Tower St., Cambridge Circus, W.C.

MAY 1888

PREFACE.

IT is seldom that in the early attempts to compile a catalogue of the literature of a scientific subject, even of limited range, any high degree of completeness has been attained; still the present Bibliography owes much to the labour bestowed upon previous works of the same description.

One of the first authors to compile a list of books and papers relating to the Foraminifera was Ami Boué, who in 1848 published his "Bibliographie der Werke und Abhandlungen über Nummuliten." This was very creditable to the compiler, for it was more difficult then than now to collect together the scattered notices on any subject. It is to Max Schultze, however, that we owe the first general list, namely, that which appeared in his "Organismus der Polythalamien" in 1854; and within a few years a more extended bibliography was drawn up by W. C. Williamson, for his "Recent Foraminifera of Great Britain." Many other compilations have appeared from time to time, notably those of J. L. Neugeboren and Th. Marsson, but these for the most part deal either with limited localities or particular geological formations. In 1884, Henry B. Brady published his "Report on the Foraminifera dredged by H.M.S. *Challenger*," and with it a long and carefully prepared Bibliography, which has been found exceedingly valuable for reference. The *Challenger* bibliography, however, was not intended to be exhaustive, and the additions to previous lists consist to a great extent of titles of publications which had found their way into the author's own library. Later, a bibliographic list has been prepared by Anthony Woodward of New York; but this, though supplying

many references previously overlooked, contains too many errors to be of much scientific service.

The present work, which aims at offering a more exact catalogue than its predecessors, is based upon the Bibliography in the *Challenger* Report, already referred to; but in every case the original papers (except when noted "not seen") have been consulted, and where necessary, the entries have been enlarged or amended. The publications enumerated are arranged under the names of the authors in alphabetical order, that being in practice the most convenient and useful method. A brief explanatory note has in many instances been appended in brackets to the entries, and it is hoped that this will avoid waste of time in making references to papers of little or doubtful value. I have acted on Mr. Brady's view, that it is "not . . . requisite to include the title of every geological treatise in which the mere occurrence of a Nummulitic rock or a Fusulina-limestone happens to be recorded"; nevertheless, I have been careful to examine every paper of this kind noticed by other compilers, and have accepted or rejected it according to its value from a geographical or geological aspect.

Only the more important papers on Eozoön are included, the publication of a complete bibliography of this curious structure being promised shortly by those especially interested in the subject. The literature of certain other organisms, classed occasionally in times past with the Foraminifera, such as *Dactylopora*, *Receptaculites*, and *Archæocyathus*, is omitted from this list in accordance with modern views as to their affinities, except in those instances where the papers recorded expressly discuss their possible foraminiferal nature.

Many papers of interesting character or scientific importance are now recorded for the first time. To the former category belong — CAMERARIUS' papers, 1712, 1717; KLEIN'S, 1754; SCHROETER'S, 1803; and WULFEN'S, 1791; the correction of the hitherto inaccurate references to SPENGLER'S papers; the original place of publication of MODEER'S letter to Soldani; and RICCA'S

“Discorso,” with the engraved portrait of Soldani;—among those of scientific importance are—the earlier issue of FICHEL and MOLL (which carries back their specific names five years); D’ORBIGNY’S list of the Foraminifera of the Vienna Basin, published by J. VON HAUER seven years before the full descriptions appeared; the note on D’ORBIGNY’S “Planches inédites;” BOUÉ’S paper on the Nummulites; and SILVESTRI’S rare and interesting paper on Soldani’s “Testaceographia.”

For the first time, too, an endeavour has been made to enumerate the important memoirs published by the Hungarian authors with some approach to completeness, and the author is indebted to his friend Dr. Gustav Dirner, of Budapest, for copies of many of the originals.

Much and valuable assistance has been received in the communication of information and in the reading of proofs; especial thanks being due to Prof. T. Rupert Jones, who also placed at my disposal his books and the whole of his notes and memoranda made whilst occupied in conjunction with Professor W. Kitchen Parker on their critical papers in the *Annals and Magazine of Natural History*. To Mr. H. B. Brady I am indebted for the free use of his library, and for constant kindness and help during the progress of the work; while Mr. Fortescue W. Millett has kindly put into my hands his own manuscript lists, supplying information with regard to many obscure publications.

Help is also gratefully acknowledged from many friends on the continent. Dr. Carlo Fornasini has favoured me with the sight of some of the rarest of the Italian papers; Professor Silvestri has made me the fortunate possessor of his rare pamphlet on Soldani; while to Professor E. Renevier, Professor Dr. E. W. Benecke, Professor A. Gaudry, Dr. Fr. von Hauer, Dr. E. Geinitz, and others, I owe much courteous assistance.

Thanks are also due to the Librarians of the British Museum, the Royal Society, the Geological Society, and others; and I especially wish to express my indebtedness to Mr. Bernard B. Woodward of the British Museum (Natural History), from whom

I have received invaluable assistance for several years while consulting the magnificent collections of periodical and other scientific literature under his care.

Also, I cannot but refer to the Royal Society's Catalogue of Scientific Publications, and to those indispensable volumes, Engelmann's "Bibliotheca Historico-Naturalis," with the second (Carus & Engelmann) and third (Taschenberg's "Bibliotheca Zoologica") issues. As reference books to scientific literature they have never been equalled, and the test of years has proved their accuracy and general reliability. A continuation of Carus & Engelmann's volumes, so far as concerns Protozoa, Cœlenterates, and Worms, bringing the literature in part down to 1883, was published in 1884 by D'Arcy W. Thompson, and this, so far as it goes, will be found a serviceable guide to the allied groups of the Rhizopoda.

Finally, sincere thanks are due to Mr. F. Justen (Dulau & Co.), to whose generosity and scientific sympathies I owe the publication of my manuscript.

CHARLES DAVIES SHERBORN.

[A Lecture to the Geologists' Association.]
- Remarks on Prof. Wyville Thomson's Preliminary Notes on the Nature of the Sea-bottom procured by the Soundings of H.M.S. *Challenger*.—*Proc. Roy. Soc.*, vol. xxiii, 1875, pp. 234–245, figures; *Annals Mag. Nat. Hist.*, ser. 4, vol. xv, 1875, pp. 286–297; Review and note in — *Naturforscher*, Jahrg. viii, 1875, pp. 202, 203, under the title of "Ueber die Lebensweise der den Meeresgrund bildenden Globigerinen." *London; London; Berlin.*
- On the Condition of the Sea-bottom of the North Pacific, as shown by the Soundings recently taken by the U.S. steamship *Tuscarora*.—*Rept. Brit. Assoc.* (Bristol, 1875), 1876, Trans. Sections, p. 64 [Title only]. *London.*
- On the Genus *Astrorhiza* of Sandahl, lately described as *Haeckelina* by Dr. Bessels.—*Quart. Journ. Microsc. Science*, n. s., vol. xvi, 1876, pp. 221–224, pl. xix. *London.*
- Notes on Otto Hahn's "Microgeological Investigation of Eozoön Canadense."—*Annals Mag. Nat. Hist.*, ser. 4, vol. xvii, 1876, pp. 417–422. *London.*
[Translated into German, in *Corr.-Blatt Ver. Regensburg*, Jahrg. 30, 1876, pp. 180–186.] *Ratisbon.*
- Remarks on Mr. Carter's paper "On the Polytremata, especially with reference to their Mythical Hybrid Nature."—*Annals Mag. Nat. Hist.*, ser. 4, vol. xvii, 1876, pp. 380–387. *London.*
- On the Origin of the "Red Clay" found by the *Challenger* at great Depths in the Ocean.—*Rept. Brit. Assoc.*, Bristol 1875 (1876), Sections, p. 64 (title only); *Monthly Microsc. Journ.*, vol. xiv, 1876, pp. 255–257. *London; London.*
- In JEFFREYS.—Preliminary Report of the Biological Results of a Cruise in H.M.S. *Valorous* to Davis Strait in 1875.—*Proc. Roy. Soc.*, vol. xxv, 1876, pp. 223–227. *London.*
- Foraminifera in *Encyclopædia Britannica*, ed. 9, vol. ix, 1879, pp. 371–387, figures. *Edinburgh.*
- Researches on the Foraminifera—Supplemental Memoir. On an Abyssal type of the genus *Orbitolites*; a Study in the Theory of Descent.—*Phil. Trans., Roy. Soc.*, vol. clxxiv, 1883, pp. 551–573, pls. xxxvii, xxxviii; *Proceed.*, xxxv, 1883, pp. 276–279. *London.*
- Report on the specimens of the genus *Orbitolites* collected by H.M.S. *Challenger* during the years 1873–1876.—*Challenger Reports*,—*Zoology*, vol. vii, pt. xxi, 1883, pp. 1–47, pls. i–viii. *London.*

- CARPENTER, W. B.—On the Structure of Orbitolites.—*Journ. Quekett Microsc. Club*, ser. 2, vol. ii, 1885, pp. 91–104, figures.
London.
- v. DAWSON, J. W. ; and W. E. LOGAN.
- CARPENTER, W. B., and H. B. BRADY.—Description of Parkeria and Loftusia, two gigantic types of arenaceous Foraminifera.—*Phil. Trans.*, 1869, pp. 721–754, pls. lxxii–lxxx, and *Monthly Microsc. Journ.*, vol. i, 1869, pp. 299–304. *London; London.*
- CARPENTER, W. B., and J. W. DAWSON.—The Eozoön Canadense.—*Nature* (July 13, 1879), vol. xx, pp. 328–330. *London.*
- CARPENTER, W. B., and J. GWYN JEFFREYS.—Report on Deep-sea Researches carried on during the months of July, August, and September, 1870, in H.M. Surveying Ship *Porcupine*.—*Proc. Roy. Soc.*, vol. xix, 1870, pp. 146–221. *London.*
- CARPENTER, W. B., W. KITCHEN PARKER, AND T. RUPERT JONES.—Introduction to the Study of the Foraminifera.—*Ray Society*, 4to., *London*, 1862, 319 pp., 22 pls.
- CARTER, HENRY JOHN.—On Foraminifera, their Organisation and their Existence in a Fossilised State in Arabia, Sindh, Kutch, and Khattayawar.—*Journ. Bombay Br. R. Asiatic Soc.*, vol. iii. No. xii, 1849, pp. 158–173, pls. viii, ix. *Bombay.*
- Memoir on the Geology of the South-east Coast of Arabia.—*Journ. Bombay Br. R. Asiatic Soc.*, vol. iv, 1852, pp. 21–96. *Bombay.*
- On the form and structure of Operculina Arabica.—*Annals Mag. Nat. Hist.*, ser. 2, vol. x, 1852, pp. 161–176, pl. iv; *Journ. Bombay Br. R. Asiatic Soc.*, vol. iv, 1853, pp. 430–445, pl. *London; Bombay.*
- Description of some of the larger forms of Foraminifera in Scinde, with observations on their Internal Structures.—*Annals Mag. Nat. Hist.*, ser. 2, vol. xi, 1853, pp. 162–177, pl. vii, and *Journ. Bombay Br. R. Asiatic Soc.*, vol. v, No. xviii (1853), pp. 124–141, pl. ii. *London; Bombay.*
- Description of Orbitolites Malabarica, illustrative of the Spiral and not Concentric Arrangement of Chambers in d'Orbigny's Order Cyclostègues.—*Annals Mag. Nat. Hist.* ser. 2, vol. xi, 1853, pp. 425–427, pl. xvi B; *Journ. Bombay Br. R. Asiatic Soc.*, vol. v, No. xviii (1853), pp. 142–144, pl. ii A. *London; Bombay.*
- On the true position of the Canaliferous Structure in the Shell of Fossil Alveolina.—*Annals Mag. Nat. Hist.*, ser. 2, vol. xiv, 1854, pp. 99–101, pl. iii B. *London.*
- On Contributions to the Geology of Central and Western India.—*Journ. Bombay Br. R. Asiatic Soc.*, vol. v, No. xx, 1857, pp. 614–638. *Bombay.*

- CARTER, H. J.—Geological Papers on Western India, including Cutch, Sind, and the South-east Coast of Arabia, to which is appended a Summary of the Geology of India generally.—4to. *Bombay*, 1857, with atlas of 32 pls. and maps.
- Further Observations on the Structure of Foraminifera, and on the larger Fossilised Forms of Scinde, &c., including a new Genus and Species.—*Journ. Bombay Br. R. Asiatic Soc.*, vol. vi, 1861, pp. 32–96, no pls.; *Annals Mag. Nat. Hist.*, ser. 3, vol. viii, 1861, pp. 309–333, 366–382, 446–470, pls. xv–xvii.
Bombay; London.
- On Contributions to the Geology of Western Asia, including Sind and Beloochistan.—*Journ. Bombay Br. R. Asiatic Soc.*, vol. vi, 1861 [pp. 164–167]. [See also ROGERS, A.] *Bombay.*
- On the Structure of the larger Foraminifera.—*Annals Mag. Nat. Hist.*, ser. 3, vol. viii, 1861, pp. 246–251. *London.*
- Description of a Siliceous Sand-Sponge found on the South-east Coast of Arabia.—*Annals Mag. Nat. Hist.*, ser. 4, vol. iii, 1869, pp. 15–17, figure. *London.*
[Note on the spicules of *Operculina Arabica*.]
- On Two New Species of the Foraminiferous Genus Squammulina, and on a New Species of Diffugia.—*Annals Mag. Nat. Hist.*, ser. 4, vol. v, 1870, pp. 309–326, pls. iv. v. *London.*
- On Haliphysema ramulosa[um] (Bowerbank), and the Spongespicules of Polytrema.—*Annals Mag. Nat. Hist.*, ser. 4, vol. v, 1870, pp. 389–392. *London.*
- Note on the Branched Variety of Squammulina scopula.—*Annals Mag. Nat. Hist.*, ser. 4, vol. vi, 1870, p. 346. [Note only.] *London.*
- On Melobesia unicellularis—better known as the Coccolith.—*Annals Mag. Nat. Hist.*, ser. 4, vol. vii, 1871, pp. 184–189. *London.*
- Points of Distinction between the Spongiadæ and the Foraminifera.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xi, 1873, pp. 351–356. *London.*
- Eozoön Canadense not a Foraminifer or Calcareous Rhizopod Secretion.—*Amer. Journ. Science*, ser. 3, vol. vii, 1874, pp. 437, 438. *New Haven.*
- On the Structure called Eozoön Canadense in the Laurentian Limestone of Canada. [Letter to Professor Wm. King.]—*Annals Mag. Nat. Hist.*, ser. 4, vol. xiii, 1874, pp. 189–193. *London.*
- On the Structure called Eozoön Canadense in the Laurentian Limestone of Canada.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xiii, 1874, pp. 376–378, 1 fig. *London.*

- CARTER, H. J.—On the Striæ of Foraminiferous Tests; with a Reply to Criticism.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xiv, 1874, pp. 138-144. *London.*
- Relation of the Canal-System to the Tubulation in the Foraminifera, with reference to Dr. Dawson's "Dawn of Life."—*Annals Mag. Nat. Hist.*, ser. 4, vol. xvi, 1875, pp. 420-424. *London.*
- On the Polytremata (Foraminifera), especially with reference to their Mythical Hybrid Nature.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xvii, 1876, pp. 185-214, pl. xiii. *London.*
- Parkeria inferred to have been a species of Hydractinia.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xviii, 1876, p. 187 [letter]. *London.*
- On the Close Relationship of Hydractinia, Parkeria, and Stromatopora, with Descriptions of new Species of the Former, both Recent and Fossil.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xix, 1877, pp. 44-74, pl. viii. *London.*
- Description of Bdelloidina aggregata, a new genus and species of arenaceous Foraminifera, in which their so-called "Imperforation" is questioned.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xix, 1877, pp. 201-209, pl. xiii. *London.*
- On the Locality of Carpenteria balaniformis, with Description of a new species, and other Foraminifera found in and about Tubipora musica.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xix, 1877, pp. 209-219, pl. xiii. *London.*
- On the branched form of the Apertural Prolongation from the summit of Carpenteria monticularis.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xx, 1877, p. 68, figure. *London.*
- On a Melobesian form of Foraminifera (Gypsina melobesioides, mihi); and further Observations on Carpenteria monticularis.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xx, 1877, pp. 172-176. *London.*
- Description of a new species of Foraminifera (Rotalia spiculotesta).—*Annals Mag. Nat. Hist.*, ser. 4, vol. xx, 1877, pp. 470-473, pl. xvi. *London.*
- Remarks on Prof. Haeckel's Observations on Wyvillethomsonia Wallichi and Squammulina scopula.—*Annals Mag. Nat. Hist.*, ser. 4, vol. xx, 1877, pp. 337-339. *London.*
- Position of the Sponge spicule in the Spongida; and Postscript on the Identity of Squammulina scopula with the Sponges.—*Annals Mag. Nat. Hist.*, ser. 5, vol. i, 1878, pp. 170-174. *London.*
- Notes on Foraminifera.—*Annals Mag. Nat. Hist.*, ser. 5, vol. iii, 1879, pp. 407-414. *London.*

- CARTER, H. J.—On a new genus of Foraminifera (Aphrosina informis), and on the Spiculation of an unknown Sponge.—*Journ. R. Microsc. Soc.*, vol. ii, 1879, pp. 500-502, pl. xviii. *London.*
- Report on Specimens dredged up from the Gulf of Manaar, and presented to the Liverpool Free Museum by Capt. W. H. Cawne Warren.—*Annals Mag. Nat. Hist.*, ser. 5, vol. v, 1880, pp. 437-457; vol. vi, pp. 35-61, 129-156, pls. xviii, xix. *London.*
- Supplementary Report on Specimens dredged up from the Gulf of Manaar, together with others from the sea in the Vicinity of the Basse Rocks, and from Bass's Straits respectively, presented to the Liverpool Free Museum by Capt. H. Cawne Warren.—*Annals Mag. Nat. Hist.*, ser. 5, vol. vii, 1881, pp. 361-385, pl. xviii; *Proc. Lit. Phil. Soc. Liverpool*, vol. xxxv, 1881, pp. 271-275. *London; Liverpool.*
- Note on the assumed Relationship of Parkeria to Stromatopora, and on a microscopical section of Stromatopora mammillata, Fr. Schmidt.—*Annals Mag. Nat. Hist.*, ser. 5, vol. xiii, 1884, pp. 353-356. *London.*
- On two new genera allied to Loftusia from the Karakoram Pass and the Cambridge Greensand respectively.—*Annals Mag. Nat. Hist.*, ser. 6, vol. i, 1888, pp. 172-184. *London.*
- On the Nature of the Opaque Scarlet Spherules found in the Chambers and Canals of many Fossilised Foraminifera.—*Annals Mag. Nat. Hist.*, ser. 6, vol. i, 1888, pp. 264-270. *London.*

SILVESTRI, ORAZIO.—Sulla illustrazione delle Opere del Ambrogio Soldani e della Fauna microscopica fossile del terreno pliocenico Italiano. Promemoria di Orazio Silvestri seguita da un catalogo dei Rizzopodi pliocenici del territorio Senese. Estratto dagli *Atti del x Congresso degli Scienziati Italiani*, tenuto in Siena nel settembre del 1862. [Letta alle Classi riunite di Zoologia, Geologia ec. nella Seduta del 22 settembre.]

[I am indebted to Dr. Fornasini of Bologna for the sight of this rare paper on Soldani. The *Atti* x, of the *Congr. Sci. Ital.*, is invariably wanting in libraries, and we are told by Scudder in his Catalogue that it was suppressed by order of the Pope of the time. Of this, however, I cannot get any evidence, but it is certain that the book was never published. The paper consists of 18 pp. 4to., and is of great interest in connexion with d'Orbigny's, Parker, Jones, and Brady's, and Fornasini's critical papers on the books of the great Siennese naturalist.

[Since this note was written, Prof. Silvestri has generously given me a copy of his paper.]
