LOCAL QUESTIONS ARE CONSIDERED BY KIWANIS

Discuss Community Service, Christmas Carols and Annexation Project

The Glendale Kiwanis club discussed several matters of community interest yesterday noon at its weekly luncheon in the Broadway Inn.

Alexander Stewart of Oakland, Pacific coast representative of Community Service, spoke briefly upon the scope and purpose of Community Service.

"Most of the crime in this country is committed in the leisure hours," he asserted, quoting Otto Kahn, the international banker, as stating that he would rather have a piano in every home than a policeman on every corner.

Luncheon clubs are the real sounding-boards of community spirit, according to Mr. Stewart.

Harry Girard of 230 South Louise street outlined a plan for every member of the Kiwanis club to learn several simple Christmas carols and to participate in the Christmas tree celebration.

"We have an opportunity in this celebration," he remarked, "to put over something that probably will become an annual event."

Herman Nelson spoke with enthusiasm upon the Christmas tree celebration.

After considerable discussion, a request from the Glendale Exchange club asking the Kiwanis club to insist that the Glendale Chamber of Commerce go on (Continued on Page 12)

Col. Everington General Chairman Community Tree

Col. James W. Everington was appointed general chairman of Glendale's big community Christmas tree and celebration at a meeting of committees yesterday afternoon at the Chamber of Commerce.

Other appointments made at the meeting were Harry Girard, stage manager; Mrs. W. Q. Wildows, program; Normal C. Hayhurst, speaker and publicist; J. E. Benner, publicist; W. Ingelbue, finance; David Black, supplies; L. W. Chobe, decorations.

Aphasia Victim Is Located In Hospital

After an absence of six months, dating from June 11, when he left his wife and three children, the L. E. Bullock home at 517 West Park avenue, Charles B. Anthony has been located in a hospital in Acheson, Kan., suffering from a recurrent attack of aphasia.

Mrs. Anthony has not been able to find out how serious a mental condition her husband is in, but reports state that he has suffered an entire lapse of memory, is not able to recall any of the past and may not be able to travel.

However, Mrs. Anthony is making plans to have him taken to California where he will be placed in a hospital for treatment, which she hopes will restore his health and mind.

Missionary Social Union Has Meeting

The Missionary Social Union held its all-day session at the Christian church of Glendale, yesterday.

Election of officers then took place, the results of which are: Mrs. McConnell, president; Mrs. Sinclair, vice president; Mrs. Kimball, secretary; Mrs. Rogers, treasurer.

R. E. Olin Chosen As Class President

Fifty-five men of the Tri Mu class of the First Baptist church gathered at the dinner tables at the church last night and after the dinner hour enjoyed a program of speeches and music and participated in the election of officers.

WOMAN SHOTS SELF

LOS ANGELES, Dec. 9.—Mrs. Ruth Haner, young and attractive, is dying at the receiving hospital from the effects of a bullet in her brain, believed to have been fired with suicidal intent in her apartment in West Sixth street today.

NUMBER OF CITY HIGHWAYS UNDER IMPROVEMENT

Engineer Ben F. Dupuy, In Monthly Report, Tells of Work Under Way

Street work is being done in all parts of Glendale according to the following latest monthly report of City Engineer Ben F. Dupuy:

HEIRLOOMS PROVE UNIQUE FEATURE OF AFTERNOON

Days of Old Are Recalled by Exhibition at Home of Mrs. J. H. Braly

Heirlooms and other antiques and their interesting stories, as told by their owners, were the feature of the municipal building permit, said this morning that the sum of \$123,705 for the first week of December was good.

Glendale Stands Fifth In Southland's Building

Glendale ranks fifth in Southern California in the valuation of building permits issued during the month of November, according to a statistical report just issued.

Club Music Section In Holiday Program

The beauty of the Christmas story as revealed in traditional carols was enjoyed by Tuesday Afternoon Club members yesterday afternoon at the home of Mrs. Charles H. Meadows at 721 North Brand boulevard for the holiday program of the club's music section.

Give Special Events at Colorado School

Education Week was given special recognition at the meeting yesterday afternoon of the Parent-Teacher association at the Colorado street school.

Local Legion Squad to Meet Huntington

The American Legion basketball team will practice Monday night in the boys' gymnasium at Huntington high school.

Mrs. Flora Ripley Relief Corps Head

At the meeting of the Women's Relief corps yesterday afternoon at 2 o'clock, in the G. A. R. hall, two candidates were balloted upon and two initiated.

BUILDING PERMITS FOR YEAR NOW AT \$6,045,000

Sum of \$123,705 Is Total for First Week In Month; Homes Under Way

Over \$28,000 worth of building permits were issued yesterday at the city hall.

The year has \$6,045,000 to its credit so far. Permits issued yesterday comprised the following: Richard W. Phillip, 10 rooms and garage, 204 East Dryden street, \$ 6,000

Hold Fathers' Night at Cerritos School

The Parent-Teacher Association of the Cerritos avenue school held a "Fathers' Night" at the school house at 8 o'clock last night, with Mr. O. W. Esselman, president, assisting R. W. Biddlecom, chairman of the entertainment committee.

RAILROAD LABOR BOARD TO LIVE YEAR LONGER

WASHINGTON, Dec. 9.—The sentence of death has been passed on the railroad labor board, but it appeared certain today there will be a stay of execution for at least a year.

WOMAN SHOTS SELF

LOS ANGELES, Dec. 9.—Mrs. Ruth Haner, young and attractive, is dying at the receiving hospital from the effects of a bullet in her brain, believed to have been fired with suicidal intent in her apartment in West Sixth street today.

Today's World News in Brief

STEEL CORPORATION REPORT ON UNFILLED ORDERS

NEW YORK, Dec. 9.—The United States Steel corporation today reported unfilled orders on its books as of November 30 last of 6,840,242 tons. This compares with 6,902,287 tons on October 31 last, a decrease of 62,045 tons.

MOVIE STARS MAY NOT BE GIVEN NEW CONTRACTS

NEW YORK, Dec. 9.—Officials of the Famous Players-Lasky corporation today refused to comment on a report current here that a number of well known actors and actresses will not be given new contracts with the company at the expiration of the present year.

SAYS K. K. K. NOT INTIMIDATED BY THREATS

NEW YORK, Dec. 9.—"The Ku Klux Klan is not intimidated by the attitude of Mayor Hylan, nor will any activities which it may be carrying on in New York be curtailed as a result of my talk with Acting District Attorney Petora yesterday," declared Rev. Dr. Oscar Haywood, national lecturer for the Ku Klux Klan, today.

TRAERGER FAILS TO INTERVIEW 'THE MOUSE'

SAN QUENTIN, Dec. 9.—Sheriff William I. Traerger of Los Angeles arrived here today at 9:30, but left immediately after delivering a prisoner and without questioning Guido Spignola, alias "The Mouse" regarding his possible knowledge of circumstances surrounding the jail break of Clara Phillips.

AUTHOR OF 'SINS OF HOLLYWOOD' SURRENDERS

LOS ANGELES, Dec. 9.—Ed Roberts, former publisher of the movie magazine, It, surrendered to United States Marshal Sittel today to answer a secret federal grand jury indictment which named him as the writer of the "Sins of Hollywood," and charging him with violation of the interstate commerce law by sending forbidden literature to other states by express.

MAIN ISLAND OF JAPAN ROCKED BY EARTHQUAKE

TOKIO, Dec. 9.—The northern peninsula of the main island of Japan was rocked today by the second earthquake to be reported in the island empire in twenty-four hours.

STILL SEEKING CLEW IN CLARA PHILLIPS' ESCAPE

LOS ANGELES, Dec. 9.—The district attorney's office joined hands with the sheriff's office today in an exhaustive investigation of Clara Phillips' daring escape from the county jail, when Chief Deputy District Attorney Asa Keyes and Under Sheriff Eugene Biscailuz questioned several persons who are thought to have important information on her getaway.

NEW STORM IS DUE IN NORTHERN CALIFORNIA

SAN FRANCISCO, Dec. 9.—Another storm is following close on the heels of this week's disturbance, the United States weather bureau announced today.

OPTIMISM PREVAILS IN NEW EAST CONFERENCE

LAUSANNE, Dec. 9.—Concessions by both Turks and Russians regarding the Turkish straits led to greater optimism in the Near East peace conference today than at any other time since the opening session.

RAILROAD LABOR BOARD TO LIVE YEAR LONGER

WASHINGTON, Dec. 9.—The sentence of death has been passed on the railroad labor board, but it appeared certain today there will be a stay of execution for at least a year.

WOMAN SHOTS SELF

LOS ANGELES, Dec. 9.—Mrs. Ruth Haner, young and attractive, is dying at the receiving hospital from the effects of a bullet in her brain, believed to have been fired with suicidal intent in her apartment in West Sixth street today.

W. C. TAYLOR RISKS LIFE TO PREVENT SERIOUS FIRE

Seizes Roaring Gas Stove and Carries It From Business Building

Presence of mind on the part of W. C. Taylor of Tujunga about 4 o'clock yesterday afternoon prevented a serious fire at 308 South Brand boulevard in the new establishment of the Greenleaf Drug company.

Mr. Taylor is an employe of Coker & Taylor's plumbing shop at 209 South Brand boulevard. He was at work completing the installation of a new sink in a small room on the east side of the drug store.

Legion and Auxiliary In Social Gathering

A social evening was enjoyed last night by members of American Legion Post 127 and members of the Women's Auxiliary.

Healing Powers of Music to Be Told

Healing by music, new science of the new age, is the message Dr. Bruce Gordon Kingsley will bring to Glendale in his musically illustrated address before the Tuesday Afternoon club at the regular meeting next Tuesday afternoon.

R. E. Olin Chosen As Class President

Fifty-five men of the Tri Mu class of the First Baptist church gathered at the dinner tables at the church last night and after the dinner hour enjoyed a program of speeches and music and participated in the election of officers.

WOMAN SHOTS SELF

This Is American Education Week

THREE ELEMENTS SECURE SUCCESS

Social and Business Life Demand Correct Spelling and Punctuation

By GENEVIEVE ZIMMERMAN
24 Glendale Union High School
Spelling, punctuation and grammatical usage are three of the important elements which go to make the foundation of a literate person.

This is American Education Week. It is being observed by the schools of Glendale. Pupils are preparing for publication reasons why education—more of it—is necessary. In these columns will be found brief articles by Glendale pupils.

What School Offers

By EVELYN CURREN
Have you visited the night school? Here is your real opportunity to study human nature and observe people who work hard during the day and spend their leisure hours trying to promote their education.

That people of all occupations are benefited by the institution of evening school is evidenced by the registration cards filed in the office by the students. On these cards each person's occupation is written. They also tell why they are taking this course.

Over eighty Glendale housewives are attending the dressmaking and millinery classes to learn how to make their own dresses and hats.

Three foremen on construction work are taking up Spanish, which will enable them to understand the men working under them more clearly. Occupations of others are too numerous to mention such as truck drivers, clerks, stenographers, teachers, carpenters, cement mixers, cookie wrappers.

Let us next consider the importance of grammatical usage in speaking is just as important, if not a little more so, as in writing, because every day of a man's life he is

Gets to Paris

By HELEN M. WHITE
13 Years Old
Glendale Avenue School
Marion Sheridan's greatest ambition was to go to Paris. She did not have any money to go to Paris because she was only a clerk in a small store in New York.

"But, Lorraine, I must go! Think what it would mean to me," Marion was talking to the other clerk in the store.

"I don't know, but I have to go." A week later Marion was inquiring at a steamship office about getting a position as a stewardess on the S. S. Majestic.

"The ship sails Monday, Nov. 28; do you understand?" was what she heard on the phone.

Her trip on the ocean was very successful and she arrived in London safely. Her next problem was how to get to Paris. She obtained a position in London and expected to go to Paris soon.

Commercial Work

By ROY ALTMAN
The commercial department of a high school is an extremely important business center of education. In this department students may not only equip themselves for office work and work of that nature but they are also gaining business knowledge which will be of great value to them in later years.

Let us say that you select a subject that is perhaps mentioned less than any of the others: Business English. This subject involves mostly the business letter and what business man or woman is there that can very well get along successfully at this time when the letter is becoming so popular, if they cannot write good business letters. It is therefore an absolute necessity and this shows the importance of just one of the many commercial subjects, all of which contain things that are just as important.

Nearly everyone knows the advantages of bookkeeping and merchandising in fitting the students for this work, besides giving them a general knowledge of business, but few give much thought to the thing that makes typewriting a valuable asset in itself. The thing is concentration. Students will find that upon beginning to typewrite, and not only in the beginning but all the time, that they cannot typewrite and at the same time be thinking of what a good time they had at the last party.

There seems to be a misunderstanding among some people who think that the commercial work offered in the high schools does not equip one as we might say, "going out and getting a job." But this is not true, for the high schools offer as much in the commercial department, if not more, than the average business college.

Of course the expansion of a commercial education is very desirable, as in any other course of study, but if the students will see the importance of the commercial work and will go into it with a businesslike spirit they should at the end of the course have a very good business foundation and knowledge upon which they can

ILLITERACY BIG DRAWBACK IN U. S.

It Can Be Remedied by Education; Ceaseless Effort Is Need

By DONALD TYLER
23, Glendale Union High School
First of all, what does illiteracy really mean? Does it mean a lack of the knowledge of Edison, Burbank or some of the other well-educated men of our day? No it does not, else the world would be burdened with many more illiterates than it now is. It simply means a lack of knowledge of the fundamental, everyday principles.

"You may ask, in what way is illiteracy a drawback to a nation? Take, for example, Russia. In 1914, Russia was the great grain-producing center of the world. To a great extent, she controlled the commerce of the nations. But what is Russia now? Just a poor, unsettled and starving country, led by a band of Bolsheviks, who are illiterates. If these Bolsheviks had received an education in the fundamentals of everyday life, and a little bit of the "do unto others as you would have them do unto you" principle in them, they would not have allowed Russia to be plunged into ruin, despair and degradation.

"The reports of the railroad passenger agents already indicate an influx of tourists that is 25 per cent greater than in any previous year. Few people realize that we are adding a city the size of Albany to the population of Los Angeles every year. Forty per cent of these people want homes and all of them are looking for investment. They realize that the "Star of Empire" is really moving westward and they are simply following the lead of the leading financiers and men of affairs of the country.

"I sometimes think that those who are on the ground, hardly realize the opportunities that abound on every side, all directly dependent upon our matchless climate and the constantly increasing value of land in Southern California.

"We are justly proud of our success at Sparr Heights. A sale of \$600,000 worth of land and a

What does illiteracy do to the person who allows himself to be held in its power? For example, let us consider the poor and uneducated class in our country. Instead of working and saving a little day by day, they allow themselves, because of a lack of knowledge, to become low, unclean and starved. As a last resort, they may start to steal or yield in other ways to the temptation to do wrong. If all were educated, there would be no low or class. If they knew, each one would seek to help the other, and at the same time place himself upon a higher plane of living.

A Naughty Pig

By MIRIAM BAINBRIDGE, Age 13, Glendale Avenue School
Sammy was on his way to the store to buy a geranium, for it was his teacher's birthday soon. Tony, his dog was with him. Tony and Sammy were very good pals and went nearly everywhere together. Sammy had many pets, hens, ducks and one little pig Smutty, who was always getting into mischief.

"Yes," replied Mr. Jones who kept about everything in his store. "I have some that just came in yesterday." Sammy bought a plant and went home.

"Mother," said Sammy when he had finished his lunch, "I am going out and plant my geranium now."

either take a position in the business world or else improve that education which they have gained.

HILLSIDE SITES PROVING POPULAR

Sparr Heights Wins Many Investors Because of Ideal Location

Charles M. Schwab's recent statement that Los Angeles was "the wonder city, wonderful because of what it has accomplished in the past few weeks, and wonderful because of the wealth of opportunities that its future holds" is indicative of the impression the rapid, steady and healthy progress has made upon those master minds who weigh their judgments in a conservative manner.

"The advice to the world of that trained observer, Arthur Brisbane, to buy California land on the hillsides is also a strong reinforcement of our own judgment in undertaking the improvement of such a property as Sparr Heights," says Mr. Walters of Francis-Barnum & Walters, the owners and subdividers of that beautiful tract in the Verdugo Valley.

"During the last year we have witnessed a pronounced recognition, on the part of discriminating buyers, of the future value of hillside homesites back from the ultimate congestion of this to-be great metropolis.

"Business with us is slowly but surely and steadily increasing daily in volume and I am confident that, subject to the temporary lull of the holiday season, it will continue to augment in volume and that by the middle of January it will be extremely satisfactory."

Japan has a decimal system of currency like that of the United States.

'Whale Oil Gus' to Talk at Elks Club

Captain A. E. Folger, known familiarly as "Whale Oil Gus," will speak before the Elks' club on the night of December 17. It will be remembered that Captain Folger arrived in Glendale about three weeks ago, with his "Man Monday," aboard as curious a contrivance as ever rolled down the streets of the city—something in the nature of a deep sea whaler, superimposed upon a one-ton auto truck chassis. The craft has taken the captain from Gloucester, Mass., to Los Angeles and he is confident it will take him back again, when he gets ready to go.

Call 'Echo Meeting' at Baptist Church

There will be an "echo meeting" from the Santa Barbara Young People's convention at the Baptist church Sunday night at 6:30 o'clock. Stanley Walker in charge.

Those attending the Santa Barbara convention were Mr. and Mrs. Willard Keith, Rev. and Mrs. E. E. Ford, Misses Faith Tarling and Helen Cobb, and Stanley Walker and Ernest Grigg.

Pussyfoot Johnson Loses 'Dry' Battle

WELLINGTON, N. Z., Dec. 9.—William (Pussyfoot) Johnson, who has been leading a vigorous campaign to make New Zealand "bone dry" lost his battle today when official tabulation of votes in the national referendum showed a majority of 16,138 in favor of continuing the present system of licensing drink sales.

A similar referendum three years ago gave a majority of only 3,262 in favor of continuation of the licensing scheme.

West Glendale Club Meets Tuesday Night

Adoption of constitution and by-laws is announced for the meeting of the West Glendale Improvement Association Tuesday night at the Columbus Avenue school.

Holiday Program Is Planned for T. D. L.

Manager Ralph Allan, of the T. D. and L. theatre, has prepared a special treat for the holidays. "Usually, just around the Christmas season," he states, "showmen arrange for 'light' attractions, a policy I plan to discard this year. Instead, I am offering the week after next two of the biggest, finest, most elaborate films on the market today—'East Is West,' with Constance Talmadge, and 'The Young Rajah,' with Rodolph Valentino."

"East Is West" will begin Sunday, December 18, and run four days, to be followed by a three-day run of "The Young Rajah," making a week of film attractions. Manager Allan feels is the greatest his theatre has ever offered.

FRIENDLY FAMILIARITY

FAMILIARITY with a bank is the kind of familiarity that never breeds contempt. The more business you do with us, the more you will do for yourself.

By maintaining your bank balance today, perhaps tomorrow it may maintain you.

Side Talks by Ruth Cameron

THE BEST CHANCE

How easy it is to say cynical things about marriage. Every daily paper with its reports of divorce, and eternal triangles, and murders for jealousy, and sordid struggles over matters of alimony, will provide you a text if you want it.

And so the smart and cynical and depressing things are said and sometimes we lose sight of that fact that there are such things as happy marriages and that to achieve one is to give yourself the best chance of enduring happiness.

The Greatest Earthly Happiness

"There is no earthly happiness exceeding that of a reciprocal satisfaction in the conjugal state," said an old philosopher.

How true that is!

We have heard it said that a true marriage halves our sorrows and doubles our joys so often that we have to come to make fun of that statement as a brood. But it's true just the same.

Marriage has many inconveniences, many annoyances, many restraints, many sacrifices. But if it is a true marriage it has enough comradeship, enough tenderness, enough sympathy, to counterbalance these twice over.

When passionate love is gradually transmuted by the years into that blend of tenderness and friendship which is true married love, it forms the best possible background for happiness that exists in all life.

True, it is not easy to achieve a

successful marriage any more than it is easy to achieve success in any line. Character and brains enter into the making of it. Forbearance and a sympathetic imagination. Nor can it be made by one any more than one partner could make a business a success if the other gave him no cooperation. Nor can it be made in a year and then left to itself any more than a business could be left to itself. Says Cowper: "The kindest and the happiest pair will find occasion to forbear and something every day they live to pity and perhaps forgive."

Nor Out Of It

Of this difficult business of understanding, and making oneself understood in married life, Stevenson says: "Do you think it is a hard thing to write poetry? Why that is to write poetry and of a high if not the highest order."

Write, wonder, then, that we sometimes fail and grow discouraged and begin to wonder if we are not looking in the wrong place for happiness. If we are looking for perfect happiness, we are. There is no such thing in marriage. Nor out of it.

When some moment comes that brings out this tenderness and it surges through your heart and brings a mist to your eyes, you know that that is the reality and other things are just on the surface. Of course these moments cannot come often but the facts are always there just the same. Do not lose your grasp of them.

(Copyright 1922 George Matthew Adams.)

POPULAR FOR EVENING WEAR

White is the most popular shade for evening wear this year and naturally, no other trimming is ever as effective as pearl, when used in combination with shimmering silk. The little hat shown above is of simple shape and depends entirely on the richness of the pattern worked out in pearls for its smartness. A wonderful complement to a soft, white evening gown which could easily be copied.

Diet and Health

By Lulu Hunt Peters, M.D.

ANSWERS TO CORRESPONDENTS

My Dear Followers: When sending for material which we offer you, please remember to enclose a stamped envelope bearing your full name and address. The pamphlet on reducing and gaining is the only one for which you must enclose four cents in stamps extra. Address your letters to me in care of this paper. Make them as brief as possible, not over 250 words, and type or write them legibly with ink. Please sign your name as evidence of good faith—we will not use it in any way. Remember it is impossible for me to diagnose for you or to answer you personally. I appreciate very much the beautiful letters you send me and regret it is impossible to give you individual advice. The questions you ask will be answered in the column as soon as possible, if they are of general interest.

Miss E.—The tears coming to your eyes so very easily show that you are a little emotionally unstable. That is a condition that you can get under control. If you will write again sending a stamped, self-addressed envelope and request the name of a book that will help you to help yourself, we will send it. Try the Cone formula. It is undoubtedly good in some nervous conditions.

J. S.—We have had an article recently on boils and acne. You may have it by sending in the usual way. Since writing the article one of our followers has written that she found her acne was made better by placing a cloth soaked in a saturated solution of boric acid on her face every night when she retired.

You can make a saturated solution of boric acid by putting an ounce of the crystals or powder

CITY HIGHWAYS BEING IMPROVED

Milford street, Central avenue to Columbus avenue, Contractor W. J. Curran expects to have street paved with three-inch macadam in a few days.

Milford street, Pacific avenue to Chester street, grades to be checked for paving with three-inch macadam.

Milford street, State street to San Fernando road, grades to be checked.

Monte Vista court, Pacific avenue to Tract 5364, proceedings ordered.

Mountain street, resolution of intention to pave with five-inch concrete ready.

Myrtle street, Pacific avenue to Chester street, contract to pave with three-inch macadam awarded to Contractor P. L. Ferry November 16.

Open Bids on Work

Oakridge drive, two blocks east of Glendale avenue to Palmer street. Work under way by Contractor P. L. Ferry, who will pave with three-inch macadam.

Orange street, Broadway to Harvard street. Bids opened for paving with five-inch asphaltic concrete December 7.

Patterson avenue, Kennilworth road to the wash. Work under way by Contractor P. L. Ferry to pave with three-inch macadam.

Palmer street, Adams street to Tyler street. Grading completed and three-inch macadam paving will be laid by Contractors Cornwell and Henderson.

Palmer street, Central avenue to San Fernando road. Proceedings ordered.

Pacific avenue, Broadway to San Fernando road. Paved with five-inch macadam by Contractors Napier and Simpson.

Pacific avenue, Myrtle street to Doran street. Contractor P. L. Ferry has completed grading. Paving with three-inch macadam is now under way.

Pioneer drive, Pacific avenue to Kennilworth road. Contract awarded W. J. Curran November 6.

Complete Grading

Raymond street, Fourth street to Sixth street. Grades to be established.

Rosedale court, Glenwood street to Fourth street. Completed by Contractor P. L. Ferry.

School street, Colorado street to Harvard street. Resolution of intention ready about December 7.

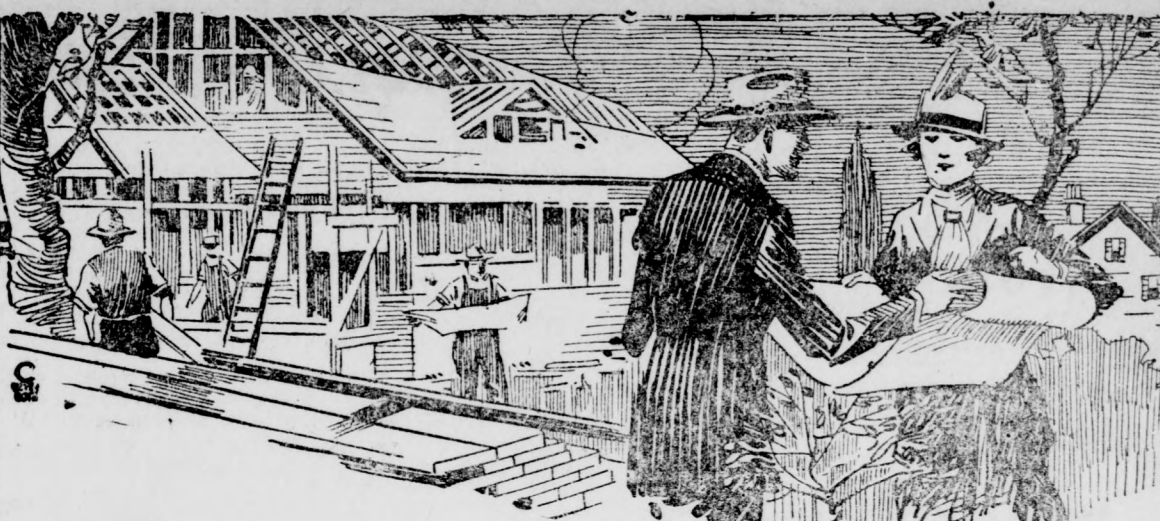

Stanley avenue, Adams street to Sycamore Canyon road. Grading to be completed about December 10, after which street will be paved with five-inch macadam by Contractor W. J. Curran.

Sycamore Canyon road. New proceedings may start in January.

Thompson street, Fourth street to Sixth street. Grades to be established.

Wilson avenue, Verdugo road to eastern city limits. Paving with three-inch macadam well under way by Contractor E. L. Fleming.

Wilson avenue, Brand boulevard to Central avenue. Paved with five-inch asphaltic concrete.

Dealers in SERVICE —as Well as in Lumber

Good Lumber alone will not make a real home, although it is the first big step in that direction.

The home as the center of family life should have individuality and a home-like atmosphere.

If you are confronted with the problems of home-building come in and let our Service Department help you. Our years of experience are yours for the asking.

COURTESY — QUALITY — SERVICE

Addition to 11th Unit

FAIRVIEW

Large Lots 50x156, 64x145

Price \$800 and up; \$25 to \$50 Cash; \$15 per Mo.

The original allotment of the 11th Unit was sold out in less than two weeks. Its popularity has prompted us to put on an addition equally as desirable at practically the same prices. Having made a survey of lots around Los Angeles in the last few days, we are convinced that our price schedule on these lots is way under value.

Located on the north side of Glenwood Road, close to Kenneth Road directly on Allen Ave., a through north and south street, with water, gas and electricity, in such a desirable location; so close to transportation where the development is amazing. These 21 lots will not last long. Come early and make a selection.

Practical Housekeeping

By Florence Austin Chase

SUNDAY DINNER MENU

- Corn Soup
- Roiled Stuffed Beef En Casserole
- Hungarian Potatoes
- Cabbage Vol-au-Vent
- Spiced Beet Salad
- Apple Pie
- Coffee

CORN SOUP—Chop two cups canned corn, add two cups meat or chicken stock, bring slowly to the boiling point, and let simmer fifteen minutes; then rub through a sieve. Scald two cups milk with one slice onion, remove onion, and add milk to corn. Melt one and one-half tablespoons butter, stir in one and one-half tablespoons flour and pour on gradually, while stirring constantly, hot mixture; then add one teaspoon salt and a few grains pepper.

ROLLED STUFFED BEEF IN CASSEROLE—Wipe two pounds of round steak (without bone and cut rather thick) with damp cloth. Put a little suet in frying pan and sear the beef on both sides. This keeps the juice in and starts the roasting process, therefore be sure to have all parts slightly browned; now season one side, place the dressing on half, turn over the other half and tie firmly with white cord so as to keep in shape. Salt and pepper the roll on both sides and dredge with a little flour; place in a well-greased casserole (a covered roaster may be used) and bake in a hot oven until tender; from time to time baste with just enough water to make a rich gravy.

HUNGARIAN POTATOES—Wash, pare and cut potatoes in one-eighth inch slices; there should be three cups. Cover with cold water and let stand fifteen minutes, drain, and cook in boiling salted water two minutes. Drain again, spread in a buttered dripping pan and bake until potatoes are soft, basting twice with

one-third cup melted butter or drippings, to which has been added one tablespoon lemon juice, one-half teaspoon salt and one-eighth teaspoon paprika.

CABBAGE VOL-AU-VENT—Remove crust from a small loaf of baker's bread, cut out center in such a way as to leave a box-shaped case, having walls one-half inch in thickness. Beat 3 eggs slightly, and add one-third cup milk; season with one-fourth teaspoon salt. Dip bread case in mixture, and turn frequently so that all parts may be soaked with the mixture, then drain, and fry in deep, hot fat. Fill with creamed cabbage to which has been added one-half cup grated cheese. Sprinkle with grated cheese, cover with soft bread crumbs browned in butter, and put in the oven to reheat.

SPICED BEET SALAD—Wash beets very thoroughly and cook in boiling salted water until soft. Drain, plunge into cold water when skins may be rubbed off easily—then cut in cubes or fancy shapes and marinate in three tablespoons oil mixed with one-half teaspoon salt, a few grains of pepper and three tablespoons vinegar. Add three or four whole cloves and let stand one hour in cold place. When ready to serve, drain and mix with one-half as much chopped celery. Serve on lettuce leaves, placing a spoonful of mayonnaise dressing on top.

APPLE PIE—Line pie plate with paste. Pare, core and cut five tart apples in thin slices and pack them in plate. Mix three-fourths cup sugar, one-eighth teaspoon salt, one teaspoon flour, one-fourth teaspoon nutmeg and one teaspoon lemon juice, and sprinkle over the apples. Dot over with one teaspoon butter. Wet edges of under crust, cover with upper crust, pressing the edges close together. Place near bottom of gas oven heated to a temperature of 400, bake in that temperature for ten minutes. EDNA KENT FORBES

LONG BLACK LASHES

To a very lightly applied eyelash pencil if the lashes are touched so lightly that the make-up doesn't show. Here is a harmless stain which can be painted on with a brush.

1 drachm peroxide of manganese
1 drachm water
2 drachms glycerine

Don't put the color near the eyes where it will show, but toward the tips of the lashes.

Margaret G.—Curetting the gums only amounts to a thorough cleaning of the teeth. The edges of the gums are turned back from the teeth and all of the deposits of tartar are removed from either the crown or other portions of the teeth. If this is done whenever there is need for it and an astringent used on the gums, there would be no pyorrhea.

Very few dentists care for the work as it is a tedious process, but it is so important that it has no become a necessity in dentistry. The price varies but it is worth whatever it costs as such care will prevent the loss of teeth almost indefinitely.

Esther.—A bridal trousseau is not as elaborate as was thought necessary many years ago. The sensible thing is to purchase only such articles as will be actually needed and have them as lovely as your purse will admit.

AUTOMOBILE SECTION

GREAT SHORTAGE OF CARS IN 1923

Three Big Factors Will Cause Lack of Supply, It Is Predicted

Three things will create the greatest shortage of motor cars in the spring of 1923 that the country has ever seen.

First and most important is the utter impossibility of enclosed car body manufacturers producing a sufficient number of bodies to meet what appears to be an insatiable demand.

Second is the certainty of a freight car shortage and a very slow movement of freight throughout the winter.

Third is the increase of one billion dollars in the purchasing power of the American farmer.

Time was when manufacturers of enclosed bodies who did not produce in time for winter delivery carried the bodies over until the following year. Now the leading manufacturers of motor cars in the country are running close to 60 per cent in closed car production, and the interesting thing about the situation is that the demand keeps on increasing regardless of the season.

Everyone who has anything to do with the railroads or with shipments knows that it will be impossible for the railroad companies to move the volume of freight which will be offered to them this winter. It has been almost impossible for them to handle it in the good weather we have had this fall.

New Wealth Appears

Just as soon as the storms begin to impede traffic, congestion will be even more acute.

The leading factories in Detroit and Cleveland and other cities are now making arrangements for driveways to continue throughout the winter. But these will only supply the demand for cars for spring sales in that area which is included within a radius of 500 miles of Detroit and Cleveland.

The bureau of public roads at Washington is now making arrangements to keep all main roads clear of snow in order to facilitate the transportation of freight by truck during the period of congestion.

Six billion dollars of new wealth came out of the ground in response to the efforts of the American farmer during the past year. This means a one billion dollar increase in purchasing power. In view of the fact that he has not been buying automobiles in any quantity for two years past, it means that the pace of 6500 a day, now touched by Ford, will be followed by the other automobile manufacturers.

Stop Signals Proposed for Trolley Cars

CINCINNATI, O., Dec. 9.—Following the example of Cleveland, Cincinnati is considering the experiment of requiring street cars to carry safety stop lights in order that motorists can make no mistake about whether the car they are following intends to stop. The local automobile club is fostering the movement and urging the director of street railways to adopt its plan.

State's Auto Death List Grows Smaller

SACRAMENTO, Dec. 9.—Straight automobile fatalities in California for the first eight months of the year numbered 572, or an average of about seventy-two deaths per month, according to tabulations made here by L. E. Ross, statistician of the State Board of Health.

In addition to the deaths recorded from straight automobile accidents, or accidents due to collisions between automobiles, machines turning over on the highways and people run down and killed, eighty-two persons were killed during the same period as the result of collisions between automobiles and railroad trains and street cars.

Ross said his office, the Bureau of Vital Statistics, was without means for keeping tab on the number of accidents resulting only in injury to persons. Last year there were 839 deaths in California, due to straight automobile accidents, making an average of about seventy-four deaths per month.

The fact that the monthly rate of fatalities is somewhat lower this year than last does not indicate, Ross said, that there has been fewer accidents. In fact, he said, it would appear from general reports that the actual number of accidents has been increasing.

Cleaning Radiator

Cleaning the cooling system is not a difficult job. Take two pounds of washing soda and dissolve it in hot water. Pour into the radiator, being careful to remove all foreign matter by straining through cheesecloth. Run the car as usual all day and allow the solution to remain twenty-four hours. Drain the next morning and fill with fresh water. Change the water again every day for two or three days to thoroughly remove all traces of the soda.

A car can be made to look new by having it varnished every six months.

LOCAL AUTO MEN HOLD DISCUSSION

Problems of Industry Are Topic; Resolute Against Annexation Move

The Glendale Motor Car Dealers' association, at its weekly luncheon Wednesday at the Broadway Inn, went into a discussion of general problems confronting the automobile industry.

The association also went on record as being opposed to the annexation of Glendale to Los Angeles. The vote of the membership on this score was unanimous.

George T. Smith, president of the association, presided at the meeting. The other officers present were Stephen Packer, vice president; James French, treasurer and M. B. Townman, secretary.

The most vital issue taken up at the meeting was the plan projected whereby the Glendale association would join forces with the Los Angeles association for the purpose of working out new automobile legislation.

Discuss Problems

While the minutes of the meeting were not given out for publication, it is understood that the automobile dealers are desirous of ironing out certain problems which will not only be of benefit to themselves, but also to the motoring public at large.

The resolution adopted by the auto dealers on annexation follows:

"Be It Resolved, That we, The Glendale Motor Car Dealers' association, go on record as unalterably opposed to the annexation of the city of Glendale to the city of Los Angeles."

"Further, That annexation would be against the best interests of the business men and the residents of Glendale."

The foregoing declaration was made after a letter prepared by the Glendale Exchange club was read before the membership.

BICYCLE RIDERS CAUSING ALARM

Careless bicyclists who use the highways at night without proper lights on their wheels are causing grief for thousands of motorists, reports the Automobile Club of Southern California.

There is apparently the general return to the art of bicycling in this part of the state and more and more of the two-wheeled vehicles are being used, say motorists who make complaint to their motoring organization.

After dark on the dimly lighted street or road, where they are absolutely invisible until within the danger line, they meander along with perfect unconcern, trusting to the motorist to look out for them, say the majority of complaints. Not a sound gives warning of their presence and while they usually try to keep near the curb or side of the road, even then they are beset with danger. Usually when turning out from a parked car, they swing into the traffic current without so much as a look behind. One motorist, in writing to the Automobile club on this subject, says that he doubts if there is one out of a hundred autoists who does not swallow his heart a hundred times a year and thank Providence that he has escaped killing a bicyclist.

Suggestion Offered

Officials of the club issue a suggestion to all those who use wheels to comply with the law in the matter of proper lights, as the danger to themselves is greater than to the motorist who may run into them.

In regard to the giving of free rides to children and others who are asking for "lifts" alongside of the road, the Automobile club reports that this danger is rapidly being eliminated in Southern and Central California, as motorists are learning that they are responsible for the welfare of any stranger they may pick up in case of an accident which involves negligence on the part of the autoist. It does not pay to be too kind-hearted in helping children to run away from home as is often the case where a boy or girl hails the motorist for a ride, and it is suggested by the Auto club that this practice be stopped entirely during the winter.

Charge Made They Meander on Highway at Night Without Lights

The Michigan State Transportation Association at a meeting at Grand Rapids has gone on record in favor of a tax on gasoline to pay for upkeep of state highways.

The Michigan State Transportation Association at the same time unanimously disapproved of the measure.

Col. Sidney D. Waldron, president of the Detroit Automobile Club, told the convention the sufficiency from automobiles was sufficient to pay for the maintenance of roads and urged retention of the present system with modification in respect to trucks and common carriers.

License fees on automobiles should not be used for highway maintenance but should be devoted exclusively to construction, the association was told by Roy D. Chaplin, president of the Hudson Motor Car company.

Revenue for construction, he held, should be derived from long term bond issues and operating expenses and maintenance from the users of the highways. He contended centralized administrative control was essential to proper development of the highway system, and that broad powers should be granted to state highway departments to insure a flow of traffic after construction of the highways.

Oily Cloth Keeps Nickel Parts Clean

The luster of nickel parts of a car can be kept from tarnishing by rubbing the parts often with an oily cloth. Every once in a while give them a regular polishing.

London People Are Slow Auto Dodgers

In England, analysis of statistics shows 32 per cent of the accidents to pedestrians in London are caused by the public stepping off the curb into the path of moving vehicles.

Removing Dents

Use a leather mallet, or an ordinary hammer with the head covered with a number of thick pieces of cloth, when straightening out dents in fenders. Beneath the fender a block of wood should be placed, cut to snugly fit the curve of the metal. A bag filled with sand is sometimes used as a cushion.

Testing Rear Drive

The slack or backlash in the rear drive of a car is tested by merely jacking up each rear wheel, placing the car in gear, and turning the wheels as far as they will go. At the tread of the wheel which ought to move through an arc of about an inch. If it moves through a greater arc, either the universals are worn or the pinion gear needs to be meshed closer. The wheels may also be loose on the axles. Each wheel is jacked up independently, with the opposite one on the ground, so as to eliminate consideration of the differential.

Buick Aids In Dedication of Arrowhead Toll Road

Spectacular Highway Sure To Win Every Beauty Lover in West, Is Statement Made By 'Outdoor' Franklin

The Buick scoops again! "Outdoor" Franklin and his Buick won first honors in the dedication of the new Lake Arrowhead toll road which has been under construction for the past year, in order that the winter sports and snow carnivals at Lake Arrowhead in Arrowhead Woods could be made available to the motorists of Southern California. The dedication ceremonies for this new scenic highway took place where the road is bridged across the Mojave a short distance from Hesperia. These exercises were held at 10 o'clock on Saturday morning, December 2, and were under the auspices of the board of supervisors of San Bernardino county. M. P. Cheney, supervisor, of Colton, was master of ceremonies. James W. Cole, San Bernardino county highway commissioner, and Edgar Ham, San Bernardino county surveyor, were his right-hand men in conducting the dedication. Representing the Lake Arrowhead syndicate were Andrew Warmington, Leon A. Atwood and L. J. Burrud. Members of the Southern California newspapers and a large crowd of interested spectators were present at the inauguration of this new road.

As M. P. Cheney drove home the silver spike, commemorating this occasion, and dedicating this

spectacular highway to the beauty lovers of the west, "Outdoor" Franklin and his Buick crossed the gap that has been so long the barrier to winter activities for motorists in beautiful Arrowhead woods, and paused only long enough for the representatives of the board of supervisors to board the Buick and away he sped over the new road to be the first automobile to make the complete scenic tour of Lake Arrowhead by way of the new Lake Arrowhead toll road.

The new Lake Arrowhead toll road rises on a gradual tangent from the course of the Mojave river, up the north slopes of the San Bernadinos, through an ever-changing panorama of beauty and delight. Each foot of this new road is filled with long vistas of desert, mountain, forest and stream and gradually rising above the foothills, the easy grade of this new scenic highway carries one to the fringing pines of Arrowhead woods. Here "Outdoor" Franklin and his Buick, filled with the supervisors of San Bernardino county, made a record run from the bridge to the Lake Arrowhead club. To quote Mr. Franklin:

"The Lake Arrowhead toll road is in excellent condition, considered (Continued on Page 6)

Favors Gasoline Tax for Highway Upkeep

Automotive Industry Takes First Place

Figures showing the ten leading industries, figuring the dollar value of their annual production, place them as follows:

Automotive industry.....	\$2,865,000,000
try.....	2,050,000,000
Petroleum.....	1,935,000,000
Meat packing.....	1,900,000,000
Foundry.....	1,675,000,000
Lumber and timber.....	1,650,000,000
Iron and steel.....	1,530,000,000
Clothing.....	1,275,000,000
Flour mills.....	1,250,000,000
Cotton goods.....	1,100,000,000
Boots and shoes.....	1,100,000,000

The total for the automotive industry is subdivided into cars and trucks, \$1,490,000,000; replacement parts, \$550,000,000; tires, \$675,000,000; accessories, \$150,000,000.

Watch Lost Motion in Steering Gears

Watch for lost motion in the steering mechanism and have it attended to. Few drivers realize how much their safety depends on the steering gears. If the lost motion in the steering wheel is found to be increasing rapidly, one of the ball and socket joints of the drag link is coming loose and will soon let go. Stop the car immediately and investigate. It is easily tightened with a large screwdriver. Set it up as tight as possible and secure it with a long cotter pin or piece of wire.

Extra Tire Mileage Not on Speedometer

The tires of an automobile often go a further distance than the score shown on the speedometer. The instrument never registers when the car is backed, skidding, or the extra mileage covered when one of the wheels is out of alignment.

Foreign Debt Would Buy All Motor Car

The debt owed by twenty foreign nations to the United States would buy a moderate priced auto for every family in this country, and to pay the "gas" and tire bills for most of a year besides.

Kerosene Ruins

Do not attempt to clean the tires with a mixture of kerosene and water. This is extremely harmful, as kerosene is one of the solvents of rubber, softening it and causing it to wear faster.

Atlantic City Will Have Big Speedway

The American Automobile association has just been notified that plans have been completed for a new speedway at Atlantic City. This is to be a one and one-half-mile speedway of board construction and the promoters are going to build a grandstand with a seating capacity of 150,000, which will be the largest grandstand ever constructed. The grandstand alone will cost \$2,700,000, in addition to the cost of the track. It is understood that the officials of the speedway will apply to the Contest Board for permission to hold a race on July 4.

In London a general motor bus company operates 3000 vehicles.

Rubber Soon Ruined If Coated With Oil

Rubber is very quickly disintegrated by oil, and at the same time it has a most unfortunate capillary affinity for the oil. For this reason it is very important to keep oil away from the rubber insulators that are used in connection with the conductors and wires of all the circuits of the magnetos. Although oil is not a conductor of electricity, it ruins the insulation, and the result is a breakdown of the insulation and short circuits.

Approximately \$250,000,000 will be spent in the United States this year for 250,000 motor trucks of all sizes. The cost for maintenance and upkeep is estimated to be \$760,000,000.

READ THE WANT ADS

DUCKS GUN-SHY SAYS AUTO CLUB

Hunting Only Fair During Past Few Weeks; Information Provided

Ducks on the Pacific coast generally migrate on a heavy north-west wind which many times follows a rain storm, and since there have not been many storms this season on the coast, duck shooting in the past three weeks has only been fair, says the outing bureau of the Auto Club of Southern California, in a report just issued.

Hundreds of requests for information dealing with sporting questions are pouring in to this recently established bureau of the club and for the benefit of all motorists who wish to know exactly how present shooting conditions stand, the bureau has issued the following statement:

Duck and quail shooting has been better the first two weeks of this season than in several years but the fair mild weather for the past three weeks has held the ducks from migrating. The rice fields north of Sacramento are infested by millions of ducks and geese, but this territory is so large, however, that it is almost impossible to get a good shoot as the birds have no regular flights and scatter over miles of territory. On days when a heavy north wind blows, good bags of both duck and geese are easily obtained but, unless you strike one of these windy days, your bag is liable to be small.

Become Gun Shy

The ducks at our local lakes and marshes have become gun-shy and wise from being continually shot at and as a result small bags are about all you can expect. Quail shooting is getting to be hard work as the birds have been unmercifully hammered and as a result have beat it to the tall brush and steep hills. Quail shooting is about over for this season, unless you get some kind farmer to turn you loose on some of his protected coverts.

Duck shooting will improve after a general rain storm followed by a heavy northwester. The best duck shooting during the past week was had in Imperial valley, Morena, Reservoir, Cuyamaca Lake and Baldwin Lake. Quail shooters may get fair shooting at Bonsall, Oak Grove, Sage, Banning, Palo Verde and Coachella valleys. Call up the Automobile club if you want additional information.

Paris has approximately 10,000 taxicabs.

The Thrill That Comes Once in a Lifetime

Every man remembers a few things with a thrill that not even years and much trouble can entirely erase—his first long pants, his wedding day, the first baby and the first time he sat behind the wheel of his own automobile.

Even though you do not own an automobile and have no immediate intention of buying one, you are cordially invited to come here and learn about cars. Enjoy the anticipation of possessing one; sit behind the wheel; see how easy it is to drive and control the new MAXWELL.

When the day comes—and it will come—that you go forth to pick out your first car, you can do a better job because of what you will learn here.

Don't get the idea that an automobile salesroom is a chilly place for all except those who come in to buy. It's always a pleasure to everybody in this organization to talk to and show our cars to people who are not yet ready to buy.

Of course prospective buyers are always welcome, but so are the "lookers." Come in often and "post up" on automotive things.

Electric Light Is Dangerous In Bed

DEFIANCE, Ohio—Louis P. Loomis, professor of mathematics at Defiance college is nursing burns and his landlady is saving up to pay for new bedclothes as a result of a fire which grew out of the professor's recent bed-warming idea.

Why Cars Balk

If a car when pulling hard in any gear or when running idle in high misses fire or goes dead, it may be a sign of fouled or leaking spark plugs. Make sure that the battery is strong and that you are getting a good spark. Also examine the carburetor float and the fuel line for clogging.

Care of Tire Chains

When the slightest sign of wear appears on the side lengths of tire chains, where the cross grips join on, move them all up or down one link. In this way the side pieces will last several years longer.

Marcel Says Bobbed Hair Is Doomed Now

LONDON.—According to M. Marcel, pioneer of the Marcel wave, the death knell of bobbed hair has been sounded. At the Hairdressers' Exhibition, just opened in London, many variants of the style which will supersede the "bob" during the coming season are shown.

Chief among these is the old-fashioned coiffure popular in the eighties, the hair being parted in the center, combed down very smoothly and finished with a cluster of curls each side, completely hiding the ears.

Rounding Corners

When turning to the right at street intersections, get as close to the right curb as possible before turning. When turning to the left at street intersections, get into the extreme left lane of traffic.

In the United States, the average annual pay of rural postmen using motor vehicles is \$2570, as compared with \$1830 for those using horse-drawn vehicles.

Plot Dedicated to Memory of Two Dogs

ST. LOUIS—A deed for a plot of ground four feet square, to be used as a dog burying ground, is on record in the office of the St. Louis County recorder.

Two dogs—Joe III and Joe VI—owned by Jacob Siler, will be buried there, and a monument to their memory is to be erected. The purpose, the deed reads, is to honor the memory of two intelligent dogs that the public may see and be led to think and to act.

Lubricate Parts

Merely putting oil or grease into a cup does not lubricate the working parts; it requires the additional action of the parts to attract, the lubricant from this small reservoir to where it can be of service.

To Hold Wheel

When driving at a high rate of speed grasp the steering wheel in such a way that the fingers of at least one hand straddle a spoke. This is the safest position in case of a front wheel blowout or an unforeseen hole in the road, since the wheel is much less likely to slip out of the driver's hands.

WHAT ABOUT DAD AND XMAS GIFT?

Help Him 'Doll Up' Car Is Suggestion Made by Western Auto

Christmas plans are made first for the children and younger members of the family—which as it should be. The baby must have a doll or a ball as a starter for a long list of things, each member of the younger set has a well known preference for some certain articles, and mother will be remembered too, but what will we get for Dad?

Of course, there's always neckties and handkerchiefs, and Dad can always use socks, and— "Give him something for his car," is the slogan this year at Western Auto Supply company stores. Every "Dad" is interested in his car, in most cases he is proud of it. He'd rather talk about the old boat than most anything else and he'd like to doll it up if he could just afford to do it.

Dad Likes Extras Sometimes the problem of keeping a car going for business and the family outings is quite a major item in the monthly expense sheet, and "Dad" doesn't quite see how he can get the extras he would like to put on. He knows a motorometer, wind wings, bumpers and many other things snap up the car's appearance a lot, besides being very useful as comfort and safety providers for all members of the family. He knows better than other members of the family something he would like for the car in the way of tools and extra tires, some handy contrivances for keeping everything clean and bright, and all minor repairs made up to the minute.

"Our suggestion," said Mr. Roudebush, local manager at Western Auto, "to the members of any family is to listen to 'Dad' as he talks about his car and you will get an idea of what he wants. Then come in and talk it over with us. We can show you the things he wants as well as many others he probably will forget to mention, and help you give Dad the surprise of his life this Christmas. Only do it early."

ADVANTAGES OF FORD CAR TOLD

Dealer Asserts There's No Depending on Trains With Own Auto

A very clever letter on the accomplishments of the automobile has been gotten out by Clair R. D'Arge, salesmanager for Jesse E. Smith, local Ford and Lincoln dealer.

Mr. D'Arge starts off with his letter by asking this question: "Did you ever stop to realize how much time you are wasting waiting for trains when an automobile will take you quickly and conveniently to any place that you want to go? Besides, trains don't go everywhere."

He then goes on to tell how one on business or pleasure bent can find no better traveling comfort than that afforded by a Ford coupe or sedan.

With the purchase of either one, he indicates, one is independent of timetables and schedules.

Like Home Comforts "Traveling in the vanadium-built Ford," Mr. D'Arge says, "is like enjoying all the comforts of home. This car absorbs shocks like a sponge does water. The cozy interior is absolutely rain and wind proof. But the greatest comfort comes from the assurance you have that the trip to wherever you are going is costing you less than by any other means of transportation."

Mr. D'Arge, who recently arrived in Glendale from Detroit, remarks on how the general use of the automobile revolutionized the transportation industry in the eastern city.

"The traction companies and their exorbitant fares were forced eventually to sell their holdings to the city because of the large number of automobiles in use," he said.

He also stated that this action, which was brought about principally by the general use of automobiles, benefited the masses of the people because just as soon as the car lines were taken under municipal ownership rates were reduced to 5 cents.

Keep to the Right

A motorist should always keep to the right, not only when meeting another vehicle, but when rounding a corner, turn, curve or approaching a hilltop, crossroads, or streets. Also bear to the right as far as practicable in taking the left roadway where the road forks or at an "offset street."

Use of Grease

Grease should never be used for commutator or timer lubrication. Cylinder oil is the proper lubricant for these parts, and should be used only sparingly. This is applied to all commutators or ignition distributors. When grease is used here it frequently serves to prevent the commutator arm from making contact.

IMPROVEMENT IS BEING FINISHED

J. Harvey M'Carthy Foothill Tract, Eagle Glen Heights, Is Selling Rapidly

Finishing touches are being given to the improvement work at Eagle Glen Heights, the J. Harvey M'Carthy foothill subdivision at the east end of Broadway, and everything will be completely finished probably by the end of the month, according to the local manager, H. V. Henry. The completion of the development process, which has transformed a rough, wooded hillside into a home area of unusual attraction synchronizes with the disposition of the remaining building sites, only a few of which are unsold.

Eagle Glen Heights is looked upon by Mr. McCarthy as a modest-sized yet brilliant gem among the many subdivisions which he has placed on the market in his twenty years of experience in southern California. The beauty of its scenic environment, situated as it is on the gentle slope of the San Rafael Hills, afforded the landscape architect an unusual opportunity to develop an attractive foothill subdivision, and, sparing no expense, Mr. McCarthy gave a free hand with the most gratifying results, Mr. Henry says.

High Class Homes One of the results that has come rather unexpectedly from the liberal policy which was adopted at Eagle Glen Heights, has been that an even better class of residences are being built on the subdivision than was looked for. While the building restrictions imposed were sufficiently high to insure the establishment of an essentially high class type of home, it has been found that purchasers of sites have built or are planning to build residences that will cost considerably more than the amount of the restriction placed on the lots.

In seeking for a cause for this somewhat unusual condition, Mr. Henry says that it has been found that the trend of the demand for sites for the better class of homes is decidedly towards the eastern portion of Glendale. The result has been that purchasers at Eagle Glen Heights are almost exclusively people of standing in Glendale, whose principal object is to establish their permanent home in a locality that is reasonably sure to maintain its select character for many years to come.

Another moving reason is found in the proximity of this subdivision to the new \$600,000 high school and to the Broadway grammar school. Among purchasers of lots at Eagle Glen Heights are very many families having children of school age who are anxious to be as near as possible to the schools which their children must attend. Mr. Henry says that with the promise that the new high school will be completed in time for the fall session of 1923 every lot in Eagle Glen Heights will be built on.

Buick Auto Assists In Road Dedication

(Continued From Page 5) ering the fact that ours was the first car to negotiate the trip. The rough spots of last-minute construction that we encountered on the trip to Lake Arrowhead have now been smoothed out and the new highway is one that will be a source of great pride to the motorists of California, for we all feel a proprietary interest in all the scenic highways of our southern land, and in the thousand or more which I have traveled in my Buick I can say that never in all my experience have I witnessed such a complete transition of beauty as takes place when one traverses the new Lake Arrowhead toll road.

"From the time we left the bridge over the Mojave river, until we arrived at the Lake Arrowhead club house, the praise and exclamations from the more or less matter-of-fact men in my car were indeed interesting to hear. The supervisors were in accord with me, that in all the mountains of Southern California, they had never traveled a road with such a great and unusual diversity of scenery. We arrived at the club house, which nestles close to the heart of the great forest surrounding Lake Arrowhead, and from its broad verandas we watched the changing lights of the sapphire lake spread out at our feet. The savory odors of a specially cooked Thanksgiving dinner, coupled with the "bitey" tang of winter in the woods, hastened our answer to the summons to gather round the festive board, and the laudatory remarks and hearty toasts to the success of the Lake Arrowhead project closed an eventful day."

Farmers Own Trucks Farmers of Pennsylvania own 138,000 cars and trucks, according to a survey of the department of agriculture of that state.

This is an increase of 61 per cent since the United States department of agriculture census in 1919.

The motor truck total is now 17,000 or nearly double the farm truck registration of Pennsylvania in 1919.

To Engage Clutch

To let the clutch in, it is not necessary to race the engine. As the clutch is engaged, throttle should be opened just enough to prevent the engine from losing any speed. By "meeting" the clutch with the throttle it is possible to have the engine maintain practically a constant speed while the clutch is being let in.

CADILLAC MODEL TO STAY 'AS IS'

Production of Type 61 to Be Continued; Price Will Be Cut

The type 61 Cadillac will be continued on a largely increased production schedule and at materially reduced prices, according to word received yesterday by the Court Motor company, local Cadillac agents.

The local firm announces that the reduction in the price of the car has already brought enthusiastic responses from a large number of prospective buyers.

Don Lee, Cadillac distributor for California, and one of the largest motor car distributing organizations in America, was the first distributor to wire regarding the announcement. From his San Francisco office came the message that the telegram stating the reduction came as a wonderful surprise.

"Plans have been fully made to handle the great increase in sales that this announcement will bring," the California message stated.

It also said Mr. Lee sent another wire from Los Angeles ordering a large assignment of cars in addition to his regular schedule.

There Is No Substitute for Quality

When you buy a house you make sure that the foundation, the walls and the roof are constructed for permanence. Buy a motor car in the same way.

The sturdy body of the Studebaker Light-Six Sedan is an admirable example of substantial body-building. It is constructed of the finest materials and with a high degree of craftsmanship to give years of satisfactory service—no makeshift construction merely to meet a price.

Eight stout ash pillars, from floor to roof, insure permanent strength and rigidity. The four wide-opening doors are a real convenience in getting in and out. Broad windows provide clear vision in every direction.

Seats are of generous proportions with deep springs to give lasting comfort. The upholstery is of mohair velvet plush, as durable as it is attractive. The heater will give warmth and comfort on cold days.

The Light-Six has proved its reliability on the highways of the world. The ample power, quietness and remarkable flexibility of its motor are a source of continuous satisfaction. It is easy to handle in traffic. Constant gear shifting is unnecessary because it throttles down to a walking pace in high gear. Vibration, which is so annoying in closed cars, is virtually eliminated.

The low price is due to complete manufacture by Studebaker in one of the most modern and complete automobile plants in the world. Middlemen's profits are eliminated and the savings are passed on to the buyer.

The name Studebaker stands for comfort, quality and durability.

CHEVROLET WINS BIG SALES MARK

Cars Always Give Full Satisfaction to Owners, Says C. L. Smith

Faithful performance and ability to deliver entire satisfaction are the two qualities in the Chevrolet that account for the car's marvelous sales, according to an opinion expressed yesterday by C. L. Smith, local distributor of Chevrolets.

Mr. Smith produced a number of letters from motorists who have operated Chevrolets for several years. In almost every case the writer called attention to the Chevrolet's faithful performance. "It can well be said of the Chevrolet that it is the car first at the top," Mr. Smith stated. "There may be some just as good, but none better. It's the dependability when it comes to dependability under all conditions, and for economy in operation."

Receives New Booklet
Mr. Smith is in receipt of the latest Chevrolet Review, the official Chevrolet news organ. It is devoted this month to "Seeing America First in a Chevrolet." The book throughout is replete with feats performed by Chevrolet cars.

Perhaps one of the most striking photographs in the booklet is a view of San Juan Capistrano, showing more than 1000 automobiles parked in the foreground. Mr. Smith says the picture was made during one of the recent hill-climbing contests, which are held every so often in that vicinity.

The salesrooms of C. L. Smith's plant at Orange and Colorado is now filled with a complete exhibition of Chevrolets of all models.

New Sponge

Inspect a new sponge carefully before using it on the car and make sure that all sand and shells have been removed, as they will scratch the varnish badly. The sponge should be previously softened by soaking in soapy water, during which operation it should be squeezed a number of times to remove foreign matter.

London is now largely dependent upon the motor vehicle for her supply of market garden produce.

NEW STUDEBAKER CLOSED CAR HERE

Initial Display of Special Big-Six in Glendale to Be Made Today

Initial showing in Glendale of the latest model Special-Six Studebaker closed car will be made today at the showrooms of the Packer Auto company, 245 South Brand boulevard, according to an announcement made yesterday by Don Packer.

Mr. Packer stated that four of the new models arrived in the city yesterday. They will be unloaded today, he said.

The late appearance of the new models, Mr. Packer asserted, is due to the fact that the Studebaker company's production this year could not meet the demand of dealers.

Sells Big Sedan
Mr. Packer also announced yesterday that H. C. Christian of Eagle Rock, has purchased from his firm a Big-Six special Studebaker sedan. The car as sold is complete with all accessories. Delivery of the car will be made today.

The car in question is considered by officials of the Packer Auto company to be one of the prettiest and most complete automobiles ever turned out by the Studebaker company.

Included among the equipment that goes with the car are six disc wheels and tires, trunk rack, bumpers, cigar lighter, and the like.

Mr. Christian, the purchaser, is building a beautiful home on Hill avenue, Eagle Rock.

NASH SALES ARE INCREASING FAST

Gain of Ninety-five Per Cent in This Year's Business, Says Statement

Nash sales for the first ten months of 1922 show a gain of 95 per cent over the corresponding period of 1921, according to a statistical statement compiled by The Nash Times, which was received in Glendale yesterday by E. B. Sutton, of the Glendale Nash Sales.

During the month of September, the statement says, Nash sales gained 8 per cent compared with sales made in the previous month of August. The rest of the industry during the period in question, except Ford, fell off 24 per cent, it asserts.

The communication also announces that the capacity of the Nash four-cylinder car plant at Milwaukee is being enlarged.

Mr. Sutton further announces that a stock Nash, 691, hung up a new speed record between Salt Lake City and Fish Lake by effecting the 198 miles in four hours and forty-nine minutes. The previous record was lowered one hour and forty-four minutes.

The car was driven on its record-breaking trip by J. Jenkins of Salt Lake City. The latter was accompanied on the drive by Clark R. Dodge, of the Salt Lake Tribune.

The car was checked out of Salt Lake by The Western Union at 4 a. m., and arrived at Fish Lake at 8:49 a. m. It returned to Salt Lake the same day. No water was put in the radiator either going or returning, Mr. Sutton says.

average speed made by the Nash was 40.8 miles per hour, elapsed time.

NEW HUDSON CAR BEING EXHIBITED

Phaeton Model Received by Kelley-Kline Company; Other Types, Too

Announcement is made by the Kelley-Kline Motor Car company, local dealers for the Essex and Hudson cars, that the Hudson super-six, seven-passenger Phaeton, one of the very latest in Hudson models, is now on display at the firm's headquarters, 228 North Brand.

The Phaeton, together with a Hudson speedster and two Essex models, arrived in Glendale yesterday. All of the arrivals are now on exhibition at the Kelley-Kline showrooms.

P. J. Kelley, one of the firm, says that the attractive appearance of the Phaeton model, together with its roominess and comfortable seating arrangement, makes a special appeal to the owner desiring a car of this type.

Seats Seven People
"The car is made to seat seven people comfortably," he states. "The rear compartment auxiliary seats are ample in size, sturdily and rigidly built. Seats are upholstered in hand-buffed leather, which is plaited over deep cushion springs."

"This substantially-built Phaeton body is mounted on the famous Super-Six chassis, the frame of which is noted for its strength and rigidity. This protection from road shocks is provided and long life made certain."

Standard equipment includes radiator shutters, motor, cow ventilator and transmission lock (approved). Body and

OVERLAND CAR IN NOVEL DISPLAY

Winter Scene Depicted in Geo. T. Smith Window Attracts Attention

One of the most novel and artistic auto displays ever set up in Glendale is now on exhibition in the showroom of George T. Smith, local distributor of Willys-Knight and Overland cars, 228 South Brand boulevard.

The car featured in the display is the late model Overland sedan. It is surrounded with everything that tends to depict an automobile in a snowstorm.

In the creation of the snow scene, Mr. Smith says that more than 1000 pounds of salt were used.

The huge, toy bedecked Christmas tree in the display was arranged and set up for the occasion by Pendroy's.

Illuminated at Night
At night the show window is illuminated by several invisible arc lights, which tend to set off the display to perfection.

Mr. Smith said yesterday that he has been the recipient of many compliments from passersby, who drop in to comment on the attractiveness of the window.

The gist of all their conversations, including those of a great many motorists from Los Angeles, is that Glendale is right up to the mark when it comes to displaying its goods, he stated.

When starting the motor never flood the carburetor by working the choker too much.

wheels are finished in a deep rich blue. Other chassis parts are black.

TRAVELING HOME IN UNUSUAL WAY

Reo Car With Camping Body Makes 14,000 Miles at Cost of \$27

A most unusual record for repairs and parts expense for a long distance tour is contained in a letter from Chas. Uhlyk, which has been received by Mr. White of the Harry E. White, Inc.

Mr. Uhlyk in his "home on wheels" which has been mounted on a Reo Speed Wagon chassis, started out on June 6, 1921, to cover the entire Pacific Coast from San Diego to Vancouver, B. C., and returning to Seattle, touring through Idaho, Montana, Yellowstone Park, Wyoming and Colorado and crossing seven continental divides, all between twelve to fourteen thousand feet in altitude, as well as including in the trip a journey through Kansas, Missouri, Illinois, Ohio, New York, through the Adirondack Mountains to Boston, Newport and then to New York City.

Goes South From N. Y.
Starting from there south through the Carolinas, Georgia to Miami, Florida, and then to Tampa, North to Lake City, then West through Florida, Alabama, Mississippi to New Orleans.

The trip to New York, covering 9280 miles, was made at a "parts" expense of \$21.60, and to New Orleans, which is an additional 4000 miles, at \$6, which makes \$27.00 for nearly 14,000 miles.

Mr. Uhlyk's car is equipped with a camping body and possesses all the conveniences of home, having cooking and sleeping facilities, ice-box, trunk space, etc.

The MUCKER

by Edgar Rice Burroughs
Copyright 1921 by Edgar Rice Burroughs

"And he fought against those fellows of Yoka in the street of Oda Iseka's village like a man should fight. There ain't any yellow in him, Barbara, and he didn't leave me until there seemed no other way, even in the face of the things I told them to make them go. Don't harbor that against him—I only wonder that he didn't croak me; your dad wanted to, and Mallory wouldn't let him."

"They never told me that," said Barbara.

The bell rang.

"Here he is now," said Billy. "Good-bye—I'd rather not see him. Smith'll let me out the servants' door. Guess that'll make him feel better. You'll do as I ask, Barbara?"

He had passed at the door, turning toward her as he asked the final question.

The girl stood facing him. Her eyes were dim with unshed tears. Billy Byrne swam before them in a hazy mist.

"You'll do as I ask, Barbara!" he repeated, but this time it was a command.

As Mallory entered the room Barbara heard the door of the servants' entrance slam behind Billy Byrne.

PART TWO
CHAPTER I
The Murder Trial

Billy Byrne squared his broad shoulders and filled his deep lungs with the familiar medium which is known as air in Chicago. He was standing upon the platform of a New York Central train that was pulling into the La Salle Street Station, and though the young man was far from being happy something in the nature of content pervaded his being, for he was coming home.

After something more than a year of world wandering and strange adventure Billy Byrne was coming back to the great West Side and Grand Avenue.

Now, there is not much upon either side or down the center of long and tortuous Grand Avenue to arouse enthusiasm, nor was Billy particularly enthusiastic about that more or less squalid thoroughfare.

The thing that exalted Billy was the idea that he was coming back

GEORGES CLEMENCEAU, MOTORIST

An interesting character study of the "French Tiger," made on his trip to the steamer bound for the United States. He started at an early hour in a storm. He insisted on making the trip by motor, and rode with the chauffeur. He reached the pier before the attending committee, which went by rail.

APPARATUS AND DEVICES

By RALPH BROWN, RADIO ENGINEER

PHONOGRAPH LOUD SPEAKER ATTACHMENTS

These attachments are provided with a six foot cord and an attachment plug which may be inserted in the jack of the amplifier. Where these loud speaker devices are employed, it is necessary to use amplifiers just as it is necessary to do so with other loud speakers.

The large majority of people using radio receivers for the reception of music and speech are also possessed of a phonograph. By employing the illustrated phonograph attachment it is possible to convert your phonograph into a loud speaking device for radio reception where the music or voice is to be heard by a number of people throughout the room.

In order to use this new attachment it is but necessary to remove the reproducer or "sound box" as it is called, from the tone arm of your talking machine, replacing it by the phonograph attachment which is designed to easily slip into place.

There are two models, one for the Victrolas and the other for the Graphonolas. The Victor model, in addition to fitting the Victrola machines, will fit any other talking machines having the same size arm.

RADIO EXPLAINED

BY LIEUT. JOHN R. IRWIN
INSTRUCTOR U. S. AIR SERVICE

EDISON CELLS

This is a type of storage battery developed by the famous Thomas Edison, as the name indicates, and is also known as the "nickel-iron and alkaline cell."

In construction, the positive plate consists of alternate layers of nickel hydrate and pure nickel flake, packed in perforated nickel plated steel tubes. Several are arranged in a steel frame. The negative plate is of iron oxide packed similarly. These plates are immersed in a 20 per cent solution of caustic potash and water, and the whole is contained in a tightly sealed sheet steel container. This electrolytic solution carries oxygen between the plates, but does not form chemical compounds with the active materials, remaining approximately constant in density during charge and discharge.

The voltage of an Edison cell while charging may rise to 1.8 volts. When discharging this will drop suddenly to about 1.4 volts and as the discharge continues will drop more gradually to 1.1 volts, near the end of the discharge. Discharge should not be allowed to go below 0.9 volt; when that rate is reached the cell should be recharged.

If it is found after much use that the density of the alkaline electrolyte has fallen as low as about 1.16, measured by the usual means of ascertaining specific gravity of fluids, the solution must be renewed. This should be done by pouring off the old and refilling with entirely new electrolyte.

The height of the electrolyte above the plates should always be kept at least half an inch above the plates, and in some types the name plate will specify more, as there is always more or less evaporation of the solutions. This may be accomplished by adding distilled or chemically pure water to bring the solution to the requisite height.

(Continued in next issue)

Uncle Wiggily Bedtime Stories

By HOWARD R. GARIS

UNCLE WIGGILY AND JIMMIE'S JAM

Jimmie Wibblewobble, the boy duck, had some jam. Jimmie was very proud of his jam. Jimmie had jam on his bread and butter. Jimmie also had jam all over his face and—

But there, I had, I suppose, much better tell you the story from the very start, and then you can understand it better. But please do not forget that it was Jimmie who had the jam—no one else.

Once upon a time—one day when there was no school—Uncle Wiggily Longears, the bunny rabbit gentleman, started out from his hollow stump bungalow.

"Where are you going?" asked Nurse Jane Fuzzy Wuzzy, his muskrat lady housekeeper.

"Through I don't know that I need to ask," she went on. "I can very nearly guess. It is adventuring that you are going, Mr. Longears?"

It is adventuring that I am going, Nurse Jane," said Uncle Wiggily, twinkling his pink nose. And off adventuring he went. Pretty soon Uncle Wiggily was hopping his way through the woods, the rabbit gentleman's paws rattling and rustling in the dried leaves which the cold fingers of Jack Frost had plucked from the trees.

"Ha! There is the pen house of my friends, the Wibblewobble ducks," spoke Uncle Wiggily to himself, as, looking through the trees he saw the home of Lulu, Alice and Jimmie Wibblewobble. "I'll just see if Lulu is making any more corn cakes, or if Alice needs me to sew another sofa cushion on her dress," chuckled the bunny as he hopped toward the duck house.

But neither Alice nor Lulu was at home. There was only Jimmie, the boy duck. Uncle Wiggily saw Jimmie in the kitchen.

"What are you doing, Jimmie?" asked the bunny.

"Eating," answered Jimmie, speaking as though his mouth might be a half, or even three-quarters full.

"Eating?" asked Uncle Wiggily, twinkling his pink nose. "Eating what?"

"Not what—jam!" quacked Jimmie with a laugh. "I'm eating jam, Uncle Wiggily."

"Just jam?" inquired the bunny.

"No—not just jam—it's raspberry jam," answered the duck boy. "My mother doesn't make any just jam."

"Oh, you are joking," said Uncle Wiggily.

"Choking! No, I'm not choking," chuckled Jimmie, "though mother does say I fill my mouth too full. But I'm not doing that now."

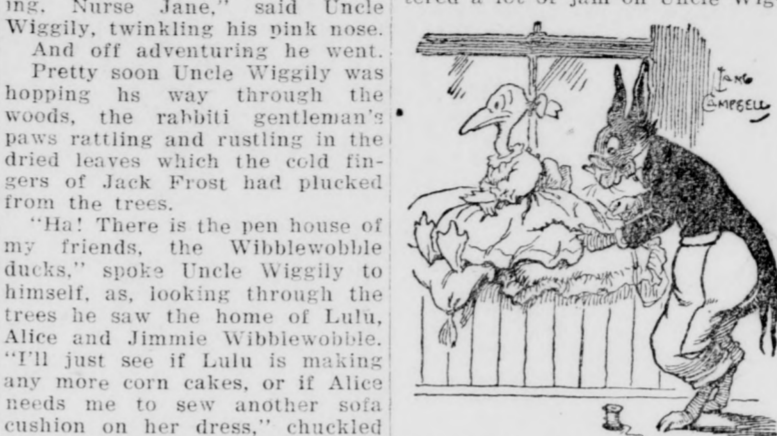

"I said JOKING!" cried the bunny loudly.

Uncle Wiggily twinkled his pink nose very fast. It was easy to see that Jimmie was in a cutting-up mood that morning. Like Uncle Wiggily, Jimmie was playing innocent little tricks.

"Come in and have some jam, Uncle Wiggily," invited Jimmie the duck. "It's Saturday and there's no school."

So the bunny gentleman hopped into the Wibblewobble duck house, and there the rabbit saw Jimmie sitting at the kitchen table, and on the table was a pot of red raspberry jam. There was also on the table some bread and butter.

"This is what I meant, Jimmie," said Uncle Wiggily, pointing to the bread and butter. "I

Uncle Wiggily began to sew on the duck girls dress

gily's face, until it looked as though the rabbit had the nose bleed.

"No matter," laughed Uncle Wiggily. "I can wash the jam off after I eat." Then he began eating his bread and jam, and the more Uncle Wiggily ate the more he wanted. Jimmie spread slice after slice of bread and jam, and once he dropped a slice. But he stopped and caught it before the bread could fall on the floor. Only a lot of jam splattered in Jimmie's face—and there he and Uncle Wiggily were all jammed up, so to speak, if you will kindly permit me to say so.

Then, all of a sudden, into the duck house came the bad Bob Cat. He gave one look at the jam-covered faces of Uncle Wiggily and Jimmie, and then the Bob Cat gave a howl.

"Oh, what terrible hobgoblins are these?" howled the Bob Cat. "I thought Halloween and false faces was over, but here are some queer creatures with false faces on! I thought I'd find Uncle Wiggily here—the Fox said he saw him come in—but the Fox was wrong. Oh, don't bite me, hobgoblins!" And away the Bob Cat ran, getting no ears at all.

"The jam on our faces fooled the Bob Cat!" laughed Jimmie. "I'm glad we ate the jam, aren't you, Uncle Wiggily?"

"Yes," answered the bunny. "I am hungry for jam!" Then they washed their faces and felt much better. And if the clock doesn't try to swing by its hands from the curtain pole and make the goldfish laugh, I'll tell you next about Uncle Wiggily and Neddie's honey. Copyright 1922, by McClure Newspaper Syndicate

THEATRES

The Glendale

With "Little Wildcat" showing at the Glendale Theatre today, Alice Calhoun demonstrates to a most critical that she has developed into a star of the first magnitude. Set off by a story of unique plot and strong action, her loveliness and talent as she flashes through the colorful scenes leave one entranced.

Sunday's program brings popular little Wesley Barry in the smashing Marshall Neilan hit, "Rags to Riches," the story of a boy's dream come true. This is a film that will thrill the children and tickle the grown folks.

"Reckless, imitable 'Wes' somehow typifies the unconquerable spirit of youth and its adventurous ways. That in the last analysis, is why the whole world, big and small, loves him.

The T. D. & L.

In "The Jit," which shows at the T. D. & L. Theatre today, Marguerite De La Motte has a more dramatic role than in any of the Fairbanks pictures in which she scored her first mark, while Ralph Graves, the Griffith product, puts his pleasing personality over in a role of dramatic calibre.

Sunday's program will feature the widely discussed and much heralded photoplay, "A Woman's Woman," with a strong all-star cast. The reason for the phenomenal success of this picture lies in its fidelity to that sort of inner home life to be found every day, everywhere, from Broadway, New York, to Main Street, Gopher Prairie. Production, cast, direction to make the film manager Ralph Allan declares is a genuine treat.

Battle's Survivors
In Annual Banquet

E. L. Osborn, of 406 West Wilson avenue, aged 75, was the youngest of the ten survivors of the battle of Prairie Grove, Ark., who gathered at the Hayward hotel, Los Angeles, Thursday afternoon for their fifth annual banquet and reunion. The oldest was George C. Searle, aged 92.

Once again the Rebels, under General Hindman, were dispatched by Generals Blunt and Ferran of the Union army. Echoes of December 7, 1862 were predominant.

Sincerity is inclined to obedience.

The Sport Crucible By Davis J. Walsh International News Service Sports Edition

NEW YORK, Dec. 9.—Anticipating the future by a matter of ten years, perhaps less, baseball men declare that the day is not too distant when the Pacific coast league will be cut loose from its present obligations and operate independently on the basis, if not the status, of a third major league. This is ordained, inevitably, they say.

CLUB CONSIDERS LOCAL PROBLEMS

Kiwanians Hear Discussion on Community Service and Other Topics

(Continued from Page 1)
ord opposed to annexation was laid on the table.
P. J. Hayselden of 612 East Broadway, recently elected to the Chamber of Commerce directorate, stated that every one of his associate directors was in favor of Glendale retaining her identity, but that they did not believe that they should take any official stand on the subject.
Vital Importance
Attorney Bert Woodard of 111 East Broadway expressed his opinion that it is the function of the Chamber of Commerce to give consideration to matters of civic interest and said that the question of annexation, or whether Glendale should lose her identity, certainly seemed to him to be one of vital importance to the community.
Harry Girard recommended that the question of annexation should be left to a popular vote and deprecated the fact that it is being made a cause for argument in different local organizations. He said that personally he was opposed to annexation.
A short debate on the subject of annexation at some future meeting was suggested by Dr. John Anderson of 192 West California avenue. He said that this seemed a good way in which to get both sides of the question. He asserted that this is "the live subject of the day."
George T. Smith of 228 South Brand boulevard asserted that it did not seem wise for the Kiwanis club to dictate to the Chamber of Commerce what its views should be on any subject.
Talk on Education
"There are five million uneducated people in America today," stated Attorney James F. McBryde of 111 East Broadway in a short speech on education. "United States of America stands ninth among the nations of the world in literacy. The business man of today is extremely interested in education. One thousand men are killed in the mines of this country every year because they cannot read even the simplest signs of warning. The future of this country is wrapped up in education."
Nomination of club officers to be voted upon at luncheon on December 22 were read by Secretary Don H. Webb as follows:
President—A. L. Baird, A. L. Ferguson and W. C. Page.
First vice-president—Herman Nelson.
Second vice-president—Dr. T. C. Young.
Trustees—D. H. Smith, District trustee—Fred Deal.

Too Much Responsibility Is Placed On The Church

MANY PEOPLE outside of the church who want to live and bring up their children in a clean, decent community look to the church to see that the surroundings are kept clean, shifting all responsibility from their own shoulders.

Does any evil threaten? Let the church arise and keep the menace out. Of course this is one of the functions of the church and she usually holds herself answerable to the community in matters of this kind, but the average citizen places too much responsibility on the organization.

Are funds needed for any philanthropic purpose? Let the church and her organizations provide them.

Does a church member go wrong? It's the fault of the church, although the causes that led to it are entirely outside.

So the community as a whole is a little unfair toward the church.

The church should not be expected to assume duties that belong to the entire community.

And it should be remembered that church members are human beings, susceptible to evil influences, otherwise the millennium would be here and churches would not be needed.

Let us as a community be fair in our attitude toward the church.

CHURCHES

PACIFIC AVENUE COMMUNITY METHODIST
Church at corner of Harvard street and Pacific avenue. Rev. H. C. Mullen, pastor; John Campbell, superintendent; Sunday school; George M. Moore, choir director; Sunday school, 9:30 o'clock; morning worship, 11 o'clock; sermon by Rev. Cole, "If There Is a Heaven, What and Where?" and from the question box, "Will a man go to hell because he desires to possess? Just what is covetousness?" will be answered.

St. Anne de Beaupre basilica will be reconstructed next summer, it was learned from the Roman Catholic fathers. The new church should be completed by the spring of 1924. The old church ruins have now been removed.

A woman is the patentee of a metal rod that prevents lace curtains flying out of open windows.

MAINTENANCE OF CAR GETS NOTICE

Lyman Clark Says Operating Cost of Auto Dealers on Local Dealer

"Car maintenance is becoming a big consideration in the minds of car owners and prospective purchasers," says Lyman P. Clark, of the Glendale Motor Car company, 124 West Colorado street, Maxwell dealers.

"The rapid decline in the price of many popular cars has helped bring maintenance into the spotlight. A great many can now afford to buy a car and they are now thinking more about the price of maintenance than about the price of the car itself.

Depends on Dealer
"The cost of maintenance and the satisfaction of ownership will always depend upon the local dealer, for he is responsible for both, and nobody else can assume that responsibility. The best place in town to get parts or service for any car should be from the dealer who sells the car. That it isn't always the case does not make the statement any less true. It's up to the local dealer to have more facilities for service and to render service more efficiently and economically than anybody else on that particular car.

"And this is the reason why a lot of people are picking out dealers instead of cars when they go shopping for an automobile today."

Women's Class Has Bible Instruction

The weekly meeting of the Thursday Morning Bible class for women was held at the Glendale Presbyterian church December 7, at 10 o'clock. There were 179 women in attendance.

The teacher, Mrs. A. L. Dennis, of Los Angeles centered her remarks around the tabernacle erected by the Israelites upon their exodus from Egypt. She pointed out that God directed the building of this house of worship and that everything about it had divine significance.

An "altar," Mrs. Dennis pointed out, always meant a "lifted up" place, lifted up in order for the making of sacrifice. This, she explained, illuminates Christ's meaning when he said: "If I be lifted up, I will draw all men unto me." The word altar, therefore, was a foreshadowing, and forever more will be an altar, of Christ's atonement for the sin of the world.

These instructive classes will continue to meet every Thursday morning at 10 o'clock, with Mrs. Dennis as leader.

Becomes Good Boy

By DOROTHY R. BROWN, Age 12, Doran Street School.
One day Capeto, a poor old gentleman went into his friend's house and begged a piece of wood, to make himself a wooden puppet to travel around the world with, and earn a piece of bread. His friend gladly gave him a piece and he eagerly went home to start his puppet. As soon as the puppet was finished he sprang out of his father's arms and into the street. When finally he was caught and taken home he found his father not there. He lay by the fire and fell asleep, and when he awoke he found his feet burned off. Finally his father came home and carved the puppet some new feet.

Pinnocchio finally decided he didn't want to go to school, so he ran away. A man who was in charge of a puppet show gave him five gold pieces to take to his poor father. Instead of doing that he went with some bad companions and they stole it all. After many hardships he and his father met and they built a house for themselves, and Pinnocchio decided to be a good boy, and he and his father enjoyed a very happy life.

Number Killed In Bulgarian Revolt

VIENNA, Dec. 9.—Via radio—A number of persons were killed and wounded in the revolt of Bulgarian and Macedonian "Komitadjis" against the Bulgarian government, according to advices received here today from Belgrade. The Neue Freie Presse described it as uprising against the Macedonian policy of Premier Stambulinsky.

New Search Starts for Clara Phillips

LOS ANGELES, Dec. 9.—Virtually starting from the ground and working up, a brand new search was started today by Sheriff William I. Traeger and his deputies for Clara Phillips, "hammer murderer," who, since her escape from the county jail early Tuesday, has played a successful game of "hide and seek" with the officers.

Convinced that the former chorus girl was given "inside" as well as "outside" assistance in effecting her flight from jail, Sheriff Traeger ordered an entirely new and thorough probe of her getaway.

Pittsburgh, it is said, stands on ground once given in exchange for a violin.

Young Patriots

By FRIEDA DAVIS
16 Years, AS
Glendale Avenue School

Two happy, carefree girls with beaming faces, who were walking down the street, suddenly looked serious and ashamed. Two old men somewhere in the eighties were walking in front of them discussing something.

One man said, "It certainly is sad to think that we are so easily forgotten. In 1865 we were everything."

The other replied, "I wonder how we could appeal to the people of this town, to get them to stay at home on the Fourth, and celebrate it with their own war veterans?"

Postage, the town in which they lived, was very small and quiet. On the Fourth of July, as on other holidays, almost everyone planned to celebrate at a larger city.

These girls were to graduate from school the following week. The girls of the class planned to rent a cottage for a two-weeks' vacation up in the mountains. The boys were going camping, as soon as school was out.

The grandfather of one girl was a war veteran. How was he to celebrate the Fourth? He must stay at home by himself, as he was too old and feeble to endure a whole day away from home with the rest of the family, who were going to another city to celebrate.

The following week was a very busy one for the girls of the class, filled with mysterious planning, and meetings. No adults were included in these mysteries.

At the graduation exercises, to the astonishment of everyone, a program for a Fourth of July at home was announced. This program included a parade, to be followed by a banquet for the war veterans of Postage. Everyone was welcome.

The parade consisted of Civil War veterans, soldiers and sailors of the world war, Boy Scouts, Girl Scouts, school children, and a float, upon which sat Miss America and Liberty. On the program were many patriotic songs, speeches, and acting with appropriate old-fashioned costumes.

The day after the Fourth the girls went camping and enjoyed themselves all the more because of what they had done. They had aroused the people to an interest in their own veterans which had been dead for many years.

Music In Churches of Glendale on Sunday

PRESBYTERIAN
Morning, prelude "Elevation" (Gullmunt); anthem, "They That Trust in the Lord" (Mercer); Miss Elizabeth Mottern, soprano, Mrs. Fannie Marple Retts, contralto, J. Malcomson Huddy, tenor; C. Clifford Riggs, baritone; soprano solo, "Whither Shall I Go From Thy Spirit?" (McDermid); Miss Mottern, prayer response, "The Soul That Clings to Thee" (Bastie); contralto solo and quartet, "We've a Story to Tell to the Nations" (Nichol); postlude, "March" (Silas).

Evening, organ recital: "Even-song" (Johnston), "March Funerbre" (Chopin), "Litanies" (Schubert); quartet, "God Is Love" (Tom Elliott); offertory, "Prayer" (Grove); quartet, "There is a Land" (Abbott); gospel solo by Mrs. Retts; postlude, "Postlude" (Stuart).

CASA VERDEGO METHODIST
Morning, special music, anthem "Only Thee" (Park) by choir; solo, "The Light Is My Light" (Allittson) by R. D. Jones.

FIRST BAPTIST
Morning, prelude, "Sweet Visions" (Phelps); anthem, "The Heavens Are Declaring" (Beethoven); offertory solo, "Lead Thou Me On" (Wood) by Mrs. Paul Elliott.

Evening, prelude "Unspoken Words" (Moore); anthem "The Radiant Morn" (Woodward); offertory, quartet, "Jesus Savior Pilot Me" (Schnecker).

The Victory

By BILLY HALSTEAD
13 years of age
Glendale Avenue School

Two boys were talking just outside the gymnasium door. One was tall, with dark hair, and of a muscular build. The other boy was about medium sized with light brown hair. The smallest boy's name was Jack, the other's was Tom. They were both going to Princeton college and had known each other since they were little boys.

"Are you going to play in the game with Yale tomorrow?" said Jack. "I'm going," said Tom. "It will be a hard game because Yale has a good team." "Well, let us go to our room and get ready for dinner," said Jack.

In the morning they both got up feeling fine. Just as they got through dressing the football coach called them to practice. They practiced for about two hours. And then they went to rest and got ready for the game. After awhile the students from Yale and Princeton started to fill the grandstands and bleachers. Then the teams came out, Tom and Jack among the Princeton players.

Then the two teams got in formation. The whistle blew, and the game started.
Yale kicked the ball; one Princeton player fumbled, another player picked it up and started to run down the field but before he got ten yards he was tackled.

The first half of the game the Princeton team scored. The Yale team made three points by a field goal in the third quarter, and soon both teams played hard to make a touchdown. Tom had been playing left end and Jack had been playing left tackle.

After the third quarter Jack played quarterback and when there was only three minutes to play Jack got the ball and made a long forward pass. Tom caught the ball and started down the field toward the Yale line. When he was on the five yard line he was tackled by the Yale fullback. Then the teams got in formation; they had a half minute to play. The Princeton team center rush and Jack, who was playing quarterback, pushed through the line and took the ball about one foot over the touchdown line. The whistle blew and the game was over. The score was 3 to 6 in Princeton's favor.

In spite of excessive floods in the northern part of the Changsha district of China, excellent harvests are now being brought in. Severe famine conditions existed for more than a year throughout this district but a short time ago.
