

MISSISSIPPI

MUST GROW MORE CORN IN 1918

IT WILL TAKE A MINIMUM OF

FIVE MILLION ACRES

To prevent want. This is an increase of 600,000 acres over last year's crop

We Face a Serious Feed and Food Shortage at Home

Fewer oats have been planted than at any time in the past ten years. Our wheat acreage was only one-third of what it should have been. There is a dearth of hay.

THE ENTIRE WORLD IS SHORT

Where will you buy? Our allies and our soldiers must have every whit of the grain that this nation can spare. We cannot afford to ask our neighbor states to supply us.

AN EARLY CROP IS NEEDED

PLANT ALL THE CORN YOU CAN IN MARCH. Don't stop there---continue planting until June.

SEED CORN WILL BE SCARCE. Get a supply now. Use plenty of seed---don't skimp.

YOUR COUNTY AGENT

Will furnish you with a list of reliable farmers who have seed for sale. Have a talk with him about the food and feed conditions.
