METEOROLOGICAL OBSERVATIONS.

Explanatory Notes.

The Tsing Hua University Observatory is located within the University compound, Tsing Hua Yuan, Peiping, China, at Lat 40° 0' 16" N, Long, 116°21'42" E, height of barometer above mean sea level 84.5 meters, height of rain gauge above mean sea level 70.5 meters.

Six direct observations are made at three-hour intervals from 6 a.m. to 9 p.m. 120 E. Meridian standard time, namely, 6 a.m., 9 a.m., 12 noon, 3 p.m., 6 p.m. and 9 p.m. Hourly readings besides the above six direct observations are taken from the instrumental records.

In indicating the numerical values of several meteorological elements, metric measures are used.

Cloud forms are named according to the international classifications.

Reading for maximum temperature are taken from the maximum thermometer, and readings for minimum temperature from the minimum thermometer, but they are not the highest and lowest values indicated in the records of a thermograph. The maximum diurnal range is derived from the above two extreme readings.

Barometric readings are corrected for temperature and latitude but not for altitude. Extreme maximum and minimum values of atmospheric pressure for each day are taken from the Sprung-Fuess barograph, and are not the highest or lowest values of the 24 hourly readings. The maximum diurnal range is deduced from these two extreme readings.

Wind directions are taken from the record sheet of the Combined Anemo-biograph and Wind Direction Recorder, sixteen compass points being used. Extreme velocity of wind is taken from the same record sheet.

When the temperature is below the freezing point of water, hair hygrometer and hygrograph are used instead of psychrometer and psychrograph for humidity readings.

In registering the state of weather and other meteorological phenomena which may be observed during the day, international symbols are followed as closely as possible. Additional signs are made only in the case when they are not provided. The following are the Conventional Signs used in the daily Observations.—
