LINING-OUT STOCK

Isn't it reasonable to judge that the clean-cut appearance, of such propagating houses as this one, is reflected in Lining-out Evergreens that are just a little better than those offered elsewhere?

What the Auctioneer says:

This list cancels all previous quotations, and the terms and conditions shown will carry in all Bulletins for Spring, 1928.

The prices printed in this list are based upon present market conditions, and are for immediate acceptance, subject to change without notice and stock being unsold. All goods are offered f. o. b. West Grove; **packing at cost or free for cash with order.** We sell 250 or more at the 1,000 rate and 25 or more at the 100 rate.

Orders are booked with the understanding that they shall become void should injury befall the stock from flood, error in count, drought, fire, or other causes beyond our control.

Shipments travel at purchaser's risk, and in the absence of definite instructions from the buyer, stock will be forwarded according to our best judgment without assuming responsibility.

Claims, if any, must be made immediately on receipt of goods.

Terms cash, except to those with established credit, who may make special arrangements for payment.

We endeavor to keep varieties true to name and will replace, on proper proof, any not true; but we do not guarantee the success of the grower. In event of untrue stock, our liability must be limited to invoice value at time of shipment.

Copy of Pennsylvania State Certificate of Inspection on all orders.

We invite correspondence from prospective buyers, but ask that all communications be written on printed business stationery so that we can grant trade prices to only those individuals or firms actually entitled to receive them.

The plant names used in this list conform, for the most part, with "Standardized Plant Names," adopted by The American Joint Committee on Horticultural Nomenclature.

Members American Association of Nurserymen, Eastern Nurserymen's Association, Pennsylvania Nurserymen's Association, etc.

Lining-Out Evergreens

Our Famous 2¼ in. Pot Plants

250 of a kind at 1000 rate

Progressive Nurserymen now follow the method, in which we pioneered, of handling young Evergreens in pots. You probably know potted stock, but we should like to emphasize that the plants here offered are propagated with greater care than the average, and with much more time allowed for root development than is usual. The fact that more and more of the leading plantsmen in America are depending solely upon this stock is the best reason why you should try an order this Spring!

● **tricuspidata atropurpurea.** *Purple Japanese Creeper*
The habit of attaching itself firmly and closely to stonework placed *Ampelopsis tricuspidata* (*Boston Ivy*) in the forefront of popularity. This new variety, *Atropurpurea*, is similar to the type and possesses the added attraction of dark purple leaves not changing to green.

	10	100
2¼-in. pots	\$2.50	\$20.00

● **BERBERIS julianae.** *Wintergreen Barberry*

This is a handsome shrub of rather upright habit, said to be the hardiest of evergreen Barberries. Its long leather-like leaves assume a brilliant crimson tint in autumn. *Berberis Julianae* attracted much attention from Nurserymen who saw it in our fields this Summer, and judging by orders already booked it will be a good seller.

4 to 6 in.	\$3.00	\$25.00

卐 CANNAS

You can get *more display* for *less money*, and *attract more trade* with these Cannas, than by any other means we know of.

This was a field of gorgeous color all summer, which you may have enjoyed while motoring past our grounds.

Prices are for plump dormant divisions, 2 to 3 eyes, plus roots. Prices of plants from 3-in. pots, ready May 1, are same as for dormant roots except \$3 per 100 must be added on all varieties priced below at less than \$8 per 100.

Four Fine Novelties, Introduced in 1927

We are delighted to offer our patrons a very choice assortment of new Cannas. They have been selected by prominent visitors as well as our own most critical experts and they constitute the cream taken from the large collection of unintroduced seedlings left to us by our former Vice-President, Antoine Wintzer, after thirty years of progressive hybridizing.

We calculate that more than 50 per cent of the Cannas in first-class American gardens today are of our own introduction, which in this catalogue are marked with a Swastika 卐. The mere fact that so large a proportion of what we first introduced still continue in favor is ample evidence of our high standard.

Among the newer introductions are to be found most lovely shades, as charming as in orchids. What a relief they are from the old railroad station reds, and truly a valuable contribution to the happy and alluring colors of the summer garden. You will be delighted with these.

卐 **DELICIOUS** (10074). 3½ ft. Large flowers with broad, round petals of firm substance. Color is lemon-yellow, mottled with long dots of old-rose. The heads of the flowers come early and are continuously in bloom. Foliage is green. The individual flowers are not so attractive but when massed in beds this Canna is very effective. Price, \$1.00 each; \$75 per 100.

卐 **HOLLYWOOD** (10103.) 4 ft. A most beautiful Canna with green leaves, bronzed stems, and nice open flower-heads. Color is orange-pink, shading out to salmon-orange at the tips of the petals, and the throat is clear begonia-rose. Flower-heads are borne well above the foliage. A most outstanding color, different from anything else yet produced. Price, \$1.00 each; \$75 per 100.

卐 **HONOLULU** (10126). "Bronze-leaf City of Portland." 3 ft. Splendid open flowers of La France pink heavily overlaid with deeper pink. The lovely bronze foliage makes a nice setting for the dainty pink blooms. The flowers are large, well-formed, and come in great trusses well above the foliage. Has the same color and habit as "City of Portland." Price, \$1.50 each; \$100 per 100.

卐 **MONTEZUMA** (4931). 3½ ft. Rich, velvety firm flowers of Nopal red and scarlet. A dazzling color remarkable for its brilliancy, and the erect, firm stems carry great heads of these gorgeous flowers, high above the decorative bronze foliage, which in itself is attractive even if there were no blooms. This is the richest red Canna known up to this time. Price, \$1.00 each; \$75 per 100.

EVERGREENS

A point of particular interest to Nurserymen was brought out by Secretary of Commerce Hoover on December 2, in his 1927 report to President Coolidge. He emphasized that "this past year **new construction**, amounting to \$7,000,000,000 in value, constituted a powerful factor in maintaining business activity and prosperity." And as every live Nurseryman knows, new construction means, generally, **new chances to sell nursery stock.**

Another authority has pointed out that people are turning from racing about the country to find real pleasure in fixing up their home surroundings. Prepare to handle your share of this great business predicted for Nurserymen! Possibly you should **line-out more Evergreens.** A noted Landscape Architect says "when planning the surroundings of their homes, people almost always think first of Evergreens." Isn't it reasonable, then, that **great quantities should be planted to take care of the increasing demand?**

You can get several qualities of Evergreens for lining-out, but is there any real reason why you shouldn't plant material that you can feel confident will produce specimens you can sell at a profit. Only by setting out such stock can you be sure of maximum success. Rows without a break; plants alive to the very tips; Evergreens that will, in effect, be just what you have been looking for.

Think these thoughts as you make up your planting list from Page 3 of this booklet—you will be handsomely repaid.
