Why Wikipédia Menyang Sekolah (Wikipedia Goes to School?)

- Has been seen as an effective means to increase the number of contents through the regular meetings each week.
- Has been seen as an effective tool to gain more volunteers and or contributors, thus can grow the community.
- The on-wiki skills of the participants are expected to improve gradually with the regular meetings conducted every week.
- Enable the educational institutions to be aware of Wikimedia projects – particularly Wikipedia, how it works, and how the Wikipedia editing activities can be integrated with the institutions' curricula.
