1900. New Century, New Ideas, New and Valuable Novelties.

New Prices. Everything supplied direct to the planters at wholesale. Worthless things omitted and the good ones here. Quality is the great consideration. Price is always secondary with us. We aim to sell only the very best and sell low as possible.

It is a fact that nearly every seedsman doing a large business in a city pays enormous rents, taxes, etc., issuing elaborate catalogues costing from \$20,000 to \$100,000 and spending as much more in newspaper advertising, now it is plain that they must make this vast sum which they spend out of their customers who are deluded by their extravagant pictures and windy descriptions to think their seeds must be of superior quality. We have found thousands of people with common sense enough to know that if we save all these useless expenses we can sell at prices far below what others charge and still make a living profit. By growing our own seeds we can offer a better quality and do what they have not confidence enough in their seeds to do—Warrant them to grow—If you are not already our customer one trial will convince you that BELL'S SEEDS are not only the cheapest but the BEST.

Northern Grown Seeds have a harder nature and mature quicker than those grown farther South. Many of our seeds are grown for us by specialists in a latitude farther north than this.

We Mail Postpaid everything in this Catalogue at the prices given. We publish a wholesale express Catalogue, a copy is probably sent with this unless you are too far away to receive goods by express cheaply. A deduction of 8 cents a pound and 15 cents a quart is made from prices in this book when sent by express.

Remittances must be sent with the order; postage stamps taken same as cash. We prefer to have you obtain a money order when possible and you may deduct cost of same from amount sent.

Promptness. We fill all orders within 24 hours from the time received (except some cases of plants or something special). Many orders are filled within six hours from time received.

We Warrant all seeds to grow to the extent that we will replace free any failing to do so if you have good reason to suppose the failure was due to any fault of the seeds.

Please compare these prices with any others you have and you will see you can save money by sending us your order. Make sure that you have written your full address on it.

Who Knows and Sells the Best the city seedsmen who has not even a garden to experiment with or the actual grower who has made a life time study of growing and knowing all the varieties? We are actual growers and for this reason can not only offer a better selection but save all middlemen's profits and sell cheaper.

Get up a Club among your neighbors and by so doing get your seeds for two and a half or two and a quarter cents a package.

Vine Peach.

Vine Peach.—The fruit is the size of a large peach, oval shaped, and of a bright orange yellow color, some russeted. When it first ripens it is quite hard and has but little flavor, but soon they become mellow and sweet and have a rich flavor. When ripe the fruit fall from the vine, the flesh is very firm with a cavity in the centre, and when peeled and the seeds taken out the resemble a mixture of musk melon and peaches. For sweet pickles, pies or preserves they are superb. When fruit is scarce, we feel certain that they will quickly become popular, as they are easily and abundantly prolific, and can be used in every way in which you would use a peach. Some consider them excellent simply sliced raw with a little sugar on. Market gardeners are already having considerable call for them from their customers. The vine on which they are borne is somewhat similar to the muskmelon vine, and requires the same cultivation. Pkt. 6c.; 2 pkts. 10c.; 1-2 oz. 20c.; oz. 35c.

CHOICE

FLOWER

SEEDS

We are extensive growers of flower seeds for which reason we can not only offer better seeds but lower prices than those who buy old odd lots of imported goods. Our list comprises only sorts of real merit. We omit hundreds of sorts which may be called pretty, but are far inferior to what we offer. Our mixtures are made up of only the rarest sorts and the best colors, so when you order a mixed package of any sort of flower seeds you can depend on getting the best.

Packages except large and very expensive seed contain 500 to 1000 seeds each. We replace free all which fail to grow. The numbers preceding the variety are to order by, and thus save writing the entire name. Thus should you order No. 55, we would send a packet of Harlequin Asters. The figure carried out to the right is the price it costs for a packet of seeds—thus the 7 means that a packet of seeds costs 7 cents.

Grand Asters.

THESE are the most magnificent plants which bloom in autumn. Fine collections of Asters are very rare.
