PLATE,

HOME LANDSCAPES

HICKS NURSERIES
WESTBURY • • LONG ISLAND

IS THIS FOR YOU?

This booklet has been written for the thousands of America's busy men and women who appreciate the refined pleasures and beauty that should attach to a suburban home and who desire to develop the greatest amount of beauty at a minimum of expense and care.

"Who Gets Up Your Catalogue?"

Landscape Architecture, Inc., New York City, the official organ of the American Society of Landscape Architects, has prepared the plans and perspectives. The sketches are by Hal Burrows, of New York, and J. M. Rosé, Summit, N. J.; sketches of planting evergreens by L. Lundquist; the photographs by J. G. Bennem and J. Horace McFarland Co.; general plan and text by Erdman Cain and Henry Hicks.

Customers Are Thanked

for the inspiration that has led to this booklet. They have graphically described the horticultural needs of a country home, and freely given their methods of success. It is even more fun to fit trees to their needs than to grow them in the nursery.

Your Questions

are indexed on the inside back cover, also the common and botanical names, the latter from Bailey's "Standard Cyclopaedia of Horticulture."

Guarantee—No Risk to You

We guarantee every plant from our nursery, and give new ones for those that do not grow satisfactorily. The cost of planting and transportation of replaced trees is borne by the purchaser.

Planting and Care

This guarantee holds even if your men plant. It is better that they prepare the ground (send for sizes of holes), plant, mulch, or cultivate and water. Summer watering is the most important. You can keep the plants a week or two by firmly covering the roots with moist earth immediately after delivery.

Prices, Delivery, Packing

The prices in this list are for trees and plants dug and loaded at our nurseries. We charge for delivery, or packing in boxes, bales, or crates for shipment. On request we shall be pleased to estimate the cost of the above, and the cost of freight or express. Five plants are sold at the 10 rate and 50 at the 100 rate.

“WE WANT SHADE”

Provide plenty of shade in developing your landscape. The children must have it if they are to play out in the fresh air, and your friends will come and share its refreshing qualities with you. Where should the trees be located? Usually leafy masses are acceptable at the ends of the house, making it look cozy and homelike. The sketch on page 11 suggests locations for special shade trees. The drive can lead through cool and shady groves.

“I did not know it was possible to get cool shade right away on a sun-scorched prairie.” See pages 6 to 9.

NORWAY MAPLE (*Acer platanoides*)

For most soils and with usual care, this is the most satisfactory shade tree. Ours have all the points of a good tree—single leader, full round head, straight trunk, ideal fibrous roots. They have had twice the usual space to grow in and have been transplanted once more than usual; therefore, they excel the ordinary tree.

CIVIC ORGANIZATIONS

The Glen Cove and Locust Valley Neighborhood Associations planted 199 of these Maples. These trees will give you the widest shade and beautify your village most quickly.

John A. Lisheke, of Unionport, Bronx, who canvassed his neighborhood for 44 of these Norway Maples, says: “I did that only to improve the neighborhood.” Others can do the same and feel assured that the trees will satisfy everybody.

REAL ESTATE DEVELOPERS

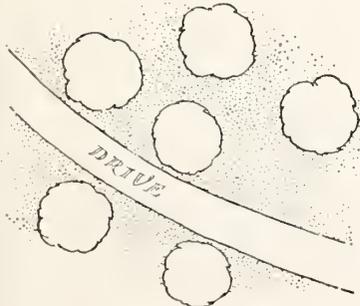

Thousands of our Norway Maples beautify the streets of Long Island and Brooklyn. The size and quality of our Maples and Pin Oaks will help sell your property. They are guaranteed to grow satisfactorily.

8 ft. high.....	Each	10	100
10 ft. high, 1½ in. diam.....	\$1 00	\$9 00	\$80 00

14 ft. high, 2½ in. diam., \$8 each,	\$60 for 10	

PIN OAK (*Quercus palustris*)

Our modesty refuses to be bridled when it comes to Pin Oaks. For stately entrance avenues and plazas they are the best trees we know of on the market. Shade-tree commissions will find them ideal. They have been root-pruned and so we guarantee them to grow satisfactorily.

8 ft. high, 1 in. diam.....	Each	10	100
10 ft. high, 1½ in. diam.....	2 00	17 50	150 00

SILVER LINDEN

Tilia tomentosa, or T. argentea

A beautiful lawn tree with healthy foliage till severe frost.

ARCHITECTS

We know of no better trees for pleached alleys and formal plazas. Use these and you can publish pictures of your work the first summer.

10 ft. high, 2 in. diam.....	Each	10

SHADE-TREE GROUP, \$10

This includes 6 trees of our best quality, 8 to 10 feet high. We will pack securely and ship, or you can send for them, or we will deliver at cost. In the collection are trees of exceptional merit but not commonly known.

"Let Me Have All the Different Flowering Trees You Have"

This garden-lover was not guessing in making such a request. Most any tree, if healthy, will beautify the landscape. Trees that flower add just so much more charm. Even the Wild Apple in the hedgerow has a loveliness any of us would be glad to reproduce in our landscape. There are Magnolias, Flowering Cherry, Silver Bell, and—well here they all are, arranged in about the order of their flowering. Scatter them in your woodland, if you have any. They will make your garden delightful in early spring.

YULAN MAGNOLIA, WHITE

Magnolia conspicua

The flowers are like pure white cups, and are sometimes caught by April snows.

	Each	10
4 ft. high.....	\$5 00	\$45 00
6 ft. high.....	10 00	80 00

SOULANGE'S MAGNOLIA, PINK

Magnolia Soulangeana

It has taken years for these big plants to grow. You can not get more of high-class flowers for less expense. You can take them right in bloom with big balls of earth, but you could get more fun to order them in March and see the pink buds peep out from their pussy-willow caps.

Start a Magnolia garden and you will have good reason to open your country house early in April. Come and talk it over. We will help fit it into your grounds. You will find Magnolias—like evergreens, Rhododendrons, Oaks, flowers, and fruits—all hobbies of the Hicks Nurseries, wherein you will get big values and safe guidance.

	Each	10
3 ft. high.....	\$1 75	\$15 00
4 ft. high.....	3 50	30 00
5 ft. high.....	6 90	50 00
6 ft. high.....	10 00	90 00
8 ft. high.....	15 00	140 00

LENNE'S MAGNOLIA, RED

Magnolia Soulangeana Lennei

Deep red cups the first of May.

	Each	10
6 ft. high.....	\$10 00	\$90 00

Magnolia
Soulangeana

JAPANESE FLOWERING CHERRY

Prunus Pseudo-Cerasus

The flowers that have made Japan famous will certainly add some splendor to your garden. The little double "paper roses," as one customer calls them, come early in May. We can supply deep or light pink. State preference.

	Each	10
5 ft. high.....	\$2 00	\$15 00
6 ft. high.....	3 50	30 00
8 ft. high.....	5 00	40 00

SILVER BELL (*Halesia tetraaptera*)

A glorious little tree with the branches thickly hung with the snowy white bells in early May. Scatter them in your shrubbery or through open woodland with Dogwood. Low prices permit a lavish use.

	Each	10	100
3 ft. high.....	\$0 50	\$4 00	\$35 00
4 ft. high.....	75	6 00	50 00
5 ft. high.....	1 00	9 00	75 00

DOUBLE-FLOWERING PEACH

Prunus Persica var. camelliaeflora plena

Gives a quicker result than any other flowering tree. The sight is magnificent as the tree bursts into clouds of red, pink, or white. State colors preferred.

	Each	10
4-5 ft. high.....	\$0 50	\$4 50

WHITE-FLOWERING DOGWOOD

Cornus florida

Besides the sheets of white in early May, it should be considered for its healthy foliage and rich fall coloring. The thing to do is to decide whether you can use 10,000 or 1,000. That depends on whether you can naturalize them in woodland or whether they are to be distributed in your shrubbery and among evergreens.

	Each	10	100
3 ft. high.....	\$0 50	\$4 50	\$40 00
4 ft. high.....	60	5 50	50 00
6 ft. high.....	1 00	8 50	75 00
8 ft. high.....	1 25	10 00	90 00
10 ft. high.....	3 00	25 00	

RED-FLOWERING DOGWOOD

Cornus florida var. rubra

It has all the beauties of the species, with deep pink added to increase its popularity.

	Each	10
2 ft. high.....	\$1 00	\$7 50
3 ft. high.....	1 50	12 50
4 ft. high.....	2 00	17 50
5 ft. high.....	3 00	27 50
6 ft. high.....	5 00	40 00

Flowering Apple

Japanese Dogwood

Flowering-Fruit Group

Here is a new collection to show your friends. Use the order sheet in the back. Twenty-five plants in all for \$10. Transportation is not included. 2 Flowering Apple, 1 Flowering Cherry, 1 Flowering Plum, Pink, 1 Flowering Peach, 5 Flowering Quince, 5 Beach Plum, 5 Chinese Quince, 5 Flowering Almond.

Some of these will be planted in tubs so that you can take them home with you, but you had better order them now. Price on selection or send for list.

JAPANESE DOGWOOD (*Cornus Kousa*)

As yet a rare plant. More glorious than the native Dogwood if such a thing is possible. Try them along the Piping Rock trails. They will harmonize.

	Each	10	100
2 ft. high.....	\$0 60	\$5 00	\$40 00
3 ft. high.....	1 25	10 00	60 00
4 ft. high.....	1 75	15 00	100 00
5 ft. high.....	2 25	20 00	150 00

JUDAS TREE (*Cercis canadensis*)

A mass of rosy purple from the middle to the last of May. The pea-shaped flowers crowd each other along the twigs and branches.

	Each	10
4 ft. high.....	\$0 50	\$4 00
5 ft. high.....	75	6 00

GOLDEN CHAIN (*Cytisus Laburnum*)

A tall shrub with long clusters of yellow flowers similar in form to the Wistaria. Let it peep out along a woodland drive or smile in the shrubbery.

	Each	10
3-5 ft. high.....	\$0 75	\$5 00

FLOWERING PLUM (*Prunus triloba*)

The long, slender branches are covered with double delicate pink flowers almost an inch in diameter. A pretty tree for the flowering-fruit garden.

	Each	10
4-5 ft. high.....	\$0 75	\$6 00

UMBRELLA MAGNOLIA (*Magnolia tripetala*)

A surprise garden can be made in an open glade in moist woodland. Pure white flowers are a foot across in the midst of tropical umbrella-like leaves. The birds pick the scarlet seeds hung on silken threads. Carpet the ground with pink, orange, or white Azaleas.

	Each	10
4-5 ft. high.....	\$0 75	\$6 00

PAUL'S DOUBLE SCARLET THORN, or HAWTHORN

Crataegus Oxyacantha var. *Paulii*

A small tree or large shrub; flower bright scarlet, very double, last of May.

	Each	10
4-5 ft. high.....	\$0 75	\$6 00

SORREL TREE (*Oxydendrum arboreum*)

The tiny white bells in midsummer and the brilliant fall coloring are the two features which place this among the trees of higher merit.

	Each	10
6-7 ft. high.....	\$1 00	\$7 50

FLOWERING APPLE

Pyrus Malus

It is hard to imagine anything more dainty than a collection of Flowering Apples. We have several varieties embracing single and double blossoms, in brilliant red tints, delicate pink, and white. They sound a very happy note in the garden or shrubbery or woodland the middle of May. The little cherry-like, red and golden fruits feed the birds all winter. We will send you an assortment of five trees for \$5.

	Each	10	Each	10
3 ft. high.....	\$1 00	\$7 50	5 ft. high.....	\$1 50 \$12 50
4 ft. high.....	1 25	10 00	6 ft. high.....	2 00 17 50

GOLDEN WREATH TREE

(*Koelreuteria paniculata*)

Here is something interesting at an unusual season. The yellow flowers appear late in July continuing in August in panicles a foot long. Also called Varnish Tree.

	Each	10	100
4 ft. high.....	\$0 50	\$3 50	\$30 00
5 ft. high.....	75	6 00	50 00

JAPANESE PAGODA TREE

Sophora japonica

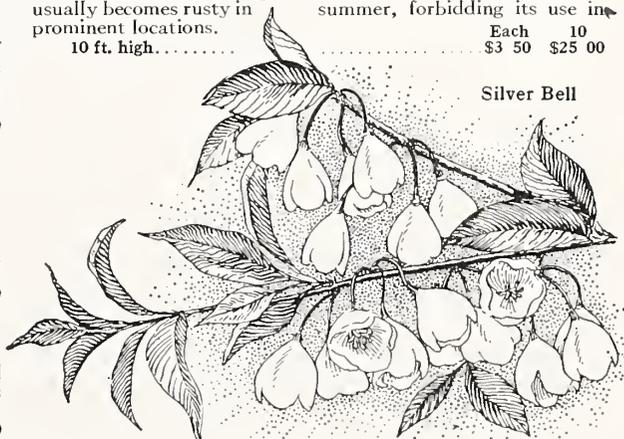

This has flowers shaped like the Locust, coming in August. You may have seen it at Forest Hills station and could not learn the name. It dislikes a dry situation.

	Each	10
4-5 ft. high.....	\$0 60	\$5 00

HORSE-CHESTNUT (*Aesculus Hippocastanum*)

An attractive flowering tree in deep rich soils. The foliage usually becomes rusty in summer, forbidding its use in prominent locations.

	Each	10
10 ft. high.....	\$3 50	\$25 00

Silver Bell

“They Have to be Unusual Lawn Trees If We Are to Consider Them”

You are not making the most of your grounds if you do not have cool areas of shade to linger in as you wander over the grass and enjoy the flowers and berries.

said one of our best-posted customers, and we fancy he meant it or he would not have walked miles back and forth in our nursery studying the different trees. Only those of unusual

rank excited any interest whatever. The trees he selected after several days' study are those we offer on these two pages. They represent the better type of lawn tree and at once show high horticultural taste.

ENGLISH or EUROPEAN BEECH

Fagus sylvatica

A tree perfectly at home here. Has dark, heavy foliage, changing to russet-brown all winter. These low-branched specimens are excellent for boundary screens and hedges, for some foliage is retained all winter.

Of the trees, 10, 12, and 14 feet high, you can make beautiful hedges, planting them 5 to 8 feet apart. Both the Beech and its close relative, the Hornbeam, are used for hedges in Europe.

	Each	10
4 ft. high.....	\$1 25	\$10 00
6 ft. high.....	3 50	30 00
8 ft. high.....	10 00	80 00
10 ft. high, 4-8 ft. spr.....	15 00	120 00
12 ft. high, 4-8 ft. spr., 15 yrs.....	18 00	160 00
14 ft. high, 5-8 ft. spr.....	25 00	220 00
16 ft. high, 6-10 ft. spr., 18 yrs.....	40 00	350 00

AMERICAN BEECH

Fagus americana

The absence of the native Beech from your landscape is almost a lack of patriotism. Its smooth, pearly gray bark covers closely its strong-muscle trunk. The light is reflected from its branches almost as distinctly as from the White Birch.

	Each	10
4 ft. high.....	\$2 00	\$17 50
6 ft. high.....	6 00	50 00
8 ft. high.....	12 00	100 00
10 ft. high.....	18 00	150 00
12-14 ft. high.....	22 00	
16 ft. high.....	40 00	

TULIP TREE

Liriodendron Tulipifera

One of the better trees for select groups. Our trees are symmetrical.

	Each	10
6 ft. high.....	\$1 25	\$10 00
8 ft. high.....	2 00	15 00
10 ft. high.....	3 00	25 00
12 ft. high, 2 in. diam., 4 ft. spr.....	6 00	50 00
14 ft. high, 2½ in. diam., 5 ft. spr.....	9 00	65 00
14 ft. high, 3 in. diam.....	15 00	120 00

RIVERS' PURPLE or COPPER BEECH

Fagus sylvatica purpurea Riversii

A tree liked by many because it is so conspicuous that they learn its name. A very large handsome tree, with deep purple foliage in early summer and dark green in late summer.

	Each
8 ft.....	\$6 00
10 ft.....	15 00

FERN-LEAF BEECH

Fagus sylvatica var. heterophylla

The most graceful deciduous tree. Distinguished for its delicate feathering of small twigs called "spray." It can be appropriately used as a single specimen or on the edge of a border plantation.

	Each	10
4-5 ft. high.....	\$2 50	\$20 00
8-10 ft. high, 4-7 ft. spr.....	35 00	300 00

SWEET GUM

Liquidambar Styraciflua

One of the handsomest blocks of trees in our nursery. The trees are uniform, straight, with broad, symmetrical heads. Early in autumn the foliage is brilliant with yellow and dark red shades. The star-shaped leaf, corky-ridged branch, and pronged seed-ball are all attractive details. Liquidambar is generally among the more discriminate selections of trees.

	Each	10
10 ft. high, 2 in. diam., 4-6 ft. spr.....	\$4 00	\$30 00
12-14 ft. high, 3 in. diam., 4-6 ft. spr.....	10 00	90 00
12-14 ft. high, 3½ in. diam., 5-8 ft. spr.....	15 00	140 00

AMERICAN ELM

Ulmus americana

Several hundred, with better roots and trunks than usual. Just the thing for shade-tree commissions, park boards, and street planting on Elm soil.

	Each	10
12 ft. high, 2 in. diam., 4-6 ft. spr.....	\$2 50	\$16 00
14 ft. high, 2½ in. diam., 4-6 ft. spr.....	5 00	25 00
16 ft. high, 3 in. diam., 5-7 ft. spr.....	8 00	45 00

Lawn Trees

To use these unusual lawn trees effectively the sketch on page 11 may have some suggestions for you. They can be specimens or become an integral part of the boundary that shuts off the street with its annoying traffic. You will enjoy their cool shadows as you ramble among them.

You like to look out of your place and feel that it is nearly as good as it can be, with beautiful Beech, Oak, Tulip, Sweet Gum, and Linden.

BLACK, WHITE, and SCARLET OAKS

Quercus vellutina, alba, and cocinea

"Play the game according to the rules." What rules? Nature's rules. How do you find out the rules? See what nature grows on Long Island. Principally Oaks. Why? Because they like the soil and the amount of moisture in the soil. Oaks are drought-resistant. In planning your landscape do what nature would do, but do it first. Mix Oaks freely in your groves and shrubberies. If you ever regret doing so, let us know.

We have an excellent stock of these Oaks. They have been root-pruned and transplanted repeatedly. They are sturdy trees with genuine Oak character and will make handsome, permanent, long-lived trees in dry, sandy soils. Their autumn coloring is most brilliant. They are difficult to transplant. Keep well watered the first season. A new one free if any fails. Mention preferred species when ordering.

	Each	10	100
6 ft. high	\$2 00	\$17 50	
8 ft. high	4 00	30 00	
10 ft. high, 1½ in. diam.	6 00	50 00	
12 ft. high, 2 in. diam.	10 00	90 00	
14 ft. high, 3 in. diam., (Black and White only)	20 00		

WHITE BIRCH

Betula alba

The Birches have the most exquisite spray of any of our trees. In winter the delicate, flexible twigs stand out clearly against the sky. When spring comes, the yellow-powdered tassels tremble and toss in the wind. All summer the dainty foliage flutters when the faintest breeze is passing, and the glory of the autumn is greatly enriched as it turns to gold. It is easy to account for the popularity of the "silver-vested" Birches. We have the American White, native of Long Island, and the Canoe Birch, indigenous in the Adirondacks, and the European White Birch. The Canoe Birch makes a much larger tree, otherwise they all give about the same effect. Orders will be filled with the American White unless otherwise specified.

	Each	10	100
6 ft. high	\$1 00	\$7 50	\$60 00
8 ft. high	1 50	12 50	100 00

LAUREL-LEAVED OAK

Quercus imbricaria

A rare and beautiful tree with smooth, dark green, glossy foliage, like that of the Laurel, but larger.

	Each	10	100
10 ft. high	\$5 00	\$40 00	
12 ft. high	8 00	70 00	

RED OAK

Quercus rubra

A big, strong, dignified tree, with wide-spreading, gravity-defying branches. We will show you Red Oaks growing 4 feet a year. On account of this rapid growth, and its beautiful contour and foliage, the Red Oak is an ideal tree for roads and lawns.

	Each	10	100
6 ft. high	\$1 15	\$10 00	\$80 00
8 ft. high	2 00	18 00	175 00
10-12 ft. high, 1½ in. diam., 3-4 ft. spr.	3 00	25 00	200 00
12-14 ft. high, 2 in. diam., 3-5 ft. spr.	6 00	50 00	325 00
14-16 ft. high, 2½ in. diam., 3-5 ft. spr.	12 00	100 00	

CHESTNUT OAK

Quercus Prinus

Native in gravelly and most unpromising soils. It is one of the handsome trees for beautiful groves.

	Each	10	100
6 ft. high	\$2 00	\$17 50	\$150 00
8 ft. high	4 00	35 00	
10 ft. high, 1½ in. diam., 4-5 ft. spr.	6 00	50 00	
12 ft. high, 2 in. diam., 5-6 ft. spr.	8 00	60 00	

MAIDENHAIR TREE

Ginkgo biloba, or Salisburia adiantifolia

A rare and handsome tree. It seems particularly at home in this soil and climate. The leaf is fan-shaped with parallel veins the same as Maidenhair Ferns. It has no insect or fungus enemies and promises to live here several centuries, as in Japan.

	Each	10	100
6-8 ft. high	\$1 00	\$9 00	
10-12 ft. high	3 00	25 00	
12-14 ft. high, 2 in. diam.	5 00	45 00	
14-16 ft. high, 2½ in. diam.	10 00	90 00	
16-18 ft. high, 3 in. diam.	12 00		
16-21 ft. high, 3½ in. diam., 4-6 ft. spr.	18 00		
18-20 ft. high, 4 in. diam., 4-6 ft. spr.	30 00		

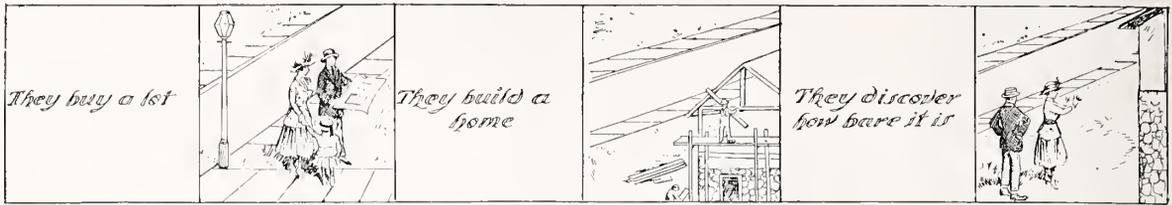

SWAMP WHITE OAK

Quercus bicolor

A shaggy-branched sturdy tree, native to hardpan and clay soils. Recommended for such soils. A chance to get a White-Oak effect for moderate price.

	Each	10	100
8 ft. high	\$2 00	\$17 50	
10 ft. high	3 50	30 00	
12 ft. high	5 00	45 00

“I used to think that it was necessary to put a house where there were some trees, but now I find it is best to put a house where it ought to be and then put large trees around it”

SILVER MAPLE

This is the best of the quick-growing trees. Abundant fibrous roots make them sure to live. Give them plenty to drink, and they will form very graceful trees.

	Each
32-34 ft. high, 10-12 in. diam., 18 ft. spr.	\$90 00
34-40 ft. high, 12-13 in. diam., 18-20 ft. spr.	125 00

“You would not think it was the same place. These trees are the most satisfactory investment we ever made.”

quantity of large nursery-grown trees. It must have taken a lifetime to guarantee them too! It's perfectly wonderful!”

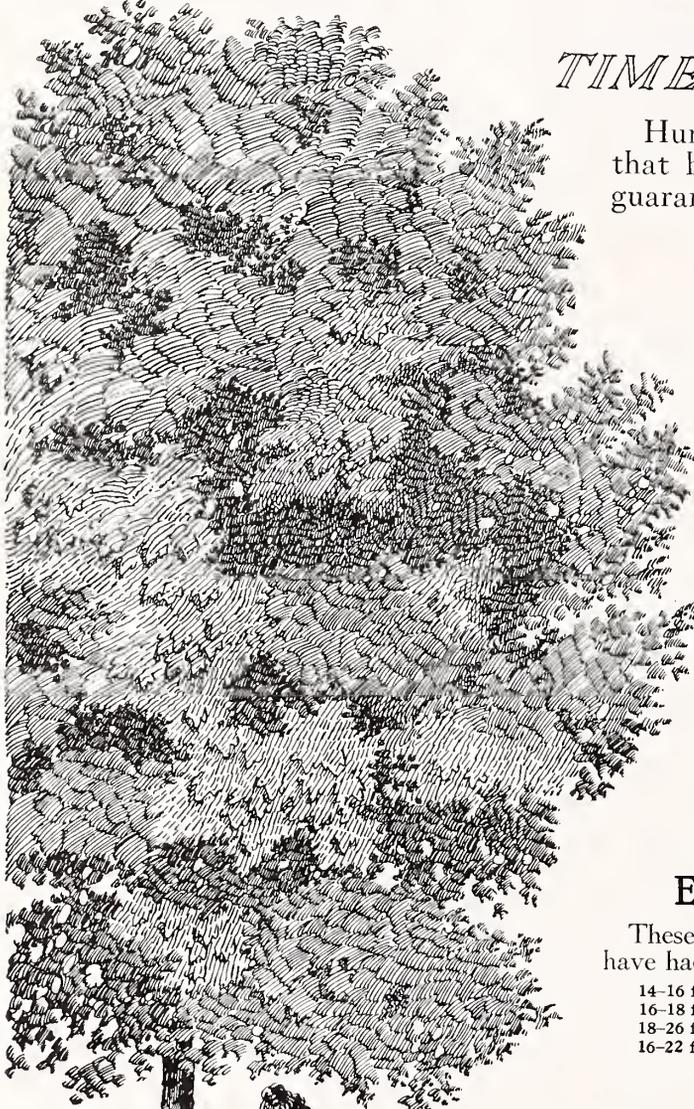

It is easily carted from railroad. The hole has been prepared as instructed

Planting is simple by following directions

The tree grows as guaranteed and 10 years is saved

TIME SAVING TREES

Hundreds of new houses have had that bare look taken away by these big, guaranteed, time-saving trees.

RED MAPLE

Excellent for shady groves or single specimens. Very brilliant autumn foliage.

	Each
18-24 ft. high, 5 in. diam., 12-15 ft. spr.	\$40 00
20-26 ft. high, 6 in. diam., 12-16 ft. spr.	50 00
24-30 ft. high, 7 in. diam., 14-16 ft. spr.	60 00
24-32 ft. high, 8 in. diam., 14-18 ft. spr.	75 00
28-32 ft. high, 10 in. diam., 14-18 ft. spr.	100 00

SILVER LINDEN

For ovate outline the most beautiful. For formal paths the best. For your lawns the trees you will be most proud of.

	Each
16-18 ft. high, 4 in. diam., 6-9 ft. spr.	\$35 00
16-22 ft. high, 5 in. diam., 9-12 ft. spr.	50 00
18-24 ft. high, 6 in. diam., 10-12 ft. spr.	70 00
20 ft. high, 7 in. diam., 10-12 ft. spr.	90 00
22 ft. high, 8-10 in. diam., 11-13 ft. spr.	100 00

SMALL-LEAVED EUROPEAN LINDEN

These are the acme of tree beauty. They have had twenty years of skilful culture.

	Each
14-16 ft. high, 4 in. diam., 8-12 ft. spr.	\$35 00
16-18 ft. high, 5 in. diam., 9-14 ft. spr.	65 00
18-26 ft. high, 6 in. diam., 12-15 ft. spr.	75 00
16-22 ft. high, 7 in. diam., 12-15 ft. spr.	85 00

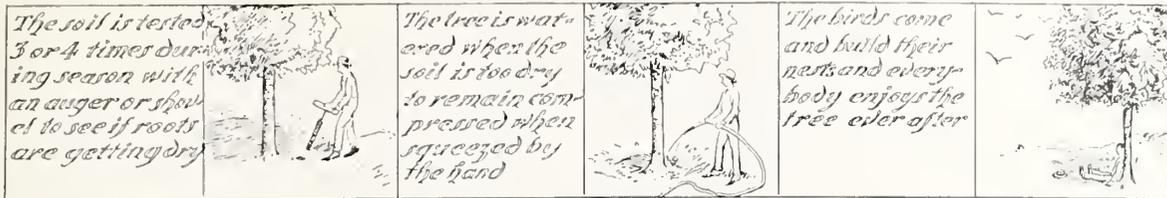

Norway Maples at \$80.
You can have cool shade like this
on your lawn this summer

ROSE

*Cool shade
in Summer*

The soil is tested 3 or 4 times during season with an auger or shovel to see if roots are getting dry

The tree is watered when the soil is too dry to remain compacted when squeezed by the hand

The birds come and build their nests and everybody enjoys the tree ever after

TIME SAVING TREES

High as the house. Wide as the porch.

PIN OAK

Ready to shade your house at once. An unparalleled opportunity to obtain mature landscape results of thirty years.

	Each
18-22 ft. high, 6-7 in. diam., 12 ft. spr.	\$70 00
20-26 ft. high, 7-8 in. diam., 9-12 ft. spr.	90 00
22-30 ft. high, 8-9 in. diam., 10-14 ft. spr.	105 00
24-34 ft. high, 9-11 in. diam., 12-18 ft. spr.	120 00
30-36 ft. high, 11-13 in. diam., 16-20 ft. spr.	150 00
32-38 ft. high, 14-15 in. diam., 20-24 ft. spr.	180 00

SUGAR MAPLE

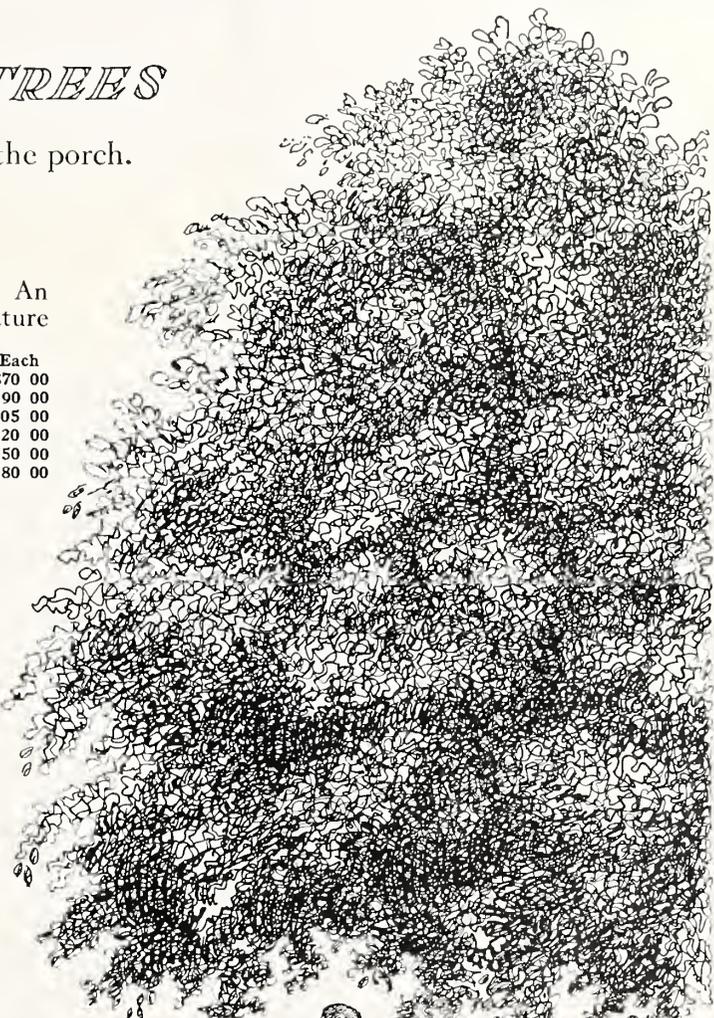

Beautiful symmetrical specimens. Full of character.

	Each
18-22 ft. high, 4 in. diam., 10-12 ft. spr.	\$50 00
18-24 ft. high, 5 in. diam., 12-16 ft. spr.	75 00
22-26 ft. high, 6 in. diam., 12-16 ft. spr.	85 00
26-28 ft. high, 7 in. diam., 16 ft. spr.	90 00

BIG TREES FOR \$30

We have the following trees that will run 16 to 20 feet high and 4 to 5 inches in diameter. These are excellent time-saving trees. State variety when ordering.

Silver Linden, \$90. Dozens of these beautiful trees at Hicks Nurseries. You can order by mail and receive perfect trees

Warm sun in Winter

ROSE

TREES FOR FORMAL GARDENS

Standard Pyramidal Hornbeam

STANDARD PYRAMIDAL HORNBEAM

Can be used around a garden or along a terrace or as a tall hedge.

Each	10
12-14 ft. high	\$15 00 \$120 00

LOMBARDY POPLAR

Narrow trees of quick growth but soon liable to get thin. Better try other tall trees and cut them narrow.

Each	10
10 ft. high	\$0 75 \$7 00
12 ft. high	1 00 9 00

Lombardy Poplar

SILVER LINDEN

For handsome formal trees, there isn't anything quite equal to these Lindens. They save five years.

Each	10
14 ft. high, 3 in. diam., 7 ft. spr., branched at 7 ft.	\$8 00 \$70 00

Silver Linden

BAY-TREE FORM IBOTA PRIVET

Ligustrum Ibotia

They will make your garden look like an old English garden. Twelve years old.

Each	10
6 ft. high	\$12 00 \$110 00
7-8 ft. high	15 00 130 00

Catalpa Bungei

Bay-Tree Form Privet

GLOBE ARBORVITAE

These can be used in the corners of a garden or will make an attractive edging like Boxwood.

Each	10
10 in. high	\$0 50 \$4 50
15 in. high	1 00 7 50

Globe Arborvitae

PYRAMID BOXWOOD

The tall, sharp spires accent the lines of the garden. These have been growing here for two and three years and have American roots in American soil.

Each	10
5 ft. high, 2 1/2 ft. spr.	\$9 00 \$70 00
6 ft. high, 2 1/2 ft. spr.	12 00 100 00

Pyramidal Boxwood

CATALPA BUNGEI

Frequently asked for as "Umbrella Tree."

Each	10
6-8 ft. high	\$1 50 \$12 50

Trained White Pine

WHITE PINE DOMES

These are trimmed like old Boxwood. Can be used as a hedge or for round solid specimens.

Each	10
4 ft. high and 5 ft. spr.	\$18 00 \$150 00

TRAINED WHITE PINE

We have trained these for the past fifteen years. Architects wishing to reproduce European garden effects will find on this page material in proper scale.

Each	10
8-9 ft. high, 5-6 ft. spr.	\$45 00 \$400 00

PYRAMIDAL CHINESE POPLAR

Similar to the Lombardy and possibly better. Introduced by the U. S. Department of Agriculture.

Each	10
8 ft. high	\$1 00 \$7 50 \$60 00

Cedar

CEDAR

Probably the best evergreen columnar tree for formal planting. See page 16.

Each	10
3 ft. high	\$1 00 \$7 00
4 ft. high	2 00 17 00
5 ft. high	3 50 30 00
6 ft. high	5 00 45 00
7 ft. high	6 00 55 00
8 ft. high	9 00 80 00

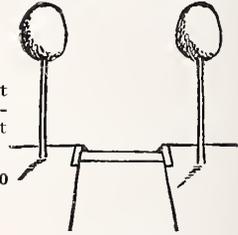

Pyramidal Privet

PYRAMIDAL IBOTA PRIVET

Dense cones about 4 feet wide. Will make an excellent hedge to shut off street or service court.

Each	10
6 ft. high	\$7 00 \$55 00

Bay-Tree Form Cedar

BAY-TREE FORM CEDAR

Use along the top of a terrace or to mark the sides of a formal garden.

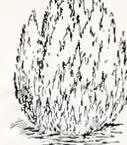

Each	10
7-9 ft. high	\$15 00 \$140 00

PYRAMIDAL ARBORVITAE

This includes several varieties, such as American, Siberian, Douglas, Pyramidal, and Golden. They are so similar we group them together. State if you have a preference.

Each	10
2 ft. high	\$0 75 \$6 00
3 ft. high	1 50 10 00
4 ft. high	3 00 25 00
5 ft. high	5 00 40 00

Pyramidal Arborvitae

Juniperus stricta glauca

JUNIPERUS STRICTA GLAUCA

Cute little cones to mark the angles of walks in small gardens.

Each	10
1 1/2 ft. high	\$1 00 \$7 50

Weeping Mulberry

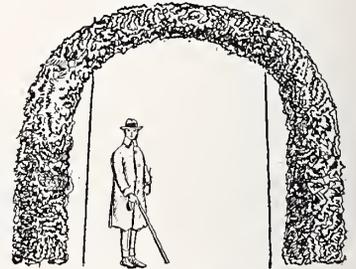

TEAS' WEEPING MULBERRY

Umbrella-shaped tree, with vigorous shoots reaching the ground. 4-6 ft. high, \$1.50 ea.

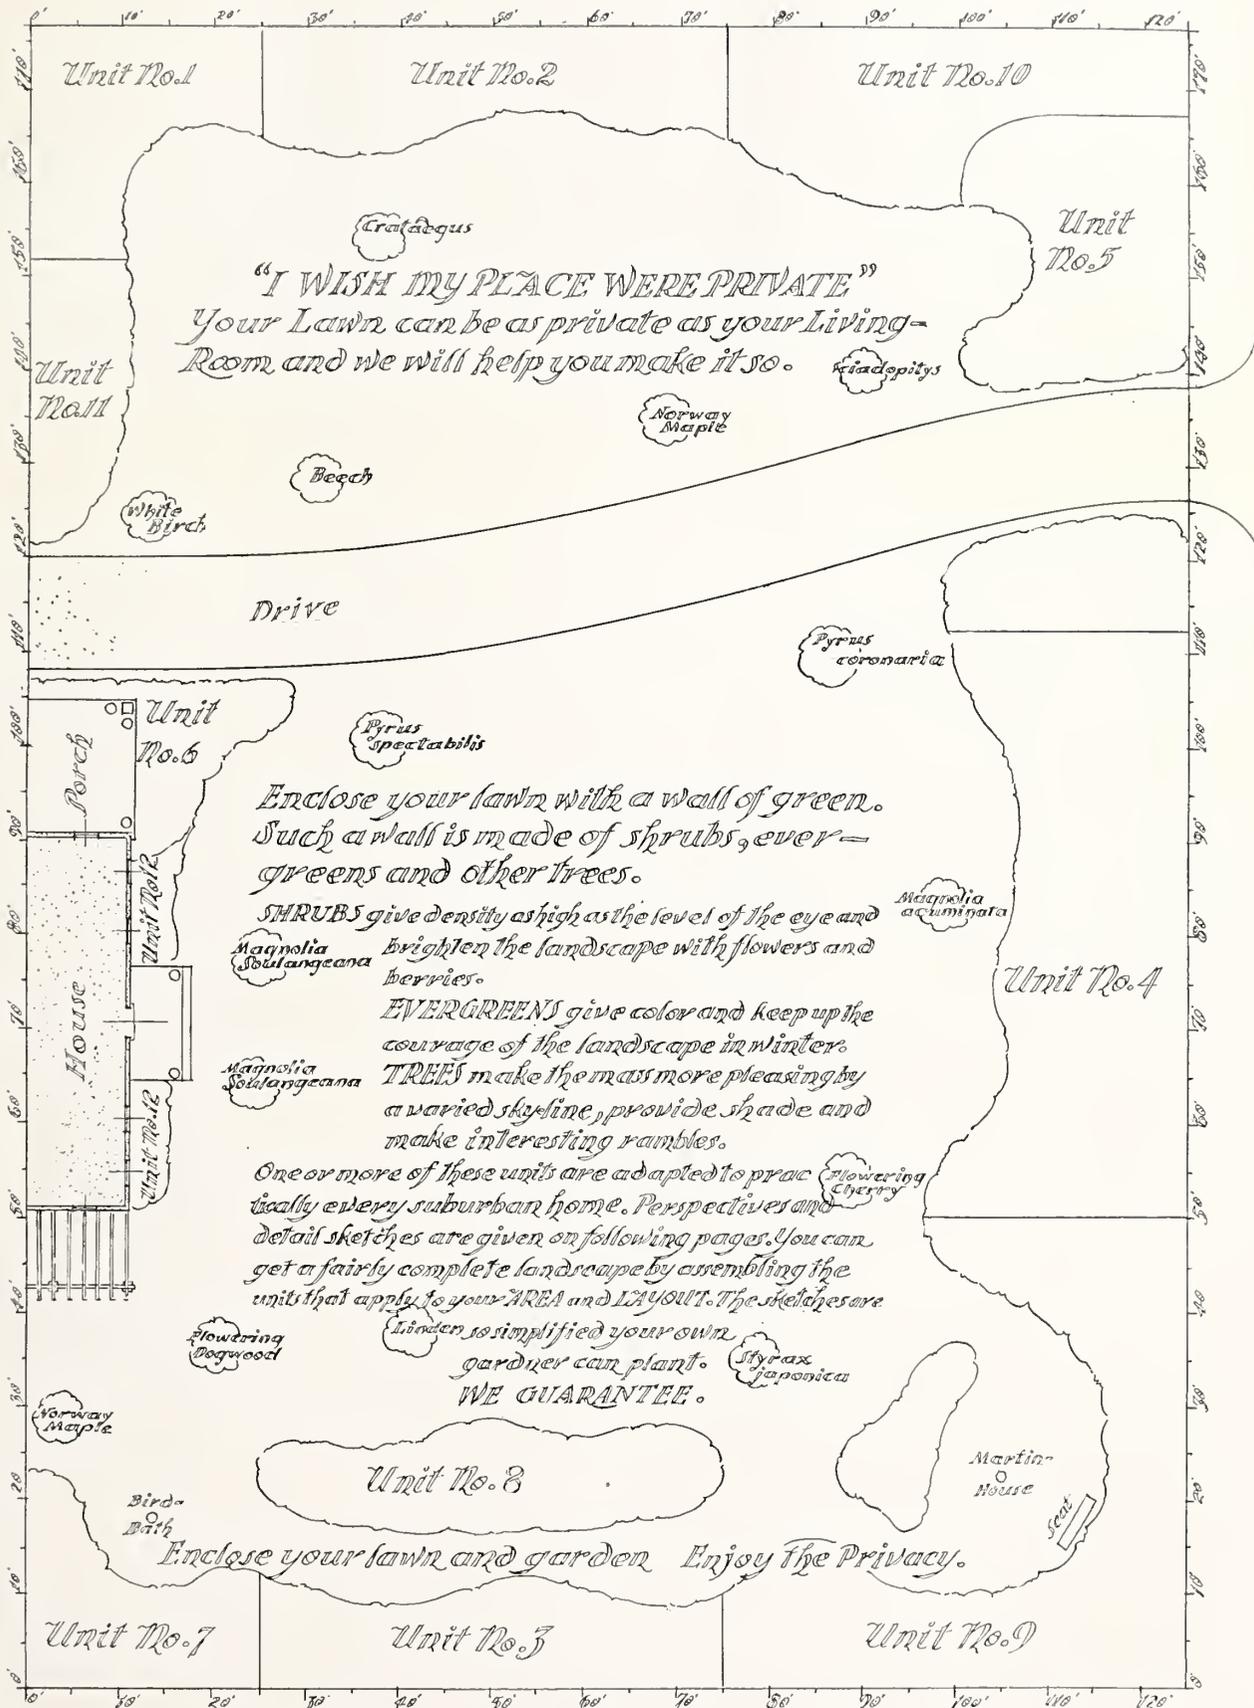

HORNBEAM ARCHES

These can lap over in the center and thus be adjusted to arch over your path, whether it is 5 feet or 10 feet wide.

8 ft. high, 8-10 ft. wide,	\$55 ea., \$500 for 10
----------------------------	------------------------

Hornbeam Arch

Unit No. 1 Unit No. 2 Unit No. 10

Unit No. 5

"I WISH MY PLACE WERE PRIVATE"
 Your Lawn can be as private as your Living-Room and we will help you make it so.

Drive

Unit No. 6

Enclose your lawn with a wall of green. Such a wall is made of shrubs, evergreens and other trees.

SHRUBS give density as high as the level of the eye and brighten the landscape with flowers and berries.

EVERGREENS give color and keep up the courage of the landscape in winter.

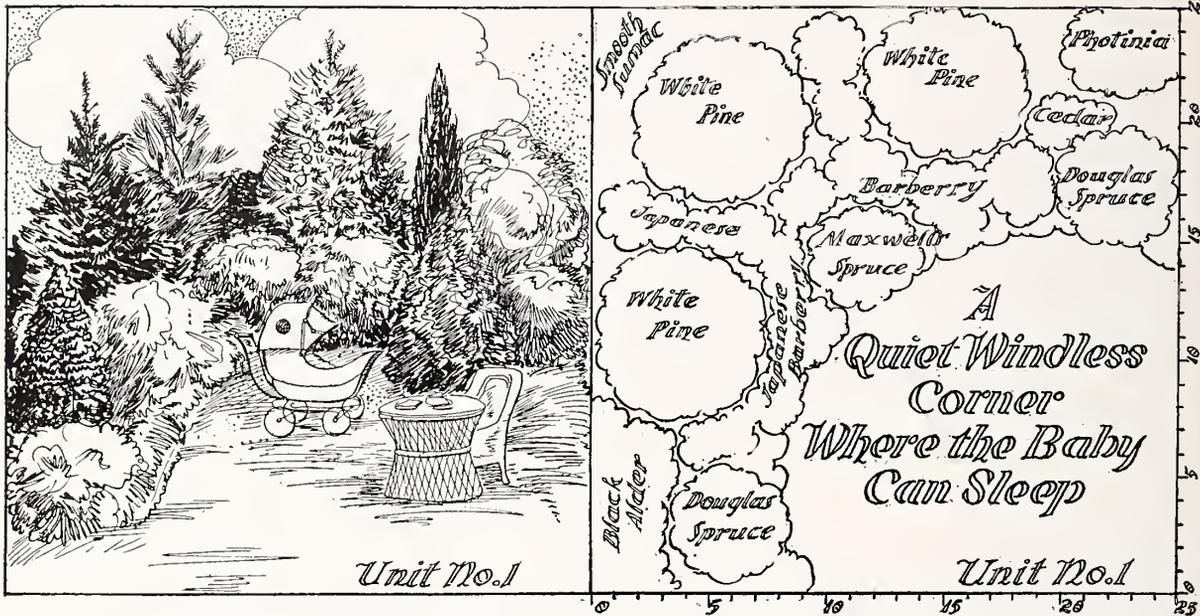

TREES make the mass more pleasing by a varied skyline, provide shade and make interesting rambles.

One or more of these units are adapted to practically every suburban home. Perspectives and detail sketches are given on following pages. You can get a fairly complete landscape by assembling the units that apply to your AREA and LAYOUT. The sketches are

simple and simplified your own gardener can plant. WE GUARANTEE.

Unit No. 8

Enclose your lawn and garden. Enjoy The Privacy.

This unit makes a most attractive little corner. A real outdoor playroom for the children. It will not be surprising if you entertain your friends there too. Everybody loves a quiet, pretty nook, and here you have it. 45 trees and plants delivered within 15 miles, or packed for shipment, \$25. Pines, Spruces, and Cedars will be 3 feet high. Larger sizes, as offered on these pages, can be selected if a more immediate result is desired. This unit contains: 3 White Pine, 2 Douglas Spruce, 1 Maxwell Spruce, 25 Barberry, 1 Cedar, 5 Sumac, 5 Black Alder, 3 Photinia. Except on these unit collections, there is a charge for delivering or packing for shipment, as noted on inside front cover.

WHITE PINE (*Pinus Strobus*)

In the group on this page and the pages following, in fact in most of your landscape planting, White Pine may generally be the key trees. Bear them in mind when planning your screens, boundaries, backgrounds for the garden, wind-breaks, hedges, and decorative groups.

Every tree you purchase from us is guaranteed to grow satisfactorily or is replaced free.

	Each	10		Each	10
2 ft. high	\$0 60	\$5 00	8 ft. high, 9 yrs.	\$12 00	\$100 00
3 ft. high	1 00	7 50	9 ft. high, 10 yrs.	14 00	120 00
4 ft. high	1 75	15 00	10 ft. high, 11 yrs.	18 00	160 00
5 ft. high	2 75	25 00	12 ft. high, 13 yrs.	30 00	250 00
6 ft. high, 7 yrs.	6 00	50 00	14 ft. high, 15 yrs.	40 00	350 00
7 ft. high, 8 yrs.	10 00	90 00	16 ft. high, 17 yrs.	55 00	500 00

We have a few White Pines which have lost a lower branch from the plough, and for that reason do not quite measure up to our high standard of perfection. They are excellent, however, for massing or planting with shrubbery. While they last you may have them for one-third less than the above prices.

RED PINE (*Pinus resinosa*)

A beautiful dark green Pine. Native in dry, gravelly soils. If your soil is that kind, Red Pine will prove an important acquisition in your landscape. We have always recommended using it with White Pine. It is just these sorts of relays that keep up the courage of your landscape during hot rainless periods, when the shrubs wilt and the lawn turns brown. Red Pines can be used in the units wherever Pines, Spruces, or Firs are called for.

	Each	10	100		Each	10	100
2 ft. high	\$0 75	\$6 00	\$50 00	4 ft. high	\$4 00	\$30 00	\$250 00
3 ft. high	2 00	15 00	125 00	5 ft. high	6 00	50 00	

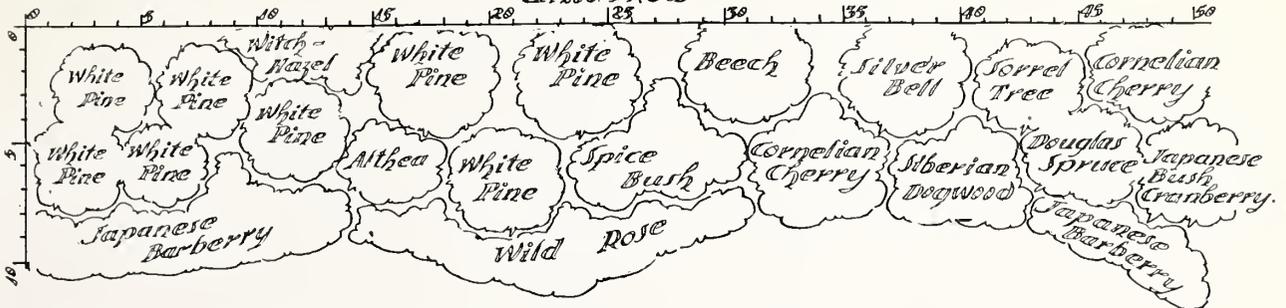

Here is a boundary composition, 50 feet long, which you can use where some evergreens are needed, but not a solid wall. 82 plants for \$26.50, delivered within 15 miles or packed for shipment. Pines are 5 feet high. Select larger ones as quoted above if you wish.

The Privet will quickly make a wall 6 feet high. Let them grow naturally. Do not shear them like balloons. If they crowd the evergreens, cut them back to give 2 or 3 feet of sunlight all around the lower branches. In two or more years some of the Privets can be removed entirely. Try this and show your friends.

This unit contains: 4 White Pine, 25 California Privet, 2 Thorn, 1 Weigela, 10 Blackberry Rose, 40 Japanese Barberry.

Unit No. 3

Here is another carefully planned boundary unit. More evergreens have been used, so there is ample all-year foliage. The earliest and latest bloomers, also, are woven in, as well as bright berries, making a higher type of composition than is usually seen. We know it will be entirely satisfactory to you.

This unit contains: 8 White Pine, 1 Douglas Spruce, 1 Sorrel Tree, 1 English Beech, 3 Althea, 5 Spice Bush, 15 Wild Rose, 25 Japanese Barberry, 3 Viburnum dilatatum, 2 Silver Bell, 5 Cornelian Cherry, 3 Witch-Hazel, 3 Siberian Dogwood.

Using Pines 6 feet high, this entire unit of 75 trees and plants costs only \$74, delivered within 15 miles or packed for shipment. Or, you can have larger Pines and more seclusion. Satisfaction is guaranteed. Phone Westbury 68 that you wish a wall of evergreens like some of these units, and that you would like to have us call and see your place and adapt the evergreens to the conditions.

KOSTER'S COLORADO BLUE SPRUCE

Picea pungens var. Kosteri

Easily recognized by its distinct color. It is very effective when given a setting in groups of darker evergreens. In offering Blue Spruce we wish also to mention a fine lot we have grown from seed. These are not so intense in color, but much broader and more dense. Would you rather have the broader trees or the more pronounced color?

DOUGLAS SPRUCE

Pseudotsuga Douglasii

We consider this one of the best of the Firs and Spruces for this region. That is why we offered it as a Christmas-tree, to be planted out afterward, so that more people could get acquainted with it. This and White Pine can well be the principal evergreens in the various units on these pages.

STREET SCREENED BY A WALL OF GREEN

Unit No. 4

This is one of the most important boundary units in this catalogue. It is important because it will make a wall of green for your country place that will help your family get the most benefit at the least expense. Perhaps you do not want to tie up capital to buy 10 or 20 acres and keep it up as it should be. With one, two, or three acres, you can shut out with evergreens all you don't want to see, and have the sky, sun, and breeze overhead, with beautiful views on every side.

Mr. Businessman, you take the long journeys to and from business, year after year, for the sake of the family, for country sports and social life, to answer the children's questions and help them with their gardens and rabbit pens.

This wall of green may save you half an hour or more in commuting distance. In computing the cost we have specified Pines 6 and 8 feet high. These are medium-sized trees. Larger or smaller trees can be substituted.

Total cost, delivered within 15 miles or packed for shipment, \$75.

This unit contains: 1 large White Pine, 6 smaller White Pine, 1 Red Pine, 1 Nordmann's Fir, 2 Douglas Spruce, 2 Dogwood, 3 Witch-Hazel, 5 Forsythia Fortunei, 1 Syringa, 10 Japanese Barberry, 1 Bridal Wreath, 1 Tartarian Maple, 1 Sumac, 3 Rosa multiflora, 1 Magnolia stellata, 1 Japanese Dogwood, 2 Photinia, 1 Symplocos (Sweet Leaf), 5 Arrow-wood, 1 Spice Bush.

SCOTCH PINE (*Pinus sylvestris*)

One of the most rapid-growing evergreens. The cheerful blue-green color and quick growth probably account for the popularity of the Scotch Pine. It will probably give you more cheerful foliage the first fifteen years than any other evergreen you can plant. Through summer heat, rain, and snow it looks the same. Every leaf is in position to work for you. Up to May 5 we can supply trees without balls in 2-, 3-, and 4-foot sizes at 33 1/3 per cent discount. No order for less than 10 trees will be accepted at this rate and "trees without balls" should be specified in order.

	Each	10		Each	10
2 ft. high	\$0 75	\$6 00	4 ft. high	\$3 00	\$22 50
3 ft. high	1 50	12 00	5 ft. high	5 00	40 00

AUSTRIAN PINE (*Pinus Laricio var. austriaca*)

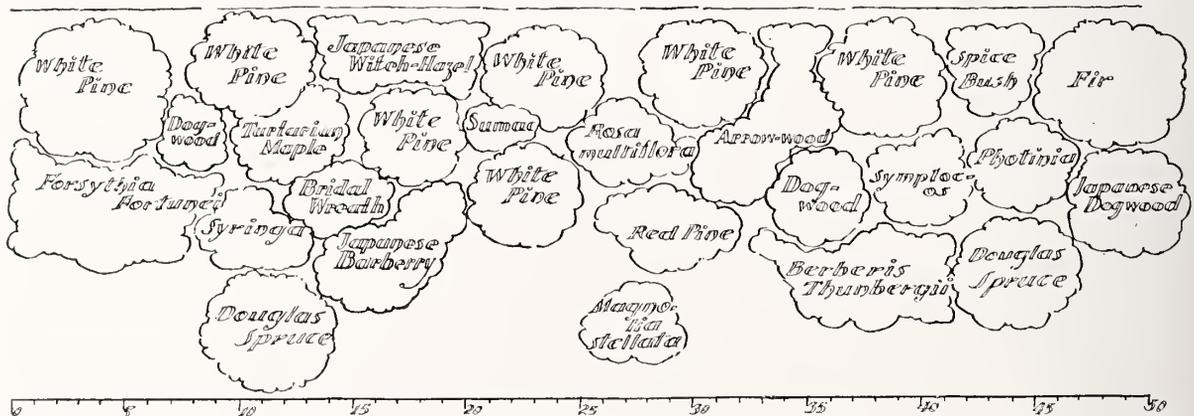

Dense solid domes. Happy in dry ground and during a dry season. One of the few very reliable shore trees; therefore, it stands the strongest winds. As with all our evergreens, we have paid particular attention to the roots. Good roots represent one-half the cost and three-quarters of the value of Austrian Pines. An ample supply of large and small evergreens so grown as to have the risk in transplanting removed, is at once an achievement and an opportunity.

	Each	10		Each	10		Each	10
1 ft. high	\$0 75	\$6 00	5 ft. high	\$12 00	\$100 00	8 ft. high	\$30 00	\$250 00
2 ft. high	1 75	15 00	6 ft. high	18 00	160 00	10 ft. high	40 00	350 00

4 ft. high	8 00	70 00						

CONCOLOR or WHITE FIR (*Abies concolor*)

One of the better evergreens that everybody doesn't have. Sage-green, a cheerful color in the landscape, conspicuous and still harmonious. Winter and summer a stately, dignified evergreen. You will be proud to have a specimen or a group.

	Each	10		Each	10
1 1/2 ft. high	\$1 50	\$12 50	5 ft. high	\$9 00	\$80 00
2 ft. high	2 50	22 50	6 ft. high	15 00	140 00

4 ft. high, block 43 only	6 00	50 00	8 ft. high, 4-5 ft. spr., 15 yrs. old.	30 00	275 00

DANGER

The uncomfortable thought of danger is removed for you and all who pass your gate if you use low plants which permit a view over. This is imperative, in these days of automobiles, which have necessitated different plans for service courts and entrances, and the abolition of tall shrubs which obstruct the view of approaching vehicles.

This unit of 109 trees and plants, as listed below, complete, packed for shipment or delivered within 15 miles, \$57. The Pines are 4 feet and the Cedars 5 feet. You can change the sizes or substitute other evergreens if you wish.

This unit contains: 4 Pine, 5 Cedar, 10 St. John's-wort, 7 Dwarf Deutzia, 2 Japanese Snowball, 5 Wither-rod, 8 Arrow-wood, 5 Juniper, 8 Spreading Yew, 15 Regel's Privet, 5 Van Houtte's Spirea, 5 Pride of Rochester Deutzia, 1 Flowering Dogwood, 10 Stephanandra, 3 Photinia, 15 Japanese Barberry, 1 Thorn.

NIKKO FIR (*Abies brachyphylla*)

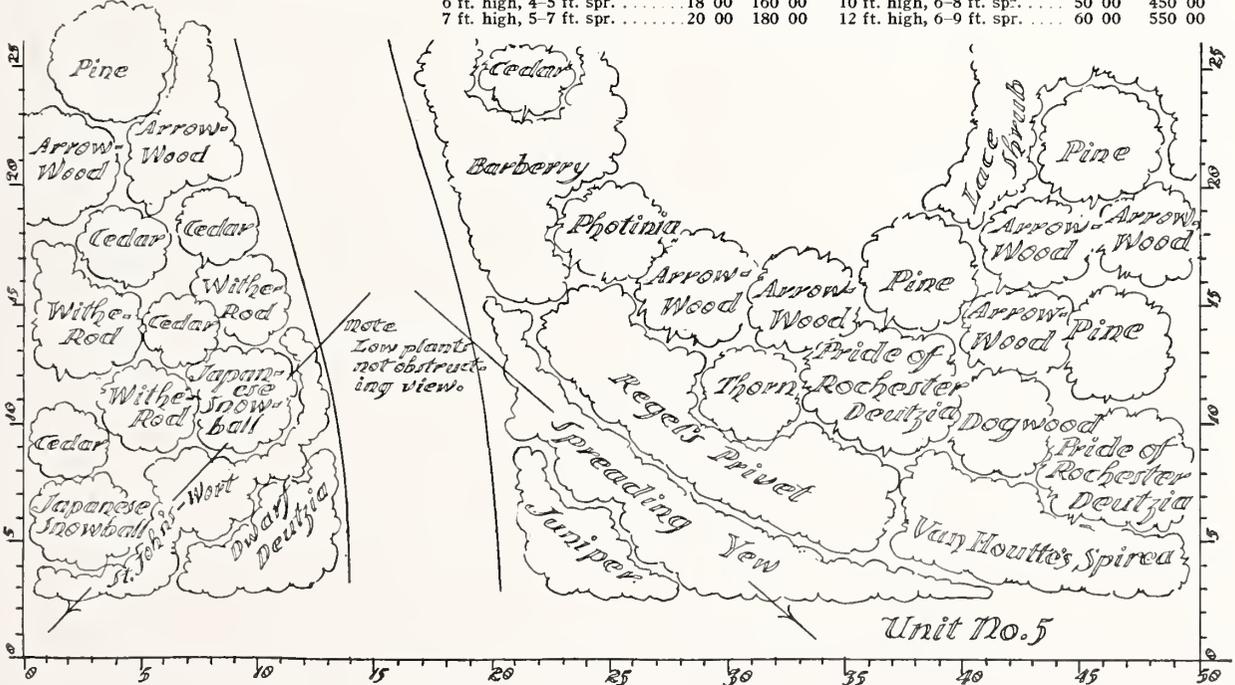

Tall, beautiful spires from the east coast of Asia, they are accustomed to a hotter summer and a colder winter than here. They are therefore happy. Any composition with Fir interwoven immediately becomes a superior composition.

	Each	10		Each	10		Each	10
2 ft. high	\$2 00	\$17 50	5 ft. high, 4-5 ft. spr.	\$7 00	\$65 00	8 ft. high, 5-7 ft. spr.	\$16 00	\$150 00
3 ft. high	3 00	27 50	6 ft. high, 4-5 ft. spr.	10 00	90 00	9 ft. high, 5-8 ft. spr.	25 00	240 00

NORDMANN'S FIR (*Abies Nordmanniana*)

The richest, darkest, most velvety evergreens in our nursery. Amateur and connoisseur alike enthuse over this species. Plant a group of the various Firs in the different sizes offered on these pages.

	Each	10		Each	10		Each	10
2 ft. high	\$2 50	\$20 00	4 ft. high, 3-4 ft. spr.	\$7 00	\$60 00	8 ft. high, 5-7 ft. spr.	\$30 00	\$270 00
3 ft. high	6 00	50 00	5 ft. high, 4-5 ft. spr.	12 00	100 00	9 ft. high, 5-8 ft. spr.	40 00	360 00
			6 ft. high, 4-5 ft. spr.	18 00	160 00	10 ft. high, 6-8 ft. spr.	50 00	450 00
			7 ft. high, 5-7 ft. spr.	20 00	180 00	12 ft. high, 6-9 ft. spr.	60 00	550 00

You wish to use your porch as an outdoor room. Here is a group that will help you. Perhaps you have something planted there now. Any of these elements can be added to improve the composition.

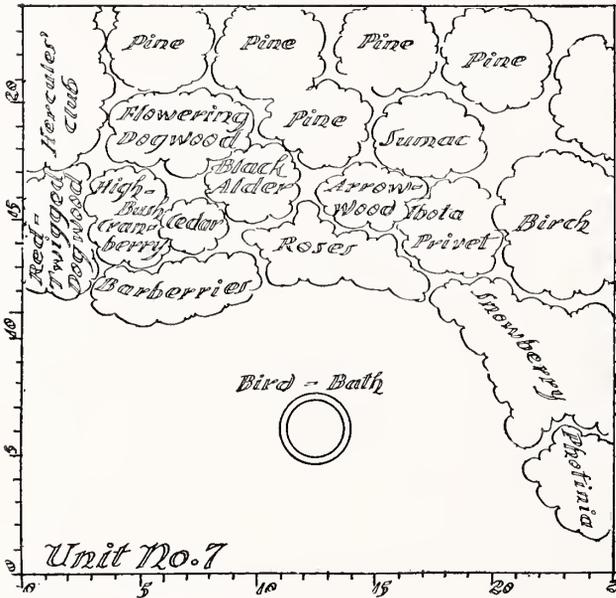

This unit consists of 45 trees and plants, many of them quite rare, the list being as follows: 2 Arborvitae, 7 Cedar, 5 Booth's Arborvitae, 1 Wistaria, 5 St. John's-wort, 7 Cotoneaster, 3 Pfitzer's Juniper, 5 Japanese Barberry, 1 Cork-barked Burning Bush, 1 High-bush Cranberry, 3 Northeastern Rose, 5 Yews.

Total cost, packed for shipment or delivered within 15 miles, \$56. This includes Cedars 6 feet high.

RED CEDAR (*Juniperus virginiana*)

Many compositions require a vertical note to be pictorially pleasing. Cedar is naturally thought of first and is probably the most available tall, narrow evergreen. We will make special quotations on sizes up to 26 feet.

	Each	10		Each	10
3 ft. high	\$1 00	\$7 50	7 ft. high	\$6 00	\$55 00

5 ft. high	3 50	30 00	10 ft. high	14 00	130 00
6 ft. high	5 00	45 00	12 ft. high	16 00	150 00

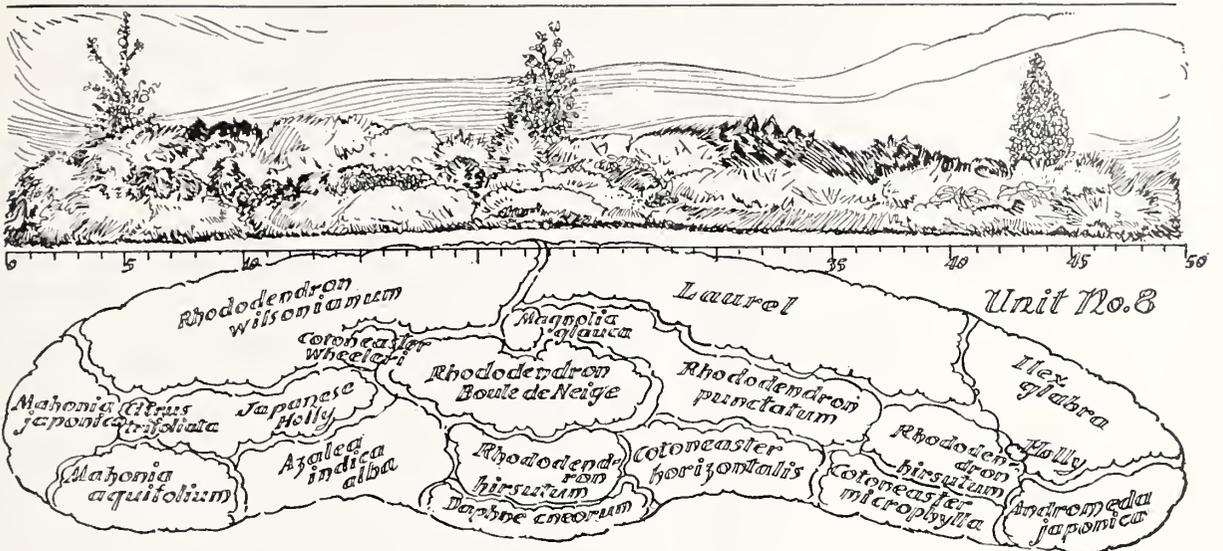

Bird Sanctuary—Winter Group of Rare Beauty

Here is a little piece of landscape designed especially for the birds. It provides berries for your feathered friends to eat, and evergreens where they can roost, raise their families, and be protected from the winds and hawks. Birds returning early in the spring need berries, otherwise they starve. You would naturally locate such a group where its beauty and interest can be seen and enjoyed most, perhaps from the breakfast porch, living-room, or sun-parlor.

Fifty trees and plants in all, packed for shipment or delivered within 15 miles, \$25. Pines will be 4 feet and Cedar 5 feet. These sizes can be altered if you wish, changing the price accordingly.

The unit contains: 1 Arrow-wood, 5 Pines, 1 Cedar, 5 Hercules' Club, 5 Red-twigged Dogwood, 2 High-bush Cranberry, 1 Photinia, 5 Roses, 5 Japanese Barberry, 3 Black Alder, 1 Flowering Dogwood, 3 Sumac, 1 Birch, 2 Ibotia Privet, 10 Snowberry.

Broad-Leaved Low-Growing Evergreens

This unit can easily be the most beautiful bit of landscape on your place and even in your neighborhood. It is composed mainly of broad-leaved, low-growing evergreens. To the connoisseur this means the cream of the cream. To the plant-lover this class is his highest ambition. A group like this may be your most interesting hobby. You can bring in a clump of Ferns, Laurel, or Arbutus and tuck them in with leaves. There are always new things to try in a bed of broad-leaved evergreens, such as new Azaleas and our Rhododendrons. The sketch suggests a handsome tapestry of 110 plants, the very rarest type of plants in our nursery.

These plants packed for shipment or delivered within 15 miles, \$95. You may have room for only part of this unit. The plants are quoted separately elsewhere in this catalogue. See index. We may not have all the varieties in stock when you order. If you do not wish any substitution, please so indicate.

These broad-leaved evergreens will grow well in the suburban districts of New York. The climate suits them. They have a soil preference, however, that is worth regarding. Keep them mulched with 6 inches of leaves. When you are preparing the soil, dig in the leaves. We keep our men busy all winter, when the snow is off the ground, raking and carting leaves. It is the best fertilizer for this class of plants.

The unit contains: 1 *Magnolia glauca*, 1 Holly, 1 *Citrus trifoliata*, 5 *Mahonia Aquifolium*, 5 *Azalea indica alba*, 5 *Ilex crenata*, 5 *Cotoneaster microphylla*, 5 *Cotoneaster horizontalis*, 1 *Cotoneaster Wheeleri*, 5 *Andromeda japonica*, 10 *Ilex glabra*, 10 *Rhododendron hirsutum*, 16 Laurel, 10 *Rhododendron Wilsonianum*, 10 *Boule de Neige Rhododendron*, 5 *Daphne Cneorum*, 5 *Mahonia japonica*, 10 *Rhododendron punctatum*.

HEMLOCK

Tsuga canadensis

The most graceful evergreen, and for that reason will be a pleasing element in any of the units shown on these pages. There is such a freedom in its character it is apt to be harmonious in any landscape. Often used as a hedge, planted 3 to 4 feet apart. We have a few trees larger than those listed. These will be specially priced.

	Each	10	100		Each	10	100
1½ ft. high.....	\$1 00	\$7 50	\$60 00	4 ft. high.....	\$4 00	\$35 00	\$300 00

MAXWELL'S and GREGORY'S DWARF SPRUCES

Picea excelsa vars. *Maxwellii* and *Gregoryana*

Both make low, dark green cushions; dense as Boxwood. 1 ft. high, \$2 each, \$17.50 for 10.

HOW TO LIVE ECONOMICALLY IN THE COUNTRY

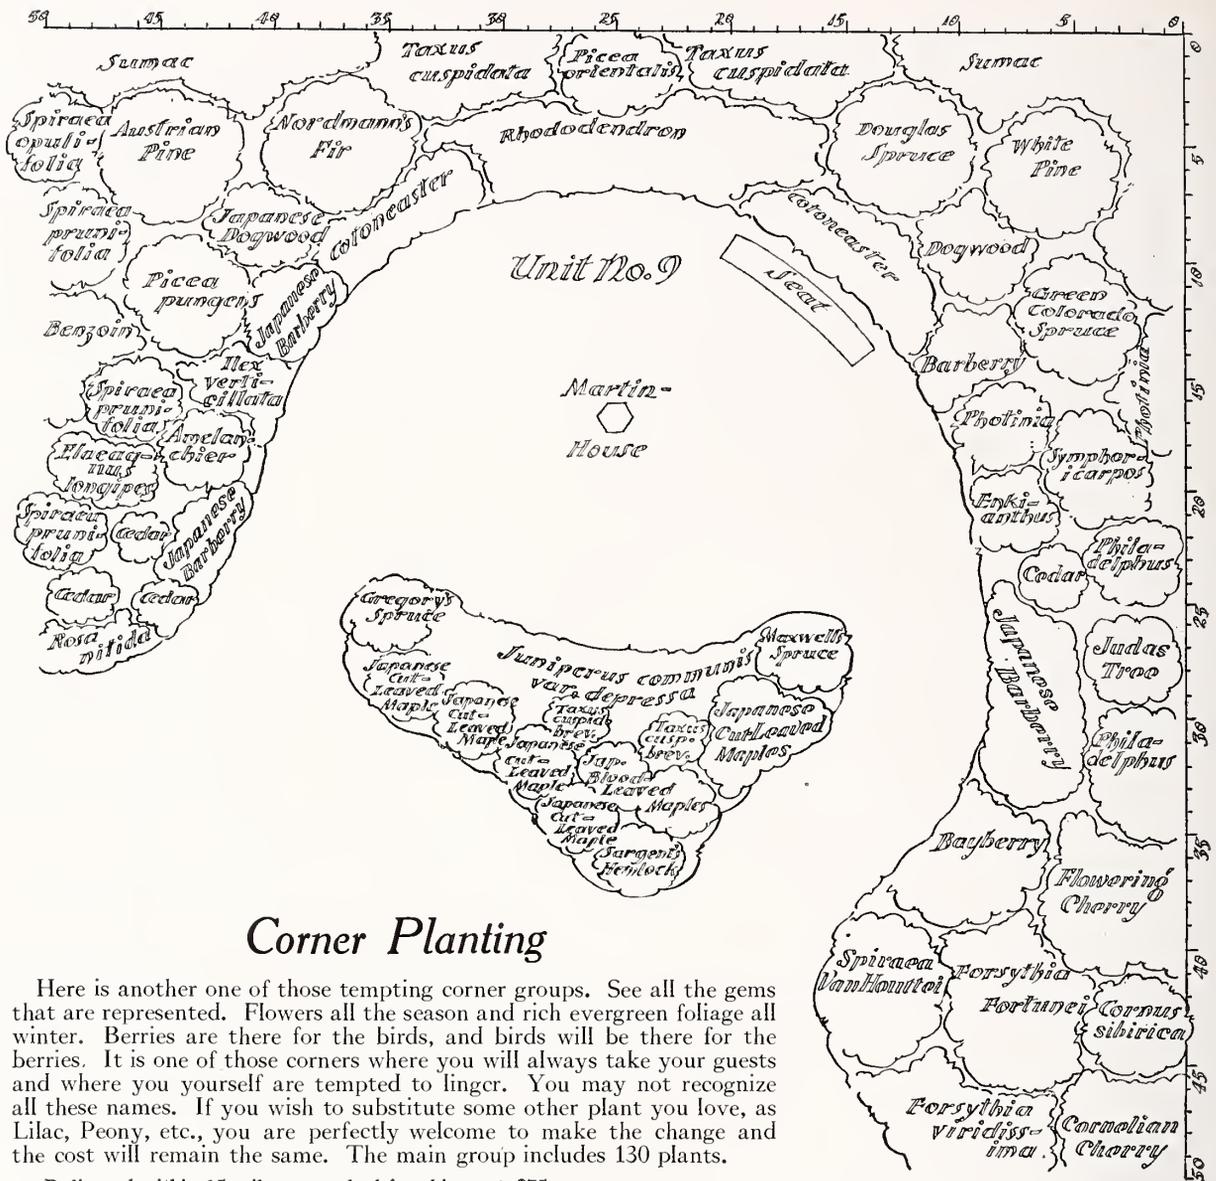

One real-estate operator says: "It is all right to live in the country if you are rich." This catalogue aims to help you live in the country if you are not rich. It is not more expensive to live in the country than the city, and a place planted according to the principles shown in these plans is a good all-the-year-round residence. The boys may cut up your lawn playing ball, but you are glad they are there and not being told "don't do this and don't do that," as in a little apartment.

The wall of evergreens is a substitute for the wall of brick and stone which has developed in the suburbs of old settled countries as England and France. Walls were also built around the gardens of well-to-do merchants of Salem, Mass., or Charleston, S. C., because they walked or drove to business and could not get farther out in the country.

In the suburbs of New York conditions are again arising where walls serve a real economic purpose and add to human comfort, health, and hospitality.

The walls may be of evergreens, brick, stone, cement, hollow tile, or wood. If they are not made of foliage, they will make the best possible place for foliage, whether grape-vines, Ivy, Euonymus, or banks of Holly and Rhododendrons.

Mr. Businessman, you can decide approximately, from the facts on these pages, what sort of a wall of green you should have. We will work out the details. It is no experiment, risk, or extravagance to you.

Corner Planting

Here is another one of those tempting corner groups. See all the gems that are represented. Flowers all the season and rich evergreen foliage all winter. Berries are there for the birds, and birds will be there for the berries. It is one of those corners where you will always take your guests and where you yourself are tempted to linger. You may not recognize all these names. If you wish to substitute some other plant you love, as Lilac, Peony, etc., you are perfectly welcome to make the change and the cost will remain the same. The main group includes 130 plants.

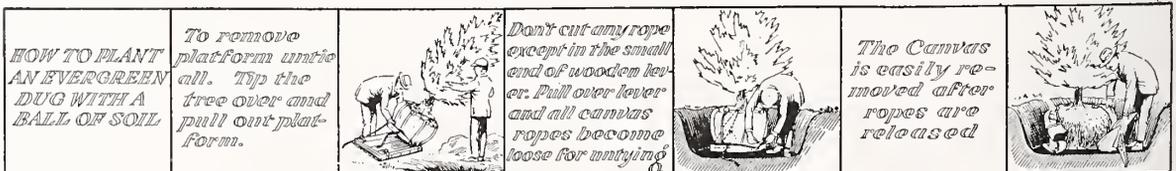

Delivered within 15 miles or packed for shipment, \$75.

The unit contains: 4 Cedar, 1 Austrian Pine, 1 Nordmann's Fir, 1 Picea orientalis, 1 Douglas Spruce, 1 Green Colorado Spruce, 1 White Pine, 1 Flowering Cherry, 3 Forsythia viridissima, 5 Forsythia Fortunei, 5 Bayberry, 25 Japanese Barberry, 1 Judas Tree, 3 Syringa, 3 Spiraea Van Houttei, 1 Cornus sibirica, 1 Cornelian Cherry, 1 Enkianthus, 5 Symphoricarpos, 3 Photinia, 1 Dogwood, 10 Cotoneaster, 15 Sumac, 5 Japanese Yew, 10 Rhododendron, 1 Spiraea opulifolia, 5 Spiraea prunifolia, 1 Japanese Dogwood, 3 Spice Bush, 1 Amelanchier, 3 Black Alder, 3 Elaeagnus longipes, 5 Rosa nitida.

The detached group of 24 trees, all gems, for \$35, on the same terms as above.

It contains: 10 Juniper, 1 Maxwell's Spruce, 1 Gregory's Spruce, 7 Japanese Cut-leaved Maple, 1 Sargent's Hemlock, 2 Japanese Blood-leaved Maple, 2 Dwarf Japanese Yew.

Bird-houses and garden furniture can be purchased from the Matinecock Neighborhood Association, Locust Valley, Long Island, N. Y.

“Isn't that an Attractive Looking Place?”

FOUNDATION PLANTS

Always add a touch of refined beauty when massed properly of finishing touch. Many planters aim for a larger variety of harmony, which is the pleasing element in all good composition; not best to bank up solidly all the way round. Have some points, merely carpeting the ground, and rising at the lows. These rising masses should vary, allowing one to be others subordinate.

JAPANESE YEW

Taxus cuspidata

Exquisite little tree of darkest green. Adapted for either sun or shade. Plant 2½ feet apart.

Each	10	Each	10
6-12 in. high	\$0 50 \$4 00	1½ ft. high	\$3 00 \$20 00
1 ft. high	1 50 10 00	2 ft. high	4 00 30 00

FLAT JAPANESE YEW

Prostrate form of the above. Use where the plants should not grow over 2 feet high, as in front of Rhododendrons or in low portions of your composition.

1 ft. high, 1½ ft. spr., \$2 each, \$15 for 10; 1½ ft. high, 2 ft. spr., \$3.50 each, \$30 for 10.

BLUE CEDAR

This and the Blue Cypress harmonize and give a pleasing gray color effect.

2 ft. high, 75 cts. each, \$6 for 10.

This group of 5 Rhododendrons, 5 Yews and 1 Pine 6 feet. \$23.50.

SPREADING YEW

Taxus baccata repandens

One of the most dignified plants for low planting. Grows 2 feet high. Plant 2½ feet apart.

Each	10	Each	10
8 in. high, 1 ft. spr.	\$1 50 \$12 50	1 ft. high, 1½ ft. spr.	4 00 30 00

JUNIPERS—Low and Flat

The Junipers are good for dry sunny positions. Plant 3 feet apart for a low mass effect. Tall, narrow Junipers can rise out of the mass where vertical foliage is called for.

Each	10	Each	10
1 ft. wide	\$0 75 \$5 00	1½ ft. wide	1 25 10 00

RED CEDAR

Tall and narrow. See page 10 for prices.

JAPANESE CYPRESS

These are offered in blue, green, and golden. State color when ordering. Sheared once or twice during the summer, they will make solid fluffy masses.

Each	10	Each	10
1 ft. high	\$0 75 \$6 00	1½ ft. high	1 25 10 00
2 ft. high	2 00 15 00		

DWARF ARBORVITAE

Very popular small-growing evergreens.

Each	10	Each	10
2 ft. high, pyramidal-shaped	\$0 75 \$6 00	3 ft. high, pyramidal-shaped	1 50 10 00
4 ft. high, pyramidal-shaped	3 00 25 00		

MUGHO PINE

Little low cushions; for dry soil.

Each	10	Each	100
1 ft. wide	\$1 25 \$10 00		\$90 00

“To Take Away That Bare Look”

FOUNDATION PLANTS

Ideal plants are those that look well at the start and that will keep proper proportions in their later developments. The sketches on page 19 may help you. When the plants come, set them around until they look right, and then plant. Do not forget to cover the bare ground between with *Pachysandra* 8 inches apart. This quickly makes a green carpet and ties the planting together. We can make definite suggestions if you send us accurate dimensions and a photograph.

Rhododendron
catawbiense

RHODODENDRONS

Rich green foliage all winter. A grand bouquet in June. Especially happy north of the house. Plant 2½ feet apart. Dig in a foot of leaves before planting and add 8 inches each fall. Booklet with varieties on request.

WHITE, PINK, RED, CRIMSON, PURPLE	Each	10	Each	10
15 in. high.....	\$1 50	\$12 50	1½ ft. high.....	\$2 00 \$17 50
			2 ft. high.....	3 50 30 00

JAPANESE BARBERRY

Berberis Thunbergii

Graceful all summer. Brilliant in autumn. Red berries all winter.

Each	10	100
1½ ft. high.....	\$0 25	\$2 00 \$18 00

DWARF DEUTZIA

Deutzia gracilis

A dense mass of pure white. Grows 2 feet high. Plant 2 feet apart.

Each	10	50
1 ft. high.....	\$0 30	\$2 50
2 ft. high.....		4 00

REGEL'S PRIVET

Ligustrum Iboia Regelianum

A low-arching shrub growing 6 feet high with blue-black berries.

Each	10
2 ft. high.....	\$0 25 \$2 00

SPIRAEA THUNBERGII

Lacy foliage. Orange and red in fall.

Each	10
2 ft. high.....	\$0 35 \$3 00

LEUCOTHOE

Evergreen shrub. Try a group of five or ten with Rhododendrons, Yews, etc.

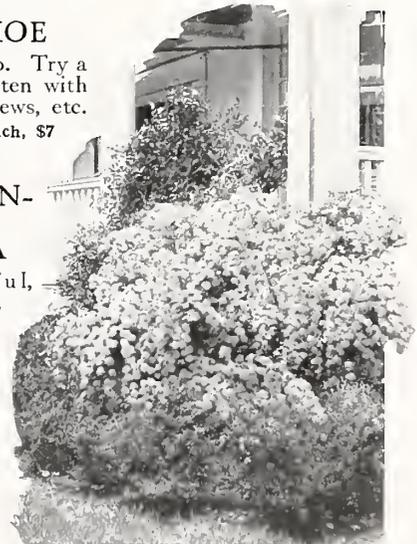

1 ft. high, 85 cts. each, \$7 for 10.

STEPHANANDRA FLEXUOSA

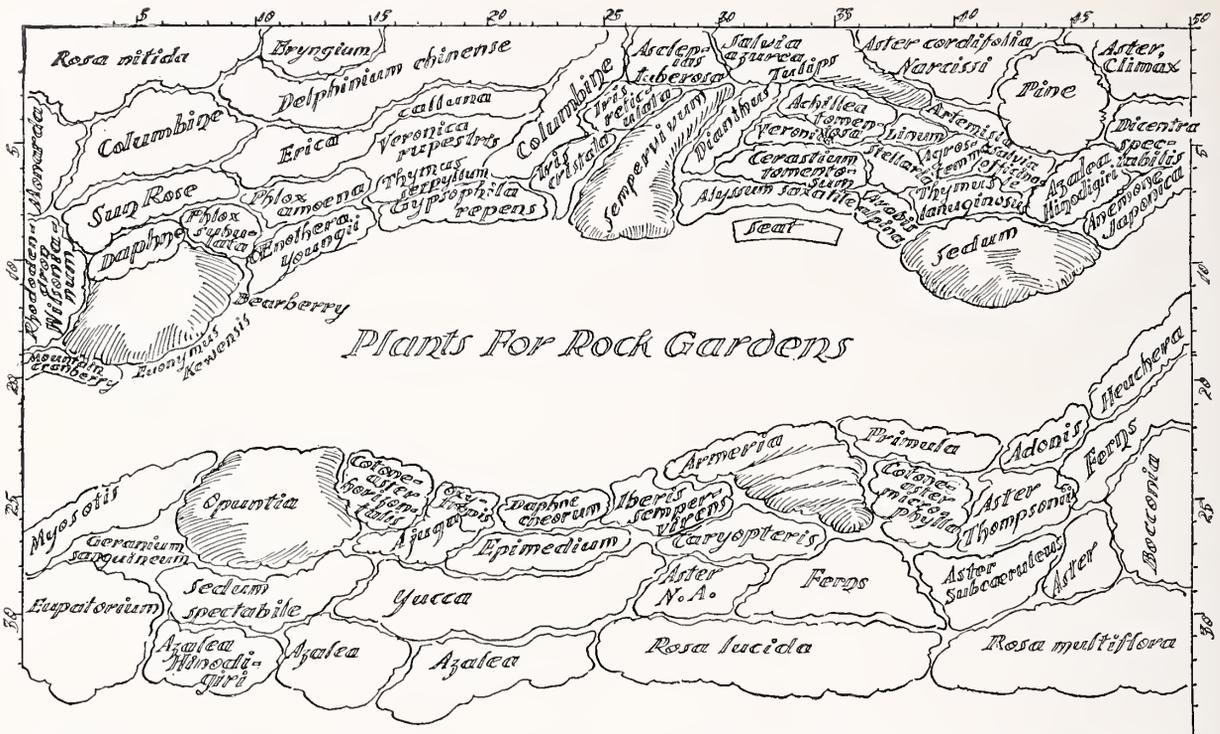

Dainty, graceful, low-growing shrub.

2 ft. high, 30 cts. each, \$2.50 for 10.

This Group
of 15 Shrubs
Spiraea and
Barberry
\$3.50

Spiraea

GOLD DUST (*Alyssum saxatile compactum*). A popular rock plant, compact and low growing. Yellow flowers in spring. 25 cts. each, \$2 for 10.

ROCK CRESS (*Arabis alpina*). Requires plenty of sunlight. White flowers. 25 cts. each, \$2 for 10.

AZALEA HINODIGIRI. A blaze of scarlet in May. Evergreen. \$1.25 each, \$10 for 10.

HEATHER (*Calluna vulgaris*). Low, evergreen shrub with bright pink flowers in August. Thrives in a peaty soil. 50 cts. each, \$4.50 for 10.

GARLAND FLOWER (*Daphne Cneorum*). Trailing evergreen. Fragrant pink flowers in April. A rockery is not complete without this species. 75 cts. each, \$6 for 10.

BARRENWORT (*Epimedium macranthum*). A perennial with blue-and-white flowers. 20 cts. each, \$1.50 for 10.

SUN ROSE (*Helianthemum Chamæcistus*). Low evergreen shrub. Profuse yellow flowers in summer. Needs sunlight. 50 cts. each, \$4.50 for 10.

PRICKLY PEAR (*Opuntia*). An interesting cactus plant with large yellow flowers. 25 cts. ea., \$2 for 10.

SOAPWORT (*Saponaria ocymoides*). A creeping perennial. Pink flowers in early fall. Very conspicuous plants when in bloom. 25 cts. each, \$2 for 10.

HEN-AND-CHICKENS (*Sempervivum*). Very interesting plants for the rockery. 25 cts. each, \$2 for 10.

FERNS. We offer a special collection for the rockery of 48 plants, 8 varieties, for \$5. These will be sent direct from a grower in New England.

The following are also suitable: See Hardy Flower List for prices

Come to the nursery and see the rock-gardens we are starting. You will find a new way of expressing your ideals in a small area

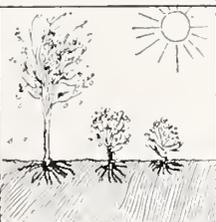

Mr. Foolish Man plants Poplars and other moisture-loving plants in dry soil.

They grow well during the period of spring rains.

They gasp for water all summer, wilt, turn yellow, lose part of their leaves and look forlorn.

"My Place Is Like A Sieve."

DRY-GROUND PLANTS

As prescribed by Mother Nature. They continue to smile when other plants have quit. It does not require faith to do what nature is doing all about.

On that gravelly slope the grass turns brown in July, and you can not afford to cart good soil to make the grass grow. You can solve the problem by planting the Pines and Oaks that like to grow there. The little trees planted close together quickly shade the ground and fertilize themselves with their fallen leaves, and soon you delight to ride on the trails through such fields.

LITTLE OAKS

Oaks are preëminently the trees for dry ground. Use them with little Pines and clothe a bare hillside at \$15 an acre. An assortment of Black, Black Jack, Chestnut, Scarlet, Red, and White.

	10	100	1,000
1 ft. high	\$1 00	\$6 00	\$40 00
2 ft. high	2 00	15 00	80 00

SMALL PINES

Your land might be too poor for a crop, but not too poor for these Pines. Be just to yourself. How many can you use? For forest planting put them 10 feet apart. We offer White and Red Pine.

	100	1,000
4-9 in. high	\$2 50	\$15 00
9-12 in. high	5 00	30 00
1 ft. high	10 00	50 00
2 ft. high	20 00	100 00

BAYBERRY

Very happy and vigorous in dry soil.

	10	100
1 ft. high	\$2 50	\$20 00

WILD CHERRY

Another standby for dry ground. Undeterred by drought. The best tree for seaside. Fruit for birds in July.

	Each	10
4 ft. high	\$0 35	\$3 00
6 ft. high	50	4 00

SUMAC

We have several varieties and they are all excellent. You may not realize what beautiful compositions these native plants make.

	Each	10
3 ft. high	\$0 35	\$3 00

HONEY LOCUST

These small trees are ideal to plant in thickets of shrubs.

	Each	10
4 ft. high	\$0 50	\$4 00

CHESTNUT OAKS

A beautiful tree in most unpromising soils. Plant among the shrubs and have a smiling colony.

	Each	10
3 ft. high	\$0 50	\$4 00
5 ft. high	1 00	9 00

WHITE BIRCH

See how quickly they will grow up and smile.

	10	100
2 ft. high	\$2 50	\$15 00

SCRUB OAKS

Just another reliable shrub for dry soil. Try ten anyway.

	Each	10
3 ft. high	\$0 35	\$3 00

WILD ROSE

It is hard to understand how they can be so happy with so little to be thankful for.

	Each	10
1-2 ft. high	\$0 30	\$2 50

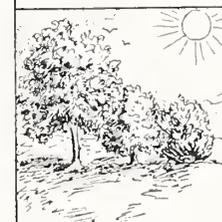

Mr. Wise Man takes a tip from nature and uses plants that are adapted to dry soil.

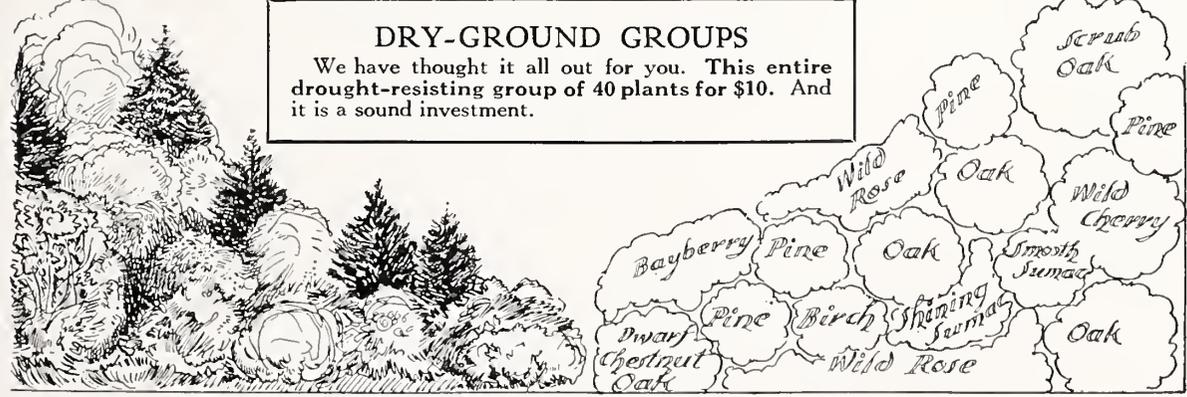

Rain or shine they care not. Their roots go far and deep.

The hottest, driest summer and the poorest land do not affect their courage in the least.

DRY-GROUND GROUPS
We have thought it all out for you. This entire drought-resisting group of 40 plants for \$10. And it is a sound investment.

“What have you that will grow in the shade?”

We are often asked this question. A review of our records shows three classifications of shade:

1. UNDER LARGE MAPLES, POPLARS, ETC.
2. ON THE NORTH SIDE OF BUILDINGS
3. IN WOODLAND

Planting under the condition first named is most difficult on account of the surface-root competition. The sketch at the bottom of the page suggests ways of eliminating this competition. Planting north of buildings is very simple if the location is not menaced by the roots of Maples or other adjacent trees. If you wish to plant in woodland, very effective groups are suggested in the sketch at the top of these pages.

RHODODENDRON

Native in the woods; therefore will make happy groups in your woodland. See page 21 for an effective treatment on the shady side of the house. The soil should be half-decaying leaves and free from lime. We have a few booklets left dealing more extensively with colors and varieties. You are welcome to one, or you may order from this catalogue by color. White, Pink, Crimson, Dark Crimson, Lilac.

	Each	10	100
15 in. high	\$1 50	\$12 50	\$100 00
1 ½ ft. high.....	2 50	22 50	200 00
2 ft. high.....	3 50	30 00	250 00
2 ½ ft. high.....	5 00	45 00	400 00

LEUCOTHÖË CATESBAEI

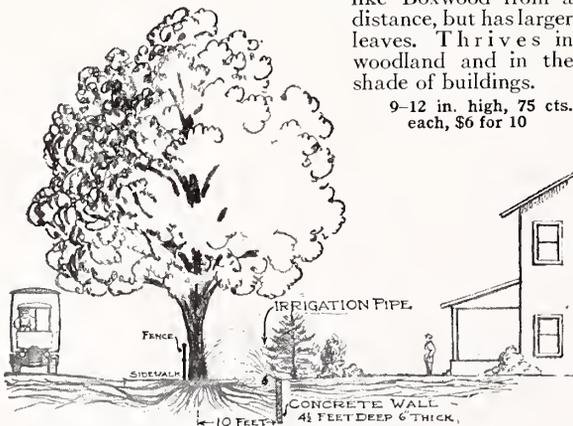

This enjoys the same conditions as the Rhododendron. Grows 2 feet high, with long, graceful, arching branches. Foliage turns red and purple in winter.

	Each	10	100
1 ft. high	\$0 85	\$7 00	\$60 00

INKBERRY (*Ilex glabra*)

This makes a handsome, round, evergreen bush. Looks like Boxwood from a distance, but has larger leaves. Thrives in woodland and in the shade of buildings.

9-12 in. high, 75 cts. each, \$6 for 10

BERBERIS JAPONICA

In the shade this makes a sturdy shrub 6 feet high, with leaves a foot long, divided into leaflets about the shape and color of the Holly, but larger.

	Each	10
1 ½ ft. high.....	\$0 75	\$6 00

OREGON GRAPE (*Berberis Aquifolium*)

This looks like a little Holly. 2 feet high. Pretty yellow flowers in spring; blue berries in summer.

	Each	10
1 ½ ft. high.....	\$0 75	\$6 00

HOLLY (*Ilex opaca*)

Grows in sun, but is especially rich and handsome in shade.

	Each	10
2 ft. high.....	\$1 50	\$12 50
3 ft. high.....	3 50	30 00
4 ft. high.....	6 00	50 00

Correspond about larger trees up to 10 feet from nursery.

JAPANESE HOLLY (*Ilex crenata*)

An evergreen with boxwood-like foliage. Ten plants will make a very effective group in the woodland.

	Each	10
2 ft. high.....	\$1 25	\$10 00
3 ft. high.....	2 00	15 00

JAPANESE SPURGE (*Pachysandra*)

Plant 1 foot apart and you will soon have an evergreen carpet 6 inches high. These green patches always make a woodland interesting. \$1.50 for 10, \$10 per 100, \$90 per 1,000.

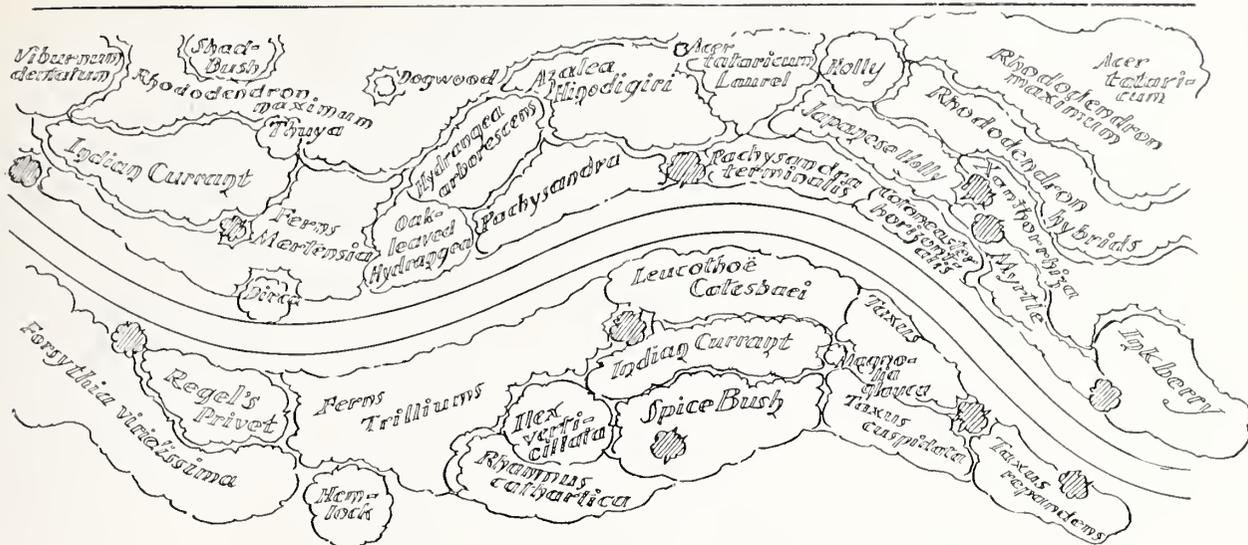

MYRTLE (*Vinca minor*)

This, too, makes a solid green carpet. Blue flowers in early spring. 15 cts. each, \$1 for 10, \$8 per 100.

EVERGREEN AZALEA

A blaze of brilliant crimson in early May. Grows 1 ½ feet high. Try five, or ten, or more.

	Each	10
8 in. high.....	\$1 25	\$10 00

Shade Is Not a Detriment, But Offers Vast Possibilities

Many of the rarest gems thrive in the shade. Some of them demand it if they are to reach their highest development. Consider the woodland. It is a master creation with its masses of Azalea, Dogwood, Fern, Laurel, and Arbutus. Your woodland paths may be beautiful dreams.

GOLDEN BELL

Forsythia suspensa and *Fortunei*

In a large collection in the shade we notice this had the best foliage.

Each	10	100
3 ft. high	\$0 35	\$3 00 \$18 00

ACANTHOPANAX PENTAPHYLLUM

A graceful bush with excellent foliage. Grows 5 feet.

Each	10
2-3 ft. high	\$0 35 \$3 00

SPICE BUSH (*Benzoin odoriferum*)

A yellow haze in April, scarlet berries in late summer. Natural in moist woodland.

Each	10
3 ft. high	\$0 40 \$3 50

BLACK HAW (*Viburnum prunifolium*)

Gets to be a very picturesque tree, like the Dogwood. Black edible berries.

Each	10
2 ft. high	\$0 40 \$3 50

PANICLED DOGWOOD

Cornus paniculata

The birds feast on the white berries in August.

Each	10
3 ft. high	\$0 40 \$3 50

INDIAN CURRANT

Symphoricarpos vulgaris

This grows 3 feet high. Long, wiry branches thickly hung with dull red berries. A small colony is very pleasing.

Each	10
2 ft. high	\$0 30 \$2 50

LAUREL (*Kalmia latifolia*)

The question is: How many you have space for, 2½ feet apart? A very showy native Long Island plant. Soil requirements same as Rhododendron.

Each	10	100
12-24 in. high	\$0 75	\$6 00 \$50 00

OTHER SHRUBS AND TREES

Many other shrubs and trees will thrive in shade or partial shade. These are listed elsewhere in this catalogue and can be easily located by the index. See Aralia, Forsythia viridissima, Witch-Hazel, Hills-of-Snow, Hydrangea, Hercules' Club, Common Barberry, Dogwood, Judas Tree, Silver Bell, Red Maple, Golden Chain, Privet, Magnolia glauca.

EVERGREENS

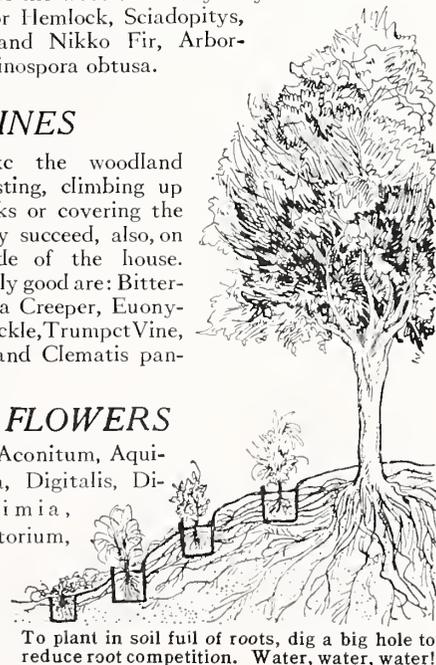

Many evergreens delight in the shade. All the Yews are particularly happy there. They will make handsome groups through the woodland. Try fifty for a start. See index, also, for Hemlock, Sciadopitys, Nordmann's and Nikko Fir, Arborvitae, and Retinospora obtusa.

VINES

Vines make the woodland highly interesting, climbing up the tree trunks or covering the ground. They succeed, also, on the shady side of the house. Those especially good are: Bittersweet, Virginia Creeper, Euonymus, Honeysuckle, Trumpet Vine, English Ivy, and Clematis paniculata.

HARDY FLOWERS

Anemone, Aconitum, Aquilegia, Funkia, Digitalis, Dicentra eximia, Bellis, Eupatorium, Polygonatum, Primula, etc. See pp. 40 to 45.

To plant in soil full of roots, dig a big hole to reduce root competition. Water, water, water!

**"I Want a Succession
of Bloom"**
FLOWERING SHRUBS
WILL GIVE IT

MARCH-APRIL BLOOM

JAPANESE PUSSY WILLOW
Salix multinervis

They give a promise of spring when spring is a good way off. They glitter especially during an ice storm and we always have an ice storm when they are in bloom. 2 ft. high, 40 cts. each, \$3.50 for 10.

FRAGRANT HONEYSUCKLE
Lonicera fragrantissima

Occasionally blooms all winter, otherwise in March and April. Bright green foliage until Christmas. 2 to 3 ft. high, 40 cts. each, \$3.50 for 10.

CORNELIAN CHERRY
Cornus mas, or C. mascula

A yellow mist in March and April; cherry-like fruits in September that make a delightful acid drink. 1 ft. high, 25 cts. each, \$2 for 10; 3 ft., 75 cts. each, \$6 for 10; 4 ft., \$1 each, \$7.50 for 10; 5 ft., \$1.25 each, \$10 for 10.

FORSYTHIA FORTUNEI (Golden Bell)

A familiar mass of yellow the middle of April. Branches will bloom in a few days if brought into the house in winter. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft., 50 cts. each, \$4 for 10.

FORSYTHIA SUSPENS A
Weeping Golden Bell

This has long slender branches that hang down and trail along the ground. Striking as it hangs over a retaining wall or covers a bank. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. 50 cts. each, \$4 for 10.

THUNBERG'S SPIREA (Snow Garland)

A drift of white before the leaves appear. Dwarf. Excellent for banking at foundations. Orange and red in autumn. 2 ft. high., 35 cts. each, \$3 for 10.

SPICE BUSH (Benzoin odoriferum)

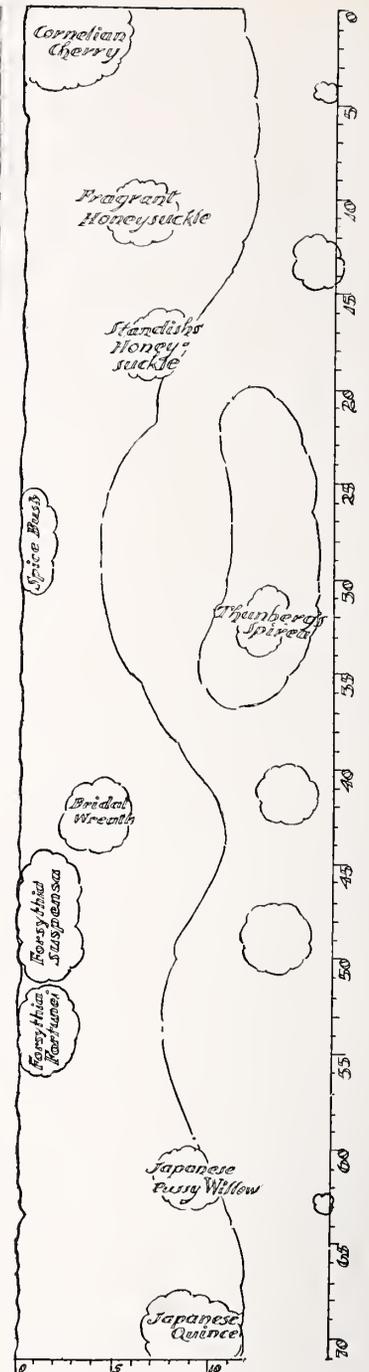

Yellow haze in April. Scarlet berries in late summer. 4 ft. high, 60 cts. each, \$5 for 10.

JAPANESE QUINCE (Cydonia japonica)

Brilliant red flowers last of April or early May. 2 to 3 ft. high, 35 cts. each, \$3 for 10.

BRIDAL WREATH (Spiraea prunifolia)

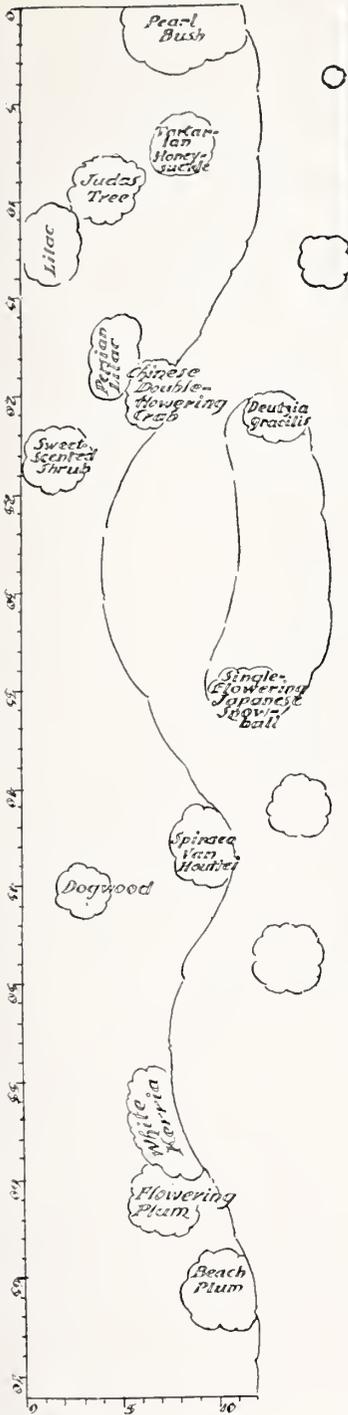

Covered with tiny double white, rose-like flowers, late in April. An old favorite. 3 ft. high, 35c. each, \$3 for 10; 4 ft. high, 50c. each, \$4.50 for 10.

**SWEET-SMELLING
GROUP**

Here are 16 fragrant plants, just enough to plant around a garden seat. 2 Mock Orange, 1 Sweet Bay Magnolia, 5 Lilac, 2 Flowering Crab, 2 Tartarian Honeysuckle—all packed for shipment, \$8.

DEUTZIA GRACILIS

MAY BLOOM

CHINESE QUINCE (*Chanomeles sinensis*)

Medium-sized shrub with delicate pink flowers in May. Interesting fruit 5 inches in diameter, good for jelly. 3 ft. high, 35 cts. each, \$3 for 10.

SWEET-SCENTED SHRUB (*Calycanthus*)

That lovely old shrub, with sweet-smelling chocolate-brown flowers. 3 ft. high, 40 cts. each, \$3.50 for 10.

PEARL BUSH (*Exochorda*)

As showy as *Spiraea Vanhouttei* growing 10 to 12 feet high. Rare. 3 ft. high, 50 cts. each, \$4 for 10.

WHITE KERRIA (*Rhodotypos*)

Light green foliage; single white flowers. One of the conspicuous flowers in its period. 2 to 3 ft. high, 35 cts. each, \$3 for 10.

SPIRAEA VANHOUTTEI

The popular standby with gracefully arching sprays of pure white. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 75 cts. each, \$6 for 10.

LILACS, PURPLE AND WHITE

Of course you want some. The only question is what color. Would you like a list of our named varieties? 3 ft. high, 50 cts. each, \$4 for 10; 4 ft. high, 75 cts. each, \$6 for 10; 5 ft. high, \$1 each, \$8.50 for 10.

PERSIAN LILAC (*Syringa persica*)

Earlier than the above. Pale lilac flowers that gracefully bend their slender branches. 3 to 4 ft. high, 50 cts. each, \$4 for 10.

BEACH PLUM (*Prunus maritima*)

A cloud of white the first of May. Fruit in September. Native on the sand dunes. 3 ft. high, 40 cts. each, \$3.50 for 10.

FLOWERING PLUM (*Prunus triloba*)

Double pink flowers thickly set on the slender branches. 3 ft. high, 75 cts. each, \$6 for 10.

DOGWOOD

Flowering trees give shrubbery boundaries a more interesting skyline. Don't be afraid to weave them in plentifully. Dogwood and other flowering trees are listed on pages 2 and 3.

DEUTZIA GRACILIS

Low growing. Dense mass of white when in flower. A real little gem. 1½ to 2 ft. high, 35 cts. each, \$3 for 10.

CORCHORUS (*Kerria japonica*)

An old-fashioned shrub, with yellow globular flowers and green bark. 3 ft. high, 40 cts. each, \$3.50 for 10.

TARTARIAN HONEYSUCKLE

Lonicera tatarica

Cream or pink flowers in May. One of the earliest to leaf out in spring. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 50 cts. each, \$4.50 for 10; 5 ft. high, 75 cts. each, \$6 for 10.

SINGLE-FLOWERING JAPANESE

SNOWBALL (*Viburnum tomentosum*)

A showy shrub with flat flower-clusters. Last of May. 2 ft. high, 35 cts. each, \$3 for 10; 3 ft. high, 50 cts. each, \$4 for 10.

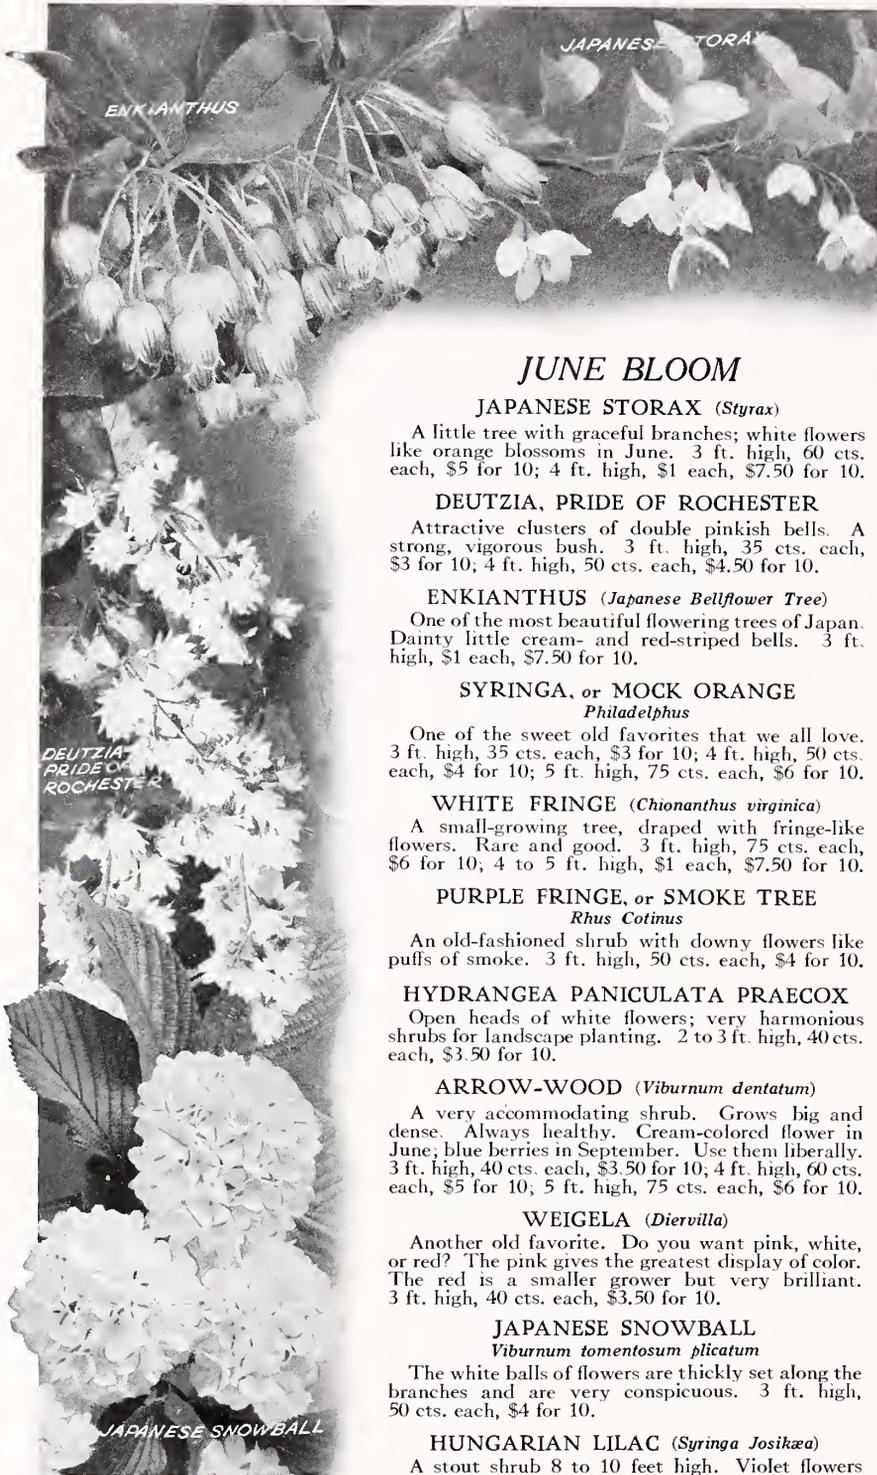

PEARL BUSH

BEACH PLUM

BIRD GROUP

Here are 36 shrubs that the birds love for their fruits. From 20 to 60 different species of birds feed on them. The lot includes: 6 Elder, 2 Elæagnus, 4 Wild Cherry, 5 Bayberry, 5 Juneberry, 4 Sumac, 10 Cornus alba—all packed for shipment, \$10.

ENKIANTHUS

JAPANESE STORAX

DEUTZIA PRIDE OF ROCHESTER

JAPANESE SNOWBALL

JUNE BLOOM

JAPANESE STORAX (*Styrax*)

A little tree with graceful branches; white flowers like orange blossoms in June. 3 ft. high, 60 cts. each, \$5 for 10; 4 ft. high, \$1 each, \$7.50 for 10.

DEUTZIA, PRIDE OF ROCHESTER

Attractive clusters of double pinkish bells. A strong, vigorous bush. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 50 cts. each, \$4.50 for 10.

ENKIANTHUS (*Japanese Bellflower Tree*)

One of the most beautiful flowering trees of Japan. Dainty little cream- and red-striped bells. 3 ft. high, \$1 each, \$7.50 for 10.

SYRINGA, or MOCK ORANGE

Philadelphus

One of the sweet old favorites that we all love. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 50 cts. each, \$4 for 10; 5 ft. high, 75 cts. each, \$6 for 10.

WHITE FRINGE (*Chionanthus virginica*)

A small-growing tree, draped with fringe-like flowers. Rare and good. 3 ft. high, 75 cts. each, \$6 for 10; 4 to 5 ft. high, \$1 each, \$7.50 for 10.

PURPLE FRINGE, or SMOKE TREE

Rhus Cotinus

An old-fashioned shrub with downy flowers like puffs of smoke. 3 ft. high, 50 cts. each, \$4 for 10.

HYDRANGEA PANICULATA PRAECOX

Open heads of white flowers; very harmonious shrubs for landscape planting. 2 to 3 ft. high, 40 cts. each, \$3.50 for 10.

ARROW-WOOD (*Viburnum dentatum*)

A very accommodating shrub. Grows big and dense. Always healthy. Cream-colored flower in June; blue berries in September. Use them liberally. 3 ft. high, 40 cts. each, \$3.50 for 10; 4 ft. high, 60 cts. each, \$5 for 10; 5 ft. high, 75 cts. each, \$6 for 10.

WEIGELA (*Diervilla*)

Another old favorite. Do you want pink, white, or red? The pink gives the greatest display of color. The red is a smaller grower but very brilliant. 3 ft. high, 40 cts. each, \$3.50 for 10.

JAPANESE SNOWBALL

Viburnum tomentosum plicatum

The white balls of flowers are thickly set along the branches and are very conspicuous. 3 ft. high, 50 cts. each, \$4 for 10.

HUNGARIAN LILAC (*Syringa Josikæa*)

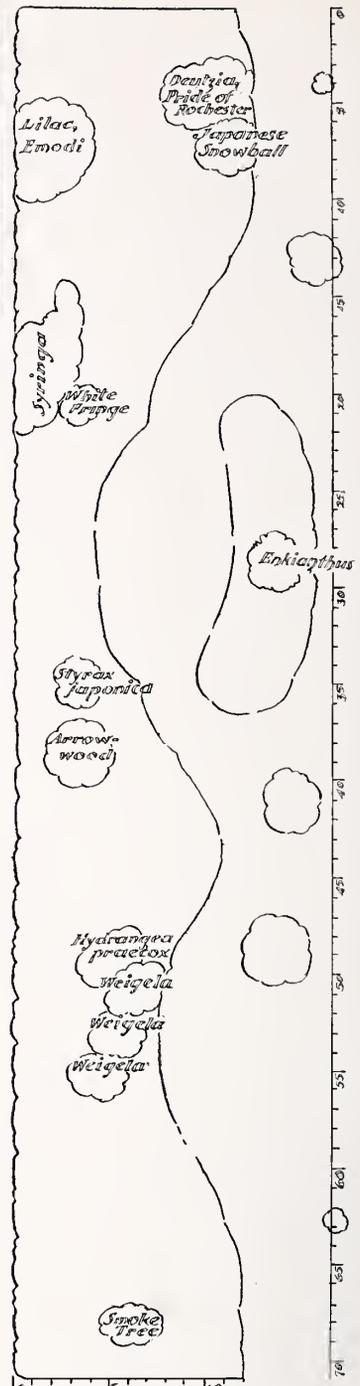

A stout shrub 8 to 10 feet high. Violet flowers expanding two weeks later than the Common Lilac. 2 ft. high, 30 cts. each, \$2.50 for 10.

GOLDEN CHAIN (*Laburnum*)

A tall shrub with long clusters of yellow flowers of the same form as those of the Wisteria. 3 to 4 ft. high, 50 cts. each, \$4 for 10.

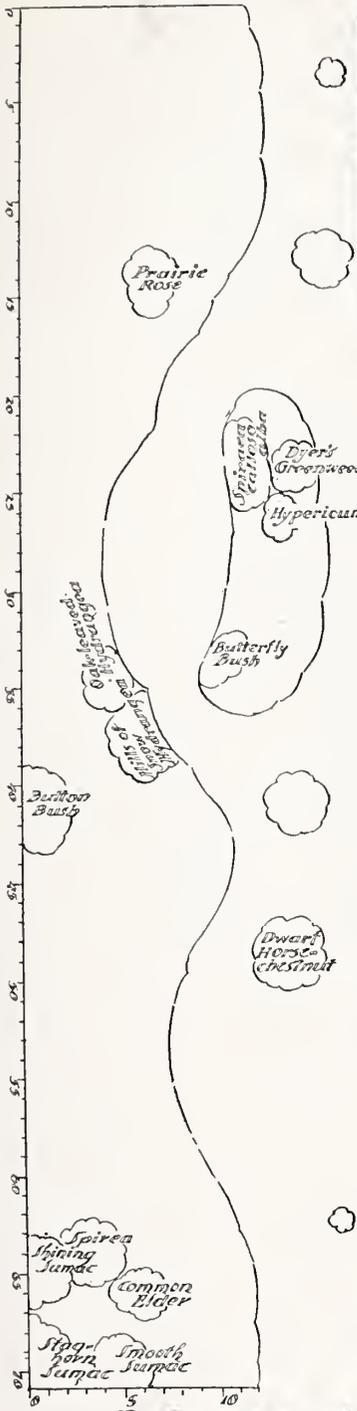

PANICLED DOGWOOD (*Cornus paniculata*)

A most excellent bush for landscape planting. Healthy foliage; creamy colored flowers in June; peachy berries in September. 3 ft. high, 35 cts. each, \$3 for 10.

GARDEN ARCH GROUP

These plants fit into the atmosphere of a garden: 1 Climbing Rose, 1 Clematis paniculata, 6 Yellow-root, 2 Japanese Maple, 5 Butterfly Bush, 5 Pæonia, 5 Funkia, 5 Rosa rugosa—30 in all, \$10.

OAK-LEAVED HYDRANGEA

JULY BLOOM

OAK-LEAVED HYDRANGEA
Hydrangea quercifolia

A low-growing plant with large leaves shaped like those of the Red Oak. Panicles of flowers in July. Does your shrubbery need a bright touch in July? 1½ ft. high, 50 cts. each, \$4.50 for 10.

HYPERICUM DENSIFLORUM

This is a shrub growing about 3 feet high, with little yellow stars all summer. 2 ft. high, 40 cts. each, \$3.50 for 10.

BUTTONBUSH

A midsummer bloomer. Pure white bells 1½ inches in diameter. 2 ft. high, 25 cts. each, \$2 for 10.

DWARF HORSE-CHESTNUT

Æsculus parviflora

A rare and beautiful shrub. Flowers are borne in erect panicles. 2 to 3 ft. high, 75 cts. each, \$6 for 10.

BUTTERFLY BUSH (*Buddleia*)

One of the very conspicuous midsummer flowers. Long, tapering spikes of lilac-colored, sweet-scented flowers. 50 cts. each, \$4 for 10.

SORBARIA AITCHINSONII

Plumes of white flowers. Attractive foliage. A delightful shrub indeed. 3 ft. high, 50 cts. each, \$4 for 10.

HYDRANGEA, HILLS-OF-SNOW

A low shrub with long white flowers like snowballs in midsummer. 2 ft. high, 50 cts. each, \$4.50 for 10.

DYER'S GREENWEED (*Genista tinctoria*)

Peculiar foliage like the whisks of a broom. Yellow flowers in July. 2 to 3 ft. high, 40 cts. each, \$3 for 10.

SPIREA, ANTHONY WATERER

Grows 3 feet. Excellent for massing. Carmine flower; heads that will continue to come all summer if they are not allowed to go to seed. 1½ ft. high, 50 cts. each, \$4 for 10.

SPIRAEA CALLOSA ALBA

A pretty little plant with flat clusters of white flowers in July. 1 ft. high, 25 cts. each, \$2 for 10; 2 ft. high, 40 cts. each, \$3.50 for 10.

SWEET PEPPERBUSH (*Clethra alnifolia*)

White, fragrant spikes of flowers in July. 2 to 3 ft. high, 40 cts. each, \$3.50 for 10.

SILVER THORN (*Ælaëgnus longipes*)

A large shrub, planted mainly for its showy, edible, cranberry-like fruit, ripening in summer. 2 to 3 ft. high, 40 cts. each, \$3.50 for 10.

COMMON ELDER

The most conspicuous white flower of late June. A native species that is worthy of larger use. 3 ft. high, 50 cts. each, \$4 for 10.

CHILDREN'S GROUP

Here are 12 plants that always interest the children. 1 Pussy Willow, 1 Sweet Shrub, 1 Snowberry, 1 Bleeding-Heart, 1 Ælaëgnus umbellata, 5 English Daisy, 1 Dutchman's Pipe Vine, 1 Weeping Mulberry.

AUGUST BLOOM

ROSE OF SHARON, or ALTHEA

Flower- and shrub-gardens get pretty ragged-looking by late summer, and the Altheas, especially the pure white varieties, are decidedly welcome. Our varieties include Double and Single White, Dark Red, and Pink. State color when ordering. 2 ft. high, 35 cts. each, \$3 for 10; 3 ft. high, 50 cts. each, \$4 for 10; 4 ft. high, 75 cts. each, \$6 for 10.

HYDRANGEA PANICULATA TARDIVA

Late-flowering type. Smaller and more open flower-heads than the common Hydrangea. By cutting back the bushes in May, they will bloom in September rather than August. 3 to 4 ft. high, 40 cts. each, \$3.50 for 10.

HYDRANGEA PANICULATA GRANDIFLORA

The common variety with large flower-heads. To increase the size of the flowers, cut back severely in spring, dig in manure, and keep free from weeds and tree roots. 3 ft. high, 35 cts. each, \$3 for 10.

HERCULES' CLUB (*Aralia spinosa*)

A most vigorous and conspicuous plant, with luxuriant tropical foliage 2 feet long. It is crowned by a wide cluster of small white flowers and black berries. 4 to 6 ft. high, 50 cts. each, \$4.50 for 10.

JAPANESE DOGWOOD (*Cornus Kousa*)

Offered here merely for its interesting, strawberry-like, edible fruits. Its principal merits are its glorious flowers late in May, healthy foliage, and rich autumnal coloring. Use it in quantity. Illustration and further description on page 3.

TARTARIAN HONEYSUCKLE

(*Lonicera tatarica*)

Big sturdy bushes with bright red berries that sparkle like the eyes of the birds they attract. One of the most worthy fruiting shrubs. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 50 cts. each, \$4.50 for 10; 5 ft. high, 75 cts. each, \$6 for 10.

CORNUS PANICULATA

See page 25

HYPERICUM MOSERIANUM

The summer and fall are made cheerful by the large yellow flowers of this plant. Like gigantic buttercups. Grows 1½ ft. high. 40 cts. each, \$3.50 for 10.

ELAEAGNUS LONGIPES

A handsome rare shrub. Cranberry-like fruits in midsummer. Try them for a new jam. 2 ft. high, 35 cts. each, \$3 for 10.

SUMAC

It is along in August that they hold up their rich crimson seed-torches, and soon after the foliage resumes its autumn hue. See page 29 for its position in the shrubbery. 3 ft. high, 35 cts. each, \$3 for 10.

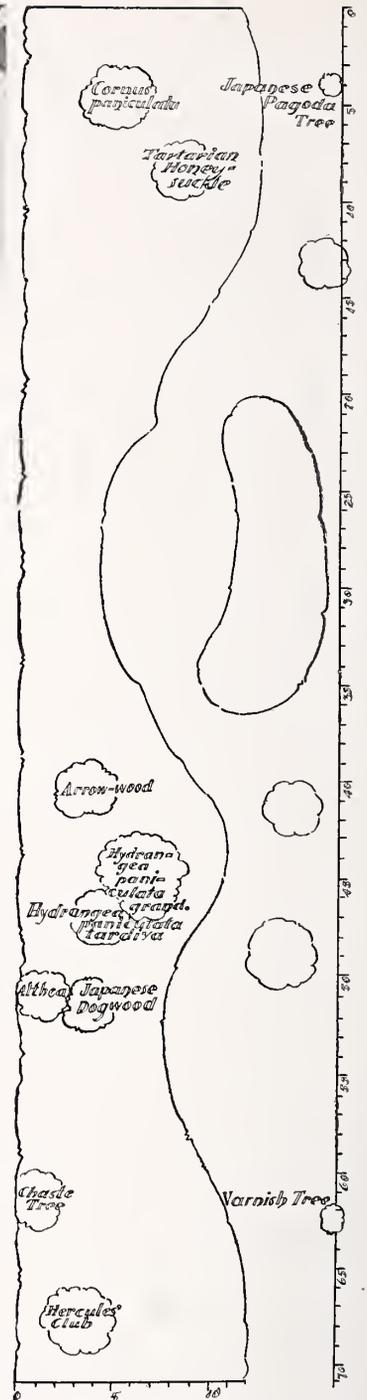

CHASTE TREE (*Vitex*)

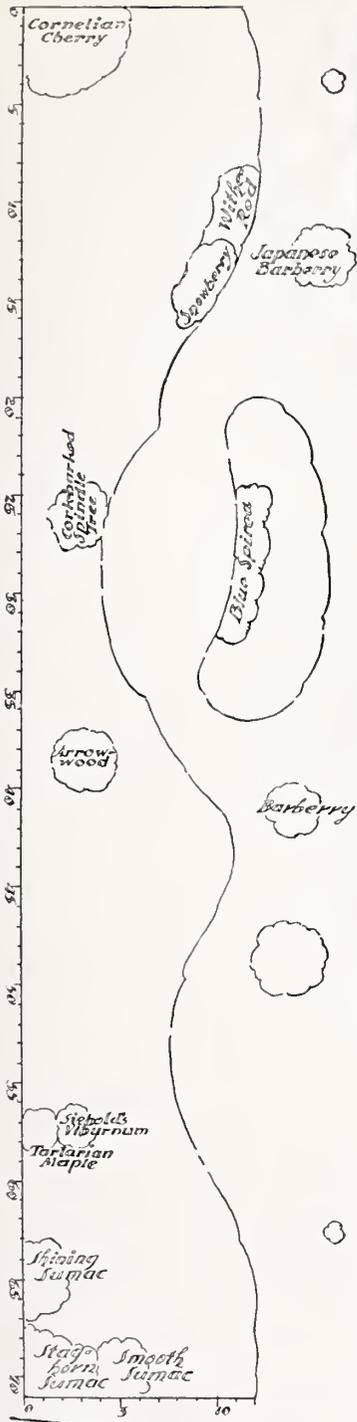

Quite an uncommon shrub. You will be pleased with the spikes of blue late in summer. Surprise your friends. 3 ft. high, 40 cts. each, \$3.50 for 10.

AUTUMN FOLIAGE GROUP

The excellencies of autumn foliage are here assembled. A most gorgeous group, scarlet, gold, and crimson. 2 *Euonymus alatus*, 1 *Enkianthus*, 1 *Tartarian Maple*, 5 *Spiraea Thunbergii*, 1 *Cut-leaved Sumac*, 5 *Barberry*, 5 *Witthe-rod*, 2 *Chokeberry*, 3 *Sheepberry*, 5 *Forsythia viridissima*—30 plants in all, \$10.

SEPTEMBER-OCTOBER BLOOM

COMMON BARBERRY (*Berberis vulgaris*)

An upright shrub with graceful clusters of bright berries. 1½ ft. high, 20 cts. each, \$1.75 for 10, \$15 per 100.

EUONYMUS ALATUS (*Cork-barked Spindle Tree*)

One of the brilliant fall shrubs, both in foliage and berries. 3 ft. high, \$1 each, \$7.50 for 10.

SNOWBERRY (*Symphoricarpos*)

White waxy berries in September. Excellent for edging down shrubbery. 2 ft. high, 25 cts. each, \$2 for 10.

VIBURNUM SIEBOLDII

Very rare. Showy clusters of red berries in September. Grows 5 feet and has large glossy leaves. 2 ft. high, 60 cts. each, \$5 for 10; 3 ft. high, \$1 each, \$7.50 for 10.

TARTARIAN MAPLE (*Acer tataricum*)

Grows 12 feet high; the most gorgeous foliage of early fall. 3 ft. high, 60 cts. each, \$5 for 10.

INDIAN CURRANT (*Symphoricarpos vulgaris*)

The branches are long and wiry, and when laden with coral berries in the fall become pendulous and graceful. Grows 3 feet. 2 ft. high, 35 cts. each, \$3 for 10.

WITHE-ROD (*Viburnum cassinoides*)

A graceful, upright shrub; has white flowers in June and purple berries in September. 3 ft. high, 50 cts. each, \$4 for 10.

BLUE SPIREA (*Caryopteris*)

A very acceptable little shrub. Delightful blue flowers in early fall. 2 ft. high, 40 cts. each, \$3.50 for 10.

SHEEPBERRY (*Viburnum Lentago*)

A tree-like shrub with black, sweet, edible berries. 3 ft. high, 50 cts. each, \$4 for 10.

ARROW-WOOD (*Viburnum dentatum*)

Very substantial bush with bunches of blue berries in early fall. 3 ft. high, 50 cts. each, \$4 for 10.

CORNELIAN CHERRY (*Cornus mas*)

Big red cherries in September that make a delicious, tart drink. 4 ft. high, \$1 each, \$7.50 for 10.

FORSYTHIA VIRIDISSIMA

Very striking as the outer foliage turns purple contrasting with the bright green of the inner foliage. Yellow flowers in April. 3 ft. high, 35 cts. each, \$3 for 10; 4 ft. high, 50 cts. each, \$4 for 10.

PANTRY-SHELF GROUP
 Make some new varieties of jam. Children will tease for it when they come from school. 5 Beach Plum, 1 Cornelian Cherry, 2 Elæagnus, 3 Chinese Quince, 3 Grape, 1 Crab-Apple, 5 Elderberry—20 plants in all, \$10.

NOVEMBER-DECEMBER BLOOM AND BERRIES

In fact most of the bright-berried shrubs offered on this page keep the landscape attractive all winter. If your place is not interesting the year round, here are plants that will help make it so; and don't forget to add some cheerful-looking evergreens. See pages 12 to 21.

BLACK ALDER (*Ilex verticillata*)

This is cheerful all winter with its red berries. 2 ft. high, 30 cts. each, \$2.50 for 10, \$20 per 100.

CHOKEBERRY (*Pyrus arbutifolia*)

Very brilliant in the fall when its berries turn to bright scarlet. 2 to 3 ft. high, 40 cts. each, \$3.50 for 10.

RED-TWIGGED DOGWOOD (*Cornus sibirica*)

Healthy foliage. Showy red bark all winter, 3 ft. high, 35 cts. each, \$3 for 10.

SILVER THORN

Eleagnus umbellata

Sweet, pulpy, edible berries. November to mid-winter. Grows 10 feet. 2 ft. high, 30 cts. each, \$2.50 for 10.

PHOTINIA VILLOSA

Chinese Christmas Berry

A healthy shrub 10 feet high. Abundant red berries in fall. 3 ft. high, 50 cts. each, \$4 for 10; 4 ft. high, \$1 each, \$8.50 for 10.

JAPANESE BARBERRY

Berberis Thunbergii

Showy all winter with its thousands of scarlet berries. 1½ ft. high, 25 cts. each, \$2 for 10.

HARDY ORANGE (*Citrus trifoliata*)

Large golden balls late in the fall. Exceedingly attractive. 1 to 2 ft. high, 40 cts. each, \$3.50 for 10.

HIGH-BUSH CRANBERRY

Viburnum Opulus

One of the most showy berry-bearing shrubs. 3 ft. high, 35 cts. each, \$3 for 10.

JAPANESE BUSH CRANBERRY

Viburnum dilatatum

This is a rare species; bunches of scarlet berries through the winter. 2 ft. high, 75 cts. each, \$6 for 10.

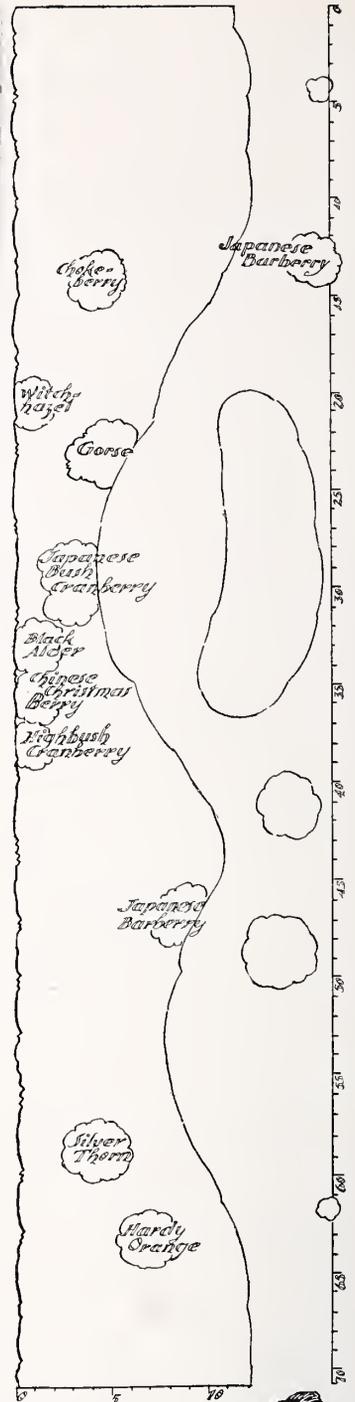

WITCH-HAZEL

Hamamelis virginiana

The lemon flowers, with petals like fine strips of paper, appear in profusion during November or December. It grows 8 feet high. Give good soil. 3 ft. high, 50 cts. each, \$4 for 10.

GORSE (*Ulex*)

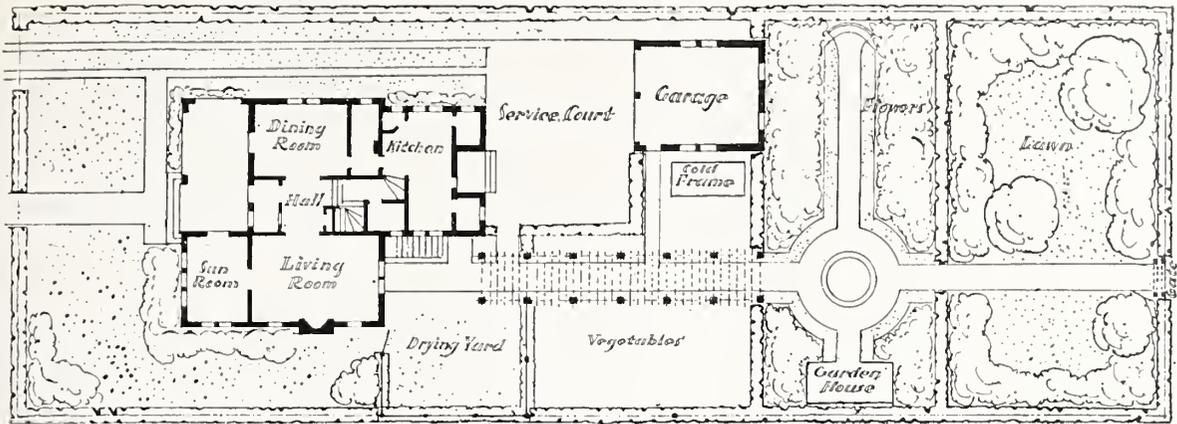

A curious shrub, starting to bloom in December and continuing in January in mild winters. Bright green bark. 1½ ft. high, 50 cts. each, \$4 for 10.

WINTER-BOUQUET GROUP

Did you ever make up a winter bouquet of evergreen twigs with a Barberry branch or two, and a sprig of Holly and Box? 1 Leucothoe, 1 Barberry, 1 Boxwood, 1 Yew, 1 Euonymus, 1 Bush Cranberry, 1 Japanese Holly, 1 Bittersweet, 1 Cotoneaster, 1 Red-twigged Dogwood—10 plants in all, \$5.

Plan for a place on Long Island, divided by hedges of Privet, Spruce, Japanese Yew, and Flowering Shrubs

Hedges

The most common purpose of a hedge is to mark a boundary. In this respect many plants qualify. California Privet is popular because it has long been available in quantity. Occasional winter-killing north of New York led us to seek something more hardy. We found this in Ibotia and Regel's Privet. You can have a Privet hedge now that does not winter-kill.

Barberry makes a less formal hedge, and there is beauty in its graceful growth and red berries throughout the winter. Honeysuckle and *Clematis virginiana* trained on low wires make a tangled boundary and are pleasing in this respect.

Quite occasional is the demand for a hedge to separate the departments of a garden. Plants of garden propensities are wanted. *Spiræa callosa alba* and Anthony Waterer are pretty garden hedges. *Viburnum dentatum* will give a billowy wall of green. *Spiræa Thunbergii* is fluffy and the gayest of all in autumn coloring. Japanese Yew is the best low evergreen. Dwarf Arborvitæ makes a trim, neat edging. Hazelnut and Bayberry are native material, always looking cheerful, and as yet uncommon. Forsythia or Deutzia accords perfectly with a garden atmosphere.

There are times when hedges are wanted as wind-barriers. The trees must be hale and hardy. Douglas Spruce is a wind-defier and always a pleasing green. White Pine insidiously robs the wind of its harshness by letting it gently sift through its needles.

NAME	Size	Distance to plant apart	SPECIALLY ADAPTED FOR	PRICE	
				10	100
White Pine. (See illus.)	5 ft.	3 ft.	Screen and windbreak for the garden, laundry-yard, paddock	\$25 00	\$200 00
White Pine	6 ft.	4 ft.		50 00	400 00
Douglas Spruce	3 ft.	3 ft.	Windbreak for gardens, coldframes, and exposed lawns	17 50	150 00
Douglas Spruce	4 ft.	3 ft.		25 00	200 00
Colorado Green Spruce	3 ft.	3 ft.	Reliable hedges at the shore	22 50	200 00
Booth's Dwarf Arborvitæ	1 ft.	1 ft.	A neat edging for evergreen beds or the garden walk	6 00	50 00
Siberian Arborvitæ	1½ ft.	1½ ft.	Garden division and background for garden seats	6 50	60 00
Japanese Yew	1 ft.	1½ ft.	The best low evergreen hedge. A refined tree for the most exclusive gardens	10 00	75 00
Japanese Yew	1½ ft.	2 ft.		20 00	175 00
Japanese Barberry	1½ ft.	2 ft.	Most graceful plant to mark your boundary	2 00	18 00
Deutzia crenata	3 ft.	2 ft.	An unusual garden hedge. Grows 6 feet	2 00	18 00
Deutzia Lemoinei	1 ft.	1 ft.	A pretty plant to separate flowers and vegetables	2 00	18 00
Forsythia (Golden Bell)	3 ft.	2 ft.	A hedge perfectly in accord with a garden atmosphere	2 00	18 00
Hazelnut	1 ft.	1½ ft.	An unusual hedge of native material. It bears nuts	1 25	12 00
Honeysuckle, Bush	3 ft.	3 ft.	A dense enclosure. Famous for its bright berries	3 00	25 00
California Privet	3 ft.	1 ft.	The most common hedge. Not reliable north of New York	70	6 00
Regel's Prostrate Privet	1½ ft.	1½ ft.	Reliably hardy. Like Barberry, requires but little trimming	1 50	12 00
Spiræa callosa alba	8-12 in.	1 ft.	A very dwarf plant, blooming in midsummer	1 25	10 00
Viburnum dentatum	2 ft.	1½ ft.	This makes a billowy wall of healthy green foliage	2 00	15 00
Viburnum dentatum	3 ft.	2 ft.		4 50	35 00
Stephanandra flexuosa	8 in.	1½ ft.	Dainty edging plant with fernlike foliage	1 25	10 00
Spiræa Thunbergii	2 ft.	2 ft.	Gayest of all for autumn coloring	2 50	20 00
Spiræa Vanhouttei	3 ft.	2 ft.	A wall of white in May and graceful at other seasons	2 50	20 00
Pin Oak	8 ft.	4 ft.	Tall, narrow screen, to curtain off the garage and to give seclusion	10 00	90 00
Pin Oak	10 ft.	4 ft.		17 50	150 00
English Beech	8 ft.	4 ft.	Densely branched to ground. Holds brown leaves till spring	80 00	
White Oak	6 ft.	2½ ft.	Russet leaves held all winter; likes dry ground	17 50	150 00

Shrub intruding on Path

Path

Strip of turf hard to mow

Cover Plants

Path

Cover Plants

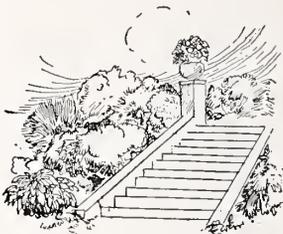

"It is often cheaper to use plants than to maintain grass"

You may have come to this conclusion yourself, especially if you have many of those narrow strips of turf, or terraces, or trees and shrubs to mow around or keep free from weeds.

COVER-PLANTS

are economical and beautiful. Let them clothe your banks and cover the bare ground between newly planted trees or shrubs. They tie the individual plants together and make a pleasing unit of the entire group.

What nature does is to cover every bit of ground where there is enough moisture. Will you let nature cover your ground with weeds, or keep it bare and unsightly, or set beautiful cover-plants that will keep down the weeds with a little help? We will help you fit plants to your conditions.

EUONYMUS RADICANS

Notice, on the opposite page, what a neat covering this makes. It is evergreen too, and rambles or climbs as opportunity offers. 30 cts. each, \$2.50 for 10, \$20 per 100.

EVERGREEN BITTERSWEET

Euonymus radicans vegeta

A fruiting form of the above. Larger leaves; scarlet berries. 30 cts. each, \$2.50 for 10, \$20 per 100.

JAPANESE SPURGE

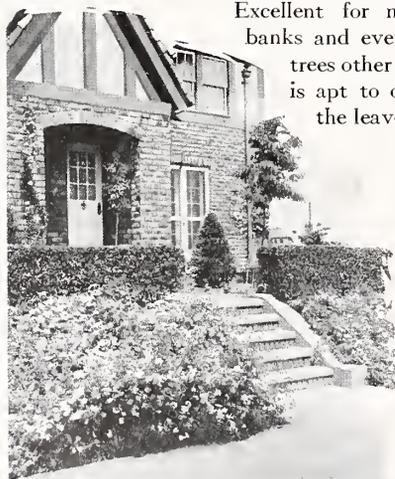

Pachysandra

This makes a green covering 6 inches high winter and summer. Plant 1 foot apart, and double the beauty of your newly planted evergreen beds and foundation groups. \$1.50 for 10, \$10 per 100, \$90 per 1,000.

HALL'S HONEYSUCKLE

Lonicera Halliana

Excellent for matted masses on banks and even in the shade of trees other than Maples. One is apt to overlook, too, that the leaves adhere well into the winter. 30c. each, \$2.50 for 10, \$20 per 100.

BANK-COVER

Roses planted 4 feet apart cover a bank during the first year. *Wichuriana*, *Multiflora*, *Dorothy Perkins*, *Excelsa*, and others on page 39 are excellent, and will look better and cost less than grass.

MOSS PINK

Phlox subulata

A solid sheet of pink, white, or lavender in May. Have you ever seen a bank covered with it? 1 foot apart. 15 cts. each, \$1.25 for 10, \$10 per 100.

BEARBERRY

Arctostaphylos

A trailing evergreen. One of the most admirable cover-plants for sand and the beach. Place 2 feet apart. 60 cts. each, \$5.50 for 10, \$50 per 100.

TRAILING ROSES

The corner illustration shows what a successful and satisfactory covering Trailing Roses will make. The flowers, of course, make the treatment gorgeous, but when not in bloom the healthy foliage makes a very attractive mantle for slopes and other areas. \$4 for 10, \$30 per 100.

SUN ROSE

Helianthemum vulgare

A little evergreen plant growing about 6 inches high, and having yellow flowers. 60 cts. each, \$5 for 10.

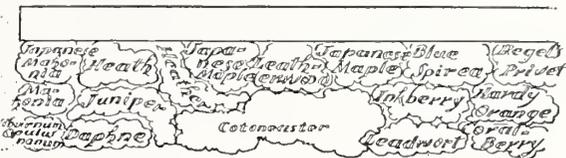

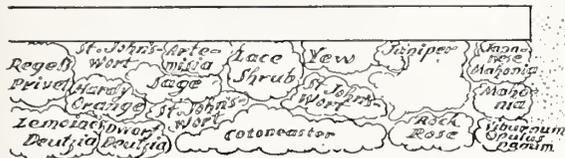

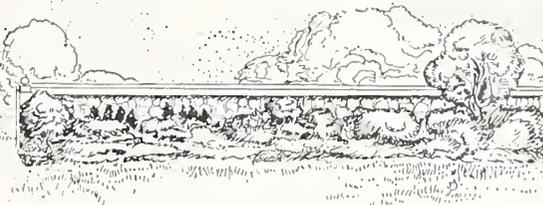

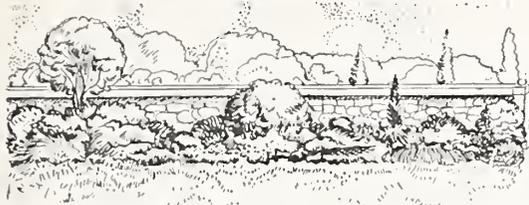

VINES

Vines make excellent cover-plants and represent greater value to you for this purpose, possibly, than any other. See page 37 for the various vines, such as English Ivy, Virginia Creeper, Clematis, etc. Plant about 3 feet apart:

HARDY FLOWERS

Many hardy flowers are also good material for this work. See Thyme, Sage, *Artemisia*, *Campanula carpatica*, *Achillea Ptarmica*, June Pink, Day Lily, *Sedum acre*, etc. These are listed on pages 40 to 45.

Low Plants that Will Not Obstruct the View

There is great need for plants that will stay small. Many landscapes have lost their beauty because the material used has outgrown its position. Sometimes the house looks smothered; sometimes beautiful views are closed. Low plants safeguard against all this, look more in scale where the area is small, and make pretty, low masses at curves and corners where high foliage might endanger life.

FLAT JAPANESE YEW (*Taxus cuspidata*)

Another handsome tree that will give a rich, low evergreen effect. Use it in quantity, 3 feet apart. Will grow 3 to 5 feet high. As beautiful here as English Yew in England. Thrives in sun or shade and in most soils.

	Each	10
1 ft. wide.....	\$1 25	\$10 00
2 ft. wide.....	3 00	25 00

JUNIPERS

We have several low-growing varieties. Planted 2½ feet apart, they will quickly make a low evergreen mass.

	Each	10
1 ft. wide.....	\$3 75	\$6 00

SPREADING YEW (*Taxus baccata repandens*)

This makes an especially handsome, dark green mat 2 feet high.

	Each	10
1½ ft. wide.....	\$0 40	\$3 50

MUGHO PINE (*Pinus Mughus*)

Low evergreen cushions of pleasing green.

	Each	10
1 ft. wide.....	\$1 25	\$10 00

COTONEASTER HORIZONTALIS

A very valuable low-growing plant for banks, bedding, foundations, etc. Red berries in winter.

	Each	10
1 ft. wide.....	\$1 00	\$7 50

OTHER EVERGREENS

See index for Dwarf Arborvitae, evergreen Berberis, Leucothoë, Inkberry, and Japanese Holly.

CUT-LEAVED JAPANESE MAPLE

Real gem. Low, delicate, and graceful.

	Each	10
1½ ft. wide.....	\$1 50	\$12 50

YELLOW-TWIGGED DOGWOOD

Cornus stolonifera lutea

A rugged plant growing 4 feet high. Bright twigs in winter.

	Each	10
1½ ft. high.....	\$0 30	\$2 50

LACE SHRUB (*Stephanandra flexuosa*)

A dainty relative of the Spirea, with arching branches of finely cut leaves. Grows 5 feet high. Try fifty.

	Each	10
1½ ft. high.....	\$0 30	\$2 50

DEUTZIA GRACILIS and D. LEMOINEI

Attractive little plants. A mass of white in May.

	Each	10
1½ ft. high.....	\$0 35	\$3 00

INDIAN CURRANT (*Symphoricarpos vulgaris*)

This makes a low tangle 3 feet high. Red berries in fall.

	Each	10
2 ft. high.....	\$0 35	\$3 00

REGEL'S PRIVET (*Ligustrum Iboia Regelianum*)

True flat-growing form. Gives substantial foliage masses.

	Each	10	100
2 ft. high.....	\$0 25	\$2 00	\$18 00

OTHER LOW SHRUBS

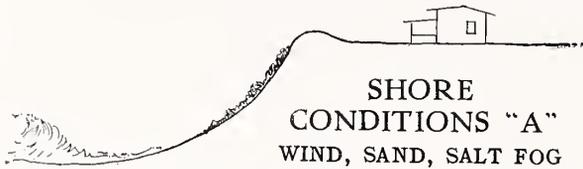

See index, for Japanese Barberry, Bayberry, Japanese Pussy Willow, Spirea callosa alba, Anthony Waterer and Thunbergii, Snowberry, Caryopteris, Hypericum Moserianum.

Road-bank in woods, covered with Flat Yew, Euonymus radicans, and Japanese Spurge

"Nothing Will Live for Me at the Shore"

Tell us which of these sets of conditions constitutes your problem, and send us your order for the groups of trees which are adapted

SHORE CONDITIONS "A" WIND, SAND, SALT FOG

Ocean exposure. Subject to all the winds that blow; white sand; salt fogs and spray. Native vegetation clearly shows the struggle it has had with the elements—distorted, stunted; many dead twigs; but natural.

Plant large colonies not less than 50 by 100 feet. Set the plants *just as thick as the holes can be dug*. The roots will overlap and the branches intertwine. The plants will grow and die back successively as they gradually adjust themselves and become reconciled. Do not be more exacting as to symmetry and perfect foliage with such a planting than you are with the native vegetation. Give as much good soil as possible. Cover the planted area with a foot of seaweed, eel grass, thatch, leaves, or stable litter, and do it every year.

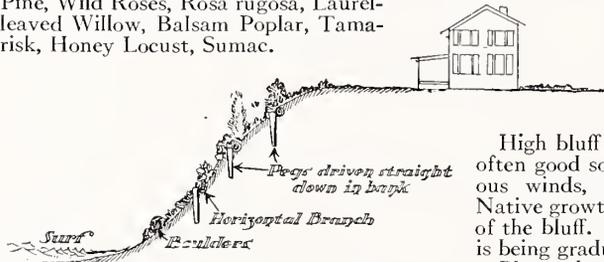

The most reliable trees are Austrian, Japanese Black, and Pitch Pine. Fifty per cent of the planting may be Pine; the balance, Bayberry, Beach Plum, Wild Cherry, California Privet, and Oaks.

We will send you a collection of 100 plants for \$50. Many may get choked out; some may die. We will give you more.

SHORE CONDITIONS "B" STRONG WIND, SANDY SOIL

Sandy necks. Not so severe as above. Usually low and flat, clothed with beach grass and stunted masses of Bayberry and Wild Rose, with small, ragged Cedars here and there. Such places are subject to high winds and have sandy soil which becomes desperately dry in summer. Drought-resisting plants reconcile themselves to these conditions. Plant deep, so the roots are below the fluctuating surface conditions. Plant thick. Do not forget the mulch, once a year or oftener. This decays and makes plant-food. Besides the trees mentioned above, add Colorado Spruce, Scotch Pine, Wild Roses, Rosa rugosa, Laurel-leaved Willow, Balsam Poplar, Tamarisk, Honey Locust, Sumac.

SHORE CONDITIONS "C" STRONG WINDS

High bluff overlooking water. Very often good soil, but exposed to strenuous winds, bitterly cold in winter. Native growth may extend to the edges of the bluff. The bluff itself, perhaps, is being gradually eroded away.

Plants that will stand high winds are quite easily established. If you are planting near the edge of the bluff, the trees should be planted so close that the foliage will touch. Keep the low plants toward the water, and gradually lead up to the taller ones. The farther back, the less need for thick planting. Five hundred feet back it may be possible to establish single specimen trees. Protect groups in winter with rough, open, board fences, or tie cornstalks about the trees. Add the Junipers, Cedar, Mugho Pine, vines, and most of the common kinds of shrubs. The main thing is to let the Pines bear the brunt of the elements.

SHORE CONDITIONS "D"

Real-estate subdivisions near the shore. Plots are small, precluding planting in large masses. Wind unrestricted in streets, but areas between houses more or less protected. Soil sandy.

Almost anything will succeed where the wind is intercepted. California Privet will make a successful hedge. Single trees soon look woe-begone, but beautiful low masses of Junipers, Mugho Pine, and Pachysandra can be established between curb and sidewalk. Attractive foundation plantings are a certainty, excepting where exposed directly to the ocean or at corners where the wind has an undue advantage. Screens between houses can certainly be considered. Large or small shade trees and fruit trees will thrive where protected by buildings.

Give good soil, plenty of manure, and water frequently on account of excessive drainage.

SHORE PLANTS NOT LISTED ELSEWHERE IN THIS CATALOGUE

TAMARIX AFRICANA. Pink flowers; foliage like green mist. 2-3 feet high	Each 10 \$0 25 \$2 00	HONEY LOCUST. Mix in your thickets. 5 feet high	Each 10 \$0 75 \$5 00

Vines

They quickly cover buildings, trellises, fences, pergolas, walls, stumps, and bare banks of sand or clay. The laundry-yard and tennis-court may be screened by vines. They may be used to vary the occasional monotony of long stretches of shrubbery, arranging themselves in picturesque, tumbling masses of brilliant foliage, flower, or berry effects.

Bittersweet
Wisteria
Grapes

Roses
Akebia
Clematis

Dutchman's
Pipe
Kudzu Vine

AKEBIA QUINATA

A rare Japanese vine. It has clusters of fruits which open and disclose a roll of sweet jelly. 30 cts. each, \$2.50 for 10.

TO CLING TO STONE, BRICK, or WOOD

English Ivy
Euonymus

Boston Ivy
Virginia Creeper

BITTERSWEET (*Celastrus scandens*)

Unequaled to make a brilliant autumn display. In October there is a brilliant display of orange-and-scarlet berries. 30 cts. each, \$2.50 for 10.

EVERGREEN BITTERSWEET

Euonymus radicans vegeta

Round, bright, evergreen leaves and scarlet berries. 30 cts. each, \$2.50 for 10.

JAPANESE CLEMATIS

Clematis paniculata

The most popular of all the Clematis. Small, sweet-scented flowers. 30 cts. each, \$2.50 for 10.

LARGE-FLOWERED CLEMATIS

We offer white and purple. State preference. 60 cts. each, \$5 for 10.

DUTCHMAN'S PIPE (*Aristolochia Siphon*)

Large, heart-shaped leaves; pipe-shaped blossoms. 50 cts. each, \$4 for 10.

EUONYMUS RADICANS

Boxwood-like leaves, so closely placed as to make a thick, green cover, carpeting the ground under shrubs and Rhododendrons. 1 ft., 30 cts. each, \$2.50 for 10, \$20 per 100.

HALL'S JAPANESE HONEYSUCKLE

Lonicera japonica var. Halliana

One cannot forget the fragrance. 30 cts. each, \$2.50 for 10.

HECKROTT'S HONEYSUCKLE

Lonicera Heckrottii

Reddish flowers appearing through the summer. 30 cts. each, \$2.50 for 10.

ENGLISH IVY (*Hedera helix*)

One of the most popular evergreen vines. 40 cts. each, \$3 for 10.

BOSTON or JAPANESE IVY

Ampelopsis Veitchii

One of the best vines for clinging to walls. 30 cts. each, \$2.50 for 10.

KUDZU VINE (*Dolichos japonicus*)

Rapid grower with leaves like the lima bean. 40 cts. each, \$3 for 10.

TRUMPET VINE (*Tecoma radicans*)

Orange-red, trumpet-shaped flowers. July and August. 30 cts. each, \$2.50 for 10.

VIRGINIA CREEPER

Ampelopsis quinquefolia

A native vine of highest merit. Gorgeous in autumn. 30 cts. each, \$2.50 for 10.

CHINESE WISTERIA

Wisteria sinensis

Clusters of purple or white flowers. State color wanted. 3-6 ft., 60 cts. each, \$5 for 10.

JAPANESE WISTERIA

Wisteria multijuga

A rare species with flower clusters 2 to 3 feet long. 75 cts. each, \$6 for 10.

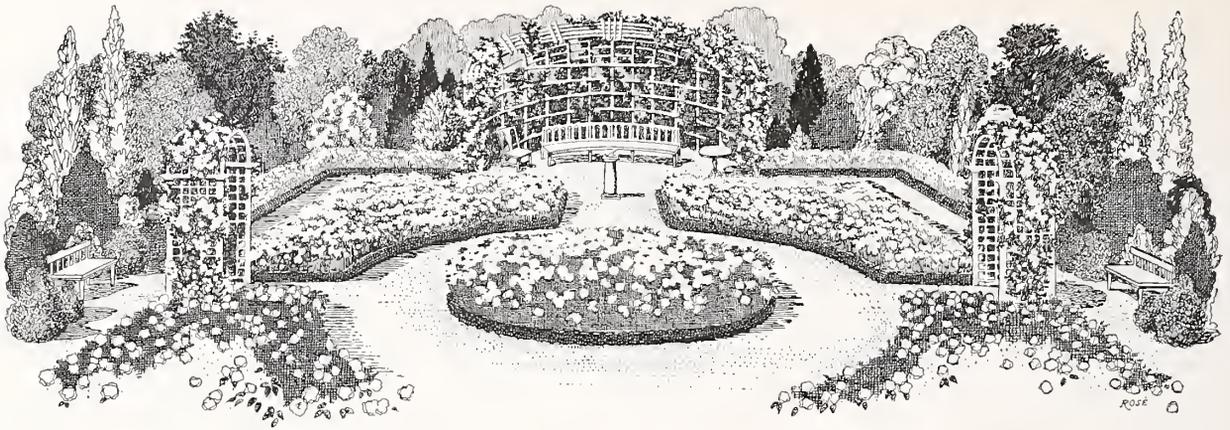

AMERICAN WISTERIA

Wisteria speciosa

A late-flowering variety coming in June. 50 cts. each, \$4 for 10.

Try 500 vines for your woods. Write for prices

HYBRID PERPETUAL ROSES

This class of Roses is very hardy. They are exceedingly vigorous growers, and are the Roses *par excellence* for the amateur gardener. Remove the old canes each year and cut new wood back to 8 to 12 inches.

75 cts. each, \$6 for 10, \$50 per 100

Anne de Diesbach. Brilliant carmine-rose, blooming freely for a long period.
Baroness Rothschild. Very dainty pink, suffused with white.
Clio. A very thrifty plant. Soft pink with a rosy center.
Frau Karl Druschki. Pure white. This is acknowledged as the best white Hybrid Perpetual Rose in cultivation.
General Jacqueminot. An early bloomer. Scarlet-crimson.
Hugh Dickson. A deep, intense crimson. Flowers freely and continuously for a long time. The delicate fragrance is very pleasing.
Mme. Gabriel Luizet. Fine, full flowers of clear satiny rose, sometimes described as "silvery pink." A prolific bloomer.
Marie Baumann. A sweetly fragrant Rose of a bright crimson-red. Flowers freely.
Mrs. R. G. Sharman-Crawford. A very distinctive rosy pink. This plant is especially noted for its exquisite fragrance.

Mrs. John Laing. This variety continues to produce its soft pink flowers until late in the fall. The blooms, although large, are finely formed.
Oscar Cordel. A free-flowering Rose of bright carmine color. The blooms are large and full and very sweetly scented.
Paul Neyron. This Rose, introduced in 1869, is still a favorite and justly so, because of its mammoth deep rose flowers, fine foliage, and vigorous growth.
Persian Yellow. Austrian Brier. Deep golden yellow.
Pride of Waltham. Light salmon-pink, shaded with bright rose; a very distinct variety with large and full flowers.
Prince Camille de Rohan. Deep crimson-maroon blooms, very large and fragrant.
Ulrich Brunner. Described as cherry-red. This Rose is one of the most effective of Hybrid Perpetuals, a profuse bloomer of a very vigorous habit.

HYBRID TEA AND TEA ROSES

These are particularly noted for the wonderful range of color of the flowers and their delightful fragrance. In this class belong the Roses of coppery and bronze hues and the very delicate etchings of salmon-pink. Dark green, glossy foliage.

The varieties described here should have the earth mounded up one foot high in December. Mulch after freezes. Cut out weak growth in the spring, and new wood 4 to 6 inches. Plant 1½ feet apart in beds 4 feet wide with 4-foot paths.

In pots, \$1 each, \$7.50 for 10, \$60 per 100. (Come and pick them out; in bloom all summer.) Not potted, 75 cts. each, \$6 for 10, \$50 per 100

Admiral Ward. Flowers of velvety crimson shaded with purple. A new introduction of vigorous growth. Very handsome.
Augustine Guinoisseau. This variety is especially valuable for cut-flowers. The white flowers are very fragrant and showy.
Chateau de Clos Vougeot. A deep velvety crimson. This variety makes a strong growth and flowers freely.
Constance. Hybrid Austrian Brier. A golden yellow Rose of delightful fragrance. The buds are long and streaked with crimson. The foliage is of a shining green. A recent introduction. This is one of the finest yellows.
Duchess of Wellington. A very intense saffron-yellow Rose. Healthy, strong-growing habit. Glossy green foliage.
General MacArthur. A fine garden Rose; deep rosy crimson blossoms; very fragrant and free flowering.
Gen.-Superior Arnold-Janssen. A new Rose of rich carmine color. A vigorous plant and very floriferous.
Geo. C. Waud. A lovely Rose of orange-vermilion. Few Roses have a more beautiful coloring. A thrifty grower.
Gustav Grunerwald. A carmine-pink Rose with a yellow center and distinctly long-pointed buds. This is a fine healthy form.
Jonkheer J. L. Mock. The finest of all pink Hybrid Teas. Described as imperial pink. Acknowledged to be one of the best Roses of recent introduction.
Joseph Hill. Large flowers of salmon-pink, tinged with copper, very fragrant. A stocky plant flowering profusely.
Konigin Carola. Large flowers of pale satiny rose. A thrifty variety flowering freely.
Lady Alice Stanley. The flowers vary from light pink to a deep rose and are borne on long, stiff stems. A very distinct Rose.
Lady Ashtown. Deep pink-rose blooms, large and full, very often on pendulous stems. Good variety.

Laurent Carle. A deep lustrous red. This is a remarkably showy Rose with its large flowers and brilliant color.
Lieutenant Chauré. Velvety crimson flowers. An especially fine garden variety. Vigorous grower.
Lyon Rose. One of the showiest and most decorative varieties. Petal edges shrimp-pink, center coral-red, tinged with chrome-yellow at the base. The flowers are large and full.
Mme. Abel Chatenay. A beautiful flower of carmine-rose, tinted salmon; the petals have a silvery tinge. A very robust variety worthy of a place in every garden.
Mme. Colette Martinet. Old-gold, shaded orange-yellow. The long golden buds are unusually distinctive and are a marked contrast to the bronze-green foliage. A free bloomer.
Mme. Edouard Herriot. Known as the "Daily Mail Rose," this Rose is a prize-winner. Coral-red shaded with yellow and rosy scarlet. It makes one of the most charming of garden flowers.
Mme. Jules Bouche. A fine, healthy variety. Salmon-white shaded clear pink. A very meritorious variety for the garden.
Mme. Leon Pain. The combination of colors in this Rose is remarkably beautiful. Silvery white with an orange-yellow center and the reverse side of petals reddish pink. A variety of strong growth.
Mme. Segond Weber. The large rosy salmon blossoms of this Rose are markedly distinctive. Growth is strong and erect.
Marie Van Houtte. Tea. White flowers tinted yellow, shading to rosy tipped petals; pleasantly fragrant. A favorite Rose in this country and abroad.
Miss Cynthia Forde. A fine Rose of a deep, showy rose-pink. A very decorative variety.
Mrs. Aaron Ward. This Rose is uniquely described as "Indian yellow, suffused with salmon." A wonderful variety, blooming freely, and of vigorous habit.

HYBRID TEA and TEA ROSES, continued

Mrs. F. W. Vanderbilt. Flowers of a deep orange-red shade. A very ornamental garden and bedding Rose.
Ophelia. Although originated in 1912, this is still a greatly favored Rose. A rosy pink shaded with salmon. Finely shaped blooms and vigorous habit.
Prince of Bulgaria. A very charming, large, and well-formed Rose with flowers of silvery pink tinted with salmon.
Radiance. A Rose of many colors, brilliant carmine, shaded salmon and coppery red. Healthy habit.

Souy. de Gustave Prat. A pure sulphur-white Rose, sometimes without the yellow shading; very floriferous.
Souy. de Pierre Notting. Tea. A very handsome Rose, apricot-yellow tinted with orange.
W. R. Smith. Tea. Flowers of creamy white flushed with bright rosy pink. Large and finely formed flowers.
Willowmere (Rosa lutea hybrida). An Austrian Rose hybrid Color a deep pink shaded yellow in the center and changing to carmine-pink at the edges of petals.

CLIMBING AND RAMBLER ROSES

The bright shiny foliage, the hardiness, the many forms ranging from single to double, and the great variation in color of the flowers combine to make these Roses the most satisfactory of decorative plants. Remarkably free from insect pests. Cut out large stems each year in order to thin out a too abundant growth.

Unless otherwise noted, 50 cts. each, \$4 for 10, \$30 per 100

Aviateur Bleriot. Saffron-yellow, center golden yellow; full, medium size; flowering in clusters; a profuse bloomer; very healthy. 75 cts. each, \$6 for 10, \$50 per 100.
Alberic Barbier. Clusters of double creamy white flowers and buds of canary-yellow. Resists disease.
American Pillar. Magnificent clusters of single pink flowers with bright yellow stamens. Especially valuable when trained on posts and pergolas.
Crimson Rambler. Clusters of bright crimson flowers; fine for pillars and arches and for hedges or climbing over fences.
Dorothy Perkins. Beautiful shell-pink, double flowers; sweetly scented. A vigorous grower.
Dr. Van Fleet. Long pointed, deep pink buds. Flowers 4 inches diameter. Rich glossy foliage.
Excelsa. Large, full clusters of scarlet-crimson double flowers. Especially valuable, as it does not mildew. Healthy.
Mrs. M. H. Walsh. A pure white climbing Rose that does not fade. A free bloomer of hardy, vigorous growth with excellent foliage.
Multiflora. Japanese Rose. The native Rose of Japan and China. The single white flowers are borne in massive clusters. This Rose is especially adapted for mass planting. The red fruits are very attractive in early fall.
Silver Moon. A snow-white climbing Rose with flowers 3 to 4 inches in diameter. The yellow stamens add much to its beauty. Very fragrant and profuse.
Tausendschon (Thousand Beauties). The finest of all climbing Roses. The flowers are unusually large, delicate white and pink.
Wichuraiana. Memorial Rose. A half-evergreen Rose with creeping branches. White and fragrant. A valuable Rose for covering banks and rockeries.

RUGOSA ROSES

These can be used as shrubbery, and are very reliable in dry soil. In the fall the coral-red fruits, an inch or more in diameter, are as ornamental as the flowers in summer. 25 cts. each, \$2 for 10, \$18 per 100.

Rosa rugosa rubra. Single red flowers, starting the Rose season the middle of May. Thrives near the shore.
Rosa rugosa alba. A variety with white flowers and the same perfect foliage.
Rosa rugosa, Conrad F. Meyer. A very distinct variety with large, fragrant flowers of clear silvery rose.
Rosa rugosa, Mme. Georges Bruant. One of the best known of Rugosa Roses. Has double white flowers in clusters.

POLYANTHA HYBRID ROSES

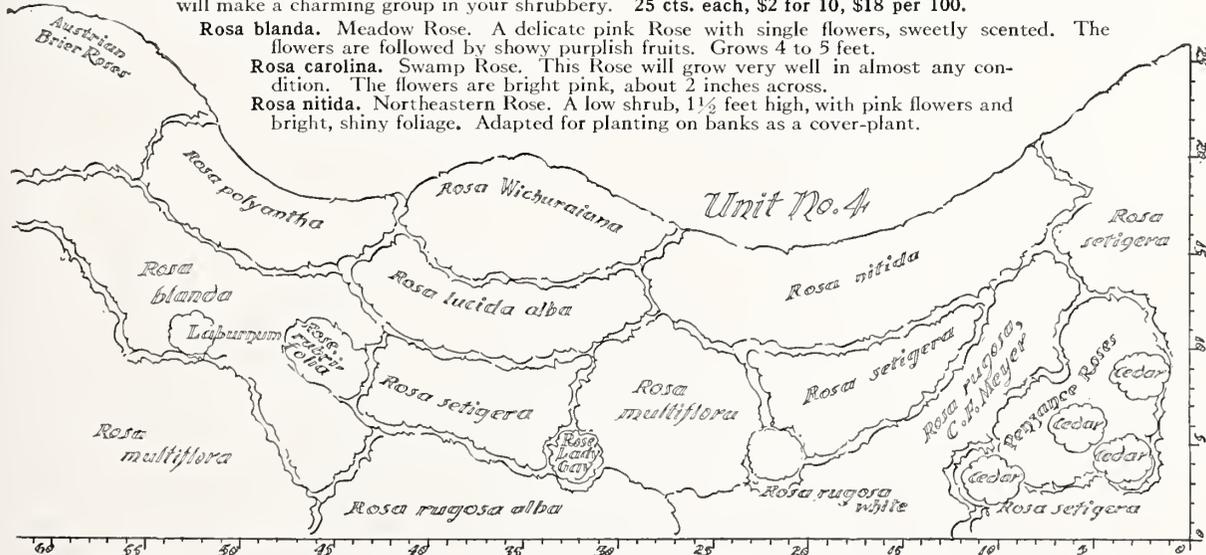

These varieties are of dwarf habit with smaller but very exquisite flowers. They make splendid edging plants and are particularly adapted to positions where low plants are needed. 75 cts. each, \$6 for 10, \$50 per 100.

Cecile Brunner. A light pink, double Rose, with a yellowish center. Very fragrant. A most charming buttonhole flower.
Clotilde Soupert. Flowers pure white, tinted silvery rose near the center and a pearly white toward the edge of outer petals. A profuse bloomer.
Jessie. Bright orange-red blossoms. This is one of the choicest Roses of this class. A sturdy grower and very floriferous.
Mme. Levvasseur (Baby Dorothy Perkins). Large clusters of shell-pink blossoms. A very persistent bloomer.

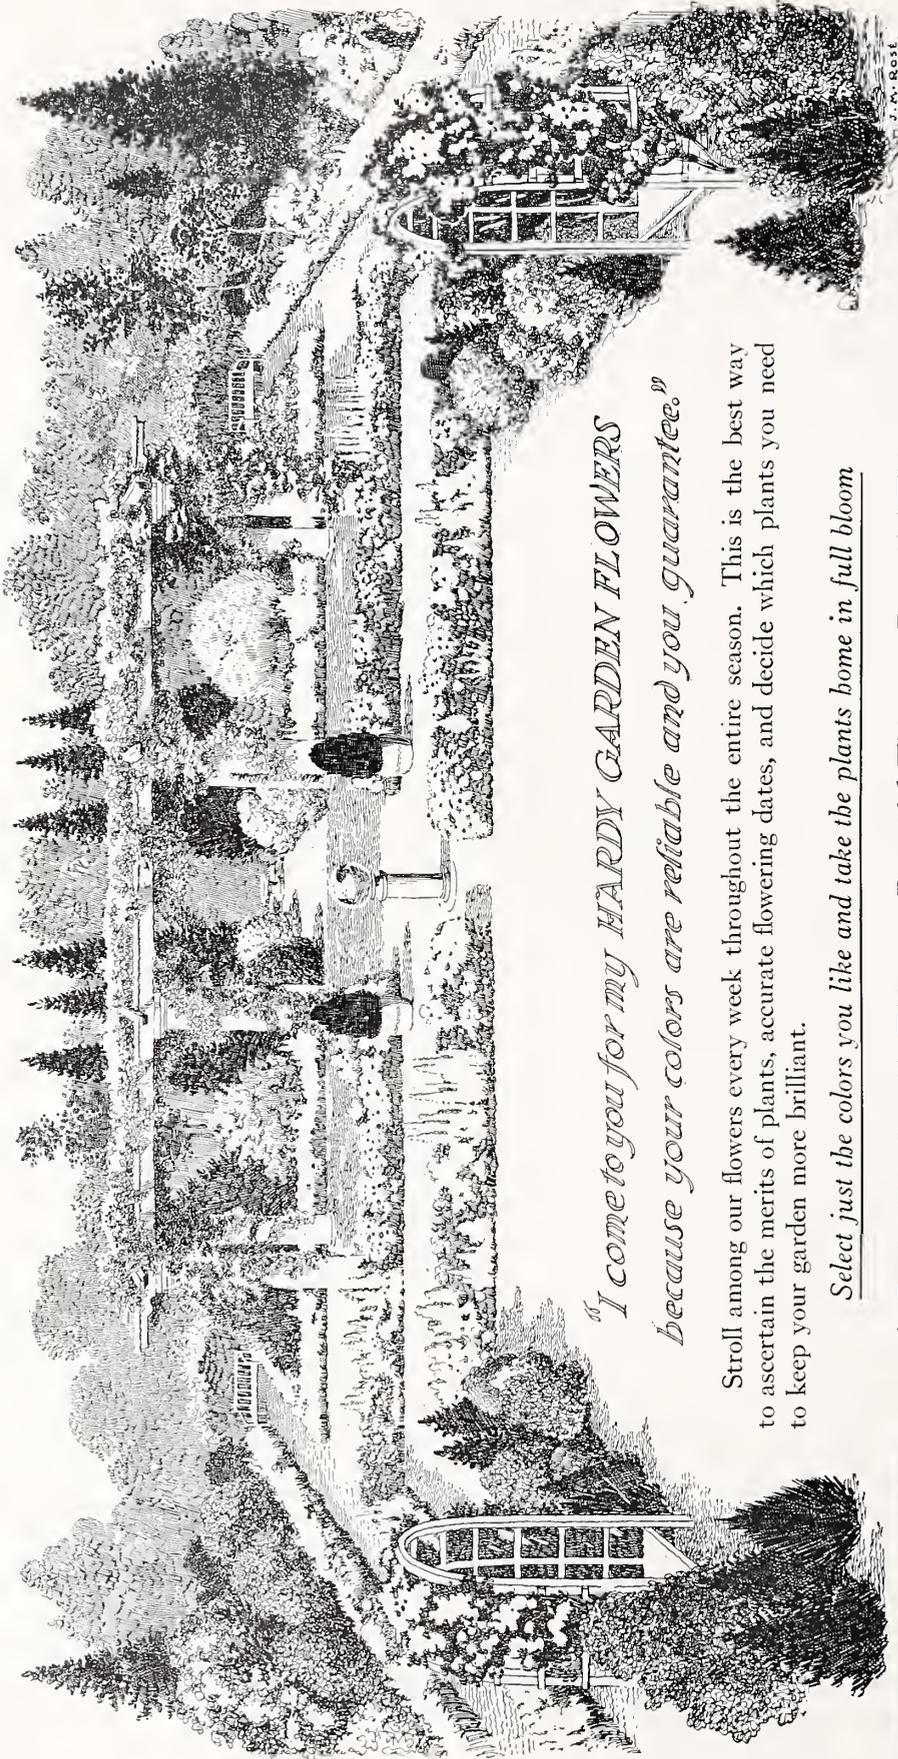

NATIVE WILD ROSES

Being native they are adapted to more severe conditions than many of the hybrid garden Roses. Planted thickly, they will make a charming group in your shrubbery. 25 cts. each, \$2 for 10, \$18 per 100.

Rosa blanda. Meadow Rose. A delicate pink Rose with single flowers, sweetly scented. The flowers are followed by showy purplish fruits. Grows 4 to 5 feet.
Rosa carolina. Swamp Rose. This Rose will grow very well in almost any condition. The flowers are bright pink, about 2 inches across.
Rosa nitida. Northeastern Rose. A low shrub, 1½ feet high, with pink flowers and bright, shiny foliage. Adapted for planting on banks as a cover-plant.

Here is an unusual way to use Roses. This Rose boundary is planned to fit the layout shown on page 11. It can be used as a background to a Rose- or flower-garden, and it is hard to imagine a more fitting background. In all, 207 Roses, delivered within 15 miles or packed for shipment, \$60. Cedars can be added. See page 16 for sizes and prices.

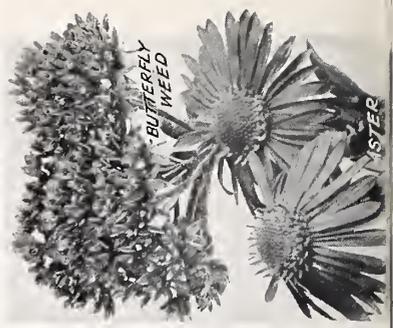

"I come to you for my HARDY GARDEN FLOWERS because your colors are reliable and you guarantee."

Stroll among our flowers every week throughout the entire season. This is the best way to ascertain the merits of plants, accurate flowering dates, and decide which plants you need to keep your garden more brilliant.

Select just the colors you like and take the plants home in full bloom

Cut off the old flowers
and flower-stalks. Many plants
will bloom again
if not allowed to
go to seed.

Mulch the ground,
after it is frozen,
with 6 inches of
light strawy manure
or leaves.

Rake off the mulch
or winter covers
in the last of
March or early
in April.

When plants be-
gin to grow fork
in fine manure.

Grow Your Own Fruit

You don't need a farm, or an acre, but just a realization as to how easy it is, even on a 50-foot lot, to produce fresh, juicy fruit in sufficient quantity to give it a place on the family bill of fare.

APPLES

Pies, apple butter, apple sauce, and fresh Apples from your own land. Plant 30 to 40 feet apart. Dwarf trees (those starred) 10 to 15 feet apart.

5 to 7 feet high, 75 cts. each, \$6 for 10, \$50 per 100

- *Early Harvest. Yellow; acid. Late July and early August.
- *Yellow Transparent. Earliest; yellow; acid. July 20.
- Red Astrachan. Red; sour. Excellent dessert. August.
- Sweet Bough. Yellow; sweet. July and August.
- *Duchess of Oldenburg. Yellow, streaked; juicy; acid. August 15.
- Gravenstein. Yellow, streaked. August and September.
- Wealthy. Dark red; sub-acid. October and November.
- *Fall Pippin. Yellow; acid. October and November.
- *McIntosh. Red; acid. September.
- Fameuse. Crimson; acid. November.
- Newtown Pippin. Dull green; delicious flavor. January to May.
- Roxbury Russet. Russet; sub-acid. January to May.
- Baldwin. Red; juicy and rich. November and April.
- Spitzenburg. Red; spicy. Good keeper.
- Rhode Island Greening. Green; rich, sub-acid. November to February.
- Smokehouse. Red and yellow; juicy. October to January.
- Transcendent (Crab). Yellow, red cheek. September.

CHERRIES

Plant 30 feet apart with small fruit between. Think of the pies, preserves, and jam.

5 to 7 feet high, 75 cts. each, \$6 for 10, \$50 per 100

- Governor Wood. Large, heart-shaped; yellow; sweet; juicy.
- Coe's Transparent. Medium size; amber, red cheek; sweet. Ripens early.
- Black Tartarian. Precimment for family use. Sweet and nearly black.
- Downer's Late Red. Medium size; red and amber. Late.
- Rockport. Large; red, shaded with amber. Ripens early.
- Yellow Spanish. Very large; yellow, with a light red cheek; firm.
- Napoleon. Very large, heart-shaped; yellow, shaded deep red.
- Windsor. Large; mottled red; very firm and juicy.
- Mercer. A very dark red Cherry; productive and early.
- Schmidt's. The largest of all the black Cherries.
- Early Richmond. English pie Cherry; sour.
- Montmorency. Large; bright red; sour. Bears young.

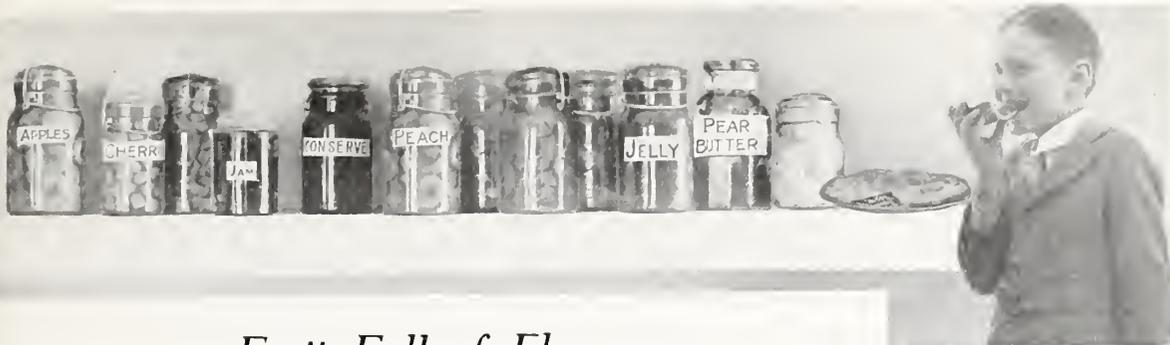

PEACHES

Eighteen months from planting to pantry shelf. Think of it! Plant as temporary trees between Apples, Pears, and Cherries.

4 to 6 feet high, 25 cts. each, \$2 for 10, \$18 per 100

- Carman. Large; white; juicy. July.
- Belle of Georgia. Large; white; firm; delicious. August.
- Champion. Large; white; juicy. August.
- Mountain Rose. Medium; white; prolific. August.
- Elberta. Large; yellow; juicy, and of fine flavor. August and September.
- Crawford's Early. Large; yellow. September.
- Oldmixon. White; excellent for canning. September.
- Crawford's Late. Large; yellow; red at the stone. Late September.
- Stump the World. White; juicy and highly flavored. Late September.
- Chair's Choice. Large; yellow; firm, good quality.
- Globe. Large; yellow; sweet and delicious.
- Stevens' Rareripe. Large; red skin; flesh white. October.

SEE PAGE 48 FOR LARGER APPLE, PEAR, PLUM, AND CHERRY TREES THAT WILL SAVE YOU SEVERAL YEARS

Fruit Full of Flavor

The first and biggest step is to order your trees right now from this catalogue. Questions on pruning and care are thoroughly answered and illustrated in Farmers' Bulletins, No. 154 and No. 181, which you can get free at any time from the Department of Agriculture, Washington, D. C.

PEARS

Plant 15 to 20 feet apart. Varieties starred are also dwarf.
5 to 7 feet high, 75 cts. each, \$6 for 10, \$50 per 100

- Osband's Summer. Yellow; sweet. August.
- Clapp's Favorite. Yellow, red cheek; valuable. August.
- *Bartlett. Yellow, red cheek. August and September.
- Sheldon. Russet; coarse; fine flavor. September and October.
- *Seckel. Brown; sweet and juicy. September and October.
- *Duchess d'Angouleme. Yellow; large; buttery. October and November.
- Anjou. Green and russet; rich. October and November.
- Buerre Bosc. Golden brown. The best. October and December.
- Winter Nellis. Russet; rich, sprightly. November and December.
- Kieffer. Yellow; coarse. November to January.

PLUMS

Sweet and juicy fruit the second summer, and pecks of it every year after. Delicious preserved, a delightful dessert for the unexpected guest.

5 to 7 feet high, 75 cts. each, \$6 for 10, \$50 per 100

- Abundance. Yellow, covered with red; productive. August.
- Apple. Reddish purple; finest flavor. Late August.
- Burbank. Yellow, red cheek; rich and sugary. Late August.
- Wickson. Maroon-red; firm; good quality.
- October Purple. Reddish purple; late; good quality.
- German Prune. Purple; sweet.
- Green Gage. Green; sweet and rich.
- Lombard. Dark red; pleasant, but not rich; productive.
- Bradshaw. Reddish purple; juicy and good.

QUINCES

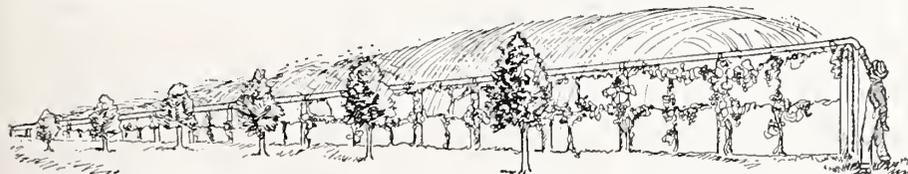

Incomparable jelly. A few added to Pears and Apples when canning will give the needed zest.

3 to 5 feet high, 50 cts. each, \$4 for 10

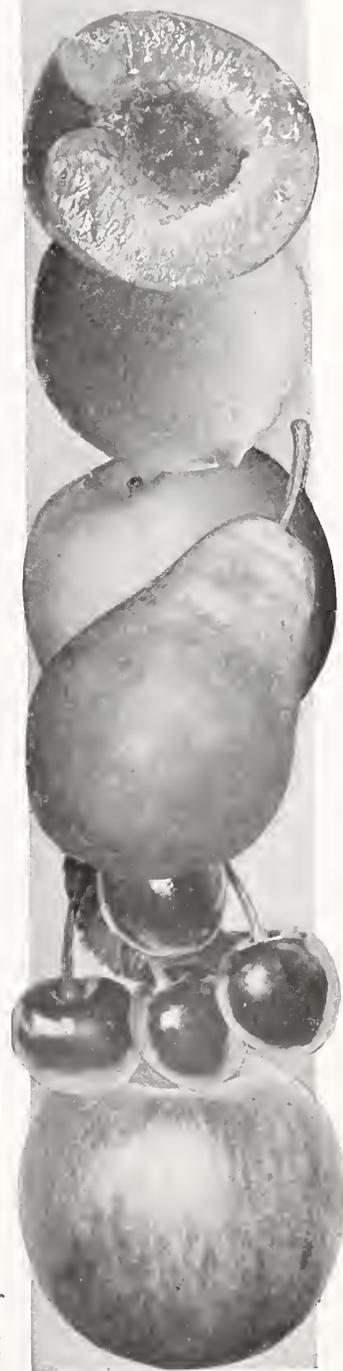

- Champion and Orange. Yellow; good quality; long-keeping.

Don't Think that Fruit Trees are for the Garden Alone

They make most beautiful lawn trees. Plums and sour Cherries are like huge drifts of snow when in bloom and make delightful trees for the children to play under. The beauty of Apple blossoms is unsurpassed. Who can ever forget the fragrance of Crab-Apple blossoms that scent the atmosphere for a long distance? The blush of blooming Peaches immediately makes them eligible for that shrubby border. Of course, you would not expect to get all this beautiful bloom, bountiful shade and luscious fruit without thorough cultivation. This does not mean scraping the surface a half-inch deep in a little circle 3 feet in diameter. It does mean stirring the surface 3 inches deep once in ten days or after every shower.

Irrigate, irrigate, irrigate! Irrigate the garden. Irrigate the flowers. Irrigate the lawn. Irrigate your fruit. Irrigate everything. It's fun. It's a thousand times worth while. Be the first, it may be, and have the laugh on your friends. Get catalogue from Skinner Irrigation Co., Troy, Ohio; J. P. Campbell, Jacksonville, Fla.; W. G. Cornell Co., New York City.
