Mix'n'match

- Tool that allows one to match names to Wikidata entries

<https://mix-n-match.toolforge.org/>

This tool can list entries of some external databases, and allows users to match them against Wikidata items.

Think 'red link lists on steroids'. See [the manual](#) or [watch a video](#) for a how-to. For an alternative, see [OpenRefine](#).

You can [suggest](#), [import](#), or [scrape](#) new catalogs. See also: [AC properties without Mix'n'match](#).
