		Since Oct. 1945 many buildings in our factory were procured by 2nd NZEF for use as the Workshop of Vehicles, Garrison Engineer Shop, Petrol Point, Supply Point and various kinds of stores etc., and the interior roads between each building were used as though it were a public road. The surface of the roads were so damaged to the extent that made it very difficult for transportation of such end products as Duralmin and Aluminium which particulary required careful transportation, deposit temporary repairs made by this firm. These roads soon became slushy during rainy season and roughy in dry season because the surface was covered with clay, broken bricks and fragments of concrete bricks. And over underground passages were also damaged to the extent that made it impossible for passing of employees because the passage was flooded to a depth of about 5 feet in some part by leakage of water. Total length of this roads were 933 m.		5,330,788.20

(2) The List of Procured Movable Estates Which Were Not Returned

Date	Item	Number	Standard and Measure	Amo
			Since Oct. 1945, up to Oct. 1948, by order of Headquarter 2nd NZEF buildings in the area of the plant were requistioned together with utensils, furnitures, machines, implements, tools etc. belonging to the plant and attached houses. The items delivered to the Occupation Forces were confirmed by Liaison Committee of Shimonoseki Area, the precursor of Shimonoseki Liaison Office and Shimonoseki Liaison Office, on the basis of which a base contract was made with the Governor of Yamaguchi Prefecture who was in charge of Procurement; since then up to October, 1948 when released from requisition, the lease had been paid, but at the time of release the articles shown in following list were not returned. We required P.D. for them but couldn't get it in reason of the requistioned time was just after Occupation and delivering business was in confusion.

FIELD TRIP REPORT

R.G. STRADLEY

12 June 1950
Chofu

1. Purpose:

Inspection of Chofu Plant of Shinko Metal Industry Company at Chofu, Shimonoseki City.

2. Background:

Surveillance in accordance with O.D. 11.

3. Discussion:

In compliance with the request made by ESS, GHQ, SCAP a conference was held with Mr. Watanabe, Managing director of the company and the following facts were revealed;

a. Occupation of part of the plant by the Allied Forces

Name of Unit	Period	Remarks
U.S.A. Unit	7 Oct. 1945 - April 1946	
New Zealand Unit	April 1946 - Feb. 1949	Majority of New Zealand Units moved out in September 1948.

b. Fires.

Classification	Date	Damage
First Fire	14 June 1947	¥1,380,000
Second Fire	21 August 1947	19,062,000
Third Fire	30 December 1947	3,189,000
Fourth Fire	24 February 1948	1,588,000
Total		¥25,219,000

NOTE: (1) Damage figures exclude the insured amount already paid by the insurance company.

(2) At the time of the fourth fire a building not under P.O. was burned down and the building next to it which stored blankets etc. was ransacked.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO: [redacted]

c. Total damage.

Amount	Remarks
¥ 25,219,000	Damages done by fires.
6,750,000	Reimbursed by Japanese Government in May 1950.
4,000,000	Movable property stolen, Furniture, etc.
67,000,000	Building tone down, remodelled.
¥ 102,969,000	

NOTE: (1) Detailed documents were not available as Mr. Takahashi, president of the company and Mr. Mineuchi, liaison officer of Correspondent Section took the documents with them to Tokyo where they were negotiating with the central government for further reimbursement.

(2) Mr. Watanabe stated that the total damage done by the New Zealanders would amount to approximately ¥120,000,000 and there were some more items damaged for which he could not account due to lack of documents.

(3) According to Mr. Watanabe the total amount to be reimbursed by the Japanese Government would in all probability amount to one fourth of ¥120,000,000, the total damage done to the company which excludes the insured sum paid by the Insurance Company.

d. Evidence.

Upon the request of the Finance Ministry the Company submitted to Yamaguchi Prefectural Government receipts signed by New Zealanders for furnitures removed from the plant but the receipts were lost by Prefectural Liaison Office prior to submittal to the Finance Ministry.

At one time when the individuals of New Zealanders removed Aluminium sheets a company man jotted down the truck number and notified the police which in turn contacted the Military Police. Out of 200 sheets removed 50 sheets were then returned to the company.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO.

Approximately thirty (30) tons of cement and much fine furniture were removed but none of them were returned to the company.

The company received certifying papers from the New Zealand Unit confirming that the four fires broke out while the New Zealanders were stationed there. These documents were sent to the Finance Ministry.

e. Output.

Item	Amount (Ave.)	Remarks
Chofu Plant:		
Copper and Brass	¥ 25,000,000	170 tons
Aluminium	40,000,000	
Moji Plant:		
Copper and Brass	45,000,000	
Total	¥110,000,000	

NOTE: Production figures and specification of Aluminium and Aluminium Alloys and Copper and Brass are in our file.

f. Furnace.

Classification	Kind	Total Number	Remarks
Brass Melting and moulding shop	Electric furnace	5	120 KW, 700 kilograms per charge, 5 charges per day.
Aluminium Alloy Melting and Ingot shop	Gas furnace	4	10 ton, 2 charges per day.

g. Labor.

There are 1,200 workers and 300 staff, a total of 1,500 employees. Approximately 1,400 employees have organized into one union which is affiliated with the Japan Federation of Labor Unions (Sodomei). No labor trouble was in evidence.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. [illegible]

h. Accidents

Classification	No. of accidents per month	Remarks
Major accident	2 - 3 cases	Out of work more than 14 days.
Medium accident	10 - 11 cases	Out of work more than 3 days but less than 14 days.
Minor accident	25 - 30 cases	Out of work less than 3 days.

i. Production cost.

From moulded metal to aluminium sheets,

Raw material,	¥120,000
Processing,	60,000
Total	¥180,000 per ton

NOTE: According to Mr. Watanabe the prevailing production cost per ton of Aluminium sheet in the U.S.A. is about ¥180,000 and that the company is trying to export it to foreign countries at almost no margin of profit since the exchange rate was changed from ¥550 to one U.S. Dollar to ¥360 to the same.

j. Reduction in production costs by means of quality and cost controls is a vital problem on which the company is working hard since national subsidy on the raw materials was stopped in April 1950.

4. Conclusion:

a. Maj. Freeman, Civil Affairs Section, GHQ, SCAP was briefed by telephone from Office of Shimonoseki Sub-Branch of Yamaguchi CIC on the Summary of the damage done by New Zealanders and on the fact that president Takahashi was due to leave Tokyo on the morning of 13 June for Shimonoseki but Mr. Mineuchi, who is well versed in the case and who had all necessary papers would be available at Tokyo Branch of the company located in the Nittsusei Building (Tel, Ginza 57: 5101-6, 1785)opposite the Imperial Hotel.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO.

b. Mr. Watanabe was requested to submit a report to this Headquarters with respect to the following points in consultation with Mr. Mineuchi upon the latter's return to the company from Tokyo.

(1) List of damage caused by the New Zealanders.

(a) Date

(b) Nature of damage

(c) Monetary extent of damage

(d) Amount recovered by company either from the Japanese Government or Insurance or otherwise.

(2) List of items removed by the New Zealanders.

(a) Date

(b) Circumstances under which they were removed.

(c) Specification of items.

(d) Value of items

(e) Were the items paid for by the New Zealanders or removed without reimbursement.

(3) List of Procurement Demand numbers effecting this plant.

c. The Chofu Plant of Shinko Metal Industry Company is the largest and ranks first in production of Aluminium and its alloys among 50 metal industry plants in Japan.

In the production of copper and copper alloys the Shinko Metal Industry company including both the Chofu and Moji Plants ranks second among 140 similar plants in Japan.

Consequently the company is considered as one of the most important plants in Japanese metal industry.

5. Recommendation:

Mr. Watanabe was advised to contact the recently set up Tokyo Branch of continental Brass company to see if there is any possibility of marketing the company's products.
