S. D. A. War Board established pursuant to Memorandum No. 921, issued by the Secretary of Agriculture of the United States on July 5, 1941, as amended, in the county in which such fruit is available. An authorization, as aforesaid, with respect to a particular lot of fruit shall be issued by the chairman or, in his absence, the secretary of the respective County U. S. D. A. War Board if such chairman or secretary determines with respect to the particular lot of fruit that (a) no market is available for such fruit for human consumption, except when used in the production of such alcoholic product for sale, having an alcoholic content of 7 percent, or more, by volume, or the fruit is unsuitable for human consumption, except when used in the production of such alcoholic product for sale, having an alcoholic content of 7 percent, or more, by volume; *Provided*, That the owner of such fruit and all previous owners, if any, have exercised, or prior to the fruit's becoming unsuitable for human consumption, did exercise, all reasonable efforts to dispose of or utilize such fruit for human consumption, except when used in the production of such alcoholic product for sale, having an alcoholic content of 7 percent, or more, by volume; and (b) the granting of such permission to use the fruit for the aforesaid purpose is in ac-

cordance with such additional conditions, if any, as may be specified by the Director.

(2) No person shall sell or deliver fruit with knowledge or reason to believe that such fruit or any portion thereof thus sold or delivered is to be used in violation of this order.

(3) No person shall use any alcoholic product, having an alcoholic content of less than 7 percent, by volume, produced from fruit, after the effective date of this order, in the production of a product having an alcoholic content of 7 percent, or more, by volume.

(4) The provisions of this order shall not apply to (i) the use of fruit in the manufacture of food flavoring or pharmaceutical flavoring, or (ii) the use of fruit in the production, by the addition of an alcoholic product, of food flavoring, pharmaceutical flavoring, food flavoring extract, pharmaceutical flavoring extract, food flavoring concentrate, or pharmaceutical flavoring concentrate.

(5) The restrictions hereof shall be observed by each person affected by this order without regard to the rights of creditors, existing contracts, or payments made.

(6) Notwithstanding any other provision hereof, the Director may, if he deems that such will tend to effectuate the purposes of this order, authorize the use of fruit in the production of an alcoholic product for sale, having an alcoholic content of 7 percent, or more, by volume.

(c) *Audits and inspections.* The Director shall be entitled to make such audit or inspection of the books, records and other writings, premises, or stocks of fruit or alcoholic products, of any person, and to make such investigations, as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(d) *Records and reports.* (1) The Director shall be entitled to obtain such information from, and require such reports and the keeping of such records by, any person, as may be necessary or appropriate, in his discretion, to the enforcement or administration of the provisions of this order.

(2) Every person subject to this order shall, for at least two years (or for such period of time as the Director may designate), maintain an accurate record of his transactions in fruit.

(3) The record-keeping requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Subsequent record-keeping or reporting requirements will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

the fruit is available, for conversion into an alcoholic product for sale, for relief. Petitions for such relief shall be in writing, and shall set forth all pertinent facts and the nature of the relief sought. If the petitioner is dissatisfied with the action of the Regional Director, such person may secure a review of such action by the Director. The Director may, thereupon, take such action as he deems appropriate, and such action shall be final.

(f) *Violations.* The War Food Administrator may, by suspension order, prohibit any person who violates any provision of this order from receiving, making any deliveries of, or using fruit or any other material subject to priority or allocation control by the War Food Administrator, and may recommend that such person be prohibited from receiving, making any deliveries of, or using materials subject to the priority or allocation control of other governmental agencies. In addition, any person who willfully violates any provision of this order is guilty of a crime and may be prosecuted under any and all applicable laws. Further, civil action may be instituted to enforce any liability or duty created by, or to enjoin any violation of, any provision of this order.

(g) *Delegation of authority.* The administration of this order and the powers vested in the War Food Administrator, insofar as such powers relate to the administration of this order, are hereby delegated to the Director, and may be re-delegated by him to any employee of the United States Department of Agriculture.

[Suspension Order Docket No. FDA-NE-64]

PART 1590—SUSPENSION ORDERS

DEEMS ICE CREAM CORPORATION

Deems Ice Cream Corporation, 1235 McDonald Avenue, Brooklyn, New York (the "respondent"), was served with a Statement of Charges and Procedure from which it appears that respondent had violated Food Distribution Order 8 (8 F.R. 953), issued by the Secretary of Agriculture on January 19, 1943, and effective February 1, 1943, and Director of Food Distribution Order 8-1 (8 F.R. 1330), issued and made effective by the Director of Food Distribution on February 1, 1943, by utilizing, in the allocation periods of March and April 1943, respectively, more milk solids in the production or manufacture of ice cream mix than sixty-five per centum of the total milk solids utilized by it in the production or manufacture of ice cream mix during the

corresponding base periods, namely, March and April 1942, respectively.

Respondent filed an answer and requested a hearing. Pursuant to respondent's request, a hearing was held in this matter on June 21 and June 28, 1943, before a presiding officer, at which the respondent and a representative of the War Food Administration appeared.

Upon the basis of the evidence adduced at the hearing, the War Food Administrator, acting under authority conferred upon him by Executive Order 9322 (8 F.R. 3807), as amended by Executive Order 9334 (8 F.R. 5423), hereby determines that:

(a) Respondent is a corporation organized and existing under the laws of the State of New York, engaged in the business of processing frozen dairy foods and mix at a plant located at 1235 McDonald Avenue, Brooklyn, New York, and is subject to all of the terms and provisions of said orders.

(b) Respondent willfully violated said orders in that, during the allocation period March 1 to March 31, 1943, both dates inclusive, it utilized milk solids in the production or manufacture of approximately six thousand (6,000) gallons of ice cream mix, whereas, during the base period March 1 to March 31, 1942, both dates inclusive, respondent did not produce or manufacture any ice cream mix. Therefore, the production or manufacture of approximately six thousand (6,000) gallons of ice cream mix during the said allocation period for March 1943, constituted the utilization of milk solids in the production or manufacture of ice cream mix in excess of sixty-five per centum of the total milk solids utilized by respondent in the production or manufacture of ice cream mix during the base period March 1 to March 31, 1942, both dates inclusive.

(c) Respondent willfully violated said orders in that, during the allocation period April 1 to April 30, 1943, both dates inclusive, it utilized milk solids in the production or manufacture of approximately five thousand four hundred (5,400) gallons of ice cream mix, whereas respondent, during the base period April 1 to April 30, 1942, both dates inclusive, produced or manufactured only four thousand eight hundred and eighty-nine (4,889) gallons of ice cream mix, which production or manufacture during the allocation period of April 1943 constituted a utilization of milk solids by respondent in the production or manufacture of ice cream mix in excess of sixty-five per centum of the milk solids utilized by respondent in its production or manufacture of ice cream mix during the base period April 1 to April 30, 1942.

Because of the great scarcity of dairy products, including milk solids and frozen dairy foods and mix, in the channels of distribution for the fulfillment of the requirements of the United States for defense, for private account, and for export, and because of the importance of having dairy products, including milk solids and frozen dairy foods and mix, distributed in a manner to assure an adequate supply and efficient distribution thereof for war and essential civilian needs, the aforesaid violations by respondent have impeded the war effort and have, there-

fore, been contrary to public interest. It also appears that further violations by respondent are likely unless appropriate action is taken; *It is therefore ordered, That:*

§ 1590.5 *Suspension order against the Deems Ice Cream Corporation.* (a) Respondent, its agents, successors, or assigns, shall not, for six consecutive allocation periods during which respondent has quotas to produce or manufacture frozen dairy foods or mix, in any manner, directly or indirectly (1) utilize milk solids in the production or manufacture of frozen dairy foods or mix; (2) accept delivery of milk solids or frozen dairy foods or mix from any person; or (3) deliver milk solids or frozen dairy foods or mix to any person.

(b) During such six consecutive allocation periods, no person shall, in any manner, directly or indirectly, deliver milk solids or frozen dairy foods or mix to respondent, its agents, successors, or assigns, or accept delivery thereof from respondent, its agents, successors, or assigns.

(c) The provisions of paragraphs (a) and (b) hereof shall be held in abeyance provided that respondent, its agents, successors, or assigns, shall observe the following allocations in the utilization of milk solids in the production or manufacture of frozen dairy foods or mix:

(1) During the allocation periods October, November and December 1943, and January, February and March 1944, respondent shall not utilize any milk solids in the production or manufacture of frozen dairy foods or mix;

(2) During the allocation periods April, May and June 1944, respectively, respondent's utilization of milk solids in the production or manufacture of frozen dairy foods or mix shall not exceed 2892 pounds, 7392 pounds, and 7713 pounds, respectively.

(d) In the event it is determined that respondent, its agents, successors, or assigns, have exceeded the allocations set forth in paragraph (c) hereof, the War Food Administrator may, by order, declare the provisions of paragraphs (a) and (b) hereof to be effective and prescribe the time at which such suspension period shall commence.

(e) Nothing contained in this order shall be deemed to relieve respondent, its agents, successors, or assigns, from any restriction, prohibition, or provision contained in any order or regulation of the War Food Administrator, except insofar as the same may be inconsistent with the provisions hereof.

(f) The term "person", as used in this order, means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not.

(g) Any terms used in this order which are defined in Food Distribution Order 8 (8 F.R. 953), issued by the Secretary of Agriculture on January 19, 1943, and made effective on February 1, 1943, shall have the meaning therein given to them, unless otherwise distinctly expressed or manifestly incompatible with the intent thereof.

(h) This order shall become effective as of the date of issuance.

(E.O. 9280, 7 F.R. 10179; E.O. 9332, 8 F.R. 3807; E.O. 9334, 8 F.R. 5423)

2. If width\* of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extras (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filling the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

1. If width\* of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

TABLE H-9—STAINLESS STEEL SHEETS—Continued

A. RECTANGULAR SHAPES—Continued

2. If width\* of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

3. If width\* of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extras (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filling the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

Gauge No.:	Charge for—

B. STAINLESS STEEL CIRCLES

When rough cut to size 5" Dia. and larger on straight blade shear, price as a square and charge for weight of square 1/2" larger than diameter of circle, and then add the following extra for shearing to circle:

8¢ (eight cents) per inch diameter.

Minimum charge \$1.00 net per thickness.

Example: 1 circle #24 x 20" dia., charge is \$1.60 net. 4 circles #10 x 22 1/2" dia., charge is \$1.80 each or \$7.20 net.

\*The smallest dimension shall be considered the width regardless of surface finish or grain structure. If a charge is made in accordance with (1), (2), or (3) the net weight of the cut material ordered shall be the weight used in invoicing.

MISCELLANEOUS EXTRAS

[Rate per 100 pounds]

Except as specifically noted in the extra tables themselves, the following charges may be made only when the service, operation or labor described as an extra is actually performed on the material sold:

TABLE K-1—GALVANIZING EXTRAS

A. GENERAL CONDITIONS

The prices are list prices subject to differentials and cover new material only.

All prices herein are based on galvanized weight.

Differentials apply to the total weight of all galvanized materials (except galvanized sheets, produced at mills) ordered in one day for shipment at one time or at the sellers convenience to one destination.

For intermediate sizes use next higher list.

B. DIFFERENTIALS

For any material from which paint or grease has to be burned off not more than 50% may be added to galvanizing charge.

The following length differentials apply to angles, tees, channels, flat bars, flat strips, half-ovals, rounds, squares, half-rounds and may be added to net galvanizing extra:

	Rate per 100 pounds
Under 10'0"	Add \$0.15
Under 6'0"	Add .25
Under 2'0"	Add .50
Over 22'0"	Add .10
Over 30'0"	Add .20
Over 45'0"	Add .40
Over 50'0"	Add .90

Minimum charge of \$1.00 will be made for galvanizing a single item and/or order if weight of order at net price does not amount to \$1.00.

The following Differentials apply on all Galvanizing Extras listed below:

	Per cent
Under 500 lbs.	Plus 25
500 to 1,999 lbs.	Plus 10
2,000 to 5,999 lbs.	Less 5

1. If width\* of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

2. If width\* of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

3. If width\* of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extras (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filing the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

Total cuts of one length, cross section, finish and analysis determines the charge per cut.  
Minimum charge: 3 1/2¢ per item of one length, cross section, finish and analysis.

Gross weight may be charged for the stock size cross section of the cut length angle.

The leg-shearing operations is done before cutting to length. Thus 2 angles 5' 0" long would be subject to only one \$0.25 leg shearing extra since this operation would be performed on a 10' 0" angle.

TABLE H-9—STAINLESS STEEL SHEETS

**A. RECTANGULAR SHAPES**

1. If width\* of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

2. If width\* of piece ordered is 1/4 but less

\*The smallest dimension shall be considered the width regardless of surface finish or grain structure. If a charge is made in accordance with (1), (2), or (3) the net weight of the cut material ordered shall be the weight used in invoicing.

than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

3. If width\* of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extras (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filling the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

- If width\* of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price. (Quantity extra and freight shall not be considered a part of the stock size price.)
- If width\* of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price. (Quantity extra and freight shall not be considered a part of the stock size price.)
- If width\* of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price. (Quantity

\* The smallest dimension shall be considered the width regardless of surface finish or grain structure. If a charge is made in accordance with (1), (2), or (3) the net weight of the cut material ordered shall be the weight used in invoicing.

TABLE H-9—STAINLESS STEEL SHEETS

A. RECTANGULAR SHAPES

1. If width<sup>1</sup> of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

2. If width<sup>1</sup> of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

3. If width<sup>1</sup> of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extras (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filling the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

Gauge No.:	Charge for—	
	First Cut	Additional Cuts
10	\$0.60	\$0.20
11	.60	.20

22	.40	.10
24	.35	.10
26	.35	.10

<sup>1</sup>The smallest dimension shall be considered the width regardless of surface finish or grain structure. If charge is made in accordance with (1), (2), or (3) the net weight of the cut material ordered shall be the weight used in invoicing.

B. STAINLESS SHEET CIRCLES

When rough cut to size 5" diameter and larger on straight blade shear, price as a square and charge for weight of square 1/2" larger than diameter of circle, and then add the following extra for shearing to circle:

8¢ (eight cents) per inch diameter.  
Minimum charge \$1.00 net per thickness.

Example:  
1 circle # 24 x 20" diameter, charge is \$1.60 net  
4 circles # 10 x 22 1/2" diameter, charge is 1.80 each or 7.20 net

The leg-shearing operations is done before cutting to length. Thus 2 angles 5' 0" long would be subject to only one \$0.25 leg shearing extra since this operation would be performed on a 10' 0" angle.

**TABLE H-9—STAINLESS STEEL SHEETS**

A. RECTANGULAR SHAPES

1. If width<sup>1</sup> of piece ordered is less than 1/4 of the width of any stock size sheet in same type, gauge and finish add ten percent (10%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).
2. If width<sup>1</sup> of piece ordered is 1/4 but less than 1/2 of the width of any stock size sheet in same type, gauge and finish add fifteen percent (15%) of the stock size price (quantity extra and freight shall not be considered a part of the stock size price).
3. If width<sup>1</sup> of piece ordered is 1/2 or more of the width of any stock size sheet in same type, gauge and finish add twenty percent (20%) of the stock size price (quan-

tity extra and freight shall not be considered a part of the stock size price).

4. If the cut size or sizes ordered are cut without waste from any stock size, none of the above percentage extra (10%, 15%, 20%) may be added, but the following shearing charges may be made for the number of cuts actually made in filling the order. Figure one first cut for each thickness ordered. In no case shall the shearing charge exceed the value of the cut pieces figured at 12¢ per pound.

Gauge No.:	Charge for—

<sup>1</sup>The smallest dimension shall be considered the width regardless of surface finish or grain structure. If a charge is made in accordance with (1), (2), or (3) the net weight of the cut material ordered shall be the weight used in invoicing.

B. STAINLESS SHEET CIRCLES

When rough cut to size 5" diameter and larger on straight blade shear, price as a square and charge for weight of square 1/2"

larger than diameter of circle, and then add the following extra for shearing to circle:  
8¢ (eight cents) per inch diameter.  
Minimum charge \$1.00 net per thickness.  
Example:  
1 circle #24 x 20" diameter, charge is \$1.60 net.  
4 circles #10 x 22 1/2" diameter charge is \$1.80 each or \$7.20 net.

MISCELLANEOUS EXTRAS

[Rate per 100 pounds]

Except as specifically noted in the extra tables themselves, the following charges may be made only when the service, operation or labor described as an extra is actually performed on the material sold:

TABLE K-1—GALVANIZING EXTRAS

A. GENERAL CONDITIONS

The prices are list prices subject to differentials and cover new material only. All prices herein are based on galvanized weight.

Differentials apply to the total weight of all galvanized materials (except galvanized sheets, produced at mills) ordered in one day for shipment at one time or at the sellers convenience to one destination.

For intermediate sizes use next higher list.

B. DIFFERENTIALS

For any material from which paint or grease has to be burned off not more than 50% may be added to galvanizing charge.

The following length differentials apply to angles, tees, channels, flat bars, flat strips, half-ovals, rounds, squares, half-rounds and may be added to net galvanizing extra:

	Rate per 100 pounds
Under 10'0"	Add \$0.15
Under 6'0"	Add .25
Under 2'0"	Add .50
Over 22'0"	Add .10
Over 30'0"	Add .20
Over 45'0"	Add .40
Over 50'0"	Add .90

Minimum charge of \$1.00 will be made for galvanizing a single item and/or order if weight of order at net price does not amount to \$1.00.

The following differentials apply on all galvanizing extras listed below:

	Percent
Under 500 lb.	Plus 25
500 to 1,999 lb.	Plus 10
2,000 to 5,999 lb.	Less 5
6,000 to 9,999 lb.	Less 15
10,000 to 35,999 lb.	Less 20
36,000 and over.	Less 25

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the division of the Federal Register.\*

Revised Price Schedule No. 49 is amended in the following respects:

1. In § 1306.157, a new paragraph (p) is added to read as follows:

2. In § 1306.157, a new paragraph (q) is added to read as follows:

(q) "Shipping point" means the place at which the shipment was last withdrawn from the warehouse where it was put through the operations commonly known as the warehousing of iron or steel products.

3. In § 1306.157, a new paragraph (cc) is added to read as follows:

(cc) The further definitions set forth in § 1306.159 (t) shall apply to all products covered by § 1306.159 (t), but the terms therein defined shall have the meaning given them only when used in § 1306.159 (t).

4. In § 1306.157, a new paragraph (dd) is added to read as follows:

(dd) The further definitions set forth in § 1306.159 (u) shall apply to all products covered by § 1306.159 (u), but the terms therein defined shall have the meaning given them only when used in § 1306.159 (u).

7. In § 1306.159 a new paragraph (u) is added to read as follows:

(u) *Freight and transportation charges for destinations within or outside a rail price area—(1) Definitions.*

(i) "Private carrier" means any vehicle operated by the seller or the buyer including leased or rented vehicles. This term shall also include contract carriers under contract to either the buyer or the seller.

(ii) "Common carrier" is a person who holds himself out to furnish transportation for the public generally. This term includes common carriers by rail, highway, water or air or any combination thereof. This term also includes express companies and freight forwarders.

(iii) "Rail station" means a place at which a railroad maintains facilities for the acceptance of the quantity of material shipped, (carload or less-than-carload, as the case may be) when used in reference to outgoing shipments. When used in reference to incoming shipments, it means a place at which a railroad maintains facilities for the delivery of the quantity of material shipped (carload or less-than-carload, as the case may be).

(iv) "Rail price area" includes any point within 15 airline miles of a rail station. If a point is within 15 miles of two or more rail stations, it shall be considered as within the area of the nearest rail station.

(v) "Rail rate of freight" means the lowest filed or published rail tariff rate for the shipment of material included in the order to be shipped, plus the Federal Transportation Tax. When a minimum charge per shipment is applicable, such minimum charge shall be considered the freight rate.

(2) *General provisions—(i) Delivered prices.* For all products except oil country tubular goods for which the price is established by § 1306.159 (i) (3) (ii), the maximum delivered prices established in this Revised Price Schedule No. 49 include delivery to the destination. (See definition of "destination" in § 1306.157 (p)).

(ii) *Freight from point.* In all instances in this Revised Price Schedule No. 49 when freight is used as a factor in computing the maximum delivered price and is to be added or deducted from a point such as basing point, shipping point, seller's warehouse, etc., it shall be the rail rate of freight from the rail freight station located within the city where the basing point, shipping point or seller's warehouse, etc. is located: *Provided*, That if there is no rail station within such city, freight shall be the rail rate of freight from the nearest rail station.

(iii) *Freight to point.* In all instances in this Revised Price Schedule No. 49 when freight is used as a factor in computing the maximum delivered price and is to be added or deducted to a point, such as destination, buyer's location, etc. (either implied or actually stated), freight shall be the rail rate of freight to the rail freight station located within the rail price area where the destination, buyer's location, etc., is located: *Provided*, That if the destination, buyer's location, etc., is not within a rail price

area, freight shall be the rail rate of freight to the rail station nearest the destination, buyer's location, etc.

(iv) *Maximum freight or dislocated tonnage provisions.* In any step (1) of subdivisions (i), (ii), (iii), (iv), (v) or (vi) of subparagraph (4) or subdivisions (iii), (iv), (v) or (vi) of subparagraph (5) of this paragraph (u), when any provision listed below (maximum freight absorption or dislocated tonnage provision) is applicable for use under its own definition and is used, freight or actual transportation charged paid as required in such provision shall be used in computing the maximum price.

In any step (1) of subdivisions (i), (ii), (vii) or (viii) of subparagraph (5) of this paragraph (u), when any provision listed below (maximum freight absorption or dislocated tonnage provision) is applicable for use under its own definition and is used, freight as required in such provision shall be used in computing the maximum price. In the application of the provision in any step (1) of these subdivisions, that portion of the provision permitting the addition of actual transportation charges paid may not be used.

The maximum freight absorption or dislocated tonnage provisions referred to above are as follows:

1. Section 1306.159 (f)
2. Section 1306.164 (c) (2) (iii)
3. Section 1306.164 (d) (2) (iii)
4. Section 1306.165 (a) (8)
5. Section 1306.165 (b) (5) (ii), Table C-1, the fourth, fifth or sixth paragraphs.
6. Section 1306.165 (b) (5) (ii), Table C-2, the third, fourth or fifth paragraphs.
7. Section 1306.165 (b) (11) (ii), Table C-1, the fifth, sixth or seventh paragraphs.
8. Section 1306.165 (b) (17) (ii), Table C-1, the fourth, fifth or sixth paragraphs.
9. Section 1306.165 (b) (17) (ii), Table C-2, the second, third or fourth paragraphs.

(3) *How to determine the method of shipment (referred to in subparagraphs*

(4) and (5) of this paragraph (u). To determine whether the shipment moves entirely by common carrier, entirely by seller's private carrier, or entirely by buyer's private carrier or any combination thereof, all shipments are to be considered as originating at the place where the material was last put through the "operations commonly known as the warehousing of iron and steel products" as defined in § 1306.157 (s) of this schedule, except when the seller delivers the shipment in his private carrier to a terminal of a common carrier located in the vicinity of the shipping point, in which case the shipment is to be considered as originating from such terminal.

(4) *Adjustments to be made under various circumstances for shipments to a destination within a rail price area.* (i) If the shipment is made

- (a) To a destination within a rail price area,
- (b) Entirely by common carrier, and
- (c) Transportation charges from the shipping point to the destination are paid by the seller,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such price are permitted by subparagraph (2) (iv) of this paragraph (u).

(2) There shall be no deduction from or addition to such price.

(ii) If the shipment is made

- (a) To a destination within a rail price area,
- (b) Entirely by common carrier, and
- (c) Transportation charges from the shipping point to the destination are paid by the buyer,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such price are permitted by subparagraph (2) (iv) of this paragraph (u).

(2) Deduct the actual transportation costs paid from the shipping point to the destination.

(iii) If the shipment is made

- (a) To a destination within a rail price area,
- (b) By common carrier to a point other than the destination, but outside of the buyer's rail price area and hauled from such point by the buyer's private carrier, and
- (c) Transportation charges from the shipping point to the point at which the buyer's private carrier receives the material are paid by the seller,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such prices are permitted by subparagraph (2) (iv) of this paragraph (u).

(2) Deduct the rail rate of freight from the shipping point to the destination.

(3) Add the rail rate of freight from the shipping point to the point at which the buyer's private carrier took delivery of the material.

(iv) If the shipment is made

- (a) To a destination within a rail price area,
- (b) By common carrier to a point other than the destination, but outside of the buyer's rail price area and hauled from such point by the buyer's private carrier, and
- (c) Transportation charges from the shipping point to the point at which the buyer's private carrier took delivery of the material are paid by the buyer,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such price are per-

mitted by subparagraph (2) (iv) of this paragraph (u).

(2) Deduct the rail rate of freight from the shipping point to the destination.

(3) Add the rail rate of freight from shipping point to the point at which the buyer's private carrier took delivery of material.

(4) Deduct the actual transportation costs paid from the shipping point to the point at which the buyer's private carrier took delivery of the material.

(v) If the shipment is made

- (a) To a destination within a rail price area,
- (b) Entirely by the seller's private carrier,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such price are permitted by subparagraph (2) (iv) of this paragraph (u).

(2) There shall be no deduction from or addition to such price.

(vi) If the shipment is made

- (a) To a destination within a rail price area,
- (b) Entirely by the buyer's private carrier,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the destination as otherwise established by Revised Price Schedule No. 49, using rail rate of freight, except when actual transportation charges in the computation of such price are permitted by subparagraph (2) (iv) of this paragraph (u).

(2) Add the actual transportation costs paid by the seller from the shipping point to the destination.

(3) Deduct the rail rate of freight from the shipping point to the nearest rail station.

(ii) If the shipment is made

- (a) To a destination outside of all rail price areas,
- (b) Entirely by common carrier, and
- (c) Transportation charges from the shipping point to the destination are paid by the buyer,

the maximum delivered price shall be computed as follows:

(1) Compute the maximum delivered price for the nearest rail price area as otherwise established by Revised Price Schedule No. 49, using the rail rate of freight.

(2) Deduct the rail rate of freight from the shipping point to the nearest rail station.

(iii) If the shipment is made

(a) To a destination outside of all rail price areas,

(b) By common carrier to the nearest rail station and hauled from such station by the buyer's private carrier, and

(c) Transportation charges from the shipping point to the nearest rail station are paid by the seller,

the maximum delivered price shall be computed as follows:

### PART 622—CLASSIFICATION

[Amendment 176, 2d Ed.]

#### REGISTRANTS NOT ACCEPTABLE FOR TRAINING AND SERVICE BECAUSE OF NATIONALITY OR ANCESTRY

By virtue of the provisions of the Selective Training and Service Act of 1940 (54 Stat. 885, 50 U.S.C., App. and Sup. 301 et seq.); E.O. No. 8545, 5 F.R. 3779, E.O. No. 9279, 7 F.R. 10177, and the authority vested in me by the Chairman of the War Manpower Commission in Administrative Order No. 26, 7 F.R. 10512, Selective Service Regulations, Second Edition, are hereby amended in the following respect:

1. Amend § 622.43 to read as follows:

§ 622.43 *Class IV-C: Registrants not acceptable for training and service because of nationality or ancestry, neutral aliens requesting relief from training and service, aliens not acceptable to the armed forces or to the Director of Selective Service, and nondeclarant aliens who depart with intention not to return.* (a) In Class IV-C shall be placed any registrant:

(1) Who (whether a national of the United States or an alien), because of his nationality or ancestry, is within a class of persons not acceptable to the land or naval forces for training and service or to the Director of Selective Service for work of national importance under civilian direction. The Director of Selective Service will advise local boards which classes of registrants are not acceptable.

(2) Who is an alien and who is a citizen or subject of a neutral country (see § 601.2) and who, at any time prior to (i) his induction into the land or naval forces of the United States, or (ii) his assignment to work of national importance under civilian direction, files with his local board an Application by Alien for Relief from Military Service (Form 301) executed in duplicate. The local board shall forward the original of such form to the Director of Selective Service through the State Director of Selective Service and shall retain the duplicate in the registrant's Cover Sheet (Form 53).

(3) Who is an alien and who after classification in Class I-A, Class I-A-O, or Class IV-E is found by the land or naval forces to be unacceptable for training and service or by the Director of Selective Service to be unacceptable for work of national importance under the procedure prescribed by §§ 623.71 to 623.77, inclusive.

(4) Who is a nondeclarant alien and has departed from the jurisdiction of the United States, provided his local board has determined from all available information that it is his intention not to return to the jurisdiction of the United States. Such nondeclarant alien shall be classified in Class IV-C, even though he is a delinquent but this classification shall in no way relieve him

from liability for prosecution for violation of the selective service law. If any registrant so classified under this paragraph returns to the jurisdiction of the United States, his classification shall be reopened and he shall be classified anew.

(b) If a registrant is a national of the United States as defined in § 601.2 but also claims that he is a citizen or subject of some other country, such claim shall be disregarded and he shall be classified as a national of the United States.

## PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[Inventory Direction 12 Under CMP Reg. 2]

## HIGH CARBON STEELS IN SPECIAL FORMS FOR THE MANUFACTURING OF FILES AND RASPS

The following direction is issued pursuant to CMP Regulation 2:

§ 3175.112 *Inventory Direction No. 12.* Pursuant to paragraph (b) (2) of CMP Regulation 2, it is hereby ordered, That:

File and rasp manufacturers who require special high carbon steel in special forms and shapes necessary for use in the manufacture of files and rasps may accept delivery of an item of this special steel if the resulting inventory of that item will not exceed production requirements for the next 120 days notwithstanding the provisions of paragraph (b) (1) of CMP Regulation 2. This does not permit a user to increase his inventory beyond a practicable minimum working inventory as to any item which is obtainable in such quantities and frequencies as to render the exception authorized by this direction unnecessary.

All manufacturers of files and rasps are required to keep their inventories of special high carbon steel for use in such manufacture at a practicable working minimum level and may exceed the limitation established in paragraph (b) (1) of CMP Regulation 2 only when the procurable quantities pre-

clude compliance with the limitation. In such cases a user may not accept delivery of any item of this steel without permission of the War Production Board if the user's inventory of such item is or will become, by virtue of such acceptance, greater than the quantity required by current practices to be put into use during the succeeding 120 days.

Issued this 5th day of October 1943.

## PART 3270—CONTAINERS

[Limitation Order L-232 as Amended October 5, 1943]

## WOODEN SHIPPING CONTAINERS

Section 3270.5 *Limitation Order L-232* is hereby amended to read as follows:

§ 3270.5 *Limitation Order L-232*—(a) *Definitions.* For the purposes of this order:

(1) "Wooden shipping container" means any new shipping container made wholly or partially of wood.

(2) *Definitions.* "Shipper" means any person to whom a bill of lading or manifest is issued, or, in cases where these are not issued, any person who authorizes the shipment of a commodity.

(b) *Restrictions*—(1) *Manufacture and assembly of containers.* No person shall commercially manufacture or assemble any wooden shipping container which does not meet the specifications of any of the several tables of Schedule A applicable to that kind of container. The restrictions of this paragraph shall not apply to barrels.

(2) *Manufacture of container parts.* No person shall commercially manufacture any wooden parts designed for any wooden shipping container which, when assembled, will not conform with the specifications of any of the several Tables of Schedule A applicable to that kind of container.

(3) *Coloring.* No manufacturer, dealer in, or commercial user of wooden shipping containers shall dye, stain, or otherwise color containers or parts.

(4) *Printing.* All stamping, printing and labeling, unless otherwise required by law, shall be placed on only one outside surface of any wooden shipping container covered by the Schedules of this order, whether it be an end, a side, bottom, top or cover. The restrictions of this paragraph (b) (4) shall not apply to paper, labels or markings which only:

(i) State the capacity of the container in terms of whole or fractional pints, quarts, pecks, or bushels; or

(ii) in the case of baskets and hampers are identifying markings provided for in regulations of the Secretary of Agriculture issued under the United States Standard Container Act of 1928; or

(iii) are designed for the purpose of encouraging salvage and reuse of the

container, provided the label or printing does not include the name, brand, trade-mark or other reference to any person, firm, partnership or corporation.

(c) *Restrictions on packing and shipping.* (1) No person shall commercially ship in any wooden shipping container any of the commodities listed in Table I of Schedule B. This shall not, however, restrict the shipment of any commodity listed which has already been packed on the date it was included in this Table.

(2) No person shall commercially pack for shipment in any calendar or seasonal year, whichever is specified, any commodity listed in Table II of Schedule B in wooden shipping containers to an extent greater than the designated percentage of that commodity that he packed for shipment in wooden shipping containers in the specified base period.

(3) Except as permitted by this paragraph, no person shall ship in wooden shipping containers during any calendar or seasonal year, whichever is specified, any commodity listed in Table II of Schedule B (whether such commodities were packed by himself or received by him from growers or other packers) to an extent greater than the designated percentage of that commodity that he shipped in wooden shipping containers for the same grower or packer during the base period. Any grower or other packer may change his shipper. Any shipper may increase the amount of any commodity which he may ship for any grower or other packer, to the extent that the excess results from a change of shippers by the grower or packer. However, he may do this only if he reports by letter to the War Production Board, giving the name and address of the former shipper, the commodity, and the amount of the commodity which was shipped through the former shipper in the base period. This report shall be filed within ten (10) days after the transfer of the quota, or if the transfer shall have taken place before September 8, 1943, then within ten (10) days after September 8, 1943. Where a grower or packer does his own shipping he shall not have a separate quota in his capacity as grower and as shipper; and where a grower or packer changes his shipper so that he may do his own shipping, he must file the report called for in this paragraph (c) (3).

(4) *Exceptions.* The restrictions contained in paragraphs (c) (2) and (3) shall not apply to a person who in any calendar or seasonal year, whichever is specified, does not pack for shipment or ship more than 30,000 lbs. or one carload of a commodity, whichever is the lesser.

(d) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of appeal.

(e) *Violations.* Any person who wilfully violates any provision of this order; or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any depart-

ment or agency of the United States is guilty of a crime, and upon conviction, may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to War Production Board, Containers Division, Washington 25, D. C., Ref.: L-232.

(g) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

NOTE: The reporting requirements of paragraph (c) (3) has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

<sup>1</sup> The inside depth of this box may be increased up to 11½", either by the addition of cleats of any thickness or by the use of a solid end.

<sup>2</sup> The inside depth of this box may be increased up to 71¼" by the addition of cleats of any thickness or by the use of a solid end.

\* Wherever an asterisk appears, cleats may be used for such items, as provided for in paragraph (c) of the text of Table II.

(a) The designation in column (1) of Table II is merely for identification and shall not be construed as restricting usage. 'Inside width' and 'inside depth' of the container are the width and length, respectively, of the end pieces or end frames, exclusive of any cleats. 'Inside length' of the container shall be its outside length minus the combined thickness of both ends and of the center piece (if any).

(ii) To any person for use in packing fresh fruits or vegetables for delivery to or for the account of such government agencies; provided, the government agency's specifications require wooden shipping containers which do not comply with Table II; and provided further, such person furnishes the container or container-parts supplier with a written certification in substantially the following form, signed by an authorized official, either manually or as provided in Priorities Regulation No. 7:

"This is to certify that specifications of orders received by the undersigned from (designate government agency) require wooden containers not conforming with Order L-232. The material ordered herewith is for that purpose only.

Company-----  
By-----  
Title----- Date-----"

Such certification shall constitute a representation to the supplier and to the War Production Board as to the truth of the facts stated therein. The supplier may rely upon such representation unless he has knowledge or reason to believe that it is not true.

(c) *Restriction on consumption of pulp, paper and paperboard in the manufacture of certain named converted products.* (1) No converter shall consume in the manufacture or assembly of any converted product on List B, List C or List D of this order any quantity, in tons, of pulp, paper and paperboard greater than the quantity ascertained:

(i) For the two months period from August 1, 1943 to October 1, 1943, by applying two thirds of the percentage figure for each such converted product, as shown in paragraph (c) (2) of this order, to the quantity, in tons, of pulp, paper and paperboard consumed by such person in the manufacture or assembly of such product during the third calendar quarter of 1942;

(ii) For the final quarter of 1943, and for each calendar quarter thereafter, by applying the entire percentage figure for each such converted product, as shown

(1) No converter shall during the period from August 1, 1943 to October 1, 1943 consume in the manufacture or assembly of any converted product not named on List A, List B, List C or List D of this order, any quantity, in tons, of pulp, paper and paperboard greater than 33 1/3 percent of the tonnage consumed in the manufacture or assembly of such converted products during the first six months of 1943.

(2) No converter shall during the final calendar quarter of 1943 or during any calendar quarter thereafter consume in the manufacture or assembly of any converted product not named on List A, List B, List C or List D of this order, any quantity, in tons, of pulp, paper and paperboard greater than 65 percent of the tonnage consumed in the manufacture or assembly of such converted product during the corresponding calendar quarter of 1942.

(3) In the instance of any converted products not named on any of the lists of this order, the following processes and operations shall not be considered as processing:

(i) Cutting or trimming to a different size, when such cutting or trimming is performed as part of any established finishing room procedure and provided the paper or paperboard so processed is not intended for a use which serves to defeat the purpose of this order. (Example: The cutting of plain paper to a given size for use as a tray cover, the manufacture of which is curtailed by this order).

(ii) Punching or corner cutting.

(Examples: advertising streamers, posters, menus, programs, timetables, sheet music, patterns, decalcomania transfers, checks).

(ix) Printed wrappers when printing is the only conversion operation other than cutting or trimming.

(x) Embossing, corrugating, creping and crinkling for industrial and non-decorative uses.

(e) Alternate method of calculating quotas. As an alternate method of calculating quarterly quotas for any converted product, any person may, after the filing of a notice in writing with the War Production Board, elect to apply the percentages established by paragraphs (c) and (d) (2) of this order to one fourth of his total yearly consumption of pulp, paper and paperboard in such product during 1942. When such election has been made and the required notice in writing has been given to the War Production Board, the method of determining quotas may not thereafter be changed.

(f) Converter's responsibility in determining coverage of this order. It shall be the duty of each converter to determine in the first instance which of his products are included among the converted products referred to in this order. In case of doubt he may apply to the War Production Board in writing describing the product in question, for a specific ruling determining whether or not the same is so included. The War Production Board may of its own motion in any case, by telegram or letter, issue a specific ruling determining whether or not a particular product of a particular converter is so included.

(g) Inventory restrictions. (1) No person shall knowingly deliver to any converter and no converter shall accept delivery of, any quantity of any grade of pulp, paper or paperboard if the inventory of such grade in the hands of the converter accepting delivery is, or will by virtue of such acceptance become, either

(a) In excess of two carloads, or

(b) If in excess of two carloads, greater than 45 days' supply, on the basis of either his average rate of consuming such grade of pulp, paper or paperboard for the preceding quarter or his average rate of consuming such grade of pulp, paper or paperboard as projected for the then current quarter.

(2) After January 1, 1944, no person shall knowingly deliver to any converter and no converter shall accept delivery of, any quantity of any grade of pulp, paper or paperboard if the inventory of such grade in the hands of the converter accepting delivery is, or will by virtue of such acceptance become, either

(a) In excess of two carloads, or

(b) If in excess of two carloads, greater than 30 days' supply, on the basis of either his average rate of consuming such grade of pulp, paper or paperboard for the preceding quarter or his average rate of consuming such

grade of pulp, paper or paperboard as projected for the then current quarter.

(h) Allocations. The War Production Board may from time to time direct the production and delivery of specific quantities of any converted product included in this order. Such directions will be made to insure the satisfaction of war requirements both direct and indirect and essential civilian requirements and shall take precedence over any preference rating to the extent indicated by the War Production Board.

NOTE: Former paragraphs (h) through (k) redesignated (l) through (1); new paragraph (h) added Oct. 5, 1943.

(i) Applicability of regulations. This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(j) Appeals. Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(k) Violations. Any person who willfully violates any provisions of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance.

<sup>1</sup> Formerly Part 1149, § 1149.1.

**§ 3920.66<sup>1</sup> Conservation Order M-117—(a) Definitions.** In this order

(1) "Egyptian cotton" means the following varieties of raw cotton, of the grades specified below and all higher grades, according to the recognized Egyptian standards of classification:

(5) "Dealer" means a person regularly engaged in the business of purchasing raw cotton for resale. It includes an exporter, importer, agent, and broker, whether or not he owns the cotton.

**Restrictions**

(b) *Importation.* The importation of raw cotton of 1 1/8" to 1 1/2", inclusive, staple length shall be according to General Imports Order M-63, as amended from time to time, and, unless approved by the War Production Board on Form WPB-1615 (formerly Form PD-644), no person shall enter through the United States Customs for consumption, or withdraw from the bonded custody of the United States Bureau of Customs (bonded warehouses) such cotton. This restriction shall not apply to samples taken under a United States Bureau of Customs Sampling permit.

(c) *Sale, delivery, processing, use.* No person shall sell, deliver, buy, receive, process or use reserved cotton, knowing or having reason to believe that it is or will be sold, delivered, processed or used other than in one of the following specifically authorized transactions:

(1) Sales or deliveries to dealers.  
 (2) Sales or deliveries to the Office of Economic Warfare, the Commodity Credit Corporation, any other United States Government department, agency or corporation, or an agent acting for any of them.

*Provided*, That the amount of Egyptian cotton which may be used according to this subparagraph (2) shall not exceed the amount of Egyptian cotton used by him for stitching thread in 1941.

#### Equitable Distribution

(e) *Equitable distribution*. It is the policy of the War Production Board that the cotton described in this order not required to fill rated orders shall be distributed equitably. In making such distribution due regard should be given to essential civilian needs, and there should be no discrimination in the acceptance or filling of orders as between persons who meet the seller's regularly established prices and terms of sale or payment. Under this policy every seller of such cotton, so far as practicable, should make available an equitable proportion of his merchandise to his customers periodically, without prejudice because of their size, location or relationship as affiliated outlets. It is not the intention to interfere with established channels and methods of distribution unless necessary to meet war or essential civilian needs. If voluntary observance of the policy outlined is inadequate to achieve equitable distribution, the War Production Board may issue specific directions to named concerns. A failure to comply with a specific direction shall be deemed a violation.

#### General Provisions

(f) *Grading*. The War Production Board may require any dealer to submit any lot of cotton for classification by the Appeal Board of Review Examiners of the United States Department of Agriculture, whose findings shall, for the purposes of this order, be final in establishing whether the cotton is reserved cotton.

(g) *Reports*. Every owner, processor and holder (for his own account or for the account of others) of cotton 1½" or longer staple length shall file with the War Production Board, not later than the 15th day after the end of each calendar quarter, a report on Form WPB-2071 (formerly PD-597) showing the amount of such cotton held or owned by him on the last day of such calendar quarter. This reporting requirement has been approved by the Bureau of the Budget under the Federal Reports Act of 1942.

(h) *Appeals*. Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to

the particular provision appealed from and stating fully the grounds of the appeal.

(j) *Violations*. Any person who willfully violates any provision of this order, or who, in connection with this order, willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine and imprisonment. In addition, such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(k) *Applicability of regulations*. This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

**PART 3291—CONSUMERS DURABLE GOODS**

[Interpretation 1 as Amended Oct. 5, 1943, to  
General Limitation Order L-49]

**BEDS, BEDSPRINGS, MATTRESSES AND DUAL  
SLEEPING EQUIPMENT**

Interpretation 1 to General Limitation Order L-49, § 3291.70, is hereby amended to read as follows:

Some question has arisen as to the effect of L-49 upon the repair and renovation of used coil, flat, and fabric bedsprings. Paragraph (a) (5) of L-49 defines a manufacturer as "any person who manufactures or assembles bedding products . . ." and paragraph (a) (6) defines a renovator as "any person who repairs used bedding products."

Persons who obtain new or used parts, or used bedsprings, which they tear down completely and which they thereafter re-assemble into bedsprings are engaged in manufacturing operations regardless of the fact that only used parts may be involved. As manufacturers they become subject to weight and quota limitations on bedsprings contained in L-49. Persons who take used bedsprings and remove only worn parts of such springs which they replace with either new parts or parts which have been used in bedsprings other than the specific ones being repaired are renovators. Renovators of coil, flat and fabric bedsprings are not subject to any restrictions contained in L-49.

Issued this 5th day of October 1943.

**PART 3291—CONSUMERS DURABLE GOODS**

[Interpretation 2 to General Limitation  
Order L-49]

**BEDS, BEDSPRINGS, MATTRESSES AND DUAL  
SLEEPING EQUIPMENT**

The following interpretation is issued with respect to General Limitation Order L-49:

Some question has arisen as to the effect of L-49 [§ 3291.70] upon the repair and renovation of used innerspring mattresses. Paragraph (a) (5) defines a manufacturer as "any person who manufactures or assembles bedding products . . ." and paragraph (a) (6) defines a renovator as "any person who repairs used bedding products."

Persons who obtain new or used innerspring constructions which they use in the assembly of a mattress by combining the innersprings with filling material and covering them with ticking or other covering material are engaged in manufacturing operations, regardless of the fact that only used innerspring constructions may be involved. As manufacturers they become subject to the restrictions on production of mattresses, pads and pillows contained in L-49.

Persons who obtain a completely finished innerspring mattress with innerspring construction, filling and covering which they tear down and renovate by repairing the innerspring construction, re-working the filling material and re-covering where necessary are renovators, and as such are not subject to the restrictions in L-49 on the production of mattresses, pads and pillows. They are, however, subject to the restrictions on renovators of bedding products in the order.

Issued this 5th day of October 1943.

**RECORD KEEPING REQUIREMENTS**

**NOTICE OF OPPORTUNITY TO SHOW CAUSE**

In the matter of the amendment to the record keeping regulations, Part 516, issued pursuant to authority contained in section 11 (c) of the Fair Labor Standards Act of 1938.

Notice is hereby given of opportunity to show cause why the following proposed amendment to Title 29, Chapter V, Code of Federal Regulations, Part 516, issued September 15, 1941, pursuant to authority contained in section 11 (c) of the Fair Labor Standards Act of 1938, should not be adopted by the Administrator:

§ 516.1 (b) In addition to keeping other records required by the regulations, an employer who makes deductions from the wages of his employees for "board, lodging, or other facilities" (as these terms are used in section 3 (m) of the Act) furnished to them by the employer or by an affiliated person, or who furnishes such "board, lodging, or other facilities" to his employees as an addition to wages, shall maintain and preserve records, substantiating the cost of furnishing each class of facility. Such

<sup>1</sup> This record keeping requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

<sup>2</sup> Separate records of the cost of each item furnished to an employee need not be kept. The requirement may be met by keeping combined records of the costs incurred in furnishing each class of facility, such as housing, fuel, or merchandise furnished through a company store or commissary. Thus, in the case of an employer who furnishes housing, separate cost records need not be kept for each house. The cost of maintenance and repairs for all the houses may be shown together. Original cost and depreciation records may be kept for groups of houses acquired at the same time. Costs incurred in furnishing similar or closely related facilities, moreover, may be shown in combined records. For example, if joint costs are incurred in furnishing both housing and electricity and the records are not readily separable, the housing and electricity together may be treated as a "class" of facility for record keeping purposes. Merchandise furnished at a company store may be considered as a "class" of facility and the records may show the cost of the opera-

records shall include itemized accounts\* showing the nature and amount of any expenditures entering into the computation of the reasonable cost as defined in § 531.1 of the regulations, and shall contain the data required to compute the amount of the depreciated investment in any assets allocable to the furnishing of the facilities, including the date of acquisition or construction, the original cost, the rate of depreciation and the total amount of accumulated depreciation on such assets.<sup>4</sup>

All objections, protests or statements in opposition to or in support of the proposed amendment should be filed with the Administrator of the Wage and Hour Division, 165 West 46th Street, New York 19, New York, in writing, not later than October 21, 1943.

Signed at New York, New York, this 30th day of September, 1943.

Administrator.

tion of the store as a whole, or records of the cost of furnishing the different kinds of merchandise may be maintained separately. Where cost records are kept for a "class" of facility rather than for each individual article furnished to employees, the records must also show the gross income derived from each such class of facility; i. e., gross rentals in the case of houses, total sales through the store or commissary, total receipts from sales of fuel, etc.

\*No particular degree of itemization is prescribed. The amount of detail shown in these accounts should be consistent with good accounting practices, and should be sufficient to enable the Administrator or his representative to verify the nature of the expenditure and the amount by reference to the basic records which must be preserved pursuant to § 516.15 (c) (3).

<sup>4</sup>If the assets include merchandise held for sale to employees, the records should contain data from which the average net investment in inventory can be determined.

2. That Frank Castelli is the owner of the property described in subparagraph 3 hereof;

3. That the property described as follows:

a. Real property situated in the City of Memphis, Tennessee, known as 830 and 832 Poplar Avenue and 199 North Dunlap Street, particularly described in Exhibit A, attached hereto and by reference made a part hereof, together with all hereditaments, fixtures, improvements and appurtenances thereto, and any and all claims for rents, refunds, benefits or other payments arising from the ownership of such property,

b. All right, title, interest and claim of any name or nature whatsoever, of Frank Castelli, in and to any and all obligations, contingent or otherwise and whether or not matured, owing to him by the State Savings Bank of Memphis, Memphis, Tennessee, including but not limited to all security rights in and to any and all collateral for any or all such obligations, and the right to enforce and collect such obligations, and including particularly the bank account in the State Savings Bank of Memphis, Memphis, Tennessee, which is due and owing to, and held for, Frank Castelli, in the name of "Frank Castelli by Mario Castelli, Agent",

is property within the United States owned or controlled by a national of a designated enemy country (Italy);

And determining that the property described in subparagraph 3-b hereof is necessary for the maintenance or safeguarding of other property (namely, that property described in subparagraph 3-a hereof) belonging to the same national of the same designated enemy country and subject to vesting (and in fact vested by this order) pursuant to section 2 of said Executive Order;

And further determining that to the extent that such national is a person not within a designated enemy country, the national interest of the United States requires that such person be treated as a national of a designated enemy country (Italy);
