Daffodills, crocus, colchicums and hardy plants.			

## IMPORTANT

The Flower Grower is a splendid and instructive monthly paper and should be read by every flower lover and grower, as it is the most useful paper for the amateur grower, as all different plants and bulbs will be handled and every information required will be given by the editor and his staff.

The subscription is \$1.00 per year but will be raised by this year on account of its value and extensiveness and the expenses on that account. But every purchaser of the amount of \$10.00 or more out of this catalogue will be given a year subscription free. You will enjoy it very much.

**Try my three CHAUTAUQUAS.** Every grower, professional or amateur, should give them a trial.

**CHAUTAUQUA RED** is an early bloomer and strong, tall, spike with brilliant red flowers, more brilliant and bright than any other red and pointed out at once in any collection on his brightness of color.

**CHAUTAUQUA WHITE** is a middle season bloomer and very big spike with many big alabaster white flowers open at the same time, is distinct of any other white.

**CHAUTAUQUA SUNSET** is a primulinus variety, but the spike is as tall and big as any big variety, although the stem is as slender and graceful as the primulinus the color of the flowers is as beautiful as are the color of some of those beautiful sunsets can be, and sometimes ten or twelve big flowers open at the same time. It is a very strong grower and rapid multiplier of the primulinus habit, and any and everybody admires this variety.
