General Election, Paris, July 22.—The elections for the French councils-general took place yes-terday throughout the provinces, there being 1.453 members of these depart-mental legislators to be chosen in as many cantons. The importance of the elections lies in the fact that they serve as a weather-cost to show the drift of public opinion rearding the policy of the central gov-ernment. Although the issues involved are purely local, the voting is invariably. Moreover, many councilors are also memi-bers of the senate or of the chamber of deputies, and their re-election or defeat is take of their parliamentary acts. Displatches from various points show that the elections passed of quietly every incomplete; but such as have been received indicate that the ministerial-ists have gained a number of seats, priwhat action should be taken in that

Representatives were present from the Erotherhood of Railway Eufrom the Erotherhood of Railway Fu-graess, Firenen and Trickmen and Rail-way Conductors. The trackmen present-ed their demands and the company's re-ply. A prolonged discussion ensued, in which all the unions were insistant that the strike be immediately settled. The strikers' demands were not thoroughly endorsed, nor did the compromise sug-gested by the company meet with ap-proval. No decisive action was taken, but the demand was made that the strike be closed in some manner at once.

THE FORERUNNER OF MARCONI.

It may not be generally known, says M. A. F., that wireless telegraphy was made jossible through the researches of Dr. Branly, a modest sivant in Paris, little known outside scientific circles. Marconi himself graiterilly acknowledged his indebt-cheess to Dr. Branly by sending him the first message that traversed, the channel from the English shore. What Branly did was to show that the resistance of a cir-cuit, which included an arrangement of iron filings, changed under the influence of the electric vibrations called Hertdan waves. Marconi caught up the hint, and by a series of admirable developments pro-duced great practical results. Speaking with the learned doctor recently. I asked him if the vast commercial advantages of the discovery had struck him. He repiled simply. It may not be generally known, says M. accurate, it is necessary to place the facts before the electors with the view of increasing the strength of the navy and placing the safety of the country beyond placing the safety of the country beyond cavil or dispute. . . . For this purpose money is needed, and I would therefore ask your readers to join the league as members The Ger-man Navy League has a membership of 60°,00°, and its hast year's income is stated to have been \$100,000. Seattle Shipping Men Looking For Pacific Terminus For Kosmos Line.

Kaga Maru Calls at Outer Wharf For Large Lumber Consignment.

Scattle shipping men are making a stremmous effort to make that port the Pacific terminus of the Kosmos Steam-ship company, which may also in time make Victoria a port of call. The Her-monthis, which inaugurated the com-pany's service in this part of the world, called at Nanaimo last week, but having no local freight to load, went on to Seat-be after taking bunker coal aboard. The company operate twenty-eight large standards to the carious ports of the world, having continential headquarters in Hamurg. Germany. The Seattle Times says: "The stock-holders of the concern are at present dis-cussing the proposition of making Seattle

of making Seattle sing the pr sing the proposition of making Seattle termination, and it is said to be more in likely that the plan will be adopted, he adoption of the plan will involve e distinct and separate steamship tes, two of which will terminate at rg. One of these will be from via the Orient, the Suez Canal, Hamburg. Seattle via the Orient, the Suez Canal, the Mediterranean and to Hamburg. The second will be via Central American and South American ports, the Straits of Mageflan, the Atlantic and to Ham-burg. The third line will be a direct ser-vice from Seattle to the Orient and re-turn. The latter vessels will go no further East than the Orient.

There are eight Kosmos steamers now being operated between Seattle and Hamburg. They give a monthly service, as eight months is required in making the round trip. By the proposed change there will probably be a bi-monthly ser-vice to the Orient and return, and a monthly and possibly a bi-monthly ser-vice via the Atlantic route. The Australasian, of the Allan line. Steamer Queen is scheduled to leave for Alaskan point on Thursday. Steamer Tartar arrived at Yokobama from Victoria yesterday. Steamer Mona left Brisbane on July 18th for Victoria. PROSPECTS AT CLEARWATER.

The twenty-eight steamships which will make Seattle. their Pacific coast terminus, providing present plans are carried out, and there is every indication that such a step will be made, have a combined tonnage of 152,400 The yes-sels range from 4,000 tons cargo capacity to 6,800 tons capacity. The Hermon-this belongs to the latter class and car-ries a crew of sixty-two men in addition to the officers. She also has accommo-dations for sixty passengers. In addi-tion to the twenty-eight steamers the Kosmos line has a long lease on several ressels owned by the Hamburg-American line.

KAGA MARU CALLS.

KAGA MARU CALLS. The fine big steamship Kaga Maru, of the Nippon Kaisha Maru, came in to the outer whart from the Sound this morning on route to the Orient. She is filled with cargo of a mixed character, of which 200,000 'teet of lumber was loaded here. The consignment is destin-ed for Japin. The Kaga also received here 15 Chinese and three Japanese pas-sengers. Two other Oriental liners, due to arrive this week, are the Duke of Fife, of the Dodwell fleet, which should reach port by tomorrow, and the N. Y. K, steamer Riojun Maru expected on Thursday.

MARINE NOTES.

MARINE NOTES, After many weeks of deliberation the owners of the new steamer Majestic have at last decided on a route for that vessel. She is to ply on the Seattle and Whatcom run, and will make her in-augural trip in the service on Thursday. For long it was supposed the steamer would run to Victoria, for which service she had been built; but the keen rate war which has been maintained now for over a year prevented these plans heing ear-ried.out.

Hohrses pitched a good game, and had he received proper support the score would be far different. The local boys have been depending a bit too much on their battery to play the game for them, and scenned to lose heart when Hohress was being touched up a bit in the start. Potts had he trouble in finding Shock's curves, and got two doubles and a single. Schwengers and Roarke each got two singles. The others, with the exception of Neelands and Widdowson, got one hit each, but Shock managed to keep the hits fairly well scattered. The game was a good one from a spec-turor's standpoint, being full of hitting and sharp fielding. The Everett team is a most gentlemanity one, and put up good (clean ball, rowdy work and squabbling with the umpire being not in their line. Tupire Smith, as usual, gave splendid satisfaction, not one of his decisions he-ing questioned. The score follows: <u>Victoria</u>.
