In the late afternoon of 9 April a flight of 8 VF's and 4 VF from the SHAMROCK BAY and STEAMER BAY were flying on a direct support mission to a target in the center of Okinawa southeast of Naha when the flight was engaged by intense medium and heavy AA. The flight was at the base of the overcast which was then about 1000-1200 feet. At least 7 bursts of heavy AA were seen in the immediate vicinity of the formation. Lt(jg) BATH'S plane was struck in the engine and on the port side in the fuselage, cockpit enclosure, turret, and stabilizer. A 20 mm shell exploded in the radioman's compartment and fragments struck both legs of the turret gunner. Ens. WOOLSEY's TB-3 sustained hits in the windshield on the port side and along the fuselage, elevators and stabilizer.

Fearing that his gunner was seriously injured Lt(jg) BATH'S landed at Yontan airfield and left the gunner there for medical treatment. His injuries proved to be minor and he has since returned to the ship.

On orders from CASGU the support group returned to base.
