

rates, implies an idea on their part that money will be easier shortly. The same circumstance was observed last December, and the holders of bills certainly made a wrong calculation that time. The immediate future is more obscure now than then.

Were it not for the intermittent requirements for gold for export to America, it is more probable that the Bank rate would drop again before an upward movement was marked; but the uncertainty which attends these movements of specie is so great that it is quite possible that this may prevent any immediate alteration. Behind these movements, moreover, from day to day a steady absorption of capital in new undertakings on a far more extensive scale than in any recent year is regularly going on, and large though the accumulations of capital are, the present absorptions appear to be in excess of the supply, and the natural results must inevitably follow.

Nor must we forget that there are still several very heavy operations hanging over for the present. There are the proposed Italian resumption loan, and the American refunding operations. The stock of gold at the Bank of France, notwithstanding the supply brought by the recent deposits on account of the new loan, is still really a narrow one. It would appear reasonable that the Bank of France may desire to replenish its stock of gold, but it cannot be certain that the desire to maintain a low rate of interest in France may not restrain the Bank from taking what appear to be the natural steps to replenish its reserve. The approaching monetary conference, to be held in Paris, may, however, throw some light on this question.

The City appears to be of opinion, whatever the grounds The City appears to be of opinion, whatever the grounds for that opinion may be, that peace between Turkey and Greece will be preserved. The prices of leading railway stocks have gone up this week, though traffic returns show a diminution. Altogether, though there seem no grounds for expecting anything but easy money for the present, there is sufficient uncertainty for the future to cause a strong feeling of the necessity for caution.

NOTICE.

The PARIS Agent for the Sale of the ECONOMIST is ME FOTHERINGHAM, 8 Rue Neuve des Capucines, where copies of the Paper can always be obtained.

On March 26 was Published No. 3, Vol. XI., New Series, Price 8d; by post, 9d.

THE INVESTOR'S MONTHLY MANUA

The INVESTOR'S MONTHLY MANUAL for MARCH gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the YIELD to the investor at the latest price, the mode in which the Divi-dend in each case is payable, the last four Dividends, &c.

A FINANCIAL RECORD OF THE MONTH; New Capital Created and Called in 1881; Table of Railway Traffic Receipts; Notices and Reports of Stocks. Failures, Railway, Banking, Insurance, and Miscellaneous Companies, Prices made up to March 23.

Advertisements for the next number, to be published on April 30, must be sent, to insure insertion, on or before April 28.

April 28. The December Number of the INVESTOR'S MONTHLY MANUAL gives, in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1879 (so as to indicate the Exact Movement during the Twelve Months), a Financial History of the Year 1880, including a Tabulated Chronicle of Events, a Complete Directory, the Names of the Markets where each security is chiefly dealt in, besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. In addition there is furnished the Names of the Chairmen and Secretaries, or Managers, of the various Compunies. Price 1s 4d; by post, 1s 6d. OFFICE-340 Strand.

THE DEBATE ON THE DECIMAL SYSTEM. THE somewhat contemptuous manner in which the House of Commons on Tuesday rejected the demand for a fresh inquiry into the practicability of adopting the decimal system in this country reflects, we believe, very fairly the prevailing opinion of the business world. As Mr Gladstone said, there is no reasonable probability that further investigation would discover any material facts or arguments upon either side of the controversy which were not duly noted and weighed by Lord Overstone's Commission in 1859. Indeed, if Lord Overstone's draft report were as widely known as it deserves to be, such a debate as that of Tuesday might be regarded as almost a pure waste of time. That report was the arsenal from pure waste of time. which the combatants on both sides drew their weapons, and there is nothing in the speeches of Mr Dilke and Mr Chamberlain-able statements though they were of the two conflicting views-to indicate that the course of commercial experience during the last twenty years has either increased or diminished the validity of Lord Overstone's conclusions. But as this is a question which must in the nature of things come up for discussion at least once in a generation, we cannot complain very much of the House of Commons giving two or three hours to its consideration, and the debate, though necessarily wanting in freshness and novelty, at any rate brings out with great clearness the practical, as distinguished from the merely speculative, difficulties which the advocates of the proposed change have to encounter.

The real objection to the introduction of the decimal system into the United Kingdom is that the result, when obtained, would not be worth the cost at which it would have been purchased. It is this consideration which, in the judgment of practical men, outweighs the immense preponderance of scientific and mathematical opinion in favour of the change. It must be admitted that our present system, under which a complex sum can only be sent system, under which a complex sum can only be analysed into the coins which it represents by a double process of multiplication, contrasts unfavour-ably in point of simplicity and easiness of manipu-lation with any of the various forms of the decimal system, under all of which alike every sum declares on the face of it the number of each class of coins which it contains. That, as a mere matter of arithmetic it is easier to calculate by decimals than of arithmetic, it is easier to calculate by decimals than by a double process of twenties and twelves needs no proof. Moreover, the vast development of our foreign trade makes it a serious disadvantage that in international transactions our scheme of notation differs from that of almost all our leading customers. In short, it cannot be doubted that, if by the waving of a magic wand, our existing coinage could be suddenly and painlessly replaced by a decimal system, there would be a considerable saving both of time and friction in many of the operations of commerce. Even upon this assumption, however, the gain would not perhaps be so great as at first sight it appears. It was proved before Lord Overstone's Commission that in businesses, such for instance as that of actuaries, in which complicated calculations are habitually required, it is usual even now to work by decimals, the sum being converted at the beginning of the process and re-converted at the end. All, therefore, that would be saved in such cases by the out and out adoption of the change would be the labour of conversion and re-conversion, which is in practice easily and almost automatically performed by persons accustomed to it. Nor is it at all certain that in small transactions the decimal system is really easier to work. The vitality of the sou in France, the persistence of the habit of reckoning by shillings and sixpence long after the introduction of the dollar in the United States, and the use of binary fractions in commercial calculations all the world over, point to the opposite conclusion. As to our dealings with foreign countries, it must be remembered that the decimal principle may be and is embodied in diverse shapes—that the American system, for instance, is one thing and the French another—and that inasmuch as our own, whichever of the competing schemes we were to select, would necessarily be different from either, the sim-plification attained would be rather apparent than real.

But it is, as we have said, the price which we are asked to pay for it which is the most serious obstacle in the way of the proposed innovation. As Lord Overstone pointed out, the benefits which have been attributed to the adoption of the decimal system in other countries have been largely due, not to any peculiar virtue in the decimal principle, but to the substitution of a uniform for a confused and heterogeneous coinage. In France before the Revolution every province had its own favourite medium of exchange. So in America, the old currency was unequally depreciated in the various States according to the extent of their respective paper issues, and throughout the Union it was disturbed by the common use of Spanish dollars. In the United Kingdom, on the other hand, we are in possession of a well-settled and long-established coinage whose stability has now become almost a tradition, and which everyone understands and accepts as he does the English language. To introduce the decimal system here would be not to educe order out of chaos, but to tear up a deeply-rooted institution—a revolutionary rather than a constructive achievement. Nor is this merely an initial difficulty; on the contrary, it confronts and embarrasses the innovators at every stage in the execution of their plan. It is admitted that, if we are to have a decimal coinage, either the penny or the pound must be sacrificed. Under what is called the "penny scheme," the maxi-mum unit will be either 100 pence, *i.e.*, 8s 4d -a value which is much too low according to English ideas for purposes of account in the larger commerce, and which, moreover, cannot be embodied in any convenient coin either of gold or silver; or 1,000 pence, i.e., 41 3s 4d-a value which is as much too high, and which is still more incapable of being expressed in a practicable metallic shape. These considerations have led to the almost unanimous adoption by the advocates of the change of the "pound and mille scheme," under which the pound is the maximum unit, the lower values being represented by decimal, centesimal, and millesimal divisions of the pound. The main objections to this proposal were forcibly ex-plained by Mr Chamberlain in his speech on Tuesday night. They are summed up in the statement that it would involve the abolition of the penny. The centesimal division of the pound brings out a value of $2\frac{2}{5}d$, which is obviously too high for a minimum unit. The millesimal division, or mille, apart from the fact that it is too small for book-keeping purposes, cannot by any process of multiplication be turned into the equivalent of the penny, 4 milles being 4 per cent. less and 5 milles 20 per cent. more than the value of a penny. In short, no sum which is expressed in our present coins, except sixpence and its multiples, could be exactly paid in the coins which the "pound and mille" scheme would give us. A moment's reflection will show the immense range of the disturbance which the sudden extinction of the penny would create. It is unnecessary to trace the probable re-sults in detail. It is sufficient to say that by this method of effecting the change, the main burden and loss would be thrown on the poorer and less educated classes of the community in whom tradition is most deeply engrained, and who are most prone to look upon innovations in the habitual conditions of social life with suspicious hostility.

It thus appears that the advocates of the introduction of a decimal system are in a dilemma. To carry out their principle they must either adopt a plan which would be permanently unworkable by the rich, or one which would be for a time, at any rate, oppressive and intolerable to the poor. We need not enlarge upon their other difficulties. It is a significant fact that, with the single exception of the United States, every civilised country which has chosen the decimal principle as the basis of its coinage, has been obliged to extend it to its weights and measures. Mr Dilke himself seemed to admit that a compulsory adoption of the metric system or of some more or less illogical compromise was an integral part of his scheme. A decimal system of coinage side by side with a system of weights and measures, which is a mixture of the binary, decimal, and the duodecimal principles, is a patent incongruity. But if we can only effectually change our coinage at the expense of also changing our measures, it becomes still more necessary to count the cost beforehand and to be sure that the luxury of a decimal system is worth the price.

THE ECONOMIST.

THE DUAL ENGLISH "CHANCELLORSHIP." THE illness of Lord Beaconsfield, an illness which, we trust, may not prove so serious as his friends now fear. recalls to politicians one of the many unique facts of English constitutional life - the permanent existence among us of what we may call, for the sake of descrip-tion, a dual "chancellorship." In every monarchical country in which a scientific political organisation exists at all, there exists what, in the great empires of the Continent, is called a Chancellor, an officer who represents at once the Sovereign, the Executive Administration, and either the Parliament or the people. He is the Sovereign for all actual purposes, the head and referee of the officers of administration, and the favourite, if not of the organised majority, at least of the strongest party within the country. Next to the King he is the most visible person within the State, and by far the most powerful person in it. His office is the one most sought by the ambitious and the competent, and historians fix upon it in their narratives of events almost too exclusive a regard. This office, recognised, as we have said, in the half-military monarchies of the Continent, exists also in England, although unrecognised. Nothing either in our history or our manners quite accounts for the modern position of a Premier, yet it is recognised throughout the Administration, and tends more and more to develop into an informal sub-kingship like the Chancellorship of a Continental monarchy. In theory no such officer as the Premier exists. No Secretary of State is bound by any law to submit matters to any colleague, to take his orders, or in any way to recognise him as a superior. Legally the body responsible for advising superior. Legally, the body responsible for advising the Sovereign is the Privy Council, and practically it is the committee of that council popularly called the Cabinet. Executive power again belongs either to special great officers like the Lord Chancellor or to the anomalous power called Her Majesty's "Secretary of State," which now includes six distinct individuals. There is no place for a Chancellor in the Continental sense, and yet there is an officer called popularly a Premier, whose power is as real as extensive, and almost as definite as if he were described in a hundred statutes. By a prescription as strong as if it were a law, the politician selected by the Sovereign as recognised head of the dominant party to form an administration becomes informally the head of every department, the man who initiates policy, to whom all disputes are referred, the nexus or bond among the otherwise equal departments of the State. The whole course of public business has come to be regulated on the theory that besides the Sovereign and the governing committee called the Cabinet, there is an officer to whom every chief of a department looks for an officer to whom every chief of a department looks for guidance, for support, and for advice indistinguishable from command. If a Secretary of State doubts what to do, he asks "the Premier," and if he has his consent no other is necessary, unless indeed the business is im-portant enough to require a Cabinet Council. If the Secretary differs gravely with the Premier he resigns, and if a whole group of Secretaries differ they resign, and the Premier goes on. There is, in fact, a Chancellor, though no such office exists, and as he is now invariably, though informally, named by the he is now invariably, though informally, named by the nation, he tends every day to become more powerful. The country refers to him as well as the departments, Parliament looks to him for leadership, and it is growing into a custom that when very important business is on foot he should introduce it, as Mr Gladstone will introduce the Irish Land Bill, in supercession of the department imme-diately concerned. So completely does the country make him responsible for all that is done, that the fact that he is legally only primus inter more is almost forcetten and is legally only primus inter pares is almost forgotten, and historians of the future run some danger of believing that under Queen Victoria there was only one Minister at a time, just as Englishmen fancy that in Germany there is only one Prince Bismarck, or in Russia only Prince Gort-schakoff. There is, in truth, a kind of presidency, so completely entrusted with power that when the President is ill all business stops, the meetings of Parliament become almost formal, and the whole country is agitated, as a true monarchy is agitated if the Sovereign lies sick. This development of the Premiership into an informal

1

e

ie

"Chancellorship," in supersession of the English theory of Government by a Committee instead of an individual, is the more noteworthy because it has advanced pari passu with the advance of democratic ideas, and because it is accompanied by another fact quite unique, as far as we know, the existence of a strange kind of dualism in the Chancellorship. In most countries the head of a defeated party subsides in his retirement into comparative nothing-ness. In England he remains under the Sovereign the second person in the State. His party do not desert him, or attribute their misfortunes to his failure. His Sovereign does not regard him with disfavour. His colleagues do not consider him as any the less their chief. His contengues do not consider him as any the less their chief. His opinion continues as potent with his own side. He remains, in fact, the second subject in the State, the alternative Premier, the man who will be "Chancellor" next time, and head of everything. During Lord Beaconsfield's reign of six years it was doubtful whether Mr Gladstone would or would not resume unblic life but reholds doubtful would or would not resume public life, but nobody doubted that if he chose to step forward, as he at last did, he was the third person in the country, the head of his own side, the next politician in importance after the Premier, the man who, in some indescribable sense, held half the "Chancellorship." His assent or opposition was, next to the Premier's decision, the cardinal fact of politics. Mr Gladstone is now Premier, but Lord Beaconsfield, his defeated adversary, without office, and nominally with-out power, is the second person in the kingdom, in the popular view far above any Minister but the Premier the only verson indeed excent the Premier Premier, the only person, indeed, except the Premier, who holds a national mandate. A Minister sick is a Min-ister sick, and his sickness is of importance to his department; but the illness of the Premier or of the Leader of Opposition concerns and agitates the whole country, both parties, the whole Empire throughout its world-wide extent. If Lord Beaconsfield recovers, all Englishmen feel relieved; if he dies, the whole course of national policy will be altered. He is the Sovereign's delegate, like his rival. He is a popular favourite, like his rival. He, like his rival, has at command colleagues, agents, armies of devotees and followers.

We are growing in this country so used to this situa-tion, which has existed more or less since 1831, that is, for half a century, that we forget how strange it is or how entirely without precedent in any other country. There is no trace of it in America or France-for M. Gambetta governs the Government, not the Opposition-or in Germany or in Austria, or, except in a very feeble degree, in Italy. It belongs to this country alone, and is, perhaps, of all our constitutional peculiarities, the one which gives the most coherence and regularity to our march. The country is becoming democratic, and power fluctuates from side to side in great oscillations, which, apparently, tend to increase in violence, but popular and political favour vary as to persons wonderfully little. The man who has once reached the Premiership holds the headship of his party, unless he relinquishes it, by a life tenure. He is neither thrust out, nor coaxed out, nor intrigued out. If he is not at the head of the Administration he is head of the Opposition, the person with whom, first of all, the Government has to reckon, upon whom, in the second degree, the national regard is fixed. His opinion affects all policy, his illness confuses all policy, his death may change all policy, just as if he were bimself the source of policy, instead of being, as he technically is, a private Peer, or member of the House of Commons. In office or out of office, he continues a living force whom no one seriously attempts to displace, and who is always at the disposal of the country as an alternative administrator, with a posal of the country as an alternative administrator, what a complete staff, and an army, which, as far as he is con-cerned, is perfectly disciplined, behind him. There is no search to be made. There he is, sometimes for a whole generation, surviving the struggles of parties, always in the same position. That is a strange source of strength and coherence to the Administration to have grown up in a democratic country, which constantly changes its mind, and allows an almost recklessly free fight for the leadership of the people, and it deserves at this moment special note. A vacancy in the Leadership of Opposition is almost as important as a vacancy in the Premiership, and much more important than a vacancy in any other department of the State.

THE ECONOMIST.

[April 2, 1881.

THE INDIAN BUDGET.

The telegraphic summary of the Indian Budget, which is all that has at present arrived, shows a far more satisfactory position of the revenue than has been anticipated. The regular estimate of revenue for 1880-81 is 70,768,000*l*, including the 2,000,000*l* contributed by England. The expenditure is estimated at 77,037,000*l*, including in this 4,000,000*l* which, under the former system of accounts, would have appeared in 1881-82, and also the cost of the frontier and Punjab Northern Railways. £11,665,000 of net war expenditure is included in the estimate; without this a surplus of 5,396,000*l* would have been shown. The budget estimate for 1881-82 places the revenue at 70,981,000*l*, and the expenditure at 70,126,000*l*, leaving a surplus of 855,000*l*. In the revenue the contribution of 3,000,000*l* from the British Government is included. The expenditure includes 2,210,000*l* for war charges, and 790,000*l* for frontier railways. The 3,000,000*l* is thus balanced on both sides of the account. The whole of the English contribution towards the expenses of the war is thus brought to account in two years; and it may be desirable to explain the reason why this is done. The Indian Government have received the amount, or are to receive it, in the following manner:—

1879-80			Advance loan. Instalments.	
1880-81	******************************		Instalments.	
1881-82		500,000	.,,	
1882-83		500,000	39	
1883-84		500,000		
1884-85		500,000	39	
1885-86		500,000		

According to ordinary practice the advanced loan of 2,000,000*l* already received and the contribution of 500,000*l* this year would have been brought to account as revenue of 1880-81; and in each of the following five years a further sum of 500,000*l* would have been credited as revenue. This would, of course, have made the revenue appear larger than it was during the whole of the future time the contribution had to run, long before which the cause why the contribution was made will, it is to be hoped, have disappeared from the accounts. On the other hand, to have brought the whole five millions to account in 1880-81 would have left the charge of 3,000,000*l* for part of the war expenditure with no corresponding credit. It, therefore, appears that it was determined to enter into the revenue of 1880-81 2,000,000*l*, and in that of 1881-82 3,000,000*l*, by which means the accounts of all, years after that now closing will, except in so far as the actual payments in 1881-82 may differ from the estimates, be free from disturbance on account of the war.

In cases of the years 1880-81 and 1881-82, however, the actual receipt is only 500,000*l*, and, therefore, against the credits of 2,000,000*l* and 3,000,000*l* as revenue, must be set, under the head of debt, the discharge of the 2,000,000*l* advanced in 1879-80, and the liability of the British Treasury for 2,000,000*l* which will remain after 1881-82. This will gradually be counterbalanced in future years by the credits, under the head of debt, of the four subsequent contributions when paid.

Thus, while the revenue and expenditure account will, in regard to the war, be closed in 1881-82, the receipts and disbursements will each year give a true statement of the sums received.

This will explain the reason why the British contribution is included in the two yearly statements mentioned above. What has occurred, to put it in commercial phrase, is this — India has spent the money. England gives a contribution of 5,000,000*l*, in the shape of 2,000,000*l* down and 3,000,000*l* in promissory notes of 500,000*l* each, payable yearly for six years. To make her accounts straight India enters these notes as cash in the Budget statements of the two years in which the expenditure occurs. But it must be remembered there is a discount on the transaction. As the money has been spent, it has to be found somehow. The repayment of the debt marks the closing of each instalment. This portion of the debt, therefore, is repaid through an Imperial guarantee, and it becomes a question whether it might not have been raised more cheaply in a distinctly British form, thus giving India the advantage of the lower rate of interest. Otherwise, we have a portion of the

distinctly Indian debt redeemed through an Imperial guarantee. This country does not intend, as Mr Gladstone stated, to subsidise India, and the clearer the two sets of accounts are kept the better. Mr Baring, it appears, leaves the existing basis of taxation in India untouched, feeling probably, considering the recent period in which he has held office, it is best to do so, at all events for the present. He proposes, however, two things, both of which will be of great service to the country, reduction of military expenditure and encouragement of private enterprise. A company has been formed under the care of Messrs Rothschild to make a line from Calcutta towards Jessore and Koolna. The lack of private enterprise in India has been a great hindrance to her prosperity. Here we have overflowing floods of capital. A judicious outlet for this may be of great service to both countries.

INDIA: A VIEW ON THE SPOT.

THE following letter from a very competent authority living in India will have a special interest for our readers now that the possibility of the profitable employment of British capital in that country is likely to come prominently forward :---

"BOMBAY, March 3.

"If anyone were to measure the degree in which the interests of India have been promoted by her union with England by calculating the amount of English capital invested in India, the result would be disappointing. English capital exhibits, as a rule, a marked reluctance to commit itself to Indian enterprise. Yet there are large accumulations of money in London which seek a profitable investment. The competition which forces down profits as soon as trade revives proves that the old channels are insufficient, and that need exists for an Why, then, does India lie enlarged sphere of enterprise. beyond the curiosity of enterprising capitalists? There are many arguments in its favour. The soil gives a liberal return to improved tillage. The mineral resources of the country include rich deposits of coal, iron, lead, and gold. The labour-wage difficulty, which elsewhere constitutes the most disturbing factor in the contractor's calculations, disappears in India. The supply of labour has even already proved equal to the sudden demand of the Indian gold mining companies. The fund of labour is not only immense, but capable of adapting itself to any form of skilled work. India enters the market with no heavy mortgage on her resources, nor with the stigma of previous default. Her public debt amounts to little more than two years' purchase of her revenue if the railway loans are excluded. The net receipts from the whole network of railway communication in which the Government are interested already produce a return of more than 5 per cent. on the capital outlay, although some of the lines are not yet in working order and others are incomplete. Again, the risk attending the employment of capital in India is not raised abnormally either by the climate or by the political con-dition of the country. The rates of insurance on Indian lives are not excessive. The political horizon is overcast by no serious anxieties. Above all, English capital need never travel beyond the protection of British law, as it has done in Spain and elsewhere. Under these circumstances an explanation of the indifference shown by Englishmen to Indian wants must be sought elsewhere. It is probably due in part to the policy of the Indian Governments, and in greater part to the ignorance which prevails about the condition of India. The guarantee system taught capital to "swim with cork jackets." Its inevitable tendency was to create a feeling of distrust and check the spirit of free enterprise. The policy once had strong arguments in its favour, but it has ceased to exist. To it has succeeded a system of state-construction which applies the public revenue to the very pick of promising undertakings. Hence arises an impression that the State has selected all the good openings, and left but the refuse for private enterprise. The impression is mistaken, but the general ignorance which prevails about Indian wants undoubtedly adds point to it. It is assumed that the country is in a backward state of civilisation, with very primitive wants, and that the field for the employment of capital is either restricted or so strange to English habits

THE ECONOMIST.

as to prove a quicksand to investors. Such a view does not accord with existing facts. Those who argue thus have not kept abreast of modern improvements in Indian society. Every day its wants become more assimilated to those of the Western world. The Government cannot afford to wait, but there is no direction in which it would not gladly waive its claims in favour of competent private enterprise. But apart from this there remains outside the Government construction a large field for the profitable investment of private capital.

"For instance, the most superficial survey of a city like Bombay will show that the range of purely municipal demand offers many openings to capi-talists. The city, with its splendid public offices, its museum, mint, university, and other buildings, wears the appearance of a well-appointed town. Its population, according to the recent census, numbers 720,000, exclusive of the harbour. The water consumption is estimated at 16 gallons per head per diem, and the municipality have spent three quarters of a million pounds, besides what Government gave, in providing a water supply from a reservoir distant 15 miles, which, in regard to quantity, quality, and cheapness, is better than the water supply of any of the large cities in Europe. The public convenience is also met by the construction of central markets and slaughter houses, which cost 150,0001, and give a return of 9 per cent. Cheap ice is supplied by a company who obtain good interest, and find that the natives are their best customers. The most important recent addition to local enterprise has come not from England, but from America. Valuable concessions, to last till 1894, have been granted to some American investors, who have introduced the first tramways to Bombay, with considerable benefit to the public as well as themselves. If any one were to require evidence of the prosperity of the city, he would find it in the splendid piles of mercantile and private offices which are growing up in the fort; in the increasing number of mills, which have altered the colour as well as the appearanee of Bombay; in the splendid new dock, which cost 600,000*l*, and the ships, under flags of all nations, which lie in the harbour; and lastly, in the confident tone of the merchants of all nationalities, who have not seen such brisk trade since the dark days of the "smash in 1865-66." Bombay, though it boasts to be the chief is call. the chief, is only one of many Indian municipalities, and those who follow the directions in which its enterprise is extending will understand the openings which elsewhere await capital.

"I must not close without some allusion to the gold mines in Southern India. There seems no doubt that gold will be found on all the properties which have been acquired. But sanguine investors will do well to inquire into the water power and timber reserves which exist on the several estates. All are not equally favoured in this respect, and some disappointment will result where their capabilities have been overlooked. The machinery will soon be put up, and in May the vexed question of success or failure will be determined. Meanwhile, all the companies are interested in the construction of a line of railway to connect the coast and the Madras railway system with the Wynaad. The gold companies might be pre-pared to guarantee a certain rate of interest to any enterprising firm, Government might give valuable concessions, and the enterprise would probably prove remunerative. In one direction enterprise is sadly wanted. The railways of India require annually an immense number of engines, which constitute a permanent fixed demand. Iron abounds in the country. The new weaving mills and the gold-crushing machines will require repairs and renewals. Surely it would be a profitable as well as a pleasant tour for an engineer with capital to pay a coldweather visit to this country, and examine with his own eyes the field which India offers to capitalists in his own line.'

SCOTCH RAILWAY ACCOUNTS FOR THE SECOND HALF OF 1880.

g

se it ts

ne

ry

THERE are many points of interest just now in connection with Scotch railway finance upon which a mere study of the reports and accounts for the half-year ended the 31st

January will in no wise enlighten us. Nevertheless, the consideration of the figures now placed before the shareholders will enable us more accurately to estimate their bearings, while applying the usual tests to the capital and revenue statements. The gross revenue increases fairly corresponded with the traffic returns to the close of the half-year, though in the following table of "differences" allowance has not been made for the transfer of a moiety of the Dundee and Arbroath line from the Caledonian to the North British. Had this adjustment been made the Caledonian revenue increase would have been nearly 20,0001 larger; the North British nearly 20,0001 less; and the working expenses and preference charges would have each been affected in a smaller degree.

	Revenue.	EX	pnses.	Ke	venue.	Ch	arges.	for	Dvnd.	+	or -	190.
Caledonian North British	£ + 51,658 + 30,598	+	£ 35,536 9,444	+	£ 16,122 21,154	-	£ 5,234 18,242	+	£ 21,346 39,396	+	1	21
Glas. & SWestern			3,186	-	26,248	-	1,702	+	24,546	+	1	5
	+ 105,318	+	41,794	+	63,524	-	21,764	+	85,289	+	100	13

The increase was over 31 per cent. in the gross revenue; and the expansion of about 31 per cent. in the working expenditure has not prevented an addition of 63,5001, or $4\frac{1}{4}$ per cent., to the combined net revenues of the three great Scotch companies. These figures contrast with increases in the leading English lines of 41 per cent. in gross revenue, of $4\frac{3}{4}$ per cent. in working expenditure, and of $3\frac{3}{8}$ per cent. in net revenue; the result showing comparatively a more economical working of the Scotch lines. But the apparent decrease in the preference charges is altogether misleading. The drop in the case of the Caledonian is more than accounted for by the transfer of the moiety of the Dundee and Arbroath line, while the reduction of 18,0007 in the case of the North British in spite of the fact that at this time last year preference charges remained unpaid to the extent of over 80,000l is due to the writing off twelve months ago of 120,000l of net revenue as a "sum set aside "to restore the Tay Bridge." That an increase of 21,346l in the sum earned for the Caledonian dividend should result in the payment of $\frac{1}{2}$ per cent. less to the share-holders is owing to the circumstance that 48,3931 (sufficient for another $\frac{3}{4}$ per cent.) is carried forward "to "make ample provision for whatever liability may arise "out of the Penilee accident." To the extent to which the company is held responsible, this sum will have to be added to working expenditure.

From all sources the traffic receipts drew additional support, though in no instance was the expansion very decided; and towards the close of the six months the growth became less and less pronounced, the comparison then being made with a brisk corresponding period. With respect to the working expenses, there were some savings in maintenance of way and local rates; but heavier charges for rollingstock repairs and renewals, compensation claims (apart from the accident already mentioned), legal and parliamentary expenses, and general items, much more than counterbalanced those savings.

account any nominal additions in the twelve months upon consolidations of stocks. Such consolidations and nominal additions will for the present continue; the Glasgow and South-Western having a scheme before the shareholders which will involve the creation of a deferred stock of some importance. The estimated outlay in the current six months is upon a considerably larger scale.

The accounts have thus been briefly passed in review, and from them we gather that though the dividends have averaged some ³/₈ per cent. more than in March, 1880, this was mainly due to the exceptional loss which the North British had then sustained, and for which only 120,000l has as yet been provided, though according to Mr Chamberlain that loss may be set down at half a million. In reality the Glasgow and South-Western fared the best of three companies, the North British the worst; and none of them so well as to render violent competitions and costly extensions anything but very prejudicial to their systems. We are glad to note that the North British have abandoned that hair-brained scheme, the Forth Bridge, with its gigantic heights and impracticable spans; while the new Tay Bridge, lower by some 25 feet than the old one and with double the amount of foundation, will probably be safe enough, however costly it may prove, as all the old works are to be abandoned. The Caledonian report entirely ignores the Baird petitions, which, however, are partly discredited by the abandon-ment of the charge brought against the directors of province ment of the charge brought against the directors of paying dividends out of capital. The petitions now rest upon the misappropriation of capital to the prosecution of works, for which the outlay was but partially sanctioned by Parliament, and upon this point the result of the inquiry will be interesting, even though the dividend will not be affected. There have been grave fears that the rivalry always existing between the great Scotch lines was about to burst all the bounds with which some few years ago it was with such difficulty encircled. Such would have been doubly disastrous at the present time when the traffic is unmistakably falling off. Few of the English lines have so much to gain by harmonious interchange of traffic and relief of expenditure as the Scotch interlaced systems; and we hope that the present slight indications of a less pugnacious spirit may prove trust-worthy. If so, the exisiting depression in traffic may turn out to be a real benefit to the shareholders.

BUSINESS NOTES.

THE REVENUE .- Some disappointment has been expressed at the outcome of the revenue collection for the past year. If, however, the results realised are less favourable than was anticipated, that is mainly owing to over-sanguine expectations that have recently prevailed. The only really unsatisfactory feature of the revenue statement is that it shows for the past quarter advances as compared with the corresponding period of 1880 of 84,000*l* in customs, and of 25,000*l* in stamps. A diminu-tion under these heads is somewhat discouraging, because it indicates that the trade of the country is not expanding with the rapidity which has been hoped for and expected. It is to be remembered, however, that the unusually severe winter we have experienced has, by interrupting communication, done much to lessen the volume of business, and it is probably to this exceptional cause that much of the falling off under under those two heads of receipt is attributable. To the decrease of 470,000l on last quarter's yield of the excise no importance need be at-tached. That is readily enough accounted for by the change from the malt tax to the beer duty, and with the yield of the other sources of revenue entire satisfaction

may be felt. They have proved much more prolific than may be felt. They have proved inder more profine than was anticipated in the estimates; and the result is that the total revenue for the year exceeds the budget esti-mate by no less than 1,344,0007. Within a day or so of the date on which Mr Gladstone is to make his budget statement speculations as to how this excess will affect the financial arrangements of the current year will be superfluous. It is sufficient to note that as next year the revenue, if taxation were to remain as at present, would be increased to the extent of about a million, by the arrears of the extra penny of income tax, and by the increased productiveness of the beer tax, Mr Gladstone, notwithstanding the heavier charges he has to provide for, will have some surplus to dispose of. And nothing is more likely than that by some skilful readjustment of taxation the present apparent surplus will be largely increased.

THE MAINTENANCE OF MAIN ROADS .- The debate on Mr Harcourt's motion, proposing that " part of the main-"tenance of main roads may be defrayed from other " sources than county rates," brought on a discussion on the two far more important points, which really lie at the root of the whole matter-the existing system of grants in aid to local administrative authorities, and the question how far personal property should be brought in to bear a share of the charges now levied on real property. Mr Gladstone's words on this part of the subject may very likely foreshadow a very considerable change in our whole principle of national finance. He said, "Let Parliament "examine, and examine upon a large scale, what "is the best mode of giving real property that "aid which it was once accustomed to receive from per-" sonal property." This point, simple as it seems, is one of the most knotty in the whole range of fiscal legislation. The old system, to which Mr Gladstone alluded, simply died out from inability to work it. The rise of the cloth manufacture of the North of England is attributed to the attempt to tax "stock in trade" for local purposes in the West of England. The result was the migration of the cloth manufacturers which it was attempted to tax from Wiltshire and the neighbourhood to Yorkshire. Still, we are far from saying that the problem is insoluble, though the practical applica-tion of the principle presents many difficulties. It is possible that the handing over some one or more of the Im-perial taxes now in force to the local authorities may prove to be the best arrangement to be made. The tax on carriages is open to the serious objections applicable to all taxes on locomotion, but the employing the proceeds to this purport would be so far fair and just that it would apply the income raised from those who use the roads to mending the roads. In neighbourhoods where vehicles abound it may justly be said that roads are the most worn. As matters stand, the indirect tax on locomotion from the increasing badness of the roads is a very heavy one. Bad roads mean injury and expense to carriages, wheels, and cattle. In the present depressed state of agriculture all impediments to moving produce, manure, and implements-the draught of thrashing machines, for instance, sometimes taxes farm horses severely-should be sedulously removed. As Mr Harcourt's motion was worded, it was too vague to explain how his plan was intended to be worked out, but the closeness of the division shows that the whole subject cannot long escape the attention of the Legislature.

MONETARY CONFERENCE IN PARIS. - The following observations on the attitude of England towards the Monetary Conference have appeared in the Independence Belae :

As to England, the following concessions will be made to promote the success of international bi-metallism :— 1. The Bank of England will exercise its statutory right to hold in its reserve 5,000,000l in silver.* 2. Coins of the value of 4s will be struck upon the basis of 15¹/₂.

 The legal tender limit will be raised to 4l.
 Bi-metallism, on the basis of 151, will be adopted in India.
 With respect to this statement the reference it contains to the principle on which the Bank of England is allowed to

issue notes against silver bullion by the Act of 1844 is Issue Department.

The amount of silver bullion is hence not limited to any fixed sum, but to a proportion of the whole quantity of bullion held. It does not, however, appear probable that the Bank of England is likely to depart suddenly from the policy of recent years as to holding silver in its reserve. There does not either appear to be any in its reserve. ground for the statement as to the intention of this country to mint coins of the value of 4s upon the basis proposed. With respect to India, gold coins have always been current there at the valuation of the day; but the objections to altering the standard of value in that country from its existing silver basis at the present time are so great that we do not believe there is any likelihood of any change being made in it.

THE RAILWAY RATES COMMITTEE .- At the sitting of this committee on Tuesday last, important evidence was had as to the injurious effect of the inequality of railway rates upon the woollen industries of the country. Mr T. Garrett, of Bradford, stated that owing to differential rates, home-grown wool was seriously handicapped in the com-petition with imported supplies. The London and North-Western Company, for instance, charge for foreign wool from London to Bradford 37s 6d per ton, the distance being about 200 miles; while for the carriage of homegrown wool from Banbury to Bradford, a distance of 142 miles, the charge was 40s per ton. Similar differential rates exist in regard to Irish wool brought to Bradford and that exported, while as to the rates for manufactured goods he stated that the rate from Manchester to London is 25s per ton on export goods, while that from Bradford to London is 35s, there being no such difference in mileage as to warrant the higher rate. Goods for export, more-over, are, he averred, charged at lower rates than those intended for home consumption and he proceeded to intended for home consumption, and he proceeded to argue that if the companies could afford to carry the one class of goods at low charges they could afford to do the same with the other.

EMIGRATION FROM IRELAND .- The recently published statistics of emigration from the United Kingdom showed, it will be remembered, a great increase in the number of emigrants from Ireland. Further information as to this movement is now afforded by the Registrar-General for Ireland, who, in his return for the past year, gives the following comparative statement of the emigration during 1879 and 1880 :

Emigrants from	Ma	les.	Fam	ales.	To	tal.
	1879.	1880.	1879.	1880.	1879.	1880.
Provinces— Leinster. Munster. Ulster Connaught Connty unspecified	2,026 9,170 10,858 2,753	8,405 16,352 15,241 9,908 31	3,099 8,085 6,761 3,313	7,764 14,302 12,881 10,611 22	6,125 17,255 17,619 6,066	16,169 30,654 28,122 20,519 53

FRIENDLY SOCIETIES IN 1879.-The Registrar of Friendly Societies reports that in 1879 the business of his office again increased, the total number of new societies, registered or certified, amounting to 1,044, against 786 in 1878. The augmentation, however, is entirely in the number of friendly societies, all other classes of societies showing a decline. Thus, co-operative societies dropped from 43 to 39; building societies from 132 to 123; trades unions from 22 to 17, and loan societies from 34 to 28. The inference to be derived from this increase in the formation of bodies of a purely provident character, accompanied by a decrease in those which demand the outlay of capital, appears, in the opinion of the Registrar, to be that the continuance of commercial distress seriously impaired the resources of the working classes, without affecting their provi-dence. The total number of returns received from friendly societies during the year was 12,300, an increase of 30 over the previous year, and of those 2008 had to be sent back for amendment or further examination, mainly on account either of imperfections in the filling up of the forms, or insufficiency of the information as to the investments of funds. From these returns the Register calculates that the total membership of friendly societies proper numbers 4,643,336, and that the aggregate funds amount to 11,988,350*l*. For the first time the returns contain a column for the total expenditure for benefit purposes of separately registered societies, although for various reasons it was found im-practicable to obtain information respecting the branches. This shows that during 1878 the 10,161 registered societies spent in benefits 1,600,8571, and the Registered societies spent in benefits 1,000,007, and the Registered infers from these figures that, if non-returning branches and unregistered societies be included, the current estimate of 2,000,000*l* yearly as being virtually saved to the poor rates through the operation of friendly societies must be far within the mark. The friendly societies of the country, however, are very far indeed from yielding the full amount of benefit to their members, which, under a proper system, they ought to do. The bankrupt condition of the great bulk of the unregistered societies is notorious, and nothing is so destruc-tive of habits of thrift as the failure of such associations to pay the promised benefits. When people see those who for years have been exercising a pain-ful self-denial in order to provide for sickness or old age deprived by the bankruptcy of some society of all the benefits they laboured to secure, they are only too apt to think that they will be much happier in the meantime and no worse off in the end if they spend all they earn and leave the future to take care of itself. Even amongst the registered societies there is an enormous amount of insolvency. Thus last year, out of 948 quinquennial valuation returns received, no fewer than 786 showed that on a 3 per cent. valuation the assets were insufficient to meet the liabilities. Such a condition of affairs is really scandalous, and while some of the larger societies are to be commended for the efforts they are making to ensure their ultimate solvency, it is certainly high time that some steps were taken to prevent the wholesale waste of the savings of the poor which at present results from the operations of insolvent friendly societies.

THE AUSTRALIAN COURT OF APPEAL .- At the recent Intercolonial Conference, held at Sydney in January, the clauses of an important measure for the establishment of clauses of an important measure for the establishment of a Court of Appeal were considered, and agreed to by South Wales, Victoria, South Australia, Queensland, Wes-tern Australia, and Tasmania, the only Australasian colony not accepting the terms of the proposed Bill being New Zealand. The various clauses set forth that the governor of each colony shall by commission appoint the Chief Justice, or any Puisne Judge, to be one of the Judges in the Court of Appeal; that the Court may be held before any three of such appointed Judges; that, as far as practicable, the Court shall sit in each colony where there are appeal cases once a year; and that the first sitthere are appeal cases once a year; and that the first sit-ting shall be in Sydney within twelve months. Clauses

11 and 12 of this Bill provide as follows :--In case any judgment shall be pronounced in the Supreme Court in any colony in respect of any matter at issue above the amount or value of 5001 sterling, the person or persons feeling

yield of the other sources of revenue entire satisfaction ' paragraph is altered in writing to "one-fifth " in silver.

412

THE ECONOMIST.

[April 2, 1881.

aggrieved by any such judgment may, within fourteen days next after same shall have been pronounced, and after service of the prescribed notice of his intention so to do on the other party, apply to the said Supreme Court by motion or petition for leave to appeal therefrom to the Court of Appeal. In case such leave to appeal shall be prayed by the party who is directed to pay any such sum of money or perform any duty, the said Supreme Court is hereby empowered either to direct that the judgment appealed from shall be carried into execution, or that the execution thereof shall be suspended pending the said appeal as may appear to be most consistent with real and substantial justice.

The measure appears to be fairly framed ; but, of course, this cannot cancel the right of a British subject to appeal to the Judicial Committee of Her Majesty's Privy Council; and one of the clauses of the Bill therefore makes this necessary reservation. It may be hoped, however, that the instances now will be very rare indeed, that an Australian appeal will have to be brought to the mother country for settlement.

Business on the Bourse has been dull during the week, operators remaining quiet in view of the settlement. Rente has been especially heavy, and the new loan has dropped nearly $1\frac{1}{2}$, the allotment being larger than was expected. Credit Farcier above here expected. has been especially heavy, and the new loan has dropped nearly 1½, the allotment being larger than was expected. Credit Foncier shares have continued to improve, but there has been a sharp reaction in Suez shares, which has caused no surprise after the wild manner in which they had been recently driven up. Bank of France shares have gained 75f, buyers continuing to discount the profits produced by the loan business. These exceed half a million for the week. Subjoined are to-day's closing prices, with the variations, com-pared with Thursday last:—Three per Cents., 84f 15c — 50c; Redeemable Threes, Old, 86f 25c — 35c; New, 85f 27½c —1f 37½c; Fives, 120f 90c — 20c; Italian 91f 45c =; Austrian gold 4 per Cents., 82f 95c + 1f 20c; Turkish Fives, 14f 35c + 85c; Egyptian Unified, 375f + 3f 75c; Preference Bonds, 495f + 6f 25c; Russia, 1877, 95f 40c — 20c; Bank of France, 4,725f + 75f; Banque de Paris, 1,240f + 5f; Credit Foncier, 1,765f — 40f; Union Générale, 1,245f — 2f 50c; Laender Bank, 800f + 2f 50c; Paris Gas shares, 1,637f 50c—2f 50c; Suez Canal, 1,842f 50f — 87f 50c; Panama Canal, 542f 50c—11f 25c; Northern Railway, 1,780f + 12f 50c; Western, 860f — 10f; Orleans, 1,395f — 16f 25c; Eastern, 788f 75c — 1f 25c; Lyons, 1,660f + 40f; Southern, 1,177f 50c + 2f 50c; South of Austria, 255f + 7f 50c. It is officially announced that the subscription to the new loan amounted to a total sum of 528 633 270f of Bente, repre-

It is officially announced that the subscription to the new loan amounted to a total sum of 528,633,270f of Rente, repre-senting a sum of 17,621 millions of nominal capital, and

14,669 millions effective. By the law of 1878, which created the present type of redeemable Rente, the inscriptions can only be for unities of 15f, or multiples of 15f. Each subscriber will, therefore, receive a minimum inscription of 15f of Rente. For larger subscriptions the allotment will be a small fraction over 6 per cent. The number of subscribers was 315,445.

The Convention between the Paris Union Générale, repre-sented by M Bontoux and the Servian Government, just ratified by the Skuptchinas, comprises (1) the raising of a loan for the construction of the Belgrade to Vrania railway; (2) the construction of the line; (3) the formation of a com-pany for working it. The amount of the loan is fixed at 71,400,000f, for which the Servian Government will create 200 000 5 per cent, mortgage bonds of 500f, which the Union 200,000 5 per cent. mortgage bonds of 500f, which the Union Générale will take firm at 71.40 or 357f per bond. The Ser-vian Government will pay to the Union Générale for 50 years an annuity of six millions of francs for the interest and amor-tisation of the loan guaranteed by the net yield of the line, the Servian engineers and the present tax. The loan will be the Servian customs, and the present tax. The loan will be free from taxes by the Servian Government, which engages to use its influence to obtain the admission of the loan to all the principal European Bourses.

M. de Parien has given notice of a question to be put to the Minister of Finance in the Senate on the coming monetary conference. This interpellation was fixed for to-day, but was postponed by the request of the Minister, who proposed to adjourn it for three weeks, but as the date would have fallen on Easter week when the Senate will not be sitting, M. de Parien refused to consent to that arrangement, and Thursday next was finally agreed upon. M. de Parien is a leading par tisan of a single gold standard.

The Paris Omnibus Company has not abandoned the idea of completing its monopoly by a fusion with the two tramway companies existing in the city. The scheme drawn up a few months back was rejected by the Paris Municipal Council, but at the annual meeting of the shareholders held this week the announcement was made that a fresh draft had been laid before the Municipal Council. It is to be desired, in the interest before the Municipal Council. It is to be desired, in the interest of the public, that the new terms will be refused also, for nothing is to be gained by the extension of the monopoly. The ownibus service is already insufficient; the districts best served are those on which the tranways compete, and the absorption of those companies would be certainly followed by a diminution in the number of vehicles run. The total receipts of the Omnibus Company in 1880 were 34,541,377f, and the expen-diture 33,126,326f, leaving profits amounting to 1,415,051f. The dividend paid for the year was 30f, or 6 per cent.; but the return on the market value of the shares is only 2 per cent., they having been run up by speculative buying last year, when the scheme for taking over the tramway com-panies was first started. The present price is about 1,500f per 500f share, which is a fall of 100f on the highest rate reached. reached.

The Senate voted this week the Savings' Bank Bill, which was passed in July last by the Chamber of Deputies. The measure, however, underwent some considerable modifications in the Senate committee, which took counsel of M Leon Say, M Denormandies, Governor of the Bank of France, and M de Malarce, who has been charged with frequent missions abroad, and especially to England, and who prepared the projected improvements in the French law. The main pur-pose of the present bill was to create Post Office Savings' Banks, but the chief provisions of the bill are also extended to the ordinary trustee savings' banks. The maximum of one ac-count is raised from 1,000f to 2,000f, and minors and married women will be permitted to open accounts and withdraw their The Senate voted this week the Savings' Bank Bill, which the ordinary trustee savings' banks. The maximum of one ac-count is raised from 1,000f to 2,000f, and minors and married women will be permitted to open accounts and withdraw their funds, unless interdicted by the father, guardian, or husband. The clauses permitting married women to become depositors without the authorisation of their husbands had not been voted by the Chamber of Deputies, but was added by the Senate committee. It was also opposed in the Senate as being in contradiction to the principles of the civil code, but was voted. The rate of interest to be allowed by the Casse des Depots et Consignations, which holds the funds of the Savings Banks, is fixed at 34 per cent., of which 3 per cent. will be paid to the depositor, and the 4 be reserved for the expenses. The rate of interest allowed to the ordinary Savings Banks will, in future, be fixed by a law instead of by decree. It is at present 4 per cent, the savings banks paying from 34 to 390 per cent., except in Paris, where the interest allowed is only 34. The difficulty of a run on the savings banks in moments of crisis is overcome by a clause similar to that adopted in Austria, Italy and other countries authorising the banks after a Government decree to limit their payments to instalments not exceeding 50 francs fortnightly. By another amendment, introduced on the recommendation of M. de Malarce, the Senate has adopted the practice of the English Post-office, by which the accounts will be made general to any office in the country, instead of being localised to the office in which they are opened. opened.

THE ECONOMIST.

A Ten Hours' Factory Bill was under discussion this week in the Chamber of Deputies, but although defended by M Louis Blanc and the Socialists and Radicals, it was only passed after being restricted by an amendment to males from 18 to 21 years of age, and to females. Another clause limits work for the same to six days a week, but does not specify which is to be the day of rest. That provision was opposed by the extreme Republicans as an attempt to revive indi-rectly the old legislation against Sunday labour, abolished only a few months back. It is, indeed, probable that if manufacturers are compelled to close their works one day in the week, custom will cause them to choose the Sunday.

The Orleans Railway Company have held their annual meeting and voted the usual dividend of 56f, or 113 per cent., which cannot be exceeded until the company has repaid its debt to the State for advances to complete the guaranteed interest on the capital cost of the new lines. For the first time, however, since the convention under which the company undertook the construction of its new system, the Orleans Company has not required aid from the State. Last year it took ten millions under the guarantee to balance the account for 1879; but 1880 leaves a surplus of nearly three millions, which will be applied to the reduction of the old debt. All the lines which take interest from the State under the guarantee are now entering on the period when the progressive increase in their receipts will enable them to cease borrowing, but it will be many years before their debts are cleared off, and they obtain the free disposal of their surplus profits to increase the dividends to which they are limited. Those companies are the Orleans, Western, Southern, and Eastern. The Northern and Lyons have no debt to the States, which explains why their dividends alone are variable.

The six companies have so far not maintained their last ear's receipts, the first ten weeks showing an aggregate deficit of 51 millions, of which the Northern loses two millions, the Western, Orleans, and Lyons each one, and the Southern half a million. The Eastern alone has a small increase.

The statistics are published of a Submarine Cable Company

to Central America, with a proposed capital of 6,000 shares of 500f, of which 2,500 are for the purchase of the concession. A financial journal states that the Comptoir d'Escompte and MM. Cohen d'Anvers are about to offer in Paris a Six per Cent. Loan of the Argentine Republic for two and a half

millions sterling at 83. The receipts of the Duval Restaurants Company in 1880 amounted to 8,237,808f, and the nett profits to 929,074f. The dividend for the year was 98f per share, or nearly 20 per cent. The number of meals supplied was 3,027,696. The foreign trade of Italy in 1880 consisted of—

e source and	 francs.	
Imports	 1,224,841,158	
Exports	 1,130,644,502	

94,196,656 Balance of imports..... Compared with 1879, the imports decreased 37,701,901f, while the exports increased 23,651,194f. The Customs' receipts rose from 125,586,231f in 1879 to 133,947,077f in 1880.

GERMANY AND AUSTRIA. (FROM OUR OWN CORRESPONDENT.)

VIENNA, March 28th.

The debate on the Budget in the German Reichstag gave rise last week to more important discussions than have been held since the establishment of the German Empire. All the new plans cherished by the Imperial Chancellor were discussed. First, the new tax bills were brought in-a law for raising the brewing tax to about double its former amount; another for raising the old, and introducing new Imperial bill stamp taxes, as also a tax on transactions on 'Change; and a law for a military tax to be paid by all who for any reason are not in active service. As an introduction to these bills a memoir was read, which has been attributed to these bins a memoir was read, which has been attributed to the Imperial Chancellor's pen, and which refers to his new plan of indirect taxation; and by showing the figures pro-duced by the latter in other countries, tries to prove how efficacious indirect taxes would be for Germany. The memoir mentions that in France indirect taxes to the amount of 417-10 are paid per head, in Great Britain and Ireland 31 6-10, in the United States 26 3-10, in Italy 16 7-10 in Austria, 16 4-10, in Russia 14 1-10, whilst in Germany they amount to 10 4-10 per head. Economists think that an imitation of such heavy indirect taxation would not be a satisfactory state of things, considering that in Germany direct taxes are so much more developed. Prince Bismarck, however, would prefer reducing direct taxes as much as possible, and raising the indirect taxes to the standard of the other States mentioned in the memoir, for reasons which we stated last week. The memoir, however, contains contradictory arguments, since it has to speak in favour of a totally new direct tax—the military tax—which cannot be obtained by means of indirect taxation. This con-

tradictory argument, which is not excused nor justified in any manner, has betrayed the authorship of the Chancellor, because no one except Prince Bismarck himself would have dared pass over so important a question without strong arguments. Another paragraph of the Budget brought up the question of the free ports, Bremen and Hamburg, and the ex-Minister Dèlbrúck defended them against the prevailing desire to include them within the German Customs line. Dèlbrúck asserted that it would be of no advantage at all to the commerce and industry of Germany if the Hanse Déloruck asserted that it would be of no advantage at all to the commerce and industry of Germany if the Hanse towns were within its Customs line, whilst the commercial position of these cities would be altogether ruined by the change. Another question arose which ended in a defeat of the Imperial Chancellor. The question was, whether the expenditure for including Altona within the frontier line should be noted by the Reichstag or not. Prince Bismarck asserted that this was a question which could be decided without the consent of the Reichstag, which, however, refused to sanction it by a large majority. The Federal Council will, therefore, it by a large majority. The Federal Council will, therefore, have to discuss the subject over again. It appears that Bis-marck at first threatened he would dissolve the Reichstag,

but he thought better of it. The conversion of the Hungarian gold rente into 4 per cent. obligations is being discussed between the Rothschild Syndi. cate and the Hungarian Finance Minister. The present moment is a very favourable one for an operation of this kind, the prices of stocks having risen remarkably during the last week. The shares of the Credit Anstalt rose from 288.40 to 296.75, and it is believed by many that they will soon rise to 300. Paper rente rose from 73.55 to 74.35; the Austrian gold and silver rentes half a florin each; the shares of the Northern Designer 40 designs the North Western Bailway 5 designs Railway, 40 florins; the North-Western Railway, 5 florins; the States Railway, 4½ florins; Southern Railway, 3½ florins; the Karl Ludwig Railway, 1 florin; the Danube Navigation Company, 8 florins. The sudden rise was a great surprise to everybody, because it had been supposed that the subscriptions to the French milliard would have affected the German and

Austrian money markets disadvantageously. The Lower House of the Reichsrath, at the close of the week, voted the law on determination of the total receipts from the land tax as amounting to 37,000,000 florins, with a far greater majority than had been expected. It is now entering upon the details of the Land Tax Bill.

The Austrian Government solicited the Austrian Bank to exchange three million silver florins for three million notes; the Bank consented.

The annual meeting of both the German Imperial and the Austro-Hungarian Banks have been held, and the dividends rated, which have already been mentioned. The Austro-Hungarian Bank's coin and bullion, amounting to a total of 173,301,613 florins at the close of 1880, comprised 108,291,351 florins silver and 45,010,261 florins gold. Gold has therefore increased 6¹/₃ millions, and silver 2³/₃ millions in the course of the year. The German Reichsbank, the coin and bullion in which, at the end of 1880, amounted to 562,000,000 marks, has not yet kept its promise of giving detailed accounts of its gold and silver, so that it is quite uncertain what amount of silver thalers its coffers contain.

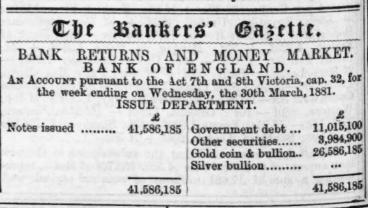

We have already mentioned that the Austrian Credit Anstalt's net profits amounted to 14 per cent. of the capital in shares. The yearly report, which has just been published, shows that 8 per cent. net profits were gained by the banking business alone, without the Syndicate loans. If we consider the earnings in recent years made by this establishment, we cannot help remarking that its business is progressing most favourably:—In 1876 the income was 656,406 florins; in 1877, 3,741,158 florins; in 1878, 4,103,349 florins; in 1879, 5,517,358 florins; in 1880, 5,599,817 florins. The Servian Skuptschina voted the contract with the French Société d'Union Générale for the construction of the

Servian railways by a large majority.

DISCOUNT AND MONEY MARKET .--- As far as the money market is concerned we have tided over the turn of the quarter quietly enough. The supply of bills has scarcely increased as much as usual, and discount rates cannot be called even so much as an i per cent. higher than they were a week ago. Money, it is true, has been wanted, because it is natural, as some 15,000,000l are disbursed in the shape of dividends in the first week in April, as well as a very large sum in salaries, that financial houses, companies, and employers should all have to call in money for such purposes. Instead of 2 to $2\frac{1}{2}$ per cent. as last week, the prevailing quotations for day-to-day loans this week have been $2\frac{1}{2}$ to 3 per cent., and the applications to the Bank of England for loans until Wednesday next — when the dividends on New and Reduced, India 4 per Cents., Bank Stock, &c., are payable-have been moderately important. This afternoon, however, some considerable distributions having been made, and the Stock Exchange settlement having been completed yesterday, money on loan was readily obtainable at $2\frac{1}{2}$ per cent.; and outward appearances for the time being certainly seem to point towards greater ease in rates. The two great arguments in support of this view are the continued curious scarcity of bills and the remarkable steadiness with which the Continental exchanges keep in our favour. The latter is due in the main to the buoyant condition of the French, Austrian, and other bourses, and may very possibly remain a feature of the market for months to come, especially as the restrictions placed by the Bank of France on the export of gold and on any advance in the value of money prevent the efficient remedies for over-speculation from exercising due influence. But we think that the weight of these two considerations in favour of cheap money very materially lessened by the weakness of the New York exchange, for which quarter this week gold has again been taken from the Bank of England and purchased in the open market. Money is tighter this week in America, and the future course of trans-Atlantic gold requirements are wholly uncertain. The great influx of new securities goes on here with even augmented force. Our commitments on that score are steadily increasing, and the effect upon the money market must certainly be considerable. We therefore hold to the view that it is unwise to take in bills to arrive in April on terms materially lower than are now current ; while any increased speculation "for the rise" upon the Stock Exchange could scarcely fail to give us dearer money.

The Bank return indicates that the temporary requirements of the season are much upon their usual scale. The drop in the public deposits and the increase in the private deposits are usual just before the turn of the quarter, as well as the addition to the advances, &c., shown in the other securities. The reduction of 500,000*l* in the Government securities however is exceptional, and may be connected with repayments of Exchequer bonds. The drop in the reserve is 826,000*l*, compounded of a decrease in the coin and bullion of 262,000*l* (the net amount taken for export was 233,000*l*) and an increase in the note circulation of 604,000*l*. To-day a further 207,000*l* in bar gold was sold for New York, while 50,000 sovereigns were received from Egypt.

In support of the view that our indebtedness to America is not diminishing, may be cited the enormous imports of produce from that country still going on. We made reference to this a month ago; but since the beginning of March our imports of raw cotton have exceeded those of March last year by 100,000 bales, while of wheat and flour we have received more than an additional 1,000,000 cwts, practically the whole of which additions have come from America. The Board of Trade Returns next week, therefore, bid fair to show considerable increase under these leading heads of import.

Silver is steady at $52\frac{1}{6}d$ —a rise of $\frac{1}{6}d$ as compared with last Friday. The India Council drawings (45 lacs) were on Wednesday disposed of at the same minimum as during the past few weeks, or 1s $7\frac{15}{16}d$ per rupee. The announcement that the Indian Government in the financial year now commencing intend to remit home—that is, draw Council bills on India—to the extent of 17,200,000*l* sterling, besides raising a 3,000,000*l* loan in India, has somewhat quieted the silver market in the face of the approaching Paris Conference. At 1s 8d per rupee, 17,200,000*l* sterling re-

presents 2,064 lacs, 00,000 rupees, or an average of 40 lacs per week throughout the entire twelve months, a considerably larger average than has ever been drawn before, and nearly 5 lacs per week in excess of the average drawings of 1880-81.

The income of the Metropolitan Board of Works for 1881 is estimated at 1,217,409*l*, while the expenditure will exceed that sum by 16,984*l*. Of the expenditure, 970,527*l* is absorbed by the interest and sinking funds of the debt. The amount demanded from the parishes on the metropolitan consolidated rate will be 671,839*l*, equal to an assessment of about 5.89d in the pound.

The annual report of the Imperial Bank of Germany has just been issued. The share of the Government in the profit of the Bank is 89,6251. The dividend to the shareholders amounts to 6 per cent. for the year, which compares with 5 per cent. for 1879, 6.30 per cent. for 1878, 6.29 per cent. in 1877, and 6 per cent. in 1876.

We subjoin our usual discount quotations for paper having various periods to run :---

Bank	bills-	%		Trad		%		
3	months	 21	+	3 1	aonth	 21	3	
4	-	 21		4	-	 21	31

THE STOCK MARKETS .- On Saturday last the Stock Exchange still wore the gloomy aspect, as regards home securities, which had characterised the entire quarter; and on Monday there was no particular movement except in foreign investments which experienced benefit from the more favourable views of the Greek frontier difficulty taken by the continental bourses. The American markets were likewise more buoyant, and the upward movement in prices was reflected here. On Tuesday the settlement mainly engrossed attention, and proceeded without difficulty; but when dealings commenced for the new account, which they did actively on Wednesday, a marked change was observable. Where selling had previously predominated, buying set in with vigour, and the prognostications of cheap money, and the confidence visible in foreign markets at length made themselves visible here. During the past three days, the rise in home investments has been rapid, and the most has been made of some slight indications of revival in certain departments of trade as well as of the rumour-the wish doubtless fathering the thought-that Mr Gladstone will take off last year's penny on the income tax. Even the efforts made to further depreciate gas property upon the electric light competition has been attended by but qualified success. For the rest, whether it is Government, home railway, continental, or American securities, the changes are almost entirely favourable. The settlement passed over without difficulty.

This week's list of new Securities is altogether a very important one, and includes two Colonial Government loans, a home city loan, the North Eastern new ordinary Stock (the first instalment on which fell due to-day), and a number of mines and miscellaneous undertakings. The total of the week's applications exceeds 5,500,000*l*.

A slight improvement has been noticeable in the Iron trade this week, and this has influenced favourably the market prices of some railway stocks. But iron having been flat for so many months past, and iron companies so out of favour with investors, it will apparently require a more decided and sustained improvement in the trade before such concerns may again be considered desirable investments. The following list of quotations of the leading iron and coal companies dealt in in Manchester shows that, in spite of the almost universal rise in prices during 1880, these companies fell heavily ; and that since December they have in no wise revived. But though the fall in the past twelve months has been so marked, the advance in the previous six was yet more striking; and it cannot now be said, as it could eighteen months ago, that there was hardly an iron company in the United Kingdom that was not at a heavy discount. The fluctuations recorded in the list below are remarkable.

BRITISH GOVERNMENT SECURITIES.—The week's variations in the money price of Consols have been between the following limits :—On Saturday, between 100 and $100\frac{1}{8}$; Monday, $99\frac{7}{8}$ and 100; on Tuesday, $99\frac{7}{8}$ and $100\frac{1}{8}$; on Wednesday, $99\frac{7}{6}$ and $100\frac{1}{8}$; on Thursday, $99\frac{7}{8}$ and $100\frac{1}{8}$; and to-day between 100 and $100\frac{1}{4}$. The Home Funds were $\frac{1}{8}$ lower on Monday, but recovered yesterday, and improved to-day in view of the dividend payments. Monday next is the Consols settlement. Indian Sterling Loans are quiet, but Rupee Paper is about $\frac{1}{2}$ better, in the face of the new issue foreshadowed by Mr Baring.

COLONIAL AND GOVERNMENT DEBENTURES.—New Zealand 4 per cent. and South Australian 4 per cent. are quoted $\frac{1}{2}$ higher, while in Queensland 4 per cent. and Victoria 4 per cent. the improvement has reached 1. Canadian 4 per cent. are $\frac{1}{2}$ weaker, and so are Tasmanian 4 per cent. on the issue of the new loan.

FOREIGN GOVEENMENT SECURITIES.—The advance is very general, and all "international" stocks quoted in German, Austrian, and American centres have been particularly well sustained throughout the week. A large additional speculative business has been developed in Turkish Stocks, though even the peaceful settlement of the frontier question cannot be held to materially improve the Bondholders' prospects. What alone can benefit Turkish Bondholders is the introduction of European capital in the shape of private enterprise—to lend to the Porte must continue to be out of the question—and as long as the traditions of that Government, which have persistently discouraged individual enterprise, are persevered in, Turkey will remain the bankrupt State she now is. Russian Stocks are as high as they were before the assassination of Alexander II. South American loans have mostly participated in the advance, Argentine being especially favoured.

HOME RAILWAYS.—The traffic returns cannot be looked upon very favourably, even allowing for the fact that the corresponding week was "Good Friday-week," and therefore included the first portion of the Easter holiday takings. Still, the Stock Exchange is in the humour to be satisfied, and the rise has been general. Neither the Southern lines nor the South-Western are lower, though competing schemes are making some progress in Parliament, and the Scotch are advanced, though the North British yesterday suffered a decided relapse upon the notification that Mr Stirling was about to resign the chairmanship. The heavy gambling "for the fall" in London and Brighton Deferred appears to be somewhat reduced. In addition to the stocks quoted below, London and Tilbury is 1 higher, and East London $\frac{1}{2}$.

The following shows the principal changes for the week in the quotations of ordinary stocks, comparing the latest unofficial prices :—

AMERICAN RAILEOAD SECURITIES .- The United States Government are now following the wiser course of consulting the banks concerning the measures to be adopted in view of the forthcoming refunding. The markets over there are all buoyant, and here Delaware and Hudson Canal shares are $12\frac{1}{2}$ higher; Central Pacific and Cali-fornia 5, New York Central, and New York, Ontario, and Western 3; New York, Lake Erie and Western 2³/₄; ditto Preference, 5; Illinois Central, and Philadelphia and Reading, $2\frac{1}{2}$; Ohio and Mississippi, $1\frac{1}{2}$; and Pennsylvannia, 1; but Union Pacific are quoted 3 down.

FOREIGN RAILWAYS .- These securities have been in good demand, and quotations show in many cases a substantial advance. Brazilian Imperial shares have risen $\frac{1}{2}$; East Argentine, 2; Mexican, $\frac{3}{4}$; Ottoman, $\frac{3}{4}$; San Paulo, $\frac{1}{2}$; South Austrian, $\frac{1}{4}$; and Varna. $\frac{1}{2}$. Brazilian Imperial Obligations are quoted $1\frac{1}{2}$ higher; East Argentine, 1; North Western of Montevideo, 1; Ottoman, 3; South Austrian, $\frac{1}{8}$; and Varna, $\frac{1}{4}$.

BANKS.—Anglo-Egyptian show an advance of $\frac{1}{2}$; Bank of Constantinople, $\frac{3}{4}$; Chartered af India, 1; Colonial, 1; Consolidated, $\frac{1}{8}$; Imperial Ottoman, $1\frac{1}{8}$; London Chartered of Australia, $\frac{1}{2}$; Merchant, $\frac{1}{2}$; and Oriental 1. Bank of Egypt have fallen 1; Bank of South Australia, $\frac{1}{2}$; and Union of Australia, 2.

INSURANCE.-Imperial Fire Shares have improved 21/2, Indemnity Marine, and Marine 1; Thames and Mersey Marine $\frac{3}{8}$, and British and Foreign Marine, and Ocean Marine $\frac{1}{4}$; while London and Lancashire Fire have fallen 1.

CORPORATION STOCKS .- City of Wellington loans have risen 1.

Docks .- Millwall preference is quoted at an advance of 2.

GAS.--The attention given to the experimental lighting of the City by electricity has caused a fresh fall. Commercial Ordinary and New are each 5 lower, and the $4\frac{1}{2}$ per Cent. Debenture Stock $1\frac{1}{2}$; Gas Light and Coke A 4; ditto 4 and $4\frac{1}{2}$ per Cent. Debentures, each 2; Imperial Continental, 5; London, 3; South Metropolitan A, 5.

IRON AND COAL .- Rhymney Ordinary and new shares are respectively 1 and $\frac{1}{2}$ higher, while the Registered 7 Cent. Debentures have risen 2, and those to bearer 1. Nantyglo and Blaina are also 1 up.

LAND.-Australian Agricultural have risen 2; British American Land, 13.

MINES.—St John del Rey are quoted at an advance of South Indian Gold $\frac{1}{4}$, and Bilbao Iron Ore are $4\frac{1}{2}$ higher; but a fall of 3 is recorded in New Quebrada Debentures, and of 1 on Van and Tharsis Sulphur.

SHIPPING .- General Steam Navigation and Royal Mail Steam are each 1 lower.

TELEGRAPHS.-Anglo-American Ordinary have risen 14; the Preferred Shares, Eastern Extension 1887 Debentures, and West India and Panama First Preference, each 1; Direct Spanish Preference and Western and Brazilian $\frac{1}{2}$, and Eastern Extension $\frac{1}{4}$.

TRAMWAYS.—Buenos Ayres and the Tramways Com-pany of France are each $\frac{1}{2}$ higher, and Belfast, Imperial, and London each $\frac{1}{4}$; but London-street and Wolverhampton have each fallen $\frac{1}{4}$.

WATER.-East London are 5 higher, Chelsea and Lambeth each 3, and Grand Junction 2.

MISCELLANEOUS .- London General Omnibus have advanced 7, South Australian Land Mortgage Debentures 1, Telegraph Construction 6 per Cent. Bonds 1, Government Stock Investment and United States Railway Stock each $\frac{1}{2}$, and Native Guano $\frac{1}{4}$.

BULLION.—The following is taken from the circular of Messrs Pixley and Abell, dated March 31, 1881 :--

GOLD .- The demand for the United States has been active since the date of our last circular, and in addition to the 298,000 with-drawn from the Bank of England, a considerable amount of foreign coin from the Continent has been purchased for New York. Only 15,000 has been sent in to the Bank. The Para, from the West Indies, brought 8,000 10,000 was shipped to Bombay per Peninsular and Oriental steamer Mirzapore, leaving Southampton yesterday.

SILVER. - The supply of silver has been limited, but the demand, although by no means active, has been sufficient to raise the price fractionally—our quotation of this day is 52¹/₅d per oz standard—at this rate the small amount of bars (13,500*l*) by the West India steamer Para has been sold. About 27,000*l* has ar-rived from New York. 35,000*l* was shipped to Bombay, and 2,150*l* to Alexandria, per Peninsular and Oriental steamer Mirzapore.

Mexican dollars have advanced to 511d per oz, at this price the dollars for sale per Royal mail steamer Para were disposed of. This vessel brought about 65,000*l*. The shipments per Peninsular and Oriental steamer Mirzapore comprise-33,100*l* to Penang, 20,000*l* to Singapore, 32,500*l* to Hong Kong, 65,400*l* to Shanghai.

20,000l to Singapore, 32,500l to Hong Kong, 65,400l to Shanghai. Exchange on India for banks drafts at 60 days' sight is 1s 7¹/₂d per rupee. Tenders were received yesterday at the Bank of England for 45 lakhs of rupees of India Council Bills, the allot-ments were—To Calcutta, 33,11,000 rs, average rate, 1s 7-938d; Bombay, 11,89,000 rs, average rate, 1s 7-937d. Applications on both presidencies at 1s 7-1³/₂d per rupee, receive 99 per cent.; above that price in full. 45 lakhs of rupees of these bills are advertised for 6th proximo. The latest quotations of exchange from the East for Bank bills at 4 months' sight are, from Bombay and Calcutta, 1s 8¹/₂d per rupee; from Hong Kong, 3s 8¹/₂d per dollar; and from Shanghai 5s 1¹/₂d per tael. The 4¹/₂ per cent. rupee paper is 91¹/₂ to 91¹/₂d, the 4 per cent. 84³/₄ to 85. Quotations for Bullion.—Gold—Bar gold, fine, 77s 9¹/₂d to 77s 9¹/₂d

Quotations for Bullion.—Gold—Bar gold, fine, 77s 91d to 77s 91d per oz standard; bar gold, containing 20 dwts. silver, 77s 101d per oz standard; Spanish doubloons, 74s to 75s per oz; South American doubloons, 73s 9d per oz.

Silver.--Bar silver, fine, 52¹/₂d per oz standard; Bar silver, con-taining 5 grains gold, 52¹/₂d per oz standard; Cake silver, 56¹/₂d per oz; Mexican dollars, 51¹/₂d per oz: Quicksilver, 6*l* 10s; discount, 3 per cent.

The exchanges were yesterday :-

French short exchange f $25.36\frac{1}{2}$ or $6\frac{1}{2}$ per mille for us. German short exchange m20.47 or $2\frac{1}{2}$ per mille for us. New York exchange at 60 days is } \$4.801 At 3 % interest, short \$4.83 or 71 per mille against us.

NOTICES AND REPORTS.

STOCKS.

Venezuela Debt.—The Council of Foreign Bondholders have received advices from Messrs Boulton, of Caracas, remitting 7,018l in bills on London, being the third monthly instalment due in March, 1881.

RAILWAY COMPANIES.

Atlantic, Mississippi, and Ohio.—The purchasing committee when receiving a deputation of members of the Stock Exchange interested in the certificates, stated that they were waiting to learn whether the sale of the railroad would be confirmed by the court at its next sitting, commencing on April 4, and that as soon as such information was received and enforcement dots obtained a as such information was received and sufficient data obtained, a report would be issued to all certificate holders. It appeared further that the purchasing committee had bid up to the full amount that their resources permitted, and that they had been outbid by other parties.

Bahia and San Francisco.—The receipts for the half-year were 89,659l, while the expenditure was 29,373l, leaving a balance of 60,258l, out of which it is proposed to pay a dividend at the rate of 63 per cent. per annum, carrying 1,785l to working capital. Carrisal.—For the half-year ended Dec. 31 there is a net balance of about \$82,800, from which the directors recommend a dividend at the rate of \$2,800.

at the rate of 10 per cent. per annum, carrying forward \$7,800. Cequimbo.—After deducting \$44,505 for repair of the line, there is a balance of \$85,954 for the half-year. The directors recommend a dividend at the rate of 5 per cent. per annum, and carry forward \$17,262.

Dunaburg and Witepsk.—The directors have declared a half-yearly dividend of 10s per share on the registered shares. Coupon No. 24 of the shares to bearer is also payable on April 5. Ottoman (Smyrna to Aidin).—For the half-year ended Dec. 31 the revenue was 47,451*l*, as compared with 59,067*l* in the corre-sponding period of 1879, the falling off being caused by the failure of the fig eron: while the expenditure was 31 182*l* against 33,758*l*. of the fig crop; while the expenditure was 31,182*l*, against 33,758*l*, and the net profit was 16,268*l*, against 25,309*l*. With reference to the extension from Aidin to Kuyujak, the opening of the line for traffic may be anticipated next October. In the interval which has elapsed since the close of the half-year now dealt with, the traffic earnings have largely improved.

Recife and San Francisco (Pernambuco).—The receipts in the half-year ended Dec. 31 were 55,5981, against 46,8041 in the corresponding half of 1879, while the expenditure was 25,8021, against 26,2541. The sum available is 34,1121, out of which the directors declare a dividend at the state of the sum available is 34,1121. dividend at the rate of 51 per cent. per annum, carrying forward 1,1127.

Tongoy.—The balance for the half-year is \$16,533, which, added to \$77,740 brought forward, makes a total of \$94,273, less amount spent on .:pairs, \$48,273; leaving a disposable sum of \$46,000. BANKS.

Bank of South Australia.—For the half-year ended December the profit, after writing off 3,000l from bank premises account, is stated at 43,540l, out of which a dividend is proposed at the rate of 10 per cent. per annum, leaving 3,540l. Chartered Bank of India, Australia, and China.-At the forth-

coming meeting the directors will recommend a dividend of 4 per cent., free of income-tax, for the second half of 1880, making 7 per cent. for the whole year, and that 10,000l be added to reserve fund, raising it to 200,000l.

Oriental Bank Corporation .- The directors announce a dividend for the half-year at the rate of 4 per cent. per annum, carrying forward 17,4001.

West of England and South Wales District Bank .- The official liquidators have issued statements showing that the whole of the three millions and a quarter of liabilities, save about 54,0001, have been paid, and the assets to meet this are estimated at 76,0001. This shows a profit for return to the shareholders; but one of the largest assets may possibly result in a Chancery suit.

ASSURANCE COMPANIES.

Eagle Insurance.—For 1880 the gross sum assured was 423,6331. Including bonuses, the claims amounted to 299,3231, against 334,1311 in the previous year. The rate of interest realised was 41 8a 6d per cent., and expenses, exclusive of commission and medical fees, 16,7991. The total income was 367,7631, and the dis-bursements 359,3501. The assets at the close of the year, includ-ing the paid-up capital, were 3,051,9542. ing the paid-up capital, were 3,051,954%.

Law Reversionary Interest Society.-A dividend has been de clared at the rate of 6 per cent. per annum.

MISCELLANEOUS COMPANIES.

Anglo-Argentine Tramways.—The receipts for 1880 were 57,2301, and the expenditure (including 2,2051 loss on exchange) 44,4871. An interim dividend of 2s per share was paid in October last, and it is now proposed to pay a further dividend of 2s per share, free of income-tax, to place 2,0001 to suspense, and to carry forward 5721 5781.

British and American Mortgage .- A dividend at the rate of 6 per cent. per annum has been declared.

Cagliari Gas and Water.-The receipts for the past year were 19,6231, and the expenditure 9,2521, leaving a net revenue of 19,370%. The amount available for dividend, including the balance brought forward, was 12,034%, out of which an interim dividend at the rate of 5 per cent. per annum has been paid, ab sorbing 3,6411: and in addition a dividend at the rate of 8 per cent. per annum has been declared for the half-year ended 31st December, making for the year 61 per cent., leaving 2,549/.

Canada Company.—The gross receipts in 1890 were 61,3742, against 58,2922 in 1879. The rent received in 1879 was larger, and particularly the timber receipts, the contrast being 23,1002 in 1879, against 20,8672 in 1880; but the proceeds of land sold and con-versions, &c., had been 43,7482 in 1880, against 38,6802 in 1879.

Direct Photo-Litho and Metallo-Gravo Printing, Limited.-Credi-tors must send in their claims by 25th April to Mr T. M. Foster, of South Norwood, the liquidator.

South Norwood, the liquidator. Eastern Extension Telegraph.—For the half-year ended December 31 the gross receipts, including Government subsidies, amounted to 193,435l, against 165,930l for the corresponding period, while the expenses were 57,592l, against 57,451l, leaving 135,843l. Deduct-ing debenture interest, sinking fund, &c., the net profit is 93,493l, which, with 35,610l brought forward, makes 129,103l. A dividend of 14 per cent., with a bonus of 1s per share, is recommended, making 6 per cent. for the year, and 69,178l is carried to reserve, which thus amounts to 217,268l. English Yeast. Limited.—Mr Fredk, B. Smart has been appointed

English Yeast, Limited .- Mr Fredk. B. Smart has been appointed official liquidator.

General Firewood, Limited.-Creditors must send in their claims by 27th April to Mr G. A. Cope, of 8 Old Jewry, the official liquidator.

New Zealand Agricultural .- A final dividend of 2s 3d per share has been declared, making a total for the past fourteen months of 7 per cent. The accounts include two extra months, in order to enable the balance sheet for the future to deal with the twelve

enable the balance sheet for the future to deal with the twelve months ending the 30th September in the colony, and the twelve months ending the 31st December in London. *Revenue Mineral, Limited.*—The Master of the Rolls has appointed Mr Hart official liquidator. *Rio de Janeiro Gas.*—For the past year there is a balance of 100,6961, out of which an interim dividend at the rate of 10 per cent. per annum has been paid, 7,000l carried to the Contingency Fund, and 15,000l to the Amortisation Fund. A further dividend at the rate of 10 per cent. is recommended, and 3,696l is carried forward.

Sanderson and Co., Limited.-Creditors must send in their claims by 30th April to Mr T. G. Sharp, of Huddersfield, the official

by sound April to find it. G. Campp, definition of the sound of the

NEW COMPANIES AND CAPITAL.

NEW COMPANIES AND CAPITAL. Atlantic Express Steam Navigation, Limited.—Capital 2,500,000l, of which 1,700,000l is to be first issued in 20l shares. The company has been formed to establish a line of "express" steamers between Milford Haven and New York, by which it is anticipated that the journey from London and the Continent will be shortened by two days. It is intended to carry first-class passengers only in addi-tion to the mails, and light and perishable cargoes, and the steamers are to be built specially for speed and will not be heavily loaded.

Belgravia Dairy, Limited.—Capital 100,000%, in 18 shares. It is intended to supply dairy produce, and to purchase and amalgamate existing dairies in Belgravia and the West end.

THE ECONOMIST.

[April 2, 1881.

Bill as Iron Ore, Limited-5 per Cent. Debentures.-This company is issuing debentures to the amount of 100,000l at the price of 97 per cent. They are redeemable at par in about eight years by half-yearly drawings.

Danish Freehold Land Reclamation, Limited, 6 per Cent. Guaran-teed B Shares.—Applications are invited for 125,000l in 10l shares, interest on which is guaranteed by the contractor until 2,500 acres are reclaimed. The company has been formed under concessions from the Danish Government. The shares will be repaid in full within 10 years, and will be, in addition, entitled to a pro rata division of profits estimated at 173,500l on the land being reclaimed and sold. and sold.

Fijian Government 41 per Cent. Loan.—The Crown Agerts for the Colonies invite tenders till April 7 for a loan for 150,0002 required for public works, coolie immigration, and to pay off some existing liabilities. The debentures will be of 1002 each, will be redeemable by means of a 1 per cent. cumulative sinking fund, and will not be issued below 98. will not be issued below 98.

Gold Mining Trust, Limited.—Capital 250,000l, in 1l shares, of which 100,000 are to be first issued. It is intended to carry out for gold mining shares the "trust" principle applied to various other classes of securities.

Great Polgooth United Tin Mines, Limited.-Capital 100,0001, in shares. The undertaking is formed to work the Great Polgooth, 11 shares. Tregontrees, and Mulvra mining grants, embracing 1,000 acres. The purchase money is 63,000l, payable in shares or cash at the option of the company, and the vendor is to pay 7¹/₂ per cent. on the capital for two years.

Imperial London Biscuit, Limited. - Capital, 100,0001 in 51 shares. It is proposed to undertake the manufacture of biscuits, and it is pointed out that this business is at present almost monopolised by two leading firms.

Mersey Salt and Brine, Limited .- Subscriptions are invited for 20,000 shares of 10l each, part of a total capital of 250,000l. The company is formed to raise brine on the estate of Mr Smith-Barry The Marbury, Cheshire, and to convey it in iron pipes to Runcorn for manufacture.

National Land Investment, Limited. - Capital 1,000,000l, of which 100,000l in 10l shares is now offered. It is intended to deal in landed and house property both in London and the provinces.

Nottingham Corporation 3 per Cent. Stock.—Tenders will be received at the Bank of England until 7th inst. for 1,000,000l stock at a minimum price of 85 per cent. The loan is required to discharge indebtedness for sewage works and town improvements and gas and water undertakings, and is chargeable on the borough fund and general rate, the real estate of the Corporation, &c. The stock will be irredeemable, except by purchase.

Taff Vale Railway-6 per Cent. Preference.- The directors have made a last call of 11 10s per share on the 6 per cent. preference shares, payable 2nd May.

Tasmanian Government 4 per Cent. Debentures .- The Bank of New South Wales and the Consolidated Bank invite subscriptions for a loan of 300,000*l*, in debentures of 1.000*!*, 500*l* and 100*l* each, which will be allotted to the highest bidders above a minimum of 971 per cent. The money is required for public works.

West of England Manganese Mining, Limited .- Capital 20,0001, in 11 shares. It is proposed to purchase and work a property in Devonshire.

Wood Pavement Construction and Maintenance, Limited .- Proposed capital, 100,000l in ordinary and 7 per cent. preference shares, the present issue to consist of 50,000l in preference shares of 1l each. It is intended to purchase for 7,000l in cash and 15,000l in shares Messrs Lloyd and Co.'s English patent, and business as wood-paving contractors.

THE COTTON TRADE.

LIVERPOOL .- MARCH 31.

Market dull and depressed throughout the week, with a limited business, and quotations are further reduced. For Sea Island but business, and quotations are further reduced. For Sea Island but few general inquiries; nevertheless an increased business has been effected by the acceptance of easier rates. Quotations are generally reduced $\frac{1}{4}$ d per lb. American again in small demand, and very freely offered, resulting in a gradual decline, amounting to $\frac{1}{4}$ d per lb in the medium and $\frac{1}{40}$ d to $\frac{1}{4}$ d per lb in the lower grades. Middling fair unchanged. For Brazilian the demand continues very limited, and, with an increased desire to sell, quotations show a decline of $\frac{1}{4}$ d per lb. Egyptian in moderate request, and quotations are reduced $\frac{1}{4}$ d per lb. West Indian and African neglected, and quotations reduced $\frac{1}{4}$ d per lb. Peruvian continues in limited demand, and prices are $\frac{1}{40}$ d to $\frac{1}{4}$ d per lb lower. For East Indian the limited demand has been almost entirely for the higher grades, and quotations, with the exception entirely for the higher grades, and quotations, with the exception of good broach, which is unchanged, are generally $\frac{1}{16}$ d to $\frac{1}{8}$ d per lb lower.

"Futures."-The market dull and inanimate all the week. The "Futures. — The market duri and manimate art the week. The closing rates show a decline of $\frac{1}{16}d$ to $\frac{3}{2}d$ per lb, the weakness being chiefly in the near months. The latest quotations are— Delivery: American, any port, L.M.C., April-May, $5\frac{3}{3}\frac{1}{2}d$; May-June, $6\frac{1}{16}d$; June-July, $6\frac{1}{3}d$; July-Aug., $6\frac{1}{16}d$; Aug.-Sept., $6\frac{1}{4}d$; Sept.-Oct., $6\frac{3}{3}\frac{1}{2}d$; Nov.-Dec., $5\frac{3}{4}\frac{3}{2}d$ per lb.

The sales of the week amount to 45,620 bales, of which 2,000 are on speculation, and 3,440 declared for export; the forwarded is 17,170 bales, of which 15,670 are American, 1,000 Brazil, 150 Egyptian, and 350 bales Surat, which make the takings of the trade 57,350 bales.

1st April.—The sales to-day will probably amount to about 10,000 bales; the market without change.

belief is general that values may descend still lower. Yarns have been little sought after, and to effect sales a decided concession has had to be made. German buyers act very cautiously, and in water-twist for china spinners complain of quotations being highly

unremunerative. In cloth, shirtings meet with better support than other goods. Other makes have been slow of sale, and makers experience a difficulty in securing fresh orders. The market to-day has continued quiet, with prices showing a tendency to greater ease in most quarters.

There is no alteration in the English wool trade. There is still wool selling where very low prices are taken, but there is no speculation in the London market.

The following figures show the conclusion of the first series of London Colonial wool sales, and the proportions taken up by home and foreign buyers—the former 424 per cent., and the latter 571 per cent. of the total sold.

112,030 150,190 .

been offered them for cash, but these irregularities are exceptional, and most transactions have been at last week's rates. Skin wools are especially firm. In mohair there is no further demand from are especially firm. In mohair there is no further demand from users, but a little speculative feeling exists, and prices are firmly maintained with a rather upward tendency. The export Yarn trade is not quite so restricted as it has lately been, but, the demand is still far from brisk. For Russia, in anticipation of the opening of the ports, there is a little more inquiry for colours and other tube yarns. The offers for Leipsic made and refused a week ago are repeated, but the limits are not raised, and it is doubtful whether much business will result. There is a little doing in two-folds also, and spinners generally are able to maintain their quota-tions. Piece manufacturers are still rather better engaged on home trade orders, but the demand for shipping is exceedingly small, and merchants complain that their returns are far below an average for the time of year.

IRON AND COAL TRADES.

In New York the demand for Scotch pig iron continues very moderate at \$23 for Garsherrie No. 1, \$244 for Coltness, and \$22 for Eglinton. Steel rails, however, are in demand at \$63. In the Glasgow market there has been a somewhat decided revival within the past few days, and prices are fully Is per ton higher, at 49s to 49s 6d.

Cleveland last week shipped as much as 28,000 tons of pig iron

THE ECONOMIST.

from the Tees, the main clearances being for Scotland, France, from the Tees, the main clearances being for Scotland, France, Belgium, and South Wales; and in view of the early opening of the Baltic quotations are firmer to the extent of 6d or 9d a ton. But they are still low and offer little inducement to producers, who in most cases can make little profit. For present delivery sellers have been at 38s 3d and buyers 3d per ton less, and about 38s 6d to 38s 9d for delivery over April and May. There will be a smaller addition to the stocks this month than was expected. The smaller addition to the stocks this month than was expected. The manufactured iron trade is very dull, and one or two works in the district are likely to be closed. There is very little work offering, and prices are low. Platemakers now take less money all round, and some firms getting short of orders have accepted very low rates; 6l 2s 6d to 6l 5s seems to be about the figure. Bars are 5l 5s and angles 5l 7s 6d, less the usual commission. Puddled bars 3l 7s 6d net. The foundries are also rather slack. Reports from the shipbuilding yards are still fairly encouraging. The coal and coke trades keep quiet. Coal is quiet, and manufacturing fuel lower in price. lower in price.

There is more steadiness in quotations at Barrow-in-Furness, where steel is in fair demand on foreign account, and Bessemer pig and forge iron sell at from 60s to 64s per ton.

In the Staffordshire iron districts business is a little brisker, and the tone is better, angles, bars, girders, &c., being inquired for. Coal is fairly steady.

From South Wales, it is reported that the inquiry for the leading finished qualities of iron and steel is well sustained, more particu-larly in regard to steel rails. The tin-plate trade is somewhat better, although it cannot be said that there is an advance in Better, and here a supervision are well should for prices. Both steam and house coal proprietors are well placed for orders, and the clearances during the week have been large. Welsh steam coal is finding its way into foreign markets where the coals of other districts were formerly exclusively used.

THE CORN TRADE.

MARK LANE, FRIDAY EVENING.

Spring sowing has made good progress during the week, the weather, though cold, having been all that could well be desired for field work; and over a wide area the sowing has been com-pleted very favourably. The reports of the growing crops are also very generally encouraging, and agricultural prospects are so far improving. The general aspect of the trade has not very much altered, a want of activity still being experienced in most depart-ments. Nor is this confined to the United Kingdom. From A merica and the Continent similar accounts are received. Wheat prices have been rather better supported in this country than prices have been rather better supported in this country than abroad. New York quotations have for spot wheat declined two abroad. New York quotations have for spot wheat declined two cents on the week, and on the Continent they are very generally easier, whilst with few exceptions the markets of the United Kingdom have been firm, and in some in-stance 1s per quarter dearer. Farmers' deliveries have slightly fallen off, but imports from abroad slightly increase. Last week's fresh supplies, whilst consequently fairly liberal, were not excessive, having amounted (after deducting exports) to above not excessive, having amounted (after deducting exports) to above 413,000 quarters. The quantity of wheat on passage has increased about 130,000 quarters, but flour has slightly decreased, and the aggregate, which amounts to rather over 2½ million quarters, exceeds that of last year at this time by about 287,000 quarters. The American visible supply, however, shows a deficiency of some 450,000 quarters. Statistically, therefore, the position is not weaker, and apparently explains the firmness of holders; on the other hand there is no indication of scarrity which may could weaker, and apparently explains the firmless of holders; on the other hand, there is no indication of scarcity, which may equally account for the absence of eagerness on the part of buyers. At Mark lane receipts of both home grain and foreign have been moderate. Whilst demand on the spot remains dull, sales are not pressed, and quotations can hardly be altered. Coast cargoes, from scarcity have realized rather more. In forward nositions the from scarcity, have realized rather more. In forward positions the fluctuations have been slight. American Red Winter, for ship-ment this month, is quoted at 46s 3d, which shows very little change. Flour remains dull, and where any alteration occurs, buyers for the most part have the advantage. At New York, prices have rather given way; maize being scarce on the spot, was upheld at late value, and off coast is dearer. New York quotations are a cent lower, and the quantity on passage has slightly increased, but for American mixed in forward positions rates are fairly firm; April-May at 25s 3d, and May-June at 24s 3d. Barley is quiet on the spot, but is not lower in any posi-tion. Danubian, March-April shipment, by steamer direct, is unted 22s 0d to 22s. The curve time to be a similar to the spot. quoted 22s 9d to 23s. The quantity on passage is reduced. Beans and Peas have not undergone any appreciable change. Oats have been firm, notwithstanding that the Sound is now open. Three or four cargoes have arrived from Libau, but coming on a very bare market, have been steadily held. To-day the common qualities sold at 20s 9d, which is rather easier, but the better grades were held at 21s to 21s 6d, being previous value. Of Swedish there are none offering on the spot, and old St Petersburg Oats have realised 3d advance. Agricultural seeds meet a fair demand. Arrivals are very moderate, and stocks getting into narrow compass. Prices show no material alteration.

COLONIAL AND FOREIGN PRODUCE MARKETS.

FOR REPORT OF THIS DAT'S MARKET SEE "POSTSCRIPT."

MINCING LANE, FRIDAY.

[April 2, 1881.

SUGAR.—Several floating cargoes arrived off the coast have sold chiefly for Liverpool and the Clyde. This market remains without animation, but there has been some speculative demand for cane animation, but there has been some speculative demand for cane jaggery to arrive, spring and summer shipment. Sugar on the spot is inactive. With the very small stock of refining West India prices remain firm. Transactions in three days amounted to 559 casks and about 2,000 barrels and bags, chiefly in public sale. Crystalised Demerara, 27s to 29s 6d; brown and greyish refining, 18s to 21s per cwt. The estimates of the Cuba crop are further reduced. Austrian beet firmer and less freely offered. The refined markets are steady at last week's rates to a slight ad-vance. Deliveries in the chief ports of the United Kingdom ex-ceed those of last year by about 10,000 tons, and the stock is moderate in proportion with the extended consumption. Informs and DELIVERTES of SUGAE in LONDON to March 26, with STOCKS on hand

14/6 15/6 25/0 29/6

Jaggery.—About 1,600 tons cane have sold to arrive at 15s 3d to 5s 44d. 200 tons good Palmyra on the spot at 14s 6d. Peruvian.—876 bags grainy by auction were bought in at 25s 6d 158 44d.

to 27s 6d.

Egyptian.-300 bags syrups sold at 19s. Manila.-200 tons superior at 17s 6d, and 100 tons Taal at 14s 11d, on the spot.

Floating Cargoes.—The business in this market includes one of 6,800 bags Bahia at 21s for the United Kingdom, and one of 5,000

bags Rio Grande at 198 9d per cwt. *Refined.*—A large business has been done in the Clyde, and quo-tationsrather higher, but are cheap in comparison with prices here. Sales in French loaves for this market include Le Baudy's at 28s per cwt, f.o.b.

Beet Sugar.—Austrian has sold at rather higher rates as quoted. RUM.—Sales of West India have been limited, including Demeara, at 2s to 2s 2d per proof gallon, according to package, and some

Jamaica on previous terms. Cocoa.—The market has been largely supplied with colonial from recent imports, and prices have further receded 1s to 3s. On Tuesday, 2,789 bags Trinidad partly found buyers at 61s to 73s 6d for ordinary to fair, and 75s to 86s 6d for good to fine. 2,977 bags Grenada two thirds sold at 2s to 3s decline; low and ordinary, 51s to 55s; fair to good, 56s to 60s; and the superior qualities at 60s 6d to 67s. 354 bags other West India were bought in, excepting a few lots Dominica, which sold at 50s to 50s 6d per excepting a few lots Dominica, which sold at Jos to Jos of per cwt. Since the sales a few parcels have been disposed of, and some business done in Guayaquil. 970 bags Foreign bought in, excepting a few Surinam, which realized 60s. 72 bags Ceylon sold at 100s to 100s 6d per cwt. for fine. During the last two days a good business has been done in West India descriptions. END

OTHER DEVSALTERY GOODS .- At the public sales 214 cr OTHER DRYSALTERY GOODS.—At the public sales 214 cases China Galls withdrawn at 68s, and 100 cases Japan at 64s. Sales of Gambier include spring shipment at 18s 3d, and a few parcels on the spot at 17s 9d to 17s 10¹/₂d. The sound part of 1,600 packages by auction taken in. Of 50 bales Bengal Safflower a few bales AA sold at 5*l* 5s. 896 boxes Cutch part sold at 31s per cwt. DRUGS.—Balsam capivi and balsam Peru still very scarce. Bark—South American and East Indian cinchona in last Tues-day's public sale large quantities realised, and prices only, in

day's public sale large quantities realised, and prices only, in some instances, a triffe easier. Camphor very quiet. Cardamoms rather firmer. Castor oil cheaper. Musk and rhubarb steady. Opium neglected. Oil of cassia and oil of linseed quiet, but firmly held.

SHELLAC .- 537 chests by auction partly found buyers; also a

few parcels privately at quotations, but the market is now rather quiet. 334 cases Sticklac out, including Siam at 98s to 105s per cwt.

INDIA RUBBER is without further alteration.

INDIA RUEBEE is without further alteration. METALS.—The only favourable change to notice in these markets has been an increased demand for pig iron, prices at Glasgow having recovered about 2s from the most depressed point of last week. Yesterday some speculative business caused an advance to 498 6d cash. Accounts from the Cleveland district are better, but finished iron remains without improvement. The stock of the former exceeds that of 1880 by nearly 97,000 tons. Spelter has been dull. Sales of lead at easier rates in some cases. Large imports of tin have increased the stock at this port to 8,670 tons. At present low rates, there is more inquiry, and a good tons. At present low rates, there is more inquiry, and a good business done yesterday at 881 5s to 887 10s cash and fourteen days. The N T Company sale of Banca tin this week went at equal to 887 10s per ton in Holland. Chili copper rather firmer in price, but no change in Australian or English. Quicksilver can be bought at some further decline.

MANILA HEMP.—Some few contracts have been made for arrival, at a further advance of 5s to 10s, including spring ship-ment at 37l 15s to 38l. Business done on the spot at 36l 10s to 37l per ton.

JUTE.—The total sales this week do not exceed 4,000 bales, in-cluding D diamond off the coast at 191 5s c f and i. Market quiet, and also for jute fabrics in Dundee.

LINSEED.—As the supply to arrive from Calcutta is still large, prices tend downwards. Business at 48s ex ship or near at hand. New seed, spring and summer shipments, 48s 6d to 49s per quarter. There are not any Azov cargoes offered for spring ship-ment. Bombay nominal at the quotation.

SPIRITS TURPENTINE. - Rather a heavy decline has been accepted, viz., American on the spot, 30s to 30s 3d. Yesterday prices slightly recovered. This day's quotations are as follows : on the spot, 30s 9d to 31s; last six months delivery, 26s per cwt.

PETROLEUM OILS.—There is now a moderate demand at current low quotations. On the spot, 63d to 68d; last four months, 74d to 73d per gallon. The statistics do not show any further change. Deliveries continue large and the stock is 81,500 barrels against 154,800 barrels in 1880.

154,800 barrels in 1880. OILS.—Ouotations of fish oils, including sperm, continue almost nominal. The seal fishery has been very successful this season. Olive dull at 37l to 40l per tun. Linseed oil is lower and the market dull. On the spot, 25l 5s to 25l 7s 6d, according to package; forward, 25l 10s to 25l 12s 6d; last four months, 25l 10s. English brown rape slow, and quotations without material change. Ceylon cocoa-nut supports last week's advance, but there has not hear much business done. Balm insection

been much business done. Palm inactive. TALLOW.—Since last Friday operations have been limited in extent, and the public sales this day will fix quotations for the week. Home tallow is in rather better supply. Owing to the small quantity of Petersburg here, the price is quoted 30s to

39s 6d per cwt. TOBACCO.—There has been but little business done in American tobacco during the past week; the transactions have comprised small sales made to the home trade at current prices. During the last few days there has been rather more inquiry for substitutes. In exportation there has been little demand.

POSTSCRIPT. FRIDAY EVENING.

SUGAR .- The public sales consisted chiefly of crystalized West India, which only part sold on previous terms. Business in West India, 683 casks, making 1,251 casks for the week, besides about 5,000 smaller packages. 964 bags Penang were bought in, also 500 bags Manila. A floating cargo of 6,960 bags Bahia sold at 21s for the United Kingdom.

COFFEE.—The sales went flatly. 510 casks 227 barrels and bags plantation Ceylon at previous rates, and part of 25 cases 640 bags East Indian. 350 bags Singapore and 468 bags Indian Manila withdrawn above the value. Of 227 packages Mocha a few sold plantation Ceyton at previous June and 468 bags Indian Manila East Indian. 350 bags Singapore and 468 bags Indian Manila withdrawn above the value. Of 227 packages Mocha a few sold on previous terms. 677 pockets of Madagascar sold from 58s to 69s 6d. 1,714 bags foreign were chiefly bought in. RICE.—A steamer cargo of Bassein sold at Ss 41d for the Con-tinent, and one of Moulmein per steamer at 8s 51d per cwt for the same

METALS.—No change in copper. Tin, 881 7s 6d cash. Scotch pig iron active, up to 49s 10¹/₂d, and subsequently at 49s. OILS.—224 casks Cochin cocca nut, "without reserve," sold by

auction at 271 10s to 281 15s.

ADDITIONAL NOTICES.

ADDITIONAL NOTICES. TEA.—The market still remains very dull, and sound common Congou is quoted as low as 6¹/₄d per lb. At the public auctions last Tuesday several hundred half-chests of Congou, ex steamer Radnorshire, from Shanghai, were sold for 4¹/₄d per lb. They were described in the catalogue as "choice new season's Moning," but are of so low a type, and so unclean, that it is thought the Custom House suthorities will not allow them to go into consumption in House authorities will not allow them to go into consumption in this country.-J. C. SILLAR AND Co.

this country.-J. C. SILLAE AND CO. DRY FRUIT.-A brisk business has been done in currants during the week at advanced rates. The return of stocks is looked for-ward to with interest. Valencia raisins have been selling freely at higher prices. In other fruits there has been next to nothing doing

SILK .- Market for raw silk is dull, but prices are still very firmly doing. held.

THE ECONOMIST.

[April 2, 1881.

LEATHER .- The trade for most descriptions of leather during

LEATHER.- The trade for most descriptions of leather during the week has been sluggish, and the transactions have been con-fined to the immediate wants of buyers. The supplies of fresh leather, though not plentiful, have been generally equal to the demand. English butts of light substance and best quality, com-mon English and foreign bellies, shoulders, light dressing hides, and light calf skins, continue in request. WINE.-Messrs J. R. Parkington and Co. notify that they havo accepted the agency of the Vine Growers' Company of Cognac. METALS.-Our market has been steady all the week as regards price, but business has been limited. Copper dealt in slowly at 611 to 612 2s 6d for g.o.b. Chili bars, and other descriptions as per list. Iron has risen about 1s 3d a ton in Scotch pig, whilst other kinds are unchanged. Tin has been more than usually steady at 881 2s 6d to 881 7s 6d cash, for fine foreign; the latter price is to-day's. Lead, spelter, and tin plates show no change. day's. Lead, spelter, and tin plates show no change.

METROPOLITAN CATTLE MARKET.

MONDAY, March 28.—The total imports of foreign stock into London last week amounted to 11,092 head. In the corresponding week of last year we received 3,874; in 1879, 13,421; in 1878, 10.376.

Without being animated, a healthier tone characterised the cattle trade, and prices had a tendency to harden. The best Scots and crosses made 5s 2d to 5s 4d per 8lb. Foreign beasts sold quietly at full prices for fine breeds. There was a quiet trade in sheep at about late rates. The best Downs and half-breds in the wool made 6s 10d to 7s, and ditto clipped, 6s to 6s 4d per 8lb. Lambs were steady, at 8s to 9s per 8lb.

NOTTINGHAM CORPORATION STOCK.

Interest £3 per cent. per annum, payable half-yearly at the Bank of England.

at the Bank of England. ISSUE OF £1,000,000 STOCK. (Part of the Proposed Issue of £2,000,000 Stock). Authorised by the Nottingham Corporation Loans Act, 1890 (43 and 44 Vict., ch. 208). Minimum Price of Issue, 285 per cent. First Dividend, being Six Months' Interest, payable Ist November, 1831. Trustees or other persons for the time being having power to invest any moneys in nominal Debentures or nominal Debenture Stock issued under the Local Loans Act, 1875, are authorised to invest in Stock issued under this Act.

The BANK of ENGLAND give notice that, by arrangement with the Corporation of Nottingham, under Section 13 of the Act 43 and 44 Vict., chap. 208, and in pursuance of resolutions of the Town Council, they are authorised to receive TENDERS for £1,000,000 Nottingham Corporation Stock, bearing interest at £3 per centum per annum, payable half-yearly at the Bank of England or any of the country branches.

The Stock will be irredeemable, but the Corpora-tion have, under their Act, to provide a Sinking-fund which, at the end of 60 years, shall be equal to the total amount of the Corporation Stock now proposed to be issued. The Corporation are empowered to invest such Sinking-fund in the purchase of the Stock now proposed to be issued.

The Books of the Stock will be kept at the Bank of England. Hold Core will be kept at the Bank of England. Holders of Stock will be kept at the Bank of England. Holders of Stock will be able to take out Stock Certificates to bearer, with Compons attached, transforable by delivery, at the same rate of charge as exists at present in the case of Govern-ment Stock. Dividend Warrants will be transmitted by post, if desired, and Transfors and Stock Certifi-cates to bearer will be free from stamp duty. The Stock will be chargeable upon the Borough and District Fund and the Borough and General District Rate, which latter is unlimited in amount, and also upon the Gas and Water undertakings of the Corporation, and the revenue of their real estates.

the Corporation, and the revenue of their rea-estates. The accounts of the Corporation show that the present assessable value of the whole Borough is £081,000, that it is steadily increasing year by year, and that the Gas and Water undertakings are ex-tremely profitable, with a regular and steady increase. The present value of the Corporation Estates is esti-mated at £500,000, and as nearly the whole of these estates consist of valuable building land, which is much in demand, the yearly growth in value of the estates is rapid. The population of the Borough of Nottingham at the present time is estimated at 176,000.

estates is rapid. The population of the Borough of Nottingham at the present time is estimated at 176,000. The Loan is required to discharge the present in-debtedness of the Corporation for works of Sewage and Town Improvements, and for the capital of their Gas and Water undertakings. Tenders may be for the whole or any part of the Stock, and must state what amount of money will be given for every £100 of the Stock. Tenders for other than even hundreds of Stock, er at a price including fractions of a shilling other than sizpence, will not be accepted. Tenders are to be delivered at the Chief Cashier's Office, Bank of England, before two o'clock on Thursday, the 7th April, 1831. Tenders at different prices must be on separate forms. The amount of Stock applied for must be written on the outside of the Tonder. A deposit of 5 par cent. on the amount of Stock tendered for must be paid at the same office at the time of the delivery of the Tender, and the deposit will be applied towards the first instalment. The dates at which the first instalment. The dates at which the first instalment. That as a the sequence of the deposit will be applied towards the first instalment. That as a which the first instalment. That as a which the first instalment. That as a which the first instalment. That she applied and accepted as, when added to the deposit, will leave £75 (sterling) to be paid for each £100 of Stock. On Thursday, the 9th June, 1831, £20 per cent. On Thursday, the 4th August, 1831, £20 per cent.

100 of Stock. On Thursday, the 9th June, 1881, £20 per cent. On Thursday, the 4th August, 1881, £20 per cent. On Thursday, the 13th October, 1881, £20 per cent On Thursday, the 13th December, 1881, £15 per ent.

On Thursday, the 13th December, 1831, £15 per cent. The instalments may be paid in full on or after the 21st April, under discount at the rate of £3 per cent. per aunum. In case of default in the payment of any instalment at its proper date the deposit and instal-ments previously paid will be liable to forfeiture. Interest will be payable 1st May and 1st November, in each year, and the first half-year's interest, calcu-lated on the total amount of the Stock, will be pay-able on the 1st November, 1881. Scrip Certificates to bearer, with a Coupon attached for the dividend payable 1st November, 1881, will be issued in exchange for the provisional receipts. The Stock will be inscribed in the Bank books on or after the 15th December, 1881, but Scrip paid-up in full in anticipation may be forthwith inscribed. In the event of the receipt of Tenders for a larger amount of Stock than that proposed to be issued at or above the minimum price, the Tenders at the low-nution. No Tender will be received unless upon the printed

est price accepted will be subject to a printed nution. No Tender will be received unless upon the printed Form, which can be obtained at the Chief Cashier's Office, Bank of England, and of Messra Mullens, Marshall, and Co., Stockbrokers, 4 Lombard street, London, E.C.; or at the Municipal Offices, Nottingham. Bank of England, London, March 30, 1831.

The debentures will be to bearer in sums of £100 each, issued under the company's seal, bearing compons payable half-yearly on the lat January and lat July, at Mesars Robarts, Lubbucks, and Co. 15 Lombard street, E.C.

431

The Company will set aside the sum of 415,000 per annum to provide for the interest upon and redemp-tion of the debentures, which will be drawn half. yearly in June and December, and paid all on the following 1st July and 1st January respectively, First drawing, December, 1881. Final drawing June, 1889.

The Company reserve to themselves the right of paying off the debentures at an earlier date. The price of issue to be paid as follows :--

25 per cent. on application ; 92 , 14th April.

607

97 At this price (97 per cent.), and allowing for re-demption at par by the operation of the sinking fand, the debentures return an investor nearly 6 per cent. Scrip certificates, bearing coupon for three menths' interest to June 30th, will be issued in exchange for bankers' receipts, and debentures with coupons attached will be subsequently issued. Prospectuses and forms of application may be obtained at the Company's Offices or of the Brokers, March 30th, 1881.

FIJIAN GOVERNMENT 41 PER CENT. LOAN. ElSC,000. Authorised by Ordinance No. 13 of 1880, for Public Works and Coolie Immigration, and for the pay-ment of Liabilities of the late so-called Govern-ment.

HER MAJESTY'S PRINCIPAL SECRETARY OF STATE FOR THE COLONIES having directed the Crown Agents for the Colonies to negotiate on behalf of the Government of Fiji the Loan autho-rised by the Ordinance above cited, they hereby invite Tenders for Debentures representing £150,000 sterling.

stering. The Loan is seenred on the general revenues and assets of the Government of the Colony, and will be raised on coupon-bearing debentures of £100 each, transferable by delivery, and bearing interest from 15th March, 1891, at the rate of 4) per cent. per annum, payable half-yearly at the Offices of the Crown Agents for the Colonies in London. The Principal will be repaid at the same place, by a cumulative sinking fund, into which the Govern-ment will pay a sum equal to 1 per cent. per annum on the total nominal amount of Debentures issued. The accumulations in this fund will be amplied, at

This Company has been formed for the purpose of establishing a line of "Express" Steamers between Milford Haven and New York, by which it is anticipated that the journey from London and the Continent will be shortened by two days.

The Company's steamers will be specially constructed for conveying first class passengers, the mails, and light and perishable cargo between London and New York, via Milford, within seven days, and this service will supply a want long felt by the travelling public of a quicker and more direct route, whereby the delays and dangers of the channel and river navigation elsewhere will be avoided.

A great commercial necessity also exists for rapid transit, by reason of the extensive and constantly growing trade in fresh provisions, the development of which will be materially increased by the facilities which will be offered by this Company for bringing into closer contact the greatest producing with the greatest consuming centres of the world.

This undertaking being of great importance to the Great Western Railway Com-pany, as tending materially to increase the amount of American traffic carried over their system, they have agreed to make favourable arrangements with this Company, both as regards passengers and goods.

Milford Haven has special advantages for this particular service which are not possessed by any other port in the United Kingdom, owing to its geographical position, its accessibility at all states of the tide, and its proximity to the Sonth Wales steam coal fields. Its new docks, including a graving dock 700 feet long, now approaching completion, will afford accommodation sufficient for the largest steamers

The great saving in time, and the special advantages offered by this line, will be understood when it is explained that, apart altogether from the great speed of the proposed steamers, this route has the following advantages :

V

1. The distance from Milford to New York is about 170 miles shorter than that from Liverpool to New York, and steamers can enter Milford Haven at all states of the tide and at any hour, thus avoiding the detention and delays which not unfrequently occur on entering other ports.

2. The Steamers, uniform in size and internal arrangements, while built specially for speed, will combine safety with elegance and comfort in the highest degree, and being "Express" Boats, they will not be heavily loaded, but are intended to carry First Class Passengers only, the Mails, specie, light freight, and perishable produce. The dangers and discomfort incident to overcrowding will thus be avoided.

3. The Steamers of this Company will be timed to leave Milford at the same hour every week, whereas those leaving other ports are compelled to start at varying hours to suit the tide. Express trains, conveying passengers to and from the steamers at Milford, will be able to draw up on the Quay there alongside the steamers.

As regards shippers, the shortness of the voyage will, it is calculated, secure that class of freight for which enhanced rates are now being paid to the faster vessels of the existing lines. This applies particularly to fresh provisions, cheese, &c., which will be delivered in London in time for the early Monday Market every week, a new and important feature in the trade, which consignees will readily appreciate.

As regards shareholders, this undertaking appears from the above considerations to offer every prospect of a desirable investment, while the proximity of Milford to the South Wales steam coal fields, the comparative shortness of the voyage, and the arrangements made at Milford, and in contemplation at New York, for dock and wharf accomodation, must effect an important saving in the working expenses of this Company, as compared with other lines.

expenses of this Company, as compared with other lines. It is proposed to contract for building a fleet of five powerful steamers, to be specially constructed for this particular service, which, it is anticipated, can be commenced in fifteen months from the date of allotment of shares. These vessels will be built of steel on plans which have been very carefully considered; they will be provided with all the latest improvements calculated to insure rafety, and with machinery of such power as will, it is believed, ensure the performance of the voyage within the stated time. Each steamer will be capable of accommodating 400 first class passengers in unusually commodious and well-ventilated cabina. Each will possess a cargo capacity of 5,000 tons, and will be provided with refrigerating chambers constructed on the latest and most improved methods. The Milford Dacks Commany have agreed to provide guay space sufficient for

The Milford Docks Company have agreed to provide quay space sufficient for the steamers of the line on the Eastern or Milford side of the docks, over which rails are laid in connection with the Great Western Railway.

Fails are laid in connection with the Great western halfway. Having regard to the advantages which will be afforded by this line, the Directors believe that a strong preference will be shown to it, both as respects cargo and passengers. As to cargo, it may confidently be anticipated that there will be no difficulty in substantially filling the vessels on the honeward voyages. Assuming this to be so, and that the vessels carry only one-fourth of the full complement of passengers, it is estimated that the result would give a net return of upwards of 10 per cent. on the capital expended.

Arrangements have been made by which the firm of Mesers McGregor, Gov and Co., Managers of the "Glen" line of steamers to China, have undertaken bact as General Managers of this service, under the supervision of the Board of Directors.

The only contracts entered into on behalf of this Company are-(1) Agreement dated 17th Mareh, 1881, between the Right Honourable the Earl of Dunraven, on behalf of an intended Company proposed to be called the Atlantic-Express Steam Navigation Company, Limited, on the one part, and Messrs. McGeorge, Gow, and Co., of the other part, and (2) Agreement dated 17th March, 1881, between the Right Honourable the Earl of Dunraven, on behalf of the said intended Company of the one part, and James Bruce of the other part.

The Memorandum and Articles of Association, and copies of the abo tracts, can be seen at the Offices of the Solicitors to the Company, Hollams, Son, and Coward, Mincing-lane, E.C.

Applications must be made in the annexed form, accompanied by a depo £1 per share, which must be paid to the Bankers of the Company, Mesora Su Payne and Smiths, 1 Lombard street, E.C.

In the event of no allotment being made, the deposit will be retarned in full, without deduction.

Prospectuses and Forms of Application can be had from the Brokers, Mes Arthur Anderson and Co., 30 Throgmorton street, E.C., or of the Bankers, or the Offices of the Company, No. 1 East India avenue, E.C. London, 31st March, 1881.

PROSPECTUS.

This Company is formed for the purpose of raising brine from the great salt deposits on the estate of A. H. Smith-Barry, Esq., of Marbury, Cheshire, conveying it in iron pipes to the port of Runcorn, on the Mersey, and erecting there extensive works, capable of ultimately producing 200,000 tons of salt per annum, by which means it can be manufactured at a cost considerably less than at existing works in the salt districts, and also generally for the purposes specified in the memorandum of association. The arrangements will include the supply of brine in its natural state to the chemical manufacturers of Runcorn, and a subsequent extension to Widnes and St Helens is also contemplated. With these objects in view, the Company acquires the transfer of a very valuable agreement from Mr Smith-Barry for lease for a term of 99 years, at royalties under 2d per ton of salt—the rates ordinarily paid in the districts, enabling the brine to be conveyed from Northwich to Runcorn, a distance of 13 miles, have also been arranged, and an admirable site has been arranged for the works at the latter town, in close proximity

site has been arranged for the works at the latter town, in close proximity to the dock and basin of the Bridgewater Navigation, and including siding communication with the London and North Western Railway.

to the dock and basin of the Bridgewater Navigation, and including siding communication with the London and North Western Railway. By virtue of these leases and way-leaves the Company will possess special, if not absolutely exclusive, advantages for the supply of brine to the great consuming centres.
The salt trade, with the exception of coal and iron, is the most important mineral industry in the kingdom.
The Cheshire salt district yields four-fifths of the total supply, furnishing 1,000,000 tons per annum for export from Liverpool, and upwards of 400,000 to the chemical works of Widnes, and the neighbouring towns.
The existing salt works in the Cheshire district, though earrying on a prosperous trade, are subject to heavy charges in respect of dues, freights, &c., on salt shipped via the river Weaver to Runcorn and Liverpool, the rates charged to the trade being 28 6d and 38 6d per ton respectively ; the cost of common salt at Northwich being about 5s per ton. If destined for export from Runcorn, salt under the present system requires transhipment from the barges into seagoing vessels. These heavy charges will be avoided, and this Company will be in a position to command the bulk of the coasting and foreign trade from Runcorn, averaging at present 200,000 tons per annum, and also largely supply the Liverpool market. Coal or slack which is largely consumed in the manufacture of salt, is cheaper at Runcorn than at Northwich.
By acquiring the various concessions above detailed, this Company will effect a saving equivalent to 20 per cent. on all salt manufactured at the Runcora works; and this in addition to the saving in the cost of coal ; while the exceptionally favourable rates on which the royalties are based will enable the brine to be delivered at Runcorn at lower charges than are generally paid by the salt manufacturers at Northwich.
After the most careful calculations, including the cost of wear and tear, &c., it is anticipated that the profit on the m

on the capital subscribed.

on the capital subscribed. A further source of eventual profit is anticipated from the supply of brine in its natural state to the chemical manufacturers of Widnes, St Helens, and Runcorn, for utilisation in various branches of their trade. If satisfactory arrangements can be made with the authorities and manu-facturers, the Directors will be willing to supply Widnes with brine by means of lighters, as soon as possible after the completion of the line of pipes from Northwich to Runcorn. The salt works in the Northwich district, in consequence of the con-tinual extraction of brine, are subject to such occasional subsidences as occurred in December last, when six works were disabled. The works of the Company at Runcorn will not be subject to such contingency; they will be built upon solid ground nearly 13 miles distant from the salt districts.

will be built upon solid ground nearly 13 miles distant from the sait districts. Particular attention is called to the annexed report of J. F. Bateman, Esq., F.R.S., the Company's Engineer, in which the works for raising the

LICTUUS. brine and conveying it to Runcorn are described as of a very simple character. Mr Bateman estimates their cost exclusive of that of the evaporating works, at £106,000. Contracts have been entered into with Messrs Smith, Finlayson, and Co., of Westminster, for the execution of the general works, at £106,000. Contracts have been entered into with Messrs Smith, Finlayson, and Co., of Westminster, for the execution of Birmingham, for the machinery, at prices within the above estimate. The various agreements for leases and way-leaves have been granted to Mr Thomas Coglan Horsfall, but only as agent for Mr Godfrey Joachim Aman, who is the promoter of the Company, and who joins Mr Horsfall in the assignment of these agreements. The price agreed to be paid to Mr Aman for the transfer of these very valuable agreements is the sum of £27,500 in cash, together with 1250 fully paid-up shares in the Company of £10 each. Mr Aman will pay a sum of £10,000 to the trustees, in order to provide interest at the rate of 5 per cent. per annum on the paid-up capital of the Company during the period of construction up to the delivery of the brine at Runcorn. He also bears and will indemnify the Company against all expenses incidental to its formation, with the exception of the charges of its own solicitors, and a sum equivalent to 1½ per cent. on the amount of the present issue to pay for brokerage, &c.

THE ECONOMIST.

ONDON BANK OF MEXICO AND SOUTH AMERICA (Limited). Subscribed Capital, £500,000. Paid up, £250,000. DIRECTORS.

DIRECTORS. JOAQUIN DE MANCHA, Esq., Chairman. William MacAndrew, Esq., Deputy-Chairman. Francis John Johnston, Esq. William Anastasius Jones, Esq. Charles Alexander Thurburn, Esq.

LONDON OFFICES-144 Leadenhall street, E.C.

REPORT OF THE DIRECTORS

NEPOET OF THE DIBROTORS OF THE LONDON BANK OF MEXICO AND SOUTH AMEBICA (LIMITED). resented to the shareholders at the Ordinary General feeting, held at the Company's Offices, 144 Leadenhall troet, London, C.E., on Wedneeday, th: 30th March, out

Street, London, C.E., on Wednesday, the 30th March, 1981. The Directors beg to submit herewith to the share-holders the andited accounts made up to the 31st December, 1880. The statement of profit and loss account shows that, after providing for had and doubtful debts, the balance of net profit for the year amounts to £27,06:987d, including £9,316 08 81 brought forward from the last excent.

account. An interim dividend of 2s 6d per share—£6,250, having been paid in September last, \pounds 20,816 9s 7d re-main to be dealt with; and out of this sum the Dircc-tors recommend that a further divid.ud of 3s 6d per share be paid—£8,760, leaving £12,640 9s 7d to be car-ried forward.

this recommend that intrine $\pounds 12,\ell\ell\ell$ 95 7d to be car-ried forward. The two dividends, both free of income tax, make 6 per ceal, for the year on the paid-up capital. The great depreciation in the currency of Pera, con-sequent on the war, has been entirely provided for, without touching the amount at the credit of the "De-preciation of Capital Account," which now stands at $\pounds 10,600$, after valuing the capital at the branches at the rates of exchange current on S1st December last. The Directors have to express their great regret at the death of their esteemed colleague Mr Frederick Harrison, who had been suscitated with the Hank from its formation. The vacancy thus created has been filled by the appointment of Mr Francis H. Evans, of the firm of M sars McCulloch and Co. The Directors retiring by rotation are Measrs J. de Maancha and W. A. Jones, who, being eligible, offer themeelves for re-election. The Shareholders will have to appoint auditors and fix their reaumeration : Measra Owen Lewis and W. J. Marshall off r themselves for re-election. By order of the board

By order of the board WM. THOS. MORRISON, Manager.

HOLLOWAY'S OINTMENT AND FILLS. - Reliable Remedies. - In wounds, bruises, sprains, glandular swellings, enlarged veins, neuralgic pains, and rheumatism, the application of this soothing ointment to the affected parts not only gives the greatest ease, but likewise our is the com-plaint. The pills greatly assist in basishing the endency to rheumatism, neuralgia, cramps, and spasms, whilst the ointment cures the local ailment. The pills remove the constitutional disturbance and regulate impaired function of all the internal organs of the body. The cure is neither temporary nor superficial, but permanent and complete, and the disease rarely recurs, so perfectly has been the purifi-cation verformed by these searching yet harmless preparations.
