Another new year has begun
How will it cut?

It has been another
cold day, clear & bitter
but not as cold as yesterday.

I have, of course been
in the house, but I am
getting on nicely.

I was up by 10 A.M.
& I have been busy all day.

Wright's Scudder called
this P.M. and later Mr.
Sprague. It was so kind
of him to come from
Boston.

May Dexter is still feeling
very poorly, but is im-
proving. I sent her
roses to-day. Miss Brown
attended to it.

Several phone talks.
Some letters written
I want to get through
the Xmas letters.

Mr. Storm called to-day -

Clear, cold.

At home of course.
but improving.

Busy writing letters
and doing some book-
work. - In Brown
finished Spartina -
I am about $\frac{1}{3}$ through
Carex.

Dr. Robinson called
this evening. Yesterday
I corrected local flora
proof, and I went
over it with Dr. Rob-
inson. It will make
a very good paper on
Rosaceae. We sat
by an open fire in
the parlor -

Cloudy raw & cold

In the house as usual
no getting out in this
weather

Winters Scudder came
up this morning and
gave me the card for the
next play - During the
day with Miss Brown's help
I got out the notices
which were rather elaborate
and I also wrote out my
Ann-Rep. for the Sh. Ass'n.
I have been Secy now for 35 yrs.

George called this P.M. &
said Miss Richardson came
out and that took half
the afternoon.

I hope that tomorrow
I can walk out a bit if
only the weather will abate
a bit. It's easing up a little.

Mary Deylin still is pretty
uncomfortable. Lucy feels
the effects of a fall -

I love improving.
Red Rand called at 8:30

Clear, moderating.

Wrote letters this morning. Jennie called in the A.M. and also Charlie Batchelder. Charlie told me all about the Botanical Club meeting of last evening. I was glad to get details. Hubbard's talk on N. E. genera of grasses was carefully done, though very dry. Charlie brought a small package of plants that I went over this evening and named for him.

This P.M. I had a good talk, after my nap, with J. R. Churchill. Arthur Nichols called & a little later Laura Kelsey & her sister. We had a very nice talk indeed.

Still cool & bracing.

I am still improving.
This morning I was
bundled up and I took
a walk on the boards
between here & the brick
block a few times.

It was good to get the air.

This morning Mill Bremer
called & we had a good talk.

This afternoon I had
calls from Mr. & Mrs. Paton,
Mr. Lane & his little daughter
Hollis Larrabee, Charlie
Batchelder (for some plants),
and George & Mary!!
It was very nice, too, to see
them.

I had my $\frac{3}{4}$ hr. rest after
dinner.

Evening spent quietly
writing letters. Called up Marion
Lord on her engagement!!
Nice talk.

Wea

Cloudy, chilly, some sun.

I have been in all day and have not felt up to the mark, the old feeling of oppression. Still I have kept quietly busy, writing Christmas notes, going over my Carices and reading with stereoscope a few Palustrine chapters. This method of study is a very vivid and real one. To me the views are very remarkable and impressive.

Cloudy, pretty cold, a little
sun at noon.

To-day I have felt better,
especially from noon.

I have worked on Carey,
to-day. Miss Brown is
making good progress
with the grasses, cleaning
& fortifying.

At noon I took a slow
walk to the polls and
voted. It was refreshing
to be out, but very slip-
pery. I walked very
slowly.

Charlie Batchelder called
this P.M. for my signature
to a paper in re Nuttall
Dues to members engaged
in war work.

This evening I went
over a few more Palestine
views - wonderfully interesting.
I have nearly finished
my Christmas letters.

Sun + cloud, bracing, cold.

I have been out twice to-day. This morning I walked as far as Buckingham St. + this afternoon I walked up to Lucy's and sat with May + Lucy for about an hour. That looks well. May it continue. I am feeling better.

I have made progress in Carey to-day and a few days will see me through. Miss Brown has got pretty nearly through Germanese. She does the pinning work, fortifying plants + cleaning sheets if necessary -

My Xmas letters are written and that is a relief.

I lay down this P.M. as usual and I feel that it does me much good -

Ther THURS. JAN. 10, 1918 Wea

Sun and cloud cool.

This morning Miss Brown & I went by electric to the Harvard Trust and I removed everything from the two boxes in the vaults and we went back to Harvard Sq. where I deposited the important papers in the box at the Charles River Trust. I am pleased to have done this. Everything is now near at hand. Then we returned in time for lunch.

This afternoon I rested and did some work on Carey in the Herbarium. I also worked on the accounts, the Estate, my own affairs and the various tax papers require time. Evening quietly at home talked with J.R.C. & Missthrop Scudder, ye ye Did a bit of reading.

Clear, cloudy in evening, bracing.

This morning worked on Carex.
At 11 A.M. I walked to Harv. Sq.
did business in the bank, had my
hair cut &c. Home by electric.

This is my longest walk so far.

After dinner worked some
more on Carex and then walked
up to Mary's and sat with
her & George for some time.
We discussed rather fully
the Mass. Income Tax,
I had papers. It will be
simple in my case.

This evening Miss Brown & I
worked in herb. I have some
all by 4 pigeon holes of Carex
and she finished the
Gramineae, cleaning and
folding the sheets. I examine
each cover after her. I have
previously this season been over
all these sheets, for cut sheets

Pouring rain before 8 Am. with high wind. Then clearing & wind settling down. The day clear & very mild, the snow & ice melting and running off in torrents.

I have done a good deal of work in my Herbarium & to basket Brown. I have 3 more pigeon holes in Carey's box.

This noon I walked from 12:15 to 1:15 as far as the Auburn bridge. The gutters were mountain brooks.

I had a long talk over the phone with Mrs. Ticknor. Tom is slowly recovering from his very severe illness pneumonia in both lungs with pleurisy. I shall call on him as soon as I can. Knowlton called on me this P.M. - He had been at the Gray Herbarium Local Flora -

Ther SUN. JAN. 13, 1918 Wea

Clear, light wind, bitter cold -

I have worked when at home on *Carex* and have finished and connected with the rest of the book. I have reviewed now the whole herbarium. In *Gramineae* & *Hyperaceae* the nomenclature is down through Rhoads, 1917. There should be now no 2 states represented on one sheet!! Miss Brown is nearly through *Gramineae* & then she does *Cyperaceae*, cleaning & fortifying. I feel much satisfied.

Wrote 2 books to Robert Rantoul who is 11 yrs old today.

Took a short walk in Van Rantoul at 12.30. Then I dined at the Brewster at 1.30. Jack Limer, ambulance driver on the Tremble front was there. He showed us German & French helmet gas masks, shaped shell T. T.

Clear, cold & bleak.

This morning I walked over to the Gray Herk, into the East box of cut sheets!

They all were glad to see me and I enjoyed my morning. I settled 2 or 3 names with help from Fernald and Robinson. I came back with Dr. Robinson and took with me the last mounted sheets for Miss Anderson.

This P.M. I checked up all my common's works and all the sheets in order, and also those plants brought me.

I have worked on them this P.M. & evening. I shall keep apart what Dr. Peck wants to see.

My herbarium is in good shape now. Miss Brown is rapidly getting the last sheets into good condition. Still she has all Carey's too.

Ther TUES. JAN. 15, 1918 Wea

Howling blizzard on awaking, clearing a little later, the day becoming clear and cold. Sun in the early morning.

General herbarium work much of the day. Also worked on papers & pamphlets in my study. Telephone wouldn't work in Am. Went to the Rantouls twice to phone.

This evening auto'd to & from Phelps Bowles House to Annual meeting of the Shakespeare Club. It was particularly successful. Play first part of Hamlet. Good cast, Mr. Goome. Talked for some $\frac{3}{4}$ hr. on Hamlet's mental condition especially in the first part of the play, before the murder was generally known. 28 members present. I reached home by 10.50. I have stood the day well

Clear calm, bracing.

Spent much of the afternoon
on Shakespeare work
Also called on Mary
Dexter, Lucy, & Mary
Hough. Mary is pro-
gressing steadily & slowly.
This afternoon I got the
Shakespeare notices
ready to print. Miss
Brown did the rest.
I had 3 callers this
afternoon - Grace Williams, her
sister, & a young girl
friend. They are staying
till Sunday at 8 Church
Evng St. Boston. I must
call in Saturday.

I have gone over a num-
ber of covers that Miss
Brown has done in
Cyperaceae. She says we
shall be done to Carey.
I have some through
Carey. Then what?

Cloudy all day with a little snow about noon. Cool.

This morning I had a talk over the phone with Bro. H. Brown in regard to printing a list of books on Hamlet for the Club. I called on him at 11.30 at his school, and settled it, and this afternoon & evening I printed it and got the list ready to mail tomorrow. It has been quite a work.

I have also finished reading Peter Schlemihl, a most remarkable story. Miss Grove has done much work on Cyprian and by Saturday will have done to Carey, Case 2!! It is such a comfort to feel that my sheets are in such fine condition. The work is practically done with Carey. Various reviews there

at Cook's. We had an in-
teresting talk.

After lunch we walked
up to Mrs. Hovey's cor-

in at 7.45 and we spent
the evening looking at

burne plants. I showed
them in an easel in
the reception room. The
light was just right and
all enjoyed the display
and the talk. I thought
it a pity to put away
the plants, if I could
just give any pleasure.
They certainly do look
very well when mounted
and put under a light.

Clear, cold, walking very slippery -

This morning I went over to 7 R. Churchill's for the day. Electric to Broadway. S. R. Station!! First trip that way. Subway fr. Hav. Sq. to Broadway, 13 min!! then surface car to Dr. Church's. I found Anna at home, after quite a break-down at Boer's Hospital. Over work, German measles & long terrors in her isolation she must rest quite a while.

The day passed quickly. The Judge & I worked on his barbarian, and made good progress. Home by 10.30 in a little less than one hour.

I do not mention the terrors war in my diary. It is not the place. It is overpowering in every possible way -

Cloud & clear sky - Cold.

I named a package of plants
left by Charlie Batchelder.
I also studied the tax
papers, not easy.

This afternoon Mary
came down and I gave
her an exhibition of my

Gaylussacia, and am making
good progress ~

This afternoon I took a
walk, joined Anna Howe
and walked to Toller St.
Called on the Thomsons &
S. W. Frances and all the
children. I had a real
nice talk with her.

I am going 9.6 pm
to the Medicine tomorrow
at Roland Baxter. I
do hope all will be well.
I shall rest carefully,
for I haven't been to
anything like this since
my illness.

Dr. Kennedy is failing rapidly.
Please talk with Hal this evening.

I have felt nicely today

This morning I walked
to & from Har. Sq. Bank,
Haircut left spec. at Lloyd's.

This afternoon I called on
Will Brewster and sat 5 min.
with him. He looked pretty
white and weak. He is
improving though they say
the nurse called it a sort of
nervous indigestion.

Miss Anderson, minister for
the Gray Hecker came at 5.30
with a box of plants for me.
I showed her the herbarium
and the house - She is
much interested -

Mr. Dexter is very uncom-
fortable and has much
nausea - I am so sorry
but it might be worse.

sharp pains and Dr. Houghton
finally came out. It is a case of
very sharp sciatica, the pains
when they come like stinging
needles. Some more than a
dozen in succession!!

So the day passed and
I tried to occupy my mind
between times by copy-
ing my *Amurichia* paper

dread the night unless
the attacks cease.

Herbert W. Gleason Gives Illustrated Talk
Before Appalachian Club

Herbert W. Gleason, a member of the Appalachian Mountain Club, entertained fellow members last night at Huntington Hall with an illustrated talk on "Mt. Rainier National Park."

In company with Stephen T. Mather, director of the National Park Service, Mr. Gleason made a week's horseback trip around Mt. Rainier last summer, following a newly completed trail for more than a hundred miles. He took many pictures along the way and these were used in the course of his lecture. The wild flowers which he showed by the use of colored slides were remarkable.

*Cambridge Tribune -
- March 2, 1918 -*

On Sunday evening, at 8 o'clock, there will be a mass meeting in aid of the New England Italian War Relief Fund, under the auspices of the committee of Twenty-one of the Old Cambridge Churches. Miss Amy Bernardy, of Florence, Italy, a representative of the Italian government, will speak.

Miss Bernardy is the daughter of Spirito Bernardy, who was vice-consul in Florence for 30 years. She taught the Italian language and literature at the Smith College for six years, at which time she often spoke before the Dante Society of Boston. She has been throughout the United States as a representative of the Italian government in the interest of its immigrants. She has also been a volunteer inspector, sent by the Italian government, of the mountain schools of Italy, established in the reclaimed districts by the soldiers. She has described this work in her Transcript letters. She is known through Italy as "La vaporina," or "Little steamboat," because of her energetic work in behalf of Italians. She, at her own villa, is taking care of 86 children, many of whom have no mothers, and whose fathers are at the front. Miss Bernardy, while she is here, will speak at the Twentieth Century Club, and at a great Italian mass meeting in Boston.

William Roscoe Thayer, a friend of Italy, and a well-known writer of Italian history, will introduce Miss Bernardy. Rev. Henry Sartorio, of Christ Church, Boston, will speak in English, Rev. Filotes Tagliatela will speak in Italian, Signora Tagliatela will sing Italian songs, and there will be young women ushers in Italian costumes.

STUDENT OF BOTANICAL RESEARCH

George Golding Kennedy Was Native of Roxbury, Graduate of Harvard, and Last Year Presented His College with Herbarium of His Own Collection

George Golding Kennedy, who of late years had become widely known as a New England botanist, died last night at his home, Blue Hill avenue, Milton, in his seventy-seventh year. Mr. Kennedy was born in Roxbury, and his father was Dr. Daniel Kennedy, who gained a wide reputation through "Kennedy's Medical Discoveries." His mother was Anne (Colgate) Kennedy. Mr. Kennedy studied at Harvard and was graduated in the class of '64. He then studied at the Harvard Medical School and got his degree from there in '67, and it was then that the botanical and scientific world opened to him a fertile field for research. He identified himself with his father's business until 1909, when he retired and thereafter devoted his time to botanical research, being one of the founders of the New England Botanical Club. He was a member of the visiting committee of Gray's Herbarium at Harvard and was a member of the Union, St. Botolph, Boston Art and Harvard clubs. Last year he presented to Harvard an herbarium, to the collection of which he had devoted a long time.

Mr. Kennedy's wife was Harrlet White Harris. She died in 1910. The four surviving children are Mrs. Edith Golding Briggs of Brookline, Dr. Harris Kennedy, Sinclair Kennedy and Miss Mildred Kennedy, all of Milton.

George Golding Kennedy's funeral, held this afternoon from the family residence at Brush Hill road and Blue Hill avenue, Milton, was largely attended by family friends, members of the Harvard class of '64, and of the New England Botanical Club, and others. Rev. Julian K. Smyth, formerly pastor of the Roxbury Society of the New Jerusalem, but now pastor of a New York Swedenborgian church, officiated. There was no music.

Honorary pallbearers were Dr B. L. Robinson, curator of the Gray Herbarium at Harvard; Professor Merritt L. Fernald of the botanical department at the college; Edward L. Rand, corresponding secretary of the New England Botanical Club; Emile F. Williams, treasurer of the same club; Walter Deane and three members of the Harvard class of '64, Dr. William L. Richardson, secretary of the class; Frank Wildes and Jonathan Dorr. The body was taken to Forest Hills Cemetery.

FROM MANY BATTLE FIELDS

Boston Evening Transcript

Wonderful Collection of Relics on Exhibition in Bacon Building for Benefit of United War Work Fund *Nov. 14/18.*

One of the most interesting collections of relics of the war thus far assembled is on exhibition on the ground floor of the building formerly used as the Bacon department store. The collection has been turned over to the United War Work campaign and all contributions of visitors are to be devoted to this purpose.

The collection is owned jointly by the Liberty Loan Committee of New England and T. L. Gill, and consists of many hundreds of specimens of battle-scarred paraphernalia, ranging in size from the rifle cartridges picked up on many fields of notable strife to the great 105 mm. guns captured from the Germans, the French 75 mm., said to be the most destructive war engine in the world; various models of French and German howitzers, mortars and field pieces, and, in short, specimens of all arms which have been used in the present war. Each has its interesting history, and, covered with the mud and scars characteristic of the field from which it was taken, leaves but little of the horror of frightfulness to the imagination of the observer.

Besides these guns there are bullet and shell-torn airplanes, aero bombs, sea depth-bombs, mines, shrapnel and bullet-punctured helmets and war-worn uniforms of all the forces which have been identified in the struggle, each of which tells its own pathetic story of the fate of the wearer.

A model of a Flanders trench, representing an eighty-yard front line and 250 yards of first and second-line defences, scaled to an inch to a yard, is one of the most interesting features and is alone worth a visit to the exhibition. It was built by a Canadian engineer and nothing has been omitted that would make it an exact representation of the trenches in which the soldiers of the American Expeditionary forces fought. Wire entanglements, craters, dugouts and trench holes are all there as well as the hundred and one minor fittings of the ditches in which the allied soldiers lived.

Every stage in the evolution of gas defense and attack is strikingly illustrated together with the liquid-fire tanks used by the Germans and the torpedoes used in their submarine warfare.

Several times daily Sniper Louis Lance and Sergeant Jack Golding of the Dublin Fusillers, two of the few men of their organization who lived to come back, tell of their thrilling experiences during the first year of the war.

The exhibition is in charge of William E. Chamberlain, assisted by Howard V. Bullinger. About \$4000 has already been contributed by visitors for the United War Work fund and it is expected that this will be increased many fold during the remainder of the time that the collection can be kept here.
