DELIVERY OF SEEDS

All vegetable and flower seeds in this price list except Peas, Beans, Sweet Corn and Spinach will be sent prepaid by parcel post, express or freight at our option.

Peas, Beans, Sweet Corn and Spinach will not be sent prepaid unless they are included in any one order to the value of \$20.00 or more.

The above offer to pay transportation does not apply to Field and Grass seed, Potatoes, Onion Sets, Fertilizers, etc. Articles other than seeds listed in this catalogue are sent at purchaser's expense except where they are quoted "Transportation paid."

Seeds ordered sent by *express* will be so sent at the purchaser's expense.

About Ordering, Shipping, Etc.

Orders may be sent at any time and goods will be shipped at the time specified on the order.

Freight shipments are now handled by the railroads much more promptly than formerly and we advise having all heavy shipments (100 lbs. or more) sent in that way.

When ordering seeds shipped by freight or express please be sure to give the name of your nearest freight railroad station or express office if it is different from your postoffice address.

25% of the value of the order must accompany all orders for goods shipped C.O.D.

Quick Service

You can be assured when you send us an order that you will not have to wait and wait for your seeds. During the busy season orders are sent out the day after they arrive, and the fast mail, express and freight service we have now will get them to you quickly and in good order.

Terms and Discounts

Our regular terms are **cash with order**. When cash is sent with order we allow a discount of 5% which may be deducted from the total amount of the order.

To gardeners of established credit and those who furnish us with satisfactory references we allow the following **time payments** *except on potatoes, field and grass seed, which are strictly cash with order*.

Bills for seeds, plants, etc., shipped after January 1st are due and payable *net* August 1st.

Bills for goods shipped after August 1st are due *net* December 1st.

Conditions of Sale

We assume responsibility of the seeds, plants and bulbs we sell reaching the purchaser in good condition and should any seeds fail to grow under favorable circumstances, we will refund the money paid for them or replace them without charge **if notified at once**. However, in common with all responsible seedsmen, all our seeds, plants and bulbs are sold on the distinct understanding and with the agreement by the purchaser that we will not be responsible for any loss or damage that may accrue by reason of the failure of the seeds, plants or bulbs to grow or to be of the variety or quality offered. We will not accept or fill orders under any other conditions.

Dec. 1, 1933.

JOSEPH HARRIS COMPANY, Inc.

"I was pleased with results from your seeds last year, and this year I am ordering most of my seeds from your company. I sell only quality products and must have reliable quality seeds." Carleton T. Pickett, Bryantville, Mass. Feb. 15, 1933.

"This is the 24th year I have ordered seeds from you and I am satisfied there are no better to be had." R. C. Kellam, Manasquan, N. J. Mar. 8, 1933.

"I have learned to appreciate your finely selected seeds during the past 10 years." Richard Ames, Deerfield, Mass. Mar. 4, 1933.

GROWERS OF HIGH-CLASS SEEDS
COLDWATER, N. Y.

To our friends and customers:

We take great pleasure in presenting to you our 1934 Market Gardener's and Florist's Wholesale Price List. Our large General Catalogue containing more complete descriptions of the varieties in this list will be mailed to you in January.

I want particularly to call your attention to our strains of Peppers, Muskmelons, Tomatoes, Cucumbers, Beets, Sweet Corn and Squash which we have bred and grown here on our own farm.

Harris' Northern Grown Seeds are equal to any and superior to most of the seed offered to market gardeners today. This is not just advertising talk or idle boasting - but a plain statement of fact, which we have seen demonstrated time after time when we check over our numerous trials and which is amply supported by the many letters of praise and confidence we receive every year from our friends and customers. I wish we could print them all.

If you have any questions do not hesitate to write us. We are always glad to receive your letters and will answer them promptly.

Yours respectfully,

M. S. Harris
President

Dec. 1, 1933

Harvesting Blue Hubbard Squash for Seed on Moreton Farm. See page 31.

Northern Grown Seeds

“It is of greatest importance to gardeners living in the Northern states to have crops that mature quickly, so as to escape injury from frost before the whole crop is developed. It is well known that plants quickly adapt themselves to climatic conditions. Corn raised in the North and taken to the South will in a few years become later, and if brought back to the North, will not mature in the short growing season we have.

The same is true of other crops, such as tomatoes, peppers, melons, etc. We find that peppers, tomatoes and melons grown from seed raised in the North not only mature earlier but also produce larger crops than plants from southern grown seed.”

We have raised our special varieties here on Moreton Farm for many years. Our careful breeding work together with the fact that only the **earliest and most vigorous kinds will mature and produce seed here in the North**, make Harris' Northern Grown seed much superior to the same varieties produced in the South and West.

Crops on Moreton Farm

In spite of the fact that we have had an exceptionally dry summer, most of our seed crops on Moreton Farm have proved in the whole to be very satisfactory. Our crops of tomatoes were entirely free from blight, the vines staying green right up to frost. Our peppers particularly “King of the North” and Harris' Early Giant, yielded large crops of fine fruit and the seed is the best we have had in years. Among our other crops such as Blue Hubbard Squash, Model Parsnip, Bender's Surprise, Delicious and Sugar Rock Melons and Harris' Ballhead Cabbage, the dry weather affected the yield somewhat, but the seed is particularly fine and of high germination. Our increased acreage in most things has assured us ample seed to fill our normal demands.

Although our Sweet Corn crops suffered some from the draught, we harvested sufficient good seed to cover our normal requirements, with the exception of Buttercup, which will be short. We advise growers who depend on this variety to place their orders early.

According to Our Tests

96 per cent
of this seed germinates

A label similar to this is put on every lot of Harris' Seeds that are sold. The figures of course vary.

Every Lot of Seed is Tested

Not only tested, but the *results* of the *test* are shown on a label which is attached to every package or lot of seed sold. This is information that is not given by other dealers. It has been found of great help to those who use Harris' Seeds. By consulting the label you can tell just how thick to sow the seed so as to get an even stand of plants without using an unnecessary quantity of seed which often causes a great deal of time and labor by thinning.

WHOLESALE PRICE LIST

Harris' Northern Grown Seeds for Market Gardeners and Florists

The prices quoted in this list apply only to orders from market gardeners, florists and institutions, who use seed in considerable quantities. *All prices here quoted are subject to change without notice and to our stocks being unsold.*

For prices of seed in quantities less than listed here, please refer to our general catalogue.

We will be pleased to quote special prices to anyone buying large quantities of any one variety. Please write.

Artichoke (Ger.)

ARTICHOKE

Carciofo (It.)

The Globe Artichoke produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia.

LARGE GREEN GLOBE. The standard variety

Oz.	¼ lb.	lb.
\$.50	\$1.50	\$5.00

Spargol (Ger.)

ASPARAGUS

Sparagio (It.)

Mary Washington—Large, early and "rust resistant"

This is the best of the "rust resistant" varieties originated by the United States Department of Agriculture at Washington. Our seed is of the true Mary Washington strain and will produce the finest large stalks.

Price: Oz. 15c; ¼ lb. 40c; 1 lb. \$1.25; 10 lbs. \$11.50.

ASPARAGUS ROOTS. See page 37.

Bohnen (Ger.)

BEANS

Fagioli (It.)

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

Beans of this price list are quoted f.o.b. Coldwater, N. Y. Purchaser pays transportation on beans, except as follows:

If your order for vegetable seed including beans amounts to \$20.00 or more we prepay freight charges. (See also inside front cover.)

We sell beans by weight only. 15 lbs. equals one peck, 60 lbs. a bushel. 30 lbs. or more of one variety will be supplied at the 100 lb. price.

Tendergreen Beans

Handsome, Early and Prolific

We have taken great pains to grow as fine a stock of this valuable bean as can be obtained. Our seed crops are grown from the most carefully selected high yielding foundation stocks.

Market gardeners who want a handsome early straight-round podded green bean of high yield and superb quality should grow Harris' Strain of Tendergreen.

1 lb. 35c; 7½ lbs. \$1.50; 15 lbs. \$2.70; 100 lbs. \$16.00. Not prepaid.*

"Your Tendergreen beans are the best beans I ever raised. My customers like them as well as peas." J. C. Dame, Lakeport, N. Y. Aug. 1, 1932.

"I particularly liked your Tendergreen Beans which ripened in 40 days, were very prolific and of highest quality." Joseph M. Pratt, Flemington, N. J. Feb. 29, 1932.

BOUNTIFUL

The Most Profitable Green Bean to Grow

There is no better stock of Bountiful Beans obtainable than our special Northern Grown seed. Our seed is grown from carefully selected foundation stocks in *disease free fields*. We are sure there is no finer stock grown.

1 lb. 30c; 7½ lbs. \$1.35; 15 lbs. \$2.40; 100 lbs. \$14.00. Not prepaid.*

* We prepay freight charges if your order for vegetable seeds including beans amounts to \$20.00 or more.

Tendergreen Beans

Pencil Pod Black Wax

The Best Round Podded Wax Bean for Market

We are pleased to be able to offer a fine true stock of this most excellent variety. Our seed is grown from carefully bred stock seed, especially selected for vigor, high yield and true type.

1 lb. 30c; 7½ lbs. \$1.45; 15 lbs. \$2.55; 100 lbs. \$15.00. Not prepaid.*

Sure Crop Wax

The Best Flat Wax Bean

Market Gardeners whose trade demands a *flat* wax or yellow bean will do well to grow Harris' Strain of Sure Crop. We are confident that there is no better strain grown than the one we offer.

1 lb. 30c; 7½ lbs. \$1.45; 15 lbs. \$2.55; 100 lbs. \$15.00. Not prepaid.*

French Horticultural Long Bright Red Strain

We have developed a very fine strain of this popular bean. The vines produce an abundance of long handsome straight pods, heavily splashed with bright red color. We have spent considerable time and effort in selecting this stock to get a high yield of long bright colored pods.

1 lb. 35c; 7½ lbs. \$1.60; 15 lbs. \$2.85; 100 lbs. \$17.00. Not prepaid.*

"The French Horticultural Beans purchased from you last year were the finest, largest and best colored beans I have ever grown. Your seed is certainly very fine." W. H. Onthank, Southboro, Mass.

"I have used Harris' seeds for some 20 years or more. I consider them the best." L. W. Brotzman, Binghamton, N. Y. Apr. 25, 1933.

"I have been sending to you for my seeds for 40 years. Always found them good." John Lawson, Jr., Dysart, Pa. May 15, 1933.

"I've bought seeds from you for the last 39 years, and prefer yours to anyone else in all these years. I haven't found any of them that didn't prove true to name and they are always sure to grow if given a fair chance." A. C. H. Pearce, St. Johnsbury, Vt. March 9, 1933.

Sure Crop Black Wax

Dwarf Green-Podded Varieties

	NOT PREPAID*			
	1 lb.	7½ lb.	15 lb.	100 lb.
CONSERVA. Early and Prolific	\$.35	\$1.60	\$2.85	\$17.00
Round light green pods of the highest quality. Early and prolific. Matures large clusters of pods at one time.

BEANS—Dwarf Wax Varieties

NOT PREPAID*

	1 lb.	7½ lb.	15 lb.	100 lb.
SURE CROP WAX. The Best Flat Wax Bean. See page 3.....	\$.30	\$1.45	\$2.55	\$15.00
PENCIL POD BLACK WAX. The Best Round Pod Wax. See page 3.....	.30	1.45	2.55	15.00
WEBBER WAX or "Cracker Jack." The Earliest Wax Bean.....	.30	1.35	2.40	14.00
The pods are long, straight, flat, stringless and quite free from rust. A heavy bearer. Known also as "Wonder Wax."				
WARDWELL'S KIDNEY WAX. Flat Podded.....	.30	1.30	2.25	13.00
Very long, flat, deep yellow pods. One of the earliest and most prolific wax beans for market.				
ROUND POD KIDNEY WAX or Brittle Wax.....	.35	1.50	2.70	16.00
Pods 5 to 6 in. long, round, clear yellow and stringless and medium early.				
UNRIVALLED WAX.....	.30	1.45	2.55	15.00
Early flat pods, heavy yielder.				
Davis' White Wax. Hardy and prolific. White Seed.....	.30	1.30	2.25	13.00
Long, flat, yellow pods of fair quality. Matures early.				

LIMA BEANS—Dwarf or Bush Varieties

A pound of Dwarf Lima seed will plant 150 ft. of row. About 60 lb. per acre.

Fordhook Bush Lima

It is essential for the grower to have the best stock obtainable of this popular bean. Harris' Fordhook Bush Lima cannot be surpassed, for yield and trueness to type.

Price: 1 lb. 40c; 7½ lbs. \$2.10; 15 lbs. \$3.90; 100 lbs. \$24.00. Not prepaid.*

NOT PREPAID*

	1 lb.	7½ lb.	15 lb.	100 lb.
FORDHOOK BUSH LIMA. Best For Market. See above.....	\$.40	\$2.10	\$3.90	\$24.00
The most popular bush Lima. Beans large, thick and deep green.				
BURPEE'S BUSH LIMA. Wonder Strain.....	.35	1.65	3.00	18.00
Large, flat beans, medium early.				
Burpee's IMPROVED Bush Lima.....	.35	1.80	3.30	20.00
Larger pods and thicker beans than the old variety and of deeper green color.				
Henderson's Bush Lima.....	.30	1.35	2.40	14.00
Small flat pods and beans, early and very prolific.				

LIMA BEANS—Pole

A pound of Pole Lima seed will plant 100 ft. of row or about 80 hills.

NOT PREPAID*

	1 lb.	7½ lb.	15 lb.	100 lb.
IDEAL or Mammoth Podded Pole Lima.....	\$.35	\$1.65	\$3.00	\$18.00
Very large pods often 8 in. long, early and prolific. We regard this the best large podded Pole Lima.				

OTHER POLE BEANS

A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills.

NOT PREPAID*

	1 lb.	7½ lb.	15 lb.	100 lb.
SCOTIA. Fine for Wayside Market.....	\$.35	\$1.80	\$3.30	\$20.00
Long, slender, green pods of the very best quality. Wonderfully prolific.				
Golden Cluster Wax.....	.35	1.80	3.30	20.00
Long, broad, deep yellow pods of finest quality; beans white.				
Kentucky Wonder. Also called "Old Homestead".....	.30	1.35	2.40	14.00
Long, slender, green pods of fine quality. Early and very prolific.				
Kentucky Wonder Wax.....	.35	1.50	2.70	16.00
Long, flat, yellow pods of fine quality. One of the best wax pole beans.				
White Dutch Runner.....	.35	1.80	3.30	20.00
Very large white beans often used in place of Limas. Very prolific and early.				
Scarlet Runner.....	.35	1.95	3.60	22.00
Used principally as an ornamental vine.				
KING HORTICULTURAL or Speckled Cranberry.....	.35	1.80	3.30	20.00
Much superior to the old London Horticultural. Earlier, longer pods of brighter color and stringless.				

FIELD BEANS

Sow about 60 lbs. of Field Beans per acre.

NOT PREPAID*

	1 lb.	7½ lb.	15 lb.	100 lb.
BOSTON MARROW or White Marrowfat. Perry Strain.....	\$.25	\$1.10	\$1.95	\$ 9.00

Robust Pea Beans. Mosaic Resistant.....	.25	1.05	1.50	6.00
IMPERIAL or PROLIFIC TREE. Heavy yielder, finest quality...	.25	1.20	2.10	10.00
Yellow Eye.....	.25	1.10	1.95	9.00

* We prepay freight charges if your order for vegetable seeds including beans amounts to \$20.00 or more.

Ruebe (Ger.)

BEETS

Barbabetole (It.)

¼ lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre (for rows 18 in. apart.)

Harris' Special Crosby's Egyptian Beet

The Finest Bunching Beet

Every one a model for shape and color. Our special Northern grown strain is the result of over thirty years of intensive selection and will produce beets which grow rapidly and are ready for market as early as any other kind we know of. The handsome bunches will command a premium on the market.

We harvested a fine crop of this seed this year, and the seed we offer is of superior quality and high germination.

¼ lb. 35c; 1 lb. \$1.15; 10 lbs. \$11.00; 100 lbs. \$100.00.

"I have used Harris' strain of Crosby's Egyptian beet for about a dozen years and it is consistently very true to type and variety." Dwight Cowles, Salisbury, Conn. Feb. 11, 1932.

Harris' Special Crosby's Egyptian Beets (From a field of our seed stock)

Harris' Special Detroit Dark Red Beets

Harris' Special Detroit Dark Red Beet

No better stock of this popular beet can be obtained at any price. We have carefully selected and grown our special strain of Detroit Dark Red Beet for over thirty years. It will produce beets that are much more uniform in shape and of better color than the strains usually sold.

Market Gardeners find this an extra fine beet for late summer and fall bunching.

¼ lb. 30c; 1 lb. \$1.00; 10 lbs. \$9.50; 100 lbs. \$85.00.

	¼ lb.	1 lb.	10 lb.	100 lb.
CROSBY'S EGYPTIAN. Harris' Special Strain See above ...	\$.35	\$1.15	\$11.00	\$100.00
CROSBY'S EGYPTIAN. Bright Red Strain.....	.30	.90	8.50	75.00
Color lighter red than Harris' Strain. Popular in some markets.				
EARLY WONDER. A Superior Strain.....	.35	1.15	11.00	100.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is very fine.				
Egyptian Blood Turnip.....	.25	.80	7.50
Flatter than Crosby's and is preferred by some for early bunching.				
DETROIT DARK RED. Harris' Special Strain. See above30	1.00	9.50	85.00
Eclipse.....	.30	.85	8.00
Early, globe-shaped and very handsome beet, of somewhat lighter color than Detroit but earlier.				
Early Blood Turnip.....	.30	.85	8.00
A good old variety, large flat beets.				
LONG SMOOTH BLOOD RED.....	.30	.85	8.00
8 to 10 inches long and very dark red. Grows half out of the ground.				
LONG SEASON. Called "Winter Keeper" and "New Century"	.60	2.00	19.00
A very late variety of extra fine quality. Description in Retail Catalogue.				

See page 39 for Mangels and Sugar Beets.

Rosenkohl (Ger.)

BRUSSELS SPROUTS

Cavolo di Brussels (It.)

Cultivation is the same as for cabbage or cauliflower. 1 oz. of seed will produce about 3000 plants.

Long Island Improved Brussels Sprouts—Special Strain

We are pleased to be able to offer a very fine strain of Long Island Improved Brussels Sprouts that produces a high percentage of firm, large sprouts so that the yield is high. The plants are not tall but the stems are completely covered with large and very firm sprouts. Growers find this a very profitable strain to use. Oz. 60c; ¼ lb. \$1.90; 1 lb. \$6.50.

Italian Green Sprouting Broccoli

BROCCOLI

Italian Green Sprouting (Calabrese)

The seed we offer of this profitable market vegetable is of the true Italian Calabrese type. It is important to get seed which will produce a large compact central head and tight side shoots after the center head is cut. You can depend on the Harris strain to do this.

Price: oz. 70c; $\frac{1}{4}$ lb. \$2.10; 1 lb. \$7.50.

"The broccoli I got from you this year is unusually good, and I have been cutting good quantities from June 14th, which is far the earliest I have ever had. Mrs. A. H. Olsen, North East Penna. Aug. 6, 1933.

Blumenkohl (Ger.)

CAULIFLOWER

Cavolflore (It.)

One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

Wm. Scorse and Son, Rochester, N. Y. in their field of Harris' Super Snowball Cauliflower. Photo taken Aug. 6th.

Super Snowball Cauliflower—True Originator's Strain—Early

Also known as "The Forbes" and "Burpeeana." The popularity of this wonderful early cauliflower has brought many strains with various names in the market. We have found in our extensive trials that there are none superior to the *true originator's stock* which we have sold since the introduction of this variety in 1929.

We strongly advise our customers not to take chances with their early cauliflower but to use this proven original strain which has been so very satisfactory since its introduction.

Price: $\frac{1}{4}$ oz. 85c; oz. \$2.65; $\frac{1}{4}$ lb. \$9.00; lb. \$32.00.

"The seeds received from you have been most satisfactory and your Super Snowball Cauliflower the finest I have ever grown." S. V. Bennet, Middlebury Center, Pa. Aug. 23, 1932.

Snowball Cauliflower—Perfected Strain

This is the best main crop Snowball which we know, and we can confidently state that the seed we offer is the finest strain obtainable and there is no use paying more than we charge as no better can be bought at any price.

Price: $\frac{1}{4}$ oz. 55c; oz. \$1.85; $\frac{1}{4}$ lb. \$6.25; 1 lb. \$22.00.

"I wish to inform you that I have a fine crop of cauliflower. I wish you could see it." Geo. D. Harris, Jefferson, N. Y. Sept. 2, 1933.

	$\frac{1}{4}$ oz.	oz.	$\frac{1}{4}$ lb.	lb.
SUPER SNOWBALL. See above	\$.85	\$2.65	\$9.00	\$32.00
SNOWBALL. Perfected Strain. See above55	1.85	6.25	22.00
CATSKILL SNOWBALL. Early and Compact55	1.85	6.25	22.00
A fine strain of Snowball grown extensively in the Catskill Mountain region.				
DANISH PERFECTION. For late market60	1.90	6.50	23.00
A strain of Snowball Cauliflower with more leaves to cover the head. Heads very solid and without protruding leaves. A week later than Snowball.				
Danish Giant Snowball or "Dry Weather"60	1.90	6.50	23.00
Ten days or two weeks later than Snowball and more vigorous. Stands drought.				
ERFURT EARLY DWARF. Madsen's Stock No. 355	1.85	6.25	22.00
Much like Snowball, but has somewhat shorter stems and matures a little earlier. Has proven the best in several trials made here in New York State.				
ITALIAN PURPLE. Large purple heads40	1.25	4.25	15.00
This is a true cauliflower, but the heads are purple tinged and do not require tying. The demand for these cauliflower far exceeds the supply.				

Kraut (Ger.)

CABBAGE

Cavolo capucci (It.)

One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames. It requires 4 to 6 oz. of seed to produce plants for an acre of ground.

Golden Acre

Golden Acre The Earliest Cabbage

Golden Acre matures a week earlier than Jersey Wakefield. The heads resemble a fine type of Copenhagen Market but are smaller and earlier. They are very solid, an attractive bright green color and mature over a short period of time. Every plant makes a good head. The plant has but few outside leaves, so that they can be set very close and a large crop of early heads harvested per acre.

This strain which we offer is the true originator's stock, and is much superior to most stocks sold even at a much higher price.

Oz. 40c; 1/4 lb. \$1.15; lb. \$3.75.

Golden Acre Special

The Best Strain of Golden Acre Obtainable

This finely bred strain of Golden Acre is probably the most perfect strain of early cabbage in existence. This is the stock for the grower who wants absolutely the best there is and is willing to pay the little extra cost which amounts to only about 85c per acre.

Oz. 65c; 1/4 lb. \$2.00; lb. \$7.00.

Early Varieties

	Oz.	1/4 lb.	lb.
GOLDEN ACRE. The Earliest Cabbage. See above.....	\$.40	\$1.15	\$3.75
Golden Acre. Special Strain. See above.....	.65	2.00	7.00
EARLY JERSEY WAKEFIELD. Early Pointed Heads.....	.25	.75	2.50
Our strain is particularly fine, the heads being very uniform and early.			
COPENHAGEN MARKET. Large Headed.....	.30	.90	3.00
Our strain is larger and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. Larger but about 10 days later than Golden Acre.			
MARION MARKET. "Yellows" Resistant. Copenhagen Type.....	.50	1.50	5.00
LARGE LATE COPENHAGEN. Best for Kraut. See below.....	.35	1.10	3.50
ENKHUIZEN GLORY. True Originator's Strain.....	.25	.70	2.25
A very large, medium early cabbage. Heads as large as the late kinds and mature much earlier. Has proved to be a most profitable variety for market and kraut.			
Burpee's All Head Early.....	.25	.75	2.50
Heads flat and of good size. Medium early. For main crop, fall market and shipping.			

"I have been using your seeds for over 30 years and think yours are the best of all. Your Golden Acre (Special) Cabbage was the finest I ever saw. Every head was perfect and weighed 4 to 5 lbs. James G. Young, Phoenixville, Pa. Jan. 18, 1933.

Large Late Copenhagen For Market and Kraut

This new variety which we introduced last year has met with much favor among gardeners and farmers, for market and kraut.

This cabbage is the true Copenhagen type and can be cut for main crop market or they can be left in the field for kraut. The heads will actually increase in size to 10 to 12 in. in diameter without splitting or getting soft. This strain is very uniform in type and will produce enormous yield of the finest kraut cabbage. Harris' Seed is the true original strain of this variety.

Large Late Copenhagen (Note size of heads compared to hat)

Oz. 35c; 1/4 lb. \$1.10; lb. \$3.50.

Field of Harris' Ballhead Cabbage growing for seed crop on Moreton Farm.

Harris' Ballhead Cabbage

Short Stemmed — Pure Bred

This superior strain is the result of our own pure line breeding and is all carefully grown on our own farm. It will produce a larger tonnage of superior hard heads than any stock we know. As our crop this year is limited we advise growers to order early; this stock cannot be obtained elsewhere.

Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

"I have used your Cabbage and other seeds for 12 years and always found them pure and up to the standard in every way." C. F. Phelps, Bliss, N. Y. May 22, 1933.

Late or Main Crop Varieties

	Oz.	$\frac{1}{4}$ lb.	lb.
MIDSEASON MARKET. Heavy Yielder	\$.30	\$.85	\$ 2.75
This cabbage has proved one of the most uniform and heaviest yielding medium early varieties grown. The heads are almost perfectly round, large and solid. We highly recommend this variety for market, shipping and kraut.			
DANISH BALLHEAD. Short Stem30	.85	2.75
Has proved to be a very heavy yielding strain of Danish cabbage. The heads are large, solid and of good deep green color.			
HARRIS' BALLHEAD. The Best Strain of Danish. See above50	1.50	5.00
PENNSYLVANIA BALLHEAD. True Stock45	1.20	4.00
We offer a true stock of this variety.			
WISCONSIN HOLLANDER. Heavy Yielder. "Yellows" Resistant45	1.20	4.00
This cabbage will produce crops in ground so diseased with "yellows" that ordinary cabbage will not grow.			
DANISH BALLHEAD. Intermediate. "Fine Keeper"30	.85	2.75
Heads are deeper and not as flattened as the short stemmed. The color is deeper green and they keep very well in storage. A profitable type to raise.			
SUCCESSION25	.70	2.25
All Seasons25	.70	2.25
Volga. Hard Round Heads25	.70	2.25
Premium Flat Dutch25	.70	2.25
Winningsstadt. Pointed heads25	.70	2.25
MAMMOTH ROCK RED. Surest Heading Red30	.90	3.00
The largest red cabbage. The heads are hard, round and deep red. This is one of the best red kinds for market or shipping, and our strain is especially fine.			
SAVOY. Perfection Drumhead. Market Gardener's Strain30	.90	3.00
Heads are large of fine quality and quite firm. The color is a deep green, and the leaves are very much curled. Matures late and keeps all winter. This is an extra fine strain for market and roadside stand.			

CHINESE CABBAGE

Chinese cabbage has proved to be a very profitable crop for muck as well as up land. The seed is sown in July or August and the crop matures in eight to ten weeks.

	Oz.	$\frac{1}{4}$ lb.	lb.
CHIHLI. Much the Best Variety	\$.30	\$.90	\$ 3.00
This new variety has proved to be much the best for market and roadside stands. The heads are often 18 in. long. Our stock will produce uniform solid and attractive heads.			
Pe-Tsai25	.75	2.50
Large heads. 18 to 20 in. high.			
Wong Bok25	.75	2.50
Short compact heads of fine quality.			

KEEP CABBAGE CLEAN OF WORMS AND LICE

A powerful new killing ingredient (Rotenone) kills worms and lice on cabbage, cauliflower, broccoli, etc. without being harmful to human beings or animals. If you dust, use **Ku-Ba-Tox** or **Derox**; if you spray, use **New Evergreen** or **Red Arrow**. These modern insecticides contain Rotenone and are the best of their kind. See prices and description in our General Catalogue or write for prices and descriptive circulars.

Chihli

Carroten (Ger.)

CARROTS

Carota (It.)

An ounce will sow about 300 feet of row. It requires 2 to 4 lbs. of seed for an acre, depending on how far the rows are apart.

Carrots often prove very profitable. They do best on muck or soil of that nature, although very good crops are raised on sandy loam. For late fall market the seed is usually sown in June or first of July. If small carrots for bunching are wanted the seed may be sown as late as August 1st in the North and later further South.

New Red Cored Chantenay

The superior quality of this new carrot has made it rapidly replace the old style Chantenay as a market carrot. Our strain of Red Cored Chantenay has been constantly improved and will be found to be exceptionally fine. It is well over 90% coreless, smoother and more uniform than many other strains which we have seen.

Oz. 15c; 1/4 lb. 40c; lb. \$1.25; 10 lbs. \$11.00.

"I have been very much pleased with the Red Cored Chantenay carrot seed I received from you this season. It has produced wonderful carrots of fine quality." H. S. Van Tuyle, Pittston, Pa. July 19, 1932.

Chantenay Carrot—Special Strain

Grows about an inch longer than most strains of this variety usually sold, and is superior in shape and smoothness. This carrot has proved a popular bunching variety on many markets.

Oz. 15c; 1/4 lb. 35c; lb. \$1.10; 10 lbs. \$10.00.

"Please send me by return mail 10 lbs. Chantenay carrot seed. If it is as good as what I got in the spring, I will be more than satisfied." W. Harkins, Tuxland, Pa. July 27, 1932.

"For the last several years I have been trying different companies strains of carrots. Last year I tried your Nantes and I can say half of them were perfect and the other half 93% perfect. I can't express in words this quality." Sherman P. Snook, Canton, Ohio. Feb. 25, 1933.

Red Cored Chantenay Carrot

	Oz.	1/4 lb.	lb.	10 lb.
CHANTENAY. "A Superior Strain." See above	\$.15	\$.35	\$1.10	\$10.00
CHANTENAY, Red Cored. See above15	.40	1.25	11.00
TENDERSWEET. The Sweetest Carrot.30	.85	2.75	25.00
This carrot is being grown more and more for market. The striking deep reddish orange color, good bunching character and superb quality have made it popular on many markets.				
DANVERS HALF LONG. A Heavy Cropper15	.45	1.50	14.00
PRIDE OF DENMARK20	.60	2.00	19.00
A wonderfully fine carrot growing 8 to 9 in. long and 2 to 3 in. through, being practically the same size the whole length. It closely resembles the Hutchinson but has less core and deeper color. Yields well.				
NANTES. Coreless15	.45	1.50	14.00
This is the <i>coreless</i> variety that is used most extensively for a fine bunching carrot in many markets. The carrots are smooth, coreless, 6 to 7 in. long, cylindrical and stump rooted.				
IMPERATOR. Fine for Bunching15	.45	1.50	14.00
This outstanding bunching sort is being shipped to eastern markets from California. The carrots are long (8 in.) smooth, somewhat tapering, quite stump rooted, deep orange in color outside and inside and with good tops.				
Amsterdam Forcing20	.60	2.00	19.00
The carrots grow about 5 to 6 in. long and 1 to 1 1/2 in. through and the same size the whole length. The end is blunt and with very fine rat-tail root. The color is deep orange red all through the root including the core.				
Early French Short Horn15	.40	1.25	11.00
For forcing. About 3 inches long; very early.				
PERFECTION. A Larger "Coreless"20	.55	1.75	16.50
A new carrot, similar to Amsterdam Forcing, but is larger being 6 to 8 in. long. They are practically the same size the whole length, <i>coreless</i> and very smooth. A fine carrot for fall market.				
HUTCHINSON. Finest Market Garden Strain.30	.85	2.75	25.00
The roots are 8 to 9 in. long, nearly the same size the whole length and stump-rooted. Color light orange. This carrot yields large crops and is used extensively for busheling.				

CARROTS continued on next page.

CARROTS—Continued

	Oz.	¼ lb.	lb.	10 lb.
OXHEART or Guerande	\$.12	\$.30	\$1.00	\$9.00
Short, thick carrots, used for bunching and table use. Very easily pulled.				
Long Orange12	.30	.90	8.00
Roots a foot long, yields large crops.				
MASTODON or WHITE VOSGES10	.25	.75	6.50
Large, white carrot for stock feeding. Immense yielder. 8 to 10 inches long.				

Sellerie (Ger.)

CELERY

Sedano (It.)

An ounce of seed will produce about 8000 plants. It requires 20,000 plants to the acre.

For very early planting the seed should be sown in February or first of March. For late crop the seed is sown in the open ground as early as possible. Great care must be taken not to cover the seed too deep. More failures to get the seed to germinate are due to this cause than any other.

Golden Plume or Wonderful The Best Yellow Celery

We have a very superior strain of this popular celery which is now rapidly taking the place of other varieties.

We consider this the finest all around celery of the "blanching" type in existence.

The stalks of our special strain are *very large* with remarkably *heavy hearts* and with *thick solid stems*, *unusually long* between the root and first joint. There is not one green stalk in a thousand and no soft ones.

This strain is quite *blight-resistant*. Often where other kinds are badly affected with blight or rust this strain of Golden Plume will be found in the same field perfectly healthy and entirely free from blight.

The seed is of strong germination and we can confidently recommend it. There is no finer strain obtainable *at any price*.

Oz. 85c; ¼ lb. \$2.85; lb. \$10.00.

"I think I have grown as much celery as any man in America, and all I have to say is that your statement on page 8 of your Market garden catalog (1932) is correct to the letter. I have never seen more blight resistant, hardier, and all round better celery than your strain of Golden Plume. Be sure and save me 2 lbs. of the same seed." Sam de Boer, Westboro, Mass. Aug. 1, 1932.

C. F. Duerr, Irondequoit, N. Y. and his field of Harris' Golden Plume Celery

Yellow or "Self-Blanching" Varieties

	Oz.	¼ lb.	lb.
GOLDEN PLUME or WONDERFUL . See above	\$.85	\$2.85	\$10.00
GOLDEN SELF-BLANCHING. "Old" Strain. Dwarf75	2.35	8.00
The same as has been raised for many years. The stalks are large, rather short and form large heavy hearts.			
GOLDEN SELF-BLANCHING. "New" Strain. Tall75	2.35	8.00
Grows very rapidly and is strong and healthy, resisting blight well. Some growers think it is too tall for late crop and storage, but prefer it for the early crop.			
GOLDEN PHENOMENAL. Proved Seed	1.00	3.40	12.00
This is the largest strain of Golden Self Blanching. It resembles Golden Plume but is a little longer from the first to second joints. Very large fine celery can be grown from this variety.			

Green Varieties

	Oz.	¼ lb.	lb.
EASY BLANCHING or Sanford Superb	\$.60	\$1.75	\$6.00
A very good variety to follow Golden Self-Blanching. It is the same dwarf, compact habit of growth, blanches easily and quickly, and is of fine quality. The leaves are green and the stalks pure white when blanching. The strain we offer is very carefully grown and is far superior to the seed usually sold.			
SALT LAKE. The Best Green Celery . See next page75	2.35	8.00
GIANT PASCAL. Special Strain50	1.50	5.00
This strain of Giant Pascal is largely used in New England and is considered one of the very best for late winter market. The stalks are large, very solid and blanch pure white. This strain is far superior to the ordinary Giant Pascal.			
Columbia50	1.50	5.00
Much resembles Golden Self Blanching in growth and appearance, but is a green celery and does not blanch so quickly and keeps longer. A valuable kind for early winter market.			

Salt Lake
The Best Green Celery
(also called Utah)

This new green celery is just what we have long been looking for—an almost perfect green celery for winter storage. Growers who have had it the last four years have been very enthusiastic about it as it supplies a long felt need for a superior green celery.

The plant grows to a good height, not too tall, and makes a well developed and heavy heart. The individual stalks are *very thick*, crisp and of high quality. They blanch more quickly than other green varieties.

The **Harris' Strain** produces uniformly large compact heads. In one field we examined several thousand heads as they were being dug *but could not find a soft one*.

Oz. 75c; ¼ lb. \$2.35; 1b. \$8.00.

"Your Salt Lake Celery is a real knockout. It was the finest celery we ever had, absolutely stringless crisp and fine." Spencer B. Hunt, Hunt, N. Y.

"I am sending you these few lines to say I am very well pleased with your celery seed. 'Salt Lake' is everything you claim it to be." Joan De Young, St. Catherines, Ont., Canada.

Our General Retail Catalogue

Our general retail catalogue is issued in January. It contains other varieties of vegetable and flower seeds not listed in this Price List, together with more complete descriptions of the varieties listed here. Also a full line of garden accessories, fertilizers, insecticides, etc.

It will be mailed to our customers and others who ask for it. If you do not receive your copy, let us know and we will gladly mail you one.

Gurken (Ger.)

CUCUMBERS

Cetriolo (It.)

¼ lb. of seed will plant about 300 hills or sow 200 ft. of row. It requires about 2 lbs. of seed per acre.

Harris' Perfection Cucumber The Finest Long Green Variety

This is the best long green cucumber for market and shipping. We have been breeding this cucumber for a good many years and have it now so perfected that the fruit is more uniform in shape, size and color than any other kind we know of. Because of its evenness in size and handsome deep green color this cucumber often *commands a premium* over other varieties in market.

The fruit is long, straight, smooth and handsome. The color is deep green with small white rays on the blossom end. The cucumbers retain this deep green color for a long time after picking. This is a white spined variety and never turns yellow. The fruit will average over a foot long when matured and some reach 15 inches in length.

This variety is well adapted for dill pickles as well as for general market.

Oz. 20c; ¼ lb. 60c; lb. \$2.00; 10 lbs. \$19.00.

Harris' Perfection Cucumbers
Grown by Joseph Schickler, Coldwater, N. Y.
These cucumbers (grown between rows of corn) brought a premium over market prices in Rochester.

"The Perfection cucumber bought of you is extra good, better than some grown under glass. It is a fine variety for roadside stands." F. A. Whitman, Danvers, Mass. Aug. 24, 1932.

IRONDEQUOIT HOTHOUSE CUCUMBER

Seed saved entirely from perfect fruit grown under glass and will produce very fine uniform cucumbers. This excellent variety which has been developed by the greenhouse growers around Rochester. The fruit is long, slender, deep green and nearly perfectly solid, there being very few seeds and in some fruit none at all. The vines are wonderfully vigorous and very prolific.

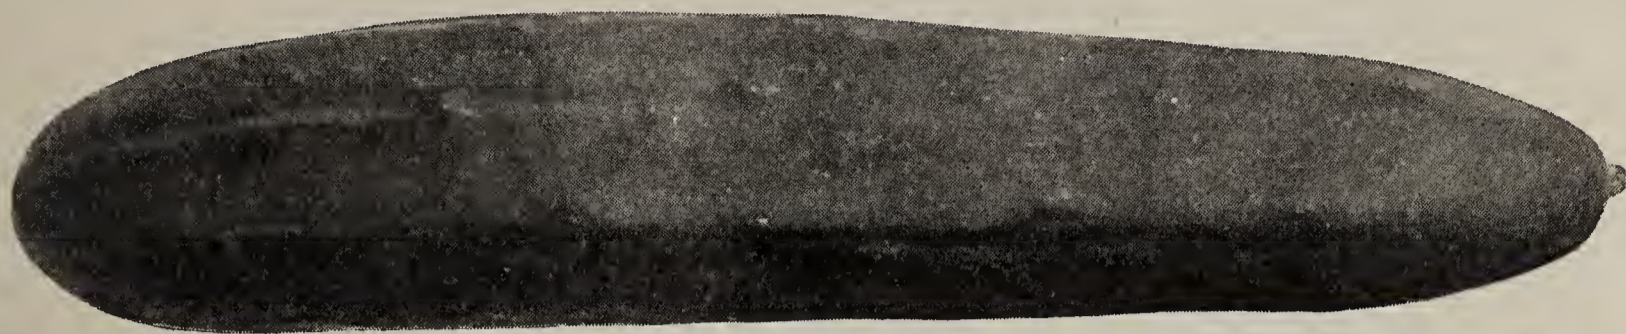

100 seeds \$1.00; 500 seeds \$4.00.

White Spine Varieties

CHICAGO PICKLING12	.30	1.00	9.00
Very prolific and profitable for pickles. The young fruit is straight, square ended and of medium deep green color.				
Green Prolific or Boston Pickling12	.30	1.00	9.00
Very prolific; short, bright green fruit. A profitable variety for pickles.				
Perfected Jersey Pickle12	.30	1.00	9.00
Longer and more slender than Chicago and Boston Pickling. An excellent variety.				
Early Green Cluster12	.30	1.00	9.00
Short fruit produced early and in great abundance. Of rather light green color.				
Everbearing12	.30	1.00	9.00
Starts bearing early and continues a long time. Short with blunt ends.				
Japanese Climbing15	.45	1.50	14.00
A vigorous grower; long, smooth fruit of excellent quality.				
West India Gherkin15	.45	1.50	14.00
Lemon Cucumber20	.55	1.75	16.50
A real cucumber about the size and shape of a lemon. For table and pickling.				

**Harris' Double Yield Pickle
The Most Prolific Variety**

This variety yields more pickles per plant than any other variety we have ever grown. In a carefully conducted trial the Double Yield produced *three times* as many small pickles as the next most prolific variety.

When the small cucumbers are kept picked off as fast as they get to the right size for pickles, the vines produce an astonishing number. The young cucumbers are often produced in clusters of three or four like the fingers of your hand.

The cucumbers are very straight with blunt ends, medium deep green and of the very best shape for small pickles. The photo gives a good idea of the shape.

Harris' Double Yield is not only much more prolific than other kinds but is also *earlier*. These cucumbers mature two weeks before other kinds are ready. On this account many gardeners find it profitable to grow as a market variety for slicing. The fruit is 5 to 6 inches long when ready for slicing.

Oz. 15c; ¼ lb. 40c; 1 lb. \$1.25; 10 lbs. \$11.50.

Harris' Double Yield Pickles.
Note the uniformity of shape.

"I had wonderful success with Harris' Double Yield pickles. Most thoroughly satisfied with your seeds in the past."
Chas. Malone, Berlin Hts., Ohio. Jan. 28, 1933.

"I grew your Harris' Double Yield pickles last season. I think they are the finest specimens and best yielders, I ever grew or handled."
Patrick H. Purcell, Aurora, N. Y. Jan. 6, 1933.

Welschkorn (Ger.)

SWEET CORN

Mais (It.)

One pound of seed will plant 350 to 400 hills; 12 to 14 lbs. will plant an acre.

Note—25 lbs. of one variety will be supplied at the 100 lb. rate. A bushel weighs 40 to 50 lbs. depending on the variety.

At the prices here quoted, sweet corn is not prepaid. Purchaser pays transportation on sweet corn except as follows:

If your order for vegetable seeds, including corn, amounts to \$20.00 or more we will prepay the freight charges.

Harris' Northern Grown Sweet Corn

Harris' Northern grown sweet corn is earlier, hardier and more vigorous than seed of the same varieties grown farther south and in the West. For many years we have made a specialty of growing sweet corn seed and have spent much time and effort in careful scientific selection and breeding to improve the earliness, yield and quality of our varieties. Growers who know find it pays to use Harris' Northern Grown Sweet Corn.

**Harris' Extra Early Bantam Sweet Corn
The Best Extra Early Yellow Corn**

Northern Grown Seed—grown under our careful supervision on nearby farms from our own carefully selected stock seed.

We consider this the best all around Extra Early Yellow variety. It has proved to be a real money maker for gardeners.

The ears of Harris' Extra Early Bantam are usually 7 to 8 inches long and have 8 to 10 rows of yellow kernels. They are just like Golden Bantam in appearance and quality but they mature 10 days earlier.

The yield is heavy. We know of no early corn which will produce such a large number of fine ears as Extra Early Bantam. Think of the difference in profits from using this early strain. The whole crop can be picked and sold before the market becomes flooded with the later yellow kinds.

1 lb. 30c; 6 lbs. \$1.35; 12 lbs. \$2.40; 100 lbs. \$18.00. Not prepaid.*

"Your Extra Early Bantam corn has proved to be the greatest we have ever raised." We have given your name to a great many. J. A. Connolly, Woonsocket, R. I. April 15, 1932.

Golden Cross Bantam**Wilt Resistant-High Yielding-Uniformly Large Ears**

We recommend this hybrid sweet corn for places where Stewart's Disease (wilt) make it impossible to grow ordinary varieties of sweet corn. This corn which is the product of crossing two pure lines, is not only resistant to bacterial wilt (Stewart's Disease) but produces *larger crops* of beautiful ears. The ears have 10 to 14 rows of light golden yellow kernels, are remarkably uniform in length (about 8 in.) and are of excellent quality. They mature about a week later than Golden Bantam, the whole crop ripening at about the same time.

This crossed seed was produced by controlled cross pollination of two inbred parents (Purdue Bantam and Purdue No. 51) in 1933 and will produce the true Golden Cross Bantam described above in 1934.

However, seed from the 1934 crop cannot be saved for 1935 as it will break down. The cross has to be made each year.

Many trials all over the country have proved that this corn is very resistant to Stewart's Disease (wilt) and is adapted to a wide range of soils. It will mature in all but the most northern parts of the United States.

1 lb. 50c; 6 lbs. \$2.65; 12 lbs. \$5.00; 100 lbs. \$40.00. Not Prepaid.*

Golden Early Market (Gill's)

Same as Golden Hummer, Extra Early Golden, Extra Early Yellow, Etc.

Be sure to get the true strain of this variety as there are many different strains of this corn sold under a great variety of names. We obtained our stock seed from the originator and have carefully grown our seed crop here in the North for the last two years.

The ears resemble closely Gill's Early Market (White) being 7 to 8 in. long and containing 10 to 12 rows of broad yellow kernels. The quality is very good.

This has proved to be a very popular kind with market growers and at roadside stands.

1 lb. 30c; 6 lbs. \$1.35; 12 lbs. \$2.40; 100 lbs. \$18.00. Not prepaid.*

* We prepay freight on sweet corn if your order for vegetable seeds including sweet corn amounts to \$20.00 or more.

Harris' Extra Early Bantam Sweet Corn

Whipple's Yellow Sweet Corn Harris' Original Northern Grown Strain

We introduced this variety in 1920, and have carefully grown and selected it for earliness, uniformity and size since that time.

Every pound of this variety which we sell is grown here in the North on and in the vicinity of our own farm, from our own carefully bred stock seed. The great popularity of this fine variety has brought many strains on the market. The only safe way to do is to buy your seed direct from headquarters and you will be sure that you are getting the true original Whipple's Yellow. We do not sell to dealers.

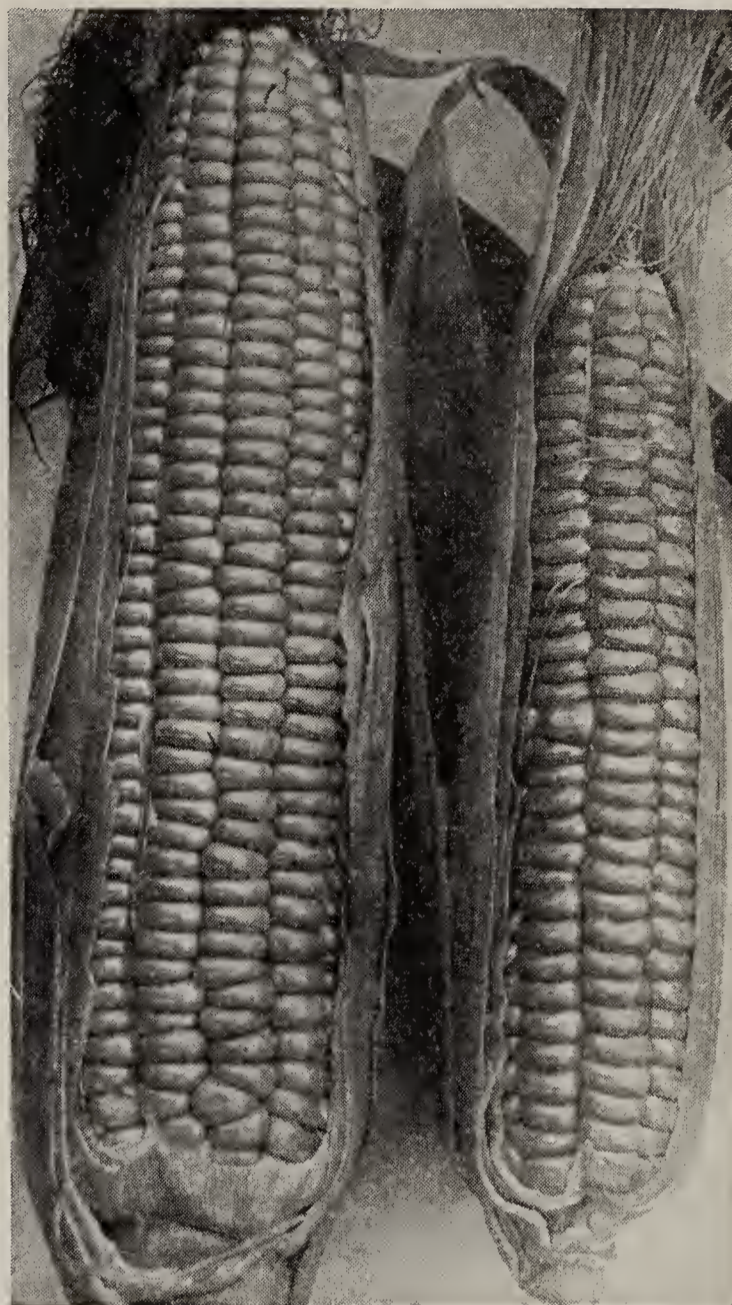

Note—When ordering please write "Whipple's Yellow" not just "Whipple's" as that will confuse it with Whipple's Early which is a white corn.

1 lb. 30c; 6 lbs. \$1.20; 12 lbs. \$2.15; 100 lbs. \$16.00. Not prepaid.*

"Your Whipple's Yellow sweet corn is as large and uniform as any which I have ever grown." Wm. Bowles, South Lincoln, Mass. Oct. 20, 1933.

"This (Whipple's Yellow) sure is fine corn and I'm well pleased with it." C. D. Bower, Berwick, Pa. Apr. 23, 1932.

"I first obtained your Whipple's Yellow sweet corn the year you introduced it. I have grown it ever since and doubt if it has an equal from a market gardener's point of view." Charles A. Thayer, Milton, Mass. Aug. 26, 1932.

A larger, improved Golden Bantam.				
Golden Giant.....	.30	1.20	2.15	16.00
A good yellow corn to follow Bantam as it matures a week later and has larger ears, 12 rowed, and the corn is of high quality.				

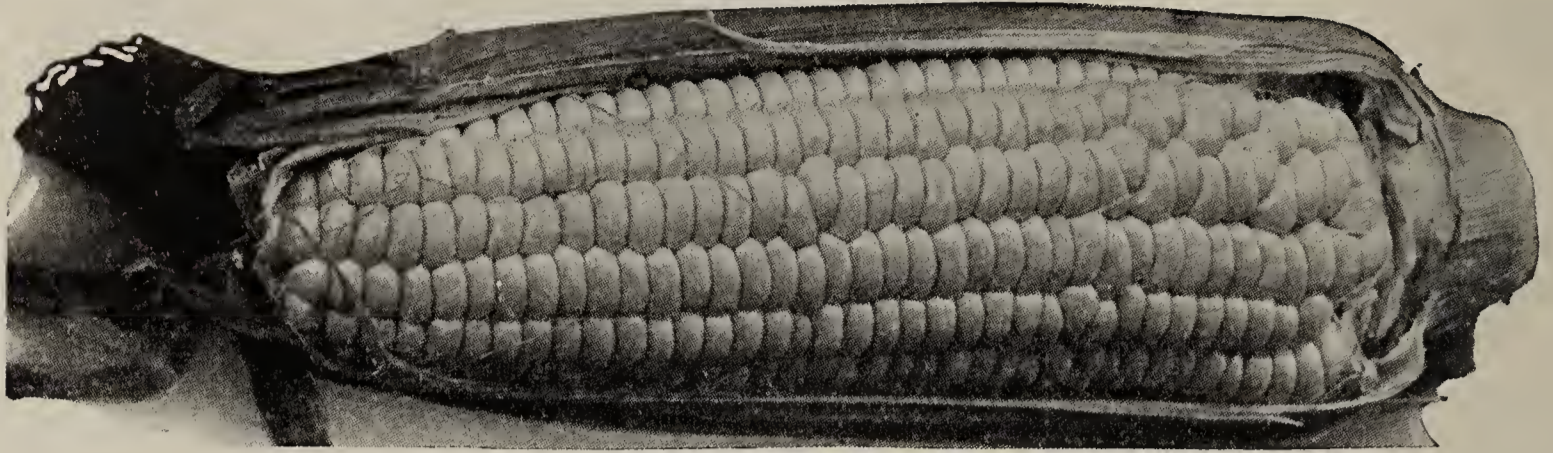

Whipple's Early (White)—The Largest Early Sweet Corn

Just as in the case of Whipple's Yellow, this variety has proved so popular since we introduced it in 1919 that many inferior strains are now being sold.

The seed we offer is all Northern grown here in Monroe County from our own carefully selected stock seed. Get your seed from the original introducer of this variety and you will be sure it is right.

1 lb. 30c; 6 lbs. \$1.15; 12 lbs. \$2.05; 100 lbs. \$15.00. Not prepaid.*

* We prepay freight on sweet corn if your order for vegetable seeds including sweet corn amounts to \$20.00 or more.

Gill's Early Market Sweet Corn

Gill's Early Market—The Earliest White Sweet Corn

The seed we offer is Northern grown here in the vicinity of our farm and is of the highest quality. Although this variety is not of our introduction we have raised this corn for a number of years and have improved it both in size and earliness.

Without exception this is the earliest white sweet corn yet produced and is earlier than any other sweet corn we know of except *Golden Gem*. Gill's Early Market is not only extremely early but in addition the ears are large, having 12 to 14 rows and often measure 8 inches long. The quality is very good for such an early variety.

This is really a remarkable corn. No very early variety hitherto has been anywhere near the size or quality of this new kind.

1 lb. 30c; 6 lbs. \$1.20; 12 lbs. \$2.15; 100 lbs. \$16.00. Not prepaid.*

POP CORN

A bushel weighs 60 lbs. 10 lbs. will plant an acre. 30 lbs. or more of one variety will be supplied at the 100 lb. rate.

At the prices here quoted Pop Corn is not sent prepaid. Purchaser pays transportation on Pop Corn except as noted under Sweet Corn.

Dynamite Pop Corn

Also Called South American Yellow

We find that our Northern grown seed of this popular variety will mature even in our climate where many large late kinds will not ripen.

Dynamite has a large yellow kernel on ears 6 to 8 in. long. The stalks grow over six feet high, are sturdy and will produce a large crop. Yellow Pop Corn is becoming very popular because of its superior quality and always finds a ready sale.

LETTUCE

Lattuga (It.)

An ounce of seed will sow 250 feet of row. About 2 lbs. per acre.

White Boston Lettuce Special Strain

Our strain of this variety is the very best that money can buy. It is *fully equal to any strain obtainable* even at twice or three times the price we charge for the seed. You cannot get better seed no matter what you pay for it.

One important thing about our strain of this lettuce is the uniform manner in which it heads, so that there is practically no waste in cutting a crop.

More of this lettuce is being planted each year. Muck land growers in increasingly large numbers find this variety a very profitable kind to grow for a major part of their lettuce crop.

Oz. 20c; 1/4 lb. 55c; lb. \$1.75; 10 lbs. \$16.50.

"The White Boston lettuce which I have just sold is the best lettuce I ever raised." H. T. Appleton, Beverly, Mass. July 3, 1933.

White Boston Lettuce

Bottom Rot of Lettuce

You can control this disease which annually ruins 30% of the New York State lettuce crop, with **Du Bay 738**. Full particulars on request. **Du Bay 738**; 25 lb. can \$12.50; 100 lb. drum \$49.00. Purchaser pays transportation. *Price subject to change.*

HARRIS' SPECIAL BIG BOSTON LETTUCE

Our strain of this lettuce is exceptionally fine. The heads are uniformly solid and compact, and stand a long time without bolting. Some of the largest growers in this country both on muck and upland use Harris' Big Boston and find it equal if not superior, to any other stock obtainable. We are confident there is no better Big Boston. Oz. 15c; 1/4 lb. 40c; lb. \$1.25; 10 lbs. \$11.50.

Grand Rapids Lettuce—Special Greenhouse Strain

See photo on page 18

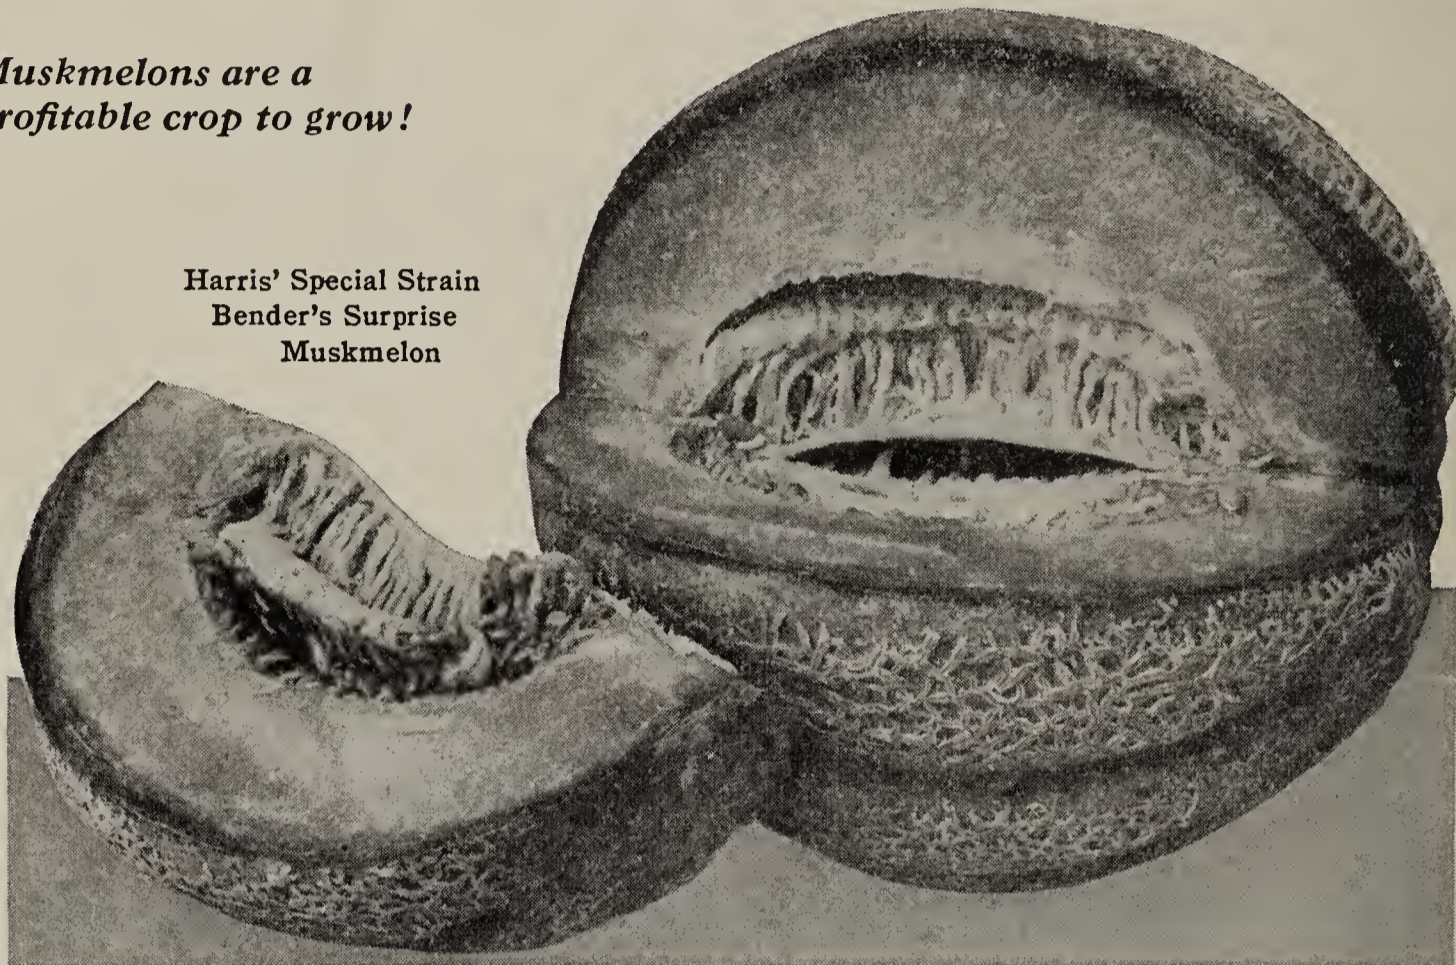

Over a long period of years this strain has proved to be the very best Grand Rapids for greenhouse growing. The leaves are light green, uniformly well curled and the plants strong and sturdy. Oz. 15c; 1/4 lb. 45c; 1 lb. \$1.50; 10 lbs. \$14.00.

Harris' Special Strain
Bender's Surprise
Muskmelon

Bender's Surprise Muskmelon
Harris' Strain—Specially Selected—Northern Grown

We have bred and grown Harris' Strain or Bender's here where our seasons are short for over ten years, paying special attention to high quality, earliness and trueness of type. This careful selection makes the Harris' Strain much superior to the ordinary strains of this variety usually sold.

For a number of years this melon has been a consistent money maker for progressive growers. There is no muskmelon quite equal to the Bender's for attractive appearance, fine flavor, size and keeping qualities. But be sure of your seed. There is no use buying inferior seed when Harris' Northern Grown Strain can be purchased at such a low price.

Oz. 25c; ¼ lb. 70c; 1b. \$2.25; 10 lbs. \$20.00.

"I have had wonderful success with the seed I received from you last year and especially the muskmelon seed. We had some Bender's Surprise melons that weighed 18½ lbs." J. C. Schlarb, Mishawaka, Ind. Jan. 17, 1933.

Sugar Rock or Honey Rock

Highest Quality for Shipping and Home Markets

This new melon has become very popular in markets where a fine high quality melon of medium size is desired.

The melons are nearly round 5-6 in. in diameter, with light green skin which turns to pale yellow when ripe. They are hard as a rock and covered with coarse heavy netting. This enables them to stand shipping and handling without spoiling.

The flesh is thick, of fine texture and of an excellent flavor that is not surpassed in any melon we have ever eaten.

Sugar Rock is remarkable for its large yields of fine fruit, and is altogether one of the best melons we have seen in many years.

Oz. 15c; ¼ lb. 45c; 1b. \$1.50; 10 lbs. \$14.00.

Sugar Rock

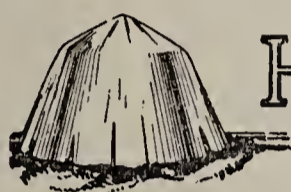

"We have grown melons from your seed with good success for several years." Wilcox & Jones, Kirkville, N. Y. Jan. 21, 1933.

Delicious Muskmelon The Earliest Large Melon

We have grown this melon on our own farms for a number of years, carefully selecting our stock for earliness, large size and high quality.

Delicious is the earliest large melon of high quality we have ever raised, and we recommend it highly for the home market and roadside trade. It is not recommended for long distance shipping.

Oz. 25c; 1/4 lb. 70c; 1b. \$2.25; 10 lbs. \$20.00.

Yellow Globe Danvers

Southport Yellow Globe

Ohio Yellow Globe

Ohio Yellow Globe—Harris' Strain

Harris' Strain of Ohio Yellow Globe cannot be beaten for consistent year in and year out large yields of fine No. 1 onions in muck land.

Many large growers recognize the fact that it pays them well to plant Harris' Strain of Ohio Yellow Globe.

Oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.60; 10 lbs. \$15.00.

Yellow Globe Danvers—Harris' Selected Strain

The Most Popular Commercial Onion Grown

The seed of our Yellow Globe Danvers onions is grown with great care and will produce onions of uniform fine globe shape, deep orange color and firm tight skin.

Oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.60; 10 lbs. \$15.00.

Japanese Bunching

For Early Spring and Fall Bunch Onions

This new variety is a decided improvement over the old bunching kinds. This onion does not form a bulb but grows in clusters of three to five straight onions. It is a rapid grower and forms marketable mild green onions very early. When fully grown the onions are nearly an inch in diameter but retain their mild flavor.

Oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.50; 10 lbs. \$24.00.

Mountain Danvers

A very early maturing strain of Yellow Globe onion originating in the mountains of Colorado. The onions are of fine globe shape, deep yellow color and very firm. They ripen **two or three weeks earlier** than Yellow Globe Danvers, and are valuable on this account where the *seasons are short*. These onions have remarkable keeping qualities and can be safely stored all winter. They do not get quite as large as the Yellow Globe Danvers, but are of good size and are often found more profitably than the later kinds because they can be marketed before other kinds are ready. *Muck growers have found it profitable to plant a portion of their onion acreage in Mountain Danvers.*

Oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.75; 10 lbs. \$16.50.

Mountain Danvers

GERMINATION TESTS

Harris' Onion Seed is given thorough tests for germination, and the exact results from such tests are marked on each package so that the purchaser can tell just what proportion of the seed is of good vitality. This ought to be worth a good deal to any grower. We shall be glad to tell any onion grower just how our seed of any varieties he is interested in germinates in our tests before he buys the seed.

The roots are 8 in. long parsnip-shaped, smooth and white.

Erbesn (Ger.)

PEAS

Piselli (It.)

One pound of peas will plant 100 ft. of row. Two to five bushels per acre.

Note—We are now selling peas by weight only. A pound is about 1 pint, 15 lbs. equals a peck and 56 lbs. a bushel. 30 lbs. or more of one variety will be supplied at the 100 lb. rate. For prices of peas in amounts of less than 7½ lbs. (½ peck) please refer to our general catalogue.

At the prices here quoted peas cannot be sent prepaid. Purchaser pays transportation on peas except as follows:

If your order for vegetable seeds including peas amounts to \$20.00 or more we will prepay the freight charges.

Mammoth Podded Extra Early Peas The Most Profitable Early Kind

This new *large podded* pea has proved a very profitable market variety. It is very early being ready only a day or two after Alaska and First and Best. The pods are *larger* (see illustration to the right) than these varieties, and the yield is therefore much greater. The pods are deep green in color, 4 inches long and borne in great profusion on strong vines. This pea is hardy and can be sown as soon as the frost is out of the ground. *The seed we offer is of the true originator's stock.*

7½ lbs. \$1.75; 15 lbs. \$3.00; 56 lbs. (bu.) \$10.08; 100 lbs. \$18.00. Not prepaid.*

Photo showing relative size of Mammoth Podded Extra Early (right) and First and Best (left).

"We were certainly pleased with the growth of Mammoth Podded Extra Early peas bought earlier. Planted at the same time with two other varieties of extra early sort, they have grown and blossomed nearly a week ahead of the other two and the sturdiest vine it was ever my pleasure to see on an early sort. Hope to be picking them in another week." Burleigh A. Jones, Meredith, N. H. June 26, 1933.

THOMAS LAXTON. (3 ft.).....	1.70	2.95	9.80	17.50
Very early medium size pods. One of the standard and most profitable market varieties. Our stock is very fine.				
GRADUS, or Prosperity. (2½ ft.).....	1.80	3.10	10.36	18.50
Large pods, early and of highest quality. Standard market garden variety.				
WORLD'S RECORD. (2½ ft.).....	1.80	3.10	10.36	18.50
Earlier and larger podded than Gradus. Of the finest quality and a most profitable early market variety.				
LITTLE MARVEL. (15 in.).....	1.85	3.30	11.20	20.00
Very prolific, matures a day or two later than Nott's Excelsior and has pods a little larger; vines stocky.				
Nott's Excelsior. (15 in.).....	1.75	3.00	10.08	18.00
Early dwarf vines, medium-sized pods; one of the best early dwarf peas.				
HUNDREDFOLD (Blue Bantam or Improved Laxtonian). (20 in.)	1.80	3.15	10.64	19.00
Much like Laxtonian, but larger and better. Vines very strong and sturdy. 16 to 18 in. high. Pods 4 in. long and deep green. A fine early dwarf pea.				

Laxton's Progress Peas

We offer a superior stock of this excellent variety, producing uniformly heavy yields of large handsome pods.

The vines grow 15 to 18 in. high and are covered with an abundance of large deep green pods 4 to 4½ in. in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop.

The yield is large and the big handsome well filled pods find a ready sale making this variety one of the best kinds to follow the extra early sorts.

Price: 7½ lbs. \$1.80; 15 lbs. \$3.15; 56 lbs. (bu.) \$10.64; 100 lbs. \$19.00. Not prepaid.*

"I am very much pleased with your Laxton's Progress peas. I have some now with peas on them which were planted April 25th." D. Dunbar Seamans, Franklin, N. H. June 12, 1933.

* We prepay freight on peas if your order for vegetable seeds including peas amounts to \$20.00 or more.

Midseason Giant — New Large Podded Main Crop Peas

We highly recommend this new variety for market gardeners and the roadside stand. The pods are large (4½ in. long) dark green and sturdy. They will stand up exceptionally well under considerable handling. The yield is high, the pods being borne in great numbers on strong vigorous vines 18-24 in. high.

Midseason Giant comes on between the early sorts and the late tall varieties and it has shown a remarkable ability to stand up and bear well in hot dry weather. Try some this year, you will like them.

7½ lbs. \$1.80; 15 lbs. \$3.15; 56 lbs. (bu.) \$10.64; 100 lbs. \$19.00. Not prepaid. *

Medium and Late Varieties

Edible pods. 4½ ft.				

"The Midseason Giant peas, and everything so far are very good. In fact the peas are so good, I am going to try one more planting." T. Norsten Elstrom, South Easton, Mass. July 8, 1933.

PEANUTS

EARLY SPANISH. The Earliest Variety lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.00

PARSNIPS

Pastinake (Ger.)

Pastinaba (It.)

An ounce of seed will sow 150 ft. of row. Sow 2½ to 3 lbs. per acre.

Photo shows Harris' Model Parsnips exactly as dug.

Harris' Model—The Whitest Strain

We have been improving the old Hollow Crown parsnip by careful selection for many years until we have obtained a very fine strain which we call "Harris' Model."

The parsnips grow to a good length, but not too long. The roots are smooth, snow white, and have practically no side roots or prongs. Their whiteness is quite remarkable and gives the roots a very attractive appearance, which make them sell for highest prices.

Our seed is of our own growing from transplanted and very carefully selected roots. The seed we harvested this year is the brightest plumpest seed we have seen in years.

Oz. 15; ¼ lb. 40c; lb. \$1.10; 10 lbs. \$10.00.

Long Hollow Crown. Long smooth roots, not as uniform or white as Harris' Model.

Oz. 10c; ¼ lb. 25c; lb. 65c; 10 lbs. \$6.00.

Pfeffer (Ger.)

PEPPERS

Peperoni (It.)

*An ounce of seed will produce about 1000 plants.***Harris' Northern Grown Pepper Seed**

For a number of years we have made a specialty of growing pepper seed on our farms here in the North. Ordinarily peppers would not ripen enough fruit to pay us to grow seed here so we have developed a number of *special early varieties* that will mature and ripen an *abundance* of fruit even in our short seasons.

Several of our varieties have become so popular among market gardeners that much inferior Southern grown seed is being offered to the trade. Be sure to get Northern grown seed that will produce lots of fruit early. Get your seed direct from the originators. We do not sell to dealers.

"Harris' King of the North" Pepper Extremely Large, Early and Very Prolific

The Outstanding 1934 Introduction

Harris' "King of the North" Peppers

*"As you sent me a trial packet of new pepper last spring I thought you might be interested in how it did in this section. * * * * They made a strong stocky growth, and the 5th of August I sold green peppers from them. I have had a single pepper weigh ¾ lb. and lots of them weighing ½ lb., and a tremendous yield of large sweet peppers. I think it beats anything you have in the sweet pepper line. W. L. Hannah, Northwood, N. H. Sept. 29, 1933.*

Harris' Early Giant Pepper The Earliest Large Pepper

This large early pepper which we introduced a number of years ago is the standard large early variety for market gardeners.

Buy seed of Harris' original Northern grown strain of Early Giant Pepper rather than inferior seed grown further south.

The seed we offer is all grown under our strict control on and in the vicinity of our farm from our own carefully bred stock seed. We have had the finest crop this year and the best seed we have seen in years.

The true Harris' Early Giant will produce a large number of peppers about 4½ in. high and 4 in. across, and is only a week later than Harris' Earliest, the earliest pepper grown.

Oz. 60c; ¼ lb. \$1.75; lb. \$6.00.

We put it very mildly when we say that those who tested this new pepper last year were extremely pleased with it.

The immense size, earliness and heavy yield make Harris' "King of the North" a variety that will give enormous yields of fine fruit even here in the North. The plants are medium size, branching and literally covered with fruit. The size and shape of the peppers is well shown in the photograph on this page and the front cover.

The flesh is thick, mild and sweet. While we planted all our stock seed and had a fine crop, our acreage of this variety was necessarily limited.

We advise you to order early before our seed is sold out, as seed of this new variety cannot be purchased elsewhere.

Pkt. 15c; ¼ oz. 35c; oz. \$1.00;
¼ lb. \$3.40; lb. \$12.00.

Harris' Early Giant Pepper

Harris' Improved SQUASH Pepper Very Early and Heavy Yielder

This is the pepper which replaces the old type known as Squash, Cheese, Sunnybrook and other names.

It has been almost impossible to get a squash pepper to bear enough early large fruit here in the North to make it pay to grow them in spite of the ready sale which peppers of their type find, but with Harris' Improved Squash you can get large crops of fine ripe fruit before the frost. Since we introduced this new pepper a few years ago, it has proved itself a very valuable variety. The fruit is very early of good size and with fine thick flesh. This new pepper is so prolific that it produces three times as many peppers as any other "Squash or Cheese" pepper which we have seen.

Market Gardeners should not fail to make a planting of Harris' Improved Squash this year.

¼ oz. 20c; oz. 65; ¼ lb. \$2.00; lb. \$7.00.

Harris' Improved Squash Pepper

Harris' Earliest — The Earliest Sweet Pepper

The seed we offer of this variety has been grown and bred here in our farm for nearly two decades, and has constantly been improved for size, earliness and productivity.

True Northern Grown Strain Harris' Earliest: oz. 60c; ¼ lb. \$1.75; lb. \$6.00.

I am more than satisfied with your seeds. I am already picking green and ripe peppers from your Harris' Earliest. Your cauliflower couldn't be beat. I don't believe there were ten in a thousand that didn't head up. You can surely look for my future orders. E. F. Dommee, Moorehead, Minn.

Hot Portugal — New (Large) Hot Pepper

This new pepper which we introduced last year has met with enthusiastic approval by gardeners who have tried it.

The fruit is long, pointed and quite smooth for a pepper of this type. The peppers average six inches or over in length and are abundantly borne on the sturdy plant. This pepper is bright red when ripe and in addition to its large size, is just as hot as the old Giant Cayenne.

Seed grown here on Moreton Farm: ¼ oz. 25c; oz. 80c; ¼ lb. \$2.60; lb. \$9.00.

Early Scarlet Globe Radish Special Strain

Best for Forcing or Open Ground

We can confidently state that our strain of this popular radish is as good if not better for both outdoor and greenhouse growing than any strain in the market today.

Our seed is all grown from transplanted roots. This strain is the true olive shape, and of an attractive bright red color. It is early and very uniform in maturity and has tops which do not grow too large but are just right for bunching.

The seed is very vigorous and of high vitality which is of utmost importance to the greenhouse grower.

$\frac{1}{4}$ lb. 20c; lb. 60c; 10 lbs. \$5.50; 100 lbs. \$50.00.

Note—To growers who are interested we will be glad to furnish germination figures before they buy their seed.

Early Scarlet Globe—Special Strain

Harris' Special Scarlet Forcing—(Glowing Ball)

Proved Strain. As a spring forcing radish Harris' Special Scarlet Forcing is without peer. This seed is all grown from transplanted roots and is the most uniform strain we have ever seen. The tops are small and every radish is a perfect globe with a small root, and brilliant scarlet in color. Extremely early.

$\frac{1}{4}$ lb. 25c; lb. 80c; 10 lbs. \$7.50.

Icicle Radish

Short-Topped Strain—Also Called Pearl Forcing

In our extensive trials both outdoors and in commercial greenhouses, we find that this is the best stock of Icicle obtainable. The radishes are uniformly smooth and clear white, and the tops are short.

$\frac{1}{4}$ lb. 25c; lb. 65c; 10 lbs. \$6.00.

If your order for vegetable seeds including spinach amounts to \$20.00 or more we will prepay the freight charges.

We shall be glad to quote special prices to growers who use large amounts of spinach. Please write. 25 lbs. or any one variety will be furnished at the 100 lb. rate.

A Word About Spinach Seed for 1934

There will not be much if any surplus of the first class stocks of spinach seed from the 1933 crop. Fortunately we increased our acreage so that we are in the strong position of being able to supply our customers with the same high quality seed which we have sold in the past. However, we would advise our customers to order early to cover their 1934 requirements.

Truck load of Harris' Long Standing Bloomsdale Spinach and Detroit Dark Red Beets, grown by John Boos and Sons, Hicksville, L. I., N. Y.

Long Standing Bloomsdale Spinach

Best for Spring Sowing

Our strain of Long Standing Bloomsdale is exceptionally well bred, every plant being of the true type with large well crumpled or blistered leaves of deep green color. It is the true Long Standing strain and has shown remarkable freedom from "seeders" even in the hot dry June weather we have had during the past two years.

We recommend this variety very highly for spring sowing and also late fall sowing for spring crop as it is very hardy.

Lb. 26c; 10 lbs. \$2.40; 100 lbs. \$22.00. Not prepaid. See above.

SPINACH continued on next page

Nobel Giant Leaved Spinach

Large, Early, Dark Green Leaves, Long Standing

This new spinach grows very rapidly and attains a large size *very early*. The yield is consequently large and the fact that it is produced *very early* makes this one of the most profitable varieties for spring sowing. The plants stand remarkably well without bolting. The leaves are of the *largest size*, nearly smooth, thick and quite deep green. We advise gardeners to try this new variety. We are sure it will prove profitable.

Lb. 26c; 10 lbs. \$2.40; 100 lbs. \$22.00. Not prepaid.*

Blight Resistant Savoy—For Fall Sowing

Our Fall Spinach Trials showing how BLIGHT-RESISTANT SAVOY stands without blighting. The two middle rows are Blight-Resistant. Photo taken in October.

True Virginia Strain

We offer the *true Virginia strain* of this spinach which is practically 100% resistant to blight. In addition the quality has been greatly improved so that the plants are uniformly well "crumpled or blistered" and the color a beautiful dark green.

This strain can be depended on to produce large crops of fine spinach in the fall where other varieties will blight and fail. We do not recommend this

for spring sowing in places where blight does not ordinarily effect spinach in the spring as it does not stand as well as most other kinds.

Lb. 27c; 10 lbs. \$2.50; 100 lbs. \$23.00. Not prepaid.*

SQUASH

Zucca (It.)

1/4 lb. will plant 50 hills; 3 to 4 lbs. of seed per acre.

**Blue Hubbard Squash
Harris' Selected Strain**

Harris' Special strain of Blue Hubbard squash can be relied on to produce a large yield of squash that is over 99 per cent true color and of the correct shape. We are confident that we have the finest and purest stock of Blue Hubbard grown.

We have worked for several years in trueing up this stock and have been very successful in our efforts. The seed we offer is all of our own growing here on Moreton Farm.

Blue Hubbard squash are larger than the green Hubbard, of an attractive blue gray color and quite warted. They often weigh over 30 lbs. each and the yield is high.

The quality is so good that Blue Hubbard is rapidly replacing the green varieties on many markets.

Oz. 20c; 1/4 lb. 60c; lb. \$2.00; 10 lbs. \$17.50.

Blue Hubbard Squash
Growing for Seed on Moreton Farm

"Last year I raised about 7 tons of splendid Blue Hubbard squash from your seed, some of the squashes weighing 40 lbs. each." Simon J. Kervick, Springfield, Mass. Jan. 30, 1933.

Quality Squash

Quality squash cannot be beat for a small to medium size squash for selling at the roadside market.

The squash are dark green in color, 7 to 8 in. in diameter and of an attractive heart shape. The flesh is of the finest quality, being dry and sweet. Once tried customers always come back for more of this kind.

Seed of our own growing: oz. 25c; 1/4 lb. 75c; lb. \$2.50; 10 lbs. \$22.50.

**Warren Squash
Improved Essex Hybrid
New England Strain**

We have an exceptionally good strain of this fine old New England squash. The squash are medium size, very uniform in shape and heavily warted. We have bred this strain with a distinct but not too large "button" at the blossom end.

The flesh is fine grained and thick (see photo on this page) and the color a beautiful deep reddish orange.

Seed of our own growing: oz. 25c; 1/4 lb. 70c; lb. \$2.25; 10 lbs. \$20.00.

MAMMOTH WHITE BUSH SCALLOP also called "Cympling"...	.15	.35	1.10	10.00
Large, flat, white fruit. Early maturing and even in size.				
Early Yellow Bush Scallop.....	.15	.35	1.10	10.00
Similar to the white, except in color.				
ITALIAN VEGETABLE MARROW (Cocozelle).....	.15	.40	1.35	12.50
Long mottled green fruit of high quality. Our strain is very fine producing dark green squash of uniformly good length.				
Vegetable Marrow (English).....	.15	.40	1.25	11.50
The fruit is 8 in. to a foot long, 4 to 5 in. in diameter and of a creamy white color. It is used when half grown.				

Liebesapfel (Ger.)

TOMATOES

Pomo d'oro (It.)

An ounce of seed will produce about 2000 plants.

Harvesting Tomatoes for Seed on Moreton Farm

Harris' Northern Grown Pedigree Strains

For many years we have made a specialty of growing tomato seed of the best possible quality here in the North on Moreton Farm. Our seed is grown from pedigree stocks in disease free fields. Many years of careful selection combined with our short seasons have made our strains earlier and hardier than the same strains grown farther South and in the West.

We grow tomatoes for seed purposes only! It costs more to grow tomato seed the way we do here in the North, but the results our customers get make it well worth it.

John Baer—Improved Strain

This improved stock of John Baer tomato will produce larger fruit and more tons of fine fruit to the acre than any stock we have ever seen.

The fruit is unusually large for this variety and is very smooth. It is deep red and colors right up to the stem. The vines are vigorous and healthy and produce heavy crops. Although this was a poor year for tomatoes, our seed crop was one of the best crops of tomatoes we have ever had.

We regard this Improved John Baer as one of the best medium early tomatoes for market or canning. Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

Bonny Best—Harris' Special Strain

We are sure there is no finer strain of Bonny Best than the one we offer. It is all of our own growing from carefully selected plants, and will be found of the highest quality, producing the smoothest and most perfect fruit.

Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

Pritchard's Scarlet Topper

Also Called "Pritchard"

The seed we offer of this new variety has been carefully grown on our own farm. Our stock seed has been selected from the original seed sent us by the late Dr. Pritchard of the United States Department of Agriculture who originated this variety. We are growing the seed here in the North in order to maintain the size, vigor and earliness of this variety.

The fruit is medium early, ripening right after Bonny Best. The flesh is very solid with few seed cavities and the brilliant red color goes right up to the stem. This variety is free from cracks which gives the grower a large percentage of No. 1 fruit. The quality is extra fine being mild and without acidity.

The plants are robust but not of rank growth and bear heavily.

Market Gardeners find this variety sells readily and is a very profitable one to raise. The grower for the roadside stand who has a "quality" trade will do well to make a planting of this kind as the customers will "come back for more" once they try it.

Oz. 55c; $\frac{1}{4}$ lb. \$1.60; lb. \$5.50; 5 lbs. \$22.50.

Scarlet Topper Tomato

"Had wonderful success with these two varieties Bonny Best and Early Stone last season." Marion H. Harris, Kattskill Bay, N. Y. May 19, 1933.

Marglobe Tomato

Marglobe Tomato

Blight Resistant

We have grown this variety on our own farm since it was first released by the U. S. Department of Agriculture and have made careful selections each year until now we have a strain which is unsurpassed in yield, uniformity of color and size of fruit.

The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. The vines are vigorous and healthy and do not blight. Because of this fact the vines remain green until frost or until the whole crop is matured, so the late fruit is as good as the first to ripen.

Oz. 50c; $\frac{1}{4}$ lb. \$1.35; lb. \$4.50; 5 lbs. \$20.00.

You can control "damping-off" of seedlings in your greenhouse or hot bed by using *SEMESAN*. The cost per square foot of bed is small.

2 oz. can 50c; 1 lb. can \$2.75. Transportation paid.
Full particulars sent on request.

Earliana Tomato

Harris' Extra Early Northern Grown Strain

We are sure that all our customers who have raised our special strain of Earliana tomato will agree with us that it is the *smoothest* and *best colored* stock of Earliana obtainable. There are other tomatoes offered under different names which are said to be earlier than Earliana, but we have found none to be any earlier and most of them are irregular in shape and not colored well.

We offer seed of *our own growing at Moreton Farm*: Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

I used your Earliana Extra Early strain last year and was very much pleased. I had a fine early crop of fine tomatoes
Herbert N. Ostergren, St. Paul, Minn. Mar. 11, 1933.

Canadian Tomato

We have grown and carefully selected this improved strain of Earliana which originated in Canada. From reports of growers and our own observations we are confident that this is one of the best all around early tomato where earliness, color, size and yield are considered.

The fruit is smooth and well colored right up to the stem. It is as early as Earliana and slightly larger, yields enormous crops and the fruit is better colored than any other tomato of this class. We have a very fine strain of our own growing which we can highly recommend.

Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

Comet Tomato—

For Greenhouse and Trellis Growing

We can now offer a fine strain of *Comet Tomato* of our own growing. The seed is saved only from the best fruit of carefully selected plants, and will be found superior for both greenhouse use and growing outside on trellises.

Pkt. 20c; $\frac{1}{8}$ oz. 50c; $\frac{1}{2}$ oz. \$1.65; oz. \$3.00.

Tomato Plants

We can supply fine, sturdy, true to name plants of the most popular varieties of tomatoes. They can be furnished either ready to set out in the open ground, or, if preferred, small plants which can be grown in frames for a few weeks before setting out. See page 37 for prices and varieties.

"I received today 500 Bonny Best plants and thank you for prompt service. The plants are very good and I have yet to see as good in this part of the country." E. W. Lobdell, Binghamton, N. Y. May 26, 1932.

Comet Tomatoes

Harris' Success Tomato

This is one of the finest tomatoes which we know.

The fruit is practically perfect—large, well colored, smooth, firm, and of exceptionally fine quality, being quite free from acidity when cooked. In addition it yields enormous crops, as large or larger than any other kind we raise. The fruit ripens as early as John Baer and Bonny Best, is larger and more solid.

Market gardeners will find this one of the most profitable main crop varieties to grow. We do not know of any kind that yields such large crops of smooth handsome fruit.

Oz. 50c; ¼ lb. \$1.35; 1b. \$4.50; 5 lbs. \$20.00.

Harris' Early STONE Tomato

Produces large deep red fruit.

By raising the seed in this northern latitude and making selections with special reference to earliness for a number of years we have obtained a strain that ripens *almost as early as Bonny Best and John Baer* and at the same time has retained the other good qualities of the old Stone.

The fruit is smooth deep red, solid, firm and very sweet. The yield is high and market gardeners with a discriminating trade will find this a very profitable tomato to raise.

Oz. 50c; ¼ lb. \$1.30; 1b. \$4.25; 5 lbs. \$18.50.

Special Selected Globe Tomato Market Gardener's Strain

We have grown a crop of this popular pink or crimson variety from a very superior Ohio market gardener's strain. It will be found unusually good, for color, size, and large yield.

Oz. 50c; ¼ lb. \$1.50; 1b. \$5.00.

Large Italian Red Pear Tomato *Pomo d'oro a Pero*

This is a distinct variety 3 to 4 times as large as the ordinary Red Pear. The fruit is pear shaped, three to four inches long and grows in clusters of 4 to 7 fruits. This tomato has a distinct "flavor" and will find a ready sale among Italian buyers who use it for making "tomato paste" and canning.

Pkt. 12c; oz. 50c; ¼ lb. \$1.50; 1b. \$5.00.

Perfection Selected Swede25	.65	6.00
<i>A selected strain of purple top yellow Swede. Grows large but is very smooth and of fine grain. Larger and later than Improved Long Island.</i>			

*Wasser-Melone (Ger.)***WATERMELON***Cocomero d'acqua (It.)**An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.*

The varieties we have here listed are all suitable for growing in the North, as they are early and in our climate will produce ripe fruit before frost, from seed sown in the open ground.

Wonder Melon—(New)

This is the largest of the oblong varieties which can be successfully grown in the North. The melons are dark green in color with bright red flesh of very high quality. Large crops are produced even in this latitude where it is hard to raise watermelons.

Because of this combination of earliness, high quality and good yield this melon should be a profitable kind to grow in the North for the local market and roadside stand.

WHITE GOLD. Certified Seed. Grow for Quality		
This is the new potato which has been so widely advertised. The potatoes mature early and resemble Green Mountain in shape. The eyes are shallow and the skin remarkably smooth and white. We have never eaten a potato that is of better quality and is so snowy white and attractive when cooked. This variety will bring many repeat customers at the roadside stand and market.		
White Gold. Second Size. Certified	2.65	6.00
From same certified field as above but not large enough for first size.		
IRISH COBLER. Certified Seed	2.50	5.60
The most popular round white early potato.		
Irish Cobbler. Second Size. Certified	2.35	5.50
From same certified fields, but not large enough for first size.		
Irish Cobbler. Grown from Certified Seed	2.00	4.50
GREEN MOUNTAIN. Certified Seed	2.35	5.50
One of the best market varieties. Smooth, white skin, shallow eyes, and fine quality. A heavy yielder.		
NO. 9 or HEAVY WEIGHT. Certified Seed	2.25	5.00
One of the heaviest yielding late potatoes we know of. Round, white, medium shallow eyes, vines very strong and free from disease.		
GOLDEN RURAL or RURAL RUSSET. Certified Seed	2.25	5.00
One of the very best potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind.		

STRAWBERRIES, RASPBERRIES, ETC.

The plants listed on this page are sent by express or freight at the purchaser's expense. If wanted by parcel post, sufficient postage to cover cost of mailing must be enclosed with the order. **500 plants will be sent at the 1000 rate.**

For complete description and prices of quantities of less than listed on this page please refer to our general retail catalogue.

W1822—Los Angeles. A shell pink of the same habit as California Giants but larger and more vigorous with long stems. Pkt. 20c; ¼ Oz. \$1.50; Oz. \$5.00.

W1066—Peerless Pink. The best shell-pink for all-purpose cutting. An excellent improved strain. Lg. Pkt. 15c; ¼ Oz. 30c; Oz. \$1.00.

Harris' Flower Seeds

If you are a grower of Cut-Flowers, Bedding Plants, or Hardy Perennial Plants, you will find Harris' Flower Seeds the most profitable to sow.

This list includes only those varieties which are of proven value to the floriculturist, and every lot of seed has been carefully tested for germination. We *know* they are good.

Notice—Complete descriptions of all the

varieties are given in our general catalog, a copy of which will be sent to you in January. If you do not receive a copy, please notify us.

Trade Discount. Any varieties not offered in this catalog can be selected from our general catalog at 30% discount from the retail prices. There is absolutely *no* discount from prices in this catalog. These prices are already as low as it is possible to make them.

Harris' Asters—Quality Higher—Prices Lower

Harris' Asters have been especially selected for their value to the cut-flower grower. Not only have the kinds been very carefully chosen, but a great many of the varieties have been developed and grown right here on Moreton Farm. Many florists are finding our Asters of superior quality. They can be sure of high germination, and they prefer the character of the flowers on cleaner stems more free from small lateral flowers.

Listed here in the order of their blooming.

Queen of the Market

The standard extra early and one which has been profitably grown for years. The flowers are full double and desirable for shipping. Start indoors.

W1201—White	} Lg. Pkt. ¼ Oz. Oz.	
W1202—Shell Pink		
W1203—Rose		\$.15 \$.30 \$.90
W1204—Azure Blue		
W1205—Purple		
W1200—Variety Mixture		

Giant Comet

Giant Comet Asters. Medium sized full double flowers of the fluffy type on tall upright growing plants. Especially good for bedding and also fine for cutting.

W1025—Moreton Pink	} Lg. Pkt. ¼ Oz. Oz.	
W1043—Salmon Rose		
W1041—White		\$.15 \$.30 \$.90
W1044—Light Blue		
W1045—Dark Blue		
W1046—Crimson		
W1040—Variety Mixture		

New Pompon

New Pompon Asters. A new type rapidly gaining popularity for cutting. Upright growing plants with an abundance of small tightly doubled flowers that last for a long time in water. They were the best selling Asters on the Rochester market last year.

W1100—Variety Mixture	} Lg. Pkt. ¼ Oz. Oz.	
W1101—White		\$.15 \$.60 \$ 2.00
W1102—Rose with white center		
W1103—Light blue with white center		
W1105—Fiery Scarlet		
W1106—Violet		

Royal

The same form as American Branching but earlier.

W1301—White	} Lg. Pkt. ¼ Oz. Oz.

Pansies

New Swiss Giants

- W3705—Magnificent Mixture. No description can do justice to this new strain of Pansies. The enormous blooms measure three inches or more in diameter and the colors are unusual. Lg. Pkt. 50c; 1/8 oz. \$1.00; 1/4 oz. \$1.50; oz. \$5.00.
- W3738—New Blue Swiss. A solid blue with darker blue blotch. Lg. Pkt. 50c; 1/8 oz. \$1.25; 1/4 oz. \$2.00; oz. \$6.00.
- W3739—New Red Swiss. Same type as the blue but a mahogany red color. Lg. Pkt. 50c; 1/8 oz. \$1.25; 1/4 oz. \$2.00; oz. \$6.00.
- W3736—New Yellow Swiss. Another of the type but a yellow color with black blotches. Lg. Pkt. 50c; 1/8 oz. \$1.25; 1/4 oz. \$2.00; oz. \$6.00.

Maple Leaf Giants

- W3703—Mixed Colors. A new variety with the largest flowers of them all. Pkt. 40c; Lg. Pkt. 75c.

Harris' Special Mixture

- W3700—This mixture is especially made of very fine varieties and choicest colors. We make a special point of this medium priced mixture. The flowers are all large, many ruffled and with bright colors predominating. Lg. Pkt. 25c; 1/4 oz. \$1.00; oz. \$3.50.

Giant Trimardeau Pansies

- W3701—Mixed Colors. A high grade mixture of choicest colors of large-flowering Pansies. Lg. Pkt. 15c; 1/4 oz. 30c; oz. \$1.00; 1/4 lb. \$3.50.

Giant Ruffled Pansies

- W3702—The flowers of this mixture have fluted or ruffled petals which add much to the beauty of the wonderfully rich colors. Lg. Pkt. 25c; 1/8 oz. 60c; 1/4 oz. \$1.00; oz. \$3.00.

Showing our own special strain of Paramount Dwarf Ruffled Giants growing for seed and being hand pollenized after they have been carefully selected for type and colors.

Petunias

- W3800—Harris' Perfection Double. Our strain of Double Petunias is exceptionally fine. The flowers are fringed and in a splendid range of colors. 200 seeds 50c; 500 seeds \$1.00; 1000 seeds \$1.50.
- W3804—Triumphant All-Double Fringed. A new Petunia from Japan coming 100% double. A very robust grower with an abundance of flowers. 200 seeds 75c; 500 seeds \$1.25; 1000 seeds \$2.00.
- W3807—All-Double Dwarf Carmine King. A new very dwarf variety from the same introducer. The bright carmine-red flowers are 100% double. 200 seeds 75c; 500 seeds \$1.25; 1000 seeds \$2.00.
- W3802—Paramount Ruffled Giants (Harris). Our own growing of the most magnificent ruffled Petunias we have ever seen. The plants are low growing and the ruffled, big-throated flowers are in a very wide range of colors, including a large percentage of blotched colors with wide yellow throats. This is also the brightest colored strain we have seen. 500 seeds 60c; 1000 seeds \$1.00; 1/4 Oz. \$1.50; 1/8 Oz. \$5.00; 1/8 Oz. \$8.00.
- W3801—Ruffled Giants of California. An extra fine strain of this well known ruffled Petunia. They come in the best possible range of colors, many of them being blotched. 500 seeds 30c; 1000 seeds 50c; 1/4 Oz. 75c; 1/8 Oz. \$2.25; 1/8 Oz. \$3.75; 1/4 Oz. \$6.75.
- W3806—Dwarf Ruffled Giants of California. A strain with a more dwarf habit of growth making them more desirable for potting and bedding purposes. 500 seeds 40c; 1000 seeds 65c; 1/4 Oz. 90c; 1/8 Oz. \$3.00; 1/8 Oz. \$5.50; 1/4 Oz. \$10.00.
- W3803—Single Fringed Mixed. A large flowering heavily fringed type saved from the largest flowers. This is a highly colored strain. 500 seeds 30c; 1000 seeds 50c; 1/4 Oz. 75c; 1/8 Oz. \$2.25; 1/8 Oz. \$3.75.
