THE ECONOMIST.

minutiæ, lest it might be said in their borough or their county that they were fickle in their allegiance, and were thwarting the chief whom they were elected to serve and aid. Now it would be most false to say that the nation has with-drawn its confidence from Mr Gladstone. On the contrary, any member who spoke treason of Mr Gladstone in his constituency would still risk grave odium, and incur heavy suspicion. But nevertheless it would be uncandid not to admit that there is a change. There is not the same in-cessant profession of allegiance to Mr Gladstone in the speeches of Liberal members; there is not the same idea that if they praised Mr Gladstone and said they would follow him, they had done all which their constituents wished, and need not think of anything else. In truth, though public confidence has not been seriously withdrawn from Mr Gladstone, public attention has been greatly diverted from him. For months past the English people have been reading little and thinking of little but of the wonderful history of the great war between France and Germany. Their minds have been full not of domestic matters, but of the defeat of the French, the capitulation of Sedan, the fall of the Empire, and the siege of Paris. And with the war Mr Gladstone has nothing to do. Hardly any Minister would have been able to express the sort of feel-ing with which we watch the great duel. A Minister speaks with so great a responsibility that in such a crisis his tongue is almost frozen, and his words, from a sense of duty, are trite, such as no one can object to, and therefore such as few will much care for. Nor is Mr Gladstone the sort of Minister to like such a theme, and to make the most of it. He is emphatically a man of peace, bred in a school of peace. He has every sort of complex eloquence; he excels in elaborate exposition, and in effectual refutation; but in the simple, wonderful words which make more of a great topic than any one else can make of it, he does not abound. Some great orators on such a topic as the war could say something which everyone would make their ownwhich everyone would remember-which everyone would wish to have said. But Mr Gladstone, among his many wonderful gifts, does not reckon that of such magical and memorable, though in their sentiment common, words. In consequence he has not ruled the public thought upon the war, and our attention has been a little withdrawn from him.

It must be added too that Mr Gladstone's genius is essentially suited rather to great things than to small things, and yet that, as if perversely, he is rather fond of small things. He has written many things this recess, no one of which is very faulty, and yet no one of which is very excellent, and each one of which hurts the feelings of some section of his miscellaneous followers. Not having the gift of treating the main subject with special excellence, he has not had the gift of silence on minor matters; and though he treated them needlessly, he has not treated them very well.

Secondly,—the Ministry came into power with a list of subjects, which they were known to be singularly suited to treat, and three of these of the first magnitude—the Education Bill, the Irish Land Bill, and the Irish Church Bill—they have treated admirably well. But now, in consequence of the war, a whole crop of half-discussed questions may arise, and have arisen. And on these there is not the same confidence in the Government. Mr Gladstone is a true pupil of Sir Robert Peel, and has always attended much more willingly and much more fully to interior than to foreign questions. Lord Granville has written admirable dispatches, and the best and closest observers have the most confidence in him. Still he was suddenly summoned to deal with new questions, on which there was little precedent, and no established opinion. Some of these are still pending, and it would be premature in the nation to express or feel approval when the result to be approved of is as yet incomplete and marrived at.

Some persons think that there are great dangers close ahead to the Ministry arising out of these foreign questions. And we admit that foreign questions, when of magnitude, are, above all others, dangerous to a Government. They are very apt to divide its followers. A Member of Parliament may have the best confidence in a Goverment on a set of familiar and known subjects; but if, on a sudden, some strange and unfamiliar foreign question arises, he may, without blame or inconsistency, be dubious or oppose. And the constituencies may and will

do the same. In this shifting world a Ministry elected upon one set of questions is apt to be instantaneously weakened if another set is suddenly substituted. But though this be the unfavourable general doctrine, we do not for ourselves in this case much fear any especial danger. We have much confidence in Lord Granville, and even more confidence in the tendency of the world. To turn out a very strong Government, the critical issue must be of immense importance—must affect peace or war, national honour or national dishonour. Now the principal Power in the present political world is Prussia, and Prussia must want present peace—temporary rest. She will not seek to quarrel with us, and without her consent and instigation no one else will. And therefore, though prophecies are rash, we expect and believe that no foreign question will destroy the Ministry, but rather that their adroit and sound dealing with foreign affairs will support and strengthen them.

But the new foreign questions are not the only new ones. The war has on a sudden changed "army reform ' from a future possibility to a present necessity. And the subject is in a most singular state. The present generation of Englishmen are very ignorant of military matters ; they have scarcely thought of them ; they have never had the opportunities and the means of thinking effectually about them. Not being a military nation, we have no traditions to guide us. And yet we have an ancient fame to support, and a legacy of engagements which may require prompt action. We have, in a word, to make "bricks without straw." We know that we ought to obtain a better army than we now have, but we do not accurately or sufficiently know in what it should be better, or how we should begin to make it better. Naturally therefore we look to the Ministry, and we look in vain. Both Mr Gladstone and Mr Cardwell are followers of Peel, and therefore, as we have said, men who think much of peace and of hardly anything save peace. Neither of them would pretend to have studied the structure of armies or the details of war during the main part of their lives. What they have learnt they have learnt recently, and learnt for this emergency. And therefore, though they may perchance propose what is right, they will not be able to speak as having authority, and to induce those who are unable to judge for themselves to accept their plans with just confidence. On military matters we have a crammed Minister speaking to an ignorant nation, and this is very dangerous. Very likely the defect will not snake the Govern-ment. The professed army reformers are wholly disagreed, and we may have to accept what Mr Cardwell gives us, though we distrust it, because we do not at all know how to get better. Yet such grudging acceptance is almost as fatal to the prestige of a Ministry as a defeat itself.

Thirdly,—the Ministry began with a full Exchequer, and with money to give away, and this year they will have an empty Exchequer, and must have new money. This is no way Mr Lowe's fault. His calculations have been cautious and sound, and not so good as the result. But the new changes in the army—whatever they are—must cost money. The necessity of new taxation in such a case will of course not ruin a strong Government, but it tends to weaken it, and deprives it of the source of strength which pleasant Budgets and remitted taxation always give.

Fourthly,—the Government started with an absolutely united party. All sections of Liberals had sworn a common allegiance to Mr Gladstone, and had sworn it equally, or almost equally, and there is no real split yet. But there is in many constituencies the beginning of a feud—in some an actual feud—between the Liberals of the working class among the new electors added by the Reform Bill, and the Liberals of the middle class, who before had the suffrage. The working men hate the old "committee" who used to manage the party tactics ; and the old voters will not be ruled or let those tactics be managed by a new committee of artisans. And probably this division, in many localities, may in Parliament take another form. Many members may now complain that since Mr Bright's retirement, the ultra-Radicals are not represented enough in the Cabinet, who would not have said so had there not been a new Radical section in the constituency to win and please. "Straight voting" has as yet been the peculiar pride of the Liberals in this Parliament, but perhaps to the same degree it will no longer be so.

Fifthly,—the Ministry started without a competitor. The great strategy of Mr Disraeli had landed his party in a "slough of despond." They had the reproach of having

## THE ECONOMIST.

passed a Radical Reform Bill, and the pain of having only helped Radicals and Liberals by it. They did not pretend to try to turn out the Government, or to be able to substitute a more acceptable one for it. And this advantage, almost undiminished, they still retain. The Liberals may have lost, but the Conservatives have not gained. Mr Disraeli's voice has not been heard for months on any vital matter. He has not said anything about the war which anyone remembers, and as to army reform, we know he objects to "bloated "armaments," and we know nothing else. He and his followers cannot fairly claim to treat the new subjects better than Mr Gladstone and his followers treat them. And on this ground we believe the Ministry will stand firm. If they had only a majority of ten—if they were watched by an active and enterprising Opposition, believing in itself and trusting its leaders—if these leaders could make a Cabinet better for the impending problems than the existing Cabinet we should think a change probable, or at least not improbable. But a strong Ministry with a weak Opposition is an army without an enemy, and till there is an enemy it cannot be overthrown or conquered.

## THE FINANCES OF THE CITY OF LONDON.

In another part of our impression we present our readers with a document, which we may venture to say possesses a good deal of novelty and interest—an abstract of the accounts of the "Corporation of London" for two years, 1868 and 1869, which are the last for which the accounts are made up. The accounts for the City of London, notwithstanding its position as the chief municipality in the country, have not before been made public in any popular and complete shape. The accounts of the City Chamberlain themselves are regularly printed and circulated; portions of them are from time to time made public, and we have ourselves more than once made comments upon them; some of the accounts are also presented annually to Parliament, in consequence of special Acts, such as those relating to the coal and wine duties ; but no attempt has been made to give a complete view of the accounts of any one year, so as to show at a glance what the income and expenditure of the City have been. One reason of this perhaps is that the accounts are both numerous and complicated, not adapted to show the broad result which would be of so much interest. We hope, however, the deficiency will now be in part supplied by the abstract which we publish, and which may perhaps be useful to members of the Common Council themselves, who often complain of the difficulty of understanding the accounts.

Before commenting on the figures, it may be useful to explain one or two points connected with these accounts. As they appear in the printed copy before us they are forty in number, occupying about eighty folio pages, and as they are not summarised, we can well understand the difficulty of understanding them. But to construct a summary, showing the receipts and expenditure of each year, and which shall be substantially accurate, is perhaps not so difficult as it looks. Some of the accounts when examined are found to be capital accounts-at least not dealing with the receipts and expenditure of the year-or subordinate, only showing in detail the items of some other account; a few, so far as the year's transactions are concerned, contain nothing but items transferred from other accounts, and may therefore be disregarded ; and there is a third class, relating to charities, where the Corporation only acts as trustee, and the accounts are thus not strictly the accounts of the Corporation in its public capacity as representing the City of London.\* Disregarding these, we find it necessary to deal only with the items in twenty-six accounts out of the forty, and in many of them the items of receipts and expenditure which are not mere transfers from other accounts are sometimes few or none. It is likely enough that in such voluminous accounts we have mistaken some items ; but we feel confident there is no serious error-that the abstract contains on the one side every receipt

\* The amount of these accounts is :---

	24
Gresham Estate	8,000
City of London School	8,000
Scholarships	850
Freemen's Orphan School	4,929
Admiral Duff's Legacy	35
	91 914

nly by the City of London Chamberlain from the public and every to payment to the public in the years in question.

The importance of the Corporation is shown by the totals of the accounts. The City of Londor receives and spends about two millions sterling a year, having actually received and spent—

Receipts. Expenditure. £ £ £ In 1868 ...... 1,879,835 ..... 1,844,049 In 1869 ...... 2,156,649 ...... 2,171,626 These are very large amounts to deal with, and some curiosity may well be entertained as to how the amounts are made up. And, first—with regard to the receipts, the most important element appears to be the new loans of the City, on account of Holborn Valley and other improvements. The following is an account of the loans in the two years :--

	1868.		1869.
	£		£
City's Estate account	105,000		60.000
Rebuilding Blackfriars Bridge Metropolitan Meat and Poultry Market—site		***	50,000
and approaches		******	234,000
Ditto ditto-Western approach	***		201,000
Holborn Valley Improvement	550,000	******	700,000
Commissioners of Sewers	80,000		

735,000 1,245,000

Deducting these amounts from the above totals of the receipts, we find that the City received in 1868, from other sources than borrowing, 1,144,825*l*, and in 1869 911,649*l*. This appears at first sight a diminution of income to the extent of 200,000*l* in 1869 as compared with 1868; but the receipts include a great many miscellaneous items, and the opinion that the City's real income is diminishing ought not to be hastily formed. That this is a danger of the City's finance we believe, and have more than once endeavoured to show; and the accounts themselves, when farther examined, may throw some light on the point.

in the second second and the second second	1868.		1869.

..... 612,575 ..... 668,442 Total taxation ..... It may be doubted whether it is quite accurate to classify all the items under "tolls and fees" as taxation. The income from the markets especially might with some propriety be considered as rent-the return upon capital invested in the construction and maintenance of the markets. But this doubt constantly arises in municipal accounts, and the custom is to consider such charges as taxation. The reason is that markets are established and administered for the advantage of the whole community, and any direct revenue derived from them diminishes the indirect gain of the community, in which view the source of revenue is really a tax. According to this account, the principal ordinary receipts in the City accounts are from taxes. The balance of receipts, deducting loans, as we have seen, amounted to 1,144,8251 in 1868 and to 911,649/ in 1869; and deducting farther the above sums of 612,575l and 668,442l for taxation, we have only to account for in other ways the sum of 532,250l in 1868 and 243,207l

in 1869. Considering the market charges, &c., as income in the nature of rent, there would still remain about half-amillion for rates and taxes in each year. Some of the taxes, however, viz, the coal duties, are paid not by the citizens of London exclusively, but by the whole Metropolis.

THE ECONOMIST.

303,660

How is the balance of receipts made up ? To answer this question thoroughly, a minute comparison of a great many items would require to be made, but practically the only remaining item is the City's income from property. The great excess of 1868 over 1869 arises mainly from the former year, including two unusual items :--

which are only represented in 1869 by a sum of 1,2901; so that in reality, as respects ordinary income, we have only to compare 228,590/ received in 1868 with about 241,917/ received in 1869. Of these amounts what may be considered the estates of the Corporation yielded :-

(1)	The City's Estate: Rents and qu't-rents Renewing fines Interest on Government securities Interest on temporary investments	1868. £ 76,885 5,820 704 2,255	******	1869. £ 75,171 3,687 3,360 
		85,664	*****	82,218
(2)	The Bridge-house Estates : Rents and quit-rents Dividends on Government securities	$41,416 \\ 3,083$	******	43,562 713
		44,499	******	44,275
(3)	Interest on investments in reserve fund			292
(4)	Rebuilding Blackfriars Bridge-rent	100		107
(5)	City Police Superannuation-Interest on investments and Government secu- rities	3,073		2,570
(6)	Rent of offices at Coal Market	2,351		2,295
(7)	Dividend on Consols-City of London Court	249		343
(8)	Chamberlain's India 5 per Cents	2,065		2,062
(9)	Chamberlain's profit on floating ba- lances	21,462		16,020

Total ...... 159.463 ..... 150.182

In addition there are some items such as "rent and old " materials" in the Holborn Valley Improvement account, which obviously include receipts from property of some kind ; but the above are the only items which we can clearly distinguish. It would certainly appear from this that the City's estate was less profitable in 1869 than in 1868, yielding about 9,000/ less, and there being a diminution in almost every account. One of the sources of receipt however-that of the " employment at interest of floating balances in Chamber ' must be of a fluctuating character, and the falling off in it from 21,462l to 16,020l accounts for 5,442l of the diminution of income. But what can be the use of such large floating balances to be a source of income at all? When the City has to borrow so much, will not the whole operation be a source of loss ?

Deducting these sums of 159,463l and 150,182l from the receipts, the miscellaneous income of 1868 and balances of 1869 would be 372,7871 and 93,0251 respectively-the former amount however including 303,000l for the sale of securities, as above stated, against 1,290/ in the latter The miscellaneous income, as will be seen, consists mainly of reim-bursements on various accounts to the Commissioners of Sewers and Police, sale of old materials in the Improvement accounts, and other casual receipts, of which the details need not here be given.

Altogether the receipts of the Corporation may be summarised thus :-

RECEIPTS.

Paid Treasury for Thames Embankment	191.253		193,855

362,746 819,298 \*\*\*\*\* Most of these items are repayments of loans or purchases of income-producing property, which have a similar financial effect to the repayments of loans, and they ought perhaps to be dealt with in the capital account of the Corporation-a corresponding deduction being made from the receipts of borrowed money on the other side. The items of sort amount in 1868 to 98,5401, and in 1869 to this 572,8621, and deducting these from the loans of the year above specified, it would appear that the actual addition to the indebtedness of the Corporation in each year was :---£

Paid Treasury for Thames Embankment... 191,253 ..... 193,855

In 1868 ..... In 1869 ..... 636

672,138 The other items, being the last three, amounting to 264,206l in 1868 and 246,436l in 1869, are not payments by the Corporation on its own account, but the restitution of taxes which it merely collects for others. Deducting them from the amount of taxation on the other side, it would appear that the actual taxation wholly administered by the Cor-poration, both as regards receipts and expenditure, was 348,369/ in 1868 and 422,006/ in 1869. Deducting both totals from the gross expenditure, there remain to be accounted for as the proper outlay of the Corporation 1,481,303/ in 1868, and 1,352,328/ in 1869.

According to a classification, which we subjoin, of the numerous detailed items, these sums would appear to have been spent as follows :-

1868

## THE ECONOMIST.

items, the remaining expenditure would amount in 1868 to 502,2671, and in 1869 to 508,1961-these being the sums, apart from improvements, which the Corporation has actually expended. But half-a-million a year is still an enormous amount to go through the hands of a single municipality, governing the mere nucleus of a vast city. It is something to know that the local administration of so narrow an area is so costly. How it is so costly we shall not at present inquire. It is obvious, however, that there are several items, especially the vague one of the civil government of the City, and the miscellaneous expenditure on entertaiments and the like, amounting to nearly 100,000l of the expenditure, which are peculiarly open to suspicion. The Corporation has no business to waste so much, when taxes require to be imposed for police and other purposes. In all probability besides, the expenses of managing the property and the markets, and of the various improvements, include innumerable establishment charges, which are so many sources of waste. Anyone who looks at the accounts narrowly will see that numerous officers are paid by contributions from more than one account, just as the higher officers in the army have two or three different All such arrangements are necessarily wasteful, and salaries. financial reform in the City must commence with amalgamaticn.

The question of the City accounts, however, is really part of a much wider one— the local taxation and expenditure of the Metropolis. One of the chief sources of confusion has been the mystery about the finances of the Corporation. Wanting correct information here, no one has been able to tell the present cost of our local government, or show all the reasons and advantages of centralising our local authorities. We hope the figures we now publish will facilitate the labours of reformers. It should, at any rate, be possible now to exhibit the financial condition of the Metropolis as a whole, and point out the sources of waste and expense which exist in the division of authority, the multiplication of officials, and the concealment and complexity of the accounts.

### MARSHAL PRIM.

THE want of interest felt by the general public of Europe in the details of the assassination of Marshal Prim is a very remarkable, and, as far as we know, an unprecedented fact. His death was of course telegraphed all over Europe, and was regarded in some ways as an event of the first importance; but there was little or no curiosity to learn the details of the catastrophe,-none of those long telegrams, full of nothing, which would have followed any other crime of the same kind, and extraordinarily little sympathy expressed, except for King Amadeus who had not been shot. Europe apparently cared only about the results of the event, and but little about the event itself-a sure proof that it was but little interested in the personality of the sufferer. And Europe, as is usually case, was right, for apart from his position, there was the That posivery little to interest mankind in Marshal Prim. Marshal Prim tion was without doubt exceptional. was probably the only perfect example of the Interrex, of the King who is not King and never means to be King, ever seen in the modern world. He ruled a very great country with an un-broken success as Dictator for two years, and yet he never regarded himself as one of the possible candidates for the permanent Sovereignty. For two years there has practically been in Spain no law but Marshal Prim's will ; throughout that period he has objected to any régime except the Royal, and yet it seems clear that he had no intention of putting the Crown upon his own head, that he honestly regarded himself as a mere Dictator ad interim, bound to carry out a specific change in the destinies of his country. That is a strange position, and it is not rendered less strange by the entire absence of genius in the man who occupied it. We desire to speak kindly of Marshal Prim, for his murder was a disgrace to the party which either organised or allowed it ; but it is probable that no man so entirely an ordinary man, no man so completely without a following created by himself, ever occupied so lofty a position. It is of course difficult, if not impossible, thoroughly to estimate a man whose secret history has yet to be written; but Marshal Prim appears to us to have been merely a good officer, a trustworthy General of Division, distinguished from other good officers mainly by this -an exact and somewhat unusual comprehension of his own His earlier life was passed as an officer believed capacities. to be of ability, who shifted from party to party as a new party rose to power, but who was so little of a partisan that in shifting he lost no respect, and none of the military confidence of his subordinates. In the short and not very important war between Spain and Morocco he behaved remarkably well, finding, during a momentary confusion, an opportunity for the display of his most exceptional faculty-one, however, which he shares with many soldiers-bravery of the kind which increases as the danger grows more imminent. Mankind in general, not being brave, values bravery very highly ; and

THE ECONOMIST.

there is no doubt Marshal Prim possessed the quality in its | supreme degree,-the degree in which it is exceptional-that he was brave to the point at which a man is more of a great man in extreme danger than he is when quietly seated in a room. In the intrigues which followed this war Prim displayed no especial quality, except that of com-manding the confidence of soldiers; nor in the Revolution or in the Interregnum, was he ever more than the good General of Division ; but then he was the good General of Division, and not the indifferent one. Having driven out his mistress-whom he hated as, on the whole, a discreditable Head for the Spanish Army—his idea was to maintain mili-tary order until a new Sovereign or Commander-in-Chief could be discovered, and he never interested himself much about any other point. No Revolutionary Government was ever quite so wanting in originality. General Serrano and Admiral Topete had assisted him, so General Serrano and Admiral Topete were to have great offices-any offices, in fact, they liked, provided they left the Army in the hands of Prim. Civil appointments were given pretty much as it happened. Foreign affairs took their chance, except in so far as they involved military considerations, in which case the Marshal took them into his own hands. As for internal Government he regarded it as most officers regard internal Government. A King was usual and necessary, so he sought for a King. Cortes were usual, so Cortes were elected. Freedom was popular, so, as far as was consistent with the Marshal's notions of order, freedom was allowed. As we understand, he never init might be possible and advisable to do without a King. terfered much with any manifestation of opinion until opposition showed itself in the form he understood-in insurrection in the streets of some city, and then he put it down, with shot and steel if he could, if not, with shell, differing from other officers only in this-that he would go any length, would actually batter down any city of Spain rather than not secure the victory. As he was a really good officer, thoroughly trained and full of experience, and opposed to untrained men, he always succeeded; and when he had succeeded, he went quietly on again without any additional bitterness. The true grievances of Spain seem never to have struck him. The true wants of Spain never particularly moved him. There was to be order till the historic system was rebuilt, and at any sacrifice he obtained the order he recommended.

He did not originate anything, or make any experiments, or engage in any desperate intrigues, but just went on as a good general officer would, intent on his idea of maintaining the tranquillity of his district. That he succeeded is due to the fact that he was a good officer, that he could secure ordinary military obedience, and that, this secured, his force was adequate to its work.

There are but two original points in Marshal Prim which lift him out of the ruck of continental second-rate generals. The first was a certain indifference to anything out of the range of his ideas, which enabled him to leave a good deal of power to men whom most military Dictators would have interfered with, such as his civilian colleagues; and the second, as we have said, was a clear idea of the ultimate limit of his own pretensions. He was competent to be a chief administrator under a King, but he was not competent to be King himself. Most men in his position would have sought the Crown, but he did not; on the contrary, he, being a Spanish officer at heart, most probably thought himself unworthy of it. It is clear from his ultimate action that the rather ridiculous speech, in which he described his resistance to his wife's importunities urging him to be King, was only over frank, that his efforts to find a Sovereign were genuine enough, that he really thought he could make a King, and ought to make one out of the right wood, and in the regular well-understood way. He was vastly ambitious, but his ambition was only to be supreme under the King-the regular ambition of every Englishman, modified by the history of the country, by the fact that in Spain the road to power lies through revolutions, and not through Parliamentary votes.

The third and last peculiarity of Prim's mind was in one way a special, in another a very common, one. Such of our readers as have come in contact with soldiers or sailors of experience have probably noticed their remarkable proclivity to a kind of political speculation wholly apart from their usual lines of thought. The grim Admiral, whom nobody may oppress, is often an outrageous Tory; the steady General, full

of the ideas of the service, is often an earnest Radical. Neither would bear genuine ultra-Toryism or full-grown Radicalism, but the speculative side of their minds tends towards absolute conclusions on one side or the other. Prim was a man of that kind. He laboured to rebuild the Throne, but he earnestly thought and openly said that some day or other the Throne would be condemned as surplusage; that Republicanism was the creed of the future; that some day or other, "when there were Re-"publicans in Spain," the Republic would be established there. His belief was quite honest, though it had, except as a speculative theory, next to no meaning, and its expression gave rise to a vague idea spread throughout Europe, that Marshal Prim had ideas which might bear fruit, that he was not quite understood, that he might ocar fruit, that he was not quite understood, that he might yet take a course very much at variance with anything expected of him. That belief gave a certain piquancy and impression of uncertainty to his actions; but he had all the while no ideas of the kind, no more intention of establishing a Republic than Sir De Lacy Evans, who in theory was heartily on that side, but in practice would have fought for Her Majesty like a zealot. Marshal Prim accepted the Republic for a century or two hence, and meanwhile intended Monarchy; and the contrast between his belief and his single speculative doubt probably produced the disappointment and eagerness for revenge which led to his lamentable end. The Republicans thought of him as a Statesman who had cheated them, whereas he was cnly a very good officer, who thought that at present things should go on as usual, but fancied that some hundreds of years hence

## BUSINESS NOTES.

THE MILITARY MOVEMENTS IN EASTERN FRANCE .- The statement that the Germans have raised the siege of Langres, coupled with the announcement last week of the evacuation of Dijon and the retreat of the Germans in that quarter, is by far the most important military news of the week. It is not only another sign that the new French attempt to raise the siege of Paris has actually begun, but it shows that the attempt will be made in such a way as to try the German arrangements for maintaining the siege most strongly. The programme seems to be to send a great army from central France against some point in the German line of com-munications between Paris and their frontier, simultaneously with attacks from the north, west, and south-west on the covering armies-the Parisians of course equally attempting a powerful sortie. Such a movement, how-ever it may issue, cannot but test the Germans most severely if the French troops fight no better than they did at Meung and Beaugency, or than they have done in the north under General Faidherbe. There is a good deal of specula-tion as to the objective point of the army which is to attack the German communications from the south. The report is put about that the most extreme eastern point will be atviz., on the side of Belfort, with a view to raise Alsace tacked. and advance into Baden, a movement which might possibly prove so dangerous for the German armies in France as to compel them to raise the Paris siege. We should rather expect however that the starting point of this eastern army will be Langres, and its object will be to fall on the southern German line of communications at Vitry, which is only two or three days' march from Langres-Vitry itself being only a day's march from Chalons, possession of which would give the French two out of the three lines by which they now communicate with their rear. The temptation to the French to attack here, and not farther eastward, is the probability that the German line must here be weakest, equi-distant as it is from the German frontier, and from the centre of their advanced force around Paris. By attacking at this point the French will most perplex their enemy, compelling him, if they gain any success whatever, to fear danger for all his lines of retreat, while the attack will also be at once too far from Germany for the Germans to be reinforced from home, and too far from Paris to be met by the army there, without the siege being raised for a fortnight, which would be its complete ruin. We only point this out however to show the nature of the operations now in hand. The fact that the French lines are now so near the German lines of communication is itself a proof of German audacity in continuing They the siege of Paris, and of contempt for their enemies.

## THE ECONOMIST.

are most likely to win this round, but it is also on the cards , that they may pay dear for their temerity.

THE ITALIAN GOVERNMENT AND THE BONDS OF 1861 .-The Italian Government have adopted a most unwise course in paying the coupons on the obligations of 1861 at the exchange of 26f, instead of the former rate of 25f 30c. Even if they are under no direct obligation to the holders of bonds in England, it is most impru-dent of them, for their own credit, to tamper with the customary payments to these bondholders. A Government which agrees to pay abroad the coupons of its bonds which are held there must intend to attract foreign capital, and so set free for other purposes the limited home capital. This is probably the object of the Italian Government, and at least would be its object if its finance ministers were wise. But the attraction of the foreign bondholder is at once diminished if the amount of interest he receives is both diminished and made uncertain-the uncertainty being perhaps the greater evil of the two. Italian credit at once falls in the foreign market, or an improvement which would otherwise take place is checked. No doubt the Italian Government will say that the coupons are not payable abroad, except at its own discretion, and that the old rate of exchange gave the foreign holder an advantage compared with holders at home, as indeed the new rate still does, the par of exchange on Italy being 26f 60c; but this is hardly to the point. The par of exchange is only 26f 60c because of the depreciated paper currency of Italy-the existence of such a currency being in fact one of the dangers which a borrower in the position of the Italian Government seeks to avoid by paying its bondholders abroad. It pays abroad for no other reason than that they may not be concerned with the depreciation. It would be wise to pay the home-bondholder in gold too, but it is sheer folly not to pay the foreigner in the fixed interna-tional currency of bullion instead of the fluctuating paper at home. Having fixed the exchange at 26f, the Italian Government, so far as the dishonesty and imprudence of the transaction are concerned, might as well have fixed it at any figure not exceeding the depreciation of paper at home.

RAILWAY RATE FOR COAL TO LONDON .- The question of the conveyance of coal from Yorkshire and Derbyshire to London still continues a matter of no small interest to the shareholders of the Great Northern and Midland Companies, as well as to the colliery proprietors who make use of their lines. As we stated some time ago, the agreement between the Midland and Great Northern Companies has been lately lines. broken; but, from the report of an interview between the South Yorkshire coal-owners and the Great Northern directors, on Wednesday, it would seem that the immediate effect will not be a complete equalisation of the coal rates between the two districts named and London. This equalisation was strongly urged by the South Yorkshire coal-owners, who represented that they could easily make good any loss of business caused by the Great Northern traffic from South Derbyshire falling off ; but the latter company has only consented to reduce the difference of rate to 8d. The rate from Derbyshire is now 1s 4d, and from South Yorkshire it will be 2s. The South Yorkshire coal-owners intimated that they must submit; but, even as it is, the public have gained by the breach of the old agreement. The difference of rate can hardly be so great as to extinguish the South Yorkshire competition. Meantime, the continuance of the differential rate by the Great Northern may perhaps prevent an outbreak of guerre à outrance with the Midland; and the longer any such contest can be avoided, the better for the shareholders of both companies.

MR WELLS ON FREE-TRADE .- In a speech delivered at a recent Free-trade banquet at Boston, Mr Wells gave a striking instance of the injury which protection does to more than one American manufacture. He said :--

was to go through the cutlery manufactories of this country, and see how they were doing their business; for it seemed to me, with a tax of 20 per cent. on the ivery and of 60 per cent. on steel, it was wonderful that they could hold their own against British cutlery, because the duty

on the British knife is only 35 per cent. I found on entering the manufactories that the ivory was brought in and cut by machinery into pieces of the right length to form the handle; then by another inge-nious arrangement of little saws these blocks were cut into elongated pieces; machinery drilled the holes in the handle to receive the shankt and then the handle was ready to be fitted with the blade. Then I found that the steel was cut into thin slips by machinery; and the blade and handle stamped into form by dies; and the whole work being thus done by mechanical arrangements, all the parts of every knife fitted every other knife, like the parts of a Springfield musket. Well, now I went into the manufactories in Sheffield soon after I arrived in England, and then I immedietly learned the secret how and why the American manufacturer was able to hold his own market in spite of the tariff. All the bits of ivory for the handle of the knife were sawn and drilled by hand; labour was cheaper there; all the blades and shanks of the knives, instead of being stamped, as with us, were formed by hammering by hand. I saw that, in consequence of the American manufacturer having taken advantage of machinery, we we were enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own in spite of our tariff. And if we were thus enabled to hold our own inder the present system, what could the manufa

7

Another instance, he added, was that of the manufacture of hats :--

60 per cent. Then there is the leather sweat-band; that pays a day of 45 per cent.; but foreign manufactured hats are admitted under a duty of 35 per cent. We have invented the most ingenious machinery of 45 per cent.; but foreign manufactures have a sub-duty of 35 per cent. We have invented the most ingenious machinery to make hats. There is a machine that blows the mixture of fur and cotton round the model, and other machinery for finishing it; and yet while we exported before the war one seventh of all the hats we pro-duced, to-day we hardly export a hat; while the price has so much increased that we have ceased to manufacture as many hats as we did before the war. It seems to me that the true protection of American increased to remove all these taxes.

These are among the most telling sort of arguments on the Free-trade side, and may be trusted to make their way in the United States. What with the loss of shipbuilding, sheemaking, and other trades, the Americans must soon perceive that a system of protection is fatal-is only a means of diverting capital into less profitable manufactures or employments than it would naturally take to, the diversion being also effected at great expense to the whole community. The speech from which we take the above remarks is unusually interesting, Mr Wells describing his conversion from Protectionist theories to Free-trade. The process was a very natural one-intercourse in his official capacity with selfseeking manufacturers, the comparison of manufacturers in free with manufacturers in protected countries, and the spectacle of the injury done by protection to trades which would otherwise prosper. We hope the new Congress, as a step to its revenue reforms, will secure the reappointment of Mr Wells, either to his old office, or to some office where the Congress can have the benefit of his official advice.

HOW SHOULD NEW CAPITAL FOR RAILWAYS BE RAISED ?-A shareholder of the Midland Railway Company is reported to have objected at the meeting this week to raising the new capital by preference shares. He would have preferred raising it by ordinary stock instead. The point is a very important one in railway management, but the objections of the Midland shareholder, which will be sympathised with by a great many, do not appear to us well founded. The notion seems to be that ordinary shareholders suffer so much by their dividends being intercepted for preference shares and debentures, that the process must be put a stop to at all hazards. But this is to apply a wrong remedy. Where the ordinary shareholders will suffer no new capital should be raised at all, and the fact that their dividends are diminished is a proof that the new capital was a mistake. Where a company really wants new capital, the cheapest course for the shareholders is obviously to borrow, which is really done by preference shares as well as debentures. By giving a lien upon the undertaking, they burden themselves less than if they were to invite new partners, and they retain any increase of profit for themselves. That this truth is now well understood, is proved by the favour of the public towards the division of ordinary stock into "A" and "B." This is nothing but a means of diminishing the capital interested in the fluctuations of the undertaking, and therefore intensifying the effect of new profits as well as of losses. And, on the whole, it is better that the dividend on ordinary shares should be a little risky-that there should be a body of shareholders deeply interested in the prosperity of the line, and not that these should be so numerous as to make a

### THE ECONOMIST.

## [Jan. 7, 1871.

serious loss or profit in amount have almost no perceptible effect on the dividend.

THE SUEZ CANAL .- The Suez Canal has now been a twelvemonth working, and it is officially stated that the re-ceipts average about 20,000l a month, or about 240,000l a The head-quarters of the company being in Paris, the year. war and siege have prevented the usual official report being made, which should have given information regarding the net as well as the gross revenue; but the statement as to the gross traffic affords some material for a retrospective glance at the anticipations of traffic and profit which were indulged in a twelvemonth since, and which we showed to be exaggerated. The promoters of the enterprise, it will be remembered, did not shrink from calculating on a traffic of two or three million tons of shipping per annum, and this immediately; and no doubt if the Canal had such a traffic, it would pay very well. But we pointed out that the data of the calculation were imaginary ; that the annual tonnage of the existing carrying trade which the Canal would serve is at the outside about three million tons—this being a certain figure ; and that, as the trade would not change all at once, and the Canal offered no advantages to give a great and sudden stimulus to new trade, it was unreasonable to look forward to the traffic so confidently reckoned on very soon. The Canal would do very well, we said, if at first one or two million tons of shipping annually made use of it. The statistics now

published show that the average traffic has not yet reached the figure of one million tons--receipts of 240,000l per annum at 10 francs per ton only implying a trade of about 600,000 tops per annum. In point of fact, now that we have experience to guide us, the Canal has had unexpected luck in even this traffic. The screw-steamers which obtaining use it almost exclusively are of a kind which did not exist a very few years ago; and it is certain the promoters could not have foreseen that when the Canal was inaugu-rated, not only would such steamers be in existance, but a number of them laid up, or about to be laid up, for want of business, would be suddenly available for a new venture. But for the remarkable progress of mechanical invention since the Canal was commenced, it must have been a stupendous failure; and but for the singular conditions of the shipping trade at the time of its inauguration, its start, though far short of the promoters' anticipations, could not have been so good as it is. The practical question now is how the Canal is to be kept open; and the gross return will perhaps be sufficiently good for this purpose, though we do not know yet what the working expenses have been. It will be ludicrously insufficient even to pay the debenture-holders, whose annual claim is double the amount of the gross receipts; but if there is only a surplus of any sort to be dealt with, there will be some possibility of a new organisa-tion of the company, or the purchase of its undertaking by the Egyptian Government.

ABSTRACT OF THE ACCOUNTS OF THE "CORPORATION OF LONDON" FOR 1868 AND 1869. [In this statement the numerous accounts contained in the annual volume submitted by the City of London Chamberlain are embodied in one account so as to show the receipts and expenditure of each year. Items which are merely transfers from one account to another are omitted. The numbers affixed to each account are the numbers in the volume referred to. There are a good many subordinate accounts to which it is unnecessary to make any reference for the purpose of this abstract, and also one or two " trust" accounts—of very small aggregate amount—which it is likewise thought proper to omit, the City of London having only to do with them as trustee.] London having only to do with them as trustee.]

### THE ACCEPTANCE OF A COMPOSITION.

THE ACCEPTANCE OF A COMPOSITION. TO THE EDITOR OF THE BEONOMET. SIE,—Our client, Mr Newton Wilson, has just called our at-tention to the paragraph in your issueof the 24th of December, under the above title, which appears to impute to him parti-cipation in " a most iniquitous procedure." We trust, there-fore, you will allow us space in your next number to remark that your reasoning appears to be founded upon an assump-tion which, we regret to say, is unfounded, and on an oversight we we were not prepared to find in your columns. You assume that a newspaper report of counsel's argument in the Bankruptcy Court is sufficient to be relied upon to justify your statement that in this case the committee of

In the Bankruptcy Court is sumclent to be relied upon to justify your statement that in this case the committee of creditors reported, "that the estate would probably pay 12s " per  $\mathcal{E}$ "—the fact being that the report only said that, after certain deductions, the figures showed upon paper 12s in the  $\mathfrak{L}$ ; and at the second meeting of creditors, two out of the three members of the committee stated their conviction that e estate were taken out of Mr Wilson's hands and realised by forced sales, it would not produce anything like so much as 10s in the  $\pounds$ , which was the offer then before the meeting, and which they accordingly advised the creditors to accept. The oversight to which we referred is the immense difference,

which is the universal experience of those practically engaged in realising insolvent estates, between even the most careful in realising insolvent estates, between even the most careful valuation on paper and the amount of cash obtained by the expensive and wasteful process of a forced realisation. We apprehend that very few creditors would hesitate to accept 10s in the  $\pounds$  upon an estate which showed on paper not more than 12s in the  $\pounds$ , rather than run the risk of the very much smaller dividend which they probably would obtain if the estate were wound up hostilely, whether under Bankruptcy or Assignment

estate were wound up nostnery, whether that a limit of Assignment. The real question in this case was, and in all similar cases is, not one between the debtor and his creditors, but between the general body of creditors and a small discontented minority—in the case before you, consisting of only a single creditor out of a body of upwards of fifty; and it is a point of the utmost importance to the commercial public, whether or not the policy of the law is a sound one which declares that, in such cases, the opinion of the statutory majority of the creditors shall prevail. Upon this question we venture to express the opinion that, if the dissent of one creditor, founded upon such considerations as were in this case pre-sented to the Court, had been permitted to override the sounded upon such considerations as were in this case pre-sented to the Court, had been permitted to override the opinion of the overwhelming majority, both in number and value, it would have been indeed a case for declaring that the law had authorised "a most iniquitous procedure."—We are, Sir, yours obediently,

## 8 Bedford row, London, Jan. 4th, 1871.

[We have much pleasure in inserting the explanation of our correspondents. Our comments had reference mainly to the remark of the Registrar, that he would not make the amount of a composition a reason for not sanctioning it. It would have been beyond our province to say anything to imply any judgment of our own on the particular facts of this But we must still maintain the injustice of the law which enables any number of creditors, however large, to release a debtor from the debts due to other people as well as to themselves. Such a power should be stringently controlled by the Courts, and to support this was the sole purpose of our remarks.

### PUBLIC COMPANIES.

### RAILWAY COMPANIES.

Alabama and Chattanooga Railroad Bonds,--The coupon due Alabama and Chattanooga Railroad Bonds.—The coupon due in the United States on the 1st instant has not been provided for by the company. The State of Alabama, however, guarantees the loan, and the delay, it is anticipated, will not be prolonged. Buenos Ayres Great Southern Railway.—The directors of the Buenos Ayres Great Southern Railway have decided to call up the 2l per share on the Solado Extension. Ecst Indian.—At the meeting, the extra dividend of 5s 9d per cent. was declared. The chairman said that the improve-ment in traffic during the second half of the year was suffi-

nent in traffic during the second half of the year was suffi-cient, if the line were worked at 40 per cent, to cover the whole of the guarantee. The Chord line, which opens up the Indian coal-fields, was now completed. The capital account was nearly closed.

nearly closed. Metropolitan Railway.—The numbers of passengers over the Metropolitan, the Metropolitan District, the Metropolitan and St John's Wood, and the Hammersmith and City railways, during the Christmas holiday week (December 23 to 29th, in-clusive), and on Boxing-day of 1870, were as follows:—Christ-mas week—1870, 1,034,861; 1869, 894,176—increase in 1870, 140,685: Boxing-day—1870, 184,465; 1869, 173,096—increase in 1870, 11.369 in 1870, 11,369.

Midland .- At the meeting it was decided to issue 2,922,000/ 6th instant.

03

in 5 per cent. preference shares of 20*l* each. The chairman thought it would not be necessary to make another issue prior to 1873.

Ottoman Railway .- The sixth drawing of 1863 debentures has taken place, and the numbers are published of the 86 bonds so drawn. BANKS.

Bank of South Australia .- A dividend at the rate of 10 per

Bank of South Australia.—A dividend at the rate of 10 per cent. per annum has been announced. Colonial.—At the meeting the net profit for the half-year was stated at 44,184/, out of which an ordinary dividend of 6, and an extraordinary dividend of 2 per cent.—being at the rate of 16 per cent. per annum—were declared. Of the balance' amounting to 6,832/, including the sum brought forward, it was decided to add 5,000/ to the reserve fund, increasing it to 153,000/, and to carry forward 1,832/. London Joint Stock.—The usual dividend and a bonus of 8 9d per share are announced making in all a distribution at

88.9d per share are annunced, making in all a distribution at the rate of  $18\frac{1}{3}$  per cent. per annum for the half-year. The total distribution for 1870 has thus been increased to 16/ 8s 4d.

London and Westminster.—A half-year's dividend at the rate of 18 per cent. has been announced upon the paid-up capital of 2,000,000/. The corresponding dividend was at the rate of 17 per cent.

Oriental Commercial Bank -A dividend of 1s in the pound

is payable to the creditors. This makes 15s paid in all. South Hampshire Bank.—A further call of 12l 10s per share has been agreed to by the contributories, they receiving a discharge in full of all liabilities. Union Bank of Liverpool.—A dividend at the rate of 10 per

cent. per annum is announced. Union Bank of London.—A dividend at the rate of 15 per cent. per annum will be forthcoming at the meeting to be held

on the 11th instant. FINANCE, CREDIT. AND DISCOUNT COMPANIES. Joint Stock Discount.—The liquidators notify that, " unless some unforeseen circumstances occur, we shall be in a position during March next, without having realised any of our secu-rities of importance, to satisfy all admitted claims against the company. Our undivided attention can then be given to the collection of the balance of outstanding debts and the careful nursing of our large railway interests, upon the favourable realisation of which the return to the shareholders mainly depends." National Discount —A dividend is

National Discount.—A dividend is announced at the rate of 17 per cent. per annum, as compared with 16½ per cent. this time last year.

ASSURANCE COMPANIES. Equity and Law Life Assurance.—A dividend of 12s per share has been declared for the past year.

### MISCELLANEOUS COMPANIES.

Brazilian 5 per Cent. Loan, 1865.—Bonds, representing 42,000l, have been drawn for redemption at par on the 1st March. Chilian 6 per Cent. Loan, 1867.—The fourth drawing of bonds, representing 47,600l, has been made, and the redemption at par takes place on the 18th inst.

Colombian 5 per Cent. Loan, 1868.—At the fifth half-yearly drawing 40 bonds were drawn for redemption at par. Egyptian 7 per Cent. Loan, 1862—(First and Second Issues).— Bonds, representing 20,000l of the first issue and 10,000l of

the second issue, have been drawn for redemption at par on the 1st March

Honduras 10 per Cent. Loan, 1867 .- 449 bonds, amounting in all to 33,000l, have been drawn for repayment at par on the 9th inst.

Honduras 10 per Cent. Loan, 1870 .- 750 bonds, representing

Honduras 10 per Cent. Loan, 18(0.—750 bonds, representing 75,000l, have been drawn for repayment at par on the 9th inst. Peruvian 5 per Cent. Loan, 1865.—The numbers are published of 1,458 bonds, representing 328,000l, which have been drawn for redemption on the 1st April. Royal Hotel of Great Yarmouth.—Mr R. Everett is now ap-pointed official liquidator.

South Australian Company.—A half-year's dividend at the rate of 8 per cent. per annum, free of income tax, is recommended.

St James's Hotel .- The usual interim dividend at the rate of

5 per cent. per annun is announced. *Turkish 6 per Cent. Loan*, 1860.—Under present circumstances the Turkish Government has instructed the Imperial Ottoman

the Turkish Government has instructed the Imperial Ottoman Bank in London to pay coupons, due 1st inst., of the above loan, usually payable in Paris only. *Turkish 5 per Ceut. General Debt.*—The Imperial Ottoman Bank announce that those who wish to receive the payment of their coupons in London or Paris must send in a notification to that effect between the 13th and 23rd inst. *Italian State Domain Loan.*—The Anglo-Italian Bank an-nounce the drawing of "Serie D" for payment at par on the 1st April.

1st April.

MINING COMPANIES. Van.-A dividend of 15s per share was made payable on the

## THE ECONOMIST.

HAVRE, JAN. 4.

## Foreign Correspondence.

### (FROM OUR OWN CORRESPONDENT.)

HAVEE, JAN. 4. M. Michel Chevalier has contributed to one of the Havre newspapers an article on "What the policy of inaction may bring on England." He thinks it quite admissible to assume that Prussia, supposing her triumph over France to be com-plete, may procure herself a fleet equal to that of England. Indeed, to do so is only a question of money; and from the extent of coasts she would have under her domination, she would have no difficulty in manning it, especially as steam has rendered thorough seamen less necessary than they used to be in the sailing days. With such a fleet Prussia would only have to wait until England should be engaged in some difficulty with the United States, and might then declare war difficulty with the United States, and might then declare war on her with the suddenness which characterises her resolutions. Although, says M. Michel Chevalier, some persons consider a descent into England perfectly chimerical, the Duke of Wel-lington and Lord Palmerston held one to be possible, and urged that preparations should be made against it. Therefore, with a numerous steam fleet, Prussia might be able to throw a large army into England. An invasion of the country would be popular among the Germans, espe-cially as plunder possesses great charms in their eyes, and England would be a magnificent field for pillage. In case then France, which is the only ally of the first class England can have, should be crushed, the latter will be obliged to take precautions against the humiliating and disastrons eventuality that presents itself to her. She must for example maintain permanently at home 350,000 to 400,000 trained soldiers, for Prussia has 1,200,000; she must throw up new fortifi-cations round her arsenals; have entrenched camps and tions. Although. , says M. Michel Chevalier, some persons consi permanently at home 350,000 to 400,000 trained soldiers, for Prussia has 1,200,000; she must throw up new fortifi-cations round her arsenals; have entrenched camps and impregnable forts to protect her capital, and must remodel her fleet. The result will be that whilst "Mr Lowe, the Chancellor of the Exchequer, may have conceived the hope of presenting a reduced Budget for 1871, he will have to decide the problem how to prevent one of 60 and odd millions from growing into one exceeding 100 millions." In conclusion M. Michel Chevalier says—"There is no exaggeration in affirming that in the tragic drama now being played in Europe, the interests of England, whether she will or no, are almost as much engaged as those of France. How is it that the men of superior intelligence who govern her are so long in seeing of superior intelligence who govern her are so long in seeing that?"

Since the commencement of the war England has been full of iniquity in French eyes, because she has not made war for France. (Would, par parenthese, the French have helped us if France. (Would, par parenthese, the French nave helped us if we had been in their scrape?) And every day new evil deeds on her part are brought to light. A Havre journal, the *Courier*, has just revealed two—1st, that the English have bought from the Prussians the chassepots delivered by the French at Sedan and Metz, have effaced the French marks on them and are negregalized them at a vary high price to France. them, and are now selling them at a very high price to France; 2ndly, that the English bought from the Prussians the woollen and other fabrics pillaged at Sedan, Rheims, and towns of the departments of the Meuse and the Marne, and are now selling them in France with a profit of 15 per cent. At such doings the Havre journal is greatly scandalised. But are they true? And supposing them to be so, of what can the French complain? They would not buy the muskets, the cloth, and the other things if they did not want them.

the other things if they did not buy the muskets, the croth, and the other things if they did not want them. Another Havre newspaper has the following :—" The Prus-sians, being very much tormented by the workmen of the manufacturing districts of Normandy, are seeking by all pos-sible means to give work to unoccupied hands. At Caudebec these profound gentlemen have established a commission, which has ordered that any one who pleases may be employed in extracting and breaking stones. The work is perfectly un-necessary, but is to be paid by the town. The Prussians have also established diligencies and waggons to carry cotton, pur-chased in England, from Dieppe to Rouen, to supply the factories in the latter city." The Havre journal thinks this very wrong; but it is evident that if the enemy did not set the poor people to work the localities to which they belong would have to keep them from starving. The Government at Bordeaux has issued a decree, which shows a desire to do good, but at the same time reveals that its pecuniary resources are very scant. "Considering," it says, "that inscribed seamen have, since the war, given proofs

shows a desire to do good, but at the same time reveals that its pecuniary resources are very scant. "Considering," it says, "that inscribed seamen have, since the war, given proofs of courage, patriotism, and abnegation, and considering also that the industry of the men is suffering, 2,000,000 oysters shall be dredged in the beds belonging to the State at A reachen and he and he action of the men is suffering. that the industry of the men is suffering, 2,00,000 dystas shall be dredged in the beds belonging to the State at Arcachon, and be sold by auction,—the proceeds to be em-ployed for the relief of the families of such men killed or wounded in combating for the country." The delegation of the Ministry of Finance at Bordeaux has reminded subscribers to the loans of 750,000,000f (that of the Empire) and of 250,000,000f (that of London), that the third instalment of the former fell due on the 21st December, and of the latter on 1st January and that interest will be charged

- )

of the latter on 1st January, and that interest will be charged

if payment be delayed; also that it has the right, without The Bank of France at Paris announced, on the 26th ult, that the dividend of the second half of 1870 had been fixed at 30f, and would be paid from the second January. The represen-tation of the bank, which was at Tours, and is now at Bordeaux, has not use instructed the barneheet to make a similar encourse. tation of the bank, which was at Tours, and is now at Bordeaux, has not yet instructed the branches to make a similar announce-ment. It was, of course, to be expected that the dividend for the last six months of 1870 would be a poor one, but it was not imagined that it would be so low as 30f. Apropos to the bank, complaints continue to be made by the commercial community, that it does not publish any account of its opera-tions in the country. Whether it has ceased to issue weekly reports at Paris we know not, but balloons bring none. The latest quotations of the Paris Bourse received in these parts are as follows:-

	Dec. 26.		Dec. 29.
	fc		fe
Threes-cash	5250		51 80
End of month	5255		51 70
New loan (Empire)-cash	53 50		52 80
End of month	53 65	********	52 80

A "financial review" of the 26th ult. says :—" A coupon of 75c has been detached from the Threes, and the payment of a new call on the loan has been demanded. Offers continue to new call on the loan has been demanded. Offers continue to be very rare, and there are no speculating operations. The sales for cash that are made are limited in quantity and un-important in amount, but demands are always superior to offers. In railways there will assuredly be a somewhat im-portant reduction in receipts, but that does not shake the confidence of shareholders. The Orleans, the Lyons, the Southern, the Northern, the Western, and even the Eastern, though the latter is almost entirely in the power of the enemy, are maintained at prices relatively high. It is expected that the Northern will, in the course of January, give 8f, and the Southern 10f, on account of dividend. It is not yet known what the Austrian railways will do. Italian Fives are suffering Southern 10f, on account of dividend. It is not yet known what the Austrian railways will do. Italian Fives are suffering a little, because an adjournment of the payment of the dividends due in January is thought possible. For the same reason Turkish and Egyptian securities are heavy, and there is difficulty in realising them. The United States funds are in a very different situation. The more affairs become complicated in Europe, the more do the prosperity and credit of the great Republic augment. The Five-Twenties are quoted at 106½. On a great many French and foreign securities it is feared that no dividend or interest will be paid in January." A letter of the 30th ult, states that the aforesaid expectation that the Northern Railway would pay 8f had been realised.

A letter of the 30th ult. states that the aforesaid expectation that the Northern Railway would pay 8f had been realised, an official announcement to that effect having been made. It adds that the following companies had also announced pay-ments on shares:---Magasins Generaux, 12f 50c; Omnibus, 12f 50c; North-Eastern Railway, 10f; Compagnie Générale des Marchés, 10f; Marchés du Temple et St Honoré, 10f. The Credit Foncier of Austria--which was a French creation, and is chiefly in French hands--announces the pay-ment, at Vienna, of 10f, as interest on shares due 1st January, and expresses great regret that it is not able to make it at Paris, as heretofore.

Paris, as heretofore, The French Transatlantic Steam Navigation Company an-

nounces that it will pay at St Nazaire or at Bordeaux 12f 50c as half-year's interest on bonds falling due 1st January. The principal station of this company was Havre; but since the town was menaced by the Prussians it has sent away all its steamships, and its next departure for New York is to take

steamships, and its next departure for New York is to take place from Southampton. The Credit Foncier (French) had in Paris, on the 22nd, drawings of its 1853 and 1863 loans. To the former lots of from 5,000f to 100,000f are attached. In transmitting to the country, by balloon, the numbers drawn, it notifies that "the coupons of obligations falling due 1st November had been paid at Paris from 25th October, and that payment of these would be made in the departments as soon as communications

coupons of obligations failing due 1st November had been paid at Paris from 25th October, and that payment of these would be made in the departments as soon as communications should be opened." In last letter the remark was made that the previous omission of such an announcement by the Foncier and other companies had been noticed by share-holders and bondholders in the provinces. "Necessity is the mother of invention," and it has driven the Parisians to manufacture mill-stones of steel, they not having a sufficient number of ordinary meules to grind their corn. The mill-stones of France are, I believe, the best in the world, and foreign countries, even as far distant as America, buy them. But if steel blocks answer as well, they can be made in either places, and France will lose the monopoly of a trade which is not without a certain degree of importance. All that has to be done to the blocks is to give them a rough surface similar to that of a file. Another invention is reported from Paris—that of turning to account for food the fresh bones of animals slaughtered by butchers. This invention having been adopted by private industry, the Government has decreed that it will no longer requisition such bones, but will allow free trade in them.

allow free trade in them. The siege of Paris will give rise to some curious legal questions, the like of which are recorded in no law books.

## THE ECONOMIST.

### Among them is this one-Whether a tenant is bound to accept from a landlord a notice to quit carried to Paris by a pigeon?

As the Republican principle is that members of the National Assembly must be paid, in order that poor men may be able to sit therein, the idea has been started that municipal councillors ought to be paid also, and for the same reason. Nothing can be more just in a Republican point of view, and so we may expect that payment will be made, especially as the vast majority of councillors are of a class who think the advantage of being paid for public services more to be esteemed than the honour of rendering them gratis. But as every village in France, as well as every town, has a municipality with a greater or less number of such men, the outlay will be disquietingly larce.

disquietingly large. The municipal council of Marseilles, in spite of the heavy charges thrown on the town by the war, and of the necessity of giving relief to a large part of the population, either in work or in alms, has seen fit to grant 100,000f as a mark of political sympathy to Garibaldi, to be employed by him on his army. Some councillors wanted to accord 200,000f, and to consider that sum only as a first donation.

that sum only as a first donation. The town of Havre, as you were informed, resolved some time back to raise a new loan of 700,000f, but afterwards thought that one-half of it, which was subscribed very readily, would suffice. In the municipal council, however, on the 29th ult., it was represented that that half had been almost entirely disbursed, chiefly in expenses for the National Guard, and that the other was needed. Accordingly, the issue of the second moiety was authorised, and subscriptions are now being received for it. A member of the council remarked that, in the course of a few days, the pay of the National Guard had absorbed no less than 100,000f and that it was not possible to continue such a rate of expenditure. A committee was charged to examine into and report on the matter. If we take into consideration that almost every town and village in the country, is, like Havre, spending more than it can afford over the National Guard, we see that a fearful load of embarrassment will long weigh on them. And in addition to the expenditure under this head, extraordinary grants have had to be made for the relief of people who are reduced to want from the suspension of employment, for increasing the resources of the *bureaux de bienfaisance*, for the redemption of small pledges in the Mont de Piété, and so on.

According to a commercial (not official) return, the import of cotton into Havre in 1870 was 467,989 bales, more than half from the United States, and the stock at the end of the year was 45,790. In 1869, the import was 522,042 bales, and the stock on 31st Dec. 62,310. The import of coffee in 1870 was 525,324 sacks and 10,453 casks, and the stock on 31st Dec. was 65,967 and 2,579. In 1869 the import was 601,298 of the former, and 10,689 of the latter, the quantity on hand at end of the year being 266,885 and 3,379. The quotations of cotton, and of most sorts of coffee, were lower on 31st Dec., 1870, than at the same date of the year preceding.

At Havre, in the week ending Friday, 297 bales of cotton were sold, and the quotations on that day were fixed by brokers at 107f the 50 kilogs New Orleans very ordinary, and S5f Oomrawuttee good ordinary. Since Friday some petty sales have been made. Some small sales of coffee have also been effected. In sugar, French West India has been taken at 68f the 50 kilogs on sample, and 52f, bonne quatrieme. At Marseilles the week before last, there was an active demand for sugar, and the same was the case at Nantes; but in the former place, in the week ending the 31st, sales were limited, stocks being low and prices firm. Havana was at 40f for No. 12. At Bordeaux, coffee has been in demand, but none has been taken at Marseilles.

### COMMERCIAL AND MISCELLANEOUS NEWS.

It is stated that the organisation of the Institute of Accountants in London is being proceeded with, and the council will issue for general information the rules and regulations so soon as they have been definitively settled under legal advice. In the mean time it may be stated the council will have power up to the 1st of July, 1871, to admit as fellows such professional accountants as were in practice on the 1st of January, 1866; after that date fellows will be elected only on the conditions set forth in the rules. Provision is made for the admission of associates, subject to the passing of an examination. The entrance fee payable by fellows admitted before the 1st of July, 1871, will be 31/108, after that date the entrance fee will be 52/108, the annual subscription being 5/5s.

subscription being 57 58. We give the following on the authority of the Eastern Budget :---A Russian paper announces that an important change is about to take place in the tea trade of Russia with China. Hitherto tea has been conveyed by Russia either by sea, via Suez, London, and Konigsberg, or by land through Siberia. The sea route occupies four months, the land route a year; and it is now proposed to send the tea in future direct from Sucz to Odessa, so as to avoid the necessity of employing English agents. Negotiations have been entered into for this purpose with the

Odessa Steam Navigation Company, and the Russian merchants in China have already established agents in that town who are to despatch the tea to its purchasers on receipt of two-thirds of its value. As no less than 25,000,000 lbs of tea were sent to Russia last year through English agents, it is expected that the new plan, which does away with their intervention altogether, will bring considerable profits to the merchants in question.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of December, 1870, and of the corresponding week in 1869:--

Clearing-house return		65.333.000	76.022.000	92.243.000	93,041,000

In 1861, the Bank rate was suddenly raised from 6 to 7 per cent., consequent on the continuance of adverse exchanges with America and the withdrawal of bullion for the Bank of France, which had now been going on for some weeks. The Bank of France also raised its rate this week from  $5\frac{1}{2}$  to 7 per cent.

In 1868, the depression following on the 1866 panic continued. The re-organisation of the French army, to meet the changes caused by the war of 1866, was much discussed.

In 1869, money was easy at 3 per cent., but a period of comparative activity was looked forward to. A Conference was being held on the dispute between Turkey and Greece re-specting Crete.

In 1870, there was the customary ease at the beginning of the year, but considerable demands were anticipated in the spring. In foreign affairs the prospects of the new Ollivier Ministry still afforded subject for discussion. The amount of the "other" deposits, as compared with

the "other" securities, showed, in 1861, a deficiency of 6,022,3411; in 1868, an excess of 5,115,7031; in 1869, a deficiency of 1,150,6911; and in 1870, a deficiency of 1,965,506l. In 1870, there is an excess of 1,380,970l.

DISCOUNT AND MONEY MARKET .- As was expected, the money market this week has become a great deal easier with the opening of the new year, and the rate for the best Bank paper is  $\frac{1}{4}$  lower at  $2\frac{1}{4}$ . The latter figure, however, is not very strongly sustained, and is still a little higher than it was three weeks ago, before the usual pressure at the close of the year set in. Now that this pressure is removed, and the money seeking employment is farther increased by the payments of the dividends, it is natural to expect that the state of things which existed towards the close of the year should return for a time-at least in the absence of any great political change. There is a very general impression, however, that the present suspense will either terminate soon, or will not be long patiently endured; and there is some reluctance to make long engagements at the present low rates. This been encouraged by the reports of the disposition has approaching capitulation of Paris, and the expectation that peace would ensue; but apart from these rumours, it is certain that many new schemes are waiting a favourable moment for being launched, and will come on the market if it is seen that there will be no sudden termination of the war. The rates charged by the bill brokers for long-dated trade bills are accordingly rather higher than they were last week, although the rate for six months' Bank paper is nominally less.

At the Bank this week there has been very little demand. The changes in the Bank return-a decrease of 1,815,062l in public deposits, and of 1,418,272l in the reserve, with a corresponding increase in the circulation—are only usual at this period, and do not affect the great strength of the Bank's position, which must be still farther improved in the course of the month, in consequence of the receipt of the income and assessed taxes.

ENGLISH GOVERNMENT STOCKS .- The stock markets have been firm and even buoyant this week, with the exception of foreign securities, in which there have been several depressing influences at work, especially the great political uncertainty, coupled with the high prices which this speculative class of securities has reached. In all other departments, though the political uncertainty counts for something, yet the abundance of money, the possibility, if not likelihood, of the suspense continuing long enough to permit the completion of some transactions, and other special causes, such as the very fa-vourable traffic returns of home railways, continue to strengthen the market. The present period of the year, when the January dividends are paid, is of course favourable to an upward movement in most departments, if other circumstances permit. In English Government securities the upward tendency has been strongly felt, and Consols on Wednesday were at  $92\frac{1}{8}$   $\frac{1}{4}$ , a rise of  $\frac{3}{8}$  from the closing point of last The state of the account at the settlement also asweek. sisted this improvement, a scarcity of stock, which has for some time been a strong feature of this market, being once more felt; and though more stock, it was stated, came forward on Thursday than was anticipated in some quarters, and there was a slight reaction, the market is likely enough to be affected by this cause for some time to come. Not only will there be a million of purchases for the sinking fund during the quarter, as we stated some weeks since, but in the present state of the money market, and the longer the suspense continues, there cannot fail to be a gradual preponderance of purchases.

To-day there was a recovery from a reaction to 921 which had taken place on Thursday, and Consols close at 92 1/8 for money, and  $92\frac{1}{3}\frac{1}{4}$  for the account.

Subjoined is a list of the highest and lowest prices of Consols every day :-

FOREIGN GOVERNMENT SECURITIES .- As we have stated, this market has been rather weak, if not almost in a shaky state. On Wednesday there was more firmness, caused partly by the reaction from the previous depression, partly by a combination of telegrams, which seemed all to point to an early capitulation of Paris and a termination of the war, and partly by good continental prices, chiefly from Berlin, based on the expectation of these events. The improvement, however, was only temporary, and the general tone of the market has been weak, although there have again been better prices to-day. The principal special cause of de-pression was the confirmation on Saturday of the news of

ñ.

THE ECONOMIST.

Marshal Prim's assassination and death, which at once produced a fall of  $1\frac{1}{4}$  in Spanish 3 per Cents. These are now quoted ex div., and on Saturday, while the opening quotation was  $29\frac{5}{8}\frac{3}{4}$ , the lowest price of the day was  $28\frac{3}{8}\frac{1}{2}$ , though there was subsequently an improvement of  $\frac{1}{2}$ . The reaction towards a higher value continued on Tuesday and Wednesday, and there was a sharp recovery on the latter day to 29 7-16 9-16, a fraction higher than the opening point of the week, which was followed on Thursday by another improvement of 1/4. Turkish securities have likewise been unsteady, and there were a good many fluctuations, ranging between 1 and 2 in the 5 per Cents of 1865. There are still most unfavourable financial reports from Constantinople. In Italians of 1861 there was a fall on Tuesday of 5-16 on the announcement of Messrs N. M. Rothschild and Sons that they will pay the dividend only at the exchange of 26 francs, besides deducting the Italian income tax; and, though this fall was recovered later in the week, the effect was to assist the weakness of the market. The main cause of the unsteadiness here, however, is simply the state of the market, and the suspense which make it peculiarly sensitive to the slightest influence. In the event of any serious new event, there would almost certainly ensue a grave panic, which could not but affect other departments. To-day prices have, on the whole, been rather better than they were earlier in the week, and the closing prices are firm.

The special settlement in North German scrip was completed on Wednesday, and it is now admitted to official quotation. On Wednesday it was 1 to  $1\frac{1}{5}$  prem., improving on Thursday to  $1\frac{5}{5}$   $\frac{7}{4}$ ; the French loan, on the other hand, having been flat at  $1\frac{1}{2}\frac{1}{4}$  dis.

South American securities have been a good deal dealt in, and have hardly shared the weakness of the rest of this department.

With regard to the announcement of the Italian Government respecting the coupons of its 1861 obligations, we have made some remarks in another part of our impression, but may here notice the great discontent it has occasioned among the creditors of Italy. A correspondence that has taken place between the Secretary of the Foreign Bondholders' Committee and Messrs Rothschilds has elicited from the latter the information that they know nothing of the reasons of the Italian Government in taking this step, and it is difficult to imagine any reason; but there are great apprehensions that the Italian Government will yet fix the exchange at a more favourable figure for itself, and thus in effect impose an additional tax upon its coupons. The proceeding of the Italian Government is in effect equivalent to a repudiation. A Government which takes advantage of the depreciation of its own "promises to by paying its creditors with them, in reality repudiates, pay though the bond may not speak of payment in gold. It defrauds its subjects by not supporting its paper promises at their full value, and then commits a farther fraud by paying its own debts with inferior money.

ENGLISH RAILWAY STOCKS .- The market has again been steady, and, as will be seen below, there are a good many im-provements for the week. The purchases in anticipation of the dividend have evidently commenced, and the reactions from the greatest improvement of each day are very narrowa sign that the speculation is strongly supported. The traffic returns of the half-year are now completed, and the general result is that the improvement is greater in amount and as great in proportion as the improvement in the first half of 1870. The percentage of increase on the principal railways in the first half-year on the corresponding period of 1869 was 4.84 per cent., and in the second half-year it was 4.5 per cent. The war has consequently had almost no visible effect in checking the business of the country ; and the improvement is the more striking, because traffic returns had already begun to improve considerably in the second half-year of 1869, with which the comparison is now made. Possibly there would have been a greater improvement had there been no war; but it is certainly satisfactory that we have continued the rate of improvement which was manifest before the war. Generally, therefore, it may be safe to anticipate an addition to the halfyear's dividends equal to the addition made in the first half of the year.

To-day the improvement, which has been steady during the whole week, continued with little variation.

London, Chatham, and Dover arbitration debenture stock is quoted at 90 91 ex div., which shows an improvement of  $2\frac{1}{4}$  from the quotation which ruled prior to the announcement that the dividend would be paid in January.

The traffic returns of eighteen railways in the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending December 31, the closing week of the half-year, amounted to 658,507*l*, being an increase of 23,523*l* on the corresponding week of the previous year. The aggregate for the half-year amounts to 19,066,968*l*, an increase of 816,438*l* on the corresponding period of the previous year. It will be understood that in the case of the Caledonian, Great Western, Glasgow, and South-Western, North British and South-Eastern, which make up accounts to 31st January, the return is only for 22 weeks. In the case of one or two companies it is for 27 weeks, but the increase stated will nevertheless be near the mark for the half-year. The principal increases for the week are again in Midland and North-Eastern, but Great Western show an unusual falling off of 4,789*l*. The following are details of the increase or decrease in each case for the week, and for the whole period :—

It has been intimated, with regard to the late arrival of several of the London and North-Western Company's trains, especially the fast ones, that the delays have been occasioned by the precautionary measures taken, during the intensity of the frost, for the safety of the traffic, comprising a reduction in the speed of the fast passenger trains, and more frequent stoppages for the examination of the carriage wheels, &c.

FOREIGN AND COLONIAL RAILWAYS.—We subjoin our usual list of the changes in this department, which call for no special remark :—

Some further correspondence has taken place this week regarding the payment of the interest on the Roumanian State Railway obligations. An official advertisement has appeared in the Berlin newspapers, signed by the contractor and concessionaire of the lines, Dr Strousberg, and by the agent of the Roumanian Government, to the effect that owing, to the war, a section of the line was not completed at the time fixed, but that the interest would nevertheless be paid on the 31st of March, 1871, the Roumanian Government admitting its liability under the guarantee. This is so far satisfactory, and the Roumanian Government may be excused for some delay till the matter is inquired into; but a more explicit announcement should be issued as soon as possible. The other obligations of the Roumanian Government have not been affected, but it should lose no time in setting itself right with the public.

We are requested to state that, owing to a slight technical informality in connection with the Brazilian law, which has been made in the prospectus of the Porto Alegre Brazilian Railway Company, but which does not in any way affect the value of the enterprise, the Board of Directors have determined to return the deposits at once, and to offer the preference capital for subscription again in the course of a few days.

BANKS.—The dividends of three of the London Joint Stock Banks have been announced this week, and are all good, considering the difficulty of employing money which has been

felt during the last half year. The London Joint Stock Bank especially shows a great improvement in its profitsthe dividend announced being at the rate of  $18\frac{1}{3}$  per cent. per annum, the dividend for the corresponding period of 1869 being at the rate of  $15\frac{1}{2}$  per cent. per annum. The dividend altogether for 1870 is 161 8s 4d per cent. against 14 per cent. in 1869. The London and Westminster dividend, at the rate of 18 per cent., has also improved, compared with the divi-dend for the corresponding half-year of 1869, which was at the rate of 17 per cent., while the improvement for the whole of 1870 is  $1\frac{1}{3}$  per cent.—being 18 per cent. as compared with  $16\frac{1}{3}$  in 1869. The dividend of the Union Bank, 15 per cent., is the same as for the corresponding balf-year of 1869, and the dividend for the whole year is also the same. In consequence of these announcements, the shares of the London and Westminster and London Joint Stock Banks have both advanced, the advance in the case of the London Joint Stock being from 34 to 35 on Thursday to  $35\frac{1}{2}$  to  $36\frac{1}{2}$  to-day. The position of the London Joint Stock is considered additionally favourable from the statement that the dividend does not include any commission for the North German loan, which will doubtless amount to a very considerable sum. In other respects the market for bank shares has been dull. The changes on the week are as follow :—An advance of  $\frac{1}{4}$  in Anglo-Egyptian and Metro-politan;  $\frac{1}{2}$  in English Bank of Rio;  $\frac{3}{4}$  in Imperial Ottoman; 1 in Bank of Egypt, British North America, Chartered of India, London of Mexico, London and Westminster, and Oriental. London Joint Stock shares have advanced 2.

The directors of the Union Bank of Australia have resolved upon a dividend of 1l 10s per share, being at the rate of 12s per cent. per annum.

TELEGRAPH SHARES.—Among the changes in this department are—a recovery of 5 in Anglo-Mediterranean, and of 1 in Anglo-American. British India Submarine and Falmouth and Gibraltar show a rise of  $\frac{3}{4}$ , and China Submarine and Cuba of  $\frac{1}{4}$ .

MINES.—Some important movements have taken place in the quotations for British mining shares. The business transacted has been on a somewhat extensive scale, and the purchases effected have been more important than for some time past. The general tendency of prices has accordingly been upwards. Devon Great Consols shares have improved 5 on the week; East Lovell, 3; Tin Croft,  $2\frac{1}{2}$ ; Van and Wheal Mary Anne,  $1\frac{1}{2}$ ; Grenville,  $1\frac{1}{4}$ ; Margaret, Uny Lelant, 1; Great Wheal Vor,  $\frac{3}{4}$ ; East Grenville and South Condurrow,  $\frac{1}{2}$ ; Marke Valley and Tan-yr-Allt,  $\frac{1}{4}$ . East Caradon and Wheal Buller, however, have declined  $\frac{1}{2}$ .

The leading feature in the market for foreign mines is the continued demand for Sweetland Creek shares, which are becoming scarce, and have advanced  $\frac{1}{4}$ . Don Pedro, Pacific, and Taquaril close  $\frac{1}{8}$  better on the week.

MISCELLANEOUS.—A steady business has been transacted in this market, but the changes, which have been mostly favourable, call for no especial remark. Credit shares show symptoms of farther recovery, Credit Foncier, General Credit, and International Financial having advanced  $\frac{1}{3}$ , and London Financial  $1\frac{1}{2}$ . Anglo-Austrian certificates closed at a rise of  $\frac{1}{2}$ ; Commercial Union shares  $\frac{3}{4}$ ; Fore Street Warehouse, Madras Irrigation, Peninsular and Oriental and Royal Mail Steam 1; National Discount are  $\frac{1}{2}$ , and Silver's India Rubber  $1\frac{1}{2}$ better on the week.

EXCHANGES.—The tenders for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 370,000*l*, and to Bombay, 30,000*l*. The minimum price was fixed, as before, at 1s 10d on all Presidencies, and tenders on Calcutta at 1s  $10\frac{1}{4}$ d will receive about 61 per cent., and on Bombay at that price in full. These results show a diminished demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week : —

Gold. —The large amount by the overland mail has been delivered this week, and, as we anticipated, has all been sold for the continent. The other arrivals have been small, comprising only 16,000/ per Mary Shepherd, from Auckland, and 2,000/ per McGregor Laird, from Africa; these have also been taken for export, and the demand still exists, althorgh we think not to such a great extent as in the early part of the week. The transactions at the Bank consist only of an influx of 40,000/ and a withdrawal of 10,000/ sovereigns, sent part to Egypt, and part to the West Indies.

THE ECONOMIST.

### THE ECONOMIST.

## Silver continues in good demand, but without any rise in price, which remains at $60\frac{1}{2}d$ to $60\frac{5}{2}d$ per oz standard. We have received about 50,000/ from New York and about 190,000/ from India and China; this latter sum consisted of Doré silver and was placed at $61\frac{1}{4}d$ per oz standard, but transactions have since taken place at 61d per oz standard. The Elbe has taken 5,000/ to the West Indies. Mexican dollars continue in fair demand, but are taken chiefly for refining purposes, the orders for China being but very small. The price remains at $58\frac{1}{2}d$ and $58\frac{3}{4}d$ per oz for the Old and New Coinages respectively.

respectively.

respectively. Exchange on India for Banks' drafts at 60 days' sight is 1s 10<sup>4</sup>/<sub>2</sub>d to 1s 10<sup>8</sup>/<sub>3</sub>d per rupee. Tenders for the India Council bills were received yesterday. The amounts allotted were—to Calcutta, 370,000/, and to Bombay, 30,000/. Applications on the former place at 1s 10<sup>4</sup>/<sub>2</sub>d received 61 per cent., and on the latter at the same rate in full. India Government loan notes are somewhat lower in price. We wrote the 4 new Cent. 891 to 2011, and

India Governament loan notes are somewhat lower in price. We quote the 4 per Cents., 89½ to 90½; the 5 per Cents., 98½ to 99½; and the 5½ per Cents., 105½ to 106½. Quotations for bullion.—Gold.—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11½ per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver.—Bar silver, fine, 5s 0½d to 5s 0½d per oz std; last price; ditto, containing 5 grains gold, 5s 1d per oz std, last price; Mexican dollars, 4s 10½d to 4s 10½d per oz, last price. Quicksilver, 11/ to 12/ ner bottle. discount 3 per cent per bottle; discount, 3 per cent.

There were no bullion operations at the Bank of England to-day.

BUSINESS CHANGES .- The following are among the changes in city firms at the commencement of the year :

in city firms at the commencement of the year :----Messrs J. Henry Schröder and Co. have admitted Mr H. F. Tiarks and Mr O. von der Meden into partnership on the retirement of Mr A. Schlüsser. Messrs Coulon and Co. have announced the retirement of Mr Albret Coulon, and that the business will be carried on by Mr Alfred de Coulon and Mr Alphonse Berthoud, under the style of Coulon, Berthoud, and Co., Mr John Reeves being authorised to sign by produ-ration. Messrs Irving, Ebsworth, and Holmes, in consequence of the retirement of Mr Irving and Mr Holmes, will henceforth carry on their business as Ebsworth, Sons, and Co. Messrs Churchill and Sim have admitted Mr Charles Neck into partnership. Messrs Grant, Hodgson, and Co. will henceforth adopt the style of Grant, Chambers, and Co. Messrs Sheppards, Pelly, and Allcard have admitted Mr John Master-man Sheppard. Messrs R. M. Holborn and Sons, whose firm has been almost limited to the direct descendants of Robert Holborn, by whom it was founded in 1775, have admitted Mr A. M. Snell and Mr J. F. Godsmark. The Credit Lyomais, of Lyons, has established an agency in London, to be carried on at 5 Austinfriars, under the management of Mr Jcseph Rabino. The partnership of Bradbury and Cook, wool brokers, in London and Liverpool, has been dissolved by mutual consent, Mr George Cook having retired from the business, which will be carried on in future by the new firm of Thomas and Cook.

FAILURES AND EMBARRASSMENTS .- The following are announced :-

Messrs Vivian and Mansell, of 110 Wood street, City, wholesale bosiers.

Messrs Rautmann and Co., of London and Paris, foreign warehousemen. Liabilities, 30,290%. Estimated assets, 11,898l.

The Glasgow Herald reports the failure of Messrs T. J. Biggs and Co., commission merchants, Cincinnati. Liabilities, 200,000 dols; and assets inconsiderable.

Information has been received from the French Post Office that the mails passing through France are at present liable to considerable delay, and that it is necessary, therefore, to despatch from London some days in advance of the usual time all correspondence intended for conveyance by French packet from Marseilles, Bordeaux, or St Nazaire. Under these circumstances the public are recommended to post, at least a week in advance of the usual time, all letters for Mauritius, China, Brazil, Mexico, Cuba, &c., intended for conveyance by the French packets. The mail for Mauritius will, this month, be made up in London on the evening of Saturday, the 14th January, instead of on the 18th, so as to ensure as far as possible, its arrival at Marseilles in time for the packet. During the present uncertain state of the route through France, no cor-respondence, excepting that for Mauritius, will be forwarded by French Information has been received from the French Post Office that the respondence, excepting that for Mauritius, will be forwarded by French packet, unless specially addressed to be so sent.

The next mails for Australia will be despatched from London--via Southampton, on the morning of Saturday, the 21st January; via Brindisi, on the evening of Friday, the 27th January.

Marshal Prim's assassination and death, which at once produced a fall of  $1\frac{1}{2}$  in Spanish 3 per Cents. These are now quoted ex div., and on Saturday, while the opening quotation was  $29\frac{5}{2}$ , the lowest price of the day was  $28\frac{3}{2}$ , though there was subsequently an improvement of  $\frac{1}{2}$ . The reaction towards a higher value continued on Tuesday and Wednesday, and there was a sharp recovery on the latter day to 29 7-16 9-16, a fraction higher than the opening point of the week, which was followed on Thursday by another improvement of ‡. Turkish securities have likewise been unsteady, and there were a good many fluctuations, ranging between 1 and 2 in the 5 per Cents of 1865. There are still most unfavourable financial reports from Constantinople. In Italians of 1861 there was a fall on Tuesday of 5-16 on the announcement of Messrs N. M. Rothschild and Sons that they will pay the dividend only at the exchange of 26 francs, besides deducting the Italian income tax; and, though this fall was recovered later in the week, the effect was to assist the weakness of the market. The main cause of the unsteadiness here, however, is simply the state of the market, and the suspense which make it pecu-liarly sensitive to the slightest influence. In the event of any serious new event, there would almost certainly ensue a grave panic, which could not but affect other departments. To-day prices have, on the whole, been rather better than they were earlier in the week, and the closing prices are firm. The special settlement in North German scrip was com-

16

The special settlement in North German scrip was completed on Wednesday, and it is now admitted to official quotation. On Wednesday it was 1 to  $1\frac{1}{3}$  prem., improving on Thursday to  $1\frac{5}{3}$   $\frac{7}{4}$ ; the French loan, on the other hand, having been flat at  $1\frac{1}{3}$   $\frac{1}{4}$  dis.

South American securities have been a good deal dealt in, and have hardly shared the weakness of the rest of this department.

The following show the changes for the week, quoting the latest unofficial prices :--

With normand to the announ	- Anno and	6 11		~	

With regard to the announcement of the Italian Government respecting the coupons of its 1861 obligations, we have made some remarks in another part of our impression, but may here notice the great discontent it has occasioned among the creditors of Italy. A correspondence that has taken place between the Secretary of the Foreign Bondholders' Committee and Messrs Rothschilds has elicited from the latter the information that they know nothing of the reasons of the Italian Government in taking this step, and it is difficult to imagine any reason; but there are great apprehensions that the Italian Government will yet fix the exchange at a more favourable figure for itself, and thus in effect impose an additional tax upon its coupons. The proceeding of the Italian Government is in effect equivalent to a repudiation. A Government which takes advantage of the depreciation of its own "promises to pay" by paying its creditors with them, in reality repudiates, though the bond may not speak of payment in gold. It defrauds its subjects by not supporting its paper promises at their full value, and then commits a farther fraud by paying its own debts with inferior money.

## [Jan. 7, 1871.

ENGLISH RAILWAY STOCKS .- The market has again been steady, and, as will be seen below, there are a good many im-provements for the week. The purchases in anticipation of the dividend have evidently commenced, and the reactions from the greatest improvement of each day are very narrow— a sign that the speculation is strongly supported. The traffic returns of the half-year are now completed, and the general result is that the improvement is greater in amount and as great in proportion as the improvement in the first half of 1870. The percentage of increase on the principal railways in the first half-year on the corresponding period of 1869 was 4.84 per cent., and in the second half-year it was 4.5 per cent. The war has consequently had almost no visible effect in checking the business of the country ; and the improvement is the more striking, because traffic returns had already begun to improve considerably in the second half-year of 1869, with which the comparison is now made. Possibly there would have been a greater improvement had there been no war; but it is certainly satisfactory that we have continued the rate of improvement which was manifest before the war. Generally, therefore, it may be safe to anticipate an addition to the halfyear's dividends equal to the addition made in the first half of the year.

To-day the improvement, which has been steady during the whole week, continued with little variation.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :--

London and Brighton 4 %	. 100 2		98 100 xd +	10.01
Metropolitan District 6 %	105 7		102 4 xd	

London, Chatham, and Dover arbitration debenture stock is quoted at 90 91 ex div., which shows an improvement of  $2\frac{1}{4}$  from the quotation which ruled prior to the announcement that the dividend would be paid in January.

The traffic returns of eighteen railways in the United Kingdom, of which a list is subjoined (including the principal railways), for the week ending December 31, the closing week of the half-year, amounted to 658,507*l*, being an increase of 23,523*l* on the corresponding week of the previous year. The aggregate for the half-year amounts to 19,066,968*l*, an increase of 816,438*l* on the corresponding period of the previous year. It will be understood that in the case of the Caledonian, Great Western, Glasgow, and South-Western, North British and South-Eastern, which make up accounts to 31st January, the return is only for 22 weeks. In the case of one or two companies it is for 27 weeks, but the increase stated will nevertheless be near the mark for the half-year. The principal increases for the week are again in Midland and North-Eastern, but Great Western show an unusual falling off of 4,789*l*. The following are details of the increase or decrease in each case for the week, and for the whole period :—

It has been intimated, with regard to the late arrival of several of the London and North-Western Company's trains, especially the fast ones, that the delays have been occasioned by the precautionary measures taken, during the intensity of the frost, for the safety of the traffic, comprising a reduction in the speed of the fast passenger trains, and more frequent stoppages for the examination of the carriage wheels, &c.

FOREIGN AND COLONIAL BAILWAYS.—We subjoin our usual list of the changes in this department, which call for no special remark :—

Some further correspondence has taken place this week regarding the payment of the interest on the Roumanian State Railway obligations. An official advertisement has appeared in the Berlin newspapers, signed by the contractor and concessionaire of the lines, Dr Strousberg, and by the agent of the Roumanian Government, to the effect that owing, to the war, a section of the line was not completed at the time fixed, but that the interest would nevertheless be paid on the 31st of March, 1871, the Roumanian Government admitting its liability under the guarantee. This is so far satisfactory, and the Roumanian Government may be excused for some delay till the matter is inquired into; but a more explicit announcement should be issued as soon as possible. The other obligations of the Roumanian Government have not been affected, but it should lose no time in setting itself right with the public.

We are requested to state that, owing to a slight technical informality in connection with the Brazilian law, which has been made in the prospectus of the Porto Alegre Brazilian Railway Company, but which does not in any way affect the value of the enterprise, the Board of Directors have determined to return the deposits at once, and to offer the preference capital for subscription again in the course of a few days.

BANKS.—The dividends of three of the London Joint Stock Banks have been announced this week, and are all good, conidering the difficulty of employing money which has been

THE ECONOMIST.

felt during the last half year. The London Joint Stock Bank especially shows a great improvement in its preditorthe dividend announced being at the rate of 184 per cent. per annum, the dividend for the corresponding period of 1860 being at the rate of 154 per cent. per annum. The dividend altogether for 1870 is 167 as 44 per cent. against 14 per cent. in 1869. The London and Westminster dividend, at the rate of 18 per cent., has also improved, compared with the dividend for the corresponding half-year of 1869, which was at the rate of 17 per cent., while the improvement for the whole of 1870 is 14 per cent.—being 18 per cent. as compared with 164 iff 1869. The dividend of the Union Bank, 15 per cent., is the same as for the corresponding half-year of 1869, and the dividend for the whole year is also the same. In consequence of these announcements, the shares of the London and Westminster and London Joint Stock Banks have both advanced, the advance in the case of the London Joint Stock being from 34 to 35 on Thursday to 35½ to 36½ to-day. The position of the London Joint Stock Banks have both advanced, the advance in the statement that the dividend does not include any commission for the North German loan, which will doubtless amount for a very considerable sum. In other respects the market for bank shares has been dull. The changes on the week are as follow:—An advance of  $\frac{1}{2}$  in Anglo-Egyptian and Metropolitan;  $\frac{1}{2}$  in English Bank of Rio;  $\frac{3}{2}$  in Imperial Ottoman; 1 in Bank of Egypt, British North America, Chartered of India, London of Mexico, London and Westminster, and Oriental. London Joint Stock shares have advanced 2.

The directors of the Union Bank of Australia have resolved upon a dividend of 1l 10s per share, being at the rate of 12s per cent. per annum.

TELEGRAPH SHARES.—Among the changes in this department are—a recovery of 5 in Anglo-Mediterranean, and of 1 in Anglo-American. British India Submarine and Falmouth and Gibraltar show a rise of  $\frac{3}{4}$ , and China Submarine and Cuba of  $\frac{1}{4}$ .

MINES.—Some important movements have taken place in the quotations for British mining shares. The business transacted has been on a somewhat extensive scale, and the purchases effected have been more important than for some time past. The general tendency of prices has accordingly been upwards. Devon Great Consols shares have improved 5 on the week; East Lovell, 3; Tin Croft,  $2\frac{1}{2}$ ; Van and Wheal Mary Anne,  $1\frac{1}{2}$ ; Grenville,  $1\frac{1}{4}$ ; Margaret, Uny Lelant, 1; Great Wheal Vor,  $\frac{3}{4}$ ; East Grenville and South Condurrow,  $\frac{1}{2}$ ; Marke Valley and Tan-yr-Allt,  $\frac{1}{4}$ . East Caradon and Wheal Buller, however, have declined  $\frac{1}{2}$ .

The leading feature in the market for foreign mines is the continued demand for Sweetland Creek shares, which are becoming scarce, and have advanced  $\frac{1}{4}$ . Don Pedro, Pacific, and Taquaril close  $\frac{1}{8}$  better on the week.

MISCELLANEOUS.—A steady business has been transacted in this market, but the changes, which have been mostly favourable, call for no especial remark. Credit shares show symptoms of farther recovery, Credit Foncier, General Credit, and International Financial having advanced  $\frac{1}{2}$ , and London Financial  $1\frac{1}{2}$ . Anglo-Austrian certificates closed at a rise of  $\frac{1}{2}$ ; Commercial Union shares  $\frac{3}{4}$ ; Fore Street Warehouse, Madras Irrigation, Peninsular and Oriental and Royal Mail Steam 1; National Discount are  $\frac{1}{2}$ , and Silver's India Rubber  $1\frac{1}{2}$ better on the week.

EXCHANGES.—The tenders for 400,000l in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were—to Calcutta, 370,000l, and to Bombay, 30,000l. The minimum price was fixed, as before, at 1s 10d on all Presidencies, and tenders on Calcutta at 1s 10<sup>1</sup>/<sub>4</sub>d will receive about 61 per cent., and on Bombay at that price in full. These results show a diminished demand for means of remittance to the East.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

in bullion during the week : — Gold. — The large amount by the overland mail has been delivered this week, and, as we anticipated, has all been sold for the continent. The other arrivals have been small, comprising only 16,000/ per Mary Shepherd, from Auckland, and 2,000/ per McGregor Laird, from Africa; these have also been taken for export, and the demand still exists, althorgh we think not to such a great extent as in the early part of the week. The transactions at the Bank consist only of an influx of 40,000/ and a withdrawal of 10,000/ sovereigns, sent part to Egypt, and part to the West Indies.

Silver continues in good demand, but without any rise in price, which remains at 60 d to 60 d per or standard. We have received about 50,000/ from New York and about 190,000/ from India and China; this latter sum consisted of Doré silver and was placed at 61 d per or standard, but transactions have since taken place at 61 d per or standard. The Elbe has taken 5,000/ to the West Indies. Mexican dollars continue in fair demand, but are taken chiefly for refining purposes, the orders for China being but very small. The price remains at 58 d and 58 d per or for the Old and New Coinages respectively.

18

remains at 58gd and 58gd per or for the Old and New Coinages respectively. Exchange on India for Banks' drafts at 60 days' sight is 1s 10gd to 1s 10gd per rupes. Tenders for the India Council bills were received yesterday. The amounts allotted were—to Calcutta, 370,0004 and to Bombay, 30,0004. Applications on the former place at 1s 10gd received 61 per cent., and on the lawer at the same rate in full. India Government loan notes are somewhat lower in price. We quote the 4 per Cents., 89g to 90g; the 5 per Cents., 98g to 99g; and the 5g per Cents., 105g to 106g. Quotations for bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11gd per oz std; South American doubloons, 73s 8d per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0gd to 5s 0gd per oz std, last price; ditto, containing 5 grains gold, 5s 1d per oz std, last price; Mexican dollars, 4s 10gd to 4s 10gd per oz, last price. Quicksilver, 11/ to 12/ per bottle; discount, 3 per cent. There were no bullion operations at the Bank of England

There were no bullion operations at the Bank of England to-day.

BUSINESS CHANGES .- The following are among the changes in city firms at the commencement of the year :

Messrs J. Henry Schröder and Co. have admitted Mr H. F. Tiarks and Mr O. von der Meden into partnership on the retirement of Mr A. Schlüsser. Messrs Coulon and Co. have announced the retirement of Mr Albert Coulon, and that the business will be carried on by Mr Alfred de Coulon and Mr Alphonse Berthoud, under the style of Coulon, Alfred de Coulon and Mr Alphonse Berthoud, under the style of Coulon, Berthoud, and Co., Mr John Reeves being authorised to sign by procu-ration. Measure Irving, Ebaworth, and Holmes, in consequence of the retirement of Mr Irving and Mr Holmes, will henceforth carry on their business as Ebaworth, Sons, and Co. Measure Churchill and Sim have admitted Mr Charles Neck into partnership. Measures Grant, Hodgson, and Co. will henceforth adopt the style of Grant, Chambers, and Co. Measure Sheppards, Pelly, and Alleard have admitted Mr John Master-man Sheppards, Pelly, and Alleard have admitted Mr John Master-man Sheppard. Messre R. M. Holborn and Sons, whose firm has been almost limited to the direct descendants of Robert Holborn, by whom it was founded in 1775, have admitted Mr A. M. Snell and Mr J. F. Gedsmark. The Credit Lyonnais, of Lyons, has established an agency in London, to be carried on at 5 Austinfriars, under the management of Mr Joseph Rabino. The partnership of Bradbury and Cook, wool brokers, in Lendon and Liverpool, has been dissolved by mutual consent, Mr George Cock having retired from the business, which will be carried on in future by the new firm of Thomas and Cook.

FAILURES AND EMBARRASSMENTS .- The following are announced :-

Messrs Vivian and Mansell, of 110 Wood street, City, wholesale hosiers.

Messrs Rautmann and Co., of London and Paris, foreign warehousemen. Liabilities, 30,290%. Estimated assets, 11,898/.

The Glasgow Herald reports the failure of Messrs T. J. Biggs and Co., commission merchants, Cincinnati. Liabilities, 200,000 dols; and assets inconsiderable.

Information has been received from the French Post Office that the mails passing through France are at present liable to considerable delay, and that it is necessary, therefore, to despatch from London some days in advance of the usual time all correspondence intended for conveyance by French packet from Marseilles, Bordeaux, or St Nazaire. Under these circumstances the public are recommended to post, at least a week in advance of the usual time, all letters for Mauritius, China, Brazil, Mexico, Cuba, &c., intended for conveyance by the French packets. The mail for Mauritius will, this month, be made up in London on the evening of Saturday, the 14th January, instead of on the 18th, so as to During the present uncertain state of the route through France, no cor-packet, unless specially addressed to be so sent. The next mails for Australia will be despatched from London-yis Information has been received from the French Post Office that the

The next mails for Australia will be despatched from London-via Southampton, on the morning of Saturday, the 21st January; via Brindisi, on the evening of Friday, the 27th January.

POST OFFICE ANNOUNCEMENTS. The public are reminded that letters may be forwarded to Bordeaux by the mail packets of the Pacific Steam Navigation Company which leave Liverpool for Brazil on the 13th and 29th of each month (or on the 12th or 28th, when the 13th or 29th fall on Sunday), and call at Bordeaux. There are also frequent opportunities of sending letters to Bordeaux. There are also frequent opportunities of sending letters to Bordeaux, by private steamers sailing from Liverpool or from London. Letters, &c., intended to be sent in either manner should bear a special address indicating such intention. They will be liable to the usual rates of postage on correspondence for France. The following table shows the dates on which the mails for New Zealand will be made up in this country during the present year, for transmission to San Francisco. Three despatches will be made in each month ; but, although it may reasonably be expected that mails sent by the latest despatch will reach San Francisco before the departure of the packet, which takes place on the 15th of the month, the public are recommended to post their correspondence in time to be forwarded by one of the previous despatches :--

Month.	Dates of Despatch from London.	Port of Embarkation.
January February March. May July July August September October November December	Saturday, 21st Saturday, 18th Tuesday, 21st Tuesday, 21st Thursday, 21st Thursday, 21st Thursday, 21th Thursday, 21th Tuesday, 21th Tuesday, 21th Thursday, 22th Thursday, 21th Thursday, 22th Thursday, 22t	Queenstown.

Dublin on the following day. All correspondence for New Zealand will, as a rule, be forwarded via San Francisco, in the absence of any special indication to the contrary.

## COMMERCIAL EPITOME. FRIDAY NIGHT.

FRIDAY NIGHT.. Trade at Mark lane to-day was very quiet, and the trans-actions were of quite a retail character in both English and foreign wheat. Prices were unaltered, however, the recent advance being fairly maintained. Flour sold slowly at late rates, and no change took place in any kind of spring corn. Oats and maize were steady in value; while beans and peas were held at extreme currencies. Barley was inactive, but full prices were asked for grinding descriptions. This week's imports of foreign and colonial produce have amounted to 12,230 quarters of wheat, 15,180 oats, 1,430 barley, 6,050 maize, and 29,390 barrels of flour. At Liverpool and Wakefield this morning the wheat trade ruled quiet, and values were without material change. The Liverpool cotton market has been very quiet during

Liverpool cotton market has been very quiet during The Liverpool cotton market has been very quiet during the past week, and American descriptions have receded  $\frac{1}{16}d$  to  $\frac{3}{2}d$  per lb, East Indian  $\frac{1}{16}d$  to  $\frac{1}{3}d$  per lb, and Bengals  $\frac{1}{16}d$  per since last Friday. The total sales for the week (of four days only) are 49,650 bales, of which the trade have taken 41,630 bales, speculators and exporters, 8,020 bales. The imports have been very heavy, amounting to 182,583 bales. The actual exports are 7,242 bales, and to-day's stock is estimated at 519,680 bales. To-day the market closes dull. Sales 10,000 bales. Americans  $\frac{1}{3}d$  per lb lower. The following return shows the quantities of cotton im-The

The following return shows the quantities of cotton im-ported and exported at the various ports of the United Kingdom during the week ended January 5, 1871 :--

auting the work chaok	Imported		Exported.

day no change was observable either in values or demand, but on Wednesday the apparently more pacific appearance of matters as regards the Black Sea question restored confidence to a great extent, and exporters seemed more disposed to ex-tend their operations. Thursday brought a great many buyers into the market, and a business aggregating upwards of 900 candies was recorded before the day closed, but with-out causing any advance in rates to take place. Yesterday out causing any advance in rates to take place. Yesterday there was not much doing, but the market closed firm at the

## THE ECONOMIST.

quotations which we give below. The purchases recorded sum up to a total of 2,700 candies, and are composed of about 800 candies Sawginned at 207 rs to 208 rs; 300 candies Bhow-nuggur at 203 rs to 207 rs; 270 candies Dhollerah at 203 rs; 250 candies Veravul at 177 to 186 rs; 250 candies Ahmedabad at 181 rs to 186 rs; 150 candies Lorich at 173 rs to 191 rs and nuggur at 203 rs to 207 rs; 270 candies Dhollerah at 203 rs; 250 candies Veravul at 177 to 186 rs; 250 candies Ahmedabad at 181 rs to 186 rs; 150 candies Joriah at 173 rs to 191 rs, and the remainder of Broach, Oomra, Khandeish, Vingoria, &c., at prices varying according to quality. Several small lots of new Oomrawuttee have arrived on the green, and they show a better selection than the earlier parcels. The price de-manded is very extravagant, however—220 rs per candy—and no firms are likely to pay it, unless for a few docras for sample purposes. A small lot of new Khandeish of very in-different quality was sold on Thursday at 2094 rs per candy. We have seen a sample of the first pickings from Akote, which is very satisfactory. The accounts received this week re-garding the crops are favourable from all the districts except-ing Broach, where our correspondent informed us the cloudy and humid weather experienced has injured the more advanced portion of the crop. We believe, however, that the damage will be comparatively insignificant should a recurrence of favourable weather take place forthwith. The selection of old cotton available on the spot at present does not improve, and, for the small good lots obtainable, high prices continue to be paid. Most of the Bhownuggur and Dhollerah is being taken by local spinners. Very few contracts for future delivery have so far been made either on European or native account. The majority of the dealers have been nearly ruined by the depreciation which has taken place in the staple, and do not appear inclined to venture into operations even at pre-sent rates, while Europeans also are unwilling to incur the risk do not appear inclined to venture into operations even at pre-sent rates, while Europeans also are unwilling to incur the risk attendant upon forward delivery. From Tinnevelly we have a telegram dated yesterday quoting 64d per lb.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated December 23:—Our last cotton re-port was dated 16/17th. A slight further concession on the part of holders has led to an active business, and yesterday's market closed with a decidedly upward tendency. This morning little or nothing was done, owing to the commence-ment of the native holidays, which last until Tuesday next; the small operations concluded were, however, at still hardening rates, and we scarcely anticipate that actual quotations will be practicable when business is resumed next week. Quotations : —Fair,  $8_{1^{*}_{4}}$ d to  $8^{*}_{3}$ d per lb, f.o.b.; good fair,  $8^{*}_{4}$ d to  $8^{*}_{3}$ d per lb, f.o.b.; good to fine (gallin), 10d to 12<sup>\*</sup>\_{4} d per lb, f.o.b. Freight about  $\frac{1}{1^{*}_{4}}$ d per lb for steam-pressed bales. Exports.

The colonial produce markets opened with considerable animation this week. The demand for sugar has been active, and both new and refined goods have tended upwards in value. Stocks of refined sugars are small. Native Ceylon coffee has been in request, both on the spot and afloat, at fully late rates. Rice and tea are unaltered in value.

Total...... 199,473 ... 202,695 ... 169,121 ... 189,417 Our Crops-The weather during the month has been very beneficial to the paddy crops. No more moisture is required; and as soon as the north-east monsoon has fairly set in, the harvesting operations will be commenced with.

harvesting operations will be commenced with. Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Dec. 6:—The first public sale of the season was held on the 1st, and was followed by others on the 3rd and 5th current, and 1,450 chests were so disposed of. The demand for all descriptions has been good, and the sales have passed off with good spirit at prices which show some improve-ment on the bulk of the sales previously effected by private contract, more particularly on good sound shipping qualities contract, more particularly on good sound shipping qualities and Oudes. Compared with the average rates of last season, we consider prices to be about as follows, viz.—good and fine sound shipping, 20 rs to 25 rs lower; good and fine consuming, rs 27-8 to rs 32-8 lower; and inferior kinds of consumers and Oudes, 35 rs to 40 rs lower; and interior kinds of consumers and Oudes, 35 rs to 40 rs lower. Compared with the prices of the London October sales, our rates, taking exchange of the day, Is 11d per rupee, are about par, but occasionally a shade higher on low qualities. About 23,000 maunds of the crop have now been disposed of, exclusive of this day's sale, against 15 000 maunds at compared date hast year. Experts of 15,000 maunds at corresponding date last year. Exports of indigo, from 1st November, 1870, to 5th instant:—To Great Britain, 719 chests; to France, 17; to Trieste, 308; to foreign Europe, 10; to America, 92; to Gulphs and Levant, 4—total, 1,150 bales

1,150 bales. Mr. L. Th. van Houten thus reviews the Dutch tin trad-during December :--We have to report a very animated mar-ket for tin throughout the whole month, and a large and extent sive business has been done at advancing prices. The demand for consumption was very regular, as the large deliveries again fully illustrate, and a good deal of speculative business also took place, especially for parcels for delivery ex the trading company's next spring sale. Banca tin was sold in the begin-ning of the month at 73½ fl, and gradually advanced to 76 fl. This rise was caused, however, not only by the fulfilment of foreign orders from consumers, but also by the forced buying of some parties for contracts due at the last sales' prompt. The general demand continues, and the market closes very steady with buyers at 76½ fl, which is now the closing quota-tion. Billiton tin was in very good request throughout the

The quantity of Banca tin now afloat for the Dutch Trading Company is 16,650 peculs, equal to 1,041 tons, against 23,600 peculs, equal to 1,475 tons last year. The estimated quantity of Billiton tin now afloat is 9,411 peculs, equal to 988 tons, against 7,373 peculs, equal to 460 tons last year. The annexed is dated New York, Dec. 23:--The dry goods market has been in a state of extreme quietude since our last report the demand for almost all kinds of goods having been

report, the demand for almost all kinds of goods having been extremely light. What little inquiry has prevailed has been mostly for prints, which have ruled steady in value, though some sales of the common grades have been effected at rather lower figures. Brown and bleached sheetings and shirtings, lower figures. Brown and bleached sheetings and shirtings, drills, ticks, &c., have ruled heavy, though prices are not quotably lower. Woollen goods have been more sought after, the demand having been stimulated by cooler weather, but the market closes quiet for all kinds; no change has occurred in prices. There is but little business in progress in foreign goods, the demand being light as usual at this season of the wear. There was a more active demand for money to day, and goods, the demand being light as usual at this season of the year. There was a more active demand for money to-day, and early in the afternoon borrowers paid seven per cent. gold in-terest quite readily, while some exceptional transactions were reported at the legal rate, and a consideration of a thirty-second per cent. additional. The Government dealers were ac-commodated at as low as six per cent. There is little more doing in commercial paper, but prime names are still quoted 7 to  $8\frac{1}{2}$  per cent. discount. Foreign exchange was strong on the improved quotations of yesterday evening.

## THE COTTON TRADE.

### LIVERPOOL .- JANUARY 5.

The cotton market has been dull, with prices in favour The cotton market has been dull, with prices in favour of the buyer, particularly in American, and quotations generally have been reduced. The demand for Sea Island continues to be chiefly for the better qualities, which command full prices. American has given way fully  $\frac{1}{2}d$ per lb under the influence of the heavy import, which is placed freely upon the market as landed. New York advices to the 4th instant quote midding Upland 151 entry entry of the better price of the best of the stemmer fork advices to the 4th instant quote midding Opiand 15<sup>1</sup>/<sub>3</sub> cents, costing to sell in Liverpool 8<sup>1</sup>/<sub>4</sub>d per lb by steamer. In Brazil the sales have been moderate, and prices are on the whole rather lower. Egyptian has been in fair request, but being freely offered has declined <sup>1</sup>/<sub>3</sub>d per lb. In East Indian the business has been comparatively limited; useful sorts have been dealt in at unchanged prices, and the better qualities of Oomrawuttee and Dhollerah fully maintain last weeks currency.

week s currency. In cotton to arrive prices continue to fall. The latest quo-tations are:—American, basis of middling, from any port, December-January shipment,  $7\frac{1}{16}d$ ; January-February ship-ment,  $7\frac{1}{16}d$ ; January-February,  $7\frac{3}{4}d$ ; New Orleans, ship-named, 8d; Texas, ship-named, 8d; Oomrawuttee, fair mer-chants, January shipment, Canal,  $6\frac{3}{8}d$  per lb. The sales of the week (four days), including forwarded, amount to 49,650 bales, of which 1,300 are on speculation, and 6 720 declared for export leaving 41 630 bales to the trade.

6,720 declared for export, leaving 41,630 bales to the trade. The actual export this week amounts to 7,242 bales, con-sisting of 1,507 American, 2,275 Brazil, 228 Egyptian 17 West India, and 3,215 East India, which is not deducted from the stock, as it was not included in the stock declared on the 30th ultimo.

JANUARY 6.-The sales to-day will probably amount to about 10,000 bales, prices of American still in favour of buyers.

In speculation there is a decrease of 6,280 bales. The imports this week have amounted to 182,583 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to December 31) is 28,000 bales.

### LONDON-JANUARY 5.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :---

The market has been dull and inactive during the past week, and the latest transactions show a general decline of  $\frac{1}{2}$ d per lb, both on the spot and for arrival.

### NEW YORK .- DEC. 23.

The demand for cotton has been very fair, and at the opening the feeling was quite firm, with some sales made at {c advance, but subsequently there was a loss of strength, and the close was rather tame at former figures. No decided cause can be was rather tame at former figures. No decided cause can be assigned for the reaction, though the absence of foreign advices has a tendency to induce greater caution on the part of buyers, particularly exporters. The supply on sale does not appear to be excessive, but still there is plenty of stock available, and a more general and better assortment than yesterday. We learn of nothing particularly interesting from the points of produc-tion beyond a falling off in the receipts, as compared with last week. We quote as follows :--

	Uplan Flor		Mob	ile.	Ne Orle		Texas.		
Ordinaryper lb		e 	c 131 @	0	с 13# @	0	C 184 @	0	
Good ordinary	144	***	15	***	154		151	***	
Middling	151		15		16		164	***	

For future delivery the market has been higher, but there was a subsequent reaction, and the close is a little feverish and uncertain, though without remarkable strength on any month. Receipts at New York since Friday night, 34,922 bales; total receipts since September 1, 1870, 449,361 bales; total receipts for the same time of 1869-70, 297,669 bales. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:--Receipts at cotton ports:--New Orleans, 444,421 bales; Mobile, 162,189; Charleston, 184,099; Savannah, 361,689; Memphis, 76,904; Galveston, 68,681; Wilmington, 43,455; Norfolk, 113,987; other ports, 17,787--total, 1,473,212 bales. Foreign exports at Southern ports and New York:--New Orleans, 262,723 bales; Mobile, 75,455; Charleston, 58,127; Savannah, 158,384; Galveston, 22,705; New York, 250,922; other ports, 9,601--total, 837,917 bales. Stocks at principal ports:--New Orleans, 171,980 bales; Mobile, 59,361; Charleston, 34,074; Savanah, 78,476; Galveston, 39,212; Norfolk, 9,523; New York, 70,000; Boston, 6,000---total, 468,626 bales. a subsequent reaction, and the close is a little feverish and

NEW YORK, Dec. 31.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 125,000 bales, and since the 1st of September, 1,625,000 bales. Shipments to England, 64,000 bales; to France, none; and to the continent, 12,000 bales. Total since the 1st of September, 910,000 bales; stock at all ports 530 000 bales. ports, 530,000 bales.

NEW YORK, Jan. 3.—The receipts of cotton during the last four days have been 65,000 bales. Export to Great Britain, 15,000 bales; to France and the continent, none.

NEW YORK, Jan. 4.—To-day's receipts of cotton at all United States' ports amount to 23,000 bales.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTEE, Jan. 5.—Our market has remained very in-active throughout the week, chiefly in consequence of the holidays, and the absence of any cause to induce buyers to bolidays, and the absence of any cause to induce buyers to operate to better advantage now than they were likely to do by waiting. Notwithstanding the very meagre business done of late, prices have continued very steady, though the tendency [Jan. 7, 1871.

now is in favour of buyers, owing to the quiet tone of the cotton market, and producers are thereby encouraged to sell more readily than they did ten days ago, seeing cotton is tend-ing downwards. None of the buyers for China and India have bought, except very sparingly. Printing cloths have also been in little request, while the home-trade houses have been out of the market as usual at this period of the year. Shipping yarns are very quiet but moderately steady, and for home-trade use, manufacturers have just bought enough to supply present wants. The market closes very quiet, and prices barely steady. barely steady. COMPARATIVE STATEMENT OF THE COTTON TRADE.

most triffing purchases. A few parcels of grey and fancy tweeds, thick meltons, and ordinary white broads were made up; but the aggregate quantity of cloth which left the halls at the close of the markets was much below an average. There was no change to note in prices.

ROCHDALZ .- The flannel market was thinly attended by

ROCHDALE.—The fiannel market was thinly attended by buyers, and their operations were very limited. The prices of both plain and fancy flannels were well maintained. Low Yorkshire goods sold to a moderate extent, and prices were firm, with a slightly upward tendency. No change can be re-ported in the prices of wool. NOTTINGHAM.—Business in the lace trade has been rather quiet, many of the manufacturers being engaged in stock-taking. The demand for raw silk is limited, but good quali-ties maintain their value. On the whole the prospect of the lace trade is encouraging. There is no material change to re-port in the hosiery trade. Prices of hosiery varns are unlace trade is encouraging. There is no material change to re-port in the hosiery trade. Prices of hosiery yarns are unaltered.

## CORN.

AMERICAN GRAIN AND FLOUR MARKETS. NEW YORK, Dec. 23.—There has been less doing in the market for Western and State flour, but prices remain firm. All shipping grades were held at about yesterday's figures, though to meet the views of buyers, some concessions were necessary, with no inclination on the part of sellers to make them. Southern and St Louis in only moderate de-mand. The general market closed dull. The wheat market was very quiet, the advanced views of holders checking business. The demand was confined to small lots. Sales: 17,000 bushels at \$1.39½ to \$1.40 for No. 2 spring afloat; \$1.40 in store or \$1.42 afloat for No. 1 spring; \$1.60 for white Genesee; closing firm but dull, buyers generally holding off, \$1.40 in store or \$1.42 affoat for No. 1 spring; \$1.60 for white Genesee; closing firm but dull, buyers generally holding off, and sellers not pressing sales. The corn market opened firmer, with some inquiry, but closed tame. Sales: 34,600bushels at  $76\frac{1}{2}c$  for choice new Western yellow; 72c to  $72\frac{1}{2}c$ on the track, and 74c to 75c for Western new mixed affoat, including parcels choice high mixed at 76c; 83c for new Southern white, by the boat load; old Western, 82c bid and held 83c to 85c; kiln dried brought 80c affoat.

## LONDON MARKETS.

## STATE OF THE CORN TRADE FOR THE WEEK.

STATE OF THE CORN TRADE FOR THE WEEK. MARK LANE, FRIDAY EVENING. The corn trade has ruled quiet throughout the week, and the general tendency of prices has been downwards. The break-up of the frost has removed the obstacle to marketing the produce, and supplies, though still moderate, have been more liberal. The attendance of millers at Mark lane has been small, and the transactions in all kinds of grain have been on a restricted scale. Nevertheless, the export demand has continued, and the fact that the stocks at the leading outports have proved to be considerably less than was antici-pated has prevented the undue depression of the quotations. To-day purchases of wheat could be effected on slightly easier terms, and the same features characterised both the Liverpool

## THE ECONOMIST.

and Wakefield markets. Factors, however, showed no disposition to force sales, and the business passing was accordingly very limited. The stock of wheat at Liverpool is much less than it was believed to be, the return showing 363,304 quarters, against 816,784 last year. At Leith there are 55,000 quarters in granary, against 80,000; at Glasgow, 272,746, against 189,576; andat Hull, 50,000 quarters, against 85,000 on December 31, 1869. It will be perceived that the only increase, but that a considerable one, is in the case of Glasgow. There has been a large demand for barrel flour, which may be quoted 6d dearer. Foreign and country sacks are unchanged in price. Spring corn shows no alteration in value since our last re-

port, though maize and oats are rather weaker. Beans and peas have continued firm, and there has been some demand for barley.

Mr George Dornbusch thus reports the state of the floating grain and seed trade :-During the last se'nnight 25 grain and seed-laden vessels have been reported arrived at ports-of-call, viz. :--6 wheat, 1 rapeseed, 1 valonea, and 17 sundries. The floating grain trade has at first been firm in tone; later the thaw somewhat weakened the market, but returning frost restored firmness. Wheat, with a reduced quantity offering, business has been inactive. Maize, for the few cargoes offering, buyers demurred to pay late prices. Barley, for the few cargoes on sale, last week's prices have been barely maintained. Rye slow sale, at about late rates. The reported sales are as follows:--Wheat--21 arrived cargoes: Ghirka Odessa, 49s to 50s 3d; new ditto, 49s to 50s; Ghirka Taganrog, 47s 6d to 48s; Don ditto, 46s; Ghirka Nicolaieff, 49s to 50s; Ghirka Berdianski, 49s 6d; Galatz, 49s 6d; Nicolaieff Ghirka Marseilles, 49s 9d; soft Berdianski, 50s; Bessarabian Galatz, 51s; Marianopoli, 48s 6d to 49s; soft Ghirka Marianopoli, 48s 9d per 492 lbs. Polish Odessa, 49s 3d; No. 1 spring New York, 54s 3d per 480 lbs. On passage, 11 cargoes: Ghirka Odessa, 49s 9d to 50s 6d; new ditto, 50s; Nicopol Ghirka, 50s; Marianopoli, 50s per 492 lbs. Peas and wheat--1 arrived cargo Canadian peas, 39s 6d per 500 lbs; and prime spring Montreal wheat, 51s 6d per 480 lbs. Maize-3 arrived cargoes: Odessa, 33s per 492 lbs; Kustendji Constantinople, 32s 3d per 480 lbs. Barley--1 arrived cargoo Odessa, at 26s per 400 lbs. On passage, 1 cargo new Taganrog Kerch, at 26s 6d per 400 lbs. Rye-3 arrived cargoes: Nicolaieff, 34s 6d; Marianopoli, 33s 6d; Azow, 33s per 480 lbs. Linseed steady, but not active. 400 tons E.I. and Caleutta at 59s 6d per 410 lbs, and a cargo Sicilian Trapani at 58s 74d per 420 lbs. Rapeseed unaltered in price, and quiet. On passage, 100 tons ordinary brown Caleutta at 67s per 416 lbs, and a cargo wild Azow Berdianski at 36s per 400 lbs. Shipped or to be shipped, 700 tons ordinary brown Caleutta, at 66s 6d to 67s 9d per 416 lbs, a

### COLONIAL AND FOREIGN PRODUCE MARKETS. TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAT'S MARKETS SEE "POSTSCRIPT." MINCING LANE, FRIDAY MORNING.

SUGAR.—The demand has been active at 6d to 1s, and in some few cases at a greater advance. Some speculative business is reported in Manila, and the transactions include a floating cargo of Mauritius of the new crop for France. Further sales of refined have been effected for the same destination at enhanced quotations. The supply of West India sugar is so much reduced, that importers have in many cases obtained is to 1s 6d per cwt more than previous to the holidays. 1,003 casks sold to yesterday, including crystallised Demerara at 35s 6d to 37s per cwt. The home deliveries for London increased during the past year by 17,000 tons. The official returns for the Kingdom will probably show an increase in the entries for home use of over 80,000 tons. From this, however, must be deducted a very large quantity of English refined exported. The total stock in the United Kingdom on the 1st inst. was about 20,000 tons in excess of last year.

Mauritius.—By private contract 3,700 bags sold, chiefly grainy yellow and white, at 34s to 38s, and some good soft brown at 29s. A floating cargo of the new crop sold at an outport for France, viz., 900 tons, about No. 13<sup>1</sup>/<sub>2</sub>, at 32s.

Bengal.-4,700 bags are reported sold: brown, 19s to 22s 6d; Gurpatta, 28s 6d to 32s.

Madras.--6,448 bags Jaggery sold at and after the sale, chiefly at 19s to 19s 6d.

Manila.—The sales on the spot may be estimated at 70,000 to 75,000 bags: clayed, 24s to 26s; Ilo Ilo, 24s 9d; fine dry ditto, 27s 6d. 800 tons Taal, to arrive, at 22s.

Other Foreign.-18,500 bags low brown Java have sold at 18s 6d to 19s 6d. 800 bags Egyptian at 32s 6d, and 1,100 boxes Havana at 32s 6d to 36s 6d per cwt, and other parcels.

Refined.—For the diminished supply now available the trade have paid higher rates: common to good Titlers, &c., 46s to 48s per cwt. Pieces, &c., are also dearer.

RUM.—The sales have been small, including some Jamaica at former rates. Leewards sold at 1s 9d; Demerara, 2s 2d per proof gallon.

COCOA.—There is a continuance of the demand for Guayquil, with further sales at 46s to 47s, sid superior at 53s. 285 bags Grenada were taken in above the value. 515 bags Trinidad about half sold at 63s to 87s per cwt for middling to good quality.

TEA.—The market is unaltered, but there have been some further arrivals which will lead to an increased supply. Since last Friday the business has been moderate, chiefly in common to fair grades of Congou at full rates.

11d@1s ... 1s 0jd@1s 1d ... 1s @1s 1d ... 10d@11d ... 11d@11jd COFFEE.—The chief feature in this market has been the speculative demand for native Ceylon, the business including 5,000 to 6,000 bags to arrive at 53s 6d to 54s 6d. On the spot very good erdinary sold at 54s. 33 casks 569 bags by anction withdrawn. 138 casks 10 barrels and bags plantation found buyers at irregular prices for small parcels in second hands. 80 casks 596 barrels and bags Jamaica sold as follows:--Good ordinary to fine ordinary, 53s to 57s; low middling to good middling, 58s 6d to 75s 6d. 2,319 bags Brazil part sold at 55s 6d to 61s for washed Rio. The export deliveries in London for the year have increased to the extent of 4,385 tons, and those for home use about 900 tons. In the total stock there is an increase of a few hundred tons over the previous seasona. The deliveries by the Netherland Trading Company last year were 884,480 bags, against 694,500 bags in 1869. Increase of Deurymens of Corres into London during the last Four Years, with

### POSTSCRIPT.

FRIDAY NIGHT.

-The market continues firm. Sales of West India for the SUGARweek 1,143 casks. Crystalised Demerara by auction sold at 37s to 38s 6d for good to very fine. 690 bags Bengal sold at 19s 6d to 21s for brown Dulloah. 280 casks 32 barrels Porto Rico were disposed of

for brown Dulloah. 280 casks 32 barrels Porto Rico were disposed of at 32s 6d to 35s 6d for low middling to good yellow. Further large sales reported in Manila. Unclayed, 22s to 23s 9d; clayed, 25s. Several parcels brown Mauritius at 25s to 26s 6d, and a floating cargo of Trinidad at 26s for the United Kingdom. COFFEE.-57 casks 50 barrels and bags plantation Ceylon sold at steady prices for small lots. 563 bags washed Rio were chiefly taken in. A few lots sold at previous quotations. 617 bags ordinary to good ordinary Rio sold at 51s to 54s. 188 bags Singapore at 50s 6d, and 70 bags African at 49s 6d to 50s per cwt. SALTEFERE 50 tons Bengal to arrive at 30s and 50 tons fine on the

SALTPETRE.-50 tons Bengal to arrive at 30s, and 50 tons fine on the spot, 30s 6d to 31s per cwt.

-554 casks palm part sold at 32s 6d to 35s 6d.

TALLOW.-At auction to-day, 2,424 casks part sold. Sheep, 43s 6d to 45s 3d; beef, 36s to 42s 6d. 252 casks South American part sold: beef, 44s 6d; sheep, 42s 6d to 43s 6d per cwt. Town melted, and Petersburg unaltered.

ADDITIONAL NOTICES. REFINED SUGAR.—The home market for refined closes 2s higher for the week, owing to the continued strong demand for export. The Dutch market closes also dearer, 35s 6d now asked for February delivery. The

GREEN FRUIT .- The report of Messrs Keeling and Hunt states, that oranges are in better demand, and prices improved in consequence of change of weather. Lemons without alteration. Black Spanish and Barcelona nuts in demand. Brazil in request. Almeria grapes reduced to a small stock.

DRY FRUIT .- Currants show a steady advance during the week and much business has been done, caused by the shortness of stock. Appearances are healthy; dealers are all out of stock. Raisins are firm with an upward tendency. ENGLISH WOOL.—Market quiet and firm. COLONIAL WOOL.—Market firm, fair inquiry.

FLAX.-Market steady, HEMP.-Market very dull and little business doing. SILK.-Market very firm, but not much doing. SEEDS.-The seed trade rules inactive, but quotations are fairly maintained.

TOBACCO .- Throughout the market there has been but little doing in

TOBACCO.—Throughout the market there has been but little doing in North American tobacco, and the only sales effected have consisted of the imports of both leaf and strips, for which ruling prices were obtained, the stock of which is now very small. Buyers continue dis-inclined to deal with the last importation, and only trifling sales have yet been made. In other growths there has been a fair business done. METALS.—We have hardly commenced business this year yet, and conquently have little to report. Copper is pretty firm at quotations. Iron is a shade easier. Tin has been advancing almost daily, and is now fully 50s per ton dearer since last week's report. Spelter is quiet. Lead in steady demand. Tin plates have been a little checked in demand by the advance in tin. TALLOW.—Official market letter issued this evening :— s d

Imports for the week, 2,496 casks

### PROVISIONS.

Bacon maintains its price for sizeable, being comparatively scarce with a good demand. Heavy has fallen 1s. Owing to the frost we have had no Dutch boats this week, causing a great run on Irish and inferior foreign. Lord a dell ach foreign. Lard a dull sale.

## THE ECONOMIST.

METROPOLITAN CATTLE MARKET. MONDAY, Jan. 2.—The total imports of foreign stock into London last week amounted to 4,514 head. In the corresponding week in 1870 we received 5,059; in 1869, 1,617; in 1868, 6,116; and in 1867 4,027 head.

4,027 head. Owing to the cold weather there has been a firm feeling prevalent in the cattle trade, and the value of all qualities has been well maintained. The show of beasts has been short, the foreign arrivals being detained by stress of weather. Although not active, the demand has been firm, and full rates have been realised for all breeds, the best Scots and crosses selling at 5s 10d to 6s per 8 lbs. As regards sheep, the show has been limited. The trade has not been brisk, but prices have ruled firm, and the best Downs and half-breds have been quite a nominal market. BUFFLIES OF SALE.

### HOP MARKET.

HOF MARKET. BOROUGH, Friday, Jan. 5.—Business in the hop market has been on a moderate scale to-day. The supplies of produce have been tolerably good. Prime qualities have realised full prices, with a healthy inquiry. Otherwise the market has been quiet. Mid and East Kent, 35s to 140s; Weald of Kent, 35s to 60s; Sussex, 30s to 70s; Farnham and country, 75s to 126s; old, 20s to 50s per cwt.

### POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Jan. 6.—The supplies of pota-toes are not extensive. The trade is firm, and prices are steady:— English regents, 60s to 90s; Scotch regents, 60s to 85s; rocks, 60s to 70s per ton.

### LIVERPOOL MARKETS.

## WOOL

(FROM OUR OWN CORRESPONDENT.) FRIDAY, Jan. 6.—Very little business has been done this week, attri-butable partly to the holidays and partly to the want of choice our market at present offers of any useful low kinds of foreign wool.

### CORN.

CORN. (FROM GER OWN CORRESPONDENT.) FRIDAY, Jan. 6.—This market opens very quiet to-day, and sellers in some cases appear inclined to press business at a slight reduction from Tuesday's rates for wheat. Maize 6d cheaper, and dull. WAKEFIELD, Friday, Jan. 6.—The wheat trade is very quiet at this market to-day, owing to the change in the weather. Prices are in favour of buyers. Fine barley steady.

## The Gazette.

## TUESDAY, January 3.
