test its sincerity. AT SAMOA.

coloured friends are no longer vexed by the high-handed Germans of whose ways he sent such frequent and bitter complaint to Europe. Here the Prince of witness one of the much-talked of "mandatek" in operation; the actual rescript has not yet been formally signed, sealed, and deliver-ed, but New Zeoland's officials are, in expectation of it administering the transferred islands of the group in runsferred islands of the group in ising of their economic interests upon he way in which they believe the a common basis, they will be far sague of Nations would have them from a negligible factor in the Em-pire's provenance.

to go. The Prince will lose touch with British jurisdiction at Samoa, not to most due north to Antigua, and then regain it until the Panama Canal has north again to the Bermudas, which, is thered him into another ocean. After in their "splendid isolation" of 580 ushered him into another ocean. After putting in at American Hawaii, he will have an unbroken stretch of leight days to the Mexican port of Acapulco. That haven has noither salubrity nor loveliness that it should be desired—it has been called the hottest and unbealthiest spot in either of the two Americaa mut it be the two Americaa mut it either of the two Americaa mut it either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in either of the two Americaa mut it huttest and unbealthiest spot in huttest and unbealthist spot in huttest and either of the two Americas-but it has oil, which counts above every is fit conclusion to the visias of an imperial survey. For in the instinct and that very practical reason imoses divergence from the bee-line to

THE BELGIUM OF THE SEAS. The outward stages of the Royal tour embraced the passage of the Canal, whose mechanical marvels, ike the romantic memories of the long-accurst and blood-stained lsthmus, can hardly stale, however, by repetition. It is under an alien flag that Drike sleeps in Puerto Bello harbour, but of the Power that he and his like founded, the Caribbean hears as lively evidence to-day as when England, France, and Spain made it instinctively the cock-pit of their quarrels. The West Indies are, indeed in some sort, the Belgium of the sens. St. Lucia has been seven imes French, and seven times Eng-

times French, and seven times Eng-lish. Rodney, Nelson, and Villeneuve knew the straits and anchorages of these waters as alphabetically as Marlborough, Turenne or Vauban must have done the dunes and ridges of Flanders. The planters of Jamaica were as typical of opulence two hun-dred years ago as the merchants in an easil passages, throat, and lunga an earlier day of Burges or Ghent. The West India do not grow their lit kills the germs and heals the sore

an earlier day of Burges or Gheni. The West Indies do not grow their picturesque variety of "mabob" now. Emancipation undermined the race of planter princes; Free Trade sent fi staggering; beet sugar brought it to an end. For the greater part of last century West Indian "depression" was chronic, and in the eyes of most Englishmen these colonies, which had ranked as the choicest prices of war-fore, sank into merely casual details of Empire. Before the war their for-tunes had taken a distingt, if gradual, upward turn. The imperial Govera-ment had made soms inter sameds

tic exploitation which he will observe every credit. but accuracy demands in a more advanced stage when he that there should not be any confu-
