SEED CORN PRICE LIST

FUNK BROS. SEED CO.

1922 BLOOMINGTON, ILLINOIS 1922

You cannot afford to plant inferior seed even if given you, when you consider the very low cost per acre of the best seed. Your work and investment must be backed up with high yielding seed if you expect any profit.

FUNK'S UTILITY TYPE CORN

GROWN FROM SEED TESTED FOR VIGOR AND FREEDOM FROM DISEASE

Funk's Yellow Dent
 Funk's 90 Day
 Funk's Leaming
 Funk's 329
 Reid's Yellow Dent

Funk's Iowa Silvermine
 Funk's Boone County White
 Funk's Johnson County White
 Funk's Bloody Butcher
 Funk's Prolific

These prices quoted below are for Funk Bros. carefully selected Seed Corn, — tipped, butted, shelled and graded, — ready for the planter.

Ear Corn in Crates—\$1.00 per bushel higher than the shelled corn prices.

PRICES: THE PRICE THIS YEAR OF THE SEED CORN DEPENDS ON THE NUMBER OF BUSHELS YOU WILL BUY. READ THIS TABLE CAREFULLY.

Seed Corn germinated for vigor and freedom from disease — every ear germinated, hand shelled and graded, \$10.00 per bushel.

If you are not ready to have your seed shipped now, send us \$1.00 a bushel deposit and we will hold it until you tell us to ship. This insures delivery when you want it. The balance is due when you order it shipped. In previous years we have held corn ordered, without a deposit. In some cases the order was not ordered shipped.

FUNK'S UTILITY TYPE SEED CORN

GERMINATED FOR VIGOR AND FREEDOM FROM DISEASE

Every ear tested on our germinators has been picked from the multiplying plots on the Funk Farms which for six years have been planted with only tested disease-free seed of the highest yielding strains. The ears selected are those showing apparent freedom from diseases.

Several kernels are taken from the whole ears, placed on the germinating tables and left for seven days. At this time the majority of the root rot diseases can be detected and the weak and diseased ears discarded.

When all kernels are free from disease and show strong root development their ears are retained. The desirable tested ears are shelled separately by hand and the kernels inspected.

PRICE. This year we are selling the tested seed corn at \$10.00 per bushel (½ bu. \$6.00) shelled and graded. We are not offering this seed in the ear because we can eliminate some undesirable ears by hand shelling.

An ear of corn may show freedom from disease over the germinator, but may be discarded by us after it is shelled on account of the quality or composition of the kernel.

We insist on your giving us an opportunity to make this "last ditch" test as it is just as much to our advantage as it is yours to have this corn yield the largest number of bushels of sound seed next fall. This is your insurance.

QUANTITY OF SEED TO PLANT PER ACRE

	Seed per acre	Pounds per Bushel
WHEAT	1½ bu.	60
OATS	2½ to 3 bu.	32
BARLEY	1½ to 2 bu.	48

SPECIAL PRICE ON CARLOAD SHIPMENTS OF OATS

(Over)

ASK US FOR PRICES where same are not given. Markets as we go to press are unsettled. A post card request will bring you a sample and price by return mail. In this way you will not pay more than you should.

All our seed complies with the requirements of the Illinois and other state seed laws.

It is mutually agreed and understood that any seeds ordered of us may be returned at any time within ten days after receipt if not satisfactory and money paid for them will be refunded, but we do not and cannot, in any way, warrant the crop, as it is dependent on so many conditions beyond our control.
