

AN ACT

To diminish the number of exemptions and details.

The Congress of the Confederate States of America do enact, That so much of the "Act to organize forces to serve during the war," approved February 17, 1864, as exempts one person as overseer or agriculturist on each farm or plantation, upon which there were, at specified times, fifteen able-bodied field hands between the ages of sixteen and fifty, upon certain conditions, is hereby repealed; and said persons shall be liable to military service upon the expiration of the time for which they received exemption, by reason of having executed bonds for one year from the date thereof; *Provided*, That exemptions of persons over forty-five years of age may be granted under the provisions of the Act aforesaid.

SEC. 2. No exemption or detail shall be granted by the President or Secretary of War, by virtue of said Act, except of persons lawfully reported by a board of surgeons as unable to perform active service in the field; persons over the age of forty years, laborers employed in the Nitre and Mining Bureau, in localities where slave labor cannot, with safety, be employed, artizans, mechanics or persons of scientific skill, employed by or working for the Confederate or State government, and shown, by proper testimony, to be such laborers, artizans, mechanics or persons of scientific skill, and with the same exceptions, all exemptions and details heretofore granted by the President or Secretary of War, by virtue of said Act, are hereby revoked.

SEC. 3. That all skilled artizans and mechanics who are engaged in the employment of the government of the Confederate States, are hereby exempt from all military service during the time they are so employed.

THE SEA

THE HISTORY OF THE SEA

The history of the sea is a vast and complex subject, encompassing the physical, biological, and human aspects of our planet's largest body of water. From the earliest days of human existence, the sea has been a source of sustenance, a means of transport, and a source of wonder. The study of the sea has led to significant discoveries in geology, biology, and environmental science, revealing the intricate connections between the ocean and the rest of the world. The sea is a dynamic and ever-changing entity, shaped by natural forces and human activity alike. Its depths are filled with a rich and diverse ecosystem, and its surface is a stage for a variety of natural phenomena. The sea is a source of life and a source of death, a place of beauty and a place of danger. The history of the sea is a testament to the power of nature and the resilience of the human spirit.
