomorrow, 13th inst., at Shell Mound, and not last Sunday as already stated. The Eintrachts will be out in their new uniforms.

A Change of Date.

Owing to several prominent men of 5th Infantry, who are always selected in the teams contending for the Military Trophy belonging to the Knights Templar, the date of next match is postponed from to-morrow to Sunday 13th. The Knights have a grand service at the Pavilion to-morrow, in which the gentlemen referred to wish to participate.

On Sunday week, April 20th, the California Schuetzen Rifle Club will have their regular shoot at Alameda Park for \$100, given by the club, and divided into forty prizes, for best center shot during the day. Members only allowed to compete. Shooting to commence at 9 A. M. sharp, and close at 3 P. M.

At Alameda.

The Turners had a picnic and Schutzen-fest at Alameda last Sunday, which proved a very pleasant and successful day. The attendance was unusually large. The prizes in coin and articles of value amounted to \$150. The following is a list of the winners:

Company Target—First prize, Philo Jacoby, 58 rings; second, Otto Burmeister, 58; third, John Utschig, 51; fourth, Capt. C. K. Zimmer, 50; fifth, J. H. Seydeu, sixth, H. Plagemann; seventh, Chas. Hnbert; eighth, A. Pracht; ninth, J. Castor; tenth, C. Bruce; eleventh, D. Worth; twelfth, S. Friedlander; thirteenth, Chas. Sagehorn; fourteenth, D. Schoenfeld; fifteenth, L. Hintz; sixteenth, R. Finking; seventeenth, Jos. Wagner; eighteenth, H. Hagedorn; nineteenth, F. Acker; twentieth, H. Krall; twenty-first, G. Terklebnbrg; twenty-second, H. Turk; twenty-third, F. R. Lorick; twenty-fourth, G. Schwarzmann; twenty-fifth, H. Bilay; twenty-sixth, R. Volkmann; twenty-seventh, H. Hermann.

Prize Judges—First prize, John L. Koster; second, H. Bendel.

Public Target—First prize, Philo Jacoby, 93 rings; second, Jas. Stanton, 91; third, A. Strecker, 89; fourth, Wm. Ehrenpfort, 89; fifth, F. Boeckman, 89; sixth, J. Utschig, 88; seventh, F. Freese, 87; eighth, C. W. Lingenfeller, 87; ninth, A. Rahwyler, 87; tenth, H. C. Smith, 87; eleventh, O. Brnmeister, 86; twelfth, Treadwell, 86; thirteenth, H. Bendel, 84; fourteenth, Jolly, 83; fifteenth, Zecker, 80; sixteenth, Rapp, 79; seventeenth, Krahmann, 79; eighteenth, Haape, 78; nineteenth, H. Plagemann, 77; twentieth, Capt. C. K. Zimmer, 74.

First bull's-eye, forenoon, H. Bendel; last, H. Plagemann. First bull's-eye, afternoon, P. Jacoby; last, John Utschig.

At the same time and place San Francisco Schutzen-Verein had their regular prize shooting. The winners of the five prizes were: 1st, D. Wertheimer; 2d, C. Rapp; 3d, F. Freeze; 4th, F. Broeckman; 5th, Philo Jacoby.

Look Out Young Men.

If our young aspirants for military and rifle fame, separately or combined, do not mind their ps and qs now, they are likely soon to have something else to do than fal-la-la with their incipient moustaches. The Solano Republican, says:

"We understand that several of our young ladies have organized a rifle team to compete with the Vallejo Rifles for the first prize at the picnic in Dixon next month. The aspirants for the honors of superior marksmanship have made the life of the innocent 'chippie' between Snistu and the cemetery a burden, for upon every pleasant afternoon the rifle team sallies forth to practice. The ladies are improving, for on their last trip they actually scared one bird from its resting place upon the cemetery fence."

It is all very well for the editor of the Republican to sneer at the shooting of the Lady Rifle Brigade of Solano, and it is also very mean of him to do so. We will bet a crook any one of them can beat him, at any distance he likes to name. We hope they will persevere and succeed.

In giving the details of the match between Company C of First Infantry and Company C of Second Artillery, last week, we made a mistake in putting Private Carsou at the head of the score with 46. On looking over the record more carefully we find Private Ray with 47 is entitled to that honor. The latter is comparatively a new man, but very able with the rifle. He is regarded as a rising man in the corps, and it would be an ungracious thing not to rectify the mistake referred to.

We had hoped this week to have furnished our rifleman with a cut showing the wonderful accuracy of the four great shots which Philo Jacoby made a fortnight ago in his world-heating record of ninety-nine out of a possible hundred. We are desirous of doing our old local champion all the honor the occasion demands, but we were not furnished with the cut referred to in time for this week's issue.

The Carson riflemen on the 7th inst. did some remarkable shooting. In a rifle-shooting match with Captain Galusha on that day George Thaxter scored 457, the largest score ever made at 200 and 500-yard targets. A team of four men averaged .92 at the same range. Such shooting is honorable to any country, and would trouble the veritable Swiss sharpshooter to beat.

At a recent meeting of the National Rifle Association a committee appointed at a previous meeting of the Board submitted a report recommending that spirit levels be used on Military rifles in all matches authorized by the association, unless specially prohibited by the terms of the match. The report was adopted, and the British Rifle Association will be notified.

Company B., 2d Artillery, had a practice at their butt on Sunday, at which the shooting 200 yards was fairly good.

Table with names and scores: Private Nobie, 42; 1st Sergt. Beasley, 39; Lieut. Sims, 41; 2d Sergt. McClintock, 39; Private Elliott, 41; Private Johnson, 36; Private D'Arcy, 46; Private Graham, 35.

CRICKET.

Merion Cricketers—Resume of Events of 1883.

The following report was presented at the annual meeting of the Merion Club.

SAN FRANCISCO, CAL., March 31st, 1884.

To the members of the MERION CRICKET CLUB, San Francisco, Cal.

GENTLEMEN:—We, the members of the Board of Directors of the Merion Cricket Club, present the following report of the operations of the club during the past year.

The season just over has been the most successful one in the history of California Cricket; not only has the play in general been of a better order, but a larger interest has been manifested, both by the players and by the public; whilst one of the most gratifying results has been the development of new talent. The Merion Club can congratulate itself upon its own success during the past season, as the summary of matches played, which is given below, shows it to have taken a decided and successful stand against their older opponents.

One of the pleasant features of the Merion Cricket Club's past season is the trip to Grass Valley, taken last September, which not only resulted in a complete victory for the team, but also served to establish a very cordial relation between the cricketers of the two cities. The members who composed the team were as follows: W. G. Harrison, B. S. Benjamin, B. A. Benjamin, Chas. Banner, L. G. Burnett, Chas. B. Hill, R. B. Jones, J. Mathieu, George Theobald, J. J. Theobald, and F. H. Webster. The results of the matches played will be seen in the general summary below.

On July 4th, 1883, the Merion Cricket Club won the Olympic Club Cup, offered for competition at the club sports that day. Later in the season the President of the Merion Club, W. G. Harrison, Esq., offered a handsome silver cup as a trophy for a series of five matches between the Merion Cricket Club and Occident Cricket Club which was also won by the Merion, with four games to their credit. In this series of matches the prize for best Merion average offered by J. T. Cross, Esq., was won by the captain, B. S. Benjamin. And in the match played September 15th and 22d, the batting prize offered by Mr. Harrison was gained by J. J. Theobald the vice-captain.

Summary of Matches.

Played by the Merion Club during the season of 1883.

Table with columns: Opponents, Where played, Date 1883, Merion 1st In 2d In, Opponents 1st In 2d In, Result won by.

Matches Won.

Table listing matches won by Merion Club, including opponents like Oakland C.C., Union C.C., and Grass Valley G's, with dates and scores.

Matches Lost.

Table listing matches lost by Merion Club, including opponents like Oakland C.C. and Australian Tourists, with dates and scores.

Matches Drawn.

Table listing matches drawn, including Oakland C.C. on Oct 13, with a 65% result.

Batting Averages.

Merion Cricket Club members, compiled from club matches played 1883.

PLAYED IN AT LEAST ONE-THIRD OF THE CLUB MATCHES.

Table of batting averages for Merion Cricket Club members, listing names, games, innings, runs, and averages.

PLAYED IN LESS THAN ONE-THIRD OF THE CLUB MATCHES.

Table of batting averages for Merion Cricket Club members who played in less than one-third of the matches.

The bowling averages have not been strictly kept. The following figures will give some idea of the work done in this department. In the case of Mr. C. Banner, especially, the full record is needed to do him full justice.

Table of bowling averages for Merion Cricket Club members, listing names, matches, and wickets.

As well as the club matches, special mention should be made of the match played by a combined San Francisco team against the officers of H. M. S. Swiftsure, in which the Merion Club was represented by the following six players, viz.: B. S. Benjamin, B. A. Benjamin, C. Banner, L. G. Burnett, C. B. Hill and J. J. Theobald. The combined team won on score of first inning by 42 runs.

Besides the progress made by the club in cricket, the department of athletics received considerable attention this year. In the first place two meetings were given, the first of which, held on Washington's Birthday, Feb. 22d, 1883, opened the season auspiciously, and also served to develop a number of new contestants, many of whom were club members, as follows: G. M. Ashe, C. Creighton, J. B. Benjamin, B. A. Benjamin, J. H. Spiro, F. L. Mathieu and B. S. Benjamin, all of whom gained medals. At this meeting the coast record for a one-mile walk (8 minutes, 8 seconds) was secured by a club member, J. B. Benjamin.

At the Occident Athletic Club games, May 30th, the following Merion Cricket Club members secured medals: G. M. Ashe first in a quarter-mile handicap, and B. A. Benjamin second in 100-yards handicap.

At the Union Athletic Club games, November 14th, 1883, the quarter-mile handicap was won by C. Creighton (M. C. C.), B. A. Benjamin (M. C. C.) second.

At the Occident Athletic Club games, November 30th, the one-mile handicap walk was gained by J. J. Theobald (M. C. C.) against a large field of competitors, with J. B. Benjamin (M. C. C.) and O. A. C. second, C. Creighton (M. C. C.) took place in the quarter-mile handicap. In this meeting A. B. Tennant (M. C. C.) ran very well in two or three events, but with poor fortune; winning his trial in the 100-yards, and falling almost at the tape in the one-furlong run.

On December 8th the Merion Cricket Club held the second of their meetings, when the following new members made their first appearance and won events, C. B. Hill and F. Barkworth. Besides this Creighton again secured a first medal; H. Tenney (M. C. C.) secured the coast record in the half-mile bicycle race for the club (1m. 31s.), while R. B. Jones (M. C. C.) won the 120-yards hurdle handicap race, open, from the scratch.

Of old members who have left the city the following remarks may be noted: Gaston M. Ashe, at the fall meeting of the Freshman Class, Harvard College, won the 100, 220 and 440-yard races, with consummate ease; though severely handicapped, he also showed to advantage in the Association Meeting. A. M. Cox, Columbia, is secretary and treasurer of the Intercollegiate Cricket Association of America. A. P. Theobald, a former captain of the Merion Cricket Club, now

at Cain's College, Cambridge, has distinguished himself on the cricket field there on more than one occasion.

In conclusion we may state that the Merion Cricket Club is the only club that has had representatives at all the athletic meetings. In all, fifteen first and four second prizes have been secured by club members. The success attained is very gratifying, and it is to be hoped the members will all endeavor to sustain this prestige during the coming season. The unfavorable state of the weather on the occasion of each of the athletic meetings given by the club served to make their financial results decidedly unencouraging, whilst carelessness in the payment of dues has sometimes made it necessary to call upon the officers to meet the club debts.

The report of the secretary and treasurer for the eighteen months between October 1st, 1882, and March 31st, 1884, is hereto appended; it shows a balance remaining on hand of \$11.90. The club is liable in the following amounts:

Table of financial summary: Medals due and being made (\$30.00), Settlement of outstanding accounts (\$9.00), Total (\$45.00).

But this indebtedness is more than balanced by the members' arrears on the books. It is almost superfluous to add that both the sides of this account should be settled at once. Finally, we wish to make the following suggestions:

- 1. That the larger scope of the club affairs demands a correspondingly larger monthly subscription.
2. That the growing popularity of cricket on this coast suggests the need of a cricket association to advance the interests of the game, and procure a suitable ground.
All of which is respectfully submitted.

Treasurer's Report, October 1st, 1882, to March 31st, 1884.

Table of Treasurer's Report showing receipts (Entrance and gate money, Hat room receipts, Loans, Entrance and gate money) and expenditures (Stationery and postage, Expenses Field Day, Expenses party June 1st, Payment of loans, Expenses Field Day, Rent of grounds, Incidentals, Balance April 1st, 1884).

CHAS. B. HILL, Sec'y and Treas.

A cable dispatch to the London Sportsman, dated Melbourne, March 11th, is as follows: This morning the fourth team of Australian cricketers left Melbourne en route for England, They voyage, via Adelaide, in the P. & O. Steamship Sutlej, and should, all well, arrive in England by the last week in April. Almost at the last moment Spofforth was induced to join; whilst on neither Evans nor Ganet accepting, Scott was asked to complete the team and consented. The following compose the party: G. Alexander, manager; A. C. Bancrueman, J. M. Blackham, G. J. Bonner, H. F. Boyle, W. H. Cooper, G. Giffen, P. S. McDonnell, W. Midwinter, W. L. Murdoch (captain), G. E. Palmer, H. Scott and F. R. Spofforth.

At the annual meeting of the Merion Cricket Club the following officers were appointed for the ensuing year: President, W. Greer Harrison, (re-elected); vice-president, C. Creighton; captain, Ben Benjamin, (re-elected); vice-captain, J. J. Theobald, (re-elected); secretary and treasurer, C. B. Hill, (re-elected); directors, F. L. Mathieu, R. B. Jones, and George Theobald, Jr.

Next week we will give the averages of the Occident Cricket Club, and a short resume of the Gentlemen of Philadelphia team shortly to start for England.

Mr. Harrison will again present a splendid trophy to be contested for by the local clubs.

Spring Races at Visalia.

The Visalia Fair Association have made up the following programme of racing for their spring meeting, to begin May 1st. The district for which these purses are open comprises Tulare, Fresno and Kern counties.

First Day.—Running; purse \$100; dash of 600 yards. District horses.

Trotting; purse \$100; 3:00 class. District horses.

Second Day.—Trotting; purse \$150; 2:50 class. District horses.

Trotting; purse \$100; for district three-year-olds; mile heats.

Third Day.—Trotting; purse \$150; free for all, open to the State; half-mile heats.

Running; purse \$50; for saddle horses; dash of half a mile.

All these purses are divided into three moneys, 60, 30 and 10 per cent. Entries close April 30th.

Summer Meeting at Portland.

The Portland, Oregon, Driving Park Association announce a Summer Meeting commencing June 19th, and continuing three days. The programme is as follows:

First Day.—Trotting; free for all three-year-olds and under. Purse \$300.

Trotting, 2:40 class. Purse \$300.

Second Day.—Running; for all ages; five-eighths of a mile. Purse \$250.

Trotting; free for all two-year-olds or under. Purse \$200.

Third Day.—Trotting, 2:50 class. Purse \$250.

Trotting, 2:32 class. Purse \$300.

L. B. Lindsey is in charge of the track, and entries will close with him at the Holton House, Portland, on the 20th inst. The association has made application for membership in the National Trotting Association, and will be duly enrolled before the date of the meeting. A summer running meeting will also be given, commencing July 20th.

Mr. W. H. Vanderbilt has a bay gelding five years old, bred at Fashion Stud Farm, by Gen. Washington, out of Mountain Maid, by Rysdyk's Hambletonian, which he has been driving; to pole with Aldine. He has given the mare all she could do, even carrying her off her feet, and it is predicted that he will trot a full mile in 2:20 this season. Mr. Vanderbilt is so pleased with him that he purchased a few days ago, from Mr. H. N. Smith, the bay gelding Rex, four years old, by Gen. Washington, out of Lady Banker (2:23), by Rysdyk's Hambletonian, the price being \$1,500. The two sons of Washington will be driven to pole, and they promise to make a rapid team.

A mixed running and trotting meeting will be held at Vegas, New Mexico, on April 23d, 24th, 25th, 26th.

PUBLISHED WEEKLY BY THE  
BREEDER AND SPORTSMAN PUBLISHING CO.

THE TURF AND SPORTING AUTHORITY OF THE  
PACIFIC COAST.

OFFICE, 508 MONTCOMERY STREET  
P. O. Box 2603

Five dollars a year; three dollars for six months; one dollar and a half for three months. Strictly in advance.

MAKE ALL CHECKS, MONEY ORDERS, ETC., PAYABLE TO ORDER OF BREEDER AND SPORTSMAN PUBLISHING CO.

Money should be sent by postal order, draft or by registered letter, addressed to the "Breeder and Sportsman Publishing Company, San Francisco, Cal."

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

JOSEPH CAIRN SIMPSON, - - - EDITOR

## NEW YORK AGENCY.

Mr. C. C. Pettus at the office of the "Sportsman," 29 and 31 Chatham street, is duly authorized special representative of the BREEDER AND SPORTSMAN in New York to receive subscriptions and arrange advertising contracts.

## SACRAMENTO AGENCY.

Residents of Sacramento and vicinity, desiring to subscribe or advertise in the BREEDER AND SPORTSMAN, can do so through our agent, Mr. M. J. Henley, Russ House, 1,093 J street.

## ADVERTISING RATES.

Displayed, \$1 50 per inch each insertion or pro rata for less space. Reading Notices set in brierly type and having no foot marks, 30 cents per line each insertion. Lines with average ten words. A discount of 10 per cent will be allowed on 3 months, 20 per cent on 6 months and 30 per cent on 12 months contracts. No extra rate charged for cuts or cutting of column rules. No reading notice taken for less than 60 cents each insertion.

San Francisco, - - Saturday, April 12, 1884.

## STALLIONS ADVERTISED.

## Not Correct.

For the past two weeks rumors have been flying about to the effect that the horses at Palo Alto were about to be sold off, and the establishment broken up. These reports have no foundation. Governor Stanford has given no such intimation either to Mr. Lathrop or Major Rathbone, and neither of these gentlemen have suggested such a probability. The impression has probably arisen from the frequent reports of late of horses sold from the farm. Several have been sold within the past few months, and more will be disposed of to make room in the crowded quarters. There are now over six hundred horses on the farm, and the increase is, of course, very large. The present management of the breeding department is such that this spring the foals represent eighty-three per cent. of the mares bred, as against fifty and fifty-five per cent. in former years. Over a hundred foals were dropped this season. Two hundred and seventy-five mares are being bred on the farm this year, and, all reasonable and unreasonable chances taken into consideration, the additions from that source next spring will number over two hundred. The accommodations of even Palo Alto have a limit, and as the heavy increase threatens to interfere with the regular order of business there, sales have been, and are being, made to keep the number within reasonable and convenient bounds.

## The Trotters Down South.

Andy McDowell is making headway with the stock he has selected for the eastern campaign, and they are reported as progressing well. The Sunny Slope colts are all doing wonders under his tutelage. They could scarcely do otherwise with intelligent handling. They have been bred with singularly faultless judgment, and in the high percentage of creditable performers for the number of colts produced, Sunny Slope probably ranks any establishment in the world. Neluska is reported to be giving promise of brilliancy, and she will be one of Mr. McDowell's corps of invaders. He will also have

in his string Mr. Titus' mares Echora and Belle Echo, and as Belle has been caught a half-mile in her work in 1:08½, it would appear that these daughters of Echo are recovering their old-time form. We congratulate their genial and deserving owner, and indulge the hopes that they will give such a report of themselves as to revive in him the interest in turf sports, and induce him to return to the quarter-stretch where in times not long ago he took such an active and honorable part. That Los Angeles county is destined to achieve a national reputation for its horses as it has already done for its fruits and wines we firmly believe. With many natural advantages, it has also many intelligent breeders and a general public appreciation evinced by a liberal support of local jockey clubs and fair associations, will develop what will be found to be a great source of material wealth and a substantial adjunct to the commercial importance of the community.

## The Accident to Mr. Hickok.

The unlucky contretemps that threw Mr. Hickok "out of training" as it were was not so serious as at first reported, and he is at this writing much improved and still improving. He was working Ruby with a runner in harness next to the pole, and the pacing mare Lucy on the outside and a little behind. On the back quarter, while going at a fast pace, the runner shied and the sulkies collided, Mr. Hickok being thrown out. The fall was not severe, but Lucy went over him stepping on his head. His stiff hat broke the blow a little, and by a lucky chance the grey mare's foot was planted on Mr. Hickok's cheek bone and did not strike fairly on his skull. He was insensible for a time but rallied under proper medical attendance, and has been steadily gaining since. His physician pronounces it a mild case of concussion of the brain, and the probability of inflammation intervening is considered very remote. Mr. Hickok's departure for the east may be delayed a few days beyond the time fixed, which was the 20th. He will take with him St. Julien, Ruby, Eva, Louise a two-year-old Sultan filly, Connaught and the pacing mare Lucy. None of the horses mixed up in the collision were injured. Ruby ran for a mile and came to a trot, turning the track three times at that gait before she was caught.

## Record of Duncan's Mac.

Our Chico correspondent "Occasionally," whose letter will be found in another column, thinks we were in error when we stated that the brown stallion Mac, known as Duncan's Mac, had no record at all, and thinks Mac should be credited with 2:36. We were in error when we said the horse had never appeared in public, but we were not far wrong on point of his capacity. The race our correspondent refers to, where Mac trotted under the management of Budd Doble, occurred at the Bay District on February 7th, 1876. The starters were Alameda Maid, Dan, Mac, Maid of the Plains, Yellow Jacket, Roan Charley and Ed. McCook. Dan won the first and second heats in 2:40½, 2:36, Maid of the Plains the third in 2:38½, Mac the fourth in 2:40, and Alameda Maid the fifth, sixth and seventh in 2:40½, 2:43½, 2:45. Mac should be credited with 2:40.

## THE KENNEL.

### A Well-bred Setter.

On April 1st last the English setter bitch Daisette, ex Bennett's Regent—Waddington's Daisy, whelped ten healthy puppies, five dogs and five bitches. Daisette is owned by D. M. Pyle, Esq., of Gilroy, and was sired to Carl, a Leicester—Dart, owned by Mr. J. Y. Ross, of this city, on the 1st day of last February. Daisette is unexceptionally bred, and is one of the best-framed setters in the State, being of good size, well coupled with much bent stiles, deep, flat chest, good shoulders, legs and feet, and showing lots of that indefinable yet indispensable thing designated as "quality." She has shown in puppy form a superior nose and high courage, and has speed and staying power. She is a good bitch. In casting about for a stud dog the breeding and qualities of the English setters of the State was thoroughly canvassed, and Carl was at last chosen, for several good reasons. The dog himself is not a first-rate type of setter. He has a good coat and much quality, but is too much on the ground, is too long in the back, and cannot be either a great goer or a lasting dog. He is not the equal in bench form of either Paris, Clip, Strathroy, Pride of the South, Maude or Jennie, his brothers and sisters, but he has form enough to enable him to do a good deal of work, and with it has shown superior nose. But if his form was worse, and if he had shown no capacity in the field, there would yet be good reason for utilizing him in breeding from pure bitches, because the luck in him individually would assuredly be merely an instance of variation in hereditary transmission, which, within limitations, does not amount to much in a blood strain that is as fully established and well defined as is that from which Carl descends. The descendants of Leicester and Dart in the first degree removed made a record for themselves in field-trial competitions that has been unequalled in America. In the earlier American trials, out of one hundred and forty-two starters in various states, six were sons or daughters of Leicester and Dart, and brothers and sisters of Carl. In the stakes for which this great number of dogs started there were thirty-six purses, and the six Leicester—Darts took fifteen of them, nearly one-half. At this day it might be urged that this result showed merely that the Leicester—Darts were in better hands than the other dogs, and with some reason, because

the eastern trials have long since ceased to be trials of the dogs only, and have come to be exhibitions of the skill of various dog handlers. But when trials were inaugurated in America, and before the development of extraordinary skill such as is now shown by Sbord, Nesbitt, Tallman, Whitford, Avent, Taft, and others, the dogs were more nearly equal in acquired qualities, and at that time the Leicester—Darts showed magnificently. And this showing stamped the cross as a "nick." That the quality of the descendants of these dogs is not due to either sire or dam alone is shown by the fact that both Leicester and Dart got winning dogs when bred out. Leicester with Nellie and Pocabontas got winners, and so did Dart with Rake get Dog Whip and Stafford, both winning dogs and good ones. There is no blood that has shown greater adaptability to the needs of the field sportsman than that of the Leicester—Dart cross. And since Daisette comes, on both sides, from pure dogs of great field power, it seems fair to conclude that in so far as blood can insure excellence in the field this litter of Daisette should be good shooting dogs. But they never will be if my old friend Pyle sits down content with the possession of perfectly bred animals, and trusts to the intuitions of the youngsters to make them what he would like them to be. As well might Mr. Watson, of Sacramento, who has purchased in the east two Count Noble—Dashing Novice pups, and one from Dashing Monarch—May, which Mr. Post is to raise for him, expect his puppies to grow into Count Nobles, simply because the blood of that homely but grand dog runs steaming in their veins. Good blood is good, not because it lessens the labor necessary to proper training and development, but because it gives such large returns in actual usefulness, and because it can be certainly perpetuated. There is a disposition among quackish sportsmen to dilate *ad nauseam* upon the pedigrees of their pets. Which is nonsensical except at proper times, and such times are when pedigrees are being discussed, or the suitability of a dog for breeding purposes is being inquired into. Ordinarily, as to any dog, the question should be, not, what was his sire, or dam, but, is he steady under the gun, or, does he retrieve perfectly, or has he a good nose, or, is he a hacker. If there were but two dogs in all the world, one of them Truman's retrieving bull-terrier, of which he told such affecting stories at the Gilroy Trials, and the other Prince Laverack, how long do you suppose Mr. Editor, the practical sportsman would hesitate in choosing between them for his own use. Mauly love for setters and pointers becomes sentimental, not when it inclines owners to harp continually upon the one string that leads back to some great ancestor. It may be in a degree excusable when setter and pointer men in gaudy New York, or barren New Jersey, talk much about pedigrees and bench shows, but in this State the talk should be of field excellences and of field competitions. And in behalf of such competitions, I would like with your permission to note at an early day some conclusions forced upon me by the logic of the few last sportsmen's years.

## A Mysterious Death.

EDITOR BREEDER AND SPORTSMAN:—There have been so many reports as to the circumstances of the sudden death of my greyhound Templar that I deem it proper to make a statement of the matter. On Sunday the 30th ult., in company with a few other gentlemen, I took Templar to Newark for the purpose of settling a question of superiority between him and Sybil by the test of actual work. There were present Wm. Halpin, Mr. Nicol, John Sillery, Thos. Brady Mr. Foster the owner of the ground where we coursed, Mr. Jacoby the slipper and myself. When the dogs were put into the slips I noticed that Templar faltered, his actions attracting my attention particularly as he was always an ambitious dog, and usually prompt to go forward. He won the course however, but was immediately taken sick. I administered salt, the only remedy available, and he vomited freely, revived and seemed to be much better, but shortly after I returned home he died. These are the facts. The symptoms were those of poisoning, but how, when or where the poison was given him I know not. Templar was by Lord Beacousfield, out of imported Teresa. I imported his dam from England at a great expense, and my dogs represent an actual investment of \$1,000. Surely sportsmen will find little to encourage them in expending their time and money to procure superior animals if they are to be bespoiled by villainies like the poisoning of Templar. EDWARD TALBOT.  
San Francisco, April 10th.

## Orear's "Joe."

EDITOR BREEDER AND SPORTSMAN:—I notice a slight error in your report of "Field Trial Winners of America" in the issue of March 22d, which I would like to correct. In Gilroy Trial of 1881, Puppy Stake, you say 3d prize won by "Joe," English setter dog, owned by myself. Now, the fact is "Joe" is a Gordon setter, and a very fine one, too, being by Blossom, (5,000 English Kennel Club Stud-book) out of Moll (7,250 E. K. C. S. B.), and bred by Dr. Niven of London, Ontario, Canada. He has improved on his puppy form, and is likely one of the best Gordons in the United States. He is sire of Mand, 3d prize winner at Gilroy last fall. Very truly yours  
J. W. Orear.  
Downeyville, April 5th, 1884.

## Royalty at Seattle.

On the last trip of the O. R. N. steamskip Columbia to Portland the Purser Mr. Maynard, was invited by the Duke of Portland, formerly well known to the select sportsmen of San Francisco as Mr. Harry Catton, to accompany him in a royal progress to one of his outlying principalities, Seattle, there to shoot mad birds, not "skinkdoos" but clay pigeons. The Duke and party on reaching Seattle were received with much concern. The local paper intimating that the presence of so many strangers should lead the Chief of Police to renewed vigilance, and should prompt him to double his force while the visitors remained. On the day after reaching Seattle the party in company with Captain Stackpool, better known here as Commodore McCafferty, shot many matches with varying winners. The Duke was particularly benignant. In the afternoon he ceased to exact homage to the "divinity which doth budge a King," and insisted on saluting Commodore McCafferty as "Pa," very much to the Commodore's embarrassment, until the latter entered into the jest and answered His Grace by calling him "son." The royal party, after repeated but ineffectual efforts to plumb the depths of the loyal feelings of the Seattle people, and very successful efforts to conceal what of food and liquors were offered, retired to the Duely of Portland in rather bad order. Mr. John P. Bolus of San Jose, seemed particularly overcome, and sat weeping through all the homeward journey. Mr. Maynard was churmed by the graceful condescension of the Duke, and feels as though he could almost forswear his allegiance to California.

## OUR NEW YORK LETTER.

Arrival of an English Race-horse—The Walton—Girofle—Donahue Puzzle—The English Spring Handicaps—Death of Two Fine Colts—Betting in New York—General Notes, etc.

The National line's steamer Greece, that reached this port on Wednesday last, from London, brought over some fine stock, the most noteworthy importation being an eight-year-old thoroughbred stallion Charaxus, by Distin, out of Sappho, etc. Looking at this latest animal in the equine line as he stood in Stoddard's bonded stables, on Greenwood street, he is at once seen to be a blood-horse of the highest type, of good size, and decidedly racing-like in appearance. He was a good race-horse in England, defeating Boswell, Laburnum, and many other well known racers, and as he is still sound in every way it is proposed to give him an opportunity to face the horses on this side of the water, at Sheepshead Bay, Monmouth Park, and elsewhere. The Hon. E. Sandys, the owner of Charaxus, brought over with him also an English trainer and jockey and may possibly make this horse the nucleus of a racing stable here. He has purchased a stock-farm in Virginia in the neighborhood of Ellerslie, the home of Eole, Eolist and Eolite, and will install Charaxus there when the horse is through racing. You remember I wrote you of the departure for England of the jockey Donohue on March 8th, whither he arrived on the 17th, ostensibly to be the mount of Girofle at Epsom next month, and of other of Plunger Walton's horses in the English spring handicaps. Since then the matters of Walton, Girofle and Donahue have got so decidedly hazy and mixed as to elicit the following opinions in well-informed quarters, slightly different from those held by the rumor criers, the general public, *et al.*: First, Walton is still here in this city, in spite of a cablegram a week ago that he was in London! This causes wagers to be freely offered that he does not go to England at all this spring. Secondly, advices from Albion voice the opinion that Girofle's backward condition is such as to render it improbable of her being seen at the post before summer or the early fall. Heavy offers are made in this city to wager that no one can name the first race she will start in 1884. Thirdly, and most surprising conjecture of all, in view of all the enthusiastic glamour attaching the last month to the Donahue-Walton Girofle, it is quietly whispered and hinted around among a select few that Billy Donahue will ride in the City and Suburban on the 23d of April, as first announced, that he will ride an American horse, but not for Walton; in short, that his English trip has more to do with Mr. Keene's interests at Epsom next month than with those of the Plunger; that the run in London the last four weeks on another Yankee horse in the City and Suburban, albeit where it is now hard to procure 10 to 1 in London, and the hurried departure for England last week of Mr. Bathgate, the manager abroad of the Keene Stable, is very likely to be further supplemented by the announcement that Donahue's mount in the City and Suburban on the 23d of April will be in the "white and blue spots" of Mr. Keene, on no less an animal than the four-year-old son of Pat Molloy—Blue Grass. This colt was generally considered last August as the equal of Ossian, the St. Leger winner, whom he defeated at a difference of 5 pounds. No animal from this side that has ever attained turf honors in England, not even excepting the famous horses Parole, Iroquois, or Foxhall, would be more popular with American admirers than Blue Grass, if he attains high honors there, for the colt is more essentially American-bred than either of the famous trio named above. Of these the first two are English on their sire's side, as is also Foxhall through his grandsire's side, *imp.* Phaeton, while Blue Grass comes direct from our stoniest home-bred stock, through his sire Pat Molloy by Lexington, and his dam Amy Farley by Planet. The last English mail represents, however, that Blue Grass is coughing, and he has gone back in the betting somewhat. The results of the first notable events on the English turf have doubtless been wired to you ere this. Tonans, the winner of the Lincolnshire Handicap, is an Australian-bred horse, and was taken to England in 1880 as a two-year-old. He won a big stake for the Thompsons of Melbourne, who never tired backing the horse, according to English advices. In this city very little money was bet on the race. The Great National Steeple-chase at Liverpool last Friday was won by a comparatively unknown horse, who was heavily backed, solely by reason of his private reputation, his public doings not warranting the supposition that he would go one-half of the trying course. Voluptuary, however, is a well-bred animal, and as a yearling brought 660 guineas. In this vicinity everything pertaining to turf matters is in *statu quo*. The late season has played the d—l with the chances of some of the horses, and only last week Commodore Kittson's stable at Jerome Park, after walking ten or twelve miles from the Pennsylvania ferry in this city to Fordham, in a driving snow storm, were all taken down with colds, resulting in the cases of Sir Hercules and Sibley, the two-year-olds, by Alarm, in pneumonia, which carried them off in a few days. These colts were worth \$10,000 at least, and much more in prospective. Betting in this city has been quite animated since my last letter, what with the New Orleans races, the English events, and the "futures," as the Kentucky Derby, Louisville Cup, Withers Stakes, etc. are styled. Kentucky Derby betting has brought out ten or twelve horses, well backed, and a late candidate introduced is Farandole the half brother to Gledia. This son of Enquirer has been backed in one bet of \$200 against \$3,500, and is now at 10 to 1 in the books. Eva S., another prominent Derby candidate, has been sold this week to Chicago parties for \$4,500 and a percentage. She is a very cheap filly at these figures, seemingly. Both Miles and Powhatan are now at 6 to 1 each, and Buchanan is at 7 to 1. This latter horse will be Isaac Murphy's mount in the Derby now that Ten Full is dead, and Buchanan has been backed for a large amount. Also his stable companion Ensign, whom Stoval will ride. Richard L. is down to 8 to 1 in Chicago. This colt is at New Orleans, and is said to be doing finely. Loffin and Exploit are at 10 to 1, and are expected to do as well, by most good judges, as their more fancied stable companions Powhatan and Farandole. Conking, by Hyder Ali, is also at a short price, and so the list goes on. The race is a more open one than any for many years. The weights for the Chicago handicaps are published. Patsy Duffy, Jim Renwick, Grismer, Shenandoah, and the other Californians have not been over favored by the handicappers, but still have a fair chance, apparently. Up to date, fifteen stallions have entered in the Champion Stallion Stakes for 1885, with your coast to hear from. Yours,  
New York, March 31st, 1884.

PACIFIC.

## FISH.

During the week, by inquiring around in the proper quarters, we find the opening of the trout season was taken advantage of to a much greater extent than we supposed at first. In fact, every available stream has been visited and on some, we learn, the crowd was so large that there was, at least, a man for every fish, and the real pleasures of the sport thus diminished in proportion. In such promiscuous crowds the success of the trip varied, of course, being governed, as it must needs be, by chance and the ability of the angler. Still, the catches by competent men have been moderately good. Of the character of the catches, the most important thing to the true lover of sport, we regret we cannot say as much. On pushing inquiries with those claiming to have made good k reels, we soon found a suspicious hesitancy in giving the exact size of the fish, and in every case we felt satisfied that, with the exception of a few good-sized trout, to the party worthy the skill and the table of a true sportsman, the great proportion were poor, miserable, worthless fingerlings. Whether this can ever be avoided we do not pretend to say, but there most certainly ought to be some legal limit to such sized trout being caught. Section 636 of the Game Laws has a distinct reference to this practice, only the effect of the section, in its prohibitory character, is nullified by that stupidity so often found in our State Legislation. First, it says, "Every person who, by seine or any other means, shall catch the young of fish of any species, and who shall not return the same to the water immediately and alive, or who shall sell or offer for sale any such fish, fresh or dried, is guilty of a misdemeanor." Had the section in its restrictive power ended there, it would have been to-day a misdemeanor in any one to catch these little fingerling trout. Unfortunately it is nullified afterwards by the words "It shall not be lawful for any person to buy or sell, or offer or expose for sale, within this State, any kind of trout (except brook-trout) less than eight inches in length." And so it comes to be there is no avoiding the destruction of young brook-trout by thousands every year, though the evident spirit of the section referred to is against such vile practice. This is a very proper subject for the interference of the State Fish Commissioners. It is their especial duty by law to correct this gross absurdity and wrong in our legislation. But to expect any salutary action on their part, aiming at the benefit of the State, is like looking for a miracle to cure the leprosy. The only way we see to give the people proper brook-trout to catch and eat, is to prohibit trout-fishing *in toto* for a number of years. In the meantime go on, boys, and catch all the fingerlings you can. Then, commissioners or no commissioners, law or no law, you will destroy it effectually yourselves. It is from the want of a privilege grossly and shamefully abused that the best laws and reforms oftentimes come.

It has long been notorious that Sonoma creek, in the trout season, has been marauded year after year by men and boys, with guns, clubs, spears, and giant powder, from the mouth of the creek to the Lemli Fish Ladder. What poor fish escaped the army of marauders and reached the ladder, on its way to the spawning grounds, was either giggered or lifted from the ladder by hand and deposited in *private* ponds. To this shameful conduct, we this week hear of some young men, whose social position should save them from being law-breakers, using giant powder on another stream in Sonoma county, and defying public opinion in doing so, because their father is rich. A gentleman who loves the fish is on the track of these young gentlemen, and we shall soon see in a position to make a statement authoritatively that will surprise the community. Here is another reason why the Fish Commissioners should send Constable Jones on a prospecting tour into Sonoma and Napa counties. We are getting about tired of doing their detective work. Is it not time they should quit junketing and attend to business?

It is said the State Fish Hatchery at Grass Valley is now capable of hatching out a million trout eggs. Perhaps so, but how are the eggs to be obtained? The Commissioners have mortgaged the annual appropriation to the amount of \$4,000, and therefore nothing can be done in that line, either now or for some time to come. It was not so with the old Commissioners, of blessed memory, at San Leandro. There they did not care so much about the capacity of the hatchery as they cared about actually hatching, out trout and no season came round when 100,000 trout eggs, at least, were not hatched out and the young distributed for the benefit of the State. How different, to be sure, is the sense of duty in different men. We would rather, in principle, have one hatchery that turned out 100,000 young trout every year, than a thousand hatcheries with the capacity of a million that turns out nothing. Under the circumstances, such a boast is simply contemptible.

Benjamin Burling, who may really be regarded as the Isaac Walton of the coast, made a fine catch on the opening day at the head waters of Lagunitas. He returned home with 125, the whole ranging from five to six fish to the pound. To keep off interviewers, we suppose, Burling always returns with a huge bowie-knife and ugly revolver conspicuous on his person.

George McBoyle last week caught 60 fine trout that averaged well. When it came to the locality of the creek his memory, however, was as treacherous as the witnesses in the Sharon case. It was somewhere in the State, he was sure of that, but the name of the county or district he could not recollect, for the life of Jim. There are many like friend McBoyle just now.

Judge Joachimsen caught a salmon trout that tipped the scales at 9 pounds on Paper Mill creek last week. This would be one of the best streams in the State if it were not for Taylor's dam. The dam case still lies before the Supreme Court on appeal. For this delay many good anglers say damn the Supreme Court. That's naughty, though.

To-morrow the Walton Fishing Club make their first excursion of the season. No more genial set of men ever banded line than the Waltonites, and we are really sorry a previous engagement we cannot neglect prevents us accepting their kind invitation to be present. Clem Dixon's bottle of dark stuff will be there, and other good things, too.

It is reported that a striped bass weighing 20 pounds was caught this week near Vallejo. If so, it must be one of the first plant by the old commissioners, and gives up hope that our waters may soon be full of this splendid fish. Another honor to the memory of the old commissioners.

John Millsner had only moderate sport on Lagunitas. On this creek and Paper Mill creek last week the crowd was terrible. The reports from Wild Cat, Walnut and Sau Rafael creeks are not very encouraging. The water in each is still high and muddy.

## THE DRAMA.

## The Grand Opera House.

During the week Chispa has been the attraction, a play in its construction and material that recommends itself to California life, not so much because it is startling and curdling in its main features, as that the tale at the same time is well and naturally worked out. The leading character, Chispa in the life, trials and suffering she is called upon to lead and suffer, is well suited to Miss Phoebe Davies' dramatic genius, but she was suddenly taken ill, and with only a few hours notice it had to be assumed by Miss Charlotte Tittel, whose wonderful conception of character and power of impersonation we were the first to assert, and afterwards maintain until they were fully recognized by all leading theatrical authorities. Her singular success as Chispa, an entirely original conception, for she had never seen it performed before she undertook it on this occasion, is very gratifying to all who know her, as it plainly shows what she is capable of doing in more important characters. Every paper in the city of authority has emphatically endorsed her acting in Chispa, but generous as it is, we hope it will not divert her from her studies and lead her to imagine she has nothing more to learn. In point of delicacy it may not be quite the proper thing to compare the abilities of our two most promising young actresses, yet the press has done so very strongly in this case, and unanimously preferred Miss Tittel to Miss Davies. That is our judgment also. The last scene, in which Chispa goes mad on finding herself married to the man who murdered her mother, was true to nature without a fault, in fact really wonderful for its artistic power in a young and inexperienced girl, not yet eighteen years old, and who has only been on the legitimate stage about fifteen months. Actresses, like poets, are evidently born not made. The other parts were all fairly sustained, though we never did and never shall like the acting of Grismer. Next week there will be an entire change of programme, with great attractions.

## The California Theatre.

Having last week described the character, incidents, scenery, embellishments, transformations, performances, and the grand *tout ensemble* of the Kivalry Excelsior, there is nothing new to add this week, except that it continues its career with the same excellence, attraction, and popularity. Outside the Thomas' concerts, or the late opera, it is no exaggeration to say there has been nothing in our city presented for popular acceptance during many long years, so successful among all classes as the gorgeous spectacle now filling the California every night to its utmost capacity. This is only what we predicted on seeing it the first night, and we run no risk as to judgment, in saying it will be so until the last night. This unqualified success is a triumph for Mr. Bert, for which we sincerely congratulate him.

## Oakland Theatre.

The well-known and interesting melo-drama, The World, has been warmly received in our sister city, and again assures us that with good plays well performed, the Colosseum in Oakland is an established fact. This is a credit to our sister city, which we by no means wish to under estimate. With the plays presented, at popular prices, it is calculated to do much local good in many ways. Next week the elaborate and romantic drama, Rosedale, will be presented, with Charlotte Tittel, we believe, in the principal character. Her precocious little sister Minnie, so wonderful as a child actress, will also appear in Rosedale. Both are established favorites in Oakland. The piece is well written, full of interest, and will, we doubt not, be successful.

## The Vienna Garden.

Although the weather has been unpropitious for theatrical managers, this popular place of amusement has been well filled to hear the Ladies' Orchestra. Judging from the excellent class of people it seems as if the Vienna was the favorite place in town for a pleasant evening and quiet lunch. This is certainly the best evidence of successful management that can be given. Next week the ladies retire for a short season previous to appearing at the Telegraph Hill pavilion, and their places will be taken by Wyatt's Minstrel Combination, which has the credit of being good. This will give us a chance of hearing the popular California quartette again.

## The Telegraph Hill Observatory.

In connection with Mr. Walters' enterprise and spirited management, we have this week to say a few words about the opening of this new and magnificent musical institution which will be about 1st of May next. We have visited the Observatory, and find it large and well constructed for its principal purpose—grand musical entertainments. The Observatory has been built by a stock company, with F. O. Layman president, and Gustave Sistro vice-president. To reach the observatory comfortably a cable-line has been built from the junction of Powell and Greenwich streets, and as the horse-car line, running from the South Pacific Railroad depot on Townsend street, at the foot of Fourth, will give transfers, the fare to the top of the hill will be only five cents. Attached to the really fine building, below the concert hall are restaurant, bar, and numerous private rooms which will be under the supervision and management of Mr. Walters of the Vienna Garden, who holds a pecuniary interest in the enterprise. The concert hall is large, well constructed for music, and handsomely furnished with variegated woods on the ceiling and walls. Concerts will be given every afternoon and evening under an able musical director, and among the attractions will be the Ladies' Orchestra that has so long delighted the lovers of music at the Vienna Garden. In the circular room above the concert hall a number of powerful field glasses will be at the disposal of visitors, and in the lofty cupola above that room an immense swinging telescope about six feet long. From both these rooms a most extensive and enchanting view of the bay, the city and their surroundings can be had, far exceeding anything we know elsewhere, extending as it does, from Golden Gate to the mountains in the south, and embracing every object of interest in that vast distance. On gala days, yacht races, and so forth, when our grand bay will be invested with additional interest, the observatory will be the best place to see the pageants as they pass in panoramic form and beauty before the vision. At all times this will be the most enchanting place to pass a few hours we have in the city. Taken all together it is a bold and costly enterprise, but it has been matured with such liberality of expenditure, and such sound business judgment that we not doubt its success in the end. As an ornament to our city, and as an evidence of our progress and spirit, the prize richly deserves success.

STABLE AND PADDOCK.

Improvement of Colts.

The first thing to do in the art of breeding is, to prepare the sire and dam for the stud. They should be raised to the highest state of health and vigor, in order to elevate the character of their colts. They are generally left in their natural state, without any preparation. In that state, the soft relaxed muscles and dull, spiritless action, will be reproduced as dormant energies in the foal. The colts will partake of the condition of the parents at the time of conception. How shall we condition the parents for breeding so as to improve the quality of their offspring? How shall we improve the natural state by artificial cultivation? are the questions that come up to confront us. The high state of health and vigor in the animal race is brought about by exercise, sweating, grooming, good food, artificial cultivation, warmth, and cleanliness. Hard muscular form and great nervous energy at conception will be entailed to the offspring.

Exercise hardens the muscles, strengthens the limbs, expands the chest, and prepares the wind and body to stand severe exertion. Sweating draws out of the body superfluous fat, that acts as dead weight to retard the movements. It clears the wind, quickens the circulation of the blood, stimulates the nerves that feed the motive power that moves the body. Grooming and rubbing clean the body, open the pores of the skin to the insensible perspiration, promote a healthy vigorous action in the muscular organs, and prepare the vital forces to keep up continued exertion without exhausting physical powers.

The grand preparation for the stud may be said to lay the foundation for the improvement of our horse stock. It is one step in advance. It will effect a radical change in the constitution of their colts, if it does not produce a complete revolution in the progressive power and supple action of our breed of horses. The expense or preparation for the harem is not extravagant. Much of the exercise can be performed at intervals of labor.

The breeder can not afford to breed from diseased cripples, or old, broken-down screws, or from parents out of condition, deprived of health and vigor, to perpetuate the good qualities of their family to their successors in blood. The sire should be in superb condition, because he begets a multitude in his own likeness. The reason that one colt often excels all others in the same family results from the fact that the parents were in better condition when that colt was hatched than at the conception of any other foal in that individual family; hence, one colt proves to be king of his co-relatives. It has been found from experience, when a stallion has been used for labor, that he gets colts superior to himself or the breed from which he sprang. The reason is obvious. He was in robust health, from daily exercise, and imparted that vigorous condition to his colts. The consequence was, that the produce developed a hard-bottomed constitution, superior to the blood lines of the family. Some stallions, well bred, have not been able to stand the grand preparation; they never could be conditioned to get anything of value, while their full brothers have proved successful progenitors in the stud.

Stallions gifted with the prepotent power of perpetuating their leading characteristics to the third and fourth generation of their descendants have a precious inheritance. That strong vitality is more valuable than the lead to a gold mine; it is an hereditary power that shapes the destinies of multitudes of the equine race; it holds dominion over the brute creation. All the great families in the equine race have been formed, perpetuated, and preserved through the prepotent influence of famous stallions; they have perpetuated the good qualities of great ancestors to their successors in blood for many generations. Messenger, landed upon our soil 96 years ago, had a prepotent inheritance that survived his remains. A great family came down from his loins, whose branches have spread over a continent. It has fertilized the blood of American trotters till they have produced the champions of the world.

Great credit is due to the dam as well as the sire for the produce of celebrated colts. Some mares have been prolific in renowned progeny that have reflected credit upon their maternal origin and distinction to their race. The noted brood-mare Clara by Seely's American Star, bred three colts to Hambletonian that have gained a place in the charmed circle of the 2:30 trotting class. Dolly, by Mambrino Chief, dropped Thorndale, Onward, and Director, whose average record on the trotting course is 2:21 1/2. Flora, by Sayers' Harry Clay, dropped St. Julien, record 2:11 1/2, St. Remo, and Unalala. Miss Knssell, by Pilot, Jr., has produced three colts whose average record is 2:17 1/2. Green Mountain Maid, by Sayers' Harry Clay, bred to Messenger Duroc Prospero, record 2:20, Dame Trot, 2:22, and Elaine 2:20. Maid of Clay, by Henry Clay, has no less than four of her produce in the 2:30 class. The mare Ned, by Edwin Forrest, has dropped three colts to Magic and one to Strathmore that have made an average of 2:22.

These flyers must have derived their speed from the maternal line, because their sires never got such remarkable trotters out of any other mares. These facts and figures show that the mare is an important factor in the production of the most renowned champions of the trotting turf. They have produced kings on the road as well as conquerors on the turf. The remarkable performance of one colt from a dam has sold the whole produce at high figures, even before they matured, on account of the fame of their mother. From these premises we must draw the conclusion that we must have first-class sires and dams to get very superior colts. "Like produce like" is an axiom in genealogy as old as the art of breeding. When a mare breeds one superior colt from a horse, all other things being equal, if coupled with the same horse she will produce another colt of equal merit.—Live Stock Journal.

The Horse's Back.

Upward of twenty years ago an English authority on the breeding of horses, Mr. W. Dickinson, in a letter addressed to the Right Hon. John Evelyn Devison, drew attention to an important principle to be observed in the selection of horses for various purposes. In order to make his meaning more clear we will begin with an illustration which he uses after stating the results of his own careful observation of draft horses. It is that of the arch of a bridge, which, from its structure can bear great weight placed upon it, whereas, an inverted arch would fall to pieces, or a pressure far less than that of the incumbent weight, brought to bear upon the arch from below, would break it up.

Mr. Dickinson had observed that his low-backed, or, as they would be commonly called, rather hollow-backed horses, working in harness, kept their condition well, while those with high backs lost flesh. A less quickly observant man would not have noticed this fact, perhaps, in the course of his life-time. He would have seen that some horses were always full-fleshed, others poor after much work, and he might have satisfied his curiosity to know the reason by

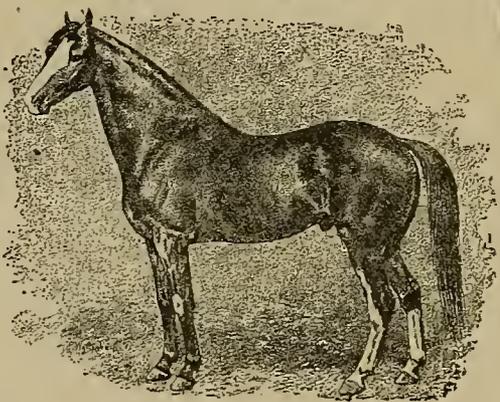

assuming that some horses had better constitutional powers of endurance than others, or he might have gone off on a false scent, and have endeavored to classify the fat and the lean, the nutring and the soon wearied, according to color, possibly discovering that horses of this color were mostly in good, of that color mostly in had condition; but it just occurred to him to observe the forms of the horses so differently affected by their work, and he was at once struck with the fact to which reference has been already made, that the horses which lost flesh all had high backs. Every time he noticed this he put to himself the question, "why?" But the discovery of a sufficient answer cost him much time and trouble. At length the idea of the arch flashed across his brain as the happy solution of his perplexing question, and this was confirmed by the discovery that the horse which could best draw a weight was least able to bear a weight upon its back, while the horse unable to bear the strain of draft could beat the other any day in carrying a weight. The line of the vertebrae, he found, indicates the sort of work for which the horse is fitted. If it is high the weight must be from below, for the same reason. So, if a high-backed horse were to try to push a heavy weight back, the spine, already bent in the wrong direction for the purpose, is bent to a still higher arch, the arch is opened and the power lost. The low-backed horse, on the contrary, can push back almost any weight, for the pressure is brought to bear upon the under part, which, in his case, is the convex part of the arch, thus strengthening it. A downward curvature, therefore, is the best form of spine for a draft-horse, so that when he bends his body for a pull, or when his body is necessarily forced into a heap by the effort to push back a weight, the force of the movement does not escape (if we may put it so) through a yielding arch. For a proof of the principle, Mr. Dickenson proposes that a high-backed and a low-backed horse should be put to the plow side by side, and the experimenter observe whether the high back does not bend higher in the work, and the low back remains in its ordinary position. The back which bends in the back which is weak for that sort of labor.—Live Stock Journal.

Horse-raising in Modoc Co.

Horse-raising, in this county, has not received the attention which the importance of the business demands. The natural facilities are very great, and the demand for good horses is far in excess of the supply. We have here, in Modoc, one of the best horse countries in the world. There is an abundance of summer range of the finest of hunch grass, and, as a general thing, horses will make their own living during the whole year, and even if they do require feeding hay is so cheap that the cost of feeding is very small. It costs no more, hardly as much, to raise a horse for market as it does a steer, and, at even the present high prices for cattle, one good four-year-old horse will sell for as much as two or three steers of the same age. To illustrate the profits of horse-raising I will mention the case of one of our Davis Creek ranchers, who, twelve years ago, brought to this country one mare and colt. From the increase of these he has sold fifteen hundred dollars worth of horses, and now has about twenty head of horses, mares and colts left. He considers that the use of the mares on the road and ranch have amply paid for all the feed and care of them, and that the increase and profits are nearly all clear gain. If there is any other stock business that can show a greater percentage of profits than that I would like to know what it is. People are already beginning to see that a larger grade of horses are the most profitable, and within a few years several very fine stallions have been imported into this county. Modoc county horses have, in the lower country, the name of being the hardiest and most durable horses in the market, and with the increase in size, which will result from crossing with the Clyde and Percheron horses that have lately been imported, will make as good a breed of work horses as any in the world.—Adm Argus.

STALLIONS THOROUGHBRED.

The Thoroughbred Stallion

JOE HOOKER, BY MONDAY.

First dam Mayflower, by Imp. Eclipse.  
 Second dam Jennie Farrow, by Imp. Shamrock.  
 Third dam Ida, by Imp. Belshazzar.  
 Fourth dam Gannan's dam, by Sir Richard.  
 Fifth dam, by Imp. Eagle.  
 Sixth dam Bet Bosley, by Wilke's Wonder.  
 Seventh dam, by Chanticleer.  
 Eighth dam, by Imp. Sterling.  
 Ninth dam, by Clodius.  
 Tenth dam, by Imp. Silver Eye.  
 Eleventh dam, by Imp. Jolly Roger.  
 Twelfth dam, by Partner.  
 Thirteenth dam, by Imp. Monkey.  
 Fourteenth dam, Imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARES OF APPROVED breeding. Good pasturage for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freeport road. This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Renwick. For history of Joe Hooker see BREEDER AND SPORTSMAN JANUARY 20th, 1884. THEO. WINTERS, Sacramento, Cal.

The Thoroughbred Stallion

WILDIDLE.

By Imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal. Wildidle is the sire of Gov. Stanford's Frolic filly (record of one mile, 1:42, at two years old), May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note. Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address H. C. JUDSON, Owner, or W. L. APPELBY, Supt., Santa Clara, Cal. P. O. Box 223.

STALLIONS

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

Chestnut horse, by MONARCHIST, he by Lexington. First dam, Dame Gourlay (Blue Gown), by Planet. Second dam, Flora G., by Lexington. Third dam, Fanny G., by Imp. Margrave. Fourth dam, Lances, by Lance. Fifth dam, Aurora, by Aratus. Sixth dam, Paragon, by Imp. Buzzard. Seventh dam, Indiana, by Columbus (son of Imp. Pantaloon). Eighth dam, Jane Hurl, by Hampton's Paragon. Ninth dam, Moll, by Imp. Figure. Tenth dam, Shamerkin, by Imp. Wildair. Eleventh dam, Imp. Cub Mare, by Cub. Twelfth dam, Aramantus's dam, by Second. Thirteenth dam, by Starling. Fourteenth dam, by Croft's Partner. Fifteenth dam, by Greyhound. At \$50 the season, due at the time of service.

JIM BROWNE.

Chestnut horse, by FOSTER, he by Lexington. First dam, Flush, by Hiawatha. Second dam, Fanny Bngg, by Imp. Ambassador. Third dam, Ida, by Imp. Belshazzar. Fourth dam, Madame Bosley, by Sir Richard Tonson. Fifth dam, Nancy Nichol, by Imp. Eagle. Sixth dam, Bet Bosley, by Wilke's Wonder. Seventh dam, by Chanticleer. Eighth dam, by Imp. Sterling. Ninth dam, by Clodius. Tenth dam, by Imp. Silver Eye. Eleventh dam, by Jolly Roger. Twelfth dam, by Imp. Partner. Thirteenth dam, Imp. Monkey. Fourteenth dam, an Imp. mare from the stud of Harrison of Brandon. At \$50 the season, due at time of service.

Trotting Stallions.

ECHO.

Bay horse, by RYSDYK'S HAMBLETONIAN. First dam, Fanny Felter, by Magnolia, son of Seely's American Star. Second dam, by Webber's Kentucky Whip. Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of Imp. Messenger. At \$100 the season, due at time of service.

ALGONA.

Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian. First dam, Emma Kinkaid, by Conscript, son of Cassius M. Clay. Second dam, Edie Dean, by Mambrino Chief. Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy. At \$100 the season, due at time of service.

ALASKA.

Brown horse, by ELECTIONER. First dam, by Washington, he by Geo. M. Patchou. Second dam, by Williamson's Belmont. At \$50 the season, due at time of service. The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents. John Mackey, Superintendent, Sacramento, Cal.

THOROUGHBRED STALLION

X X,

Pedigree.

X X (Doublecross), bred by Jos. Cairn Simpson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM. First dam, Columbia, by Imported Bonnie Scotland. Second dam, Young Fashion, by Imported Monarch. Third dam, Fashion, by Imported Trustee. Fourth dam, Bonnets o' Blue, by Sir Charles. Fifth dam, Reality, by Sir Archy. Sixth dam, by Imported Medley. Seventh dam, by Imported Centinel. Eighth dam, by Mark Anthony. Ninth dam, by Imported Johns. Tenth dam, by Imported Monkey. Eleventh dam, by Imported Silvereye. Twelfth dam, by Spauker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79. X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Wauwata, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hoek Hoeking, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagamore, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing catalogues will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his breeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition. Will make the coming season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season. JOSEPH CAIRN SIMPSON, Oakland or 608 Montgomery Street, San Francisco.

HERD AND SWINE.

Poisonous Weeds and Grasses.

Dr. E. W. Gerwer, of Erie, Penn., furnishes a local paper with the following readable screed on ergotism and similar diseases caused by poisonous weeds and grasses.

For several months news was received from different parts of the United States about a mysterious disease amongst the cattle. The affected animals commenced to tremble all over, looked wild with their eyes, and lost their hoofs and feet by gangrene and died miserably. In the neighborhood of Erie, at Grahamsville, a herd was affected and all agreed that the animals were kept in the best possible order; that they had a good stable, plenty to eat and good drinking water, and the owner was an intelligent man who understood his business. Some said the animals had frozen their feet; others claimed it was the mouth and foot rot, without a sore mouth, as this part showed no disease, others thought something else; but the animals suffered and died in spite of all the theories. Finally two days ago a flash from the telegraph brought some other news from Neosho Falls, Kansas, where a herd was affected. Some veterinary surgeons examined the fodder of the sick animals and discovered in it an abundance of poisonous ergot, spurred rye, secal cornutum, which the Germans call hand or mutterhorn, and which is a favorite prescription for our midwives, and creates a good deal of mischief given in large quantities. Mixed with the cereals it will poison men and beasts and cause gangrene of the fingers and toes, and finally death. It grows particularly in wet years, where it is not wanted, like its comrade the darnel grass—lohim temulentum—which the Germans call very nicely swindle oats—"schwindel hafer" or lolch—a miserable counterfeit of the honest oats, like the oleomargarine and the suine of the cow hutter. The ergotism is no new disease and existed 500 years ago. During the war between the Guelphs and Ghibelins in Italy, and when the forefathers of the modern Salvation Army, the Flagellants or whip-brothers made their capers and marched from place to place in old Germany, singing and praying and whipping each other, the disease showed itself in places, where rye bread was the principal food of the people. From the funny creeping feeling the patients got in their mortifying fingers and toes they called it creeping disease—Kriehel Kranheit. Francis Petrarch, who described the plague, also mentions the ergotism. As an antidote the bread of the monasteries was recommended and to be sure the old monks understood how to make wholesome bread. Whole families and communities were affected in Germany. At the first appearance of the disease the people accused the Jews of having poisoned the wells, also some old women who passed as witches, and made short work with them. When the disease did not abate after the burning of piles of witches, researches were made in other directions according to the historian. Finally the true inwardness of the disease was discovered in the poisonous plants mixed with their daily food, and the official occupation of the Jew-killers and witch-burners was played out. The different governments issued sanitary regulations for the prevention of the disease, for instance Saxony, and since it has almost disappeared. In the smallest village school in southern Germany you find nowadays on the wall some colored pictures of the prevailing poisonous plants—mostly Lorchers, printed at Ulm. There you see the ergot, the darnel grass, the night shake, the balladonna, the water hemlock, the cowbane, the hellebore, the foxglove, the acouite, the fools' parsley and the deadly toadstools. The scholars impress these pictures in their minds and remember them when they find the plants again often far away from the old home. Such pictures might also be useful in our schools, and you have just to tell it to the school directors, so they won't forget it before next meeting. Our farmers should also remove a few more poisonous weeds from the fence corners, and it would be more profitable than to throw their money away for blood-cleaning medicines, cattle powder and other stuffs. It will take a long time to convince some cattle owners of the poisoning of their animals with spurred rye and darnel grass, but time will fetch them. Many a man believes now in the ravages of the pork worm—trichina spiralis—who used to crack jokes about it, and microscopes are now used by people who looked at them a few years ago as foolish playthings.

There is a law in Japan which would raise havoc around here. There they flog publicly men who have too many poisonous weeds in their fields. Here in Erie we find in the fall of the year in the alleys, along some sidewalks, and in some unoccupied lots, wagon loads of the poisonous thorn-apple, or Jamestown weed, and often small children get poisoned by eating the seeds. If you talk to the proprietor he often feels insulted and looks at you like an innocent land-lubber at a steamboat. Generally such a nuisance will not be removed unless the youngest member of the family come home squealing with his little hands full of thorns and with symptoms of poisoning. It is about the same trouble with some farmers. It is also no wonder if occasionally some cattle get sick, particularly during the winter, while locked up in the stable and forced to eat poor hay, sand-witched with the infernal ergot and darnel grass as the Peo-sho cattle in Kansas.

The discovery of the cause of this mysterious disease is no small relief to the little stock-raisers on the homesteads, and to the wealthy cattle kings of our great west; and at the same time it is another encouragement for the men who have spent their lives, perhaps, in poverty, to investigate the secrets of nature.

How Long Should Cows be Retained in the Dairy.

Cows that are becoming aged do not pay to keep. They lose more by depreciation in value than they return in profit on their keeping, unless they are extraordinary milkers. Those who make the most money by dairying turn their cows before they can properly be called old—while they will fatten readily and make good beef. Holding on to them too long spoils them for this purpose. The flesh of old animals is tough and insipid, and full of gristle or cartilage, and it costs very much more to put fat and flesh on them than on younger animals. It is true with animals generally that as they advance in years, assimilation goes on more slowly, while waste is more rapid, and digestion slower and less complete. Depreciation in the power of assimilation begins as soon as animals get their growth, and even before. A pig ten or twelve months old does not assimilate with as much vigor as one two or three months old, although it will continue growing slowly for some time longer. A pig two months old will put on a pound of live weight from the consumption of ten pounds of milk. At twelve months old it will require from fifteen to twenty pounds of milk to make the same gain. The life of the domesticated hog is short, and soon terminated at the best, and accordingly it begins early to depreciate in the activity of its vital forces. The bovine race have a

longer period of longevity, and their vital activity does not begin to abate so soon, but it begins to depreciate before growth is completed. It has been found by beef producers that it costs more food to effect a given weight of gain upon a steer five years old than upon one, two or three years old, and more even on a three-year-old than on a two-year-old steer. Meat producers are all leaning towards the practice of making meat from young animals, because they make it at less cost than older ones. The dairymen should not lose sight of this general rule in the operation of the vital forces of the animals under his care. Making meat and making milk are similar operations, and depend on the same vital laws for their accomplishment, and the intelligent dairymen may well expect that similar results will occur in his line of production that do in meat-production, and it is so. It costs more to make milk from old cows than it does from young ones having the same milk-producing capacity. The period of profitable milking does not terminate at the same age with all cows alike. Some hold out longer than others, but, as a rule, the best effects do not often reach beyond the eighth year of the cow's age. The quantity of milk given generally keeps up till a cow is about ten years old, and sometimes it will considerably longer; but after a cow has reached her eighth year her milk is produced at a greater cost of feed, and after that age it costs more to fatten her, and her flesh depreciates in quality, so that some of the most thorough-going dairymen think it the most profitable to turn them at eight, while they will fatten easily and make good beef, than to retain them till their milk and flesh and feeding capacity all fall together, as they will usually do at about the age of ten. The body of a cow that is kept till her milk fails is just about lost. It is really not worth anything as a basis for putting more flesh on. If anybody outside the dairy can make any use of her so as to give something for her, he is the man to handle her. The dairymen had better let her go for whatever he can get. It will not pay him to feed her for fattening. She will eat herself up, so to speak, before she is fit for food. I have tried this way of disposing of superannuated cows several times, and always lost by it. The cost of fattening was more than the animals would bring after feeding, and if disposed of to a local butcher, there was very sure to come back a growl about the quality of the meat.

The best disposition I ever made of cows to be turned off was to turn them at eight or nine, keeping them farrow the last year I intended to milk them, and feed and fatten while milking them. The milk helped to pay for the feed for fattening, and sometimes for the whole of it. The milk under high feeding gradually reduced in quantity, and became very rich and valuable. I have had it rich enough to get a pound of cheese from seven and a half-pounds of milk, and a pound of butter from twelve and three-quarter pounds, the cows fed being common natives. Milk so rich as that does not require a large quantity to pay the cost of keeping, and give the owner a clear profit on the gain in weight and quantity of flesh.

Leasing the Ranges.

A Colorado representative has introduced in congress a bill to tax cattle feeding on the public domain. The bill provides in substance as follows:

First—that the grazing of the public lands shall be leased without price to the state or territory in which it is situated for all time, or so long as the lands are the property of the government, and no longer.

Second—that the state or territory may charge and collect a grazing fee of not more than ten cents per head per year for all cattle and horses, and not more than two cents per head for sheep.

Third—that the rental so collected shall be applied to the building and maintaining of school houses, colleges, asylums and other institutions of learning or homes for the afflicted as the state or territory may direct.

Fourth—that said grazing lease shall be no barrier to the disposal of the public domain, but when any piece or parcel of land shall be disposed of by sale, grant or homestead, then such piece or parcel shall be released from such lease, and no sooner.

Lice are worse on cattle that have been neglected, but sometimes manage to find a footing on those that are well cared for. In many cases the afflicted animal will die from irritation unless relieved. This may be done by an application of Irish potato water, or water in which the potatoes or peelings have been boiled. Apply about the head, neck, along the backbone and back of the fore-arms. There are numerous other remedies, such as tobacco water (weak), sulphur, lard and tobacco mixed, and coal oil alone, apply from the can in moderate quantity. Too much will remove the hair. Young calves suffer intensely and constantly from this pest when they are once infested, and it is cruel and dangerous not to give them immediate relief.

Wm. Bihler, of Lakeville, who owns General Dana and many other fine horses, was somewhat nettled by a proposition from the owners of Anteeo to purchase General Dana to be used for menial purposes, and thereupon challenges the owners of Anteeo, or any of his colts, to trot yearlings of the two horses at the fair for \$300. Or he will back one of General Dana's sucking colts against any Anteeo colt, the owners of each to put up \$25 every month till the colts are three years old, when the best one shall take it, gate money and all. As the owners of Anteeo are what the boys call "blooded," we shall expect the match to be made at an early day.—*Petaluma Argus.*

The chestnut mare Magdallah by Primus, owned by Charles Crocker, will be trained this year by John Williams, at Stockton.

The Sonoma County Agricultural Park Association has fixed upon August 15th to the 23d for the next annual exhibition.

It is proposed to hold a spring racing meeting on the new track at Fresno, some time next month.

TROTTING STALLIONS.

Standard Trotting Stallion

BILLY HAYWARD, 489,

At NILES, ALAMEDA COUNTY.

Terms \$20.00. Good pasturage \$3.00.

JAS. J. MARTIN, Agent.

Mambrino Trotting Stallion

ABBOTSFORD.

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE; San Mateo, Cal.

PEDIGREE.

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Farmmaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Kosciusko, by Sir Archy.

Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Malice 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Conroy 2:22 1/2; Magenta 2:24 1/2; Manfred 2:25; Fancost 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McFatridge 2:28; Dacia 2:28 1/2; Geo. A. Aver 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Trinket 2:14. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,350 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:19 1/2; Commonwealth 2:22; Hiram, Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Mylow 2:30.

TERMS.

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or injuries.

WASH JAMES, Agent, San Mateo, Cal.

The Trotting Stallions

Baywood and Fleetwood

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

BAYWOOD

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds; fine bone, level-headed and a good mover. Sired by Nutwood; first dam by Geo. M. Fatchen; second dam b Champion; third dam by Belmont.

FLEETWOOD

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model a perfect horse; high life, fine style and action, and looks like thoroughbred. Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Tillotson Mare, pedigree unknown but she was reported to have been bred in Kentucky. Terms, \$25 for the season, or \$10 to insure.

F. S. SMITH, San Jose.

The Trotting-Bred Stallion

A. T. STEWART,

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, sixteen and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1872, and is an inbred Mambrino. Sired by Mambrino Fatchen (full brother of Lady Thorn), record 2:18 1/2; sire of Katie Middleton, 2:22, and mare in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Pilot, Jr., brother in blood to the sire of the dam of Maul 2:20 1/2; Mambrino Fatchen sired by Mambrino Chief, by by Mambrino Farmmaster, and he by Mambrino, thoroughbredson of imported Massachusetts.

Terms for the season, \$50. Address

SOMERS & AYER

The Guaranty Stakes of \$10,000 for 2:19 horses, which called out so many entries last year, and which resulted in a brilliant contest, in the presence of crowded stands, will be given again this year by Charter Oak Driving Park. The first subscription of \$250 is due May 1st, the second June 10th, and the third August 12th, when subscribers are required to name their horses. The final payment of \$250 must be made the night before the race. Horses with records not better than 2:19 on May 1st will be eligible for the race. The richness of the prize and the conditions of entry will draw out as big a field of starters this year as last year.

515 Market Street 515  
San Francisco, Cal.  
Sole Agents for the Celebrated Benthams Convex Mirrors.

The hay trotting gelding Charley Knox 2:31, purchased a short time ago by Senator J. H. Morrison, of Lowell, Mass., for \$1,500 cash, and his George H., met with an accident on the Brighton Beach Road, Boston, last week, from which it became necessary to kill him. He was being speeded by the Senator, and one of his hind shoes caught a quarter boot on his fore foot, throwing him violently and breaking a leg.

Another large transaction is to be recorded in the sale of the fast three-year-old filly Eva S. by Billet, out of Mammie S., by Mahomet. Messrs. Weidman & Day of Chicago, have given Gilman Bros. \$4,500 for a three-fourths interest in her.

### National Association

Trotting-Horse Breeders.

FIXED EVENTS AND STAKES FOR 1884, 1885, 1886 and 1887.  
To Name and Close Thursday, May 1st, 1884.

The Executive Committee announce, in addition to the six stakes for three-year-olds, and the Wilson Stakes for four-year-olds, the present value of which is \$9,100, already closed, the following fixed events, to name and close THURSDAY, MAY 1st, 1884, to be trotted for during the EIGHTH ANNUAL MEETING, and held at the grounds of the New York Driving Club, Morrisania, N. Y., Sept. 8th, 10th, 11th, 1881.  
**THE UNION STAKES**, for four-year-olds, foals of 1883, by stallions whose get have never beaten 2:30 at four years old or under.

**THE PACIFIC STAKES**, for four-year-olds, foals of 1883.  
**THE INITIATION, THE CONFIRMATION, THE HOPEWELL, THE STANDARD AND THE SEQUEL STAKES**, for 2:30, 2:25 and 2:30 stallions, and for 2:40 and 2:30 fillies, respectively, will close Aug. 1st, 1884, the conditions of which will be daily announced.  
In addition to the foregoing the following are the stakes and fixed events for 1885 and 1886, to name and close THURSDAY, MAY 1st, 1884.

**1886.**  
The National Trotting Sires Stakes, for foals of 1883 by stallions only for whom the sum of \$50 each is subscribed. Closed for sires May 1st, 1883, with the following subscriptions, amounting to \$400, which is added to the stakes: b h Dean Sage, b h Electioneer b h Benton, b h Bona Fide, b h Mambrino Dudley, b h Brocaneer, all of whose get (foals of 1883) are eligible only to May 1st, 1884, at \$100 each, payable in the following forfeits: \$10 to accompany nomination May 1st, 1884, \$5 additional May 1st, 1885; \$25 additional May 1st, 1886, and the remaining \$50 twenty days before the meeting of 1886, when the stakes will be trotted for.  
**THE ANNUAL NURSERY STAKES**, for foals of 1883; \$150 entrance, payable in the following forfeits: \$10 to accompany nomination May 1st, 1884; \$25 additional Jan. 1st, 1885; \$10 additional Jan. 1st, 1886, and the remainder (\$75) twenty days before the MEETING of 1886, when the stakes will be trotted for.  
**THE JUVENILE STAKES**, for foals of 1883, by stallions whose get have never beaten 2:30 at three years old or under.  
**THE EVERETT HOUSE STAKES**, for foals of 1883, by stallions whose get have never beaten 2:45 at three years old or under; \$100 entrance in each stake payable in the following forfeits: \$5 to accompany nomination May 1st, 1884; \$20 additional Jan. 1st, 1885; \$25 additional Jan. 1st, 1886, and the remainder (\$75) twenty days before the MEETING of 1886, when the stakes will be trotted for.

**1887.**  
**THE NATIONAL TROTTING SIRES STAKES**, for foals of 1884, only by sires subscribed for whose get have never beaten 2:30; subscription for sires \$50 each, to accompany nomination of sires May 1st, 1884 (when the subscription for sires close), and for their get \$100 each payable in the following forfeits: \$10 to accompany nomination Jan. 1st, 1885; \$15 additional Jan. 1st, 1886; \$25 additional Jan. 1st, 1887, and the remainder (\$50) twenty days before the MEETING of 1887, when the stakes will be trotted for.  
**THE MATEON STAKES**, for foals of 1884, only the produce of mares subscribed for at \$25 each, which must accompany nomination of May 1st, 1884, and is added to the stakes; and for their produce (foals of 1884) \$10 each, payable in the following forfeits: \$5 to accompany nomination Jan. 1st, 1885; \$25 additional Jan. 1st, 1886; \$35 additional Jan. 1st, 1887, and the remainder (\$75) twenty days before the meeting of 1887, when the stakes will be trotted for.

**Conditions.**  
In all Stakes and Trials of speed the rules of this Association shall control. All nominations shall be in writing, in the name of the owner, addressed to J. W. Gray, Treasurer, P. O. Box 316, New York City, enclosed in a sealed envelope and plainly marked "Nominations," with a bank draft, postal order, or certified check for the amount of first payment; which envelope must bear the post mark of not later than the day upon which the stakes close. A nomination in the telegraph received by the Treasurer before the hour of closing, and confirmed by a properly written entry, as above prescribed, posted not later than the following day, shall be deemed valid. The number of nominations by one owner is unlimited, but only one can start in a race. Nominations shall state name, color, marks, age and sex, whether horse, gelding or mare, and the names of the sire and dam, if known, and her sire, if known. Nominations shall follow the ownership of the horse, provided notice of change of ownership shall be forthwith filed with the Secretary. All entries shall close at midnight of the day named at the office of the Treasurer, unless otherwise provided. Only horses owned or bred by members, or the get of stallions owned or stood by members, shall be eligible to entry. Money paid on entry in any of the stakes opened by this Association wherein ALL nominations fail to make final payments, shall be regarded as forfeit to the treasury of the Association. All races to be in harness, mile heats best three in five, except for three years old and under, which are to be mile heats unless otherwise provided in the first announcement of the stake. If three or more horses start in a stake race, two-thirds of the stake shall be awarded to the winner, two-fifths to the second horse and one-fifth to the third horse, except other wise provided in the published conditions of the race. If not more than two horses start, only first and second money shall be awarded, and in case of walks over only the first money shall be awarded, and it shall be optional with the Executive Committee whether the horse shall or shall not appear. A horse distorting the field shall only be entitled to so much of the money as the start-ers in the race could have won. In all races best two in three, the distance shall be eighty yards; and in all races best three in five, the distance shall be one hundred yards; except in heats, which may be one hundred and fifty yards. In all stakes for three-year-olds, ten or more nominations, and in stakes for four-year-olds and over five nominations required to fill, and in a stakes for four-year-olds and over five nominations required to fill.

H. W. T. MALL, President.  
L. D. PACKER, Secretary.

### ASHLAND PARK TROTTLING STUD

NEAR LEXINGTON, KY.  
B. J. TREACY, PROPRIETOR.  
THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased for the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Bakora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2-17yl B. J. TREACY, Lexington, Ky.

**New York**

## THE NEW ZEALAND

# Stud and Pedigree Stock Co.

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD and PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Australasian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, DUKE OF NEWCASTLE, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Australasian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Australasian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Australasian Colonies.

## Fastest Time on Record.

Martini-Henry, by Mnsket—Sylvia, was bred by this Company and sold when a colt to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:39, thus lowering the previous record of 2:41½; and also the Melbourne Cup, two miles, carrying 103 pounds to victory in 3:30½, and beating a field of twenty-nine, thus lowering the previous best record of 3:30¾, by Darrivell (5 years), carrying 102 pounds, in 1879.

Musket—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

# DIETZ'S PATENT

# CHECK HOOK.

Simple in its Structure and Practical in its Use.

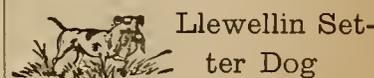

The horse never loosens the check-rein when this Check-Hook is used. Horsemen can appreciate the value of a Check-Hook of this kind. There being no springs or hinges to break connected with it, makes it serviceable and easily applied, as the check-rein passes through a solid ring attached to the front of the hook.

**THE TROTTING STALLION  
SILVERHEEL**

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

Silverheel is a dark bay, foaled July 5th 1876; bred by R. B. Chisholm of Kane County, Illinois. Sired by Wilson's Blue Bull, his dam Maggie Rice by Gage's Logan, granddam Fanny Stratford, a mare which had every mark of high breeding, and was the dam of John A. Rice that showed a 2:40 gait when two years old.

Logan by Rysdyk's Hambletonian; his dam Lady Wallace by Ohio Eclipse.

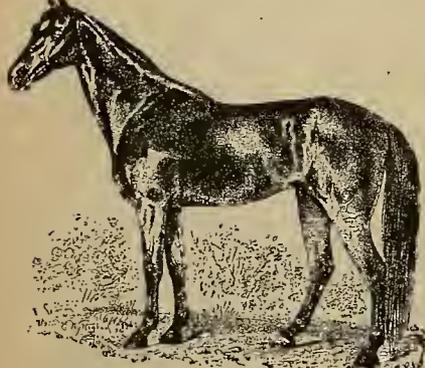

With little training when four years old, Silverheel showed three heats five of 2:40.

**TERMS.**

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

**SACKRIDER & CHISHOLM.**

**Hambletonian Trotting Stallion**

**BOB MASON**

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Fetter by Magnolia (by American Star). Belle Mason by Belmont (Williamson's). First dam, Lucy Johnson, by the Pony (son of imported Leviathan). Second dam Catalpa, by Frank. Third dam, by John Richards.

Will make the season of 1884 for a limited number of mares, at the OAKLAND TROTting PARK.

**Description.**

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record. For a fine portrait and full description of the horse see BREEDER AND SPORTSMAN of June 30th, 1883.

For full history of his sire Echo, see BREEDER AND SPORTSMAN July 20th, 1882. See also, for his full brother Exile, BREEDER AND SPORTSMAN issue of September 16th, 1882.

**TERMS.**

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

**CHARLES J. ELLIS, Owner.  
WM. DONATHAN, Agent.**

**Fast Trotting Stallion**

**HA HA.**

Standard (See Wallace's Register.)

Ha Ha: Color Brown, 15 1/2 hands. Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:25, without a skip.

**Breeding.**

Gilt-Enger, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:19 1/2.

N. B. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

**FRED ARNOLD,  
Stockton, Cal.**

**Trotting Stallions**

**Prompter, 2305, and Privateer**

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

**Prompter** is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28 1/2), and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30 1/2, by Flaxtall, granddam by son of Tally Ho Morgan, great granddam by Irwin's Tuckahoe, great great granddam by Lefler's Consul.

**Privateer** is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:05 1/2.

For extended pedigree and further description of the above horses send for circular.

**M. W. HICKS,  
Sacramento, Cal.**

**THE ELECTIONEER STALLION  
STANFORD**

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

**TERMS.**

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

**Pedigree and Description.**

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 15 1/2 hands, and weighs 1,050 pounds; was sired by Electioneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electioneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25 1/2), he by McCracken's Dave Hill, he by Red Lion, and he by Vernon Black Hawk.

Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, granddam thoroughbred. Dam of Dave Hill by Vermont Hambletonian.

Dam of Red Lion by Vermont Hambletonian.

**J. J. FAIRBANKS,  
Agent.**

Oakland, January 18, 1884.

**The Trotting Stallions**

**DIRECTOR AND MONROE CHIEF**

Will make the season of 1884 at

**Oakland Trotting Park,**

Commencing February 1st and ending June 1st.

**TERMS.**

Director \$30, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

**Director, 2:17.**

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallus, 2:15 1/2); first dam Dolly (dam of Thorndale, 2:22 1/2; Onward, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxo Wiemar.

Thorndale, 2:23 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

**Monroe Chief, 2:18 1-4.**

Two-mile record, 4:16.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. For a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 18, 1883.

For further information address

**JOHN A. GOLDSMITH,  
OAKLAND TROTting PARK,**

**The Trotting Stallion**

**BRIGADIER.**

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM, dam Lady Turner, by Frank Pierce, Jr. Hippo Medium, by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whipstock. He has fifteen representatives in the 2:30 list.

Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson.

Frank Pierce, Jr., by Frank Pierce, son of Beppo.

Brigadier will make the season of 1884 from February 10th to July 1st.

**TERMS.**

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes.

Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

February 2d, 1884. **J. B. McDONALD.**

2:20 1-4.

**The Fast-Trotting Stallion**

**ANTEEO.**

Dark bay colt, near hind foot white; foaled May 5th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER.

First dam, Columbine, by A. W. Richmond.

Second dam, Columbia, by imp. Bonnie Scotland.

Third dam, Young Fashion, by imp. Monarch.

Fourth dam, Fashion, by imp. Trustee.

Fifth dam, Bounets' Blue, by Sir Charles.

Sixth dam, Reality, by Sir Archy.

Seventh dam, by imp. Medley.

Eighth dam, by imp. Centinel.

Ninth dam, by Mark Anthony.

Tenth dam, by imp. Janus.

Eleventh dam, by imp. Monkey.

Twelfth dam, by imp. Silvereye.

Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

**TERMS.**

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents.

Anteo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20 1/2, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

**M. ROLLINS, Agent,  
Santa Rosa.**

**MAMBRINO WILKES.**

**BLACK STALLION, SIXTEEN HANDS IN HEIGHT, BY GEORGE WILKES,** son of Rysdyk's Hambletonian, bred by B. J. Tracey of Fayette County, Kentucky. Dam Lady Christina by Todhunter's Mambrino, son of Mambrino Chief. Second dam by Pilot, Jr., Todhunter's Mambrino son of Mambrino Chief, his dam Ripton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,200 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 9 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the coming season, commencing February 1st, 1884, at the Draw Stable, STOCKTON, and L. M. Morse's near LODI.

**TERMS.**

\$40 for the season, or \$25 single service.

This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

**A. L. HINDS, Agent.**

**The Trotting Stallion**

**STEINWAY,**

With two-year-old record, third heat, of 2:31 1/2, and three-year-old record, fourth heat, of 2:25 1/2.

**TERMS.**

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

**Cook Stock Farm, Danville, Contra Costa County,**

At \$100 for the season, payable invariably before the animal is removed. Mares not proving with foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Nohlett, Fashion Stable, Oakland, or of J. J. Penn, Fort Martinez, D. S. Snullay's Stable, Hayward, will be forwarded immediately to the farm.

**Description.**

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing mane and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

**Pedigree.**

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Ney, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginia, a son of Sir Archy. Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Farm" November 18th, 1882.

Strathmore is the sire of Santa Clara, 2:17; and Tucker, 2:19 1/2; Chestnut Hill, 2:24; Alice Stoner, 2:24; Steinway, three-year-old, 2:25 1/2; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:28 1/2; Henderson, 2:28; Strathlan, three-year-old, 2:29 1/2; and Stuart, three-year-old, 2:28. Stuart is full brother to Belmor, who trotted a mile in 2:52 at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall; was timed the second heat in 2:32 1/2; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:23 1/2, and he in turn got Governor Sprague, record 2:20 1/2; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

**Performances.**

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbena, Admiration, Mystery, in 2:39, 2:32, 2:31 1/2. Memento won the first heat. As three-year-old, at Sharpshooter, 57, August 8th, 1879, over a miserable half-mile track, he beat Bushwaeker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:38, 2:37, 2:37, 2:35. Bushwaeker winning second heat. At Lexington, August 18th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25 1/2, 2:30 1/2, 2:30 1/2, Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky stakes for three-year-olds he was beaten in three heats by Jewett, in 2:23 1/2, 2:23 1/2, 2:25 1/2; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27 1/2, 2:23 1/2, 2:27 1/2.

**Address**

**GEORGE WILEY,**

Cook Farm, Danville, Contra Costa Co., Cal.

**THE TROTTING STALLIONS**

**SINGLETON AND LA HARPE.**

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15th, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal.

Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

**PEDIGREE.**

Singleton is by Willie Schepher, by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepher's dam Nellie by son of Vermont Black Hawk, grand dam by Bistris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:44) by Phasid, son of Star by Blacknose. 1st dam by Bonneres, 2nd dam by Galletin (1854). La Harpe's dam Prairie Bird by Flaxtall (dam of Flight, 2:23, and Prompter, 2:23); 2nd dam Fashion, by John the Baptist, 3rd dam Fanny Perry by Irwin's Tuckahoe, 4th dam by Lefler's Consul. Irwin's Tuckahoe by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florist, by Diomed.

**TERMS.**

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire, at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

LINES OF TRAVEL.

WINTER ARRANGEMENT.

COMMENCING SUNDAY, - - - NOV. 11, 1883,

AND UNTIL FURTHER NOTICE, Passenger Trains will leave from, and arrive at, San Francisco Passenger Depot (Townsend Street, between Third and Fourth Streets) as follows:

Table with columns: LEAVE S. F., DESTINATION, ARRIVE S. F. Lists routes to Santa Clara, San Jose, and other destinations.

\*Sundays excepted. †Sundays only (Sportmen's train).

Stage connections are made with the 10:40 A. M. Train, except Pescadero Stages via San Mateo, and Redwood, which connect with 8:30 A. M. Train.

Excursion tickets sold Saturday and Sunday good to return on Monday to Santa Clara and San Jose, \$2.50; to Gilroy, \$1; to Monterey or Santa Cruz, \$5, and to principal points between San Francisco and San Jose.

Ticket Offices.—Passenger Depot, Townsend street, Valencia-street station, and No. 113 Market street, Grand Hotel.

A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. & Tkt. Agt.

For points on Southern Divisions and the East, see C. P. R. R. Time Schedule.

Sportsmen & Pleasure-Seekers.

SOUTHERN PACIFIC R. R. CO.

RESPECTFULLY CALLS ATTENTION TO THE SUPERIOR FACILITIES

AFFORDED BY ITS LINE FOR REACHING SEA BATHING, SHOOTING AND FISHING.

TRAINS LEAVE SAN FRANCISCO DAILY FOR MONTEREY,

THE MOST CHARMING Summer and Winter Resort of the Pacific Coast.

with its beautiful Groves and delightful Drives. Trout in abundance can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

THE BAY OF MONTEREY

Is noted for the extent and variety of fish which abound in its waters; notably Salmon, Rock Cod, Bar-scud, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

THE BATHING FACILITIES

AT THE "HOTEL DEL MONTE," ARE UNSURPASSED,

having a MAONIFICENT BEACH of pure white sand for surf bathing.

THE BATH-HOUSE

contains SPACIOUS SWIMMING TANKS

(150x50 feet) for warm salt water plunge and swimming baths, with ELEGANT ROOMS

connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,

APTOS, SOQUEL AND SANTA CRUZ,

IS VIA THE Southern Pacific Railroad,

(Broad Gauge).

The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety. Notably

Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.

Lake PIJARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily from Afton for those well-known Retreats. PUBLISHERS, SIMA, SAN GREGORIO and PECADEITO. We would particularly call attention to the unlimited extent of range at and about SAN BIRUANO and McMAHON'S GIBLE PRACTICE.

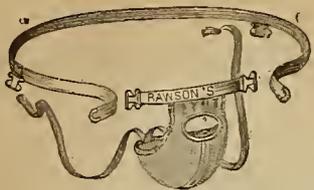

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.

SPECIAL NOTICE. Sportsmen and others presenting Passage Tickets will be entitled to FREE TRANSPORTATION OF THEIR DOGS

when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.

Be in order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN. Guns and Fishing Tackle will be carried free of charge. Guns taken out must be securely packed in wood or leather cases taken in Passenger Cars. TICKET OFFICES.—Passenger Depot, Townsend street, Valencia Station, and No. 618 Market street, Grand Hotel. A. C. BASSETT, Superintendent. H. R. JUDAH, Asst. Pass. & Tkt. Agt.

## ATHLETICS.

### Death of W. P. Phillips.

Lovers of athletics will be extremely sorry to hear of the death of this deservedly popular runner and oarsman. Mr. Phillips died very suddenly, of quinsy, on April 3d. He was 6 feet 2½ inches high, and weighed 170 pounds. His record of 11 4-5 seconds for 120 yards has never been beaten, while his 220 yards in 22 2-5 is the best on record.

From an interesting article in the London *Sporting Life* we select the following paragraphs:

The deceased gentleman was born at Hendon, in the year 1858, and was educated at Eton, where he developed a taste for athletic sports, and he was never happier than when attending or participating in an athletic meeting or regatta. He stood 6 feet 2½ inches high, and scaled in condition about 12 stone 2 pounds. He entered Eton College in 1871, and rowed 6 in the Eton 8 in 1876, and in the following year was second captain of the boats. At the collegesports he won the 100-yards, quarter, 120-yard hurdles, and high jump, besides running third for the mile. He was also a good foot-ball player, and was in the ranks of the Oppedians against the Collegers at the wall game, November 30th, 1876. Phillips left Eton, Easter, 1877, and joined the London Athletic Club, making his debut at the first meeting held at Stamford Bridge, where he won the open 120-yard handicap, with four and a half yards start in 12 1-5 seconds. Subsequently he turned his attention to rowing, and stroked the Kingston eight and four at Henley Regatta that summer. In the Grand Challenge Kingston was beaten by London by a quarter of a length; but they managed to win the Wyfold, and on the following day also took the fours at Maidenhead and Marlow Regatta.

In May, 1878, Phillips won the L. A. C. 220-Yards Challenge Cup in remarkable time. At Henley, Phillips again stroked the Kingston boat in the Grand Challenge and Stewards' Cups, but was beaten in both events. In the following September, at the L. A. C. meeting, Phillips won the 220-Yards Challenge Cup for the second time, and ran second to H. Crossley for the 110-yards Challenge Cup. At the next meeting of the crack metropolitan club Phillips won the 220-Yards Challenge Cup for the third time, in 22 4-5s., from Sturt, and it consequently became his own property. In February following he left England and visited Portugal, residing at Oporto. Whilst there he rowed for Oporto against Lisbon in a four-oared race on the Tagus, the distance being two miles. The King of Portugal took great interest in the proceedings, and the Oporto crew visited His Majesty on his yacht. In the race Phillips rowed No. 3 in the boat, but they were defeated by half a length, the stroke in the Oporto boat nearly giving up after the first mile.

Phillips returned to England in March, 1880, and on May 1st he won the L. A. C. 150-yard open handicap from scratch, by three yards, in 15 1-5s. On the 22d of this month he accomplished a marvelous performance. It was the Civil Service Athletic Meeting at Lillie Bridge, and the lacrosse gathering at Stamford Bridge on the same afternoon. At the former gathering Phillips started from scratch in the 150-yard handicap, and won his heat in 15 1-5s. He then went to the L. A. C. Grounds, and contended in the trial heat for the 120-yard handicap, which, starting from scratch, he won in 12s. Returning to the Civil Service gathering, he won the final heat of the 150-yard handicap in 15s.; and, again visiting the lacrosse meeting, he won the final heat of the 120-yard handicap. Thus, on the same afternoon, he ran 120 yards twice in 12s., and 150 yards in 15s., all of them at the time being best-on-record. At the first championship held under the management of the Amateur Athletic Association in 1880, Phillips won the 100-yard race in 10 1-5s. After this Phillips visited Spain, and remained at Zerez until the following Easter Monday. At the L. A. C. meeting, on May 28th, 1881, he won the quarter-mile Challenge Cup easily in 50 4-5s.

When Myers made his visit to his country, Phillips was looked upon as being the most likely of our athletes to lower the colors of the American pedestrian. They met at the L. A. C. meeting at Stamford Bridge, on June 25th, in the quarter-mile level race, which Myers won by eight or nine yards, in 49 4-5s. On July 16th Phillips ran at the championship meeting at Birmingham, and in the quarter-mile contended against Myers. In the final heat of the 100 yards he defeated Cowie by a foot. In the quarter-mile Phillips tried forcing the pace, but Myers went to the front at the turn into the straight, and won easily, looking round, by five yards, in the extraordinary time of 48 3-5s. Although defeated, Phillips was far from disgraced, as he must have run that quarter-mile in a second better time than any other English athlete had ever

done. On July 1st, 1882, at Stoke, Phillips won the 100-yard championship for the third time in succession, beating Cowie and Malone, and finished second to Ball for the quarter. In the following year, July 1st, 1883, at the Championship Sports, at Lillie Bridge, Phillips did not start for the 100, but won the quarter in fine style in 50 4-5s., defeating Cowie and Lock.

On several occasions Phillips beat record time, and five of his performances have never been eclipsed by any athlete residing in the United Kingdom, viz., 120 yards in 11 4-5s., Stamford Bridge, March 25th, 1882; 150 yards in 15s., Lillie Bridge, May 22d, 1880; 220 yards in 22 2-5s., Stamford Bridge, September 28th, 1878; 300 yards in 32 1-5s., Stamford Bridge, May 20th, 1882; 440 yards in 49 1-5s., Aston Grounds, July 16th, 1881.

Phillips was the eldest son of Mr. W. P. T. Phillips, of The Grange, Woodbridge, Suffolk, and was a J. P. for the county. He was also a lieutenant in the 3d Battalion of the Suffolk Regiment, gazetted March 18th, 1882. During the recent Egyptian campaign, under the command of Sir Garnet Wolsey, Phillips visited Egypt, and, at the athletic sports held at Alexandria, he competed in nearly every event, conceding long starts to all the athletes there located, and for his fine performances was lustily cheered by the Bluejackets and officers of the Garrison.

### Boeton's Great Athletic Grounds.

The grounds of the Boston, Mass., Union Athletic Club, to be laid out in that city, will cover 134,000 square feet. The grand stand will be located on the northwest corner of Irvington street, near Huntington avenue, and will cover 7,023 square feet. On each side of the grand stand there will be uncovered seats, each side seating 1,500 people. This will make the seating capacity as follows: Grand stand, 1,589; seats, 3,000; boxes, 60; total, 4,649. The athletic and bicycling track will be twenty feet wide and five laps to the mile, measured twelve inches, according to the English standard, from the pole. It will be constructed in the best possible manner, the aim being to make it one of the fastest and finest tracks in the country. The foundation will be of broken stone. Over this will be layers of hinding gravel, and over all fine cinders. The grounds will be inclosed by a fence twelve feet high, and everything will be in readiness by the 26th instant.—*Turf, Field and Farm.*

### Harmon and Kittleman.

These two celebrated sprinters come together again to-morrow for the third time. This time the race is 75 yards and repeat—mutual consent start—for \$1,000 a side, and promises to be the most closely contested event ever seen in this sport, and we predict there will at no time in the race be a foot of daylight between the men. Both men are splendid starters in this way, and the man that gets six inches the best of either of them on the start will have to lay it to some accident. Speculation is rife on the result, particularly on account of this being Harmon's favorite distance, and claimed by his backers to be the fastest in the world, while Kittleman's staunch supporters claim that while it is somewhat short, even at this distance, he is second to none. We look for a splendid race, and a large attendance.

### Ae to Ray Locke.

EDITOR BREEDER AND SPORTSMAN: Dear Sir—In your issue of last week appears an article under the heading "Ray Locke." In justice to him I will state: As one of the signers of the petition to the N. A. of A. for the reinstatement of Mr. Locke, that his acts as a professional foot-racer were fully presented to that Association. As regards his conduct in the last mile race given by the Olympic Club, he apologized to me, as an officer of the club, for his act, assuring me that it should never occur again, so far as he was concerned.

Very truly yours,

WM. C. BROWN.

A wrestling match to decide a wager took place last Sunday in a resort on Broadway, the contestants being William Schwartz and Hubert Bosworth. The match was Greco-Roman, best two falls in three, and was witnessed by only a few intimate friends of the participants, and the reporters. Schwartz, while the smaller of the contestants, was in the best fix, and displayed the most science throughout, acting principally on the offensive. Bosworth finding himself over-matched made a few attempts at the outset to throw his adversary before his strength entirely failed, but the wary Schwartz was ever on the alert, and won the two falls necessary to give him the match very handily, the first in five minutes, and the second in three minutes.

An Italian pedestrian has performed the remarkable feat of walking or running from Caserta to Naples in an hour and fourteen minutes. The railroad cars do the distance in an hour, though this need not say much for them. Of course, the pedestrian intends soon to start for America.

Ross attributes his recent defeat in the race he ran against McIntyre to lack of condition, and says he may try McIntyre again in the near future. He is anxious to again meet Geary, but over a longer distance than in his recent race with this light-footed runner which was for two hundred yards.

F. Rogers, of Trenton, defeated Wheatly in a 100-yards race at Philadelphia, March 31st, in the alleged time of 9½ seconds. Wheatly did not try much till near the end. He claims to be a Canadian, but it is generally believed that he is an Englishman.

Darley's Easter Handicap was to have taken place at Sheffield, England, on April 14th and 15th. Hutchens was scratchman. George Smith 4½ start and M. K. Kittleman 6 yards start were entered for this event, but, of course, did not start.

The wrestling match between Dunn and Herbert Slade, Cumberland style, drew only a very moderate audience last Sunday. Dunn gained the battle without much exertion, winning every fall. Slade was clearly over-matched.

In a match, Cumberland style, hack hold, five falls out of nine, last Sunday, Harry Dun defeated Herbert Slade in five straight falls. The match was witnessed by about two hundred spectators.

The American athletes have engaged passage on the steamship *Aurania*, which leaves New York June 4th.

The American Lacrosse team will sail for England from New York, on May 3d, by the steamer *Anstral*.

The Petaluma Turn Verein have engaged a San Francisco teacher to train them up in athletic feats.

An Oakland Lawn Tennis Club has recently been formed. Three courts are now being prepared.

Measures are to be taken to-morrow to organize a baseball league for the season of 1884.

## AQUATIC.

The South-End Club contemplates challenging the Ariel shell crew to a three-mile race for the BREEDER AND SPORTSMAN Cup, won the first time by the last-named club in 1882. The matter will be soon brought up in the club, and should the South-Euds send such a challenge the heavy large crew will be given the shell and trained up for the race. The Ariels have done but little rowing of late, and the crew would require some time to prepare, should it be challenged.

Henry Petersen is announced to row at the opening of the New Oak Point Course, New York, against Hosmer, Lee, Ross and Plaistead. When Petersen was out here he would not consent to row against more than one man at a time, and it seems a little singular that he should go into such a race when he might get a match with each of the competitors named if he were so inclined. If he shows them his best speed it is doubtful if they will give him a trial singly.

A novelty in the way of sailing craft is a catamaran which has just made its appearance on Mission Bay. The craft has two 25-foot hulls, each having a centerboard and is rigged with jib and mainsail. In ordinary weather the craft appears remarkably speedy, making considerably better time than a yacht of her length. The novel craft is owned by J. E. Gobel.

Fred Smith, of the Ariel Club, has signified his willingness to meet Wm. Growney, of the same club, in a race in shells, for from \$100 to \$250 a side, the race to be over a three-mile course. As Growney was the first one to broach the subject of a race with Smith, it is now evident he will either have to row or explain.

The *Chispa*, during a wind storm last Tuesday morning, parted her mooring line while in Mission Bay, and drifted foul of a schooner. The greatest damage done was to one of the yacht's masts which was considerably marred in the collision.

The sloop *Annie* had out a party of gentlemen last Sunday for the first sail of the season. The yacht is always in fine trim, but her neat appearance last Sunday was exceptionally noticeable.

The sloop *Fawn* has made her appearance in white, which makes her look a great deal prettier than the green she has been on last season.

Owing to the rain-storms last week, the work of fitting out the yachts was greatly interfered with.

TURF AND TRACK.

Ages of Noted Thoroughbred Stallions.

For the general information of our readers, who often send us queries regarding the ages and eras of various noted thoroughbred stallions, imported as well as native, we have compiled a table below showing the dates of foaling and of deaths of those stallions to which the best stock of America traces its origin, trotting as well as running. It is interesting to notice to what families the greatest longevity belongs, as indicating good, strong constitution, which, as well as speed, is a very important element in the make-up of a race-horse or trotter. The oldest horse of whose death we have any authentic record in America was Young Langford, by imp. Langford, dam Caroline, by American Eclipse, who died at the age of 35 years, and American Eclipse, his grandsire, lived to 33 years, and sired colts the last year of his life. Diomed, Glencoe, Janns, Messenger, all lived to a mellow old age, and their descendants have inherited their lease on life with almost as much uniformity as they have their racing and trotting qualities. Of the sons of Glencoe, Wild Irishman died at 26 years of age; Rifleman at 28; Star Davis, 27; France, 23; Crichton, 21. Imp. Trustee died at 27; his son, Revenue, at 25; and Planet, son of Revenue, at 20. Sir Archy died at 23, and Sir Charles, his son, at 17. Lexington died at 23; sired War Dance, who died at 22, and Uncle Vic, who passed away at the same age. Hunter's Lexington, who lived to 23, and Daniel Boone, Grey Eagle and Wagner were about the same good old age of 28 when they died, and Joe Stoner, son of Wagner, inherited his sire's longevity to carry him to 20 years. To the Sovereign family belongs John Morgan, whose dam was Sally Lewis, by imp. Glencoe, the dam also of Hunter's Lexington. Brown Dick was a son of imp. Margrave, and out of Fanny King, by Glencoe. Hiawatha was a son of Albion, out of a Wagner mare. Lodi was a son of Yorkshire, son of Topaz, by Glencoe, who died foaling Rivoli at the age of 20. The longevity of the Glencoe family is especially striking, and applies equally to the daughters of that grand old horse. Columbia, by Glencoe, died in 1833, aged 28; Magnolia, dam of Daniel Boone and Kentucky, died in 1864, at the age of 23; and there are various other instances of the long life of the Glencoe mares in the stud-book.

In glancing over the years which follow in the table, the most striking one in the list, and one which is, perhaps, the most memorable in American turf history, is the year 1780. This was the first year of the classic Derby, and the year imp. Messenger, the father of the trotting family, saw the light. The first winner of the blue ribbon of the English turf, Diomed, came to America, and, like Messenger in trotting annals, is the fountain head of thoroughbred aristocracy, to which the most brilliant performers of the present day trace their origin:

Table with columns: Imported horses, Foaled, Died, Age. Lists names like Albion, Anstralian, Bonnie Scotland, etc., with their respective dates and ages.

Native horses, Foaled, Died, Age.

Table with columns: Native horses, Foaled, Died, Age. Lists names like American Eclipse, Bertrand, Billy Cheatham, etc., with their respective dates and ages.

An Oregon Debutante.

Captain Julius Sorenson's beautiful chestnut filly, Susie S., is entered in the great three-year-old stake at Sacramento, at the next California State Fair. She is being handled by John Pendar, of Vancouver, who feels very well satisfied that she is no ordinary nag. She has wintered well and grown finely, and her feet are in better condition than they have ever been since she was first broken to harness. Her action is low and mechanical, while her great size and fine muscular development betoken an ability to improve with age. She unites the blood of Rysdyk's Hambletonian through a son of Menelaus, sire of Cleora (2:18), with that of old Bellfounder, the greatest stallion America ever saw, when we considered his limited opportunities. Heretofore I have inclined to the belief that, owing to great climatic advantages, California can surpass Oregon in the production of young trotters, say three and four years old, yet our own State can furnish equally good horses when they acquire full age and perfect their form; but Susie S. may yet prove an exception to the general rule and carry the beaver colors to the front. Certainly, she is the finest young mare yet produced in Oregon.—Oregonian.

The Kentucky Derby.

"In the spring a young man's fancy lightly turns to thoughts of love." In the spring, also, half the population of Kentucky, and a liberal sprinkling from other states, turn their thoughts to the pros and cons of the Louisville Derby. To keep up with the procession, it will not be out of place to give a few facts and pointers anent the classic event. At this writing it looks as if there might be at least a dozen starters, a majority coming from the lot which showed in public in their two-year-old form. The most prominent of these are Bob Miles, Buchanan, Richard L., Eva S., Powhattan, Kosciusko, Conkling, and Loftin. In the matter of public performance there is not much difference between the five first named, albeit Bob Miles' victories at Baltimore in the fall might possibly entitle him to the post of honor. He started much oftener than any of the others, and scored the greatest number of victories—eight out of twenty-seven starts. His record is not such as to deserve special mention, being something on the in-and-out order. In the summer, particularly at Long Branch, he was beaten in all sorts of company, not often securing even a place. He did better at the close of the season, his Baltimore triumphs being quite creditable, considering the company he vanquished. All in all, though, his record is just fair to middling, barely sufficient to make him first favorite in the Derby. He beat some of those he is to meet in that event, and some of them beat him, making it something of a stand-off. All of them, however, had to take a back seat, and generally away back at that, when they tackled General Harding.

In addition to the fact that Buchanan and Richard L. were fair average performers last season, they will have an advantage over other Derby starters, that of being in training, light or otherwise, during the winter or spring. The former is trained at Mobile, and the latter here. As the season in Kentucky and Tennessee is a month or so behind for training purposes, it can very readily be imagined that animals prepared in this latitude will have a decided advantage over their rivals in the colder climate. A case in point was furnished by the Derby of 1882. Apollo was trained here, and when he reached Louisville he was simply in the pink of condition. It was thought the great Runnymede would have a virtual walk-over, so much was he the superior of the other animals engaged, but the seasoned and matured sons of Lever captured the prize, while the superior animal, lacking the necessary work, had to be content with second place. The relative merits of the two animals was well-illustrated the next time they met, for Runnymede beat the Derby victor half a furlong. Thoughtful speculators would do well to bear all this in mind, especially as both Buchanan and Richard L. are doing finely. The latter has grown and thickened since last season, and is moving like clock work, while Buchanan, as I learn from Mobile, has materially improved on his last year's form. If anybody can bring him to the post fit for a Derby run, Bill Bird is the man. Richard L. never did anything wonderful, reaching the winning post five times in twenty-one starts. He beat some of those he will meet in the Derby, and this, with his southern preparation and improved form, ought to render him pretty formidable if he comes to the post all right. Buchanan has yet to score his maiden victory. He started only in five races, but he was placed every time, being second in four of the events, while quite a lot of average performers were behind him.

Considering the number of starts, Eva S. has the best record of any of those named. She faced the flag nine times, scoring five victories. Still, not one of them was what might be called notable. She was either pressed very close to the finish, or her company could not be called formidable. As it is, however, she will find staunch support, and it will not be so very surprising if 1884 should signalize a filly victory in the Kentucky Derby.

The stable companions Powhattan and Loftin ran east and west last season, the former going to the post twelve times and the latter sixteen. In the only race won by Powhattan, which was the Barrett Stakes, at Latonia, Bob Miles was one of the contestants, and did not get a place. Buchanan was also one of the starters, and came in third. Miles, however, carried 10 pounds more than each of the others. Powhattan ran into a place in several of his races, but there was nothing above mediocre in any of his achievements outside his single victory. Louisville advices report him as quite an improved animal from last year, and the same is said of Loftin. The latter has two wins to his credit, and at one time last season, the early part of it, he was considered decidedly superior to his stable companion. Both are likely to start in the Derby, and local pride, if nothing else, will give them a boost in the betting, although they are likely to be backed on assumed intrinsic merit.

In the matter of public performance Conkling and Kosciusko do not rank with those named. The former started thirteen times, with three victories to his credit, but neither of them of the notable kind. Kosciusko won twice in four starts, the company being poor in quality and very limited in numbers.

There are a few other possible or probable Derby starters that performed last season, but they can hardly be classed in the formidable list. Among them are Admiral, Royal Arch, and Bob Cook. Admiral is a very speedy little fellow, but he will be lost after going a mile. The capabilities of Bob Cook and Royal Arch are not up to a Derby standard, and life is too short to seriously discuss them.

Decidedly the most promising ones in the dark division, which may furnish five or six starters, are Exploit and Ensign. The former is by Enquirer—Fanny Malone, and is owned by Wooding and Pryner, Cincinnati. Private advices from Louisville represent him as a powerful looking colt, and his performance is said to be quite up to appearance. A thorough judge of horseflesh writes me that if Exploit can have sufficient preparation, he stands a rosy chance of capturing the big event. Ensign is by Buckdon—Bannerette, and is the property of Cottrill & Brown. There are some who allege he is a better colt than Buchanan, and if such is the case, why, it leaves the Derby problem very much muddled.

From the above resume—and I saw nearly all the races referred to—it can readily be inferred that extraordinary uncertainty attaches to the coming Derby. It is almost equivalent to the toss of a penny as to which of half a dozen or so should get there first. Of course, condition and preparation will have something to do with the result, but, granting all the starters to be fit and well, the classic event may emphatically be set down as "anybody's race."—Broad Church, in N. Y. Spirit.

It may be a loss of considerable time, but it does not pay to work horses in the rain. Slow, drizzling rains are worse on them than hard rains. When it cannot be avoided their shoulders should be well protected.

Mares that have colts before the grass has made its appearance in the spring should be fed bran washes frequently. This will increase the flow of milk and benefit both mare and colt.

The 2:30 List of 1883.

The following list carefully revised by the Breeders' Gazette of Chicago, is believed substantially correct:

Table listing various horses and their owners, including names like Alexander, Alycove, Adelaide, Almont Gift, Almont M., Almont N., Almonarch, Alleghany Boy, Arab, Allan Roy, Anglin, Adair, Astoria, Seely's American Star, Addie E. C., Bonnie L., Backman Maid, Belle Shackett, Billy R., Blanche II., Blue Jay, Beal's Whirlwind, Belle F., Burns, Banker, Barney B., Bay Frank, Bonnie, Bonnie Wilkes, Baby Mine, Baybrino, Bayonne Prince, Bay William, Big Lize, Billy Ford, Billy Sheridan, Black Diamond, Black Jug, Blanche, Blanchard, Breeze Medinn, Buffalo Bill, Cunard, Center, Carrie C., Centurion, Cobden, Coriander, Conpon, Cyclops, Dixie Sprague, Dutch Girl, Doctor Frank, Dunesne, Defender, Dnrange, Day Dream, Rysdyk's Hambletonian, Elvira, Erebus, Earl, Elmwood Chief, Emerald, Ensign, Iola, Exception, Freestone, Fanny Dodge, Felix, Flora Jefferson, Fides, Fugue, Fulton Maid, Flash, Frank Moscow, Flight, Faree, Faustina, Flora B., Frank Patchen, Fred Neil, Flora Belle, Golden Girl, Glenwood, Gilbert Sprague, Glamie, Glon Miller, General Hancock, General Lee, Geo. D. Sherman, Golden Bow, Grey Dan, Happy, Harry Mills, Harry Pelham, Rysdyk's Hambletonian, Harry Pulling, H. B. Winship, Henderson.

Preparing Yearlings for Sale.

In a few days the great annual sales of yearlings will be upon us, that of the Belle Meade Stud breaking the ice during the closing week of April, and the Fairview following it closely in Tennessee, to be followed after only a short interval by the Woodburn, Elmendorf, and Rynnymede in Kentucky early in May, while the sale of Mr. Belmont's Nursery lot will follow late in the same month. To those who take a keen interest in breeding, separate from its relation to the sport to which it owes its growth, nothing can be more agreeable than the meetings held within the shadow of old Bonnie Scotland's paddock, round the time-honored ring at Woodburn, or under the shade of the Nursery apple trees when the *jeunesse doree* of the turf are led forth for competition. Everything reveals such a bright view, is surrounded by such promise, and seems to predict such grand results; and we are only too willing to drink in the inspiration of the moment of enthusiasm when some crack yearling comes out to be knocked down at a fancy price, the buyer is indulging in ecstasy over future Belmonts and Dixies, and to feel that the scene is but the prelude to a great career under silk. That there is a kindred feeling all around the ring no one who has taken part in such scenes can doubt; hospitality is abundant, friends are met on every hand. Their talk is all of the likeness this colt and that filly in the lot bear to some distinguished sire or dam around, whose names cluster a world of pleasant racing reminiscences, and, having eaten and drunk to our satisfaction, we feel on the best terms with ourselves, our host and the world generally.

Yet these pleasant occasions are not without their drawbacks. It is quite the correct thing for the foolish, as well as the wise, to make a tour of the boxes for an inspection of the lots to be offered, and how seldom can such a tour be made without raising doubts in the minds of the tourists, whether those offered are in a bodily condition favorable to the tasks which will be imposed upon them. Nothing can be more attractive than the satin-coated, well-groomed juvenile standing in the cheerful shadow of his clean-littered box, as his stud groom shows him to a throng of devotees at the door. Maybe it was but a short time previous that we saw him in his natural state, cantering in his muddy paddock, with patches of his winter coat still visible. His mane was all of a tangle, and he looked rough, but he looked healthy withal. There was some fire in his eye, exuberance in his spirits, and he seemed to feel the inspiration of the warm spring sun. But how changed he now is. His mane scrupulously clean, and arranged as neat as a dnd's bangs, tell of the water-brush and comb; his feet are as bright as patent leather shoes, and it raises doubts whether he has had a good square gallop in the paddock for a month past. His coat is as sleek as a piece of satin, the result of the oil cake internally, and external applications of the brush and rubber. Is it any wonder, then, that he is voted a "thing of beauty," and his condition, taken in connection with a fashionable pedigree, is calculated to make him sell. Probably the end justifies the means; but while this preparation may make colts sell better, it is certainly not the method by which to develop racing power. If it were short-horn cattle, we could see less objection to the process of undue stuffing with food; but to animals like race-horses, destined for the intense activity of training and racing, instead of the serene repose of a cattle-show, its effects are not without danger.

As a rule, these yearlings are taken up within a couple of months after the sale, and bitted, mounted, and given some work, and eventually a trial spin or two in the autumn. Indeed, in these progressive days, it is not uncommon to hear of yearlings having had their trials early in August, for as a majority of the great two and three-year-old stakes close on the 15th of that month, owners are desirous of knowing the "form" of their lot with a view to suitably engaging them. Now, any one at all conversant with training methods knows that nothing would be more fatal to a horse, young or old, than to put him into active work if he is gross in condition. Accordingly, many of these yearlings, hog fat on the day of sale, are unfit for the task set them, and it too often happens that a sharp spin does them up so completely that they never realize the anticipations formed of them. The long hosing and artificial feeding has had a tendency to make them tender, and it is not to be wondered at that so many get "buckskins," break down, train off, or go amiss so early.

Yet the breeders are not in the least to blame. If you talk to them about it, while they will not admit all you charge, they will answer that were they to take their yearlings up rough from the paddocks and send them into the ring no one would look at them. Bnyers seem to demand that colts shall be "made up" for sale just as a belle is made up for a ball.

Probably they would deny this by word, but they generally affirm it by action, for let a colt be brought into the ring rough and natural, and instead of exciting competition he will actually call out remarks about "bad keeping," etc. Hence, breeders are compelled to consult the taste of their customers, and are thus compelled to bow to a custom and fashion which demands that yearlings, the primary mission in life of which is high condition and strong exercise, should come from the sale ring into the hands of their trainers as fat as prize cattle.

The same state of affairs has long prevailed in England, if we are reliably informed, and furnishes one of the reasons why the private studs have been so successful in producing race-horses over the great public studs, many of which have collapsed after a few seasons from want of patronage, owing to the want of stamina and constitution on the part of their colts. With the exception of Galopin, we do not think any of the Derby winners for the past few years were bred at any one of the large public studs of England, and the same would be found to be the case if the investigation were carried further back. The success of the late Sir Joseph Hawley was attained through his home-bred colts, and the same was the case with Mr. Merry, and has since with Lord Falmouth, whose success has been truly phenomenal. Probably Mr. Chaplin is now the most successful of the English breeders who breed for public sale, but he breeds upon very different principles. Formerly he maintained a great racing stable, and has unlimited experience to draw upon. His stud is limited in numbers, and the yearlings are developed with an eye to usefulness on the turf.

There can be no doubt that yearlings are better fitted for their future career as race-horses by being allowed the amplest range and liberty for galloping. It opens and gives strength to the lungs, regulates the respiratory action, gives tone to the heart, and strengthens the muscles and tendons. No one understood this better than Mr. Welch, while he was in charge at Erdeuheim. It was the common impression that the Leamingtons were delicate and had bad legs and feet; but by allowing them the freedom of spacious paddocks, Mr. Welch overcame this, and no strain of horses ruled the turf more despotically than did the Leamingtons. Harold retired sound in his legs; Rosalie raced until six, Inquois is sound at six, and Parole at eleven is still on the turf, the wonder of the age, and as sound as on the day he was foaled. Probably no European turfman was more successful than the late

Comte de Lagrange, who made it his boast that his yearlings were taken up and put at work in July, after galloping in forty-acre paddocks. Mr. Day, in his work, "The Race-horse in Training," relates that Sir Tattou Sykes pursued a similar policy, and while he (Mr. Day) trained many of them, he never knew one to suffer from "sore shins," that *bele noir* of two-year-olds. Very happily, the practice of "making up" yearlings has never reached the proportions here that it has in England, but with the increased number of public studs and the greater competition each year, the practice is becoming more general. The resort to confinement, the oil-cake, and other flesh-making, coating-glossing condiments may for a day facilitate sales, but the reaction must be felt by the breeder if disappointments disenchant buyers, for it is the belief in well-informed circles, that it is such feeding that produces "big head," and other kindred maladies. Such condiments can only result in impairing digestion, and confinement in affecting the wearing qualities; and, while it is possible, a resort to natural treatment might at first entail pecuniary loss, it would be more than balanced in future sales.—*N. Y. Spirit.*

The Fashion of Doubting Pedigrees.

The following very sensible remark from a correspondent of *Bell's Life* ought to be read with interest at the present time, when, as in the case in England, there seems to be an epidemic of doubt regarding the pedigree of certain animals: "Let me in conclusion touch another point in 'Woldsmen's' last letter—his attack on the legitimacy of Silvio and Galopin. I would say at the outset that this system of reasoning seems to be an exceedingly dangerous one. Any hypothesis may be made to hold water by denying the facts which conflict with it. This was the system of reasoning adopted by the late Dr. Shorthouse, a man undoubtedly of very great acuteness, but also of strong prejudices. He had a firm conviction that no good horse could spring from the Blacklock blood. If facts conflicted with these beliefs, so much the worse for the facts. On this principle he necessarily explained away the existence of such obtrusive phenomena as Queen of Trumps, Ratan, Cossack, Spectulum, and (when he bade fair to be a good horse) Ryshworth. Likeness may be a usual accompaniment of kinship, but it is not an invariable one. If we are to doubt the pedigree of every horse who is unlike his sire we had better burn our stud-books at once. Where was the likeness between Melbourne and Bink Bony, Lord Clifden and Hampton, Ratanplan and Blukhookie? Has 'Woldsmen' never seen two puppies of one litter wholly unlike?"

But I would in both these cases go much further, and say that there was nothing in the appearance of either Silvio or Galopin to make their recorded pedigrees improbable. "Woldsmen" thinks that Silvio was got by Macaroni. It is candid of him to take this view, for if so the horse comes from "Woldsmen's" side of the account to mine. But "Woldsmen" seems to forget that Macaroni was a grandson, and Blair Athol a great-grandson of Gladiator. Not only that, but Silvio's dam Silverhair was by a son of Veniaon, and Venison and Gladiator were both by Partisan. Now, surely in such a case one would expect Silvio to show the Partisan peculiarities of appearance (as he did) whether Macaroni or Blair Athol begot him. Before leaving this question I would mention two instances which came under my own observation, and which, to my mind, strongly confirm Silvio's legitimacy. Two years ago I saw a two-year-old at Newmarket called Birdcatcher, by Blair Athol out of Coimbra. I believe he never ran. Coimbra, be it remembered, was almost identical in blood with Silverhair, being got by Kingston from a Birdcatcher mare. Now, this colt was built just on the line of Silvio, except that he did not stand over as much ground. His trainer remarked to me that he was the image of Kingston. I never saw Kingston, but, judging from pictures and descriptions, I have no doubt it was so. Now, here there could be no possibility be a case of Blair Athol versus Macaroni and Coimbra, since the latter horse had left Cobham before the colt was begotten. Again, some of your readers may remember a filly belonging to Mr. Stirling Crawford, called Malay, by Blair Athol out of Polynesia, by Kingston. She, like Silvio and Birdcatcher, entirely "favored" the Kingston family in appearance.

Then as to the case of Galopin. Size and substance are not at all inseparable attributes of the descendants of Blacklock. I will mention a few instances taken from the somewhat limited period covered by my own memory. Speculum, Flotsam, Underhand, The Spy, Kaiser, Vanban, Rosebery, and Gardeviture were all light-framed animals. So I should suppose from descriptions were Hetman Platoff, Cossack, Physician, The Cure, and Fandango was no big one. The very multiplicity of the parentage assigned to Galopin seems to me an argument against the truth of the various rumors. I have been gravely told that he was by Promised Land. Now I believe Promised Land was living north of the Tweed or thereabouts at the time when he is supposed to have disturbed the domestic happiness of Vedette. Then Galopin was affiliated on Lacydes. Now, it seems to me that no improbability of appearance (even if it existed, which I deny) would be so great as the improbability of Lacydes getting one of the best horses of the century. Now we come to the theory broached last week, as far as I know, for the first time, which would father Galopin on Delight. I, as an advocate of inbreeding, might certainly claim this as a triumph. For Delight's sire Ellington, and Galopin's dam Flying Duchess, were, I need hardly remind your readers, both got by the Flying Dutchman. I have also a profound respect for the Dutchman's blood, and a firm conviction that Delight was a really good horse, and that if he had stood up Lord Lyon would have won no Derby. But with all my good opinion of him, and my belief in inbreeding, I shall be rather staggered at finding such brilliant results brought about by the union of aunt and nephew. And if we are to argue from the probabilities of personal appearance, the Delight theory seems a very unlikely one. For the male descendants of the Dutchman have almost always long middle pieces, and slack loins, and assuredly those are not the failings of Galopin and his sons. Of course, if "Yorkshire" has any written or oral testimony on the point, that is another matter. But in the absence of such evidence I shall hold to my belief that Galopin is the son of Vedette and the representative of Blacklock.

In a private letter to a friend in New Orleans Col. Lewis Clark, President of the Louisville Jockey Club, said that the first race on the first day of the May meeting would be a charge of three-quarters of a mile, for all ages, to carry 100 pounds or thereabouts, and that it would be run over the straight course. Should such be the case, with a good day and track, the record of 1:13, made by Force over the same course last year, will be apt to be reduced. Col. Clark said that the course was in fine condition, that he had accommodations for 600 horses, and that forty-four or fifty races will be run during the meeting for a total of \$25,000 added money and purses.

## Foals.

At Rancho del Paso. Property of J. B. Haggin.  
March 23th, bay filly, star in face, by Algona, dam Young Dimple, by Charles Dickens, (brother to Purdy), grandam by McCrackens' Black Hawk, great grandam by Rifleman.

April 3d, dark bay filly, a little white on left hind foot, by Echo, dam Woodbine by Woodburn, grandam Victress by Belmont. (Woodbine is sister to Monarch.)

April 5th, bay colt, by Exile, dam Carmen by Charles Dickens, brother to Purdy, g.d. Fashion Filly by Correct, he by Belmont out of Mary Blanco by Boston, g.g.d. Fashion by Langford.

April 7th, chestnut colt, by Algona, dam Half Moon by General Dana, g.d. Fashion Filly by Correct, g.g.d. Fashion by Langford.

April 7th, bay filly, by Echo, dam Shasta by Gladiator, he by Belmont.

April 9th, chestnut colt, star in forehead, by Algona, dam Mande by Whipple's Hambletonian, g.d. Young Vernon by Easton's David Hill, g.g.d. Lady Vernon.

April 9th, chestnut colt, star in forehead, both hind legs white half way to hocks, by Algona, dam Dew Drop by Mambrino Hambletonian.

April 9th, gray filly, by Exile, dam Riley mare by Hercules.

April 11th, chestnut filly, by Algona, dam Breeze by Geo. M. Patchen, Jr.

April 14th, bay colt, star and stripe in face, off fore and both hind feet white by Echo, dam Susie Allen by Ethan Allen, Jr., g.d. Santa Clara by Owen Dale.

April 15th, bay filly, by Exile, dam Kinney mare by Whippleton, g.d., Little Blossom by Billy Blossom.

April 15th, bay filly, star in forehead and near hind ankle white, by Exile, dam brown Kinney mare Blackie by Commodore, son of Mambrino Patchen, g.d. Little Blossom by Billy Blossom.

## Thoroughbreds.

At Ranch del Paso. Property of J. B. Haggin.

March 30th, chestnut colt, hind feet and legs half way to hocks white, strip in face, by Wheatley, dam Annie Lawrie by Hubbard, grandam Mayflower by imp. Eclipse.

March 31st, chestnut filly, white face, and left hind ankle white, by Double Cross (X X), dam Eliza by Norfolk, grandam May Wade by Woodburn. This filly is of many crosses on both sides.

April 2d, chestnut filly, strip in face, left hind foot white, by Jim Brown, dam Nanny Hubbard by Hubbard, grandam Demitree.

April 13th, chestnut filly, star in forehead, near fore and both hind feet white, by Longfield, dam John Boggs' mare by Norfolk.

At the Cienega Ranch, Los Angeles county. Property of Capt. A. J. Hutchinson.

March 19th, Sunday, by Monday, her dam Pele by Belmont, from Liz. Givens by imp. Langford, dropped a chestnut colt by Rutherford. Colt has been named Holiday.

## Governmental Recognition of the Turf.

We are pleased to learn that there is some prospect of Congress appropriating a certain sum annually for racing prizes, on principles similar to those governing the bestowal of the Queen's Plates in England. It is but natural that we should welcome such a movement, but, apart from purely selfish considerations, apart from our connection with racing as an institution, we deem the purpose, on its merits alone, as worthy of favorable action. The subject has frequently been broached in the public prints at various intervals, but it has never taken shape, but we think we can safely say, without fear of contradiction, that of the many measures which have passed the different houses of our national legislature, and become laws, the passage of this would not have been the most unpopular.

Whatever progress racing may have made as a great popular diversion it owes nothing to the Government. On the contrary, it has been in spite rather than by reason of the Federal, State, or municipal governments, for while the Federal branch has remained passive, the State Legislatures, through the coalitions of Puritans and politicians, have thrown every obstacle in its path; the Puritan hates racing for the reason that because he has no taste for it he thinks no one else should; the politician, not because he dislikes racing, but because he hopes by throwing obstacles in its way he can exact tribute from its promoters. It is a fact worthy of note that in no other country has racing met with anything but encouragement. There is scarcely a government in Europe but encourages racing by offering valuable prizes for competition. Not only that, but the continental governments maintain large studs at a great cost for the purpose of breeding and improving the breed of racers.

England set the example in the work of encouraging contests of speed, as she has in almost all the great reforms of civilization. But her continental sisters have been apt scholars, and have carried the work much further. The fact is, the European States were not slow in perceiving the immense advantages accruing from contests of speed. Racing tends to the highest development of the best qualities of the horse for all purposes, except, perhaps, heavy draft. The man who cannot perceive the superiority of the thoroughbred is either blind to the lessons of experience, or a pur-blind fanatic. Persons who imagine the thoroughbred a racing machine, pure and simple, are guilty of egregious error. The cases of Mand S., Smuggler, Jay-Eye-See, and many others, all tend to the conviction that the blood of the thoroughbred is potent in the production of the highest type of the trotting horse. The thoroughbred improves every breed with which he is mated. He gives constitution, symmetry, intelligence, courage, fine action, and endurance. For cavalry purposes the thoroughbred is invaluable. Copenhagen, the horse upon which the Duke of Wellington rode through his most arduous campaigns, was a thoroughbred, and nearly all the most brilliant exploits of the English arms have been through the medium of their mounted force, notably the charge of the Light Brigade at Balaklava. Whether in harness, under saddle, or to the plough, the thoroughbred can out-work half a dozen cold bloods. Oysterman, the steeple-chaser, could trot in 3:00; the horse Fleetwood for four years did eight bours daily work before a milk wagon; Bay Rum worked during the winter, drawing a cart during the construction of the elevated railways in this city, and won steeple-chases the following summer; Weathercock, one of the best two-year-olds of 1873, has for years been speeding the plough in Brooklyn.—N. Y. Spirit.

Articles of incorporation have been filed by the Gosper Horse and Cattle Company, organized under the laws of Arizona, by J. J. Gosper, Silas W. Cook and J. L. Beveridge. The capital stock of the company is \$100,000, and its principal place of business Prescott.

## Training the Race-horse.

The training of the race-horse is a profession that requires as much skill and practical experience as other professions, and even requires considerable intelligence, more so than some suppose. Of course, I can understand that almost every strapper or jockey of a few years' experience considers himself a trainer. Some experienced trainers advocate full feeding, sharp work and free use of the sweat blanket, while others give the preference to a certain fixed allowance of food, slow but long exercise, and scarcely use the blanket at all. Surely, there ought to be some middle course. These methods have been in existence almost as long as the existence of the race-horse. Many a fast and true horse has been sold at a low figure, that proved more valuable when he entered into another trainer's hands than before, but I hold that there is a middle course, and, having had some experience in the training of the race-horse, will here fully explain the *modus operandi* I advocate, and shall give the reasons for doing so.

By all means feed by a fixed allowance, but of course subject to certain exceptions, and at regular hours, for the stomach of the horse is very small in proportion to the man, and the overloading would not only be injurious to his digestive powers, but retard the very object the excessive feed was given for—to make muscle (tissue). To make muscular tissue the functions of digestion must be perfect, and regular feeding aids that requirement.

As for exercise. Experience has shown me that while sharp work quickly brings your horse into form, hardens him, "clears his pipes" (as it is termed), it tends to injure the most vital portions of his body—his legs and feet. There can be no argument against sharp work in bringing the horse into fine racing form, except while doing this you may have an elegantly-trained animal without legs to stand on; therefore I suggest, in place of such a trying ordeal on the horse's legs, fast walking exercise at the commencement of training, a distance of ten to fifteen miles twice a day, with a light blanket over the neck, shoulders, and extending only as far as the back of the saddle, a sort of a half blanket.

The object of this blanketing is to assist in opening the pores and get free perspiration, but from those parts that a reduction of fatty matter is necessary; the loin and hind parts being the machinery of locomotion, and the strength in that portion of the body, should be encouraged by friction; the free and strong use of the brush (called elbow grease) will soon harden the soft muscles. The horse, after his walks, should be well scraped off and treated in the same manner as if at a canter. It must be remembered that the opening of the pores, the free perspiration (sweat), has a tendency to weaken the parts, reduce the softer tissues, which is beneficial to the neck and trunk, for the lighter the throttle is, and the thinner the muscle over these parts, the better for the respiration of the animal, and a heavy-loaded, muscular neck would be a weight to the horse in a race. Then opening the pores around the thoracic regions thins the muscle and gives elasticity to the parts, aids the action of the lungs during its expansion in a race; but in the hind muscles all this is unnecessary, and the using of a blanket over these parts is but a relic of antiquity, and it has done more to weaken a horse and lessen his speed than is imagined. I am aware it is hard to get my granny to give up her frill cap, but in order to get at perfect training these abuses of the past must be stopped, and let us stride along with the times.

After three or four weeks of such walking exercises you may commence to canter five to six miles a day, then increase the distance, not the speed, except just at the finish. Continue this up to about two weeks of the time you propose to race. Then gradually increase the work a little faster and a lesser distance up to within a week of the race. Then set your horse at the distance you propose to race him, with certain modifications, as every rule is subject to many exceptions.

The cordial hall is prepared nonsense, not that it is not beneficial in certain cases, but the free use of it to almost every horse is ridiculous. The purgative ball (the curse of the race stable) has hurt seventy-five per cent. of animals, and in such a manner that the very owner of the horse thinks that he has benefited him by the dose. A horse gets constitutionally weaker after a purgative, and the race-horse requires great strength and vitality, and every other means should fail before the purgative ball be given, and, when given, the horse goes back fully two weeks as to strength before he can regain the loss of tissue. An owner gives a horse a purgative ball because he don't eat well, another because he is a very hearty feeder, and to clear him out; another when he comes in to train and when he goes out; another "because my horse ain't doing very well"; another because "my horse is feeding and doing splendidly, and I want to keep him so." All these remarks I have heard expressed.

The best medicine for the race-horse (I do not mean a sick horse) is good feed, in proper quantities and at regular hours, plenty of elbow-grease, long and slow work, limited use of the blanket.

The proper attention of the trainer to these requirements (not leaving it to another man to see it done) is all that I think essential, but experience must be had before he can train at all, rule or no rule. And these few lines are not to make trainers, but to assist trainers with any information I possess, if it be of any value to them.—Sportsman.

## From Gay to Grave.

The old Metairie race-grounds in the Crescent City, famous as the scene of so many noted races of past years, is now a cemetery. There it was that Brown Dick ran the first heat of three miles ever run below 5:30. There, too, Allendorff was the first horse to run a mile below 1:45, which was the lowest record for thirteen years. And last, but not least, there it was that Lexington crossed the "dead line" of 7:20 at four miles. Such a seeming incongruity deserves an explanation, and the following is from a letter of a resident correspondent to an Ohio journal: "Metairie was formerly the fashionable race-course of New Orleans, owned by a club composed of a number of prominent citizens. The president of the Louisiana Lottery Company desired to join the club, but the respectable gentlemen connected with it did not care to be mixed up with any 4-11-44 business, and promptly black-balled him. He made effort after effort to get in, but was black-balled every time. At last he grew indignant, and said to them: 'It's not much of a race-track, anyhow. I will buy it and make a cemetery of it.' He kept his word. Before long the sporting club was in difficulties, and the lottery man got possession of most of its stock. As soon as he was able to control it he tore down the grand stand, laid the whole place out in burial lots, and the old race-track is now the fashionable cemetery at New Orleans."

Walter Welch has purchased the interest of his partner in the trotting stallion Income, for \$4,000 cost, and is now sole owner. Income was sired by Inventor, a son of Jay Gould and Lucy.

## Names Claimed.

By E. Newland, Oakland.

DERBY, for bay colt foaled May 22d, 1882, by Newland's Hambletonian, first dam Phacola, by Silverthreads; second dam Minnehaha, by Bald Chief. Newland's Hambletonian by Speculation, dam Mamie by Joseph.

## New Orleans Notes.

The following interesting brieflets are from the correspondence of the New York Sportsman:

Princess has won more races than any horse or mare during the winter meeting, starting 20 times and finishing 11 times first. In her last race she showed signs of soreness. It would be queer if she did not.

Marsh Redon came back slightly lame after his last race, and his ankle are, at present, highly colored with iodine. The track has been bad enough to make a sound horse sore, and there are many who cannot half extend themselves—notably John Sullivan. Woolly Douglas goes tied up, and he has been let up, and will be physicked.

The story circulated that Felicia was broken down is the merest humbug, for there is not a word of truth in it.

Captain Cottrill was at the races to-day one week ago. He came over to see about shipping a thoroughbred mare to parties in Mexico. He expressed himself well pleased with the manner in which Bird was handling his horses. Buchanan, who was troubled with a swelling under the knee last year, had been blistered, and was doing well. "They may heat this colt for the Derby," said the Captain, "but if he is beaten it will be by one of the dark division, and not by any of those high up in public estimation." He believes his chance for the Oaks with Matinee is just as good as for the Derby. She has grown and spread since last fall, and with good health she will stay the mile and a half when Bird puts the finishing touches on her.

The book-makers here have taken the preliminary steps to organize a Western Association, similar to that in the east. It meets with favor among the pencilers.

The two-year-old Sam Walton pulled up lame after doing a fast quarter last week.

While out grazing last week Eliza gave Peter L. a severe kick on the hip. Mark my word, when Peter starts it will take a smart one to head him, and the stable is as sweet on him as a lover on his Duleina in the spring. Some doubt his ability to stay. I would like him best in a short spin.

"Stammering" Stoval is under a written contract to ride Wallensee for the Louisville Cup, and Buchanan for the Kentucky Derby.

Lengfellow, the colored trainer who was warned off recently, has been reinstated, and touts as persistently as in the days gone by.

Old man Brannon and his eldest son William, shot a Nashville negro named Bittick, three times at the race-course last Monday. The wounded fellow, who is said to be a had-tempered, impudent chap, is recovering. All the witnesses say the Brannons were justifiable, and nobody sympathizes with the Tennessee coon. The Brannons being advised to "vamos" did so, and are now supposed to be sitting on the banks of the Cumberland river waiting for the Nashville races to commence. Richard Brannon was arrested as an accomplice, and locked up for three days. He is out on \$500 bail.

Torrid Zone, a deformed son of Bonnie Scotland and Arizona, broke his maidenhood this week. He was sold when a yearling for \$60 at the same time John Happy, Bilaxi, Glidelia, and Lake Blackinn were sold. Mr. Jennings recently bought him for \$200, with the privilege of returning him if he did not suit. Jennings will not return him.

Callao appeared in blinkers in his last race, and acted like a gentleman.

Green Morris discharged his foreman, Tip Williams, last week, because he failed to put the hurr on Voltaire in the race in which Lillie Dale beat him a head. It was the best race Voltaire has run this winter.

A delegation of turfites during the intermission next week between the winter and regular spring meeting, will visit Mobile to take a look at Captain Cottrill's horses. The captain has extended them a cordial invitation.

Joe Cooper limped back after the last race he ran in. Ben Stewart, a well-known colored steeple-chase jockey, who has ridden Katie Creel in all her jumping races, died here of small-pox this week.

Ed. Beardslee, who trains Manito and Athlone, was badly injured this week by a negro boy, who struck him over the eye with a brick. Gabe Caldwell and Beardslee also had a fight last Monday. All of the fights mentioned in this letter originated about the alleged bad riding of Athlone by Johnny Caldwell in the mile and a quarter won by Slocum.

Kisher, by Billet—Miss Knight, has been sent home. He was entered, but did not start on account of a large bundle of forfeits.

Edgar M. Johnson, the famous Cincinnati lawyer and President of the Queen City Jockey Club, was here last week and acted as one of the judges.

McDougal & Co., hook-makers, again took their stand in the hetting ring last Thursday.

The happiest man at the races yesterday was the owner of War Sign, who scored his maiden victory.

Pete Bratton, who rode Knight Templar in his three-year old form, has been engaged by the Hurstbourne stable.

The prettiest race of the whole winter meeting was between Boz Sedam and Bonnie Australian, one and one-sixteenth miles, in 1:49, the first named horse winning by a head.

Lillie B. in her last two races shows that she is no disgrace to the Hornit line of blood in her veins. She ran the fastest seven-eighths ever run over the track, and yesterday ran five-eighths in 1:02.

Morris' great crack, about which so much has been written yesterday came out and disgraced him as a race-horse. Melikoff is what they call him, and he was decidedly "off" yesterday. As soon as he appeared on the track he threw Cuckin, and it was with difficulty he was persuaded to go around the course. He again threw the jockey after cantering a mile. He was a hot favorite at 5 to 3 on him, but after showing his temper the public would not have him, and at 10 to 11 again him the hook-makers got but little money. He was very soft and not fit for a race. He is just what "Crescent" wrote about him some time ago—a poor race-horse.

"Crescent" makes the following selections for the stakes to be run at the spring meeting: The host of Lord's pair for both the Pickwick and Cottrill Stakes; Blue-eyed Belle o' Raul for the Hurstbourne Stakes, Manito for the Bush Stakes, and Wallensee for the Howard.

In the note made last week of the loss of stock at the Coo Farm there was a mistake as to Princess. It was Priceless, the dam of Princess, that died of lock-jaw. The error was our informant, who eye he inadvertently gave the wrong name. Princess is alive and well.

The Dwyer Brothers' stable, consisting of twenty-two, arrived at Jerome Park on Tuesday, at 11:30 A. M., all safe and well.

"Stately step and slow," swinging their tails in that proud, majestic manner so peculiar to the high-bred horse.

"A few days ago I was at Topeka, Kan., and had a talk with Harry Gilman. I find he is willing to trot McGregor against either Director or Phallas for \$5,000 to \$10,000 a side, and no monkey work either.

Leonatus, the favorite for the cup and several other Louisville fixtures, broke down at Louisville on the 1st inst.

Jay-Eye-See and Phallas are said to be under engagements to trot at Columbus, O., on July 3d and 4th, and that they will do the exhibition business all through the grand circuit if special premiums are offered.

Steve Maxwell is now in the road team of Col. A. L. Snowden, director of the Philadelphia Mint.

There are thirty-five horses, all told, in training on Mr. Rose's track at Sunny Slope, most of them belonging to the place.

Cy. Holloway arrived from Los Angeles by the steamer of last Wednesday. He says the rains were so incessant that nothing could be done at San Anita, and he concluded to take a few days' trip.

CRICKET.

Occident Cricket Club. Batting Averages.

PLAYED IN AT LEAST ONE-THIRD OF THE CLUB MATCHES.

Table with columns: NAME, Games, Innings, Most in an Innings, Times in Innings, Total runs scored, Average. Lists players like J. S. Purdy, H. O. Bristowe, J. Sanderson, etc.

PLAYED IN LESS THAN ONE-THIRD OF THE MATCHES.

Table with columns: NAME, Games, Innings, Most in an Innings, Times in Innings, Total runs scored, Average. Lists players like E. B. Deane, Mott, Levy, etc.

Professional Engagements.

The Delaware Club of Wilmington have chosen Samuel Morley as groundsman and coacher. The St. George Club of this city have retained Smithson as professional.

Answers to Correspondents.

Question answered only through these columns. No replies by mail or telegraph.

- C. E. G., Alma. 1. We never heard of the horse Walker. Write to W. W. Baker, North Pacific Rural Spirit, Portland, Oregon. 2. We should certainly keep a colt sheltered in stormy nights to prevent its getting chilled, but would be cautious about putting the mare in a stable or any confined place where the colt might get injured.

- J. F. L., San Jose. 1. American Girl beat Goldsmith Maid several times. At Poughkeepsie, N. Y., June 4th, 1863; Union, Long Island, July 4th, 1863; Prospect Park, N. Y., May 25d, 1869; Union, L. I., June 2d, 1869; Boston, June 11th, 1869; Same place, June 18th, 1869; Narragansett, Providence, R. I., June 26th, 1869; Fleetwood Park, July 9th, 1872. 2. 2:20 was first beaten October 15th, 1859, at Kalamazoo, Michigan, when Flora Temple trotted the third heat in 2:19 1/2. Silver D., Rogue River Valley. Scamperdown, by Norfolk; first dam Nettie W. by Williamson's Belmont; second dam Lady Davis by Red Bill; third dam Maria Collier by Collier; fourth dam by Gallatin.

BILLIARDS.

Ever since the California department of the Grand Army of the Republic decided to give a billiard exhibition for the benefit of the Veterans' Home, that particular branch of sports has been kept alive in the mind of the public in general.

The 1,500 points game between W. R. F. Lowry, and J. F. B. McCleery for a purse of \$100 was won by the latter, Lowry having but 1,357 points at the finish.

The game which took place last Saturday evening between W. R. F. Lowry, the ex-champion of the Pacific coast, and McCleery was an interesting one in the respect that it was a very close one, the latter gentleman only winning by 9 points in a game of 500 points up.

A billiard tournament is to be held during the week, commencing next Monday, at the Saylor Brothers' Parlors. One hundred dollars will be divided in three prizes; \$50 to the first; \$35 to the second and \$15 to the third.

BICYCLING.

Horses vs. Bicycles—A Spirited Contest.

This interesting and novel contest at the Pavilion has drawn quite a large attendance of spectators throughout the entire week, and the closeness of the respective scores at the time of our going to press warrants an enthusiastic audience this evening.

Table comparing Horses and Bicyclists. Columns: Horses (Monday, Tuesday, Wednesday, Thursday), Bicyclists (Prince, Armaindo), Miles (128, 172, 178, 182), Time (78, 90, 86, 87, 85).

On the first day nine hours were only ridden, owing to a late start, the three hours behind will be made up Friday and Saturday.

Recently, in Brooklyn, Mr. Alexander R. Black read a paper on "The Pains and Pleasures of Bicycling." The speaker said that sport was always regarded with great distrust in America.

D. J. Canary and Wood of Chicago, will shortly contest for championship in fancy or trick riding on a bicycle or part of a bicycle.

Prof. Wilmot defeated Jones in a five-mile bicycle race in 17 minutes 12 seconds, at Denver, Colorado, on April 2d.

The trotting season at Philadelphia will begin with a four-days' meeting at Snaffolk Park, on May 13th, 14th, 15th and 16th, to be followed by four days at Belmont Park on the 20th, 21st, 22d and 23d.

THE DRAMA.

The California.

Again, for another week, Kiralfy's Excelesior has drawn crowded houses, and sent all who witnessed its inspiring scenes home delighted and happy.

The Grand Opera House.

During the week, and for one week only, according to advertisement, Manbury and Overton's Hoop of Gold Combination have occupied this theatre, but for reasons not quite clear to us not with the success the piece or the acting deserved.

Oakland Theatre.

There has been a strong combination here during the week of the Grand Opera and the Oakland regular companies, with Rosedale, with new scenery and effects, as the attraction. It has been well performed, and being an interesting composition has drawn very well.

The Vienna Garden.

The present week witnessed an entire change in the performance by the engagement of the minstrel troupe under the management of H. C. Wyatt. Considering the miserable weather the houses have been very good, in fact, flattering to the proprietary and management.

At the Santa Anita ranch of E. J. Baldwin twenty thoroughbreds are in hand, and will be actively trained as soon as the condition of the track will allow.

There was one of the original Missonri races at Boise City one day last week between Cy. Mulkey's Monte Christo and Tom Mahan's Starlight, half-mile dash, the stake being both horses. Monte Christo was the winner, and Mulkey took Starlight home with him.

The Petaluma Horse Show was not so complete a success as the managers hoped to make it. The many postponements and the continuous rains interfered with the show, but they expect to make good all deficiencies another year.

An extended popularity. Brown's Broucbial Trochee have been before the public many years. For relieving coughs and throat troubles they are superior to all other articles. Sold only in boxes.

BILLIARD TOURNAMENT

AT THE Saylor Brothers, No. 210 Dupont Street, COMMENCING Monday, April 21st, BETWEEN

BEN. F. SAYLOR, J. F. B. McCLEERY, W. R. F. LOWRY and ADAM KLEISER.

There will be \$100 in prizes. First prize, \$50; second \$35; third, \$15. The games will be 300 points straight billiards, crotch barred. Game will commence at 8 P. M. sharp.

THE GUN.

The Game Law.

Table with columns for months (January to December) and rows for various game species (Quail, Partridge, Rail, Grouse, etc.).

Pigeon Match, at Bird's Point.

The Gun Club of San Francisco held their regular monthly shoot at Bird's Point, on Saturday, at which, in spite of the uncertain aspect of the weather, twenty-one members were present...

After the main match Messrs. Butler and Haile had a set-to at 12 birds each, 30 yards rise, which the former won. During the week, we understand Haile has challenged Butler to shoot for \$100 a side...

Match At Colma.

On Sunday, the Parker Club held their regular monthly meeting at Colma, which, being in the immediate neighborhood of the city, is said to be the best and most convenient place we have for such sport.

Another Match.

To-morrow, at the Oakland Race Track, there will be another match, the result of the one between Messrs. Slade and Pearson. This time there will be three contestants, Mr. Jonee making the third man.

The citizens of Napa fond of true sport have recently been enjoying an old-fashioned coon hunt. Uncle Aleck, a colored man of experience in that line, headed the expedition which was successful.

International Gun Trials.

Dr. Wm. Crenshaw, John Macfarlane and T. C. Abbott, the judges selected by the Turf, Field and Farm in the gun trials for prizes given by the proprietors of that paper, which was held at the grounds of the Carteret Gun Club...

TWELVE-BORE CLASS.

Table with columns: MAKER, Pattern, Penetration, Evenness, Breach action, Locks, Barrels, Workmanship, Poise, Total. Lists makers like Joseph Lang & Son, W. W. Greener, etc.

The other contestants included J. & W. Tolley, Birmingham, England; gun No. 5,813; weight, 7 3/4 pounds; 89 points. Charles Daly, New York City (Schoverling, Daly & Gales); gun No. 2,340; weight, 7 pounds 5 ounces; 88 points.

TEN-BORE CLASS.

Table with columns: MAKER, Pattern, Penetration, Evenness, Breach action, Locks, Barrels, Workmanship, Poise, Total. Lists makers like J. Rigby & Co., Parker Bros., etc.

The other contestants were H. Pieper (Schoverling, Daly & Gales), New York; gun No. 8,379; weight 9 pounds; 83 points. P. Wehley & Son, Birmingham; gun No. 12,189; weight 9 pounds 5 ounces; 83 points.

A Big California Lion.

The Modesto Journal of April 8th says: 'Ed. Jones, a sixteen-year-old son of Humphrey Jones, and I, James, succeeded in killing one of the largest California lions that was ever seen in California, Saturday. It will be remembered that young Jones has made himself quite a hero during the last ten days as a hunter.'

Two entirely white opossums, with dark eyes, were recently found at Hot Springs, Arkansas. We appreciate the genius of the newspaper sharp who got off the above idea. When we are treated to something new we like it thoroughly new.

The Forester Club of Sacramento, held their monthly meeting on Sunday at Agricultural Park. It was a shoot for a medal, in which the fourteen members present all shot on even terms, at twelve birds, at twenty-one yards' rise.

A Maryland gentleman informs the writer of this paragraph that it is impossible even for epicures to distinguish a red-headed duck from a canvasback duck when either is brought on the table with the head cut off, and that when he has been out shooting it is his custom to present any canvasbacks he may have killed to his friends, they appreciating the compliment...

Preparations for the Chico Tournament are about matured to the satisfaction of the managers. Twelve hundred pigeons have been secured up to date, and three hundred more are confidently expected. The Enterprise says: San Francisco will send eighteen or twenty shootists, Stockton a dozen, Petaluma ten, Sacramento perhaps fifteen, Colusa about ten, Orland and Red Bluff as many more, Oroville eight, Biggs and Gridley half a dozen each, and with the membership of the town club it is highly probable that there will be a hundred or more of the best pigeon poppers in the State.

George W. Ellery, of Sacramento, has distributed in various places near Sacramento the Arizona quail recently received by him, with a view to propagation. Some of the birds have been placed on the State preserves at Folsom. Mr. Ellery is a young and ardent sportsman, a member and officer of the Pacific Coast Field Trials Club, and a gentleman earnest in his endeavors to do good in his day and generation.

The Neophyte Club will have their first meeting since organizing to-day, at Bird's Point, Alameda, the shooting to commence at half past one, sharp.

The Marysville Gun Club had a clay pigeon shoot last Sunday, in which the pools were won by Messrs. George Griffiths, Wescott and Holder.

The eastern exchanges report a terrible destruction of grouse and quail by the heavy snow storms of last winter.

THE RIFLE.

At Shell Mound.

The event at Shell Mound on Sunday was the match between the Eintracht Schuetzen Rifles and the German Fusilier Guard, for an elegant silver goblet presented by Captain Stettin of the latter. As usual, the Eintrachts, who are a very able and splendid corps, came off victorious, beating their opponents 43 points.

Table with columns: EINTRACHT SCHUETZEN SECTION, FUSILIER GUARD, and Total. Lists names like Captain Kuhls, Ropke, Klare, etc.

On the same day and place, another phenomenal specimen of rifle shooting was given, this time by Lieutenant S. I. Kellogg, one of our leading marksmen who never makes a poor score. It was an attempt to beat the record of Geo. W. Thaxter, the famous marksman of Carson, Nevada.

Table with columns: 200 yards, 500 yards, and Aggregate. Lists S. I. Kellogg's scores.

To-morrow the sixth shoot of the teams of the Fifth Infantry for the military trophy will take place at Shell Mound. So far, the Field and Staff and Company A of Oakland have won twice, and Company C of Petaluma once.

At Shell Mound range last Sunday, Lieutenant H. J. Mangels, Company C, 2d Artillery, and Mr. F. Hagemann had a friendly match, 50 shots each, at 200 yards, Mangels giving Hagemann 15 points. The Lieutenant won by 8 points over all. With one or two exceptions, it will be seen, the fairs and fives prevail on both sides. Springfield rifles were used. The score:

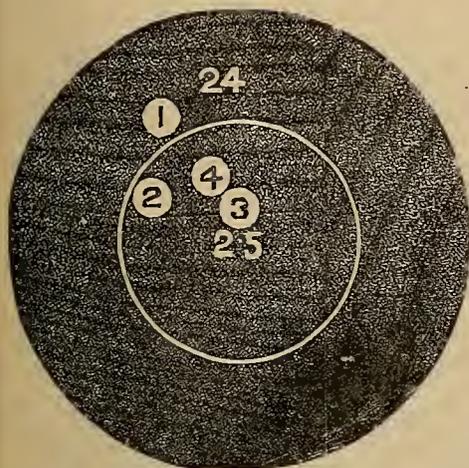

H. J. Mangels, 4 5 3 5 6 4 5 4 4 5—44	F. Hagemann, 5 3 4 3 4 4 4 3 4—37
5 4 4 4 4 4 5 4 4—42	0 4 4 4 4 4 4 5 4—37

Company C, of 2d Artillery, have a regular medal match every month, and a regular prize match every half year. Both happen together this time, and both will be shot off tomorrow, at Shell Mound. The distance will be at 200 and 500 yards, with United States Springfield rifles.

At Alameda.

The regular monthly prize and medal shooting of the California Schuetzen Club took place Sunday at Alameda, Schuetzen Park. The highest scores on record in the first, second and third classes were made. The following marksmen won: Obampion prize, H. C. Smith, 422 rings; first-class prize, F. Boeckman, 430 rings; second-class prize, J. Utshig, 409 rings; third-class prize, W. Lingeneiser, 414 rings, and fourth-class medal, M. Golly, 308 rings.

Jacoby's Performance.

Four shots, actual position and measurement copied from the target, shot by Philo Jacoby on Sunday, March 30th, at Alameda, Schuetzen Park, off hand, at 200-yards distance, score 99 out of a possible 100, measurement 2 1/2 inches. Shot in presence of Jas. Stanton, H. C. Smith, Chas. Sagehorn, Otto Burmeister, Finking and Mr. Rule, of the Bodie Rifle Club, and others of the San Francisco Schuetzen Verein and Turner Sharpshooters. This record comes in well with that of Kellogg and Thaxter, as showing the accuracy of rifle-shooting on this coast. We can still add another, that of Lieutenant Fred Kuhnle, who some time ago made 457 out of a possible 500, off-hand, at 200 yards alone. These records place California in a high position, giving her, as they do, three men whose shooting will bear comparison with the world. We may remark in conclusion that Jacoby still shoots with a rifle made for him in San Francisco twenty years ago by Chas. Shotterbeck, and which, during that long time, has never been touched inside the barrel in the shape of repairing.

Since writing the above we learn that Howard Carr, of Klein & Carr, Market street, also made 457 off-hand, 200 yards, at Shell Mound, last year. This adds another laurel to California's history.

The Rifle Association.

The regular annual meeting of the California Rifle Association was held last evening at 590 Mission street, H. W. Sime acting as secretary. Seventeen members were present. The following gentlemen were elected as the Board of Directors to serve for the ensuing year: Colonel Ranlett, Sergeant Nash, Lieutenant Sime, Captain Sprowl, Lieutenant Townsend, Lieutenant Kellogg, Captain Fairbanks, Colonel Tobin, Lieutenant O'Brien, Captain Collier and Colonel Dickinson. The Association then adjourned and the new Board convened. The following officers of the Association were elected: President, Colonel H. D. Ranlett; vice-president, Lieutenant H. W. Sime; secretary, Captain E. G. Sprowl. The election of treasurer was postponed until the next meeting. On motion of Lieutenant Kellogg the following committee was appointed to organize and further the interests of the California Rifle Team: Lieutenant Klein, Captain Sprowl, Colonel Tobin, Colonel Ranlett, Colonel Beaver, Brigadier-General Dimond and Major-General Coshly.

On motion of Lieutenant Sime the following gentlemen were elected honorary members of the Association for life: General John McComb, Major-General Charles Foreman and Colonel A. Andrews.

Since the above election the new directors have met and postponed the day of shooting from the 27th of April to May 11th. They have also added some new and interesting features to the programme, which will be published next week.

Good Scores at Carson.

A match with rifles was shot at Carson last Sunday week, between Geo. C. Thaxter, of that city, and C. H. Galusha, Captain of the Enmett Guard, of Virginia City. The conditions were 100 shots at the 200 and 500-yard range, 50 shots apiece at each range. The contestants both used the Hobbins Remington. The scores are unusually high, that of Mr. Thaxter's (457) heating all records ever made in the United States. The heat previous record was that of H. G. Parker, 453. The score stood as follows at the close: Thaxter at 200-yards target, 225; at 500 yards, 232; total, 457. Galusha at the 200-yards target, 219; at the 500 yards, 233; total, 452. Thaxter, Galusha, Saffell and Crawford then scored 370, making an average of .92.—Virginia Exchange. Thaxter and Kellogg would do to travel and shoot against the world. We presume, it is the record in this match that Kellogg beat on Sunday.

We stated some weeks ago that Mr. Herman Hopf, a prominent member of the Swiss Rifle Club, was going to settle down in Santa Rosa. We are glad to find this is not the case. He has recently associated himself with Mr. Crittenden, 1785 Market street, manufacturer of Stomach Bitters. Mr. Hopf is an enthusiastic rifleman, and we are glad the distinguished club he belongs to will still enjoy the benefit of his active membership.

Tom Gallagher, formerly Captain of the Sarsfield Guard of Gold Hill, and now a member of Colonel Ranlett's creek team of California, on Thursday of last week shot a friendly match with George C. Thaxter, of the Carson Guard, twenty shots at the two ranges. Thaxter scored 94 out of a possible 100, and Gallagher 89.

STABLE AND PADDOCK.

Care of Stallions and Brood-Mares.

In a series of articles upon the experience of breeders Dr. Elwood Harvey says:

"I think a stallion should be kept in good condition all the year and that there is no change needed in the stud season. He should be liberally fed, have all the water he wants when he wants it, should have a comfortable stall—that is, well lighted and ventilated, a gentle man for attendant, and plenty of exercise at such work as will be expected of his progeny. He should not be conditioned for racing during the stud season, but if of racing blood he should be fit to show some speed at any time. I do not believe in stimulating his system during the season by excessive feeding, warm dressing, and inaction, nor in allowing him to 'run down' when out of season for want of sufficient food and exercise. A horse should not be allowed to serve mares before he is mature. It certainly hinders the development of any male animal to copulate before maturity, and it seems to be true that the best foals are begotten when sires are well advanced in years.

"Stallions are commonly allowed to serve as many mares as are taken to them, to the number sometimes of more than a hundred in a season, and cover two to five in one day, and once the next, just as happens. I do not know that any bad results follow to the horse or his get. Such a custom is not much different from what happens in freedom. The great popularity of Hambletonian was that he took more mares to his embrace than any other horse of whose stud service we have a record. It is true that there were a number of good mares that produced great trotters to the cover of Hambletonian, but it is also true that many other good mares that were bred to him produced offspring of quite inferior quality, inferior to their dams in speed and spirit. I cannot doubt that the general quality of Hambletonian get would have been much higher if he had served fewer mares, and had been given a little fast work in competition with other horses every year between seasons.

"In my own limited experience I have observed that horses are more keen to serve after they have been warmed up by exercise, and particularly after a lively brush with another horse on the road. I should certainly prefer to have my mares covered when the horse was in that condition, and by a horse that was frequently put so by such means.

"I have no facts by which to satisfactorily answer the question as to the best time in the heat to put the mare to the horse. This I know, mares show their heat more in the latter part of it, and most on the last day. If a mare shows it only on one day of the heat, it is sure to be the last day. About one-third of the mares brought to my horses were in heat the day before, but not so then. The owner thinks it had just come on the day before, and expresses a confidence in her being bred to the horse that is based on her excessive heat all day yesterday, which was the first he had seen of it. I infer from this fact that the last day is the surest time, but I do not know. I neither have any facts to base an opinion on in regard to which sex preponderates in the get of horses advanced in years and heavily taxed in stud service. Nor have I observed any causes that seem to determine the sex of the foal.

"In answer to the question at what interval of days after coupling should the mare be tried again, I would say that in the spring and summer mares come in heat about every three weeks, and that it remains on about one week—the heat is on for one and off for two. The mare may be served every day for a week or more. It is a pretty good rule to try the mare again, after any copulation, in a little less than three weeks; and repeat the trial every two days for a week. I never knew a mare to refuse the horse on the ninth day after foaling, and it is a time when she is likely to become impregnated. Some breeders prefer the day when the foal is four weeks old to any other period of her brooding, considering it the surest time. A mare is more likely to get with foal when bred if her diet has been gradually lessened for a few weeks before. She should, in other respects, be treated as has been advised in regard to stallions, if circumstances allow it. That is, she should be in the best of condition as to health, strength, spirit, endurance, etc., for to transmit these qualities to her offspring they should exist in full force to her. The best treatment after service must be that which nearly approaches the unrestrained actions of both mare and horse in a state of freedom. It is a well-recognized fact that the surest way to get a mare with foal is to allow her the freedom of a field. The common belief is that the horse should be a two-year-old. This has grown out of the fact that two-year-old stallions are often at pasture than the old ones. But young stallions are not surer foal-getters than old ones.

"My horses are used every day in any practice. I keep none but stallions. They are treated and used just as geldings and mares are. They stand tied by their harness bridles for hours in the streets of a city, and give me no trouble. They do stud service to the extent of about forty mares each every season, which is the whole year. They serve mares in a stall of their stable and never anywhere else. After service they go directly to work in my wagon, ready any day for a brush on the road with whoever gives or accepts a challenge. The average percentage of mares that get with foal is about seventy-eight."

The National Stockman says: The patient, gradual development which the best drivers of fast horses practice in bringing out their best young animals might be profitably followed by those who have the handling of horses for heavier work. Many horses are ruined by being over-worked before they are inured to the hardships through which they are compelled to go.

Veterinary practice was recommended to young men at a recent meeting of the Kentucky Medical Society. The horses of the country being valued at \$300,000,000, it is estimated that the annual loss from want of sound advice and treatment amounts to \$15,000,000.

Laws of Breeding.

Finley Duun, Jr., in a lecture before the Edinburg Veterinary College, said: "Our every day experience of the production and development of plants and animals at once suggests the existence of the great natural law embodied in the old familiar saying 'like produces like.' In accordance with this law, the peculiar properties, characters and qualities of the parent, whether good or bad, healthy or diseased, external or internal, are transmitted to the offspring, or in a word are hereditary. Many interesting and valuable facts have been recorded which prove, beyond all doubt, the hereditary tendency of the physical, mental and moral qualities of man. Parents transmit to their children their own, or at all events similar external forms, similar intellectual capacities, temperaments, dispositions, virtues and vices, as well as similar tendencies to particular diseases. Among horses we find, as in the human subject, ample illustration of the hereditary tendency of external form, disposition, habit and disease. The parent transfers to its offspring size, shape and general conformation similar to its own, and the aporism 'like produces like' is as applicable to faulty and disproportioned as to beautiful and symmetrical form, to diseased and debilitated as to healthy and vigorous constitution. Beside the general constitution of the parents, their special condition at the time of copulation also appears to be to a certain extent transmitted to their offspring, and hence the necessity of selecting for breeding purposes only animals of a strong and healthy constitution, and of using them only when they are in full possession of their physical energies. For a high state of the physical energies at the time of impregnation is believed to produce a correspondingly great development of physical power in the offspring. On the other hand, we find that even a slight and temporary debility at the time of copulation exercises a marked deteriorating effect upon the spirit and vigor of the offspring. Hereditary diseases are less effectually treated by ordinary remedies than other diseases. Thus, although an attack of rheumatism, or constitutional ophthalmia, may be subdued and the patient relieved of his pain, the tendency will still remain, and be greatly aggravated by each attack. Hereditary diseases do not necessarily show themselves at birth, in horses and cattle. There are only a few that do so, but most of them develop themselves only a considerable period after birth, and the inherent tendency may even remain latent during many years, and sometimes remain latent for a generation or two, and afterward reappear with all their wonted severity, and such cases are not of unfrequent occurrence. Diseases produced during the lifetime of an animal occasionally become hereditary, but not usually so. Blindness produced by injury or ordinary external causes, and roaring produced by phlebitis or even bronchitis, are seldom hereditary; and it appears as a general rule, admitting, however, of some exceptions, that a local injury or disease produced by accidental causes is not likely to be hereditary, although a general deteriorated state of health, however produced, is very apt to be so."

Against Horse-Shoeing.

One of the most intelligent and prosperous Michigan farmers has entirely abandoned the practice of shoeing. He says that he never shod his horses rarely have tender feet, their feet keep in good shape, and he finds they are far less apt to be lame. He even finds that those which have never been shod have such sharp hoofs that unless the roads are very icy they stand to draw quite a load. When so icy as to make it dangerous to drive, which is seldom more than two or three days in a year, he can well afford to let his team rest, or draw wood or manure on the farm where they can almost always travel safely.

A recent writer in a scientific journal takes precisely the same ground in reference to roadsters and even horses on the race-course. He says of his own unshod horse that after having been for years the victim of the farrier, it is remarkable that he should work as he does barefooted. "Shod, he 'brushed' and stumbled badly; barefoot he does neither." He tells of a doctor's horse that in five years has traveled in London streets a distance of more than 13,000 miles. He was never shod, yet his hoofs are the admiration of veterinary surgeons, and show no sign of undue wear. Several other cases even more significant are cited.

The writer has a pair of rather light mares which he drives on the road exclusively. For the past three years he has suffered them to go barefoot, and is more than ever satisfied with the result. Their feet have been much improved, and they are much more free from lameness, or a cramped gait. Possibly horses with hoofs congenitally tender, those whose feet have been ruined by the shoer, and those driven continuously on hard roads may need to be shod, but do not many farmers visit the blacksmith more than is necessary or wise? is a question upon which many if not by far the most of our farmers may profitably meditate.—Amateur, in N. Y. Tribune.

Cross Breeding.

With one of Hark Comstock's articles I heartily concur, that the old rancour between the breeders of the different families of trotting horses has largely died out and given way to a natural pride by the different owners in buying representatives, and leading ones, of all of the best families. The illustration of this would be an exceedingly interesting article. And from the multitude of the facts in his possession, it would be very gratifying to me if Mr. Comstock would apply the reasoning he gives to Hambletonian to the value of cross-breeding. Maud S., the fastest mare in the world, is the result of a violent outcross—a Hambletonian stallion upon a pacing-hred mare. If her grandam's breeding could be sustained as by Boston, we would have the three sharpest outcrosses in the world, the trotting-bred, the pacing-bred and the running-bred, in immediate conjunction. St. Julien, the second fastest, was by an outcrossed Hambletonian, not a Clay, upon a Clay mare. Cling-tone, the greatest of all for his opportunities, is by an outcrossed sire, the very sharpest—by a trotting-bred sire out of a running-hred mare. His dam was also sharply outcrossed. Trinket, who can run, pace and trot fast, without slacking to change her gait, is by an out-hred sire, sired by an out-hred sire, out of a Hambletonian mare, with many pacing instances in the family, though their source has not been definitely fixed. Messenger Duroc's successes, like those of his sire, Hambletonian, have generally, if not universally, been upon the Star and Clay outcrosses, and it has worked well in the second generation through Ryslyk, with the thoroughbred or outcross.—Country Gentleman.

A little freedom in the evening after a hard day's work is greatly enjoyed by horses, and it certainly does them good. There entire system is bent in but the one direction during the day while at work, and a change from that in the way of a good romp and a roll when freed from the harness cannot but be beneficial.

Pluvial Unpleasantness.

It is not a novel experience for the Blood-Horse Association to see portentous clouds and hear the pattering of rain-drops when, of all times, they would have clear skies and a good "outing" atmosphere; but the Spring Meeting of 1884 has been held under more unfavorable and disagreeable climatic conditions than any other in the history of the Association. Instances are few in this or any other country where dates have been so rigidly adhered to and programmes fully carried out in the face of such untoward circumstances as in the first two days of the meeting. For this particular season the meeting began two weeks too soon, but such an April deluge was not suggested by previous experience, and could not be foreseen. Ordinarily, the dates were in the regular order with meetings east of the mountains. To enable horses to be taken east in time for the opening of the season there, the California spring events cannot be delayed later than the middle of April. These eastern engagements were the main cause of the "rain or shine" announcements in the advertisements of the Blood-Horse Association this week. Saturday's races were run between showers, in splashing mud, and when the storm increased instead of diminished, and from occasional showers intensified into a steady downpour, it seemed next to impossible to go on. A meeting of the Trustees was held on Monday to consider the situation, and it was decided not to postpone on any account. The second day, Tuesday, was a repetition of the first, rain, mud and a skeleton attendance of spectators. But the sport was good for those who did attend. The races were well contested and the best horses won. Racing in the mud and rain are sights not often seen in California, where habits of the track are accustomed to fine weather and dry courses all through the racing season, but they are not uncommon in other parts of the country. Perhaps if the race-going public were to try the experiment once

they would enjoy such affairs quite as well as any other. Heavy tracks have the effect of reducing the number of starters, for "weeds" should not hope to keep in the company. Only the sturdiest and gamest from the stables face the starting flags on such occasions, and the battle is confined to a select few, but that fact makes the racing the more interesting. All of the horses that have started during the meeting have performed well, and no finer test of their quality could be given. Their ability as "mud horses" has been proven, and for one eastern campaigner the possession of this peculiarity is of the greatest value, inasmuch as showery weather and heavy tracks will surely be met many times in the course of the season on that side of the Rockies. In California we have racing earlier in the spring and later in the fall than in other parts of the United States, because the climate, as a rule, permits it, and in the division of time with other districts we must expect to give and take, so as to prevent clashing as far as possible. As the eastern season is shorter than ours, and every day must be utilized to allow the horses to get around the circuits, our important meetings will necessarily be respectively early and late in the year. As the number of associations is steadily increasing on this coast, the time is not far off when the dates will be so filled that there will be no margin of time for postponement, and events must be decided on the days set apart for them. The general public will find some advantages in this, as it will remove all uncertainty as to when particular races are to be run, and save many disappointments. People who come from a distance to attend these meetings will be able to make their arrangements with certainty, and the number of these out-of-town attendants will be thereby increased. All will find, by observation and experience, that great battles may be fought on the turf without tracks pointed to perfection and without any record breaking. We cannot expect the old-time leeway, that allows races to be continued almost indefinitely to obtain any longer. While we most heartily concur in the general idea of starting races promptly at the time announced, there are exceptions, and last Tuesday was one of them. We naturally feel a great interest in the association and all its affairs, financial and otherwise. We hardly think that any stable would have materially suffered by a delay of two or three days, and the association would have been largely the gainer by such a postponement. But regrets are useless, and the association must make the best of it on the ecclesiastical principle that "whatever is right."

Spring Meeting at Fresno.

The Fresno Fair Association will give the first racing meeting over their new track this spring, commencing May 20th and continuing five days. The excellent programme will be found in our advertising columns, and we bespeak for it a careful consideration at the hands of our horsemen and others interested in the sports of the turf. The running events are numerous and varied, all distances being provided for, from a quarter to a mile and three-quarters. For two-year-olds, dashes of half a mile and three-quarters of a mile are offered; for all ages, a quarter dash, half-mile dash, half-mile heats, three-quarter dash, mile heats, and a dash of a mile and three-quarters. These races are all stakes with added money. The trotting fixtures that are open to the State are a \$400 purse for the 2:40 class, a \$1,000 purse for the 2:27 class, and a \$100 purse for a race of mile heats, with gentlemen drivers. In addition, there are some district races on the programme, making in all fourteen numbers. The running races will be governed by the Blood-Horse Rules, and as the society is a member of the National Trotting Association, all racing will be to rule, and the full protection of the law extended. Fresno is favorably situated, with all rail communication with the other principal points of the State and coast; easy of access, and in a great producing district, where expenses must naturally be at the minimum. The association is composed of the leading citizens of an enterprising and thriving town. The track is constructed on scientific principles, and is a good one. We hope the association will meet with a liberal support from all concerned, as a successful result of this first venture will establish Fresno as a permanent member of the California circuit. Entries close May 5th, with W. W. Phillips, Secretary, at Fresno, or with Killip & Co., 116 Montgomery street, San Francisco.

The great success attending S. C. Bowley's first Combination Sale, which amounted to about twenty-one thousand dollars, has induced Mr. Bowley to make another one of these Combination Sales that are becoming so popular all over the county. The next sale will take place in October next, of which due notice will be given.

The Messrs. Fritsch, owners of Nellie R., deny that they have any intention of sending her East. She will be kept at home this year and go around the California circuit as usual.

We have been bombarded with inquiries as to what California horses will go East this year. The only direct answer we can give is that we don't know. The horses in training are so backward that they cannot be selected with any certainty. Mr. Winters expects to start about the end of the month, and his calculation is to take six, but what their names will be will depend on the trainer's reports during the next ten days. Mr. Haggis intended to ship five, but the list has not received final revision. Mr. Baldwin will send eight if their condition warrants, but not otherwise; and so it goes. The Palo Alto colts have been doing well, but on account of Gov. Stanford's bereavement all the spring and summer engagements of the stable have been cancelled, and the horses will be kept at home. Of the trotters we have already given Mr. Hickok's list. He will go about the 1st proximo. The Palo Alto trotters will not leave the farm until orders to that effect are received from Gov. Stanford, and if such instructions come at all it will not be until late in the season. That is the situation all round. We will undertake to keep our readers posted as far as we can, but the unknowable knocks us out.

Training in Kentucky is still backward, although sharp work has at last begun. Most of the horses are in good health, and as far forward as could be expected, with some prominent exceptions. Tyrant has been sick, but is improving, and there is a rumor that Gen. Harding is complaining in a leg. Farce met with a slight accident, and it is doubtful if he is ready for the Louisville meeting. The best trial reported is that of Mr. Haggis's mare Nellie Peyton, who ran on the inside track, sixty yards short of a mile, in 1:44. Others have shown miles in 1:49 and 1:50.

The attention of dairymen and admirers of fine cattle is called to the advertisement of the Palo Alto farm of two bulls for sale. A Holstein and an Ayrshire purebred, registered cattle. They are sold because of an over-stock, and probably no finer animals for dairy crossing can be found in the State.

The Blood-Horse Meeting.

There seems to be some fatality in the fixtures of the Pacific Coast Blood-Horse Association as in both their Spring and Fall meetings the glorious climate is found to be averse to the sport, and we are generally treated to cold and wet weather. This season has not proved to be the exception, and, as many of the horses that entered for the various races here have also valuable engagements at the east, and as also a postponement of the meeting would have seriously interfered with those of Oakland and Sacramento, that follow next week and the week after, it was decided and announced that the races would come off rain or shine. There was a great difference of opinion in regard to this policy, and many arguments can be adduced for and against, the chief point on the latter side being that it will be a serious blow to the financial result of the meeting, owing to the great falling off in the attendance. As usual, under the energetic and constant supervision of the executive officers, the races came off promptly, and beyond the wretched state of the track on the two first days, there was not a hitch in the entire proceedings.

On Saturday, the inaugural day, the cards showed a woeeful falling off in the number of starters for the two and three-year-old stakes, owing chiefly to the absence of any nominations in Mr. Haggis's name, and to the withdrawal of the Palo Alto and Baldwin Stables, the former declaring forfeit owing to the recent bereavement of Ex-Governor Stanford, and the latter stable having been much retarded in the preparation of their horses by the heavy storms that have raged at the south all through the spring. Thus, in the California Stake, a dash of half a mile, for two-year-olds, that closed with twenty-three nominations, there were but four starters, Alta and Estill belonging to Mr. Winters, Hidalgo originally nominated by Mr. J. B. Chase but now belonging to Mr. J. B. Haggis, and Mischief, a Katy Pease filly from Judge Mee's stable, that was too high in flesh to contest with her speedier opponents. The betting was \$50 in favor of the Winters' pair, \$15 for Hidalgo and \$5 for Mischief. The result was an easy victory for Mr. Winters, who ran first and second with Estill and Alta, Hidalgo being a fair third.

SUMMARY.

April 12th—California Stake.—For two-year-olds; \$50 each, \$25 forfeit, \$250 added; second to save stake; dash of half a mile. Closed with twenty-three nominations.  
Theodore Winters' ch c Estill, by Norfolk—Lady Jane, 110 pounds... 1  
Theodore Winters' b c Alta, by Norfolk—Ballinette, 140 pounds... 2  
J. B. Chase's b c Hidalgo, by Joe Daniels—Electra... 3  
James Mee's ch f Mischief, by Thad Stevens—Katie Pease, 107 pounds 0  
Time—0:53.

The second was the Hearst Stake; a dash of three-quarters of a mile, for all ages, in which Premium and Susan represented the Haggis stable, at \$100 against \$50 for Joe Howell. Premium, as usual, got off in fine style, while Susan lost four or five lengths at the start, but closed up the gap on the home stretch, the result being an easy win for Premium, with Howell a fair second.

SUMMARY.

The Hearst Stake.—For all ages; \$25 each, \$10 forfeit, with \$200 added; a dash of three-quarters of a mile.  
J. B. Haggis's ch m Premium, aged, by Castor, by St. Louis, 115 pounds... 1  
Delaney & Ayres' b g Joe Howell, aged, by Bonnie Scotland—Eva Shepherd, 116 pounds... 2  
J. B. Haggis's ch f Susan, three years, by Warwick—Folly, 101 pounds 3  
Time—1:21.

The third race was the Winter's Stake, a mile and a half, that closed with twenty-eight nominations, and which resulted in an easy victory for Mr. Winters' fine colt, the Prince of Norfolk, that, owing to his showing as a two-year-old, sold at \$100 against \$30 for Rosa Belle and Hironelle that represented the Haggis stable.

SUMMARY.

Winter's Stakes.—For three-year-olds; dash of one and a half miles; \$100 each, \$25 forfeit, \$300 added; second to have \$150, third to save stake; closed with twenty-eight nominations. Theodore Winters' ch c Prince of Norfolk, by Norfolk—Marion, 100 pounds..... 1 J. B. Haggins' ch f Hironelle, by Glenelg—Susie Linwood, 95 pounds 2 J. B. Haggins' h f Rosa Bella, by King Alfonso—Miranda, 95 pounds 3 Time—2:19.

The last race of the day was a Selling Purse, in which there were nine starters, Harry Rose being made first choice at \$60 against \$40 for Bryant W., \$35 for Laura, and \$40 to the field, in which were Blarney, Chris, Neilson, Assyria, Billy the Kid, and Zubilee. It was a pretty race all the way round, Harry Rose winning handily by a couple of lengths from Bryant W., with Laura a good third, thus the favorites carrying off each event.

SUMMARY.

Selling Race. Purse \$200, of which \$25 to second. Horses entered to be sold for \$1,000 to carry entitled weight; two pounds off for each \$100 below that valuation, and three pounds added for each \$100 above; 1 1/2 miles. L. J. Rose's ch g Harry Rose, by Rutherford—Aileen Oge, by Norfolk, 3 years, \$1,000, 90 lbs..... 1 T. H. Williams, Jr.'s h c Bryant W., by Monday—Bebe, by imp. Nena Sahib, 4 years, \$600, 110 lbs..... 2 Delaney & Ayres' ch m Laura, by Shannon—Folly, by Planet, 4 years, \$1,000, 113 lbs..... 3 T. F. Lynch's h c Blarney, by Wildidle—Blarney, by Blarneystone, 3 years, \$1,000, 102 lbs..... 0 C. Dorsey's b g Chris, by Specter—by Veto, 6 years, \$600, 111 lbs..... 0 H. C. Judson's h m Neilson, by Wildidle—Susie Williamson, by imp. Hercules, 3 years, \$1,400, 109 lbs..... 0 J. B. Mackey's ch f Assyria, by Lever—Asia, by imp. Australian, 3 years, \$1,500, 112 lbs..... 0 G. L. Richardson's b g Billy the Kid, by Leinster—Lilly Simpson, by Newry, aged, \$600, 111 lbs..... 0 Thos. Hazlett's ch g Jubilee, by Norfolk—by Lodi, aged, \$700, 113 lbs..... 0 Time—2:03.

Second Day.

On Tuesday, the second day of this meeting, the weather was raw, the track in a very heavy condition, and as there was no great event on the card the attendance was light. The first race was a dash of five-eighths of a mile, for two-year-olds, in which there were but two starters, J. C. Simpson's Cito and H. C. Judson's Billy Ayres. The latter was a great favorite, and, making all the running, won in an easy style.

SUMMARY.

April 15th; purse \$200; for two-year-olds, of which \$25 to the second; a dash of five furlongs. H. C. Judson's h b Billy Ayres, by Shannon—Lady Clare, 110 pounds..... 1 J. C. Simpson's ch g Cito, by Joe Hooker—Too Soon, 107 pounds..... 2 Time—1:13.

The second race was a purse for three-year-old maidens, a mile and an eighth, in which Mr. Haggins's two mares Gloriana and Rose Bell were highly thought of, bringing \$50 against \$30 for Jon Jon, and \$10, Jack Hayes and Neilson as the field. The pace was out on by Rose, with Gloriana and Jon Jon close, while Neilson was trailing behind. At the third turn Rose was beaten, and when well in the straight Gloriana followed suit, then Neilson came with a rush, but too late; Jon Jon winning by a hand.

SUMMARY.

Purse \$200; \$50 to second; a mile and a furlong, for three-year-olds that have not won a race. T. F. Lynch's h g Jon Jon, by Monday—Plaything..... 1 H. C. Judson's h f Neilson, by Wild Idle—Susie Williamson..... 2 J. B. Haggins' ch m Gloriana, by Joe Daniels—Rebecca..... 3 W. Murray's ch c Jack Hayes, by Joe Daniels—Liberty..... 0 J. B. Haggins' h f Rosa Bella, by King Alfonso—Miranda..... 0 Time—2:10.

The third race was a walk-over for Callie Smart, Joe Howell, Trade Dollar and Patey Duffey paying forfeit.

SUMMARY.

Purse of \$200, of which \$50 to the second; a dash of a mile. Theodore Winters' ch m Callie Smart, 3 years, by Norfolk—Mattie A...w. o The last was a selling race, in which Laura and Bryant W. sold at about even rates, say \$40, but with the former as first choice, and Chris and Billy the Kid sold in the field at \$10. Chris cut out the pace for three-quarters of a mile, when he gave way to Bryant W., who led Laura by a length, but at the half-mile post they were on even terms, and after a desperate run home Laura was beaten at the grand stand, and Bryant W. won a good race, with Billy second.

SUMMARY.

Selling purse of \$200, \$25 to second; a mile and a quarter. Horses entered to be sold for \$1,000 to carry rule weights; two pounds taken off for every \$100 below that valuation, and three pounds added for every \$100 above. T. H. Williams, Jr.'s, br h, Bryant W., 4 years, \$600, by Monday—Bebe; 110 lbs..... 1 G. L. Richardson's b g Billy the Kid, aged, \$600, by Leinster—Lilly Simpson, 111 lbs..... 2 Delaney & Ayres' ch m Laura, 4 years, \$1,000, by Shannon—Folly, 113 lbs..... 3 Caleb Dorsey's h g Chris, aged, \$600, by Specter—by Veto, 111 lbs..... 0 Time, 2:23.

Third Day.

The Association had their first successful day on Threday, when, with fine weather, a fairly attractive programme and a very much improved track, the attendance showed a notable increase. The card as usual contained four events, the first being a purse of \$200, for two-year-olds, a dash of five-eighths, in which Mr. Winters' colt Bouanza was the favorite, against Mr. Judson's Billy A., and succeeded in landing the long odds laid upon him.

SUMMARY.

BAY DISTRICT TRACE, April 27th.—Purse of \$200 for two-year-olds; dash of five-eighths of a mile. The winner of either of the preceding two-year-old races barred; second to carry five pounds above rule weight. Theodore Winters' ch g Bouanza, by Joe Hooker—Mattie Glenn, 107 pounds..... 1 H. C. Judson's ch c Billy A., by Wildidle—Bouanza, 110 pounds..... 2 Time—1:05.

The second race was the Pacific Cup, a dash of two miles and a quarter; for all ages. That was divested of much of its attraction through the declaration of Trade Dollar, Sir Thad and Patey Duffey. In their absence the talent seized on Mr. Judson's John A. and made him favorite at \$60, although as a three-year-old he was conceding thirty-four pounds to Mr. Dorsey's Birdcatcher, who sold for \$40, Delaney & Ayres' Laura bringing \$25. Birdcatcher made all the running, with John A. in close attendance, and in the straight on the last mile he challenged the leader, and won by a good neck, with Laura third.

SUMMARY.

Pacific Cup Handicap; \$50 each, \$20 if declared; \$500 added; second to receive \$150, third to save stake; two miles and a quarter. H. C. Judson's blk c John A. three years, by Monday—Lady Clare, 97 pounds..... 1 Caleb Dorsey's br h Birdcatcher, aged, by Spectre—Pet, 90 pounds..... 2 Delaney & Ayres' ch m Laura, four years, by Shannon—Folly, 105 pounds..... 3 Time—4:13.

The next was a handicap for three-year-olds, a mile and three-eighths, in which there was some heavy wagering, those who had won of Harry Rose's previous victory backing him freely against his only opponent Gloriana, at \$100 to \$35. The colt made all the running, but Gloriana kept

close up, and gaining the inside on the turn into the home stretch appeared to gain with every stride, but was beaten out by more than half a length in 2:29. A complaint of foul riding was made against the rider of Rose for crowding Gloriana into the fence, and was allowed, after an examination of the track and a very deliberate discussion on the merits of the case. This was the only time the favorite won in the day, and by a scratch at that.

SUMMARY.

Handicap Stakes for three-year-olds; a mile and three-eighths; \$25 each, \$10 if declared, with \$300 added. J. B. Haggins' ch f Gloriana, by Joe Daniels—Rebecca, 113 pounds, 1 L. J. Rose's ch g Harry Rose, by Rutherford—Aileen Oge, 109 pounds, 0 Harry Rose was disqualified for foul riding. Time—2:29.

The final race was a three-quarters of a mile and repeat, for a purse of \$300, which was won in two straight heats by Mr. Haggins' Premium, after a hard run with Delaney and Ayres' Jos Howell, the mare being the favorite. The final heat was the best-contested race of the day.

SUMMARY.

Purse of \$300, \$50 to the second; heats of three-quarters of a mile; for all ages. J. B. Haggins' ch m Premium, aged, by Castor—by St. Louis, 115 pounds..... 1 Delaney & Ayres' b g Jos Howell, by Bonnie Scotland—Eva Shepherd, 117 pounds..... 2 2 Time—1:17, 1:17.

A Talk with Fred. Archer.

In connection with the publication of an excellent colored portrait of the great English jockey Fred Archer, by the *Illustrated Sporting and Dramatic News*, that paper published a very interesting talk with Archer, in which he explained the reason why he is so often a winner, and why for eleven years he has stood at the head of the list, and which contains so much solid sense for our own riders that it may do them some good to reprint it. The only one of them who conspicuously follows Archer's ideas is Jimmy McLaughlin, of the Brooklyn Stables, who, as he sits well up on his horse, with a firm but easy grip of the reins, his horse thoroughly under control and ready to be off at the slightest move of the starter's flag, has won more admiration and success than any other rider in this country, and this, too, without disparagement to Haywood, Hughes or Murphy, all of whom are quick, Hughes especially when riding two-year-olds. But McLaughlin certainly illustrates Archer's idea better than any of the others. Here is an extract from the interview:

"I should like to know, only I suppose you really can't quite tell yourself, how it is that you keep up your average of wins year after year."

"Well," Archer replies, with a smile, "I really don't quite know. I never throw away a chance in a race if I can help it, am always looking out to see how I can steal a length or two by getting the rails, or anything of that sort; and then, I think, I generally manage to get well away. But what people say, and what I sometimes read in some of the papers, about the starter favoring Archer, and his being 'off a couple of lengths to the good' is not true, all the same; in fact, it's rubbish. Of course I don't mean to say that I don't do my best to get away when the flag falls; but it isn't the getting away first so much as how you get away, how you set your horse going, I mean, that makes all the difference. You can't set a horse going at once if you have a tight hold of his head. You often see a jockey at the post on a five-furlong race, pulling at his horse, as nervous as he can be, watching the starter. The flag falls and he lets go of the reins, but his horse isn't ready to slip off at his best pace. I've always got my horse ready to go, but not pulling at him, and then when we do start I'm at full speed at once. If you watch you'll often see that some jockey is off a couple of lengths before me, but if his horse wasn't just ready, he doesn't keep his advantage."

Size in Breeding.

A correspondent of an exchange gives a few ideas that may be of value to those interested in breeding horses. He says: The shape of the foal takes more after the sire than the dam. Some few mares breed more to themselves than the horse, but, as a rule, most breed to the horse in regard to make and shape, and, therefore, if you were to put a number of mares to the same horse, and one mare to different horses in succession, the foals by the same horse would bear a greater resemblance to the sire, and, therefore, to each other, than the one mare's foals would bear to her in appearance, shape and outline. The size of the foal depends more upon the size of the dam than the sire. In order, therefore, to secure full-sized animals it is more necessary to have a large, roomy mare than a large horse; while, on the other hand, in order to be more certain of obtaining a particular shape or outline, it is more important that the sire should be of the shape you wish to obtain than the dam. Or, to put it shorter, you ought to breed from mares which are the size you want, and horses which are the shape you want.

The imported horse Silverstream, has been taken back to England. Silverstream is a bay horse, bred by Mr. R. Jardine, in 1875, and imported by the American Horse Exchange in 1881, and was for a long time held for sale in New York without getting a customer. He was finally purchased by Mr. R. B. Forbes, Jr., of Massachusetts, for mere nothing. About two weeks ago Mr. John Davis received a telegram from Mr. Tattersall, to find out the whereabouts of the horse, and, repurchasing him, returned him to England. It seems that since he left England his blood has become highly fashionable. His sire Tynedale has got the noted horse Border Minstrel, and his dam Lena foaled Ishmael, another fine horse. Silverstream is a son of Tynedale (son of Warlock), out of Lina by Stockwell; 2d dam Selina (Catherine's dam) by Orlando; 3d dam, Lady of Silverkeld Well, out of old Emma. Mr. Asunden, so long connected with the American Horse Exchange, hunted him up, and, securing him, had him shipped to England.—N. Y. Spirit.

"Now that horseback riding has become so fashionable, I wish it would extend to the drivers of trotters," said Isaac Woodruff, the other day. I agree with him that it is the one thing needful to bring about a revival of trotting under saddle. In talking of old-time races, he said: "I drove Western Gray Eagle twenty miles, in harness, beating Beviu's Lady Clay. I also drove a dark-spotted gelding, 15.2 1/2 hands, called Spangle, fifty miles, on the Union track, inside of four hours, with wagon and driver weighing 400 pounds. How is that for endurance? I think he was by a Canadian horse by the name of Sportsman, said to be the sire of Teacup. I rode Ajax a twenty-mile race, to saddle, and won it. I think he could have done the distance in fifty-eight minutes and a half when in his prime. He was a dark brown gelding, 15.1 hands high, short tail, and as pure a gaited one as ever you saw."

OUR NEW YORK LETTER.

Betting Rumors and Transactions in Manhattan—The Daly-Jim McGowan Case—Jerome Park Filling Up—News from England—General Sporting Notes, etc.

On Tuesday of this week the speculative fraternity of this city had a bad scare. A telegram to the Associated Press reached here from Louisville that Col. R. A. Johnson, the owner of the much-fancied Derby colts Powhatan and Loftin, had been murdered by a negro boy employed as a hostler. At once all was consternation in the various betting resorts, for the death of this gentleman meant the disqualification of his colts, the losing of all the money already bet on them, the making of new stakes in the race, and many other complications too numerous to mention. On looking up the entry, however, made in 1882, it was found that the horses had been nominated by R. A. Johnson & Co., which effectually saved the subscription, and on the heels of this came a second dispatch that the unfortunate gentleman who had lost his life was R. H. Johnson, another person. So the Powhatan and Loftin men breathed more freely; but for the time being there was a bad stampede.

Yesterday Mr. Hugh McIntyre, Secretary of the Washington Jockey Club, called on me while on a short visit here. He informed me that the Baron Von Seidlitz, the recent purchaser of the steeple-chaser Jim McGowan for \$4,500, was in Washington last week in this endeavor to have the horse's expulsion last fall rescinded. The Executive Committee of the Jockey Club held a meeting, and the young gentleman rider stated his case, but the Committee refused to entertain the application. The case of Daly and this horse was a very flagrant one, and the occasion demanded an example at the time. It had the desired effect, and drove W. C. Daly, the culprit, out of business, he disposing of most of his horses; but it seems like straining the point a trifle to still bar out the best steeple-chaser in the country, now owned by a gentleman in good standing, like the young Hungarian Baron. The Washington Jockey Club, however, believe that they are doing right in refusing to lift the ban of expulsion from the horse, and that is the way the case stands. It is rather hard on the Baron, who had expected to run Jim McGowan for the great Hempstead steeple-chase at the Rockaway Hunt meeting on May 10th next, and also for a similar event the week after at Garden City where the Meadow Brook Hunt hold their meeting. In either of these races he could very likely win back the horse's purchase-money, and also lend additional interest to the meetings. Betting in this city on Kentucky events has been rather quiet, and as the New Orleans racing has stopped for a week, the fancy, have had only the Suburban Handicap at Sheephead Bay, and the Withers' Stakes at Jerome to claim their attention. All accounts point to the first-named race as likely to prove one of the great racing events of the year, and indications tend to the belief that from twenty to twenty-five horses out of the sixty acceptances will be seen at the post. Fully that number have been already well backed at prices ranging from 10 to 200 to 1, and the latest to receive heavy support are Turk, 3 years, 91 pounds; Eolist, 4 years, 107 pounds, and the great Iroquois, 6 years, 130 pounds. Here are a light, middle and top-weight represented, and they show plainly enough the good work done by the handicapper, Mr. J. G. K. Lawrence, who has framed perhaps the best appointment of weights ever made public on any American race of note. Turk, by the Ill-Used, won a solitary race last year with 81 pounds up. He belongs to Appleby and Johnson, the book-makers. His owners have backed him to the extent of \$360, at 45 to 1. This means a bet of \$300 to \$13,500 that Turk wins the Suburban. About Eolist, the four-year-old brother to Eole, still heavier money has gone on. \$500 has been placed on him with such respectable firms as Wm. Lovell, Kelly & Bliss, and Cridge & Co. of this city, at the odds of 40 to 1. The money emanates from Gebhardt, through a friend, and means a bet of \$500 against \$20,000 that Eolist wins the Suburban. It is an open secret that this colt, who only ran twice last year, is very little inferior to Eole his great brother, and if this estimate of Eolist is a correct one, it makes his chance a very good one, indeed. The great Iroquois, however, has his friends in spite of his "steadier" of 130 pounds. \$1,500 to \$100 was written about him yesterday by Lovell, and the latter was a speculator who knows pretty well the state of affairs at Raucoces. Certainly, the great son of Leamington is expected to retrieve his laurels this year, and that he is capable of doing so when in condition, few who saw his game rush last August at the finish of the Moumouth Stakes will deny. The horse was then comparatively just off the ship, and he subsequently got off, as his Baltimore running was not up to his Loug Branch mark. No more popular victory than that of Iroquois could happen in June next, and he will have every chance given him by Mr. Lorillard to show that his English victories were no second-rate affairs, as some have claimed, since his bad luck here. Jerome Park now presents a very busy scene. The remodeling and improving of the Coney Island track has driven the stables there to seek other quarters. Some went to the old Prospect Park Trotting Track, others to Brighton Beach and Monmouth Park, but the most of them, including twenty-two horses of the Dwyers' and half as many more from other stables, went to Jerome on Tuesday of this week. A visit there yesterday revealed a very busy scene, and the track is now in fair order. Though we had a snow storm five days ago it was very light, and since then the weather has been good, and now appears settled. The Dwyers' horses look a grand lot. Old Checkmate is in lusty health and apparently sound. Barnes, ditto, also, Kenny, while Miss Woodford is the same piece of steel and whipcord she showed herself to be last fall. Burton and El Dorado are the best of the three-year-olds, while Col. Clay and Miss Palmer are thought to be the pick of the youngsters. No grander lot of horses are to be found in one racing stable in the world. News from England is to the effect that Mr. Keene's Blue Grass met with an accident at Epsom recently, and was scratched for the City and Suburban, March 24th. A very unfortunate occurrence, as the horse's chances of success were first-class. Girofle is taking mile canters, and will, it is thought, strip in fair condition on the 23d of this month. Donohue, her jockey, rode Suttle for Mr. Walton, at Lincoln, and finished seventh in the Lincolnshire. Frank McLaughlin, the young brother of the noted Jimmy, is said to be in a fair way of having his sentence of expulsion rescinded. Col. Clark and Mr. P. M. Hall, two of the judges who expelled him, have signified their willingness to give the young jockey another chance.

Yours,

PACIFIC.

New York, April 10th, 1884. Jim Reutwick has been received with becoming hon New York.

FISH.

Walton Fishing Club.

EDITOR BREEDER AND SPORTSMAN:—I cannot say that we are the first in the field this year, as we have been in years gone by, as other fishermen were on the alert at the same time. The W. F. C. had two postponements previous to the 13th of April on account of the stormy weather, and Secretary Carnes issued for the third time the usual postals for the date above, "without fail." Saturday, the 12th, gave encouragement to the boys, as the sun shone out brightly, so much so that Manager McElhinny clothed himself in a bran new suit at the prospect of the morning being a grand excursion. It was his first attempt to cater for the W. F. C. To make things doubly sure an old and much respected relative of his was seen running to an iron, at the time the electric lights were being put out, in search of an express wagon to convey the provender at early dawn down to the foot of Washington street. He was on hand, but with downcast countenance he lifted his right optic heavenwards, and towards the southward he beheld black clouds enough to make a captain order reef top sails; but he hurried out, "Oh, my God, another postponement!" and dived into his pockets for his book of expenses. As the time approached for sailing, 8 A. M., the boys began to turn up. At 9 the Elia cast off in tow of the Annie Hart. Members present: Messrs. Norman, Dr. Hughes, Jennings, Muller, Hopkins, Barry, Pitcher, Fogg, Potter, Klose, Hager, Peterson, McElhinny and Dixon; guests, Messrs. Peck and Feehan; destination, south, to east side of Alcatraz. We passed close along side the fine British ship Mitredale, Capt. Currie. President Dixon welcomed the Captain back again to Frisco, who kindly invited us on board; not accepted, with thanks, as the Waltonians were eager to come in contact with the funny tribe. On we speed, all hands preparing their lines to haul in the multitudes of hungry fishes that were laying in ambush. Down goes the anchor, down goes lines. Bless your dear old soul, BREEDER AND SPORTSMAN, your many readers know you are authority on all matters, always willing to give advice appertaining to sports, we were sorry you were not with us, as you might have given us a "tip" in the *modus operandi* of making a big haul. The bible speaks of five loaves and two small fishes among the many; to be candid, we left S. F. with the number of loaves, and Messrs. Dr. Hughes and Barry caught the "twa ama" fishes. Devil another fish or nibble was had on the glorious 13th of April. Up anchor and made tracks for the west side of Angel Island, where Major McElhinny and a boat's crew landed. They proceeded to a cottage in the far distance to interview the dwellers; on arrival an old Irish woman made her appearance, and Mc began about fishing, but the old woman shut him up in the first round; she would not talk business on Easter Sunday, and the gallant Major retreated. Again we got underweigh for our old ground north side of the island. In the meantime a very prominent member introduced a little game called "Stud-Horse or Thoroughbred Stallion," I know not which, as I heard such well-known names mentioned as Anteo, X X, Joe Hooker, etc. Professor Hopkins, with a gang of men, went on shore to manufacture the chowder. Everything was on hand but the pepper and salt. A delegation inquired of Mc where the spice could be found, but Mc was too much absorbed in studying the "Stud-Horse" book to give the desired information, except that he might have left it in the neighborhood of Ranch del Paso on his last visit. The chowder was tip top. At 4:30 P. M., living, dead or otherwise, all on board, we started by way of Tiburon to take a bird's-eye view, and to have a last fond look at the once formidable bear ship "Alaska," now to be consigned to cremation. Homeward, the word. As some of the boys had front seats at Patsy Hogan's benefit by 6:30, all were landed from whence they came; in all my trips with the W. F. C. it has always been a pleasure, and with truth to record, a good, pleasant and enjoyable day's sport; but, alas, the elements and non-attendance of members put a damper on the first trip of the season. The manager got a little bewildered at the finish, but Messrs. Peterson and Hughes at the last moment, as brothers should do unto each other, assisted brother Mc in gathering together the pots and pans ready for transportation to the store-room, to await further orders. APRIL SHOWERS.

The Fish Commission.

The late meeting of the Fish Commissioners, a report of which we give below, is worthy a careful reading, as showing the spirit of complaint growing up in all quarters at the criminal destruction of fish in our waters. Public sentiment on any subject cannot long be defied by officials without ruin to themselves and the interests it is their duty to conserve. Let us hope the constant complaints now personally brought before the Commissioners may lead them to adopt a more energetic policy.

The Fish Commissioners met at Sacramento last Monday. Present—Commissioners Buckingham and Dibble. The Commission decided to contract with the Lenni Fish Propagating Company of Sonoma county, to furnish the Board with 25,000 young trout at \$5 per 1,000, to be placed in the streams of Sonoma county.

Mr. Woodson, a fish propagator of Modoc county, was empowered to plant 12,000 young trout in the streams of that county.

James McM. Shafter of Marin county called the attention of the Board to the obstruction to the ascent of Lagunita Creek to trout, caused by a dam on the property of Samuel T. Taylor, and his refusal to comply with the law. Mr. Shafter says that Taylor has been convicted of maintaining a nuisance, and has appealed to the Supreme Court, and that a decision will never be reached until the Commissioners move in the matter. Commissioner Dibble said that the Board has, through counsel, urged immediate action.

A letter from Loren W. Green, of the United States Fish Hatchery, at Baird, Shasta county, stated that owing to high water the outlook for trout eggs from McCloud river the present season was discouraging. He would ship none east, but would give the entire spawn to the Commission.

Secretary Dibble reported that since the last meeting of the Commission 30,000 land-locked salmon eggs had been placed in the Shebley Hatchery, in Nevada county. These were received from the hatchery at Bucksport, Me., with only the loss of 2,000, or 7 per cent. The eggs have been hatched out, the young fish are in excellent condition, and will soon be ready to be planted. The Commission is ready to receive applications for the same. They are to be placed in public and deep waters.

It is expected that 200,000 young fish will be obtained from the Shebley Hatchery for distribution this season. The eggs are in excellent condition.

Commissioner Buckingham stated that he had recently placed between 200 and 300 carp in the overflowed districts along the Sacramento.

The Sacramento River Packing Company at Collinsville

complain loudly of the Chinese fish-traps planted in the straits about and below Vallejo, in violation of law. These traps were destructive to the nets of white fishermen, one of whom alone lost 175 fathoms of new netting on April 2d. The Benicia Cannery had also suffered much from the same cause. The Commission promise to have the nuisance abated. It is stated that the Chinese have complete possession of that great stretch of fishing ground.

Commissioner Dibble reported obstructions in Truckee river, within the state of Nevada, which prevent the fish from making their way up to the spawning grounds which are in the head waters, and mainly within the State of California. These obstructions consist of dams at Wadsworth, Reno and Essex, or West Verdi Station; the latter especially being unprovided with a fish ladder or passage of any kind, prevents an insurmountable barrier to the ascent of the fish. Mr. Dibble said: "Seated on the banks of the river, I watched the fish in their desperate efforts to jump the dam and go to their spawning grounds. In less than half an hour I counted two score of splendid, athletic trout that made the effort and fell back in the waters below." He believed, however, that the attention of the Fish Commissioner of Nevada, having been called to the matter, he would take the necessary steps to have the obstructions remedied.

Complaints from Plumas county were received, stating that the Dutch Hill Mining Company's canal, at the head waters of Feather river, carried the fish from the river into a lake where, unable to get out, they died by millions. He said the streams thereabout, which a few years ago literally swarmed with fish, have now scarcely any. Superintendent Frank Miller of the mine said that if the canal interfered with the fish interests the company would gladly obviate the difficulty.

Commissioner Dibble will investigate and report on the matter at the next regular meeting of the Board.

The report we published last week about a 20-pound striped bass being caught near Vallejo is confirmed. We forget at this moment the number of this grand fish planted by the late commissioners, or the exact time, but we believe, this is the first one of the first lot that has been caught in matured form. It can scarcely be the only one that survived, and therefore the fact gives us hope that with the last lot of 300 planted about two years ago our waters will soon be full of them. This is another honor to the memory of the old commissioners who now rest in their graves. It is only by degrees we find out their fidelity to themselves and the State.

The bay fishing during the week was also very poor. Even the Walton Club on its opening day only caught two or three small fish. They tried several favorite places, but it was still the same—"ne'er a nibble." This ill luck caused Clem. Dixon's hottle of dark stuff to suffer in proportion. It is a great calamity truly in which no consolation is found. The fog-whistle keeper at Lime Point reports several fair catches of good-sized rock cod, chiefly in deep water, from 100 to 120 feet deep.

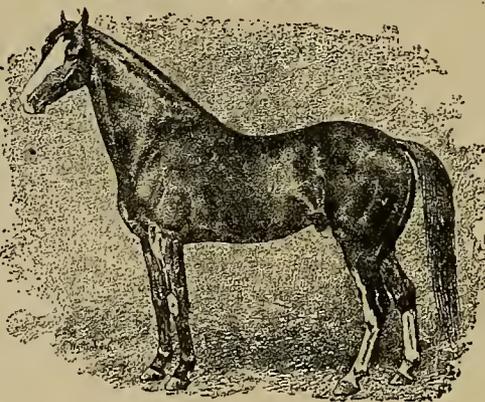

The late rains have stopped trout fishing for a time, and there are no reports to make for the week. We hope it will be so for a month. It is pleasant to find our article last week on killing young fish, especially fingerling trout, had such a good effect. It set many to thinking about the matter who never before thought the action really criminal. There is no end of room for reform in this matter among all classes. We shall continue to expose and denounce all such wrongs.

It is reported from San Mateo county that last Sunday J. G. Chesley, W. H. Cameron and W. Douglass caught 382 trout near La Honda, 312 of which were taken out of one stream by Messrs. Chesley and Cameron. So says an exchange, and we would give a dollar to know the exact number of fingerlings in the lot caught.

Another bed of oysters has been found in Hood's canal, Puget Sound.

STALLIONS THOROUGHRED.

The Thoroughbred Stallion

JOE HOOKER, BY MONDAY.

- First dam Mayflower, by imp. Eclipse.
- Second dam Jennie Farrow, by imp. Shamrock.
- Third dam Ida, by imp. Belschazzar.
- Fourth dam Gamma's dam, by Sir Richard.
- Fifth dam, by imp. Eagle.
- Sixth dam Bet Bosley, by Wilkes' Wonder.
- Seventh dam, by Chanticleer.
- Eighth dam, by imp. Sterling.
- Ninth dam, by Clodius.
- Tenth dam, by imp. Silver Eye.
- Eleventh dam, by imp. Jolly Roger.
- Twelfth dam, by Partner.
- Thirteenth dam, by imp. Monkey.
- Fourteenth dam, imp. mare from the stud of Harrison of Brandon.

TERMS, \$50 THE SEASON, TO A FEW MARKS OF APPROVED breeding. Good pasture for mares from a distance at \$4 per month. Care will be taken to avoid accidents and escapes, but the owner must take the risks.

My place, where Joe Hooker will make the coming season, is five miles from Sacramento, on the Freepoint road.

This young stallion has proved to be one of the most successful racing sires, and every one of his colts that has been trained can run fast. Among them are Fred Collier and Jim Kenwick. For history of Joe Hooker see BREEDER AND SPORTSMAN January 20th, 1888.

THEO. WINTERS, Sacramento, Cal.

The Thoroughbred Stallion

WILDIDLE.

By Imp. AUSTRALIAN. Dam Idlewild, by Lexington. This great race-horse and successful sire will make the season of 1884, from February 10th to June 10th, at Judson's Wildidle Farm, Santa Clara, Cal.

Wildidle is the sire of Gov. Stanford's Frolle filly (record of one mile, 1:42), at two years old; May D. (with a record of one and one-half miles in 2:36, the fastest on the Pacific Coast), Jim Douglas, Ella Doane, Wildidler, and others of note.

Terms of season, \$75, payable at time of service, and in all cases before removal. Mares taken good care of at \$8 per month. No responsibility for escapes or accidents. For further particulars address

H. C. JUDSON, Owner, or W. L. APPELBY, Supt., Santa Clara, Cal.

P. O. Box 223.

STALLIONS

—AT—

RANCHO DEL PASO.

For the Season of 1884.

Thoroughbreds.

LONGFIELD.

- Chestnut horse, by MONARCHIST, he by Lexington.
- First dam, Dame Gourlay (Blue Gown), by Phuet.
- Second dam, Flora G., by Lexington.
- Third dam, Fanny G., by imp. Margrave.
- Fourth dam, Lances, by Lance.
- Fifth dam, Aurora, by Aratus.
- Sixth dam, Paragon, by imp. Buzzard.
- Seventh dam, Indiana, by Columbus (son of imp. Pantaloon).
- Eighth dam, Jane Hunt, by Hampton's Paragon.
- Ninth dam, Moll, by imp. Figure.
- Tenth dam, Slamerkin, by imp. Wildair.
- Eleventh dam, imp. Cub Mare, by Cub.
- Twelfth dam, Aramantus' dam, by Second.
- Thirteenth dam, by Starling.
- Fourteenth dam, by Croft's Partner.
- Fifteenth dam, by Greyhound.

At \$50 the season, due at the time of service.

JIM BROWNE.

- Chestnut horse, by FOSTER, he by Lexington.
- First dam, Flusb, by Hiawatha.
- Second dam, Fanny Bugg, by imp. Ambassador.
- Third dam, Ida, by imp. Belschazzar.
- Fourth dam, Madane Bosley, by Sir Richard Tonson.
- Fifth dam, Nancy Nichol, by imp. Eagle.
- Sixth dam, Bet Bosley, by Wilke's Wonder.
- Seventh dam, by Chanticleer.
- Eighth dam, by imp. Sterling.
- Ninth dam, by Clodius.
- Tenth dam, by imp. Silver Eye.
- Eleventh dam, by Jolly Roger.
- Twelfth dam, by imp. Partner.
- Thirteenth dam, imp. Monkey.
- Fourteenth dam, an imp. mare from the stud of Harrison of Brandon.

At \$50 the season, due at time of service.

Trotting Stallions.

ECHO.

- Bay horse, by RYSDYK'S HAMBLETONIAN.
- First dam, Fauny Felter, by Magnolia, son of Seely's American Star.
- Second dam, by Webber's Kentucky Whip.
- Third dam, by Shakespeare, son of Duroc, and out of a mare by Plato, son of imp. Messen.

At \$100 the season, due at time of service.

ALGONA.

- Chestnut horse, by ALMONT, son of Alexander's Abdallah, son of Rysdyk's Hambletonian.
- First dam, Emma Kinkaid, by Conscript, son of Cassius M. Clay.
- Second dam, Effie Dean, by Manubrio Chief.
- Third dam, by Powell's Bertrand, son of Bertrand, by Sir Archy.

At \$100 the season, due at time of service.

ALASKA.

- Brown horse, by ELECTIONEER.
- First dam, by Washington, he by Geo. M. Patchou.
- Second dam, by Williamsou's Belmont.

At \$50 the season, due at time of service.

The season for thoroughbreds will commence February 10th and terminate June 20th. For trotting stallions, will commence February 10th and terminate July 1st. Good care will be taken of mares during the season at \$6 per month; after the season \$10 per month will be charged, but no responsibility for escape or accidents.

John Mackey, Superintendent, Sacramento, Cal.

THOROUGHRED STALLION

X X,

Pedigree.

- X X (Doublecross), bred by Jos. Cairn Shupson at Atwood Cottage, Riverside, Illinois, foaled May 23, 1872, by MALCOLM.
- First dam, Columbia, by imported Bonnie Scotland.
- Second dam, Young Fashion, by imported Monarch.
- Third dam, Fashion, by imported Trustee.
- Fourth dam, Bonnets' Blue, by Sir Charles.
- Fifth dam, Reality, by Sir Archy.
- Sixth dam, by imported Medley.
- Seventh dam, by imported Centinel.
- Eighth dam, by Mark Anthony.
- Ninth dam, by imported Janus.
- Tenth dam, by imported Monkey.
- Eleventh dam, by imported Silvereye.
- Twelfth dam, by Spanker.

See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

X X (Doublecross) is of as high and fashionable breeding as any stallion in the country. His sire, Malcolm, is by imported Bonnie Scotland, his dam Columbia, also by imported Bonnie Scotland; hence his name. Malcolm was one of the best race-horses of his day, and Columbia was also a fine race mare. Columbia is the granddam of Anteo. Her dam, Young Fashion, was the dam of Surprise, Scotland, Waukita, Bonnie Kate (the dam of Bonnie Lizzie), Andes, Hock Hockley, Three Cheers, etc. The dam of Malcolm, Lady Lancaster, was the dam of Sagnoreo, Ontario (the dam of McWhirter), Regent, Lady Fairfield, Lady Amanda, Lady Middleton, etc., and a reference to the racing calendars will show how distinguished the members of these two families are. This is the only Bonnie Scotland stallion in California, and from his inbreeding has as much of the blood as if he were a son of that renowned sire. He is a horse of immense substance, good size, high form, and of the best disposition.

Will make the ensuing season, 1884, from February 15th to June 15th, at the Oakland Trotting Park. Terms, \$50 the season.

JOSEPH CAIRN SIMPSON, Oakland or 508 Montgomery Street, San Francisco.

**HERD AND SWINE.**

**Don't Doctor the Stock too Much.**

Some one writes in the papers that in the south every farmer has his medicine chest full of bottles of one thing and another, and that all sorts of drugs and medicines are administered to the cattle continually. We do not know how far this may be general, or how far it may simply be a description of exceptional cases felling under the observation of the writer, but it certainly is not a fair statement of what may be found in other sections. Too much medication is likely to work great injury to stock, and as a general rule it is safer to rely upon pure air, an outdoor life with shelter in inclement weather, and good, wholesome food, as the ordinary and constant conditions of maintenance, and then to let medicine and drugs alone, except in the case of some acute malady.

Administered by a competent veterinarian, who can properly diagnose a disease, there is no doubt ailing animals could often be helped by the medicines selected. But the unprofessional stock-owner, with no guide but a "veterinary book," cannot often diagnose a disease accurately or select the proper remedies, and is likely to do more harm than good if he attempts it. None of them will take a book describing in a single volume all the diseases to which the human body is subject, and undertake to determine what is the matter with a particular patient or what particular course of medication will relieve him. On the contrary, a professional doctor is employed, and, as a general thing, if he is wise he simply assists nature or permits it to take its course, and if he is unwise will likely do more harm than good. But the fact is, the average man can doctor himself, and all his family, and all his neighbors from a book, with much greater success than he can doctor his cattle. The human patient can talk, and tell just how he feels, and how he has felt at various times, and describe all the sensations which are symptoms of his disease, and locate and give the character of every pain or weakness by which it is attended; and for him diseases and their remedies can be more accurately set down in the books. But in the case of an animal all these must be "guessed at." Some few strong, aggravated symptoms can of course be recognized, but they may indicate several things, and the judgment must be well trained which can always tell what importance to attach to each. The animal may indicate that it is in pain, but cannot tell enough to enable the unprofessional to exactly locate it, neither can it describe it in such a way as to enable the inexperienced to determine the cause or probable consequence of the pain. Take a book and find some of the symptoms of the worst maladies almost duplicated in comparatively simple ones, and those simple ones accompanying the very worst diseases—consider that animals, like men, have their individual peculiarities, and that diseases rarely occur in a simple form, but are complicated with each other, and these complications varying in different animals as a consequence of their constitutional peculiarities or their condition at time of attack—and it will be seen how difficult it is to come to any really satisfactory conclusions.

There are cases, of course, where attacks are of such a nature that an animal will die before nature can do anything for its relief—quick-running diseases that give nature no chance. In such cases, of course, something must be done. If the proper thing the animal is relieved, and if not the proper thing it is probably no worse than if nothing had been done. So it is well enough to do the best one can and take the chances. But as a general thing, when animals are not suffering from either a very acute or chronic trouble, it is better to let them alone without medicine than to take the chances of a blundering administration of drugs.

**Pig Papers.**

One of the most important points in the management of sucking pigs is to prevent the robbing of young litters by those that are older. Unless timely and proper measures are taken this is almost as certain to occur as that the appetites of young pigs will grow with the growth of the pigs themselves. As an easy way of satisfying this increasing appetite, the older litters soon acquire the habit, if opportunity offers, of driving the younger from their dams, and taking their milk themselves. Plundering and foraging are the first traits of lively character shown by young pigs. The present good is all they care for, and when litters of different ages are allowed to run together, no amount of extra feeding will prevent the older and stronger from taking the milk intended for the younger. The only way, therefore, to have all do well is to keep the litters apart while young. After they are five or six weeks old, if thriving well and following their dam with that earnest, well-to-do and saucy air usual with hearty, good-feeding pigs, there is less danger of their being imposed upon by older ones. A litter of vigorous, high-feeding pigs will whip out in a moment any that would dare to intrude upon their rights as sucklers. The habit of robbing comes only by degrees, and, as a rule, it is only the younger litters, which have not yet begun to enjoy fully their happy lot in life, or such as have never been of strong and hearty growth, that are liable to suffer from the impositions of older comrades. The young and weak cannot be expected to grow and do well unless protected in a way that will insure to them the milk of their dams. The separation of the litters will not only accomplish this, but will make it possible to keep the larger pigs from getting an undue share of any choice feed that may at times be had for distribution.

The keeping of the litters apart is some trouble, to be sure, but let any one try the experiment for a few weeks, and he will find it time and care well invested. If, as they grow older and learn to eat by themselves, they are well and regularly fed, the owner will feel well repaid for the extra attention given, by the increased growth and thrift of the little pigs. To the farmer's boy who likes fun there is pay of another kind, viz., in the entertainment to be had from an occasional innocent and gallant little pig fight. When two litters, after being kept in this way for a time, as strangers to each other, are brought together, by letting the older into the premises occupied by the younger, it will amuse almost any one to see the dust fly in the regular pitched battle which is sure to take place. One not used to seeing these encounters will be surprised also to find the smaller pigs the victors, unless the difference in weight is nearly as two to one against them, and then, when the fight is over, how proudly the little fellows stand on their ground while the big strangers scamper away. These little battles are not, of course, suggested as a necessary part of the rearing or training of the pigs, nor are they mentioned here to encourage the boys in this kind of sport. But, however they may occur, whether from accident or design, they show that young pigs which have been well kept are generally able to defend themselves.—Phil. Thrifton, in *Breeders' Gazette*.

**Milk the Young Heifers.**

It is not new advice to recommend that the young heifers be milked carefully the first season, instead of being simply allowed to run with a calf. The treatment after the first calf determines in a large measure the usefulness and value of the future cow, and if proper care is given, more can be done towards establishing and confirming the milking habit at this period than at any other time. I have often observed this, but fresh illustration and experience may not be without value in enforcing and teaching what should be already understood, but which those who do not understand do not always practice. I have a heifer that came in with the first calf a few days before Christmas. She gave at that time five quarts per day—certainly not an extra showing. By careful milking since, without any perceptible change in feed, she has gradually increased her milk, until now, March 25th, she is giving seven quarts, and is still increasing, and I am confident that by continuing the same careful milking she will develop with her next calf into a grand cow.

I think a mistake is often made in breeding heifers too soon after their first calf. There is a natural tendency in cows to drop off somewhat in milk after getting in calf, and by breeding the young heifer too soon the milk secretion commences to diminish before it has been developed to the highest point. My idea is not to breed them until their milk has been brought to the highest point, and the habit of milking well and long becomes firmly established. The longer the young heifer is milked with her first calf the longer will she be likely to hold out in milk with her subsequent ones.—*Breeders' Gazette*.

The great majority of farmers' cows drop their calves in the spring so as to have the first flow of milk while the cows are at grass. It is, therefore, timely to urge those who have good milking or butter strains to keep the heifer calves for cows. Butchers will usually pay more for a calf of five or six weeks old than the owner can realize by keeping to sell; but a good cow is worth twice or three times as much to keep as a poor one, and there is, and should be, increasing difficulty in securing the best cows, except by breeding them on the farm where they are to be kept.

New milk weighs 8 pounds 8 ounces per gallon, skimmed milk 8 pounds 9 ounces, cream 8 pounds 4 ounces, butter-milk 8 pounds 5 ounces, and water 8 pounds 5 ounces. Those who believe in testing milk by the lactometer, or any specific gravity test, will observe that three gallons of skimmed milk and 1 gallon of water will have the same specific gravity as a gallon of milk.

Garget or caked bag is often a trouble that goes along with the best cows of the herd. The following is recommended as a cure: Eight drops of tincture of aconite dropped on a piece of bread and mixed with the food at night. Next morning four drops more given in the same manner will generally complete the cure.

Another remedy for lice on cattle, which we find afloat, is this: Mix together one part of coal oil and four parts of hog's lard, and apply a light coat to the affected place once or twice a week.

The largest cow in America, it is believed, belongs to John Pratt, of Chase county, Kansas. She is three years old, twenty-two hands high and weighs 3,200 pounds.

Always treat your cows kindly, have quiet attendants, feed well, milk quickly and cleanly. Discharge all help that are noisy or would strike a cow.

It is better to sell a cow from the herd to get money to buy feed than to have a larger herd of half-starved cows.

**Mambrino Trotting Stallion**

**ABBOTSFORD.**

Record 2:19 1-2.

WILL MAKE THE SEASON OF 1884, AT THE RANCH OF S. B. WHIPPLE; San Mateo, Cal.

**PEDIGREE.**

By Woodford Mambrino: his dam Columbia, by Young Columbus Woodford Mambrino, by Mambrino Chief, son of Mambrino Paymaster; dam Woodbine, (dam of Wedgewood, 2:19), by Woodford, son of Koselusko, by Sir Arclay. Mambrino Chief was mated with Woodbine, daughter of thoroughbred Woodford, and the produce was Woodford Mambrino, a horse, taking into consideration his limited opportunities in the stud, that outranks, by what he has accomplished, all other stallions. Of the eighty-nine colts and fillies sired by him at Woodburn, not more than seventy-five reached maturity, and many of these were not handled for speed. When wasted by disease, Woodford Mambrino made a wonderful campaign on the turf, and he gained on a slow track, at Minneapolis, a record of 2:21 1/2. He has thirteen sons and daughters that have trotted in 2:30 or better—Abbotsford 2:19 1/2; Mollie 2:19 1/2; Manetta 2:19 1/2; Mambrino Dudley 2:22; Convey 2:22 1/2; Magenta 2:24 1/2; Mantra 2:25; Pancoast 2:25 1/2; Rachel 2:26 1/2; Inca 2:27; Lady McFarlane 2:28; Dacia 2:29 1/2; Geo. A. Ayer 2:30. Woodford Mambrino was also the sire of Princeps, the sire of Tricket 2:14. It is proper to draw a comparison between Hambletonian and Woodford Mambrino. The first named stallion founded a great family, but in order to do it he got 1,330 foals out of selected mares. Thirty-seven of these entered the 2:30 list, and only two of them, Dexter and Nettie, beat 2:30. Hambletonian's percentage of 2:30 performers is within a fraction of one in thirty-six. Woodford Mambrino's percentage of 2:30 performers is within a fraction of one in seven. In other words, Woodford Mambrino, making opportunity the basis of calculation, is five times greater than Hambletonian.

Young Columbus, by Old Columbus, dam Black Maria, by Harris' Hambletonian, son of Bishop's Hambletonian. Young Columbus was the sire of Phil Sheridan, sire of Phyllis 2:17 1/2; Adelaide 2:18 1/2; Commonwealth 2:22; Hiram Woodruff 2:25; Valley Chief 2:25; Faustina 2:28 1/2; Phil Sheridan, Jr., 2:29 1/2; Tom Malloy 2:30.

**TERMS.**

One hundred dollars the season, to be paid before removing the animal. Mares not proving in foal can be returned the following season, free of charge. Good pasturage at reasonable rates, and extra pains taken, but no liability for accidents or escapes.

WASH JAMES, Agent, San Mateo, Cal.

**The Trotting Stallions**

**Baywood and Fleetwood**

WILL MAKE THE SEASON OF 1884, COMMENCING FEBRUARY 15th, and ending July 1st, at the corner of Third and Empire streets, San Jose.

**BAYWOOD**

Is five years old, dark bay, with black points, 16 hands high, and weigh 1,200 pounds, fine bone, level-headed and a good mover. Sired by Nutwood; first dam by Geo. M. Patchen; second dam by Champion; third dam by Belmont.

**FLEETWOOD**

Is four years old, sorrel, with both front feet white and white stripe face; 15 1/2 hands high, and weighs close to 1,100 pounds. He is a model perfect horse; high life, fine style and action, and looks like thoroughbred. Sired by Nutwood. First dam Copper Bottom Mare, by Young America; second dam the Throtonian Mare, pedigree unknown but she was reported to have been bred in Kentucky. Terms, \$25 for the season, or \$10 to insure.

E. S. SMITH, San Jose.

**The Trotting-Bred Stallion**

**A. T. STEWART,**

Will stand for mares at the FRESNO FAIR GROUNDS during the season.

A. T. Stewart is a dark brown stallion with white hind ankles, six-teeth and one-half hands high, and weighs over 1,300 pounds. Bred by D. L. Harris, of Fayette County, Kentucky. Foaled in 1875, and is an inbred Mambrino. Sired by Mambrino Patchen (full brother of Lady Thorn, record 2:18 1/2), sire of Katie Middleton, 2:23, and mine in 2:30 list. Dam by Mambrino Chief, sire of Lady Thorn; second dam, by Young's Plot, Jr., brother in blood to the sire of the dam of Maid S., 2:10 1/2. Mambrino Patchen sired by Mambrino Chief, he by Mambrino Paymaster, and he by Mambrino, thoroughbredson of Imported Messenger.

Terms for the season, \$30.

Address SOMERS & AVREN.

**BELLE MEADE**

1884 **STALLIONS.** 1884

**BRAMBLE,**

By imp. Bonnie Scotland, dam Ivy Leaf, by imp. Australian.

**ENQUIRER,**

The sire of McWhirter, Fortuna, Harkaway, Falsetto, Blue Eyes, Pinafore, Getaway, W. P. Burch, etc.

Fifth Day—Wednesday, July 9th.

No. 9. Purse \$2,500. 2:24 Class. No. 10. Stake \$2,500. For three-year-olds. Closed March 1st, 1883.

Sixth Day—Thursday, July 10th.

No. 11. Purse \$2,500. 2:35 Class. No. 12. Stake \$2,500. For four-year-olds. Closed March 1st, 1883.

Seventh Day—Friday, July 11th.

No. 14. Purse \$2,500. Three-minute Class. No. 15. Purse \$2,500. 2:22 Pacing Class.

Eighth Day—Saturday, July 12th.

No. 16. Purse \$2,500. 2:27 Class. No. 17. Purse \$2,500. 2:21 Class.

In addition to the Regular classes, a large amount of money has been set aside for Special Races, and exhibitions of speed by Johnston, Jay-eyes-see, St. Julien, Trinket, Clingstone, Phallas, and other horses whose records or performances have them from the Class Purse, for Double Team Races, Trotting with Running Mate, or a Stallion Race, should one be deemed advisable.

Total Amount for the Meeting, \$60,000.

CONDITIONS. All the within purses (except Nos. 2, 6, 8, 13 and 15 paces), are for trotting, and are divided, fifty per cent. to the first horse; twenty-five per cent. to the second horse; fifteen per cent. to the third horse, and ten per cent. to the fourth horse.

Mile heats best three in five, in harness, and to the rules of the National Trotting Association, except as hereafter specified.

Entrances in all purses close on Thursday, May 1st, 1884.

Entrance fee ten per cent. of purse, as follows: 2 1/2 per cent. cash, which must positively accompany the entry; 2 1/2 per cent. on Monday, June 2d, and the remaining 5 per cent. from those who start at 8 o'clock p. m. of the evening previous to the race, at the Secretary's office, 116 Monroe Street. No entry will be accepted or considered unless the 2 1/2 per cent. cash accompanies the same, nor will any entry be allowed to compete unless the second payment of 2 1/2 per cent. is made or mailed on or before 11 o'clock p. m. of Monday, June 2d, 1884; and any entry on which the last payment of 5 per cent. is not paid at 8 o'clock p. m. of the evening previous to the day set for the race, shall be considered drawn, and will not be permitted to start; but no entry shall be held, or liable for any amount beyond the first payment of 2 1/2 per cent., but failure to pay either of the payments when due shall be considered as a withdrawal, and shall disqualify the entry from competing in the race. It is the intention to place the whole matter of entrance on an absolutely cash basis, and no deviation from these rules will be allowed in any case or in any particular.

Address communications and entries to D. L. HALL, Secretary, 116 Monroe St., Chicago, Ill.

ADMISSION \$1.00

M. M. ALLEN, Lessee.

FIXED EVENTS AND STAKES

FOR

1884, 1885, 1886 and 1887.

To Name and Close Thursday, May 1st, 1884.

The Executive Committee announce, in addition to the six stakes for three-year-olds, and the Wilson Stakes for four-year-olds, the present value of which is \$9,100, already closed, the following fixed events, to name and close THURSDAY, MAY 1st, 1884, to be trotted for during the EIGHTH ANNUAL MEETING, to be held at the grounds of the New York Driving Club, Morrisania, N. Y., Sept. 9th, 10th, 11th, 1884.

THE UNION STAKES, for four-year-olds, foals of 1880, by stallions whose get have never beaten 2:30 at four years old or under.

THE MANHATTAN STAKES, for five-year-olds, foals of 1879, by stallions whose get have never beaten 2:25 at five years old or under; \$300 entrance in each stake, payable in the following forefights; \$20 to accompany the nomination May 1st, 1884; \$80 additional July 1st, 1884, and the remainder (\$100) twenty days before the meeting of 1884, when the stakes will be trotted for.

THE PACIFIC STAKES, for four-year-olds, foals of 1880.

THE INITIATION, THE CONFIRMATION, THE HOPEWELL, THE STANDARD and THE SEQUEL STAKES, for 2:30, 2:25 and 2:40 stallions, and for 2:40 and 2:30 mares, respectively, will close May 1st, 1884, the conditions of which will be duly announced.

In addition to the foregoing, the following are the stakes and fixed events for 1885 and 1886, to name and close THURSDAY, MAY 1st, 1884.

1886.

The National Trotting Sires Stakes, for foals of 1883 by stallions only for whom the sum of \$50 each is subscribed. Closed for sires May 1st, 1883, with the following subscriptions, amounting to \$400, which is added to the stakes; h. h. Dea, Sags, h. h. Electioneer, h. h. Gen. Benton, h. h. Bona Fide, h. h. Mambino Dudley, h. h. Buccaneer; all of whose get (foals of 1883) are eligible only to May 1st, 1884, at \$100 each, payable in the following forefights; \$10 to accompany nomination, May 1st, 1884; \$15 additional May 1st, 1885; \$25 additional May 1st, 1886, and the remaining \$50 twenty days before meeting of 1886, when the stakes will be trotted for.

THE NATIONAL SIRE STAKES, for foals of 1883; \$150 entrance, payable in the following forefights; \$10 to accompany nomination May 1st, 1884; \$25 additional Jan. 1st, 1885; \$40 additional Jan. 1st, 1886, and the remainder (\$75) twenty days before the meeting of 1886, when the stakes will be trotted for.

THE JUVENILE STAKES, for foals of 1883, by stallions whose get have never beaten 2:30 at three years old or under.

THE EVERETT HOUSE STAKES, for foals of 1883 by stallions whose get have never beaten 2:45 at three years old or under; \$100 entrance in each stake payable in the following forefights; \$5 to accompany nomination May 1st, 1884; \$20 additional Jan. 1st, 1885; \$25 additional Jan. 1st, 1886, and the remainder (\$50) twenty days before the meeting of 1886, when the stakes will be trotted for.

1887.

THE NATIONAL TROTTING SIRE STAKES, for foals of 1884, only by sires subscribed for whose get have never beaten 2:30; subscription for sires \$50 each, to accompany nomination of sire May 1st, 1884 (when the subscription for sires close), and for their get \$100 each payable in the following forefights; \$10 to accompany nomination, May 1st, 1884; \$15 additional Jan. 1st, 1885; \$25 additional Jan. 1st, 1887, and the remainder (\$50) twenty days before the meeting of 1887, when the stakes will be trotted for.

THE EVERETT HOUSE STAKES, for foals of 1884, only the produce of mares subscribed for at \$25 each, which must accompany nomination of May 1st, 1884, and is added to the stakes; and their produce of ownership (foals of 1884) shall be regarded as \$15 to accompany nomination Jan. 1st, 1885; \$25 additional Jan. 1st, 1886; \$35 additional Jan. 1st, 1887, and the remainder (\$50) twenty days before the meeting of 1887, when the stakes will be trotted for.

CONDITIONS. In all Stakes and Trials of speed the rules of this Association shall control. All nominations shall be in writing, in the name of the owner, addressed to J. W. Gray, Treasurer, P. O. Box 318, New York City, inclosed in a sealed envelope and plainly marked "Nomination" with a bank draft, postal order, or certified check for the amount of first payment; which envelope must bear the post mark and not later than the day upon which the stake closes. A nomination by telegraph received by the Treasurer before the hour of closing, and confirmed by a properly written entry, as above prescribed, posted not later than the following day, shall be deemed valid. The number of nominations by one owner is unlimited, but only one can start in a race. Nominations shall state name, color, marks, age and sex, whether horse, gelding or mare, and the names of the sire and dam, if known, and her sire, if known. Nominations shall follow the ownership of the horse provided notice of change of ownership shall be forthwith filed with the Secretary. All entries shall close at midnight of the day named at the office of the Treasurer, unless otherwise provided. Only horses owned or bred by members, or the get of stakes horses owned or stood by members, shall be eligible to entry. Money paid on entry in any of the Stakes opened by this Association herein ALL nominations must be made FINAL PAYMENT, and shall be regarded as forfeit to the treasury of the Association. All races to be in harness, mile heats best three in five, except for three years old and under, which are five in five, mile heats unless otherwise provided in the first announcement of the stake. If three or more horses start in a stake race, two-thirds of the stake shall be awarded to the winner, two-thirds to the second horse, and the one-third to the third horse, except otherwise provided in the published conditions of the race. If not more than two horses start, only first and second money shall be awarded, and in case of a walk over or one horse money shall be awarded, and it shall be optional with the Executive Committee whether the horse shall or shall not appear. A horse distancing the field shall only be entitled to so much of the money as the starters in the race could have won. In all races best two in three, the distance shall be eighty yards; and in all races best three in five, the distance shall be one hundred yards; except in heats wherein eight or more horses start, and therein the distance shall be one hundred and fifty yards. In all stakes for three-year-olds offered by this Association the money as the conditions required to fill, and in a stake for four-year-olds and over five nominations required to fill.

J. W. T. MALL, President.

L. D. PACKER, Secretary.

Dog Collars and Furnishings

The above sketch represents a sportsman using one of our American Hound Leashes. We claim that the snap used on this Leash is the only one of American manufacture, and the best in use for coursing. The springs being encased in a solid brass frame, it is impossible for anything to interfere with the perfect working of the snap, and it is less liable to rust and wear, than any of the snaps now in use. We are now manufacturing three different styles of the Leash, and will send them to any part of the country on receipt of price.

- No. 1 is a Flat Leather Leash... Price \$3.75
No. 2 " " Round " " machine stitched... \$4.75
No. 3 " " " " hand stitched... \$7.50

We also manufacture all styles of Dog Collars and Furnishings. Send 25cts. for our 1884 Illustrated Catalogue containing 64 pages of cuts and descriptions of

Dog Collars, Locks, Leaders, Bells, Couplings, Brushes, Blankets, and all goods pertaining to the Dog. Ask your dealers for the great Dog Soap SAPINDUS. Dealers sending for Catalogues be sure to enclose business card to insure trade discount sheet to accompany Catalogue.

Fee..... 40.00  
Address W. W. MOORE, Oakland,  
ROSS, 123 California Street, San Francisco.

**THE NEW ZEALAND Stud and Pedigree Stock Co.**

LIMITED.

AUCKLAND, NEW ZEALAND.

The objects of the NEW ZEALAND STUD AND PEDIGREE STOCK COMPANY, LIMITED, are the breeding of pure-bred Cattle, Clydesdale Horses and Sheep, and disposing of same by sale or otherwise in New Zealand, the Anstralian Colonies, San Francisco, and elsewhere.

The whole of the pedigree herds, the Clydesdale horses and sheep, are well known, and consist of first-class imported stock, judiciously selected in England by the best judges, without regard to cost, and their progeny, wherever exhibited, have secured the highest prizes.

The celebrated short-horn Bull, **DUKE OF NEWCASTLE**, was awarded First and Champion Prizes at the Intercolonial Exhibition, Sydney, for the best bull of any breed, and for which the whole of the Anstralian Colonies competed with both Imported and Colonial Bulls. This bull and many of his progeny are amongst the herd.

The Herefords are deserving of special mention. Six hundred in number, they form the largest herd of pure Herefords in the world. Their progeny have always met with a ready and remunerative sale in the Anstralian Colonies.

The Thoroughbred Horses and Clydesdales of this Company are well known throughout the Colonies and Great Britain; their equal does not exist in the Anstralian Colonies.

**Fastest Time on Record.**

**Martini-Henry**, by Musket—Sylvia, was bred by this Company and sold when a colt to the Hon. J. White for 1,250 guineas. He is now three years old, and has just achieved the wonderful feat of winning the Victorian Derby, one mile and a half (the great southern weight-for-age race), carrying 122 pounds, and beating a field of nine in 2:30, thus lowering the previous record of 2:41 1/2; and also the Melbourne Cnp, two miles, carrying 103 pounds to victory in 3:30 1/2, and beating a field of twenty-nine, thus lowering the previous best record of 3:30 3/4, by Darrivell (5 years), carrying 102 pounds, in 1879.

**Musket**—The Company have for sale some twenty-five colts (this season's) by this wonderful sire, from imported thoroughbred English mares.

During the present racing season nearly all the important two and three-year-old events in Auckland have been won by his progeny. A draft of his yearlings, which have just been disposed of in Sydney, New South Wales, realized from £150 to 1,250 guineas.

Orders entrusted to the Company will receive prompt and careful attention, the Company guaranteeing to find careful and efficient men to take charge of stock, and to insure shipments against all risks at five (5) per cent.

Any information regarding stock may be obtained on application to

THE TROTTING STALLION

SILVERHEEL

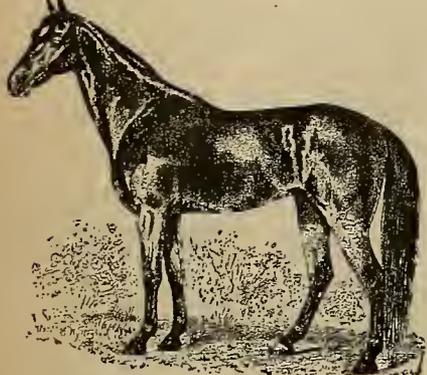

WILL MAKE THE SEASON OF 1884 AT THE DASHAWAY STABLES, 370 Eleventh street, between Franklin and Webster streets, Oakland.

TERMS.

Twenty-five dollars the season; will make terms for insurance. Season to end July 1st.

SACKBIDER & CHISHOLM.

Hambletonian Trotting Stallion

BOB MASON

By ECHO. His dam Belle Mason by Belmont, thoroughbred. Echo by Rysdyk's Hambletonian, his dam Fanny Felter by Magnolia (by American Star), Belle Mason by Belmont (Williamson's), First dam, Lucy Johnson, by the Pony (son of imported Leviathan), Second dam Catalpa, by Frank. Third dam, by John Richards.

Description.

Bob Mason is a mahogany bay, with inside of off hind ankle white and star in forehead; sixteen hands, and weighs 1,100. Foaled May 10th, 1879. He is of fine kindly disposition, a natural trotter, and has shown great speed, but as yet has no public record.

Terms.

Fifty dollars the season, payable at time of service. All mares at risk of owners. Mares not proving in foal can be returned the following season free of charge. Good pasture at \$5 per month.

CHARLES J. ELLIS, Owner. W. M. DONATHAN, Agent.

Fast Trotting Stallion

HA HA.

Ha Ha: Color Brown, 15 1/2 hands, Extra fine style. Action and form perfect. As a three-year-old, with eight weeks' handling, showed 2:23, without a skip.

Breeding.

GLT-EDGE, combining, close at hand, Hambletonian, Alexander's Abdallah, Mambrino Chief, dam by McCracken's Blackhawk, the sire of the dam of Overman. Record 2:13 1/2.

N. E. As a four-year-old, with proper handling, 2:20 or better, I would expect him to show.

FRED ARNOLD, Stockton, Cal.

Trotting Stallions

Prompter, 2305, and Privateer

Will make the season of 1884, from February 1st to July 1st, at Agricultural Park, Sacramento, at \$50 the season. Mares not proving in foal can be returned next season free of charge. Pasturage at reasonable rates. Accidents and escapes at owner's risk.

Prompter is a bright bay, star in forehead, hind ankles white, sixteen hands high, and weighs 1,140 pounds. Sired by Wilson's Blue Bull, son of Pruden's Blue Bull, by Merring's Blue Bull, dam Prairie Bird (four-year-old pacing record 2:28), and dam of Flight, five-year-old record 2:29, and three-fourths sister to dam of Pride, yearling record 2:44, and three-fourths sister to dam of Buccaneer, public trial against time 2:24, and full sister in blood to dam of Fawn, record 2:30, by Flaxtail, grandam by son of Tally Ho Morgan, great grandam by Irwin's Tuckahoe, great great grandam by Leffer's Consul.

Privateer is four years old, a beautiful brown with tan shadings, over sixteen hands high, and is by Buccaneer, son of Iowa Chief, by Green's Bashaw, dam by Marion, son of Mambrino Chief, yearling record 3:03 1/2.

For extended pedigree and further description of the above horses send for circular.

M. W. HICKS, Sacramento, Cal.

THE ELECTONEER STALLION

STANFORD

Will make the season of 1884, commencing February 1st and ending July 1st, at my stable near the Oakland Race Track.

Terms.

\$50 for the season, payable at the close of the season. No responsibility assumed beyond reasonable care.

Pedigree and Description.

Stanford was bred by George Faylor, late of San Francisco, foaled in 1879; is dark bay, no marks, 16 1/2 hands, and weighs 1,650 pounds; was sired by Electoneer, and closely resembles him in form and color; was not broken until last year; has been handled very little, but enough to show that his action is excellent and peculiar to the get of Electoneer.

First dam, Annie Laurie, by McCracken's Dave Hill, Jr., (sire of Geo. Treat, record 2:25), he by McCracken's Dave Hill, he by Red Lion, and by Vermont Black Hawk. Second dam, Kitty, by Owen Dale, son of Belmont. Dam of Dave Hill, Jr., by old St. Lawrence, grandam thoroughbred. Dam of Dave Hill by Vermont Hambletonian. Dam of Red Lion by Vermont Hambletonian.

J. J. FAIRBANKS, Agent.

Oakland, January 18, 1884.

The Trotting Stallions

DIRECTOR AND MONROE CHIEF

Oakland Trotting Park,

Commencing February 1st and ending June 1st.

TERMS.

Director \$200, Monroe Chief \$100, the season. Good pasturage for mares at reasonable rates. Due care will be taken to prevent accidents or escapes, but no responsibility assumed should any occur.

Director, 2:17.

Black horse, foaled July 18, 1877, by Dictator (sire of Jay-Eye-See, 2:10 1/2; Phallus, 2:15 1/2; first dam Dolly (dam of Thorndale, 2:22 1/2; Ontario, 2:25), by Mambrino Chief; second dam by Potomac; third dam by Saxe Wiemar. Thorndale, 2:22 1/2, is the sire of Edwin Thorne, 2:16 1/2, and Daisy Dale, 2:19 1/2.

Monroe Chief, 2:15 1-4.

Two-mile record, 4:45.

Brown horse, foaled 1870, by Jim Monroe (son of Alexander's Abdallah, he by Rysdyk's Hambletonian, first dam Madame Powell, by Bay Chief (son of Mambrino Chief); second dam by Toronto (son of St. Lawrence); third dam claimed to be of Whip stock. Poi a very lifelike portrait of Monroe Chief and a full account of his pedigree and performance, see the holiday number of the BREEDER AND SPORTSMAN, issued December 29, 1883.

For further information address

JOHN A. GOLDSBITH, OAKLAND TROTTING PARK.

The Trotting Stallion

BRIGADIER.

Record 2:21 1-4.

Bay horse, bred by R. Penniston, Philadelphia, Penn. By HAPPY MEDIUM; dam Lady Turner, by Frank Pierce, Jr. Happy Medium, by Rysdyk's Hambletonian, dam the famous old trotting mare Princess, by Andrus' Hambletonian. He has fifteen representatives in the 2:30 list. Lady Turner, by Frank Pierce, Jr., dam by a grandson of Sir Henry, son of Sir Archy, second dam by Andrew Jackson. Frank Pierce, Jr., by Frank Pierce, son of Beppo. Brigadier will make the season of 1884 from February 10th to July 1st.

Terms.

\$100 the season. Mares not proving in foal may be returned the following season free of charge. Good pasturage at \$3 per month, but no responsibility assumed for accidents or escapes. Mares shipped to Marysville consigned to me will be received and cared for on arrival of cars or boats.

J. B. McDONALD.

2:20 1-4.

The Fast-Trotting Stallion

ANTEEO.

Dark bay colt, near hind foot white; foaled May 6th, 1879; bred by Jos. Cairn Simpson, Oakland, California.

By ELECTIONEER. First dam, Columbia, by A. W. Richmond. Second dam, Columbia, by imp. Bonnie Scotland. Third dam, Young Fashion, by imp. Monarch. Fourth dam, Fashion, by imp. Trustee. Fifth dam, Bonnets of Blue, by Sir Charles. Sixth dam, Reality, by Sir Archy. Seventh dam, by imp. Medley. Eighth dam, by imp. Centinel. Ninth dam, by Mark Anthony. Tenth dam, by imp. James. Eleventh dam, by imp. Monkey. Twelfth dam, by imp. Silvereye. Thirteenth dam, by Spanker. See Bruce's American Stud Book, vol. 1, p. 307, and vol. 3, p. 79.

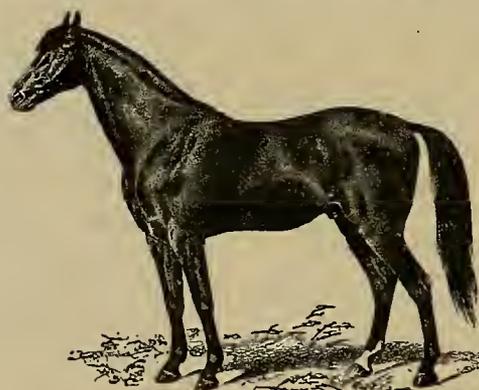

Will make the coming season, from February 10th to June 15th, 1884, at the Fair Grounds at Santa Rosa.

TERMS.

\$100 the season. Mares kept in any manner their owners desire, and at reasonable rates, but no responsibility for escapes or accidents. Anteeo ranks as one of the great trotting colts of the United States, well worthy of the family to which he belongs. His breeding is of the choicest, and in point of form he is as nearly the model of the trotter as any horse living. He has shown a mile in 2:20, and at the same time demonstrated that he was capable of trotting way down in the teens.

For further particulars address,

M. ROLLINS, Agent, Santa Rosa.

MAMBRINO WILKES.

BLACK STALLION, SIXTEEN HANDS IN HEIGHT, by GEORGE WILKES, son of Rysdyk's Hambletonian, bred by B. J. Treacy of Fayette County, Kentucky. Dam Lady Christina by Toddhunter's Mambrino, son of Mambrino Chief, second dam by Pilot, Jr. Toddhunter's Mambrino son of Mambrino Chief, his dam Ripton's dam by Potomac.

This is the largest and one of the best colts of George Wilkes (weighing 1,250 pounds), combining the Hambletonian and Mambrino strains, and also several thoroughbred crosses. His colts demonstrate that he possesses in an eminent degree the same faculty of transmitting the family qualities to his offspring which put George Wilkes in the front rank as a sire of trotters.

George Wilkes has 27 representatives in the 2:30 list, of which 14 have records of 2:25 or better, 5 of 2:20 or better, and 3 of 2:18 or better. These are all the get of Geo. Wilkes, and do not include Phil Thompson, William H., and other famous grandsons and granddaughters of this prepotent sire.

Will make the coming season, commencing February 1st, 1884, at the Dew stable, STOCKTON, and L. M. Moore's near LODI.

TERMS.

\$40 for the season, or \$25 single service. This low rate brings the service of this horse within reach of breeders, but does not argue any inferiority to the horses whose services are held at One or Two Hundred Dollars. For further particulars address

A. L. BUNDS, Agent.

The Trotting Stallion

STEINWAY,

With two-year-old record, third heat, of 2:31, and three-year-old record, fourth heat, of 2:25.

Terms.

He will serve mares the present season, commencing February 1st and ending July 1st, 1884, at the

Cook Stock Farm, Danville, Contra Costa County.

At \$100 for the season, payable invariably before the animal is removed. Mares not proving in foal can be returned free the next season. Pasturage \$5 per month, but no liability for accidents or escapes. Mares sent in care of McCleverty & Noblett, Fashion Stable, Oakland, or of S. J. Bennett, Martinez, or D. S. Smalley's Stable, Hayward, will be forwarded immediately to the farm.

Description.

He is a bay, 15 1/2 hands high, weighing 1,175 pounds, long flowing main and tail, two white hind ankles, remarkable style and lofty carriage; has a good, resolute head set on a stout neck; his shoulders do not mount very high on the withers. He has great length and a capacious middle piece, plenty of bone and substance; his gait is big and square; his disposition is the very best.

Pedigree.

Steinway, by Strathmore; first dam Abbess, by Albion, the sire of Vanity Fair, record 2:24; second dam by Marshall Key, by imported Emancipation; third dam by Bertrand, he by Sir Archy; Albion by Halcyon, a pacer; he by Virginian, a son of Sir Archy; Steinway's dam is the dam of Solo, five-year-old record 2:28, and Nannie Smith, the dam of C. M. Clay, two-year-old record 2:31, winning the two-year-old stake at Lexington last fall, beating the Palo Alto colt and others. Solo and Nannie Smith are full sisters to Steinway. Steinway's dam is also the dam of W. S. Buckner's colt Currency, that trotted as a yearling, the fall of 1882, in 2:46. See New York "Spirit of the Times" of November 18th, and "Turf, Field and Game" November 18th, 1882. Strathmore is the sire of Santa Claus, 2:17; and Tucker, 2:19; Chestnut Hill, 2:22; Alice Stoner, 2:24; Steinway, three-year-old, 2:25; Nannie Talbert, five-year-old, 2:27; Solo, five-year-old, 2:28; Monitor, 2:24; Henderson, 2:26; Strathlan, three-year-old, 2:29; and Stuart, three-year-old, 2:28. Stuart is full brother to Belnor, who trotted a mile in 2:52; at fifteen months old. Bedford trotted in the two-year-old stake at Lexington last fall, was timed the second heat in 2:32; is by Strathmore also. Strathmore, by Rysdyk's Hambletonian, the sire of Dexter, 2:17; first dam by North American, the sire of Whitehall, he the sire of Rhode Island, record 2:33; and he in turn got Governor Sprague, record 2:24; and he got Kate Sprague, record 2:18. The dam of Scott's Thomas, record 2:21, and Scott's Chief, record 2:23, was by Whitehall; also North American, by Sir Walter; he by Hickory, sire imported Whip; North American's dam is a pacer. Strathmore's second dam is by Harris' Hambletonian, he by Bishop's Hambletonian, he by imported Messenger.

Performances.

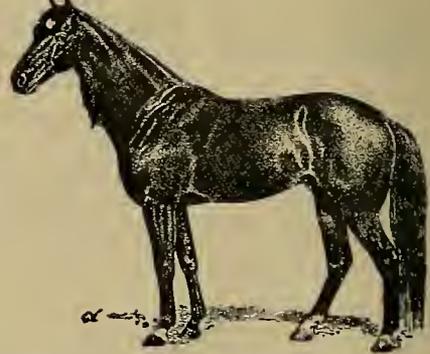

Steinway has trotted four races; at two years old he won the Lexington stake, mile heats, beating Memento, Jewett, Verbea, Admiration, Mystery, in 2:39; 2:32, 2:31. Memento won the first heat. As three-year-old, at Sharpsbury, Ky., August 6th, 1879, over a miserable half-mile track, he beat Bushwhacker, record 2:27, and Blackwood, Jr., record 2:22, in four heats, 2:28, 2:37, 2:37, 2:35. Bushwhacker winning second heat. At Lexington, August 16th, 1879, he trotted six heats, 2:38, 2:35, 2:30, 2:25, 2:30, 2:30; Steinway winning fourth, fifth and sixth heats, beating Jewett, Catchy and two others. At the fall meeting of the Horse Breeders' Association for the Kentucky Stakes for three-year-olds he was beaten in three heats by Jewett, in 2:26, 2:23, 2:26; but Steinway was lame in this race, and really not in fit condition to start; he was timed second, in 2:27, 2:23, 2:27.

Address

GEORGE WILEY,

Cook Farm, Danville, Contra Costa Co., Cal.

THE TROTTING STALLIONS

SINGLETON AND LA HARPE.

WILL MAKE THE COMING SEASON FROM FEBRUARY 1ST TO JULY 15TH, 1884, at the farm of the owner, three miles north of Chico, Butte Co., Cal. Singleton is a dark brown horse, with tan flanks and muzzle, a little touch of white on hind feet and left fore foot, small star in forehead. Is 15 1/2 hands high, and weighs 1,120 lbs. Was bred by Dr. M. W. Hicks, and foaled in the spring of 1878.

PEDIGREE.

Singleton is by Willie Schepper, he by Rysdyk's Hambletonian, by Abdallah, by Mambrino, by imp. Messenger. Schepper's dam Nellie by son of Vermont Black Hawk, grand dam by Busiris, thoroughbred (No. 373). Singleton's dam was Lightfoot (dam of Pride, yearling record 2:43) by Flaxtail, son of Pruden's Blue Bull. Lightfoot's dam was Fanny Fern, by Irwin's Tuckahoe, grandam by Leffer's Consul, by Shepperd's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

TERMS:

For Singleton, fifty (\$50) dollars the season. Mares not proving in foal may be returned the following season free of charge.

La Harpe will stand at twenty-five (\$25) dollars the season, cash. Mares sent to the ranch to either horse will be kept one month free of pasturage. Further pasturage will be charged three (\$3) dollars per month. Mares shipped to Chico consigned to me, will be received on arrival of train, and taken to the ranch. Mares kept in any manner owners may desire at reasonable rates. There is every convenience on the farm, boxes, paddocks, and plenty of shade and water. Address

J. T. McINTOSH, Box 60, Chico, Cal.

LA HARPE

Is a bronze bay, two white stockings behind and star, 16 hands high, and very powerfully built, weight, 1,180 lbs. Was bred by Dr. Hicks, and foaled in 1878. La Harpe was sired by Fanny, he by Alexander's Belmont (sire of Nantwood), he by Alexander's Abdallah (sire of Goldsmith Maid), he by Rysdyk's Hambletonian, he by Abdallah, he by Mambrino, he by imp. Messenger. Fanny's dam Glory by Jackson's Western Star, (son of Platt's Western Star by Blacknose), 1st dam by Bonner's, 2nd dam by Gallatin (481). La Harpe's dam Prairie Bird by Flaxtail (dam of Flight, 2:25, and Prompter, 2:38), 2nd dam Fashion, by John the Baptist. 3rd dam Fanny Fern, by Irwin's Tuckahoe. 4th dam by Leffer's Consul. Irwin's Tuckahoe was by Herod's Tuckahoe, by thoroughbred Tuckahoe, by Florizel, by Diomed.

**LITTLE'S SHEEP DIP**  
 CHEMICAL FLUID  
 Price Reduced to  
**\$1.25 Per Gallon.**

Twenty gallons of fluid mixed with cold water will make 1,200 gallons of Dip. It is superior to all Dips and Dressings for SCAB in Sheep; is certain in effect; is easily mixed, and is applied in a cold state. Unlike sulphur or tobacco, or other poisonous Dips, it increases the growth of the wool, stimulates the fleece, and greatly adds to the yield. It destroys all vermin. It is efficacious for almost every disease (internal and external) sheep are subject to.

**Sportsmen & Pleasure-Seekers.**

**SOUTHERN PACIFIC R. R. CO.**  
 RESPECTFULLY CALLS ATTENTION TO THE

**SUPERIOR FACILITIES**  
 AFFORDED BY ITS LINE FOR REACHING THE State for **Sea Bathing, Shooting and Fishing.**

TRAINS LEAVE SAN FRANCISCO DAILY FOR  
**MONTEREY,**

THE MOST CHARMING  
**Summer and Winter Resort of the Pacific Coast,**  
 with its beautiful Groves and delightful Drives. Trout in large quantities can be obtained from the several streams in the vicinity of Monterey, and the best of shooting may be had in season.

**THE BAY OF MONTEREY**  
 Is noted for the extent and variety of fish which abound in its waters, notably Salmon, Rock Cod, Baracuda, Pompano, Spanish Mackerel, and Flounder. The above-mentioned attractions, in connection with the low rates of fare, rapid transit, and the superior accommodations furnished at the "HOTEL DEL MONTE," have made Monterey a paradise for sportsmen.

**THE BATHING FACILITIES**  
 AT THE  
**"HOTEL DEL MONTE,"**  
 ARE UNSURPASSED,  
 having a MAGNIFICENT BEACH of pure white sand for surf bathing.

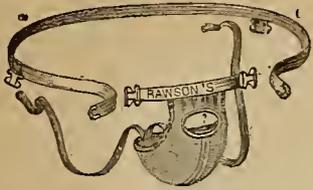

**THE BATH-HOUSE**  
 contains  
**SPACIOUS SWIMMING TANKS**  
 (50x50 feet) for warm salt water plunge and swimming baths, with  
**ELEGANT ROOMS**  
 connecting for individual baths, with douche and shower facilities.

THE FAVORITE ROUTE to those well-known Watering Places,  
**APTOS, SOQUEL AND SANTA CRUZ,**  
 IS VIA THE  
**Southern Pacific Railroad,**  
 (Broad Gauge).  
 The S. P. R. R. runs through the counties of San Mateo, Santa Clara, San Benito, Santa Cruz and Monterey, in each of which game abounds in great variety, notably

**Quail, Pigeon, Snipe, Duck, Geese, Deer and Bear.**  
 Lakes PILARCITOS and SAN ANDREAS are reached by this line. Stages connect with trains daily at San Mateo for those well-known Resorts, PURISIMA, SAN GREGORIO and PESCADERO. We would particularly call attention to the unlimited excitement and amusement about SAN BRUNO and McMAHON'S RIFLE PRACTICE.

These resorts are but a short distance from San Francisco and offer special inducements to the lovers of this manly sport.  
**SPECIAL NOTICE.**  
 Sportsmen and others presenting Passage Tickets will be entitled to **FREE TRANSPORTATION OF THEIR DOGS** when carried in Baggage Cars and put in charge of Train Baggage-men. Train Baggage-men are instructed to issue CHECKS for all dogs received in Baggage Cars.  
 In order to guard against accidents to Dogs while in transit, it is necessary that they be provided with COLLAR AND CHAIN, Guns and Fishing Tackle to be carried free of charge. Guns taken apart and securely packed in wood or leather cases may be taken in Passenger Cars.  
 TICKET OFFICES. - Passenger Depot, Townsend street, Valencia Station, and No. 613 Market Hotel.  
**A. C. BASSETT,** Superintendent.  
**H. R. JUDAH,** Asst. Pass. and Tkt. Agt.

**RAWSON'S (Self-Adjusting) U. S. ARMY Y 171 Sprung Knees**

**Suspensory Bandages.**

A perfect fit guaranteed. Support, Relief, Comfort. Automatically Adjustable.

**DISPLACEMENT IMPOSSIBLE.**

Treatise on Nervous Tension and Circular mailed free. Sold by Druggists. S. E. G. RAWSON. Sent by mail safely. Patenteé, Saratoga Springs, N.Y.

**RUPTURE**

Absolutely cured in 30 to 50 days, by Dr. Pierce's Patent Magnetic Elastic Truss. Warranted the only Electric Truss in the world. Entirely different from all others. Perfect Retainer, and is worn with ease and comfort night and day. Cured the renowned Dr. J. S. Sims of New York, and hundreds of others. New Illustrated pamphlet free, containing full information. **MAGNETIC ELASTIC TRUSS COMPANY.** 704 Sacramento St. San Francisco, Cal

**Cockled-Ankles**

Permanently cured by using **SPARKHALL'S SPECIFIC.** Which does not blister nor interfere with the horse's work. It strengthens the joints and tendons, restoring the limbs to their normal condition. Has cured many cases of chronic lameness and muscular rheumatism after other treatment had failed.

**Testimonials:**

From O. A. Hickok, Esq., San Francisco, Cal., June 8, 1881. I can with confidence recommend Sparkhall's Specific to any one owning a knee-sprung or cockled-ankled horse, being fully convinced that it will cure those deformities without injury to the animal. O. A. HICKOK.

From Hon. C. M. Pond, Breeder of the celebrated trotter "Clingstone," Hartford, Conn., March 23, 1882. This may certify that I have used Sparkhall's Specific in my stables, and consider it an extraordinary remedy, accomplishing in most cases all that is claimed for it. C. M. POND.

The Specific is sold in quart bottles—price, \$2.00, by **WAKELEE & CO.,** Montgomery and Bush Sts., under Occidental Hotel, San Francisco.

**FAIRLAWN, 1884.**

**TENTH ANNUAL CATALOGUE**

Now ready for distribution. Contains descriptions and pedigrees of 252 head of High-Bred Trotting Stock now at Fairlawn. Will be sent free to all applicants who enclose 3 cents in stamps to prepay postage.

**25 HIGHLY-BRED BROOD-MARES,**

Bred to the Fairlawn Stallions, and

**130 HEAD OF VERY PROMISING YOUNG STOCK,**

Consisting of Young Stallions, Fillies and Roadsters, are offered at *Private Sale.*

**THE ONE PRICE PLAN** Is strictly adhered to at Fairlawn, and the price of every animal for sale is printed in the catalogue. Purchasers from a distance can buy on orders at exactly the same prices as if present in person. All stock sold on orders can be returned if they do not come fully up to the descriptions given.

The Stallions in use at Fairlawn are

**ALMONT 33.**

Represented in the 2:30 list by 24 performers, with records ranging from 2:15½ to 2:30. Limited to 20 approved mares at \$300 the season.

**HAPPY MEDIUM 400.**

Sire of 18 performers with records of 2:30 or better. Limited to 25 mares at \$150 the season.

**ABERDEEN 27.**

Having ten of his get with records ranging from 2:15½ to 2:27½. Limited to 40 mares at \$150 the season.

**ALECTO 2548.**

By Almont, out of Violet, by Rysdyk's Hambletonian. Limited to 30 mares at \$50 the season.

**STARMONT 1526.**

By Almont, out of Starling, by George Wilkes. Limited to 50 mares at \$50 the season.

Ethan Allen, Jr., 473, used as a Private Stallion.

The Fairlawn Stallions in 1883 had eight new ones of their get to make records of 2:30 or better, and three new ones to enter the 2:30 list. The sons of each of these stallions are siring trotters. Almont has six different sons that have sired 2:30 trotters. Mares failing to get with foal can be returned in 1885 free of charge. **ASHLAND PARK TROTTER STUD**

NEAR LEXINGTON, KY.

B. J. TREACY, PROPRIETOR.

THIS IS STRICTLY A BREEDING FARM, FOR though training is done, it is only for the stock belonging to the place, or those purchased from the proprietor. The proprietor of Ashland Park has no pet trotting family; his aim is to secure and have at all times for sale choice representatives of each of the leading families, these being the Hambletonians, Mambrino Chiefs, Clays, Pilots, Black Hawks. At Ashland Park may now be seen splendid specimens of the get of such stallions as George Wilkes, Almont, Mambrino Patchen, Clark Chief, Edwin Forrest, Blackwood, Sentinel, American Clay, Administrator, North Star Mambrino, Bourbon Chief, Regular, Balsora, Howard's Mambrino and Homer. The steady aim is to possess nothing that does not trace through the best class of speed-producing trotting crosses, along all the blood lines, right to the thoroughbred. For catalogues or further particulars address 2-17yl **B. J. TREACY,** Lexington, Ky.

**KERR'S ASTHMA CURE**

Cures Asthma, Bronchitis, Throat and Lung affections, Coughs, Colds, Quinzy, Sore Throat, Soreness in the Chest or Lungs, Weakness in the Back, Pains in the Back, Bowels, Sides, Colic, Croup, Pneumonia, Measels, Whooping Cough and Indigestion. It heals the entire system. Pleasant tasted as ice cream. For sale by all druggists. Price, 50 cents and \$1.00 per bottle. Post-office box 1870.

## ATHLETICS.

### Nemean Athletic Exhibition—A fine Programme and a Large Audience.

The third annual exhibition of this club took place Friday evening, April 18th, at the club rooms, Twenty-first and Howard streets. It must have been extremely gratifying to the club members, and particularly the gentlemen who worked so indefatigably, to notice such a large and enthusiastic audience present to witness their efforts. The programme opened with groupings and pyramid ladders, in which the following club members participated, viz.: Wm. Elder, Geo. Nachtrieb, J. H. Donlon, H. F. Marsh, Jr., W. E. Nechtrieb, George Dey, C. T. Morrison, C. H. Miller, W. M. Meeker, W. Day, F. C. Morgan, S. Silverstone, G. Grabill, and J. O. McKown. The horizontal bar performance by C. J. Shuster, C. Shuster, J. Gerhutt, R. T. Stombs, and S. Silverstone gained much applause. Hiram Cook's club swinging was as usual very good. The following members gave an exhibition on the parallel bars, C. T. Morrison, W. M. Meeker, Geo. Nechtrieb, W. E. Nachtrieb, Wm. Elder and S. Silverstone. The clown act by R. T. Stombs and J. Gerhutt caused a great deal of amusement. Ches. W. Spregue, W. H. Cook and Hiram Cook next gave an exhibition with the hieceptor. The tumbling antics indulged in did not add effect to the exhibition. R. T. Stombs and J. Gerhutt then gave an exhibition of acrobatic feats, which were not up to their generally high standard. The boxing by T. McCord and W. S. Arnold was very spirited, but the former gentleman showing a very slight advantage. The smallness of the stage interfered with the success of the tug-of-war. The songs and recitations interspersed throughout the programme were all capably rendered, and the flag swinging of the young ladies of the Turn-Verein showed excellent training. The Nemean Club have splendid material, and it is to be hoped that some of them will compete in the next Olympic sport.

### Cross-Country Run.

Everything connected with the run to be held under the auspices of the Merion Club is progressing favorably. The following gentlemen have already consented to take part, viz.: W. R. Stewart, Fell Day, B. A. Benjamin, C. B. Hill, L. G. Burnett, T. Davidson, T. Jennings, C. Creighton, E. B. Deane, R. B. Jones, Falkenstein, Bancroft, F. Mathieu and A. B. Tennant. The ground has not yet been decided on, but the run will most probably take place at Berkeley. We will give our readers every particular next week. The following paragraph concerning this exercise, clipped from the Christmas number of the *N. Y. Spirit of the Times*, will be of interest to a great many.

"Hare and Hounds, or paper-chasing, as now played in this country by the New York Hare and Hounds and American Club Harriers, is, in our judgment, one of the most enjoyable and invigorating forms of exercise introduced. It is a manly sport and a most paternal one, as the competitive element is wanting. Instead of being pitted against each other, the 'harriers' enjoy companionship. It requires little or no training, and the exercise, while vigorous, is not so severe as to exhaust the energies or to impair the vital organism. Its surroundings are ever changing and often picturesque, thus the eye and mind are diverted and pleased, the muscles strengthened, and the blood assisted in circulation and purified. In short, we have no hesitation in prescribing it to our friends as the best medicine for improving a delicate constitution and preserving a strong one."

B. Nickles and C. L. O'Malley, both members of the London Athletic Club, and generally acknowledged as good all-round athletes, recently contended in a walking match, fair, heel and toe, from Westminster Bridge, London, to the Pavilion, at Brighton, a distance of 5½ miles. O'Malley who received half an hour start covered the distance in 9 hours 48 minutes, and Nickles in 10 hours 8 minutes.

A foot-ball match will take place next Thursday afternoon on the ground at the corner of Sutter and Pierce streets, between the High School Football Club and the Urhau Academy Football team. Both teams are sanguine of success, and a most spirited game will be the result. Game called at 2:30 sharp.

At Melbourne, Australia, on March 17th, O'Brien was unsuccessful in the attempt to lower the ten-mile record. He made the first five miles in 26 minutes 10 seconds, and finished the ten miles in 55 minutes 45½ seconds.

### Kittleman Victorious.

The 75-yard race, best two out of three, between the celebrated sprinters Fred Harmon of New Brunswick, and M. K. Kittleman of Kansas, for \$1,000 a side, took place at the Oakland Trotting Park last Sunday afternoon, before a large number of spectators. Kittleman was a heavy favorite. The first heat was captured by Harmon. There were a large number of timers, none of whom, however, were official, consequently every one gave out a different time. An experienced timer caught 8 seconds which we believe to be nearest the mark. Kittleman captured the second heat, the watches showing 7½ secs. and 7 4-5 secs. The final heat also fell to Kittleman, the watches again showing 7½ and 7 4-5 seconds. The track was altogether too soft for fast time. The starting was by mutual consent. The special commissioner, sent over by the *Chronicle*, announced in the paper next morning that the time for the first heat was 7½ seconds, and that half the distance (37½ yards) was made in 3½ seconds. It is about time for the sporting editor of the *Chronicle* to see that a little common sense is displayed by their reporter in the description of a foot-race.

### Myers not a Professional.

The committee of the National Amateur Association declare him to be an amateur.

The charges made by James Watson that L. E. Myers, the champion short distance runner, was not an amateur, were deposited by the committee of the National Association of Amateur Athletes, on the night of April 15th, in this manner: Resolved, that upon all the charges made against Mr. L. E. Myers, and all the testimony submitted in support of the charges, the opinion of the committee is that Mr. Myers has not violated the definition of an amateur, as adopted by this National Association of Amateur Athletes of America, and is an amateur: Gilbert H. Badeau, president; Geo. W. Carr, pre. M. A. C.; A. H. Curtis, N. Y. A. C.; E. Van Tamhacht, A. A. C.; J. W. Edwards, S. I. A. C.; J. W. Wainwright, inter-collegiate, A. C.

### Extortion.

Every person running or exercising at the Recreation Grounds, is now charged 25 cts. for that privilege on every occasion, or, we understand, regular monthly arrangements can be made by applying at the business office in the bar room. This new arrangement of extorting money out of the runners is in perfect keeping with the management, but we advise all who are compelled to use the grounds not to pay this money, as we believe they cannot legally charge any one for the use of the ground; and again we propose to thoroughly investigate the whole business and will give our readers the result next week. The ground is rapidly becoming a pasturage for goats.

Kenney and McIndoe are matched to swim for the championship of Australia, at the three distances—one-fourth, one-half and one mile, for \$500 a side. From our latest exchanges from Australia we glean the fact that Kenney won the first event in 6 minutes 33½ seconds. Kenney is not quite eighteen years old.

An athletic exhibition will take place at the Gymnasium of the Young Men's Christian Association, next Tuesday Evening, April 29th. Complimentary tickets, for young men only, can be secured on application of the office.

A grand National Swimming Tournament is talked of for Cincinnati this summer. A great many prominent swimmers have already consented to participate.

An athletic club is about to be organized at Victoria, B. C. Victorian athletes are fortunate in having such a fine ground as Beacon Hill Park.

All the leading Tennis players in America are expected to take part in the tournament to be held on May 16th and 17th at New York.

Professor Miller announces in the Melbourne *Sportsman* that he will start for San Francisco, on May 22d, on the Zealandia.

Leonatue broke down in his right fore leg while exercising on the track at Louisville, Kentucky, April 2d, and will now be retired to the stud. It was a renewal of the injury he received at Mounouth Park last summer, and it is thought that he cannot recover from it. He won the Kentucky Derby last season with ease, after which \$20,000 was refused for him. He was entered for some of the coming races and had many friends who were willing to stake their wealth on his ability.

## CRICKET.

### Gentlemen of Philadelphia.

#### Fixtures.

- June 10—Philadelphia vs. Ireland, at Dublin.
- " 12—Philadelphia vs. Dublin University, at Dublin.
- " 16—Philadelphia vs. Marylebone Club, et Lord's.
- " 20—Philadelphia vs. Cheshershire, at Stockport.
- " 23—Philadelphia vs. Leicester, et Leicester.
- " 27—Philadelphia vs. Hampshire, at Southampton.
- " 30—Philadelphia vs. Gloucestershire, at Cheltenham.
- July 2—Philadelphia vs. Somersetshire, et Lenedowne.
- " 4—Philadelphia vs. Castleton Cricket Club, at Rochdale.
- " 7—Philadelphia vs. Liverpool, at Liverpool.
- " 10—Philadelphia vs. Northumberland, at Newcastle.
- " 14—Philadelphia vs. Derbyshire, at Derby.
- " 17—Philadelphia vs. Surrey, et the Oval.
- " 21—Philadelphia vs. Sussex, at Brighton.
- " 25—Philadelphia vs. Kent, at Maidstone.

The above fixtures have been arranged for the gentlemen of Philadelphia who are shortly to leave for Great Britain. The following native-born Philadelphians have been selected to represent that great American cricketing centre, viz.: Young American Cricket Club—Chas. Newhall, Robert S. Newhall, Howard MacNutt, Hazen Brown, Francis E. Brewster, E. W. Clark, Jr. Merion Cricket Club—John B. Theyer, Sutherland Law, W. C. Lowry, Joseph N. Fox, Belmont Cricket Club—David P. Stoevei, J. Allison Sott. Two more gentlemen are to be included in the list, but the vacancy will be left open a little while longer in the hope that Dan Newhall and Wm. Brockie will yet be able to accompany the team. Robert S. Newhall has been selected as captain, and the team have been of late doing plenty of work. The second week in May the team will engage in a match with an All-New-York Eleven, to be selected by Cyril Wilson. A great many ladies and gentlemen will accompany the team throughout the tour, and as the matches have all been arranged by the M. C. C. of England, there will be a great amount of pleasure and enjoyment connected with the trip. This is the first cricket team ever to visit England from the U. S. The matches arranged will be a fair test for our cricketers, and we think the constant playing together that the Philadelphians will make a very creditable showing. International cricket matches have been played in America with the following teams: Geo. Parr's professional team in 1859; Willishe's professional team, 1868; W. G. Grace's amateur team in 1872; Australian cricket team 1878; amateur team, captained by Lord Harris; Dal's professional team, and a team of Irish gentlemen visited us in 1879. Sham's professional team in 1881, and the Australian Eleven in 1882.

### South Australia vs. Victoria

South Australia, 1st inning.....	334	Victoria, 1st inning.....	285
" 2d " " " " " " "	319	" 2d " " " " " " "	6 wks. for 369
	653		654

Won by Victoria by 1 run with 4 wickets to spare. Trinick 109; W. Giffen 89, and Jarvis 91, were the chief scorers.

In the "sporting column" of the *Daily Examiner*, there have frequently appeared wild statements, to the effect that the Merion Cricket Club were engaged in cricket matches with players among whom were noticed the names of prize-fighters, etc. The officers of the club have requested us to deny these statements, as well as certain other remarks re local cricket, and we would suggest that the gentleman having charge of this column should exercise some care in the compilation of his notes, so that they should have at least some little veracity.

During the Combination Sale, at Portland, Oregon, last week, a fine game old sorrel mare with a blaze and some white feet, was led into the ring. Mr. Richardson, the auctioneer, raised himself up, it seemed to us, a foot higher than usual when he said, "Gentlemen, this mare is by Old George out of the dam of Big Gun." This makes her a full sister to Big Gun, the dam of Jim Renwick. The crowd rushed up around the old mare as though the dead had been brought to life. Just how old this descendant of Old George is no one knows, but in many respect she is young and blood-like. Her purchaser, E. J. Dawne, of Salem, will breed her to a thoroughbred horse. The *Rural Spirit* suggests that she be sent to Joe Hooker.

## TURF AND TRACK.

## Recollections of Sim Templeman—Ghosts of Dead Turf Scandals.

Sixty-five years have passed away since a raw country lad of fourteen was first tossed into the saddle, with a silken jacket upon his back, to ride old Sykes' bay mare Unity at Malton and Grimshy. His seat was as bad in 1819 as it remained nearly thirty years later, when he accomplished the extraordinary and unparalleled feat of riding two Derby winners and two Oak winners—Cossack and Miami. Surplice and Cymba—in 1847 and 1848; but, despite the niggling and inartistic finish for which he was always renowned, Sim Templeman was gifted with that delicate touch upon the bridle which constitutes what is called a perfect hand. It was proudly said by Edmund Keen, the greatest actor that these islands have hitherto produced, that when he gained his greatest laurels in the character of King Richard III, "the pit rose at him." In those days the lords paramount of the stage cared little for the verdict of "the gods" or the dress circle, so long as the occupants of the pit—then almost entirely uninvaded by the encroaching stalls—were pleased with the performance. Of no race in which Sim Templeman came in first could it ever have been said with truth that the spectators of his triumph "rose at him" with an outburst of spontaneous applause. His finish was so ungraceful and jerky that it resembled the action of an old woman with a pump handle in her grasp. Old Tom Taylor, who was for many years trainer to Lord Chesterfield the magnificent, and whose son, Alec Taylor, still prepares horses for their engagements with no ordinary skill and experience at Manton, in Wiltshire, used to grant like a wild hog transfixed by "the spear of honor" upon the dusty plains of torrid Hindostan when he saw Sim Templeman upon the hack of a horse turned out from the Breyby stable. Not dissimilar were the emotions of the still living and ever-green trainer, John Kent, when he saw Sim Templeman entrusted by Lord Clifden and Mr. Francis Villiers with the atterage of Surplice for the Derby of 1848. Yet it was the happy portion of Sim Templeman that he realized the words often employed by the original founder of the house of Rothschild, "It is better to be born lucky than rich." The hero of a thousand victories in the saddle never was a good jockey, but, nevertheless, the "good thing" was in the habit of coming off when it depended upon his manipulation of the reins.

It has often been debated among turf veterans whether there is any—perhaps we ought to say, to what extent there is—truth in the oft repeated allegation that the Derby has again and again been won by horses which were more than three years old. Be this as it may, there can be no sort of doubt that the oral tradition of the race-course (which is handed down from father to son, and repeated when all chances of authoritative verification or contradiction lie hurried in the grave with the putative authors of some successful turf robbery) has always credited the winner of the Derby in 1839 with having had one, perhaps two years, in hand when he first went post the winning post with Sim Templeman upon his back. The history of Mr. William Ridsdale's bay colt Bloomshury, by Tramp or Mulatto out of St. Giles' dam, will forever lie shrouded from our gaze by that impenetrable veil of mystery which also conceals from our time the story of his brother or half brother, St. Giles, who won the Derby for John Gully and his confederate Robert Ridsdale, in 1832, with Bill Scott in the saddle; and which permits us—without quoting other more recent instances of suspected fraud—we know nothing as to the true causes which made the incomparable Plenipotentiary—one of the best horses of the century—unable to raise a gallop at Doncaster in 1844 upon the St. Leger day. There is, perhaps, no other field of human enterprise, pursuit, and speculation in connection with which there is so much difference between its written and its unwritten history as in the case of the turf. Those who have been lovers of horse-racing for forty or fifty years, and during the whole of that time have been able to enjoy, or at any rate to occupy, a position which enabled them always to get behind the scenes, will be little likely to deny that the villainy and roguishness, from which horse-racing can never hope to be entirely emancipated, are, in nine cases out of ten, perpetrated through the agency of jockeys. Far be it from us to insinuate that frauds are originated and conceived by those abridgements of man who are able to go to the scale at various weights ranging from 122 pounds to half that amount of avoirdupois. To say the truth jockeys are by education, training and experience, altogether unfitted for embarking upon those intricate and occult conspiracies which owe their origin undoubtedly to keener, wariar, and more secretive brains. Between such masters of fineness and intrigue as the John Gully whom Mr. Charles Greville has sketched for us in undying characters, and the jockeys whom he controlled, there is no more analogy between a great captain, like Napoleon or Wellington, and the simple soldiers whom he launches like thunderbolts into the field. What deep-seated plots, what slippery manoeuvres, what complicated conspiracies might not the history of horse-racing reveal; if the pen which traced it were in the unmasking hand of one who writes down all that he knew *avec connaissance de cause*. Rarely is the opportunity afforded to a heavy backer of horses of learning the true story of some great race upon which, twenty or thirty years before, he may have lost his thousands. When, however, such opportunities do occur, and when tongues are unlocked and no secrets are hid, a backer of this kind will generally discover that he has to thank some jockey, whose strings were pulled by one or more skillful manipulators in the background, for some irretrievable loss, which has perhaps altered the course and shape of his whole future life.

Fifty years ago there can be no doubt the "Derbys by arrangement" were far more common than is now the case. We have no desire to engage in an unprofitable discussion upon the question whether the turf between 1800 and 1840 was purer or less pure than the turf between 1840 and 1880. In all probability there is not much difference, as regards general integrity, between the two epochs. "Ubi pecunia, ibi dolus," said the old Roman satirist; and so long as the nature of man remains unchanged—that is to say, so long as the world lasts—fraud and intrigue will prevail where money is to be won by them. In the meantime, it should not be forgotten that, when Sim Templeman, Sam Chifney, Bill Scott, Harry Edwards, Tommy Lye, Jem Robinson, Sam and John Day, and Job Marson filled the same position which is now held by their modern successors, there was no fierce light of publicity and of instantaneous knowledge of race-course poured upon their performances in the saddle.

Robert Ridsdale—whose death in a garret at Newmarket, with three half-pence in his pocket, Matthew Dawson and Judge Clark can well recall—was, in his time, no ordinary man. Originally a groom—or, as some have incorrectly alleged, a footman—in the employ of the grandfather of the present Earl of Durham. Bob Ridsdale was, from about

1825 to 1835, the man of the greatest weight upon the British turf—of still greater weight, in fact, than those two aristocratic worthies the Duke of Leeds and the Hon. Edward Petre, whom the famous caricaturist "H. B." has immortalized in a well-remembered sketch. There are those still living at York and in its neighborhood—among whom we may name Mr. Rudston Read, "Billy Williamson," and Col. George Thompson—who can remember the princely establishment maintained by Robert Ridsdale in his palmy days at Merton, near the northern turf metropolis. A well-known description of his refined and luxurious home appeared in the "Bye-Lanes and Downs of England," by "Sylvenus," and men born in that deviner ether which is supposed to be hreathed by the upper ten thousand have often been heard to avow, that no host resident in a country famed for its hospitality knew better how to entertain and make his guests comfortable than this quondam groom. The finest wines, the most exceptional cuisine, and rooms elaborately and even splendidly furnished, testified to that inborn good taste which made Bob Ridsdale a conspicuous pattern—a man, in abort, whom his superiors in rank did not disdain to imitate at home and in the hunting field. Major Yarborough, an old English gentleman of the Sir Roger de Coverley type, left it on record that he had seen nothing more comfortable and more elegant than Ridsdale's house at Merton. The grounds and stables which encompassed it were all *en suite*. A noble stud of hunters occupied the boxes, and it was generally admitted that no man rode better or more like a gentleman at the tail of the streaming bounds than this unpretending owner. His taste in dress was faultless, and his manner natural and unassuming. Beyond the garden stretched the paddocks, in which more than one hundred head of the finest thoroughbred mares were installed. Such was Robert Ridsdale in the years immediately subsequent to the victory of St. Giles for the Derby of 1832.

Unfortunately, it was soon found to be necessary that no year should come round without bringing a race with it in which, as in the case of St. Giles, the owner of this magnificent home at Merton might win nearly £50,000. A quarrel between Gully and Ridsdale ensued, and the brawny Gladiator so far forgot himself as to publicly horsewhip his former friend, co-conspirator and confederate (who was not much more than half Gully's weight) in the hunting field. To the satisfaction of all who knew the two men, Ridsdale brought an action against his assailant, and received from a jury of their fellow countrymen a *solutio* of £500. Luck, however, began to turn against Ridsdale, and when Mr. — now Lord — Mostyn's peerless filly the Queen of Trumps, with Tommy Lye upon his hack, beat Horsea, ridden by Bill Scott, and a large field, for the St. Leger of 1835, "all the wheels were down." Ridsdale was a defaulter upon that race for many thousand pounds, and the place which he had long filled in the ring knew him no more. His horses were all sold under the hammer, and his name passed out of the recollection of his contemporaries, just as names of men who fall in battle are forgotten by their survivors upon a sanguinary battle-field. One little colt foal, indeed, there was who failed to find a purchaser when Ridsdale's stud was dispersed by old Dick Tattersall. This foal was as funny and unpromising as another little animal sold ten years later in another part of Yorkshire—we allude to Sweetmeat, by Gladiator, whom the late Henry Wadlow bought for 20 guineas at the sale held at Barnby Moor upon the death of Mr. George Clerk, who had long kept that once famed hotel and posting house upon the Great North road. Nothing more was heard of the forgotten foal that no one would buy at Merton, until he was stripped for the first time at Epsom, and won the Derby of 1839, as Bloomshury, with Sim Templeman on his back. It was a remarkable year, foreshadowing in one respect its successor of 1867, when Mr. Chaplin's Hermit won the Derby, after breeking a blood-vessel, and with odds of 1,000 to 15 offered against him as the flag fell. In 1839, no less than in 1867, the Banstead Downs were white with snow, and in the former year—in which the late Lord Herbert of Lea retained a lively recollection until the hour of his death—the wind howled and raved athwart the hills, and down the valleys of Snrey like a pack of wolves. The odds at starting against Bloomshury, who, as we have already said, had never run before, were 25 to 1; but the race was additionally memorable for the large stakes won upon it by that undying community from which the turf will never be free—the family of "Sharps." It was the first big stake ever handed by Harry Hill, who was soon to mount the ladder of fame as the trusted commissioner of Lord George Bentinck, and as the winner of the Oaks with Cymba, in 1848, Sim Templeman being again in the saddle. Of William Ridsdale, in whose name the so-called Bloomshury won the Derby of 1839, history has no more to relate. Whether Bloomshury was in reality the son of Tramp or Mulatto out of St. Giles' dam, or whether he was, as too many were ready so believe, a nameless four, or perhaps a five-year, imported for the purpose from Erin's Isle, who shall now venture to say? "You may break, you may shatter the vase if you will, but the scent of the roses will hang round it still"; and it cannot be denied that the nsavory aroma attaching to Bloomshury's Derby long continued to hang round those who rightly or wrongly were supposed to have pulled the wires upon this interesting occasion. Mr. Fulwar Craven, the owner of Deception, who ran second to Bloomshury, lodged a protest against the latter on the ground that in the *Racing Calendar* he was described as by Mulatto, whereas, in the stud-book he appeared as by Tramp or Mulatto. In these days the objection would probably be fatal to Bloomshury's chance, but the Stewards of Epsom races, after hearing William Ridsdale's explanations, resolved that the horse was entitled to run, and if he won, to receive the Derby Stakes. There the matter ought finally to have rested, but Mr. Craven insisted upon bringing it into a court of law.

The case was tried at Liverpool on the 22d of August, 1839, when a verdict was rendered in accordance with the decision of the Epsom Stewards. Meantime Sim Templeman, who probably knew no more about Bloomshury's age or pedigree than the stable boy who groomed him, suffered in the estimation of some from the fact that he had steered the colt in his first and greatest race. To the end of his career in the pigskin there were occasional mutterings heard in which the name of Bloomshury was censoriously syllabled, and, although the veteran jockey who has just expired won the Derby upon Surplice in 1848, he was displaced when the St. Leger came round; Flatman was substituted for him in the latter race, and won the victory at Doncaster upon one of the laziest and most lurching goers that was ever extended upon a race-course. The "Druid" has hymned the final struggle between him and Canezon in his "Lay of Doncast Moor:"

Now Pigburn! now Newmarket! Lord Stanley's mare pre-

vails;

No! Surplice runs with lurching strides betwixt her and the

rails;

They're head and head, they're stroke for stroke, Nat's whale-

house's in the air,

Surplice is past the judge's box, with half a neck to spare.

Racing men have short memories, and are, for the most part, unversed in the history of races which were run in the days of their fathers. It may, therefore, be not unnecessary to state that John Scott, "the wizard of the north," was in the habit of moving his Doncaster horses to a farm which he rented at Pighurn, within a few miles of the famous town moor to which he had taken Canezon, where she was about to meet the redoubtable Derby winner, over whose Epsom victory Lord George Bentinck had heaved that "snperb groan" commemorated by his noble biographer Lord Beaconsfield.

Another mortification was in store for Sim Templeman, when, at the last moment, the late Lord John Scott refused to allow him to ride Connobie for the Derby of 1856, and put Sherwood (who had been upon Wild Dayrell's back in the previous year) in the saddle, to run third to Ellington and Aldcroft. No slight, however, was sufficient to damp the elastic spirits and gay, good humor of a jockey who was a general favorite with all who came across him. His broad Yorkshire dialect, and the vein of quiet fun which ran through his conversation, were reproduced with admirable mimetic power by the last Sir William Milner but one—the father of the present baronet, who owns Nunappleton. In the hunting field Sim Templeman, although never a bruising rider, was always prominent among those *qui brillent au second rang*, and his cheery face was a welcome sight to the habitual members of the York and Ainsty field, when he rode down from his house near Pocklington-upon-the-Wolds to meet Mr. Bateman and old Will Danty, at Melbourn, in the Vale of York. To recapitulate the various jackets that he wore during his long career in the saddle would be tantamount to traversing the history of the British turf during the four decades which intervened between 1820 and 1860. Among the most famous of them, however, may be mentioned the chocolate banner of the Duke of Leeds, the black with white cap of Lord Derby, the yellow ensign of Sir Thomas Massey Stanley, the cherry of Sir Joseph Hawley, not to mention the colors of Gen. Anson, of Mr. Rudston Read, of Mr. Stanhope Hawke, of Mr. Pedley, of Mr. Harry Hill, of Lord Clifden, and last but not least, of the first Marquis of Westminster. For many years before his death Sim Templeman's eyesight had become so impaired that equestrian exercise, in which at all times he took such delight, was totally denied to him. With him the recollection of many small and once flourishing Yorkshire meetings—such at Catterick Bridge, Northallerton, Richmond-upon-Swale, and Malton—seems itself to pass away. Like many other jockeys who have ridden scores upon scores of races, and hundreds upon hundreds of trials, and have been admitted to the confidence of owners and of trainers without end, Sim Templeton would doubtless have had a singular tale to unfold had he given the rein to what Burns calls "his tinkler jaw." He was one of those prudent and self-contained men, however, who deem it their business in life neither to make nor to mar reputations, and when the grave closes over the steerer of Surplice and Bloomshury, and Cossack—of Westminster, of Miami, Cymba, and Marchioness, and a host of other winners, it will be remembered of him, by those few contemporaries whom time has still spared, that he never spoke a disrespectful word to any of his employers; that he never applied hot and rebellious liquor to his blood; that, in short, he was a jockey of the old school, to whom manners and practices of many of his successors in the saddle, who might be his grandsons in years, would be as distasteful as holy water to the lips of his Satanic Majesty.—*London Field*.

## The Arab and His Horse.

I can almost see them now as I have seen them many a day in Africa, standing on the desert where their master had dismounted, with their heads thrown down, their beautiful eyes half closed, their large nostrils so wide that you could run your hand up them, thin and palpitating, their forms so attenuated that you could see the action of their lungs, their legs wide-spread—rather ugly-looking animals. In a moment their rider leaps on their back and the whole horse changes. He raises his head proudly, tossing his long mane to the wind, his eyes gleam with life and pride, and every motion indicates the keenest joy.

Everybody knows that they are the best horses in the world, and the reason of that is the marvelous care and love which the Arab bestows on them. He never uses bit or bridle. A slender silken cord tied round their head is bridle sufficient. He never hitches his horse. I have seen five hundred of them in one of their grand hazars, all standing together with their heads down waiting for their riders. When one of those riders wanted his horse he would only whistle for him, and the horse would proudly prance out from among the rest. The Arab continually talks to his horse in the low, soft, musical monosyllables of their tongue. They are a silent race, but they make their horses their confidants. They eat and sleep and fight on horseback. The affection between the horse and the rider is something we cannot understand. I never knew one of them to sell his horse. They would starve to death first.

It is marvelous how these men learn to shoot on horseback. You will see a horse come sweeping down on the camp with terrific speed, without a rider apparently. Presently you will see a long rifle gleam over the horse's ears, and in a moment you hear the sharp report of a gun, and the man at your side has been shot. Then an Arab will straighten up on the horse and dash away like a whirlwind. Pursuit would be worse than useless. This is the way they fight. They never have pitched battles. They always come tearing down like a mountain torrent, but if they find an attack hazardous they discharge a volley and retreat. They fight mostly at night.

Nutwood is a reddish chestnut, left hind coronet white, and star in forehead, 15½ hands, kind and docile as a kitten. As he stands he is in my kind of horse from the ground up. I can not what others may wish or say; as for me, give me Nutwood. Why, I can go out in the lot to-day among one hundred wealings, and pick out his get nineteen times in twenty. Does any man want to bet I can't? There is a man at my elbow who laughed at the idea when I intimated as much to him. He did it himself; now I do the laughing. Being out of the dam of Maud S., and by one of the very best sons of Alexander's Abdallah, Nutwood is very popular, and is dead sure to become more celebrated. I would breed to him to-day, if I know myself, in preference to any horse in Kentucky. My style may not be the height of fashion now, but I predict that within five years this horse of my choice will have a goodly number in the 2:30 list, and men will be forced to admit his superiority.—*Pilgrim, in N. Y. Spirit*.

It is rumored that "Councillor" Crawford will manage the Case string this season. Jay-Eye-See looks lusty, and weighs 960 pounds; Phallas weighs 1,120 pounds, and is in fine shape for "the grand preparation." Gurgle, the pacer, will set a high mark, if nothing happens, and Victoria Sprague will "put another there" for Dictator.

### The Three Great Sons of Dictator.

Not only was Dictator from a family of trotters and a horse of great speed at the trotting gait himself, but after being sent to Kentucky he was bred to some of the very best mares to be found in that state; and it will be noticed, when reading his list of 2:30 trotters, that the fastest of them are out of the best mares. And of his six representatives in the 2:30 list whose dams are known no less than three are out of mares that produced at least one other 2:30 horse. Jay-Eye-See, 2:10 $\frac{1}{2}$ , is out of the dam of Midnight, 2:20 $\frac{1}{2}$ ; the dam of Director, 2:17, is also the dam of Thorndale, 2:22 $\frac{1}{2}$ , and Onward, 2:25 $\frac{1}{2}$ . Crop, the dam of Code, 2:26 $\frac{1}{2}$ , foaled to the cover of Clark Chief Blanche Amory, 2:26; and the dam of Donald, 2:27, was also the dam of Rosalind, 2:21 $\frac{1}{2}$ . With these facts in mind, the reason of Dictator's wonderful success as a sire is not hard to discover. He is a trotting-bred ettelion that trots, and when bred to high-class mares he naturally and, one might say, inevitably, gets a large percentage of trotters that are exceptionally good, even when in the company of notable flyers. It was this extraordinarily high form that made three of Dictator's sons—Jay-Eye-See, Phallas, and Director—the sensational trotters of last season; and it is fair to presume that, with a continuance of life and health for the next five years in Dictator, more of the same kind will follow. By virtue of that best of all tests, public performances, Jay-Eye-See must be given the place of honor among the Dictators, as well as a like position among all the trotters of his age that have ever been foaled, as his record is but half a second slower than the fastest ever made by a horse in harness, and is more than seven seconds better than that ever made by any horse of his age. Although in these days of phenomenal young trotters it is a hazardous matter to indulge in prophecy, it is not at all probable that the 2:10 $\frac{1}{2}$  of Jay-Eye-See as a five-year-old will soon be equalled or surpassed. That, in addition to being a horse of wonderful speed, Jay-Eye-See is also one of pronounced gameness is beyond dispute, as his seven-heat race at Chicago, when a four-year-old, amply attests. The thoroughblood which comes to him from his second dam, who was a daughter of Boston, was for a time a serious bar to his attaining the place to which his great speed fairly entitled him, and is yet occasionally manifested in a wild, running break that shows most strongly in contrast to the beautiful trotting action which he has inherited in each pureness from his sire. It is the same action that enabled his illustrious uncle, Dexter, to astonish every one in his day by covering a mile in the then unprecedented time of 2:17 $\frac{1}{2}$ ; and Budd Doble, who drove Dexter on the occasion of his obtaining that record, remarked to the writer, after driving Jay-Eye-See a mile in 2:22 $\frac{1}{2}$  as a four-year-old, "There is another Dexter; he acts precisely like the old horse." The theorist who have been arguing so lustily that Jay-Eye-See's speed at the trot is derived from the Boston blood that comes to him through his grandmother should ponder on this fact, and remember that the statement was made by a man who stands the equal of any one in his profession and who weighs his words before uttering them. That Jay-Eye-See gets his speed from both dam and sire is not to be doubted by reasonable men, as the sire of his dam, Pilot, Jr., although of pacing origin himself, was the founder of a family of trotters that were among the best of their time, and his daughters have been more than ordinarily successful in the breeding ranks, the dams of the two fastest trotters in the world—Mand S. and Jay-Eye-See—being by him; while others of the family have produced Noontide, Naid Queen, McCurdy's Hambletonian and other trotters of note. This is the breeding that makes Jay-Eye-See the greatest trotter of his age in the world—the blood of Ryadyk's Hambletonian and American Star on one side, and that of the pacing-bred Pilot, Jr., on the other.

Next to Jay-Eye-See, in point of speed, as shown by the record, is Phallas, whose mile in 2:15 $\frac{1}{2}$  at Cleveland, last summer, is within a quarter of a second of the fastest ever trotted by an entire horse; and should average good fortune attend him during the coming season, it is entirely within the limits of probability that Smuggler's record of 2:15 $\frac{1}{2}$  will be lowered. Like the other sons of Dictator that have trotted fast, Phallas is well bred in the maternal line, his dam being by Clark Chief, son of Mambrino Chief, and a horse that, with a very brief stud experience, and not the best of opportunities, left half a dozen descendants that have beaten 2:30, and sired the dams of two horses that have beaten 2:20—Phallas, 2:15 $\frac{1}{2}$ , and Majolica, 2:17. Phallas is a much larger horse than either Jay-Eye-See or Director; but, like them, came to his speed early, getting a breeder's record of 2:22 $\frac{1}{2}$  when five years old, and following it the next season with 2:15 $\frac{1}{2}$ . That he is a better horse than Director his friends have always claimed; but the facts do not bear them out in this assertion, as will be shown further on in this article. But for all that Phallas is a horse for whom no excuses or apologies need be made, as his work speaks for itself more eloquently than could the lips of his most ardent admirers. He has accomplished, in point of obtaining a fast record, more than any other horse of his age can lay claim to, and, in addition, has proved himself a remarkably honest horse in races, and a good campaigner. The few colts that have been dropped to his cover partake, in a marked degree, of the characteristics of their sire, and there is no reason to doubt that they will also inherit his speed. Last fall, after a campaign that must have taxed the energies of even so robust a horse as he undoubtedly is, Phallas was permitted to serve something like thirty mares; and whether this action on the part of his owner was a wise one time alone can tell. The prestige which his fast trotting had given him caused the very best of mares to be sent to him, and the result will be watched with interest by the advocates of the theory that a stallion whose vitality has been called upon to an extent to great and exhaustive drains by the necessities of a trotting campaign is not in the best condition to produce offspring that will bear credit to him. There are, of course, two sides to this matter, and the forces arrayed on both sides are about numerically equal, but the question involved has never been tested in a thorough manner.

Director, the third of the Dictators whom it is proper to mention in this article, is by not a few horsemen of experience and intelligence thought to be the greatest of them all, and certainly a careful review of his performances from the age of three years to the present time cannot fail to impress strongly the most casual observer of such matters. It is not claimed for Director that he possesses the wonderful speed of Jay-Eye-See, but the assertion is freely made, and with the most substantial grounds, that he is the very best race-horse ever seen, and that no trotter that does not excel him in speed at least two seconds to the mile has the slightest chance of beating him a race; and the record of last season would seem to fully warrant this assertion, as, barring Jay-Eye-See, Director never met a horse that he did not either beat or show conclusively that he was his superior before the season was over. This is a broad statement to make, but the facts will prove its truthfulness. Director started in last season with a record of 2:23 $\frac{1}{2}$ , and before completing his eastern campaign he had lowered it to 2:17 $\frac{1}{2}$ , and beaten all the best horses in the
