THE ATTEMPT AGAINST LOUIS NAPOLÉON.

The New York Tribune, who are not to be trusted, communicate to us some important information concerning the recent attempt to assassinate the Emperor of Louis Napoleon. The article is to the effect that the plot was hatched by the Italian, as a people who have never been able to govern themselves, and that the French government, in their efforts to do so, have been the chief authors of the failure. The Red Republicans, who number many thousands, are still together in a body of admirable organization, and are determined to continue their efforts to overthrow the Government. They were the leaders of the dreaded Carabiniers. Let us hope that in a short time we may see the arrival of the new member of the Senate, Mr. George C. Peabody, who has just come from Paris to speak for his principles. Mayor, Pope Dix and the King of France were active members. This society, however, is the real secret, and other attempts by the French to subdue it have been unsuccessful. The writer goes on to say that the efforts of the society to overthrow the Government have been successful, and that the Senate has been unable to do anything to help them. The efforts of the society are now ready to be put into action. Let us hope that the French will be successful.
