GENERAL HEADQUARTERS  
SUPREME COMMANDER FOR THE ALLIED POWERS  
Economic and Scientific Section

APO 500  
6 January 1948

MEMORANDUM FOR: Military Government Teams

SUBJECT: Coal Mining Equipment Expediting Program  
Information Letter No. 3

1. On 24 December 1947, seventeen of the 106 factories designated as priority plants for the production of coal mining equipment were honored by the Minister of Commerce and Industry. A certificate award was presented to the plants because of the past nine months of outstanding production; efficiency of plant operation, maximum utilization of plant capacity and other related factors. It is anticipated that the second competition for future awards during the next 6 months production of coal mining equipment will stimulate manufacturing efforts in the designated plants. The awarded plants are listed below:

- |                    |                          |
|--------------------|--------------------------|
| Yubari Seisakusho  | Toa Ko                   |
| Tsubakimoto Chain  | Nihon Yusoki             |
| Seiki Seisakusho   | Honda Denki              |
| Mitsui Miiki       | Yasukawa Denki           |
| Kyushu Yusoki      | Seibu Denki              |
| Wakamatsu Shoyo    | Nagata Seisakusho        |
| Kokura Seisa       | Furukawa Kogyo           |
| Taisei K.K. Nagoya | Joban Seis., Taira Plant |
| Mitsubishi Denki   | Fukuoka Plant            |

2. On 15 January 1948 five plants will be deleted from the designated list. These plants are:

| <u>Code No.</u> | <u>Plant Name</u>              |
|-----------------|--------------------------------|
| 4008            | Takaoka Seisakusho             |
| 5004            | Mitsubishi Denki - Kobe Plant  |
| 5008            | Nishin Denki - Main Plant      |
| 8004            | Hitachi Seisakusho - Wakamatsu |
| 4012            | Kobe Seiko - Yamada Plant      |

These plants were deleted by the Machinery Bureau, Ministry of Commerce and Industry. All 106 designated plants were rated on the basis of the past nine months production effort. It is felt that the physical and operating characteristics of the plants listed above are such as to prohibit any additional increase in mining equipment production.

The expeditors will be assigned by the Machinery Bureau to other locally designated plants. This deletion is not to be construed as meaning cancellation of coal equipment production. Production will continue as usual; however, no expeditor or military government surveillance is required.

FOR THE CHIEF, ECONOMIC AND SCIENTIFIC SECTION:

J. Z. REDAY  
Chief, Industrial Division

GENERAL HEADQUARTERS  
SUPREME COMMANDER FOR THE ALLIED POWERS  
ECONOMIC AND SCIENTIFIC SECTION

9 December 1947

MEMORANDUM FOR: Military Government Teams

SUBJECT: Surveillance of Mining Equipment in Designated Plants.

1. Coal is still the bottleneck to Japan's industrial recovery. Electric power generation is being curtailed; steel output, fertilizer production and textile exports are hard hit by lack of coal for industrial consumption. Various cure-alls have been attempted. Food allowances to Japanese miners have been increased, additional funds have been made available to the mine operators, labor-relations have been smoothed -- still coal is not being brought out of the ground at a sufficient rate. Production per man per day is very low.

2. To increase per capita output is the current goal of the Japanese Government. We are convinced that better conveying systems, more efficient air circulation, better pumping apparatus and mechanical transportation to and from the coal face will definitely result in higher coal output per man. Added to the above are the workers personal tools of the trade - good mine lamps, well made coal picks, rock drills and accessories.

3. This is not mechanization in the American sense. As shown in the overall mining equipment chart, outstanding orders for mining equipment total well over a billion yen. Orders are increasing monthly. October figures show an increase of 123 percent, compared with outstanding orders six months ago. During the period May-October, 1947, production totaled approximately 920 million yen. New orders placed since May total approximately 865 million yen. Thus, for every 100 yen produced, 90 yen more are ordered. At the current low rate of production, it will require 6 months output to complete those outstanding orders now on hand.

4. The Military Government personnel concerned with mining equipment surveillance are in a position to overcome production bottlenecks in the designated plants under their jurisdiction using the following suggested procedure.

a. Constantly impress upon the Japanese expediter the importance of his job.

OSAKA M.G  
RES-COM-IND  
FILE 1-876

b. Check on the plant use of raw materials for mining equipment when using form MB-2.

c. Attempt to obtain increased capacity for mining equipment within designated plants.

d. Set production goals within each plant based upon previous knowledge of output and production methods.

e. Have each plant publicity conscious - keeping the workers informed of their task and its importance.

5. Know the designated plants in your area, direct and assist their production. More and better machinery for mine operators can and will result in increased coal production.

MEMORANDUM

SUBJECT: Information of General Application Pertaining to Directive Number (SCAPIN 1795), file AG 311 (8 Oct 47) CCS, this Headquarters, dated 8 October 1947 subject: Routing of Messages via United States Circuits

1. With reference to subject memorandum, the following is published for the information of all concerned.
2. Paragraphs 1a, 1b and 1c of the reference memorandum list certain directives in which recommendations for equal division of traffic volume between the three American carriers have been emphasized.
3. It is the purpose of the subject memorandum to open the way for acceptance by the Ministry of Communications of requests from filers of messages from Japan to the United States for routing of their messages via a specific American carrier.
4. Traffic thus routed at the request of the sender should not be considered as a part of the specific American carrier's share of equally divided traffic load since such routing will usually result from specialized services, available from the specific carrier in America, for which it should not be penalized.
5. Occupation Forces surveillance will not be required in this instance inasmuch as the subject memorandum is permissive rather than compulsory.

MEMORANDUM FOR: JAPANESE GOVERNMENT

THROUGH: Central Liaison Office, Tokyo

SUBJECT: Routing of Messages via United States Circuits

1. Reference is made to the following memoranda for the Japanese Government.

a. File AG 600 (8 Oct 45)GD, (SCAPIN 107), dated 8 October 1945, subject: Establishment of Expeditionary Force Message Service Between the United States and the Tokyo-Yokohama Areas.

b. File AG 676.3 (1 Dec 45)CCS, (SCAPIN 379), dated 1 December 1945, subject: Establishment of Sender Composition Message Service Between the United States and the Tokyo Area.

c. File AG 311.23 (17 May 46)CCS, (SCAPIN 959), dated 17 May 1946, subject: Extension of Press Wireless Service to Include VLT Messages.

2. Effective immediately the reference memoranda are modified as follows; The Ministry of Communications may accept and honor requests from filers of messages from Japan to the United States for routing of their messages via a specific American carrier. This will apply to all classes of messages, including those handled on a "Transferred Account" basis.

3. Such routed messages will not be considered as a part of apportioned traffic divided equally between the three American carriers, but will be deducted from the total volume, with the remainder being equally divided.

4. Direct communication between the Civil Communications Section, General Headquarters, Supreme Commander for the Allied Powers and the Ministry of Communications, on matters within the scope of this memorandum, is authorized.

FOR THE SUPREME COMMANDER:

SUBJECT: Information of General Application Pertaining to Directive Number (SCAPIN 805/1), file AG 000.93 (28 Jul 47) CCS, this Headquarters, dated 28 July 1947, subject: Establishment of Hourly Weather Circuits

1. With reference to subject memorandum, the following is published for the information of all concerned.

2. Due to technical inadequacies of the Japanese telegraph system, it has been found impossible to establish telegraph circuits and services covered by the original Memorandum (SCAPIN 805). If it becomes desirable to provide services of the nature originally specified some time in the future, they will be provided by communications orders.

3. Teletypewriters which were provided in Japanese meteorological stations were installed by the 43rd Weather Wing in cooperation with Eighth Army Signal Corps agencies.

4. Command channel instructions regarding the cancellation of the subject telegraph circuits and services and the removal of teletypewriter equipment will be forwarded.

1. With reference to the subject memorandum, the following is being published for the information of all concerned.
2. SCAPIN 1540, dated 22 February 1947, provided the Imperial Japanese Government with instructions for the delivery of incoming messages addressed to UNIPRESS, Tokyo, which included provision for censorship of such messages which were not classified as press. It has now been determined that all incoming messages addressed to UNIPRESS, Tokyo, whether press or not, are eligible for direct delivery to the office of the United Press Associations, without being subjected to censorship. Reference SCAPIN provides the revised instructions to the Imperial Japanese Government, in connection with the delivery of incoming messages addressed to UNIPRESS, Tokyo.
3. A command channel letter is being released concurrently to the Eighth Army, to provide for the revision in the surveillance required in this instance.

1. Information of General Application pertaining to Directive Number (SCAPIN 969), file AG 311.23 (18 May 46)CCS, this headquarters, dated 18 May 1946, subject: "Sender Composition Message Service for Approved Private Companies", is hereby rescinded and the following substituted therefor.

2. With reference to Memorandum Number (SCAPIN 969), to the Imperial Japanese Government, the following is published for the information of all concerned.

3. This Memorandum of General Application is reissued to clarify the meaning and status of the expression "private business firms and organizations" that have established offices in Japan at the invitation of the Occupation Forces.

4. Services to be provided in accordance with the subject memorandum for the Imperial Japanese Government are required in connection with the management and operation of business firms and organizations that have established offices in Japan at the invitation of the Occupation Forces to implement the accomplishment of the occupation mission in accordance with the present provision of General Headquarters, Supreme Commander for the Allied Powers, relating to their necessity for entry into the theatre.

5. Memorandum Number (SCAPIN 969) is a general directive covering the provision of services described and no command channel instructions are required in connection therewith. However, command channel instructions covering the authorization for specific business concerns, organizations or persons to use the service will be furnished to Commanding General, Eighth Army, by General Headquarters, Supreme Commander for the Allied Powers.

6. Instructions for providing necessary surveillance will be included in the command channel instructions covering individual authorizations.

**SUBJECT** : Information of General Application Pertaining to Directive Number (SCAPIN - 1122), file AG 311.3 (12 Aug 46) COS, this Headquarters, dtd 12 Aug 46, subject: "Residence Telephone Service for Foreign Nationals and Stateless Personnel Employed by the Occupation Forces".

1. With reference to subject memorandum, the following is published for the information of all concerned.

2. Instructions covering the procurement of residential telephone service for foreign nationals and stateless personnel employed by the Occupation Forces are in accordance with the following:

a. Request for telephone service will be forwarded through local military channels to the signal representative responsible for obtaining local service for Occupation Force personnel.

b. The Signal Corps representative will investigate and if no more than 200 meters of telephone plant will need be constructed, the request will be approved and the local representative of the Japanese communication service will be notified. The applicant will then be notified to file his order for service at the office designated by the Japanese representative.

c. At the time of applying for service, the registration fee and other standard charges, including the installation charge, should be paid.

d. Inasmuch as the contract for telephone service is a private one, not involving General Headquarters, Supreme Commander for the Allied Powers, the Japanese Ministry of Communications may, if it deems it advisable, collect a deposit in advance to guarantee payment of bills, and may terminate service if statements are not paid promptly.

e. When approving applications for telephone service under the terms of this memorandum, it should be assured that the service is required for either security purposes or in connection with the individual's duties since it is not intended that any special preference in the connection of service be shown when the need is only for personal convenience.

3. Command instructions pertaining to execution of surveillance are being released simultaneously with this memorandum.

SUBJECT : Information of General Application Pertaining to Memorandum, SCAPIN 1084, file 635 (25 Jul 46)CCS, this Headquarters, 25 July 1946, Subject: "Operation of Electrotechnical Laboratory".

1. With reference to subject memorandum, the following is published for the information of all concerned.

2. When permission was granted for the operation of the Electrotechnical Laboratory, researches for the development of television, radio and radar countermeasures, pulse modulated communications systems were prohibited. Radio and radar aids to navigation were later added to the list of prohibited items for research. Many developmental projects which fall within those fields of research that were prohibited, are not directed toward the development of implements of war. However, the laboratory could not continue work on such projects because of the restrictions imposed by SCAPINS 494 and 626.

3. Revision of overall research policy by SCAPIN 984 precludes the necessity for imposing specific restrictions of the type contained in SCAPIN 494 and 626. →

4. Surveillance of the activities of the laboratory is to be effected by agencies of the Occupation Forces. Command instructions pertaining to surveillance of laboratories are contained in Letter, General Headquarters, Supreme Commander for the Allied Powers, file AG 091.3 (25 May 46)ESS, Subject: "Surveillance of Research Activities".
