Magnolia Nursery, Orchard and Farm

W. C. JONES, Proprietor

Pecan Trees Seven Years Old, With Corn 60 Bushels to Acre.

8th Year—Pecan Trees 8 Years Old, \$35.00 Nuts; \$250.00
Irish and Sweet Potatoes, 2 Crops.

9th Year—Pecan trees 9 Years Old, \$220.00 Worth of Nuts;
25 Bushels of Corn to Acre.

PRICE LIST SEASON 1927-'28

THE EXPERIMENTAL stage of the pecan is past, and we are coming into the fuller realization of what the pecan is to be in the development of our great country. The trees are proving their worth in the bearing of the finest nuts with the best of prices. The pecan area is practically the cotton area of the United States. The best cotton lands produce the best pecans. After a grove is well established, a pound of pecans can be grown cheaper than a pound of cotton.

Overproduction is practically out of the question. Out of more than 120,000,000 people in our nation we think we can safely say that not more than one in a thousand know that there is such a nut grown as the fine papershell variety. The value of a pecan grove of budded varieties in full bearing is difficult to estimate, the writer knows two trees in Cairo, Ga., well worth \$1,000 each. After twenty-five years of experience, the writer is convinced that if you will plant a small grove of budded pecans, and care for them well, they will care for you in old age, and no better commercial investment can be made on a large scale.

The prices below are for strong, well rooted trees dug as ordered, carefully packed and delivered to the express or railroad company at Cairo, Ga.

PRICES 1927-'28

	10	100	1000
2 to 3 feet	\$.80	\$ 7.00	\$ 60.00
3 to 4 feet90	8.00	70.00
4 to 5 feet	1.00	9.00	80.00
5 to 6 feet	1.20	10.50	90.00
6 to 8 feet	1.35	12.50	100.00
8 to 10 feet	1.75	15.00	125.00

5 trees go at 10 rates, 50 trees at 100 rates.

We are careful to send out only the strongest and best budded trees, and we guarantee them to be true to variety.

We use budding wood from our own trees, which can be seen fruiting in our groves. We will be glad to meet you at train and have you visit our groves and nursery, one mile from city. We have been complimented by the state department as growing the finest trees in Georgia.

Cash should accompany all orders, or satisfactory reference be given.

All orders accepted subject to weather and other conditions beyond our control.

VARIETIES

SCHLEY—is decidedly at the head of the list. It is the best flavored and highest priced nut.

STUART—is adapted to a larger territory than any other nut, and it is quite a favorite with many.

FROTSCHER—as to quality, is next in favor to the Schley on the market. It is a strong and beautiful tree and is quite a favorite in some sections.

SUCCESS—is a very fine nut; fruits extra well, and is quite a favorite. It is our favorite, also.

MONEYMAKER—is a very strong and healthy tree and extra fine bearer. The nut is a little under-size, but will more than make up in the bearing, and is becoming popular.

MOOR—is a thrifty tree and a heavy bearer. Suitable for South Georgia and Florida.

Address all orders to,

W. C. JONES,
Cairo, Georgia.

—Don't throw me in the waste basket, I will help you.—

PECANS AS FOOD

Pecans are known by all who have ever had the privilege of testing them to be a delight to the palate, but in this day when food values are being considered as never before, it is of particular interest to note what Dr. Kellogg, of Battle Creek Sanitarium has to say of the pecan as an article of food. Dr. Kellogg is recognized as an authority on this subject.

Says Dr. Kellogg:

"I regard the pecan as one of the very finest of nature's choice products. A pound of pecans contains more nourishment than other kinds of food. A pound of pecans contains as much protein as half a pound of meat, as much fat as three-fourths of a pound of butter and as much starch or carbohydrates as one-fourth of a pound of bread, so a pound of pecans is the full equivalent of a pound and a half of other highly concentrated and highly nourishing food. In comparing total values, a pound of pecans is worth in nutritive values, two pounds of pork chops, three pounds of salmon, two and a half pounds of turkey or five pounds of veal.

"An acre of land planted to pecans will produce from four to ten times as much nourishment as one used for pasture. In the next century nuts will largely, if not entirely, take the place of meats on the bill of fare and the pecan will assume its rightful place at the head of the list of nourishing and digestible foodstuffs."
