SUBJECT: Official Procurement of Japanese Military Training Films.

FROM: Aero- Medical Sect, Air Tech Intell Gp TO: Jpaanese Liaison Office, G-2, General Headquaters DATE: 7 December 1945

Attention: Colonel Munson,

1. It is requested thqt the following films, obtained from the Japanese military, be officially procured for transmittal to the Aero-Medical Section, Air Technical Service Command, Wright Field, by Air Technical Intelligence Group:

a. Training Film, 16 mm., black and white and silent, 1 reel. Subject: Exercises for school children to develop resistance to sea- and air-sickness. Made under supervision of Colonel Kochiro Toda, Army Medical College, Tokyo.

b. Training Film, 35 mm., black and white, silent, 2 reels, totalling about 1800 feet. Subject: Aviation Physiology. Incomplete. Made under supervision of Lt. Col. Hitoshi Igarashi, Army Medical College, Tokyo.

2. These are the only existent copies of these films.

3. In view of the fact that Captain Roberts, Moving Picture Section, GHQ, reports that obtaining good reproductions of these films in Japan is practically impossible, it is desired to transmit the originals to the United States.

4. These films are now in the hands of the Records and Documents Section, Air Technical Intelligence Group.

Request for Japanese Report on Design, Operation, & Functioning of Mitsubishi Automatic Power Control for Aircraft Engines

Power Plant Section (ATIG)	A-2 Liason FEAF Thru Ad. Sec. ATIG	7 Dec. 1945

1. It is requested that an engineering report on the design, operation, and functioning of the Automatic Power Control for aircraft engines, Mitsubishi design, be obtained from Mitsubishi Aircraft Co. for transmittal and file to USA, Wright Field, Dayton, Ohio.

2. In an interview with Mr. Toshio Komuro, Chief Engine Designer, Mitsubishi, Kyoto, Japan on 3 Dec. this office was informed that the Automatic Power Control was a Mitsubishi design, was built by the Howa Co. of Nagoya, and one experimental model was just completed when the war ended. It was scheduled for shipment to the 2nd Military Research Laboratory at Tachikawa for test, but Kumoro had no knowledge of its whereabouts at the present time. Kumoro stated that his company would start writing the above requested report immediately.

3. It is requested that this report be prepared on vellum and the vellum together with three copies be submitted to this office at an early date.

4. All material should be delivered direct or mailed to Headquarters Air Technical Intelligence Group, ADVON FEAF (ATIG), APO 925, Meiji Building, Tokyo, Japan and marked for the attention of Lt. Col. Davis, Documents & Records Section.

HEADQUARTERS EIGHTH ARMY
MILITARY GOVERNMENT SECTION
TOKYO DETACHMENT

5 October 1945

Procedure for Requistion of Labor.

1. Requisition will be submitted <u>in triplicate</u> using a form similar to the one attached on the reverse side.

2. It is important that the name of the officer to whom the laborers are to report physically be given.

3. It is important that a complete address be furnished as to where the laborers are to report using Japanese names in addition to English. (i.e. Nippon Yusen Kaishya - Japanese Shipping Bldg.).

4. Requisitions received in this office before 0930 may expect their laborers to report on the following day. Requisitions received after 0930 may expect their laborers two days later. Additional time is generally requested for obtaining skilled laborers, i.e. carpenters, plumbers, etc.

5. A weekly labor report will be furnished this office as of 2400 Saturday containing the following information:

Date	No of Laborers requested	No of Laborers used	Hours worked	Total manhours
		EXAMPLE		
18 Sep	35	30	8	240
19 Sep	35	32	8	256
20 Sep etc.	35	35	8	280

It is important that this report be received in this office before 1700 on Monday in order that arrangements may be made for prompt payment of the laborers by Japanese officials.

6. Units requisitioning labor are requested to phone this office on the afternoon of the day their labor is expected in order to keep the Labor Officer informed as to whether their requisitions are being adequately filled. Tel. ~~83-6624, 23-1736, 82-6693.~~ 23-7895

7. Units that desire to employ some particular individual direct, due to his special qualifications, may do so. This office will have the person so employed placed on the Japanese payroll provided (1) a separate requisition is filed stating name, address, date and type of employment engaged in, (2) the individual is Japanese. In case of other nationalties the using unit must handle payment through a class "A" Agent.

(Do not remove from sheets)

SUBJECT: Request for personnel to be interrogated.

FROM: Maj. M. W. Shayeson TO: AC/S G-2 Liais. Off. DATE: 26 November, 1945

THROUGH: Administrative Section, A. T. I. G.

1. It is requested that an interview be arranged with Asst. Prof. Dr. Fujio Nagao, Dr. Kodama, Dr. Horiba, and Dr. Goto, all of Kyoto Imperial University, the interview to be held on Monday, 3 December, at 8:30 AM in Room 636, Meiji Bldg. The subjects of the interview will be research on improvement of aviation fuel quality, and development of fuel knock-testing equipment.

The following information should be presented, typewritten in triplicate, at the time of the interview:

(a) A list of all research projects concerning improvement in quality of aviation fuels, lubricants, hydraulic fluids, and coolants which were active during the last three years, including the organization initiating the project, the results of the tests, and their application to practice.

(b) A list of all testing engines operated by the University, indicating the type and manufacture.

(c) A summary report on all test work done in the development of electronic devices for the detection of detonation in engine cylinders, including wiring diagrams of the apparatus and actual samples of detonation pick-up units.

(d) A summary report on new anti-knock additives studied.

(e) Indicate the number and educational qualifications of personnel engaged in fuel and lubricants development work.

SUBJECT: Request for Additional Information from Prof. ISAO IMAI, Aeronautical Research Institute, Tokyo Imperial University.

FROM: Capt. A. L. Lowell TO: Liaison Officer, A-2 FEAF, DATE: 12 Nov. 45
~~Aircraft Section, ATIG thru: Admin. Section, ATIG~~

307

1. In an interview with Capt. A. L. Lowell of ATIG on 8 Nov. 45, Prof. Isao Imai of the Aeronautical Research Institute stated that he was working on a simple calculation method for finding the effect of compressibility on the pressure distribution around an arbitrary airfoil shape. He stated that in this work he was attempting to generalize ~~the~~ and simplify the calculations involved in use of principles and equations discussed in ARI, TIU Report No. 294, "Two-dimensional Aerofoil Theory for Compressible Fluids."

2. It is requested that Prof. Imai be asked to prepare a brief discussion of the approach which he plans to follow in accomplishing this work, ~~outlining the~~ outlining the manner in which he proposes to adapt the equations of Report No. 294 to the actual calculation of pressure distributions around arbitrary airfoil shapes.

3. Prof. Imai should also be asked to prepare and submit any available data from wind tunnel tests or from supplementary calculations, showing the accuracy of his method, as compared to the ~~the~~ Glauert-Prandtl and Karman-Tsien methods.

4. The information requested above should be submitted, in English, to Capt. A. L. Lowell, Aircraft Section, ATIG, Rm. 646, on or before 20 Nov., 1945

THRU: Adm Section, ATIG

1. It is requested that Mr Agawa and Mr Jippo be obtained for interrogation at 1300 on 13 Nov 45 in Room 636 of the Meiji Bldg. These men were designers for the Sumitomo Kanyaki Propellor Factory Osaka, Japan.

2. Subject inview concerns detailed information regarding the Sumitomo Propeller development program. It is requested that the individuals bring with them reports (in English) covering the Following items listed on their Experimental and Research program given to Lt Sullivan, USNR, USSBS, in Osaka.

a. Studies and wind tunnel tests of new propeller airfoils.
b. Lubucation tests of VDM hubs.
c. Improved electric motors for VDM propellers.
d. Development of oil motors for VDM propellers.
e. Tests to improve VDM governing.
f. Improved feathering of VDM propellers.
g. Improved plywood for propeller blades.
h. Test of various cemting mixtures for propeller blade shanks.
i. Detailed description of process for fabrication hollow steel propellers blades with all photographs available. This report should include a description of all tests conducted on the blades at Osaka and by the Japanese Naval Air Force. 8 set of drawings of the steel blades is required.

3. These men should also be qualified to discuss any other experimental items under consideration by the company.
