Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/  
Couverture de couleur
- Covers damaged/  
Couverture endommagée
- Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée
- Cover title missing/  
Le titre de couverture manque
- Coloured maps/  
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- Bound with other material/  
Relié avec d'autres documents
- Tight binding may cause shadows or distortion along interior margin/  
La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure
- Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments:/  
Commentaires supplémentaires:      Various pagings.

- Coloured pages/  
Pages de couleur
- Pages damaged/  
Pages endommagées
- Pages restored and/or laminated/  
Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed/  
Pages décolorées, tachetées ou piquées
- Pages detached/  
Pages détachées
- Showthrough/  
Transparence

Comprend du matériel supplémentaire
- Only edition available/  
Seule édition disponible
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image/  
Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.

This item is filmed at the reduction ratio checked below/  
Ce document est filmé au taux de réduction indiqué ci-dessous.

10X	14X	18X	22X	26X	30X
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

TO THE  
RIGHT HONOURABLE  
SAMUEL Lord SANDYS,  
First Commissioner for TRADE and  
PLANTATIONS.

MY LORD,

THIS WORK, calculated for the general Use of all His *Britannick* Majesty's Subjects, whether residing in *Europe* or *America*, who have Property in, Connexions with, or Trade to that Part of the World, I humbly presume naturally recommends itself to your LORDSHIP's Patronage.

THE very numerous Subscription this WORK has been favoured with, from many eminent *American* Merchants, and other Persons of Note, sufficiently evince the Utility of the Undertaking, which I hope will give Satisfaction: Your LORDSHIP's deigning to accept of a Dedication of this Work, crowns the Subscription List, which otherwise would look like a great Body without a Head; but being graced with your LORDSHIP's Name, becomes now uniform.

I DO

ii      D E D I C A T I O N .

I do not presume that it will add any Thing to your LORDSHIP'S Honour, in permitting me to present this WORK to your LORDSHIP; nor, on the other hand, will it, I hope, in the least deprecate your LORDSHIP'S honourable Character; but will rather be, in the Eyes of the impartial and right-judging World, a Testimony of your LORDSHIP'S kind Disposition, towards the Encouraging of any Thing that is new and useful to Mankind, in particular in what relates to *America*.

THAT the Affairs of the *British American* Colonies may flourish under your LORDSHIP'S Administration, with Honour and Satisfaction to Yourself; and that you may enjoy all Health and Prosperity, is the hearty Wish of,

Your LORDSHIP'S

Most devoted, obliged,

And humble Servant,

Octob. 8,  
1761.

JOHN WRIGHT.

A TABLE, shewing the Value of an Ounce Troy of Silver, proportionable to the Value of the Spanish Dollar of 17 d. 8 gr.

Value of the Dollar.		Value of the oz. of Silver.		Value of the Dollar.		Value of the oz. of Silver.	
s.	d.	s.	d.	s.	d.	s.	d.
4	6	5	2 $\frac{1}{4}$	4	9	5	5 $\frac{1}{4}$
4	6 $\frac{1}{4}$	5	2 $\frac{1}{2}$	4	9 $\frac{1}{4}$	5	6
4	6 $\frac{1}{2}$	5	3	4	9 $\frac{1}{2}$	5	6 $\frac{1}{4}$
4	6 $\frac{3}{4}$	5	3 $\frac{1}{4}$	4	9 $\frac{3}{4}$	5	6 $\frac{1}{2}$
4	7	5	3 $\frac{1}{2}$	4	10	5	7
4	7 $\frac{1}{4}$	5	3 $\frac{3}{4}$	4	10 $\frac{1}{4}$	5	7 $\frac{1}{4}$
4	7 $\frac{1}{2}$	5	4	4	10 $\frac{1}{2}$	5	7 $\frac{1}{2}$
4	7 $\frac{3}{4}$	5	4 $\frac{1}{4}$	4	10 $\frac{3}{4}$	5	7 $\frac{3}{4}$
4	8	5	4 $\frac{1}{2}$	4	11	5	8
4	8 $\frac{1}{4}$	5	5	4	11 $\frac{1}{4}$	5	8 $\frac{1}{4}$
4	8 $\frac{1}{2}$	5	5 $\frac{1}{4}$	4	11 $\frac{1}{2}$	5	8 $\frac{1}{2}$
4	8 $\frac{3}{4}$	5	5 $\frac{1}{2}$	4	11 $\frac{3}{4}$	5	9

The Tables from Page 176 to 197, belonging to the Chain of Tables for interchangeable Reduction, have, in common with the rest of the Chain of the said Tables, the Value of the Dollar expressed at the Head of the Columns; and to save the Trouble of computing what the Value of the Ounce of Silver is in Proportion to the Value of the Dollar of 17 dwts. 8 grs. this Table is inserted. — The Tables contained between the above-mentioned Pages are supposed to include the probable Variations of the Price of Silver in *Britain* for a Length of Time. — The auxiliary Use of this Table is, that on fixing on the average Price of Silver by the Ounce in *Britain*, you have the proportionable Value of the Dollar, which is found at the Head of the Tables, by interchangeable Comparison, throughout the rest of the Tables to 45s, the Dollar, the exact Par of Exchange between *Great Britain* and the Colonies may be known with as great an exactness, as is done by the Table of *General Pars*, tho' not to such a great Variety. — The finding the equitable Pars this Way will be a Check or Proof of what is done by the Table of *General Pars*, and of each other. Suppose the Dollar valued at 4s. 8d. Sterling, which answers to 5s. 4d.  $\frac{1}{2}$  the Ounce Sterling, as above; How many Pound *New York* Currency is equal to 100l. Sterling, the Dollar being valued at 8s. that Currency. First, 100l. Sterling by Page 182, contains 428 Dol. 4 ry. 6 10ths; this Number of Dollars reduced into *New York* Money at 8s. the Dollar by Page 234, is 171l. 8s. 7d. which is 171  $\frac{1}{3}$ , as in the last Table in the Book, and agrees with what is found in the Table of *General Pars*, Page 4. thus an equitable Par may be found independant of the Table of *General Pars*, and they will on trial generally agree very near.

## A D V E R T I S E M E N T.

**T**HE Author hereof instructs Youth, or others, in that very useful Branch of Merchants Accounts relating to Factorages, and Supercargoships; in which the whole *Italian* Method of the Art of Book-keeping will be exercised, as transacted in real Business, in the Factories, and best Houses abroad, and particularly in *America*. His Method of teaching the same is according to a Plan he has laid for a Work he shortly intends to publish, which he hopes will justly deserve the Title of, *The Complete Factor and Supercargo*.

The *Italian* Method of Book-keeping taught to them that have not yet learned it, adapted to real Business, together with most of the practical and curious Parts of the Mathematics in their present improved State.

The Author undertakes to qualify, in a short Time, any Person of common Understanding, and of a proper Age and Inclination for Instruction, and previous Qualifications, to be capable of managing any Factory abroad, either as chief Factor, or Clerk. And as a Knowledge of the *French* Tongue will be a very requisite Qualification to such who may be employed as Agents, or act as Principals in the Trade to *Guardalupe, Quebec, Montreal, &c.* the Author proposes at the same Time, they who put themselves under his Instruction to learn Accounts, (if so inclined) may be instructed in the *French* Language, and in that Branch thereof which most particularly relates to mercantile Affairs.

To be spoke with at the *American Coffee-house*, in *St. Michael's Alley*, and at the *London Stone Coffee-house*, in *Cannon street*.

## I N T R O D U C T I O N .

THE Trade carried on between *Great-Britain* and her *American Colonies* hath been for many Years very considerable, and of late Years greatly increased, and still daily increasing; and is happily in so flourishing a State at present, as to make up a very great Part of the extensive and vast Trade carried on by *Great-Britain* and *Ireland*. The very great Quantities of Goods and Merchandize that are yearly exported to the Colonies, most of them of the Manufactory and Produce of *Great-Britain* and *Ireland*, and the very numerous Fleets that annually arrive from the said Colonies richly laden with the various and valuable Productions of the western World, which almost every favourable Wind wafts over from the Bosom of the *Atlantic Ocean*, are daily Testimonies of the Importance of the Trade to the Colonies, to such a Degree, as to be the principal Source of the Riches, Grandeur and Power of the *British* Nation, to which it has at present arrived, by the auspicious and benign Dispensation of Prudence; to the Wonder, Envy and Jealousy, of the neighbouring Nations; and our good Neighbours the *French* in particular, who for near a Century past have made repeated Efforts, both by open War, as well as by sly and treacherous Methods, and every *Machination* in their Power, to deprive us of the Sources of Wealth and Power, which the Trade to *America* so evidently administers to *Great-Britain*. But the joyful Days are come, that the Bonds of *French* Power in that Part of the World are now broke in sunder, and all their Attempts to destroy or circumscribe the Bounds of the *British* Colonies, and consequently the Trade thither, happily subverted, overfet, and destroyed, by the resplendent Beams of Providence, which have so remarkably shone on the *British* Arms, in the Course of the present War, and has placed the *British* Flag on every Fort and Port of the northern Part of the Continent of *America* (as well as several of the southern Isles) where the *French* Flag waved before; so that it may now be said in one respect of the *British* Dominions, what *Puffendorf*, in the Introduction to his *Roman History* says, of the Extent of the *Roman* Empire, which he says, was only bounded by Nature; having for Bounds on the North the frozen Hyperborean Mountains of *Sythea*, and on the South the burning sandy Desarts of *Africa*. In like Manner the *British* Empire in *America* is at present only bounded

c

by

by the Inclemency of Cold, and uninhabitable Woods and Wilds of *Terra incognita Borealis*, or the unknown Regions of the North. And also on the West of *Canada*, by Countries little known to the *Europeans*, which, as they lay in temperate and inhabitable Climates, 'tis hoped the *British* Nation will in Process of Time be better acquainted with than at present.

'Tis certain, the present great Extent of the *British* Dominions in *America* are situated in, and comprehend all the Diversity of Soil and Climate, as is to be found in all the inhabitable Parts of the Globe; and consequently 'tis highly probable, that every vegetable Production, that is now raised in all other Parts of the World, will thrive when transported to a Climate, and Soil, of the same Temperature as the Place of their native Growth.

The want of new Seeds and Plants, which are hard to be obtained and transported with vegetable Life in them, so far as from the *East* to the *West-Indies*, is a great Obstacle; but nevertheless, may in Time be surmounted.

The Genius and Industry of the *British* Nation for planting and cultivating new Lands, and raising every Production their Soils and Climates in *America* are capable of producing, promise great Things on this Head, especially as the Colonists are encouraged by the Society for the Encouragement of Arts, Manufactures and Commerce, by the many Premiums they have offered for the raising new Production in *America*, which Encouragement is said to be seconded by several of the Governments in the Colonies; which makes it more than possible, that in Process of Time, all the vegetable Productions, that are raised in the southern Parts of *Europe*, may be raised in the Colonies in great Abundance. These and other Considerations set before us the pleasing Prospect of the Trade to *America*, greatly increasing, to the reciprocal Advantage of the Colonies and their Mother Country.

It is not my Intention here to play the Geographer, or to dip into Politicks, or commence Historian of any Class, either Political or Natural; these Subjects are amply treated of by many Authors of various Nations in *Europe*, in their respective Languages; insomuch, that a Collection of Books wrote on the Affairs of *America* would make a very considerable Library of themselves; and the respective Writers on these Heads, and what is found in Collections of Voyages and Travels, seem to have quite exhausted their respective Subjects, and must wait for new Events, Discoveries and Circumstances, to furnish them with new Materials further to expatiate on their respective Subjects, which no doubt Time will amply supply them with.

My

My Province here is that only of a numerical Writer, a dry tedious and elaborate Subject for an Author to execute with Exactness; and it must be confessed, has nothing in it to recommend it to those Readers, that are only pleased with Strains of Eloquence and literary Compositions, that abound with Wit and Humour; but I hope nevertheless, the Class of Readers, for whose Use this Work is designed, to wit, the Planters, Merchants, Factors, Brokers, and all concerned in the Trade to *America*, will find their Account in consulting my Book, on such Occasions, and on such Accounts, as their Affairs may require; and the Dealers in Gold and Silver Bullion, either in *England*, or any Part of the World, will, 'tis presumed, find themselves obliged with what I have done on that Head at the End of the Book, as I have taken great Pains to furnish them with a set of Tables for reducing to Standard both Sorts of Bullion by Inspection, with the same Facility, as the Interest of any Sum of Money for any Time is found by the best Interest Tables extant; a Thing never yet attempted, that I know of, by any Author, which I hope will give Satisfaction to all Merchants, Refiners, Goldsmiths, and Others, that may have Occasion to use them. The whole Work is entirely New, every Table therein contained being originally done by myself, there being not one single Transcript from any other Author in the same. The Plan is founded on my own long Experience whilst I was concerned in Mercantile Affairs in *America*, for the Space of upwards of fifteen Years, together with the Prompts, Advice, Hints, Directions and Informations I have received from Gentlemen well versed in *American* Affairs, both by personal Conversation, and by Letters I have been favoured with, all which Gentlemen are Subscribers to this Work, and for whose Assistance, as well their Encouragement, I hereby acknowledge myself highly obliged. I have been able to avail myself very little by reading even the best *American* Histories, or other Books on *American* Affairs, which have afforded me but a very small Light toward laying my Plan; and have received more Information from one single Letter, from an Encourager and Correspondent, well versed in *American* Affairs, and a Resident here, than in turning over Volumes of *American* Histories, &c. As I have laid my Plan by the Help of the best Lights I have been able to obtain, so have I spared no Pains in executing it with the greatest Exactness, and have attended the Press with more than usual Care to prevent any Errors creeping in that way, and am not sensible of any Error of Consequence in any one single Table, the Tables all proving themselves; so that no Error can be committed, if they are rightly used, as is directed in the Examples of their Use.

It is needless to say much on what induced me to set about this Work, and to finish it, let it suffice to say, that I thought such a Thing would be useful to the World, especially to Gentlemen concerned in *American Affairs*; and it is evident I thought right, by the very numerous Subscription the Work has been favoured with; and I hope the Subscribers will meet with no Disappointment in their Expectations, as the Work fully contains what is promised in the printed Proposals and Title Page, besides many Articles of Use not promised therein.

Why a Work of this Nature has not appeared before for the Trade to *America*, requires as short an Answer;

*First*, As a Book has been lately published for the Exchange for the Eastern Commerce, and met with a good Reception, I thought one for the Western would meet with the same.

*Secondly*, It seldom happens, that a proper Degree of Knowledge, Experience, Abilities, Leisure and Inclination, coincide or meet in the same Person, to induce him to set about the producing a new Thing of a particular Kind; which may be the Reason why new Things are late in their Birth, which often make them lay in the Womb of Time till all these Requisites unite to bring them forth to Light.

#### Of the A M E R I C A N C U R R E N C I E S .

The several Provinces on the Continent of *North America*, and also the *Leeward Islands*, and *Jamaica*, subject to the Crown of *Great Britain*, have, ever since their being settled, or subject to the said Government, or at least within these seventy Years last past, varied greatly in the way of Reckoning their Monies, or Currencies, from what has been by Law established in *England* or *Great Britain*. The Currencies in the Colonies have fluctuated and varied so much, that they have differed greatly both as to Time and Place, seldom being the same in two different Provinces at a Time, and often changing Value in the same Place. In some of the Provinces they have deviated so much from Sterling Money, in the Way of Reckoning their Monies, and run on to such a Degree of *Depreciation*, that two Shillings Sterling hath become equal to one Pound nominal Currency, or one Pound Sterling equal to ten Pound. At *Boston* in *New England*, they run on in a continual Course of *Depreciation* in the Space of 47 Years, in an irregular progressive Advance, from 133 l. Currency for 100 l. Sterling to 1100 l. Currency for 100 l. Sterling; — A State of all the Degrees of *Depreciations* in the respective Years the Variations or Changes happened, from the Year 1702, to the Year 1749, together with the Value of Silver, both by  
the

## I N T R O D U C T I O N .

the Ounce and Dollar, that correspond with the said *Depreciation*, are set down in the following Table.

Years,	Exchange,	oz. of Silver Cur.	Dollar Ster.
1702	133	6 s. 10 $\frac{1}{2}$ d.	4 s. 6 d.
1705	135	7 s. 0 d.	4 s. 6 $\frac{1}{4}$ d.
1713	150	8 s. 0 d.	4 s. 7 $\frac{1}{2}$ d.
1716	175	9 s. 3 d.	4 s. 7 d.
1717	225	12 s. 0 d.	4 s. 7 $\frac{1}{4}$ d.
1722	270	14 s. 0 d.	4 s. 6 $\frac{1}{2}$ d.
1728	340	18 s. 0 d.	4 s. 7 d.
1730	380	20 s. 0 d.	4 s. 7 $\frac{1}{2}$ d.
1737	500	26 s. 0 d.	4 s. 6 d.
1741	550	28 s. 0 d.	4 s. 5 d.
1749	1100	60 s. 0 d.	4 s. 8 $\frac{1}{2}$ d.

Their Money having thus run on to 1100 l. Currency for 100 l. Sterling, or 11 for one, a Stop was put to the farther *Depreciation* of the Money of the Province of *Massachusetts's Bay*, in the Year 1750, by a Remittance in Money sent over from *England*, to the Amount of 183,000 l. Sterling, to reimburse the Expence that Province had been at, in the Reduction of *Cape Breton* in the last *French War*; the Money was mostly composed of *Spanish Dollars*. Their *depreciated Paper Money*, or Province Bills, were called in and paid off, at the Rate of 45 Shillings Currency for each Dollar, and the Bills burnt and destroyed; and a Law made, by which the Par of Exchange with that Province and *England* is fixed at 133 $\frac{1}{3}$  l. Currency for 100 l. Sterling, and the Dollar at 6 s. the same Currency. This Change was a pleasing Event, especially to them who have Correspondence with that Province. But I have been informed, that tho' they are obliged to keep their Accounts agreeable to the said Law, yet since that Time they have for some Years negotiated their Bills with *England* in old Tenor, or the old Currency, and that so late, as within these three Years last past, which is the Reason I have carried the Tables of Exchange so far as 1100; but I am just now informed by a Gentleman lately arrived from *Boston*, that that Practice is now entirely laid aside; however, if the Tables that are carried so far cease to be useful at present, in what regards the Trade to that Province, they may some Time or other be useful for others.

The Currency of *Rhode Island* has run on in a Course of *Depreciation*, from the Years 1744 to the Year 1759, from 450 l. to 2300 l. Currency for 100 l. Sterling.—An amazing *Depreciation* indeed, which makes the Trade carried on by that Province (which is pretty considerable) perplexing to themselves and their Correspondents; but I am Informed, they are endeavouring

deavouring to put a Stop to such a mad *Depreciation*, and to put their Currency under some Regulation, which 'tis to be hoped by this Time is effected.

The Currencies of several of the Provinces have at Times gone backwards and forwards in varying their Exchanges with *England*, some seem to be fixed, and others in a variable Situation. The Pars of Exchange with the several Provinces are at present, or lately were;

<i>Bestn in New</i>	} 133½	<i>South Carolina,</i>	700
<i>England,</i>		<i>Georgia,</i>	100
<i>New York and</i>	} 175 or 171½	<i>Jamaica,</i>	140
<i>East Jersey,</i>		<i>Barbadoes,</i>	135
<i>Pensylvania and</i>	} 165 or 160½	<i>Newis and Mont-</i>	} 175
<i>West Jersey,</i>		<i>serrat,</i>	
<i>Virginia,</i>	125	<i>Antigua and St.</i>	} 165
<i>Maryland,</i>	145	<i>Christophers,</i>	
<i>North Carolina,</i>	145		

By very late Information from *Quebec* and *Montreal*, as also from *Halifax* in *Nova Scotia*, *Anapolis*, and the *Bay of Fundy*, the Rate of their Currencies may be fixed at 108, 109 or 110 the several Species of Money Current in all these respective Places, at present indicate, that these must be the equitable Rates of Exchange, the Dollar passing in them all for 5 s. the Pistole for 18 s. the *English* Guinea for 22 s. 6 d. the Johannes or 36 s. Piece for 38 s. 6 d. and the Moidore for 29 s. in their respective Places. At *Quebec* and *Montreal* the *New York* Traders, which supply the Places with Provisions, deal with the Inhabitants in *New York* Currency, in receiving Dollars at 7 s. 6 d. and Gold in Proportion. But these Exchanges and Values of Money in Specie in those Places may be no Standard for after Times, as they may probably soon vary, and for such Circumstances of Variation the Tables in this Book are suited, and will always serve.

A Question naturally will arise: How hath it come to pass, or what is the Reason, that the several Currencies of the *British* Colonies have differed so much one from another; both in respect to Time and Place, and still do differ, from what is by Law established in *England*?

In Answer to which, I hope the following Reasons will in a great Degree be satisfactory. The several Provinces in their Infancy had but little Trade, and consequently little Money. The Tools, Utensils, and Necessaries for Planting, they were at first supplied with from *Britain*, involved them in Debt, before they were able to raise Goods for Exportation to pay their Creditors; and the Goods they first raised were often so ordinary in Quality, or so little in Quantity, that they were able

to export to a foreign Market, that the net Proceeds of the same often turned out poorly, by which Means the Planters remained continually in Debt to the *British* Merchants, and occasioned the Balance of Trade to be always against them; and having neither Goods nor Cash sufficient to remit their Creditors, the Consequence has been, that many bad Debts have been made, and great Losses sustained, as the Merchants of *Great Britain* have but two fatally experienced.

When the northern Colonies became more thriving, and by the Produce they raised were enabled to supply the Sugar Islands with Provisions, as Flour, Bisket, Salt, Fish, of several Sorts, Horses, live Sheep, Hogs, Geese, &c. besides what is called Lumber, *viz.* Timber, Staves, Heading and Hoops, &c. they drew Money from thence; the only Sources they at first, or even at present can be furnished with a Supply of Money; (the Remittances made thither in the last and present Wars excepted) the Money they imported from the Islands, together with their Produce, were not sufficient to supply their Creditors in *Britain*, which prevented the Cash staying with them, and obliged them to ship it off with their other Merchandize towards paying their Debts here, which obliged the Provinces to create and issue Bills of Credit, commonly called Paper Money, to circulate in Trade among themselves; Gold and Silver being as much a Merchandize as any they dealt in. The Trade of the northern Colonies continuing for many Years in a bad State, and the Balance with *Britain* always against them, occasioned the ready Money they had amongst them to be picked up by the Merchants and Factors residing in *America*, acting for their Correspondents or Employers in *Britain*, and Cash or Bullion being a certain Remittance preferable to Bills of Exchange or Produce, which were very precarious, the Bills being often sent back protested, and the Goods coming to a bad Market; this made the Merchants and Factors *rival each other* in purchasing Gold and Silver, and from Time to Time raised the Price; and in Proportion as the nominal Value of the same advanced, the Price of Bills, and the Rates of their Currencies, kept Pace with it, and proportionally *depreciated* as the nominal Value of the *Specie* advanced, compared with the Value of Money in *Britain*.

This is evident, by casting an Eye on the Table of the Course of Depreciation of the Currency of *Boston*, inserted in the preceding Pages; wherein it appears, that the nominal Prices of Silver the Ounce in that Province, for the Space of 47 Years, was always nearly proportionable to the depreciated Rates of Exchange in the Periods of Time the said Currency varied; and it is not to be doubted, but the Change of the Value of Money *preceded* the Alteration of the Exchange.

From

From what has been said it may naturally be inferred, that in whatsoever Province in *British America*, whose Trade does not import them so much Cash from one Quarter, as the Demand is upon them from another, or in other Terms, which have the Balance of Trade against them, their Currency will be unstable, and subject to Depreciation. As contrary Causes always produce contrary Effects, so in the Affair under Consideration it appears, that the Islands and Provinces that have a flourishing Trade, and an influx of Money to answer foreign Demands upon them, that their Currencies have fixed for a long Time in one State.

In the Island of *Jamaica*, in Consequence of its great and valuable Productions, and the Cash it imports from the neighbouring Fountain Heads, the *Spanish* Islands and Continent has preserved its Currency in one State for many Years; has never had the Use of Paper Money, nor even Copper, their current Money being all Gold or Silver, neither has the Price of Bills varied in 20 Years, always being at 140. And it is much the same in the other Sugar Islands, except the Price of their Bills are subject to vary. *New York* and *Pensylvania* Currencies seem fixed for the same Reason; and it's to be hoped, more of the Provinces will be able to keep their Currencies from further depreciating.

It may be of Use to some Readers to note, that to what ever Degree of Depreciation the Currencies of the Colonies have been at, the Denomination of Pounds, Shillings, Pence and Farthings, have been retained, altho' they have none of the Money amongst them of these Denominations.

### A Description and Use of the TABLES.

The first Table shews the Value of one Penny Weight and Grain of Standard Gold, at the Medium Price of the same in Time of Peace, suited to the Rates of Exchange expressed therein, in Shillings and Parts Plantation Money. By Help of this Table, the *Value* of any Piece or Pieces of Gold Coin of any Nation, that may circulate in the Colonies, is found that it ought to *pass* at in Plantation Currency, if Standard Gold.

### R U L E.

Take the Number out of the Table, that is against the Rate of Exchange; multiply the same by the Weight of the Piece as it really is, in Penny Weights, and take the aliquot Parts of the tabular Number for the Grains, if any, add the Product and taken Parts together, and you have the true Value of the Piece in Plantation Currency, at the Rate of Exchange fixed upon.

### E X A M P L E.

E X A M P L E I.

what is the Value of the *Spanish* Pistole, weighing 4 dw. 8 grs. in *Jamaica* Currency Exchange 140? against 140 in the Table, is 5. 4775  
 Multiply by 4dw.

Take $\frac{1}{4}$ of the	21		9100
Numbers for	1		8258
the 8 Grains			
-----			
Multiply the	23		7358
cut of Figures by			12
-----			
	8		8096

Which is 23 s. 9 d. nearly, being the Value the said Piece at present, or lately did pass for in the said Island.

The Result both Ways are nearly equal

If the odd Grains be such a Number, as there will be some Trouble in taking out the aliquot Parts out of the Number for the Penny Weight, in such Case you may, if you please, take out the Number, that is the Value of a Grain, against the proper Exchange, and multiply by the odd Grains, add the Product by the Penny Weight, and by the Grains together and you have the Value of the Piece.

Product by 4 dw.	21		9100
add	1		8272
-----			
	23		7372

Value of a Grain	2284
Multiply by	8
-----	
	1   8272

In this Manner the Value of any Piece of Gold may easily be found by help of this Table, with very little Trouble. But Pieces of Gold will sometimes be found in the Colonies to pass somewhat different from what is determined this Way, but Custom will often prevail against Equity and Reason. All such Pieces of Gold Coin, that have a certain known Value in *England*, and are full Weight, such as Guineas, Moidores, and *Johannes*, their proper and just circulating Value in any Place are found by Inspection in the Tables of Exchanges; which is only reducing so much Sterling into Plantation Currency, as the Value of the respective Pieces pass for in *England*, Regard being had to the Exchange. But if such Pieces pass under Weight in the Plantations, their Value may be ascertained, by multiplying the Tabular Number for the Value of the Grain, that is against the proper Exchange, by the Defect in Weight, and subtracting the Product from the Value the Piece ought to pass for, if full Weight, the Remainder is the true circulating Value of the Piece, short of its due Weight; all which is to plain, as to need no farther Explanation.

P L E.

The next is the Table of General Pars of Exchange, which I so call, because it is not universal, but extends, I hope, even beyond any Degree of *Depreciation* the Currencies of the Colonies may undergo in future, or ever yet ran to; but I thought it convenient, to carry it so far, as to suit such Variations as are but barely possible; and in this, as well as in some other Things in this Work, I may be censured for being too prolix in the Extent of my Tables; but as it is a Fault on the right Side, I hope will plead my Excuse, without any farther Apology.

This Table shews, at one View, what the exact equitable Pars of Exchange in any of the Provinces is, the nominal Value of the *Spanish* milled Dollar or Ounce of Silver is rated at in any of them, as the Title to the Table sets forth, being known. I have not only suited the Table to a very extensive Variation of the Value of the Dollar, and Ounce of Silver, but likewise adapted it to five different Variations of the Piece of Silver in *Britain*, which naturally affect the Pars of Exchange, as is seen in the Table, which every one who understands but the common Rule of Three direct may clearly see the Reason of, the Prices of Silver in *England* at the Head of the Columns, are supposed to be the average Values for a considerable Space of Time, and not every sudden Start of the Price of Silver. The Table may be made more general in its Use, if the average Price of Silver should in Process of Time exceed what is put at the Head of the Table; for if the Numbers in the Body of the Table be read Collaterally from the left Hand to the Right, the Difference amongst the Pars are nearly equal; so that for every Half-penny average Variation, it is but subtracting so many Times that Difference from the Figures in the last Column, and the new Par of Exchange is obtained.

By this Table a Merchant may see with the Glance of an Eye, whether the Price of Bills is under or above Par, if he compares the nominal Value the Dollar or Ounce of Silver is rated at in any Province; and the Par of Exchange in the Table answering thereunto, with the Price he gives or receives for Bills, Regard being had at the same Time to the average Price of Silver in *Britain*.

The Tables of Exchanges are next, and extend from Page 13 to Page 171, and perform what their Titles set forth; and 'tis hoped, abound with such Variety of Rates, as to answer all Occasions, Times and Places, to answer the Purpose of them who may have Occasion to refer to them. They readily alternately turn Plantation Money into Sterling, and the contrary by Inspection, at the various Rates of Exchange they extend unto, and the Use the Merchants, Planters, Factors, and others, may make of them; both in regard to the settled  
Pars

# INTRODUCTION.

Pars of Exchange, and the Prices of Bills of Exchange are so obvious, as to require little Explanation; a few Examples may suffice.

## EXAMPLE I.

If a Merchant in *Great Britain* receives Advice that his Factor, or Correspondent at *Boston* in *New England*, has shipped him on a certain Ship a Cargo, amounting as per Invoice to 5737 l. 10s. lawful Money of *Boston*; For how much Sterling must the Merchant make Insurance to cover the Risk of the said Adventure, the Under-writers to pay as *Interested may appear*? The Exchange being  $133\frac{1}{3}$ , collect the Sterling answering to the *Boston* Money out of the Table, Page 460, and you have the Answer afunder.

Lawful Money of <i>Boston</i> ,			Sterling,			Proof by using the Opposite Table, Page 461.					
						Sterling,			<i>Boston</i> Money,		
l.	s.	d.	l.	s.	d. q.	l.	s.	d.	l.	s.	d.
5000	0	0	3750	0	0	4000	0	0	5333	6	8
700	0	0	0525	0	0	300	0	0	400	0	0
30	0	0	22	10	0	3	0	0	4	0	0
7	0	0	05	5	0	0	2	0	0	2	8
0	10	0	0	7	6	0	0	6	0	0	8
5737	10	0	4303	2	6	4303	2	6	5737	10	0

The Value of the said Adventures is 4303 l. 2 s. 6 d. Sterling; and to prove that both the Tables and the Work is right, the Sterling is reduced back again into Currency, and makes exactly the same as the given Sum; and of such a Proof all the Tables will admit of, and of Course may be used with absolute Certainty.

## EXAMPLE II.

The Amount of an Invoice, net Proceeds of Sales, Balance of an Account, outstanding Debt, Mortgage, or the Interest thereupon, to the Value of 9575 l. 6 s. 6 d. *Jamaica* Currency; What is the Sterling Value, Exchange 140? From Page 34 you have;

Jamaica Cur.			Sterling,			Sterling,			Jamaica Mo.					
l.	s.	d.	l.	s.	d.	q.	l.	s.	d.	q.	l.	s.	d.	q.
9000	0	0	6428	11	5	1	6000	0	0	0	4800	9	0	0
500	0	0	357	2	10	1	800	0	0	0	1122	0	0	0
70	0	0	50	0	0	0	30	0	0	0	42	0	0	0
5	0	0	3	11	5	1	9	0	0	0	12	12	0	0
0	6	0	0	4	3	2	0	10	0	0	0	14	0	0
0	0	6	0	0	4	1	0	0	4	0	0	0	5	2
<hr/>			<hr/>			<hr/>			<hr/>			<hr/>		
9575	6	6	6839	10	4	2	6839	10	4	2	9575	6	6	1

The given Currency is 6839l. 10s. 4d. 2q. Sterling, and by a contrary Reduction the first Sum is produced, which is a Proof the Work and Tables are right.

For the Accommodation of the Merchants, Planters, and Factors concerned in the *South Carolina* Trade, I have calculated Tables that rise and fall by  $12\frac{1}{2}$  above and below Par; and I have been induced to do this, as the Currency of *South Carolina*, tho' in a depreciated State, being 7 for one, or 700l. Currency for 100l. Sterling, seems to be fixed, as it has continued the same for many Years last past; and if the Rate of their Par of Exchange be compared with the nominal Value of the Current Cash they circulate, it will be found to be as good Money as any on the Continent; for if you turn to Page 7, of *General Pars*, and look for 31s. the nominal Value the Dollar hath passed for in that Province for some Time, you will find, that the equitable Pars corresponding with the said Value of the Dollar, and different Values of the same in *England*, are 689, 683, 676, 670, 664, by which it appears, that if the circulating Dollars are full Weight, they are rather under valued, 31s. 6d. or 32s. seems to be the most equitable Value; but as circulating Cash is generally under Weight, a few Grains Deficiency even in Silver, at the Rate of 700, will lessen the Value of the Dollar considerably; for the Value of every 3 Grains of Silver, at that Rate of Exchange, is nearly 3d. Currency, as may be seen in Table, Page 172; so that under the Circumstance of the Dollars being under Weight, 31s. may be an equitable Value enough; the like may be said of the Pars of Exchange compared with the circulating Cash of any other of the Provinces. I have been induced to calculate these Tables that advance  $12\frac{1}{2}$  above and below 700, because such arise and fall in negotiating Bills of Exchange is nearly proportionably to  $2\frac{1}{2}$ , in such of the Currencies as are under 200, which is the customary Variation in the Rise and Fall of the Exchanges. I shall only give

I N T R O D U C T I O N. xiii

give one Example more in direct Exchanges, and that for this Province.

E X A M P L E III.

A Merchant in *Charles Town, South Carolina*, hath Occasion to remit, in Bills of Exchange to his Correspondent in *England*, 2150 l. 10 s. that Province's Money; For how much Sterling must the Bills be drawn for, supposing the Exchange at 7 12½?

From Page 136, you have,		Proof by the opposite Table, Page 137, by reducing the Sterling back again into Cur.	
S. Carol. Money,	Sterling,	Sterling,	Currency,
l. s. d.	l. s. d. q.	l. s. d.	l. s. d. q.
2000 0 0	280 14 0 2	300 0 0	2137 10 0 0
100 0 0	14 0 8 2	1 0 0	7 2 6 0
50 0 0	7 0 4 1	0 16 0	5 14 0 0
0 10 0	0 1 4 3	0 0 6	0 3 6 3
2150 10 0	301 16 6 0	301 16 6	2150 10 0 3

The Bills must be made out for 301 l. 16 s. 6 d. Sterling; and that appears to be the right Sum by the Proof, only differing 3 Farthings *South Carolina* Money, which is not half a Farthing Sterling. Of the like Proof all the Tables of Exchanges will admit of both for *America* and *Ireland*; and such Proof will seldom differ from the first Reduction, more than one Farthing Sterling. The said small Difference arises from the Defect of the Fractions, which could not be avoided, without incumbering the Tables with fractional Parts of the Farthing, in all the Numbers, a Thing I thought more troublesome than convenient, both to myself and Readers. Several Ways might be shewn how to prove the Truth of what is done by the Tables; but as the Method in the Examples above shewn, is the most easy, natural, and exact, it is needless to instance, or make use of any other. If the Reduction is performed by Calculation, the Tables may be used to prove the Truth of the same; farther particular Uses of the Tables of Exchanges are the following.

1. The reducing the Sterling Value of every particular Article in the Invoice of an Outward bound Cargo, into the Currency of the Province to which they are consigned, which, if put in Practice by the Factors and Supercargoes who have the Disposal of Merchandize in the Colonies, I presume they would find it very convenient.

2. The

2. The Merchants residing in *Britain* (on receiving the Accounts of Sales of their Goods from their Correspondents in *America*) may readily know what Sort of a Market their Goods came to, by turning the Plantation Money into Sterling, either for the whole Amount, or for a particular Article.

3. As it is necessary, that the Merchants in *Britain* state their Accounts Current with their Correspondents in the Plantations, by having double Columns on each Side of their Ledger, to enter the Foreign Currency and Sterling in, the Tables of Exchanges will be found to be very ready to make such Reduction, as of Course must be made in keeping Accounts in that Method. This Way of keeping the Account Current in the Ledger is absolutely necessary, when the Correspondent in the Plantations is a Factor, or acts for Account of a Merchant in *England*; for the Account cannot be regularly closed without both Currencies be stated therein; for when the Merchant here receives the Factor's Account, Sales, and Account Current, he debits himself in the foreign Money, and credits himself for the Cost and Charges of Goods he ships for Account of his Correspondent, and likewise for what foreign Money he disburses for the Purchase of Bills of Exchange in the same Money; and it may often happen, that a considerable Loss or Gain may be occasioned by the Factor's obtaining Bills above or below Par, which will appear on the closing of an Account Current kept in this Manner, and the Loss or Gain by the Exchange must be carried to the Account of Profit and Loss, as it may happen.

It is not less expedient, that the Merchants trading between *Ireland* and *Britain*, should keep their Accounts in the way above-mentioned; as generally a Loss or Gain will happen on the Close of an Account Current, on Account of the Rise and Fall of the Course of Exchange; an Instance or two will shew it. A Linnen Draper in *London* has a Cargo of *Irish* Linnen consigned him on his own Account, from a Merchant in *Dublin*; to the Amount of 5250l. *Irish* Money, for which the *Irish* Merchant draws upon him for the whole Exchange at 109. What is the Loss or Gain of the Linnen Draper, on his paying the Bills, and closing the Account Current.—First, 5250l. *Irish* Money at the Par of Exchange 108½. Page 308, will be found to be 4846 l. 3 s. 1 d. Sterling. Secondly, the *Irish* Merchant's Draught on the Linnen Draper, at the Rate of Exchange current 109, will in Sterling Money, by Table Page 340, be found to be 4816 l. 10 s. 3½ d. Sterling; by which it appears, that the Linnen Draper gains 29 l. 12 s. 9½ d. Sterling by the Course of Exchange being at above Par, when his Correspondent drew upon him. The contrary would have happened, if his Correspondent had drawn

drawn upon him when the Exchange was under Par, as much as it is above in the Case here stated.

The use of the Tables of interchangeable Reduction.

These Tables extend from Page 173 to Page 305, and perform what their general Title sets forth. They are founded on the same Principles as the universal Rule for the arbitrating Exchanges throughout the commercial World, and on which the Pars of all trading Nations are founded, that is, to receive so much intrinick Value in real Money, in one Country, as is paid in another, if the way of Accounting, or Difference of the Specie, vary ever so much.

E X A M P L E.

What is 530l. *New York* Money in the lawful Money of *Boston*, the Dollar passing for 8 s. in the former, and 6 s. in the latter Places.

Find how many Dollars are contained in 550l. at 8 s. each, by Page 234, you will have, <i>N. York</i> Money,			Then find the Value of 1375 Dollars at 6 s. Page 211. Specie, <i>Boston</i> Money,						
l.	s.	d.	Dol. rs.	10.	Dol. rs.	10.	l.	s.	d.
500	0	0	1250	0	0	0	300	0	0
50	0	0	125	0	0	0	90	0	0
550	0	0	1375	0	0	0	312	10	0

By using two Tables as above it appears, that 550 l. *New York* Money is equal to 312 l. 10 s. 0 d. *Boston* Money. In like Manner, and with the same Ease, the Currency of any two Places may be reduced into each other, the Value of the Dollar in both being known.

Sterling and *Irish* Money may in this Manner be readily reduced into any of the Plantation Currencies, and the Contrary; by first finding the Number of Dollars that are continued in the Sterling Money, at the Price Silver passes for in *England*; and then find the Value in Plantation Money of the said Dollars, at the Current Price they go for in any Province. *Irish* Money is reduced interchangeably just the same Way, by valuing the Dollar at 5 s. *Irish* Money, which I think an equitable Valuation, higher or lower may be taken, as the Merchants may think more proper. See Page 306.

AT TABLE

A TABLE, shewing the Value of a Penny Weight, and of a Grain of GOLD, in Plantation Currency, at the Rates of Exchange in the Table.

T H E

## AMERICAN NEGOTIATOR.

A TABLE of General PARS of EXCHANGE:

**S**HEWING, by Inspection, how many Pounds nominal Plantation Currency is equal to one hundred Pounds Sterling; in Proportion as the *Spanish Mexico* Dollar, of 17 dws. 8 grs. may pass current for in any of the *British American* Colonies; or the Value of the Ounce of Silver in any of the said Colonies, from 5s. (the *Spanish Mexico* Dollar of the Weight aforesaid) to 140s. and from 5s. 9d.  $\frac{1}{4}$  to 161s. 6d.  $\frac{1}{4}$  the Ounce (Troy) of Silver; and also in Proportion to the different Prices of Silver (the Ounce) in *Great Britain*, from 4s. 6d. to 4s. 8d. the *Spanish* Dollar, of the Weight aforesaid.

Including, in the Extent of the Table, all the probable Variations of the Pars of Exchange, between *Great Britain* and the *American* Colonies thereon depending, that may, or have happened from 1111. to 3000l. Plantation Currency, for one hundred Pound Sterling; serving as a Key to all the succeeding Tables of *American* Exchanges contained in this Book.

# THE C U R R E N C I E S

OF THE

BRITISH AMERICAN COLONIES

Reduced into STERLING, and the contrary,

**B**Y a Chain of Tables, suiting the various Exchanges between the said Colonies and *Britain*, from 115 per Cent, to 1100; to every one of which Tables are annexed Tables, shewing the Value of the *Spanish* Dollar, or Piece of Eight, of 17 dw. 8 gra. Weight, proportionable to the Value of Silver; the Ounce in *Britain* from 5s. to 5s. 9d. the Ounce; and the Value of the *Spanish* Pistole, of 4 dw. 8 gra. in Proportion to the Value of Gold; the Ounce in *Britain* from 77s. to 80s. both which Values in Currency, in every Page, are suited to the Rates of Exchange at the Head of the Tables.

Plantation

14 The AMERICAN NEGOTIATOR.

Plantation Currency reduced into Sterling, and the Value of the Dollar in Currency.

---

 I N T R O D U C T I O N .

**W**HEN I first resolv'd on adding Tables for the Reduction of Gold and Silver to Standard, &c. to this Work (thinking them a necessary and useful Appen- dage to the same) I was at the same Time determin'd to make the same as easy for Practice, as exact in themselves; and that I might fix on the best Plan to answer these Ends, I consult'd such Authors as have best wrote on this Subject (amongst whom the little Book published by Mr. *R. Hayes*, which is in the Hands of most Goldsmiths and Refiners, is generally esteem'd the best extant) and find all the Tables yet in being, that I have seen, tho' they are nicely exact, yet they cannot be us'd, but by the Assistance of a previous Multiplication, and that attended with some Difficulty, as they who use even Mr. *Hayes's* Tables cannot but be sensible; which makes the Use of them nearly equal in Trouble to a direct Arithmetical Calculation in the Hands of an expert Accountant: A Defect in Things of this Nature, I was resolv'd to try to remove, by finding out some Method, if possible, to make general Tables that would be more ready for Practice than any I had yet seen, and in this, I hope I have succeeded in the general Tables herein insert'd, so far as to have made some Improvement on what has been done by others; but all I have been able to do by general Tables for the Standarding of Gold and Silver, is still attend- ed with this Inconveniency, that the gross Weight of either Sort of Bullion must be first multiplied by the Qualities of the same by the Assay, before the said general Tables can be us'd to answer the Purpose desired, which still makes the Trouble amount to one half of that of a direct Calculation; but as the Tables that perform the Reduction by direct Inspection are of such an Extent as to answer most practical Cases, there will be seldom Occasion to use the general Tables in the Course of Trade, and when found necessary to be refer'd to in Cases where the Qualities of the Bullion lyes out of the limits of the Table by direct Inspection, the general Tables may be us'd with tolerable Pains and Dispatch, as well as great Exactness.

No such Tables as these by direct Inspection have hitherto, that I know of, been made publick. The calculating a ge- neral Table is in itself attend'd with some Trouble, to do it precisely and to a Demonstration, much more a Chain of many

Tables,

Tables, every one of which are attended with the same Care and Trouble, which is the reason (I apprehend) that few Persons have had either Leisure or Inclination to wade through such tedious Calculations, and that Tables of this Sort have not yet appeared. But as I have been enured to Computations and Calculations of many Kinds, not only in the Course of the preceding Part of this Work, but for many Years in real Business; Calculating, Computing and Estimating, has become in a great Degree habitual, and, as it were, natural to me, which has enabled me not to be intimidated at any Difficulties that might attend the Executing of any Thing that might tend to the making the Work compleat, by calculating the Tables of Reduction by Inspection, which I hope will give Satisfaction to all who may have Occasion to use the same.

OF GOLD and SILVER.

Gold and Silver in their Purity are so very soft and flexible, that they are neither fit (in that State) to coin into Money of a proper Degree of Hardness, to prevent its too speedy Wear in Circulation, or wrought into Plate, to make it of a proper Stiffness; which has rendered it necessary to mix them with some other Metal, to harden and stiffen them. Into this Practice most of the Kingdom and States of Europe have given in, some using more, some less Alloy or Mixture in their wrought Plate, and common current Money, but generally agree in their Bank Monies, with what is established by Law in England.

The Proportion of fine Metal and Alloy in either Metal is hereafter particularly mentioned, is regulated by the Assay Master of the Royal Mint in the Tower of London for the Coinage, and also for Bullion in the mercantile Way. For wrought Plate, that is regulated by the Assay Master of Goldsmiths Hall in London, for the Plate wrought there; and by the Assay Masters in the several Cities and Towns in Great Britain, where any considerable Quantity of Plate is manufactured. All wrought Plate is by Law obliged to be stamped by the Assay Master of each respective Place, with a Mark, certifying the same to be Standard, or such a Proportion of fine Metal and Alloy as is by Law established, without which it is neither saleable nor exportable to foreign Parts.

STANDARD GOLD is composed of,

- 22 (Carats) Parts, be they Pound, Ounces, Dws, or Grains, &c.
- 2 (Carats) Parts ditto, &c. of fine Copper, making
- 24 (Carats) Parts, &c. of Standard Gold.

But in the Assaying of Gold Bullion, the Steps, Gradations, or Degrees, of Quality, reckoned by 24 Parts or Carats, are

too great; for which reason, it hath become a Custom to divide the Carat, or 24 Part, into 4 Parts, called Grains; and then again into Quarter of Grains; by such Division and Subdivision each Carat contains 16 quarter Grains, and 22 Carats 352 quarter Grains, and 2 Carats 32 quarter Grains; consequently 352 to 32 are in the same Proportion as 22 to 2, the required Proportion of fine Gold and Alloy to make a Standard Compound as aforefaid; 352 added to 32 making 384, is equal or proportionably to 22 added to 2, equal to 24. Hence it follows, that so many Parts in 384, as any Mafs of Gold abounds with base Metal, so many Quarters of Grains it is worse than fine Gold. How much the Alloy exceeds 32 Parts (the quarter Grains in 2 Carats) in 384, the Mafs is so many Quarters of Grains below or worse than Standard. As suppose 64 Parts Alloy, and 320 (together 384) fine Gold were mixed, the Compound would be 32 Quarters of Grains, or 2 Carats worse than Standard; for as a Mixture of 32 Parts of Alloy brings down the Quality of the Compound from fine Gold to Standard, which is 2 Carats worse than fine Gold; so 32 Quarters of Grains more, which is likewise 2 Carats, make the Compound 2 Carats worse than Standard. As it is practicable by the Art of Assaying to determine the Quality of Bullion to a Quarter of a Grain, or one 384 Part of any Mafs, so is such a Degree of Exactness a Requisite in Behalf of Property, as every Difference of a Quarter of a Grain is two Pence Sterling.

#### STANDARD SILVER is composed of,

11 Oz. 2 Dws. of fine Silver, and  
 18 Dws. of Copper Alloy, making together  
 12 Oz. or one Pound Troy Standard Silver; and so in Proportion to a greater or lesser Quantity.

There is in 11 Oz. 2 Dws. (of fine Silver) 222 Penny Weights, or 444 half Penny Weights; and in 18 Penny Weights of Alloy, there is 36 half Penny Weights (as in the Case of Gold just spoken of) 444 is to 36 in the same Proportion of 11 Oz. 2 Dws. is to 18 Dws. and as the Quality of Silver is determined by the Assay to half Penny Weights, so many Parts of 480 (the Sum of 444 Parts of fine Silver, and 36 of Alloy) any Mafs of Silver Bullion contains of base Metal, so many half Penny Weights it is worse than fine Silver, down to Sandard and below, to all Degrees of Coarseness.

#### Of the Assaying of GOLD and SILVER.

The Assaying of Gold and Silver is performed by putting a small Quantity of Gold or Silver (of which 12 Grains are sufficient

sufficient for Gold, and 1 Dw. for Silver) into a kind of small round Crucible or Test, about the Size of an *English* Halfpenny, but very shallow, not exceeding a Quarter of an Inch in Depth. The Piece to be assayed is first nicely weighed by the Assay Master's Scales and Weights, which are curiously exact, then put into the said Crucible or Test, with a Piece of round flatted Lead, which are, as I apprehend, Pistol Balls flatted with a Hammer; the Lead is put in with the Bullion, to serve as Flux, to carry off by its Fumes as it burns away, and is destroyed the base Metal contained in the Assay. Many Assays are made at a Time, each in its respective Test or Crucible, which are set upon the flat Bottom of a Furnace, resembling a small Oven; the Fire, which is made of Charcoal, is above the Assays, and when a sufficient Heat is given, according to the Skill of the Operator, that all the base Metal is refined away out of the Assay or Assays, and that nothing but pure Metal remains; then they are taken out of the Furnace, and when cold, weighed with the same nicety as before, the Diminution or Loss of Weight determines the Quality of the Bullion, according to the Proportions above-mentioned; and the Assay Master Writes the Quantity of the Assay on the same Paper it was sent in; so such is called the Assay Master's Report. Assays are sent to the Assay Offices in this manner; wrote on a small Piece of Paper thus;

A. B.

Gold Assay January, 10, 1761.

W. 2. Car.  $1 \frac{1}{4}$  Gr.

A. R.

Silver Assay January, 10, 1761.

W. 10. Dws. Ob.

Note, B. stands for Better.

W. — worse,

Ob. — half Penny Weights,

St. — Standard.

The U S E of the

## Preceding TABLES,

FOR REDUCING

### GOLD and SILVER Bullion to Standard,

By I N S P E C T I O N.

**T**H E S E Tables for the reducing Gold and Silver Bullion to Standard, by direct Reference thereunto, have no need of a formal Description, nor scarce are any Rules necessary to be laid down for the Use of them, they being as plain and intelligible as Common Interest Tables.

The Titles at the Top of each Page and Column direct to the Quality of either *Kind*, whether better or worse than Standard, by the Words *greater* or *lesser* Degree of Fineness than Standard; and by the Words *fine* or *worse* immediately above the Word Standard in the Head of each Column, under the Figures denoting the Quality of the respective Bullions, which in the Tables for Standarding Gold are expressed by Carats, Grains and Quarters; and in the Silver by Ounces, Penny Weights, and half Penny Weights.

The Tables for Gold are extended from fine Gold down to two Carats below Standard, descending by quarter Grains in each Column; the Silver Ones from fine Silver down to one Ounce worse than Standard, descending by the Gradations of half a Penny Weight at the Hand of each Column. These Extremes, as I know by my own Experience, as well as from Information from Gentlemen employed at the Royal Mint in the Tower of *London*, will include Ninety-nine in a Hundred of the practical Cases that occur in real Trade, in the Dealings in Bullion, amongst the Merchants, Refiners, or Goldsmiths; very little Gold or Silver being bought or sold (especially in *Great Britain*) that is, of a coarser Kind than what the Tables are brought down to.

One Example in each sort of Bullion will be sufficient to show the Use of the said Tables.

E X A M P L E

E X A M P L E I.

In an Ingot of Gold, weighing 252 oz. 10. dws. 12. Grains, 1 Carat, 3 Grains, fine, or better than Standard; how much Standard Gold does it contain? From Page 376, under 1 Car. 3 qrs. collect as under,

Gross Weight,	Standard,
oz. dw. grs.	oz. dw. gr. 10.
200 0 0	215 18 4 4
50 0 0	53 19 13 1
2 0 0	2 3 4 4
0 10 0	0 10 19 1
0 0 12	0 0 13 0
<hr/>	<hr/>
252 10 12	272 12 6 0

Stand. Gold in the said Ingot.

For Proof of this Example; take half the given Weight, which is 126 oz. 5 dw. 6 Grains, and collect the same from the same Tables and Columns, and you will have, Gross Weight, Standard,

oz. dw. grs.	oz. dw. grs. 10.
100 0 0	107 19 2 2
20 0 0	21 11 19 6
6 0 0	6 9 13 1
0 5 0	0 5 9 5
0 0 6	0 0 6 5

<hr/>	<hr/>
126 5 6	136 6 2 9
2	2

252 10 12 272 12 5 8

By thus taking one half of the Gross Weight, and finding the Standard therein contained, and then doubling the same, a certain Proof is obtained. The Difference is but two Tenths of a Grain, which is quite inconsiderable, and arises from the Defect that necessarily occur in the Fractions. By thus using the Tables, you are at an absolute Certainty, as appears by the above Example and Proof; and also shews, that the right Numbers have been collected from the Table, and is, and will, on all occasions to which the Tables serve, be as great a Demonstration of their Truth, as can possibly be expected, and the Difference I think will never be greater than in the Proof of this Example.

Collecting the Numbers out of the Tables for Standardizing either Kind of Bullion is exactly the same, whether above or below Standard; only be careful to use the Column of Figures that belong to the Quality of the Bullion that is to be reduced, and which hath at its Head the Assay Master's Report of the Quality of the same; likewise be careful to take out the right Numbers that stand against the gross Weight from the proper Columns both in the Ounces, and in the Penny Weights and Grains, which, being well observed, render any more Examples for the Standardizing of Gold unnecessary.

EXAMPLE

E X A M P L E I.

In 573 oz. 15 dws. of Silver Bullion  $5\frac{1}{2}$  dws. worse than Standard, how much Standard Silver? From Page 431, under  $5\frac{1}{2}$  dws. worse, collect the Numbers as under,  
 Gros Weight, Standard,  
 oz. dws. oz. dws. grs.  
 500 0 487 12 6  
 70 0 68 5 8  
 3 0 2 18 12  
 0 15 0 14 13  

---

 573 15 559 10 17  
 Standard Silver in said Bullion.

For Proof, take half the Weight, which is, 286 oz. 17 dws. 12 grs. and collect from the same Table as before,  
 Gros Weight, Standard,  
 oz. dw. grs. oz. dw. grs.  
 200 0 0 195 0 22  
 80 0 0 78 0 9  
 6 0 0 5 17 1  
 0 17 0 0 16 14  
 0 0 12 0 0 12  

---

 286 17 12 279 15 10  
 2 2  

---

 513 15 0 559 10 20

In this Proof, there is only a Difference of 3 Grains, which in Silver is inconsiderable, and arises from the same Causes as in the Proof for Standarding Gold is mentioned.

In using the Silver Tables one Caution must be used; that as the Figures 1 and 2, which mean so many Grains, after standing very near the Cypher that stands in the Place of Tenths of Grains, may be taken out by Mistake for 10 or 20 Grains, to avoid which, only observe, that when the 1 or the 2 stand for themselves, there is only one Cypher after them, but when they stand for 10 or for 20 there is two Cyphers after them.

The like Caution must be taken in using the Gold Tables, for if but two Places of Figures are under the Titles Grains and Tenths, the latter Figure is Tenths, and the other is so many Grains; but if there are three Figures under the said Titles, the first two are so many Grains, and the last, tenth Parts.

A TABLE OF TROY WEIGHT.

24 Grains is 1 Penny-weight  
 20 Penny-weights is 1 Ounce  
 12 Ounces is 1 Pound Troy  
 14 Oz. 12 Dws. Troy is 1 Pound Avoirdup. Weight.

But when Bullion is to be reduced to Standard, that is, coarser than what the Tables by Inspection extend to, the following general Table may be used; and first, the Gold Table.

A. GENERAL TABLE

For the Standarding of GOLD.

Ounces.	Ounces	dw.	gr.	to.	Ounces.	oz.	dw.	gr.	toth

N. B. The decimal Parts of an Ounce contained in the Penny Weights are found in the second Column of the Table; and the decimal Parts of an Ounce of the Grains are in the fourth Column; in the sixth Column are the quarter Grains contained in the Carrats of the Affay; and in the eighth is the quarter Grains contained in the Grains and Quarters.

A GENERAL TABLE

For the Standarding of SILVER.

U S E of the

# GENERAL TABLES.

**T**HES E General Tables for the Standarding Gold and Silver, wherein the Use of Multiplication is necessary, the Standard Weight is not directly obtained, but the *Bette nefs*, or *Worstness*, or how much is to be *added* to, or *subtracted* from the gross Weight, as the Bullion may happen to be above or below Standard; and by being used, as in the two following Examples is shewn, extend to all Cases in either kind of Bullion, from fine Gold or Silver, down to the lowest possible Degree of Coarseness.

## E X A M P L E I.

In an Ingot of Gold, containing 255 oz. 7 dwts. 18 grs. worfe o Car.  $1\frac{3}{4}$  grs. how much Standard Gold is contained in the said Ingot? First find the decimal Parts that belong to 7 dwts. 18 grs. which by the Table Page 450, are found to be, for 7 dws. 35. for 18 grs. 0375, which added together make 3875. the decimal Parts of an Ounce contained in the said Penny-Weights and Grains; which joined with the Ounces will stand, 255. oz. 3875 Parts. Then find how many quarter Grains are in o Car.  $1\frac{3}{4}$  which by the said Table (or may easily be mentally done) which are 7 quarter Grains; Then multiply the gross Weight in Ounces and Parts (as last stated) by the quarter Grains, and collect the Product out of the General Table for Gold, and you will have a Sum that is the *Worstness*, that is to be subtracted from the gross Weight, will leave the Standard Weight; as in this Example the Bullion is supposed to be worfe than Standard.

From Table Page 450, the Decimal Part of an Ounce contained in 7 dws. is 35 Parts, and in 18 Grains 0375 ditto

Collect the last Numbers in the opposite Column, and you will have as under,

	oz.	parts	oz.	dw.	grs.	10.
making 3875 ditto	1000	0	2	16	19	6
	700	0	1	19	18	5
joined to the Oz. is 255 3875 dit.	80	0	0	4	13	1
Multip. 7 quarter Grains 7	7	0	0	0	0	5
	0	7	0	0	1	0
oz. 1787   7125 Part	<hr/>					
	1787	7	5	1	13	7

Which

Which is the *Worseness*, or Quantity to be subtracted from 255 oz. 7 d. 18 grs. which leaves 250 oz. 6 dwts. 4 grs. 3 10ths, the Standard Weight in the given Mafs. If this Example be resolved by the Table by Inspection, page 393. by the Column under 0 Car. 13 Grains, the Standard Weight will be found to be 250 oz. 6 dwts. 4 grs. 2 10ths; and thus the General Tables may be used to prove the Tables by Inspection, and alternately each other, as far as the Tables by Inspection extend; and out of the Limits of the said Tables by Inspection, the General Tables may be used to prove themselves, by two Operations; by first taking the whole Weight of the Bullion, and finding the Standard contained therein; and then the half, and finding the same, and doubling the last Result; which, if equal to the first Operation, the Work is right.

The Standarding of Silver by its General Table is exactly the same, as renders any Example needless. The only Caution to be observed, that you add or subtract, as the Qualities of the Bullions are better or worse than Standard.

Of valuing Gold or Silver Bullion by the gross Weight.

There is two Tables for that Purpose, that for Gold, Page 452; and that for Silver, Page 453; against the Quality of the Assay of either Metal in either Table, take out the Parts proportional that stand against the same; multiply the said Parts proportional by the standard Prices, and the Product will be the Price of the Bullion in the Gross. If the Quality of the Metal cannot be found in the said Tables, for the Qualities of the Bullions begin in These Tables where it ends in the Tables by Inspection, then take the Number that stands against 10000 Ounces, or the last Numbers at the Foot of each Column under Ounces, and the Quality of the Bullion to be valued in the gross; for these are proper proportional Parts, and work, as above directed.

Example in Gold above Standard.	1 Car. 3 Grs. is 10795 Parts Propor. Multiply by 78 <hr style="width: 50px; margin: 0 auto;"/> 86360 <hr style="width: 50px; margin: 0 auto;"/> 75505 <hr style="width: 50px; margin: 0 auto;"/> 84   2010 which is 84 s. 2 1/2 d. the Value of an Ounce of that Bullion.
What is an Ounce of Gold worth, that is 1 Car. 3 grs. fine, at 78 s. the Ounce Standard, in Page 376, at the Foot of the Column under	

Example

Example in Silver above Standard.

What is an Ounce of Silver worth, that is 12 dws. fine, at 5 s. 8 d. Standard, at the Foot of the Column, under 12 dw.

Fine, is 10540 Parts proportional.

Multiply by 68

716720 is 5 s. 11 d.  $\frac{2}{3}$

nearly.

The Work is exactly the same in all Cases, whether above or under Standard; observing to strike off always 4 Places of Figures to the right Hand. These Parts proportional are applicable to the Valuing of Bullion in the Gros in the Monies of all Europe, or the commercial World; for it is but multiplying the said Parts, by the Standard Value of either sort of Bullion in whatsoever Money it is, and the gros Value is obtained.

But tho' Gold and Silver may be thus valued in the Gros, it is seldom used in the Course of Trade, especially where the Quantity is considerable; the Goldsmiths sometimes use it in the Purchasing of small Quantities, and it helps to form their Judgment in buying a Bargain, as it were by the Hand or Lump. And it may be used by the Merchants, Refiners, &c. in making a general Estimate; but Gold and Silver are in general bought and sold by the Standard Weight and Value.

To determine the Quality of the Compound of several Ingots, or Masses of Gold or Silver Bullion when melted together, that are of different degrees of Fineness or Coarseness.

R U L E.

Add the Standard and gros Weight respectively into one Sum, before they are put together to be melted; after they are melted, note the Difference of the Weight before and after melting; and if the Standard Weight of all the Masses before melting, is greater than the Weight of the whole after melting, the Compound is above Standard; if less, under.

Divide the Standard Weight of the whole before melting, by the Weight of the Mass after melting, and get four Places of Figures in the Quotient, if the Compound is above Standard; and but three Places if under Standard; search for the said Quotient (or the nearest Number thereunto) in the Tables of Parts proportional, using the Table for the proper Bullion, whether Gold or Silver, and against the Number so found, you will find the Quality of the Compound; for Gold, in Carats, Grains, and quarter Grains; and in Silver in Ounces, Penny-weights, and half Penny-weights, and whether better or worse than Standard.

The AMERICAN NEGOTIATOR. 457

If you cannot find the quotient Figures in the Tables of Parts proportional, look for the same at the Foot of the Tables by Inspection, and at the Head of the Column where the Quotient is found (or the nearest Number thereunto) the Quality is found.

E X A M P L E.

Three Ingots of Gold Bullion, of the Qualities and Weights under mentioned, are melted together; what is the Quality of the Compound.

Gross Weights, oz. dw. grs.	Quality.	Standard Weights. oz. dw. grs. 10
200 10 12	2 Grs. worse,	195 19 8 5 Page 393
100 0 0	1 Car. worse,	95 9 2 2 Page 397
100 0 0	1 Car. 3 Grs. fine,	107 19 2 2 Page 376
<hr/>		<hr/>
400 10 12		399 7 12 9

By Waste in Melting the new Mafs only weighs 392 oz. 15 dw. 12 grs. which being less than the Standard Weight before melting, shews the Compound to be above Standard; then divide, as in the Rule directed, as in the following Work.

Weight of the new Mafs,	Standard in the whole.
oz. parts.	oz. parts.
392 .775	( $\frac{399 \ 375^{00}}{392 \ 775}$ ) 1016 Parts proportional.

	392775
	<hr/>
	2672250
	2356650
	<hr/>

There is no Occasion to put down the Remainder, as a sufficient Number of Figures in the Quotient are obtained.

The nearest Number, to which, at the Foot of the Gold Tables by Inspection, hath, at the Head of the Column, 1 gr. 2 qrs. Fine or above Standard, what is the Quality required?

The decimal Figures in the Dividend and Divisor, are what answer to the odd Penny-weights and Grains, and are found in Page 450.

Of adjusting Bullion to Standard.

To any Mass of Gold or Silver Bullion, that is worse than Standard, to find how much of another Mass of either Metal that is better than Standard must be added, to make the Compound exactly Standard.

O B S E R V A T I O N.

This is only possible when the Quantity and Quality of the Bullion that is to be added contains so much Betterness, or Increase, or is so much above Standard, as there is Defect, *Worftness* or Diminution in the Mass imposed to be made Standard; but is always practicable, if the Mass is above *Standard*, and is to be reduced to it, by adding Bullion of coarser Quality to it, or even Alloy.

R U L E.

Subtract the *Standard* Weight from the gross Weight, and the Remainder is the Defect, or *Worftness* of the Mass proposed to be made Standard of; subtract the *gross* Weight of the Mass that is better than Standard from the Standard Weight, and you have the *Betterness* or Increase; and if the Quantity of that *Betterness* or Increase is greater than the Defect or *Worftness* in the former Mass, to make a Standard Compound is practicable, otherwise not, as has before been observed; but if the Mass of Bullion that is to be added contains more Increase than there is Defect in the Mass to be made Standard of, only Part of the same need be taken to make a Standard Compound.

E X A M P L E.

A Mass of Gold Bullion, weighing Gross 60 oz. 10 dwts. containing 58 oz. 10 dwts. Standard, is required to be made Standard of, by melting with Part of a Mass of the same Bullion that weighs 75 oz. gross; and being better than Standard, holds 80 oz. Standard. How much of the latter must be taken to mix with the former to make the Compound *Standard*?

Mafs to be made Standard of,	Mafs, Part of which is to be
oz. dw.	taken, to make a Standard
60 10 Gross Weight,	Compound.
58 10 Standard ditto,	oz.
2 0 Defect or <i>Worftness</i> .	80 Standard,
	75 Gross Weight.
	5 Increase or <i>Betterness</i>

Then

Then say by the Rule of Three, as 5 oz. (the Increase) is to 75. oz. (the Mass is contained in) so is (2. the Defect in the Mass to be made Standard of) to a fourth Proportional; which in this Example will be found to be 30 Ounces; and so much of the *better* Sort must be taken to add to the *worser* to make a Standard Compound.

In this Example there is no Fractions; but where there may happen to be any, join the Decimals that answer to the odd Penny Weights and Grains, as found in Page 450, and work with the Numbers as in the common Rule of Three, and a Solution to the Thing enquired after is obtained.

There is only one Objection to this Rule, which is, that Bullion thus compounded will be better than Standard after they are melted together, if taken in Quantities prescribed by this Rule; because, even in simple Fusion or Melting, some of the base Metal will evaporate, and the Compound of course be better than Standard; so that it must be referred to the Skill of the Refiner or Goldsmith, to take so much more of the Coarser, or so much less of the finer Bullion, as his Judgment may direct; however, this Rule may serve to make a near Estimate.

There is no Difference in making the same Estimate in Silver as in Gold Bullion.

By this Method, Gold and Silver Bullion may be reduced to Standard without the Expence of refining the coarser Masses, if a sufficient Quantity of Bullion that is better than Standard is at Hand, containing a sufficient Degree or Proportion of Betterness or Increase, as will counterbalance the Defect or Worstness of the coarser Mass. The coarsest Bullion may be made Standard of, by mixing it with fine Gold; of which I might here give Rules and Examples how to be done, but it would be rather a Thing of Curiosity than Use, as fine Gold or Silver are too valuable for several Uses, to be this Way applied; especially for any great Quantity, if it is to be used in adjusting Bullion to Standard, either for Plate, the Mint, or in Traffick, coarse Bullion is therefore (if it cannot be compounded and adjusted, as is here shewn) refined by dint of Fire and Fluxes; and fine Bullion is easily reduced to Standard, by adding Alloy to it, which is only adding so much Rose Copper to the gross Weight, as to make it Standard.

I have

I have inserted Tables in the last two Pages for the Use of the Officers in the Army, employed this present War on the American Expeditions, the Pay-Master-General, Deputies and Clerks.

They are founded on the Proportions of valuing the Spanish Dollar at 4s. and 8d. Sterling, and the same at 8s. in *New-York*, and 7s. 6d. *Pennsylvania* Currency, making Pars of Exchange as at the Head of the Tables. It may be observed they receive something less, than if they were paid at the commonly estimated Pars of Exchange of these respective Places; which in the former is 175, and in the latter 165. But as the Exchange they are paid at, is little less than what they can purchase good Bills at, they have little or no Reason to complain of Injustice. An Example or two will make it clear.

E X A M P L E.

An Officer's Pay or Arrears due is 150 l. 7 s. 6 d. Sterling. How much must he receive *N. York* Currency for the same Exchange 171  $\frac{1}{2}$  as in the Table. From the same Table collect, and you have as under.

But it's supposed he can get Bills at 172  $\frac{1}{2}$ , then by Page 60 his 257 l. 15 s. 8 d.  $\frac{1}{2}$  will purchase a Bill for 149 l. 8 s. 9 d.  $\frac{1}{4}$  as under.
