Sharing Manual

A practical guide & tool for sharing content

www.circularcontent.com

Sebastiaan ter Burg

- Professional photographer and videographer that has been using CC licenses since 2007
- Worked as project manager for Wikimedia Nederland with museums, libraries and archives to open up their collections (2013 - 2015)
- Initiator of the GLAM WIKI 2015 conference
- Consultant for cultural & non profit organisations

Who has or knows someone
that has **contacted**
a person or **an organisation**
to ask permission
to upload a photo or other media file
to Wikimedia Commons?

Wouldn't it be great...

Wouldn't it be great...

not to have to ask for permission again?

to have access to source files instead of edited photos and videos?

to have a central place find these files, the waivers and data?

to change the conversation from asking permission to creating opportunities?

to make all of the above easy for communication departments?

**Sorry,
I don't have the solution.

Yet.**

CHAPTER 1

Acknowledging the problem

**The interest
in sharing content
is rising.**

**The amount of
content shared
is ever increasing.**

The amount of *implemented* structural workflows around sharing are close to zero.

**Adoption of
“open by default”
is 0,001%**

circular content

Why?

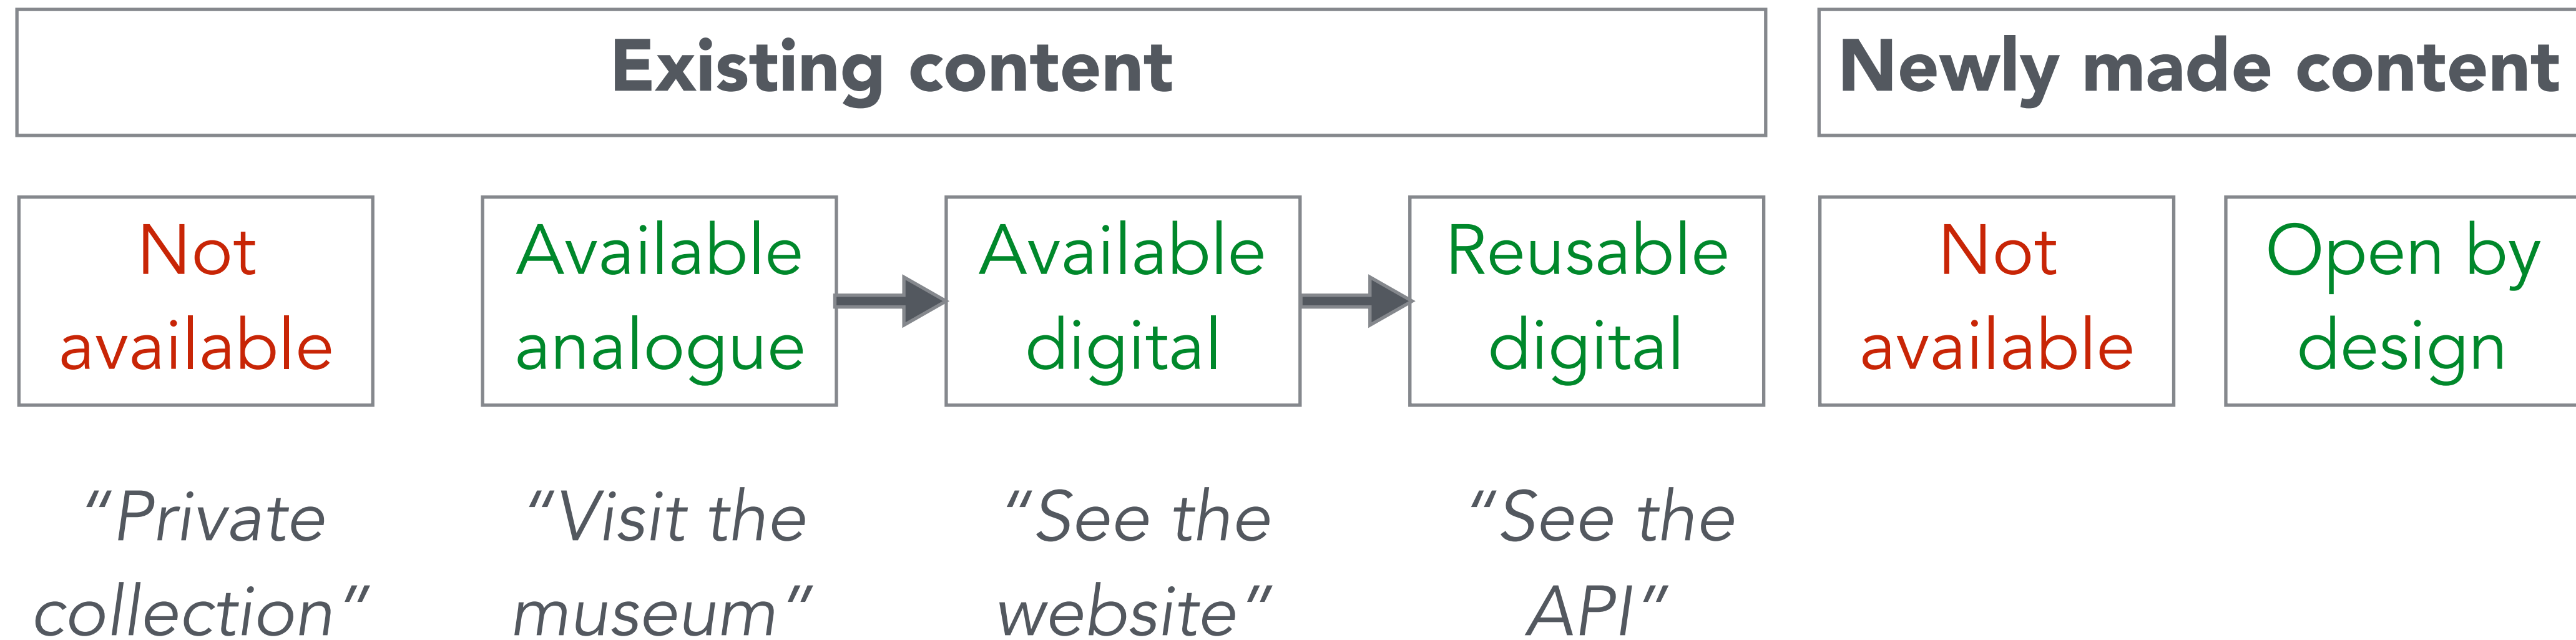

**Purposefully creating
open content
is hard.**

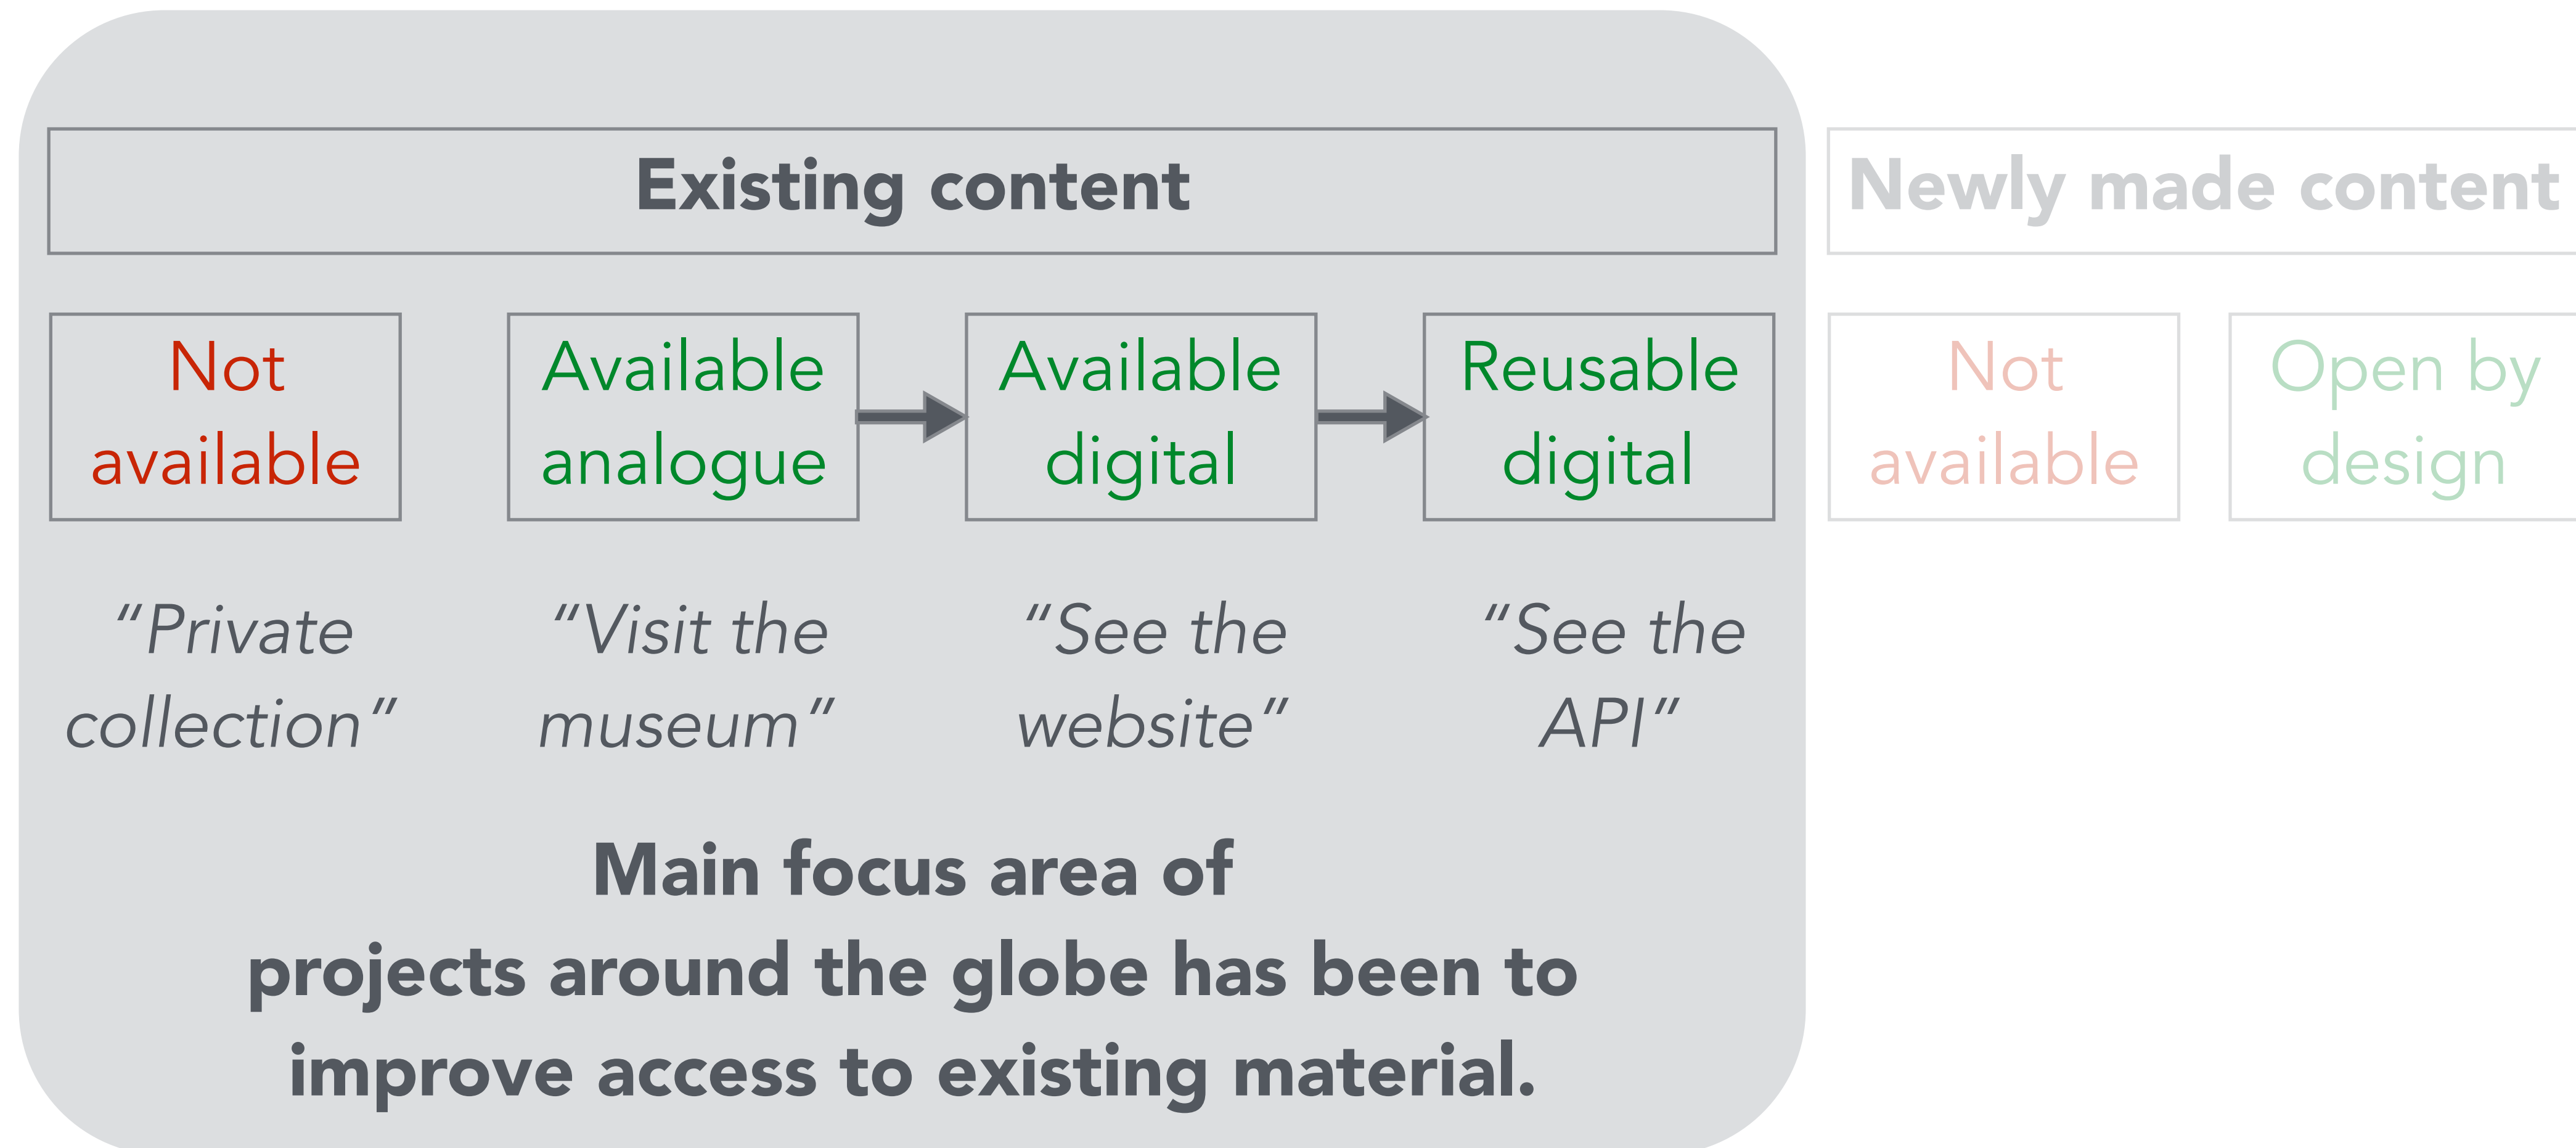

circular content

Problem 1

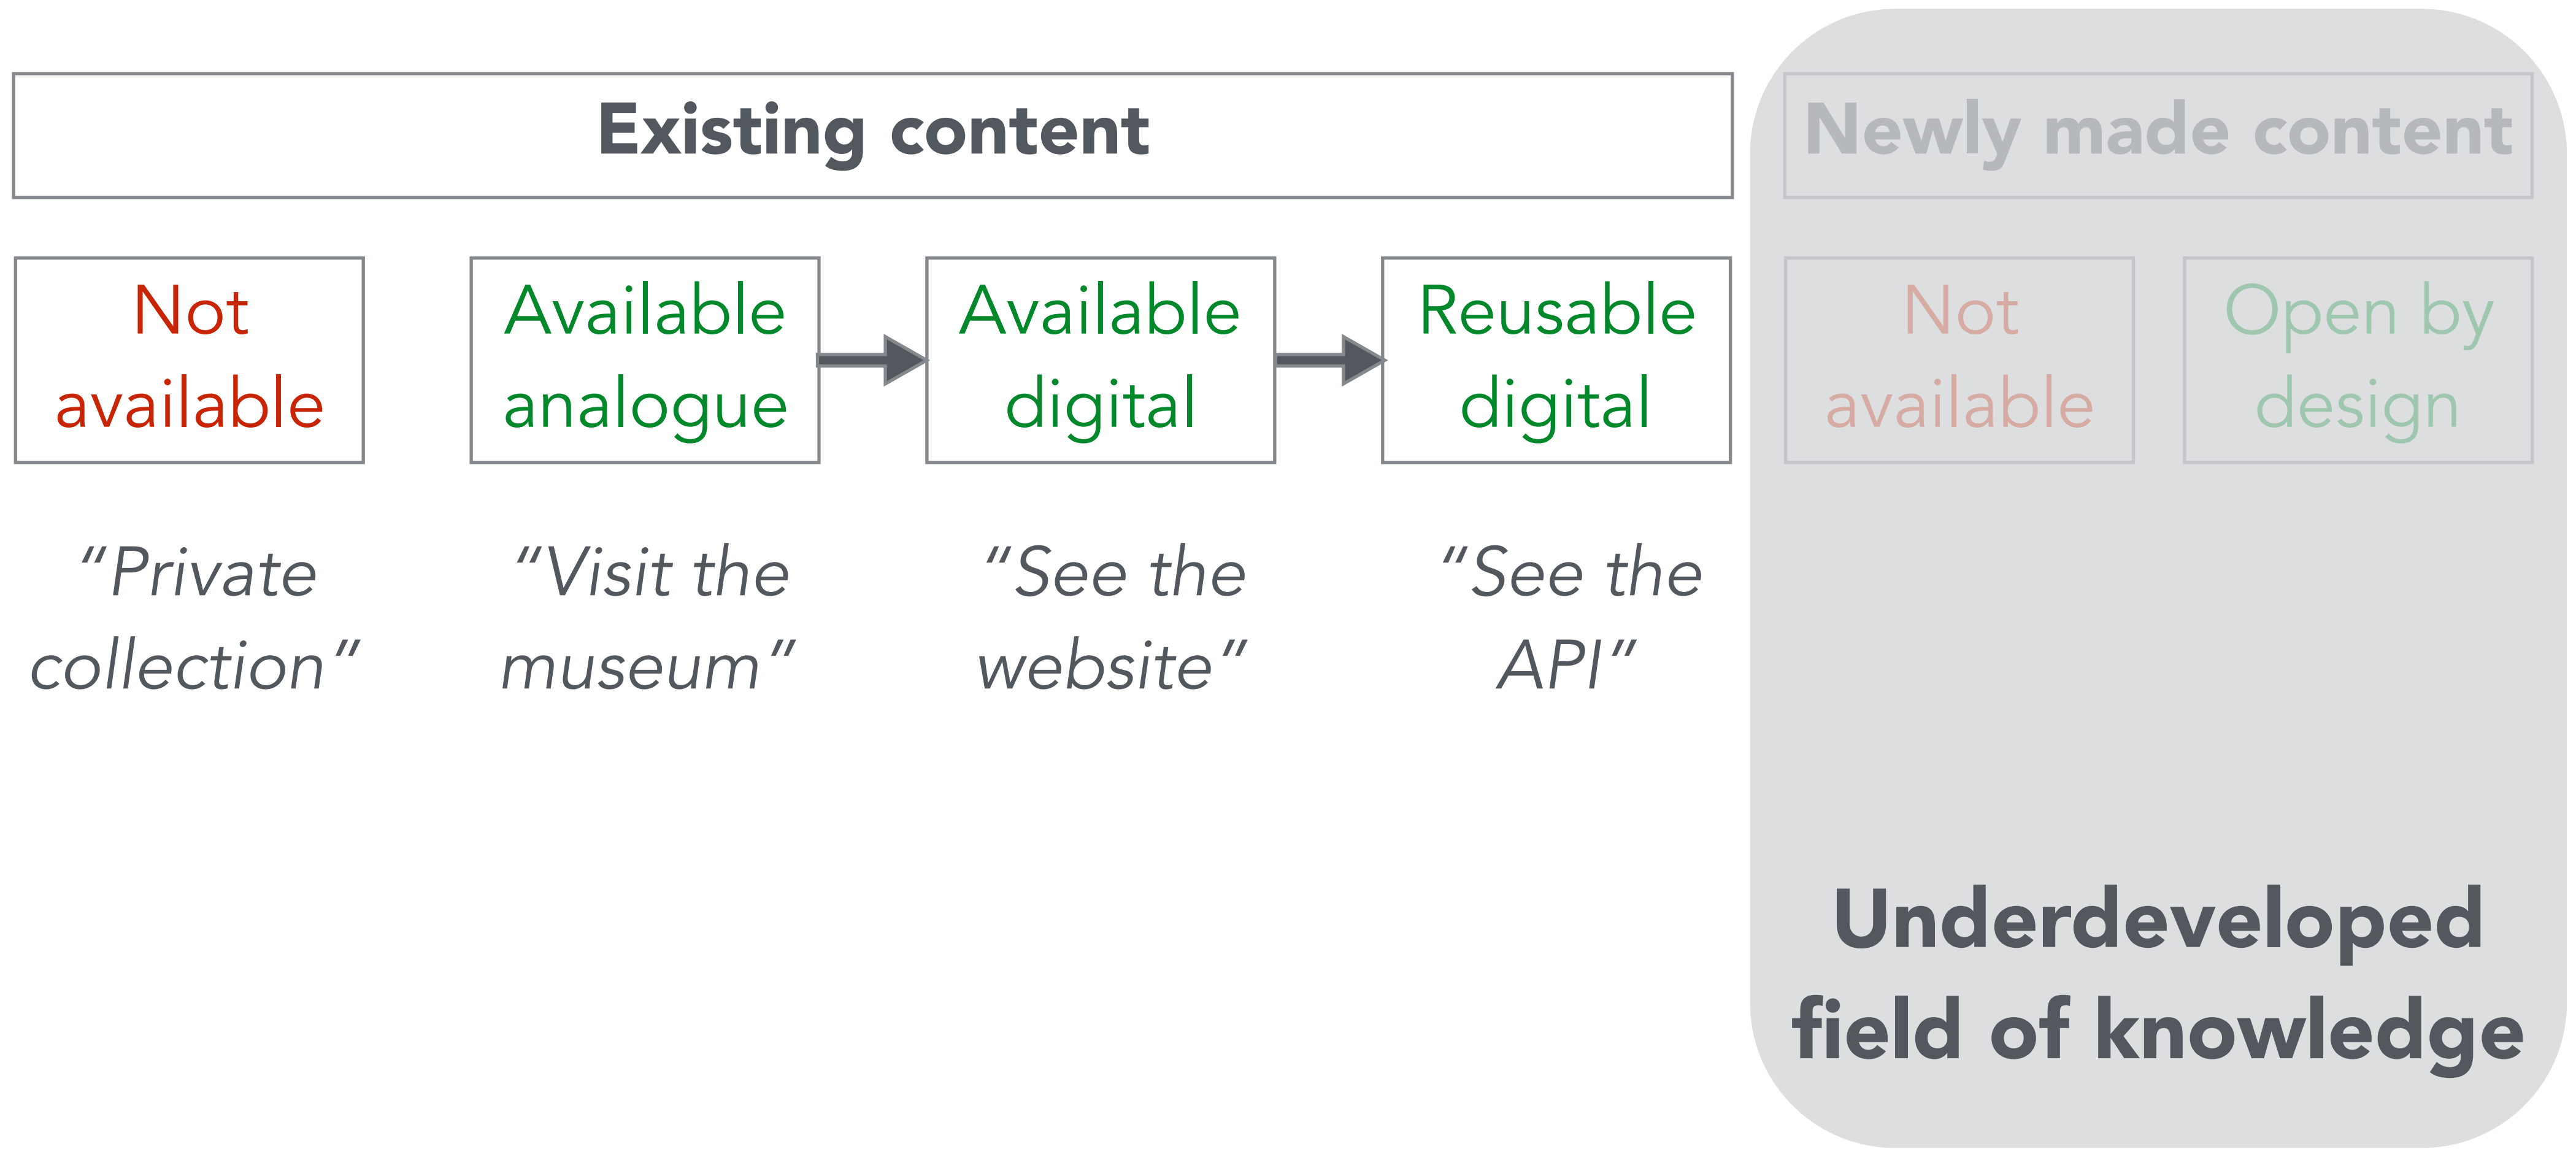

Availability of content

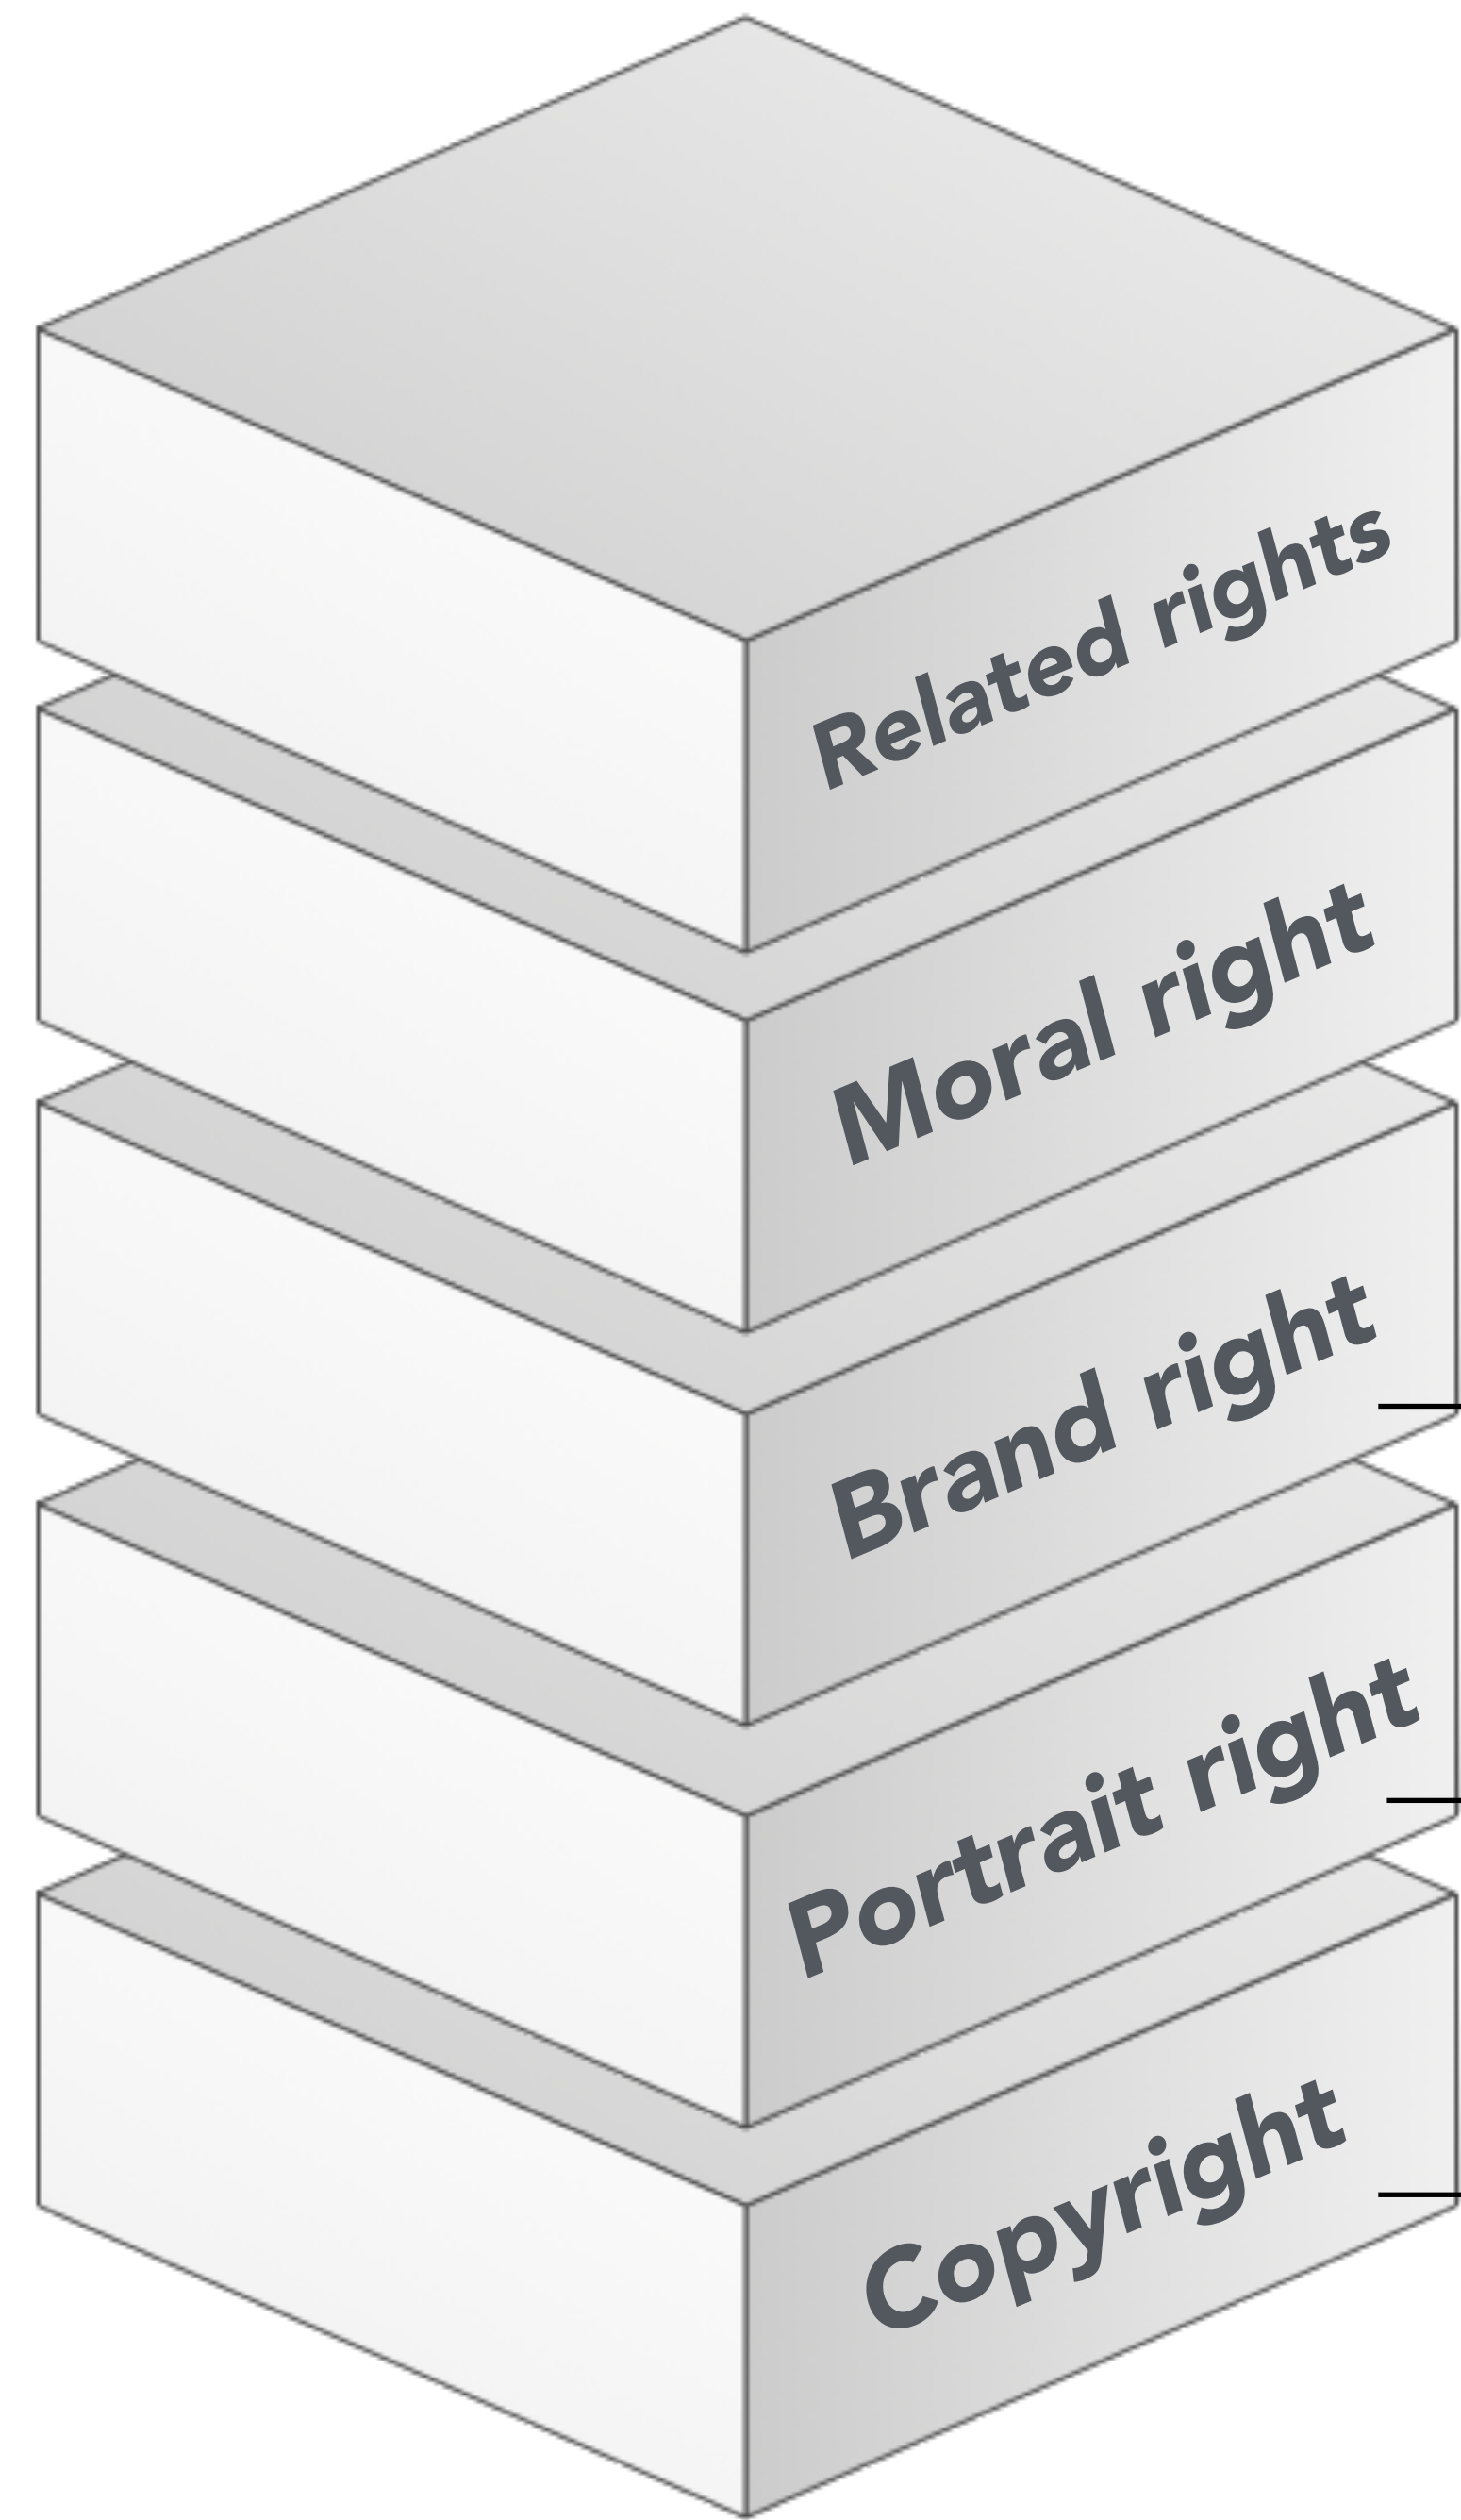

Availability of content

Availability of content

**The stack of rights
makes it difficult
to open up
existing content**

Who owns the rights?

Who is he or she?

Who owns the rights?

Lesson learned 1

Focus more on content that is purposefully made to be open instead of opening up existing content.

Problem 2

Car commercials

Ever wondered why they are clean of logos and people?

The stack of rights

The stack of rights

The stack of rights

**The better the cameras,
the bigger the potential problem.**

Lesson learned 2

Learn how to navigate
around limiting rights.

This counts for content creation & reuse!

Problem 3

Covers

How did they get from A to Z?

**Open by design
needs a plan**

Lesson 3

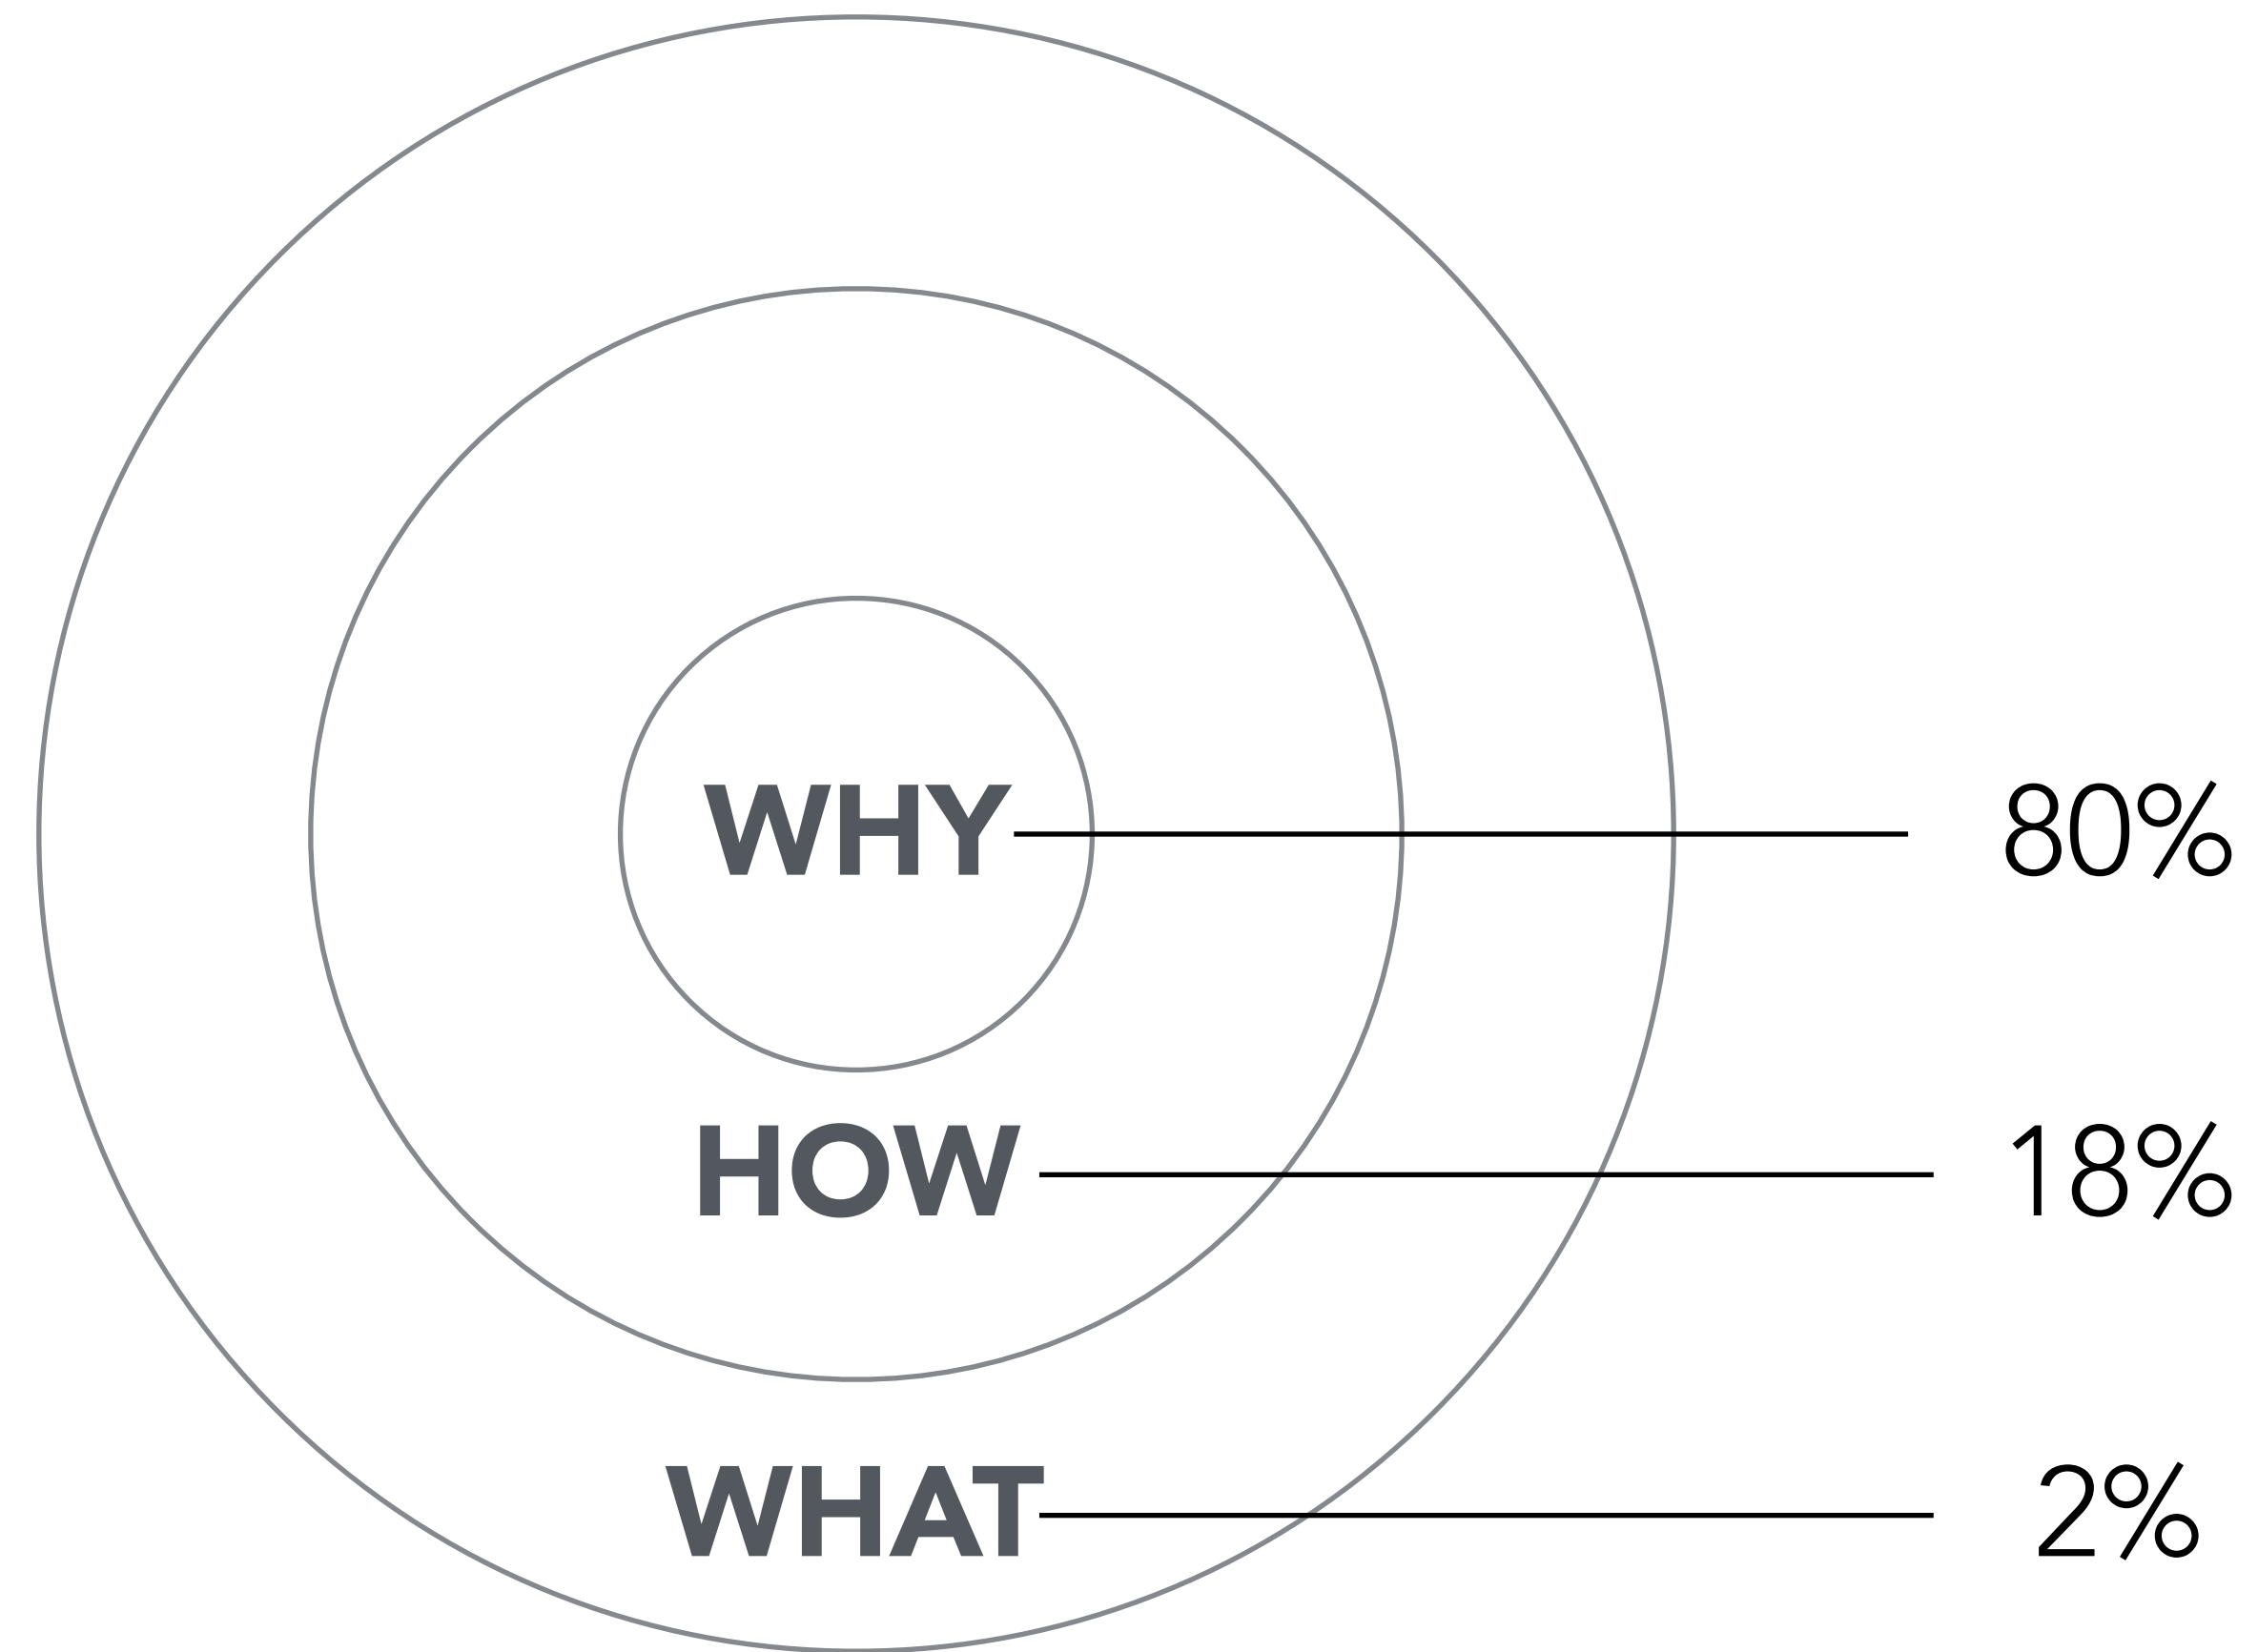

Make a plan

during concept or preproduction phase.

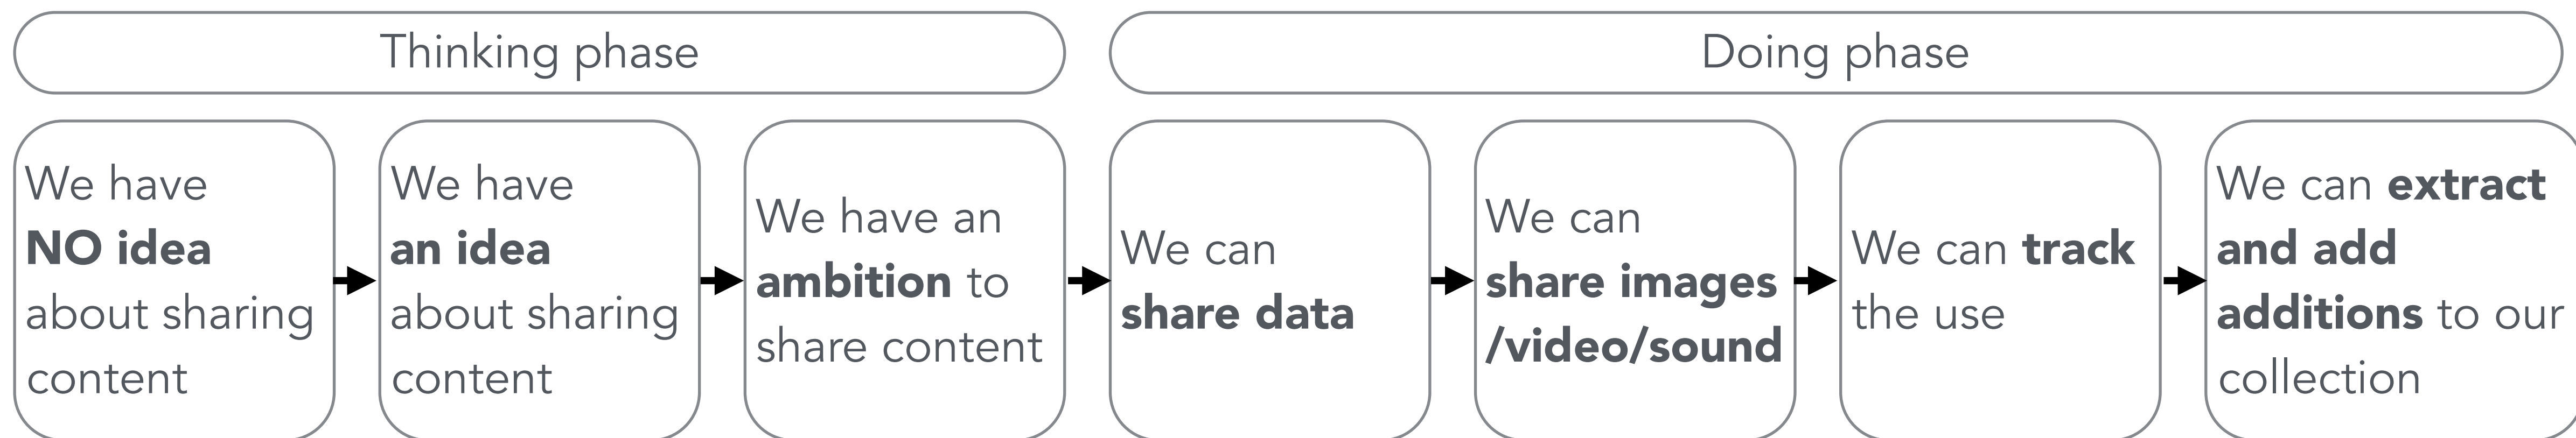

Problem 4

Information on sharing

Steps to openness

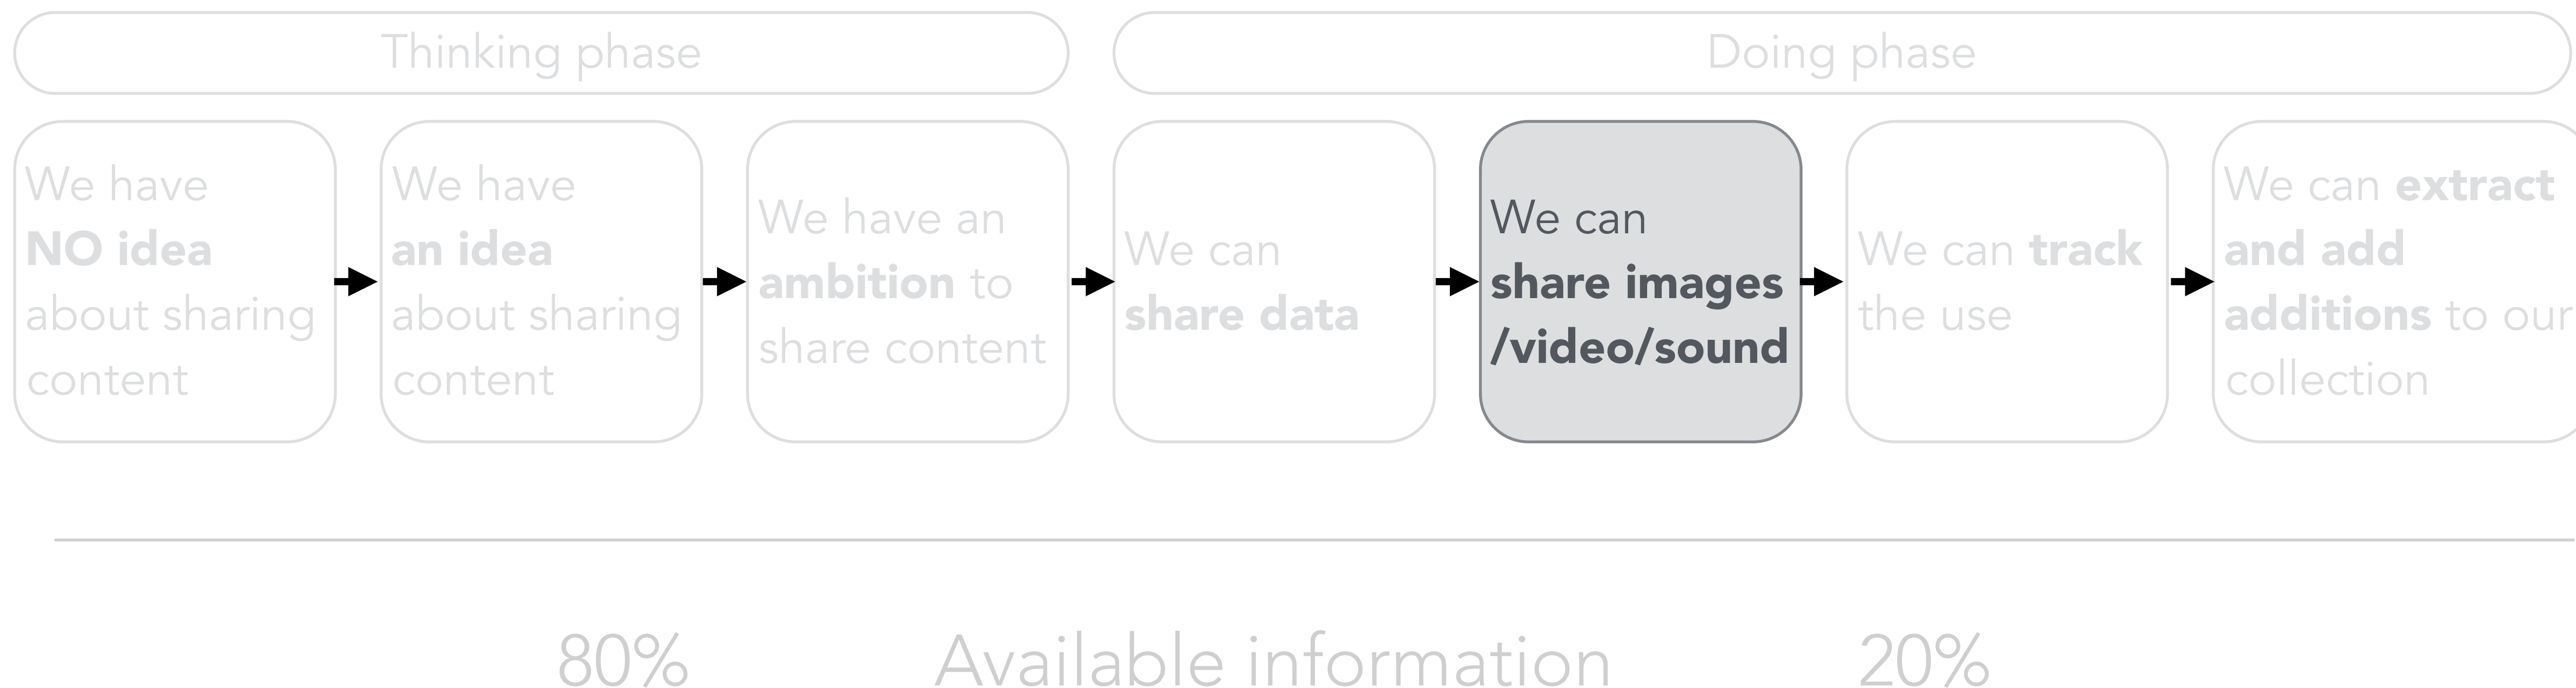

80%
WHY

Available information

20%
HOW & WHAT

Bottleneck

**People looking for
information on sharing content
are already convinced
of the benefits.**

Lesson learned 4

Increase the amount of
practical information
on how to share.

Problem X

Metadata of the content

Choice of platforms for dissemination

Sharing Manual

A practical guide for professionals on sharing content

Sharing Tool

A practical tool that supports the creation process of open content

Goal

*Increase the amount of
implemented structural workflows
around sharing.*

Target audience

Creatives' clients

- NGO's
- Governments
- Public organisations
- For-profit organisations

Creatives

- Musicians
- Photographers
- Producers
- Videographers
- Designers
- *Professionals*
- *Students*

How did they get from A to Z?

What are you making?

What are the ingredients?

Who's going to do what?

What license might you use to share the ingredients?

Where can we find the files?

What information needs to be displayed when I use a file?
