"MY MARYLAND"

Bolgiano's Wonderful New Tomato

Expert Opinions

New York Agr. Exp. Sta. Geneva, N. Y. Prof. R. Wellington, writes September 28th, 1910.

Very much pleased with "My Maryland" Tomato this season. Vines healthy, vigorous but not so rank as Livingston's Stone. Fruit large, smooth and firm, should make a good shipper as well as a good canning Tomato. Plants tested seemed to be identical in all respects, and so there is no doubt that the strain has been carefully selected. This variety should be of great value for market as well as canning purposes. We have tested several varieties of Tomatoes this past season and "My Maryland" Tomato has made as good a showing, if not better, than any of them."

Expert Opinions

Massachusetts Agr. College, Amherst, Mass. Prof. C. S. Heller writes Sept. 28, 1910.

We tried your new "My Maryland" Tomato along side of others in the same field and given similar treatment. I find it to be a very desirable sort. Compared with others, it is decidedly disease resistant and a heavy yielder. The fruits are large, smooth and quite regular, ripening very evenly.

Expert Opinions

The Connecticut Agr. Exp. Sta. New Haven, Conn. Prof. E. H. Jenkins, writes September 26, 1910.

We found the "My Maryland" Tomato a fine variety in every respect. It grew vigorously, yielded well and the fruit was large, fleshy and firm. It is obviously a productive variety.

"My Maryland" Bolgiano's Wonderful New Tomato.

Expert Opinions

Kansas State Agr. College, Manhattan, Kan. Prof. Albert Dickens, writes September 26th, 1910.

"We have been delighted with the showing made by your New Tomato "My Maryland." It is still in full bearing September 23rd.

Expert Opinions

Purdue University Agr. Exp. Sta. Lafayette, Ind. Prof. J. G. Boyle, writes Sept. 28, 1910.

Your New Tomato "My Maryland" has made a good record with us this season. We have picked 399½ pounds of "My Maryland" from twenty plants up to the present time, which gives an average of practically twenty pounds to the vine. This will give a yield of about 17 tons per acre, with the plants set 5 x 5 apart. The fruits of "My Maryland" were of good size, quite smooth, ripened evenly and were of a good grade. We consider it a promising variety.

This Is The Way "My Maryland" Tomato Makes Friends

On Aug. 22, 1910, Mr. W. T. Fosworth of Newport, Washington County, Ohio writes as follows.

I want to tell you about The "My Maryland" Tomatoes, the seed of which I bought of you last Spring—I have been having lots of Tomatoes good size and excellent quality, the vines bearing from the ground to the top. Notwithstanding this has been an unfavorable season for tomatoes, late frosts and prolonged dry weather has blighted other tomatoes fearfully, but mine have stood up under the adverse conditions remarkably well. If this had been a favorable season I don't believe the vines would have held the fruit. In conclusion I want to say I wish you great prosperity in the seed business.

King of Them All. Has Surpassed The Best Yielding Tomato In The World More Than 100%—A Marvelous Double Yielder

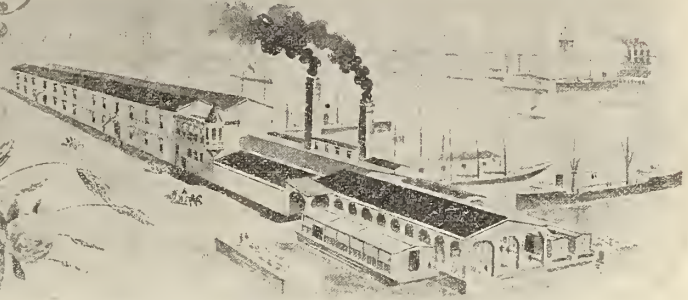

Side by side it has produced three times the crop produced by the Stone or New Century—it has even doubled the yield of the Greater Baltimore Tomato.

The vast possibilities of this New Tomato are astounding. We believed in Greater Baltimore Tomato the limit of productiveness had been reached, but "My Maryland" so far outyields any other Tomato ever grown that its remarkable productiveness is amazing.

People have driven miles to see a field of "My Maryland" Tomatoes and they all marveled at the prodigious abundance of the crops it had produced. The fields were literally covered with the finest well-shaped, perfectly formed, solid, smooth, bright red, uniform fruit, all free from roughness and cracks, much larger than any they had ever seen before. It was called then and there "A Winner" and it well deserved the title. The Tomatoes are much larger and far heavier than either the Greater Baltimore or The New Century. By most careful re-selections for five years, we have thoroughly established the purity and trueness of "My Maryland" Tomato, and are delighted to be the Introducer of a tomato which from start to finish is "King of Them All." A real "Double Yielder" that will be known as the Best second early and main crop tomato—the world over—in less than a year. Supply of Seed is limited. To be sure of securing some place your order as quickly as possible. Pkt. 25c. ½ Oz. 60c. Oz. \$1.00. ¼ Lb. \$3.00. Lb. \$10.00.

WE WANT TO TELL YOU SOMETHING

About the Wonderful Progress We Have made on Several Vital and Important Lines during the Year just passed.

Our New Scientific Seed Laboratory

Under the direct personal supervision of one of the United States Department of Agriculture Experts, who is now associated with us, we have established an up-to-date completely equipped Seed Analysing and Seed Testing Laboratory. We are, therefore not only prepared to supply you with Trustworthy Seeds grown from the purest, truest and most carefully bred seed stocks in the World, but we are prepared to give you at all times accurate and scientific information about any of our seeds in which you are interested. Our Trustworthy Seeds more than comply in purity, cleanliness and quality with every requirement of the Virginia State Seed Law and the Seed Laws of all other States in the Union—they are truly STANDARD SEEDS in all that term implies.

Our Mammoth New Pier and Warehouses

As illustrated above we have purchased and added to our establishment one of the finest water front properties in the City of Baltimore. This Mammoth New Property is conveniently located near our main offices and salesrooms and just opposite the new Ten Million Dollar City Docks. It extends from Ruppert St. on the West—for almost five hundred feet East along Montgomery St. to the Harbor, with three hundred and seventy-five feet of private dockage on our own Piers. All the Railroads and Steamship Companies entering Baltimore deliver freight to our piers without extra charge, thus saving thousands of dollars in drayage. In our new Piers and Warehouses we have over seventy-five thousand square feet of floor space which include our Onion Set and Seed Potato Warehouses, Bulk Seed and Grain Warehouses and our immense New Poultry Food Manufacturing Plant, also our special grass, clover and field seed cleaning machinery. With our complete modern new automatic machinery it is possible for us to unload a carload of grain or field seeds, weigh, thoroughly clean and reload in the same or another car in a very short time.

Our Wonderful New Poultry Food Factory

We have installed a wonderful New Poultry Food Plant capable of producing three thousand bags of "Square-Deal" Poultry Food per day. This is about fifteen times our former capacity. We are therefore fully prepared to take care of our rapidly increasing business on "Square-Deal" Scratch Food, "Square-Deal" Chick Starter, "Square-Deal" Chick Food and "Square-Deal" Pigeon Food—all the various Grains and Seeds are delivered free to our pier—handled right from the cars by automatic machinery, cleaned, milled—scientifically proportioned—bulked—mixed—weighed—bags sewed—and the finished Foods automatically conveyed back to the cars on our pier—all by machinery under the careful adjustment and control of our expert Poultry Food Specialists.

We Thank You, For Your Trade

With the above record we believe we can truthfully say we are 93 years young. We are under great obligations to you for your generous and increased patronage and we deeply appreciate the many words of kindness and praise for our goods you have sent in during the past year. We shall strive harder than ever to merit them. Good seed are at the bottom of all good agriculture—they are the foundation stones. Success is not possible without them. In the future as in the past, it shall be our constant effort to supply you at all times with the very best seeds that can be produced anywhere and at any price. Our chief ambition for 1911 is to make happy and more prosperous every customer of our house.

Yours respectfully,

J. Bolgiano & Son.

Bolgiano's Extremely Early Wonderfully Prolific I. X. L. Tomato

A week earlier than the Earliana. More productive than the Chalk's Jewel. As large as the Great B. B. As solid as the New Century. In fact, the World's leading Extremely Early Tomato.

277. In Market Gardener's Field Tests, I. X. L. Tomato proved to be a week to ten days earlier than the Spark's Earliana, with an abundance of Fruit larger and more prolific than Chalk's Jewel, in fact any number of specimens could be found as large as the Great B. B. Tomato. It has a little more vine and leaves than the Wealthy Tomato, thus protecting the blossoms from being easily knocked off by heavy rains or winds; also protecting the fruit from being sunburned or scalded. The I. X. L. Tomato is without a single exception the Leading Extremely Early Tomato, and while many of the most experienced Tomato growers tell us we cannot say too much in favor of this excellent Early Tomato, there are many who have not yet grown it. To them, we say again, do not experiment with it but plant your entire early crop in I. X. L. Tomato. Your crop will net you big returns. We stake our reputation on I. X. L. TOMATOES. Below we give in a concise form the most striking features of this Tomato.

1. Earliest, Largest, absolutely smooth Tomato on Earth. A week earlier than the "Earliana," and as large as the "Great B. B."
2. A beautiful, brilliant red color.
3. Vines are a perfect mass of large, smooth fruit, a single plant yielding $\frac{1}{2}$ bushel.
4. Fruit is extremely early, enormously abundant and ripens all at once.
5. Vines very compact and can be placed two feet apart in three foot rows.

6. As an extremely early prolific stem setter it is a wonder.
 7. The absence of unnecessary leaves permits all the fruit to ripen so remarkably early.
 8. It is almost like finding money to grow the I. X. L. Tomato.
 9. The largest growers tell us we cannot say too much in favor of the I. X. L. Tomato.
 10. In six years it has never disappointed a grower.
- Price, Pkt. 10c. $\frac{1}{2}$ Oz. 15c. 1 Oz. 25c. 2 Ozs. 50c. $\frac{1}{4}$ Lb. 90c. $\frac{1}{2}$ Lb. \$1.75. 1 Lb. \$3.50.

I. X. L. Makes Him Rich.

On August 31st, 1910, Mr. Wm. Dulcaster of Mahoning Co., Ohio, writes as follows: "I must thank you for the I. X. L. Tomato Seed I bought from you in the Spring. I have made \$500 from an acre and expect to sell about 150 baskets more. I received \$1.00 per basket for all I planted. It is the largest and earliest Tomato I ever received. I felt rich when I picked 200 baskets two weeks ago and received \$1.00 for every basket."

3 Baskets I. X. L. to 1 of Earliana.

On Jan. 27, 1910, Mr. U. S. Grant Reynolds of Ocean Co., N. J., writes as follows: "I have been planting I. X. L. Tomatoes for the past three years. I have raised some very good crops and last year I did not keep an account of how many baskets I had from my patch. I had so many, it would take half my time to mark them down. I had tomatoes and plenty of them that 19 and 20 would make a standard half bushel basket. They grew so large that some of my neighbors didn't know what they were and would ask me what they were. They will turn out 3 baskets to the Earliana one. The I. X. L. is the earliest and best yielding that I ever planted."

Delighted With I. X. L.—Wants More.

On Feb. 12, 1910, Mr. H. E. Burch of Edgefield Co., S. C. writes as follows: "I have grown your I. X. L. Tomato for two years and I am giving you the third order. I am still delighted with the I. X. L. Tomato. Several of my friends and neighbors who have seen mine will order from you this season."

Early Enough For Canada.

On Feb. 14, 1910, Mr. William Haney, of Essex Co., Ont., Canada, writes as follows: "I have grown your I. X. L. Tomato for three years and am greatly pleased with it. Please send me more of the best I. X. L. seed, for which I enclose the money, as soon as possible, and oblige."

Brings Most Money on the Market.

On Jan. 18th, 1909, Mr. A. E. Long of Butler Co., Ala., writes as follows: "Your I. X. L. is the finest Tomato I have ever grown. It brought more on the market than any I ever shipped."

Three Seasons in Florida

On November 7, 1910, Mr. James M. Sturbeck, of Orange Co., Fla., writes as follows: "I have bought your I. X. L. Tomato for the last three Seasons. They are fine for yield and quality. I will want them again next Season."

How Money Grows On Vines—Read These Letters

Bolgiano's Extremely Early Wonderfully Prolific I.X.L. Tomato

About 800 Crates To The Acre.

On November 10th, 1910 Mr. R. E. Athey, of Putnam Co., Fla., writes as follows: "The pound of I. X. L. Tomato Seed which I bought from you a year ago was planted at Yuma, Arizona and made the best crop of Tomatoes and the earliest in that section. The fruit was even sized, true to shape and color and shipped better than any other variety. We planted only 1/2 pound of the seed and it made 800 crates on a little more than one acre. I consider the I. X. L. the best early market variety and that it is adapted to Yuma Valley. Side by side with the Earliana the I. X. L. main crop was one week earlier. I will be in South Eastern Arizona this coming season and will want to plant more of your seed."

Blood Will Tell.

On January 12th, 1910, Mr. W. W. Williams, of Rowan Co., N. C., writes as follows: "Would say last season on account of the high price you asked for your I. X. L., I purchased my supply of this Tomato from a Philadelphia seedsman, owing to their price being a little less, and I am sure I lost not less than \$1,000 by doing so, therefore I am coming back to you this year, the Originators of this wonderful Tomato."

They Beat Earliana in New Jersey.

On September 3rd, 1910, Mr. B. Harry Black, of Gloucester Co., N. J., writes as follows: "I purchased some of your Bolgiano's I. X. L. Tomato Seed from you last spring. They were fine and extremely early and good size, much superior to Earliana."

What A Wonderful Victory.

H. W. Stamps, Floyd Co., Ga., writes February 25, 1909. "After trying all the other leading early varieties of the most prominent Seed Growers in the country, I am forced to the conclusion that the I. X. L. is the earliest, smoothest, most prolific and best flavored Tomato grown. Its merits cannot be exaggerated."

311 Crates from 21 Rows.

On November 25th, 1909, Mr. L. B. Belk, of Manatee Co., Fla., writes as follows: "I planted your I. X. L. Tomato Seed last season and made a fine crop. I found them the most prolific I ever planted. I raised 311 crates of Tomatoes on 21 rows 52 yards long. I have a great many truckers who want to plant the I. X. L. next season."

Enormous Crops—Delicious Fruit.

On January 18th, 1910, The Elizabeth City Hosiery Co., of Pasquotank Co., N. C., writes as follows: "Your I. X. L. Tomato proved last year and year before the finest early Tomato we ever saw, producing for us an enormous crop of delicious fruit."

Bolgiano's "Greater Baltimore" Tomato

300 Pounds to One Great Ohio Cannery.

The T. A. Snider Preserve Co., of Hamilton Co., Ohio, writes September 15th, 1910. "We have placed with you orders for 300 pounds of Bolgiano's 'Greater Baltimore' Tomato Seed for our 1911 crops. Will you kindly indicate by return mail when we may expect shipment of the seed."

76 3-4 Tons From 4 7-8 Acres.

On December 28th, 1909, Mr. Jos. H. Frampton, of Talbot County, Md., writes as follows: "Last year I used your Bolgiano's 'Greater Baltimore' Tomato Seed, when I could get the New Stone free of charge from the canning house, and it produced for me 76 3-4 tons on 4 7-8 acres."

Perfect Mass of Finest Tomatoes.

B. Z. Lloyd, Nacogdoches Co., Texas, writes: "My 'Greater Baltimore' Tomato plants were a perfect mass of Tomatoes, the finest I have ever seen. I do not think you will get any tomato to surpass the 'Greater Baltimore'."

About 20 Tons to the Acre.

Maffett Bros., York, Pa., April 3rd, 1909, write: "From the 'Greater Baltimore' Tomato Seed we bought from you last year, we raised 1256 bushels on two acres. Much the largest yield in our neighborhood. 1256 bushels were sold and we used quite a number of bushels at home. Our success attracted our neighbors, so this order includes seed for ourselves and three of our neighbors."

800 Crates From 1 3-4 Acres Sold For \$2,400.

Thomas S. Johnson, Polk Co., Fla., writes: "Your 'Greater Baltimore' Tomato I planted last season, is the finest I have ever planted. I shipped about 800 crates from 1 3-4 acres, some sold in Boston by J. D. Mead & Co. for \$3.00 a crate. I recommend it unreservedly to the growers of this section. I planted five different varieties and the 'Greater Baltimore' led them all. You can put me down for 'Greater Baltimore' next season."

Entirely Free From Blight—Yields 50% More.

S. M. Johnson, Dorchester Co., Md., writes: "The 'Greater Baltimore' Tomato that I grew last season from your seed is entirely free from blight, and the largest yielder by half that I have ever used. There can't be anything better; as you have my order I can say no more."

Large Tomatoes—Even the Last Picking.

Jos. B. Raymo, Port Antonio, Jamaica, writes June 1st, 1909. "I am greatly satisfied with the product of your 'Greater Baltimore' Tomato. They produce the largest fruit from the first until the last tomatoes are picked from the plant. Then, too, they are bug proof."

\$200.00 per Acre at \$8.00 per Ton.

On January 5th, 1910, The Kaysville Canning Co., of Davis Co., Utah, writes as follows: "Bolgiano's I. X. L. Tomato is the best canning Tomato I ever saw. We did not have a grower that did not average over \$200 per acre at \$8.00 per ton."

Better Than We Claim.

L. B. Belk, Manatee Co., Fla., writes July 21, 1909. "I used your I. X. L. Tomato Seed this season and can truthfully say that you do not say half enough for them. My crop was a success in every particular."

There's Nothing to Compare With It.

On February 17, 1910, Mr. J. C. Henly, of Charles Co., Va., writes as follows: "I find nothing to compare with your I. X. L. Tomato in productivity and early maturity."

I. X. L. Succeed Where Others Fail.

On February 17, 1910, Mr. H. C. Kennedy, of Garfield, Okla., writes as follows: "This is my third year trading with you, and I am pleased to say your seeds have given entire satisfaction; never had any success with Tomatoes in Oklahoma until I began planting I. X. L. They are the Tomato for Oklahoma. Wishing you success."

Ten Pounds I. X. L. Tomatoes to the Plant.

J. B. Hancock, Galveston Co., Texas, writes May 26th, 1909. "I am now gathering the finest crop of Tomatoes I ever saw. They are from your I. X. L. Tomato Seeds. Single plants have as much as 10 pounds of fruit."

136 Marketable Fruit on 1 Stalk.

Mr. H. L. Musser, of Southern California, writes, September 13th, 1910. "Your I. X. L. Tomato certainly exceeds anything for productivity we have ever seen. We had one cluster of 12 tomatoes, all a good marketable size, and smooth. We counted 136 marketable size tomatoes on one stalk. Grown side by side with the Earliana, it is earlier and will easily out-yield it three to one."

Not the Cheapest But Outyields all Others.

C. D. Elam, Alachua Co., Fla., writes January 28th, 1909. "I can buy Tomato Seeds cheaper here, but I like your seed the best. Your I. X. L. Tomato yielded so great, I like them. They outyielded any Tomato I ever tried."

The Earliest in Texas.

A. L. Lemack's, Anderson Co., Texas, writes January 15th, 1909. "I tried your I. X. L. Tomato last season, and they came far ahead of any early Tomato I have ever used."

100 Pounds to One Great Indiana Cannery.

The Loudon Packing Co., of Vigo Co., Ind., writes September 28, 1910. "Please enter our order for 100 pounds Bolgiano's 'Greater Baltimore' Tomato Seed for our 1911 crops."

King of Them All.

W. H. Bove, Muscogee Co., Ga., writes January 19, 1909. "I think your 'Greater Baltimore' Tomato is the King of them all."

Outlasts Stone Tomato Two Weeks.

October 28th, 1909, Mr. Miles Rausch, of Union Co., N. J., writes as follows: "I drop a line about your 'Greater Baltimore' Tomato Seed. Sowed them in my Green House and set out 400 plants on the 20th day of May and I picked Tomatoes up till October 8th, and they are the finest tomatoes that I ever grew. They are such fine large tomatoes. I set the 'Greater Baltimore' next to a patch of Stone Tomatoes and they outlasted the Stone Tomato by two weeks. Both kinds were set out on the same day, May 20th."

Ten Days Earlier Than Stone.

Watson Bros., Cumberland Co., N. J., write: "We are partial to the 'Greater Baltimore' Tomato as they mature about a week earlier than the Stone Tomato."

14 Tons To The Acre—Not a Mixed Seed.

A. Wilkins, Sussex Co., Del., writes: "I used your 'Greater Baltimore' Tomato last year, and raised 14 tons per acre, and if the seed you send this year, are as true to name as they were last year, I will be satisfied, for there was not a seed of another variety in the lot."

Wet Weather or Dry Weather.

J. N. Stansbury, Anne Arundel Co., Md., writes: "I have grown 'Greater Baltimore' Tomato for several seasons, and neither wet weather nor dry weather affected its yield. I would sooner have them than any other tomato I have ever used, for they are immense yielders and of the finest quality."

The Pennsylvania State College.

AGRICULTURAL EXPERIMENT STATION.

State College, Centre Co., Pa.
Our conclusion then is that "Greater Baltimore" is a fine variety, large, solid, uniform in shape and size—and very productive—and worthy of dissemination.
Very truly,
J. P. PILLSBURY, Asst. Horticulturist.

Bolgiano's "Greater Baltimore" Tomato

1. Greater Baltimore Tomato is the highest mountain top of success in tomato growing.
2. Just doubles the yield of many of the best cropping tomatoes you have ever grown.
3. Smooth, well-formed and deep from stem to blossom.
4. Its extremely heavy weight is due to its firmness and great meatiness.
5. It ripens evenly to the stem and is entirely free from ridges, cracks and blight.
6. Unrivalled shipper, due to its solidity and firmness.
7. Fruits in large clusters at every second joint. Joints are short and sturdy.
8. Brilliant red color, one of the handsomest tomatoes we have ever seen.
9. Vigorous, compact; healthy vines.
10. One of the grandest Second Early and Main Crop Tomatoes on earth.

PRICES.—Pkts. 10c. ½ Oz. 15c. 1 Oz. 25c. 2 Ozs. 40c. ¼ Lb. 75c. 1 lb. \$2.50.

After six seasons have passed, and the "Greater Baltimore" Tomato has been grown in every Tomato State in the Union, and in many Foreign Countries it is almost impossible to give a description of its merits without seeming to claim for it Supernatural Powers; so in describing it, we will, as far as practical, confine ourselves to extracts from the experience of those who have grown the "Greater Baltimore" during the past six years.

A Florida man writes "It is the finest Shipping Tomato ever sold—tested side by side, and shipped side by side with five leading varieties—it beat them all." Another writes "Out of 15 Red varieties it was the best of all." "Very prolific—it yielded from 300 to more than 650 bushels of 60 Lbs. per acre." One man raised 17,000 plants from ¼ Lb. of "Greater Baltimore" Tomato Seed. "Vigorous grower," strong healthy plants. Fruit uniform in shape and size, solid, large, very regular, smooth, shapely, fleshy, very meaty, ripens well and evenly. Beautiful bright red color, fruit very handsome, dozens weighing 30 ounces, and several exceeding 32 ounces. Seed planted a month later than "Duke of York" produced shipping fruit two weeks before that variety was ready. "Fine crop in bad season." Excellent keeper—has kept until New Year's day. Rust and blight proof. Recommended unreservedly by a grower for "the section around Lakeland, Fla." Had proved better than any variety tried at Picton, Canada. "Stands the heat and drought of Mississippi." "Very valuable for South Carolina climate." In the canning districts of Delaware and Maryland "yielded a fine crop in a bad season." Texas says there is no better tomato in size and taste on the market; not an acid tomato—very fine flavored. As a home garden Tomato "the results have been far beyond expectations." On our own table we sliced the "Greater Baltimore" Tomato like we would slice a fine tender roast beef. We have had a good seed crop and have lowered our prices accordingly.

Marvelous Yields.

On Jan. 7th, 1910, Mr. H. Studte of Kent Co., Del., writes as follows: My friend Mr. A. G. Turner, a large, practical successful farmer, produced this past season an average of 25 tons an acre of Greater Baltimore Tomatoes from seed obtained from you and when the frost killed the plants there were yet remaining on single plants as many as 100 tomatoes, for I personally counted them myself."

The Ideal Tomato.

Mr. Cross, Supt. Kenish Canning Co., Davish Co., Utah, writes. "In reply to your inquiry, will say I planted the 'Greater Baltimore' in fifteen different fields separate from our Stone and that in every section and every field they ripened about ten days earlier than any other. They ripen even to the stem, are very solid, also prolific and of a beautiful deep red color. I consider them an IDEAL TOMATO for both grower and canner."

Far Better Than Stone.

On February 17, 1910, Mr. Wittetts Johnson of Cape May Co., writes as follows: "Your Greater Baltimore Tomato is even more than you claim. It was far in advance of the Stone, side by side."

They Lead In Indiana.

Mr. J. W. Cox, of Grant Co., Ind., on Sept. 30, 1909, writes as follows: "Your Greater Baltimore Tomato Seed gave the very best of satisfaction this year. I have 17 acres of the pure Greater Baltimore. They are the leading variety here now."

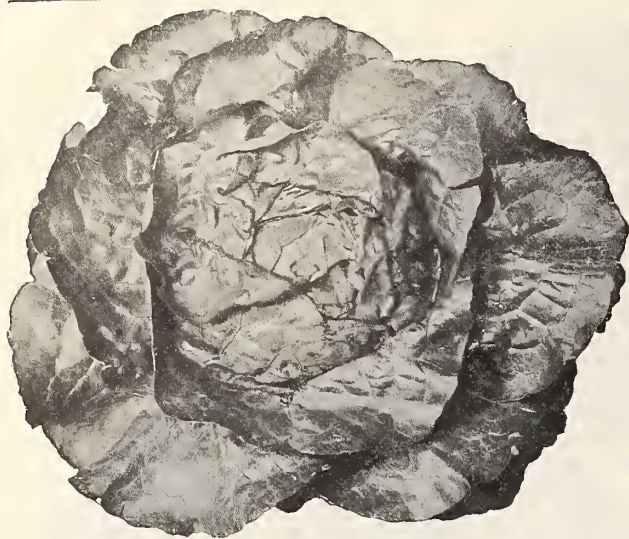

They Sell For \$2.00 Per Bushel.

On July 10th, 1909, Mr. Thomas Garnett of Vico Co., Ind., writes as follows: "I am now selling the Greater Baltimore Tomato for \$2.00 per bushel."

Immense Yields—Finest Quality.

Mr. T. W. Stansberry writes August 11. "I have grown your Bolgiano's 'Greater Baltimore' Tomato for several years and neither wet weather nor dry weather affected its yield. I would sooner have 'Greater Baltimores' than any other tomatoes I have ever grown, for they are immense yields and are of the finest quality."

Prof. W. W. Tracy of the United States Agricultural Department at Washington, D. C., told us in his tests the "GREATER BALTIMORE" Tomato held its fine large size to the last Tomatoes on the vines.

Lucky Stroke Lettuce

Bolgianos' New Giant Podded Emerald Isle Pole Lima

1032. A marvelous yielder of great clusters of gigantic Pods filled with extra large, thick, most deliciously flavored green Lima Beans. The skin is thin and tender, but will not crack when shipped to market. Emerald Isle Pole Limas are the largest podded, largest seeded, heaviest cropper of all Limas. They are earlier, more prolific, and much larger podded than the King of the Garden. The mammoth pods measure 7 to 8½ inches in length and 1½ to 2 inches in width, and are borne in great clusters (as illustrated in the photograph) which stand out from the foliage. The vines branch or stool out from the main stalk close to the ground, each vine producing 10 to 15 lateral branches. These produce a tremendous growth of exceptionally vigorous vines, which grow 10 to 12 feet in height and produce tremendous crops of immense well filled pods from the bottom to the top. Emerald Isle Pole Lima Beans continue to bear most abundantly until killed by frost. This is the most perfect Pole Lima Bean ever introduced. It grows green, it dries green, it stays green. It excels all others. Pt. 30c. Qt. 50c. 4 Qts. \$1.75. Pk. \$3.00. Bu. \$12.00.

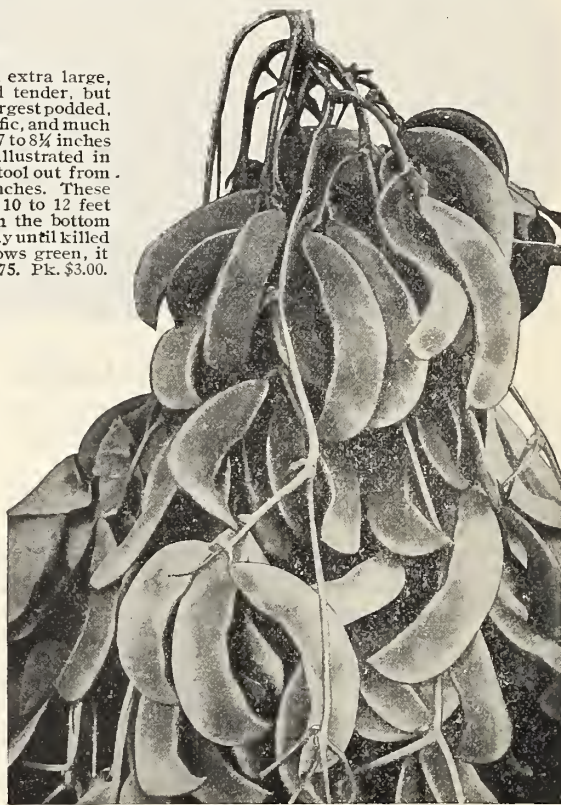

Trust Buster Potatoes

Bolgianos' "Lucky-Stroke" Lettuce

New 1911 Introduction

120. "Lucky-Stroke" Lettuce is going to mean a whole lot to the Trucker who grows good lettuce—who has a particular trade that wants the best and is willing to pay for it. Every plant is uniformly perfect. It is a grand, new, extra large, compact, solid Heading Lettuce, not only early and hardy, but stands early summer heat splendidly on account of its thrifty growth and ability to root deeply which enables it to successfully resist a spell of hot dry weather. The round heads are large, measuring 12 to 15 inches across. The outer leaves are few and grow close to the head. The inner leaves form a large, firm, hard head of creamy-yellow, beautifully blanched. The quality is exceptionally fine, being tender, crisp, succulent, and deliciously sweet. The heads continue to increase in size for about two weeks after they are ready for use, and will stand longer without going to seed than most any other variety. It is a delicious morsel when grown in the house garden. You'll find it a "Lucky-Stroke" whether you grow it for Market, Shipping or Home use. Pkt. 10c. Giant Emerald Isle Pole Lima Beans

Bolgianos' New Extra Early "Trust Buster" Potato

The great success of this New Potato is assured from the wonderful reports we have received from a large number of expert potato growers who tried samples of it last year. It has produced most excellent results in all kinds of soil. It is not only early but it is a heavy producer of potatoes of the very finest texture and quality. "Trust Buster" Potatoes are vigorous growers and prolific yielders of handsome, smooth potatoes, cream white in color. These potatoes are uniform in size, color, excellent quality and fine flavor. They are quickly prepared for cooking as the skin peels readily and they cook dry and mealy. The table qualities are unequalled. Being the first year we have catalogued "Trust Buster" Potatoes our supply is necessarily limited. But to avoid disappointment please send in your order as early as possible. We are so anxious for you to try this Best of All Potato this season. Lb. 35c. 3 Lbs. 90c., by mail postpaid. By express or freight, F.O.B. Baltimore, Pk. 65c. Bu. \$2.00. Bbl. \$5.00.

Bolgiano's Extremely Early Hardy "May Queen" Beans

1001. Five years having passed since we introduced this prolific Early bean, it has become an indispensable variety with many of our customers. It is remarkably early, exceedingly prolific and its extra large finely shaped straight dark green pods are always solid tender and of a delicious flavor and borne in great abundance. It is a most excellent shipping bean, carrying in fine shape for many days after it is picked. Some of our customers have also tried it as a late bean with astonishing results; they were so well pleased with it as an early bean they wanted more of them and, therefore, experimented successfully with them in the Fall. The stock is perfect; the plants are of a strong, robust habit and mature the crop very regularly. If you do not already grow "The May Queen" you should certainly give it a trial. Pkt. 10c. Pt. 15c. Qt. 25c. 2 Qts. 40c. 4 Qts. 75c. Pk. \$1.35. Bu. \$5.00.

Bolgiano's "Mighty-Nice" Bean

1033. This wonderful, new, round, meaty, green podded bean had for its parents two separate and distinct stocks of Thoroughbred Hopkins Improved Earliest Red Valentine Beans and in the breeding of their stocks has produced an Extremely Early and most prodigiously productive stock of beautiful deep green, round podded Valentine Beans. The flavor and quality cooked and tested side by side with 50 other leading varieties proved the Bolgiano "Mighty-Nice" Bean to be by far the most delicious and tender.

We have been experimenting with "Mighty-Nice" Bean for years and we can unreservedly recommend it as the greatest new production in the way of Green Podded Beans in the last ten years. Being an extremely new stock it is free from the fault that accumulate around stocks that have been on the market for a few years. We have succeeded in getting the type thoroughly fixed and we are willing to say that you will hardly find one off vine in an acre of "Mighty-Nice." If you want the most productive, the most beautiful, the most salable and the best market or shipping crop of round green podded beans you have ever raised, by all means plant a patch of Bolgiano's "Mighty-Nice" Beans.—The Coming Leader Among Beans. Sunshine Wax Bean

1018. The beautiful, clear, attractive, bright golden color of this most delicious Wax Bean gave it the name of the Sunshine Wax. In the market side, by side with many of the older and better known Wax Beans, the Sunshine Wax shone out and immediately attracted the attention of all. Order quick. Our supply is very limited this season. Pkt. 10c. Pint 20c. Qt. 35c. 4 Qts. \$1.10. Peck \$2.00. Bus. \$8.00.

"Truckers' Reward" Wax Bean

Bolgiano's New "Home, Sweet Home" Bean

1134. A most delicious bean for the home garden, very productive, large, long, handsome flat pods, full of big, rich, tender, sweet beans. The beans when dried, make the finest kind of winter dried beans and when baked will fairly melt in your mouth. If you once try the Home, Sweet Home Beans, you will always have it in your kitchen garden. Market gardeners will also find this a very lucrative bean to sell to fancy market or grocery store trade. Pkt. 10c. Pt. 15c. Qt. 25c. 2 Qts. 45c. 4 Qts. 85c. Pk. \$1.50.

Bolgiano's New Pearl Wax Beans

A Wonderful Long-Pod Wax Beans

Enormous Plant Enormous Pod Enormous Yield
Never Affected by Rust or Blight

1031. If you had grown it in your field as we did, when for almost two solid months we had copious rains every day, and it showed no signs of blight or rust, you would agree with us when we say that a bean that will yield a fine crop of beautiful long, flat clean waxy pods under such adverse circumstances, certainly cannot be praised too highly. It is a PEARL of great value. Although a flat bean, the seed looks somewhat like a Valentine Bean; the plant grows 2½ ft high by 2 ft. across. It is a remarkably sturdy, rank, vigorous grower, well loaded with pods. The luxuriant foliage shelters the pod from the hot sun, and is free from blight or rust. The pods are long, slim, flat, plump, handsome and meaty; they somewhat resemble those of the Davis and Wardell's Wax Beans, but are plumper, longer and straighter. They average from 7 to 8 inches long, and are of a clean light waxy yellow color. As to quality, the pods are exceptionally tender, brittle, and of fine texture, free from fibre, and if picked when ripe they are entirely stringless. Both for Shippers, Market Gardeners and the Home Garden, the exceptionally good qualities of Bolgiano's New Pearl Wax Bean renders it of the greatest value. Pkt. 10c. Pt. 15c. Qt. 25c. 4 Qts. 75c. Pk. \$1.35. Bus. \$5.00.

Bolgiano's "Truckers' Reward" Wax Bean

1183. We have been developing this wonderful New Flat Wax Bean for a number of years and believe we now have practically a perfect Market Gardeners and Shippers Flat Wax Bean. It is bound to take first premium over all competitors wherever exhibited, on account of the great beauty of its pods and enormous productiveness of its healthy vigorous bushes. The type is so well fixed and so pure and true it is almost impossible to locate a wrong plant in an acre of "Truckers' Reward" White Wax Beans.

The beautiful long straight attractive flat golden pods range from 5½ to 6½ inches in length—in quality they are particularly fine remaining tender and crisp a longer time than any other variety.

As a money making crop, to sell either on the retail market stall or on the wholesale markets of the great cities—they will invariably catch the eye of the most critical buyers and on account of their superior attractiveness will sell themselves.

Do not delay if you want to secure some of our "Truckers' Reward" Wax Beans; our supply is limited so please order early. Pkt. 10c. Pt. 15c. Qts. 25c. 4 Qts. 75c. Pk. \$1.35. Bus. \$5.00.

Bolgiano's "Enormous" Extra Early Bush Lima Beans

1035. This wonderful new Lima is the earliest, largest and best of all large Limas; the vigorous bushes are crowded with enormous pods. The delicious green beans are larger than any other Lima Bean. It yields continuously from June until frost. Both the pods and the luscious flavored beans are much larger, and considerably thicker than the Large Bush Lima. The plants grow upright about 30 inches high and 24 inches across, with luxuriant sheltering foliage and are very sturdy. Often five to eight pods measuring five to six inches long by $1\frac{1}{4}$ inches wide are borne in clusters on one stalk. The shelled beans either green or dry are nearly twice as thick as the large Bush Limas. "Enormous" Bush Limas will outyield Large Bush Limas by $33\frac{1}{2}$ per cent., on account of the greater size of both pods and beans. The Seed Beans are greenish and very handsome, while the dried beans of the Large Bush Limas are pure white. Pt. 20c. Qt. 35c. 4 Qts. \$1.25. Pk. \$2.35. Bu. \$9.00.

Beans

Fordhook Bush Lima

The only stiffly erect bush form of the popular "Potato" Lima. Both pods and beans are twice the size of Greer's Bush Lima and more than half again as large as the Greer's Pole Lima.

1119. Fordhook Bush Lima is altogether unique. Nothing like it has ever been seen before. Of strong, erect, true bushlike growth, never running, the bushes average 20 to 30 inches in height by 20 to 24 inches across the top. The foliage is of heavy texture and very dark green in color. The stalks that produce the blossoms are thrown out from the lateral and main stalks; the pods are borne in "clusters" of from four to eight. The pods resemble those of the Dreeer's Bush Lima, but average more than double the size, measuring from 4 to $5\frac{1}{2}$ inches long, about $1\frac{1}{4}$ inches wide, by as much as three-fourths of an inch thick. The pods contain three to five large beans with an average of four.

Fordhook Bush Lima is fully $33\frac{1}{2}$ per cent. heavier cropper and therefore, is bound to entirely displace the Dreeer's Bush Lima. In season it is from four to six days earlier. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

"Bonfire" Bolgiano's New Very Early Beet

295. Entirely new and distinct, the bulbs develop in a remarkably short time and can be used or sold when very young. Absolutely perfect in shape, almost round and of good size with a very slim tap root. The small green colored leaves are ribbed dark crimson. Color of both skin and flesh is an unusually deep rich blood crimson. "Bonfire" Beet holds this splendid color when cooked, making them very valuable for canning, pickling, and simply perfect for table use. "Bonfire" Beet in quality and color is without an equal. It is very fine grained, tender and sweet; it is never woody or stringy. There is a treat in store for you if you plant some of this new beet. Seed is in very limited supply. Pkt. 10c. Bolgiano's Deep Blood Beautiful Beet

The Best Beet That Grows

For Ten Years This Splendid Beet Has Led All Others

18. Our long experience in the growing of Beets has shown this new strain of Beet to be the Best Extra Early Deep-Blood Turnip Beet. Its small upright growing tops, extra early maturing, splendid shape and deep crimson color make it popular with everyone. The rows may be grown close together. Stem and veins dark red, blade green. Roots are globular and peculiarly smooth; color is of blood red, very crisp, tender, fine-grained and sweet, remaining so for a long time. We believe this excellent new stock will produce a crop more uniform in shape, color and quality than any Beet ever placed in the hands of the Trucker. Pkt. 5c. "Lucullus" New Swiss Chard or Spinach Beet

165. This delicious and useful vegetable should be in every garden and on every Market Stall. It is really two distinct vegetables, first the leafy part of the foliage is cooked and served the same as Spinach; while the stalks are cooked and served with drawn butter like tender, fresh Asparagus. It grows about $2\frac{1}{2}$ feet high, the stalks are thick and broad like Rhubarb, the leaves are much larger than those of the regular Swiss Chard, they are very heavily crumpled like Savoy spinach. Crisp and tender, pleasing flavor. Oz. 10c. $\frac{1}{4}$ Lb. 30c. Lb. \$1.00.

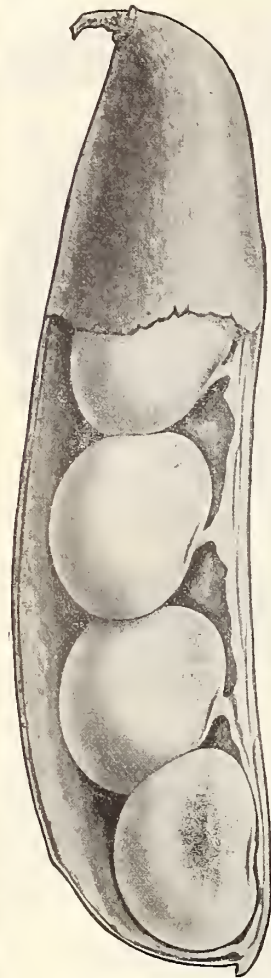

Bolgiano's Green Mountain Triple Parsley

A Table Adorner of Rare Beauty

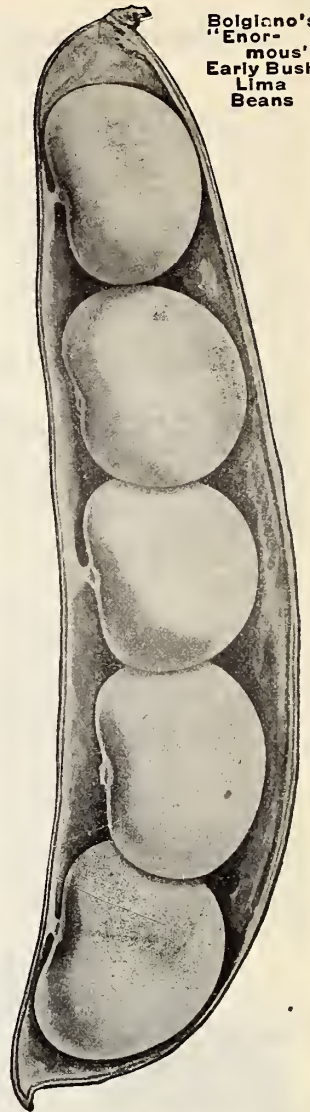

221. Never before have we been able to offer to the public a gift of nature equal to our beautiful Green Mountain Parsley. Always alert, always ready to appreciate any seed of exceptional merit, we soon saw that everybody would want our New Green Mountain Parsley when they heard of its wonderful beauty. Hardy, immensely productive, deep, velvet green, The leaves are densely curled and borne in abundance. It is exceptionally easy to grow, and with very little care everybody can have finest flavored Parsley in cultivation. If you have but a few square feet, you can raise sufficient Parsley to supply your table with decoration and your soups with fine fresh flavor. Pkt. 5c & 10c. Bolgiano's "Big Winner" Wakefield

25. Several years ago we introduced the **Big Winner Wakefield Cabbage** and it has become very popular with Cabbage growers, both large and small. It is as large as the Big Charleston Wakefield Cabbage and as early as the Early Jersey Wakefield. Handsome in appearance, massive and graceful. The heads are solid and heavy, making a perfect shipping Cabbage. It is fine form and in flavor deliciously sweet. Among the pointed heading Cabbage it is *by far* "The Big Winner Wakefield." Don't let this season go by without a liberal planting of this Profit-producing Excellent Cabbage. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ lb. \$1.00. 1 lb. \$3.50.

300 Bbls. From $\frac{3}{4}$ Acre—Weighed 11 Lbs. Each.

Ernest Sterling, of Somerset County, Md., writes: "The 'Big Winner' Wakefield Cabbage is the Cabbage that all Truckers should plant for EARLY LARGE SOLID CABBAGE. I raised 300 Bbls. on $\frac{3}{4}$ acre, many of them only 15 Cabbages to the Bbl. They weighed 11 lbs. each and retailed for 44c a head."

Bolgiano's Extra Early Express

Suitable for Market Gardeners for Very Early Crops, 10 Days Earlier Than The Wakefield.

27. What pleasure there is in growing a uniform, attractive, solid crop of Extra Early Cabbage! Bolgiano's Extra Early Express is the **best** Extremely Early Cabbage on Earth. Praises of its merits come from the most experienced growers. They remember a good thing when it pays them. Earliest, uniform, solid, fine color; brings top prices. No soft heads, 10 days earlier than the Wakefield. Pkt 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ Lb. 50c. 1 lb. \$1.50.

Bolgiano's "Ring-Leader" Cabbage

Entirely Distinct—The Most Magnificent and Most Profitable Main Crop Cabbage Ever Created.

96. By crossing Bolgiano's "Square Deal" Cabbage with Bolgiano's Extra Flat Dutch we produced this wonderful new cabbage. For five years we have most carefully selected and reselected the very finest specimens of this Grand Cabbage, until now we have a stock that is going to make every wide awake grower of cabbage in the country marvel at its remarkable features. It grows strong and vigorous, being entirely worm proof. It has a dark bluish green color, showing a thrifty, robust constitution. It forms very large, hard, thick, solid, flattened heads, uniform in shape and color, and of a handsome appearance. The stem is short and broad under the head, but tapers off to a point where it enters the ground. "Ring-Leader" Cabbage heads are very large, solid, and of most excellent quality and delicious flavor, entirely free from any features of coarseness, the veins and ribs being strongly developed, but of fine texture. The heads are firm and hard, extra good keepers, splendid shippers, and most popular sellers. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. $\frac{1}{2}$ Lb. \$1.75. 1 lb. \$3.50.

Bolgiano's Big Winner Wakefield Cabbage.

Bolgiano's New Leader

26. As early as the Wakefield, yields 12,000 heads, one-third more per acre than any other extra early cabbage. The outer leaves are so few and so small that they can be planted very close. The heads are compact and solid from the time a head is formed and keeps so until thoroughly matured, thus enabling extremely early cutting of small hard heads, or later when the Wakefields come in, of large, thoroughly matured, solid, round, flat heads. In quantity, it is "The Leader," the veins of the leaves are extremely fine; its rapidity of maturing, compact growth, gives it a flavor unequalled. The demand for such a cabbage in Northern Markets is becoming greater and greater each year. The people want an extremely early new slaw-head cabbage and "The Leader" supplies their wants. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ lb. \$1.00. 1 lb. \$3.50.

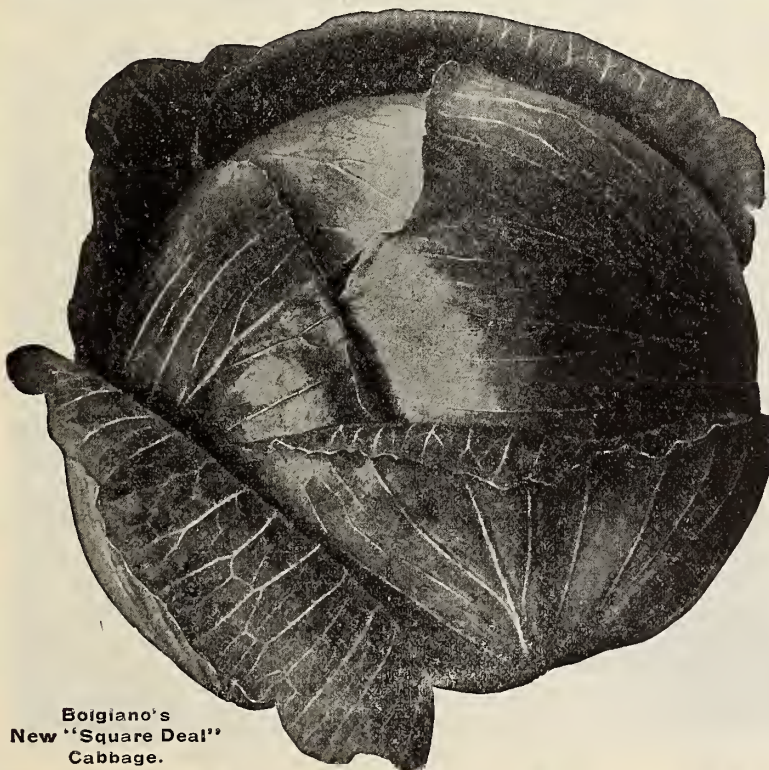

G. T. Winders, Beauford Co., S. C., writes Aug. 26, 1908:—"Bolgiano's New Leader Cabbage seed is one of the finest I have ever used. It makes a solid head, and every plant made a head. I have always had luck with seed from your house, and I will never change. Wishing you the best of success, as you are honest in your dealings, I beg to remain."

Bolgiano's New "Square Deal" Cabbage

The Best on Earth.

154. Without a single exception, Bolgiano's New "Square Deal" Cabbage is the Biggest Money Making Cabbage ever offered the American trucker. This is a strong assertion, at least 100,000 people will read it, so you can readily see we could not afford to make such a statement unless we were sure of our ground. The "Square Deal," Cabbage matures immediately after our New Leader Cabbage. It is absolutely a "Square Deal," as we have seen ten-acre fields without a single irregular head. The uniform heads are of excellent size for shipping, larger than the New Leader and yet not so large as to be unwieldy. The color is a fine fresh green and is retained during long shipments. The heads are solid and compact with very few outer leaves. For a fine, Solid, Tender, Uniform, Early Flat Cabbage, Bolgiano's "New Square Deal" Cabbage challenges the world. The demand for a fine cabbage of this character, led us by the most rigid and careful selection, during the past five years, to mature this cabbage, which we are confident will give all our friends and customers a "Square Deal" every time. Pkt. 10c. Oz. 35c. $\frac{1}{4}$ Lb. \$1.00. $\frac{1}{2}$ Lb. \$1.75. 1 lb. \$3.50.

Mr. H. C. Kennedy, of Garfield Co., Okla., writes Feb. 17, 1910:—"This is my third year trading with you and I am pleased to say your seeds have given entire satisfaction. The "Square Deal" Cabbage are the best that was ever grown in Oklahoma. Wishing you success, I am."

Bolgiano's Trustworthy Seeds For 1911

Bolgiano's Extra Early Wealthy Tomato

This Tomato has made Many Truckers and Market Gardeners Rich.

278. Thousands of dollars clear have been made by the men who have planted the Wealthy Tomato. From the day you sow the seed until the last, large shapely fruit is shipped to an anxious early market, Wealthy Tomato keeps the lead. One of the earliest of the earliest; smooth, firm, delicious flavor, beautiful red color, and an abundant yielder. In the Wealthy Tomato Mother Earth pays us a thousandfold for our effort. In Spring-time those who have the means are only too glad to spend it freely if in return they can get the first fruits of the season. Then the fancy prices are realized, and if you trust Wealthy Tomato it will put you in a position to get your share and also the share of the man who takes years to find out a money maker. Pkts. 10c. Oz. 25c. $\frac{1}{4}$ Lb. 75c. 1 lb. \$2.50.

Won Prize in Jamaica.

Mr. Jas. B. Raymo, Port Antonio, Jamaica, writes June 1, 1909: "I cannot praise your seed too highly. Your Wealthy Tomato has gained a prize here. I picked them from the vine five in a bunch, and all were very large."

1 Crate to 2 Plants.

Mark Zill, of Florida, writes: "I planted your Wealthy Tomato last year and grew 1 crate from every 2 plants. I do not want any better."

Earliest and Finest in Frederick Co., Md.

Chas. O. D. Lee, Frederick Co., Md., writes: "Your Wealthy Tomato is the earliest and finest we have had in this part of the country. We had ripe tomatoes the 26th of June. They yield in great abundance."

Bolgiano's Florida Special Tomato

The Greatest Blight Resisting Tomato on Earth.

311. Not a single grower of Tomatoes in Florida or in any locality where blight has injured the Tomato crops, should go through this season without trying this most excellent New Tomato. We call it "Florida Special" for it has been most carefully bred up to resist the ravages of blight which has been so discouraging to our Florida customers. It is red in color, large in size, fine flavored, firm and meaty, very prolific, and about as early as the Earliana. It is a most excellent shipper, in fact, during our entire time of selecting and breeding up the Florida Special, we took the utmost pains in selecting such tomatoes as would stand the long shipment to the northern Markets from Florida. We are confident Bolgiano's Florida Special Tomato is going to make a record this year, that will put it head and shoulders above any Tomato that has ever been introduced, excepting the I. X. L. Tomato. Price, Pkt. 10c. Oz. 25c. $\frac{1}{4}$ Lb. 75c. 1 lb. \$2.50.

They Excel Their Picture.

W. L. Burroughs, North Carolina, writes: "Your New Century Tomato bought of you last Spring is the wonder of the neighborhood. It has a delicious flavor, smooth and perfect. They excelled their picture."

Bolgiano's New Century Tomato

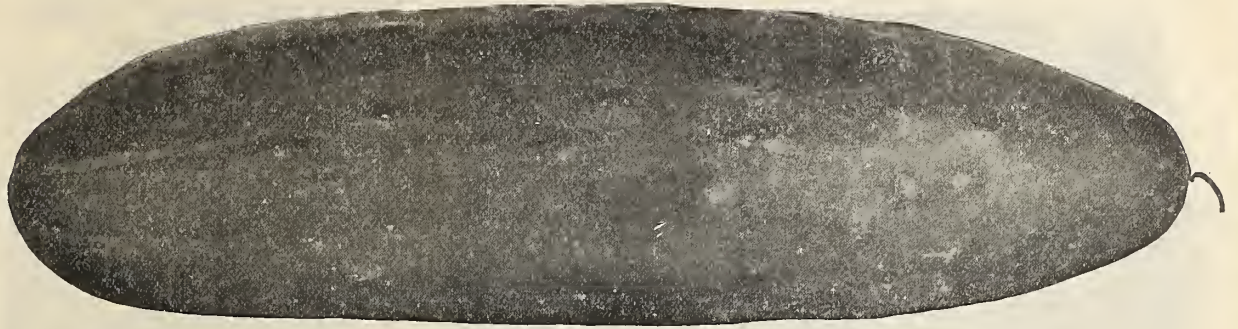

283. **Bolgiano's New Century Tomato.** Ten years ago, when we first introduced the NEW CENTURY Tomato, we felt as though the limit for improvement in Tomatoes had been reached, and judging from the letters we are receiving every season and from the great quantities of seed we annually sell, the New Century is still held in highest esteem by thousands of the market gardeners and shippers all over the country. If you hesitate to plant your entire crop in the newer varieties, you can always feel that **New Century is an Old Friend, Tried and True.** Read the recommendations on this page and you will see in what high esteem it is held. We have spared no pains or expense in keeping this stock as pure and true as it was at the beginning; in fact by most careful roguing, eliminating and selecting, we believe New Century Tomato is better today than it ever was. New Century will outyield many other kinds; it will carry for two weeks without hurting its beauty; it will attract attention and pay you; it will not crack; it is of a beautiful red color, of large handsome size from first picking until last tomato is taken from the vine. Bolgiano's New Pink Giant Tomato

187. A fine large handsome early pink Tomato. One reason pink Tomatoes have not been so popular recently, is because they have not been subjected to the great hybridizing by which the Red Tomatoes have been so wonderfully developed. This has been overcome in this magnificent New Pink Giant Tomato, it has been carefully crossed and re-crossed for size of fruit, earliness, solidity, smoothness, productiveness. We have a large uniform handsome fruit which sells readily at a much higher price than did ever the older varieties. Pkt. 10c. Oz. 25c. $\frac{1}{4}$ Lb. 75c. 1 lb. \$2.50.

BOLGIANO'S EARLY FORTUNE CUCUMBER

84. Bolgiano's Early Fortune Cucumber is unquestionably the finest Cucumber in the world. It grows large, uniform and regular from 10 to 12 inches long and nearly all one ideal shape. The color is an attractive rich dark glossy green. Its attractive form and rich color surpass all other cucumbers. Early Fortune Cucumber is absolutely the earliest cucumber grown. It holds up well in shipping long distances. Cucumbers thrown out at shipping time have remained perfectly green for 3 to 4 weeks. Early Fortune Cucumber bears abundantly and continuously throughout the entire season: large, crisp fruit which never loses its tenderness. The vines make a vigorous and healthy growth, producing beautiful and satisfactory harvests even under very unfavorable conditions. As a tremendous money-maker, Early Fortune Cucumber has never been equaled, having produced over 1200 crates from an acre and a quarter, which netted the grower \$2,000. As to quality; shape, color, productivity, and as a wonderful profit producer, Early Fortune Cucumber stands alone. The Cucumber seed crop is again very short this year, so place your order early. Pkt. 10c. Oz. 15c. $\frac{1}{4}$ Lb. 35c. $\frac{1}{2}$ Lb. 60c. Lb. \$1.00.

It Gives Universal Satisfaction

On December 16th, 1909, C. E. Coleman Produce Co. of Neuces Co. Texas, writes as follows: "Will you kindly advise promptly your prices on 250 lbs. of Early Fortune Cucumber Seed. I am a heavy buyer of Cucumbers and have adapted your Early Fortune as the only Cucumber I like to handle, as it has given universal satisfaction. I want this seed for the use of growers here."

\$5,000.00 Crop.

T. C. Connell, Florida, writes:—"From $7\frac{1}{2}$ acres Bolgiano's Famous Early Fortune Cucumbers I cleared \$5,000."

Big Crop, Dry Season, No Water

A. J. Mixon, Levy Co., Fla., writes: "Though there are several irrigating plants around me, I shipped the first cukes and more per acre this year than any of my neighbors, with one of the driest Springs on record."

BOLGIANO'S "LORD BALTIMORE" CUCUMBER

THE WONDERFUL DRY WEATHER CUCUMBER

82. Think of producing a brag crop of the handsomest and most profitable long dark green cucumbers you have ever seen during one of the driest summers on record—that's what was done last summer by those who tried our "Lord Baltimore" Cucumber. It just don't pay any attention to dry weather but goes on growing and producing beautiful fruit. The "Lord Baltimore" Cucumber is of the true white spine type about 15 inches long, very dark green and of exceptionally fine flavor. The sturdy drought resisting vines produce enormous crops of beautiful, firm crisp and deliciously flavored cucumbers. The pure white attractive flesh composes most of the fruit, leaving an extremely small space for the seed.

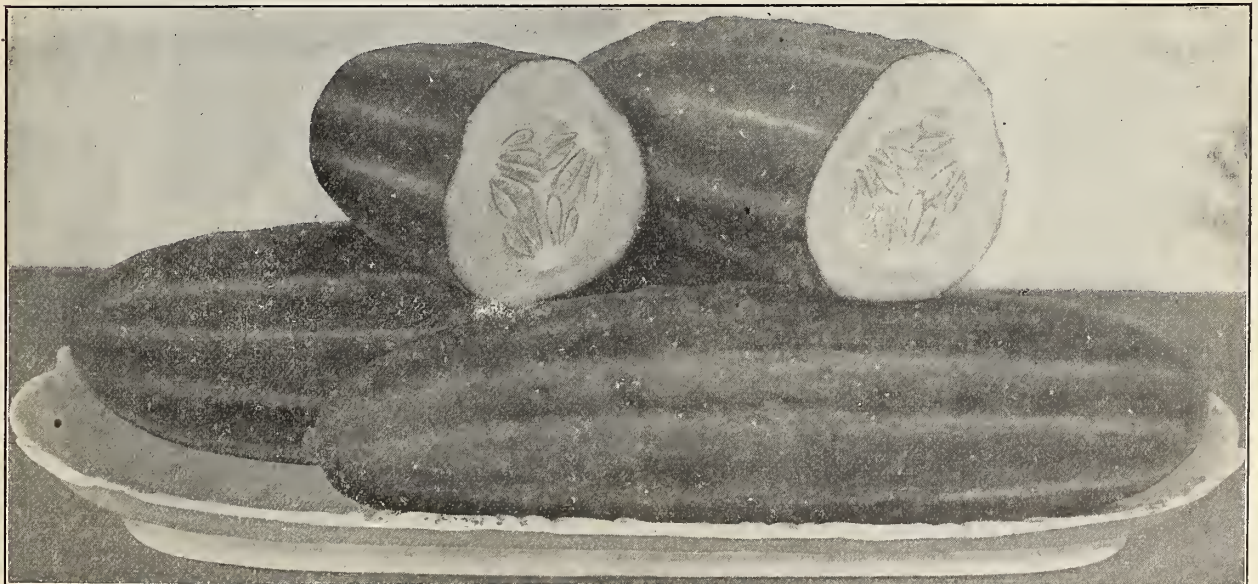

If you have failed to get a crop with other cucumbers, "Lord Baltimore" will not only produce a crop for you—but will produce a crop you will be proud of. As this is the first year we have offered "Lord Baltimore" Cucumber seed for sale our supply of seed is very limited, so if you want any, please place your order early. Pkt. 10c. Oz. 15c. $\frac{1}{4}$ Lb. 35c. $\frac{1}{2}$ Lb. 60c. Lb. \$1.00.

NEW DAVIS PERFECT CUCUMBER

544. Davis Perfect Cucumber resembles a hot house Cucumber so closely that dealers cannot tell the difference, it being equally good for hothouse or outdoor culture. It is ideal in shape, rich, dark green color, uniform and regular in size. It is exceedingly tender, and as a slicing cucumber for the table is unsurpassed. It is almost seedless one-third of its length from the stem end, and the seeds that are contained in it, when in slicing condition, are so small and tender that they are almost unnoticed. Exceedingly productive. Price, Oz. 10c. $\frac{1}{4}$ lb. 25c. Lb. 75c.

KLONDIKE CUCUMBER

135. This valuable variety is one of the best slicing, and will produce cucumbers equal in appearance to the hot-house grown specimen. The color is rich dark green, and the fruits grow to a uniform size, measuring about 7 in. in length and 2 in. thick when in good condition for use. It matures early and continues bearing for a long time, and the vines make such a healthy and vigorous growth that they produce a good crop even in a poor season, when many other varieties fail on account of unseasonable weather. Bolgiano's New "Melting Gold" Cantaloupe

51. Did you ever eat anything so exceptionally delicious, the very pleasant memory of it often comes back to you? That's what will happen if you once eat one of Bolgiano's New "Melting Gold" Cantaloupes. The delicious, tender golden flesh simply melts in your mouth. It is the sweetest and most delicious melon that has ever been grown. The flesh is thick, very tender and of a beautiful deep-golden color, it ripens close to the skin, the thin rind is of a rich dark green color contrasting attractively with the deep Golden flesh which is so deliciously sweet and tender. The melons are well ribbed and covered with a grayish netting, they are 6 to 7 inches long by four and half to five inches in diameter. "Melting Gold" Cantaloupe is an excellent shipper and it is so good that the market eagerly takes every melon grown and begs for more. As a melon for home gardening it is the greatest addition in years. Pkt, 10c. Oz. 15c. ¼ Lb. 40c. ½ Lb. 75c. 1 Lb. \$1.50.

Burrell's Gem Cantaloupe

548. This new Melon comes from the melon-growing district of Colorado, which was made famous by the Rocky Ford Muskmelon, of which it is a counterpart, except in color of flesh, which is beautiful dark salmon or orange. Skin is rather dark green, and rind thin, leaving a thick lining of flesh which is of most delicious, juicy flavor, and fairly melts in the mouth. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

Hoodoo Cantaloupe

549. As a cantaloupe for the private garden, this variety will please all who plant it. The vines make a strong vigorous growth, which enables them to withstand disease and produce an abundant crop of the most delicious muskmelons one can imagine. The melons are not large, but of convenient size for table use, and present a fine appearance. The rind and flesh at the blossom end is firm, the skin is thickly netted, and the flesh a rich, deep orange color, fine grained and of remarkable sweetness. The Melons are about the same size as the Rocky Ford, nearly round in shape and very solid. This variety embodies many qualities which are desirable in a first-class medium size table Melon. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. 1 Lb. 75c.

Best of Them All.

Mr. J. A. Wilson, Panola Co., writes Oct. 30, 1908. *"I have bought seed from many houses, but those bought of you last spring gave better satisfaction than any I ever planted before."*

EARLY SCARLET MOMMOTH

BOLGIANO'S WONDERFUL NEW PEPPER

163. The earliest maturing and most productive very large sweet pepper. The plant is vigorous and upright, growing larger than that of the Chinese Giant and produces much more fruit. The fruits ripen earlier than any of the very large sorts on the market and average heavier, as the flesh is unusually thick. Color deep crimson when matured; flavor very mild. We consider this the most desirable very large pepper yet introduced. Pkt. 10c. ½ Oz. 25c. Oz. 40c. 2 Ozs. 75c. ¼ Lb. \$1.35. 1 Lb. \$5.00.

The Best He Ever Used

Mr. J. A. Brenizer, Clark Co., Miss., writes March 23 1909. *"We are well pleased with your seed THEY are the best we have ever used. You can count on us to order from you whenever we need seed and we will always speak a good word for your seeds and recommend you for a "Square Deal."*

Long Season Spinach

1000. This variety of Spinach is especially adapted for the summer season, when other sorts quickly run to seed. Sowings can be made in early spring and followed monthly with further sowings, and the crop will be continuous throughout the entire summer. The leaves are a rich dark green color, very thick, crumpled and of splendid quality. Oz. 5c. ¼ Lb. 10c. 1 Lb. 25c.

**BOLGIANO'S
"MILLIONAIRE" LETTUCE**

*The Earliest Fine Large Solid Head Lettuce on Earth.
Very Hardy, Produces Handsome Crops Either
Out of Doors or Under Glass.*

150. This valuable new Lettuce is an extremely profitable variety for both Market Gardeners and Shippers to grow; as well as a decidedly delicious variety for the Home Garden. If we could meet every one of our customers face to face we would persuade each one of them to give the "Millionaire" Lettuce a trial the very first thing this Spring. We recommend it unreservedly as one of the best lettuces, and one of the most profitable that has been grown anywhere. It is a very quick growing hardy Lettuce and will stand much damp, cold weather. "Millionaire" Lettuce can be planted out of doors or under glass and in either case will produce fine round compact heads 6 to 7 inches in diameter, which weigh from 12 to 16 ounces, much sooner than any other variety. It is an excellent market variety, the heads are a clear light green, the outer leaves slightly tinged with brown and closely folded around the head making it all head, the inner leaves are a clear, bright, rich golden yellow. In quality "Millionaire" Lettuce is unequalled, it is crisp, tender and has a delicious rich, buttery flavor. Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. 1 lb. \$3.50.

Bolgiano's "Millionaire" Lettuce

**BOLGIANO'S "TENDER and TRUE"
NEW LETTUCE**

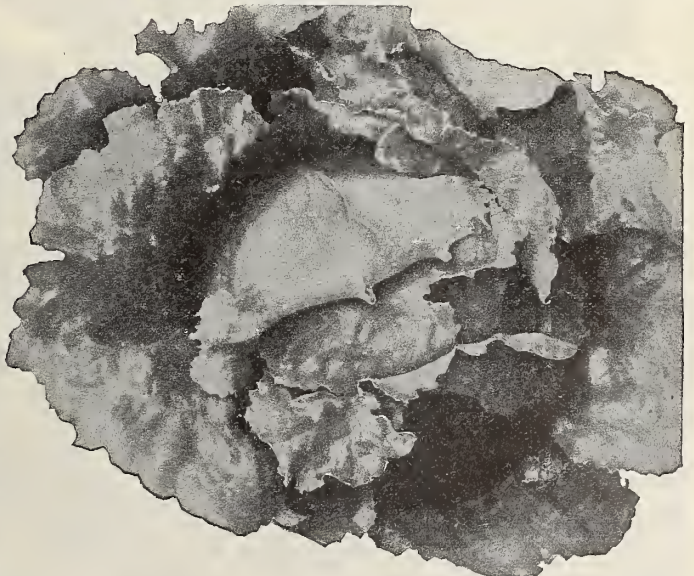

140. By crossing the "Millionaire" and the "Best Of All" Lettuces we have established, we believe, the most wonderful Summer Lettuce ever originated, Bolgiano's "Tender and True" Lettuce. This Lettuce produces great magnificent hard heads 12 inches across, compact and round, especially rich and creamy in flavor. The inner leaves are a rich golden green, beautifully blanched white and very tender. So solid are the heads they will not shoot to seed until cut open. We unreservedly recommend this new lettuce to all our customers, both Market Gardeners and those who grow for the home table, for we are confident it will delight and handsomely repay those who grow a crop of it. Pkt. 10c. Oz. 20c. 2 Ozs. 35c. ¼ Lb. 65c. ½ Lb. \$1.25. 1 lb. \$2.50.

Bolgiano's "Tender and True" Lettuce

**BOLGIANO'S "FROZEN NORTH"
NEW LETTUCE**

142. This new Lettuce is so good it will make your mouth water—its silver white leaves are as crisp and brittle as the finest celery, forms very large hard head 12 inches across and will not run to seed for an extra long time. "Frozen North" Lettuce will produce successful crops of tightly folded crisp heads, 6 to 8 inches in diameter during Spring, Summer or Autumn. In the hottest summer months it retains its crispness and mild flavor. It is very showy and inviting in appearance, the outer leaves are a soft bright green. As a home and market lettuce it is delicious and valuable, but it is too crisp and tender to ship long distances. Pkt. 10c. Oz. 35c. 2 Ozs. 60c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 lb. \$3.50.

**BOLGIANO'S
"BULLY GOOD" LETTUCE**

193. "Bully Good" Lettuce was a magnificent success from the very start, if you don't want to be completely won over to this grand new lettuce you better not try it; for once you try it, you won't be satisfied with any other lettuce for your 2d early or main Spring crop. No matter whether the market price is up or down there is always a market for "Bully Good" Lettuce. Those fine large solid heads—A full bushel market box is barely large enough to hold 18 of them—of a bright rich exquisite green; with a full solid rich golden yellow heart closely folded; crisp as ice; with a mild delicious flavor, do you wonder we have named this grand lettuce "Bully Good." The market Gardener with his pocket full of money, the Southern Grower with a big check from the Northern Cities and the Amateur Gardener with his neighbors beat to a standstill. Every one who grows for Market or eats "Bully Good" Lettuce will cheerfully admit it is worthy of its name. Pkt. 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

**BOLGIANO'S
"BEST OF ALL" LETTUCE**

131. This grand new Lettuce truly deserves the name "Best Of All" for it has certainly proven to be "Best Of All" Lettuces in our trial grounds. It matures just after "Millionaire" when planted early, but can be planted at any time. It is especially desirable for a Late Spring or Early Summer crop as it will not shoot to seed as early varieties often do. We have tried it in Spring, Summer, Fall and have even Wintered it out doors here at Baltimore. It is a sure header, good seller, excellent shipper, hardy and always reliable. Color is light attractive green. It makes large, compact, firm heads. The leaves overlap each other forming a beautiful, well-blanched head. We strongly recommend "Best Of All" Lettuce to our customers. Pkt. 10c. Oz. 20c. ¼ Lb. 65c. 1 lb. \$2.50.

Bolgiano's
New
"Indian Chief"
Watermelon.

"Indian Chief" Bolgiano's Remarkable New Watermelon.

172. Victory is sure for this grand new Watermelon. It has more successful qualities than any other melon ever grown. If you are grower of Watermelons, this new Melon offers you an opportunity to coin money, such as you have never had before.

"Indian Chief" is entirely distinct from all other varieties. It is a large, oblong, dark green Melon, with a thick netting all over it. The rind is thin but tough. The flesh is a bright, attractive red. The flavor is delicious, sweet and satisfying. It is very productive a perfect shipper, the quickest and best seller that has ever been placed on any market. As a table melon it always brings repeat orders. In fact as a first class melon it is ideal. Seed is limited, demand will be heavy, so order quick. Pkt. 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

Bolgiano's Cold Mountain Spring Watermelon. **New Variety.** Several years ago we were spending our vacation in the Mountains; during our absence one of the leading Watermelon growers, living about 100 miles from Baltimore, wrote us he had for a number of years been developing an extra, selected strain of Watermelon, and the result of his efforts had gone far beyond anything he had ever hoped to produce. Were we interested? He shipped us several samples, these came on boat to Baltimore 100 miles, then on railroad through the mountains for 250 miles. Reaching us in perfect condition after traveling 350 miles through rough country and roughly handled. These melons attracted the attention of everyone by their beautiful deep green color, stately size and excellent shape. We had them on exhibition, then took them with us back into the mountains. We put the Melons in a **Cold Mountain Spring**, and in a few hours we cut them. The Melons were in a perfect condition. "Red to the Rind," and entirely free from stringiness. The **Cold Mountain Spring Watermelon** is a winner as a shipper, table Melon and Money Maker. Our supply of seed is necessarily limited and only the seed produced by the originator. Pkt. 10c. Oz. 15c. ¼ Lb. 35c. ½ Lb. 60c. 1 lb. \$1.00.

The Best Watermelon Ever Planted.

S. B. Branley, Lake Co., Fla., writes: "Will you be so kind as to enter my order for 50 lbs. of Selected Cold Mountain Spring Watermelon Seed. No other variety will be planted here another year, and your firm will be called upon for about 250 lbs. of seed of this variety at Clermont, and the neighboring points will likely order the same amount. This is by far the best Melon we ever planted; so be sure and keep the seed pure and up to the standard."

Bolgiano's Early Black Beauty Egg Plant.

Bolgiano's Extra Early Black Beauty Egg Plant.

Two weeks earlier than any other Egg Plant.

100. 1. An entirely new variety and a splendid shipper. 2. A novelty of remarkable merit. 3. As large as the New York Spineless Egg Plant. 4. Two weeks earlier than the New York Spineless Egg Plant. 5. Fine flavor. 6. Most attractive appearance. 7. Plants branch freely near the ground. 8. Skin a rich, lustrous purplish black. 9. Satin gloss and rich coloring add greatly to the beauty of the fruit. 10. The intense, brilliant coloring is uniform over the whole fruit and does not fade or change to a lighter color at the blossom end. 11. The heavy leaves which attach the fruit to the stem are bright green, making a beautiful contrast with the fine dark color of the fruit. 12. Thoroughly free from spines or thorns. 13. Fruit sets freely. 14. Coming two weeks earlier than the New York Purple Egg Plant they readily bring double the price. Pkts. 5c and 10c. Oz. 25c. ½ lb. 90c. 1 lb. \$3.50.

Bolgiano's Florida High Bush Egg Plant.

99. **The Florida High Bush Egg Plant** has proved of the greatest value to the Southern truckers and shippers. It has been grown in Florida for the past three or four years. It is remarkable for its vigorous growth and productiveness, is very hardy and will stand more cold weather than the New York Improved. The hot sun does not blight the blossoms. The plant has a characteristic leaf, unlike any other Egg Plant we know of. It grows from 3 to 4 feet high, erect and sturdy, free from thorns. Fruit is large, oblong in shape and purple, though not so deep a color as the New York Improved. It resists drought and wet weather to a wonderful degree, partly on account of its strong upright growth. It stands the cold weather better, and is the only Egg Plant that stands shipping from this section to the Northern markets under almost all circumstances. It is of a large size, first class shape and superior flavor. Its shipping qualities are the very best. It brings the highest price in the Northern markets, keeping its freshness and condition much longer than any other variety. Pkts. 5c and 10c. Oz. 25c. ½ lb. 85c. 1 lb. \$3.00.

Extremely Early "Cream and Honey" Sugar Corn.

"CREAM AND HONEY"

Bolgiano's New Extremely Early Sugar Corn

1182. The name of this new luxury among table delicacies immediately carries the mind back to the "Promised Land" flowing with "Milk and Honey." Our efforts to bring you a rare treat have never been so abundantly rewarded as they are in our successful production of this surpassingly delicious flavored Sugar Corn. Its good qualities are so apparent that we cannot do justice to them with pen and ink—if you appreciate and enjoy the best things the garden grows, then start the season with a patch of "Cream and Honey" Sugar Corn. Plant it the same time you do Extra Early Adams Corn; although it is a pure and true Sugar Corn it is so wonderfully hardy it will stand the hard knocks of early spring. Rich, delicious, sweet flavor, beyond comparison with any other Sugar Corn, earliest of all the Extra Early Table Corns and of wonderfully fine quality. Grows 4 feet high; has ears 5 to 7 inches long and 2 to 3 ears to the stalk, can be planted quite close in the row. Pkt. 10c. Pt. 20c. Qt. 30c. 4 Qts. \$1.00. Pk. \$1.75.

Bolgiano's White Cob 65-Day Corn

The Handsomest Early Corn That's Brought To Market

1049. You will be thoroughly persuaded after one trial of this Extra Early Large Roasting Ear Corn that you cannot afford to let a single season pass without planting generously of this excellent Corn. White Cob 65-day Corn is the result of carefully selecting the earliest and largest ears of Gillespie's Early Neck Corn, and crossing these with the earliest and best varieties of Sugar Corn. The result is a corn of fine quality, of 12 to 14 rows and reliable no matter what weather it has to stand. Being large, extremely attractive, early, tender and sweet, it quickly sells at money making figures. Very profitable as a Fall crop when planted in mid-summer. Ear 5c. Doz. 40c. 100 Ears \$2.50. Bolgiano's "New Victory" Celery

The Very Best Winter Celery

81. An excellent winter Celery. We have grown this seed in America for several years and find by careful experiments it loses its solidity while seed we have grown in France remains as solid as the finest stock of French Golden Self-Blanching Celery. As a result we have grown our entire supply for this season in France and we can recommend it to you as the most solid and most profitable winter celery. Our French grower, carefully selects by hand each individual plant in transplanting and only the absolutely solid plants are retained, the rest are thrown away. Again when he puts the full grown plants in Kilns for Winter, each individual plant is gone over and only the solid are put in the Kilns. Again in the Spring before putting the plants in the bed where the celery is to go to seed only the absolutely solid plants are used. We are sure our stock of French Grown "New Victory" Celery is one of the Best Winter Celeries on Earth. It has a great amount of heart, is heavier, stouter and thicker than many of its rivals. It is the most economical Celery yet introduced, every particle being solid, crisp, and of a delicious flavor. Its beautiful, large golden heart and compact growth make an ornament hard to surpass. It is a remarkable keeper, maintaining its firmness as late as May. Critical market gardeners pronounce it to be of the finest quality, best keeper and most salable Celery they have ever raised. It is raised for market by December. Pkt. 10c. ½ Oz. 20c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$2.00. Lb. \$3.50.

Bolgiano's "Sweet-Nut" Celery

Bolgiano's New Celery "SWEETNUT" is the most delicious, sweet, nutty, crisp

76. For home gardens and nearby markets, Bolgiano's "Sweetnut" Celery has been developed by one of our careful French growers for many years. The most rigid selection had to be made to get this strain thoroughly fixed, but this season we are delighted to say after two years of exhaustive testing in our Test Gardens we can offer our friends and customers a Celery that is surpassingly delicious. It is absolutely solid, a most excellent winter keeper of vigorous sturdy growth, making fine large, solid stalks, with a large, full creamy-yellow heart. It is necessary to blanch it by earthing up or storing it for the winter. It blanches to a beautiful creamy-yellow. Brittleness is one of its most desirable features. Pkt. 10c. ½ Oz. 20c. Chinese Giant Pepper

226. Double the size of Ruby King Pepper and equally as mild. By careful and numerous experiments we have found this enormous mild red pepper to be a money maker of great value to the trucker. The monstrous fruits are of a thick, blocky form and of the most brilliant glossy scarlet. They grow four to five inches broad at the top, and about four to five inches in length and are divided into four or more large ridges and when ripe, they are indented at the bottom end. It is early, productive, and quickly sells on account of its enormous size. The plants are vigorous, stocky, and grow about two feet in height. They are well branched and thickly set with the largest Peppers frequently half a dozen fruits will touch each other as if in a single bunch; the strong growth of the plants and abundant foliage enable them to mature the large number of fruits almost as early as the Famous Ruby King. Livingston's Globe Tomato

264. In shape it is distinct from all others, being a beautiful globe, with quite a good percentage of elongated (stem to blossom) fruits. It is among the first to ripen. Fruit of large size, and good marketable size is maintained throughout the season; always smooth, firm-fleshed, and has very few seeds. Ripens evenly through and through; a fine glossy rose in color, tinged with purple. The plant is always loaded with fruit, as it has joints at frequent intervals and each joint produces large clusters of from 3 to 7 fruits. Especially adapted for slicing or eating from the hand as the flavor is very delicate and agreeable. Pkt. 10c. Oz. 25c. 2 Ozs. 45c. ¼ Lb. 85c. Lb. \$3.00.

June Pink Tomato Another Great Money Maker

268. **THE JUNE PINK TOMATO.**—In habit of growth is similar to the Earliana. The plant is neat and compact, branching freely with fruit hanging in clusters of from 6 to 10 fruits both in the crown and at the forks of the branches. Under exactly the same conditions as given Sparks' Earliana and Chalk's Jewel, the **June Pink** yielded as much fruit as either, and the vines after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as Spark's Earliana and quite 10 days to 2 weeks ahead of Chalk's Early Jewel. The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green core. The fruit will average 2¾ in. to 3 in. in diameter, from 2 to 2½ in. in depth. The skin is reasonably tough so that it is excellent for shipping purposes. In color it is a bright pleasing pink, and in markets where a pink tomato is desired will bring 25 per cent. more in price than any red variety. It has the further quality, making it especially desirable for private use, continuing to bear and ripen fruit up until frost. Pkt. 10c. Oz. 20c. 2 Ozs. 35c. ¼ Lb. 65c. Lb. \$2.50.

J. T. Wafford, Dade Co., Fla., writes: "The Duke of York Tomato bought of you are the truest ones I have ever seen. I want them another year sure."

Bolgiano's Best, The Great B. B. Tomato

284. This tomato is unequalled. It has every good quality pertaining to the Tomato and avoids all faults of other sorts. One of the smoothest most solid, heaviest and most handsome Tomatoes grown. It suits gardeners, canners and shippers, who are delighted with its faultless fruit, which fills their wants in every particular. The B. B. is as solid as an apple, has no core and the flavor is excellent. It weighs more pounds per bushel than many other sorts which proves its solidity; has a beautiful red color, outside and inside, and the fruit is quite large. There is no need of a field of poor Tomatoes when one dollar will buy enough seed to supply plants for one acre. Used successfully for early and late crops; always sells at the highest prices. Pkt. 10c. Oz. 15c. 2 Ozs. 25c. ¼ Lb. 40c. Lb. \$1.50.

Chalk's Early Jewel Tomato

287. This excellent new Tomato has attracted the attention of market gardeners and shippers on account of its fine quality, its wonderful productiveness; earliness and large size. Chalk's Jewel is not quite so early as the Earliana, or so large as the I. X. L., but size of the fruit continues very large almost to the last picking. The vines are fairly loaded with fruit during the entire season, 75 of which will fill a ½ bushel basket. The fruit is very solid and deep through measuring 3⅞ inches across by almost 3 inches in depth. Color is bright scarlet and it ripens up to the stem, without cracks or green core. It is an excellent shipper. The climate in which we grow our tomato seeds makes them earlier, freer from disease and blight, and more productive than seed you can procure from any other source. Try them for yourself. Price, Pkts. 10c. Oz. 20c. ¼ Lb. 60c. Lb. \$2.00.

New Klondike Carrot Produces Money Crops for Truckers and Market Gardeners.

8. We take pleasure in introducing this New Carrot to our friends and customers. We have been developing "Klondike" Carrot for a number of years, and have succeeded in producing a remarkably handsome, uniform, tender, medium long Carrot of a most attractive and beautiful deep rich orange red color. It is remarkably smooth and shapely, bred as carefully as a race horse; very tender, without core and of a delicate flavor. It is a model in shape and size; grows 6 to 7 inches long by 1½ inches in diameter, the healthy tops are small and the Carrot tapers gracefully to a single small tap root. No stock has ever been selected with greater care or received more expert attention than has this magnificent New Carrot "The Klondike." We believe you expect us to develop and produce for you the finest stock of seeds in the world, and it was with this idea constantly before us that we attempted and so wonderfully succeeded in producing this—the truest, purest, most attractive, most salable market Carrot that has ever been offered the Critical Market Garden Trade. Bolgiano's "King" Carrot

91. We name this excellent new Long Orange Carrot "**King**" Carrot because it is **best of all** long Carrots. In Germany it has a wonderful reputation among truckers and market gardeners, and only by paying a very high price were we able to secure any for our customers. The flesh is deep in color, tender and delicate in flavor. It is so much better than the regular Long Orange Carrot that we are sure when "King" Carrot becomes thoroughly known it will drive Long Orange Carrot out entirely. Being entirely new stock, the seed has been saved with the greatest care and the Carrots are uniform in shape, of fine texture and almost entirely free from core usually found in Carrots. It produces the most attractive specimens in deep soils. Oz. 10c. ¼ Lb. 30c. ½ Lb. 50c. Lb. 90c.

Bolgiano's "Pride of the Market" Carrot

This Beautiful, shapely half-long Carrot will come almost as early as the Ox-Heart.

It is the most popular Carrot that grows.

64. It is the most perfect, finest colored, most tender and best flavored Carrot that was ever placed in your hands. Pride of the Market because it is the best. You must have the best of everything. In Carrots, to get the best we select roots that resemble our ideal, and from them grow seed for you. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 25c. ½ Lb. 40c. Lb. 75c.

Bolgiano's Hollow Hub Parsnip

219. As we predicted several years ago, when we first introduced the Hollow Hub Parsnip, it has taken the leading place among Parsnips. Its merits alone have brought it so prominently to the front. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 25c. ½ Lb. 40c. Lb. 75c.

Bolgiano's "Great Giant" Salsify. 275. By far the largest, smoothest, most tender Salsify ever sold to the trucker. Its delicious flavor and attractive appearance bring the buyers and hold their trade. It easily outsells every other Salsify. for "It is the Best." Pkt. 10c. "Best of All" Kohl Rabi. 152. This exceptionally valuable new Kohl Rabi will please many friends. It combines the quality of the finest varieties known. It is round like an apple with fine smooth skin. The leaves which are very few, stand erect enabling the grower to plant closer and helps him in bunching. The flesh is unsurpassed in tenderness, purity and delicious flavor. "Best of All" Kohl Rabi will not run to seed in frosty weather and remains unchanged in delicacy of flavor. It is equally valuable for forcing or open ground culture. Pkt. 10c. Oz. 35c. 2 Ozs. 60c. ¼ Lb. \$1.00. Lb. \$3.50.

Extra Early Purple Top Milan

315. Earliest turnip in cultivation; a week sooner than any other. Flat, smooth, of medium size, with bright purple top and few leaves. Flesh white and choice. Adapted to spring or fall. A good keeper. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

Improved Curled Long Standing Spring Spinach

1106. Of a perfect, rich, attractive green color, distinct from all other varieties, and easily recognized. Its growth is abundant, and it will retain a fresh, luxuriant appearance for three or four weeks after the most stubborn seeding varieties have become yellow and gone to seed. **"Tip Top" White Tip
Bolgiano's Beautiful New Radish**

9. We challenge the World on this wonderful and useful distinct new stock of Radish—its beauty and attractiveness are almost beyond description. Results are now produced by hybridizers who patiently watch, wait and work hand in hand with Nature that seem almost miraculous. Nature's wonderful artists have painted the tops of each one of these delicious crisp, tender, round little Radishes a brilliant carmine red and the bottom a beautiful snowy white. The contrast is startling and yet delightfully pleasing. If you have ever hoped for an ideal stock of extremely Early Brilliant Scarlet Globe Radish with a beautiful White Tip you will find the "Tip Top" White Tip Radish in beauty goes far beyond your greatest expectations. It certainly is a thing of beauty. Pkt. 5c. Oz. 10c. 4 Ozs. 30c. Lb. \$1.00.

**Bolgiano's Delicious
New Strawberry Radish**

258. A delicious crisp, brilliant red radish. The very earliest, often ready for market in less than three weeks. It is a perfect globe shape and so uniform that all the radishes look like they have been made in the same mold. If you have a home garden nothing will please you more, or give you quicker returns for your efforts than this beautiful Radish. If you grow for market no matter how many of these attractive Strawberry Radishes you bring to market, you can always sell every bunch of them, at prices that will both please and pay you. As a frame Radish it is the best of all because it grows short tops, its brilliant red color attracts and draws the customers, who pay high prices for the earliest vegetables. Pkt. 5c. **Bolgiano's Famous
Brilliant Ruby King Radish**

230. **Bolgiano's Extremely Early Ruby King Radish.** "KING OF ALL," Extra Early Scarlet Radishes would be an appropriate name for this most excellent Radish. We claim without fear of challenge, Bolgiano's Extremely Early Ruby King Radish is (without a single exception) by far the MOST BEAUTIFUL, Extremely Early Scarlet Button Radish that has ever been brought to any market. The color is a bright, glossy, shining scarlet and when the dust or soil is washed from it, it fairly glows in its brilliant color. No Radish on earth will mature as quickly as the Ruby King, and have such small foliage. It will stand forcing without becoming in the least pethy. The flesh is delicious tender, juicy and mild. Equally good for open ground culture as for forcing. It is at its very best when permitted to grow quickly. We have offered this Money Making Radish for 7 years and each year our sales so marvelously increase we feel satisfied that the wideawake Market Gardeners are leading the very earliest markets all over the country with Ruby King Radish. We again place Bolgiano's Extremely Early Ruby King Radish at the head of all Radishes Pkt. 5c. Oz. 10c. 2 Ozs. 15c. ¼ Lb. 20c. ½ Lb. 30c. Lb. 60c.

**The Earliest and Best Long White Radish
Bolgiano's Pearl White Forcing Radish**

249. In our trial grounds, this most attractive, appetizing, cool, crisp Radish, matured in the remarkably short time of 13 days. In size and form it is a duplicate of our famous Glass Radish, but having a clear, pure white, waxy appearance from top to bottom; is perfectly sound and will remain so longer than any other White Radish. The Early White Vienna, or Lady Finger Radish, does not compare with it. Any Trucker once planting this Radish, will undoubtedly use it to the exclusion of all other early white varieties. Pkt. 5c. **A Grand Fall and Winter Radish
Short White Chinese Celestial Radish**

256. **New Short White Chinese Celestial Radish.** In 1897 we placed this very attractive White Radish in the hands of our truckers, and since then we have never had seed enough to supply the demand. It is solid and juicy as an apple; pure white flesh and delicious flavor—a very choice variety. We never sent out a Winter Radish that gained so much popularity in so short a time. Sown any time after July 1st to the middle of August, it will keep all Winter in prime condition: mild in flavor, brittle, never gets woody as do most winter varieties. Market gardeners have found it to be a splendid seller and have always made money with it. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

"Plucky Baltimore" Potatoes.

Gray's "Mortgage Lifter" Potato

Mr. Gray has grown several bumper crops of Gray's "Mortgage Lifter" Potatoes; he says they were so large they reminded him of young pigs, and they were certainly splendid sellers at high prices. We wish every one of our customers who grows potatoes could talk with the growers who have grown a crop of this Grand New Potato. It certainly is something to marvel at, and yet if all our customers realized its great value our limited supply would not be a drop in the bucket. It is an early variety, maturing a little later than the Crown Jewel, it is pure white, large bandsome size, distinctive in shape, being long, well filled and tapering at both ends. Eyes are strong and well set, not too deeply however,

It certainly is a beauty and one grower says they grow so large it don't take many to fill a barrel, no culls, and by the carload they brought over \$20 a car more than the best Potato on the market. Mr. Prevatt, of Seville, Fla., after giving this Grand Potato a thorough trial, orders eight barrels in the place of the one he planted last year. Mrs. Wm. G. Harvey, of Roslyn, Md., calls it the "Farmers Favorite." Among other names it was called are "Maryland Beauty," "Money-Maker," "Virginia Wonder," "The Excelsior," "Gold Standard," "Silver King," etc. We finally selected Gray's "Mortgage Lifter" as suggested by Mr. Jas. T. Gray, of Grange, Md., because Mr. Gray actually paid off a good size mortgage on his farm with the proceeds from the Wonderful Crop of this Grand New Potato which he grew this year and we hope that the mission of Gray's "Mortgage Lifter" Potato will not be ended until it has helped to clear many more farms of their mortgages. 1 lb. 30c. 3 Lbs. 75c. by mail postpaid. Bolgiano's "Plucky Baltimore" Potatoes

Bolgiano's Wonderful New Prolific Extremely Early Seed Potatoes.

1. Ten days earlier than the Red Bliss Triumph.
2. **Snowy White Potato**, about the size and shape of the Houlton Early Rose.
3. Yields from 250 to 350 bushels per acre of most attractive, marketable Potatoes.
4. Always brings 50c more per barrel than the fanciest stock of any other variety on the market.
5. The quality is delicious, the entire supply is quickly taken up by the most critical hotel trade in New York and Boston.
6. Young, full, pure blooded stock, not susceptible to disease.
7. Seed grown in the most careful manner.
8. If you are a Potato grower and you once saw the **Plucky Baltimore Potato**, you could not help but buy it. Its attractive shape, pure white color and in fact its general appearance speaks for itself, far better than we can write about it.
9. We have the entire supply of this **Grand New Potato**, and that's not many barrels, so order right now, or our supply will be exhausted.
10. We can recommend the **Plucky Baltimore** as the best Potato that has ever been sold the truckers. Extremely attractive, extraordinarily early, enormously productive, excellent quality, pure white and a Big Money Maker.

I Will Grow No Other.

Chas. S. Gleason, St. Mary's Co., Md., writes, "Your 'Plucky Baltimore' Potatoes are the earliest I have ever grown, it is a good yielder, of excellent quality, as well as a good keeper. I will grow no other variety."

Does In Bad Season.

On Aug. 22nd, 1909, Mr. James T. Crew of Kent Co., Md., writes as follows. "Although this Season was far from a favorable one for potatoes, I planted one bag of your 'Plucky Baltimore' Potatoes from which I got 175 three peck baskets as fine potatoes as I ever saw."

Bolgiano's Prosperity Potatoes

The Best Second Early and Main Crop Potato on Earth.

This Magnificent Potato has become the most popular middle crop potato of the newer varieties, and certainly one of the most worthy. Yields great crops of even, fine, smooth, large Potatoes, even under the most unfavorable circumstances, and can be relied upon to bring in good money. It is undoubtedly the handsomest large potato ever produced, and will outyield any other Potato, and practically every Potato is of Marketable size. It is ahead of all others in yield and smoothness, and is of excellent quality. Every farmer will, after giving this most wonderful Potato a trial, discard every other kind and plant nothing but Bolgiano's Prosperity Potato for his main crop. It grows a very strong, upright top, with dark colored stalks and purple blossoms, and is very little affected by drought, blight or bugs. The flesh is as white as snow, and cooks dry and mealy. The eyes are even with the surface, the skin white, with rich yellowish-creamy cast, and considerably ruffled or netted. This Potato will astonish old Potato-Growers in its abundant yields and fine qualities, and every person who is ambitious to make the most money out of his crop cannot afford to let this year pass without obtaining seed of our crop of New Prosperity Potato. 1 lb. 25c. 3 lbs. 75c. by mail postpaid. 2 Bushels Produced 85

Miss Mary E. Reynolds, Member Board of Lady Managers Eudwood Sanitarium, Towson, Baltimore County, Md., writes: "Permit me to express the satisfaction of those in charge of the Sanitarium at the results attained from the use of your seed potatoes. From two bushels secured from you and planted on the farm of this institution a crop of 85 bushels was realized. We think this to be excellent evidence of the fruitfulness of your carefully selected stock of seed potatoes."

Planted 5 Barrels Shipped 100 Barrels

W. L. Mill, Volusia Co., Fla., writes: Have just finished shipping my crop of Prosperity Potatoes. They beat anything I have ever seen for turning out fine large smooth potatoes. Planted 5 bbls. of the "Prosperity" and shipped 100, making an average of 20 to 1. Shall want more, of them another year.

Bolgiano's "Prosperity Potatoes"

Produces Big Crops Bad Seasons

Wm. Butler, Grant County, Ind., writes: "Bolgiano's Famous Prosperity Potato is the best potato I ever grew: its cooking qualities cannot be beat. It is the best yielder, and does better on poor ground than any other variety; it does better year after year than any other variety, wet or dry season, and you are sure to make a crop if you plant Bolgiano's Famous Prosperity Potato. The big stalky vines are a good thing in wet weather to hold the weeds down, after they are laid by, and are a good thing in dry weather, to hold the moisture in the ground."

Mammoth Prize Taker Onion

Its Mildness of Flavor and Tenderness are Unequaled Even By the Bermuda Varieties. In Size, it is not Excelled by the Enormous Varieties From Spain.

205. Eight hundred to one thousand bushels to the acre, and a single specimen weighing as much as 6 lbs. 2 ozs., are some of the things this handsome Globe Onion will produce. It has a bright, clear, straw color, and grows a perfect globe shape. Is by far the handsomest, most productive, most profitable, and best of all Yellow Globe Onions. Large Onions can always be raised in a single season directly from seed. It has always brought much better prices than any other Onion; in market it never fails to attract attention on account of its beauty; on the city fruit stalls it has completely taken the place of the large Spanish Onions. The Prizetaker Onion is gifted with strong drought-resisting ability, and we consider this one of its strong merits. People who wish to make money should plant the Prizetaker Onion. It is admitted by the most critical onion growers to be the largest, finest flavored, and most superior Yellow Globe Onion under cultivation. Pkt. 10c. Oz. 15c. ¼ lb. 35c. ½ lb. 65c. 1 lb. \$1.25.

Druid Hill Park Velvet Green Lawn Grass Seed Will Produce a Beautiful And Permanent Lawn In Six Weeks

It is Better Than Any Other Lawn Grass Seed in the World. It is Used By the Leading Landscape Gardeners in the United States

Celebrated from Florida to Maine for its quick growth, deep velvet green color and wonderful endurance, through hot, dry spells. Having made the selection of fine lawn grasses our pride for many years, we are able to offer lawn seed superior in every respect and acknowledged by all who have used it to be the best.

This choice mixture is the best for making beautiful and permanent lawns. It is composed of grasses which are especially adapted for the purpose of producing lawns which retain their rich color and soft, velvet green appearance throughout the entire spring, summer and fall. It is valuable for the formation of lawns in places exposed to the sun, also to partially shaded places where it is difficult to produce good sod. See that the shaded places and bare spots are thoroughly worked and enriched with sheep manure before sowing seed. In making up this mixture we are extremely careful to use only the very best quality seed, which has been re-cleaned the light seed and chaff having been blown out, thus securing the highest grade mixture it is possible to obtain, and seed that will quickly grow. One pound will sow 20 x 20 feet, 10 pounds will sow 50 x 150 feet, 60 pounds will sow an acre. 30 pounds measures 1 bushel. $\frac{1}{4}$ Lb. 8c. $\frac{1}{2}$ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.00. "Legal" bushel of 14 Lbs. \$2.80. Measured bushel of 30 Lbs. \$6.00. If to go by Mail, add 8c per pound.

Prettiest I Have Ever Seen.

Mrs. J. M. Adams, 105 Roland Avenue, Roland Park, Baltimore Co., Md., writes: "Gentlemen: My Lawn, seeded this Spring with your Druid Hill Park Velvet Green Lawn Grass Seed is the prettiest I have ever seen, my neighbors say it looks like it has been seeded 5 years. I cheerfully recommend your seeds to all my friends."

Best on New Land.

Mrs. H. H. Samuels, 3318 Park Heights Avenue, Baltimore, Md., writes: "The grass on my lawn raised from your Druid Hill Park Lawn Grass Seed is the best I have seen grown on new land."

It Did Splendid.

W. H. Bell, Rockingham Co., Va., writes: "The Druid Hill Park Velvet Green Lawn Grass Seed which I bought from you last Spring did splendid."

Shady Nook Lawn Grass Mixture

A popular mixture of grasses best adapted for sowing in shady places where ordinary grasses will not thrive. In nearly all lawns where there are trees, there will be found bare spots which can be made green and bright by using this mixture, if the shaded places and bare spots are thoroughly worked and enriched before sowing seed. $\frac{1}{4}$ Lb. 10c. $\frac{1}{2}$ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.00. None Quite So Good.

Mrs. C. Green, of Old Orchard, Maine and Baltimore, Md., writes: "There is no Lawn Grass like Bolgiano's Druid Hill Park Velvet Green Lawn Grass, and my neighbors' round about here agree with me. I run short of lawn seed last year, and sent to Boston for some, but it was nothing like as fine as Bolgiano's; in fact, I am going to sow some of yours in place of that next year."

Henry Fauth, the famous gardener, wrote: "I have found your Lawn Grass Seed to be the purest, cleanest and best in the market. It withstands severe droughts and retains its verdure throughout the entire season. I have used it for thirty-five years, and our large and beautiful lawns here at 'Inglestide' have always been greatly admired."

White Dutch Clover

This is the best Clover for lawns, as it forms a close herbage and remains green throughout the season. Is also a valuable mixture with grass seed for pasture. Sown in the spring at the rate of six pounds per acre when sown alone; one-half the quantity when sown with other grass. 1 Oz. 5c. $\frac{1}{4}$ Lb. 10c. $\frac{1}{2}$ Lb. 15c. 1 Lb. 25c. 5 Lbs. \$1.15.

Permanent Pastures

We prepare ten special grass and clover mixtures for hay and permanent pasture, suitable to every variety of soil. For full particulars see page 45.

"Wizard Brand" Pure Pulverized Sheep Manure

This is without exception the very best dressing for lawns. The effect is immediate and lasting. It is the only manure that is absolutely free from weed seeds. It contains no dirt, straw, leaves or bedding of any kind, being secured from the cemented floors of the Chicago stock yards. It is three times stronger than cow manure. Contains nitrogen, phosphoric acid, ammonia and potash in liberal proportions. It is also unequaled as a fertilizer for the vegetable garden, flower garden, house plants, trees and hot houses, etc. It is also dissolved in water and used as a liquid to nourish all kinds of growing plants. Be sure to give it a trial. 2 Lbs. 15c. 5 Lbs. 25c. 10 Lbs. 40c. 25 Lbs. 75c. 50 Lbs. \$1.25. 100 Lbs. \$2.00. 200 Lbs. \$3.50. 2,000 Lbs. ton, (in 100 Lb. bags.) \$30.00.

Bolgiano's Bone Lawn Fertilizer

Stable manure should never be used as a top dressing on lawns, for it always contains large quantities of weeds. We have therefore had prepared for us a special lawn fertilizer which is clean and high grade in every respect, and free from disagreeable odors. It produces a rapid and rich green growth of grass, and should be sown broadcast in the spring or fall. 10 pounds for 300 square ft; 500 to 1,500 lbs. per acre. ASPARAGUS ROOTS, Etc. Plant either in Spring or Fall

No effort put forth in the garden will bring more pleasure and satisfaction than an established Asparagus bed, if this is thoroughly prepared according to the following directions. A bed 20 by 50 feet, set with 1000 two-year-old roots, will last for years and furnish an abundance.

DIRECTIONS. Select a good sandy loam, plow the ground as deep as possible, dig out 12 inches deep, put in a layer of 4 inches of good, strong stable manure, and press down; then fill in with good, rich, black loam to the top of the bed; sow on top of the bed 100 lbs. of Kainit to 1000 square feet of bed; incorporate this thoroughly to depth of 3 inches. After leveling bed off even, stretch a line the length of bed 9 inches from the edge, and with a spade cut a furrow 8 inches deep, set a row of plants along the trench 9 inches apart, with the crowns of the roots 2 inches below the surface, then cover up, make even and plant other rows 9 inches apart.

437 We supply Packets of all Beans at 5c and 10c each. Add 8c per Pint, 15c per Quart extra by mail. One Quart to 100 Feet of Drill, Two Bushels to the Acre.

Culture. Beans are somewhat tender, but it often pays to take some risks. Plant in warm, loamy soil at the beginning of settled, warm weather in spring, and at intervals for succession until August. Rows may be made 2 feet apart, and the Beans planted not more than 2 inches deep and several inches apart in the drills, or 3 or 4 Beans in hills 6 to 8 inches apart. Cultivate and hoe frequently, always, however, when the vines are perfectly dry. In hoeing draw the soil up towards the rows or plants. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

1040. **Early Leviathan Pole Lima Beans.** Every grower, either private or for market should try this wonderful early and enormously productive large Lima Bean. The best variety of Pole Lima for general use. This delicious vegetable is denied many would-be growers on account of the length of season required to mature it, the early frost coming on just as the crop is ready to pick. This sort is at least one week earlier than any large Pole Lima yet offered and fully two weeks earlier than most, consequently it will prove a boon to thousands of growers. Earliness is often obtained at a sacrifice of other features, but in this variety we claim superiority, not only in this respect, but in size of bean and pod and enormous productiveness. Pt. 18c. Qt. 30c. 4 Qts. \$1.00. Pk. \$1.85. Bus. \$7.00.

1041. **Dreer's Improved Pole Lima.** Outyield any Lima Bean ever offered. Each pod contains from 2 to 6 delicious Beans, so completely placed that they make indentations in each other. Pods are produced on the vines in great clusters. The yield is continuous and abundant. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.60. Bus. \$6.00.

1042. **Siebert's Early Lima.** Pods long, thin, and easily opened. The green Beans are very large, handsome and delicious quality. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1043. **Jersey Extra Early Lima.** Is 10 days to 2 weeks earlier than any other Pole Lima. Except the Leviathan. The beans are exceptionally tender and delicious. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1044. **Carolina or Sieva Beans.** Very early and productive. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1045. **Extra Large Lima.** Large white Bean; very tender; equally good in Winter if soaked 10 hours before cooking. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$5.00.

1046. **Fords Mammoth Extra Large Lima Bean.** Its pods are large in size, containing from 3 to 8 Beans. They are unsurpassed in quality and productiveness. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

1047. **King of Garden Lima Beans.** Outrivals all other Pole Limas. Its vine has a luxurious growth, which abounds with enormous pods, often from 5 to 8 inches long, and filled frequently with 5 or 6 perfect Beans to a pod. These Beans in their green state are large and luscious, but when dry shrink to the ordinary size. It is large, early and prolific and unequalled in quality. Pt. 15c. Qt. 25c. 4 Qts. 85c. Pk. \$1.55. Bus. \$6.00.

Beet

BETTERATÉ
Remolacha
Salatrube

Our Beet is carefully grown from the very best stock seeds in the world. In addition to this, we take out of the ground each Beet and examine it carefully; if the color is not a fine dark red, and if it is not perfect in shape, and if it is late in maturing we will destroy it, as we only save our seed from as near perfect roots as it is possible to grow.

Culture. Fibrous loam, well-drained and well-enriched, will raise good Beet crops. For early table Beets, have drills 16 to 20 inches apart, and sow the seed about 1 inch deep, as early as the ground can be put in good shape. Or seed may be sown under glass four weeks sooner, and the young seedlings transplanted to open ground, to give an extra early crop. Give thorough and clean cultivation, and thin the plants to stand 3 to 4 inches apart in the rows. For succession sow at intervals until middle of July. For the earliest sowings a light dressing of nitrate of soda, say 100 pounds per acre, will sometimes work wonders.

295. **"Bon Fire" Bolgiano's New Early Beet.** These beets develop in a remarkable short time. (Specialty, see page 8.) Pkt. 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.25.

12. **American Beauty Beet.** The skin and flesh of "American Beauty" Beet are both a deep rich blood crimson color. It matures just after the Eclipse, has a most beautiful form being a little deeper than round, medium in size, generally about three inches in diameter, has a remarkably smooth surface and a small tap-root. Pkt. 5c and 10c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

18. **Bolgiano's Deep Blood Beauty Beet.** The most popular market gardeners beet ever introduced (Specialty, see page 8.) Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

115. **Early Model Beet.** This is a fine selection of blood-red Beet, extremely smooth and of symmetrical growth, rich color and desirable shape. It makes a rapid growth and matures very early. The shape is nearly round and color of flesh a rich blood red. In quality it is most excellent, being sweet, tender and free from coarseness. The tops are quite small, making it a good variety for forcing in hotbed. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

19. **New Royal Red.** This grand Beet is really worth its weight in gold on account of the very satisfactory crops it grows and its great selling qualities. It is handsome in shape, a little deeper than round. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

3. **Early Ox-Blood. 6 Reasons why we introduce this new Beet.** 1st. It is extra dark blood color from end of its tap root to top of its short graceful leaves. 2d. Early as the Crosby Egyptian. 3d. CABBAGE SEED

High-Bred American-Grown

Will Produce the Best Crop You Have Ever Grown

CHOU. *Berzo de Repollo.* 'Kobl.

Pkts. Ozs. & ¼ lbs. Delivered Free, but add 8c to Lbs. One Oz. will produce about 2,500 plants. ¼ Lb. to transplant for one acre.

Culture. Soil for Cabbage should be rich and heavy loam with good drainage. On such a soil, with an abundance of stable Manure, excellent crops are sure to be grown. For early spring, sow in fall, not too early, or the plants are liable to bolt in the spring, instead of heading. In a month the plants will be fit to transplant to cold frames where they are wintered, taking care in planting, to set the young plants down to the first leaves. Transplant in spring as soon as the ground can be worked, setting the plants 2 feet apart one way and from 12 to 18 inches the other, according to the variety. For late or winter crops, the seed is sown in May, and the plants set out in July. In this case they are set in rows 2 by 3 feet, so as to work them with a horse and cultivator. To destroy the green worm, an experienced grower says: "Take one ounce of saltpeter and dissolve it in 1 quart of water then take a short-handled whisk-broom dip it in the solution and sprinkle the plants well. One application is sufficient, unless the stuff is washed off by heavy rains. The liquid, being perfectly clear, never colors the cauliflower or Cabbage heads."

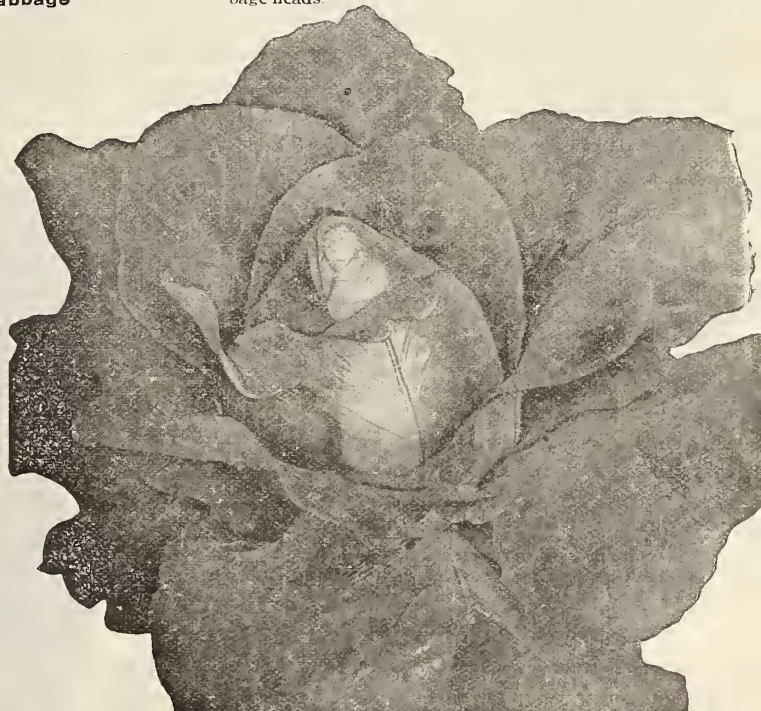

The Charleston, or Large Wakefield Cabbage

Extra Early Cabbage

No vegetable is of greater importance to the market-gardener than the Cabbage, and to many growers the success or failure of this crop means gain or loss for the year. Cabbage seed therefore, is the last seed in the list to buy because it is cheap. Much of the seed sold at a low price is imported from European Countries where, owing to their climate, it produces large quantities of seed; but it is practically worthless in America. We exercise exceptional care in growing and selecting our Cabbage seed. It is all high-bred American-grown, except such varieties as should be grown abroad to get the best results, such as the Danish Ball Head.

29. **Extra Early Pilot Cabbage.** Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.
30. **Early Jersey Wakefield Cabbage.** *Bolgiano's Selected Stock.* While this is not so early as Bolgiano's Extra Early Express Cabbage, it will be found to be the very best conical headed sort to come in immediately after it. It heads up remarkably hard and solid, with but few outside leaves, which are unusually thick and heavy enabling it to stand cold weather without injury when carried through the winter, in the open ground in the South, or cold frames in the North. Pkts. 5c. and 10c. Oz. 15c. ¼ Lb. 50c. Lb. \$1.50.
32. **The Charleston or Large Wakefield.** The Best Large Early Cabbage. This is the largest Early Cabbage, bred from the Early "Jersey" Wakefield, to meet a demand for a larger heading sort. It possesses all the valuable characteristics of the parent, with the advantage of the heads being 50 per cent. larger, though a few days later. Our strain of seed is very superior. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 50c. Lb. \$1.50.
33. **Early Large York.** The heads are round heart-shaped and very firm. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 50c. Lb. \$1.50.

High-Bred American Grown Second Early Varieties

Pkts., ozs. and ¼ lbs. delivered free, but add 8c to 1bs.

154. **Square-Deal.** (Specialty, see page 9.) Pkts. 10c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 lb. \$3.50.

35. **Bolgiano's "New Early" Cabbage.** It forms solid, compact, round, flat heads, the leaves growing close to the head, thus allowing more cabbage to be grown to the acre than any other sort. Its earliness (a week before other early flat varieties) is one of its best marketable features. It heads so hard and so quick it becomes waterproof. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 50c. 1 lb. \$1.50.

36. **Florida Header Cabbage.** In color, shape and size the heads are most uniform. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

37. **All Head Early Cabbage.** For uniformity, reliability of heading, size, earliness and quality it is very superior. Its heads grow compact and free from spreading leaves. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

38. **Henderson's Early Summer Cabbage Seed.** In size, form, solidity and earliness, this is truly a model Cabbage. It heads just after our Jersey Wakefield. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

39. **Long Island Early Flat Dutch Cabbage.** The heads are large and solid, and matures very early—just after the Select Jersey Wakefield, and may be marketed at the same time with the Wakefield. In every respect it is a Cabbage worthy of cultivation. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

40. **Early Short-Stem Drumhead Cabbage Seed.** It is ready for marketing 2 or 3 weeks earlier than the late Drumheads, forms large, solid rounded heads, weighing from 15 to 25 pounds. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

41. **Henderson's Early Succession Cabbage.** A wonderful Cabbage for solidity, productiveness, and fine large heads. Matures early, has handsome color and fine quality. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

42. **Sure Head Cabbage.** (Pedigree Stock.) True American Grown.—Produces large, round, flattened heads that are all head, with fewer outer leaves, very uniform, firm, and weighs from 10 to 15 pounds each. Splendid snipper and of an excellent quality. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

542. **Solid South.** This is one of the purest and truest Cabbages ever bred. Produces very large, shapely solid heads. It is crisp fine grained and of delicious flavor. An excellent shipper. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

53. **Bolgiano's Perfection Drumhead Savoy Cabbage.** There are many varieties of Savoy Cabbage, but "Bolgiano's Perfection" surpasses them all for uniformity of heads, beauty of curl and superior keeping qualities. When truckers have failed with other stocks from severe drought and worms, Bolgiano's Perfection has pulled through all right and come out supreme, making the grower happy by bringing him good returns when Cabbages were scarce. If you try it you will say more than we have. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

49. **Mammoth Red Dutch.** Is the largest red Cabbage, and heads very solid, and is deep red color to the very center. No Cabbage is better for boiling or slaw, and its beautiful red color specially fits it for pickling. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 60c. 1 lb. \$2.00.

Bolgiano's "Ringleader" Flat Dutch Cabbage

Late or Winter Cabbage

96. **Bolgiano's "Ringleader" Late Flat Dutch Cabbage.** Will always produce heads of enormous size and of the very best quality (Specialty, see page 9.) Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. ½ Lb. \$1.75. 1 lb. \$3.50.

43. **Bolgiano's Extra Flat Dutch Market Gardener's Choicest Stock.** Can be planted later than the old time varieties and matures more quickly into a handsome, EXTRA LARGE, solid, uniform Cabbage of perfect keeping qualities. It has of its own superior merits become a great favorite everywhere. If you want the best Flat Dutch that grows, try Bolgiano's Extra Flat Dutch. Pkts. 5c and 10c. Oz. 20c. ¼ Lb. 50c. 1 lb. \$1.50.

50. **Louisville Drumhead. (Best of all Drumhead Cabbage.)** There is no Cabbage of the Drumhead type which can be compared with this beautiful representative, in shape, color, firmness and excellent table qualities. While not as large as some of the coarse, inferior kinds, it is of fine size, very solid and uniform. Heat and moderate drought have little effect upon it on account of the peculiarly short stem and low habit of growth, so we recommend it for sections where late Cabbage is apt to be exposed to such conditions. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

45. **The Lupton Cabbage.** Is a splendid late sort, heading after the second early sorts and sooner than the Late Flat Dutch. It is particularly uniform in shape and size, holds its dark green color better than the late sorts. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

46. **Premium Flat Dutch.** It has long been the favorite sort for cold slaw and sauerkraut. It matures just before severe frosts, and keeps perfectly over winter. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. 1 lb. \$1.25.

47. **Large Late Drumhead Cabbage.** This splendid Cabbage produces enormous heads. Its good keeping quality makes it a first-class sort to carry over winter for long distance shipping. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. 1 lb. \$1.25.

44. **Boss Flat Dutch Cabbage.** The heads are large, hard, thick and flat, the leaves lapping across the center. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.25.

52. **Henderson's Autumn King Cabbage.** It is often from 3 to 3½ feet in circumference, and weighs from 25 to 30 lbs. each. Interior crisp, close fine grained, tender and white. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. 1 lb. \$1.50.

48. **Danish Bald Head Cabbage.** This is the most excellent Cabbage, is very solid and out-weighs any other Cabbage of equal size. The head is round with flattened top, a good keeper, first-class shipper, and sells everywhere. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. 1 lb. \$2.50.

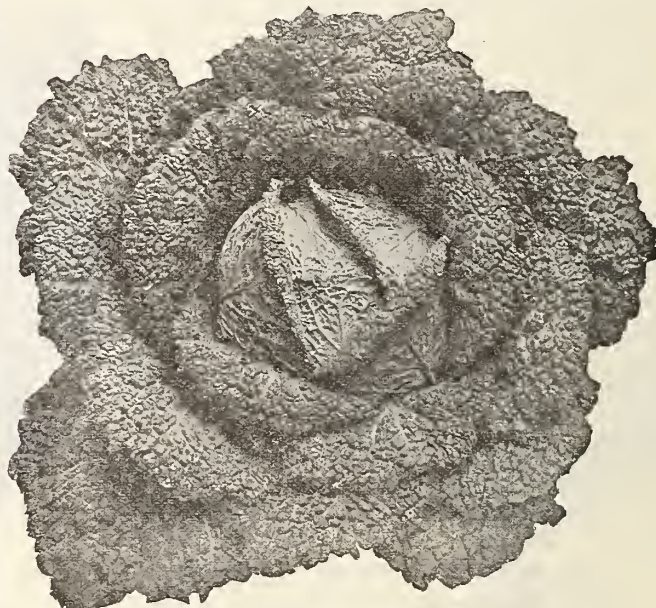

Brussels Sprouts

Culture. Sow in May, in the same manner as Cauliflower, and transplant in July 1 foot apart in rows 1½ feet apart. Brussels Sprouts is the very best winter vegetable that can be grown. It is as hardy as the common Curled Greens. When cooked through, such sprouts melt in the mouth like the tenderest Cauliflower, and equally as good. If more widely known, Brussels Sprouts would be as popular as it is valuable.

22. **Bolgiano's Matchless Long Island Improved Brussels Sprouts.** Pkt. 5c and 10c. Oz. 20c. ¼ Lb. 75c. 1 lb. \$2.50.

Collards

23. **Georgia Southern, or Creole.** Forms a large, loose, open head, or a mass of leaves on a tall stem. Freezing does not injure, but rather improves their quality. Sow thick in drills, in rich ground, transplanting when 4 inches high, or sow in drills where the plants are to remain, and thin to 2 or 3 feet apart in the row, when of proper size. In the South sow from January to May, and August to October. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. 1 lb. 50c. 5 lbs. @ 40c. 10 lbs. @ 35c.

CAULIFLOWER

CHOU-FLEUR
Cauliflor
Blumenkohl

One ounce of seed will produce about 3000 plants.
One-half ounce furnished at ounce rates, and one-half pound furnished at pound rates.

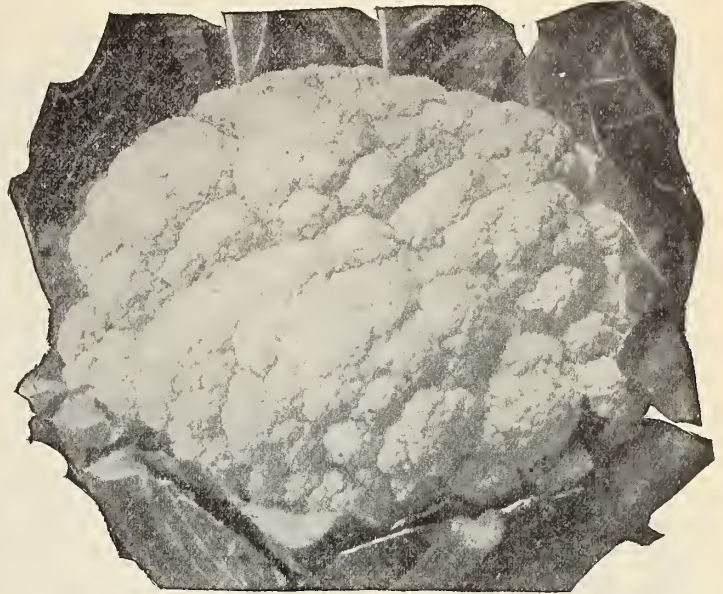

CULTURE. For earliest Cauliflower, raise plants by sowing in hotbed or greenhouse during January or February, and transplant to flats or cold frames, 2 or 3 inches apart each way. Set in open ground as soon in spring as the land can be put in good order. Soil to be a warm, very rich, fibrous loam, well supplied with humus and moisture. Copious water applications during dry weather, especially when the plants are heading, and light dressings of nitrate of soda and potash are of much help. Set plants 2 to 2½ feet apart each way. For late Cauliflower to mature during the pickling season (August 15th to October 10th), start plants in open ground like late cabbages, and handle them like that crop. After the heads begin to form, draw leaves over and pin or tie them together to protect the head from the sun.

54. **New Century Cauliflower.** There is no Cauliflower that can equal it. (Specialty, see page 16). Pkts. 10c, 25c and 50c. ¼ Oz. 90c. ½ Oz. \$1.75. 1 Oz. \$3.50. ¼ Lb. \$12.50.

105. **New Dry-Weather Cauliflower.** Will produce splendid crops in very dry locations. (Specialty, see page 16). Pkts. 10c. ¼ Oz. 25c. Oz. \$1.25. ¼ Lb. \$4.50. Lb. \$16.00.

55. **Earliest Snow Ball Cauliflower.** Our Snow Ball Cauliflower is the earliest, most hardy, and, in fact, the Cauliflower that you can plant and expect a crop of true, firm, snow white heads. You cannot get better Snow Ball Cauliflower Seed no matter what price you pay. There is but one stock of Cauliflower that is better, and that is Bolgiano's New Century Cauliflower. Many of the beautiful, shapely heads measure from 10 to 12 inches in diameter. Our Cauliflower seed is saved only from absolutely perfect plants and is grown by the most experienced and critical growers in localities best suited for its perfect development. Best for forcing; best for wintering over early crop. Every plant will produce a fine head. Pkts. 5c, 10c and 25c. ¼ Oz. 75c. Oz. \$1.50. ¼ Lb. \$5.00. Lb. \$18.00.

Bolgiano's Earliest Snow Ball Cauliflower

Delighted With His Crop

S. C. Middleton, St. John Co., Fla., writes, February 1st. "Let me compliment you on your New Century Cauliflower. I am now crating half an acre, heads large, white and firm as a potato; taking them as they run from 24 to 28 fills a crate. I need some seed next fall, and hope they won't be higher than \$60.00 per pound; however, they would be by far the cheapest at several times that price."

CARROTS

One ounce will sow 100 feet of drill; 3 to 4 pounds for an acre.

CULTURE. Carrots do best in warm, deep, rather light and fairly fertile soil that is well supplied with humus, or on strong loam, having been in clover and broken the year before. For earliest crop, sow seed of the early, short-rooted sorts in April or May, in drills a foot apart and thin to 2 inches. For main crop, sow in May or June, or for succession even in July, using the long-rooted varieties. The rows for these may be 16 to 20 inches apart, and the plants thinned to 2, 3 or even 4 inches. To raise Carrots for stock, the rows may be made wide enough apart, say 2 to 2½ feet, to allow of cultivation by horse power. In sowing Carrot or other small seeds, especially during dry weather, pains should be taken to firm the soil well over the seed, either by means of the feet, or with the roller of the garden drill.

14. **Early Sunbeam.** Bolgiano's New 1911 Extremely Early Carrot. This beautiful, delicious, exceptionally early forcing Carrot, comes at the time of the year when new vegetables are most appreciated and enjoyed. Be sure to plant some. (Specialty, see page 18). Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00

8. **Klondike Carrot.** An entirely new variety of Carrot, grows 6 to 7 inches long, and 1½ inches through; color, rich orange red. (Specialty, see page 18). Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. 90c.

63. **Early Ox-Heart Carrot.** So very early, so shapely, so tender, and of such a fine, bright scarlet color. Not only is extreme earliness a characteristic of our Ox-Heart Carrot, but its exceptionally fine quality, being almost entirely without core. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

61. **Half Long Orange Carrot.** The skin is clear, bright in color and the flesh is close in texture, of very fine grain, with very small core. For bunching, the handsome appearance is a market advantage. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

62. **Improved Long Orange Carrot.** Uniformly a deep orange color, growing a long, smooth, symmetrical Carrot. Remarkable for the absence of the detractive side roots and divisions at the point. Tremendous yielder and of a rich, sweet flavor; will retain its delicious flavor all winter. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 60c.

CELERY

Pkts., ozs. and ¼ Lbs. Delivered free, but add 8c to Lbs.

Culture. One ounce will produce about twenty-five hundred plants and sow about two hundred feet of row. Sow the last of March or early in April, in an open border, in rich mellow ground in shallow drills, watering freely in dry weather. By rolling or pressing in the seed, the result will be more satisfactory than when only covered. Cut the tops off once or twice before planting out, to make them stocky. When the plants are 5 or 6 inches high, transplant the dwarf varieties 3 feet and the taller sort 4 feet between the rows, plant 6 inches apart in the rows. Cultivate well and when large enough, blanch by earthing up. The first operation is that of "hauling," generally done by the beginning of September. After the soil has been drawn up with the hoe, it is drawn around each plant by the hand to keep the leaves firm in an upright position and prevent spreading. When the plants have become "set" in an upright position and the Celery is wanted for early use, they should be "banked." This is done by throwing the soil up as close to the plants as possible with a plow and finishing it with a spade, bringing the earth up nearly to the tops of the plants. The method employed now for protecting it is by covering the tops of the banks with water-proof felt paper.

71. **Bolgiano's French Golden Self-Blanching Celery.** Perfect, solid, crisp, vigorous stalks; thrifty, compact growth, handsome, fresh, clean yellowish color, with a heart that is large and solid, of a beautiful rich golden-yellow color. Our stock has proven over and over again to be without an equal. Pkt. 5c. ¼ Oz. 30c. ½ Oz. 50c. Oz. \$1.00. ¼ Lb. \$3.50.

76. **Sweet Nut Celery.** Most delicious Celery grown. We recommend it for nearby markets and home use. (Specialty, see page 16.) Pkt. 10c. Oz. 35c. ¼ Lb. \$1.00. Lb. \$3.50.

81. **New Victory Solid French Grown.** (Specialty, see page 16.) Pkt. 5c and 10c. ½ Oz. 20c. Oz. 35c. ¼ Lb. \$1.00. Lb. \$3.50.

72. **Perfect White Plume Celery.** Is the most extensively used on account of its extreme earliness. Its stalks and portions of its inner leaves and heart are white naturally. By simply tying the plant together, or by drawing the soil firm against the plant with the hand and repeating the operation to hold the soil already against the plant in position, the work of blanching is completed. Pkt. 5c and 10c. Oz. 20c. ¼ Lb. 60c. Lb. \$2.00.

75. **New Winter Queen Celery. (Pedigree Stock.)** Is beautiful in appearance. Ribs perfectly solid, crisp and of a delicious nutty flavor. Pkt. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

73. **Giant Pascal Celery.** This is a large, solid, excellent sort. It blanches very quickly to a beautiful yellowish-white color, is very solid and crisp, and a fine nutty flavor. Stalks grow broad and thick, a single branch making a large bunch. Pkt. 5c and 10c. Oz. 10c. ¼ Lb. 35c. Lb. \$1.25.

79. **The Pearl Le Grand Celery.** Keeps in perfect condition over winter and after other sorts are gone. Its large golden heart has a rich nutty flavor. Pkt. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

558. **Evan's New Triumph.** This variety has a very strong vigorous plant; is crisp; brittle, tender and fine flavor. Pkt 5c and 10c. ¼ Lb. 35c. Lb. \$1.25.

342. **Sweet Heart Celery.** A perfect Winter Celery, each stalk has three or more deliciously sweet hearts. Pkts. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

74. **Golden Heart Celery.** Is Crisp, solid, handsome and most excellent flavor, with a beautiful Golden Heart. Pkts. 5c and 10c. Oz. 10c. ¼ Lb. 35c. Lb. \$1.25.

Bolgiano's New Victory Celery

78. **Giant Golden Heart Celery.** A gardener found in his Dwarf Golden Heart a few plants of larger growth. A careful selection made for several years, resulting in the Giant Golden Heart, which excels for larger size, solidity and keeping quality. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

CELERIAC

Or Turnip Rooted Celery

Culture for Root Celery. Sow the Seed at the same season and give the same treatment as Celery. Transplant the young plants to moist, rich soil in rows 2 feet apart and 6 inches apart in the rows.

Bolgiano's New Giant French Celeriac

139. There is not a single item of interest in the growing and developing of seeds that we pass by without most thoroughly investigating and testing to see if there is something of value to our customers. To prove our watchfulness, we are here introducing the Giant French Celeriac. Many thought the Celeriac which the Market Gardeners have had for years was good enough, but we are always on the alert for something better and are rewarded for our pains by being able to offer this splendid Celeriac, Pkts. 5c and 10c. Oz. 25c. 2 Oz. 40c. ¼ Lb. 75c. Lb. \$2.50.

83. **Large, Smooth Prague Celeriac.** A large Celery flavored root used extensively for flavoring soups, pickles, etc., also relished sliced as a salad with pepper and vinegar. It is also used to flavor chicken and potato salad. Pkts. 5c and 10c. Oz. 10c. ¼ Lb. 35c. Lb. \$1.25.

More Perfect Than The Pictures

On May 10, 1910, Mr. James G. Perry of Amherst Co., Va., writes as follows: "Your seeds have more than given satisfaction, as I have raised vegetables from them that are more perfect than the pictures on the back of the Catalogue."

We Are Proud of This Letter

On Dec. 14th, 1909, Mr. N. L. Sanchez of Hillsboro Co., Fla., writes as follows: "We have been using your seeds for several years and have always found them to be true stock and as represented. I always feel sure of getting true stock when I order from J. Bolgiano & Son."

Liberal Measure

On May 15, 1910, Mr. S. H. Storckler, of Alamance Co., N. C., writes as follows: "Seed reached me in good order, thanks for liberal measure."

CRESS

CRESSON
Berro o Mastuerzo
Krefft

Culture. Sow curled or pepper grass thickly, in shallow drills, every two or three weeks. It should be cut often, and will continue to grow. It is useful not only for salad, but for the breakfast table and for garnishing.

520. **True Water Cress.** Should be sown in damp soil; or if a stream of water can be utilized, they would be much finer. They will thrive well in damp hot beds. Rightly managed, their culture is very profitable. To obtain early salad it is a good plan to sow with Water Cress Seed a strip 4 inches wide on the upper margin of the hot-bed, inside the frame, where it is always cool. Pkt. 5c and 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

521. **Fine Curled or Pepper Grass.** Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

CORN SALAD

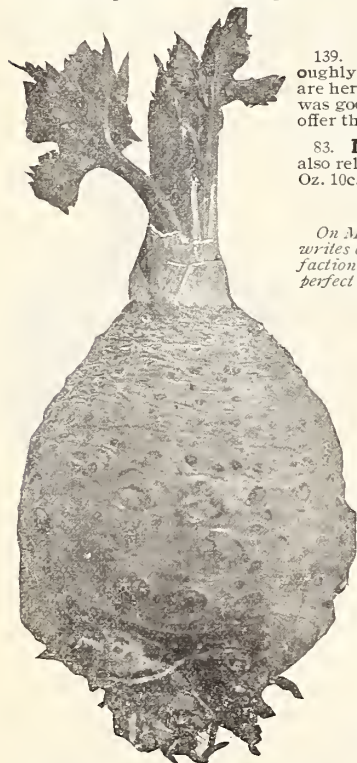

MACHE
Macha o Valerianilla
Stecksalat

1 Ounce will sow 20 square feet, 6 Pounds will sow an acre. **Culture.** Sow during August or early in September, in drills ¼ inch deep and 6 inches apart. If the weather is dry when the seed is sown tread it lightly to insure germination. Keep down weeds with hoe. Just before the winter, cover thinly with straw or leaves.

24. **Large German Corn Salad.** Used as a salad and for garnishing. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

CORN SWEET or SUGAR WELSH KORN Mais Maïs

We Supply Packages of Sweet Corn at 5c and 10c each, Postpaid. On Pints and Quarts Add 12c Quart, Postage. One Quart Will Plant 200 Hills; 8 to 10 Quarts for an Acre in Hills.

CULTURE. Seed of the sweetest varieties is liable to rot if planted in wet or cold ground. Yet if we have an early warm spell in Spring, it may pay us to take some risks. Often the plants, when once up, will escape injury by a belated light frost. Plant in warm soil 5 or 6 kernels to a hill making the rows 3 feet apart for the dwarfier early sorts and 4 feet apart for the taller late sorts. Hills to be 2 to 3 feet apart in the rows, thin out to three plants in a hill. Hoe often and draw soil up to the stem, break off side shoots.

To have the finest Sweet Corn, it must be picked in just the right condition; that is when the skin of the grain breaks at the slightest pressure, and plantings should be made frequently enough to have a supply at this stage. The quality will be inferior if it is either a few days too old or too young.

EXTRA EARLY

1051. **Double XX Extra Early Adams' Sweet Corn.** Two weeks earlier than Extra Early Adams', large ears completely filled with 10 to 14 straight rows of snowy white deep grains. Per ear 5c. Doz. ears 35c. 100 ears \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1050. **Gillespies First Early Patapsco Neck Corn.** THE VERY FIRST GOOD SIZE CORN that can be brought to market. It is so hardy that it can readily be planted as soon as the ground is in good working order, and will, from the day of its germination, hurry forward to meet the early demand for fresh Corn, which is always very keen and causes this delicious, attractive and superior Corn to bring profitable prices. Per Ear 5c. Doz. Ears 35c. 100 Ears \$2.50. Pt. 10c. Qt. 15c. 4 Qts. 45c. Pk. 75c. Bus. \$2.50.

1182. **Bolgiano's "New Cream and Honey" Early Sweet Corn.** (Specialty, see Page 15.) Extremely early, most delicious flavor, exceptionally fine quality. Should be tried by every wide-awake market gardener and in every home garden, where the "best" of everything is enjoyed. Pkt. 10c. Pt. 20c. Qt. 30c. 4 Qts. \$1.00. Pk. \$1.75. Bus. \$6.00.

1049. **White-Cob 65-Day Corn.** (Specialty, see page 15.) Per Ear 5c. Doz. Ears 35c. 100 Ears \$2.50. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 40c. Pk. 75c. Bus. \$2.50.

1112. **Golden Bantam Corn.** This very early, yellow grained sweet corn when in best condition for the table is remarkably sweet and tender. The stock we offer has been improved by several years of careful selection and therefore will be found decidedly superior to much that is offered. Pkt. 10c. Pt. 15c. Qt. 25c. 4 Qts. 75c. Pk. \$1.35. Bus. \$5.00.

1115. **Premo 60-Day Corn.** (Specialty, see page 15.) Experts pronounce this Corn to be from 5 to 7 days earlier than any other Sugar Corn in existence. It is superior to many leading early varieties in quality, size and yield. Can be planted as early as Adams' for the young plant withstands slight frosts. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1054. **Red-Cob 90-Day Corn.** This Corn meets a long-felt want, because it suits the retail market sales; makes a first-class Crop Corn for feeding stock. The ear is large, handsome, suits for early or late crop, because it matures in 90 days. This makes it always a safe and profitable crop. Per Ear 5c. Doz. 35c. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 50c. Bus. \$1.50.

1055. **Early Minnesota.** Ears larger than the Cory and matures between that variety and the Crosby. Eight rows of quite large sweet grains. Per Ear 5c. Doz. Ears 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1057. **Mammoth White Cory Sweet Corn.** Produces ears 7 to 8 inches long; 12-rowed; whitened-cobbed and covered with very large white grains of extra quality. Per Ear 5c. Doz. Ears 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

SECOND EARLY OR INTERMEDIATE

1068. **Peep-o-Day.** The two points to this remarkable Corn are its extraordinary earliness and unparalleled sweetness. So marked is its sweetness and delicacy of flavor, that many of our customers now plant PEEP-O-DAY *exclusively*, arranging the plantings a few days apart so as to have this delicious Corn throughout the season. It is wonderfully productive. Our crops for three years almost double the yield per acre of any other variety we have grown, early or late. Incredible as this may seem, it is readily accounted for by the fact that the stalks bear from 2 to 5 ears each and the growth being dwarf—about 4 feet—admits of a very close planting. Prices: Pkt. 5c. Pt. 10c. Qt. 20c. 2 Qts. 35c. 4 Qts. 60c. Pk. \$1.10. Bus. \$4.00.

1056. **Crosby.** Early, matures after Minnesota; fair-sized ears of good quality. Per Ear 5c. Doz. 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1059. **Earliest Sheffield Sweet Corn.** Planted early as Adams', it will stand slight frosts, makes a strong vigorous growth with abundant foliage, growing about 5 feet, bearing usually 2 ears of handsome appearance, entirely free from smoot; exceptionally fine flavor and juicy. Per Ear 5c. Doz. Ears 50c. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1060. **Extra Early Evergreen.** Ears like evergreen—very large, with about 18 irregular rows and a very long grain of the very best quality; remains in condition for use longer than other sorts, exceeding the Stowell's in this respect. Per Ear 5c. Doz. Ears 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

1061. **Early Mammoth Sugar.** Market Gardener's favorite. Two weeks earlier than the late Mammoth. Per Ear 5c. Dozen Ears 50c. 100 Ears \$3.50. Pt. 15c. Qt. 25c. 4 Qts. 60c. Pk. \$1.00. Bus. \$3.50.

Cream and Honey Was Delicious

Mrs. W. E. O'Neill, Kent Co., Md., writes Aug. 18th, 1909. "Our garden is fine. The 'Cream and Honey' Corn was Delicious."

Snow White Evergreen Sugar Corn

Comes One Day Ahead of Time

Mr. Willard F. Walker, Frederick Co., Md., writes: "I was more than pleased with the seed I bought from you last Spring, the 65 Day Corn was fine. It was ready to eat at the 64th day, and your Country Gentleman Sugar Corn was also fine. I can never praise your seed too highly."

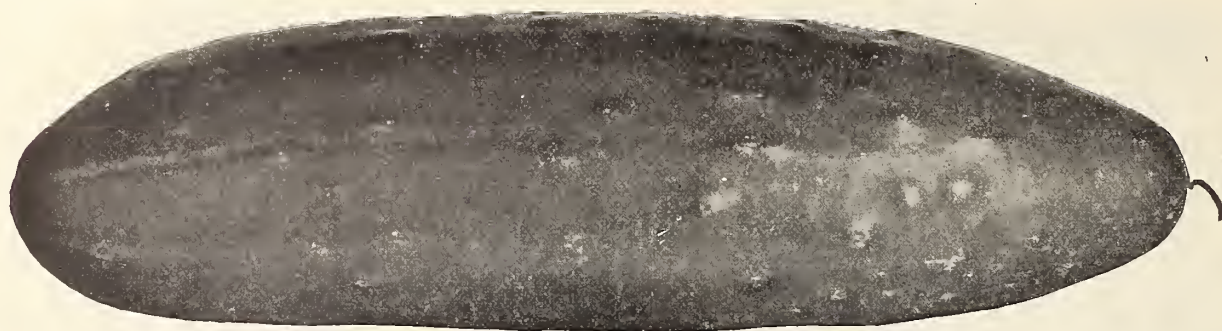

He Clipped Three Days Off

Mr. C. L. Tabb, Warwick Co., Va., writes Jan. 12, 1909. "The 65 Day Seed Corn purchased from you last Summer was in every way satisfactory and under careful cultivation I clipped three days from your record, having fine Roasting Ears 62 days from date of planting."

A Splendid Word of Encouragement

Gentlemen:—I want to tell you that I have been buying your seed 12 years, and they are the best I got anywhere. Last spring I bought numerous seed from you, and tho' the weather was distressingly dry, I don't believe a seed failed to germinate. I tell you this because I know a word of praise encourages one.

One ounce will plant fifty hills; two pounds will plant one acre.

CULTURE For very early, sow in hotbeds upon pieces of sod; or in small pots, and they can be readily transplanted with a gain of about six weeks before they can be sown in the open ground. Plant out in rich soil when danger of frost is over, or protect by hand glasses, or by paper held down at the corners with a handful of earth. For general crops, sow in the open ground as soon as the weather is settled and warm, and every two weeks for a succession. For pickles sow from middle of June to first week in July. Sod land, turned over in the fall, is the best for them. Plant in hills 4 feet apart, putting a shovelful of well rotted manure in each hill.

84. **Bolgiano's Early Fortune Cucumber Actually Proven by Many Expert Growers to be The Earliest and The Best Dark Green White Spine Cucumber On Earth.** Full-blooded, as pretty as a picture, and extremely early, wonderfully productive, a model in shape, of the most inviting and attractive deep green color. Without a doubt the finest in the world. If you wish to secure any of it this year for hot-house, frames or open field culture, you had better order immediately, or our short supply will be exhausted. Pkt. 10c. Oz. 15c. ¼ Lb. 35c. ½ Lb. 60c. Lb. \$1.00.

135. **New Klondike.** Very dark green 6 to 7 inches long and two inches thick, remains crisp a long time. It is a Grand Market Sort. (Specialty, see page 11.) Pkt. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

82. **Lord Baltimore.** The Wonderful New Dry Weather Cucumber; dark green, about 15 inches long. Produces fine crops when other varieties fail. (Specialty, see page 11.) Pkt. 5c & 10c, Oz. 15c. ¼ Lb. 35c. ½ Lb. 60c. Lb. \$1.00.

544. **Davis Perfection Cucumber.** A very good, dark green, white spine cucumber, originated by the same Michigan Market Gardener who originated The Davis Wax Bean. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

85. **Arlington White Spine.** Beautiful in shape, color, and of the finest quality. The fruit is long, cylindrical, dark green with very white, crisp, and tender flesh of excellent flavor. In the United States the Arlington is used more, perhaps, than any other variety; and in excellence is surpassed only by the New Early Fortune Cucumber. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

338. **New Century.** A fine new White Spine, eight to ten inches in length. The fruits are smooth and regular, a rich dark green in color, the blossom end, full and round. The skin is quite thin and tender, flesh pure white and crisp; the seed space is firm and solid, making an excellent slicing variety. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

86. **Improved Extra Early White Spine.** Produces Cucumbers of finest form and most salable size for shipping purposes; dark green color; a favorite with truckers and gardeners. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

87. **Thomas Perfection Early White Spine.** A selection from the famous Arlington White Spine. It is regarded as far superior to that variety. Pkts. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 85c.

88. **New Extra Long White Spine Cucumber, or Fordhook Famous.** Skin very deep green; flesh greenish white, firm and unusually crisp. The plant is a strong grower; leaf large and of a deep green color. The fruit is long, (12 to 17 inches), smooth, slim and uniform. Owing to its large, thick, heavy leaf, it withstands attack of insects. Its northern origin insures hardness and vigor. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

90. **New Extra Early Evergreen (White Spine Cucumber.** Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

93. **Bolgiano's New Prolific Pickling.** An exceptionally fine stock of pickling cucumber; bears fruit from the time it first starts until frost. Vines are strong and vigorous, yielding immense quantities of fruit, and remains in a fresh, healthy growing state longer than any other sort. Skin is very thin, tender and quite free from toughness when pickled. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

97. **Thorburn's Everbearing.** The famous pickling Cucumber. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

92. **New Excelsior Long Green Cucumber.** It is a model for size, form, and beauty. Deep green color, and an abundant cropper. For table use and pickles. This sort runs so uniform that the Cucumbers look as if they had all been selected. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

340. **Fordhook Pickling.** One of the best Cucumbers for pickling. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

95. **Improved Jersey Pickle.** It is medium in length, very shapely; prolific and holds its color. Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

98. **Improved Long Green.** Pkt. 5c. Oz. 10c. ¼ Lb. 20c. Lb. 65c.

Pkts. Ozs. and ¼ Lbs. delivered free; but add 8c to Lbs.
One ounce of seed will produce about 5000 plants

CULTURE. The Kales are more hardy than Cabbage, make excellent greens for winter and spring use, and are improved by frost. Sow from May to June, and cultivate the same as Cabbage. For early spring use sow in September, and protect during winter. Some of the varieties are so hardy that the green leaves may be dug out from under the snow in winter and be used for greens.

113. **Bore Cole, or Kale. Spargel Kohl.** The most salable, delicious and tender of all Winter Kales. About Baltimore, it is sown in May, and transplanted like cabbage to stand over Winter. It is taller than the extra dwarf varieties and when the leaves are stripped, or fall off, new tender leaves quickly grow out. Then they are again stripped off and used for marketing. It will stand the coldest Winter. Besides being a delicious vegetable, it has always been an exceptionally profitable crop, bringing in money during the Winter months when most all vegetables are scarce. Pkts. 5c and 10c. Oz. 10c. ¼ Lb. 25c. ½ Lb. 40c. Lb. 75c.

112. **Extra Dwarf Green Curled Scotch, or Norfolk Kale.** One of the best Kales for Spring sowing in the North; the principle sort grown South for Northern markets; hardy, and will remain over Winter where temperature does not go below zero. Very dwarf and spreading, rarely exceeding 18 inches in height. Leaves are a bright green color beautifully curled and produced in great abundance. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

108. **New Imperial, Very Curly, Long Standing Kale.** Beautifully curled and crimped sort; strong, vigorous habit, perfectly hardy, bright green color; very attractive in appearance; superior to all late sorts; will stand longer without shooting to seed than any other variety. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

351. **Spring, or Smooth Kale.** A hardy, quick growing, smooth leaved variety. The best for spring sowing, but largely sown in the fall, making greens earlier than the winter varieties. Oz. 5c. ¼ Lb. 10c. Lb. 15c. 2 Lbs. 25c. 10 Lbs. \$1.00.

109. **Curled German Kale.** Hardy; stands the frost of our severest Winters; grows rapidly; dwarf habit, beautifully curled. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

110. **Siberian Curled.** Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

MUSHROOM SPAWN BLANC DE CHAMPIGNON Seto Champignonbrut

Cultur. Mushrooms may be grown in cellars, under benches of greenhouses, or in sheds wherever the temperature of 50 degrees can be kept up through the winter. The beds should be made from November to February, according to the time the Mushrooms are wanted, and it requires about two months for them to begin bearing. Secure fresh horse dung, free from straw and litter, and mix an equal bulk of loam from an old pasture with it. Keep this under cover, taking care to turn it every day to prevent it from heating, until the pile is large enough to make a bed of the required size. Three or four feet wide; eight inches deep and any length desired are the proper proportions for a bed; but these may be varied. Prepare the mixture of loam and manure, making the bed in layers and pounding down each with the back of a spade. Leave this to heat through for a few days, and as soon as the heat subsides to 90 degrees, make holes in the bed about a foot apart each way, into which put pieces of spawn 2 or 3 inches in diameter; fill up the hole with compost, and at the expiration of a week or ten days the spawn will have thoroughly diffused itself through the bed. Spread layer of soil over the heap to the depth of 2 inches, and cover with 3 or 4 inches of hay, straw or litter. Examine bed often to see that it does not get dry. Take special care, however, when water is given that it be at a temperature of 100.

ZUCKER ELONE
Melon *Abuzzielono*
Melon *Muscade*

Pkts., Ozs., and ¼ Lbs. Delivered Free, but add 8c to Lbs.

One ounce will plant about 50 hills; 2 to 3 lbs. in hills per acre.

CULTURE. Melons thrive best in a light, rich soil. Plant early in May, when the ground has become warm and dry, in hills 5 to 6 feet apart each way for Muskmelons; 8 to 10 feet for Watermelons. Previous to sowing the seed, mix a few shovelfuls of well-rotted manure in each hill, and plant in each 12 to 15 seeds; after all danger of the bugs is over, thin out to three to four plants per hill. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground. Melon vines are subject to the same destructive insect and fungus foes as are cucumber and squash vines. Early and repeated spraying with Bordeaux Arsenate of Lead Mixture is always advisable for these crops.

GREEN FLESHED VARIETIES

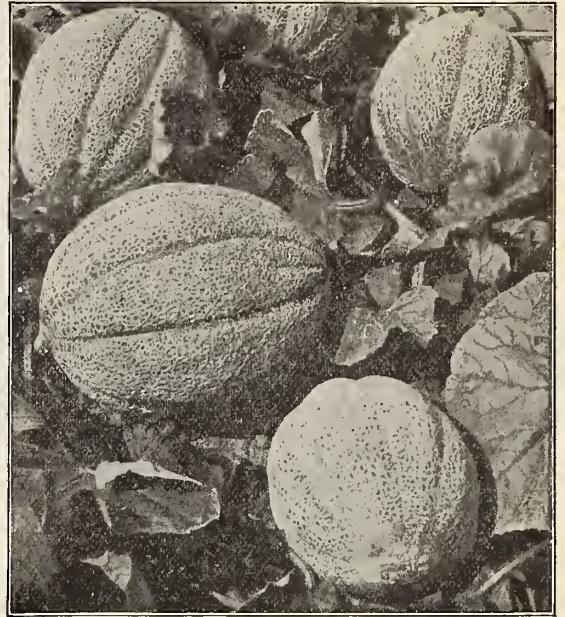

16. **"Junior" Rocky Ford.** A little larger, two weeks earlier, twice as prolific as Rocky Ford. (Specialty, see page 12). Pkt. 10c. Oz. 25c. ¼ Lb. 75c. Lb. \$2.50.

157. **Rocky Ford Cantaloupe.** Bolgiano's Trustworthy Stock. The finest in the world. Size 4 inches high by 5 inches long. Weight 1½ lbs. Netting well developed, closely laced and interlaced and of an attractive gray color. Crevices between the nettings very small. Ten distinct ribs. The union between the ribs very narrow but well defined from stem to blossom button. Blossom button well developed but small. Color of rind in crevices and unions light green turning toward grayish slate when ready to pick and ship long distances. Rind very tough. When cut, meat light green changing very slightly toward gold near the centre. Fine grained, firm and of high quality, very spicy and sweet. Flesh very deep leaving a triangular seed cavity, seed held in three lobes. Abundant yielder, having produced 300 standard crates from one acre. Somewhat later than our "Junior" Rocky Ford but continues a long time in bearing. Our seed is saved from the finest melons of the first picking. Each individual melon is cut open by hand and carefully inspected both inside and out. Last, but not least, it is an excellent shipper. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 40c. 5 Lbs. @ 35c.

167. **Eden Gem Cantaloupe.** This magnificent new Muskmelon is a selection of the old Rocky Ford, which it completely surpasses in lusciousness, yield, carrying, and good selling qualities. In shape it is somewhat longer and a trifle larger and closer and deeper netted. Pkt. 10c. Oz. 15c. ¼ Lb. 30c. Lb. \$1.00.

334. **Pollock Cantaloupe.** A rust resisting melon, with netting over the blossom end; not a long melon but rather inclined to be short, with the finest shipping and eating qualities. The selections from time to time have reduced the size, now they crate nicely. Pkt. 10c. Oz. 15c. ¼ Lb. 30c. Lb. \$1.00.

337. **Knight Cantaloupe.** A very popular melon with large growers and shippers; somewhat larger than the Rocky Ford or Netted Gem. We offer the original stock which is very fine. Pkt. 5c. Oz. 15c. ¼ Lb. 30c. Lb. \$1.00.

4 to 5 Lbs. to the Acre.

CULTURE. For early green or bunching Onions sow seed of Silver Skin or other hardy white varieties in early August in well prepared and well drained rich, loamy soil, giving one foot space between the rows, and using 20 pounds of seed per acre. In many localities they winter well without mulch or other protection. For dry (fall) bulbs, select a clean, rich, well drained and well manured piece of land, prepare a perfect seed bed, and sow seed in early spring in drills 15 inches or so apart, using 4 to 5 pounds of seed per acre. Use wheel-hoe and weeders freely and thin plants to stand at least 2 inches apart in the rows. Pull when tops begin to die down, cure and sell, or store in a cool, dry place. For sets, select clean sandy soil of medium fertility, prepare it well in early spring, and at once sow seed in drills a foot apart, using 40 to 60 pounds of seed per acre. Gather the sets when ripe, cure and store in a dry, airy place. They may be wintered in a slightly frozen condition, but must be protected from repeated freezing and thawing. In early spring following plant them in shallow drills, 12 inches apart, and about 2 inches apart in the drill.
By sowing seed of the Spanish type, such as the Prizetaker and Southport Globes, under glass in January, February, or even March, and transplanting in April to open ground 3 to 4 inches apart in the rows, bulbs of immense size may be produced.

214. **White Silver Skin Onion.** This superior stock is almost exclusively used for growing sets, which is the strongest proof that it is the best from which to grow the large white Onions. Its delicate, mild flavor, its stately form and large handsome size, its pure white color, make it a most desirable variety for the table, the most profitable for market and shipping. Plants are of an extremely thin neck and type, and sure to ripen early. Bulbs are perfect in form and quite thick through. They are fine-grained, crisp and mild. Bulbs should be harvested as soon as ripened and dried in the shade to preserve their silvery white skin, the attractiveness of which makes them command the highest market prices, and removes the necessity for peeling them. Pkt. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

205. **Mammoth Prize-Taker Onion.** (Specialty, see page 21.) Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.25.

206. **Bolgiano's Superior Yellow Globe Danvers Onion.** Has handsome form, with very thick bulb and small neck; very early, enormous cropper; keeps perfectly, and is a market favorite of large size; remarkably solid and heavy; is one of the safest, surest keepers. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

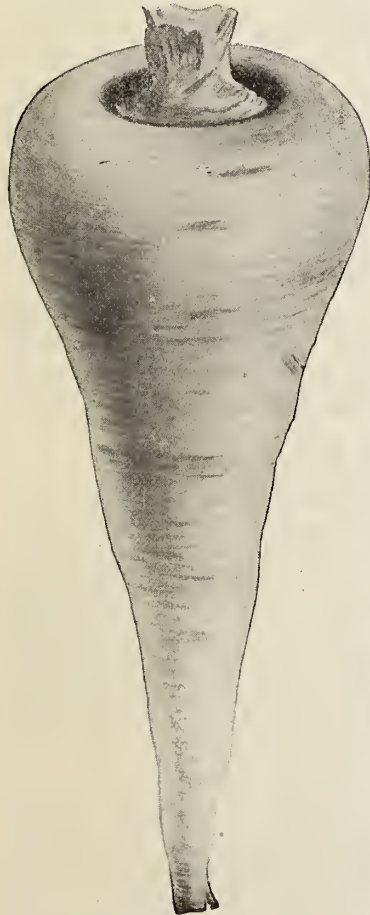

216. **Round Yellow Danvers.** Is the same shape as the White Silver Skin. Brownish-yellow color; bulbs quite flat and of good size; largely grown for sets. They are hardier than the white, and keep better through the Winter. In the Southern States they can be planted in Autumn and will continue growing during the entire Winter. Pkts. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

536. **Bolgiano's Yellow Dutch or Strasburg.** Grows round, plump sets. Skin a bright attractive straw color. Full-sized Onions are somewhat flattened; mild flavor, excellent keepers and shippers. It is very productive. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

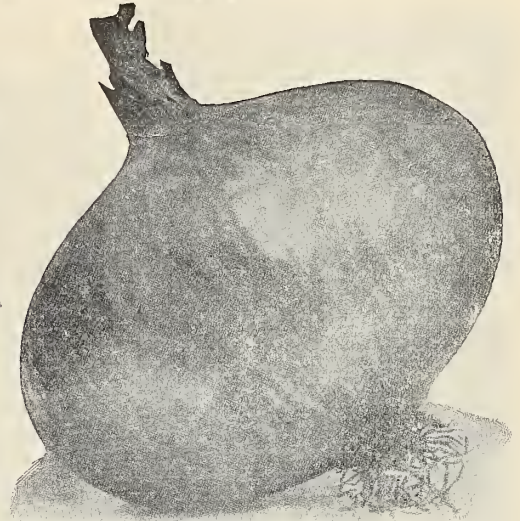

212. **Red Wethersfield Onion.** This is the most beautiful, large, handsome, globe-shaped red Onion. Earliness, productiveness and keeping qualities. It has perfect form, skin deep purplish-red; flesh purplish-white; fine grained; produces enormous Onions. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 35c. Lb. \$1.25.

211. **Extra Early Long-Keeping Australian Brown Onion.** Solid and most attractive. Produces good-sized Onions weeks earlier than the Red Wethersfield. Skin is a clear amber brown. Pkts. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00.

511. **Large White Portugal.** The standard large flat variety. Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. Lb. \$1.50.

The Most Delicious Early Peas
Bolgiano's Wonder Workers

First Class
Selected Stocks

PEAS

Finest Hand
Picked Samples

Pois Chicharos o Guisantes Orbsen

We supply Packets of Peas at 5c and 10c postpaid. Add 8c to Pints and 15c to Quarts by Mail. One quart will plant about 100 feet of drill. One and one-half to two bushels for an acre.

Culture. Peas of extra early, smooth class are the very first thing to be planted in the garden in spring. The wrinkled sorts follow a little later, as they are not quite so hardy. Tall late varieties need brush or other support. By selecting sorts that do not grow much over two feet high, the necessity of providing brush may be avoided. Judicious selection of varieties and planting frequently for succession will give a full supply of the choicest green Peas almost during the entire season, with the possible exception of the hottest part of the summer. Open furrows three or four inches deep and three feet apart; scatter the seed Peas into them and cover with hoe or plow. Cultivate like corn or beans. The late tall sorts may be planted in double rows and brush stuck in between them for support. All Garden Peas, however, require good, strong and fertile land. Heavy yields cannot be obtained on poor soil. The very dwarfest sorts of the American Wonder type will succeed only on the very richest garden land, and may be planted in rows a foot apart.

Those marked with a star (*) are wrinkled marrows, and unless otherwise stated should be sown thicker than the round Peas, and not until the ground has become warm as they are more liable to rot. They are the finest flavored of all Peas.

EXTRA EARLY VARIETIES

1087. **New Long Podded Alaska Pea.** We recommend this new Pea as the greatest money making Pea that has been introduced since we first put out the Wonder Worker Pea. Be sure to give it a trial. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1029. **The Hustlers.** Bolgiano's New 1910 extremely early green seeded and handsome green podded big yielding Peas. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1088. **New Extremely Early Prolific Bolgiano's "GOOD LUCK."** Crop very short this year. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1070. **Bolgiano's Extra Early Triumph Peas.** Our standard market-garden extra early Pea; productive and profitable to grow. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1071. **Bolgiano's Extra Early Alaska Peas.** By careful selection, thoroughly roguing, we have developed a stock of this smooth, blue Pea, which in evenness of growth of vine and early maturity of pods is unequalled. The vines are about 2½ ft. high, not branching, but bear 4 to 7 long pods filled with medium sized, beautiful bright green smooth Peas of excellent flavor. The dark green color of the pods makes it desirable as a shipper, and it can be carried long distances without losing its color. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. 90c. Pk. \$1.75. Bu. \$7.00.

1016. **Ameer Peas.** An exceptionally profitable Early Pea. Green seed. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1082. **Bolgiano's Extra Early Nonpariel Peas.** It is used by many of our Southern customers. The entire crop can be had in a single picking, and its beautiful green pod retains its color and freshness longer than other sorts. It is an abundant cropper and the pods good-sized. It suits long distance shipment. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1201. **Pedigree Extra Early.** Also known as "The New Early Pea." Extremely early, wonderfully productive and exceptionally uniform stock. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1202. **Prolific Early Market.** Not quite so early as the Pedigree, but the most productive of all the Extra Early Peas. Beautiful large pods, fine quality, one of the best Peas ever introduced. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

1073. **Extra Early Morning Star Peas.** Many of our largest customers use this Pea, and it gives satisfaction. Height 2½ ft. Pt. 20c. Qt. 30c. 4 Qts. \$1.10. Pk. \$2.10. Bu. \$8.00.

Northern Grown Seed Potatoes

GROWN EXPRESSLY FOR SEED

POMME DE TERRE *Patatas* Kartosaein

Culture. Any good well drained, fibrous loam will produce Potatoes under right climatic conditions. For early Potatoes, which mature in 8 to 10 weeks from planting, the soil must be particularly rich. A rich clover sod, manured and broken the year before and planted to corn, beans, peas, oats, etc., is in best shape for giving a good yield of nice, clean Potatoes. Stable manure had better be applied to the land the year before, while some good complete fertilizer, at the rate of up to 1000 pounds per acre if applied broadcast, or 400 to 600 pounds if applied mostly in the rows, may be used directly for the Potato crop. Open furrows 3 feet apart and 3 to 4 inches deep. Apply the fertilizer, and run the furrower or small plow again in the furrow to mix the fertilizer with the soil and leave a mellow seedbed. Then plant good-sized pieces, each containing not less than 2 or 3 eyes, 15 inches apart in the furrows for early Potatoes, and 18 inches apart for late ones. In some of the large Potato sections the Potatoes are always planted in check rows 3 feet apart each way. Cover with coverer, small plow or other suitable tool. Cultivate often. Spray with Bordeaux Arsenate of Lead Mixture as a protection from flea beetle, potato beetle and blight. *8 to 10 bushels will plant an acre.*

227. Extra Selected Stock. This magnificent variety is now recognized as one of the best Red Peppers for market or family use. Every one who has seen our crops has been enthusiastic in praise of the beautiful plants crowded with the large handsome fruits of a bright ruby red color. The Peppers grow from 4 1/2 to 6 inches long by 3 1/2 to 4 1/2 inches through. Added to their beautiful color when ripe is the fact that they are remarkably mild and pleasant to the taste—in this respect unequalled by any other Red Pepper. We cannot too strongly recommend the Ruby King. So mild and pleasant in flavor they can be sliced and eaten with pepper and vinegar, like tomatoes, and makes a very pleasant and appetizing salad, while for stuffing and pepper hash no other variety can equal them. Rabanos y Rabaritos
Rabics und Rettig

Pkts., Ozs. and $\frac{1}{4}$ Lbs. Delivered Free, but Add 8c to Lbs. 6 Ozs. of seed will plant 100-yard Row.

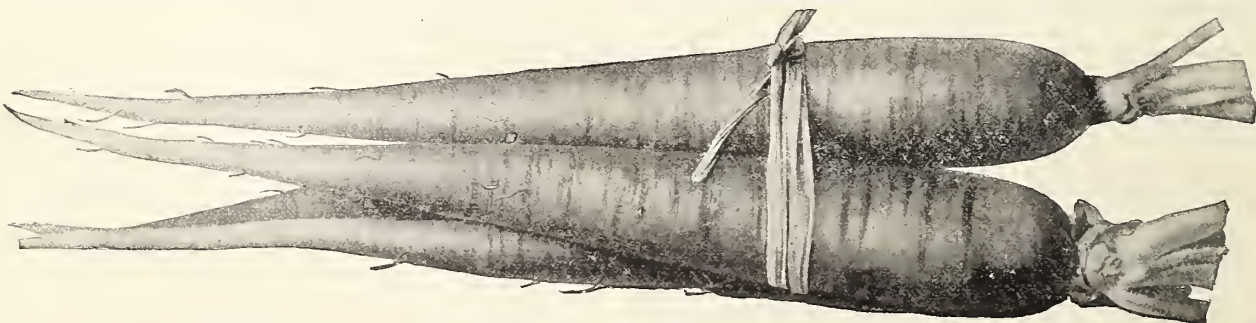

Culture. Sow as soon as the ground is dry in the Spring, in rows 8 to 12 inches apart, every week or ten days for a succession, up to the middle of June, after which they are but little used, unless a cool northern spot can be found, where the ground is shaded during part of the day. They should be sown in light, rich soil, as a crisp Radish cannot be produced in heavy soils. Sow also in early Fall for late crops and Winter use. Sow 8 to 12 pounds to the acre. Radishes should be eaten when quite small; it is a mistake to let them grow too long and too large. This applies particularly to Ruby King and small turnip-shape sorts.

EXTRA EARLY ROUND VARIETIES

9. **Tip Top White Tip.** The beautiful New Extremely Early Radish. (Specialty, see page 19). Pkts. 5c. Oz. 10c. $\frac{1}{4}$ lb. 30c. 5 lbs. \$1.00.

SALSIFY or VEGETABLE OYSTER

SALSIFIS
Ostion Vegetal
Bafetwur3cl

Culture.—Sow as early as the ground can be worked in the Spring, in drills 12 inches apart, 1 inch deep, and thin out to 6 inches in the row. Keep them free from weeds. Cultivate the same as carrots and parsnips. A part of the crop may be left in the ground till spring, when it will be found fresh and plump. The roots are cut into pieces ½ inch long, boiled until tender, and then served with drawn butter, in which way it is a delicious vegetable. They are also mashed and baked like parsnips, and have a sweet agreeable flavor. Mashed and fried, the flavor is much like that of the oyster. Sow 8 to 10 pounds to the acre. One ounce to 50 feet of drill.

- 275. **Bolgiano's New "Great Giant" Salsify.** The largest, purest and best Salsify to grow. (Specialty, see page 18.) Pkts. 5c and 10c. Oz. 15c. ¼ Lb. 40c. ½ Lb. 75c. Lb. \$1.50.
- 276. **Sandwich Mammoth White Salsify.** Superior in quality, pure white color, very meaty and fine flavor. Our stock unusually good, grows so large and shapely. Pkt. 5c. Oz. 10c. ¼ Lb. 30c. Lb. \$1.00
- 504. **Large White.** Pkt. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

One ounce to 100 feet of Drill.
10 to 12 Lbs. in Drills for an acre.
25 to 35 Lbs. Broadcast for an acre.

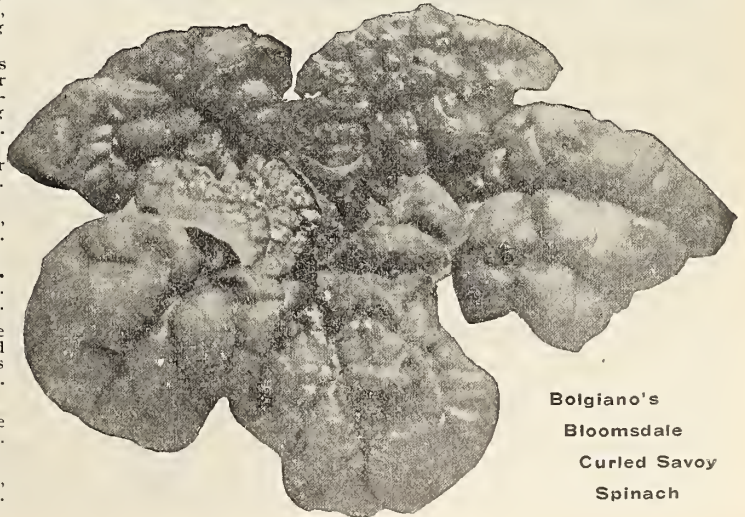

Culture. Spinach is an important market gardener's crop, of easy culture. For spring and summer use sow in drills 1 foot apart and 1 inch deep, as early as the ground can be worked, and every two weeks for a succession. For winter and early spring use, sow in September in well manured ground; cover with straw on the approach of severe cold weather. The ground cannot be too rich; the stronger the ground the more delicate and succulent will be the leaves.

Light applications of nitrate of soda have often a magic effect on Spinach. Spinach is sometimes forced by sowing in early September in frames, over which sash is placed during February and March, and further protected by mats during severe freezing weather.

1000. **Long Season Spinach.** This new variety is especially adapted for Summer. Sowing as it remains in perfect condition a long time before going

Bolgiano's Best Tomato, The Great B. B.—Leader For 20 Years

TOMATO

TOMATO
Tomates
Liebesapfel

The Largest and most Successful Tomato Growers in Maryland, Florida, Texas, Throughout the South, in Canada, Mexico, Australia and Every State in the U. S. where Tomatoes are Grown—They All Say Year after Year, Bolgiano's Tomato Seeds Produce the Best Tomatoes that Grow. We Prepay Postage on all Tomato Seed Including Pounds. One ounce of seed will produce from 3000 to 4000 plants.

CULTURE.—For first early Tomatoes select varieties of the earliest types, and start the plants under glass during February. When plants are 2 inches high, transplant into flats, thumb pots or plant boxes, and later on transplant again, giving more room. Never crowd the plants, but keep them short and stocky. Plants already in bloom or with fruit set, if in wooden plant boxes or in pots, may be transplanted to the open ground without disturbing their roots, and will continue to bloom and fruit without check. Set these sorts 4 feet apart each way in warm, mellow soil of fair fertility as soon as danger from belated frosts is past. For main crop, the plants can be started somewhat later, in hotbed or cold frame, once transplanted to keep them stocky, and then set in open ground, in fairly good warm soil, 5 feet apart each way. A very ornamental show can be made in the home garden by training tomato plants to stakes, poles or trellis. Application of superphosphate, or of some good complete (vegetable) fertilizer often have a very happy effect on Tomatoes in hastening maturity and increasing the yield.

RED TOMATOES

289. **Dwarf Champion.** Dwarf, stiff habit, dark green foliage, scarcely needing any support. It is very early and wonderfully prolific. Color same as Acme. It is perfectly round and smooth, of medium size. Pkts. 5c and 10c. Oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.00.

DUKE OF YORK TOMATO

Of Special Value to Florida Growers. (Specialty, see page 17).

297. One of the grandest Tomatoes recently introduced, color rich, glossy scarlet, splendid cropper, round in shape, flesh very firm, large size, fine flavor. It ripens its fruit uniformly together, whilst its profusion of tomatoes, averaging 8 and 10 large evenly formed clusters each, makes it conspicuously handsome. Ripens evenly to the stem, is strong, healthy grower, not subject to rust or blight, is an enormous cropper and produces until the vines are killed by frost, holding its size well until the last picking. Quality the very best, solid and meaty. Pkts. 5c and 10c. Oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.00.
268. **June Pink Tomato.** (Specialty, see page 10). This is the Pink Earliora Tomato and where a pink Tomato is in demand, this will be the earliest and most profitable to grow. Pkts. 5c and 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ lb. 65. lb. \$2.50.
138. **Burpee's Earliest Pink.** A very early, prolific, attractive Tomato, about the best pink Tomato ever introduced. (Specialty, see page 17). Pkt. 10c. Oz. 20c. 2 Ozs. 35c. $\frac{1}{4}$ lb. 65c. lb. \$2.50.
291. **Improved Acme.** Very early, of medium size; perfectly smooth, very solid and a great bearer. Crimson color, with a pinkish cast. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ lb. 35c. lb. \$1.25.
292. **Extra Early Climax Tomato.** Early, solid, large size and a good bearer. The vines are robust, healthy and laden with abundance of choice marketable fruit. Same color as the Acme. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ lb. 35c. lb. \$1.25.
303. **Crimson Cushion or Beefsteak Tomato.** Very large, bright scarlet, fine flavor. Pkts. 5c and 10c. Oz. 25c. $\frac{1}{4}$ lb. 75c. lb. \$2.50.
310. **Livingston's Magnus.** A rather late running Tomato of distinctly fine quality; the plants are of strong running growth with potato-leaf foliage. The rich purple fruit is smooth and very even in size and set freely in clusters. Pkts. 5c and 10c. Oz. 15c. $\frac{1}{4}$ lb. 40c. lb. \$1.50.

YELLOW TOMATOES

- Golden Eagle Tomato.** Leader of all Yellow Tomatoes. Color a rich transparent amber, fruit smooth, fine form, and deliciously flavored. In size larger than the yellow pear-shaped Tomato, which it readily outsells. It is very attractive. Pkts. 5c and 10c. Oz. 25c. $\frac{1}{4}$ lb. 75c. lb. \$2.50.
- Yellow Pear-Shaped.** A pretty little Tomato, which is used largely for pickling and preserving purposes; very prolific and makes attractive appearance when the vine is loaded with ripe fruit. Pkts. 5c and 10c. Oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.25.
- Yellow Plum-Shaped.** Little larger than the pear-shaped; deep yellow color, very popular for preserving. Pkts. 5c and 10c. Oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.25.
- Golden Queen Tomato.** Large and good, a great show Tomato at the County Fairs. Pkts. 5c and 10c. Oz. 20c. $\frac{1}{4}$ lb. 60c. lb. \$2.00.

Our Turnip and Ruta Baga Seeds are grown exclusively from perfect turnips, every one of which is selected and then transplanted for the growth of our seed. Hence, Turnip crops from our seeds must of necessity be very choice and most satisfactory in size, in trueness, in solidity and in beauty. Crops from our seed will prove infinitely better than much of the trashy seed sold for Turnip Seed, which for the careless manner in which it is grown and in inferiority of stock so frequently produces little more than Turnip Tops. Secure your supply from our superior stock.

GARDEN TURNIPS

Steckrube
Navel
Nabo

Culture. For early Turnips, sow as soon as the ground opens in Spring. THE EXTRA EARLY PURPLE TOP MILAN and EXTRA EARLY WHITE MILAN Turnips are the earliest of all, being of very quick growth and fine table quality; they are both flat strap-leaved varieties.

No. 327 should be sown from any time in July to first of August; but the other kinds, for Winter use, may be sown from the middle of July until the end of August. Turnips are generally sown broadcast, but much larger crops are obtained (particularly of the Ruta Bagas) by cultivating in drills 18 inches apart and thinning to 6 inches in the drill. Sow in drills, one pound to the acre; broadcast, two to three pounds to the acre.

313. **Red Top White Globe.** The handsomest and most salable Turnip. As a profitable sort for home or market it is unsurpassed. It is a large rapid growing sort, with globular shaped roots. Flesh pure white. The skin is white and purple, the under portion being white and the top bright purple. (See Illustration.) On account of its shape, it will out-yield any other sort. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

314. **Red or Purple Top White Flat Turnip.** This is one of the best table Turnips on the market, being fine grained and of mild flavor. It is white below, with a bright purple top; flesh white, leaves short, narrow and erect. Will mature in 8 or 9 weeks. A good cropper and an excellent keeper. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

327. **Ruta Baga Market Gardeners' Improved Purple Top.** Our Ruta Baga is select, yields enormous crops of handsome, large, solid, yellow-fleshed turnips; is grown largely for cattle food; keeps over Winter till Spring in good condition. Get our splendid stock, and the crops will satisfy and remunerate you. It is also used as a table vegetable because of its sweetness. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

321. **Southern Seven Top.** Hardest of all sorts; may be left standing in the open ground during winter. In the Southern States it yields in the Spring abundant foliage for boiling with cured meats, and is only desirable for this purpose. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

320. **White Egg.** Oval or egg shape, handsome and sweet; flesh firm and sound-grained. thin and perfectly smooth skin of snowy whiteness. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

323. **Early White Flat Dutch.** Pure white, flat strap-leaf Turnip. Early, medium size, excellent quality for early Spring sowing. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

324. **Purple Top Yellow Aberdeen.** Medium size, round, flesh pale yellow, tender and sugary, the plant is hardy and productive and keeps well. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

316. **Yellow Globe.** Yellow Globe is a wonderful cropper, and keeps far into the following year. It begins to bulb at the very start and forms large-sized roots and small tops. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

320. **Southern Prize or Dixie.** Makes large round white Turnips in addition to salad; hardy and needs no protection, the most popular Winter and Spring salad Turnip grown. Pkt. 10c. ¼ Lb. 15c. Lb. 35c.

322. **Large Amber Globe.** Flesh yellow, fine grained and sweet; hardy, keeps well, a good cropper. Very popular in the South. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

319. **Sweet German.** Should be sown a month earlier than flat Turnips. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

326. **Cow Horn.** A white Turnip of peculiar long shape and quick maturity. It grows to a large size, standing half out of the ground. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

317. **Golden Ball, Orange Jelly or Robertson's.** Flesh sweet and firm. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

318. **Yellow Stone.** Flesh crisp, tender, of fine quality. Oz. 10c. ¼ Lb. 15c. Lb. 35c.

329. **Long White French.** Flesh hard, crisp. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

Red or Purple Top White Globe Turnip

J. Bolgiano & Son, Baltimore, Md. The turnip seed I ordered from you this Summer is the best I ever planted. All came up and are doing fine. They are far better than those I have been paying twice as much for.

E. A. BANTON, Norfolk Co., Va.

305. **Extra Early White Milan** Extra-early, tender and delicately flavored; the bulb is of medium size, very handsome, smooth and of clear ivory-white both inside and out. Pkt. 5c. Oz. 10c. ¼ Lb. 25c. Lb. 75c.

315. **Extra Early Purple Top Milan.** Earliest Turnip in cultivation; a week sooner than any other. Flat, smooth, of medium size, with bright purple top and few leaves. Flesh white and choice. Adapted to Spring or Fall. A good keeper. Pkt. 5c. Oz. 10c. ¼ Lb. 15c. Lb. 50c.

328. **Large White Norfolk.** It is allowed to stand out during the winter in the South. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

325. **Pomeranian White Globe.** Good either for table or stock. Very productive. Oz. 10c. ¼ Lb. 15c. Lb. 40c.

Grass and Clover Seed Mixtures for Hay and Pastures

These Mixtures give the very best and most satisfactory results to customers, and our trade in them is increasing rapidly. The advantage of sowing grasses and clover seed in mixtures has long been recognized and the practice is increasing to a very remarkable extent all through the South. We are the pioneer seedsmen in Baltimore in putting up special mixtures for different soils, and the results to our customers have been exceedingly satisfactory, resulting in largely increased crops both of hay and pasturage. We will take pleasure in advising our customers as to suitable grasses for their soils and purposes. **We Have in the Following Mixtures** combined grasses suitable for the various soils and uses for which they are recommended. Those for permanent pastures are composed of grasses which succeed each other in growth, and give a succession from the first of spring until late in winter, while for those desired more for cutting for hay have combined grasses which ripen together. The different mixtures are prepared both as to quantity and varieties as best adapted to the soils and situations for which they are recommended. In all of our grass mixtures we use the very best seeds the quality and purity of the seeds being our first consideration. The quantity handled enables us to give our customers the benefit of a very low price, even lower than if they purchased the seed separately.

Grass Seeds

We desire to call particular attention to the fact that Grass Seeds are sold in the trade by sample, and each sort is divided into three or four grades of quality according to purity, germination and weight. The price of the best grade is often double that of the ordinary. Bolgiano's "Gold Brand" Grass and Clover Seeds are in every case the VERY HIGHEST GRADE.

1123. Tall Meadow Oat Grass. Evergreen Grass. Yielding twice as much hay as Timothy or Orchard Grass, early as Orchard Grass with more leaf and affording better grazing, it is not strange that this grass is becoming so popular. It will keep green all winter and all summer; the drought of late summers or the cold of winter does not injure it. It starts growing very early in the Spring, can be cut twice for hay, will yield good grazing until late in the Fall. It contains more flesh and muscle-forming material than Timothy, but it is not so fattening. For hay, it should be cut while in bloom. Tall Meadow Oat Grass is best adapted for rather light and dry loamy uplands, but gives excellent results on nearly all soils and better results than any other grass on light, medium soils. Sown alone use 1 to 3 bus. to the acre, either Spring or Fall. Sown in mixture, use 1 bus. Tall Meadow Oat Grass 1 bus. Orchard Grass and 6 lbs. Red Clover. It gives the very best results when sown with Clover. By adding 4 lbs. of Red Top or Herd's Grass to the mixture the grazing will be materially increased "Gold" Brand Fancy \$1.75 bus. "Silver" Choice \$1.65 bus.

1114. Orchard Grass. One of the best and most reliable grasses for the Middle and Southern States, either for hay or pasture. It succeeds well on nearly all soils, but does best on uplands, loamy or moderately stiff soils. It starts early in the spring and continues well into winter. It is of quick growth, and is relished by stock, especially when young and bears close grazing. It makes excellent hay, and gives the very best results mixed and grown with Tall Meadow Oat Grass and Red Clover. It should be cut when in blossom, as the hay is injured if the seed is allowed to ripen. It can be sown in the spring or fall, either with grain or alone. Sow two bus. per acre if sown alone, or with Red Clover, one and one-half bus. of Orchard Grass and seven pounds of Clover are the quantities usually sown. "Gold" Fancy Bus. of 14 lbs. \$2.65. "Silver" Choice \$2.50 per bus.

Supply Nitrogen to the Soil "FARMOGERM" High-Bred Nitrogen-Gathering Bacteria

It is well known that Nitrogen is the most expensive of fertilizing elements. It is also known that it is the plant food in which most soils are deficient. We are pleased, therefore, to be able to offer our patrons an improved and most reliable method of inoculating soil with Nitrogen-Bacteria. By moistening the seed of any leguminous crop to be planted with Farmogerm, not only is the immediate crop benefitted by this pure culture of high-bred nitrogen-gathering Bacteria, but the soil is enriched in nitrogen which will be available for future crops of any kind for two or three seasons. One of the important advantages which Farmogerm has over other and earlier preparations of this kind is the fact that it needs no treatment or development before using. It comes in bottles, ready for use with a little water, according to directions.

Soil inoculation is a big subject and the possibilities of it are only partly appreciated by many. We have no space for details here, but we hope our customers will write us for a free pamphlet on the subject which we will be pleased to send. It will pay handsomely to investigate before planting any of the following crops:—

Alfalfa, Alsike, Berseem, Crimson Clover, Red Clover, White Clover, Canadian Field Peas, Cow Peas, Soy Beans, Velvet Beans, Vetch, Lupins, Peanuts, Garden Beans, Garden Peas, Sweet Peas and other legumens. When ordering be sure and state for what crop Farmogerm is wanted.

We are prepared to supply Farmogerm for any one or all of these crops at the laboratory price of \$2.00 per acre, 10% discount on 25 acres, 15% on 50 acres, 20% discount on 100 acre orders.

Garden size, mixed culture good for Peas, Beans and Sweet Peas, at 50c a bottle. Also White Clover for lawns.

The U. S. Dept. of Agriculture says: "The pure culture method has come to stay."

Pea Vine on left had been treated with Farmogerm. Other planted without treatment.

Grass Seeds

Bolgiano's "Gold Brand" Seeds are the Standard of Purity

Bolgiano's "Gold" Brand Southern Grown German Millet

1117. Timothy Of Hay Grasses Timothy is one of the most popular, nutritious and palatable. On clay or heavy loams, lowlands or in mountainous districts provided there is an abundance of moisture, it produces the very best results. On sandy or light loamy ground, it does not do so well as Orchard, Tall Meadow Oat or Red Top Grass. If grazed or cut too close, the stand of Timothy will be seriously injured, besides it does not form as good grazing as many other grasses. From 1½ to 3 tons of fine hay to the acre. A splendid mixture is 6 lbs. Timothy, 4 lbs. Clover (either Mammoth Clover or Alsike Clover preferred as they mature at the same time as Timothy) 4 lbs. Fancy Red Top, ½ bu. Meadow Fesque. Together, these will produce most excellent hay, also nutritious and abundant pasture in good loamy, clay or low ground soils. 8 lb. Timothy and 6 lb. Clover when sown together. "Gold" Brand, 10c Lb. Bus. of 45 Lbs. \$4.65. "Silver" Choice \$4.50. Market fluctuates.

1118. Kentucky Blue Grass. An excellent pasturage and lawn grass, succeeding best on lime-stone land, but does well on stiff or clay medium soils. It is rather sensitive to heat, but not so to cold weather, and on this account does its best in the fall, winter and spring. It grows slowly at first, forms a compact turf, making a fine pasturage when once established. If it is best, however, to combine other grasses with it for either lawn or pasturage. Sow in the fall or spring at the rate of two to three bushels per acre. "Gold" Brand Seed, Lb. 25c. Bu. of 14 Lbs. \$3.35. "Silver" Choice, \$3.25. Special prices in quantity.

1120. Native or Canada Blue Grass. At the Maryland Experiment Station this grass remained a luxuriant green during the hottest summer when other grasses were materially affected by the heat. Being a grass of Canadian growth it will stand the cold weather admirably. Canadian Blue Grass should be tried by everyone not familiar with its excellent qualities. It is particularly well suited for mixtures. "Gold" Brand Seed, Lb. 20c. Bu. of 14 Lb. \$2.50. "Silver" Choice, \$2.25.

1111. Red Top, or Herd's Grass. This grass makes excellent pasturage and good crop of fine quality hay, and succeeds on a greater variety of soils than any others grass in general use, giving very good results on light soils, and the very best results on heavier, moist or low-ground soils. It is rather late in starting in spring, and matures its crop the same time as Timothy. Is excellently adapted for seeding with Timothy for hay, and furnishes excellent pasturage afterward. When it gets well established it spreads, and will gradually supplant other grasses. Our Gold Brand of the Fancy Clean Red Top is of extra fine quality; and carefully cleaned from impurities. We can also furnish the Choice and Prime Fancy Red Top as usually sold. It requires about 8 to 10 pounds to seed an acre of the Fancy Clean seed. When sowing with Timothy, sow 5 pounds of the Fancy Clean seed and 8 pounds Timothy per acre. It can be sown either in the spring or fall. "Gold" Brand Fancy Seed, Lb. 20c. 10 Lbs. or over @ 16c Lb. "Silver" Choice, 10 Lbs. or over @ 15c Lb. Prices fluctuate, quoted upon application.

1122. Meadow Fesque, Randall or English Blue Grass. It makes a most excellent hay and pasturage grass, and is particularly valuable for fall and winter pasturage, and it remains green throughout the winter. It is also a splendid spring and summer grass and usually makes more and thicker leafage than any other grass. It succeeds well in nearly all sections of the South, and should be very largely used for pasturage and hay mixtures, being specially suitable for sowing with Red Top and Timothy for hay, or with these and Orchard and Tall Meadow Oat for permanent pasturage. Sow either in the spring or fall at the rate of two bushels to the acre, if sown by itself. When sown with Red Top and Timothy, sow one bushel (14 lbs.) Meadow Fesque, 5 lbs. Fancy Clean Red Top and 6 lbs. Timothy per acre. Sown for a grazing mixture with Orchard and Tall Meadow Oat Grass, add half a bushel each of these two grasses. Price, "Gold" Brand, Lb. 30c. Bus. of 14 Lbs. about \$3.50.

Rye Grasses For Spring Planting

The Italian and Perennial Rye Grasses are really the quickest growing of any of the grasses, and will furnish a quick growing, most nutritious and leafy pasturage, at the same time making very good hay grasses. On account of their quick, early growth, they should be a constituent part of nearly all hay and pasturage mixtures.

1121. English or Perennial Rye Grass. A nutritious, permanent grass for meadows, pastures and mixing with others for lawns. When sown by itself, sow 30 pounds per acre, either in the spring or fall. "Gold" Brand. Lb. 10c. Per Bu. 14 Lbs., 85c.

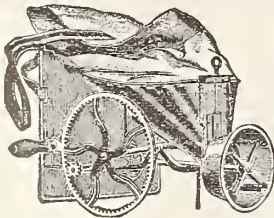

1172. Italian Rye Grass. It succeeds well on all soils and will stand more overflow than other grass. "Gold" Brand 10c Lb. Bu. of 14 Lbs. \$1.00.

1187. Hard Fesque. Thrives well in dry situations, where many other grasses fail; 30 pounds to the acre. Lb. 25c. Bu. of 14 Lbs., \$2.75.

1186. Sheep Fesque. A densely tufted perennial grass, roots deeply, and forms dense short 3 bushels per acre, if sown by itself. Sow about

Cochon's Broadcast Seeder.

Sows all kinds of clover, grass and grain seed; it will throw 40 ft. Price, \$2.75.

turf, furnishes excellent grazing. Sow 2 to 35 pounds per acre. Lb. 25c. Bu. of 14 Lbs. \$2.75.

1124. Red or Creeping Fesque. Forms a close, rich sod and is valuable in lawns and pastures. "Gold" Brand. Lb. 25c. 10 Lb. and over, 20c.

1116. Bromus Inermis or Awless Brom Grass. Both for grazing and for hay it is of especial value in mixtures with other grasses. Cattle graze on it with relish. Sow seed in the spring or fall, 25 to 30 lbs. per acre. Price, "Gold" Brand 15c Lb. Bu. 14 Lbs., \$1.60.

Millets

GERMAN or GOLDEN MILLET, Southern Grown

1125. Makes a large yielding and most nutritious hay crop, quick growing and easily cured. It should be seeded thickly, one bushel per acre, and should be harvested while in bloom. If the seeds are allowed to form, the stalks get hard and it does not make near so good a hay. Should be sown any time between the middle of May until the end of June. It matures a crop in six to eight weeks after seeding. Our Southern grown Millet makes much better growth than Western or Northern grown seed. "Gold" Brand Southern grown Millet, \$1.75 per Bu. of 50 Lbs.

1126. Hungarian Millet. For good low ground or rich soils, this makes even a more valuable crop than German Millet. It is considered equal in nutritive value to Timothy hay. Sow from the 1st of May until the end of July, one bushel per acre. "Gold" Brand, \$1.75 per Bu.

1170. Pearl or Cattail Millet, Pennicillaria. We have been experimenting with all the known forage plants, and have found nothing superior to Pearl Millet either in enormous growth or quality. It has produced the most abundantly and can be cut several times during the season. Drill in 2-foot rows, 10 Lbs. to the acre. Lb. 10c. 10 Lbs. @ 7½c per Lb. 100 Lb. @ 6½c per Lb.

1188. Crested Dog's Tail. A valuable pasturage grass, splendid for dry soils and hillsides. "Gold" Brand, Lb. 25c.

1189. Creeping Bent Grass. Similar to Red Top or Herd's Grass, and considered as good, if not better, than that variety. It has creeping roots, and spreads and holds to the soil in a very tenacious way; at the same time it is easily eradicated if desired. When sown alone use 25 to 30 lbs. to the acre. "Gold" Brand, Lb. 25c.

CLOVER SEEDS

Bolgiano's "Gold Brand" Seeds are the Standard of Purity
ALFALFA SEED

Alfalfa Yields Splendidly Throughout the South, Yielding 3 or 4 Cuttings Per Year.
Increasing in Yield Each Successive Year.

1128. Alfalfa ranks higher than timothy hay in feeding value. In fact, it might be termed both corn and hay, as it is almost a complete food. Experiment stations place the feeding value of Alfalfa hay at \$20 per ton, as against timothy hay at \$12 per ton. This, with the fact that Alfalfa will, under favorable circumstances, after a good stand is secured, give 3 or 4 cuttings per year, and will easily yield, on good land, 6 to 16 tons of splendid hay per year, shows what a valuable crop it is. Lands in the Western states that are well set in Alfalfa sell readily at from \$100 to \$200 per acre; so that a crop of this kind pays for the little extra care and preparation given to secure good stands and good crops. It is better to have five acres well set in Alfalfa, by thorough preparation, than to attempt to put in ten acres without first class preparation. The acreage of Alfalfa is increasing very largely all over the Middle and Southern States, our farmers are fast beginning to realize what a valuable crop it is for this section. Alfalfa will succeed and do well on any good loamy, well-drained soil, but the land must be well and thoroughly prepared for the best results. The plant is rather slender when it first starts, and must be grown under favorable conditions, in order to get ahead of the weeds and other grasses which would, under ordinary circumstances, spring up naturally and check it or smother it out. Alfalfa should always be cut when just commencing to bloom, whether the plants be large or small. If the seed is allowed to form, the growth of the plant ceases. It should never be used for pasture, it is too valuable as a hay producer to risk injury from stock. Alfalfa can be sown either in the Spring or Fall. The requirements to obtain good stands and good crops is to sow in good, rich soil and give thorough preparation. Alfalfa is usually sown broadcast, at the rate of 15 to 20 lbs. to the acre, although some of our customers claim that thicker seedings give better crop results. March and April are the best months for seeding in the Spring, and the latter part of August and during September the best in the Fall. Our Alfalfa seed is the highest grade, strong-germinating seed, of the best and cleanest quality it is possible to procure. The quality and germination of the seed is a prime requisite for success with this crop. Land well set in Alfalfa is better than a bank account, producing continuously increasing crops for years and is worth a little trouble and expense to secure a first-class stand. Price of our "Gold Brand" Fancy Seed. Bus. of 60 lbs. @ 20c lb. "Silver" Choice Alfalfa seed. Bus. of 60 lbs. @ 19c lb. Price fluctuates.

1129. Crimson Clover Seed New Crop. The Great Nitrogen Gatherer. The best crop for hay, soilage and green manuring. Fall, Winter and Spring pasturing. Crimson Clover furnishes an abundance of nutritive forage at seasons when pastures are dead. It is of an unending supply of manure. It solves the problem of cheap manuring. It is the great nitrogen gatherer and economizer in the use of fertilizers. Valuable for planting in orchards, berry patches, and for sowing among cultivated crops, such as Cabbage, Corn, Tomatoes, Cotton, Tobacco. Improves poor land, restores to fertility those that have been worn down by excessive cropping. May be planted in the Spring, Summer or Fall. Splendid for re-seeding Red Clover that has been Winter killed. Sow 12 or 15 lbs. to the acre. Bu. of 60 lbs. \$7.50. Write for latest market prices.

1130. Red Clover One of the most valuable farm crops, and is largely used for pasturage and hay, and is an improver of the soil. Red Clover is perennial, and will yield crops several years from one seeding, and on good land will yield two or three cuttings per year. The first crop makes a rich feed, and is most valuable for hay. The second crop does not make so good a quality feed. Red Clover should be cut for hay when in full bloom. For hay, it is particularly well adapted for sowing with Orchard and Tall Meadow Grass, as it ripens at the same time, and owing these three grasses together will give larger yields and of better quality hay than sowing either alone. It is also largely sown with other grasses, both for hay and pasturage. Information as to quantities required per acre, when sown in combination with other grasses will be found under the heading of Orchard Grass, Tall Meadow Oat Grass and Timothy. When sown by itself, sow 10 to 12 lbs. to the acre, either in the Fall or Spring, or at the last working of corn. Price of Fancy Red Clover Seed, choicest and cleanest quality, our "Gold Brand", Bu. of 60 lbs. @ 16c lb. "Silver" Brand Choice seed, Bu. of 60 lbs. @ 15c lb. Price fluctuates very much. We will quote prices at any time, or will fill any orders entrusted to us at as low prices as possible for first class seed.

"Gold" All That Word Implies. C. L. Steele, Perry Co., Pa., writes March 19th, 1909: *The Red Clover Seed I bought from you last Spring was the best I ever saw. I believe every grain grew and made a stalk. It was marked "Gold" true to name in all that word implies.*

1132. Alsike Clover This is somewhat similar in growth and appearance to Red Clover, but it is hardier and stands cold weather better than Red Clover, and where conditions of soil and lateness of seeding make any possibility of Winter-killing, it is advisable to sow Alsike Clover, or at least sow it in mixture with other Clovers. It is more suited for mountainous sections than to the coast regions, and it succeeds better on stiff or clay soils than on lighter lands. It is well adapted for sowing with Timothy or Herd's Grass, as it matures with these crops, flowering a little later than the Red Clover. The blooms are not quite so large as the Red Clover, and are of light pink or flesh color. Price of our "Gold Brand" seed, Bus. of 60 lbs. @ 16c lb. "Silver" Choice Seed, Bu. of 60 lbs. @ 15c lb.

1113. Japan Clover We do not recommend this Clover for land that can be successfully grown in any other grasses or Clover, but on waste land or poor, worn out soils it will furnish excellent, nutritious pasturage. Sow at the rate of 10 lbs. per acre, in March or April. Lb. 25c. 10 lbs. @ 20c. 25 lbs. @ 19c.

1131. Mammoth or Sapling Clover Is similar to Red Clover in appearance of seeds and habits of growth, the difference being larger growth and later maturing. It is often used for hog pastures as a soil improver to plow under. It is a good variety for thin soils, or to seed with Timothy, Meadow Fesque or Herd's Grass or Red Top, as it matures about the same time as these grasses. Sow 10 to 12 lbs. to the acre when sown alone. When sown with Timothy, use 6 lbs. Sapling clover and 8 lbs. Timothy to the acre. "Gold Brand" Fancy, Bus. of 60 lbs. @ 16c lb. "Silver" Brand Choice Seed Bus. of 60 lbs. @ 15c lb.

1133. White Clover This is largely used in lawn and permanent pasture mixtures, and is indigenous to the soils throughout the Middle and Southern States. It makes a small, close, compact growth, covering the ground like a carpet. It affords excellent food for bees. Sow in either Spring or Fall. When sown by itself, sow at the rate of 5 to 6 lbs. per acre. It is better, however, sown in mixture with other grasses. "Gold Brand" Fancy, 1/4 Lb. 10c. 1/2 Lb. 15c. 1 lb. 25c. 5 lbs. \$1.15.

Bolgiano's "Gold Brand" New Crop
Crimson Clover.

Dwarf Essex Rape.

1149. Hairy Vetch. (Vicia Villosa.) VICIA VILLOSA succeeds and produces as good crops on poor sandy soils as on good land; grows to a height of 4 or 5 feet. It is perfectly hardy throughout the United States, remaining green all winter, and should be sown in the Spring, mixed with oats, spring rye or barley; or during August or September, with winter rye, which serves as a support for the plants. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every Dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. Sow 50 to 60 lbs. per acre with 1/2 bu. of rye, oats or barley. "Gold Brand," 1 lb. 10c. 10 lbs. @ 7c. 100 lbs. @ 6 1/2c.

1150. Spring Vetches or Tares. Closely associated with Peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with oats, for mowing and feeding to stock. Use 2 to 3 bus. to the acre broadcast, or one to 2 bus. in drills. Sow in Spring while the ground is cool and moist, or in early Autumn. "Gold Brand," 1 lb. 8c. 10 lbs. @ 4 1/2c. 50 lbs. @ 4 1/4c. 100 lbs. @ 4c.

1127. Dwarf Essex Rape. Valuable for Cattle, Sheep and Hogs. Under favorable conditions Rape is ready for pasturing sheep or cattle within six weeks from the time of sowing, and on an average one acre will carry from 12 to 15 sheep six weeks to two months. When on the Rape they should at all times have access to salt, but water is not necessary. As it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of Rape excels all other plants we know of. Sow 4 lbs. per acre broadcast. 2 to 3 lbs. per acre in drills. If by mail add 8c per lb. 8c lb. 10 lbs. @ 6 1/2c. 100 lbs. \$5.00.

H. M. WILLIAMS, Washington Co., N. C., writes: *"The Dwarf Essex Rape I bought of you has made fine pasture for my cattle and hogs through winter."*

Bolgiano's Wonderful "Prosperity Corn."

1139. **Mammoth Golden Beauty Corn.** Has the largest ears of any 100-day corn. It outyields many other corns. The increased yield repays the seeds many times over. Growers should make sure of getting the largest yield and most handsome grain to meet competition and secure the highest prices. Ears usually averaging from 9 to 12 inches long and from 20 to 30 rows on the cob, some of the stalks bearing from 3 to 5 ears. Then why use your poor stock any longer? It has produced 150 bushels shelled corn to the acre. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1140. **Reid's Yellow Dent.** This comparatively new variety of half Dent Yellow Corn is rapidly gaining great favor as a general crop corn between latitudes 38 and 43, as an early general crop sort, and in the far northeast as an early ensilage corn. It is a heavy yielder in the cotton states. It has a red cob, and matures in 90 to 100 days. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1143. **Improved Leaming Corn.** Its extreme earliness and fine quality has made it very popular with the farmers, and especially with those in the localities where the seasons are short. It produces from 65 to 90 bushels to the acre, in accordance with the quality of the soil. The ears and grains are of medium size. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bu. \$1.25.
1138. **Long's Prolific.** Is the climax of 25 years of corn breeding and selection by Mr. I. S. Long. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.50.

White Varieties of Seed Corn

1145. **"Hickory King" White Corn.** So large are the grains and so small the cob that on an ear broken in half, a single grain will almost cover the cob section. Of strong growth, the stalks take a firm hold in the ground and stand upright, resisting severe storms. It yields splendid crops on light soils, and is undoubtedly the best and most productive White Field Corn for the South. Pkt. 5c. Pt. 10c. Qt. 15c. Gal. 25c. Pk. 40c. Bus. \$1.35.
1054. **Red Cob 90-Day Corn.** This corn needs a long-felt want, because it can be used as a roasting ear corn and when fully matured makes a first-class Crop Corn for feeding stock. The ear is large, handsome, suits for an early crop or for a late crop, because it matures in 90 days. This makes it always a safe and profitable crop. Doz. 25c. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1142. **Maryland White Corn.** This very handsome Corn is the favorite of old farmers who like a big grain or a small cob. The grain is pure white, with good-sized ear, having ten rows to the cob. Used for general crop. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1180. **Improved Southern Snowflake.** Matures in 100 days, grows 8 feet in height. Produces 2 ears to the stalk. Makes Meal of the finest quality. Pkt. 5c. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1148. **Bolgiano's Cuban Giant Ensilage Corn.** We have thoroughly tested the Cuban Giant beside all large white grain ensilage varieties. Grains are pure white, very large, broad and long. Of stronger vitality than any other variety. It is the best milk producer of all ensilage Corns, being as sweet as Sugar Corn. Outyields the Red Cob Ensilage and is 10 to 12 days earlier. It is the most perfect corn we have found in our years of experience. Pt. 10c. Qt. 15c. 4 Qts. 30c. Pk. 45c. Bus. \$1.50.
1179. **Blount's Prolific.** One of the largest yielding varieties for the South, produces 3 to 6 ears white, flinty corn to the stalk. Makes excellent Meal. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.
1177. **Iowa Silver Mine.** This very popular variety of white dent corn, originated in Northern Illinois. It matures in about 100 days, and is a good grain yielder throughout the corn belt and eastward, and is becoming quite popular in the South. Pt. 10c. Qt. 15c. 4 Qts. 25c. Pk. 40c. Bus. \$1.25.

KAFFIR CORN. The Great Forage Plant

1147. **White Kaffir Corn.** Makes most nutritious feed for stock and poultry. Kaffir Corn in the last few years has been generally sown with Cow Peas, broadcast at the rate of a peck of Kaffir Corn to a bush of Cow Peas per acre. The Kaffir Corn helps to hold the Cow Peas up off the ground, and thus causes a larger growth of Cow Peas, and both can be cut together, making an enormous yielding crop of most nutritious feed. For a forage crop, when sown by itself, Kaffir Corn should be sown broadcast at the rate of from 3/4 to 1 bushel per acre. When sown for a forage crop, either by itself or with cow peas, the crop should be cut before it is headed out. Pkt. 5c. postpaid. 1 lb. 10c. Peck 30c. Bushel of 50 pounds, 85c. Special Price in Quantity.
1169. **Red Kaffir Corn, or Sorghum.** Non-saccharine. The plant is low, stalky, perfectly erect. The stalk as well as the blades, cures into excellent fodder, and in all stages it is available for green feed. Pkt. 5c. postpaid. 1 lb. 10c. Peck 30c. Bushel of 50 pounds \$1.00. Special Price in Quantity.
1146. **Early Amber Sorghum.** Furnishes a large yield of most nutritious forage, which can be fed either green or cured, and will yield 2 or 3 cuttings a year, stooing out thicker each time it is cut. It grows 10 to 12 ft. high. Sow broadcast for forage at the rate of 1 to 1 1/4 bus. per acre. When sown in drills sow at the rate of 1 peck per acre in drills 3 1/2 to 4 feet apart. Pkt. 5c. 1 lb. 10c. Qt. 15c. Pk. 50c. Bushel of 50 lbs. about \$1.50.
1158. **Early Orange Sorghum.** This variety is rapidly growing in favor wherever it is grown, similar in growth to the Early Amber, but it is claimed that it produces a heavier crop. Pkt. 5c. 1 lb. 10c. Qt. 15c. Pk. 50c. Bushel of 50 pounds, \$1.50. Price fluctuates.
1069. **Connecticut Field, or Large Yellow Pumpkin.** Excellent for growing in corn. 1 lb. 20c. 10 lbs. for \$1.50.
- 1058 1/2. **Kentucky Field Pumpkin.** Very large and flat, grown extensively and profitably in Corn Field. 1 lb. 10c. 10 lbs. for \$1.50.

BOLGIANO'S CUBAN GIANT ENSILAGE CORN

Say! Where Did You Get That Corn?

On Oct. 1st, 1910., Mr. L. W. Hammersley of Campbell Co., Va., writes as follows: "On April 16th, 1910, I purchased half bushel of Bolgiano's Famous Prosperity Yellow Dent Corn from you, and from the corn produced from this seed I got from the Lynchburg Fair, Sept. 27, 28, 29 and 30th, out of \$1400 prize offered, I got \$119. Six counties were represented at this Fair, and there was a great demand to know where and from whom I purchased this seed, and I could have sold every bushel of my crop at \$2.50 per bushel, but that would be doing you as well as myself a great injustice, for I feel that only just and honorable to myself I turned them over to you. Twenty thousand people visited this Fair daily. I have been dealing with you for twenty years and if you wish any reference as to the reliability and truthfulness of this statement we refer you to Mr. John Victor, President of The Peoples National Bank of Lynchburg, Va.

They Are As Good As "Gold"

On August 19th, 1910, Mr. H. C. Dorsey of Anne Arundel Co., Md., writes as follows: "I produced 130 tons of Hay off 40 acres of Timothy and Clover from Bolgiano's, "Gold" Brand grades of these seeds sown the previous August."

Cow Peas

The great soil improvers. Make poor land rich. Make good land more productive. Also make a splendid and nutritious green forage or hay crop, enriching the soil even when the crop is cut off.

1175. **Mixed Cow Peas.** We strongly recommend sowing the Mixed Cow Peas as a soil improving crop. The upright growing varieties holding up the vining varieties, they will make much better and give more satisfactory results, yielding better crops of vines and more forage. They are composed of the Blacks, Black Eye, Clays, Whip-poor-wills, Wonderfals, New Era and Soja Beans. If once tried you will sow no others where large crops are desired. Please Write Us for Prices.

1162. **Black Cow Peas.** Seed medium sized and Black. Vines trailing. Seed matures early. Please Write Us for Prices.

1163. **Clay Peas.** Seeds medium sized and cream colored. Vines grow tall and erect. Seed matures medium late. Please Write Us for Prices.

1164. **Whip-Poor-Will.** Vines erect, Seed large and mottled red and white and matures early. Good to grow between corn. Please Write Us for Prices.

1166. **Wonderful or Unknown Pea.** Seed medium sized and buff. Vines erect if planted late, trailing if planted early. Seed matures late. Please Write Us for Prices.

1167. **Soja Beans.** The great drought-resisting forage crop; unsurpassed in nutritive value for feeding, also makes a splendid soil improver. Please Write Us for Prices.

1168. **Black Eye.** Vines erect. Seeds medium sized and white, matures medium late. Please Write Us for Prices.

1190. **Red Rippers.** Red seeded, resembles Black Cow Peas in growth of vines, but 10 days earlier and more prolific. Please Write for prices.

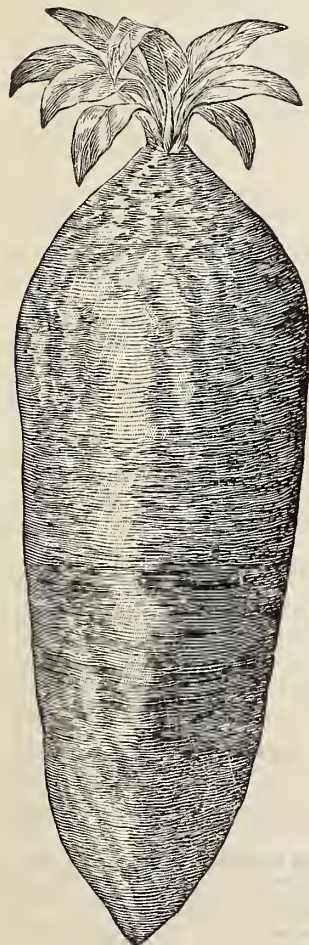

1165. **Canada Field Peas.** Under favorable circumstances it will yield more good hay to the acre than any similar crop that can be seeded early in the spring, and it makes a complete food, feeding grain being unnecessary when horse and cattle are fed oat-pea hay. Sown in January, February or early March, 1 to 1½ bushels per acre, and same quantity of Burt or Spring Oats. Pk. 45c. Bu. \$1.65. Write for prices.

New Era Cow Peas. 43 Days After Planting.

1159. **New Era.** This new extra early Cow Pea is unquestionably one of the most valuable varieties in cultivation. It is quicker in growth than any other Cow Pea in cultivation; makes a very large growth of vine and very prolific yield of Peas. The vines stand upright, enabling the Peas to be easily gathered. The Peas are fully one-third smaller in size than the ordinary Cow Pea, so that it does not require nearly as many to seed an acre. Please Write Us for Prices.

Seed Oats, Rye, Buckwheat, Flax, Etc.

1156. **Burt, or 90-Day Oats.** The earliest, most prolific and surest cropping of Spring Oats; far superior to ordinary spring or rust-proof oats for spring seeding. Wherever this Oat is grown it comes into great favor. For a Spring Oat for seeding in March and April it is the best and surest of Spring Oats. It is earlier to mature, free from rust, healthy, clean and vigorous growth of straw, and makes a very good yield of clean, bright and heavy grain. On account of its earliness to mature, it escapes the dry hot weather we frequently experience in June, and is on this account, one of the surest cropping varieties of the South. Color and appearance of grain somewhat resemble the rust-proof Oat, but it is a little lighter in color. Pk. 25c. 75c Bu. Write for Prices on large lots.

1161. **Virginia Gray Winter or Turf Oats.** When sown before the middle of March, these Oats will far outyield the ordinary Spring Oats, making a larger crop and heavier grain. Sow at the rate of 1½ to 2 bushels per acre, Pk. 25c. Bu. 75c. Please write for Prices on large lots.

1191. **Red Rust-Proof Oats.** These oats are very popular throughout the South. Pk. 25c. Bu. 75c. Prices fluctuate.

1157. **White Spring Oats.** Sow at the rate of two bushels per acre in February, March or April, the earlier the better. Price of our Gold Brand, (heaviest and cleanest quality) about 65c per bu., "Silver" choice quality. White Spring Oats, about 55c per Bu. Please write us for Market prices.

1160. **Japanese Buckwheat.** This variety of Buckwheat ripens a week earlier than the Silver Hull and yields more largely than that variety. Pk. 30c. Bu. about 90c. Please write for prices.

1178. **Silver Hull Buckwheat.** A prolific sort, making a fine quality of flour. Pk. 35c. About \$1.00 per Bu. Please write for prices.

1135. **Spring Rye.** The straw is equally as valuable as that of the fall or winter rye, standing stiff 7 to 8 feet high. Produces 30 or 40 bushels of grain per acre. As it does not stool like winter rye no less than 2 bu. to the acre should be sown. Pkt. 10c. Pk. 40c. Bu. \$1.25. Please write for prices.

1194. **Flax.** When grown for seed, sow one bushel to acre; if fibre is wanted 2 to 3 bushels. Lb. 10c. (postpaid 18c.) Pk. \$1.00. Bu. of 56 lbs. \$3.75.

Mangel-Wurzels. 4 Lbs. to the Acre

1151. **New Jumbo Mangel.** For milch cows and cattle generally, the New Jumbo Mangel has no equal. It is a milk producer of the highest quality and at the same time keeps cattle over winter in prime condition. It will outyield any other Mangel 2 to 1. It is easy to grow, producing immense roots in great quantities thus yielding a most profitable crop. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c. 5 Lbs. \$1.10.

1152. **Gate Post Mangel.** The name indicates the immense size of this fine flavored Mangel. The milk it produces when fed to cows is of the richest character. As one experienced farmer puts it—"The Gate Post Mangel is a butter and milk producer of the first merit." If you want the best Yellow Mangel you ever grew, send for Bolgiano's Gate Post Mangel. Oz. 5c. ¼ Lb. 10c. ½ Lb. 15c. Lb. 25c. 5 Lbs. \$1.10.

Culture of Flower Seeds.

Provided the soil is in a proper state, flower seed may be sown in the open border in the month of April and May, or as soon as the soil becomes dry and easily crumbled, after the spring frost has disappeared. They may also be sown in prepared beds of light, rich soil, and transplanted into the garden. The former is the more simple method but not always as satisfactory. The better plan is to sow all fine seed under glass in the house, hot-bed or in a green-house. As to the depth to which seed should be covered, the best general rule is to cover fine seed very lightly, just enough to protect them from the sun; and in extremely dry weather a sprinkling of damp moss is very useful. With very fine seed it is best to sow on the surface, and press them lightly into the soil. We are convinced that one of the most frequent causes of failure is in sowing the seed too deep, and seedmen are unjustly censured, when fault lies with the cultivator.

Explicit cultural directions are printed on all our packets of flower and vegetable seeds. With that help you are sure of success.

Price, 20c each; 6 for \$1.00.

Peonies The King of Flowers. Hardy Everywhere.

Peonies succeed best in deep, rich, sandy soil. They are hardy everywhere, and after once becoming established, take care of themselves year after year, producing gorgeous, beautiful flowers every spring. Peonies are exceedingly effective planted singly or in groups. The profusion and duration of bloom, combined with handsome, massive foliage, graceful appearance and easy culture place them among the most popular hardy plants. Our roots have from 2 to 5 eyes each and are the best that can be bought.

Beautiful New-Named Varieties

There is nothing to compare with these new varieties of Peonies when in bloom. They bear immense flowers of the richest hues and of the most delicious fragrance. Peonies are of the easiest culture, and every year after planting they increase in value. They are hardy everywhere; bloom freely, insects do not trouble them, and for the minimum of cost they pay many fold in their beautiful loveliness. To aid those unacquainted with the different named varieties, we have made up two collections of the very best sorts.

Bolgiano's "Square Deal" CHICK STARTER

A Primary Food for Baby Chicks up to Three Weeks Old
This is a primary food for Baby Chicks, and contains only the best selected re-cleaned, sound, sweet cracked grains and seeds, in proper proportions essential for quick and healthy growth. 5 Lbs. 20c. 10 Lbs. 35c. 25 Lbs. 65c. 50 Lbs. \$1.15. 100 Lbs. @ \$2.25.

How to Feed Baby Chicks
They should be fed nothing until they are 24 hours old. Keep them good and warm is all that is necessary. Baby chicks are hungry all the time, and have to be fed every few hours. Scatter about a pint of Chick Starter on the floor among an inch or two of Bolgiano's Square-Deal Alfalfa Meal, for 50 Chicks. Only feed as much at a time as they will eat up clean and do not over-feed. Keep clean fresh water before them all the time. After they are three weeks old then feed with Bolgiano's Square-Deal Chick Food.

Bolgiano's "Square-Deal" CHICK FOOD

Quickly Develops Growing Chicks
This is a carefully selected and complete food for small chicks it is a high grade mixture of re-cleaned, sound sweet cracked grains and seeds and there is nothing like it for chick feeding, for growth, health, and development of bone, flesh and feathers. 5 Lbs. 20c. 10 Lbs. 30c. 25 Lbs. 60c. 50 Lbs. \$1.10. 100 Lbs. @ \$2.10.

How to Feed Growing Chicks
Feed by scattering about a pint of it on the floor in Bolgiano's "Square-Deal" Alfalfa Meal for 25 chicks, where they will scratch for it. After they are 8 weeks old then feed. Bolgiano's "Square-Deal" Poultry Food.

Gives Them a Healthy Vigorous Start.
On March 15, 1910, Mr. A. J. Street of Harford Co., writes as follows: "Please send me this year's prices on your Chick Feeds. I have fed your Chick Starter to my Prize Winning S. C. Buff Orps and find diarrhoea unknown when so fed as well as giving them a healthy vigorous start."

"Square Deal" Chick Starter Prevents Diarrhoea
Chas. S. Grason, Baltimore Co., Md., writes Feb. 26, 1909, "I have found by actual use in comparison, that Bolgiano's Square Deal Chick Starter Food has the great advantage over all prominent foods on the market, in that it does not give the baby chicks diarrhoea."

On May 23d, 1910, Mr. A. J. Garret, of Baltimore Co., writes as follows: "Out of all the different brands of Chick Food I have used my chicks thrive better on Bolgiano's Square Deal Chick Food than any I have ever used."

Credit To Its Name
C. E. Jensen, Atlantic Co., N. J., writes March 4, 1909. "I am in receipt of your "Square-Deal" Chick Starter, and "Square-Deal" Chick Food, and it is so good, it certainly gives credit to its name of "Square-Deal."

F. P. C. Chick Manna

Or Health Food For Little Chicks. Promotes and Preserves Health

To the Poultry Keeper. To produce a food adapted for the first feeding of little chicks and at the same time overcome some of the difficulties attending success in raising chicks profitably, has been the consideration of the manufacturers of Chick Manna. As a result we have placed upon the market a food that has merited the praise and admiration of poultry keepers, comprising a variety of nutritious food and health preserving properties so proportioned and combined to be peculiarly adapted to promote health, quick growth, and strong development. Contains: Granular corn and oats, crackers, wheat, middlings, gentiano, zingiber, creta, anisum, ferri sulphas, sodium chloride sulphur, starch meat and bone.

Chicks when first hatched need no food for at least from 12 to 24 hours. Chick Manna should be the first food and exclusively fed for 10 days or more, after which time other feed may be given but should contain a part of manna for at least a few days longer. In feeding Chick Manna to chicks that have been fed on other feed, let Chick Manna be a part only of feed for first day.

Directions for Mixing. To one-half pint Chick Manna add four table-spoonfuls milk or water (milk preferable.) Mix well and feed. Another convenient way to prepare for feeding is to moisten with milk or water, so that it may be made into a cake, dried in a stove, and then crumbled as needed.

If convenient, give little chicks milk to drink in preference to water. If the latter is given, let it be fresh and pure. Don't let them suffer for want of something to drink.

“Buckeye” Guaranteed Incubators

Buckeye Incubators

Anybody Can Hatch Chickens With a “Buckeye,” the Best Incubator in the World.

Here's Our Money-Back Guarantee

This Buckeye Incubator is guaranteed to hatch a chick from every hatchable egg. The purchaser can operate it for forty days, and if it does not meet with his entire approval it may be returned to us or our agent and the price paid will be promptly refunded.

The “Buckeye” is so simple that a child can operate it. If you can't operate a Buckeye, it won't cost you a cent. It's easy to keep every egg in exactly the same temperature all the time with the “Buckeye Circulating Hot Water System.” It's a self-regulator. For 21 days it never changes or fails. The only thing you have to do is to keep the lamp burning and turn the eggs twice a day.

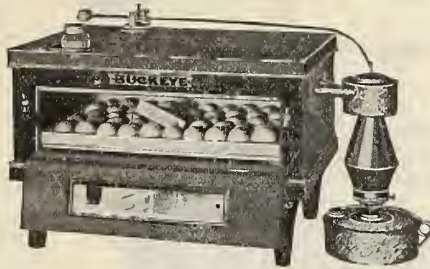

There is nothing cheap about Buckeye Incubators but the price.

We make the Buckeye Incubator in three styles, **Style A, Style B and Style C**, and they hold 50, 100 and 200 eggs.

Style A Buckeye Incubators are built with a double thickness of one inch lumber that has an insulation of heavy building paper between the two walls, insuring an absolutely uniform temperature in the egg chamber, regardless of outside temperature.

This style is equipped with a “Nursery” which is a space beneath the egg tray to receive the chicks after they are hatched.

Each machine receives one coat of filler and two coats of varnish, and when finished they present the appearance of a piece of fine cherry furniture.

Style B Buckeye 60-Egg Incubators

Double Walls Throughout.

Complete, Ready to Use \$7.00

Equipment.—One tank and boiler, one lamp bowl, one burner with wick, one chimney, one thermometer, 1 thermometer holder, 1 complete Buckeye regulator, 1 egg tester and 2 egg trays.

Weight.—Crated for shipment, 45 pounds.

No. 1, 100 Egg Capacity, \$12.00

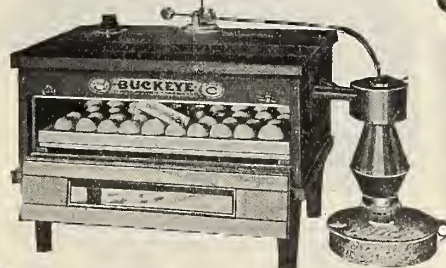

Complete with lamp, thermometer, egg tester, and extra egg tray. Ready to use.

No. 2, 200 Egg Capacity, \$18.00

Complete with two lamps, two thermometers, egg tester and extra egg tray. The most convenient incubator ever built. Fill both sides or either side alone. Fill one side one week and the other side the following week if you wish. It's two 100-egg incubators in one machine. No saving up eggs until they spoil. Each side a perfectly equipped incubator. Ready to use.

Style C, Buckeye Incubators are the result of a demand for the cheapest incubator we can build that will give satisfactory results. Instead of using two thicknesses of lumber in the construction of the case we use but one; instead of two coats of varnish they get but one; and while practicing some further economy on the hardware and regulator, they retain the same high standard of efficiency.

So far as results are concerned our Style C Buckeye Incubators will give equally as good hatches as will Styles A or B, if operated under normal conditions where the temperature will not vary over 15 degrees in 24 hours. Under other conditions we decidedly advise Styles A and B.

STYLE C Buckeye 50-Egg Incubators

Single Walls Throughout.

Complete Ready to Use \$6.00

Equipment.—One tank and boiler, one lamp bowl, one burner with wick, one chimney, one thermometer, one thermometer holder, one complete Buckeye Regulator, one egg tester and two egg trays.

Weight.—Crated for shipment, 35 pounds.

No. 1, 100-Egg Capacity, \$10.00

Complete with lamp, thermometer, egg tester, and extra egg tray. Ready to use.

No. 2, 200-Egg Capacity, \$15.00

Complete with lamp, thermometer, egg tester and extra egg tray. Ready to use.

The equipment of every incubator consists of legs, lamp, chimney and burner with wick, 2 egg trays, egg tester, tested thermometer, and thermometer holder, in addition to which there is a nursery tray with style A.

Every Buckeye Incubator is **ready to use** when delivered.

No “putting together” necessary and no extras to buy. **ORDER IT TODAY** and start it on that 40 days' trial.

“Buckeye” Brooders or The Secret of Chick Raising

Chicken raising don't end with the hatching. The old hen provides a place where the chicks can get warm, and another place to exercise and eat.

That's what we do in Buckeye Brooders.

It's hardly fair to the old hen, but we must tell you that a **good artificial brooder** is better than she is.

Chicks must have a **certain kind of heat.**

That is—it must be just “so warm” or they suffer. A temperature that is either too warm or too cold will produce bowel troubles and bowel troubles are bad for little chicks.

In addition to this proper heat, **they must have plenty of fresh air**; if they don't get it, they won't thrive.

And last, but not least, **we must prevent them from crowding.**

We'll begin with our **Lamp Heated Brooders.**

First of all these brooders are heated by the same system used in Buckeye Incubators—**circulating hot water.**

It keeps every corner of the brooder at **exactly** the same temperature.

And its that **even distribution of heat** that prevents the chicks from crowding.

If one point in a brooder is warmer than another each chick tries to get there.

We have a heat regulator on Buckeye Brooders that takes care of every condition.

It absolutely controls the heat of that brooder regardless of conditions.

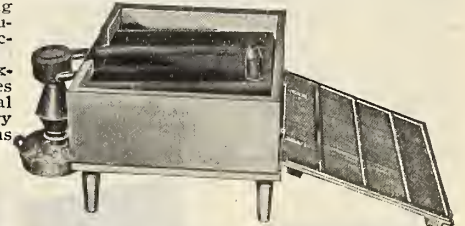

It's a good bit harder to regulate the heat in a brooder than in an incubator.

Because there are times when only a few chicks are inside and there are other times when they're all inside and each chick makes **some heat**—but—

When you once regulate the temperature to a particular point **it will stay right there 24 hours** every day.

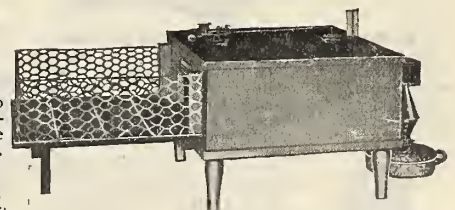

Little Chicks **must have fresh air** and we give them plenty of it.

We have a constant circulation of fresh air **every minute in the day.**

"Buckeye" Lampless Brooders

You know that you can be perfectly comfortable in a cold room if you have plenty of blankets over you, in fact, if you know how to sleep under the most healthy conditions you won't have any fire in your room at all. The heat that keeps you warm is supplied by your own body, the blankets simply keep it in. That's the principle of the lampless brooder. The chicks get under the blankets and keep warm. On the inside of each Buckeye Lampless Brooder we suspend a whole lot of little flannel blankets from a burlap roof that is stretched across the top. The conditions in these lampless brooders are exactly the same as we find under the hen. When a chick gets under a hen he pushes his back up against the feathers and he's satisfied. The blankets in Buckeye Lampless Brooders take the place of feathers. The chicks get under them, push their backs up against them and they're satisfied. **That's why they don't crowd.**

General Brooder Information

All Buckeye Brooders are raised from the ground.

That avoids dampness and protects them from intruders. Each brooder is furnished with an exercising room—The chicks eat in one room and sleep in another. Every Buckeye Brooder leaves the factory complete—ready for use. We send everything you need. There are no "extras" to buy.

Buckeye Colony Houses

Buckeye Colony houses are six feet long and three feet wide—just large enough for fifty chicks. The roost is only a foot from the ground, and its the kind of a roost that a chick will use. Either house can be "set up or taken down" in ten minutes and the only tool necessary is a screw driver.

"Buckeye" Portable Poultry Houses
We have the reputation of building "The Best Portable Houses on the Market." And the best part of that reputation is, "We earned it." It's mighty poor economy to save a few dollars in building a house and lose twice as many on the chickens that die from Roup and colds. It takes ten minutes to erect a Buckeye Portable House, or ten minutes to take one down.

The rake for leveling, raking and cultivating the crops while they are small, the scuffle hoe for breaking the soil which may become hard from rain, baking or stamping, the two cultivator teeth for making small furrows, deep cultivating, etc. Price, \$3.25.

The New "Kant-Klog" Sprayer

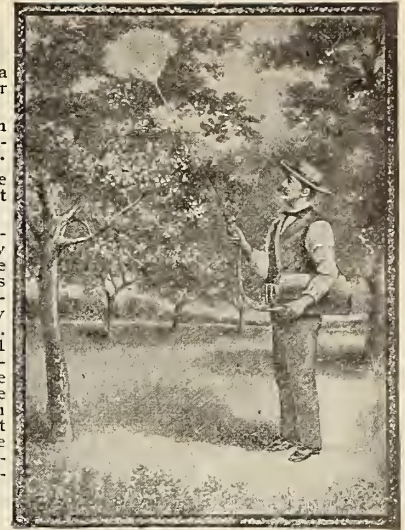

Kant-Klog Sprayer style "G" is operated by compressed air, with a patented Kant-Klog nozzle that throws nine different sizes of round or flat sprays and solid streams.

The sprayer body is made of heavy galvanized steel. Top and bottom are dome shaped; joined to body under heavy pressure, making a complete double seam.

The air pump is made of heavy brass two inches in diameter, hose couplings are solid brass, standard cut ends, heavily ribbed to prevent hose from slipping off.

A few seconds working of the air pump thoroughly agitates the solution and charges the sprayer with compressed air. This being a very powerful and elastic force, will, as soon as the thumb presses the "shut-off," force out the liquid in a form of a spray or a solid continuous stream as desired. After sprayer is charged you need not stop for anything; just walk along from one row to another, the machine will supply sufficient spray to enable you to do the work as fast as you can walk. When properly charged, the tank contains 3 gallons of solution and 1 gallon of compressed air; and two workings of the air pump will discharge the entire contents. Used in greenhouses, poultry houses, the garden and for all plant life including trees. The "Kant-Klog" nozzle furnished with each machine without extra cost, and special attention is called to this nozzle, as it is the only one that can be cleaned without stopping the spray or removing the nozzle. The first and only nozzle ever made that gives both flat and round sprays, or solid sprays. By express or freight, not prepaid. Galvanized steel reservoir, with "Kant-Klog" nozzle, complete, \$4.50.

With brass reservoir and "Kant Klog" nozzle, complete, \$6.00.

The "Auto Spray"

The name "Auto Spray" stands for a perfect compressed air sprayer. "The Auto Spray" works automatically for from six to fifteen minutes and may be charged in fifteen seconds by a stroke of the plunger. The "Auto Spray" is the result of valuable original ideas, ingenuity and mechanical ability. One boy with an "Auto Spray" will easily do as much as three men with a hand atomizer or any other hand device.

The "Auto Spray"

Diameter 7 in., height 2 ft., 4 gal. tank, with our patent inward lock seam, brass connections, stopcock and nozzle, are turned out of solid brass and not stamped out of thin sheet metal.

No. 1 Brass Tank; with stopcock, \$6.00; with "Auto Pop," \$7.00.

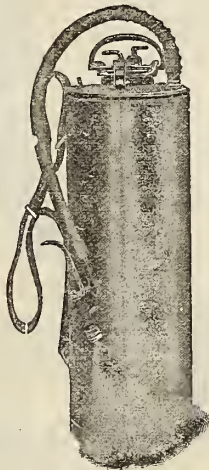

No. 1 Galvanized Tank, with stopcock, \$4.50; with "Auto Pop," \$5.50.

Brass Pipe, 24 in. long, 50c.

Leather Washers for Pump, 10c.

Leather Washers for Nozzle, 5c.

No. 1 "Auto Spray"

The Cyclone Bug Exterminator

Made of tin, holds one quart. Price 50c. by mail add 35c. Packed in a strong paste-board box.

Little Wonder Sprayer

Made of tin with oblong tank. Price 35c. If to go by mail add 25c extra.

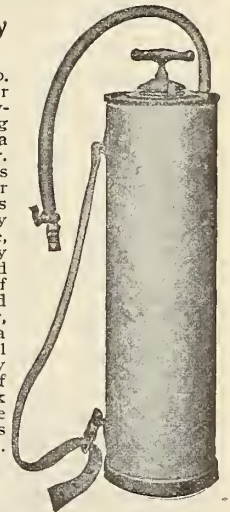

Dust Blow

The dry powder sprayer. It is impossible to draw the powder back into the cylinder pump, and if the powder is sifted through a screen and kept absolutely dry it will be impossible for same to clog. Price 65c.

Sure-Spray No. 10

The Sure-Spray No. 10 is a Compressed Air sprayer and excels anything in the spraying line brought out for a small hand sprayer. The designs for this sprayer, as well as for the other sprayers which the Sure-Spray Company manufacture, are the result of many years of experience and thought. It consists of a heavy galvanized steel or brass reservoir, as ordered, in fact a better grade of material is used than is usually put in this class of goods. Galvanized tank holds 4 gallons. Price \$4.50. Brass tank holds 4 gallons. Price \$6.50.

The Morris White-Wash Machine and Spray Pump

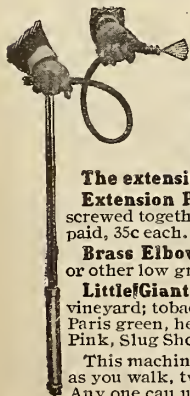

This sprayer has a heavy galvanized reservoir (capacity eight gallons), fitted with a double or continuous action spray pump and agitator. The working parts are brass, is fitted with the necessary hose, extension pipes and nozzle. Price, \$12.00.

The Fountain Sprayer

One of the best compressed air sprayers on the market. The tank has a capacity of 3 gallons and is tested to an air pressure of 50 lbs. to the square inch, which obviates any danger of bursting. The machine is carried in one hand like a satchel, and the spray can be started or stopped by a thumb lever operated by the same hand that carries the sprayer. Price, Galvanized Tank, \$4.50.

Junior No. 5 Spray and Force Pump

This pump does away entirely with the objectionable foot rest. The clamps, leather suction, packing, etc., require no fastenings, as they hold themselves down. Will pump from a pail, barrel, tank, spring or creek. Has automatic mixer to keep solution stirred. It is practically impossible for any part to get out of order as everything except handle and hose is of solid brass. Throws three sizes of solid continuous streams and two sizes of fine round spray. By express, not prepaid, complete, \$3.50.

The extension pipe and brass elbow can be used on either of these sprayers.

Extension Pipe. Made of solid brass. Three feet in length. Several lengths of pipe may be screwed together and the "Kant-Klog" nozzle elevated for spraying trees. By express, not prepaid, 35c each.

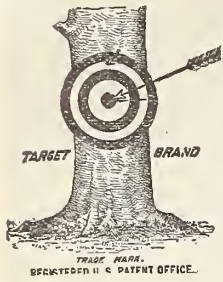

Brass Elbow. Used in connection with one length of extension pipe for spraying cucumbers or other low growing vines. Made of heavy brass. By express, not prepaid, 30c each.

Little/Giant Dry Powder Duster: Greens two rows of potatoes without water. For the garden, vineyard; tobacco fields, etc., adjustable to any width of row. Many thousands in use; distributes Paris green, helbore, sulphur, lime, dry Bordeaux mixture and Paris green compound, Spanish Pink, Slug Shot, Bug Death, in fact, any insecticide in powder form.

This machine keeps the poison at a safe distance from the operator. Dust the potatoes as fast as you walk, two rows at a time. Each machine is furnished with two nozzles, 5 tubes and strap. Any one can use it, weight cased for shipping, 14 lbs. Price \$5.00.

Target Brand Insecticide

Target Brand Scale Destroyer.—This preparation is the most effective and practical means of controlling the San Jose scale, which has yet been found. It destroys insect life by contact—that means it kills scales, larvæ, insect eggs, and all kinds of insects, either by absorption of the oil, or the formation of the fatal film, which destroys life by suffocation. This preparation contains a combination of mineral and vegetable oils, and is easily mixed with water. When diluted with 19 parts of water, it represents a 5 per cent. solution of mineral oil sufficiently strong to be fatal to insect life, and yet remain perfectly harmless to buds, bark and the growth of the tree. It can be diluted with either warm or cold water, and represents the cheapest, easiest to prepare, and the most reliable spray for fruit growing either on a large or small scale.

Fertilizers For The Farm, Garden and Lawn

To the Users of Fertilizers, Farmers, Truck Farmers, and Gardeners.

We present a list of our brands of Fertilizers. You cannot judge the merits of a Fertilizer only by the analysis, but you must have a knowledge of the basis from which it has been made.

It is a well known fact that the animal waste products produced in the abattoirs gives the purest and most available basis for Ammonia and Phosphoric Acid. This is the basis of our goods. The company that manufactures our Fertilizers own and control a sufficient number of abattoirs, independent of the meat trust, to secure for our goods this unexcelled source for our plant food. The expense is almost as much working and reaping one-half crop as it would be harvesting a full crop.

Claremont Vegetable Grower.

Nitrogen..... 2.46 to 3.29 per cent. Available Phosphoric Acid 7. to 9. per cent.
Equal to Total Phosphoric Acid..... 13. to 15. per cent.
Ammonia..... 3. to 4. per cent. Potash (actual)..... 5. to 6. per cent.
This is our pioneer brand, which is made from the best material known to the trade. The plant food is in the most soluble form and the elements of composition so well balanced, makes it a desirable fertilizer for most crops. When in doubt as to what you should use to produce results call on the Claremont. Use 300 to 400 lbs. to the acre. 25 lbs. 50c. 50 lbs. \$1.00. 100 lbs. \$1.75. 200 lbs. \$3.00. 2,000 lbs., ton, \$26.00.

Gilt Edge Potato Manure.

Nitrogen..... 2.46 to 3.29 per cent. Available Phosphoric Acid 7. to 9. per cent.
Equal to Total Phosphoric Acid..... 13. to 15. per cent.
Ammonia..... 3. to 4. per cent. Potash (actual)..... 10. to 12. per cent.
This brand is especially adapted to the potato crop and contains the proportionate elements necessary to start and carry a crop through to maturity. As laid down by the most experienced, being composed of dissolved bone, high grade potash in the most soluble form, it stands unrivaled in its line, and will fulfill its mission if the grower but gives it a loose soil for the tubers to work and develop in. Use 800 to 1000 lbs. to the acre. 25 lbs. 50c. 50 lbs. \$1.00. 100 lbs. \$1.75. 200 lbs. \$3.25. 2,000 lbs., ton, \$30.00.
