

An easier way to edit Wikipedia.

The new VisualEditor offers an easy-to-use alternative to directly editing wikitext code. But there's one catch: you need to enable it.

1. Click on the “Beta” link in the top right corner. Make sure you are logged in first!

2. Scroll down to “Visual editing” and click the box next to it.

Visual editing

115,748 users are trying this feature.

3. Click the “Save” button on the bottom of the page.

Save

Restore all default settings (in all sections)

4. Edit any article by clicking the “Edit” button. The “Edit source” button will let you edit the wikitext code.
