TEXTILE INFORMATION BULLETIN NUMBER 17
April 1949

In spite of the general slow-down in textile exports in the United States and in some other countries, increasing competition and the restrictions on Japanese accessibility to certain markets during the last few months, April textile export sales were only slightly below the March volume.

April textile production was high-lighted by increases of approximately 3,000,000 pounds in cotton yarn and 1,900,000 pounds in rayon. Other significant rises were reported for cotton fish nets and dyeing and finishing. The textile production index for April is estimated at 27.2 compared with 27.1 for March and 23.2 for April 1948. (1930-34 average = 100)

Procurement of 315,375 bales of raw cotton (500 pound bales) during April broke all previous post-war records.

EXPORT SALES

April textile export sales were well above the monthly average of $19,700,000 for 1948. Approximately 69 percent of sales for the month were contracts with buyers in the Sterling Area.

TEXTILE EXPORT SALES

	Total 1948	February 1949	March 1949	April 1949	Total 1949
Cotton	$124,719,286	$20,689,578	$18,597,527	$14,738,641	$91,822,907
Silk	69,258,532	7,823,538	1,680,334	2,871,866	15,540,373
Rayon	15,084,482	6,901,951	4,165,134	2,799,915	22,260,853
Wool	10,651,271	2,113,181	656,386	300,592	8,550,370
Misc. Textile made-up goods	14,306,557	2,770,204	1,144,290	4,047,589	10,711,070
Total.	$234,020,138	$40,298,452	$26,243,671	$24,758,603	$148,885,573

Cotton

The largest share of cotton piece goods sales in April went to Pakistan. This market opened up again as a result of agreements reached with the SCAP Trade Mission recently returned from that area.

Because of the large volume of advance sales during the first quarter of 1949, April sales valued at almost $15,000,000 were sufficient to keep the industry sold ahead in most lines through June.

COTTON TEXTILE SALES

	January	February	March	April Quantity	April Value
Yarn	$13,775,483	$ 1,592,608	0	379,800 lbs.	$ 365,186
Fabric	24,021,678	19,096,970	$18,597,527	55,028,967 yds.	14,373,455
Total	$37,797,161	$20,689,578	$18,597,527		$14,738,641

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

Silk

Although raw silk and piece goods sales for April increased $1,191,532 over March to a total of $2,871,866, they do not as yet reflect the return of United States buyers to the raw silk market. Sales of raw silk to England and Egypt recovered from the first quarter buying slump as these countries purchased more than 90 percent of total raw silk sales in April. The largest sales of silk fabric were made to the United States.

SILK SALES

	January	February	March	April Quantity	April Value
Raw Silk	$ 217,825	$ 327,297	$ 772,404	2,388 bls.	$ 951,657
Silk Fabric	2,946,810	7,496,241	907,930	4,293,893 yds.	1,920,209
Total	$3,164,635	$7,823,537	$1,6[illegible]0,334		$2,871,866

Rayon

Although large purchases of rayon fabrics by Netherlands East Indies and Hong Kong brought fabric sales almost up to the January level, the loss of the Indian market depressed yarn sales.

RAYON TEXTILE SALES

	January	February	March	April Quantity	April Value
Rayon Yarn					
Filament	$3,884,705	$3,460,475	$2,344,678	1,254,200 lbs.	$ 706,854
Spun	2,717,056	1,752,255	922,866	206,600 lbs.	167,570
Rayon Fabric					
Filament	1,602,645	1,046,038	831,271	5,158,917 yds.	1,627,881
Spun	189,447	643,183	66,119	233,660 yds.	97,610
Total	$8,393,853	$6,901,951	$4,165,134		$2,799,915

Wool

Wool sales also suffered from the loss of the Indian market. A little more than half the month's sales went to Hong Kong and Egypt.

WOOL TEXTILE SALES

	January	February	March	April Quantity	April Value
Wool Yarn	$3,452,981	$ 754,450	$ 68,520	9,000 lbs.	$ 21,870
Wool Fabric	2,027,230	1,358,731	587,866	94,473 yds.	278,722
Total	$5,480,211	$2,113,181	$656,386		$300,592

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Miscellaneous Made-up Goods

Miscellaneous made-up goods sales made a remarkable increase in April with a jump of 254 percent over March sales to a total of $4,[illegible]. The largest single item was sales of cotton rag rugs to the United States market. More than 50 percent of the total sales of made-up goods were to the U.S.A.; the remainder went mostly to various African markets, including dollar and sterling areas.

PRODUCTION

Cotton

Cotton yarn production of 28,490,000 pounds in April was the second highest of any month since the beginning of the Occupation being only 835,000 pounds under the record for June 1947.

Labor, coal and electric power were adequate to support the expansion in production. During April 2,478,717 spindles were in operation compared with 2,388,000 in March. Working time averaged about 15 hours daily per spindle. About 64,000 bales of raw cotton and 1,377,000 pounds of spinnable waste were consumed in Japan in April. Fifty-seven percent of cotton yarn production and 60 percent of deliveries in April were for domestic consumption in order to complete the domestic allocation of approximately 28,500,000 pounds for the Jan-Mar quarter. Deliveries of yarns for domestic use in January, February and March totaled only 18,700,000 pounds leaving a back-log of nearly 10,000,000 pounds to be filled in addition to the quantity that must be supplied for the Apr-Jun quarter. If full delivery had been achieved during Jan-Mar, the portion for domestic use would have been 32 percent rather than the actual 23 percent recorded for that period.

COTTON YARN PRODUCTION AND SPINNERS' STOCKS
(thousands of pounds)

	Production March	Stocks 31 Mar.	Production April	Deliveries April	Stocks 30 Apr.
Carded	24,379	19,501	27,344	28,590	18,255
Combed	1,114	1,164	1,146	1,089	1,221
Total	25,493	20,665	28,490	29,679	19,476

Because of a slump in export orders there was a five percent decrease in cotton fabric production. Output of cotton fabrics for domestic use made up 21 percent of the total in April, as compared with 12 percent in March, as the result of increased deliveries of yarn for domestic consumption. Distributors' purchases of fabrics for consumer use decreased, however, as the incentive goods program will not require delivery of fabrics until June or July.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715 013

COTTON FABRIC PRODUCTION AND WEAVERS' STOCKS

Total	75,208	96,028	71,599	63,471	8,605	95,551

Silk

Due to strikes and the reeling of a larger percentage of finer sizes, there was a decrease of 527 bales in raw silk reeling, although the total of 14,077 bales reeled in April was above the month's production goal of 13,300 bales. Over twice as much 13/15 denier silk (an especially fine size), was reeled during April as in the previous month to fulfill special orders and to conserve existing stocks of cocoons as long as possible. At the end of April cocoon stocks on hand were sufficient for approximately two and one-half months operations at the present rate of consumption. The spring crop of cocoons will begin to arrive in early June, and it is expected to exceed last year's crop slightly, although it is as yet too early to give an estimate. It is anticipated that May production of raw silk will be about equal to the April rate.

RAW AND WASTE SILK PRODUCTION AND MILL STOCKS

	Production March	Stocks 31 Mar.	Production April	Deliveries April	Stocks 30 Apr.
Raw Silk (bales)	14,604	7,774	14,077	14,320	7,531
Waste Silk (thousands of pounds)	477	843	450	434	859

There was an increase of over eight percent in output of pure spun silk yarn although over-all silk spinning showed a five percent decrease due to lowered production of mixtures. Some worsted spindles were used for spinning old stocks of short-cut silk fiber produced during the war; on the other hand a number of silk spindles were diverted to rayon staple spinning to fill the demand for this product which at present exceeds the rayon spinners' ability to produce. The supply of labor and electric power was generally good, although some manufacturers are still suffering from shortages of subsidiary materials due to insufficient funds to purchase the materials allocated to them.

Total	560	2,114	531	554	2,091

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 775013

Production of silk fabrics totalled 12,498,000 square yards in April, an increase of over eleven percent over March, with output of filament silk fabrics gaining over 1,000,000 square yards. Shortage of working capital is causing a decrease in purchases of raw silk and it is expected that fabric production will be somewhat lower in May. Silk fabric sales improved in April after a set-back in March and efforts are being made to improve quality and meet delivery dates in order to satisfy the demands of customers abroad.

Total	11,213	13,681	12,498	7,574	5,347	13,258

Rayon

Production of filament rayon and staple fiber both broke all previous post-war records in April with increases of 17 and 30 percent respectively. The new high level was attributed mainly to adequate supplies of pulp and processing chemicals. The production goal for the April-June quarter has been set at 31,000,000 pounds, of which 13,000,000 pounds would be staple fiber and 18,000,000 pounds filament yarn. This represents an increase of 32 percent over production during the January-March quarter of 23,507,000 pounds. Increased production of spun rayon yarn was principally due to the diversion of more spindles to rayon by the cotton and silk spinners.

Total	2,334	4,881	2,996	2,343	5,534

Satisfactory yarn receipts, adequate electric power supplies, warmer weather and an increase of 8 percent in number of operating looms were responsible for the increase of 1,565,000 square yards in rayon filament fabric production. Output of filament fabrics was restricted during the January-March quarter while the industry completed deliveries against large export sales for yarn. The orders having been filled, more yarn has been released for weaving. Deliveries of fabrics for domestic use were high in April and made up 38 percent of the total.

Total	12,962	14,943	13,897	5,148	8,003	15,689

Wool

Aggregate production of wool yarn and fabrics in April was about the same as in March. There were slight decreases in the worsted category as the result of completing large export orders in March. Mixed yarns and fabrics for domestic consumption registered production rises due to larger supplies of raw materials allocated for manufacture of domestic goods. The mixtures are chiefly of rayon staple containing less than 20 percent wool.

a/: Thousands of pounds

Hard and Bast Fibers

Production of hard and bast fiber yarns was high in April with plentiful supplies of raw materials and adequate labor. Although receipts of flax were lower in April than in March, production of yarn increased due to improvements in machinery. Pure linen fabric output was lower because of weaving fine quality fabric intended for export, but there was an overall increase in linen fabrics generally, caused by weaving large quantities of coarse mixed fabrics. Approximately 13 percent of April deliveries were made against export contracts. Receipts of imported ramie were substantial in April, and production of ramie yarn and fabric showed increases. Hessian cloth for export baling accounted for rises in jute fabric output.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

Fabric	482	1,758	651	754	1,655

Waste Fibers

The increase in waste fiber yarn production was accounted for by the large quantity of waste put into process at the end of March. Fabric production, however, was restricted by seasonal demand, as waste yarn fabrics are generally heavy and unsuited to warm weather. Due to increased export demand for waste cotton rugs, 2,250,000 pounds of cotton waste has been diverted from domestic to export production for the manufacture of these rugs. Over 24 percent of waste fiber fabric deliveries in April were rugs for export.

WASTE FIBER YARN AND FABRIC PRODUCTION AND MILL STOCKS

(Yarn - thousands of pounds)
(Fabric - thousands of square yards)

Fabric	2,740	3,125	2,398	490	1,703	3,330

Rope and Cordage

Concentration on production of twine for the fishing industry was responsible for the lowered output of rope and cord. A number of twine mills are now operating on a two-shift basis and the 2,884,000 pounds of twine manufactured in April represents an increase of nearly 25 percent over March.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

Twine	2,316	2,744	2,884	2,580
Total	9,256	10,350	9,248	9,934

Fish Netting

Receipts of yarn for the production of fish netting increased substantially in April as a result of the rise in cotton yarn production which has been recorded for March and April, as well as increased allocations of yarn for fish netting. In addition, the rehabilitation of manufacturing plants is being carried out successfully; 43 plants began operation in March while an additional 25 opened in April, bringing the total number of fish net manufacturers in Japan to 631. Production of cotton fish nets was the highest recorded since November 1948. Since there was an increase of 45 percent over March in output of cotton twine for fish nets it is expected that further rises in production will be reported in the coming months.

Total	2,308	1,829	2,607	2,261	2,175

Knit Goods

The seven percent decrease in production of knit fabrics in April was caused by smaller receipts of yarn for knitting in March. Export production has been reduced somewhat due to discontinuation of planned production, but a rise in total output is anticipated in May as receipts of yarn for domestic use increased in April, new export orders have been received, and a large quantity of material was put into process during the month.

Total	522	324	490	520	294

Clothing

Although the validation of new allocation tickets caused fabric receipts for the manufacture of clothing to rise in April, ready-made apparel output was considerably under the March high. Export deliveries of apparel in April were about three and a half times as large as in March but a big part was shipped from stocks which have been accumulating since the first of the year. Purchases by wholesale dealers and new export orders have fallen off, consequently April production was somewhat depressed.

Others	2,057	1,253	2,119	1,267	1,300	805

Dyeing and Finishing

The net increase of 13 percent in production of printed, dyed and bleached goods in April was caused mainly by the processing of large quantities of cotton fabric for shipment to the Netherlands East Indies which, contrary to earlier expectations, reached the finishing plants in April. There was also an increase in silk and rayon fabric bleaching and dyeing for export contracts, and of spun rayon fabric for domestic use. Deliveries, both for export and domestic consumption, showed large increases. Further increases are not expected in May output as the quantity of gray fabric received and put into process both decreased slightly in April.

RAW MATERIAL SUPPLIES

Cotton

Aggregate purchases of 315,375 bales of raw cotton (500 pound bales) during April broke all records since the end of the war. The greater part of this amount was made up of more than 232,000 bales of American cotton and nearly 59,000 bales of Pakistan cotton. In addition 10,780 bales were procured from India, 8,833 bales from Egypt, and 4,720 bales from Uganda. A substantial quantity of the American cotton was procured by the Army Quartermaster using appropriated funds. Also about 35,000 bales of ECA cotton was diverted from Shanghai and purchase was initiated by the Board of Trade.

DECLASSIFIED E.O. 12065 SECTION 3-402/NNDG NO. 715013

Peru	0	10	10	0
Total	27,472	48,680	139,776	211,771

Rayon

Although the rayon industry has been consuming raw materials at an increasing rate due to the expanding production of the past four months, receipts of imported pulp and cotton linters to date have been sufficient to meet requirements. Indigenous production of processing chemicals has increased enough so that rayon mill stocks at the end of April were actually larger than at the end of the previous month in spite of steadily rising quantities put into process.

STATUS OF RAYON RAW MATERIALS PROCUREMENT AND IMPORTS
as of 30 April 1949

a/: Figures for raw cotton linters show quantities procured for rayon industry only.

Wool

Approximately 15,000 bales of raw wool were purchased during April at the wool auction, principally in Australia. Of the total about 900 bales were bought in New Zealand and 380 bales in South Africa.

Hard and Bast Fibers

The abaca procurement program continued at a moderate rate in April with purchases of nearly 2,000,000 pounds or 7,200 bales. In addition 132,000 pounds of kapok and 16,748 gunny bags used for Australian wheat shipments were procured. Additional British East African sisal procurement was inaugurated in April.

Appropriated Funds Procurement and Receipts

Bids were requested by the Quartermaster Office in New York for the procurement of an additional 55,900 bales of raw cotton to be financed from EROA funds for essential domestic requirements in the rehabilitation of Japanese industry. These purchases were finalized in April and the cotton is due to arrive in Japan in June and July. In addition 1,942,875 pounds of abaca were purchased in the Philippines for the Japanese fishing fleet.
