The Agricultural Department of the United States is constantly increasing the variety of food stuffs and medicines of the country by the introduction of new plants from foreign countries to sections adapted to them, says the *Morgan Hill Times*. A few years ago the eucalyptus tree was introduced into California from Australia. As a wood for manufacturing purposes, railroad ties and fuel it promises to be of great value to the State.

Eucalyptus oil has been used for about forty years, but only during the past ten years has it been employed in medicine very extensively. Its use is now constantly increasing as its properties and medicinal value become better known.

The fact that it is non-poisonous and non-irritant makes it especially safe and valuable. As much of it as a fourth of an ounce has been taken internally without injury and it may be freely applied to the most delicate tissue. Notwithstanding the fact that it is neither dangerously poisonous nor irritating to the human system, it is a very effective antiseptic and disinfectant and has come to be used quite extensively for dressing wounds, ulcers and other diseased tissues. It enters into the composition of several antiseptic preparations.

The oil is also a well-known remedy for malarial and other fevers and is used in treating diseases of the hair and skin and of the stomach, kidneys and bladder, and is especially valuable for affections of the throat, bronchi and lungs.

The telegraphers strike again suggests the advisability of the Government taking over the telegraph business of the country and making it a part of the postoffice department, or of establishing an independent system in competition with the Western Union Company. When a company like the Western Union will charge rates which produce a net annual income of 67 per cent on the value of its plant, the government is under no moral, nor legal obligations to keep out of the business. It is in the business of transmitting messages, and common business sagacity would dictate that it make use of the most modern methods, like the telegraph and the telephone. Particularly would this seem to be the case when the new features would be the best paying part of the business and that with little expenditure of money or increase of help.—*Morgan Hill Times*.

And just as long as we have the public service corporations as now existing, just so long may we expect to have the scandals that we are now being treated to in San Francisco and elsewhere throughout America. There is so much money involved the temptation for graft is too great. It may be that out of all these labor troubles and graft exposures will come government ownership, which is apparently the only solution.

The report in San Jose that the Western Pacific may build its depot in the southern part of that city may become true, but in all probability will not. The only logical entrance to San Jose is on this side of the city, and as it would be very much easier to secure depot facilities and rights-of-way over here than in the thickly populated part of San Jose, it is the feasible route. The depot in East San Jose would be very close to the great mass of San Jose, within five minutes from the bank corners, with a good car service, near the Naglee Park residence district, and a much more desirable location than the proposed new Southern Pacific union depot on the Alameda, at the present site of the narrow gauge depot. But the more important reason for expecting the Western Pacific to pass this way is the one that the road would traverse a rich territory at present without railroad facilities. The entire east side of the valley would contribute to the new road. Just keep your eyes on East San Jose.—*Post*.

We have received from County Superintendent Bateman a copy of the Santa Clara County School Manual for 1907, recently compiled and published by the Board of Education. It is a most valuable work, giving as it does the uniform text book studies which are to be used the coming year in the public schools.

Practical Sympathy.

Dr. Edward Everett Hale called upon the editor of a paper in a small New England town. In the course of conversation the editor told how he was worrying about his wife, how he had sent her to the country for her health, how she was growing worse rather than better, how his heart urged him to go to her and how the necessity of grinding out his editorials day by day was keeping him from her bedside. Dr. Hale returned to his hotel and called for writing materials. After several hours he returned to the editor and threw on his desk a pile of manuscripts.

"There!" he said. "Go and see your wife. I've scribbled off enough articles of contemporaneous human interest to feed your paper for a week."—*Woman's Home Companion*.

WONDER MILLINERY

COMPLETE LINE
LATEST SPRING MILLINERY
108-110 SOUTH FIRST STREET

1 CENT IS ALL IT WILL COST YOU to write for our big FREE BICYCLE catalogue showing the most complete line of high-grade BICYCLES, TIRES and SUNDRIES at PRICES BELOW any other manufacturer or dealer in the world.
DO NOT BUY A BICYCLE from anyone, or on any kind of terms, until you have received our complete Free Catalogue illustrating and describing every kind of high-grade and low-grade bicycles, old patterns and latest models, and learn of our remarkable LOW PRICES and wonderful new offers made possible by selling from factory direct to rider with no middlemen's profits.
WE SHIP ON APPROVAL without a cent deposit. Pay the Freight and allow 10 Days Free Trial and make other liberal terms which no other house in the world will do. You will learn everything and get much valuable information by simply writing us a postal.
We need a **Rider Agent** in every town and can offer an opportunity to make money to suitable young men who apply at once.

\$8.50 PUNCTURE-PROOF TIRES ONLY

Regular Price \$8.50 per pair. **We Will Sell You a Sample Pair for Only \$4.80** (CASH WITH ORDER \$4.65).
NAILS, TACKS OR GLASS WON'T LET OUT THE AIR

NO MORE TROUBLE FROM PUNCTURES. Result of 15 years experience in tire making. No danger from THORNS, CACTUS, PINS, NAILS, TACKS or GLASS. Serious punctures, like intentional knife cuts, can be vulcanized like any other tire.
Two Hundred Thousand pairs now in actual use. Over Seventy-five Thousand pairs sold last year.

DESCRIPTION: Made in all sizes. It is lively and easy riding, very durable and lined inside with a special quality of rubber, which never becomes porous and which closes up small punctures without allowing the air to escape. We have hundreds of letters from satisfied customers stating that their tires have only been pumped up once or twice in a whole season. They weigh no more than an ordinary tire, the puncture resisting qualities being given by several layers of this, specially prepared fabric on the tread. That "Holding Back" sensation commonly felt when riding on asphalt or soft roads is overcome by the patent "Basket Weave" tread which prevents all air from being squeezed out between the tire and the road thus overcoming all suction. The regular price of these tires is \$8.50 per pair, but for advertising purposes we are making a special factory price to the rider of only \$4.80 per pair. All orders shipped same day letter is received. We ship C.O.D. on approval. You do not pay a cent until you have examined and found them correct. We will allow a cash discount of 5 per cent (thereby making the price \$4.65 per pair) if you send FULL CASH WITH ORDER and enclose this advertisement. We will also send one nickel plated brass hand pump and two Simpson metal puncture closers on full paid orders (these metal puncture closers to be used in case of intentional knife cuts or heavy gashes). Tires to be returned at OUR expense if for any reason they are not satisfactory on examination.
We are perfectly reliable and money sent to us is as safe as in a bank. Ask your Postmaster, Banker, Express or Freight Agent or the Editor of this paper about us. If you order a pair of these tires, you will find that they will ride easier, run faster, wear better, last longer and look finer than any tire you have ever used or seen at any price. We know that you will be so well pleased that when you want a bicycle you will give us your order. We want you to send us a small trial order at once, hence this remarkable tire offer.

COASTER-BRAKES, built-up wheels, saddles, pedals, parts and repairs, and everything in the bicycle line are sold by us at half the usual prices charged by dealers and repair men. Write for our big SUNDRY catalogue.

DO NOT WAIT but write us a postal today. **DO NOT THINK OF BUYING** a bicycle or a pair of tires from anyone until you know the new and wonderful offers we are making. It only costs a postal to learn everything. Write it NOW.

LATE HAPPENINGS ALONG THE COAST

Interesting Items of News From Those States that Border the Broad Pacific.

Current Events Among Your Neighbors in the Far West Gathered by Mail and Telegraph and Presented in Kaleidoscopic Array.

Vallejo.—Vallejo wineries are figuring on turning out a million and a half gallons of wine this season.

Reno, Nev.—Mrs. Frances Clara Von Bredow, wife of Lieutenant Von Bredow of the Kaiser's Cuirassier Guards, youngest daughter of Senator Francis G. Newlands of Nevada, died last week in Berlin.

Salinas.—Mrs. W. H. Clark, mother of Frank Clark, Mayor of Salinas, dropped dead at the home of a friend. Heart disease caused death. Mrs. Clark was 68 years old and came from New York State forty years ago to Salinas.

Redding.—While getting water from a spring near here J. J. Cady was attacked by a black bear. The animal chased the man almost to his home, when a neighbor appeared and slew the bear. It is said to be the largest bear seen in this county for years.

Redding.—The superintendent's residence at the United States fish hatchery at Baird was burned. Defective wiring was the cause. The building, which belonged to the Government, cost \$5000. The personal loss of contents falls on Captain Lambson, the superintendent, and is \$2900.

Marysville.—The body of an unknown man found in Feather river, near Yuba City, was buried last week. The coroner was unable to discover the man's identity. The body was found by two fishermen, who hooked it while trolling for bass. The man was about 25 years old and probably Irish.

San Francisco.—Morris Vogel was sentenced by Judge Cook to serve five years in Folsom for violating a probation compact. Vogel robbed a tailor, but was believed to have committed the crime under stress of want. Four days after he was released the same tailor shop was robbed again. Vogel pleaded to be sent anywhere but Folsom.

Seattle, Wash.—A special from Fairbanks, Alaska, says: What is believed to be a gigantic conspiracy to rob the United States mails is now in operation in Alaska. A few days ago word was received from the Coast that the third pouch missing in a month had been reported at Skagway. The sack contained \$45,000 in gold dust, addressed to Seattle banks.

Vallejo.—The torpedo boats Davis and Fox are to be extensively repaired at the yard. The Davis is at present moored alongside the quay wall at the yard, where her condensers and bunkers are being overhauled. Her boilers will be installed shortly. It is expected that her repairs will be finished in about three weeks' time, when the repair work on the Fox will be commenced.

Marysville.—The seven children of the late ex-Senator Daniel A. Ostrom have agreed among themselves over the division of their father's estate, three sons taking half of his great wheat farm, while two sons and two daughters take the remaining half. The public had expected a legal fight over this estate, but it will not develop. The personal property was all sold at auction.

San Francisco.—At a meeting of Niantic Parlor No. 105, of the Native Sons of the Golden West, the resignation of Eugene E. Schmitz as a member of the order was read by the Secretary. The resignation was voted upon and quickly accepted by the members present. The former Mayor gave no reason for resigning, his letter merely stating he wished to sever his connection as a Native Son.

Ukiah.—As a result of the visit of Chief Engineer Zook of the Northwestern Pacific Railroad to this city, a survey crew started out to commence running two lines for heavy steel that is to be put down between this city and Cloverdale immediately. It is understood that all grades will be cut down and curves straightened. So far none of the steel has arrived, but two car loads of fastenings for rails are in this city and Cloverdale.

San Francisco.—The San Francisco Board of Education has decided that its teachers cannot experiment with matrimony during the holidays and hold their jobs through a leave of absence to see how they like the novelty of being "Mrs." Immunity contracts of the sort will no longer go, said the Board yesterday, and if teachers will persist in getting spliced, they will have to look out for other jobs later on, and can't come back when the honeymoon is over.

Stockton.—The record price for black prince grapes was paid last week, free on board, at Lodi, when the growers received \$62 a ton for their grapes. There is a big demand for grapes and shippers are accepting all they can secure. The Black Prince variety is generally considered a poor

LITTLE MONEY FOR SEASON'S WORK.

Salmon Fishers Receive One Dollar a Day for the Voyage.

San Francisco.—The crew of the salmon schooner Geneva which arrived here a few days ago from the Behring sea, received \$137 each for the four months and a half during which they were away. The Geneva's crew was paid off before United States Shipping Commissioner Joseph F. Curtin for their season's work. The members of the crew were by no means elated over the receipt of the money. Under a mutual agreement, between the crew and the fishing company, the men received a stipulated sum, in addition to a percentage on the value of the fish caught. They faced the necessary hardships and dangers attendant upon the pursuit of their calling in sub-Arctic seas for a small amount of certain money, buoyed by the hope that a good catch would bring a large percentage return for their labors.

During the last and the present season their hopes in this direction have been disappointed, and they have returned to the coast trade where their services are urgently required at present.

Had the crew of the Geneva been engaged in the coast trade during the time they spent up north, they would have received, according to the present scale of wages, \$180 instead of the \$137 they were paid yesterday.

Experienced shipping men say that the hardships of the fishing life have a peculiar attraction for these men, and despite the two bad seasons they have experienced, next season will find the same men embarking to gamble with the fish companies on their northern catch.

JAPS PUT SCREWS ON VINEYARDISTS.

San Joaquin Growers Compelled to Pay the Brown Men Big Wages.

Stockton.—The Japanese grape-pickers appear to have secured complete control of that work in the northern part of this county and the vineyardists have been compelled to submit for this season at least. When it came time to make contracts for harvesting the crop the Japanese contractors insisted on \$2.50 a day instead of \$1.75 as heretofore paid for this work. The growers objected and at first refused to sign up, but the Japs had formed a kind of a union and not a contract would be accepted at the old figures.

The vineyardists held a mass meeting and the matter was gone over carefully. A proposition was made to the Orientals, but they could not be induced to accept a cent less than the schedule they had fixed. The growers had to pay the price or leave their grapes on the vine. They have appointed a committee to act early next season to keep from being caught again, but the Japs only laugh at the move, as they assert they are determined to get good wages.

seller and these high figures surprised many of the growers. If the Black Prince would stand long shipment, they would prove a good money-maker, as they could be placed in the market in advance of all other table varieties.

San Francisco.—A large delegation of Brooklyn business men, with members of their families, is en route west for a tour of the coast. The party will spend one day in this city. Its members will be extensively entertained by the local commercial bodies. They are also to be entertained at San Jose, Monterey, Santa Barbara, Paso Robles and Los Angeles. They are to present to Mayor E. R. Taylor from the Brooklyn League an engraved set of resolutions congratulating San Francisco on its wonderful progress since the fire.

San Jose.—Advance reports from the Native Sons' parlors indicate that the coming three-day celebration of Admission day will be the biggest thing that San Jose ever has attempted, and it is now predicted that the throng which will enter the city will be nearer 50,000 than the original estimate of 30,000. Sixty-one parlors have asked for places in the line of march, which will contain upward of 500 men on foot, with a thousand Native Daughters in carriages. No estimate can as yet be made of the number of floats, but, aside from these, the banners of the three-score parlors will add greatly to the appearance of the parade.

San Francisco.—John T. Graham was peacefully driving a huge wagon-load of hay along Potrero avenue when he began to smell something. It wasn't exactly long green or plug cut, but it was near enough to it to cause Graham no concern for a time. Then the fumes grew a little stronger than should come from his pipe or the pipe of any of the sewer workers along the route. Graham looked around over his load of bales. He discovered a column of smoke going skyward and a crackling blaze coming forward uncomfortably fast, so he whipped up, trying to race to help by the roadside. But the faster he traveled the more the hay burned, and finally the curfit was stopped, while driver and spectators turned in and fought the blaze. More than half the forty bales were ruined, however, and Mr. Graham's horses will have a smoked hay diet for some weeks to some from the remainder.

STEAMER IMPROPERLY LOADED SINKS WHILE AT HER BERTH

San Francisco.—The Pacific Mail liner Acapulco, Captain Trask, loaded with a valuable cargo for Central America and New York and with about a score of the 37 passengers on board, heeled over to starboard Monday, shortly after noon, submerged a coal port which admitted the waters of the bay and caused the vessel to sink alongside the old Pacific Mail wharf. Much of the cargo, which is valued at \$111,483, will be spoiled by the submergence. The baggage of the passengers also suffered serious damage. No lives were lost and nobody was injured. The vessel was overloaded and topheavy owing to improper stowing of the cargo.

Except for coaling the Acapulco was ready for sea. Only about 40 tons of fuel remained to be transferred from the barge alongside into the liner's bunkers when the accident occurred.

The pumps were started, but it was too late, and the Acapulco slowly went down, listed over at an angle of about 15 degrees, the lines by which it had been held in its berth pulled out the mooring piles.

The dolphin at the end of the wharf around which the stern lines were made fast was torn up by the roots and only the fact that the steamer had found lodgment in a bed of mud prevented its turning turtle.

When it was seen that nothing could be done to prevent the steamer's sinking passengers and crew hastened ashore. From the wharf they watched the ship that was to have carried them to Panama settle in the mud.

STRIKING KEYMEN CONFIDENT, COMPANIES CLAIM A VICTORY

New York.—Although President Small of the commercial telegraphers' union declared Monday that conditions were worse than at any time since the strike was declared, neither the Western Union nor the Postal seemed to take the statement seriously.

"We are not paying any attention to Small," was the comment of Edward J. Nally, vice president and general manager of the Postal. "Conditions are steadily improving with us." "The week opens with the brightest prospects we could possibly hope for the strikers," said Small. "We have

agents within earshot of every official of both companies, and therefore know whereof we speak. Before the end of the week, unless a settlement is reached, the telegraph system of the country will be out of commission."

Belyidere Brook of the Western Union said:

"So far as the Western Union company is concerned the strike is settled. We are now operating with no more delay than the day before the strike was declared. Our company has all the men it needs and conditions practically are normal. The strikers are beaten."

ADOPT MEASURES TO KEEP AWAY DEADLY WHITE FLY

Stockton.—J. F. Costello, fruit inspector for the Northern District of San Joaquin county, has been selected by the County Board of Horticultural Commissioners to go to Marysville at once and confer with the experts who are making an effort to eradicate the deadly white fly that has been causing so much trouble. The pest has not made its appearance in San Joaquin county, but the board decided that it would be best to take early steps to keep it from reaching this section, and in case it did they

would be in a position to act quickly. Costello will spend several days with the men who have charge of the work in Bakersfield and Marysville, and he expects to make a report to the commission at the next meeting. The white fly is considered the most dangerous fruit pest that has invaded California, and the State officials are taking extreme measures to stamp it out before it gains a foothold. At this particular time the orchards and vineyards of San Joaquin county are not troubled with any pest.

CANADA WILL CHECK FLOOD OF JAPANESE IMMIGRANTS

Ottawa, Ont.—The Dominion Government is still negotiating with the Japanese Government with a view to restricting immigration to Canada to a limited number each year, no matter whether the Japanese come from Honolulu or anywhere else. It is expected that such arrangement will be effected. The existing arrangement is for about 500 or 600 a year, but this is overridden by arrivals from Honolulu alone.

Tokio.—The clause of the em-

igrants' protection law making ships carrying emigrants subject to official permission, which hitherto has been limited to vessels destined for Hawaii or South America, will be made to operate in regard to similar ships destined for Canada on and after the 1st of September. This will have no effect in reducing the number of immigrants, which already is under certain restrictions, but it is aimed principally toward assuring the safety and interests of officially recognized emigrants.

NEVADANS USE BARBED WIRE FOR TELEPHONE CONNECTIONS

Reno, Nev.—Henry Riter, owner of the famous old Bowers mansion resort, which in Comstock days was noted for its unique silver door knobs and hinges, put a force of men to work constructing a private telephone line along the Virginia and Truckee Railroad to Franktown and Carson. The work will consist chiefly of making connections. For over several miles

of the route the barbed wire along the fences will be utilized in making the circuit.

The territory along the Virginia and Truckee Railroad has been neglected by the Pacific States Company, which cuts over the mountains from Virginia to Reno, but the residents of Washoe, Franktown and other towns will soon be able to use the "barb" wire to Reno and Carson.

OFFERED NO RESISTANCE TO MILKING BY MACHINE

Los Angeles.—Milking machines have been introduced on the great Bixby ranch, whose cows supply virtually all of Long Beach, and the innovation is expected to revolutionize the dairy business in this section. The first day's work of accustoming the cows to the new order of things proved so successful that no difficulty is apprehended, and the old danger

from infection by hand milking will soon be eliminated.

Other dairymen have balked at the experiment, but it is understood many of them will at once install the machines on ranches supplying this city with milk. Manager Williams of the Bixby ranch, a young man of university training, is responsible for the transformation.

WANT FACTORIES ESTABLISHED.

California Promotion Committee Has a Plan to Solve Farm Labor Problem.

San Francisco.—As a means of solving the problem of farm labor, the shortage of which has been particularly felt during the shipping and canning season, the California Promotion Committee has started a campaign of encouragement to manufacturing enterprises in the fruit-growing centers. With a factory or two of even moderate size in the heart of each fruit-growing district the problem of supplying the orchards and hop fields with emergency help at picking time will be overcome to a great extent, declares the committee.

The movement is gaining a satisfactory headway and quite a number of factories have been established in such localities in the past six months. These include olive-oil factories in the olive-growing localities, beet-sugar factories, wool-scouring plants, soda factories and many others of a kind calculated to retain the help at seasons of the year when the demand for farm labor is slack.

The committee is in receipt of encouraging reports from many of the agricultural sections showing rapid progress toward dividing the large holdings of valley land, which have been heretofore used entirely for grain and pasturage, into small farms of ten, twenty and forty acres. This movement has been brought about through the extension of irrigation. The purchasers of these small tracts are men of family and small means, whose plans are to devote their energies to intensive farming. A booklet entitled "Intensive Farming in California" has been issued for the purpose of stimulating interest in this branch of agriculture.

DESTROYING THE DEADLY WHITE FLY.

Horticultural Experts Believe They Will Succeed in Suppressing Pest.

Bakersfield.—After laboring for almost one week, the entomologists under the direction of Edward K. Carnes of the State Commission of Horticulture have completed the fumigation of the citrus trees affected by the white fly on William S. Tevis' Stockdale ranch, near this city. The ground under the trees fumigated is now white with the thousands of insects which have been killed. The fumigation tents have been kept busy ever since the entomologists commenced their work, and now, allowing the vapor to work on each tree about an hour at a time, nearly all of the infested trees have been treated. It is believed that unless the eggs hatch out a new generation of the insects, or other trees are found to be infested, the work of the horticulturists will be over for the time.

Carnes has left for Marysville, where he will continue the campaign against the pest in that section. Stephen Strong, an expert on insect eradication, has been detailed to remain in Bakersfield to guard against an outbreak. Investigation has failed to find that the pest has spread in any direction to date. Stockdale is thoroughly quarantined.

Native Sons Will Expel Grafters

San Francisco.—Eugene E. Schmitz will be tried by the Grand Parlor of the Native Sons of the Golden West notwithstanding the fact that his resignation from the order has been accepted by the Niantic Parlor. All of the other hoodlums who resigned from the order are in the same boat. They must face the music of a trial and in the end be expelled from the order in disgrace. Ruef, Gallagher, Coleman, Phillips and Boxton will be disgraced along with the ex-mayor.

Montenegro May Lose Constitution.

Vienna.—According to news dispatches published in this city, Prince Nicholas of Montenegro has decided to withdraw the constitution which he granted to his subjects in the fall of 1905. It is declared there has been nothing but trouble in Montenegro since a popular form of government was instituted.

Magoon Disgusted With Cuban Methods.

Havana.—Despairing of the ability of the Cuban municipalities to keep the cities clean and sanitary, Governor Magoon signed a decree placing sanitary affairs under the control of the central Government.

Attempt to Check Wine Frauds.

Paris.—As proof of its determination to eradicate wine frauds, the Government announced that there have been 4200 prosecutions for violations, resulting in 3540 convictions.

Successful Trip of German Airship.

Berlin.—The Persival steerable airship made its first flight of the year Monday, carrying four aeronauts. Her motors worked perfectly, also her steering apparatus.

Would Send Lepers to Japan.

Honolulu.—Local Japanese offer to send the Japanese lepers at Molokai to Japan, because the Tokio Government is now segregating its lepers.

CURRENT NEWS OF THE WORLD

Important Events of the Week in Both Hemispheres Compiled for Busy Readers.

What Has Happened, What Is Happening, and What Is Likely to Happen, Related by Correspondents in Every Corner of the Earth.

New York.—The first general meeting of the transcontinental railroads will be held in New York September 10th to ratify the new schedule according to the interstate commerce ruling.

Washington.—President Gompers said the American Federation of Labor probably would sue the National Manufacturers' Association on a charge of conspiracy in beginning the concerted effort to injure organized labor.

Berlin.—The directors of the Shantung Mining Company have received a cable from Tsingtau announcing an explosion of dynamite in the underground Fangste mine, resulting in two Germans and 100 Chinese being killed.

Syracuse, N. Y.—Julius F. Eller has been arrested here for return to Alamosa, Colorado, where it is alleged he stole \$2000 in money orders from the Rio Grande Railroad. Eller declares he was duped by a friend and got none of the plunder.

Camden, N. J.—A negro murdered the wife of Edward Horner, a farmer near Merchantville, and also killed a servant, Mrs. Victoria Nipoll. The purpose of the murders was robbery. The assassin fired the barn so as to distract the attention of the household first.

The Hague.—Nearly all governments have instructed their peace delegations to endeavor to bring about obligatory arbitration, also the establishment of a permanent court of arbitration. Germany thus far has opposed a world treaty on the ground that it would minimize rather than promote obligatory arbitration.

New York.—Count Boni de Castellane's favorite chauffeur, Louis Dussau, is stranded in this city. He declares his fall from the position of motor king of the Boulevard, is due to a trick played upon him to get him out of France because he would have been a valuable witness on the Count's side in the recent divorce suit.

Pittsburg.—Della Fox, comedienne, is seriously ill at the Hotel Lincoln. Dr. Mulligan who is attending her, declares that she may never again appear on the stage. Miss Fox is suffering from appendicitis and was forced to cancel her engagement at the Grand Opera House. All of her future engagements have also been canceled.

Honolulu.—The island of Laysan has not disappeared, as was reported recently by the captain of the schooner Olsen. The island was visited on the 15th of this month by the United States Government tug Iroquois, which was returning here from Guam. The Olsen's captain reported that he cruised for some days in the vicinity of the island, but could find no trace of it. It is probable that his reckoning was wrong.

Philadelphia.—William H. Hicks, paymaster of Schuam & Uhlinger, textile machine manufacturing company, was held up by three highwaymen in the northeastern part of the city and robbed of a satchel containing \$6000. Pursuit ensued, and one of the robbers was captured after several shots were fired. The others escaped with the satchel. Hicks is suffering from a bullet wound in the arm inflicted by the robbers.

New York.—The Journal of Commerce quotes an unnamed New Yorker, who it says is very close to the Administration, as saying that the usefulness of Bonaparte as a member of the Cabinet has culminated. The paper says that his immediate retirement is unexpected, but there is no question that the President is opposed to the "flippant and undignified attitude and doubtful legal procedure displayed by the Attorney-General."

San Francisco.—Natives of British India are not eligible under the naturalization laws to citizenship in the United States, according to a ruling of Attorney-General Bonaparte. This ruling is the outcome of an objection made by the Superior Courts of San Francisco to allowing Hindus to have citizenship papers until the matter had been decided by higher authorities. District Attorney Devlin took the matter up with Washington, with the above results.

Washington.—James W. Vance, president of the National Association of Manufacturers, and himself a manufacturer of St. Louis, in the Supreme Court of the District of Columbia filed suit to enjoin Samuel Gompers and other officials of the American Federation of Labor from using the boycott and the so-called unfair and "we don't patronize" lists against his firm in St. Louis or against other firms and individuals. The case is in the nature of a test and is regarded as highly important.

Put Trust Offenders In Jail.

By WOODROW WILSON, President of Princeton University.

ONE really RESPONSIBLE man in jail, one real originator of the schemes and transactions which are contrary to the public interest legally lodged in the penitentiary, would be worth more than A THOUSAND CORPORATIONS mulcted in fines if the reform is to be genuine and permanent.

WHAT THIS COUNTRY NEEDS IS NOT GOVERNMENT OWNERSHIP OF RAILROADS, BUT LAWS THAT WILL ATTACK AND PUNISH PRESIDENTS AND GENERAL MANAGERS OF RAILROADS FOR EVASIONS AND VIOLATIONS OF THE STATUTES. STOCK MANIPULATIONS ARE SHEER THEFTS AND SHOULD BE PUNISHED AS SUCH. FAILURE TO DO SO IS LIKE OVERLOOKING HIGHWAY ROBBERIES.

Every corporation is PERSONALLY directed either by some one dominant person or by some group of persons. SOMEBODY in particular is responsible for ordering or sanctioning every illegal act committed by its agents or officers, but neither our law of personal damage nor our criminal law has sought to seek the responsible persons out and hold them individually accountable for the acts complained of. We have never attempted such statutes.

WE INDICT CORPORATIONS THEMSELVES, FIND THEM GUILTY OF ILLEGAL PRACTICES, FINE THEM AND LEAVE THE INDIVIDUALS WHO DEVISE AND EXECUTE THE ILLEGAL ACTS FREE TO DISCOVER NEW EVASIONS.

It is only in this way that we can escape socialism. Unless we can single out the individual again and make him once more the subject and object of law we shall have to travel STILL FURTHER upon the road of government regulation which we have already traveled so far, and that road leads to state ownership.

Homemaking Is Woman's Normal State.

By President CHARLES W. ELIOT of Harvard University.

THE satisfactions which women most need to earn, which they most hope to earn, are THE SATISFACTIONS THAT COME FROM DOMESTIC LIFE—from the joys, hopes, anxieties, fears and blessings of the home. Homemaking is the intellectual life of a woman in her NORMAL STATE, and many a woman who has never married secures the greater part of these most durable satisfactions. The race depends upon these durable satisfactions for women, and, although we see in recent times a very great development of other occupations for women—a fortunate development, too—in almost all cases such things prove to be temporary or, if pursued in older life, have become only a path to the sources of higher satisfactions.

With a man the profession in which he perseveres from day to day contributes greatly to the DURABLE satisfaction of his life. Among other things, it procures for him his home. It enables him to support "her." It gratifies also his desires for labor, competition and success.

THE GREAT SOURCE OF DURABLE SATISFACTION IN LIFE IS THE HOME WHICH THE WOMAN CREATES, WHICH SHE ILLUMINES AND BLESSES.

It is the joy of children and grandchildren, the joy of that intimate and tender relation of "one to one," which is Emerson's definition of happy marriage. These are for educated as for uneducated women the source of THE CHIEF DURABLE SATISFACTIONS OF LIFE.

Railroad Heads Responsible For Agitation.

By United States Senator RAYNER of Maryland.

SOME of the leading railroad presidents and officers in the country are to blame for all this trouble. They are agitators, and THEY ARE THE MEN WHO ARE RESPONSIBLE FOR THE PRESENT CONDITION OF AFFAIRS. Neither the president of the United States nor congress deserves the slightest degree of censure.

The leading officers of these railroads have made hundreds of millions of dollars by TRICKS OF FINANCIAL JUGGLERY with the railroads they represent, treating them as their own property to aggrandize their fabulous wealth, and they are responsible to their bondholders and their stockholders for the disasters that are now upon us. It is a frenzy of the frenzied financiers that has caused the trouble.

THESE RAILROAD MANIPULATORS MUST BE BROUGHT TO BAY, AND WHEN THEY ARE MADE TO REALIZE THAT THEY ARE THE SERVANTS AND NOT THE MASTERS OF THE PEOPLE, AND THAT THEY ARE THE TRUSTEES OF THEIR BONDHOLDERS AND STOCKHOLDERS, THEN, AND NOT UNTIL THEN, WILL THE INVESTMENT OF THE WIDOW AND THE ORPHAN BE SAFE AND POPULAR AGITATION CEASE.

Flying the World's Finest Sport.

By WILBUR WRIGHT, Airship Inventor.

FLYING or soaring is the finest sport, I believe, in the world. With a proper soaring machine—and I believe it could be made for less than \$500—and with perfect control I believe A MAN COULD HOVER OVER A SHIP LIKE A GULL ALL DAY without fatigue, provided the wind was right.

It is not easy. All birds, moreover, cannot soar, but only those like the gull, buzzard or eagle. Soaring is done by catching upward air currents and riding down on them. If the upward currents are faster than one rides down, the general direction is upward. It is a TRICK like riding in to the seashore on the crest of a breaker at high speed. Birds know the upward currents and instinctively how to find them.

WHILE YOU CANNOT LEARN TO FLY FROM THE BIRD, ONE MAY SEE HOW THEY DO IT AFTER LEARNING. I HAVE SEEN BIRDS FLYING TAIL BACKWARD. THERE IS NO TELLING WHAT MAN MAY BE ABLE TO DO WHEN HE HAS THE PRACTICE.

The Old Clock.

[Original.]

The clock and tower were very old, though the tower was far older than the clock, having long been a ruin when the clock was put in it. It was supposed to have been built by the Romans. Some said that the clock was the oldest tower clock in the world. It had not marked the time for nearly a century. A few were living who had seen its great iron hands swing around the circle of its dial, but they were very aged people. Its works were covered with rust, and there was not a cogwheel that could be turned without a wrench.

One night suddenly every person in the village started up in bed. One, two, three, four! There was no bell to give forth this cracked antiquated metallic sound except the old clock in the tower. And if it had returned to its life it must be its dotage, for the hour was 12 midnight and all counted four strokes. Had not some one got up in the tower and struck the bell with a hammer? Impossible. The stairway—the last put in—had fallen years ago. Then, too, every one had heard the whirring of wheels—a whirring harsh with rust. Directly after the last stroke Peter Steiger, who lived just beneath the tower, had opened his shutter and looked out and up to the belfry. All was still up there and about the tower. If a foot-step had fallen on the stones beneath he would have heard it.

Some of the villagers got out of bed and talked to each other from behind their half opened doors; some lay awake wondering; some went to sleep again. Only little children slept on without having heard a sound. "Ah, the children," said old Caspar Steiner, "the innocent children! If they had been awakened I should not think there was evil in it, but they are sensible to evil." Caspar was the philosopher of the village, and his words struck deep into the souls of those who heard him. All looked for some catastrophe.

There was one person and only one not a child who had not heard the ghostly strokes. That was Gretchen, the granddaughter of old Becker, the miller. Gretchen was to be married in a few days to Hans Huntsman, a young fellow about her own age, who loved her, and she loved him dearly. Gretchen laughed at the fears of the villagers. When they told her what old Steiner had said she replied that she had not heard the strokes, and she was not a child, therefore the philosopher's words were not true.

While the older people were whispering together, shaking their heads and giving way to their dread, the younger ones were preparing for the wedding. No one had been married in the village for a long while, for there were few people there, and the boys as they grew up went out into the world, leaving the girls with no one to marry them. But Gretchen's lover would not go without her. He loved her better than even success in life. This was not remarkable, for every one loved her. She was gentle and amiable and kind. But not till later did those who knew her realize that, much as they prized her, they had not known her true value.

All the preparations were made, and the wedding was to be tomorrow. One man who had been a sailor predicted that the sun would shine. By common consent the older ones ceased to talk about the mysterious strokes of the old clock and, for the young couple's sake, assumed a cheerful air. Up to 10 o'clock the younger people were laughing and singing, then were still.

There were people in the village who lay awake till after midnight fancying, dreading, that they would hear the old clock strike again. Why they felt this way at this time they did not know. Scarcely any of the older ones but wished the wedding over lest something might happen to mar it. But they were disappointed in hearing the clock. It did not strike again. After midnight one after another they fell asleep.

While they were dropping off a light appeared in the house of the miller. Presently he emerged hurriedly from the door and called his next neighbor. Then, one by one, the villagers began to stir, passing from one house to another, and all looking anxiously at Becker. Gretchen had been taken suddenly ill.

The anxiety, the rumbling of people in and out of the house, increased rapidly. At 3 o'clock one came out and said, "If she doesn't get relief very soon she will die." At half past 3 another came and said, "She is sinking." At 4 o'clock old Becker wrung his hands and said, "She is dead!"

The people stood in groups in the street, saying to one another, "The old clock predicted this calamity, even to the hour and minute it would occur." Then came old Caspar Steiner, and one of the women said to him:

"You said the strokes of the clock predicted no misfortune because the innocent children did not hear them. You were wrong, you see."

"There has been no misfortune," said the old philosopher, "at least to Gretchen. She alone except the children did not hear the strokes. Had the clock predicted an evil for her she would have heard its strokes. They predicted her entry into paradise."

This quieted those who heard the words, and they went to their beds—all but the old grandfather and the lover, who were not to be comforted. The words of philosophy are not for those who mourn; they are for those who have passed the dark portal.

F. A. MITCHELL.

PRESS NOTES

FOR RENT—House of 5 rooms on orchard, near town. Address this office.

J. F. Duncan and daughters are enjoying an outing at Capitola.

Mrs. E. Fritz and Miss Beth Kennedy came home Friday from Ball's Ferry.

F. A. Leslie and family have returned to their Rose Lawn home from an extended outing at Alma.

Mrs. S. R. Wade has been visiting in Berkeley.

L. J. Stratton came down from Meadow Valley this week for a short visit with friends, being a delegate from Plumas county to the National Irrigation Congress at Sacramento. He is looking well and is well pleased with the country up there. The Western Pacific is being built right by his place and things are lively.

Miss Elizabeth Sargent entertained a party of Hamilton avenue friends last Friday afternoon, and in the evening entertained the party of friends who made up the camping party to Mt. Hamilton recently. A most delightful time was had. Miss Sargent will teach this year at Hickman, near Stockton.

Miss Mary Lewis and Mrs. Frances Doolittle entertained a party of friends on Thursday afternoon at Miss Lewis' home. Those present besides the hostesses were Mrs. John Strong, Mrs. Elgin Hurlbert, Misses Letitia and Della Archibald, Jessie Lewis, Gertrude Cook, Elizabeth Sargent, and Charlotte Davis.

Miss Helen Matthews and her mother have arrived from Oregon and will occupy Dr. Cooper's cottage on Central avenue.

Mr. Irving Snow has arrived to take up his duties as high school teacher. He will room at Dr. Cooper's.

Dr. and Mrs. John Cooper have been visiting relatives here.

Miss Gertrude Cook has returned to her school duties at the Corning high school, stopping over to visit her sister at Berkeley.

Miss Shepard was here one day this week before departing for her school duties at Hanford high school.

Miss Hattie Clark has accepted a position as clerk in the Campbell drug store.

Miss Myrtle Arnott, who recently graduated from the Pacific Coast Business College, has accepted a position at the Costa cannery in San Jose.

Miss Floy Lloyd is home from her Sonoma county school duties for the hop picking vacation.

Miss Zena Kennedy is on a visit to Berkeley.

Harold Smith has gone to Columbia College for a special course of study.

F. O. Putnam opens his dry goods store at Sunnyvale soon after Sept. 1st.

The grammar school will open on the 10th. Dr. Cooper has just presented the school with a manikin to be used in the study of physiology, and has received a vote of thanks from the trustees.

Garden Party a Success.

The Country Woman's Club scored another success last Friday night in its garden party at the home of Mr. and Mrs. George L. Beaver. The extensive grounds are adorned with beautiful old trees of every variety, which a little art transformed into the most charming booths imaginable for the display of toothsome dainties. These were all so well patronized that a very encouraging increase was made to the funds of the society. The gypsy tent, with Mrs. Wells of Payne avenue in the role of fortuneteller, was perhaps most popular of all.

A program of appropriate music was given with fine effect out of doors in the soft glow of Japanese lanterns and a rising moon. Socially the event was wholly delightful. The following is the program: Violin solo, "Mazurka" (Hoffman); Miss Adella Archibald; song, Miss Dorothy Blendinop; piano duet, "Les Clochettes," Miss Mary Beaver and Master George Beaver; song, "Day Dreams" (Stuletski), Mrs. Merrill; song, "A Dream" (Bartlett), Miss Edna Briggs; violin solo, "Spanish Dance" (Moskowsky), Miss Adella Archibald; song, "Sing Me to Sleep" (Greene) Mrs. Merrill; song, "The Dawn" (D'Hardelot) Miss Briggs. The accompanists were Mrs. Merrill, Mrs. Geo. Robson, and Miss Letitia Archibald.

A Pleasant Visit to Mt. Hamilton.

The editor had the pleasure of a visit to the wilds back of Mt. Hamilton Tuesday and Wednesday. The high mountain air, superb scenery, sleeping under a pine tree, the barking of coyotes, were all much enjoyed. But the sunset Tuesday night as seen from a 4000 foot elevation, as well as the sunrise Wednesday will never be forgotten. The latter scene was majestic. To be 1000 feet above the clouds that completely covered from view the San Antonio Valley and the famous Santa Ysabel creek was a beautiful sight to see. Above this great bank of clouds loomed up the distant Sierras beyond the San Joaquin Valley.

Coming up the grade from the Santa Ysabel country was Pat Condon, a former East San Jose resident, and still a property owner on Wright avenue. He was for over 20 years on the pay roll of Santa Clara county. He used to have charge of the branch jail (now the golf links club house on Alum Rock Ave.) and worked the prisoners at Alum Rock, which place he had charge of when Barney Murphy, Dr. Breyfogle, and Frank Mabury were the commissioners. Pat has no more use for politics and is happy in caring for his 1100 acre ranch. He was on his way to San Jose with 100 squares of butter from his dairy, having also some 50 dozen eggs besides other "stuff" that was calculated to bring dollars into his purse. Pat looked prosperous and we reckon he is.

Those mountain highlanders seem to enjoy life.

"The Old World and Its Ways."

This is the title of a new and profusely illustrated book by Col. William Jennings Bryan, recounting his noted journey around the earth and through Europe, which was so widely heralded through the American press.

The book is an illustrated and descriptive record of that journey, which is so memorable in current history. The journey embraced a period of a year, and covered practically all the nations of the earth.

Col. Bryan traveled with camera and pencil, and not only described, in brilliant phrase, what he saw, but further illustrated his journey by photographs. The photographs constitute a striking pictorial presentation and lend especial interest to the book. They number 240 and they show in picture the world as he saw it. They constitute just that many striking Object Lessons of the people of all countries in their cities, towns and villages—in their homes and everyday occupations.

The book will interest every reader as a unique presentation of a wonderfully interesting journey. It is sold only through solicitors. The Thompson Publishing Company, St. Louis, Mo., are the fortunate publishers. They advertise for agents in another column of this issue.

The Greatest Body.

Three thousand is a conservative estimate of the delegate body in the coming session of the National Irrigation Congress which meets in Sacramento on September 2-7. Every section of the country will be represented. The Atlantic and Southern and Middle West States more largely than at any previous meeting. Some of the most prominent men of the Nation, in every department of human activity will be present. Speakers who will address the Congress, constitute as distinguished a body as ever appeared on any platform in this country. Our insular possessions and several foreign lands will be included in the list. The scope of subjects considered by the Congress is broader than ever. It comprehends the whole proposition of the wise conservation and development of the basic sources of National wealth and prosperity. The essential relation of our forests and streams to every important material interest of the country is becoming more widely recognized. The fact is attested by the extraordinary interest being manifested in the convention which has for its object the promotion of National progress along those lines. The Fifteenth National Irrigation Congress is destined to exert a very large influence in that direction.

SUCCESS IS SURE

if you are a graduate of one of HEALD'S CHAIN OF COLLEGES

The demand for Heald graduates at a high salary is greater than the supply. Write today for our booklet containing valuable information. NOW is better than two to-morrows.

A moth destroyer and disinfectant. Placed under carpets, or in the folds of furs and clothing, it drives away moths and worms. Twelve sheets in a packet, postage prepaid 10c; six packets, 50c, if drugist does not have it. MADIGAN POWDER WORKS, Selection 1016 CLARKSVILLE, IOWA.

NOTICE OF HEARING PETITION FOR CONVEYANCE OF REAL ESTATE.

IN THE SUPERIOR COURT OF THE State of California, in and for the County of Santa Clara.

In the matter of the Estate of Henry Crosson, Deceased.

Notice is hereby given that Mary Crosson, administratrix of the Estate of Henry Crosson, deceased, has filed in the above entitled Court her petition for a decree authorizing her as such administratrix to convey to one Edward B. Hides, certain real property belonging to said estate, situated in the City and County of San Francisco, State of California, and described in said petition as follows:

Commencing at a point on the southeasterly line of Clary Street, distant thereon 72 feet northeasterly from the northeasterly line of Sixth Street; running thence northeasterly and along the southeasterly line of Clary Street, 44 feet 7 1/2 inches; thence at a right angle southeasterly 80 feet; thence at a right angle southwesterly 41 feet 7 1/2 inches; thence at a right angle northwesterly 53 feet 9 inches; thence at a right angle southwesterly 26 feet 3 inches to the southeasterly line of Clary Street and the point of commencement.

And notice is also hereby given that said Court has appointed the 6th day of September, 1907, at the hour of 10 o'clock a. m. of said day, and the court room of Dept. Two of said Superior Court at the court house in the City of San Jose, County of Santa Clara, State of California, as the time and place of hearing said petition and when and where all persons interested may appear and contest said petition.

Dated July 25th, 1907.
HENRY A. PFISTER, Clerk of said Superior Court.
By W. DENKER, Deputy Clerk.

SUMMONS.

In the Justice's Court of San Jose Township, County of Santa Clara, State of California. Frank H. Benson, Justice. E. Pezola, Plaintiff, vs. R. W. Foster, Defendant.

The People of the State of California send greeting to R. W. Foster, Defendant. You are hereby required to appear at my office in San Jose Township, Santa Clara County, State of California, to answer before me the complaint of the Plaintiff in the above entitled action, now on file in my office, within five days after service hereof upon you, if served in said Township; or within ten days if served out of said Township but in said County; or within twenty days if served elsewhere; in each case computing the time by excluding the day of service. And you are hereby notified that if you fail to appear and answer said complaint as above required, the Plaintiff will take judgment for any money or damages demanded in the complaint as arising upon contract, or will apply to the Court for the relief demanded in the complaint.

To the Sheriff or any Constable of said County, greeting: Make legal service and due return hereof.

Given under my hand this 20th day of December, 1905.

FRANK H. BENSON, Justice of the Peace in and for said Township.
