The list of Roman *coloniae* and *municipia* can scarcely be given with confidence. The distinction between them and mere military stations or posthouses is difficult, often impracticable. The specific histories of given towns have nowhere come down to us. The clear and definite prominence that such cities as *Treves* and *Arles* take in the history of Gaul belongs to no town of Britain, and few facts only are trustworthy Camelodunum (*Colchester*) was the earliest municipality: Londinium and Eboracum the most important. Then came Verulamium, Glevum (*Gloucester*), Venta Belgarum (*Winchester*), Venta Icenorum (*Norwich*), Corinium (*Cirencester*), Calleva Attrebatum (*Silchester*), Aquae Solis (*Bath*), Durnovaria (*Dorchester*), Regnum (*Chichester?*), Durovernum (*Canterbury*), Uriconium (*Wroxeter*), Lindum (*Lincoln*). To these may, probably, be added the more important harbours; such as Rutupae (*Richborough*), Portus Dubris (*Dover*), Portus Lemanis (*Lympne*), Portus Adurni (*Aldrington*), all to the south of the Thames. Of these towns the notices are variously and most irregularly distributed. Some, such as Londinium, Lindum, Eboracum, Camelodunum, Corineum, Aquae Sulis (Ὕδατα Θερμὰ), appear in Ptolemy; whereas the majority are taken from later sources — the Antonine Itinerary and the Notitia. No town, however, throughout the whole length and breadth of Britannia is known to us in respect to its internal history, and the details of its constitution; in other words, there are no notices whatever of the *Curiales*, the *Decuriones*, the *Ordo*, or the *Senatus* of any town in Britain. That such existed is a matter of inference — inference of the most legitimate kind, but still only inference.

For all the towns above mentioned we have (*a*) a notice in some Latin or Greek author, (*b*) an identification of the site, and (*c*) the existence of Roman remains at the present time; in other words our evidence is of the highest and best kind. In the majority of cases, however, there is a great falling off in this respect. Sometimes there is the ancient name, without any definite modern equivalent; sometimes the modern without an ancient one; sometimes Roman remains with a name; sometimes a name without remains. Sometimes the name is only partially Roman — being a compound. Such is the case with the forms in *-coln* (*colonia*) and *-chester* (*castra*). In the Danish part of the island this becomes *-caster* (An-*caster*). Even this class is occasionally equivocal; since the element *-wich*, &c., may either come directly fr or from the Norse *vik*. Compou a similar category. They may from the Latin, or they may si French *ville*. The element *stree* denotes a *road* rather than a *tow* these complications may be measur of the ancient and modern maps The localities of which the a known are four — Brannodunu Venta Icenorum, Gariannonum and ad Taum (*Taesburg*). T in Mr. Hughes' map of Britan *Monumenta Britannica*), as the remains (over and above the four are fifteen — *Castle Rising*, *Sth Burgh*, *Oxnead*, *Castle Acre*, *Na Ixburg*, *Colney*, *Whetacre*, *Burgh Holme*, *North Elmham* — all unna of being provided with an ancie provided at the expense of some o

Upon the whole, it is not too the parallel which has frequentl tween Britain and Dacia, in re date of their reduction, and the loss, holds good in respect to th history during the Roman and a In each case we have obscurity a names without a corresponding times without even a geograph mains without a site, and sites w verify them.

BRIVATES PORTUS (Βριονάτης λιμήν), a place in Gallia, is fixed by Ptolemy (ii. 8. § 1) between the mouth of the *Loire* and a river which he calls the Herius, supposed by D'Anville to be the *Vilaine*, and by others to be the *Rivière d'Auray*. Accordingly, some geographers place this port at *Brivain* near *Croisic*, on the coast, in the department of *Morbihan*. The resemblance of the name Brivates to *Brest*, however, induces D'Anville to suppose that this large bay may be the Brivates of Ptolemy. Indeed, it is difficult to conceive that Ptolemy, with any tolerable materials at hand for the coast of Gallia, should not have found among them the position of *Brest*. Walckenaer makes the Gesocribate of the Table to be *Brest*. The Table gives a route from Juliomagus (*Angers*), through *Nantes*, Duretie, Dartoritum, Sulim, and Vorgium, to Gesocribate. D'Anville supposes that Gesocribate ought to be Gesobrivate. The distance from *Nantes* to Gesocribate is 138 Gallic leagues or 207 M. P. There is no doubt that the harbour of *Brest* is the termination of this road, and as to the difficulty of reconciling all the distances, we cannot be surprised at this in a road along such a coast. Vorgium or Vorganium, the next station to Gesocribate, is placed by some geographers at *Concarneau*, on the present road between *Hennebon* and *Quimper*. [G. L.]

BRIVODU'RUM, a place on a river, as the name imports. The place is perhaps *Briare*, on the right bank of the *Loire*, near *Châtillon-sur-Loire*. The Antonine Itin. and the Table place Belca between Brivodurum and Genabum (*Orléans*), and Condate, Cosa (Massava in the Table), between Brivodurum and Nevirnum (*Nevers*). There is the usual difficulty about the numbers. Walckenaer places Brivodurum at *La Villeneuve* near *Bonny*. The road evidently followed the right bank of the *Loire*, as it does now from *Nevers* to *Orléans*. [G. L.]

BRIXELLUM or BRIXILLUM (Βρίξελλον, Ptol.; Βρίξιλλον, Plut.: *Eth.* Brixillanus, Inscr.: *Brescello*), a town of Cisalpine Gaul, situated on the S. bank of the Padus, about 12 miles NE. of Parma, and 16 from Regium. Pliny calls it a colony (iii. 15. s. 20), but we have no account of the time when it became such, nor does any other writer assign it that rank; but it was certainly one of the principal towns in this part of Italy. (Zumpt, *de Colon.* p. 348; Ptol. iii. 1. § 45; Plin. vii. 49. s. 50.) It is chiefly celebrated as the place to which the emperor Otho retired, when he quitted his army previous to the battle of Bedriacum, and where he put an end to his life on learning the defeat of his troops by the lieutenants of Vitellius. (Tac. *Hist.* ii. 33, 39, 51, 84; Plut. *Oth.* 10, 15—17; Suet. *Oth.* 9.) He was buried on the spot, and his monument was seen there by Plutarch. (Tac. *Hist.* 49; Plut. *Oth.* 18.) Its selection on that occasion seems to prove that it was a place of strength; and again, at a much later period, it appears as a strong fortress in the time of the Lombard kings. (P. Diac. iii. 17, iv. 29.) No other mention of it is found in history; but an inscription attests its municipal condition in the reign of Julian, and it is noticed as a considerable town by Sidonius Apollinaris in the account of his journey to Rome. (*Ep.* i. 5; Orell. *Inscr.* 37, 34.) The Itineraries place it on the road from Cremona to Regium, which probably crossed the Padus at this point; but the distance of 40 M. P. from thence to Regium is certainly corrupt. (*Itin. Ant.* p. 283.) The modern town of *Brescello* was, at one time, a fortress of some consideration, but is now a poor place with only 2000 inhabitants. [E. H. B.]

BRI'XIA (Βριξία, Ptol.; Βρηξία, Strab.: *Eth.* Brixianus: *Brescia*), a city of Cisalpine Gaul, in the territory of the Cenomani, between Bergomum and Verona. It was situated on the small river Mela or Mella, at the very foot of the lowest underfalls of the Alps; and about 18 miles W. of the lake Benacus. Both Justin and Livy agree in describing it as one of the cities founded by the Cenomani, after they had passed the Alps and occupied this part of Italy; and the latter author expressly calls it their capital. (Justin. xx. 5; Liv. v. 35, xxxii. 30.) Pliny and Ptolemy also concur in assigning it to the Cenomani: so that Strabo is clearly mistaken in reckoning it, as well as Mantua and Cremona, a city of the Insubres. (Strab. v. p. 213; Plin. iii. 19. s. 23; Ptol. iii. 1. § 31.) The "Brixiani Galli" are mentioned by Livy in B. C. 218, as assisting the Romans against the revolt of the Boii (xxi. 25); and on a later occasion they appear to have held aloof, when the greater part of the Cenomani were in arms against Rome. (Id. xxxii. 30.) But this is all we hear of it previous to the Roman conquest, and the incorporation of Gallia Transpadana with Italy. Under the Roman Empire we find Brixia a flourishing and opulent provincial town. Strabo (*l. c.*) speaks of it as inferior to Mediolanum and Verona, but ranks it on a par with Mantua and Comum. Pliny gives it the title of a colony, and this is confirmed by inscriptions: in one of these it is styled "Colonia Civica Augusta," whence it appears that it was one of the colonies founded by Augustus, and settled with citizens, not soldiers. (Plin. *l. c.*; Orell. *Inscr.* 66; Gruter, *Inscr.* p. 464. 5; Donat. *Inscr.* p. 210. 7; Zumpt, *de Colon.* p. 351.) Numerous other inscriptions record its local magistrates, sacerdotal offices, corporations or "collegia" of various trades, and other circumstances that attest its flourishing municipal condition throughout the period of the Roman Empire. (Orell. *Inscr.* 2183, 3744, 3750, &c.; Rossi, *Memorie Bresciane*, p. 230—324.) It was plundered by the Huns under Attila in A. D. 452 (*Hist. Miscell.* xv. p. 549), but recovered from this disaster, and under the Lombard rule was one of the principal towns of this part of Italy, and the capital of one of the duchies into which their kingdom was divided. (P. Diac. ii. 32, v. 36.)

Catullus terms Brixia the mother-city of Verona, a strong proof of the belief in its antiquity. He describes it as *traversed* by the river Mela (Flavus quam molli *percurrit* flumine Mela, *Carm.* xvii. 33); but at the present day that river (still called the *Mella*) flows about a mile to the W. of it; while *Brescia* itself is situated on a much smaller stream called the *Garza*. Existing remains prove that the ancient city occupied the same site with the modern one; nor is it likely that the river has changed its course: and Philargyrius, writing in the fourth century, correctly describes it as *flowing near* Brixia. (Philarg. *ad Georg.* iv. 278.) The "Cycnea Specula" mentioned by Catullus in the same passage, was probably a tower or mounument on one of the hills which rise immediately above *Brescia*, and which are of moderate elevation, though immediately connected with more lofty ridges, and form one of the last offshoots of the Alps towards the plain of Lombardy.

The remains of antiquity still extant at *Brescia* are of considerable importance. Of the buildings the most remarkable is that commonly called the temple of Hercules, though it is very doubtful whether it was

Digitized by Google

not a basilica or court-house, rather than a temple. Some portions of the theatre may also be traced, though buried under modern buildings, as well as some Corinthian columns supposed to have been part of the forum. The beauty, number, and variety of other architectural fragments, which have been discovered in different parts of the town, is such as to give a very high opinion of the condition of this art in a second-class provincial town under the Roman Empire. Some ancient works in bronze have also been found here, among which a statue of Victory is deservedly celebrated. The collection of inscriptions is unusually extensive, having been commenced as early as the year 1480, and all that have been found, diligently preserved. (The monuments recently discovered at *Brescia*, have been described and published by Labus, in 1834; see also the *Ann. dell' Inst. Arch.* 1839, pp. 182—183. The older work of Rossi, *Memorie Bresciane*, 4to. Brescia, 1693, contains many fables and fancies, but has still preserved much that is valuable.)

Brixia appears in ancient times to have possessed an extensive territory or "ager," of which it was the municipal head; and several of the Alpine tribes who inhabited the neighbouring vallies were subjected to its rule. Among these we may certainly include the TRIUMPILINI, who occupied the upper valley of the Mela, still called the *Val Trompia;* the SABINI, who inhabited the *Val Sabbia*, or valley of the *Chiese;* and the inhabitants of the western bank of the Lake Benacus. Among the smaller towns which were dependent on Brixia, we find mentioned in inscriptions: Voberna, still called *Vobarno*, in the valley of the *Chiese;* Edrum (Edrani), now *Idro*, which gives name to the *Lago d' Idro*; and Vargadum (Vargadenses), the name of which is slightly distorted in that of the modern *Gavardo*, a small town on the river *Chiese*, about 12 miles E. of *Brescia*. (Plin. iii. 20. s. 24; Cluver. *Ital.* pp. 107, 108, 252; Rossi, *Mem. Bresciane*, pp. 196, 271, 279.) [E. H. B.]

BROCOMAGUS (*Brumath*), a town of the Tribocci, on the road from Argentoratum (*Strassburg*) to *Cologne*. It is Βρευκόμαγος in Ptolemy (ii. 9. § 18). Julian (Amm. Marc. xvi. 2) defeated some Germans here. This town also occurs in the Antonine Itin. It is easily identified with *Brumath* on the *Zorn*, in the department of *Bas Rhin*, between *Strassburg* and *Haguenau*. Many Roman remains have been found about it. Ruins of Roman walls are said to exist north of the *Zorn*, and traces of a Roman road to *Selz*. [G. L.]

BRODIONTII, a people mentioned by Pliny (iii. 20. s. 24) in the inscription from the trophy of the Alps. They are generally supposed to be the same as the Bodiontici; but Walckenaer (*Géog.* vol. ii. p. 38) finds their name in a mountain called *Brodon*, one of the largest that form the valley of the *Olle*. The river *Olle* joins the *Isère* on the left bank, below *Grenoble*. [G. L.]

BROMAGUS, in the Antonine Itin., Viromagus in the Table, is between Mennodunum (supposed to be *Moudon*) and Viviscus (*Vevai*), on the lake of Geneva. There is a place called *Promasens*, which may be Bromagus. *Promasens* is on a little stream, the *Broye;* and Bromagus may mean the town on the Bro. [G. L.]

BROMISCUS (Βρομίσκος), a town of Mygdonia in Macedonia, near the river by which the waters of the lake Bolbe flow into the Strymonic gulf. (Thuc. iv. 103.) It was either upon the site of this place or of the neighbouring Arethusa that the fortress of Rentine was built, which is frequently the Byzantine historians. (Tafel, *Th* 68.) Stephanus calls the town Borm lates that Euripides was here torn to but another legend supposes this event place at Arethusa, where the tomb of shown. [ARETHUSA, No. 6.]

BRUCTERI (Βρούκτεροι), a great on the river Amasia (*Ems*), which is f by Strabo (vii. p. 290) as having bee Drusus. (Comp. Tac. *Ann.* i. 60.) like several other tribes, were divided and the greater, and the river Lupia through the country of the former. 291; Ptol. ii. 11. § 16, who, howeve Βουσάκτεροι.) From these authors the Bructeri occupied not only the co the rivers Amasia and Lupia, but ex them. The Bructeri majores appear on the east, and the minores on the Amasia. That they extended beyond attested not only by Strabo, but also b the celebrated prophetess of the Bru dwelt in a tower on the banks of the *Hist.* iv. 61, 65, v. 22.) From Clau *Cons. Honor.* 450) it might be infe extended even as far as the Hercynian name Hercynia Silva is probably used indefinite sense by the poet. In the n contiguous to the Chauci (Tac. *Ann.* and in the north-east to the Angrivari ii. 8.) Velleius Paterculus (ii. 105) Bructeri were subdued by Tiberius; bu in the forest of Teutoburg they appea taken an active part, as we must infe that they received one of the Roman e that battle. (Tac. *Ann.* i. 60.) It believed, on the authority of Tacitus, entirely destroyed by other German tr (*Ep.* ii. 7) and Ptolemy still mention ing, and even at a much later period one of the tribes allied with the Fran *Paneggr. Const.* 12.) Ledebur (*Das der Bructerer*, Berlin, 1827) endeav the Bructeri more importance than t history. (Comp. Middendorf, *Die Bructerer*, Coesfeld, 1837; Wersebe *alten Deutschlands*, p. 83, &c.; La *Germania*, p. 111.)

BRUNDI'SIUM or BRUNDU'SIU σιον: *Eth.* Βρεντεσῖνος, Brundusinus *Brindisi*), one of the most importan labria, situated on the coast of the A miles from Hydruntum, and 38 from was distant from Tarentum 44 miles; distance across the peninsula to the n the Gulph of Tarentum does not ex (Itin. Ant. pp. 118, 119.) Its nam from the peculiar configuration of its the various branches of which, unite the entrance, were thought to rese head, which was called, in the native Messapians, Brention or Brentesion p. 282; Steph. B. *s. v.* Βρεντέσιον.†

to have been in very early times one of the chief towns of the Sallentines: hence tradition generally ascribed its foundation to a colony from Crete, the same source from whence the origin of the Sallentines themselves was derived. (Strab. *l. c.*; Lucan, ii. 610.) An obscure and confused tale related by Justin (xii. 2) represents it as founded by the Aetolians under Diomed, who were, however, expelled by the native inhabitants of the country, whom he calls Apulians. Both legends point to the fact that it was in existence as a Messapian or Sallentine city before the settlement of the Greek colonies in its neighbourhood. According to Strabo, it had long been governed by its own kings, at the time of the foundation of Tarentum by Phalanthus, and afforded a place of refuge to that chieftain himself when expelled by civil dissensions from his newly founded city. Hence the monument of the hero was shown at Brundusium. (Strab. *l. c.*; Justin. iii. 4.) We have very little information concerning its history prior to the Roman conquest; but it seems to have been a place of comparatively little importance, being obscured by the greatness of its neighbour Tarentum, which, at this period, engrossed the whole commerce of this part of Italy. (Pol. x. 1.) Brundusium, however, appears to have retained its independence, and never received a Greek colony. Hence Scylax, though he notices Hydruntum, makes no mention of Brundusium, and Scymnus Chius terms it the port or emporium *of the Messapians.* (Scyl. § 14; Scymn. Ch. 363.) The name is only once mentioned incidentally by Herodotus (iv. 99), but in a manner that shows it to have been familiar to the Greeks of his day.

But the excellence of its port, and its advantageous situation for the purpose of commanding the Adriatic, both in a commercial and naval point of view, appear to have early attracted the attention of the Romans; and the possession of this important port is said to have been one of the chief objects which led them to turn their arms against the Sallentines in B. C. 267. (Zonar. viii. 7.) But though the city fell into their hands on that occasion, it was not till B. C. 244 that they proceeded to secure its possession by the establishment there of a Roman colony. (Liv. Epit. xix.; Vell. Pat. i. 14; Flor. i. 20.) It is from this period that the importance of Brundusium must be dated: the new colony appears to have risen rapidly to wealth and prosperity, for which it was indebted partly to the fertility of its territory, but still more to its commercial advantages; and its importance continually increased, as the Roman arms were carried in succession, first to the opposite shores of Macedonia and Greece, and afterwards to those of Asia. Its admirable port, capable of sheltering the largest fleets in perfect safety, caused it to be selected as the chief naval station of the Romans in these seas. As early as the First Illyrian War, B. C. 229, it was here that the Romans assembled their fleet and army for the campaign (Pol. ii. 11); and during the Second Punic War it was again selected as the naval station for the operations against Philip, king of Macedonia. (Liv. xxiii. 48, xxiv. 10, 11.) Hannibal, on one occasion, made a vain attempt to surprise it; but the citizens continued faithful to the Roman cause, and at the most trying period of the war Brundusium was one of the eighteen colonies which came forward readily to furnish the supplies required of them. (Id. xxv. 22, xxvii. 10.) During the subsequent wars of the Romans with Macedonia, Greece, and Asia, the name of Brundusium continually recurs: it was almost invariably the point where the Roman generals assembled the fleets and armies with which they crossed the Adriatic; and where, likewise, they landed on their return in triumph. (Id. xxxi. 14, xxxiv. 52, xxxvii. 4, xliv. 1, xlv. 14, &c.) After the Roman dominion had been permanently established over the provinces beyond the Adriatic, the constant passage to and fro for peaceful purposes added still more to the trade and prosperity of Brundusium, which thus rose into one of the most flourishing and considerable cities of Southern Italy.

The position of Brundusium as the point of direct communication between Italy and the eastern provinces, naturally rendered it the scene of numerous historical incidents during the later ages of the republic, and under the Roman empire, of which a few only can be here noticed. In B. C. 83 Sulla landed here with his army, on his return from the Mithridatic war to make head against his enemies at Rome: the citizens of Brundusium opened to him their gates and their port, a service of the highest importance, which he rewarded by bestowing on them an immunity from all taxation, a privilege they continued to enjoy during a long period. (Appian, *B. C.* i. 79) In B. C. 57 they witnessed the peaceful return of Cicero from his exile, who landed here on the anniversary of the foundation of the colony (*natali Brundisinae coloniae die*, Cic. *ad Att.* iv. 1), a day which was thus rendered the occasion of double rejoicing. During the civil war between Caesar and Pompey, Brundusium became the scene of important military operations. Pompey had here gathered his forces together with the view of crossing the Adriatic, and a part of them had already sailed, when Caesar arrived, and after investing the town on the land side endeavoured to prevent the departure of the rest. For this purpose, having no fleet of his own, he attempted to block up the narrow entrance of the port, by driving in piles and sinking vessels in the centre of the channel. Pompey however succeeded in frustrating his endeavours until the return of his fleet enabled him to make his escape to Illyricum. (Caes. *B. C.* i. 24—28; Cic. *ad Att.* ix. 3, 13, 14, 15; Lucan. ii. 609—735; Dion Cass. xli. 12; Appian, *B. C.* ii. 40.) After the death of the dictator, it was at Brundusium that the youthful Octavius first assumed the name of Caesar; and the veteran cohorts in garrison there were the first that declared in his favour. (Appian, *B. C.* iii. 11.) Four years later (B. C. 40) it was again besieged by Antony and Domitius Ahenobarbus, and Octavian in vain attempted to raise the siege: but its fall was averted by the intervention of common friends, who effected a reconciliation between the two triumvirs (Id. v. 56, 57—60; Dion Cass. xlviii. 27—30). The peace thus concluded was of short duration, and in B. C. 41 Antony having again threatened Brundusium with a fleet of 300 sail, Maecenas and Cocceius proceeded thither in haste from Rome, and succeeded once more in concluding an amicable arrangement. It was on this last occasion that they were accompanied by Horace, who has immortalised in a well-known satire his journey from Rome to Brundusium. (Hor. *Sat.* i. 5; Plut. *Ant.* 35; Appian, *B. C.* v. 93.) In B. C. 19, Virgil died at Brundusium on his return from Greece.

---

was Brendon or Brenda (see Hesych. *s. v.* Βρενδον), whence Festus tells us (p. 33) that Brenda was used by some writers as a poetic form for Brundusium.

(Donat. *Vit. Virgil.*) At a later period Tacitus has left us an animated picture of the mournful spectacle, when Agrippina landed here with the ashes of her husband Germanicus. (Tac. *Ann.* iii. 1.) Under the empire we hear comparatively little of Brundusium, though it is certain that it retained its former importance, and continued to be the point of departure and arrival, both for ordinary travellers and for armies on their way between Italy and the East. (Capit. *M. Ant.* 9, 27; Spartian. *Sev.* 15.) The period at which the Appian Way was continued thither, and rendered practicable for carriages is uncertain: but the direct road from Rome to Brundusium through Apulia, by Canusium and Egnatia, which was only adapted for mules in the time of Strabo, was first completed as a highway by Trajan, and named from him the Via Trajana. The common route was to cross from hence direct to Dyrrhachium, from whence the Via Egnatia led through Illyricum and Macedonia to the shores of the Bosporus: but travellers proceeding to Greece frequently crossed over to Aulon, and thence through Epeirus into Thessaly. During the later ages of the empire Hydruntum appears to have become a frequent place of passage, and almost rivalled Brundusium in this respect; though in the time of Pliny it was reckoned the less safe and certain passage, though the shorter of the two. (Strab. vi. pp. 282, 283; Itin. Ant. pp. 317, 323, 497; Plin. iii. 11. s. 16; Ptol. iii. 1. § 14; Mel. ii. 4.)

After the fall of the Western Empire Brundusium appears to have declined in importance, and during the Gothic wars plays a subordinate part to the neighbouring city of Hydruntum. Its possession was long retained by the Byzantine emperors, together with the rest of Calabria and Apulia; but after they had long contested its possession with the Goths, Lombards, and Saracens, it was finally wrested from them by the Normans in the eleventh century.

The excellence of the port of Brundusium is celebrated by many ancient writers. Strabo speaks of it as superior to that of Tarentum, and at a much earlier period Ennius (*Ann.* vi. 53) already called it

"Brundisium pulcro praecinctum praepete portu."

It was composed of two principal arms or branches, running far into the land, and united only by a very narrow strait or outlet communicating with the sea. Outside this narrow channel was an outer harbour or roadstead, itself in a great degree sheltered by a small island, or group of islets, now called the *Isola di St. Andrea*; the ancient name of which appears to have been Barra. (Fest. *v. Barium*, p. 33.) It was occupied by a Pharos or lighthouse similar to that at Alexandria. (Mela, ii. 7.) Pliny speaks of these islands as "forming the port of Brundusium." Hence he must designate by this term the outer harbour; but the one generally meant and described by Caesar and Strabo was certainly the *inner* harbour, which was completely landlocked and sheltered from every wind, while it was deep enough for the largest ships; and the narrowness of the entrance rendered it easily defensible against any attack from without. This channel is now almost choked up with sand, and the inner port rendered in consequence completely useless. This has been ascribed to the works erected by Caesar for the purpose of obstructing the entrance; but the port continued in full use many centuries afterwards, and the real origin of the obstruction dates only from the fifteenth century. Recent attempts to clear out the channel have, however, brought to light many of the piles sar. and have thus proved that constructed, as he has himself desc narrowest part of the entrance. (Strab. vi. p. 282; Lucan. *Phars.* i burne's *Travels*, vol. i. pp. 384—3

Bruttians, or Bruttium (as we ignate it, in accordance with ounded on the N. by Lucania, parated by a line drawn from the Tyrrhenian Sea to the of Tarentum. On the W. it Tyrrhenian Sea, and on the S. in ancient times as the Sici- nder that appellation the Gulf s comprised the two provinces *ria Citra* and *Calabria Ultra*, f the northernmost portion of as included in Lucania. The correctly described by Strabo including within it another dth from sea to sea, at the er joins that of Lucania, does , or 30 Geog. miles; it after- siderably, forming a mountain- 0 Geog. miles in breadth, and ruptly contracted, so that the Terinaean Gulf and that of Scyl- Geog. miles in width (Strabo hich is very near the truth). n, or southernmost peninsula, e to the promontory of Leuco- *ni*), is about 60 miles long by th. The general form of the ay be not inaptly compared to heel is formed by the Lacinian tona, and the toe by that of raversed throughout its whole f the Apennines, to which it ration. This range of moun- ian territory on the confines of along the western coast of the Terinaean Gulf. Throughout l chain approaches very close Tyrrhenian Sea, while the great ass of the *Sila* (to the E. of the ch it is partly separated by the is, though at the same time h the same mountain system) fills up the whole centre of the peninsula, and sends down its ridges to the Ionian Sea, where they form a projecting mass that separates the Gulf of Tarentum from that of Scyllacium. The extreme angles of this mass are formed by the *Punta dell' Alice* (the ancient Cape CRIMISA) and the more celebrated LACINIAN Promontory. South of this, the coast is deeply indented on each side by two extensive bays: the one known in ancient times as the Terinaean or Hipponian Gulf (now the *Golfo di Sta Eufemia*) on the W.; that of Scyllacium (still called *Golfo di Squillace*) on the E. Between the two occurs the remarkable break in the chain of the Apennines, already noticed in the description of those mountains [APENNINUS], so that the two seas are here separated only by a range of low hills of tertiary strata, leaving on each side a considerable extent of marshy plain. Immediately S. of this isthmus, however, the Apennines rise again in the lofty group or mass of mountains now called *Aspromonte*, which completely fill up the remaining portion of the peninsula, extending from sea to sea, and ending in the bold headland of Leucopetra, the extreme SW. point of Italy. The peninsula thus strongly characterized by nature was the country to which, according to Antiochus of Syracuse, the name of Italy was originally confined. (Antioch. *ap. Dionys.* i. 35; Arist. *Pol.* vii. 10.) [ITALIA.] It is evidently the same to which Plutarch applies the name of "the Rhegian peninsula" (ἡ Ῥηγινῶν χερρόνησος, *Crass.* 10).

The natural characters of the land thus constituted result at once from its physical conformation. The two great mountain groups of the *Sila* and the *Aspromonte*, have formed in all times wild and rugged tracts, covered with dense forests almost impenetrable to civilization. On the western coast, also, from the river Laus to the Terinaean Gulf, the Apennines approach so close to the sea that they leave scarcely any space for the settlement of considerable towns; and the line of coast throughout this extent affords no natural harbours. The streams which flow down from the mountains to the sea on either side have for the most part a very short course, and are mere mountain torrents: the only considerable valley is that of the CRATHIS, which has a northerly course from the neighbourhood of Consentia for near 20 miles, separating the forest-covered group of the *Sila* on the E. from the main chain of the Apennines on the W., until at length it emerges through a narrow gorge into a rich alluvial plain, through which it flows in an easterly direction to the sea. There is also a considerable tract of alluvial marshy plain on the shores of the Terinaean Gulf, and another, though of less extent, on the opposite side of the isthmus, adjoining the Gulf of Scyllacium. A plain of some extent also exists on the banks of the river *Mesima*, near its mouth; but with these few exceptions, the whole tract from sea to sea is occupied either by the mountain ranges of the Apennines, or by their less elevated offsets and underfalls. The slopes of these hills towards the sea are admirably adapted for the growth both of olives and vines; and modern travellers speak with great admiration of the beauty and fertility of the coasts of *Calabria*. But these advantages are limited to a small portion of the country; and it is probable that even when the Greek settlements on the coast were the most flourishing, neither culture nor civilization had made much progress in the interior. The mountain tract of the Sila was celebrated for its forests, which produced both timber and pitch of the highest value for

Digitized by Google

ship-building. The latter especially was under the Romans an important source of revenue to the state. (Dionys. xx. Fr. Mai, 5, 6.)

All ancient authors agree in stating that neither the name nor the origin of the Bruttians could claim a very remote antiquity. The country occupied by them was inhabited, in the earliest times of which we have any knowledge, by the OENOTRIANS—a tribe of Pelasgian origin, of which the CHONES and MORGETES appear to have been merely subordinate divisions. [See the respective articles.] It was while the Oenotrians were still masters of the land that the first Greek settlers arrived; and the beauty of the climate and country, as well as the rapid prosperity attained by these first settlements, proved so attractive that within a few years the shores of Bruttium were completely encircled by a belt of Greek colonies. These were (beginning from the Crathis, and proceeding southwards): 1. CROTONA, an Achaean colony, founded in B.C. 710, probably the most ancient, and at one time the most powerful of all: 2. SCYLLACIUM or SCYLLETIUM, according to Strabo, an Athenian colony, but of uncertain date: 3. CAULONIA, a colony of Crotona: 4. LOCRI, founded by the people of the same name in Greece: 5. RHEGIUM, a Chalcidic colony, founded shortly before the first Messenian war: 6. MEDMA, a colony, and probably a dependency, of Locri: 7. HIPPONIUM, also a colony from Locri: 8. TERINA, a colony of Crotona. We have scarcely any knowledge of the exact relations between these Greek cities and the native Oenotrian tribes; but there appears little doubt that the latter were reduced to a state of dependence, and at one time at least of complete subjection. We know that the territories of the Greek cities comprised the whole line of coast, so that those of Crotona and Thurii met at the river Hylias, and those of Locri and Rhegium were separated only by the Halex (Thuc. iii. 99, vii. 35); and when we find both Crotona and Locri founding colonies on the opposite side of the peninsula, there can be little doubt that the intermediate districts also were at least nominally subject to them.

Such appears to have been the state of things at the time of the Peloponnesian war; but in the course of the following century a great change took place. The Sabellian tribe of the Lucanians, who had been gradually extending their conquests towards the south, and had already made themselves masters of the northern parts of Oenotria, now pressed forwards into the Bruttian peninsula, and established their dominion over the interior of that country, reducing its previous inhabitants to a state of vassalage or serfdom. This probably took place after their great victory over the Thurians, near Laos, in B.C. 390; and little more than 30 years elapsed between this event and the rise of the people, properly called Bruttians. These are represented by ancient authors as merely a congregation of revolted slaves and other fugitives, who had taken refuge in the wild mountain regions of the peninsula: it seems probable that a considerable portion of them were the native Oenotrian or Pelasgic inhabitants, who gladly embraced the opportunity to throw off the foreign yoke. (Niebuhr, vol. i. p. 98.) But Justin distinctly describes them as headed by youths of Lucanian race; and there appears sufficient evidence of their close connexion with the Lucanians to warrant the assumption that these formed an important ingredient in their national composition. The name

of Bruttii (Βρεττιοι) was given the by the Greeks, but by the Lucania in their language fugitive slaves or r ἀποστάται). But though used at f reproach, it was subsequently adopt tians themselves, who, when they h rank of a powerful nation, pretend from a hero named Bruttus (Βρέτ Hercules and Valentia. (Diod. xv p. 255; Justin xxiii. 1; Steph. Byz Justin, on the other hand, represent ing their name from a woman of the who figured in their first revolt, a versions of the legend, assumes th queen. (Justin. *l. c.*; Jornand. *de* P. Diac. *Hist.* ii. 17.)

The rise of the Bruttian people tous aggregation of rebels and fugi by Diodorus to the year 356, B.C.; with the statement of Strabo that t period of the expedition of Dion aga Dionysius. The wars of the latte his father, with the Greek cities in and the state of confusion and we these were reduced in consequence, buted in a great degree to pave t rise of the Bruttian power. The deed have been much more ancient to the accuracy of Diodorus, who, sage (xii. 22), speaks of the *Brut* expelled the remainder of the Syb settled on the river Traens after th their own city. But it is probabl mere inaccuracy of expression, a means to designate the inhabitants who were afterwards called Bruttia gress of the latter, after their firs history, was rapid. Composed origi told, of mere troops of outlaws a soon became numerous and powerfu the arms of the Lucanians, and tained their independence in the m of the interior, but attacked and masters of the Greek cities of Hip and Thurii. (Diod. xvi. 15; Str Their independence seems to have knowledged by the Lucanians; an years after their first revolt, we find uniting their arms as allies agai neighbours. The latter applied f Alexander, king of Epirus, who c Italy with an army, and carried on veral successive campaigns, during w Heraclea, Consentia, and Terina; bu in a battle against the combined for nians and Bruttians, near Pand (Liv. viii. 24; Justin. xii. 2, xx p. 256.) They next had to cont arms of Agathocles, who ravaged his fleets, took the city of Hipponiu verted into a strong fortress and n

many successive campaigns
icted a severe blow upon the
: the measures adopted by
them for their rebellion com-

pleted their humiliation. They were deprived of a great part of their territory, and the whole nation reduced to a state bordering on servitude: they were not admitted like the other nations of Italy to rank as allies, but were pronounced incapable of military service, and only employed to attend upon the Roman magistrates as couriers or letter-carriers, and attendants for other purposes of a menial character. (Appian. *Annib.* 61; Strab. v. p. 251; Gell. *N. A.* x. 3.) It was however some time before they were altogether crushed: for several years after the close of the Second Punic War, one of the praetors was annually sent with an army to watch over the Bruttians: and it was evidently with the view of more fully securing their subjection that three colonies were established in their territory, two of Roman citizens at Tempsa and Crotona, and a third with Latin rights at Hipponium, to which the name of Vibo Valentia was now given. A fourth was at the same time settled at Thurii on their immediate frontier. (Liv. xxxiv. 45, xxxv. 40.)

From this time the Bruttians as a people disappear from history: but their country again became the theatre of war during the revolt of Spartacus, who after his first defeats by Crassus, took refuge in the southernmost portion of Bruttium (called by Plutarch the Rhegian peninsula), in which the Roman general sought to confine him by drawing lines of intrenchment across the isthmus from sea to sea. The insurgent leader however forced his way through, and again carried the war into the heart of Lucania. (Plut. *Crass.* 10, 11; Flor. iii. 20.) During the Civil Wars the coasts of Bruttium were repeatedly laid waste by the fleets of Sextus Pompeius, and witnessed several conflicts between the latter and those of Octavian, who had established the headquarters both of his army and navy at Vibo. (Appian, *B. C.* iv. 86, v. 19, 91, 103, &c.) Strabo speaks of the whole province as reduced in his time to a state of complete decay. (vi. p. 253.) It was included by Augustus in the Third Region, together with Lucania; and the two provinces appear to have continued united for most administrative purposes until the fall of the Roman empire, and were governed conjointly by a magistrate termed a "Corrector." The Liber Coloniarum however treats of the "Provincia Bruttiorum" as distinct from that of Lucania. (Plin. iii. 5. s. 10; Not. Dign. ii. 18. p. 64; Orell. *Inscr.* 1074, 1187; Lib. Colon. p. 209.)

After the fall of the Western Empire Bruttium passed with the rest of Italy under the dominion of the Goths: but was reconquered by the generals of Justinian, and continued from thenceforth subject to the Byzantine emperors till the 11th century. It was during this interval that a singular change took place in its name. During the greater part of this period it appears that Bruttium and a small part of the Calabrian peninsula were all that remained to the Greek emperors in Italy, and that the name of Calabria came to be gradually applied to the two provinces thus united under their government. But when they eventually lost their possessions in the eastern peninsula, the name of Calabria, which had originally belonged to that only, came to be used on the contrary to designate exclusively the Bruttian peninsula, which has in consequence retained to the present day the name of *Calabria*. It is impossible to trace exactly the progress, or determine the period of this change: but it appears to have been completely established before the provinces in question were finally wrested from the Greek Empire by the

Digitized by Google

Normans, who assumed the titles of Dukes of Apulia and Calabria, meaning by the latter the ancient Bruttium, and including the Calabria of the Romans under the title of Apulia. [CALABRIA.]

There was hardly any province of Italy, which was more deeply imbued with Greek influences than Bruttium. The Greek colonies around its coasts left the impress not only of their manners and civilization, but of their language; and even in the time of Ennius, the two languages current in the peninsula were Greek and Oscan. (Fest. v. *Brutates*.) The long continuance of the Byzantine power in these regions must have tended to preserve and renew this element: but it is probable that the traces of Greek language, and especially the Greek names, such as *Pagliopoli*, *Ieropotamo*, &c., which have been preserved down to modern times, are due to fresh colonies of Albanian Greeks introduced by the Neapolitan kings in the fifteenth century: and have not been transmitted, as supposed by Niebuhr, without interruption from the colonists of Magna Graecia. (Niebuhr, vol. i. p. 62; Swinburne's *Travels*, vol. i. p. 348—353; K. Craven's *Travels*, p. 312.)

The rivers of Bruttium are, as already observed, mostly but inconsiderable streams, mere mountain torrents having but a short course from the central ranges of the Apennines to the sea. Those of which the ancient names are preserved to us are here enumerated. Beginning from the LAUS (*Lao*), which separated Bruttium from Lucania, and proceeding along the coast of the Tyrrhenian Sea, we find: 1. the "Batum flumen" of Pliny, a very small stream, still called the *Bato*, the mouth of which is only about a mile S. of that of the *Lao*: 2. the SABATUS of the Itineraries (*Itin. Ant.* pp. 105, 110) placed by them S. of Consentia, is evidently the *Savuto*, a considerable stream, which rises in the mountains S. of Cosenza, and enters the sea about 7 miles S. of the modern *Amantea*. This is identified by most modern topographers with the river called OCINARUS (Ὦκίναρος) by Lycophron (*Alex.* 729, 1009), on the banks of which was situated the city of Terina [TERINA]: 3. the *Lamato*, another considerable stream which rises in the same group of mountains, but has a more circuitous course, and falls into the Terinaean Gulf, about 16 miles S. of the *Savuto*, was called by the Greeks the LAMETUS, and gave name to the neighbouring town of Lametini (Steph. B. *s. v.* Λαμητῖνοι). 4. The ANGITULA of the Tabula, is a small stream called *Angitola*, about 6 miles S. of the preceding. 5. The MEDMA, or MESMA, which gave name to the city on its banks, is still called the *Mesima*, a stream of some importance, flowing into the Gulf of *Gioja*: 6. the Metaurus of Pliny, now called the *Marro*, about 7 miles S. of the *Mesima*. 7. The CRATAEIS (Plin. *l. c.*), supposed to derive its name from the mother of Scylla (Hom. *Od.* xii. 124) is considered to be the *F. di Solano*, a small stream which flows between the rock of *Scilla* and the town of *Bagnara*. After passing the Straits of Messana no stream of any note is found till after rounding the headland of Leucopetra, when we come to (8) the HALEX, still called *Alice*, which was for a long time the boundary between the territories of Locri and Rhegium. [HALEX.] 9. The CAECINUS of Thucydides (iii. 103) has been identified with the *F. Piscopio*, about 5 miles E. of the preceding. 10. The BUTHROTUS, mentioned by Livy (xxix. 7) as a river not far from the walls of Locri, is probably the modern *F. Novito*, which enters the sea about 3 miles from *Gerace*. [LOCRI.] 11. (Λούκαvος) of Ptolemy, still called few miles from the preceding. 12. much more celebrated stream, men great defeat of the Crotoniats on which there is great difficulty in i certainty: it is probably the *Ala* 13. The HELORUS, or HELLEPORUS the defeat of the combined forces Greeks by the elder Dionysius, B. C. bably the *Callipari*, a small stream N. of the *Capo di Stilo*. 14. The *A* considerable stream, about 6 miles ceding, flowing into the Gulf of probably be the CARCINES, or CAR and Mela. (Plin. iii. 15.) 15. In th Pliny speaks of four other *navigable* into the same gulf, to which he give CROTALUS, SEMIRUS, AROCHAS, a the similarity of names, and order enable us to identify these, with tole as the streams now called respectiv *Simari*, *Crocchio*, and *Tacina*, t them certainly deserves to be ca 16. The AESARUS, on the banks of celebrated city of Crotona, is still ca 17. About 9 miles further N. is th NEAETHUS, still called *Neto*, which Crathis, the most considerable rive [NEAETHUS.] 18. The HYLIAS Thucydides (vii. 35) as the limi territories of Crotona and Thurii, i *Fiumenicà*, a small stream about the *Capo dell' Alice*. 19. The TRA celebrated for the bloody defeat of on its banks, is probably the *Tri* CRATHIS, as already mentioned, mouth the boundary between Luca tium, though by far the greater pa belonged to the latter.

Although Bruttium is through whole extent a mountainous country designations of particular heights served to us. The name of Sila, g times to the great outlying mass between Consentia and Crotona, a been applied by the ancients more e southern mass, now called *Asprom* Strabo and Pliny place it in the in bourhood of Locri and Rhegium. (St Plin. iii. 5. s. 10.) Probably the n evidently only another form of *silv forest*) was at first applied indiscri the Apennines in this part of Ita not, like those of Lucania and Ce calcareous character, but are com most part of granite and other though bordered on each side by a b strata, which give rise to the mo and vallies on the coasts. The of Pliny, and the Latymnius of The μνιον ὄρος, *Id.* iv. 17), appear to ha them situated in the neighbourhood cannot be identified with any certaint

round the coasts of Bruttium merated. Besides these we es and towns mentioned by geographers. On the coast proceeding from the mouth Sicilian Strait, were CERILLI, and NUCERIA, LAMETIUM Terinaean Gulf, METAURUM iver of the same name, and k or headland of Scylla. On STIA near the promontory of ANNIBALIS on the Scyllacian miles inland near the mouth CRIMISA near the promontory he chief towns of the interior h was at one time the capital , PANDOSIA and APRUSTUM rhood; MAMERTIUM in the nd TISIA. Besides these a are mentioned by Livy (XXX. ions of the Romans in Brut- e of the Second Punic War, are otherwise wholly un- calls them "ignobiles populi." is probably a place still called *lto*, and Besidiae, the modern n), but the other four, Uffu- ium, and Sypheum cannot be s assigned to them by local rely conjectural. (Holsten. Barrius, *de Sit. Calabr.* ii. 5; 14.) Equally uncertain are d by Stephanus of Byzantium placed by them among inland s. To this class belong MA- a, Ixias, Brystacia, Ariantha , Menecina, Ninaea, Erimon, all these names are quoted by taeus, who wrote at a time Greek colonies on the coast frequent intercourse with the s of the interior. In later disappeared or undergone a erena mentioned only by the *ήνη*) is supposed with some modern *Sta Severina*, a place a fortress during the middle (*Ταυρανία*) is probably the eraries, which must be placed

On the other hand, we find ion of some towns which had a comparatively late period: obably *Tarsia* on the Crathis, which we are expressly told iii. 28) was a fortress con- ns; Paternum, near the head- on the other side of the penin- till retains its name) a few *Mesima*. But the greater part ed by the Itineraries in this y obscure, and were probably s where relays of horses were towns showing the decayed y.

On the W. coast we find mention of some *ports*, which appear to have been in use as such in the time of Pliny and Strabo, without any towns having grown up adjoining them. Of these are the Portus Parthenius, placed by Pliny (iii. 5. s. 10) between the Laus and Clampetia, but the position of which cannot be determined with more accuracy: the Portus Herculis (Plin. *ib.*; Strab. vi. p. 256) between Hipponium and Medma, probably *Tropea:* the Portus Orestis (Plin. *l. c.*) apparently in the neighbourhood of the Metaurus, and the Portus Balarus noticed by Appian (*B. C.* iv. 85) as situated in the neighbourhood of the Sicilian Strait, probably the modern *Bagnara*.

The principal ancient line of road through Bruttium passed down the centre of the peninsula, following nearly the same line with the modern high road from Naples to *Reggio*. It is considered in the Itineraries as a branch of the Appian Way (Itin. Ant. p. 106), but it was probably known originally as the Via Popillia, as an inscription has preserved to us the fact that it was originally constructed by C. Popillius. It proceeded from Muranum (*Murano*) in Lucania to Caprasia (probably *Tarsia*), ascended the valley of the Crathis to Consentia, thence descended into the plain of the Lametus, and passed through Vibo Valentia, and from thence followed with little deviation the W. coast as far as Rhegium. Another line of road preserved to us by the same authority (*Itin. Ant.* p 114) proceeded from Thurii along the E. coast by Roscianum and Paternum to Syllacium, leaving Crotona on the left, and thence round the coast to Rhegium. It was probably this line which, as we learn from another inscription, was constructed under the emperor Trajan at the same time with the road through the Sallentine peninsula. A third, given only in the Tabula, and probably the least frequented of all, led from Blanda in Lucania down the W. coast of Bruttium, keeping close to the Tyrrhenian sea, as far as Vibo Valentia, where it joined the road first described.

The modern provinces of Calabria have been less explored by recent travellers than any other part of Italy, and their topography is still but very imperfectly known. None of the ancient cities which formerly adorned their shores have left any striking monuments of their former magnificence, and even the site of some of them has never yet been determined. The travels of Swinburne and Keppel Craven give a good account of the physical characters and present condition of the country; but throw very little light upon its ancient topography, and the local writers who have treated expressly of this subject are deserving of little confidence. The principal of these is Barrio, whose work, *De Antiquitate et Situ Calabriae* (Roma. 1571, 8vo.), was republished in 1737 with copious illustrations and corrections by Tommaso Aceti. The original work is inserted in Burmann's *Thesaurus Antiquitatum Italiae*, vol. ix. part 5. In the more comprehensive

COIN OF BRUTTII.

work of Romanelli (the *Antica Topografia Istorica del Regno di Napoli*, Naples, 1815) the author has followed almost exclusively the authority of Barrio and his commentators. There is no doubt that a careful examination of the localities themselves by a well-informed and enterprising traveller would add greatly to our knowledge of their ancient geography and condition. [E. H. B.]

BRUTTIUM. [BRUTTII.]

BRUZUS, probably in Phrygia. Cramer (*Asia Minor*, vol. ii. p. 55) refers to this place a coin with the epigraph Βρουζηνων, and he supposes that Druzon, which Ptolemy places among the cities of Phrygia Magna, should be Bruzon. [G. L.]

BRYA'NIUM (Βρυάνιον), a town of Macedonia, in the district Deuriopus in Paeonia. Stephanus erroneously calls it a town of Epirus. (Liv. xxxi. 39; Strab. vii. p. 327; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. iii. p. 307.)

BRYGI (Βρύγοι), called BRIGES (Βρίγες) by the Macedonians, a Thracian people dwelling in Macedonia, north of Berοea in the neighbourhood of Mt. Bermius. They attacked the army of Mardonius, when he was marching through Macedonia into Greece in B. C. 492. (Herod. vi. 45, vii. 73, 185; Strab. vii. pp. 295, 330; Steph. B. *s. v.* Βρίγες.) It was generally believed that a portion of this Thracian people emigrated to Asia Minor, where they were known under the name of Phrygians. (Herod. vii. 73; Strab. *ll. cc.*) [PHRYGIA.] Stephanus mentions two Macedonian towns, Brygias (Βρυγίας) and Brygium (Βρύγιον), which were apparently situated in the territory of the Brygi.

Some of the Brygi were also settled in Illyricum, where they dwelt apparently north of Epidamnus. Strabo assigns to them a town Cydriae. (Strab. vii. pp. 326, 327; Appian, *B. C.* ii. 39.)

BRY'LLION (Βρύλλιον: *Eth.* Βρυλλιανός; Steph. *s. v.*), a city on the Propontis in Bithynia. Stephanus reports that it was Cius, according to Ephorus, by which he probably means that Bryllium was the old name of Cius. There was a district Bryllis which contained the small town of Dascyleium. Pliny (v. 32) mentions Bryllium, which he evidently takes to be a different place from Cius, but near to it. [G. L.]

BRYSEAE (Βρυσειαί, Hom. *Il.* ii. 583; Βρυσεαί, Paus. iii. 20. § 3; Βρυσιαί, Steph. B. *s. v.*), a town of Laconia, SW. of Sparta, at the foot of the ordinary exit from Mt. Taygetus. Its name occurs in Homer, but it had dwindled down to a small village in the time of Pausanias, who mentions, however, a temple of Dionysus at the place, into which women alone were permitted to enter, and of which they performed the sacred rites. Leake discovered the site of Bryseae at the village of *Sinánbey* near *Sklavokhóri*. He remarks that the marble from *Sklavokhóri*, which was presented by the Earl of Aberdeen to the British Museum, probably came from the above-mentioned temple at Bryseae: it bears the name of two priestesses, and represents various articles of female apparel. Leake found another marble at *Sinánbey*, which is also in the British Museum. (Leake, *Morea*, vol. i. p. 187, *Peloponnesiaca*, pp. 163, 166.)

BUANA (Βουάνα, Ptol. v. 13. § 21), a city of Armenia, about the site of which there has been considerable difference of opinion. Rawlinson (*Lond. Geog. Journ.* vol. x. p. 90) considers that the great city of *Salban*, with the capture of which the second campaign of Heraclius terminated (Theophanes, p. 260; comp. Milman's *Gibbon*, vo Le Beau, *Bas Empire*, vol. xi. p. 186 word which is written Buana by Pto by Cedrenus (ii. p. 774). *Sál* is Kurdish *Shál* or *Shár* (for the *l* and *r* confounded), signifying a city, and S comes the city of *Ván*. According t second campaign of Heraclius, in whi poses him to have penetrated int Persia, must be confined to the coun on the Araxes. D'Anville, who has campaign of Heraclius (*Mém. de l' A* pp. 559—573), has not attempted *Salban*, and finds in Artemita [A ancient representative of *Ván*.

BUBALIA. [BUDALIA.]

BUBASSUS (Βυβασσός: *Eth.* town in Caria. Ephorus, according wrote Βύβαστον and Βυβάστιον; an 62) means the same place, when h bastus of the Chersonesus. Pliny "regio Bubassus;" and he adds, "th Acanthus, otherwise called Dulopoli the "regio Bubassus" next to Trio of Triopium. Finally, Mela menti Sinus (i. 16). The Bubassia Chers tioned by Herodotus (i. 174, w reading is Βυβλεσίης, but there is n has been properly corrected Βυβασσίης tells a story of the Cnidians atten canal through a narrow neck of lan pose of insulating their peninsula, themselves against the Persians; th work while Harpagus was conqueri isthmus where they made the att stadia wide, and rocky. This plac isthmus which connects the main high peninsula, now called *Cape* sandy, and Strabo says that *Cape* was once an island, but in his time with the land by a causeway. B chief part of the city of Cnidos was o as Beaufort observes (*Karamania*, we cannot be sure that this was s Harpagus. The passage in Herodot obscure, but mainly because it is ill description is in his usually diffuse, h tical, form. Herodotus says, "Both inhabit this country (Caria) and colonists, Cnidians, their territory b the sea (the name is Triopium), a from the Chersonesus Bubassie, and being surrounded by the sea, excep (for on the north it is bounded by micus, and on the south by the sea i of Syme and Rhodus); now at th being about five stadia, the Cnidian to dig a canal." It is clear, then, t narrow neck some distance east o Cnidus. "It is now ascertained, by survey of the coast, that the isthm Cnidians attempted to dig through i of the Gulf of Syme." (Hamilton, vol. ii. p. 78.) The writer of this seen Captain Graves' survey. Mr. Remarks on the Island and Gulf of *Geog. Journal*, vol. viii. p. 134), where the canal was attempted Syme, "where the land sinks into very narrow, but he had not the measuring it. He adds, "The Tri

BASTUS (Βούβαστις, Herod. s, Strab. xvii. p. 805; Diod. ; Ptol. iv. 5. § 52), the PHI- (Ezek. xxx. 17), and the as the capital of the nome ta, and was situated SW. of side of the Pelusiac branch ne and city of Bubastis were ian division of the Egyptian to the goddess Pasht, whom ubastis, and identified with s the sacred and peculiar ani- represented with the head of nobler congener the lion, and the deity Phtah in monu- The tombs at Bubastis were al depository in Egypt of the The 22nd dynasty of Egyp- ed of nine, or, according to f three Bubastite kings, and he city was one of the most the Delta. Immediately to were the allotments of land ichus rewarded the services Carian mercenaries (Herod. e northern side of the city Canal which Pharaoh Neco the Nile and the Red Sea. B. C. 352, Bubastis was taken s walls were then dismantled. n this period it gradually de- pears in ecclesiastical annals es of the province Augustam- ite coins of the age of Hadrian nguished features of the city were its oracle of Pasht, the t goddess and the annual pro- her. The oracle gained in ance after the influx of Greek ta, since the identification of attracted to her shrine both native Egyptians and foreigners. The ruins of *Tel-Bastak*, or the "Hills of Bustak," attest the original magnificence of the city. The entire circuit of the walls is, according to Hamilton (p. 367) not less than three miles in extent. Within the principal inclosure, where there has been the greatest accumulation of the ruins of successive edifices, is a large pile of granite-blocks which appear, from their forms and sculptures, to have belonged to numerous obelisks and gigantic propyla. The mounds which encompassed the ancient city were originally begun by Sesostris and completed by the Aethiopian invader Sabakos, who employed criminals upon these and similar works. (Herod. ii. 137.) The mounds were intended to redeem and rescue the site of the city, and possibly its gardens and groves, from the inundations of the Nile. From the general aspect of the ruins, and from the description given of it by Herodotus (ii. 138), they appear to have been raised concentrically around the temples of Pasht and Hermes, so that the whole place resembled the interior of an inverted cone. The only permanent buildings in Bubastis seem to have been the temples and the granite walls and corridors. The private houses were probably little better or more solid than the huts of the Fellahs, or labourers of the present day.

The following is the description which Herodotus gives of Bubastis, as it appeared shortly after the period of the Persian invasion, B. C. 525, and Mr. Hamilton remarks that the plan of the ruins remarkably warrants the accuracy of this historical eye-witness. (Herod. ii. 59, 60.)

Temples there are more spacious and costlier than that of Bubastis, but none so pleasant to behold. It is after the following fashion. Except at the entrance, it is surrounded by water: for two canals branch off from the river, and run as far as the entrance to the temple: yet neither canal mingles with the other, but one runs on this side, and the other on that. Each canal is a hundred feet wide, and its banks are lined with trees. The propylaea are sixty feet in height, and are adorned with sculptures (probably intaglios in relief) nine feet high, and of excellent workmanship. The Temple being in the middle of the city is looked down upon from all sides as you walk around; and this comes from the city having been raised, whereas the temple itself has not been moved, but remains in its original place. Quite round the temple there goes a wall, adorned with sculptures. Within the inclosure is a grove of fair tall trees, planted around a large building in which is the effigy (of Pasht). The form of that temple is square, each side being a stadium in length. In a line with the entrance is a road built of stone about three stadia long, leading eastwards through the public market. The road is about 400 feet broad, and is flanked by exceeding tall trees. It leads to the temple of Hermes.

The festival of Bubastis was the most joyous and gorgeous of all in the Egyptian calendar. Barges and river craft of every description, filled with men and women, floated leisurely down the Nile. The men played on pipes of lotus: the women on cymbals and tambourines, and such as had no instruments accompanied the music with clapping of hands and dances, and other joyous gestures. Thus did they while on the river: but when they came to a town on its banks, the barges were made fast, and the pilgrims disembarked, and the women sang and playfully mocked the women of that town. And

when they reached Bubastis, then held they a wondrously solemn feast: and more wine of the grape was drank in those days than in all the rest of the year. Such was the manner of this festival: and, it is said, that as many as seven hundred thousand pilgrims have been known to celebrate the Feast of Pasht at the same time. [W. B. D.]

BUBENTUM (Βουβεντανός), a city of Latium, mentioned by Dionysius (v. 61) as one of the thirty which composed the Latin League. No other notice is found of it, except that the Bubetani (which should probably be written Bubentani) are found in Pliny's list of the extinct "populi" of Latium: and there is no clue to its position. [E. H. B.]

BUBON (Βούβων). Stephanus (*s. v.* Βούβων) observes that "Bubon and Balbura are cities of Lycia:" the Ethnic name he adds, "ought to be Βουβώνιος, but it is Βουβωνεύς, for the Lycians rejoice in this form." The truth of this observation of Stephanus is proved by the inscription found on the spot: Βουβωνεων ἡ Βουλη καὶ ὁ Δημος. Bubon is placed in the map in Spratt's Lycia, near 37° N. lat. west of Balbura, near a place named *Ebajik*, and on a small stream that flows into the Indus, or *Horzoom Tchy*. Bubon is mentioned by Pliny, Ptolemy, and Hierocles, and Pliny (xxxv. 17) mentions a kind of chalk (creta) that was found about Bubon. The city stood on a hill side. The ruins are not striking. There is a small theatre built of sandstone, and on the summit of the hill was the Acropolis. Bubon is in a mountainous tract, which separates the basins of the Indus and the Xanthus, and it commands the entrance to the pass over the mountains. The pass is 6000 feet above the sea, and the mountains on each side of it 8000 or 9000 feet high. [Balbura; Cabalis; Cibyra.] (Spratt's *Lycia*, vol. i. p. 264.) [G. L.]

BUCA (Βοῦκα: *Eth.* Bucanus), a city of the Frentani on the coast of the Adriatic Sea. It is mentioned by all the geographers as one of the chief cities of the Frentani, but there is considerable difficulty in regard to its site. Strabo describes it as the southernmost of the Frentanian cities, so that its territory bordered on that of Teanum in Apulia. In another passage he tells us that it was 200 stadia from the mouth of a lake near the Garganus, which can certainly be no other than the *Lago di Lesina*. Ptolemy also places it between the mouth of the Tifernus and Histonium: but Pliny, on the contrary, enumerates it between Histonium and Ortona; and Mela, though less distinctly, appears also to place it to the N. of Histonium. (Strab. v. p. 242, vi. p. 285; Plin. iii. 12. s. 17; Ptol. iii. 1. § 18; Mela ii. 4.) The statements of Strabo accord well with the views of those who would place Buca at *Termoli*, a seaport town on a projecting point of land about 3 miles from the mouth of the *Biferno* (Tifernus), and 25 from the opening of the *Lago di Lesina:* and this is certainly the most probable position. On the other hand the authority of Pliny has been followed by most local antiquarians, who have placed Buca at a spot now called *Punta della Penna*, a projecting headland with a small port about 5 miles N. of *Il Vasto* (Histonium), where it is said that considerable ancient remains were still visible in the 17th century. Two inscriptions, said to have been discovered on this site, would be almost conclusive in favour of this view, but they are probably forgeries. This subject is further discussed in the article Frentani. (Romanelli, vol. iii. p. 40—42; Mommsen, *Inscr. Regn. Neapol.* App. p. 30.) [E. H. B.]

Some translate them, "with blue eyes and a ruddy complexion," others "with blue eyes and red hair," others "having a bluish and ruddy colour all over (πᾶν)," while others take them to refer to the custom of painting the body, which is distinctly stated to have prevailed among tribes closely connected with the Budini, the GELONI and AGATHYRSI. They had a city, built entirely of wood, the name of which was Gelonus; in which were temples of the Greek divinities, fitted up in the Greek fashion, with images and altars and shrines of wood. They celebrated a triennial festival to Dionysus, and performed Bacchic rites. These points of Hellenism are explained by Herodotus from the close association of the Budini with the Geloni, which he regards as originally Greeks, who had left the Grecian settlements on the Euxine, and gone to dwell among the Budini, and who, though speaking the Scythian language, observed Greek customs in other respects. The Budini, however, differed from the Geloni, both in their language and in their mode of life, as well as their origin; for the Budini were indigenous, and were nomads, and eat lice (the true translation of φθειροτραγέουσι, see the commentators, Baehr, &c.), while the Geloni were an agricultural people: they differed also in form and complexion. The Greeks, however, confounded the two people, and called the Budini Geloni. The country of the Budini was covered with forests of all sorts, in the largest of which was a great lake, and a marsh, surrounded by reeds, and here were caught otters and beavers and other animals with square faces (τετραγωνοπρόσωπα), whose skins were used as cloaks, and parts of their bodies for medicinal purposes. Again, he tells us (iv. 122, 123), that when Darius invaded Scythia, he pursued the Scythians as far as the country of the Budini, whose wooden city the Persians burnt; although their king was in the camp as an ally, having joined Darius through enmity to the Scythians (iv. 119).

Mela (i. 19. § 19) gives to the Budini only a few words, in which, as usual, he follows Herodotus. Pliny mentions them, with the Neuri, Geloni, Thyssagetae, and other tribes, as on the W. side of the Palus Maeotis (iv. 12. s. 26). Ptolemy mentions, in European Sarmatia, W. of the Tanaïs, a people named Bodini (Βοδινοί or Βοδηνοί) and a mountain of the same name (τὸ Βουδινὸν or Βοδινὸν ὄρος) near the sources of the Borysthenes (iii. 5. §§ 15, 24).

Few peoples have given more exercise to the critical skill or invention of geographers and ethnologists than the Budini. As to their ethnical affinities, some, insisting on their (supposed) blue eyes and fair hair, and finding a resemblance, in their name and position, to the Butones of Strabo (vii. p. 290, where Kramer reads Γοίτωνας), the Guttones of Pliny (iv. 14), and the Batini of Ptolemy (ii. 11. § 20), take them for the original Gothic ancestors of the Germans, and derive their name from that of the god Odin or Wodan (Mannert, *Geogr.* vol. iii. pp. 9 et seq., 15 et seq., 493, vol. iv. pp. 103, 108); others, from the marshy woodlands, in which they dwelt, identify them with the Wends, whose name is derived from water, and can be easily transmuted, by known etymological equivalents, into Budini, thus, *Wenda* (Polish) = *Wodu* (Sclavonic), and W becomes B in Greek (Worbs, in Ersch and Gruber's *Encyklopädie*, *s. v.*); while Ritter, referring back their Hellenic customs, and their worship of Dionysus, to their Asiatic originals, and deriving their name from Buddha, boldly brings them to the support of his theory respecting

Digitized by Google

the great primeval migration from India and Central Asia to the shores of the Maeotis, and to Northern Europe. (*Vorhalle*, pp. 25 et seq., 30, 153 et seq.). It is unnecessary to discuss the various geographical positions assigned to them, as there are several wooded and marshy districts in Central Russia, which might answer to the description of Herodotus. Nearly all writers agree in placing them between the *Don* and the *Volga*, somewhere to the N. of the country of the Don Cossacks; but the special reasons on which each writer assigns their position more particularly are rather fanciful: perhaps the most plausible view is that which places them in the government of *Novgorod*, and regards their wooden city as a great emporium of the ancient inland traffic, and the original of the celebrated and very ancient mart of *Nijni-Novgorod*. Full particulars of the various and curious theories about this people are given by the following writers, besides those already quoted: Rennell, *Geog. of Herod.* vol. i. pp. 110—123; Heeren, *Ideen*, vol. i. pt. 2. p. 209; Eichwald, *Geogr. d. Casp. Meeres*, pp. 276 et seq.; Brehmer, *Entdeckungen im Alterthum*, vol. i. p. 484, et seq.; Georgii, *Alte Geographie*, vol. ii. pp. 304, et seq.; Ukert, *Geogr. d. Griech. u. Röm*, vol. iii. pt. 2, pp. 537, et seq., and other writers quoted by Ukert. [P. S.]

BUDO'RUS. 1. A small river in Euboea, near Cerinthus. [CERINTHUS.]

2. A promontory and fortress of Salamis. [SALAMIS.]

BUDROAE, two rocks rather than islands, which Pliny (iv. 12. s. 20) couples with Leuce (*Hághios Theódhoros*), as lying off the coast of Crete. According to Hoeck (*Kreta*, vol. i. p. 384), their present name is *Turlure*. [E. B. J.]

BULIS (Βοῦλις), a town of Phocis, on the frontiers of Boeotia, situated upon a hill, and distant 7 stadia from the Crissaean gulf, 80 stadia from Thisbe, and 100 from Anticyra. It was founded by the Dorians under Bulon, and for this reason appears to have belonged to neither the Phocian nor the Boeotian confederacy. Pausanias, at least, did not regard it as a Phocian town, since he describes it as bordering upon Phocis. But Stephanus, Pliny, and Ptolemy all assign it to Phocis. Near Phocis there flowed into the sea a torrent called Heracleius, and there was also a fountain named Saunium. In the time of Pausanias more than half the population was employed in fishing for the murex, which yielded the purple dye, but which is no longer caught on this coast. (Paus. x. 37. § 2, seq.; Steph. B. *s. v.*; Plin. iv. 3. s. 4; Ptol. iii. 15. § 18, who calls it Βούλεια; Plut. *de Prud. Anim.* 31, where for Βουνῶν we ought to read Βούλεων, according to Müller, *Orchomenus*, p. 482, 2nd ed.) The harbour of Bulis, which Pausanias describes as distant 7 stadia from the city, is called MYCHUS (Μυχός) by Strabo (ix. pp. 409, 423). The ruins of Bulis are situated about an hour from the monastery of *Dobó*. Leake describes Bulis as "occupying the summit of a rocky height which slopes on one side towards a small harbour, and is defended in the opposite direction by an immense βράχος, or lofty rock, separated by a torrent from the precipitous acclivities of Helicon." The harbour of Mychus is now called *Zálitza*. (Leake, *Northern Greece*, vol. ii. p. 518, seq.)

BULLA REGIA (Βούλλα Ῥηγία, Ptol. viii. 14. § 10, corrupted into Βουλλαρία, Ptol. iv. 3. § 30; *Boul*, Ru.), an inland town of N braca, and 4 days' journey WSW tributary of the Bagradas, the va called *Wad-el-Boul*. destruction was rebuilt inland;
but neither Pausanias nor Strabo states that the ancient city was on the coast, and their words render it improbable.

BURAICUS. [BURA.]

BURCHANA (Βουρχανίς: *Borcum*), called Fabaria, from a kind of wild beans growing there, was an island at the mouth of the Amasia (*Ems*), which was discovered and conquered by Drusus. (Strab. vii. 291; Plin. iv. 27.) [L. S.]

BURDI'GALA or BURDEGALA (Βουρδίγαλα: *Bourdeaux* or *Bordeaux*), the chief town of the Bituriges Vivisci, on the left bank of the *Garonne*, or, as Strabo (p. 190), the first writer who mentions the place, describes it, on the aestuary (λιμνοθάλασσα) of the Garonne, which aestuary is named the *Gironde*. The position of Burdigala at *Bordeaux* is proved by the various roads in the Table and the Antonine Itin. which run to this place from Mediolanum (*Saintes*), from Vesunna (*Perigeux*), Aginnum (*Agen*), and from other places. It was the emporium or port of the Bituriges Vivisci, and a place of great commerce under the empire. Ausonius, a native of Burdigala, who lived in the fourth century, describes it in his little poem entitled "Ordo Nobilium Urbium;" and though he describes it last, he describes it more particularly than any of the rest. Ausonius is our authority for the pronunciation of the name:—

"Burdigala est natale solum, clementia caeli
Mitis ubi, et riguae larga indulgentia terrae."

It was in the early centuries of the Christian aera one of the schools of Gallia. Ausonius (*Commem. Prof. Burd.*) records the fame of many of the professors, but they are all rhetoricians and grammarians; for rhetoric and grammatic, as the terms were then used, were the sum of Gallic education. Tetricus assumed the purple at *Burdigala*, having been proclaimed emperor by the soldiers when he was governor of Aquitania. (Eutrop. ix. 10.) The importance of Burdigala in the Roman period appears from the fact of its having the title of Metropolis of Aquitania Secunda (Metropolis Civitas Burdegalensium), after the division of Aquitania into several provinces. Burdigala was taken by the Visigoths, and it was included in their kingdom during their dominion in the south-west of Gaul; but *Toulouse* was their capital.

We know little of Burdigala except from the verses of Ausonius. He describes the city as quadrangular, with walls and very lofty towers. The streets were well placed, and it contained large open places or squares (plateae). He mentions a stream that ran through the middle of the city into the Garonne, wide enough to admit ships into the town when the tide rose. In fact, the channel of this little stream was converted into a dock; but it does not exist now. Ausonius mentions a fountain named Divona, which supplied the city with water. Some traces of a subterraneous aqueduct have been discovered near *Bordeaux*, a short distance from the *Porte d'Aquitaine* on the great road from *Bordeaux* to *Langon*. The only remaining Roman monument at Bordeaux is the amphitheatre commonly called the *Arènes* or the *Palais Gallien*. This building had externally two stories surmounted by an Attic, altogether above 65 feet high. The length of the arena was about 240 English feet, and the width about 175 feet. The thickness of the constructions, which supported the seats, is estimated at about 91 feet, which makes the extreme length 422 feet.

Digitized by Google

Of the two great entrances at each extremity of the ellipse, the western entrance alone remains, and it is still complete (1842). This noble edifice has been greatly damaged at different times, and is now in a deplorable condition. (Notice in the *Guide du Voyageur*, par Richard et Hocquart, from M. de Caumont.) Another Roman edifice, probably a temple, existed till the time of Louis XIV., when it was demolished. [G. L.]

BURGINA'TIUM is placed by the Table and the Antonine Itin. between Colonia Trajana and Arenatio, or Harenacio, 6 M. P. from Arenatio, and 5 from Colonia. It is generally agreed that this place is represented by *Schenkenschanz*, at the point of the bifurcation of the *Rhine* and *Waal* in the present kingdom of the Netherlands. But some geographers assign other positions to Burginatium. [G. L.]

BURGUNDIO'NES, BURGUNDII (Βουργουνδιῶνες, Βουργοῦνδοι, Βουργίωνες, Φρουγουνδιῶνες, Οὐρουγοῦνδοι), are mentioned first by Pliny (iv. 28) as a branch of the Vandals, along with the Varini, Carini, and Guttones. This circumstance proves that they belonged to the Gothic stock; a fact which is also recognised by Zosimus (i. 27, 68), Agathias (i. 3, p. 19, ed. Bonn), and Mamertinus (*Paneg.* ii. 17). But this view is in direct contradiction to the statement of Ammianus Marcellinus (xviii. 5), who declares them to be descendants of ancient Roman settlers, and of Orosius, who relates that Drusus, after subduing the interior of Germany, established them in different camps; that they grew together into a great nation, and received their name from the fact that they inhabited numerous townships, called *burgi*. The difficulty arising from these statements is increased by the different ways in which the name is written, it becoming a question whether all the names given at the head of this article belong to one or to different peoples. Thus much, at any rate, seems beyond a doubt, that a branch of the Vandal or Gothic race bore the name of Burgundians. In like manner, it is more than probable, that the Buguntes mentioned by Ptolemy (ii. 11. §§ 15. 18) as occupying the country between the Vistula and Viadus are the same as the Burgundiones. That they dwelt on and about the Vistula is clear also from the statement, that Fastida, king of the Gepidae about the Carpathians, almost destroyed the Burgundiones. (Jornand. *De Reb. Goth.* 17; comp. Mamert. *Paneg.* ii. 17; Zosim. i. 68.) It is accordingly a fact beyond all doubt, that the Burgundians were a Gothic people dwelling in the country between the Viadus and the Vistula.

But besides these north-eastern Burgundians, others occur in the west as neighbours of the Alemanni, without its being possible to say what connection existed between them; for history affords no information as to how they came into the south-west of Germany, where we find them in A. D. 289. (Mamert. *Paneg.* i. 5.) At that time they seem to have occupied the country about the Upper Maine, and were stirred up by the emperor Valentinian against the Alemanni, with whom they were often at war. (Amm. Marc. xxviii. 5; comp. xviii. 2.) An army of 80,000 Burgundians then appeared on the Rhine, but without producing any permanent results, for they did not obtain any settlements there until the time of Stilico, in consequence of the great commotion of the Vandals, Alani, and Suevi against Gaul. (Oros. vii. 32.) In the year 412, Jovinus was proclaimed emperor at Mayence, partly through the influence of the Burgundian king Gunthahar. The year after this they crossed over bank of the Rhine, where for a time progress was checked by Aëtius. (S *Carm.* vii. 233.) But notwithstandi bloody defeats, in one of which their ki was slain, the Burgundians advanced i soon adopted Christianity. (Oros. *l. c.* 30.) They established themselves abo slope of the Alps, and founded a power

Although history leaves us in the manner in which the Burgundians can south-west of Germany, yet one of tw have been the case, either they had mi from the east, or else the name, being was given to two different German peo circumstance of their living in burg (Comp. BUTUA (Βυθόη, Steph. B. *s. v.*; ua, Plin. iii. 23. s. 26; Βουλούα, ούα, Ptol. ii. 16. § 5: *Eth.* Βου- a town of Dalmatia in Illyricum, founded by Cadmus, after he had ebes and taken up his residence tribe of the Enchelees.

I (Βουθρωτόν, Strab., Ptol.; Βου- : *Eth.* Βουθρώτιος), a town of us, was situated upon a peninsula lt-water lake, which is connected sea by means of a river three or h. This lake is now called *Vutzin*- ancient times the name of PELO- om its muddy waters; for though y give the name of Pelodes only μήν), there can be little doubt the lake as well. (Strab. vii. p. § 4; called Παλόεις by Appian, e bay of the sea with which the is connected is called by Ptolemy tum, and must not be confounded ke Pelodes. The bay of Buthro- on the north by the promontory

said to have been founded by He- Priam, after the death of Pyrrhus. Aeneas visiting Helenus at this g him married to Andromache. 91, seq.; Ov. *Met.* xiii. 720.) Vir- hrotum as a lofty city ("*celsam* us urbem"), resembling Troy: to owed from the lake into the sea the name of Simois, and to a dry Xanthus. But its resemblance to e been purely imaginary; and the " cannot be applied with any pro- um. The town was occupied by ad taken Oricum (Caes. *B. C.* iii. ecome a Roman colony as early as . (Strab. *l. c.*; Plin. iv. 1. s. 1.) tate at Buthrotum. (Cic. *ad Att.* vi. 7.)

Buthrotum occupy a peninsula on the western side by a small bay surrounded from the north to the windings of the river just above its of the Roman colony still exist in the whole circumference, which is about a mile, and are mixed with remains both of later and of Hellenic work, showing that the city always occupied the same site. The citadel was towards the bay of the lake, where the side of the peninsula is the highest and steepest." (Leake, *Northern Greece*, vol. i. p. 99, seq.; comp. Prokesch, *Denkwürdigk.* vol. i. p. 22, seq.)

BUTICUS LACUS (ἡ Βουτικὴ λίμνη, Strab. xvii. p. 802), was one of the lagoons formed by the Nile near its junction with the Mediterranean Sea. The Butic Lake, the modern *Burlos*, was northward of the town of Butos, and contained the islet of Chemmis or Chembis, from which the nome Chemmites derived its appellation. (Steph. B. p. 690). This island which at one time was said to be floating, was the original site of the temple of Buto, since here Isis took refuge when pursued by Typhon. (Anton. Lib. *Metam. Fab.* 28.) [W. B. D.]

BUTOS, or BUTO (Βοῦτος, Herod. ii. 59, 63, 155; Βουτώ, Steph. B. p. 183, *s. v.*: *Eth.* Βούτιος, Βουτοΐτης, Βουτοίτης), was the capital town, or according to Herodian, merely the principal village of the Delta, which Herodotus (*l. c.*) calls the Chemmite nome; Ptolemy the Phthenothite (Φθενώτης, iv. 5. § 48) and Pliny (v. 9. s. 11) Ptenetha. Butos stood on the Sebennytic arm of the Nile, near its mouth, and on the southern shore of the Butic Lake. (Βουτικὴ λίμνη, Strab. xvii. p. 802.) The town was celebrated for its monolithite temple (Herod. ii. 155) and oracle of the goddess Buto (Aelian. *V. Hist.* ii. 41), whom the Greeks identified with Leto or Latona. A yearly feast was held there in honour of the goddess. At Butos there was also a sanctuary of Apollo (Horus) and of Artemis (Bubastis). It is the modern *Kem Kasir*. (Champollion, *l'Egypte*, vol. ii. p. 227.) The name Buto (Βουτώ) of the Greeks is nearly allied to that of Muth or Maut, which is one of the appellations of Isis, as "Mother of the World." (Plut. *Is. et Osir.* 18, 38.) The shrewmouse was worshipped at Butos. (Herod. ii. 67.) [W. B. D.]

BUTRIUM (Βούτριον), a town of Gallia Cispadana, placed by Strabo on the road from Ravenna to Altinum. This is confirmed by the Tab. Peut., which places it 6 miles from Ravenna: Pliny also says that it was near the sea-coast, and calls it an Umbrian city. Strabo, on the other hand, says it was a colony or dependency of Ravenna. (Strab. v. p. 214; Plin. iii. 15. s. 20; Steph. Byz. *s. v.* Βούτριον; Tab. Peut.) No remains of it are extant, and its site cannot be identified: there is a place still called *Budrio* about 10 miles NE. of *Bologna*, but this is much too far from the sea-coast: the ancient Butrium must have been near the entrance of the lagunes of *Comacchio*. The Butrium mentioned by Ptolemy (iii. 1. § 31) among the cities of the Cenomani, in conjunction with Tridentum, must have been quite a different place. [E. H. B.]

BUTUA. [BUTHOE.]

BUTUNTUM (Βυτοντῖνος: *Eth.* Butuntinensis: *Bitonto*), an inland city of Apulia, distant 12 miles W. from Barium, and about 5 from the sea. From its position it must certainly have belonged to the Peucetian district of Apulia, though reckoned by Pliny, as well as in the Liber Coloniarum, among the cities of Calabria (Plin. iii. 11. s. 16; Lib. Colon. p. 262). It is correctly placed by the Itineraries on the road from Barium to Canusium, 12 M.P. from Barium and 11 from Rubi. (Itin. Ant. p. 117; Itin. Hier. p. 609.) No mention of it is found in history,

Digitized by Google

but its coins attest that it must have been in early times a place of some importance. They bear the Greek legend ΒΥΤΟΝΤΙΝΩΝ, and the types indicate a connexion with Tarentum. (Eckhel, vol. i. p. 144; Millingen, *Num. de l'Italie*, p. 150.) [E. H. B.]

BUXENTUM, called by the Greeks PYXUS (Πυξοῦς: Ptolemy however writes the name Βούξεντον: *Eth.* Πυξούντιος, Buxentinus: *Policastro*), a city on the W. coast of Lucania, on the Gulf now known as the *Golfo di Policastro*, which appears to have been in ancient times called the Gulf of Laus. The Roman and Greek forms of the name are evidently related in the same manner as Acragas and Agrigentum, Selinus and Selinuntium, &c. All authors agree in representing it as a Greek colony. According to the received account it was founded as late as B. C. 470 by a colony from Rhegium, sent out by Micythus, the successor of Anaxilaus. (Diod. xi 59; Strab. vi. p. 253; Steph. B. *s. v.* Πυξοῦς.) But from coins still extant, of a very ancient style of fabric, with the name of Pyxus (ΠΥΞΟΕΣ) on the one side, and that of Siris on the other, it is evident that there must have been a Greek city there at an earlier period, which was either a colony of Siris, or of kindred origin with it. (Eckhel, vol. i. p. 151; Millingen, *Numismatique de l'Italie*, p. 41.) The colony of Micythus according to Strabo did not last long: and we hear no more of Pyxus until after the conquest of Lucania by the Romans, who in B.C. 197 selected it as the site of one of the colonies which they determined to establish in Southern Italy. The settlement was not however actually made till three years afterwards, and in B. C. 186 it was already reported to be deserted, and a fresh body of colonists was sent there. (Liv. xxxii. 29, xxxiv. 42, 45, xxxix. 22; Vell. Pat. i. 15.) No subsequent mention of it is found in history, and it seems to have never been a place of much importance, though its continued existence as a municipal town of Lucania is attested by the geographers as well as by the Liber Coloniarum, where the "ager Buxentinus" is erroneously included in the province of the Bruttii. (Plin. iii. 5. s. 10; Strab. vi. p. 253; Mela ii. 4; Ptol. iii. 1. § 8; Lib. Colon. p. 209.) It appears to have still been the see of a bishop as late as A.D. 501. (Romanelli, vol. i. p. 375.)

Strabo tells us (*l. c.*) that besides the city there was a promontory and a river of the same name. The latter still retains its ancient name, the river which flows near the modern city of *Policastro* being still called the *Busento*. The promontory is probably the one now called *Capo degli Infreschi*, which bounds the Gulf of *Policastro* on the W. Cluverius speaks of the vestiges of an ancient city as still visible at *Policastro:* but no ruins appear to be now extant there: and the only ancient remains are two inscriptions of the reign of Tiberius. There is, however, little doubt that *Policastro*, the name of which dates from about the 11th century, occupies nearly, if not precisely, the site of Buxentum. (Cluver. *Ital.* p. 1261; Romanelli, vol. i. p. 373.)

The coin of Pyxus above alluded to, is figured under SIRIS. [E. H. B.]

BU'ZARA. [MAURETANIA.]

BYBLOS (Βύβλος, Steph. B.; Βίβλος, Zosim. i. 58: *Eth.* Βύβλιος, Βίβλιος, *LXX.*; Ptol. v. 15; Plin. v. 20; Pomp. Mel. i. 12. § 3; Hierocl.; Geogr. Rav.: *Jubeil*), a city of Phoenicia, seated on a rising ground near the sea, at the foot of Lebanon, between Sidon and the Promontory Theoprosopon (Θεοῦ πρόσωπον). (Strab. xvi. p. 755.) It was celebrated for the birth and worship of Adonis or Thammuz. (Eustath. *ad Dionys.* v. 912; Nonn. iii. v. 109; Strab. *l.c.*) "The land of Chinneroth with all Lebanon, was assigned to Joshua (*Josh.* xiii. 5), but they never got possession. The Giblites are mentioned as "stonesquarers" (1 *Kings*, v. 18), and supplied caulkers to the Tyrian fleet (*Ezek.* xxvii. 9). Enylus, king of Byblus, when he learnt that his town was in the power of Alexander, came up with his vessels to join the Macedonian fleet. (Arrian, *An.* 20. § 1.) Byblus seems afterwards to have passed into the hands of a petty despot, as Strabo is described as giving it freedom, by beheading the tyrant. (Strab. *l. c.*) This town, under the name of Gebal (Abulf. *Tab. Syr.* p. 94; Schulten's *Index lad. s. v. Sjiblia*), after having been the seat of a bishop, fell under Moslem rule. The name of the modern town is *Jubeil*, which is enclosed by a wall of about a mile and a half in circuit, apparently of the time of the Crusades. (Pococke, *Exped. Euphrat.* vol. i. p. 453.) Extensive remains of an ancient Roman theatre are still visible, and is nearly perfect, with its concentric passages divided by their "praecinctiones," which are quite distinguishable. (Thomson, *Bibl. Res.* v. p. 259.) Many fragments of fine granite columns are lying about. (Burkhardt, *Travels*.) Byblus was the birthplace of Philon, who translated Sanchuniathon into Greek. The coins of Byblus have frequently the type of Astarte; and Adonis came here in search of the body of Osiris. (Eckhel, vol. iii. p. 359.)

(Winer, *Real Wörtbuch, s.v.*; Rosenmüller, *Alt.* vol. ii. pt. 1, p. 17; *Mém. de l'Acad.* vol. xxxiv. p. 252.)

BYBLOS (Βύβλος, Steph. B. *s. v.*; *Phot. Bibl.* ed. Bekker, p. 33; *Et.* town of the Egyptian Delta, supposed to be the modern *Babel*. Byblos was seated in a marsh, and, as its name imports, was in the district where the Byblus or Papyrus plant grew. The papyrus of Linnaeus, the Cyperus Antiquorum of recent botanists—grew in abundance in Egypt, and the byblus furnished a coarse article of which the Greeks ridiculed the Egyptians. (Aeschyl. *Suppl.* 768.) Its leaves were manufactured into sandals and girdles for the inferior order of Egyptian priests, and into sails for the Nile-barges (Theophr. *Hist.* while its fibres and pellicles were written on. celebrated papyrus, which, until it was by cotton paper or parchment about century A. D., formed a principal article of export, and the writing material of the world. Pliny (xiii. 11. s. 12) has left a description of the manufacture, and (*Epist.* xi. 38) a pompous panegyric on the or Byblus plant. Its history is also given by Prosper Alpinus, in his work "De Aegyptiorum."

BYCE, BYCES. [BUCE.]

BYLAZO'RA (Βυλάζωρα: *Veles*) the greatest city of Paeonia in Macedonia situated on the Upper Axius, and near the road leading from the country of the Dardani to Thessalonica (Pol. v. 97; Liv. xliv. 26; Leake, *N* vol. iii. p. 470.) It was a different residence of the Paeonian kings on the [ASTYCUS.]

This province contained Byzacium, on the E. coast, on the Lesser Syrtis, and W. gion which originally belonged bounded on the E. by the sser Syrtis; on the N. it was a by a line nearly coinciding 36° N. lat.; on the W. from ch of the Bagradas; on the by the river Triton; while on eserts about the basin of the d a natural boundary. The ndefinite in a general descrip- be determined with tolerable of places in the early eccle- ch mention no less than 115 rovince in the fifth century. öcking, *N. D.* vol. ii. pp. 615, hief cities were, on the S. the Lesser Syrtis, THENAE, LEPTIS MINOR, RUSPINA, the capital; and, in the in- terior, ASSURAE, TUCCA TEREBINTHINA, SUFE- TULA, THYSDRUS, CAPSA, besides THELEPTE, and THEVESTE, which, according to the older division, belonged to NUMIDIA. [P. S.]

BYZANTES. [BYZACIUM.]

BYZA'NTIUM. [CONSTANTINOPOLIS.]

BYZE'RES (Βύζηρες), a nation in Pontus. Stephanus (*s. v.*), who mentions the Byzeres, adds that there is a Βυζηρικὸς λιμήν, whence we might infer that the Byzeres were on the coast, or at least possessed a place on the coast. Strabo (p. 549) mentions several savage tribes which occupied the interior above Trapezus and Pharnacia—the Tibareni, the Cheldaei, the Sanni who were once called Macrones, and others. He adds, that some of these barbarians were called Byzeres; but he does not say, as some interpret his words, that these Byzeres were the same as the Heptacometae. Dionysius (*Perieg.* 765) mentions the Byzeres in the same verse with the Becheires or Bechiri. The name of the people must have been well known as it occurs in Mela (i. 19), and in Pliny (vi. 3); but there are no means of fixing their position more precisely than Strabo has done. [G. L.]

C

CA'BALEIS. [CABALIS.]

CA'BALIS (Καβαλίς, Καβαλλίς, Καβαλία: *Eth.* Καβαλεύς, Καβάλιοι), a people of Asia Minor. Herodotus (iii. 90) mentions the Cabalii in the same nome (the second) with the Mysi, Lydi, Lasonii, and Hygenneis. He places the Milyeis in the first nome with the Lycians, Carians, and others. In another passage (vii. 77) he speaks of "Cabelees the Maeonians" (Καβηλέες οἱ Μηίονες), and says that they are called Lasonii. Nothing can be got from these two passages. Strabo (p. 629) speaks of the Cibyratis and Caballis: in another place (p. 631) he says that the Cibyratae are said to be descendants of those Lydians who occupied the Caballis; and again, "they say that the Cabaleis were Solymi." Strabo admits the difficulty of giving an exact account of this and some other parts of Asia, partly owing to the Romans not making their political divisions according to peoples, but adopting a different principle in determining their Conventus Juridici. Pliny (v. 27) places Cabalia in the interior of Lycia, and names its three cities Oenoanda, Balbura, and Bubon; and Ptolemy (v. 3) assigns the same three cities to Carbalia, which manifestly ought to be Cabalia. We thus obtain in a general way the position of Cabalia or Cabalis, if we can ascertain the sites of these cities, and they have been determined of late years [BALBURA; BUBON; OENOANDA]. The map which accompanies Spratt's *Lycia* places Balbura not far below the source of the Indus of Lycia, Bubon not far from the source of the Xanthus, and Oenoanda lower down on the same river. But Ptolemy has also Carbalia, that is Cabalia, in Pamphylia (v. 5), to which he assigns many towns—Cretopolis, Termessus, and even a town Milyas; and Pliny again (v. 32) makes a part of Galatia border on the Cabalia of Pamphylia. Stephanus mentions only a city Cabalis; though he quotes Strabo who, indeed, speaks of "Cibyra the great, Sinda, and Caballis," and perhaps he means to say that there is a city Caballia. From all this confusion we can now extract the fact that there were three cities at least, which have been enume-

Digitized by Google

rated above, in the Cabalis or Cabalia; and we can make Strabo agree with Pliny and Ptolemy, by supposing that these three cities (Balbura, Bubon, and Oenoanda) which Strabo mentions, belonged to his territory Caballis, though he does not say that they did. The connection of Cibyra with the towns of the Cabalis is explained under CIBYRA. [G. L.]

CA'BASA (Κάβασα, Ptol. iv. 5. § 48; Plin. v. 9, s. 9; Hierocles, p. 724; Κάβασσα, Conc. Ephes. p. 531, and Καύασσα), in the Delta of Egypt, the modern *Khabas*, was the principal town of the nome Cabasites. It was seated a little to the north of Sais and Naucratis. Remains of the ancient Cabasa are believed to exist at *Koum-Farā'un*, and in this district the names of several villages, e. g. *Khabās-el-Meh*, *Khabās-omar*, *Koum-Khabās* — recall the Coptic appellation of the capital of the Cabasite nome. D'Anville (*Egypte*, p. 75) and Champollion (ii. p. 234) ascribe to the castle of *Khabas* the site of the original Cabasa. [W. B. D.]

CABASSUS (Καβασσός, or Καβησσός: *Eth.* Καβήσσιος, Καβησσίτης). According to Apion, quoted by Stephanus, a village of Cappadocia between Tarsus and Mazaca; not the Cabessus of Homer (*Il.* xiii. 363), certainly. Ptolemy places it in Cataonia. [G. L.]

CABE'LLIO (Καβαλλίων, Strab. p. 179: *Eth.* Καβελλιωνήσιος, Καβελλιωνίτης: *Cavaillon*), a town in Gaul, on the Druentia (*Durance*), and on a line of road between Vapincum (*Gap*) and Arelate (*Arles*). Stephanus (*s. v.* Καβελλίων), on the authority of the geographer Artemidorus, makes it a Massaliot foundation. Walckenaer (*Géog. &c.* vol. i. p. 187) says that M. Calvet has proved, in a learned dissertation, that there was a company of Utricularii (boatmen, ferrymen) at Cabellio, for the crossing of the river. Such a company or corpus existed at Arelate and elsewhere. Cabellio was a city of the Cavares, who were on the east bank of the Rhone. Pliny calls it an Oppidum Latinum (iii. 4), and Ptolemy a Colonia. It was a town of some note, and many architectural fragments have been found in the soil. The only thing that remains standing is a fragment of a triumphal arch, the lower part of which is buried in the earth. In the Notitia of the Gallic Provinces "civitas Cabellicorum" is included in Viennensis. [G. L.]

COIN OF CABELLIO.

CABILLO'NUM or CABALLI'NUM, with other varieties. Coins of this place, with the epigraph Caballo, are mentioned. Strabo (p. 192) has Καβυλλῖνον (*Eth.* Cabellinensis: *Châlon-sur-Saône*), a town of the Aedui, on the west bank of the Arar (*Saône*), which in Caesar's time (*B. G.* vii. 42) was a place which Roman negotiators visited or resided at. At the close of the campaign against Vercingetorix (B. C. 52), Q. Cicero, the brother of the orator, wintered here. The Antonine Itin. places it 33 M. P. or 22 Gallic leagues from *Autun*. Ammianus (xv. 11) mentions this place, under the name Cabillonus, as one of the chief places of Lugdunensis Prima; and from the Notitia Imp. it appears that the Romans kept a fleet of some description here. [G. L.]

CABIRA (τὰ Κάβειρα), a place in Pontus, at the base of the range of Paryadres, abou south of Eupatoria or Magnopolis, which junction of the Iris and the Lycus E in the midst of the plain, but Cabira, as (p. 556), at the base of the mountain ran dres. Mithridates the Great built a pala and there was a water-mill there (ὑδρα places for keeping wild animals, hunti and mines. Less than 200 stadia from the remarkable rock or fortress cal (Καινόν), where Mithridates kept his m things. Cn. Pompeius took the place sures, which, when Strabo wrote, were i Capitol. In Strabo's time a woman, Py widow of King Polemo, had Cabir Zelitis and Magnopolitis. Pompeius a city, and gave it the name Diopolis. enlarged it, and gave it the name Sebas equivalent to Augusta; and she used it residence. Near Cabira probably (for Strabo is a little uncertain, and not Groskurd, transl. vol. ii. p. 491, note) named Ameria, there was a temple w number of slaves belonging to it, and th enjoyed this benefice. The god Men Ph worshipped at Cabira. Mithridates w during the winter that L. Lucullus w Amisus and Eupatoria. (Appian, *Mit* Lucullus afterwards took Cabira. (Pl *cullus*, c. 18.) There are some auton of Cabira with the epigraph Καβηρων.

Strabo, a native of Amasia, could n quainted with the site of Cabira. Th that corresponds to his description is the right bank of the Lycus, nearly 27 the junction of the Iris and the Lycus. is the representative of Neocaesarea, a first occurs in Pliny (vi. 3), who says the Lycus. There is no trace of any between *Niksar* and the junction of th and the conclusion that *Niksar* is a l Cabira, and a name more recent than S certain. (Hamilton's *Researches*, &c. v Pliny, indeed, mentions both Sebast bastopolis in Colopena, a district of Ca nothing certain can be inferred from th sarea seems to have arisen under the emperors. Cramer (*Asia Minor*, vo states that the earliest coins of Neoc the effigy of Tiberius; but Sestini, qu biger (*Geog.* vol. ii. p. 428), assigns t Neocaesarea to the time of Nero, abo when Pontus Polemoniacus was ma province. The simplest solution of thi that Neocaesarea was a new town, whi near the site of Cabira. It was th Pontus Polemoniacus, the birth-place Thaumaturgus, and the place of assembl in A. D. 314. Ammianus Marcellinus calls it the most noted city of Pon niacus: it was, in fact, the metropolis. to Paulus Diaconus the place was dest earthquake.

Cramer supposes that Neocaesarea with Ameria, and he adds that Neoc "the principal seat of pagan idolatry stitions, which affords another presump had risen on the foundation of Ame worship of Men Pharnaces." But Ame have been at or near Cabira; and all di reconciled by supposing that Cabira, A

TRIANAE. [Ortospana.]

'ALYBE (Καβύλη, Καλύβη), a of Thrace, west of Develtus, on It was colonised by Philip with ns, and afterwards taken by M. e *Cherson.* p. 60; Pol. xiii. 10; Ptol. iii. 11. § 12; Eutrop. vi. 8; ; Plin. iv. 18; Steph. B. *s. v.*) the same as the town of Goloë Comnena (x. pp. 274, 281), and d with the modern *Golewitza* or [L. S.]

αχάλης), a river of Phocis, ri- ns, and flowing by Tithorea into is. x. 32. § 11; Leake, *Northern* '8, 81.)

Καικύναρις), a river on the E. tioned only by Thucydides (vii. at of the Athenians from Syra- e learn that it was the first river roceeding along the coast road d had a course of some length, ssage up its valley into the in- lled the *Cassibili*, a considerable s near *Palazzolo* (the ancient miles from the sea, and flows ley. It is distant, by the road *to*, 9 miles from the bridge over [E. H. B.]

κυρον: *Eth.* Cacyrinus), a town only by Pliny and Ptolemy, who position. But it is supposed by esented by the modern *Cassaro*, *Palazzolo*, the ancient Acrae. Ptol. iii. 4. § 14; Cluver. *Sicil.* [E. H. B.]

Κάδηνα), a place in Cappa- Strabo (p. 537) as the royal nas, who in the time of Strabo vereignty of the Cappadocians. , though D'Anville fixed it at *ia Minor*, vol. ii. p. 132) writes and adds that Strabo seems to he borders of Lycaonia; but see ansl. Strab. vol. ii. p. 452) on [G. L.]

Eth. Καδηνός), a city of Mysia nus (*s. v.* Κάδοι). Strabo (p. with Azani as a city of Phrygia Epictetus, but he adds that some assign it to Mysia Cadi is south of Azani, or *Tchavdour-Hissar*, and a traveller going from Azani to Cadi crosses the water-shed between the basin of the Rhyndacus and the basin of the Hermus. A town now called *Kedus* or *Ghiediz*, stands on a small stream, the *Ghiediz Chai*, which flows into the Hermus; but it is not the chief branch of the Hermus, though the Turks give the name of *Ghiediz Chai* to the Hermus nearer the sea. Hamilton says (*Researches*, &c., vol. i. p. 108) that hardly any ancient remains exist at *Ghiediz*, a place which he visited, but he heard of remains at a place higher up the Hermus, named *Ghieukler*, near the foot of *Morad Dagh*, Mons Dindymene, which contains the source of the Hermus. The coins of Cadi have not the Ethnic name Καδηνων, as Stephanus gives it, but Καδοηνων. The river Hermus is represented on them, but this will not prove, as Hamilton correctly observes, that the *Ghiediz Chai* is the Hermus, but only that Cadi was not far from the Hermus. Cadi may be the place which Propertius (iv. 6, 8) calls "Mygdonii Cadi." It was afterwards an episcopal see. [G. L.]

CADISTUS, a mountain of Crete, belonging to the ridge of the White Mountains. Its position has been fixed by Hoeck (*Kreta*, vol. i. p. 380) at *Cape Spádha*, the most northerly point of the whole island. In Ptolemy (iii. 17. § 8) this promontory bears the name of Ψάκον ἄκρον; while Strabo (x. p. 484) calls it Δικτύννειον ἀκρωτήριον, and his remark that Melos lay at nearly the same distance from it as from the Scyllaean promontory, shows that he indicated this as the most northerly point of the island. The mass of mountain of which the cape was composed bore the double name of Cadistus and Dictynnaeus. (Plin. iv. 12. s. 20; Solin. 16.) It would seem that Pliny and Solinus were in error when they described Cadistus and Dictynnaeus as two separate peaks. Ψάκον ἄκρον and Cadistus were the original and proper names of the promontory and mountain, while Δικτύννειον ἀκρότηριον and ὄρος were epithets afterwards given, and derived from the worship and temple of Dictynna. [E. B. J.]

CADMEIA. [Thebae.]

CADMUS (Κάδμος), a mountain of Phrygia Magna (Strab. p. 578), which the Turks call *Baba Dagh*: the sides are well wooded. A river Cadmus flowed from the mountain, probably the *Gieuk Bonar*, which flows into the Lycus, a tributary of the Maeander. (Hamilton, *Researches*, &c., vol. i. p. 513.) The range of Cadmus forms the southern boundary of the basin of the Maeander in these parts. Pliny's remark about it (v. 29) does not help us. Ptolemy (v. 2) puts it in the latitude of Mycale, which is tolerably correct. [G. L.]

CADRA, in Cappadocia, an eminence on Taurus, which Tacitus (*Ann.* vi. 41) mentions with Davara, another strong place, which the Clitae occupied when they resisted Roman taxation. M. Trebellius compelled them to surrender. [G. L.]

CA'DREMA (Κάδρεμα: *Eth.* Καδρεμεύς), a city of Lycia, a colony of Olbia: the word is interpreted to mean "the parching of corn" (Steph. *s. v.* Κάδρεμα). It is conjectured (Spratt's *Lycia*, vol. i. p. 218) that the ruins at *Gormak*, at the extremity of the territory of Olbia [Attalkia] may be Cadrema. [G. L.]

CADRUSI (Plin. vi. 23. s. 25), a district on the Indian Caucasus or Paropamisus, in which was situated the Alexandreia founded by Alexander the Great on his march into Bactria. (Arrian, iii. 28,

Digitized by Google

iv. 22.) Solinus (c. 54) appears to have misunderstood the words of Pliny, and to have inferred that there was a city there called Cadrusia; for which, however, there is no authority. [V.]

CADURCI (Καδούρκοι), a Celtic people who occupied the basin of the Oltis (*Lot*), a branch of the *Garonne*, and lay between the Nitiobriges and Ruteni; on the north they bordered on the Arverni. The Cadurci were among the first who joined Vercingetorix (B. C. 52) in his rising against Caesar, and they took an active part in the war (*B. G.* vii. 4, 64). They are enumerated by Caesar with the Gabali and Velauni or Vellavi (*B. G.* vii. 75), as accustomed to admit the supremacy of the Arverni over them. In Caesar's text (vii. 75) they are called Eleutheri Cadurci; but the reading Eleutheri is doubtful (Oudendorp. ed. Caesar), and the name has never been satisfactorily explained. The chief town of the Cadurci was Divona, afterwards Civitas Cadurcorum, now *Cahors*. Uxellodunum, which was besieged and taken by Caesar (*B. G.* viii. 32, &c.), was also a town of the Cadurci. The territory of the Cadurci became Cadurcinum in the Latin middle age writers, which was corrupted into *Cahorsin* or *Caorsin*, whence the name *Querci*, in the ante-revolutionary geography of France. The territory of the Cadurci is supposed to have been co-extensive with the bishopric of *Cahors*.

The Cadurci wove linen cloth. (Strab. p. 191, Pli xix. 1; and Forcellini, *s. v. Cadurcum.*) [G. J

CADU'SII (Καδούσιοι, Strab. xi. pp. 506, 510, 525; Pol. v. 44; Ptol. vi. 2. § 5; Steph Arrian. *An* iii. 19; Mela, i. 2. § 48; Plin. vi. 13. a people inhabiting a mountainous district of Atropatene, on SW. shores of the Caspian tween the parallels of 39° and 37° N. l district was probably bounded on the N. by (*Kúr*), and on the S. by the Mardus (*Sefid Rúd*), and corresponds with the trict of Gilan. They are described p. 525) as a warlike tribe of mounta chiefly on foot, and well skilled in short spear or javelin. They app constantly at war with their neigh dorus (i. 33) speaks of a war be Medians, which was not comp Cyrus transferred the empire they are constantly mentio Eastern wars as the allies (Xen. *Hell.* ii. 1. § 13; D Pol. v. 79; Liv. xxxv. 4 that the name of Gelae, associated with them, b dern *Gilán*.

this as freely granted, in consideration
st services; but Dion Cassius informs us
as purchased at the price of half their
(Liv. vii. 20; Dion Cass. fr. 33. Bekk.)
bable that it was on this occasion also that
eived the Roman franchise, but without the
f suffrage. This peculiar relation was
in later times as the *Caerite franchise*, so
in tabulas Caeritum referre," became a pro-
l expression for disfranchising a Roman citizen
. *Ep.* i. 6, 62; and Schol. *ad loc.*), and we
expressly told that the Caerites were the *first*
were admitted on these terms. (Gell. xvi. 13.
7.) But it is strangely represented as in their
se a privilege granted them for their services at
he time of the Gaulish war (Strab. v. p. 220; Gell.
. *c.*), though it is evident that the relation could
never have been an advantageous one, and was cer-
tainly in many other cases rather inflicted as a punish-
ment, than bestowed as a reward. Hence it is far
more probable, that instead of being conferred on
the Caerites as a privilege immediately after the
Gallic War, it was one of the conditions of the
disadvantageous peace imposed on them in B.C. 353,
as a punishment for their support to the Tarqui-
nians. (See on this subject, Niebuhr, vol. ii.
p. 67, vol. iii. p. 185; Madvig. *de Colon.* p. 240;
Mommsen, *Die Römische Tribus*, pp. 160, 161;
Das Römische Münzwesen, p. 246.) It is uncer-
tain whether the Caerites afterwards obtained the
full franchise; we are expressly told that they were
reduced to the condition of a Praefecture (Fest. *s.v.*
praefecturae); but during the Second Punic War
they were one of the Etruscan cities which were
forward to furnish supplies to the armament of
Scipio (Liv. xxviii. 45), and it may hence be in-
ferred that at that period they still retained their
nominal existence as a separate community. Their
relations to Rome had probably been adjusted at the
same period with those of the rest of Etruria, con-
cerning which we are almost wholly without in-
formation. During the latter period of the Republic
it appears to have fallen into decay, and Strabo
speaks of it as having, in his time, sunk into com-
plete insignificance, preserving only the vestiges of
its former greatness; so that the adjoining watering
place of the Aquae Caeretanae actually surpassed
the ancient city in population. (Strab. v. p. 220.)
It appears, however, to have in some measure re-
vived under the Roman empire. Inscriptions and
other monuments attest its continued existence
during that period as a flourishing municipal town,
from the reign of Augustus to that of Trajan.
(Gruter, *Inscr.* p. 214. 1, 226. 4, 236. 4, 239. 9;
Bull. d'Inst. Arch. 1840, pp. 5—8; Nibby, *Din-
torni di Roma*, vol. i. p. 342—345.) Its territory
was fertile, especially in wine, which Martial praises
as not inferior to that of Setia. (Mart. xiii. 124;
Colum. *R. R.* iii. 3. § 3.) In the fourth century
it became the see of a bishop, and still retained
its existence under its ancient name through the
early part of the middle ages; but at the beginning
of the thirteenth century, great part of the inhabit-
ants removed to another site about 3 miles off, to
which they transferred the name of Caere or *Ceri*,
while the old town came to be called *Caere Vetus*,
or *Cervetri*, by which appellation it is still known.
(Nibby, *l. c.* p. 347.)

The modern village of *Cervetri* (a very p
place) occupies a small detached eminence
without the line of the ancient walls. The o

priesthood, which subsisted down to a late period, so that we find the "Sacerdotium Caeninense" mentioned in inscriptions of Imperial date. (Orell. *Inscr.* 2180, 2181, and others there cited.) Pliny enumerates Caenina among the celebrated towns (*clara oppida*) of Latium which had in his time completely disappeared; thus confirming the testimony of Dionysius to its Latin origin. Diodorus also reckons it one of the colonies of Alba, supposed to be founded by Latinus Silvius. (Diod. vii. *ap. Euseb. Arm.* p. 185.) Plutarch, on the contrary, and Stephanus of Byzantium, call it a Sabine town. (Plut. *l. c.*; Steph. B. *s. v.*) It is probable that it was in fact one of the towns of Latium bordering on the Sabines; and this is all that we know of its situation. Nibby supposes it to have occupied a hill 10 miles from Rome, on the banks of a stream called the *Magliano*, and 2 miles SE. of *Monte Gentile*, which is a plausible conjecture, but nothing more. (Nibby, *Dintorni di Roma*, vol. i. pp. 332—335; Abeken, *Mittel-Italien*, p. 79.) [E. H. B.]

CAENO (Καινώ, Diod. v. 76), a city of Crete, which, according to the legend of the purification of Apollo by Carmanor at Tarrha, is supposed to have existed in the neighbourhood of that place and Elyrus. (Comp. Paus.) The Cretan goddess Britomartis was the daughter of Zeus and Carma, granddaughter of Carmanor, and was said to have been born at Caeno. (Diod. *l. c.*) Mr. Pashley (*Trav.* vol. ii. p. 270) fixes the site either on the so-called refuge of the Hellenes, or near *Hághios Nikólaos*, and supposes that Mt. Carma, mentioned by Pliny (xxi. 14), was in the neighbourhood of this town. (Comp. Hoeck, *Kreta*, vol. i. p. 392.) [E. B. J.]

CAENUS. [Caenicenses.]

CAENYS (ἡ Καίνυς), a promontory on the coast of Bruttium, which is described by Strabo as near the Scyllaean rock, and the extreme point of Italy opposite to the Pelorian promontory in Sicily, the Strait of Messana lying between the two. (Strab. vi. p. 257.) There can be little doubt that the point thus designated is that now called the *Punta del Pezzo*, which is the marked angle from whence the coast trends abruptly to the southward, and is the only point that can be properly called a headland. (Cluver. *Ital.* p. 1294; D'Anville, *Anal. Géogr. de l'Italie*, p. 259.) Some writers, however, contend that the *Torre del Cavallo* must be the point meant by Strabo, because it is that most immediately opposite to the headland of Pelorias, and where the strait is really the narrowest. (Holsten. *Not. in Clur.* p. 301; Rommelli, vol. i. p. 81.) This last fact is, however, doubtful, and at all events might be easily mistaken. Strabo reckons the breadth of the strait in its narrowest part at a little more than six stadia; while Pliny calls the interval between the two promontories, Caenys in Italy, and Pelorus in Sicily, 12 stadia; a statement which accords with that of Polybius. (Strab. *l. c.*; Plin. iii. 5. s. 10; Pol. i. 42.) All these statements are much below the truth; the real distance, as measured trigonometrically by Capt. Smyth, is not less than 3,971 yards from the *Punta del Pezzo* to the village of *Ganziri* immediately opposite to it on the Sicilian coast. (Smyth's *Sicily*, p. 108.) Hence the statement of Thucydides (vi. 1), who estimates the breadth of the strait at its narrowest point at 20 stadia (4,047 yards), is surprisingly accurate. [E. H. B.]

CAEPIO'NIS TURRIS or MONUMENTUM (Καπίωνος πύργος: *Cipiona*), a great lighthouse, built on a rock surrounded by the sea, of the river Baetis (*Guadalquivir*) Baetica (Strab. iii. p. 140; Mela, iii. read *Geryonis*, and identify the tower *rontis* or *Gerygonis arx* of Avienus, *Or* see Wernsdorf, *ad loc.*) Most comm the name from Servilius Caepio, the Lusitania; but others, ascribing to th Phoenician origin, regard the name a *of Cap Eon*, i. e. *Rock of the Sun.* *book of Spain*, p. 20.)

CAERATUS (Καίρατος: *Karte* Crete, which flows past Cnossus, w once known by the same name as the x. p. 476; Eustath. *ad Dionys. P* Hesych.; Virg. *Ciris*, 113, flumina C Pashley, *Trav.* vol. i. p. 263.)

CAERE (Καῖρε, Ptol.; Καιρέα, Str Dionys.: *Eth.* Καιρετανός, Caerets people are usually called Caerites), Greeks Agylla (Ἀγυλλα: *Eth.* 'A ancient and powerful city of Sou situated a few miles from the coas rrhenian Sea, on a small stream now *cina*, anciently known as the "Caer (Plin. iii. 5. s. 8; *Caeritis amnis*, V 59.) Its territory bordered on that E. and of Tarquinii on the N.; the about 27 miles distant from Rome. marked by the village of *Cervetri* writers agree in ascribing the foundat to the Pelasgians, by whom it was the appellation by which it continu to the Greeks down to a late period. and Dionysius derive these Pelasgians according to a view of the migration races, very generally adopted amon The same authorities assert distinc not till its conquest by the Tyrr Strabo calls Lydians), that it obtain Caere; which was derived, accordin related by Strabo from the Greek wo which the inhabitants saluted the in v. p. 220; Dionys. i. 20., iii. 58; viii. 597; Plin. iii. 5. s. 8.) We clearest evidence of the two element population of Etruria was compos seems no reason to doubt the histor of the fact, that Caere was origin or Tyrrhenian city, and was afterw by the Etruscans or Tuscans (call the Greeks *Tyrrhenians*) from th existence of its double name is in confirmation of this fact; and the cir Agylla, like Spina on the Adriatic, of its own at Delphi, is an addition Pelasgic origin (Strab. *l. c.*).

The period at which Caere fell in the Etruscans cannot be determine approach to certainty. Niebuhr has the narrative of Herodotus that were still an independent Pelasgic not yet been conquered by the Et time when they waged war with th Alalia, about B. C. 535. But it s reconcile this with other notices of E or refer the conquest to so late a probable that Agylla retained much habits and connexions long after t the use of the Pelasgic name Agylla as it continued to be exclusively

ever, easily reduced to submission,
peace for a hundred years. Livy
represents this as freely granted, in consideration of their past services; but Dion Cassius informs us that it was purchased at the price of half their territory. (Liv. vii. 20; Dion Cass. fr. 33. Bekk.) It is probable that it was on this occasion also that they received the Roman franchise, but without the right of suffrage. This peculiar relation was known in later times as the *Caerite franchise*, so that "in tabulas Caeritum referre," became a proverbial expression for disfranchising a Roman citizen (Hor. *Ep.* i. 6, 62; and Schol. *ad loc.*), and we are expressly told that the Caerites were the *first* who were admitted on these terms. (Gell. xvi. 13. § 7.) But it is strangely represented as in their case a privilege granted them for their services at the time of the Gaulish war (Strab. v. p. 220; Gell. *l. c.*), though it is evident that the relation could never have been an advantageous one, and was certainly in many other cases rather inflicted as a punishment, than bestowed as a reward. Hence it is far more probable, that instead of being conferred on the Caerites as a privilege immediately after the Gallic War, it was one of the conditions of the disadvantageous peace imposed on them in B. C. 353, as a punishment for their support to the Tarquinians. (See on this subject, Niebuhr, vol. ii. p. 67, vol. iii. p. 185; Madvig. *de Colon.* p. 240; Mommsen, *Die Römische Tribus*, pp. 160, 161; *Das Römische Münzwesen*, p. 246.) It is uncertain whether the Caerites afterwards obtained the full franchise; we are expressly told that they were reduced to the condition of a Praefecture (Fest. *s. v. praefecturae*); but during the Second Punic War they were one of the Etruscan cities which were forward to furnish supplies to the armament of Scipio (Liv. xxviii. 45), and it may hence be inferred that at that period they still retained their nominal existence as a separate community. Their relations to Rome had probably been adjusted at the same period with those of the rest of Etruria, concerning which we are almost wholly without information. During the latter period of the Republic it appears to have fallen into decay, and Strabo speaks of it as having, in his time, sunk into complete insignificance, preserving only the vestiges of its former greatness; so that the adjoining watering place of the Aquae Caeretanae actually surpassed the ancient city in population. (Strab. v. p. 220.) It appears, however, to have in some measure revived under the Roman empire. Inscriptions and other monuments attest its continued existence during that period as a flourishing municipal town, from the reign of Augustus to that of Trajan. (Gruter, *Inscr.* p. 214. 1, 226. 4, 236. 4, 239. 9; *Bull. d'Inst. Arch.* 1840, pp. 5—8; Nibby, *Dintorni di Roma*, vol. i. p. 342—345.) Its territory was fertile, especially in wine, which Martial praises as not inferior to that of Setia. (Mart. xiii. 124; Colum. *R. R.* iii. 3. § 3.) In the fourth century it became the see of a bishop, and still retained its existence under its ancient name through the early part of the middle ages; but at the beginning of the thirteenth century, great part of the inhabitants removed to another site about 3 miles off, to which they transferred the name of Caere or *Ceri*, while the old town came to be called *Caere Vetus*, or *Cervetri*, by which appellation it is still known. (Nibby, *l. c.* p. 347.)

The modern village of *Cervetri* (a very poor place) occupies a small detached eminence just without the line of the ancient walls. The outline

Digitized by Google

of the ancient city is clearly marked, not so much by the remains of the walls, of which only a few fragments are visible, as by the natural character of the ground. It occupied a table-land, rising in steep cliffs above the plain of the coast, except at the NE. corner, where it was united by a neck to the high land adjoining. On its south side flowed the Caeretanus amnis (the *Vaccina*), and on the N. was a narrow ravine or glen, on the opposite side of which rises a hill called the *Banditaccia*, the Necropolis of the ancient city. The latter appears to have been from four to five miles in circuit, and had not less than eight gates, the situation of which may be distinctly traced; but only small portions and foundations of the walls are visible; they were built of rectangular blocks of tufa, not of massive dimensions, but resembling those of Veii and Tarquinii in their size and arrangement.

The most interesting remains of Caere, however, are to be found in its sepulchres. These are, in many cases, sunk in the level surface of the ground, and surmounted with tumuli; in others, they are hollowed out in the sides of the low cliffs which bound the hill of the *Banditaccia*, and skirt the ravines on each side of it. None of them have any architectural façades, as at *Bieda* and *Castel d'Asso*; their decoration is chiefly internal; and their arrangements present a remarkable analogy to that of the houses of the Etruscans. "Many of them had a large central chamber, with others of smaller size opening upon it, lighted by windows in the wall of rock, which served as the partition. This central chamber represented the *atrium* of Etruscan houses, and the chambers around it the *triclinia*, for each had a bench of rock round three of its sides, on which the dead had lain, reclining in effigy, as at a banquet. The ceilings of all the chambers had the usual beams and rafters hewn in the rock." (Dennis's *Etruria*, vol. ii. p. 32.) One tomb, called from its discoverer the Regulini-Galassi tomb, is entered by a door in the form of a rudely pointed arch, not unlike the gateway at Arpinum (see p. 222), and like that formed by successive courses of stones gradually approaching till they meet. Some of the tombs also have their interior walls adorned with paintings, resembling those at Tarquinii, but greatly inferior to them in variety and interest. Most of these are of comparatively late date, — certainly not prior to the Roman dominion, — but one tomb is said to contain paintings of a very archaic character, probably more ancient than any at Tarquinii. This is the more interesting, because Pliny speaks of very ancient paintings, believed to be of a date prior to the foundation of Rome, as existing in his time at Caere. (Plin. xxxv. 3. s. 6.) Another tomb, recently discovered at *Cervetri*, is curious from its having been the sepulchre of a family bearing the name of Tarquinius, the Etruscan form of which (Tarchnas) is repeated many times in different inscriptions, while others present it in the Roman form and characters. There seems every reason to believe that this family, if not actually that of the regal Tarquins of Rome, was at least closely connected with them. (Dennis, *l. c.* p. 42—44; *Bull. d'Inst. Arch.* 1847, p. 56—61.)

The minor objects found in the sepulchres at Caere, especially those discovered in the Regulini Galassi tomb already mentioned, are of much interest, and remarkable for the very ancient character and style of their workmanship. The painted vases and other pottery have, for the similar archaic stamp, very few of vases of the Greek style so abundant Tarquinii having been found here. vessels of black earthenware, in them insignificant, have acquired a high the circumstance of their bearing inscri there is much reason to believe to be Pelasgian language, as distinguished is more properly called Etruscan. (D 54, 55; Lepsius, in the *Annali d'Inst* pp. 186—203; Id. *Tyrrhenische Pe* —42. For a fuller discussion of this article Etruria.)

There is no doubt that Caere, in th power, possessed a territory of consid bordering on those of Veii and Tarqu bably extending at one time nearly of the Tiber. Its seaport was Py considerable city, the foundation of w as that of Agylla, is expressly ascrib lasgians. CAESAREIA (Καισάρεια: *Eth.* Καισαρεύς). 1. (*Kaisariyeh*), a city of the district Cilicia in Cappadocia, at the base of the mountain Argaeus. It was originally called Mazaca, afterwards Eusebeia. (Steph. *s. v.* Καισάρεια, quoting Strab. p. 537.) The site in the volcanic country at the foot of Argaeus exposed the people to many inconveniences. It was, however, the residence of the kings of Cappadocia. Tigranes, the ally of Mithridates the Great, took the town (Strab. p. 539; Appian, *Mithrid.* c. 67), and carried off the people with other Cappadocians to his new town Tigranocerta; but some of them returned after the Romans took Tigranocerta. Strabo has a story that the people of Mazaca used the code of Charondas and kept a law-man (νομοφδός) to explain the law; his functions corresponded to those of a Roman jurisconsultus (νομικός). The Roman emperor Tiberius, after the death of Archelaus, made Cappadocia a Roman province, and changed the name of Mazaca to Caesareia (Eutrop. vii. 11; Suidas, *s. v.* Τιβέριος). The change of name was made after Strabo wrote his description of Cappadocia. The first writer who mentions Mazaca under the name of Caesareia is Pliny (vi. 3): the name Caesareia also occurs in Ptolemy. It was an important place under the later empire. In the reign of Valerian it was taken by Sapor, who put to death many thousands of the citizens; at this time it was said to have a population of 400,000 (*Zonar.* xii. p. 630). Justinian afterwards repaired the walls of Caesareia (Procop. *Aed.* v. 4). Caesareia was the metropolis of Cappadocia from the time of Tiberius; and in the later division of Cappadocia into Prima and Secunda, it was the metropolis of Cappadocia Prima. It was the birth-place of Basilius the Great, who became bishop of Caesareia, A. D. 370.

There are many ruins, and much rubbish of ancient constructions about *Kaisaryeh*. No coins with the epigraph Mazaca are known, but there are numerous medals with the epigraph Ευσεβεια, and Καισαρεια, and Καισ. προς Αργαιω.

Strabo, who is very particular in his description of the position of Mazaca, places it about 800 stadia from the Pontus, which must mean the province Pontus; somewhat less than twice this distance from the Euphrates, and six days' journey from the Pylae Ciliciae. He mentions a river Melas, about 40 stadia from the city, which flows into the Euphrates, which is manifestly a mistake [MELAS].

COIN OF CAESAREIA MAZACA.

2. Of Bithynia. Ptolemy (v. 1) gives it also the name Smyrdaleis, or Smyrdiane in the Cod. Palat., and in the old Latin version. Dion Chrysostom (Or. 47. p. 526, Reiske) mentions a small place of this name near Prusa. Stephanus (*s. v.* Καισάρεια) does not mention it, though he adds that there are other places of this name besides those which he mentions. The site is unknown.

There is a place now called *Kesri* or *Balikesri*, that is, Old Kesri, on the Caicus, near the great

road from *Smyrna* to *Constantinople*. The place was probably a Caesarea, but it is not within the limits of Bithynia. (Leake, *Asia Minor*, p. 271, and map.)

3. Ad Anazarbum. [Anazarbus.] [G.L.]

4. A maritime city of Palestine, founded by Herod the Great, and named Caesarea in honour of Caesar Augustus. Its site was formerly occupied by a town named Turris Stratonis, which, when enlarged and adorned with white marble palaces and other buildings, was not unworthy of the august name that was conferred upon it. Chief among its wonders was the harbour, constructed where before there had been only an open roadstead on a dangerous coast. It was in size equal to the renowned Peiraeeus, and was secured against the prevalent south-west winds by a mole or breakwater of massive construction, formed of blocks of stone of more than 50 feet in length, by 18 in width, and 9 in thickness, sunk in water 20 fathoms deep. It was 200 feet in length, one half of which was exposed to the violence of the waves. The remainder was adorned with towers at certain intervals, and laid out in vaults which formed hostelries for the sailors, in front of which was a terrace walk commanding a view of the whole harbour, and forming an agreeable promenade. The entrance to the harbour was on the north. The city constructed of polished stone encircled the harbour. It was furnished with an agora, a praetorium, and other public buildings; and conspicuous on a mound in the midst, rose a temple of Caesar, with statues of the emperor and of the imperial city. A rock-hewn theatre, and a spacious circus on the south of the harbour, commanding a fine sea view, completed the adornment of this pagan monument of Herod's temporising character, on which he had spent twelve years of zealous and uninterrupted exertion, and enormous sums of money. (Joseph. *Ant.* xv. 10. § 6, *B. J.* i. 21. §§ 5—7.)

These great works, but especially its commodious harbour, soon raised Caesareia to the dignity of a metropolis ("caput Palaestinae," Tacit. *Hist.* ii. 79), and it is so recognised, not only in the early annals of the Christian Church, but in the civil history of that period. It was the principal seat of government to the Roman praefects and to the titular kings of Judaea, and the chief part of its inhabitants were Syrians, although there was now a Jewish community found there, which had not been the case at an earlier period of its history as Strato's Tower. (*Ant.* xx. 7. §§ 7, 9.)

Its name underwent another change, and Pliny (v. 14) happily identifies the three names with the one site. "Stratonis turris, eadem Caesarea, ab Herode rege condita: nunc colonia prima Flavia, a Vespasiano Imperatore deducta." But it still retained its ancient name and title in the Ecclesiastical records, as the metropolitan see of the First Palestine; and was conspicuous for the constancy of its martyrs and confessors in the various persecutions of the Church, but especially in the last. (Euseb. *H. E.* viii. sub fin.) It is noted also as the see of the Father of Ecclesiastical History, and the principal seat of his valuable literary labours.

It was a place of considerable importance during the occupation of the Holy Land by the Crusaders, as one stronghold along the line of coast, and it shared the various fortunes of the combatants without materially affecting them.

This once famous site, principally interesting as the place where "the door of faith was to the Gentiles," is still marked by ext situated where Josephus would teach u them, halfway between Dora (*Tantura* (*Jaffa*),—retaining, in an Arabic forn name given it by Herod. The line of dry ditch of the Crusaders' town ma traced along their whole extent; but the was more extensive, and faint traces of be still recovered in parts. The ruins as a quarry for many generations, and and fortifications of *Jaffa*, *Acre*, *Sidon Beirout*, have been built or repaired wit this ancient site. Enough, however, still r test the fidelity of the Jewish historian, s its former magnificence, especially in the ments of its towers and the substructior over which may now be seen the prost of costly pillars of granite, porphyry, marbles, which once formed the porti raced walk. (See Traill's *Josephus*, vol. Conspicuous in the midst of the ruins, platform, are the substructions of the the Crusaders, which doubtless occupi the Pagan temple described by Joseph

CAIE'TA (Καίητη, Caietanus: *Gaëta*), a town of Latium on the coast of the Tyrrhenian Sea, between Tarracina and Formiae, celebrated for the excellence of its port. It was situated on a projecting headland or promontory which advances to some distance into the sea, opposite to the city of Formiae, and forms the northern extremity of the extensive bay anciently called the SINUS CAIETANUS, and still known as the *Golfo di Gaeta*. The remarkable headland on which it stood, with the subjacent port, could not fail to be noticed from very early times; and it was generally reported that Aeneas had touched there on his voyage to Latium, and that it derived its name from its being the burial-place of his nurse Caieta. (Virg. *Aen.* vii. 1; Ovid. *Met.* xiv. 443; Stat. *Silv.* i. 3. 87; Mart. v. 1. 5, x 30. 8; Solin. 2. § 13.) Another and perhaps an earlier legend connected it with the voyage of the Argonauts, and asserted the name to have been originally Αἰήτης, from Aeetes, the father of Medea. (Lycophr. *Alex.* 1274; Diod. iv. 56.) Strabo derives the name from a Laconian word, Καιέτας or Καιάτας, signifying a hollow, on account of the caverns which abounded in the neighbouring rocks (v. p. 233). Whatever be the origin of the name, the port seems to have been frequented from very early times, and continued to be a place of great trade in the days of Cicero, who calls it "portus celeberrimus et plenissimus navium;" from which very circumstance it was one of those that had been recently attacked and plundered by the Cilician pirates. (*Pro leg. Manil.* 12.) Florus also (i. 16) speaks of the noble ports of Caieta and Misenum; but the *town* of the name seems to have been an inconsiderable place, and it may be doubted whether it possessed separate municipal privileges, at least previous to the time of Antoninus Pius, who added new works on a great scale to its port, and appears to have much improved the town itself. (Capit. *Ant. Pius*, 8; the inscription cited by Pratilli, *Via Appia*, ii. 4, p. 144, in confirmation of this, is of doubtful authenticity.) It was not till after the destruction of Formiae by the Saracens in the 9th century that *Gaëta* rose to its present distinction, and became under the Normans one of the most considerable cities in the Neapolitan dominions.

The beautiful bay between Caieta and Formiae early became a favourite place of resort with the Romans, and was studded with numerous villas. The greater part of these were on its northern shore, near Formiae; but the whole distance from thence to Caieta (about 4 miles) was gradually occupied in this manner, and many splendid villas arose on the headland itself and the adjoining isthmus. Among others, we are told that Scipio Africanus and Laelius were in the habit of retiring there, and amusing their leisure with picking up shells on the beach. (Cic. *de Or.* ii. 6; Val. Max. viii. 8. 1.) Cicero repeatedly alludes to it as the port nearest to Formiae; it was here that he had a ship waiting ready for flight during the civil war of Caesar and Pompey B. C. 49, and it was here also that he landed immediately before his death, in order to take shelter in his Formian villa. Some late writers, indeed, say that he was put to death at Caieta; but this appears to arise merely from a confusion between that place and the neighbouring Formiae. (Cic. *ad Att.* i. 3, 4, viii. 3; Plut. *Cic.* 47; Appian, *B. C.* iv. 19, and Schweigh. *ad loc.*; Val. Max. i. 4. § 5; Senec. *Suasor.* 6.) At a later period the emperor Antoninus Pius had a villa here, where also the younger Faustina spent much of her time. (Capit. *Ant.*

Pius, 8, *M. Ant.* 19.) The ruins of their palace are said to be still known by the name of *Il Faustignano*. Besides these, there are extant at Gaëta the remains of a temple supposed to have been dedicated to Serapis, and those of an aqueduct. But the most interesting monument of antiquity remaining there is the sepulchre of L. Munatius Plancus, a circular structure much resembling the tomb of Caecilia Metella near Rome, which crowns the summit of one of the two rocky hills that constitute the headland of Gaëta, and is vulgarly known as the *Torre d'Orlando*. It is in excellent preservation, and retains its inscription uninjured. (Romanelli, vol. iii. p. 425; Hoare's *Classical Tour*, vol. i. pp. 125—127.) The inscription is given by Orelli (590). From extant vestiges it appears that a branch of the Appian Way quitted the main line of that road near Formiae, and led from thence to Caieta. [E. H. B.]

CAĪNAS (Καϊνάς: *Cane*), a navigable river of India intra Gangem, falling into the Ganges from the south, according to Arrian (*Ind.* 4) and Pliny (vi. 17. s. 21), though it really falls into the *Jumna*. [P. S.]

CALA'BRIA (Καλαβρία) was the name given by the Romans to the peninsula which forms the SE. promontory, or, as it has been frequently called, the *heel* of Italy, the same which was termed by the Greeks MESSAPIA or IAPYGIA. The use of these appellations seems indeed to have been sufficiently vague and fluctuating. But, on the whole, it may be remarked that the name of Iapygia, — which appears to have been the one first known among the Greeks, and probably in early times the only one, — was applied by them not only to the peninsula itself, but to the whole SE. portion of Italy, from the frontiers of Lucania to the promontory of Garganus, thus including the greater part of Apulia, as well as Calabria. (Scyl. § 14, p. 170; Pol. iii. 88.) Herodotus appears to have certainly considered Apulia as part of Iapygia (iv. 99), but has no distinguishing name for the peninsula itself. Neither he nor Thucydides ever use *Messapia* for the name of the country, but they both mention *the Messapians*, as a tribe or nation of the native inhabitants, to whom they apply the general name of Iapygians (Ἰήπυγες Μεσσάπιοι, Her. vii. 170; Thuc. vii. 33). Polybius and Strabo, on the contrary, use Messapia for the peninsula only, as distinguished from the adjoining countries; but the former reckons it a part of Iapygia, while the latter, who employs the Roman name of Apulia for the land of the Peucetians and Daunians, considers Iapygia and Messapia as synonymous. (Pol. iii. 88; Strab. vi. pp. 277, 282.) Antiochus of Syracuse also, as cited by Strabo (p. 279), as well as the pretended oracle introduced by him in his narrative, speaks of Iapygians as dwelling in the neighbourhood of Tarentum. At a later period we find the inhabitants of this district divided into two tribes; the SALLENTINI, who occupied the country near the Iapygian Promontory, and from thence along the southern coast of the peninsula towards Tarentum; and the CALABRI, who appear to have been certainly identical with the Messapians of the Greeks, and are mentioned by that name on the first occasion in which they appear in Roman history. (Fast. Capit. ap. Gruter. p. 297.) They inhabited the northern half and interior of the peninsula, extending to the confines of the Peucetians, and were evidently the most powerful of the two tribes, on which account the name of Calabria came to be gradually adopted by the Romans as the appellation of the whole district, in the same manner as Messapia was by the Greeks. This usage was established before the days of Augustus (Liv. xxiii. 34, xlii. 48; Mela, ii. 4; Strab. vi. p. 280; Hor. *Carm.* i. 31. 5.)

Calabria as thus defined was limited on the W. by a line drawn from sea to sea, beginning at the Gulf of Tarentum a little to the W. of Brundusium and stretching across the peninsula to the mouth of the Adriatic between Egnatia and Brundusium (Strab. vi. p. 277.) It thus comprised nearly the same extent with the modern province of *Terra di Otranto*. But the boundary, not being marked by any natural features, cannot be fixed with precision, and probably for administrative purposes varied at different times. Thus we find Venusia, including in the "Provincia Calabria" with the cities of the Peucetians which would, according to the above line of demarcation, belong to Apulia, appear, in fact, to have been commonly reckoned to Calabria (Lib. Colon. p. 261; and see APULIA, p. 208). The same remark applies to Pliny's list of the "populorum mediterranei" (iii. 11. s. 16), although it is indeed probable that the Calabri or Messapians originally extended further to the W. than the limit thus fixed by geographers. Strabo would have considered the isthmus (as he calls it) between Brundusium and Tarentum as much more distinctly marked by nature than it really is; for the breadth at 310 stadia, which is less than the distance between the two *cities*, but much more than the actual breadth, if measured in a direct line from sea to sea; which does not exceed 200 or 250 stadia. This is, however, but little more than to the average breadth of the province, which would indeed be more properly termed a great deal broader than a peninsula strictly so called. The whole space comprised between this boundary and the W. and the Iapygian promontory is very uniform in its physical characters. It contains no mountains, and scarcely any hills of considerable elevation, but a range of rugged and hilly country which extends from the southern part of Apulia only occupies a narrow tract in the extreme NW. of Calabria, about the modern towns of *Ostuni* and *Ceglie*. From the Iapygian Promontory (the *Capo di Leuca*) it is not a single eminence of any considerable elevation, the whole space being occupied by broad and undulating hills of very small elevation, except near the town of *Oria*, which stands on a hill of considerable height near the centre of the peninsula, and commands an uninterrupted view to the sea on every side (Swinburne, *Travels*, vol. i. pp. 210, 211; Craven's *Travels*, p. 164.) Hence Virgil has correctly described the approach to Italy from this quarter as presenting "a low coast of dusky hills," *colles humilemque Italiam*, Aen. iii. 521. The soil is almost entirely calcareous, consisting of a tertiary limestone, which readily absorbs the moisture that falls, so that not a single stream or scarcely even a rivulet is to be found in the whole province. Yet, notwithstanding its aridity and the burning heat of the climate in summer, the country is one of great fertility, and is described by Horace as having been once very populous and powerful, though much decayed in his day from its former prosperity. Its soil is especially adapted to the growth of olives, for which it was celebrated in ancient as well as modern times: but it produces excellent wines, as well as fruit of various kinds in great abundance, and honey and wool of

(Her. vii. 170.) so represented as Cretans, asso- and Illyrians; but their emigra- as the time of Idomeneus, after Strab. p. 281; Virg. *Aen.* iii. *b. ad Virg. Ecl.* vi. 31; Festus .) Without attaching any his- testimonies, they may be con- g the fact that the population s closely connected with that of f the Ionian Sea, and belonged with those pre-Hellenic races, comprised under the name of d recorded by Antiochus (*l. c.*) n with the Bottiaeans of Mace- int to the same origin. This great confirmation from the Mommsen into the remnants of by the native tribes in this have completely established the of the Messapians or Iapygians t analogy to those of the Oscan d was much more nearly akin ndeed, it appears to have borne on with the native dialects of The Alexandrian grammarian shed about 100 B. C.) appears ne words of this language, and s to the Mesapian tongue as his time: the numerous sepul- ll existing may be referred for latter ages of the Roman Re- public. (Mommsen, *Die Unter-Italischen Dialecte*, pp. 43—98.) This near relationship with the Hellenic races will explain the facility with which the Messapians appear to have adopted the manners and arts of the Greek settlers, while their national diversity was still such as to lead the Greek colonists to regard them as barbarians. (See Thuc. vii. 33; Paus. *Phoc.* x. 10. § 6.) A question has, however, been raised whether the CALABRI were originally of the same stock with the other inhabitants of the peninsula, and Niebuhr inclines to regard them as intruders of an Oscan race (vol. i. p. 149; *Vorträge über Länder u. Völker*, p. 499). But the researches above alluded to seem to negative this conjecture, and establish the fact that the Calabrians and Messapians were the same tribe. The name of the Calabri (Καλαβροι) is found for the first time in Polybius (x. 1); but it is remarkable that the Roman Fasti, in recording their subjection, employ the Greek name, and record the triumph of the consuls of the year 487 "de Sallentinis *Messapiisque*." (Fast. Triumph. ap. Gruter. p. 297.)

All the information we possess concerning the early history of these tribes is naturally connected with that of the Greek colonies established in this part of Italy, especially Tarentum. The accounts transmitted to us concur in representing the Messapians or Iapygians as having already attained to a certain degree of culture, and possessing the cities of Hyria and Brundusium at the period when the colony of Tarentum was founded, about 708 B. C. The new settlers were soon engaged in hostilities with the natives, which are said to have commenced even during the lifetime of Phalanthus. It is probable that the Tarentines were generally successful, and various offerings at Delphi and elsewhere attested their repeated victories over the Iapygians, Messapians, and Peucetians. It was during one of these wars that they captured and destroyed the city of Carbina with circumstances of the most revolting cruelty. But at a later period the Messapians had their revenge, for in B. C. 473 they defeated the Tarentines in a great battle, with such slaughter as no Greek army had suffered down to that day. (Paus. x. 10. § 6, 13. § 10; Clearch. *ap. Athen.* xii. p. 522; Her. vii. 170; Diod. xi. 52; Strab. vi. p. 282.) Notwithstanding this defeat the Tarentines gradually regained the ascendancy, and the Peucetians and Daunians are mentioned as joining their alliance against the Messapians: but the latter found powerful auxiliaries in the Lucanians, and it was to oppose their combined arms that the Tarentines successively invoked the assistance of the Spartan Archidamus and Alexander king of Epeirus, the former of whom fell in battle against the Messapians near the town of Manduria, B. C. 338. (Strab. vi. p. 281.) But while the inhabitants of the inland districts and the frontiers of Lucania thus retained their warlike habits, those on the coast appear to have adopted the refinements of their Greek neighbours, and had become almost as luxurious and effeminate in their habits as the Tarentines themselves. (Athen. xii. p. 523.) Hence we find them offering but little resistance to the Roman arms; and though the common danger from that power united the Messapians and Lucanians with their former enemies the Tarentines, under the command of Pyrrhus, after the defeat of that monarch and the submission of Tarentum, a single campaign sufficed to complete the subjection of the Iapygian peninsula.

(Flor. i. 20; Zonar. viii. 7. p. 128; Fast. Capit. *l. c.*) It is remarkable that throughout this period the Sallentini alone are mentioned by Roman historians; the name of the Calabri, which was afterwards extended to the whole province, not being found in history until after the Roman conquest. The Sallentini are mentioned as revolting to Hannibal during the Second Punic War, B. C. 213, but were again reduced to subjection. (Liv. xxv. 1, xxvii. 36.)

Calabria was included by Augustus in the Second Region of Italy; and under the Roman empire appears to have been generally united for administrative purposes with the neighbouring province of Apulia, in the same manner as Lucania was with Bruttium, though we sometimes find them separated, and it is clear that Calabria was never included under the name of Apulia. (Plin. iii. 11. s. 16; Lib. Colon. pp. 260, 261; Notit. Dign. ii. pp. 64, 125; Orell. *Inscr.* 1126, 1178, 2570, 3764.) After the fall of the Western Empire its possession was long and fiercely disputed between the Greek emperors and the Goths, the Lombards and the Saracens: but from its proximity to the shores of Greece it was one of the last portions of the Italian peninsula in which the Byzantine emperors maintained a footing; nor were they finally expelled till the establishment of the Norman monarchy in the 11th century. It is to this period that we must refer the singular change by which the name of Calabria was transferred from the province so designated by the Romans to the region now known by that name, which coincides nearly with the limits of the ancient Bruttium. The cause, as well as the exact period of this transfer, is uncertain; but it seems probable that the Byzantines extended the name of Calabria to all their possessions in the S. of Italy, and that when these were reduced to a small part of the SE. peninsula about Hydruntum and the Iapygian promontory, they still comprised the greater part of the Bruttian peninsula, to which, as the more important possession, the name of Calabria thus came to be more particularly attached. Paulus Diaconus in the 8th century still employs the name of Calabria in the Roman sense; but the usage of Italian writers of the 10th and 11th centuries was very fluctuating, and we find Constantine Porphyrogenitus, as well as Liutprand of Cremona in the 10th century, applying the name of Calabria, sometimes vaguely to the whole of Southern Italy, sometimes to the Bruttian peninsula in particular. After the Norman conquest the name of Calabria seems to have been definitively established in its modern sense as applied only to the southern extremity of Italy, the ancient Bruttium. (P. Diac. *Hist. Lang.* ii. 22; Const. Porphyr. *de Provinc.* ii. 10, 11; Liutpr. Cremon. iv. 12; Lupus Protospat. *ad ann.* 901, 981; and other chroniclers in Muratori, *Scriptores Rer. Ital.* vol. v.)

The whole province of Calabria does not contain a single stream of sufficient magnitude to be termed a river. Pliny mentions on the N. coast a river of the name of Iapyx, the situation of which is wholly unknown; another, which he calls Pactius, was situated (as we learn from the Tabula, where the name is written *Lastium*) between Brundusium and Baletium, and probably answers to the modern *Canale del Cefalo*, which is a mere watercourse. On the S. coast the two little rivers in the neighbourhood of Tarentum, called the Galaesus and the Taras, though much more celebrated, are scarcely more considerable.

Silius as abounding in fish, "littus piscosa Calacte" (xiv. 251); and its name, though omitted by Pliny, is found in Ptolemy, as well as in the Itineraries; but there is considerable difficulty in regard to its position. The distances given in the Tabula, however (12 M. P. from Alaesa, and 30 M. P. from Cephaloedium), coincide with the site of the modern village of *Caronia*, on the shore below which Fazello tells us that ruins and vestiges of an ancient city were still visible in his time. Cluverius, who visited the locality, speaks with admiration of the beauty and pleasantness of this part of the coast, "littoris excellens amoenitas et pulchritudo," which rendered it fully worthy of its ancient name. (Cluver. *Sicil.* p. 291; Fazell. i. p. 383; *Tab. Peut. Itin. Ant.* p. 92; where the numbers, however, are certainly corrupt.) The celebrated Greek rhetorician Caecilius, who flourished in the time of Augustus, was a native of Calacte (or, as Athenaeus writes it, Cale Acte), whence he derived the surname of Calactinus. (Athen. vi. p. 272.) [E. H. B.]

COIN OF CALACTE.

CALAGUM, seems to be a town of the Meldi, a Gallic people on the Matrona (*Marne*). If Iatinum is *Meaux*, Calagum of the Table may be *Chailly*, which is placed in the Table at 18 M. P. from Fixtuinum, supposed to be the same as Iatinum. [G.L.]

CALAGURRIS (Calagorris, Calaguris, Καλάγουρις, Strab. iii. p. 161; Καλάγυρον, Appian. *B. C.* i. 112: *Eth.* Calagurritani: *Calahorra*), a city of the Vascones, in Hispania Tarraconensis, stood upon a rocky hill near the right bank of the Iberus (Auson. *Epist.* xxv. 57, *haerens scopulis Calogorris*), on the high road from Caesaraugusta (*Zaragoza*) to Legio VII. Gemina (*Leon*), 49 M. P. above the former city (*Itin. Ant.* p. 393). It is first mentioned in the Celtiberian War (B.C. 186: Liv. xxxix. 21); but it obtained a horrible celebrity in the war with Sertorius, by whom it was successfully defended against Pompey. It was one of the last cities which remained faithful to Sertorius; and, after his death, the people of Calagurris resolved to share his fate. Besieged by Pompey's legate Afranius, they added to an heroic obstinacy like that of Saguntum, Numantia, and *Zaragoza*, a feature of horror which has scarcely a parallel in history: in the extremity of famine, the citizens slaughtered their wives and children, and, after satisfying present hunger, salted the remainder of the flesh for future use! The capture and destruction of the city put an end to the Sertorian War (Strab. *l. c.*; Liv. Fr. xci., Epit. xciii.; Appian. *B. C.* i. 112; Flor. iii. 23; Val. Max. vii. 6, ext. 3; Juv. xv. 93; Oros. v. 23).

Under the empire, Calagurris was a *municipium* with the *civitas Romana*, and belonged to the conventus of Caesaraugusta (Plin. iii. 3. s. 4). It was surnamed Nassica in contra-distinction to Calagurris Fibularia, a stipendiary town in the same neighbourhood (Liv. Fr. xci.; Plin. *l. c.* calls the peoples respectively *Calaguritani Nassici* and *Calaguritani Fibularenses*). The latter place seems to be the Calagurris mentioned by Caesar as forming

Digitized by Google

one community with Osca (*B. C.* i. 60: Calaguritani, qui erant cum Oscensibus contributi), and must be looked for near Osca, in all probability at *Loarre*, NW. of *Huesca;* but several writers take *Loarre* for Calagurris Nassica and *Calahorra* for the other. (See Ukert, vol. ii. pt. 1, p. 447.)

Whichever way the question of *name* be decided, there still remains some doubt whether the city N. of the *Ebro* (*Loarre*), ought not to be regarded, on account of its close connection with Osca, as the one so renowned in the Sertorian War. A similar doubt affects the numerous coins which bear the name of Calagurris; but the best numismatists regard them as belonging all to Calagurris Nassica. They are all of the reigns of Augustus and Tiberius, and the various epigraphs give the city the surnames, sometimes of NASSICA, sometimes of JULIA, and testify to its having been a municipium. (Florez, *Med. de Esp.* vol. i. p. 255, vol. iii. p. 22; Mionnet, vol. i. p. 34, Suppl. vol. i. p. 67; Sestini, *Med. Isp.* p. 119; Eckhel, vol. i. pp. 39—41; Rasche, *s. v.*) The favour it enjoyed under Augustus is shown by the fact that he had a body-guard of its people (Suet. *Octav.* 49).

Calagurris (*Calahorra*, in this case, without doubt) is celebrated in literary history as the birthplace of the rhetorician Quinctilian, and, according to some, of the first Christian poet, Prudentius, whom others make a native of CAESARAUGUSTA. (Auson. *de Prof.* i. 7; Prudent. *Hymn.* iv. 31, *Peristeph.* i. 117). [P. S.]

CALAGURRIS, a place in Aquitania, on the road between Lugdunum Convenarum and Tolosa, according to the Antonine Itin. It is marked 26 M. P. from Lugdunum. D'Anville fixes it at *Cazères*, others at *S. Martorris*, both of them on the left bank of the *Garonne*, in the department of *Haute-Garonne*. The distance from Lugdunum (*St. Bertrand de Comminges*) must be measured along the *Garonne*. The places between Calagurris and Tolosa, namely Aquae Siccae and Vernosole, seem to be identified by their names, and Calagurris ought not to be doubtful. *Cazères* and *S. Martorris* are not far distant from one another, and mosaic pavements and other remains are said to have been found at one or both. [G. L.]

CALAMA (τὰ Κάλαμα, Arrian, *Ind.* 26), a small place on the coast of Gedrosia, which was visited by Nearchus and his fleet. The modern name appears to be *Churmut*. In an old Portuguese map the place is called *Rio de la Kalameta*, which seems, as Vincent has suggested, to be intermediate between the ancient form Kalama and the more modern *Churmut*. (Vincent, *Voyage of Nearchus*, vol. i. p. 239.) [V.]

CALAMAE (Καλάμαι), a village of Messenia near Limnae, and at no great distance from the frontiers of Laconia, is represented by the modern village of *Kalami*, at the distance of three-quarters of an hour NW. of *Kalamáta:* the latter is the site of the ancient Therae, and must not be confounded with *Kalámi*. (Paus. iv. 31. § 3; Pol. v. 92; Leake, *Morea*, vol. i. p. 362, *Peloponnesiaca*, p. 183; Boblaye, *Recherches*, p. 105; Ross, *Reisen im Peloponnes*, p. 2.)

CALAMINAE. Pliny (ii. 95, and Harduin's Note) mentions among floating islands some called Calaminae in Lydia. See Groskurd's Note (*Transl. of Strabo*, vol. ii. p. 624). [G. L.]

CALAMUS (Κάλαμος), a town of Phoenicia, mentioned by Pliny (v. 17) as following Trieris. Polybius (v. 68) speaks of it being Antiochus.

CALAMYDE, a city of Crete, of v describer (*Geogr. Graec. Min.* vol. alone has recorded the name of the it was to the W. of Lissus and 30 s Metopon. Mr. Pashley (*Trav.* vol. fixed the site on the summit of the ri vallies *Kontokynéghi* and *Kántanos* SW. sides of the city the walls ma 300 or 400 paces; on the E. they ex paces; while on the S. the ridge na wall, adapting itself to the natural hill, has not a length of more than 2 wall is composed of polygonal stones, been touched by the chisel.

CALARNA. [ARNAE.]

CALASARNA (Καλάσαρνα), a terior of Lucania, mentioned only b 254), who affords no clue to its p been placed by Italian topographe (Romanelli, vol i. p. 215); but Strab it together with GRUMENTUM and latter of which is equally unknown all three to Lucania.

CALATHANA, a town of Thes trict Thessaliotis, of uncertain site.

CALATHIUS MONS. [MESS

CALATIA (Καλατία: *Eth.* Cal name of two cities on the confines o Campania, which, from their proxi been confounded with one another. always possible to tell to which o passages of ancient writers refer. Samnium, in the valley of the Vul of which is retained by the modern town on a hill, about a mile N. of 10 miles NE. of Capua. This is cer meant by Livy, when he speaks of I scending from Samnium into Camp fanum *Calatinumque* et Calenum agr and again in another passage (xxiii. Marcellus as marching from Casili and thence crossing the Vulturnus, by Saticula and Suessula to Nola. *Samnite* Calatia, *north* of the Vult the one intended. At an earlier p repeatedly noticed during the wars with the Samnites, and always in places in or near the valley of Thus, in B. C. 305, Calatia and S by the latter (Liv. ix. 43); seven are told that Atina and Calatia the consul C. Junius Bubulcus (Id there can be little doubt that the the Roman legions were encamped disaster of the Caudine Forks (Id. the Samnite and not the Campani DIUM.] But after the Second Pun no notice in history, which appears t it probably declined, like most of the after the time of Sulla. pp. 369, 373), that Calaureia reuit, and was separated from rait of four stadia. Pausanias econd island in the immediate AERIA, afterwards HIERA, con-

taining a temple of Athena Apaturia, and separated from the mainland by a strait so narrow and shallow that there was a passage over it on foot. At present there is only one island; but as this island consists of two hilly peninsulas united by a narrow sandbank, we may conclude with Leake that this bank is of recent formation, and that the present island comprehends what was formerly the two islands of Calaureia and Hiera. It is now called *Poro*, or the ford, because the narrow strait is fordable, as it was in ancient times.

The remains of the temple of Poseidon were discovered by Dr. Chandler in 1765, near the centre of the island. He found here a small Doric temple, reduced to an inconsiderable heap of ruins; and even most of them have since been carried off for building purposes. (Chandler, *Travels*, vol. ii. p. 261; Leake, *Morea*, vol. ii. p. 450, seq.; Ross, *Wanderungen in Griechenland*, vol. ii. p. 5, seq.)

CALBIS. [INDUS.]

CALCA'RIA, a place in southern Gallia, on the road from *Marseille* to Fossae Marianae or *Foz-les-Martigues*, 14 M. P. from Massilia, and 34 from Fossae Marianae. This road must have run from *Marseille* round the *Etang de Berre*, and the distances lead us to place Calcaria at the ford of the *Cadière*, 14 M. P. from *Marseille*. [G. L.]

CALCA'RIA, in Britain, distant, in the second Itinerary, 9 miles from Eburacum (*York*). The termination *-caster*, the presence of Roman remains, and the geological condition of the country, all point to the present town of *Tadcaster*, as the modern equivalent. So does the distance. *Newton Kyme*, a little higher up the river, has by some writers been preferred: the general opinion, however, favours *Tadcaster*. [R. G. L.]

CALCUA. [NALCUA.]

CALE or CALEM (*Porto* or *Oporto*), a city on the S. border of Gallaecia, in Spain, on the N. side of the Durius (*Douro*) near its mouth; and on the high road from Olisipo to Bracara Augusta, 35 M. P. south of the latter place. (Sallust. *ap.* Serv. *ad Virg. Aen.* vii. 728, reading *Gallaecia* for *Gallia; Itin. Ant.* p. 421; Florez, *Esp. S.* xxi. 5, xiv. 70.) It may possibly be the CALADUNUM (Καλάδουνον) of Ptolemy, the termination denoting its situation on a hill (ii. 6. § 39). Though thus barely mentioned by ancient writers, its position must early have made it a considerable port; so that it came to be called *Portus Cale*, whence the name of *Portugal* has been derived. The modern city *O Porto* (i. e. *the Port*) stands a little E. of the site of Cale, which is believed to be occupied by the market town of *Gaya*. [P. S.]

CALE-ACTE (Καλὴ Ἀκτή: *Eth.* Καλακτίτης, Καλοακτίτης, Καλακταῖος, Καλοάκτιος, Steph. B.: *Aktè*), a city on the W. coast of Crete, whose domain was probably bounded on the N. by the Phalasarnian, and on the W. and S. by the Polyrrhenian territory. A district called *Aktè*, in the region of *Mesoghia*, has been identified with it. (Pashley, *Trav.* vol. ii. p. 57.) This place has been by some commentators on the New Testament confounded with the Fair Havens (Καλοὶ Λιμένες), to which St. Paul came in his voyage to Italy (*Acts*, xxvii. 8), and which is situated on the S. of the island. (Hoeck, *Kreta*, vol. i. p. 440.) [E. B. J.]

CALEDO'NIA (*Eth.* Caledonius), the northern part of Britannia. The name is variously derived. In the present Welsh, *celydd* = *a sheltered place, a retreat, a woody shelter* (see Owen's Dict.), the

Digitized by Google

plural form of which is *celeddon*. In the same language *called* = *thistle stalks*. Name for name, the former of these words gives us the preferable etymology for Caledonia. Growth for growth, that of the *thistle* predominates over that of timber. As far as the opinion of the native critics goes, the former etymology is the more current.

Whatever may be its meaning, the root *Caled* (or *Caledon*) is British. It may or may not have been native as well, *i. e.* if we suppose (a doubtful point) that the Caledonii were notably different from the Britanni. Pliny (iv. 16. s. 30) is the first author in whose text it appears; but, as it appears in Ptolemy (ii. 3) also, and as Ptolemy's sources were in certain cases earlier than those of Pliny, or even Caesar, there is no reason for believing it to have been a name one whit newer than that of any other ancient nation. The Dicalidones of Ammianus Marcellinus (xxvii. 8) are most probably the same population under a designation augmented by a derivational or inflexional prefix.

The import of the term is not less doubtful than its etymology. With the later writers it is wide; and *Caledonia* is the term expressive of one of the great primary divisions of the populations of the Britannic islanders; coinciding, nearly, with the present kingdom of Scotland, as opposed to England and Ireland. But, assuredly, this was not its original power. Aristotle knows no distinction between southern and northern Britain. He merely knows the one between Albion (Great Britain) and Ierne (Ireland). Mela differs from Aristotle only in writing *Britannia* instead of *Albion*. The Orcades and the Hemodae (*Hebrides*) he knows; but he knows no *Caledonia*.

Pliny, as aforesaid, is the first author who mentions Caledonia; Tacitus (*Agr.* 11) the one who deals with it most fully. The authorities, however, are the same in both. The one wrote as the biographer of Agricola; the other evidently bases his statements on the information supplied by that commander, — "triginta prope jam annis notitiam ejus Romanis armis non ultra vicinitatem silvae Caledoniae propagantibus." (Plin. *l. c.*)

Solinus gives us the following mysterious passage. He speaks of the *Caledonicus angulus*, and continues — "in quo recessu Ulyxem Caledoniae appulsum manifestat ara Graecis litteris scripta votum" (c. 22). To refer this to a mistaken or inaccurate application of the well-known passage of Tacitus, wherein he speaks of Ulysses having been carried as far as Germany, of his having founded *Asciburgium*, of his having an altar raised to his honour, and of the name of Laertes being inscribed thereon (*Germ.* 3), would be to cut the Gordian knot rather than to unloose it; besides which, the explanation of the Caledonian Ulysses by means of the German would only be the illustration of *obscurum per obscurius*. Again, the traditions that connect the name of Ulysses with Lisbon (*Ulyssae pons*) must be borne in mind. Upon the whole, the statement of Solinus is inexplicable; though, possibly, when the history of Fiction has received more criticism than it has at present, some small light may be thrown upon it. It may then appear that Ulysses — and many other so-called Hellenic heroes like him — are only Greek in the way that Orlando or Rinaldo are Italian, *i. e.* referable to the country whose poems have most immortalised them. A Phoenician, Gallic, Iberic, or even a German Ulysses, whose exploits formed the basis of a Greek poem, is, in the mind of the present writer, more probable than the fact of a Welsh A[rthur] in the poems of France and Italy.

In continuing our notice of the [ancient] texts, Ptolemy will be taken before [Tacitus] presents more than one difficulty. [Ptolemy] Marcellinus (xxvii. 8) speaks of [the Caledonians] divided into two *gentes*, the Di-*cal*[edones] turiones, it is difficult to believe th[at] the former term any population dif[ferent] of the simple *Caledonians*. His [silence] firms this view. Equally difficult i[s] the *Di*-calidones from the *Oceanus* Ὠκεανὸς καλούμενος Δουηκαληδό[νιος] (ii. 3); however difficult it may [be] whether the ocean gave the name to [the] the population to the ocean. Now, th[e] ocean is on the *south-western* side [of] least, it is more west than east. [The] of the Novantae, and the estuary o[f] mull of Galloway and the mouth of [the] among the first localities noticed in [Ptolemy] *of the Northern Side of the Br*[itish] *Albion, above which lies the Oce*[an] *calidonian*.

Now the Caledonii of Ptolemy a[re] extent the same as the coastmen [of] donian Ocean, and, to a certain e[xtent] different. Their area begins at th[e] *Bay* and reaches to the *Varar Aest*[uary] north of these, lies the *Caledonian* δόνιος δρομὸς, Ptol. *l. c.*). Dealing [with] and the *Murray Firth* as the equ[ivalent] *Lelamnonian Bay* and the *Varar* Caledonii stretch across Scotland fr[om] Inverness. Still, in the eyes of Pt[olemy] only one out of the many of the populations. The Cantae, the Vacom[agi] are conterminous with them, ar[e] pearances, bear names of equal valu[e] such thing in Ptolemy as *Caledonia sions and sub-divisions of Caled*[onia] nothing *generic*, so to say, in his ph[rase].

The Caledonia of Tacitus is broug[ht] as the Grampians at least, possibly [to] the valleys of the Forth and Cly[de]. donia, too, of Tacitus is more or less [than] the Horesti seem to have been co[n]ple people of Caledonia just as Kent [is] England.

Putting the above statements toge[ther] the same time to certain other circ[um]as the physical condition of the c[ountry] nature of the Ptolemaic authorities bably come to the belief that, until Agricola, *Caledonia* was a word of restricted signification — that it de[noted] district — that it extended from [the] the Murray Firth — that the people it were called *Caledonians* by th[e] *Di-caledonians* (Black Caledonians? nians — that Ptolemy took his name from an Irish, for the *people* and th[e] British, source — that the western ex[tent] proper Ptolemaic Caledonians came [to] the western extremity of the rampar[t] become known to that commander — extended by him to all the populatio[n] as west) north of that rampart, so and more general.

Such seems to be the history of th[e]

term, and for the history of the
NNIA. [R. G. L.]

CALE'LA (Καλήλη), a place in Apulia, mentioned only by Polybius (iii. 101), who tells us that Minucius encamped there, when Hannibal had established himself at Gerunium. He calls it ἄκρα, by which he probably means a "castellum," or small fortified town, and tells us it was in the territory of Larinum; but its exact position cannot be ascertained. It appears from his narrative to have been somewhat more than 16 stadia from Gerunium. [E. H. B.]

CALENTES AQUAE. [AQUAE CALIDAE.]

CALENTUM (prob. *Cazalla* near *Alaniz*), a town of Hispania Baetica, famous for its manufacture of a sort of tiles light enough to swim on water (Plin. xxxv. 14. s. 49; Vitruv. ii. 3; comp. Strab. xiii. p. 615; Schneider, *ad Eclog. Phys.* p. 88; Caro, *Antig.* iii. 70). It is supposed to be the city of the Callenses Emanici, mentioned by Pliny (iii. 1. s. 3). [P. S.]

CALES (Κάλης: *Eth.* Καληνός, Calenus: *Calvi*), one of the most considerable cities of Campania, situated in the northern part of that province, on the road from Teanum to Casilinum. (Strab. v. p. 237.) When it first appears in history it is called an Ausonian city (Liv. viii. 16): and was not included in Campania in the earlier and more restricted sense of that term. [CAMPANIA.] Its antiquity is attested by Virgil, who associates the people of Cales with their neighbours the Aurunci and the Sidicini. (*Aen.* vii. 728.) Silius Italicus ascribes its foundation to Calais the son of Boreas. (viii. 514.) In B.C. 332, the inhabitants of Cales are first mentioned as taking up arms against the Romans in conjunction with their neighbours the Sidicini, but with little success; they were easily defeated, and their city taken and occupied with a Roman garrison. The conquest was, however, deemed worthy of a triumph, and the next year was further secured by the establishment of a colony of 2,500 citizens with Latin rights. (Liv. viii. 16; Vell. Pat. i. 14; Fast. Triumph.) From this time Cales became one of the strongholds of the Roman power in this part of Italy, and though its territory was repeatedly ravaged both by the Samnites, and at a later period by Hannibal, no attempt seems to have been made upon the city itself. (Liv. x. 20, xxii. 13, 15, xxiii. 31, &c.) It, however, suffered so severely from the ravages of the war that in B. C. 209 it was one of the twelve colonies which declared their inability to furnish any further supplies of men or money (Liv. xxvii. 9), and was in consequence punished at a later period by the imposition of heavier contributions. (Id. xxix. 15.) In the days of Cicero it was evidently a flourishing and populous town, and for some reason or other enjoyed the special favour and protection of the great orator. (Cic. *de Leg. Agr.* ii. 31, *ad Fam.* ix. 13, *ad Att.* vii. 14, &c.) He terms it a Municipium, and it retained the same rank under the Roman Empire (Tac. *Ann.* vi. 15; Plin. iii. 5. s. 9): its continued prosperity is attested by Strabo, who calls it a considerable city, though inferior to Teanum (v. p. 237; Ptol. iii. 1. § 68), as well as by inscriptions and existing remains: but no further mention of it occurs in history. It was the birthplace of M. Vinicius, the son-in-law of Germanicus, and patron of Velleius Paterculus. (Tac. *l. c.*) Cales was situated on a branch of the Via Latina, which led from Teanum direct to Casilinum, and there joined the Appian Way: it was rather more than five miles distant from Teanum, and above seven from Casilinum. Its prosperity was owing, in great

Digitized by Google

measure, to the fertility of its territory, which immediately adjoined the celebrated "Falernus ager," and was scarcely inferior to that favoured district in the excellence of its wines, the praises of which are repeatedly sung by Horace. (Hor. *Carm.* i. 20. 9, 31. 9, iv. 12. 14; Juv. i. 69; Strab. v. p. 243; Plin. xiv. 6. s. 8.) So fertile a district could not but be an object of desire, and we find that besides the original Roman colony, great part of the territory of Cales was repeatedly portioned out to fresh settlers: first in the time of the Gracchi, afterwards under Augustus. (Lib. Colon. p. 232.) Cales was also noted for its manufactures of implements of husbandry, and of a particular kind of earthenware vessels, called from their origin Calenae. (Cato, *R. R.* 135; Varr. *ap. Nonium*, xv. p. 545.)

After the fall of the Western Empire, Cales suffered severely from the ravages of successive invaders, and in the 9th century had almost ceased to exist: but was revived by the Normans.

The modern city of *Calvi* retains its episcopal rank, but is a very poor and decayed place. It, however, preserves many vestiges of its former prosperity, the remains of an amphitheatre, a theatre, and various other fragments of ancient buildings, of reticulated masonry, and consequently belonging to the best period of the Roman Empire, as well as marble capitals and other fragments of sculpture. The course of the Via Latina, with its ancient pavement, may still be traced through the town. A spring of acidulous water, noticed by Pliny, as existing "in agro Caleno" (ii. 106) is still found near *Francolisi*, a village about four miles W. of Calvi. (Romanelli, vol. iii. p. 437; Hoare's *Classical Tour*, vol. i. pp. 246—248; Craven's *Abruzzi*, vol. i. p. 27—30; Zona, *Memorie dell' Antichissima città di Calvi*, 4to., Napoli, 1820.)

The coins of Cales are numerous, both in silver and copper: but from the circumstance of their all having Latin legends, it is evident they all belong to the Roman colony. [E. H. B.]

COIN OF CALES.

CALES (Κάλης, Κάλλης), a river of Bithynia, 120 stadia east of Elaeus. (Arrian, p. 14; and Marc. p. 70.) This seems to be the river which Thucydides (iv. 75) calls Calex (Κάληξ), at the mouth of which Lamachus lost his ships, which were anchored there, owing to a sudden rise of the river. Thucydides places the Calex in the Heracleotis, which agrees very well with the position of the Cales. Lamachus and his troops were compelled to walk along the coast to Chalcedon. Pliny (v. 32) mentions a river Alces in Bithynia, which it has been conjectured, may be a corruption of Calex. There was on the river Cales also an emporium or trading place called Cales. [G. L.]

CALETI, or CALETES (Καλέτοι, Strab.; Καλεῖται, Ptol.) are reckoned by Caesar (*B. G.* ii. 4) among the Belgic nations, and consequently are north of the *Seine* (*B. G.* i. 1). In B. C. 57 it was estimated that they could muster 10,000 fighters. They are enumerated under the nar
our present texts, among the Armor
states of Gallia which joined in

ONS, a range of mountains in
Campania. The name is found
5, 16), from whom we gather
ge which separates the great
the Vulturnus, known as the
the upper valley of that river,
lifae, which belonged to Sam-
in fact, the same of which the
continuation S. of the Vulturnus was known as the Mons Tifata. Hannibal crossed it without opposition on his march from Samnium into Campania (B. C. 217), when he laid waste the Falernian Plain; but on his return Fabius occupied the passes of Mt. Callicula, as well as Casilinum, which commanded the passage of the Vulturnus, hoping thus to cut off his retreat. Hannibal, however, deceived him by a stratagem, and effected the passage of the mountain without difficulty (*Ib.* 16—18). Polybius, who relates the same operations (iii. 91—94), designates this mountain range by the name of Ἐριβιανὸν, for which it has been proposed to read Τρεβιανὸν, from Trebia or Trebula, a small town in this neighbourhood; but the position of Trebula is not well ascertained, and the "Trebianus Ager," mentioned by Livy in another passage (xxiii. 14), is placed by him S. of the Vulturnus. The name given by Polybius is, however, in all probability, corrupt. [E. H. B.]

CALLI'DROMUS. [OETA.]

CALLI'ENA (Καλλίενα, Arrian. *Peripl. Mar. Erythr.*, Καλλιανά, Cosmas Indicopl. ii. p. 337: *Kalliannee*, on the mainland, opposite *Bombay*), a considerable seaport and capital of a principality on the W. coast of India. [P. S.]

CALLIENSES. [CALLIUM.]

CA'LLIFAE, a town of Samnium, mentioned only by Livy (viii. 25) who relates that the consuls C. Petelius and L. Papirius in B. C. 323, took three towns of the Samnites, Callifae, Rufrium and Allifae. Cluver supposes Callifae to be represented by the modern *Carife*, in the country of the Hirpini, between *Frigento* and *Trevico:* but this position seems much too distant: and it is more probable that all the three towns were situated in the same neighbourhood. A local antiquarian has given strong reasons for placing Callifae on the site of *Calvisi*, a village about five miles E. of *Allife*, at the foot of the *Monte Matese*, where there exist some remains of an ancient town. (Trutta, *Antichità Allifane*, 4to., Napoli, 1776; Romanelli, vol. ii. p. 458; Abeken, *Mittel Italien*, p. 98.) [E. H. B.]

CALLIGA [CALINGAE].

CALLI'GERIS (Καλλιγερίς), an inland city of India intra Gangem, on the W. side of the peninsula, between the rivers Benda and Pseudostomus. (Ptol. vii. 1. § 83.) Some identify it with Calliena. (Mannert, vol. v. pt. i. p. 146.) [P. S.]

CALLIGICUM PROM. [CORY.]

CALLINI'CUS, CALLINI'CUM. [NICEPHORIUM.]

CALLINU'SA (Καλλίνουσα = Καλὴ Νῆσος?), a promontory to the NW. of Cyprus, which Ptolemy (v. 14. § 4) places to the W. of Soli. D'Anville (*Mém. de l'Acad. des Inscr.* vol. xxxii. p. 537), from one Venetian map, gives it the name of *Eleni*, and from another Venetian map, *Capo de Alessandreta.* (Engel, *Kypros*, vol. i. p. 74; Mariti, *Viaggi*, vol. i. 199.) [E. B. J.]

CALLI'OPE (Καλλιόπη, Pol. x. 31; Appian, *Syr.* 57; Steph. B.; Plin. vi. 17. s. 29), a town founded by Seleucus in Parthia. The situation is unknown; but it is mentioned by Appian as one of many towns built by Seleucus, and named by him after other Greek towns. [V.]

CALLI'POLIS (Καλλίπολις). 1. (*Gallipoli*), a maritime city of Calabria, situated on the Tarentine Gulf, about 30 miles from the Iapygian promontory, and between 50 and 60 from Tarentum. (Pliny gives the former distance at 32 M. P., and the latter

Digitized by Google

at 75.) Its name sufficiently attests its Greek origin, which is further confirmed by Mela (ii. 4), who calls it "Urbs Graia, Callipolis;" and we learn from Dionysius (Fr. Mai. xvii. 4) that it was founded by a Lacedaemonian named Leucippus, with the consent and assistance of the Tarentines, who had themselves previously had a small settlement there. Pliny tells us that it was called in his time Anxa ("Callipolis quae nunc est Anxa," iii. 11. s. 16), but it would seem to have never lost its Greek appellation, which it retains almost unaltered at the present day. The ancient city doubtless occupied the same site with the modern *Gallipoli*, on a rocky peninsula projecting boldly into the sea, and connected with the mainland only by a bridge or causeway. It is remarkable that we find in ancient times no allusion to the excellence of its port, to which it owes its present prosperity; it is now one of the most considerable trading towns in this part of Italy, and contains above 12,000 inhabitants. (Galateo, *De Situ Iapygiae*, p. 39; Romanelli, vol. ii. pp. 44—47; Swinburne, *Travels*, vol. i. p. 368; Giustiniani, *Diz. Geogr. s. v.*).

2. A city on the E. coast of Sicily, which was of Greek origin, and a colony from the neighbouring city of Naxos. (Scymn. Ch. 286; Strab. vi. p. 272.) It appears to have ceased to exist at an early period, as the only notice of it found in history is in Herodotus (vii. 154), who mentions it as having been besieged and reduced to subjection by Hippocrates, tyrant of Gela. It is probable that it was destroyed, or its inhabitants removed, either by that ruler, or his successor Gelon, according to a policy familiar to the Sicilian despots, as, from the absence of all mention of the name by Thucydides during the operations of the Athenians on the E. coast of Sicily, it seems certain that it was then no longer in existence. Nor is the name afterwards found in Diodorus; and it is only mentioned by Strabo as one of the cities of Sicily that had disappeared before his time. (Strab. vi. p. 272; Steph. B. *s. v.*) Silius Italicus, indeed, speaks of it as if it still existed during the Second Punic War (xiv. 249); but his accuracy on this point may well be questioned. It was probably situated on the coast between Naxos and Messana. [E. H. B.]

CALLI'POLIS (Καλλίπολις: *Gallipoli*), a town in the Thracian Chersonesus, opposite to Lampsacus. (Strab. xiii. p. 589; Steph. B. *s. v.*; Ptol. iii. 12. § 4; Procop. *de Aed.* iv. 9; Liv. xxxi. 16; Plin. iv. 18.) [L. S.]

CALLIPOLIS. [CALLIUM.]

CALLI'RRHOE (Καλλιῤῥόη), warm springs on the eastern side of the Jordan, and not far from the Dead Sea, to which Herod the Great resorted during his last illness, by the advice of his physicians. The stream flows into the Dead Sea. (Joseph. *Ant.* xvii. 6. § 5.) Pliny (v. 16) also describes it as "calidus fons medicae salubritatis." (Reland, *Palaest.* pp. 302, 303, 678, 679.) The place was visited by Captains Irby and Mangles in 1818, and is thus described by those intelligent travellers: "Looking down into the valley of Callirrhoe, it presents some grand and romantic features. The rocks vary between red, grey, and black, and have a bold and imposing appearance. The whole bottom is filled, and in a manner choked, with a crowded thicket of canes and aspens of different species, intermixed with the palm, which is also seen rising in tufts in the recesses of the mountain's side, and in every place whence the springs issue. In one place a considerable stream of hot water is seen precipitating itself from a high and pe of rock, which is strongly tinted w yellow of sulphur deposited upon i the bottom, we found ourselves a termed a hot river, so copious and r heat so little abated; this contin downwards, by its receiving const water of the same temperature... abundant springs, all within the dis mile, discharging themselves into th angles with its course. We judged the Dead Sea by the ravine to be ab a half. Maclean says that there city at Callirrhoe; in which we thin nature of the place, he must be wro not space or footing for a town in as we saw it. That Herod must lodging when he visited these spri there are sufficient remains to prov of buildings have been erected. Th of the shelf, where the springs are with tiles and broken pottery; a surprising, within very few minu particular search, four ancient co found; all were too much defaced t able, but they appeared to be Roma 467—469.) Its course to the D plored in 1848 by the American ex scribed by Lieut. Lynch. "The str and 10 inches deep, rushes in a so with great velocity into the sea. the air 70°, of the sea 78°, of th mile up the chasm 95°. It was a to the taste." It issues from a cha (the perpendicular sides of which 150 feet in height), and runs thro about 2 furlongs to the sea. (Ly p. 371.)

actice of finding a significant
ost foreign names, some derived
rn, to which the form of the
ear some resemblance (Schol.
; Avien. *Or. Mar.* 348, 349).
e, though evidently confused,

are the statements of Eustathius (*ad Dion. Perieg.* 64) and Avienus (*l. c.* 344—347). The former says that, of the two pillars of Hercules, that in Europe was called *Calpe* in the barbarian tongue, but *Alybe* (Ἀλύβη) by the Greeks; and that in Libya *Abenna* by the barbarians (comp. Philostr. *l. c.*) and *Cynegetice* (Κυνηγετική) in Greek, or, as he says lower down *Abyle* or *Abylyx* (Ἀβύλην ἢ Ἀβύλυκα). Avienus, confining the name *Abila* to the rock on the African shore, interprets the word to mean in Punic, *a lofty mountain*. Probably the words *Abila*, *Abyla*, *Alyba*, *Calpe*, were originally identical; the chief difference of form being in the presence or absence of the guttural; and it seems most likely that the root is Phoenician, though some would make it Iberian, and connect it with the well-known Celtic root *Alp*. (Salmas. *ad Solin.* p. 203; Tzsch. *ad Mel.* ii. 6. § 8; Wernsdorf, *ad Avien. l. c.*). Whatever may be the origin of the name of Calpe, it is probably the same word which we find used in reference to the S. of Spain in the various forms, *Carp*-e, *Cart*-eia, *Tart*-essus, as will appear under CARTEIA, where also will be found a discussion of Strabo's important statement respecting a city of the name of Calpe.

The rock is too proudly familiar to English readers to need much description. It is composed of grey limestone and marble; its length from N. to S. is about 3 miles; its circumference about 7; and its highest point about 1500 feet above the sea. It divides the Mediterranean from the *Bay of Gibraltar or Algesiras*, which opens up from the *Straits*, having 5 miles for its greatest width, and 8 for its greatest depth. At the head of this bay was the ancient city of CARTEIA.

The modern name is a corruption of *Jebel-Tarik*, i. e. *the hill of Tarik*, a name derived from the Moorish conqueror who landed here, April 30, 711. (Ford, *Handbook of Spain*, p. 107; Carter, *Journey from Gibraltar to Malaga;* Col. James, *Hist. of the Herculean Straits.*) [P. S.]

CALPE (Κάλπη), a river of Bithynia, the Chalpas of Strabo (p. 543). It lies between the Psilis, from which it is 210 stadia distant, and the Sangarius. There was also a port called the port of Calpe. Xenophon (*Anab.* vi. 4), who passed through the place on his retreat with the Ten Thousand, describes it as about half way between Byzantium and Heraclea: it is a promontory, and the part which projects into the sea is an abrupt precipice. The neck which connects the promontory with the mainland is only 400 feet wide. The port is under the rock to the west, and has a beach; and close to the sea there is a source of fresh water. The place is minutely described by Xenophon, and is easily identified on the maps, in some of which the port is marked *Kirpe Limán*. Apollonius (*Arg.* ii. 661) calls the river Calpe "deep flowing" [G. L.]

CALPIA. [CARTEIA.]

CALUCO'NES (Καλούκωνες), a tribe of the Lepontii in Rhaetia, the name of which is still preserved in that of the valley of *Kalanca*. (Plin. iii. 24; Ptol. ii. 12. § 3.) [L. S.]

CALVUS, a hill near Bilbilis, in Hispania Tarraconensis, mentioned by Martial (i. 49). [P. S.]

CALYCADNUS (Καλύκαδνος), one of the largest rivers of Cilicia. (Strab. p. 670.) It rises in the range of Taurus, and after a general eastern course between the range of Taurus and the high land which borders this part of the coast of Cilicia, it passes *Selefkieh*, the remains of Seleuceia, and enters

Digitized by Google

Mediterranean north-east of the promontory of
don. "The most fertile and the only extensive
in (Cilicia) Trachiotis is the valley of the
adnus, a district which was sometimes called
" (Leake, *Asia Minor*, p. 116.) The Caly-
is is about 180 feet wide, opposite to Seleucia,
there is a bridge of six arches. The river is
called the *Ghiuk-Su*. It enters the sea through
sandy beach. In the treaty between Antiochus
he Romans (Polyb. xxii. 26) the Syrian king
not to navigate west of the promontory Caly-
um, except in certain cases. Livy (xxxviii. 38)
ions the same terms, but he speaks both of
adnum and the Sarpedon (promontoria); and
an (*Syr.* 39) also mentions the two promon-
Calycadnum and Sarpedonium, and in the
order. Now if the Sarpedon of Strabo were the
promontory of *Cape Cavaliere*, as Beaufort
osed (*Karamania*, p. 235), the Calycadnum,
h we may fairly infer to be near Sarpedon, and
the river, might be the long sandy point of
n el Kahpeh, which is between *Cape Cavaliere*,
the mouth of the river Calycadnus. Beaufort
oses this long sandy point to be the Zephyrium
rabo. It is correctly described in the Stadiasmus
a sandy narrow spit, 80 stadia from the Caly-
us," which is about the true distance; but in the
iasmus it is called Sarpedonia. According to
Stadiasmus then the cape called Calycadnum
be, as Leake supposes, the projection of the
coast at the mouth of the Calycadnus. This
ification of Sarpedon with *Lissan el Kahpeh*,
the position of Zephyrium at the mouth of the
adnus, agree very well with Strabo's words; and
Zephyrium of Strabo and Calycadnum of Livy
Polybius and Appian, may be the same. Ptolemy
from west to east mentions Sarpedon, the river
adnus and Zephyrium; but his Zephyrium may
be at the mouth of the Calycadnus. [G. L.]

ALYDNAE INSULAE (Κάλυδναι νῆσοι). A group of islands off the coast of Caria, mentioned by Homer (*Il.* ii. 677), of which the principal one was Calymna. For details, see CALYMNA.

Two small islands off the coast of Troas, said to be situated between Tenedos and the promontory Sigeum. (Strab. xiii. p. 604; Quint. Smyrn. xii. 315; Eustath. *ad Hom. Il.* ii. 677; Tzetz. *ad Lycophr.* 25.) But no islands are found in this position, and it is not impossible that they may owe their name to the passage in Homer mentioned before, though the Calydnae of Homer are in an entirely different position.

ALYDON (Καλυδών: *Eth.* Καλυδώνιος, Calydonius: *Kurt-agá*), the most celebrated city of Aetolia, in the heroic age, was founded by Aetolus in the land of the Curetes, and was called Calydon, after the name of his son. Calydon and the neighbouring plain of Pleuron are said by Strabo to have been once the ornament (πρόσχημα) of Greece, but to have come in his time into insignificance. Calydon was situated in a fertile plain near the Evenus, and at a distance of 7½ (Roman) miles from the sea, according to Pliny. It is frequently mentioned by Homer, who gives it the epithet of πετρήεσσα and αἰπεινή, from which we might conclude that the city was situated on a rocky height; but Strabo thinks that these epithets were to be applied to the district and not to the city itself. Homer also celebrates the fertility of the plain of the "lovely" (ἐρατεινή) Calydon. (Apollod. i. 7. § 7; Plin. iv. 3; Hom. *Il.* ii. 640, ix. 577, xiii. 217, xiv. 116; Strab. pp. 450, seq., 460.) In the earliest times the inhabitants of Calydon appear to have been engaged in incessant hostilities with the Curetes, who continued to reside in their ancient capital Pleuron, and who endeavoured to expel the invaders from their country. A vivid account of one of the battles between the Curetes and Calydonians is given in an episode of the Iliad (ix. 529, seq.). The heroes of Calydon are among the most celebrated of the heroic age. It was the residence of Oeneus, father of Tydeus and Meleager, and grandfather of Diomedes. In the time of Oeneus Artemis sent a monstrous boar to lay waste the fields of Calydon, which was hunted by Meleager and numerous other heroes. (See *Dict. of Myth.* art. *Meleager*.) The Calydonians took part in the Trojan war under their king Thoas, the son (not the grandson) of Oeneus. (Hom. *Il.* ii. 638.)

Calydon is not often mentioned in the historical period. In B. C. 391 we find it in the possession of the Achaeans, but we are not told how it came into their hands; we know, however, that Naupactus was given to the Achaeans at the close of the Peloponnesian war, and it was probably the Achaeans settled at Naupactus who gained possession of the town. In the above-mentioned year the Achaeans at Calydon were so hard pressed by the Acarnanians that they applied to the Lacedaemonians for help; and Agesilaus in consequence was sent with an army into Aetolia. Calydon remained in the hands of the Achaeans till the overthrow of the Spartan supremacy by the battle of Leuctra (B. C. 371), when Epaminondas restored the town to the Aetolians. In the civil war between Caesar and Pompey (B. C. 48) it still appears as a considerable place; but a few years afterwards its inhabitants were removed by Augustus to Nicopolis, which he founded to commemorate his victory at Actium (B. C. 31). It continues however to be mentioned by the later geographers. (Xen. *Hell.* iv. 6. § 1; Paus. iii. 10. § 2; Diod. xv. 75; Caes. *B. C.* iii. 35; Mel. ii. 3. § 10; Plin. iv. 3; Ptol. iii. 15. § 14.) Calydon was the head-quarters of the worship of Artemis Laphria, and when the inhabitants of the town were removed to Nicopolis, Augustus gave to Patrae in Achaia the statue of this goddess which had belonged to Calydon. (Paus. iv. 31. § 7, vii. 18. § 8.) There was also a statue of Dionysus at Patrae which had been removed from Calydon. (Paus. vii. 21.) Near Calydon there was a temple of Apollo Laphrius (Strab. p. 459, with Kramer's note); and in the neighbourhood of the city there was also a lake celebrated for its fish. [See p. 64, a.]

In the Roman poets we find *Calydōnis*, a woman of Calydon, i. e. Deïanīra, daughter of Oeneus, king of Calydon (Ov. *Met.* ix. 112); *Calydonius heros*, i. e. Meleager (*Ibid.* viii. 324); *Calydonius amnis*, i. e. the Achelous, separating Acarnania and Aetolia, because Calydon was the chief town of Aetolia (*Ibid.* viii. 727, ix. 2); *Calydonia regna*, i. e. Aetolia, because Diomedes, the son of Tydeus, and grandson of Oeneus, king of Calydon, afterwards obtained Apulia as his kingdom. (*Ibid.* xiv. 512.)

There has been some dispute respecting the site of Calydon. The Peutingerian Table places it east of the Evenus, and 9 miles from this river; but this is clearly a mistake. It is evident from Strabo's account (p. 450, seq.), and from all the legends relating to Calydon, that both this city and Pleuron lay on the western side of the Evenus, between this

ii. 81) — "silvis umbrosa Calymne" — does not apply to the present condition of the island, and was probably equally inapplicable in antiquity; since the island is mountainous and bare. It produces figs, wine, barley, oil, and excellent honey; for the latter it was also celebrated in antiquity. ("Fecundaque mella Calymne," Ov. *Met.* viii. 222; Strab. *l. c.*)

With respect to the ancient towns, Pliny in one passage (iv. 12. s. 23) mentions only one town, Coos; but in another (v. 31. s. 36) he mentions three, Notium, Nisyrus, Mendeterus. The principal ancient remains are found in the valley above the harbour *Lindria* on the western side of the island; but Ross found no inscriptions recording the name of the town. The chief ruins are those of a great church τοῦ Χριστοῦ τῆς Ἱερουσαλήμ, built upon the site of an ancient temple of Apollo, of which there are still remains. Stephanus (*s. v.* Κάλυνδνα) speaks of Apollo Calydneus. South of the town there is a plain still called Argos, as in the island of Casus. [CASUS.] (Ross, *Reisen auf den Grischischen Inseln*, vol. ii. p. 92, seq., vol. iii. p. 139.)

CALYNDA (Κάλυνδα: *Eth.* Καλυνδεύς), a town of Caria, according to Stephanus, is placed by Strabo 60 stadia from the sea (p. 561), west of the Gulf of Glaucus, and east of Caunus. The MSS. of Strabo appear to have Calymna, which, however, is an error of the copyists. It appears, from a passage in Herodotus (i. 172), that the territory of Caunus bordered on that of Calynda. Damasithymus (Herod. viii. 87), king of Calynda, was at the battle of Salamis with some ships on the side of Xerxes; from which we may conclude that Calynda was near the coast, or had some sea-port. Calynda was afterwards, as it appears from Polybius (xxxi. 17), subject to Caunus; but having revolted from Caunus, it placed itself under the protection of the Rhodians.

Fellows supposes Calynda to be under a range of mountains near the sea, between two ridges of rocks; "many large squared stones lie in heaps down the slope facing the east, and the valley is guarded by walls of a very early date of Greek workmanship." He concludes, from the style of the tombs, that the city was in Lycia. The place is near the gulf of Glaucus or *Makri*, and east of the river *Talaman-us*. The remains which he saw are assigned to Daedala by Hoskyn. (Spratt's *Lycia*, vol. i. p. 42.) But Fellows discovered a city which is proved by inscriptions to be Cadyanda, a name otherwise unknown to us. It lies NNE. of *Makri*, on the Gulf of Glaucus or *Makri*, at a place called *Hoozoomlee*, situated on an elevated plain, immediately above which are the ruins of Cadyanda. There are many rock tombs and sculptures, one of which is represented in the frontispiece to Fellows' *Lycia*. "The ruins of the city are seated on the level summit of a high mountain; a great street, bordered with temples and public buildings, runs down the centre." (Spratt's *Lycia*.) Hoskyn, who discovered Caunus, looked in vain for ruins between that place and Cadyanda. Accordingly it is suggested that the mountains of *Hoozoomlee* may be the Calyndian mountains. (Spratt's *Lycia*, vol. i. p. 43.) But these Calyndian mountains are a modern invention, perhaps originating in a misunderstanding of Herodotus (i. 132), who speaks of the "Calyndian frontiers" (*ὅρων τῶν* Καλυνδικῶν). Between *Hoozoomlee* and *Makri*, a distance of about 9 miles, there are no ruins; "but in the centre of the plain of *Makri* there is a burial ground, where some large inscribed blocks, apparently the remains of a building which stood on

Digitized by Google

the spot, have the name 'Cadyanda' included in their inscriptions." (Spratt's *Lycia*, vol. i. p. 44.) It is stated in another passage in this work that the monumental inscription was found five or six miles south of Cadyanda.

The name Calynda occurs in Ptolemy (v. 3) as a Lycian city, and it is the nearest Lycian city to Caunus in Caria. Pliny (v. 28) mentions "Flumen Axon, Oppidum Calynda." It is plain that Ptolemy's Calynda will not suit the position of Cadyanda; nor can the position of Cadyanda be reconciled with Strabo's position of Calynda. It is certain that Calynda is not Cadyanda. None of the inscriptions of Cadyanda which are given by Fellows and in Spratt's *Lycia* are of an early period. There is little or no doubt that Calynda is in the basin of the large river *Tulaman-Su*, which seems to be the Calbis of Strabo, and the same river that Pliny and Livy call the Indus. [G. L.]

CA'MACHA (Κάμαχα: *Kemākh*), a strong fortress of Armenia, called in Armenian GAMAKH, and also AXI, was well known in history, but it was not till lately that its site could be identified. Mr. Brant (*Journ. Geog. Soc.* vol. vi. p. 203) places it at about 26 miles SW. from *Ersing'in*, on the left bank of the W. Euphrates (*Kara-Sū*). It is a singular place; an elevated portion of the town is within a wall of very ancient structure, but commanded by mountains rising close to it. The remainder is situated on a slope amidst gardens ascending from the river bank. It enclosed a celebrated temple of the god Aramazd, containing a great number of literary monuments, which were destroyed by the orders of St. Gregory of Armenia. Here were deposited the treasures of the Armenian kings, as well as many of their tombs: hence the name,—the word *Gamakh* signifying "a corpse." The Byzantine emperors kept a strong garrison here to defend the eastern part of their empire from the attacks of the Moslems, up to the commencement of the 11th century.

(Comp. Const. Porph. *de Adm. Imp.* 50; St. Martin, *Mém. sur l'Armenie*, vol. i. p. 72; Ritter, *Erdkunde*, vol. x. p. 782; Chesney, *Exped. Euphrat.* vol. i. p. 41.) [E. B. J.]

CAMARA (Καμάρα: *Eth.* Καμαραῖος, Steph. B.), a city of Crete, situated to the E. of Olus (Ptol. iii. 17. § 5), at a distance of 15 stadia according to the Maritime Itinerary. Xenion, a Cretan historian quoted by Steph. B. (*s. v.*), says that it was once called Lato. (Hoeck, *Kreta*, vol. i. pp. 10, 394, 416.) [E. B. J.]

CAMARACUM (*Cambray*), in Gallia, a town of the Nervii, on the road from Bagacum (*Bavay*) to Tarnenna (*Teroenne*). It is first mentioned in the Antonine Itin. and in the Table. *Cambray* is on the right bank of the Escaut or Schelde, in the French department of *Nord*. Its position is easily fixed by the Itineraries. [G. L.]

CAMARI'NA (Κομάρινα or Καμαρῖνα: *Eth.* Καμαριναῖος, Camarinensis: *Camarana*), a celebrated Greek city of Sicily, situated on the S. coast of the island, at the mouth of the little river Hipparis. It was about 20 miles E. of Gela, and 40 from Cape Pachynum. Thucydides tells us that it was a colony of Syracuse, founded 135 years after the establishment of the parent city, i. e. 599 B.C., and this date is confirmed by the Scholiast on Pindar, which places its foundation in the 45th Olympiad. (Thuc. vi. 5; Schol. *ad Pind. Ol.* v. 16; Euseb. *Chron. ad Ol. XLV.*) It must have risen rapidly to prosperity, as only 46 years after its first foundation it attempted to throw off the yoke of the parent city, but the effort proved unsuccessful; and, as a punishment for its revolt, the Syracusans destroyed the refractory city from its foundations, B.C. 552. (Thuc. *l. c.*; Scymn. Ch. 294—296; Schol. *ad Pind. l. c.*) It appears to have remained desolate until about B.C. 495, when Hippocrates, tyrant of Gela, by a treaty with Syracuse, obtained possession of the territory of Camarina, and restored the city, himself assuming the title of its founder or œkist. (Thuc. *l. c.*; Herod. vii. 154; Philist. *ap. Schol. ad Pind. Ol.* v. 19.) This second colony did not last long, having been put an end to by Gelon, the successor of Hippocrates, who, after he had made himself master of Syracuse, in B.C. 485, removed thither all the inhabitants of Camarina, and a second time destroyed their city. (Herod. vii. 156; Thuc. *l. c.*; Philist. *l. c.*) But after the expulsion of Thrasybulus from Syracuse, and the return of the exiles to their respective cities, the people of Gela, for the third time, established a colony at Camarina, and portioned out its territory among the new settlers. (Diod. xi. 76; Thuc. *l. c.*, where there is no doubt that we should read Γελῴων for Γέλωνος: Schol. *ad Pind. Ol.* v. 19.) It is to this third foundation, which must have taken place about B.C. 461, that Pindar refers in celebrating the Olympic victory of Psaumis of Camarina, when he calls that city a newly-founded abode (*τὰν νέοικον ἕδραν, Ol.* v. 19). In the same ode the poet celebrates the rapidity with which the buildings of the new city were raised, and the people passing from a state of insignificance to one of wealth and power (*ἀπ' ἀμαχανίας ἐς εὖπ. Ib.* 31). The new colony was indeed more fortunate than its predecessors, and the next 50 years were the most flourishing period in the history of Camarina, which retained its independence, and assumed a prominent rank among the Greek cities of Sicily. In their political relations the Camarinaeans appear to have been mainly guided by jealousy of their powerful neighbour Syracuse: hence they were led to separate themselves in great measure from the other Dorian cities of Sicily, and during the war between Syracuse and Leontini, in B.C. 427, they were the only people of Dorian origin who took part with the latter. At the same time there was always a party in the city favourable to the Syracusans, and opposed to join the Dorian alliance, and it was probably the influence of this party that a few years after induced them to conclude a truce with their neighbours at Gela, which eventually led to a general pacification. (Thuc. iii. 86, iv. 25, 65.) By the treaty finally concluded, Thucydides tells us, it was stipulated that the Camarinaeans should retain possession of the territory of Morgantia (Μοργαντία), an arrangement which it is not easy to understand, as the city of that name was situated far away in the interior of Sicily. [MORGANTIA.] A few years later the Camarinaeans were still ready to assist the Athenians in supporting the Leontines by arms (Thuc. v. 4); but when the great Athenian expedition appeared in Sicily, they were naturally alarmed at the ulterior views of that power, and refused to take part with either side, professing to maintain a strict neutrality. It was not till fortune had declared decidedly in favour of the Syracusans that the Camarinaeans sent a small force to their support. (Thuc. vi. 75, 88; Diod. xiii. 4, 12.)

A few years later the great Carthaginian invasion of Sicily gave a fatal blow to the prosperity of Camarina. Its territory was ravaged by Hamilcar in the spring of B.C. 405, but the city itself was not

i. The former, which is much
e of the two, is evidently the
of Pindar (*Ol.* v. 27), which
g past the town, and supplying
water by means of artificial
canals or aqueducts. It is a copious stream of clear water, having its principal source in a large fountain at a place called *Comisò*, supposed by some writers to be the Fons Dianae of Solinus, which he places near Camarina. (Solin. 5. § 16.) There is, however, another remarkable fountain at a place called *Favara*, near the town of *Santa Croce*, which has, perhaps, equal claim to this distinction. (Fazell. v. 1. p. 225; Cluver. *Sicil.* p. 191; Hoare, *Class. Tour*, vol. ii. pp. 261—263.) The *Frascolari* is probably the OANIS (Ὦανις), known to us only from the same passage of Pindar. More celebrated than either of these streams was the Lake of Camarina (called by Pindar, *l. c.*, ἐγχωρίαν λίμνην; Palus Camarina, Claudian), which immediately adjoined the walls of the city on the N. It was a mere marshy pool, formed by the stagnation of the Hipparis near its mouth, and had the effect of rendering the city very unhealthy, on which account we are told that the inhabitants were desirous to drain it, but, having consulted the oracle at Delphi, were recommended to let it alone. They nevertheless executed their project; but by so doing laid open their walls to attack on that side, so that their enemies soon after availed themselves of its weakness, and captured the city. The period to which this transaction is to be referred is unknown, and the whole story very apocryphal; but the answer of the oracle, Μὴ κίνει Καμάριναν· ἀκίνητος γὰρ ἀμείνων, passed into a proverbial saying among the Greeks. (Virg. *Aen.* iii. 700; Serv. *ad loc.*; Suid. *s. v.* Μὴ κίνει Κ.; Steph. B. *s. v.* Καμάρινα; Sil. Ital. xiv. 198.)

The remains still extant of Camarina are very inconsiderable: they consist of scattered portions of the ancient walls, and the vestiges of a temple, now converted into a church; but the site of the ancient city is distinctly marked, and the remains of its port and other fragments of buildings on the shore were still visible in the 17th century, though now for the most part buried in sand. (Hoare, *l. c.* p. 260; Fazell. v. 2; Cluver. *Sicil.* p. 192; Amico, *Lex. Topogr. Sicil.* vol. i. p. 147.)

The coins of Camarina are numerous: they belong for the most part to the flourishing period of its existence, B.C. 460—405. Some of them have the head of the river-god Hipparis, represented, as usual, with horns on his forehead. Others (as the one annexed) have the head of Hercules, and a quadriga on the reverse, probably in commemoration of some victory in the chariot race at the Olympic games.

[E. H. B.]

COIN OF CAMARINA.

CAMATULLICI. The "regio Camatullicorum" is mentioned by Pliny (iii. 4) between Portus Citharista and the Suelteri. The position must be on or near the coast, east of *Marseille*. It is supposed by Harduin (note on the passage of Pliny) that a place called *Ramatuelle*, near the coast, south of the Gulf of *Grimaud*, represents the ancient name; and D'Anville and others adopt this opinion. [G. L.]

CAMBADE'NE (Καμβαδηνή, Isid. *Charax*. p. 6), a district of Greater Media, in which was a place called Baptana, containing a statue and pillar of Semiramis. [BAGISTANUS MONS.] [V.]

CAMBALA (Κάμβαλα), in the district of Hyspiratis, to which Alexander the Great sent Menon with troops to examine for gold; the detachment was entirely destroyed. (Strab. xi. p. 529.) St. Martin (*Mém. sur l'Arménie*, vol. i. p. 69) supposes the Hyspiratis of Strabo to refer to the district of *Isper*, NE. of *Erzrûm*; but in another place Strabo (p. 503) appears to denote the same district under the name of Syspiratis, and this he places to the S., beyond the limits of Armenia, and bordering on Adiabene, which will not suit the position of *Isper*; nor did the troops of Alexander at any time approach the neighbourhood of *Erzrûm*. Major Rawlinson suspects that these mines may be recognised in the metallic riches of the mountainous country on the *Asped-Rûd* or *Kizil-Uzen*. (*Journ. Geog. Soc.* vol. x. p. 148.) [E. B. J.]

CAMBALIDUS MONS. [BAGISTANUS MONS.]

CAMBES, a place in Gallia, according to the Anton. Itin. and the Table, on the road from Augusta Rauracorum (*Augst*) to Argentoratia, on the left bank of the Rhine. Cambes is *Gros Kembs*, on the Rhine, in the department of *Haut Rhin*. There is a Little *Kembs* on the opposite side of the river. [G. L.]

CAMBIOVICENSES, a name of a people that appears in the Table; but the indication of their position, as usual with the names of peoples in the Table, is too vague to enable us to fix the position of the Cambiovicenses. (D'Anville, *Notice*, &c.; Walckenaer, *Géog.* vol. i. p. 372.) [G. L.]

CAMBODU'NUM, in Britain. The second Itinerary presents the difficulty which attends so many of the others, viz., a vast difference between not only the shortest route, but between the recognised roads and the line of the stations. Thus the line is from the Vallum to Rutupiae (*Richborough*): nevertheless, when we reach Calcaria (*Tadcaster*), though there is one road due south and another south-east, the route of the Itinerary takes us round by Manchester, Chester, and Wroxeter. Besides this, the sum of miles at the heading of the *Iter*, and the sum of the particular distances, disagree. Again, some of the numbers vary with the MS.; and this is the case with the present word. From Eboracum (*York*) to

	M. P.
Calcaria (*Tadcaster*) - -	ix.
Cambodunum - - -	xx. al. xxx.
Mancunium (*Manchester*) -	xviii. al. xxiii.

The neighbourhood of Elland, between Halifax and Huddersfield, best satisfies these conditions; and, accordingly, Grethland, Sowerby, Almondbury, Grimscar, Stainland (at all of which places Roman remains have been found), have been considered as the representatives of Cambodunum. In the *Monumenta Britannica* its modern equivalent is *Slack*. [R.G.L.]

CAMBOLECTRI. Pliny (iii. 5) mentions Cambolectri Atlantici in Gallia Narbonensis, but it is difficult to say where he supposes them to be. He also, under the Aquitanic nations (iv. 19), mentions "Cambolectri Agesinates Pictonibus juncti," as Harduin has it; but "Cambolectri" ought to be separated from Agesinates, as Walckenaer affirms, and he places them about *Combo*, in the arrondissement of *Bayonne*, in the department of *Basses Pyrénées*. It appears from Pliny mentioning these peoples and distinguishing them, that they are two genuine names. It has been conjectured that the name Cambonum [CAMBONUM] may be geographically connected with the Cambolectri. [G. L.]

CAMBO'NUM, a place in Gallia, mentioned in the Jerusalem Itin., on the road from Civitas Valentia (*Valence*), through Civitas Vocontiorum (*Die*) to Mansio Vapincum (*Gap*). The route is very particularly described. From *Die* it goes to Mansio Luco (*Luc*), then to Mutatio Vologatis (*Vaupa*); then the Gaura Mons is ascended, and the traveller comes to Mutatio Cambonum; the next station beyond Cambonum is Mons Seleucus (*Saleon*). Walckenaer (vol. iii. p. 46) places Cambonum at *La Cluse*, to the south of *Montclus*. D'Anville did not venture to assign a site for Cambonum; but if the route has been well examined, the place ought not to be doubtful. [G. L.]

CAMBORICUM, in Britain. Another reading is *Camboritum*, and perhaps this is preferable. — The *-rit-* having the same power with the *Rhyd-* in *Rhydguna* (Ox-*ford*) = *ford*. In this case the word would mean a *ford over the Cam*. The name occurs in the fifth Itinerary, and the difficulties which attend it are of the same kind as those belonging under CAMBODUNUM.

The line, which is from London to Carlisle, runs to Caesaromagus (*Writtle*), Colonia (*Colchester* or *Maldon*), Villa Faustini, Iciani, Camboricum, Isurelipons, Durobrivae, Causennae, Lindum, — this last point alone being one of absolute certainty, i.e. *Lincoln*. That *Ancaster* = Causennae is nearly certain; but the further identifications of Villa Faustini with *Dunmow*, of Iciani with *Chesterford*, and Durolipons with *Cambridge* or *Godmanchester*, and of Durobrivis with *Caistor* or *Water-Newton*, are uncertain. Add to this the circuitous character of any road from London to Lincoln *viâ* either Colchester or Maldon. The two localities most usually given to Camboricum are *Cambridge* and *Icklingham* (near Mildenhall in Suffolk). In the former there are the *castra* of *Chester*-ton and Grant-*chester*, in the latter a *Camp*-field, a *Rom*-pit-field, and numerous Roman remains. Again, — as Horsley remarks, — the river on which Icklingham stands runs into the Cam, so that the first syllable may apply to the one place as well as the other. Probably, the true identification has yet to be made. [R.G.L.]

CAMBU'NII MONTES a range of mountains forming the boundary between Macedonia and Thessaly, is a continuation of the Ceraunian mountains and terminates at Mt. Olympus on the east. The name of these mountains contains the root Βορρα. The principal pass through these mountains is called Volustana by Livy, the modern pass of Sarantaporo. Leake remarks, that "in the word Volustana the V represents probably the B, which was so common an initial in Macedonian names of places; the two last syllables, *στανὰ*, are perhaps the Macedonian form of *στενὰ*, and have reference to the pass, the entire name in Greek being Βολοῦ στενά (Liv. xlii. 53, xliv. 2; Leake, *Northern Greece*, vol. iii. p. 338.)

CAMBYSE'NE. [ALBANIA].

CAMBY'SES (*Vori* or *Gori*), a river of Albania, rising in the Caucasus, or, according to Mela, in the Coraxici M., flowing through the district of Cambysene, and falling into the Cyrus (*Kur*), after uniting with the Alazonius (*Alazan*). Pompey marched along its banks, on his expedition into these regions in pursuit of Mithridates, B. C. 65. Its water was remarkable for its coldness. (Mel. iii. 5. § 6; Plin.

Καμαρῖνον, Ptol.; Καμερία, Ap- b.: *Eth.* Camerinus or Camers, city of Umbria, situated in the frontiers of Picenum. It occu- near the sources of the river d a few miles on the E. of the Apennines. No mention of the the Roman Civil Wars, when it of some consequence, and was the Pompeian generals with six r, abandoned it on the advance *B. C.* i. 15; Cic. *ad Att.* viii. 12, the outbreak of L. Antonius at d by Plancus with two legions. .) At a later period, probably s territory was portioned out among military colonists; but it continued to be a municipium, and appears to have been under the empire a tolerably flourishing town. (*Lib. Colon.* pp. 240, 256; Ptol. iii. 1. § 53; Orell. *Inscr.* 920, 2172.)

But while we find but little mention of the city the *people* of the CAMERTES are noticed from an early period as one of the most considerable in Umbria. As early as B. C. 308, the Roman deputies, who were employed to explore the Ciminian forest and the regions beyond it, are said to have advanced as far as to the Camertes ("usque ad Camertes Umbros penetrasse dicuntur," Liv. ix. 36), and established friendly relations with them. These probably became the first foundation and origin of the peculiarly favourable position in which the Camertes stood towards the Roman republic. Thus in B. C. 205, we find them mentioned among the allied cities that furnished supplies for the fleet of Scipio, when they are contrasted with the other states of Etruria and Umbria as being on terms of *equal* alliance with the Romans ("Camertes cum *aequo foedere* cum Romanis essent," Liv. xxviii. 45). Cicero also more than once alludes to the treaty which secured their privileges ("Camertinum foedus sanctissimum atque aequissimum," *pro Balb.* 20; Val. Max. v. 2. § 8; Plut. *Mar.* 28). And at a much later period we find the "Municipes Camertes" themselves recording their gratitude to the emperor Septimius Severus for the confirmation of their ancient rights ("jure aequo foederis sibi confirmato," Gruter, *Inscr.* p. 266. 1; Orell. *Inscr.* 920).

A question has indeed been raised, whether the Camertes of Livy and Cicero are the same people with the inhabitants of Camerinum, who, as we learn from the above inscription and others also found at *Camerino*, were certainly called Camertes. The doubt has been principally founded on a passage of Strabo (v. p. 227), in which, according to the old editions, that writer appeared to distinguish Camerinum and *Camerte* as two different towns; but it appears that Καμαρινον is certainly an interpolation; and the city he calls Camerte, which he expressly places "on the very frontiers of Picenum," can certainly be no other than the Camerinum of the Romans. (See Kramer and Groskurd, *ad loc.*; and compare Du Theil's note at vol. ii. p. 60 of the French translation of Strabo.) Pliny also, who inserts the Camertes among the "populi" of Umbria, makes no other mention of Camerinum (iii. 14. s. 19). There can therefore be no doubt that at this period the Camertes and the people of Camerinum were the same; but it certainly seems probable that at an earlier epoch the name was used in a more extensive sense, and that the tribe of the Camertes was at one time more widely spread in Umbria. We know that the Etruscan city of Clusium was originally called Camers or Camars, and it is a plausible conjecture of Lepsius that this was its *Umbrian* name. (*Tyrrhener Pelasger*, p. 33.) It is remarkable that Polybius speaks of the battle between the Romans and the Gauls in B. C. 296, as fought in the territory of the Camertes (*ἐν τῇ* Καμερτίων *χώρᾳ*, ii. 19), while the same battle is placed by Livy *at Clusium* (x. 26). Again, the narrative of Livy (ix. 36) would seem to imply that the Camertes there mentioned were not very remote from the Ciminian forest, and were the first Umbrian people to which the envoys came. Even Cicero speaks of the "ager Camers" in common with Picenum and Gaul (Gallia Togata) (*pro Sull.* 19) in a manner that can hardly be

Digitized by Google

understood of so limited a district as the mere territory of Camerinum. Perhaps the fact of the recurrence of the name in different forms among the modern towns and villages of this part of Italy—*Camero* near *Foligno*, *Camerata* between *Todi* and *Amelia*, &c., —may be a remnant of this wider extension of the Camertes.

The CAMERINI mentioned by Valerius Maximus (vi. 5. § 1) as having been conquered and reduced to captivity by P. (?) Claudius can be no other than the people of Camerinum; but it is difficult to reconcile his account with the rest that we know of their history. Probably Appius Claudius, the consul of B. C. 268, who reduced the neighbouring province of Picenum, is the person meant. [E. H. B.]

CAMERTES. [CAMERINUM.]

CAMICUS (Καμικός), a city or fortress of Sicily, which, according to the mythical history of that island, was constructed by Daedalus for Cocalus, the king of the Sicanians, who made it his royal residence, and deposited his treasures there, the situation being so strong and so skilfully fortified as to be altogether impregnable. According to the same legend, it was here also that Minos, king of Crete, who had pursued Daedalus to Sicily, was treacherously put to death by Cocalus, and secretly buried; his bones were said to have been discovered in the time of Theron. (Diod. iv. 78, 79; Strab. vi. pp. 273—279; Arist. *Pol.* ii. 10; Steph. Byz. *v.* Καμικός, Tzetz. *Chil.* i. 506—510.) The same story is alluded to by Herodotus (vii. 170), who tells us that the Cretans sent an expedition to Sicily to avenge the death of Minos, and besieged Camicus for five years, but without success. It was also chosen by Sophocles as the subject of one of his tragedies, now lost, called the Καμικιοι (Athenae. iii. p. 86, ix. p. 388; Soph. fr. 299—304, ed. Dind.). From the words of Herodotus it has been erroneously inferred that Camicus occupied the site on which Agrigentum was afterwards founded, and the citadel or acropolis of that city has been regarded by many writers as the fortress of Daedalus. (Smyth's *Sicily*, p. 204; Swinburne's *Travels*, vol. ii. p. 273.) But we find mention in historical times of a fortress named Camicus, as existing in the territory of Agrigentum, but quite apart from the city. It was occupied by Hippocrates and Capys, the cousins of Theron, when they were expelled by him from Agrigentum (Schol. *ad Pind. Pyth.* vi. 4.), and is again mentioned among the fortresses reduced by the Romans in the First Punic War, *after* the conquest of Agrigentum. (Diod. xxiii. Exc. Hoesch. p. 503.) We are told also that it was situated on a river of the same name (Steph. Byz. *v.* Ἀκράγας; *Vib. Sequest.* p. 7), which is supposed by Cluverius to be the one now called *Fiume delle Canne*, which flows into the sea about 10 miles W. of *Girgenti*; and the fortress may probably have stood in the neighbourhood of the modern town of *Siculiana*, but its precise site is unknown. (Cluver. *Sicil.* p. 221; Serra di Falco, *Ant. della Sicilia*, vol. iii. pp. 76, 80; Siefert, *Akragas*, pp. 17, 18.) [E. H. B.]

CAMISA (τὰ Κάμισα), a fortress of Camisene or Comisene (comp. Strab. xi. p. 528) in Lesser Armenia, which was destroyed in Strabo's time (xii. p. 560). [E. B. J.]

CAMISE'NE (Καμισηνή). Strabo mentions Culupene or Calupene and Camisene as bordering on the Lesser Armenia, and he includes them within his Pontus. Rock-salt was dug in these districts, and there was a strong place Camisa, which was ruined in Strabo's time (p. 560). In another place (p. 546) he says that the Halys rises in Great Cappadocia, near Pontica, and in Camisene (Καμβωνη in Casaubon's text). Camisa was on the road from Sebastia to Nicopolis, and 24 Roman miles from Sebastia (*Seras*). The Camisene, then, is in the upper basin of the Halys or *Kizil Ermak*. [G. L.]

CAMMANE'NE (Καμμανηνή), a division of Cappadocia. (Strab. pp. 534, 540.) Ptolemy (v. 6), who enumerates six places in the division, calls it Cammanene. Zama, one of the towns, is on the road from Tavium to Mazaca or Caesareia. [G. L.]

CAMPAE (Κάμπαι, Ptol.), and Cambe in the Table, is in the Praefectura Ciliciae of Cappadocia, 16 miles N. or NW. of Mazaca or Caesarea; it has been conjectured to be a place called *Enba*. [G. L.]

CAMPA'NIA (Καμπανία), a province or region of Central Italy, bounded on the N. by Latium, on the E. by the mountains of Samnium, on the S. by Lucania, and on the W. by the Tyrrhenian Sea. Its exact limits varied at different periods. The Liris appears to have been at first recognised as its northern boundary, but subsequently the district south of that river, as far as the Massican hills and the town of Sinuessa, was included in Latium, and the boundaries of Campania diminished to the same extent. (Strab. v. p. 242.) On the S. also, the territory between the Silarus, which formed the boundary of Lucania, and the ridge of the Apennines that bounds the Gulf of Posidonia on the N., was occupied by the people called PICENTINI (a branch of the inhabitants of Picenum on the Adriatic), and was not reckoned to belong to Campania, properly so called, though united with it for administrative purposes.

Originally, indeed, the name of Campanians appears to have been applied solely to the inhabitants of the great plain, which occupies so large a portion of the province; and did not include the people of the hill country about Suessa, Cales, and Teanum, which was occupied by the Aurunci and Sidicini. But Campania, in the sense in which the term is used by Strabo and Pliny, was bounded on the N. by the low ridge of the Massican hills, which extend from the sea near Sinuessa to join the more lofty group of volcanic mountains that rise between Suessa and Teanum, and comprised the whole of the latter range. Venafrum and the territory annexed to it, in the valley of the Vulturnus, which had been originally Samnite, were afterwards included in Campania; though Strabo appears in one passage (v. p. 238) to assign them to Latium. The eastern frontier of Campania is clearly marked by the first ridges of the Apennines, the MONS CALLICULA N. of the Vulturnus, and the MONS TIFATA S. of that river, while other ranges of still greater elevation continue the mountain barrier towards the SE. to the sources of the Sarnus. Near this latter point, a side arm or branch is suddenly thrown off from the main mass of the Apennines, nearly at right angles to its general direction, which constitutes a lofty and narrow mountain ridge of about 24 miles in length, terminating in the bold headland called the Promontory of Minerva, but known also as the Surrentine Promontory. It is this range which separates the Gulf of Cumae or Crater, as the *Bay of Naples* was called in ancient times, from that of Posidonia, and which constituted the limit also between Campania in the stricter sense of the term, and the territory of the Picentini. The latter occupied the district S. of this range along the shores of the Posidonian Gulf, as far as the mouth of the Silarus.

robably derived the modern name

of *Terra di Lavoro*, now used to designate the whole district of Campania.

It is this extensive plain which was so celebrated in ancient, as well as modern, times for its extraordinary fertility. Strabo calls it the richest plain in the world (πεδίον εὐδαιμονέστατον τῶν ἁπάντων), and tells us that it produced wheat of the finest quality; while some parts of it yielded four crops in the year,—two of spelt (ζειά), one of millet, and the fourth of vegetables (λάχανα). (Strab. v. p. 242.) Pliny also relates that it grew two crops of spelt and one of millet every year; while those parts of it that were left fallow produced abundance of roses, which were employed for the ointments and perfumeries for which Capua was celebrated. The spelt of the Campanian plain was of particularly fine quality, so that it was considered to be the only one fit for the manufacture of "alica," apparently a kind of *pasta*, called by Strabo χόνδρος. (Plin. xviii. 8. s. 9, 11. s. 29.) Virgil also selects the plains around the wealthy Capua and the tract at the foot of Vesuvius as instances of soils of the best quality for agricultural purposes, adapted at once for the growth of wine, oil, and corn. (Virg. *G.* ii. 224.) From the expressions of Cicero already cited, it is evident that the "ager Campanus,"—the district immediately around the city of Capua,—while it continued the public property of the Roman state, was one of the chief quarters from whence the supplies of corn for the public service were derived. There is no doubt that vines were cultivated (as they are at the present day) all over the plain (see Virg. *l. c.*), but the choicest wines were produced on the slopes of the hills; the Massican and Falernian on the sides of the Mons Massicus and the adjoining volcanic hills near Suessa and Cales, the Gauran on the flanks of Mt. Gaurus and the other hills near Puteoli, and the Surrentine on the opposite side of the bay. All these were reckoned among the most celebrated wines then known. Nor was the olive-oil of Campania less distinguished: that of Venafrum was proverbial for its excellence (Hor. *Carm.* ii. 6. 16), and the other hilly tracts of the province were scarcely inferior to it. (Plin. iii. 5. s. 9; Strab. v. p. 243; Flor. i. 16.)

The maritime advantages of Campania were scarcely less remarkable than those which it derived from the natural fertility of its territory. Its coast-line has a tolerably uniform direction towards the SE. from the mouth of the Liris to Cumae: but S. of that city it is interrupted by the bold and isolated group of volcanic hills already described, which terminate towards the S. in the lofty and abrupt headland of Misenum. Between this point and the Promontory of Minerva, which is itself (as already pointed out) but the extremity of a bold and lofty arm of the Apennines, the coast is deeply indented by the beautiful bay, known in ancient times as the CRATER, from its cup-like form, but called also the SINUS CUMANUS and PUTEOLANUS, from the neighbouring cities of Cumae and Puteoli,—and now familiarly known to all as the *Bay of Naples*. (Strab. v. pp. 242, 247.) The two ranges which constitute the two headlands bounding this gulf are farther continued by the outlying islands adjoining them: those of AENARIA and PROCHYTA, off Cape Misenum, being, like the hills on the adjacent mainland, of volcanic origin; while that of CAPREAE, with its precipitous cliffs and walls of limestone, is obviously a continuation of the calcareous range of the Apennines, which ends in the Surrentine Promontory. The shores of this beautiful gulf, so nearly land-locked,

and open only to the mild and temperate breezes from the SW., were early sought by the Romans, as a place of retirement and luxury; and in addition to the numerous towns that had grown up around it, the houses, villas, and gardens, that filled the intervals between them were so numerous, that, according to Strabo, they presented the aspect of one continuous city. (Strab. *l. c.*) Tacitus also calls it "pulcherrimus sinus," though in his time it had not yet recovered from the frightful devastation caused by the great eruption of Vesuvius in A. D. 79. On the N. shore of this extensive bay, immediately within the headland of Misenum, was another smaller bay, known as the SINUS BAIANUS, or Gulf of Baiae; and here were situated two excellent harbours,—that of Misenum itself, close to the promontory of the same name; and, on the opposite side of the bay, that of Puteoli, which, under the Roman empire, became one of the most frequented ports of Italy.

Strabo speaks of the coast of Campania from Sinuessa to Cape Misenum, as forming a gulf (p. 242); but this is incorrect, that portion of the coast presenting but a slight curvature, though it may be considered (if viewed on a wider scale) as forming a part of the great bay that extends from the Circeian Promontory on the N., to Cape Misenum, or rather to the island of Aenaria (*Ischia*), on the S. On the southern side of the Surrentine Promontory opens out another extensive bay, wider than that of *Naples*, but less deep: this was known in ancient times as the Gulf of Posidonia or Paestum (Sinus Posidoniates, or Paestanus, Strab. v. p. 251; Plin. iii. 5. s. 10); but only its northern shores, as far as the mouth of the Silarus, belonged to Campania.

The climate of Campania was celebrated in antiquity for its soft and genial character, an advantage which it doubtless owed to its exposure to the SW., and to the deep bays with which its coast was indented. It was, indeed, thought that the climate had an enervating influence, and it was to the effect of this, as well as the luxurious habits engendered by the richness of the country, that ancient writers ascribed the unwarlike character of the inhabitants and the frequent changes of population that had taken place there. Besides the beauty of its landscape and the mildness of its climate, the shores of Campania had a particular attraction for the Romans in the numerous thermal waters with which they abounded, especially in the neighbourhood of Baiae, Puteoli, and Neapolis. For these it was doubtless indebted to the remains of volcanic agency in these regions; and the same causes furnished the sulphur, which was found in such abundance in the Forum Vulcani (or *Solfatara*), near Puteoli, as to become a considerable article of commerce. (Lucil. *Acta*, 433.) A peculiar kind of white clay (*creta*) used in the preparation of *alica*, was procured from the hills near the same place, which bore the name of Colles Leucogaei; while the volcanic sand of other hills in the immediate neighbourhood of Puteoli formed a cement of extraordinary hardness, and which was known in consequence by the name of *Puteolanum*. (Plin. xviii. 11. s. 29. xxxv. 6. s. 26.)

All ancient writers are agreed that the Campanians were not the original inhabitants of the country to which they eventually gave their name. Indeed Campania appears, as might have been expected from its great fertility, to have been subject to repeated changes of population, and to have been conquered by successive swarms of foreign invaders. (Pol. iii. 91.) The earliest of these revolutions are involved in great obscurity: but it seems, on the whole, pretty clear that the original population of this fertile country (the first at least of which we have any record) was an Oscan or Ausonian race. Antiochus of Syracuse spoke of it as inhabited by the Opicans, "who were also called Ausonians." Polybius, on the contrary, attempted to establish a distinction between the two, and described the shores of the Crater as occupied by Opicans *and* Ausonians: while others carried the distinction still farther, and represented the Opicans, Ausonians, and Oscans as separate races which successively made themselves masters of the country. (Strab. v. p. 242.) The fallacy of this statement is obvious: *Opicans* and *Oscans* are merely two forms of the same name, and there is every reason to believe that the Ausonians were a branch of the same race, if not absolutely identical with them. [AUSONES.] It appears certain that the first Greek settlers in these regions found them occupied by the people whom they called Opicans, whence this part of Italy was termed by them Opicia (Ὀπικία); and thus Thucydides distinguishes Cumae as Κύμη ἡ ἐν Ὀπικίᾳ (vi. 4). At the same time we find numerous indications of Tyrrhenian (i. e. Pelasgic) settlements, especially on the coast, which appear to belong to a very early period, and cannot be referred to the later Etruscan domination. (Niebuhr, vol. i. p. 45: Abeken, *Mittel Italien*, p. 102.) Whether these were prior to the establishment of the Oscans, or were spread along the coasts, while that people occupied principally the interior, is a point on which it is impossible for us to pronounce an opinion.

The earliest fact that can be pronounced *historical* in regard to Campania, is the settlement of the Greek colony of Cumae; and though we certainly cannot receive as authentic the date assigned to this by the chronologers (B. C. 1050), there seems good reason to believe that it was really, as asserted by Strabo, the most ancient of all the Greek settlements in Italy. [CUMAE.] The Cumaeans soon extended their power, by founding the colonies of Dicaearchia, Palaepolis, and Neapolis; and, according to some accounts, it would seem that they had even formed settlements in the interior at Nola and Abella. (Justin. xx. 1.) But it is probable that their progress was checked by the establishment of a new and more formidable power in their immediate neighbourhood. The conquest of Campania by the Etruscans is a fact which we cannot refuse to receive as historical, imperfect as is the information we have concerning it. Polybius tells us that at the same time that the Etruscans held possession of the plains of Northern Italy, subsequently occupied by the Gauls, they possessed also those of Campania about Capua and Nola; and Strabo says that they founded in this part of Italy twelve cities, the chief of which was Capua. (Pol. ii. 17; Strab. v. p. 242.) The Tuscan origin of Capua and Nola is confirmed by the testimony of Cato; and Livy tells us that the original name of the former city was Vulturnum, an obviously Etruscan form. (Liv. iv. 37; Mela, ii. 4; Cato, *ap.* Vell. Pat. i. 7.) The period at which this Etruscan dominion was established is, however, a very doubtful question. If we adopt the date assigned by Cato for the foundation of Capua (Vell. Pat. i. 7), which he places as late as B. C. 471, we cannot suppose that the period of Etruscan rule lasted much above fifty years,—a space apparently much too short: on the other hand, those who placed the origin of Capua more than three centuries earlier (Vell. Pat. *l. c.*)

petty people of the Sidicini, at-
rful Samnites, applied for aid to
the Campanians. This was readily furnished them: but their new allies were in their turn defeated by the Samnites, in a pitched battle, at the very gates of Capua, and shut up within the walls of their city. In this distress they applied to Rome for assistance; and, in order to purchase the aid of that powerful republic, are said to have made an absolute surrender of their city and territory (*deditio*) into the hands of the Romans. The latter now took up their cause, and the victories of Valerius Corvus at Mt. Gaurus, and Suessula, soon freed the Campanians from all danger from their Samnite foes. (Liv. vii. 29—37.) It is very difficult to understand the events of the two next years, as related to us; and there can be little doubt that the real course of events has been distorted or concealed by the Roman annalists. The Campanians, though nominally subjects of Rome, appear to act a very independent part; and at length openly espoused the cause of the Latins when these broke out into declared hostilities against Rome. The great battle in which the combined forces of the Latins and Campanians were defeated by the Roman consuls T. Manlius and P. Decius was fought near the foot of Mt. Vesuvius, B.C. 340; and was quickly followed by the submission of the Campanians. They were punished for their revolt, by the loss of the whole of that portion of their fertile territory which lay N. of the Vulturnus, and which was known by the name of the "Falernus ager." The knights of Capua (equites Campani), who had throughout opposed the defection from Rome, were rewarded with the full rights of Roman citizens; while the rest of the population obtained only the "civitas sine suffragio." The same relations were established with the cities of Cumae, Suessula, and Acerrae. (Liv. viii. 11, 14, 17; Vell. Pat. i. 14.) Hence we find during the period that followed this war for above 120 years the closest bonds of union subsisting between the Campanians and the Roman people: the former were admitted to serve in the regular legions, instead of the auxiliaries: and for this reason Polybius, in reckoning up the forces of the Italian nations in B. C. 225, classes the Romans and Campanians in one body; while he enumerates the Latins and other allies separately. (Pol. ii. 24.)

The period from the peace which followed the war of B.C. 340, to the beginning of the Second Punic War, was one of great prosperity to the Campanians. Their territory was indeed necessarily the occasional theatre of hostilities during the protracted wars of the Romans with the Samnites: and some of the cities not immediately connected with Capua were even rash enough to expose themselves to the enmity of the Romans, by taking part with their adversaries. But the capture of the Greek city of Palaepolis in B. C. 326, led the neighbouring Neapolitans to conclude a treaty with Rome, which secured them for ever after as its faithful allies; and the conquest of Nola in B. C. 313, and of Nuceria in 308, firmly established the Roman dominion in the southern portion of Campania. This seems to have been admitted and secured by the peace of B. C. 304, which terminated the Second Samnite War. (Liv. viii. 22—26, ix. 28, 41; Niebuhr, vol. iii. p. 259.)

In B. C. 280, Campania was traversed by the armies of Pyrrhus, but his attempts to possess himself of either Capua or Neapolis were ineffectual. (Zonar. viii. 4.) The successes of that monarch do not appear to have for a moment shaken the fidelity of the Campanians. But it was otherwise with those of Hannibal. Immediately after the battle of Cannae

Digitized by Google

(B. C. 216) the smaller towns of Atella and Calatia declared in favour of the Carthaginian general, and shortly after the powerful city of Capua itself opened its gates to him. (Liv. xxii. 61, xxiii. 2—10.) This was not however followed, as might have been perhaps expected, by the reduction of the rest of Campania. Hannibal took Nuceria and Acerrae, but was foiled in his attempts upon Neapolis and Nola: and even the little town of Casilinum was not reduced till after a long protracted siege. From this time Campania became one of the chief seats of the war, and during several successive campaigns was the scene of operations of the rival armies. Many actions ensued with various success: but the result was on the whole decidedly unfavourable to the Roman arms. Hannibal never succeeded in making himself master of Nola, while the Romans were able in the spring of B. C. 212 to form the siege of Capua, and before the close of the following year that important city once more fell into their hands. From this time the Carthaginians lost all footing in Campania, and the war was transferred to other quarters of Italy. The revolted cities were severely punished, and deprived of all municipal privileges; but the tranquillity which this part of Italy henceforth enjoyed, together with the natural advantages of its soil and climate, soon restored Campania to a state of prosperity equal, if not superior, to what it had before enjoyed: and towards the close of the Republic Cicero contrasts its flourishing and populous towns and its fertile territory with the decayed Municipia and barren soil of Latium. (*De Leg. Agr.* ii. 35.)

This interval of repose was not however altogether uninterrupted. The Campanians took no part in the outbreak of the Italian nations which led to the Social War: but they were in consequence exposed to the ravages of their neighbours the Samnites, and Papius Mutilus laid waste the southern part of the province with fire and sword, and took in succession Nola, Nuceria, Stabiae, and Salernum: but was defeated by Sex. Julius under the walls of Acerrae. The next year fortune turned in favour of the Romans, and L. Sulla recovered possession of the whole of Campania, with the exception of Nola, which continued to hold out long after all the neighbouring cities had submitted, and was the last place in Italy that was reduced by the Roman arms. (Appian. *B. C.* i. 42, 45, 65; Vell. Pat. ii. 17, 18.) During the civil wars between Sulla and Cinna, Campania was traversed repeatedly by both armies, and was the scene of some conflicts, but probably suffered comparatively little. In B. C. 73 it was the scene of the commencement of the Servile War under Spartacus, who breaking out with only 70 companions from Capua, took refuge on Mt. Vesuvius, and from thence for some time plundered the whole surrounding country. (Appian. *B. C.* i. 116; Plut. *Crass.* 8; Flor. iii. 20.) During the contest between Caesar and Pompey Campania was spared the sufferings of actual war: and neither this nor the subsequent civil wars between Octavian and Antony brought any interruption to its continued prosperity.

Under the Roman Empire, as well as during the later period of the Republic, Campania became the favourite resort of wealthy and noble Romans, who crowded its shores with their villas, and sought in its soft climate and beautiful scenery a place of luxurious retirement. Whole towns thus grew up at Baiae and Bauli: but the neighbourhood of Neapolis, Pompeii, and Surrentum were scarcely less favoured, and the beautiful shores of the Crater were surrounded with an almost continuous range of palaces villas, and towns. The great eruption of Vesuvius in A. D. 79, which buried under heaps of ashes the flourishing towns of Herculaneum and Pompeii, and laid waste great part of the fertile lands on all sides of it, gave for a time a violent shock to this prosperity: but the natural advantages of this favoured land would soon enable it to recover even so great a disaster: and it appears certain that Campania continued down to the very close of the Western Empire to be one of the most flourishing and populous provinces of Italy.

According to the division of Augustus, Campania together with Latium constituted the First Region of Italy (Plin. iii. 5); but at a later period, probably under Hadrian, Beneventum, with the extensive territory dependent on it, and apparently the other cities of the Hirpini also, were annexed to Campania; while, on the other hand, the name seems to have gradually been applied to the whole of the First Region of Augustus. Hence we find the "Civitates Campaniae," as given in the Liber Coloniarum (p. 229), including all the cities of Latium and those of Samnium and the Hirpini also; and the Itineraries place the boundary of Campania on the side of Apulia, between Equus Tuticus and Aecae. (*Itin. Ant.* p. 111; *Itin. Hier.* p. 610.) This latter extension of the term does not, however, seem to have been generally adopted: we find Samnium generally separated from Campania for administrative purposes (Treb. Poll. *Tetricus*, 24; *Not. Dign.* ii. pp. 63, 64), and the name was certainly retained in common usage. On the other hand, the name of Campania appears to have come into general use as synonymous with the whole of the First Region of Augustus, so as to have completely superseded that of Latium; and ultimately, by a change analogous to what we find in several other instances, came to designate Latium *exclusively*, or the country round Rome, which retains to the present day the appellation of *La Campagna di Roma*. The exact period and progress of the change cannot be traced; it was certainly completed in the time of the Lombards; but on the Tabula Peutingeriana Campania already extends from the Tiber to the Silarus. (Tab. Peut.; P. Diac. ii. 17; Pellegrini, *Discorsi della Campania*, vol. i. p. 45—85.)

Ancient writers have left us scarcely any information concerning the national characteristics or habits of the Campanians during the period of their existence as an independent people, with the exception of vague declamations concerning their luxury. But a fact, strangely at variance with the accounts of their unwarlike and effeminate habits, is, that we find Campanians extensively employed as mercenary troops, especially by the despots of Sicily. Here they first appear as early as B. C. 410, in the service of the Carthaginians (Diod. xiii. 44—62); and were afterwards of material assistance to the elder Dionysius. But, not satisfied with serving as mere mercenaries, they established themselves in the two cities of Aetna and Entilla, of which they held possession for a long period. (Id. xiv. 9, 58, xvi. 82.) Again the mercenaries in the service of Agathocles, who rendered themselves so formidable under the name of Mamertines [MAMERTINI], were in great part of Campanian origin. It is singular that we find these mercenaries, in the cases of Entella and Messana, repeating precisely the same treacherous conduct by which the Samnites had originally made themselves masters of Capua; and even a Cam-

le stream, and waters the whole of
the rich plain on the S. of Mt. Vesuvius (quae rigat aequora Sarnus, Virg. *Aen.* vii. 738). The paucity of rivers in Campania is owing to the peculiar nature of the volcanic soil, which, as Pliny observes, allows the waters that descend from the surrounding mountains to percolate gradually, without either arresting them, or becoming saturated with moisture. (Plin. xviii. 11. s. 29.)

The principal mountains of Campania have already been noticed. The arm of the Apennines which separates the two Gulfs of *Naples* and *Salerno*, and rises above *Castellamare* to a height of near 5000 feet, was called in ancient times the MONS LACTARIUS (Cassiod. *Ep.* xi. 10), from its abundant pastures, which belonged to the neighbouring town of Stabiae, and were much frequented by invalids for medical purposes. [STABIAE.] Several of the minor hills belonging to the volcanic group of which Mt. Gaurus was the principal, were known by distinguishing names, among which those of the COLLIS LEUCOGAEUS between Puteoli and Neapolis (Plin. xviii. 11. s. 29), and the MONS PAUSILYPUS in the immediate neighbourhood of the latter city, have been preserved to us.

Campania contains several small lakes, of which the lake AVERNUS is a volcanic basin, in the deep hollow of a crater; the rest are mere stagnant pools formed by the accumulation of sand on the sea shore preventing the outflow of the waters. Such were the LITERNA PALUS, near the town of the same name, now called the *Lago di Patria*; and the ACHERUSIA PALUS, now *Lago di Fusaro*, a little to the S. of Cumae. The Lucrine Lake (LACUS LUCRINUS) was, in fact, merely a portion of the sea shut in by a narrow dike or bar, apparently of artificial construction; similar to the part of the Port of Misenum, which is now called the *Mare Morto*.

The principal islands off the coast of Campania, AENARIA, PROCHYTA, and CAPREAE, have already been noticed. Besides these there are several smaller islets, most of them, indeed, mere rocks, of which the names have been recorded in consequence of their proximity to the flourishing towns of Puteoli and Neapolis. The principal of these is NESIS, still called *Nisida*, opposite the extremity of the Mons Pausilypus; itself the crater of an extinct volcano, which seems in ancient times to have still retained some traces of its former activity. (Lucan. v. 90.) MEGARIS, called by Statius MEGALIA, appears to be the rock now occupied by the *Castel dell' Uovo*, close to Naples; while the two islets mentioned by the same poet as Limon and Euplea (*Silv.* iii. 1, 149) are supposed to be two rocks between *Nisida* and the adjoining headland, called *Scoglio del Lazzaretto* and *la Gajola*. [NEAPOLIS.] South of the Surrentine Promontory, and facing the Gulf of Posidonia lie some detached and picturesque rocks, a short distance from the shore, which were known as the SIRENUSAE INSULAE, or the Islands of the Sirens; they are now called *Li Galli*.

The towns and cities of Campania may be briefly enumerated. 1. Beginning from the frontier of Latium and proceeding along the coast was TURNUM at the mouth of the river of the same name, LITERNUM, and CUMAE; Misenum on the promontory of the same name, and [illegible] within it BAULI, BAIAE, and [illegible] called by the Greeks Dicaearchia. [illegible] proceeding round the shores of the Gulf of [illegible] flourishing towns of NEAPOLIS, [illegible]

Pompeii, Stabiae, and Surrentum; besides which we find mention of Retina, now *Resina*, at the foot of Mt. Vesuvius (Plin. *Ep.* vi. 16), and Aequa, still called *Equa*, a village near *Vico*, about half way between Stabiae and Surrentum. (Sil. Ital. v. 464.) Neither of these two last places ranked as towns; they were included among the populous villages or *vici* that lined the shores of this beautiful bay, the names of most of which are lost to us.

2. In the interior of the province, N. of the Vulturnus were: Venafrum in the upper valley of the Vulturnus, the most northerly city of Campania, bordering on Latium and Samnium; Teanum at the foot of the mountains of the Sidicini and Aurunci; Suessa on the opposite slope of the same group, and Cales on the Via Latina between Teanum and Casilinum. In the same district must be placed Trebula, probably near the foot of Mons Callicula, and Forum Popilii, also of uncertain site. Urbana, where Sulla had established a colony, lay on the Appian Way between Sinuessa and Casilinum; and Caedia, a mere village incidentally mentioned by Pliny (xiv. 6. s. 8), on the same road, 6 miles from Sinuessa. Aurunca, the ancient capital of the people of that name, had ceased to exist at a very early period.

3. S. of the Vulturnus were Casilinum (immediately on that river), Capua, Calatia, Atella, Acerrae, Suessula, Nola, Abella, and Nuceria, called, for distinction's sake, Alfaterna. The site of Taurania, which had already ceased to exist in the time of Pliny (iii. 5. s. 9) is wholly unknown, as well as that of Hyrium or Hyrina, a city known only from its coins.

4. In the territory of the Picentini (which, as already observed, was comprised in Campania in the official designation of the province), were: Salernum and Marcina on the coast of the Posidonian Gulf, and Picentia in the interior, on the little river still called *Bicentino*. Eburi (*Eboli*), though situated on the N. side of the Silarus, is assigned by Pliny to Lucania. (Plin. iii. 11. s. 15.)

Campania was traversed by the Appian Way, the greatest high road of Italy: this had, indeed, in its original construction by Appius Claudius, been carried only from Rome to Capua; the period at which it was extended from thence to Beneventum is uncertain, but this could hardly have taken place before the close of the Samnite Wars. [Via Appia.] This road led direct from Sinuessa (the last city in Latium), where it quitted the sea shore, to Casilinum, and thence to Capua; from whence it was continued through Calatia and Caudium (in the Samnite territory) to Beneventum. It entered the Campanian territory at a bridge over the little river Savo, 3 miles from Sinuessa, called from this circumstance the Pons Campanus. (*Itin. Hier.* p. 611; *Tab. Peut.*) The Via Latina, another very ancient and important line of road, entered Campania from the N. and proceeded from Casinum in Latium by Teanum and Cales to Casilinum, where it fell into the Via Appia. The line of road, which proceeded in a southerly direction from Capua by Nola and Nuceria to Salernum, was a part of the great high road from Rome to Rhegium, which is strangely called in the Itinerary of Antoninus the Via Appia. An inscription still extant records the construction of this line of road from Capua to Rhegium, but the name of its author is unfortunately lost, though it is probable that he was a praetor of the name of Popilius. [Forum Popilii.] Besid road, given in the Tabula, led d to Neapolis, and from thence by Pompeii to Nuceria, where it joine while another branch quitted it followed the shores of the bay th Surrentum.

Lastly, another great road, wh from Statius (*Silv.* iv. 3) was co emperor Domitian, proceeded alon Sinuessa to Cumae, and thence by polis. There is no doubt, from condition of Campania under the that all these roads continued in u period. Milestones and other in their successive restorations from t to that of Valentinian III. (Momm pp. 340, 341.)

Anc.* p. 48). [E. H. B.] a place in Lucania, which, 16), was the real scene of the death of Tib. Sempronius Gracchus during the Second Punic War (B. C. 212), though other annalists transferred it to the banks of the Calor, near Beneventum. He gives us no further clue to its situation than the vague expression "in Lucanis;" and it is impossible to fix it with any certainty. The resemblance of name alone has led local topographers to assign it to a place called *Vietri*, in the mountains between *Potenza* and the valley of the *Tanagro*. (Romanelli, vol. i. p. 438.) [E. H. B.]

CAMPODU'NUM (Καμπόδουνον), a town in the country of the Estiones in Vindelicia. It was situated on the road from Brigantium to Augusta Vindelicorum, and is identified with the modern *Kempten*, on the river *Iller*. (Ptol. ii. 13. § 3; Itin. Ant. p. 258; *Vita S. Magni*, c. 18.) [L. S.]

CAMULODU'NUM. [COLONIA.]

CAMU'NI (Καμοῦνοι), an Alpine people, who inhabited the valley of the Ollius (*Oglio*), from the central chain of the Rhaetian Alps to the head of the Lacus Sebinus (*Lago d' Iseo*). This valley, which is still called the *Val Camonica*, is one of the most extensive on the Italian side of the Alps, being above 60 miles in length. Pliny tells us that the Camuni were a tribe of Enganean race; while Strabo reckons them among the Rhaetians.

The name of the Camuni appears among the Alpine tribes who were reduced to subjection by Augustus: after which the inhabitants of all these valleys were attached, as dependents, to the neighbouring towns of Gallia Transpadana ("finitimis attributi municipiis," Plin. iii. 20. s. 24; Strab. iv. p. 206; Dion Cass. liv. 20). At a later period, however, the Camuni appear to have formed a separate community of their own, and we find mention in inscriptions of the "Res Publica Camunorum." (Orell. *Inscr.* 652, 3789.) In the later division of the provinces they came to be included in Rhaetia. [E. H. B.]

CAMUNLODU'NUM, in Britain, mentioned by Ptolemy as a town of the Brigantes. Identified—though, perhaps, on insufficient grounds—by Horsley with the Cambodunum of the Itinerary. [CAMBODUNUM.] [R. G. L.]

CANA (Κανᾶ). 1. A village of Galilee, the scene of our Lord's first miracle. (*S. John*, ii.) A village of this name in Galilee is mentioned by Josephus, as his temporary place of residence during his command in that country, and his notices of it appear to indicate that it was not far distant from Sepphoris. (*Vita*, § 16, seq.) The village of *Kephr Kenna*, 1½ hour NE. of Nazareth, is pointed out to modern travellers as the representative of "Cana of Galilee;" but it appears that this tradition can be traced back no further than the 16th century. An earlier, and probably more authentic tradition, current during the period of the Crusades, assigns it to a site 3 miles north of Sepphoris on the [illegible] of a fertile plain, now called *el-Battauf*, where a [illegible] east of *Kephr Menda*, are still found on a [illegible]

Digitized by Google

ruins of an extensive village, to which a wavering and uncertain local tradition gives the name of *Kana*. (Robinson, *B. R.* iii. p. 204—207.)

2. There appears to have been another village of this name not far from Jericho, where the army of Antiochus Dionysus perished with hunger after their defeat by the Arabs (Joseph. *B. J.* i. 4. § 7, comp. *Ant.* xiii. 15. § 1), and where Herod the Great was encamped in his war with Antigonus. (*B. J.* i. 17. § 5.) [G. W.]

CANAAN [PALAESTINA.]

CANAE (Κάναι: *Eth.* Καναῖος), a small place founded by the Locri of Cynus (Strab. p. 615) in Aeolis, opposite to the most southern part of Lesbos, in a district called Canaea. The district extended as far as the Arginusae islands northward, and to the promontory rising above them, which some called Aega. The place is called Cane by Mela (i. 18). Pliny mentions it as a ruined place (v. 32): he also mentions a river Canaeus; but he may mean to place it near Pitane. In the war of the Romans with Antiochus (B. C. 190, 191), the Roman fleet was hauled up at Canae for the winter, and protected by a ditch and rampart. (Liv. xxxvi. 45, xxxvii. 8.)

Mela places the town of Cane at the promontory Cane, which is first mentioned by Herodotus (vii. 42). The army of Xerxes, on the march from Sardes to the Hellespont, crossed the Caicus, and leaving the mountain of Cane on the left, went through Atarneus. The position of Cane or Canae, as Strabo (pp. 615, 581, 584) calls the promontory, is, according to him, 100 stadia from Elaea, and Elaea is 12 stadia from the Caicus, and south of it; and he says that Cane is the promontory that is opposite to Lectum, the northern limit of the Gulf of Adramyttium, of which gulf the Gulf of Elaea is a part. He therefore clearly places the promontory Cane on the south side of the Gulf of Elaea. In another passage (p. 581) he says, "From Lectum to the river Caicus, and the (place) called Canae, are the parts about Assus, Adramyttium, Atarneus, and Pitane, and the Elaeatic Bay, opposite to all which extends the island of the Lesbians." Again, he says, "The mountain (Cane or Canae) is surrounded by the sea on the south and the west; on the east is the level of the Caicus, and on the north is the Elaeitis." This is all very confused; for the Elaeitis is south of the Caicus, and even if it extended on both sides of the river, it is not north of Canae, unless Canae is south of Elaea. Mela, whose description is from south to north, clearly places Cane on the coast after Elaea and Pitane; Pliny does the same; and Ptolemy's (v. 2) Caene is west of the mouth of the Caicus. The promontory then is *Cape Colomi*, west of the mouth of the Caicus. Strabo's confusion is past all explanation. He could not have had any kind of map, nor a clear conception of what he was describing.

Cane was both a mountain tract and a promontory. The old name was Aegā (Αἰγᾶ), as Strabo remarks, and he finds fault with those who wrote the name Aegā (Αἴγα), as if it was connected with the name "goat" (comp. Steph. *s. v.* Αἰγά), or Aex (Αἴξ). Strabo says that the mountain (Cane) is of no great extent, but it inclines towards the Aegean, whence it has its name; afterwards the promontory was called Aega, as Sappho says, and the rest was Cane or Canae. See the note in Groskurd's Strabo (vol. ii. p. 601). [G. L.]

e of Britain, against whom Osto- army, after the reduction of the were laid waste; and, when this the neighbourhood of the Irish l ("ductus in *Cangos* exercitus n ventum haud procul mari quod aspectat, Tac. *Ann.* xii. 32). This was A. D. 50, during the *first* (not the Boadicean) war against the Iceni. Ptolemy has a *Cancanorum* (*Ganganorum*) *Promontorium*, and the Geographer of Ravenna a town called *Canca*. Lastly, there is a station of the *Notitia* called *Concangii*. None of these exactly explain the *Cangi* of Tacitus. The *Canca civitas* is unknown; the *Ganganorum Prom.* is a headland of *North Wales;* the *Concangii* are generally fixed in *Westmoreland*. Ptolemy's promontory, however, is the nearest. All that can be said is that the Cangi lay somewhere between the Iceni (East Anglia) and the Irish Sea. The Index of the *Monumenta Britannica* places them in *Somerset*. *North Wales* is a likelier locality. For remarks on the value of the different statements of Tacitus in respect to Britain, see COLONIA. [R.G.L.]

CANI'NI CAMPI, a district of Rhaetia Prima, corresponding to the modern *Graubündten*. (Amm. Marc. xv. 4; Sidon. Apollin. *Paneg. Maior.* 376; Greg. Turon. x. 3.) [L. S.]

CANIS FLUMEN, a river of Arabia mentioned by Pliny (vi. 28. s. 32), supposed by Forster to be identical with the "Lar fluvius" of Ptolemy in the country of the Nariti, at the south of the Persian Gulf, now called the Zar, which he takes to be equivalent to Dog River. (*Geog. of Arab.* vol. ii. pp. 222, 236.) One great difficulty of identifying the places mentioned by the classical geographers arises from the fact, that they sometimes translate the native name, and sometimes transcribe it, especially if it resembled in sound any name or word with which they were familiar; nor did they scruple to change the orthography in order to form a more pronounceable name than the original. The inconvenience of representing the Semitic names in Greek characters deterred Strabo (xv. p. 1104) from a minute description of the geography of Arabia, and involves endless difficulty in a comparison of the ancient and modern geography of the peninsula, particularly as the sites are not at all clearly defined, and even Ptolemy, the best informed of the ancient geographers, had a very indistinct notion of the outline of the coast. To illustrate this in the name before us. On the south coast of Arabia are two promontories *Ras Kelb* (i. e. Cape *Dog*) a little east of *Hissan Ghorab;* and *Ras Akanis* a little west of *Ras-el-Hadd*. Either of these names might be represented by Pliny as Canis Promontorium. So with Canis flumen. There can be little doubt that he thought its name was "Dog river," for he also calls it by its Greek equivalent "Cynos flumen" (κύνος πόταμος). But perhaps a more probable conjecture can be offered than that of Mr. Forster, as it seems very doubtful whether Lar or Zar can mean Dog. Near the "Canis flumen" Pliny places the "Bergadi" and the "Catharrei;" the former have been already identified to the west of the Zar river, and the latter are doubtless identical with the Katharei of Ptolemy in the same situation, between which and the river Lar Ptolemy places "Canipsa" (Κάνιψα πόλις) next to the river's mouth. There is little doubt that the "Canis flumen" of Pliny, from Canipsa, which

CANNAE (Κάννα, Strab. &c.; *Eth.* Cannensis: Canne), on the S. bank of the Aufidus, a little above its mouth, celebrated for the memorable defeat of the Romans by Hannibal. No question exists as to the site of Cannae, the ruins of which are still visible on a small hill from Canosa (Canusium).

Digitized by Google

fought on the banks of the Aufidus in its immediate neighbourhood, much question has been raised as to the precise locality of the action, which some have placed on the N., some on the S. of the river: and the previous operations of the Roman and Carthaginian armies have been interpreted so as to suit either view. But if the narrative of Polybius (who is much the most clear and definite upon this question) be carefully examined, it is difficult to see how any doubt can remain, and that of Livy, though less distinct, is in no respect contradictory to it. The other accounts of the battle in Appian, Zonaras, and Plutarch afford no additional information on the topographical question.

Hannibal had wintered at Gerunium, and it was not till early in the summer that he abandoned his quarters there, and by a sudden movement seized on Cannae. The town of that name had been destroyed the year before, but the citadel was preserved, and the Romans had collected there great magazines of corn and other provisions, which fell into the power of the Carthaginians. Hannibal occupied the citadel, and established his camp in its immediate neighbourhood. (Pol. iii. 107; Liv. xxii. 43.) The Roman generals, having received orders to risk a general engagement, followed Hannibal after some interval, and encamped at first about 50 stadia distant from the enemy: but the next day Varro insisted upon advancing still nearer, and the Romans now established two camps, the one on the same side of the Aufidus, where they previously were, (that is evidently the S. side), and the other, containing a smaller division of the forces, on the opposite bank, a little lower down the river, about 10 stadia from the larger Roman camp, and the same distance from that of Hannibal. (Pol. iii. 110.) The Aufidus at this season of the year* is readily fordable at almost any point, and would therefore offer no obstacle to their free communication.

On the day of the battle we are distinctly told that Varro *crossed the river* with the main body of his forces from the *larger* camp, and joining them to those from the smaller, drew up his whole army *in a line facing the south.* Hannibal thereupon *also crossed the river* to meet him, and drew up his forces in a line, having its left wing resting on the river, where they were opposed to the Roman cavalry, forming the right wing of the consular army. (Ib. 113; Liv. xxii. 45, 46.) From this account it seems perfectly clear that the battle was fought on the *north* bank of the Aufidus, and this is the result arrived at by the most intelligent travellers who have visited the locality (Swinburne's *Travels*, vol. i. pp. 167—172; Chaupy, *Découv. de la Maison d'Horace*, vol. iii. p. 500), as well as by General Vaudoncourt, who has examined the question from a military point of view. (*Hist. des Campagnes d'Annibal*, vol. ii. p. 9—34, 48—57.) The same conclusion appears clearly to result from the statement of Livy, that after the battle a body of 600 men forced their way from the lesser camp to the greater, and from thence, in conjunction with a larger force, to Canusium (xxii. 50).

The only difficulty that remains arises from the circumstance that Polybius te the Roman army faced the S., the N. (iii. 114): and this is who adds that Hannibal the vantage of having the wind, behind him, which drove clo face of the enemy (xxii. 47). T that the Vulturnus is the same wind, called in Italy the *Scirocc* over the plains of Apulia with hence this circumstance (to writers have attached very exa tends to confirm the statement- the general course of the Aufid to NE., it seems impossible th resting its right wing on th faced the S., if it had been bank, and Chaupy, in conseq the statement of Polybius an burne tells us that "exactly in where we know, with moral cer effort of the battle lay, the A due E. for some time, makes a S., and describes a very large s poses the Romans to have for angle or elbow, and placing th bank at that point, to have t line in the plain to the E., so actually fought within this se of the river is imperfectly ex map (the only tolerable one) the space comprised within it fined for a battle of such mag no reason to doubt the accurac took his notes, and made dra upon the spot. "The scene of marked by the name of *Pezzo d* of Blood;" but other writers origin to this appellation.

Notwithstanding the above of the battle has been transf quarians and topographers to th between Cannae and Canusium, has been followed by most m cluding Arnold. Niebuhr, o adopted Swinburne's view, and as taking place within the b river above described. (*Vort chichte*, vol. ii. pp. 99, 100.) the objection arising from the space thus assigned as the scene with at least equal force to the plain on the right bank of the A in extent, the hills on which C both stand flanking the river at that the interval between them a mile in breadth. (Chaupy, *l.* These hills are very slight em sloping sides, which would aff the movements of an army, bu of all writers is clear, that the *the plain.*

The annexed plan has no graphical accuracy, there being locality in sufficient detail: it assist the reader in comprehen rative.

We have little other inf Cannae, which appears to ha time, as it is termed by Florus vicus," and probably a mere

* The battle of Cannae was fought, as we learn from Gellius (v. 17; Macrob. *Sat.* i. 16), on the 2nd of August; but it is probable that the Roman calendar was at this time much in advance of the truth, and that the action really took place early in the summer. (Fischer, *Röm. Zeittafeln*, p. 89.)

safe inference can be drawn from such an expression as to their limits. The Canninefates, with the Batavi and Friisii, rose against the Roman authority in the time of Vitellius (Tac. *Hist.* iv. 15—79), under the command of Civilis. [BATAVORUM INSULA.] [G. L.]

CANO'BUS or CANO'PUS (Quint. *Inst. Or.* i. 5. § 13; Κάνωπος, Steph. B. p. 355 *s. v.*; Herod. ii. 15, 97, 113; Strab. xvi. p. 666, xvii. p. 800 *seq.*; Scylax, pp. 44, 51; Mel. ii. 7. § 6; Eustath. *ad Dionys. Perieg.* v. 13; Aeschyl. *Supp.* 312; Caes. *B. Alex.* 25; Virg. *Georg.* iv. 287; Juv. *Sat.* vi. 84, xv. 46; Senec. *Epist.* 51; Tac. *Ann.* ii. 60; Amm. Marc. xxii. 41, &c.: *Eth.* Κανωβίτης; *Adj.* Κανωβικός, *fem.* Κανωβίς), a town of Egypt, situated in lat. 31° N. upon the same tongue of land with Alexandreia, and about 15 miles (120 stadia) from that city. It stood upon the mouth of the Canobic branch of the Nile [NILUS], and adjacent to the Canobic canal (Κανωβικὴ διῶρυξ, Strab. xvii. p. 800). In the Pharaonic times it was the capital of the nome Menelaïtes, and, previous to the foundation of Alexandreia, was the principal harbour of the Delta. At Canobus the ancient geographers (Scylax; Conon. *Narrat.* 8; Plin. v. 34; Schol. *in Dict. Cretens.* vi. 4) placed the true boundary between the continents of Africa and Asia. According to Greek legends, the city of Canobus derived its name from the pilot of Menelaus, who died and was buried there on the return of the Achaeans from Troy. But it more probably owed its appellation to the god Canobus—a pitcher with a human head—who was worshipped there with peculiar pomp. (Comp. Nicand. *Theriac.* 312.) At Canobus was a temple of Zeus-Canobus, whom Greeks and Egyptians held in equal reverence, and a much frequented shrine and oracle of Serapis. (Plut. *Is. et Osir.* 27.) As the resort of mariners and foreigners, and as the seat of a hybrid Copto-Hellenic population, Canobus was notorious for the number of its religious festivals and the general dissoluteness of its morals. Here was prepared the scarlet dye—the *Hennah*, with which, in all ages, the women of the East have been wont to colour the nails of their feet and fingers. (Herod. ii. 113; Plin. xii. 51.) The decline of Canopus began with the rise of Alexandreia, and was completed by the introduction of Christianity into Egypt. Traces of its ruins are found about 3 miles from Aboukir. (Denon, *Voyage en Egypte*, p. 42; Champollion, *l'Egypte*, vol. ii. p. 258.) [W.B.D.]

CANO'NIUM, in Britain, distant, in the ninth Itinerary, 8 miles from Camulodunum, and 12 from Caesaromagus; the road being from Venta Icenorum (the neighbourhood of *Norwich* to *London*). For all these parts the criticism turns so much upon the position given to CAMELODUNUM and COLONIA, that the proper investigation lies under the latter of these two heads. [COLONIA.] *North Fambridge* is Horsley's locality for Canonium; the neighbourhood of *Kelvedon* that of the *Monumenta Britannica*. Roman remains occur in both. [R. G. L.]

CA'NTABER OCEANUS (Καντάβριον ὠκεανός: *Bay of Biscay*), the great bay of the Atlantic, formed by the W. coast of Gaul and the N. coast of Spain, and named after the CANTABRI on the latter coast. (Claudian. xxix. 74; Ptol. ii. 6. § 75, viii. 4. § 2.) [P. S.]

CANTABRAS, a river of India (in the *Panjab*), mentioned by Pliny as one of the chief tributaries of the Indus, carrying with it the waters of three other tributaries. (Plin. vi. 20. s. 23.) Some assume that it must be the HYDRAOTES, because the latter is not otherwise mentioned by Pliny; but the name

Digitized by Google

leaves little doubt that Pliny had heard of the ACESINES by its Indian name *Chandrabagha*, and out of this he made another river. The same remark applies to the SANDABAL of Ptolemy (vii. 1. §§ 26, 27, 42). [P. S.]

CANTABRIA (Καντα̃βρία), the country of the CANTABRI (Κάνταβροι; sing. Κάνταβρος, Cantaber, *Adj.* Cantabricus), a people of Hispania Tarraconensis, about the middle of the N. side of the peninsula, in the mountains that run parallel to the coast, and from them extending to the coast itself, in the E. of *Asturias*, and the N. of *Burgos*, *Palencia*, and *Toro*. They and their neighbours on the W., the Astures, were the last peoples of the peninsula that submitted to the Roman yoke, being only subdued under Augustus. Before this, their name is loosely applied to the inhabitants of the whole mountain district along the N. coast (Caes. *B. G.* iii. 26, *B. C.* i. 38), and so, too, even by later writers (Liv. *Epit.* xlviii.; Juv. xv. 108 compared with 93). But the geographers who wrote after their conquest give their position more exactly, as E. of the Astures, the boundary being the river Salia (Mela, iii. 1), and W. of the Autrigones, Varduli, and Vascones. (Strab. iii. p. 167, *et alib.*; Plin. iii. 3. s. 4, iv. 20. s. 34; Ptol. ii. 6. §§ 6, 51.) They were regarded as the fiercest and rudest of all the peoples of the peninsula,—"savage as wild beasts," says Strabo, who describes their manners at some length (iii. pp. 155, 166; comp. Sil. Ital. iii. 329, 361; Hor. *Carm.* iii. 4.) They were subjugated by Augustus, after a most obstinate resistance, in B.C. 25; but they soon revolted, and had to be reconquered by Agrippa, B.C. 19. In this second war, the greater part of the people perished by the sword, and the remainder were compelled to quit their mountains, and reside in the lower valleys. (Dion Cass. liii. 25, 29, liv. 5, 11, 20; Strab. iii. pp. 156, 164, 287, 821; Horat. *Carm.* ii. 6. 2, 11. 1, iii. 8. 22; Flor. iv. 12, 51; Liv. xxviii. 12; Suet. *Octav.* 20, et seq., 29, 81, 85; Oros. vi. 21.) But still their subjugation was imperfect; Tiberius found it necessary to keep them in restraint by strong garrisons (Strab. p. 156); their mountains have afforded a refuge to Spanish independence, and the cradle of its regeneration; and their unconquerable spirit survives in the *Basques*, who are supposed to be their genuine descendants. (Ford, *Handbook of Spain*, p. 554, foll.)

The ethnical affinities, however, both of the ancient and the modern people, have always presented a most difficult problem; the most probable opinion is that which makes them a remnant of the most ancient Iberian population. (W. von Humboldt, *Urbewohner von Hispanien*, Berlin, 1821, 4to.) Strabo (iii. p. 157) mentions a tradition which derived them from Laconian settlers, of the period of the Trojan war.

Under the Roman empire, Cantabria belonged to the province of Hispania Tarraconensis, and contained seven tribes. (Plin. iii. 3. s. 4.) Of these tribes the ancient geographers apologise for possessing only imperfect information, on the ground of the barbarian sound of their names. (Strab. iii. pp. 155, 162; Mela, iii. 1.) Among them were the Pleutauri (Πλεύταυροι); the Bardyetae or Bardyali (Βαρδυῆται, Βαρδύαλοι), probably the VARDULI of Pliny (iii. 3. s. 4, iv. 20. s. 34); the Allotriges (Ἀλλότριγες), probably the same as the AUTRIGONES; the Conisci (Κονίσκοι), probably the same as the Coniaci (Κωνιακοί) or Concani (Κωνκανοί), who are particularly mentioned in the Cantabrian War (Mela, iii. 1; Horat. *Carm.* iii. 4. 34; Sil. Ital. iii. 360, 361); and the Tuïsi (Τουΐσοι), about Iberus. These are all mentioned 155, 156, 162). Mela names mesci or ARGENOMESCI (iii. 1) tribes are mentioned by Ptolemy

(Κανύσιον, Pol.; Strab.; Steph. B.; *Eth.* Κανυσῖνος or Κανυσίτης, Ca-), one of the most ancient and im-Apulia, situated near the right bank bout 15 miles from its mouth. It f the high road from Beneventum nd was distant 26 miles from Her-from Rubi. (*Itin. Ant.* p. 116.) f Canusium, as well as that of the of Arpi, was generally ascribed to vi. p. 284; Hor. *Sat.* i. 5. 92), ls relating to that hero seem to have more intimately connected with the s probable that they were both of n origin, and were the two most the Daunian or Pelasgian Apulians; historical account of either of them Greek colony, and there seem good ing that the strong infusion of Hel-which we find prevailing at Canu-ced at a comparatively late period. al mention of Canusium is during Romans with the Samnites, in which ok part with the latter, until the tions of their territory by the Ro-m to submit to the consul L. Plau- (Liv. ix. 20.) From this time have continued steadfast in their me, and gave the strongest proofs the Second Punic War. After the Cannae, the shattered remnants of took refuge in Canusium, where d with the utmost hospitality and Hannibal at any time succeed in naster of the city. (Liv. xxii. 52 an, *Annib.* 26; Sil. Ital. x. 389.) l War Canusium joined the other n their defection from Rome; and campaign of the war (B. C. 89) it out success by the Roman praetor as obliged to content himself with itory. (Appian, *B. C.* i. 42, 52.) wards (B. C. 83) it was the scene battle between Sulla and C. Nor-the latter was defeated with great d to evacuate the whole of Apulia, n Capua. (Id. i. 84.) It probably from these wars; and Strabo speaks much fallen from its former great-ame is more than once mentioned Wars, and always as a place of : we learn from other sources that ued to maintain its municipal ex-rs to have been almost the only city s the two Roman colonies of Luceria ich retained any degree of import-man empire. (Hor. *l.c.*; Caes. *B. C.* viii. 11; Appian, *B. C.* v. 57; Capit. iii. 11. s. 16; Ptol. iii. 1. § 72; Mela, rs to have received a Roman colony under M. Aurelius, whence we find inscription the titles of "Colonia Pia." Its deficiency of water, al-ce, was supplied by the munificence is, who constructed a splendid aque-ns of which are still visible. (*Lib.* Philostr. *Vit. Sophist.* ii. 1. § 6; 30; Zumpt, *de Coloniis*, p. 427.)

Canusium is mentioned both by Procopius and P. Diaconus as one of the principal cities of Apulia (Procop. *B. G.* iii. 18; P. Diac. *Hist.* ii. 22), and appears to have preserved its importance until a late period of the middle ages, but suffered severely from the ravages of the Lombards and Saracens. The modern city of *Canosa*, which contains about 5000 inhabitants, is situated on a slight eminence that probably formed the citadel of the ancient city, which appears to have extended itself in the plain beneath. Strabo speaks of the great extent of the walls as attesting in his day the former greatness and prosperity of Canusium; and the still existing remains fully confirm his impression. Many of these, however, as the aqueduct, amphitheatre, &c., are of Roman date, as well as an ancient gateway, which has been erroneously described as a triumphal arch. (Romanelli, vol. ii. pp. 262—267; Swinburne, *Travels*, vol. i. p. 401.) Great numbers of inscriptions of Imperial date have also been discovered; one of which is curious, as containing a complete list of the municipal senate, or Decurións of the colony, with their several gradations of rank. It has been published with an elaborate commentary by Damadeno. (*Aes Redivivum Canusinum*, fol. Lugd. Bat.) But the most interesting relics of the ancient city are the objects which have been found in the numerous tombs in the neighbourhood, especially the painted vases, which have been discovered here in quantities scarcely inferior to those of Nola or Volci. They are, however, for the most part of a later and somewhat inferior style of art, but are all clearly of Greek origin, and, as well as the coins of Canusium, prove how deeply the city was imbued with Hellenic influences. It is even probable that, previous to the Roman conquest, Greek was the prevailing language of Canusium, and perhaps of some other cities of Apulia. The expression of Horace, "Canusini bilinguis" (*Sat.* i. 10. 30), seems to be rightly explained by the scholiast to refer to their speaking *Greek* and *Latin*. (Mommsen, *U. I. Dialekte*, p. 88.)

The extensive and fertile plain in which Canusium was situated, and which was the scene of the memorable battle of Cannae, is called by some writers Campus Diomedis (Liv. xxv. 12; Sil. Ital. viii. 242), though this is evidently rather a poetical designation than a proper name. The whole plain S. of the Aufidus, and probably for some distance on the left bank also, appears to have belonged to the Canusians, and we learn from Strabo (p. 283) that they had a port or emporium on the river at a distance of 90 stadia from its mouth. The territory of Canusium was adapted to the growth of vines as well as corn, but was especially celebrated for its wool, which appears to have been manufactured on the spot into a particular kind of cloth, much prized for its durability. (Varr. *R. R.* i. 8; Plin. viii. 48. s. 73; Martial, ix. 22. 9, xiv. 127; Suet. *Ner.* 30.) The stony or gritty quality of the bread at Canusium, noticed by Horace, has been observed also by modern travellers (Swinburne, p. 166): it doubtless results from the defective quality of the millstones employed. [E. H. B.]

CA'PARA (Κάπαρα: *Eth.* Caparenses: *las Ventas de Caparra*, large Ru. E. of *Plasencia*), a city of the Vettones in Lusitania, on the high road from Emerita to Caesaraugusta. (*Itin. Ant.* p. 433; Plin. iv. 21. s. 35; Ptol. ii. 5. § 8; Flores, *Esp. S.* xiv. p. 54.) [P. S.]

CAPE'NA (*Eth.* Capenas, -ātis), an ancient city

Digitized by Google

of Etruria, which is repeatedly mentioned during the early history of Rome. It was situated to the NE. of Veii, and SE. of Falerii, about 8 miles from the foot of Mt. Soracte. From an imperfect passage of Cato, cited by Servius (*ad Aen.* vii. 697), it would seem that Capena was a colony of Veii, sent out in pursuance of the vow of a sacred spring. (Niebuhr, vol. i. p. 120; Müller, *Etrusker*, vol. i. p. 112.) It however appears, when we first find it mentioned in history, as an independent city, possessing a considerable extent of territory. It is not till the last war of the Romans with the Veientines, that the name of the Capenates appears in the Roman annals; but upon that occasion they took up arms, together with the Faliscans, in defence of Veii, and strongly urged upon the rest of the Etruscan confederation the necessity of combining their forces to arrest the fall of that city. (Liv. v. 8, 17.) Their efforts were, however, unsuccessful, and they were unable to compel the Romans to raise the siege, while their own lands were several times ravaged by Roman armies. After the fall of Veii (B. C. 393), the two cities who had been her allies became the next object of hostilities on the part of the Romans; and Q. Servilius invaded the territory of Capena, which he ravaged in the most unsparing manner, and by this means, without attempting to attack the city itself, reduced the people to submission. (Liv. v. 12, 13, 14, 18, 19, 24.) The blow seems to have been decisive, for we hear no more of Capena until after the Gaulish War, when the right of Roman citizenship was conferred upon the citizens of Veii, Falerii, and Capena (or such of them at least as had taken part with the Romans), and the conquered territory divided among them. Four new tribes were created out of these new citizens, and of these we know that the Stellatine tribe occupied the territory of Capena. (Liv. vi. 4, 5; Fest. *s. v. Stellatina.*) From this time Capena disappears from history as an independent community, and only a few incidental notices attest the continued existence of the city. Cicero mentions the "Capenas ager" as remarkable for its fertility, probably meaning the tract along the right bank of the Tiber (*pro Flacc.* 29); and on this account it was one of those which the tribune Rullus proposed by his agrarian law to portion out among the Roman people. (Cic. *de Leg. Agr.* ii. 25.) This design was not carried out; but at a later period it did not escape the rapacity of the veterans, and all the more fertile parts of the plain adjoining the river were allotted to military colonists. (Cic. *ad Fam.* ix. 17: *Lib. Colon.* p. 216, where it is, by a strange corruption, called "Colonia Capys.") Numerous inscriptions attest the continued existence and municipal rank of Capena under the Roman empire down to the time of Aurelian (Orell. *Inscr.* 3687, 3688, 3690; Nibby, *Dintorni*, vol. i. p. 377), but from this date all trace of it is lost: it probably was altogether abandoned, and the very name became forgotten. Hence its site was for a long while unknown; but in 1756 a Roman antiquarian of the name of Galetti was the first to fix it at a spot still called *Civitucola* (now more frequently known as *S. Martino*, from a ruined church of that name), about 24 miles from Rome, between the Via Flaminia and the Tiber. The ancient city appears, like those of Alba Longa and Gabii, to have occupied a steep ridge, forming part of the edge of an ancient crater or volcanic basin, now called *Il Lago*, and must have been a place of great strength from its natural position. No remains are visible, except some traces and foun-

dations of the ancient walls; but thes
the natural conformation of the grou
covery of the inscriptions already cite
tify the spot as the site of Capena.

CAPISA (Κάπισα or Κάτισα, Ptol. vi. 18. § 4; Capissa, Plin. vi. 23. s. 25), a city of a district probably named after it, CAPISSENE, and included in the wider district of the Paropamisus or *Hindu Kush* mountains. According to Pliny, it was destroyed by Cyrus; but we have no reason for supposing that Cyrus ever got so far NE., and, if it had been, it would hardly have been noticed by Ptolemy. It is probably the same as the Caphusa of Solinus (c. 54), which was near the Indus. It has been suspected that Capissene represents the valley of the *Kábul* river, and Capisa the town on the Indus now called *Peshâwar*. It is not *Kábul*, which has been satisfactorily proved by Professor Wilson to occupy the site of the ancient Ortospanum. Lassen (*Zur Gesch. d. Kon. Bactr.* p. 149) finds in the Chinese annals a kingdom called *Kiapiche* in the valley of Ghurbend, to the E. of Bamian. It is very probable that Capisa and Kiapiche are identical. [V.]

CAPISSE'NE. [CAPISA.]

CAPI'TIUM (Καπίτιον: *Eth.* Capitinus: *Capizzi*), a city of Sicily, mentioned only by Cicero and Ptolemy, but which appears from the former to have been a place of some importance. He mentions it in conjunction with Haluntium, Enguium, and other towns in the northern part of the island, and Ptolemy enumerates it among the inland cities of Sicily. This name has evidently been retained by the modern town of *Capizzi*, the situation of which on the southern slope of the mountains of *Caronia*, about 16 miles from the Tyrrhenian Sea, and the same distance from *Gangi* (Enguium), accords well with the above indications. (Cic. *in Verr.* iii. 43; Ptol. iii. 4. § 12; Cluver. *Sicil.*) [E. H. B.]

CAPITO'LIAS, a town of Peraea, or Coelesyria, exhibited in the Peutinger Tables, between Gadara and Adraa, and placed in the Itinerary of Antoninus on the road between Gadara and Damascus, between Neue and Gadara, 16 miles from the latter and 38 from the former. It is otherwise unknown, except that we find an Episcopal see of this name in the Ecclesiastical Records. (Reland, p. 693.) [G.W.]

CAPITULUM (Καπίτουλον, Strab.), a town of the Hernicans, which, though not noticed in history, is mentioned both by Pliny and Strabo among the places still existing in their time. (Plin. iii. 5. s. 9; Strab. v. p. 238.) We learn also from the Liber Coloniarum (p. 232) that it had been colonised by Sulla, and it seems to have received a fresh accession of colonists under Caesar. (Zumpt, *de Colon.* pp. 252, 306.) An inscription, in which it is called "Capitulum Hernicorum," proves it to have been a place of municipal condition under the empire. This inscription was discovered on the road from *Palestrina* (Praeneste) to a place called *Il Piglio*, a small town in the mountains, about 20 miles from *Palestrina*, and 8 from *Anagni*, which may plausibly be supposed to occupy the site of Capitulum. (Muratori, *Inscr.* p. 2049. 4; Nibby, *Dintorni di Roma*, vol. i. p. 383.) [E. H. B.]

CA'PORI. [GALLAECIA.]

CAPOTES (*Dújik Tágh*), a mountain of Armenia, from the spurs of which Pliny (v. 20. s. 24), on the authority of Licinius Mucianus, describes the Euphrates as taking its rise. He fixes its position 12 M. P. above Zimara. Pliny (*l. c.*) quotes Domitius Corbulo in placing the sources of the Euphrates in Mt. Aba, the same undoubtedly as the Abus of Strabo (xi. p. 527). Capotes therefore formed

Digitized by Google

part of the range of Abus. St. Martin (*Mém. sur l'Arménie*, vol. i. p. 43) derives the name Capotes from the Armenian word *Gaboïd*, signifying *blue*, an epithet commonly given to high mountains. Ritter (*Erdkunde*, vol. x. pp. 80, 653, 801, 823) identifies Capotes with the *Dijik* range or great water-shed between the E. and W. branches of the Euphrates. The *Murád-chái*, the E. branch or principal stream of the Euphrates, takes its rise on the S. slope of *Ala-Tagh*. (Chesney, *Exped. Euphrat.* vol. i. p. 42; *Journ. Geog. Soc.* vol. vi. p. 204, vol. x. p. 369.) [E. B. J.]

CAPPADO'CIA (Καππαδοκία: *Eth.* Καππαδόκης, Καππάδοξ, -δοκος). This extensive province of Asia lies west of the Euphrates, and north of Cilicia: its limits can only be defined more exactly by briefly tracing its history.

The names Cappadox and Cappadocia doubtless are purely Asiatic, and probably Syrian names, or names that belong to the Aramaic languages. The Syri in the army of Xerxes, who were armed like the Paphlagones, were called Cappadocae by the Persians, as Herodotus says (vii. 72); but this will not prove that the name Cappadocae is Persian. These Cappadocae (Herod. i. 72) were called Syri or Syrii by the Greeks, and they were first subject to the Medi and then to the Persians. The boundary between the Lydian and the Median empires was the Halys, and this river in that part of its course where it flows northward, separated the Syrii Cappadocae on the east of it from the Paphlagones on the west of it. We may collect from Herodotus' confused description of the Halys, that the Cappadocae were immediately east of that part of the river which has a northern course, and that they extended to the Euxine. In another passage (v. 49) the Cappadocae are mentioned as the neighbours of the Phrygians on the west, and of the Cilicians on the south, who extended to the sea in which Cyprus is, that is to the Mediterranean. Again (v. 52) Herodotus, who is describing the road from Sardes to Susa, makes the Halys the boundary between Phrygia and Cappadocia. But in another passage he places Syrians on the Thermodon and the Parthenius (ii. 104), though we may reasonably doubt if there is not some error about the Parthenius, when we carefully examine this passage. It does not seem possible to deduce anything further from his text as to the extent of the country of the Cappadocians as he conceived it. The limits were clearly much less than those of the later Cappadocia, and the limits of Cilicia were much wider, for his Cilicia extended north of the Taurus, and eastward to the Euphrates. The Syrii then who were included in the third nome of Darius (Herod. iii. 90) with the Paphlagones and Mariandyni were Cappadocae. The name Syri seems to have extended of old from Babylonia to the gulf of Issus, and from the gulf of Issus to the Euxine (Strab. p. 737). Strabo also says that even in his time both the Cappadocian peoples, both those who were situated about the Taurus and those on the Euxine, were called Leucosyri or White Syrians, as if there were also some Syrians who were black; and these black or dark Syrians are those who are east of the Amanus. (See also Strab. p. 542.) The name Syria, and Assyria, which often means the same in the Greek writers, was the name by which the country along the Pontus and east of the Halys was first known to the Greeks, and it was not forgotten (Apoll. *Argon.* ii. 948, 964; Dionys. Perieg. v. 772, and the comment of Eustathius).

Under the Persians the country in its greatest extent, was divided i but when the Macedonians got po allowed these satrapies to become with their consent, and partly aga which they gave the name of Ca so called, which is the country bor and to the other the name of Pont on the Pontus. (Strab. p. 534.) Cappadocia of course existed in the from whom it appears that Capp onia on the west (*Anab.* i. 2. § 2 and Cappadocia were under one sat mentions only one satrapy called list at the end of the seventh book

widest extent, is considered by
e calls an isthmus of a great
us being contracted by the Gulf
h — as far west as Cilicia Tra-

chea or Mountainous Cilicia,—and by the Euxine on the north, between Sinope and the sea-coast of the Tibareni who were about the river Thermodon. The part west of this isthmus is called the Chersonesus, which corresponds to the country which Herodotus calls within (ἐντός), that is, west of, the Halys. But in Strabo's time it was the fashion to designate this western tract as Asia within Taurus, in which he even includes Lycia (p. 534). This isthmus is called a neck (αὐχήν) by Herodotus; but the dimensions which he assigns to it, as they stand in our texts, are very inexact, being only five days' journey to an active man (i. 72). He reckons a day's journey at 200 stadia (iv. 101), and at 150 stadia in another place (v. 53).

The dimensions of Cappadocia from the Pontus, that is, the province of Pontus, to the Taurus, its southern limit, are stated by Strabo to be 1800 stadia; and the length from Phrygia, its western boundary, to the Euphrates and Armenia, the eastern boundary, about 3000 stadia. These dimensions are too large. The boundary between Pontus and Cappadocia is a mountain tract parallel to the Taurus, which commences at the western extremity of Cammanene, where the hill fort Dasmenda stands (it is incorrectly printed Commagene in Casaubon's *Strab.* p. 540), to the eastern extremity of Laviniasene. Commagene and Laviniasene are divisions of Cappadocia. These limits do not include Cilicia Trachea, which was attached to Cappadocia; and Strabo describes this division of Cilicia under CILICIA.

The ten divisions of Cappadocia (Strab. p. 534) are, Melitene, Cataonia, Cilicia, Tyanitis, and Garsauritis, which is incorrectly written Isauritis in Casaubon's text. He calls these the divisions at or about Taurus (*αἱ πρὸς τῷ Ταύρῳ*); and he enumerates them from east to west. For Melitene was on the west bank of the Euphrates, which separated it from Sophene on the east of the river. South-west of Melitene is the basin of Cataonia, which lies between the range of Amanus on the south, and the Antitaurus on the north. The district of Cilicia bordered on Cataonia, and it contained the town of Mazaca, afterwards Caesareia, and the lofty mountain Argaeus [ARGAEUS], the highest point of Cappadocia. The Tyanitis, so called from Tyana, is south-west of Cilicia. Tyana was at the northern base of Taurus, and near the pass into Cilicia, called the Cilician gates. Cilicia and Tyanitis, according to Strabo, were the only divisions of Cappadocia that contained cities. Garsauritis was on the west, on the borders of Phrygia. The other five districts named by Strabo are, Laviniasene, Sargarausene, Saravene, Cammanene, and Morimene; and he names them also from east to west, or nearly so. They occupied the northern part of Cappadocia, bordering on Pontus. The position of Laviniasene is not easy to fix; but, according to Strabo's words, already cited, it must be in the north-east part of Cappadocia. It is wrongly placed in some maps. To these ten divisions were added by the Romans an eleventh, which comprised the country to the south-west about Cybistra and Castabala, and as far as Derbe, which is in Lycaonia.

Armenia Minor did not originally belong to the Roman province of Cappadocia, the limits of which Strabo has described. The Greek geographer fixes the position of Armenia Minor (p. 555) thus. South of Pharnacia and Trapezus, on the Euxine, are the Tibareni and Chaldaei, as he calls them, who extend as far south as Armenia the Less, which is a tolerably

Digitized by Google

fertile country. The people of this Armenia were governed by a king, like the people of Sophene; and these kings of the small Armenia were sometimes in league with the other Armenians, and sometimes they were not. They extended their dominions even to Pharnacia and Trapezus, but the last of them surrendered to Mithridates the Great. Some time after the defeat of Mithridates this Armenia was attached to the Cappadocian kingdom of Ariobarzanes, as stated above. The Euphrates was the eastern boundary of this Armenia, and separated it from Acilisene.

This boundary seems to have begun about the point where the Euphrates takes a southern course. The northern boundary of Armenia Minor extended to the Paryadres range, and the upper part of the basin of the Halys, and even comprised part of that of the Lycus; for Nicopolis was probably on the Lycus, though it is not certain. Melitene was south of Armenia Minor, and also on the west side of the Euphrates. Ptolemy (v. 7) includes both Melitene and Cataonia in Armenia Minor. It is very difficult to fix any boundary of this Armenia, except that on the side of the Euphrates; and the modern writers on ancient geography do not help us much. Armenia Minor was given by Caligula to Cotys in A. D. 38, and by Nero in A. D. 54 to Aristobulus. It was afterwards attached to the province of Cappadocia, but it is not certain at what time; by Vespasian, as some suppose, or at the latest by Trajan. Its position on the north-east border of Cappadocia, and west of the Euphrates, made it a necessary addition to the province for defence. Melitene was now reckoned a part of Armenia Minor, which had, for the metropolis of the northern part, Nicopolis, the probable position of which has been mentioned; and for the southern part, the town of Melitene, near the west bank of the Euphrates. Cappadocia Proper, so poor in towns, was enriched with the addition of Archelais in Garsauritis, near the western frontier of Cappadocia, by the emperor Claudius; and with Faustinopolis, in the south-western part of Cappadocia, by M. Aurelius.

Pliny's (vi. 3) divisions of Cappadocia do not agree with Strabo; nor can we understand easily whether he is describing Cappadocia as a Roman province or not. He correctly places Melitene as lying in front of Armenia Minor, and Cataonia as bordering on Commagene. He makes Garsauritis, Sargarausene, and Cammanene border on Phrygia. He places Morimene in the NW., bordering on Galatia, "where the river Cappadox separates them (the Galatians and Cappadocians), from which they derived their name, being before called Leucosyri." If the position of the Cappadox can be determined, it fixes the boundary of Cappadocia on this side. Ainsworth (*London Geog. Journal*, vol. x. p. 290) supposes it to be the small river of *Kir-Shehr*, or the *Kulichi-Su*, which joins the Halys on the right bank, a little north of 39° N. lat. *Mojur*, which is in N. lat. 39° 5′, and at an elevation of 3140 feet above the sea, may be Mocissus (Ainsworth). Some geographers place Mocissus at *Kir-Shehr*, which is NW. of *Mojur*.

The Cappadocia of Ptolemy (vi. 1.) comprises a much larger extent of country than Cappadocia Proper. He makes it extend on the coast of the Euxine from Amisus to the mouth of the Apsarus; and this coast is distributed among Pontus Galaticus, Pontus Polemoniacus and Pontus Cappadocicus. All this is excluded from the Cappadocia of Strabo. The praefecturae Cappadocicae which Ptolemy names are seven: Chamanene, Sargarausene (Sargabrasene), Garsaouria (Gardocreta), Cilicia; chiana, containing Derbe, Larand Tyanitis (Tyanis). These are they stand in the old Latin versio of the names are corrupt. Ptole served, places Melitene and Cata Minor, and he gives to Cataonia a Strabo does.

The districts of MELITENE, a described in separate articles; and LATICUS, POLEMONIACUS, and C

al. viii. 543; Stat. *Silv.* iii. 5;
n historical times we find that
the hands of the Neapolitans,
and its inhabitants appear to have adopted and retained to a late period the Greek customs of that people. But Augustus having taken a fancy to Capreae, in consequence of a favourable omen which he met with on landing there, took possession of it as part of the imperial domain, giving the Neapolitans in exchange the far more wealthy island of Aenaria. (Suet. *Aug.* 92; Dion Cass. lii. 43.) He appears to have visited it repeatedly, and spent four days there shortly before his death. (Suet. *Aug.* 98.) But it was his successor Tiberius who gave the chief celebrity to Capreae, having, in A.D. 27, established his residence permanently on the island, where he spent the last ten years of his life. According to Tacitus, it was not so much the mildness of the climate and the beauty of the prospect that led him to take up his abode here, as the secluded and inaccessible character of the spot, which secured him alike from danger and from observation. It was here accordingly that he gave himself up to the unrestrained practice of the grossest debaucheries, which have rendered his name scarcely less infamous than his cruelties. (Tac. *Ann.* iv. 67, vi. 1; Suet. *Tib.* 40, 43; Dion Cass. lviii. 5; Juv. *Sat.* x. 93.) He erected not less than twelve villas in different parts of the island, the remains of several of which are still visible. The most considerable appears to have been situated on the summit of the cliff facing the Surrentine Promontory, which, from its strong position, is evidently that designated by Pliny (iii. 6. s. 12) as the "Arx Tiberii." It is supposed also to be this one that was called, as we learn from Suetonius (*Tib.* 65), the "Villa Jovis." Near it are the remains of a pharos or light-house, alluded to both by Suetonius and Statius, which must have served to guide ships through the strait between this headland and the Surrentine Promontory. (Suet. *Tib.* 74; Stat. *Silv.* iii. 5. 100.)

Strabo tells us that there were formerly two small towns in the island, but in his time only one remained. It in all probability occupied the same site as the modern town of *Capri*. (Strab. v. p. 248.)

The name of Taurubulae, mentioned by Statius (iii. 1. 129), appears to have been given to some of the lofty crags and rocks that crown the island of *Capri*: it is said that two of these still bear the names of *Toro grande* and *Toro piccolo*. From its rocky character and calcareous soil *Capri* is far inferior in fertility to the opposite island of *Ischia*: the epithet of "dites Capreae," given it in the same passage by Statius, could be deserved only on account of the imperial splendour lavished on the villas of Tiberius. Excavations in modern times have brought to light mosaic pavements, bas-reliefs, cameos, gems, and other relics of antiquity. These, as well as the present state of the island, are fully described by Hadrava. (*Lettere sull' Isola di Capri*. Dresden, 1794.) [E. H. B.]

CAPRIA LAKE. [ASPENDUS.]

CAPRUS. (Κάπρος: *Lybtzádha*), the port and island of Stageirus to the SW. of the Strymonic Gulf. (Strab. vii. p. 331; comp. Leake, *Northern Greece*, vol. iii. p. 166.) [E. B. J.]

CAPRUS. 1. (Κάπρος, Strab. xvi. p. 738; Polyb. v. 51; Ptol. vi. 1. § 7), a river of Assyria which flowed into the Tigris, not many miles below Nineveh. Its modern name is the *Lesser Zab*. It is probable that the name of this, and that of the *Greater Zab*, the Lycus, were imported into Assyria by the Greeks from Phrygia, in which were two rivers of the same names in close propinquity the one to the other. CAPSA (Κάψα: *Cafsa* or *Ghafsah*, Ru.), an important city in the extreme S. of Numidia (aft. in Byzacium), standing in a fertile and well-watered oasis, in the midst of an arid desert abounding in serpents, SW. of Thelepte, and NW. of Tacape. Its foundation was ascribed to the Libyan Hercules, and it seems to be the Hecatompylos of Polybius (i. 73) and Diodorus (iv. 18; comp. Frag. Lib. xxiv). In the Jugurthine War it was the treasury of Jugurtha, and was taken and destroyed by Marius; but it was afterwards rebuilt, and made a colony. Its names are found on inscriptions at *Cafsa*. (Sallust. *Jug.* 89, et seq.; Flor. iii. 1; Strab. xvii. p. 831; Plin. v. 4; *It. Ant. l.c.*; *Tab. Peut.*; Ptol. iv. 3. § 39; *Notit. Afr.*; Shaw, p. 124, 2nd ed.). [P. S.]

CAPUA (Καπύη: *Eth.* Καπυανός, or Καπυήσιος: in Latin Capuensis and Capuanus; but originally, Campanus, which is the only form found in Livy or Cicero: *Sta Maria di Capoua*), the capital of Campania, and one of the most important and celebrated cities of Italy. It was situated about 2 miles from the river Vulturnus, and little more than one from the foot of Mount Tifata. The origin and etymology of the name are much disputed. The most probable derivation is that adopted by Livy, from "Campus," on account of its situation in a fertile plain; it is certain that the name of *Capua* is found inseparably connected with that of *Campania*; the citizens of Capua are constantly called Campani, and the territory "Campanus ager." Thus also Virgil uses "Campana urbs" for Capua. (*Aen.* x. 145.) Strabo, on the other hand, derives it from "caput," as the *chief* city or *head* of the surrounding region; while others, according to custom, derived it from a founder of the name of Capys, whom some represented as the leader of the Samnite conquerors in B. C. 423, while others made him a contemporary of Aeneas, or connected him with the kings of Alba Longa. (Liv. iv. 37; Strab. v. p. 242; Festus, *s.v. Capua*; Virg. *Aen.* x. 145; and Servius *ad loc.*; Stat. *Silv.* iii. 5. 77.)

There is much uncertainty also as to the time when the city first received this name: Livy expressly tells us that its Etruscan name was Vulturnum, and that it first received that of Capua from the Samnites; other writers represent Capua itself as a word of Tuscan origin. (Intpp. ap. Serv. *l.c.*) The name must certainly be of greater antiquity than the date assigned to it by Livy, if we may trust to the accuracy of Stephanus of Byzantium, who cites it as used by Hecataeus, and it is not improbable that it was the *Oscan* name of the city long before the period of the Samnite conquest, and was only revived at that period.

Ancient writers are generally agreed in ascribing the foundation of Capua to the Etruscans: this was the statement of Cato, as well as of those authors who differed from him widely as to its date (Vell. Pat. i 7); and is confirmed by Strabo (v. p. 242); at the same time it is not improbable that there was already an Oscan town upon the site which was selected by the Tuscans for that of their new capital of Vulturnum. The period of this foundation was a subject of great uncertainty among the ancients themselves. Cato, as we learn from Velleius, referred it to so late a period as B. C. 471; while other authors (whose names are not mentioned) assigned to it a greater antiquity than Rome, and placed the foundation about 800 B. C. The latter may very probably have been adopted w

but no sooner had he again withdrawn his forces than the consuls Fulvius and Appius Claudius renewed the siege, and invested the city, notwithstanding its great extent, with a double line of circumvallation all round. All the efforts of Hannibal to break through these lines or compel the consuls to raise the siege, proved fruitless: famine made itself severely felt within the walls, and the Capuans were at length compelled to surrender at discretion B. C. 211.

The revolt of the faithless city was now punished with exemplary severity. All the senators, and other nobles, were put to death, or thrown into dungeons, where they ultimately perished: the other citizens were removed to a distance from their homes, the greater part of them beyond the Tiber; and the whole territory of the city confiscated to the Roman state: all local magistracies were abolished, and the mixed population of strangers, artisans, and new settlers, which was allowed to remain within the walls was subjected to the jurisdiction of the Roman praefect. (Liv. xxvi. 15, 16, 33, 34; Cic. *de Leg. Agr.* i. 6, 11, 28, 32.) The city itself was only spared, says Livy, in order that the most fertile lands in Italy might not be left without inhabitants to cultivate them: but its political importance was for ever annihilated, and the proud capital of Campania reduced to the condition of a provincial town of the most degraded class. The policy of the Romans in this instance was eminently successful: while the advantages which Capua derived from its position in the midst of so fertile a plain, and on the greatest high road of the empire, soon raised it again into a populous and flourishing town, and virtually, though not in name, the capital of Campania, it continued to be wholly free from domestic troubles and seditions, and its inhabitants were remarkable for their fidelity and attachment to Rome, of which they gave signal proof during the trying period of the Social War. (Cic. *de Leg. Agr.* ii. 33.) It is probable that they were on this occasion restored to the possession of municipal privileges, for though Velleius represents them as first recovering these, when they became a colony under Caesar, they certainly appear to have been in possession of them in the time of Cicero. (Vell. Pat. ii. 44; Cic. *pro Sest.* 4, *in Pison.* 12.) Its importance at this period is sufficiently attested by the repeated notices of it that occur during the Civil Wars of Rome. Thus it was at Capua that Sulla had assembled his army for the Mithridatic War, and from whence he turned the arms of his legions against Rome: it was here, too, that the next year Cinna first raised the standard of revolt against the Senate. (Appian, *B. C.* i. 56, 57, 63, 65.) Again, on the outbreak of the war between Caesar and Pompey, the partisans of the latter at first made Capua a kind of head-quarters, which they were, however, soon constrained to abandon. (Id. *B. C.* ii. 29, 37; Caes. *B. C.* i. 14; Cic. *ad Att.* vii. 14.) It is also mentioned on occasion of the conspiracy of Catiline, as one of the places where his emissaries were most active: in consequence of which, after the suppression of the danger, the municipality spontaneously adopted Cicero as their patron. (Cic. *pro Sest.* 4.)

Capua is at this time termed by the great orator "urbs amplissima atque ornatissima." (Id. *de Leg. Agr.* 28.) But the territory which had once belonged to it, the fertile "ager Campanus," was retained by the Romans as the property of the state, and was guarded with jealous care as one of the

chief sources of the public revenue: so that it was exempted even in the general distributions of the public lands by the Gracchi, and by Sulla (Cic. *de Leg. Agr.* i. 7), though the latter seems to have at least trenched upon some portions of it. (*Lib. Colon.* p. 232; Zumpt, *de Colon.* p. 252.) In B. C. 63, the tribune, Servilius Rullus, brought in an agrarian law, of which one of the chief objects was the division of this celebrated district: but the eloquence of Cicero procured its rejection. (Cic. *in Pison.* 2; Plut. *Cic.* 12.) A few years later, however, the same measure was carried into effect by the Lex Julia Agraria passed by Caesar in his consulship. B. C. 59, and 20,000 Roman citizens were settled in the "ager Campanus," and the adjoining district, called the Campus Stellatis. (Dion Cass. xxxviii. 7; Caes. *B. C.* i. 14; Suet. *Caes.* 20; Appian, *B. C.* ii. 10; Vell. Pat. ii. 44; Cic. *ad Att.* ii. 16.)

Capua thus became a Roman colony, and from henceforth continued to enjoy a dignity corresponding to its real importance. But the colonists settled here by Caesar were not long permitted to retain their lands in tranquillity. Among the cities of Italy, the possession of which the Triumvirs were compelled to promise to their legions in B. C. 43, Capua held a prominent place (Appian, *B. C.* iv. 3): it appears to have fallen to the lot of the veterans of Octavian, on which account the latter made it the head-quarters of his army previous to the war of Perusia, B. C. 41. (Id. v. 24.) We learn also that he further increased it by the establishment of fresh bodies of veterans after the battle of Actium: in consequence of which repeated accessions, the city appears to have assumed the titles of "Colonia Julia Augusta Felix," which we find it bearing in inscriptions. On the last of these occasions Augustus conferred an additional boon upon Capua (which he seems to have regarded with especial favour) by bestowing upon the municipality a valuable tract of land in the island of Crete, and by constructing an aqueduct, which added greatly to the salubrity of the city. (Vell. Pat. ii. 81; Dion Cass. xlix. 14.)

Under the Roman Empire we hear comparatively little of Capua, though it is clear from incidental notices, as well as from still extant inscriptions, that it continued to be a flourishing and populous city. Strabo calls it the metropolis of Campania, and says that it so far surpassed the other cities of the province, that they were merely small towns in comparison (v. p. 248). It received a fresh colony of veterans under Nero; but during the civil wars of A. D. 69 its steadfast adherence to the party of Vitellius involved many of the chief families of its citizens in ruin. (Tac. *Ann.* xiii. 31, *Hist.* iii. 57, iv. 3.) At a much later period Ausonius speaks of it as having greatly declined from its former splendour, but he still ranks it as the eighth city in the Roman Empire, and it is evident that there was no other in Southern Italy that could for a moment dispute its superiority. (Auson. *Ord. Nobil. Urb.* 6.) Its prosperity, however, probably rendered it an especial object of attack to the barbarians, who desolated Italy after the fall of the Western Empire. It was taken by Genseric, king of the Vandals, in A. D. 456, and, as we are told, utterly destroyed (*Hist. Miscell.* xiv. p. 98, ed. Mur.; Const. Porph. *de Adm. Imp.* 27); but though it appears to have never recovered this blow, it figures again, though in a very reduced condition, in the Gothic wars of Belisarius (Procop. *B. G.* i. 14, iii

N OF CAPUA.

CAPUT BOVIS (Καπούδβοες), a fort at one end of the famous bridge which the emperor Hadrian made in Moesia across the river Danube. It was situated near the modern *Severin*, between the ruined forts of *Zernigrad* and *Tschernetz*. (Procop. *de Aedif.* iv. 6. p. 288.) [L. S.]

CAPUT VADA. [BRACHODES.]

CARACCA. [ARRIACA.]

CARACA'TES. The "Triboci, Vangiones, et Caracates," are mentioned by Tacitus (*Hist.* iv. 70) in his history of the war of Civilis. Some of the commentators on Tacitus would alter the name, but there is no reason for altering such a name because it occurs nowhere else. D'Anville, finding no place for these people among the Triboci, Nemetes, and Vangiones, supposes that they may have occupied the tract between the Nava (*Nahe*) and the *Rhine*, and that Moguntiacum (*Mainz*) may have been their chief town; for it happens that we never find the name of the people mentioned who had *Mainz*. It may then have belonged to the Caracates. Walckenaer observes (*Géog.* vol. ii. p. 278) that in the environs of *Mainz* there occur the names *Karbach*, *Karlick*, *Karweiler*, *Karthäuser*, which may be taken to be some confirmation of D'Anville's conjecture. [G. L.]

CARACE'NI (Καρακηνοί), a tribe of the Samnites, which according to Ptolemy inhabited the most northern part of Samnium, bordering on the Peligni and the Frentani; but more especially the upper valley of the Sagrus (*Sangro*). The only city that he assigns to them is AUFIDENA, and their name is not mentioned by any other geographer. But it is generally supposed that the CARICINI (Καρίκινοι) of Zonaras, whom he speaks of as a Samnite people (viii. 7), are the same with the Caraceni of Ptolemy. He describes them as possessing a town or stronghold, which was not taken by the Roman consuls Q. Gallus and C. Fabius without difficulty. This town has been supposed by local topographers to be the same with the modern *Castel di Sangro*, which seems, from the inscriptions and other remains discovered there, to have been an ancient town, but there is no authority for this. Nor is there any ground for identifying the Carentini of Pliny (iii. 12. s. 17), whom that author seems to place among the Frentani, with the Caraceni. (Romanelli, vol. ii. pp. 483, 490.) [E. H. B.]

CARAE (Κάραι κώμαι, Diod. xvii. 27), a small place mentioned by Diodorus, and probably in Sittacene, one of the SE. districts of Assyria. It has been conjectured by Mannert (v. 2. p. 342) that it was situated in the neighbourhood of *Kesri-Shirin*, on the river Holwan. [V.]

CA'RALIS, or CA'RALES (the plural form is used by the best Latin writers: Κάραλις: *Eth.* Caralitanus: *Cagliari*), a city of Sardinia, the most considerable in the whole island, situated on the S. coast, on the extensive gulf which derived from it the name of Sinus Caralitanus (Καραλιτανὸς κόλπος, Ptol. iii. 3. § 4). Its foundation is expressly assigned to the Carthaginians (Paus. x. 17. § 9; Claudian, *B. Gild.* 520); and from its opportune situation for communication with Africa as well as its excellent port, it doubtless assumed under their government the same important position which we find it occupying under the Romans. No mention of it is found on the occasion of the Roman conquest of the island; but during the Second Punic War, it was the head-quarters of the praetor, T. Manlius, from whence he carried on his operations against

Digitized by Google

Hampsicora and the Carthaginians (Liv. xxiii. 40, 41), and appears on other occasions also as the chief naval station of the Romans in the island, and the residence of the praetor (Id. xxx. 39). Florus calls it the "urbs urbium," or capital of Sardinia, and represents it as taken and severely punished by Gracchus (ii. 6. § 35), but this statement is wholly at variance with the account given by Livy, of the wars of Gracchus, in Sardinia, according to which the *cities* were faithful to Rome, and the revolt was confined to the mountain tribes (xli. 6, 12, 17) In the Civil War between Caesar and Pompey, the citizens of Caralis were the first to declare in favour of the former, an example soon followed by the other cities of Sardinia (Caes. *B. C.* i. 30); and Caesar himself touched there with his fleet on his return from Africa. (Hirt. *B. Afr.* 98.) A few years later, when Sardinia fell into the hands of Menas, the lieutenant of Sex. Pompeius, Caralis was the only city which offered any resistance, but was taken after a short siege. (Dion Cass. xlviii. 30.) No mention of it occurs in history under the Roman Empire, but it continued to be regarded as the capital of the island, and though it did not become a colony, its inhabitants obtained the rights of Roman citizens. (Plin. iii. 7. s. 13; Strab. v. p. 224; Mela, ii. 7; *Itin. Ant.* pp. 80, 81, 82, &c.) After the fall of the Western Empire it fell, together with the rest of Sardinia, into the hands of the Vandals, but appears to have retained its importance throughout the middle ages, and is still, under the name of *Cagliari*, the capital of the island.

Claudian describes the ancient city as extending to a considerable length towards the promontory or headland, the projection of which sheltered its port: the latter affords good anchorage for large vessels; but besides this, which is only a well-sheltered roadstead, there is adjoining the city a large salt-water lake, or lagoon, called the *Stagno di Cagliari*, communicating by a narrow channel with the bay, which appears from Claudian to have been used in ancient times as an inner harbour or basin. (Claud. *B. Gild.* 520—524.) The promontory adjoining the city is evidently that noticed by Ptolemy (Κάραλις πόλις καὶ ἄκρα, *l. c.*), but the CARALITANUM PROMONTORIUM of Pliny can be no other than the headland, now called *Capo Carbonara*, which forms the eastern boundary of the Gulf of *Cagliari*, and the SE. point of the whole island. Immediately off it lay the little island of FICARIA (Plin. *l. c.*; Ptol. iii. 3. § 8), now called the *Isola dei Cavoli*.

Considerable remains of the ancient city are still visible at *Cagliari*, the most striking of which are those of the amphitheatre (described as extensive, and in good preservation), and of an aqueduct; the latter a most important acquisition to the city, where fresh water is at the present day both scarce and bad. There exist also ancient cisterns of vast extent: the ruins of a small circular temple, and numerous sepulchres on a hill outside the modern town, which appears to have formed the Necropolis of the ancient city. (Smyth's *Sardinia*, pp. 206, 215; Valery, *Voyage en Sardaigne*, c. 57.) [E. H. B.]

CARALITIS. [CARALLIS.]

CARALLIS (Καραλλις, Καράλλεια: *Eth.* Καραλλεώτης: Steph. *s. v.*), a city of Isauria, supposed by Cramer to be the same which Hierocles and the Councils assign to Pamphylia. There are imperial coins of Carallis with the epigraph Καραλλιωτων. The place appears to be *Kereli* on the north side of the lake of *Bey Sheher*, which is west of Iconium.

This lake is that which Strabo calls Coralis (Κώραλις), and Ha &c. vol. ii. p. 349) supposes it t Pusgusa or Pasgusa of the Byz a large lake, and contains ma modern writers call this lake but it does not appear on wh (xxxviii. 15) mentions a Caral near the Cibyratis.

CARAMBIS (Κάραμβις: *Ker* of Asia Minor, in the Paphlagon who describes it as a great hea north and to the Scythian or He considers this promontory of Criou Metopon in the Ta dividing the Euxine into tw (p. 124) the distance between at 2500 stadia; but this must text for 1500 stadia, as a com passage (p. 309) seems to show many navigators of the Euxi seen both promontories at once in his *Transl. of Strabo*, vol. i 12) makes the distance 170 M. of Carambis is mentioned by graphers, and by many other 2) makes the distance of Caram of the Pontus 325 M. P., or 3 some authorities. The direct which is east of it, was recko the true distance is about 100 rambis is in 42° N. lat. and a is not so far north as the p Lepte, which is near Sinope.

There was also a place calle promontory, mentioned by Scyla the name in Scylax is an em reading Caramus; but it app emendation.

CARANITIS (Καρηνῖτις, Καρανῖτις, Strab. xii. p. 560; canton of Upper Armenia, adde dominions. This district is at tains which separated the Rom Armenia. Carana (Κάρανα, no was the capital of this district. It was afterwards called Theod given it in honour of the emp Younger by Anatolius, his gene 416. (Procop. *de Aedif.* iii. 5; L vol. v. p. 446.) It was for a the Byzantine emperors, who c important fortress of Armenia. 17; Const. Porph. *de Adm.* vol. i. pp. 324, 463.) About th century it received the name o tracted into *Arzrûm* or *Erzrûm sur l'Arménie*, vol. i. p. 67; Ritt pp. 81, 271.) It owed its nam that when ARZEK was taken b A. D. 1049, the inhabitants o from its long subjection to the B the epithet of *Rûm*, retired to gave it the name of their forme tin, *l. c.*)

M, in Britain, mentioned by , under the name Carbantium, Ravenna. The word is evi- the British term *Caer*. Its h-western part of Scotland, as, Corda, and Trimontium, it is of the Selgovae. It has been ith *Caerlaverock*, with *Drum- cudbright*. [R. G. L.]

ra), a city of the Messapians, us (*ap. Athen.* xii. p. 522), as l by the Tarentines, on which occasion they inflicted such outrages on the inhabitants as subsequently brought down the divine vengeance upon all persons concerned in their perpetration. No subsequent notice of it is found; but the conjecture which identified it with *Carovigno* (a considerable modern town about 12 miles W. of *Brindisi*), derives some plausibility from the fact that inscriptions have been discovered there in the Messapian dialect, thus proving it to have been an ancient Messapian town. (Romanelli, vol. ii. p. 142; Mommsen, *U. I. Dialecte*, p. 63.) [E. H. B.]

CARBIS (Καρβίς, Arrian, *Ind.* 26), the name of a shore of the sea-coast of Gedrosia which was visited by the fleet of Nearchus. It does not appear to have been identified with any modern name. [V.]

CA'RCASO (*Carcassone*), a town in the Provincia of Caesar (*B. G.* iii. 20), and the Gallia Narbonensis of Pliny (iii. 4), who calls it "Carcasum Volcarum Tectosagum." Ptolemy (ii. 10) also mentions it as one of the towns of the Volcae Tectosages. It is on the Atax (*Aude*), and is now the capital of the department of *Aude*. In the campaign of P. Crassus in Aquitania during Caesar's government of Gaul, B. C. 56, Carcaso, Tolosa, and Narbo, furnished many brave soldiers for Crassus. They were summoned by the general from a muster roll. A column a few feet high, erected in honour of M. Numerius Numerianus, supposed to be the same as the son of the emperor Carus, was found a few miles from *Carcassone*, and is said to be the only monumental evidence that this was once a Roman town. But Numerianus was named M. Aurelius. In the Jerusalem Itinerary it is called Castellum Carcaso. [G. L.]

CARCATHIOCERTA (Καρκαθιόκερτα: *Kharpút*), the capital of SOPHENE, one of the cantons of Armenia. (Strab. xi. p. 527; Plin. vi. 10.) St. Martin (*Mém. sur l'Arménie*, vol. i. p. 188) considers that this was the ancient and heathen name of the city of Martyropolis [MARTYROPOLIS]; but Ritter (*Erdkunde*, vol. x. p. 811) has shown satisfactorily that this cannot be the case. Carcathiocerta does not occur in the Byzantine writers, but must be the same as the strong fortress which Cedrenus (*Hist. Comp.* vol. ii. p. 686) calls Χάρπετε, and which commanded Mesopotamia. It was called by the Syrians Kortbest (*Chartbist*, D'Anville; *Khartabist*, Herbelot; *Haretbaret*, Assemann; comp. Von Hammer, *Gesch. der Osman*, vol. i. p. 226, vol. ii. p. 345). *Kharpút* is placed on an eminence at the termination of a range of mountains, commanding a beautiful and extensive plain. At no great distance is a lake, which, though described as salt, is really freshwater (*Lake Goljik*), which Kinneir (*Geog. Mem. Pers. Emp.* p. 335) conjectures to be the lake Colchis of the ancients. (Comp. Ptol. v. 13.) The word *Kol*, *Kul*, or *Gul* frequently occurs in the interior of Asia, and signifies a tarn or mountain lake. (Ritter, *Erdkunde*, vol. x. p. 103; *Journ. Geog. Soc.* vol. vi. p. 207, vol. x. p. 365.) [E. B. J.]

CARCICI, for so D'Anville affirms that we ought to read the name in the Maritime Itinerary instead of Carsici. His authority for Carcici is an inscription which Barthelemi read on the spot. The measures are very confused along this part of the coast of Gallia, but D'Anville contends that the Carsicis Portus is *Cassis*, a place on the coast of France between *Toulon* and *Marseille*. (D'Anville, *Notice*, &c.; Walckenaer, *Géog.*, &c., vol. iii. p. 120.) [G. L.]

CINE (Plin. iv. 12. s. 26). CARCINI'TIS (Καρκινῖτις, Herod. iv. 55, 99; Hecat. *ap.* Steph. B. *s. v.*: *Eth.* Καρκινῖται), a city of Sarmatia Europaea (or Scythia, according to Herodotus), near the mouth of the river Hypacyris (Herod. iv. 55), or, as later writers name the river, Carcinites (Καρκινίτης, Strab. vii. p. 307; Ptol. iii. 5. §§ 8, 9; Plin. *l. c.*) This river fell into the gulf of the same name (Καρκινίτης κόλπος, Strab. *l. c.*; Mela, ii. 1. § 40; Plin. *l. c.*; Marcian. p. 55; Anon. *Per.* pp. 7, 9; formerly called Ταυράκης κόλπος; *Gulf of Perekop*), which lies on the W. side of the isthmus of the Chersonesus Taurica (*Crimea*). The river was regarded as the boundary between the "Old Scythia" of Herodotus (iv. 99) and Taurica (comp. Plin. *l. c.*, who calls the country W. of the river Scythia Sendica). The river is generally supposed to be the small stream of *Kalantchak*. The site of the city cannot be determined with any certainty. (Eichwald, *Geogr. d. Kasp. Meer.* p. 305; Ukert, vol. iii. pt. ii. pp. 164, 193, 438, 458.) [P.S.]

CARCINI'TES FL. et SIN. [CARCINA.]

CARCINI'TIS. [CARCINA.]

CA'RCORAS (Καρκόρας: *Gurk*), a river of southern Pannonia, flowing from the heights of Illyricum into the Savus. (Strab. vii. p. 314; Geog. Rav. iv. 21, where it is called Corcac.) [L. S.]

CARDAMYLE (Καρδαμύλη: *Eth.* Καρδαμυλίτης), a town of Messenia, and one of the seven places offered by Agamemnon to Achilles. (*Il.* ix. 150, 292.) It was situated on a strong rocky height at the distance of seven stadia from the sea, and sixty from Leuctra. (Paus. iii. 26. § 7; Strab. viii. p. 360, seq.) It is called a Laconian town by Herodotus (viii. 73), since the whole of Messenia was included in the territories of Laconia at the time of the historian. It again became a town of Messenia on the restoration of the independence of the latter; but it was finally separated from Messenia by Augustus, and annexed to Laconia. (Paus. *l. c.*) Pausanias mentions at Cardamyle sanctuaries of Athena and of Apollo Carneius; and in the neighbourhood of the town a temenus of the Nereids. There are considerable ruins of the town to the NE. of the modern *Skardhamúla*, at the distance of 1300 (French) metres from the sea. (Comp. Plin. iv. 5. s. 8; Ptol. iii. 16. § 22; Steph. B. *s. v.*; Leake, *Morea*, vol. i. p. 329, seq.; Boblaye, *Recherches*, p. 93.)

CA'RDIA (Καρδία: *Caridia*), one of the chief towns of the Thracian Chersonesus, situated at the head of the gulf of Melas. It was originally a colony of the Milesians and Clazomenians; but subsequently, in the time of Miltiades, the place also received Athenian colonists. (Herod. vii. 58, vi. 33, ix. 115; Scym. Chius, 699; Dem. *c. Philip.* i. p. 63, *de Halon.* pp. 87, 88, and elsewhere.) The town was destroyed by Lysimachus (Paus. i. 9. § 10), and although it was afterwards rebuilt, it never again rose to any degree of prosperity, as Lysimachia, which was built in its vicinity and peopled with the inhabitants of Cardia, became the chief town in that

τος). [Caresene.]

Eth. Κάρ, Κᾶρος, *fem.* Κάειρα:), a country in the south-west Strabo (p. 632) makes the Ionia to be the promontory tory of Miletus, and the Carian t stands (τῶν Καρικῶν ὀρῶν). *rab.* vol. iii. p. 2) writes ὄρων abo is made to say that the Ionia is the Poseidium and the t as Caria borders on Ionia, if has in this passage fixed no eidion, which is south of the Carian mountains he means is, which forms the northern t of the Maeander, he does not d his meaning very accurately; hich is north of the Maeander ary of Ionia, it appears incon- promontory south of the Maeary. But Strabo's text is still . Miletus, which was south of a tract once occupied by the an city, and the whole coast l the Hermus to Poseidion, acs Ionia. It is therefore conextend to Poseidium along the k of the Carian mountains as ns the Messogis, the mountain s on the coast in the promon- Messogis, which lies between ster and the basin of the Maeatural boundary between Caria the north of the Messogis. assage (p. 648), says that the r is occupied by Lydians, Caans, the people of Myus, and o had Magnesia on the Mae- 7), after describing the source says that it flows through parates Lydia and Caria in the r; and near the lower part of rough Caria itself (καὶ Καρίαν the emended text), that part ed by the Ionians, and enters letus and Priene. Herodotus ly Miletus and Myus, but also th of the Maeander (i. 142). r conclusion that the Carians once possessed all the plain of the Maeander in its middle and lower course, and that the Messogis was their northern limit. Immediately south of the Maeander, says Strabo (p. 650), all is Carian, the Carians there not being mingled with the Lydians, but being by themselves, except as to the sea-coast parts which the Myusii and Milesians have appropriated. In Strabo's time, then, or according to the authorities that Strabo followed, the stock of purer Carians commenced immediately south of the Maeander, and there were only traces of the former population in the plain on the north side of the river. On the north-east Caria bordered on Phrygia. Strabo (p. 663) makes Carura on the upper Maeander the boundary between Phrygia and Caria. The range of Cadmus forms a natural boundary to Caria on the north-east, occupying the country between the upper basin of the Maeander and of the Indus, one of the large rivers which enters the sea on the south coast of Caria. The natural limit of Caria on the east would be the high land that bounds the basin of the Indus on the west, and not the range of Daedala, which is in Lycia (Strab. p. 664), and forms the eastern boundary of the basin of the Indus or Calbis of Strabo. But the most eastern place on the coast of Caria, according to Strabo, is Daedala, east of the Indus, and north of Daedala is the mountain range that has the same name. According to this geographer, the small river Glaucus, which enters the bay of Glaucus, is the eastern boundary of Caria on the south coast, and thus he includes within Caria, at least the lower part of the valley of the Indus or Calbis, and the towns of Daedala, Araxa, and that of Calynda, though the site of Calynda is not certain. [Calynda.]

The whole coast of Caria, including the bays, is estimated at 4900 stadia. (Strab. p. 651.) The part of the south coast from Daedala westward to Mount Phoenix, opposite to the small island Elaeussa, and to the northern extremity of Rhodes, 1500 stadia in length, was called the Peraea. This Peraea belonged to the Rhodians, and is accordingly sometimes called ἡ περαία τῶν Ροδίων (Polyb. xvii. 2), who appear to have had part of this coast at least from a very early period; for Scylax (p. 38) mentions a tract south of Cnidus as belonging to the Rhodians.

The Carians maintained that they were an autochthonous continental people, the original inhabitants of Caria, and that they had always this name. As a proof of it, they pointed to the temple of the Carian Zeus at Mylasa, which was open to the Lydians and Mysians also, for Lydus and Mysus were the brothers of Car. (Herod. i. 171.) The proof might show that there was some fraternity among these three nations, but certainly it would not prove that the Carians were autochthonous in Caria. But the Cretans had a different story. They said that the Cares inhabited the islands of the Aegean, and were subject to Minos, king of Crete, being then called Leleges, but they paid no tribute. They were a warlike race, and manned the ships of Minos. They were afterwards driven from the islands by the Dorians and Ionians, and so came to the mainland. Strabo (p. 661) follows this tradition, and adds that the continental people whom they displaced were themselves Leleges and Pelasgi. But this tradition does not explain the origin of the name Carians. In the Iliad (x. 428), Cares, Leleges, Caucones, and Pelasgi are mentioned among the Trojan auxiliaries; and we may assume them all to be continental

Digitized by Google

people. The Leleges [LELEGES] seem to have once occupied a considerable part of the west coast of Asia Minor. Strabo (p. 611) observes, that "in all Caria and in Miletus tombs of the Leleges, and forts and vestiges of buildings, are shown." The true conclusion seems to be that Cares and Leleges are different peoples or nations, whatever relationship there may have been between them. In proof of the former occupation of some of the islands of the Aegean by Carians, Thucydides (i. 8) states that when the Athenians, in the Peloponnesian war, removed all the dead bodies from the sacred island of Delos, above half appeared to be Carians, who were recognised by their arms, which were buried with them, and by the manner of their interment, which was the same that they used when Thucydides wrote. He states that the early inhabitants of the islands of the Aegean were pirates, and they were Carians and Phoenicians. According to him, Minos expelled the Carians from the Cyclades (i. 4), which is not the tradition that Herodotus followed. The Carians of Homer occupied Miletus, and the banks of the Maeander, and the heights of Mycale; and consequently, according to Homer, they were both north and south of this river. Strabo even makes the original inhabitants of Ephesus to have been Cares and Leleges.

Within the limits of Caria was a people named Caunii, who had a town Caunus, on the south coast. Herodotus (i. 171) believed them to be autochthonous, but they said that they came from Crete. Herodotus also says that they approximated in language to the Carian nation, or the Carians to them; he could not tell which. But in customs they differed from the Carians and from every other people. The remark about the language is not very clear, but as Herodotus was a native of Caria, he may be supposed to be right as to the fact of some resemblance between the languages of these two people.

The settlements of the Ionians in Asia displaced the Carians from Mycale, near which Priene was built, from Myus on the south side of the Maeander, and from the territory of Miletus, which, according to Homer, was a Carian city (*Il.* ii. 866). The Dorians drove them from Halicarnassus, from Cnidus and the Triopia, and probably the Dorians found the Carians in the island of Cos, which they also seized. The possessions of the Rhodians on the south coast probably belong to the same epoch. But it was only the sea-coast that the early Greek settlers occupied, according to their usual practice, and not all the sea-coast, for in the time of Xerxes (B. C. 480), the Carians contributed 70 ships to the Persian fleet, and the Dorians of Caria supplied only thirty. Homer designates the Carians by the epithet Βαρβαροφώνων (*Il.* ii. 865), the exact meaning of which is a difficulty to us, as it was to Strabo and others of his countrymen (p. 661). We may conclude that there was some intermixture between the Greek settlers and the Carians, as is always the case when two peoples live near one another. But the Carians maintained their language, though many Greek words were introduced into it, as Strabo says (p. 662), on the authority of Philippus, who wrote a history of the Carians. The Carians lived in small towns or villages (κῶμαι), united in a kind of federation. Their place of meeting was a spot in the interior, where the Macedonians, after the time of Alexander, founded the colony of Stratonicea. They met at the temple of Zeus Chrysaoreus to sacrifice and to deliberate on their common interest

ection of the mountain ranges has regular form of the western coast rth side of the peninsula of Miletus atmus, so called from the neigh- Latmus, but the bay has disape tract of sea has been filled up f the Maeander, which once en- the north side of the bay of ler, *Travels in Asia Minor*, &c. nch ed.; MAEANDER.) South of was the bay of Iasus, also called Sinus Bargylieticus, the northern side of which terminated in the promontory Posidium, and the southern side was the north coast of the peninsula of Halicarnassus. The Ceramicus (*Κεραμεικὸς κόλπος*, Herod. i. 174), or Doris of Pliny, now the Gulf of *Boodrwn*, is a deep inlet, the north side of which is formed by the mountain range already described as running through Caria from east to west, and terminating in the peninsula of Halicarnassus. The southern side of the bay is bounded by the long Triopian peninsula, at the western extremity of which Cnidos was situated; and in the mouth of the gulf is the long narrow island of Cos, which looks like a fragment of the mountains of the continent. The peninsula of Cnidos is contracted to a narrow neck in two places, and thus is divided into two peninsulas. The more eastern of these two necks seems to be the termination of the Triopian peninsula [BUBASSUS], which forms the northern boundary of the picturesque gulf of *Syme*. The south side is formed by another peninsula, a continuation of a mountain range from the interior of Caria, which terminates on the coast, opposite to the island Elaeussa, in Mount Phoenix, which Ptolemy (v. 2) enters in his list as one of the great mountains of the western side of Asia; and it is the highest mountain in those parts (Strab. p. 652). The Peraea of the Rhodians commenced at Phoenix and ran eastward along the coast between the mountains of the interior and the sea (Strab. pp. 651, 652). The bay of Syme has a rugged and uneven coast, and itself contains several other bays, which Mela, proceeding from east to west in his description of the coast of Caria (i. 16), names in the following order: — Thymnias, Schoenus, and Bubessius. The Thymnias, then, is the bay right opposite to the island of Syme, bounded on the north side by the promontory Aphrodisium; the Schoenus is the next bay further north; and the bay of Bubassus is the bay north of the Schoenus, and the termination of the gulf of Syme. Close to this bay of Bubassus is the narrow neck of land which connects the Cnidian peninsula with the mainland. (See Hamilton's *Asia Minor*, &c. vol. ii. p. 77.) Some geographers place the bay of Bubassus on the south side of the Triopian peninsula, where also the land is contracted to a narrow neck; but if the Cnidian isthmus of Herodotus is rightly determined, this is not the bay of Bubassus. [BUBASSUS.] If this is the right position of the Bubassus, the Bubassie of Herodotus (i. 174) is the long peninsula to the east of the Triopia, or the rocky tract that contains the mountain Phoenix. And this peninsula is what Diodorus (v. 60, 62) calls the Chersonesus opposite to the Rhodians; Pliny also (xxxi. 2) speaks of the Chersonesus Rhodia. This peninsula, or Rhodian Chersonese, terminates in the Dog's Tomb (Cynossema) or Ass' jaw (Onugnathos), right opposite to the island of Rhodes, and in the Paridion promontory perhaps of Pliny opposite to the island of Syme. (Comp. Plin. v. 28, and Mela, i. 16.)

The neck of this Rhodian Chersonese is the narrow tract between the head of the gulf of Syme and a land-locked bay on the east, at the head of which was the town of Physcus. Between this last-mentioned bay and another small bay, Panormus, to the east, is another Chersonesus; and further east, between the mouth of the Calbis and the gulf of Glaucus, *Macri*, is another Chersonesus, which terminates in the promontory Pedalium or Artemisium. The irregular coast of Caria is most picturesque,

Digitized by Google

and in some parts the rocks rise abruptly from the sea.

There was a road from Physcus in the Peraea of the Rhodians to Ephesus. The distances were, from Physcus to Lagina, in the territory of Stratonicea, 850 stadia; to Alabanda, 250; to the passage of the Maeander, 80 stadia: in all 1180 stadia from Physcus to the Maeander (Artemidorus, quoted by Strabo, p. 663). At the Maeander Strabo places the limits (ὅροι) of Caria, an expression which may seem to support Groskurd's emendation mentioned at the beginning of this article.

Though a large part of Caria is mountainous, it contains some extensive valleys and a great deal of good land in the basin of the Maeander and its tributary streams. The Peraea is a beautiful country, and contains some fertile tracts. There is still a good deal of timber on the hills in many parts of Caria, firs, oaks, and many fine plane trees. The country produces good grain and fruits, the fig and the olive. The vine grows to the top of the highest trees. Oil is made in Caria. The variation in altitude causes a great difference in climate, for the higher tracts are cold, wintry, and snow-covered, while it is hot in the lower grounds. In the upper valley of the Mosynus it is still winter in the month of March. Some sheep are fed in Caria; and we may conclude that, as Miletus was noted for its wool, the high lands of Caria formerly fed a great number of sheep. The green slopes near Alabanda, *Arab Hissá*, in the valley of the Marsyas, are now covered with flocks. The limestone of the country furnished excellent building material; and there are hot springs and gaseous flames. (Fellows, *Discoveries in Lycia, Asia Minor, &c.*) The palm tree grows luxuriantly, and the orange about the ancient Halicarnassus. The wine of Cnidus was highly esteemed in ancient times.

The islands off the Carian coast are too remote to be considered as appendages of the mainland, with the exception perhaps of Cos, already mentioned, and the island of Syme, which is off the bay of Thymnias. There are many small rocky islands along the coast. The numerous towns are described under their several heads. [G. L.]

CARIATAE (Καρίαται, Strab. xi. p. 517), a small town of Bactriana which was destroyed by Alexander the Great. It is said by Strabo to have been the place where Callisthenes was secured by Alexander's guards. (Arrian, *Anab.* iv. 14; Curt. viii. 5. § 8; Plut. *Alex.* 55.) [V.]

CARILOCUS (*Charlieu*), a town of the Aedui, according to some of the Latin texts of Ptolemy; but the name is said not to appear in any of the Greek texts, which is suspicious. Nor is it mentioned by any ancient writer. It appears under the name of Carus locus in the documents of the 10th century. *Charlieu* is near the right bank of the Loire, between *Semur* and *Roanne*. [G. L.]

CARINE. [CARENE.]

CARISA or CARISSA (Coins: Κάρισσα, Ptol. ii. 4. § 13: Regia Carissa cognomine Aurelia, Plin. iii. 1. s. 3: Ru. with inscriptions at *Carixa*, near *Bornos*, in the neighbourhood of *Seville*), a city of the Turdetani in Hispania Baetica, in the conventus of Gades, having the *civitas Latina*. Several of its coins are extant. (Caro, *Ant. Hisp.* iii. 19; Morales, *Antig.* p. 8, b.; Florez, *Med. de Esp.* vol. i. p. 285, vol. iii. p. 30; Mionnet, vol. i. p. 8, Suppl. vol. i. p. 16; Sestini, pp. 20, 38; Eckhel, vol. i. p. 16). [P. S.]

CARMAEI, a tribe of the Minaei [MINAEI], mentioned by Pliny (vi. 28. s. 3 same as the Ἀκαρμὰν βασίλειον 16), which Forster identifies with *Karn-al-Manzil* in the *Hedjaz* be *Mekka*, about 50 miles SE. of the vol. i. pp. 133, 134, vol. ii. pp. 255-

CARMALAS (Καρμάλας), a C Strabo (p. 537) says that in Cataoo fort, Dastarcum, round which the runs. Then he says, in Sargara docia, there is a small town Herpa, malas, "which *also* flows into Cili the Pyramus, which he has describ And again, king Ariarathes dam malas, but it burst the dike and land about Mallus in Cilicia, wh coast (p. 539). There is great c Sargarausene is one of the north Cappadocia. In another passage fixes a place called Herphae, whi the same name as Herpa, in Me Euphrates. Finally, Ptolemy (v. town Carmala in Melitene and near the Melas and the Euphrates. of Philistia from the Plain of
ast of Phoenicia. It falls ab-
nd its bluff head forms a bold
this point it rises rapidly to the
elevation of about 1,500 feet, and runs in a south-easterly direction for about 18 miles, where it is connected by a range of lower hills with the great range that passes down the whole of Palestine, known in its various parts under various appellations, as the Mountain of Samaria, Mount Ephraim, the Hill country of Judaea, and the Mountains of Hebron. It is a limestone formation, and was formerly celebrated for its fertility, as its name implies.

In the division of the land among the 12 tribes, it formed the southern boundary of Asher (*Josh.* xix. 68), and is chiefly celebrated in Holy Scriptures for the sacrifice of Elijah (2 *Kings*, xxiii.), and there can be little doubt that it owes its fame for sanctity among the Pagans to the tradition of that miracle.

It is mentioned by Iamblichus, in his life of Pythagoras, as a mountain of pre-eminent sanctity, where this philosopher passed some time in solitude, in a temple. He was seen there by the crew of an Egyptian vessel, descending from the summit of the Mount, walking leisurely, without turning back, unimpeded by the precipitous and difficult rocks. He went on board their vessel and sailed with them for Egypt (cap. 3).

It was on this mountain that Vespasian consulted the oracle (Oraculum Carmeli Dei, Suet. *Vesp.* 5). Tacitus also informs us that there was a god synonymous with the mountain. He adds "Nec simulacrum Deo aut templum, sic tradidere majores: aram tantum et reverentiam" (*Hist.* ii. 78). The altar was doubtless the traditional site of that erected by Elijah, the memory of which has been preserved by the natives to this day, at the south-eastern extremity of the range. The celebrated convent at the north-western extremity is said to mark the spot where Elijah and Elisha had their abode. (Reland, *Palest.* p. 327—330; Ritter, *Erdkunde von Asien*, vol. viii. p. 705, &c.)

Pliny speaks of "Promontorium Carmelum et in monte oppidum eodem nomine, quondam Acbatana dictum" (v. 19. s. 17). Possibly he means the town of PORPHYRIUM, now *Khaifa*, at the foot of the mountain. [G. W.]

CARMO (Κάρμων, Strab. iii. p. 141: *Eth.* Carmonensis: *Carmona*), a strongly fortified city of Hispania Baetica, ENE. of Hispalis, at the distance of 22 M.P. on the road to Emerita (*Itin. Ant.* p. 414), on a hill by the side of a S. tributary of the Baetis, now called the *Corbones*. It is first mentioned as one of the headquarters of the rebellion in Baeturia, B. C. 197 (Liv. xxxiii. 21; *validas urbes, Carmonem et Bardonem*), and again in the Julian Civil War, when Caesar calls it by far the strongest city in the whole province of Further Spain (*B. C.* ii. 19; comp. Hirt. *B. Alex.* 57, 64, where it is called Carmona). It is probably the place mentioned by Appian (*Hisp.* 25, 58, where the name has been corrupted into Καρεώνη or Καρβώνη, and Καρμένη); and also the

COIN OF CARMO.

Carmelis of Livy. (Freinsheim, Epit. Lib. xlviii. 24.) Several of its coins are extant; all, with one exception, being of the type here represented, namely, on the obverse the heads of various deities; on the reverse, the name of the city between two ears of corn placed horizontally. (Florez, *Esp. Sagr.* vol. ix. pp. 113—115; *Med. de Esp.* vol. i. p. 288. vol. iii. p. 31; Caro, *Ant. Hispal.* iii. 41; Mionnet. vol. i. p. 9, Suppl. vol. i. p. 17; Sestini, p. 40; Eckhel, vol. i. p. 17). [P. S.]

CARMYLESSUS (Καρμυλησσός), a town of Lycia, placed by Strabo (p. 665) between Telmissus and the mouth of the Xanthus. After Telmissus he says, "then Anticragus, an abrupt mountain on which is the small place Carmylessus, lying in a ravine." The site is unknown. (Fellows, *Lycia*, p. 247; Leake, *Asia Minor*, p. 182.) [G. L.]

CARNA (Κάρνα), the capital of the Minaei, a tribe of Arabia Felix (Strab. xvi. p. 768), mentioned also by Ptolemy (vi. 16) as an inland town; probably the same as Pliny's "Carnon" (vi. 28. s. 22). [G. W.]

CARNASIUM. [Oechalia.]

CARNE. [Antaradus.]

CARNI (Κάρνοι), an Alpine tribe, who inhabited the ranges of those mountains which separated Venetia from Noricum, extending from Rhaetia on the W. to the confines of Istria on the E. Their limits, however, are not very clearly defined. Strabo appears to confine them to the mountain country, and regards the plain about Aquileia as belonging to Venetia (iv. p. 206, v. p. 216). Ptolemy, on the contrary, divides the province into two portions, distinguishing the territory of the Carni from Venetia, and assigning to the former the two cities of Aquileia and Concordia near the coast, as well as Forum Julii in the interior. (Ptol. iii. 1. § 29.) Pliny also calls the district about Aquileia "Carnorum regio," but no mention is found of the Carni in the account given by Livy of the foundation of that city, which he certainly appears to have regarded as situated in Venetia. (Liv. xxxix. 22, 45, 55.) The proper abode of the Carni would therefore seem to have been the mountain ranges that sweep in a kind of semicircle round the plain of the *Friuli*: and which were thence distinguished as the Alpes Carnicae, though in later times better known as the Alpes Juliae. [Alpes.] Here they were bounded by the Rhaetians on the W., by the Noricans on the N., and by the Taurisci and Japodes on the E. Tergeste, on the very confines of Istria, was, before it became a Roman town, a village of the Carni. (Strab. vii. p. 314.) We have no express statement in any ancient author, concerning their origin, but there seem to be good reasons for believing them to be a Celtic race; and the Fasti Triumphales record the triumph of M. Aemilius Scaurus in B. C. 115, "de Galleis Karneis." (Gruter. *Inscr.* p. 298. 3.) This is the only notice we have of the period of their conquest by the Romans, none of the extant historians having deemed the event worthy of mention; nor have we any account of the period at which they were reduced to a state of more complete subjection; but the names of Julium Carnicum, and Forum Julii, given to the two Roman towns which were established within their territory, sufficiently point out that this took place either under Caesar himself, or (more probably) under Octavian. The construction of a Roman road through the heart of this territory, which led from Aquileia up the valley of the Tilaventus (*Tagliamento*) to Julium Carnicum (*Zuglio*), and thence across the southern chain of the (*Innichen*), in the valley of the completely opened out their mo But the Carni continued to exist down to a late period of the R gave to the mountain region whic name of Carnia or Carniola. The first appears in Paulus Diaconus been retained down to the presen greater part of the modern duchy o in German *Krain*), was not in limits of the Carni, as these are and Pliny. NUNTUM.]

CARNŪTI (Καρνοῦτοι). s the form Carnūti. Plutarch em Carnutini. A Celtic people by Livy (v. 34), among the Italy under Bellovesus, in the Priscus. In Caesar's time, the considerable territory, extend- to the *Loire*, and south of the pal town, Genabum (*Orléans*), e of the Loire (*B. G.* vii. 11); er town, Autricum (*Chartres*, derives its modern name from ich was the name of Autricum nan empire. Strabo (p. 191) n of *Orléans* pretty correctly bout the middle of the course sar says, that the territory of ckoned the central part of all , and that the Gallic Druids once a year in a consecrated comprehended the dioceses of nd *Blois*. Two places called he borders of the diocese of s, and a place called *Terminier*, sion of the territory of the the Roman period. The *Char*- volutionary divisions of France, as included, is derived from the

re the neighbours of the Car- , and the Senones on the east. kings before Caesar's invasion, ey had got rid of them. Tas- f the royal family, did Caesar part of his Gallic war, and he the seat of his ancestors. The red by his subjects in the third (*B. G.* v. 25.) The Carnutes sar hostages (*B. G.* vi. 4), and for them with the Roman pro- e they are described by Caesar on the Remi (in clientela), the e are not told, but it may be mparing this with other pas- of the Gallic war, that Caesar (attribuit) to his friends the t something out of them. Yet he neighbours of the Carnutes, some other tribes lay between clientela did not exist till after us. In the seventh year of the Carnutes began the general ar (vii. 8), by murdering the at Genabum, and a Roman eques commissariat department. The n back very soon by burning ing the plunder to his soldiers rnutes sent 12,000 men with the other Galli to relieve Vercingetorix, when Caesar was besieging him in Alesia (vii. 75), and they were routed with the rest of the Gallic army. They were in arms again in the following winter (*B. G.* viii. 5), and had to endure the horrors of war in a campaign with the Romans during a very severe season. Again they submitted and gave hostages, and their example induced the Celtae west of them finally to yield to the Roman governor (viii. 31). The last event in the history of the Carnutes mentioned by the author of the eighth book of the Gallic War, is Caesar's flogging to death Gutruatus, a Carnut, who had excited his countrymen to rise against the Romans in B. C. 52.

Pliny (iv. 18) places the Carnuti, as he calls them, in the division of Gallia Lugdunensis, and he entitles them "foederati," a term which we know the meaning of in the time of Cicero; but as we have no records of the history of Gallia of this period, it is difficult to say what is the precise import of the term in Pliny.

The territory of the Carnutes contained a few other small places: Durocasis (*Dreux*); Diodurum; the places called Fines; and Belca. [G. L.]

CAROCOTINUM, a place in Gallia, the commencement of a road in the Antonine Itin., which passes through *Paris* to Augustobona (*Troyes*). The first station from Carocotinum is Juliobona (*Lillebone*), at the distance of 10 Gallic leagues, or 15 M. P. The place thus indicated seems to be *Harfleur*, on the north side of the outlet of the *Seine*. Carocotinum was therefore in the country of the Caleti. [G. L.]

CARON PORTUS (Καρῶν λιμήν), a port town in Moesia, on the coast of the Euxine, in a district called Caria or Cariae, and to the SE. of the modern town of *Gülgrad*. (Mela, ii. 2; Arrian. *Peripl.* p. 24; Anonym. *Peripl.* p. 13.) As to the probability of Carians having established colonies in those parts, see Raoul-Rochette, *Hist. des Colon.* vol. iii. p. 318. [L. S.]

CARO'POLIS (Καρόπολις: *Eth.* Καροπολίτης), or the city of the Carians, a place in Caria, mentioned by Alexander in the first book of his Carica. (Steph. *s. v.* Καρόπολις.) [G. L.]

CARPA'SIA (Καρπασία, Strab., Ptol., Diod., Steph. B.; Καρπασεία, Stadiasm.; Καρπάσιον, Hierocl.; Plin. v. 31. s. 35; Κάρπασος, Const. Porph.: *Eth.* Καρπασεώτης, Καρπασεύς, Steph. B.: *Carpas*), a town and port of Cyprus, to the NE. of the island, facing the promontory of Sarpedon on the Cilician coast. (Strab. xiv. p. 682; Ptol. v. 14. § 4; Scylax.) According to legend, it was founded by Pygmalion. (Steph. B. *s. v.*) It was taken by Demetrius Poliorcetes, together with a neighbouring place called Urania. (Diod. xx. 48.) Pococke (*Trav.* vol. ii. p. 219) speaks of remains at *Carpas*, especially of a wall nearly half a mile in circumference, with a pier running into the sea. (Engel, *Kypros*, vol. i. pp. 83, 174; *Mém. de l'Acad. des Inscrip.* vol. xxxii. p. 543; Mariti, *Viaggi*, vol. i. p. 163.) [E. B. J.]

CARPATES MONS (ὁ Καρπάτης ὄρος: *Carpathian Mountains*). The *name* first occurs in Ptolemy, who applies it to a range of mountains beginning in 46° long and 48° 30′ lat., about 1° W. of the source of the river Tibiscus (*Theiss*), and extending to the E. as far as the source of the Tyras (*Dniester*), forming a portion of the boundary between Dacia on the S. and Sarmatia on the N. (Ptol. iii. 5. §§ 6, 15, 18, 20, 7. § 1, 8. § 1). This description corresponds tolerably well to the *W. Carpathian Moun-*

Digitized by Google

tains, but Ptolemy insulates the range, taking no notice of its prolongation to the SE. through Dacia (the *E. Carpathian Mountains*), and expressly separating it, on the W., from the Sarmatici M. The earlier writers accurately describe the range as a continuation of the Hercynia Silva, and as running through Dacia, but they do not call it by any specific name (Caes. *B. G.* vi. 25; Strab. vii. p. 295; Plin. iv. 12. s. 25). In the Peutingerian Table it is called Alpes Bastarnicae. It contains the sources of the great rivers flowing through Dacia, southward, into the Danube. (Ukert, vol. iii. pt. 2. pp. 126, 355, 602.) [P. S.]

CARPATHIUM MARE. [CARPATHUS.]

CARPATHUS (Κάρπαθος; Carpathum, Plin.; in Hom. *Il.* ii. 676, Κράπαθος: *Eth.* Καρπάθιος: *Skarpanto*), an island in the sea between Crete and Rhodes, which was named after it the Carpathian sea. (Καρπάθιον πέλαγος, Strab. x. p. 488; Carpathium mare, Hor. *Carm.* i. 35. 8.) Carpathus is described by the ancient authorities as 100 stadia in length (Scylax, p. 56), and 200 stadia in circuit (Strab. p. 489); but according to Bondelmonte, the old Italian traveller, it is 70 Italian miles in circumference. The island consists for the most part of lofty and bare mountains, full of ravines and hollows; and the coast is generally steep and inaccessible. The principal mountain, which is in the centre of the island, and is called *Lastos*, appears to be 4000 feet in height.

Carpathus is said to have been subject to Minos and to have been afterwards colonized by Argive Dorians. (Diod. v. 54.) It always remained a Doric country. At the time of the Trojan war it is mentioned along with Nisyrus, Casus and Cos (Hom. *Il.* ii. 676); but at a later period it was under the rule of the Rhodians. It would seem never to have possessed complete independence, as no autonomous coins of Carpathus have been discovered; while Rhodian coins are commonly found in the island.

Carpathus appears to have been well peopled in antiquity. According to Scylax it contained three towns; according to Strabo, four. The only name which Strabo gives is Nisyrus (Νίσυρος). Ptolemy (v. 2. § 33) mentions another town, called Poseidium (Ποσείδιον). The name of a third, Arcesine (Ἀρκεσίνη), is only preserved in an inscription containing the tribute of the Athenian allies. The site of Arcesine has been determined by Ross. It is now called *Arkássa*, and is situated upon a promontory in the middle of the west coast of the southern part of the island. Poseidium was situated upon a corresponding cape upon the eastern side of the island, and is now called *Pigadin* or *Posin*.

There are ruins of an ancient town upon a rock, *Sókastron*, off the western coast, and of another town upon the island *Saria*, which is ten miles in circuit, and is separated by a narrow strait from the northern extremity of Carpathus. The ruins in *Saría*, which are called *Paliti'a*, may possibly be those of Nisyrus. (Comp. the names Σαρία, Νισυρία.)

Ptolemy (*l. c.*) mentions two promontories, one called Thoanteium (Θοάντειον), probably the southern extremity of the island, the modern *Akrotéri*, and the other Ephialtium (Ἐφιάλτιον), which Ross conjectures to be a promontory S. of Poseidium, of which the modern name *Aphiartis* is perhaps a corruption. The accompanying map of Carpathus is taken from Ross, who is the only that has given an account of th Herod. iii. 45; Dionys. Per. 500; v. 31. s. 36; Pomp. Mel. ii. 7; St *Reisen auf den Griech. Inseln*, v

CARPETANI.]

[CARTEIA.]

CARPE'SII (Καρπήσιοι, Polyb. ; Steph. B.; Καρπητανοί, Polyb. 139, 141, 152, 162; Ptol. ii. 6. Plin. iii. 3. s. 4), a people of His- , one of the most numerous and whole peninsula, in the very centre ted the great valley of the Upper ntains on its S. margin, to the ders of Lusitania on the W. to ltiberi on the S. and E., having ccaei and Arevacae and some ir country, called CARPETANIA dded over great part of *Old and* ortion of *Estremadura*. (Appian. ., Strab., &c. *ll. cc.*) Their chief (*Toledo*), and Ptolemy mentions hem upon the great road from ugusta, along the Tagus, which cium, above Toletum, by another ica Augusta to Laminium near as. There was also a road from m. On the first of these roads below Toletum: above it were , the Tituacia (Τιτουακία) of *Bayona*); COMPLUTUM (Κόμ- P.; ARRIACA, 22 M. P., the of Ptolemy, between which and the road passed into Celtiberia. 438.) On the second road, 24 ia, and the same distance from foot of the mountains, was Mia- not clear whether it belonged to e Arevacae (*Itin. Ant.* p. 435). place with the modern capital ers take for the Mantua (*Már-* but both opinions are probably perhaps *Mondejar*. Again, to on the road to Laminium, was 18 M. P., the name of which is s statement, that the cumin of best in the world (xix. 8. s. 47): n at *Santa Cruz de la Zarza*, been identified with Vicus Cu- numbers of the Itinerary better Aranjuez: Alce 24 M. P. (near . xi. 48, 49); 40 M. P. from Alce *tin. Ant.* p. 445). On the road minium, were Consabrum, 44 M.P. nicipium, belonging to the con- Nova (*Itin. Ant.* p. 446; Plin. iii. . iv. 44; Frontin. *Stratag.* iv. 5. ter, p. 402, no. 5, p. 909, no. 14): and Murua (prob. *Morotales*) 28 M. P. from Laminium, and 28 from Consabrum (*Ant. Itin. l. c.*). Among the other cities of the Carpetani were AEBURA (probably the Λιβύρα of Ptolemy); HIPPO; Alea (Ἀλέα, Steph. B.; prob. *Alia*, E. of *Truxillo*); and other places of less importance. The name of Varcilenses is mentioned in inscriptions at *Varciles*, where Roman ruins are found (Morales, *Antig.* pp. 17, 26, 28). Besides the dwellers in these cities, there was a people, called Characitani (Χαρακιτανοί), whose only abodes were the caverns in the hills on the banks of the Tagonius (*Tajuña*), and whose conquest by Sertorius by the stratagem, not of *smoking*, but of *dusting* them out of their caves is related with admiration by Plutarch (*Sertor.* 17) and Mr. Landor (*Fawn of Sertorius*). Their caves are seen in the neighbourhood of *Alcalá* and *Cuenca*, and their name is preserved in that of the town of *Caracena*, W. of the latter place. (Ukert, vol. ii. pt. i. p. 429; Laborde, *Itin.* vol. iii. p. 323.)

At the time of Hannibal's campaigns in Spain, before the breaking out of the second Punic War, the Carpetani are mentioned as the most powerful people beyond the Iberus. United with the Olcades and Vaccaei, they brought 100,000 men into the field against Hannibal, who had some trouble in defeating them (Polyb. iii. 14; Liv. xxi. 5), and found them ready to seize the least opportunity for revolt (Liv. xxi. 11), a disposition which they again showed during the war between Hasdrubal and the Scipios (Liv. xxiii. 26; Polyb. x. 7. § 5), and also towards the Romans in the Celtiberian War, of which their country was one of the chief seats (Liv. xxxix. 30, xl. 30, 33). Their country, which is described as being very productive, suffered much in the war with Viriathus (Appian. *Hisp.* 64).

The names of this people suggest an interesting inquiry. According to general analogy, the *Carpetani* would be the people of *Carpe*, that is, they should have a chief city Carpe. Now we find a city of that name, in the celebrated place on the Straits, variously called Calpe, Carpeia, Carteia, &c. [CARTEIA]; and, moreover, in the other, and apparently more ancient form of the name, *Carpesii*, we may fairly trace a connection with *Carpessus*, which is only another form of *Tartessus*, the still more ancient name of Calpe or Carteia. The obvious inference would be that the Carpetani had been displaced, in the course of time, probably by the growing power of the Phoenician settlers, from their original possessions in the S. of the peninsula, and driven back over the mountains into the great table-land of the centre. But, without doubting that such a process may have taken place, it deserves consideration whether the people may not have originally possessed the central districts in which history finds them, as well as the southern regions in which the names above referred to mark their former presence; whether, in short, the name which we find in the earliest records in the various forms of Tarshish, Tartessus, Carpessus, Carpe, Calpe, Carteia, &c., was not applied to the peninsula as far as those who have recorded the names possessed any knowledge of it. Nay, we even find a people Calpiani beyond the boundary of the peninsula, near the *Rhone* (Herodor. *ap.* Const. Porph. *de Adm. Imp.* ii. 23; Ukert, vol. ii. pt. 1. p. 252). At all events, there can be little doubt that the Carpetani were a part of the old Iberian population of Spain, notwithstanding the vague statement of Stephanus (*s. v.* Ἀλέα) that they were a Celtic race. [P. S.]

CARPI, CARPIA'NI (Καρπιανοί, Ptol. iii. 5.

Digitized by Google

§ 24). CARPIDES (Καρπίδες, Arr. *Per. P. Eux.* p. 3), a people of Sarmatia Asiatica, with whom the Roxolani are sometimes identified (Ptol. *Maeôtis et Eux.* 16; Vib. Sequest. *Fluv.* Ister. p. ix. 25; Anon. Vit. p. 39, 42; Hieron. in Is. c. 9; comp. *Zosim.* i. 20, 27). They are placed in different positions by different writers. The author of the *Periplus* places his Carpians on the authority of Ephorus immediately N. of the Danube, near its mouth; while Ptolemy places his Carpiani N. of the Carpates M., near the Amadoca Palus, and between the Peucini and Bastarnae. The latter position agrees well enough with the notices of the Carpi by the last chiefs of the empire. (Ukert, vol. iii. pt. 2. p. 436). [P. S.]

CARPIA. [CARTEIA.]

CARPIANI. [CARPI.]

CARPIS (Κάρπις, Ptol. iv. 3. § 7) or CARPI (Plin. v. 3. s. 4), a town of Zeugitana, on the Gulf of Carthage, NE. of Maxula, and probably identical with AQUAE CALIDAE. [P. S.]

CARPIS (Κάρπις), a river which, according to Herodotus (iv. 49), rises in the upper country of the Orbelians, northward into the Ister, where it has been supposed that this river is the same as the Drave. [L. S.]

CARREA POTENTIA, a town of Liguria, mentioned only by Pliny (iii. 5. s. 7), who enumerates it among the "oppida oppida" which accompanied that province on the N. side of the Apennines. No other trace is found of it; and its site has been variously fixed at *Chieri* near *Turin*, and at *Carea* on the *Tanaro*, a few miles S. of *Bene*: the latter has perhaps the best claim. [E. H. B.]

CARRHA FLUMEN. [CARRHAE.]

CARRHAE (Κάρραι, Dion Cass. xxxvii. 5, xl. 25; Strab. xvi. p. 747; Ptol. v. 18. § 12; Steph. B.; Anon. Marc. xxiii. 3; Plin. v. 24; Flor. iii. 11; Eutrop. vi. 15; Lucan. i. 104; Κάραι, Isid. Char.; HARAN or CHARRAN, O. T.: Κορραία ἡ ἐν Βατάνῃ LXX., *Genes.* xi. 31, xxiv. 10; Joseph. *Ant.* i. 16; Zonar. *Annal.* p. 14), a town in the NW. part of Mesopotamia, which derived its name, according to Stephanus, from a river Carrha in Syria, celebrated in ancient times for its Temple of Lunus or Luna (*Amaltis*, Spartian. *Carac.* 7; Amm. Marc. xxiii. 3; Herodian. iv.), and a colony said to have been founded by the Macedonians, and still more as the scene of the celebrated overthrow of Crassus by the Parthian general Surnena. (Strab., Dion Cass., Plut., *ll. cc.*) Ammianus states that Julian here secretly invested Procopius with the purple, in case that fate should befall him.

It has been generally supposed that Carrhae represents the place which in Sacred history is called Haran or Charran; a view which seems to be supported by the spelling of the name in Josephus, Zonaras, &c. (*ll. cc.*) It is also stated that the name still remains in the country, though the place is now deserted. (Niebuhr, vol. ii. p. 410; Pococke, vol. ii. p. 235.) Several coins exist, in which Carrhae is spoken of as a colony and a metropolis. They belong to the times of Alexander Severus and the Gordians. One of M. Aurelius is curious, as it bears the inscription Καρρηνων φιλορωμαιων. There appears to be some doubt about the correct name of the neighbourhood on which the town of Carrhae was situated. Stephanus (*s. v.* Βόγχαι) speaks of a river Cyrus, between which and the Euphrates this place stood. It is most likely that Carrha was the true name, and Cyrus the mistake of some transcriber of the MSS. [V.]

αρτηία: *Eth.* Carteïenses), a very S. of Hispania Baetica, near M. Its exact site has been much e can be no doubt that it stood y which opens out of the straits W. of the rock of *Gibraltar*, and Bay of *Gibraltar* or *Algesiras*. vy describes it as on the shore of it first expands outside of the ds will, by themselves, quite bear, text shows that they require, the n the statements of other writers on them, that, when he speaks of *e faucibus angustis*), he refers to tween the opposite rocks of Calpe gns all W. of them to the Ocean. xliii. 3.) The mistaken inter- akes Livy place Carteïa really its in the wider sense, only de- ng the opinion of Cellarius, who rteïa with the Besippo of other *nt.* vol. i. p. 88). Similarly, but cy of expression. Florus describes *o ostio Oceani* (Flor. iv. 2. § 75, n Cass. xliii. 31, where the name ραντία). Strabo, who only men- , at least under the name of Car-), says that Munda is distant from). 141, with Casaubon's emenda- (*B. H.* 32) places it 170 M. P. rdova). Mela, whose testimony nt in this case from his having eighbourhood, expressly places it of Calpe (ii. 6). Pliny mentions th M. Calpe and the straits (iii. 1. *lantico mari, Carteïa, Tartessos ons Calpe*). The Antonine Itine- nd Carteïa together, as one po- a, 10 M. P. from Barbariana, and bus (*Algesiras*); and Marcian (5 geog. miles) by sea from M. hich he describes as lying on the son sailing from Calpe "into the n," and 100 stadia from Carteïa to Barbesula, the Barbariana of the Itinerary. (Marcian. Heracl. *Peripl.* p. 39, Hudson.) Ptolemy also mentions it between Barbesula and Calpe (ii. 4. § 6). These numbers, and the evidence of ruins and coins, fix the site of Carteïa, with tolerable certainty, at the very head of the bay, on the hill of *El Rocadillo*, about halfway between *Algesiras* and *Gibraltar*. (Conduit: *A Discourse tending to show the situation of the ancient Carteïa*, in the *Philosophical Transactions*, vol. xxx. pp. 903, foll., 1719; Carter, *Journey from Gibraltar to Malaga*, Lond. 1777, 2 vols.) Ford describes the position as follows:—"The bay is about 5 miles across by sea, and about 10 round by land. The coast road is intersected by the rivers *Guadaranque* and *Palmones:* on crossing the former is the eminence *El Rocadillo*, now a farm, and corn grows where once was Carteïa. . . . The remains of an amphitheatre exist, and part of the city may yet be traced. The Moors and Spaniards destroyed the ruins, working them up as a quarry in building *San Roque* and *Algesiras*. The coins found here are numerous and beautiful. Mr. Kent, of the port-office at Gibraltar, has formed quite a Carteïan museum. . . . . From *El Rocadillo* to *Gibraltar* is about 4 miles." (Ford, *Handbook of Spain*, pp. 19, 20.) The coins belong, for the most part, to the times of the early Roman emperors. They bear the epigraphs CAR. KAR. CART. CARTEIA. In addition to other types, we find on some of them the club, as a symbol of the worship of Hercules, the instrument with which he severed the neighbouring rocks of Calpe and Abila from one another. (Florez, *Med. de Esp.* vol. i. p. 293, vol. ii. p. 637, vol. iii. p. 36; Mionnet, vol. i. pp. 9, 10; Sestini, *Med. Isp.* p. 41; Eckhel, vol. i. pp. 17, 18; Rasche, *Lex. Rei Num. s. v.*)

COIN OF CARTEIA.

All that is known of Carteïa, during the historical period, is told in a few words. It was one of the cities of that mixed Iberian and Phoenician race who were called Bastuli Poeni. (Strab., Marc., Ptol., *ll. cc.*) It is mentioned in the Second Punic War as an important naval station, and as the scene of a sea-fight, in which Laelius defeated Adherbal, B. C. 206. (Liv. xxviii. 30, 31.) In the year of the city 583, B. C. 171, it was assigned by the senate as the residence of above 4000 men, the offspring of Roman soldiers and Spanish women, who had not been united by the *connubium*, upon their manumission by the praetor, L. Canuleius: such of the Carteïans as pleased to remain were enrolled in the number of the colonists, and took their share of the lands; and the city was made a *Latina colonia libertinorum*. (Liv. xliii. 3.) Clear as this testimony is, it is curious that Carteïa is never styled a colony on its coins; but they bear frequent reference to the well-known chief magistrates of a colony, the *quatuorviri*. In the civil war in Spain, Carteïa appears to have been the chief naval station of Cn. Pompeius, who took refuge there after his defeat at Munda, but was compelled to leave it on account of the disaffection of a

Digitized by Google

party in the city, B. C. 45. (Strab. iii. p. 141; Hirt. *B. H.* 32—37; Appian, *B. C.* ii. 105; Dion Cass. xliii. 40, who also mentions a previous naval engagement off **Κραντία**, where Carteïa is evidently the place meant, c. 31; comp. Flor. iv. 2. § 75.) These events are alluded to in a letter of Cicero's (*ad Att.* xii. 44. § 4), and in a subsequent letter he refers to the reception of Sextus Pompeius at Carteïa, after the murder of Caesar (*ad Att.* xv. 20. § 3).

A very interesting discussion has been long since raised by the different names under which this city appears to be mentioned by the ancient writers. In the first place, we have the slightly varied form **Καρθαια**. (Appian, *B. C.* ii. 105; Artemidor. *ap. Steph. B. s. v.*) Strabo mentions a city of the name of Calpe, in a position exactly corresponding with Carteïa (iii. p. 140). Adjacent, he says, to the mountain of Calpe, at the distance of 40 stadia (4 geog. miles or 5 M. P.), is the important and ancient city of Calpe, which was formerly a naval station of the Iberians; and some, too, say that it was founded by Heracles, among whom is Timosthenes, who states that it was anciently named Heracleia (**Ἡρακλείαν**), and that the great circuit of its walls, and its docks (**νεωσοίκους**) are shown." Here the distance from M. Calpe corresponds exactly to that given by Marcian (see above), and to the site of the ruins at *El Rocadillo;* the connection of the city with the worship of Heracles is a fact already established in the case of Carteïa, and we know that Carteïa was a great seaport. In fact, so striking are the points of identity, that Casaubon altered the reading from **Κάλπη** to **Καρτηία**; and this emendation is supported by the argument that, in each of the subsequent passages in which Strabo mentions Carteïa, he refers to it incidentally as he would to a place he had already mentioned (pp. 141, 145, 151), while he never again speaks of Calpe as a city. That the emendation should not be too hastily admitted, will appear presently; but meanwhile most of the commentators have overlooked an important difficulty in the way of identifying Calpe and Carteïa. When Strabo describes the ancient city and port, on the authority of an old writer, would he omit to mention its identity with Carteïa, a place so well known, as we have seen, in the events of his own times? The most reasonable answer seems to be that Strabo fell, by the necessary fate of compilers, even the most careful, into the mistake of not seeing the identity of an object through the disguise of the different names applied to it by different authorities; and that thus, Timosthenes having mentioned the place by what seems to have been its usual Greek name, Strabo quotes his description, without perceiving the identity of the place with the well-known Roman colony of Carteïa. Why he omits to mention the latter here, remains an unsolved difficulty. Groskurd, who, with some other scholars, maintains a distinction between the cities of Calpe and Carteïa, contends that Strabo also mentions the former in the following passages:—iii. pp. 51, 141, 142; but it seems far more natural to understand each of them as referring to the mountain. An inference of some importance seems fairly deducible from the passage (iii. p. 140), compared with those in which Strabo mentions Carteïa, namely, that Calpe was the prevailing form of the name of the city among the *Greeks*, when Timosthenes wrote, about 100 years before its colonization by the Romans, and that Carteïa was the form commonly used by the Romans. The Antonine Itinerary, as we have seen, uses both names in conjunction, CALPE CARTEÏAM,

Καρχηδών), in Africa, the ne.

here can be no doubt that the nes of the city are but forms of ust look to the Phoenician, or r the original form; and this is Hebrew, where *Kereth* or *Carth* l word which signifies *a city*, o the names of other cities of haginian) and Syrian origin, umidia, and *Tigranocerta* in ns of Panormus in Sicily, which ge, we find on the reverse the n, *Kereth-hadeshoth*, i. e. *New* robability the name of Carthage. *-hadtha*, which is merely a dia- etymology is confirmed by a tra- Solinus, who says (c. 40): — adam Elissa dixit, quod Phoeni- *itatem Novam.*" The reason of jectured with a near approach e name of the more ancient Phoenician city in the immediate neighbourhood, Utica, signifies, in Phoenician, the *Old City*, in contradistinction to which Carthage was called *New;* one among many examples of the permanence of an appellation the most temporary in its first meaning. In later times, this *New City* was called *Carthago Vetus*, to distinguish it from the celebrated *Carthago Nova* in Spain. (Bochart, *Phaleg*, p. 468; Gesen. *Gesch. d. Hebr. Sprache*, pp. 228. 229, and *Hebrew Lexicon, s. v.* קִרְיָת; Bayer, *ad Sallust.* p. 347; Mionnet, *Descript des Médailles*, pl. 20.) Another explanation is given by Niebuhr, namely, that the *New City* (Carthada) was so called in contradistinction to Byrsa (Bozrah), the original city, "just as Neapolis arose by the side of Parthenope." (*Lectures*, vol. i. p. 104, 1st ed.) It is remarkable that, in transferring the name to their own languages, the Greeks changed one, and the Romans the other, of the dental consonants in the word into a guttural. The ancient Roman form, as seen on the *Columna Rostrata*, is CARTACO.

The ethnic and adjective forms are partly derived from the name of the city itself, and partly from that of the mother country. In Greek we have Καρχηδόνιος (*Eth.* and *Adj.*, but the commoner *Adj.* is Καρχηδονιακός, or Καρχηδονικός), and in Latin *Carthaginiensis* (*Eth.* and *Adj.*); but the more usual ethnic is *Poenus*, with the adjective form *Punicus* (equivalent to, and sometimes actually written, *Poenicus:* the poets used *Poenus* for the adjective); while in Greek also, the Carthaginians, as well as the original Phoenicians, are called Φοίνικες (Herod. v. 46; Eurip. *Troad.* 222; Böckh, *Expl. Pind. Pyth.* i. 72. s. 138).

The territory of Carthage is called *Carchedonia* (Καρχηδονία, Strab. ii. p. 131, vi. p. 267, xvii. pp. 831, 832), a term sometimes applied also to the city. (Strab. vi. pp. 272, 287).

II. AUTHORITIES. — This great city furnishes the most striking example in the annals of the world of a mighty power which, having long ruled over subject peoples, taught them the arts of commerce and civilization, and created for itself an imperishable name, has left little more than that name behind it, and even that in the keeping of the very enemies to whom she at last succumbed. Vast as is the space which her fame fills in ancient history, the details of her origin, her rise, her constitution, commerce, arts, and religion, are all but unknown.

Of her native literature, we have barely the scantiest fragments left. The treasures of her libraries were disdained by the blind hatred of the Roman aristocracy, who made them a present to the princes of Numidia, reserving only the 32 books of Mago *on Agriculture* for translation, as all that could be useful to the republic. (Plin. xviii. 4. s. 5: it is worthy of notice, as showing the value of the traditions preserved by Sallust respecting the early population of N. Africa, that he derived them from these Punic records, though through the medium of interpreters; *Jug.* 17.) Of the records respecting her, preserved at Tyre, we have only a single notice in Josephus. (See below, No. III.)

The Greeks and Romans relate only that part of her story with which they themselves were closely connected; a part only of her external fortunes, which does not commence till she has passed the acme of her prosperity, and the relation of which is distorted by political animosity. At the very

Digitized by Google

outset, we meet with a striking deficiency in the chain even of Greek and Roman testimony. The great historian, whose design so fortunately for us embraced an account of all that was known of the great nations of his day, for some reason or other omitted Carthage from his plan; but yet his few incidental references to her are of great value. Aristotle's brief notice of the Carthaginian constitution (*Polit.* ii. 11), precious and trustworthy as it is, only makes the want of fuller information the more apparent, and compels us the more to regret the loss of his treatise on Governments, in which that of Carthage was discussed at length. Among the historians of the wars of Carthage with the Greeks of Sicily and the Romans, Polybius stands first, in authority and accuracy, as well as in time. Commanding all the means of knowledge which the Romans possessed up to his time, he used them in a spirit above the narrow and selfish patriotism of the Romans. He gives abundant proofs of careful research into the internal state of Carthage, and he has preserved some genuine Punic documents. The chief value of Diodorus, in this inquiry, consists in his narrative of the wars with Syracuse. Livy relates the wars with Rome in the worst spirit of partizanship, and with utter indifference to the internal state, or even the distinctive character of one of the peoples who contended to the death in that "bellum maxime omnium memorabile quae unquam gesta sint." (Liv. xxi. 1.) With less literary power, Appian is a more faithful annalist; but the carelessness of the mere compiler sorely damages his work. In spite of glaring faults, Justin deserves mention as the only writer who has attempted a continuous narrative of the early history of Carthage; which he abridged from Trogus Pompeius, whose account seems to have been founded chiefly on Theopompus. (Heeren, *de Fontibus et Auctoritate Justini*, in the *Comment. Soc. Scient. Götting.* vol. xv. pp. 225, foll.)

Among modern authorities, the following are the most important: — on the *History, Constitution, and Commerce* of the city, Böttiger, *Geschichte der Carthager*, Berlin, 1827; Campomanes, *Antiguedad Maritima de la Republica de Cartago;* Kluge, *Aristoteles de Politia Carthaginiensium;* Mövers, *Geschichte der Phoenizier;* Becker, in Ersch and Gruber's *Encyklopädie;* Barth, *Ueber die friedlichen Verhältnisse zwischen den Karthagern und Hellenen*, in the *Rheinisches Museum*, 3rd Series, vol. vii. p. 65, for 1850; Niebuhr, *Lectures on the History of Rome*, vol. ii. lect. ii. 1st edition; Arnold, *History of Rome*, vol. ii. c. 39; Grote, *History of Greece*, vol. x. pp. 539, foll.; and the chief writers on general history: on its *Mythology*, Münter, *Religion der Karthager*, Kopenh. 1821; and Gesenius, in Ersch and Gruber's *Encyklopädie;* on the *Geography and Topography*, besides the general works of Mannert, Georgii, Forbiger, and others, Shaw, *Travels in Barbary*, &c., vol. i. pp. 150, foll., p. 80, 2nd ed.; Estrup, *Lineae Topographicae Carthaginis Tyriae*, Havn. 1821; Falbe, *Recherches sur l'Emplacement de Carthage*, Paris, 1835; Dureau de la Malle, *Recherches sur la Topographie de Carthage*, Paris, 1835; Chateaubriand, *Itinéraire*, vol. iii. p. 186; Temple, *Excursions in the Mediterranean*, &c., Lond. 1835; Barth, *Wanderungen durch die Küstenländer des Mittelmeeres*, vol. i. pp. 80, foll., Berlin, 1849; Ritter, *Erdkunde*, vol. i. pp. 916, foll.; *Ausland*, 1836, Nos. 122, 124, 128, 1837, Nos. 110, 140: and on the whole subject, the admirable dissertatio vol. ii. pt. 1, or, in the Engli *torical Researches into the A and Trade of the Ancient Nati* pp. 21—285, and Appendix.

III. FOUNDATION. — No ac would be complete which shoul the legend related by the old chr by the muse of Virgil; how daughter of a king of Tyre, esc of her brother Pygmalion, with sake of which he had murdere with a band of noble Tyrians wh how, having touched at Cyp thence eighty maidens to be t lowers in their future home, s on the coast of Africa marked c site of a mighty city; how she with the natives, and purchased nual tribute, as much land as co bull's hide, but craftily cut the h strips possible, and so enclosed and on this ground built her cit as the place grew, became the in its name BYRSA (Βύρσα, *a h* mory of a bargain which, ho many a counterpart for deceitfu how, in the laying of the founda future power was presaged th first of the head of a bull, and a horse, a still better omen; h the influx of colonists from the and by the friendship of the old ments, especially UTICA; how it excited the envy of Hiarbas, kin Libyans, who offered Dido the c riage; how, debarred from the her vow of fidelity to her late to embrace it by the importunit stabbed herself to death before t pyre which she had erected to h and how the Carthaginians enr deities (Justin, xviii. 4, foll.; with the commentaries of Servi Sil. Ital. *Pun.* i. ii.; Procop. *Chron. ll. inf. cit.*; et alii; Aeneas into the story is Virgil's out any foundation in the origi by the historians). Based as t in part at least, on old traditio points worthy of notice. It te origin of the city, and to its i time to Utica and other Phoe coast: it indicates that the imp the colony was not merely com civil dissension: it describes new colony to the natives and manner perfectly consistent wit the occupation of the country civilized race of Libyans (com from whom the land for the ci by conquest but by a peaceful for which continued to be paid in history; and as to the friendshi older colonies. The part of th hide is a mere etymological leg hellenized form of the native BOZRA, *a fortress*. [Comp. It may be worth while to men logical legend, which ascribes t city to Tyrian colonists led by

agreed that Carthage was a that it was one of the latest its on the African coast of the years later than Utica, accord- further than this we have no its origin. Regard being had its peaceful settlement, and to nent of great commercial cities n the same coast, and also to the garded as pretty well established city was founded at the period ercial prosperity of Tyre, there ch probability in the conjecture d Gruber's *Encyklopädie*), that in a mere emporium (or, in *Factory*, like that in which the had its first beginning), established jointly by the merchants of the mother city and of Utica, on account of the convenience of its position; and that it rose into importance by the natural process of immigration, from Utica especially.

Such a gradual origin would in part account for the great variety of dates to which its foundation is ascribed; though another cause of this variety is, doubtless, to be sought in the assigned date from which the Greek and Roman authors have made their computations, sometimes from the fall of Troy, sometimes from the foundation of Rome, and sometimes from the commencement of the Olympiads. Besides these, and the era used by Eusebius, namely, from the birth of Abraham, there is an important computation, from the building of the temple by Solomon, which Josephus gives from old Phoenician documents preserved in his time at Tyre, as well as from Menander of Ephesus.

In order to exhibit the various statements in one view, they are here presented in a tabular form, showing the dates as actually given by the several authorities, and also the corresponding years B. C. To facilitate the comparison, the dates of the eras themselves are also stated.

—A general description of that Africa on which Carthage stood er AFRICA. On the W. side of ntly called Sinus Carthaginiensis, s), formed by the Apollinis Pr. W. and Mercurii Pr. (*C. Bon*) line of elevated ground between d *Sebcha-es-Sukara*, on the N., ch forms the harbour of *Tunis* ing eastward in the two head- art and *Ras Sidi Bou Said* (or rthagena), of which the former f the latter. *Ras Ghamart* is h, *C. Carthage* above 400 feet. The latter lies in 36° 52′ 22″ N. lat., and 10° 21′ 49″ E. long., and forms the culminating point of the ridge of elevated land just referred to, which sinks on the W. to the level of the adjacent plains. This ridge was in ancient times an isthmus, uniting the peninsula on which Carthage stood to the mainland. Its breadth at the time of the destruction of Carthage did not exceed 25 stadia (2½ geog. miles, Polyb. i. 73; Strab. xvii. p. 832), which still corresponds to the distance in some places between the salt-marsh on the N. and the port of *Tunis* on the S. The width, however, must have been much less at the time of the foundation of Carthage; for the same causes must have been continually acting to enlarge

Digitized by Google

powers; which obviously suggests that, in the interval, changes had been effected in the position of the allies towards Carthage, which Utica alone had successfully resisted. It seems, in fact, that all these cities, except Utica, had been rendered tributary to Carthage, though preserving their municipal organization. Leptis Parva, for example, paid the enormous assessment of a talent a day, or 365 talents every year. (Liv. xxxiv. 62.) The period during which the change took place must have been that which followed the battle of Himera, when, induced by that defeat to abandon for a time her projects of further conquests in Sicily, she turned her attention to the consolidation of her power at home. As for Utica, to the very latest period of the existence of Carthage, she retained her separate political existence, in such a manner as to be able to side with Rome against Carthage, and to take her place as the capital of the new Roman province of Africa.

The temper in which Carthage used her supremacy over these allies is one of those points in her history on which we need the guidance of more impartial authorities than we possess. The Greek and Roman writers accuse her of arrogance and oppression; and we can easily believe that she pursued the selfish policy of a commercial aristocracy. In the hour of danger from the revolts of her African subjects, some of the chief Phoenician cities refused to abandon her; but their support may have been prompted by the motive of common safety. They were faithful to her cause in the Second Punic War, but in the Third most of them deserted her. Their fidelity in the former case is more to the credit of her rule than their ultimate defection is against it; for her cause in the final struggle was so hopeless, that self-interest is a sufficient motive for the course they pursued in abandoning her. But, even then, examples of fidelity were by no means wanting; and while the rewards obtained by Utica attest the selfish motives of her defection, the severe penalties inflicted on the allies of Carthage show that her deepest danger had called forth proofs of attachment to her, which indicate better antecedents than mere oppression on the one side, and resentment on the other.

But however exaggerated the statements of her enemies may be, and however little their own conduct gave them the right to become accusers; to deny that they contain much truth would not only be contrary to the laws of evidence, but inconsistent with all we know of the maxims of government pursued by even the best of ancient states. The chief difficulty is to distinguish, in such statements, what refers to her Phoenician allies, and to her African subjects: the strongly condemnatory evidence of Polybius, for example, applies primarily to her treatment of the latter; though the former may possibly be included under the denomination of ταῖς πόλεσι. (Polyb. i. 72.) On the whole, we may suppose that the case of Leptis gives a fair example of that of the Phoenician allies; and that the chief hardship they endured was the exaction of a heavy tribute, which their commerce enabled them, however reluctantly, to pay.

4. *Relations to the Peoples of Africa.* — With respect to the native tribes, we must carefully observe the distinction, which is made both by Herodotus and Polybius, between those who had fixed abodes and who practised agriculture, and those who were still in the nomad state. This distinction is confirmed by the curious tradition already mentioned as preserved by Sallust (*Jugurth.* 18

this heavy yoke is shown by the they joined the mercenary soldiers n Carthage. (Polyb. i. 72.)

continually dwelt upon, not only of the ruin of Carthage, but as a er short-sighted policy. On this the following excellent remarks , vol. i. pp. 480, foll.): — "The Carthage exercising absolute do- African subjects, and Rome sur- tin and Italian allies, and gradually ore widely the rights of citizenship, liance into union, has been often leed quite sufficient to account for Punic Wars. But this difference to the good fortune of Rome and of Carthage, than to the wisdom he one and the narrow-mindedness ome was placed in the midst of self both in race and language; litary settlement in a foreign land. language nearly resembled the ged to the Semitic or Aramaic native Africans were, and to what age belonged, are among the most of ancient history... But whatever as to the African subjects of Car- become so distinct from their mas- y were originally sprung from a t the two people (peoples) were elted together into one state, and d always in the unhappy and sus- masters and of slaves, rather than itizens or even of allies."

oenicians. — Besides these pure nother race grew up in the land in Zeugitana and perhaps on the), from the mixture of the natives an settlers, or, as Mövers supposes, h population, akin in race to the of still earlier settlement in the xx. 55; Mövers, *Gesch. d. Phoeni-* pp. 435—455, *ap.* Grote, vol. x. se half-caste people, called Liby- φοίνικες), our information is but em to have been the chief occu- ors of the rich land in the imme- he city, especially in the valley of hile the Libyans in the S., towards remained so free from Phoenician hat they did not even understand anguage. (Polyb. iii. 33.) Like owever, the Libyphoenicians seem rded with suspicion as well as fa- were devised to dispose of their with advantage to the state as lves, by sending them out as the t colonies, in Spain, for instance, t of Africa, beyond the Straits. 96.) The voyage of Hanno, of ssess the record, had for its object of 30,000 Libyphoenician colonists coast. (Hanno, *Peripl.* p. 1; comp.)

upied by the people thus described, ject to Carthage, never extended lake of Triton on the S., nor than so far) on the W.; and this dis- e be considered as the *territory of* ly so called, the περιοικὶς of the would say. It included at first the district of Zeugitana, and afterwards Byzacium also, and corresponded very nearly to the present Regency of *Tunis*. (Respecting the precise boundaries, see further under AFRICA, p. 68.) Its inhabitants were, as we have seen, the people of Carthage herself and the other Phoenician colonies, the native Libyans who were not nomads, the mixed race of Libyphoenicians, and further, the people of colonial settlements which the Carthaginians established from time to time on the lands of the district, as a means of providing for her poorer citizens, to whom the Libyan cultivators were assigned with their lands. (Arist. *Polit.* ii. 8. § 9, vi. 3. § 5.) "This provision for poor citizens as emigrants (mainly analogous to the Roman colonies), was a standing feature in the Carthaginian political system, serving the double purpose of obviating discontent among their town population at home, and of keeping watch over their dependencies abroad." (Grote, *Hist. of Greece*, vol. x. p. 545.) All these, except the Phoenician cities, were in absolute subjection to Carthage. The marvellous density of the population within these limits is shown by the statement that, even in the last period of her decline, just before the third Punic War, when she had been stripped of all her possessions W. of the Tusca and E. of the Triton, Carthage still possessed 300 tributary cities in Libya. (Strab. xvii. p. 833.)

c. *The Nomads.*—Beyond these limits, along the coast to the E. and to the W., in the valleys of the Atlas, and in the oases of the half-desert country behind the sea-board, from the Pillars of Hercules and the W. coast to the frontier of Cyrenaica, the land was possessed (except where Phoenician and Carthaginian colonies were founded, and even in such cases up to their very walls) by the Nomad tribes, whom Carthage never attempted to subdue, but who were generally kept, by money and other influences, in a sort of rude and loose alliance. They were of service to Carthage in three ways: they furnished her army with mercenary soldiers, especially with the splendid irregular cavalry of whose exploits we read so much in the Punic Wars: they formed, on the E., a bulwark against Cyrene: and they carried on the important land traffic with the countries on the Niger and the Nile, which was a chief source of Carthaginian wealth. The nomad tribes of the country between the Syrtes were those most intimately connected with Carthage. It may be added that Diodorus expressly divides the inhabitants of Libya (meaning the part about Carthage) into four races, namely, the Phoenicians who inhabited Carthage; the Libyphoenicians, of whom his account is unsatisfactory; the Libyans, or ancient inhabitants, who still (in the time of Agathocles) formed a majority of the population, and who bore the greatest hatred to Carthage for the severity of her rule; and lastly the Nomads, who inhabited the great extent of Libya, as far as the deserts. (Diod. xx. 55.)

5. *Colonies of Carthage in Africa.* — It is evident that the rule of Carthage over the settled Libyans, and her influence over the Nomads, would have been confined within the limits of her immediate neighbourhood, but for the system of colonization, which gave her at least the appearance of imperial authority over the whole N. coast of Africa, W. of Cyrenaica. The original purpose of her colonies, as of every other part of her proceedings, was commercial; and accordingly, with the exception of those already referred to as established in her immediate territory

Digitized by Google

for her poor citizens, they were all on or near the coast. The most important of them were those on the E. coast of Byzacium, and along the shores from the Lesser to the Greater Syrtis, which were called pre-eminently the EMPORIA (τὰ Ἐμπορεῖα or Ἐμπόρια, Polyb. i. 82, iii. 23; Appian, *Pun.* 72; Liv. xxxiv. 62), and which were so numerous as to give the Carthaginians complete commercial possession of the region of the Syrtes, the proper territorial possession of which was comparatively worthless from the physical character of the region. The colonies on the W. portion of the coast, known as the Urbes METAGONITAE (αἱ Μεταγωνῖται πόλεις), were more thinly scattered: their number and positions are noticed under MAURETANIA and NUMIDIA. Besides their commercial importance, these colonies formed so many points of command, in a greater or less degree according to their strength or skill, over the nomad tribes; they contributed regularly to the revenue of the mother city, and bore the chief expense of her wars. They contributed 4000 men to the armies of the republic; but, on the other hand, they often needed aid from the mother city in their contests with the neighbouring barbarians. Many of the cities on this coast were colonies, not of Carthage, but of Phoenicia, and their submission to Carthage seems never to have been with much good will. None of them seem to have had a territory of any considerable extent. The colonies in the neighbourhood of Carthage were in stricter subjection to her, as is denoted by the application of them of the significant Greek term περιοικίδες, the colonies in general being called αἱ πόλεις: they were kept unfortified, and hence fell an easy prey to the invader: Regulus and Agathocles, for example, whose operations did not extend beyond Zeugitana, are said each to have taken about 200 of them; and a single district, that on the Tusca, is mentioned as containing 50 towns. (Diod. xx. 17; Appian, *Pun.* 3, 68.)

6. *Extent of the Carthaginian Empire in Africa.* — Thus, at a period little subsequent to her first distinct appearance on the stage of recorded history, Carthage possessed an imperial authority, in a greater or less degree, over the N. coast of Africa, from the Pillars of Hercules to the bottom of the Great Syrtis, a space reckoned by Polybius at 16,000 stadia, or 160 geographical miles. (Polyb. iii. 39; comp. Scylax. pp. 51, 52: ὅσα γέγραπται πολίσματα ἢ ἐμπόρια ἐν τῇ Λιβύῃ, ἀπὸ τῆς Σύρτιδος τῆς παρ' Ἑσπερίδας μέχρι Ἡρακλείων στηλῶν ἐν Λιβύῃ, πάντα ἐστὶ Καρχηδονίων.) On the W. her power extended over her colonies on the Atlantic coast at least as far as the end of the Atlas range; and on the E., after a long contest with Cyrene, the only foreign power with which she came into contact in Africa, the boundary was fixed at the bottom of the Great Syrtis, at a period so early that the transaction had already acquired a mythic character in the age of Herodotus. [ARAE PHILAENORUM.]

But of all this extensive empire, it should be carefully remembered, the only part immediately and entirely subject to the dominion of Carthage was the territory which extended S. of the city to a distance of about 80 geographical miles, and the boundaries of which were about the same as those of ZEUGITANA; and further S. the strip of coast along which lay BYZACIUM and the EMPORIA. These two districts comprised nearly all the reliable resources of the state. Their fertile plains were cultivated to the highest pitch under the eyes of the nobles, who were always famous for their devotion to agriculture; and they supplied the greate

[Corsica.]

(3.) *Sicily*, as we have seen, was one of the first objects of the military enterprize of Carthage. Phoenician colonies existed at an early period on all its coasts, especially on the commanding promontories; but many of them succumbed to the steadily advancing power of the Greek colonies; till the Phoenicians only retained their footing on the W. portion of the island, their principal settlements being Motya, Panormus, and Solois. As the power of Tyre declined, and that of Carthage grew, these colonies, like others in the W. Mediterranean, came under the power of the latter (Thucyd. vi. 2); but Carthage does not seem to have founded new colonies in Sicily. She appears to have obtained first those settlements which were nearest to her (Thucyd. *l. c.*); and their proximity to her resources enabled her to keep them from falling under the power of the Greeks. With this firm footing in the island, the Carthaginians proceeded to foment the dissensions of the Greek cities till they were prepared to venture on a great battle for the supremacy. They had already been engaged in war with Gelon, the tyrant of Syracuse, as we learn from Gelon's speech to the Greek envoys, who sought aid from him against the threatened Persian invasion (Herod. vii. 158); and, when they saw that that invasion was about to furnish the Greeks of the mother-country with full occupation, they determined on a grand effort against the Sicilian colonies. An occasion was furnished by the expulsion of Terillus, tyrant of Himera, a city in amity with Carthage, by Theron of Agrigentum, the ally of Syracuse, about B.C. 481. Terillus applied for aid to the Carthaginians, who sent over to Panormus a fleet of 3000 ships of war, which disembarked 300,000 men under the command of Hamilcar, B.C. 480. The list of the peoples who contributed to this army, given by Herodotus, is a remarkable testimony to the extent of the empire and alliances of Carthage at this epoch. They were Phoenicians, Libyans, Iberians, Ligyes (Ligurians from the Gulfs of *Lyon* and *Genoa*), Helisyci (which Niebuhr supposes to mean Volsci), Sardinians, and Corsicans. Hamilcar laid siege to Himera: Gelon advanced to raise the siege; and a battle ensued, in which Hamilcar was slain and his army was utterly defeated. (Herod. vii. 165—167; Diod. xi. 21—24.) This great battle of Himera was fought, according to Herodotus, on the very day of the battle of Salamis; according to Diodorus, on that of Thermopylae. The discrepancy may be taken as a proof that the Greeks, ignorant of the exact day of the battle, tried to improve on a coincidence which was sufficiently remarkable. For Himera, no less than Salamis, was one of "the decisive battles of the world;" and that in a sense of which no contemporary could form the least anticipation. Had the event of the day been different, there would seem to have been no obstacle to the establishment of a Carthaginian empire in Sicily and Italy, which might have advanced over all the shores of the Mediterranean. (See a similar observation, with reference to a later period, in Polyb. v. 104.) But, as it was, the Carthaginians were driven back upon their old limits in the W. part of the island, and they seem to have abandoned, for a time, further efforts there, and to have turned their attention to the complete establishment of their power in Africa, and to the extension of their colonies in the West. They did not resume their designs on Sicily till B. C. 410, and from that time the

wars with the Greek colonies, which are the chief events in the second period of the Carthaginian history, fully occupied their armies until Rome had acquired strength to engage in that contest which deprived Carthage not only of Sicily, but at last of her own existence. [SICILIA.]

(4.) *The Balearic and smaller islands*, most of which had been colonized by the Phoenicians, were all occupied by the Carthaginians as emporia or factories. [BALEARES]. Among the smaller islands referred to, were Melita (*Malta*), Gaulos (*Gozo*), and Cercina (*Karkenah*), besides others of less importance, as, for example, Lipara. (Polyb. i. 24.) These islands afforded naval stations of importance, and some of them furnished valuable articles of produce. Malta was made the seat of flourishing manufactories, especially of fine cloth. In fine, we are distinctly told by Polybius that all the islands of the Western Mediterranean belonged to Carthage at the commencement of the Punic Wars. (Polyb. i. 10.)

(5.) *Spain* was long an object of peaceful commerce, rather than of conquest, to the Carthaginians. Phoenician settlements had existed on its shores from a time earlier than history records; and to these Carthage added colonies of her own; but her relations with the natives were peaceful, and she does not appear to have attempted the subjugation of the country till after the loss of Sardinia and Sicily. But around her colonies and marts she doubtless obtained possession of considerable tracts of land; and hence Polybius (*l.c.*) tells us that "many parts of Spain" belonged to her when she entered on her contest with Rome. The Spanish mines were a most important source of wealth to the republic.

Of the general character of the rule of Carthage over her foreign possessions, we have very little information, beyond the fact that the oppressions of their governors disposed them continually to revolt. In this respect their sufferings seem to have been far less than those of the Roman provinces; but they were likewise borne with far less patience at the hands of a state whose authority was sustained only by a mercenary soldiery, who were themselves in a condition of chronic discontent.

8. *Foreign Colonies.*—Beyond the limits of the countries or districts of which Carthage took possession, she established many colonies on distant shores, to serve as harbours for her ships, marts for her commerce, and outlets for her surplus population. These settlements occupied many points on the coasts of the W. Mediterranean, not only in Africa, the islands, and Spain, but also in Gaul and Liguria (see above); and beyond the Pillars of Hercules they extended far both N. and S. along the shores of Europe and Africa, and into some of the islands of the Atlantic. Of the colonies in Africa we have had occasion to speak in describing the Carthaginian empire in that continent. Especial interest attaches to those founded on the W. coast of Africa by Hanno, on account of the Greek translation which we still possess of the narrative of his voyage, which he suspended, on his return, in the temple of Cronos at Carthage (Hudson, *Geographi Graeci Minores*, vol. i. Oxon. 1798). Simultaneously with this expedition, another was sent out under Himilco to explore the western shores of Europe. The narrative of this voyage, which the ancient geographers possessed, has been lost to us; but several particulars of it are preserved in the *Ora Maritima* of Festus Avienus, and some of the chief points have been noticed under ATLANTICUM MARE. Of the colonies which Himilco, like Hanno, traces have come down to us they reached as far as the Brit be positively accepted nor r evidence than we possess. As two great expeditions, there believe that their leaders we milco who are mentioned by J sons of Hamilcar, and that about the end of the 6th centu

First Treaty. — Somewhat similar is was the treaty which furnishes of any relations between Rome This celebrated document is pre- s (iii. 22), who tells us that it consulship of L. Junius Brutus the first consuls after the expul- and 28 years before the invasion es, that is, in B. C. 509. It was cribed on tablets of bronze, among e aediles in the temple of Jove 26), but its old Latin idiom was, hardly intelligible to the most s. Its substance is as follows:— e friendship between the Romans d the Carthaginians and their al- tions: the Romans and their allies sailing beyond (*i. e.* to the W. or montory (τὸ καλὸν ἀκρωτήριον), to indicate the Mercurii Pr., adland of the Gulf of Carthage, ewhere in Polybius, Apollinis Pr., W. headland, the object of this n the opinion of Polybius, to keep share in the trade of the colonies yzacium and the Emporia on the forced into the forbidden seas they are neither to buy nor take ecessaries for refitting the ship, ce, and they must depart within y are allowed to trade with Car- the part of Africa immediately this seems to be the meaning), d with the part of Sicily pos- age, under certain conditions, ch was as much to give addi- such commerce, as to impose re- amely, the goods must be sold and then the public faith was reigner for his payment: on the rthaginians are bound to refrain cities of Ardea, Antium, Lauren- obably Aricia), Circeii, and Ter- r Latin cities which were subject d not to meddle with (*i. e.* not to the cities which were not under on, but if they shall have taken they are to restore such uninjured hey are to build no fort on the or, if they should land there in single night. This treaty clearly indicates the respective dominions, and the relative positions of the two states at the end of the sixth century B. C.; for it is ridiculous to suppose that it was designed to anticipate relations which might occur at some future time, and not to settle questions which had actually arisen. Rome, at the height of the prosperity which she attained in the regal period, and in possession of the chief cities on the Latin coast, even beyond the later limits of Latium, is beginning to extend her commerce over the W. parts of the Mediterranean; while Carthage is pushing hers to the very coasts of Latium, and is also carrying on military operations there for its defence. It is an interesting fact, as Polybius observes (c. 23), that the treaty is wholly silent respecting the parts of Italy beyond the Roman territory: the Tyrrhenians and the Greeks are not referred to, unless tacitly as among the enemies against whose interference with their commerce the Carthaginians may have to conduct military operations. With the Tyrrhenians we have seen that the Carthaginians dealt, as with Rome, by separate treaties, as the occasion arose: of their relations with Magna Graecia it is much to be regretted that history is almost silent; but we may fairly conjecture that any serious efforts of commerce or conquest in that quarter were postponed until Sicily should be made their own.

The genuineness of the first treaty with Rome has been disputed on the very ground which affords its strongest confirmation; the position, namely, to which it represents Rome as having already attained at this early period of her history. The only difficulty arises from the mis-statements of the Roman annalists, who refused to acknowledge the depression which Rome suffered as the first consequence of the revolution which made her a republic; and from which she was so long in recovering. (Niebuhr, *History of Rome*, vol. i. pp. 533, foll.) Accordingly, when, a century and a half later, B. C. 348, the Roman republic was sufficiently recovered from its long struggle for existence, to have a foreign commerce worth the protection of a second treaty with Carthage, we find, amidst a general similarity to the provisions of the first treaty, this important difference, that the Romans are excluded from Sardinia and Libya as rigidly as from the seas beyond the Fair Promontory, with the exception that their traders may expose their goods for sale at Carthage; and the same privilege is granted to the Carthaginians at Rome.

The date assigned to this treaty is on the authority of Livy (vii. 27), who only just refers to it. Polybius, who recites it in full (iii. 24), does not mention its date. Several of the best critics hesitate to assume the identity of the treaty in Polybius with that referred to by Livy. Grote (vol. x. p. 541) supposes that the former was made somewhere between 480—410 B. C., chiefly on the ground that it "argues a comparative superiority of Carthage to Rome, which would rather seem to belong to the latter half of the fifth century B. C., than to the latter half of the fourth." Niebuhr (vol. iii. p. 87), on the other hand, thinks that Polybius was not acquainted with the transaction mentioned by Livy, and that the treaty which he speaks of as the second, was the one of the year 447, B. C. 306. It is seldom fair to play off great authorities against each other; but it may be done in this case, for there is really no good ground for doubting that Livy and Polybius each meant by the second treaty that which really was the second and the same.

Digitized by Google

This *Second Treaty between Rome and Carthage* belongs chronologically to the second period of Carthaginian history; but the natural connection of the events demands the notice at one view of the relations between the states, from the beginning, to their quarrel about Sicilian affairs. Livy, with his usual partiality, represents the Carthaginians as sending ambassadors to Rome, to sue for this alliance. But we know that Carthage was mistress of the Tyrrhenian seas, along the coasts of Italy (Diod. xvi. 66); and that the coasts of Latium were insulted and plundered by a Greek fleet. Against such invaders, Niebuhr supposes, the Romans sought protection from the great maritime power of Carthage (Niebuhr, vol. iii. pp. 85—87); and they would readily consent to renounce a commerce, which they had already lost, with Sardinia and Africa, for the sake of safety on their own coasts.

The amicable relations between the two republics, and the concord of their views respecting Italy, are further attested by the congratulations which the Carthaginians sent to Rome, on the conclusion of the first Samnite War (B.C. 342), with the present of a gold crown of 25 pounds' weight for the shrine of Jupiter in the Capitol. (Liv. vii. 38.) And again, in B.C. 306, the ancient treaty between Rome and Carthage was renewed for the third time, with a fresh offering of rich presents. (Liv. ix. 43.)

But such friendships between ambitious republics necessarily involve jealousies, the sure presage of alienation, quarrel, and internecine war; and both the friendship and the jealousy are further shown in the history of the more intimate alliance which was formed by Rome and Carthage in view of a common danger. Each state had evidently come to regard Grecian Italy as its future prize, when the aid brought by Pyrrhus to the Tarentines raised an obstacle to their designs, which they at once united to remove, with a cordiality precisely measured and limited by the interests of each. Carthage had doubtless viewed the progress of the Roman arms in S. Italy with feelings which her own position in Sicily compelled her to dissemble; and Rome, on her part, showed no disposition to seek aid from Carthage, till the war with Pyrrhus became very critical. In the third year of the war, B.C. 279, Rome and Carthage concluded a close defensive alliance, which Livy (*Epit.* xiii.) expressly calls the *fourth*, and Polybius (iii. 25) the *last*, treaty between the two republics. The provisions of the former treaties were renewed, with additional articles, which, with the events that ensued, we give in Niebuhr's words (vol. iii. p. 506):—"It was provided, that neither should make a treaty of friendship with Pyrrhus without the accession of the other, in order that if he attacked the latter, the former might still have the right of sending succours. The auxiliaries were to be paid by the state, which should send them; the ships to convey them to and fro were to be given by Carthage. The latter was also to afford assistance with ships of war, in case of need; but the marines were not to be compelled to land against their will. This clause in 'case of need' Carthage, with the wish of compelling Pyrrhus to return to Epirus, may probably have interpreted in such a way that, without waiting for a summons from Rome, a fleet of one hundred and thirty galleys under Mago cast anchor near Ostia, at the disposal of the senate. It was dismissed with thanks without being used, probably because Rome did not wish the Poenians to carry off the population and w or because it feared lest they s selves in Italy. There was n ance. Thirty may coincide with what Polybius calls the Gerusia or Council of Ancients, — the Three Hundred, with that which he calls the Senate. (Polyb. x. 18; Liv. xxx. 16.) Aristotle assimilates the two Kings (Suffetes) of Carthage to the two Kings of Sparta, and the Gerusia of Carthage also to that of Sparta (Pol. ii. 8. § 2); which latter consisted of thirty members, including the Kings, who sat in it. But Aristotle does not allude to any assembly at Carthage analogous to what Polybius calls the Senate. He mentions two councils, one of one hundred members, the other of one hundred and four (comp. Niebuhr, vol. i. p. 85); and certain Boards of Five — the Pentarchies. He compares the Council of one hundred and four to the Spartan Ephors; yet again, he talks of the Pentarchies as invested with extensive functions, and terms the Council of one hundred the greatest authority in the state. Perhaps this last Council was identical with the assembly of one hundred Judges (said to have been chosen from the Senate as a check upon the generals employed), or Ordo Judicum; of which Livy speaks after the second Punic war, as existing with its members perpetual, and so powerful that it overruled all the other assemblies and magistracies of the state. Through the influence of Hannibal, a law was passed to lessen the overweening power of this Order of Judges; causing them to be elected only for one year, instead of being perpetual. (Liv. xxxiii. 46; Justin. xix. 2, mentions the 100 select Senators set apart as judges.)

"These statements, though coming from valuable authors, convey so little information, and are withal so difficult to reconcile, that both the structure and working of the political machine at Carthage may be said to be unknown. But it seems clear that the general spirit of the government was highly oligarchical; that a few rich, old, and powerful families divided among themselves the great offices and influence of the state; that they maintained themselves in pointed and even insolent distinction from the multitude (Val. Max. ix. 5. § 4); that they stood opposed to each other in bitter feuds, often stained by gross perfidy and bloodshed; and that the treatment with which, through these violent party antipathies, unsuccessful generals were visited, was cruel in the extreme. (Diod. xx. 10, xxiii. 9; Val. Max. ii. 7. § 1.) It appears that wealth was one indispensable qualification, and that magistrates and generals procured their appointments in a great measure by corrupt means. Of such corruption, one variety was, the habit of constantly regaling the citizens in collective banquets of the *curiae*, or the political associations; a habit so continual, and embracing so wide a circle of citizens, that Aristotle compares these banquets to the *Phiditia*, or public mess of Sparta. (*Pol.* iii. 5. § 6.) There was a Demos or people at Carthage, who were consulted on particular occasions, and before whom propositions were publicly debated, in cases where the Suffetes and the small Council were not all of one mind. (Aristot. *Pol.* ii. 8. § 3.) How numerous this Demos was, or what proportion of the whole population it comprised, we have no means of knowing. But it is plain that, whether more or less considerable, its multitude was kept under dependence to the rich families by stratagems such as the banquets, the lucrative appointments, with lots of land in foreign dependencies, &c. The purposes of government were determined, its powers

Digitized by Google

wielded, and the great offices held, — Suffetes, Senators, Generals, or Judges, — by the members of a small number of wealthy families; and the chief opposition they encountered was from their feuds against each other. In the main, the government was conducted with skill and steadiness, as well for internal tranquillity, as for systematic foreign and commercial aggrandisement. Within the knowledge of Aristotle, Carthage had never suffered either the successful usurpation of a despot, or any violent intestine commotion. (Aristot. *Pol.* ii. 8. § 1.) He briefly alludes to the abortive conspiracy of Hanno (v. 6. § 2), which is also mentioned in Justin (xxi. 4). Hanno is said to have formed the plan of putting to death the Senate, and making himself despot. But he was detected, and executed under the severest tortures; all his family being put to death along with him, B. C. 340." His attempt is compared by Aristotle to that of Pausanias at Sparta. The other attempt was that of Bomilcar, B. C. 308. (*Dict. of Greek and Roman Biog.*, arts. *Bomilcar* and *Hanno.*) The resemblance of the Carthaginian constitution to that of Venice is by no means so close as some writers fancy.

In the later ages of the republic, when bitter factions divided the state, we read of popular tumults which are compared to those of Alexandria for their violence, as well as for the strange spectacle of boys joining in them as eagerly as the men. (Polyb. xv. 30.)

12. *Military Resources and Organization.* — In order to understand both the progress and the decline of Carthage, no part of her polity requires more attentive consideration than her military system. Founded as the state was without difficulty, at a distance from any formidable enemies, and soon raised by commerce to the highest prosperity, it would have been strange if her citizens had displayed any great measure of military spirit, such as that which is inseparably identified with the Roman character. There are not wanting examples of the greatest devotion in times of extreme danger; but how little occasion there was for their display, in the age during which the military system was formed, is clear from the consideration that the first invasion of the Carthaginian territory was made by Agathocles in B. C. 316, more than five centures from the foundation of the city. As to the Libyan tribes, their predatory incursions on the cultivators of the soil were curbed by the simple defence of a line of ditch. (Appian. *Pun.* 32, 54, 59; Phlegon, *Mirab.* 18: this trench must not be confounded with that dug by the younger Scipio Africanus for a boundary between the Carthaginian and Numidian territory: AFRICA.) The military system of Carthage therefore grew entirely out of that necessity for foreign conquest which was entailed upon the state, as we have seen, by the extension of her commerce. Men do not risk their lives in war merely for the acquisition of wealth, least of all when a force of dependents and mercenaries can easily be found to fight their battles for them. Nay, it would at first sight seem good policy thus to throw the burthen upon others, while the state reaped the profit; and it required the bitter lessons of experience to prove that such a force was a broken reed, in the double sense of the Hebrew prophet, piercing the hand which it failed to support. Such a resource was at hand for the Carthaginians in a threefold form: the enforced service of her Libyan subjects; the mercenary aid of the Nomad tribes; and the labour of her slaves.

ies and revolt, which, however,
, were for the same reason the
ay. (Polyb. i. 67.) The main

dependence was placed on the subject Libyans, who, armed with long lances, formed the bulk of the infantry and heavy cavalry. Next came the Iberians, equipped with white linen vests, and swords fit both to cut or thrust; of whose conspicuous valour many examples occur: and then their rude and savage neighbours, the Gauls, from the Gulf of Lyon, who fought naked, with a sword only made for striking, and were renowned for their perfidy: both peoples served as infantry and cavalry. (Polyb. ii. 7, iii. 114; Liv. xxii. 46; Diod. v. 33.) Besides these, there were Campanian mercenaries, who had deserted the Greeks in the Sicilian wars; Ligurians, who are first mentioned in the Punic Wars; and Greeks, who appear about the same time, and who may have been introduced into the service through the campaigns of Pyrrhus in Sicily. To these must be added two descriptions of force peculiar to the Carthaginian armies; the Balearic slingers, who skirmished in front [BALEARES], and the light cavalry of the Nomads, who were levied by deputations sent out by the senate, from the Maurusii near the Pillars of Hercules, to the frontiers of Cyrenaica. Mounted without a saddle on small active horses, so well trained as not to need even the rush halter, which formed their only bridle; equipped with a lion-skin for dress and bed, and a piece of elephant-hide for a shield; rapid alike in the charge, the flight, the rally; they were to the Carthaginians far more than the Cossacks are to the Russians. (Diod. xiii. 80; Strab. xvii. p. 828; Polyb., Liv., *passim.*) *Chariots*, derived doubtless from their Phoenician ancestors, were used by the Carthaginians in their wars with Timoleon and Agathocles (Diod. xvi. 80, xx. 10); but they were superseded by the *elephants* of whom we hear so much in the wars with Rome. Having borrowed from Pyrrhus, as is supposed, the idea of training these beasts to war, they kept up the supply by means of their inland trade with Africa, and also by demanding them as tribute from some of the subject cities. A tract of land near the city was set apart for their maintenance; and vaulted chambers were provided in the triple landward wall for 300 elephants and their food. Another row of such chambers contained stables for 4000 horses, and stores for their food; and in the same line of defences there were barracks for 20,000 infantry and 4000 cavalry, besides immense magazines of provisions and military stores. The total force, which Carthage could raise with ease, may be computed at 100,000 men. Though the *standing armies* of modern states were then unknown, a military force must always have been kept on foot to garrison the city and the foreign possessions; and in both cases these garrisons were composed of mercenaries.

Such was the army of Carthage, equally wanting in consistence and security. The discipline of such a motley host was as difficult as it was necessary; and Livy justly adduces, as one proof of Hannibal's genius, his maintenance of authority over his troops. (Liv. xxviii. 12.) The general results of the system are well summed up by Grote: — "Such men had never any attachment to the cause in which they fought, seldom to the commanders under whom they served; while they were often treated by Carthage with bad faith, and recklessly abandoned to destruction. (Polyb. i. 65—67; Diod. xiv. 75—77.) A military system such as this was pregnant with danger, if ever the mercenary soldiers got footing in Africa; as happened after the First Punic War, when the city was brought to the brink of ruin. But on

Digitized by Google

foreign service in Sicily, these mercenaries often enabled Carthage to make conquest at the cost only of her money, without any waste of the blood of her own citizens. The Carthaginian generals seem generally to have relied, like Persians, upon numbers — manifesting little or no military skill; until we come to the Punic wars with Rome, conducted under Hamilcar Barca and his illustrious son Hannibal." (*Hist. of Greece*, vol. x. pp. 547, 548.) Another source of danger in the system is pointed out by Heeren: — "Upon the whole, however, this system could afford the republic but little internal security. The impossibility of calling an army like this together in a short time must have made every sudden attack dreadful. Their enemies soon found this out; and repeated examples have shown that their fleets were not always sufficient to repel invasion. As often as this happened, a struggle for life or death must have ensued; and although they might easily make good the loss of a foreign defeat, yet, in every war upon their own ground, their ALL rested upon the cast of a die." (Heeren, *African Nations*, vol. i. pp. 259, 260.)

13. *Financial Affairs.* — One of the obscurest parts of the whole subject is the mode of raising and administering those enormous revenues, which must have been required to support the colonial and military expenses, as well as the home government of the state.

(1.) *Sources of Wealth in general.* — It is wrong to think of Carthage as a purely commercial state. Her prosperity rested, as already intimated in speaking of her territory, on the solid basis of the land. *Agriculture* was the favourite pursuit of her nobles, citizens, and colonists; her immediate territory was so fertile, that the soil of Byzacium is said to have yielded a hundred-fold return (Plin. v. 4. s. 3.); and her foreign possessions, especially Sardinia and Sicily, were made to contribute large supplies of corn for the consumption of the city. The devotion of her chief men to agriculture is indicated by the great work of Mago, in 28 books, which alone of all the treasures of Punic literature the Romans thought worth preserving. That the taste for agriculture declined with the growth of commerce, is affirmed by Cicero, who regards the change as a main cause of the decline of Carthage (*Repub.* ii. 4); but the decline was only comparative, as is shown by the great prosperity of the city in the period preceding the Third Punic War, when she was shut up to her own immediate territory. Neither were *manufactures* and the *mechanical arts* neglected; and great wealth flowed into the city by the *import of the precious metals* from Spain and other parts. It is true that the mines were generally reserved by the state, but that they were sometimes private property is proved by the example of Hannibal. (Plin. xxxiii. 6. s. 31; unless the passage refers to Hannibal in his public capacity.)

(2.) *Expenses of the State.* — The chief offices of state being held without a salary, the expenses of the home government were probably light. The great demands upon the public resources were for the maintenance of her military forces, and the expenses of her colonial and commercial expeditions; but in both cases the actual demands in money were partly lightened by payments in kind, and the use of barter in commercial intercourse with foreigners.

(3.) *Revenue.* — The following were the chief sources of the public revenue.

a. The *Tribute* paid by the subject nations and allies. In Africa the country dis
produce, and the cities in money,
tributions being derived from t
Emporia. It is supposed that t

Carthage.—On this subject, which by Heeren in two of the best chap- valuable essay, we have only space narks. The whole foreign trade of far as possible, a rigid system of r great maritime states have gene- velope the commerce of their colo- ge regarded her colonies and pos- s staples for her own trade; and , as the treaties with Rome show, merchants from all ports except

itime commerce of course included nd possessions, and extended also ther states. The chief scene of its W. Mediterranean, including, be- orts, those of the Greek states of rn Italy, whence she imported oil r own use and for the market of return the agricultural produce ctures of her own territory, with precious stones, and negro slaves . Among her other chief imports from Malta for the African market; a; from Corsica, wax and honey, were most highly esteemed; iron *Elba*); and from the Balearic fruits, giving in return the com- the islanders were fondest, wine LEARES.] But these islands were nce as a station off the coast of de with the peninsula in oil and the precious metals. This trade eren to have been the channel also l, on the coast of which the Car- colonies, and where the only fo- ate, Massilia, was always at enmity or that the Carthaginians had rela- directly or indirectly, is proved by naries in their armies. Beyond the le extended northwards as far as the CASSITERIDES, whence they imported tin, and even to the amber-producing coasts of N. Europe (Fest. Avien *Or. Marit.* 95, foll., 375, foll.; comp. BRITANNICAE INSULAE). On the W. coast of Africa, their colonies extended as far S. as the island of CERNE, the great mart of their trade, in which they exchanged ornaments, vessels, wine, and Egyptian linen, for elephants' teeth and the hides of beasts. They seem even to have reached the gold-producing countries about the Niger. (See the curious account in Herod. iv. 196, as illustrated by the narratives of recent travellers in Heeren, *Afr. Nat.* vol. i. pp. 175. foll.) Beyond the parts they had reached, they pretended that the Atlantic became unnavigable through fogs, shallows, and sea-weed; tales founded doubtless upon the marine vegetation which surrounds the Azores and other islands of the Atlantic; but exaggerated for the purpose of deterring other mariners from dividing with them a lucrative commerce. [ATLANTICUM MARE.]

(2.) *Land Trade.*—By the agency of the Nomad tribes, especially the NASAMONES, Carthage carried on a very extensive trade in Inner Africa, to the banks of the Nile, on the one side, and of the Niger on the other, and in the intervening space to the oases of Augila, the Garamantes (*Fezzan*), and others; whence their chief importations seem to have been a few precious stones and a vast number of negro slaves. But this subject is so mixed up with the caravan routes over the desert, and with the geography of Africa in general, that it cannot be discussed here.

15. *Religion.*—Those who wish to study this most interesting but obscure branch of Carthaginian antiquities may consult the works of Munter and Gesenius mentioned above. Not having space for speculation, we here set down merely the few ascertained facts. The Punic worship, though influenced by foreign elements, especially the Greek, was doubtless at first identical with that of the Phoenicians, which was a form of the Sabaeism so generally prevalent in the East. They adored the following divinities, who are mentioned, of course, by the ancient writers, under the names of their supposed equivalents in the Greek and Roman systems.

(1.) *Kronos* or *Saturn*, who is generally identified with the *Moloch* of the Canaanites, and by some with *Baal*, and whose natural manifestation is supposed by some to be the Sun, as the chief power of Nature; by others the planet Saturn, as the most malignant of celestial influences. To him they had recourse in the disasters of the state, propitiating him with human sacrifices, sometimes of captives taken in war, and at others, as the most acceptable offering, of the best beloved children of the noblest citizens. (Diod. xiii. 86, xx. 14, 65; Justin. xviii. 6; Oros. iv. 6.) Certainly the description of this deity and his rites answers exactly to that of

> "Moloch, horrid king, besmeared with blood
> Of human sacrifice and parents' tears;
> Though, for the noise of drums and timbrels loud,
> Their children's cries unheard, that passed through fire
> To his grim idol." (Milton, *Par. Lost*, ii.)

(2.) The *Tyrian Hercules*, the patron deity of the mother city and all her colonies, whose Phoenician name was *Melcarth*, i. e. *King of the City*, is by some identified with Baal and the Sun, by others with the Babylonish Bel and the planet

Digitized by Google

Jupiter, the most genial of celestial influences. On account of her worship of this her tutelar deity, Carthage is personified as the daughter of Hercules. (Cic. *N. D.* iii. 16.)

(3.) The female deity associated with him is the Phoenician Astarte, or Tanith, the goddess of the elements, whom the Romans commonly mention by the name of Coelestis. She was sometimes identified with Vesta, sometimes with Diana, on account of her symbol, the crescent moon, and sometimes with Venus, on account of her worship which was celebrated with the most lascivious abominations, as in Phoenicia, so also at Carthage and other places in the territory, especially SICCA VENERIA. (Val. Max. ii. 6. § 16; Appul. *Met.* xi. p. 257, Bip.; Salvian, *de Prov.* viii. p. 95; Morcelli, *Afr. Christ. s. aa.* 399, 421; Augustin. *Civ. Dei*, ii. 4, iv. 10; Tertull. *Apol.* 12, *et alib.*)

(4.) *Esmun*, the god of the celestial vault, whose temple occupied a conspicuous place in the city, is identified by the Greeks and Romans with Aesculapius.

(5.) *Apollo*, whose temple and golden shrine stood near the forum, is supposed to be Baal-Hamman. (Barth, p. 96.)

(6.) *Poseidon* and *Triton* are mentioned by Herodotus as Libyan deities; but he does not give their native names. (Herod. ii. 50, iv. 179.) The latter deity had an oracle, with a sacred tripod, like that at Delphi. [Comp. TRITON, TRITONIS PALUS.]

(7.) Among *Genii* and *Heroes*, we find that the following were worshipped: a *Genius of Death*, to whom also hymns were sung at Gades (Philostr. *Vit. Apoll.* v. 4); *Dido*, as the foundress of the city (Justin. xviii. 6); *Hamilcar*, who fell at Himera, and whose worship was connected with the story of his supernatural disappearance on that day (Herod. vii. 167); the brothers *Philaeni* [ARAE PHILAENORUM]; and *Iolaüs*, a hero of Sardinia (Polyb. vii. 9.)

(8.) *Foreign Deities.* — The influence upon Carthage of intercourse with Greece is shown by her adoption, from Sicily, of the worship of Demeter and Persephone. (Diod. xiv. 77.) The motive to this step was the fearful pestilence which had destroyed their victorious army before Syracuse (B. C. 395), and which they attributed to the wrath of the goddesses for the pillage by Himilco of their temple in the suburb of Achradina.

There seems to have been no sacerdotal caste at Carthage; but the offices of the priesthood were filled by the highest persons in the state; and in war we find the generals offering sacrifices, sometimes during the heat of battle. (Herod. vii. 167; Diod. xiv. 77; Justin. xvii. 7.) The armies were attended by prophets, whose voice controuled their movements. The enterprizes of commerce and colonization were placed under the sanction of religion, monuments of them being dedicated in the temples, as in the cases of the voyage of Hanno, which has come down to us, and the memorials of the mysterious death of Hamilcar at Himera, which were dedicated in all the colonies, as well as at Carthage. (Herod. vii. 167.) Of the sanctuaries which they established in connection with their colonies, we have examples in that of Hercules at CARTHAGO NOVA, and that of Poseidon founded by Hanno on the W. coast of Africa. [SOLOEIS.]

Such was the state of Carthage during the time of her greatest prosperity; and such the system which seems to have been fully

unic War was a decisive conflict of 1793 between England and een the inevitable consequence of s of the states, but of which, as nediate occasion was the supposed he two parties in the state; and hich led Hannibal to plunge into prolong it to the utmost. It ars, B. C. 218—201, and resulted tion of Carthage before her rival. d all her possessions out of Africa, inissa was planted as a thorn in d of a powerful new state, and ick a new quarrel, which might t for her destruction. [AFRICA,

inistration of Hannibal shed one he dark prospects of the devoted w the despotism of the *Ordo Ju-* ding that its undue power had of the democratic party which y, by confining to a year the term d before been for life; and he in- into the finances, that ten years tribute imposed by the peace with , a new rival of Rome was rising as Hannibal meditated, Carthage what force she yet had to the aid reat, the career of the triumphant aps yet have been checked. But, pposite faction, and proscribed by s compelled to fly to Antiochus,

B. C. 195. With his departure his party became extinct, and the influence of Rome became supreme even within the state.

7. After this it could not be doubted that the tongue of Cato uttered the decree of fate as much as the voice of hatred, in the celebrated sentence *Carthago delenda est*. Amidst the conflicts which Rome had yet before her in the East, Carthage, fallen as she was, and though daily suffering more and more from the encroachments of Masinissa [AFRICA], might yet be troublesome if not formidable. The chance of such a danger was exaggerated in the reports carried back to Rome by Cato from his embassy to settle the disputes with Masinissa, his failure in which added the stimulus of personal resentment to the hatred which his party bore to Carthage; and the pretext of the armed resistance, to which Masinissa at length drove the Carthaginians, was eagerly seized for commencing the *Third Punic War*. The affecting story of that heroic struggle almost obliterates the memory of the faults for which Carthage was now doomed to suffer. It lasted three years, B. C. 150—146, and ended with the utter destruction of the city, in the very same year in which the fall of Corinth completed the conquest of Greece. Thus the two peoples who had so long contended on the plains of Sicily for the dominion of the Mediterranean, fell at once before the rival, whose existence they had then hardly recognised. It is not within the province of this work to meditate on such a fall.

The statistics given by Strabo (xvii. p. 833; comp. Polyb. XXXVI. 4; Appian. *Pun.* 80), of the resources and efforts of Carthage at the time of this war are very valuable. At the commencement of the war, she had 300 subject cities in Libya, and the population of the city was 700,000. When, in the first instance, she accepted the terms imposed by the Romans, in the vain hope of their being satisfied with this submission, she gave up 200,000 stand of arms and 3000 (or 2000) catapults. When war broke out again, manufactories of arms were established, which turned out daily 140 shields, 300 swords, 500 spears, and 1000 missiles for catapults, while the female servants gave their hair to make strings for the catapults. Though, as bound by the treaty at the end of the Second Punic War, they had for fifty years possessed only twelve ships of war, and though they were now besieged in the Byrsa, they built 120 decked vessels in the space of two months, from the old stores of timber remaining in the dockyards; and, as the mouth of their harbour was blockaded, they cut a new entrance, through which their fleet suddenly put to sea.

VI. ROMAN CARTHAGE. — The final destruction of the city, the curse pronounced upon her site, the constitution of her territory as the new Roman province of Africa, and the history of that province down to its final conquest by the Arabs, are treated of under AFRICA. It remains to state a few facts relating specifically to the city.

Notwithstanding the prohibition of any attempt to rebuild Carthage, its admirable site and the fertility of the surrounding country rendered its remaining long desolate unlikely; and its restoration seems to have been a favourite project with the democratic party in Rome. Only twenty-four years had elapsed, B. C. 122, when C. Gracchus sent out a colony of 6000 settlers to found on the site of Carthage the new city of JUNONIA, a name to which old traditions would seem to give a peculiar significance. But

Digitized by Google

evil prodigies at its foundation gave the sanction of superstition to the decision of the senate, annulling this with the other acts of Gracchus. (Appian. *Pun.* 136; Plut. *C. Gracch.* 13; Liv. *Epit.* lx.; Vell. Paterc. i. 15; Solin. 27). The project was revived by Julius Caesar, who with a sort of poetical justice planned the restoration of Carthage and of Corinth in the same year, B. C. 46; but, by his murder, the full execution of his design devolved upon his successor. (Appian. *l. c.*; Plut. *Caes.* 57; Strab. xvii. p. 833; Dion Cass. xliii. 50, comp. lii. 43; Paus. ii. 1.) Lepidus seems to have deprived the new colony of its privileges, during his short rule in Africa; but it was restored by Augustus (B. C. 19), under whom 3000 colonists were joined with the inhabitants of the neighbouring country to found the new city of Carthage, which, already when Strabo wrote, was as populous as any city of Africa (καὶ νῦν εἴ τις ἄλλη καλῶς οἰκεῖται τῶν ἐν Λιβύῃ πόλεων: Strab., Dion, Appian., Solin., *ll. cc.*). It was made, in place of the Pompeian Utica, the seat of the proconsul of Old Africa. [AFRICA.]

It continued to flourish more and more during the whole period till the Vandal invasion. Herodian (vii. 6) calls it the next city after Rome, in size and wealth; and Ausonius thus compares it with Rome and Constantinople (*Carm.* 286): —

> "Constantinopoli adsurgit Carthago priori,
> Non toto cessura gradu, quia tertia dici
> Fastidit."

Ecclesiastically, it was one of the most important of the numerous bishoprics of Africa: among the great names connected with it, are Cyprian, as its bishop, and Tertullian, who was probably a native of the city. In A. D. 439, it was taken by Genseric, and made the capital of the Vandal kingdom in Africa. It was retaken by Belisarius, in 533, and named Justiniana. It was finally taken and destroyed, in 647, by the Arabs under Hassan. (Clinton, *Fasti Romani, s. aa.*; Gibbon, vol. vi. p. 26, vol. vii. pp. 180, foll., 350—352, vol. ix. pp. 450, 458.) "Whatever yet remained of Carthage was delivered to the flames, and the colony of Dido and Caesar lay desolate above two hundred years, till a part, perhaps a twentieth of the old circumference, was repeopled by the first of the Fatimite caliphs. fc., p. 150.)
re especially difficult to trace with
At the time when the city was

most flourishing, it is pretty clear that they encompassed, as might have been expected, the whole circuit of the peninsula, speaking generally; and Appian informs us that on one side (evidently towards the sea, but the words are wanting) there was only a single wall, because of the precipitous nature of the ground; but that on the S., towards the land-side, it was threefold. But when we come to particulars, first, as to the sea-side, it is not certain whether the two eminences of *C. Ghamart* and *C. Carthage* were included within the fortifications, or were left, either wholly or in part, unfortified on account of their natural strength. In the final siege, we find Mancinus attacking from the side of the sea a part of the wall, the defence of which was neglected on account of the almost inaccessible precipices on that side, and establishing himself in a fort adjacent to the walls (Appian. *Pun.* 113). On the whole, it seems probable that on both the great heights the walls were drawn along the summit rather than the base, so that they would not include the N. slope of *C. Ghamart*, nor the E. and S. slopes of *C. Carthage*. (Barth, pp. 83, 84.)

The land side presents still greater difficulties. The length of the wall which Scipio drew across the isthmus to blockade the city, and which was 25 stadia (or 3 M. P.) from sea to sea (Appian. *Pun.* 95, 119; Polyb. i. 73; Strab. xvii. p. 832), gives us only the measure of the width of the isthmus (probably at its narrowest part), not of the landface of the city, which stood on wider ground. Strabo (xvii. p. 832) assigns to the whole walls a circumference of 360 stadia, 60 of which belonged to the wall on the land side, which reached from sea to sea. Explicit as this statement is, it seems impossible to reconcile it with the actual dimensions of the peninsula, for which even the 23 M. P. assigned to it by Livy (Epit. li.; Oros. iv. 22, gives 22 M. P.) would seem to be too much (Barth, p. 85). Attempts have been made to obtain the 60 stadia of Strabo by taking in the walls along the N. and S. sides of the peninsula, as well as that across it on the land side, which is quite inconsistent with the plain meaning of the writer; or by supposing that Strabo gives the total length of the triple line of wall, a most arbitrary and improbable assumption. Besides, the language of Strabo seems obviously to refer to the actual width of that part of the isthmus across which the wall was built (τὸ ἑξηκονταστάδιον μῆκος αὐτὸς ὁ αὐχὴν ἐπέχει, καθῆκον ἀπὸ θαλάττης ἐπὶ θάλατταν). The only feasible explanation seems to be, that the wall was not built across the narrowest part of the isthmus, but was thrown back to where it had begun to widen out into the peninsula; and it seems also fair to make some allowance for deviations from a straight line. A confirmation of the length assigned to the wall by Strabo is found in Appian's statement, that Scipio made simultaneous attacks on the land defences of Megara alone at points 20 stadia distant from each other, the whole breadth of the isthmus being, as we have seen, only 25 stadia.

Be this as it may, we know that this land wall formed by far the most important part of the defences of the city. It consisted of three distinct lines, one behind the other, each of them 30 cubits high without the parapets. There were towers at the distance of 2 plethra, 4 stories high, and 30 feet deep. Within each wall were built two stories of vaulted chambers, or casemates, in the lower

Digitized by Google

range of which were stables for 300 elephants, and in the upper range stables for 4000 horses, with ample stores of food for both. In the spaces between the walls (*τόπος εὐρυχωρής*, Strab. xvii. p. 832), there were barracks for 20,000 infantry, and 4000 cavalry, with magazines and stores of proportionate magnitude; forming, in fact, a vast fortified camp between the city and the isthmus. It would seem from Appian (viii. 95) that this description applies only to the S. part of the landward wall, behind which lay Byrsa (*τὰ πρὸς μεσημβρίαν ἐς ἤπειρον, ἔνθα καὶ ἡ Βύρσα ἦν ἐπὶ τοῦ αὐχένος*). The N. part of the landward wall, surrounding the suburb of Megara, seems to have been less strongly fortified, and accordingly we find some of the chief attacks of Scipio directed against it. Appian adds to his description of the triple wall, that its corner which bent round towards the harbours, by the *Taenia*, or tongue of land mentioned above, was the only part that was weak and low; and on this point also we find the Romans directing their attacks.

The limits of the Roman city can be defined with greater certainty. It remained, indeed, without a fortified enclosure, down to the fourteenth year of Theodosius II. (B. C. 424), when the increasing dangers of the African province both from the native and foreign barbarians suggested the policy of fortifying its capital. The remains of the wall then built can still be traced, and sufficient ruins of the city are visible to indicate its extent; while the limits are still further marked by the position of the great reservoirs, which we know to have been without the walls. But as the city was far gone in its decline when these walls were built, it might be supposed that the limits indicated by them were narrower than the original boundaries, were it not for a most interesting discovery made by Falbe, to whose researches during a long residence at Tunis, we owe most of our knowledge of Carthaginian topography. Struck by the fact, that the land W. and NW. of the Roman city is divided into regular rectangles by roads utterly different from the crooked ways which are common in Mohammedan countries, he suspected that these roads might mark out the divisions of the land among the Roman colonists; and, upon measuring the rectangles, he found that they were of equal area, each containing 100 *haeredia*, or 200 *jugera*. Of such plots, 28 are clearly visible, and the land which has been broken up to form the gardens of *El-Mersa* furnishes space for 2 more; so that we have the land without the walls of the Roman city divided into 30 centuries of *haeredia*, precisely the proper quantity for the 3000 colonists whom Augustus settled in the new city. (Appian. *Pun.* 138.)

That Roman Carthage stood on the site of the ancient Punic city, and not, as some maintain, on that of the suburb of Megara, seems tolerably clear. Not to lay too much stress on Pliny's phrase (v. 2), "in vestigiis magnae Carthaginis," it appears that the new city was supplied from the same aqueduct and reservoirs, and had its citadel and chief temples on the same sites, as of old. The restored temple of Aesculapius was again the chief sanctuary, and that of the goddess Coelestis became more magnificent than ever. (Barth, p. 83.)

3. *Harbours.* — In accordance with that view of the topography which we follow, the double harbour of Carthage must be looked for on the S. side of the isthmus, at the angle which it forms with the *Taenia* described above, withi

The obvious objection, that it could not then be the post first occupied by the Phoenician colonists, Barth boldly and ingeniously meets by replying that *it was not;* that they would naturally establish themselves first on the lofty eminence of *C. Carthage;* and that, when they descended to the lower ground, there built their city, and excavated their port, and made a new citadel in its neighbourhood, they still applied to it the ancient name. The summit of the hill is now occupied by a chapel to the memory of S. Louis, the royal crusader who died in his expedition against *Tunis;* and, in the mutations of time, the citadel of Carthage has become a possession of the French! The chambers which surround the chapel contain an interesting museum of objects found at Carthage and among other ruins of Africa.

On the sides of the hill there are still traces of the ancient walls which enclosed the Byrsa and made it a distinct fortress, and which seem to have risen, terrace above terrace, like those of the citadel of Ecbatana. (Herod. i. 98.) Orosius (iv. 22) gives 2 M. P. for the circuit of the Byrsa, meaning, it is to be presumed, the base of the hill.

On the summit stood the temple of Aesculapius (Esmun), by far the richest in the city (Appian. *Pun.* 130), raised on a platform which was ascended by sixty steps, and probably resembling in its structure the temple of Belus at Babylon. (Herod. i. 181; Barth, p. 95). It was in this temple that the senate held in secret their most important meetings.

The Byrsa remained the citadel of Carthage in its later existence; and the temple of Aesculapius was restored by the Romans. (Appul. *Florida*, pp. 361, foll.) On it was the *praetorium* of the proconsul of Africa, which became successively the palace of the Vandal kings and of the Byzantine governors. (*Passio Cypriani*, ap. Ruinart, *Acta Martyrum*, pp. 205, foll.; Barth, p. 96.)

5. *Forum and Streets.* — As we have just seen, the forum lay at the S. foot of the hill of Byrsa, adjacent to the harbours. It contained the senate house, the tribunal, and the temple of the god whom the Greeks and Romans call *Apollo*, whose golden image stood in a chapel overlaid with gold to the weight of 1000 talents. (Appian. *Pun.* 127.) The three streets already mentioned as ascending from the forum to the Byrsa formed an important approach to its fortifications; and Scipio [illegible] house by house. The centre street, probably led straight up to the temple of Aesculapius, was called, in Roman Carthage, [illegible]. The other streets of the city were [illegible] most part straight and regular, at right angles. (Mai, *Auct. Class.* [illegible].)

is fully described by Shaw (p. 153) and Barth (pp. 100. foll.). The *Reservoirs* are among the most interesting remains of Carthage, especially on account of the peculiarly constructed vaulting which covers them. They are probably of Punic workmanship. Besides some smaller ones, there are two principal sets; those on the W. of the city, where the aqueduct terminated, and those on the S., near the Cothon. (Shaw; Barth.)

9. Besides the above, there are ruins which seem to be those of a *Theatre*, and also the remains of a great building, apparently the largest in the city, which Barth conjectures to be the temple of Coelestis. These ruins consist, like the rest, only of broken foundations. (Barth, 105, 106.)

10. The Suburb of Megara, Magar, or Magalia, afterwards considered as a quarter of the city, under the name of the New City (Νεάπολις), was surrounded by a wall of its own, and adorned with beautiful gardens, watered by canals. (Diod. xx. 44; Appian. viii. 117; Serv. *ad Virg. Aen.* i. 372; Isidor. *Etym.* xv. 12.) It seems to have occupied the site on the NW. side of the peninsula, now called *El-Mersa*, and still the site of the beautiful gardens of the wealthy citizens of Tunis.

11. *Necropolis.*—From the few graves found in the rocky soil of the hill of *C. Ghamart*, it seems probable that here was the ancient necropolis, N. of the city, a position in which it is frequently, if not generally, found in other ancient cities. There is, however, some doubt on the matter, which the evidence is insufficient to decide.

e daily. After condensing Poly-
of the mode of extracting the sil-
that in his time the silver mines
were no longer the property of the state, but only the gold mines; the former belonged to individuals.

Such was the city founded by the second head of the great house of Barca, not perhaps without some view to its becoming the capital of an independent kingdom, if the opposite faction should prevail at Carthage (Polyb. x. 10, says that the palace there was built by Hasdrubal *μοναρχικῆς ὁρεγόμενον ἐξουσίας*). During their government of Spain, it formed the head-quarters of their civil administration and their military power. (Polyb. iii. 15. § 3: *ὡσανεὶ πρόσχημα καὶ βασίλειον ἦν Καρχηδονίων ἐν τοῖς κατὰ τὴν Ἰβηρίαν τόποις*; Liv. xxvii. 7, *caput Hispaniae.*) There we find Hannibal regularly establishing his winter quarters, and receiving the ambassadors of Rome (Polyb. iii. 13. § 7, 15. § 4, 5, 33. § 5; Liv. xxi. 5, 6); and thence he started on the expedition which opened the Second Punic War, B. C. 218. (Polyb. iii. 39. § 11.) It remained the Punic head-quarters during the absence of Hannibal (Polyb. iii. 76. § 11), who had taken care, before setting out, to make every provision for its safety (iii. 33). Here were deposited the treasures, the baggage of the Punic army, and the hostages of the Spanish peoples. (Polyb. x. 8. § 3; Liv. xxvi. 42.) The military genius of P. Scipio (afterwards the elder Africanus) at once, on his arrival in Spain, B. C. 211, pointed out the capture of New Carthage as a stroke decisive of the war in Spain; and, as soon as spring opened*, seizing an opportunity when, by some fatal oversight, the garrison was reduced to 1000 men fit for service, he made a rapid march from the Ebro with nearly all his forces, 25,000 infantry and 2500 cavalry, at the same time sending round his fleet under Laelius, who alone was in the secret, and took the city by storm, with frightful slaughter, and the gain of an immense booty, B. C. 210. (Polyb. x. 8—19; Liv. xxvi. 42—51.) It was on this occasion that Scipio gave that example of continence, which is so often celebrated by ancient writers. (Polyb.; Liv.; Val. Max. iv. 3; Gell. vi. 8.)

The important city thus gained by the Romans in Hispania Ulterior naturally became the rival of Tarraco, their previous head-quarters in Hispania Citerior. We find Scipio making it his head-quarters (in addition to Tarraco), and celebrating there the games in honour of his father and uncle, B. C. 206. (Liv. xxviii. 18, 21, *et alib.*) Under the early emperors it was a colony (Plin. iii. 3. s. 4), with the full name of COLONIA VICTRIX JULIA NOVA CARTHAGO (coins), and the seat of a conventus juridicus, including 65 peoples, besides those of the islands. (Plin. *l. c.*; BALEARES.) It shared with Tarraco the honour of the winter residence of the Legatus Caesaris, who governed the province of Tarraconensis. (Strab. iii. p. 167.) Its territory is called by Strabo Carchedonia (Καρχηδονία, p. 161; ager Carthaginiensis, Varr. *R. R.* i. 57. § 2). It was the point of meeting of two great roads, the one from Tarraco, the other from Castulo on the Baetis; it was 234 M. P. from the former place, and 203 from the latter. (*Itin. Ant.* pp. 396, 401.) As has been seen, its size was already diminished in the time of Polybius; but still it was, in the time of Strabo, a great emporium, both for the export and the import trade of Spain, and the most flourishing

city of those parts. (Strab. iii. p. 158.) It continued to rival TARRACO in importance, till it was almost entirely destroyed by the Goths. S. Isidore, who was a native of the place, speaks of it as desolate in A.D. 595. (*Orig.* xv. 1.)

Among the natural productions of the land around New Carthage, Strabo mentions a tree, the spines off which furnished a bark, from which beautiful fabrics were woven (iii. p. 175).[1] This was the *spartum* (σπάρτος: a sort of broom), which was so abundant as to give to the city the name of CARTHAGO SPARTARIA (see names above), and that of *Campus Spartarius* (τὸ Σπαρτάριον πέδιον, Strab. p. 161) to the surrounding district, for a length of 100 M. P., and a breadth of 30 M. P. from the coast: it also grew on the neighbouring mountains. It was used for making ropes and matted fabrics, first by the Carthaginians, and afterwards by the Greeks and Romans; its manufacture being similar to that of flax. (Plin. xix. 2. s. 7, 8; comp. Plat. *Polit.* p. 280, c.; Xen. *Cyn.* ix. 13; Theophr. *H. P.* i. s. 5. § 2.)

New Carthage was one of Ptolemy's points of recorded astronomical observation, having its longest day 14 hrs. 20 min., and being distant 10 hrs. 3 min. W. of Alexandria. (Ptol. viii. 4. § 5.)

Numerous coins are extant, with epigraphs which are interpreted as those of New Carthage; but many of them are extremely doubtful. Those that are certainly genuine all belong to the early imperial period, under Augustus, Tiberius, and Caligula. Their types are various. The usual epigraphs are V. I. N. K. or C. V. I. N. K. (explained above), and more rarely V. I. N. C. (Florez, *Med. de Esp.* vol. i. p. 316; Mionnet, vol. i. p. 36, Suppl. vol. i. p. 70; Sestini, p. 123; *Num. Goth.*; Eckhel, vol. i. pp. 41, foll.) [P. S.]

CARTHA'GO VETUS (Καρχηδὼν παλαιά, Ptol. ii. 6. § 64: prob. *Carta la Vieja*), an inland city of the Hercaones, in the neighbourhood of Tarraco, in Hispania Tarraconensis. From its name we may safely conjecture that it was an old Punic settlement, and that the epithet *old* was added, after the building of New Carthage, to distinguish it from that far more famous city. (Marca, *Hisp.* ii. 8; Ukert, vol. ii. pt. ii. p. 419.) [P. S.]

CARURA (τὰ Καρουρά), a town which was on the north-eastern limit of Caria (Strab. p. 663); its position east of the range of Cadmus assigns it to Phrygia, under which country Strabo describes it. It was on the south side of the Maeander, 20 M. P. west of Laodiceia, according to the Table, and on the great road along the valley of the Maeander from Laodiceia to Ephesus. The place is identified by the hot springs, about 12 miles NW. of *Denizli*, which have been described by Pococke and Chandler. Strabo (p. 578) observes that Carura contained many inns (πανδοχεῖα), which is explained by the fact of its being on a line of great traffic, by which the wool and other products of the interior were taken down to the coast. He adds that it has hot springs, some in the Maeander, and some on the banks of the river. All this tract is subject to earthquakes; and there was a story, reported by Strabo, that as a brothel keeper was lodging in the inns with a great number of his women, they were all swallowed up one night by the earth opening. Chandler (*Asia Minor*, c. 65) observed on the spot a jet of hot water, which sprung up several inches from the ground; and also the remains of an ancient bridge over the river. On the road between Carura and Laodiceia was the temple of Men Carus, a Carian deity; and in the time of

Strabo there was a noted sch

Κάρυαι: *Eth.* Καρυάτης), a town of the frontiers of Arcadia. It was rcadian town belonging to Tegea. ed by the Spartans and annexed to (Phot. *Lex. s. v.* Καρυάτεια; Paus. Caryae revolted from Sparta after euctra (B. C. 371), and offered to army into Laconia; but shortly af- severely punished for its treachery, took the town and put to death all who were made prisoners. (Xen. 4—27, vii. 1. § 28.) Caryae was s temple of Artemis Caryatis, and estival of this goddess, at which the virgins used to perform a peculiar (Paus. iii. 10. § 9; Lucian. *de* festival was of great antiquity, for essenian war, Aristomenes is said to the Lacedaemonian virgins, who t Caryae in honour of Artemis. 9.) It was, perhaps, from this an- e Lacedaemonian maidens, that the ave the name of Caryatides to the hich were employed in architecture . The tale of Vitruvius respecting ese figures, is not entitled to any ates (i. 1. § 5) that Caryae revolted after the battle of Thermopylae; that uence destroyed by the allied Greeks, men and led the women into capti- o commemorate the disgrace of the ations of them were employed in ar- d of columns.

sition of Caryae has given rise to evident from the account of Pausa-), and from the history of more than at it was situated on the road from (Thuc. v. 55; Xen. *Hell.* vi. 5. §§ 25, 26.) If it was on the direct road parta, it must be placed, with Leake, *Krevatá*: but we are more inclined nion of Boblaye and Ross, that it the side roads from Tegea to Sparta. NW. of the *Khan of Krevatá*, in a tary of the Oenus, where there is an h ancient ruins, about an hour to the the village of *Arákhova*. Although Tegea to Sparta is longer by way of *Arákhova*, it was, probably, often adopted in war in preference to the direct road, in order to avoid the defiles of *Klisura*, and to obtain for an encampment a good supply of water. Boblaye remarks, that there are springs of excellent water in the neighbourhood of *Arákhova*, to which Lycophron, probably, alludes (Καρικῶν or Καρυκῶν ποτῶν, Lycophr. 149). (Leake, *Peloponnesiaca*, p. 342, seq.; Boblaye, *Recherches*, p. 72; Ross, *Reisen im Peloponnes*, p. 175.)

CARYANDA (Καρύανδα: *Eth.* Καρυανδεύς). Stephanus (*s. v.* Καρύανδα) says that Hecataeus, made the accusative singular Καρύανδαν. He describes it as a city and harbour (λίμην) near Myndus and Cos. But λιμήν, in the text of Stephanus, is an emendation or alteration: the MSS. have λίμνη "lake." Strabo (p. 658) places Caryanda between Myndus and Bargylia, and he describes it, according to the common text, as "a lake, and island of the same name with it;" and thus the texts of Stephanus, who has got his information from Strabo, agree with the texts of Strabo. Pliny (v. 31) simply mentions the island Caryanda with a town; but he is in that passage only enumerating islands. In another passage (v. 29) he mentions Caryanda as a place on the mainland, and Mela (i. 16) does also. We must suppose, therefore, that there was a town on the island and one on the mainland. The harbour might lie between. Scylax, supposed to be a native of Caryanda, describes the place as an island, a city, and a port. Tzschucke corrected the text of Strabo, and changed λίμνη into λίμην: and the last editor of Stephanus has served him the same way, following two modern critics. It is true that these words are often confounded in the Greek texts; but if we change λίμνη into λίμην in Strabo's text, the word ταύτῃ, which refers to λίμνη, must also be altered. (See Groskurd's note, *Transl. Strab.* vol. iii. p. 53.)

Leake (*Asia Minor*, p. 227) says "there can be little doubt that the large peninsula, towards the westward end of which is the fine harbour called by the Turks *Pasha Limáni*, is the ancient island of Caryanda, now joined to the main by a narrow sandy isthmus." He considers *Pasha Limáni* to be the harbour of Caryanda "noticed by Strabo, Scylax, and Stephanus." But it should not be forgotten that the texts of Strabo and Stephanus speak of a λίμνη, which may mean a place that communicated with the sea. The supposition that the island being joined to the main is a remote effect of the alluvium of the Maeander, seems very unlikely. At any rate, before we admit this, we must know whether there is a current along this coast that runs south from the outlet of the Maeander.

Strabo mentions Scylax "the ancient writer" as a native of Caryanda, and Stephanus has changed him into "the ancient logographus." Scylax is mentioned by Herodotus (iv. 44): he sailed down the Indus under the order of the first Darius king of Persia. He may have written something; for, if the Scylax, the author of the Periplus, lived some time after Herodotus, as some critics suppose, Strabo would not call him an ancient writer. [G. L.]

CARYSIS (Κάρυσις) an island off the coast of Lycia, belonging to the town of Crya. (Steph. *s. v.* Κρύα.) [G. L.]

CARYSTUS. 1. (Κάρυστος: *Eth.* Καρύστιος: *Karystó*), a town of Euboea, situated on the south coast of the island, at the foot of Mt. Ocha. It is mentioned by Homer (*Il.* ii. 539), and is said to

have been founded by Dryopes. (Thuc. vii. 57; Diod. iv. 37; Scymn. 576.) Its name was derived from Carystus, the son of Cheiron. (Steph. B. *s. v.*; Eustath. *ad Hom. l. c.*) The Persian expedition under Datis and Artaphernes (B. C. 490) landed at Carystus, the inhabitants of which, after a slight resistance, were compelled to submit to the invaders. (Herod. vi. 99.) Carystus was one of the towns, from which Themistocles levied money after the battle of Salamis. (Herod. viii. 112.) A few years afterwards we find mention of a war between the Athenians and Carystians; but a peace was in the end concluded between them. (Thuc. i. 98; Herod. ix. 105.) The Carystians fought on the side of the Athenians in the Lamian war. (Diod. xviii. 11.) They espoused the side of the Romans in the war against Philip. (Liv. xxxii. 17; Pol. xviii. 30.)

Carystus was chiefly celebrated for its marble, which was in much request at Rome. Strabo places the quarries at Marmarium, a place upon the coast near Carystus, opposite Halae Araphenides in Attica; but Mr. Hawkins found the marks of the quarries upon Mt. Ocha. On his ascent to the summit of this mountain he saw seven entire columns, apparently on the spot where they had been quarried, and at the distance of three miles from the sea. This marble is the Cipolino of the Romans, — a green marble, with white zones. (Strab. x. p. 446; Plin. iv. 12. s. 21, xxxvi. 6. s. 7; Plin. *Ep.* v. 6; Tibull. iii. 3. 14; Senec. *Troad.* 835; Stat. *Theb.* vii. 370; Capitol. *Gordian.* 32; Hawkins in Walpole's *Travels*, p. 288.) At Carystus the mineral asbestus was also obtained, which was hence called the Carystian stone (λίθος Καρύστιος, Plut. *de Def. Orac.* p. 707; Strab. *l. c.*; Apoll. Dysc. *Hist. Mirab.* 36.) There are very few remains of the ancient Carystus. (Fiedler, *Reise durch Griechenland*, vol. i. p. 428.)

Antigonus, the author of the Historiae Mirabiles, the comic poet Apollodorus, and the physician Diocles were natives of Carystus.

COIN OF CARYSTUS IN EUBOEA.

2. A town in Laconia, in the district Aegytis, near the frontiers of Laconia. Its wine was celebrated by the poet Alcman. Leake supposes that Carystus stood at the *Kalyvia* of *Ghiorghitzi*. 'S, in Transalpine Gaul, is placed road from Mediolanum Santonum itum, Augustoritum (*Limoges*), from *Limoges*. It seems to be left bank of the *Vienne*, which is tion of Casinomagus. D'Anville ion of another Casinomagus some- ch and *Toulouse*, but nothing can [G. L.]

σινον: *Eth.* Casinas, -ātis: *San* lerable city of Latium, in the more the term, situated on the Via om Aquinum, and 16 from Vena- tant about 5 miles from the left Liris, and was the last city of he frontier of Campania. (Strab. *t.* p. 303.) From its situation it ncluded in the Volscian territory, ged originally to that people; but y occupied by the Samnites, from ed by the Romans. (Varr. *de L. L.* . 312 a Roman colony was sent time as to Interamna, both evi- pose of securing the rich valley of x. 28.) As its name is not found hirty Latin colonies given by Livy probable that it was a "colonia *de Colon.* p. 264), but no subse- ound of it as such. Its name is ed during the Second Punic War, n Hannibal encamped in its ter- avaged for two days, but did not the town itself. (Liv. xxii. 13, this we hear no more of it as a for- e a flourishing and opulent muni- nder the Republic and the Empire. ; Strab. v. p. 237.) Its territory, neighbouring Venafrum, was parti- to the growth of olives, but the from the city to the banks of the spects very rich and fertile. (Varr. , Fr. p. 207; Cic. *de Leg. Agr.* hese favoured lands were among s proposed by the agrarian law of out among the Roman citizens actually underwent that fate a a military colony was established econd Triumvirate. (*Lib. Colon.* *e Colon.* p. 336.) Casinum is not y Pliny, though it bears that title ptions (Murat. *Inscr.* p. 1104. 7, but whatever may have been its both from inscriptions and extant must have continued a flourishing town under the Roman Empire. e been destroyed, at least in great mbards in the 6th century; the *n Germano* has grown up on its name of *Monte Casino* has been elebrated monastery founded (A. D. dict on the lofty hill which towers e it.

however, occupies but a part of ncient Casinum, the ruins of which lower slopes of the hill for a con- . Among them are the remains of of small size but in unusually per- , which was erected, as we learn n still extant, at her own private Quadratilla, the same person cele- nger Pliny. (*Ep.* vii. 24; further notices of the same family are found in Varro *de R. R.* iii. 3. 9; and an inscription given by Hoare, p. 270.) Some ruins of a temple erected at the same time are also visible; as well as fragments of a theatre, a small temple or sepulchral monument of a remarkable style, considerable portions of a paved road, and some parts of the ancient walls. The monastery of *Monte Casino*, on the summit of the mountain, is said to have replaced a temple of Apollo which occupied the same lofty site. (P. Diac. i. 26; Gregor. Magn. *Dial.* ii. 8.)

In the plain below *S. Germano*, and on the banks of the little river now called *Fiume Rapido*, are some fragments of ruins that are considered with much probability to have belonged to the villa of Varro, of which he has left us a detailed description; it contained a museum, an aviary, and various other appendages, while a clear and broad stream of water, embanked with stone and crossed by bridges, traversed its whole extent. (Varr. *R. R.* iii. 5.) It was this same villa that M. Antonius afterwards made the scene of his orgies and debaucheries. (Cic. *Phil.* ii. 40.) The stream just mentioned was probably not the *Rapido* itself, but one of several small but clear rivulets, which rise in the plain near Casinum. The abundance of these springs is alluded to by Silius Italicus, as well as the foggy climate which resulted from them, and which at the present day renders the town an unhealthy residence. (Sil. Ital. iv. 227, xii. 527.) Pliny also notices one of these streamlets, under the name of Scatebra (ii. 96), for the coldness and abundant flow of its waters.

The name of VINNIUS, found in some editions of Varro, appears to be a false reading (Schneider, *ad loc.*), nor is there any authority for the name CASINUS as applied to the river *Rapido*, which has been introduced into the text of Strabo. (Kramer, *ad loc. cit.*) The ruins, still visible at *S. Germano*, are described by Romanelli (vol. iii. pp. 389—394), Hoare (*Class. Tour*, vol. i. pp. 268—277), and Keppel Craven (*Abruzzi*, vol. i. pp. 40—46.) [E. H. B.]

CA'SIUS MONS (Κάσιον: *Jebel-el-Akrâ*), a mountain of N. Syria, near Nymphaeum (Strab. xvi. p. 751) and Seleuceia (Plin. v. 22). Its base was bathed by the waters of the Orontes. (Amm. Marc. xiv. 8. § 10.) This great mass of rock, rising abruptly from the sea, with the exception of some highly crystalline gypsum near its foot on the E. side, and some diallage rocks, serpentine, &c. towards the SE., is entirely composed of supracretaceous limestone. The height has been ascertained to be 5318 feet, falling far short of what is implied by Pliny's (*l. c.*; comp. Solin. 39) remark, that a spectator on the mountain, by simply turning his head from left to right, could see both day and night. The emperor Hadrian, it was said, had passed a night upon the mountain to verify this marvellous scene; but a furious storm prevented his gratifying his curiosity. (Spartian. *Hadrian*, 14.) A feast in honour of Zeus was celebrated in the month of August at a temple situated in the lower and wooded region, at about 400 feet from the sea. Julian, during his residence at Antioch, went to offer a sacrifice to the god. (Amm. Marc. xxii. 14. § 8; Julian, *Misop.* p. 361; Le Beau, *Bas Empire*, vol. iii. p. 6.) A feast in honour of Triptolemus was also celebrated on this mountain by the people of Antioch. (Strab. p. 750.)

Coins of Trajan and Severus have the epigraph ΖΕΤΟ ΚΑCΙΟC CΕΔΕΥΚΕΩΝ ΠΕΙΕΡΙΑC. (Rasche, vol. i. pt. ii. p. 428.) The upper part of

Digitized by Google

Mons Casius is entirely a naked rock, answering to its expressive name *Jebel-el-Akrá*, or the bald mountain. (Chesney, *Exped. Euphrat.* vol. i. p. 386.) [E. B. J.]

CA'SIUS MONS (Κάσιος ὄρος, Strab. i. p. 38, seq. xvii. pp. 758—796; Mel. i. 10, iii. 8; Plin. v. 11. s. 12, xii. 13; Lucan. *Phars.* viii. 539, x. 433), the modern *El. Katieh*, or *El. Kas*, was the summit of a lofty range of sandstone hills, on the borders of Egypt and Arabia Petraea, immediately south of the Lake Sirbonis and the Mediterranean Sea. Near its summit stood a temple of Zeus-Ammon, and on its western flank was the tomb of Cn. Pompeius Magnus. The name of Mons Casius is familiar to English ears through Milton's verse.

"A gulf profound as that Serbonian bog,
'Twixt Damiata and mount Casius old."

[W. B. D.]

CA'SIUS FL. [ALBANIA.]

CA'SMENAE (Κασμένη, Herod. Steph. B., Κασμέναι, Thuc.: *Eth.* Κασμεναῖος, Steph.), a city of Sicily founded by a colony from Syracuse, 90 years after the establishment of the parent city, or B. C. 643. (Thuc. vi. 5.) It is afterwards mentioned by Herodotus as affording shelter to the oligarchical party called the Gamori, when they were expelled from Syracuse; and it was from thence that they applied for assistance to Gelon, then ruler of Gela. (Her. vii. 155.) But from this period Casmenae disappears from history. Thucydides appears to allude to it as a place still existing in his time, but we find no subsequent trace of its name. It was probably destroyed by some of the tyrants of Syracuse, according to their favourite policy of removing the inhabitants from the smaller towns to the larger ones. Its site is wholly uncertain: Cluverius was disposed to fix it at *Scieli*, but Sir R. Hoare mentions the ruins of an ancient city as existing about 2 miles E. of *Sta Croce* (a small town 9 miles W. of *Scieli*), which may very possibly be those of Casmenae. They are described by him as indicating a place of considerable magnitude and importance; but do not appear to have ever been carefully examined. (Cluver. *Sicil.* p. 358; Hoare's *Class. Tour*, vol. ii. p. 266.) [E. H. B.]

CASPATYRUS (Κασπάτυρος, Herod. iii. 102, iv. 44) or CASPAPYRUS (Κασπάπυρος, Hecat. ap. Steph. B. *s. v.*, Fr. 179, ed. Didot: πολὶς Γανδαρικὴ, Σκυθῶν ἀκτή), a city on the N. confines of India, in the district of Pactyïce, whence Scylax of Caryanda commenced his voyage down the Indus, at the command of Darcius, the son of Hystaspes; in which voyage he sailed to the E. down the river into the sea, crossing which to the W. he arrived at the head of the Red Sea in the thirtieth month. (Herod. iv. 44.) In the other passage, Herodotus tells us that those Indians, who are adjacent to the city of Caspatyrus and the district of Pactyïce, dwell to the N. of the other Indians (who are described just before), have customs similar to the Bactrians, and are the most warlike of the Indians. These also are the Indians who obtain gold from the ant-hills of the adjoining desert, in the marvellous manner which he proceeds to relate (iii. 102, foll.).

On these simple data great discussions have been conducted, which our space prevents our following. The two chief opinions are, that Caspatyrus is *Cabul*, and again, that it is *Kashmir*. On the whole, the latter seems most probable, but certainty seems almost unattainable. The Sanscrit name of *Kashmir* is *Kasyapa pur*, which, condensed to *Kaspapur*, gives us the form found in Hecataeus; and further, the very similar name CASPEIRIA certainly belongs to the country of *Kashmir*. As to the expedition of Scylax, remembering that the true source of the Indus in *Tibet* was unknown to the ancients, it is therefore that the voyage must have commenced at the source of one of the chief tributaries, and no better starting point could be found than the *Jelum*, at the lake formed by it below *Kashmir*. The eastward course of the voyage is the great difficulty. (Heeren, *Ideen*, vol. i. pt. i. p. 371; Ritter, *Erdkunde*, vol. iii. pp. 1087, foll.; Bohlen, *Alt-Indien*, vol. i. p. 64; Schlegel, *Berlin Transactions* 1829, p. 17; Von Hammer, *Annal. Vienn.* vol. xxxvi. 36; Bähr, *Excurs. ad Herod.* iii. 102; Mannert, *Geogr. d. Griech. u. Röm.* vol. v. pt. i. pp. 7[illegible]; Forbiger, *Alte Geogr.* vol. ii. p. 511.) [P. S.]

CASPEIRIA (Κασπειρία), a district of India intra Gangem, about the sources of the river HYDASPES (*Jelum*), Sandabal (which is now [illegible] Acesines, *Chenab*; see CANTABRAS), and Adris or Rhoadis. (Ptol. vii. 1. § 42.) The people, the Caspeirael (Κασπειραῖοι) are presently afterwards mentioned as E. of those on the Hydaspes, and W. of the Gymnosophistae, who are near the Upper Ganges. They have numerous cities (Ptolemy names five), one of which is Caspeira (Κάσπειρα), evidently the capital (§§ 47—50). The name, the position, and the number of cities, all concur to identify Caspeiria with the rich valley of *Kashmir*, which is watered by the upper courses of the *Jelum* and *Chenab*, besides smaller rivers; and Caspeira is probably therefore, the city of *Kashmir* or *Srinagar*. Mannert would read Κασμειρία (μ and π being letters easily confused); but the alteration is unnecessary, for the reason stated under CASPATYRUS.

Caspeira is one of Ptolemy's points of recorded astronomical observations, having 14 hrs. 5 min. for its longest day, and being distant about 4½ hrs. E. of Alexandria. The latter number, compared with those assigned to Bucephala and neighbouring places, confirms the position given to Caspeira, viz., *Kashmir*. (Ptol. viii. 26. § 7.) [P. S.]

CASPEIRIA INS. [FORTUNATAE.]

CASPE'RIA, a town of the Sabines, known only from the mention of its name by Virgil (*Aen.* vii. 714), and by his imitator Silius Italicus (viii. 416). The latter tells us it derived its name from the Lacedaemonians, probably connecting it absurdly with the Caspian Sea. Both authors associate it with Reate, Interocrea, and it seems probable that its site is correctly fixed at *Aspra*, a village about 15 miles S.W. of *Rieti*, and 13 N. of *Correse* (Cures). (Cluver. *Ital.* p. 676; Westphal, *Röm. Kampagne*, p. 150.) Vibius Sequester (p. 11) tells us that the river Himella, mentioned by Virgil in the same line, flowed near Casperia; it is supposed to be the small stream now called the *Aia*. [HIMELLA.] [E. H. B.]

CA'SPIAE PORTAE. [CASPII MONTES.]

CA'SPIAE PYLAE (*αἱ Κάσπιοι πύλαι*, Ptol. vi. 2. § 44; Strab. xi. pp. 522, 526; *αἱ Κάσπιαι πύλαι*, Hecat. *Fr.* 171; Ptol. vi. 2. § 7; Arrian, *Anab.* iii. 19; Κασπίαδες πύλαι, Dionys. P. 1064). a famous pass leading from North-Western Asia into the N. provinces of Persia: hence, as the course which an army could take, called by Dionysius (1036) Κάσπιαι γαίης Ἀσιήτιδος. Their exact position was at the division of Parthia from Media, about a day's journey from the Median town Rhagae. (Arrian. iii. 19.) According to Isidorus Charax, they were immediately below M. Caspius. As in the case of the pass

western side would, therefore, in
ed the Caspian, the Eastern, the Hyrcanian. Of the size, form, and character of this inland sea, there was a great variety of opinions among the ancients; and it is not a little remarkable that the earliest account of it which we have in Herodotus (i. 202, 203) is by far the most accurate. According to him, it took a vessel with oars 15 days to traverse its length, and 8 days to cross its broadest part. Herodotus maintained that it was a truly inland sea, having no connection with the external ocean. It seems clear, also, that Herodotus made its greatest length from S. to N. (which is its true direction), and not, as the later writers supposed, from W. to E. The real length of the sea is 740 miles from its most N. to its most S. point; its average breadth is about 210 miles.

In the earliest times (as would appear from a fragment of Hecataeus, p. 92, ed. Klausen) it was supposed that the Caspian Sea was connected with the Pontus Euxinus by means of the river Phasis, and still later through the Palus Maeotis (Strab. xi. p. 509), a view which has also been taken by some modern writers and travellers. (Kant, *Phys. Geogr.* i. 1. p. 113, and iii. 1. p. 112; F. Parrot's *Reise z. Ararat*, i. p. 24, Berl. 1834.) Aristotle (*Meteor.* i. 13. § 29, and ii. 1. § 10) appears to have been acquainted with the true nature of this sea; yet the majority of writers certainly held opinions more or less erroneous. The prevalent one was that it was connected with the Northern Ocean, and even Strabo (xi. p. 519) seems to have sanctioned this view (compare also Mela, iii. 5; Plin. vi. 13; Curt. vi. 4), an error which perhaps arose from a statement of Eratosthenes. (Strab. xi. p. 507.) Diodorus (xviii. 5), however, described this sea correctly, and Ptolemy (vii. 5. § 4,) confirmed his view. It seems extremely probable that much of the confusion which appears to have existed in antiquity with regard to this sea may have arisen from indistinct accounts of the connection between it and the Oxiana Palus (*Sea of Aral*). There seems to be no doubt that these seas were originally connected by an arm of the Oxus (*Gihon*), and it is not unlikely that the Caspian and Aral Sea were considered by many as the basins of one and the same sea, following the indistinct and uncertain accounts which prevailed respecting them, and perhaps thereby originating the distinctive names of M. Hyrcanium and M. Caspium for the Eastern and Western Seas, which were strictly true of one only. (Malte-Brun, *Gesch. d. Erdkunde*, i. p. 71; Kephalides, *Comm. de Mari Caspio*, Gotting. 1814; Eichwald, *Alte Geogr. d. Casp. Meeres*, Berlin, 1838.) [V.]

CASSANDREIA (Κασσάνδρεια, Κασάνδρεια: *Eth.* Κασσανδρεύς: *Pinaka*), a town situated on the narrow isthmus which connects the peninsula of Pallene with the main land, on which formerly stood the rich and flourishing city of Potidaea. (Strab. vii. p. 330; Plin. iv. 10.) POTIDAEA (Ποτίδαια: *Eth.* Ποτιδαιάτης, Ποτιδαιεύς) was a Dorian city originally colonised from Corinth (Thuc. i. 56; Scymn. Ch. v. 628), though at what period is not known; it must have existed before the Persian wars. It surrendered to the Persians on their march into Greece. (Herod. vii. 123.) After the battle of Salamis it closed its gates against Artabazus, who at the head of a large detachment had escorted Xerxes to the Hellespont. On his return this general laid siege to the place of which he would probably have obtained possession through the treachery of one of its citizens, had not the plot been accidentally discovered. An attempt afterwards

Digitized by Google

made against it by the Persians was unsuccessful, from a sudden influx of the sea, while the troops were crossing the bay to attack the town; a great part of the Persian force was destroyed, the remainder made a hasty retreat. (Herod. viii. 127.) There was a contingent of 300 men sent by Potidaea to the united Greek forces at Plataea. (Herod. ix. 28.) Afterwards Potidaea became one of the tributary allies of Athens, but still maintained a certain metropolitan allegiance to Corinth. Certain magistrates under the title of Epidemiurgi were sent there every year from Corinth. (Thuc. i. 56.) In B. C. 432 Potidaea revolted from Athens, and allied itself with Perdiccas and the Corinthians. After a severe action, in which the Athenians were finally victorious, the town was regularly blockaded; it did not capitulate till the end of the second year of the war, after going through such extreme suffering from famine that even some who died were eaten by the survivors. (Thuc. ii. 70.) A body of 1,000 colonists were sent from Athens to occupy Potidaea and the vacant territory. (Diod. xii. 46.) On the occupation of Amphipolis and other Thracian towns by Brasidas, that general attempted to seize upon the garrison of Potidaea, but the attack failed. (Thuc. iv. 135.) In 382, Potidaea was in the occupation of the Olynthians. (Xen. *Hell.* vii. § 16.) In 364, it was taken by Timotheus the Athenian general. (Diod. xv. 81; comp. Isocr. *de Antid.* p. 119.) Philip of Macedon seized upon it and gave it up to the Olynthians. (Diod. xvi. 8.) The Greek population was extirpated or sold by him. Cassander founded a new city on the site of Potidaea, and assembled on this spot not only many strangers but also Greeks of the neighbourhood, especially the Olynthians, who were still surviving the destruction of their city. He called it after his own name Cassandreia. (Diod. xix. 52; Liv. xliv. 11.) Cassandreia is the natural port of the fertile peninsula of Pallene (*Kassándhra*), and soon became great and powerful, surpassing all the Macedonian cities in opulence and splendour. (Diod. *l. c.*) Arsinoe, widow of Lysimachus, retired to this place with her two sons. (Polyaen. viii. 57.) Ptolemy Ceraunus, her half-brother, succeeded by treachery in wresting the place from her. Like Alexandreia and Antioch, it enjoyed Greek municipal institutions, and was a republic under the Macedonian dominion, though Cassander's will was its law as long as he lived. (Niebuhr, *Lectures on Ancient History*, vol. iii. pp. 231, 253.) About B. C. 279 it came under the dominion of Apollodorus, one of the most detestable tyrants that ever lived. (Diod. *Exc.* p. 563.) Philip, the son of Demetrius, made use of Cassandreia as his principal naval arsenal, and at one time caused 100 galleys to be constructed in the docks of that port. (Liv. xxviii. 8.)

In the war with Perseus his son (B. C. 169), the Roman fleet in conjunction with Eumenes, king of Pergamus, undertook the siege of Cassandreia, but they were compelled to retire (Liv. xliv. 11, 12.) Under Augustus a Roman colony settled at Cassandreia. (Marquardt, in Becker's *Handbuch der Röm. Alt.* vol. iii. pt. i. p. 118; Eckhel, *D. N.* vol. ii. p. 70.) This city at length fell before the barbarian Huns, who left hardly any traces of it. (Procop. *B. P.* ii. 4, *de Aedif.* iv. 3; comp. Leake, *Northern Greece*, vol. iii. p. 152.)

For coins of Cassandreia, both autonomous and imperial, see Eckhel (*l. c.*). The *type* constantly found is the head of Ammon, in whose worship they seem to have joined with the neighbouring people of Aphytis. [E. B. J.]

CASSANDRES, CASSANITAE. [CASANDRI.]

CASSI, in Britain. The name of a people sufficiently eastward to be mentioned by Caesar (*B. G.* v. 21): indeed, *Cassi*-velaunus was their king, and the Oppidum Cassi-velauni (Caes. *l. c.*) was a stockaded village, probably, in the present Hundred of *Cassio*-bury. [R. G. L.]

CASSIOPE (Κασσιόπη). 1. A town and promontory of Corcyra. [CORCYRA.]

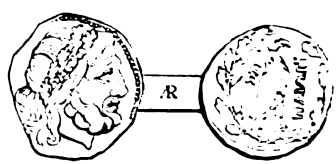
2. A town of Epeirus, more usually called Cassope. [CASSOPE.]

CASSIOTIS (Κασσιῶτις), a district of northern Syria, containing, according to Ptolemy (v. 15. § 16) the cities of ANTIOCHEIA, DAPHNE, BACTALIA, LYDIA, SELEUCEIA, EPIPHANEIA, RAPHANIA, ANTARADUS, MARATHUS, MARIAME, and MAMURGA. It probably was never considered as a political division (comp. Marquardt, *Handbuch der Röm. Alt.* p. 176), but was rather a district marked out by the natural features of the country. [SYRIA.] (Chesney, *Exped. Euphrat.* vol. i.; Thomson, *Bib. Sacr.* vol. v.) [E. B. J.]

CASSITERIDES, in Britain. The tin-country of Cornwall, with which the Scilly Isles were more or less confused. For details see BRITANNICAE INSULAE. pp. 433—435. [R. G. L.]

CASSOPE (Κασσώπη, Steph. B. *s. v.*; Κασσωπία πόλις, Diod.; Κασσιόπη, Ptol.), the chief town of the CASSOPAEI (Κασσωπαῖοι), a people of Epeirus occupying the coast between Thesprotia and the Ambracian gulf, and bordering upon Nicopolis (Scylax, p. 12; Strab. vii. p. 324. seq.) Scylax describes the Cassopaei as living in villages; but they afterwards rose to such power as to obtain possession of Pandosia, Buchaetium, and Elateia. (Dem. *de Halon.* 33.) We learn from another authority that Batiae was also in their territory. (Theopomp. ap. *Harpocr. s. v.* Ἐλάτεια.) Their own city Cassope or Cassopia is mentioned in the war carried on by Cassander against Alcetas, king of Epirus, in B. C. 312. (Diod. xix. 88.)

Cassope stood at a short distance from the sea on the road from Pandosia to Nicopolis upon a portion of the mountain of *Zálongo*, near the village of *Kamarina*. Its ruins, which are very extensive, are minutely described by Leake. The ruined walls of the Acropolis, which occupied a level about 100 yards long, may be traced in their entire circuit: and those of the city may also be followed in the greater part of their course. The city was not less than two miles in circumference. At the foot of the hill of the Acropolis, towards the western end, there is a theatre in good preservation, of which the internal diameter is 50 feet. Near the theatre is a subterraneous building, called by the peasants *Vasilopoúla* or King's House. "A passage, 19 feet in length and 5 feet in breadth, with a curved roof one foot and a half high, leads to a chamber 9 feet 9 inches square, and having a similar roof 5 feet 7 inches a



COIN OF CASSOPE.

Digitized by Google

height. The arches are not constructed on the principles of the Roman arch, but are hollowed out of horizontal courses of stone." Leake found several tombs between the principal gate of the city and the village of *Kamarina*. The ruins of this city are some of the most extensive in the whole of Greece. (Leake, *Northern Greece*, vol. i. p. 247, seq.)

CASSOTIS. [DELPHI.]

CASTA'BALA (Καστάβαλα: *Eth.* Καστα-βαλεύς), a city of Cilicia, one of the praefectures of Cappadocia. Strabo (p. 537) describes Castabala and Cybistra, as not far from Tyana, but as still nearer to the mountain (Taurus). Pliny (vi. 3) enumerates Castabala with Tyana among the Cappadocian towns. In Castabala there was a temple of Artemis Perasia, where they said that the priestesses walked with bare feet over live coals unhurt. (See Groskurd's *Note*, Strabo, *Transl.* ii. p. 453, on the proposals to amend the reading Perasia, which the context of Strabo shows to be his genuine reading.) The site of this place has not yet been fixed satisfactorily, but it may be at *Nigde*, NE. of *Bor*. The epigraph on the coins of Castabala is ιερόπολις καταβ. [G. L.]

CASTA'BALA (τὰ Καστάβαλα), as it is called by Appian (*Mithrid.* c. 105), by Ptolemy (v. 8), and by Pliny (v. 27), who mentions it among the towns of the interior of Cilicia. Alexander marched from Issi to the Pyramus, which he crossed to Mallus, and he reached Castabalum, as Curtius (iii. 7) calls it, on the second day. In order to reach Issus from Castabala, it was necessary to pass through a defile, which Alexander had sent Parmenio forward to occupy. This defile, then, was east of Castabala, and it would seem to be the Amanides Pylae of Strabo (p. 676), now *Demir Kapú*.

The Antonine Itin. places Catabolum, which is Castabalum, east of Aegeae or *Ayas*, 26 M. P., or 18 geog. miles. The distance from *Ayas* to a place called *Kara Kaya* is 16 geog. miles, and from *Ayas* to some ruins is 19 geog. miles. This would identify the ruins with Castabalum. But the Itin. gives 16 M. P., or 12 geog. miles from Castabalum to Baiae, and the distance from *Kara Kaya* to *Bayas*, which Baiae, was determined by Lieut. Murphy to be 9 geog. miles, while the distance from the ruins to *Ayas* is 15 geog. miles. Ainsworth prefers the latter of the two distances, "as it was determined by Itinerary, while the other distance from *Ayás* to the ruins was determined by a boat survey." Accordingly he identifies Castabala with *Kara Kaya* (Ainsworth, *Travels in the Track, &c.*, p. 56; Ainsworth, *Lond. Geog. Journ.*, vol. x. p. 510, &c.) [G. L.]

CASTA'LIA (Καστάλια: *Eth.* Καστάλιώτης, with Steph. *s. v.* observes, is a common form in Asian names), a place in Cilicia, mentioned by Eugenes in his Carica. [G. L.]

CASTA'LIA FONS. [DELPHI.]

CA'STAMON (*Castamouni*), a town of Paphlagonia, often mentioned by the Byzantine historians. *Kastamouni* is a considerable town, which is placed in the maps on the Annias, a branch of the Halys. (Hamilton, *Asia Minor*, vol. i. p. 239.) [G. L.]

CASTAX (Κάσταξ), a city of Baetica, probably identical with CASTULO. [P. S.]

CASTELLA'NI (Καστελλανοί), a people of Hispania Tarraconensis, at the foot of the Pyrenees, S. of the AUSETANI, and E. of the IACCETANI, with the following towns: Sebendunum (Σεβένδουνον), also mentioned on a coin, in conjunction with Iesa (Sestini, p. 164); Beseda (Βέσηδα: *S. Juan de las Badesas*, coins *ap.* Sestini, p. 183); Egosa (Ἔγωσα), and Basi (Βάσι: Ptol. ii. 6. § 71; Ukert, vol. ii. pt. 1, p. 426). [P. S.]

CASTELLUM AMERINUM. [AMERIA].

CASTELLUM CARACENORUM. [CARACENI.]

CASTELLUM FIRMANUM. [FIRMUM.]

CASTELLUM MENAPIORUM, mentioned by Ptolemy (ii. 9), who says, "then after the Mosa, the Menapii, and a city of theirs Castellum." It is also supposed by D'Anville that it may be the "Castellum Oppidum quod Mosa fluvius praeterlambit" of Ammianus (xvi. 25). But the words "Castellum Oppidum quod" are said not to be in the MSS. (See the note of Valesius.) As there is a place called *Kessel* on the left bank of the Maas, between *Ruremonde* and *Venloo*, it is supposed that this may be the Castellum Menapiorum; for it would come within the limits of the Menapii. [G. L.]

CASTELLUM (MORINORUM). There are many routes which end at or branch from a place called Castellum, in the northern part of Gallia. On the inscription of the column of Tongern, a road leads from Castellum, through Fines Atrebatum, to Nemetacum (*Arras*). Another route in the Antonine Itin. runs from Castellum, through Minariacum, to Turnacum (*Tournay*); and another from Castellum, through Nemetacum, to Bagacum (*Bavay*). The Table has a route through Taruenna (*Terouenne*) to Castellum Menapiorum, which, as the rest of the route shows, is not the Castellum on the *Maas*, but the Castellum of the Itinerary. This place must be the hill of *Cassel*, in the department of Nord, south of *Dunkerque*, which rises above the flat country, and commands a view of immense extent. It was certainly a Roman station. Many medals have been dug up there (Bast, *Recueil d'Antiquités, &c. trouvées dans la Flandre.*) There appears to be no authority for the name Morinorum; but this place would be within the limits of the Morini. The name Castellum Menapiorum in the Table cannot be right; for if we were to admit that the Menapii extended as far as *Cassel*, which is improbable, we should not expect to find their Castellum there; and it is just the place where we might expect to find the Castellum of the Morini. [G. L.]

CASTELLUM VALENTINIA'NI, a fortress built by the emperor Valentinian, on the river Nicer. (Amm. Marc. xxviii. 2.) Ammianus relates that, as the river was destroying the foundations of the fort, the emperor, in A. D. 319, caused the river to be led in a different direction. It is believed that the place was situated between *Leckenheim* and *Manheim*. (Wilhelm, *German.* p. 69; Kreutzer, *Zur Gesch. altröm. Kultur am Oberrhein*, p. 38, foll.) [L. S.]

CASTHANAEA (Καστανάια, Strab.; Καστανάια, Lycophr., Steph. B., Mel., et alii: *Eth.* Καστανάιος), a town of Magnesia in Thessaly, at the foot of Mt. Pelium, with a temple of Aphrodite Casthanitis. It is mentioned by Herodotus in his account of the terrible storm which the fleet of Xerxes experienced off this part of the coast. Leake places it at some ruins, near a small port named *Tamúkhari*. It was from this town that the chesnut tree, which still abounds on the eastern side of Mt. Pelium, derived its name in Greek and the modern languages of Europe. (Herod. vii. 183, 184; Strab. ix. pp. 438, 443; Plin. iv. 9. s. 16; Pomp. Mel. ii. 3; Lycophr. 907; Nicandr. *Alexiph.* 271; Etym. M. *s. v.* Leake, *Northern Greece*, vol. iv. p. 383.)

CA'STNIUM (Κάστνιον), a mountain at Aspendus of Pamphylia. (Steph. *s. v.*) [G. L.]

CASTO'LI CAMPUS (Καστωλοῦ πεδίον). Xenophon (*Anab.* i. 1. § 2), says that king Artaxerxes appointed his brother Cyrus the younger, commander of all the forces that muster at the plain of Castolus. Stephanus (*s. v.* Καστωλοῦ πεδίον) says that Castolus was a city of Lydia, and that the Ethnic name is Καστώλιος. He quotes Xenophon, and adds after Καστωλοῦ πεδίον the words Δωριέων ὡς Ξενοφῶν: and also, "it was so called because the Lydians call the Dorians Castoli;" all which is unintelligible. It does not appear that Stephanus could get his information, except from Xenophon, who simply says of the place what has been stated above. If there were any meaning in the remark of Stephanus, the place would be the plain of the Dorians. It has been proposed to change Καστωλοῦ into Πακτωλοῦ, the name of a branch of the Hermus, but there is no authority for this alteration. The place is unknown. [G. L.]

CASTRA, a station on the Candavian or Egnatian way,—the great line of communication by land between Italy and the East. In the Antonine Itinerary it is fixed at 12 M. P. from Heraclea. In the Jerusalem Itinerary, a place called Parembole, which Cramer (*Anc. Greece*, vol. i. p. 83) identifies with the Castra of Antoninus, appears at a distance of 12 M. P. from Heraclea. In the first of the two routes which the Antonine Itinerary gives in this part, a place called Nicia is marked at 11 M. P. from Heraclea. The Peutinger Tables mention a town of the same name, and assign to it the same distance. Leake (*Northern Greece*, vol. iii. p. 313) considers that these names, Castra, Parembole, Nicia (Nicaea? comp. Steph. B. *s. v.* Νίκαια) have reference to the military transactions of the Romans in Lyncestis, who not many years after those events constructed a road which passed exactly over the scene of their former achievements. Castra or Parembole, therefore, indicates the first encampment of Sulpicius on the Bevus (Liv. xxxi. 33), and Nicaea (Nicia) the place where he obtained the advantage over Philip's cavalry near Octolophus, which was 8 M. P. distant from the first encampment (Liv. xxx. 36). It appears, therefore, that Nicaea (Nicia), Parembole or Castra, and Heraclea, formed a triangle of which the sides were 8, 11, and 12 M. P. in length; that the N. route from Lychnidus descended upon Nicaea or Octolophus, and the two S. routes upon Parembole or Castra on the river Bevus. [E. B. J.]

CASTRA ALATA, in Britain. This is the rendering of the Πτερωτὸν στρατόπεδον of Ptolemy. It is twice mentioned by this author (ii. 3. § 13, viii. 3. § 9), and by him only; once as having "its longest day of 18 hours, and one-half," and being "distant from Alexandria to the westward 2 hours and one-sixth;" and again, as being, along with Banatia, Tameia, and Tuaesis, one of the four towns of the Vacomagi,—these lying north of the Caledonians, and north-east of the Venicontes. It has been variously identified, viz. with *Tayne* in Ross, with *Burghead* in Murray, and with *Edinburg*. None of these are certain. [R. G. L.]

CASTRA CAECILIA (*Caceres*), a town of Lusitania, in Spain, on the high road from Emerita to Caesaraugusta, 46 M. P. from the former, and 20 M. P. from Turmuli (*Alconeta*) on the Tagus. (*Itin. Ant.* p. 433.) It belonged to the conventus of Emerita, and formed one community with Norba Caesarea (Plin. iv. 22. s. 35, *contributa in Norbam*).

It is generally supposed to be identical with the Caecilia Gemellinum of Ptolemy (ii. 5. § 8. Καικιλία Γεμέλλινον ἡ Μετέλλινα: Bivar. *ad Dextri Chron.* p. 179, ap. Wesseling. *ad Itin. l. c.*). [P. S.]

CASTRA CORNE'LIA (Mela. i. 7. § 2; Plin. v. 4. § 3; C. Corneliana, Caes. *B. C.* ii. 24, 25; C. Scipionis, Oros. iv. 22; Κάστρα Κορνηλίου, *Peripl. ap.* Iriart. p. 488; Κορνηλίου παρεμβολή, Ptol. iv. 3. § 6; ὁ Σκίπιωνος χάραξ, Appian. *B. C.* ii. 44: *Ghellah*), a place (*locus*, Plin. *l. c.*) on the E. coast of the Carthaginian territory in N. Africa (*Zeugitana*), which derived its name from the camp established there by the elder Scipio Africanus immediately after his landing in Africa, B. C. 204. It is fully described by Caesar, in his narrative of Curio's operations against Utica (*B. C.* ii. 24, 25). It lay on the N. side of the Bagradas (*Mejerdah*), between the river and Utica, being distant from the latter place a little more than a mile by the direct road, which was, however, subject to inundation from the sea, and then the route made a circuit of six miles. The site of the camp was a straight ridge, jutting out into the sea, broken and rugged on both its slopes, but the less steep on the side towards Utica. (Comp. Lucan. iv. 589, 590, where, speaking of Curio, he says:—

"Inde petit tumulos, exesasque undique rupes,
Antaei quae regna vocat non vana vetustas."

the last line appears to refer to some legend which made these hills the tomb of Antaeus.) In this description we have no difficulty in recognising, in spite of great physical changes, the summit of a chain of hills which rise up to the height of from 60 to 80 feet above the alluvial plain formed by the *Mejerdah* between Utica and Carthage. The alterations made by the deposits of the *Mejerdah* have left this ancient promontory some distance inland, and have so changed the course of the river, that it now flows between Utica (*Bou-shater*) and the Castra (*Ghellah*), instead of to the S. of the latter. (See BAGRADAS and the map under CARTHAGO.)

The unaccountable neglect of the Carthaginians in leaving so important a point undefended, seems, however, to be clearly established. Not the least mention is made of any town or fort there: and Scipio establishes his camp without opposition. So in the Roman period: Curio finds the place unoccupied; and Lucan tells us that the traces of Scipio's camp were just discernible in his time (iv. 659: *veteris cernis vestigia valli*). An obscure passage in Tertullian (*de Pallio*, 3) is supposed to give a doubtful indication of a town or village having grown up and been already destroyed before his time. No traces of ruins is now found. (Shaw, *Travels*, &c. p. 150; Barth, *Wanderungen*, &c., p. 199.) [P. S.]

CASTRA EXPLORATO'RUM, in Britain, mentioned in the second Itinerary as being the first station between the Vallum and Rutupiae, distant 12 miles from *Blatum Bulgium*, and 12 from Luguvallum (*Carlisle*). *Netherby* best meets these conditions. [R. G. L.]

CASTRA HANNI'BALIS, a town or port of Bruttium, mentioned by Pliny as situated on the Gulf of Scyllacium, at the point where the two seas, the Sinus Terinaeus and Scyllacinus, approach nearest to one another, so that the isthmus between them is the narrowest part of Italy. (Plin. iii. 10 s. 15; Solin. ii. § 23.) It is evident from the name that the place derived its origin from having been a permanent station of Hannibal during the latter years

Digitized by Google

of the Second Punic War, when he was shut up within the Bruttian peninsula; but we have no mention of it in the history of that period. It has, however, been suggested that the Castra mentioned by Livy (xxxii. 7: "Castrorum portorium, quo in ora nunc oppidum est") as a seaport, without indicating its locality, may probably be the place in question; and that the small colony of 300 settlers was established there soon after the Second Punic War (B.C. 199), with a view to retain it in being. (Zumpt, *de Colon.* p. 236.) It subsequently appears to have served as the seaport of Scyllacium, where a very considerable Roman colony was established in B.C. 122. (Zumpt, *l. c.*; Mommsen, in *Berichte der Sächsisch. Gesellschaft der Wiss.* 1849, p. 49, foll.) The name is still found under the corrupt form "Annibali" in the Tabula, which places it 36 M. P. from the Lacinian Promontory. (*Tab. Peut.* The other numbers are evidently corrupt.) Its exact site has not been determined, but it was probably situated near the mouth of the little river *Corace*. Earlier geographers had placed it at a spot now called *Le Castelle*, near the north-east extremity of the Gulf of *Squillace*; but this is inconsistent with Pliny's statement, though it would accord better with the movements of Hannibal's operations in Bruttium, which represent him as generally making his headquarters near Crotona and the Lacinian Promontory. (Liv. xxvii. 46, xxix. 36, xxx. 19, 20; Barrius, *de Sit. Calabr.* iv. 4; Romanelli, vol. i. p. 185.) [E. H. B.]

CASTRA HE'RCULIS. This is one of the seven camps on the frontier of the Rhine which Julian restored; and Ammianus Marcellinus, who enumerates them, places Castra Herculis first, and Bingium (Bingen) last. [BINGIUM.] From this we may conclude that it was on the Lower Rhine, and the name place it there. [CARVO.] Castra Herculis is the same as *Harvelt*. [G. L.]

CASTRA NOVA. [DACIA.]

CASTRA POSTUMIA'NA, a fortified hill 4 M. P. from Attegua and Ucubis, in Hispania Baetica. (*Itin. Hisp.* 8: ATTEGUA.) [P. S.]

CASTRA PYRRHI, a place in Greek Illyria near the river Aous, is placed by Leake at *Ostanitza*, near, however, there are no remains of antiquity. (Liv. xxxii. 13; Leake, *Northern Greece*, vol. i. pp. 395, 396.)

CASTRA TRAJANA. [DACIA.]

CASTRA VETERA, or VETERA, as Ptolemy (ii. 9) and others call it, a Roman camp near the river Rhine, in Germania Inferior, which was founded in the time of Augustus, for when Germanicus was in those parts (A.D. 14), Vetera was the head-quarters of the mutinous fifth and twenty-first legions (Tac. *Ann.* i. 48). Indeed, it appears from Tacitus (*Hist.* iv. 23), that Augustus had considered it to be a good post for keeping the Germanise in check, and during the long period of peace that had elapsed when Civilis, with the Batavi and Germans, invaded the place, a town had grown up at a short distance from the camp. (*Hist.* iv. 22.) Part of the camp was on rising ground, and part in the plain. Civilis here blockaded two legions that had escaped either after being defeated by him. The Romans in the camp of Vetera finally surrendered to Civilis (A.D. 70), who afterwards posted himself there as a bulwark against the attack of Cerialis. Vetera is protected by the wide and swampy plains, and Civilis had carried a mole into the Rhine for the purpose of damming the water back and flooding the adjacent grounds. The place was, therefore, near the Rhine, in some spot where there is an elevation in the midst of a level country. It is placed in the table at the distance of 13 M. P. from Asciburgia (*Asburg*). D'Anville places Vetera at *Xanten* in the Rhenish provinces of Prussia, near the Rhine, on the left bank, and the eminence he supposes to be Vorstenberg, where Roman antiquities have been found. This position seems to be more likely to be the true one than Büderich, in an angle of the Rhine, opposite to *Wesel*, where some geographers fix Vetera. This important post was always occupied by one or two legions, while the Romans were in the possession of these parts. [G. L.]

CASTRIMOE'NIUM, a town of Latium, at the foot of the Alban hills about 12 miles from Rome, now called *Marino*. It does not appear to have been in ancient times a place of importance, but we learn from the Liber Coloniarum that it received a colony under Sulla, and that its territory was again assigned to military occupants by Nero. (*Lib. Colon.* p. 233.) Pliny also mentions the Castrimonienses among the Latin towns still existing in his time (iii. 5. s. 9. § 63); but it seems probable that the Munienses enumerated by him among the extinct "populi" of Latium (Ib. § 69), are the same people, and that we should read Moenienses. If this be so, the name was probably changed when the colony of Sulla was established there, at which time we are told that the city was fortified (oppidum lege Sullana est munitum, *Lib. Colon. l. c.*). The form Castrimonium is found both in Pliny and the Liber Colon.; but we learn the correct name to have been Castrimoenium from inscriptions, which also attest its municipal rank under the Roman Empire. (Gruter, *Inscr.* p. 397. 3; Orelli, *Inscr.* 1393). The discovery of these inscriptions near the modern city of *Marino*, renders it almost certain that this occupies the site of Castrimoenium: it stands on a nearly isolated knoll, connected with the Alban hills, about 3 miles from *Albano*, on the road to *Frascati*. (Nibby, *Dintorni*, vol. ii. p. 315; Gell, *Top. of Rome*, p. 310.) [E. H. B.]

CASTRUM ALBUM. [ILICI.]

CASTRUM INUI, an ancient city of Latium, the foundation of which is ascribed by Virgil to the Alban kings. (*Aen.* vi. 772.) No mention of it is found in any historical or geographical writer, and Pliny does not even include it in his list of the extinct cities of Latium; but it is repeatedly alluded to by the Roman poets. Silius Italicus assigns it to the Rutuli, and Ovid places it on the coast between Antium and Lavinium. (Sil. Ital. viii. 361; Ovid, *Met.* xv. 727.) Both these writers call it Castrum simply, Virgil being the only author who has preserved its full name. It is clear that the town had ceased to exist at a very early period, which may account for the error of Servius (*ad Aen. l. c.*) and Rutilius (*Itin.* i. 232), who have confounded it with Castrum Novum on the coast of Etruria. But it left its name to the adjoining district, which is mentioned by Martial under the name of the "Castrana rura," as a tract noted, like the adjacent Ardea, for its insalubrity. (Mart. iv. 60. 1: where, however, some editions read Paestana.) The passage of Ovid is the only clue to its position. Nibby supposes it to have occupied a height on the left bank of the little river called *Fosso dell' Incastro*, which flows by Ardea, immediately above its mouth; a plausible conjecture, which is all that can be looked for in such a case. (Nibby, *Dintorni*, vol. i. p. 440.) [E. H. B.]

CASTRUM MINERVAE, a town or fortress on

Digitized by Google

the coast of Calabria, between Hydruntum and the Iapygian Promontory. It derived its name from an ancient temple of Minerva, of which Strabo speaks (vi. p. 281) as having been formerly very wealthy. This is evidently the same which Virgil mentions as meeting the eyes of Aeneas on his first approach to Italy; he describes the temple itself as standing on a hill, with a secure port immediately below it. (*Aen.* iii. 531, foll., and Serv. *ad loc.*) Dionysius gives the same account; (i. 51) he calls the spot τὸ καλούμενον Ἀθηναῖον, and says that it was a promontory with a port adjacent to it, to which Aeneas gave the name of the Port of Venus (λιμὴν Ἀφροδίτης), but he adds that it was only fit for summer anchorage (θερινὸς ὅρμος), so that it is evident we must not take Virgil's description too literally. No mention is found either in Strabo or Dionysius of a *town* on the spot; but Varro (as cited by Probus, *ad Virg. Ecl.* vi. 31) distinctly speaks of Castrum Minervae as a town (oppidum) founded by Idomeneus at the same time with Uria and other cities of the Sallentines. It seems to have been but an inconsiderable place under the Romans; but the Tabula marks the "Castra Minervae" at the distance of 8 M. P. south of Hydruntum; and there is every probability that the modern town of *Castro*, which stands on a rocky eminence near the sea-shore, about 10 Roman miles S. of *Otranto*, occupies the site in question. There is a little cove or bay immediately below it, which answers to the expressions of Dionysius: though the little port now called *Porto Badisco*, more than 5 miles further north, would correspond better with the description of Virgil.

The spot is called by the geographer of Ravenna "Minervium," and hence some modern writers (Mannert, Forbiger) have been led to regard this as the colony of Minervium, established by the Romans in B.C. 123. (Vell. Pat. i. 15.) But it is now well established that that name was only a new designation for the previously existing city of Scylacium. [SCYLACIUM.] [E. H. B.]

CASTRUM NOVUM. 1. (Κάστρον νέον, Ptol.: *Eth.* Castronovani, *Inscr.*), a city on the sea-coast of Etruria, between Pyrgi and Centumcellae. We have no account of it prior to the establishment of a Roman colony there, and from the name we may presume that this was a new foundation, and that there was no Etruscan town previously existing on the site. But the period at which this colony was established is unknown; we first find it mentioned in Livy (xxxvi. 3), in B.C. 191, as one of the "coloniae maritimae," together with Fregenae, Pyrgi, Ostia, and other places on the Tyrrhenian Sea. There can therefore be no doubt that the Tuscan town is here meant, and not the one of the same name in Picenum. Mela, Pliny, and Ptolemy all mention it as one of the towns on the coast of Etruria, but it had in their time lost its character of a colony, in common with its neighbours Fregenae, Pyrgi, and Graviscae. (Plin. iii. 5. s. 8; Mela, ii. 4; Ptol. iii. 1. § 4.) Yet we find it termed, in an inscription of the third century, "Colonia Julia Castro Novo" (Orell. *Inscr.* 1009), as if it had received a fresh colony under Caesar or Augustus. Its name is still found in the Itineraries (*Itin. Ant.* pp. 291, 301; *Itin. Marit.* p. 498); but in the time of Rutilius it had fallen into complete decay, and only its ruins were visible, which that author erroneously identifies with the Castrum Inui of Virgil. (Rutil. *Itin.* i. 227—232.) Servius appears to have fallen into the same mistake (*ad Aen.* vi. 776). The site of Castrum Novum seems to have been correctly fixed by Cluver at a place called *Torre di Chiaruccia*, about 5 miles S. of *Cirita Vecchia* (Centumcellae) — where considerable remains of it were still visible — though this distance is less than that given in the Itineraries. (Cluver. *Ital.* p. 488; D'Anville, *Anal. Géogr. de l'Italie*, pp. 122, 123.)

2. (Καστροίνουον, Strab.; Κάστρον, Ptol.), a city on the sea-coast of Picenum, which was as well as the preceding, a Roman colony. There can be little doubt that this is the Castrum, the foundation of which as a colony is mentioned both by Livy and Velleius, though there is much discrepancy between them as to the date. The latter represents Firmum and Castrum as founded at the beginning of the First Punic War, while Livy assigns Castrum to the same period with Sena and Adria, about B.C. 252. (Liv. *Epit.* xi.; Vell. Pat. i. 14; Madvig, *de Colon.* pp. 265, 299.) No subsequent mention of it is found as a colony, the Castrum Novum of which the name occurs in Livy (xxxvi. 3) as a "colonia maritima," being evidently, as already observed, the Tuscan town of the name. But it is mentioned among the maritime towns of Picenum by Scylax, Pliny, and Ptolemy, and we learn from the Liber Coloniarum (p. 226) that its territory, the "ager Castranus," was portioned out to fresh colonists under Augustus, though it did not resume the rank of a colony. The Itineraries place it 12 M.P. from Castrum Truentinum, and 15 from Adria (*Itin. Ant.* pp. 101, 308, 313), from which we may infer that it was situated near *Giulia Nuova*, a little to the N. of the river *Tordino*, the Batinus of Pliny. It probably occupied the site of the now deserted town of *S. Flaviano*, near the bank of the river, and below the modern town of *Giulia Nuova*, the foundation of which dates only from the fifteenth century. (D'Anville, *Anal. Géogr. de l'Italie*, p. 181; Romanelli, vol. iii. p. 303.) [E. H. B.]

CASTRUM TRUENTI'NUM, called also TRUENTUM, from the name of the river on which it stood (Plin. iii. 13. s. 18; Truento civitas, *Itin. Ant.* p. 101), was a maritime city of Picenum, situated at the mouth of the river Truentus (*Tronto*). From the name it would appear to have been a Roman town, though we have no account of its settlement, and it certainly never ranked as a colony. But according to Pliny there was a town previously existing on the spot, which was a Liburnian settlement, and the only one of that people still remaining in Italy. (Plin. *l. c.*) Castrum Truentinum is mentioned during the Civil Wars as one of the places occupied by Caesar during his advance through Picenum from Ariminum (Cic. *ad Att.* viii. 12. 5), but this is the only occasion on which its name occurs in history. Its territory (the "ager Truentinus") was among those portioned out by Augustus (*Lib. Colon.* p. 226); and its continued existence throughout the Roman empire is attested by the geographers and the Itineraries. (Strab. v. p. 241; Mel. ii. 4; Sil. Ital. viii. 434; *Itin. Ant.* pp. 308, 313; *Tab. Peut.*) All authorities agree in placing it near the mouth of the Truentus, but its exact site has not been determined. D'Anville placed it at *Monte Brandone*, on the N. bank of the river, a short distance from the sea; but according to Romanelli some vestiges of it are still visible on the right bank of the *Tronto*, at a spot called *Torre di Martin Sicuro*. (D'Anville, *Anal. Geogr. de l'Italie*, p. 169; Romanelli, vol. iii. p. 294.) [E. H. B.]

CASTRUM VERGIUM. [BERGISTANI.]

Digitized by Google

CA'STULO (Καστλών, Polyb., Strab. &c., contracted into Κάστλων, Plut. *Sert.* 3, and VRR. to Strabo; Καστουλών, Ptol. ii. 6. § 59, and VRR. to Strabo; Καστολῶν, Appian. *Hisp.* 16: Castulonensis: *Cazlona*), the chief city of the Oretani, in Hispania Tarraconensis, and one of the most important places in the S. of Spain. (Ptol. *l. c.*; Artemidor. *ap.* Steph. Byz.; Strab. iii. p. 152, where the words καὶ Ὠρία are supposed by Ukert to be a later addition; see ORETANI: Plutarch, *l. c.*, assigns it to the Celtiberi.) It lay very near the boundary of Baetica (Strab. iii. p. 166), on the upper course of the Baetis (Strabo, iii. p. 152, observes that above Corduba, towards Castulo, ἐπὶ Καστλῶνος, the river was not navigable), and on the great Roman road from Carthago Nova to Corduba. (Strab. p. 160.) It stood at the junction of four roads, one leading to Carthago Nova, from which it was distant 203 M. P.: two others to Corduba, the distances being respectively 79 M. P. and 78 M. P.; and the fourth to Malaca, the distance being 291 M. P. As to the places near it, it was 22 M. P. from MENTESA BASTIA, 20 M. P. from ILITURGIS, 32 M. P. from UCIENSIS, and 35 M. P. from TUGIA (*Itin. Ant.* pp. 396, 402, 403, 404). A further indication of its position is given by the fact, twice stated by Polybius, that BAECULA was *in its* neighbourhood. (Polyb. x. 38, xi. 20.) Again, it was near the silver-mines which Strabo mentions as abounding in the mountains along the north side of the Baetis (*Guadalquivir*), and the term SALTUS CASTULONENSIS seems to have been the general name of a considerable portion of that chain. (Polyb. *l. c.*; Liv. xxii. 20, xxvi. 20, xxvii. 20; Cic. *Ep. ad Fam.* x. 31; Strab. iii. p. 142: there were also lead-mines near Castulo, p. 148: Caesar, *B. C.* i. 38, speaks of the Saltus Castulonensis as dividing the upper valleys of the Anas and the Baetis: this corresponds to the *Sierra de Cazorla*, or E. part of the *Sierra Morena*.) All the evidence respecting the site points to the small place still called *Cazlona**, about half a league from *Linares*, on the right bank of the *Guadalimar*, a little above its junction with the *Guadalquivir*; and the site is further identified by ruins with inscriptions, and by the mutilated sculptures frequently found there. "At *Palazuelos* are the supposed ruins of the *palace* of Himilce, the beautiful wife of Hannibal," who was a native of Castulo (Liv. xxiv. 41; Sil. Ital. iii. 97); and "the fine mountain of *Linares* is supposed to be a remnant of a Roman work which was connected with Castulo." The mines of copper and lead close to the place are very productive; and in the hills N. of *Linares*, the ancient silver-mines called *Los Pozos de Anibal* are not improbably have preserved the memory of the rich mine which Hannibal is known to have possessed in Spain, and which has been conjectured to have come to him through his wife. (Plin. xxxiii. 97. Morales, *Antig.* pp. 58—62; Florez, *Esp. S.* vol. x. 136, vol. v. pp. 4, 40; Ford, *Handbook*, p. 166.) The valley of *Cazlona* has also a certain resemblance to that on the side of Parnassus above Delphi, which is evidently referred to in the epithet applied by Silius Italicus (iii. 392, "Fulget praecipuis inclita Castulo signis"), and in the tradition, preserved by the same poet, that its first inhabitants (hence called *Castalii*) were colonists from Phocis (iii. 97, foll.: whether the name of the place was derived from the tradition or aided its invention, can hardly be determined). It stands on the slope of a mountain of the *Sierra Morena* which has two summits, with a narrow valley between, through which the *Guadalimar* flows, and on the side of the mountain is a spring, like that of Castalia on Parnassus. (Morales, p. 59.)

The close alliance of Castulo with the Carthaginians, implied in the circumstance of Hannibal's marriage, did not prevent its revolt to the Romans, at the time of the successes of P. and Cn. Scipio, in the Second Punic War, B. C. 213 (Liv. xxiv. 41). P. Scipio seems to have made Castulo his headquarters, and was slain under its walls (Appian. *Hisp.* 16), his brother's fate following only 29 days later, and at no great distance, B. C. 212 (Liv. xxv. 36). Upon this, Castulo, and its neighbour Illiturgi (*maxime insignes et magnitudine et nova*, Liv. xxviii. 19), besides other smaller cities, returned to the Punic alliance; and their punishment was one of young P. Scipio's first acts after the Carthaginians were expelled from Spain, B. C. 206 (that is, as we have a story in Livy's somewhat doubtful version). Illiturgi was sacked with the last extremities of military cruelty; but the Spaniards in Castulo, warned by the example, and less obnoxious for the manner of their revolt, hoped to make their peace by a voluntary surrender of their city and of its Punic garrison, and their submission purchased a fate so little milder than that of Illiturgi that Livy seems to labour in shading off the due gradation. (Liv. xxviii. 19. 20.)

Under the Roman empire, Castulo was a *municipium*, with the *jus Latinum*, belonging to the *conventus* of New Carthage; and its inhabitants were called *Caesari venales*. (Plin. iii. 3. s. 4; Inscr. *ap.* Gruter. pp. 323, no. 12, 325, no. 2.) Its coins all belong to the period of its independence: they resemble those of the ancient cities of Baetica (to which, in fact, the city naturally belonged, though politically assigned to Tarraconensis): their usual type is a winged sphinx (Florez, *Med. de Esp.* vol. i. p. 342, vol. iii. p. 44; Mionnet, vol. i. p. 37, Suppl. vol. i. p. 74; Sestini, p. 128; Eckhel, vol. i. p. 44.)

It is not quite certain whether the CASTAX (Κάσταξ) of Appian (*Hisp.* 32) is meant for Castulo. (Comp. Liv. xxiv. 41; Steph. B. *s. v.* Κάσταξ; Wesseling. *ad Itin. Ant.* p. 403; Schweighäuser, *ad Appian.* p. 242.) [P. S.]

CASTULONENSIS SALTUS. [CASTULO.]

CASUA'RIA, in Gallia, is placed in the Antonine Itin. on a road from Darantasia (*Moutiers en Tarentaise*) to Geneva. It is 24 M. P. from Darantasia to Casuaria, which D'Anville fixes near the source of a small river called *La Chaise*, and in the canton of *Cesérieux*, which seems to be the name Casuaria. From Casuaria the road is continued through Bautae [BAUTAE] to Geneva. [G. L.]

CASUARII. [CHASNARI.]

CASUENTUS, a river of Lucania, mentioned only by Pliny (iii. 11. s. 16), who places it between the Acalandrus and Metapontum. It is evidently the river now called *Basiento*, a considerable stream, which runs nearly parallel to the Bradanus (*Bradano*), and flows into the Gulf of Tarentum about 5 miles from the mouth of that river, and a short distance S. of the site of Metapontum. [E. H. B.]

CASUS (Κάσος: *Eth.* Κάσιος), an island between

* Reichard and others, who identify it with *Cazlona*, E. of *Jaen*, seem to have been misled by the fact that Strabo (iii. p. 142) placed it *near the* source of the Baetis, whereas his language refers to the *upper course* of the river.

Digitized by Google

Carpathus and Crete, is, according to Strabo, 70 stadia from Carpathus, 250 from Cape Sammonium in Crete, and is itself 80 stadia in circumference. (Strab. x. p. 489.) Pliny (iv. 12. s. 23) makes it 7 M. P. from Carpathus, and 30 M. P. from Sammonium. It is mentioned by Homer (*Il.* ii. 676). It is said to have been formerly called Amphe (Achne) and Astrabe; and it was supposed in antiquity that the name of Mt. Casium in Syria was derived from this island. (Steph. B. *s. vv.* Κάσος, Κάσιον; Plin. v. 31. s. 36.)

Casus has been visited by Ross, who describes it as consisting of a single ridge of mountains of considerable height. On the N. and W. sides there are several rocks and small islands, which Strabo calls (*l. c.*) αἱ Κασίων νῆσοι. Ross found the remains of the ancient town, which was also called Casus, in the interior of the island, at the village of *Polin* (a diminutive instead of Πόλιον or Πολίδιον). The ancient port-town was at *Emporeion*, where Ross also discovered some ancient remains: among others, ruins of sepulchral chambers, partly built in the earth. He found no autonomous coins, since the island was probably always dependent either upon Cos or Rhodes. In the southern part of the island there is a small and fertile plain surrounded by mountains, called *Argos*, a name which it has retained from the most ancient times. We find also an Argos in Calymna and Nisyrus. Before the Greek revolution, Casus contained a population of 7500 souls; and though during the war with the Turks it was at one time almost deserted, its population now amounts to 5000. Its inhabitants possessed, in 1843, as many as 75 large merchant vessels, and a great part of the commerce of the Christian subjects in Turkey was in their hands. (Ross, *Reisen in den Griech. Inseln*, vol. iii. p. 32, seq.)

CASYSTES (Κασύστης), a port of Ionia. Strabo (p. 644), whose description proceeds from south to north, after describing Teos, says, "before you come to Erythrae, first is Gerae, a small city of the Teians, then Corycus, a lofty mountain, and a harbour under it, Casystes; and another harbour called Erythras" (see Groskurd's *Transl.* vol. iii. p. 24, 25, and notes). It is probably the Cyssus of Livy (xxxvi. 43), the port to which the fleet of Antiochus sailed (B. C. 191) before the naval engagement in which the king was defeated by Eumenes and the Romans. Leake supposes this port to be *Latzáta*, the largest on this part of the coast. [G. L.]

CATABANI (Καταβανεῖς), a people of Arabia, named by Pliny (vi. 28. s. 32), and Strabo (xvi. p. 768), and placed by the latter at the mouth of the Red Sea, i. e., on the east of the Straits of *Bab-el-Mandeb*, and west of the Chatramotitae. Their capital was Catabania, perhaps the same as the Bana of Ptolemy. Forster takes the name to be simply the classical inversion of *Beni Kahtan*, the great tribe which mainly peoples, at this day, Central and Southern Arabia (*Arabia*, vol. ii. p. 155, more fully proved in vol. i. pp. 83. 84, 131, 132), and finds in them the descendants of the patriarch Joktan (*Gen.* x. 25, 26), the recognised father of the primitive tribes of Arabia (*Ib.* i. p. 77). [G. W.]

CATACECAU'MENE (ἡ Κατακεκαυμένη, or "the burnt country"), a tract in Asia Minor. Strabo (p. 628), after describing Philadelphia, says, "Next is the country called Catacecaumene, which is about 590 stadia in length, and 400 in width, whether we must call it Mysia or Maeonia, for it is called both names. It is all without trees, except the vine, which produces the wine called Catacecaumenites, which is inferior in quality to none of the wines that are in repute. The surface of the plain country is of ashes, but the mountainous part is rocky, and black, as if it had been burnt." Rejecting certain fanciful conjectures the geographer concludes that this appearance had been caused by internal fires, which were then quenched. Besides, "three pits, or cavities, are pointed out, which they call blast-holes (φῦσαι), about 40 stadia from one another; rough hills rise above them, which it is probable have been piled up from the liquid matter that was ejected." Strabo correctly distinguishes the ashes or cinders of this country from the later rugged lava.

The volcanic region is traversed by the river Hermus, and contains the modern town of Kóula. There are three cones, which are more recent than others. They are about five miles apart, and agree to Strabo's description. They are "three remarkable black conical hills of scoriae and ashes, all with deep craters, and well defined. From each of these a sea of black vesicular lava has flowed forth, bursting out at the foot of the cones, and after encircling their bases, rushing down the inclined surface of the country through pre-existing hollows and valleys, until it has reached the bed of the Hermus, flowing from E. to W. to the north of the volcanic cones" (Hamilton). The cones, and their lava streams, seem to be of comparatively recent origin; the surfaces are not decomposed, and contrast with the rich surrounding vegetation. The most eastern of these cones, *Kara Devlit*, near *Koula*, is 2,500 ft. above the sea, and 500 feet above the town of Koula. The second is seven miles distant from this one to the west, in the centre of a large plain. The crater of this cone is perfect. In a ridge between these two cones is a bed of crystalline limestone, which has been subject to the influence of the lava stream. The third, and most westerly of these recent cones, has a cone consisting chiefly of loose cinders, scoriae and ashes; and the crater, which is the best preserved of the three, is about half a mile in circumference, and 300 or 400 feet deep. These three craters are in a straight line in the tract of country between the Hermus and its branch the Coganus. Streams of lava have issued from all these cones; and the stream from this third crater, after passing through a narrow opening in the hills, has made its way into the valley of the Hermus, and run down the narrow bed until it has emerged into the great plain of Sardis. There are numerous cones of an older period, and lavas that lie beneath those of the more recent period. This country still produces good wine.

Major Keppel found at *Koula* an inscription with the name Μηιονες, said to have been brought from *Megné*, which lies between the second cone and the most westerly; and Hamilton saw there a large stone built into the walls of a mosque with Maeonian in rude characters. The country, as we learn from Strabo, was called Maeonia, and there was a town of the same name, which *Megné* may represent (Hamilton, *Researches, &c.*, vol. i. p. 136, ii. p. 101, &c.) [G. L.]

CATADUPA. [NILUS.]

CATAEA (Καταία, Arrian, *Ind.* 37), an island on the western limit of Carmania, about 12 miles from the shore. It was, according to Arrian, rocky and desert; a character which it still retains according to Thevenot, though more modern authorities

(cited by Vincent) speak of its beauty and fertility. Nearchus found it uninhabited, but frequented by visitors from the Continent, who annually brought goats there, and, consecrating them to Venus and Mercury, left them to run wild. Hence the probability that it is the same island which is called Aphrodisias by Pliny (vi. 28), the situation of which is still further determined by his adding "*inde Persidis insitum*." Perhaps the ancient name is preserved in the modern *Keish* or *Ken*. (Vincent, *Voyage of Nearchus*, vol. i. p. 362; Ouseley, *Travels in the East*, i. p. 270.) [V.]

CATALAUNI or CATELAUNI. The Notitia of the provinces mentions the Civitas Catalaunorum among the cities of the Provincia of Belgica Secunda, and between the Civitas Suessionum and the Civitas Veromanduorum. Aurelian defeated Tetricus "apud Catalaunos." (Eutrop. ix. 13.) Ammianus Marcellinus (xv. 11) mentions Catelauni and Remi as states or peoples of Belgica Secunda. The Antonine Itin. places the Durocatelauni on a road from *Autun*, through *Auxerre* and *Troyes*, to Durocortorum (*Reims*); and the Durocatelauni are next to *Reims*, at the distance of 27 M. P. It is easy to see that this place is *Châlons-sur-Marne*. There seems to be no extant authority for the name Durocatalaunum; but as there is Durocortorum, there may have been Durocatalaunum. According to usage in Gallia, the simple name Catalauni finally designated both the people and the town; and *Châlons* is a corruption of Catalauni. At *Châlons* the Roman Aëtius defeated Attila, A. D. 451.

It is probable that the Catalauni were dependent on the Remi, or included in their territory. The Catalauni are represented by the old bishopric of *Châlons*. There are medals with the name of this people on them. [G. L.]

CATANA or CATINA* (Κατάνη: *Eth.* Καταναῖος, Catanensis or Catinensis: *Catania*), a city on the E. coast of Sicily, situated about midway between Tauromenium and Syracuse, and almost immediately at the foot of Mt. Aetna. All authors agree in representing it as a Greek colony, of Chalcidic origin, but founded immediately from the neighbouring city of Naxos, under the guidance of a leader named Euarchus. The exact date of its foundation is not recorded, but it appears from Thucydides to have followed shortly after that of Leontini, which he places in the fifth year after Syracuse, or 730 B. C. (Thuc. vi. 3; Strab. vi. p. 268; Scymn. Ch. 286; Scyl. § 13; Steph. B. *s. v.*) The only event of its early history which has been transmitted to us is the legislation of Charondas, and even of this the date is wholly uncertain. (See *Dict. of Biogr.* art. *Charondas*.) But from the fact that his legislation was extended to the other Chalcidic cities, not only of Sicily, but of Magna Graecia also, as well as to his own country (Arist. *Pol.* ii. 9), it is evident that Catana continued in intimate relations with these kindred cities. It seems to have retained its independence till the time of Hieron of Syracuse, but that despot, in B. C. 476, expelled all the original inhabitants, whom he established at Leontini, while he repeopled the city with a new body of colonists, amounting, it is said, to not less than 10,000 in number, and consisting partly of Syracusans, partly of Peloponnesians. He at the same time changed its name to Aetna, and caused himself to be proclaimed the Oekist or founder of the new city. As such he was celebrated by Pindar, and after his death obtained heroic honours from the citizens of his new colony. (Diod. xi. 49, 66; Strab. *l. c.*; Pind. *Pyth.* i., and Schol. *ad loc.*) But this state of things was of brief duration, and a few years after the death of Hieron and the expulsion of Thrasybulus, the Syracusans combined with Ducetius, king of the Siculi, to expel the newly settled inhabitants of Catana, who were compelled to retire to the fortress of Inessa (to which they gave the name of Aetna), while the old Chalcidic citizens were reinstated in the possession of Catana, B. C. 461. (Diod. xi. 76; Strab. *l. c.*)

The period which followed the settlement of affairs at this epoch, appears to have been one of great prosperity for Catana, as well as for the Sicilian cities in general: but we have no details of its history till the great Athenian expedition to Sicily. On that occasion the Catanaeans, notwithstanding their Chalcidic connections, at first refused to receive the Athenians into their city: but the latter having effected an entrance, they found themselves compelled to espouse the alliance of the invaders, and Catana became in consequence the headquarters of the Athenian armament throughout the first year of the expedition, and the base of their subsequent operations against Syracuse. (Thuc. vi. 50—52, 63, 71, 89; Diod. xiii. 4, 6, 7; Plut. *Nic.* 15, 16.) We have no information as to the fate of Catana after the close of this expedition: it is next mentioned in B. C. 403, when it fell into the power of Dionysius of Syracuse, who sold the inhabitants as slaves, and gave up the city to plunder; after which he established there a body of Campanian mercenaries. These, however, quitted it again in B. C. 396, and retired to Aetna, on the approach of the great Carthaginian armament under Himilco and Mago. The great sea-fight in which the latter defeated Leptines, the brother of Dionysius, was fought immediately off Catana, and that city apparently fell, in consequence, into the hands of the Carthaginians. (Diod. xiv. 15, 58, 60.) But we have no account of its subsequent fortunes, nor does it appear who constituted its new population; it is only certain that it continued to exist. Callippus, the assassin of Dion, when he was expelled from Syracuse, for a time held possession of Catana (Plut. *Dion.* 58); and when Timoleon landed in Sicily we find it subject to a despot named Mamercus, who at first joined the Corinthian leader, but afterwards abandoned his alliance for that of the Carthaginians, and was in consequence attacked and expelled by Timoleon. (Diod. xvi. 69; Plut. *Timol.* 13, 30—34.) Catana was now restored to liberty, and appears to have continued to retain its independence; during the wars of Agathocles with the Carthaginians, it sided at one time with the former, at others with the latter; and when Pyrrhus landed in Sicily, was the first to open its gates to him, and received him with the greatest magnificence. (Diod. xix. 110, xxii. 8, Exc. Hoesch. p. 496.)

In the first Punic War, Catana was one of the first among the cities of Sicily, which made their submission to the Romans, after the first successes of their arms in B. C. 263. (Eutrop. ii. 19.) The

* Roman writers fluctuate between the two forms Catana and Catina, of which the latter is, perhaps, the most common, and is supported by inscriptions (Orell. 3708, 3778); but the analogy of the Greek Κατάνη, and the modern *Catania*, would point to the former as the more correct.

Digitized by Google

expression of Pliny (vii. 60) who represents it as having been *taken* by Valerius Messala, is certainly a mi-take. It appears to have continued afterwards steadily to maintain its friendly relations with Rome, and though it did not enjoy the advantages of a confederate city (foederata civitas), like its neighbours Tauromenium and Messana, it rose to a position of great prosperity under the Roman rule. Cicero repeatedly mentions it as, in his time, a wealthy and flourishing city; it retained its ancient municipal institutions, its chief magistrate bearing the title of Proagorus; and appears to have been one of the principal ports of Sicily for the export of corn. (Cic. *Verr.* iii. 43, 83, iv. 23, 45; Liv. xxvii. 8.) It subsequently suffered severely from the ravages of Sextus Pompeius, and was in consequence one of the cities to which a colony was sent by Augustus; a measure that appears to have in a great degree restored its prosperity, so that in Strabo's time it was one of the few cities in the island that was in a flourishing condition. (Strab. vi. pp. 268, 270, 272; Dion Cass. liv. 7.) It retained its colonial rank, as well as its prosperity, throughout the period of the Roman empire; so that in the fourth century Ausonius in his *Ordo Nobilium Urbium*, notices Catana and Syracuse alone among the cities of Sicily. In B. C. 535, it was recovered by Belisarius from the Goths, and became again, under the rule of the Byzantine empire, one of the most important cities of the island. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 9; Itin. Ant. pp. 87, 90, 93, 94; Procop. *B. G.* i. 5.) At the present day *Catania* still ranks as the third city of Sicily, and is little inferior to *Messina* in population.

The position of Catana at the foot of Mount Aetna was the source, as Strabo remarks, both of benefits and evils to the city. For on the one hand, the violent outbursts of the volcano from time to time desolated great parts of its territory; on the other, the volcanic ashes produced a soil of great fertility, adapted especially for the growth of vines. (Strab. vi. p. 269.) One of the most serious calamities of the former class, was the eruption of B. C. 121, when great part of its territory was overwhelmed by streams of lava, and the hot ashes fell in such quantities in the city itself, as to break in the roofs of the houses. Catana was in consequence exempted, for 10 years, from its usual contributions to the Roman state. (Oros. v. 13.) The greater part of the broad tract of plain to the SW. of Catana (now called the *Piano di Catania*, a district of great fertility), appears to have belonged, in ancient times, to Leontini or Centuripa, but that portion of it between Catana itself and the mouth of the Symaethus, was annexed to the territory of the latter city, and must have furnished abundant supplies of corn. The port of Catana also, which is now a very small and confined one (having been in great part filled up by the eruption of 1669), appears to have been in ancient times much frequented, and was the chief place of export for the corn of the rich neighbouring plains. The little river AMENANUS, or Amenas, which flowed through the city, was a very small stream, and could never have been navigable.

Catana was the birth-place of the philosopher and legislator Charondas, already alluded to; it was also the place of residence of the poet Stesichorus, who died there, and was buried in a magnificent sepulchre outside one of the gates, which derived from thence the nam of Porta Stesichorcia. (Suid. *s. v.* Στησίχορος.) Xenophanes, the philosopher of Elea, also spent the latter years of his life there (Diog. Laert. ix. 2. § 1), so that it was evidently, at an early period, a place of cultivation and refinement. The first introduction of dancing to accompany the flute, was also ascribed to Andron, a citizen of Catana (Athen. i. p. 22, c.); and the first sundial that was set up in the Roman forum was carried thither by Valerius Messala from Catana, B. C. 263. (Varr. ap. Plin. vii. 60.) But few associations connected with Catana were more celebrated in ancient times than the legend of the "Pii Fratres," Amphinomus and Anapias, who, on occasion of a great eruption of Aetna, abandoned all their property and carried off their aged parents on their shoulders, the stream of lava itself was said to have parted and flowed aside so as not to harm them. Statues were erected to their honour, and the place of their burial was known as the "Campus Piorum." The Catanaeans even introduced the figures of the youths on their coins, and the legend became a favourite subject of allusion and declamation among the Latin poets, of whom the younger Lucilius and Claudian have dwelt upon it at considerable length. Its occurrence is referred by Hyginus to the first eruption of Aetna, that took place after the settlement of Catana. (Strab. vi. p. 269; Paus. x. 28. § 4; Conon, *Narr.* 43; Philostr. *Vit. Apoll.* v. 17; Solin. 5. § 15; Hygin. 254; Val. Max. v. 4. Ext. § 4; Lucil. *Aetn.* 602—640; Claudian. *Idyll.* i. Sil. Ital. xiv. 196; Auson. *Ordo Nob. Urb.* 11.)

The remains of the ancient city, still visible at *Catania*, are numerous and important; but it is remarkable that they belong exclusively to the Roman period, the edifices of the Greek city having probably been destroyed by some of the earthquakes to which it has been in all ages subject, or so damaged as to be entirely rebuilt. The most important of these ruins are those of a theatre of large size and massive construction, the architecture of which is so similar to that of the amphitheatre, at no great distance from it, as to leave no doubt that they were erected at the same period, probably not long after the establishment of the colony by Augustus. The ruin of the latter edifice dates from the time of Theodoric, who in A. D. 498, gave permission to the citizens of Catana to make use of its massive materials for the repair of their walls and public buildings (Cassiod. *Var.* iv. 49); the theatre, on the contrary, continued almost perfect till the 11th century, when it was in great part pulled down by the Norman Count Roger, in order to adorn his new cathedral. Nearly adjoining the large theatre was a smaller one, designed apparently for an odeium or music theatre. Besides these, there are numerous remains of thermae or baths, all of Roman construction, and some massive sepulchral monuments of the same period. A few fragments only remain of a magnificent aqueduct which was destroyed by the great eruption of Aetna

COIN OF CATANA.

in 1669. The antiquities of *Catania* are fully described by the Principe di Biscari (*Viaggio per le Antichità della Sicilia*, chap. 5) and the Duca di Serra di Falco. (*Ant. della Sicilia*, vol. v. pp. 3—30.)

The coins of Catana are numerous, and many of them of very fine workmanship; some of them bear the head of the river-god Amenanus, but that of Apollo is the most frequent. We learn from Cicero that the worship of Ceres was of great antiquity here, and that she had a temple of peculiar sanctity, which was notwithstanding profaned by Verres. (Cic. *Verr.* iv. 43.) [E. H. B.]

CATA'NII (Κατάνιοι), a tribe of Arabia Deserta, bounded by Syria on the west and the Cauchabeni on the east. (Ptol. v. 19.) Burckhardt mentions the Bedouin tribe of *Kahtanys*, "who range the northern desert of Arabia, from Bosra to the neighbourhood of Hauran and Aleppo." These Mr. Forster takes to be the representatives of the ancient Catanii (*Arabia*, vol. ii. p. 238, seq.). [G. W.]

CATAO'NIA (ἡ Καταονία), one of the divisions of Cappadocia [CAPPADOCIA], is described by Strabo (p. 535), who had visited it. Cataonia, he says, is a level and hollow plain. The Greek term hollow (κοῖλον) means a plain surrounded by mountains. It is very productive, except that it has no evergreens. It is surrounded by mountains; on the south by the Amanus, and on the west by the Antitaurus which branches off from the Cilician Taurus in a direction different from that which the Amanus has, which itself is an offset of the Taurus. The Antitaurus turns to the north, a little to the east, and then terminates in the interior. The Antitaurus contains deep narrow valleys, in one of which is situated Comana, a considerable city on the river Sarus, which flows through the gaps of the Taurus into Cilicia and the Mediterranean. Through the plain of Cataonia flows the river Pyramus, which has its source in the middle of the plain, and also passes through the gaps of the Taurus into Cilicia. Strabo, in a corrupt passage, where there is evidently an omission of something in our present texts (p. 536; Groskurd, *Transl.* vol. ii. p. 451, note), speaks of a temple of Zeus Dacius, where there is a salt-lake of considerable extent with steep banks, so that the descent to it is like going down steps. It was said that the water never increased, and had no visible outlet.

The plain of Cataonia contained no city, but it had strong forts on the hills, such as Azamora and Dastarcum, round which the river Carmalas flowed [CARMALAS], which river may be the *Charma Su*, a branch of the Pyramus, which rises in the Antitaurus. It also contained a temple of Cataonian Apollo, which was in great repute in all Cappadocia. Ptolemy (v. 7) has a list of eleven places in his Cataonia, which he includes in his Armenia Minor. One of them is Cabassus [CABASSUS], a site unknown; and Cybistra, which is far beyond the limits of Strabo's Cataonia. In fact Ptolemy's Cataonia, if there is truth in it, is quite a new division of the country: it is, however, unintelligible to us. Cataonia also contains Claudiopolis. Caruana, mentioned in the Antonine Itin., seems to be Gegeyn, on the *Gogeyn Su*, which flows from the west, and joins the Pyramus on the right bank lower down than the junction of the Carmalas and Pyramus. The upper valleys of the Sarus and the Pyramus require a more careful examination than they have yet had. The inhabitants of Cataonia were distinguished by the ancients (οἱ παλαιοί) from the other Cappadocians, as a different people. But Strabo could observe no difference in manners or in language. [G. L.]

CATAROCTONION, in Britain. This is the form of the Geographer of Ravenna, that of Ptolemy being Catarractonion. In the Itinerary it is Cataractoni (*Cattrick Bridge*). [R. G. L.]

CATARRHACTES (Καταῤῥάκτης), a river of Pamphylia, which entered the sea east of Attalia. Mela (i. 14) describes it as being so called because it has a great fall or cataract. He places the town of Perga between the Cestrus and the Catarrhactes. The Stadiasmus describes it by the term οἱ Καταῤῥάκται, or the Falls. Strabo (p. 667) also speaks of this river as falling over a high rock [ATTALIA]. This river, on approaching the coast, divides into several branches, which, falling over the cliffs that border this part of the coast, have formed a calcareous deposit. Through this calcareous crust the water finds its way to the sea, and the river has now no determinate outlet, "unless," adds Leake, "it be after heavy rains, when, as I saw it, in passing along the coast, it precipitates itself copiously over the cliffs near the most projecting point of the coast, a little to the west of Laara." (Leake, *Asia Minor*, &c., p. 191.) According to the Stadiasmus the outlet of the river was at a place called Masura, probably the Magydus of Ptolemy (v. 5); or the Mygdale of the Stadiasmus may be Magydus. This river, now the *Duden Su*, is said to run under ground in one part of its course, which appears to be of considerable length. It is represented in Leake's map, with the names of the travellers who have seen parts of its course, one of whom is P. Lucas. This river, indeed, is supposed to issue from the lake of *Egerdir*, NE. of *Isbarta*, and after disappearing, to show itself again in the lower country. But this requires better evidence. The ancient writers say nothing of its source and the upper part of it. [G. L.]

CATARRHACTES (Καταῤῥάκτης: *Sidsuro*), a river on the S. coast of Crete, which Ptolemy (iii. 17. § 4) places to the E. of Leben. (Hoeck, *Kreta*, vol. i. p. 394.) [E. B. J.]

CATARRHACTES. [MAEANDER.]

CATARZE'NE (Καταρζηνή, Ptol. v. 13. § 9), a district of Armenia, lying near the mountains of the Moschi, by the Avanes. The name Cotacene occurs as a gloss upon Ptolemy, and St. Martin (*Mém. sur l'Armenie*, vol i. p. 108) identifies it with the Armenian name *Godaikh*, one of the 16 districts of the province of Ararat. The capital of this district was Edschmiadzin, well known in the ecclesiastical history of Armenia. (St. Martin, *l. c.*; comp. Ritter, *Erdkunde*, vol. x. p. 514.) [E. B. J.]

CATENNEIS. [ETENNEIS.]

CATHAEI (Καθαῖοι), a powerful and warlike people of India intra Gangem (in the *Panjab*) between the rivers Hydraotes (*Ravee*) and Hyphasis (*Gharra*), whose capital city, SANGALA, is supposed to have occupied the site of the modern Sikh capital, *Lahore*. This city was taken and destroyed by Alexander on his march into India, B. C. 326 (Arrian. *Anab.* v. 22, foll.; Diod. xvii. 91). Strabo, who is doubtful between which two rivers of the *Panjab* the people dwelt, relates some of their customs: how they had the highest regard for beauty in dogs and horses, and in men, so that, when a child was two months old, a solemn judgment was held, whether he was beautiful enough to be suffered to live: how they stained their beards

Digitized by Google

with the beautiful colours which their country produced in abundance; how marriage was contracted by the mutual choice of the bride and bridegroom, and how widows were burned with their deceased husbands, a custom for which he gives a merely imaginary reason. He calls their country Cathaea (Κάθαια: Strab. xv. p. 699.)

Some modern writers suppose the Cathaeans to have been a branch of the *Rajputs* (Mannert, vol. v. pt. i. p. 43), while others, including several of the best Orientalists, trace in their name that of the Hindu warrior caste, the *Kshatriyas* (Lassen, *Pentapot.* p. 23; Schlegel, *Ind. Bibl.* vol. i. p. 249; Bohlen, *Alte Indien*, vol. ii. p. 22; Ritter, *Erdkunde*, vol. v. p. 461.) [P. S.]

CATHRAPS (Κάθραψ, Ptol. vi. 8. § 4: Marcian. p. 20), a small river of Carmania, about which little more is known than its name. It was 700 stadia NW. of the mouth of the Corius. Reichard considered the Salsus of Pliny to be identical with the Cathraps (or, as in some MSS. it is called, the Araps) of Ptolemy, and that it is represented by the modern *Shiver*: but this seems very doubtful. [V.]

CATOBRIGA. [CAETOBRIX.]

CATORISSIUM, is placed in the Table on a road from Vienna (*Vienne*), in Gallia Narbonensis, through Cularo (*Grenoble*) to the Alpis Cottia (*Mont Genevre*). It is xii M. P. from Cularo on the route to the Alpis Cottia. Walckenaer places Catorissium at *Petit Col d'Ornon et Quarele*. [G. L.]

CATTARUS (Κάτταρος: *Cattaro*), a fortress of Dalmatia in Illyricum, restored by Justinian, was situated on the east side of the bay called after it. (Procop. *de Aedif.* iv. 4.) It is probably the same as the Decadaron of the Geogr. Rav.

CATTI. [CHATTI.]

CATTIGARA (τὰ Καττίγαρα), a great city and port of the Sinae, S. of Thinae, near the mouth of the river COTTIARIS, on the E. side of the Sinus Magnus, opposite the Chersonesus Aurea. Ptolemy places it at the extreme E. and S. of the known world, in 177° E. long., and 8° 30′ S. lat., and Marcian calls it the southernmost city of the inhabited earth. It is one of Ptolemy's points of recorded astronomical observation, having 12½ hours in its longest day, and being 8 hours E. of Alexandria; and the sun being vertically over it twice in the year, namely, at the distance of about 70° on either side of the summer solstice (Ptol. i. 11. § 1, 14. §§ 1—10, 17. § 5, vii. 3. § 3, viii. 27. § 14; Marcian. p. 30). Following the numbers of Ptolemy, Mannert seeks the city in *Borneo*, while others, relying rather on his general descriptions, after correcting the obvious and gross errors in his views of the SE. part of Asia, identify the place with *Canton*. (Mannert, vol. v. pp. 188, fol.; Forbiger, vol. ii. pp. 478—480.) [P. S.]

CATUALIUM, in north Gallia, is placed in the Table on a road from Atuaca (Aduatuca, *Tongern*) to Noviomagus (*Nymegen*). The Table gives thirty Gallic leagues from *Tongern* to Catualium, and twelve leagues beyond Catualium is Blariacum (*Blerick*), which seems to be pretty well fixed; but the site of Catualium is uncertain. [G. L.]

CATUELLANI, a British population, under the dominion of the Boduni, reduced by Aulus Plautius. Dion Cassius (lx. 20) is the authority for this, and *Catuellani* and *Boduni* are his forms. For the likelihood or unlikelihood of the former of these being the Catyeuchlani, and the Dobuni of Ptolemy, see those articles. [R. G. L.]

CATU'RIGES (Κατόριγες). When Caesar crossed the Alps from Italy into Gallia the second time, in the early part of B. C. 58, he went by Ocelum (*Ucean* or *Ocello*), the last town in Gallia Citerior, to one of the Alpine passes. His route was by the pass of the *Mont Genèvre*, or Alpis Cottia. The Centrones, Graioceli, and Caturiges, occupied the heights and attempted to prevent him from crossing the Alps. (*B. G.* i. 10.) The position of the Caturiges is determined by that of their town Caturiges or Caturigae which the Itineraries place between Ebrodunum (*Embrun*), and Vapincum (*Gap*): and a place called *Chorges* corresponds to this position. Two inscriptions are reported as found on the spot which contain the name Cat. or Cathirig. An old temple, called the temple of Diana, now serves as a church. There are also fragments of Roman columns; and a block of marble in front of the church contains the name of the emperor Nero (*Guide de Voyageur, &c.*, par Richard et Hocquart.) In the Table this town is named Caturmagus, and is placed on the road from Brigantium (*Briançon*), to Vapincum. The Antonine Itin. has the same route, but the town is named Caturiges; and it has the same name in the Jerusalem Itin.

The name of the Caturiges is preserved in the inscription of the trophy of the Alps (Plin. iii. 20), and they are mentioned between the Ucemi and Brigiani. Pliny also mentions the Vagienni, who were in Italy on the Tanarus, as sprung from the Caturiges (iii. 5); and in an obscure passage (iii. 17) he speaks of "Caturiges exsules Insubrum," as having disappeared from Gallia Transpadana. We may probably conclude that the Caturiges were among the Galli who entered Italy in the early period of Roman history. Besides the town of Caturiges, they had Ebrodunum (*Embrun*). They possessed, accordingly, part of the upper valley of the *Durance*. In Ptolemy the Caturiges (Κατουρίγιδαι, iii. 1) are placed in the Alpes Graiae, which is a mistake; and he mentions only one town of the Caturiges, Ebrodunum. Strabo's description of the position of the Caturiges (p. 204) is also incorrect. D'Anville supposes that Brigantium was included in the territory of the Caturiges; but there is no evidence for this, though it seems likely enough. Ptolemy assigns it to the Segusini. [BRIGANTIUM.] [G. L.]

CATUSIACUM, a position in north Gallia, which appears in the Antonine Itin. on the road from Bagacum (*Bavay*) to Durocortorum (*Reims*). It is placed vi Gallic leagues or 9 Roman miles from Verbinum (*Verrins*), and it seems to be *Choisy* at the passage of the *Serre*, a small tributary of the *Oise*. The same route is in the Table, but Catusiacum is omitted. [G. L.]

CATVIACA, or, as it is sometimes written Catuica, in Gallia Narbonensis, is placed in the Table and the Antonine Itin. on the road from Vapincum (*Gap*) to Arelate (*Arles*); and it is xii M. P. from Catviaca to Apta Julia (*Apt*), a position which is known. Catviaca is between Alaunio and Apta Julia. These unimportant places can only be determined by the assistance of the best topographical maps, and even then with no certainty, unless the name has been preserved. [G. L.]

CATYEUCHLANI, in Britain, mentioned by Ptolemy (ii. 3. § 21) — whose geography for these parts is obscure — as next to the Coritani, whose towns were Lindum and Rhage; Salinae and Unlanium being those of the Catyeuchlani themselves.

Digitized by Google

Next come the Simeni, whose town is Venta; and then, more to the east, near the Imensa Aestuary, the Trinoantes, whose town is Camudolanum. Of all these texts and localities the only one wholly beyond doubt is Lindum = *Lincoln*. With this as a starting-point, Rhage = *Leicester*. Then the Simeni are considered to be the Iceni not otherwise mentioned by Ptolemy; and as Venta = *Norwich*, or the parts about it, we have a limit for the Catyeuchlani on the north and east. The Imensa Aestuary is generally considered to mean that of the *Thames*; the error being, perhaps, that of the MSS. Then come the Trinoantes (Trinobantes), generally placed in Middlesex, but whose capital is here the mysterious Camudolanum. [COLONIA.] Rutland, Hants, Beds, and Northampton best coincide with these conditions, but they are by no means the counties which best justify us in identifying the Catuellani [CATUELLANI], whose relations were with the Boduni (= Dobuni = *Gloucestershire*), with the Catyeuchlani. [R. G. L.]

CAUCA (Καῦκα: *Eth.* Καυκαῖοι, Caucenses: *Coca*), a city at the extreme E. of the territory of the Vaccaei, in Hispania Tarraconensis; belonging to the *conventus* of Clunia; and lying on the great road from Emerita to Caesaraugusta, 22 M. P. from Numantia and 29 M. P. from Segovia. (Appian. *Hisp.* 51, 89; *Itin. Ant.* p. 435; Plin. iii. 3. s. 4; Ptol. ii. 6 § 50; Zosim. iv. 24; Geog. Rav. iv. 44; Mariana, *Hist. Hisp.* iii. 2; Florez, *Esp. S.* v. 14; Ukert, vol. ii. pt. 1, p. 432.) [P. S.]

CAUCASIAE PORTAE. [CAUCASUS.]

CAUCASUS, CAUCASII MONTES (ὁ Καύκασος, τὰ Καύκασα ὄρη: also, ὁ Καυκάσιος, Herod. iv. 97, Steph. B. *s. v.*; τὸ Καύκασον, Arrian. *Peripl.*; ὁ Καυκάσιος ὄρος, Herod. i. 104, Dion. Per. 663: *Eth.* Καυκάσιος and Καυκασίτης: region Καυκασία, Adject. and *Eth.* Καυκασιανός, Steph. B. *s. v.*: *Caucasus, Kaukas, Goffkas, Jalbus*), the great mountain chain which extends across the isthmus between the Euxine and Caspian Seas, and now forms the boundary between Europe and Asia, but belonged entirely to Asia in the ancient division of the continents.

This range forms the NW. margin of the great table-land of W. Asia. [ASIA.] It commences on the W. at the base of the tongue of low land (*Peninsula of Taman*), which divides the E. part of the *Sea of Azov* (Palus Maeotis) from the *Black Sea*, in 45° 0′ N. lat., and 36° 45′ E. long.; and it runs first along the NE. shore of the Black Sea, and then across the isthmus, with a general direction from NW. to SE., terminating on the W. coast of the Caspian, in the peninsula of *Apsheron* in 40° 20′ N. lat., and 49° 20′ E. long. Its length is 750 miles, its breadth from 65 to 150 miles. Its elevation varies greatly, the central portion forming some of the loftiest mountains in the world, higher than the Alps, while its extremities sink down into mere hills. The highest summit, *M. Elburz*, in 43° 20′ N. lat., and 42° 30′ E. long., attains a height of not much less than 18,000 feet; and the next in elevation, *M. Kazbek*, in 42° 50′ N. lat., and 44° 20′ E. long. is just 16,000 feet high. The part of the chain W. of *Elburz* sinks very rapidly, and along the shore of the Euxine its height is only about 200 feet; but the E. part of the chain preserves a much greater elevation till it approaches very near the Caspian, where it subsides rather suddenly. Nearly all the principal summits in the central part, from M. Elburz eastward, are above the line of perpetual snow, which is here from 10,000 to 11,000 feet above the sea. The central chain is bordered by two others, running parallel to it; that on the N., called by the inhabitants the *Black Mountains*, forms a sort of shoulder, by which the Caucasus sinks down to the great plain of Sarmatia and the basin of the Caspian; while that on the S., called in Armenian *Sdorin Goffkas*, i. e. the *Lower Caucasus*, branches off from the central mass in 44° E. long., and running between the rivers *Rion* (Phasis) and *Kur* (Cyrus), from WNW. to ESE., connects the main chain with the highlands of Armenia, and with the Taurus system. The mountains are chiefly of the secondary formation, with some primary rocks; and, though there are no active volcanoes, the frequent earthquakes, and the naphtha springs at the E. extremity, indicate much igneous action. The summits are flat or rounded, with an entire absence of the sharp peaks familiar to us in the Alps. The chief rivers of the Caucasus are on the N. side, the *Terek* (Alontas), and the *Kuban* (Hypanis or Vardanes), both rising in *M. Elburz*, and falling, the former into the *Caspian*, the latter into the *Sea of Azov*; and, on the S. side, the *Rion* (Phasis) falling into the Euxine, and the *Kur* (Cyrus) falling into the Caspian. This brief general description of the chain will render more intelligible the statements of the ancient writers respecting it. (The chief modern works on the Caucasus are, Reinegg, *Histor.-topograph. Beschreibung des Kaukasus*, St. Petersb. 1796, 1797, 2 vols. 8vo., and the works of Koch, especially his splendid Atlas, *Karte des Kaukasischen Isthmus und Armeniens*, Berlin, 1850, consisting of four large maps, repeated in four editions, one coloured *politically*, another *ethnographically*, the third *botanically*, and the fourth *geologically*. The Atlas to Rennell's *Comparative Geography of W. Asia* is also very useful.)

In the early Greek writers, the Caucasus appears as the object of a dim and uncertain knowledge, which embraced little more than its name, and that vague notion of its position which they had also of other places about the region of the Euxine, and which they traced mythically to the Argonautic expedition (Strab. xi. p. 505). In Aeschylus, it is the scene of the punishment of Prometheus, who is chained to a rock at the extremity of the range overhanging the sea, but at a considerable distance from the summit "the Caucasus itself, highest of mountains" (Aesch. *Prom. Vinct.* 719, comp. 422, 89, 1088; *Prom. Sol.* Fr. 179, *ap.* Cic. *Quaest. Tusc.* ii. 10; comp. Hygin. *Fab.* 54; Apollon. Rhod. ii. 1246, et seq.; Val. Flacc. v. 155, where the Caucasus is called *Promethei cubile*: Strab. iv. p. 183, xi. p. 505, who expressly asserts that the Caucasus was the easternmost mountain known to the earlier Greeks; and adds that it was, in later myths, the scene of expeditions of Heracles and Dionysus.)

Hecataeus mentions the Caucasus twice, in connection with the Dandarii and Coli, peoples who dwelt about it; and he adds that the lower parts of the chain were called Colici Montes (Κολικὰ ὄρη; Fr. 161, 186, *ap.* Steph. B. *s. vv.* Δανδάριοι, Κῶλοι; comp. Plin. vi. 5.) Herodotus shows a general knowledge of the chain, which is accurate as far as it goes: he derived it from the Persians, of whose empire the Caucasus was the N. boundary; a boundary, indeed, never passed by any Asiatic conqueror till the time of Zenghis Khan. (Herod. iii. 97; Heeren, *Ideen*, &c. vol. i. pt. 1. p. 148). He describes it as extending along the W. side of the Caspian Sea, and as the loftiest of mountains, and the greatest in

CAUCASIUS MONS. [PARNASSUS.]

CAUCHALENI. [Κουκαλήνοι], a people of Arabia Deserta, bordering on the Euphrates. (Ptol. v. 19.) [G. W.]

CAUCHI. [CHAUCI.]

CAUCI, a people on the eastern coast of Ireland. [illegible] as to the Menapii. For the difficulties connected with this juxtaposition, see MENAPII. [R. G. L.]

CAUCONES (Καύκωνες), are mentioned by Homer, along with the Leleges and Pelasgians, as auxiliaries of the Trojans. (*Il.* x. 429, xx. 329.) According to Strabo, they dwelt near the Mariandyni, upon the sea-coast of Bithynia and Paphlagonia, and had possession of the city Trium. The most different opinions prevailed respecting their origin; some supposing them to be Scythians, others Macedonians, and others again Pelasgians. (Strab. viii. p. 345, xii. p. 542.)

Digitized by Google

The Caucones are also mentioned among the most ancient inhabitants of Greece. (Strab. vii. p. 321.) as they disappeared in the historical period, little could be known respecting them; but according to the general opinion they were the most ancient inhabitants of that part of Peloponnesus, which was afterwards called Elis. Strabo says that they were a migratory Arcadian people, who settled in Elis, where they were divided into two principal tribes, of which one dwelt in Triphylia, and the other in Hollow Elis. The latter extended as far as Dyme in Achaia, in the neighbourhood of which there was a tributary of the Teutheas bearing the name of Caucon. (Strab. viii. pp. 342, 345, 353.) The Caucones in Triphylia are mentioned by Homer, and are called by Herodotus the Pylian Caucones. (Hom. Od. iii. 366; Herod. i. 147.) They were driven out of Triphylia by the Minyae. (Herod. iv. 148.)

CAUDI'NI, a tribe of the Samnites bordering upon Campania. The name is evidently connected with that of the town of Caudium, which must probably have been at one period the capital or chief city of the tribe. But it seems certain that the appellation was not confined to the citizens of Caudium and its immediate territory. Livy speaks in more than one passage of the Caudini as a tribe or people, in the same terms as of the Hirpini (Marcellus ab Nola crebras excursiones in agrum Hirpinum et Samnites Caudinos fecit, xxiii. 41; *Caudinus Samnis gravius devastatus*, Id. xxiv. 20), and Niebuhr supposes them to have been one of the four tribes of which the Samnite confederacy was composed. (Nieb. Vol. i. p. 107, vol. ii. p. 85.) This is, however, very doubtful, and it is remarkable that we find no mention of the Caudini as a separate tribe during the wars of the Romans with the Samnites. Perhaps, however, they were included as a matter of course, whenever the Samnites were mentioned, as their country must have been continually the scene of hostilities; and Velleius Paterculus (ii. 1) speaks of the Caudini as the people with whom the treaty was concluded by the Romans after their defeat at the Forks, where Livy uniformly talks of the *Samnites*. It is impossible to determine with any accuracy the limits of their territory: the great mountain mass of Mt. Taburnus, called by Gratius Faliscus (*Cyneget.* 509) "Caudinus Taburnus," was in the heart of it; and it is probable that it joined that of the Hirpini on the one side and of the Pentri on the other, while on the W. it bordered immediately on Campania. But the name is not recognised by any of the geographers as a general appellation, and appears to have fallen into disuse: the Caudini of Pliny (iii. 11. s. 16) are only the citizens of Caudium. [E. H. B.]

CAUDIUM (Καύδιον: *Eth.* Καυδῖνος, Caudinus), a city of Samnium, situated on the road from Beneventum to Capua. It seems probable that it was in early times a place of importance, and the capital or chief city of the tribe called the Caudini; but it bears only a secondary place in history. It is first mentioned during the Second Samnite War, B. C. 321, when the Samnite army under C. Pontius encamped there, previous to the great disaster of the Romans in the neighbouring pass known as the Caudine Forks (Liv. ix. 2); and again, a few years later, as the head-quarters occupied by the Samnites, with a view of being at hand to watch the movements of the Campanians. (Id. *ib.* 27.) The town of Caudium is not mentioned during the Second Punic War, though the tribe of the Caudini is repeatedly alluded to [CAUDINI]: Niebuhr supposes the city to have been destroyed by the Romans, in revenge for their great defeat in its neighbourhood; but there is no evidence for this. It reappears at a later period as a small town situated on the Appian Way, and apparently deriving its chief importance from the transit of travellers (Hor. *Sat.* i. 5. 51; Strab. v. p. 249): the same causes preserved it in existence down to the close of the Roman empire. (Ptol. iii. 1. § 67; *Itin. Ant.* p. 111; *Itin. Hier.* p. 610; *Tab. Peut.*) We learn that it received a colony of veterans; and it appears from Pliny, as well as from inscriptions, that it retained its municipal character, though deprived of a large portion of its territory in favour of the neighbouring city of Beneventum. (Plin. iii. 11. s. 16; Lib. Colon. p. 232; Orelli, *Inscr.* 128, 131.) The period of its destruction is unknown: the name is still found in the ninth century, but it is uncertain whether the town still existed at that time.

The position of Caudium is fixed by the Itineraries, which all concur in placing it on the Appian Way, 21 Roman miles from Capua, and 11 from Beneventum; and as the total distance thus given from Capua to Beneventum is perfectly correct, there can be no doubt that the division of it is so too. Yet Holstenius and almost all the Italian topographers have placed Caudium at *Arpaja*, which is less than 17 miles from Capua, as is proved by the discovery of the Roman milestone with the number xvi. a short distance from thence, on the road to Capua, as well as by the measurement of the distance. D'Anville is therefore certainly correct in placing the site of Caudium about 4 miles nearer Beneventum, between *Arpaja* and *Monte Sarchio*. It must have stood on or near the little river *Isclero;* though there are no ruins of it on the spot. *Arpaja*, the origin of which cannot be traced further back than the tenth century, probably arose, like so many other towns in Italy, in the stead of Caudium, when the latter was destroyed or abandoned by its inhabitants; which will account for its having been identified by tradition in early times with the latter city. (Holsten. *Not. in Cluver.* p. 267; Pellegrini, *Discorsi della Campania*, vol. i. p. 368; Romanelli, vol. iii. pp. 393—399; D'Anville, *Anal. Géog. de l'Italie*, p. 214—216.) The point is of importance from its connection with the much disputed question concerning the true position of the celebrated pass called the FURCULAE CAUDINAE* or Caudine Forks, the scene of one of the greatest disasters sustained by the Romans in the whole course of their history.

Livy's narrative of this celebrated event is the only one sufficiently detailed to throw any light upon the topographical question. He describes the place known as the Furculae Caudinae as a pass consisting of two narrow defiles or gorges (saltus duo alti, angusti, silvosique, — angustiae, ix. 2), united by a continuous range of mountains on each side, enclosing in the midst a tolerably spacious plain, with good grass and water. The Roman army, supposing the Samnites to be far distant, advanced incautiously through the first pass, but when they came to the second they found it blocked up with trees and stones, so as to be wholly impassable; and when they turned back and retraced their steps to the pass at the entrance of the valley, they found this similarly ob-

* This appears to be the correct form of the name, and is the only one found in prose writers: Lucan alone has "Furcae Caudinae" (ii. 137), for which Silius Italicus (viii. 566) employs "Caudinae Fauces."

Digitized by Google

structed: hereupon they abandoned themselves to despair, and after encamping in the valley between the two passes for some days, they were compelled by famine to surrender at discretion. (Liv. ix. 2—6.) The exaggeration of this account, so far as it represents the Romans as overcome by the difficulties of the ground alone, without even attempting to engage the enemy, is obvious; and Niebuhr has justly inferred that they must have sustained a defeat before they were thus shut up between the two passes. Cicero also twice alludes to the battle and defeat of the Romans at Caudium (Caudinum proelium, *de Sen.* 13; cum male pugnatum ad Caudium esset, *de Off.* iii. 30); but unless we are to reject Livy's account as wholly fabulous, we must suppose the enemy to have derived great advantage from the peculiarities of the locality; and the same thing is stated by all the other writers who have related, though more briefly, the same event. (Appian, *Samn.* Exc. 4; Flor. i. 16; Eutrop. ii. 9; Oros. iii. 15.)

An ancient tradition, which has been followed by almost all writers on this subject, represents the valley of *Arpaja*, on the high road from Capua to Beneventum, as the scene of the action; and the name of *Forchia*, a village about a mile from *Arpaja*, affords some confirmation to this view. But almost all travellers have remarked how little this valley accords with the description of Livy: it is, indeed, as Keppel Craven observes, "nothing more than an oblong plain, surrounded by heights which are scarcely sufficient to give it the name of a valley, and broken in several parts so as to admit paths and roads in various directions." There is a narrow defile near *Arienzo*, which might be supposed to be the one at the *entrance* of the valley, but there is no corresponding pass at the other extremity; nor is there any stream flowing through the valley. And so far from presenting any extraordinary obstacles to troops accustomed to warfare in the Apennines, there are perhaps few valleys in Samnium which would offer less. (Eustace, *Class. Tour*, vol. iii. p. 69—73, 8vo. edit.; Swinburne's *Travels*, vol. i. p. 421; K. Craven, *Southern Tour*, p. 11—12.)

To this it may be added that it appears very improbable that a pass described as so peculiar in its character should have lain on the Appian Way, and in the great high road from Capua to Beneventum, where it must have been traversed again and again, both by Roman and Samnite armies, without any subsequent allusion being made to it. During the Second Punic War, and again in the Social War, such a pass on the great highway must have been a military position of the highest importance; yet the name of the Furculae Caudinae is never mentioned in history, except on this single occasion.

On the other hand, another pass in the same neighbourhood has been pointed out by an intelligent traveller, which appears to answer well to Livy's description of the Caudine Forks. (See a dissertation by Mr. Gandy, in Craven's *Tour through the Southern Provinces of the K. of Naples*, pp. 12—20.) This is the narrow valley between *Sta Agata* and *Moirano*, on the line of road from the former place to *Benevento*, and traversed by the little river *Isclero*. As this valley meets that of *Arpaja* just about the point where Caudium must have been situated, according to the Itineraries, it would have an equal right to derive its name from that town. And it is a strong argument in its favour that it lay on the direct route from the Samnite Calatia (*Caiazzo*) to Caudium: for we have every reason to believe that the Calatia where the Roman army was encamped at the commencement of the campaign (Liv. ix. 2) was the *Samnite* city of the name, which is mentioned on several other occasions during these wars, and commands the valley of the Vulturnus in a manner that must have given it importance in a military point of view. Those writers, however, who regard the valley of *Arpaja* as that of the Caudine Forks necessarily suppose the Romans to have been advancing from the *Campanian* Calatia on the road to Capua. If the valley of the *Isclero* were really the scene of the disaster, it would account for our hearing no more of the Furculae Caudinae, as the difficult pass would for the future be carefully avoided by armies acquainted with the country taking the comparatively easy and open route from Capua to Beneventum, along which the Via Appia was afterwards carried, or else that from the Via Latina, by Allifae and Telesia, to the same city.

The only argument of any force in favour of the valley between *Arienzo* and *Arpaja*, is that derived from the tradition which gave to it the name of the *Valle Caudina*, as well as to an adjoining village that of *Furculae*, now corrupted into *Forchia*. This tradition is certainly very ancient, as the name of Furculae or Furclae is already found in documents of the ninth and tenth centuries; and it is therefore undoubtedly entitled to much weight; but its credibility must in this case be balanced against that of the narrative of Livy, which is wholly inconsistent with the valley in question. It is singular that all those authors who regard the valley of *Arpaja* as the scene of the events narrated by Livy, at the same time aggravate the inconsistency by admitting *Arpaja* itself to occupy the site of Caudium, though it is quite clear from Livy that the *town* of Caudium was not *in the pass*, which is represented as uninhabited and affording no provisions; and Caudium itself evidently continued in the hands of the Samnites both before and after the action. (Liv. ix. 2, 4; Appian. *Samn.* l. c.) The arguments in favour of the received opinion are fully given by Daniele (*Le Forche Caudine Illustrate*, 8vo. Napoli, 1811), as well as by Pellegrini (*Dissert.* vol. i. pp. 393—398), Romanelli (vol. ii. pp. 396—407), and Cramer (vol. ii. pp. 238—245). The same view is adopted by Niebuhr (vol. iii. p. 214), who was, however, apparently ignorant of the character of the valley of the *Isclero*, which may be said to have been brought to light by Mr. Gandy. Cluverius, who first suggested it as the site of the Furculae Caudinae, having misconceived the course of the Appian Way, and thus thrown the whole subject into confusion. Holstenius, on the contrary, supposes the valley beyond *Arpaja* on the road to *Benevento*, to be that of the Caudine Forks, a view still more untenable than the popular tradition. (Cluver. *Ital.* p. 1196; Holsten. *Not. in Cluv.* p. 269.) [E. H. B.]

CAUE (Καύη), a village, as Xenophon calls it (*Hellen.* iv. 1, § 20), in Asia Minor; but it is difficult to say even in what part it was, except that it was within the satrapy of Pharnabazus, and probably in Bithynia or Phrygia. [G. L.]

CAULARES. Livy (xxxviii. 15), in his history of the campaigns of Cn. Manlius in Asia, says that after leaving Cibyra he marched through the territory of the Sindenses, and having crossed the river Caulares, he encamped. On the next day he marched past the Lake Caralitis, and encamped at Magnesia. In Spratt's Lycia (vol. i. p. 249) this lake or swamp (palus) is identified with "a great expan-

Digitized by Google

of water choked with reeds and rushes." It is named in the map *Soo Ood Gusie*, and lies a little north of 37° N. lat. The position of Cibyra is fixed at *Horsoom*, on the upper part of the Indus in Lycia: and in marching past the north part of this swamp eastward from Cibyra, the Romans would cross a river which joins the Indus, a little below Cibyra. This river will certainly be the Caulares, if the palus is rightly identified, for it is less than a day's march from the swamp. [G. L.]

CAULO'NIA (Καυλών or Καυλωνία: *Eth.* Καυλωνιάτης), a city on the E. coast of Bruttium, between Locri and the Gulf of Scyllacium. All authors agree that it was a Greek colony of Achaean origin, but Strabo and Pausanias represent it as founded by Achaeans direct from the Peloponnese, and the latter author mentions Typhon of Aegium in Achaia as the leader or leader of the colony (Strab. vi. p. 261; Paus. vi. 3. § 12); while Scymnus Chius and Stephanus of Byzantium affirm that it was a colony of Crotona. (Scymn. Ch. 319; Steph. B. *s. v.* Αὐλών.) It is easy to reconcile both accounts; the Crotoniats, as in many similar cases, doubtless called in additional colonists from the mother-country. Virgil alludes to it as if it were already in existence *as a city* at the time of the Trojan War (*Aen.* iii. 552), but this is evidently a mere poetical license, like the mention of the Lacinian temple in the preceding line. Scylax and Polybius both mention it as one of the Greek cities on this part of the Italian coast. (Scyl. § 13, p. 5; Pol. x. 1.) We are told that its name was originally Aulonia (Αὐλωνία), from a deep valley or ravine (αὐλών), close to which it was situated (Strab. *l. c.*; Scymn. Ch. 320—322; Hecataeus, ap. Steph. B. *s. v.* Καυλωνία), and that this was subsequently altered into Caulonia: the change first, however, have taken place at a very early period, as all the coins of the city, many of which are very ancient, bear the name Caulonia.

We have very little information as to the early history of Caulonia: but we learn from Polybius that it participated in the disorders consequent on the expulsion of the Pythagoreans from Crotona and the neighbouring cities [CROTONA]; and was for some time agitated by civil dissensions, until at length tranquility having been restored by the intervention of the Achaeans, the three cities of Caulonia, Crotona and Sybaris, concluded a league together, and founded a temple to Zeus Homorius, to be a common place of meeting and deliberation. (Pol. ii. 39.) Aristoxenus also mentions Caulonia among the cities in which the Pythagorean sect had made great progress, and which were thrown into confusion by its sudden and violent suppression (Iambl. *Vit. Pyth.* §§ 252, 267); and, according to Porphyry (*Vit. Pyth.* § 56), it was the first place where Pythagoras himself sought refuge after his expulsion from Crotona. The league just mentioned was probably of very brief duration; but the part here assigned to Caulonia proves that it must have been at this time powerful and important city. Yet, with the exception of an incidental notice of its name in Thucydides (vii. 25), we hear no more of it until the time of the elder Dionysius, who in B. C. 389 invaded Magna Graecia with a large army, and laid siege to Caulonia. The Crotoniats and other Italian Greeks immediately assembled a large force, with which they advanced to the relief of the city: but they were met by Dionysius at the river Helorus or Helleporus, and totally defeated with great slaughter. (Diod. xiv. 103—105.) In consequence of this battle Caulonia was compelled to surrender to Dionysius, who removed the inhabitants from the city and established them at Syracuse, while he bestowed their territory upon his allies the Locrians. (*Ib.* 106.) The power of Caulonia was effectually broken by this disaster, and it never rose again to prosperity; but it did not cease to exist, being probably repeopled by the Locrians; as at the time of the landing of Dion in Sicily, we are told that the younger Dionysius was stationed at Caulonia with a fleet and army. (Plut. *Dion*, 26.) At a somewhat later period, during the wars of Pyrrhus in Italy, it was taken by a body of Campanian mercenaries in the Roman service, and utterly ruined. (Paus. vi. 3. § 12.) It is probably this event, to which Strabo also alludes when he says that Caulonia was laid desolate "by the barbarians" (vi. p. 261), though his addition that the inhabitants removed to Sicily would rather seem to refer to its former destruction by Dionysius. Both he and Pausanias evidently regard the city as having remained desolate ever after; but it appears again during the Second Punic War, on which occasion it followed the example of the Bruttians and declared in favour of Hannibal. An attempt was afterwards made to recover it by a Roman force, with auxiliaries from Rhegium, but the sudden arrival of Hannibal broke up the siege. (Liv. xxvii. 12, 15, 16; Plut. *Fab.* 22; Pol. x. 1.) We have no account of the occasion when it fell again into the hands of the Romans, nor of the treatment it met with: but there is little doubt that it was severely punished, in common with the rest of the Bruttians; and probably its final desolation must date from this period. Strabo tells us it was in his time quite deserted: and though the name is mentioned by Mela, Pliny speaks only of the "vestigia oppidi Caulonis," and Ptolemy omits it altogether. (Strab. *l. c.*; Mel. ii. 4; Plin. iii. 10. s. 15.) It must, however, have continued to exist, though in a decayed condition, as the name of Caulon is still found in the Tabula. (*Tab. Peut.*) An inscription, in which the name of the Cauloniatae is found as retaining their municipal condition under the reign of Trajan (Orelli, *Inscr.* 150), is of very doubtful authenticity.

The site of Caulonia is extremely uncertain: the names and distances given in this part of the Tabula are so corrupt as to afford little or no assistance. Strabo and Pliny both place it to the N. of the river Sagras, but unfortunately that river cannot be identified with any certainty. Many topographers place Caulonia at *Castel Vetere*, on a hill on the S. bank of the river *Alaro:* but those who identify the *Alaro* with the Sagras, naturally look for Caulonia N. of that river. Some ruins are said to exist on the left bank of the *Alaro*, near its mouth; but according to Swinburne these are of later date, and the remains of Caulonia have still to be discovered. (Barrio, *de Sit. Calabr.* iii. 14; Romanelli, vol. i. pp. 166, 168; Swinburne, *Travels*, vol. i. p. 339.) [E. H. B.]

CAUNII. [CARIA, CAUNUS.]

CAUNO'NIUM. [CANONIUM.]

CAUNUS (ἡ Καῦνος: *Eth.* Καύνιος and Καυνεύς), a city of Caria, in the Peraea. [CARIA.] Strabo (p. 651) places Caunus west of Calynda. Caunus had dockyards and a closed harbour, that is, a harbour that could be closed. Above the city, on a height, was the fort Imbrus. Diodorus (xx. 27) mentions two forts, Persicum and Heracleium. The country was fertile, but unhealthy in summer and autumn, owing to the air and the abundance of fruit, of which we must suppose the people ate too much, as the fruit alone could not cause unhealthiness. Strabo's description of the position is not clear. After mentioning Calynda, he says, "then Caunus, and a river near it, Calbis, deep, and having a navigable entrance, and between, Pisilis;" which means that Pisilis is between the Calbis and Caunus. It is clear, then, that Caunus, according to Strabo, is not on the Calbis, as it is represented in some maps. If the Calbis, which is the Indus, or the large river *Dalamon Tchy*, is east of Pisilis, it is of course still further east of Caunus. Caunus is placed in some maps a little distance south of a lake on a stream which flows from it, and four or five miles from the sea; but the river is usually incorrectly marked the Calbis. The site of Caunus is said to be now *Kaiguez*, or some similar name. But the ancient descriptions of the site of Caunus vary. Mela (i. 16) places Caunus on the Calbis. Ptolemy (v. 2) places it east of the Calbis, and his description of the coast of Caria is exact. But as he mentions no other river except the Calbis till we come to the Xanthus, he has omitted the *Dalamon Tchy*, unless this is his Calbis. Pliny (v. 28), who proceeds from east to west in his description of this part of the coast, mentions the great river Indus, supposed to be the Calbis, and then "Oppidum Caunus liberum." This confusion in the ancient authorities cannot be satisfactorily cleared by the aid of any modern authorities. This part of the coast seems to have been very imperfectly examined. Kiepert places Caunus on the west side of the entrance of Portus Panormus.

Herodotus (i. 172) says that the habits of the Caunii were very different from those of the Carians and other people. It was their fashion for men, women, and children to mingle in their entertainments. They had once some foreign deities among them, but they expelled them in singular fashion. The Caunii made a desperate resistance to the Persian general Harpagus, like their neighbours the Lycians. (Herod. i. 176.) The Caunii also joined the Ionians in their revolt against the Persians after the burning of Sardis, B. C. 499. (Herod. v. 103.) When Thucydides (i. 116) speaks of the expedition of Pericles to the parts about Caunus after the sea-fight at the island of Tragia (B. C. 440), he says, "he went towards Caria and Caunus," as if he did not consider Caunus to be included in Caria Proper. The place is mentioned several times in the eighth book of Thucydides, and in one passage (viii. 39) as a secure harbour against attack. As Caunus was in the Rhodian Peraea, it belonged to the Rhodians, but the islanders were not always able to hold it. There is a story recorded in Polybius (xxxi. 7) of the Rhodians having bought Caunus from the generals of Ptolemaeus for 200 talents; and they alleged that they had received, as a grant from Antiochus the son of Seleucus, Stratonicceia in Caria. Caunus was taken by Ptolemy in B. C. 309 (Diod. xx. 27), and the Rhodians may have bought it of him. A decree of the Roman senate ordered the Rhodians to take away their garrisons from Stratonicceia and Caunus (Polyb. xxx. 19.) This was in B. C. 167. (Liv. xlv. 25.) The Romans appear to have given Caunus, with other places in Caria, to the Rhodians, after the defeat of Antiochus in Asia. (Liv. xxxvii. 56.) For Appian says that in the massacre of the Romans in Asia, which was planned by Mithridates Eupator, "the Caunii, who had been made tributary to the Rhodians after the war with Antiochus (B. C. 190), and had been set free by the Romans not long before (B. C. 167), dragged out the Italians who had fled for refuge to the Roman Hestia, or the hearth of Vesta, in the senate house, and after murdering the children before the eyes of their mothers, they killed the mothers and the husbands on the dead bodies." (Appian. *Mithrid.* c. 23.) This dreadful massacre happened in B. C. 88; and Sulla, after defeating Mithridates, repaid the Carians by putting them again under their old masters the Rhodians. Strabo (p. 652) says that the Caunii once revolted from the Rhodians, and the case being heard by the Romans, they were brought back under the Rhodians; and there is an extant oration of Mucius against the Rhodians. Apollonius Molo was in Rome B. C. 81, as an ambassador from the Rhodians, and this seems to be the occasion to which Strabo refers (Cic. *Brut.* 90), and which is by some critics referred to the wrong time. Cicero (*ad Q. Fr.* i. 1. § 11) speaks of the Caunii as being still subject to the Rhodians in B. C. 59; but they had lately applied to the Romans to be released from the Rhodian dominion, and requested that they might pay their taxes to the Romans rather than to the Rhodians. Their prayer had not been listened to, as it seems, for they were still under the Rhodians. Therefore Cicero says lately (nuper) he may be speaking of the same event that Strabo mentions. When Pliny wrote, they had been released from the tyranny of the islanders, for he calls Caunus a free town.

Caunus was the birthplace of one great man, Protogenes the painter, who was a contemporary of Apelles, and therefore of the period of Alexander the Great; but he lived chiefly at Rhodes. Pliny (xxxv. 10) speaks of his birthplace as a city subject to the Rhodians; and though we cannot use this as historical evidence, Caunus may have been subject to the Rhodians at that time. Caunus was a place of considerable trade, and noted for its dried figs (Plin. xv. 19), a fruit that would not contribute to the unhealthiness of the place, even if the people ate them freely. They seem to have been carried to Italy, as we may infer from a story in Cicero (*de Divin.* ii. 40). [G. L.]

CAUSENNIS, in Britain, mentioned in the Itinerary, the difficulties of which are noticed under COLONIA and DUROBRIVIS. Being the first station south of Lindum, from which it is distant 12 miles, and Lindum (*Lincoln*) being one of the most certain identifications we have, it is safe to prefer Ancaster to Boston, Nottingham, and other localities as its present equivalent. The termination *-caster*, in the present existence of Roman remains, and even the syllable *An* (=caus-*Ennae castra*) all support this view. Besides which it stands upon the Car Dyke, which is a Roman one. [R. G. L.]

CAVARES, or CAVARI (Καούαροι, Καεσάριοι), a people of Gallia Narbonensis. Strabo (p. 186) says that the Volcae on the west bank of the Rhine have the Salyes and Cavari opposite to them on the east side.

Digitized by Google

and that the name of Cavari was given indeed to all the barbari in these parts, though they were in fact no longer barbari, but most of them had adopted the Roman language and way of living, and some had obtained the Roman citizenship. He says (p. 185), that as a man goes from Massalia (*Marseille*), into the interior, he comes to the country of the Salyes, which extends to the Druentia (*Durance*); and then having crossed the river at the ferry of Cabellio (*Cavaillon*), he enters the country of the Cavari, which extends along the river to the junction of the Rhone and the Isara (*Isère*), a distance of 700 stadia. But the extent which Strabo gives to the Cavari can only be considered correct by understanding him to comprehend other peoples under this name. The town of Valentia (*Valence*), which is south of the *Isère*, is placed by Ptolemy (ii. 10) in the country of the Segalauni, the Segovellauni of Pliny (iii. 4). Between the Segalauni and the Cavari most geographers place the Tricastini; and thus the territory of the Cavari is limited to the parts about *Cavaillon*, Avasio (*Avignon*), and Arausio (*Orange*); and perhaps we may add Carpentoracte (*Carpentras*), though this town is placed in the territory of the Memini [CARPENTORACTE]. But Ptolemy, who places the Cavari next to the Segalauni, assigns to them "Acusiorum Colonia," a place otherwise unknown. Walckenaer (*Geog. &c.* vol. ii. p. 209) endeavours to show, and with some good reason for his opinion, that the Acusiorum Colonia is *Montélimart* on the east bank of the Rhone, about half way between *Valence* and *Orange*, and that it is not another form or a corruption of Acunum, as D'Anville supposes. Accordingly, the Cavari would extend from the entrance to *Montélimart* at least. If this is right, the Tricastini are wrongly placed by D'Anville along the Rhone between the Segalauni and the Cavares; for they are east of the Segalauni [TRICASTINI]. Pliny (iii. 4), however, places Valentia in the territory of the Cavares, though it has been proposed to make him say something else by a different pointing of his text, the result of which is that Valentia is not placed anywhere, or, if it is, it is placed in the territory of the Allobroges, which is false. [G.L.]

CAVII, a people in Greek Illyria, between the rivers Panyasus and Gennusus. (Liv. xliv. 30.)

CAYSTER, CAYSTRUS (Καΰστρος, and Καΰστρος, Hom. *Il.* ii. 461; *Kara-Su* and *Kutschuk Meander*, or *Little Maeander*), a river of Lydia, which runs between the basin of the Hermus on the north, and that of the Maeander on the south. The basin of the Cayster is much smaller than that of either of these rivers, for the Cogamus, a southern branch of the Hermus, approaches very near the Maeander, and thus these two rivers and the high lands to the west of the Cogamus completely surround the basin of the Cayster. The direct distance from the source of the Cayster to its mouth is not more than seventy miles, but the windings of the river make the whole length of course considerably more.

The southern boundary of the basin of the Cayster is the Messogis or *Kestane Dagh*. The road which led from Physcus in Caria [CARIA] to the Maeander, was continued from the Maeander to Tralles; from Tralles down the valley of the Maeander to Magnesia; and from Magnesia over the hills to Ephesus by the valley of the Cayster. From Magnesia to Ephesus the distance was 120 stadia (Strab. p. 613). The northern boundary of the basin of the Cayster is the magnificent range of Tmolus or *Kisel Mesa Tagh*, over the western or lower part of which runs the road (320 stadia) from Ephesus to Smyrna. Strabo's notice of the Cayster is very imperfect. According to Pliny the high lands in which it rises are the "Cilbiana juga" (v. 29), which must be between the sources of the Cayster and the valley of the Cogamus. The Cayster receives a large body of water from the Cilbian hills, and the slopes of Messogis and Tmolus. Pliny seems to mean to say that it receives many streams, but they must have a short course, and can only be the channels by which the waters descend from the mountain slopes that shut in this contracted river basin. Pliny names one stream, Phyrites (in Harduin's text), a small river that is crossed on the road from Ephesus to Smyrna, and joins the Cayster on the right bank ten or twelve miles above Aiasaluck, near the site of Ephesus. Pliny mentions a "stagnum Pegaseum, which sends forth the Phyrites," and this marsh seems to be the morass on the road from Smyrna to Ephesus, into which the Phyrites flows, and out of which it comes a considerable stream. The upper valley of the Cayster contained the Cilbiani Superiores and Inferiores: the lower or wider part was the Caystrian plain. It appears that these natural divisions determined in some measure the political divisions of the valley, and the Caystriani, and the Lower and Upper Cilbiani, had each their several mints. (Leake, *Asia Minor*, &c. p. 257.) The lower valley of the Cayster is a wide flat, and the alluvial soil, instead of being skirted by a range of lower hills, as it is in the valleys of the Hermus and the Maeander, "abuts at once on the steep limestone mountains by which it is bounded." (Hamilton, *Asia Minor*, &c. vol. i. p. 541.) After heavy rains the Cayster rises suddenly, and floods the lower plains. The immense quantity of earth brought down by it was a phenomenon that did not escape the observation of the Greeks, who observed that the earth which was brought down raised the plain of the Cayster, and in fact had made it. (Strab. p. 691.) The alluvium of the river damaged the harbour of Ephesus, which was at the mouth of the river. [EPHESUS.]

The flat swampy level at the mouth of the Cayster appears to be the Asian plain (Ἄσιος λειμών) of Homer (*Il.* ii. 461), a resort of wild fowl. (Comp. Virg. *Georg.* i. 383, *Aen.* vii. 699.) Except Ephesus, the valley of the Cayster contained no great town. Strabo (p. 627) mentions Hypaepa on the slope of Tmolus, on the descent to the plain of the Cayster. It was of course north of the river. The ruins at *Tyria* or *Tyre*, near the river, and about the middle of its course, must represent some ancient city. Metropolis seems to lie near the road from Ephesus to Smyrna, and in the plain of the Phyrites; and the modern name of *Tourbali* is supposed to be a corruption of Metropolis. (Hamilton.) [G.L.]

CAYSTRI CAMPUS (τὸ Καΰστρου πεδίον) is Strabo's name for the plain of the Cayster. Stephanus (*s. v.* Καΰστριον πεδίον) assigns it to the Ephesia or territory of Ephesus, with the absurd remark that the Cayster, from which it takes its name, was so called from its proximity to the Catacecaumene or Burnt Region. Stephanus adds the Ethnic name Καϋστριανός; but this belongs properly to the people of some place, as there are medals with the legend Καυστριανων.

Xenophon, in his march of Cyrus from Sardis (*Anab.* i. 2. § 11), speaks of a Καΰστρου πεδίον. Before coming here, Cyrus passed through Celaenae, Peltae, and Ceramon Agora. The march from Celaenae to Peltae is 10 parasangs; from Peltae to

Digitized by Google

Ceramon Agora, 12 parasangs; and from Ceramon Agora to the plain of Cayster, which Xenophon calls an inhabited city, was 30 parasangs. From the plain of Cayster, Cyrus marched 10 parasangs to Thymbrium, then 10 to Tyraeum, and then 20 to Iconium, the last city of Phrygia in the direction of his march; for after leaving Iconium, he entered Cappadocia. Iconium is *Konijeh*, a position well known. Celaenae is also well known, being at *Deenair*, on the Maeander. Now the march of Cyrus from Celaenae to Iconium was 92 parasangs, or 2760 stadia, according to Greek computation, if the numbers are right in the Greek text. Cyrus, therefore, did not march direct from Celaenae to Iconium. He made a great bend to the north, for the Ceramon Agora was the nearest town in Phrygia to Mysia. The direct distance from Celaenae to Iconium is about 125 English miles. The distance by the route of Cyrus was 276 geog. miles, if the Greek value of the parasang is true, as given by Xenophon and Herodotus; but it may be less.

The supposition that the plain of Cayster is the plain through which the Cayster flows cannot be admitted; and as Cyrus seems for some reason to have directed his march northwards from Celaenae till he came near the borders of Mysia, his route to Iconium would be greatly lengthened. Two recent attempts have been made to fix the places between Celaenae and Iconium, one by Mr. Hamilton (*Researches*, &c., vol. ii. p. 198, &c.), and another by Mr. Ainsworth (*Travels in the Track of the Ten Thousand, &c.*, p. 24, &c.). The examination of these two explanations cannot be made here for want of space. But it is impossible to identify with certainty positions on a line of road where distances only are given, and we find no corresponding names to guide us. Mr. Hamilton supposes that the Caystri Campus may be near the village of *Chai Kieui*, "and near the banks of the *Eber Ghieul* in the extensive plain between that village and Polybotum." *Chai Kieui* is in about 38° 40′ N. lat. Mr. Ainsworth places the Caystri Campus further west at a place called *Surmeneh*, "a high and arid upland, as its ancient name designates," which is traversed by an insignificant tributary to the "*Eber Göl*," Mr. Hamilton's *Eber Ghieul*. The neighbourhood of *Surmeneh* abounds in ancient remains; but *Chai Kieui* is an insignificant place, without ruins. Both Mr. Hamilton and Mr. Ainsworth, however, agree in fixing the Caystri Campus in the basin of this river, the *Eber Ghieul*, and so far the conclusion may be accepted as probable. But the exact site of the place cannot be determined without further evidence. Cyrus stayed at Caystri Campus five days, and he certainly would not stay with his troops five days in a high and arid upland. As the plain was called the Plain of Cayster, we may assume that there was a river Cayster where Cyrus halted. One of Mr. Ainsworth's objections to Mr. Hamilton's conclusion is altogether unfounded. He says that the plain which Mr. Hamilton chooses as the site of the Caystri Campus is "an extensive plain, but very marshy, being in one part occupied by a perpetual and large lake, called *Eber Göl*, and most unlikely at any season of the year to present the arid and burnt appearance which could have led the Greeks to call it Caustron or Caystrus, the burnt or barren plain." But the word Caystrus could not mean burnt, and Stephanus is guilty of originating this mistake. It means no more a burnt plain here than it does when applied to the plain above Ephesus. Both were watery places; one we know to be so; and the other we may with great probability conclude to be. The medals with the epigraph **Καυστριανων** may belong to this plain and not to a city in the valley of the Lydian Caystrus. [CAYSTER.] [G. L.]

CA'ZECA (**Καζέκα**, Arrian. *Peripl.* p. 20; Anon. *Peripl.* p. 5), a town of the Cimmerian Bosporus, 280 stadia from Theodosia, which has been identified with *Tasch-Katschik*. (Köler, *Mem. de l'Acad. de St. Petersb.* vol. ix. p. 670; Marigny, Tableau Physique *de la Mer Noire*, p. 71; Pallas, *Reise in d. Süd. Statthalt Russlands*, vol. ii. p. 341.) [E. B. J.]

CEBA, a town of Liguria, mentioned by Pliny (xi. 42. s. 97) as celebrated for its cheeses, is evidently the modern *Ceva*, in the upper valley of the *Tanaro*, on the N. slope of the Apennines, near their junction with the Maritime Alps. [E. H. B.]

CEBENNA MONS, or CEVENNA, as it is generally written in the editions of Caesar (*B. G.* vii. 8; also called Gebenna, Plin. iii. 4; Cebennici Montes, Mela, ii. 5; **τὸ Κέμμενον ὄρος**, Strab. p. 177; **τὰ Κέμμενα ὄρη**, Ptol. ii. 8; and **ἡ Κεμμένη**, Strab. p. 177: *Cévennes*), a range of mountains in Southern Gallia which bounds the lower valley of the Rhone on the west, and separated Gallia Narbonensis from the rest part of Gallia, which is to the west and north-west. Strabo describes the Cebenna as running in a direction at right angles to the Pyrenees, through the great country of Gallia, and terminating about the middle of the plain country near Lugdunum (*Lyon*). He makes the length 2000 stadia, or 250 Roman miles. He does not say that it is connected with the Pyrenees, as some modern writers misunderstand him, for he knew that there was an easy road from Narbonne by the valley of the Atax (*Aude*) to Tolosa, in the valley of the *Garonne*, and to the western ocean. This road is in the depression in which the canal of *Languedoc* is made. He says that the Cebenna approaches nearest to the Rhone at the part which is opposite to the junction of the Rhone and the Isara (*Isère*). Perhaps, however, he includes the high lands south of the valley of the *Aude*, which belong to the Pyrenees, in the name Cebenna, for he mentions in order from S. to N. the rivers Atax, Obris or Orbis (*Orb*), and Araura, the Araxis or Araris (*Hérault*), as flowing from the Cebenna into Gallia Narbonensis. He correctly describes the Ilerberis (*Tech*) and Ruscino (*Tet*), which are south of the valley of the *Aude* as flowing from the Pyrenees, but the *Aude* also has its sources in the Pyrenees. He had not, however, a very exact notion of the relative position of the Pyrenees and the Cebenna. He correctly describes the offsets or lower parts (**ὑπάρειαι**) of the Cebenna as extending eastward towards the Rhone. The high mountain Lozère (*La Lozère*, in the department of *Lozère*) is mentioned by Pliny, as a district famed for its cheese (xi. 42).

When Caesar commenced his winter campaign B.C. 52, he crossed the Cebenna from Gallia Narbonensis, then called the Provincia. He describes the Cebenna as separating the Helvii, who were in the Provincia, from the Arverni, who were on the west side of the mountains. He cut his way through snow six feet deep and surprised the Arverni who thought that the Cebenna protected them like a wall (*B. G.* vii. 8.) The steep side of this rugged range is turned towards the valley of the Rhone. The Gallic tribes on the east side of the Cebenna in the Roman Provincia were the Helvii and the Volcae Tectosages. On the west side were the Vellavi and

Digitized by Google

Gabali, the chief part of whose territory was in the mountain region of the Cebenna; for the Gabali whom Caesar does not mention (*B. G.* vii. 8) were between the Helvii and the Arverni. South of the Arverni, on the west side of the Cebenna and in the basin of the *Garonne*, were the Ruteni, the southern part of whose territory, even in Caesar's time, was within the limits of the Roman Provincia.

The extent of the mountainous country comprehended under the name *Cévennes* is much less than the Cebenna of Strabo. The direct distance from the most southern source of the *Orb* to *La Lozère* (4890 ft. high), is about 80 miles. The sources of the *Allier*, a branch of the *Loire*, and of the *Lot* and the *Tarn*, branches of the *Garonne*, are in the mountain regions of the *Lozère*. The direct distance from *La Lozère* to *Mont Mezene*, which is as far north perhaps as we can extend the name of *Cévennes*, is about 45 miles. *Mont Mezene* (5820 feet high), near which are the sources of the *Loire*, is nearly in the latitude of the junction of the *Rhone* and the *Saône*, where Strabo states that the Cebenna approaches nearest to the Rhone. It is true that this part of the *Cévennes* is nearer to the *Rhone* than any part of the range to the south of it, for the direction of the range is from SW. to NE.; but Strabo, as already observed, makes the Cebenna extend further north to the latitude of *Lyon*. [G. L.]

CEBRE'NE (Κεβρήνη) or CEBREN, a town of Troas, in a district Cebrenia (Κεβρηνία) There was a river Cebren (Κέβρην). The Ethnic names are Κεβρηνός, Κεβρηνεύς, and Κεβρήνιος (Steph. *s. v.* Κεβρηνία); but the Ethnic name is properly Κεβρενεύς, as Strabo has it. Cebrenia was below Dardania, and a plain country for the most part. It was separated from the Scepsia or territory of Scepsis by the river Scamander. The people of Scepsis and the Cebrenii were always quarrelling, Antigonus removed both of them to his new town Antigonia, afterwards called Alexandria Troas. The Cebrenii remained there; but the Scepsii obtained permission from Lysimachus to go home again. Strabo speaks of a tribe in Thrace called Cebrenii (p. 590), near a river Arisbus; but we cannot conclude any thing from this as to the origin of the Cebrenii. Ephorus, in the first book of his history (quoted by Harpocrat. *s. v.* Κέβρηνα), says that the Aeolians of Cumae sent a colony to Cebrene. The city Cebren surrendered to Dercyllidas the Lacedaemonian (Xen. *Hell.* iii. 1. § 17), who marched from thence against Scepsis and Gergitha. Geographers have differed as to the position of Cebrene. Palaescepsis was near the banks of the Aesepus, and the Scepsis of Strabo's time was 40 stadia lower down than Old Scepsis. Now, Old Scepsis was higher up than Cebrenia, near the highest part of Ida, and its territory extended to the Scamander, where Cebrenia began. Again, the territory of the Assii and the Gargareis was bounded by Dardania (on the east), and the territory of the Neandrii, the Neandreis, and the Hamaxiteis. Thus Cebrenia is brought within tolerably definite limits. Leake (*Asia Minor*, p. 274) supposes Cebrenia to have occupied the higher region of Ida on the west, and its plain to be the fine valley of the *Mendere* as far down as *Ene*, probably Neandria. This seems to agree with Strabo's description. Leake also supposes that the town Cebren may be a place called *Dumanlı Tepe*, not far from *Baramitsh*. Dr. E. D. Clarke found considerable remains at *Kushumlu Tepe*; but remains alone do not identify a site. [G. L.]

CEBRUS. [Ciabrus and Cibrus.]

CECILIONI'CUM (*Itin. Ant.* p. 434; *VR.* Caecilio Vico: *Bannos*), a town of Lusitania, only mentioned in the Itinerary, as on the great road from Emerita to Caesaraugusta, 132 M. P. from the former; but remarkable also on account of the preservation in its neighbourhood of portions of the Roman road, with some of the milestones, on one of which the number CXXXI. is legible. (Laborde, vol. ii. p. 251; Ukert, vol. ii. pt. i. p. 430.) [P. S.]

CECRO'PIA. [Athenae, p. 257, a.]

CECRYPHALEIA (Κεκρυφάλεια; Cecryphalos, Plin.: *Kyra*), a small island in the Saronic gulf, between Aegina and the coast of Epidaurus, near which the Aeginetans were defeated by the Corinthians, about B. C. 458. (Thuc. i. 105; Diod. xi. 78; Plin. iv. 12. s. 19; Steph. B. *s. v.*; Boblaye, *Recherches*, &c. p. 63.)

CE'DREAE (Κέδρεαι, Κεδρειαί: *Eth.* Κεδρεάτης. Κεδραῖος), a city of Caria, mentioned by Hecataeus. (Steph. *s. v.* Κέδρεαι.) Lysander took the place, it being in alliance with the Athenians. The inhabitants were μιξοβάρβαροι, a mixture of Greeks and barbarians, as we may suppose. It was on the Ceramicus gulf in Caria; but the site is unknown. (Xen. *Hell.* ii. 1. § 15.) [G. L.]

CEDREI, an Arab tribe, mentioned by Pliny (v. 11), who places them on the confines of Arabia Petraea, to the south, which would correspond with the northern part of the modern district of the *Hedjaz*. Mr. Forster identifies them with the Canraitae or Cadraitae of Arrian, the Cerdanitae or Cedranitae of Stephanus, and the Darrae of Ptolemy, and traces their origin to Cedar, the Ishmaelite Patriarch (*Gen.* xxv. 13), represented by the modern Harb nation, and the modern town of *Kedeyre*. (Forster, *Arabia*, vol. i. pp. 75, 234, seq., 238, seq.) [G. W.]

CEDRISUS (Κεδρισός, Dicaearch. 128; Κέδριος, Theophrast. *Hist. Plant.* iii. 8. § 5: *Kentros*), a mountain of Crete, which forms the SW. spur of Mt. Ida. (Sieber, *Reise*, vol. ii. p. 14; Hoeck, *Kreta*, vol. i. p. 5.) [E. B. J.]

CELADUSSAE, a group of islands off the coast of Liburnia in Illyricum (Plin. iii. 26. s. 30), perhaps the same as the Dyscelados of Mela (ii. 7). Some writers, however, suppose that there were no islands or island of this name: that the name Celadussae in Pliny is a corruption of Dyscelados in Mela; and that the latter is invented from an epithet of Issa in a line of Apollonius Ἴσσά τε δυσκέλαδός τε καὶ ἱμερτὴ Πιτύεια, Apoll. Rhod. iv. 565).

CELAENAE (Κελαιναί: *Eth.* Κελαινεύς), a city of Phrygia. Strabo (p. 577) says that the Maeander rises in a hill Celaenae, on which there was a city of the same name as the hill, the inhabitants of which were removed to Apameia. [Apameia, No. 5.] Hamilton, who visited the source (*Researches*, &c. vol. i. p. 499), says that "at the base of a rocky cliff a considerable stream of water gushes out with great rapidity." This source of the Marsyas, and the cliff above it, may have been within the city of Celaenae; but it did not appear to Hamilton that this cliff could be the acropolis of Celaenae which Alexander considered to be impregnable (Arrian, *Anab.* i. 29; Curt. iii. 1), and came to terms with the inhabitants. He supposes that the acropolis may have been further to the NE., a lofty hill about a mile from the ravine of the Marsyas (vol. ii. p. 366).

Herodotus speaks of Celaenae in describing the march of Xerxes to Sardis (B. C. 481). He says (vii. 26) that the sources of the Maeander are here,

Digitized by Google

and those of a stream not less than the Maeander: it is named Catarrhactes, and, rising in the Agora of Celaenae, flows into the Maeander. Xenophon, in describing the march of Cyrus (*Anab.* i. 2. § 7), says that Cyrus had a palace at Celaenae, and a large park, full of wild animals; the Maeander flowed through the park, and also through the city, its source being in the palace. There was also a palace of the Persian king at Celaenae, a strong place, at the source of the Marsyas, under the acropolis; and the Marsyas also flows through the city, and joins the Maeander. The sources of the Marsyas were in a cave, and the width of the river was 25 feet; within Celaenae perhaps he means. The Catarrhactes of Herodotus is clearly the Marsyas of Xenophon, and the stream which Hamilton describes, who adds, "it appeared as if it had formerly risen in the centre of a great cavern, and that the surrounding rocks had fallen in from the cliffs above." The descriptions of Herodotus and Xenophon, though not the same, are perhaps not inconsistent. The town, palaces, acropolis, and parks of Celaenae must have occupied a large surface. In Livy's description (xxxviii. 13), the Maeander rises in the acropolis of Celaenae, and runs through the middle of the city; and the Marsyas, which rises not far from the sources of the Maeander, joins the Maeander. When the people of Celaenae were removed to the neighbouring site of Apameia Cibotus, they probably took the materials of the old town with them. Strabo's description of the position of Apameia is not free from difficulty. Leake thinks that it clearly appears from Strabo that both the rivers (Marsyas and Maeander) ran through Celaenae, and that they united in the suburb, which afterwards became the new city Apameia. It is certain that Celaenae was near Apameia, the site of which is well fixed. [APAMEIA, No. 5.]

It was an unlucky guess of Strabo (p. 579), and a bad piece of etymology, to suggest that Celaenae might take its name from the dark colour of the rocks, in consequence of their being burnt. But Hamilton observed that all the rocks are, "without exception, of a greyish white or cream-coloured limestone." The rock which overhangs the sources of the Marsyas contains many nummulites, and broken fragments of other bivalve shells. [G. L.]

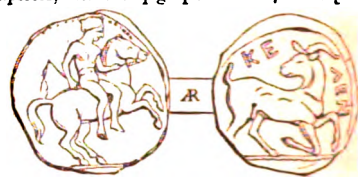
CELAENUS TUMULUS (Κελαινὸς λόφος), a mountain in Galatia, mentioned by Ptolemy (v. 4), south of Pessinus, probably. [G. L.]

CE'LEAE. [PHLIUS.]

CELEIA or CALEIA (Κέλεια), an important city in the south-eastern corner of Noricum (Ptol. ii. 14. § 3; Plin. iii. 27). In some inscriptions it is called a Roman colony by the name of Caleia Claudia (Orelli, *Inscript.* n. 501), and in others a municipium (Orelli, *l. c.* n. 3020). During the middle ages Celeia was the chief town of a Slavonian district called Zellia (Paul. Diac. iv. 40); and it still bears the name of *Cilly*, and is rich in ancient architectural remains. (Comp. Itin. Anton. p. 129; Itin. Hieros. p. 560; Muchar, *Noricum*, vol. i. p. 161.) [L. S.]

CELE'NDERIS (Κελενδερίς: *Eth.* Κελενδερίτης: *Chelendreh*), a town of Pamphylia, on the coast. The tradition was that it was a Phoenician settlement, which was afterwards occupied by the Samians. (Mela, i. 13.) There was a temple of Juno near the town, and a river Is, which flowed by them to the sea. (Scymnus, quoted by Herodian.) It is described by Tacitus (*Ann.* ii. 80) as a very strong place, on a high rock nearly surrounded by the sea. Piso attempted to take it. Celenderis had a fort (Strab. p. 670); and Artemidorus, with other geographers, considered this place, and not Corycesium, as the commencement of Cilicia.

Chelendreh has "a snug but very small port, from whence the couriers from Constantinople to Cyprus embark." (Beaufort, *Karamania*, p. 209.) The Turks call it *Gulnar*. None of the remains of Celenderis appear to be older than the early period of the Roman empire. The town "gave name to a region called Celenderitis (Plin. v. 27), and coined those silver tetradrachms, which supply some of the earliest and finest specimens of the numismatic art." (Leake, *Asia Minor*, &c. p. 116.) There are also coins of the Syrian kings, and of the later Roman emperors, with the epigraph Κελενδερίτων. [G. L.]



COIN OF CELENDERIS.

CELENNA, a town of Campania, mentioned only by Virgil (*Aen.* vii. 739) who appears to place it (in conjunction with Rufrae and Batulum) on the borders of the Campanian plain. Servius (*ad loc.*) says "locus est Campaniae, sacer Junoni." We find no other mention of it, and its situation is unknown. [E. H. B.]

CELETRUM (*Kastoriá*), a town of Orestis in Macedonia, situated on a peninsula which is surrounded by the waters of a lake, and has only a single entrance over a narrow isthmus which connects it with the continent. In the first Macedonian campaign of the Romans, in B. C. 200, the consul Sulpicius, after having invested this place, which submitted to him, returned to Dassaretia, and from thence regained Apollonia, the place from which he had departed on this expedition. (Liv. xxxi. 40.) The position is so remarkable that there is no difficulty in identifying it with the modern fortress of *Kastoriá*. The lake, which bears the same name, is about six miles long and four broad. The peninsula is nearly four miles in circumference, and the outer point is not far from the centre of the lake. The present fortification of *Kastoriá* consists only of a wall across the W. extremity of the isthmus, which was built in the time of the Byzantine empire, and has a wet ditch, making the peninsula an island. In the middle of the wall stands a square tower, through which is the only entrance to the town. The ruins of a parallel wall flanked with round towers, which in Byzantine times crossed the peninsula from shore to shore, excluding all the E. part of it, still divide the Turkish and Greek quarters of the town. In A. D. 1084 Alexis I. took Castoria (Καστορία), which was defended by the brave and faithful Bryennius. (Anna Comn. *Alexias*, vi. p. 152; Le Beau, *Bas Empire*, vol. xv. p. 153.) The accurate description of Castoria, as Colonel Leake (vol. i. p. 329) remarks, by Anna Comnena (*l. c.*) shows that no great change has occurred since that time. Forbiger (vol. iii. p. 1060) supposes that one of the numerous towns which derived their name from Diocletian [DIOCLETIANOPOLIS] afterwards stood upon the site of Celetrum, but the positions given by Procopius (*Aed.* iv. 3), and the

Digitized by Google

Itineraries, to Diocletianopolis are at variance with this statement. On the other hand, Celetrum has been identified with the Κελαινίδιον of Hierocles. (Wesseling *ap. loc.*; Leake, *Northern Greece*, vol. iii. p. 330, vol. iv. p. 121.) [E. B. J.]

CELLAE (Κέλλη, Hierocl.: *Ostrovo*), a town of Macedonia Consularis, and a station on the Via Egnatia in Eordaea, between Heracleia and Edessa (*Peut. Tab.*), at a distance of 28 M. P. from the latter place, according to the Jerusalem Itinerary and that of Antoninus. [E. B. J.]

CELNIUS (Κέλνιος), in Britain, mentioned by Ptolemy (ii. 3. § 5), between the Tuasis aestuary (Τοῦασις ἐξχυσις) and the Taezalum Promontory. The former of these is next in order southwards to the Varar aestuary (*Murray Firth*), the latter is to the north of the Deva (*Dee*). Hence the *Spey* is the likeliest equivalent to the Celnius. [R. G. L.]

CELSA (Κέλσα: Celsensis: Ru. at *Velilla* near *Xelsa*), a city of the Ilergetes, in Hispania Tarraconensis, on the Iberus, which was here crossed by a stone bridge, ruins of which still remain. Under the Romans, it was a colony, with the surname *Victrix Julia*, and it belonged to the conventus of Caesaraugusta. Several of its coins are extant, belonging to the reigns of Augustus and Tiberius. (Strab. iii. p. 161; Plin. iii. 3. s. 4; Ptol. ii. 6. § 68; Marca, *Hisp.* ii. 28; Florez, *Esp. S.* vol. xxx. p. 39, *Med. de Esp.* vol. i. p. 349, vol. ii. p. 638, vol. iii. p. 45; Sestinet, vol. i. p. 37, Suppl. vol. i. p. 75; Eckhel, *D. N.* vol. i. pp. 44, foll.) [P. S.]

CELTAE. [GALLIA.]

CELTIBERIA (Κελτιβηρία, Polyb., Strab., App., Liv. &c.: *Eth.* Celtiber, pl. Celtiberi, Κελτίβηρες), was the name of a large inland district of Spain, comprising the central plateau (*media inter Hiberum*, Liv. xxviii. 1), which divides the basin of the Iberus (*Ebro*) from the rivers flowing to the W., and corresponding to the SW. half of *Aragon*, nearly the whole of *Cuenca* and *Soria*, and a great part of *Burgos*. These were about the limits of Celtiberia Proper; but, the name was used in a much wider sense, through the power which the Celtiberians obtained over the surrounding tribes; so that, for example, Polybius made it extend beyond the sources of the Anas (*Guadiana*) even to those of the Baetis (*Guadalquivir*: Strab. iii. p. 148), while he mentions the mountain range which reaches the sea above Saguntum, as the boundary of Iberia and Celtiberia. (Polyb. iii. 17. § 2.) So we find Dianium (Hemeroscopium on the Pr. Dianium (*C. S. Martin*), and CASTULO on the Baetis, named as in Celtiberia. (Artemidor. ap. Steph. B. *s. v.* Ἡμεροσκόπιον; Plut. *Sertor.* 3.) In fact, it would seem that, under the Romans, Celtiberia was often used as a term equivalent to Hispania Citerior (excepting, perhaps, the NE. part, between the Pyrenees and the Ebro), and that, as the boundaries of the latter were extended, so was the signification of the former. (Plin. iv. 21. s. 36; Solin. 23; Salmas. *ad Solin.* p. 197; Ukert, vol. ii. pt. 1. p. 305.)

The Celtiberians were believed to have originated from a union of the indigenous Iberians with Celts from Gaul, who were the earliest foreign invaders of the peninsula, and whose union gave rise to a nation distinguished by the best qualities of both peoples, and which speedily became great and powerful. (Diod. 5. 33; Strab. i. p. 33, iii. pp. 158, 162; Appian. *Hisp.* 2. Lucan. iv. 9:—

"Profugique a gente vetusta
Gallorum Celtae miscentes nomen Iberis:"

comp. CELTICI; and, on the whole subject, see HISPANIA.)

Strabo (iii. p. 162) describes their country as commencing on the SW. side of M. IDUBEDA, which divided it from the basin of the *Ebro*. It was large and irregular, the greater part of it being rugged and intersected with rivers; for it contained the sources of all the great rivers which flow W. across the peninsula, the ANAS, TAGUS, and DURIUS, except the BAETIS, and this too, as we have seen, is assigned by Polybius to Celtiberia. The Celtiberi were bounded on the N. by the BERONES and the Bardyitae or VARDULI; on the W. by some of the ASTURES, Callaïci [GALLAECI], VACCAEI, VETTONES, and CARPETANI; on the S. by the ORETANI and by those of the BASTETANI and EDETANI who inhabit M. OROSPEDA; and on the E. by M. IDUBEDA. This description applies to the Celtiberi in the widest sense of the name. They were divided, he adds, into four tribes, of whom he only mentions two, the AREVACAE, who were the most powerful, and the LUSONES. Pliny (iii. 3. s. 4) mentions, as Celtiberians, first the Arevacae (*Celtiberi Arevacae*), and afterwards the PELENDONES (*Pelendones Celtiberorum, quatuor populis, quorum Numantini clari*: where it is doubtful whether the *IV. populis* refers to *Pelendones* or *Celtiberorum*: if to the former, he disagrees with Strabo and others, who assign Numantia to the Arevacae). The BELLI and the TITTI (or Dittani) are also mentioned as Celtiberian peoples (Polyb. xxxv. 2; Appian. *Hisp.* 44). Ptolemy uses the name in a narrower sense: his Celtiberi are bounded on the N. by the Arevacae (whom he places S. of the Pelendones and Berones), on the W. by the Carpetani, on the S. by the Oretani, and on the E. by the Lobetani and Edetani.

The nature of the country and the habits of the people combined to prevent their having many considerable cities: and on this ground Strabo charges Polybius with gross exaggeration in stating that Tiberius Gracchus destroyed 300 cities of the Celtiberians (xxvi. 4), a number which could only be made up by counting every petty fort taken in the war (Strab. iii. p. 163). The chief cities, besides NUMANTIA, SEGEDA, and PALLANTIA, and others which belonged to the AREVACAE, BERONES, and PELENDONES, were the following:—The capital was SEGOBRIGA, which some identify with the Segeda just named, and with the Segestica of Livy (xxxiv. 17). On the great road which ran W. from Caesaraugusta (*Zaragoza*) to Asturica (*Itin. Ant.* pp. 442, 443), were: 37 M. P., CARAVIS; 18 M. P. TURIASO (Τουριασώ, Ptol. *l. c.*, *Tarazona*); and, on a branch road from Turiaso to Caesaraugusta were: 20 M. P. from the former BALSIO or Belliso (comp. *Itin.* p. 451: at or near *Boria*); and, 20 M. P. from Balsio, and 16 from Caesaraugusta, ALLOBON or Alavona (Ἀλλαβῶνα: *Alagon*, Ptol. ii. 6. § 67), which Ptolemy assigns to the Vascones. On the road leading SW. from Caesaraugusta to Toletum and Emerita were: 16 M. P. from Caesaraugusta, SEGONTIA (at or near *Epila*), apparently the Segontia which belonged to the Arevacae, and to be distinguished from the other Segontia, to be mentioned directly (*Itin. Ant.* pp. 437, 439): 14 M. P. further, NERTOBRIGA (*Itin. ll. cc.* Νερτόβεργα, Ptol. *l. c.*: *Almunia*); then 21 M. P., BILBILIS, and, 24 M. P., AQUAE BILBITANORUM; then, 16 M. P., ARCOBRIGA; then, 23 M. P., SEGONTIA (*Siguenza*), apparently the *Segontia Celtiberum* of Livy (xxxiv. 19); then 23

Digitized by Google

M. P. Caesada (Κέσαδα ἡ Καίσαδα. Ptol. *l. c.*), at or near *Brihuega* on the *Tajuna*, 24 M. P. from Arriaca of the Carpetani. Another road ran south through M. Idubeda from Caesaraugusta to Laminium near the source of the Anas (*Itin. Ant.* p. 447), on which were: 28 M. P., Sermo (*Mud?*); Carae (*Cariñena*); 10 M. P., Agiria (*Daroca*); 6 M. P. Alionica (probably *Puerta de Daroca*); 25 M. P. Urbiaca, seemingly the Urbicua of Livy (xi. 16; but the reading is uncertain, see Drakenborch, *ad loc.*: now *Molina*, Lapie; others identify it with *Alcarocho's* or *Checa*); 20 M. P. Valebonga or Valeponga (*Valsolobre*, Lapie; *Val de Meca*, Cortes); 40 M. P. Ad Putea (*Cuenca*, Lapie); 32 M. P., Saltici (*S. Maria del Campo*, Lapie; *Jorquera*, Cortes); 16 M. P., Parietinis (*S. Clemente*, Lapie; *Chinchilla*, Cortes); 22 M. P. Libisosia (*Lezuza*), 14 M. P. from the source of the Anas; but the last place very likely belonged to the Oretani. Among the cities not mentioned in the Itinerary were: Ergavica (Plin. iii. 3. s. 4: Ἐργαούικα, Ptol. *l. c.*) or Ergavia (Liv. xi. 50), a municipium belonging to the conventus of Caesaraugusta (coins *ap.* Florez, *Med. de Esp.* vol. ii. p. 426; Mionnet, vol. i. p. 43, Suppl. vol. i. p. 86; Sestini, p. 145; Eckhel, vol. i. p. 50; Inscr. *ap.* Gruter, p. 382, No. 9), the considerable ruins of which, at the confluence of the *Guadiela* and the Tagus, are called *Santaver* (Morales, *Antig.* p. 102; Florez, *Esp. S.* vol. vii. p 61); Bursada, (Βούρσαδα, Ptol. *l. c.*), near the last place (coins *ap.* Sestini, *Med. Isp.* p. 113); Centobriga, near Nertobriga, if not the same place [Nertobriga]: Attacum: Contrebia: Complega: Valeria (Οὐαλερία, Ptol. *Valera la Vieja*, in a very strong position near the Sucro, *Jucar*, S. of *Cuenca*, Ru.), a Roman colony, belonging to the conventus of New Carthage (Plin. iii. 3. s. 4: Florez, *Esp. S.* viii. p. 198, comp. v. p. 19, vii. p. 59); Egelasta (Λάξτα, Ptol.); Ocilis (Ὄκιλις), the Roman headquarters in the Celtiberian war, probably in the SE. of the country (Appian. *Hisp.* 47, foll.); Belsinum: Mediolum (Μεδίολον) in the N., and Condabora (Κονδάξορα), Isonium (Ἰσσώνιον), Alaba (Ἄλαβα), Libana (Λίβανα), and Urcesa (Οὔρκεσα), in the S. are mentioned only by Ptolemy (*l. c.*); Munda and Certima, on the borders of Carpetania, near Alces, only by Livy (xl. 46), and Belgeda (Βελγήδη) or Belgida, only by Appian (*Hisp.* 44) and Orosius (v. 23). There are also a number of localities in the neighbourhood of Bilbilis, only named by Martial; such as the mountains Calvus and Badavero, and the towns or villages of Boterdum, Platea on the Salo, Tutela, "choros Rixamarum," Cardua, Peteron, Rigae, Petusiae, and others, for the barbarous sound of which to Roman ears he feels it necessary to apologize "Celtiberis haec sunt nomina crassiora terris." (Martial. i. 49, iv. 55, xii. 18, &c.) For the list of cities compare Ukert, vol. i. pt. i. pp. 458—464.)

Of the manners and customs of the Celtiberians, besides the notices in Strabo and other writers, we have an elaborate account by Diodorus (v. 33, 34). As warriors they attained the highest renown by their long and obstinate resistance to the Romans. They were equally distinguished as excellent cavalry, and as powerful and steady infantry, so that, when their cavalry had defeated that of the enemy, they dismounted and engaged the hostile infantry (comp. Polyb. *Fr. Hist.* 13). Their favourite order of battle was the wedge-shaped column, in which they were almost irresistible (Liv. xl. 40). They went to battle they joined battle (Liv. xxiii. 16). Their weapons were a two-edged sword of the finest temper [Bilbilis], and the still national dagger (comp. Polyb. *Fr. Hist.* 14; Strab. iii. p. 154); their defensive armour consisted of a bronze helmet, with a purple crest, of greaves made of plaited hair, and a round wicker buckler (κυρτία), or the light but large Gallic targe. A rough black blanket, of wool not unlike goats' hair, formed their sole dress by day, and at night they slept, wrapped up in it, upon the bare ground. They were particularly attentive to cleanliness, with the exception of the strange custom, which is ascribed also to the Cantabri, of washing with urine instead of water. Though cruel to criminals and enemies (comp. Strab. iii. p. 155), they are gentle and humane to strangers; and those of them whose invitations are accepted are deemed favourites of the gods. Their food consists in abundance of various meats; and they drink must (οἶνος μέλιτος πόματι), their country supplying plenty of honey, and wine being imported by merchants. Though the country was generally mountainous and sterile, it contained some fertile valleys, and the prosperity of some few of the cities is exemplified by the cases of Bilbilis, and especially Numantia. It is thus that we must explain the statement of Diodorus respecting the excellence of their country, and the large tribute of 600 talents which, according to Poseidonius, M. Marcellus exacted from the country (Strab. iii. p. 162). As to their religion, Strabo says that the Celtiberians and some of their neighbours on the N. celebrated a festival to some nameless deity at the time of the full moon, assembling together in their families, and dancing all night long (iii. p. 164). Several other points in Strabo's description of the manners of the mountaineers of the N. may be regarded as applying to the Celtiberians among the rest. [Hispania.]

The Celtiberians are renowned in history for their long and obstinate resistance to the Romans. They had been subdued by Hannibal with great difficulty. In the Second Punic War, after giving important aid to the Carthaginians, they were induced by the generosity of Scipio to accept the alliance of Rome, but yet we find a body of them serving the Carthaginians as mercenaries in Africa. (Liv. xxxiii. 33, xxvi. 50; Polyb. xiv. 7, 8.) But the cruelty and avarice of later governors drove them, B. C. 181, into a revolt, which was appeased by the military prowess and the generous policy of the consul Tiberius Gracchus, B. C. 179. The resistance of the city of Segeda to the demands of Rome led to a fresh war (B. C. 153), which was conducted on the part of the Romans with varying success by M. Marcellus, who would have made peace with the Celtiberians: but the Senate required their unconditional surrender. The diversion created in Lusitania by Viriathus caused the Celtiberian war to languish till B. C. 143, when the great war with Numantia began, and was not concluded till B. C. 133. [Numantia.] In spite of this great war the Celtiberians renewed the war under Sertorius, and it was only after his fall that they began to adopt the Roman language, dress and manners. (Polyb. xxxv. 1, et seq.; Liv. xxi.—xxviii. passim; Strab. iii. p. 151.) [P. S.]

CENCHREAE (Κεγχρεαί: Κεγχρεάτης), lived while
1. A city of the Troad, "in which he was inquiring of the things that concerned the
be was inquiring of the things that Homer says. Another
Troes," as Stephanus (s. v. Κεγχρεαί) tradition, of no more value, makes it
of Homer. (Suidas, s. v. Ὅμηρος.) The site of
Cenchreae is supposed to be a place where there are remains, near the

Menderes (the Scamander), lower down than the supposed ruins of Cebrene [CEBRENIA], and near those of Neandria. [G. L.]

2. A town in the Argeia, south of Argos, and on the road from the latter city to Tegea. Pausanias says that it was to the right of the Trochus (τρόχος), which must not be regarded as a place, but as the name of the carriage road leading to Lerna. Near Cenchreae Pausanias saw the sepulchral monuments of the Argives, who conquered the Lacedaemonians at Hysiae. The remains of an ancient place, at the distance of about a mile after crossing the Erasinus (*Kephalári*), are probably those of Cenchreae; and the pyramid which lies on a hill a little to the right may be regarded as one of the sepulchral monuments mentioned by Pausanias. [For description of this pyramid, see p. 202.] It is supposed by some writers that the Hellenic ruins further on in the mountains, in a spot abounding in springs, called τὰ Νερὰ or *Skophidaki*, are those of Cenchreae; and the proximity of these ruins to those of Hysiae is in favour of this view; but on the other hand, the remains of the pyramid appear to fix the position of Cenchreae at the spot already mentioned near the Erasinus. The words of Aeschylus (*Prom.* 676) — εἵποτον Κερχνείας [al. Κεγχρείας] ῥέος Λέρνης ἄκραν τε — would seem to place Cenchreae near Lerna, and the stream of which he speaks is perhaps the Erasinus. (Paus. ii. 24. § 7; Strab. viii. p. 376; Leake, *Morea*, vol. ii. p. 343; Boblaye, *Recherches*, &c. p. 46; Ross, *Reisen im Peloponnes*, p. 141, seq.)

3. The eastern port of Corinth. [CORINTHUS.]

CENDEVIA. [BELUS.]

CENICENSES. [CAENICENSES.]

CENIMAGNI, in Britain, mentioned by Caesar (*B. G.* v. 21) as having, along with the Segontiaci, Ancalites, Bibroci, and Cassi, sent ambassadors to Caesar, requesting protection against Cassivellaunus. They have somewhat gratuitously been identified with the Iceni. [R. G. L.]

CENION (Κενίων), in Britain, mentioned by Ptolemy (ii. 3. § 4), as a river between the Tamar and the Lizard Point. This may mean either the Grampound river, which falls into the sea at the head of Falmouth Bay, or the Fowey. [R. G. L.]

CENNATI, seems to be the name of a people in Cilicia Trachea. [CILICIA.]

CENNI (Κέννοι), a tribe of the Alemanni mentioned by Dion Cassius (lxxvii. 14), with whom the Romans carried on war in the reign of Caracalla. Reimarus believes them to be the same as the Chatti, while others are inclined to identify them with the *Semnones* (Suevi, or *Sevi*) mentioned by Florus (iv. 12); but nothing certain can be said. [L. S.]

CENOMANI, a Gallic nation of Cisalpine Gaul whom Caesar (vii. 75) names Aulerci Cenomani. [AULERCI.] The position of the several people named Aulerci was west of the Carnutes, and between the Sequana and the Liger. The Cenomani occupied part of the Haute Loire: *Mende* and the town of *Mende* in the department of the Lozère is on the site of the place called Cenomani in the Notitia, from the name of the people. As usual in the case of Gallic chief cities, the name of the people, Cenomani, prevailed in the later empire over that of the original name of the town, which however appears in the Table as Subdinnum. The Table gives two routes on which this name occurs: one passes from Caesarodunum (*Tours*) through Subdinnum to Alauna (*Vieux* or *à Valognes*); and the other runs from Subdinnum to Mitricum, that is, Autricum (*Chartres*), and to Durocassio (*Dreux*). Ptolemy (ii. 8) names the chief city of the Cenomani, Vindinum, which Valesius proposes that we should alter to Suindinum, a name which is nearer to that of the Table.

The Cenomani joined in the great rising against Caesar in B. C. 52, under Vercingetorix. The contingent that they sent to the siege of Alesia was five thousand men (*B. G.* vii. 75). This was one of the migratory Gallic tribes which at an early period crossed into Italy; and if the tradition recorded by Cato (Plin. iii. 19. s. 23) is true, that they formed a settlement near Massilia (*Marseille*), among the Volcae, this may indicate the route that the Cenomani took to Italy. [G. L.]

CENOMANI (Κενομάνοι, Strab. Ptol.; Γαισάται, Polyb.), a tribe of the Cisalpine Gauls, who occupied the tract N. of the Padus, between the Insubres on the W. and the Veneti on the E. Their territory appears to have extended from the river Addua to the Athesis. Both Polybius and Livy expressly mention them among the tribes of Gauls which had crossed the Alps within historical memory, and had expelled the Etruscans from the territory in which they established themselves and subsequently continued to occupy. (Pol. ii. 17; Liv. v. 35.) It is remarkable that they appear in history almost uniformly as friendly to the Romans, and refusing to take part with their kindred tribes against them. Thus, during the great Gaulish war in B. C. 225, when the Boii and Insubres took up arms against Rome, the Cenomani, as well as their neighbours the Veneti, continued in alliance with the republic, and the two nations together furnished a force of 20,000 men, with which they threatened the frontier of the Insubres (Pol. ii. 23, 24, 32; Strab. v. p. 216.) Even when Hannibal invaded Cisalpine Gaul they continued faithful to the Romans, and furnished a body of auxiliaries who fought with them at the battle of the Trebia (Liv. xxi. 55.) After the close of the Second Punic War, however, they took part in the revolt of the Gauls under Hamilcar (B. C. 200), and again a few years later joined their arms with those of the Insubres: but even then the defection seems to have been but partial, and after their defeat by the consul C. Cornelius (B. C. 197), they hastened to submit, and thenceforth continued faithful allies of the Romans (Liv. xxxi. 10, xxxii. 30, xxxix. 3.) From this time they disappear from history, and became gradually merged in the condition of Roman subjects, until in B. C. 49 they acquired, with the rest of the Transpadane Gauls, the full rights of Roman citizens. (Dion Cass. xli. 36.)

The limits of the territory occupied by them are not very clearly defined. Strabo omits all notice of them in the geographical description of Gallia Cisalpina, and assigns their cities to the Insubres. Livy speaks of Brixia and Verona as the chief cities in their territory. Pliny assigns to them Cremona and Brixia: while Ptolemy gives them a much wider extent, comprising not only Bergomum and Mantua, but Tridentum also, which was certainly a Rhaetian city. (Strab. v. p. 213; Liv. v. 35; Plin. iii. 19. s. 23; Ptol. iii. 1. § 31.) It is singular that Polybius, in one passage (ii. 32), appears to describe the river Chusius (*Chiese*), as separating them from the Insubres: but this is probably a mistake. The limits above assigned them, namely the Addua on the W., the Athesis on the E. and the Padus on the S., may be regarded as ap-

Digitized by Google

proximately correct. The Alpine tribes of the Camuni and the Triumpilini, which bordered on them on the N., are expressly described by Pliny as of Euganean race, and were not therefore nationally connected with the Cenomani, though in his time at least united with them for administrative purposes.

The topographical description of the country of the Cenomani, as it existed under the Roman Empire, is more conveniently given under the general head of GALLIA CISALPINA. [E. H. B.]

CENTOBRI'GA (or *-brica*), a city of the Celtiberians, in Hispania Tarraconensis, the siege of which, in the Celtiberian War, gave an occasion for a striking display of generosity on the part of Metellus (Val. Max. v. 1. § 5). Florus (ii. 17) relates the same incident as occurring at NERTOBRIGA. It is not clear whether the cities were identical. [P. S.]

CENTRITES (Κεντρίτης: *Buhtán Chái*), a river dividing the mountains of the Carduchians from the slopes and plains of Armenia, crossed by the Ten Thousand in their retreat. It is described by Xenophon (*Anab.* iv. 3. § 1) as 200 feet in breadth, above their breasts in depth, and extremely rapid, with a bottom full of slippery stones. The Centrites has been identified with the *Buhtán Chái*, an E. affluent of the Tigris, which falls into that river at the Armenian village of *Til*, and constitutes at the present day a natural barrier between *Kurdistán* and Armenia. (Ainsworth, *Trav. in the Track of the Ten Thousand*, p. 166; Koch, *Zug der Zehn Tausend*, p. 78; Chesney, *Exped. Euphrat.* vol. i. p. 18.) [E. B. J.]

CENTRO'NES (Κέντρωνες, Strab. p. 204). The Centrones were an Alpine people, who with the Graioceli and the Caturiges attempted to stop Caesar on his passage over the Alpes Cottiae in B. C. 58 (*B. G.* i. 10) from Gallia Cisalpina into the territory of the Allobroges. Caesar gives no exact determination of the position of the Centrones. Pliny (iii. 20) places the Centrones next to the Octodurenses, that is the people of Octodurus or *Martigny*. The Octodurenses are the Veragri. Ptolemy (iii. 1) assigns to the Centrones two towns, Forum Claudii and Axima. Axima is *Aime* in the *Tarentaise* [AXIMA]; and a little place called *Centron* in the same valley retains the name of the people. The Centrones occupied the Alpes Graiae (Ptol. iii. 1) which Pliny (v. 42) calls the Alpes Centronicae. In another passage (xxxiv. 2) he speaks of copper mines "in Centronum Alpino tractu."

The pass through the Centrones is mentioned by Strabo (p. 205). Those who cross the Alps into Gallia from the country of the Salassi, pass up the great valley of the Salassi, the valley of *Aosta*, which has a bifurcation: one road passes over the Pennine Alps, and the other, which is more westerly, through the Centrones. Both roads lead to Lugdunum, *Lyon* (p. 208). The road through the Centrones is the line of the *Petit St. Bernard*. These and other Alpine tribes belong neither to Gallia nor Italy. Strabo gives them a separate description. But Ptolemy includes the Centrones with other Alpine peoples in Italy. [G. L.]

CENTUMCELLAE (Κεντουμκέλλαι, Procop.: *Civita Vecchia*), a town on the sea-coast of Etruria, between Pyrgi and Graviscae, and distant 47 miles from Rome. It appears to have owed its origin entirely to the construction of its magnificent port by Trajan, and there is no trace of the previous existence of a town upon the spot. The younger Pliny has left us an account of the construction of this port: and at a later period Rutilius gives a poetical but accurate description of it, which entirely coincides with its present appearance. It appears to have been almost wholly of artificial construction, and was formed by a breakwater or artificial island, with a mole running out towards each extremity of this, and leaving only a narrow entrance on each side of it: the basin within being of nearly circular form, so as to constitute what Rutilius calls a marine amphitheatre. At each end of the breakwater was a tower, serving for a lighthouse as well as for defence. (Plin. *Ep.* vi. 31; Rutil. *Itin.* i. 237—248.) It appears from Pliny that Trajan had a villa here, the existence of which is again mentioned in the time of M. Aurelius (Lamprid. *Commod.* 1): and by degrees a town grew up around the port, the importance of which continually increased, as that constructed by Trajan at the mouth of the Tiber became so choked with sand as to be rendered useless. In the time of Procopius Centumcellae was a large and populous city, and a place of strength as a fortress (Procop. *B. G.* ii. 7): on which account its possession was warmly contested between the Goths and Byzantine generals: it was captured by Belisarius, afterwards besieged and taken by Totila, but soon after recovered by Narses. (Id. *Ib.* iii. 36, 37, 39, iv. 34.) It continued to flourish till the year 812, when it was utterly destroyed by the Saracens: the remaining inhabitants withdrew into the interior where they founded a new settlement, and the ancient city obtained on this occasion the name of *Civita Vecchia*, which it has retained ever since. It soon became again inhabited, and is now one of the principal ports of the Roman States, with a population of about 8,000 inhabitants. The walls that surround the port are based throughout on those erected by Trajan: there exist, besides, the remains of an aqueduct, and numerous fragments of other Roman buildings. (Dennis's *Etruria*, vol. ii. p. 1—4.)

The Itineraries vary considerably in regard to the distance from Rome to Centumcellae, as well as the intermediate stations: the true distance by the line of the Via Aurelia was 47 miles: it was 5 miles from Castrum Novum, erroneously marked as viii. in the Itin. Ant. (D'Anville, *Anal. Géogr. de l'Italie*, p. 123; Dennis, *l. c.* p. 6.) [E. H. B.]

CENTURIONES, AD, a station in Gallia, mentioned in the Antonine Itin. It appears to be the Ad Centenarium of the Table. It lies on a road from Narbo (*Narbonne*), through Ruscino (*Castel* or *Tour de Rousillon*) and Illiberis (*Elne*) to Summus Pyrenaeus (*Bellegarde*). Ad Centuriones is between Illiberris and Summus Pyrenaeus, and 5 M. P. from Summus Pyrenaeus. Its position, therefore, is fixed within certain limits, and it is the chapel of *St. Martin sous le Boulou*, according to Walckenaer, a place on the Illiberris (*Tech*), where there are said to be remains; and this is exactly the point, where we must leave the banks of this river to ascend the valley which leads to *Bellegarde*. [G. L.]

CENTU'RIPA or CENTU'RIPI (τὰ Κεντόριπα, Thuc., Diod., Strab., &c.; Κεντόριπα, Ptol.: *Eth.* Κεντοριπῖνος, Centuripinus: *Centorbi*), a city in the interior of Sicily, situated on a lofty hill, to the SW. of Mount Aetna, from which it was separated by the valley of the Symaethus (*Simeto*), and 24 miles NW. of Catana (Strab. vi. p. 272; Ptol. iii. 4. § 13; Itin. Ant. p. 93.) It is first mentioned by Thucydides, from whom we learn that it was a city of the Siculi, and appears to have been from a very early period one of the most important

Digitized by Google

of the strongholds of that people. Hence, at the time of the Athenian expedition (B. C. 414), its commanders thought it worth while to march with their whole force against Centuripa, which was induced to enter into a treaty of alliance with them, and subsequently rendered them good service by attacking the auxiliaries of the Syracusans on their march through the interior of the island. (Thuc. vi. 96. vii. 32.) We are told, indeed, that Gellias of Agrigentum, who was sent thither as ambassador by his countrymen, treated the Centuripans with contempt, as the people of a poor and insignificant city; but this must be understood only with reference to the great Greek colonies, not the Sicilian cities. (Diod. xiii. 83.) Shortly after we find Dionysius the Elder, in B. C. 396, concluding an alliance with the ruler of Centuripa, a despot named Damon; but he does not appear to have ever reduced the city under his subjection. (Id. xiv. 78.) In the time of Timoleon it was governed by another despot named Nicodemus, who was expelled by the Corinthian general, and the city restored to liberty, B. C. 339 (Id. xvi. 82): but it subsequently fell into the power of Agathocles, who occupied it with a garrison. During the wars of that monarch with the Carthaginians however, Centuripa, after some ineffectual attempts to throw off his yoke, succeeded in recovering its independence, which it was thenceforth able to maintain. (Id. xix. 103, xx. 56.) Shortly before the First Punic War we find the Centuripans in alliance with Hieron of Syracuse, whom they assisted against the Mamertines, and from whom they received a grant of part of the territory of Ameselum, which that monarch had destroyed. (Id xxii. 13, Exc. Hoesch. p. 499; Pol. i. 9.)

But this alliance had the effect of drawing upon them the Roman arms, and in the second campaign of the war Centuripa was besieged by the consuls Otacilius and Valerius Messala. It was during this siege that the envoys of numerous Sicilian cities hastened to make their submission to Rome, and though not expressly mentioned, it is evident that Centuripa itself must have early followed the example, as we find it admitted to peculiarly favourable terms, and Cicero speaks of it as having been the faithful ally of the Romans throughout their subsequent wars in Sicily. (Diod. xxiii. Exc. H. p. 501; Cic. *Verr.* v. 32.) In the time of the great orator it was one of the five cities of Sicily which enjoyed the privilege of freedom and immunity from all taxation; and so much had it prospered under these advantages, that it was one of the largest and most wealthy cities in the island. Its citizens amounted to not less than 10,000 in number, and were principally occupied with agriculture; besides the territory of the city itself which was extensive, and one of the most fertile corn-producing tracts in the whole island, they occupied and tilled a large part of the neighbouring territories of Aetna and Leontini, as well as other districts in more distant quarters of the island, so that the "aratores Centuripini" were the most numerous and wealthy body of their class in the whole province. (Cic. *Verr.* ii. 67, 69, iii. 6, 45, 48, iv. 23.) They suffered severely from the exactions of Verres, and still more at a somewhat later period from those of Sex. Pompeius. Their services against the latter were rewarded by Augustus, who restored their city, and it was doubtless at this period that they obtained the Latin franchise, of which we find them in possession in the time of Pliny. (Strab. vi. p. 272; Plin. iii. 8 s. 14.) But it seems probable that the prosperity of the city declined under the empire, and we hear little more of Centuripa from this time, though the name is found in Ptolemy and the Itineraries, and it seems to have continued to occupy the ancient site down to the 13th century, when it was destroyed by the emperor Frederic II. The modern town of *Centorbi* has, however, grown up again upon the ancient site, and still presents some ruins of the Roman city, especially the remains of the walls that crowned the lofty and precipitous hill, on the summit of which it stood: as well as the ruins of cisterns, thermae, and other ancient edifices. (Ptol. iii. 4. § 13: Itin. Ant. p. 93; Tab. Peut.; Fazell. *de Reb. Sic.* i. p. 429; Biscari, *Viaggio per la Sicilia*, p. 53.) Numerous painted vases of pure Greek style have been discovered in sepulchres in the immediate neighbourhood. (Biscari, *l. c.* p. 55; *Ann. d. Inst.* 1835, p. 27—47.)

Pliny speaks of the territory of Centuripa as producing excellent saffron, as well as salt, which last was remarkable for its purple colour. (Plin. xxi. 6 s. 17, xxxi. 7. s. 41; Solin. 5. §§ 13. 19.) It was the birth-place of the physician Appuleius Celsus. (Scribon. Larg. *de Comp. Medic.* c. 171.) [E. H. B.]

COIN OF CENTURIPA.

CEOS (Κέως; Ion. Κέος; Κία, Ptol. iii. 15. § 26; usually CEA by the Latin writers, Plin. iv. 12. s. 20; *Eth.* Κεῖος; Ion. Κήϊος: *Zea*), an island in the Aegaean sea, and one of the Cyclades, situated about 13 English miles SE. of the promontory of Sunium in Attica. The island is 14 English miles in length from north to south, and 10 in breadth from east to west. Pliny (iv. 12. s. 20) says that Ceos was once united to Euboea, and was 500 stadia in length, but that four-fifths of it were carried away by the sea. According to the legend preserved by Heraclides Ponticus (*Pol.* c. 9), Ceos was originally called Hydrussa, and was inhabited by nymphs, who afterwards crossed over to Carystus, having been frightened away from the island by a lion: whence a promontory of Ceos was called Leon. Ovid apparently alludes to this legend (*Her.* xx. 221):

"Insula, Carthaeis quondam celeberrima Nymphis,
Cingitur Aegaeo, nomine Cea, mari."

Heraclides Pont. further states that a colony was afterwards planted in the island by Ceos from Naxpactus. In the historical times it was inhabited by Ionians (Herod. viii. 46; Schol. *ad Dionys. Per.* 526); and the inhabitants fought on the side of the Greeks at the battles of Artemisium and Salamis. (Herod. viii. 1, 46.)

Ceos once possessed four towns, Iulis, Carthaea, Coressia, and Poeëssa, but in the time of Strabo the two latter had perished, the inhabitants of Coressia having been transferred to Iulis and those

Digitized by Google

of Poeëssa to Carthaea. (Strab. viii. p. 486; comp. Plin. *l. c.*)

IULIS (Ἰουλίς: *Eth.* Ἰουλιήτης, Ἰουλιεύς), the most important town in Ceos, is celebrated as the birthplace of the two great lyric poets Simonides and Bacchylides, of the sophist Prodicus, of the physician Erasistratus, and of the peripatetic philosopher Ariston. From the great celebrity of Simonides he was frequently called emphatically the *Ceus;* and Horace, in like manner, alludes to his poetry under the name of *Ceae Camenae* (*Carm.* iv. 9. 8), and *Cea Nenia* (*Carm.* ii. 1. 38). Iulis was situated on a hill about 25 stadia from the sea, in the northern part of the island, on the same site as the modern *Zea*, which is now the only town in the island. There are several remains of Iulis; the most important is a colossal lion, about 20 feet in length, which lies a quarter of an hour east of the town. The legend already quoted from Heraclides Pont. probably has a reference to this lion; and the more so as there is a fountain of water gushing from the spot where the lion stands.

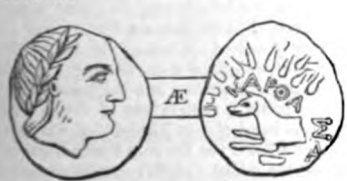
The laws of Iulis were very celebrated in antiquity; and hence "Cean Laws" were used proverbially to indicate any excellent institutions. (Comp. Plat. *Prot.* p. 341, *Leg.* i. p. 638; Böckh, *ad Min.* p. 109.) These laws related to the morals of the citizens and their mode of life. One of them quoted by Menander was particularly celebrated:—

ὁ μὴ δυνάμενος ζῆν καλῶς οὐ ζῇ κακῶς.

It was said that every citizen above 60 years of age was obliged to put an end to his life by poison, for which we find two reasons assigned; one that there might be a sufficient maintenance left for the other inhabitants, and the other that they might not suffer from sickness or weakness in their old age. (Strab. *l. c.;* Steph. B. *s. v.* Ἰουλίς; Aelian, *V. H.* iii. 37; Val. Max. ii. 6. § 8; Heracl. Pont. *l. c.*) Other Cean laws are mentioned by Heraclides Pont. (*l. c.*) and Athenaeus (xiii. p. 610; comp. Müller, *Aeginetica*, p. 132).

CORESSIA (Κορησσία, Strab. *l. c.*; Coressus, Plin. *l. c.*), was the harbour of Iulis. Near it was a temple of Apollo Smintheus, and the small stream Elixus flowed by it into the sea. There are a very few remains of the town on the heights upon the west side of the bay. The harbour is large and commodious.

CARTHAEA (Κάρθαια: *Eth.* Καρθαιεύς), was situated on the south-eastern side of the island. There are still considerable ruins of this town, called *σὺν ταῖς Πόλαις.* (Pol. xvi. 41; Strab. Plin. *ll. cc.;* Steph. B. *s. v.;* Anton. Lib. 1; Ov. *Met.* vii. 368, x. 109.) The ancient road from Iulis to Ceos, broad and level, and supported in many places by a strong wall, may still be traced.



COIN OF CARTHAEA IN CEOS.

POEËSSA (Ποιήεσσα) was situated on the south-western side of the island, on a high and steep promontory. Its ruins are inconsiderable and still preserve their ancient name. (Strab. Plin. *ll. cc.*; Steph. B. *s. v.*)

The population of the island in 1837 did not much exceed 3,000 souls. Its principal article of commerce is the Valonia acorn (the acorn of the Quercus Aegilops), which is exported in large quantities for the use of tanners. (Tournefort, *Travels*, vol. i. p. 252, transl.; Ross, *Reisen auf den Griech. Inseln*, vol. i. p. 127; and especially Brönsted, *Reisen und Untersuchungen in Griechenland*, vol. i., who has given a very detailed account of every thing relating to the island.)

CE'PHALAE (Κεφαλαὶ ἄκρον: *Cefalo* or *Misarata*, vulgo *Mesurata*), a lofty and well-wooded promontory of the Regio Syrtica on the N. coast of Africa, forming the western headland, as BOREUM PR. formed the eastern cape of the Greater Syrtis. [SYRTES.] Strabo makes it a little more than 5000 stadia from Carthage. (Strab. xvii. pp. 835. 836; Ptol. iv. 3. § 13; Blaquière, *Letters from the Mediterranean*, vol. i. p. 18; Della Cella, *Viaggio*, &c. p. 61; Barth, *Wanderungen*, p. 322.) [P.S.]

CEPHALE. [ATTICA, p. 332, b.]

CEPHALLE'NIA (Κεφαλληνία, Κεφαληνία: *Eth.* Κεφαλλήν, pl. Κεφαλλῆνες, Κεφαλλήνιος: *Cephalonia*), called by Homer SAME (Σάμη, *Od.* i. 246, ix. 24) or SAMOS (Σάμος, *Il.* ii. 634, *Od.* iv. 671), the largest island in the Ionian Sea, opposite the Corinthian gulf and the coast of Acarnania. Along the northern half of the eastern coast of Cephallenia lies the small island of Ithaca, which is separated from it by a narrow channel about three miles in breadth. (Comp. Hom. *Od.* iv. 671.) Strabo says that Cephallenia was distant from the promontory Leucata in the island of Leucas about 50 stadia (others said 40), and from the promontory Chelonatas, the nearest point in the Peloponnesus, about 80 stadia. (Strab. x. p. 456.) Pliny describes it as 25 (Roman) miles from Zacynthus. (Plin. iv. 12. s. 19.) The first of these distances is tolerably correct; but the other two are erroneous. From *C. Viscardo*, the most northerly point of Cephallenia, to *C. Dukato* (the ancient Leucata), the distance is 5 English miles, or about 40 stadia; but from *C. Scala*, the most southerly point in Cephallenia, to *C. Tornese*, the nearest point in the Morea, the distance is 23 miles, or about 196 stadia; while from *C. Scala* to the northernmost part of Zacynthus the real distance is only 8 miles.

The size of Cephallenia is variously stated by the ancient writers. Strabo (*l. c.*) makes it only 300 stadia in circuit. Pliny (*l. c.*, according to Sillig's edition) says that it is 93 miles in circumference; and Agathemerus (i. 5) that it is 400 stadia in length, both of which measurements are nearer the truth, though that of Agathemerus is too great. The greatest length of the island is 31 English miles. Its breadth is very unequal: in the middle of the island, where a bay extends eight miles into the land, the breadth is about 8 miles, but in the northern part it is nearly double that distance. The area of the island is about 348 square miles.

Cephallenia is correctly described by Strabo as a mountainous country. Homer in like manner gives to it the epithet of παιπαλόεσσα (*Od.* iv. 671). A ridge of calcareous mountains runs across the island from NW. to SE., the lower declivities of which cover nearly the whole island. The highest summit of this range, which rises to the height of about 4000 feet, was called AENUS (Αἶνος), and upon it was a temple of Zeus Aenesius. (Strab. *l. c.*) From this

Digitized by Google

mountain, which is now covered with a forest of firtrees, whence its modern name, *Elato*, there is a splendid view over Acarnania, Aetolia, and the neighbouring islands. There was also a mountain called Baea (Βαία) according to Stephanus, said to have been named after the pilot of Ulysses. The principal plain in Cephallenia is that of Same, on the eastern side of the island, which is about 6 miles in length from N. to S., and about 3 miles in width at the sea. From the mountainous character of the island, it could never have been very productive. Hence Livy (xxxviii. 28) describes the inhabitants as a poor people. We read on one occasion of good crops of corn in the neighbourhood of Pale. (Pol. v. 5.) Leake observes that "the soil is rocky in the mountainous districts, and stony even in the plains; but the productions are generally good in their kind, particularly the wine. Want of water is the great defect of the island. There is not a single constantly flowing stream: the sources are neither numerous nor plentiful, and many of them fail entirely in dry summers, creating sometimes a great distress."

The island, as has been already remarked, is called Same or Samos in Homer. Its earliest inhabitants appear to have been Taphians, as was the case in the neighbouring islands. (Strab. x. p. 461.) It is said to have derived its name from Cephalus, who made himself master of the island with the help of Amphitryon. (Strab. x. p. 456; Schol. *ad Lycophr.* 930; Paus. i. 37. § 6; Heraclid. Pont. *Fragm.* xvii. p. 213, ed. Koraï.) Even in Homer the inhabitants of the island are called Cephallenes, and are described as the subjects of Ulysses (*Il.* ii. 631, *Od.* xx. 210, xxiv. 355); but Cephallenia, as the name of the island, first occurs in Herodotus (ix. 28). Scylax (p. 13) calls it Cephalenia (Κεφαληνία, with a single λ), and places it in the neighbourhood of Leucas and Alyzia.

Cephallenia was a tetrapolis, containing the four states of Same, Pale, Cranii, and Proni. This division of the island appears to have been a very ancient one, since a legend derived the names of the four cities from the names of the four sons of Cephalus. (Etym. M. *s. v.* Κεφαλληνία; Steph. B. *s. v.* Κράνιοι.) Of these states Same was probably the most ancient, as it is mentioned by Homer (*Od.* xx. 288). The names of all the four cities first occur in Thucydides. (Thuc. ii. 30; comp. Strab. x. p. 455; Paus. vi. 15. § 7.) An account of these cities is given separately; but as none of them became of much importance, the history of the island may be dismissed in a few words. In the Persian wars the Cephallenians took no part, with the exception of the inhabitants of Pale, two hundred of whose citizens fought at the battle of Plataea. (Herod. ix. 28.) At the commencement of the Peloponnesian war a large Athenian fleet visited the island, which joined the Athenian alliance without offering any resistance. (Thuc. ii. 30.) In the Roman wars in Greece the Cephallenians were opposed to the Romans; and accordingly, after the conquest of the Aetolians, M. Fulvius was sent against the island with a sufficient force, B. C. 189. The other cities at once submitted, with the exception of Same, which was taken after a siege of four months. (Pol. iv. 6, v. 3, xxii. 13, 23; Liv. xxxvii. 13, xxxviii. 28, 29.) Under the Romans Cephallenia was a "libera civitas." (Plin. iv. 12. s. 19.) The island was given by Hadrian to the Athenians (Dion Cass. lix. 16); but even after that event we find Pale called in an inscription ἐλευθέρα καὶ αὐτόνομος. (Böckh. *Inscr.* No. 340.) In the time of Ptolemy (iii. 14. § 12) Cephallenia was included in the province of Epeirus. After the division of the Roman empire, the island was subject to the Byzantine empire till the 12th century, when it passed into the hands of the Franks. It formed part of the dominions of the Latin princes of Achaia till A.D. 1224, when it became subject to the Venetians, in whose hands it remained (with the exception of a temporary occupation by the Turks) till the fall of the Republic in 1797. It is now one of the seven Ionian islands under the protection of Great Britain. In 1833 the population was 56,447.

Of the four cities already mentioned, Same and Proni were situated on the east coast, Cranii on the west coast, and Pale on the eastern side of a bay on the west coast. Besides these four ancient cities, there are also ruins of a fifth upon C. Same, the SE. point of the island. These ruins are of the Roman period, and probably those of the city which C. Antonius, the colleague of Cicero in his consulship, commenced building, when he was residing in Cephallenia after his banishment from Italy. (Strab. x. p. 455). Ptolemy (*l. c.*) mentions a town Cephalenia as the capital of the island. This may have been either the town commenced by Antonius, or is perhaps represented by the modern castle of *St. George* in the middle of the plain of *Livatho* in the south-western part of the island, where ancient remains have been found. Besides these cities, it appears from several Hellenic walls still remaining, that there were other smaller towns or fortresses in the island. On a peninsula in the northern part of the island, commanding two harbours, is a fortress called *Asso*; and as there is a piece of Hellenic wall in the modern castle, Leake conjectures that here stood an ancient fortress named Assus. Others suppose that as Livy (xxxviii. 18) mentions the Nesiotae, along with the Cranii, Palenses, and Samaei, there was an ancient place called Nesus, of which *Asso* may be a corruption; but we think it more probable that Nesiotae is a false reading for Pronesiotae, the ethnic form of Pronesus, the name which Strabo gives to Proni, one of the members of the Tetrapolis. [Proni.] Further south on the western coast is *Teja*, where many ancient sepulchres are found: this is probably the site of Taphus (Τάφος), a Cephallenian town mentioned by Stephanus. *Ratli*, on the south-eastern coast, points to an ancient town Heracleia; and the port of *Viskardho* is evidently the ancient Panormus (Πάνορμος), opposite Ithaca (*Anthol. Gr.* vol. ii. p. 99, ed. Jacobs). (Krse, *Hellas*, vol. ii. pt. ii. p. 431, seq.; Leake, *Northern Greece*, vol. iii. p. 55, seq.)

CEPHALOEDIUM (Κεφαλοίδιον, Diod., Strab., but Κεφαλοιδίς, Ptol., and Pliny also has Cephaloedis; *Eth.* Cephaloeditanus: *Cefalù*), a town on the N. coast of Sicily, between Himera and Aesa. It evidently derived its name from its situation on a lofty and precipitous rock, forming a bold headland (Κεφαλὴ) projecting into the sea. But though its name proves it to have been of Greek origin, no mention is found of it in Thucydides, who expressly says that Himera was the only Greek colony on this coast of the island (vi. 62); it is probable that Cephaloedium was at this time merely a fortress (φρούριον) belonging to the Himeraeans, and may very likely have been first peopled by refugees after the destruction of Himera. Its name first appears in history at the time of the Carthaginian expedition

Digitized by Google

under Himilco, B. C. 396, when that general concluded a treaty with the Himeraeans and the inhabitants of Cephaloedium. (Diod. xiv. 56.) But after the defeat of the Carthaginian armament, Dionysius made himself master of Cephaloedium, which was betrayed into his hands. (Id. *ib.* 78.) At a later period we find it again independent, but apparently on friendly terms with the Carthaginians, on which account it was attacked and taken by Agathocles, B. C. 307. (Id. xx. 56.) In the First Punic War it was reduced by the Roman fleet under Atilius Calatinus and Scipio Nasica, B. C. 254, but by treachery and not by force of arms. (Id. xxiii., Exc. Hoesch. p. 505.) Cicero speaks of it as apparently a flourishing town, enjoying full municipal privileges; it was, in his time, one of the "civitates decumanae" which paid the tithes of their corn in kind to the Roman state, and suffered severely from the oppressions and exactions of Verres. (Cic. *Verr.* ii. 52, iii. 43.) No subsequent mention of it is found in history, but it is noticed by Strabo, Pliny, and Ptolemy, among the towns of Sicily, and at a later period its name is still found in the Itineraries. (Strab. vi. p. 266; Plin. iii. 8. s. 14; Ptol. iii. 4. § 3; Itin. Ant. p. 92; Tab. Peut.) It appears to have continued to exist on the ancient site, till the 12th century, when Roger I., king of Sicily, transferred it from its almost inaccessible position to one at the foot of the rock, where there was a small but excellent harbour. (Fazell. *de Reb. Sic.* ii. 3.) Some remains of the ancient city are still visible, on the summit of the rock; but the nature of the site proves that it could never have been more than a small town, and probably owed its importance only to its almost impregnable position. Fazello speaks of the remains of the walls as still existing in his time, as well as those of a temple of Doric architecture, of which the foundations only are now visible. But the most curious monument still remaining of the ancient city is an edifice, consisting of various apartments, and having the appearance of a palace or domestic residence, but constructed wholly of large irregular blocks of limestone, in the style commonly called polygonal or Cyclopean. Rude mouldings approximating to those of the Doric order, are hewn on the face of the massive blocks. This building, which is almost unique of its kind, is the more remarkable, from its being the only example of this style of masonry, so common in Central Italy, which occurs in the island of Sicily. It is fully described and figured by Dr. Hoëck in the *Annali dell' Instituto di Corrispondenza Archeologica*, for the year 1831 (vol. iii. p. 270—287). [E. H. B.]

COIN OF CEPHALOEDIUM.

CEPHALONE'SUS (Κεφαλόνησος). a small island at the E. end of the ACHILLEOS DROMOS, in the mouth of the Carcinites Sinus, off the W. side of the isthmus of the Chersonesus Taurica (Plin. iv. 12. s. 27; Ptol. iii. 5. § 8). Ammianus Marcellinus erroneously makes it an inland city on the Borysthenes. [P. S.]

CEPHI'SSIA. [ATTICA, p. 326, b.]

CEPHISSIS LACUS. [BOEOTIA, p. 411, b.]

CEPHISSUS (Κηφισσός). 1. A river of Phocis and Boeotia, flowing into the lake Copais. [For details, see pp. 410—412.]

2. A river of Attica, flowing through the Athenian plain. [See p. 323, a.]

3. Also a river of Attica, flowing through the Eleusinian plain. [See p. 323, a.]

4. A river of Argolis, and a tributary of the Inachus. [See p. 200, b.]

5. A river in Salamis. [SALAMIS.]

CEPI MILESIO'RUM (Κῆποι, Κήποι, Strab. xi. p. 494; Anon. *Peripl.*; Pomp. Mela, i. 19. § 15; Diod. xx. 24; Procop. *Bell. Goth.* iv. 5; Cepi, Cepos, *Peut. Tab.*; Ceppos, *Geog. Raven.*), a town of the Cimmerian Bosporus founded by the Milesians (Scymn.; Plin. vi. 6), and situated to N. of the Asiatic coast. Dr. Clarke (*Trav.* vol. ii. p. 77) identifies *Sienna* with this place, and the remarkable Milesian sepulchres found there in such abundance confirm this position. Near to this spot stood a monument raised by Comosarya, a Queen of the Bosporus, who as it appears from the inscription which has been preserved, was wife of Parysades, and dedicated it to the Syro-Chaldaic deities Anerges and Astara. (Köler, *Mém. sur le Monument de la Reine Comosarye.* St. Petersburg, 1805.) [E. B. J.]

CERAMEICUS (Κεραμεικὸς κόλπος), a bay in Caria (Herod. i. 174), now the gulf of *Boudroum*, so called from a town Ceramus (Κέραμος), which is on the gulf. Strabo (p. 656) places Ceramus and Bargasa near the sea, between Cnidus and Halicarnassus, and Ceramus comes next after Cnidus. D'Anville identifies Ceramus with a place called *Kéramo*, but this place does not appear to be known. (Leake, *Asia Minor*, p. 225.) Ptolemy seems to place Ceramus on the south side of the bay. Some modern maps place it on the north side; but this cannot be true, particularly if Bargasa is rightly determined. [BARGASA.] There are medals which are assigned to Ceramus by some numismatists.

Pliny mentions a Doridis Sinus. Now, as Doris is the country occupied by the Dorian colonies, this name is more appropriate to the Cerameicus, on the north side of which is Halicarnassus, and at the entrance is the island of Cos. Pliny's words are clear, though they have been generally misunderstood; for, after mentioning the bay of Schoenus and the Regio Bubassus [BUBASSUS; CARIA], he mentions Cnidus, and he says that Doris begins at Cnidus. Again, he says that Halicarnassus is between the Cerameicus and the Iasius: the Cerameicus of Pliny, then, is either different from the Sinus Doridis, or it is one of the bays included in the Sinus Doridis, and so called from the town of Ceramus. But Pliny places in the Doridis Sinus, Leucopolis, Hamaxitus, Elaeus, and Euthene; and Mela (i. 16) places Euthane, as he calls it, in a bay between Cnidus and the Cerameicus Sinus: from which it clearly appears that Euthane is in the Sinus Doridis of Pliny, and that Mela's Cerameicus is a smaller bay in the Sinus Doridis. Mela's Littus Leuca is between Halicarnassus and Myndus; and if this is Pliny's Leucopolis, as we may assume, the identity of the Cerameicus and the Sinus Doridis of Pliny is clearly established. [G. L.]

CERAMEICUS. [ATHENAE, pp. 295, 303.]

CE'RAMON AGORA (Κεραμῶν ἀγορά). The

Digitized by Google

position of this place is doubtful. It is one of the places which Cyrus came to (*Anab.* i. 2. § 10) in his march from Celaenae to Iconium. After leaving Celaenae, he came to Peltae, and then to Ceramon Agora, the nearest town of Phrygia to the borders of Mysia. If the Plain of Cayster can be determined [CAYSTRI CAMPUS], the position of Ceramon Agora may be approximated to. Hamilton (*Asia Minor*, &c., ii. 204) supposes that it may be NE. of *Ushak*, "a place of considerable commerce and traffic in the present day: many of the high roads of Asia Minor pass through it." He also says, that to a person going to Mysia from Apamea (Celaenae), "and supposing, as Strabo says, that Mysia extended to *Ghiadi*z (Cadi), *Ushak* would be the last town through which he would pass before entering Mysia, from which it is separated by a mountainous and uninhabited district." The position of *Ushak* seems a very probable one.

Pliny mentions Caranae in Phrygia (v. 32), which Cramer conjectures to be the Ceramon Agora. He mentions it between Cotyaion and Conium, that is, Iconium; but nothing can be concluded from this passage. Nor is it the Caris or Carides of Stephanus (*s. v.* Καρία), "a city of Phrygia," as it has been supposed; for that name corresponds to the Carina of Pliny (v. 32), or Caria, as it perhaps should be read. [G. L.]

CERAMUS. [CERAMEICUS.]

CERASAE or CERASSAE (Κερασσαί), in Lydia, is mentioned by Nonnus (xiii. 468) as a wine country. Major Keppel observed remains near *Sirghie*, which is opposite to Bagae. [BAGAE.] There were bishops of Cerasae (Cramer, *Asia Minor*, vol. i. p. 455); and as it was a Lydian bishopric, *Sirghie* may, as Cramer conjectures, be *Cerasae*. There is some resemblance between the names. [G. L.]

CERASUS (Κερασοῦς: *Eth.* Κερασούντιος). The Ten Thousand, in their retreat, came to Trapezus, and leaving Trapezus, "they arrive on the third day at Cerasus, an Hellenic city on the sea, a colony of the Sinopeis, in Colchis." (Xen. *Anab.* v. 3. § 2.) As there is a place called *Kerasoun* on this coast, west of *Trebizond* (Trapezus), we should be inclined to fix Cerasus there. But it is impossible that the army could have marched through a mountainous unknown country, in three days, a direct distance of 70 miles; and we may conclude that the three days is a right reading, for Diodorus (xiv. 30), who copies Xenophon here, also states the distance at three days. Hamilton found a river called *Keresoun Dere Su*, which he takes to be the river of Cerasus, though he did not see any ruins near the river. The Anonymous geographer places Cerasus 60 stadia east of Coralla, and 90 west of Hieron Oros (*Yoros*), and on a river of the same name.

Keresoun or *Kerasunt* represents Pharnacia, a town which existed before the time of Mithridates the Great. Arrian's statement that Pharnacia was originally called Cerasus, and the fact of the modern name of Pharnacia resembling Cerasus, has led some modern geographers to consider the Cerasus of Xenophon the same as Pharnacia. It seems that the Cerasus of Xenophon decayed after the foundation of Pharnacia, and if the inhabitants of Cerasus were removed to Pharnacia, the new town may have had both names. Strabo indeed (p. 548) mentions Cotyora as a town which supplied inhabitants to Pharnacia, but his words do not exclude the supposition that other towns contributed. He speaks of Cerasus as a distinct place, a small town in the same gulf as Hermonassa; and Hermonassa is near Trapezus. This is not quite consistent with Hamilton's position of Cerasus, which is in a bay between Coralla and Hieron Oros. Pliny also (vi. 2) distinguishes Pharnacia and Cerasus; and he places Pharnacia 100 Roman miles from Trapezus, and it may be as much by the road. Ptolemy also (v. 6) has both Cerasus and Pharnacia, but wrongly placed with respect to one another, for his text makes Pharnacia east of Cerasus. Mela (i. 19) only mentions Cerasus, and he styles Cerasus and Trapezus "maxime clarae;" but this can hardly be the Cerasus of Xenophon, if the author's statement applies to his own time. The confusion between Cerasus and Pharnacia is made more singular by the fact of the name *Keresoun* being retained at Pharnacia for which there is no explanation except in the assumption that the town was also called Cerasus, or a quarter of the town which some Cerasuntii occupied. Thus Sesamus was the name of a part of Amastris. [AMASTRIS.]

There is a story that L. Lucullus in his Mithridatic campaign sent the cherry to Italy from Cerasus, and that the fruit was so called from the place. (Anon. Marc. xxii. 8; Plin. xv. 25; and Harduin's note.) This was in B. C. 74; and in 120 years, says Pliny, it was carried to Britain, or in A. D. 46. [G. L.]

CERATA. [ATTICA, p. 322, a.]

CERAUNI'LIA (Κεραυνιλία), a town of Samnium or Apulia, mentioned by Diodorus (xx. 90) as taken by the Romans in the Second Samnite War, B. C. 311. The name is otherwise wholly unknown, as well as that of Cataracta (Καταράκτα) which accompanies it; Niebuhr suggests (*Hist. of Rome*, vol. iii. p. 245) that it may be the same with the Cesaunia which appears in the epitaph of Scipio Barbatus; but this is mere conjecture. Italian antiquaries identify it with the modern town of *Cerignola* in Apulia. (Romanelli, vol. ii. p. 259.) [E. H. B.]

CERAU'NII MONTES (τὰ Κεραύνια ὄρη) a range of mountains belonging to the system of Caucasus, at its E. extremity; but its precise relation to the main chain is variously stated. Strabo makes it the name of the E. portion of the Caucasus, which overhangs the Caspian and forms the N. boundary of Albania, and in which he places the Amazons (pp. 501, 504). Mela seems to apply the name to the whole chain which other writers call Caucasus, confining the latter term to a part of it. His Ceraunii are a chain extending from the Cimmerian Bosporus till they meet the Rhipaean mountains; overhanging on the one side, the Euxine, the Maeotis, and the Tanaïs, and on the other the Caspian; and containing the sources of the Rha (*Volga*); a statement which, however interpreted, involves the error of confounding the Caucasus and Ural chains. (Mela, i. 19. § 1; iii. 5. § 14.) Pliny gives precisely the same representation, with the additional error of making the Ceraunii (i. e. the Caucasus of others) part of the great Taurus chain. (Plin. v. 27, vi. 10. s. 11.) He seems to apply the name of Caucasus to the chains which spread out both to the NE. and SE. from the main chain near its E. extremity, and which he regarded as a continuous range, bordering the W. shore of the Caspian (vi. 9. s. 10). Eustathius also seems to regard them as a chain running northwards from the Caucasus. (Comment. *ad Dion. Per.* 389.) Ptolemy uses the name for the E. part of the chain, calling the W. portion Caucasii M., and the

Digitized by Google

part immediately above Iberia Caucasus in a narrower sense. (Ptol. v. 9. §§ 14, 15, 20, 22.) On the whole, it would seem that the Greek name Ceraunius and the native Caucasus (*Kawkas*) were applied at first indifferently to the highest mountains in the centre of the Caucasian isthmus, and afterwards extended, in a somewhat confused manner, to the whole, or portions, of the chain; and that the more accurate writers, such as Strabo and Ptolemy, adopted a specific distinction of a somewhat arbitrary character. The Ceraunii M. of Strabo seem to be the great NE. branch which meets the Caspian at the pass of *Derbend*, or perhaps the whole system of NE. spurs of which that is only one. It may fairly be conjectured that Mela and Pliny were ignorant how soon these spurs meet the Caspian, and hence their error in extending to meet the Rhipaei M. [P. S.]

CERAU'NII MONTES (Κεραύνια ὄρη, Strab. pp. 21, 281, 285, 316, seq., 324, et alibi: *Khimara*), a lofty range of mountains in the northern part of Epeirus, said to have derived their name from the frequent thunder storms with which they were visited. (Eustath. *ad Dionys.* 389; Serv. *ad Virg. Aen.* iii. 506.) They are sometimes also called ACROCERAUNII or ACROCERAUNIA, though this is properly the name of the promontory (τὰ ἄκρα Κεραύνια, Dion Cass. xli. 44) running out into the Ionian sea, now called *Glossa*, and by the Italians *Linguetta*.

The Ceraunian mountains extended several miles along the coast from the Acroceraunian promontory southwards, and rendered the navigation very dangerous. Hence Horace (*Carm.* i. 3. 20) speaks of *infames scopulos Acroceraunia* (comp. Lucan, v. 652; *Sil. Ital.* viii. 632). Inland the Ceraunian mountains were connected by an eastern branch with the mountains on the northern frontier of Thessaly. The inhabitants of the mountains were called Cemani. (Caes. *B. C.* iii. 6; Plin. iii. 22. s. 26; Ptol. iii. 16. § 8.) (Leake, *Northern Greece*, vol. i. pp. 2, seq., 88.)

CERAUSIUM. [LYCAEUS.]

CERBALUS, a river of Apulia, mentioned only by Pliny (iii. 11. s. 16), who makes it the northern boundary of the Daunians. It is now called the *Cervaro*, a considerable stream, which rises in the Apennines on the confines of Samnium, near *Ariano*, flows by *Boviano* (Vibinum), and after traversing the plain of Apulia, receives the waters of the *Candelaro* just before it enters the Adriatic near Siponto. Procopius (*B. G.* iii. 18) speaks of a place called Cervarium (Κερβάριον) in Apulia, which derived its name from this river. [E.H.B.]

CERBANI. [CARBAE.]

CERBERION. [CIMMERIUM.]

CERBESII (Κερβήσιοι), a Phrygian tribe mentioned in a verse of Alcman, quoted by Strabo (p. 580), but the people were unknown in Strabo's time. He mentions also a hole or chasm, called Cerbesium, which emitted pestilential vapours; but he does not say where it is. [G. L.]

CERBIA (Κερβεία, Κερμία, Const. Porph. *de Them.* i. 39; Κερβοία, Κιρβοῖα, Hierocl.), a town of Cyprus, which D'Anville places near the promontory of Crommyon. Wesseling (*ap. Hierocl. s. v.* Κιρβία) supposes it to be the same place as the Cretan town of the poet Nonnus (*Dionys.* xiii. 455). (Engel *Kypros*, vol. i. pp. 77, 158.) [E. B. J.]

CERCASO'RUM, or CERCASO'RA (Κερκάσωρον, Herod. ii. 15, 17, 97; Κερκάσουρα, Strab. xvii. p. 806; Mela, i. 9. § 2: *El Arkus*), was, from its position, as the key of Middle and Lower Egypt, a town of great importance, both in a military and a commercial point of view. Cercasorum stood in lat. 30° 3′ N., at the apex of the Delta, and on the western or Canobic arm of the Nile. At this point, about ten miles below Memphis, the Nile ceases to be a simple stream, and branches off into numerous channels, while the hills which throughout the Thebaid and the Heptanomis embosom or skirt its banks, here diverge right and left, and sink gently down upon the Deltaic level. The Delta, in the present day, commences 6 or 7 miles lower down the river, at *Batn-el-Baharah*. (Rennell's *Geog. of Herod.* vol. ii. p. 133.) [W.B.D.]

CE'RCETAE (Κερκέται, Strab. &c.; Κερκέτιοι, Dion. Perieg. 682; Κερκεταῖοι, Hellanic. fr. 91), one of the peoples of Sarmatia Asiatica, who occupied the NE. shore of the Euxine, between the Cimmerian Bosporus and the frontier of Colchis, but whose relative positions are not very exactly determined: their coast abounded in roadsteads and villages. (Hellanic. *l. c.*; Strab. xi. pp. 496, 497; Ptol. v. 9. § 25; Steph. B. *s. v.*; Mela, i. 19. § 4; Plin. vi. 5.) Their name is now applied to the whole western district of the Caucasus, in the well known forms of *Cherkas* for the people, and *Cherkaskaia*, or *Circassia*, for the country. [P. S.]

CERCI'NA, or CERCENNA (Κέρκινα, Κέρκιννα: *Karkenah*, or *Ramlah*); and CERCINI'TIS (Κερκινῖτις, Κερκιννῖτις: *Gherba*); two islands off the E. coast of Africa Propria, at the NW. extremity of the Lesser Syrtis, the opposite extremity of which was formed by the island of MENINX, which Strabo reckons about equal in size to Cercinna. The two islands lie NE. and SW. as to the direction of their length, Cercinna being on the NE. and Cercinitis on the SW. They were joined by a mole. Cercina, which was much the larger, is reckoned by Pliny 25 M. P. long, and half as broad. Upon it was a city of the same name. The Maritime Itinerary makes Cercenna (Cercina) 622 stadia from TACAPE at the bottom of the Syrtis (Strab. ii. p. 123, xvii. pp. 831, 834; Ptol. iv. 3. § 45; Dion. Perieg. 480; *Stadiasm.* p. 456; *Itin. Ant.* p. 518; Mela, ii. 7. § 7; Plin. v. 7). Cercina, to which the smaller island seems to have been considered a mere appendage, is often mentioned in history. (Plut. *Dion*, 43; Diod. v. 12; Polyb. iii. 96; Liv. xxxiii. 48; Hirt. *Bell Afr.* 34, comp. Strab. xvii. p. 831; Tac. *Ann.* i. 55, iv. 13; comp. CYRAUNIS.) [P. S.]

CERCINE (Κερκίνη, Thuc. ii. 98; Κερκετήσιον or Βερκετήσιον, Ptol. iii. 13. § 19: *Karadagh*), the uninhabited mountain chain which branched off from Haemus in a SE. direction, and formed the water-shed to the streams which feed the rivers Axius and Strymon. Sitalces, in his route from Thrace into Macedonia, crossed this mountain, leaving the Paeonians on his right, and the Sinti and Maedi on his left descending upon the Axius at Idomene. [E. B. J.]

CERCINI'TIS (Κερκινῖτις λίμνη, Arrian, *Anab.* i. 11. § 3: *Takhyno*), the large lake lying at the N. foot of the hill of Amphipolis, which Thucydides (v. 7) accurately describes by the words τὸ λιμνάδες τοῦ Στρυμόνος, as it is, in fact, nothing more than an enlargement of the river Strymon, varying in size according to the season of the year, but never reduced to that of the river only, according to its dimensions above and below the lake. Besides the Strymon, the Augitas contributes to the inundation as well as some other smaller streams from the mountains on either side.

Digitized by Google

The lake PRASIAS (Πρασιάς), with its amphibious inhabitants who are described by Herodotus (v. 16) as living on the piles and planks procured from Mount Orbelus, with which they constructed their dwellings on the lake, was the same as the Strymonic lake, or Cercinitis. (Leake, *Northern Greece*, vol. iii. p. 211.) [E. B. J.]

CERCINIUM, a town in Thessaly, near the lake Boebeis. (Liv. xxxi. 41; Leake, *Northern Greece*, vol. iv. p. 449, seq.)

CERCOPIA (Κερκωπία), a town of Phrygia Magna (Ptol. v. 2). Its site is unknown. [G. L.]

CERDYLIUM. [AMPHIPOLIS.]

CEREA (Κερέα, Steph. B. *s. v.* Βήτη; Suid. *s. v.* Ῥιανός; *Eth.* Κρεάτης, Polyb. iv. 53. § 6), a town of Crete, which from its mention by Polybius (*l.c.*), and from a coin with the epigraph KEPAITAN, and presenting the same *type* as those of Polyrrhenia, has been inferred to have been in the neighbourhood of that town. (Eckhel, vol. ii. p. 306; Hoeck, *Kreta*, vol. i. p. 392.) [E. B. J.]

CEREAE, a place in Asia Minor, fixed by the Table on the road between Amastris (or Mastrum, as it appears in the Table), and Sinope. The Table places Tyca 20 miles east of Amastris, and Cereae 15 miles east of Tyca. The place seems to be unknown. [G. L.]

CEREATAE (Κερεάτε, Strab.; Κιῤῥαῖται, Plut.; *Eth.* Cereatinus), a town of Latium, mentioned by Strabo (v. p. 238) among those which lay on the left of the Via Latina, between Anagnia and Sora. There is no doubt that it is the same place called by Plutarch Cirrhaeatae, which was the birth-place of C. Marius. (Plut. *Mar.* 3.) He terms it a village in the territory of Arpinum; it appears to have been subsequently erected into a separate municipium, probably by Marius himself, who seems to have settled there a body of his relations and dependents. It subsequently received a fresh body of colonists from Drusus, the stepson of Augustus. Hence the "Cereatini Mariani" appear among the Municipia of Latium in the time of Pliny. (Plin. iii. 5. s. 9; Lib. Colon. p. 233; Zumpt, *de Colon.* p. 361.) The passage of Strabo affords the only clue to its position; but an inscription bearing the name of the Cereatini Mariani has been discovered at the ancient monastery of *Casa Mara* or *Casamari*, about half way between Verulae and Arpinum, and 3 miles W. of the Liris. It is thus rendered probable that this convent (which is built on ancient foundations) occupies the site of Cereatae, and retains in its name some trace of that of Marius. (*Bull. d. Inst. Arch.* 1851, p. 11.) We learn from another inscription that there was a branch of the Latin way which communicated directly with Arpinum and Sora, passing apparently by Cereatae. (*Ibid.* p. 13.) [E. H. B.]

CEREBELLIACA (Mutatio Cerebelliaca), a station in Gallia, placed in the Jerusalem Itin., between Valentia (*Valence*) and Mansio Augusta (*Aoust*). The Itin. makes it xii. M. P. from Valentia to Cerebelliaca, and x. from Cerebelliaca to Augusta. The Antonine Itin. makes the same distance between Valentia and Augusta, but omits Cerebelliaca. The site can only be guessed at. D'Anville supposes that it may be *Chabuil*, but adds that this place is nearer *Valence* than *Aoust*. Walckenaer names a place *Les Chaberles Montoison*, as the site of Cerebelliaca. [G. L.]

CERESSUS (Κερησσός), a strong fortress in Boeotia, in the neighbourhood of, and belonging to Thespiae. The inhabitants of Ceressus retired to this fortress after the battle of Leuctra. It was probably situated at *Paleopanaghia*. (Paus. ix. 14. § 2; Leake, *Northern Greece*, vol. ii. pp. 490, 491.)

CERESUS. [IACCETANI.]

CERETAPA (τὰ Κερέταπα: *Eth.* Κερεταπηνός), a town of Phrygia Pacatiana. The Ethnic name is known from the coins, which also show that there was near it a river or fountain Aulindenus. The place had also the name Diocaesarea. Some geographers fix it near Colossae. [G. L.]

CERFENNIA, a town of the Marsi, not mentioned by Pliny or the other geographers, but placed by the Itineraries on the Via Valeria, 13 miles from Alba Fucensis, and 17 from Corfinium. Its site is fixed by Holstenius at the foot of the hill on which stands the modern village of *Coll Armato*, where an old church of *Sta Felicita* still bears in ecclesiastical records the adjunct *in Cerfenna*. It was at the foot of the remarkable pass over the Apennines called in the Tabula the Mons Imeus (now the *Forca Caruso*), which led from thence to Corfinium. From an inscription published by Holstenius (Orell. *Inscr.* 711) we learn that this part of the Via Valeria was first constructed, or at least rendered passable for carriages, by the emperor Claudius, who continued it from Cerfennia to the Adriatic at the mouth of the Aternus. (Itin. Ant. p. 309; Tab. Peut.; Holsten. *Not. in Cluv.* pp. 153, 154; D'Anville, *Anal. Géogr. de l'Italie*, p. 173; Kramer, *Fuciner See*, pp. 60, 61.) For the discussion of the distances along this route, see Via VALERIA. [E. H. B.]

CERGE (Κέργη), a place in Mysia, mentioned by Hierocles, quoted by Forbiger, who suggests that the name ought to be Certe, as there is a place *Kertesli-k*, on the Rhyndacus, where, he says, there are ruins; but Hamilton (*Lond. Geog. Journ.* vii. 35), who was at the place, does not mention ruins. [G. L.]

CERILLAE, or CERILLI (Κήριλλοι, Strab.; CERILLAE, Sil. Ital. viii. 581), a town of Bruttium on the coast of the Tyrrhenian Sea, a few miles S. of the river Laus. Silius Italicus tells us (l.c.) that it was laid waste by Hannibal during the Second Punic War, and probably never recovered: its name is not found either in Pliny or Ptolemy, and is merely incidentally noticed by Strabo (vi. p. 255) as a small place near Laus. It is also found under the slightly corrupted form Cerilis in the Tab. Peut., which places it 8 miles S. of the river Laus; and the name is still retained by the village of *Cirella Vecchia*, about 5 miles from the river. (Barr, *de Sit. Calabr.* p. 53; Romanelli, vol. i. p. 23.) Strabo gives the distance from this across the isthmus of the Bruttian peninsula to the nearest point of the Tarentine Gulf in the territory of Thurium, at 300 stadia, or 30 G. miles, which is almost precisely correct. [E. H. B.]

CERINTHUS (Κήρινθος: *Eth.* Κηρινθεύς), a town upon the north-eastern coast of Euboea, and near the small river Budorus, said to have been founded by the Athenian Cothus. It is mentioned by Homer, and was still extant in the time of Strabo, who speaks of it as a small place. (Hom. *Il.* ii. 538; Scymn. Ch. 576; Strab. x. p. 446; Apollod. E. i. 79; Ptol. iii. 15. § 25; Plin. iv. 12. s. 21.)

CERNE (Κέρνη), an island of the Atlantic on the W. coast of Africa, discovered and colonized in the voyage of Hanno, and from that time the great emporium for the Carthaginian trade with W. Africa

Digitized by Google

It lay in a bay, 3 days' voyage S. and E. of the river Lixus; was about 5 stadia in circuit; and was reckoned by Hanno as far from the Pillars of Hercules as the Pillars were from Carthage; and as being in a straight line with Carthage (κατ' εὐθὺ εἶται Καρχηδόνος), by which he seems to mean on the same meridian, falling into the error, afterwards repeated by Ptolemy, of making the W. coast of Africa to end E. of S. instead of W. of S. (Hanno, p. 3.) Scylax places it near the river Xion (which no other writer mentions: it seems to be the Lixus of Hanno and others), 7 days' voyage from the promontory Soloeis, and 12 days' voyage from the Straits; he adds that the sea was unnavigable beyond it on account of the shoals and mud and sea-weed (but Hanno advanced much further); and he proceeds to describe the trade carried on there by the Phoenicians with the Ethiopians. (Scylax, *Peripl.* pp. 53—55.) Dionysius Periegetes places it at the S. extremity of Aethiopia (217—219):—

Ἔν δὲ μυχοῖσι
Βόσκοντ' ἠπείροιο πανύστατοι Αἰθιοπῆες,
οἵτῳ ἐπ' Ὠκεανῷ πυμάτης παρὰ τέμπεα Κέρνης.

Polybius placed the island at the extreme S. of Mauretania, over against M. Atlas, one M. P. from the shore. (Plin. vi. 31. s. 36, comp. x. 8. s. 9.) Ptolemy mentions it as one of the islands adjacent to Libya, in the W. Ocean, in 5° long. and 23° 40′ N. lat., 40′ N. of the mouth of his river Subus. (Ptol. iv. 6. § 33; comp. § 5.) Diodorus, in his mythical narrative of the war of the Amazons of the lake Tritonis against the Atlanteans, mentions Cerne as an island and city of the latter, and as taken with immense slaughter by the former (Diod. iii. 54; comp. Palaephat. 32). Strabo only mentions Cerne in order to ridicule Eratosthenes for believing in its existence. (Strab. i. p. 47.)

The position of Cerne has been much discussed by modern geographers; and, indeed, the geography of Hanno's voyage turns very much upon it. [Libya.] The extreme views are those of Gosselin and Rennell. The former, who carries the whole voyage of Hanno no further S. than *C. Nun*, in about 28° N. lat., identifies Cerne with *Fedallah*, on the coast of *Fez*, in about 33° 40′ N. lat., which is pretty certainly too far N. Major Rennell places it as far S. as *Arguin*, a little S. of the southern *C. Blanco*, in about 20° 5′ N. lat. Heeren, Mannert, and others, adopt the intermediate position of *Agadir*, or *Santa Cruz*, on the coast of *Marocco*, just below *C. Ghir*, the termination of the main chain of the Atlas, in about 30° 20′ N. lat. A sound decision is hardly possible; but, on the whole, the weight of evidence seems in favour of Rennell's view. (Rennell, *Geography of Herodotus*, sect. 26, vol. ii. pp. 415, 416, 419—423; Heeren, *Researches, &c., African Nations*, vol. i. app. v. pp. 497—500.) [P. S.]

CERO'NES (Κέρωνες), in Britain, mentioned by Ptolemy (ii. 3. § 11), as lying next to the Epidii, and to the west of the Creones; the Epidii being to the east of the Promontory Epidium (= *Mull of Cantyre*). Parts of *Dumbarton* and *Argyleshire* are the likeliest modern equivalents. [R. G. L.]

CERRETA'NI (Κερρητανοί, Strab. iii. p. 162; Ath. xiv. p. 657; Κερροιτανοί, Ptol. ii. 6. § 69), a small people of Hispania Tarraconensis, in the valleys on the S. side of the Pyrenees, especially the upper valley of the river Sicoris (*Segre*), which still retains the name of *Cerdagne*. They were of Iberian race, and were celebrated for the curing of hams, which rivalled those of Cantabria, and brought them large profits. (Strab., Ath. *ll. cc.*; Mart. xiii. 54; Sil. Ital. iii. 358.) They were situated W. of the Ausetani and N. of the Ilergetes (Ptol.). In Pliny's time, they were divided into the Juliani and Augustani (Plin. iii. 3. s. 4). The only city mentioned as in their country (except perhaps the Brachyle of Stephanus Byz. *s. v.* Βραχύλη) is Julia Libyca (Ἰουλία Λίβυκα), near *Puigcerda*. (Marc. *Hisp.* p. 59; Florez, *Esp. S.* vol. v. p. 10, Append. vol. xxiv. p. 27; Ukert, vol. ii. pt. i. p. 427.) [P. S.]

CERSUS (Κέρσος, Xen. *Anab.* i. 4. § 4). [Amanus, p. 116.]

CERTIMA. [Celtiberia.]

CERTO'NIUM, or CERTO'NUS (Κερτώνιον, Κερτωνός), a place in Mysia, only mentioned by Xenophon (*Anab.* vii. 8. § 8), on the road between Adramyttium and Atarneus. It has been conjectured that it may be the Cytonium (Κυτώνιον) of Theopompus (Steph. *s. v.* Κυτώνιον). But Cytonium was between Mysia and Lydia; and Xenophon's Certonus is in Mysia. [G. L.]

CERVA'RIA (*Cervera*), a place in Gallia close to the eastern termination of the Pyrenees, or as Mela (ii. 5) describes it, according to the text of Vossius, "between the promontoria of the Pyrenaeus are Portus Veneris, celebrated for a temple, and Cervaria, the limit of Gallia." It was in the country of the Sordones or Sardones. *Cervera* or *Serbera* is the name of a cape north of Cap *Creux*. At present it is not within the limits of France, but belongs to *Catalonia*. [G. L.]

CERYCEIUM. [Boeotia, p. 414, a.]

CERYNEIA (Κερυνεία, Scyl.; Κερυνία, Κερωνία, Κεραυνία, Ptol. v. 14. § 4; Diod. xiv. 59; Κορώνεια, Κορώνη, Steph. B.; Κυρηνία, Hierocl.; Κυρηνεία, Const. Porph.; Κυνύρεια, Nonnus; Corineum, Plin.; Cerines, *Peut. Tab.*: *Eth.* Κερυνίτης, Κερονίτης), a town and port on the N. coast of Cyprus 8 M.P. from Lapethus (*Peut. Tab.*). The harbour, bad and small as it is, must upon so iron a bound coast as that of the E. part of the N. side of Cyprus, have always insured to the position a certain degree of importance. Though little is known of it in antiquity it became famous in the middle ages. (Wilken, *die Kreuz*, vol. vi. p. 542.) It is now called by the Italians *Cerine*, and by the Turks *Ghirne*. On the W. side of the town are some catacombs, the only remains of ancient Cerynia. (Leake, *Asia Minor*, p. 118; Mariti, *Viaggi*, vol. i. p. 116; Engel, *Kypros*, vol. i. p. 80.) [E. B. J.]

CERYNEIA (Κερύνεια, also Κερυνία, Κεραυνία, Κεραύνεια, &c.: *Eth.* Κερυνεύς; respecting the orthography, see Schweigh. *ad Pol.* ii. 41; Wesseling, *ad Diod.* xv. 48; and Groskurd, *ad Strab.* vol. ii. p. 110: the two former adopt the form Κερύνεια, the latter Κεραυνία), a town of Achaia, was not originally one of the 12 Achaean cities, though it afterwards became so, succeeding to the place of Aegae. Its population was increased by a large body of Mycenaeans, when the latter abandoned their city to the Argives in 468. Ceryneia is mentioned as a member of the League on its revival in B. C. 280; and one of its citizens, Marcus, was chosen in 255 as the first sole General of the League. In the time of Strabo, Ceryneia was dependent upon Aegium. It was situated inland upon a lofty height, W. of the river Cerynites (*Bokhusia*), and a little S. of Helice. Its ruins have been discovered on the height, which rises above the left bank of the Cerynites, just where it issues from the mountains into the plain. (Pol. ii. 41, 43; Paus. vii. 6. § 1, vii. 25. § 5; Strab.

Digitized by Google

p. 387; Boblaye, *Recherches, &c.*, p. 25; Leake, *Peloponnesiaca*, p. 388.) Theophrastus stated that the wine of Cerynela produced abortion. (Theophr. *Hist. Plant.* ix. 20; comp. Athen. p. 31; Aelian, *V. H.* xiii. 6.)

CERYNITES. [ACHAIA, p. 13, b.]

CESA'DA. [AREVACAE.]

CESERO or CESSERO, a town of Gallia Narbonensis, in the territory of the Volcae Tectosages (Ptol. ii. 3). The Itin. and the Table fix its position on the great Roman road from Arelate (*Arles*) to Narbo (*Narbonne*). The distance from Cessero to Baeterrae (*Béziers*) is 12 M. P., and the site of Cessero corresponds to *St. Tiberi* on the river *Hérault*. D'Anville shows that the monastery of *St. Tiberi* is called Cesarion in a document of A. D. 867. As the place was on the river, this explains the fact of its being named in the Antonine Itin. "Araura sive Cessero." [G. L.]

CESTRINE (Κεστρίνη, Thuc. Paus.; Κεστρινία, Steph. B. *s. v.* Καμμανία; Κεστρία, Steph. B. *s. v.* Τροία), a district of Epeirus in the south of Chaonia, separated from Thesprotia by the river Thyamis. (Thuc. i. 46.) It is said to have received its name from Cestrinus, son of Helenus and Andromache, having been previously called Cammania. (Paus. i. 11. § 1, ii. 23. § 6; Steph. B. *s. v.* Καμμανία.) The principal town of this district is called Cestria by Pliny (iv. 1), but its more usual name appears to have been Ilium or Troja, in memory of the Trojan colony of Helenus. (Steph. B. *s. v.* Τροία.) The remains of this town are still visible at the spot called *Palea Venetia*, near the town of *Filiates*. In the neighbourhood are those fertile pastures, which were celebrated in ancient times for the Cestrinic oxen. (Hesych. *s. v.* Κεστρινικοὶ Βοές; Schol. *ad Aristoph. Pac.* 924.) The inhabitants of the district were called Κεστρηνοί by the poet Rhianus (Steph. B. *s. v.* Χαῦνοι). (Leake, *Northern Greece*, vol. iv. pp. 73, 175.)

CESTRUS (Κέστρος), a river of Pamphylia, which rises in the mountains of Selge (Strab. p. 571). The course of the Cestrus is between that of the Catarrhactes and of the Eurymedon; and it is east of the Catarrhactes. It was navigable up to Perge, 60 stadia from its mouth (p. 667). The river is also mentioned by Mela as a navigable river (i. 14). The Cestrus is 300 ft. wide at the mouth, and 15 ft. deep within the bar, which extends across the mouth, and "so shallow as to be impassable to boats that draw more than one foot of water." The swell from the sea meeting the stream generally produces a violent surf. (Beaufort, *Karamania*, p. 142.) It must have been more open in ancient times, according to Strabo and Mela. No modern name is given to this river by Beaufort. Leake (*Asia Minor*, p. 194) names it the *Ak-su*, apparently on the authority of Koehler, and Fellows (*Asia Minor*, p. 194) gives it the same name. [G. L.]

CETAEUM. [TAPROBANE.]

CETA'RIA (Κηταρία, Ptol. iii. 1. § 4: *Eth.* Cetarinus), a small town of Sicily, placed by Ptolemy, the only author who affords any clue to its position, on the N. coast of the island between Panormus and Drepanum, but its exact site is uncertain. Fazello and Cluver fix it at the *Torre di Scupello* on the W. side of the Gulf of *Castellamare*; but if the river Bathys of Ptolemy, which he enumerates immediately after it, be the modern *Iati*, or *Fiati*, the position suggested for Cetaria is untenable. Its name was probably derived from its being the seat of tunny fisheries (cetaria): hence we should probably read Cetarini for Citarini in Cicero as well as Pliny. The former tells us it was a very small town, though enjoying its separate municipal rights. Pliny enumerates it among the stipendiary cities of Sicily. (Cic. *Verr.* iii. 43; Plin. iii. 8. s. 14.) [E. H. B.]

CETIS or CITIS. [CALYCADNUS.]

CE'TIUM, a Roman municipium in the extreme east of Noricum, at the foot of mount Cetius, from which it derived its name. (Itin. Ant. p. 234; Grut. *Inscript.* p. 462, where it is called *Aelia Cetium*.) Its exact site is only matter of conjecture. [L. S.]

CETIUS MONS (Κετιον ὄρος: *Kahlenberg*), a mountain of Noricum on the borders of Upper Pannonia (Ptol. ii. 14. § 1, 15. § 1), extending from Aemona to the Danube, and terminating in the west of Vindobona. [L. S.]

CETIUS (Κήτιον), a branch of the Caicus, a river of Mysia. Pliny (v. 30) says "Pergamum, which the Selinus flows through, Cetius flows by, descending from Mount Pindasus." Strabo (p. 616) mentions a mountain torrent Cetion, which rises in the Eleatis, and falls into another like torrent, this into another, and finally into the Caicus. Some maps make this river flow from the north, and join the Caicus on the right bank; but Strabo's river must fall into the Caicus on the left bank. It may have given name to the Cetei (Κήτειοι), though Strabo professes not to know who the Cetei were, nor to understand the verse of the Odyssey (xi. 521) where they are mentioned. [G. L.]

CETOBRI'GA. [CAETOBRIX.]

CEUTRONES, a people mentioned by Caesar (*B. G.* v. 39) as subject to the Nervii. They are not mentioned by any other writer, and their position is unknown. [G. L.]

CEVELUM, a place in North Gallia, according to the Table, on the road between Noviomagus (*Nymegen*) and Atuaca, that is Aduatuca (*Tongern*). It is placed between Noviomagus and Blariacum (*Bérick*), both well known positions. D'Anville supposes that the position of Cevelum may be Asch on the *Maas*, though he admits that the distance from *Nymegen* is twice as much as the Table gives. Walckenaer selects *Clevesburg* as the spot. [G. L.]

CEVENNA. [CEBENNA.]

CHA'BALA (Χαβάλα, Ptol. v. 12. § 6), a city of Albania, evidently the same which Pliny calls Cabalaca, and makes the capital of the country. [ALBANIA.]

CHABO'RAS (Χαβώρας, Ptol. v. 18. § 3; Plin. xxx. 3; CHABURA, Procop. *B. P.* ii. 5; ABORRHAS, Ἀβόρρας, Strab. xvi. p. 747; Zosim. iii. 13; ABUR, Amm. Marc. xiv. 3, xxiii. 5; ABURAS, Ἄβουρας, Isid. Char. p. 4), a large river of Mesopotamia which rises in M. Masius, about 40 miles from Nisibis, and flows into the Euphrates at Circesium (*Kerkesiah*). Its present name is *Khabûr*. There is no doubt, that though differently spelt, the names all represent the same river, being only dialectical variations, or changes from the use of different interpirates. Procop. (*l. c.*) speaks of it as a river of importance, and Ammianus states that Julian crossed it "per navalem Aborae pontem." Strabo describes it as near the town of Anthemusia. Bochart conjectured that the Chaboras is the same as the Araxes of Xenophon (*Anab.* i. 4. § 19); but though we have stated elsewhere that this is probable [ARAXES, No. 4], we are disposed, upon reconsideration, to reject the conjecture, since the

IA (Χαιρώνεια: *Eth.* Χαιρωνεύς, dj. Χαιρωνικός: *Kápurna*), a town ated near the Cephissus, upon the . The town itself does not appear much importance; but it has ob- brity in consequence of the battles t in its neighbourhood. Its position d it the scene of military operations, a small plain, which commanded n Phocis into Boeotia, and which d be occupied by an army desirous otia from an invading force. Chae- ed at the head of the plain, shut in ing rock, which formed, in ancient el of the town, and was called trochus (Πέτραχος, Paus. ix. 41. Plut. *Sull.* 17). The town lay at ill, and is said to have derived its on, who, according to the statement lt it towards the east, whereas it aced the west. (Paus. ix. 40. § 5; Plut. *de Curiosit.* 1.)

not mentioned by Homer; but by ient writers it was supposed to be s the Boeotian Arne. (Hom. *Il.* ii. No. 2.] In the historical period it upon Orchomenus (Thuc. iv. 67). ed in B. C. 447, when an important near the town, in consequence of ians lost the supremacy which they a short period in Boeotia. Chae- usly been in the hands of the party Athenians; but having been seized party, Tolmides, at the head of a rce, marched against it. He suc- he town, but was shortly afterwards defeated by the Boeotians in the neighbourhood, and fell in the battle. (Thuc. i. 113; Diod. xii. 6.) In B. C. 424 a plot was formed to betray the town to the Athenians, but the project was betrayed, and the place was occupied by a strong Boeotian force. (Thuc. iv. 76, 89.) In the Phocian war Chaeroneia was unsuccessfully besieged by Onomarchus, the Phocian leader, but it was afterwards taken by his son Phalaecus. (Diod. xvi. 33, 39.)

Another and much more celebrated battle was fought at Chaeroneia on the 7th of August, B. C. 338, in which Philip, by defeating the united forces of the Athenians and Boeotians, crushed the liberties of Greece. Of the details of this battle we have no account, but an interesting memorial of it still remains. We learn from Pausanias (ix. 40. § 10) and Strabo (ix. p. 414) that the sepulchre of the Thebans who fell in the battle, was near Chaeroneia; and the former writer states that this sepulchre was surmounted by a lion, as an emblem of the spirit of the Thebans. The site of the monument is marked by a tumulus about a mile, or a little more, from the khan of *Kápurna*, on the right side of the road towards Orchomenus; but when the spot was visited by Leake, Dodwell and Gell, the lion had completely disappeared. A few years ago, however, the mound of earth was excavated, and a colossal lion discovered, deeply imbedded in its interior. "This noble piece of sculpture, though now strewed in detached masses about the sides and interior of the excavation, may still be said to exist nearly in its original integrity. It is evident, from the appearance of the fragments, that it was composed from the first of more than one block, although not certainly of so many as its remains now exhibit. . . . . This lion may, upon the whole, be pronounced the most interesting sepulchral monument in Greece. It is the only one dating from the better days of Hellas—with the exception perhaps of the tumulus of Marathon—the identity of which is beyond dispute." (Mure.)

The third great battle fought at Chaeroneia was the one in which Sulla defeated the generals of Mithridates in B. C. 86. Of this engagement a long account is given by Plutarch, probably taken almost verbatim from the commentaries of Sulla. (Plut. *Sull.* 17, seq.) The narrative of Plutarch is illustrated by Col. Leake with his usual accuracy and sagacity. Mount Thurium, called in the time of Plutarch, Orthophagium, the summit of which was seized by Sulla, is supposed by Leake to be the highest point of the hills behind Chaeroneia; and the torrent Morius, below Mount Thurium, is probably the rivulet which joins the left bank of the Cephissus, and which separates Mt. Hedylium from Mt. Acontium.

Chaeroneia continued to exist under the Roman empire, and is memorable at that period as the birthplace of Plutarch, who spent the later years of his life in his native town. In the time of Pausanias Chaeroneia was noted for the manufacture of perfumed oils, extracted from flowers, which were used as a remedy against pain. (Paus. ix. 41. § 6.)

Chaeroneia stood upon the site of the modern village of *Kápurna*. There are not many remains of the ancient city upon the plain; but there are some ruins of the citadel upon the projecting rock already described; and on the face of this rock, fronting the plain, are traces of the ancient theatre. In the church of the Panaghía, in the village, are several remains of ancient art, and inscriptions. From the latter we learn that Serapis was worshipped in the

Digitized by Google

town. Pausanias does not mention the temple of this deity; but he states that the principal object of veneration in his time was the sceptre of Zeus, once borne by Agamemnon, and which was considered to be the undoubted work of the god Hephaestus. At the foot of the theatre there rises a small torrent, which flows into the Cephissus. It was called in ancient times Haemon or Thermodon, and its water was dyed by the blood of the Thebans and Boeotians in their memorable defeat by Philip. (Plut. *Dem.* 19; Leake, *Northern Greece*, vol. ii. pp. 112, seq., 192, seq.; Mure, *Tour in Greece*, vol. i. p. 212, seq.; Ulrichs, *Reisen in Griechenland*, p. 158, seq.)

CHALA (Χάλα, Isid. Char. p. 5), a town in the eastern part of ancient Assyria, probably the capital of the district called CHALONITIS, a name which is preserved in that of the river of *Holwan* (Χαλωνῖτις, Strab. xi. pp. 529, 736; Dionys. Perieg. 1015; Plin. vi. 26. s. 30; Καλωνῖτις, Polyb. v. 54). Chala is within a short distance of the M. Zagros. Diodorus (xvii. 110) relates that Xerxes, on his return from Greece, placed a colony of Boeotians in this neighbourhood, which was called from their native town CELONAE (Κέλωναι). They were most likely placed along the banks of the *Holwan* river. Chala has been sometimes connected with Colacene, but its position does not answer to this identification. Pliny erred in placing the district Chalonitis on the Tigris, as it was clearly to the E. close to the mountains. [V.]

CHALAEUM (Χάλαιον; in Ptol. iii. 15. § 3, Χαλεών: *Eth.* Χαλαῖος), a town upon the coast of the Locri Ozolae, near the borders of Phocis. Leake places it at *Larnáki*. Pliny erroneously calls it a town of Phocis, and says that it was situated seven miles from Delphi: it is not improbable that he confounded it with Cirrha, which is about that distance from Delphi. (Thuc. iii. 101; Hecataeus, *ap. Steph. s. v.*; Plin. iv. 3. s. 4; Leake, *Northern Greece*, vol. ii. p. 594.)

CHALASTRA (Χαλάστρα, Strab. vii. p. 330; Χαλέστρη, Herod. vii. 123; Χαλαίστρα, Plut. *Alex.* 49; Plin. iv. 10. § 17, xxxi. 10. § 46), a town of Mygdonia in Macedonia, situated on the Thermaean gulf at the right of the mouth of the Axius, which belonged to the Thracians and possessed a harbour. (Steph. B. *s. v.*) Perseus, king of Macedonia, barbarously put all the male inhabitants to death. (Diod. *Excerpt.* 308.) Afterwards the population, with that of other towns of Mygdonia, was absorbed in great measure by Thessalonica on its foundation by Cassander. It cannot, therefore, be expected that many remains should be existing. The site may, however, be considered to be at or near the modern *Kulakiá*. (Tafel, *Thessalon.* p. 277; Leake, *Northern Greece*, vol. iii. p. 450.) [E. B. J.]

CHALCE'DON (Χαλκηδών: *Eth.* Χαλκηδόνιος or Χαλκιδεύς), "a city of Bithynia, at the entrance of the Pontus, opposite to Byzantium," as Stephanus (*s. v.* Χαλκηδών) describes it; and a colony of the Megareis. (Thuc. iv. 75.)

The tract about Chalcedon was called Chalcedonia. (Herod. iv. 85.) According to Menippus, the distance along the left-hand coast from the temple of Zeus Urius and the mouth of the Pontus to Chalcedon was 120 stadia. All the coins of Chalcedon have the name written Καλχήδων, and this is also the way in which the name is written in the best MSS. of Herodotus, Xenophon, and other writers, by whom the place is mentioned. The distance from Chalcedon to Byzantium was reckoned seven stadia (Plin. v. 32), or as it is stated by Pliny elsewhere (ix. 15), one Roman mile, which is eight stadia. Polybius (iv. 39) makes the distance between Chalcedon and Byzantium 14 stadia; which is much nearer the mark. But it is difficult to say from what points these different measurements were made. The distance from *Scutari* (Chrysopolis) to the Seraglio point in Constantinople (according to a survey in the Hydrographical office of the Admiralty) is nearly one nautical mile. In the same chart a place *Caledonia* is marked, but probably the imitation is not worth much. Chalcedon, however, must have been at least two miles south of *Scutari*, perhaps more; and the distance from Chalcedon to the nearest point of the European shore is greater even than that which Polybius gives. Chrysopolis, which Strabo calls a village, and which was in the Chalcedonia (Xenophon, *Anab.* vi. 6, 38), was really at the entrance of the Bosporus on the side of the Propontis, but Chalcedon was not. It is stated that the modern Greeks give to the site of Chalcedon the name *Chalkedon*, and the Turks call it *Kadi-Kioi*. The position of Chalcedon was not so favourable as that of the opposite city of Byzantium, in the opinion of the Persian Megabazus (Herod. iv. 144), who is reported to have said that the founders of Chalcedon must have been blind, for Chalcedon was settled seventeen years before Byzantium; and the settlers, we must suppose, had the choice of the two places. It was at the mouth of a small river Chalcedon (Eustathius ad Dionys. Perieg. v. 803) or Chalcis. Pliny (v. 32) states that Chalcedon was first named Procerastis, a name which may be derived from a point of land near it: then it was named Colpusa, from the form of the harbour probably; and finally Caecorum Oppidum, or the town of the blind. The story in Herodotus does not tell us why Megabazus condemned the judgment of the founders of Chalcedon. Strabo (p. 320) observes that the shoals of the pelamys, which pass from the Euxine through the Bosporus, are frightened from the shore of Chalcedon by a projecting white rock to the opposite side, and so are carried by the stream to Byzantium, the people of which place derive a great profit from them. He also reports a story that Apollo advised the founders of Byzantium to choose a position opposite to the blind; the blind being the settlers from Megara, who chose Chalcedon as the site of their city, when there was a better place opposite. Pliny (ix. 15) has a like story about the pelamys being frightened from the Asiatic shore; and Tacitus (*Ann.* xii. 63) has the same story as Strabo. The remarks of Polybius on the position of Byzantium and Chalcedon are in his fourth book (c. 39, &c.).

Chalcedon, however, was a place of considerable trade, and a flourishing town. It contained many temples, and one of Apollo, which had an oracle. Strabo reckons his distances along the coast of Bithynia from the temple of the Chalcedonii (p. 543, and p. 546). When Darius had his bridge of boats made for crossing over to Europe in his Scythian expedition, the architect constructed it, as Herodotus supposes, half way between Byzantium and the temple at the entrance of the Pontus, and on the Asiatic side it was within the territory of Chalcedon (Herod. iv. 85, 87). But the Chalcedonia extended to the Euxine, if the temple of the Chalcedonii of Strabo (pp. 319, 563) is the temple of Zeus Urius as it seems to be. The territory of Chalcedon therefore occupied the Asiatic side of the Bosporus. Strabo, after

OIN OF CHALCEDON.

TIS. [ARETIAS.]

R (Χαλκήτωρ: *Eth.* Χαλκήτωρ),
a. Strabo (p. 636) says that the
of Grion is parallel to Latmus, and
n the Milesia through Caria to Eu-
Chalcetores, that is, the people of
Chalcetor. The site of Chalcetor is not ascertained. In another passage (p. 658) Strabo names the town Chalcetor, which some writers have erroneously altered to Chalcetora; but the form Χαλκητόρων (Strab. p. 636) is the Ethnic name (Groskurd, *Transl. of Strabo*, vol. iii. p. 55).

Stephanus has a place Chalcetorium in Crete (*s. v.* Χαλκητόριον); unless we should read Caria for Crete. (See Meineke's ed.) [G. L.]

CHALCIA or CHALCE (Χαλκεία, Χαλκία, Χάλκη: *Eth.* Χαλκίτης and Χαλκαῖος, Steph. *s. v.* Χάλκη: *Chalki*), a small island, distant 80 stadia from Telus and 400 from Carpathus, and about 800 from Astypalaea: it had a small town of the same name, a temple of Apollo and a harbour (Strab. p. 488; Plin. v. 31). Thucydides who mentions the island several times (viii. 41, 44, 55) calls it Chalce. Leon and Diomedon, the Athenian commanders (B. C. 412) after their attack on Rhodes, where the Peloponnesian ships were hauled up, retired to Chalce as a more convenient place than Cos to watch the movements of the enemy's fleet from. Leake (*Asia Minor*, p. 224) mentions an inscription found in Rhodes, which contains the Ethnic name Chalcetes. The island was near the west coast of Rhodes, and probably subject to Rhodes. [G. L.]

CHALCIDEIS. [CHALCITIS, No. 2.]

CHALCI'DICE (ἡ Χαλκιδική, Ptol. iii. 13. § 11; *Eth.* and *Adj.* Χαλκιδεύς), the name applied to the whole of the great peninsula, lying southward of the ridge of Mt. Cissus (*Khortiatzi*), between the Thermaic and Strymonic Gulf. It terminates in three prongs, running out into the Aegaean Sea, called respectively Acte, Sithonia, and Pallene, the first being the most easterly, and the latter the most westerly. The peninsula of Acte, which terminates with Mt. Athos, rising out of the sea precipitously to the height of nearly 6,400 feet, is rugged, and clothed with forests, which leave only a few spots suitable for cultivation. [ATHOS.] The Middle or Sithonian peninsula (Σιθωνία: *Longos*), is also hilly and woody, though in a less degree. The peninsula of Pallene (Παλλήνη: *Kassándhra*), was pre-eminent for its rich and highly cultivated territory. The gulf between Acte and Sithonia was called the Singitic, and that between Sithonia and Pallene the Toronaic or Mecybernaean.

It must be recollected that the original Chalcidice, though the name has been extended in consequence of the influence which the people of the Chalcidic race enjoyed during the meridian period of Grecian history, did not comprehend Crossaea, nor the districts of Acanthus and Stageirus, colonies of Andrus, nor that of Potidaea, a colony of Corinth, nor even Olynthus or the territory around it to the N., which was occupied by a people who had been driven out of Bottiaeis W. of the Lydias in the early times of the Macedonian monarchy.

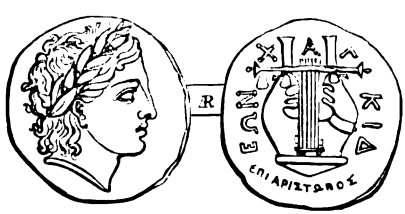
The principal possession of the Chalcidian settlers from Euboea (Strab. x. p. 447) in the earliest time of their migration, probably in the 7th century B. C., seems to have been the Sithonian headland, with its port and fortress Torone; from thence they extended their power inland, until at length they occupied the whole of Mygdonia to the S. of the ridges which stretched W. from the mountain range at the head of the Singitic gulf (*Nizvoro*) together with Crossaea. Artabazus, on his return from the Hellespont, having reduced Olynthus, together with some other places which had revolted from Xerxes, slew all the Bottiaei who had garrisoned Olynthus, and gave up the place

Digitized by Google

to the Chalcidians. We find the Bottiaei joined, on two occasions, with the Chalcidians as allies (Thuc. i. 65, ii. 79), and one of their silver coins with the legend Βοττιαίων is precisely similar, both in type and fabric, to those of the Chalcidians, impressed with the head of Apollo and his lyre (comp. Eckhel, vol. ii. p. 70). At the instigation of Perdiccas, the Chalcidians made war upon the Athenians who held Potidaea and other towns in their neighbourhood, and were successful in more than one engagement (Thuc. ii. 79). Brasidas was indebted to their co-operation for his first successes (Thuc. iv. 83), and it was to his expedition into Thrace that the Chalcidian republics owed their final independence. (Thuc. v. 18.) After the Peloponnesian war, in consequence of the complaints of the Apollonians of Chalcidice and Acanthians, the Lacedaemonians sent an army against Olynthus, which, after losing two of its commanders, succeeded in the 4th campaign (B. C. 379) in reducing the city to submission (Xen. *Hell.* v. 8). The history of Chalcidice, after the supremacy which Olynthus obtained over its other towns, follows the fortunes of that city. [OLYNTHUS.]

Ptolemy (*l. c.*) divides the whole peninsula into two parts, Chalcidice and Paralia (for so the word which appears as Paraxia in the printed copies should be read). Paralia contained all the maritime country between the bay of Thessalonica, and Derrhis, the Cape of Sithonia: thus the W. coast of Sithonia was at that time included in Paralia and the E. in Chalcidice, together with Acanthus, the entire peninsula of Acte, and all the coast land in the Strymonic gulf as far N. as Bromiscus, with the exception of Stageira.

An account of the different Chalcidian towns will be found under the separate heads; beginning from the W. they are AENEIA near the cape, which marks the entrance of the inner Thermaic gulf, GIGONUS, ANTIGONEIA and POTIDAEA. Between these towns lay the territory called CROSSAEA. In Pallene were the towns of SAXE, MENDE, SCIONE, THERAMBOS, AEGE, NEAPOLIS, APHYTIS, either wholly or partly colonies from Eretria. In Sithonia were MECYBERNA, SERMYLE, GALEPSUS, TORONE, SARTE, SINGUS, PILORUS, ASSA, all or most of them of Chalcidian origin. At the head of the Toronaic gulf in the interior of Chalcidice lay OLYNTHUS, APOLLONIA, SCOLUS, SPARTOLUS, ANGEIA, MIACORUS or MILCORUS. On the scanty spaces, admitted by the mountain ridge which ends in Athos, were planted some Thracian and Pelasgic settlements of the same inhabitants as those who occupied Lemnos and Imbros, with a mixture of a few Chalcidians, while the inhabitants spoke both Pelasgic and Hellenic. [ATHOS.] Near the narrow isthmus which joins this promontory to Thrace, and along the NW. coast of the Strymonic gulf were the considerable towns of SANE, ACANTHUS, STAGEIRA and ARGILUS, all colonies from Andros, to which may be added STRATONICE, BROMISCUS, and ARTHUSA. (Grote, *Hist. of Greece*, vol. iv. p. 31; Leake, *Trav. in Northern Greece*, vol. iii.; Grisebach, *Reisen*, vol. ii. pp. 6—16.) [E. B. J.]



COIN OF CHALCIDICE IN MACEDONIA.

CHALCI'DICE, a district of Syria. [CHALCIS.]

CHALCIS, in Syria. 1. The chief city of Chalcidice, one of the ten political divisions of N. Syria (Ptol. v. 15.) It was situated 53 M. P. from Antioch (*Peut. Tab.*) and 18 M.P. from Beroea (*Anton. Itin.*). The Peutinger Tables make it out to be 29 M.P. from the latter place, while Procopius (*B. P.* ii. 12) gives the distance as 84 stadia. Both these statements are incorrect, as *Kinnisrin* is about 12 English miles from Aleppo (Pococke, *Trav.* vol. ii. p. 217; Abulféda, *Tab. Syr.* p. 119.) The Hamath Zobah which was taken by Solomon (2 *Chron.* viii. 3) has been identified with Chalcis (Rosenmüller, *Handbuch der Bibl. Alt.* vol. i. pt. ii. p. 250), and the "salt vale" where David conquered Hadadezer king of Zobah, when he went to recover his border on the Euphrates, is in all probability the lake and marsh of *Jabul* or *Sabakhah*, which in winter occupies a space to the E. of *Kinnisrin*, extending for about 12 miles, with a breadth varying from 3 to 5 miles. The powerful evaporation of the summer heat causes it to crystallize, and a white coarse-grained salt is formed in large quantities over the whole surface. (Chesney, *Exped. Euphrat.* vol. i. p. 415; Thomson, *Bibliot. Sacr.* vol. v. p. 470; comp. Winer, *Real Wort. Buch, s. v. Aram.*) In A. D. 542 the town of Chalcis was taken and plundered by Chosroes (Procop. *l. c.*; Gibbon, *Decl. and Fall*, vol. viii. p. 315; Le Beau, *Bas Empire*, vol. ix. p. 24; comp. vol. iii. p. 54).

2. AD BELUM. Pliny (v. 23. § 19) speaks of a city of this name in the district Chalcidene, which he describes as the most fertile of all Syria. The Chalcis, Χαλκὶς of Strabo (xvi. p. 753), was a city and district subject to Ptolemy, son of Mennaeus, who held besides the city of HELIOPOLIS (*Baalbec*), the plain of Marsyas, and the mountain region of Ituraea. Josephus expressly describes it as under Mount Lebanon (*Antiq.* xiv. 7. § 4, *B. J.* i. 9. § 2). It has been confounded with the Chalcis S. of Aleppo, but the statement of Josephus (comp. *Antiq.* xv. 3. § 2; Reland, *Palaest.* p. 315) shows that its position must be sought for elsewhere. Ptolemy was succeeded by his son the first Lysanias; whose possessions after his murder by Antony were farmed by Zenodorus. (Joseph. *Antiq.* xv. 10. § 1, *B. J.* i. 20. § 4.) In A. D. 41 Claudius bestowed Chalcis on Herod, a brother of the elder Herod Agrippa. On his death in A.D. 48 his kingdom went to his nephew, the younger Herod Agrippa (*B. J.* ii. 12. § 1). He held it four years, and was then transferred with the title of king to the provinces of Batanaea, Trachonitis, Abilene, and others (*Antiq.* xx. 7. § 1). Afterwards Aristobulus, son of Herod, king of Chalcis, obtained his father's kingdom which had been taken from his cousin Agrippa II., and in A. D. 73 was still dynast of the district (*B. J.* vii. 7. § 1). During the reign of Domitian it appears to have become incorporated in the Roman province, and the city to have received the additional name of Flavia. (Eckhel, vol. iii. p. 263; Marquardt, *Handbuch der Röm. Alter.* p. 151; Noris. *de Epoch. Syro-Mac.* (c. ix. § 3.)

The town of Chalcis was therefore situated somewhere in the *Bukā'a*, probably S. of *Baalbec*. The valley has not yet been examined with reference to the site of this city. It has been suggested that its position may be at or near *Zahle*, in the neighbour-

Digitized by Google

t the village of *Heusn Nieha*, are e remains (comp. Chesney, *Exped.* p. 472). Or perhaps at *Majdel* bú-l-féda (*Tab. Syr.* p. 20) speaks of hewn stones. (Robinson, *Biblioth.* 90). [E. B. J.]

Χαλκίς: *Eth.* Χαλκιδεύς, Chalci- *Egripo*, *Negropont*), the chief town arated from the opposite coast of narrow strait of the Euripus, which nly 40 yards across. The Euripus into two channels by a rock in the rait. This rock is at present occu- e castle; a stone bridge, 60 or 70 onnects the Boeotian shore with this ther wooden bridge, about 35 feet om the castle to the Euboean coast. , as we shall presently see, a bridge Chalcis with the Boeotian coast. etween the Boeotian coast and the allow, being not more than three but the channel between the rock bout seven or eight feet in depth. ter channel that the extraordinary which are frequently mentioned by iters. a city of great antiquity, and con- important place from the earliest es. It is said to have been founded an war by an Ionic colony from he conduct of Pandorus, the son of trab. x. p. 447; Scymn. Ch. 573.) by Homer. (*Il.* ii. 537.) After Cothus settled in the city another m Athens. (Strab. *l. c.*) Chalcis of the greatest of the Ionic cities, period carried on an extensive com- st all parts of the Hellenic world. this early period is attested by the es which it planted upon the coasts taly, Sicily, and in the islands of t gave its name to the peninsula of en the Thermaic and Singitic gulfs, f the large number of cities which his district. Its first colony, and he Greek settlements in the west, Campania, which it is said to have r as B. C. 1050, in conjunction with the Aeolians of Cume and the Eretrians. Rhegium in Italy, and Naxos, Zancle, Tauromenium and other cities in Sicily, are also mentioned as Chalcidian colonies.

During the early period of its history, the government of Chalcis was in the hands of an aristocracy, called Hippobotae (Ἱπποβόται, i. e. the feeders of horses), who corresponded to the Ἵπποις in other Grecian states. (Herod. v. 77, vi. 100; Strab. x. p. 447; Plut. *Pericl.* 23; Aelian, *V. H.* vi. 1.) These Hippobotae were probably proprietors of the fertile plain of Lelantum, which lay between Chalcis and Eretria. The possession of this plain was a frequent subject of dispute between these two cities (Strab. x. p. 448), and probably occasioned the war between them at an early period, in which some of the most powerful states of Greece, such as Samos and Miletus, took part. (Thuc. i. 15; Herod. v. 99; Spanheim, ad Callim. *Del.* 289; Hermann, in *Rheinisches Museum*, vol. i. p. 85.)

Soon after the expulsion of the Peisistratidae from Athens, the Chalcidians joined the Boeotians in making war upon the Athenians; but the latter crossed over into Euboea with a great force, defeated the Chalcidians in a decisive battle, and divided the lands of the wealthy Hippobotae among 4000 Athenian citizens as cleruchs B. C. 506. (Her. v. 77.) These settlers, however, abandoned their possessions when the Persians, under Datis and Artaphernes, landed at Eretria. (Herod. vi. 100.) After the Persian wars, Chalcis, with the rest of Euboea, became a tributary of Athens, and continued under her rule, with the exception of a few months, till the downfal of the Athenian empire at the close of the Peloponnesian war. In B. C. 445, Chalcis joined the other Euboeans in their revolt from Athens; but the whole island was speedily reconquered by Pericles, who altered the government of Chalcis by the expulsion of the Hippobotae from the city. (Plut. *Per.* 23.)

In the 21st year of the Peloponnesian war, B. C. 411, Euboea revolted from Athens (Thuc. viii. 95), and on this occasion we first read of the construction of a bridge across the Euripus. Anxious to secure an uninterrupted communication with the Boeotians, the Chalcidians built a mole from either shore, leaving a passage in the centre for only a single ship: and fortifying by towers each side of the opening in the mole. (Diod. xiii. 47.) Chalcis was now independent for a short time; but when the Athenians had recovered a portion of their former power, it again came under their supremacy, together with the other cities in the island. (Diod. xv. 30.) In later times it was successively occupied by the Macedonians, Antiochus, Mithridates, and the Romans. It was a place of great military importance, commanding, as it did, the navigation between the north and south of Greece, and hence was often taken and retaken by the different parties contending for the supremacy of Greece. Chalcis, Corinth, and Demetrias in Thessaly, were called by the last Philip of Macedon the fetters of Greece, which could not possibly be free, as long as these fortresses were in the possession of a foreign power. (Pol. xvii. 11; Liv. xxxii. 37.)

Dicaearchus, a contemporary of Alexander the Great, describes Chalcis as 70 stadia (nearly 9 miles) in circumference, situated upon the slope of a hill, and abounding in gymnasia, temples, theatres, and other public buildings. It was well supplied with water from the fountain Arethusa. [See above, p.

Digitized by Google

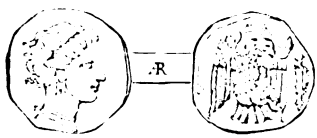
197, b.] The surrounding country was planted with olives. (Dicaearch. *Βίος τῆς Ἑλλάδος*, p. 146, ed. Fuhr.) When Alexander crossed over into Asia, the Chalcidians strengthened the fortifications of their city by inclosing within their walls a hill on the Boeotian side, called Canethus, which thus formed a fortified bridge-head. At the same time they fortified the bridge with towers, a wall, and gates. (Strab. x. p. 447.) Canethus, which is also mentioned by Apollonius Rhodius (i. 77), is probably the hill of *Karababi*, which rises to the height of 130 feet immediately above the modern bridge, and is the citadel of the present town.

In the second Punic war, B. C. 207, the Romans, under Sulpicius and Attalus, made an unsuccessful attack upon Chalcis, which was then subject to Philip. (Liv. xxviii. 6.) A few years afterwards, B. C. 192, when the war was resumed with Philip, the Romans surprised Chalcis and slew the inhabitants, but they had not a sufficient force with them to occupy it permanently. (Liv. xxxi. 23.) In the war between the Romans and Aetolians, Chalcis was in alliance with the former (Liv. xxxv. 37—39); but when Antiochus passed over into Greece, at the invitation of the Aetolians, the Chalcidians deserted the Romans, and received this king into their city. During his residence at Chalcis, Antiochus became enamoured of the daughter of one of the principal citizens of the place, and made her his queen. (Liv. xxxv. 50, 51, xxxvi. 11; Pol. xx. 3, 8; Dion Cass. *Fragm.* ex libr. xxxiv. p. 29, ed. Reimar.) Chalcis joined the Achaeans in their last war against the Romans; and their town was in consequence destroyed by Mummius. (Liv. *Epit.* lii.; comp. Pol. xl. 11.)

In the time of Strabo Chalcis was still the principal town of Euboea, and must therefore have been rebuilt after its destruction by Mummius. (Strab. x. p. 448.) Strabo describes the bridge across the Euripus as two plethra, or 200 Greek feet in length, with a tower at either end; and a canal (*σύριγξ*) constructed through the Euripus. (Strab. x. p. 403.) Strabo appears never to have visited the Euripus himself; and it is not improbable that his description refers to the same bridge, or rather mole, of which an account has been preserved by Diodorus (xiii. 47; see above). In this case the *σύριγξ* would be the narrow channel between the mole. (See Groskurd's *Germ. Transl. of Strabo*, vol. ii. p. 149.) Chalcis was one of the towns restored by Justinian. (Procop. *de Aedif.* iv. 3.)

The orator Isaeus and the poet Lycophron were natives of Chalcis, and Aristotle died here.

In the middle ages Chalcis was called Euripus, whence its modern name *'Egripo*. It was for some time in the hands of the Venetians, who called it *Negropont*, probably a corruption of *Egripo* and *ponte*, a bridge. It was taken by the Turks in 1470. It is now the principal, and indeed the only place of importance in the island. There are no remains of the ancient city, with the exception of some fragments of white marble in the walls of houses. (Leake, *Northern Greece*, vol. ii. p. 254, seq.; Stephani, *Reise*, &c., p. 13.)



COIN OF CHALCIS IN EUBOEA.

2. Also called CHALCEIA, and HYPOCHALCIS (*Χάλκεια*, Pol. v. 94; *Ὑποχαλκίς*, Strab. p. 451. Steph. B. *s. v.*), a town of Aetolia, situated upon the coast, at a short distance E. of the mouth of the Evenus, and at the foot of a mountain of the same name, whence it was called Hypochalcis. Chalcis is one of the 5 Aetolian towns spoken of by Homer, who gives it the epithet of *ἀγχίαλος*, and it continued to be mentioned in the historical period. (Hom. *Il.* ii. 640; Thuc. ii. 83; Pol. v. 94; Strab. pp. 451, 459, 460.) There are two great mountains situated between the river *Fidhari* (the Evenus) and the castle of *Rumili* (Antirrhium), of which the western mountain, called *Varassova*, corresponds to Chalcis, and the eastern, called *Kaki-skala*, to Taphiassus. The town of Chalcis appears to have stood in the valley between the two mountains, probably at *Ovrio-kastro*, where there are some remains of an Hellenic fortress. (Leake, *Northern Greece*, vol. ii. p. 110.) There was some confusion in the ancient writers respecting the position of mount Chalcis, and Artemidorus, who called it Chalcia, placed it between the Achelous and Pleuron (Strab. p. 460); but this is clearly an error.

3. (*Khaliki*), a town of Epeirus in Mount Pindus, near which the Achelous rises. It is erroneously called by Stephanus a town of Aetolia. (Dionys. Perieg. 496; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. iv. p. 214.)

CHALCITIS (*Χαλκῖτις*). 1. (*Eth.* *Χαλκίτης*: *Khalki* or *Karki*) "an island opposite to Chalcedon with copper mines." (Steph. *s. v.* *Χαλκῖτις* who cites Artemidorus.) There is a group of small islands called the *Prince's Isles*, in the Propontis, not opposite to Chalcedon, but SE. of that city, and opposite to part of the coast which we may assume to have belonged to Chalcedon. One of these marked *Kerki* in a map published by the Hydrographical Office of the Admiralty is Chalcitis. Pliny (v. 32) simply mentions Chalcitis.

2. A tract in Asia Minor in the territory of Erythrae according to Pausanias (vii. 5. § 12), which contained a promontory, in which there were sea baths (as he calls them), the most beneficial to the health of all in Ionia. One of the phylae of Erythrae, the third, derived its name from the Chalcitis.

These inhabitants of the Chalcitis seem to be the Chalcideis of Strabo (p. 644), but the passage of Strabo is not free from difficulty, and is certainly corrupt (see Groskurd's *Transl. of Strabo*, vol. ii. p. 23). The Teii and Clazomenii were on the isthmus, and the Chalcideis next to the Teii, but just within the peninsula on which Erythrae stands. This seems to be Strabo's meaning; and the Chalcideis must have been under the Teii, for Gerae, another place west of Teos, belonged to the Teii. The distance across the isthmus of Erythrae from the Alexandrium and the Chalcideis to a place on the north side of the isthmus, called Hypocremnos, was 50 stadia according to Strabo; but it is more. This Alexandrium was a grove dedicated to Alexander the Great, where games were celebrated by the community of Ionian cities (*ἀπὸ τοῦ κοινοῦ τῶν Ἰώνων*) in honour of Alexander. [G. L.]

We cannot, however, say that we
ed by these arguments, which, as
ese views admit, are not based upon
any authentic history. No Chaldaean immigration is anywhere mentioned or alluded to; while, if there was, as seems most likely, a considerable tribe bearing the name of Chaldaeans at a very early period in S. Babylonia, it is much more natural to suppose that they gradually became the ruling tribe over the whole of Babylonia. The language of Cicero is definite as to his belief in a separate and distinct nation: " Chaldaei non ex artis sed ex gentis vocabulo nominati " (*de Div.* i. 1).

3. They were the name of a particular sect among the Babylonians, and a branch of the order of Babylonian Magi. (Χαλδαῖοι γένος Μάγων, Hesych.) In Dan. (ii. 2) they appear among " the magicians, sorcerers, and astrologers," and speak in the name of the rest (*Dan.* ii. 10). They are described in Dan. (v. 8) as the " king's wise men." From the pursuit of astronomy and astrology and magical arts, which are ever in early times nearly connected, it came to pass that with many ancient writers, and especially with those of a later period, the name Chaldaeans was applied, not only to the learned men of Babylon (as in Cic. *de Div. l. c.*; Strab. xv. p. 508; Diod. ii. 29), but to all impostors and magicians who, professing to interpret dreams, &c., played upon the credulity of mankind. (Joseph. *B. J.* ii. 7. § 3; Appian. *Syr.* c. 58; Curt. i. 10, v. 1; Juv. vi. 553; Cat. *R. R.* v. 4, &c.)

There were two principal schools at Borsippa and Orchoe for the study of astronomy, whence the learned Chaldaeans of those places were termed Borsippeni and Orchoeni. (Strab. xvi. p. 739.)

(Ideler, *über d. Sternkunst d. Chaldäer;* Winer, *Bibl. Real Worterbuch*, art. *Chaldäer;* Ditmar, *über die Vaterland d. Chaldäer.*) [V.]

CHALDAICI LACUS (Plin. vi. 23, 27; τὰ ἕλη τὰ κατὰ Χαλδαίους, Strab. xvi. p. 767), a wide extent of marsh land near the junction of the Euphrates and Tigris. It is not clear from the descriptions of ancient authors what extent they gave these marshes. According to Onesicritus (Strab. xv. p. 29) the Euphrates flowed into the Chaldaean Sea; according to Pliny (vi. 27) it was the Tigris which mostly contributed to form these stagnant waters. It is clear, however, that Pliny's view on the subject was very indistinct, for he says previously (vi. 23) that they comprehended the lake which the Eulaeus and Tigris make near Charax. At the present time nearly all the land above and below the junction of the Tigris and Euphrates is for great part of the year an unhealthy swamp. [V.]

CHALDONE PROMONTORIUM, placed by Pliny (vi. 28) on the Arabian side of the Persian Gulf, near its northern extremity: between a salt river, which once formed one of the mouths of the Euphrates, and his " flumen Achenum." He describes the sea off this promontory as " voragini similius quam mari per 50 millia passuum orae." It corresponded in situation with the bay of *Koneit* or *Graen* (al. *Grane*) harbour, where Niebuhr places the modern tribe of the *Beni Khaled*, a name nearly identical with the Chaldone of Pliny (Forster, *Arabia*, vol. i. p. 49, 50). It is further determined by modern survey, minutely corroborating the classical notices. " The ' locus ubi Euphratis ostium fuit,' is D'Anville's *ancien lit de l'Euphrate;* the ' Fiumen Salsum,' is *Core Boobian*, a narrow salt-water channel, laid down for the first time in the East India Company's Chart, and separating a large low island, off the mouth of the old bed of the Euphrates, from

Digitized by Google

son of Sogdonaeus, the chief of the Arabs who lived in the neighbourhood, from whom it acquired the name by which it has been best known. Pliny states that the original town was only 10 miles from the sea, but that in his time the existing place was as much as 120. These numbers are certainly exaggerated; but Pliny correctly ascribes the advance of the coast into the Persian Gulf to the rivers which flowed into it. It appears to have been a place of considerable extent in Pliny's time. It was the birthplace of Dionysius Periegetes and of Isidorus, both geographers of eminence. [V.]

CHARCHA, a fortress of Mygdonia, which the Romans, in the retreat under Jovian, passed, after leaving Meiacarire. (Amm. Marc. xxv. 6. § 8; comp. xviii. 10. § 1.) The name which in Syria signifies a town, was probably applied to several localities (Le Beau, *Bas Empire*, vol. iii. p. 155; D'Anville, *L'Euphrate et le Tigre*, p. 95). This fortress (Χαρχάς, Evagr. *H. E.* vi. 21) was situated in a fertile and populous district (Theophylact. Simocat. v. 1), and was the scene of the death of Zadesprates, the general of Baram, A. D. 591. (Le Beau, vol. x. p. 317.) The ruin, now called *Kúsr Serján*, of which only the foundations, and parts of two octagonal towers remain, may possibly represent Charcha. (*Journ. Geog. Soc.* vol. x. p. 526; Niebuhr, *Reise*, vol. ii. p. 388; Ritter, *Erdkunde*, vol. xi. pp. 150, 380, 389.) [E. B. J.]

CHARIDE'MI PR. (Χαριδήμου ἀκρωτήριον: *C. de Gata*), one of the principal headlands of the Spanish peninsula, forming the termination of the S. coast, where it first turns to the NE., and being also the S. point of Hispania Tarraconensis. It was directly opposite to the mouth of the river Malva in Mauretania. (Ptol. ii. 4. § 7.) [P. S.]

CHARIEIS (Χαριεῖς, Arrian, *Peripl.* p. 10; Charien, Plin. vi. 4. s. 4), a river of Colchis, flowing into the Euxine Sea, 90 stadia north of the Phasis. Whether it is the same river as the CHARES (Χάρης) of Strabo (xi. p. 499) is doubtful.

CHARINDA (Χαρίνδας, Ptol. vi. 2. § 2; Amm. Marc. xxiii. 6), a small river on the western boundary of Hyrcania, which flowed into the Caspian Sea. By Ptolemy and Ammianus it is reckoned to be a river of Northern Media or Atropatene. A people are met with who are called CHIRENDI (Χρῆνδοι, Ptol. vi. 9. § 5). These ought probably to be called Charindi, from the river. [V.]

CHARI'SIA. [ARCADIA, p. 193, a.]

CHARMANDE (Χαρμάνδη, Xen. *Anab.* i. 5. § 10; Steph. B. *s. v.*), a large and prosperous town according to Xenophon, between the river Mascas and the northern boundary of Babylonia, on the edge of the desert. Xenophon mentions that the soldiers of Cyrus crossed the Euphrates to it, on skins stuffed with light hay, and bought there palm, wine, and corn. [V.]

CHARU'DES (Χαροῦδες), a tribe mentioned by Ptolemy (ii. 11. § 12) among the inhabitants of the Chersonesus Cimbrica. They are no doubt the same as the Chariides mentioned in the Monum. Ancyr. (Suet. vol. ii. p. 375, ed. Wolf.) It is not equally certain as to whether they were the same as the Harudes who served in the army of Ariovistus (Caes. *B. G.* i. 31, 37, 51). [L. S.]

CHARYBDIS (Χάρυβδις), a celebrated whirlpool in the Sicilian Straits, between Messana and Rhegium, but much nearer to the former. The prominent part which it assumes (together with the rock of Scylla on the opposite coast) in the Homeric narrative of the wanderings of Odysseus (Hom. *Od.* xii.) sufficiently proves the alarm which it excited in the minds of the earliest navigators of these seas, and the exaggerated accounts of its dangers which they brought home. But with full allowance for such exaggeration, there can be no doubt that the tales of Charybdis and Scylla were really associated with the dangers that beset the navigation of the Sicilian Straits, and that in this instance the identification of the localities mentioned in the Odyssey may be safely relied on. Nor were these perils by any means imaginary: and in the case of Charybdis especially had more foundation than in regard to Scylla. Captain Smyth says of it:—"To the undecked boats of the Greeks it must have been formidable: for even in the present day small craft are sometimes endangered by it, and I have seen several men-of-war, and even a seventy-four gun ship, whirled round on its surface: but by using due caution there is generally very little danger or inconvenience to be apprehended. It appears to be an agitated water, of from 70 to 90 fathoms in depth, circling in quick eddies. It is owing probably to the meeting of the harbour and lateral currents with the opposite point of Pezzo." (Smyth's *Sicily*, p. 123.)

Thucydides appears not to have been aware of the existence of this local vortex or whirlpool, and regards the Homeric Charybdis as only an exaggerated account of the fluctuations and agitations caused in the Straits of Messana generally by the alternations of the currents and tides from the two seas, the Tyrrhenian and Sicilian, communicating by so narrow an opening. (Thuc. iv. 24.) The agitations arising from this cause are no doubt considerable, and might often be attended with danger to the frail vessels of the ancient navigators. But the actual whirlpool is a completely local phenomenon, and is situated, as described by Strabo, a short distance from the town of Messana, just outside the low tongue of land that forms the harbour of that city. It is now called the *Galofaro*. (Strab. vi. p. 268; Smyth's *Sicily*, *l. c.*)

Homer indeed appears to describe the two dangers of Scylla and Charybdis as lying immediately opposite one another, on the two sides of the actual strait, and on this account some writers have supposed that the whirlpool was in ancient times situated near Cape Pelorus, or the *Faro Point*, which is full 9 miles from Messana. Local accuracy on such a point is certainly not to be expected from Homer, or the poets who have adopted his description. But it is not impossible that there was really some foundation for this view. Cluver, who made careful inquiries on the spot, and has given a very accurate description of the *Galofaro*, of the port of Messina, adds that there existed another vortex immediately on the S. side of Cape Pelorus, which had been known to produce similar effects. (Cluver, *Sicil.* p. 70.) It is evident, however, that Strabo knew only of the whirlpool off Messana, and this seems to be much the most considerable and permanent phenomenon of the kind: and must therefore be regarded as the true Charybdis. Strabo supposed its fluctuations to be periodical, and connected with the tides (the influence of which is strongly felt in the Straits), and that Homer only erred in describing them as occurring *three* times a day instead of *twice* (Strab. i. pp. 43, 44): but this is erroneous. The action of the whirlpool depends much more upon the wind than the tides, and is very irregular and uncertain. Seneca alludes to it

, the Chateni." (Forster, *Arabia*,
[G. W.]

(Χατραμῖς), a country of Arabia
d by Dionysius Per. (957), and
loc.) as adjacent on the south to Chaldamis, and opposite to the coast of Persia. It, therefore, corresponded with the modern district of *Oman*, at the SE. of the Arabian Peninsula, and is identified by Forster with *Dar-Choramatah*, and traced to Hadoram the Joctanite patriarch. (*Gen.* x. 27.) [CORODAMUM PROMONTORIUM.] [G. W.]

CHATRAMOTITAE, a people of the south of Arabia. (Plin. vi. 28.) The country he names Atramitae. Both names are but different forms of Adramitae [ADRAMITAE], the ancient inhabitants of that part of the southern coast of Arabia still called *Hadramaut*, originally settled, it would appear, by the descendants of the Joctanite patriarch Hazarmaveth. (*Gen.* x. 26; Forster, *Arabia*, vol. i. p. 113, vol. ii. p. 324.) [G. W.]

CHATRIAEI. [INDIA.]

CHATTI or CATTI (Χάττοι, Χάτται), one of the great tribes of Germany, which rose to great importance after the decay of the power of the Cherusci. Their name is still preserved in *Hessen* (*Hassen*). They were the chief tribe of the Hermiones (Plin. iv. 28), and are described by Caesar (*B. G.* iv. 19, vi. 10) as belonging to the Suevi, although Tacitus (*Germ.* 30, 31) clearly distinguishes them, and that justly, for no German tribe remained in its original locality more permanently than the Chatti. We first meet with their name in the campaigns of Drusus, when they acquired celebrity by their wars against the Romans, and against the Cheruscans who were their mortal enemies. (Tac. *Germ.* 36, *Ann.* i. 55, xii. 27, 28; Dion Cass. liv. 33, 36, lv. 1, lxvii. 4, 5; Tac. *Hist.* iv. 37, *Agr.* 39, 41; Flor. iv. 12; Liv. *Epit.* 140; Suet. *Domit.* 6; Frontin. *Strat.* i. 1; Plin. *Paneg.* 20.) The Romans gained, indeed, many advantages over them, and under Germanicus even destroyed Mattium, their capital (Tac. *Ann.* i. 56), but never succeeded in reducing them to permanent submission. In the time of the war against the Marcomannians, they made predatory incursions into Upper Germany and Rhaetia (Capitol. *M. Anton.* 8). The last time they are mentioned is towards the end of the fourth century. (Greg. Tur. ii. 9; Claud. *Bell. Get.* 419.) After this they disappear among the Franks. Their original habitations appear to have extended from the *Westerwald* in the west to the *Saale* in *Franconia*, and from the river *Main* in the south as far as the sources of the Elison and the *Weser*, so that they occupied exactly the modern country of *Hessen*, including, perhaps, a portion of the north-west of *Bavaria*. Ptolemy (ii. 11. § 22) places them more eastward, perhaps in consequence of their victories over the Cheruscans. The Batavi are said to have been a branch of the Chatti, who emigrated into Gaul. Some have supposed that the Cenni (Κέννοι), with whom the Romans were at war under Caracalla, were no others than the Chatti (Dion Cass. lxxvii. 14); but this is more than doubtful. (Comp. Zeuss, *Die Deutschen u. die Nachbarstämme*, p. 327, foll.; Wilhelm, *German.* p. 181, foll.; Latham, *Tac. Germ.* p. 105, foll.) [L. S.]

CHAUCI, CAUCHI, CAUCI, CAYCI (Καῦχοι, Καῦκοι), a German tribe in the east of the Frisians, between the rivers *Ems* and *Elbe*. (Plin. iv. 28, xvi. 2; Suet. *Claud.* 24; Tac. *Germ.* 35, *Ann.* xi. 18; Dion Cass. liv. 62, lxiii. 30; Vell. Pat. ii. 106; Strab. p. 291; Lucan. i. 463; Claud. *in Eutrop.* i. 379, *de Laud. Stil.* i. 225.) In the east their country bordered on that of the Saxones, in the north-west on that of the Longobards, and in the

Digitized by Google

north on that of the Angrivarii, so that the modern *Oldenburg* and *Hanover* pretty nearly represent the country of the Chauci. It was traversed by the river Visurgis, which divided the Chauci into Majores and Minores; the former occupying the western bank of the river, and the latter the eastern. (Tac. *Germ.* 35.) The Chauci are described by Tacitus as the most illustrious tribe among the Germans, and he adds that they were as distinguished for their love of justice and peace, as for their valour in case of need. Pliny (xvi. 1. 2), on the other hand, who had himself been in their country, describes them as a poor and pitiable people, who, their country being almost constantly overflown by the sea, were obliged to build their habitations on natural or artificial eminences, who lived upon fish, and had only rain-water to drink, which they kept in cisterns. This latter description can be true only if limited to that portion of the Chauci who dwelt on the sea coast, but cannot apply to those who lived further inland. The Chauci were distinguished as navigators, but also carried on piracy, in pursuit of which they sailed south as far as the coast of Gaul. (Tac. *Ann.* xi. 18; Dion Cass. lx. 30.) They were subdued by Tiberius (Vell. Pat. ii. 106), and for a time they, like the Frisians, were faithful friends of the Romans (Tac. *Ann.* ii. 8, 17, 21), until the latter exasperated them by their insolence. The consequence was, that the Romans were driven from their country, and although Gabinius Secundus gained some advantages over them, to which he even owed the honourable surname of Chaucius (Dion Cass. lx. 8; Suet. *Claud.* 24), and although Corbulo continued the war against them, yet the Romans were unable to reconquer them. (Tac. *Ann.* xi. 19, 20; Dion Cass. lx. 30.) The Chauci are mentioned in history for the last time in the third century, when in the reign of Didius Julianus, they ravaged the coasts of Gaul. (Spart. *Did. Jul.* i.) At that time they belonged to the confederacy of the Saxons, and were one of the most warlike nations of Germany (Julian. *Opera*, pp. 34, 56, ed. Spanh.; Zosim. iii. 6); they had, moreover, extended so far south and west, that they are mentioned as living on the banks of the *Rhine*. (Claud. *de Laud. Stil.* i. 225.) [L. S.]

CHAULOTAEI (Χαυλοταῖοι, Eratosth. *ap. Strab.* xvi. p. 767), an Arab tribe at the NW. of the Persian Gulf, mentioned by Eratosthenes. Dr. Wells, following Bochart and other authorities, has observed of this quarter: "In these parts by Eratosthenes are placed the Chaulothaei; by Festus Avienus the Chaulosii; by Dionysius Periegetes, the Chablasii; and by Pliny, the (Chauclei or) Chavelaei; all retaining, in their name, most of the radical letters of the word Chavilah" (cited by Forster, *Arabia*, vol. i. p. 41). This identification of the names of the classical geographers with the Scripture Havilah is proved and illustrated by Mr. Forster with much research (*l. c.* et seq.). [G. W.]

CHAUS. The Roman general Cn. Manlius marched from Tabae in Pisidia in three days, or perhaps not three whole days to the river Chaus. (Liv. xxxviii. 14.) His line of march was to Thabusion on the Indus, and thence to Cibyra. The Chaus must have been one of the upper branches of the Indus (*Dalamon Tchy*). [G. L.]

CHAZE'NE (Χαζηνή, Strab. xvi. p. 736), one of the districts into which Strabo divides the plain country of Assyria, round Ninus (Nineveh). The other two divisions were named Dolomene and Calachene. [V.]

CHEIMARRHUS. [ARGOLIS, p. 201. a.]

CHEIME'RIUM (Χειμέριον), a promontory and harbour of Thesprotia in Epeirus, between the rivers Acheron and Thyamis, and opposite the southern point of Corcyra. In the two naval engagements between the Corcyraeans and Corinthians just before the Peloponnesian war, Cheimerium was the station of the Corinthian fleet. Leake supposes the promontory of Cheimerium to be *C. Varlám*, and the harbour that of *Arpítza*. (Thuc. i. 30. 46; Strab. vii. p. 324; Paus. viii. 7. § 2; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. iii. p. 5.)

CHELAE (Χῆλαι), a place on the coast of Bithynia, marked in the Table. Arrian (p. 13) places it 20 stadia east of the island Thynias, and 180 west of the mouth of the Sangarius. It is generally identified with a cape named *Kefken* in the maps. [G. L.]

CHELENO'PHAGI. [AETHIOPIA, p. 58. a.]

CHELIDO'NIA. This name occurs in Strabo (p. 663) in the genitive Χελιδονίων, as the name of a town in Phrygia. Nothing is known of the place. It has been proposed to correct the reading to Φολομηλίου. (See Groskurd, *Transl. Strab.* vol. ii. p. 63.) [G. L.]

CHELIDO'NIAE INSULAE (Χελιδόνιαι), two rocks (Steph. B. *s. v.* Χελιδόνιοι), according to Pliny, one called Corudela, and the other Meninippeia; but the position is not mentioned. Scylax also mentions only two. According to Strabo (p. 520), the Taurus first attains a great elevation opposite to the Chelidoniae, which are islands situated at the commencement of the sea-coast of Pamphylia, or on the borders of Lycia and Pamphylia (p. 651). They were off the Hiera Acra, three in number, rugged, and of the same extent, distant about five stadia from one another, and six stadia from the coast; one of them has an anchorage or port (p. 666). Pliny (v. 33), who places these islands opposite to the "Tauri promontorium," mentions three, and observes that they are dangerous to navigators: but no dangers were discovered by Beaufort. There are five islands off the Hiera Acra, which is now Cape *Khelidonia*: "two of these islands are from four to five hundred feet high; the other three are small and barren." (Beaufort, *Karamania*, p. 38.) The Greeks still call them Chelidoniae, of which the Italian sailors made *Celidoni*; and the Turks have adopted the Italian name, and call them *Sheldan*.

Livy (xxxiii. 41) names the Hiera Acra, or the Sacred Promontory which is opposite to the Chelidoniae, Chelidonium promontorium. [G. L.]

CHELONATAS (Χελωνάτας), a promontory of Achaia, and the most westerly point of the Peloponnesus, distant, according to Pliny, two miles from Cyllene. (Strab. viii. pp. 335, 338, 341; Paus. i. 2. § 4; Agathem. i. 5; Plin. iv. 5. s. 6; Mel. ii. 3.) It has been disputed whether Chelonatas corresponds to *C. Glarentza* (*Klarentza*) or to *C. Tornése*, both of them being promontories of the peninsula of *Khlemútzi*. There can be little doubt, however, that *C. Tornése*, the most southerly of the two, is the ancient Chelonatas, both because there is near it the small island mentioned by Strabo (p. 338), and because it is distant two miles from *Glarentza*, the ancient Cyllene. It is probable, however, that the name Chelonatas was originally given to the whole peninsula of *Khlemútzi*, from its supposed resemblance to a tortoise. (Leake, *Peloponnesiaca*, p. 210.)

NAE (Χήν, Steph. B. *s. v.*; Χῆναι, Χηνεύς, Χηνιεύς), the birthplace ato and others mention as one of Greece. (Plat. *Protag.* p. 343, dispute among the ancients re-, some placing it in Thessaly at a, and others in Laconia (Diog. the balance of authorities is in r of these two situations. Pau-) calls it a village on Mt. Oeta; *erpt. de Virt. et Vit.* p. 235) de-Malian, who dwelt in the village anus B., on the other hand, places It has been conjectured that this e arisen from the colony which s founded in the district of Oeta.

A, or CHENOBO'SCIUM (Χη-5. § 72; Steph. B. *s. v.*; *Itin.* Χηνοβοσκίον, *Not. Imp.*: *Eth.* the Goose-pens, was a district of gypt, on the eastern side of the of Coptos, and in lat. 26° 3′ N. ite the cities of Diospolis Parva, , and contained a city, or hamlet, Chenoboscia. The name of the the purpose to which this tract was appropriated, although, in-cited by Stephanus Byz. (*s. v.*) of goose-pastures at Chenoboscia, he contrary, the meadows served ve of crocodiles. But when it is he goose was a favourite viand of ts (Herod. ii. 37), that the bird and is frequently depicted on s of Egyptian domestic life (Ro-ix., &c. &c.), and that its quills ing, it seems not unlikely that he Nile Valley should have been rearing of geese. [W. B. D.]

ρέου, or Χαιρέου, Schol. *in Nicand.* It. Anton. p. 154-5; Greg. Na-391, Bened. ed.; Athanas. *Vit.* supposed to be the modern village Delta of Egypt. According to ng statements in the Itineraries, Chereu was about mid-way between Alexandreia and Hermopolis, being about 20 or 24 miles from either. The name, however, is comparatively of recent date, and seems to be a purely Coptic appellation, answering to the Hellenic Σχεδία, or Packet-boat. Chereu, according to the above-cited scholiast on Nicander, was near to Schedia (comp. Strab. xvii. p. 800), and seems in Roman times to have superseded it,—such mutations in places of anchorage being common in rivers which, like the Nile, bringing down great volumes of alluvial soil periodically, change the approach to their banks. At Schedia or Chereu, was stationed a general ferry-boat, of which the toll formed part of the revenues of the Hermopolite nome. [W. B. D.]

CHERITH (Χορράθ, LXX.), a brook mentioned only in the history of Elijah (1 *Kings*, xvii. 3—7) without any further notice of its situation than that it was "before Jordan," an expression which might either signify east of the Jordan, or on the way to the Jordan. No value whatever can be attached to Dr. Robinson's attempt to identify it with *Wady Kelt* (*Bib. Res.* vol. ii. p. 288), a small stream which runs through a rocky valley immediately to the north of the road between Jerusalem and Jericho, and which is mentioned in the borders of Judah and Benjamin. (*Josh.* xv. 7.) [G. W.]

CHERSONE'SUS (Χερσόνησος), a name borne by three places in Crete. 1. A point on the W. coast, identified with *Keronisi*, near *Ponto di Corbo* (Ptol. iii. 17. § 2; Hoeck, *Kreta*, vol. i. p. 379.)

2. (Ptol. iii. 17. § 5; *Stadiasm.* § 331, 332, Hierocl.), the haven of Lyctus, with a temple of Britomartis (Strab. x. p. 479), 16 M. P. from Cnossus. (*Peut. Tab.*) Mr. Pashley (*Trav.* vol. i. p. 268) found ruins close to a little port on the shore, and the actual names of the villages *Khersónesos* and *Episcopianó*, indicate that here is to be found what was once the ancient port of Lyctus, and afterwards became an Episcopal city. (Hoeck, vol. i. p. 408.)

3. Strabo (xvii. p. 838) describes the great harbour of Cyrenaica near the promontory of Ardanaxes as lying opposite to Chersonesus of Crete; the same author (x. p. 479) places Praesus between the Samonian promontory and Chersonesus. There must have been, therefore, a point to the S of the island bearing this name. the position of which is not known. (Hoeck, vol. i. p. 432; Eckhel. vol. ii. p. 307.) [E. B. J.]

COIN OF CHERSONESUS IN CRETE.

CHERSONESUS AUREA. [AUREA.]

CHERSONE'SUS CI'MBRICA (Χερσόνησος Κιμβρική: *Jutland*), the large peninsula terminating on the N. in the *promontorium Cimbrorum*, between the German Ocean on the W. and the *sinus Lagnus* and *Codanus* on the E. (Ptol. ii. 11. § 2; Strab. p. 293.) Strabo is the first ancient authority mentioning this peninsula, for it was only during the campaigns of Tiberius in the north-west of

Digitized by Google

Germany, that the Romans heard of its existence. According to Pliny (iv. 27), its native name was *Cartris*, which is otherwise unknown. Its common name is derived from its inhabitants, the *Cimbri*, who continued to inhabit it in the time of the Roman emperors. Comp. CIMBRI. [L. S.]

CHERSONE'SUS HERACLEOTICA or PARVA. [TAURICA CHERSONESUS.]

CHERSONE'SUS MAGNA (Χερρόνησος ἄκρα, Strab. xvii. p. 838; Χερσόνησος μεγάλη, Ptol. iv. 5. § 2; also called Χέρρουρα, *Eth.* Χερρούριος, Steph. B. *s. v.* Χερσόνησος: *Ras-et-Tin*, vulg. *Ruxatin*), one of the chief promontories of N. Africa, forming the NE. headland of the great convex projection of the Cyrenaic coast, but reckoned as belonging to Marmarica. It had a city and harbour. It was called *Great* in contradistinction to the Chersonesus Parva on the coast of Egypt, half a degree W. of Alexandria. (Ptol. iv. 5. § 9; Barth, *Wanderungen*, &c. pp. 501, 547.) [P. S.]

CHERSONE'SUS TAURICA. [TAURICA CHERSONESUS.]

CHERSONE'SUS THRA'CICA (Χερσόνησος Θρακία), the peninsula extending in a south-westerly direction into the Aegean, between the Hellespont and the bay of Melas. Near Agora it was protected by a wall running across it against incursions from the mainland. (Xenoph. *Hell.* iii. 2. § 10; Diod. xvi. 38; Plin. iv. 18; Agath. 5. p. 108; Plut. *Per.* 19.) The isthmus traversed by the wall was only 36 stadia in breadth (Herod. vi. 36; comp. Scyl. p. 28; Xenoph. *l. c.*); but the length of the peninsula from this wall to its southern extremity, cape Mastusia, was 420 stadia (Herod. *l. c.*). It is now called the *peninsula of the Dardanelles*, or *of Gallipoli*. It was originally inhabited by Thracians, but was colonised by the Greeks, especially Athenians, at a very early period. (Herod. vi. 34, foll.; Nepos, *Milt.* 1.) During the Persian wars it was occupied by the Persians, and after their expulsion it was, for a time, ruled over by Athens and Sparta, until it fell into the hands of the Macedonians, and became the object of contention among the successors of Alexander. The Romans at length conquered it from Antiochus. Its principal towns were, CARDIA, PACTYA, CALLIPOLIS, ALOPECONNESUS, SESTOS, MADYTUS, and ELAEUS. [L. S.]

CHERSONE'SI PROMONTORIUM (Χερσόνησος ἄκρα), placed by Ptolemy (vi. 7) towards the north-eastern extremity of the Persian Gulf, in the country of the Leaniti. It apparently formed the southern promontory of the Leanites Sinus mentioned by the same geographer, and is identified by Forster with *Ras-el-Chair*. (*Arabia*, vol. ii. p. 215, comp. vol. i. p. 48.) [G. W.]

CHERUSCI (Χέρουσκοι, Χηροῖσκοι, or Χαιρουσκοί), the most celebrated of all the German tribes, and mentioned even by Caesar (*B. G.* vi. 10) as a people of the same importance as the Suevi, from whom they were separated by the Silva Bacenis. It is somewhat difficult to define the exact part of Germany occupied by them, as the ancients do not always distinguish between the Cheruscans proper, and those tribes which only belonged to the confederation of the Cheruscans. But we are probably not far wrong in saying that their country extended from the Visurgis in the W. to the Albis in the E., and from Melibocus in the N. to the neighbourhood of the Sudeti in the S., so that the Chamavi and Langobardi were their northern neighbours, the Chatti the western, the Hermunduri the southern, and the Silingi and Semnones their eastern neighbours. (Comp. Caes. *l.c.*; Dion Cass. lv. 1.; Vell. iv. 12.) After the time of Caesar, they appear to have been on good terms with the Romans: but when the latter had already subdued several of the most powerful German tribes, and had made such progress as to be able to take their winter quarters in Germany, the imprudence and tyranny of Varus, the Roman commander, brought about a change in the relation between the Romans and Cheruscans; for the latter, under their chief Arminius, formed a confederation with many smaller tribes, and in A.D. 9 completely defeated the Romans in the famous battle of the Teutoburg forest. (Dion Cass. lvi. 18; Tac. *Ann.* ii. 9; Vell. Pat. ii. 118; Suet. *Aug.* 49; Strab. vii. p. 291.) After this Germanicus waged war against them to blot out the stain which the German barbarians had cast upon the Roman name; but the Romans were unsuccessful (Tac. *Ann.* i. 57, foll., ii. 8, foll.), and it was only owing to the internal disputes and feuds among the Germans themselves, that they were conquered by the Chatti (Tac. *Germ.* 36), so that Ptolemy (ii. 11. § 19) knew them only as a small tribe on the south of the HARZ mountain. though it is possible also that several tribes which he mentions in their neighbourhood under different names, were only branches of the great Cheruscan nation. At a later period, in the beginning of the 4th century, the Cheruscans again appear in the confederation of the Franks. (Nazar. *Paneg. Const.* 18; Claudian. *de IV. Cons. Hon.* 450, *de Bell. Get.* 419, comp. Plin. iv. 28; Liv. *Epit.* 138; Zeuss, *Die Deutsch.* pp. 105, 383, foll.; Wilhelm, *Germ.* p. 190, foll.; Latham, on *Tac. Germ.* p. 129, foll.) [L. S.]

CHE'SINUS. [SARMATIA EUROPAEA.]

CHESIUS. [SAMOS.]

CHESULOTH (Χασελωθαίθ, Χασαλώθ, LXX. *Josh.* xix. 12, 18), a town near Mount Tabor, in the borders of Zabulon and Issachar. Dr. Robinson conjectures that the modern village of *Iksâl* may represent this ancient site. It is situated in the plain at the western foot of Mount Tabor, between Little Hermon, and the northern hills that form the boundary of the great plain. He writes "It is probably the Chesulloth and Chisloth-Tabor of the Book of Joshua; the Chasalus of Eusebius and Jerome in the plain near Tabor; and the Xaloth of Josephus situated in the great plain." (*Bib. Res.* vol. iii. p. 182.) [G. W.]

CHILIOCO'MON (Χιλιόκωμον πεδίον). [ASSYRIA, p. 118.]

CHIMAERA (Χίμαιρα), a mountain in Lycia in the territory of Phaselis, where there was a flame burning on a rock continually. Pliny (ii. 106, v. 27) quotes Ctesias as his authority, and the passage of Ctesias is also preserved by Photius (Cod. 72). Ctesias adds, that water did not extinguish the flame, but increased it. The flame was examined by Beaufort (*Karamania*, p. 47, &c.), who is the modern discoverer of it. This Tomarus, as it is called, is situated on the coast of Lycia south of the great mountains of Solyma and of Phaselis (*Tekrova*). According to Spratt's *Lycia* (vol. ii. p. 181), near *Adratchan*, not far from the ruins of Olympus, "a number of rounded serpentine hills rise among the limestone, and some of them bear up masses of that rock: at the junction of one of these masses of scaglia with the serpentine is the *Yanar*, famous as the Chimaera of the ancients. A

wide in the narrowest part sepa- om the mainland of Asia. Seen the NE. "the bold and yellow form a striking outline against lamilton, *Researches*, &c. vol. ii. from north to south, and its ex- nt 32 miles. The greatest width, orthern part, is about 18 miles; t part, which is somewhat nearer to the southern than the northern extremity, it is only about 8 miles wide. The circuit (*περίπλους*) according to Strabo (p. 645) is 900 stadia; but Pliny makes it 125 Roman miles, or 1,000 stadia; and Isidorus, whom he quotes, makes it 134. The real circuit is about 110 English miles by the maps. Pliny's 125 miles may be nearly exact. The area may be somewhat about 400 square miles, English, or about thrice the area of the Isle of Wight. Clinton very erroneously makes it only 257 square miles (*Fasti, Pop. of Ancient Greece*, p. 411).

Strabo's description commences on the east side of the island, where the chief town, Chios, was situated, which had a harbour capable of holding 80 ships. His periplus is southwards. He next mentions the Posidium, now Cape *Mastico*, the southern point of the island; then Phanae (Thuc. viii. 24), where there was a deep recess, a temple of Apollo, and a grove of palm-trees. There was also a point or headland at Phanae (Steph. *s. v.* Φάναι), which Ptolemy also mentions under the name Phanaea. Livy (xliv. 28) mentions the Promontorium Phanae as a convenient place to sail from to Macedonia. It seems to correspond to Port *Mesta*, on the western coast. After Phanae, proceeding northward along the west coast, Strabo mentions Notium, a beach which was adapted for hauling up ships; and then Laii, a beach of the same character, whence the distance to the city of Chios, on the opposite coast, was 60 stadia. The position of Laii is fixed by this description at or near a place marked Port *Akuntha* in some maps. Groskurd (*Transl. Strab.* vol. iii. p. 26) proposes to change this name to Laïnus, or Laïni, "the stony shore." According to Koray, who was a native of Smyrna, the Greeks still call this coast, with the harbour *Mesta*, which belongs to it, by the name of *Lithilimena;* and he remarks that the isthmus at this part is the narrowest. But this is not true of Port *Mesta*, for the island contracts several miles north of that point.

The periplus from the town of Chios to Laii is 360 stadia (Strab.). The real distance is about 60 miles, and Strabo's measure is incorrect.

Strabo mentions no other place on the west coast, till he comes to the promontory Melaena, opposite to the island of Psyra (*Psara*), which island he places only 50 stadia from the cape, which is too little, for it is 11 or 12 miles. Melaena seems to be Cape *S. Nicolo*. After the promontory Melaena comes the Ariusia, a rocky shore without harbours, about 300 stadia in length; but this tract produced the best of all the Greek wines. Then, the mountain Pelinaeus, the highest summit in the island. This is *Mt. Elias*, a common name for mountains in the Greek archipelago. The island has a marble quarry. This is the sum of Strabo's incomplete description of Chios. He makes the distance from Chios to Lesbus 400 stadia; but the nearest points are not more than 30 miles apart.

The northern part of Chios is the most rugged and mountainous, but all the island is uneven, and the epithet *παιπαλόεσσα* in the Homeric Hymn, quoted by Thucydides (iii. 104), is appropriate. It is a rocky island, generally ill provided with water, and rain comes seldom. It produces, however, some corn and good wine. The wine was exported to Italy under the name of Vinum Arvisium in Pliny's time (xiv. 7), and it is often mentioned by the Roman writers. The Arvisia which produced this fine wine, is the Ariusia of Strabo. (See Vib. Sequester, p. 289, ed. Oberlin). The country about Phanae

Digitized by Google

was also a wine-growing tract (Virg. *Georg.* ii. 97, "rex ipse Phanaeus," &c.); there was a story that the people of this island claimed to be the discoverers of the art of wine making. (Theopomp. quoted by Athen. p. 26, ed. Cas.) Thevenot (*Travels into the Levant*, Engl. Transl. part i. p. 93, &c.) found the wine thick; but he must have been ill served, or have got hold of some *vino cotto*. Chandler (*Travels in Asia Minor*, c. 16), who was treated by an English resident, found the wines excellent. Another chief product of the island was the gum mastic (Plin. xii. 17), which was in great repute in ancient times, and still forms one of the chief products of the island. This resin is got from the Lentiscus by making incisions, and collecting the fluid when it has hardened. The mode of getting it is described by Thevenot and Tournefort. Chios was also noted for its figs (Varr. *de R. R.* i. 41), which had been transplanted into Italy. The island contained a clay adapted for pottery (Strab. p. 317). In Thevenot's time all the earthenware that was used in the island, was made at a village named *Armolia*. The island is healthy. The beauty of the women is celebrated by ancient writers and modern travellers. The growth of the vine, olive, lemon, orange, citron, and palm, show what the temperature is. Thevenot says that the island is subject to earthquakes; and the fall of a school-house recorded by Herodotus (vi. 27) may have been owing to an earthquake. (Sueton. *Tib.* 8.)

The town or the island of Chios was one of the places that claimed to be the birth-place of Homer, and the natives show a place on the north coast of the island, at some distance from the town, which they call Homer's school. Chandler supposed the place to have been a temple of Cybele, open at the top, and situated on the summit of a rock. It is of an oval form, and in the centre was the figure of the goddess, which wanted the head and arm when Chandler saw it. She was represented sitting, and on each side of the chair, and also behind, was the figure of a lion. Round the inside is a kind of seat. Pococke changed the goddess into Homer, and the two lions on the sides of the chair into Muses. It is a rude piece of workmanship, perhaps of great antiquity, and cut in the rock (Chandler, c. 16, and the note in the French edition). The distinguished natives of Chios were Ion, the tragic writer, Theopompus, the historian, and the sophist Theocritus. (Strabo.) Also, Metrodorus, and the geographer Scymnus.

The chief town of Chios, as already observed, had the name of Chios, though Strabo does not mention the name of the city, but the passage is probably corrupt. (See Groskurd's note, vol. iii. p. 26.) It was on the east side of the island, and is now named *Scio*, though it seems to be called *Kastro* in some maps. The city and its environs are like Genoa and its territory in miniature. Some authorities (Dionys. Perieg. 535) place it at the foot of Pellenaeus, which seems to be the same name as Strabo's Pelinaeus. Probably the name of the high range of Pelinaeus may have extended as far south as the town of Chios. Chandler could not see either stadium, odeum or theatre, the usual accompaniments of every Greek town, and we know that Chios had a theatre. As there was a marble quarry in the vicinity, there was abundance of building materials. The stones of the old Greek town have, doubtless, been used for building the modern town, for marbles and bas-reliefs are seen in the walls of the town and of the houses. On the east side of the island was a town Delphinium, in a strong position, with harbours, and not far from Chios (Thuc. viii. 38; Xen. *Hell.* i. 5. § 15). The modern site is indicated by the name *Delphino*. Bolissus (Thuc. viii. 24) is *Volisso* on the NW. coast, south of Cape *S. Nicola*. Stephanus (*s. v.* Βολισσός) has made a mistake in placing it in Aeolis, though he quotes Thucydides (ἐν ὀγδόῃ), and says that the historian calls it Boliscus. Thucydides (viii. 24) also mentions a place called Leuconium (Λευκώνιον), the site of which does not appear to be known. Cardamyle, also mentioned by Thucydides (viii. 24), as a place where the Athenians landed to attack the people of Chios, is *Khardamli*, a little distance from the NE. coast of the island. According to Thevenot there is a good harbour at *Cardamila*, as he writes it, which he places two miles from the coast. The country round Cardamyle is fertile, abounds in springs, and is well adapted for the cultivation of the vine. The situation of Caucasa (Herod. v. 33), and Polichne (Herod. vi. 26), are not determined. Caucasa was probably on the west side of the island. The situation of the place called Coela (τὰ Κοῖλα, Herod. vi. 26) is uncertain.

The oldest inhabitants of the island were Pelasgi, according to one tradition (Eustath. *ad Dion. Perieg.* 533); and Strabo affirms (p. 621) that the Chians considered the Pelasgi from Thessaly, as "their settlers," which, if it has any exact meaning, is a statement that they were descendants of Thessalian Pelasgi. In another passage (p. 632) he gives the statement of Pherecydes, that Leleges originally possessed the Ionian coast north of Ephesus, as far as Phocaea, Chios, and Samus, by which is perhaps meant that Leleges occupied Chios, from which they were ejected by the Iones. Ion, a native of Chios, following, we may suppose, local tradition, knew of no inhabitants of Chios before the three sons of Paeon, who were born in the island: then came Oenopion and his sons from Crete, who were followed by Carians, and Abantes from Euboea. Other settlers came from Histiaea in Euboea under Amphiclus, Hector, the fourth in descent from Amphictyon, fought with the Abantes and Carians, killed some of them, and made terms with the rest for their quitting the island. Things being settled, it came into Hector's mind that the people of Chios ought to join the Ionians in their religious festival at Poseidonium. (Paus. vii. 4. § 8.) But Ion, as Pausanias observes, has not said how the Chians came to be included in the Ionian confederation. Chios is enumerated by Herodotus (i. 18, 142) among the insular states of the Ionian confederation, and as having the same peculiar dialect or variety of the Greek language as the people of Erythrae on the opposite mainland. At the time of the conquest of Ionia by Cyrus (B. C. 546), the Chians were protected by their insular position, for the Persians at that time had no navy. They obtained from the Persians at that time a grant of the Atarneus [ATARNEUS], for delivering up to them Pactyes, a Lydian.

The Chians joined the rest of the Ionians in the revolt against the Persians (B. C. 499), and they had 100 ships in the great sea-fight off Miletus. After the defeat of the confederates, the Persians landed in Chios, burnt the cities and temples, and carried off all the most beautiful girls (Herod. vi. 8, 32). When Xerxes (B. C. 480) invaded Greece, the Ionians had 100 ships in the Persian navy, but it is not said which states supplied them. (Herod. vii. 90)

(Appian. *Mithr.* were hospitably received by the ia, as the ships were sailing past tertained till they could return from Appian, that at the time when Mithridates handled the Chians so roughly, Romans had settled in the island, probably in the usual way, as "negotiatores." When Sulla (B.C. 84) had compelled Mithridates to accept his terms, he treated in a friendly way the Chians and others who had been allies with the Romans, or had suffered in the war, declared them free (Liberi), and allies and Socii of the Roman people. Cicero and Pliny speak of Chios as Libera, which term signifies a certain amount of self-government under the Roman dominion, and a less direct subjection to the governor of a province. Chios was one of the places from which Verres carried off some statues. It does not seem to have been included in the Roman province of Asia; and indeed if the term "libera" applied to the whole island, it would not be under a Roman governor. At a later period, Chios was one of the islands included in the Insularum Provincia, a province which seems to have been established by Vespasian.

The modern history of *Scio* is a repetition of old calamities. In the early part of the 14th century, the Turks took the city of Chios and massacred the people. In 1346, it fell into the hands of the Genoese, who kept it for nearly two centuries and a half, when the Turks took it from them. The condition of the people under Turkish rule was on the whole very favourable, and the island was in a prosperous condition till 1822, when the Chiots joined in the insurrection against the Turks, or, as it appears, were driven into it by some Samiotes and other Greeks. The Turks came with a powerful fleet, and slaughtered the people without mercy. The women and children were made slaves, and the town was burnt. This terrible and brutal devastation, which made a frightful desert of a well cultivated country, and a ruin of a town of near 30,000 inhabitants, gives us a more lively image of the sufferings of this unlucky island twenty-three centuries before, when the barbarous Persians ravaged it. The small islands Oenussae belonged to Chios. [OENUSSAE.] [G.L.]

COIN OF CHIOS.

CHLORUS, a river of Cilicia Campestris, which Pliny (v. 27) mentions between the towns of Issus and Aegae. [G. L.]

CHOANA (Χόανα, Ptol. vi. 2. § 14), a place in Media. Forbiger suggests that perhaps it is the same as Χαῶν, a place mentioned by Diodorus (ii. 13) as one of those where Semiramis was in the habit of dwelling. It is probably represented by the modern *Kaa*, or *Kum*. [V.]

CHOARE'NE (Χοαρηνή, Ptol. vi. 5. § 1; Χορηνή, Strab. xi. p. 514; Isid. Charac.; Choara, Plin. vi. 15. s. 17), a district of Parthia immediately adjoining the Caspian Gates. It was a plain country, and had a town in it called Apameia Rhagiana [APAMEIA, No. 6], and two smaller towns, Calliope and Issatis. (Plin. *l. c.*)

2. A district of Ariana, mentioned only by Strabo (xv. p. 725), who describes it as nearest to India of all the countries which the Parthians had subdued.

Digitized by Google

It is clearly a different district from the one in Media, and ought most probably to be sought for south of the Paropamisus, as it is stated that Craterus passed through it in his march through Arachosia into Carmania. It seems not unlikely that the name is connected with the Indian *Ghaur* or *Ghor*, though it is true that it is not generally safe to trust a mere affinity of names. [V.]

CHOASPES (Χοάσπης), a river of Susiana which rising among the Laristan mountains, and after passing the town of Susa, flowed into the Tigris, a little below the junction of the latter river with the Euphrates.

The indistinctness of the ancient descriptions has led to some confusion between this river and the Eulaeus, which, at the distance of about half a degree of latitude, flows nearly parallel with it into the Tigris. Yet the course of the Choaspes is, on the whole, clearly made out, and it can hardly have been the same as the Eulaeus, though this was at one time the opinion of geographers. Herodotus (i. 188, v. 52) and Strabo (i. p. 46) distinctly state that the town of Susa was on the Choaspes, and Polycletus (*ap.* Strab. xv. p. 728) and Pliny (vi. 27. s. 31) speak of the Choaspes and Eulaeus as different rivers, though the latter states it was the Eulaeus on which Susa was situated. On the other hand, Pliny (*l. c.*) tells the same story of the Eulaeus which Herodotus (i. 188) has given to the Choaspes, viz., that the King of Persia was in the habit of drinking the water of this river only. From the agreement of the description of these two rivers, it has been conjectured by some that the Choaspes was the Persian name, and Ulai (*Dan.* viii. 8) (whence Eulaeus) the Chaldaean appellation. The difference and the similarity of these accounts may perhaps be accounted for in this way. There are two considerable rivers which unite at *Band-i-Kir*, a little above *Ahwaz*, and form the ancient Pasitigris and modern *Karún*. Of these the western flows near, though not actually beside, the ruins of *Sus* (Susa), and is called the *Dizful* river; the eastern passes *Shuster*, and is called the *Karún*, or river of *Shuster*. It is probable that the former was sometimes supposed to be the Choaspes, though its correct name was the Coprates, and the latter the Eulaeus; while, from the fact of their uniting about 25 miles below Susa, what was strictly true of the one, came with less accuracy to be applied to the other. There seems no doubt that the *Karún* does represent the ancient Eulaeus, and the *Kerkhah* the old Choaspes. At present the main stream of the *Karún* is united with the Tigris by a canal called *Haffar*, near *Mohammerah*, but anciently it had a course direct to the sea. It may be remarked that Ptolemy only mentions the Eulaeus. (Map to Rawlinson's *March from Zohâb to Khuzistân*, in *Journ. R. G. Soc.* vol. ix. p. 116.) [V.]

CHOASPES FL., in India. [Cophen.]

CHOATRAS (Χοάτρας, Ptol. vi. 1. § 1; Plin. v. 27), a mountain range on the borders of Media and Assyria. It is part of the outlying ranges of the great chain of Taurus, with which it is connected on the N. To the S. and SE. the chain is continued under the names of M. Zagras and Parachoatras. It was part of the mountains of modern *Kurdistán*. In some editions of Ptolemy the name is called Chaboras. [V.]

CHOATRES, a river of Parthia, mentioned by Ammianus (xxiii. 6). It is not possible to determine which of many small streams he may have intended, but it is probable that it was in the neighbourhood of the M. Choatras. Parthia has no river of any magnitude. [V.]

CHOE'RADES. [Pharnacia.]

CHOE'RADES (Χοιράδες νῆσοι), two small islands lying off the harbour of Tarentum, about four miles from its entrance: they are now called the *Isole di S. Pietro e S. Paolo*. As their name imports, they are little more than low rocks rising out of the sea, but must have afforded a place of anchorage, as Thucydides tells us that the Athenian generals Demosthenes and Eurymedon, touched there on their way to Sicily (B. C. 413), and took on board some Messapian auxiliaries (Thuc. vii. 33). [E.H.B.]

CHOE'REAE (Χοιρέαι), a place in Euboea, only mentioned by Herodotus (vi. 101), appears to have been situated between Tamynae and the island Aegilia. Cramer supposes Choereae to be the town named *Kavalleri* in modern maps.

CHOES FL. [Cophen.]

CHOLARGUS, a demus of Attica of uncertain site. [See p. 336.]

CHOLLEIDAE. [Attica, p. 331, a.]

CHOLON TEICHOS (Χωλὸν τεῖχος: *Eth.* Χολοτειχίτης), a city of Caria, mentioned by Apollonius in his Carica. (Steph. B. *s. v.*) [G. L.]

CHOMA (Χῶμα), a place in the interior of Lycia, according to Pliny (v. 27), on a river Aedesa. Ptolemy (v. 3) makes Choma one of the four cities of the Milyas, and places it near Candyba.

CHONAE. [Colossae.]

CHONE, CHO'NIA. [Chones.]

CHONES (Χῶνες), a people of Southern Italy, who inhabited a part of the countries afterwards known as Lucania and Bruttium, on the shores of the Tarentine Gulf. It appears certain that they were of the same race with the Oenotrians, and like them of Pelasgic origin. Aristotle expressly tells us that the Chones were an Oenotrian race (*Pol.* vii. 9), and Strabo (quoting from Antiochus) repeats the statement, adding that they were a more civilized race than the other Oenotrians. (Strab. vi. p. 254.) He describes them as occupying the tract about Metapontum and Siris; and Aristotle also, as well as Lycophron, place them in the fertile district of the Siritis. (Arist. *l. c.* where it seems certain that we should read Σιρῖτιν for Σύρτιν; Lycophr. *Alex.* 983.) Strabo also in another passage (vi. p. 264) represents the Ionians, who established themselves at Siris, as wresting that city from the Chones, and speaks of Rhodian settlers as establishing themselves in the neighbourhood of Sybaris in Chonia (xiv. p. 654). But it seems clear that the name was used also in a much wider signification, as the city of Chone, which, according to Apollodorus, gave name to the nation, was placed near the promontory of Crimisa in Bruttium. (Apollod. ap. Strab. vi. p. 254.) The existence, however, of a *city* of the name at all is very uncertain: Antiochus says that the land of the Chones was named Chone, for which Strabo and Lycophron use the more ordinary form Chonia. (Strab. xiv. p. 654; Lycophr. *l. c.*) It seems clear on the whole, that the name was applied more or less extensively to the tribe that dwelt on the western shores of the Tarentine Gulf, from the Lacinian promontory to the neighbourhood of Metapontum: and that as they were of close kindred with the Oenotrians, they were sometimes distinguished from them, sometimes included under the same appellation. The name is evidently closely connected with that of the Chaones in Epeirus, and this resemblance leads us

Digitized by Google

ttested by many other arguments) ere of Pelasgic origin, and related race. This point is more fully [E. H. B.]

ENOTRIA,

)RA, a place in Gallia, mentioned arcellinus (xvi. 2) as being on n Augustodunum (*Autun*) to Au- , Autissiodurum (*Auxerre*). HORZIANE'NE (Χορζάνη, Προ- οζιανή, Procop. *B. P.* ii. 24), a, which Forbiger (vol. ii. p. 601) identifies with the ACILISENE (Ἀκιλισηνή) of Strabo (xi. pp. 528, 530), which lay between the N. and S. arm of the Euphrates and on the boundaries of Cappadocia, and which on account of the worship of the goddess Anahid so prevalent in that district, is undoubtedly the same as the ANAITIS, or ANAITICA of Pliny (v. 24. § 20). The plain of *Erzingán* now represents this district. (Ritter, *Erdkunde*, vol. x. pp. 73, 81, 550, 576, 774, 796; *Journ. Geog. Soc.* vol. vi. p. 201.) [E. B. J.]

CHORZE'NE (Χορζηνή, Strab. xi. p. 528), a mountainous district, situated to the NW. of the Greater Armenia, which had originally belonged to the Iberians. (St. Martin, Append. to Le Beau, *Bas Empire*, vol. xv. p. 491.) The capital of this district was the town which appears after the 10th century under the name of *Kárs* (Κάρς, Const. Porph. *de Adm. Imp.* c. 44), and was well known as the residence of the Bagratid princes from A. D. 928—961. In A. D. 1064 the last of these princes gave up the district to Constantine Ducas in exchange for a principality in Armenia Minor (St. Martin, *Mém. sur l'Armenie*, vol. i. p. 375). The province has ever since retained the name of *Kárs*. The snow fell to such depth in this mountain tract, that Strabo (*l. c.*) speaks of whole caravans of travellers being buried in the drifts, and having to be dug out. The same author (*l. c.*) describes a curious kind of snow-worm which was found here. Mr. Brant in ascending the *Sapán Tágh* was told by his Kurd guides that they had seen this animal; one of them went to a pool of melted snow to procure a specimen, but did not succeed in the attempt. (*Journ. Geog. Soc.* vol. x. p. 410; Ritter, *Erdkunde*, vol. x. p. 423, foll.) [E. B. J.]

CHRENDI. [CHARINDA.]

CHRETES (Χρέτης), a river on the W. coast of Africa, a little S. of CERNE (Hanno, p. 3), on the position of which its identification of course depends. According to Rennell's view, it must be the river *St. John*; but those who place Cerne in the bay of *Agadir* identify the Chretes with the *Wadi Sus*, the Subus of Ptolemy. [P. S.]

CHRISTO'POLIS (Χριστόπολις), a town of Macedonia, situated on the Via Egnatia, mentioned by the writers of the Lower Empire (Georg. Acrop. c. 43; Niceph. Greg. xiii. 1. § 1, xiii. 5. § 1), which some have supposed to have occupied the site of Datum, but should more properly be identified with Acontisma. [ACONTISMA.] [E. B. J.]

CHRONOS or CHRONIUS FL. [SARMATIA EUROPAEA.]

CHRYSA (Χρύση, Χρύσα: *Eth.* Χρυσεύς). Stephanus (*s. v.*) has a list of various places so called. He does not decide which is the Chrysa of Homer (*Il.* i. 37, 390, 431). He mentions a Chrysa on the Hellespont, between Ophrynium and Abydus. Pliny (v. 30) mentions Chryse, a town of Aeolis, as no longer existing in his time. He also mentions a Chryse in the Troad, and apparently places it north of the promontory Lectum, and on the coast. He says that Chrysa did not exist, but the temple of Smintheus remained; that is, the temple of Apollo Smintheus. The name Smitheus, not Smintheus, appears on a coin of Alexandria of Troas (Harduin's note on Plin. v. 30). The Table places "Smynthium" between Alexandria and Assus, and 4 miles south of Alexandria. Strabo (p. 604) places Chrysa on a hill, and he mentions the temple of Smintheus, and speaks of a symbol, which recorded the etymon of the name, the mouse which lay at

Digitized by Google

in the Appendix to Spratt's *Lycia*. All of them contain the name of the city, and all belong to the Roman period. One of them seems intended to record a statue, or some memorial set up in honour of L. Aelius, the adopted son of Hadrian, and it mentions his being in his second consulship. Aelius died in the lifetime of Hadrian, A. D. 138. L. Aelius Verus was consul for the second time in A. D. 137 (Tillemont, *Hist. des Empereurs*, vol. ii. p. 255), and we may assume that he was alive when this inscription was made. Hadrian certainly was alive then, as we may infer from the terms of the inscription. But Hadrian also died in A. D. 138. The inscription, therefore, belongs to A. D. 137.

COIN OF CIBYRA.

2. CIBYRA THE LESS, was a place in Pamphylia. Strabo (p. 667), after mentioning Side, says, "and near it is the Paralia of the Cibyratae, the Less, and then the river Melas, and a station for ships." The site of Side is well known, and is called by the Turks *Esky Adalia*. The Melas is the *Manargat*, four miles east of Side. But there could have been no city between Side and the Melas, and it is conjectured that in Strabo's text, the paralia of the Cibyratae should come after the Melas. "The vestiges of Cibyra are probably those observed by Captain Beaufort upon a height which rises from the right bank of a considerable river about 8 miles to the eastward of the Melas, about 4 miles to the west of *Cape Karáburnu*, and nearly 2 miles from the shore" (Leake, *Asia Minor*, p. 196). Ptolemy mentions this Cibyra among the inland towns of Cilicia Trachea; but Scylax places it on the coast. There is a place, Cyberna (Κυβέρνη), mentioned in the Stadiasmus, which is placed 59 stadia east of the Melas. If the conjecture as to Strabo's text is correct, we may identify Cyberna with this Cibyra of Pamphylia. [G. L.]

CICHYRUS. [EPHYRA.]

CI'CONES (Κίκονες), a Thracian people inhabiting the coast district between the rivers Hebrus in the E. and Lissus in the W., where they appear to have lived from very remote times. (Hom. *Il.* ii. 846, *Od.* iv. 39; Herod. vii. 59, 110; Orph. *Arg.* 77; Steph. Byz. *s. v.* Μαρώνεια; Mela, ii. 2, 8; Plin. iv. 18; Virg. *Georg.* iv. 520; Sil. Ital. xi. 477; Ov. *Met.* x. 2, xv. 313.) [L. S.]

CICYNE'THUS (Κικύνηθος: *Trikeri*), a small island off the coast of Thessaly in the Pagasaean gulf. (Scylax, p. 29; Artemid. ap. Strab. ix. p. 436; Mela, ii. 7; Plin. iv. 12; Leake, *Northern Greece*, vol. iv. p. 396.)

CICYNNA, a demus of Attica, of unknown site. [ATTICA, p. 334.]

CIDRAMUS, a town in Phrygia, known from its coins described by Sestini. The epigraph is Κίδραμηνων. (Cramer, *Asia Minor*, vol. ii. p. 56.) [G. L.]

CIERIUM (Κίερον: *Eth.* Κιεριεύς), a town in Thessaly, which is identified by Stephanus B. with Arne (Steph. B. *s. v.* Ἄρνη), the chief town of the Aeolian Boeotians in Thessaly, from which they emigrated to Boeotia. The site of Cierium was first discovered by Leake, who from inscriptions and coins found on the spot has proved that it stood at the modern village of *Mataránga*, between the Enipeus or Apidanus, and a tributary of that river. The territory of Cierium adjoined that of Metropolis: and we learn from an inscription cited by Leake that the adjustment of their boundaries was a frequent subject of discussion between the two people. The identification of Arne and Cierium is confirmed by an inscription, which mentions Poseidon Cierius (Κυνέριος), a name evidently connected with the river Cuarius or Coralius in Boeotia. (Strab. ix. p. 411.) The expelled Boeotians gave this name to the river, and founded upon its banks a temple of Athena Itonia in memory of their former abode in Thessaly. We may therefore conclude that the river upon which Cierium stood was called Cuerius, Cuarius or Curalius, more especially as Strabo (ix. p. 438) mentions a river Curalius in Thessaly, flowing through the territory of Pharcadon in Histiaeotis past the temple of Athena Itonia into the Peneus, in which the only inaccuracy appears to be that he makes it flow directly into the Peneius. Pausanias (i. 13. § 2) also appears to speak of this temple of Athena Itonia, since he describes it as situated between Pherae and Larissa, which is sufficient to indicate the site of Cierium. Leake supposes with much probability that the name of Arne may have been disused by the Thessalian conquerors because it was of Boeotian origin, and that the new appellation may have been taken from the neighbouring river, since it was not an uncommon custom to derive the name of a town from the river upon which it stood.

Cierium is not mentioned under this name in history; but it occurs under the form Pierium, which is undoubtedly only another appellation of the same place, π and κ being, as is well known, often interchangeable. Pierium was probably the general, and Cierium the local form. Pierium is first mentioned by Thucydides (v. 13). It is called Piera and Pieria by Livy (xxxii. 15. xxxvi. 14), in both of which passages it is mentioned in connection with Metropolis. In the Armenian translation of Eusebius we find the name of Amyntas the Pierian in the list of the Strategi who governed Thessaly after the battle of Cynoscephalae. Aelian (*N. An.* iii. 37) speaks of Pierus in Thessaly. (Leake, *Transactions of Royal Society of Literature*, vol. i., *Northern Greece*, vol. iv. p. 498, seq.; Müller, *Dorians*, vol. i. p. 476.)

CIERUS. [PRUSA AD HYPIUM.]

CILBIA'NI. [CAYSTER.]

CI'LICES (Κίλικες). The Cilices are mentioned in the Iliad as the inhabitants of the part of Mysia called Troas. Eetion, the father of Andromache, Hector's wife, lived beneath wooded Placus; and his chief city was Thebe Hypoplacia. (*Il.* vi. 395. 415.) He was king of the Cilices. Strabo observes (p. 221) that Homer makes Pelasgi border on these Cilices, for he mentions Larissa as one of the cities of the Pelasgi (*Il.* ii. 840). In another passage (pp. 586, 611) he divides the territory of these Cilices into two parts, one the Thebaic, and the other Lyrnessis; and he makes the territory of the Cilices comprehend the territories of Adramyttium, Atarneus, and Pitane, and extend to the mouth of the Caicus. It seems to have been the opinion of

The description of Ci- but the best way of understanding his country is by following Strabo's bo calls Cilicia, which lies along Mediterranean, "Cilicia outside of Ἔξω τοῦ Ταύρου), for there was a licia which was within (ἐντός) the strict he has described under Cappa- OCIA.] Cilicia Proper was bounded amphylia, on the north by Lyca- cia, and on the east by the range extends from the interior to the terranean at the gulf of Issus. The y is the Mediterranean. Cilicia is into two parts. The western and was called Cilicia the Rough ωτις: *Eth.* Τραχειώτης). The ains a considerable extent of plain called Cilicia the Plain or Cam-

presents to the sea a convex out- w tract along the coast, as Strabo it has little or no plain country. oracesium (*Alaya*) the boundary ia and Cilicia. Pliny places the river Melas (*Manavgat*) 26 miles n. Mela (i. 13) makes Anemurium, the boundary between Cilicia and murium is the most southern point us coast, and the most southern sula of Asia Minor; but it is above rabo's boundary. Ptolemy does not with himself, for under Pamphylia Side the last town in Pamphylia, his eding from west to east; and he enumerates Coracesium and Syedra Cilicia Trachea. But under Cilicia s Syedra as a city of Pamphylia, Cilicia Trachea commence east of t of Cilicia Trachea presents a rude y high mountains from Coracesium e, a distance of above 140 miles.

To the east of *Cape Cavaliere* the high mountains recede from the coast, and the appearance of the country, as seen from the sea, alters materially. (Beaufort, *Karamania*, p. 219). But Strabo extends the eastern limit of Cilicia Trachea to the river Lamus (*Lamas*), which is between the island Elaeussa and Soli. "Here," observes Beaufort, "the rocky coast finally terminates, being succeeded by a gravelly beach and broad plains, which extend inland to the foot of the mountains." Strabo reckons the distance along the coast from Coracesium to Anemurium to be 820 stadia; and the distance from Anemurium to Soli at about 500 stadia. The distance from Coracesium to Anemurium is 68 English miles; and Strabo's distance is too great. The distance from Anemurium to Soli, afterwards Pompeiopolis, is about 149 miles; and here Strabo's error is very great, or at least the error in his present text.

A branch of the great mountain mass of Taurus runs direct from Coracesium (*Alaya*) towards Anemurium, but it is interrupted off *Karadran* [CHARADRUS]. From Charadrus eastward the mountains still run near the shore; and there are no large rivers on the coast of Cilicia till we come to the Calycadnus. [CALYCADNUS.] This river is represented as rising in the range of Taurus, east of Coracesium, and as having a general eastern course to Seleuceia, below which it enters the sea. The basin of the Calycadnus is separated from the coast by a rough mountain tract, which some geographers have identified with the Imbarus of Pliny (v. 27). The northern boundary of the basin of the Calycadnus and of Cilicia Trachea is the Taurus; from which a considerable stream flows southward, and joins the Calycadnus on the left bank, a little below *Mout*, supposed to be on the site of Claudiopolis. A district named Lalassis by Ptolemy (v. 8) was probably contained in the upper and western part of the basin of the Calycadnus; and Ptolemy's Cetis may have comprehended the middle and lower basin of the same river,—the only level tract in this rugged country. Ptolemy, however, includes in Cetis, both Anemurium, Arsinoe, Celenderis, and other places on the coast.

The route from Laranda (*Karaman*), on the north side of the Taurus, through *Mout* to Celenderis, is described in Leake's *Asia Minor*, p. 103. It is one of the few passes through the Cilician mountains. Ptolemy also mentions a district Lamotis, so named from a town Lamus, which was also the name of the river that was the boundary between the Trachea and the Campestris. The mountains at the back of the coast of Cilicia Trachea contain timber trees; and Strabo mentions Hamaxia, which is between Coracesium and Selinus, as a station to which ship-timber was brought down,—chiefly cedar, which was abundant; and he adds that M. Antonius gave these parts to Cleopatra, because they were suited for the equipment of a navy.

From the Lamus the coast of Cilicia Campestris runs NE. beyond Soli, and then has an ESE. course to Cape *Karadash* (the ancient Magarsus). These two coast-lines form a considerable bay. A long straight beach extends from the Lamus to Soli; and as we advance eastward from the Lamus the mountains recede further from the shores, and leave a greater breadth of level country. The mountains that bound this plain on the north have their peaks covered with snow in June. (Beaufort.) The first river within Cilicia Campestris, which, by its direction from north to south and the length of its course,

Digitized by Google

indicates the commencement of the Cilician plain, is the Cydnus, which flows past Tarsus (*Tersoos*). Nearly due north of Tarsus is a gorge in the limestone rock of the mountains, through which the Cydnus flows from the high range of the Taurus. This difficult pass, which the Turks call *Gölek Bóghàz*, is that by which the younger Cyrus passed from Dana or Tyana, in Cappadocia, to Tarsus; and it is clearly described by Xenophon (*Anab.* i. 2. § 21). This was also the pass by which Alexander entered Cilicia, and the pass which Niger attempted to defend against Septimius Severus, who was marching against him from Cappadocia. (Herodian, iii. 8, &c.) But there was another pass between that of Laranda and the Pylae Ciliciae, which is mentioned by Xenophon (*Anab.* i. 2. § 19). Cyrus was accompanied in his march from Iconium through Lycaonia by the Cilician queen Epyaxa; and on his route through Lycaonia, he sent her with an escort into Cilicia, by the pass between Laranda and the Ciliciae Pylae. This is the pass which "leads by Kizil Chesmeh and Alan Buzuk, Karahisar and Mezetli, to Soli or Pompeiopolis, and to Tarsus." (Ainsworth, *Travels in the Track*, &c., p. 40.) After passing through the Ciliciae Pylae, Cyrus and his army descended into the Level Cilicia, which Xenophon describes as a large, beautiful, well-watered plain, full of all kinds of forest trees and vines. It produced sesame, panic, millet, wheat, and barley,—which are cultivated there at the present day,—with rice, cotton, and the sugar-cane; the date tree is indigenous. (Ainsworth.) Xenophon describes the plain as surrounded by rugged and lofty mountains on all sides from sea to sea; by which expression we must understand that he considered the plain of Cilicia as extending eastward to the place where the Amanus runs down to the sea, and terminates in Cape *Hynzyr*, or *Ras-el-Chansir*, as it is sometimes called.

"*Cape Karadash* (Magarsus) is a white cliff, about 130 feet high, and is the first interruption of that low sandy beach, which commences near the river *Lamas*." (Beaufort.) This point may be considered as the commencement of the deep bay of Issus, now the gulf of *Iskenderun*; the corresponding point on the opposite side is Cape *Hynzyr*. The coast of this bay east of Karadash has first a general eastern, and then a north-eastern direction, to the head of the gulf of Issus. "Eastward of Karadash, the same dreary waste of sand, interspersed with partial inundations of water, again recurs, and extends to the river Jyhoon or Jyhan, the ancient Pyramus." (Beaufort.) Immediately north of the outlet of the Pyramus is the bay of *Ayas* [AEGAE], the northern part of which is "a level plain of firm soil, from ten to twenty feet above the sea." (Beaufort.) From the head or most northern part of the gulf of Issus, the coast has a general south direction, nearly as far as Alexandria (*Iskenderun*); and from *Iskenderun* to Cape *Hynzyr*, the direction of the coast is south-west, being nearly parallel to the coast on the opposite side of the bay. The form of the eastern coast is determined by the eastern or Syrian range of Amanus, which has a general southern direction as far as the latitude of *Iskenderun*, and then a SW. direction to Cape *Hynzyr*. There is only a very narrow tract between these mountains and the sea from Cape *Hynzyr* to the head of the gulf of Issus. The level land at the head of the gulf is the plain of Issus, which is bounded on the north and north-west by the other range of Amanus, which descends in a SW. direction as far as the lower course of the Pyramus. This range is crossed in going from Mopsuestia (*Misis*) to the gulf of *Iskenderun*: and the two lands, in fact, descend to the shore of the gulf of Issus, at a place called *Matakh*. This appears to be the station (ὕφορμος) which Strabo mentions as belonging to the Amanides Pylae, for he describes the SW. branch of the Amanus as reaching to the sea at this place. [AMANIDES.] These two ranges of the Amanus, the eastern or Syrian, and western or Cilician, enclose the plain of Issus, and separate it from the more extensive plain to the west, which we may call the Cilician.

Strabo (p. 676) reckons it a voyage of near 1000 stadia, direct distance from Seleucia in Pieria which is the first Syrian city south of Rhosus to Soli in Cilicia. The real distance is only about 80 English miles. Strabo further says that the whole coast of Asia Minor runs eastward from the Rhodian Peraea to the mouth of the Cydnus, and that it then takes a direction nearly ESE. (ἐπὶ τὴν χειμερινὴν ἀνατολήν) as far as Issus, and that from Issus the coast makes a bend to the south as far as Phoenicia. Now, this is true of the coast as far as Cape *Karadash*, but no further; and Strabo's notion of the coast east of *Karadash* makes the bay of Issus disappear altogether. Therefore, the geographer has either expressed himself very inaccurately, or he was not acquainted with the form of the bay of Issus.

The lower part of the plain of Cilicia between the Sarus and the Pyramus is the Aleian (Ἀλήιον πεδίον), which was celebrated in the myths of the Greeks as the place of Bellerophon's wanderings (*Il.* vi. 201). The cavalry of Alexander, in his Asiatic campaign, passed through this plain from Tarsus to the Pyramus (Arrian, *Anab.* ii. 5. § 11). It is seen from the sea by those who follow the coast from the mouth of the Cydnus to Cape *Karadash*, and "as far as the eye could discern, it consists entirely of dreary sandhills, interspersed with shallow lakes." (Beaufort.)

The Cilician plain contains three large rivers. The Cydnus (*Tersoos Tchy*) is described by Strabo as having its source not far above Tarsus, passing through a deep ravine, and then immediately near down to Tarsus; and the stream is cold and rapid. He makes it only 120 stadia from the Cilician boundary on the north to Tarsus, and five stadia from Tarsus to the sea. But the Cilician Pylae are about 25 miles NNW. of Tarsus; and the distance from Tarsus to the present outlet of the river is at least 12 miles, through a level and well cultivated country. The best maps represent it as rising much further north than the Ciliciae Pylae, and on the south side of the range of Taurus, now called *Bhulgar Dagh*. The Cydnus can now only be entered by the smallest boat, the entrance being obstructed by bars; but inside of the bar "it is deep enough, and about 160 feet wide. It was navigable in ancient times up to Tarsus (Plut. *Anton.* c. 26), and probably much later. It seems that the progress of the alluvium has been very rapid at the mouth of this river, and this is the only way of explaining Strabo, who says that the Cydnus, at its mouth, flows into a kind of lake, called Rhegma, where the ancient dockyards, and the lake was the port of Tarsus. Strabo's five stadia from Tarsus were probably reckoned to the Rhegma, which the alluvium has changed into a sandy plain. But there is some error in the five stadia: the Stadiasmus makes the same distance 70 stadia. The water of the Cydnus

leep ravine which Strabo describes
as passing through in its course to

Tarsus; and that which Niger blocked up to stop the approach of Septimius Severus. Niebuhr (*Reisebeschreibung*, vol. iii. p. 106), who went through this defile, observes that this road, through the *Boghaz* from the pashalik of *Adanah* to that of *Konie*, would be as dangerous for a hostile army as Xenophon and Curtius describe it, for it is narrow, and the rocks on both sides are steep as a wall; yet the caravan, which he accompanied in December 1766 from *Adanah*, made its way through these Ciliciae Pylae without any great difficulty.

When the army of Cyrus (B. C. 401) left Tarsus, it marched to the Sarus or Psarus, as the best MSS. have it (Xenoph. *Anab.* i. 4. § 1). The march was ten parasangs or 300 stadia from Tarsus to the Sarus; and the width of the Sarus was estimated by Xenophon at 300 Greek feet. Mr. Ainsworth found the Sarus, at *Adanah*, in the month of December, 325 feet wide at the bridge, but not fordable. *Adanah*, which is on the site of the old city, is, at present, a town of some trade, and surrounded by a fertile tract of well-cultivated gardens.

From the passage of the Sarus the army of Cyrus marched five parasangs, or 150 stadia, to the Pyramus, the width of which Xenophon estimated at 600 Greek feet (*Anab.* i. 4. § 1.). The present passage of the Pyramus (*Jihun*) is at *Misis*, the site of Mopsuestia, which is on the road from Baiae (*Bayas*), on the bay of Issus, to *Adanah*. Mr. Ainsworth, however, gives some good reasons for supposing that Cyrus crossed the Pyramus below Mopsuestia, and much nearer the old mouth of the river. Niebuhr (A. D. 1766) found a handsome bridge at *Misis*, recently built, and a hundred double steps in length. The Pyramus is the largest of the Cilician rivers, It rises in Cataonia [CATAONIA], and consists of two main branches, one the Carmalas, flowing from the north, and the other from the east. [CARMALAS.] These two branches unite SW. of *Marash*, from which point the river has a SW. course, through the Taurus. It passes the site of Anazarbus and *Misis*, and at present enters the sea a little south of the inlet, already mentioned, at the eastern extremity of which *Ayas* stands. But the old bed of the river seems to have entered the sea some distance from the present mouth, and a little west of Cape *Karadash*, as Beaufort supposes; for here there is a shallow inlet of salt water, about 12 miles long. The present outlet of the *Jihun* is 23 miles east of the supposed former outlet. A short distance NE. of *Karadash*, and near the eastern extremity of this shallow inlet, is the site of Mallus, the chief town of the Mallotis. Thus Mallus would stand on the east side of the old bed of the Pyramus, and near the mouth of the river, which is consistent with all the ancient authorities.

Strabo (p. 536) describes the Pyramus as a navigable river which rises in the middle of the plain of Cataonia. There is a considerable channel, through which the clear water flows unseen for some distance under ground, and then rises to the surface. If a man lets down a spear from above into the channel, the force of the stream is so great that the spear is with difficulty dipped in the water. After its re-appearance the river runs on in a broad deep stream, but on approaching the Taurus, it is wonderfully contracted. Wonderful also is the gap in the mountains through which the bed of the river passes, for as it happens in rocks which have been rent and split asunder, that the projections on one side correspond to the recesses on the other, in such wise that

Digitized by Google

they may be fitted together, so we observed that the rocks overhanging the river on each side, and rising almost up to the summits of the mountains, at a distance of two or three hundred feet, had the receding parts corresponding to the projecting parts. The bottom between the steep sides is all rock, and has a deep and very narrow fissure in the middle, so narrow that a dog or a hare might leap over. This is the channel of the river which is full to the brim, like a broad canal to the extent of a thousand stadia. Owing to the winding course of the stream, and the great contraction, and the depth of the chasm, the noise falls on the ear of persons even as they approach at some distance, like the sound of thunder. Passing through the mountains the river brings down so much alluvium to the sea, some from Cataonia, and some from the Cilician plains, that a prophecy uttered about it is in vogue, to the following effect:

"In time to come broad flowing Pyramus
Shall push his banks to Cyprus' sacred shore."

The same thing happens here, adds Strabo, as in Egypt, where the Nile is continually making land of the sea by its alluvium. (See the notes on this passage of Strabo about the Pyramus, in Groskurd's Transl., vol. ii. p. 450).

Mr. Ainsworth remarks, from his own observations on the plain of Cilicia, as far as the ruins of Anazarbus, that "its bed is throughout the plain deep and narrow, from the nature of the soil, which is alluvial;" and that "in its lower part it divides into several streams on arriving at its delta." He concludes that the army of Cyrus crossed this river in the lower parts, where it is most easily forded, at which time its embouchure was probably at *Karadash*. The prophecy is not yet fulfilled; but the river still brings down a great quantity of earth and sand. This deposit has produced a plain of sand along the side of the gulf, like that formed by the Calycadnus. "The *Jyhoon*, half a mile from its mouth, is 490 feet wide, and is the largest of all the rivers on the south coast of Asia Minor" (Beaufort). It is now as shallow over its bar as the Cydnus and the Sarus; though it appears from a passage of Anna Comnena, quoted by Beaufort, that it was open for galleys even in the time of the crusades.

The remainder of Cilicia contains no large river, and is closed, as already described, by the two branches of the Amanus. It lies around the Gulf of Issus, and the more particular description of this gulf, and the examination of the difficult question of the site of Issus, will come more appropriately in another place. [ISSUS].

The extensive tract of country called Cilicia has a coast line of 430 miles, from Coracesium to Rhosus, at the southern extremity of the bay of Issus. The direct distance from Coracesium to the Syrian Gates on the east side of the gulf of Issus is about 230 miles. It is, aptly enough, divided into the Mountainous (ἡ ὀρεινή, Herod. ii. 34) and the Level, and a ready communication between the extreme west and eastern parts could only be by sea. The coast, however, of the Tracheia, or Mountainous Cilicia, nearly as far east as the outlet of the Calycadnus, though included in Cilicia by the later geographers, is really a distant country. But the valley of the Calycadnus, which lies from west to east, may be considered one of the three natural divisions of Cilicia; the other two being the plain of Tarsus and Adana, and the plain of Issus. Indeed, from the peninsula of Cape *Caraliere*, "the last and highest of the series of noble promontories that project from this coast" (Beaufort), the rude outline of the shore is changed, and the land communication along the coast with the eastern part of Cilicia is not difficult. There is a road represented in the Table, all along the coast from the border of Pamphylia to Selenda on the Calycadnus, and thence eastward through Corycus, Soli (or Pompeiopolis), the Aleian plain, Mallus, Aegae, and Issus, to Rhosus. Alexander, after reaching Tarsus by the pass in the Taurus, led part of his army to Anchiale, and from Anchiale to Soli; and he afterwards advanced from Soli eastwards to Magarsus and Mallus, on the Pyramus. The two natural chief divisions of Cilicia, the basin of the Calycadnus and the plain country east of the Cydnus, are represented by the modern Turkish governments or pashalicks of *Seleflkeh* (Seleucia on the Calycadnus) and *Adanah*.

It is difficult to estimate the extent of the Cilician plain, through which the Cydnus, Sarus and Pyramus flow. The level country appears to reach somewhat north of Mopsuestia (*Misis*), Adana (*Adanah*), and Tarsus (*Tersoos*); and in this part the plain may be between 40 and 50 miles from east to west. The form of the coast makes the dimensions of the plain from north to south very unequal in different parts. The widest part extends north from Cape *Karadash*, and it may be above 30 miles. The level land, that has been named the plain of Issus, is only a narrow strip, except at the head of the gulf of Issus, when it seems to extend eight or ten miles inland. Cilicia surrounded by mountain barriers, with a long coast and numerous ports, a fertile plain, and mountains covered with forests, possessed great natural advantages. Its position between Syria on one side, and the rest of Asia Minor on the other, made it the highway from the Hellespont and the Bosporus to the eastern shore of the Mediterranean, and the middle course of the Euphrates. Its proximity to Syria invites the cupidity of any one who is master of that country; and the Greek rulers of Egypt coveted the possession of the opposite coast of Cilicia, which contains the materials for shipbuilding, which Egypt does not.

Besides the products of Cilicia mentioned above, Corycus on the coast was famed for its saffron, which was an article of export. A cloth made of goats' hair, which the Romans called Cilicium, was the work of Cilician industry; at least the thing seems to have had its name from the Cilician article.

The Cilicians, Herodotus says (vii. 91), were originally named Hypachaei, and afterwards they had the name of Cilices from Cilix, the son of Agenor, a Phoenician. According to this tradition, they were of the same stock as the Phoenicians. It is probable that they did belong to some branch of the Aramaic nations, and the Assyrian kings seem to have extended their power to the level Cilicia. [ANCHIALE.] Cilicia had a king Syennesis, who is represented as mediating, in conjunction with a king of Babylon, to make peace between Croesus the Lydian king and the Medes, B. C. 610. (Herod. i. 74.) Cilicia was the fourth division in the arrangement of Darius, and it paid the king a yearly tribute of 360 white horses and 500 talents of silver (Herod. iii. 90); of which sum 140 talents were expended on the cavalry on duty in Cilicia, and the rest came into the Persian king's treasury. Herodotus (v. 52) makes Cilicia extend north of the Taurus to the east of Cappadocia, and he makes the Euphrates the boundary between the Cilicians and the Armenians;

Digitized by Google

his statement is true, the eastern part of province of Cappadocia was in his time [CAPPADOCIA.] Cilicia still had its gs in the time of this Darius; for a Ca- arus, the son of Mausolus, was married ghter of the Cilician king Syennesis. 118.) Cilicia was one of the subject h contributed to form a navy for the Per- it supplied 100 ships for the great expe- erxes, which were under the command of Syennesis, the son of Oromedon. (Herod. .) A king still called Syennesis was the queen Epyaxa, who made herself a par- younger Cyrus, when he was on his road ilicia to attack his brother Artaxerxes, ed to reconcile her husband to him. (Xen. § 26.)

lhi of the Greeks connected the history of of Western Asia with Cilicia [CILICES]; d stores of early settlements by their own these shores. Amphilochus, the son of s, settled Posideium on the borders of the d the Syrians (Herod. iii. 91). According story, Amphilochus, and Mopsus, the llo, came from Troy and founded Mallus; abo's time their tombs were pointed out at ear the Pyramus. But the Greeks do to have settled in Cilicia, if we look to evidence, before the time of Alexander, few places on the coast. Soli is said to colonised by Achaei and Rhodians from In the time of Xenophon (B. C. 401) the l appear as a distinct people. It was r the time of Alexander that the Greeks footing in the country, and, under Greek , Tarsus became one of the great schools of t world. The name of Seleuceia on the s, of Antiocheia ad Cragum, and Arsinoe, t of the Trachea, and other Greek names, e connection of Cilicia with the Greek yria and Egypt. The later Roman occu- the country is indicated by the names lis, Claudiopolis, Trajanopolis, and others. Cilicians probably disappeared from the try, or were mingled first with Greeks and gners; but they maintained themselves in ains, even to Cicero's time, under the name erocilices. Cicero, who was governor of scribes them as a fierce and warlike race, k their strong town Pindenissus. (Cic. . 20.) Strabo says that the Amanus, above Cilicia on the east, was always y several kings or chiefs, who had strong d in his time, a man of mark was set over n, and called King by the Romans for his is name was Tarcondimotus, a genuine an, no doubt.

s, surnamed Tryphon, made the strong- cesium his head-quarters at the time that Syria to revolt from the kings, as Strabo it. Antiochus, the son of Demetrius, in compelled Tryphon to seek refuge in a fort, killed himself. This Tryphon, adds Strabo, cause of the Cilicians commencing their practices, and the feebleness of the kings ceeded one another in the government of Cilicia. The Cilicians were encouraged to ing by the great demand for slaves among ns after the destruction of Carthage and and they found a ready sale at Delos for ves that they took there. Pirates, pretend- ing to be slave-dealers, soon started up, and did great mischief in these seas. The Romans were too remote to care about what was going on along the coast of Asia, though they knew that these disorders were owing to the weak government of the descendants of Seleucus Nicator. But it was at last necessary for the Romans to make war on the pirates, for their own safety, for even the shores of Italy and the neighbourhood of Rome were not safe against these marauders. (Cic. *pro Leg. Manil.* c. 11, &c.; Plut. *Pomp.* c. 24, &c.) During the war with Mithridates the pirates sided with the king, and when the Romans took them in hand they had to deal with a most formidable enemy. In B. C. 103, M. Antonius had Cilicia as his "provincia," that is, according to the proper sense of that word, for the sphere of his command as propraetor. This was the beginning of the war against the pirates. Also in B. C. 92, L. Sulla had Cilicia for his "provincia;" but it is not correct to infer that Cilicia was then organised as a Province. In B. C. 80 and 79, Cn. Dolabella had Cilicia as his "provincia." (Cic. *Verr.* act. i. 17.) It does not appear that he had under him any part of Cilicia, properly so called; and it has been observed, that all the crimes of Verres and Dolabella, which Cicero mentions, were committed in Lycia, Pamphylia, Pisidia, and Phrygia. But, as he had a province in Asia Minor, and it was called Cilicia, he might, we must suppose, have gone into Cilicia, if he would or could. In B. C. 78—75, P. Servilius Isauricus was sent against the pirates in these seas. He took several places in Lycia and Pamphylia, and Corycus in Cilicia (Eutrop. vi. 3); but he did not enter the Level Cilicia, which was held by Tigranes till B. C. 69, and perhaps even to B. C. 66. Yet, some writers state that Isauricus conquered Cilicia. (Vell. Pat. ii. 19.) Cn. Pompeius, who was appointed (B. C. 67) to command in the war against the pirates, brought Cilicia Trachea under Roman dominion; and, after the surrender of Tigranes, he took from him the Level Cilicia, with other of his acquisitions. The province called Cilicia was now fully organised, and it comprised six parts: Cilicia Campestris, Cilicia Aspera, Pamphylia, Pisidia, Isauria, and Lycaonia; with the greatest part of Phrygia, comprehending the Conventus of Laodicea, Apamea, and Synnada. In B. C. 58 the island of Cyprus was added, which the Romans had taken from the king of Egypt. This was the extent of the Roman province of Cilicia when Cicero was proconsul of Cilicia, B. C. 51—50. It was divided, after Roman fashion, into eight Conventus or Fora: the Conventus of Tarsus, which city was the residence of the governor; the Forum of Iconium for Lycaonia; the Forum Isauricum, conjectured to have been at Philomelium; the Forum Pamphylium, the place of which is unknown; the Forum Cibyraticum [CIBYRA], at Laodicea, on the Lycus; the Forum of Apamea; the Forum of Synnada; and Cyprus.

A change was made shortly after this time and probably by the Dictator Caesar B. C. 47. (*Bell. Alex.* 66). The Forum or Conventus of Cibyra was attached to the province of Asia, together with the greater part of Pisidia, and also Pamphylia, and as it seems, the Conventus of Apamea and Synnada. M. Antonius (B. C. 36) gave Cyprus and Cilicia Aspera to Cleopatra, and eastern Phrygia with Lycaonia, Isauria, and Pisidia, to Amyntas king of Galatia. Augustus reduced the province of Cilicia still further. Cyprus was made a separate province; and Pamphylia with Isauria and Pisidia, after the

Digitized by Google

death of Amyntas, was also made a separate province. Lycaonia was attached to the province of Galatia, which was established after Amyntas' death; and thus Cilicia was reduced to the original parts Campestris and Aspera. According to Roman fashion however (Strab. p. 671) the mountainous parts, which were not easy for a governor to manage, were left to the native princes. There were three of these native dynasties. One was that of Olbe, in the mountains between Soli and Cyinda; perhaps the Olbasa of Ptolemy. This was a priestly dynasty, which traced its descent from Ajax, a son of Teucer; and hence the rulers were generally called Ajax and Teucer. In B. C. 41, through the favour of M. Antonius, Polemo had the supreme power, who called himself on his coins M. Antonius Polemo, and had the title of chief priest of the Cennati, dynast of the sacred city of the Olbeis and Lalasseis. The name Cennati appears on coins of Diocaesarea, which is called the Metropolis of the Cennati. The Lalasseis are mentioned by Pliny and Ptolemy. As late as the reign of the emperor Claudius, there is mentioned a Polemo, king of Cilicia. Cilicia Aspera, which M. Antonius had given to Cleopatra, and which Archelaus afterwards held (Strab. p. 671), was given by Augustus after the death of Amyntas (B. C. 25) to Archelaus of Cappadocia. He had all the Aspera, except Seleuceia, and he resided in the island Elaeussa, near the mouth of the Lamus, which was called Sebaste in honour of Augustus. And here he had a palace. There is no island here now; "but there is a little peninsula opposite the town, covered with ruins, and connected with the beach by a low isthmus of drift sand; from whence it may be concluded that this peninsula was once the island Elaeussa, and that the isthmus has been of recent formation." (Beaufort, *Karamania*, p. 252.) It seems not unlikely that the family of Archelaus remained in possession of Cilicia Aspera, even after the death of Archelaus, A. D. 17, when Cappadocia was made a Roman province. Vespasian finally attached Cilicia Aspera to the province.

In the Amanus there was a King Tarcondimotus, who has been already mentioned. He assisted Pompeius in the battle at Pharsalus, but he was pardoned by Caesar. The king lost his life at the battle of Actium (Dion Cass. l. 14). Plutarch (*Ant.* 61) calls him Tarcondemus, King of Upper Cilicia. His eldest son Philopator, which is a pure Greek name, was deprived of his father's kingdom; and the younger, Tarcondimotus II., did not obtain possession of it until B. C. 20. His successor Philopator II. died A. D. 17.

Under Augustus, Cilicia was an imperial province, administered by a Legatus Aug., with the title of Propractor. In Caracalla's time the governor was named Consularis. In the period after Constantine, Cilicia was divided into three parts: Cilicia Prima, the chief town Tarsus, under a Consularis; Cilicia Secunda, chief town Anazarbus, under a Praeses; and Isauria, originally Cilicia Aspera, chief town Seleuceia, under a Praeses.

Six free cities under Roman dominion are mentioned in Cilicia: Tarsus, which was both Libera et Immunis; Anazarbus, called also Caesarea, which had the title of Metropolis, from the time of Caracalla; Corycus; Mopsus or Mopsuestia; Seleuceia, on the Calycadnus, which was taken from under the administration of Archelaus by Augustus, and declared free; and Aegae. Selinus, afterwards Trajanopolis, was probably a Roman colony. (Becker, *Handbuch der Röm. Alter.*, continued by Marquardt.) [G. L.]

CILI'CIAE PYLAE. [CILICIA.]

CILLA (Κίλλα; *Eth.* Κιλλαῖος), a town of Mysia, mentioned in the Iliad (i. 36), with Chryse and Tenedus. Herodotus (i. 149) enumerates Cilla among the eleven old Aeolian cities of Asia. Strabo (p. 612) places Cilla in the Adramyttene: he says, "near to Thebe is now a place named Cilla, where the temple of Apollo Cillaeus is; there flows by it the river Cillos which comes from Ida; both Chrysa [CHRYSA] and Cilla are near Antandrus; also the hill Cillaeum in Lesbos derived its name from this Cilla; and there is a mountain Cillaeum between Gargara and Antandrus; Daes of Colonae says that the temple of Apollo Cillaeus was first built at Colonae by the Aeolians, who came from Helas: and they say that a temple of Apollo Cillaeus was also built at Chrysa, but it is uncertain whether this Apollo was the same as Smintheus, or another." This river Cillos is said to be called *Zellele* or *Lubi*, according to some authorities. [G. L.]

CILLA'NIUS CAMPUS (τὸ Κιλλάνιον), is mentioned by Strabo (p. 629) between the plain of Peltae, which is in Phrygia, and the plain of Tabae. It is difficult to say where he places it. Cramer (*Asia Minor*, vol. ii. p. 30) conjectures that it may be "Cyllanticus tractus" of Pliny (v. 42). in which passage the MSS. have "Cyllanicus" (Harduin's note), and it is not said why "Cyllanticus" has been placed in the text. The text of Pliny is hardly intelligible. [G. L.]

CILURNUM. [CELURNUM.]

CIMBRI (Κίμβροι), a tribe which in conjunction with the Teutones and others invaded the south of Europe, and successively defeated six Roman armies, until in the end they were conquered by C. Marius, B. C. 101, in the Campi Raudii near Vercellae. Previous to their joining the Teutones, they had traversed and devastated Gaul and Spain, and in the battle against Marius they are said to have lost 100,000 or even 140,000 men. Who these Cimbri were, what country they inhabited, and what was the cause of their wandering southward, are points which are not clearly defined in our ancient authorities, and modern investigations seem to have made the matter almost more obscure. All our authorities state that the original country of the Cimbri was the Chersonesus Cimbrica, the modern peninsula of *Jutland*, and it is a well known fact that Cimbri continued to dwell there as late as the time of the Roman emperors. (Tac. *Germ.* 37; Plin. iv. 27; Ptol. ii. 11. § 12; Mela, iii. 3.) This fact is further established by the very name of the peninsula, which Pliny calls Promontorium Cimbricum. Posidonius (*ap. Strab.* vii. p. 293) does not say what country they inhabited, and only describes them as roving pirates; and Strabo (vii. pp. 291, 294), mentioning them by the side of the Bructeri and Chauci, states that they occupied the country west of the Elbe. This statement, however, cannot invalidate the testimony of Tacitus, Pliny, and Strabo that their original home was in *Jutland*. In the reign of Augustus, moreover, the Cimbri sent an embassy to that emperor from the Cimbrian Chersonesus, to offer him presents and to sue for pardon for what they had done to the Romans a century before. (Strab. vii. p. 293; Monum. Ancyr. in Wolf's edit. of Sueton. vol. ii. p. 375.) Lastly, it is attested by all the ancients that Cimbri came from the north, and not, as some moderns assert, from the

CHERSONESUS. [CHERSONESUS

I PROMONTORIUM. [CIMBRI.]

(Κιμιατηνή), a division of Paph- took its name from a hill fort, foot of the range of Olgassys. d Ctistes, made this his stronghold, aster of the Pontus. (Strab. p. 562.) r form of the name, see Groskurd's *abo*, vol. ii. p. 502.) The name of incorrectly written Κινιστηνή in f Strabo. [G. L.]

mountain and lake of Southern Volsinii and Falerii. The former, te *Cimino*, is a conspicuous object he whole surrounding country, and ating point of a tract or range of which extend from the neighbour- er in a SW. direction towards the sea at *Civita Vecchia*: and separates the great plain or basin of the Roman *Campagna* from the plains of Central Etruria. The whole of this tract appears to have been covered in ancient times, as a part of it still is, with a dense forest known as the SILVA CIMINIA (Ciminius Saltus, Flor.), which, according to Livy, was regarded by the Romans in early ages with no less awe than the Hercynian forest was in the days of the historian: so that when in B. C. 310, the consul, Q. Fabius Maximus, for the first time approached it with a Roman army, the senate in alarm sent him peremptory orders not to attempt its passage. This, however, he had already effected with safety before he received the prohibition. (Liv. ix. 36—39; Florus, i. 17; Frontin. *Strat.* i. 2. § 2.) The expressions of Livy are, however, certainly exaggerated: though the forest may have presented a formidable obstacle to an invading army, it is impossible that it should not have been traversed by traders and other peaceful travellers, as well as by the armies of the Etruscans themselves, on their advance to Sutrium, in the previous campaigns. The highest point of the range exceeds 3000 feet in height, but it is far from presenting a regular and continuous ridge, the several masses or clusters of hills, of which it is composed, being separated by passes of very moderate elevation. It is across one of these, about 2 miles to the W. of the Ciminian Lake, that the ancient Via Cassia was carried from Sutrium to Forum Cassii: the modern high road from Rome to Florence abruptly ascends the heights above *Ronciglione*, and skirts the basin of the lake on its E. side. The Via Cimnia, of which we find mention in an inscription of the time of Hadrian (Orell. 3306), probably followed much the same direction.

The lake (Ciminius Lacus, Vib. Seq. p. 23; Cimini Lacus. Virg. *Aen.* vii. 697; Sil. Ital. viii. 493; Κιμινία λίμνη, Strab.) is situated in the heart of the mountain, to which the name of Mons Ciminus more properly belongs: the deep basin-shaped depression in which it is formed, is evidently the crater of an extinct volcano. A legend recorded by Servius (*ad Aen. l. c.*) attributed its formation to Hercules, while another, similar to those connected with the Lacus Albanus and Fucinus, represented it as covering the site of a town named Saccumum or Succinium, which was said to have been swallowed up by an earthquake. (Amm. Marc. xvii. 7. § 13; Sotion, *de Mir. Font.* 41.) Strabo and Columella tell us that it abounded in fish and wild fowl. (Strab. v. p. 226; Colum. viii. 16. § 2.) It is about 3 miles in circumference, and is now called the *Lago di Vico*, from a village of that name on its E. bank. [E. H. B.]

CIMMERICUM (Κιμμερικόν, Scymn. *Frag.* xci; Anon. *Peripl.* 5), a town of the Cimmerian Bosporus situated near the mountain of the same name (Κιμμέριον, Strab. vii. p. 309: *Aghirmisch Daghi*, or *Opouk*) rising in the E. portion of the S. coast of the peninsula of *Kertsch*. (Köler, *Mém. de l'Acad. de St. Petersburg*, vol. ix. p. 649.) [E. B. J.]

CIMMERII (Κιμμέριοι), a people who belong partly to legend and partly to history. The story of the Odyssey (xi. 14) describes them as dwelling beyond the ocean-stream, plunged in darkness and unblest by the rays of Helios. According to Herodotus, they were originally in occupation of the territory between the Borysthenes and the Tanais, and being expelled from their country by the Scythians, skirted the shores of the Euxine, and having passed through Colchis and over the river Halys, invaded Asia to the W. of that river. In this inroad they

Digitized by Google

took Sardis, all but the citadel, during the reign of Ardys. His grandson Alyattes was powerful enough finally to deliver Asia from their presence. (Herod. i. 6, 15, 103, iv. 12.) It is said that they, along with the Treres and other Thracian tribes, who are so described as to make it doubtful whether they were distinct nations, or branches of the same race, had desolated Asia Minor before the time of Ardys, and even earlier than that of Homer. (Strab. i. pp. 6, 59, 61.) The fragments preserved of the most ancient elegiac poetry vividly express the feelings with which the Ionians, and Ephesus in particular, saw these barbarous tribes who had taken Sardis, encamped with their waggons on the banks of the Cayster, when the Ephesian poet Callinus earnestly implored Zeus to save his native land from this ferocious horde. (Callin. *Fragm.* 2, 3, ed. Bergk; Strab. xiii. p. 627, xiv. pp. 633—647; comp. Mure, *Hist. of the Language and Literature of Greece*, vol. iii. p. 132; Müller, *Hist. of the Literature of Greece*, c. x. § 4; Grote, *Greece*, vol. iii. pp. 313, 331, foll. Niebuhr (*Klein Schrift.* vol. i. p. 361) conjectured that the Cimmerians passed through Thrace, as they make their first appearance in Ionia and Lydia. The road by the Euxine, which the narrative in Herodotus presupposes, is almost entirely impassable for a Nomadic people, as the Caucasus extends to the very shores of the Euxine.

The pursuit of the Cimmerians by the Scythians is an imaginary addition. All that can be stated with any certainty of this race is that they seem to have been the chief occupants of the Tauric Chersonesus (*Crimea*). On this peninsula there was formerly a Cimmerian city, adjoining to which were fortifications, enclosing the isthmus by an earthen wall. (Strab. *l. c.*)

As vestiges of the Cimmerians still remaining in his time, Herodotus (iv. 12) mentions the tombs of the Cimmerian kings near the Tyras (*Dniester*) and several places in the Scythian country. The Cimmerian walls — the Cimmerian ferry (*πορθμήια*), and the territory itself was called Cimmerian.

The names of the kings of the Bosporus correspond with Thracian names; and this fact, in connection with the circumstance that there was a Thracian tribe termed Treres, connected with the Cimmerians, has been adduced to prove that the Cimmerians were Thracians, who are supposed to have been related to the Pelasgi and Greeks. (Adelung, *Mithrid.* vol. ii. p. 353.) If the Tauri could be identified with the Cimmerians, this argument would have great weight, but they may have been later inhabitants. On the other hand, if the Caucasus was within the district of the Cimmerians, it may be inferred that the aborigines of that mountain chain, whose descendants yet retain their language and barbarous habits, are the representatives of the ancient Cimmerians, who may then be set down as a people distinct from the Thracians, and from the German or other Indo-European inhabitants of the north.

Posidonius appears first to have conjectured that the Cimbri were the same people as the Cimmerii. His opinion, which was thought to be probable by Strabo (vii. p. 293), was adopted by the Romans (Plut. *Mar.* 11); and this fanciful identity has been laid down in several modern works. There can be little doubt but that this notion rested on no other foundation than the resemblance, perhaps accidental, of two general names, and the geographical error of the ancients, who believed the coast of the Cimbri to be continuous with that which the Cimmerians were supposed to inhabit. (Prichard, *Physical Hist. of Mankind*, vol. iii. p. 100.)

Like their successors, the Scythians, the Cimmerii were a nomade race, "milkers of mare's" (Callim. *Hymn. ad Dian.* 252), who moved about with their tents and herds over the grassy steppes of their territory. (Comp. Ukert, *Skythien*, p. 360; Niebuhr, *Lect. on Anc. Hist.* vol. i. p. 154; Baer, *de Cimmeriis, Acad. Petropol.* vol. ii. p. 419.) [E.B.J.]

CIMME'RIUM (Κιμμέριον, Ptol. iii. 6. § 4; Κιμερίς, Scymn. *Frag.* cxlviii; Κιμμερικόν, Strab. p. 494; Cimmerium, Pomp. Mela, i. 19. § 15), a town of the Cimmerian Bosporus which Pliny says was situated "ultimo in ostio," and was formerly called CERBERION (vi. 6). Clarke (*Trav.* vol. ii. p. 67) identifies it with *Temruk*; Forbiger (vol. iii. p. 1128) with *Eskikrimm*. [E. B. J.]

CIMO'LIS. [CINOLIS.]

CIMO'LUS (Κίμωλος), a small island in the Aegaean sea, one of the Cyclades, lying between Siphnos and Melos, and separated from the latter by a narrow strait only half a mile in breadth. The extreme length of the island is 5 miles, and its breadth 3½ miles. Pliny relates (iv. 12. s. 23) that Cimolus was also called Echinusa, a name which is not derived from Echidna, viper, as most modern writers have supposed, but from Echinus, the sea-urchin, of which there are several fossil specimens on the west coast, and which are not found in any other of the Cyclades or Sporades, except on the opposite coast of Melos. Cimolus is not mentioned in political history, and appears to have followed the fate of its neighbouring island of Melos; but it was celebrated in antiquity on account of its earth or chalk (ἡ Κιμωλία γῆ, Cimolia Creta), which was used by fullers in washing clothes. This chalk was also employed in medicine. (Strab. x. p. 484; Eustath. *ad Iv.* p. 530; Schol. *ad Aristoph. Ran.* 713; Plin. iv. 12. s. 23, xxxv. 17. s. 57; Cels. ii. 33.) This Cimolian earth is described by Tournefort as a white chalk very heavy, without any taste, and which melts away when it is put into water. The island is covered with this white chalk, whence Ovid (*Met.* vii. 463) speaks of "cretosa rura Cimoli." The figs of Cimolus were celebrated by the comic poet Alexis (Athen. i. p. 306); and though the soil is barren figs are still produced in the vallies. Another writer (quoted by Athenaeus, iii. p. 123, d) speaks of certain caves of the island, in which water being put became as cold as snow, though warm before.

Cimolus contained 1200 inhabitants when it was visited by Ross in 1843. The modern town is on the SE. of the island, about a quarter of an hour from the harbour, which is both small and insecure. In the middle of the west coast there is a *Paleokastron*, situated upon a steep rock about 1000 feet in height; but it appears only to have been built as a place of refuge to be used in times of danger. The ancient town was situated at *Daskalió*, also called *St. Andrew*, on the S. coast, opposite Melos. *Daskalió*, or *St. Andrew*, is the name given to a rock distant at present about 200 paces from the island to which, however, it was originally united. The whole rock is covered with the remains of buildings among which Ross noticed a draped female figure of white marble, of good workmanship, but without head and hands. As long as the rock was united to the island by an isthmus, there was a good and small harbour, on the eastern side of the rock. At this harbour was the burial-place of the town.

Severino*). ndes to its position on a lofty rendered it a place of great He evidently considered it as sted as a fortress in the Second e only mention of it in history is war between Caesar and Pompey. e been rebuilt, and, as it were, T. Labienus shortly before that ling which, it opened its gates to struggle. (Caes. *B. C.* i. 15; Cic. *ad Att.* vii. 11.) It is afterwards mentioned by Pliny and in the Liber Coloniarum as a municipal town of Picenum: Strabo erroneously assigns it to Umbria, from the frontiers of which it was not far distant. (Strab. v. p. 227; Plin. iii. 13. s. 18; Liber Colon. p. 254; Orell. *Inscr.* 86.) The modern town of *Cingoli* retains the same elevated site with the ancient one: and though but a small place, has preserved its episcopal see without interruption since the fifth century.

The coins published by some early numismatic writers with the name of Cingulum, and the head of Labienus, are a modern forgery. [E. H. B.]

CINIUM. [BALEARES.]

CINNERETH. [CHINNERETH.]

CINO'LIS (Κίνωλις) or CIMO'LIS (Κίμωλις), according to Strabo (p. 545), and other authorities, a place on the coast of Paphlagonia. "After Carambis," says Strabo, "come Cimolis and Anticimolis, and Aboni Teichos, a small town, and Armene." But the order of the places is not correct here; for Cinolis is east of Aboni Teichos. A place *Kinla* or *Kinoglu*, is placed in the maps about half way between Carambis (*Kerempe*) and Sinope, which is the *Kinuli* of Abulfeda, and probably the Cinolis or Cimolis of the Greek geographers. Marcian and Arrian place it east of Aboni Teichos, though they do not agree in the distance. Anticinolis was 60 stadia from Cinolis. Both of them were places where ships used to stay in their coasting voyages; and this is the reason that these and other like small spots are mentioned by the authors of Peripli. [G. L.]

CINYPS or CI'NYPHUS (Κίνυψ, Herod. iv. 175, 198; Κίνυφος, Strab. xvii. p. 835: *Cinifo* or *Wadi Quasam*), a small river of N. Africa, between the two Syrtes, rising, according to Herodotus, in the "Hill of the Graces" (Χαρίτων λόφος: probably the extremity of *M. Ghuriano*), but, according to Ptolemy, on M. Zuchabbari, much further inland, and falling into the sea E. of Leptis Magna. The fields through which it flowed were celebrated for goats with very beautiful hair. There was a town of the same name at its mouth. (Sil. Ital. iii. 60, iii. 275; Virg. *Georg.* iii. 312; Martial, vii. 94. 13, viii. 51. 11; Mela, i. 7; Plin. v. 4; Ptol. iv. 3. §§ 13, 20, 6. § 11; Scylax.) [P. S.]

CIRCEII (Κιρκαία, Dionys.: *Eth.* Κιρκαῖοι, Id., Κιρκαῖται, Pol., Circeienses), a town of Latium, situated at the foot of the Mons Circeius (*Monte Circello*), on its northern side, and at a short distance from the sea. No mention is found of a town of the name previous to the reign of Tarquinius Superbus, who established a colony there, at the same time with that of Signia. (Liv. i. 56; Dionys. iv. 63.) But it is probable, from analogy, though we have no express testimony on the subject, that there previously existed an ancient settlement on the spot, either of the Volscians, or more probably of the Tyrrhenian Pelasgians. The advantageous situation of the city for commerce, as well as its position as a bulwark against the Volscians, are mentioned by Dionysius as the motives that induced Tarquin to settle a colony there: and accordingly, we find Circeii mentioned among the maritime and commercial towns of Latium in the treaty concluded between the Romans and Carthaginians immediately after the expulsion of Tarquin. (Pol. iii. 22.) It is afterwards mentioned among the conquests ascribed to Coriolanus, who is said to have expelled the Roman colonists, and given it up to the Volscians

Digitized by Google

(Liv. ii. 39; Dionys. viii. 14): it probably really fell into the hands of the Volscians about this period, but was reconquered by the Romans, who sent a fresh colony there three years before the Gaulish War. (Diod. xiv. 102.) Not long after that event, however, the Circeians, as well as the citizens of Velitrae, also a Roman colony, revolted, and joined their arms with those of the Volscians. (Liv. vi. 12, 13, 21.) They must at this time have succeeded in establishing their independence, as at the outbreak of the great Latin War in B. C. 340, Circeii appears as one of the cities of the Latin League, and L. Numicius, a Circeian citizen, was one of the two praetors at the head of the whole nation. (Liv. viii. 3; Niebuhr, vol. iii. p. 92.) The fate of Circeii after the war is not mentioned, but it seems certain that it must have been recolonized, because we find it appear again in the Second Punic War among the thirty Latin colonies: it was one of the twelve which professed their inability to furnish their quota of supplies to the army. (Liv. xxvii. 9, xxix. 15.) It is again mentioned in B. C. 198, on occasion of the attempt of the Carthaginian hostages to excite a revolt of the slaves in this part of Italy (*Id.* xxxii. 26), but this is the last time its name is noticed in history. It appears to have declined, and sunk gradually into an insignificant place: Strabo terms it a small town (πολίχνιον), and the disadvantages of its position, cut off to a great extent from all communication with the interior, must have prevented it from rising to any consideration. It appears, however, to have been in some degree resorted to as an agreeable place of retirement by wealthy Romans under the later Republic and the Empire, and we learn that the emperors Tiberius and Domitian had villas there. (Cic. *ad Att.* xv. 10; Suet. *Tib.* 72; Mart. xi. 7. 4; Stat. *Silv.* i. 3. 85.) It possessed a peculiar source of attraction in the abundance and excellence of its oysters, which were among the most celebrated of any known to the Romans (Hor. *Sat.* ii. 4. 33; Juv. iv. 140; Plin. xxxii. 6. s. 21.) Its insulated position also caused it to be occasionally selected as a place of exile,—and the triumvir Lepidus was banished hither by Octavian after his deposition. (Suet. *Aug.* 16.) The town of Circeii is mentioned for the last time in the Tabula, which places it 19 M. P. from Astura along the coast, and 15 from Tarracina. (Tab. Peut.) The former distance falls short of the truth, while the latter considerably exceeds the direct distance. Considerable ruins of the ancient city of Circeii are still extant on a hill called the *Monte della Cittadella*, on the N. side of the mountain, and about two miles from the sea. The remains of the ancient walls and gateway are constructed of polygonal blocks, in a very massive style of architecture, closely resembling that of Signia, which is said to have been fortified and erected into a colony at the same period. Some remains of a later Roman style are also visible on the hill now occupied by the village of *S. Felice*, nearer the sea on the S. side, but the port of Circeii is considered to have been on the W., where there is still a place of anchorage called *Porto di Paola*. (Holsten. *Not. in Cluv.* p. 208; Abeken, *Mittel Italien*, pp. 141, 148, 160; Brocchi, *Viaggio al Capo Circeo*, p. 269, in the *Bibl. Ital.* vol. vii.) [E.H.B.]

CIRCEIUS, or CIRCAEUS MONS, or CIRCAEUM PROMONTORIUM (τὸ Κιρκαῖον ὄρος, Strab.; Κιρκαῖον ἄκρον, Ptol.: *Monte Circeo* or *Circello*), a remarkable mountain promontory of Latium on the coast of the Tyrrhenian Sea. It is formed by a bold and abrupt mountain mass, which rises precipitously from the sea, and is wholly isolated on the land side, being separated from the Volscian mountains by the broad level tract of the Pontine marshes; while on the NW. a long strip of unbroken sandy shore extends from thence for 30 miles to the promontory of Antium (*Porto d'Anzo*). Hence when viewed from any distance it appears altogether detached from the mainland, and has the appearance of a lofty island, rather than a promontory. (Strab. v. p. 232; Dionys. iv. 63; Procop. *B. G.* i. 11.) It was hence supposed by many ancient writers that it had originally been an island. But though the alluvial deposits by which alone it is connected with the continent are in a geological sense of very recent formation, it is certain that these cannot have been formed within the period of historical memory. Pliny has strangely misconceived a passage of Theophrastus to which he refers as asserting that the Circeian promontory was still an island in the time of that author: it is quite clear that Theophrastus describes it as a promontory, and only refers to the local tradition for the fact of its having once been an island. (Theophr. *H. Plant.* v. 8. § 3; Plin. iii. 5. s. 9.)

We have no explanation of the circumstances that led the Greeks in very early times to identify this remarkable insulated promontory with the island of Circe, mentioned in the Odyssey. The latter is called by Homer Aeaea (Αἰαίη), and he describes it as a low island in the midst of a boundless sea,

Νῆσον, τὴν περὶ πόντος ἀπείριτος ἐστεφάνωται.
Αὐτὴ δὲ χθαμαλὴ κεῖται. *Od.* xii. 135.

The fable of Circe appears indeed to have been connected with the coast of the Tyrrhenian Sea as early as the time of Hesiod, who describes Circe as the mother of Agrius and *Latinus*, "who ruled over the illustrious Tyrrhenians in the far recesses of the sacred islands" (*Theog.* 1011—1015). But this does not explain why a mountain should have been selected, which was not an island at all, in preference to any of the numerous small islands in the same sea. Other accounts connected the name of Circe with the voyage of the Argonauts, but Apollonius, who adopts this version, does not describe the abode of Circe as an island: but expressly terms it "a promontory of the Tyrrhenian mainland" (ἄκρῃ ἠπείρου Τυρσηνίδος, iii. 312) evidently referring to the Circeian Promontory. Virgil, as might be expected, has also followed the received tradition, and places the abode of Circe between Cumae and the mouth of the Tiber. (*Aen.* vii. 10—24.) It is possible that the legend of Circe was really of Italian origin, or that some local divinity (resembling the Angitia of the Marsi) was worshipped here, who was identified by the Cumaean Greeks with the Circe of their own mythology. The mountain was said to abound in herbs of a poisonous character (Pseud. Arist. *de Mirab.* 78; Theophr. *H. P.* v. 8. § 3; Strab. *l. c.*); but this statement, as Strabo justly suggests, may very probably have been invented to confirm its claim to be the dwelling of the enchantress. Circe was certainly worshipped there in later times (Ov. *de N. D.* iii. 19), but this of course proves nothing any more than the alleged tomb of Elpenor, one of the companions of Ulysses, or the cup of the hero himself, which was still shown by the inhabitants in the days of Strabo. (Strab. *l. c.*; Theophr. *l. c.*, Scylax. § 8.)

Theophrastus (*l. c.*) describes the Circaean moun-

a, i. e. simply *the City*, in Phoe- hich it obtained from being built by : *Eth.* Κιρρήσιοι, Cirtenses: *Con-* an inland city of the Massylii in P. from the sea, in a situation of y and fertility. It was built on a t surrounded by a tributary of the ow called the *Rummel.* It was the kings of the Massylii, whose palace been a splendid edifice. Micipsa especially enlarged and beautified it, and settled Greek colonists in it. Under him it could send forth an army of 10,000 cavalry and 20,000 infantry. It is frequently mentioned in the Punic, Jugurthine, and Civil Wars, as the strongest fortress in the country, a reputation which it has maintained in our own day, during the French conquest of *Algeria.* Under the Romans it was a colony with the surname *Julia*; and it was sometimes called *Colonia Sittianorum*, from the partisan chief Sittius, to whom it was granted by Julius Caesar. [Africa.] It was the central point for all the Roman roads throughout Numidia.

Having fallen into decay in process of time, Cirta was restored by Constantine, and called Constantina, the name which it still retains. Among the ruins of the ancient city, the finest remnant is a triumphal arch, which has been removed to Paris. (Strab. xvii. pp. 828, 832; Polyb. xxxvii. 3; Appian. *Pun.* 27, 106, *Numid.* Fr. iii., *B. C.* ii. 96, iv. 53, 55; Dion Cass. xliii. 3; Liv. xxx. 12; Sallust. *Jug.* 2, 21, &c.; Mela, i. 6. § 1; Plin. v. 3. s. 2; *Itin. Ant.* pp. 24, 28, 34, 35, 40, 41, 42; *Tab. Peut.*; Ptol. iv. 3. § 28, viii. 14. § 8; Shaw, *Travels*, p. 60, 2nd ed.; *Auslund*, 1837, No. 224.) [P. S.]

CISAMUS (Κίσαμος). 1. The port of Aptera in Crete. [Aptera.]

2. Another town of this name appears in the Peutinger Tables 32 M. P. to the W. of Cydonia (comp. Ptol. iii. 17. § 8; *Stadiasm.* § 322, 323, Hierocl.; Cisamum, Plin. iv. 12). In and about *Kisamo Kastéli* are 14 or 15 fragments of shafts of marble and granite columns, an Ionic capital, and remains of walls, indicating that there once existed upon this site a flourishing and important city. (Pashley, *Trav.* vol. ii. p. 43.) [E. B. J.]

CISON (Κίσων, LXX.: *Nahr el-Mukútta*), the "ancient river," which pouring its waters through the plain of Esdraelon in such abundance "swept away" the troops of Sisera during the battle of Deborah and Barak (*Judges* v. 21, comp. iv. 13; *Ps.* lxxxiii. 9.)

The earliest writers place its source in Mt. Tabor (*Onomast. s. v.*), and this statement is correct; but a considerable supply of water flows into its bed from the S. of the plain to the W. of Little Hermon and Mt. Gilboa, as well as from the S. chain which connects Carmel and the hills of Samaria. The Kishon is not now a permanent stream, but flows only during the season of rain, though at the mouth, where it discharges itself into the sea at the S. corner of the bay of Ptolemais by the foot of Mt. Carmel, it is never dry. At the battle of Tabor between the French and Arabs, many of the latter were drowned in the stream which Burkhardt (*Trav.* p. 339) calls the *Debúrieh*, and is formed from the Wadys, NW. of Tabor. (Robinson, *Palestine*, vol. iii. pp. 228, foll.; Ritter, *Erdkunde*, vol. xv. pp. 19, 247, 296; Von Raumer, *Palestina*, p. 52.) [E. B. J.]

CISSA (Κίσσα, Polyb. iii. 76; Coins; Scissis, Liv. xxi. 60; prob. *Guisona*), an inland city of Hispania Citerior, in the neighbourhood of which Cn. Scipio defeated and took the Carthaginian general Hanno and the Spanish chieftain Indibilis, in the first year of the Second Punic War, B.C. 218. Some identify it with the Cinna (Κίννα) mentioned by Ptolemy (ii. 6. § 72) as a city of the Jacoetani. (Marca, *Hisp.* p. 202; Flores, *Esp. S.* xxiv. 74; Sestini, pp. 132, 163; *Num. Goth.*; Ukert, vol. ii. pt. i. p. 425.) [P. S.]

COIN OF CISSA.

CISSA, a small town on the river Aegos in the Thracian Chersonesus. (Plin. iv. 18.) It is undoubtedly the same place as that called Cressa (Κρήσσα) by Scylax (p. 28). Mannert (vii. p. 191) believes that it was the same place as Aegos, and identifies it with the modern *Galata*. [L. S.]

CI'SSIA (Κισσία, Herod. iii. 91, v. 49; Ptol. vi. 3. § 3: *Eth.* Κίσσιοι), a district in Susiana, on both sides of the Choaspes and Eulaeus, in which was situated the town of Susa. The name is probably connected with that of the capital. Strabo (xv. p. 728) states that the people of Susa were also called Cissii, and connects the name with Cissia, the mother of Memnon (Aeschyl. *Pers.* 17, 118). This district was in ancient times exceedingly fertile, and formed the eighth satrapy of Dareius. It was probably of nearly the same extent as the modern province of *Khuzistán*. [V.]

CI'SSIDES (Κισσίδες) or CISSIDAE, a place on the coast of Lycia, 80 stadia east of the island Lagusa along the coast, according to the Stadiasmus, and 85 east of Telmessus. Leake (*Asia Minor*, p. 182) concludes that "Cissides was the name of the peninsular promontory, on the south side of which is the island and harbour of St. Nicholas." The ruins which he saw on the cape and island belonged to a late period of the Roman empire. Fellows (*Lycia*, p. 247) thinks that a place called by the Greeks *Larisse*, of which *Macri* is the port or scala, is the site of Cissides. [G. L.]

CISSUS (Κισσός: *Khortiátzi*), a mountain of Macedonia, on which were found the lion, ounce, lynx, panther, and bear. (Xenoph. *De Venat.* xi. 1.) There was a town of the same name not far from Rhaecelus, which appears to have been the name of the promontory where Aeneas founded his city. (Lycophr. 1236.) Cissus, along with Aeneia and Chalastra, contributed to people Thessalonica. (Strab. Epit. vii. p. 330; Dionys. i. 49.) *Khortiátzi* is the only high mountain which can be conceived to have been the haunt of the beasts of prey mentioned by Xenophon. (Leake, *Northern Greece*, vol. iii. p. 453.) [E. B. J.]

CISTHE'NE (Κισθήνη). 1. A town on the coast of Mysia, deserted in Strabo's time (p. 606). It lay outside of the bay of Adramyttium and the promontory Pyrrha. It had a port. Cisthene was north of Atarneus. It is mentioned by Mela (i. 18) and Pliny (v. 30).

The Gorgoneian plains of Cisthene (Aesch. *Prom. Vinct.* v. 795) are unknown.

2. [Megiste.] [G. L.]

CISTOBO'CI (Κιστοβῶκοι), a people of Dacia (in the N. of *Moldavia*), extending also into Sarmatia Europaea, and even into Sarmatia Asiatica. (Dion Cass. lxxi. 12; Ammian. xxii. 8; Ptol. iii. 8. § 5; Inscr. *ap.* Katancsich, vol. ii. p. 287.) [P. S.]

CITHAERON (Κιθαιρών), a range of mountains, separating Boeotia from Megaris and Attica, of which a description is given elsewhere. [Attica, p. 321, seq.] It is said to have derived its name from Cithaeron, a mythical king of Plataea, who assisted Zeus with his advice when Hera was angry with him. Hence the summit was sacred to the Cithaeronian Zeus, and here was celebrated the festival called Daedala. (Paus. ix. 2. § 4. 3. § 1, seq.; *Dict. of Ant.* art. *Daedala*.) Cithaeron was also sacred to Dionysus, and was the scene of several celebrated legends, such as the metamorphosis of Actaeon, the death of Pentheus, and the exposure of Oedipus. The forest, which covered Cithaeron, abounded in game; and at a very early period lions and wolves are said to have been found there. The Cithaeronian lion, slain by Alcathous, was celebrated in mythology. (Paus. i. 41. § 3.)

CITHARISTA, a place in the Maritime Alps between Telo Martius (*Toulon*) and *Marseille*. The name which corresponds is *Cereste*, but as this place is above a mile from the coast, the port is that of *Ciotat*. [G. L.]

CITHARISTES, a promontory in the south of Gallia, placed by Ptolemy (ii. 10) between Tauroentum (*Taurenti*) and Olbia (*Eoulx*); and the most southern point on this part of the coast. The promontory then is *Cap Cicier* near *Toulon*. Walckenaer makes it *Cap Cepet* at the entrance of the great road of Toulon. Mela (ii. 5) mentions Citharistes, and apparently intends to make it a town or port. It must therefore be Citharista. [G. L.]

CITHARIZON (Κιθαρίζων), a fortress of Armenia four days' journey from Theodosiopolis, and in the province Asthianene (Ἀσθιανήνη) (Procop. *Aed.* 3. 3), probably the same as the Austanitis (Αὐστανίτις) of Ptolemy (v. 13). The citadel, which was a place of great strength, was built by Justinian, and was the residence of one of the five prefects whom that emperor placed over Roman Armenia with the title of "Dux." It has been identified with *Pálú*, a town on the banks of the *Murád* (Eastern E. branch of the Euphrates, where there is an old castle placed upon a mountain, crowning the town. (Ritter, *Erdkunde*, vol. x p. 713, xi. pp. 76, 78; *Journ. Geog. Soc.* vol. x. p. 367.) [E. B. J.]

CITIUM (Κίτιον, Κήτιον, Κύτιον: *Eth.* Κιτιεῖς, Κιττιαῖοι, Κιτταῖοι, Citieus, Citiensis). 1. A town situated on the S. coast of Cyprus. In the Peutinger Tables it is called Cito, and is placed 24 M. P. to the E. of Amathus. Diodorus (xx. 49) is in error when he states its distance from Salamis as 200 stadia, for it is more remote. The ruins of ancient Citium are found between *Larnaka* and the port now called *Salines:* to the E. there was a large basin now almost filled up, and defended by a mole, the foundations of which remain; this is probably the κλειστὸς λιμήν of Strabo (xiv. p. 682). The walls were strong, and in the foundations Phoenician inscriptions upon them have been discovered. A number of ancient tombs are still to be seen in and about *Larnaka*, as well as the remains of an ancient theatre. (Mariti, *Viaggi*, vol. i. p. 51; Pococke, *Trav.* vol. ii. p. 213; Müller, *Archäol.* § 255.) The salt lakes of which Pliny (xxxi. 7. s. 39; Antig. Caryst. *Hist. Mirab.* c. 173) speaks are still worked. The date of this, probably the most ancient city in the island, is not known, but there can be no doubt that it was originally Phoenician, and connected with the Chittim of the Scriptures. (*Gen.* x. 4; comp. Joseph. *Antiq.* i. 6. § 1; Cic. *de Fin.* iv. 20; Diog. Laert. *Zen.* 6

J.]

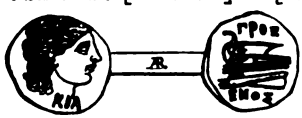
Κίτρον: *Kitro*), a place which the rabo (vii. p. 330) and a scholiast on *Olynth.* i. 1) assert to be the same as lna of Macedonia, but as their au- great weight, and as the facts of his- more southern position for Pydna, *Greece*, vol. iii. p. 429) fixes the site and Methone to the SW. of the latter ands at two miles from the sea, upon one time it appears to have been a nportance, and in its churches are to blocks of Hellenic times. Two in- ch have been found on sepulchral , are given in Leake (vol. iii. pl. [E. B. J.]

ios or Κῖος: *Eth.* Κιανός: *Kio* or n Bithynia, at the head of a gulf in called the gulf of Cius, or Cianus tus calls it Cius of Mysia; and also l. i. 4. § 7),—from which it appears en in Xenophon's time, extended at t as the head of the gulf of Cius. e tradition, Cius was a Milesian co- 32.) It was at the foot of Mount [ARGANTHONIUS], and there was a s, one of the companions of Hercules to Colchis, was carried off by the he went to get water here; and also her companion of Hercules, on his re- his, stayed here and founded the city, e his name. (Strab. p. 564.) Pliny r Hylas and a river Cius here, one of ns of the name of the youth who was mphs, and the other of the mythical Cius may be the channel by which a discharges its waters into the gulf h Pliny speaks of the "Ascanium wing into the gulf, and we must as- ives this name to the channel which e and the sea. [ASCANIA.] If the t identical with this channel, it must am near Cius. As Ptolemy (v. 1) utlets of the Ascanius, it has been conjectured that there may have been two, and that they may be the Hylas and Cius of Pliny; but the plural ἐκβολαί does not necessarily mean more than a single mouth; and Pliny certainly says that the Ascanius flows into the gulf. However, his geography is a constant cause of difficulty. The position of Cius made it the port for the inland parts. Mela calls it the most convenient emporium of Phrygia, which was at no great distance from it.

Cius was taken by the Persian general Hymees, after the burning of Sardis, B. C. 499. (Herod. v. 122.) Philip V., of Macedonia, the son of Demetrius and the father of Perseus, took Cius, which he gave to Prusias, the son of Zelas. Prusias, who had assisted Philip in ruining Cius, restored it under the name of Prusias (Προυσιάς, Strab. p. 563; Polyb. xvi. 21, &c.). It was sometimes called Prusias ἐπὶ θαλάσσῃ, or "on the sea," to distinguish it from other towns of the same name (Steph. B. *s. v.* Προῦσα; Memnon, *ap. Phot. Cod.* 224, c. 43), or πρὸς θαλάσσαν. In the text of Memnon (Hoeschel's ed. of Photius) the reading is Cierus; but Memnon, both in this and other passages, has confounded Cius and Cierus. But it is remarked that Cius must either have still existed by the side of the new city, or must have recovered its old name; for Pliny mentions Cius, and also Mela (i. 19), Zosimus (i. 35), and writers of a still later date.

There are coins of Cius, with the epigraph Κιανῶν, belonging to the Roman imperial period; and there are coins of Prusias with the epigraph, Προυσέων των προς θαλασσαν. [BRYLLIUM.] [G. L.]



COIN OF CIUS.

CI'ZARI (ἡ Κίζαρι), a place in Pontus, in the district Phazemonitis, on the lake Stiphane. It was a hill fort, deserted in Strabo's time, and there was a palace built near it. (Strab. p. 560.) [STIPHANE.] [G. L.]

CLA'DEUS or CLADAUS. [OLYMPIA.]

CLAMPETIA or LAMPETIA (Λαμπέτεια, Pol. *ap.* Steph. B.), a city of Bruttium, placed both by Pliny and Mela on the coast of the Tyrrhenian Sea, between Blanda and Temesa. The Tab. Peut. places it 40 M. P. south of Cerillae, and 10 N. of Temesa. Hence its position has been fixed, with some probability, on the site, or at least in the immediate neighbourhood, of the modern *Amantea*, one of the most considerable towns on this part of the coast. Clampetia is mentioned by Livy among the towns of Bruttium recovered by the Roman consul P. Sempronius during the Second Punic War (xxix. 38, xxx. 19); and it appears to have been one of the few which still continued to exist under the Roman empire, though Pliny calls it only "*locus* Clampetiae," so that it was no longer in his time a municipal town. (Mel. ii. 4. § 9; Plin. iii. 5. s. 10; Tab. Peut.) We learn from Stephanus of Byzantium that the Greek form of the name, as used by Polybius, was Lampetia; and there can be little doubt that the promontory called by Lycophron LAMPETES (Λαμπέτης), was connected with it, though he appears to describe it as the northern headland of the Hipponian gulf. There is in fact no promontory worthy of the name near *Amantea*, the coast being almost perfectly straight from the mouth of the river *Lao*

Digitized by Google

(Laus) to the headland called *Capo Suvero*, about 14 miles south of *Amantea*, which constitutes in fact the northern boundary of the gulf of Hipponium, and is probably the Lampetes of Lycophron. [E. H. B.]

CLANIS or GLANIS (Κλάνις, Strab.; Γλάνις, App.: *Chiana*), a river of Etruria, flowing through the territory of Clusium, and falling into the Tiber about 14 miles below Tuder. It is mentioned by several ancient writers as one of the principal tributaries of the Tiber (Strab. v. p. 235; Plin. iii. 5. s. 9; Tac. *Ann.* i. 79; Sil. Ital. viii. 455): but we learn from Tacitus that as early as A. D. 15, the project was formed of turning aside its waters into the Arnus. The Clanis is in fact the natural outlet that drains the remarkable valley now called the *Val di Chiana*, which extends for above 30 miles in length from N. to S., from the neighbourhood of *Arezzo* to beyond *Chiusi*, and is almost perfectly level, so that the waters which descend into it from the hills on both sides would flow indifferently in either direction. In ancient times they appear to have held their course entirely towards the S., so that Pliny considers the river as proceeding from Arretium, and calls it "Glanis Arretinus:" it formed, as it still does, a considerable lake near Clusium (Strab. v. p. 226), now called the *Lago di Chiusi*, and had from thence a course of about 30 miles to the Tiber. But repeated inundations having rendered the *Val di Chiana* marshy and unhealthy, its waters are now carried off by artificial channels; some, as before, into the lake of *Chiusi*, others to the N. towards the *Arno*, which they join a few miles from *Arezzo*. The two arms thus formed are called the *Chiana Toscana* and *Chiana Romana*. The latter falls into a stream called the *Paglia*, about 5 miles above its confluence with the Tiber. So slight is the difference of level, that it is even supposed that at one time a part of the waters of the Arnus itself quitted the main stream near Arretium, and flowed through the *Val di Chiana* to join the Tiber. [ARNUS.] It is, however, improbable that this was the case in historical times. (Fossombroni, *Mem. sopra la Val di Chiana*, 8vo. 1835; Rampoldi, *Corogr. dell' Italia*, vol. i. p. 656.)

Appian mentions that in B. C. 82, a battle was fought between Sulla and Carbo, on the banks of the Clanis, near Clusium, in which the former was victorious (*B. C.* i. 89). [E. H. B.]

CLA'NIUS (Γλάνις, Dionys.: *il Lagno*), a river of Campania, which rises in the Apennines near Abella, and traverses the whole plain of Campania, falling into the sea about 4 miles S. of the Vulturnus. In the early part of its course it flowed by the town of Acerrae, which frequently suffered severely from the ravages of its waters during floods (vacuis Clanius non aequus Acerris, Virg. *G.* ii. 225; Sil. Ital. viii. 537.). At other times their stagnation rendered the country unhealthy; hence in modern times the stream has been diverted into a canal or artificial course, called *il regio Lagno*, and sometimes by corruption *l'Agno*. This is divided into two streams near its mouth, the one of which flows direct into the sea, and is known as *Foce dei Lagni*, the other takes a more southerly direction, and joins, or rather forms, a marshy lake called the *Lago di Patria* (the ancient Literna Palus), the outlet of which into the sea, about 7 miles S. of the former branch, is now called the *Foce di Patria*. This is evidently the same which was known in ancient times as the river Liternus (Liv. xxxii. 29; Strab. v. p. 243), and appears to have been then the principal, if not the only outlet of the Clanius, as Strabo, who describes the coast of Campania minutely, does not notice the latter river. (Romanelli, vol. iii. p. 496; Rampoldi, *Corogr.* vol. i. p. 37, vol. ii. p. 363). Dionysius, who mentions the Clanius on occasion of the siege of Cumae in B.C. 524, writes the name Γλάνις, as does also Lycophron, who with his usual vagueness and inaccuracy, would seem to place the city of Neapolis at its mouth (*Alex.* 718). [E. H. B.]

CLANOVENTA, in Britain. The ninth Itinerary is *A Clanoventa Mediolano M. P. cl.* Another reading is *Clamoventa*. Of the nine stations here given, *Mancunium*, the seventh on the list, is the only one identified with sufficient safety to serve as a basis of criticism. Mancunium is *Man*-chester. The direction of the line is evidently from north to south. This places Clanoventum somewhere on the Scottish border, and it has been variously identified with *Lan-chester*, in Durham, and with *Cockermouth*, in Cumberland. [R. G. L.]

CLANUDDA. [BLAUNDUS.]

CLANUM, a place marked in the Antonine Itin. between Agedincum (*Sens*) and Augustobona (*Troyes*), but the site is not determined. [G. L.]

CLA'RIUS (Κλάριος), a small stream in Cyprus which ran near the town of Aepeia. (Plut. *Sol.* 26; Steph. B. *s. v.* Αἴπεια.) [E. B. J.]

CLARUS (Κλάρος: *Eth.* Κλάριος), a place in Ionia, near Colophon, where there was a temple of Apollo, and an oracle of high antiquity. (Paus. vii. 3. § 1.) Claros is mentioned in the so-called Homeric hymns (i. 40, viii. 5), and by the Latin poets. (Ovid. *Met.* i. 515; Virg. *Aen.* iii. 359.) There was an old story that Calchas, on his return from Troy, came to Clarus, and died of vexation on finding that Mopsus, the grandson of Tiresias, was a better seer than himself. (Strab. p. 642.) When Germanicus was on his way to the East, he consulted the Clarian oracle, which foretold his speedy death. The priest was selected from certain families, and generally brought from Miletus. It was only necessary to tell him the number and names of those who consulted the oracle, on which he went into a cave, drank of the water of the secret fountain, and then delivered in verse an answer to what each had in his thoughts: his answers, as usual with oracles, were ambiguous. (Tac. *Ann.* ii. 54; Plin. ii. 103.)

Chandler (*Asia Minor*, c. 31) supposes that he discovered the site of Clarus at a place called *Zillé*, where he found a spring of water, with marble steps that led down to it; and he considers that this is the sacred fountain. *Aiasaluck*, the site of Ephesus, may be seen from this spot, with the plain of Ephesus and the town of *Scala Nova*. He saw also a confused mass of ruins of a large temple, and remains of Christian churches. Pausanias, who wrote in the second century of the Christian aera, speaks of an unfinished temple of Apollo at Clarus. The French editors of Chandler suggest that the ruins at *Zillé* may be those of Notium. On the coins of Clarus from the time of Domitian to Gallienus, there is Apollo Clarius and Diana Claria. [G. L.]

CLASTI'DIUM (Κλαστίδιον: *Casteggio*), a town of Cisalpine Gaul, situated on the borders of Liguria, about 7 miles S. of the Padus. It was on the high road from Placentia to Dertona, about 18 miles from the latter city (Strab. v. p. 217). Its name is chiefly celebrated on account of the victory gained under its walls in B. C. 222 by Marcellus over the Insubrians and their allies the Gaesatae, in which Virdomarus, king of the latter tribe, was slain by the Roman

Digitized by Google

wn hand. (Pol. ii. 34; Plut. *Marc.* 2. § 5; Cic. *Tusc.* iv. 22.) On Gauls had laid siege to Clastidium, rs to have been already a place of ortance. At the commencement of War it was selected by the Romans hich they deposited large stores of mander of the garrison, a native of ayed it into the hands of Hannibal, lace of arms for his operations on l. iii. 69; Liv. xxi. 48.) Its name eatedly mentioned during the wars ith the Cispadane Gauls and their nd appears to have been one of the places in this part of Italy. (Liv. In one passage Livy terms it a ut it seems certain that it was sh one: Polybius tells us that it ory of the Andri (ii. 34), but this a corruption of Anamari or Ananes. e.) After the Roman conquest it len into insignificance, and though as still existing in his time, is not later writer, and is not found in the e can however be no doubt that the *Casteggio* or *Chiasteggio* retains the ll as name. [E. H. B.]

(Κλάτερνα: *Quaderna*), a town of situated on the Via Aemilia, be- d Forum Cornelii. The Itineraries from the former and 13 from the . Ant. p. 287; Itin. Hier. p. 616; s mentioned in history during the preceded the battle of Mutina B. C. sion it was occupied with a garrison this was afterwards expelled, and by Hirtius. (Cic. *Phil.* viii. 2, *ad* nder the Roman empire it appears nsiderable municipal town, and as century is still mentioned in the ry as a "civitas." (Strab. v. p. 216; ; Ptol. iii. 1. § 46; Itin. Hier. *l. c.*) ever speaks of it as much decayed *ist.* xxxix. 3). The period of its destruction is unknown, but it is town on the Aemilian Way which l its existence as such in modern (slightly altered into *Quaderna*) is by a small stream which crosses miles from *Bologna*, and an old w houses adjoining it, about a mile road, is still called *Sta Maria di* ncient town was however certainly gh road. [E. H. B.]

Λαύδη, *Act. Apost.* xxvii. 16; . 17. § 11), also called GAUDOS iv. 12. s. 20), now *Gozza*, a small . coast of Crete.

town in the northern part of ii. 27), and perhaps the same as αυδιούιον or Κλαυδόιον) men- (ii. 14. § 3). [L. S.]

LIS (Κλαυδιόπολις). 1. Ammia- ntions Seleucia and Claudiopolis as of the country drained by the Caly- ndiopolis was a colony of Claudius scribed by Theophanes as situated the two Tauri, a description which ds to the position of the basin of [CILICIA, p. 617.] Claudiopolis e represented by *Mout*, which is higher up the valley than Seleucia, and near the junction of the northern and western branches of the Calycadnus. It is also the place to which the pass over the northern Taurus leads from Laranda. (Leake, *Asia Minor*, pp. 117, 319.) Pliny (v. 24) mentions a Claudiopolis of Cappadocia, and Ptolemy (v. 7) has a Claudiopolis in Cataonia. Both these passages and those of Ammianus and Theophanes are cited by Forbiger to prove that there is a Claudiopolis in Cataonia, though it is manifest that the passage in Ammianus at least can only apply to a town in the valley of the Calycadnus in Cilicia Trachea. The two Tauri of Theophanes might mean the Taurus and Antitaurus. But Hierocles places Claudiopolis in Isauria, a description which cannot apply to the Claudiopolis of Pliny and Ptolemy.

2. A town of the Trocmi in Galatia; the site is unknown. (Ptol. v. 4.)

3. [BITHYNIUM.] [G. L.]

CLAU'DIUS MONS, a mountain range in Pannonia, the eastern slope of which was inhabited by the Taurisci, and the western slope by the Scordisci. (Plin. iii. 28.) This range is probably the same as the mountains near Warasdin on the river Drave. [L. S.]

CLAUDI'VIUM. [CLAUDIA.]

CLAUSENTUM, in Britain, the first station of the seventh Itinerary between Regnum and Londinium, distant from the former 20 miles. Ten miles beyond Clausentum lay *Venta* Belgarum = *Winchester*. This places Clausentum in the neighbourhood of *Southampton*, and it has been identified with that town and also with *Bishop's Waltham*. [R.G.L.]

CLAU'SULA. [BARBANA.]

CLAUTINATII (Κλαυτινάτιοι), a Vindelician tribe mentioned by Strabo (p. 206), and apparently the same as the *Catenates* in the inscription in Pliny (iii. 24). [L. S.]

CLAVENNA, a town of Rhaetia, but on the Italian side of the Alps, still called *Chiavenna*, was situated about 10 miles from the head of the Lacus Larius, at the foot of the pass which led from thence over the *Splügen*. The ancient name of this pass is not preserved to us, but we learn from the Itineraries that it was frequented in ancient times: as well as another, which separated from it at Clavenna, and led by a more circuitous route over the *Mt. Septimer* to Curia (*Coire*), where it rejoined the preceding road. (Itin. Ant. pp. 277, 278; Tab. Peut.; P. Diac. vi. 29.) It was by one or other of these passes that Stilicho crossed the Alps in mid-winter, an exploit celebrated by Claudian. (*de B. Get.* 320—358.) Clavenna probably derived some importance from its position at the junction of these two passes: as does the modern town of *Chiavenna*, which is the capital of the surrounding district. [E. H. B.]

CLAZO'MENAE (Κλαζομεναί: *Eth.* Κλαζομένιος: *Kelisman*), one of the cities of Ionia. Strabo (p. 644) fixes its position within certain limits accurately enough. Clazomenae occupied the northern side of an isthmus, of which the Teii had the southern part; and this isthmus is the neck of land that connects the peninsula on which Erythrae stands with the mainland. The Clazomenii had the Smyrnaei for their neighbours on the east, and the Erythraei on the west; and on the west side, at the point where the isthmus commenced, there was a rugged spot which was the boundary of the territories of Erythrae and Clazomenae. Between Erythrae, which was on the west coast of the peninsula, and this rugged boundary was the promontory of Mimas, a mountain

Digitized by Google

covered with forests. Close upon the boundary was a place called Chytrium, as it is in Strabo's text, which, he says, was the original site of Clazomenae; and next to it was the city of Clazomenae, as it existed in his time, with eight small islands in front of it, which were cultivated. Pliny (v. 31) names numerous islands in this part, and Thucydides (viii. 31) mentions three, which are in Pliny's list, Pele, Drymussa, and Marathussa. Chandler (*Asia Minor*, c. 24) could only count six, and all uncultivated. This name Chytrium is not mentioned by any writer except Strabo, but it is evidently the place which Stephanus (*s. v.* Χυτόν) calls Chytum; and Aristotle (Pol. v. 3) Chytrum.

Clazomenae was on the south side of the bay of Smyrna, as Strabo's description shows. The original settlement was on the mainland, but the people through fear of the Persians passed over to *the* island (Paus. vii. 3. § 8). Alexander, as Pausanias says, intended to make Clazomenae a peninsula by uniting it to the mainland by a causeway. It appears that this was done, for Chandler found near *Vourla*, on the south side of the bay of Smyrna, a causeway about a quarter of a mile in length, and about 30 ft. wide, which connected the mainland with a small island. He estimated the length of the island at a mile, and the breadth at a quarter of a mile. The town was small, and the port was to the NNW. Near the sea Chandler found traces of the walls, and on a hill the remains of a theatre. It appears from this that the site of Clazomenae must have been very contracted, and the city inconsiderable.

Clazomenae, it is said, did not exist before the Ionians settled in Asia. The greater part of the first settlers were not Ionians, but people from Cleonae and Phlius, who left these cities when the Dorians came into the Peloponnesus. These emigrants first occupied a place in the territory of Colophon, named Scyppium or Schyphia (Steph. *s. v.* Σκυφία), and finally they removed to the place called Clazomenae (Paus. vii. 3. § 8). This old town was on the mainland, and it successfully resisted the attacks of Alyattes king of Lydia (Herod. i. 16). The enterprise of the people is shown by an early attempt to colonise Abdera in Thrace, and by their trade with Egypt (Herod. i. 168, ii. 178). In the time of Croesus the Clazomenii had a treasury at Delphi (i. 51). Herodotus enumerates Clazomenae among the states of Ionia that were on the mainland, for the only insular states which he names are, Chios and Samos; and yet the city of Clazomenae was on the island in his time. But as the territory of the Clazomenii was on the mainland, and the city was merely their stronghold on a small island close to the main, it could not be properly called an insular state like Chios and Samos (Herod. i. 142). Otanes the Persian took Clazomenae soon after the commencement of the Ionian revolt (Herod. v. 123) and we must suppose that the city at that time was on the island.

Clazomenae became a dependency of Athens, but after the losses of the Athenians in Sicily, it revolted with Chios and Erythrae. The Clazomenii at the same time began to fortify Polichne on the main as a place of refuge, if it should be necessary. The Athenians took Polichne, and removed the people back to the island, except those who had been most active in the revolt; and they went off to a place called Daphnus (Thuc. viii. 14, 23). Clazomenae was now again in alliance with or dependence on Athens; but Astyochus the Lacedaemonian commander arriving soon after bade those who were of the Athenian party, remove from Clazomenae to Daphnus, which they refused to do, and Astyochus failed in the attack that he made on Clazomenae, though it was unwalled (Thuc. viii. 31). Some critics have argued that Polichne is not the name of a place, and that it is Daphnus: but this does not appear to be so. Xenophon (*Hell.* v. 1. § 28) speaks of Clazomenae as an island even after the close of the Peloponnesian War, and this is consistent with the story in Pausanias. The walls of the city may have been built after the construction of the causeway, for Thucydides speaks of Clazomenae as unwalled. Stephanus (*s. v.* Λάμψος), on the authority of Ephorus, names Lampsus as a part of the territory of Clazomenae. Strabo (p. 646) also speaks of a temple of Apollo, and warm springs between Clazomenae and the bay of Smyrna, and he appears to place them in the territory of Clazomenae. These are the springs (Λοϊτρα) mentioned by Pausanias (vii. 5. § 11); and those which Chandler visited on the road from Smyrna to *Vourla*, a place which is not far from the site of Clazomenae. He found the heat of the water "at the vein" to be 150 degrees (of Fahrenheit).

When the Romans settled the affairs of this part of Asia after their treaty with Antiochus (B. C. 188), they made the Clazomenii "immunes" or tax-free, and gave them the island Drymussa, one of the small islands near Clazomenae, not a very valuable present (Liv. xxxviii. 39; Polyb. xxii. 27). At the time when L. Sulla was in Asia, after bringing Mithridates to terms (B. C. 84), Clazomenae and other places on this coast were plundered by the pirates who infested the Aegean sea. (Appian, *Mithrid.* 63.) Clazomenae was included in the Roman province of Asia.

Clazomenae was the birthplace of Anaxagoras (ὁ φυσικός), who was one of the masters of Archelaus, and the dramatist Euripides. Hamilton (*Researches*, &c. vol. ii. p. 9) obtained a few coins of Clazomenae at *Ritri* (Erythrae), and accordingly not far from the site of the place to which they belonged. [G. L.]

COIN OF CLAZOMENAE.

CLEANDRIA. [RHODUS.]

CLEIDES (Κλεῖδες), a group of small islands which lay off the NE. extremity of Cyprus (Strab. xiv. p. 682.) They were four in number (Plin. v. 31; comp. *Anthol. Graec.* ed. Jacobs, vol. iii. p. 45). The name of these islands has been transferred to the Cape (Herod. v. 108), which Pliny (*l. c.*) calls Dinaretum, and Ptolemy (v. 14. § 3) Boosura (Palat. Κλεῖδες). Strabo does not name this headland, but observes that above it was a mountain named Olympus, with a temple consecrated to Aphrodite Acraea from which women were excluded (comp. Claud. *de Nupt. Honor. et Mar.* 49). It is now called *Sant Andrea*. There is an autonomous coin with the epigraph of Cleides (Eckhel, vol. iii. p. 88; Engel, *Kypros*, vol. i. p. 86; Pococke, *Trav.* vol. ii. p. 219.) [E. B. J.]

CLEITOR (Κλείτωρ; Clitorium, Plin. iv. 6. s. 10; *Eth.* Κλειτόριος), a town in Arcadia, the name

A little north of the junc- Cleitor with the Aroanius is the upon a gentle elevation, in the which Dodwell discovered the re- Doric temple.

to have been founded by a hero of he son of the Arcadian king Azan. 5, viii. 21. § 3.) The Cleitoria tant part of the Azanian district. ountain, of which we shall speak garded as one of the curiosities of Aroanian mountains, on the sum- daughters of Proetus wandered in re called the Azanian mountains. (Eudoxus, *ap. Steph. s. v.* Ἀζανία.) The Cleitorians were renowned among the Peloponnesians for their love of liberty (τὸ Κλειτορίων φιλελεύθερον καὶ γενναῖον), of which an instance is cited even from the mythical times, in the brave resistance they offered to Sous, king of Sparta. (Plut. *Lyc.* 2, *Apophth.* p. 234.) Their power was increased by the conquest of Lusi, Paus, and other towns in their neighbourhood. In commemoration of these conquests they dedicated at Olympia a brazen statue of Zeus, 18 feet in height, which was extant in the time of Pausanias, who has preserved the inscription upon it. (Paus. v. 23. § 7.) Cleitor seems to have occupied an important position among the Arcadian cities. In the Theban war it carried on hostilities against Orchomenus. (Xen. *Hell.* v. 4. § 36.) In the Social War it belonged to the Achaean League, and bravely repelled the assaults of the Aetolians, who attempted to scale the walls. (Polyb. iv. 18, 19, ix. 38.) It was sometimes used as the place of meeting of the Achaean League. (Polyb. xxiii. 5; Liv. xxxix. 5.) Strabo (viii. p. 388) mentions Cleitor among the Arcadian towns destroyed in his time, or of which scarcely any traces existed; but this is not correct, since it was not only in existence in the time of Pausanias, but it continued to coin money as late as the reign of Septimius Severus.

Pausanias gives only a brief description of Cleitor. He says that its three principal temples were those of Demeter, Asclepius, and Eileithyia; that at the distance of four stadia from the city the Cleitorians possessed a temple of the Dioscuri, whom they called the great gods; and that further on the summit of a mountain, at the distance of 30 stadia from the city, there was a temple of Athena Coria. (Paus. viii. 21. § 3.) The ruins of Cleitor are now called *Paleópoli*, distant about three miles from a village which still bears the name of the ancient town. It would seem, as Leake remarks, that the river, having preserved its name after the city had ceased to exist, at length gave that name to a village built at its sources. The walls of the ancient city may still be traced in nearly their full extent. They inclose an irregular oblong space, not more than a mile in circumference; they were about 15 feet in thickness, and were fortified with towers. But the space inclosed by these walls seems to have been properly the acropolis of the ancient city, since the whole plain between the river of *Klitora* and the river of *Karnési* is covered with stones and pottery, mixed with quadrangular blocks and remains of columns. There are remains of a theatre towards the western end of the hill.

In the territory of Cleitor was a celebrated fountain, of which those who drank lost for ever their taste for wine:

> "Clitorio quicunque sitim de fonte levarit,
> Vina fugit: gaudetque meris abstemius undis."

(Ov. *Met.* xv. 322; comp. Phylarch. ap. Athen. ii. p. 43; Vitruv. viii. 3; Plin. xxxi. 2. s. 13.) A spring of water, gushing forth from the hill on which the ruins stand, is usually supposed to be this miraculous fountain; but Curtius places it in the territory of Lusi, because it is said to have been situated upon the confines of the Cleitoria, and is mentioned in connection with the purification of the daughters of Proetus by Melampus, which is said to have taken place at Lusi. (Εἰτι καὶ πηγὴ παρὰ τοῖς Κλειτορίοις, Hesych.; situated ἀν' ἑσχατιὰς Κλείτορος, Vitruv. *l. c.*; ἐν Κλείτορι in Phylarch. ap. Athen. *l. c.*, is to be understood of the territory.) [Lusi.]

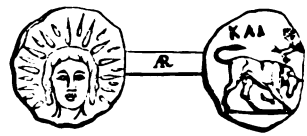
Digitized by Google

Another marvel in the territory of Cleitor was the singing fish of the river Aroanius. These fish, which were called ποικιλίαι, were said to sing like thrushes. Pausanias relates (viii. 21. § 2) that he had seen these fish caught; but that he had never heard them sing, although he had remained for that purpose on the banks of the river till sunset, when they were supposed to be most vocal. These singing fish are also mentioned by Athenaeus and Pliny. The former writer cites three authorities in proof of their existence, of whom Philostephanos placed them on the Ladon, Mnaseas in the Cleitor, and the Peripatetic Clearchus in the Pheneatic Aroanius. (Athen. viii. pp. 331, 332.) Pliny improperly identifies them with the exocoetus or adonis, which was a sea-fish. (Plin. ix. 19.) The ποικιλία was probably trout, and was so called from its spotted and many-coloured scales. The trout of the Aroanius are described by Dodwell as "of a fine bright colour, and beautifully variegated." (Dodwell, *Classical Tour*, vol. ii. p. 442; Leake, *Morea*, vol. ii. p. 257, seq.; Boblaye, *Recherches*, &c. p. 156; Curtius, *Peloponnesiaca*, p. 374, seq.)

CLEO'NAE (Κλεωναί: *Eth.* Κλεωναῖος). 1. A city in Peloponnesus, described by writers of the Roman period as a city of Argolis, but never included in the Argeia or territory of Argos, in the flourishing period of Greek history. Cleonae was situated on the road from Argos to Corinth, at the distance of 120 stadia from the former city, and 80 stadia from the latter. (Strab. viii. p. 377.) The narrow pass through the mountains, called Tretus, leading from Argos to Cleonae, is described elsewhere [p. 201, a.]. Cleonae stood in a small plain upon a river flowing into the Corinthian gulf a little westward of Lechaeum. This river is now called *Longo*: its ancient name appears to have been Langeia (Stat. *Theb.* iv. 51; Leake, *Peloponnesiaca*, p. 391). In its territory was Mt. Apesas, now called *Fuka*, connected with the Acro-Corinthus by a rugged range of hills. Both Strabo and Pausanias describe Cleonae as a small place; and the former writer, who saw it from the Acrocorinthus, says that it is situated upon a hill surrounded on all sides by buildings, and well walled, so as to deserve the epithet given to it by Homer (*Il.* ii. 570):—ἐὐκτιμένας Κλεωνάς. Statius also speaks of "ingenti turritae mole Cleonae." (*Theb.* iv. 47.) The existing ruins, though scanty, justify these descriptions. They are found at a hamlet still called *Klenes*, not far from the village *Kurtési*. According to Dodwell, they occupy "a circular and insulated hill, which seems to have been completely covered with buildings. On the side of the hill are six ancient terrace walls rising one above another, on which the houses and streets are situated."

Cleonae possessed only a small territory. It derived its chief importance from the Nemean games being celebrated in its territory, in the grove of Nemea, between Cleonae and Phlius. [NEMEA.] Hence the festival is called by Pindar ἀγὼν Κλεωναῖος (*Nem.* iv. 27). Hercules is said to have slain Eurytus and Cteatus, the sons of Actor, near Cleonae; and Diodorus mentions a temple of Hercules erected in the neighbourhood of the city in memory of that event. (Paus. v. 2. § 1, seq.; Pind. *Ol.* x. 36; Diod. iv. 33.)

Cleonae is said to have derived its name either from Cleones, the son of Pelops, or from Cleone, the daughter of the river-god Asopus. (Paus. ii. 15. § 1.) It was conquered by the Dorians, whereupon some of its inhabitants, together with those of the neighbouring town of Phlius, are said to have founded Clazomenae in Asia Minor. (Paus. vii. 3. § 9.) In the Dorian conquest, Cleonae formed part of the lot of Temenus, and in early times was one of the confederated allies or subordinates of Argos. (Grote, *History of Greece*, vol. ii. p. 417.) Indeed in the historical period, Cleonae was for the most part closely connected with Argos. After the Persian wars, the Cleonaeans assisted the Argives in subduing Mycenae (Strab. viii. p. 377); and they fought as the allies of Argos at the battle of Mantineia, B.C. 418. (Thuc. v. 67.) Of their subsequent history nothing is known, though their city is occasionally mentioned down to the time of Ptolemy. (Xen. *Hell.* vii. 2. § 15; Polyb. ii. 52; Liv. xxxiii. 14, xxxiv. 25; Ov. *Met.* vi. 417; Paus. ii. 15; Plin. iv. 6. s. 10; Ptol. iii. 16. § 20; Dodwell, *Classical Tour*, vol. ii. p. 286; Leake, *Morea*, vol. iii. p. 324, seq.; Boblaye, *Recherches*, &c., p. 41.)



COIN OF CLEONAE.

2. A town of Chalcidice, in Macedonia, situated on the peninsula of Mt. Athos, and probably on the western coast, south of Thyssus. (Herod. vii. 22; Thuc. iv. 109; Scylax, p. 26; Strab. vii. p. 331; Mela, ii. 2; Plin. iv. 10. s. 17; Leake, *Northern Greece*, vol. iii. p. 149, seq.)

3. A town of Phocis. [HYAMPOLIS.]

CLEPSYDRA FONS. [ATHENAE, p. 286.]

CLEVUM. [GLEVA.]

CLIMAX (Κλίμαξ, steps, or a ladder), a name equivalent to the French *Echelle* and Italian *Scala*. It was used by the Greeks to signify a narrow and difficult pass.

1. On the east coast of Lycia the range of Taurus comes close upon the sea, and in the part between Phaselis and Olbia the pass is between the mountains and the sea. (Strab. p. 666.) Strabo describes it accurately: "about Phaselis is the narrow pass on the coast through which Alexander led his army; a mountain called Climax hangs over the Pamphylian sea, leaving a narrow passage along the beach, which is bare when there is no wind, and passable for travellers; but when the sea is swollen, it is for the most part covered by the waves: the road over the mountain is circuitous and steep, and people use the sea-road in fine weather. Alexander happened to be here in the winter season, and, trusting to his fortune, he set out before the waters had abated, and accordingly it happened that the men had to march all day in the water, up to the middle." Arrian (*Anab.* i. 26) says that Alexander made the passage easily, in consequence of the north wind having blown back the water which the south wind had brought upon the coast. He does not give any name to the pass. Mount Climax is that part of the coast which forms the eastern limit of Lycia, and the west side of the bay of Adalia. Beaufort observes (*Karamania*, p. 116): "the road along the coast is, however, interrupted in some places by projecting cliffs, which would have been difficult to surmount, but round which the sea could readily pass by wading through the water."

Trachea, certainly not the last king of Cappadocia, for he was dead before the time to which Tacitus refers in the passage cited above. [CAPPADOCIA p. 507.] The Clitae refused to submit to the regulations of the Roman census, and to pay taxes, and retired to the heights of Taurus. There they successfully resisted the king, until M. Trebellius was sent by Vitellius, the governor of Syria, who blockaded them in their hill forts, Cadra and Davara, and compelled them to surrender. In the reign of Claudius the Clitae again fortified themselves on the mountains, under a leader Trosobores, whence they descended to the coast and the towns, plundering the cultivators, townspeople, shipmasters, and merchants. They besieged the town of Anemurium, a place probably near the promontory, from which and the other circumstances we collect that the Clitae were a nation in Cilicia Trachea. At last Antiochus, who was king of this coast, by pleasing the common sort and cajoling the leader, succeeded in putting Trosobores and a few of the chiefs to death, and pacified the rest by his mild measures. (Tac. *Ann.* xii. 55.) [G. L.]

CLITE'RNIA, or CLITERNUM. 1. (*Κλείτερνον*, Ptol.: *Eth.* Cliterninus), a city of the Aequiculi, and one of the only two assigned to that people both by Pliny and Ptolemy. It was included in the Fourth Region of Augustus, as well as Carseoli. The discovery of an inscription to a "Duumvir Cliternise" at a place called *Capradosso* about 9 miles from *Rieti* in the upper valley of the *Salto*, affords some reason for regarding this spot (where there exist vestiges of an ancient town) as the site of Cliternia, though, as the inscription is merely sepulchral, the evidence is far from conclusive. (Bunsen, *Antichi Stabilimenti Italici*, p. 113, in the *Annali dell' Inst. Arch.* vol. vi.; Abeken, *M. I.* p. 88.)

2. A town of Apulia situated in the northern part of the province between the Tifernus and the Frento. (Plin. iii. 11. s. 16; Mela, ii. 4. § 6.) Ancient writers afford no further clue to its position, but local antiquarians have indicated its site at a place called *Licchiano*, on the left of the torrent of *Saccione*, about 5 miles E. of *S. Martino*. The spot, which is now uninhabited, is said to be called in documents of the middle ages Cliternianum, and considerable vestiges of an ancient city are visible there. (Tria. *Storia di Larino*, pp. 17, 18, 356—8; Romanelli, vol. iii. p. 22.) [E. H. B.]

CLITOR. [CLEITOR.]

CLITUMNUS (*Clitumno*), a small river of Umbria, celebrated for the clearness of its waters, and the beauty of the cattle that pastured on its banks. Its source, of which a well-known and very accurate description has been left us by the younger Pliny (*Ep.* viii. 8), is situated about half way between *Spoleto* and *Foligno*, at a place called *Le Vene*, from the numerous sources or springs of water that gush forth from under the limestone rock. These speedily unite into one stream, of sufficient magnitude to be navigable for boats, the waters of which are deep and clear as crystal: it has a course of about 9 miles to *Mevania* (*Bevagna*), below which it assumes the name of *Timia*: and appears to have been in ancient times also known as the Timia or Tinia from thence to the Tiber. [TINIA.] In the upper part of its course it is still called the *Clitumno*. Pliny describes the source of the Clitumnus in a manner that sufficiently shows it was regarded, not only as an object of local veneration, but as a sight to be visited by

Digitized by Google

strangers; and accordingly we find the emperor Caligula undertaking a journey for this express purpose, and Honorius turning aside from his progress along the Flaminian Way for the same object. (Suet. *Cal.* 43; Claudian. *de VI. Cons. Hon.* 506.) The hill immediately above the principal source was clothed, in Pliny's time, with a grove of ancient cypresses: close above the water was a temple of Clitumnus himself, while numerous smaller shrines or chapels (*sacella*) of local divinities were scattered around. The peculiar sanctity with which the spot was regarded caused these to be preserved down to a late period; and it is mentioned in the Jerusalem Itinerary (p. 613) under the name of Sacraria, without any notice of the Clitumnus. One only of these numerous small temples still remains, converted into a Christian chapel, but otherwise unaltered; from its position near the principal source it probably occupies the site of the temple of Clitumnus himself, but is certainly not the same building described by Pliny, its architecture being of a debased character, and belonging to the period of the Lower Empire. (Forsyth's *Italy*, p. 324, 4th ed.; Eustace's *Class. Tour*, vol. i. p. 325.) Pliny tells us (*l. c.*) that the temple and grove of Clitumnus were bestowed by Augustus upon the people of Hispellum, who erected public baths and other buildings there. The nearest town to the spot was Trebia (*Trevi*), from which it was only 4 miles distant. (Itin. Hier. p. 613.) The valley through which the Clitumnus flows, from its sources to Mevania, is a broad strip of perfectly level plain, bounded by the lateral ranges of the Apennines on each side. It is a tract of great fertility, and its rich and luxuriant pasturages furnished in ancient times a particularly fine breed of pure white cattle, which on account of their size and beauty were set apart as victims to be sacrificed only on occasions of triumphs or other peculiar solemnities. Their colour was thought to result from their drinking and bathing in the extremely pure waters of the Clitumnus: but though the same tradition is preserved by the inhabitants of the valley, the cattle are no longer remarkable for their whiteness. (Virg. *Geor.* ii. 146; Propert. ii. 19. 25; Sil. Ital. viii. 452; Juv. xii. 13, and Schol. ad loc.; Stat. *Silv.* i. 4. 129; Vib. Seq. p. 9; Cluver. *Ital.* p. 702.) [E. H. B.]

CLODIA'NA, a town in Illyria, situated upon the Via Egnatia, at the point where this road divided, one branch leading to Dyrrhachium, and the other to Apollonia. It probably derived its name from App. Claudius, who encamped upon the river Genusus in B. C. 168. (*Itin. Ant.*; *Tab. Peut.*; Liv. xliv. 30; Leake, *Northern Greece*, vol. iii. p. 279, seq.)

CLODIA'NUS (Κλωδιανός: *Llobregat Meñor* or *Muga*), a river of Hispania Tarraconensis, at the E. end of the Pyrenees, forming at its mouth the harbour of EMPORIAE. (Mela, ii. 6; Ptol. ii. 6. § 20; Strab. iii. p. 160, where it is referred to, but not named.) [P. S.]

CLOTA, in Britain, mentioned by both Tacitus (*Agric.* 23) and Ptolemy. Name for name, and place for place, it is the river *Clyde*. [R. G. L.]

CLUANA, a town of Picenum, mentioned by Mela and Pliny, both of whom place it on the coast between Cupra and Potentia. (Mela, ii. 4. § 6.; Plin. iii. 13. s. 18.) Its site has been fixed by a local topographer, on that of a small town, now called *S. Elpidio a Mare*, about 4 miles from the sea, and the same distance N. of *Fermo*. (Bacci, *Notizie dell' antica Cluana*, 4to. Macerata, 1716; Abeken, *Mittel Italien*, p. 120.) [E. H. B.]

CLUDRUS. [EUMENIA.]

CLU'NIA (Κλουνία κολωνία, Ptol. ii. 6. § 56), a city of the Arevacae in Hispania Tarraconensis, the last considerable place in Celtiberia, on the W. (*Celtiberiae finis*, Plin. iii. 3. s. 4.) It was a colony, and the seat of a *conventus juridicus*, comprising 14 peoples of the Varduli, 4 of the Turmodigi, 5 of the Carietes and Vennenses, 4 of the Pelendones, 10 of the Vaccaei, 7 of the Cantabri, 10 of the Autrigones, 6 of the Arevacae, and 22 of the Astures (at least this appears to be the meaning of Pliny's enumeration). The ruins of the city are visible on the summit of an isolated hill, surrounded with walls which form a natural wall, between *Cornia del Conde* and *Pennalda de Castro* (Dion Cass. xxxix. 54; Plut. *Galba*, 6; Florez, *Esp. S.* vol. viii. p. 26, v. p. 51: coins, Florez, *Med.* vol. i. p. 364, vol. ii. p. 641; Mionnet, vol. i. p. 39, Suppl. vol. i. p. 79; Eckhel, vol. i. p. 46.) [P. S.]

CLU'SIUM (Κλούσιον: *Eth.* Clusinus: *Chiusi*), an inland city of Etruria, one of the most ancient and powerful in that country, and without doubt one of the twelve which formed the Etruscan confederation. [On this point, see ETRURIA.] It was situated about 20 miles S. of Cortona, on a gentle hill rising above the valley of the Clanis, near a small lake, to which it gave name (ἡ περὶ Κλούσιον λίμνη, Strab. v. p. 226): this is still called the *Lago di Chiusi*. Strabo says it was distant 800 stadia (100 Roman miles) from Rome; this agrees very nearly with the Antonine Itinerary, which gives the distance by the Via Cassia at 102 miles, and must be very near the truth. (Strab. *l. c.*; *Itin. Ant.* p. 285.) All accounts agree in representing Clusium as a very ancient city, and in accordance with this belief Virgil places it among the cities of Etruria that assisted Aeneas against Turnus (*Aen.* x. 167). We are told that its original name was Camars, whence it has been inferred that it was originally an Umbrian city (a fact in itself highly probable), and that it obtained the name of Clusium when it fell into the hands of the Etruscans. (Cluver. *Ital.* p. 567; Müller, *Etrusker*, vol. i. p. 102.) Servius (*ad Aen.* x. 167) derives its name from Clusius, a son of Tyrrhenus, which may be thought to favour this view; but no dependence can be placed on such statements. When Clusium first appears in history it was one of the most important and powerful of the Etruscan states; but there is no authority for supposing it, as some authors have done, to have been the metropolis of Etruria, or to have exercised any more than a temporary and occasional superiority over the other cities of the League. The prominence that it assumed under the rule of Porsena was evidently owing in great part to the personal abilities and reputation of that monarch (Liv. ii. 9), and neither Livy nor Dionysius represent him as commanding any other forces than those of his own state, though later rhetorical writers call him "rex Etruscorum." (Liv. *l. c.*; Dionys. v. 21; Flor. i. 10; Plut. *Popl.* 16.) At an earlier period also Dionysius speaks of the Clusians as uniting with four other Etruscan cities (Arretium, Volaterrae, Rusellae, and Vetulonia) in a league against Tarquin the Elder, where all five appear on a footing of perfect equality. (Dionys. iii. 51.) It is impossible to say how much of the legendary history of the siege of Rome by Porsena can be received as historical, but there seems no reason to doubt the fact of his expedition, and much ground for supposing that it really ended in the capture of Rome. (Niebuhr, vol. i. pp. 546—548.) He subsequently sent

During the Second Punic War, re active in supplying corn and tim- of Scipio (Liv. xxviii. 45); and in f Sulla and Marius they appear, in any other cities of Etruria, to have se of the Marian party. Two suc- were fought in the immediate neigh- sium, in both of which the partisans ctorious. (Vell. Pat. ii. 28; Appian. iv. *Epit.* lxxxviii.) Very little is m under the Roman empire, but in- its continued existence as a muni- d Pliny distinguishes the "Clusini sini veteres," whence it would appear ium, it must have received a fresh s who enjoyed separate rights; but circumstances of this are wholly un- ame of Clusium is still found in the well as in Ptolemy: it early became shop, a distinction which it has re- interruption to the present day; and in that it never ceased to be inha- speaks of it as in his time going fast has considerably revived, and is now hough small city, with about 3000 Plin. iii. 5. s. 8; Ptol. iii. 1. § 49; 5; *Tab. Peut.*; Gori, *Inscr. Etr.* vol. 4; Dennis's *Etruria*, vol. ii. p. 331.) s but very few vestiges of her early e form of ruins or remains of edifices; n of her walls are still visible, which f construction resemble those of Pe- r; and a few fragments of architec- s are scattered through the buildings town. But the numerous sepulchres en excavated in the neighbourhood rich harvest of Etruscan relics,— , pottery, bronzes, and other objects. are interesting as exhibiting appa- st specimens of Etruscan art, unal- influences; much of the pottery in f a very peculiar style, "a coarse, d ware, of uncouth forms, grotesque ude workmanship, and no artistic beauty." The figures with which it is adorned are in relief, and represent for the most part monsters and uncouth figures of a very Oriental character. The painted vases, on the other hand, which have also been found here in considerable numbers, though much less than at Tarquinii and Vulci, uniformly represent subjects from the Greek mythology, and bear the obvious impress of Greek art. The urns in stone and *terra-cotta* resemble those found at *Volterra*, and belong for the most part to a late period. Several of the sepulchral chambers also have their walls painted in a style very similar to those of Tarquinii. (For a full description of these works of art, see Dennis's *Etruria*, vol. ii. pp. 325—384.)

About 3 miles NNE. of *Chiusi* is a hill of conical form, called the *Poggio Gajella*, which has been proved, by recent excavations, to have been converted in ancient times into a vast sepulchral monument, containing numerous tombs, and a number of labyrinthine passages, penetrating in all directions into the heart of the hill. This has been supposed by some writers to be no other than the celebrated tomb of Porsena, of which a marvellous account has been preserved to us by Pliny from Varro; but the only resemblance is the fact that in that case also there was a labyrinth in the basement of the tomb. The description of the superstructure or external monument (which was probably taken by Varro from some Etruscan author) can hardly be received as other than fabulous, and is justly treated as such by Pliny himself, though some modern writers have believed it literally, and attempted a restoration of the monument in accordance with it. (Plin. xxxvi. 13. s. 19; Müller, *Etrusker*, vol. ii. p. 224; Abeken, *Mittel-Italien*, pp. 244, 245; Dennis, *l. c.*, pp. 385—400, where the opinions of numerous modern authors on this much controverted subject are cited and referred to.)

The territory of Clusium probably included several smaller and dependent towns. Etruscan remains have been found at the modern towns of *Cetona*, *Sarteano*, *Chianciano*, and *Montepulciano*, all of them situated within a few miles of *Chiusi;* but we have no trace of the ancient names of any of these places. The district adjoining the city (probably the valley of the Clanis) was celebrated, in ancient as well as modern times, for its great fertility, and the excellence of its wheat and spelt. (Plin. xviii. 7. s. 12; Colum. ii. 6. § 3.) Horace also alludes to its possessing sulphureous springs, frequented for medicinal purposes (*Ep.* i. 15. 9). [E. H. B.]

CLU'SIUS (Κλούσιος), a river of Gallia Transpadana, now called the *Chiese*, which rises in the Rhaetian Alps, and forms a considerable lake now known as the *Lago d' Idro*, but not mentioned by any ancient writer; after emerging from which it has a winding course for some distance through the *Val Sabbia*, and from thence flows for near 30 miles due S. through the plains of Cisalpine Gaul, till it joins the Ollius (*Oglio*), about 20 miles above its confluence with the Padus. Polybius (ii. 32) speaks of it as forming the limit between the Insubrians and the Cenomani, but it is difficult to understand that this could ever have been the case; it certainly was not so in later times. The name is written in the Tab. Peut. "Clensis," which is a close approximation to its modern form of *Chiese*. [E. H. B.]

CLYDAE (Κλυδαί), a place in Caria in the Rhodian Peraea. (Ptol. v. 3.) The MSS. of Ptolemy and the older editions (Pirckheymer's, for instance) are said to have Chydae; but the name is Clydae

in the Stadiasmus, which places it 30 stadia east of the Promontory Pedalium, probably Cape *Bokomadhi*. [G. L.]

CLY'PEA. [Aspis.]

CLYSMA (Κλῦσμα), the name given by Eusebius to the Heroopolitan or western gulf of the Red Sea, through which the Israelites passed on dry land. (*Onomast. s. v.* Βεελσεφών.) Philostorgius (*H. E.* iii. 5) says that the gulf was so called from the place where it terminated; which would seem to indicate that the site of the modern *Suez* was anciently occupied by a town of this name. In corroboration of this, Epiphanius (*adv. Haer.* lib. ii. p. 618) mentions τὸ κάστρον τοῦ Κλύσματος as one of the three ports of the Red Sea,—the others being Aïla or Elath, and Berenice (anciently Ezion-geber), both situated on the Elanitic gulf. (Reland. *Palaest.* pp. 471, 472, 556.) [G. W.]

CNA'CALUS MONS. [Caphyae.]

CNACION. [Laconia.]

CNAUSUM. [Arcadia, p. 193, a.]

CNEMI'DES. [Cnemis.]

CNEMIS (Κνῆμις), a range of mountains forming the boundary between Phocis and the Epicnemidii Locri, who received their distinguishing name from this mountain. Mount Cnemis was a continuation of Callidromus, with which it was connected by a ridge, at the foot of which is the modern town of *Pundonitza*. (Strab. ix. pp. 416, 425; Leake, *Northern Greece*, vol. ii. pp. 66, 180.) A spur of this mountain, running out into the sea, formed the promontory Cnemides (Κνημῖδες), opposite the islands called Lichades and the Euboean promontory Cenaeum. Upon this promontory stood a fortress, also called Cnemides, distant 20 stadia from Thronium. It was near the modern *Nikoraki*. (Strab. ix. p. 426; Ptol. iii. 15. § 10; Mela, ii. 3. § 6; called Cnemis by Scylax, p. 23, and Plin. iv. 7. s. 12; comp. Leake, *Northern Greece*, vol. ii. p. 177.)

CNIDUS (Κνίδος, Cnidus: *Eth.* Κνίδιος), a city in Caria, at the western extremity of a long peninsula, which forms the southern side of the bay called Ceramicus. Strabo (p. 656) describes Cnidus accurately: "it has two ports, one of which can be closed, and is intended for triremes, and it has a station for twenty ships; there lies in front of the city an island about seven stadia in circuit, lofty, in the form of a theatre, joined by a causeway to the mainland, and making Cnidus in a manner two cities, for a large part of Cnidus is on the island, which covers both the harbours." This island, now called Cape *Krio*, is united to the main by a sandy isthmus. The island is about 600 yards long, with an average width of about 150 yards. Strabo's dimensions are pretty near the mark. On the west side towards the sea the island is steep in some parts, and it slopes down eastward towards the two harbours, which gives it the appearance that Strabo mentions. "On each side of the isthmus there is an artificial harbour; the smallest (on the north side) has a narrow entrance between high piers, and was evidently the closed basin for triremes which Strabo mentions. The southern and largest port is formed by two transverse moles; these noble works were carried into the sea to the depth of nearly a hundred feet; one of them is almost perfect; the other, which is more exposed to the south-west swell, can only be seen under water." (Beaufort, *Karamania*, p. 81.) A few yards from the end of the west pier there is very deep water at the entrance of the southern harbour: it is marked 17 fathoms in Beaufort's plan. The water shoals from the entrance of each harbour to the sandy isthmus which connects Cape *Krio* with the mainland, and the Cnidians doubtless found no great depth of water between the island and the main when they constructed their causeway. Pausanias, who wrote after Strabo, in two different passages (viii. 30. § 2, v. 24. § 7), says that the island of Cnidus was separated from the mainland by a narrow channel which he calls Euripus; and in one of the passages he says that there was a bridge over it. He adds that the chief part of the city is on the mainland of Caria as he calls it, and most of the chief buildings. There is perhaps no inconsistency between Strabo and Pausanias, for if there was a bridge, there was probably a causeway too.

The site of Cnidus is covered with ruins "in every direction, particularly on the NE. side of the harbour. To the SW. are the remains of an ancient quay, supported by Cyclopian walls, and in some places cut out of the steep limestone rocks, which rise abruptly from the water's edge." (Hamilton, *Researches*, &c. vol. ii. p. 39.) Hamilton found the walls of Cnidus very perfect, and traced them throughout their whole extent to the east of the harbour. "The city is enclosed by two walls, one running east and west, the other almost north and south, and united at the summit of the hill to the NE. of the town; the former is partly Cyclopian, and partly pseudisodomous, but the style improves as it ascends. The northern part of the wall is very perfect, and contains two or three towers in a state of great preservation; it is also the best constructed, being probably of a later date and purely isodomous. —The walls in the peninsula are also well preserved, containing a round tower of great beauty at the extremity, near the northern harbour." (Hamilton.) No ancient city has been more mercilessly pillaged than Cnidus; its proximity to the sea may account for its present condition. There are two theatres, one of which had a diameter of 400 feet, both in a ruined condition, a Doric stoa, and the basement of a large building which may have been a temple. The two theatres were on the mainland side. On the site of the town there are circular or pear-shaped holes in the ground covered with cement, which must have been cisterns, as Hamilton supposes, for holding rain water; "for there is neither stream nor fountain anywhere near." Cnidus contains examples of Greek architecture of different kinds, both Doric and Ionic. The drawings of the most important remains are published in the Ionian Antiquities of the Dilettanti Society.

. viii. 35.) The Cnidians traded to
y period (Herod. ii. 178); and they
had a treasury at Delphi (Paus. x. 11. § 5). The position of the place was favourable for trade, and Cnidus acquired wealth. They colonised Lipara, one of the Aeolian islands off the north coast of Sicily. After their unsuccessful attempt to cut across their isthmus [BUBASSUS], the Cnidians surrendered to Harpagus, the general of Cyrus the Persian, and so far as we know they remained quiet. At the commencement of the Peloponnesian War they were dependents on Athens, for we must suppose that Thucydides (ii. 9) includes them in the term "Dorians dwelling close to the Carians." Cnidus deserted the Athenians after their losses in Sicily, and the Athenians made an unsuccessful attempt to seize the place. Thucydides (viii. 35), after speaking of the Athenians surprising some vessels at the Triopian promontory, says that they then sailed down upon Cnidus, and attacking the city, which was unwalled, nearly took it. The city is evidently the town on the mainland, and as this city was then unwalled, the walls which Hamilton describes must be of later date than the Peloponnesian War. In B. C. 394 Conon, who commanded a Persian and Hellenic fleet, defeated the Lacedaemonians under Pisander off Cnidus and destroyed the supremacy of Sparta. (Xen. *Hell.* iv. 3. § 10; Isocrates, *Panegyr.* c. 39.)

In the war of the Romans with Antiochus the Cnidii readily obeyed the orders of the Romans. (Liv. xxxvii. 16.) One of the very few occasions on which anything is recorded of the military operations of the Cnidii is their sending relief to Calynda, when it had revolted from Caunus (Polyb. xxxi. 17), about B. C. 163. On the settlement of the province of Asia they were included in it, and in Pliny's time Cnidus was "Libera," and probably at an earlier time. It was taken by the pirates who infested these seas before they were cleared out by Cn. Pompeius B. C. 67 (Cic. *Pro Lege Manilia*, c. 12), at the same time that Samos, Colophon and other places on the coast were plundered.

Hamilton (*Researches* and *Appendix*, vol. ii.) copied several inscriptions at Cnidus. None of them are ancient, and most of them belong to the Roman period. The Doric form appears in δαμος and other words. The name of Apollo Carneius occurs in one inscription; and Apollo was worshipped under this name at Corinth, and by all the Dorians (Paus. iii. 13. § 4). This inscription is a memorial in honour of Caius Julius Theopompus (Theupompus in the inscription) the son of Artemidorus (as it stands in Hamilton's copy), and it was erected by his friend Marcus Aephicius Apollonius, the son of Marcus. There was a Theopompus, a native of Cnidus, an historical writer and friend of the dictator Caesar (Strab. p. 656); and Theopompus had a son Artemidorus, but according to this inscription Theopompus was the son of Artemidorus. An Artemidorus informed Caesar of the conspiracy against him. (Plut. *Caes.* c. 65.) The inscription shows that Theopompus was a Greek who had after Greek fashion taken the praenomen and nomen of his patron, and this Theopompus may have been the man whom the dictator patronised. Hamilton conjectures that Apollonius may be Molon, the rhetorician, the teacher of Caesar and Cicero; but if that is so, his father must have received the Roman citizenship, for he is called Marcus in the inscription.

Eudoxus the mathematician, as Strabo calls him, one of the friends of Plato, was a native of Cnidus; but he is chiefly known as an astronomer. Strabo

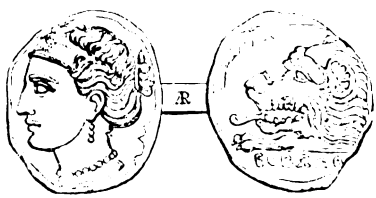
(p. 119, 806) speaks of his observatory (*σκοπή*) at Cnidus, from which he saw the star Canopus; his observatory was not much higher than the houses. Ctesias, a physician, and the author of a Persian history, was a native of Cnidus; and also Agatharchides, who wrote a treatise on the Erythraean sea and other works. The Cnidians were fond of art, though the city did not produce artists. They placed a statue of Jupiter at Olympia, with a statue of Pelops on one side of it, and the river Alpheius on the other. (Paus. v. 24. § 7.) They also set up at Delphi a statue of Triopas, the so-called founder of their city, a figure of a man standing by a horse; and a Leto, and Apollo and Artemis, shooting their arrows at Tityus. (Paus. x. 11. § 1.) The painting of Polygnotus, at Delphi, called Lesche, was an offering of the Cnidii. (Paus. x. 25. § 1.) Aphrodite was worshipped at Cnidus, and the place was supposed to be one of her favourite abodes. (Hor. *Od.* i. 30; iii. 28.) Pausanias mentions three temples of Aphrodite at Cnidus; in the oldest she was worshipped as Doritis, in a second as Acraea, and in the third and most recent as Cnidia, or, as the Cnidians called her, Euploea, the deity of mariners (i. 1. § 3). Cnidus possessed the statue of the naked Aphrodite of Praxiteles, of Parian marble, one of the great works of Grecian genius. The statue stood in a chamber with two doors, so that the figure could be seen on both sides. People used to visit Cnidus to see the beautiful goddess. (Plin. xxxvii. 5.) Nicomedes, king of Bithynia, offered to buy this precious work from the Cnidians by paying the whole of the public debt of Cnidus, which was large, but the Cnidians preferred to keep their goddess and their debt. Lucian, (*Amor.* c. 11, &c.), or the author of the little piece that is printed in Lucian's works, has described the statue with the feeling of an artist. (*Dict. of Biogr.* art. *Praxiteles*, where the various passages are referred to.)

The coins of Cnidus have the epigraph *κνι* and *κνιδιαν*. [G. L.]



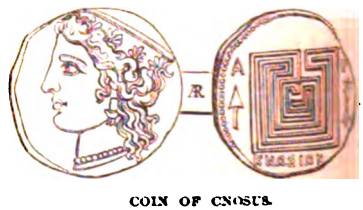
COIN OF CNIDUS.

CNOPU'POLIS. [Erythrae.]

CNOPUS. [Boeotia, p. 413, b.]

CNOSUS, or GNOSUS, subsequently CNOSSUS, or GNOSSUS (Κνωσός, Κνωσσός, Γνωσός, Γνωσσός; *Eth.* and *Adj.* Κνώσιος, Κνώσσιος, Γνώσιος, Γνώσσιος, Gnosius, Gnosiacus, *fem.* Gnosis, Gnosias: *Makro-Teikho*), the royal city of Crete, situated to the N. of the island, SE. of Matium, and 23 M. P. from Gortyna (*Peut. Tab.*). It originally was called Caeratus (Καίρατος, Strab. x. p. 476) from the small river of that name which flowed beneath its walls. (Callim. *Hymn. Dian.* v. 44.) Tritta (Hesych. *s. v.* Τρίττα), was a name that had been some time applied to it. Pliny (iv. 20), who places Cnossus among the inland cities, and Ptolemy (iii. 17. § 10), are quite wrong in the positions they assign to it. Strabo's text (*l. c.*) is undoubtedly corrupt (comp. Groskurd, *in loc.*; Hoeck, *Creta*, vol. i. p. 402); and this may in part serve to account for the difficulty that has been found in reconciling the statements of this writer, who was so intimately connected with Cnossus, with the known position of the city. Its foundation was attributed to the hero of Cretan romance, Minos, who made it his chief residence (Hom. *Od.* xix. 178). Cnossus and its neighbourhood was the chosen seat of legend; and the whole district was peculiarly connected with Zeus. At the river Tethris, or Theron, according to tradition, the marriage of Zeus and Hera was celebrated (Diod. v. 72.) The most received myths assigned the birth-place as well as the tombs of the "father of gods and men" to this locality. The well-known Cretan labyrinth is uniformly attached to Cnossus. It was described as a building erected by Daedalus and the abode of the Minotaur (Diod. i. 61; Apollod. iii. 4). This monument could never have had any actual existence, but must be considered simply as a work of the imagination of the later poets and writers. The Homeric poems, Hesiod and Herodotus, are all equally silent on the subject of the edifice. The labyrinthial construction is essentially Aegyptian, and it would seem probable that the natural caverns and excavated sepulchres still to be seen near Cnossus, and which were originally used for religious worship, suggested, after the introduction of Aegyptian mythology into Greece, the idea of the labyrinth and its fabled occupant. (Comp. Hoeck, *Kreta*, vol. i. pp. 56, foll.)

Cnossus was at an early time colonized by Dorians, and from it Dorian institutions spread over the whole island. It preserved its rank among the chief cities of Crete for some time, and by its alliance with Gortyna obtained the dominion over nearly the whole island. Polybius (iv. 53) has given an account of the civil wars which distracted Crete, and in which Cnossus took part. Afterwards it became a Roman colony. (Strab. x. p. 477.) All the now existing vestiges of the ancient "metropolis" of Crete are some rude masses of Roman brick-work, parts of the so-called long wall, from which the modern name of the site has been derived. (Pashley, *Travels*, vol. i. p. 204.) Chersiphron, or Ctesiphon, and his son Metagenes, the architects of the great temple of Artemis, were natives of this city, as was also Aenesidemus the philosopher, and Eryxidas, whose victories in the Olympian, Pythian, and Isthmian games, are celebrated by Pindar (*Olymp.* xii. 19). For coins of Cnossus, both autonomous and Imperial, see Eckhel, vol. ii. p. 307. The usual type is the labyrinth; the forms, since they represent only a poetical creation, are naturally varied. [E. B. J.]



COIN OF CNOSUS.

COBULATUS, or, as Polybius (xxii. 18) writes it, Colobatus (Κολόβατος), a river which the Roman general Cn. Manlius crossed on his march from the Caulares [Caulares] to Isinda (Liv. xxxviii. 15). After crossing the Caulares he passed the Caralitis Palus [Caralitis], and came to Mandropolis; from thence to Lagon, near the source

Hercules, or *Cape Spartivento*. Mela
found it with the Zephyrian Promon-
tory, which is certainly the modern *Capo di Bruzzano*, much further south. (Mel. ii. 4.) The modern name of *Capo di Stilo* is evidently derived from some column (στήλη or στυλίς) erected on the headland as a landmark, and appears to date from an early period, as it is already marked by the name of "Stilida" in the Maritime Itinerary. (*Itin. Marit.* p. 490.) The Itinerary of Antoninus, on the contrary, mentions "Cocinto" (p. 114), as if there were a town or village of the name; but it was probably a mere station. [E. H. B.]

COCOSA or COEQUOSA, as it is written in the Antonine Itin., is the first place on a road from Aquae Tarbellicae (*Dax*) to Burdigala (*Bordeaux*). It is placed 24 M. P. from *Dax*, and is supposed to be a place called *Caussèque*. If this is rightly determined, we ascertain the position of the Cocosates, one of the Aquitanian tribes whom P. Crassus compelled to submit to him in the third year of the Gallic war, B. C. 56 (Caes. *B. G.* iii. 27). Pliny (v. 19) calls the people "Cocossates Sexsignani," which seems to mean that it was a garrison town. He calls the Tarbelli "Quatuorsignani." The position of the Cocosates is in the southern part of the department of *Les Landes*; and "the inhabitants of the Landes are still divided into two classes; the Bouges, or those of the north or of the *Tête-de-Buch;* and the Cousiots, those of the south." (Walckenaer, *Géog.*, &c. vol. i. p. 303) [Boii]. [G. L.]

COCY'LIUM (Κοκύλιον: *Eth.* Κοκυλίτης), a place in Mysia, mentioned by Xenophon with Neandria and Ilium. (Xen. *Hell.* iii. 1. § 16.) In Pliny's time (v. 30) it had disappeared. He mentions it between Cilla and Thebe. A place called *Kutchulan*, or, as others write it, *Cotschiolan-Kuni*, is supposed to represent Cocylium. [G. L.]

COCY'TUS, a tributary of the river Acheron in Epeirus. [Acheron.]

CODANI, a people of Arabia Felix, mentioned by Pliny between the Arsi and the Vadei (vi. 28). Forster finds them in the tribe of Kodad near Mekka. (*Arabia*, vol. ii. p. 142, note †.) [G. W.]

CODANO'NIA. [Scandia.]

CODA'NUS SINUS, the sea to the east of the Chersonesus Cimbrorum (*Jutland*), which, as Pomp. Mela (iii. 4) states, is filled with islands, all of which belong to the modern kingdom of *Denmark*. It was therefore the southern part of the *Baltic*. According to Pliny (iv. 27) it extended north as far as the prom. Cimbrorum. [L. S.]

CODDINUS. [Sipylus.]

CODRION, a fortified town in Illyria, which surrendered to the Romans upon the capture of Antipatria, B. C. 200. It was probably near the latter city, upon the river Apsus. (Liv. xxxi. 27.) It was probably the same town, which is called Chrysondyon by Polybius (v. 108). (Leake, *Northern Greece*, vol. iii. p. 326, seq.)

COELA (τὰ Κοῖλα τῆς Εὐβοίας), "the Hollows," a part of the coast of Euboea, which was very dangerous to vessels in stormy weather, and where a squadron of the Persian fleet was wrecked just before the battle of Artemisium. (Herod. viii. 13.) Strabo (x. p. 445) describes it as a place between Aulis and Geraestus; but as Aulis is misplaced in a description of the Euboean coast, many critics have proposed to read Chalcis. The Epitomizer of Strabo has Caphareus instead of Aulis, a correction which appears to have been made from Ptolemy (iii. 15. § 25), who places the Coela between Caphareus and the promontory Chersonesus. But Ptolemy is the only

Digitized by Google

writer who places the Coela on the eastern side of the island; all other ancient writers suppose them to have been on the western coast. (Liv. xxxi. 47; Val. Max. i. 8. § 10; Lucan, v. 196, 230.) The Persian fleet must therefore have sailed round the promontory of Geraestus before they were overtaken by the storm. (Groskurd and Kramer, *ad Strab. l. c.*)

COELE. [ATTICA, p. 302, b.]

COELESYRIA. [SYRIA.]

COELE'TAE, a Thracian people, divided into *majores* and *minores*, the former of whom dwelt at the foot of Mount Haemus, and the latter about Mount Rhodope. (Plin. iv. 18; Liv. xxxviii. 40; Tac. *Ann.* iii. 38.) The district which they inhabited was called *Coeletica*. [L. S.]

COELOS, COELA, COELIA, or CELA (Κοιλὸς λιμήν, Κοῖλα, Κοιλία), a port-town in the Thracian Chersonesus on the Hellespont, near which the Spartans were defeated by the Athenians, and where the latter erected a trophy by the side of the tomb of Hecuba. (Mela, ii. 2. 7; Plin. iv. 18, Ptol. iii. 12. § 4; Nicet. v. p. 81; Anna Comn. xiv. p. 429; Amm. Marc. xxii. 8; Hierocl. p. 634.) There still exist coins of the town of Coelos, respecting which see Eckhel, vol. ii. p. 50. Its modern name is *Kilidbahr*. [L. S.]

COENOPHRU'RIUM, a town on the Thracian coast of the Propontis, on the road from Apollonia to Selymbria; in it the emperor Aurelian was murdered in A. D. 275. (Eutrop. ix. 9; Vopisc. *Aurel.* 35; Itin. Ant. pp. 138, 230, 322, where the place is called Cenophrurium.) It is generally identified with the modern *Birados*. [L. S.]

COENYRA. [THASUS.]

COEQUOSA. [COCOSA.]

COETAE (Κοῖται), are mentioned by Xenophon at the end of the Anabasis (vii. 8. § 25) among the nations that the Ten Thousand passed through. They are mentioned between the Mossynoeci and the Tibareni. The name does not occur in any other part of the work, nor elsewhere. [G. L.]

COEUS. [PAMISUS.]

COGAEONUM (Κωγαιώνον), a mountain in the district of the Getae, which, from its connection with the legend of Zamolxis, was considered sacred. A river bearing the same name was in its neighbourhood. (Strab. vii. p. 298.) Neither the mountain nor the river can be identified, as it is uncertain whether we should look for them in the E. Carpathians or in the earlier settlements of the Getae, S. of the Ister. (Comp. Schafarik, *Slavische Alterthum*, vol. i. p. 489.) [E. B. J.]

COGAMUS. [HERMUS.]

COLACEIA (Κολακεία), a town in Malis of uncertain site. (Theopomp. ap. Athen. vi. p. 254, f.)

COLA'NIA, in Britain, mentioned by Ptolemy as one of the cities of the Damnii, to the NE. of the Selgovae (*Solway*). Identified with *Carstairs*, and with *Crawfurd*. [CORIA.] [R. G. L.]

CO'LAPIS, a river in the country of the Iapodes, in Pannonia, the district about the mouth of which was occupied by the tribe called *Colapiani*. (Strab. pp. 207, 214; Plin. iii. 28.) Dion Cassius calls the river *Colops* (xlix. 38, its modern name is *Kulpa*), and, according to Strabo, it flowed from the Alps, and having, in its course, become navigable, emptied itself into the Savus near Siscia or Segestica. [L. S.]

COLCHI INDIAE (Κόλχοι, Peripl. *Mar. Erythr.* p. 33; Tab. Peuting. Colchis Indorum; Κόλχοι ἐμπόριον, Ptol. vii. 1. § 10), a port on the Malabar coast, to the NE. of the present *Cape Comorin*, in that subdivision of India which the ancients called *India intra Gangem*. According to Ptolemy (vii. 1. § 10) it gave its name to a gulf which was called the Κολπὸς Κολχικός. Its present representative has not been determined; but the position is sufficiently identified by the description of the neighbouring coast, which was and is celebrated for its pearl fisheries. Dr. Vincent, in his Commentary on the Periplus (vol. ii. p. 444), has shown that near it, on the northern shore of Ceylon, was the island of Epiodorus (now the island of *Manaar*), and one of the most celebrated seats of the pearl fisheries. It is not improbable that many of the names which are mentioned in the immediate neighbourhood, as Colias, Prom. Coliacum, Colchi (Κολχικοί, Strab. xv. p. 689), are really connected with that of Colchi. Indeed, the text of the Periplus is so corrupt, that it is difficult to have faith in the emendations even of the very learned men who have made it their study. (Vincent, *Periplus of the Erythraean Sea*, vol. ii.; *Asiatic Researches*, vol. v. p. 395.) [V.]

CO'LCHICUS SINUS. [COLCHI INDIAE.]

COLCHIS (ἡ Κολχίς: *Eth.* Κολχός: Adj. Κολχικός), a district of western Asia bounded on the SW. by the province of Pontus, from which it was separated by the river Phasis, on the W. by the Pontus Euxinus as far as the river Corax, on the N. by the chain of the Caucasus, which lay between it and Asiatic Sarmatia, on the E. by Iberia and Mts. Moschici, and on the S. by Armenia. There is some little difference in authors as to the extent of the country westward: thus Strabo (xii. p. 498) makes Colchis begin at Trapezus, while Ptolemy, on the other hand, extends Pontus to the river Phasis. It may be gathered from Strab. xi. p. 497; Plin. vi. 5. s. 5; Theodor. *Hist. Eccl.* v. 34; Procop. *B. G.* iv. 4; Zosim. i. 32, that Phasis was the last town to the S. in Colchis, and from Strabo, *l. c.*, Arrian Peripl. p. 11. (ed. Hudson); Mela, i. 19; Ammian. xxii. 15; Ptol. v. 10; that the position of Dioscurias (which, according to Arrian and some other writers, was subsequently called Sebastopolis) was in the northern part of Colchis, and distant from Pityus, according to Strabo 966, and according to Arrian 350 stadia. The order of the tribes on this eastern coast of the Euxine was according to Strabo, and commencing from the N., the Zygi, Heniochi, Cercetae, Moschi and Colchi; it would, however, appear that the whole district popularly known as Colchis occupied the greater part of the territory on which these smaller tribes or subdivisions of people were settled: and may, therefore, as stated, be considered roughly to extend from Trapezus to Dioscurias. The district comprehends the modern provinces of Mingrelia and part of Abasia, south and west of Mt. Elburz. Aeschylus and Pindar appear to be the earliest authors who have given to this land its historical name of Colchis. The earlier writers only speak of it under the name of Aea, the residence of the mythical king Aeetes. The inhabitants, called Colchi, were according to the opinion of Herodotus (ii. 104, 105) and Diodorus (i. 28) the remains of the army of Sesostris, and therefore of Egyptian origin. Herodotus argues that the people of Colchis were the relics of this army, because of the many customs which were similar to them and to the Egyptians, and not in use originally in other nations, as the rite of circumcision, and the working of linen (which then

Digitized by Google

Sardonic, or, as Larcher thinks, ardes), and also from their language, al complexion of their skin, which colour, like that of the ancient inha- valley of the Nile, and from their air. Strabo (*l. c.*) alludes to, but credit, this story. Yet many modern eld that there is some truth in it, pted variously to account for the en the two people. (Comp. Heeren, p. 405; Michaelis, *Laws of Moses*, &c.) Herodotus is so far a good e does not speak from hearsay, but ervation. Pindar (*Pyth.* 4. 378), too, ns dark-complexioned. Ammianus ly merely copies the words of Hero- us Perieg. (v. 689) confirms the of the Egyptian descent of the

(See under It may be remarked here, that of Lazi gave their name to the Regio nereby the whole country was known of history (Procop. *B. P.* ii. 15, ol. v. 10. § 5, as compared with , p. 11), and that the Abasci have uated their name in the modern l's Map) or *Abkhasia* (Ritter). It ed that the names Coli, and Colias, nection with the Indian Colchis; not gh the carelessness of transcribers CHI INDIAE.] The only river of vas the Phasis (now *Fáz* or *Rioni*), ling to some writers the S. boundary more probably flowed through the untry from the Caucasus W. by S. nd the Anticites or Atticitus (now n (*Periplus*, p. 10) mentions many ut they would seem to have been little tain torrents: the most important of rieis, Chobus or Cobus, Singames, s, Astelephus, Chrysorrhoas, several so noticed by Ptolemy and Pliny. were Dioscurias or Dioscuris (under d Sebastopolis) on the sea-board of apana (now *Scharapani*), Surium, cheiresis, and Cyta or Cutatisium the traditional birth-place of Medea. itself was celebrated, as we have arliest times for its cultivation of n (Her. ii. 105; Strab. xi. p. 498). e of the Romans, and still later e, many castles and factories occu- o as to maintain the general trade (Procop. *B. G.* iv. 2, *B. P.* ii. 33); which produced, besides linen, -building, hemp, flax, wax, pitch, (Strab. xi. p. 498; Appian. *Mithr.* ng many of the poets of antiquity, mong those of the later and Roman as the scene of the parentage of he subsequent voyage of the Argo- apture of the Golden Fleece, was the native seat of all sorceries and witchcrafts. (Horat. *Carm.* ii. 13. 8, *Epod.* v. 21, xvi. 57; Juv. vi. 643; Propert. ii. 1. 53; Martial. x. 4. 35.) The existence and growth in the country of the Iris plant (Dioscor. *in Proem.* lib. vi.; Plin. xxviii. 9), from the bulbous root of which the medicine we call Colchicum is extracted, may have led to some of the tales of sorcery attributed to Medea. (Ovid. *A. Am.* ii. 89; Lucan. vi. 441.)

We have occasional notices of the history of Colchis incidentally recorded in various passages of the classical writers, from which we may gather:—

1. That during the time of Herodotus it was the northern limit of the Persian empire (Her. iii. 97); though subsequently the people appear to have thrown off this yoke, and to have formed an independent state (Xen. *Anab.* iv. 8. § 9, vii. 8. § 25). Still later, in the time of Alexander the Great, the Colchians were not included in the sway of the Persians. (Arrian, *Anab.* iv. 15. § 4.)

2. During the period of the contests between Mithridates and the Romans, Colchis was considered to be one of the territories which the king of Pontus had annexed to his paternal territory (Appian, *Mithr.* 15), though its allegiance was even then uncertain and doubtful (*Ibid.* 64). During the Second Mithridatic War, Mithridates made his son Machares king of Colchis (*Ibid.* 67), who appears to have held his power but for a short period. Finally, on the overthrow and death of Mithridates, Pompey made Aristarchus the governor of this district. (*Ibid.* 114; comp. Dion Cass. xxxvi. 33, xxxvii. 3.) On the fall of Pompey, Pharnaces, son of Mithridates, took advantage of Caesar being occupied in Egypt, and reduced Colchis, Armenia, and some part of Cappadocia,—defeating Cn. Domitius Calvinus, whom Caesar subsequently sent against him. His triumph was, however, short-lived. (Dion Cass. xlii. 45.)

3. Under Polemon, the son and successor of Pharnaces, Colchis was part of the kingdom of Pontus and the Bosporus. (Strab. xi. pp. 493—499.)

Lastly, from Theoph. Byzant. (*Fragm.* 4), it appears that in the eighth year of Justin, A. D. 572, the Colchians and Abasgi joined the king of Armenia as the allies of Chosroes in his war against Marcian. At this period the district itself, as already remarked, was generally known as Terra Lazica. (Menand. Prot. *Fragm.* 3 of his *Continuation of the History of Agathias.*) [V.]

COLENDA (Κολένδα: perhaps *Cuellar*), a city of the Arevacae in Hispania Tarraconensis, mentioned by Appian (*Hisp.* 99, 100; Ukert, vol. ii. pt. 1, p. 456). [P. S.]

COLI (Κῶλοι), a people of the Caucasus, in the north of Colchis, inhabiting a district called after them, Κωλική. The northern part of the Caucasus was also called Κωλικὰ ὄρη. (Steph. B. *s. v.* Κῶλοι; Scylax, p. 31, where Κωλική should be read for Κωρική; Plin. vi. 5. s. 5; Mela, i. 19.)

COLIAS. [ATHENAE, p. 305, b.]

COLICA'RIA, a place in Gallia Cisalpina, on the Po, between Mutina and Hostilia, near *Mirandola*. (It. Ant.)

COLIS (Κωλίς, Dion. Perieg. 1148; Mela, iii. 7; Fest. Avienus, v. 1355), a district on the Malabar coast, opposite to Ceylon, and a little to the northward of *Cape Comorin*. As stated elsewhere [COLCHI INDIAE], there is a great confusion in the names which the ancients have preserved of the places on this coast; and it is very likely that the names Calligicum, Co-

Digitized by Google

liacum, Colis, and Colias, refer to one and the same district. That it was N. of *Cape Comorin* is quite clear; and if Colias and Colis be one and the same, it is clear that it was not far to the N., as Dionysius (v. 951) evidently describes the former as opposite to *Ceylon*. Ptolemy and Marcian connect with Calligicum another promontory, which they call Cory (Κῶρυ ἄκρον), a projecting strip of land to the E. of the *Sinus Colchicus*: it has been supposed by Ritter (*Erdk.* v. p. 517) to be the same as the present *Panban*, opposite the island of *Ramanan Kor*. Pliny (vi. 20. s. 23) speaks of a Promontory Calingon, — doubtless the Calligicum of Ptolemy. [V.]

COLLA'TIA (Κολλατία: *Eth.* Κολλατῖνος, Collatinus: *Castel dell' Osa*), an ancient city of Latium, situated about 10 miles E. of Rome, between Gabii and the Anio. Virgil notices it as one of the colonies of Alba Longa (*Aen.* vi. 774); a clear proof that he considered it as a Latin town; and Dionysius also distinctly attributes it to that people: it is strange, therefore, that Livy speaks of it as if it had been a Sabine city previous to its conquest by the Romans. The first occasion on which its name appears in history is during the reign of Tarquinius Priscus, by whom it was reduced to a state of subjection to Rome. (Liv. i. 38; Dionys. iii. 50.) Livy has preserved to us the formula of "deditio" on this occasion, and there can be no doubt that the fact is historically true, as the city never appears again as an independent state. Tarquin is said to have established a garrison there, whence he is erroneously represented by some late grammarians as the founder of the city (Serv. *ad Aen.* vi. 744): he at the same time appointed his nephew Egerius as governor, who in consequence obtained the surname of Collatinus, which he transmitted to his descendants; and Lucius Tarquinius, the husband of Lucretia, is represented as residing at Collatia at the time of the siege of Ardea. (Liv. i. 57—59; Dionys. iv. 64.) Silius Italicus also represents it as the birthplace of the elder Brutus (viii. 363); but there is no other authority for this. No subsequent mention of Collatia occurs in history; but it appears to have gradually declined. Cicero incidentally notices it as one of the municipal towns of Latium which was in his time in a very decayed condition. Strabo tells us it was reduced to a mere village, and Pliny enumerates it among the "populi" of ancient Latium which were then no longer in existence. (Cic. *de Leg. Agr.* ii. 35; Strab. v. p. 230; Plin. iii 5. s. 9.) This is the last mention of the name that we meet with; but the memory of its existence was preserved by the Via Collatia or Collatina, which is noticed more than once by Frontinus (*de Aquaeduct.* 5, 10), from whom we learn that it lay to the left of the Via Praenestina, from which it was separated by a short interval. This is the only clue to the position of Collatia, the site of which has in consequence been generally fixed at a place called *Castellaccio* or *Castel dell' Osa*, a ruined castle of the middle ages, on the N. bank of a little stream called the *Osa*, little more than 2 miles from its confluence with the Anio, and about the same distance from the site of Gabii. There remain on this spot some very inconsiderable fragments of walls on the side towards the stream, where it presents a steep and abrupt face of tufo rock, but on the other side it is wholly without defences, and Gell is of opinion that the site was little adapted for that of an ancient city. Hence he inclines (as well as Westphal) to place Collatia at *Lunghezza*, another mediaeval fortress on a bold and nearly isolated hill just above the confluence of the *Osa* with the Anio. The position of *Lunghezza* is certainly one better adapted by nature for the site of an ancient city than that of *Castel dell Osa*, and would accord much better with Virgil's expression ("Collatinas imponent montibus arces," *Aen.* l.c.) but no ruins have been discovered there. (Gell, *Top. of Rome*, pp. 171—175; Nibby, *Dintorni*, vol. i. pp. 478—482; Westphal, *Röm. Kampagne*, pp. 100, 101; Abeken, *Mittel Ital.* p. 78.) [E. H. B.]

COLLOPS MAGNUS or CULLU (Κόλλωψ μέγας ἢ Κόλλου, Ptol. iv. 3. § 3; Chulli Mountains, *Itin. Ant.* p. 19; Chullu, *Tab. Peut.*; Chullu, Ru. 29; *Collo*, Ru.), a city of Numidia, upon a promontory land on the W. side of the Sinus Olcadites (Bay of *Storah*), E. of the Pr. Tretum, and 50 M.P. W. of Rusicada, celebrated for its purple-dyeing establishments, and probably, therefore, a Phoenician colony. (Brun, *Africa*, p. 214.) Ptolemy places a Κόλλωψ μίκρος, considerably to the E. of this, a position apparently near the opposite side of the bay. (Ptol. *ibid.* § 4.) [P. S.]

COLLYTUS. [ATHENAE, p. 302.]

COLOBATUS. [COBULATUS.]

CO'LOBI (Κολοβοί, Diod. iii. 32; Agatharch. p. 46; Ptol. iv. 7. § 28), a tribe of Troglodytes situated on a strip of land in the vicinity of the promontory of Bazium in lat. 24° N., and on the western shore of the Red Sea. Ptolemy (iv. 7. § 7) mentions a mountain (Κολοβὸν ὄρος, ἄκρον), and Strabo (xvi. p. 771) a forest, of the Colobi (Κολόβων ἄλσος) in this region, between Berenice and the harbour of Antiphilos. Pomponius Mela (iii. 8) names a town of Coloba between the promontory of Acmen and Philoteris. The Colobi, like the entire Troglodytic nation, were the subject of many fables. In the Greek language their name imports "the mutilated" and they seem to have practised the rite of circumcision after a manner peculiar to themselves (Aristot. *Hist. An.* iii. 8. § 6; Diod. iii. 32). They were probably a dwarfish people, and among the varieties of the Aethiopict race whose low stature or deficiency of finally to the fable of the Pygmies. The region which they inhabited was barren, and they were excluded from the pasture grounds to the west of it by their stronger kinsmen or neighbours. Hence their diet was principally shell-fish and the casual products of the chase, and their curtailed proportions were confirmed by their poor diet. [W. B. D.]

COLOE (Κολόη λίμνη, Ptol. iv. 7. § 24; Steph. Byz. *s. v.*), a lake in Aethiopia, lat. 12° N., through which flows, but with little intermixture of their several waters, the river Astapus (*Bahr-el-Azrek*), the Blue or Dark River. The lake Coloe is probably the Ψεβώ or Ψέβοα of Strabo (xvii. p. 822), and is the modern Lake *Dembea* or *Tzana*. There was also in Aethiopia a town named Coloe (Κολόη πόλις, Ptol. iv. 7. § 25) of which the site is uncertain (Arrian, *Peripl. Mar. Erythr.* p. 3: Marcian. *Geograph.* vol. xii. p. 167). [W. B. D.]

COLO'NAE (Κολωναί) or COLONE, a town in the Troad, 140 stadia from Ilium. (Strab. pp. 595, 604; Thuc. i. 131; Xen. *Hell.* iii. 1. § 13; Paus. x. 14. § 1.) According to tradition, Colonae was in early times the residence of a Thracian prince Cycnus, who possessed the adjoining country as well as the island of Tenedos, opposite to which Colonae was situated on the mainland. Colonae was probably one of the towns from which the inhabitants were removed to supply the population of Alexandria Troas. Pliny (v. 30) places it in the interior, a-

the name of Camulodunum re-appears
); its geographical and political rela-
mparatively clear. Thus, the war is
mous Queen of the Iceni (Boadicea),
ation of the neighbourhood is that of
es (*Middlesex*). At the same time,
in Wales is interrupted by the Icenian
to which we may possibly trace the
he account of Ostorius. The actual
n west to east directed the attention of the historian towards Wales, whilst the probable rapidity with which Paullinus (the general now under notice) effected it, abridged the distance.

Be this as it may, the Camulodunum of the Icenian campaign is a place of pleasure, rather than a military fortification — "Nullis munimentis septam — dum amoenitati prius quam usui consulitur." This is not quite what we expect. It contains a temple, an image of victory, a *curia*, and a theatre.

Where does Tacitus place it? He is generally said to place Camulodunum on the aestuary of the Thames: by which a slight complication, and the necessity of carrying that river as far north as the *Blackwater*, is engendered. Nevertheless, though the context favours this view, it does not absolutely enforce it — "externos fremitus in curia eorum auditos; consonuisse ululatibus theatrum, visamque speciem *in aestuario Tamesae* subversae coloniae." This by no means says that the population of Camulodunum saw it. It might have been seen in London. The passage continues — "jam oceanum cruento aspectu; dilabente aestu, humanorum corporum effigies relictas, ut Britanni ad spem, ita *veterani* ad metum trahebant." As these *veterans* were the real occupants of Camulodunum, the extract is, *pro tanto*, in favour of Tacitus's having placed it on the Thames. Still, as already stated, it is not conclusive. The chief reason, however, for giving the passage in full will appear in the sequel.

Ptolemy's Camudolanum is a town of the Trinoantes, on the Imensa aestuary, the Trinoantes being east of the Simeni, whose town is Venta. The current explanation of this passage is, that the Simeni are the Iceni of the other authors, and Venta the Venta Icenorum (= *Norwich*). In a previous passage, we have, in the following order, from north to south, (1) the Metaris aestuary (= the Wash), (2) the river *Gariennus* (*Yare*), (3) a promontory, (4) the outlets of the river Idumannia, (5) the Tamissa aestuary. Now, the Tamissa aestuary is the Imensa aestuary, and the Ei-*du*-mannia the *Black*-water. At least, such is the view suggested by the element *du* (= *black*).

Turning from Ptolemy to the Itineraries, we find equal elements of confusion. In the *fifth*, we have *Colonia*; in the *ninth*, *Camulodunum*.

Colonia is 52 miles from London, Camulodunum 51.

From London to	M.P.
Caesaromagus	xxviii.
Colonia	xxiiii.
	lii.

From Camulodunum to	M.P.
Canonium	viii.
Caesaromagus	xii.
Durolitum	xvi.
London	xv.
	li.

The distance between Caesaromagus and Colonia coincides somewhat less closely.

Even the identification of Colonia with *Col*-chester is shaded by a doubt. It is difficult to believe that the river *Coln* took its name from *Colonia*, and it is not easy to believe that *Col*-chester is other than the Camp upon the *Colne*.

Notwithstanding the prevalence of the contrary opinion, the present writer, after balancing the conflicting difficulties, finds the best solution in doubting the identity of *Colonia* and *Camulodunum*. The first he believes to have been *Col*-chester, the second *Maldon*, name for name in each case. [R. G. L.]

COLO'NIA AGRIPPI'NA, or AGRIPPINENSIS, or simply AGRIPPI'NA (*Cologne*, as the French and English call it; *Cöln*, and *Köln*, as the Germans call it), a town on the left bank of the Rhine on the Roman road, which ran from Augusta Rauracorum (*Augst* near *Bâle*) past *Strassburg*, *Worms*, *Mainz*, *Bingen*, *Coblenz*, and *Bonn*. The road was continued on the left bank of the Rhine from *Cologne*, through Novesium (*Neuss*), Colonia Trajana (*Kellen* near *Cleves*), Noviomagus (*Nymegen*), and thence to Lugdunum (*Leyden*). The position is determined by the Itineraries and by the name. There are also medals of Colonia Agrippinensis, and the name occurs on inscriptions.

This town was originally called Oppidum Ubiorum (Tacit. *Ann.* i. 36), and it was the chief town of the Ubii, a German nation. The Ubii were on the east side of the Rhine in Caesar's time; but under Augustus they removed across the Rhine under the protection of M. Vipsanius Agrippa, to escape from the attacks of their neighbours the Catti. Agrippina, the wife of Claudius and the daughter of Germanicus Caesar, who was born at the Oppidum Ubiorum while her father commanded in these parts prevailed on her husband (A. D. 51) to send a colony of veteran soldiers there, and from that time the place had her name. (Tacit. *Ann.* xii. 27; Strabo, p. 194.) The Agrippinenses were made Juris Italici (Paulus, *Dig.* 50. tit. 15. s. 8), that is, the place had the Jus Italicum, which was a great privilege; but it does not appear whether it was conferred at the time of the colonisation or afterwards. An inscription in Gruter (p. 436) shows that it was also called Colonia Claudia Augusta Agrippinensium. Tacitus (*Germ.* c. 28; *Hist.* iv. 28) observes that the Ubii were willingly called Agrippinenses, from the name of their founder (conditoris sui), as if Agrippa founded the colony, though, in the passage already cited, Tacitus ascribes the foundation of the colony to Agrippina, or to her interest at least. (See the note of Lipsius on this passage.)

Cologne is well placed for a large town, being just below the point where the flats of the Netherlands commence, in a fertile country, and forming a convenient place of transit between the countries on the east and west sides of the Rhine. Its position on the German frontier involved it in trouble during the insurrection of Civilis, whom the people at length joined. The Transrhenane Germans were jealous of Cologne, which had grown rich. (Tacit. *Hist.* iv. 28.) The Colonia was protected by a wall, which the rude Germans on the other bank of the Rhine considered a badge of slavery. The Roman settlers and the Germans in the place had intermarried. The town had a transit trade, which was burdened with duties; and probably the people levied tolls on the boats that went up and down the river (Tacit. *Hist.* iv. 63—65), an obstacle to commerce which long existed on the Rhine.

Cologne became the chief town of Germania Secunda or Inferior. Aulus Vitellius was at Cologne, as governor of the Lower Germania, when he was proclaimed emperor by the soldiers. (Sueton. *Vitell.* c. 8.) There was a temple of Mars at Cologne, in which a sword was hung up, that was said to have been the sword of Divus Julius. Vitellius went about the most crowded streets of Cologne with this sword in his hand, when he was proclaimed emperor, and carried it off with him. But he sent the sword with which Otho killed himself, to be dedicated in the temple of Mars at Cologne. (*Vitell.* c. 10.)

Trajan was also at Cologne when Nerva died, A. D. 98, and he assumed the imperial insignia there. (Oros. vii. 12.) Ammianus (xv. 11) mentions Cologne under the name of Agrippina, and Trajan (*Tongern*), as large and rich cities of Secunda Germania. The place was taken by the Franks, but was recovered by Julian about A. D. 356, at which time it was a strongly fortified place. It is also mentioned by Zosimus (i. 38), under the name of Agrippina, as a very large city. In the Notitia it is called "Metropolis civitas Agrippinensium."

The Roman remains of Cologne consist of what is called the Pfaffenporte, supposed to be the old Porta Claudia, with the inscription C. C. A. A., and other remains of the walls. Many statues, sarcophagi, and other Roman remains have been found there. Some authorities speak of traces of a subterranean passage from Cologne to Trèves, which is an absurd fiction. There was a Roman road from Augusta Trevirorum to Cologne, the line of which appears to be indicated plain enough in some parts by the directions and position of the modern road. The old town of Cologne was that which was surrounded with walls by the Romans, and until near the close of the twelfth century was called the "civitas intra coloniam." The circuit of the ancient Colonia is described by Gelenius (*De admiranda sacra et civili magnitudine Coloniae*, Col. 1645, 4to.; referred to by Eichhorn). About A. D. 1180 a new wall included the suburbs.

Cologne was made a Roman city "juris Italici," which means that the municipal government and a limited jurisdiction in civil matters were in the hands of the city magistrates, whether they were called Duumviri or by any other name, and of the Ordo (Curia). The criminal jurisdiction and the jurisdiction in more important civil matters were in the hands of the Consularis or governor of Germania Secunda, whose residence was at Cologne. It seems a very reasonable conjecture that this important city never entirely lost its original constitution, and that its municipal system as it existed in the middle ages, as they are called, is of Roman original. That this cannot be proved, it is shown to be very probable by Eichhorn (*Ueber den Ursprung der Städte-Verfassung in Deutschland. Zeitschrift für Geschicht. Rechtswissenschaft*, Band ii). The place fell into the hands of the Franks in the first half of the fifth century, A. D.; and if it be true that the Roman general Aëtius recovered it, as some assert, the Romans did not keep it, for Childeric, the father of Chlodowig, had possession of the place. He spared the fortifications of Cologne, though he destroyed those of Trèves. It was the residence of the Frankish kings in Chlodowig's time, and is often mentioned in Frankish history as a strongly fortified place. It is well known that, as a general rule, the Franks allowed their Roman subjects to retain their own law, and it necessarily follows that they must have allowed them, to some extent at least, to retain the Roman institutions, without which the Roman law could not have been applied. Cologne was the first large Roman town that the Frankish kings got possession of, and there were reasons sufficient why they should allow this ancient and powerful city to retain its municipal constitution; and it is difficult to think of any reasons why they should destroy it. The investigation of this subject by Eichhorn is highly interesting. [G. L.]

COLO'NIA EQUESTRIS NOIODUNUM (*Nyon*), a town in the country of the Helvetii, which the

le river Hales or Ales flowed by Co-
noted for the coolness of its water.
§ 3.) The place was a short dis-
tance from the coast; and its port was Notium (Νότιον), with respect to which Colophon was called the upper city (ἡ ἄνω πόλις, Thuc. iii. 34).

Colophon and Ephesus did not, like the other Ionian cities of Asia, celebrate the festival of the Apaturia; for some reason or other connected with an affair of blood. (Herod. i. 147.) At an early period in the history of Colophon, some of the citizens being exiled by the opposite faction, retired to Smyrna, where they were received. But, watching an opportunity, they seized the town, and the matter was at last settled by the Smyrnaeans agreeing to go away with all their moveables, and leaving Smyrna in possession of the Colophonian exiles. (Herod. i. 150; compare the confused story in Strabo, p. 633, about Smyrna and Colophon.) Herodotus mentions Notium as an Aeolian city (i. 149); and some critics have supposed that he means the Notium which was the port or lower city of Colophon; a supposition that needs no refutation.

Colophon was taken by Gyges, king of Lydia. (Herod. i. 14.) Alyattes, one of his successors, took "Smyrna, the city that was founded from Colophon" (Herod. i. 16),—in which passage Herodotus appears to allude to the story of Smyrna that he tells in another place (i. 150). Colophon is seldom mentioned. Early in the Peloponnesian War the Persians got possession of the upper town or Colophon, owing to the people quarrelling among themselves. The party who were expelled maintained themselves in Notium; but even they could not agree, and a Persian faction was formed in Notium. The party opposed to the Persians called in Paches, the Athenian commander, who drove the Persian party out of Notium, and gave it back to the Colophonians, except those who had been on the Persian side. Afterwards the Athenians sent some settlers to Notium, and collected there all the Colophonians that they could from the cities to which they had fled. (Thuc. iii. 34.) Notium and Colophon are mentioned by Xenophon (*Hell.* i. 1. § 4) as distinct towns.

Lysimachus, a Macedonian, and one of Alexander's body-guard, who, after Alexander's death, made himself king of the Thracians, destroyed Lebedus and Colophon, and removed the people to his new city of Ephesus. (Paus. i. 9. § 7, vii. 3. § 4.) The Colophonii were the only people of those removed to Ephesus who resisted Lysimachus and his Macedonians; and those who fell in the battle were buried on the way from Colophon to Clarus, on the left side of the road. Probably a large mound was raised over the dead. Antiochus, king of Syria, in his war with the Romans (B. C. 190), unsuccessfully besieged Notium, which Livy (xxxvii. 26) calls "oppidum Colophonium," and he observes that it was about two miles from Old Colophon. On the settlement of affairs after the war with Antiochus, the Romans gave to the Colophonii "who dwelt in Notium" freedom from taxation (immunitas), as a reward for their fidelity to them in the war. (Liv. xxxviii. 39.) Polybius also calls the Colophonii "those who dwelt in Notium" (xxii. 27). But it was still the fashion to speak of Colophon as Cicero does (*pro Leg. Manil.* c. 12) when he mentions Colophon as one of the cities plundered by the pirates in his own time. This Colophon seems to be Notium. Strabo does not mention Notium; and he speaks of Colophon as if the old city existed when he wrote, though his remarks on the distance from Ephesus seem to apply rather to Notium or New Colophon than to the old town. Mela (i. 17) mentions Colo-

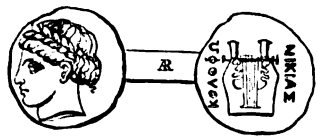
Digitized by Google

phon, and not Notium. Pliny (v. 29) says that Colophon is in the interior, and that the Halesus (the Ales of Pausanias) flows by it. "Next is the temple of Apollo of Clarus, Lebedus: there was also Notium, a town." This is a good example of Pliny's careless compilation. Thucydides tells us that Notium was the town on the coast or naval town, and that Colophon was the upper town; and Livy distinguishes the two clearly, and gives the distance of Old Colophon from the coast. The site of Notium and Colophon is easily determined, being near to Clarus. [CLARUS.] Chandler says that there are no ruins at Notium, and only some miserable cabins on the site of Colophon. Notium must have been as old as Colophon: it was mentioned by Hecataeus in his Asia as a city of Ionia (Steph. B. *s. v.* Νότιον).

Strabo says that the Colophonians had once a good navy, and an excellent cavalry. Their cavalry was so superior as to assure the victory to the side on which it fought, whence he says came the proverb, "He has put the Colophon to it" (τὸν Κολοφῶνα ἐπέδηκεν) whenever a matter was brought to a certain termination. The Scholiast on the Theaetetus of Plato (on the words τὸν Κολοφῶνα ἀναγκάζω προσεβάζων) gives a different explanation. He says that when the twelve Ionian states assembled at the Panionium, if the votes were equal, the Colophonii had the casting vote, for they received the Smyrnaeans to live with them, on behalf of whom they had this vote; whence the proverb was used to express a casting or deciding vote.

Colophon was one of the places that claimed to be the birthplace of Homer. It was the native city of Mimnermus, an elegiac poet; of the musician Polymnestus; of Phoenix, a writer of iambi (Paus. i. 9. § 7.); of Hermesianax, an elegiac writer (Athen. p. 597, who quotes a large fragment); of Antimachus, an epic poet; of Xenophanes, a writer of silli; and of Nicander, whose Theriaca is extant.

The resin of Colophon is mentioned by Pliny as an article of commerce; and it is also mentioned by Dioscorides (Pliny, xiv. 20, and Harduin's note) under the name Colophonia, which the French call *Colophane*. The mountain Gallesus, near Colophon (Strab. p. 642.), is a huge mass covered with noble pines, and it abounds in water. The mountain supplied the pine wood for the resin. [G. L.]



COIN OF COLOPHON.

COLOSSAE (Κολοσσαί: *Eth.* Κολοσσηνός, Κολοσσαεύς), a city of Phrygia, first mentioned by Herodotus (vii. 30) as a large city of Phrygia, on the Lycus, a branch of the Maeander. Xerxes, on his march to Sardes, B. C. 481, reached Colossae after leaving Anaua. [ANAUA.] The younger Cyrus, on his march from Sardes towards the Euphrates, B. C. 401, passed through Colossae. He crossed the Maeander, and after a march through Phrygia of 8 parasangs from the river, he came to Colossae, a large and prosperous city. (*Anab.* i. 2. § 6, &c.) The march of Cyrus from Colossae to Celaenae was 20 parasangs. The position of Colossae south of the Maeander is determined by these two authorities. Strabo (pp. 576—578) places Colossae near Laodiceia on the Lycus. In his time Apamea Cibotus and Laodiceia were the largest cities in this part of Phrygia. Laodiceia was then the chief town of a conventus, to which Colossae and more than twenty other towns belonged. Both Laodiceia and Colossae were famed for their wool, and the people of Colossae also derived a great profit from their skill in dyeing it. (See Groskurd's note on the passage of Strabo, p. 578; *Transl. Strab.* vol. ii. p. 533.) The upper valley of the Maeander was a sheep-feeding country.

Colossae had become a place of comparatively little importance in Strabo's time. In the middle ages there arose near it a town called Chonae (Χῶναι, or Χωναί), and Colossae disappeared. Chonae was the birthplace of Nicetas Choniates, one of the Byzantine historians. East of *Denizli* there is a place now called *Khonos*, or *Chonos*, situated at the foot of the mountain range of Cadmus. Arundell (*Asia Minor*, vol. ii. p. 159, &c.) supposes that *Khonos*, which is certainly the site of Chonae, is also the site of Colossae; and that the name Chonae superseded that of Colossae under the Byzantine Empire. His description is not clear. Hamilton (*Researches*, &c. vol. i. p. 508) found extensive ruins of an ancient city about three miles north of *Khonos*. On the site are large blocks of stone, foundations of buildings, and fragments of columns, architraves and cornices. He also found "the hollow cavea of a theatre, built on the side of a low sloping hill and of which several seats were still *in situ*." He does not mention any inscriptions. Herodotus says that the Lycus disappears *in* Colonae by sinking into a cleft (χάσμα γῆς), and after running about 7 stadia under ground it appears again and flows into the Maeander. If this cleft or hole can be determined, we may be pretty certain that we have ascertained the site of Colossae. Hamilton, who examined the ground carefully, found the necropolis or burying-place of this city, of which we have spoken, to be on one side of a river, and the theatre and other ruins on the opposite side. There is a bridge, which crosses a rapid stream, flowing from east to west; and this river is "formed by the junction of three rivers, which unite their waters immediately above the bridge." The chief stream is called the *Tchoruk*, which Hamilton supposes to be the Lycus. Another stream is called *Ak-su* (white water), and possesses highly petrifying qualities. Below the bridge is a narrow gorge, through which the waters of the united rivers flow. He found that the *Ak-su* had once fallen into the Lycus lower down than where it now does, exactly at the place where the chasm is narrowest. Another large stream falls over the cliff on the west side of the river, or the side opposite to the *Ak-su*, which runs from the NW. This river has also the same qualities as the *Ak-su*, and makes a great deposit, forming cliffs of travertine, and burying all plants and other substances that are in its way. This operation is going on rapidly, and the cliffs on each side have been formed by it. Hamilton says, "it is evident, that if the water always flowed in the same channel, these cliffs would approach each other and continue to overhang the river until a natural bridge were completed by the touching of the opposite sides, while the arch or passage of the river below would be kept clear, the rapidity of the stream still allowing the deposit of the calcareous matter. It is indeed most apparent that this has been the case, that the two cliffs have been here joined, and thus formed the χάσμα γῆς, through which, as Herodotus

Digitized by Google

[COLLYTUS.]

1. IN PONTUS (Κόμανα τὰ ἐν τῷ ανα τὰ Ποντικά: *Gumenek*), a place Phanorea, as Strabo says (p. 557), notice of this place. Ptolemy (v. 6) ntus Galaticus, but it afterwards tus Polemoniacus. Justinian placed e four divisions of Armenia, which ed the Second Armenia, as appears Novellae (*Nov.* 31. c. 1). The Table on a road that runs east from is not possible to make much of this (p. 547) describing the course of the that it flows from the country called has its sources in Pontus itself: its h Comana Pontica, and through the fertile plain Daximonitis to the west: it then turns to the north at Gaziura. We thus learn that it was in the upper valley of the Iris, and we know from Gregorius of Nyssa that it was near Neocaesarea (*Niksar*). In the book on the Alexandrine War (c. 35), a lofty range of hills, covered with forests, is said to extend from Pontic Comana to Armenia Minor, which range divides Cappadocia from Armenia. Hamilton (*Researches, &c.*, vol i. p. 450) discovered at a place called *Gumenek* on the *Tocat-su*, the modern name of the Iris, some remains of an ancient town, and part of a bridge apparently of Roman construction. There seems no doubt that *Gumenek* is the site of Comana Pontica. It is about seven miles north-east of *Tocat*. Pliny simply speaks of Comana as a Manteium, or the seat of an oracle (vi. 3). It is stated that it appears from inscriptions to have got the name of Hierocaesarea under the Romans (Forbiger, vol. ii. p. 428, note), the prefix Hiero or "sacred," indicating the character of the place. The position of Comana made it a great mart (ἐμπορεῖον) for the merchants that came from Armenia.

Comana was dedicated to the same goddess as Comana in Cappadocia, and was said to be a colony or settlement from the Cappadocian city. The religious ceremonial was nearly the same in both places, and the priests had like privileges. Under the early kings of Pontus, there were annually two great processions in honour of the goddess, on which occasions the chief priest wore a diadem, and he was next in dignity to the king. Dorylaus, the son of a sister of the Dorylaus who was an ancestor of Strabo's mother, once held the high-priesthood of Comana, which Mithridates the Great gave him. After Cn. Pompeius succeeded L. Lucullus in the command in these parts, he gave the high-priesthood to Archelaus, and he added to the lands of the temple a district of 60 stadia, by which expression Strabo probably means all the country round the temple within 60 stadia. Archelaus was sovereign of the people within these limits, and he was the owner of all the hieroduli, or temple slaves, within the city of Comana; but he had not the power of selling them. These slaves seem to have been attached to the soil. Their number was not less than 6000. This Archelaus was the son of the Archelaus who was honoured by L. Sulla and the Roman senate, as Strabo has it, and he was the friend of A. Gabinius. His father was, in fact, the best commander that Mithridates ever had. The son Archelaus, the priest, contrived to marry Berenice, the elder sister of Cleopatra, whose father, Ptolemaeus Auletes, had been driven out of Egypt; and Archelaus had a six months' reign with her. He fell in battle against Gabinius, who restored Auletes (B. C. 55). Archelaus was succeeded in the priesthood by his son Archelaus (Strabo, pp. 558, 796), but C. Julius Caesar, who came into Pontus after defeating Pharnaces, gave the priesthood to Lycomedes (Appian, *Mithrid.* c. 121), who received an addition of territory, as Strabo says. The author of the Alexandrine War (c. 61) says, that it was the priesthood of Comana in Cappadocia that Caesar gave to Lycomedes. It seems that he is perhaps mistaken as to the Comana, but it is clear that he means the Comana in Cappadocia. In a previous chapter (c. 35) he had spoken of Comana in Pontus. He knew that there were two places of the name; and in c. 66 it is certain, both from his description of the place, and the rest of the narrative, that he

Digitized by Google

means the Cappadocian Comana. Cleon, a robber on Olympus, a friend of M. Antonius, deserted him in the war that ended in the battle of Actium, and went over to Octavianus Caesar, who made a prince and a priest of him. In addition to the priesthood of Zeus Abrettenus, Caesar gave him the rich place at Comana. But he only held this preferment one month, having died of an acute disease, brought on by excess, or the anger of the goddess, it is not certain which, though the ministers of the temple attributed it to the goddess. Within the circuit of the sacred ground (τέμενος) were the residences of the priest and the priestess, and among other rules for securing the purity of the place, it was forbidden to eat swine's flesh within the sacred enclosure: indeed, no pig was allowed to come within the city. The robber priest, who had been accustomed to eat swine's flesh in the forests of Olympus, broke the rule immediately on entering on his new office; and it was supposed that his speedy death was the consequence of it. (Strabo, p. 575.)

In Strabo's time Dyteutus was high-priest of Comana. He was the son of Adiatorix, a Galatian chief, whom Octavianus Caesar exhibited in his triumphal procession after the battle of Actium. Adiatorix was guilty of the crime of having been on the side of M. Antonius; and accordingly Caesar, after his triumph, gave orders to put to death the chief, and his eldest son. But the second son persisted in declaring to the executioner that he was the eldest, and the two brothers disputed which should die. Their parents induced the elder to yield, and thus the younger died in his place. Caesar, on hearing this, rewarded the eldest son with the priesthood of Comana. Thus we have a Gaul in the list of the priests of Comana.

Comana was populous. At the processions of the goddess, her ἐξόδοι, as Strabo calls them, there was a great concourse of people from the towns and country all around, men and women. The population was also increased by people who resided there pursuant to their vows, and made sacrifices to the goddess. The people were fond of good living, and their lands produced plenty of wine. The number of prostitutes in Comana was large, most of whom belonged to the temple. So it was, says Strabo, a kind of little Corinth, where people, merchants and others, got eased of their money.

There are autonomous and imperial coins of Comana, with the legends Κομανων and Κομανεων.

COIN OF COMANA IN PONTUS.

2. In Cappadocia (τὰ Κόμανα τῆς Καππαδοκίας), was also called Chryse, or the golden, as appears from one of the Novellae of Justinian (*Nov.* 31. c. 1), to distinguish it from the other Comana. Justinian calls this Comana "the other, which is also named Chryse." It was in the division which he named the Third Armenia, and which, he observes, contained Melitene, near the Euphrates. Comana was in Cataonia in the Anti-taurus (Strabo, p. 521), in a deep valley; the river Sarus flowed through the city. It is generally supposed that the modern town of *Al-Bostan* on the *Sihoon* or Sarus, is on or near the site of the Comana. *Al-Bostan* is situated in a fine place, well watered, and well cultivated; and is a town of 8000 or 9000 inhabitants. Here was the temple of Enyo, as Strabo (p. 535) names the goddess. It contained a great number of persons devoted to the worship of the deity, and a great number of hierodouli. The inhabitants were Cataonians. They acknowledged the supremacy of the king of Cappadocia, but were under the immediate jurisdiction of the priest. This priest was chiefly (τὸ πλεῖστον whatever that means) master of the temple and of the hierodouli, who, at the time of Strabo's visit, were above 6000, men and women. The temple possessed large estates, the produce of which was enjoyed by the priest, who was next in rank to the king, and the priest was generally a member of the royal family. It was too good a thing to give to anybody else. There was a tradition that Orestes, with his sister, brought from Tauric Scythia the sacred image of this temple, which were those of Taurian Artemis. Here Orestes deposited the hair that he cut from his head to commemorate the end of his sufferings (ἡ πένθιμος κόμη), and hence, according to an absurd etymology of the Greeks, came the name of the place, Comana. And in later times, to make the name suit the absurd story better, as it was supposed, it was changed to ἡ Κόμαρα. (Eustath. ad Dionys. v. 694; Procop. *Persic.* i. 17.)

This deity of Comana is supposed to have been called Ma in the language of the country, and to be the moon-goddess, as in Caria the moon-god was worshipped under the name of Men. The passage in Strabo, . . . τὰ Κόμανα, καὶ τὸ τῆς Ἐνυοῦς ἱερὸν ὃ ἐκεῖνοι Κόμανα ὀνομάζουσι,—so it stands in Casaubon's text.—is certainly corrupt. We cannot suppose that Strabo means to say that they call the temple of Enyo by the name of Comana. Groskurd observes (Transl. Strabo, vol. ii. p. 449), that when Hirtius (*De Bell. Alex.* c. 66) says: "Venit Comana, sanctissimum in Cappadocia Bellonae templum," he means the town; and we cannot justify Strabo's text by this passage. It appears that most of the MSS. of Strabo have Μᾶ in place of Κόμανα, and Groskurd proposes to read Μᾶν with Koray. Accordingly the latter part of the passage means, "which they call the temple of Ma." Groskurd is, however, rather inclined to read ἐκεῖνοι Μᾶ or Μᾶν ὀνομάζουσι.

The place was made a Roman colony after the time of Caracalla. Cramer assumes that it was a colony in the time of Antoninus Pius; but Caracalla was also called Antoninus, and this may be the cause of Cramer's mistake, if it is one. The coins have the epigraphs Col. Aug. Comana; and Col. Iul. Aug. Comanenoru, or Comaineru. [G. L.]

COMANIA (Κομανία), a place only mentioned by Xenophon (*Anab.* vii. 8. § 15). It appears to be not far from Pergamum in the basin of the Caïcus. [G. L.]

COMARIA (Κομαρία, Ptol. vii. 1. § 9), according to Ptolemy, a promontory and town in the S. part of *India intra Gangem*. There can be little doubt that this name is preserved in that of *Cape Comorin*, the most southern cape of the peninsula of Hindostan. [V.]

(Κομίδαva, Ptol. iii. 8. § 8), a town Sulzer (*Geschichte Daciens*, vol. i. near the remarkable fortress of d on a hill between the rivers *Bis- lava*. [E. B. J.]

(Κομλιον), a city of Samnium, the ich is very uncertain. There are, reasons to suppose that there were e same name. It is first mentioned —43) during the campaign of the Carvilius and Papirius in Samnium, Carvilius besieged Cominium, while ssailed Aquilonia. It appears from rrative of Livy that the two cities more than 20 miles apart, and both to Bovianum for the fugitives of the to find refuge in that city. Co- ken by Carvilius, and burnt to the x. 44.) Two years later Dionysius nium (evidently the same place) as ands of the Samnites, from whom it was taken by the consul Postumius Megellus, B.C. 291. (Dionys. Exc. xvi. 16, 17.) During the Second Punic War, on the other hand, Livy mentions a town which he calls "Cominium Ceritum," where Hanno received the news of the defeat of his army and the capture of his camp near Beneventum, B.C. 212. (Liv. xxv. 14.) It appears from his narrative that this place could hardly have been very distant from Beneventum, and it is at least a plausible conjecture that the modern town of *Cerreto*, about 16 miles NW. of Beneventum, represents the Cominium Ceritum of Livy. But it is very doubtful whether this is the same place with the Cominium mentioned in the earlier Samnite wars. Holstenius had suggested that this was to be sought in the Apennines near the sources of the Fibrenus; and later Italian topographers have shown that the names of "Cominum" and "territorium Cominense" are still found in medieval writers and documents in reference to the district of *Alvito*, just in this part of the mountains. Hence the ruins still visible at a place called *Santa Maria del Campo*, on the road from *Alvito* to *S. Donato*, and about 5 miles NW. of *Atina*, are supposed by Romanelli to be those of Cominium. (Holsten. *Not. ad Cluv.* p 223; Giovenazzi, *Sito di Aveja*, p. 50; Romanelli, vol. ii. pp. 496—500, iii. pp. 357—359.) This situation, however, appears too remote from Bovianum, and the position both of Cominium, and the Aquilonia connected with it, must still be regarded as undetermined. [AQUILONIA.]

The Comini mentioned by Pliny as an extinct community of the Acqui culi must be certainly distinct from either of the preceding. [E. H. B.]

COMISE'NE (Κομισηνή, Ptol. vi. 5. § 1; Strab. xi. p. 514), one of the divisions of Parthia, according to Ptolemy, adjoining Hyrcania. Isidorus Charax (p. 7) describes it as adjacent to Chosrene or Chorene, and as containing eight villages. Strabo would seem to place it in Armenia. It is not unlikely that a district he calls *Camisene* (xii. p. 559) may be the same as the Comisene of the other geographers. Its present name is said to be *Komis*. [V.]

COMMAGE'NE (Κομμαγηνή, Ptol. v. 15; Strab. xi. p. 521, xii. pp. 533, 535, xvi. p. 749; Plin. v. 12. s. 24; Tac. *Ann.* ii. 42), a district of Syria, lying to the N., bounded on the E. by the Euphrates, on the W. by Cilicia, and on the N. by Amanus. It was celebrated for its rich and fertile country (Strab. xii. p. 535; Tac. *Ann.* xv. 12), and was attached to the Syrian kingdom in the flourishing period of the Seleucidae. But in the civil wars of Grypus and his brothers, and in the disorders which followed, Commagene gradually acquired independence, and had its own sovereigns connected with the Seleucid family. It remained an independent kingdom for upwards of a century. It is only necessary to give here a list of the kings of Commagene; since a full account of them will be found in the *Dictionary of Biography* under each name: ANTIOCHUS I.; MITHRIDATES I.; ANTIOCHUS II.; MITHRIDATES II.; ANTIOCHUS III. After the death of Antiochus III. in A.D. 17, Commagene became for a short time a Roman province, but was afterwards given in A.D. 38 to the son of the late king ANTIOCHUS IV. In A.D. 73, it was again reduced to the condition of a province, and its capital SAMOSATA received the additional name of FLAVIA, and a new aera which commences with the year A.D. 71. (Eckhel, vol. iii. p. 252; Clinton, *F. R.* vol. i. p. 60; Suet. *Vesp.* 8; Eutrop. viii. 19; Oros. vii. 9.)

Digitized by Google

In later time this district, united with that of Cyrrhestica, received the name of Euphratensis (Amm. Marc. xiv. 8. § 7, xxiii. 6. § 21; Procop. *Aed.* ii. 8, *B. P.* i. 17, ii. 20), or Augusto-phratensis (Aurel. Vict. *Epit.* ix. 13), and was placed under a "praeses." Constantine made HIERAPOLIS the capital instead of Samosata (Malal. *Chron.* xiii. p. 317). In A. D. 543 the Persians under Chosroes made an inroad upon Euphratensis, intending to advance by that route upon Jerusalem, but were compelled to retreat by Belisarius. (Le Beau, *Bas Empire*, vol. ix. p. 68; Norisius, *de Epoch. Syro-Mac.* Diss. ii. c. 4; Clinton, *F. H.* vol. iii. p. 343; St. Martin, *Mém. sur l'Armenie*, vol. i. p. 193; Ritter, *Erdkunde*, vol. x. p. 929.) [E. B. J.]

COMMENASES (Κομμενάσης, Arrian, *Indic.* ii. 4), a large river which flowed into the Ganges. There has been some doubt with what modern river it can be identified, and Rennell, Mannert, and Forbiger, have held different opinions on the subject. On the whole, we are inclined to think that Forbiger is right in supposing it to be the *Gumty*, which enters the Ganges on its left bank, between *Benares* and *Ghazipur*. Rennell thought it was the Caramassa, and Mannert the Gogra. (Rennell, *Hindostan*; Mannert, vol. v. pt. 1, p. 70.) [V.]

COMMONI (Κομμονοί), the name of a Gallic, or perhaps Ligurian tribe, mentioned by Ptolemy (ii. 10). D'Anville supposes that they may have been a division or tribe of the Salyes. Nothing more is known of them. [G. L.]

COMMORIS, a town of the Eleutherocilices, which M. Cicero took during his proconsulship of Cilicia, in his campaign against the mountaineers of the Amanus (*ad Fam.* xv. 4, *ad Att.* v. 20), or the Amanienses, as he calls them in another passage (*ad Fam.* ii. 10). [G. L.]

COMPLEGA (Κομπλέγα), a city of the Celtiberi, in Hispania Tarraconensis, mentioned by Appian (*Hisp.* 42, 43). Its position is very uncertain. [P.S.]

COMPLEUTICA (*Itin. Ant.* p. 423; Κομπλούτικα, Ptol. ii. 6. § 39), a town of the Callaici Bracarii, in Hispania Tarraconensis, on the high road from Bracara to Asturica. [P. S.]

COMPLUTUM (*Alcalá de Henares*), a town of the Carpetani, in Hispania Tarraconensis, on the high road from Emerita to Caesaraugusta. (*Itin. Ant.* pp. 436, 438.) It was a *civitas stipendiaria*, and belonged to the *conventus* of Carthago Nova. (Plin. iii. 3. s. 4.) It is not certain whether it stood on the exact site of *Alcalá*, or on the hill of *Zulema*, on the opposite side of the river *Henares*. Its name has become famous in modern times for the Complutensian Polyglott, published at *Alcalá* under the auspices of Cardinal Ximenes. [P. S.]

COMPSA (Κῶμψα, Ptol.: *Eth.* Compsanus and Consanus: *Conza*), a considerable city of the Hirpini, situated near the sources of the Aufidus, and not far from the confines of Lucania, on which account Ptolemy reckons it as a Lucanian town. Livy, on the contrary, expressly assigns it to the Hirpini, and this is confirmed by Pliny; while the Liber Coloniarum erroneously includes it among the cities of Apulia. (Liv. xxiii. 1; Plin. iii. 11. s. 16; Ptol. iii. 1. § 70; *Lib. Colon.* p. 261.) From its position on a lofty eminence immediately above the valley of the Aufidus, it seems to have been a place of great strength, on which account Hannibal, to whom it opened its gates after the battle of Cannae (B.C. 216), deposited there his baggage and booty, while he himself advanced into Campania. It was, however, retaken by the Romans under Fabius Maximus two years afterwards, B. C. 214. (Liv. xxiv. 20.) According to Velleius Paterculus (ii. 68), it was in an attack on Compsa that Milo, the rival of Clodius, was killed; but this seems to be certainly a mistake, as that event is said by Cicero to have occurred at Cosa in Lucania. (Cic. *Mil.* iii. 22.) No further mention of Compsa occurs in history; but we learn from Cicero that it enjoyed in his time the rights of a municipium (*Verr.* v. 61, 63), and its continued municipal existence under the Roman empire is proved by inscriptions, in one of which it is called "Res Publica Cossana," so that the confusion between the two forms Cosa and Compsa seems to have been of very early date. In the passages also of Cicero just cited, the MSS. vary between *Consanus* and *Cossanus*, though, according to Zumpt and Orelli, the former reading is the best supported. The strength of its position rendered it a place of great importance in the middle ages, and in the 10th century it became the see of an archbishop, a rank which it still retains, though now but a poor decayed place with only 1100 inhabitants. The only ancient remains there are some inscriptions and sarcophagi of Roman date. (Romanelli, vol. ii. p. 356—358; Orell. *Inscr.* 3108, 3854; Gustavus, *Diz. Geogr.* vol. iv. p. 119.)

Livy mentions incidentally a temple "in agro Compsano," dedicated to Jupiter *Vicilinus*, an epithet otherwise unknown (xxiv. 44). According to a local antiquary, some remains of it were still visible at a spot named *Voghino* in the neighbourhood of *Conza*. (Romanelli, *l. c.*, p. 360.) [E. H. B.]

COMPSATUS (Κόμψατος), a river of Thrace, which flowing through Lake Bistonis emptied itself into the Aegean. (Herod. vii. 109.) [L. S.]

COMPULTERIA or COMBULTERIA (*Eth.* Compulterinus), a city of Samnium on the borders of Campania, situated on the right bank of the Vulturnus, between Calatia and Allifae. Livy mentions it among the cities of Samnium which had revolted to Hannibal, but were recovered by Fabius Maximus. (Liv. xxiii. 39, xxiv. 20.) We learn from coins that its Oscan name was Cupelteria; the coins themselves have KVPELTERNVM, which is the genitive plural of the Ethnic name. (Friedländer, *Oskisch. Mus.* p. 5.) Hence even in Latin inscriptions we find the various forms "Cubulteria, Cubulterini, Cupulterini," and are thus enabled to recognise the "Cubulterini" of Pliny (whom he enumerates in the first region of Italy, probably because they were on the right bank of the Vulturnus) as the people of Compulteria, though Livy expressly assigns that city to Samnium and not to Campania. The exact site of the ancient city was first pointed out by Pellegrini, on a small hill in the territory of *Alcignano*, to the left of the high road from *Caiazzo* to *Alife*, now occupied by the church of *S. Ferrante*. The numerous inscriptions which have been discovered on this spot leave no doubt of the correctness of its determination. One of these mentions a temple of Juno, on the ruins of which it is probable that the church of *S. Ferrante* has been erected. (Orell. *Inscr.* 681, 2418; Muratori, *Inscr.* p. 1040, nos. 1, 2; Romanelli, vol. ii. pp. 435—437; Pellegrini, *Discorsi della Campania*, vol. i. p. 429; Iorio, *Dissertazione sul Sito di Compulteria*, Napoli, 1834.) From others we learn that Compulteria must have been a flourishing municipal town at least as late as the reign of Hadrian; but we have no account of its subsequent history. [E. H. B.]

COMUM (Κῶμον: *Eth.* Κωμίτης, Comensis),

: inscriptions prove that it continued
ning municipal town, and one of these,
grammarian named Septicianus, shows
ts of Pliny to render it a school of
not altogether fruitless. (Orell. *Inscr.*
1197, 3898.) It was, however, more noted for its iron foundries, which were among the most celebrated in Italy. (Plin. xxxiv. 14. s. 41.) Its position at the southern end of the Lacus Larius, the fertile and beautiful shores of which were comprised, in great part at least, within its territory, must, in itself, have secured its prosperity: it was also the point from whence travellers, proceeding across the Rhaetian Alps, used to embark on the lake; a route which appears to have been one very much frequented during the latter ages of the Empire. (*Itin. Ant.* p. 279; Claudian. *B. Get.* 319; Cassiod. *Var.* xi. 14.) It appears to have retained its prosperity down to the close of the Roman Empire, and is still mentioned as a flourishing city under the Goths and Lombards. In the 4th century we find that a fleet was stationed there for the protection of the lake; and Cassiodorus speaks of it as one of the bulwarks of Italy in a military point of view, while he extols the beauty of its situation, and the richness of the villas or palaces with which the neighbouring shores were adorned. (Not. Dign. ii. p. 118; Cassiod. *l. c.*; P. Diac. v. 38.) Comum continued to be a city of importance in the middle ages, and is still a populous and flourishing place; but contains no remains of antiquity, except numerous inscriptions, several of which relate to the family of the two Plinies.

The Lacus Larius, now called the *Lake of Como*, was already under the Roman Empire sometimes termed Lacus Comacinus. (*Itin. Ant.* p. 278.) P. Diaconus (v. 38) calls it Comatianus Lacus. [E. H. B.]

CONANA (Κόναν**α**), a place in Pisidia, which is erroneously written Comana in Ptolemy (v. 5); for there are coins of this place of the Roman imperial period, with the epigraph Κοναν**ε**ων. The site is unknown. [G. L.]

CONCANGII, in Britain, mentioned in the Notitia as the station of a *Numerus Vigilum:* Identified with *Ken*-dal, in Westmoreland. [R.G.L.]

CONCANI. [CANTABRIA.]

CONCOBAR (Κογκοβάρ), a place in Media, with a temple of Artemis (Isidor. Char. p. 7; Tab. Peut.; Geogr. Rav.) It still retains its name, but slightly changed, *Kangawár*. [V.]

CONCO'RDIA, a Gallic town on the Rhine between Brocomagus (*Brumat*) and Noviomagus (*Speyer*), according to the Antonine Itin. D'Anville fixes Concordia at *Alt-stadt* on the *Lauter*, near *Weissenburg;* and Walckenaer at *Lauterburg*. The distances, as usual, do not completely agree; and the exact site cannot be ascertained. Schöpflin, a good authority, fixes it near *Weissenburg*. Chnodomarius, king of the Alemanni, who was defeated by Julian near Argentoratum, had his camp near Concordia, which was a Roman fort. (Amm. Marc. xvi. 12.) [G. L.]

CONCO'RDIA (Κογκορδία: *Eth.* Concordiensis: *Concordia*), a considerable city of Venetia, situated about 10 miles from the Adriatic, on the high road from Altinum to Aquileia, from each of which cities it was distant 31 Roman miles. (*Itin. Ant.* pp. 126, 128.) Both Pliny and Ptolemy notice it as a Roman colony, and we find it bearing on inscriptions the titles Colonia *Julia* Concordia, whence it seems probable that it was one of the colonies founded by Augustus to celebrate the restoration of peace. (Plin. iii. 18. s. 22; Ptol. iii. 1. § 29; Mel. ii. 4; Orell. *Inscr.* 4082; Gruter. *Inscr.* p. 365. 1, 549. 7; Zumpt, *de Colon.* p. 348.) It is reckoned by Strabo (v. p. 214) among the smaller towns of Venetia, but seems to have rapidly risen into importance, and is

Digitized by Google

repeatedly mentioned during the later ages of the Roman Empire, as one of the most considerable cities in this part of Italy. (Eutrop. viii. 10; Zosim. v. 37; Victor. *Epit.* 16.) In A. D. 452, it was taken and destroyed by Attila (*Hist. Miscell.* xv. p. 549), but seems to have been again partially inhabited at a later period (Cassiodor. *Var.* xii. 26), and retained its episcopal see throughout the middle ages, though most of the inhabitants migrated to *Caorle*, in the adjoining lagunes, as those of Altinum did to *Torcello*. It is now a mere village, with about 400 inhabitants, though still the nominal see of a bishop, who resides at the neighbouring town of *Porto Gruaro*, while *Concordia* retains the ancient site, as well as name, but has no remains of antiquity beyond a few inscriptions. It is situated on a small river, now called the *Lemene*, which appears to have been navigable in ancient times. (Strab. *l. c.*) This must be the same with the "flumen Romatinum" of Pliny, which he places between the Liquentia (*Livenza*) and Tilaventus (*Tagliamento*): it had a port of the same name at its mouth. [E. H. B.]

CONCO'RDIA JU'LIA. [NERTOBRIGA.]

CONDATE, is the name of several Gallic towns, situated at the angle formed by the junction of two rivers; from which it may be concluded that the Gallic term had a meaning which expressed this fact. The French names *Condat*, *Condé*, or *Cône*, appear to be various forms of Condate.

1. Condate (Κονδάτε: *Rennes*), is mentioned in the Antonine Itin. and in Ptolemy (ii. 8). It was the capital of the Redones, and in the Notitia it is named Civitas Redonum, whence has come the modern name. *Rennes* stands at the point where the *Vilaine* receives a small stream.

2. Another Condate is fixed by the Itin. on the road between Melodunum (*Melun*) and Agedincum (*Sens*). The place was at the junction of the *Yonne* and the *Seine*; but it is now named *Montereau*, a corruption of Monasteriolum.

3. A third is fixed by the Itin. between Noviomagus, the chief town of the Lexovii, and Durocasses (*Dreux*). This is *Condé*, on the *Iton*, at the junction of two branches of that river.

4. A fourth is fixed by the Itin. on the road from Augustodunum (*Autun*) to Paris. It is placed between Nevirnum (*Nevers*) and Brivodurum [BRIVODURUM]; and it corresponds to *Cosne*, at the confluence of the little river *Nouain* with the *Loire*.

5. The Table places another Condate on the road between Mediolanum Santonum or Santones (*Saintes*), and Vesunna or Petrocorii (*Perigueux*). *Cognac*, on the *Charente*, probably represents the ancient place.

6. Ausonius (*Ep.* v. 31) speaks of a Condatis portus:—

"Unus Domnotoni te litore perferet aestus
Condatem ad portum, si modo deproperes."

D'Anville supposes this place to be represented by *Condat*, an old castle near *Libourne*, which town is at the junction of the *L'Isle* and the *Dordogne*; nearly due east of *Bordeaux*.

7. The Table places another Condate in the country of the Gabali, west of the Cevenna, and on the road from Anderitum [ANDERITUM] to Revessium. The site is uncertain; but we may certainly assume that it was on the Elaver (*Allier*), which is crossed on the road between Anderitum and Revessium.

8. The Table places a Condate between Etanna (*Yenne*), on the Rhone, and Geneva. The site is supposed to be *Seissel*, at the junction of the *Séran* and the *Rhone*, in the territory of the Allobroges and the Provincia or Gallia Narbonensis. [G. L.]

CONDATE, in Britain, mentioned twice in the Itinerary; firstly, as being 18 miles from Mancunium (*Manchester*), and 20 from Deva (*Chester*); secondly, as 18 miles from Mancunium, and 18 from Mediolanum. A good measure of the circuitous character of the lines of the Itinerary is to be seen in the comparison of these two notices. The Mediolanum, which in the tenth Itinerary is said to be eighteen miles from Condate, in the second case is thus: CONDATE—DEVA M. P. XX.; BOVIO M. P. X.; MEDIOLANO M. P. XX. With these numbers, assuming their absolute correctness, it would not be difficult to fix the locality of Condate, if that of Mediolanum were certain. This, however, is scarcely the case. *Congleton*, in Cheshire, on the strength of the partial similarity of name, has been claimed as the representative of Condate; and—with the assumption that Mediolanum = *Drayton* in Shropshire—*Northwich*, on the strength of the brine. This latter view is Horsley's. The present writer favours a notion of Dr. Tilsted's that *Condate* was for name, is *Kinderton*, near Middlewich. [R. G. L.]

CONDATOMAGUS, another example of a name Condate, with the addition of *mag*, a common Gallic ending. The Table places Condatomagus between Segodunum or Ruteni (*Rodez*) and Lactora (*Lodève*), which was within the limits of the Provincia or Gallia Narbonensis. The site cannot be ascertained, but we may assume that it is on one of the rivers that are crossed on the road from *Rodez* to *Lodève*. [G. L.]

CONDERATES, are only known from a Roman inscription, which records that the boatmen (*nautae*) of the *Saône* and the *Loire*, and also the boatmen of the *Arconée* and the Conderates, dedicated a funeral monument to the memory of their patron Tauricius Florens. The inscription is as follows: D. M. Tauricio. Florenti Taurici. Tauricianis Veneto. allectori. Galliae patrono nautarum Araricorum et Legyricor. Item Arecearorum et Conderatium. Provinciae Galliae. Their position is represented by *Condrieu* on the west side of the *Rhone*, about ten miles below *Vienne*. *Condrieu* is still a small port on the *Rhone*, partly inhabited by people well skilled in the navigation of the river, and by carpenters who build boats. "Allector" is explained by Muratori to be "tributorum susceptor," a tax-collector. Forcellini has an article on the word.

The name Conderates implies a place Conderate, or something like it; and this is another example of the element *Cond* in Gallic names. [CONDATE.] (Walckenaer, *Géog., &c.*, vol. i. p. 337.) [G. L.]

CONDERCUM, in Britain. The station of the first wing of the Asti, according to the Notitia. Generally identified as the *Benwell Hill* in Northumberland. [R. G. L.]

CONDIVICNUM, or (Κονδιουίκνιον) CONDIVINCUM, according to Ptolemy (ii. 8), was the name of the capital of the Nannetes or Namnetes, a Celtic people on the lower *Loire*, and on the north side. The name appears to be compounded of the Celtic word *Cond* and another name. The town of *Nantes* represents Condivicnum. The old town of *Nantes* was nearly comprised in the angle formed by the junction of the *Erdre* with the *Loire*. Condivicnum was known to the Romans at an early period

Digitized by Google

oman inscriptions found there, one, ied, contains the name of the em- ius Caesar; and another contains o Claudius Caesar Augustus Ger- (*B. There long the north bank of the Loire (*Angers*) to *Nantes*. A Roman *Nantes* NW. through Dariorigum scribate (*Brest*). All these routes ition of the Portus Namnetum, and of importance. Parts of the Ro- *Nantes* and *Vannes* are said to be [G. L.]

TES (Κονδοχάτης, Arrian, *Indic.* 22), a river which flowed into the s, according to Pliny, navigable. ers are agreed that it is now repre- *nduk*. [V.]

The Condrusi are mentioned by 4) with other tribes, as called by e of Germani. They were within Belgae of Caesar, and joined the ederation to oppose the Roman pro- '). The Condrusi and Eburones n the Treviri (*B. G.* iv. 6.) The e territory of the Eburones was (*Maas*) and the *Rhine*, and their e north were the Menapii. The si were between the Eburones and osition is therefore fixed. A docu- le ages places the Comitatus Con- rustus, between the Arduennenses ; and the Ripuarii were on the a district in the *Pays de Liège* oz or *Condrost*, east of the *Maas*. that the archdeaconry of *Condroz*, of Liège, is "along the *Maas*, on *Ourthe*," which is not quite clear. es the Condrusi extend on the east from *Liège* to *Dinant*. *Huy*, on the *Maas*, about half way between r, is the chief place in *Condroz*.

in Thessaly, is mentioned by Livy r fortresses which defended Tempe. It was also called Gonno-Condylon, he towns of the Perrhaebi. (Liv. ke places it on the left bank of the *Salamúr* and the ascent to *Ráptani*. *n Greece*, vol. iii. p. 397.)

CA (*Leynas*, S. of *Coimbra*), a city the high road from Olisipo to Bra- p. 421; Plin. iv. 35; Phleg. Trall. [P. S.]

TES (*Coblenz*), a town in Gallia, f the *Rhine* and *Mosel*, is first men- ius. [Ambiatinus.] Ammianus s it as a place "ubi amnis Mosella no." This description and the name prove the position of Con- is said that there is not a trace of on the spot. The Antonine Itin., he Notitia also mention the place, been an important position on the

ot mention Confluentes under any he mention the *Mosel*, unless he means this river by the words "ad confluentem Mosae et Rheni" (*B. G.* iv. 15); and that he does mean the junction of the *Mosel* and *Rhine* seems to be quite clear from the narrative of his attack on the Germans and their defeat. Confluentes was in the territory of the Treviri, as we may collect from Caesar; and a middle age authority, quoted by D'Anville, says "Cophelince urbs, Treviricae civitatis archiepiscopi."

The term "confluentes" was used by the Romans to express the junction of two rivers, as in Livy (iv. 17).

There is a *Coblenz* in Switzerland in the canton of *Aargau*, at the junction of the Aar and the Rhine. It is said that many Roman antiquities have been found here; and we may infer that the Roman name of the place was Confluentes. [G. L.]

CONGAVATA, in Britain, mentioned in the Notitia as the station of the Second Cohort of the Lergi. Generally identified with *Stanwix* in Cumberland. [R. G. L.]

CO'NGEDUS (*Codes*), a tributary of the Iberus, near Bilbilis, mentioned by Martial (*Epig.* i. 50). [P. S.]

CONGUSTUS (Κόγγουστος), a place in Galatia, mentioned by Ptolemy (v. 4), and apparently the Congusso of the Table, which it places on a road from Amorium to Salaberina. [G. L.]

CONIACI. [Colchi Indiae.]

CONI'ACI, CONISCI. [Cantabria.]

CO'NII or CUNEI (Κούνοι, Appian, *Hisp.* 57; Κόνιοι, Polyb. x. 7. § 5), a people in the S. of Lusitania, W. of the Pillars of Hercules and of Baetica, with a capital city called Conistorgis or Conistorsis. (Strab. iii. p. 141.) They may perhaps be identified with the Κυνήσιοι, whom Herodotus makes the westernmost people of the whole earth (ii. 33, iv. 49). They dwelt in that part of Lusitania which the Romans called Cuneus, a name appropriate to the shape of the land, and thus furnishing one of the many examples in which the etymological significance of a name coincides accidentally with its historical usage. [P. S.]

CONISTORGIS, CONISTORSIS. [Conii.]

CONNI, in Phrygia Magna, is placed by the Table between Eucarpia and Nacolea, 32 miles from Eucarpia and 40 from Nacolea. Pliny (v. 32) means this place when he speaks of Conium, and Ptolemy (v. 2) has it Conna. Harduin observes on the passage of Pliny (v. 32) that the old reading was Iconium. Under the Byzantine empire Cenna was called Cone, and was a bishopric of Phrygia Salutaris, of which Synnada was the metropolis. It is very difficult to fix the position of this place from the Table and from Ptolemy. Leake supposes that Conni may be "not far to the southward of *Altun Tash*, near where the roads to *Altun Tash*, both from *Karahissár* and from *Sandukli*, cross the ancient road." (Leake, *Asia Minor*, p. 166.) *Altun Tash* is a little north of 39° N. lat., and due south of *Kutahiyah*. [G. L.]

CONO'PE, afterwards ARSI'NOE (Κωνώπη: *Eth.* Κωνωπεύς, Κωνωπίτης, Κωνωπαῖος: Ἀρσινόη: *Eth.* Ἀρσινοίτης, Ἀρσινοεύς: *Anghelokastro*), a town of Aetolia, near the eastern bank of the Achelous, and 20 stadia from the ford of this river. It was only a village, till it was enlarged by Arsinoë, the wife and sister of Ptolemy Philadelphus. Polybius, in his history of the Social War (B. C. 220—217), calls it Conope, though elsewhere he calls it Arsinoë or Arsinoia (Ἀρσινόη). It is mentioned by Cicero under the name of Arsinoë. Near this town the

Digitized by Google

river Cyathus flowed into the Achelous from the lake Hyria, which is also called Conope by Antoninus Liberalis. (Strab. p. 460; Pol. iv. 64, v. 6, 7, 13, ix. 45, xxx. 14; Cic. *c. Pis.* 37; Antonin. Lib. 12; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. i. p. 152.) [AETOLIA, p. 64, a.]

CONOPEIUM (Κωνωπεῖον or Κονώπιον). East of the mouth of the Halys, Arrian (p. 16) mentions a marsh and port Naustathmus, 90 stadia from the Halys, or 120 according to Marcian. Fifty stadia further along the coast Arrian places Conopeium, a marsh. The site seems to be *Koumjaus*, on the coast SE. of the mouth of the Halys or *Kizil Irmak*. Hamilton (*Researches*, vol. i. p. 293) makes Conopeium 16 miles from Amisus (*Samsun*), which is to the south, and about 5 miles from Naustathmus, which is to the north. [G. L.]

CONO'VIUM, in Britain, one of the four places of the eleventh Itinerary, Segovium, Varis, and Deva being the other three; probably *Conway*. [R. G. L.]

CONSA'BRUM. [CARPETANI.]

CONSE'NTIA (Κωσεντία, Appian; Κωσεντία, Strab.; Κονσεντία, Ptol.: *Eth.* Consentinus: *Cosenza*), an inland city of Bruttium, situated on a hill rising above the valley of the Crathis, near the sources of that river. Strabo calls it the metropolis of the Bruttians (vi. p. 256); and it appears to have been from an early period the most considerable town belonging to that people, as distinguished from the Greek cities on the coast. It first appears in history during the expedition of Alexander, king of Epeirus, and Livy mentions it among the places taken by that monarch; but this seems to be a mistake, as it was still in the hands of the enemy at the time of his death, which took place near Pandosia, in the same part of Bruttium: after that event his mutilated remains were sent to Consentia, and interred there. (Liv. viii. 24.) During the Second Punic War, Consentia at first held aloof from the rest of the Bruttians, when they espoused the alliance of Hannibal; but it was soon after reduced by the Carthaginian general Himilco. (Id. xxiii. 30.) Three years later (B.C. 213) the Consentini are mentioned as returning to the Roman alliance; but notwithstanding this statement, we find them again appearing among the cities hostile to Rome, and it was not till B.C. 204 that Consentia, together with Pandosia and Clampetia, was reduced or compelled to submit. (Liv. xxv. 1, xxviii. 11, xxix. 38, xxx. 19; Appian, *Annib.* 56.) Appian calls it at this time a large city: it appears to have been less severely treated than most of the Bruttian towns, and continued to be a place of importance. Lucilius alludes to the Consentini as possessing superior refinement to the rest of the Bruttians, and more on a par with the Sicilians and Tarentines. (Lucil. ap. Cic. *de Fin.* i. 3.) It is mentioned as a town of importance during the war of Spartacus (Oros. v. 24), and in B.C. 40 it was besieged for some time by Sextus Pompeius, but without success. (Appian, *B. C.* v. 56, 58.) Under Augustus it received a body of colonists, and continued to enjoy municipal rights under the Roman empire, but did not rank as a colony. (Plin. iii. 5. s. 10; Ptol. iii. 1. § 74; Lib. Colon. p. 209.) Its territory was noted for its apple-trees, which bore fruit twice a year. (Varr. *R. R.* i. 7. § 6.) Towards the close of the Roman empire, Consentia is again mentioned in history as the scene of the death of Alaric, who had made it his head-quarters, while planning a descent upon Sicily, a few months only after the capture of Rome, A.D. 410. He was buried in the bed of a little river or torrent, which falls into the Crathis, near Consentia. This is now called the *Busento*: the ancient name is variously written Basentus, Bascetius, and by Jornandes Basentinus. (Jornand. *R. Get.* 30; P. Diac. *Hist. Miscell.* xiii. p. 535.) Consentia continued to be a place of importance through the middle ages: and the modern city of *Cosenza* is still the capital of the province of *Calabria Citra*.

Consentia stood on the line of the high road which led through Bruttium from Muranum, in Lucania, to Rhegium. The Itinerary places it 49 M.P. from Muranum, and 57 from Vibo Valentia: and these distances are confirmed by a remarkable inscription found at *Polla* (the ancient Forum Popilii), in which, as well as in the Tab. Peut., the name is written Cosentia. (*Itin. Ant.* p. 110; Orell. Inscr. 3308; Mommsen, *Inscr. Neap.* 6276.) [E. H. B.]

CONSILI'NUM or COSILI'NUM, a town of Lucania, mentioned only in the Liber Coloniarum, which enumerates it among the Praefecturae of that province (p. 209), and by Cassiodorus (*Varr.* viii. 33), who calls it "antiquissima civitas." We learn from the latter that a great fair was held every year in a suburb of the town, to which he gives the name of Marcilianum. This is in all probability the same place called in the Itinerary Marcelliana (*Itin. Ant.* p. 110), and a local antiquary has pointed out a spot still called *Marciliana*, between *La Sala* and *Padula*, in the valley of the *Tanagro*, where there is a remarkable fountain, corresponding to one mentioned by Cassiodorus. The situation of Consilinum is said to be indicated by some ruins on a hill near *Padula*. (Romanelli, vol. i. pp. 405—409.) [E. H. B.]

CONSORANI, enumerated by Pliny (iv. 19) among the peoples of Aquitania. He mentions them between the Tarnates and Ausci. In another place, where he is describing the Narbonensis Provincia (iii. 4), he says, "In ora regio Sardonum, intus Consuaranorum." The Consorani seem to have occupied the country called *Conserans* or *Couserans* at the base of the Pyrenees, between *Bigorre* and *Foix*. The names Consoranni and Consuarani appear to be the same, and yet Pliny assigns one people to Aquitania, and the other to Narbonensis. The conclusion is, that, according to the divisions of Pliny's time, part of the Consorani were within Aquitania, and part within Narbonensis. We have an instance like this in the case of the Ruteni, who in Caesar's time were divided into Ruteni Provinciales in the Provincia, and Ruteni beyond the limits of the Provincia. It is probable that before the time of Augustus all the Consorani were in the Narbonensis. The modern *St. Lizier*, in the department of *Ariege*, was within the limits of the Consorani. [G. L.]

CONSTA'NTIA or CONSTANTI'NA (Κωνσταντία, Hier. p. 714; Κωνσταντῖνα, Suid., Steph. B. *s. v. Nicephorium*; Procop. *B. P.* ii. 13; Amm. Marc. xviii. 7), a town of some importance in Mesopotamia, on the road between Nisibis and Carrhae, at no distance from Edessa, which, after his expulsion from Nisibis, was the residence of the Persian Sapotamiae till the foundation of Dara (Procop. *de Aed.* ii. 5). There is considerable variation in different authors in the way in which the name of this town is written. Stephanus B. calls it Constantina, and states that it was another name for Nicephorium; Suidas, Constantina and Constantea, which latter form occurs also in the Itinerary of Hierosolyma. In the Excerpt. Procop. ap. Photium, it is called

also in the Notit. Imp. Roman. under potamiae. Evagrius (*H. E.* i.) en- as Κωνσταντιναίων Ἐπισκόπων, and e bishops who subscribed the Council e is called Bishop of Constantinopolis of Osrhoene. It appears to have borne s Antoninopolis and Maximianopolis, entury, to have been nearly destroyed ke, but to have been rebuilt by Con- ron. Edess. ap. Asseman. *Bibl. Or.* i. , *Chron.* xii. p. 312.) [V.]

TIA (*Coutances*), a place in the NW. h Ammianus (xv. 11) calls Castra the Notitia the Civitas Constantia s being in Lugdunensis Secunda. A assigns the foundation of this place Chlorus, the father of Constantine. s that the Sequana (*Seine*) enters the ntia; but his geography of Gallia is The name of the Pagus Constantinus f the name *Cótantin*, which in the ary geography of France designated which *Coutances* is situated. [G.L.]

TINO'POLIS, the capital of the Lower ounded by Constantine the Great on ancient Byzantium.

History of Byzantium.

(Βυζάντιον: *Eth.* Βυζάντιος, Byzan- ντιακός, Βυζαντιάς, Βυζαντίς, Βυζαν- ειανός). The foundation of this city o the Megarians in B.C. 667, a few an its neighbour Chalcedon (Euseb. on, *F. H.* vol. i. p. 194) on the site d Lygos (Plin. iv. 18; Auson. *Clar.* n B.C. 628 a second colony was sent ris under Zeuxippus. (Lydus *de Mag.* Clinton, *F. H.* vol. i. p. 208.) The f the worship of Hera (whose temple at Argos was on the citadel), and the erning Io confirm the general asser- ins of Miletus that the Argives had foundation of the city. (Müller, *Dor.* trans.) Byzantium was situated at e triangle which faces the shores of s the waters of the Thracian Bosporus. Apollo which commanded the colonists new city opposite to the "land of the g to the superiority of the site of By- t of Chalcedon (Herod. iv. 144; Strab. ac. *Ann.* xii. 63) did not compromise r of the Pythoness by its advice. Few oast so magnificent a position: com- wo opposite shores of Europe and Asia, dvantages of security and great faci- , with the choicest gifts of nature, and ingly picturesque scenery. (Polyb. iv. . 30.) On the S. it was bathed by the Propontis, on the N. by those of lorn (τὸ κέρας). The river Lycus his arm of the Bosporus a perpetual sh water, which cleansed the bottom, retreat for the periodical shoals of fish, especially of the Pelamys kind, which come down from the Palus Maeotis, and round by the E. and S. coast of the Euxine into the channel (Strab. *l. c.*). This fishery employed and supported a large number of the poorer class of freemen. (Arist. *Pol.* iv. 4. § 1.) The fish was salted and became an article of considerable traffic, and the harbour obtained its epithet of golden from the riches derived from this source. (Plin. ix. 20.) The port, which is about 7 miles in length, was both secure and capacious; and as the tide is scarcely felt, the constant depth of the water allowed vessels to land their goods conveniently, as the largest ships might rest their heads against the houses, while their sterns float in the water. (Procop. *de Aed.* i. 5.) As the key of the Euxine and the Aegean no vessel could pass from the one sea to the other without the leave of the people of Byzantium, who gained a considerable revenue from the duties they levied on the corn-ships which passed in and out from the Euxine. (Polyb. iv. 38.)

In the reign of Dareius Hystaspis, Byzantium was taken by Otanes, general of the forces on the coast of Thrace. (Herod. v. 26.) Afterwards, it sided with the Ionians in their revolt (Herod. v. 103), but on the arrival of the Phoenician fleet the inhabitants, without even waiting for it, fled to Mesambria. (Herod. vi. 33.) Pausanias, after the battle of Plataea, wrested it from the Medes. (Thuc. i. 94.) And hence Justin (ix. 1. § 3) calls him the founder of Byzantium. After an interval of 7 years Cimon obtained it for the Athenians. (Diod. xi. 60; Plut. *Cim.* 5; Thuc. i. 131.) In 440, the Byzantines joined the Samians and revolted from Athens, but afterwards submitted. (Thuc. i. 117.) In 416, in common with the Chalcedonians, they made an expedition into Bithynia, and perpetrated great cruelties. (Diod. xii. 82.) In 408, Byzantium was besieged by the united forces of the Athenians under Alcibiades, a wall of circumvallation was drawn around it, and various attacks made by missiles and battering engines. These had no effect upon the Lacedaemonian garrison; but when the blockade was strictly kept up, and the population were dying of hunger, in the absence of Clearchus the Spartan commander, Cydon and a Byzantine party opened the gates by night and admitted the Athenians into the wide inner square called the Thrakion. Favourable terms were granted to the town, which was replaced in its condition of a dependent ally upon Athens. (Xen. *Hell.* i. 3. § 15—22; Diod. xiii. 67; Plut. *Alcib.* 31; Frontin. iii. 2. § 3; Polyaen. i. 48. § 2.) In 405, after the battle of Aegos-Potami, Lysander recaptured Byzantium, and placed Sthenelaus there as "harmost" with a garrison (Xen. *Hell.* ii. 2. § 2.). It was under the power of the Lacedaemonians when the Ten Thousand made their retreat; in consequence of the fraud and harsh dealing of the Admiral Anaxibius, the soldiers were exasperated, became masters of the town, and Byzantium would have been sacked had it not been for the energy and eloquence of Xenophon. (*Anab.* vii. i. §§ 5—32.) In 390, Thrasybulus changed the government of Byzantium, which was already in alliance with Athens, from an oligarchy into a democracy, and sold the tenths of the merchant vessels sailing out of the Euxine. (Xen. *Hell.* iv. 8. §§ 25—27.) In 363, Epaminondas visited Byzantium, drove off Laches with the Athenian squadron, and prevailed upon several of the allies of Athens to declare in his favour. (Isocr. *Orat. v. Philip.* 53; Diod. xv. 79.)

Digitized by Google

In 356, Byzantium, along with Rhodes and Chios, united with the newly-flourishing commonwealth of Cos, and Mausolus king of Caria, in an endeavour to throw off the Athenian dominion: an engagement which was to have taken place by sea, was prevented by a storm. (Diod. xvi. 21.) In 340, the Athenians, urged on by Demosthenes, sent succours to Byzantium, which was besieged by Philip; the combined fleet under the command of Chares met Amyntas and the Macedonian ships, and were defeated. In the following year Chares was superseded by Phocion, when the Athenians behaved with such moderation to their allies, and showed so much courage against the besiegers, that Philip was compelled to raise the siege. (Diod. xvi. 77; Plut. *Phoc.* 14.) During this memorable attack, on a dark night when the Macedonians were on the point of seizing upon the town, a light appeared in the heavens and revealed to the inhabitants their danger. (Steph. B. *s. v.* Βόσπορος; Eustath. *ad Dionys.* 143.) Hesychius the Milesian, who tells the same story, adds that an image in honour of this interference was erected to Torch-bearing Hecate. The crescent, which is found on Byzantine coins (Mionnet, *Descr. des Med.* vol. i. p. 378), and which was adopted by the Turks as their device after the capture of Constantinople (comp. Von Hammer, *Gesch. der Osman*, vol. i. p. 93) is supposed to commemorate the portent. This repulse to the successful career of Philip was one of the proudest feats of the great orator, and in his speech upon the crown Demosthenes often recurs to it. The Byzantines, in gratitude for the valuable assistance they had received, decreed to the Athenians the right of isopolity, the extraordinary privilege of precedence at games and public ceremonies, with exemption from compulsory "liturgies." The decree, which with all the original Dorisms is preserved in Demosthenes (*de Cor.* p. 255), directed that in perpetual memory of the benefit, 3 statues each 16 cubits high, representing the people of Byzantium and Perinthus crowning the Athenians, should be placed in a public part of the city.

The Byzantines were afterwards engaged in perpetual warfare with the neighbouring barbarians, and were unable to keep them off either by resistance or tribute. To crown the other evils of war, their harvests were either carried off or destroyed by the enemy, till, in 279, they agreed to pay the Gauls a yearly tribute of 3000, 5000, and 10,000 pieces of gold, and at last the large sum of 80 talents, on condition that their lands should not be ravaged. (Polyb. iv. 46; Liv xxxviii. 16; Böckh, *Econ. of Athens*, p. 595, trans.) Their sufferings in this respect compelled them to have recourse to many extraordinary measures for procuring money, and finally to the imposition of the transit duties which involved them in the war with Rhodes. Still, during this time, while suffering the penalty of Tantalus (Polyb. *l. c.*), they enjoyed municipal independence. (Diod. xix. 77.) In this war Byzantium was supported by Attalus, king of Pergamus. Prusias, king of Bithynia, was a partizan of Rhodes, and the Byzantines endeavoured to set up Tiboetes, an uncle of Prusias, as rival for his throne. Prusias seized on their Asiatic possessions, while the Thracians pressed hard upon them on the European side; and in 219 a peace, under the mediation of the Gallo-Grecian king Cavarus, was concluded on very unfavourable terms for Byzantium. (Polyb. iv. 46—52.) While Rome was contending against the pseudo-Philip of Macedon, Antiochus, and Mithridates, it granted to Byzantium, for good services rendered on the occasion, the rank of a free and confederate city. Disputes arose, and an appeal was made to Rome, which resulted in a decree, proposed by Clodius, and put in force by Piso, who exhibited himself rather as a conqueror than an ally and magistrate. (Cic. *de Prov. Consul.* 2—4; Tac. *Ann.* xii. 62.) It appears that Claudius remitted the tribute Byzantium had to pay, for five years, in consequence of the losses of the Thracian war (Tac. *Ann.* xii. 63), and that Vespasian stripped it of its privileges, and reduced it to the condition of a Roman province. (Suet. *Vesp.* 8.) In the civil wars between Severus and Pescennius Niger, Byzantium took the part of the latter, and after a resistance of three years, was taken in 196. Severus treated the inhabitants with his usual indifference to human life or suffering. The famous walls of massive square stones, so well fastened together by iron bolts that the whole seemed to be one block, were levelled with the earth. The senators and magistrates were put to death, the property of the citizens confiscated, and the town itself, deprived of all political existence (τὸ δίκαιμα τὸ πολιτικὸν), made over to the Perinthians. (Dion Cass. lxxv. 6—14; Herodian, iii. 1—7; Zosim. i. 8.) Severus afterwards relented, and, visiting Byzantium, embellished the town with magnificent baths, porticoes round the Hippodrome, and other buildings. The name of Augusta Antonina was given it, in honour of Antoninus Bassianus. (Suid. *s. v.* Σεβῆρος: Zosim. ii. 30; Cedren. p. 252.) Caracalla restored to the inhabitants their rights and franchises. (Spartian. *Caracall.* 1.) It is remarked by Gibbon (*Decl. and Fall*, vol. i. p. 205), that the charge against Severus of having deprived the Roman people of the strongest bulwark against the barbarians of Persia and Asia, was but too well justified when, in the succeeding age, the fleets of the Goths covered the Euxine, and passed through the undefended Bosporus into the centre of the Mediterranean. The soldiers of Gallienus massacred most of the citizens, and not one old family remained in later times except those who had previously left the town. (Trebell. Poll. *Gallien.* 6.) Under Claudius II. the remainder of the Byzantines fought bravely against the Goths. (Trebell. Poll. *Claud.* 9.) In the civil wars which succeeded the abdication of Diocletian, the fortifications of Byzantium had been strengthened. Licinius, after the battle of Adrianople, retired to this stronghold; Constantine pursued the siege so vigorously, by constructing mounds of an equal height with the ramparts, and erecting towers upon their foundation, from which the besieged were galled by large stones and darts hurled by engines, that the town at length surrendered.

The constitution of Byzantium was at first royal, though there is some doubt about this, as Hesychius the Milesian calls Dineus general of the Byzantines (Müller, *Dor.* vol. ii. p. 174, trans.) It afterwards became an aristocracy,—the native inhabitants, the Bithynians, being in precisely the same condition as the Helots. (Phylarch. *ap. Athen.* vi. p. 271.) The oligarchy which succeeded was, in 390, changed into a democracy by Thrasybulus the Athenian: and equal privileges were at the same time probably granted to the new citizens, who, on account of their demands, had been driven from the city by the ancient colonists. (Arist. *Pol.* v. 2. § 10.) After this the democracy seems to have continued for a long time. (Theopomp. *ap. Athen.* xii. p. 256.) In the document quoted by Demosthenes (*de Cor.* *l. c.*)

N OF BYZANTIUM.

II. Foundation of Constantinople.

It was upon this gently sloping promontory, which serves as a connecting link between the Eastern and the Western world, and which nature has intended for the centre of a great monarchy, that Constantine, after determining to remove the seat of empire from the banks of the Tiber, determined to fix the city which bore the name of its founder. The modern European, as well as the Arabic (*Constanije*) name of the city, preserves the memory of the first emperor of the East. The Turkish *Istambul* or *Stambul*, is a corruption of the Greek εἰς τὴν πόλιν. Like the ancient mistress of the world, its foundations were to be laid upon seven hills, and the emperor called it the New Rome,—a title which he confirmed by a law, engraved on a column of marble, in a place called the *Strategion;* but, however much his capital might outwardly resemble the elder Rome, it was not permitted to bear the name of the Eternal City.

The foundations of the city were laid according to an Imperial edict (Theodos. *Cod.* xiii. 5. s. 7), in obedience to the commands of Heaven. On foot with a lance in his hand, the emperor led a stately procession which was to mark the boundaries of Constantinople. As he did not pause, the attendants, astonished at the enormous size of the future capital, asked him how far he intended to advance. Constantine replied "when He that goes before me shall stop." (Philostorg. ii. 9.) At a later period, the honour of having inspired the choice of a founder was attributed to the Virgin Mother, who became the tutelary guardian of the city. Constantinople arose, if not a Christian, certainly not a Pagan city. The ceremonial of the dedication exhibited that strange compound of religions of which Constantine himself was a type. After a most splendid exhibition of chariot games in the Hippodrome, the emperor was carried in a magnificent car through the most public part of the city, surrounded by his guards, in the attire of some religious ceremonial with torches in their hands. The emperor bore a golden statue of the Fortune of the city in his hands. The rites of inauguration lasted forty days, though the 11th of May, A. D. 330, is considered as the birth-day of the city.

III. Extent, Limits, and Population.

The walls of Constantine across the enlarged breadth of the triangle, were begun at a distance of 15 stadia from the old fortifications, and stretching from the port to the Propontis, enclosed five out of the seven hills upon which the city stood, but were not finished before the reign of Constantius. In 401, Arcadius repaired these walls which had fallen in the earthquake that had taken place in that year. In 413, during the minority of Theodosius II., Anthemius, the Praetorian praefect, razed the old fortifications and built a new inclosure of walls. In 447 this was thrown down by an earthquake, and rebuilt in three months by the diligence of the praefect Cyrus. This double line of strong and lofty stone walls have, except on the land side, almost disappeared, but in a dilapidated state they still exist, extending from the port to the sea of Marmora for about 4 English miles, presenting magnificent and picturesque specimens of mural ruins. The wall was flanked at short intervals by towers, mostly rectangular. The extreme length of the city at this period, and it never to any great extent exceeded these limits, was about 3 M. P.,

Digitized by Google

and the circuit rather less than 13 M. P. The Sycae, or fig trees, formed the thirteenth region beyond the harbour, and were much embellished by Justinian. The suburb of Blachernae was not taken into the city till the reign of Heraclius. Constantine had been most anxious to have his capital frequented: he summoned senators from Rome, and, according to the vague expression of Eusebius, drained other cities in its behalf, yet its population never became considerable when compared with ancient Rome, and modern capitals. By far the larger part of the inhabitants were Christians, but these were not estimated by Chrysostom (*In Act. Apost.* hom. xi. vol. ix. p. 108) at more than 100 000.

IV. History.

Were it even possible in any form which could be useful to the reader to trace the fortunes of the Lower Empire, within the limited space of an article like this, a sketch of Byzantine history would not fall within the province of a work, which confines itself to the age of Grecian and Roman civilisation. But as the topography of the city can hardly be understood without some knowledge of the facts of the history being presupposed, it has been thought advisable to subjoin a short summary of the most memorable events connected with Constantinople itself.

The city of Constantine, the birth of an elder and effete age, has throughout its long history borne the stamp of its parentage, and displayed the vices of its original conformation. The position of the Byzantine empire is unique; geographically it was European, but nationally it reflected the Oriental type of character. It had indeed Roman blood, but the people who had sprung from the loins of Mars, and were suckled by the she-wolf, gave it little but their name. It did not speak their tongue, and was completely severed from the old republican associations and free spirit which still survived the fall of Roman liberty. The despotism of the court of Constantinople could not endure even the forms of free institutions, and the relics of municipal privileges which inherited from Rome have had so much influence in moulding the law and constitution of modern Europe. The Caesar of the East was the counterpart of his Moslem conqueror, and the change from the Proto Sebast to the Sultan would have been one simply of name, had it not been for the superior energy and virtues of the first Osmanli princes. The one like the other had his viziers, his janissaries, his slaves, and his eunuchs alternately cajoling and tyrannizing over prince and people. Through the dreary monotony of the history of the Eastern empire, so deficient in moral and political interest, there are always coming into view the characteristic features of Asiatic tyranny:—the domestic treason,—the prince born in the purple,—the unnatural queen-mother,—the son or the brothers murdered or blinded,—the sudden revolutions of the throne,—the deposition of the sovereign, but the government remaining the same,—and the people careless as to who or what their tyrant might be. Every thing by which a people can outwardly show what is within—literature, art, and architecture, displays the influence of the East. The literature learned, artificial, florid, but deficient in elegance and grace, and without a spark of genius to illumine it. The art but the figure of their ceremonial life, deficient in all deep and sincere feeling, and showing, under the hardness of the shape, and the meanness of the expression, the dull and slavish constraint to which it was subject. A purer faith had never freed the later Greeks from the degradation of the seraglio, had given an impulse to intellectual development, and infused a sense of the responsibilities of power to which their Ottoman conquerors were strangers. But even Christianity failed to reconcile the conflicting elements and hostile influences of the East and West, and was itself penetrated by an admixture of Oriental thought and sentiment. And in later times, after the severance of Constantinople from the Latin Communion, the rest of Europe had no sympathy for what was considered an alien creed. Standing in this isolated position on the very outposts of Western civilisation, and cut off from that by differences of language, manners, and religion, Constantinople, unable to comprehend but rather despising that vigorous Teuton stock upon which the elder races were engrafted, did not incorporate any of those elements which have come to make up the aggregate of modern Europe: while, on the other hand, it is difficult to trace the slight reaction that the Greek empire has had upon the West, till its fall, when it contributed so much to the revival of letters and the modern spirit, by the dispersion of ancient literature and culture. Up to A. D. 1204, Constantinople remained the capital of the E., or Lower Roman Empire: in that year it was captured by "the blind old Dandolo" and the French. From A. D. 1204 to 1261 it became the seat of the Latin Empire, and on the morning of the 25th of July, 1261, reverted to the undisputed possession of the Greeks.

On the 29th of May, 1453, Constantine XIII., the last of the Palaeologi, fell upon the walls of his capital, with the words, Θέλει Σωτὴρ μᾶλλον ἢ ζῆν. Since that period it has been looked up to by the people of the East as the seat of the supreme temporal and spiritual power, and the Sultan has become the heir of the Caesars.

More cannot be done here than enumerate a few of the leading events of which Constantinople itself has been the theatre during this long period of its existence. It would be unnecessary to refer those who wish to know more on this subject to the masterly work of Gibbon. Le Beau (*Histoire du Bas Empire*) is a writer less known, and though deficient in criticism, his work contains much information. The notes appended by St. Martin, the well-known Oriental scholar, will be found eminently useful. The History of the Iconoclast Princes may be read in Schlosser (*Geschichte der Bilderstürmenden Kaiser*).

The empire of the East began with the reign of Arcadius, A. D. 395. Justinian, A. D. 527—565, has the honour of being considered the second founder of Constantinople. In the fifth year of his reign the factions of the Circus and the memorable sedition of the *Nika* almost laid the city in ashes. A description of the buildings with which the emperor adorned his ruined capital is reserved for the topography of the city. In 616 Chosroes maintained his camp for ten years in the presence of the city. In 626 Heraclius delivered it from the Persians and Avars. In 668—675, the Arabs for the first time besieged Constantinople, but, baffled by the strength of the walls, and the strange effects of the Greek fire, fell to the number of 30,000 men. In the second siege, 716—718, they were again compelled to retreat. In 865 the

the buildings of the city, it is more llow the historical succession than pographical arrangement. For, it ted, how little now remains. Where there they also fell. Constantiby earthquakes, fires, the internal reign foe, when the last of the Conis empire and life, possessed perhaps which the first Constantine or even seen; especially, too, as the fury of lers destroyed every work of art that ner disasters. A plan of the city, the reign of Arcadius, divided into s given on the next page, by which the position of the different buildings may be clearly seen.

At the siege of Byzantium, Constantine had pitched his tent upon the second hill; to commemorate his success, he chose this site for the principal forum (Zosim. ii. 31, 35), which appears to have been of an elliptical form. The two opposite entrances formed triumphal arches; the porticoes, which enclosed it on every side, were filled with statues of the tutelar deities of Greece.

At each end were two shrines, one of which held the statue of Cybele, which was said to have been placed by the Argonauts upon Mt. Dindymus, but deprived of her lions and of her hands from the attitude of command distorted into that of a suppliant for the city; in the other was the Fortune of Byzantium (Euseb. *Vit. Const.* iii. 54; Sozomen. *H. E.* ii. 5). The centre of the forum was occupied by a lofty pillar, which, formed of marble and porphyry, rose to the height of 120 feet. On this column Constantine, with singular shamelessness, placed his own statue with the attributes of Christ and Apollo, and substituted the nails of the Passion for the rays of the Sun; Constantine was replaced by Julian, Julian by Theodosius. In A. D. 1412 the keystone was loosened by an earthquake. The statue fell under Alexius Comnenus, and was replaced by the Cross. The Palladium was said to be buried under the pillar. (Von Hammer, *Constantinopel und die Bosporus*, vol. i. p. 162.) Besides the principal forum was a second one, which has been sometimes confounded with the other; it was square, with porticoes surrounding it, consisting of two ranks of columns; in this the Augusteum, or court of the palace, stood the Golden Miliarium, which, though it served the same purpose as its namesake at Rome, did not resemble it in appearance, as this was an elevated arcade, embellished with statues.

The Circus or Hippodrome was a stately building. The space between the two metae or goals was filled with statues and obelisks. The Turks retain the translated name of the horse-course (*Atmeidan*), but the ancient splendour of the place has disappeared; it is no longer a circus, but an oblong open space, about 300 paces long by 150 wide. (Hobhouse, *Albania*, vol. ii. p. 950.) At the upper end is a granite obelisk of rather mean proportions, and covered with hieroglyphics of poor workmanship. It is called after Theodosius, but was probably moved by that emperor, after it had been erected by Constantine, to some other part of the city. An epigram on the pedestal records the success of Proclus, praefect of the city, under Theodosius the Great, in setting the obelisk upright. (*Anthol. Graec.* iv. 17.) Near this stands the wreathed column of bronze, which, according to legend, bore the golden tripod of Delphi, and was shattered by the iron mace of Mohammed II. Clarke (*Trav.* vol. ii. p. 58) treated the latter circumstance as a fiction of Thévenot; be the former true or not, the relic is now a poor mutilated thing, with one end in the ground, above which it does not rise more than 7 feet, and the end open and filled with rubbish. Fourteen churches, fourteen palaces, several triumphal arches, and eight public baths are assigned to the founder of the city. Constantine, and in this his example was followed by his successors, imitated Ancient Rome in the construction of sewers. Two large subterranean cisterns or reservoirs of water, constructed by the Greek emperors in case of a siege, still remain; one called by the Turks the

palace of the "Thousand and One Pillars," is now perfectly dry. The other still existing as a cistern, and called the "Subterranean Palace," may be described as an underground lake, with an arched roof to cover it, supported on 336 marble pillars.

From the throne, seated upon which the emperor viewed the games of the Circus, a winding staircase called cochlea descended to the palace. This was a magnificent building, covering a great extent of ground, on the banks of the Propontis, between the Hippodrome and the church of S. Sophia, now the Seraglio. The baths of Zeuxippus, the site of which it is difficult to fix, as, while history seems to connect them with S. Sophia and the palace, the original plan places them on the other side of the city, near the harbour, were so embellished by Constantine with statues of marble and bronze, that they became famed as the most beautiful in the world. These statues were brought from their local sanctuaries to adorn the squares and baths of Constantinople,—the Athene of Lyndus, the Muses of Helicon, the Amphitrite of Rhodes, the Pan which was consecrated by the Greeks after the defeat of Xerxes. Theodosius the younger pulled down the Diocurs, who overlooked the Hippodrome. It was reserved

Digitized by Google

r the Latin crusaders to destroy these precious re-
ains of ancient art, and the four bronze horses of
an Marco at Venice are the only remains of the
andywork of the Grecian artists with which Con-
antinople was peopled.

While private houses and public buildings for
usiness, for convenience, for amusement, and splen-
our rose with the rapidity of enchantment, one
lass of edifices was wanting. A few temples, such
s those of the Sun, the Moon, and Aphrodite, were
ermitted to stand in the Heropolis, though deprived
f their revenues. (Malala, *Constant.* x.) But few
hurches were built; of these one was dedicated to
he Supreme Wisdom. The ancient Temple of
eace, which afterwards formed part of Santa
ophia, was appropriately transformed into a church.
The Church of the Twelve Apostles appears from
usebius (*Vit. Const.* iv. 58) to have been finished
few days before the death of Constantine; it
ell to ruin 20 years afterwards, was repaired by
onstantius, rebuilt by Justinian, and demolished by
lohammed II.

Theodosius the Great built the principal gate of
onstantinople, "The Golden Gate," so celebrated
y the Byzantine writers; this gate, on the S. of
he town, was that by which the emperors made
heir solemn entry, and stood at the beginning of
he principal street, which crossed the town up to
he Bosporus. Gyllius (Bandur. *Imp. Orient.* vol. ii.
595), in the 16th century, saw the remains of it.
t is now sought for in vain, though a gate entirely
locked up is sometimes shown to travellers for it.
The Empress Eudoxia, wife of Arcadius, ornamented
er city with a palace and baths. Theodosius II.
oved the arts, and himself cultivated painting and
culpture; he encouraged architecture, and executed
onsiderable works; in his reign the walls of Constan-
inople were in great measure rebuilt, and the city
dorned with thermae, a forum, and two palaces for
he sisters of Pulcheria. In 447, after the great
arthquake, the edifices of Constantinople were re-
ored with renewed splendour. Marcian turned his
ttention chiefly to the aqueducts; Leo I. Thrax to
he churches of Constantinople. Nothing is re-
orded as having been constructed under Zeno and
nastasius. Justin I., besides his great works at
ntioch, contributed to the embellishments, or
ather restoration of Constantinople. The reign of
ustinian is the most brilliant epoch of the Neo-
reek or Byzantine architecture; and, like Hadrian,
is emperor was entitled to the proud distinction of
eing called by his contemporaries "reparator orbis."
The great ornament of Constantinople was the
mple reared by Justinian in honour of the Eternal
Visdom (S. Sophia). This, the principal church of
onstantinople, had been twice destroyed by fire,
fter the exile of John Chrysostom, and during the
ots of the Blue and Green factions. Anthemius of
ralles, and Isidorus of Miletus, were the builders
mployed by Justinian to rebuild the church on a
lan in which, as Mr. Hope (*Hist. of Architecture*,
126) remarks, the wisdom of man shows but
ittle. Disregarding the cardinal rule that all ar-
hitectural trick is inconsistent with good taste, they
ndeavoured to make it appear entirely hovering in
ir without the least earthly resting-place. The
ttempt was unsuccessful, for, in A.D. 558, twenty-
ne years after the dedication, an earthquake nearly
estroyed it; another Isidorus, nephew of the former,
as employed to restore it; an elevation of 20
eet more than it had before its fall was given to the dome, and the originally circular was changed to an elliptical form. Though such was the lightness of the dome that it appeared suspended "by a chain from Heaven," the circle which encompasses the dome rested on four strong arches, supported on four massive piles, assisted on the N. and S. side by four columns of granite, each of a shaft 40 feet long. Two larger and six smaller semi-domes sprouted out and encircled the central cupola. The ground-plan describes the figure of a Greek cross within a quadrangle, but on the inside was oval. (Comp. Procop. *de Aed.* i. 1; Agath. v. pp. 152, 153; Paul. Silentiar. ad calc. Ann. Comnen. *Alex.*; Evag. iv. 31; Dallaway, *Ancient and Modern Constantinople*, p. 52.) The best description of this magnificent church is to be seen in Batissier (*Histoire de l'Art Monumental*, p. 386, foll.). Besides this great model of Eastern architecture, Justinian erected more than twenty-five churches in Constantinople and its suburbs In honour of himself a colossal statue, representing the emperor mounted on horseback and in an attitude of defiance, was placed upon a column in the Augusteum before S. Sophia. This statue existed as late as the 16th century, when it was melted into cannon by the Turks. (Gyllius, *de Top. Const.* ii. 13.) The palace was also restored by Justinian, and magnificently adorned with bronze, many coloured marbles and mosaics, representing the glories of the African and Italian triumphs. From the time of Heraclius to the hour of her fall, the outward glories of Constantinople shared the same fate as her renown and greatness. Here and there some emperor might endeavour to repair the ravages which time, nature, or violence had wrought upon the mighty works of his predecessors. In the 10th century the palace, the ceremonies of which have been described by Constantine Porphyrogenitus (*de Caer. Aul. Byz.*), was pre-eminent for its size, strength, and magnificence. (Ducange, *Constantinop. Christian.* ii. 4.) A large and irregular building, each separate part bore the character of its founder, and the times.

The Latin crusaders, Mohammed II., and subsequent neglect and recklessness, have effected such results, that it may be said, with almost literal truth of the city of Constantine and Justinian, not one stone resteth upon another.

VI. Government and Administration.

With the foundation of a new capital a new order of things in the civil and military administration was introduced; commenced by Diocletian it was perfected by Constantine.

In the hierarchy of the state the magistrates were divided into 3 classes,

I. The "Illustrious."

II. The "Spectabiles."

III. The "Clarissimi."

There were 2 inferior ranks conferred on those who were not raised to the senatorial dignity.

IV. The "Perfectissimi."

V. The "Egregii."

The 3rd epithet belonged to the senatorial rank, the 2nd to those of superior distinction; the 1st was granted only to

I. Consuls and patricians.

II. The Praetorian praefects, with the praefects of Rome and Constantinople.

III. The masters-general of the infantry and cavalry.

IV. The seven ministers of the palace who ex-

Digitized by Google

ercised "sacred" functions about the person of the emperor.

1. The consuls who, though their office had degenerated into an empty name, were still the highest officers of the state, were inaugurated at the imperial residence with the utmost splendour. The title of patricians became, under Constantine, a personal and not an hereditary distinction, bestowed on the ministers and favourites of the court.

2. The praetorian praefects were the civil magistrates of the provinces, as the immediate representatives of the imperial majesty: everything was under their control. The accompanying table taken from Marquardt (*Handbuch der Röm. Alterthum*, p. 240), gives the division of the empire under these four great officers. Rome and Constantinople were alone exempted from their jurisdiction, but were respectively under a praefect of the city, and a perfect equality was established between the two municipal and the four praetorian praefects. The "spectabiles," in which were included the 3 proconsuls of Asia, Achaia, and Africa, with the lieutenant-generals and military counts and dukes, formed an intermediate class between the "illustrious" praefects and "honourable" magistrates of the provinces.

5. " Flaviae Caesariensis.

II Praefectus Praetorio Italiae.

A. *Vicarius Urbis Romae*

1. Consularis Campaniae.
2. " Tusciae et Umbriae.
3. " Piceni Suburbicarii.
4. " Siciliae.
5. Corrector Apuliae et Calabriae.
6. " Bruttiorum et Lucaniae
7. Praeses Samnii.
8. " Sardiniae.
9. " Corsicae.
10. " Valeriae.

B. *Vicarius Italiae.*

1. Consularis Venetiae et Histriae.
2. " Aemiliae.
3. " Liguriae.
4. " Flaminiae et Piceni Annonarii.
5. Praeses Alpium Cottiarum.
6. " Rhaetiae I.
7. " Rhaetiae II.

Illyrium Occidentale.
8. Consularis Pannoniae II.
9. Corrector Saviae.
10. Praeses Pannoniae I.
11. " Dalmatiae.
12. " Noricum Mediterraneum.
13. " Noricum Ripense.
14. Dux Valeriae Ripensis.

C. *Vicarius Africae.*

1. Consularis Byzacii.
2. " Numidiae.
3. Praeses Tripolitanae.
4. " Mauritaniae Sitifensis.
5. " Mauritaniae Caesariensis.

The Proconsul of Africa was directly under the Emperor, and not under the Praefectus Praet. Ital.

III. Praefectus Praetorio Illyrici.

A. *Directly under the Praefect*

The Diocese of Dacia.

1. Consularis Daciae Mediterraneae.
2. Praeses Moesiae I.
3. " Praevalitanae.
4. " Dardaniae.
4. Dux Daciae Ripensis.

B. *Under a Proconsul*

Achaia.

C. *Under the Vicarius Macedoniae.*

1. Consularis Macedoniae.
2. " Cretae.
3. Praeses Thessaliae.
4. " Epiri Veteris.
5. " Epiri Novae.
6. " Macedoniae Salutaris.

A part of this last belonged to the Diocesis Daciae.

IV. Praefectus Praetorio Orientis.

A. *Comes Orientis.*

1. Consularis Palaestinae I
2. " Phoenices.
3. " Syriae I.
4. " Ciliciae.
5. " Cypri.
6. Praeses Palaestinae II.
7. " Palaestinae Salutaris.
8. " Phoenices Libani.
9. " Euphratensis.
10. " Syriae Salutaris.
11. " Osrhoënae.
12. " Mesopotamiae.
13. " Ciliciae II.
14. Comes Rei Militaris Isauriae.
15. Dux Arabiae.

B. *Praefectus Augustalis.*

1. Praeses Lybiae Sup.
2. " Lybiae Inf.
3. " Thebaidos.
4. " Aegypti.
5. " Arcadiae.
6. Corrector Augustamnicae.

C. *Vicarius dioceseos Asianae.*

2. " Lydiae.
3. " Cariae.
4. " Lyciae.
5. " Lycaoniae.
6. " Pisidiae.
7. " Phrygiae Pacatianae.
8. " Phrygiae Salutaris.

D. *Vicarius Pontice.*

1. Consularis Bithyniae.
2. " Galatiae.
3. Corrector Paphlagoniae.
4. Praeses Honoriados.

(Praefectus Praetorio Orientis.)

5. " Galatiae Salutaris.
6. " Cappadociae I.
7. " Cappadociae II.
8. " Helenoponti.
9. " Ponti Polemoniaci.
10. " Armeniae I.
11. " Armeniae II.

E. *Vicarius Thraciarum.*

1. Consularis Europae.
2. " Thraciae
3. Praeses Haemimonti.
4. " Rhodopes.
5. " Moesiae II.
6. " Scythiae.

Directly under the Emperor, the Proconsul of Asia under him,

1. Consularis Hellespontii.
2. Praeses Insularum.

The great framework of the Roman empire was broken up into 116 provinces, each of which supported an expensive establishment. Of these 3 were governed by "Proconsules;" 37 by "Consulares;" 5 by "Correctores;" 71 by "Praesides."

All these were entrusted with the administration of justice and the finances in their respective districts. They were drawn from the profession of the law.

The defence of the Roman empire on the in-

Digitized by Google

portant frontiers of the Rhine, the Upper and Lower Danube and the Euphrates, was committed to 8 masters-general of cavalry and infantry: under them were stationed 35 military commanders in the provinces; 3 in Britain; 6 in Gaul; 1 in Spain; 1 in Italy; 5 on the Upper Danube; 4 on the Lower Danube; 8 in Asia; 3 in Aegypt; 4 in Africa. These were distinguished by the titles of "dux" or duke, and "comes," counts or companions. There were 583 stations or garrisons established on the frontiers, and the effective force of the troops under the successors of Constantine was computed at 645,000 soldiers. From the difficulty of the levies, they were compelled to have recourse to barbarian auxiliaries.

Besides these magistrates and generals 7 great officers of state remained at court.

1. The eunuch, "praepositus," or praefect of the bed-chamber, under whom were "comites" to regulate the wardrobe and table of the emperor.

2. The "masters of the offices," the supreme magistrate of the palace, who inspected the discipline of the civil and military schools. In his office the public correspondence was managed in the 4 *scrinia* or bureaux.

3. The "quaestor," who may be compared with our modern chancellor.

4. The "count of the sacred largesses," or treasurer general of the revenue.

5. The "count of the private estate," or privy purse.

6, 7. The "counts of the domestics," or officers in command of the horse and foot guards, consisting of 3 battalions of 500 men each.

To facilitate intercourse between the court and the provinces "posts" were established: by an intolerable abuse the agents employed for this purpose became the official spies; and as in the new jurisdiction of the empire the "quaestio" or torture was permitted in any offence where "hostile intention" against prince or state was presumed, the terrors of malicious informations were materially increased.

The treasury was supplied by a system of direct taxation, and the word *indiction* was transferred from the solemn edict of the emperor to the measure of tribute which it prescribed, and the term allowed for payment. The "decurions," who formed the corporations of the cities, were charged with assessing according to the census of property prepared by the "tabularii" the payment due from each proprietor. Besides the land-tax, which was in its operation a proprietor or landlord's tax, there was a capitation tax on all who were not possessed of landed property. Certain classes were gradually exempted, till at length it fell solely on the "coloni" and agricultural slaves. (Comp. Savigny, *Abhand. der Berlin. Acad.* 1822-23. p. 27.) Besides these general taxes upon industry "benevolences," under the name of "coronary gold," were also exacted from communities on certain occasions.

It must be admitted that the Byzantine fiscal system, though so rapacious that it extracted for the government the whole annual surplus of the people's industry, was constructed with great financial skill. One fact may be cited to show how wisely this branch of the public service was administered. From the fall of the Western Roman Empire to the conquest of Constantinople by the Crusaders the gold coinage of the Empire was maintained constantly of the same weight and standard. The concave gold byzants of Isaac II. are precisely of the same weight and value as the solidus of Leo the Great and Zeno the Isaurian.

Gold was the circulating medium of the Empire, and the purity of the Byzantine coinage rendered it for many centuries the only gold currency that circulated in Europe.

An admirable account of the internal administration of the empire, and the social condition of the people will be found in Mr. Finlay's learned volumes, *Greece under the Romans*, and *Mediaeval Greece*. See also Hullmann, *Geschichte der Byzantischen Handels*.

For the topography of Constantinople the following works can be consulted:—Von Hammer, *Constantinopel und die Bosporus*; Dallaway, *Constantinople, Ancient and Modern*; Andreossy, *Constantinople et le Bosphore*; Carbognano, *Descr. Topograph. di Const.*; Banduri, *Imp. Orient.*; Codinus, *de Orig. Constant.*; Ducange, *Constant. Christ.* [E. B. J.]

CONSUANTAE, or CONSUANTES (Κονσουαντοι), a Celtic tribe of Vindelicia, on the upper *Lech*, in the neighbourhood of *Schwangau*. (Ptol. ii. 13. § 1; Plin. iii. 24, who calls them *Consuanetes*.) [L. S.]

CONTACOSSYLA (Κονταικόσυλα, Ptol. vii. 1 § 15), a place called by Ptolemy an emporium in the country of Maesolia or Masalia, in the S. of India. It has been conjectured, with good reason, to be the same as the modern *Masulipatam*. [V.]

CONTENEBRA, a town of Etruria, mentioned only by Livy (vi. 4), from whom it appears that it was situated in the territory of Tarquinii. It was taken and destroyed by the Romans in B.C. 388, at the same time with Cortuosa, the site of which is equally unknown. [E. H. B.]

CONTESTA'NI (Κοντεστανοί), a people in the SE. of Hispania Tarraconensis, E. of the Bastetani. Their country, called Contestania, extended along the coast from the city of Urci, at the E. extremity of Baetica, to the river Sucro, and corresponded to *Murcia* and the S. part of *Valencia*. Besides CARTHAGO NOVA, and Saetabis, they possessed the following less important cities: on the coast, Lucenti or LUCENTUM (Λουκέντοι ἢ Λούκεντον), Alonae (Ἄλωναι), the port ILICI (Ἰλλικιτανὸν λιμήν: the city itself stood a little inland); and, in the interior, MENLARIA (Μενλαρία), VALENTIA (Οὐαλεντία), Saetabicula (Σαταβίκουλα), and Iaspis (Ἴασπις: Ptol. ii. 6. §§ 14. 62; Plin. iii. 3. s. 4; Liv. Fr. xci.). [P. S.]

CONTHYLE (Κονθύλη), a demus of Attica of unknown site. [See p. 334.]

CONTOPO'RIA. [ARGOS, p. 201, b.]

CONTRA AGINNUM is placed by the Anton. Itin. half way between Augusta Veromanduorum (*St. Quentin*) and Augusta Suessionum (*Soissons*), 13 M. P. from each. The Table makes the distance 25 M. P. between these two places, and does not mention Contra Aginnum. D'Anville places Contra Aginnum at *Condren* on the *Oise*. The Notitia mentions a body of Batavi Contraginnenses who were stationed at Noviomagus Belgicae Secundae or *Noyon*. [G. L.]

CONTREBIA (Contrebienses). 1. One of the chief cities, and, according to Valerius Maximus, the capital of Celtiberia. It is conspicuous in the history of the Celtiberian War; and in the Sertorian War, it was the scene of one of those obstinate defences which so often occur in Spanish history, its reduction costing Sertorius forty-four days and

Digitized by Google

many lives. Its site appears to have been near *Albarracin*, SE. of Caesaraugusta. (Liv. xi. 33; Val. Max. ii. 7. § 10, vii. 4. § 5; Flor. ii. 7; Vell. Paterc. ii. 5; Liv. Fr. xci.; Geogr. Rav. iv. 43; Ukert, vol. ii. pt. 1. pp. 461, 462.)

2. CONTREBIA LEUCAS, in the territory of the Berones, is a different place. [BERONES.] [P.S.]

CONVALLIS. [FORTUNATAE INSULAE.]

CO'NVENAE (Κονουέναι), a people on the north side of the Pyrenees, in Aquitania according to Pliny (iv. 19), who says, "in oppidum contributi Convenae." Strabo (pp. 190, 191) says, "close to the Pyrenees is the country of the Convenae, that is, of those who were a mixed people; where there is a town Lugdunum, and the warm springs of the Onesii." [AQUAE CONVENARUM.] He adds that they received the Jus Latii. It appears from the name "Convenae," the expression of Pliny "contributi," and Strabo's explanation of the term, that it contains the elementary parts of the Latin verb "convenire." Hieronymus (*Adv. Vigilantium*) has a story that Cn. Pompeius, after terminating the war with Sertorius, settled a number of Spanish robbers and such like people here. In this neighbourhood was Calagorris, an Iberian name; but this place may be of older date than the settlement of the Convenae. The town Lugdunum, afterwards Convenae, is *St. Bertrand de Cominge* in the district of Cominge. De Valois observes that the "fugitivi ab saltu Pyrenaeo praedonesque" (Caes. *B. C.* iii. 19) mean the Convenae, which seems very doubtful.

The name Convenae appears in Ptolemy (ii. 7) in a corrupt form Κομονένοι; in the old Latin version, Cumueni. [G. L.]

COPAE (Κῶπαι: *Eth.* Κωπαιεύς, Thuc.; Κωπάτης, Steph. B.: *Topolia*), a town of Boeotia, and a member of the Boeotian confederacy, was situated upon the northern extremity of the lake Copais, which derived its name from this town. It is mentioned by Homer (*Il.* ii. 502); but it was a small place, and its name rarely occurs in Grecian history. It was still in existence in the time of Pausanias, who mentions here the temples of Demeter, Dionysus and Sarapis. (Thuc. iv. 93; Strab. ix. pp. 406, 410; Paus. ix. 24. § 1, seq.; Plin. iv. 7. § 12.) The modern village of *Topólia* occupies the site of Copae. It stands upon a promontory in the lake which is connected with the mainland by only a narrow causeway. (Dodwell, *Classical Tour*, vol. ii. p. 56; Leake, *Northern Greece*, vol. ii. p. 306; Ulrichs, *Reisen in Griechenland*, p. 216.)

COPA'IS LACUS. [BOEOTIA, pp. 410, 411, 414. b.]

COPHANTA. [COPHAS.]

COPHAS (Κωφάς, Marcian. p. 23; Arrian, *Indic.* c. 27; Κωφάντα λιμήν, Ptol. vi. 8. § 9; Κωφάντα πόλις, Ptol. vi. 8. § 14), a small port in Gedrosia to which the fleet of Nearchus came on their way from the Indus to *C. Jask*. Vincent places it to the east of *C. Guadel*, because this appears on the whole to coincide best with the words of Arrian. There can be little doubt that Cophas was the real name, though Ptolemy has Cophanta. [V.]

COPHEN or COPHES (Κωφήν, -ῆνος, Arrian. *Ind.* i. 4, *Anab.* iv. 22, v. 1; Κώφης, -ου, Dionys. Per. 1140; Strab. xi. p. 697; Plin. vi. 17. s. 21, 20. s. 23; Mela, iii. 7. § 6), a river in the western part of India, which flowed into the Indus. From the order in which the rivers of the *Panjáb* are mentioned, it seems likely that the Cophes is represented by the river of *Kubul*. (Lassen, *z. Gesch. d. Kon. v. Baktrien*, v. p. 129; Ritter, *Erdkunde*, vol. iii. p. 420, vol. v. p. 449.) Its principal tributaries are the Choaspes (Strab. p. 697; Curt. viii. 10), the modern *Attok*, and the Choes (Χόης, Arrian. *Anab.* iv. 23), the modern *Kameh*. [V.]

COPHEN (Κωφήν, Steph. B. *s. v.* Ἀραχωσία; Plin. vi. 23), a name given by Stephanus and Pliny to the town of Arachosia. Some editions of Pliny read "Cutin" instead of Cophen. It is not improbable that there has been some confusion between the name of this town and that of the river westerly of the great rivers of the *Panjáb*, mentioned above. [ARACHOSIA.] [V.]

COPHUS (Κωφός: *Kufó*), the harbour of Irone in Sithonia, which was so called because, being separated from the outer sea by two narrow passages, the noise of the waves was not heard in it; hence the proverb Κωφότερος τοῦ Τορωναίου λιμένος. (Zenob. *Prov. Graec.* cent. 4, pr. 68; Strab. Epit. vii. p. 330; Mela, ii. 3.) Leake (*North. Greece*, vol. iii. p. 119) suggests that it may be the same as what Thucydides (v. 2) called the harbour of the Colophonians, and that we should read Κωφὸν instead of Κολοφωνίων. The modern harbour of Irone still preserves the ancient name. [E. B. J.]

COPIA. [THURII.]

COPRATES (Κοπράτης, Strab. xv. p. 729: Diod. xix. 18), a river of Susiana, which rises in the Sh. mountains of *Laristan* near *Burn-jird*, and according to Diodorus flows into the Tigris. It is clear, however, from his context, that for Tigris we must read Pasitigris. Antigonus was marching to meet Eumenes, whose camp was pitched on the banks of the Pasitigris (now *Karun*), and he was as would seem at least one day's march beyond Susa. Diodorus (xvii. 67) calls the Pasitigris Tigris, when describing the march of Alexander from Susa, εἰς τὸν Τίγριν; and Curtius (v. 3) translates this passage "ad flumen, Pasitigrim incolae vocant." The Coprates is now called the river of *Dizful*. [V.]

COPTOS (Κόπτος or Κοπτίς, Ptol. iv. 5. § 73; Κοπτώ, Plut. *de Is. et Osir.* c. 14), in hieroglyphics KOBTO, the modern *Kouft* or *Keft*, was the principal city of the nome Coptites in the Upper Thebaid, the Thebais Secunda of the Itineraries. It was situated in lat. 26° N., on the right bank of the Nile, and about a mile in distance from the river. In the immediate neighbourhood of Coptos a valley opened to the south-east leading to the porphyry-quarries in the Arabian desert, and to Berenice (*Cosseir*) on the Red Sea. When in B. C. 266, Ptolemy Philadelphus constructed the town and harbour of Berenice, he erected also four public inns or watering places between his new city and Coptos, in order that the caravans might have convenient halting-places during their twelve days' journey through the eastern desert. From this epoch Coptos was enriched by the active commerce between Libya and Egypt, on the one part, and Arabia and India on the other, and the city continued to flourish, until it was nearly destroyed by the emperor Diocletian in A. D. 292. It survived however this calamity; and remained a considerable place down to the latest period of the Roman empire. In the reign of Justinian, in the first half of the 7th century A. D., Coptos for a brief interval bore the name of Justinianopolis. (*Notit. Eccles.*) Coptos being comparatively a modern town of the Thebaid possesses no monuments of the Pharaonic era. In the church, however, which the Christian population of the present *Kouft* have built, are imbedded stones inscribed with the ovals of Thothmes III. and Nec-

Digitized by Google

nsbes. (Wilkinson, *Mod. Egypt and Thebes*, ii. 123.) Neither, as might have been expected from s origin, does it exhibit any remarkable Hellenic emains. The principal objects of interest there are he ruins of Roman buildings. The neighbouring ills contained emeralds and a few other precious ones: and the vineyards produced a thin and not much esteemed wine, which, however, from its lightness of body was administered in febrile disorders. Aelian, *H. An.* vii. 18; Athen. i. p. 33: Plin. *N. H.* xxvii. 17, 18, 55, 56.) [W. B. D.]

CORA (Κόρα: *Eth.* Κορανός, Coranus: *Cori*), city of Latium, situated on the left of the Appian Way, between Velitrae and Norba, and about 37 miles distant from Rome. It stands on a bold hill, at the outskirts of the Volscian mountains, and overlooking the plain of the Pomptine Marshes. All accounts agree in representing it as a very ancient city. Virgil notices it as one of the colonies of Alba Longa, and this is confirmed by Diodorus and the author of the *Origo Urbis Romae*, both of whom include it in their lists of the colonies founded by Aeneas Silvius. (Virg. *Aen.* vi. 776; Diod. vii. 5. *ap. Euseb. Arm.* p. 184; *Orig. U. Rom.* 17.) Livy, on the contrary, ascribes its foundation to Herdonius (Plin. iii. 5. s. 9; Solin. 2. § 7), while another tradition seems to have represented it as deriving both its name and its origin from Coras, a brother of Tiburtus, the eponymous hero of Tibur. (Serv. *ad Aen.* vii. 672; Solin. 2. § 8.) Both these last traditions may be regarded as pointing to a Pelasgic origin. It is certain that it was at a very early period one of the most considerable cities of Latium. Thus Cato mentions it as one of those which took part in the consecration of the grove and sanctuary of Diana in the Nemus Aricinum; and we find it included by Dionysius in the list of the thirty Latin cities which composed the League in B.C. 493. (Cato *ap. Priscian.* iv. 4. § 21; Dionys. v. 61; Niebuhr, vol. ii. p. 17, note.) At an earlier period also one of the two generals chosen to command the confederate armies was Ancus Publicius of Cora. (Dionys. iii. 34.) Its subsequent relations both with Latium and Rome are very obscure. In B.C. 503, Livy calls it a "colonia Latina," and speaks of it as revolting, together with Pometia, to join the Aurunci, but shortly after both Cora and Pometia appear as Volscian towns. (Liv. ii. 16, 22: Niebuhr, vol. ii. pp. 108, 261.) It appears certain that it must have fallen into the hands of the Volscians at the time that nation was at the height of its power: and it was probably occupied by a fresh body of colonists when it was recovered by the Romans and Latins. Propertius (iv. 10. 26) appears to place this reconquest *before* B.C. 428, but it is doubtful whether we can trust to his historical accuracy on this point. It is, however, probable that Cora resumed the position of a Latin colony about this period, as well as Norba and Setia, and on this account we find no mention of any of them in the great Latin War of B.C. 340, or the confederation that followed. But a few years later, B.C. 330, their territories were laid waste by the Privernates under Vitruvius Vaccus. (Liv. viii. 19.) It seems certain therefore that they were at this time dependencies of Rome. Livy includes Cora among the twelve Latin colonies, which, in B.C. 209, refused any further supplies (xxvii. 9): but where the same list is repeated (xxix. 15), the name is written *Sora*, and it seems most probable that this is the town really meant. (Madvig. *de Colon.* p. 268, note.) In another passage he notices it among the Municipia on the Appian Way (Liv. xxvi. 8), and it seems to have been at this time still a considerable town, but from henceforth we hear little of it. According to Florus, it was ravaged by Spartacus (iii. 20. § 5, but this reading is probably corrupt); and there seems reason to suppose that it suffered severely during the Civil Wars. (Lucan. vii. 392.) But no subsequent mention of it occurs in history; and though the name is still found in Strabo and Pliny, and an inscription attests its municipal rank in the first century of the empire, it seems probable that it must have soon after fallen into complete decay. Nor is any trace of its existence found in the middle ages till the 13th century, when it reappears under its ancient name, which it still retains, and is now a considerable town. (Plin. iii. 5. s. 9; Strab. v. p. 237; Nibby, *Dintorni*, vol. i. p. 493.)

Few cities of Latium possess more considerable remains of antiquity than Cora. Among these are numerous portions of the ancient walls, constructed of massive polygonal blocks, together with terraces and substructions of a similar character, resembling in style the massive fortifications of Norba and Signia, but inferior in extent and preservation. They appear when perfect to have formed three successive tiers or circuits, the uppermost of which enclosed the highest summit of the hill, and constituted the citadel of the ancient town. Within this enclosure, and on the highest point of the whole city, stands a small Doric temple (commonly known, but without any authority, as that of Hercules), the tetrastyle portico of which is in good preservation, and an inscription over the entrance records its construction by the Duumvirs of the town. From the orthography of this inscription, as well as the style of architecture, there seems reason to assign the erection of it to the last century of the Roman Republic. Lower down the town are the remains of another temple of far superior style and execution, but of which only two columns now exist: they are of Corinthian order and of beautiful workmanship; from a fragment of the inscription on the architrave, we learn that it was consecrated to Castor and Pollux; its date is uncertain, but it must certainly be referred to the best period of Roman architecture. Many other fragments of buildings are to be found in the town, and several inscriptions, but all belonging to the early ages of the Roman empire, or the end of the Republican period. Just outside the town, on the road to Norba, is an ancient bridge of a single arch, thrown over a deep ravine, which is one of the most remarkable monuments of its kind in Italy. From the irregularity of its construction, it is probable that this is the work of an early period, and belongs to the old Latin colony of Cora. Many of the other remains, and some parts at least of the fortifications, may probably be referred to the time of Sulla. (Nibby, *Dintorni di Roma*, vol. i. pp. 497—512. The bridge and specimens of the walls are figured by Dodwell, *Pelasgic Remains*, pl. 88—91.) [E. H. B.]

CORACE'SIUM (Κορακήσιον), Strabo's boundary on the coast of Asia Minor between Pamphylia and Cilicia. [CILICIA, p. 617.] At *Alâya*, which is the site of Coracesium, begins the mountainous coast which extends eastward to Cape *Cavalière*. A mountain a little east of *Alâya*, and near the coast, is marked 4800 feet high in Beaufort's map. "The promontory of *Alâya* (Coracesium) rises abruptly

Digitized by Google

from a low sandy isthmus, which is separated from the mountains by a broad plain; two of its sides are cliffs of great height, and absolutely perpendicular; and the eastern side, on which the town is placed, is so steep that the houses seem to rest on each other: in short, it forms a natural fortress that might be rendered impregnable; and the numerous walls and towers prove how anxiously its former possessors laboured to make it so." (Beaufort's *Karamania*, p. 172.) "The bay is open to southerly winds, the anchorage indifferent, and there is no harbour or pier." (Beaufort.) Beaufort supposes that there may, however, have been a mole constructed here, but circumstances prevented him from examining into that matter. The cliffs at *Aliya* are from 500 to 600 feet above the sea, and their perpendicular direction is continued for 60 or 70 feet below it. They are of compact white limestone, "tinged by a red dross on the outside." On the summit of the hill there are the remains of a Cyclopian wall, and a few broken columns; but no Greek inscriptions were discovered.

Strabo's brief description of Coracesium (p. 668) agrees with the facts. The natural strength of this position, a lofty and almost insulated rock, resembling Gibraltar, will explain its historical importance. Antiochus, king of Syria, was occupied with the siege of Coracesium when the Rhodians sent him the message which is mentioned by Livy (xxxiii. 20). It was the only place on the Cilician coast that had not submitted to him. The rebel Tryphon afterwards maintained himself for some time at Coracesium. [CILICIA, p. 621.] The pirates of Cilicia, against whom the Romans sent Cn. Pompeius, kept their plunder in the strong places of the Taurus, but their naval station was Coracesium, where with their fleet they awaited the attack of the Roman admiral, who defeated them. (Plut. *Pomp.* c. 28.) "In the old maps *Aliya* is called *Castel Ubaldo*, which may possibly have been the name given to it by the Venetians and Genoese, when in possession of this and other strongholds upon the Caramanian coast, but there is no recollection of the name in this country at present." (Leake, *Asia Minor*, p. 126.) [G. L.]

CORA'CIUS MONS (τὸ Κοράκιον ὄρος) is placed by Strabo (p. 643) between Colophon and Lebedus. As the word Κοράκιον is an adjective, the name of the mountain may be Corax. When Strabo speaks of a mountain between Colophon and Lebedus, he means that some high land is crossed in going from one place to the other; but this high land runs north, and occupies the tract that extends from Colophon and Lebedus north, towards the gulf of Smyrna. Chandler therefore may be right when he gives the name Corax to the mountains which were on his left hand as he passed from Smyrna to *Vourla*, near the site of Clazomenae. (*Asia Minor*, c. 23.) [G. L.]

CORALIS. [CARALLIS.]

CORA'LIUS. [BOEOTIA, p. 412, b.]

CORALLA (τὰ Κόραλλα), a cape on the coast of Pontus, now Cape *Kereli*. It is identified clearly enough by the name. (Hamilton's *Researches*, &c., vol. i. p. 252.) It is placed by Arrian, and the anonymous author of the Periplus, 100 stadia east of Philocalia, and Philocalia is 110 stadia east of Tripolis, *Tireboli*, a well-known position. [G. L.]

CORANITAE, an inland people of Arabia, mentioned by Pliny (vi. 28. s. 32), without any further clue to their position (Forster, *Arabia*, vol. ii. p. 55.) [G. W.]

CORA'SSIAE or CO'RSEAE (Κορασσίαι, Scyl. p. 488; Plin. iv. 12. s. 23; Κορσίαι, or Κορσεῖαι, Strab. xiv. p. 636; Agathem. i. 4; Steph. B. s. v. Κορσεαί), a group of islands between Icaria and Samos, distant, according to Agathemerus, 30 stadia from the promontory Ampelos in Samos. They are now called *Phurni* and *Krussi*. (Ross, *Reisen auf den Griech. Inseln*, vol. ii. pp. 134, 156.) Some modern writers suppose that Corassiae and Corseae are names of two different groups of islands, the former being SW. of Icaria, and the latter near Samos: but upon a comparison of the two passages of Strabo in which the names occur, it would appear that he speaks of the same groups under these two names.

CORAX. [AETOLIA, p. 63.]

CORAX (Κόραξ, Ptol. v. 9. §§ 7, 10, 31. v. 10. § 1), a small river placed by Ptolemy in Sarmatia Asiatica, and which, rising in the Coraxici Montes, —a western portion of the chain of the Caucasus,— flowed SW. into the Euxine Sea. It was the northern limit of Colchis. It is probable that the Charien of Arrian (*Peripl.* p. 10), the Charien of Pliny (v. 4. 4), the Charis of Strabo (xi. p. 499), and the Charistos of Ptolemy (v. 10. § 2), are one and the same river with it. Its present name is *Sukum*. [V.]

CORAXI. 1. (Κόραξοι, Aristot. *Meteor.* i. 13. Hecat. *Fragm.* 185; Steph. B. s. v.; Mela, i. 19. iii. 5; Scylax, p. 31; Plin. vi. 5. s. 5), a tribe of Pontus to the NW. of Colchis, and close to the outlying spurs of the Caucasus. They probably occupied the western bank of the Corax in the neighbourhood of Dioscurias. In the same district, according to Stephanus, was Coraxicus Murus and Coraxa Regio.

2. A Scythian tribe mentioned by Ptolemy (v. 14. § 10), but not, that we are aware, noticed in any other author. [V.]

CORA'XICI MONTES (Mela. i. 19. § 3; Plin. vi. 9. s. 10, vi. 12. s. 15; Mart. Cap. c. 6; ὁ Κωρικὸς ὄρος, Ptol. v. 9. §§ 14, 15, 18), the western part of the chain of the Caucasus to the N. of Colchis. It was the source, according to Ptolemy, of the river Cambyses; according to Mela and Pliny, of the Cyrus and Cambyses. [V.]

CO'RBASA (Κόρβασα), a town of Pisidia (Ptol. v. 5. § 6), the same apparently as the Corbasa of Hierocles. Ptolemy's Corbasa seems to be somewhere about Termessus. [G. L.]

CORBEUS (Κορβεούς), a city of the Tectosages in Galatia, according to Ptolemy (v. 4. § 8). It is Gorbeus (Γορβεούς) in the text of Strabo (p. 568). Corbeus was the residence of Castor the son of Saocondarius. Saocondarius married the daughter of Deiotarus, who murdered his son-in-law and his own daughter, destroyed the castle, and ruined the greater part of Corbeus. As to these Galatian princes see Ukert, *Onomasticon Tull.* (*s. v. Castor*). The name Corbeus occurs in the Antonine Itin. and in the Table, but the Table is quite unintelligible. In the Antonine Itin. Corbeus is placed between Ancyra (*Angora*), and a place called Rosolopiacum, XI. M. P. from Ancyra and XII. M. P. from Rosmagiacum. Cramer (*Asia Minor*, vol. ii. p. 97) says that "Corbeus answers doubtless to the site of *Corbega*, a few miles from the modern road leading from *Angora* to *Kaisarieh*." [G. L.]

CORBIANA (Κορβιανή, Strab. xvi. p. 745), one of the three praefectures into which Elymais was anciently divided. They were Massabatica, Gabiana, and Corbiana. [V.]

CO'RBILO (Κορβίλων), a trading town in Gaul,

Digitized by Google

on the *Loire*. It was a flourishing place in the time of Pytheas. (Strab. p. 190.) No extant writer except Strabo mentions the place. De Valois and D'Anville would fix it at *Coeron*, about two leagues below *Nantes*, and on the same side of the river. Walckenaer supposes that it may be *Corsep*, because Corsep is nearer the mouth of the *Loire*; but Strabo simply says that Corbilo was on the river. [G.L.]

CORBIO (Κορβίων: *Rocca Priore*), an ancient city of Latium, situated on the NE. side of the Alban Hills, which plays a considerable part in the wars between the Romans and the Aequians in the early ages of the Republic. It appears probable that it was at one period one of the cities of the Latin League, as the name of the Κορβίνται, which is found in the best MSS. of Dionysius in the catalogue of the thirty cities, must certainly mean the citizens of Corbio. (Dionys. v. 61; Niebuhr, vol. ii. p 17., note 21.) Yet Dionysius represents it as a fortress in the hands of the Romans, and wrested from them by the Latins at the outbreak of the war (vi. 3). There can at least be no doubt that it was originally a Latin city, but fell into the power of the Aequians, as they gradually extended their conquests over the neighbouring towns of Latium; and in accordance with this view we find it included among the conquests attributed to Coriolanus. (Liv. ii. 39; Dionys. viii. 19.) At a somewhat later period it appears as an Aequian city, which, according to the received history, fell into the hands of the dictator Cincinnatus in consequence of his great victory on Mount Algidus, B. C. 458. It was again taken by the Aequians the following year, but recovered by the Roman consul Horatius Pulvillus, who is said to have utterly destroyed it. (Liv. iii. 28, 30; Dionys. x. 24, 26, 30.) The name, indeed, appears again some years later B. C. 446, when a fresh victory was obtained over the Volscians and Aequians by Quintius Capitolinus "ad Corbionem" (Liv. iii. 66, 69); but this does not prove that the city itself was re-established; and from this time it altogether disappears; nor is the name found in any of the geographers. All the accounts of the military operations in which Corbio appears point to it as being in close proximity to Mount Algidus, and a place of great natural strength. Hence there is little doubt that Holstenius was correct in fixing it on the site of *Rocca Priore*, a mediaeval fortress, occupying the summit of a lofty hill, about 3 miles from Tusculum, and one of the range which sweeps round from thence to join the heights of Mt. Algidus, and constitutes the NE. side of the great encircling barrier of the Alban Mountains. Some slight remains of antiquity are still visible at *Rocca Priore*, and the position was one well adapted for an ancient fortress, and must always have been of importance in connection with military operations on Mt. Algidus. The site appears to have been occupied in imperial times by a Roman villa. (Holsten. *Not. ad Cluv.* p. 162; Nibby, *Dintorni di Roma*, vol. iii. pp. 21—24; Abeken, *Mittel-Italien*, p. 68.) [E. H. B.]

CORBULO'NIS MUNIMENTUM, a fort built by Corbulo in the country of the Frisians, which probably was the foundation of the modern town of Groningen. In the year 1818 a bridge was discovered in the neighbourhood, leading through a marsh, about 3 miles long, and 12 feet broad: this bridge was probably connected with the fort of Corbulo. (Tac. *Ann.* xi. 19; comp. Wilhelm, *German.* p. 134.) [L. S.]

CORCY'RA (Κέρκυρα, Herod., Thuc.; Κόρκυρα, Strab. and later writers, and always on coins: *Eth.* Κέρκυρ, -υρος, Alcman. ap. Etym. M.; usually Κερκυραῖος, Κορκυραῖος, Corcyraeus: *Corfù*), an island in the Ionian sea, opposite the coast of Chaonia in Epeirus. The channel, by which it is separated from the mainland, is narrowest at its northern entrance, being only about 2 miles in width; it then expands into an open gulf between the two coasts, being in some places 14 miles across; but S. of the promontory Leucimme it again contracts into a breadth of 4 or 5 miles. The length of the island from N. to S. is about 38 miles. Its breadth is very irregular; in the northern part of the island it is 20 miles; it then becomes only 6 miles; widens again near the city of Corcyra to about 11 miles; south of which it contracts again to about 3 or 4 miles, terminating in a high narrow cape. The island contains 227 square miles.

Four promontories are mentioned by the ancient writers: — 1. CASSIOPE (Κασσιόπη, Ptol. iii. 14. § 11; *C. St. Catherine*), the NE. point of the island. 2. PHALACRUM (Φαλακρόν, Strab. vii. p. 324; Ptol. *l. c.*; Plin. iv. 12. s. 19; *C. Drasti*), the NW. point. 3. LEUCIMME or LEUCIMNA (Λευκίμμη, Thuc. i. 30, 47; Λεύκιμμα, Strab. vii. p. 324; Ptol., Plin. *ll. cc.*: *C. Léftimo*), a low sandy point on the E. coast, about 6 or 7 miles from the southern extremity of the island. 4. AMPHIPAGUS (Ἀμφίπαγος, Ptol. *l.c.*: *C. Bianco*), the southern extremity of the island.

Corcyra is generally mountainous. The loftiest mountains are in the northern part of the island, extending across the island from E. to W.: the highest summit, which is now called *Pandokrátora* by the Greeks, and *San Salvatore* by the Italians, is between 3000 and 4000 feet above the sea, and is covered with luxuriant groves of olive, cypress, and ilex. From these mountains there runs a lower ridge from N. to S., extending as far as the southern extremity of the island. The position of Mt. ISTONE (Ἰστώνη), where the nobles entrenched themselves during the civil dissensions of Corcyra, is uncertain. (Thuc. iii. 85, iv. 46; Polyaen. *Strat.* vi. 20; Steph. B. *s. v.*) It was evidently at no great distance from the city; but it could hardly have been the summit of *San Salvatore* as some writers suppose, since the nobles, after their fortress on Mt. Istone had been captured, took refuge on higher ground. (Thuc. iv. 46.) Istone has been identified by Cramer and others with the hill mentioned by Xenophon (*Hell.* vi. 2. § 7) as distant only 5 stadia from the city; but this is purely conjectural. The only other ancient name of any of the mountains of Corcyra, which has been preserved, is MELITEIUM (Μελιτεῖον, Apoll. Rhod. iv. 1150, with Schol.); but as to its position we have no clue whatsoever.

Corcyra was celebrated for its fertility in antiquity, and was diligently cultivated by its inhabitants. Xenophon (*Hell.* vi. 2. § 6) describes it as ἐξεργασμένην μὲν παγκάλως καὶ πεφυτευμένην; and one of the later Roman poets celebrates it as "Corcȳra compta solum, locupleti Corcȳra sulco." (Avien. *Descr. Orb.* 663.) These praises are not undeserved; for modern writers celebrate the luxuriance and fertility of its numerous vallies. The chief production of the island now is oil, of which large quantities are exported. It also produces wine, which, though not so celebrated as in antiquity (Athen. i. p. 33, b.; Xen. *l. c.*), is still used in the town of *Corfù* and in the adjacent islands.

The most ancient name of the island is said to have been Drepane (Δρεπάνη), apparently from its

Digitized by Google

resemblance in shape to a scythe. (Apoll. Rhod. iv. 983, with Schol.; Callimach. ap. Plin. iv. 12. s. 19.) It is further said that its next name was Scheria (Σχερίη), which Homer describes as a fertile and lovely island, inhabited by the Phaeacians, an enterprizing seafaring people, the subjects of king Alcinous. (*Od.* v. 34, seq.) Although the Corcyraeans identified their island with the Homeric Scheria, and prided themselves upon the nautical fame of their Phaeacian ancestors (Thuc. i. 25), yet it is very doubtful whether the Homeric Scheria ought to be regarded as an island, which ever had any real existence. It is not unlikely that the Phaeacians are only a creation of the poet, to whom he assigns a place in the far distant West, the scene of so many marvels in the Odyssey. (Comp. Welcker, *Ueber die Homerischen Phaeaken*, in *Rheinisches Museum*, vol. i. pp. 219—283.)

The first historical fact recorded respecting Corcyra is its colonization by the Corinthians; for we may pass over the earlier Eretrian colony, which rests upon the authority of Plutarch alone. (*Quaest. Graec.* c. 11.) Archias, the founder of Syracuse, is said to have touched at Corcyra on his way to Sicily, and to have left behind him Chersicrates, one of the Heraclidae, who expelled the Liburnians, then inhabiting the island, and built the city of Corcyra, which he peopled with Corinthian settlers. (Strab. vi. p. 269; Timaeus, ap. Schol. ad Apoll. Rhod. iv. 1216.) This event we may place in B. C. 734, the date usually assigned to the foundation of Syracuse. [SYRACUSAE.] Corcyra rapidly rose to be one of the first maritime powers in Greece. We are told that it was at variance with the mother country almost from the very time of its foundation (Herod. iii. 49), which was no doubt owing to its being the commercial rival of Corinth in the western seas of Greece. The dissensions between the two states broke out into open hostilities as early as B. C. 665, when a naval engagement took place between them, which is mentioned by Thucydides as the first sea-fight on record. (Thuc. i. 13.) In B. C. 617 the Corcyraeans founded Epidamnus on the Illyrian coast; but notwithstanding their hostility to the mother country, they so far complied with Grecian usages as to choose a Corinthian as the Oekist or founder of the new colony. (Thuc. i. 24.) Periander, who ruled at Corinth from B. C. 625 to 585, reduced Corcyra to subjection in the course of his reign; but of the details of its subjugation we have no account. Herodotus tells an interesting story of the murder of Lycophron, the son of Periander, by the Corcyraeans, and of the cruel way in which Periander attempted to take revenge. (Herod. iii. 49, seq.) It was during the time that Corcyra was subject to Periander, that Apollonia and Anactorium were founded by the two states conjointly.

After the death of Periander the Corcyraeans seem to have recovered their independence; but in the Persian wars they made use of it in a manner little creditable to their Hellenic patriotism. Having promised their aid to the confederate Greeks, they sent a fleet of 60 ships, but with orders to advance no further than the promontory of Taenarus, there to await the issue of the struggle between the Persians and the Greeks, and to join the victorious party. (Herod. vii. 168.) Of their subsequent history till the time of the Peloponnesian war, we know nothing. Having quarrelled with the Corinthians respecting Epidamnus, a war ensued between the states, which was one of the immediate causes of the Peloponnesian war. As the history of this quarrel and of the war which followed is related at length in all histories of Greece, it is only necessary in this place to mention the leading events, and such as chiefly serve to illustrate the geography of Corcyra.

The first fleet, which the Corinthians sent against the Corcyraeans, was completely defeated by the latter off Cape Actium, B. C. 435. (Thuc. i. 29.) Deeply humbled by this defeat, the Corinthians spent two whole years in preparations for retrieving it: and by active exertions among their allies, they were in a condition in the third year to put to sea with a fleet of 150 sail. The Corcyraeans, unable to cope single-handed with so formidable an armament, applied for aid to the Athenians, who concluded a defensive alliance with them, fearing lest their powerful navy should fall into the hands of the Peloponnesians. Soon afterwards the war was renewed. The Corinthian fleet of 150 ships took up its station at Cape Cheimerium on the coast of Epeirus, a little south of Corcyra. The Corcyraean fleet of 110 sail, together with 10 Athenian ships, were posted at one of the islands called Sybota (Σύβοτα), now *Syboti*, which lie off the coast of Epeirus to the north of Cape Cheimerium, and opposite the coast of Corcyra, between Capes Leucimme and Amphipagus. Their land force was stationed at Leucimme. The engagement took place in the open sea between Cape Cheimerium and the Sybota; the Corcyraeans were defeated; and the Corinthians were preparing to renew the attack in the afternoon, but were deterred by the arrival of a fresh Athenian squadron, and sailed away home. (Thuc. i. 44, seq.) Each party claimed the victory. The Corinthians erected their trophy at "the continental Sybota" (ἐν τοῖς ἐν τῇ ἠπείρῳ Συβότοις), and the Corcyraeans set up theirs at the "insular Sybota" (ἐν τοῖς ἐν τῇ νήσῳ Συβότοις, Thuc. i. 54). We learn from Col. Leake that there is a sheltered bay between the two principal islands, called *Sycota*, and another between the inner island and the main. The "continental Sybota" was probably the name of a village on the inner strait. (Leake, *Northern Greece*, vol. iii. pp. 2, 3.) Shortly afterwards the island was distracted by civil dissensions between the aristocratical and democratical parties, in which the latter finally gained the upper hand, and massacred all their opponents with the most frightful atrocities, B. C. 425. (Thuc. iv. 46—48.)

Corcyra remained in the Athenian alliance till the close of the Peloponnesian war. It was the place of rendezvous for the fleet of the Athenians and their allies, which was destined to invade Sicily, B. C. 415. (Thuc. vi. 42.) Whether Corcyra was enrolled a member of the Spartan confederacy after the downfall of Athens, we are not informed: but in B. C. 375 Timotheus brought the island again under the dominion of Athens. (Xen. *Hell.* v. 4. § 64, comp. Corn. Nep. *Tim.* 2; Diod. xv. 36.) Two years afterwards, B. C. 373, a large Peloponnesian force, under the command of the Lacedaemonian Mnasippus, was sent to wrest the island from the Athenians. The Athenian fleet had already quitted Corcyra, and the inhabitants, having been defeated in battle by the invaders, were obliged to take refuge within the walls of their city. Xenophon, in a passage already referred to, describes the country at that time as in the highest state of cultivation, abounding in beautiful houses, the cellars of which were stored with excellent wine. After ravaging the country, Mnasippus laid siege to the city, which soon began

Digitized by Google

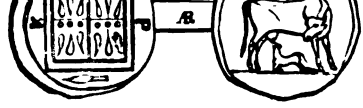
to suffer from want of provisions; but the Corcyraeans availing themselves of the negligence of the besiegers, who had become careless, through certainty of success, made a vigorous sally from the city, in which they slew Mnasippus, and many of his troops. Shortly afterwards news arrived of the approach of an Athenian fleet, whereupon the Peloponnesians quitted the island in haste. (Xen. *Hell.* vi. 2. §§ 3—26; Diod. xv. 47.)

After the death of Alexander the Great the Corcyraeans appear to have taken an active part in opposition to Cassander. In B.C. 312, they expelled the Macedonian garrisons from Apollonia and Epidamnus. (Diod. xix. 78.) In B.C. 303 Cleonymus, the Spartan king, who had collected a body of mercenaries in Italy, invaded the island and became master of the city. (Diod. xx. 104, 105.) Cleonymus appears to have quitted the island soon afterwards; for it was again independent in B.C. 300, when Cassander laid siege to the city. From this danger it was delivered by Agathocles, the tyrant of Syracuse, who burnt the Macedonian fleet. (Diod. xxi. Eclog. 2. p. 489, ed. Wesseling.) But Agathocles only expelled the Macedonians in order to appropriate the island to himself, which he is recorded to have laid waste, probably in consequence of the opposition of the inhabitants to his dominion. (Plut. *de Ser. Num. Vind.* p. 557.) Shortly afterwards Agathocles gave Corcyra as a dowry to his daughter Lanassa upon her marriage with Pyrrhus, king of Epeirus. It remained in his hands for some years; but Lanassa, indignant at being neglected by Pyrrhus for his barbarian wives, withdrew to Corcyra, and offered her hand and the island to Demetrius, king of Macedonia. Demetrius accepted her proposal, and, sailing to Corcyra, celebrated his nuptials with her, left a garrison in the island, and returned to Macedonia. This happened shortly before he was expelled from Macedonia by Pyrrhus, B.C. 287. (Plut. *Pyrrh.* 9, 10; Diod. xxi. p. 490.) Pausanias says (i. 11. § 6) that Pyrrhus conquered Corcyra soon after he had recovered his hereditary dominions; but as Pyrrhus began to reign some years before he deprived Demetrius of the Macedonian throne, it has been conjectured that he may have invaded Corcyra, while it was in the possession of Agathocles, and that the latter was contented to cede to him the island, together with his daughter Lanassa. At a later period, probably after his return from Italy, B.C. 274, Pyrrhus recovered Corcyra by the energy of his son Ptolemaeus. (Justin, xxv. 3.)

After the death of Pyrrhus Corcyra again enjoyed a brief period of independence; but the Illyrian pirates, in the reign of their queen Teuta, conquered the island after defeating the Achaean and Aetolian fleets which had come to the assistance of the Corcyraeans. Almost immediately afterwards a Roman fleet, which had been sent to punish these pirates, appeared before Corcyra; whereupon Demetrius, the Pharian, who had been left in charge of the island with an Illyrian garrison, surrendered it to the enemy without striking a blow, B.C. 229. (Pol. ii. 11.) From this time Corcyra continued in the hands of the Romans, and was an important station for their fleet in their subsequent wars in Greece. The Romans made the capital a free state (Plin. iv. 12. s. 19); but its inhabitants were so little numerous even at this period, as to give rise to the proverb Δευτέρα Κόρκυρα, χέζ' ἅπου θέλεις (Strab. x. p. 329). It is unnecessary to follow further the history of the island. In the reign of Justinian it was still called Κέρκυρα (Procop. *B. G.* iv. 22). It is now one of the seven Ionian islands under the protection of Great Britain, and the seat of government.

Corcyra, the capital of the island, was situated upon the eastern coast, upon a peninsula a little S. of the modern town of *Corfu*. This peninsula is formed on the one side by a small gulf or lagoon, called the *Peschiera*, or Lake of *Calichiopulo*; and on the other side by a bay, which separates the peninsula from the promontory occupied by the modern citadel. The peninsula is called Palaeopoli, but the only ancient remains which it contains are the ruins of a small Doric temple on the eastern shore, facing Epeirus. Of the two ports mentioned by Thucydides (ii. 72), the *Peschiera* seems to be the one which he calls Hyllaicus (Ὑλλαϊκός); and the bay between the peninsula and the modern citadel to be the one which he describes as lying towards Epeirus. Scylax speaks of three harbours, one of which was most beautiful: hence it would appear that the present harbour, although at some distance from the ancient city, was also used in ancient times. The small island of *Vido*, in front of the present harbour, is probably the island of PTYCHIA (Πτυχία), where the leaders of the aristocratical party were placed after their surrender in B.C. 425. (Thuc. iv. 46.) We learn from Thucydides (ii. 72) that the Acropolis was near the portus Hyllaicus, and the agora near the other harbour. The ancient Acropolis is the long undulating promontory south of the modern town, and did not occupy the site of the modern citadel, which is a nearly insulated rock, with its summit split into two lofty peaks. These two peaks must have been always a striking object from the ancient town, and are probably the "aerias Phaeacum arces" of Virgil (*Aen.* iii. 291), a passage from which Dodwell and others erroneously concluded that they were the Acropolis of Corcyra. In the middle ages these two rocks, which then became the citadel, were called Κορυφὼ or Κορυφοί, from whence has come, slightly corrupted, (Κορφοί) the modern name of the town and of the island. We have no further information respecting the other localities of the ancient city. Among its public buildings mention is made of temples of Zeus, Hera, Dionysus, the Dioscuri, and Alcinous. (Thuc. iii. 70, 75, 81.)

The only other city in the island was CASSIOPE (Κασσιόπη), situated upon the north-eastern extremity of the island, opposite a town upon the coast of Epeirus of the same name. Cassiope possessed a harbour, and was distant, according to Cicero (*ad Fam.* xvi. 9), 120 stadia from Corcyra. It was celebrated for its temple of Zeus Cassius, or Casius, at whose altar Nero sang: the head of the god, with the epigraph Ζεὺς Κάσιος, frequently occurs on coins. (Suet. *Ner.* 22; Plin. iv. 12. s. 19; Procop. *B. G.* iv. 22; Eckhel, vol. ii. p. 179, seq.) There are remains of the ancient town near the village, still called *Cassopo*. (Marmora, *Historia*



COIN OF CORCYRA.

di Corfu, Venice, 1672; Mustoxides, *Illustrazioni Corciresi*, Milan, 1811 – 1814, 2 vols. 8vo.; Dodwell, *Classical Tour*, vol. i. p. 32, seq.; Mure, *Tour in Greece*, vol. i. p. 1, foll.; and especially G. C. A. Müller, *De Corcyraeorum Republica*, Göttingen, 1835.)

CORCYRA NIGRA (ἡ Μέλαινα Κόρκυρα: *Curzola*, in Slavonic *Kurkar*), an island off the coast of Illyria, called the "Black," from the dark colour of the pine woods covering its sides It contained a Greek town, which was said to have been founded by the Cnidians. The island still abounds in trees, growing down to the water's edge: the proportion of land covered with wood is 43,471 acres, out of a total of 57,130. Of its ancient history we know nothing; a full account of its modern history and of the present condition of the island is given in the work of Sir G. Wilkinson, quoted below. (Strab. ii. p. 124, vii. p. 315; Mela, ii. 7; Plin iii. 26. s. 30: Sir G. Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 251, seq.)

CORDA, in Britain, mentioned by Ptolemy as one of the cities of the Selgovae. Identified, on scarcely sufficient grounds, with *Cumnock*, and with *Castle Over*, in Eskdale. [R. G. L.]

CORDES (Κόρδης, Procop. *de Aedif.* ii. 2).a small stream of Mesopotamia which rose in the M. Masius, and was a tributary of the Chaboras or *Khabûr*, itself a tributary of the Euphrates. The town of Dara was situated upon its banks. [V.]

CO'RDUBA (Κόρδυβα, Κορδύβη, Κορδούβα: *Eth.* and *Adj.* Cordubensis: *Cordoba* or *Cordova*), one of the chief cities of Hispania, in the territory of the Turduli. It stood on the right bank of the Baetis (*Guadalquivir*), a little below the spot where the navigation of the river commenced, at the distance of 1200 stadia from the sea. [Baetis.] Its foundation was ascribed to Marcellus, whom we find making it his head-quarters in the Celtiberian War. (Strab. iii. p. 141; Polyb. xxxv. 2.) It was occupied from the first by a chosen mixt population of Romans and natives of the surrounding country; and it was the first colony of the Romans in those parts. Strabo's language implies that it was a colony from its very foundation, that is, from B. C. 152. It was regarded as the capital of the extensive and fertile district of Baeturia, comprising the country between the Anas and the Baetis, the richness of which combined with its position on a great navigable river, and on the great high road connecting the E. and NE. parts of the peninsula with the S., to raise it to a position only second to Gades as a commercial city. (Strab. *l. c.*, and p. 160)

In the great Civil War Corduba suffered severely on several occasions, and was at last taken by Caesar, soon after the battle of Munda, when 22,000 of its inhabitants were put to the sword, B. C. 45. (Caes. *B. C.* ii. 19; Hirt. *Bell. Alex.* 49, 57, 59, 60, *Bell. Hisp.* 32—34; Appian, *B. C.* ii. 104, 105; Dion Cass. xliii. 32.)

Corduba was the seat of one of the four *conventus juridici* of the province of Baetica, and the usual residence of the praetor; hence it was generally regarded as the capital of the province. (Plin. iii. 1. s. 3; Appian, *Hisp.* 65.) It bore the surname of Patricia (Plin. *l. c.*; Mela, ii. 6. § 4), on account, as is said, of the number of patricians who were among the colonists; and, to the present day, *Cordova* is so conspicuous, even among Spanish cities, for the pride of its nobles in their "azure blood" that the Great Captain, Gonzalo de Cordova, used to say that "other towns might be better to live in, but none was better to be born in." (Ford, *Handbook*, p. 73.)

In the annals of Roman literature Corduba is conspicuous as the birthplace of Lucan and the two Senecas, besides others, whose works justified the epithet of "facunda," applied to it by Martial (*Ep.* i. 62. 8):—

"Duosque Senecas, unicumque Lucanum
Facunda loquitur Corduba."

(Comp. ix. 61, and the beautiful epigram of Seneca ap. Wernsdorf, *Poet. Lat. Min.* vol. v. pt. 3, p. 1364.)

Numerous coins of the city are extant, bearing the names of Corduba, Patricia, and Colonia Patricia. (Florez, *Med. de Esp.* vol. i. p. 373, vol. ii. p. 536; Mionnet, vol. i. p. 11, Suppl. vol. i. p. 21; Sestini, p. 46; Eckhel, vol. i. p. 18.) There are now scarcely any remains of the Roman city, except a ruined building, which the people dignify with the title of Seneca's House. (Florez, *Esp. Sagr.* vol. x. p. 132; Miñano, *Diccion.* vol. iii. p. 170.) The city is one of Ptolemy's places of recorded astronomical observations, having 14 hrs. 25 min. for its longest day, and being distant 3½ hrs. W. of Alexandria. (Ptol. ii. 4. § 11, viii. 4. § 4.) [P. S.]

CORDYE'NE, GORDYE'NE (Γορδυηνή, Γορδηνή, Γορδυαία: *Eth.* Γορδυαῖος, Κορδυαῖος, Καρδύεοι, Γορδυηνοί, Cordueni), a district lying to the E. of the river Tigris, and occupied by the wandering tribes of the Carduchi. (Strab. xvi. p. 747.) The name Cordyeni, like *Kurdistân*, which now or less in modern times may be said to represent it, is simply a geographical expression, signifying a mere aggregate of people without political union or intercourse.

The Romans became acquainted with it first during the campaign of Lucullus, when, after the fall of Tigranocerta, he took up his winter-quarters in this district, and received the submission of several of the petty chieftains who had been formerly subject to the yoke of Tigranes, king of Armenia. (Plut. *Lucull.* 29.) Under Pompey it was annexed to the Roman province (Dion Cass. xxxvii. 5). Corduene was one of the five provinces which Galerius wrested from the Persian king Narses; it was afterwards given up to Chosroes in the disastrous negotiation which followed on the retreat of Jovian (Amm. Marc. xxv. 7; Le Beau, *Bas Empire*, vol. iii. p. 161). The geography of this wild mountainous district has been as yet but little investigated, and further discoveries have still to be made. But a correct idea of it may be formed by considering it a region of lofty terrasses, separated by valleys, forming a series of parallel ranges of mountain elevations, the general direction of which is nearly NNW. and SSE. (Ritter, *Erdkunde*, vol. ix. p. 141; St. Martin, *Mém. sur l'Arménie*, vol. i. p. 175, *Journ. Geog. Soc.* vol. xi. p. 21, foll.) [E. B. J.]

CORDYLE (Κορδύλη) or PORTUS CORDYLE (Plin. vi. 4), a place on the coast of Pontus, 40 or 45 stadia east of Hieron Oros or *Yoros*. (Arrian, p. 17; Anon. p. 13.) Hamilton (*Researches, &c.* vol. i. p. 248) identifies it with *Akjah Kaleh*, a ruined fort on a rocky promontory, half-way between Platana and Cape *Yoros*: "it possesses a small open roadstead, called by the Turks a liman or port, to the east of the promontory." The name occurs in the Table in the form Cordile. There appears to be some confusion in Ptolemy (v. 6) about this place. [G. L.]

CORE'SSIA or CORESSUS. [CEOS.]

CORESSUS. [EPHESUS; MESSOGIS.]

CORFI'NIUM (Κορφίνιον: *Eth.* Corfiniensis: *S. Pelino*), the chief city of the Peligni, situated in the valley of the Aternus, near the point where that river suddenly makes a sharp angle, and turns from a SE. to a NE. course, which it pursues from thence to the Adriatic. It was distant 7 miles from Sulmo, and 10 from Alba Fucensis by the Via Valeria. There can be no doubt that Corfinium was from an early period the capital city of the Peligni, and one of the chief towns in this part of Italy; but no mention of its name is found in history until the outbreak of the Marsic or Social War, B. C. 90, when it was selected by the confederates to be their common capital, and the seat of their government. It was probably to the importance of its situation in a military point of view that it was mainly indebted for this distinction; for the allied nations seem to have destined it to be a permanent capital of Italy, and the rival of Rome, as they changed its name to Italica, and adorned it with a new and spacious forum and senate house, and other public buildings of a style corresponding to its intended greatness. (Strab. v. p. 241; Vell. Pat. ii. 16; Diod. xxxvii. Exc. Phot. p. 538.) But before the end of the second year of the war they were compelled to abandon their new capital, and transfer the seat of government to Aecae. (Diod. *l. c.* p. 539.) The fate of Corfinium after this is not mentioned, but it probably fell into the hands of the Romans without resistance, and in consequence did not suffer; for we find it at the outbreak of the Civil War between Caesar and Pompey, B. C. 49, still retaining its position as a city of importance and a strong fortress. On this account it was occupied by L. Domitius with 30 cohorts, and was the only place which offered any effectual resistance to the arms of Caesar during his advance through Italy. Nor was it reduced by force, but the disaffection which rapidly spread among his officers compelled Domitius to surrender after a siege of only seven days. (Caes. *B. C.* i. 15—23; Appian, *B. C.* ii. 38; Cic. *ad Att.* viii. 3, 5, ix. 7; Suet. *Caes.* 34; Plut. ii. 478—510.) From this time we hear but little of Corfinium; but inscriptions attest that it continued to be a flourishing municipal town under the Roman empire, and its prosperity is proved by the fact that its inhabitants were able to construct the aqueducts for supplying it with water, both of which are in great part hewn in the solid rock, and one of them is carried through a tunnel nearly 3 miles in length. (Romanelli, vol. iii. pp. 149—151; Orell. Inscr. 3695, 3696; Mommsen, *Inscr. Neap.* 5350, 5351.) A part of the territory of Corfinium had been assigned out to new settlers as early as the time of the Gracchi: it received a fresh body of colonists under Augustus, but never assumed the title of a colony, all inscriptions giving it that of a municipium only. (*Lib. Colon.* pp. 228, 255.) It still appears in the Itineraries as a place of importance (*Itin.* Ant. p. 310; *Tab. Peut.*), and even seems to have been in the fourth century regarded as the capital of the province of Valeria, and the residence of its rulers or governor. (Ughelli, ap. Romanelli, vol. iii. p. 151.) The period of its destruction is unknown, but it seems to have been still in existence as late as the tenth century. After that time we find a city named *Valva*, which appears to have succeeded to the site of Corfinium, but has now also disappeared, though the adjoining valley is still called *La Pianata di Valva*. The site of Corfinium is clearly marked

in the immediate neighbourhood of *Pentima* (a large village about 3 miles from *Popoli*, and 6 from *Sulmona*); the ruins of the ancient city, which are very inconsiderable, and consist of little more than shapeless fragments of buildings, are scattered round an ancient church called *San Pelino*, which was at one time the cathedral of *Valva*. But the numerous inscriptions discovered on the spot leave no doubt that this is the true site of Corfinium. The bridge over the Aternus, three miles from the latter city, is mentioned both by Caesar and Strabo, and must always have been a military point of the highest importance. Hence Domitius committed a capital error in neglecting to occupy it in sufficient force when Caesar was advancing upon Corfinium. (Caes. *B. C.* i. 16; Lucan. ii. 484—504; Strab. v. p. 242.) This bridge must evidently be the same, close to which the modern town of *Popoli* has grown up; this has been erroneously supposed by some authors to occupy the site of Corfinium. (Cluver. *Ital.* p. 758; Romanelli, vol. iii. pp. 148—156; Craven's *Abruzzi*, vol. ii. p. 18.) [E. H. B.]

CORIA, in Britain, mentioned by Ptolemy as one of the towns of the Damnii. Perhaps, *Crawford*, Colonia [COLONIA] being *Carstairs*. [R. G. L.]

CORIALLUM, a town of Gallia, at the termination of a road, in the Table, which begins at Condate (*Rennes*), the chief town of the Redones. Coriallum is 29 Gallic leagues from the next station, Legedia. D'Anville places Coriallum at *Gouril*, the name of a small harbour in the *Côtantin*, between rocks under *Cap de la Hogue*, and at the point where the mainland projects furthest into the sea. Others suppose it to be *Cherbourg*. [G. L.]

CORIENDI, in Ireland, mentioned by Ptolemy as lying between the Menapii and Brigantes, *i. e.* in the county of *Wexford*, or thereabouts. [R. G. L.]

CORI'NEA (Κορινέα, Ptol. v. 13), a district of Armenia, which, from the position assigned to it by Ptolemy (*l. c.*), is in the neighbourhood of the lake of *Van*. [THOSPITIS.] [E. B. J.]

CORINEUM, in Britain, mentioned by Ptolemy as a town of the Dobuni. Name for name, and place for place *Corin-eum*, *Cirencester*, where Roman remains are abundant. [R. G. L.]

CORINTHIACUS ISTHMUS. [CORINTHUS.]

CORINTHIACUS SINUS (Κορινθιακὸς, or Κορίνθιος κόλπος: *Gulf of Lepanto*), the gulf between Northern Greece or Hellas Proper, and the Peloponnesus. It commenced, according to Strabo (viii. p. 335, seq.), at the mouth of the Evenus in Aetolia (some said at the mouth of the Achelous) and the promontory Araxus in Achaia, and extended to the Isthmus of Corinth. It consisted of two distant portions, an outer and an inner sea, separated from one another by the narrow strait, between the promontories Rhium and Antirrhium. The inner sea, west of these promontories, was called originally the Crissaean gulf (ὁ Κρισσαῖος or Κρισσαῖος κόλπος), a name which occurs as early as in the Homeric Hymn to Apollo (Κρίσης κόλπος ἀνείρων, 431), and was used even by Thucydides (i. 107, ii. 86). But soon after the time of the latter historian, the Corinthian gulf became the more general designation (Xen. *Hell.* iv. 2. § 9; Polyb. v. 3; Liv. xxvi. 26, xxviii. 7, 8.) Still the more ancient name never went entirely out of use. While Strabo calls the whole sea, from the promontory of Araxus to the Isthmus of Corinth, by the general name of the Corinthian gulf, he gives to the sea within the promontories of Rhium and Antirrhium the specific

Digitized by Google

designation of the Crissaean gulf. (Strab. *l. c.*) It appears from Scylax that the latter sea was also called the Delphian gulf (ὁ Δελφικὸς κόλπος). Pliny, on the contrary, confines the term Corinthiacus Sinus to the inner sea, and gives the name of the Crissaean gulf to the bay near the town of Oeanthe, the modern *Gulf of Salona*. (Plin. iv. 2. s. 3, 3. s. 4.) At the eastern extremity of the inner sea there were two bays, separated from one another by the rocky promontory north of the Isthmus, the more northerly being called the Alcyonian sea (ἡ Ἀλκυονὶς θάλασσα), and the more southerly the bay of Lechaeum. [See CORINTHUS.] In one passage of Strabo (viii. p. 336) we read "the sea from Antirrhium to the Isthmus is called Alcyonis, being a portion of the Crisaean gulf;" but the text is evidently faulty, and is not in accordance with other passages of Strabo, in which the name of Alcyonis is given to the bay at the eastern extremity of the gulf, beginning at Creusa in Boeotia and the promontory Olmiae in the Corinthia. (Comp. Strab. ix. pp. 393, 400.) Hence in the passage first quoted it has been proposed with great probability to read, "the sea from Antirrhium to the Isthmus is the Crissaean gulf; but from the city Creusa it is called Alcyonis." (Groskurd, *German Translation of Strabo*, vol. ii. p. 11.)

Strabo says (viii. p. 336) that the circuit of the Corinthian gulf from the Evenus to the Araxus is 2230 stadia. Pliny (iv. 4. s. 5) makes the length 85 miles, Agathemerus (i. 4) 720 stadia. Respecting the breadth of the strait between Rhium and Antirrhium, see ACHAIA, p. 13.

The Corinthian gulf resembles a large inland lake. It is surrounded by mountains, and the heights towards the west shut out the view of the open sea. In beauty of scenery it surpasses even the most picturesque lakes of Switzerland and Northern Italy. "Its coasts, broken into an infinite variety of outline by the ever-changing mixture of bold promontory, gentle slope, and cultivated level, are crowned on every side by lofty mountains of the most majestic forms." (Leake.) Sailing from Corinth one sees in the distance, on the left the top of Erymanthus, rising like a colossal pyramid, and on the right the lofty heights of Helicon and Parnassus. (Leake, *Morea*, vol. iii. p. 397; Ulrichs, *Reisen in Griechenland*, p. 3; Curtius, *Peloponnesos*, vol. i. pp. 7, 404, 422.)

CORINTHUS (Κόρινθος: *Eth.* Κορίνθιος: *Gortho*), one of the most important cities of Greece.

I. SITUATION.

Corinth stood upon the Isthmus, which connected the northern division of Greece, or Hellas Proper, with the Peloponnesus. On either side of the Isthmus, which is a rocky and sterile plain, rise the mountains of Northern Greece and Peloponnesus respectively. The mountains to the north of the Isthmus, which bore the name of Geraneia, extend across the Isthmus from sea to sea. There are only three passes through them, of which the most celebrated, being the shortest road between Corinth and Megara, is upon the shore of the Saronic Gulf, and bore the name of the Scironian rocks. A more particular account of the Geraneian mountains is given under Megara, to which they more properly belong. [MEGARA.] The mountains to the south of the Isthmus were called the Oneian ridge, from their resemblance to an ass's back (τὸ Ὄνειον, Thuc. iv. 44; Xen. *Hell.* vi. 5. § 51; τὰ Ὄνεια, Strab. viii. p. 380).* They did not, however, occupy the whole breadth of the Isthmus. The lofty rock, which formed the citadel of Corinth, and which was hence called the Acrocorinthus, is properly an offshoot of the Oneian ridge, but is separated from the latter by a ravine, and seen from the north appears to be an isolated mountain. The Oneian ridge extends eastwards as far as the Saronic Gulf. Westward, the Acrocorinthus does not reach the sea; but there is a narrow level space between the foot of the mountain and the sea. This level space was protected by the two long walls connecting the city with its port town Lechaeum, while eastward of the city there were only two passes, through which an invading force could penetrate, one through the ravine, which separated the Acrocorinthus and the Oneian mountains (Paus. ii. 2. § 52), and the other along the shore at Cenchreae. (Xen. *Hell.* vi. 5. § 51.) Thus Corinth completely commanded the three passes, which alone led from the Isthmus to the Peloponnesus, the one upon the shore of the Corinthian Gulf being occupied by the Long Walls, the one through the ravine between the Acrocorinthus and the Oneian mountains lying under the very fortifications of the citadel, and the third upon the Saronic Gulf, being under the walls of Cenchreae. From its position, Corinth was called by the last Philip of Macedon one of the fetters of Greece; the other two being Chalcis in Euboea and Demetrias in Thessaly. (Pol. xvii. 11; Liv. xxxii. 37.)

The Corinthia (ἡ Κορινθία), or territory of Corinth, was not fertile (χώραν δ' ἔσχεν οὐκ εὔγεων σφόδρα, ἀλλὰ σκυλιάν τε καὶ τραχεῖαν, Strab. viii. p. 382). Neither the rocky sides of the Oneian and Oneian mountains, nor the stony and sandy plain of the Isthmus, were suitable for corn. The only arable land in the territory of any extent is the plain upon the coast, lying between Corinth and Sicyon, and belonging to these two cities. The fertility of this plain is praised in the highest terms by the ancient writers (agrum arvis simae fertilitatis, Liv. xxvii. 31): and such was its value, that to possess "what lies between Corinth and Sicyon" became a proverbial expression for great wealth. (Athen. v. p. 219, a.) It must be, however, be inferred from these and similar expressions, that this plain surpassed in fertility every other district in Peloponnesus; but its proximity to the wealthy and populous city of Corinth greatly enhanced its value; and hence an estate in this plain produced a much larger revenue than one of a similar size in the most fertile parts of Peloponnesus. It was watered by the mountain torrents coming from Nemea and Cleonae; and it furnished Corinth and its port towns with fruit and vegetables, but could not have yielded any large supply of corn. Of the other products of the Corinthia scarcely any mention is made; its wine was very bad (ὁ Κορίνθιος οἶνος βασανισμὸς ἐστι, Athen. i. p. 30, f.).

Shut in within this narrow territory by the mountain barriers towards the north and the sea, and unable to obtain from the soil a sufficient supply of the necessaries of life, the inhabitants were naturally led to try their fortune on the sea, to which their situation invited them. Corinth was accord-

* Strabo in this passage confounds the Oneian with the Geraneia, and erroneously represents the former as extending as far as Boeotia and Cithaeron. (Curtius, *Peloponnesos*, vol. i. p. 25.)

poses that it received the name of Corinth upon occasion of the Dorian conquest; but Homer uses both names indiscriminately. (Ἐφύρη, *Il.* vi. 152, 210; Κόρινθος, ii. 570, xiii. 664.) According to the Corinthians themselves Corinthus, from whom the city derived its name, was a son of Zeus; but the epic poet Eumelus, one of the Corinthian Bacchiadae, gave a less exalted origin to the eponymous hero. This poet carried up the history of his native place to a still earlier period than the rule of the Sisyphids. According to the legend, related by him, the gods Poseidon and Helios (the Sun) contended for the possession of the Corinthian land. By the award of Briareus Poseidon obtained the Isthmus; and Helios the rock, afterwards called the Acrocorinthus, and then Ephyra, from Ephyra, a daughter of Oceanus and Tethys, and the primitive inhabitant of the country. Helios had two sons Aeëtes and Aloeus: to the former he gave Ephyra, to the latter Asopia (Sicyon). Aeëtes, going to Colchis, left his country under the government of Bunus, a son of Hermes; upon whose death Epopeus, the son of Aloeus, obtained Ephyra as well as Asopia. Marathon, the son of Epopeus, who had left the country during his lifetime, returned at his death, and divided his territory between his sons Corinthus and Sicyon, from whom the two towns obtained their names. Corinthus dying without children, the Corinthians invited Medea from Iolcos, as the daughter of Aeëtes; and thus her husband Jason obtained the sovereignty of Corinth. Medea afterwards returned to Iolcos, leaving the throne to Sisyphus, with whom she is said to have been in love. (Paus. i. 1. § 2, i. 3. § 10; Schol. *ad Pind. Ol.* xiii. 74.) Upon this legend Mr. Grote justly remarks, that "the incidents in it are imagined and arranged with a view to the supremacy of Medea; the emigration of Aeëtes, and the conditions under which he transferred his sceptre being so laid out as to confer upon Medea an hereditary title to the throne. . . . . We may consider the legend of Medea as having been originally quite independent of that of Sisyphus, but fitted on to it, in seeming chronological sequence, so as to satisfy the feelings of those Aeolids of Corinth who passed for his descendants." (*Hist. of Greece*, vol. i. p. 165, seq.)

The first really historical fact in the history of Corinth is its conquest by the Dorians. It is said that this conquest was not effected till the generation after the return of the Heracleidae into Peloponnesus. When the Heracleidae were on the point of crossing over from Naupactus, Hippotes, also a descendant of Hercules, but not through Hyllus, slew the prophet Carnus, in consequence of which he was banished for ten years, and not allowed to take part in the enterprise. His son Aletes, who derived his name from his long wanderings, was afterwards the leader of the Dorian conquerors of Corinth, and the first Dorian king of the city. (Paus. ii. 4. § 3.) It appears from the account of Thucydides (iv. 42) that the Dorian invaders took possession of the hill called Solygeius, near the Saronic gulf, from which they carried on war against the Aeolian inhabitants of Corinth till they reduced the city.

The Dorians, though the ruling class, appear to have formed only a small proportion of the population of Corinth. The non-Dorian inhabitants must have been admitted at an early period to the citizenship; since we find mention of eight Corinthian tribes (Πάντε ἄκται, Phot., Suidas), whereas

Digitized by Google

three was the standard number in all purely Doric states. It was impossible to preserve in a city like Corinth the regular Doric institutions; since the wealth acquired by commerce greatly exceeded the value of landed property, and necessarily conferred upon its possessors, even though not Dorians, great influence and power. Aletes and his descendants held the royal power for 12 generations. Their names and the length of their reign are thus given:

		Years.
Aletes	reigned	38
Ixion	„	38
Agelas	„	37
Prymnis	„	35
Bacchis	„	35

Eudemus	„	25
Aristodemes	„	35
Agemon	„	16
Alexander	„	25
Telestes	„	12
Automenes	„	1
		327

Pausanias speaks as if Prymnis was the last descendant of Aletes, and Bacchis, the founder of a new, though still an Heracleid dynasty; but Diodorus describes all these kings as descendants of Aletes, but in consequence of the celebrity of Bacchis, his successors took the name of Bacchidae in place of that of Aletiadae or Heracleidae. After Automenes had reigned one year, the Bacchiad family, amounting to about 200 persons, determined to abolish royalty, and to elect out of their own number an annual Prytanis. The Bacchiad oligarchy had possession of the government for 90 years, until it was overthrown by Cypselus, with the help of the lower classes, in B. C. 657. (Diod. vi. fragm. 6, p. 635, Wess.; Paus. ii. 4. § 4; Herod. v. 92.) Strabo says (viii. p. 378) that the Bacchiad oligarchy lasted nearly 200 years; but he probably included within this period a portion of the time that the Bacchiads possessed the royal power. The Bacchiads, after their deposition by Cypselus, were for the most part driven into exile, and are said to have taken refuge in different parts of Greece, and even in Italy. (Plut. *Lysand.* 1; Liv. i. 34.)

According to the mythical chronology the return of the Heracleidae took place in B. C. 1104. As the Dorian conquest of Corinth was placed one generation (30 years) after this event, the reign of Aletes commenced B. C. 1074. His family therefore reigned from B. C. 1074 to 747; and the Bacchiad oligarchy lasted from B. C. 747 to 657.

Under the Bacchiadae the Corinthians were distinguished by great commercial enterprise. They traded chiefly with the western part of Greece; since the eastern sea was the domain of the Aeginetans. The sea, formerly called the Crissaean from the town of Crissa, was now named the Corinthian after them; and in order to secure the strait which led into the western waters, they founded Molycria opposite the promontory of Rhium (Thuc. iii. 102.) It was under the sway of the Bacchiadae that the important colonies of Syracuse and Corcyra were founded by the Corinthians (B. C. 734), and that a navy of ships of war was created for the first time in Greece; for we have the express testimony of Thucydides that triremes were first built at Corinth. (Thuc. i. 13.) The prosperity of Corinth suffered no diminution from the revolution, which made Cypselus despot or tyrant of Corinth. Both this prince and his son Periander, who succeeded him, were distinguished by the vigour of their administration and by their patronage of commerce and the fine arts. Following the plans of colonization, which had been commenced by the Bacchiadae, they planted numerous colonies upon the western shores of Greece, by means of which they exercised a sovereign power in these seas. Ambracia, Anactorium, Leucas, Apollonia and other important colonies, were founded by Cypselus or his son. Corcyra, which had thrown off the supremacy of Corinth, and whose navy had defeated that of the mother country in B. C. 665, was reduced to subjection again in the reign of Periander. It has been noticed by Müller that all these colonies were sent out from the harbour of Lechaeum on the Corinthian gulf; and that the only colony despatched from the harbour of Cenchreae on the Saronic gulf was the one which founded Potidaea on the coast of Chalcidice in Macedonia. (Müller, *Dor.* i. 6. § 7.)

Cypselus reigned 30 years (B. C. 657—627), and Periander 44 years (B. C. 627—583). For the history of these tyrants the reader is referred to the *Dict. of Biogr. s. vv.* Periander was succeeded by his nephew Psammetichus, who reigned only three years. He was without doubt overthrown by the Spartans, who put down so many of the Greek despots about this period. The government established at Corinth, under the auspices of Sparta, was again aristocratical, but apparently of a less exclusive character than that of the hereditary oligarchy of the Bacchiadae. The gerusia was probably composed of certain noble families, such as the Oligaethidae mentioned by Pindar, whom he describes as ἄνδρες ἄριστοι. (Pind. *Ol.* xiii. 2. 133.) From the time of the deposition of Psammetichus Corinth became an ally of Sparta, and one of the most powerful and influential members of the Peloponnesian confederacy. At an early period the Corinthians were on friendly terms with the Athenians. They refused to assist Cleomenes, king of Sparta, in restoring Hippias to Athens, and they lent the Athenians 20 ships to carry on the war against Aegina (Herod. v. 92; Thuc. i. 41); but the rapid growth of the Athenian power after the Persian war excited the jealousy of Corinth; and the accession of Megara to the Athenian alliance was speedily followed by open hostilities between the two states. The Corinthians marched into the territory of Megara, but were there defeated with great loss by the Athenian commander Myronides, B. C. 457. (Thuc. i. 103—106.) Peace was shortly afterwards concluded; but the enmity which the Corinthians felt against the Athenians was still further increased by the assistance which the latter afforded to the Corcyraeans in their quarrel with Corinth. This step was the immediate cause of the Peloponnesian war; for the Corinthians had exerted all their influence to persuade Sparta and the other Peloponnesian states to declare war against Athens.

In the Peloponnesian war the Corinthians at first furnished the greater part of the Peloponnesian fleet. Throughout the whole war their enmity against the Athenians continued unabated; and when the Spartans concluded with the latter in B. C. 421 the peace usually called the peace of Nicias, the Corinthians refused to be parties to it, and were so indignant with Sparta, that they endeavoured to form a new Peloponnesian league with Argos, Mantinea and

In the following 4, a battle was fought near Corinth llied Greeks and the Lacedaemonians, latter gained the victory (Xen. *Hell.* .) Later in the same year the Co- ht a second battle along with the other oneia in Boeotia, whither they had pose Agesilaus, who had been recalled the Persians, and was now on his ards. The Spartans again gained the not without much loss on their own *Hell.* iv. 3. § 15, seq., *Ages.* ii. 9. seq.) 3 and 392 the war was carried on in territory, the Spartans being posted the allies maintaining a line across the Lechaeum to Cenchreae, with Corinth

A great part of the fertile plain be- and Corinth belonged to the latter state; hian proprietors suffered so much from n of their lands, that many of them be- to renew their old alliance with Sparta. er of the other Corinthians participated gs, and the leading men in the govern- re violently opposed to Sparta, became the wide-spread disaffection among the they introduced a body of Argives into g the celebration of the festival of the assacred numbers of the opposite party -place and in the theatre. The govern- ow dependent upon Argos, formed a th this state, and is said to have even heir Corinthian territory with that of have given the name of Argos to their the opposition party at Corinth, which erous, contrived to admit Praxitas, the n commander at Sicyon, within the long nnected Corinth with Lechaeum. In een the walls, which was of consider- and about 1½ mile in length, a battle ween the Lacedaemonians and the Co- had marched out of the city to dis- he Corinthians, however, were defeated, y was followed by the demolition of a rt of the long walls by Praxitas. The Lacedaemonians now marched across the Isthmus, and captured Sidus and Crommyon. These events happened in B.C. 392. (Xen. *Hell.* iv. 4. § 1, seq.)

The Athenians, feeling that their own city was no longer secure from an attack of the Lacedaemonians, marched to Corinth in the following year (B.C. 391), and repaired the long walls between Corinth and Lechaeum; but in the course of the same summer Agesilaus and Teleutias not only retook the long walls, but also captured Lechaeum, which was now garrisoned by Lacedaemonian troops. (Xen. *Hell.* iv. 4. §§ 18, 19; Diod. xiv. 86, who erroneously places the capture of Lechaeum in the preceding year; see Grote, *Hist. of Greece*, vol. ix. p. 471, seq.) These successes, however, of the Lacedaemonians were checked by the destruction in the next year (B.C. 390) of one of their morae by Iphicrates, the Athenian general, with his peltasts or light-armed troops. Shortly afterwards Agesilaus marched back to Sparta; whereupon Iphicrates retook Crommyon, Sidus, Peiraeum and Oenoë, which had been garrisoned by Lacedaemonian troops. (Xen. *Hell.* iv. 5. § 1, seq.) The Corinthians appear to have suffered little from this time to the end of the war, which was brought to a conclusion by the peace of Antalcidas in B.C. 387. The effect of this peace was the restoration of Corinth to the Lacedaemonian alliance: for as soon as it was concluded, Agesilaus compelled the Argives to withdraw their troops from the city, and the Corinthians to restore the exiles who had been in favour of the Lacedaemonians. Those Corinthians who had taken an active part in the massacre of their fellow-citizens at the festival of the Eucleia fled from Corinth, and took refuge, partly at Argos, and partly at Athens. (Xen. *Hell.* v. 1. § 34; Dem. *c. Lept.* p. 473.)

In the war between Thebes and Sparta, which soon afterwards broke out, the Corinthians remained faithful to the latter; but having suffered much from the war, they at length obtained permission from Sparta to conclude a separate peace with the Thebans. (Xen. *Hell.* vii. 4. § 6, seq.) In the subsequent events of Grecian history down to the Macedonian period, Corinth took little part. The government continued to be oligarchical; and the attempt of Timophanes to make himself tyrant of Corinth was frustrated by his murder by his own brother Timoleon, B.C. 344. (Diod. xvi. 65; Plut. *Tim.* 4; Cornel. Nep. *Tim.* 1; Aristot. *Polit.* v. 5. § 9.) From the time of the battle of Chaeroneia, Corinth was held by the Macedonian kings, who always kept a strong garrison in the important fortress of the Acrocorinthus. In B.C. 243 it was surprised by Aratus, delivered from the garrison of Antigonus Gonatas, and annexed to the Achaean league. (Pol. ii. 43.) But in B.C. 223 Corinth was surrendered by the Achaeans to Antigonus Doson, in order to secure his support against the Aetolians and Cleomenes. (Pol. ii. 52, 54.) It continued in the hands of Philip, the successor of Antigonus Doson; but after the defeat of this monarch at the battle of Cynoscephalae, B.C. 196, Corinth was declared free by the Romans, and was again united to the Achaean league. The Acrocorinthus, however, as well as Chalcis and Demetrias, which were regarded as the three fortresses of Greece, were occupied by Roman garrisons. (Pol. xviii. 28, 29; Liv. xxxiii. 31.)

When the Achaeans were mad enough to enter into a contest with Rome, Corinth was the seat of government of the Achaean league, and it was here that the Roman ambassadors were maltreated, who

Digitized by Google

had been sent to the League with the ultimatum of the senate. The Achaean troops were at once defeated, and L. Mummius entered Corinth unopposed. The vengeance which he took upon the unhappy city was fearful. All the males were put to the sword, and the women and children sold as slaves. Corinth was the richest city in Greece, and abounded in statues, paintings, and other works of art. The most valuable works of art were carried to Rome; and after it had been pillaged by the Roman soldiers, it was at a given signal set on fire; and thus was extinguished what Cicero calls the *lumen totius Graeciae* (B.C. 146). (Strab. viii. p. 381; Pol. xl. 7; Paus. ii. 1. § 2, vii. 16. § 7; Liv. *Epit.* 52; Flor. ii. 16; Oros. v. 3; Vell. Pat. i. 13; Cic. *pro Leg. Man.* 5.)

Corinth remained in ruins for a century. The site on which it had stood was devoted to the gods, and was not allowed to be inhabited (Macrob. *Sat.* iii. 9); a portion of its territory was given to the Sicyonians, who undertook the superintendence of the Isthmian games (Strab. viii. p. 381); the remainder became part of the ager publicus, and was consequently included in the vectigalia of the Roman people. (Lex Thoria, c. 50; Cic. *de Leg. Agr.* i. 2, ii. 19.) The greater part of its commerce passed over to Delos. In B.C. 46 Julius Caesar determined to rebuild Corinth, and sent a numerous colony thither, consisting of his veterans and freedmen. (Strab. viii. p. 381; Paus. ii. 1. § 2; Plut. *Caes.* 57; Dion Cass. xliii. 50; Diod. *Excerpt.* p. 591, Wess.; Plin. iv. 4. s. 5.) Henceforth it was called on coins and inscriptions COLONIA IVLIA CORINTHVS, also LAVS IVLI CORINT., and C. I. C. A., i. e., Colonia Julia Corinthus Augusta. The colonists were called Corinthienses, and not Corinthii, as the ancient inhabitants had been named. (Festus, p. 60, ed. Müller.) It soon rose again to be a prosperous and populous city; and when St. Paul visited it about 100 years after it had been rebuilt by the colony of Julius Caesar, it was the residence of Junius Gallio, the proconsul of Achaia. (*Acta Apost.* xviii. 12.) St. Paul founded here a flourishing Christian church, to which he addressed two of his epistles. When it was visited by Pausanias in the second century of the Christian era, it contained numerous public buildings, of which he has given us an account; and at a still later period it continued to be the capital of Achaia. (Hierocl. p. 646; Böckh, *Inscr. Graec.* no. 1086.)

III. Art, Literature, Character, &c.

It has been already noticed that Corinth was one of the earliest seats of Grecian art. (Strab. viii. p. 382.) It was in this city that painting was said to have been invented by Ardices, Cleophantus, and Cleanthes (Plin. xxxv. 5), and at the time of its capture by the Romans it possessed some of the finest paintings in Greece. Among these was the celebrated picture of Dionysus by Aristeides of Thebes, for which Attalus offered the sum of 600,000 sesterces, and which was afterwards exhibited at Rome in the temple of Ceres. (Strab. viii. p. 381; Plin. xxxv. 8.) The numerous splendid temples which the wealth of the Corinthians enabled them to erect gave an impulse to architecture; and the most elaborate order of architecture was, as is well known, named after them. Statuary also flourished at Corinth, which was particularly celebrated for its works in bronze; and the name of *Aes Corinthiacum* was given to the finest kind of bronze. (See *Dict. of Ant.* p. 25, 2nd ed.) One of the earlier works of Corinthian art, which retained its celebrity in later times, was the celebrated chest of Cypselus, made of cedar-wood and adorned with figures. It was dedicated at Olympia, where it was seen by Pausanias, who has given a minute description of it (v. 17. seq.). The Corinthian vases of terra cotta were among the finest in Greece; and such was their beauty, that all the cemeteries of the city were ransacked by the collectors of Julius Caesar, who sent them to Rome, where they fetched enormous prices. (Strab. viii. p. 381.)

In the time of Periander poetry likewise flourished at Corinth. It was here that Arion introduced those improvements into the dithyramb, which caused him to be regarded as its inventor, and which led Pindar to speak of Corinth as the city in which Μοῦσα ἀδύπνοος ἀνθεῖ. (Herod. i. 23; Pind. *Ol.* xiii. 31.) Among the most ancient Cyclic poets we also find the names of Aeson, Eumelus, and Eumolpus, all of whom were natives of Corinth. (Schol. ad Pind. *l. c.*) But after the time of Periander little attention was paid to literature at Corinth; and among the illustrious writers of Greece not a single Corinthian appears. It is mentioned by Cicero that Corinth did not produce an orator (*Brut.* 13); and Diogenarchus, the last and least important of the Attic orators, is no exception, since, though a native of Corinth, he was brought up at Athens, and practised his art in the latter city.

The wealth of the Corinthians gave rise to luxury and sensual indulgence. It was the most luxurious city in all Greece; and the number of merchants who frequented it caused it to be the favourite resort of courtezans. The patron goddess of the city was Aphrodite, who had a splendid temple on the Acrocorinthus, where there were kept more than a thousand sacred female slaves (*ἱερόδουλοι*) for the service of strangers. (Strab. viii. p. 378.) Hence they are called by Pindar (*Fragm.* p. 244, Bergk) ἁβρὰς λύξεναι νεάνιδες, ἀμφίπολοι Πειθοῦς ἐν εὐπύργῳ Κορίνθῳ. In no other city of Greece do we meet with institution of *Hierodouli* as a regular part of the worship of Aphrodite; and there can be no doubt that it was introduced into Corinth by the Phoenicians. [See above, p. 675, a.] Many of the Corinthian courtezans, such as Lais, obtained such high sums as often to ruin the merchants who visited the city; whence arose the proverb (Strab. viii. p. 378): —

οὐ παντὸς ἀνδρὸς ἐς Κόρινθον ἔσθ' ὁ πλοῦς

which Horace renders (*Ep.* i. 17. 36): —

"Non cuivis homini contingit adire Corinthum."

So celebrated were the Corinthian courtezans that they gave rise to many other proverbial expressions (Κορινθιάζεσθαι = μαστροπεύειν ἢ ἑταιρεῖν, Phot. ix. 6. § 75; Κορινθία κόρη, i. e. a courtezan, Plat. *Rep.* iii. p. 404, d.; so Κορινθία ναῦς, Pollux, § 25; Suidas, *s. v.* χοῖρος; Müller, *Dor.* iv. 4.

IV. Topography of the City and of its Port-Towns.

Of the topography of the ancient city before the destruction by Mummius we know next to nothing, but of the new city which was built by the Roman colonists, both Strabo (viii. p. 379) and Pausanias (ii. 2, seq.) have left us an account. The following is the description of Strabo: — "A lofty mountain called Acrocorinthus, being 3½ stadia in perpendicular height and 30 stadia in the ascent by a

in a sharp point. Its northern side epest, under which the city lies upon a in the form of a trapezium, close to the of the Acrocorinthus. The city itself dia in circumference, and was surrounded wherever it was not protected by the The mountain of the Acrocorinthus also d within the same inclosure, so far as it receive a wall; and as we ascended, the the line of fortifications were visible. The it of the walls amounted to about 85 sta- he other sides the mountain is less steep, re spread out further, and presents a wide On the summit is a small temple of and under the summit is the small foun- ene, having no outlet, but always full of rinkable water. They say that from this d from some other subterraneous veins n bursts forth, which is at the foot of the nd which flows into the city, supplying ith a sufficiency of water. There is also ce of wells in the city; and, as it is said, corinthus likewise, but we did not see w the Peirene is the Sisypheium, pre- siderable remains of a temple or palace ite marble. From the summit towards re seen the lofty mountains of Parnassus , covered with snow."

account of the Acrocorinthus is very ac- his estimate of the height agrees very that of the French surveyors, according e perpendicular height of the mountain a is 575 metres, equal to 1886 English is equal to three stadia and a tenth at the stadium. (Leake, *Peloponnesiaca*, All modern travellers agree that the Acro- ising abruptly and isolated from the plain, e most striking objects of its class that r seen. Col. Mure observes that "neither is of Athens, nor the Larissa of Argos, nor more celebrated mountain fortresses of rope — not even Gibraltar — can enter into t competition with this gigantic citadel. hose objects more frequently, perhaps, to in Greece than in any other country of which no drawing can convey other than t notion. The outline, indeed, of this s of rugged rock and green sward, inter- e and there, but scantily, with the cus- ge of shrubs, although from a distance it fine composition with the surrounding an in itself hardly be called picturesque; nal line of embattled Turkish or Venetian crowns the summit, does not set it off e. Its vast size and height produce the ect, as viewed from the seven Doric co- ding nearly in the centre of the wilderness nd hovels that now mark the site of the t formerly protected." The Acrocorinthus cribed by Livy (xlv. 28) as, "arx in im- ndinem edita;" and Statius is not guilty ggeration in the lines (*Theb.* vii. 106):

"qua summas caput Acrocorinthus in auras
lterna geminum mare protegit umbra."

rom the Acrocorinthus comprehends "a ber of celebrated objects than any other Hymettus bounds the horizon to the nd the Parthenon is distinctly seen at a nce of not much less than 50 English miles. Beyond the isthmus and bay of Lechaeum are seen all the great summits of Locris, Phocis, Boeotia, and Attica, and the two gulfs from the hill of *Koryfé* (Gonoessa) on the Corinthiac, to Sunium at the entrance of the Saronic gulf. To the westward the view is impeded by a great hill, which may be called the λῆμμα, or eye-sore, of the Acrocorinthus, especially with regard to modern war. Its summit is a truncated peak, which may be reached on horseback, by turning to the right of the road which leads to the Acrocorinthus, at a small distance short of the first gate." (Leake.)

The city of Corinth lay at the northern foot of the Acrocorinthus. It did not stand in the plain, but upon a broad, level rock, which is nearly 200 feet in height above the plain, lying between it and the bay of Lechaeum. Across this plain, as we have already mentioned, ran the long walls connecting Corinth and its port-town Lechaeum.

Corinth was one of the largest cities in Greece, and was in size inferior only to Athens. According to Strabo the walls of the city were 40 stadia, and those of the city and Acrocorinthus together 85 stadia. Each of the two Long Walls connecting Corinth and Lechaeum was 12 stadia in length; and adding to these the fortification of Lechaeum, the whole circuit of the fortifications was about 120 stadia; but a considerable portion of the space thus included was probably not covered with houses. The fortifications were very strong; and so lofty and thick were the walls, that Agis, the son of Archidamus, is reported to have exclaimed upon beholding them, "What women are these that dwell in this city." (Plut. *Apophth. Lac.* p. 215.) Of the population of Corinth we have no trustworthy accounts. Clinton computes the population of the whole state at about 100,000 persons, of whom he supposes 70,000 or 80,000 to have inhabited the city, and the remaining 20,000 or 30,000 to have been distributed through the country. According to a statement in Athenaeus (vi. p. 272) Corinth had 460,000 slaves; but this number is quite incredible, and ought probably to be corrected to 60,000. In that case the free popula-

tion would have been about 40,000. These numbers of Clinton, however, are only conjectural, and are at the best only an approximation to the truth. (Clinton, *Fasti Hell.* vol. ii. p. 423, 2nd ed.)

Notwithstanding the destruction of Corinth by Mummius, some of the ancient buildings still existed at a later time. Pausanias begins his description of the city by stating that "it contained many things worthy of notice, some being the relics of the ancient city, but the greater part executed in the flourishing period afterwards" (ii. 2. § 6). He appears to have come to Corinth from Cenchreae. The road leading to the city was lined with sepulchral monuments; and on either side of the road was a grove of cypresses adorned with temples of Bellerophon and Aphrodite, the sepulchre of Lais, and many other monuments. This suburb, called CRANEION (Κράνειον), was the aristocratic quarter of the city, and the favourite place of residence of the wealthy Corinthians, like Collytus at Athens, and Pitane at Sparta (Plut. *de Exsil.* 6, p. 601; see ATHENAE, p. 302, a.) Hence it was the chief promenade of Corinth. Here Diogenes of Sinope used to bask in the sun, a striking contrast to the luxury and splendour around him; and close to the city gate his tomb was still shown even in the time of Pausanias. (Paus. ii. 2 § 4; Alciphr. iii. 60; Lucian, *Quom. Hist. conscrib.* 3.) Xenophon mentions the Craneium in his account of the civil dissensions of Corinth in B. C. 392, as the place where one of the parties took refuge and from thence escaped to the Acrocorinthus. (*Hell.* iv. 4. § 4.)

Upon entering Corinth through the gate which probably bore the name of Cenchreae, Pausanias proceeded to the Agora, where the greatest number of temples stood. He mentions an Artemis Ephesia; — two wooden statues of Dionysus; — a temple of Tyché (Fortune);—a temple sacred to all the gods; — near the latter a fountain, issuing from a dolphin at the foot of a Poseidon in bronze; — statues of Apollo Clarius, Aphrodite, Hermes, and Zeus. In the middle of the Agora was a statue of a bronze Athena, on the basis of which were the figures of the Muses in the relief. Above the Agora was a temple of Octavia, the sister of Augustus (ii. 2. § 6 —ii. 3. § 1).

From the Agora four principal streets branched off, one leading to Cenchreae, by which Pausanias entered the city, the second leading to Lechaeum, the third to Sicyon, and the fourth to the Acrocorinthus.

Pausanias next describes the monuments on the road towards Lechaeum. On leaving the Agora to go to Lechaeum a person passed through the Propylaea, on which stood two gilded chariots, one bearing Phaethon and the other the Sun. A little beyond, to the right of the road, was the fountain of Peirene. This fountain was adorned with white marble; and the water flowed from certain artificial caverns into an open receptacle. It was pleasant to drink, and was said to have contributed to the excellence of the Corinthian bronze, when it was plunged into the water red hot (ii. 3. §§ 2, 3). Further on in his account of the Acrocorinthus, Pausanias says that a fountain rises behind the temple of Aphrodite on the summit of the mountain, and that this fountain is supposed to be the same as that of Peirene in the city, and that the water flowed underground from the former to the latter (ii. 5. § 1). This agrees with the statement of Strabo already quoted so far as relates to the rise of the Peirene in the Acrocorinthus, and its connection with the fountain in the lower city; but the two writers differ respecting the position of the latter fountain, Strabo placing it at the foot of the Acrocorinthus, and Pausanias on the road from the Agora to Lechaeum. It would thus appear that there were three sources at Corinth, all of which were at some period of time at least known by the name of Peirene. Col. Leake remarks that all the three are still observable; namely, the well in the Acrocorinthus, the rivulet which issue at the foot of that hill as described by Strabo, and the single source below the brow of the height on which the town is situated, in the position alluded to by Pausanias. The same author adds, with much probability, that "it is not difficult to imagine, that between the times of Strabo and Pausanias a change may have taken place in the application of the name Peirene in the lower city, in consequence of the water of the northern fountain having been found by experience better than that at the sources at the foot of the Acrocorinthus. The practice of the modern Corinthians gives countenance to this supposition; for they use the former fountain alone for drinking, while the water which issues from below the Acrocorinthus, instead of being thought the lightest in Greece, as Athenaeus describes that of Peirene, is considered heavy: the water is little used for drinking, and the springs are the constant resort of women washing clothes. As the remark of Athenaeus is nearly of the same date as the description of Pausanias (ii. p. 43, b.), it is fair to apply them both to the same source of water." (*Morea*, vol. iii. p. 242, seq.) The grotto containing the fountain of Peirene upon the Acrocorinthus is described by Göttling in the *Archäologische Zeitung* for 1844 (p. 326, seq.). A representation of it is given in the *Dict. of Ant.* (p. 544, 2nd ed.)

The fountain of Peirene is frequently mentioned by the ancient writers. So celebrated was it that Corinth is called by Pindar "the city of Peirene" (ἄστυ Πειράνας, Pind. *Ol.* xiii. 86), and the Corinthians are described in one of the oracles of the Pythia at Delphi, as "those dwelling around the beautiful Peirene" (*οἱ περὶ καλὴν Πειρήνην οἰκέετε*, Herod. v. 92). The fountain in the lower city was the favourite place of resort of the Corinthian elders, where they used to assemble to play at draughts and converse with one another (*σεμνὸν ἀμφὶ Πειρήνης ῥόον*, Eurip. *Med.* 69.) It was at the fountain of Peirene that Bellerophon is said to have caught the winged horse Pegasus, which is hence called by Euripides the Peirenaean steed. (Eurip. *Electr.* 475; Strab. viii. p. 379.) As Pegasus was in some legends represented as the horse of the Muses, Peirene is mentioned by the Roman poets as a fountain sacred to these goddesses. (Stat. *Silv.* i. 4. 2; Pers. *Prolog.* 4.) The Roman poets frequently use the adjective *Pirenis* in the general sense of Corinthian. (Ov. *Met.* vii. 391, *ex Pont.* i. 3. 75.)

Notwithstanding the excellence of the water of the Peirene, the inhabitants of the Roman colony were not contented with it; and the Emperor Hadrian accordingly constructed an aqueduct 20 miles in length, to bring water for them from Stymphalus. This aqueduct, as well as the native sources, supplied the public baths and fountains, which abounded in Corinth. (Paus. ii. 3. § 5, viii. 22. § 3.) Some remains of this aqueduct may still be seen not far from the sea, west of Corinth, near some mills near the river *Lungo-potamos*. (Stauffert, in the Appendix to Forster's *Barbeitung*, 1844, p. 70.)

ορυφὴν πύλαι, Polyaen. iv. 17. § 8).
thing remains of ancient Corinth.
tant relics are seven Doric columns
outskirts of the modern town. Five
s belonged to one of the fronts of a
ree (counting the angular column
twice) to one of the sides of the peristyle. The diameter of the columns, 5 feet 10 inches, is greater than that of any other columns of the same order now existing in Greece. When Wheeler visited Greece in 1676, there were twelve columns standing; and the ruin was in the same state when described by Stuart 90 years afterwards. It was in its present condition when visited by Mr. Hawkins in 1795. This temple appears to have had originally six columns in front. It is conjectured by Leake to have been the temple of Athena Chalinitis. At a short distance to the northward of these seven columns, on the brow of the cliffs overlooking the plain and bay of Lechaeum, Leake remarked upon an artificial level, the foundations of a large building, and some fragments of Doric columns, sufficient, in his opinion, to prove that in this spot there stood another of the principal edifices of *Grecian* Corinth. He supposes that it was a hexastyle temple, about 75 feet in breadth, and that from its dimensions and position, it was one of the chief temples of the lower city. He further conjectures that this was the temple of Apollo, which Pausanias describes as on the road to Sicyon; and that as the temple of Aphrodite was the chief sanctuary on the Acrocorinthus, so this of Apollo was the principal sacred building in the lower city. This seems to be supported by the fact mentioned by Herodotus, that in the edict issued by Periander, whoever held any converse with his son, Lycophron, was to pay a fine to Apollo. (Herod. iii. 52.)

Besides these remains of Grecian Corinth, there are ruins of two buildings of Roman Corinth. The Roman remains are:—1. A large mass of brickwork on the northern side of the bazaar of modern Corinth, perhaps a part of one of the baths built by Hadrian. 2. An amphitheatre, excavated in the rock on the eastern side of the modern town. As this amphitheatre is not noticed by Pausanias, it is possibly a work posterior to his time. The area below is 290 feet by 190: the thickness of the remaining part of the caves is 100 feet. At one end of the amphitheatre are the remains of a subterraneous entrance for the wild beasts, or gladiators. This amphitheatre is apparently the place of meeting of the Corinthians, described in a passage of Dion Chrysostom, to which Leake has directed attention (*ἔξω τῆς πόλεως ἐν χαράδρᾳ τινὶ, πλήθος μὲν δυναμένῳ δέξασθαι, τόπῳ δὲ ῥυπαρῷ ἄλλως*, *Or. Rhod.*, p. 347, Morell; Leake, *Peloponnesiaca*, p. 393).

The most important of the isolated antiquities of Corinth is the *περιστόμιον* or mouth of an ancient well, the exterior of which is sculptured with ten figures of divinities in very low relief. This beautiful work of art, which was seen by Dodwell, Leake and others in the garden of Notarà's house at Corinth, is now in London, in the collection of the Earl of Guildford. The subject represents the introduction of Aphrodite into Olympus. (Dodwell, *Classical Tour*, vol. ii. p. 200; Leake, *Morea*, vol. iii. p. 264; Welcker, *Alte Denkmäler*, vol. ii. p. 27.) Curtius noticed before the present government buildings a fine torso of Aphrodite. It has been asserted, but without proof, that the four bronze horses of St. Mark at Venice, came from Corinth.

Corinth is now a small town, but is extremely unhealthy in the summer and autumn in consequence of the malaria, for which it is difficult to account, as it receives the sea breezes from either side. It is called by the inhabitants *Gortho*, which is only a corruption of the ancient name.

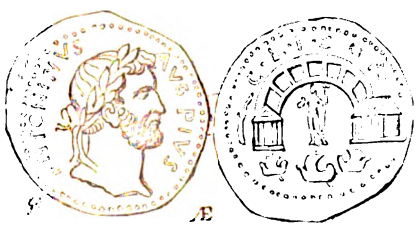
Port-Towns.—Lechaeum (τὸ Λεχαῖον, Lecheae, Plin. iv. 4. s. 5; Lecheum, Stat. *Silv.* iv. 3. 59), the port on the Corinthian gulf connected with the city by means of the Long Walls, 12 stadia in length, already mentioned. (Strab. viii. p. 380; Xen. *Hell.* iv. 4. § 17.) The Long Walls ran nearly due north, so that the wall on the right hand was called the eastern, and the one on the left hand the western or Sicyonian. The space between them must have been considerable; since, as we have already seen, there was sufficient space for an army to be drawn up for battle. [See above, p. 677, a.] The flat country between Corinth and Lechaeum is composed only of the sand washed up by the sea; and the port must have been originally artificial (χωστὸς λιμήν, Dionys.), though it was no doubt rendered both spacious and convenient by the wealthy Corinthians. The site of the port is now indicated by a lagoon, surrounded by hillocks of sand. Lechaeum was the chief station of the Corinthian ships of war; and during the occupation of Corinth by the Macedonians, it was one of the stations of the royal fleet. It was also the emporium of the traffic with the western parts of Greece, and with Italy and Sicily. The proximity of Lechaeum to Corinth prevented it from becoming an important town like Peiraeeus. The only public buildings in the place mentioned by Pausanias (ii. 2. § 3) was a temple of Poseidon, who is hence called Lechaeus by Callimachus. (*Del.* 271.) The temple of the Olympian Zeus was probably situated upon the low ground between Corinth and the shore of Lechaeum. (Paus. iii. 9. § 2; Theophr. *Caus. Plant.* v. 14.)

Cenchreae (Κεγχρεαί, Strab. viii. p. 380; Paus. ii. 2. § 3; Ptol. iii. 16. § 13; Κεγχρειά, Thuc. iv. 42; Κεγχρειαί, Thuc. viii. 20; Κερχνίς, Callim. *Del.* 271; Cenchreis or Cenchris, Ov. *Trist.* i. 10. 9), the port of the Saronic gulf, was distant from Corinth about 70 stadia, and was the emporium of the trade with Asia. (Strab. *l. c.*) This port was not simply an artificial one, like that of Lechaeum. It is a bay protected by two promontories on the north and south, from which the Corinthians carried out moles, as the existing remains prove, in order to render the harbour more secure. On a Corinthian coin of Antoninus Pius (figured below) the port of Cenchreae is represented as inclosed between two promontories, on each of which stands a temple, and between them at the entrance of the harbour a statue of Poseidon, holding a trident in one hand and a dolphin in the other. This agrees with the description of Pausanias, from whom we learn that the brazen Poseidon stood upon a rock in the sea, that to the right of the entrance was the temple of Aphrodite, and to the left, in the direction of the warm springs, were the sanctuaries of Asclepius and of Isis (Paus. ii. 2. § 3, in which passage instead of ἐκατέρᾳ we ought either to adopt Leake's emendation, ἑκατὶ, or else κἀκατι.)



Colonial Coin of Corinth.—(On the obverse the head of Antoninus Pius: on the reverse the port of Cenchreae. The letters C.L.I. COR. stand for COLONIA LAVS IVLIA CORINTHVS: see above, p. 678, a.)

Cenchreae is mentioned in the history of St. Paul (*Act. Apost.* xviii. 18; *Ep. ad Rom.* xvi. 1.) It is now deserted, but it retains its name in the form *Kekhriés*. The ancient town stood upon the slope of the hill above the town, as the numerous remains of its foundations prove. Between this hill and the heights to the right and the left there were two small plains, through one of which ran the road leading to Schoenus, and through the other the road leading to Corinth.

HARBOUR OF CENCHREAE.
A. Site of the town.
a a. Road to Corinth.
b b. Road to Schoenus.

Pausanias mentions (*l. c.*) certain luke-warm salt-springs, flowing from a rock into the sea over against Cenchreae, and called the bath of Helen. They are found about a mile SW. of Cenchreae, on the west promontory. They rise at a sufficient distance and flow from the sea to turn a mill in their passage.

The road from Cenchreae to Corinth ran in a southwesterly direction through a narrow valley shut in by two ranges of mountains, which almost serve the purpose of long walls. On the left hand are the high ranges of the Oneian mountains: on the right the continuation of the heights on which Acrocorinthus stood.

V. The Isthmus.

The most important part of the territory of Corinth was the Isthmus, both as the place across which merchandize was carried from the eastern to the western sea, and more especially as being the seat of the celebration of the Isthmian games. The word *Isthmus* (Ἰσθμός) probably comes from the root *i*, which appears in *i-éναι* "to go," as in the Latin *i-re*, and hence originally meant a passage. From being the proper name of this spot, it came to be applied to the neck of any peninsula. The situation of the Isthmus, a stony plain lying between the mountain barriers of the Geraneia on the north and the Oneia on the south, has been already described. [See above, p. 674.] The word was used both in a wider and a narrower signification. In its wider use it indicated the whole land lying between the two gulfs, and hence Corinth is said to have been situated on the Isthmus (Κόρινθος ἐπὶ τῷ Ἰσθμῷ

n sanctuary lies rather less than a of Schoenus. It was a level spot, of uadrangular form, containing the ion and other sanctuaries, and was ll sides by a strong wall, which can traced. The northern and north- the enclosure were protected by the tended across the Isthmus, and of speak presently. On the other sides by its own walls, which are in some n 12 feet thick. The enclosure is in length; but its breadth varies, feet broad on the north and north- 300 feet broad at its southern end. ll as the way in which it was con- Isthmic wall, is shown in the an- ied from Curtius, which is taken nprovement from Leake. The in- closure is a heap of ruins, which in earthquakes and other devastating en so mixed, that it is impossible ive excavations to discover the he different buildings.

THE ISTHMIAN SANCTUARY.

ary. C. The Theatre.
m. a a. Road to Schoenus.

Pausanias's account of the Isthmian sanctuary is unusually brief and unsatisfactory (ii. 1). He came to it from the port. Towards his left he saw the stadium and theatre, both constructed of white marble, of which there are still some vestiges. Both lay outside the sacred enclosure, the stadium towards the south, and the theatre towards the west. Here the Isthmian games were celebrated; and these buildings were connected with the sacred enclosure by a grove of pine trees. (Strab. viii. p. 380.) The main gate of the sanctuary appears to have been in the eastern wall, through which Pausanias entered. The road leading from this gate to the temple of Poseidon, was lined on one side by the statues of conquerors in the Isthmian games, and on the other side by a row of pine trees. Upon the temple, which was not large, stood Tritons, probably serving as weather-cocks, like the Triton on the Horologium of Andronicus Cyrrhestes at Athens. In the pronaus Pausanias saw two statues of Poseidon, and by their side statues of Amphitrite and Thalassa. The principal ornament of the cella was a magnificent gift of Herodes Atticus, consisting of four gilded horses with ivory hoofs, drawing the chariot of Poseidon, Amphitrite and Palaemon. The chariot rested upon a base, on which were represented in bas-relief Thalassa with her child Aphrodite in the centre, while on either side were the Nereids. The fragments of Doric columns found within the enclosure may be assigned to this temple. Leake measured the end of the fluting of one of these shafts, and found it ten inches and a half.

Within the sacred enclosure, to the west, was the Palaemonion, consisting of two sanctuaries, one above ground, containing statues of Poseidon, Leucothea, and Palaemon; and a subterraneous adytum, where Palaemon was said to have been buried. This adytum was the most sacred spot in the Isthmus, since the festival was originally in honour of Palaemon. Poseidon was subsequently substituted for this local divinity as the patron god of the festival; but Palaemon continued to receive special honour, and in his adytum the most sacred oaths were sworn. Pausanias also mentions an ancient sanctuary, called the altar of the Cyclopes. Sisyphus and Neleus were said to have been buried here, but the site of their graves was unknown.

These are all the buildings in the Isthmic sanctuary mentioned by Pausanias; but we learn, from an inscription discovered by Wheeler in 1676, and now preserved at Verona, that there were several other buildings besides. (See the inscription in Böckh, *Corp. Inscr.* n. 1104.) It contains a list of the Isthmian edifices erected by Publius Licinius Priscus Juventianus, high priest for life at Roman Corinth. "He built lodgings for the athletae, who came to the Isthmian games from the whole world. He erected, at his own expense, the Palaemonium, with its decorations;—the ἐναγιστήριον, probably the subterraneous adytum, spoken of by Pausanias;—the sacred avenue;—the altars of the native gods, with the peribolus and the pronaos (perhaps the sanctuary containing the altars of the Cyclopes);—the houses in which the athletae were examined;—the temple of Helios, together with the statue and peribolus;—moreover, the peribolus of the Sacred Grove, and within it temples of Demeter, Core, Dionysus and Artemis, with their statues, decorations and pronai. He repaired the temples of Eueteria, of Core, of Pluto, and the steps and terrace-walls, which had fallen into decay by earth-

Digitized by Google

quakes and antiquity He also decorated the portico at the Stadium, with the arched apartments and the decorations belonging to them."

It has been already mentioned that the northern portion of the walls which surrounded the Isthmic sanctuary belonged to a line of fortification, which extended at one period across the Isthmus. This wall may still be traced in its whole extent across the narrowest part of the Isthmus, beginning at the bay of Lechaeum and terminating at the bay of Schoenus. It was fortified with square towers on its northern side in the direction of Megaris, showing that it was intended for the defence of Peloponnesus against attacks from the north. It was not built in a straight line, but followed the crest of a range of low hills, the last falls of the Oneian mountains. The length of the wall, according to Boblaye, is 7300 mètres, while the breadth of the Isthmus at its narrowest part is only 5950 mètres. At what period this wall was erected, is uncertain. The first Isthmian wall, mentioned in history, was the one thrown up in haste by the Peloponnesians when Xerxes was marching into Greece. (Herod. viii. 71; Diod. xi. 66.) But this was a work of haste, and could not have been the same as the massive walls, of which the remains are extant. Moreover, it is evident from the military operations in the Corinthia, recorded by Thucydides and Xenophon, that in their time the Isthmus was not defended by a line of fortifications: the difficulties of an invading army always begin with the passes through the Oneian mountains. Diodorus (xv. 68) speaks of a temporary line of fortifications, consisting of palisades and trenches, which were thrown across the Isthmus by the Spartans and their allies, to prevent the Thebans from marching into Peloponnesus (B. C. 369), from which it clearly appears that there was no permanent wall. Moreover, Xenophon (*Hell.* vii. 1. § 15, seq.) does not even mention the palisading and trenches, but places the Lacedaemonians and their allies upon the Oneian mountains. It is not till we come to the period of the decline of the Roman empire, that we find mention of the Isthmian wall. It was then regarded as an important defence against the invasions of the barbarians. Hence, it was restored by Valerian in the middle of the third century (Zosim. i. 29), by Justinian towards the end of the sixth (Procop. *de Aedif.* iv. 2), by the Greeks against the Turks in 1415, and after it had been destroyed by the Turks it was rebuilt by the Venetians in 1463. It was a second time destroyed by the Turks; and by the treaty of Carlowitz, in 1699, the remains of the old walls were made the boundary line between the territories of the Turks and Venetians.

The Isthmian wall formed with the passes of the Geranean and with those of the Oneian mountains three distinct lines of defence, which are enumerated in the following passage of Claudian (*de Bell. Get.* 188):—

"Vallata mari Scironia rupes,
Et duo continuo connectens aequora muro
Isthmus, et angusti patuerunt claustra Lechaei."

A short distance north of the Isthmian wall where the ground was the most level, was the Diolcos (*δίολκος*, Strab. viii. p. 335). It was a level road, upon which smaller vessels were drawn by moving rollers from one sea to the other. The cargoes of those ships, which were too large for this mode of transport, were unloaded, carried across, and put on board other vessels upon the opposite coast. Hence we find the expressions *διέθηκεν τὰς ναῦς ὑπερισθμεῖν* (Pol. iv. 19), *ὑπερφέρειν* (Thuc. viii. 7), *διελκύειν* (Diod. iv. 56). In some seasons of the year there was an uninterrupted traffic upon the Diolcos, to which allusion is made in one of the jokes of Aristophanes (*Thesmoph.* 647).

The narrow breadth of the Isthmus, and the important traffic across it, frequently suggested the idea of cutting a canal through it. This project is said to have been formed by Periander (Diog. Laërt. i. 99), Demetrius Poliorcetes (Strab. i. p. 54), Julius Caesar (Dion Cass. xliv. 5; Suet. *Caes.* 44; Plut. *Caes.* 58), Caligula (Suet. *Calig.* 21), Nero, and Herodes Atticus (Philostr. *Vit. Soph.* ii. 6). But the only one who actually commenced the work was Nero. This emperor opened the undertaking with great pomp, and cut out part of the earth with his own hands; but the work had advanced only four stadia, when he was obliged to give it up, in consequence of the insurrection of Julius Vindex in Gaul. (Dion Cass. lxv. 16; Suet. *Ner.* 19; Paus. ii. 1. § 5; Plin. iv. 4. s. 5; Lucian, *de Fossa Isthmi.*) The canal was commenced upon the western shore close to the Diolcos, and traces of it may still be seen at right angles to the shore. It has now little depth: but it is 200 feet wide, and may be traced for about 1200 yards. It ceased where the rocky ground begins to rise; for even the Isthmus is not a perfect level, but rises gradually from either shore, but steeper from the eastern than the western side. Curtius says that the highest point is 246 feet above the level of the sea. The existing remains of the canal leave no doubt respecting its position; but since it was said by some authorities to commence *ἀπὸ τοῦ Λεχαίου*, Chandler erroneously concluded that it commenced at the port of Lechaeum. Leake, however, has shown that the bay of the Corinthian gulf at the Isthmus bore the name of Lechaeum, and that we are to understand the bay, and not the port, in the passages referred to.

VI. Topography of the Corinthia.

The territory of Corinth extended some distance to the north and south of the Isthmus. At an earlier period the boundary line between the Corinthia and Megaris commenced at Crommyon; but at a later time the Corinthia extended as far as the Scironian rocks and the other passes of the Geranea. South of the Isthmus Corinth possessed the part of the Peloponnesus extending as far as the northern slopes of the Argive mountains, and along the coast of the Saronic gulf as far as the territory of Epidaurus. The direct distances in English miles, from the city of Corinth to its frontiers, as measured by Clinton, are: to the river Nemea, which divided Corinthia from Sicyonia, 7½ miles; to the confines of Epidauria, 13½ miles; to the confines of Megaris, 12 miles. Corinth was only 8¼ miles from Cleonae, which stood beyond the Corinthian frontiers towards Argos. In the time of the Roman empire the Corinthia was included under Argolis (*ἡ Κορινθία χώρα μοῖρα οὖσα τῆς Ἀργείας*, Paus. ii. 1. § 1).

South of Cenchreae the Oneium runs out into the Saronic gulf, forming a promontory called Cheraenesus. Between this promontory and a spot called Rheitus or the stream is a bay with a flat shore, where the Athenians under Nicias landed in B. C. 425, intending to take possession of the mountain called Solygeius (*Σολύγειος*), which had been formerly seized by the Dorian invaders for the pur-

oint of the peninsula was the pro-
UM (now *C. St. Nikolaos* or *Me-*
lankávi), of which we shall speak further presently, and which along with the opposite Sicyonian coast formed the entrance to the bay of Lechaeum.

This district bore the general name of PERAEA (Περαία, Steph. B. *s. v.*), or the country beyond the Isthmus. The possession of it was of great importance to the Corinthians, who obtained from its mountains a supply of timber, and found here pasturage for their cattle, when the grass in the plains was burnt up. Moreover, the shortest road to Boeotia and Phocis ran across this mountainous district. The chief place in this district was PEIRAEUM (Πείραιον, Xen. *Hell.* iv. 5. § 1, *Ages.* ii. 18), now called *Perachóra*, lying inland between the promontories Heraeum and Olmiae, and not to be confounded with the above-mentioned port of Peiraeus on the Saronic Gulf. Peiraeum was a strong fortress, and formed one of a chain of fortresses, intended to secure this part of the country from the attacks of the Megarians and Athenians. To the east of Peiraeum, and near the Alcyonian Gulf, was the fortress OENOE (Xen. *Hell.* iv. 5. § 5; Strab. viii. p. 380, x. p. 409), the site of which is marked by a quadrangular tower above the harbour of *Skino* The third fortress stood on the promontory at the western corner of the peninsula, which was called the HERAEUM, from its being the site of the temple and oracle of HERA ACRAEA (Strab. viii. p. 380; Xen. *Hell.* iv. 5. § 5; Plut. *Cleom.* 20; Liv. xxxii. 23.) The fortress consisted of the temple itself, which stood upon the extremity of the promontory, and was surrounded with strong walls, of which the remains are still extant. A little way inland is a chapel of St. Nikolaos, also surrounded with walls, and probably the site of an ancient sanctuary: perhaps it was a temple of Poseidon, who is frequently represented by St. Nikolaos.

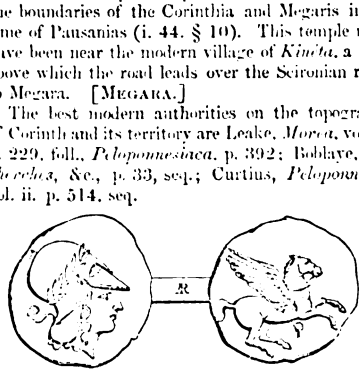
The geography of the Peraea is illustrated by the campaign of Agesilaus in B. C. 390, when he took Peiraeum, Oenoe and the Heraeum. (Xen. *Hell.* iv. 5. § 1, seq., *Ages.* ii. 18.) Xenophon, in his account of this campaign, mentions certain THERMA (τὰ Θερμὰ) or warm springs, situated on the road to Peiraeum by the bay of Lechaeum (*Hell.* iv. 5. §§ 3, 8). These warm springs are still visible at the small village and port of *Lutráki*, which derives its name from them. They are situated close to the sea at the foot of the mountain of Peiraeum, where the level ground of the Isthmus ends and the mountains of the Peraean peninsula begin. (Ulrichs, *Reisen in Griechenland*, p. 3.) The lake near the Heraeum, on the banks of which Agesilaus was seated, when he received the news of the destruction of the Lacedaemonian mora by Iphicrates (Xen. *Hell.* iv. 5. § 6. seq.), is now called *Vuliasméni*. It is a salt lake surrounded by mountains, except on the side open to the sea; and it is conjectured by Curtius, with great probability, to be the same as the lake ESCHATIOTIS (Ἐσχατιῶτις λίμνη). Gorgo, the daughter of Megareus and wife of Corinthus, is said to have plunged into this lake upon receiving intelligence of which it received the name of Gorgopis. (Etym. M. *s. v.* Ἐσχατιῶτις; Phavorin. *Ecl.* p. 209, Dind.; Aesch. *Agam.* 302.)

Towards the Saronic gulf the Geraneian mountains are not nearly so lofty and rugged as in the Peraea. Between the flat ground of the Isthmus and the Scironian rocks there are three plains upon the coast. The chief town in this district was Crommyon [CROMMYON], and the name Crommyonia was some-

Digitized by Google

times given to the whole country between Megara and Schoenus. Between Crommyon and Schoenus was the village of Sidus. [SIDUS.] To the east of Crommyon, at the western extremity of the Scironian rocks, was a temple of Apollo Latous, which marked the boundaries of the Corinthia and Megaris in the time of Pausanias (i. 44. § 10). This temple must have been near the modern village of *Kineta*, a little above which the road leads over the Scironian rocks to Megara. [MEGARA.]

The best modern authorities on the topography of Corinth and its territory are Leake, *Morea*, vol. iii. p. 229, foll., *Peloponnesiaca*, p. 392; Boblaye, *Recherches*, &c., p. 33, seq.; Curtius, *Peloponnesos*, vol. ii. p. 514, seq.



COIN OF CORINTH.

CORIOLI (Κορίολοι, Dionys.; Κοριόλλα, Steph. B.: *Eth.* Κοριολάνος, Coriolanus), an ancient city of Latium, celebrated from its connection with the legend of C. Marcius Coriolanus. There can be no doubt that it was originally a Latin city. Pliny enumerates it among those which shared in the sacrifices on the Alban Mount (iii. 5. s. 9.) Dionysius represents Turnus Herdonius, who endeavoured to excite the Latins to insurrection against Tarquinius Superbus, as a citizen of Corioli, though Livy, with more probability, calls him a native of Aricia. (Dionys. iv. 45*; Liv. i. 50). But when Corioli first appears in Roman history it had fallen into the hands of the Volscians, from whom it was wrested by the Roman consul Postumus Cominius at the same time with Longula and Pollusca, B. C. 493. It is probable that all three were small towns, and it is merely one of the fictions of the poetic legend when Dionysius and Plutarch represent it as the capital or chief city of the Volscians. (Liv. ii. 33; Dionys. vi. 92—94; Plut. *Coriol.* 8; Val. Max. iv. 3. § 4). Its name again appears, associated with those of Satricum, Longula and Pollusca, among the towns which, according to the legendary history, Coriolanus reduced at the head of the Volscian armies. (Liv. ii. 39; Dionys. viii. 19.) It is not improbable that the fact of its conquest by the Volscians at this period is historically true: we have no mention of its subsequent fate: but in B. C. 443, it is alluded to as if it were no longer in existence, the district disputed between Ardea and Aricia being claimed by the Romans as having formed part of the territory of Corioli. (Liv. iii. 71.) Its name never again appears in history, and it is noticed by Pliny (*l. c.*) among the cities of Latium of which no trace remained in his day.

The site of Corioli, like that of most of the cities of Latium mentioned only in the early Roman history, is very uncertain. We can only infer from the notices of it, that it was not very far distant from Antium, and that its territory adjoined those of Ardea and Aricia. Nibby is disposed to fix it on a hill called *Monte Giore*, about 19 miles from Rome, on the left of the modern road to *Porto d'Anzo* (Antium), near a spot called *Fonte di Papa*. This hill, which is the farthest extremity towards the plain of a ridge that descends from the Alban Hills, retains no traces of ancient buildings: but the site is one well adapted for that of an ancient city. Gell also speaks of *Monte Giore* as "the most eligible position that could be assigned to Corioli if there were any ruins to confirm it." The identification is, however, purely conjectural: a hill near the *Osteria di Civita*, 4 miles nearer Antium, supposed by Nibby to be the site of Pollusca [POLLUSCA], would be at least as plausible a position for Corioli. (Gell, *Top. of Rome*, pp. 180—184; Nibby, *Dintorni*, vol. i. p. 513; Abeken, *Mittel-Italien*, p. 66.) [E. H. B.]

CORIOVALLUM or CORTOVALLUM, a place in the north of Gallia, on a road from Castellum (*Cassel*) to Colonia Agrippina (*Cologne*), between Aduatuca (*Tongern*) and Juliacum (*Juliers*). The Antonine Itin. makes it 16 Gallic leagues from Aduatuca to Coriovallum, and 12 from Coriovallum to Juliacum. The distances in the Table are the same, but in the Table the name is Cortovallum or Cortovallium, as it seems. Cortovallum is perhaps the true name, as a place named *Cortil* seems to agree very well with the distance from *Juliers*, and also to preserve the ancient name. [G. L.]

CORISOPITI, a Gallic people, not mentioned on any authority earlier than the Notitia. In the middle ages the diocese of *Quimper* was called Corisopitensis, and it is therefore certain that the Corisopiti occupied the diocese of *Quimper* in Brittany. *Quimper* is now in the department of *Finistère*. There are good reasons for supposing that the Corisopiti were a small tribe dependent on the Osismi, whom Caesar mentions (*B. G.* iii. 9). [G. L.]

CORITANI (*Coritari*), in Britain, mentioned by Ptolemy as having *Lindum* and *Rhage* (*Lincoln* and *Leicester*), for their towns. [R. G. L.]

CORIUM (Κόριον: *Eth.* Κορήσιος, Steph. B.: *Kurna*), a town of Crete, near which was a temple to Athena (comp. Paus. viii. 21. § 4; Ov. *A. A.* iii. 23) and lake (Λίμνη Κορησία). As there is no other lake in the island, Mr. Pashley (*Travels*, i. p. 73; comp. Hoeck, *Kreta*, vol. i. p. 432; Sieber, *Reise*, vol. ii. p. 467), from the identity of this physical feature, fixes the position near the small town *Kurna*, at the foot of the hills on the S. edge of the plain which runs along the shore from Arsinoe eastward. [E. B. J.]

CORIUS (Κόριος, Marcian. p. 20; Ptol. v. 8. § 4; Coros, Pomp. Mela, iii. 8. § 4), a small river of Carmania, which flows into the Persian Gulf opposite the Island Oaracta (now *Keishm*). It has been supposed that it is the same as that now called the *Shur* or *Dio Rud*. [V.]

CORMA (Tac. *Ann.* xii. 14), a small stream of Assyria, which Forbiger considers to have been one of the tributaries of the Diocla. [V.]

CORMASA or CURMASA (Κύρμασα), a place which the Roman consul Cn. Manlius came to on the march described by Livy (xxxviii. 15). It is written Curmassa in Polybius (xxii. 19). The Table gives a road from Laodiceia on the Lycus to Perge in Pamphylia. But Leake (*Asia Minor*, p. 154) remarks that "although the direct distance (between Laodiceia and Perge) is upwards of 100 geog. miles, there are only 46 M. P. marked in the Table: namely,

* The name is written in this passage Κορίλλα, which must, without doubt, be a mere false reading for Κορίολα or Κοριόλλα, though the corruption is of very early date, as it is cited by Stephanus of Byzantium under this form (*s. v.* Κορίλλα.).

Digitized by Google

misonium and Cormasa, and 12 from rge." Ptolemy (v. 5) enumerates the cities of Pisidia. It does not make any conjecture as to the site [G. L.]

or CORNA'VII. 1. In North Britain, olemy as lying in the extreme north-; consequently in the present county

Britain, mentioned by Ptolemy as he Ordovices (*North Wales*), with r town. This gives parts of Staf-nd Shropshire, as their area. [See [R. G. L.]

M (Κόρναικον), a town in Lower e, according to the Notit. Imper. ents of cavalry were in garrison. 5; Itin. Ant. p. 243.) [L. S.]

CASTRA. [CASTRA.]

UM (Κορνίκολος, Dionys.; Κόρνι-: *Eth.* Κορνικολανός, Corniculanus), of Latium, which appears to have f the summits of the remarkable d hills that rises boldly from the *mpagna*, about 3 miles from the foot *Monte Gennaro* (Lucretilis Mons). known as the *Monticelli*, were called s the MONTES CORNICULANI (τὰ Dionys. i. 16); both their principal remains of ancient cities, and it is e or other of these must have been iculum: but we have no information iters to assist us in deciding between lum only figures in Roman history of Tarquinius Priscus with the is mentioned among the places re-nonarch by force of arms. (Liv. i. 50.) It was on this occasion that, e received tradition, Ocrisia, the s Tullius, fell into the hands of the aptive. (Liv. i. 39; Dionys. iv. 1; 28.) At this time Livy reckons it of the "Prisci Latini." Dionysius was strongly fortified, and withstood after its capture was plundered and n. He does not speak of the city as it is probable that it did not cease ly a period. In the list of the thirty tin League given by Dionysius (v. Corni (Κόρνοι), who are probably, Niebuhr, the citizens of Corniculum. p. 17, note 21.) Florus also al-ulum as having taken part in the ns against the *Republic* (i. 11. § 6), ge is so rhetorical, that little value to it. But in later times no mention niculum, and it is only noticed by cities of Latium, of which no trace day. (Plin. iii. 5. s. 9.)

orniculani are a very striking feature Campagna. They form an isolated tached from the main range of the sting of three rocky peaks of con-on, and very steep and difficult of nstanding this, all three were in-iddle ages, and two of them still are nmost and highest of the three, now oor village called *S. Angelo in Ca-* considerable remains of ancient walls and primitive style of construction, the earliest specimens of the Cyclopean style than any other ruins of the class in Latium. (See the figure in Gell, *Top. of Rome*, p. 56.) These are considered by Sir W. Gell to be the remains of Corniculum. On the southernmost peak stands the modern village of *Monticelli*, which retains no vestiges of very remote antiquity, but presents numerous fragments of buildings, and a small temple or Sacellum, constructed in brick, and obviously of the time of the Roman empire. Nibby, Abeken, and others consider this hill to be the site of Corniculum, and refer the more ancient ruins on that of *S. Angelo* to Medullia, a city which must probably be placed in the immediate vicinity of Corniculum. [MEDULLIA.] Gell, however, is of opinion that there could never have been an ancient city on the site of *Monticelli*, and that the walls at *S. Angelo* must therefore be those of Corniculum. (*Top. of Rome*, pp. 55, 319; Nibby, *Dintorni*, vol. ii. pp. 327, 367; Abeken, *M. I.* p. 78.) [E. H. B.]

CORNUS (Κόρνος, Ptol. iii. 3. § 7; Corni, *Itin. Ant.* p. 84), a city on the W. coast of Sardinia, called by Livy the capital of that part of the island. It was made their head-quarters and place of refuge by the Sardinian tribes who revolted against the Romans during the Second Punic War, but after the defeat of Hampsicora was besieged and taken by the praetor T. Manlius, B. C. 215. (Liv. xxiii. 40, 41.) Ptolemy erroneously reckons it among the inland towns of Sardinia; the Itinerary places it on the road along the west coast of the island, 18 miles from Bosa, and the same distance from Tharros. These distances coincide with the site of the existing ruins, which are still visible on the sea-coast between *Capo Nieddu* and *Capo Mannu*, about 13 miles N. of *Oristano*. Numerous fragments of buildings, parts of an aqueduct, necropolis, and the walls of the port, are still standing. Carthaginian and Roman coins are found there in abundance. (Tyndale's *Sardinia*, vol. ii. pp. 300, 301.) [E. H. B.]

CORO'BI'LIUM, a town of Gallia, is placed in the Table on a road from Durocortorum (*Reims*) to Andematunum (*Langres*). The next station to Durocortorum is Durocatalaunum (*Châlons*), which is omitted in the Table. There is an old road from *Châlons* to *Langres* on which *Corbeil* stands, and this must be Corbilium; yet the distances do not agree. The Table makes it 42 Gallic leagues from *Corbeil* to *Langres*, but the real distance is greater. [G. L.]

COROC (Κορόκ, Isid. Char. p. 8), a small place in Drangiana mentioned by Isidorus. It has been supposed by Forbiger to be the same as that now called *Kohec*. [V.]

COROCONDAME (Κοροκονδάμη, Strab. xi. pp. 494, 496; Ptol. v. 9. §§ 6, 8; Mela, i. 19; Steph. B. *s. v.*), a small place close to the Bosporus Cimmerius in the country of the Bosporani, and adjoining one of the mouths of the river Anticites (now *Kuban*). It gave its name to a lake of some size, called Corocondamitis (Strab. *l. c.*), which appears to have been formed by one of the branches of the same river. There is some indistinctness in the ancient accounts of this district; and, according to some, as Mela (i. 19), and Dionysius Perieg. (550), Corocondame would seem to be the name of a peninsula or island, formed by the Bosporus, the Maeotis, and the river. [V.]

CORODAMUM PROM. (Κορόδαμον ἄκρον), a promontory at the NE. extremity of the country of the Sachalitae, immediately without the straits of the Persian gulf. Mr. Forster fixes it at *Ras-el-*

Digitized by Google

Had, the easternmost promontory in Arabia, and follows Bochart in identifying the name with that of the Joktanite patriarch Hadoram. (*Arabia*, vol. i. pp. 140—142.) Others find Corodamum in *Corroomb Point*, immediately north of *Muscat*. [G. W.]

COROMANIS (Κορομανὶς πόλις), a town of the Abucaei, on the Sacer Sinus, at the NW. extremity of the Persian gulf. Mr. Forster identifies it with "the town of *Graan Harb*, a mart of commerce on the Persian gulf, at the foot of the bay of *Koue't* or *Dooat-al-Khusma*." (*Arabia*, vol. i. p. 263, vol. ii. p. 213.) [G. W.]

CORO'NE (Κορώνη: *Eth.* Κορωναεύς, Strab. viii. p. 411; Κορωνεύς, Κορωναιεύς, Κορωναῖος, Steph. B.: *Petalidhi*), a town of Messenia, situated upon the western side of the Messenian gulf, which was sometimes called after it, the Coronaean. (Plin. iv. 5. s. 7.) According to Pausanias, it was built on the site of the Homeric Aepeia, at the time of the restoration of the Messenians to their native country, by Epaminondas; and received the name of Coroneia because Epimelides, who founded the new town, was a native of Coroneia, in Boeotia. This name was changed by the Messenians into that of Corone. According to others, Corone corresponded to the Homeric Pedasus. (Strab. viii. p. 360.) In the acropolis of the city was a brazen statue of Athena, who became the patron deity of Corone in consequence of her worship at Coroneia. [CORONEIA.] In the agora there was a statue of Zeus Zoter, as at Messene; and there were likewise in the lower city temples of Artemis, of Dionysus, and of Asclepius. The harbour of Corone was called the port of the Achaeans, probably because the city belonged to the Achaean league. (Paus. iv. 34.)

Pausanias says that Corone was situated to the right of the Pamisus, close to the sea, and at the foot of a mountain called Temathia or Mathia (the reading is doubtful). The present name of the mountain is *Lykódimo*, at the foot of which stands *Petalidhi*, on the site of Corone, in a small but fertile plain. Within the last few years a colony of Mainotes has settled here, and restored to the place its ancient name. The modern town of *Koróni*, however, which is situated upon a promontory some distance south of *Petalidhi*, occupies the site of Asine. It is probable that the inhabitants of Corone migrated at some period to Asine, carrying with them their ancient name. [ASINE.]

There are considerable remains of Corone. Part of a mole may still be traced jutting out into the sea, and in the plain have been found foundations of houses and walls, and some works of ancient art. There are likewise traces of the walls of the acropolis upon the heights above the plain.

Corone was supplied with water for drinking from the fountain Plataniston, which flowed from a hollow plane tree 20 stadia from the road, leading from the Pamisus. Eighty stadia south of Corone, near the coast, was the temple of Apollo Corynthus, the site of which is probably indicated by some ancient remains on the hill of St. Elias, near the sea, above the village of *Kastélia*.

Corone, as already stated, belonged to the Achaean league. It was on his march to relieve this city that Philopoemen was made prisoner, and put to death at Messene on the following day. (Liv. xxxix. 49.) Plutarch, however, relates that Philopoemen was captured on his march towards Colonis (Plut. *Philopoem.* 18); but the statement of Livy is the more probable one. [COLONIDES.] Corone is also mentioned by Ptolemy (iii. 16. § 8). (Leake, *Morea*, vol. i. p. 439, seq.; *Peloponnesiaca*, p. 193, seq.; Boblaye, *Recherches*, &c., p. 111; Curtius, *Peloponnesos*, vol. ii. p. 165, seq.)

CORONEIA (Κορώνεια: *Eth.* Κορώνιος, Κορωνεύς), the name of several places in Greece, derived from κορώνη, a hill. 1. A town of Boeotia, and a member of the Boeotian league, is described by Strabo as situated upon a height near Mt. Helicon (ix. p. 411). Its territory was called Κορωνικὴ (Strab. ix. pp. 407, 411.) The town stood upon an insulated hill at the entrance of a valley leading southwards to Mt. Helicon, the principal summit of which is seen at the head of the valley. From this hill there is a fine view over the lake Copais, and at its foot there is a broad plain extending as far as the marshes of the lake. On either side of the hill flowed two streams, one on the eastern or right hand side, called Coralius or Cuarius, and the other on the left, named Phalarus: a tributary of the latter was the Isomantus or Hoplias. [See above, pp. 412, 413.] Coroneia is said to have been founded by the Boeotians from Arne in Thessaly, after they had been driven out of their original homes by the Thessalians; and they appear to have called it Coroneia after the Thessalian town of this name. [See No. 2.] At the same time they built in the plain in front of the city a temple of Athena Itonica, also named after the one in Thessaly, and likewise gave to the river which flowed by the temple the name of Cuarius or Curalius, after the Thessalian river. [CERIUS.] In this temple was held the festival of the Panboeotia, which was common to all the Boeotians. (Strab. ix. p. 411; Paus. ix. 34. § 1.) The Thessalian origin of Coroneia is also attested by Pausanias, who ascribes its foundation, as well as that of Haliartus, to Athamas and his descendants, who came from Thessaly (ix. 34. § 7, seq.).

Coroneia is mentioned by Homer in conjunction with Haliartus. (*Il.* ii. 503.) In historical times several important battles were fought in the plain in front of the town. It was here that the Athenians under Tolmides were defeated by the Boeotians B. C. 447, in consequence of which defeat the Athenians lost the sovereignty which they had for some years exercised over Boeotia. (Thuc. i. 113.) The plain of Coroneia was also the scene of the victory gained by Agesilaus over the Thebans and their allies in B. C. 394. (Xen. *Hell.* iv. 3. § 15, seq.; Plut. *Ages.* 17.) In the Sacred War Coroneia was twice taken by the Phocians under Onomarchus. (Diod. xvi. 35, 58.) Philip, after the conquest of the Phocians, gave up the town to the Thebans. (Dem. *de Pac.* p. 62, *Philip.* ii. p. 69.) Coroneia espoused the cause both of Philip and of Perseus in their wars with the Romans. (Polyb. xx. 7, xxvi. 1, xxix. 6, a.; Liv. xxxiii. 29, xlii. 44, 67.)

Pausanias says (ix. 34. § 3) that the most remarkable objects in Coroneia were altars of Hermes Epimelius and of the winds, and a little below them the temple of Hera. The principal remains of the ancient city are those of the theatre, of the temple of Hera, and of the agora. The coins of Coroneia are very rare. The one annexed is a hemidrachma.

CORSI (Κορσιοι or Κορσοι, Ptol.), a people of Sardinia, enumerated both by Pliny and Ptolemy among the tribes of the interior of that island. Their name indicates that they must have emigrated from the neighbouring island of Corsica, which is expressly stated by Pausanias, who adds that the strength of their mountain abodes enabled them to maintain their independence against the Carthaginians. In accordance with this, Ptolemy places them in the northern part of Sardinia, adjoining the Tibulatii, who inhabited its NE extremity, near to the strait that separates it from Corsica. (Plin. iii. 7. s. 13; Ptol. iii. 3. § 6; Paus. x. 17. § 8.) [E. H. B.]

CO'RSICA, called by the Greeks CYRNUS (Κύρνος: *Eth.* Κύρνιος and Κυρναῖος: later Greek writers, however, use also Κορσίς and Κορσίκα; Dionys. Per.; Strab.; Ptol., &c.: the Latin Ethnic is Corsus, which Ovid uses also for the adjective: Corsicanus is the adjective form in Servius and Solinus), one of the principal islands in the Mediterranean, situated to the N. of Sardinia, from which it was separated only by a narrow strait. It was generally reckoned the third in magnitude of the seven great islands in that sea (Alexius, *ap. Eustath. ad Dionys. Per.* 4; Strab. ii. p. 123), though other authors gave it only the sixth place. (Diod. v. 17; Scylax, § 113.) Pliny says that it was 150 miles long, and for the most part 50 broad, and gives its circumference at 325 miles; Strabo, on the other hand, states its length at 160 miles, and its greatest breadth at 70. (Plin. iii. 6. s. 12; Strab. v. p. 224.) Both these statements exceed the truth; the real length of the island is just about 100 geographical (125 Roman) miles, while its breadth nowhere exceeds 46 geographical or 58 Roman miles. Both Strabo and Diodorus reckon it 300 stadia distant from the island of Aethalia or Ilva, which is very little more than the truth; the former correctly states that it is visible from the mainland near Populonium, but he was misled by his guides when they led him to believe that Sardinia was so too. The northern extremity of Corsica, formed by a narrow ridge of mountains, extending like a great promontory near 30 miles from the main body of the island, is distinctly visible from many points on the coast of Etruria, and even from that of Liguria. The distance of this part of the island from Vada Volaterrana is correctly given by Pliny at 62 M. P., but it is not more than 58 from Populonium, which is the nearest point on the mainland. (Plin. *l. c.*; Strab. v. p. 223; Diod. v. 13.)

Almost the whole of Corsica is occupied by a range of lofty and rugged mountains, extending from N. to S. from one extremity of the island to the other. The highest summits of this range attain an elevation of from 8000 to 9000 feet, and are in consequence covered with snow during the greater part of the year; their sides are furrowed by deep torrents, and intersected by narrow, crooked valleys or ravines, while they are covered almost throughout with dense forests. The vast extent of these, and the magnitude and excellence of the timber which they produced, have been celebrated in all ages. (Theophrast. *H. P.* v. 8. §§ 1, 2; Dionys. Per. 460; Diod. *l. c.*) But notwithstanding this advantage, as well as the excellent ports with which the W. and S. coasts of the island abound, its rugged and inaccessible nature rendered it in ancient, as they still do in modern times, one of the wildest and least civilised portions of Southern Europe. Theophrastus says that the whole island was "shaggy and savage," from the

Digitized by Google

vast forests with which it was covered (δασείαν καὶ ὥσπερ ἠγριωμένην τῇ ὕλῃ, *l. c.*). Strabo speaks of the inhabitants of the mountain districts as "wilder than the very beasts" (ἀγριώτεροι θηρίων, v. p. 224), and of so untameable a character, that when they were brought to Rome as slaves it was impossible to make any use of them, or accustom them to domestic habits. The judgment of Diodorus on this point is more favourable. He says the Corsican slaves were very docile, and readily adapted themselves to the ways of civilised life; and that the natives of the island, though ignorant of tillage, and subsisting wholly on meat, milk, and honey, were remarkable for their love of justice. (Diod. v. 13, 14.) Seneca, who was banished to the island in A.D. 41, and lived there eight years in exile, naturally takes an unfavourable view of it, and speaks in exaggerated terms of the barrenness of its soil, as well as the barbarism of its inhabitants, and the unhealthiness of its climate. (Sen. *Cons. ad Helv.* 6. § 4; Anthol. Lat. 129, 130.) In the latter respect, however, it had greatly the advantage of the neighbouring island of Sardinia; the low grounds on the E. coast are indeed very unhealthy, but the greater part of the island is free from the scourge of malaria; and ancient writers speak of the native Corsicans as remarkable for their longevity. (Eustath. *ad Dion. Per.* 458.)

We have very little information as to the origin of the native population of Corsica, but there seems little doubt that it was derived principally from a Ligurian source. This is the opinion of Seneca, though he tells us that there were some tribes in the island of Spanish or Iberian extraction, whose manners and dress resembled those of the Cantabrians, and appears inclined to regard these as the earliest inhabitants, and the Ligurians as subsequent settlers. (Sen. *l. c.* 8.) Solinus, however, following authors now lost, who had written fully concerning Corsica, expressly ascribes its first population to the Ligurians, and this is confirmed by the legend which derived its name from a Ligurian woman of the name of Corsa, who was fabled to have first discovered and visited its shores. (Solin. 3. § 3; Eustath. *l. c.*; Isidor. *Origg.* xiv. 6.) We are expressly told that Corsica was the *native* name of the island, adopted from them by the Romans (Diod. v. 13; Dionys. Per. 459); the origin of that of Cyrnus, by which it was known to the Greeks, is wholly unknown, though late writers, as usual, derived it from a hero Cyrnus, whom they pretended to be a son of Hercules.

The island appears to have been early known to the Greeks, and the Phocaeans founded the city of Alalia on its eastern coast as early as B.C. 564. (Herod. i. 165; Seneca, *l. c.*) Twenty years later they established themselves in much greater force, but after a stay of only a few years were compelled to abandon it again [ALERIA]; and from this period we hear nothing more of Greek colonies on the island. According to Diodorus, the Tyrrhenians, who had united their arms with the Carthaginians to expel the Phocaeans, established their authority over the island, in which they founded the city of Nicaea (a name that certainly appears rather to point to a *Greek* origin), and exacted from the inhabitants a tribute of resin, wax, and honey. (Diod. v. 13.) Their supremacy fell with the decline of their naval power, and Corsica, as well as Sardinia, appears to have been in a state of dependency, if not of subjection, to Carthage at the time of the First Punic War. On this account it was attacked, in B.C. 259, by a Roman fleet under L. Scipio, who took the city of Aleria, and compelled the inhabitants to acknowledge the sovereignty of Rome, and give hostages for their fidelity. (Zonar. viii. 11; Flor. ii. 2. § 16. Liv. Epit. xvii.; Orell. *Inscr.* 552.) It is probable that the submission of the wild tribes of the interior Corsicans was at this time little more than nominal, and after the close of the First Punic War we find them again repeatedly in arms, together with their neighbours the Sardinians; at length, in B.C. 231, C. Papirius Maso is said to have effectually subdued them, for which he claimed the honour of a triumph. (Zonar. viii. 18; Liv. Epit. xx.; Fast. Capit.) Yet long after this, repeated revolts attest the imperfect nature of their subjection; and the victories of the Roman praetors appear to have effected nothing beyond a nominal submission, and the payment of an occasional tribute. (Liv. xl. 19, 34, xli. 7, 28.) Before the close of the Republic, however, the maritime parts of the island at least were brought into complete subjection, and two colonies of Roman citizens were established on its E. coast, that of Mariana by Marius, and Aleria by Sulla. (Plin. iii. 6. s. 12; Mel. ii. 7. § 9; Seneca, *Cons. ad Helv.* 8. § 2.) This example, however, was not followed; and under the Roman empire little pains were taken to extend the civilisation of Italy to an island which was regarded as wild and inhospitable. Even in the time of Augustus, Strabo describes the mountain tribes of the interior as subsisting principally by robbery and plunder; while the Roman governors from time to time made an attack upon their fastnesses, and carried off a number of prisoners, whom they sold as slaves. (Strab. v. p. 224.) The fact that it was selected as a place of banishment for political exiles (of which Seneca was the most illustrious example) in itself shows the unfavourable estimation in which it was held. Its name only once occurs in the history of this period, during the civil wars of A.D. 69, when a vain attempt was made by Decimus Pacarius to arouse the Corsicans in favour of Vitellius, though their coasts were exposed to the fleet of Otho. (Tac. *Hist.* ii. 16.) Under the Roman Republic, Corsica had been united in one province with Sardinia and subject to the same praetor. Tacitus speaks of it apparently as having then a separate Procurator, but this was probably exceptional. After the time of Constantine, however, the two islands were separated, and each had its own governor, with the title of Praeses. (Not. Dign. ii. pp. 6, 64; P. Diac. ii. 2.) The seat of government was probably at Aleria. On the fall of the Western Empire, Corsica fell into the hands of the Vandals, from whom it was wrested by Belisarius, but was again conquered by the Goths under Totila. (Procop. *B. V.* ii. 5, *B. G.* iv. 34.) It was, however, recovered by the Exarchs of Ravenna, and continued a dependency of the Byzantine empire, till it was conquered in the 8th century by the Saracens.

The physical character of Corsica has been already adverted to. The great chain of mountains which fills up almost the whole island approaches, however, somewhat nearer to the W. than the E. coast; the former is in consequence extremely rugged and broken by great mountain promontories, with deep bays between them, many of which afford excellent harbours, though these are rendered comparatively useless by the difficulty of communication with the interior. The E. coast, on the contrary, is lower and more regular, presenting a nearly unbroken line for a distance of 75 miles, from the

Ptolemy, on the contrary, gives us the following list: "The Cervini occupy the W. side beneath the Golden Mountain; then follow the Tarrabenii, the Titiani, the Balatonii. The most northerly promontory is occupied by the Vanaceni; next to whom come the Cilebensii, then the Licnini, Macrini, Opini, Simbri, and Comaceni, and furthest to the S. the Subasani" (iii. 2. § 6). Nothing more is known of any of these obscure tribes, who, as Ptolemy expressly tells us, dwelt only in scattered villages; besides these, he enumerates 14 *towns* in the interior, all of which are utterly unknown. Even those towns which he places on the W. coast of the island cannot be determined with any approach to certainty, their position depending on those of the promontories and bays, the geography of which (as already observed) is extremely vague. The names of these places are as follows: Urcinium (Οὐρκίνιον), Pauca (Παῦκα), Ficaria (Φικαρία), and Marianum, near the promontory of the same name. On the E. coast our data are rather more precise; the site of the two Roman colonies of ALERIA and MARIANA being known with certainty. The Itinerary of Antoninus also gives us a line of road (the only one in the island) along this coast from Mariana to Pallae, a city mentioned also by Ptolemy, which was probably situated at the head of the gulf called the Portus Syracusanus. The intermediate stations between this and Aleria are the Portus Favonii (still called *Porto Favone*, and probably identical with the Φιλωνίου λιμήν of Ptolemy), and Praesidium, half way between Portus Favonii and Aleria, probably, from its name, a mere military post. (*Itin. Ant.* p. 85; Ptol. iii. 2. § 5.) Besides these, Ptolemy mentions Rubra and Alista, which he places between the Portus Syracusanus and Aleria; and the towns of Mantinum, Clunium, Centuria, and Canelate, all of which are to be sought in the northern part of the island, N. of Mariana. Nicaea, which from its name would appear to have been a Greek colony, but is called by Diodorus (v. 13) a Tyrrhenian one, is not mentioned by any of the geographers, and its position is quite unknown. It is a plausible conjecture of Cluverius that it was the same place afterwards called Mariana.

Of the natural productions of Corsica, the chief, as already observed, is timber, of which it furnished an almost unlimited supply. Theophrastus speaks with especial admiration of the pine and fir trees that grew on the island, and of which the Romans made great use for their fleets. (Theophr. *H. P.* v. 8. § 1.) The same forests produced resin and pitch, and abounded in wild bees, so that wax and honey were in all ages among the chief exports of the island, and we find the Corsicans on one occasion compelled to pay 200,000 pounds of wax as a punishment for their revolt. (Liv. xlii. 7; Diod. v. 13; Plin. xxi. 14. s. 49.) The longevity of the inhabitants was supposed by some writers to arise from their abundant use of honey as an article of food. (Steph. B. *s. v.* Κύρνος.) Yet the Corsican honey had a bitter taste, owing to the bees feeding on the box trees, which rendered it unpalatable to strangers. (Theophr. *H. P.* iii. 15. § 5; Diod. *l. c.*; Virg. *Ecl.* ix. 30; Ovid, *Amor.* i. 12. 10.) Sheep, goats, and cattle were also abundant, though the former were allowed to run almost wild about the mountains. (Pol. xii. 4.) But the island produced little corn, and even under the Roman empire the cultivation of fruit trees, vines, and olives was almost wholly neglected. (Senec. *Cons. ad Helv.* 9. § 2; Anthol. Lat. 130.) Of wild animals, according to Polybius, there were

Digitized by Google

found abundance of foxes and rabbits, but no wolves, hares, or deer; the wild goat also was unknown, but the wild sheep or mousmon (*μούσμων*) was found in the mountains of Corsica, as well as of Sardinia. Strabo mentions it in the latter island only, but it is still common to them both. (Pol. xii. 3, 4.) The mines of Corsica seem to have been neglected by the Romans; but its granite, which is of a very fine quality, was worked for architectural purposes; and the Roman quarries in two little islets a few miles from *Bonifacio*, at the southern extremity of Corsica, are still visible. (Valery, *Voyage en Corse*, chap. 80.) [E. H. B.]

CORSO'TE (Κορσώτη, Xen. *Anab.* i. 5. § 4), a town in Mesopotamia, on the river Mascas, where Cyrus passed three days on his march against his brother Artaxerxes. It is described by Xenophon as deserted, and it is not mentioned by any other writer. It has been conjectured by Rennell (*Illustrations of the Retreat of the Ten Thousand*, p. 103) that it may be represented by some large ruins, now called *Erzi* or *Irsah*, which were observed by the travellers Balbi and Rauwolf, when passing down the Euphrates. Xenophon states that the Mascas flowed round Corsote: perhaps the town was situated at the junction of the Euphrates and that river. [V.]

CORSTORPITUM, in Britain, mentioned in the first Itinerary. Probably *Corbridge* in Northumberland. [R. G. L.]

CORSYMUS or CORSYNUS. It appears, from the coins of Aphrodisias, in Caria, that there was a river Corsymus, or Corsynus, there. In the article APHRODISIAS the river is named Mosynus. The name in the editions of Harduin and Sillig (Plin. v. 29) is Orsinus. Harduin says that the editions of Pliny have Mossinus. It seems likely that Corsymus or Corsymus is the true name, and that the other forms are corruptions. [G. L.]

CORTERATE, a town in Gallia, placed by the Table on the road from Burdigala (*Bordeaux*) to Vesunna (*Perigueux*). The place seems to be *Coutras*, on a branch of the *Dordogne*. [G. L.]

CORTO'NA (Κόρτωνα, Ptol.: *Eth.* Cortonensis: *Cortona*), one of the most ancient and powerful of the inland cities of Etruria, situated on a lofty hill between Arretium and Clusium. It was distant only about 9 miles from the Lacus Trasimenus. There is great confusion about its ancient name. The Greek legend which represented it as founded by Dardanus, called it CORYTHUS, a form frequently used in consequence by the Latin poets. (Virg. *Aen.* iii. 167—170, vii. 206—210, &c.; Sil. Ital. iv. 721, v. 122.) But there is little doubt that this was a mere transplanting of a Greek tradition (Müller, *Etrusker*, vol. i. p. 277), and the native name seems to have been Cortona, or some form closely resembling it. Dionysius writes the name Croton, and says it was changed to Cortona (which he writes Κοθορνία, probably an error of the MSS. for Κορθωνία), when it received a Roman colony. Livy, however, calls it Cortona at a much earlier period, without any allusion to its having changed its name. The confusion between *Cor* and *Cro* is so natural that it is no wonder the Greeks should write it Κρότων, even if the Roman form was the correct one: but it is not improbable that the Etruscans, who did not use the letter o, would have written the name KPVTVNA, as they wrote Puplna for Populonium. (Dionys. i. 26; Steph. Byz. *s. v.* Κρότων; Müller, *l. c.* pp. 268, 277.) Polybius, however (iii. 82), writes the name Κρτώνιον, and there can be no doubt that the Τυρρηνία, in Tyrrhenia, of Lycophron and Theopompus, the foundation of which was ascribed by the latter to Ulysses, is merely a corruption of the same name. (Lycophr. *Alex.* 806; Theopomp. *ap.* Tzetz. *ad loc.*)

All accounts agree in representing Cortona as one of the most ancient cities of Etruria, and at a very early period one of the most powerful of the confederation. Dionysius expressly tells us that it was originally an Umbrian city, and was wrested from that people by the Pelasgians. (Dionys. i. 20.) It is evidently to the *Pelasgic* city only that the legend of its foundation by Dardanus, to which so prominent a place has been assigned by Virgil, can be referred: various other legends also appear to point to the same connection, and may be considered as proving that the Pelasgic character of the inhabitants was strongly marked and recognised by the Greeks. But, notwithstanding the high authority of Niebuhr, it seems impossible to admit the view of Dionysius, who refers to this city and not to Creston in Thrace the statement of Herodotus concerning the language spoken by the Pelasgians in his day. (Herod. i. 57; Dionys. i. 29. On this much disputed question compare Niebuhr, vol. i. p. 34, note 89; Müller, *Etrusker*, vol. i. p. 94—98; Lepsius, *Tyrrhenische Pelasger*, p. 18, &c.) Dionysius represents Cortona as having been made by the Pelasgians a stronghold and centre of operations from whence they gradually extended their arms over the rest of Etruria: and it is doubtless, with reference to this statement that Stephanus of Byzantium terms it the metropolis of the Tyrrhenians. (Dionys. i. 20; Steph. Byz. *s. v.* Κρότων.) There are, indeed, circumstances which would lead us to infer that the dominion of the Etruscans, properly so called (the Rasena), was not extended from Cortona, or its neighbourhood, over the more southern parts of Etruria; and it would be a natural surmise that Dionysius had made a confusion between the Pelasgian Tyrrhenians and the Etruscans proper: but it seems more probable that both conquests may really have emanated from the same quarter. [ETRURIA.]

Important as is the part which Cortona bears in these early traditions, it is singular how little we subsequently hear of it. There can be no doubt that it was one of the twelve cities of the Etruscan confederation: and hence in B. C. 310 Livy speaks of Perusia, Cortona, and Arretium, as at that period among the chief cities of Etruria ("ferme caput Etruriae populorum." Liv. ix. 37.) They on this occasion obtained a peace for 30 years, which was soon broken; but the name of Cortona is not again mentioned: and we have no account of the time at which it fell under the subjection of Rome. In the Second Punic War it is incidentally mentioned. Hannibal having marched beneath its walls, and laid waste its territory just before the battle of the Thrasymenian Lake (Pol. iii. 82; Liv. xxii 4), but the inaccessible position of the city itself rendered it secure from attack. At the same time the broad and fertile valley beneath it offered no obstacle to the march of an army, and it is probably for this reason that we hear so little of Cortona in the many successive swarms of invaders having swept past it without caring to attack its almost impregnable position. We learn incidentally from Dionysius (i. 26) that Cortona had received a Roman colony not long before his time: there can be no doubt that this must be referred to the times of Sulla, and that

[E. H. B.]

CUM. The Notitia mentions the as under the command of the general in the Galliae. The Cortoriacenses Cortoriacum, which was afterwards am, and is now *Courtrai*, in the Bel- f West Flanders. In the Capitularies of Charles the Bold, A. D. 853, the Pagus Curtricisus is mentioned between "Adertisus et Flandra." The Flemish name of *Courtrai* is *Cortryk*. (D'Anville, *Notice*, &c.) [G. L.]

CORTUOSA, a town of Etruria, taken and destroyed by the Romans, B. C. 388. (Liv. vi. 4.) It appears to have been situated in the territory of Tarquinii, and a mere dependency of that city, as well as Contenebra, mentioned in the same passage. Both are otherwise wholly unknown. [E. H. B.]

CORY (Κῶρυ, Ptol. vii. 1. § 96), according to Ptolemy, an island in the Sinus Argaricus, at the southern end of the peninsula of Hindostan. There can be little doubt that it is the same place which he describes elsewhere (vii. 1. § 11) as a promontory: Κῶρυ ἄκρον τὸ καὶ Καλλιγίκον, — implying that it bore also the name of Calligicum. There can be little doubt that the name is preserved in the present *Ramiseram* or *Ramanam Kor*. [COLCHI; COLIS.] [V.]

CORYBANTIUM. [HAMAXITUS.]

CORYBISSA. [SCEPSIS.]

CORY'CIUM. [DELPHI.]

CO'RYCUS (Κώρυκος: *Eth.* Κωρύκιος, Κωρυκώτης). 1. In Lycia, is mentioned in the Stadiasmus, which places it betwen Olympus (*Deliktash*) and Phaselis. This agrees with Strabo, who speaks of the Κώρυκος αἰγιαλός, on the coast of Lycia (p. 666). The Turks call this coast north of Olympus, *Tchiraly*. (Beaufort, *Karamania*, p. 47.)

2. The name of a promontory on the coast of Cilicia Tracheia. (Strab. p. 670.) Cape Corycus is now *Korghos*, plainly a corruption of the ancient name. After mentioning the Calycadnus, Strabo — whose description proceeds from west to east — mentions a rock called Poecile; then Anemurium, a promontory of the same name as the other [ANEMURIUM]; then the island Crambusa, and the promontory Corycus, 20 stadia above which — that is, 20 stadia inland — is the Corycian cave. Beaufort found it difficult to select a point which should correspond to this Anemurium. North of the mouth of the Calycadnus he found "two decayed and uninhabited fortresses, called *Korghos Kalaler* (castles); the one standing on the mainland, and connected with the ruins of an ancient town; and the other covering the whole of a small island close to the shore." He thinks that the little fortified island may be Strabo's Crambusa, and that Cape Corycus is perhaps a small point of land towards which the ruins of the city extend. (*Karamania*, p. 240, &c.) Leake supposes the island to be what Strabo calls the promontory; and the castle on the shore to stand on the site of Corycus, a town which Strabo has not noticed. But a town Coryeus is mentioned by Livy (xxxiii. 20), and by Pliny (v. 27), and Mela (i. 13), and Stephanus (*s. v.* Κώρυκος).

The walls of the castle on the mainland contain many pieces of columns; and "a mole of great unhewn rocks projects from one angle of the fortress about a hundred yards across the bay." (Beaufort.) The walls of the ancient city may still be traced, and there appear to be sufficient remains to invite a careful examination of the spot. There are coins of Coryeus.

In the Corycian cave, says Strabo, the best crocus (saffron) grows. He describes this cave as a great hollow, of a circular form, surrounded by a margin of rock, on all sides of a considerable height; on descending into this cavity, the ground is found to be uneven and generally rocky, and it is filled with

Digitized by Google

shrubs, both evergreen and cultivated; in some parts the saffron is cultivated: there is also a cave here which contains a large source, which pours forth a river of pure, pellucid water, but it immediately sinks into the earth, and flowing underground enters the sea: they call it the Bitter Water. Mela has a long description of the same place, apparently from the same authority that Strabo followed, but more embellished. This place is probably on the top of the mountain above Corycus, but it does not appear to have been examined by any modern traveller. If Mela saw the place himself, he has more imagination than most geographers.

This place is famed in mythical story. It is the Cilician cave of Pindar (*Pyth.* i. 31), and of Aeschylus (*Prom. Vinct.* 350), and the bed of the giant Typhon or Typhoeus. (Mela, i. 13.)

COIN OF CORYCUS IN CILICIA.

3. In Lydia (Thuc. viii. 14, 33, 34; Liv. xxxvi. 44), a lofty mountain (Strab. p. 644) in the peninsula on which Erythrae is situated. Casystes, a port, was at the base of Corycus, which is now *Koraka* or *Kurko*. This bold headland, called the Corycean Promontorium (Plin. v. 29), looks towards Samos, and forms the western point of the bay on which Teos is situated. This appears to be the place which Thucydides calls Corycus, in the territory of Erythrae; and this supposition agrees with the movements of the fleet described in viii. 34. It is also clearly indicated in Livy's account of the movements of the Romans and Eumenes, though Livy calls it a promontory of the Teii. This rugged coast was once inhabited by a piratical people, called Corycaei, who carried on their trade in a systematic manner, by keeping spies in the various ports, to find out what the traders had in their ships, and where they were bound to, and so attacked them on the sea and robbed them. Hence came the proverb which Strabo mentions (p. 644; comp. Steph. B., *s. v.* Κώρυκος, who quotes the *Asia* of Hecataeus, and cites the passage of Strabo). [CASYSTES.]

4. In Pamphylia near Attaleia. [ATTALEIA, p. 321, a.] [G. L.]

CORYCUS (Κώρυκος, Ptol. iii. 17. § 2: *Grabúsa*), the NW. promontory of Crete. In Strabo the name appears as Cimarus (Κίμαρος, x. p. 474). Elsewhere Strabo (xvii. p. 838) states that Corycus was the point whence the distances to the several ports of Peloponnesus were measured: as *Grabúsa* ends in two projecting points, it is probable that the W. point was called Cimaros, the E. Corycus. We learn from Pliny (iv. 20) that the islands which lie off this promontory were called Corycae, and that part of the mass of rock which forms this point went by the name of Mount Corycus. Ptolemy (*l. c.*) mentions a city of this name, and there is a passage in which Juvenal (xiv. 267) mentions a Corycian vessel which evidently belonged to this Cretan town. When the Florentine traveller Buondelmonte visited the island in A. D. 1415, he found remains existing. (Cornelius, *Creta Sacra*, vol. i. p. 87; Pashley, *Trav.* vol. ii. p. 74; Hoeck, *Kreta*, vol. i. p. 377.) [E.B.J.]

CORYDALLA (Κορύδαλλα: *Eth.* Κορυδαλλεύς), a city of the Rhodii, according to Hecataeus, quoted by Stephanus (*s. v.*). But it was not in Rhodes, nor was it one of the Rhodian possessions in the Peraea [CARIA]. (Plin. v. 25; Ptol. v. 3.) The Tabula marks Corydalla (*Coridallo*) on the road from Phaselis, in Lycia, to Patara, and makes the distance between these two places 29 M. P. Pliny (v. 28) places Corydalla in the interior of Lycia, and Ptolemy mentions it with Sagalassus, Rhodia, Phaena, Myra, and other places, as about Mons Massicytus. There are coins of Corydalla of the imperial period with the epigraph Κορυδαλλέων. It is not difficult to see where this place should be looked for. The present site is a village called *Hadgirella*, on the east side of a small stream, about 16 miles, direct distance, south-west of Phaselis. (Spratt and Forbes, *Lycia*, vol. i. p. 164.) There was discovered, in an old wall, "a squared block, with its inscribed face turned towards the stones, on which, in beautifully preserved letters, was the name of the city—Corydalla." There are at Corydalla the remains of a small theatre, of a Roman aqueduct, and a massive Hellenic wall. The inscription copied from Corydalla (vol. ii. p. 277) is of the time of M. Aurelius Antoninus; and it shows that Corydalla had the usual Greek constitution, a senate and a popular body. Pliny mentions Gagae, Corydalla, and Rhodiopolis in this order; and Rhodiopolis was found by Spratt and Forbes near Corydalla. [G. L.]

CORYDALLUS. [ATTICA, p. 325.]

CORYLEIUM (Κορύλειον: *Eth.* Κορυλεύς), according to Stephanus (*s. v.*) a noted Cone in Paphlagonia, so called from a king Corylas. It does not appear what is the authority of Stephanus. Xenophon (*Anab.* vi. 1. § 2) mentions Corylas as the king of Paphlagonia at the time when he passed through the country. [G. L.]

CORYNE. [ERYTHRAE.]

CORYPHANTA, a town in Bithynia, mentioned by Pliny (v. 32) as a place that once existed. [G. L.]

CORYPHANTIS (Κορυφαντίς: *Eth.* Coryphantenus), one of the settlements of the Mytilenaeans, on the coast of Aeolis, opposite to Lesbus, and north of Atarneus. Pliny (v. 30) names it Corypha. It is evidently the same place which appears in the Table under the name Corifanio, between Adramyttium and Elatia, — whatever Elatia may mean. Strabo (p. 607) mentions Coryphantis and Herrhaea, and "after them, Attea." [ATTEA.] The next place in the Table to Elatia is Attalia. The oysters of Coryphas are mentioned by Pliny (xxxii. 6). [G. L.]

CORYPHA'SIUM. [PYLUS.]

CORYTHEIS. [TEGEA.]

COS (Κῶς, Κόως; Cos, P. Mela; Coos, Liv., Ion.; Cea, Plin.: *Eth.* Κῷος (Κώτης in modern Greek), *Stanko*, or *Stanchio*, a corruption of ἐς τὴν Κῶ, an island in the Myrtoan sea, "one of the most renowned of that beautiful chain, which covers the western shore of Asia Minor." One of its earlier names was Meropis (Thuc. viii. 41), another was Nymphaea (Plin. v. 31. s. 36). It appears from an inscription mentioned by Ross, that it was called *Lango* in the time of the Knights. Its situation is nearly opposite the gulf of Halicarnassus, and it is separated by a narrow strait from Cnidus and the Triopian promontory. Its length lies NE. and SW. Strabo gives the names of three promontories, Scandarium on the NE., Lacter on the S. (with the town of Halisarna near it), and Drecanon on the W. (near the town of Dalamalimne). Its principal city, bearing the name of

Digitized by Google

near the first of these promontories, and long. 27° 17′. The circumisland, according to Strabo (xiv. p. stadia, and according to Pliny (*l. c.*) les; but neither of these dimensions true circumference is about 65 geo-, and the length about 23. f Cos will be found in Clarke's *Tra-* i. pp. 196—213, and vol. ii. pt. ii. pp. 321—333. But the best description is in Ross, *Reisen nach Kos, Halicarnassos, u. s. w.* (Halle, 1852), with which his *Reisen auf den Griech. Inseln* should be compared, vol. ii. pp. 86—92, vol. iii. pp. 126—139. There is a monograph on the island by Küster (*De Co Insula*, Halle, 1833), and a very useful paper on the subject by Col. Leake (in the *Trans. of the Royal Soc. of Literature*, vol. i., second series). Both Leake and Ross give a map of Cos, reduced from the recent survey: but for full information, the Admiralty Charts should be consulted. Of these, No. 1604 exhibits the situation of the town and the roadstead in their relation to the opposite coast; No. 1550 shows the town in detail, with a view of it from the anchorage; and No. 1898 gives a general delineation of the whole island. See also No. 1899. With these charts it is desirable to compare Purdy's *Sailing Directory*, p. 114. [J.S.H.]

COIN OF COS.

COSA or COSSA. 1. (Κόσσαι, Strab. Ptol.: *Eth.* Cosanus: *Ansedonia*) a city of Etruria, situated on the sea-coast between the Portus Herculis and Graviscae; immediately adjoining the southernmost of the two necks of sand which connect the *Monte Argentaro* with the main land. [ARGENTARIUS MONS.] It is mentioned by Virgil (*Aen.* x. 167) among the cities supposed to have furnished auxiliaries to Aeneas against Mezentius, but this is the only intimation we find of its having been in very early times a place of consideration: there is no authority for the supposition of some writers who would rank it among the twelve cities of the Etruscan League. Pliny speaks of it as a dependency of Volci, from which it was only 20 miles distant (Cosa Volcientium, Plin. iii. 5. s. 8); and though this may apply to the time of the author, it is certain that we find no evidence of its having ever been an independent city: indeed its name appears for the first time in history in B.C. 273, when a Roman colony was established there (Liv. Epit. xiv.; Vell. Pat. i. 14). This statement has been regarded by Madvig and Mommsen as referring to Cosa in Lucania (see No. 2), but that appears to have been always an obscure place, and Zumpt is certainly correct in referring the Roman colony to the Etruscan Cosa. As the Romans had triumphed over the Volcientes only seven years before (Fast. Capit.), it was natural enough that they should seek to establish their power in this part of Etruria by planting a colony in their territory. (Madvig, *de Colon.* p. 298; Mommsen, *Röm. Münzwesen*, p. 232; Zumpt, *de Colon.* p. 257.) In the Second Punic War Cosa was one of the eighteen colonies which were still able and ready to furnish their required quota of supplies (Liv. xxvii. 10); but it seems nevertheless to have suffered severely from the war, so that in B.C. 199 we find the Cosani petitioning for a reinforcement of colonists. Their request was at first refused, but granted three years afterwards, when 1000 new colonists

Digitized by Google

were settled there. (Id. xxxii. 2, xxxiii. 24.) The chief importance of Cosa was derived from its port, known as the Portus Cosanus, which became a frequent point of departure for the Roman fleets and squadrons, from its ready communication with the islands of Ilva, Corsica, and Sardinia. (Liv. xxii. 11, xxx. 39.) It was from thence that Lepidus embarked for Sardinia, when driven from Italy by his colleague Catulus in B.C. 78. (Rutil. *Itin.* i. 297.) It was in the neighbourhood of Cosa also that during the Civil War of B.C. 49, Domitius assembled a small force and a squadron, with which he proceeded to occupy Massilia. (Caes. *B. C.* i. 34; Cic. *ad Att.* ix. 6, 9.) The town of Cosa is not again mentioned in history, but its name is found in all the geographers, and inscriptions prove it to have been still in existence in the third century. Rutilius, however, speaks of it as in his time utterly desolate and lying in ruins, and relates a ridiculous legend as the cause of its abandonment. (*Itin.* i. 285—290.) The city does not appear to have been ever again inhabited, and the origin of the name of *Ansedonia*, now given to its ruins, is uncertain.

The remains of Cosa are of much interest, and present a very striking specimen of ancient fortifications. Strabo correctly describes the city as standing on a lofty height above the bay, at a short distance from the sea (v. p 225). A steep ascent of above a mile leads to the gates; and remains of the ancient road are visible all the way. The walls, which are preserved more or less perfectly, in their whole extent, enclosed a rude quadrangle, hardly a mile in circuit, forming the level summit of the hill, which rises about 600 feet above the sea. They vary from 12 to 30 feet in height, and are composed of polygonal blocks of hard limestone, fitted together with great nicety; the upper course of the masonry presenting a marked approximation to a horizontal and regular style. They are moreover strengthened at intervals by square towers, projecting from the front of the walls, 14 of which are still standing or distinctly to be traced, forming a continuous chain of towers round the W. and S. portions of the city. No other instance of this regular employment of towers is known in the Etruscan cities, or the massive polygonal walls of so many cities in Latium: while it precisely resembles that adopted by the Romans at Falerii and Alba Fucensis. It therefore furnishes a strong argument for supposing that the walls now standing, were either erected, or at least in great measure rebuilt, when Cosa became a Roman colony. Dennis, however, from whom the above description is taken, strenuously maintains their high antiquity and Pelasgic origin. (Dennis's *Etruria*, vol. ii. pp. 269—289; Micali, *Antichi Popoli Italiani*, vol. i. p. 152, iii. p. 6.) The small extent of the space enclosed within the walls sufficiently proves that Cosa could never have been a very powerful city.

The Itinerary of Antoninus places Cosa on the Via Aurelia, and gives also another line of route passing through Tarquinii to Cosa (*Itin. Ant.* pp. 292, 300); but it is clear that the high road could never have ascended the hill to the city itself: and the Tab. Peut. gives the name of Succosa (Subcosa), which appears to have been a station or Mutatio at the foot of it. The port of Cosa, called by Livy Portus Cosanus, is evidently the same which is termed by Strabo and Rutilius the Portus Herculis, and is still called *Porto d'Ercole:* it is on the opposite side of the bay from Cosa itself, under the shoulder of the Mons Argentarius, the whole of which remarkable promontory appears to have been included in the territory of Cosa. Hence it is termed by Lucan "Cosa, a promontory of Etruria" (*Ann.* ii.), where he is certainly speaking of the *Monte Argentaro*.

2. A town of Lucania, mentioned by Caesar, who calls it "Cosa in agro Thurino" (*B.C.* iii. 22), and relates that Milo laid siege to it and was killed under its walls. Velleius, however, refers the same event to Compsa in the Hirpini (ii. 68), and Pliny speaks of the death of Milo as occurring "juxta castellum Carissanum" (iii. 56), for which Sillig would read Compsanum. But the reading in Caesar is well supported, and there is no reason to reject it: the Cosa there mentioned would appear, however, to have been but an obscure place, a mere Castellum in the territory of Thurii, and there is clearly no ground for supposing the Roman colony of B.C. 273 to have been settled here instead of at Cosa in Etruria. It is not improbable that we should read in Pliny 'Cossanum' or 'Cassanum' for 'Carnunum,' and that the name is still retained by the modern town of *Cassano*, near which is a place called *Civita*, where the ruins of an ancient city are said to be still visible. (Cluver. *Ital.* p. 1205; Romanelli, vol. i. p. 238). Stephanus of Byzantium cites from Hecataeus a city of Cossa (Κοσσα) as existing in the interior of Oenotria, which may probably be identical with the preceding. [E.H.B.]

COSA, a town in Gallia, is placed in the Table on a road from Tolosa (*Toulouse*) to Divona (*Cahors*). The distance of Cosa from Divona is marked 20 Gallic leagues; which is too much, if the place is *Cos* or *Coz*,—as it seems to be,—on the river *Aveiron*, which flows into the *Tarn*, a branch of the *Garonne*. [G. L.]

COSCI'NIA (τὰ Κοσκίνια) or CO'SCINUS (Plin. v. 29), a place in Caria. Strabo (p. 650) speaks of Coscinia and Orthosia as considerable places (οἰκίαι), by which he means, perhaps, something less than towns. In another passage (p. 587) he says that the river which flows from Coscinia to Alabanda has many fords, by which he seems to mean that a traveller must cross it many times. We may probably infer that Coscinia was higher up the stream than Alabanda. Leake says (*Asia Minor*, p. 234), "if Alabanda was at Arabissar, *Tshina*, where Pococke found considerable remains, may be the site of Coscinia, and its modern name may possibly be a corruption of the ancient." [G. L.]

COSE'DIA, a place in Gallia, in the country of the Unelli. The Antonine Itin. places it on a road from Alauna (*Alaume*) to Condate (*Rennes*). The Table gives a route from Coriallum (*Cherbourg*) to Condate through Cosedia, which is the next place to Coriallum. D'Anville discusses the site of Cosedia without determining its position, for there is great difficulty about the distances. Some geographers take Cosedia to be *La Cousinière*; and there are other guesses. [G. L.]

COSETA'NI (Κοσπτανοί, Ptol. ii. 6. § 17; Plin. iii. 3. s. 4; Cositani, Inscr. ap. Gruter, p. 499), a small people of Hispania Tarraconensis, along the coast, from the mouth of the Iberus (*Ebro*) northwards to the LALETANI. Their territory, called Cosetania or Cossetania, contained the capital city TARRACO and the river SUBUR. [P. S.]

COSSA (Κόσσα or Κῶσα, Ptol. vii. 1. § 65), a town in India, mentioned by Ptolemy as a place famous for the diamonds found there. It has been conjectured by Forbiger to be the present *Cossa* on the river *Zesul*. [V.]

Κοσσαῖοι), a warlike tribe inhabiting district called Cossaea (Κοσσαία), of Susiana to the S., and of Media . They were a hill tribe, and were ws and arrows. Their land was roductive, and they lived the life of (xi. p. 744) speaks of them as con- ith their neighbours, and testifies to en he says that they sent 13,000 he Elymaei in a war against the nia and Susiana. Alexander led his em and subdued them, at least for a vii. 111.) The Persian kings had to reduce them, but had been in the them a tribute, when they moved ually from Ecbatana to Babylon, to r at the latter place. (Strab. xi. p. racter, they seem to have resembled ribes, who now roam over the same h they formerly occupied. There is the orthography of their name in . Pliny (vi. 27. s. 31) calls them some places they are apparently h the Cissii. It is possible that y be connected with the modern [V.]

Ὀσσιοι). According to a fragment , cited by Stephanus (*s. v.* Ὠστί- ones were a people on the Western also called Cossini by Artemidorus, Pytheas. It seems probable, that r Ostiaei are the Osismii of Caesar. Walckenaer, who is ingenious on mes, does not admit that these Cos- me as the Ostiaei, but he assumes ighbouring tribe at the western ex- agne. There is a place *Coesnou* or *Brest*. [G. L.]

S (Κοσσωνίτης), a Thracian river, by the town of Consintus, and emp- the Aegean. (Aelian, *H. A.* xv. 25; 1.) [L. S.]

COSSIUM (Κόσσιον), a town of the le in Gallia on the Garumna, above *rdeaux*). The Vasates of Ptolemy Vocates of Caesar (*B. G.* iii. 27), an ple, seem to be the same. They are he Basabocates of Pliny (iv. 19), indicates two conterminous peoples. of Pliny's name is clearly Vocates, part (Basa) happens to be the mo- ssio, which is *Bazas*, in the depart- le. The diocese of *Bazas* probably he territory of the Vasates. Walcke- r., vol. i. p. 302) conjectures, that as ts this diocese into two parts, the as the country of the Vasates, and rt between the Garonne and the *Dor*- country of the Vocates.

nine Itin., Cossio, named "Civitas the road from *Bordeaux* to *Nar*- M. P. from *Bordeaux*. The name n Ausonius (*Id.* ii. 4), who says that from this place, though settled at another passage (*Parent.* xxiv. 8), Cossio Vasatum." Ammianus Mar-) has the name Vasatae. *Bazas* is country. There is a description of the us Apoll. (Lib. viii. Ep. 12). [G.L.]

S (Κοσσόανος, Arrian. *Indic.* 4), any tributaries of the Ganges, re- corded by Arrian. It is probably the same as that which Pliny (vi. 18. s. 22) calls Cossoagus. It has been conjectured that it is the same as that now called Cosi or Cosa. [V.]

COSSURA, COSSYRA, or COSYRA (Κόσσουρα, Strab.; Κόσσυρα, Ptol. iv. 3. § 37; Κόσυρος, Scyl. p. 50. § 110: *Eth.* Cossurensis: *Pantellaria*), a small island in the Mediterranean Sea, about half way between Sicily and the coast of Africa. (Strab. ii. p. 123; Plin. iii. 8. s. 14; Mel. ii. 7. § 18.) Scylax, the earliest author by whom it is mentioned, says it was one day's voyage from the Hermaean Promontory in Africa. Strabo reckons it about 88 miles from Lilybaeum, and the same distance from Clypea, on the coast of Africa (vi. p. 277): but in another passage (xvii. p. 834) he describes it as directly opposite to Selinus on the coast of Sicily, and distant from thence about 600 stadia, which is almost exactly correct. Its real distance from the nearest point of Africa does not, however, exceed 38 geog. miles. The distances given in the Maritime Itinerary (p. 517) are altogether erroneous. Strabo adds that it contained a town of the same name, and was 150 stadia in circumference, — but this is much below the truth: according to Capt. Smyth it is about 30 miles in circuit. Ovid speaks of it as a barren island, and contrasts it with its more fertile neighbour Melita (*Fast.* iii. 567), and Silius Italicus calls it "parva Cossyra" (xiv. 272). It naturally fell in early times into the hands of the Carthaginians: from whom it was taken by the Roman consuls M. Aemilius and Ser. Fulvius in the First Punic War, a conquest which (strangely enough) was thought worthy to be mentioned in the triumphal Fasti though the Carthaginians recovered possession of it the next year. (Zonar. viii. 14; Fast. Capit.) The island of *Pantellaria* is in modern times a dependency of Sicily, and contains about 5000 inhabitants: it is wholly of volcanic origin, and is tolerably fertile, especially in fruit and vines. (Smyth's *Sicily*, p. 281.) [E. H. B.]

COIN OF COSSURA.

COSTOBO'CI (Κοιστοβῶκοι, Ptol. iii. 5. § 21; Κοστουβῶκοι, Dion Cass. lxxi. 12; Costobocci, Plin. vi. 7; Costobocae, Amm. Marc. xxii. 8. § 42: Costoboci, Capitolin. *M. Antonin.* c. 22), a people of Dacia, probably belonging to the Wendish stock (Schafarik, *Slavische Alterthum*, vol. i. p. 122). Their position has been sought in the district of *Tschernigow*. [E. B. J.]

COTES PROM. [Ampelusia.]

COTHON. [Carthago.]

COTIAEUM (Κοτιάειον: *Eth.* Κοτιαεύς: *Kutahiyah*). The name is written Cotyaeum (Κοτυάειον) in the text of Strabo (p. 576), but the epigraph on the coins is said to be always Κοτιαέων. It was on the Roman road from Dorylaeum (*Eski-Shehr*) to Philadelphia (*Allah-Shehr*), and in Phrygia Epictetus, according to Strabo. It is mentioned by Pliny (v. 32). *Kutahiyah* is a considerable

Digitized by Google

town, on a river which some geographers take to be the Thymbrius. Cotiaeum was the birthplace of Alexander, the son of Asclepiades, a very learned grammarian. There are no remains of importance at *Kutahiyah*. In the Table the name is miswritten Cocleo. [G. L.]

COTINAE (αἱ Κωτίναι), a town of Hispania Baetica, famous for its mines of copper mixt with gold, lay somewhere in the range of mountains which border the valley of the Baetis on the N. (Strab. iii. p. 142.) There seems no sufficient ground for the conjecture of Vossius (*ad Mel.* iii. 1), identifying it with OLEASTRUM. [P. S.]

COTINUSSA. [GADES.]

COTTABANI (Κατταβῆνοι), a people of Arabia, to the east of the Omanitae, the modern *Omán*, extending to the mountains of the *Asabi*, at the entrance to the Persian gulf. (Ptol. vi. 7.) They are referred by Forster to the *Beni-Kahtan*, or Joctanite family of Arabs, the classical name being merely an inversion of their well-known native appellation. (*Arabia*, vol. i. p. lxxvi., vol. ii. p. 154.) [G. W.]

COTTAEOBRIGA. [VETTONES.]

COTTIAE ALPES. [ALPES, p. 107.]

COTTIARA (Κοττιάρα, Ptol. vii. 1. § 9), the chief city, according to Ptolemy, of the Aei, a tribe who occupied the lower part of the Peninsula of Hindostan. It is probably the same place which is mentioned by Pliny (vi. 23. 26) under the names of Cottona or Cottonara, and from which the best pepper was obtained, according to the author of the *Periplus* (p. 32). It has been supposed by some to be represented now by *Cochin*, *Calicat*, or *Travancore*; on the whole, *Cochin* is probably the most likely. [V.]

COTTIARIS (Ptol. vii. 3. § 3; Marcian. p. 30), a river of China, at the southern end of that empire, on the banks of which lived, according to Ptolemy, the Aethiopian Icthyophagi. It is difficult to determine to what river this name ought to be referred; hence Mannert has conjectured that it is a river of Borneo, and Forbiger that it is the *Si Kiang*, the river of Canton, which, agreeably with this view, he imagines to be the same as the Cattigara of Ptolemy. This seems the best suggestion. [V.]

COTTONA. [COTTIARA.]

COTYLAEUM (Κοτύλαιον), a mountain in Euboea, at the foot of which Tamynae was situated. (Aeschin. *in Ctesiph.* p. 480; Steph. B. *s. v.*)

COTYLIUS. [PHIGALEA.]

COTYLUS. [IDA.]

COTYORA (τὰ Κοτύωρα: *Eth.* Κοτυωρίτης, Steph. B. *s. v.*) and COTYORUM (Plin. vi. 4), in Pontus. According to Xenophon (*Anab.* v. 5. § 4), a colony of Sinope, which furnished supplies for the Ten Thousand in their retreat. It was in the country of the Tibareni. The place was on the coast, and on a bay called after the town. Strabo (p. 548), where the name is written in a corrupt form, speaks of it as a small place; and Arrian as a village,—which was owing to the neighbouring town of Pharnacia being supplied with part of its population from it. The Maritime Itins. on this coast make the distance from Cotyora to the river Melanthius 60 stadia. Hamilton (*Researches*, &c. vol. i. p. 267) says: "Cotyora perhaps stood on the site of *Ordou*, where some remains of an ancient port cut out of the solid rock are still visible." But he remarks that some writers suppose that Cotyora was on the modern bay of *Pershembah*, "which is certainly more sheltered than *Ordou*, and its distance from the river Melanthius agrees better with the 60 stadia of Arrian and the anonymous Periplus, than the site of *Ordou*." [G. L.]

COTYRTA (Κοτίρτα: *Eth.* Κοτυρταῖος), a town in the S. of Laconia, near the promontory Maia, which was garrisoned by the Lacedaemonians, along with Aphrodisias, in the Peloponnesian War, in order to protect this part of the coast from the ravages of the Athenians, who had established themselves at Cythera. (Thuc. iv. 56; Steph. B. *s. v.*)

CRAGUS (Κράγος: *Eth.* Κράγιος), a mountainous tract in Lycia. Strabo (p. 665), whose description proceeds from west to east, after the promontory Telmissus, mentions Anticragus, on which is Carmylessus [CARMYLESSUS], and then Cragus, which has eight summits (or he may mean capes) and a city of the same name. Pinara, in the interior, was at the base of Cragus. There are coins of the town Cragus of the Roman imperial period, with the epigraph Λυκιων Κρ. or Κραγ. or Κραγ. The range of Anticragus and Cragus is represented in the map in Spratt and Forbes (*Lycia*, vol. i.) as running south from the neighbourhood of Telmessus, and forming the western boundary of the lower basin of the river Xanthus. The southern part is Cragus. The direction of the range shows that it must abut on the sea in bold headlands. In Beaufort's map of the coast of Karamania, the Anticragus is marked 6000 feet high. Beaufort's examination of this coast began at "*Yedy-Booroon*, which means the Seven Capes, a knot of high and rugged mountains that appear to have been the ancient Mount Cragus of Lycia." (*Karamania*, p. 1.) The ruins of Pinara are where Strabo describes them, on the east side of this range, about half way between Telmissus and the termination of the range on the south coast. There is a "pass leading between the summits of Cragus and Anticragus. Between the two chief peaks is a plain 4000 feet above the sea: and above it rises the highest peak of Cragus, more than 2000 feet above this elevated plain. The first half of the ascent from the plain is through a thick forest, and the remainder over bare rock. From the summit there is a view of the whole plain of Xanthus, and of the gorges of the Massicytus, which lies east of it. The side towards the sea is so steep, that from this lofty summit the waves are seen breaking white against the base of this precipitous mountain coast." (Spratt's and Forbes's *Lycia*, vol. ii. p. 301.) It appears that Strabo is right when he describes a valley or depression as separating Anticragus and Cragus; and the highest part, which towers above the sea at the Seven Capes, seems to be the eight summits that Strabo speaks of. There was a promontory Cragus, according to Scylax and Pliny (v. 27), which must be the Seven Capes. The Acra of the Stadiasmus seems also to be the Seven Capes. The position of the Cragus between Xanthus and Telmissus is mentioned by Mela (i. 15), and he also probably means the same striking part of the range. It is observed, that "there is not in all Europe a wilder or grander scene than this pass through the Seven Capes of Cragus." (Spratt and

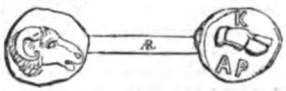
ριος), a town of Cephallenia, si-
d of a bay on the western coast.
ned the Athenian alliance, together
ephallenian towns (Thuc. ii. 30); which the Corinthians made a territory of Cranii, but were re- (Thuc. ii. 33.) In B. C. 421 the at Cranii the Messenians who were Pylos on the surrender of that for- emonians. (Thuc. v. 35.) Cranii surrendered to the Romans without resistance in B. C. 189. (Liv. xxxviii. 28.) It is mentioned both by Strabo (x. p. 455) and Pliny (iv. 12. s. 19).

The ruins of Cranii are near the modern town of *Argostóli*. Leake remarks that "the walls of Cranii are among the best extant specimens of the military architecture of the Greeks, and a curious example of their attention to strength of position in preference to other conveniences; for nothing can be more rugged or forbidding than the greater part of the site. The enclosure, which was of a quadrilateral form, and little, if at all, less than three miles in circumference, followed the crests of several rocky summits, surrounding an elevated hollow which falls to the south-western extremity of the gulf of *Argostóli*." The walls may be traced in nearly their whole circumference. (Leake, *Northern Greece*, vol. iii. p. 61, seq.)



COIN OF CRANII.

CRANON or CRANNON (Κρανών, Κραννών; the name is written indifferently with the single and double *ν* in inscriptions and coins, as well as in ancient authors: *Eth.* Κρανώνιος), a town of Pelasgiotis, in Thessaly, situated S.W. of Larissa, and at the distance of 100 stadia from Gyrton, according to Strabo (vii. p. 330, frag. 14). Its most ancient name is said to have been Ephyra; and Homer, in his account of the wars of the Ephyri and Phlegyae, is supposed by the ancient commentators to have meant the people afterwards called Crannonians and Gyrtonians respectively. (*Il.* xiii. 301; Strab. *l. c.* ix. p. 442; Steph. B. *s. v.* Κραννών). Pindar likewise speaks of the Crannonii under the name of Ephyraei (*Pyth.* x. 85). Crannon was the residence of the wealthy and powerful family of the Scopadae, whose numerous flocks and herds grazed in the fertile plain surrounding the city. (Theocr. xvi. 36.) Diactorides, one of the Scopadae of Crannon, was a suitor for the hand of the daughter of Cleisthenes of Sicyon. (Herod. vi. 127.) Simonides resided some time at Crannon, under the patronage of the Scopadae; and there was a celebrated story current in antiquity respecting the mode in which the Dioscuri preserved the poet's life when the Scopadae were crushed by the falling in of the roof of a building. (Cic. *de Orat.* ii. 86: the story is related in the *Dict. of Biogr.* vol. iii. p. 834.)

In the first year of the Peloponnesian War (B. C. 431) the Crannonians, together with some of the other Thessalians, sent troops to the assistance of the Athenians. (Thuc. ii. 22.) In B. C. 394 they are mentioned as allies of the Boeotians, who molested Agesilaus in his march through Thessaly on his return from Asia. (Xen. *Hell.* iv. 3. § 3.) In B. C. 191 Crannon was taken by Antiochus. (Liv. xxxvi. 10.) It is mentioned again in the war with Perseus. (Liv. xlii. 65.) Catullus (lxiv. 35) speaks of it as a declining place in his time:—

"Deseritur Scyros: linquunt Phthiotica Tempe,
Cranonisque domos, ac moenia Larissaea."

Its name occurs in Pliny (iv. 8. § 15). Its site has been fixed by Leake at some ruins called *Paleá Lárissa*, situated half an hour from *Hadjilár*, which is distant 2 hours and 27 minutes from *Lárissa*. At *Pálea Lárissa* Leake found an ancient inscription

Digitized by Google

containing the name of Crannon. The name of the ruins shows that they were once more considerable than they are at present; but even now "some foundations of the walls of the town, or more probably of the citadel, may be traced along the edge of a quadrangular height called *Paleokastro*, which is nearly a mile in circumference, and towards the upper part of which are some vestiges of a transverse wall, forming a double inclosure. This height, and all the fields around, are covered with pottery; and on the side of the height, or on the rise of the hills behind it, are eight or nine small tumuli." (Leake, *Northern Greece*, vol. iii. p. 363, seq.)

CRATAEIS (Κραταΐς), a small river of Bruttium, flowing near the Scyllaean promontory. It derived its name from a nymph Cratacis, who, according to Homer, was the mother of Scylla. (Hom. *Od.* xii. 124; Ovid, *Met.* xiii. 749.) The river, which is mentioned only by Pliny (iii. 5. s. 10), and Solinus (2. § 22), was probably a small stream which falls into the sea about 3 miles E. of *Scilla*, and is called the *Fiume di Solano*, from a village of that name, or *Fiume dei Pesci*. (Romanelli, vol. i. p. 74.) [E. H. B.]

CRATEIA (Κρατεία), is placed by Ptolemy (v. 1) in the interior of Bithynia, and he gives it also the name Flaviopolis, which clearly dates from the imperial period, and probably the time of Vespasian. The Antonine Itin. places it between Claudiopolis and Ancyra of Galatia, and 24 M. P. from Claudiopolis. An autonomous coin with the epigraph κρη is attributed to this place; and there are coins of the imperial period, from Antoninus Pius to Gallienus. It became an episcopal see. There is nothing to determine the position of Crateia, and it is placed in the maps purely at hazard. [G. L.]

CRATEIAE (Κρατειαί: *Krato*), some small islands lying off the coast of Liburnia in Illyricum. (Scylax, p. 8; Plin. iii. 26. s. 30.)

CRATER (ὁ Κρατήρ) was the name given by the Greeks, according to Strabo (v. p. 242), to the beautiful gulf now known as the *Bay of Naples*, one of the most remarkable natural features on the coast of Italy. It was called by Eratosthenes the CUMAEAN GULF (ὁ Κύμαιος κόλπος, *ap. Strab.* i. p. 22, 23); Appian terms it the Gulf above Cumae (ὁ κόλπος ὁ ὑπὲρ Κύμης, *B. C.* v. 81); it appears to have been generally known to Roman writers as the Gulf of Puteoli. (SINUS PUTEOLANUS, Plin. iii. 6. s. 12; Mela ii. 4; Suet. *Aug.* 98.) Its boundaries and natural characters have been already described under the article CAMPANIA. [E. H. B.]

CRATHIS. [ACHAIA, p. 13, b.]

CRATHIS (Κρᾶθις), one of the most considerable rivers of Bruttium, which in the northern part of its course forms the boundary between that province and Lucania. It rises in the central mountain group of Bruttium (the *Sila*), a few miles S. of Consentia, flows below the walls of that town, where it is joined by the smaller stream of the Basentus or Busentus (*Busento*), and has a course nearly due N. through the centre of the Bruttian peninsula, till it approaches the confines of Lucania, when it turns abruptly to the E. and flows into the Gulf of Tarentum, immediately to the S. of the ancient site of Thurii. At the present day it receives, at a distance of above three miles from its mouth, the waters of the river Sybaris (now called the *Coscile*), which in ancient times pursued their own course to the sea. [SYBARIS.] From its close proximity to the celebrated city of Sybaris the Crathis is noticed by many ancient writers. (Lycophr. *Alex.* 919; Theocr. v. 15.) Euripides sings its praises, and alludes to the peculiar golden-red tinge it was supposed to impart to the hair, a fact which is also noticed by Ovid and other writers. (Eur. *Troad.* 228; Ovid. *Met.* xv. 315; Strab. vi. p. 263; Plin. xxxi. 2. s. 10; Vib. Seq. p. 9; Timaeus *ap. Antig. Caryst.* 149.) The plains through which the Crathis flows in the lower part of its course were noticed in ancient times for their fertility: they are now become marshy and unhealthy. Like all streams which descend from a mountainous region, and afterwards flow through a flat alluvial tract, the river was subject to violent inundations and sudden changes of its course: during the flourishing days of Sybaris it was drawn and restrained by dams and artificial embankments, whence when the citizens of Crotona, after their great victory over the Sybarites in B.C. 510, determined to annihilate the rival city, they broke down the banks of the Crathis, and turned its waters on to the site of Sybaris. (Strab. vi. p. 263.) Hence Herakleides incidentally notices the *dry bed* of the Crathis (v. 45), which was evidently its ancient channel. The same author expressly tells us that the Italian river was named by the Achaeans who founded Sybaris after the less celebrated stream of the same name in their native country. (Herod. i. 145; Strab. vi. p. 386.) [E. H. B.]

CRAUGA'LLIUM (Κραυγάλλιον), a town of Phocis, in the neighbourhood of Cirrha, whose inhabitants are said to have joined the Cirrhaeans in maltreating the pilgrims who came to consult the oracle at Delphi. It was destroyed along with Cirrha at the end of the First Sacred War, and its name does not occur again. [CRISSA.] The name of the people is variously written Craugallidae, Crauallidae, and Acragallidae. Leake conjectures that *Xeropigadho* is the site of this town. (Anaxim. *ap. Ctesiph.* p. 68, ed. Steph.; Harpocrat. s. v. Κραυαλλίδαι; Leake, *Northern Greece*, vol. ii. p. 587.)

CRAUNI (Κραῦνοι), a promontory on the Cilician coast, mentioned in the Stadiasmus: "from the Melas river to the point Crauni, 40 stadia." [CRAMBUSA, No. 2.] Leake observes (*Asia Minor*, p. 206), "The river which joins the sea at the bottom of the bay of *Papadúla*, being the largest stream in the part of the coast under consideration, seems to be the Melas of the Stadiasmus; and the cape which is midway between that stream and Celenderis may possibly be the Crauni of the same authority." [G. L.]

CREMASTE (Κρεμαστή), a place mentioned by Xenophon (*Hell.* iv. 8. § 37). He speaks of the plain near Cremaste, "where there are the gold mines of the Abydeni." If Cremaste was a village, it was probably on a hill above the plain. As Scepsis speaks of gold mines at Astyra [ASTYRA], it has been conjectured that Astyra and Cremaste are either the same place, or two adjacent places. Gold mines belonging to Lampsacus are mentioned by Pliny (xxxvii. 11) and by Polyaenus (ii. 1. § 26): and they may be the same as those of Cremaste, if we suppose Cremaste to be between Abydus and Lampsacus. [G. L.]

CRE'MERA (Κρεμέρα), a small river of Etruria flowing into the Tiber a few miles above Rome. It is celebrated for the memorable defeat of the Gens Fabii, who established on its banks a fortified post, from whence they carried on hostilities against the Veientes, and laid waste their territory, until they were at length decoyed into an ambuscade, and all put to the sword, B.C. 477. (Liv. ii. 49, 50; Dionys.

passage of Strabo about Cremna
difficulty. He says that Amyntas
dalium, which is situated between
alassus. Strabo adds, "Sagalassus
Apameia a day's journey, having a
30 stadia from the fort (τοῦ ἐρύ-
y call it also Selgessus." Cramer
ol. ii. p. 299) supposes Strabo to
e distance of 30 stadia from Saga-
herly direction, was the important
a;" on which it may be useful to some readers to observe, that where a Greek text presents a difficulty, Cramer is often wrong in explaining it. But there is no difficulty here. The French translation of Strabo makes a like mistake; and Groskurd the same, for he translates it "hat fast dreissig stadien hinabsteigung von jener veste," by which it appears that he means Cremna. Arundell (*Asia Minor*, vol. ii. p. 81) properly remarks that, if there were only 30 stadia between Cremna and Sagalassus, "it is hardly conceivable that Sandalium should be between them." It is not conceivable at all; and Strabo's text, whatever fault there may be in it, clearly places Cremna at some distance from Sagalassus, and "the fort" is not Cremna. But there is nothing in the passage of Strabo from which we can determine the distance between Sagalassus and Cremna, nor their relative position. Ptolemy (v. 5) mentions the Cremna Colonia, and according to him it is in the same longitude as Sagalassus. Arundell found a place called *Germè* fifteen miles SSE. of the village of *Allahsún*, which is near the ruins of Sagalassus. There is a view of *Germè* in Arundell's work. It is a striking position, "a terrific precipice on three sides." The ruins are described by Arundell. There are the remains of a theatre, of temples, of a colonnade, and of what is supposed to be a triumphal arch. Most of the buildings seemed to be of the Roman period.

There is a story in Zosimus (i. 69) of an Isaurian robber, named Lydius, who seized Cremna, a city of Lycia, as he calls it. There is no doubt that he means the same place which Strabo does. [G. L.]

CREMNI (Κρήμνοι), a town of European Sarmatia, W. of the promontory Agarum, and called by Herodotus (iv. 20, 110) a factory of the free Scythians on the W. of the Palus Maeotis. Mannert (vol. iv. p. 114; comp. Ritter, *Vorhalle*, p. 156) places it in the neighbourhood of *Taganrog*. By others it has been sought for at *Stari-Krim* near *Mariupol*. (Reichardt, *Klein. Geogr. Schrift.* p. 285; comp. Eichwald, *Alte Geogr. d. Casp. Meer*, p. 309.) [E. B. J.]

CREMNISCI (Κρημνίσκοι, Anon. *Peripl. Pont. Eux.* p. 10; Cremniscos, Plin. iv. 26), a town on the Euxine, which Artemidorus, the geographer, placed at 480 stadia from the river Tyras. Forbiger (vol. iii. p. 1129) places it near the lake *Burmasaka*, or near *Islama*. [E. B. J.]

CREMO'NA (Κρεμώνη, Pol. et Strab.; Κρέμωνα, Ptol.; Κρεμών, App.: *Eth.* Cremonensis: *Cremona*), a city of Cisalpine Gaul, situated on the left bank of the Padus, about 6 miles below the confluence of the Addua. Both Pliny and Ptolemy reckon it among the cities of the Cenomani (Plin. iii. 19. s. 23; Ptol. iii. 1. § 31), but it would seem from the expression of Livy (coloniae deductae *in agro de Gallis capto*, Epit. xx.) that it was originally included in the territory of the Insubres. We have no account of its existence previous to the Roman conquest, but after the great Gaulish war in B. C. 225, the Romans, being desirous to establish a firmer footing in this part of Italy, settled two colonies of 6000 men each at Cremona and Placentia, the one on the left and the other on the right bank of the Padus, B. C. 219. (Liv. Epit. xx.; Vell. Pat. i. 14; Pol. iii. 40; Tac. *Hist.* iii. 34.) The new colonies were, however, scarcely established when the news of the approach of Hannibal led the Boians and Insubrians to take up arms afresh; but though they ravaged the newly occupied lands, and even drove the settlers to take refuge at Mutina, it is certain

Digitized by Google

that they did not take either of the two cities, which are mentioned in the following year as affording a shelter and winter-quarters to the army of Scipio after the battle of the Trebia. (Liv. xxi. 25, 56; Pol. *l. c.*; Appian, *Hann.* 7.) At a later period of the Second Punic War Cremona was one of the colonies which remained faithful, when twelve of them refused any further supplies. (Liv. xxvii. 10.) Its territory suffered severely from the ravages of the Gauls, and after the close of the war, the city itself had a narrow escape, being closely besieged by the insurgent Gauls under Hamilcar, who had already taken and destroyed the neighbouring colony of Placentia. Cremona, however, was able to hold out till the arrival of the praetor L. Furius, who defeated the Gauls in a great battle under its walls, B. C. 200. The city had, nevertheless, suffered so much from the repeated wars in this part of Gaul, that in B. C. 190, a fresh body of colonists was sent thither, and 6000 new families were divided between it and Placentia. (Liv. xxviii. 11, xxxi. 10, 21, xxxvii. 46.) From this time till near the end of the Republic, we hear nothing more of Cremona,—but we learn that it became a populous and flourishing colony, and rose to be one of the most considerable cities in this part of Italy. The fertility of its territory and the advantages of its situation in connection with the great rivers were the sources of its prosperity. (Tac. *Hist.* iii. 34.)

During the civil wars after the death of Caesar, Cremona espoused the cause of Brutus, and was in consequence one of the cities of which the territory was confiscated and assigned to his veterans by Octavian. It is to this event that Virgil alludes in the well-known line,

"Mantua vae miserae nimium vicina Cremonae,"

a part of the territory of Mantua having shared the same fate with that of the neighbouring city (Virg. *Ecl.* ix. 28, and Serv. *ad loc.*) But this change of proprietors did not injure the prosperity of the city itself, which is described by Strabo (v. p. 216) as one of the chief places in this part of Italy, and appears from Tacitus to have been a flourishing and wealthy city when the civil wars of A. D. 69 inflicted a fatal blow on its prosperity. During the contest between Otho and Vitellius, Cremona was one of the first places occupied by the generals of the latter. Caecina, when repulsed from Placentia, made it his head-quarters, and the first battle of Bedriacum, which led to the defeat and death of Otho, was fought between that town and Cremona. To celebrate this victory Caecina shortly after exhibited a show of gladiators at Cremona, at which Vitellius himself was present; and an amphitheatre was expressly constructed for the occasion. (Tac. *Hist.* ii. 17, 22. 23, 67, 70; Dion Cass. lv. 1.) A few months after, Cremona again became the head-quarters of the Vitellian forces, which were opposed to Antonius Primus, the general of Vespasian: and these after their defeat in the second battle of Bedriacum (which was fought only a few miles from Cremona), fell back upon the city, immediately adjoining to which they had a fortified camp. But the troops of Antonius, following up their advantage, successively took by storm both the camp, and the city itself, notwithstanding that the latter was strongly fortified with walls and towers. The troops of Caecina were admitted to terms of capitulation, but the whole city was given up to plunder, and after having been exposed for four days to the fury of the soldiery was ultimately burnt to the ground. Neither temples nor public buildings were spared, and only one of the former survived the catastrophe. (Tac. *Hist.* ii. 100, iii. 15—33.) So great a calamity falling upon one of the most flourishing cities of Italy, necessarily brought great odium upon Vespasian, who, after he had established his power, sought as far as possible to repair the mischief, and encouraged the rebuilding of the city, which soon rose again from its ashes. (Tac. *l. c.* 34.) But though its public buildings were restored, and it retained its colonial rank, it appears never to have recovered its former prosperity. Its continued existence under the Roman Empire is attested by the Itineraries as well as by inscriptions: it is noticed by Zosimus as a considerable place under the reign of Honorius, and we learn from the Notitia that it was regarded as a military post of importance (Amm. v. 37; Itin. Ant. p. 283; Tab. Peut.; Not. Imp. p. 121; Orell. *Inscr.* 1765, 3750, 3843.) But in A. D. 605 it was taken, and for the second time utterly destroyed by the Lombard king Agilulf (P. Diac. *Hist. Lang.* iv. 29.) In the Middle Ages, however, it again rose to great prosperity, and became a large and populous city; though it has decayed since then, it still contains near 30,000 inhabitants. No remains of antiquity are now visible there, except a few Roman inscriptions, one of which is interesting as referring to the worship of the goddess Mefitis, whose temple, according to Tacitus, was the only one that escaped in the conflagration of the city. (Tac. *Hist.* iii. 33; Orell. *Inscr.* 1795.) The mention of this deity shows that the low and marshy lands in the neighbourhood of Cremona were unhealthy, in ancient as well as modern times. We learn from Donatus that Virgil, though born in the neighbourhood of Mantua, spent the earliest years of his life, and received the first rudiments of his education at Cremona. (Donat. *Vit. Virg.*) [E. H. B.]

CREMO'NIS JUGUM. [ALPES, p. 107.]

CRENAE. [ARGOS AMPHILOCHICUM.]

CRE'NIDES (Κρηνίδες), or CRANIDES (Κρανίδες; *Eth.* Κρανίτης, Steph. *s. v.*), a place on the coast of Bithynia, according to Arrian 60 stadia east of Sandaraca; according to Marcian only 30 stadia. It was between Heraclea and the mouth of the Billaeus. [G. L.]

CRENIDES. [PHILIPPI.]

CREONES, in North Britain, mentioned by Ptolemy as lying west of the Cerones [CERONES], occupied parts of Ross and Inverness. [R. G. L.]

CREO'PHAGI (Κρεοφάγοι, Strab. xvi. p. 774), a Troglodytic race on the western shore of the Red Sea, and, as their name of "the flesh-eaters" imports, a pastoral people who lived upon the produce of their herds of cattle. Strabo (*l. c.*) seems to regard the Colobi and Creophagi as the same tribes. [W. B. D.]

CRESSA (Κρῆσσα: *Eth.* Κρησσαῖος). 1. According to Stephanus (*s. v.*) a city of Paphlagonia, founded by Meriones after the war of Troy. Leon, the son of Nicomedes, took it. Cramer (*Asia Minor*, vol. i. p. 241), says, "that it was probably on the sea coast, and perhaps should be identified with Carussa." But there is no foundation for this guess. [CARUSA.]

2. There is a Cressa on the coast of Caria, which Pliny (v. 27) calls Cressa Portus, and places 30 M. P. from Rhodus. It is also mentioned by Ptolemy (v. 2). Leake (*Asia Minor*, p. 222) says "that the excellent harbour of Cressa is now called

d Extent.—Crete, an island situated basin of the Mediterranean sea, is abo (x. p. 474) as lying between hat part of Hellas which extends Laconia, and parallel in its length these two points. The words μέχρι be understood either of Malea or probable that this geographer ex- far as Taenarum, as from other work (ii. p. 124, viii. p. 863), it t he considered it and the W. points er the same meridian. It is still understand the position assigned to l to Cyrenaica (xvii. p. 838). Strabo e truth, though contradicting his ts, where he makes Cimarus the of Crete 700 stadia from Malea Cape Sammonium 1000 stadia from 5), which was one of the best-ascer- ancient geography.

rcumference of the island was esti- dorus at 4100 stadia; but Sosicrates, n was most accurate, computed the than 2300 stadia, and the circum- than 5000 stadia (Strab. x. p. 476). .) in reckoning the length alone at exceeded Artemidorus. In Pliny ent of Crete in length was about nearly 539 M. P. in circuit. The 0 stadia) was in the middle, between of Dium and Matalum; the narrowest her E., between Minoa and Hiera- coast was 200 stadia broad, but between Amphimalla and Phoenix 0 stadia. (Comp. Strab. p. 475.)

and Natural Features. — The in- mountainous, woody, and intersected . The whole island may be consi- longation of that mountain chain which breasts the waters at Cape Malea, with the island of Cythera interposed. The geological formation resembles that of the Hellenic peninsula; from the traces of the action of the sea upon the cliffs, especially at the W. end, it seems that the island has been pushed up from its foundations by powerful subterranean forces, which were in operation at very remote times. (*Journ. Geog. Soc.* vol. xxii. p. 277.)

A continuous mass of high-land runs through its whole length, about the middle of which Mt. Ida, composed of a congeries of hills, terminating in three lofty peaks, rises to the height of 7674 feet: the base occupied a circumference of nearly 600 stadia; to the W. it was connected with a chain called Λευκὰ ὄρη, or the White Mountains, whose snow-clad summits and bold and beautiful outlines extend over a range of 300 stadia (Strab. p. 475). The prolongation to the E. formed the ridge of Dicte (Δίκτη, Strab. p. 478). It is curious that, though tradition spoke of those ancient workers in iron and bronze—the Idaean Dactyls, no traces of mining operations have been found.

The island had but one lake (Λίμνη Κορησία); the drainage is carried off by several rivers, mostly summer torrents, which are dried up during the summer season; but the number and copiousness of the springs give the country a very different aspect to the parched tracts of continental Greece.

Mt. Ida, connected in ancient story with metallurgy, was, as its name implied, covered with wood, which was extensively used in forging and smelting. The forests could boast of the fruit-bearing poplar (Theophrast. *H. P.* iii. 5); the evergreen platane (*H. P.* i. 15; Varr. *de Re Rust.* i. 7; Plin. xii. 1) trees, which it need hardly be said can no longer be found; the cypress (Theophrast. *H. P.* ii. 2), palm (*H. P.* ii. 8; Plin. xiii. 4), and cedar (Plin. xvi. 39; Vitruv. ii. 9). According to Pliny (xxv. 8; comp. Theophrast. *H. P.* ix. 16), everything grew better in Crete than elsewhere; among the medicinal herbs for which it was famed was the "dictamnon" so celebrated among physicians, naturalists (Theophrast. *l. c.*; Plin. *l. c.*), and poets (Virg. *Aen.* xii. 412; comp. Tasso, *Gerusalem. Lib.* xi. 72). The ancients frequently speak of the Cretan wines (Aelian. *V. H.* xii. 31; Athen. x. p. 440; Plin. xiv. 9). Among these the "passum," or raisin wine, was the most highly prized (Mart. xiii. 106; Juv. xiv. 270). Its honey played a conspicuous part in the myths concerning Zeus (Diod. v. 70; Callim. *Hym. in Jov.* 50). The island was free from all wild beasts and noxious animals (Aelian, *N. A.* iii. 32; Plin. viii. 83), a blessing which it owed to Heracles (Diod. iv. 17); but the Cretan dogs could vie with the hounds of Sparta (Aelian. *N.A.* iii. 2); and the Cretan "Agrimi," or real wild goat, is the supposed origin of all our domestic varieties.

III. *History.*—The cycle of myths connected with Minos and his family threw a splendour over Crete, to which its estrangement from the rest of Greece during the historic period presents a great contrast. The "lying Cretans" dared to show, not only the birthplace, but also the tomb of the "father of gods and men" (Callim. *Hym in Jov.* 8), and the Dorian invaders made Crete the head-quarters of the worship of Apollo (Müller, *Dor.* vol. i. p. 226, trans.). Since the Grecian islands formed, from the earliest times, stepping stones by which the migratory population of Europe and Asia have crossed over to either continent, it has been assumed that Aegypt, Phoenicia, and Phrygia founded cities in Crete, and contributed

Digitized by Google

new arts and knowledge to the island. No proof of Aegyptian colonisation can be adduced; and from the national character, it is probable that settlers of pure Aegyptian blood never crossed the Aegean. Traces of Phoenician settlements may undoubtedly be pointed out; and by what cannot be called more than an ingenious conjecture, the mythical genealogy of Minos has been construed to denote a combination of the orgiastic worship of Zeus indigenous among the Eteocretes, with the worship of the moon imported from Phoenicia, and signified by the names Europe, Pasiphae, and Ariadne. There is an evident analogy between the religion of Crete and Phrygia; and the legendary Curetes and Idaean Dactyls are connected, on the one hand with the orgiastic worship, and on the other with the arts of Phrygia. But no historical use can be made of these scanty and uncertain notices, or of the Minos of the poets and logographers with his contradictory and romantic attributes. The Dorians first appear in Crete during the heroic period; the Homeric poems mention different languages and different races of men — Eteocretes, Cydonians, thrice divided Dorians, Achaeans, and Pelasgians, as all co-existing in the island, which they describe to be populous, and to contain ninety cities (*Od.* xix. 174). These Dorian mountaineers converted into mariners — the Norman sea-kings of Greece — must therefore have come to Crete at a period, according to the received legendary chronology, long before the return of the Heraclidae.

In the same poems they appear as hardy and daring corsairs; and this characteristic gave rise to that naval supremacy which was assigned by Herodotus, Thucydides, and Aristotle, to the traditionary Minos and his Cretan subjects.

Theophrastus (*De Ventis*, v. 13. p. 762, ed. Schneidewin) stated that the deserted sites of Cretan villages, which according to the primitive Greek practice the inhabitants had occupied in the central and mountain regions, were to be seen in his time. The social fabric which the ancients found in Crete so nearly resembled that of Sparta, that they were in doubt whether it should be considered as the archetype or copy. (Arist. *Pol.* ii. 7; Strab. p. 482.) But the analogy between the institutions of the Cretan communities and Sparta, is one rather of form than of spirit. The most remarkable resemblance consisted in the custom of the public messes, "Syssitia," while there is a marked difference in the want of that rigid private training and military discipline which characterized the Spartan government. The distinction between the condition of the Dorian freeman and the serf comes out vividly in the drinking song of the Cretan Hybrias (Athen. xv. p. 695); but there was only one stage of inferiority, as the Cretan Perioecus had no Helots below him. Polybius (vi. 45—48), who has expressed his surprise how the best-informed ancient authors, Plato, Xenophon, Ephorus, and Callisthenes, could compare the Cretan polity to the old Lacedaemonian, as the main features were so different, among other divergencies especially dwelt upon the inequality of property in Crete, with that fancied equality which he believed was secured by the legislation of Lycurgus. It is hazardous to determine the amount of credit to be given to the minute descriptions which the ancient authors have made, of the machinery by which the nicely balanced constitution of early Crete was regulated. Their statements as to the civil virtues and the public education of the Cretans, can be nothing but the mere declamation of after ages, seeking to contrast in a rhetorical manner the virtues of the good old times with modern decay and degradation.

The generous friendship of the heroic ages which was singularly regulated by the law (Ephorus ap. *Strab.* p. 483), had degenerated into a free-and-easy licence (Arist. *Pol.* ii. 10); and as early as about B. C. 600, the Cretan stood self-condemned as a habitual liar, an evil beast, and an indolent glutton, if St. Paul in his Epistle to Titus (i. 12) alludes to Epimenides. (Comp. Polyb. iv. 47. 53. vi. 46.)

The island, which collectively stood aloof from the Persian and Peloponnesian Wars, consisted of a number of independent towns, who coined their own money, had a senate and public assembly (Boeckh, *Inscr. Gr.* vol. ii. 2554—2612), were at constant feud with each other, but when assailed by foreign enemies laid aside their private quarrels, in defence of their common country, to which they gave the affectionate appellation of mother-land (πατρίς, a word peculiar to the Cretans. (Plat. *Rep.* ix. p. 575; Aelian, *V. H.* xiii. 38, *N. A.* xvii. 35. 40; Steph. *Ep.* xciv.). Hence the well-known Syncretism (Plut. *de Frat. Am.* § 19, p. 490: *Etym. Mag. s. v.* συγκρητίζειν). Afterwards centres of states were formed by Cnossus, Gortyna, and Cydonia, and after the decay of the latter, Lyctus. The first two had a "hegemony," and were generally hostile to each other.

These internal disorders had become so violent that they were under the necessity of submitting to Philip IV. of Macedon as a mediator, whose command was all-powerful (προστάτης, Polyb. vii. 13). It would seem, however, that the effects of his intervention had ceased before the Roman war. (Newton, *Lect. on Anc. Hist.* vol. iii. p. 366.) Finally, in B. C. 67, Crete was taken by Q. Metellus Creticus after more than one unsuccessful attempt by other commanders during a lingering war, the history of which is fully given in Drumann (*Geschich. Rom.* vol. iii. pp. 51, foll.). It was annexed to Cyrene, and became a Roman province (Vell. ii. 34, 38; Justin. xxxix. 5; Flor. iii. 7; Eutrop. vi. 11; Dion Cass. xxxvi. 2). In the division of the provinces under Augustus, Crete or Cyrene, or Creta et Cyrene (Orelli, *Inscr.* n. 3614), became a senatorial province (Dion Cass. liii. 12) under the government of a propraetor (Strab. p. 840) with the title of proconsul (Orelli, *l.c.*), with a legate (Dion Cass. lviii. 14) and a quaestor, or perhaps one as in Sicily (Suet. *Vesp.* 2). Under Constantine a division took place (Zosim. ii. 32): as Crete was placed under a "Consularis" (Hierocl.), and Cyrene now Libya Superior, under a "praeses." (Marquardt, *Handbuch der Röm. Alt.* p. 222.) In A. D. 824 the Arabs wrested it from the Lower Empire (Scriptt. *post Theophrast.* pp. 1—162; Cedren. *Hist. Comp.* p. 506). In A. D. 961, the island after a memorable siege of ten months by Nicephorus Phocas, the great domestic or general of the East, once more submitted to the Greek rule (Zonar. ii. p. 194). After the taking of Constantinople by the Franks, Baldwin I. gave it to Boniface, Marquess of Montferrat, who sold it, in A.D. 1204, to the Venetians, and it became the first of the three subject kingdoms whose flags waved over the square of San Marco.

The Cretan soldiers had a high reputation as light troops and archers, and served as mercenaries both in Greek and Barbarian armies (Thuc. vii. 57; Xen. *Anab.* iii. 3. § 6; Polyb. iv. 8, v. 14; Justin. xxxiv. 2). Fashions change but little in the East: Mr. Pashley (*Trav.* vol. i. p. 245) has detected in the games and dances of modern Crete, the manners

The following is a list of the Cretan towns, an account of the chief of which is given separately:—

On the N. coast, in the direction from W. to E.: Agneum, Cisamus, Methymna, Dictynna, Pergamum, Cydonia, Minoa, Marathusa, Aptera, Cisamus, Amphimatrium, Hydramum, Amphimalla, Rhithymna, Pantomatrium, Astale, Panormus, Dium, Cytaeum, Apollonia, Matium, Heracleum, Amnisus, Chersonesus, Olus, Miletus, Camara, Naxus, Minoa, Istron, Etea, Grammium.

On the E. coast: Itanus, Ampelos.

On the S. coast, in the direction from E. to W.: Erythraea, Hierapytna, Hippocronium, Histoë, Priansus, Leben, Matalia, Sulia, Pyschium, Apollonias, Phoenix, Tarrha, Poecilasium, Syia, Lissus, Calamyda.

On the W. coast: Inachorium, Rhamnus, Chersonesus, Phalasarna, Corycus.

In the interior of the island, from W. to E.: Eleaea, Polyrrhenia, Rocca, Achaea, Dulopolis, Cantanus, Hyrtacina, Elyrus, Caeno, Cerea, Arden or Anopolis, Polichna, Mycenae, Lappa or Lampa, Corium, Aulon, Osmida, Sybritia, Eleutherna, Axus, Gortyn or Gortyna, Phaestus, Pylorus, Boebe, Bene, Asterusia, Rhytium, Stelae, Inatus, Biennus, Pyranthus, Rhaucus, Tylissus, Cnossus, Thenae, Omphalium, Pannona, Lyctus, Arcadia, Olerus, Allaria, Praesus. [E. B. J.]

CRE'TICUM MARE. [AEGAEUM MARE.]

CRETO'POLIS (*Κρητόπολις*, Ptol. v. 5; *Κρητῶν πόλις*, Polyb. v. 72). Ptolemy places Cretopolis in the part of Cabalia, which he attaches to Pamphylia. Garsyeris encamped at Cretopolis before he attempted the pass of Climax [CLIMAX]; and Cretopolis is, therefore, west of the Climax, and in the Milyas, as Polybius says (v. 72). Cretopolis is twice mentioned by Diodorus (xviii. 44, 47). The site is unknown. [G. L.]

CREU'SA, or CREU'SIS (*Κρέουσα*, *Κρεουσία*, Strab.; Creusa, Liv.; *Κρεῦσις*, Xen., Paus., Steph. B.: *Eth.* *Κρεύσιος*), a town of Boeotia, at the head of a small bay in the Corinthian gulf, described by ancient writers as the port of Thespiae. (Strab. ix. pp. 405, 409; Paus. ix. 32. § 1; "Creusa, Thespiensium emporium, in intimo sinu Corinthiaco retractum," Liv. xxxvi. 21.) The navigation from Peloponnesus to Creusis is described by Pausanias (*l. c.*) as insecure, on account of the many headlands which it was necessary to double, and of the violent gusts of wind rushing down from the mountains. Creusis was on the borders of Megaris. One of the highest points of Mt. Cithaeron projects into the sea between Creusis and Aegosthenae, the frontier town in Megaris, leaving no passage along the shore except a narrow path on the side of the mountain. In confirmation of Pausanias, Leake remarks that this termination of Mt. Cithaeron, as well as all the adjoining part of the Alcyonic sea, is subject to sudden gusts of wind, by which the passage of such a cornice is sometimes rendered dangerous. On two occasions the Lacedaemonians retreated from Boeotia by this route, in order to avoid the more direct roads across Mt. Cithaeron. On the first of these occasions, in B. C. 378, the Lacedaemonian army under Cleombrotus was overtaken by such a violent storm, that the shields of the soldiers were wrested from their hands by the wind, and many of the beasts of burden were blown over the precipices. (Xen. *Hell.* v. 4. § 16, seq.) The second time that they took this route was after the fatal battle of Leuctra, in B. C. 371. (Xen. *Hell.* vi. 4.

Digitized by Google

§ 25, seq.) The exact site of Crousis is uncertain, but there can be no doubt that it must be placed with Leake somewhere in the bay of *Livadhóstra*. (Leake, *Northern Greece*, vol. ii. pp. 406, 505.)

CRIMISA or CRIMISSA (Κρίμισα, Steph. B. *s.v.*; Lycophr. *Alex.* 913; Κρίμισσα, Strab. vi. p. 254), a promontory on the E. coast of Bruttium, in the territory of Crotona; on which, according to a received tradition of the Greeks, Philoctetes founded a small city. This settlement is distinctly connected by Strabo with that of Chone in the same neighbourhood: both were in all probability Oenotrian towns, and not Greek colonies at all: Strabo calls it "the ancient Crimissa," and it appears from his expressions that it was no longer in existence in his time. Lycophron also terms it a small town (βραχύπτολις Κρίμισα, *l.c.*), and there is no trace of it found in history. The promontory of Crimissa may probably be identified with that now called *Capo dell' Alice*, about 22 miles N. of Crotona: the town of *Cirò*, about 5 miles inland, is supposed by local writers to occupy the site of the city of Philoctetes, but this is mere conjecture. (Barr, *de Sit. Calabr.* iv. 23; Romanelli, vol. i. p. 213.) Stephanus of Byzantium mentions a river of the same name, which is supposed by the authorities just cited to be the stream called *Fiumarici*, about 10 miles W. of the *Capo dell' Alice*, but it seems very probable that Stephanus meant the more celebrated river Crimissus in Sicily. (Cluver. *Sicil.* p. 267.) [E. H. B.]

CRIMISUS, or CRIMISSUS (Κριμισός, Lycophr., Dion. Hal.; Κριμησός, Plut.; Κριμισσός, Ael.), a river of Sicily, in the neighbourhood of Segesta, celebrated for the great battle fought on its banks in B.C. 339, in which Timoleon, with only about 11,000 troops, partly Syracusans, partly mercenaries, totally defeated a Carthaginian army of above 70,000 men. This victory was one of the greatest blows ever sustained by the Carthaginian power, and secured to the Greek cities in Sicily a long period of tranquillity. (Plut. *Timol.* 25—29; Diod. xvi. 77—81; Corn. Nep. *Tim.* 2.) But though the battle itself is described in considerable detail both by Plutarch and Diodorus, they afford scarcely any information concerning its locality, except that it was fought in the part of the island at that time subject to Carthage (ἐν τῇ τῶν Καρχηδονίων ἐπικρατείᾳ). The river Crimisus itself is described as a considerable stream, which being flooded at the time by storms of rain, contributed much to cause confusion in the Carthaginian army. Yet its name is not found in any of the ancient geographers, and the only clue to its position is afforded by the fables which connect it with the city of Segesta. According to the legend received among the Greeks, Aegestes or Aegestus (the Acestes of Virgil), the founder and eponymous hero of Egesta, was the son of a Trojan woman by the river-god Crimisus, who cohabited with her under the form of a dog. (Lycophr. 961; Tzetz. *ad loc.*; Virg. *Aen.* v. 38; and Serv. *ad Aen.* i. 550.) For this reason the river Crimisus continued to be worshipped by the Segestans, and its effigy as a dog was placed on their coins (Ael. *V. H.* ii. 33; Eckhel, vol. i. p. 234): Dionysius also distinctly speaks of the Trojans under Elymus and Aegestus as settling in the territory of the Sicani, about the river Crimisus (i. 52); hence it seems certain that we must look for that river in the neighbourhood, or at least within the territory of Segesta, and it is probable that Fazello was correct in identifying it with the stream now called *Fiume di S. Bartolommeo* or *Fiume Freddo*, which flows about 5 miles E. of Segesta, and falls into the *Gulf of Castellamare* at a short distance from the town of that name. Cluverius supposed it to be a stream which flows by the ruins of Entella, and falls into the Hypsas or *Belici*, thus flowing to the S. coast: but the arguments which he derives from the account of the operations of Timoleon are not sufficient to outweigh those which connect the Crimisus with Segesta. (Fazell. *de Reb. Sic.* vii. p. 269; Cluver. *Sicil.* p. 269.) [E. H. B.]

CRISSA or CRISA (Κρίσσα, Κρῖσα: *Eth.* Κρισσαῖος), and CIRRHA (Κίρρα: *Eth.* Κραπαίος), in Phocis. There has been considerable discussion whether these two names denoted the same place or two different places. That there was a town of the name of Cirrha on the coast, which served as the harbour of Delphi, admits of no dispute. (Hom. v. 27; Liv. xlii. 15.) Pausanias (x. 37. § 5) supposes this Cirrha to be a later name of the Homeric Crissa; and his authority has been followed by K. O. Müller, Dissen, Wachsmuth, K. F. Hermann, and most of the German scholars. Strabo (ix. p. 418), on the other hand, distinguishes the two places, and his statement has been adopted by Leake, Kiepert, Mannert, Ulrichs, and Grote. The most exact and satisfactory investigation of the subject has been made by Ulrichs, who carefully examined the topography of the district; and since the publication of his work, it has been generally admitted that Crissa and Cirrha were two separate places. The arguments in favour of this opinion will be briefly stated by narrating the history of the places.

Crissa was more ancient than Cirrha. It was situated inland a little SW. of Delphi, at the southern end of a projecting spur of Mt. Parnassus. Its ruins may still be seen at a short distance from the modern village of *Chrysó*, surrounding the church of the Forty Saints. They consist of very ancient polygonal walls, still as high as 10 feet in some parts, and as broad as 18 feet on the northern side and 12 on the western. The ancient town of Crissa gave its name to the bay above which it stood, and the name was extended from this bay to the whole of the Corinthian gulf, which was called Crissaean in the most ancient times. (See above, p. 671.) Cirrha was built subsequently at the head of the bay, and rose into a town from being the port of Crissa. This is in accordance with what we find in the history of other Grecian states. The ancient town is built upon a height at some distance from the sea, to secure it against hostile attacks, especially by sea; but in course of time, when property has become more secure, and the town itself has grown to power, a second place springs up on that part of the coast which had served previously as the port of the inland town. This was undoubtedly the origin of Cirrha, which was situated at the mouth of the river Pleistus (Paus. x. 8. § 8), and at the foot of Mount Cirphis (Strab. ix. p. 418). Its ruins may be seen close to the sea, at the distance of about 20 minutes from the Pleistus. They bear the name of *Magula*. The remains of walls, enclosing a quadrangular space about a mile in circuit, may still be traced; and both within and without this space are the foundations of many large and small buildings.

Although Strabo was correct in distinguishing between Crissa and Cirrha, he makes a mistake respecting the position of the former. Cirrha, as we have already seen, he rightly places on the coast at the foot of Mt. Cirphis; but he erroneously supposes

Digitized by Google

a likewise was on the coast, more to the e direction of Anticyra. Strabo, who had ed this part of Greece, was probably led rror from the name of the Crissaean gulf, ned to imply the existence of a maritime

a Crissa and Cirrha was a fertile plain, n the north by Parnassus, on the east by nd on the west by the mountains of the crians. On the western side it extended h as Amphissa, which was situated at the t part of the plain. (Herod. viii. 32; Strab. .) This plain, as lying between Crissa a, might be called either the Crissaean or and is sometimes so designated by the riters; but, properly speaking, there ap- ave been a distinction between the two he Cirrhaean plain was the small plain wn of Cirrha, extending from the sea as modern village of *Xeropégado*, where it by two projecting rocks from the larger fertile Crissaean plain, which stretches, already said, as far as Crissa and Am- he small Cirrhaean plain on the coast e dedicated to Apollo after the destruction as related below (τὸ Κιρραῖον πεδίον, . *Ctesiph.* p. 68, ed. Steph.; ἡ Κιρραία n. *de Cor.* pp. 277, 278, Reiske; Diod. ion Cass. lxiii. 14; Polyaen. iii. 5; ἱερὰ , *Corp. Inscr.* no. 1688; ἡ Κιρραία, Paus.). The name of the Crissaean plain in its ded sense might include the Cirrhaean, so atter may be regarded as a part of the he boundaries of the land dedicated to the nscribed on one of the walls of the Del- ple, and may perhaps be yet discovered ruins of the temple. (Böckh, *Corp.* 1711.)

as regarded as one of the most ancient reece. It is mentioned in the Catalogue d as the "divine Crissa" (Κρῖσα ζαθέη,). According to the Homeric hymn to as founded by a colony of Cretans, who o the spot by Apollo himself, and whom ad chosen to be his priests in the sanc- h he had intended to establish at Pytho. *mn. in Apoll.* 438.) In this hymn, escribed (l. 269) as situated under Par- ere no chariots rolled, and no trampling as heard, — a description suitable to the issa upon the rocks, as explained above, napplicable to a town upon the sea-shore. nner, Nonnus, following the description of epic poets, speaks of Crissa as surrounded (*Dionys.* p. 358, vs. 127.) Moreover, ent of Pindar, that the road to Delphi Hippodrome on the coast led over the ill (*Pyth.* v. 46), leaves no doubt of the n of Crissa, since the road from the plain must pass by the projecting spur of Par- which *Chrysó* stands. In the Homeric pollo, Crissa appears as a powerful place, as its territory the rich plain stretching e sea, and also the adjoining sanctuary of f, which had not yet become a separate fact, Crissa is in this hymn identified ii (l. 282, where the position of Delphi is cribed under the name of Crissa). Even the name of Crissa is used as synonymous hi, just as Pisa occurs in the poets as to Olympia. (Pind. *Isthm.* ii. 26.) Metapontium in Italy is said to have been a colony of Crissa. (Strab. vi. p. 264.)

In course of time the sea-port town of Cirrha increased at the expense of Crissa; and the sanctuary of Pytho grew into the town of Delphi, which claimed to be independent of Crissa. Thus Crissa declined, as Cirrha and Delphi rose in importance. The power of Cirrha excited the jealousy of the Delphians, more especially as the inhabitants of the former city commanded the approach to the temple by sea. Moreover, the Cirrhaeans levied exorbitant tolls upon the pilgrims who landed at the town upon their way to Delphi, and were said to have maltreated Phocian women on their return from the temple. (Aeschin. *c. Ctesiph.* p. 68; Strab. ix. p. 418; Athen. xiii. p. 560.) In consequence of these outrages, the Amphictyons declared war against the Cirrhaeans about B. C. 595, and at the end of ten years succeeded in taking the city, which was razed to the ground, and the plain in its neighbourhood dedicated to the god, and curses imprecated upon any one who should till or dwell in it. Cirrha is said to have been taken by a stratagem which is ascribed by some to Solon. The town was supplied with water by a canal from the river Pleistus. This canal was turned off, filled with hellebore, and then allowed to resume its former course; but scarcely had the thirsty Crissaeans drank of the poisoned water, than they were so weakened by its purgative effects that they could no longer defend their walls. (Paus. x. 37. § 7; Polyaen. iii. 6; Frontin. *Strateg.* iii. 7. § 6.) This account sounds like a romance; but it is a curious circumstance that near the ruins of Cirrha there is a salt spring having a purgative effect like the hellebore of the ancients.

Cirrha was thus destroyed; but the fate of Crissa is uncertain. It is not improbable that Crissa had sunk into insignificance before this war, and that some of its inhabitants had settled at Delphi, and others at Cirrha. At all events, it is certain that Cirrha was the town against which the vengeance of the Amphictyons was directed; and Strabo, in his account of the war, substitutes Crissa for Cirrha, because he supposed Crissa to have been situated upon the coast.

The spoils of Cirrha were employed by the Amphictyons in founding the Pythian games. Near the ruins of the town in the Cirrhaean plain was the Hippodrome (Paus. x. 37. § 4), and in the time of Pindar the Stadium also. (*Pyth.* xi. 20, 73.) The Hippodrome always remained in the maritime plain; but at a later time the Stadium was removed to Delphi. [DELPHI.]

Cirrha remained in ruins, and the Cirrhaean plain continued uncultivated down to the time of Philip, the father of Alexander the Great, when the Amphissians dared to cultivate again the sacred plain, and attempted to rebuild the ruined town. This led to the Second Sacred War, in which Amphissa was taken by Philip, to whom the Amphictyons had entrusted the conduct of the war, B. C. 338. [AMPHISSA.]

Cirrha, however, was afterwards rebuilt as the port of Delphi. It is first mentioned again by Polybius (v. 27); and in the time of Pausanias it contained a temple common to Apollo, Artemis, and Leto, in which were statues of Attic work. (Leake, *Northern Greece*, vol. ii. p. 583; and more especially Ulrichs, *Reisen in Griechenland*, p. 7, seq.)

docia, where all the army of Xerxes was mustered, and from which he set out to march to Sardis. (Herod. vii. 26.) He crossed the Halys after leaving Critalla, and came to Celaenae in Phrygia. This is the only indication of the position of Critalla. [G. L.]

CRITHO'TE. [ACARNANIA, p. 9, b.]

CRIU-METOPON (Κριοῦ μέτωπον, Ptol. iii. 6. § 2; Scymn. Ch. *Fr.* 80; Anon. *Peripl. Pont. Eux.* p. 6; Pomp. Mela, ii. 1. § 3; Plin. iv. 26, x. 30; Avien. 228; Priscian, 92: *Aïa-burun*), the great southern headland of the Crimea, which, looking across the Euxine to the promontory of Casambis on the coast of Asia Minor, divides it, as it were, into two parts by a line which the imagination supplies between the 31st and 32d degrees of longitude, and which, according to the ancients, gave the whole sea the shape of a Scythian bow. The two points of land are so remarkable, that many navigators, as Strabo (ii. p. 124, vii. p. 309, xi. p. 496, xii. p. 545) reports, affirmed that they had in sailing between them seen both lands to the N. and S. at once, though the distance between the two capes is 2500 stadia. According to Plutarch (*De Flum.* p. 28), it was called by the natives Brixaba (Βρίξαβα), which meant Ram's Head. *Cape Aia*, the southernmost of the three headlands, is described as a very high, bluff, bold-looking land, much like the North Foreland, but much higher, and in a sketch of the coast line it is estimated at about 1200 feet, the same elevation which is assigned to it by Pallas. (*Journ. Geog. Soc.* vol. i. p. 113.) [E. B. J.]

CRIU-METOPON (Κριοῦ μέτωπον, Ptol. iii. § 2; Scylax; *Stadiasm.* §§ 317, 318; Pomp. Mel. ii. 7. § 12; Plin. iv. 12. s. 20, v. 5. s. 5: *Kávo Krío*), the SW. promontory of Crete, 125 M. P. from Phycus of Cyrenaica (Plin. iv. 12. s. 20), or two days and two nights' sail. (Strab. x. p. 475; Dion Per. 87.) Off this headland lay the three small islands called Musagorae *Elaphonesia*. (Plin. *l. c.*). [E. B. J.]

CRIUS. [ACHAIA, p. 13, b.]

CROBIALUS (Κρωβίαλος: *Eth.* Κρωβιαλεύς), a place on the Paphlagonian coast, mentioned by Apollonius Rhodius (*Arg.* ii. 944), with Cromna and Cytorus; and Valerius Flaccus (*Arg.* v. 103) has the same name. Stephanus (*s. v.*) quotes the verse of Apollonius. We may assume that it was in the neighbourhood of Cromna and Cytorus. Strabo (p. 545) observes of the line in Homer (*Il.* ii. 855),—

Κρῶμνάν τ' Αἰγιαλόν τε καὶ ὑψηλοὺς 'Ερυθίνους,—

that some persons write Κώβιαλον in place of Αἰγιαλόν. Crobialus and Cobialus seem to be the same place, as Cramer observes. If, then, Crobialus is the same as Aegialos, it is that part of the Paphlagonian coast, which extends in a long line for more than 100 stadia, immediately east of Cytorus. [G. L.]

CROBYZI (Κρόβυζοι), a people of Moesia, near the frontiers of Thrace. (Ptol. iii. 10. § 9; Strab. p. 318; comp. Herod. iv. 49; Anonym. *Peripl. Pont. Eux.* p. 13.) [L. S.]

CRO'CEAE (Κροκέαι: *Eth.* Κροκεάτης), a village of Laconia on the road from Sparta to Gythium, and near the latter place, celebrated for its marble quarries. Pausanias describes the marble as difficult to work, but when wrought forming beautiful decorations for temples, baths, and fountains. There was a marble statue of Zeus Croceates before the village, and at the quarries bronze statues of the Dioscuri. (Paus. iii. 21. § 4.) The most celebrated of the Corinthian baths was adorned with marble from the quarries at Croceae. (Paus. ii. 3. § 5.) These quarries have been discovered by the French Commission two miles SE. of *Leretzova*: and near the village have been found some blocks of marble, probably the remains of the statue of Zeus Croceates. A memorial of the worship of the Dioscuri at this place still exists in a bas-relief representing the two gods with their horses: beneath is a Latin inscription. The marble in these quarries is green porphyry; and though not suitable for Grecian temples, it would be greatly prized by the Romans, who employed extensively variegated kinds of marble for the decoration of their buildings. Hence it is probable that the marble celebrated by the Romans under the name of Laconian was the green porphyry from Croceae; and that it was the quarries of this place which, Strabo says (viii. p. 367), were opened by the Romans at Taygetus. (*Description de la Morée, Géognosie*, vol. ii. pt. ii. p. 129; Leake, *Peloponnesiaca*, p. 170; Curtius, *Peloponnesos*, vol. ii. p. 266.]

CROCIA'TONUM (Κροκιάτονον, Ptol. ii. 8. § 7. CRONCIACONNUM in the Table. Ptolemy makes it a port of the Unelli or Veneli, a Gallic nation who occupied part of *Bretagne*. The Table contains a route from Alauna (*Alleaume*) to Caesarodunum (*Tours*), in which the next station to Alauna is Cronciaconnum, distant 10½ M. P. from Alauna. Its position, therefore, depends on that of Alauna. Crociatonum lies between Alauna and Augustodurum (*Bayeux*), from which it is 31½ M. P. distant. D'Anville, who places Alauna at the *Moutiers d'Alonne*, fixes Crociatonum at *Valognes*, in the department of *La Manche*. Accordingly he considers that there is an error in Ptolemy, for the place is called a port in one MS. at least. But if Alauna is near *Valognes*, Crociatonum must be looked for elsewhere. Walckenaer places it at the village of *Turqueville*, west of *Audouville*, at the entrance of the bay of *Issigny*. There may have been both a town and a port of the same name. Some geographers would fix Crociatonum at *Carentan*, west of *Issigny*. [G. L.]

CROCOCOLANUM, in Britain, mentioned in the sixth Itinerary as 12 miles from Lindum (*Lincoln*). Identified, on insufficient grounds, with *Brough* in Nottinghamshire. [R. G. L.]

CROCODEILON, a river of Syria, near which there was formerly a town of the same name (Κροκοδείλων πόλις), between Caesarea Palaestinae and Ptolemaïs (Strab. xvi. p. 758; Plin. v. 17. s. 19). It is now identified with the *Nahr Zerka*, in which, according to Pococke (*Trav.* vol. ii. p. 58.), crocodiles have been found. (Von Raumer, *Palästina*, pp. 53, 191.) [E. B. J.]

CROCODILO'POLIS (Κροκοδείλων πόλις, Ptol. iv. 5. § 65: *Eth.* Κροκοδειλοπολίτης), the name of several cities in Egypt, derived from the local worship of the crocodile.

1. Arsinoe in the Heptanomis, and the Arsinoite nome of the Ptolemaic era, were, under the Pharaohs, called respectively Crocodilopolis and the Crocodilopolite nome. (Steph. B. *s. v.*) The crocodile was here domesticated and worshipped. It fed from the hands of the priests of Arsinoe. [ARSINOE]. (Aelian. *H. An.* x. 24; Plin. *N. H.* v. 9, 11, xxxvi. 16.)

2. A town in the Aphroditopolite nome of the Thebaid, on the western bank of the Nile, lat. 25° 6' N., of which ruins are still visible at *Embabeh*, on the verge of the Libyan desert. [W. B. D.]

CROSSA (Κρόσσα: *Eth.* Κροσσαῖος), a city on the Pontus, mentioned by Hecataeus in his *Asia*. (Steph. B. *s. v.*) [G. L.]

CROSSAEA. [CRUSIS.]

CROTON or CROTONA (Κρότων: *Eth.* Κροτωνιάτης, Croto**niensis** and Croto**nensis**, but Cicero uses Croto**niatae** for the people: *Cotrone*), one of the most celebrated of the Greek colonies in Southern Italy, situated on the E. coast of the Bruttian peninsula, at the mouth of the little river Aesarus, and about 6 miles N. of the Lacinian Promontory. It was founded by a colony of Achaeans, led by Myscellus, a native of Rhypae in Achaia, in obedience to the express injunction of the oracle at Delphi. (Strab. vi. p. 262; Diod. viii. Exc. Vat. pp. 8, 9; Dionys. ii. 59; Ovid. *Met.* xv. 9—59; Scymn. Ch. 325.) The date of its foundation is fixed by Dionysius at B. C. 710, and his authority may probably be relied on, though Eusebius and Hieronymus would place it some years later. (Clinton, *F. H.* vol. i. p. 174; Grote's *Greece*, vol. iii. p. 401.) A tradition recorded by Strabo (*l. c.*), which would connect its foundation with that of Syracuse by Archias, would therefore seem to be chronologically inadmissible. Its name was derived, according to the current legend, from a person of the name of Croton, who afforded a hospitable reception to Hercules during the wanderings of that hero; but having been accidentally killed by him, was buried on the spot, which Hercules foretold would eventually become the site of a mighty city. (Diod. iv. 24; Iambl. *Vit. Pyth.* 50; Ovid, *Met.* xv. 12—18, 55; Etym. M. *v.* Κρότων.) Hence we find Croton sometimes called the founder of the city, while the Crotoniats themselves paid peculiar honours to Hercules as their tutelary divinity and Oekist. (Heraclid. Pont. 36; Iambl. *Vit. Pyth.* 40; Eckhel, vol. i. p. 172.)

Crotona, as well as its neighbour Sybaris, seems to have rapidly risen to great prosperity; but the general fact of its size, wealth, and power, is almost all that we know concerning it; its history during the first two centuries from its foundation being almost a blank to us. But the fact that the walls of the city enclosed a space of not less than 12 miles in circuit (Liv. xxiv. 3), sufficiently proves the great power to which it had attained; and it is during this early period also that we find the Crotoniats extending their dominion across the Bruttian peninsula, and founding the colony of Terina on the coast of the Tyrrhenian Sea, as well as that of Caulonia between the parent city and Locri. Lametium also, or Lametini, on the Hipponian Gulf, as well as Scyllacium on the opposite side of the isthmus, must at this period have been subject to its rule. The great wealth and prosperity enjoyed by the two neighbouring cities of Crotona and Sybaris, seems to prove that they continued for a long time on terms of friendship, in accordance with their common Achaean

Digitized by Google

origin; and the Oenotrian tribes of the interior were not powerful enough to offer any obstacle to their growth. They thus became during the sixth century B. C. two of the most populous, wealthy, and powerful cities of the Hellenic name. Crotona, however, was far less luxurious than its rival; its inhabitants devoted themselves particularly to athletic exercises, and became celebrated for the number of the prizes which they carried off at the Olympic games. (Strab. vi. p. 262.) The government of Crotona appears to have been of an oligarchic character; the supreme power being in the hands of a council of one thousand persons, who were, or claimed to be, descendants from the original settlers. (Iambl. *V. P.* 45; Val. Max. viii. 15. Ext. § 1.) This state of things continued without interruption, till the arrival of Pythagoras, an event that led to great changes both at Crotona and in the neighbouring cities. It was, apparently, about the middle of the sixth century (between B. C. 540 and 530) that that philosopher first established himself at Crotona, where he quickly attained to great power and influence, which he appears to have employed not only for philosophical, but for political purposes. But the nature of the political changes which he introduced, as well as the revolutions that followed, is involved in great obscurity. We learn, however, that besides the general influence which Pythagoras exerted over the citizens, and even over the Great Council, he formed a peculiar society of 300 young men among the most zealous of his disciples, who, without any legal authority, exercised the greatest influence over the deliberations of the supreme assembly. This state of things continued for some time, until the growing unpopularity of the Pythagoreans led to a democratic revolution, which ended in their expulsion from Crotona and the overthrow of the Great Council, a democratic form of government being substituted for the oligarchy. This revolution was not confined to Crotona, but extended to several other cities of Magna Graecia, where the Pythagoreans had obtained a similar footing; their expulsion led to a period of confusion and disorder throughout the south of Italy. (Justin. xx. 4; Val. Max. viii. 15. Ext. § 1; Diog. Laert. viii. 1. § 3; Iambl. *Vit. Pyth.* 248—251, 255—262; Porphyr. *Vit. Pyth.* 54, 55; Grote's *Greece*, vol. iv. pp. 525—550.)

It was during the period of the Pythagorean influence (so far as we can trust the very confused and uncertain chronology of these events), that the war occurred between Crotona and Sybaris which ended in the destruction of the latter city. The celebrated athlete Milo, himself a leading disciple of Pythagoras, was the commander of the Crotoniat army, which is said to have amounted to 100,000 men, while that of the Sybarites was three times as numerous; notwithstanding which the former obtained a complete victory on the banks of the Traeis, and following up their advantage took the city of Sybaris, and utterly destroyed it. The received date of this event is B. C. 510. (Diod. xii. 9; Strab. vi. p. 263; Herod. v. 44, vi. 21; Iambl. *Vit. Pyth.* 260; Scymn. Ch. 357—360.) Polybius, however, represents the Crotoniats as concluding a league with *Sybaris* and Caulonia, *after* the expulsion of the Pythagoreans, a statement wholly irreconcilable with the history transmitted by other authors. (Pol. ii. 39. See on this point Grote's *Greece*, vol. iv. p. 559.)

The next event of importance in the history of Crotona, would appear to be the great defeat which the Crotoniats in their turn sustained at the river Sagras, where it is said that their army, though consisting of 130,000 men, was routed by 10,000 Locrians and Rhegians with such slaughter, as to inflict an indelible blow upon the prosperity of their city. (Strab. vi. pp. 261, 263; Cic. *de N. D.* iii. 2. Suid. *s. v.* ἀληθέστερα.) Justin, on the contrary (xx. 2, 3), represents this event as having taken place before the arrival of Pythagoras: but the authority of Strabo seems decidedly preferable on this point, and is more consistent with the general history of Crotona. Heyne, however, follows Justin, and places the battle of the Sagras as early as 360 B. C., and Mr. Grote inclines to the same view. As no notice is found in the extant books of Diodorus of so important an event, it seems certain that it must have occurred before B. C. 480. (Heyne, *Prolus. Acad.* x. p. 184: Grote's *Greece*, vol. iv. p. 552.) Strabo has, however, certainly exaggerated the importance of this disaster in its effects on Crotona; for nearly a century later that city is still spoken of as the most populous and powerful of the Greek colonies in this part of Italy. (Diod. xiv. 103.)

Very few notices of it are found in the interval. We learn only that the Crotoniats viewed with favour the establishment of the new colony of Thurium, and concluded a treaty of alliance with it (Diod. xii. 11); and that during the Athenian expedition to Sicily they endeavoured to preserve a strict neutrality, furnishing the Athenian fleet with provisions, but refusing to allow the passage of the land forces through their territory. (Diod. xiii. 3: Thuc. vii. 35.) In B. C. 389, when the elder Dionysius carried his arms across the Sicilian Strait, and proceeded to attack Caulonia, the Crotoniats put themselves at the head of the Greek cities which opposed the Syracusan despot, but the confederate forces were totally defeated by Dionysius at the river Helleporus: and the latter, following up his advantage, made himself master of Caulonia, Hipponium, and Scylletium, the last of which he wrested from the dominion of Crotona. (Diod. xiv. 103—107; Strab. vi. p. 261.) No mention is found in Diodorus of his having made any attack on Crotona itself, but Livy tells us that he surprised the citadel, and by this means made himself master of the city (Liv. xxiv. 3); of which, according to Dionysius, he retained possession for not less than 12 years. (Dionys. Exc. xix.) After the fall of the tyrant, Crotona appears to have recovered its independence; but it suffered severely from the growing power of the Lucanians and Bruttians, who pressed upon it from without, as well as from domestic dissensions. It was at one time actually besieged by the Bruttians, and compelled to apply for aid to the Syracusans, who sent an armament to its succour under Heracleides and Sostratus; but those generals seem to have carried on intrigues with the different parties in Crotona, which gave rise to revolutions in the city; and after the Crotoniats had rid themselves of their Bruttian foes by a treaty, they were engaged in a war with their own exiles. (Diod. xix. 3, 10.) The conduct of this war entrusted to a general named Menedemus, who defeated the exiles, but appears to have soon after established himself in the possession of despotic power. (Id. xix. 10, xxi. 4.) In B. C. 299, Agathocles made himself master of Crotona, in which he established a garrison. (Id. xxi. 4. Exc. H. p. 490.) How long he retained possession of it we know not, but it is clear that all these successive revolutions must have greatly impaired the prosperity of Cro-

G.* it was one of the few cities which ill retained some consideration in this nd continued under the sovereignty of Emperors till it passed with the rest Calabria into the hands of the Nor- odern city of *Cotrone* is but a poor possessing about 5000 inhabitants, fied citadel. This fortress undoubtedly me situation as the ancient arx, on a into the sea (Liv. xxiv. 3), and af- equence some degree of shelter to the importance of the latter, though tioned as one of the sources of the rotona, must not be overrated. Po- y tells us that it was no good harbour, ρωδης ὅρμος, or station where ships mmer (Pol. x. 1), and that its value absence of all harbours along this lian coast. The ancient city spread plain to the W. and N. of the citadel; its prosperity it extended far across arus, which in consequence flowed ddle of the city; but as early as the Second Punic War, the town had shrunk so much that the Aesarus formed its northern limit, and flowed on the outside of its walls. (Liv. xxiv. 3.) It is now about a mile to the N. of the modern town.

We have scarcely any topographical information concerning the ancient city, and there are no ruins of it remaining. Many fragments of masonry and ancient edifices are said to have been still in existence till about the middle of last century, when they were employed in the construction of a mole for the protection of the port. Livy tells us that the walls of Crotona in the days of its greatness enclosed an extent of 12 miles in circumference; and though its population was not equal to that of Sybaris, it was still able to send into the field an army of 100,000 men. Even in the time of Dionysius of Syracuse, when it had already declined much from its former prosperity, Crotona was still able to furnish a fleet of 60 ships of war. (Diod. xiv. 100.) But in the Second Punic War the whole number of citizens of all ages had dwindled to less than 20,000, so that they were no longer able to defend the whole extent of their walls. (Liv. xxiii. 30.)

Crotona was celebrated in ancient times for the healthiness of its situation. An old legend represented Archias, the founder of Syracuse, as having chosen wealth for his city, while Myscellus preferred health (Strab. vi. p. 269; Steph. B. *v.* Συράκουσαι): according to another tale, Myscellus, when he first visited Italy, preferred the situation of Sybaris, but was commanded by the oracle to adhere to the spot first indicated to him. (Strab. vi. p. 262.) To the favourable position of the city in this respect was ascribed the superiority of its citizens in athletic exercises, which was so remarkable that on one occasion they bore away the seven first prizes in the footrace at the Olympic games. (Strab. *l. c.*; Cic. *de Inv.* ii. 1.) Among their athletes Milo was the most celebrated for his gigantic strength and power of body: (*Biogr. Dict.* art. *Milo.*) To the same cause was attributed the remarkable personal beauty for which their youths and maidens were distinguished. (Cic. *l. c.*) The system of training which produced these results was probably closely connected with the medical school for which Crotona was pre-eminent in the days of Herodotus, the physicians of Crotona being regarded at that time as unquestionably the first in Greece (Herod. iii. 131), and at a later period the school of Crotona still maintained its reputation by the side of those of Cos and Cnidus (Grote's *Greece*, vol. iv. p. 539). Among the most eminent of the physicians of Crotona we may notice Alcmaeon, to whom the first introduction of anatomy was ascribed, and Democedes, who was for some time physician at the court of Darius, king of Persia. (Herod. iii. 129—138.) The great influence exercised by Pythagoras during his residence at Crotona naturally raised up a numerous school of his disciples, many of whom perished in the political revolution that put an end to their power in that city, while the rest were dispersed and driven into exile: a long list of Pythagorean philosophers, natives of Crotona, is preserved to us by Iamblichus (*Vit. Pyth.* 167); but the only two names of real eminence among them are those of Alcmaeon, already mentioned, and Philolaus, whom however Iamblichus represents as belonging to Tarentum. (Diog. Laert. viii. 5, 7.)

The territory of Crotona in the days of its prosperity was extensive, stretching from sea to sea: on the N. it was bounded by the river Hylias (Thuc. vii. 35), while to the S. it probably extended to the

Digitized by Google

confines of the Locrians, the intermediate towns of Scylletium and Caulonia being its colonies and dependencies. The immediate neighbourhood of the city, though less fertile than that of Sybaris and Thurii, was well adapted for the growth of corn, and the luxuriant pastures of the valley of the Neaethus are celebrated by Theocritus, and retain their richness to the present day. [NEAETHUS.] The same poet, who has laid the scene of one of his Idylls in the neighbourhood of Crotona, speaks with praise of the banks of the Aesarus, which are now dreary and barren: as well as of the pastures and shady woods of two mountains called Physcus and Latymnum. These last must have been situated in the neighbourhood of Crotona, but cannot be identified with any certainty. (Theocr. iv. 17—19, 23—25; and Schol. *ad loc.*; Swinburne's *Travels*, vol. i. p. 313.)

Six miles distant from the city of Crotona was the celebrated temple of the Lacinian Juno, on the promontory of the same name. (Liv. xxiv. 3; Strab. vi. p. 261; Scyl. p. 5. § 13; Dionys. Per. 371; and Eustath. *ad loc.*) Livy calls it "nobile templum, ipsa urbe nobilius;" indeed, there was no other temple of equal fame or sanctity in the whole of Magna Graecia. The period of its foundation is wholly unknown. Virgil alludes to it as already in existence at the time of the voyage of Aeneas, and Dionysius tells us that a bronze cup was still preserved there, which had been dedicated by that hero. (Virg. *Aen.* iii. 552; Dionys. i. 52.) Some legends ascribed its foundation to Hercules, others to Lacinius or Lacinus, who was said to have been dwelling there when it was visited by Hercules, and from whom the promontory derived its name: others, again, spoke of the headland and sacred grove as having been presented by Thetis to Hera herself. (Diod. iv. 24; Tzetz. *ad Lycophr.* 857, 1006; Serv. *ad Aen.* iii. 552.) These legends may be considered as indicating that the temple did not owe its foundation to the Greek colonists of Crotona, but that there previously existed a sacred edifice, or at least a consecrated locality (*τέμενος*), on the spot, probably of Pelasgic origin. The temple of Hera became the scene of a great annual assembly of all the Italian Greeks, at which a procession took place in honour of the goddess, to whom splendid offerings were made; and this festival became a favourite occasion for the Greeks of the neighbouring cities to display their magnificence. (Pseud. Arist. *de Mirab.* 96; Athen. xii. p. 541.) The interior of the temple was adorned with paintings, executed by order of the Crotoniats at the public cost, among which the most celebrated was that of Helen by Zeuxis, for the execution of which that artist was allowed to select five of the most beautiful virgins of the city as his models. (Cic. *de Inv.* ii. 1; Plin. xxxv. 9. s. 36.) Besides abundance of occasional offerings of the most costly description, the temple derived great wealth from its permanent revenues, especially its cattle, out of the produce of which a column of solid gold was formed, and set up in the sanctuary. (Liv. xxiv. 3.) Immediately adjoining the temple itself was an extensive grove, or rather forest, of tall pine-trees, enclosing within it rich pastures, on which the cattle belonging to the temple were allowed to feed, unprotected and uninjured. (Ibid.)

The immense mass of treasures that had thus accumulated in the temple is said to have excited the cupidity of Hannibal, during the time that he was established in its neighbourhood, but he was warned by the goddess herself in a dream to refrain from touching them. (Cic. *de Div.* i. 24.) It was at the same period that he dedicated there a brazen tablet, containing a detailed account of his wars in Spain and Italy, the number of his forces, &c., which was consulted, and is frequently referred to, by the historian Polybius. (Pol. iii. 33, 56.) But though this celebrated sanctuary had been spared both by Pyrrhus and Hannibal, it was profaned by the Roman censor Q. Fulvius Flaccus, who, in B.C. 173, stripped it of half its roof, which was composed of marble slabs instead of tiles, for the purpose of adorning a temple of Fortuna Equestris, which he was erecting at Rome. The outrage was, indeed, severely censured by the senate, who caused the slabs to be carried back to Lacinium, but in the decayed condition of the province, it was found impossible to replace them. (Liv. xlii. 3; Val. Max. i. 1. § 20.) The decay of the temple may probably be dated as commencing from this period, and must have resulted from the general decline of the neighbouring cities and country. But Appian tells us that it was still wealthy, and replete with offerings, as late as B.C. 36, when it was plundered by Sex. Pompeius. (App. *B. C.* v. 133.) Hence Strabo speaks of it as having in his time lost its wealth, though the temple itself was still in existence. Pliny mentions the Lacinian Promontory, but without noticing the temple. It appears, however, from extant remains, as well as from an inscription, "Herae Laciniae," found in the ruins, that it still continued to subsist as a sacred edifice down to a late period. (Dionys. i. 52; Strab. vi. p. 261; Mommsen, *I. R. N.* 72.)

The ruins of this celebrated temple are but inconsiderable; one column alone is standing, of the Doric order, closely resembling those of Metapontum: it is based on a foundation of large stones cut into facets: but some admixture of brickwork shows that the building must have been repaired in Roman times. A second column was standing till near the middle of the last century; and considerable remains of the pavement, and the wall which formed the peribolus of the temple, were carried off to be used in the construction of the mole and the bishop's palace at *Cotrone*. Riedesel, who visited these ruins in 1767, and upon whose authority many modern writers have described the building as of enormous extent, appears to have been misled by some masses of masonry (of reticulated work, and therefore certainly of Roman construction), more than 100 yards distant from the column, and which could never have formed any part of the temple. These fragments are generally known by the absurd appellation of the School of Pythagoras. The position of the temple on a bold projecting rock (as described by Lucan. ii. 434), must have been very striking, commanding a noble view in all directions, and forming a landmark to voyagers, who were in the habit of striking across the bay direct from the Iapygian Promontory to that of Lacinium (Virg. *Aen.* iii. 552). The single column that forms its solitary remnant, still serves the same purpose. (Swinburne's *Travels*, vol. i. pp. 321—323; Craven, *Southern Tour*, p. 238.)

The coins of Crotona are very numerous: the more ancient ones are of the class called incuse, having the one side convex, the other concave: a mode of coinage peculiar to the cities of Magna Graecia. The type of all these earlier coins is a tripod, as on the one annexed, in allusion to the oracle of Delphi, in pursuance of which the city was

STUME'RIUM, CRUSTUME'RIA, or CRU-
UM (Κρουστομέριον and Κρουστομερία,
Dionys., Steph. B.: *Eth.* Κρουστομερῖνος, *Id.*; in Latin almost always Crustuminus, though Varro, *L. L.* v. 81, has Crustumerinus), an ancient city of Latium, on the borders of the Sabine country, between Fidenae and Eretum. It is reckoned by Plutarch (*Rom.* 17) a Sabine city, and would certainly appear to have been in later times regarded as such. But Dionysius expressly calls it a colony of Alba, founded at the same time with Fidenae and Nomentum (Dionys. ii 36, 53); and its name also appears in the list of Alban colonies given by Diodorus (ap. Euseb. *Arm.* p. 185; *Orig. G. Rom.* 17). Other writers represent it as still more ancient. Cassius Hemina ascribed its foundation to the Siculi: and, in accordance with this Virgil includes it among the "five great cities" that were the first to take up arms against Aeneas, all of which he certainly meant to designate as Latin towns. (Virg. *Aen.* vii. 631; Serv. *ad loc.*) Pliny also mentions Crustumerium among the cities *of Latium*, of which no vestiges remained in his time. (Plin. iii. 5. s. 9.) Silius Italicus calls it "priscum Crustumium," though he says it was less ancient than Antemnae. (Sil. Ital. viii. 367.)

Its name first occurs in Roman history among the cities which took up arms against Romulus, to avenge the rape of their women at the Consualia; on this occasion Crustumerium combined with Antemnae and Caenina; but instead of uniting their arms they are said to have opposed Romulus singly, and been successively defeated and conquered. Crustumerium shared the same fate as its confederates: it was taken by Romulus, who removed a part of its inhabitants to Rome, and sent a Roman colony to supply their place. (Liv. i. 9—11; Dionys. ii. 36; Plut. *Rom.* 17.) But notwithstanding this tale of a Roman colony, we find Crustumerium next appearing as an independent city in the reign of Tarquinius Priscus; it was one of the cities conquered by that monarch from the Prisci Latini. (Liv. i. 38; Dionys. iii. 49.) On this occasion Dionysius tells us that it received a fresh accession of Roman colonists; but this did not secure its allegiance, and it was captured for the third time, in the first years of the Roman republic, B.C. 499. (Liv. ii. 19.) From this time it appears to have continued in a state of dependency, if not subjection, to Rome; and its territory in consequence suffered repeatedly from the incursions and depredations of the Sabines, to whose attacks it was immediately exposed. (Liv. ii. 64; Dionys. vi. 34, x. 26.) Its name again occurs in B.C. 447, when the army, which was led by the Decemvirs against the Sabines, deserted their standards, and retreated of their own accord to Crustumerium in the Roman territory. (Dionys. xi. 23; Liv. iii. 42.) It would seem probable that this was the event subsequently known as the "Crustumerina secessio" (Varr. *L. L.* v. 81); but that expression is distinctly applied by Varro to the *first* secession (B.C. 493), when the plebeians occupied the Mons Sacer. It would seem, therefore, that he followed some authorities different from the received annals; for it is scarcely possible to reconcile the two, by including the Mons Sacer in the Crustumine territory. [SACER MONS.]

From this time the name of the *city* of Crustumerium never again appears in history, and is found only in Pliny's list of the extinct cities of Latium (iii. 5. s. 9); but its territory (ager Crustuminus) is repeatedly alluded to; and there can be no doubt that it was included in, and gave name to, the

Digitized by Google

Roman tribe which bore the name of Crustumina, and which was placed for the most part among the Sabines. (Liv. xlii. 34; Cic. *pro Balb.* 25, *pro Planc.* 16.) The period at which this was constituted, cannot be fixed with certainty; but it must be placed *after* B. C. 499, when Crustumerium appears for the last time as an independent town, and *before* B. C. 393. (Mommsen, *Römische Tribus*, pp. 9, 10.) The territory of Crustumerium was noted for its fertility: the strip of plain on the left bank of the Tiber consisted of fat rich fields, which seem to have produced abundance of corn, so that even at a very early period the Crustumerians are represented as sending supplies from thence to Rome. (Liv. i. 11; Dionys. ii. 53; Cic. *pro Flacc.* 29.) Virgil also speaks of this district as producing abundance of pears, the fruit of which, according to Servius, was distinguished for being red only on one side, a peculiarity which they still retain. (Virg. *Georg.* ii. 88; Serv. *ad loc.*; Gell, *Top. of Rome*, p. 191.)

The precise site of Crustumerium has not been determined, but that of its territory is fixed with unusual clearness. It adjoined the Via Salaria and the Tiber, which latter river divided it from the Veientines, beginning from a point 13 miles above Rome, till it met the territory of Fidenae. On the N. it probably adjoined that of Eretum. (Plin. iii. 5. s. 9. § 53; Varr. *R. R.* i. 14; Liv. iii. 42.) The situation of the city must therefore be sought within these limits; but no ruins have been traced to mark the exact spot. It doubtless occupied the summit of one of the hills overlooking the Tiber; and a place called *Marcigliana Vecchia*, indicated by Cluverius, about 9 miles from Rome, and 3½ beyond Fidenae, is on the whole the most probable. (Cluver. *Ital.* p. 658; Nibby, *Dintorni di Roma*, vol. i. p. 526; Abeken, *Mittel Italien*, p. 79.) [E. H. B.]

CRUSTU'MIUS, a river of Umbria, flowing into the Adriatic Sea between Ariminum and Pisaurum. It is noticed by Pliny as in the vicinity of Ariminum, but in a manner that would have rather led to the supposition that it was on the N. side of that city. There can, however, be no doubt that it is the same river of which the name is corrupted in the Tabula into "Rustunum," and which is there placed S. of Ariminum. It may therefore be pretty safely identified with the *Conca*, which enters the sea at *La Cattolica*, and is described as a mountain stream, liable to sudden and violent inundations when swollen by the melted snows. Hence the epithet given it by Lucan, of "Crustumium rapax" (Luc. ii. 406; Plin. iii. 15 s. 20; Tab. Peut.). Vibius Sequester (p. 8) asserts that there was a town of the same name at its mouth, but this is probably a mistake. [E. H. B.]

CRYA (Κρύα: *Eth.* Κρυεύς), a city of Lycia, according to Stephanus (*s. v.*). He quotes the first book of the *Epitome* of Artemidorus, and the following passage:—"and there are also other islands of the Crycis, Carysis and Alina." Pliny (v. 31), who may have had the same or some like authority, says "Crycon tres," by which he means that there were three islands off or near to Crya; but he does not name them. Pliny (v. 28) places Crya in Caria, and he mentions it after Daedala, under the name of "Crya fugitivorum." According to his description it is on the gulf of Glaucus. The Stadiasmus places it, under the name Κρούα, 160 stadia from Telmissus to the west. Mela (i. 16) speaks merely of a promontorium Crya. In Ptolemy the name is written Carya, and it is assigned to Lycia. [G. L.]

CRYASSUS (Κρυασσός: *Eth.* Κρυασσεύς), a city of Caria, according to Stephanus (*s. v.*). It does not appear what his authority is; but Leake (*Asia Minor*, p. 225) assumes that it is Plutarch (*de Virt. Mul.*). Some critics further assume that Cryasus and Cryassus are the same place. The names, however, are distinct enough; and if there is only one place meant, we have two names. There is at the modern town of *Rödos* an inscription, in which both Chalce [CHALCE] and Cryassus are mentioned; and the inscription contains the feminine ethnic form Κρυασσίς, and so far confirms Stephanus. (Leake, *Asia Minor*, p. 224, note.) If the old story is true (Polyaen. *Strat.* viii. 64), Cryassus was a Carian city which some Melians seized, and killed the natives. [G. L.]

CRYPTUS PORTUS (Κρυπτὸς λιμήν), at the straits of the Persian gulf (Ptol. vi. 7), by some supposed to be represented by the modern *Sohar*. Mr. Forster maintains it to be identical with the Ambuscuta of Pliny, and finds it at *Muscat* in Oman (*Arabia*, vol. ii. pp. 231—233.) "Its name, 'the hidden harbour,' is clearly descriptive, and it is descriptive exclusively of *Muscat:* for this port is represented, by the latest authorities, as so shut out from the sea by the rocks which encompass the noble harbour, that the first sight of the entrance is obtained only on the actual approach of the vessel in front of the basin before the town." Thus, Mr. Fraser says, "the entrance is so little conspicuous that a stranger unacquainted with the black rocks that surround it, would scarcely detect it, on arriving from sea." [G. W.]

CTENUS PORTUS (Κτενοῦς λιμήν, Strab. vii. pp. 308. 312), the port which from the N. side meeting the SYMBOLON PORTUS on the S., made up the smaller or Heracleotic Chersonesus as forming part of the greater or Tauric Chersonesus. It is identified with the harbour of *Sevastopol*, which is described as one of the finest in the world, and as resembling that of Malta. It is divided into three coves. A full account of it will be found in Clarke (*Trav.* vol. ii. p. 199; Jones, *Trav.* vol. ii. p. 253; comp. *Journ. Geog. Soc.* vol. i. p. 110). [E. B. J.]

CTESIPHON (Κτησιφών: *Eth.* Κτησιφώντιος), a large city in the southern part of Assyria on the left or eastern bank of the Tigris, the origin of which is uncertain. It is first mentioned by Polybius (v. 45), in his narrative of the war between Antiochus the Great and Molo. Ammianus (xxiii. 6) attributes its foundation to a Parthian ruler named Vardanes or Varanes, but history has not recorded who he was or at what period he lived. It is certain, however, that it was not a place of great consequence till the Parthian empire was firmly established. It rose on the decay of Seleuceia, as that city had upon the fall of the earlier capital, Babylon: and Ammianus may be right in attributing to the Parthian Pacorus, the son of Orodes, the magnificence for which it became celebrated. Strabo (*Epit.* xi. 32) describes Ctesiphon as the winter residence of the Parthian kings, who lived there at that season owing to the mildness of the climate; while they passed their summer in Hyrcania, or at Ecbatana, the ancient and more illustrious royal seat. It long remained a place of considerable importance, especially at the time of the restoration of the Persian empire under the early Sassanian princes. Tacitus (*Ann.* vi. 42) calls it "sedes imperii." Its population must have been very large, as from it alone Severus carried off 100,000 prisoners. (Herodian, iii. 30; Dion Cass.

TURIGES CUBI.]

Κούκουλον, Strab. v. p. 238), a town mentioned only by Strabo, who tells *ear* the Via Valeria, but not *on* it, and t *after* Carseoli and Alba, in follow- of that road. There can be little s been correctly fixed by Holstenius p. 155), at a place still called *Cu-* wn on the ridge of the Apennines, the basin of the lake Fucinus from the valley of Corfinium and Sulmo, and about 5 miles from the pass of the *Forca Carrosa*, where the Via Valeria traverses the ridge in question. It would be thus on the very confines of the Marsi and Peligni, but it is not known to which people it belonged. (Romanelli, vol. iii. pp. 139, 140; but see Kramer, *Der Fuciner See*, p. 61, note.) [E. H. B.]

CUCU'SUS (ἡ Κουκουσσός, Eustath. *ad Dion. Per.* 694), COCU'SUS, or COCU'SUM, a place in Cataonia several times mentioned in the Antonine Itin.; and probably the Octacuscus of the Table. The Itin. places it 62 M. P. from Comana of Cappadocia. It was the place of banishment of Chrysostomus, A. D. 404. It seems to be *Cocsou* or *Gogsyn*, as it is named in some modern maps. [CATAONIA, p. 569.] [G. L.]

CUICUL (*Itin. Ant.* p. 29; *Notit. Afr.*: CULCHUL, *Tab. Peut.*; Κούλκουα κολωνία, Ptol. iv. 3. § 29: *Jimmilah*, Ru.), a city of Numidia Caesariensis (aft. Sitifensis), on the right bank of the river Ampsaga, 25 M. P. north-east of Sitifis, on the high road to Constantina. [P. S.]

CU'LARO, afterwards GRATIANO'POLIS (*Grenoble*), a town in Gallia, on the Isara (*Isère*), a branch of the *Rhone*. It is placed in the Table, under the corrupted name of Culabone, on a road from the Alpis Cottia (*Mont Genèvre*) to Vienna (*Vienne*). It has been a matter of dispute whether Cularo was in the territory of the Allobroges, but there is little doubt that it was. There is a letter from Plancus to Cicero (*ad Fam.* x. 23), which is dated "Cularone ex finibus Allobrogum." The common reading is "Civarone," or "Ciurone;" but there is also a reading "Cuiarone," which in fact is the same, the only difference being in the position of the "i." There seems no doubt that this name represents "Cularone." A modern French writer, who admits that Plancus wrote his letter from Cularo, maintains that "ex finibus" means "near the frontiers of the Allobroges," a translation quite inconsistent with Latin usage. The Geographer of Ravenna writes the name "Curaro," instead of "Cularo;" and "Curaro" only differs from "Cuiaro," one of the readings in Cicero's text, in a single letter, "i," which may easily be confounded with "r."

It appears from two inscriptions found on one of the old gates of *Grenoble*,—one of which has only been demolished within the memory of man,—that Cularo retained its name to A. D. 288. Nothing is known of Cularo for a long time after this letter of Plancus. Three hundred and thirty-two years later M. Aurelius Val. Maximianus restored the walls of Cularo, and gave his surname Herculeus to that gate of the city which was previously called Viennensis, and the name Jovia to the gate which was previously called Romana. This is proved by the two inscriptions, which have been correctly published in the work of Champollion de Figeac, *Antiquités de Grenoble*. It is said that 83 inscriptions have been found at *Grenoble* at different times. The restoration of the walls of Cularo, already mentioned, was made about A. D. 288. In A. D. 379, the emperor Gratianus, being in Gaul, enlarged Cularo, and gave to it his own name Gratianopolis, which it preserves in the corrupted form of *Grenoble*. It seems likely that Gratianus made it a bishop's see; at least we know that there was a bishop of Gratianopolis in A. D. 381. Civitas Gratianopolis appears in the Notitia of the provinces of Gallia among the cities of the division of Gallia called Viennensis; and yet the old name Cularo was

Digitized by Google

sometimes still used, for in the Notitia of the Empire it is called Calaro, which means Cularo.

It has been supposed by some geographers that Cularo was on an eminence on the right bank of the *Isère*, but *Grenoble* is on the left bank of the river. There is, however, no foundation for this opinion, which seems to have been adopted by those who suppose that the Isara was the limit of the territory of the Allobroges, and that if Cularo was on the left bank it would not be within this territory. (D'Anville, *Notice*, *&c.*; Walckenaer, *Géog. &c.*, vol. i. p. 263.) [G. L.]

CULCHUL. [CUICUL.]

CUMAE (Κύμη, Strab., Thuc., &c.; Κοῦμαι, Ptol.: *Eth.* Κυμαῖος, Cumanus: *Cuma*), a city on the coast of Campania, about six miles N. of Cape Misenum. It was one of the most ancient as well as celebrated of the Greek colonies in Italy, and Strabo expressly tells us that it was the earliest of all the Greek settlements either in that country or Sicily (Strab. v. p. 243), a statement which there is no reason for rejecting, although we may safely refuse to receive as historical the date assigned it by the later Greek chronologers, who would carry it back as far as 1050 B. C. (Hieronym. *Chron.* p. 100; Euseb. ed. Scal. p. 135.) Velleius Paterculus (i. 4), who mentions its foundation next to that of Magnesia, and *before* the Aeolic and Ionic migrations, must have adopted a similar view, though he does not venture to fix the year. The statements of a mythical character connected with its foundation, which represent the fleet of the colonists as guided by a dove, or by the nocturnal sound of brass cymbals, in themselves point to a very early period, which would leave room for such fabulous embellishments. (Vell. Pat. *l. c.*; Niebuhr, vol. iii. p. 177.) There is some discrepancy in regard to the people by whom it was founded, but there is little doubt that the statement of Strabo may be relied on, who describes it as a joint colony of the Chalcidians in Euboea, and the Cymaeans of Aeolis: the two founders being Hippocles of Cyme, and Megasthenes of Chalcis, and it being agreed that the new settlement should bear the name of one of its parent cities, while it ranked as a colony of the other. (Strab. v. p. 243.) Hence we always find Cumae termed a Chalcidic, or Euboean city, though its name, as well as local traditions, preserved the recollection of its connection with the Asiatic Cyme. (Thuc. vi. 3; Liv. viii. 22; Plin. iii. 5. s. 9; Virg. *Aen.* vi. 2; Ovid, *Met.* xiv. 155; Stat. *Silv.* iv. 3. 24, 118.) Velleius however, as well as Dionysius, drops all mention of the Cymaeans among the original colonists, and speaks of Cumae as founded by the Chalcidians, under Hippocles and Megasthenes, while Dionysius calls it a Greek city founded by the *Eretrians* and Chalcidians. Those writers indeed who adopted the very early date assigned to its settlement by the Greek chronologers, which placed it *before* the Aeolic migration, were compelled to exclude all co-operation on the part of the Asiatic Cyme: and it was probably in order to overcome this difficulty that Scymnus Chius represents it as colonised *first* by the Chalcidians, and *afterwards* by the Aeolians. (Vell. Pat. i. 5; Dionys. vii. 3; Scymn. Ch. 236—239.) According to Livy (viii. 22) the original settlement was made in the island of Aenaria, but the new comers found themselves so much disturbed by earthquakes and volcanic eruptions, that they removed from thence to the mainland. Strabo (v. p. 247) also notices the establishment of a colony of Eretrians and Chalcidians in Aenaria, but without indicating its date.

Whatever may have been the real epoch of the foundation of Cumae, it is certain that it rapidly rose to great wealth and prosperity. The extraordinary fertility of the surrounding country, as well as the excellence of the neighbouring ports, gave it immense advantages, and the native population of the interior seems to have been too scanty or too feeble to offer any obstacle to the progress of the rising city. The period of its greatest prosperity was probably from 700—500 B. C.: at this time it was incontestably the first city in this part of Italy, and had extended its dominion over a great part of the province subsequently known as Campania. The fertile tract of plain called the Phlegraean fields was included in its territory, as well as the vine-growing hills that separate this plain from the Bay of Naples, on which Cumae possessed the two excellent ports of Misenum and Dicaearchia. (Dionys. vii. 3.) A little more distant it had planted the flourishing colony of Neapolis, which was doubtless at this time still dependent upon its parent city: and the statement which calls Abella and Nola Chalcidic towns (Justin. xx. 1) evidently indicates that Cumae had not only extended its influence over the interior, but had sought to strengthen it by the establishment of regular colonies. The great extent of its walls still attested in the Augustan age its former power: and all accounts represent it as almost rivalling the Achaean colonies of Crotona and Sybaris in wealth and population. The government, like that of most of the Greek cities in Italy, was aristocratical, and continued so until the overthrow of its liberties by Aristodemus. (Dionys. vii. 4.) The decline of Cumae was probably owing in the first instance to the increasing power of the Etruscans, and especially to the maritime superiority established by that people in the Tyrrhenian Sea. But the Etruscan conquest of Campania soon brought them into hostile collision by land also: and the first event in the history of Cumae that has been transmitted to us, is that of the successful opposition which it was able to offer to a vast host of invaders, consisting (it is said) of Etruscans, Umbrians, and Daunians (?). Exaggerated as are the numbers of these enemies, who are said to have brought into the field 500,000 foot and 28,000 horse, there seems no reason to doubt the historical fact of the invasion and its repulse. (Dionys. vii. 3, 4.) According to Dionysius, it took place about 20 years before the usurpation of Aristodemus, who first rose to distinction upon the occasion, and was subsequently appointed to command the auxiliary force sent by the Cumaeans to assist the Aricians against Aruns, the son of Porsena. (Liv. ii. 14; Dionys. v. 36, vii. 5, 6.) His success in this expedition paved the way to his assumption of supreme power, which he attained by the same arts as many other despots, by flattering the passions of the multitude, and making use of the democratical party to overthrow the oligarchy, after which he proceeded to surround himself with a guard of hired partisans, and disarm the rest of the people. Dionysius has left us a circumstantial account of the rise, government, and fall of Aristodemus (vii. 3—11; Diod. vii. Exc. Vales. p. 547), which, notwithstanding the scepticism of Niebuhr (vol. i. p. 554, vol. iii. p. 178), may probably be received as historical at least in its main outlines. According to this author his usurpation may be dated in B. C. 503, and he appears to have retained the sovereign power for above 20 years, when he was expelled by the descendants of those whom he had put to death or

le. It was during this period that erbus, the exiled king of Rome, took e, where he shortly after ended his (Liv. ii. 21; Dionys. vi. 21.) Aris- ill ruler of the city when the Roman embassy to beg for supplies of corn at famine (B. C. 492), but the ships, n already loaded with grain, were rrant and confiscated, as an alleged he property of Tarquin. (Liv. ii. 34; 2.)

such as that of Aristodemus is d the civil dissensions that must ts overthrow as well as its establish- but weaken the power and impair f Cumae, and render her less able to increasing power of the Etruscans. t time her name is mentioned in her invoking the aid of Hieron, the espot of Syracuse, against the com- the Tyrrhenians and the Cartha- d attacked her by sea, and threat- xistence. The victory of Hieron on B. C. 474) not only delivered Cumae danger, but appears to have given a he maritime power of the Etruscans. Pind. *Pyth.* i. 136—146, and Schol. o we hear of the latter any further e by land; and that city appears to interval of repose, which, so far as would seem to have been a period prosperity: but a more formidable atened it from the growing power of ho, in B. C. 423, made themselves a, and only three years afterwards, he Cumaeans in the field, laid siege d after repeated attacks succeeded assault. No mercy was shown by the unfortunate city was given up to its citizens put to the sword, and the ery, except such as were able to make Neapolis: while their wives and orced to cohabit with the Campanian stablished a colony in the city. (Liv. i. 76; Strab. v. p. 243.) The date iven by Livy as B.C. 420; and the ristion, to which it is assigned by give the same date (B. C. 421— man consulship, to which the latter of B. C. 428: the former date is e one.

iod Cumae ceased to be a Greek l retaining many traces of Hellenic ns, which subsisted down to the but a fatal blow had been given to d it sank henceforth into the con- d-rate Campanian town. Having eneral defection of the Campanians in their subsequent defeat, it was tted to the Roman franchise, though he right of suffrage (Liv. viii. 14): btained the full franchise we know at a later period to have not only t municipal privileges, but to have y the Romans with especial favour, unvarying fidelity to the republic. Vell. Pat. i. 4; Cic. *de leg. Agr.* 13.) In the Second Punic War an attempt upon the city, but was s walls by Sempronius Gracchus, ntent himself with laying waste its territory. (Liv. xxiii. 36, 37, xxiv. 13.) From this time we hear but little of Cumae, but the circumstance that, in B. C. 180, the citizens requested and obtained permission to use the Latin language in their public documents, shows the continually decreasing influence of the Greek element in the city. (Liv. xl. 42.) We may probably infer from the expressions of Velleius (i. 4) that it continued faithful to the Romans during the Social War. In the latter ages of the Republic its neighbourhood began to be frequented by the Roman nobles as a place of retirement and luxury; but these established their villas rather at Baiae and Misenum than at Cumae itself, the situation of which is far less beautiful or agreeable. Both these sites were, however, included in a municipal sense in the territory of Cuma (in Cuemano), and hence we find Cicero applying the name of Cumanum to his villa, which was in full view of Puteoli (*Acad.* ii. 25), and must therefore have been situated on the Bay of Baiae, or at least on the E. side of the ridge which separates it from Cumae. The same thing is probably true of the villas of Catulus, Pompeius, and Varro, mentioned by him. (Cic. *Acad.* i. 1, ii. 25; *ad Fam.* xvi. 10; *ad Att.* iv. 10.) At an earlier period Sulla retired to the neighbourhood of Cumae after his abdication, and spent the last years of his life there. (Appian, *B. C.* 104.) The increasing popularity of Baiae, Bauli, and Misenum, under the Roman Empire, though it must have added to the local importance of Cumae, which always continued to be the municipal capital of the surrounding district (Orell. *Inscr.* 2263), was unfavourable to the growth of the city itself, which appears to have declined, and is spoken of by Juvenal as deserted (*vacuae Cumae, Sat.* iii. 2) in comparison with the flourishing towns around it. Statius also calls it the quiet Cumae (*quieta Cyme,* Silv. iv. 3. 65). But the expression of the satirist must not be taken too strictly: the great extent of the ancient walls, noticed by Velleius (i. 4), would naturally give it a deserted appearance; but we know that Cumae had received a colony of veterans under Augustus, which appears to have been renewed by Claudius (*Lib. Colon.* p. 232), and though Pliny does not give it the name of a colony, it bears that title in several inscriptions of Imperial date (Orell. *Inscr.* 1857, 2263, 2533). We learn from various other sources that it continued to exist down to the close of the Roman Empire (Plin. iii. 5. s. 9; Ptol. iii. 1; § 6; *Itin. Ant.* pp. 122, 123; *Tab. Peut.*), and during the wars of Belisarius and Narses with the Goths, it re-appears as a place of importance. At this time, however, the city appears to have shrunk, so as to be confined to the ancient citadel or arx (still called the *Rocca di Cuma*), an isolated and precipitous rock, very difficult of access, and which on that account was regarded as a very strong fortress. It was chosen by the Gothic kings as the depository of their regalia and other valuables, and was the last place in Italy that held out against Narses. (Procop. *B. G.* i. 14, iii. 6, iv. 34; Agath. i. 8—11, 20.) This citadel continued to exist till the 13th century, when having become a stronghold of robbers and banditti, it was taken and destroyed: and the site has remained desolate ever since.

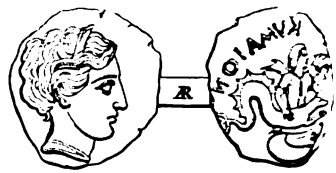
Under the Roman Empire Cumae was noted for a manufacture of a particular kind of red earthenware. (Mart. xiv. 114.) Its territory also produced excellent flax, which was especially adapted for the manufacture of nets. (Plin. xix. 1. s. 2; Grat. Falisc. *Cyneg.* 35.) Of the fertility of the adjoining plain,

Digitized by Google

or the wines of Mt. Gaurus, it is unnecessary to speak, but the latter was in the time of the Romans probably dependent on Puteoli.

Inseparably connected with the name of Cumae is that of the Sibyl who, according to the general tradition of antiquity, had her abode there. There is little doubt that the legends connected with her were brought by the Greeks from Cyme in Asia Minor, and were transferred from Gergis or Gergithes in the Troad to the Italian Cumae. (Grote's *Greece*, vol. iii. p. 472; Klausen, *Aeneas und die Penaten*, vol. i. pp. 209, 210.) Similar peculiarities in the nature of the soil and localities seem to have contributed to this: it was doubtless also owing to the striking physical characters of the adjoining region that the myths connected with the entrance to Hades became permanently localized about Lake Avernus: and the idea of placing the Cimmerians of the Odyssey in the same neighbourhood was probably an afterthought in later times. It seems likely, indeed, that the Cumaeans were one of the main channels by which the Trojan and Greek legends were transferred to this part of Italy, and the names of Aeneas and Ulysses inseparably associated with the coasts of the Tyrrhenian Sea. The cave of the Sibyl was still supposed to exist in the historical period; the cavern shown under that name was a vast subterranean chamber or grotto, hewn out of the eastern side of the rock on which stood the citadel. ("Excisum Euboïcae latus ingens rupis in antrum," Virg. *Aen.* vi. 42; Pseud. Arist. *Mirab.* 95; Lycophr. 1278—1280; Ovid, *Met.* xiv. 104.) Justin Martyr, who visited it about the middle of the second century, describes it as like a great hall or basilica, artificially excavated, containing three reservoirs of water, and with an inner chamber or recess, from which the prophetess used to deliver her oracles. (Just. Mart. *Paraen.* 37.) Agathias, in relating the siege of Cumae by Narses, also mentions the existence of this great cavern, of which that general availed himself to undermine the walls of the citadel, and by this means caused them to fall in, together with the roof of the cavern: and thus destroyed the abode of the Sibyl, though without effecting the capture of the fortress. (Agath. *B. G.* i. 10.) On the summit of the arx was a temple of Apollo, whose worship here seems to have been intimately connected with that of the Sibyl, though legends gave it a still more ancient origin, and ascribed the foundation of the temple to Daedalus. (Virg. *Aen.* vi. 14—19, and Serv. *ad loc.*; Sil. Ital. xii. 85—102; Juv. iii. 25.) Some obscure ruins on the summit of the hill are supposed to have formed part of this ancient edifice: and the remains of a cavern on the E. face of the cliff are believed to have belonged to that of the Sibyl. The true situation of this was first pointed out by Cluverius: earlier commentators and topographers had confounded the cave of the Sibyl herself with the entrance to the infernal regions near the Lake Avernus, and hence the name of *Grotta della Sibilla* is still popularly given to an artificial excavation on the banks of that lake, which has the appearance of an imperfect tunnel, and is in all probability a work of Roman times. (Cluver. *Ital.* pp. 1107—1113; Romanelli, vol. iii. p. 517.)

The existing remains of Cumae are inconsiderable: the plain around the rock of the citadel, in which the ancient city spread itself out in the days of its greatness, is now covered with a royal forest: some remains of an amphitheatre however still exist, and numerous other masses of masonry, most of them of Roman construction. To the same period belongs a picturesque archway in a massive and lofty wall of brick, called the *Arco Felice*, which stands on the road to *Pozzuoli*, and is supposed by some to be one of the gates of the ancient city: the nature of its construction renders this almost impossible. Between this and the foot of the rock are the remains of a small temple, popularly known as the *Tempio dei Giganti*. This is all that remains of Cumae above ground, but excavations at different periods have brought to light numerous architectural fragments, vases and statues, many of them of the best period of art, and it is probable that further would better reward more systematic research (Romanelli, vol. iii. pp. 501, 502; Eustace's *Classical Tour*, vol. ii. pp. 427—434; Iorio, *Guida di Pozzuoli*, pp. 102—125; Bull. dell Inst. 1842 pp. 6—10.) [E. H. B.]



COIN OF CUMAE.

CUMERUS, a promontory of Picenum, on the coast of the Adriatic, still called *Monte Comero*. (Plin. iii. 13. s. 18.) It is formed by a considerable mountain mass, rising close to the sea-shore, and nearly detached from the mountains of the interior, extending about 10 miles in length. At its northern extremity stood the city of Ancona and the smaller town of Numana (*Umana*) at its southern end. [E. H. B.]

CUNARUS MONS. [APENNINUS.]

CUNAXA (Κούναξα, Plut. *Artax.* c. 8), the scene of the battle between Cyrus the Younger and the forces of his brother Artaxerxes, in which the former was overthrown and slain. Xenophon (*Anab.* i. 8) describes the battle fully, but does not give the name of the place where it was fought. Plutarch, in his life of Artaxerxes, has alone preserved it, and states that it was 500 stadia from Babylon. There has been much discussion as to the exact position of the field of battle. Rennell (*Illustr. of the Retreat of the Ten Thousand*, p. 93) has adopted the distance from Babylon as given by Plutarch, that which on the whole appears to accord best with the previous narrative of Xenophon. [V.]

CU'NEI. [CONII.]

CUNETIO, in Britain, mentioned in the fourth Itinerary, as being 15 miles from Spinae (Speen). Some locality on the *Kennet*. [R. G. L.]

CU'NEUS (Κούνεος), i. e. the *Wedge*, a name applied, from its shape, to that part of the Spanish peninsula which forms its SW. angle, and the S. part of Lusitania, from the mouth of the Anas to the SACRUM PR. (*C. S. Vincent*; Artemid. ap. *Strab* iii. p. 137). Whether the name was also applied specifically to the headland just named is not quite clear from Strabo; but Mela (iii. 1) seems it to the S. headland of the district (*C. S. Maria*). Respecting the people, see CONII. [P. S.]

CU'NICI. [BALEARES.]

CUNICULA'RIAE INSULAE is the name given by Pliny to some small islands lying in the strait which separates Corsica from Sardinia, now known as the *Straits of Bonifacio*. They are probably the

islets now called *Isola dei Razzoli, dei* | *di Sta. Maria*, which are those that lie | ly in the strait itself. Between these | extremity of Sardinia, is the more con- | and called *Isola della Maddalena*, which | the PHINTON of Pliny and Ptolemy. | mentions another island called Fossae, | one called Ilva, close to Phinton. There | two other islands—one called *I. di Ca-* | he E. of La Maddalena, and the *I. dei* | the W.—to which these names may be | hey cannot be really identified. Perhaps | to apply the name of Cunicularíae to | roup. (Plin. iii. 6. s. 13; Ptol. iii. 3.

[CUARIUS.]

ms, Strab. *Κύρεις*, Dionys.: *Eth.* | (pl. Quirites), but also Curensis, | an ancient city of the Sabines, | ft of the Via Salaria, about 3 miles | k of the Tiber, and 24 miles from | ebrated in the early history of Rome | of Numa, as well as the city of | ence the Sabines proceeded, who | rch waged war against Romulus, | stablished themselves at Rome. | ys. ii. 36, 46, 48; Plut. *Rom.* 19.) | opinion of ancient authors derives | rites, by which the Roman people | ter times, from that of Cures. (Strab. v. p. 228; Liv. i. 13; Fest. v. *Quirites*.) Virgil therefore, for distinction's sake, terms the inhabitants of Cures "prisci Quirites" (*Aen.* vii. 710), and Columella still more distinctly, "veteres illi Sabini Quirites" (*de R. R.* i. pref.). It is, however, far more probable that the two names had no *immediate* connection; but that both were derived from the Sabine word Curis or Quiris, which signified a spear (Fest. pp. 49, 254, ed. Müll.; Serv. *ad Aen.* i. 292; Ovid, *Fast.* ii. 477), and that the Roman name of Quirites was merely equivalent to "spearmen" or "warriors." A legend related by Dionysius (ii. 48), which connects the foundation of Cures with the worship of the Sabine god Quirinus, evidently points to the same derivation. It is even probable that the prominent part assigned to Cures in the legendary history of Tatius, which led some writers to assume that it must have been the metropolis or chief city of the Sabines (Dionys. ii. 36), had no other foundation than in the false etymologies which connected it with the name of Quirites. It is certain at least, that both Virgil and Ovid speak of it as a small town (parvi Cures, Virg. *Aen.* vi. 812; Ovid, *Fast.* ii. 135), and its name never appears in any of the subsequent wars of the Romans with the Sabines. The circumstance that Numa was, according to the received history, a native of Cures, may be thought to lend some countenance to the tradition of its early importance, though on the other hand it is not improbable that the two traditions were adapted to each other. (Liv. i. 18; Plut. *Num.* 3; Virg. *Aen.* vi. 812.) Strabo's statement, that it had once been a flourishing and powerful city, is apparently only an inference which he draws from its having in ancient times given two kings to Rome. (Strab. v. p. 228.) Whatever truth there may be in the statements of its ancient greatness, it must have early fallen into comparative insignificance; for though numerous references to it are found in the Latin poets, no mention of its name again occurs in Roman history, and Strabo tells us that it was in his time sunk to a mere village. It had however, previous to that, received a body of Roman colonists, first in the time of Sulla, and again in that of Caesar (*Lib. Colon.* p. 253; Zumpt, *de Colon.* p. 305), and seems to have considerably revived under the Roman empire. Pliny notices the Curenses as one of the municipal towns of the Sabines; and numerous inscriptions of Imperial date speak of its magistrates, its municipal senate (ordo), &c., whence we may infer that it continued to be a tolerably flourishing town as late as the 4th century. (Plin. iii. 12. s. 17; Orelli, *Inscr.* 107; Nibby, *Dintorni*, vol. i. pp. 532, 533.) In these inscriptions it is uniformly termed "Cures Sabini," an epithet probably indicating the claim set up by the people to be the metropolis of the Sabines. In like manner, after the establishment of Christianity, the bishops assumed the title of "Curium Sabinorum," and sometimes even that of "Episcopus Sabinensis." The final decay of the city probably dates from the time of the Lombards, who repeatedly ravaged this part of Italy: we learn from an epistle of Pope Gregory I. that in A. D. 593 the site was already desolate. (Nibby, *l. c.*)

The true situation of Cures was first pointed out by Holstenius, and the actual remains of the city discovered by Chaupy. The site, which is of considerable extent, is occupied in part by two small villages or hamlets: the one still bearing the name of *Correse*; the other, about a mile to the W., is

Digitized by Google

called *Arci*, and evidently marks the site of the ancient citadel (Arx). Considerable fragments of masonry, as well as architectural ornaments, portions of columns, &c., and several inscriptions, have been found scattered over the surface of this space: but all these remains are of Roman date; no traces are found of the ancient walls, and it seems probable indeed that Cures, like many other Sabine cities, was not fortified. About 2 miles distant from *Arci*, at a place called *Torri*, are the substructions of a temple, of a very massive construction, and probably belonging to a much more remote epoch. (Chaupy, *Maison d'Horace*, vol. iii. pp. 70—84; Nibby, *l. c.* pp. 531—538; Holsten. *Not. ad Cluv.* p. 106) At the foot of the hill occupied by the ruins of Cures flows a small river called the *Correse*, which rises in the mountains above *Nerola*, and falls into the Tiber about 3 miles below *Arci*. [E. H. B.]

CURETES, CURETIS. [AETOLIA, p. 64.]

CURGIA (Κούργια, Ptol. ii. 4. § 15) or CURIGA (*Itin. Ant.* p. 432; Geogr. Rav. iv. 44: *La Calera*), a city of the Celtici, in Hispania Baetica, near the Mons Marianus (*Sierra Morena*), on the high road from the mouth of the Anas to Emerita Augusta. It appears to be the same place as the TURGIA, previously Ucultuniacum, of Pliny (iii. 3; compare Caro, *Ant.* iii. 70; Ukert, vol. ii. pt. 1, p. 382). [P. S.]

CURIA (*Chur*), a town in Rhaetia prima, on the Rhine. (Itin. Ant. pp. 277, 278; Paul. Diac. *Hist. Longob.* vi. 21.) [L. S.]

CURIA, in Britain, mentioned by Ptolemy as a town of the Ottadeni. Probably *Currie-on-Gore*. [R.G.L.]

CURIA'NUM (Κουριανὸν ἄκρον), is placed by Ptolemy (ii. 7) on the coast of Aquitania, between the mouth of the *Adour* and of the *Garonne*. There seems no place that corresponds to it except the *Pointe d'Arcachon*, on the north side of the *Bassin d'Arcachon*. Some geographers fix it at the *Pointe de Grave*, near the *Tour de Cordouan*, the point which is on the south side of the entrance of the *Gironde*. [G. L.]

CURIAS (Κουρίας, Ptol. v. 14. § 2; Strab. xiv. p. 683; Steph. B.; Κυριακόν, *Stadiasm.* §§ 286, 300: *Capo Garata* or *delle Gatte*), the most S. point of Cyprus, forming a low and rounded excrescence, which resembles a peninsula rather than a promontory. The stags from Cilicia and Syria swam over to this fertile spot to enjoy the rich pastures. (Aelian, *Nat. An.* v. 56, xi. 7; Maxim. Tyr. *Diss.* xii. 3; Engel, *Kypros*, vol. i. p. 117.) [E. B. J.]

CURICTA (Plin. iii. 21. s. 25; Κουρίκτα, Ptol. ii. 16. § 13; Κυρικτική, Strab. ii. p. 123, ad fin., vii. p. 315), an island off the coast of Illyricum, now called *Karek*, or *Veglia*, a little south of the Absyrtides. According to Ptolemy it contained two towns, Fulvinium (Φουλφίνιον) and Curicum (Κούρικον). "*Veglia* has excellent harbours; and the valleys, if cultivated, might be productive as of old, when the island was rich in timber and pasture land, and produced abundance of grain, oil, and wine. The Illyrian snails, mentioned by Pliny (ix. 56), are very numerous in *Veglia*. It was during a long period an independent state, until ceded to Venice in the fifteenth century." (Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 50.)

CURIGA. [CURGIA.]

CURIOSOLITAE, a people of Celtica who are mentioned by Caesar several times (*B. G.* ii. 34, iii. 7, 11, vii. 75). The name only occurs in the accusative form, and as there are variations in the MSS., the nominative is not quite certain. They are mentioned (*B. G.* ii. 34) with the Veneti, Unelli, Osismi, and others that Caesar calls "maritimae civitates," and border on the ocean. In another place (*B. G.* vii. 75) he describes the position of the Curiosolitae on the ocean in the same terms, and includes them among the Armoric states, a name equivalent to "maritimae." The name occurs in Pliny (iv. 18) in the form Cariosvelites; and he mentions them with the Unelli, Diablindi, and Rhedones. The Curiosolitae are not mentioned by Ptolemy. No city of these people is mentioned, and the Itins. give no roads in this part of *Bretagne*. Accordingly we can only conjecture their position, which is determined with some probability to be the diocese of *St. Malo*, the only place that remains for them after fixing the position of the other Armoric nations. The name seems to be preserved in *Corseult*, a village between *Dinan* and *Lamballe*, where there are the remains of an old Roman town. We may conclude that, after the fashion of Gallic names, *Corseult* represents the capital of the Curiosolitae. D'Anville supposes that on the coast they extended west to the neighbourhood of *St. Brieuc*, where a place called *Finiac* denotes the boundary of an ancient territory, as the name Fines or *Finis* does in other parts of Gallia. The neighbours of the Curiosolitae on the east were the Rhedones, and on the south the Veneti. On the west were the Osismi or Osismii, who occupied the extremity of the peninsula of *Bretagne*. But Walckenaer places, between the Osismi and the Curiosolitae, the Biducasses of Ptolemy, in the diocese of *St. Bidué* or *St. Brieuc*, whom he distinguishes from the Viducasses. [VIDUCASSES.] (D'Anville, *Notice*, &c.; Walckenaer, *Géog.* vol. i. p. 381.) [G. L.]

CURIUM. [AETOLIA, p. 66, b.]

CURIUM (Κούριον, Ptol. v. 14. § 2: Strab. p. ; Hierocl.; Curias, Plin. v. 13: *Eth.* Κούριος: *Episcopia*), a city of Cyprus, situated to the W. of the river Lycus, 16 M. P. from Amathus. (*Peut. Tab.*) It was said to have been founded by the Argives (Herod. v. 113; Strab. xiv. p. 683.) Stesenor, its sovereign, betrayed the cause of his country during the war against the Persians. (Herod. *l. c.*) Near the town was a Cape (Φροίριον, Ptol. v. 14. § 3: *Capo Bianco*), from which sacrilegious offenders who had dared to touch the altar of Apollo were thrown into the sea. (Strab. *l. c.*) The ruins of a town supposed to represent this have been found near *Episcopia*, one of the most fertile spots in the island. (Pococke, *Trav.* vol. ii. p. 329; Engel, *Kypros*, vol. i. p. 118.) [E. B. J.]

CURMILIACA, in Gallia, is placed by the Antonine Itin. on a road between Samarobriva (*Amiens*) and Caesaromagus (*Beauvais*). This old road is the *Chaussée de Brunehaut*. D'Anville gives sufficient reasons for supposing that a place called *Corroy* may represent Curmiliaca. [G. L.]

CURTA (Κούρτα), a town in Pannonia, the site of which is unknown. (Ptol. ii. 16. § 4, who places it in Lower Pannonia, while the Itin. Ant. p. 262 assigns it to Upper Pannonia.) [L. S.]

CURUBIS (Κουρυβὶς ἡ Κούροβις, Ptol. iv. 3. § 8; *Itin. Ant.* pp. 56, 57, 493; *Tab. Peut.*: Kurbah), a city on the E. coast of Zeugitana, in Africa Propria, between Clypea and Neapolis, 16 M. P. north of the latter. According to Pliny (v. 3) it was a free city, but an inscription found on the spot designates it a colony, COL. FULVIA. CURUBIS. (Shaw, *Travels*, &c., p. 90.) [P. S.]

Digitized by Google

σα), a river on the W. coast of Mauna, S. of Atlas Minor and N. of the (Ptol. iv. 1. § 2.) [P. S.]

ούσαι, Aelian, *H. An.* x. 27; Κάσος ierocles, p. 730), the modern *Kusieh*, the Lycopolite nome of the Thebaid. Imperii it is noted as the head-quarters Constantia Thebaeorum. The goddess ania was held in especial reverence at e symbol of a white cow. (Aelian, *l.c.*) iod it was an episcopal city. There been another town of this name in the me of the Heptanomis. [W. B. D.]

Scripture name for ARABIA, usually LXX. Αἰθιοπία, as e. g. *Numb.* xii. 1; *Habak.* iii. 7, &c. [G. W.]

[ORETANI.]

ΩΜ (Κουτατίσιον, Procop. *B. G.* iv. nall town in Colchis, on the river *chitais* or *Kutais*. It was identified ical Cytae or Cytaea, said to have place of Medea (Steph. B. *s. v.*; 26), whence the adjectives Cytaeaeus sed in reference to Medea and Colchis ; Val. Flacc. vi. 693). Scylax, on states that Mala, on the same river, that honour. [V.]

(Κοτυλία), a town of the Sabines, and Interocrea, situated in the imourhood of a small lake, which bore TILIAE LACUS (Plin. iii. 12. s. 17), ensis (Varr. *L. L.* v. 71; Macrob. s was in fact a mere pool,—according was only 400 feet in diameter, but and it derived great celebrity from e of its having a floating island on his phenomenon, which is the subject ration with many ancient writers, is y Dionysius, who tells us that "the 50 feet in diameter, and it rises to out a foot above the water: it is not about in different directions, as the metimes one way, sometimes another. it a kind of rushes, and a few size." (Dionys. i. 15; Plin. ii. 95; iii. 25; Sotion. *de Mir. Font.* 37; It is evident that this marvel arose ations of carbonate of lime formed by he lake, fragments of which might e be detached from the overhanging ed on the banks: the same phenothough on a smaller scale, at the near Tibur. (Gell, *Top. of Rome*, ling to Dionysius the lake was contory, meaning probably the Sabine , and was regarded as so sacred that ved to approach its banks, except on The Cutilian Lake still exists under *Pozzo di Ratignano* or *Latignano*, tly reduced in size by the continual ts banks; but the floating island has e lake is situated in the level valley the foot of the hill on which stands age of *Paterno*. In its immediate re numerous other springs, some hot nd varying in their mineral qualities, sulphureous character. These are UTILIAE (τὰ ἐν Κωτιλίαις ψυχρὰ p. 228), mentioned by Strabo and d which appear to have been much the Romans for their medical properties. (Cels. *de Med.* iv. 5.) Among other instances we learn that Vespasian was in the habit of visiting them every year; and it was while residing here for the purpose of using them, that his death took place, A. D. 79. (Suet. *Vesp.* 24; Dion Cass. lxvi. 17.) There still exist some fine ruins of Roman baths, at a short distance from the lake; and the basin of one of the springs is surrounded with marble steps. (K. Craven, *Abruzzi*, vol. i. pp. 231—235; Chaupy, *Maison d'Horace*, vol. iii. pp. 102, 103.)

It is probable that there grew up something of a town around the mineral springs of Cutilia, and hence we find the name of Cutiliae, as that of a town or village, both in the Itineraries, and even in Livy, where he is describing the route of Hannibal from Amiternum to Rome. (Liv. xxvi. 11; Itin. Ant. p. 107. The Tab. Peut., however, marks the spot as the Aquae Cutiliae.) But there was never, in the Roman times at least, a municipal town of the name, and the lake and springs of Cutilia were included in the territory of Reate. (Plin. iii 12. s. 17; Suet. *Vesp.* 24.) Dionysius indeed asserts that there was in early times "a considerable city" (πόλις ἐπιφανής), to which he gives the name of Cotylia, and the foundation of which he ascribes to the Aborigines (i. 15. 19); but if there ever was a city of the name, all trace of it must have disappeared at a very early period.

The Itinerary places Cutiliae 8 M. P. from Reate, and 6 from Interocrea; which are just about the true distances: the Tabula gives 9 for the one and 7 for the other. Varro terms the Cutilian Lake the "Umbilicus Italiae," because it was exactly in the centre of the peninsula. It is in fact just about half way between the two seas. (Varr. *ap. Plin.* iii. 12. s. 17: D'Anville, *Anal. Géogr. de l'Italie*, p. 165.) This circumstance has led some writers to confound it with the Amsanctus of Virgil, which he places "Italiae in medio" (*Aen.* vii. 563); but the position of the latter in the region of the Hirpini is clearly established. [AMSANCTI VALLIS.] [E.H.B.]

CUTINA, a town of the Vestini, mentioned only by Livy (viii. 29). [CINGILIA.]

CYANE (Κυάνη), a fountain and river in the neighbourhood of Syracuse, flowing into the Anapus. According to a legend preserved by several ancient writers, it was the spot where Pluto descended to the infernal regions with Proserpine, after he had carried her off near Enna. According to Ovid, the tutelary nymph of the fountain, Cyane, who is represented as the bride of Anapus, in vain endeavoured to oppose Pluto, and was in consequence herself changed into a fountain. (Ovid, *Met.* v. 409—437, 465; Claudian, *de Rapt. Proserp.* iii. 246; Diod. v. 4; Cic. *Verr.* iv. 48.) The extreme beauty and clearness of its waters (from the deep blue colour of which its name was obviously derived) would naturally lead to the worship of its tutelary nymph; and we accordingly find that there was a shrine or temple of Cyane in the immediate neighbourhood of the fountain, where an annual festival was held, the institution of which was ascribed to Hercules. (Diod. iv. 23, v. 4, xiv. 72; Ael. *V. H.* ii. 33.) The source of the Cyane, now called *La Pisma*, is situated in low marshy ground, at the foot of the limestone hills due W. from the great harbour of Syracuse, from which it is distant about two miles. It is a beautiful circular basin, of about 50 feet in diameter, and 20 or 30 deep: its pellucid blue waters well up with a strong spring, and form at once a considerable river, which flows with a deep and tranquil current

Digitized by Google

for near a mile and a half, when it joins the Anapus immediately below the Olympeium. It is remarkable at the present day as the only place in Europe that produces the true Egyptian papyrus (Cyperus papyrus): it is not improbable that this plant was introduced from Egypt by the Syracusan kings, in the days of their intimate relations with the Ptolemies. (Leake, *Notes on Syracuse*, p. 252; D'Orville, *Sicula*, p. 190; Hoare's *Class. Tour*, vol. ii. p. 163.) On the height above the fountain are some vestiges of an ancient building, which may probably mark the site of the temple of the nymph Cyane (*τὸ τῆς Κυάνης ἱερόν*, Diod. xiv. 72): it was from thence that, in B. C. 396, Dionysius attacked the Carthaginian camp under Himilco; and it therefore probably stood upon elevated ground. [E. H. B.]

CYA'NEAE (Plin. v. 27). Leake (*Asia Minor*, p. 188) says that this Lycian town was discovered west of Andriaca [ANDRIACA] by Mr. Cockerell. The place, which is at the head of Port Tristomo, was determined by an inscription. Leake observes "that in our copies of Pliny it is "written Cyane; in Hierocles and the Notitiae Episcopatuum it is Cyaneae." But the name is written Cyaneae in Harduin's Pliny.

It is said in Spratt and Forbes (*Lycia*, vol. ii. p. 271):—"On the high table land between port *Tristomo* and the inland valley of *Kasabar*, we found three ancient sites, which, from the inscriptions copied at each, appeared to be severally—or perhaps collectively—styled Cyaneae." At one of these places, called *Tousa*, a sarcophagus contained the feminine ethnic name Κυανειτις, if it is copied right. A pedestal found at another place, called *Yarvoo*, contains a Greek inscription of the Roman period, with the usual formula, Κυανειτων ἡ Βουλη και ὁ Δημος. And at a third place, named *Ghiouristan*, a Greek inscription contained the form Κυανειτων: and it is added,—"the words Κυανειτων γερουσια occur in the inscription on a sarcophagus at the same locality." (Spratt and Forbes, *Lycia*, vol. ii. p. 271.)

It is singular that three distinct sites seem to have had the name Cyaneae, for the plural form appears to be the genuine name of the place. *Yarvoo*, which seems to be the chief place, is due north of the head of the port *Tristomo: Ghiouristan* is due north of *Yarvoo*, and about 3 miles distant, according to the map in Spratt and Forbes's work. *Tousa* is about WNW. of *Yarvoo*, and further distant than *Ghiouristan*. *Yarvoo* (Plan in Spratt and Forbes) is on a high platform, with a steep descent on two sides. The walls are in a good state of preservation, and from 5 to 15 feet high. There is a theatre 165 feet in diameter, many plain rock tombs, groups of sarcophagi, and confused heaps of ruins. The remains are of the Roman and middle age construction; and some of a doubtful age. There were none of the earlier Lycian tombs and inscriptions. At *Tousa* a Lycian inscription was found. The city was "small, and surrounded by a rudely constructed Hellenic wall, very perfect in some parts, combining the polygonal and cyclopean styles in its construction." (Spratt and Forbes, *Lycia*, vol. i. p. 111.) It is added:—"it appeared to be a city ranking in importance with Phellus and Candyba, but in a better state of preservation." *Tousa* is nearly 5 hours from the sea. At *Ghiouristan* there are three Lycian rock tombs, one of which has a Lycian and Greek inscription. There are many ombs and sarcophagi here.

This is another example of the discovery of Lycian towns of which no historical record has been preserved except the names. It is not easy to conjecture why all these places had the same name. But it is very possible that one of them, *Yarvoo*, was the chief place under the name of Cyaneae, and that the other two, which belonged to Cyaneae, might have other names, and yet be considered as dependent on the chief place, and might be comprehended under the same name. [G. L.]

CYA'NEAE INSULAE. [BOSPORUS, p. 424.]

CYA'NEUS (Κυάνεος, Ptol. v. 10. § 2; Plin. vi. 3. 4), a river of Colchis, a little to the south of Dioscurias. According to Pliny, it must have been a river of some size; and he designates both it and the Hippus, which fell into the Euxine near it, as "vasti amnes." It has been conjectured that it is the same river which Scylax (p. 32) calls the Gyenus (or, according to Gail's reading, Tyenus). Ritter (*Erdk.* vol. ii. p. 915) speaks of a river called *Gonieh* in the neighbourhood, which perhaps confirms the original form of the word Gyenus. [G. L.]

CYATHUS. [ACHELOUS.]

CYBELEIA (Κυβέλεια, Steph. *s. v.*) or CYBE'LLIA (Strab. p. 645), a city of Ionia. Strabo, after saying that the mountain Mimas is between Erythrae and the Hypocremnus [CLAZOMENAE], adds, "then a village Cybellia, and the promontory Melaena." This is all that is known. [G. L.]

CYBISTRA (*τὰ Κύβιστρα*: *Eth.* Κυβιστρεύς, coin). Strabo (p. 537), after mentioning Tyana, says "that not far from it are Castabala and Cybistra, forts which are still nearer to the mountains," by which he means Taurus. Cybistra and Castabala were in that division of Cappadocia which was called Cilicia. Leake (*Asia Minor*, p. 62) says that Strabo places Cybistra 300 stadia from Mazaca [CAESAREIA]: but the obscure text seems to mean (p. 539) that it is 300 stadia from Tyana to Cybistra. Strabo makes it six days' journey from Mazaca to the Pylae Ciliciae, through Tyana, which is about half way; then he makes it 300 stadia, or about two days' journey, from Tyana to Cybistra, which leaves about a day's journey from Cybistra to the Pylae, and this is consistent with the passage already cited. Leake further observes, "We learn also from the Table that Cybistra was on the road from Tyana to Mazaca, and sixty-four Roman miles from the former." He thinks that these data are sufficient to fix the site of Cybistra at *Karahissar*, where are considerable remains of an ancient city. *Karahissar* is about 30 miles SSW. of Mazaca (*Kaisarieh*). But Hamilton (*Researches*, vol. ii. p. 293), who visited *Karahissar*, says that it contains no vestiges of antiquity; and besides this, it is plain that, if Strabo's description is right, *Karahissar* is a long way from Cybistra. Hamilton adds, in a note, that it is stated on German authority that "Cybistra is at a place called *Pasmaktchi*, on the road from Caesarea to the Cilician pass;" but no more precise indication is given. Ptolemy (v. 7) places Cybistra in Cataonia, but he mentions Cyzistra as one of the towns of the Cilicia of Cappadocia, and Mazaca as another. It appears, then, that his Cyzistra corresponds to Strabo's Cybistra, which certainly is not in Cataonia.

When M. Cicero was proconsul of Cilicia, he led his troops southwards towards the Taurus through that part of Cappadocia which borders on Cilicia, and he encamped "on the verge of Cappadocia, and far from Taurus, at a town Cybistra, in order to defend Cilicia, and at the same time hold Cappadocia" (*ad Fam.* xv. 2, 4). Cicero stayed five days

[CILICIA.]

(Κυδωνία, Κυδωνίς, Ptol. iv. 17. § 8:
Κυδωνιάτης, Κύδων, Κυδώνιος, Κυ-
νίς, Κυδωνιακός, Cydon, Cydoneus,
donites, Cydonius: *Khaniá*), one of
ent and important cities of Crete.
76.) Homer (*Od.* iii. 292, xix. 176)
Cydonians who dwelt about the river
n Strabo (p. 475) considers to be in-
owhere mentions a city Cydonia. The
gh differing among themselves, prove
in very ancient times. (Diod. v. 78;
§ 2; Schol. *ad Theocrit.* vii. 12;
lon. Rhod. iv. 1492; Flor. iii. 7. § 4.)
44, 59) assigns its foundation to the
established themselves there, and
ears' residence in it built the temple of
ell as those which still existed when
rote. The city, however, as is plain
nds, existed before the time of Poly-
adorned by the Samians. In the Peloponnesian War it was engaged in hostilities with the Gortynians, who were assisted by an Athenian squadron. (Thuc. ii. 35.) Cydonia, as Arnold (*l.c.*) remarks, would especially hate and be hated by the Athenians, as a considerable portion of its citizens were Aeginetan colonists. (Herod. iii. 59.) At a later period it formed an alliance with the Cnossians. (Polyb. iv. 55. § 4, xxxiii. 15. § 4.) After the termination of the Sacred War, Phalaecus, the Phocian general, attacked Cydonia, and was killed with most of his troops during the siege. (Diod. xvi. 61.) At one time she carried on hostilities single-handed against both Cnossus and Gortyna. (Liv. xxxvii. 40.) The first engagement between the Cretans, under Lasthenes and Panares, and the Roman legions, under Metellus, was fought in the Cydonian district. The Romans were victorious. Metellus was saluted imperator, and laid siege to Cydonia. (Appian, *Cret.* vi. 2; Liv. *Epit.* xcviii.)

Strabo (p. 479) describes Cydonia as situated on the sea and looking towards Laconia, at a distance of 800 stadia from both Cnossus and Gortyna. Scylax (*Geog. Graec. Min.* vol. i. p. 18) mentions Cydonia as having a harbour which could be closed (λιμὴν κλειστός); the port of *Khaniá* exactly answers to this description. This identity of physical features with the notices of several ancient writers (Ptol. *l. c.*; Plin. iv. 12. s. 20), coupled with the circumstance that maritime symbols are found on autonomous coins of Cydonia, has led Mr. Pashley (*Trav.* vol. i. p. 15) to fix the site in or near the modern *Khaniá*.

The quince-tree derived its name from the Cretan Cydonia, in the district of which city it was indigenous, and was thence transported into other countries. (Plin. xv. 11.) The fruit was called κοδύμαλον in the ancient Cretan dialect. [E. B. J.]

COIN OF CYDONIA.

CY'DRARA (Κύδραρα: *Eth.* Κυδραραῖος). Steph. B. (*s. v.* Κύδραρα) refers to the seventh book of Herodotus for the name of this place, and adds,—τὸ ἐθνικὸν Κυδραραῖος ὡς Μεγαραῖος. But this form Μεγαραῖος is doubtful. (See the note in Meinecke's ed. of Stephanus.) [CARURA.] [G. L.]

CYINDA. [ANAZARBUS.]

CYIZA (Κύιζα, Ptol. vi. 8. § 8; Marcian. p. 23; Arrian, *Hist. Indic.* c. 27), a small port on the coast of Carmania, in the country of the Icthyophagi, to which the fleet of Nearchus came, but at which they were not able to land owing to the heavy sea, which was running on the shore. It does not appear that the place can be identified with any existing town, unless the name has been preserved in *Khudar*, which is spoken of by Otter (*Travels*, vol. ii. p. 409; comp. Vincent, *Voy. of Nearchus*. vol. i. p. 257). [V.]

CYLIPENUS SINUS (Plin. iv. 27), the gulf near which the AESTUI were found; now the *Gulf of Riga*. [E. B. J.]

CYLLANDUS (Κύλλανδος: *Eth.* Κυλλανδεύς),

Digitized by Google

a city of Caria, mentioned by Hecataeus in his *Asia*. (Steph. B. *s. v.*) [G. L.]

CYLLE'NE (Κυλλήνη). 1. A lofty mountain in the north-eastern corner of Arcadia, upon the borders of Achaia. It was celebrated as the birthplace of Hermes, and as such is frequently mentioned by both the Greek and Roman poets. (Hom. *Hymn. Merc.* 2; Virg. *Aen.* viii. 138.) Hence Cyllenius occurs as a frequent epithet, and even as a name of Hermes or Mercury. (Hom. *Hymn. Merc.* 304, 318; Virg. *Aen.* iv. 252; Ov. *Met.* i. 713, ii. 720, et alibi.) In the same way we find the adjectives Cylleneus and Cyllenis applied to the lyre of Mercury, or to anything else belonging to this god. (Hor. *Epod.* xiii. 9; Ov. *Met.* v. 176, xi. 304.) There was a temple of Hermes upon the summit of the mountain, which in the time of Pausanias had fallen into ruins. The latter writer derives the name of the mountain from Cyllen, the son of Elatus. (Paus. viii. 17. § 1.)

Cyllene now bears the name of *Ziria*; its height, as determined by the officers of the French Commission, is 2374 mètres, or 7788 feet above the level of the sea. The ruins of the temple of Hermes are no longer found upon its summit. The ancients regarded it as the highest mountain in Peloponnesus; but in this they were mistaken, as one of the summits of Taygetus rises to the height of 7902 feet. According to Strabo, some made it 15, others 20 stadia in height (viii. p. 388); Apollodorus stated it to be 9 stadia, less 20 feet, in height; a measurement which evidently refers to its height above the level of the surrounding plains, and very nearly coincides with the measurement of the French Commission, who found it to be 1675 mètres above the level of the plain of Pheneos. (Eustath. *ad Hom.* p. 1951, 16; Steph. B. *s. v.* Κυλλήνη.) The summit of Cyllene was supposed to be so high above all winds and clouds, that the ashes of the victims sacrificed there to Hermes, remained undisturbed from one year's festival to another. (Geminus, *Elem. Astr.* i. 14; Olympiodor. *ap. Alex. Aphrod.* p. 6.)

Cyllene rests upon a broad, almost circular basis, and is separated from the surrounding mountains by deep ravines. Towards the north it sends out a projecting spur, called in ancient times CHELYDOREA (now *Marriòvo*), because Hermes was said to have found here the tortoise shell, which he converted into a lyre. (Paus. viii. 17. § 5.) On Cyllene white blackbirds were said to have been found. (Paus. viii. 17. § 3; Steph. B. *s. v.*) (Boblaye, *Recherches, &c.*, p. 154; Curtius, *Peloponnesos*, vol. i. pp. 17, 199.)

2. (*Eth.* Κυλλήνιος, Κυλληνεύς), the seaport town of Elis, distant 120 stadia from the latter city. (Paus. vi. 26. § 4; Strab. viii. p. 337.) Cyllene was an ancient place. It is mentioned by Homer as one of the towns of the Epeians (*Il.* xv. 518); and if we are to believe Dionysius Periegetes (347), it was the port from which the Pelasgians sailed to Italy. Pausanias, moreover, mentions it as visited at an early period by the merchants of Aegina (viii. 5. § 8), and as the port from which the exiled Messenians after the conclusion of the second Messenian war, sailed away to found a colony in Italy or Sicily (iv. 23. § 1, seq.).

Cyllene was burnt by the Corcyraeans in B. C. 435, because it had supplied ships to the Corinthians. (Thuc. i. 30.) It is again mentioned in 429, as the naval station of the Peloponnesian fleet, when Phormion commanded an Athenian squadron in the Corinthian gulf. (Thuc. ii. 84.) Its name occurs on other occasions, clearly showing that it was the principal port in this part of Peloponnesus (Thuc. vi. 89; Diod. xix. 66, 87; Polyb. v. 3; Liv. xxvii. 32.) Strabo describes Cyllene as an inconsiderable village, having an ivory statue of Asclepius by Colotes, a contemporary of Pheidias (Strab. viii. p. 337.) This statue is not mentioned by Pausanias, who speaks, however, of temples of Asclepius and Aphrodite (vi. 26. § 5).

Cyllene is usually identified with *Glarentza*, situated upon one of the capes of the promontory Chelonatas. This is the position assigned to it by Leake, whose authority we have followed elsewhere [CHELONATAS]; but there are strong reasons for doubting the correctness of this opinion. There are no ancient remains at *Glarentza*; and although this is at present the only port on this part of the coast, the outline of the latter has been so changed in the course of centuries, that little reliance can be placed upon this argument. Moreover, Cyllene is clearly distinguished from the promontory Chelonatas by the ancient writers. Strabo (viii. p. 338) says that the Peneius flows into the sea between the promontories Chelonatas and Cyllene; and that this is not an error in the text, as Leake supposes (*Morea*, vol. i. p. 7), appears from the order of the names in Ptolemy (iii. 15. §§ 5, 6), where we find the promontory Araxus, Cyllene, the mouths of the Peneius, the promontory Chelonitis. The river Peneius as it at present flows into the sea to the south of Chelonatas, but its ancient course was probably north of this promontory. [PENEIUS.] Accordingly we must perhaps place Cyllene about half way between Araxus and Chelonatas. This position not only agrees with the distance of 120 stadia from Elis mentioned by Strabo and Pausanias, but also with the distances in the Tab. Peuting., which reckon xiv. M. P. from Dyme to Cyllene, and also xiv. M. P. from Cyllene to Elis. Pliny (iv. 5. s. 6.) likewise separates the promontory Chelonatas from Cyllene. According to the present text of Pliny, the distance between them is v. M. P. (not ii. as in some editions); but instead of v. we ought probably to read xv. It appears from Pliny that the sea between the promontories of Araxus and Chelonatas was called the bay of Cyllene. (Curtius, *Peloponnesos*, vol. i. pp. 33, 102.)

CYME (Κύμη: *Eth.* Κυμαῖος), a city of Aeolis so called, according to a legend, from Cyme an Amazon; and the city was also called Amazonia. There was, according to Stephanus (*s. v.* Κύμη) another Cyme, which was called Phriconitis. Herodotus, however (i. 149), enumerating Cyme among the cities of Aeolis, calls it "Cyme which is above Phriconis." Temnus and Aegae, Aeolian cities, were situated in the hill country which lies above the territory of Cyme, and of Phocaea, and of Smyrna, along which the Hermus flows. It was north of the Hermus, as appears from Strabo (p. 622), who says that, after crossing the Hermus, the distance from Larissa to Cyme was 70 stadia, and from Cyme to Myrina was 40 stadia. The author of the Life of Homer also places Cyme north of the Hermus, and he quotes some lines which show that it was on an eminence, a spur or projection of a mountain range. Sardene. The coins of Cyme show that there was a stream near it called Xanthus. The site of the ancient city is generally supposed to be at a place called *Sanderli* or *Sandarlio*, on that part of the coast which is opposite to the southern extremity of

Digitized by Google

Lesbos. Whether this is the exact site or not, may be doubtful, but it is not far from it.

This is the story of the origin of Cyme. (Strab. p. 621.) The inhabitants of Phricium, a mountain above Thermopylae, landed on the spot where Cyme now is, says Strabo; they found the Pelasgi, who had suffered from the war of Troy, still in possession of Larissa. The new comers built Neon Teichos, 30 stadia from Larissa, and from this point annoyed the Pelasgi. Here Strabo's text begins to be corrupt, and it is useless to attempt to mend it; though one may guess what is meant. We learn, however, that Cyme was founded after Neon Teichos, and it was named Phriconis from the mountain in Locris. Strabo observes (p. 622) that Cyme was the largest and noblest of the Aeolian cities; and Cyme and Lesbos might be considered the parent cities of the other cities, which were about thirty in number, of which not a few had ceased to exist. Herodotus (i. 157) observes that the Aeolians and Ionians used to consult the oracle at Branchidae, and he tells a story about the Cymaeans consulting it when Pactyes the Lydian fled to them to escape punishment from the Persians. Cyme came under the Persians after the overthrow of the Lydian kingdom; and a tyrannus of Cyme, Aristagoras, was one of those who are represented by Herodotus as deliberating whether they should destroy the bridge over the Danube, and leave king Darius to perish on the north side of the river (iv. 137). When Aristagoras of Miletus stirred up the Ionians to revolt against Darius, Cyme joined the insurrection, and sent Aristagoras away without doing him any harm. But Cyme was soon recovered by the Persians (v. 38, 123). Sandoces, the governor of Cyme in the time of Xerxes, commanded fifteen ships in the great expedition against Greece (B. C. 480). He seems to have been a Greek. (Herod. vii. 194.) The remnant of the fleet of Xerxes which escaped from Salamis wintered at Cyme. (Herod. viii. 130.) The history of Cyme is very barren, notwithstanding what Strabo says of its greatness. The place is hardly more than mentioned in the history of Thucydides (iii. 31, viii. 31, 100).

After the conclusion of the war of the Romans against Antiochus, Cyme, like Colophon [COLOPHON], obtained freedom from taxation. (Polyb. xxii. 27; Liv. xxxviii. 39.) It was afterwards included in the Roman province of Asia. It was one of the cities of Asia that was damaged by the great earthquake in the time of Tiberius. (Tacit. *Ann.* ii. 47.) Pliny (v. 30) mentions Cyme in his list of Aeolian cities; and Ptolemy (v. 2). Under the Byzantine empire it was a bishop's see.

Cyme was the birthplace of the historian Ephorus; and Hesiod's father, according to the poet (*Op. et D.* 636), sailed from Cyme to settle at Ascra in Boeotia; which does not prove, as such compilers as Stephanus and Suidas suppose, that Hesiod was a native of Cyme. Strabo (p. 622) gives a reason for the alleged stupidity of the Cymaei, which is not worth the trouble of transcribing. [G. L.]

COIN OF CYME.

CYMINE. [CTIMENE.]

CYNAETHA (ἡ Κύναθα: *Eth.* Κυναθεύς, Κυναθαιεύς, Polyb.; Κυναθαεύς, Paus.: *Kalávryta*), a town in the north of Arcadia, situated upon the northern slope of the Arcanian mountains, which divided its territory from those of Cleitor and Pheneus. The inhabitants of Cynaetha were the only Arcadians who lived beyond the natural boundaries of Arcadia. Their valley sloped down towards the Corinthian gulf; and the river which flowed through it, fell into the Corinthian gulf a little to the east of Bura: this river was called in ancient times Erasinus or Buraicus, now river of *Kalávryta*. (Strab. viii. p. 371; Paus. vii. 24. § 5.) The climate and situation of Cynaetha are described by Polybius as the most disagreeable in all Arcadia. The same author observes that the character of the Cynaethians presented a striking contrast to that of the other Arcadians, being a wicked and cruel race, and so much disliked by the rest of their countrymen, that the latter would scarcely hold any intercourse with them. He attributes their depravity to their neglect of music, which had tended to humanize the other Arcadians, and to counteract the natural rudeness engendered by their climate. Accordingly, he regarded the terrible misfortune which overtook the Cynaethians in the Social war, when their city was destroyed by the Aetolians, as a righteous punishment for their wickedness. (Polyb. iv. 18—21.) Although Strabo (viii. p. 388) mentions Cynaetha as one of the Arcadian towns no longer existing in his time, it must have been restored at some period after its destruction by the Aetolians, as it was visited by Pausanias, who noticed in the agora altars of the gods and a statue of the emperor Hadrian. At the distance of two stadia from the town was a fountain of cold water, called Alyssus, because it was said to cure hydrophobia. (Paus. viii. 19.) There can be no doubt that the modern village of *Kalávryta* occupies the site of Cynaetha, although it contains scarcely any traces of the ancient city. (Leake, *Morea*, vol. ii. p. 109, vol. iii. pp. 129, 179; Boblaye, *Recherches*, &c. p. 157; Curtius, *Peloponnesos*, p. 382, seq.)

CYNAMOLGI (Κυναμολγοί, Diod. iii. 31), a barbarous tribe in the south of Aethiopia, of whom the most probable account that can be given is that they were a race of herdsmen who guarded their cattle by a breed of fierce dogs. Pliny (*N. H.* vi. 35) confounds them with the Cynocephali or race of apes with the heads of dogs. [W. B. D.]

CYNE (Κύνη: *Eth.* Κυνεύς, Κύνιος), a city of Lydia, mentioned by Hecataeus in his *Asia*. (Steph. B. *s. v.*) [G. L.]

CYNETICUM LITTUS, in Gallia Narbonensis. Festus Avienus (v. 565—570) places the "sands of the Cynetic shore" after the "Pyrenaeum jugum," which is about *Collioure*. The Cynetic littus is the coast of Gallia Narbonensis from the mouth of the *Teck* to the mouth of the *Tet*, near which is a small place called *Canet*. This is shown clearly by the line of Avienus, which speaks of the Roschinus river cutting through the sands of this coast. This Roschinus is the Ruscino of Strabo (p. 182) and Ptolemy (ii. 10), and the Telis of Mela (ii. 5), in the ordinary texts; but Telis should probably be Tetis. [G. L.]

CYNIA LACUS. [AETOLIA, p. 64, a.]

CYNOPOLIS (Κυνῶν πόλις, Steph. B. *s. v.*;

Digitized by Google

Ptol. iv. 5. § 59: *Eth.* Κυνοπολίτης), a town in the Cynopolite nome of the Heptanomis, lat. 28° 2′ N. The dog-headed deity Anubis was here worshipped. (Strab. xvii. p. 812.) It is probably the Canum of Pliny (*N. H.* v. 11). Cynopolis is the modern *Samallus*. There was in the Delta also a town of this name, and with the same local deity. (Strab. xvii. p. 802; Plut. *de Is. et Osir.* c. 72.) [W. B. D.]

CYNOSARGES. [ATHENAE, p. 303, b.]

CYNOSCE'PHALAE (Κυνὸς κεφαλαί), the names of two ranges of hills, so called from their supposed resemblance to the heads of dogs. 1. In Thessaly, a little to the south of Scotussa, in whose territory they were situated. They are described by Polybius (xviii. 5) as rugged, broken, and of considerable height; and are memorable as the scene of two battles: one fought, in B. C. 364, between the Thebans and Alexander of Pherae, in which Pelopidas was slain; and the other, of still greater celebrity, fought in B. C. 197, in which the last Philip of Macedon was defeated by the Roman consul Flaminius. (Plut. *Pelop.* 32; Strab. ix. p. 441; Polyb. xviii. 3, seq.; Liv. xxxiii. 6, seq.; Plut. *Flamin.* 8; Leake, *Northern Greece*, vol. iv. p. 459, seq.)

2. Hills between Thebes and Thespiae. (Xen. *Hell.* v. 4. § 15, *Agesil.* ii. 22.) Near them, or on them, was a village of the same name, which is mentioned by the biographers of Pindar as the birthplace of the poet. (Steph. B. *s. v.* Κυνὸς κεφαλαί.)

CYNOSSE'MA (Κυνὸς σῆμα, or Κυνόσσημα), that is, the Dog's Tomb, a promontory on the eastern coast of the Thracian Chersonesus, near the town of Madytus; it was believed to have derived its name from the fact that Hecuba, who had been metamorphosed into a dog, was buried there. (Eurip. *Hec.* 1275; Thucyd. viii. 102; Strab. p. 595; Plin. iv. 18; Mela, ii. 2; Ov. *Met.* xiii. 569.) [L. S.]

CYNOSSE'MA (Κυνὸς σῆμα). "After Lorymа," says Strabo (p. 656), "is the Cynos-sema, and the island Syme; then Cnidus, &c." The Cynossema is a point on the SW. coast of Caria, opposite to the island of Syme, and it is now called *Cape Volpo*. (Hamilton, *Researches*, &c. vol. ii. p. 71.) Ptolemy does not mention Cynossema, but he has a cape Onugnathos about this part of Caria, which may be the same as Cynossema. [CARIA, p. 519.] Stephanus (*s. v.* Κυνὸς σῆμα) gives an ethnic name Κυνοσσηματεύς. [G. L.]

CYNOSU'RA (Κυνόσουρα), *i. e.* "Dog's Tail." 1. A promontory of Attica. [MARATHON.]

2. A promontory in the west of Salamis, opposite the island of Psyttaleia. (Herod. viii. 76.)

3. A quarter of Sparta. [SPARTA.]

CYNTHUS. [DELOS.]

CYNU'RIA (ἡ Κυνουρία, Thuc. iv. 56, v. 41; ἡ Κυνουριακή, Paus. iii. 2. § 2: *Eth.* Κυνούριος, Κυνουρεύς), a district on the eastern coast of Peloponnesus, between the Argeia and Laconia, so called from the Cynurians, one of the most ancient tribes in the peninsula. Herodotus (viii. 73) regards them as Autochthones, but at the same time calls them Ionians. There can be little doubt, however, that they were Pelasgians; but in consequence of their maritime position, they were regarded as a different race from the Arcadian Pelasgians, and came to be looked upon as Ionians, which was the case with the Pelasgians dwelling upon the coast of the Corinthian gulf, in the district afterwards called Achaia. They were a semi-barbarous and predatory tribe, dwelling chiefly in the eastern slopes of Mount Parnon; but their exact boundaries cannot be defined, as they were only a tribe, and never formed a political body. At a later time they were almost confined to the Thyreatis, or district of Thyrea. (See below.) Originally they extended much further south. Upon the conquest of Peloponnesus by the Dorians, the Cynurians were subdued by the Argeians, whose territory at one time extended along the eastern coast of Peloponnesus down to Cape Malea. (Herod. i. 82.) The Cynurians were now reduced to the condition of Argive Perioeci. (Herod. viii. 73.) They continued the subjects of Argos for some time; but as Sparta rose in power, she endeavoured to increase her territory at the expense of Argos; and Cynuria, but more especially the fertile district of the Thyreatis, was a frequent subject of contention between the two states, and was in possession sometimes of the one, and sometimes of the other power. As early as the reign of Echestratus, the son of Agis, who is placed about B. C. 1000, the Spartans are said to have gained possession of Cynuria (Paus. iii. 2. § 2), but they were driven out of it subsequently, and it continued in the hands of the Argives till about B. C. 547, when the celebrated battle was fought between the 300 champions from either nation. (Herod. i. 82: for details see *Dict. of Biogr.* art. *Othryades*.) But the great victory of Cleomenes over the Argives near Tiryns, shortly before the Persian wars, was the event which secured to the Spartans undisputed possession of Cynuria for a long time. When the Aeginetans were expelled from their own island by the Athenians, at the commencement of the Peloponnesian war (B. C. 431), the Spartans allowed them to settle in the Thyreatis, which at that time contained two towns, Thyrea and Anthene or Athene, both of which were made over to the fugitives. (Thuc. ii. 27; comp. v. 41.) Here they maintained themselves till the 8th year of the Peloponnesian war, when the Athenians made a descent upon the coast of the Thyreatis, where they found the Aeginetans engaged in building a fortress upon the sea. This was forthwith abandoned by the latter, who took refuge in the upper city (ἡ ἄνω πόλις) at the distance of 10 stadia from the sea; but the Athenians followed them, took Thyrea, which they destroyed, and dragged away the inhabitants into slavery. (Thuc. iv. 56, 57.) Philip, the father of Alexander the Great, gave back the Thyreatis to the Argives, and extended their territory along the coast as far as Glympeis and Zarax. (Manso, *Sparta*, vol. iii. pt. i. p. 245; comp. Polyb. iv. 36. § 5, v. 20. § 4.) It continued to belong to the Argives in the time of Pausanias (ii. 38 § 5); but even then the ancient boundary quarrels between the Argives and Spartans still continued (Paus. viii. 11. § 1).

The THYREATIS (Θυρεᾶτις), or territory of Thyrea (Θυρέα, also Θυρέαι), which is the only district that can be safely assigned to Cynuria, is one of the most fertile plains in the Peloponnesus. It extends about 6 miles in length along the coast, south of the pass Anigraea and the mountain *Zavitza*. Its breadth is narrow, as the projecting spurs of Mount Parnon are never more than 3 miles, and sometimes only about a mile from the coast. It is watered by two streams; one on its northern, and the other on its southern extremity. The former called TANUS, or TANAUS (Τάνος, Paus. ii. 38. § 7; Τάνους, Eurip. *Electr.* 413), now the river of *Ludo*, rises in the summits of Mt. Parnon near *St. Peter*, and falls into the sea, at present north of *Astros*, but till recently south of the latter place. It formed the boundary

Digitized by Google

between the Argeia and Laconia in the time of Euripides, who accordingly represents (*l. c.*) it as the boundary between the two states in the heroic age. The stream, which waters the southern extremity of the plain, is smaller than the Tanos; it also rises in Mt. Parnon, and falls into the sea near *St. Andrew*. It is now sometimes called the river of *Kami*, from one of the summits of Parnon; sometimes, the river of *St. Andrew*: it appears in ancient times to have borne the name of Charadrus, which is described by Statius (*Theb.* iv. 46), as flowing in a long valley near Neris. Between these two rivers, at the narrowest part of the plain, is a salt marsh called *Mucia*, formed by some salt-springs rising at the foot of the calcareous mountains. The bay between the two rivers was called the Thyreatic gulf (ὁ Θυρεάτης κόλπος, Paus. ii. 38. § 7).

Besides Thyrea and Anthena or Athena, mentioned by Thucydides, two other place in the Thyreatis are noticed by Pausanias (ii. 38. § 5, seq.), namely, Neris (Νηρίς) and Eva (Εὔα). Pausanias entered the Thyreatis by the pass of the Anigraea; and after following the road along the coast, turned towards into the interior, and came to Thyrea (ἔστι δὲ ἐς τὰς πύλας τὰς ἔπειτα Θυρέα χωρίον ἐστίν), where he saw the sepulchres of the 300 Argive, and 300 Spartan champions. On leaving these, he came first to Anthena, next to Neris, and lastly to Eva, which he describes as the largest of the three villages, containing a sanctuary of Polemocrates, son of Machaon, who was honoured here as a god or hero of the healing art. Above these villages was the range of Mt. Parnon, where, not far from the sources of the Tanaus, the boundaries of the Lacedaemonians, Argives, and Tegeatae joined, and were marked by stone Hermae.

Neris is also mentioned by Statius (*Theb.* iv. 46), who describes it as situated in a long valley:

"Quaeque pavet longa spumantem valle Charadrum
Neris."

Eva, in the Thyreatis, is probably also meant by Stephanus B., though he calls it a city of Arcadia. The identification of these places has given rise to much dispute, and cannot be satisfactorily determined: for although there are several ancient remains in the Thyreatis, no inscriptions have been found, containing the names of places, and none of the ruins are in such positions as at once to identify them with the ancient towns. There are two roads into the Thyreatis; one along the coast leading from the pass of the Anigraea, and the other across the mountains. Upon the coast-road we find ancient remains at three places. (1.) *Astros* is now the chief place in the district, where persons land coming from Nauplia by sea. The present town, however, is of recent date, having been built during the war of Independence, and has become of importance in consequence of the second national assembly of the Greeks having met here in 1823. It is situated on the southern side of a promontory, which projects some distance into the sea, about 10 minutes south of the mouth of the Tanaus. Although the town is of modern origin, it is supposed that the place has retained its name from antiquity, and that it is the Astrum (Ἄστρον) of Ptolemy, in whose list it appears as the frontier town of Argolis, between the Lacedaemonian Prasiae and the mouths of the Inachus. (Ptol. iii. 16. § 11.) On the land side of the promontory towards the river, are considerable remains of an ancient wall, built of large unhewn blocks of stone, the interstices between which are filled up with smaller stones, like the well known walls of Tiryns. On the other sides of the hill there are no traces of walls, nor are there any other remains of an ancient town. (2.) About half an hour S. of Astros, to the right hand of the road, there were formerly Hellenic remains, which have now entirely disappeared. (3.) Further south, at *St. Andrew*, on the coast, and immediately south of the river of *Kami*, at the very edge of the plain, are the remains of an ancient town. The foundations of the walls, about 9 feet in breadth, may still be traced, as well as the foundations of towers. Within the walls the highest point, on which the church of St. Andrew now stands, was the acropolis.

Upon the road across the mountains there are likewise remains of three ancient places. (1.) In crossing Mount *Závitza*, we find upon the descent on the southern side the ruins of a fortress, which commanded the road from the Argeia to the Thyreatis. (2.) Further on, at the foot of *Závitza*, close to the river Tanus and the monastery of *Luku*, considerable remains of ancient art have been discovered. The Museum of Athens possesses a fine Caryatid figure, and two striking bas-reliefs, brought from this place. The ancient remains at *Luku* are far more considerable than any other which have been discovered in the Thyreatis. (3.) From the monastery of *Luku* the road goes towards Mt. Parnon, over the heights which extend between the two rivers of the Thyreatis. To the left of this road are the ruins of an ancient fortress, situated upon a lofty rock, and known in the country by the name of *Hellenikó*.

The great difficulty is to identify Thyrea with any of these sites. Leake and Ross suppose that the wall at *Astros* is the one commenced by the Aeginetans, in the eighth year of the Peloponnesian war, and which they were prevented from finishing by the arrival of the Athenians. They further believe that the ruins at *Luku* are those of Thyrea; though, instead of being only 10 stadia from the sea, as Thucydides states, they are more than three times that distance. Curtius, on the other hand, thinks that the remains at *St. Andrew* represent Thyrea, and that Pausanias came to this point before he turned into the interior. He observes that the wall at *Astros* belongs to a much more ancient period than the time of the Peloponnesian war, and that the remains at *Luku* do not exhibit traces of a town, and are more characteristic of a Roman villa than of an Hellenic city. But to the hypothesis of Curtius the words of Thucydides and Pausanias seem fatal,—the former describing Thyrea as the upper city at the distance of 10 stadia from the sea; and the latter, as situated in the interior of the country. Supposing *Luku* to represent Thyrea, the ruins at *St. Andrew* must be those of a city not mentioned by any ancient writer. It is evident from the route of Pausanias, that they cannot represent either Anthena, Neris, or Eva. Leake, indeed, supposes them to be those of the Lacedaemonian Brasiae or Prasiae, chiefly on the ground of the order of names in Ptolemy; but the city at *St. Andrew*, being in the plain of the Thyreatis, must clearly have belonged to the latter district; and Prasiae ought probably to be placed further south at *Tyrú*. [PRASIAE.]

The position of Thyrea being so uncertain, it would be useless to endeavour to fix the site of the other ancient places in the Thyreatis.

On the heights of Mt. Parnon, in the north-eastern extremity of the ancient Laconia, is a district now

Digitized by Google

called *Tzakonia*, the inhabitants of which speak a peculiar dialect, which more closely resembles the ancient Greek than any of the other dialects spoken in modern Greece. Their principal town is *Kustanitza*. Their name is evidently a corruption of Laconia; but Thiersch conjectures with some probability, that they are the descendants of the ancient Cynurians, and have retained with the tenacity of mountaineers the language of their forefathers. A full account of the Tzakonic dialect has been given by Thiersch (*Abhandlung. der Bayr. Akad.* vol. i. p. 511, seq.), an abstract of which will be found in Leake's *Peloponnesiaca* (p. 304, seq.).

(For an account of Cynuria in general see Leake, *Morea*, vol. ii. p. 482, seq., *Peloponnesiaca*, p. 294, seq.; Boblaye, *Recherches*, p. 65, seq.; Ross, *Reisen im Peloponnes*, p. 158, seq.; Curtius, *Peloponnesos*, vol. ii. p. 373, seq.)

CYNU'RIA, a district in Arcadia mentioned only upon the occasion of the foundation of Megalopolis, was situated north of Phigalice and Parrhasia. We may infer from the name that these Cynurians were the same as the Cynurians on the east coast, but we have no account of any historical connection between them. (Paus. viii. 27. § 4; Curtius, *Peloponnesos*, vol. i. p. 164.)

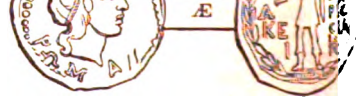
CYNUS (Κῦνος: *Eth.* Κύνιος, Κυναῖος), the principal sea-port of the Locri Opuntii, was situated on a cape at the northern extremity of the Opuntian gulf, opposite Aedepsus in Euboea, and at the distance of 60 stadia from Opus. (Strab. ix. p. 425; Paus. x. 1. § 2.) Livy gives an incorrect idea of the position of Cynus, when he describes it as situated on the coast, at the distance of a mile from Opus. (Liv. xxviii. 6.) Cynus was an ancient town, being mentioned in the Homeric catalogue (*Il.* ii. 531), and reported to have been the residence of Deucalion and Pyrrha; the tomb of the latter was shown there. (Strab. *l. c.*) Its site is marked by a tower, called *Paleópyrgo*, and some Hellenic remains, about a mile to the south of the village of *Livanátes* (Comp. Strab. i. p. 60, ix. p. 446, xiii. p. 615; Mela, ii. 3; Plin. iv. 7. s. 12; Ptol. iii. 15. § 10; Steph. B. *s. v.*). (Leake, *Northern Greece*, vol. ii. p. 174, seq.)

CYON (Κύον: *Eth.* Κυΐτης), a city of Caria. Stephanus (*s. v.*) cites the Carica of Apollonius, and adds that it was once called Canebium. Cramer (*Asia Minor*, vol. ii. p. 216) observes that there are autonomous coins of Cyon, with the epigraph Κυ. Κυι. Κυιτων. [G. L.]

CYPAERA (Κύπαιρα, Ptol. iii. 13. § 45), or CYPHARA (Liv. xxxii. 13), for these names apparently indicate the same place, was a town of Thessaly, in the southern part of the district Thessaliotis, near the confines of Dolopia.

CYPARI'SSIA. 1. (Κυπαρισσία, Strab. viii. pp. 349, 359; Steph. B. *s. v.*; Liv. xxxii. 21; Plin. iv. 5. s. 7; Κυπαρισσήεις, Hom. *Il.* ii. 593; Κυπαρισσιαί, Paus. iv. 36. § 7; Κυπάρισσαι, Ptol. iii. 16. § 7; Κυπάρισσος, Scylax, p. 16; Mela, ii. 3: *Eth.* Κυπαρισσιεύς, Strab. viii. p. 345; Paus. *l. c.*; Stephanus alone has the form Κυπαρισσεύς), a town on the western coast of Messenia, situated a little south of the river Cyparissus, upon the bay to which it gave the name of the Cyparissian gulf. (Plin. Mela, *ll. cc.*) This gulf was 72 miles in circuit according to Pliny, and was bounded by the promontory of Ichthys on the north, and by that of Cyparissium on the south. Cyparissia was the only town of importance upon the western coast of Messenia between Pylus and Triphylia. It is mentioned in the Homeric catalogue (*Il. l. c.*), and appears to have been inhabited from the earliest to the latest times. It was beautifully situated upon the sides of one of the offshoots of the range of mountains, which run along this part of the Messenian coast. Upon the narrow summit of the rock now occupied by a castle built in the middle ages, stood the ancient acropolis. There is no harbour upon the Messenian coast north of Pylos; but Leake remarks that the roadstead at Cyparissia seems to be the best on this part of the coast; and in ancient times the town probably possessed an artificial harbour, since traces of a mole may still be seen upon the sea-shore. This was probably constructed at the restoration of Messene by Epaminondas; for it was necessary to provide the capital of the new state with a port, and no spot was so suitable for this object as Cyparissia. Hence we find "Messene and the harbour Cyparissia" mentioned together by Scylax (p. 16). Pausanias found in the town a temple of Apollo, and one of Athena Cyparissia. The town continued to coin money down to the time of Severus. In the middle ages it was called *Arkadia*, a name which was transferred from the interior of the peninsula to this place upon the coast. It continued to bear this name till its destruction by Ibrahim in 1825, and when rebuilt it resumed its ancient name Cyparissia, by which it is now called. Some remains of ancient walls may be traced around the modern castle; and below the castle on the slope of the hill, near the church of St. George, are some fragments of columns. On the south side of the town, close to the sea-shore, a fine stream rushes out of the rock and flows into the sea; and a little above is a basin with a spring of water, near which are some stones belonging to an ancient structure. This is the ancient fountain sacred to Dionysus, which Pausanias perceived near the entrance of the city, on the road from Pylus.

Stephanus calls Cyparissia a city of Triphylia, and Strabo (viii. p. 349) also distinguishes between the Triphylian and Messenian Cyparissia, but on what authority we do not know. (Leake, *Morea*, vol. i. p. 68, seq.; Boblaye, *Recherches*, &c., p. 115; Curtius, *Peloponnesos*, vol. ii. p. 184, seq.)



COIN OF CYPARISSIA.

2. In Laconia. [Asopus, No. 5.]

CYPARI'SSIUM. [Cyparissia.]

CYPARI'SSIUS SINUS. [Cyparissia.]

CYPARISSUS. 1. (Κυπάρισσος: *Eth.* Κυπαρισσεύς), an ancient town of Phocis, in the vicinity of Delphi. It is mentioned in the Homeric catalogue (*Il.* ii. 519) along with Pytho (Delphi) and is described by Dicaearchus (80) as situated in the interior of Phocis. It is placed by Strabo below Lycoreia, which was situated on one of the heights of Parnassus (ix. p. 423), which position is more probable than the one assigned to it by Pausanias, who supposes Cyparissus to be the ancient name of the place afterwards called Anticyra (x. 36. § 5). Cyparissus is also mentioned by Statius (*Theb.* vi.

Digitized by Google

144) and Stephanus (*s. v.*). If we follow the authority of Strabo respecting the position of Cypa-rissus, its site is perhaps indicated by the walls of an Hellenic town, at the southern foot of the mountain, midway between the Schiste and Delphi. (Leake, vol. ii. p. 579.)

2. A river of Messenia. [CYPARISSIA.]

CYPASIS (Κύπασις), a commercial town in Thrace, on the east of the Hebrus, on the Bay of Melas. (Scylax, p. 27; Steph. Byz. *s. v.*) [L. S.]

CYPHANTA (τὰ Κύφαντα), a town on the eastern coast of Laconia, belonging to the Eleutherolacones. It was in ruins in the time of Pausanias, but from the notice of it in other writers, it was evidently at one period a place of some importance. (Paus. iii. 24. § 2; Polyb. iv. 36; Plin. iv. 5. s. 9; Ptol. iii. 16. §§ 10, 22.) Pausanias describes it as situated 6 stadia from Zarax, and 10 stadia inland; and Ptolemy speaks separately of the port-town and city. Pausanias adds that Cyphanta contained a temple of Asclepius, called Stethaeum, and a fountain issuing from a rock, said to have been produced by a blow of the lance of Atalante. The numbers in Pausanias, however, cannot be correct. At the distance of 6 stadia from Zarax (*Hieraka*), there is no site for a town or a harbour; and it is scarcely conceivable that, on this rocky and little-frequented coast, there would be two towns so close to one another. Moreover Pausanias says that the distance from Prasiae to Cyphanta is 200 stadia; whereas the real distance from Prasiae (*Tyro*) to Zarax (*Hieraka*) is more than 300 stadia. In addition to this Ptolemy places Cyphanta considerably further north than Zarax; and it is not till reaching *Cyparissi* that there is any place with a harbour and a fountain. Accordingly, we may here place Cyphanta, changing with Boblaye the very improbable number in Pausanias ἓξ που στάδια, into twelve stadia. *Cyparissi* is as nearly as possible 100 stadia from *Hieraka*, and 200 stadia from Tyro.

In his *Morea*, Leake placed Cyphanta at *Cyparissi*; but in his *Peloponnesiaca*, he supposes its site to have been further north at *Lenídhi*. If we are right in identifying Prasiae with *Tyro*, this position for Cyphanta would be at once inadmissible; but Leake, we think erroneously, places Prasiae also further north, at *St. Andrew* in the Cynuria. [CYNURIA; PRASIAE.] (Leake, *Morea*, vol. ii. p. 500, seq., *Peloponnesiaca*, p. 301; Boblaye, *Recherches*, p. 101; Curtius, *Peloponnesos*, vol. ii. p. 305.)

CYPHARA. [CYPAERA.]

CYPHUS (Κύφος: *Eth.* Κυφαῖος), a town of Perrhaebia in Thessaly, which supplied 22 ships for the Trojan war. It is placed by Strabo at the foot of Mt. Olympus. (Hom. *Il.* ii. 748; Strab. ix. p. 441; Lycophr. 897.) According to Stephanus (*s. v.*) there were two cities of the name of Cyphus, one mentioned by Homer, and the other by Lycophron; but in this he appears to have been mistaken. (Hemsterh. *ad Aristoph. Plut.* p. 116.)

CYPRUS (Κύπρος: *Eth.* and *Adj.* Κύπριος, Κυπρισσεύς, Κυπρεύς, Κυπρίτης, Cyprius, Cypriacus: Κύπρις), an island lying off the coast of Phoenicia and Cilicia.

The physical features and the legends connected with this chosen seat of Aphrodite, have given rise to a multitude of names. 1. Acamantis (Ἀκαμαντίς). 2. Amathusia (Ἀμαθουσία). 3. Aspelia. 4. Celinia. 5. Cerastis (Κεραστίς). 6. Cryptos (Κρυπτός). 7. Macaria (Μακαρία). 8. Meliönis (Μηλιονίς). 9. Ophiusa (Ophiusia arva, Ov. *Met* x. 229). 10. Spheceia (Σφηκεία).

According to ancient admeasurements the circuit of this island amounted to 3420 stadia. (Strab. xiv. p. 682.) Its greatest length from W. to E., between Cape Acamas and the islands called the Keys of Cyprus (Κλεῖδες), was reckoned at 1400 stadia. (Strab. *l. c.*; Plin. v. 35; Agathem. i. 5.) The principal or SW. part of the island has the form of an irregular parallelogram, and terminates with a long narrow peninsula, running in a NE. direction. Its shape was compared fancifully by the old writers to a fleece (Agathem. *l. c.*), or to a Gallic shield (Hygin. *Fab.* 276). The surface of the country is almost entirely occupied by the elevated range of Mt. Olympus, whose culminating points reach the height of 7000 feet. The slopes descend both on the N. and S. shores: on the former side the chain is bold and rugged; on the S. side the scenery is still bolder, presenting a deeply serrated outline with thickly wooded steeps, which are broken by masses of limestone, or furrowed by deep picturesque valleys, in which grow the narcissus, the anemone, and ranunculus.

The mountains contained copper (χαλκὸς Κύπριος, aes Cyprium), the most famous mines of which were to be found at Tamassus, Amathus, Soli, and Curion (Plin. xii. 60, xxxiv. 20), as well as the nobler metals, gold and silver. The precious stones of Cyprus were famous in antiquity. They were: the "adamas vergens in aerium colorem" (Plin. xxxvii. 15),—whether this was the diamond seems doubtful, as it has been thought that Pliny was unacquainted with the real diamond (Dana, *Mineralogy*, p. 401); —the "smaragdos" (xxxvii. 17), emerald; the "chalcosmaragdos turbida aereis venis" (xxxvii. 19), malachite (?), or more probably red jasper; "paederos" (xxxvii. 22), opal; "achates" (xxxvii. 54), agate; and asbestos (Dioscor. v. 156). The land is described as flowing with wine, oil (Strab. p. 684), and honey (Plin. xi. 14); and the fragrance of its flowers gave it the epithet of εὐώδης—the plaything (ἄθυρμα) of the goddess of Love. (Eustath. *ad Dionys. Per.* 508.)

Cyprus lies between Asia and Africa, and the flora and fauna of the island partake of the characteristics of both continents. A list of the plants, birds, quadrupeds, and fishes, found in Cyprus, is given in Walpole (*Turkey and Greece*, vol. i. p. 253, foll.). The Ferula Graeca—or νάρθηξ, as it is now called, with a slight alteration from the ancient name—is one of the most important plants of the island in respect to its economical uses. The stalks furnish the poor Cyprian with a great part of his household furniture; and the pith is used instead of tinder for conveying fire from one place to another, as taught by Prometheus of old. (Aesch. *Prom.* 109.)

The level tracts were in the neighbourhood of Salamis and Citium, the former was watered by the river Pediaeus, and the latter by the Tretus; but, as these streams are occasionally dry, marshes have in consequence been formed. Strabo (xiv. p. 682) begins his description of the island with Cape Acamas (Ἀκαμας), at the W. extremity of the island, which he describes as a thickly wooded headland, divided into two summits rising towards the N. (Comp. Ptol. v. 14 § 1; Plin. v. 31; *Stadiasm.* §§ 282, 292, 293.) The modern name, after the celebrated metropolitan of Cyprus, is *Haghios Epiphanios*, which is shortened into *St. Pifano*. The next point, in a S. direction, is Drepanon (Δρέπανον, Ptol.

v. 14. § 1: *Trepano*). Then the roadstead and harbour of Paphos (Πάφος). The cape which closes the bay of *Baffo* to the W. is the Zephyrium Promontorium (Ζεφύριον, Ptol. v. 14. § 1; Ζεφυρία ἄκρα, Strab. p. 683). To the S. is another headland, Arsinoë (Ἀρσινόη), followed by Phrurium (Φρούριον, Ptol. v. 14. § 1: *Capo Blanco*). At a little distance further inland was Hierocepia (Ἱεροκηπία, Strab. p. 684). Then follow Palaepaphos (Παλαίπαφος: *Kukla* or *Konuklia*), Boosura (Βοόσουρα: *Bisur*), Treta (Τρήτα: *Tera*), and Curium (Κούριον) with a port built by the Argives. Near this was the point of Curias (Κουρίας: *Capo delle Gatte*), at a little distance from which are some salt marshes which receive an arm of the river Lycus (Λῦκος, Ptol. v. 14. § 2). Amathus (Ἀμαθοῦς: *Old Limasol*), which next followed, was a Phoenician colony. Beyond was the little town of Palaea (Πάλαια, Strab. p. 683), at the foot of a mountain shaped like a breast (μαστοειδές), Olympus (Ὄλυμπος: *Monte Sta. Croce*). Citium (Κίτιον) was a large town with a harbour that could be closed; to the W. of it was the little river Tetius (Τέτιος, Ptol. v. 14. § 2: *Tesis*), and to the E. the promontory Dades (Δάδες, Ptol. *l. c.*: *Kiti*). A rugged line of coast follows for several miles along a bay which lies between this headland and that of Throni (Θρόνοι: *Pila*). Above Pedalium (Πηδάλιον: *Capo della Grega*), the next point on the E. coast, rose a hill with a temple consecrated to Aphrodite. The harbour Leucolla (Λεύκολλα: *Porta Arnio dia e Lucola*). Ammochostus (Ἀμμόχωστος, Ptol. v. 14. § 3; *Stadiasm.* § 287), near the river Pediaeus (Πεδιαῖος), a name which has been transmitted by corruption to the Venetian *Famagosta*. Further N. was Salamis (Σαλαμίς), Elaea (Ἐλαία, Ptol. *l. c.*: *Chaulu-bernau*), Urania (Οὐρανίης πέδον ἔδρης, Nonn. *Dionys.* xiii. 450), Carpasia (Καρπασία), and the promontory called Dinaretum, with the islands called the Keys of Cyprus (αἱ Κλεῖδες). The iron-bound shore to the NE. was called the shore of the Greeks (Ἀχαιῶν ἀκτή: *Jalousa*), from the story that Teucer and his colonists had landed here. (Strab. p. 682.) On this coast, 70 stadia from Salamis, was Aphrodisium (Ἀφροδίσιον, Ptol. v. 14. § 4; Strab. p. 682), Macaria (Μακαρία, Ptol. *l. c.*), Cerynia (Κερύνεια), and Lapethus (Λάπηθος: *Lapitho* or *Lapta*). Cape Crommyon (Κρομμύων ἄκρα) was the most N. point of the island; near this were the towns of Cerbia (Κερβεία) and Soli (Σόλοι). The promontory of Callinusa (Καλλίνουσα) completes the circuit of the island. In the interior were the towns of Aepeia (Αἰπεῖα), Limenia (Λιμενία), Tamassus (Ταμασσός), Tremithus (Τρεμιθοῦς), Leucosia (Λευκωσία), Chytrus (Χύτρος), and Marium (Μάριον). An account of these places will be found under their several heads: most of the towns have now disappeared.

Cyprus seems to have been colonized by the Phoenicians at a very early period, and if we may trust the Syrian annals consulted by the historian Menander (Joseph. *Ant.* viii. 5. § 3, *c. Apion.* 1. 18; comp. Virg. *Aen.* 1, 643), was subject to the Syrians, even in the time of Solomon. We do not know the dates of the establishment of the Greek cities in this island; but there can be no doubt but that they were later than this period, and that a considerable portion of the soil and trade of Cyprus passed from the Phoenicians to the Greeks. Under Amasis the island became subject to the Aegyptian throne (Herod. ii. 182); he probably sent over African colonists. (Comp. Herod. vii. 90.) On the invasion of Aegypt by Cambyses Cyprus surrendered to the Persians, and furnished a squadron for the expedition. (Herod. iii. 19.) It continued to form a part of the Persian empire, and was with Phoenicia and Palestine the fifth satrapy in the arrangement made by Darius (Herod. iii. 91.) During the Ionian revolt the whole island, except Amathus, threw off the Persian yoke. The Cyprians were attacked by the Persians by land and sea, and after varying success, were defeated, and their leader Onesilus slain. After this the island was again subject to Darius (Herod. v. 104—116), and in the expedition of Xerxes furnished 150 ships. (Herod. vii. 90.) After the overthrow of the Persians at Salamis, a Grecian fleet was despatched to Cyprus and reduced the greater part of it. (Thuc. i. 94.) The Athenians sent out another expedition against it, but in consequence of a plague and the death of Cimon, the attempt was relinquished. (Thuc. i. 112.) The brilliant period of its history belongs to the times of Evagoras, king of Salamis, when Hellenic customs and civilization received a new impulse. He was succeeded by his son Nicocles; another Evagoras, son of Nicocles, was joined with Phocion, to recover Cyprus for the king of Persia, from whom it had revolted. (Diod. xvi. 42, 46.) Cyprus again became a tributary to the Persians, and remained such till the battle of Issus, when the several states declared for Alexander, and joined the Macedonian fleet with 120 ships at the siege of Tyre. (Arrian. ii. 20.) They were afterwards ordered to cruise off the Peloponnesus with 100 ships along with the Phoenicians. (Arrian. iii. 6.) When the empire of Alexander was broken up, Cyprus fell with Aegypt to the lot of Ptolemy. Demetrius invaded the island with a powerful fleet and army, defeated Ptolemy's brother Menelaus, and shut him up in Salamis, which he besieged both by sea and land. Ptolemy hastened to his relief with 140 ships; and after a sea-fight—one of the most memorable in ancient history, B. C. 306,—the whole island fell into the hands of Demetrius. (Diod. xx. 47—53; Plut. *Demetr.* 15—18; Polyaen. iv. 7. § 7; Justin. xv. 2.) In B. C. 295, Ptolemy recovered the island, and it became from this time an integral portion of the Aegyptian monarchy. (Plut. *Demetr.* 35, 38.) It formed the brightest jewel in the Alexandrian diadem: the timber of Olympus was used for the navy of Aegypt, and its metallic and other riches contributed to the revenue. Independently of its importance as a military position, the Ptolemies had a personal interest in securing it as a place of refuge for themselves or their treasures, in case of invasion or internal revolutions. Under the Lagid dynasty, the government of the island was committed to some one belonging to the highest class of the Alexandrian court, called the "kinsmen of the king." This viceroy had full powers, as it would appear from the inscriptions in which he is entitled στρατηγὸς καὶ ναύαρχος καὶ ἀρχιερεὺς ὁ κατὰ τὴν νῆσον. Ptolemy Philadelphus founded the Cyprian cities which bore the name of his wife — Arsinoë. On the decline and fall of Aegypt, Cyprus with Cyrenaica was the only foreign possession remaining to the crown. Polycrates, an Argive, about B. C. 217, was governor of Cyprus and secured, by his faithfulness and integrity, the island for Ptolemy Epiphanes, the infant son and successor of Philopator. On the division of the monarchy between the brothers Ptolemy Philometor and Euergetes, Euergetes, in contravention of the arrangement

Digitized by Google

us services to take Cyprus to his share. In B. C. 54, Energetes went to Rome, to seek assistance om the senate. Five legates, but no Roman army, re despatched to aid him; but Philometor, anticipating him, had already occupied Cyprus with a rge force, so that when his brother landed at the ad of his mercenary troops, he was soon defeated d shut up in Lapethus, where he was compelled surrender, on condition that he should content mself with the kingdom of Cyrene. The Romans d not again interfere to disturb the arrangement us concluded. During the dissensions of the brors, Demetrius Soter, king of Syria, had endeaured to make himself master of Cyprus, but unccessfully. On the accession of Ptolemy Lathyrus the throne of Aegypt, his younger brother, Ptolemy lexander, went to Cyprus. Afterwards, when by e intrigues of Cleopatra, the queen-mother, Alexder became king of Aegypt, Lathyrus retired to yprus, and held it as an independent kingdom for e 18 years during which Cleopatra and Alexander igned in Aegypt, B. C. 107—89. When Lathyrus as recalled by the Alexandrians to Aegypt, Alexder, his brother, in the hope of becoming master of yprus, invaded the island; but was defeated in a val action by Chaereas, and fell in the battle. hile Ptolemy Auletes occupied the throne of gypt, another Ptolemy, a younger brother, was g of Cyprus. This prince had obtained from the mans people the complimentary title of their friend. ic. *pro Sest.* 26; Schol. Bob. p. 301, ed. Orell.) the pretence that he had abetted the pirates chol. Bob. *l. c.*), he was commanded to descend m the throne. In B. C. 58, Clodius, who had a rsonal enmity against the king (Appian. *B. C.* ii. ; Dion Cass. xxxviii. 30), proposed to deprive n of his kingdom, and confiscate his large treaes to the service of the state. A "rogation" was ught forward by the tribune, that Cato should be pointed to carry into execution this act of fright- injustice. Cato accepted this disgraceful comission; but half ashamed of the transaction, detched a friend from Rhodes to deliver the decree, d to hold out to the injured king the promise of honourable compensation in the priesthood of the phian Aphrodite. Ptolemy preferred to submit to luntary death. (Plut. *Cat. Min.* 34, 39.) Cyus became a Roman province, and the fatal treaes amassed by the king, were poured into the lers of the state. (Pat. Vell. ii. 45.) The island s annexed to Cilicia (Cic. *ad Fam.* i. 7; *ad Att.* 2), but had a quaestor of its own (*ad Fam.* xiii.), and its own courts for the administration of tice (*ad Att.* v. 21). In B. C. 47, it was given Caesar to Arsinoë and Ptolemy, the sister and ther of Cleopatra. (Dion Cass. xlii. 95.) M. ntius afterwards presented it to the children of opatra. (Dion Cass. xlix. 32, 41; comp. Strab. 683.) After the battle of Actium, at the division the provinces between the emperor and the senate, C. 27, it was made an imperial province. (Dion ss. liii. 12.) In B. C. 22, it was given up to the nate (Dion Cass. liv. 4), and was from that time verned by propraetors, with the title of Proconsul, th a "legatus" and a "quaestor." (Marquardt, chler's *Röm. Alt.* vol. iii. pt. 1. p. 172; Orell. *Inscr.* 02.) The proconsul resided at Paphos. (*Act.* ost. xiii. 6, 7.) From the narrative in the Acts the Apostles (xiii. 4—12), it would seem that a nsiderable part of the population was of Jewish raction; and in the fatal insurrection during the reign of Hadrian, they are said to have massacred 240,000 of the Grecian inhabitants, and obtained temporary possession of the island. (Milman, *Hist. of Jews*, vol. iii. p. 112.) Under the Byzantine emperors it was governed by a "Consularis," and the capital was transferred from Paphos to Salamis or Constantia (Hierocl.). In A. D. 648, Moawiyah, the general of Othman, invaded the island, which capitulated, the Saracen general agreeing to share the revenues with the Greek emperor, In A. D. 803—806, it fell into the hands of Harun el Rashid, but was afterwards restored to the empire by the conquests of Nicephorus II. Isaac Angelus lost the island where Alexis Commenus had made himself independent; but was deprived of his conquest by Richard Coeur de Lion, A. D. 1191, who ceded it to the Templars, but afterwards resumed the sovereignty, and in A. D. 1192, gave it to King Guido of Jerusalem. Cyprus was never again united to the Byzantine empire.

Cyprus, lying in that sea which was the extreme nurse of the Grecian race, never developed the nobler features of Hellenic culture and civilization. The oriental character entirely predominated; the worship had but little connection with the graceful anthropomorphism of Hellas, but was rather a deification of the generative powers of nature as common to the Phoenicians, mixed up with orgiastic rites from Phrygia. The goddess, who was evidently the same as the Semitic Astarte, was worshipped under the form of a rude conical stone. (Tac. *Hist.* ii. 3.) The exuberance of nature served to stifle every higher feeling in sensual enjoyment. (Comp. Athen. vi. p. 257, xii. p. 516.) A description of the constitution was given in the lost work of Aristotle on the Polities, and Theophrastus had composed a treatise upon the same subject. (Suid. *s. v.* Τύφα.) That such men should have thought it worth their while to investigate this matter shows that it possessed considerable interest; as far as the scanty notices that have come down go, it appears to have been governed by petty princes of an oriental character. (Comp. Herod. vii. 90.) For coins of Cyprus, see Eckhel, vol. iii. p. 84; H. P. Borrell, *Notice sur quelq. Méd. gr. des Rois de Chypre.* Paris, 1836; Meursius, *Creta, Cyprus*, &c., Amst. 1675; D'Anville, *Mém. de l'Acad. des Inscr.* vol. xxxii. p 548; Mariti, *Viaggi*, vol. i.; Von Hammer, *Topogr. Ansicht. aus der Levante;* Turner's *Levant;* vol. ii. pp. 40, 528; Engel, *Kypros;* Ross, *Reisen nach Kos, Halikarnassos, Rhodos, und der Insel Cypern*, Halle, 1852; Luynes, *Numismatique et Inscriptions Cypriotes*, Paris, 1852. [E. B. J.]

CY'PSELA (Κύψελα), a town on the river Hebrus in Thrace, which was once an important place on the via Egnatia. It is the same as the modern *Ipsala*, or *Chapsylar*, near *Keshan*. (Strab. pp. 322, 329; Ptol. iii. 11. § 13; Steph. Byz. *s. v.*; Ann. Comn. vii. p. 204; Liv. xxxi. 16, xxxviii. 40, 41; Mela, ii. 2; Plin. iv. 18.) [L. S.]

CY'PSELA (Κύψελα: *Eth.* Κυψελάνος), a fortress in the district of Parrhasia in Arcadia, which was occupied and fortified by the Mantineians in the Peloponnesian war, in order to annoy the Lacedaemonian district Sciritis. (Thuc. v. 33.) Kiepert, in his map, identifies Cypsela with Basilis, since the latter is said to have been founded by Cypselus: the only objection to this conjecture is the distance of Cypsela from the district Sciritis. [BASILIS.]

CYPTA'SIA (Κυπτασία), a place on the coast of Asia Minor (Ptol. v. 4), apparently the same

Digitized by Google

which the Table places 7 miles from Sinope on the road to Amisus, under the name of Cloptasa. Hamilton (*Researches, &c.* vol. i. p. 306) supposes that it may be a place on the coast now called *Chobanlar*. [G. L.]

CYRA [CYRESCHATA].

CYRAUNIS. [CERCINA.]

CYRBE (Κύρβη: *Eth.* Κυρβαῖος), a city of Pamphylia, mentioned by Hecataeus in his *Asia*. (Steph. B. *s. v.*) [G. L.]

CYRENAEI. [CYRENAICA.]

CYRENAICA (ἡ Κυρηναίη χώρη, Herod. iv. 199; ἡ Κυρηναία, Strab. xvii. p. 837; ἡ Κυρηναϊκὴ ἐπαρχία, Ptol. iv. 4; Cyrenaïca Provincia, Cyrenaïca Africa, and Cyrenaïca simply, Mela, i. 8. § 1; Plin. v. 5, &c.: *Adj.* Κυρηναϊκός, especially with reference to the philosophic sect founded by Aristippus, ἡ Κυρηναϊκὴ φιλοσοφία, Strab. xvii. p. 837; Diog. Laërt. ii. 85; Κυρηναῖος, Cyrenaïcus, Cyrenaeus, Cyrenensis), a district, and, under the Romans, a province of N. Africa, also called, from the time of the Ptolemies, PENTAPOLIS (Πεντάπολις, Ptol.; Agathem. ii. 5), PENTAPOLIS LIBYAE (Πεντάπολις Λιβύης, Joseph. vii. 38; Sext. Ruf. 13), and PENTAPOLITANA REGIO (Plin. *l. c.*).* The former name was derived from CYRENE, the capital of the district; and the latter from its five chief cities, namely, CYRENE, BARCA, TEUCHEIRA (aft. Arsinoë), HESPERIDES (aft. Berenice), and APOLLONIA, which was at first the port of Cyrene. The names may, however, be distinguished from one another; Cyrenaica denoting the whole district or province in its widest sense, and Pentapolis being a collective name for the five cities with their respective territories.

In its widest sense the term includes the whole of the country which was subject to Cyrene, when that city was most flourishing, from the borders of Carthage on the W. to those of Egypt on the E. On both sides, as was natural from the character of the intervening deserts, the boundaries varied. On the E. they seem never to have been perfectly defined, being placed at the CHERSONESUS MAGNA (*Ras-et-Tin*), or at the CATABATHMUS MAJOR (*Marsa Sollom* or *Akabet et Kebira*, the present boundary of *Tripoli* and *Egypt*), according as MARMARICA was included in Cyrenaica or not. On the W. the boundary was fixed, after long disputes, at the bottom of the Great Syrtis. [ARAE PHILAENORUM.] On the S. the nominal limits of the country reached as far as the oasis of PHAZANIA (*Fezzan*). (Scylax, p. 45; Strab. xvii. p. 838; *Stadiasm.* p. 451; Sall. *Jug.* 19; Mela, Plin. *ll.* cc.). On the N. the shore was washed by that part of the Mediterranean which was called the Libyan Sea (LIBYCUM MARE), and on the W. by the Greater Syrtis.

But the district actually occupied by the Greek colonists comprised only the table land, known as the plateau of Barca, with the subjacent coast. It may be considered as beginning at the N. limit of the sandy shores of the Great Syrtis at BOREUM PR. (*Ras Teyonas*, S. of *Ben-Ghazi*), between which and the Chersonesus Magna the country projects into the Mediterranean in the form of a segment of a circle, whose chord is above 150 miles long, and its arc above 200, lying directly opposite to the Peloponnesus, at the distance of about 2000 miles.

From its position, formation, climate, and soil this region is perhaps one of the most favoured on the surface of the globe. Its centre is occupied by a moderately elevated table-land, whose edge runs parallel to the coast, to which it sinks down in a succession of terraces, clothed with verdure, intersected by mountain streams running through ravines filled with the richest vegetation, well watered by frequent rains, exposed to the cool sea-breezes from the N., and sheltered by the mass of the mountains from the sands and hot winds of the Sahara. The various terraces enjoyed a great diversity of climates, and produced a corresponding variety of flowers, vegetables, and fruits, and the successive harvests, at the different elevations, lasted for eight months out of the twelve. (Herod. iv. 198, 199; Diod. iii. 50; Arrian. *Ind.* 43; Eustath. *ad Dion. Perieg.* 312.) The table land extends some 70 or 80 miles in breadth between the Sahara and the coast, but it is only on its N. and NW. slopes that it enjoys the physical advantages now described, and on account of which it is called to this day *Jebel Akdar* — i. e. the *Green Mountain*. Among its products are enumerated corn, oil, wine, all kinds of fruits, especially dates, figs, and almonds (Scyl. p. 46; Diod. iii. 49; Plin. xiii. 4. s. 9, xvii. 3. § 4; Synes. *Epist.* 133, 147); cucumbers (Plin. xix. 1. s. 3), truffles (*μίσυ*, Ath. ii. p. 62; Plin. xix. 1. s. 12); cabbage (Ath. i. p. 27, iii. p. 100); beet (Theophr. *Hist. Plant.* iii. 15), saffron (Ath. xv. p. 682; Plin. xxi. 6. s. 17; Synes. *Epist.* 133), flowers from which exquisite perfumes were extracted (Theophr. *H. P.* vi. 6; Ath. xv. p. 689; Plin. xiii. 4. s. 10); and a very rare plant, for which the country was especially celebrated, namely, *Sphagnum*, or *laserpitium*, the plant which produced the true resin, called *laser* (ὀπὸς Κυρηναῖος), which was in the highest esteem among the ancient physicians (Herod. iv. 169; Dioscor. iii. 84; Theoper. *H. P.* vi. 3; Arrian. *Anab.* iii. 28; Strab. ii. p. 131; Plin. xix. 3. s. 15, xix. 3. s. 1, xxii. 23; Plaut. *Rud.* ii. 2. 16; Eckhel, *Doctr. Num. Vet.* vol. iv. p. 119; Mionnet, *Descr. de Med.* vol. vi. pp. 373, 374). The plant, which had already become scarce in the time of the Romans, is now found in abundance. (Della Cella, *Viaggio da Tripoli*, &c.; Pacho, *Voyage dans la Marmarique*, &c., p. 250). The district was also famous for its honey (Synes. *Epist.* 147), its horses, large studs of which were kept at Cyrene and at Barca (Pind. *Pyth.* iv. 2, Ath. iii. p. 100; Dionys. Perieg. 213; Synes. *Epist.* 40; Diod. xvii. 49; Strab. xvii. p. 837; Steph. B. p. 155), and its ostriches (Synes. *Epist.* 133). As some dwell upon all these advantages, the country was terribly subject to the annual ravages of locusts (Plin. xi. 29. s. 35; Liv. Epit. lx.; Jul. Obseq. 90; Oros. v. 11; Synes. *Epist.* 58); and the great abundance of natural gifts disposed the inhabitants to luxury.

The native Libyan tribes, who are mentioned as inhabiting the country in the earliest known times were the AUSCHISAE on the W., the ASBYSTAE in the centre, and the GILIGAMMAE on the E. But in the time of Herodotus these peoples had already been driven into the interior by the Greek settlers: and during the whole period of ancient history, Cyrenaica is essentially a part of the Hellenic world. (A few other tribes are mentioned by Ptolemy, iv. 4. s. 10.) The first Greek settlement, of which we

* It is also called "Libya about Cyrene" (Dion Cass. liii. 12, Κρήτη τε μετὰ Λιβύης τῆς περὶ Κυρήνην; *Act. Apost.* ii. 10, τὰ μέρη τῆς Λιβύης τῆς κατὰ Κυρήνην).

Digitized by Google

ave any clear account, was effected by BATTUS (*Dict. of Biog. s. v.*), who led a colony from the island of Thera, and first established himself on the island of Platea at the E. extremity of the district, and afterwards built CYRENE (B. C. 631). The dynasty, which he there founded, governed the country during 8 reigns, though with comparatively little power over some of the other Greek cities. Of these the earliest were TEUCHEIRA and HESPERIDES, then BARCA, a colony from Cyrene; and these, with Cyrene itself and its port APOLLONIA, formed the original Lybian Pentapolis. The comparative independence of Barca, and the injury inflicted on the country by the Persian invasion under Cambyses, diminished the power of the later kings of Cyrene, and at last the dynasty was overthrown, and a republic established about the middle of the 5th century B. C. [CYRENE]. When Alexander invaded Egypt the Cyrenaeans made an alliance with him (Diod. xvii. 49; Curt. iv. 7). The country was made subject to Egypt by Ptolemy the son of Lagus, B. C. 321. (Diod. xviii. 19—21, xx. 40; Justin. xiii. 6.) It appears to have flourished under the Ptolemies, who pursued their usual policy of raising new cities at the expense of the ancient ones, or restoring the latter under new names. Thus Hesperides became Berenice, Teucheira was called Arsinoë, Barca was entirely eclipsed by its port which was raised into a city under the name of Ptolemaïs, and Cyrene began to decay in consequence of the favours conferred upon its port Apollonia. After these changes, the term Pentapolis, which became the common name of the country, refers to the five cities of Cyrene, Apollonia, Ptolemaïs, Arsinoë, and Berenice. The last king of the Egyptian dynasty, Apion, an illegitimate son of Ptolemy Physcon (on whose death in B. C. 117, he had obtained the government), left the country to the Romans by his testament, in the year B. C. 95, according to Livy, though Appian gives a later date, apparently through a confusion with the time of its erection into a Roman province. (Liv. Epit. lxx.; Appian. *B. C.* i. 111, *Mithr.* 121; Justin. xxxix. 5; Eutrop. vi. 11; Sext. Ruf. 13.) At first the Romans granted the cities their freedom, and reserved upon them the former royal domain, only exacting a tribute (Cic. *de Leg. Agr.* ii. 19); but quarrels soon broke out between the different states; and, after Lucullus had made, by order of Sulla, a vain attempt, real or affected, to reconcile them (Plut. *Lucull.* 2; Joseph. *Antiq.* xiv. 7. § 2), the Romans applied their usual last remedy, and reduced the country to a province, under the name of Cyrenaica (probably in B. C. 75), which was united with Crete, on the conquest of that island by Q. Metellus Creticus, B. C. 67 [CRETA]. In the division of the provinces under Augustus, the united province, under the name of Creta-Cyrene, Creta et Cyrene, or Creta simply, was constituted a senatorial province, under the government of a proprietor, with the title of proconsul, who had a legatus, and one if not two quaestors. (Orelli, *Inscr.* Nos. 3658, 3659; Böckh, *Corp. Inscr. Graec.* Nos. 2588, 3532, 3548; Gruter, p. 415, no. 5, p. 471, no. 6; Eckhel, vol. iv. p. 126; Tac. *Ann.* iii. 38, 70; Strab. xvii. p. 840; Senec. *Controv.* iv. 27; Suet. *Vesp.* 2; Marquardt, *Becker's Röm. Alterth.* vol. iii. pt. 1, p. 223.) Under Constantine, Crete and Cyrenaica were made separate provinces; the latter was called Libya Superior, and was placed under the government of a praeses. (Böcking, *Notit. Dign.* vol. i. p. 137; Marquardt, *l. c.*) It should be observed that, under the Romans, the E. boundary of the province, which divided it from MARMARICA, was formed by an imaginary line drawn southwards from AXYLIS, a town somewhat to the W. of the Chersonesus Magna.

The decline of the country in prosperity may be dated chiefly from the reign of Trajan, when the Jews, large numbers of whom had settled there under the Ptolemies (Joseph. *Ant. Jud.* xiv. 7, *c. Apion.* ii. 4; *Act. Apost.* ii. 10), rose in insurrection, massacred 220,000 Romans and Cyrenaeans, and were put down with great difficulty and much slaughter. (Dion Cass. lxviii. 32.) The loss of population during these bloody conflicts, and the increasing weakness of the whole empire, left the province an easy prey to the Libyan barbarians, whose attacks were aided by the ravages of locusts, plagues, and earthquakes. The sufferings of the Pentapolis from these causes at the beginning of the 5th century are pathetically described by Synesius, the bishop of Ptolemaïs, in an extant oration, and in various passages of his letters (*Catastasis &c.*; *Epist.* 57, 78, 125; *de Regno*, p. 2), and at a later period by Procopius (*Aedif.* vi. 2). In A. D. 616, the Persian Chosroes overthrew the remains of the Greek colonies so utterly, as to leave only the gleanings of the harvest of destruction to the Arab conquerors, who finally overran the country in A. D. 647. (Gibbon, vol. viii. p. 227, vol. ix. p. 444, foll., ed. Milman.)

For the purposes of descriptive geography, the Cyrenaic coast must be divided into two parts at the promontory called BOREUM (*Ras Teyonas*), S. of which, along the E. shore of the Syrtis Major, were numerous small and unimportant places, whose positions are very difficult to determine (Ptol. iv. 4. §3; SYRTES). N. of this promontory lay HESPERIDES (aft. Berenice: *Benghasi*), upon the little stream called LATHON, the only river in the country, which took its rise in the sand-hills called HERCULIS ARENAE, and near it the little lake called Triton, or Lacus Hesperidum, which some of the ancients confounded with that at the bottom of the Lesser Syrtis. [TRITON.] Following the curve of the coast to the NE., we come to TEUCHEIRA (aft. Arsinoë, *Tauhra*), then to PTOLEMAIS (*Tolmeita*), originally the port of Barca, but under the Ptolemies the chief of the Five Cities: BARCA itself lay about 12 miles inland: the next important position on the coast is the promontory and village of PHYCUS (*Ras Sem* or *Ras-al-Rasat*), the N.-most headland of the part of the African coast E. of the Lesser Syrtis; then APOLLONIA (*Marsa Sousa*), the former port of CYRENE, which lies inland, about 8 miles from the coast, SE. of Phycus and SW. of Apollonia. Further to the E. was the port called NAUSTATHMUS (*Marsa-al-Halal*, or *Al Natroun*), then the promontory ZEPHYRIUM, then DARNIS (*Derna*), AXYLIS, and the CHERSONESUS MAGNA (*Ras-at-Tyn*), where the coast formed a bay (*G. of Bomba*), in which lay the island of PLATEA (*Bomba*), the first landing-place of the colonists from Thera. Another little island off the shore near Pr. Zephyrium was called Laca or the Island of Aphrodite (Λακὰ ἢ Ἀφροδίτης νῆσος, Ptol. iv. 4. § 15: *Al Hiera*). Ptolemy (§§ 11—13) mentions a large number of places in the interior, most of them mere villages, and none apparently of any consequence, except Barca and Cyrene. Of the hills which run parallel to the coast, those along the E. shore of the Syrtis Major were called HERCULIS ARENAE (Ἡρακλέους Θῖνες), SW. of which were the VELPI M. (τὰ Οὔελπα ὄρη), and

Digitized by Google

considerably to the E., on the S. frontier, the BARCOLICUS M. (τὸ Βαικολικὸν ὄρος: Ptol. *l. c.* § 8). The oasis of AUGILA was reckoned as belonging to Cyrenaica. (Della Cella, *Viaggio da Tripoli di Barberia alle Frontiere Occidentali dell' Egitto*, Genoa, 1819; Beechey, *Expedition to explore the N. coast of Africa, from Tripoli E.-ward, &c.*, London, 1828, 4to.; Pacho, *Relation d'un Voyage dans la Marmarique, la Cyrénaique, &c.* Paris, 1827—1829, 4to.; Barth, *Wanderungen durch das Punische und Kyrenaïsche Küstenland*, c. 8, Berlin, 1849: and for the coins, Eckhel, vol. iv. pp. 117, &c.) [P. S.]

CYRE'NE or CYRENAE (ἡ Κυρήνη: *Eth.* and *Adj.* as those of CYRENAICA: *Ghrennah*, very large Ru.), the chief city of CYRENAICA, and the most important Hellenic colony in Africa, was founded in B. C. 631 by Battus and a body of Dorian colonists from the island of Thera. (The date is variously stated, but the evidence preponderates greatly in favour of that now given; Clinton, *F. H.* vol. i. *s. a.*: for the details of the enterprise, and of the subsequent history of the house of Battus, see *Dict. of Biog. s. v. Battus*, and Grote, *Hist. of Greece*, vol. iv. p. 39, seq.) The colonists, sailing to the then almost unknown shores of Libya, in obedience to the Delphic oracle, took possession first of the island of Platea, in the *Gulf of Bomba*, which they seem to have mistaken for the mainland. Hence, after two years of suffering, and after again consulting the oracle, they removed to the opposite shore, and resided in the well-wooded district of Aziris for six years, at the end of which time some of the native Libyans persuaded them to leave it for a better locality, and conducted them through the region of Irasa, to the actual site of Cyrene. Though Irasa was deemed so delectable a region that the Libyan guides were said to have led the Greeks through it in the night lest they should settle there, the spot at which their journey ended is scarcely inferior for beauty and fertility to any on the surface of the globe. In the very middle of that "projecting bosom of the African coast" (as Grote well calls it), which has been described under CYRENAICA, on the edge of the upper of two of the terraces, by which the table-land sinks down to the Mediterranean, in a spot backed by the mountains on the S. and in full view of the sea towards the N., and thus sheltered from the fiery blasts of the desert, while open to the cool sea breezes, at the distance of 10 miles from the shore, and at the height of about 1800 feet, an inexhaustible spring bursts forth amidst luxuriant vegetation, and pours its waters down to the Mediterranean through a most beautiful ravine. Over this spring which they consecrated to Apollo, the great deity of their race (hence Ἀπόλλωνος κρήνη, Callim. *in Apoll.* 88), the colonists built their new city, and called it Cyrene from Cyre the name of the fountain. At a later period an elegant mythology connected the fountain with the god, and related how Cyrene, a Thessalian nymph, beloved of Apollo, was carried by him to Africa, in a chariot drawn by swans. (Müller, *Dorians*, Bk. ii. c. 3. § 7.)

The site of Cyrene was in the territory of the Libyans named ASBYSTAE; and with them the Greek settlers seem from the first to have been on terms of friendship very similar to those which subsisted between the Carthaginians and their Libyan neighbours. The Greeks had the immense advantage of commanding the abundant springs and fertile meadows to which the Libyans were compelled to resort when the supplies of the less favoured regions further inland began to fail. A close connection soon grew up between the natives and the Greek settlers: and not only did the former imitate the customs of the latter (Herod. iv. 170); but the two races coalesced to a much greater extent than was usual in such cases. It is very important to remember this fact, that the population of Cyrene had a very large admixture of Libyan blood by the marriages of the early settlers with Libyan wives (Herod. iv. 186—189; Grote, vol. iv. p. 53). The remark applies even to the royal family; and, if we were to believe Herodotus, the very name of *Battus*, which was borne by the founder, and by his successors alternately with the Greek name Arcesilaüs, was Libyan, signifying *king*; and we have another example in that of *Alazir*, king of Barca. For the rest, the Libyans seem to have formed a body of subject and tributary Perioeci (Herod. iv. 161). They were altogether excluded from political power, which, in strict conformity with the constitution of the other states of Spartan origin, was in the hands exclusively of the descendants from the original settlers, or rather of those of them who had already been among the ruling class in the mother state of Thera.

The dynasty of the Battiadae lasted during the greater part of two centuries, from B. C. 630 to somewhere between 460 and 430; and comprised eight kings bearing the names of Battus and Arcesilaus alternately; and a Delphic oracle was quoted to Herodotus as having defined both the names and numbers. (Herod. iv. 163.) Of Battus I., B. C. 630—590, it need only be said that his memory was held in the highest honour, not only as the founder of the city, but also for the benefits he conferred upon it during his long reign. He was worshipped as a hero by his subjects, who showed his grave, apart from those of the succeeding kings, where the Agora was joined by the road (σκυροστὴ ὁδός), which had been made for the procession to the temple of Apollo. (Pind. *Pyth.* v.; Callim. *Hymn. in Apoll.* 77; Pans. iii. 14, x. 15; Catull. vii. 6; Diod. *Excerpt. de Virt. et Vit.* p. 232.) Nothing of importance is recorded in the reign of his son, Arcesilaüs I., about B. C. 590—574; but that of his successor, Battus II. (about B. C. 574—554), surnamed the Prosperous, marks the most important period of the monarchy; nothing less, in fact, than a new colonization. An invitation was issued to all Greeks, without distinction of race, to come and settle at Cyrene, on the promise of an allotment of lands. It seems probable that the city of Apollonia, the port of Cyrene, owed its foundation to this accession of immigrants, who arrived by sea direct, and not, like the first colonists, by the circuitous land route from the *Gulf of Bomba*. (Grote, p. 55.) The lands promised to the new settlers had of course to be taken from the natives, whose general position also was naturally altered for the worse by the growing power of the city. The Libyans, therefore, revolted, and transferred their allegiance to Apries, king of Egypt, who sent an army to their aid; but the Egyptians were met by the Cyrenaeans in Irasa, and were almost entirely cut to pieces. This conflict is memorable as the first hostile meeting of Greeks with Egyptians, and also as the proximate cause of the overthrow of Apries. Under Amasis, however, a close alliance was formed between Egypt and Cyrene, and the Egyptian king took his wife Ladice from the house of Battus. (Herod. ii. 180—181.) The misfortunes of the monarchy began in the reign of Arcesilaüs II., the

n of Battus II., about B. C. 554—544, whose ty-
nny caused the secession of his brothers, the foun-
ation of Barca, and the revolt of a large number of
he Libyan Perioeci, in a conflict with whom no less
han 7000 hoplites were slain; and the king was
en afterwards strangled by his brother Learchus.
o this loss of prestige, his successor, Battus III.
dded the disqualification of lameness. The Cyre-
eans, under the advice of the Delphic oracle, called
to the aid of Demonax, a Mantineian, who drew up
r them a new constitution; by which the encroach-
ents of the royal house on the people were more
han recovered, and the king was reduced to political
significance, retaining, however, the landed domain
s his private property, and also his sacerdotal func-
ons. The political power, in which it would seem,
one but the descendants of the original colonists
ad any share, was now extended to the whole Greek
opulation, who were divided by Demonax into three
ribes: — (1.) The Theraeans, to whom were still
ttached the Libyan Perioeci: (2) Greeks from Pe-
oponnesus and Crete: (3) Greeks from the other
lands of the Aegean: and a senate was also con-
ituted, of which the king appears to have been pre-
ident. (Herod. iv. 161, 165.) In other respects
he constitution seems to have resembled that of
parta, which was, through Thera, the original me-
opolis of Cyrene. We read of Ephors, who pun-
shed with *atimia* litigious people and impostors, and
f a body of 300 armed police, similar to the Hippeis
Sparta (Heracleid. Pont. 4; Hesych. Τριακάσιοι;
ustath. *ad Hom. Od.* p. 303; Grote, pp. 59, 60;
Müller, *Dor.* Bk. iii. c. 4. § 5, c. 7 § 1. c. 9. § 13.)
fter the time of Battus III., his son Arcesilaüs III.
nd his mother Pheretime attempted to overturn the
ew constitution, and to re-establish despotism. Their
rst efforts led to their defeat and exile; but Arce-
ilaüs returned at the head of a new body of emi-
rants, chiefly from Ionia, took Cyrene, and executed
ruel vengeance upon his opponents. Whether from
desire to confirm his position, or simply from dread
f the Persian power, he sent to Memphis to make
is submission to Cambyses, and to offer him an
nnual tribute, as well as a present; the 500 minae
hich formed the latter, were deemed by Cambyses
s inadequate, that he flung them contemptuously to
is soldiers. After these things, according to the
ative assigned by Herodotus (iv. 163, 164), Arce-
ilaüs became sensible that he had disobeyed the
elphic oracle, which, in sanctioning his return, had
njoined moderation in the hour of success; and to
vert the divine wrath, he retired from Cyrene to
arca, which was governed by his father-in-law,
lazir. His murder there, and the vengeance taken
n the Barcaeans by his mother Pheretime, by the
id of a Persian army, sent by Aryandes, the satrap
f Egypt, are related under BARCA. Though the
ersians ravaged a great part of the country, and
xtended their conquests beyond Barca as far as
esperides, and though they were even inclined to
ttack Cyrene on their way back to Egypt, they
ft the city unmolested (Herod. iv. 203, 204). The
ffect of these events on the constitution of Cyrene
s thus described by Grote (vol. iv. p. 66): "The
ertary of the third Arcesilaüs, and the restoration
f the Battiads broke up the equitable constitution
stablished by Demonax. His triple classification
nto tribes must have been completely remodelled,
though we do not know how; for the number of new
itizens whom Arcesilaüs introduced must have
ecessitated a fresh distribution of land, and it is
extremely doubtful whether the relation of the
Theraean class of citizens with their Perioeci, as es-
tablished by Demonax, still continued to subsist. It
is necessary to notice this fact, because the arrange-
ments of Demonax are spoken of by some authors as
if they formed the permanent constitution of Cyrene;
whereas they cannot have outlived the restoration of
the Battiads, nor can they even have been revived
after that dynasty was finally expelled, since the
number of new citizens and the large change of
property, introduced by Arcesilaüs III., would
render them inapplicable to the subsequent city."
Meanwhile "another Battus and another Arcesi-
laüs have to intervene before the glass of this
worthless dynasty is run out." Of Battus IV., sur-
named the Handsome, nothing needs to be said; but
Arcesilaüs IV. has obtained a place, by the merits of
the Libyan breed of horses rather than by his own,
in the poetry of Pindar, who, while celebrating the
king's victories in the chariot race (B. C. 460), at
the same time expostulates with him for that tyranny
which soon destroyed his dynasty. (Pind. *Pyth.* iv.
v.) It seems to have been the policy of this prince
to destroy the nobles of the state, and to support
himself by a mercenary army. How he came to his
end is unknown; but after his death a republic was
established at Cyrene, and his son Battus fled to
Hesperides, where he was murdered, and his head
was thrown into the sea; a significant symbol of the
utter extinction of the dynasty. This was probably
about B. C. 450.

Of the condition of the new republic we have
very little information. As to its basis, we are
only told that the number of the tribes and phra-
triae was increased (Aristot. *Polit.* vi. 4); and, as
to its working, that the constant increase of the
democratic element led to violent party contests
(ibid.), in the course of which various tyrants ob-
tained power in the state, among whom are named
Ariston and Nicocrates. (Diod. Sic. xiv. 34; Plut.
de Virt. Mul.; Polyaen. *Strat.* viii. 38.) The Cy-
renaeans concluded a treaty with Alexander the
Great (Diod. xvii. 49; Curt. iv. 7), after whose
death the whole country became a dependency of
Egypt, and subsequently a province of the Roman
empire. [CYRENAICA.] The favours bestowed on
APOLLONIA, its port, under the Ptolemies, greatly
diminished the importance of Cyrene, which gra-
dually sank under the calamities which it shared
with the whole country. Under the Romans it was
a colony, with the surname of FLAVIA. (Euseb.
Chron.; Eckhel, vol. iv. pp. 127, foll.)

At the height of its prosperity Cyrene possessed
an extensive commerce with Greece and Egypt,
especially in *silphium*: with Carthage, its relations
were always on a footing of great distrust, and its
commerce on the W. frontier was conducted en-
tirely by smuggling. At what period its dominion
over the Libyan tribes was extended so far as to
meet that of Carthage at the bottom of the Greater
Syrtis is disputed [ARAE PHILAENORUM]; some
referring it to the republican age, others to the
period of the Ptolemies. (Grote, vol. iv. p. 48, holds
the latter opinion.)

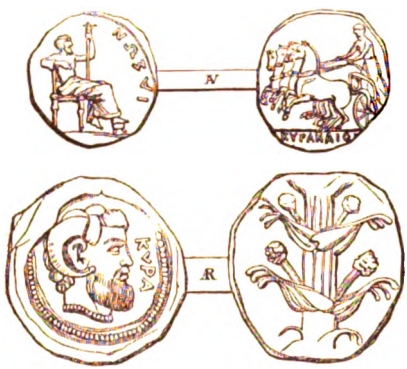
Cyrene holds a distinguished place in the records
of Hellenic intellect. As early as the time of
Herodotus it was celebrated for its physicians
(Herod. iii. 131); it gave its name to a philosophic
sect founded by one of its sons, Aristippus; another,
Carneades, was the founder of the Third or New
Academy at Athens; and it was also the birthplace

Digitized by Google

of the poet Callimachus, who boasted a descent from the royal house of Battus, as did the eloquent rhetorician Synesius, who afterwards became bishop of Apollonia.

The ruins of Cyrene, though terribly defaced, are very extensive, and contain remains of streets, aqueducts, temples, theatres, and tombs, with inscriptions, fragments of sculpture, and traces of paintings. In the face of the terrace, on which the city stands, is a vast subterraneous necropolis; and the road connecting Cyrene with its port, Apollonia, still exists. The remains do not, however, enable us to make out the topography of the city with sufficient exactness. We learn from Herodotus (iv. 164) and Diodorus (xix. 79) that the Acropolis was surrounded with water. The ruins are fully described by Della Cella (pp. 138, foll.), Pacho (pp. 191, foll.), and Barth (p. 421, foll.).

The coins of Cyrene are numerous. In the second of the two specimens here annexed the obverse represents the head of Zeus Ammon and the reverse the *silphium*, which formed the chief article in the export trade of Cyrene. [P. S.]



COINS OF CYRENE.

CYRE'NE (Κυρήνη), is one of several unknown towns, which Stephanus (*s. v.*) assigns to Massalia If these notices of his are true (see 'Αλωνίς, 'Αζανία), Massalia had dependencies, of which there remains no record except the names. [G. L.]

CYRESCHATA (Κυρεσχατα, Ptol. vi. 12. § 5; Amm. Marc. xxiii. 6; τὰ Κύρα. Strab. xi. 517; Cyropolis and Cyreschata, Steph. B.; Cyropolis, Arrian, *Anab.* iv. 3; Curt. vii. 6), a town of considerable importance, situated on the Jaxartes (now *Sihon*) in Sogdiana. According to Arrian, the river ran through the middle of it. Its foundation was traditionally attributed to Cyrus, and it derived its name from being supposed to be on the extreme limits of that conqueror's empire. It sustained a memorable siege, which is fully narrated by Arrian and Curtius, when Alexander the Great invaded Sogdiana, and was evidently from their accounts a place of considerable strength. There can be no doubt that the different names of Cyra, Cyropolis and Cyreschata represent one and the same town. Wilson (*Ariana*, p. 165) has not been able to identify any ruins with the site of this city. Berkelius in his notes to Steph. Byz has attempted to show that the name Cyreschata is a corruption of Kyreserta, on the analogy of Tigranocerta and Vologesocerta; but the derivation which Strabo (*l. c.*) has given, seems to us the most probable. [V.]

CYRE'TIAE (Κυρετίαι, Ptol. iii. 13. § 44: Εἰς Κυρετιεύς, Κυρετιαῖος, *Inscr.*, Cyretiensis), a town of Perrhaebia in Thessaly, frequently mentioned in the Roman wars in Greece. It was plundered by the Aetolians, B. C. 200 (Liv. xxxi. 41), was taken by Antiochus, B. C. 191, but recovered by M. Baebius and Philip in the same year (xxxvi. 10. 13), and was occupied by Perseus in B. C. 171 (xlii. 53). It was situated upon a small tributary of the Titaresius at the modern village of *Dhiomidi*. Its acropolis occupied the hill, on which now stands the church of St. George, where Leake found several inscriptions, among which is a public letter in Greek, addressed to the Tagi (magistrates) and city of the Cyretienses by T. Quinctius Flamininus when he commanded the Roman armies in Greece. (Leake, *Northern Greece*, vol. iv. p. 304.)

CYRI CAMPUS (τὸ Κύρου πεδίον), a plain in Phrygia, the position of which is not well described by Strabo (p. 629). Leake places it in the upper valley of the Hermus, north of the Catacecaumene. See also Hamilton (*London Geog. Journ.* vol. viii. p. 143). The place is uncertain. [G. L.]

CYRI CASTRA (τὸ Κύρου στρατόπεδον). Strabo (p. 539) seems to mean that Mazaca [CAESAREIA] is 6 days' journey from the Cilician Pylae and the Camp of Cyrus, as the passage stands in Casaubon's text. Xenophon (*Anab.* i. 2. § 20) says that Cyrus halted at Dana for three days before he crossed from Cappadocia into Cilicia. Arrian (*Anab.* ii. 4. § 3) says that Alexander, advancing towards the Cilician Pylae from the north, "came to the encampment of the Cyrus who was with Xenophon," and he seems to mean Dana. Curtius (iii. 4) says that, on his road to Cilicia, Alexander came to the country which is called Castra Cyri; and he says that Cyrus had encamped there when he was marching against Croesus, which is a singular blunder. He further says, that the Castra were 50 stadia from the Cilician Pylae; but that is not true, if Dana is Tyana. As Xenophon mentions no halting-place between Dana and the Pylae, Arrian, who has no authority except Xenophon's text, calls Dana the Camp of Cyrus. Xenophon does not state the distance between Dana and the Pylae. The passage of Strabo is evidently corrupt. [G. L.]

CYRNUS (Κύρνος), a town in Euboea, in the territory of Carystus. (Herod. ix. 105.)

CYRO'POLIS (Κυρόπολις, Ptol. vi. 2. § 2, viii. 21. § 8; Amm. Marc. xxiii. 6), a town in Media Atropatene between the rivers Cyrus and Amardus. Salmasius (*in Solin.* p. 840) has denied the separate existence of this town, and contends that it is the same as Cyreschata on the Jaxartes, asserting that the authority of Ammianus is of no weight, as he generally follows Ptolemy. There seems, however, no great force in this argument, and, if there were any district in which we might naturally expect to find a city called after Cyrus, it would surely be that with which he was immediately connected during his whole life. [V.]

CYRRHE'STICA (Κυρρηστική, Ptol. v. 15. Polyb. v. 10; Dion. Cass. xlix. 20: the readings Κυβιστική and Κυριστική are errors of the transcribers; Cic. *ad Att.* v. 18; Plin. v. 23: Tac. *Ann.* ii. 57: *Eth.* Κυρρήσται), a district of Syria which appears to have owed its name to the Macedonian occupation of the country. It lay between the plain of Antioch, and was bounded on the E. by the Euphrates, and on the W. by Amanus and Commagene; to the S. it extended as far as

Digitized by Google

e desert. This fertile, well-watered, and thickly
upied district (Strab. xvi. p. 751) occupied the
ght bank of the Euphrates, where the river in-
ines rather eastward of S. It was the scene of
e campaign in which Ventidius defeated the Par-
ans Pacores and avenged the manes of Crassus
d the Roman army which had fallen at Carrhae.
nstantine united it with COMMAGENE under the
me of EUPHRATENSIS. The chief towns of
THEBESTICA were HIERAPOLIS, ZEUGMA, EURO-
A, BIRTHA, BERŒA, BATNAE, and CYRRHUS.
ritter, *Erdkunde*, vol. x. p. 928.) [E. B. J.]

CYRRHUS. 1. (Κύρρος, Thuc. ii. 100; Κόρος,
ol. iii. 13. § 39), a town in Macedonia. Sitalces
entrated into Macedonia to the left of Cyrrhus
d Pella. (Thuc. *l. c.*) Hence it would seem that
rrhus was at no great distance from the latter
ce. It is probably the same place as the Scurio of
e Jerusalem Itinerary, and the present *Vistritza*.
Tafel, *Via Egnat. Part. Occid.* p. 51.) In Leake's
ap a *Paleokastro*, a little to the right of the road
tween Pella and Edessa, occupies the site of
rrhus. (Comp. Leake, *North. Greece*, vol. iii.
369.)

2. A town of Syria situated on the slopes of
e Taurus, 80 M. P. to the NE. of Antioch (*Peut.*
b.), and 44 M. P. to the NW. of Beroea (*Anton.*
n.). Though of no great importance, except as
nnected with the worship of the deity whom
abo (xvi. p. 751) calls Athena Cyrrhestica, it
s the quarters of the tenth legion (Tac. *Ann.* ii.
). Procopius (*de Aed.* ii. 11), who with the
clesiastical and Byzantine writers writes the name
pos (an error which gave rise to the fable of its
ving been founded by Cyrus for the Jews on
eir return from the Captivity), mentions that it
s rebuilt by Justinian. The ruins near the vil-
ge of *Corus*, which correspond very nearly with
e distance given in the Itinerary, represent the
ient Cyrrhus. (Chesney, *Exped. Euphrat.*,
. i. p. 422; Ritter, *Erdkunde*, vol. x. pp. 928,
35, 1049, 1052). [E. B. J.]

CYRTA. [ARAURIS.]

CYRTII (Κύρτιοι, Strab. xi. p. 523), a robber
be of Media Atropatene, who lived along the shore
the Caspian Sea, adjoining the Mardi. Strabo
. p. 727) mentions another tribe of similar habits
the southern part of Persia. [V.]

CYRTONES (Κύρτωνες: *Eth.* Κυρτώνιος), an-
ently called CYRTONE (Κυρτώνη), a city of Boeo-
, east of the lake Copais, and 20 stadia from
ertae, situated upon a lofty mountain, after cross-
which the traveller arrived at Coronia. Cyrtones
ntained a grove and temple of Apollo, in which
re statues of Apollo and Artemis, and a fountain
cold water, at the source of which was a chapel
the nymphs. Forchhammer places Cyrtones on
hill of the church of St. Athanasius between the
lages of *Paula* and *Loubi*, and the Metókhi of
adra. Here is celebrated every spring a great
tival, which Forchhammer regards as the remains
the ancient festival of Apollo and Artemis.
lian ix. 24. § 4; Steph. B. *s. v.*; Forchhammer,
Boeotika, p. 197.)

CYRUS (Κῦρος). 1. A large river, which flowed
to the Caspian in a course nearly SE. There is
me difference among ancient writers whence it
se, and what was its actual course. Thus Mela
. 5) and Pliny (vi. 10) state that it rises in the
untain Coraxici, and flowed to the Caspian through
ania, Iberia, and Hyrcania. Plutarch (*Pomp.*
34) places its source in the mountains of Iberia.
Strabo (xi. pp. 491, 500) seems to consider it as
the greatest of the rivers of Albania; and Dion Cas-
sius (xxxvi. 36) and Ptolemy (v. 12) as dividing
Armenia and Albania. In other places Ptolemy
and Strabo speak as though they considered it the
boundary between Armenia and Iberia (Ptol. v. 12;
Strab. i. p. 61, xi. p. 491). Modern maps demon-
strate that Pliny and Mela were the more correct in
attributing its source to the Coraxici Montes, or
main chain of the Caucasus, as its course is almost
wholly SE. from those mountains to the sea. It
has preserved its ancient name little, if at all, changed
into *Kúr*. In its course it received several other
streams and two rivers; the one called the Cambyses
(*Yori* or *Gori*), and the other the Araxes (*Eraskh*
or *Aras*), a river hardly inferior to itself in
size. [CAMBYSES; ARAXES.] It fell into the
Caspian by many mouths, the traditional number
being said to be twelve; some of them, as indeed
Strabo remarks, being much blocked up by sand and
mud. (Ptol. v. 13; Appian, *Mithr.* c. 103; Strab.
xi. pp. 491 and 501; Agathem. ii. 10, 14.) It
may be observed that Mela (iii. 5) gives to the Cyrus
and Cambyses separate outlets into the Caspian, and
that both Ptolemy and Strabo imagined that the
Araxes flowed independently into the sea. It is
quite possible that formerly the Araxes may have
had a separate mouth. At present, however, it flows
into the *Kur*, at no great distance from the sea, as
Pliny and Plutarch believed. The name Cyrus is
no doubt of Persian origin.

2. A river of Media Atropatene, mentioned only
by Ptolemy (vi. 2. § 1) and Ammianus (xxiii. 6),
who determine its situation by placing it be-
tween the mouth of the Araxes (*Arás* or *Kúr*)
and the Amardus (*Sefid Rúd*). Modern maps in-
dicate several small rivers which flow into the Cas-
pian, agreeably with this determination; yet we
think it may be doubted whether these ancient geo-
graphers were not in error, and attributed to the
small stream what was true of the Cyrus of Armenia.
(See below.) The passage in Mela (iii. 5), which
has been claimed for the Median river, belongs, in
our opinion, to the Armenian.

3. A river of Persia, described by Strabo (xv. p.
729) as flowing through that part of the province
which was called Κοίλη Πέρσις near Pasargadae. It
was one of the tributaries of the Araxes (*Bendamir*),
which flowed into the Salt Lake, now called *Bakh-
tegan*. Strabo (xv. p. 729) states, if the present
text be right (and that it is so is rendered probable
by the consent of all the MSS.), that Cyrus derived
his name from this river, his earlier appellation
having been Agradates. Casaubon, in his edition,
changed one word in the text, and deduced the con-
trary and perhaps more probable meaning, that the
river was called after the king, and not the king after
the river. The Arabian geographers, Ibn Haukal
(p. 98) and Al Edrisi (p. 124), recognise the name
Kur or *Kur-áb* as that of a river which falls into
Lake *Bakhtegan*. If the modern maps are correct,
it would seem certain that the larger river Araxes is
that now called the *Bendamir Kúm-Firúz* or *Kur-
áb*, while the smaller one, which was the proper
Cyrus, is called the Pulwan. (De Bode, *Luristan*,
vol. i. p. 75; Fergusson, *Nineveh Restored*, p. 90.)
It has been supposed by some geographers that the
Κόρος of Ptolemy (vi. 8. § 4) is the same river;
but it is much more likely that Ptolemy was correct
in placing it in Carmania.

CYSA (Κύσα, Arrian, *Indic.* a. 26), a small village on the coast of Gedrosia, at which the fleet of Nearchus arrived. Its position is uncertain. [V.]

CYSSUS. [Casystes.]

CYTAE, CYTAEA. [Cutatesium.]

CYTHE'RA (τὰ Κύθηρα, also ἡ Κυθήρα at a later time: *Eth.* Κυθήριος: *Cerigo*), an island lying off the south-eastern extremity of Laconia. Its northern promontory, Platanistus, was distant 40 stadia from Onugnathos, from whence persons usually crossed over to the island. (Paus. iii. 23. § 1; Strab. viii. p. 363.) Pliny says that it was 5 miles from Malea; but he ought to have said Onugnathos, since the island is much further from Malea than this distance. (Plin. iv. 12. s. 19.) Cythera is of an irregular oval shape, about 20 miles in length from N. to S., and about 10 miles in breadth in its widest part. Its area is about 112 square miles. It is very rocky and contains only a few valleys; and being the most southerly continuation of the mountains of the Peloponnesus, it forms, together with Crete, the southern boundary of the Mediterranean sea. After passing this island, the ancient Phoenician and Grecian mariners entered upon an unknown sea, not so rich in islands and harbours, with different currents and winds. If we could obtain an account of the early Phoenician voyagers, there is no doubt, as Curtius remarks, that we should find that the stormy Cape Malea and the island of Cythera long formed the extreme point of their voyages, beyond which they did not venture into the unknown western seas. The Phoenicians had an ancient settlement in the island, which was the head-quarters of their purple fishery off the Laconian coast. Hence the island is said to have derived its name from Cytherus, the son of Phoenix, and also to have been called Porphyrūsa or Porphyris. (Aristot. *ap. Steph. B. s. v.* Κύθηρα; Eustath. *ad Dionys. Per.* 498, *ad Il.* p. 304, 36; Plin. iv. 12. s. 19.) It was from Cythera that the worship of the Syrian goddess Aphrodite was introduced into Greece; and consequently in the Grecian legends this island is said to have been the spot which received the goddess after her birth from the foam of the sea. Hence, in the Greek and Latin poets Cythera is constantly represented as one of the favourite residences of Aphrodite, and Cytheraea is one of the most frequent epithets applied to her. (Hesiod. *Theogn.* 195; Herod. i. 105; Virg. *Aen.* i. 680, et alibi.)

On the conquest of Peloponnesus by the Dorians, Cythera, together with the whole eastern coast of Laconia, was dependent upon Argos (Herod. i. 82). It afterwards became subject to the Spartans, who attached great importance to the island, since it afforded a landing-place for their merchant-vessels from Egypt and Africa, and the possession of it protected the coasts of Laconia from the attacks of privateers. Accordingly, they sent over annually to Cythera a magistrate called Cytherodices, with a garrison of Spartans. (Thuc. iv. 53.) The Lacedaemonian Chilon, who is reckoned among the Seven Sages, considered the proximity of Cythera so dangerous to Sparta, that he wished it sunk in the sea; and Demaratus, king of Sparta, advised Xerxes to seize this island, and from it to prosecute the war against Laconia. (Herod. viii. 235.) The fears of Chilon were realized in the Peloponnesian war, when Nicias conquered the island, B. C. 424, and from thence made frequent descents upon the Laconian coast. (Thuc. iv. 54.)

Thucydides, in his account of the conquest of Cythera by Nicias, mentions three places: Scandeia and two towns called Cythera, one on the coast and the other inland. Nicias sailed against the island with 60 triremes. Ten of them took Scandeia upon the coast (ἡ ἐπὶ θαλάσσῃ πόλις, Σκάνδεια καλουμένη); the remainder proceeded to the side opposite Cape Malea, where, after landing, the troops first captured the maritime city of the Cytherians (ἡ ἐπὶ θαλάσσῃ πόλις τῶν Κυθηρίων), and afterwards the upper city (ἡ ἄνω πόλις). According to this account we should be led to place Scandeia upon the coast of the Sicilian sea, where *Kapsali*, the modern town of *Cerigo*, now stands; and the maritime city at *Avlémona*, on the eastern coast opposite Cape Malea. This is, however, directly opposed to the statement of Pausanias (*l. c.*), who connects Scandeia and Cythera as the maritime and inland cities respectively, separated from one another by a distance of only 10 stadia. Of this contradiction there is no satisfactory explanation. It seems, however, pretty certain that the sheltered creek of *Avlémona* was the principal harbour of the island, and is probably the same as the one called Phoenicus (Φοινικοῦς) by Xenophon (*Hell.* iv. 8. § 7), a name obviously derived from the Phoenician colony. About three miles above the port of *Avlémona* are the ruins of an ancient town, called *Paleópoli*, which is evidently the site of the upper city mentioned by Thucydides. Here stood the ancient temple of Aphrodite, which was seen by Pausanias.

In B. C. 393, Cythera came again into the possession of the Athenians, being taken by Conon in the year after the battle of Cnidus. (Xen. *l. c.*) It was given by Augustus to Eurycles to hold as his private property. (Strab. viii. p. 363.) Its chief productions in antiquity were wine and honey. (Hesychii Lex. *s. v.* Κυθηρίων.) The island appears to have been always subject to foreign powers, and consequently there are no coins of it extant. It is now one of the seven Ionian islands under the protection of Great Britain. Its modern name *Tzerigo*, in Italian *Cerigo*, is remarked by Leake as almost the only instance of a Slavonic name in the Greek islands. (Leake, *Northern Greece*, vol. iii. p. 69, seq.; Curtius, *Peloponnesos*, vol. ii. p. 298, seq.)

CYTHE'RIUS (Κυθήριος, Strab. viii. p. 337; Κύθηρος, Paus. vi. 22. § 6), a small river in Pisatis in Elis, flowing by Heracleia, and falling into the Alpheius on its right bank: identified by Leake with the river of *Strefi*; by Boblaye, with the river of *Landsoï*. (Leake, *Morea*, vol. ii. p. 192; Boblaye, *Recherches*, p. 129.)

CYTHE'RUM. [Cytorus.]

CYTHE'RUS. [Attica, p. 332, b.]

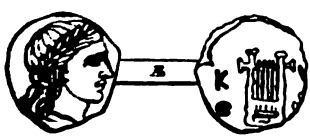
CYTHNUS (Κύθνος: *Eth.* Κύθνιος: *Thermia*), an island in the Aegaean sea, one of the Cyclades, lying between Ceos and Seriphos. (Strab. x. p. 485; Dicaearch. p. 462, ed. Fuhr.; Scylax. p. 22, ed. Hudson; Plin. iv. 12. s. 20; Mela, ii. 7; Ptol. iii. 15. § 28.) It was colonised by the Dryopes, whence it was also called Dryopis. (Herod. viii. 46; Steph. B. *s. v.*) Its name rarely occurs in antiquity. The Cythnians sent a trireme and a penteconter to the battle of Salamis. (Herod. *l. c.*) After the Peloponnesian war they became the subject allies of Athens, together with the other islanders in the Aegaean; but they never acquired power or wealth. (Comp. Dem. Περὶ Συντάξεως, p. 176.) The only native of the island mentioned by the ancient writers was Cydias the painter; and its chief celebrity is

Digitized by Google

antiquity was owing to its excellent cheeses. (Steph. B. s. v.; Eustath. *ad Dionys. Per.* 525; Athen. xii. 516; Plin. xiii. 24. s. 27.) Its political constitution, however, had not escaped the attention of Aristotle. (Harpocrat. s. v. Κόθριοι.) In the war between Philip and the Romans in B.C. 200, Cythnus was occupied by a Macedonian garrison. Attalus and the Rhodians laid siege to the city; but being unable to take it immediately, they quitted the island at the end of a few days, as the capture of the place was hardly worth the trouble. (Liv. xxxi. 15, 45.) After the death of Nero, Cythnus is mentioned as the place where a false Nero made his appearance, and gathered around him many adherents. (Tac. Hist. ii. 8, 9.)

Cythnus contained a town of the same name, situated about the middle of the western coast of the island, upon the summit and sides of a hill at least 600 feet in height. Its harbour was formed by a small rock lying in front of the town. The ruins of the ancient town are now called *Hebraeokastron*. The circuit of the walls may still be traced, though the greater part of them has disappeared. Within this circuit Ross noticed two large rectangular substructions, divided by a passage 8 feet in width; they were probably the foundations of two temples or other public buildings. From the above-mentioned passage a flight of steps appears to have been cut out of the rock, leading down to the sea. Near these steps on the descent to the sea are four chambers cut out of the rock, standing alongside of one another; they were probably a sanctuary, as there is nothing to indicate that they were sepulchres.

The modern name of the island, *Thermia*, is derived from some hot springs on its north-eastern side, which are now much frequented from various parts of Greece, for the cure of diseases. They are often mentioned by ancient writers, but appear to have been used in antiquity, as some ancient remains are found near them. (Tournefort, *Voyage*, Lett. p. 251, transl.; Ross, *Reisen auf den Griech. Inseln*, vol. i. p. 105; Fiedler, *Reise durch Griechenland*, vol. ii. p. 95.)



COIN OF CYTHNUS.

CYTINIUM (Κυτίνιον; Κυτείνιον, Ptol.), one of the four towns of Doris, more frequently mentioned in history than the other towns of the Tetrapolis. This appears to have been owing to its situation, which rendered it a place of great military importance. Its site corresponds to *Graviá*, which stands exactly at the northern entrance of the pass leading from the valley of Doris to the plain of Cephissus, in the middle of the isthmus included between the Maliac and Crissaean gulfs. The pass is formed by the ravines of two torrents flowing in opposite directions; namely, that of Gravia, which joins the *Apostolitá*, near the union of the latter with the Cephissus, and that of another river which crosses the plain of Amphissa into the Crissaean bay." The position of the town, thus commanding this defile, illustrates the intended operations of Demosthenes from Naupactus in B.C. 426. This commander proposed, if he had been successful over the Aetolians, to have marched through the Locri Ozolae, leaving Parnassus on the right, to Cytinium in Doris, and from thence to have descended into Phocis, whose inhabitants were to have joined him in invading Boeotia. (Thuc. iii. 95.) When Eurylochus, the Spartan, shortly after the failure of the expedition of Demosthenes, was about to march from Delphi against Naupactus, he deposited at Cytinium the hostages he had received from the Locrians. (Thuc. iii. 101, 102.) In B.C. 338, Cytinium was seized by Philip, from whence he marched upon Amphissa (Philochor. *ap. Dionys.* p. 742). (Comp. Scylax, p. 24; Strab. ix. p. 427, x. p. 476; Plin. iv. 7. s. 13; Steph. B. s. v. Κύτινα; Ptol. iii. 15. § 15; Leake, *Northern Greece*, vol. ii. p. 92, seq.)

CYTO'NIUM. [CERTONIUM.]

CYTO'RUS and CYTO'RUM (Κύτωρος: *Eth.* Κυτωριεύς, *fem.* Κυτωρίς: there is also Κυτωρίτης, Steph. s. v.). It appears that the name was also Cydorus. (Steph. s. v. ed. Meinecke, note.) Its mythical founder was Cytorus, the son of Phrixus, according to Ephorus. (Strab. p. 544.) Strabo and Ptolemy name the place Cytorum; and Scylax, Cytoris. It was between Amastris and Cape Carambis; and according to Strabo once a trading place of the Sinopeis. The name Cytorus occurs in the Iliad (ii. 853) together with Sesamus. [AMASTRIS.] There are said to be remains of Cytorus at a place called *Kidras* or *Kidros*, which is the ancient name. The mountains at the back of Cytorus were covered with box trees.

"Et juvat undantem buxo spectare Cytorum."

(Virg. *Geog.* ii. 437.) Apollonius (*Arg.* ii. 944) whom Virgil may have imitated, calls it "wooded Cytorus." The box forests extended from Amastris to Cytorus. Pliny (vi. 2) mentions "Mons Cytorus," which he places 63 M. P. east of Tium, and Tium is near the mouth of the Billaeus.

Leake (*Asia Minor*, p. 307) has pointed out a singular blunder in the Table. The places that are marked on the Table between Amasia and Sinope are — Cromen, Cythero,e Egilan, Carambas, Stefano, Syrtas, which "are evidently intended for Cromna, Cytorum, Aegiali, Carambis, Stefane, Syrias; the sum of the distances 149 M.P. is tolerably correct." He supposes that the author was misled by the similarity of the name of Amastris, written Mastrum in the Table, with that of Amasia; but this supposition does not seem to explain the origin of the blunder satisfactorily. The places that the Table gives between Mastrum (Amastris) and Sinope, are unknown. Forbiger (*Geog.* vol. ii. p. 436) takes all these names on the Table between Amasia and Sinope to be genuine names; and so he has Cromen, Cytherum, &c., as places on the road from Amasia to Sinope: but this is certainly not so. There is a place on the Table, named Thomia, between Stefane and Syrtas, which Leake does not mention. But whatever difficulty there may be about this one name, the blunder in the Table is manifest. [G. L.]

CY'ZICUS (ἡ Κύζικος: *Eth.* Κυζικηνός) and CYZICUM (Plin. v. 32; Mela, i. 19), a city on the Propontis in Mysia, on the neck of a peninsula as Mela says. The peninsula, which projects into the Propontis or sea of Marmora on the south coast, is joined to the mainland by a sandy isthmus. Crossing this isthmus from the mainland, a traveller finds on his left the miserable town of *Erdek*, the ancient

Digitized by Google

Artace. [ARTACE.] The site of Cyzicus is near the isthmus on the east side, in 40° 22′ 30″ N. lat. (Hamilton, *Researches*, &c. vol. ii. p. 103.) The Turks call the ruins of Cyzicus *Bal Kiz*, the second part of which seems to be a part of the ancient name; and *Bal* is probably a Turkish corruption of the Greek Παλαία. (Leake, *Asia Minor*, p. 271.) There is a place called *Aidinjik* near the isthmus, on the mainland side, where there are many marble fragments which have been brought from the neighbouring site of Cyzicus.

Strabo (p. 575) says that Cyzicus is an island in the Propontis, which is joined to the mainland by two bridges, and very fertile: it is about 500 stadia in circuit, and contains a city of the same name close to the bridges, and two closed harbours, and shiphouses (νεώσοικοι) above 200: one part of the city is on level ground, and the other is close to a hill, which they call Bear Hill (Ἄρκτων ὄρος): there is another hill that lies above the city, a single height called Dindymon, which contains a temple of Dindymene the mother of the gods, which was founded by the Argonauts. Stephanus (*s. v.* Κύζικος) says that the town was also called Ἄρκτων νῆσος. The junction of the island with the main is attributed to Alexander by Pliny (v. 32), who does not say how the junction was made. Apollonius Rhodius, who wrote after Alexander's time, still calls it an island (*Argon.* i. 936), but he also speaks of an isthmus. He names one of the ports Chytus; the other was named Panormus, as the Scholiast tells us. It is said that there are no signs of the bridges. The isthmus is above a mile long, and less than half a mile broad. It seems probable that moles were pushed out some distance, and then the opposite shores were connected by bridges. The whole passage is now a sandy flat. Hamilton (*Researches*, &c. vol. ii. p. 98) says, "we crossed the sandy isthmus which connects Cyzicus with the mainland; near the south end, many large blocks of stone, dug up in clearing a neighbouring vineyard, had been collected into a heap." "The east side of the isthmus is now an extensive marsh, covered with reeds, and probably marks the site of the principal port of Cyzicus, separated from the sea-shore by a low ridge of sand hills thrown up by the united efforts of the winds and waves. Near the northern extremity, a long ditch runs from E. to W. full of water, with a wall of great strength, fortified by towers along its northern bank; its opening towards the sea is choked up by drifted sand, but it seems to be the entrance through which the galleys of Cyzicus were admitted to her capacious port." (Hamilton.)

The ruins of Cyzicus are among cherry orchards and vineyards. There is a heap of ruins covered with brushwood, where there are many subterraneous passages, some of which may be explored to the length of more than a hundred feet. These passages are connected with each other, and appear to be the substructions of some large buildings. Cyzicus in Strabo's time had many large public buildings (Strab. p. 575), and it maintained three architects to look after them and the machinery (ὄργανα). It possessed three store-houses, one for arms, one for the machinery or engines, and one for corn. "The masonry of these substructions is chiefly Hellenic, but in some places the walls are only cased with blocks of stone: in the roof of one of the vaults is a small square opening, regularly formed with a keystone, all belonging to the original construction." (Hamilton.) If these substructions are not those of the public granary, they may belong, as Hamilton suggests, to the great temple described by Aristides in his oration on Cyzicus (vol. i. p. 237, ed. Jebb): but the extravagant bombast of this worthy rhetorician diminishes our confidence in what he says. The Agora, he says, contained a most magnificent temple, and he speaks of the parts below the roof being worthy of admiration. Xiphilinus (Dion Cass. vol. ii. p. 1173, ed. Reimarus) says that the great temple of Cyzicus was destroyed by an earthquake in the time of Antoninus Pius: but this must be a mistake, and he means to speak of the great earthquake that destroyed Smyrna and other cities in the time of Marcus, the successor of Pius. Aristides wrote a letter on the calamity of the city of Smyrna addressed to Aurelius and Commodus. The temple is described by Xiphilinus as of extraordinary dimensions: the columns were fifty cubits high and of one stone. The Cyziceni used the white marble of Proconnesus for building. (Strab. p. 588.) "About a mile NE. by N. from these substructions are the remains of an amphitheatre, built in a wooded ravine to the north of the plain, where are the principal ruins of the city. Many of the pilasters and massive buttresses have yielded to the influence of time, but seven or eight are still standing on the west side of the valley, by which the circular form of the building may be distinctly traced." (Hamilton.) A small stream flows through the middle of the area: this circumstance, and the character of the masonry at the upper end of the building, led Hamilton to suppose that the place was also used as a Naumachia. On a wooded hill to the east of the city, and above the ruins, and near the apex of the city walls, there are "only blocks of marble and broken columns built into the walls of the cottages." The site of the theatre, which faces the SW., is almost entirely grown with luxuriant vegetation. It is very large, and appears to be of Greek construction, but it is in a very ruined state. Some parts of the substructions can be traced, but there is not a bench of marble to be seen, nor a single seat remaining in its place. There are vestiges of the city walls in various parts, but it does not appear easy to trace their whole extent. Hamilton in one place speaks of "heaps of ruins, long walls, and indistinct foundations, all overgrown with vegetation that it was impossible to make them out." He only found one inscription, a Greek one, of the Roman period. "On the whole," says Hamilton, "I must say that the loose and rubbly character of the buildings of Cyzicus ill accords with the celebrity of its architects; and although some appear to have been cased with marble, none of them give an idea of the solid grandeur of the genuine Greek style." It seems likely that the larger blocks of marble have been carried away, though there is no large modern town near Cyzicus, but the materials of many ancient towns near the sea have doubtless been carried off to remote places. There are quarries of fine marble on the hills above Cyzicus, and near *Aidinjik* on the mainland. The granite was much used in the buildings of Cyzicus, and it is of a kind which is rapidly decomposed. The consequence is, that a rich vegetation has grown up, which itself destroys buildings and tombs. The sea sand also that has been blown up on the sides of the isthmus may have covered the remains at least of many buildings. It seems likely then that excavations would bring to light many remains of a rich city, of which Strabo says, that in his time "it rivals the first cities of Asia in magnitude

Digitized by Google

exuty, and its excellent institutions, both civil and ilitary, and it appears to be embellished in like anner with the city of the Rhodii, the Massaliotae, nd the Carthaginians of old" (p. 575).

The origin of this town seems unknown. A eople called Doliones or Dolicis (Steph. *s. v.* Δο-λίονες) once lived about Cyzicus, but Strabo says ast it was difficult to fix their limits. Conon *Narrat.* 41, apud Phot.) has a story of Cyzicus eing settled by Pelasgi from Thessaly, who were riven from Thessaly by Aeolians. Their king and nder was Cyzicus, a son of Apollo, who gave his ame to the peninsula which he occupied; for it ay be observed that it seems somewhat doubtful, f we look at all the authorities, whether Cyzicus as considered by the Greeks to have been originally island or a peninsula. If it was originally a eninsula, we must suppose that a canal was cut rross it, and afterwards was bridged. This king yzicus was killed by Jason on the voyage to olchis, and after the death of Cyzicus, perhaps some me after according to the legend, Tyrrheni seized e place, who were driven out by Milesians. Cyzicus as reckoned among the settlements of Miletus by naximenes of Lampsacus, and also Artace on the ame island or peninsula. (Strabo, p. 635.) Cyzicus not mentioned in the Iliad.

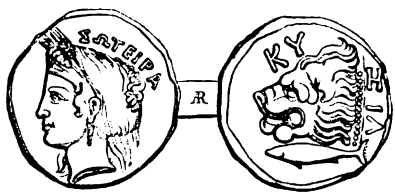
The Cyziceni are said to have surrendered to the ersians after the conquest of Miletus. (Herod. vi. 3.) The place afterwards became a dependency on thens; for it revolted from the Athenians, who re-overed it after the battle of Cynossema (B.C. 411), -at which time it was unwalled, as Thucydides ob-erves (viii. 107). These scanty notices of Cyzicus, nd the fact of its having no fortifications near the ime of the Peloponnesian War, seem to show that was still an inconsiderable city. The Athenians, getting the place again, laid a contribution on the ople. The next year (B. C. 410) the Cyziceni ad the same ill luck. Mindarus the Spartan ad-iral was there with his ships, and Pharnabazus the ersian with his troops. Alcibiades defeated Min-arus, and the Cyziceni, being deserted by the Pelo-onnesians and Pharnabazus, again received the thenians, and again had to part with their money. e learn from the notice of this affair in Xenophon *Hell.* i. 1. § 16) that Cyzicus had a port at this me. After the defeat of the Athenians at Aegos-otami, Cyzicus seems to have come again under e Lacedaemonians; but as the peace of Antalcidas B. C. 387) gave all the cities in Asia to the Persian ing, Cyzicus was among them.

Cyzicus appears to have obtained its independence fter the time of Alexander, but the notices of it re very scanty. Attalus I. of Pergamum, the ther of Eumenes, married a woman of Cyzicus, amed Apollonias, who was distinguished for her ood sense (Polyb. xxiii. 18); and we read of the yzicani sending twenty ships to join the fleet of ibernius, the brother of Attalus II., King of Per-amum. (Polyb. xxxiii. 11.) We know nothing f the fortunate circumstances which gave this town s wealth that it had, when Mithridates attempted o take it B. C. 74. It is probable that it had be-ome one of the outlets for the products of the inte-ior of the Asiatic peninsula, and it is said to have been well administered. The Cyziceni sustained a great loss in a fight with Mithridates at Chalcedon, and soon after the king attacked Cyzicus. He posted his troops on the mainland opposite to the city, at the foot of the mountain range of Adrasteia; and with his ships he blockaded the narrow passage that separated the city from the main. The strength of the walls, which had been built in the interval since the Pelo-ponnesian war, and the abundant stores of the citi-zens enabled them to hold out against the enemy. The Roman commander L. Lucullus was in the neighbourhood off Cyzicus, and he cut off the supplies of Mithridates, whose army suffered from famine, and was at last obliged to abandon the siege with great loss. (Plut. *Lucull.* c. 9, &c.; Appian, *Mith-ridat.* c. 72, &c.; Strab. p. 575; Cic. *pro Arch.* c. 9.) The Romans rewarded Cyzicus by making it a Libera Civitas, as it was in Strabo's time, who observes that it had a considerable territory, part of it an ancient possession and part the gift of the Romans. He adds that they possessed on the Troad the parts beyond the Aesepus about Zeleia; and also the plain of Adrasteia, which was that part of the mainland that was opposite to Cyzicus. They had also part of the tract on the Lake Dascylitis, and a large tract bordering on the Doliones and Mygdones, as far as the Lake Miletopolitis and the Apolloniatis. Strabo (p. 587) speaks of a place at the common boundary of the territory of Priapus and Cyzicus, from which it appears that the pos-sessions of these two towns bordered on one another, on the coast at least, in the time of Strabo. Indeed Priapus, according to some authorities, was a colony of Cyzicus. It appears that the greatest prosperity of Cyzicus dates from the time of the defeat of Mithridates. It possessed a large tract on the south side of the Propontis, and there were no other large cities on this side of the Propontis in the Roman period, except Nicomedia and Nicaea. The produce of the basin of the Rhyndacus would come down to Cyzicus. Tacitus (*Ann.* iv. 36) says that Tiberius (A. D. 25) deprived Cyzicus of its privilege of a free city (Dion Cass. liv. 7, 23; Sueton. *Tib.* c. 37) for not paying due religious respect to the memory of Augustus, and for ill treating some Roman citizens. This shows that Strabo must have written what he says of Cyzicus being Libera before the re-vocation. The effect of the revocation of this privilege would be to place Cyzicus altogether and immediately under the authority of the Roman governor of Asia. Cyzicus, however, continued to be a flourishing place under the empire, though it suffered from the great earthquake which has been already mentioned. In the time of Caracalla it received the title of Metro-polis. It also became a bishop's see under the later empire.

Cyzicus produced some writers, a list of whom is given in a note on Thucydides (viii. 107) by Wasse. (Cramer, *Asia Minor*, i. 47, note.) It had also some works of art, among which Cicero (*Verr.* ii. 4. c. 60) mentions paintings of Ajax and Medea, which the dictator Caesar afterwards bought. (Plin. viii. 38.) At some period in their history the Cyziceni conquered Proconnesus, and carried off from there a statue of the Meter Dindymene. It was a chryselephantine statue; but the covering of the face, instead of being plates of ivory, was made of the teeth of the hippopotamus. (Paus. viii. 46. § 4.) Cyzicus also produced a kind of unguent or perfume that was in repute, made from a plant which Pliny calls "Cyzicena amaracus" (Plin. xiii.; Paus. iv. 36. § 5); but Apollonius, quoted by Athenaeus (xv. p. 688), speaks of it as made from an Iris. It was also noted for its mint, which produced the gold coins or stateres called Cyziceni (Κυζικηνοί), which had a wide circulation. The Cyzicenus had on one side a female head, and

Digitized by Google

on the other a lion's head. (Hesychius, *s. v.* Κυζικηνοί; Suidas, *s. v.* Κυζικηνοί στατῆρες.) The head is supposed to be that of Cybele. The value of the coin was 28 Attic drachmae. (Dem. *in Phorm.* p. 914.) The autonomous coins of Cyzicus are said to be rare, but there is a complete series of imperial coins. It does not appear where the Cyziceni got their gold from, but it is not improbable that it was once found on the island or on the neighbouring mainland. Pliny (xxxvi. 15) says that there was in his time a temple at Cyzicus, in which the architect had placed a golden thread along all the joinings of the polished stone. The contrast between the gold and the white marble would probably produce a good effect. The passage of Pliny contains something more about Cyzicus, and the story of the "fugitivus lapis," which was once the anchor of the Argonautae. The stone often ran away from the Prytaneum, till at last they wisely secured it with lead. [G. L.]



COIN OF CYZICUS.

CYZISTRA. [Cybistra.]

D.

DAAE. [Dahae.]

DABANAS (Δαβανάς), one of Justinian's fortresses, situated between Dara and Amida (Procop. *de Aed.* ii. 4), which some of the maps confound with Darana (Ammian. xxiii. 3. § 7), which lies much further S. at the sources of the river Belias. The site has not been identified. (Ritter, *Erdkunde*, vol. x. p. 1124, vol. xi. pp. 82, 381.) [E. B. J.]

DABASAE (Δαβάσαι, Ptol. vii. 2. § 18), a people of the district called by the ancients "India intra Gangem," to the east of *Nipál*. There is some doubt about the orthography of their name, which is sometimes written Labasae. They are probably connected with the range of mountains called τὰ Δάμασσα ὄρη (Ptol. vii. 2. § 18), and which are most likely represented by the eastern spur of the *Nipál Himalayas*. [V.]

DABERATH (Δαβιρών, LXX.; Δαβειρά, Euseb.), a border city of the tribe of Zebulon (*Josh.* xix. 12), apparently identical with the Levitical city Dabareh (Δεββά, LXX.; *Josh.* xxi. 28), and with Debir in 1 *Chron.* vi. 58, though in these passages it is reckoned to the tribe of Issachar, as is also Daberath in 1 *Chron.* vi. 72 (Δεβερί, LXX.). Its site is marked by the small Moslem village of *Debûriah*, which is situated at the NW. base of Mount Tabor, on a ledge of rocks, thus answering to the description given by Eusebius and St. Jerome of the situation of Dabeira, as a town of the Jews on Mount Tabor, in the district of Diocaesareia. (Onomast. *s. v.*; Reland, *Palaest.* p. 733.) Dr. Robinson further identifies with it the Dabaritta of Josephus in the great plain (*Bib. Res.* vol. iii. p. 210), but this is very questionable. [G. W.]

DABRONA, a river in Ireland, mentioned by Ptolemy as being the first river after the Southern Promontory (*Cape Clear*) — probably the *Blackwater*, in respect to name as well as locality; since dubh = *black*. [R. G. L.]

DACHARE'NI (Δαχαρηνοί), an inland tribe of Arabia Felix, according to Ptolemy (vi. 7) identified with the Nabathaeans by Eustathius (*ad Dionys. Per.* 954). Forster conjectures that they are identical with the tribe of the *Dhry Dhaher*, part of the great Harb nation, found by Burckhardt near the *Owf* and *Zebeyde* tribes, between *Rábegh* and *Medina*, and also in the vicinity of *Medina*. (*Arabia*, vol. i. p. 141.) [G. W.]

DACHINABADES (Δαχιναβάδης, Peripl. *Mar. Ext.* p. 29), a district of "India intra Gangem," on the NW. coast of the peninsula of Hindostan, a little to the S. of Barygaza or *Beroach*. It is stated by the author of the Periplus that it was so called because Dakhan, in the native tongue, signified south. Dakhinabades, according to this view, would be a purely Indian word, and would mean "city of the south." Dakhan, however, in which we recognise the well-known modern name Deccan, is not properly the south: it is derived from the Sanscrit Dakshina, meaning the country on the right hand, and was so named by the Hindu conquerors, who entered India from the NW. The district of Dakhinabades contained two emporia, Plithana and Tagara. [V.]

DA'CIA (Δακία: *Eth.* and *Adj.* Δάκος, Dacus, Dacicus). This country, the last of the Roman conquests in Europe, can only be considered as a geographical expression denoting the land of the Daci or Getae (ἡ τῶν Γετῶν γῆ, Strab. vii. p. 295), till its incorporation with the empire by Trajan, when it received certain definite limits.

The Getae (Γέται, sing. Γέτης, Steph. B.) were in antiquity enumerated among the Thracian group of nations; and this opinion has been confirmed by the most competent among modern inquirers. (Schafarik, *Slav. Alt.* vol. i. p. 31.) It need hardly be added, that the theory which regarded the Getae and the "long-haired" Goths of Scandinavia as equivalent names, though supported by Procopius, Jerome, Vopiscus, and Spartian, but, above all, by Jornandes (*De Reb. Get.*), is entirely devoid of foundation. The seat of this people as they first appear in history must be placed to the N. of Mt. Haemus, and S. of the Ister. If we may trust Herodotus (iv. 92, foll. v. 3), the Getae were superior to the other Thracian barbarians. Our knowledge of the later Dacians partly confirms this statement, however much Grecian imagination might colour the sketch, or have originated the fables connected with their indigenous deity Zalmolxis or Zamolxis. Thucydides (ii. 96) describes them as living in the same district as that which they occupied when conquered by Dareius, and they were among the tribes who followed Sitalces to the field. In the expedition of Philip against Scythia (Justin. ix. 2), the Triballi, who had not long before been driven out of their ancient seats in the interior by the irruption of the Kelts, occupied the steppe between the Danube and the Balkan. It would seem that the Getae had been forced across the river by the Triballi, as Alexander, in the campaign of B. C. 335, found the Getae ranged upon the opposite side of the Ister in the number of upwards of 10,000 foot and 4000 horsemen. Under favour of night, Alexander crossed over the river unmolested, defeated the Getae, and took their town. (Arrian, *Anab.* i. 2; Strab. p. 301.) In B. C. 292, Lysimachus, in the aggressive warfare which he waged against the Getae, penetrated into

Digitized by Google

he heart of their country: in the plains of Bessarabia (ἡ τῶν Γετῶν ἐρημία, Strab. p. 305) his retreat was cut off, and he, with all his army, had to surrender. Lysimachus, however, was set free, and the generosity of Dromichaetes, the native king, found a place among all the collectors of anecdotes. (Strab. p. 302; Plut. *Demetr.* 39, 52; Polyaen. vii. 7. comp. Paus. i. 9. § 5.) It is probable that the Thracian prince obtained a large treasure, either from the plunder of the camp, or the ransom of his prisoners, as on two separate occasions, once in 1545, and again rather more than twenty years since, many thousand gold coins were found near *Thorda*, some of them bearing the name of Lysimachus, and others with the epigraph ΚΟΖΩΝ. (Paget, *Hungary and Transylvania*, vol. ii. p. 105.)

When the Gauls occupied Eastern Europe, the Getae were involved in war with that people. (Justin. xxvi. § 3.) They were defeated, and were sold in great numbers for slaves to the Athenians, who had formerly obtained their supplies from Phrygia and Caria, as is shown by Aristophanes and the older comedians; while, after this period, the names of Davus (Dacus and Davus are convertible terms) and Geta appear as the names of slaves in the writers of the New Comedy and their Roman imitator Terence. (Strab. p. 304; *Mém. de l'Acad. des Inscr.* vol. xxv. pp. 34, foll.; Niebuhr, *Kleine Schrift.* pp. 352—398; Schafarik, *Slav. Alt.* vol. i. p. 469.)

It is not known why and when the Getae changed their name to that of Daci. The ancients are unanimous in considering them as identical (Plin. iv. 12; Paus. i. 12. § 4; Dion Cass. li. 67; Appian, *Praef.* c. 4; Justin. xxxii. 3. § 16), though Strabo (p. 304; comp. Senec. *Nat. Quaest.* 1) distinguishes them by saying that the Getae occupied the district towards Pontus and the E., the Daci that towards Germania and the sources of the Ister. Curio, the first Roman general who advanced in these regions as far N. as the Danube, was afraid to attack Dacia. (Flor. iii. 4. § 6.) According to some, Julius Caesar, in the extensive schemes of conquest they assign to him, had meditated the invasion of Dacia. (Suet. *Jul.* 44.) The native prince Boerebistas, a contemporary of Augustus, and a man of great capacities, ventured to cross the Ister, and, by ravaging Thrace, and exterminating the people of the Boii and the Taurisci, had increased the power of the Getae to such an extent as even to cause terror to the Romans. (Strab. pp. 298, 303.) In B. C. 10, Augustus sent Lentulus to attack their king Cotiso. The Romans appear to have marched up the valley of the *Maros*, but the expedition had no practical results. (Flor. iv. 12. § 19; Strab. p. 304; Dion Cass. liv. 36; Hor. *Carm.* iii. 8, 18; Suet. *Oct.* 21.) Ovid, in his exile, has given a picture of the Getae, with all their repulsive features, set off by the horrors of the inclement climate. The poet, however, learnt their language (*Trist.* v. 12, 58, *ex Pont.* iii. 24), and composed a song of triumph for Augustus in the rude tongue of his barbarian neighbours (*ex Pont.* iv. 13, 23). The only specimens of this ancient language are in the names of men and places, and in particular words scattered through the writers of Greece and Rome, or preserved by lexicographers, such as Hesychius and Suidas. Adelung (*Mithridat.* vol. ii. p. 344) has collected many of these words and terminations of words, such as the local ending in dava, which frequently occurs among Dacian towns. From this period the Dacians were engaged in frequent wars with the Romans. Fortune inclined to neither side, till at last they obtained, under their king Decebalus, so decided an advantage over the weakness of Domitian as to reduce that emperor to accept a peace, accompanied by the most disgraceful conditions, and, among others, the payment of a yearly tribute to Dacia. A full account of these two campaigns of Domitian is given in the *Dict. of Biog.* art. *Decebalus*. When Trajan assumed the imperial purple, he prepared to restore to its brightness the tarnished honour of the empire, and himself headed the expedition against Dacia. In A. D. 101, Trajan left Rome, and passing through Pannonia, and crossing the *Theiss*, followed the course of the *Maros* into Transylvania. His first great battle was on the *Crossfield* near *Thorda*. The Moldo-Wallachian peasant still calls the battle field by the name "*Prat de Trajan*" (Pratum Trajani); a remarkable instance of the tenacity of a people's recollections. For other curious examples of the honour in which the modern inhabitants hold the memory of the conqueror of Decebalus, see *Revue des deux Mondes*, vol. xxi. p. 110. Decebalus broke the humiliating conditions to which he had been subjected; but Dacia was doomed to become a Roman province, and in A. D. 104 Trajan, who had assumed the title of Dacicus, set out on his second campaign. The emperor, who was now better acquainted with the geography of the country, chose a nearer route, and one by which he might at once reach the capital of the enemy. On this occasion he crossed the Danube below the Iron Gate, where his famous bridge was afterwards built, and sending one part of his army along the Aluta, he himself followed the valley which now leads from *Orsova* by *Mehadia* and *Karansebes* over the Iron Gate pass — the deep mountain gorge which, standing at the entrance of Transylvania, has been alternately contested by Dacian, Roman, Christian, and Moslem. Taking this route, he marched direct upon the capital Sarmizegethusa.

The Dacians, unable any longer to defend their capital, set fire to it, and fled to the mountains. Decebalus, finding it impossible to escape his pursuers, stabbed himself, and many of his followers committed suicide, to avoid subjection to the Romans. Dion Cassius (lxviii. 6—14) has given the history of this famous war; but the Column of Trajan at Rome, upon which the chief events of the two campaigns are minutely figured, forms the best commentary on this final victory of Rome, which Caninius the poet (Plin. *Ep.* viii. 4. § 1) had proposed to narrate in verse as an eternal monument to the illustrious Trajan. (Paget, *Hungary and Transylvania*, vol. ii. p. 107; Fabretti, *de Columna Traj.*; Mannert, *Res Traj. ad Danub. gestae;* Engel, *Comm. de Exped. Traj. ad Danub.*; Franke, *Zur Geschich. Trajans*, pp. 66—141.)

Dacia now became a Roman province, and received its definite political boundary; on the W. it was bounded by the Tysia, which divided it from the Iazyges Metanastae; on the N. by the Mons Carpatus; to the E. its limits were the Hierasus, up to its confluence with the Ister; while on the S. it was separated from Moesia by the Danube. (Ptol. iii. 8. § 4.) The whole circumference was calculated by Eutropius (viii. 2) at 1000 M. P., but this is below the mark, as it contained what is now the *Banat of Temesvár*, *Hungary* E. of the *Theiss*, the whole of *Transylvania*, the *Bukowina*, the S. point of *Galicia*, *Moldavia* W. of the *Pruth*, and the whole of *Wallachia*.

Digitized by Google

After the subjugation of the country, Trajan turned his attention to securing his new province. The bridge over the Danube which was to afford a communication with the S. provinces, had been commenced probably about A. D. 103. Dion Cassius, governor of Pannonia under Alexander Severus, wrote an account of Trajan's bridge; but this part of his work has been lost, though an abridgment is given in the epitome of Xiphilinus. According to this writer, it was built by Apollodorus, the architect of the Forum Trajanum and of the Column at Rome, and consisted of 20 piers; each pier was 150 Roman feet high, 60 feet thick, and they were 170 feet distant from each other. At either end it was protected by towers, and the whole work was built of hewn stone. (Dion Cass. lxviii. 13.) The latter circumstance seems to be an exaggeration, and the account of the situation, depth of water, nature of the soil, and other particulars, contains many errors. A comparison of the other two ancient authorities—the large copper coin of Trajan with the bridge on the reverse, and the column, where part of the bridge is represented in the background—shows that the upper part of the bridge was of wood, while the piers are undoubtedly of stone. About A. D. 120 Hadrian destroyed the bridge, as it is said, to prevent the barbarians crossing over into the Thracian provinces. (Dion Cass. *l. c.*) The remains of this bridge are to be found a little below the miserable village of *Scala Gladova*. All that is now left is a solid shapeless mass of masonry on each bank, about 20 feet high; and between that and the river there is on each side a broken wall, with a level on the top of the banks, apparently forming the pier from which the first arches sprang. On both sides the banks are of a considerable height above the water. In the bed of the river, and in a direct line between these ruins, the surveyors—as will be seen by the accompanying plan, in which the upper line indicates the common height of the water, the lower that to which it sometimes falls, when the tops of

REMAINS OF TRAJAN'S BRIDGE.

several of the pillars become visible—have traced the remains of 13 pillars. Not far from the middle, a kind of island has been formed which occupies the space of 4 pillars, and on the N. bank there is a second space, apparently filled up by deposits, which leaves room for one other pillar; thus making, in addition to those on the banks, the number 20. The distance between the pillars on either bank is about 3,900 English feet. The pillar on the N. bank is not built of hewn stone, but of a mass of shapeless materials joined together with Roman cement. It may have been encased in hewn stone which is now destroyed. On the Wallachian side are the remains of a tower, surrounded by a deep and circular fosse. (Paget, vol. ii. p. 57.)

Besides this great work Trajan constructed roads (the great agents for civilization): these were three in number, and were connected with the Via Trajana, which ran along the S. side of the Danube, partly cut in the rock and partly supported on wooden beams. The road which lay most to the W. quitted Viminacium,—or, more properly, the fortress on the opposite side of the river, *Uj-Palanka*,—and took a NE. direction up to Tiviscum (*Temesvar*). (In this road the Peutingerian Table gives the following stations:—Arcidava, Centum Puteae, Berzovia Anzis, Caput Bubali, Tiviscum. The middle road, quitting *Orsova*, followed the valley of the *Cerna*, closely hemmed in by its wooded hills, to *Mehadia*, and, pursuing the same course as the modern road, proceeded along the banks of the *Temes*, then crossed the narrow gorge where the Romans are said to have had literally an iron gate, which gave its name to the place. Its direction then turned towards the E. along the vale—or rather plain—of *Hatzeg*, over *Hunyad* and the level before *Varheily*, and the line of *Deva*, and there fell into the beautiful valley of the *Maros*,—taking the route which, should Transylvania ever attain to a higher civilisation, will be the future great commercial road to unite the wide-growing districts of its well-watered volcanic soil with the stream of the Danube. Still proceeding in a NE. direction along the *Maros*, it passed *Kerisburg*, *Thorda*, *Maros Vasarheli*, and so on to the frontier of Moldavia. Again, taking the direction of the Peutingerian Table, the following stations are on this road:—Tierna, Ad Mediam (*Mehadia*—with the baths of Hercules, which were known to the Romans as early as the times of Hadrian, and were in high repute for their medicinal virtues), Praetorium, Ad Pannonios, Gaganae, Masclianae, Tiviscum, Agnavae, Pons Augusti, Sarmizegethusa, Ad Aquas, Germizera, Blandiana, Apula, Brucla, Salinae, Patavissa, Napoca, Optatiana, Langiana, Cersie, Porolissum.

The third road, which lay towards the E. left the neighbourhood of *Scala Gladova*,—probably crossing Trajan's Bridge,—passed along the valley of the Aluta (*Alt*), and, mounting the *Rothenthurm* pass, descended upon *Karlsburg*, where it fell in with the other road. The following are the stations up to Apula,—the mining capital of the Romans in Dacia, the seat of the Collegium Aurariorum, and the residence of the procurator or chief officer of the gold mines:—Drubetis, Amutria, Pelendova, Castra Nova, Romula, Acidava, Rusidava, Pons Alutae, Burridava, Castra Trajana, Arutela, Praetorium, Pons Vetus Stenarum, Cedonie, Acidava, Apula.

Ptolemy (iii. 8) has added the names of the following places which are not to be found on the great Roman roads, between the Tysia and the Aluta, in the direction from N. to S.:—Euroveum (Ρουκκόνιον), Docidava (Δοκιδαύα), Ulpianum (Οὐλπιανόν), Ziridava (Ζιρίδανα), Zurobara (Ζουρόβαρα), Lizizis (Λιζίζις), Zeugma (Ζεῦγμα), Acmonia (Ἀκμωνία), Phrateria (Φρατερία). Then E. of the Aluta, in the direction from S to N.:—Arcinum (Ἄρκιν(ν)α), Pinum (Πινόν), Sernum (Σερνον), Tiasum (Τίασον), Nentidava (Νεντίδανα), Piroma (Πιρούμ), Hydata (Ὕδατα), Tiriscum (Τίριστον), Marcodava (Μαρκόδανα), Comidava (Κομίδανα), Rhamidava (Ῥαμίδανα), Zusidava (Ζουσίδανα), Peloda (Πάλοδα), Angustia (Ἀγγουστία), Praetoria Augusta (Πραιτωρία Αὐγούστα), Sandava (Σανδανα), Utidava (Οὐτίδανα), Petrodava (Πετρόδανα), Carsidava (Καρσίδανα), Patridava (Πατρίδανα), Triphulum (Τρίφυλον), Arcobadara (Ἀρκοβάδαρα).

The rivers of Dacia which flowed into the Danube in the direction from W. to E., were as follows:—Tisianus or Tysia, with its E. affluents Ceprasus or Grissia, and Marisus; Tibiscus, springing from the Carpathians; Gifil; Alutas; and Hierasus, which has been identified with the Πάρας or Παρετός of Herodotus (iv. 48).

Dacia was made a consular province (Capitolin. Pertin. 2, 3) under a "legatus," and divided into districts, as in 129 there appears "Dacia Inferior" under Hadrian, and in an inscription, the age of which is not known, "Dacia Apulensis" (Orelli, Inscr. n. 3688). Notwithstanding the resolution of Hadrian to contract the limits of the empire, and the steps he actually took for that purpose, the Romans seem to have remained masters of Dacia till the time of Aurelian (A. D. 270—275); when they finally retired across the Danube, and left Dacia to the Goths. The Roman colonists were placed on the south of the river, in a district lying between Upper and Lower Moesia, which bore the name of DACIA AURELIANI (Vopisc. *Aurel.* 39; Ruf. *Brev.* 8; Eutrop. ix. 15), and which was afterwards divided into two parts:—DACIA RIPENSIS, on the Danube, with the capital RATIARIA; and DACIA MEDITERRANEI, with the capital SERDICA. (Marquardt, *Handbuch der Röm. Alt.* p. 108.) An intercourse of commerce and language was gradually established between the opposite banks of the river; and Dacia, though serving a Gothic master, proved the firmest barrier against the barbarians of the north. In spite of the strong lines which the Visigoths were preparing to construct between the Pruth, Danube, and the mountains, they gave way before the destructive inroads of the Huns, about A. D. 376. (Amm. Marc. xxi. 3; Jornand. *de Reb. Get.* c. 24; Schafarik, *Slav. Alt.* vol. i. p. 324.) After the death of Attila in A. D. 453, the old country of Dacia, from the Carpathian mountains to the Euxine, became the seat of a new power which was erected by Ardaric, king of the Gepidae. When the kingdom of the Gepidae was destroyed by the Lombards and Avars in A. D. 566, these districts were occupied without resistance by a new colony of Scythians. The Dacian empire of the "Chagans" lasted for upwards of 300 years, till it fell before the might and prowess of the great Charlemagne. The Wallachians—or "Rumunyi," as they call themselves—are not to be confounded with the *Vlakhi* (Βλάχοι), which is a much older and wider-spread name, belonging to the Kelts. (Schafarik, *Slav. Alt.* vol. i. p. 235.) Both of the Wallachian stocks on either side of the Danube were of the same descent, and consisted of a mixture of Slaves, Getae, and Romans, who from the seventh to the tenth century sheltered themselves in the mountains of Dacia, Macedonia, Thessaly, and Albania; and when the times became more peaceable, spread themselves over the neighbouring plains. (Schafarik, *Slav. Alt.* vol. ii. p. 205; Fessler, *Geschich. der Ungern*, vol. i. p. 71.)

The Magyars had made themselves masters of Dacia before the tenth century: its later history falls without the province of this work. It is interesting to observe that Bethlén Gabor, the Protestant hero of Transylvania in the Thirty Years' War, had intended to have founded the ancient Dacian empire in favour of himself, but abandoned it in consequence, it seems, of his being childless.

The dress, features, and whole appearance of the modern Wallachs, correspond entirely with the Dacians of Trajan's Column. They have the same arched nose, deeply-sunken eye, and long hair, the same sheepskin cap, the same shirt, bound round the waist and descending to the knee, and the same long loose trousers which the Roman chain is so often seen encircling at the ankles. It is more difficult to decide the claims of the Wallack to Roman descent; but an admixture of Roman and Dacian blood—the conquerors and the conquered—may reasonably be inferred. Though the duration of the Roman empire only lasted for about 170 years in this country, yet in none has it left more lasting impression of its domination, especially in the language. That which is spoken by all the people of this nation is soft, abounding in vowels, and deriving most of its words from the Latin, mixed up with many forms of Slavish origin.

It is uncertain what coinage the Dacians used during their independence: they were probably tetradrachms, of rude workmanship, copied after the money of Philip of Macedon, great numbers of which have been found in Transylvania. Coins of the imperial period, from the time of Philip to that of Gallienus, are extant: the type constantly found is a woman, generally standing,—the symbol of Dacia,—with the epigraph PROVINCIA DACIA. (Eckhel, vol. ii. p. 4.)

(Sulzer, *Gesch. Daciens;* Ersch and Gruber, *Encyclopädie, s. v. Dacia;* Wilkinson, *Wallachia and Moldavia;* Paget, *Hungary and Transylvania;* Neigebauer, *Dacien aus den Ueberresten des Klass. Alterthums.*) [E. B. J.]

DACIBY'ZA (Δακίβυζα), a place in Bithynia, on the road from Chalcedon to Nicomedia. The modern *Gebse* or *Givyza*, near the north coast of the bay of Astacus, seems to preserve the ancient name. It is mentioned by several of the historians of the Lower Empire. (Leake, *Asia Minor*, p. 9.) [G. L.]

DADASTANA (Gen. ae; Δαδάσταινα, Ptol. v. 1), an inland town of Bithynia, according to Ptolemy. The Table places it on a road from Nicaea to Juliopolis, and 29 M. P. from Juliopolis. It appears to have been near the borders of Bithynia, as Ammianus says (xxv. 10) the emperor Jovianus on his return from the East came from Ancyra to Dadastana, where he died suddenly. [G. L.]

DADES (Δάδες, Ptol. v. 14. § 2), a promontory on the S. coast of Cyprus, W. of Thronoi, which D'Anville has identified with *Kiti*. (Engel, *Kypros*, vol. i. p. 99.) [E. B. J.]

DADICAE. [DARADRAE.]

DAE'DALA (τὰ Δαίδαλα: *Eth.* Δαιδαλεύς), a city of the Rhodia, that is, the Peraea in Caria, or a small place, as Stephanus B. says (*s. v.*), on the authority of Strabo; and also a mountain tract in Lycia.

The eastern limit of the Rhodian Persea was the town of Daedala, and after Daedala, which belongs to the Rhodii, is a mountain of the same name, Daedala, where commences the line of the Lycian coast: near the mountain, that is, on the coast, is Telmissus, a town of Lycia, and the promontory Telmissis. (Strab. pp. 664, 665.) The Daedala is that part of the mountain country of Lycia which lies between the *Dalamon Tchy* and the middle course of the Xanthus; and the high land comes down to the coast at the head of the gulf of Glaucus or *Makri*. (*Map*, &c. by Hoskyn, *London Geog. Journal*, vol. xii.) In Mr. Hoskyn's map just referred to, the ruins of Daedala are placed near the head of the gulf of Glaucus, on the west side of a small river named *Inigi Chai*, which seems to be the river Ninus, of which Alexander in his Lyciaca (Steph. B. *s. v.* Δαίδαλα) tells the legend, that Daedalus was going through a marsh on the Ninus, or through the Ninus river, when he was bitten by a water snake, and died and was buried there, and there the city Daedala was built. The valley through which the Ninus flows is picturesque, and well-cultivated.

Digitized by Google

"On the mountain on the W. side of the valley is an ancient site, probably Daedala: here are numerous tombs hewn in the rocks in the usual Lycian style; some are well-finished. The acropolis stood on a detached hill; on its summits are remains of a well, and a large cistern. We did not find any inscriptions." (Hoskyn.) But though no inscriptions were found, there is hardly any doubt that the place is Daedala. Pliny (v. 31) mentions two islands off this coast belonging to the Daedaleis. There is an island off the coast east of the mouth of the *Inigi Chai*, and another west of the mouth of the river; and these may be the islands which Pliny means. The islands of the Cryeis, three according to Pliny, lie opposite to Crya, on the west side of the gulf of *Makri*. Livy (xxxvii. 22) mentions Daedala as a "parvum castellum." Ptolemy (v. 2) places Daedala, and indeed the whole of the west side of the gulf of Glaucus, in Lycia.

The reader may refer to Hoskyn's map and the *Geog. Journal* (vol. xii) as to the site of Caunus also, which passage the writer of the article CAUNUS overlooked. [G. L.]

DAEDALA (Δαιδάλα, Ptol. vii. 1. § 49), a town or district of "India intra Gangem," E. of the Indus, and between that river and the M. Vindios (*Vindhya Mts.*), the territory of the Caspiraeans. Curtius would seem to place it on the W. of the Indus (viii. 10. § 19), and the same view is taken by Justin, if his *Montes Daedali* refer to this place (xii. 7). Stephanus simply notices the existence of a place of this name in India. [V.]

DAE'MONUM INSULAE (Δαιμόνων νῆσοι), islands off the coast of Arabia, and in the Arabian Gulf (*Red Sea*) (Ptol. vi. § 15), apparently lying off *Yambo*. [G. W.]

DAESIDIA'TAE, DESIDA'TAE (Δαισιδιᾶται), one of the many Pannonian tribes. (Strab. vii. p. 314.) Pliny (iii. 26) and Velleius Paterculus (ii. 115), indeed, mention them among the Illyrian tribes, but this probably arises from the fact that the Romans regarded the Pannonians generally as Illyrians. [L. S.]

DAETICHAE (Δαιτῖχαι, Ptol. vii. 1. § 51), a tribe of "India intra Gangem," to the N. of the Ganges, and apparently seated among the spurs of the Himalaya mountains. They may have occupied the western portion of *Nipál*. [V.]

DAGASEIRA (Δαγάσειρα, Arrian, *Ind.* c. 29), a small place, perhaps a headland, visited by the fleet of Nearchus. It was in the country of the Ichthyophagi. Forbiger thinks that it is represented by *Cape Iask*, but this would seem to be more to the westward at Carjella. If the word be of Arabian origin, its original form may have been *Dah-jezireh*, the island of Dah. The whole district was anciently called Gedrosia. (Vincent, *Voyage of Nearchus*, vol. i. p. 274.) [V.]

DAHAE (Δάαι, Steph. B. *s. v.*; Δάοι, Herod. i. 52; Dahae, Plin. vi. 19), a numerous nomad tribe who wandered over the steppes to the E. of the Caspian. Strabo (xi. p. 511) has grouped them with the SACAE and MASSAGETAE as the great Scythian tribes of Inner Asia to the N. of Bactriana. These Dahae were subdivided into PARNI (Πάρνοι, p. 508) or APARNI (Ἀπαρνοί, p. 511), who were found near Hyrcania; XANTHII (Ξάνθιοι), and PISSURI (Πισσοῦροι). Alexander met them on the banks of the river Oxus, and subdued them. (Curt. viii. 3; Justin. xii. 6. § 18.)

As might be expected, they occupied no definite position, but moved as necessity might require: they appear in Arrian (*Anab.* iii. 28) on the Jaxartes, and were in later times found in this neighbourhood. They were hardy warriors ("indomiti Dahae," Virg. *Aen.* viii. 728), who served Darius as cavalry (Arrian, iii. 11), Alexander (Arrian, v. 12) and Antiochus (Polyb. v. 79; Liv. xxxv. 48, xxxvi. 40) as mounted archers. They were also useful as foot-troops. (Amm. Marc. xxii. 8. § 21; Suid. s. v. Ἀγαθός.)

It is most questionable whether any connection between the Dahae and the Thracian Daci can be made (comp. Strab. vii. p. 304); but Ritter (*Erdkunde*, vii. pp. 668, foll.) has noticed the curious coincidence of the successive arrival of Daci, Getae, and Scythian tribes to the W. of the Caspian, upon the banks of the Ister: while in a previous age the Jaxartes and Oxus were occupied by Dahae, Yueti (*Getae*), and Massagetae to the E. of the Caspian. The writers of Greece and Rome know nothing of the Dahae but their name, position, and warlike virtues. It would appear that the annals of the Chinese give more special information upon the interesting subject of these and other Germanic or red and fair-haired races in Central Asia — one of the most important discoveries of modern times. (Ritter, *l. c.*; comp. Humboldt, *Asie Centrale*, vol. ii. p. 63.) [E. B. J.]

DAI. [DAHAE.]

DAIX (Δάϊξ). In the geography of Ptolemy (vi. 14; comp. Menand. *Hist.* p. 301, ed. Bonn.) the river, which he describes as flowing into the Caspian, is the second river from the Rha (Volga) towards the Jaxartes, the Rhymnus intervening; but there must be some mistake (comp. Ritter, *Geog. Herod.* vol. i. p. 180), as there can be no doubt that the Daix is represented by the *Jaik* or *Ural* (Humboldt, *Asie Centrale*, vol. ii. p. 18), which forms part of the E. limit of Europe, rising in the *Ural* mountains, and falling into the Caspian after a course of about 900 English miles. The river is the W. boundary to the vast steppes over which the hordes of the *Kirghis-Kazaks* roam. (Levchine, *Hordes et Steppes des Kirghis-Kazaks*, p. 3.) [E. B. J.]

DALANDA (Δάλανδα, Ptol. v. 7. § 2). Kiepert (*Erdkunde*, vol. x. p. 844) has conjectured that the site of this place in the Lesser Armenia may be identified with the remarkable castle of *Derendeh*, situated at the *Tokhmah Sú* upon a rock of nummulitic limestone, forming cliffs which rise 300 feet above the river's bed. This rock has extensive ruins on the platform, with hewn cisterns for preserving the rain water. These ruins, however, do not date beyond the epoch of the Turks, nor are any to be perceived which belong to a more ancient period, though it has been assumed, from its remarkable position, that it must have been one of the many Roman or rather Byzantine fortresses which existed in Armenia Minor. (St. Martin, *Mém. sur l'Arménie*, vol. i. p. 189; *Journ. Geog. Soc.* vol. x. p. 318.) [E. B. J.]

DALDIS (ἡ Δάλδις: *Eth.* Δαλδιανός), a town which Ptolemy places on the borders of Phrygia and Lydia (v. 2); and Suidas (*s. v.* Ἀρτεμίδωρος) in Lydia. It was the birthplace of Artemidorus, the author of the Oneirocritica. There are coins of the imperial period with the epigraph Δαλδιανῶν. The site is unknown. [G. L.]

DALION. [DIAGON.]

DALLUNTUM, a town of Dalmatia, which the Antonine Itinerary places on the road from Narona to Epidaurus, 29 M. P. from the former. It appears

the Peutinger Table under the name of Dr-
ITUM. [E. B. J.]

DALMANU'THA (Δαλμανουθά). The name
rs only in St. Mark's Gospel (viii. 10), where
parallel passage in St. Matthew (xv. 39) has
γδαλά, which enables us to identify the district
Dalmanutha with the plain of Gennesareth, to the
of which Magdala was situated. Lightfoot
Horæ. Dec. cap. v. § 2) offers several suggestions
to the origin of the name, but none of them satis-
tory. [G. W.]

DALMATIA (Δαλματία, Δαλματική, Dalmatia,
hatia; Eth. and adj. Δαλμάτης, Δαλματεύς,
hata, Dalmatensis, Dalmaticus). The Dalmatians
ned a portion of that great aggregate of tribes
ich inhabited the broken and indented coast E.
the Adriatic from the Celti Taurisci as far S. as the
uroti and Macedonians. These tribes, which com-
hended, besides the Dalmatians, the Veneti, Pan-
nans, Dardani, Autariatae and others, belonged to
Illyrian group; and the territory which with va-
ing limits was occupied by them bore the common
me of Illyricum [ILLYRICUM]. Strabo (vii. p. 315)
erted that it was a peculiarity of the Dalmatians,
divide their lands afresh (χώρας ἀναδασμός) every
fth year; and that they were not in the habit of
ng coined money among themselves.

The inland parts of this district are diversified by
dulating grounds, hills, and high mountains; many
the latter have the same rugged appearance as
me of the coast. The geological character of the
ks of this country is referred to the secondary
mation.

Sterility is the general character of the hilly parts
Dalmatia, and it is singular that the N. sides are
nally less barren than the S. slopes. The soil,
ugh not rich, is good; Strabo (p. 315) indeed de-
bes it as 'sterile, unsuited to agriculture, and
rely affording a subsistence to the inhabitants." He
ds (p. 317), and this may account for its impover-
ed condition, "The country which, with the ex-
ption of a few rugged spots, abounds every where
h the olive and vine, has always been neglected, and
worth has been unknown in consequence of the
lthless and predatory habits of the inhabitants."

The coast was well furnished with harbours as
ll on the mainland as in the neighbouring islands,
hile the opposite coast of Italy is without ports.
antiquity Dalmatia produced a great quantity of
d ("aurifera terra," Mart. x. 78; Stat. *Silv.* i.
53), and if Pliny (xxxiii. 4) may be believed, as
uch as 50 pounds of gold were procured daily
om the mines in the time of Nero. There is some
fficulty in these statements, because, as far as pre-
nt information goes, Dalmatia can boast of neither
ld nor silver. Gold has, however, been found at
jevo in *Bosnia*; and as there can be little doubt
t that the Dalmatia of the Romans included much
Bosnia, the statements of the ancients must be
ferred to this district. (Neigebauer, *Die Süd-*
wen, p. 211; comp. Fortis, *Viaggio in Dalmazia*,
113; Wilkinson, *Dalmatia*, vol. i. p. 219.)

In the reign of Gentius, last king of Illyria, a
partition took place among his subjects. They
ayed Pleuratus as long as he lived, but after his
ath, on the accession of Gentius, the Dalmatae re-
olted, B. C. 180, having assumed that name from the
wn of Delminium (or Dalminium) which they chose
the capital of their new state. (Polyb. xxvii. 18.)
he territory of the Dalmatae was at first compre-
nded between the Naro (*Narenta*) and the Tilurus
or Nestus (*Cettina*), and contained at one period twenty
cities; it then extended to the Titius (*La Kerka*),
and the whole country received the name of Dal-
matia, under a republican form of government, which
lasted till the inhabitants either delivered themselves
up to Rome, or were conquered by her armies.

In consequence of a quarrel between them and the
Lissans and Daorsi, who were allies of Rome, a con-
sular army was sent against them. The consul, C.
Marcius Figulus, entered Dalmatia, B. C. 156, and
its strongly fortified capital Delminium having been
taken, the Dalmatians were obliged to sue for peace;
and their liberty was only allowed them on condition
of their paying tribute to Rome. (Polyb. xxxii. 24;
Appian. *Illyr.* 11; Liv. *Epit.* xlvii.; Flor. iv. 12.)
In the following year they were subdued by P. Cor-
nelius Scipio Nasica Corculum (Liv. *l. c.*). Delmi-
nium, their capital, it would appear, suffered to such
an extent (Strab. p. 315) that the seat of government
was transferred to Salona. In B. C. 119, L. Caecil-
lius Metellus, who was consul, declared war against
the Dalmatians, though they had been guilty of no
offence. They offered no opposition to him, and after
wintering at Salona he returned to Rome, and gained
the undeserved honour of a triumph and the surname
Dalmaticus. (Liv. *Epit.* lxii.; Appian. *Illyr.* 11.)

Appian (*Illyr.* 13) has told the story of the 4th
Dalmatian war. The Liburnians, who were attacked
by their restless neighbours, appealed to Rome for aid.
Troops were sent to enforce the demand which had
previously been made, that the Dalmatians should
evacuate Promona. In B. C. 48, Gabinius lost more
than 2000 men in an engagement with the natives,
and then fell back upon Salona. It was reserved for
Vatinius to wipe off the disgrace which the Roman
arms had sustained. He was saluted as "imperator"
by his soldiers, and received the honours of a "sup-
plicatio" from the senate in B. C. 45. The death of
J. Caesar emboldened the Dalmatians. Fortune fa-
voured them. Vatinius took refuge in Epidamnus,
and the war against M. Antonius and Octavianus
prevented Brutus, to whom the province had been
decreed, from punishing their defection. In B. C.
34, Octavianus led a formidable army into Dalmatia,
where Agrippa had the command, and penetrated as
far as Setonia, where he was wounded in the knee.
The country submitted to him, hostages were
taken, the standards captured from Gabinius restored,
and a promise was given that the owing tribute
should be paid. (Dion Cass. xlix. 38; Liv. *Epit.*
cxxxii.; Appian. *Illyr.* 24—27; Vell. ii. 90; Flor.
iv. 12; Suet. *Oct.* 20.)

Dalmatia became an imperial province, and its
limits were pushed as far N. as the *Save*. In
B. C. 16, and again in 11, the Dalmatians showed an
inclination to throw off the yoke, and some years af-
terwards joined the revolted Pannonians, when Rome
anticipated such danger, that Suetonius (*Tib.* 16) con-
sidered that no more formidable enemy had appeared
since the Punic War. Tiberius, who was appointed
to the command of the Roman army, displayed con-
siderable military talent in the Dalmatian campaign
against Bato, the champion of his country's liberties,
a man of great bravery and capacity. In A. D. 9, he
had reduced the country entirely to subjection, and
in A. D. 12 received the honour of a triumph for this
and his German victory. (Dion Cass. lv. 29—32,
lvi. 11—17; Vell. ii. 110—115; Zonar. x. 37.)
Henceforward Dalmatia and Illyricum, though geo-
graphically they were distinguished (Tac. *Ann.* ii.
53), became politically convertible terms.

Digitized by Google

The name Illyricum is however more properly applied to the long and narrow tract of country which lies between the Save and the Adriatic, and Dalmatia after its final incorporation into the Roman province must be referred to the article under that head [ILLYRICUM]. Dalmatia was the native country of Diocletian, and its capital Salona (*Spalatro*) will always be famous as having been the place to which that emperor retired. At the division of the empire between Arcadius and Honorius, the important and warlike praefecture of Illyricum was divided between the West and the East; Dalmatia with Noricum and Pannonia fell to the lot of the former. About A.D. 461, Dalmatia was exposed to the inroads of the Suevi, but the intrepid Marcellinus maintained the power of the Romans against the barbarians, and occupied the province in an independent position with the title of patrician of the West. (Procop. *Bell. Vandal.* i. 6.) Theodoric, the great emperor of the Ostro-Goths, supported by Zeno, emperor of the East, wrested it from Odoacer; and it is said that an iron mine in Dalmatia furnished the victors with one of the chief requisites of war. (Cassiod. *Var.* iii. ep. 25.) In A.D. 535, it was conquered for the Lower Empire by the imperial armies, regained by the Ostro-Goths, and again recovered by Belisarius.

Under Justinian the limits of Dalmatia were advanced to the E. over Pannonia; and it was divided into maritime and inland Dalmatia: the former extending from Istria through Liburnia, Dalmatia, and N. Albania, with the adjacent islands; and the latter lying to the E. of the range of mountains known under the name of Albius, Bebius, Ardius, or the modern *Prolog* range, and Scardus. It was, however, with difficulty preserved for the Byzantine empire, and was subjected to the inroads of the Gepidae, and then of the Lombards. The great Heraclius, in pursuance of his statesmanlike plan of establishing a permanent barrier in Europe against the encroachments of the Avars and Slaves, induced the Serbs or W. Slaves, who occupied the country about the Carpathians, to abandon their ancient seats and move down into the provinces between the Danube and the Adriatic. Though independent, these people, when they had made their footing in Dalmatia, for a long period considered themselves as owing a degree of territorial allegiance to the Lower Empire. (Const. Porph. *de Adm. Imp.* 31—36.)

The modern history of Dalmatia commences with these relations established by Heraclius and the W. Slaves, who entered the country under the various names of Servians, Croatians, Narentins, Zachlumians, Terbunians, Diocleans, and Decatrians. (Schafarik, *Slav. Alt.* vol. ii. p. 237.)

The following is a list of Dalmatian towns, the chief of which are mentioned elsewhere.

On the coast:—Sicum, Praetorium, Tragurium, Salona, Col. Julia Martia, Epetium, Oneum, Iranonia, Piguntia, Laureata, Dalluntum, Rhausium, Epidaurus, Rhizus, Cattarus, Butua, Ascrivium, Olcinium, Nymphaeum, Lissus.

In the interior, in the direction from NW. to SE.:—Pelva, Dalminium, Aequum, Promona, Ratanea, Andetrium, Selovia, Seretium, Sinotium, Tilurium, Ad Matricem, Stanechum, Diocleа, Narona, Glinditiones, Sallantum, Varo, Grabaea, Nalata, Birziminium, Sinna, Medion. Scodra, Picaria, Sphentzanium, Doracium. (Sir Gardner Wilkinson, *Dalmatia and Montenegro*, 2 vols. 1848; Kohl, *Reisen in Istrien, Dalmatien, u. Montenegro*, 2 vols. 1850; Neigebauer, *Die Sudslaven u. deren Länder*, 1851; Cesani, *Dalmazia*, 2 vols. 1846; Pannenius, *Reisen u. Dalmatien*, 2 vols. 1816.) [E. B. J.]

DALMI'NIUM, DELMI'NIUM (Δαλμίνιον, Strab. vii. p. 315; Δελμίνιον, Ptol. ii. 16. § 11; Δέλμιον, Steph. B.; Eustath. *ad Dion. Perieg.* 95), the ancient capital of Dalmatia, from which the Dalmatians, after their separation from the other Illyrians, derived their name. (Appian, *Ill.* 11.) Though strongly fortified, it was taken by C. Furius the consul, in B.C. 156, and was set on fire by means of a contrivance very much resembling the Greek fire of the middle ages. (Appian, *l. c.*) In B.C. 135, P. Scipio Nasica destroyed the walls and public buildings. (Strab. *l. c.*) After this event in the notice of Ptolemy (*l. c.*), no more is heard of the city. The district in the neighbourhood was in later times called Dalen (Δαλέν, Const. Porph. *de Adm. Imp.* c. 30), and is the present plain of *Imoski* or *Duvno* in the *Herzegóvina*, to the E. of *Livno*. (Schafarik, *Slav. Alt.* vol. ii. p. 267; Neigebauer, *Die Sudslaven*, p. 21.) [E. B. J.]

DA'MALIS (Δάμαλις), seems to be the name near Chrysopolis [CHRYSOPOLIS] named Bas or Bous (Βοῦς) by Polybius (iv. 43). Here, according to the legend, Io landed when she crossed the strait. It was also called Damalis, or the heifer, and Arrian, quoted by Eustathius (*ad Dionys. Per.* 140) has a story about it. [G. L.]

DAMASCUS (Δαμασκός: *Eth.* Δαμασκηνός, its territory ἡ Δαμασκηνή), the capital city of Syria, both in ancient and modern times, though its preeminence was disputed during the classical period by Antioch. It is an exceedingly ancient city, being mentioned first in the history of Abraham's pursuit of the defeated kings (*Gen.* xiv. 15); and his steward Eliezer was a native of Damascus (xv. 2). Josephus ascribes its foundation to Uz, a grandson of Shem (*Ant.* i. 6. § 3). During the period of the Hebrew monarchy it was the "head" or capital of Syria (*Isaiah*, vii. 8), and the Syrian king is called the king of Damascus (2 *Chron.* xxiv. 23). But during the struggles between these neighbouring kingdoms it occasionally fell into the hands of the Israelites. Thus "David put garrisons in Syria of Damascus, and the Syrians became servants to David" (2 Sam. viii. 6; 1 *Chron.* xviii. 6), after he had defeated Hadarezer, king of Zobah, to whom the "Syrians of Damascus" had allied themselves. The fact that Tadmor in the wilderness [PALMYRA] was built by Solomon (2 *Chron.* viii. 4), which further gives countenance to the very ancient and consistent tradition of his connection with Baalbec [HELIOPOLIS], proves that David's son and successor retained possession of southern Syria: and Damascus was during this time subject to Rezon, a vassal of Hadarezer. (1 *Kings*, xi. 23—25.) Subsequently to the division of the Hebrew kingdom, or B.C. 900, we find "a Hebrew quarter" in Damascus ceded by treaty to Ahab by Benhadad (1 *Kings*, xx. 34), and the city was at length recovered to Israel by Jeroboam, son of Joash, king of Israel (cir. B.C. 822). (2 *Kings*, xiv. 28.) The alliance of Syria with Israel against Judah led Ahaz to call in the aid of Tiglathpileser, king of Assyria, who, in consequence, "went up against Damascus and took it, and carried the people of it captive to Kir" (cir. B.C. 740), according to the prophecy of Amos, about fifty years before the event. (2 *Kings*, xvi. 9; *Amos*, i. 5.) From this time it followed the fortunes of the Assyrian empire, but does not appear as

Digitized by Google

any time to have had much importance in a military view. Besides which, its political and commercial importance after the time of Alexander the Great was eclipsed by Antioch and other cities founded by the Seleucidae; which may further account for the scanty notices of it that occur in classical authors. Strabo describes it as πόλις ἀξιόλογος, σχεδόν τι καὶ ἀνφωτεστάτη τῶν ταύτῃ κατὰ τὰ Περσικά (xvi. p. 756). Pliny says that according to some it was reckoned as one of the cities of the Decapolis (v. 18). He only further mentions it for its alabaster (xxxvi. 18). It is, however, strange that so renowned a city, the subject of such extravagant eulogy in the poems and romances of the Orientals, should be almost unnoticed in the classical poets; the "ventosa Damascus" of Lucan — certainly not a well-chosen epithet — being the sum of their tribute to this most remarkable and beautiful city (iii. 215).

In the annals of the church it is noted for the conversion and first preaching of the apostle St. Paul, which synchronised with the occupation of the city by the ethnarch of Aretas, the king apparently of Arabia or Petra. (2 *Cor.* xi. 32.) As the event is not chronicled by any historian, the circumstances under which this petty king had come into possession of so important a place are very doubtful; but it is certain that it was subject to the Roman rule until the reign of Heraclius, when it was taken by the Saracens in the 13th year of the Hejira (A. D. 634), from which time, as if to compensate for its temporary eclipse, it has been the delight and glory of the East, and celebrated by the Arabian poets as the terrestrial Paradise.

Damascus, now called *Es-Sham*, is situated at the distance of two days' journey, or about 60 miles from the coast of the Mediterranean, not far from the eastern base of the range of Antilibanus, and at the western extremity of the great desert of *El-Hauran* (Auranitis), which extends westward to the Euphrates, and southward to the Arabian peninsula. It presents the peculiar phenomenon of a city in the midst of gardens, watered by numerous streams. It is surrounded by a wall, which is however in a state of ruinous decay, and scarcely defines the limits between the city and its suburbs. In 1843, the population of Damascus was stated at 111,552, of which number about 12,000 were Christians, and 5000 Jews. It is governed by a pasha, whose rule extends from the Euphrates to the Jordan, and from the vicinity of Aleppo to the confines of Arabia.

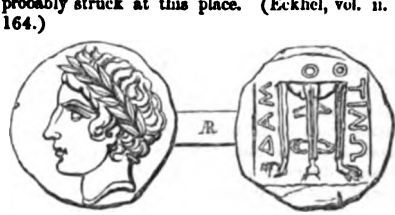
The "Abana and Pharpar, rivers of Damascus," are of Scripture celebrity (2 *Kings*, v. 12), and both Strabo and Pliny mention the Chrysorroa, to which the latter ascribes the fertility of the soil ("Damascum ex epoto riguis amne Chrysoroa fertilem"); and Strabo remarks that "its waters are almost entirely consumed in irrigation, for that it waters a large extent of deep soil" (*ll. cc.*). There are, in fact, as the writer ascertained, two copious sources in the eastern roots of Antilibanus, the *Barada* and the *Phege*. Of these, the *Barada* is far the most copious, and being divided into numerous rivulets on emerging from the mountains above the city, waters its innumerable gardens. The water, however, is not good for drinking, and the inhabitants of the villages along its course in the *Wady Barada* are subject to goitre. Even the poor of Damascus do not ordinarily drink this water. This is probably the Abana of Scripture. The Pharpar is represented by the *Phege*, a smaller stream of delicious water, whose source was explored by Pocock. It emerges from the mountain range through the same valley as the *Barada*, and is conducted by aqueducts and pipes to all parts of the city for the purpose of supplying the inhabitants with drinking water. The scanty surplus of the two streams forms a small lake below the city, called *Bahr-el-Merj*. [G. W.]

COIN OF DAMASCUS.

DAMA'SIA (Δαμασία), a fortified town in Vindelicia, which Strabo (iv. p. 206) regards as the acropolis of the Licattii. The place now generally identified with it is *Hohenembs*, in the upper valley of the Rhine, though some believe it to be the more ancient name of *Augusta Vindelicorum*. [L. S.]

DAMASSI MONTES (τὰ Δάμασσα ὄρη, Ptol. vii. 2. § 18), an eastern spur of the Himalaya Mountains in *Nipál*, in the district of "India intra Gangem." [V.]

DAMA'STIUM (Δαμάστιον), a town in Epeirus, which Strabo mentions as possessing silver mines (vii. p. 326). The name of this town occurs in no other ancient writer; but there are several coins extant, bearing the epigraph Δαμαστινων, which were probably struck at this place. (Eckhel, vol. ii. p. 164.)



COIN OF DAMASTIUM.

DA'MNII, in Scotland, mentioned by Ptolemy as lying to the north-east of the Selgovae. The difficulties that attend the fixation of the exact locality of this people may best be collected from the text as given in full: — "Partly, along the northern side, under the promontory of the same name, dwell the Novantae, amongst whom are these cities — Loucopibia and Retigonium" (according to another and probably a better reading, Rerigonium). "South of these, the Selgovae, amongst whom are these towns — Carbantorigum, Uxelum, Corda, Trimontium. To the eastward of these, but more to the north, are the Damnii, amongst whom are these towns — Colania, Vanduaria, Coria, Alauna, Lindum, Victoria. The Gadeni more northern, the Ottadini more southern, amongst whom are these towns — Curia, Bremenium. Next to the Damnonii, towards the *east*, but more northern, and to the east of the promontory Epidium, are the Epidii," &c.

More than one text of Ptolemy, as well, perhaps, as the context itself, justifies us in connecting the Gadeni and Ottadini with the Selgovae rather than with the Damnii; *i. e.*, in making the first named of those two populations the one to which the Gadeni and Ottadini lie north and south. But this will not

Digitized by Google

meet the difficulty. The change of form from Damnii to Damnonii introduces another complication. The *variae lectiones* throw no light on this. The variation is even repeated in two inscriptions found in the neighbourhood of *Carvoran* (a station on the Vallum and the Magna of the *Notitia*), one of which is CIVITAS DUMNI, and the other CIVITAS DUMNONI. The historian of the Roman Wall sees in this only a transplantation of the Dumnonii of Devonshire, and draws attention to the policy by which one tribe already subdued is made to become instrumental in the subjugation of others. He overlooks the Damnii of Ptolemy. Thirdly, the geographical boundaries are indistinct. Of the twenty-one names contained in the above-given extract, no more than eight can claim to be identified in a manner sufficiently satisfactory to serve as the basis for further criticism. These are, Novantae, Loucopibra, Retigonium (Mel. Rerigonium), Selgovae, Bremenium, Gadeni, Ottadini, and the Epidian Promontory. These = *Wigtonshire*, *Glen Luce*, *Stranraer*, the shore of the *Solway*, *High Rochester*, *Berwickshire*, *Northumberland*, and the *Mull of Cantyre* respectively. Now, no part of the northern shore of the Solway Frith lies south of the southernmost points of *Wigton* (Novantae). Neither can any population lie (at one and the same time) *east* of *Kircudbright* (Selgovae), and *west* of the Epidii (*Argyle*). By carrying the Selgovae as far as *Dumfries*, these difficulties are increased. *Peebles*, *Selkirk*, *Lanark*, *Edinburgh*, *Linlithgow*, *Renfrew*, and *Stirling* give us the nearest approximation to the area of the Damnii or Damnonii of North Britain. [See DUMNONII.] [R. G. L.]

DA'MNIUM. [DAMNONIUM.]

DAMNO'NIUM, in South Britain. Damnium is the form of the word in Marcianus Heracleota. In Ptolemy it is Damnonium, so that the variations noticed under DAMNII are here repeated. Each author gives *Ocris* as a synonym for the headland (Δαμνόνιον, τὸ καὶ Ὄκρινον ἄκρον, Ptol., and Δάμνιον ἄκρον τὸ καὶ Ὄκριον καλούμενον, Marcian. Heracl.), of which the modern name is the *Lizard* (in Cornwall). [DUMNONII.] [R. G. L.]

DA'MPOLIS or DIA'MPOLIS (Διάμπολις: *Iamboli*), a Greek town in the interior of Thrace, to the east of Irenopolis, on the river Tonsus. (Ann. Comn. x. p. 274.) It is probably the same place as the Diopolis of Hierocles (p. 635), and the Diospolis of Malala (ii. p. 167). [L. S.]

DAN. [PALAESTINA.]

DAN, a town of Palestine, founded by a colony of the tribe of Dan during the period of the *Judges* (xviii. cir. B. C. 1406), and assumed as the northern limit of the Holy Land, as Beersheba was the southern. (*Judges*, xx. 1; *Sam.* iii. 20, &c.) Its more ancient name was Laish, and it apparently belonged to Sidon (*Judges*, xx. 7); but in *Joshua* (xix. 47) Lesham. It became infamous as one of the chief seats of Jeroboam's idolatry (1 *Kings*, xii. 29), and its position exposed it first to the invaders of Judaea from the north. (1 *Kings*, xv. 20; *Jerem.* iv. 15, viii. 16.)

Its position is plainly marked by *Tell-el-Kady* (*Kadi* being the Arabic equivalent for the Hebrew appellative *Dan*, both signifying *Judge*), a ruined site in the *Ard-el-Hulch*, near the south-western base of Mount Hermon. It is placed by Eusebius and St. Jerome 4 miles from Paneas [PANEAS], on the road to Tyre, but is scarcely more than half an hour, or two miles. It has sometimes been confounded with it. (Reland, pp. 919, 921.) One of the main sources of the Jordan rises at the foot of the hill upon which the city was built, and the copious stream which flows from it is still called *Nahr-le-Dan*. The town has been supposed to have lent its name to the Jordan. (Reland, p. 271.) [JORDANES.] [G. W.]

DANA. [TYANA.]

DANA or DAGANA (Δάνα or Δάγανα, Ptol. v. 4. § 5), a town in the ancient Taprobane or Ceylon. Forbiger has conjectured that it is represented by the modern *Tangala* or *Tangalle*. [V.]

DANABA (Δάναβα, Ptol. v. 15. § 24), a small town placed by Ptolemy in Palmyrene, a subdivision of his larger district of Coele-Syria. It is mentioned under the name of Danabe in the war between the emperor Julian and the Persians. (Amm. M. 27. 7.) [V.]

DANAI. [ARGOS, p. 202, b.; HELLAS.]

DA'NALA (Δάναλα), a place in Galatia in the territory of the Trocmi, where Cn. Pompeius and L. Lucullus met, when Pompeius came to continue the campaign against Mithridates, and Lucullus surrendered the command to him. The site is unknown. Plutarch (*Lucull.* c. 36) merely says that the two Romans met in a village of Galatia. (See the note in Groskurd's Strabo, vol. ii. p. 512.) [G. L.]

DANAPRIS. [BORYSTHENES.]

DANASTRIS. [TYRAS.]

DANDACA (Δανδάκη, Ptol. iii. 6. § 2; Amm. Marc. xxii. 8. § 36), a town of the Tauric Chersonese, of which all that is known is, that it was situated on the W. coast, near Eupatorium. [E. B. J.]

DANDAGUDA (Plin. vi. 20. s. 23), a town placed by Pliny in the neighbourhood of the Prasii. Calingon, perhaps the modern *Calingapatam*. [V.]

DANU'BIUS (Δανούβιος: the *Danube*), as coins and inscriptions frequently called DANUVIUS, the greatest river in south-eastern Europe. Its sources are at *Donaueschingen*, on the Mons Abnoba, and after a long course through Vindelicia, Noricum, Pannonia, and Dacia, it divides itself near Noviodunum into three main branches, so as to form a delta, and empties its waters into the Euxine. The Danube at first forms the southern frontier of Germania Magna; further east it is the boundary between Pannonia and Dacia, and between Dacia and Moesia. Among its many tributaries we may mention the Dravus, Savus, Pathissus, and Margus, as the principal ones. This river was known even to the earliest Greeks, under the name of ISTER (Ἴστρος), though they knew only the part near its mouth, and entertained very erroneous notions respecting its course (Hesiod, *Theog.* 338; Pind. *Ol.* iii. 25; Aeschyl. *ap. Schol. ad Apollon. Rhod.* iv. 284), which did not become fully known until the time of the Roman empire. The Romans, and especially their poets, sometimes adopted the Greek name ISTRUS or HISTER (Tibull. iv. 1. 146). until in later times the two names Ister and Danubius were used indiscriminately; though it was still very common to apply the former to the lower part of the river, and the latter to the upper part, from its sources to Vindobona or Sirmium. Stephanus B., who himself calls the river Danubis or Danuvius, states that its ancient name was Matoas. It is said moreover, that Danubius was its Thracian, and Ister its Celtic name (Lydus, *De Mag.* iii. 32; Jornand. *De Reb. Get.* 12); but there can be no doubt that DAN is the same word which is found in Rhodanus, Eridanus, Tanais, Don, and others, and signifies

Digitized by Google

'water." According to Adelung, Dan-ubius means 'the upper water," and (Dan)-ister "the lower water." The earlier writers entertained very vague and contradictory notions about the sources of this mighty river; thus Pindar makes it flow from the country of the Hyperboreans, Aeschylus from the Rhipaean mountains, Herodotus (ii. 33) from the country of the Celts in the extreme west (somewhere about the Pyrenees), and Scymnus of Chios (*Fragm.* 11) likewise from the country of the Celts. Afterwards a notion arose that one branch of the Danube flowed into the Adriatic. But these and similar ideas, which were combated by some of the ancients themselves, were rectified during the conquests of the Romans in the north and east of Europe. We have already stated that there are three main branches by which the Danube empties itself into the sea; though Strabo appears to assume four, for out of the seven he mentions, he calls three the lesser ones. Other writers, however, mention only six, five, four, three, or even two mouths. The names of these mouths, so far as they are known to us, are:—(1) the southernmost, called Peuce or the Acrum ostium (τὸ ἱερὸν στόμα, Strab. vii. p. 305; Ptol. iii. 10. § 2); (2) Naracustoma (Ναράκιον or ὁ Νάρκιον, Ptol. iii. 10. § 5; Arrian, *Peripl.* p. 3); (3) Calonstoma (τὸ καλὸν στόμα); (4) Pseudostoma (Ψευδόστομον, Ptol. iii. 10. § 6); (5) Boonstoma (Βόρειον στόμα, Ptol. *l. c.*); (6) Thiagola (Θιαγόλα, Ptol. iii. 10. § 4, or τὸ ψιλὸν στόμα). Respecting these mouths, three of which were navigable in antiquity (P. Mela, ii. 1, 8), see Kruse, *De veri Ostiis*, Vratislav. 1820. At present it is impossible accurately to identify the statements of the ancients about them, as the Danube has undergone very great changes at its mouth. See Katancsich, *de Istro*, Budae, 1798, 4to.: Rennell, *Comparative Geogr. of West. Asia*, vol. ii. p. 374. [L. S.]

DANUM, in Britain, mentioned in the eighth Itinerary as being the second station on the road from York to Lincoln. Name for name, and place for place, *Danum* = *Don*-caster. Danum was the station of the Praefectus Equitum Crispianorum of the *Notitia*. Roman remains are found at *Doncaster*. [R. G. L.]

DAORSI, DAORIZI (Δαόρσοι, Strab. vii. p. 315), a people of Illyricum, who lived on the banks of the Naro. (Strab. *l. c.*) They were allied with the Romans (comp. Liv. xlv. 26), and a quarrel between them and the Dalmatians gave a colourable pretext to the republic for its invasion of Dalmatia in B. C. 156. (Polyb. xxxii. 24.) Pliny (iii. 26) describes their territory as being parcelled out into fourteen small divisions, which he calls "decuriae." They must have possessed some importance, as a coin has been found with the epigraph of this people, of the same workmanship and type as those of Gentius, king of Illyricum. (Eckhel, vol. i. p. 155; Rasche, *Lex.* vol. i. pt. 1. p. 51.) [E. B. J.]

DAPHNE (Δάφνη), a celebrated grove and sanctuary of Apollo, near Antioch in Syria. [ANTIOCHIA.] Both locally and historically it was so closely connected with the Syrian metropolis, that we can hardly consider the one without the other. We have seen that Antioch was frequently called Α. ἡ ἐπὶ Δάφνῃ and ἡ πρὸς Δάφνῃ, and conversely we find Daphne entitled Δ. ἡ πρὸς Ἀντιοχείαν. (Joseph. *B. J.* i. 12. § 5.) Though really distant a few miles from Antioch, it was called one of its suburbs (προάστειον, Dion Cass. li. 7: "Amoenum illud et amoenum Antiochiae suburbanum," Amm. Marc. xix. 12, 19). If Antioch has been compared to *Paris* [see p. 143], Daphne may be called its *Versailles*.

It was situated to the west, or rather to the south-west, of Antioch, at a distance of about 5 miles, or 40 stadia, and on higher ground than the metropolis itself (ὑπέρκειται τετταράκοντα σταδίους ἡ Δάφνη, Strab. xvi. p. 750; comp. the Jerusalem Itinerary, Wesseling, p. 581). The place was naturally of extreme beauty, with perennial fountains, and abundant wood. (Liban. *Antioch.* p. 356.) Here a sanctuary was established, with the privileges of asylum (2 *Macc.* iv. 33; Polyaen. viii. 50), which became famous throughout the heathen world, and remained for centuries a place of pilgrimage, and the scene of an almost perpetual festival of vice. The zeal with which Gibbon has described it, in his twenty-third chapter, is well known.

Daphne, like Antioch, owed its origin to Seleucus Nicator; and, as in the case of his metropolis [see pp. 142, 143], so he associated the religious suburb with mythological traditions, which were intended to glorify his family. The fame of Apollo was connected with his own. The fable of the river Peneus was appropriated; and the tree was even shown into which the nymph Daphne was transformed.* One of the fountains received the name of the Castalian spring, and the chief honours of the new sanctuary were borrowed from Delphi. In the midst of a rich and deep grove of bay trees and cypresses (Procop. *B. Pers.* ii. 14), with baths, gardens, and colonnades on every side, Seleucus built the temple of Apollo and Diana. The statue of the god was colossal: its material was partly marble, and partly wood; the artist was Bryaxis the Athenian, whose works were long celebrated at Rhodes and elsewhere. (Clem. Alex. *Protr.* § 47.) It is described at length by Libanius (*Monod. de Daphnaeo Templo*, iii. 334), who states that the god was represented with a harp, and as if in the act of singing (ἄδοντι ἔοικε μέλος). With the worship of Apollo Antiochus Epiphanes associated that of Jupiter in the sanctuary of Daphne. This monarch erected here, in honour of that divinity (with whom he was singularly fond of identifying himself), a colossal statue of ivory and gold, resembling that of Phidias at Olympia. Games also were established in his honour, as may be seen by extant coins of Antioch. (See Müller's *Antiq. Antiochenae*, p. 64, note 12.) The games of Daphne are described in Athenaeus. (Ibid. note 13.) What has been said may be enough to give the reader some notion of this celebrated place in the time of the Seleucidae, and in its relation to the Oriental Greeks before the Roman occupation of Syria. It ought to be added, that the road between Antioch and Daphne, which passed through the intermediate suburb of Heracleia, was bordered by gardens, fountains, and splendid buildings, suitable to the gay processions that thronged from the city gate to the scene of consecrated pleasure.

The celebrity of Daphne continued unimpaired for a long period under the Romans, from Pompey to Constantine. It seems to have been Pompey who enlarged the dimensions of the sacred enclosure to the circumference of 80 stadia, or 10 miles, mentioned by Strabo (*l. c.*; see Eutrop. vi. 14). Some of the aqueducts erected for the use of Antioch by the Roman emperors were connected with the springs

* Whence Antioch is called by Ausonius (*Clar. Urb.* ii.) Phoebeae lauri domus.

Digitized by Google

of Daphne. (Malala, pp. 243, 278.) The reign of Trajan was remarkable in the annals of the place for the restoration of the buildings destroyed by an earthquake. That of Commodus was still more memorable on account of the establishment (or rather the re-establishment) of periodical Olympian games at Antioch; for the stadium of Daphne was the scene of the festive contests. This was the time of that corruption of manners (the "*Daphnici mores*" of Marcus Antoninus) under which Roman soldiers and Roman emperors suffered so seriously in the Syrian metropolis.

The decay of Daphne must be dated from the reign of Julian, when the struggle between Heathenism and Christianity was decided in favour of the latter. Constantine erected a statue of Helena within the ancient sanctuary of Apollo and Jupiter, and the great church at Antioch was roofed with cypress-wood from Daphne; which, about the reign of Zeno, fell into the condition of an ordinary Syrian town.

It is needless to pursue the history further. Among modern travellers, Pococke and Richter have fixed the site of Daphne at *Beit-el-Maa*, the distance of which from *Antakia* agrees with the ancient measurement, and where some poor remains are found near a number of abundant fountains. Forbiger (*Alte Geographie*, vol. ii. p. 657) thinks with Kinneir that the true position is at *Babyla*; but, though the apparent connection of this name with that of the martyr Babylas gives some ground for this opinion, the distance from Antioch is too great; and the former view is probably correct. No detailed account of the remains has been given. Poujoulat says (*Corr. d'Orient.* viii. 38), "A côté de la plus profonde fontaine de *Beit-el-moïé*, on remarque des débris massifs appartenant à un édifice des âges reculés: si j'étais antiquaire et savant, je pourrais peut-être prouver que ces restes sont ceux du Temple d'Apollon." [J. S. H.]

DAPHNON, the name of a town and a river seated upon the eastern shore of the Red Sea, in lat. 11° N.

1. The town (Δάφνων μίκρος, Arrian, *Peripl. Mar. Erythr.* p. 7; Strab. xvi. 774) was situated between the promontory Aromata in the Regio Cinnamomifera (*Cape Guardafui*) and the promontory of Uephas at the mouth of the Red Sea (*Straits of Bab-el-Mandeb*).

2. The river (Δάφνων μέγας, sometimes denominated Ἀκάνναι, Ptol. iv. 1. § 101) lay a little eastward of the town Daphnon, and formed its harbour. The Promontory of Uephas sheltered this port from the east wind, and broke the force of the current at the entrance of the Straits. [W. B. D.]

DAPHNUS (Δαφνοῦς: *Eth.* Δαφνούντιος or Δαφνούσιος). Stephanus (*s. v.*) mentions several places of this name; but he does not mention Daphnus in the territory of Clazomenae. [CLAZOMENAE.] He mentions a lake called Daphnusis near the Bithynian Olympus. [G. L.]

DAPHNUS (Δαφνοῦς: *Eth.* Δαφνούντιος, Δαφνούσιος), a city on the Euboean sea, originally belonging to Phocis, which thus extended from the Corinthian gulf to the Euboean sea. Its narrow territory separated the Locri Epicnemidii from the Locri Opuntii; but it was afterwards assigned to the Opuntii. The town was in ruins in the time of Strabo, who fixes its site by describing it as distant 20 stadia from Cynus and 120 from Elateia, and as having a harbour. (Strab. ix. pp. 416, 424, 426; Plin. iv. 7. s. 12; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii pp. 176.)

DARA (Δάρα, Ptol. vi. 8. § 4). 1. A small river of Carmania, at no great distance from the frontier of Persis. There can be little doubt that it is the same as the Dora of Marcian (*Peripl.* p. 21) and the Daras of Pliny (vi. 25. s. 28). Dr. Vincent conjectures (*Voyage of Nearchus*, vol. i. p. 372) that it is the same as the *Dara-bin* or *Derra-bin* of modern charts.

2. A city in Parthia. [APAVARCTICENE.]

3. A city in Mesopotamia. [DARAS.] [V.]

DA'RADAE, the name of Ethiopian tribes in two different parts of Africa; one about the centre of it in *Darfour* (Δαράδων ἔθνος, Ptol. iv. 7. § 35) the other in the W., on the river DARADUS, and the Aethiopes Daratitae. (Polyb. *ap* Plin. v. 1; Agathem. ii. 5.) [P. S.]

DARADAX (Δαραδαξ), a Syrian river, mentioned only by Xenophon (*Anab.* i. 4. § 10). It has been identified with the *Far*, a small tributary of the Euphrates. At the source of the river was a palace of Belesis, then satrap of Syria, with a large and beautiful park, which were destroyed by Cyrus the Younger. (*Anab. l. c.*) [G. W.]

DARADUS, DARAS, or DARAT (Δάραδος, Δάρας, Ptol. iv. 6. § 6), a river of Africa falling into the Atlantic on the W. coast, near the Fretum Magnus, and containing crocodiles (Plin. v. 1); probably the *Gambia* or *Rio d'Ouro*. [P. S.]

DARAE, a Gaetulian tribe in the W. of Africa on a mountain stream called Dara, on the S. slopes of M. Atlas, adjacent to the Pharusii. (Plin. v. 1; Oros. i. 2; Leo Afr. p. 602.) [P. S.]

DARADRAE (Δαραδραι, Ptol. vii. 1. § 42), a mountain tribe who lived in the upper Indus. Forbiger conjectures that they are the same people whom Strabo (xv. p. 706) calls Derdae, and Pliny Dardae (vi. 19), and perhaps as the Dadicae of Herodotus (iii. 91, vii. 66). It is possible, however, that these latter people lived still further to the N., perhaps in Sogdiana, though their association with the Gandarii (Sanscrit Gandhâras) points to a more southern locality. [V.]

DARANTASIA, a place in Gallia Narbonensis. The name occurs only in the Itins. and the Notitia of the provinces of Gallia. The Antonine Itin. places it on the road from Mediolanum in Italy over the Alpis Graia to Vienna (*Vienne*) on the Rhone, and the Table places it on the road from Vercellae in Italy over the Alpis Graia, also to Vienna. Both agree in making the distance from Bergintrum [BERGINTRUM] to Darantasia 14 M. P. Darantasia is *Moutiers en Tarentaise*, a place situated at the angle of the *Isère*, and the chief town of the *Tarentaise*. *Moutiers* is a corruption of Monasterium. The old name of the place, Darantasia, has been extended to the whole country called *Tarentaise*, which is included in the Duchy of *Savoy*. (Note Walckenaer, *Géog.*, vol. iii. pp. 26, 27, on the passage here referred to.) [G. L.]

DARAPSA. [BACTRIANA, p. 365, a.]

DARAS (Δάρας, Procop. *Bell. Pers.* i. 10; *de Aedif.* ii. 1—3, iii. 5), a town of Mesopotamia about 98 stadia from Nisibis, which plays an important part in the wars of the Lower Empire between the Greeks of Constantinople and the Persian princes. According to Procopius, it was raised from a village to a city by the emperor Anastasius, who gave it his own name, and called it Anastasiopolis, A. D. 507. (Malala, xvi. p. 115, who calls it Δαρεῖος.) It was built on the eastern frontier of the Roman empire towards Assyria, with the object of overawing

Digitized by Google

and keeping some check upon the incursions of the Persians, and appears to have fulfilled the object for which it was erected for nearly 70 years, from the reign of Cabades (*Kobád*) to that of Chosroes I. (*Anushirwán*). Procopius gives a full account (*Bell. Pers.* i. 13) of the way in which Daras was fortified, which, as Gibbon has remarked (*Decline and Fall*, ch. 40), may be considered as representing the military architecture of the age. But besides its strong fortifications, which enabled it to resist more than one attack from the Persians, Daras was exceedingly well supplied with provisions, &c. for the troops engaged in its defence. Procopius gives an account of a marvellous fountain of water, whose source, on a neighbouring height, was in such a position that the supply could not be cut off by an enemy, while, at the same time, it was distributed through the town to the inhabitants by various channels, no one knowing whither it went on reaching the outer walls (*Bell. Goth.* iv. 7).

Procopius also mentions a series of combats which took place under the walls of Daras between the Romans under Belisarius and the Persians (*Bell. Pers.* i. 13), by which the Romans maintained the town, owing to the admirable military dispositions of Belisarius. Daras fell at last into the hands of the Persians during the reign of Justin II., A. D. 574, after a memorable siege of six months by Chosroes II. (Theophyl. *Hist. Maur.* iii. 9, 10.) The campaign of Mercian took place in the eighth year of Justin, and the result of the fall of Daras was the disgrace of the general (Theophyl. *l. c.*; Theophan. *ap. Phot.* Cod. 64; Evagr. v. 8—10), a truce with the Persians, and the appointment of Tiberius as an associate in the empire. Hormisdas IV. (Hormuzd IV.), who succeeded Chosroes, is said by Theophanes to have been the general who took Daras, and subsequently concluded the above-mentioned peace. (Theophan. *l. c.*) D'Anville (*L'Euphrate et Tigre*, p. 53) has tried, but we think in vain, to find any town or ruins which may mark the site of Daras. [V.]

DARDAE. [DARADRAE.]

DA'RDANI (Δάρδανοι), a tribe in the south-west of Moesia, and extending also over a part of Illyricum. (Strab. vii. p. 316; Ptol. iii. 9. § 2; Caes. *Bell. Civ.* iii. 4; Liv. xl. 57; Plin. iii. 29; Steph. B. *s. v.* Σεστός. 43.) According to Strabo, they were very wild and filthy race, living in caves under mountains, but very fond of music. [L. S.]

DARDA'NIA (Δαρδανία) or DARDANICE, a territory in Mysia, the limits of which are not very clearly defined. Strabo (p. 565) interprets Homer as placing Dardania above Ilium, on the Parorcia of Troas; and (p. 596) in another place, after describing the positions of Abydus, Dardanus, and the towns on the coast of the Hellespont as far as Sigeum, he says, "above these lies the Trojan plain, which extends eastward many stadia, as far as Ida. The Parorcia (mountain tract) is narrow: it extends on one side south as far as the parts about Scepsis, and north to the Lycians about Zeleia." Again, when he is describing the places about the promontory of Lectum, and the river Satnioeis, he says that all these places are adjacent to Dardania and Scepsis, being a kind of second and lower Dardania (p. 606). There is really no historical province Dardania, and all that Strabo says of it is derived from his interpretation of the Iliad. The Dardani and Dardanii are mentioned in the Iliad (ii. 819, xv. 425). Aeneas, in the Iliad, is the commander of the Dardani.

Dardanus, a son of Jupiter, settled in Dardania long before Ilium was built in the plain. He was the ancestor of Priamus; and there were five generations from Dardanus to Priamus. (*Il.* xx. 215, &c.) Dardanus was a wanderer into Asia; and the legend seems to represent a tradition of the Dardani coming from Europe and seizing a part of Mysia. Dardanus found the country occupied by Teucri, who had a king Teucer. According to the authority of Cephalon (Steph. B. *s. vv.* Ἀρίσβη and Δάρδανος), Dardanus came from Samothrace and married a daughter of Teucer. Cephalon and Hellanicus could not agree about the woman's name.

Strabo mentions a promontory Dardanis or Dardanium, about 70 stadia south of Abydus: it appears to be the *Kephis Burnu* of the Turks, and the *Punta dei Barbieri* of the Europeans (Strab. pp. 587, 595); and probably that which Pliny calls Trapeza. There was a tradition that the descendants of Aeneas maintained themselves in part of the inland territory of Dardania, after the war of Troy. Xenophon (*Hell.* iii. 1. § 10) speaks of one Zenis a Dardaneus, who had a principality in Mysia, and Scepsis and Gergitha were two of his strong places; but the territory that he had was not the old Dardania. Xenophon calls it the Aeolis of Pharnabazus. [G. L.]

DARDA'NIA (Δαρδανία), a district in the south-western part of Moesia, which received its name from its inhabitants, the Dardani. (Ptol. iii. 9. § 6.) That district, now forming the southernmost portion of Servia, became a part of the praefecture of eastern Illyricum in the reign of Constantine. (Hierocl. p. 655; Notit. Imp.) [L. S.]

DA'RDANUS, DA'RDANUM (ὁ Δάρδανος, τὸ Δάρδανον: *Eth.* Δαρδανεύς), a city of the Troad, originally named Teucris. According to the legend told by Mnaseas (Steph. B. *s. v.* Δάρδανος), Dardanus built or settled Dardanus, and named the country Dardania, which was called Teucris before. [DARDANIA.] This old story of Dardanus being the founder of the city, is reported by various other authorities. (Apollod. iii. 12. § 1; Diod. iv. 75; Conon. *apud Phot. Narr.* 21.) It seems that the city was sometimes called Dardania as well as the country. Pliny (v. 30) names it Dardanium. It was situated on the Hellespont, about a mile south of the promontory Dardanis or Dardanium (Map of the Plain of Troy, by Capt. Graves and T. A. B. Spratt, Esq., *London Geog. Journal*, vol. xii.), and 70 stadia from Abydus. Between Abydus and Dardanus, says Strabo (p. 595), is the Rhodius. There are two streams marked in the map: one nearer Dardanus, which enters the Hellespont close to the promontory of Dardanis; and another near *Sultania*, a little north of which is the site of Abydus. Dr. Forchhammer, in the map referred to, which contains his determination of the ancient sites, makes the stream at *Sultania* to be the ancient Rhodius; and this appears to be right, according to Strabo, who says that it enters the sea opposite to Cynossema in the Chersonesus. Strabo adds, however, some say that the Rhodius flows into the Aesepus; but of course the Rhodius must then be a different river from the stream that enters the sea between Abydus and Dardanus (pp. 598, 603). Homer mentions the Rhodius (*Il.* xii. 20).

Strabo observes that the Dardanus of his time, the town on the coast, was not the old town of Dardanus, or Dardania, which appears from the Iliad to have been at the foot of Ida. It was an older town than Ilium, and did not exist in Strabo's time. The later

Digitized by Google

town was an Aeolian settlement, and it is mentioned among the towns on the Hellespont, which Daurises the Persian took after the burning of Sardis. (Herod. v. 117.) In another place (vi. 43), Herodotus observes that Dardanus bordered on the territory of Abydus; which might also be safely inferred from the passage in the fifth book. It is mentioned by Scylax in his Periplus of the Troad. In the battle between the Athenians and Peloponnesians in the twenty-first year of the Peloponnesian War (B. C. 411), the line of the 68 ships of the Peloponnesians extended from Abydus to Dardanus (Thuc. viii. 104); a statement that can hardly be correct, for the ships that were outside of the promontory of Dardanis would be completely separated from the rest. Strabo (p. 595) says that Dardanus was so weak a place, that the kings, by whom he means Alexander's successors, some of them several times removed all the people to Abydus, and others moved them back again to their old place. On this spot L. Cornelius Sulla and Mithridates met, after Sulla had crossed over from Europe, and here they came to terms about putting an end to the war, B. C. 84. (Strab. p. 595; Plut. *Sulla*, c. 24.) It was at that time a free city, having been declared such by the Romans after the peace with king Antiochus, B. C. 190, in honour of the Trojan descent of the people. (Liv. xxxvii. 9, 37, xxxviii. 39.)

There are many imperial coins of Dardanus; and "the name of the river Rhodius appears on a medal of Domna. Sestini, *Mon. Vet.* p. 76." (Cramer, *Asia Minor*, vol. i. p. 82.) This seems to show that the stream which flows into the Hellespont near the cape Dardanis, is the Rhodius, and not the river nearer Abydus; but it is not decisive. The modern name *Dardanelles* is generally supposed to be derived from the name of Dardanus. [G. L.]

DAREIUM. [APAVARCTICENE.]

DARENTIACA, as D'Anville writes the name, but Daventia, as Walckenaer writes it, a place in Gallia Narbonensis, which the Jerusalem Itin. puts between Augusta (*Aoust*) and Civitas Vocontiorum (*Die*). The site is unknown. It is fixed by some writers near a place called *Saillans*. [G. L.]

DARGAMA'NES (Δαργαμάνης, Ptol. vi. 11. § 2, 18. § 2), according to Ptolemy, a river which flowed through Bactriana and fell into the Oxus, crossing on its way the country of the Paropamisidae. Ammianus states that the Orgomanenes (evidently this river) and the Ochus unite, and then fall into the Oxus (xxiii. 6). Wilson (*Ariana*, p. 160) thinks its modern representative is either the *Dchas* or the *Gori* river. Ptolemy speaks of another tributary of the Oxus, which he calls Dargoedus (Δάργοιδος, vi. 11. § 2), and which appears to have flowed in nearly the same direction as the Dargamenes. Wilson (*Ariana*, p. 162) seems to think this stream is the Gori or river of *Kunduz*. Perhaps, after all, the Dargamenes and Dargoedus are one and the same river. [V.]

DARIDNA (Δάριδνα: *Eth.* Δαριδναῖος), a village of Paphlagonia, mentioned by Alexander Polyhistor in his work on Paphlagonia. (Steph. B. *s. v.*) [G. L.]

DARIORIGUM (Δαριόριγον), the capital of the Veneti, one of the Armoric nations of Gallia (Ptol. ii. 8). The Table has the same place on the road from Juliomagus (*Angers*) to Gesocribate (*Brest*), but under the name Dartoritum. Dariorigum is supposed to be the modern town of *Vannes*, in the department of *Morbihan*. It seems that Dariorigum according to the fashion of many other Gallic towns, took the name of the people under the Empire, and the name Veneti is the origin of *Vannes*. The Bretons still call the place *Wenet* or *Guenet*. [G. L.]

DARNII, in Ireland, mentioned by Ptolemy as lying to the south of Rhobogdii (or the population about *Fair Head*), coinciding with the southern part of Antrim and the northern part of Down. [R. G. L.]

DARNIS (Δάρνις; erroneously written in Ptolemy Δάρδανις; Ζαρνίη, Stadiasm. p. 444: *Derna*), a city of Cyrenaica, on the coast, near the E. extremity of the country, is only mentioned by comparatively late writers, and, though a bishop's see, appears never to have been an important place. (*Itin. Ant.* pp. 68, 70; Amm. Marc. xxii. 16; Pacho, p. 26, Barth, p. 480.) [P. S.]

DARRAE (Δαρραί). Two tribes of this name are mentioned in the Arabian peninsula, one in the *Hedjaz* by Ptolemy (vi. 7), the other in modern *Omán* by Pliny (vi. 28). Mr. Forster says "the two tribes of different origin, but similar appellations, anciently existed, as the places which they inhabited, and which still respectively preserve their names, actually exist in both situations; the one a Joktanite race, inhabitants of *Darrha*, in *Omán*; the other an Ishmaelite people, inhabitants of *Khedáeyre*, near *Yembo*, and in whose name we discover, under the disguise of a familiar contraction (Kedarrhae Darrhae), a branch of the renowned people of Kedar (*Arabia*, vol. i. p. 54; comp. p. 79.) Of the latter he further writes: "The town of *Khedáeyre*, upon the same coast (of *Hedjaz*), north-west of the Lesser mountain, taken in conjunction with the tribe of *Khadhera*, carries the existing traces of Kedar to the northern frontier of the *Hedjaz*; the ascertained site of the Darrae, Cedrei, or Kedranitae, of Ptolemy, Pliny, and Stephanus of Byzantium after Uranius" (vol. i. p. 261). Of the former, in *Omán*, he says, "the name of Hadoram reappears, apparently, in the Dora and Darrae of Pliny, or the modern tribe and town of Darrha" (vol. i. p. 139), to the west of *Ras-el-Had*. [G. W.]

DARSA, a place in Asia Minor, to which the Roman consul Cn. Manlius (Liv. xxxviii. 15) came after leaving Cormasa. [CORMASA.] The site of Cormasa is unknown. Livy remarks that Darsa was the next city to Cormasa, but he says nothing of the distance; and the place is not mentioned in the fragments of Polybius (xxii. 19). [G. L.]

DARVENUM (Δαρούενον, Δαρούεννον), a town in Britain, mentioned by Ptolemy (ii. 3. § 27) as one of the three towns of the Cantii, Londinium and Rutupiae (*London* and *Richborough*) being the other two. [R. G. L.]

DASCU'SA (Δασκούσα, Ptol. v. 7. § 2, the common reading is Δασκούτα), a fortress in lesser Armenia, upon the river Euphrates, 75 M. P. from Zimara (Plin. v. 20), and 45 M.P. to the N. of Caeca (*Peut. Tab.* comp. *Anton. Itin.*) It was garrisoned by the "Ala Aureliana" (*Not. Imp.* xxxvii.) and has been identified with the ferry and lead mines of *Kebbán Ma'dén*, the points where the *Kara Su* is joined by the *Murád Chái* at about 270 miles from its source. (Ritter, *Erdkunde*, vol. x. pp. 800, 823, 831, 858; *Journ. Geog. Soc.* vol. vi. p. 203; Chesney, *Exped. Euphrat.* vol. i. p. 41, vol. iii. 271.) [E. B. J.]

DASCYLI'TIS. [DASCYLIUM.]

DASCY'LIUM (Δασκύλιον, Δασκυλεῖον, Dascylus: *Eth.* Δασκυλίτης). Stephanus B. (*s. v.*) mentions several Asiatic cities called Dascylium. The only place of any historical note is the town near the

Digitized by Google

Propontis. Herodotus (iii. 120) mentions Mitrobates, a Persian, as governor of the nome in Dascylium; and again (iii. 126), he calls the same man the governor of Dascylium (τὸν ἐκ Δασκυλείου ὑπαρχον). But in vi. 33, he speaks of the Cyzicenes submitting to Oebares, son of Megabazus, "the governor in Dascylium." Agesilaus, in one of his campaigns, marched to Phrygia, and came near Dascylium. (Xen. *Hell.* iii. 1. § 13.) Xenophon, who speaks of the Phrygia of Pharnabazus, seems to give Dascylium in Phrygia (*Hell.* iv. 1. § 15); but his narrative is confused, and nothing can be learned from it as to the position of Dascylium. He says that Pharnabazus had his palace here, and there were many large villages about it, which abounded with supplies; and there were hunting grounds, both enclosed parks and in the open country, very fine. A river flowed round the place, and it was full of fish. There was also plenty of birds. The governor spent his winter here; from which fact and the context we seem to learn that it was in the low country. Alexander, after the battle of the Granicus, sent Parmenio to take Dascylium (Arrian, *Anab.* i. 17. § 2); but there is nothing in Arrian which shows its position. The town does not seem to have been a large place, but it gave name to a Persian satrapy (τὴν Δασκυλίτιν σατραπείαν, Thucyd. i. 129), the extent of which cannot be defined.

Strabo (p. 575) says that, above the lake Dascylitis, there are two large lakes, the Apolloniatis and the Miletopolitis; and on the Dascylitis is the town of Dascylium. We must therefore look for Dascylium and its lake between the shores of the Propontis and the lakes Apolloniatis [APOLLONIAE, p. 161, b.] and Miletopolitis. Strabo also says that the Doliones are a people about Cyzicus, from the river Aesepus to the Rhyndacus and the lake Dascylitis; from which we might perhaps conclude that the Dascylitis is east of the Rhyndacus; and another passage (p. 582) seems to lead to the same conclusion. In Strabo's time the territory of the Cyziceni extended to the Miletopolitis and the Apolloniatis; they had also one part of the Dascylitis, and the Byzantines had the other. From this also we infer that it was east of the Rhyndacus. Mela (i. 19), in express words, places Dascylium, as he calls it, east of the Rhyndacus. Pliny (v. 32) says that it is on the coast. Hecataeus, quoted by Strabo (p. 550), says that a river Odrysses flows from the west out of the Dascylitis, through the plains of Mygdonia, into the Rhyndacus. But this description applies to a lake west of the Rhyndacus. Strabo further says (p. 588) that the lake Dascylitis was also called Aphnitis; and he again mentions the Aphnitis (p. 59), but without identifying it with the Dascylitis. Stephanus (*s. v.* Ἄφνιον) says that the lake near Cyzicus is Aphnitis, and that it was formerly called Artynia. There is a lake nearer to Cyzicus than the lake of *Manyas*, west of the Rhyndacus, which is the ancient Miletopolitis. The Rhyndacus flows through the Apolloniatis.

Leake, in his map of Asia Minor, marks a lake Dascylitis north of the Apolloniatis, and consequently between it and the shore of the Propontis, and east of the course of the Rhyndacus after it has flowed from the Apolloniatis. Some authorities speak of a lake in this part called *Diaskilli*, or some name like it; but this seems to require further confirmation. This town Dascylium must have existed to a late time, for a bishop of Dascylia is mentioned. (Plin. v. 32, ed. Hardouin.)

What we can learn about Dascylium is very unsatisfactory. There is a river marked in the newest maps, which rises near *Brousa*, and flows westward towards the Rhyndacus, but its junction with the Rhyndacus is not marked. It is called the *Inferi Su*, or *Nifer*. Cramer (*Asia Minor*, vol. i. p. 172) conjectures that this may be the Odrysses of Hecataeus, though it does not run in the direction described in Strabo's text; and that it is also the river described by Xenophon. [G. L.]

DA'SEAE (Δασίαι: *Eth.* Δασεάτης), a town of Arcadia in the district Parrhasia, on the road from Megalopolis to Phigalea, 7 stadia from Macareae, and 29 stadia from Megalopolis. It was in ruins in the time of Pausanias, as its inhabitants had been removed to Megalopolis upon the foundation of the latter. Its name was apparently derived from the thick woods, the remains of which still cover the heights of *Deli Hassani*, near which Daseae must have stood. (Paus. viii. 3. § 3, viii. 27. § 4, viii. 36. § 9; Curtius, *Peloponnesos*, vol. i. p. 294.)

DASMENDA (Δασμένδα), a hill-fort in Cappadocia. [CAPPADOCIA, p. 507, b.] [G. L.]

DASSARE'TAE, DASSARE'TII (Δασσαρήτιοι, Strab. vii. p. 318; Ptol. iii. 13. § 32; Δασσαρῆται Steph. B. Appian, *Illyr.* i; Mela, ii. 3. § 11; Plin. iii. 23. s. 26), an Illyrian people whose position can be well ascertained, from their having occupied the great valley which contained the lake of Lychnitis and the plains of *Koritzá*. The W. part of Dassaretia was a contrast to the E., consisting entirely of lofty and rugged mountains, intersected by branches of the river Apsus. If *Berát* be the site of Antipatria, it will follow that the Dassaretae possessed all the lower mountainous country lying between *Koritzá* and *Berát*, beyond which latter the frontiers of the Dassaretae met those of the Taulantii Bullionesand Chaonians of Epirus; on the N. they bordered on the Eordeti and Penestae and partly on the Taulantii, while to the E. the crest of the great central ridge very naturally formed the line of demarcation between them and the Pelagones, Brygi, and Orestae, or in other words, between Illyria and Macedonia. It follows from these boundaries that Dassaretia was not less than 60 miles in length and as much in breadth,—an extent such as might be expected from the statement in Polybius (v. 108) who in addition to the towns on the lake of Lychnitis represents the Phoebatae, Pissantini, Calicoeni, and Pirustae all as tribes of Dassaretia. (Leake, *Trav. in North Greece*, vol. iii. pp. 325, foll.) The Phoebatae chiefly inhabited the valley of the *Uzúmi*, and the Pissantini that of the *Devól*. The Pirustae would seem to have been on the N. frontier of Dassaretia, as they joined the Taulantii and some other more northerly Illyrians to assist the Romans in the reduction of Gentius. (Liv. xlv. 26). They probably occupied an intermediate tract between the Pissantini on the lower part of the *Devól* and the S. extremity of the lake Lychnitis, in which case there is only the plain of *Korytzá* to the left of the Eordaicus for the situation of the Calicoeni. The operations of the consul Sulpicius against Philip in the campaign of B. C. 200, illustrate the ancient geography of this district. The Roman general marched from Apollonia of Illyria through Dassaretis into Lyncestis. The open country supplied him with such abundance of grain that he was enabled to save his own stock while he passed through the plain of Dassaretis, and induced him afterwards to send back his foragers thither, though he was encamped in an equally fertile plain,

Digitized by Google

of which however he had not military possession. (Liv. xxxi. 33.) On peace being made after the battle of Cynoscephalae, Lychnidus, which was the principal town of the Dassaretae, was given up to Pleuratus (Liv. xxxiii. 34) the son of Scardilaïdas, the Illyrian prince, who in the Social War had struggled unsuccessfully with Philip for the possession of Dassaretia (Polyb. v. 108.) The Dassaretae had several towns besides LYCHNIDUS. GERUNIUM and ANTIPATRIA were in Phoebatis both on the *Uzúmi;* to the E. of these on the *Devól* may be placed ORGESSUS, which was a town of the Pissantini; and somewhat nearer to the camp of Sulpicius, CORRAGUM, CODRION, and ILIUM seem to have been in the valley of the *Uzúmi* above *Berát* on the slopes of *Tomór*. Besides these CREONIUM and GERUS are enumerated, with four towns on the lake Lychnitis, viz. ENCHELARIAE, CERAX, SATION, and BOII (Polyb. *l. c.*). These four towns were, it has been inferred, on its W. shore, as the Itineraries which followed the E. side of the lake from the bridge of the Drilo to Lychnidus, make no mention of these places. [E. B. J.]

DASTARCUM. [CARMALAS.]

DATII (Δάτιοι), a people of Aquitania in Gallia, mentioned by Ptolemy (ii. 7), who names their capital Tasta (Τάστα). These names occur nowhere else. Ptolemy places the Datii south of the Gabali, and more north than the Auscii. Thus their position is indicated in a general way. Walckenaer has made an ingenious conjecture as to the position of the Datii. The Ruteni were south of the Gabali, and in the northern part of their territory, which bordered on the Gabali, is a river named *Daze*, in the department of *Aveyron;* and not far from this river *Daze*, to the south, is a place named *Testet*. Walckenaer concludes from this resemblance of names that the Datii occupied a tract between the river *Lot* and *Aveyron*, which was once called *St. Albin*. Resemblance of name alone is not sufficient evidence of ancient sites, but here we have no other evidence; and the position of the modern names corresponds well enough with the possible position of the Datii as indicated by Ptolemy. The conjecture of Walckenaer is confirmed by the fact, if it is true, which he mentions, that the names *Daze* and *Testet* occur in no other part of France. (Walckenaer, *Géog.*, &c., vol. ii. p. 247.) [G. L.]

DATUM. [NEAPOLIS.]

DAULIS (Δαυλίς: at a later time Δαυλία, Strab. ix. p. 423, and Δαύλιον, Polyb. iv. 25: *Eth.* Δαύλιος, Herod. viii. 35; Δαυλιεύς, Aesch. *Choëph.* 674: *Dhavlia*), a very ancient town of Phocis, near the frontiers of Boeotia, and on the road from Orchomenus and Chaeroneia to Delphi. It is said to have derived its name from the woody character of the district, since δαύλος was used by the inhabitants instead of δάσος, while others sought for the origin of the name in the mythical nymph Daulis, a daughter of Cephissus. (Strab. ix. p. 423; Paus. x. 4. § 7.) Daulis is mentioned by Homer as a Phocian town along with Crissa and Panopeus. (*Il.* ii. 520.) It is celebrated in mythology as the residence of the Thracian king, Tereus, who married Procne, the daughter of Pandion, king of Athens, and as the scene of those horrible deeds in consequence of which Procne was changed into a swallow, and her sister Philomele into a nightingale. Hence the latter was called by the poets the Daulian bird. (Thuc. ii. 29; Paus. *l. c.*) The woody district round the town is still a favourite haunt of the nightingale.

Daulis was destroyed by the Persians in the invasion of Xerxes. (Herod. viii. 35.) It was destroyed a second time by Philip, at the end of the Sacred War (Paus. x 3. § 1); but it was subsequently rebuilt, and is mentioned in later times as a town almost impregnable in consequence of its situation upon a lofty hill ("Daulis, quia in tumulo excelso sita est, nec scalis nec operibus capi potest" Liv. xxxii. 18). Pausanias relates (x. 4. § 7) that the inhabitants of Daulis were few in number, but surpassed all the other Phocians in stature and strength. The only building in the town mentioned by him was a temple of Athena; but in the neighbourhood he speaks of a district called Troas, in which was the chapel of a hero called the Antigetes.

The name of Daulis is still preserved in that of the modern village of *Dhavlia*, situated in a narrow valley, through which flows a branch of the Cephissus, called *Platanià*. The walls of the acropolis may be traced on the summit of the height rising opposite the modern village, and connected with the foot of Parnassus by a narrow isthmus. Within the enclosure is an ancient church of St. Theodore. Here an inscription has been found in which mention is made of the worship of Athena Polias and of Serapis. Before the door of the church in the modern village is another ancient inscription, of considerable length, recording an arbitration made at Chaeroneia in the reign of Hadrian, concerning certain property in Daulis. It is given by Leake, and in Böckh's collection (No. 1732). In this inscription we read of "a road leading to the Archagetes," which is evidently the chapel of the hero spoken of by Pausanias. One of the plots of land in the inscription is called Platanus, from which probably comes the name of the river *Platanià*.

On one of the heights above *Dhavlia* lies the monastery of Jerusalem. The road leading to it from the village, and from it to the upper heights of Parnassus, is no doubt the same as the road from Daulis to Parnassus correctly described by Pausanias as longer than the one from Delphi, but less difficult. (Dodwell, *Tour through Greece*, vol. i. p. 204; Leake, *Northern Greece*, vol. ii. p. 97, seq.; Ulrichs, *Reisen in Griechenland*, p. 148.)

DAUNIA. [APULIA.]

DAVIANUM. "Mutatio Davianum" is placed in the Jerusalem Itin. on the road from Vienna (*Valence*) in Gallia Narbonensis to Vapincum (*Gap*). The distance from "Mansio Monte Seleuci" to Davianum, which is on the road from Mons Seleucus to Vapincum, is 8 M. P. D'Anville identifies Davianum with a place *Veine*. Mons Seleucus is certainly *Saléon*, and the position of Davianum may be ascertained tolerably well. Walckenaer places it at *La Beaumette, Deves et le bois des Dèves*, near the *Bastie Monsaléon*. [G. L.]

DAXIMONITIS (Δαξιμωνῖτις), a country in Pontus, in the valley of the river Iris. (Strab. p. 547.) Hamilton (*Researches*, &c. vol. i. p. 358), speaking of the valley of *Tourkhal*, says: "Here the Iris changes its course from west to north, agreeing with Strabo's description of that river near Gaziura, where it leaves the plain of Daximonitis." *Tourkhal* is west of *Tocat*, and a little further north. [G. L.]

DEA VOCONTIORUM, a city of the Vocontii, who were in Gallia Narbonensis, on the east side of the *Rhone*. Dea is only mentioned in the Itins., which place it between Lucus (*Luc*) and Augustum (*Aoust*), and 12 M. P. from Lucus. The modern

Digitized by Google

dre is *Die*, in the department of *Drôme*. In the Notitia of the provinces of Gallia, it is called Civitas Dernensium. If an inscription which is cited, "Col. Dea Aug. Voc," is genuine, the place was made a colonia. Stephanus (*s. v.* Δία) mentions a city, Δία, in Italy, close to the Alps, which may, possibly, be Dea; but if so, "Italy" is a mistake, and we should read "Gallia" instead. [G. L.]

DEBAE or DEBEDAE (Δέβαι), an Arab tribe on the coast of the Red Sea, a little to the north of Mekka. Diodorus Siculus (iii. 44) describes their country as situated at the foot of the Chabinus Mons (ὄρος Χαβῖνον), and permeated by a river so rich in gold dust that the deposit at its mouth glittered with the precious metal; but the inhabitants were utterly ignorant of the art of working it. He describes them as "occupied wholly with the rearing of camels, which animal they used for all purposes, pacific and belligerent; living on their milk and flesh, and using them for the transport of themselves and their merchandise." He mentions a remarkable fact, if true, that "their hospitality was restricted to the Boeotians and Peloponnesians," and assigns a still more remarkable reason, viz., "that, according to ancestral traditions, Hercules had been in terms of intimacy with this nation." Such is the report of Diodorus, copied almost literally from Agatharcides (Hudson, vol. i. p. 59), whose account is abridged by Strabo (xvi. p. 777). Mr. Forster takes the last statement (which he misunderstands of a descent from one common stock") to intimate, under the thin veil of classical fiction, the important historical fact, of the existence of an open trade between the Greeks and Arabs from very remote times, and of all the facilities implied by commercial intercommunity" (vol. i. p. 38). He finds this tribe in "the *Zebeyde* of Burckhardt; the rectified anagram changing *Zebeyde* into *Zedeybe*, and the idiomatic interchange of the *d* and *s* restoring the classical name, as written by Agatharcides, *Debedae*." The relative geographical positions place the identity beyond question, and the sameness of manners, habits, and occupations will complete the conclusive proof that the Dedebae and the *Zebeyde* are one and the same people" (p. 73). He imagines them to be the same as the Cinaedocolpitae of Ptolemy, and the auriferous river to be the Baetius of that geographer. [Baetius.] [G. W.]

DECA'POLIS (Δεκαπόλις), a district of Palestine, so named from the ten cities contained within its limits. They are variously given by different writers, even in Pliny's time — "in quo non omnes eadem reperiuntur." According to him, most authorities gave Scythopolis, Philadelphia, Rhaphana, Scythopolis, Gadara, Hippos, Dios, Pella, Galasa (? Gerasa), Canatha (v. 18). In this view the district comprehended the southern part of Syria, part of Perasa, as well as the neighbourhood of *Bitara*, on the west of the Jordan. But in St. Matthew (iv. 25) "Decapolis" is distinguished from "beyond Jordan;" which would show that the districts were not conterminous. Josephus calls Scythopolis "the greatest city of Decapolis" (*B. J.* iii. 8. § 7), but does not name the others. Eusebius describes it as the part of Perasa "that lies about Hippos, Pella, and Gadara." (*Onomast. s. v.*) [G. W.]

DECELEIA. [Attica, p. 330, a.]

DECEM PAGI, in Gallia, is placed by the Antonine Itin. and the Table on the road from Divodurum *Metis*) to Argentoratum (*Strassburg*). Between Divodurum and Decem Pagi was Ad Duodecimum, a place 12 Gallic leagues from Divodurum according to the Table; and from Ad Duodecimum to Decem Pagi was also 12 Gallic leagues, according to the Table. A place called *Dieuze*, on the *Seille*, in the department of *Meurthe*, seems to represent Decem Pagi. Julian marched from Augustodunum through Decem Pagi to attack the Alamanni (Amm. Mar. xvi. 2). The place was within the territory of the Mediomatrici. [G. L.]

DECE'TIA (*Décise*), an island in the Ligeris (*Loire*), within the territory of the Aedui. In the seventh year of the Gallic War (B.C. 52) Caesar summoned the senate of the Aedui to Decetia. (*B. G.* vii. 33). The name occurs in the Itins. In the Antonine Itin. it is placed on the road from Augustodunum (*Autun*) to Paris, and 16, or, according to another reading, 15, Gallic leagues from Nevirnum (*Nevers* on the Loire). In one place in the Antonine Itin. the name is written Deccidae; and in the Table it is Degena, a corrupted form. The modern site is *Décise*, in the department of *Nièvre*. [G. L.]

DECIA'NA. [Indigetes.]

DECIA'TES, DECIA'TAE (Δεκιᾶται). Ptolemy (ii. 10) has the form Δεκεάτιοι. The Deciates were in Gallia Narbonensis, west of the Var, and their neighbours on the west were the Oxybii (Plin. iii. 5). Ptolemy makes Antipolis (*Antibes*) the chief town of the Deciates; but if this was so in Ptolemy's time, it was not so at an earlier date, for Antipolis was a Greek settlement. Antipolis, however, may have been founded in the country of the Deciates, who occupied the tract along the coast between the town and the Var, and were consequently the nearest people of Transalpine Gaul to Italy. Polybius (xxxiii. 7; Strab. p. 202), who calls the Deciates a Ligurian people, tells how the Ligurians besieged Antipolis and Nicaea, and the Massaliots sent for help to Rome. The Romans sent some commissioners, who landed at Aegitna in the territory of the Oxybii; but the Oxybii, who had heard that they came to give them orders to desist from the siege, wounded one of the commissioners. Upon this the Romans sent the consul Q. Opimius with an army, who defeated the Oxybii and Deciates, and gave part of their country to the Massaliots (B.C. 154). According to Florus (ii. 3), the Deciates were again in arms with the Salyes (B.C. 125), but were defeated by the consul M. Fulvius Flaccus.

The Deciates, as it appears, were also included by Livy among the Transalpine Ligures, as we may infer from the epitome of the 47th book. Stephanus (*s. v.* Δεκίητον) mentions a town of Italy called Decietum, on the authority of the geographer Artemidorus; and he gives the ethnic name Decietae. Whatever error there may be in this extract, it is plain that Stephanus means the Deciates. Mela (ii. 5) mentions an "oppidum Deciatum;" and it is not Antipolis, for he speaks of Antipolis as a separate place. The situation of this town, if there was such a place, is unknown. [G. L.]

DECIUM. [Vascones.]

DE'CUMA, a town of Hispania Baetica, near the river Baetis, and apparently on its left bank, near its junction with the Singulis. (Plin. iii. 1. s. 3.) It is supposed to be the same place as the Detumo, of which we have some coins (Mionnet, *Suppl.* vol. i. p. 114: Sestini, p. 88); and Harduin takes it for the Δητούνδα of Ptolemy (ii. 4. § 11). [P. S.]

DECUMATES AGRI. [Agri Decumates.]

DE'DMASA (Δέδμασα: *Eth.* Δεδμασεύς). [Medmasa.]

Digitized by Google

DEIRE (Δειρή, Strab. xvi. pp. 769, 773; Ptol. iv. 7. § 9; Steph. B. *s. v.*; Berenice Epidires, Plin. vi. 29. s. 33), or the "Neck," so called from its position on a headland of the same name, was a town situated on the African shore of the Straits of *Bab-el-Mandeb*, at their narrowest part. The space between Deire and the opposite foreland of Poseidonium on the Arabian shores was about 60 stadia (8½ miles) in width. Deire stood in lat. 11° 3′ N. It was also called Isidis Portus from a temple of that goddess which overlooked the harbour, and Deire-Berenices from the favourite sister of Ptolemy Philadelphus, who enlarged and granted fresh privileges to the town. (Agathem. p. 8.) [W. B. D.]

DEITA'NIA, a district in the SE. of Spain, mentioned only by Livy, who places it SW. of CONTESTANIA. (Fr. xci.) [P. S.]

DELGOVI'TIA, a station in Britain, mentioned in the first Itinerary as being the second station eastward after leaving *York*. Probably *Market Weight-on*. [R. G. L.]

DELEMNA, a place in Cappadocia. The Jerusalem Itin. places Mutatio Delemna 10 M. P. from Ancyra, on the road to the Cappadocian frontier. The next station in this Itin. to Delemna is Corbeus, 11 M. P. [CORBEUS.] [G. L.]

DE'LIUM (Δήλιον: *Eth.* Δηλιεύς), a small place with a celebrated temple of Apollo, situated upon the sea-coast in the territory of Tanagra in Boeotia, and at the distance of about a mile from the territory of Oropus. This temple, which took its name from the island of Delos, is described by Livy (xxxv. 51) as overhanging the sea, and distant five miles from Tanagra, at the spot where the passage to the nearest parts of Euboea is less than four miles. Strabo (ix. p. 403) speaks of Delium as a temple of Apollo and a small town (πολίχνιον) of the Tanagraei, distant 40 stadia from Aulis. It was here that the Athenians suffered a signal defeat from the Boeotians in the eighth year of the Peloponnesian War, B. C. 424. Hippocrates, the Athenian commander, had seized the temple at Delium, which he converted into a fortress by some temporary works, and after leaving there a garrison, was on his march homewards, and had already reached the territory of Oropus at the distance of 10 stadia from Delium, when he met the Boeotian army advancing to cut off his retreat. In the battle which ensued the Athenians were defeated with great loss; and on the seventeenth day after the battle the Boeotians retook the temple. (Thuc. iv. 90.) Socrates fought at this battle among the hoplites, and, according to one account, saved the life of Xenophon (Strab. ix. p. 403; Diog. Laërt. ii. 22), while, according to another, his own retreat was protected by Alcibiades, who was serving in the cavalry (Plut. *Alc.* 7). A detachment of the Roman army was likewise defeated at Delium by the troops of Antiochus, B. C. 192. (Liv. xxxv. 51.) (Comp. Strab. viii. p. 368; Paus. ix. 20. § 1; Ptol. iii. 15. § 20; Liv. xxxi. 45.)

The modern village of *Dhilissi*, which has taken its name from Delium, is at some little distance from the sea. It is clear, however, from the testimony of Livy already referred to, that the temple of Apollo was upon the coast; and hence the modern village of *Dhilissi* may, as Leake suggests, be the site of the πολίχνιον, a small town of Delium. A few Hellenic fragments have been found at the village. (Leake, *Northern Greece*, vol. ii. p. 449, seq.)

DELMI'NIUM. [DALMINIUM.]

DELOS or DELUS (Δῆλος: *Eth.* and *Adj.* Δήλιος, Δήλια, Δηλιάς, Δηλιακός), the smallest of the islands called the Cyclades in the Aegaean sea, lying in the strait between Rheneia and Myconus. It appears in the earliest times as one of the holiest spots in Hellas. According to the most generally received tradition, it was called out of the deep by the trident of Poseidon, but was a floating island until Zeus fastened it by adamantine chains to the bottom of the sea, that it might be a secure resting-place to Leto, for the birth of Apollo and Artemis (Pind. *ap. Strab.* x. p. 485; Callim. *Hymn. in Del.* passim; Virg. *Aen.* iii. 76; Plin. iv. 12. s. 22; *Inst. of Ant.* art. *Leto.*) As the birthplace of Apollo it became one of the chief seats of his worship, and the god is said to have obtained exclusive possession of the island by giving Calaureia to Poseidon in exchange for it. (Strab. viii. p. 373.) In the same way the Delphians related that Apollo gave Calaureia to Poseidon in order to obtain possession of Delos. (Paus. x. 5. § 6.) Delos was called by various other names by the poets and mythographers. Pliny (*l. c.*) mentions the names of Asteria, Ortygia, Lagia, Chlamydia, Cynthus, Pyrpile; and Stephanus has those of Asteria, Pelasgia, and Chlamydia. Its name of Asteria is alluded to by Poseidon, who speaks of Delos as the "unshaken prodigy of the earth, which mortals call Delos, but the gods in Olympus the far-famed *star* (ἀστρον) of the dark earth." (Pind. *Frag.* 57, 58, ed. Bergk.) Callimachus also says that it was called Asteria, when Leto found refuge upon it. (Ibid. 40.) It received the name of Ortygia because according to one version of the legend Leto was changed by Zeus into a quail (ὄρτυξ), in order to escape from Hera, and in this form arrived at the floating island. (Serv. *ad Virg. Aen.* iii. 72: Servius also mentions the name Ortygia, x. p. 486.) The name of Delos was supposed by the ancient writers to have been given to the island from its becoming clear or plain (δῆλος) after floating about in the sea. (Aristot. ap. Plin. iv. 12. s. 22; Serv. *ad Virg. Aen. l. c.*) In consequence of its having been fastened by Zeus to the bottom of the sea, it was supposed to be immovable even by earthquakes, to which the surrounding islands were frequently subject. Hence Pindar, in the passage already quoted, calls it the "the unshaken prodigy of the earth" (γᾶθεν ἄσειστον τέρας). Down to the time of Pliny (*l. c.*) it was only twice shaken by earthquakes, and on each occasion the phenomenon was regarded with alarm by the whole of Greece. The first occurred just before the Persian invasion (Herod. vi. 98), and the second shortly before the Peloponnesian War (Thuc. ii. 8). It is a curious circumstance that Herodotus speaks of the former earthquake, and Thucydides of the latter as the only one which had ever taken place; and accordingly some commentators suppose that Thucydides actually refers to the same earthquake as the one mentioned by Herodotus. (See Arnold, *ad Thuc. l. c.*)

Respecting the origin of the worship of Apollo at Delos, we have no trustworthy information. K. O. Müller supposes that it was introduced by the Dorians on their voyage to Crete (Müller, *Dor.* vol. i. p. 330); but this is only an hypothesis, unsupported by evidence. In the earliest historical times the island was inhabited by Ionians, and is represented as the centre of a great periodical festival in honour of Apollo, celebrated by all the Ionic cities on the mainland as well as in the islands. In this character it is represented in the Homeric hymn to Apollo, which cannot probably be later than 600 B. C. (Hom.

Digitized by Google

Hymn. in Apoll. 146, seq.; Grote, *Hist of Greece*, vol. iii. p. 222.) The festival was conducted with great splendour; and, as at Delphi, there were musical, as well as gymnastic contests. Like the Olympic and other great festivals of Hellas, it doubtless grew out of one of a more limited character; and we are expressly informed that Delos was originally the centre of an Amphictyony, to which the Cyclades and the neighbouring islands belonged. (Thuc. iii. 104: Strab. x. p. 485; comp. Böckh, *Inscr.* vol. i. p. 252, seq.) The Athenians took part in this festival at an early period, as is evident from the mention of the Deliastae in one of Solon's laws (Athen. vi. p. 234) It was related at a later period that the Athenians instituted the festival to commemorate the safe return of Theseus from Crete, and that the vessel in which the sacred embassy sailed to the festival was the identical one which had carried Theseus and his companions. (Plut. *Thes.* 21; Plat. *Phaed.* sub init.) The two Ionic despots, Peisistratus of Athens and Polycrates of Samos, both took a warm interest in the festival: Peisistratus purified the island by removing all the tombs which were within view of the temple; and Polycrates dedicated the neighbouring island of Rheneia to the Delian Apollo, by fastening it with a chain to Delos. But owing to various causes, among which undoubtedly was the conquest of the Ionic cities in Asia Minor by the Persians, the festival had fallen into decay at the commencement of the Peloponnesian War. In the sixth year of this war, B. C. 426, the Athenians purified Delos. They removed all the tombs from the island, and declared it to be unlawful henceforth for any living being to be born or die within it, and that every pregnant woman should be carried over to the island of Rheneia in order to be delivered. (Thuc. *l. c.*; Strab. x. p. 486.) On this occasion the Athenians restored the ancient festival under the name of the Delia, of which an account is given elsewhere. (*Dict. of Ant.* art. *Delia.*)

The sanctity of Delos was respected by Datis and Artaphernes, who would not anchor here, but passed on to Rheneia. They also sent a herald to recall the Delians, who had fled to Tenos, and they burnt upon the altar of the god 300 talents of frankincense. (Herod. vi. 97.) On the formation of the confederacy B. C. 477, for the purpose of carrying on the war against Persia, Delos was chosen as the common treasury (Thuc. i. 96); but subsequently the transference of the treasury to Athens, and the altered character of the confederacy, reduced the island to a condition of absolute political dependence upon Athens. The purification of Delos by the Athenians in B. C. 426 has been already mentioned; but four years afterwards (B. C. 422) the Athenians thinking the removal of the Delians themselves essential to the complete purification of the island, banished all the inhabitants, who obtained a settlement at Atramyttium (Adramyttium), which was given to them by the satrap Pharnaces. (Thuc. v. 1; Paus. iv. 27. 9.) Here, some years afterwards (B. C. 411), several of them were murdered by Arsaces, a general of Tissaphernes (Thuc. viii. 108).

After the fall of Corinth (B. C. 146) Delos became the centre of an extensive commerce. The sanctity of the spot and its consequent security, its festival which was a kind of fair, the excellence of its harbour, and its convenient situation on the highway from Italy and Greece to Asia, made it a favourite resort of merchants. (Strab. x. p. 486.) So extensive was the commerce carried on at Delos, that 10,000 slaves are said to have changed hands here in one day. (Strab. xiv. p. 668.) Delos was celebrated for its bronze, and before the invention of the Corinthian bronze the *aes Deliacum* had the greatest reputation in antiquity, and the vessels made of it were in very great request. (Plin. xxxiv. 2. s. 4; "vasa Deliaca," Cic. *pro Rosc. Am.* 46, *Verr.* ii. 34; *Dict. of Ant.* p. 25, b., 2nd ed.) The Romans confirmed the Athenians in the possession of the island; but in the Mithridatic War the generals of Mithridates inflicted upon it a devastation, from which it never recovered. In the time of Strabo it still belonged to the Athenians. (Polyb. xxx. 18; Strab. *l. c.*; Appian, *Mithr.* 28; Paus. iii. 23. §§ 3, 4.) Pausanias describes it as almost deserted in his time (viii. 33. § 2, comp. ix. 34. § 6).

Delos is little more than a rock, being only 5 miles in circumference, according to Pliny (*l. c.*). The town is described by Strabo (x. p. 485) as lying in a plain at the foot of Mount Cynthus, and the only buildings which he specifies in the island are the *ἱερὸν* of Apollo, and the temple of Leto. The town was situated on the western side of the island. Mount Cynthus, from which Apollo and Leto are so often called, is a bare granite rock not more than 400 or 500 feet high. It was probably the acropolis of the ancient town, and seems to have been surrounded by a wall. On its sides are many architectural fragments of white marble, and on its summit are the foundations and remains of a large building of the Ionic order. In antiquity two flights of steps led up to the summit of the mountain; the one on the northern, and the other on the western side. On the western side is an ancient gate, of which "the roof is formed of two stones rudely shaped, and resting against each other at an angle so obtuse that the rise is only 4 feet 2 inches, above a breadth of 16 feet 2 inches." (Leake.)

The ancient writers speak of a little river INOPUS (Ἴνωπός) in the island. They compare its rising and falling with the same phaenomena of the Nile, and some even suppose there was a connection between it and the Aegyptian river. (Strab. vi. p. 271, x. p. 485; Callim. *Hymn. in Del.* 206, 263, *in Dian.* 171; Paus. ii. 5. § 3; Plin. ii. 103. s. 106.) We also find mention of a lake or tank, called *λίμνη τροχοειδής* by Herodotus (ii. 170) and Theognis (7), *τροχόεσσα* by Callimachus (*in Del.* 261), containing the water necessary for the service of the temple of Apollo. Its name, as well as the epithet *περιτγής* given it by Callimachus (*in Apoll.* 59), sufficiently proves that it was oval or circular; and there can be no doubt that it is the oval basin, 100 yards in length, situated in the northern half of the island, and a little inland east of the ancient harbour, which Tournefort and the earlier writers absurdly supposed to be a Naumachia. This lake is frequently mentioned by other ancient writers; and near it Leto is said to have brought forth her divine children. (Aesch. *Eum.* 9; Eurip. *Ion*, 169, *Iphig. Taur.* 1103.) Others again represent the birthplace of Apollo and Artemis as near the Inopus (Hom. *in Apoll.* 18; Callim. *in Del.* 206); and as the exact spot was pointed out in later times, the Inopus would appear to have been situated in the northern part of the island, near the oval basin mentioned above. Leake, however, identifies the Inopus with the small brook which flows down from Mount Cynthus and joins the sea at the port of *Fourni*, since it is the only running stream in the island, and that only in winter. Leto is said to have grasped a palm-tree

Digitized by Google

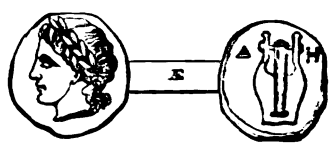
when she bore her children; and the palm, which does not grow in Greece Proper, was held in especial reverence in Delos. (Comp. Paus. viii. 48. § 3; Hom. *Od.* vi. 162; Aelian, *V. H.* v. 4; Hygin. *Fab.* 140.) The identical palm-tree of Leto was shown by the Delii in the time of Cicero (*de Leg.* i. 1).

Delos is now a heap of ruins. Whole shiploads of columns and other architectural remains were carried off, centuries ago, to Venice and Constantinople. Of the great temple of Apollo, of the stoa of Philip, of the theatre, and of numerous other buildings, there is scarcely the capital of a column or an architrave left uninjured. Not a single palm-tree is now found in the island, and the only inhabitants are a few shepherds, taking care of some flocks of sheep and goats brought over from Myconus. The chief buildings of Delos lay between the oval basin and the harbour on the western side of the island. The ruins of the great temple of Apollo and of the stoa of Philip III. of Macedon may here be distinctly traced. (Böckh, *Inscr.* n. 2274.) There are still remains of the colossal statue of Apollo dedicated by the Naxians, and in front of the basis we read Ναξίοι Ἀπόλλωνι. This statue was thrown down in antiquity. A brazen palm-tree, which had been dedicated by Nicias, according to Plutarch (*Nic.* 3), or by the Naxians themselves, according to Semus (Athen. xi. p. 502), having been blown down by the wind, carried with it the colossal statue. "The theatre stood at the western foot of Mount Cynthus, facing Rheneia, and not far from the stoa of Philip. Its extremities were supported by walls of white marble of the finest masonry, but of a singular form, having had two projections adjacent to the orchestra, by which means the lower seats were in this part prolonged beyond the semicircle, and thus afforded additional accommodation to spectators in the situation most desirable. The diameter, including only the projections, is 187 feet. The marble seats have all been carried away, but many of the stones which formed their substruction remain. Immediately below the theatre, on the shore, are the ruins of a stoa, the columns of which were of granite. In a small valley which leads to the summit of Mount Cynthus, leaving the theatre on the left, many ruins of ancient houses are observable; and above them, in a level at the foot of the peak, there is a wall of white marble, which appears to have been the cell of a temple. Here lies an altar, which is inscribed with a dedication to Isis by one of her priests, Ctesippus, son of Ctesippus of Chius. Like many others, remaining both in this island and in Rheneia, it is adorned with bulls' heads and festoons. Another fragment of an inscription mentions Sarapis; and as both these were nearly in the same place where Spon and Wheler found another in which Isis, Anubis, Harpocrates, and the Dioscuri were all named, it is very probable that the remains of white marble belonged to a temple of Isis. Among them is a portion of a large shaft pierced through the middle, 4 feet 5 inches in diameter; and there is another of the same kind, 5 feet 8 inches in diameter, half-way up the peak of Cynthus." (Leake.) After describing Mount Cynthus, of which we have already spoken, Leake continues:—"Ruins of private houses surround Mount Cynthus on every side. On the heights above the Trochoëssa, which form the north-western promontory of the island, are many other similar ruins of ancient houses, neatly constructed with mortar. On the summit of the same hill, near the remains of a large house, are some shafts of white marble, a foot and a half in diameter, half polygonal and half plain. As this quarter was entirely separated from the rest on Mount Cynthus by the valley containing the sacred buildings, there is great probability that it was the new Athenae Hadrianae, which was built at the expense of the emperor Hadrian, in a place called Olympieum (Phlegon, *ap. Steph. B. s. v.* Ὀλυμπίειον), perhaps from a temple of Jupiter Olympius, to which the shafts just mentioned may have belonged." In the northern part of the island are the remains of the stadium and the gymnasium.

The strait, which separates Delos and Rheneia, is 4 stadia, or about half a mile, in width. (Strab. x. p. 486.) In this strait are two rocks, called *Inopodes*, of which one is probably the ancient island Hecate (Ἑκάτης νῆσος, Harpocrat. and Suid. *l. c.*; Semus, *ap. Athen.* xiv. p. 645.)

Rheneia or Rhenaia (Ῥήνεια, Ῥηναία, both forms occur in writers and inscriptions) is much larger than Delos, being about 10 miles in circumference. The northern and southern halves are divided by a narrow isthmus. The southern half, which lies opposite Delos, was the burial-place of the latter, as has been already explained, and is now covered with remains of sepulchres. There are also ruins of many private houses, like those at Delos (Thuc. i. 13, iii. 104; Herod. vi. 97; Strab. x. p. 486; Diod. xii. 58.)

Both Delos and Rheneia are now called *Dili*. (Besides the earlier works of Spon, Wheler, Tournefort, see Leake, *Northern Greece*, vol. iii. p. 95, seq.; Ross, *Reisen auf den Griech. Inseln*, vol. i. p. 30, seq., vol. ii. p. 167, seq.; Ehrensted, *Reisen*, vol. i. p. 59; Fiedler, *Reise durch Griechenland*, vol. ii. p. 269, seq.; *Expéd. Scientif.* vol. iii. p. 3, seq.; Sallier, *Hist. de l'Isle de Délos*, in *Mém. de l'Acad. des Inscr.* vol. iii. p. 376; Barville, *Miscell. Observ.* vol. vii. p. 1, seq.; Schwarz, *Deliacorum Part. I.*, Francof. 1825; Schlegel, *Pauca quaedam de Rebus Deli*, Mitav. 1840.)



COIN OF DELOS.

DELPHI (Δελφοί: *Eth.* Δελφός, *fem.* Δελφίς, Δελφή; Adj. Δελφικός: *Kastri*), a town in Phocis, and one of the most celebrated places in the Hellenic world in consequence of its oracle of Apollo.

I. Situation.

The situation of Delphi is one of the most striking and sublime in all Greece. It lies in the narrow vale of the Pleistus, which is shut in on one side by Mount Parnassus, and on the other by Mount Cirphis. At the foot of Parnassus is a lofty wall of rocks, called Phaedriades in antiquity, rising 2000 feet above the level of the sea. This rocky barrier faces the south, and from its extremity two lower ridges descend towards the Pleistus. The rocky ground between these two ridges also slopes down towards the river, and in about the middle of the semicircular recess thus formed by the town of Delphi, occupying the central area of a great natural theatre, to which its site is compared by the ancient writers. (Οἱ Δελφοί, στρατόπεδόν

Digitized by Google

ρμίον, διατρυφάδες, κατὰ κορυφὴν ἔχων τὸ μαντεῖον καὶ τὴν πόλιν, Strab. ix. p. 418; media saxi spes in formam theatri recessit, Justin, xxiv. 6.) The northern barrier of the Phaedriades is cleft towards the middle into two stupendous cliffs, between which issues the far-famed Castalian spring, which flows down the hill into the Pleistus. The ancient town lay on both sides of the stream, but the greater part of it on the left or western bank, on which stands the modern village of *Kastri*. Above the town was the sanctuary of the god, immediately under the Phaedriades.

Delphi was, so to speak, shut in on all sides from the rest of the world, and could not have been seen by any of the numerous pilgrims who visited it, till they had crossed one of its rocky barriers, when all its glories burst suddenly upon their view. On its northern side were the Phaedriades; on its eastern and western sides, the two lower ridges projecting from the Phaedriades towards the Pleistus; while on the other side of the river towards the south was the range of Mt. Cirphis. Three roads led to Delphi; one from Boeotia, — the celebrated *Schiste*, which passed through the eastern of two ridges mentioned above; and two others from the west, forming the only two openings in the western range. Of these two the more northerly led from Amphissa, and the more southerly from Crissa, the modern *Chrysó*, which was the one taken by the pilgrims coming from Cirrha. Traces of the ancient carriage-road from Crissa to Delphi may still be seen. Delphi was fortified by nature, on the north, east, and west, by the Phaedriades and the two projecting ridges: it was only undefended on the south. On this side it was first fortified by a line of walls by Philomelus, who also erected two towers to command its two approaches from the west. The circuit of the city was only 16 stadia, or a little more than two miles. (Strab. *l. c.*) A topographical description of the city is given below.

The Delphian valley, or that part of the vale of the Pleistus lying at the foot of the town, is mentioned in the Homeric Hymn to Apollo (284), under the name of κοίλην βῆσσαν; and is called by Pindar Πίσσαιον πέδιον (*Pyth.* v. 50), and Ἀπολλωνία πεδία (*Pyth.* vi. 10), and by Strabo also πεδιὰς (Strab. *l. c.*).

II. History.

The town of Delphi owes its origin as well as its importance to the oracle of Apollo. According to the traditions, it had belonged to other divinities before it passed into the hands of Apollo. In which form it is represented as held in succession by Gaea, Themis, and the Titanian Phoebe, the last of whom gave it to Phoebus, when he came from Delos. (Hymn. 1, seq.) Pausanias says that it was originally the joint oracle of Poseidon and Ge; that Ge gave her share to Themis, and Themis to Apollo; and that the latter obtained from Poseidon the other half by giving him in exchange the island of Calaureia. (Paus. x. 5. § 6, seq.) The proper name of the oracle was Pytho (Πύθω); and in the name that of Delphi, which was subsequently the name of the town, does not occur. In the Iliad the temple of Phoebus Apollo at the rocky Pytho is already filled with treasures (*Il.* ix. 405); and in the catalogue of the ships the inhabitants of Pytho are mentioned in the same line with those of Cyparissus (*Il.* ix. 405). In the Odyssey Agamemnon consults the oracle at Pytho (*Od.* viii. 80). It thus appears in the most ancient times as a sacred spot; but the legend of its foundation is first related in the Homeric Hymn to Apollo. In this poem Apollo, seeking for a spot where he may found an oracle, comes at last to Crissa under Mount Parnassus. He is charmed with the solitude and sublimity of the place, and forthwith commences the erection of a temple, which is finished under the superintendence of the two brothers Trophonius and Agamedes. He then slays the huge serpent which infested the place; and from the monster *rotting* (from πύθειν) in the ground, the temple was called Pytho, and the god the Pythian: —

> ἐξ οὗ νῦν Πυθὼ κικλήσεται· οἱ δὲ ἄνακτα
> Πύθιον καλέουσιν ἑκάεργον, οὕνεκα κεῖθι
> αὐτοῦ πῦσε πέλωρ μένος ὀξέος ἠελίοιο.
>
> (*Hymn. in Apoll.* 372.)

The temple now wanted priests; and the god, beholding a Cretan ship sailing from Cnossus, metamorphosed himself into a dolphin, and brought the vessel into the Crissaean gulf. Here the Cretans landed, and, conducted by the god, founded the town of Crissa, and became the priests of the temple. He taught them to worship him under the name of Apollo Delphinius, because he had met them in the form of a dolphin (Δελφίς). Müller (*Dorians*, vol. i. p. 238), and many other writers, suppose that this temple was really founded by colonists from Crete, and that the very name Crissa points to a Cretan origin. We, however, are disposed to think that in this, as in so many other cases, the legend has sprung out of an attempt to explain the names; and that it was simply the names of Crissa and Delphi which suggested the story of the Cretan colonists and of the metamorphosis of the god into the dolphin. It is useless to speculate as to what is the real origin of the names of Crissa and Pytho. Many writers derive the latter from πυθέσθαι, "to inquire," in spite of the difference of the quantity (Πῡθώ, πῠθέσθαι); but the similarity of sound between the two words is probably only accidental. Whatever may be thought of the origin of the places, the historical fact worthy of notice is, that Crissa had at first the superintendence of the sanctuary of Pytho, and continued to claim jurisdiction over it even after the Amphictyonic Council held its spring meeting at the temple, and began to regard itself as the guardian of the place. A town gradually sprung up round the sanctuary, the inhabitants of which claimed to administer the affairs of the temple independently of the Crissaeans. Meantime Cirrha, which was originally the sea-port of Crissa, increased at the expense of the latter; and thus Crissa declined in importance, as Cirrha and Delphi augmented. It is probable that Crissa had already sunk into insignificance before the Sacred War in B. C. 595, which ended in the destruction of Cirrha by the order of the Amphictyonic Council, and in the dedication of the Cirrhaean plain to the town. An account of this war is given elsewhere [Crissa]; and it is only necessary to repeat here, that the spoils of Cirrha were employed by the Amphictyons in founding the Pythian games, which were henceforwards celebrated under the superintendence of the council every four years, — in the former half of every third Olympiad. The first celebration of the Pythian games took place in B. C. 586. The horse races and foot races were celebrated in the maritime plain near the site of Cirrha. The hippodrome continued to be in this

Digitized by Google

spot down to the latest times (Paus. x. 37. § 4); but the stadium, which was still in the maritime plain in the time of Pindar (*Pyth.* xi. 20, 23), was subsequently removed to the city, where the musical and poetical matches seem to have been always held.

From the time of the destruction of Cirrha, Delphi was indisputably an independent state, whatever may have been its political condition before that time. From this time it appears as the town of Delphi, governed by its own magistrates. The name of Delphi first occurs in one of the most recent of the Homeric hymns (xxvii. 14.), and in a fragment of Heraclitus. (Plut. *de Pyth. Orac.*, c. 21, p. 404.) The population of Delphi came from Lycoreia (Λυκώρεια), a town situated upon one of the heights of Parnassus above the sanctuary. This town is said to have been founded by Deucalion, and from it the Delphian nobles, at all events, derived their origin. Hence, Plutarch tells us that the five chief-priests of the god, called Ὅσιοι, were chosen by lot from a number of families who derived their descent from Deucalion. (Strab. ix. pp. 418, 423; Schol. *ad Apoll. Rhod.* ii. 711; Paus. x. 6. § 2; Plut. *Quaest. Graec.* 9, p. 380.) The remains of Lycoreia are found at the village of *Liákura*. Müller conjectures, with much probability, that the inhabitants of Lycoreia were Dorians, who had spread from the Dorian Tetrapolis over the heights of Parnassus. At all events, we know that a Doric dialect was spoken at Delphi; and the oracle always showed a leaning towards the Greeks of the Doric race. Moreover, that the Delphians were of a different race from the Phocians is clear from the antipathy which always existed between the two peoples.

The government of Delphi appears at first to have been in the exclusive possession of a few noble families. They had the entire management of the oracle, and from them were chosen the five Ὅσιοι, or chief-priests of the god, as is mentioned above. These are the persons whom Euripides describes as "sitting near the tripod, the Delphian nobles, chosen by lot" (*οἱ πλησίον θάσσουσι τρίποδος .... Δελφῶν ἀριστῆς, οὓς ἐκλήρωσεν πάλος, Ion*, 415). They are also called by the poet "the lords and princes of the Delphians," and formed a criminal court, which sentenced by the Pythian decision all offenders against the temple to be hurled from a precipice. (*Κοιρανοὶ Πυθικοί*, 1219; *Δελφῶν ἄνακτες*, 1222; *Πυθία ψῆφος*, 1250; from Müller, *Dorians*, vol. i. p. 240.) From the noble families the chief magistrates were chosen, among whom in early times a king (Plut. *Quaest. Graec.* 12. p. 383), and afterwards a prytanis, was supreme (Paus. x. 2. § 2). We also find in inscriptions mention of archons who gave their names to the year, of a senate (Βουλή), and in later times of an agora. (Böckh, *Inscr.* No. 1687—1724; Müller, *Dor.* vol. i. p. 192.) The constitution of Delphi and its general condition offered a striking contrast with what we find in other Grecian states. Owing not only its prosperity, but even its very existence, to its oracle, the government was of a theocratic nature. The god possessed large domains, which were cultivated by the slaves of the temple, who are frequently mentioned in inscriptions. (Müller, vol. i. p. 283.) In addition to this, the Delphian citizens received numerous presents from the monarchs and wealthy men who consulted the oracle, while at the same time the numerous sacrifices offered by strangers were sufficient for their support. (Comp. Athen. iv. p. 173.) Hence they became a lazy, ignorant, and sensual people; and their early degeneracy is implied in the tradition of Aesop's death.

An account of the Delphic oracle, of the mode in which it was consulted, and of its influence in Greece, is given in the *Dict. of Ant.* (art. *Oraculum*). It only remains here to trace its history. In the seventh century before the Christian era its reputation was established, not only throughout Hellas, but even among the surrounding nations, which frequently sent solemn embassies to ask the advice of the god. This wide extension of the influence of the oracle was owing to the fact that almost all Greek colonies were founded with the sanction, and frequently at the express command, of the Pythian Apollo: and thus the colonists carried with them a strong reverence for the patron god of their enterprise. Gyges, the founder of the last Lydian dynasty, who reigned B. C. 716—678, presented valuable gifts to the god (Herod. i. 13, 14); and Croesus, the last monarch of this race, was one of the greatest benefactors which the god ever had. His numerous and costly presents are specified at length by Herodotus (i. 50. seq.). The colonies in Magna Graecia also spread among the inhabitants of Italy a reverence for the Delphic oracle. The Etruscan town of Agylla (Caere) had at Delphi a thesaurus belonging to their state; and the last king of Rome sent to consult the oracle.

In B. C. 548 the temple was destroyed by fire (Paus. x. 5. § 13), when many of its votive offerings perished or were greatly injured (Herod. ii. 180). The Amphictyons determined that the temple should be rebuilt on a scale of magnificence commensurate with the sanctity of the spot. They decreed that one-fourth of the expense should be borne by the Delphians themselves, and that the remainder should be collected from the other parts of the Hellenic world. The sum required for the building was 300 talents, or 115,000*l.* sterling; and when it was at length collected, the family of the Alcmaeonidae, then exiles from Athens, took the contract for the execution of the work. They employed as architects Spintharus, the Corinthian, and gained great reputation for their liberality in using Parian marble for the front of the temple in place of the coarser stone prescribed in the contract. (Herod. ii. 180, v. 62; Paus. *l. c.*)

In B. C. 480 Xerxes sent a detachment of his army to plunder the temple. The Delphians in alarm sought safety on the heights of Mt. Parnassus, but were forbidden by the god to remove the treasures from his temple. Only sixty Delphians remained behind, but they were encouraged by divine portents; and when the Persians who came from Phocis by the road Schistê began to climb the rugged path leading up to the sanctuary, and had already reached the temple of Athena Pronaea, on a sudden thunder was heard to roll, the war-shout sounded from the temple of Athena, and two huge crags rolled down from the mountains, and crushed many to death. Seized with a sudden panic the Persians turned and fled, pursued by two warriors of superhuman size, whom the Delphians affirmed were the two heroes Phylacus and Autonous, whose sanctuaries were near the spot. Herodotus, when he visited Delphi, saw in the sacred enclosure of Athena Pronaea the identical crags which had crushed the Persians; and Ulrichs noticed near the spot large blocks of stone which had rolled down from the summit. (Herod. viii. 35—39.)

al. xi. 14; Ulrichs, p. 46.) In B. C. 357 the cians, who had been sentenced by the Amphic-nic Council to pay a heavy fine on the pretext of ir having cultivated a portion of the Cirrhaean ia, were persuaded by Philomelus to complete sacrilege with which they had been branded by ing the temple of Delphi itself. The enterprise s successful, and Delphi with all its treasures ed into the hands of the Phocians. Hence arose celebrated Sacred War, which will be found ted in all histories of Greece. The Phocians at t abstained from touching the riches of the tem-; but being hard pressed by the Thebans and rans, they soon converted the treasures into ey for the purpose of paying their troops. When war was at length brought to a conclusion by ip of Macedon, and the temple restored to the dy of the Amphictyons (B. C. 346), its more able treasures had disappeared, though it still tained numerous works of art. The Phocians e sentenced to replace, by yearly payments, these sures, estimated at the sum of 10,000 talents, or rly two millions and a half sterling. The Pho-a, however, were far too poor ever to be able to rn to the shrine any considerable portion of its ir wealth. In B. C. 279 the report of its riches ted the cupidity of Brennus and the Gauls; they probably were ignorant of the loss it had ained in the Sacred War. They advanced to the attack by the same road which the Persians had taken, but were repulsed in like manner by almost the same supernatural agency. While the thunder rolled and an earthquake rent the rocks, huge masses of stone rolled down from the mountains and crushed the foe. (Justin, xxiv. 6—8; Paus. x. 23.) The temple was plundered by Sulla, when he robbed those of Olympia and Epidaurus. (Dion Cass. vol. i. p. 49, ed. Reimar.; Diod. *Exc.* p. 614, ed. Wess.) Strabo describes the temple as very poor in his time (ix. p. 420). It was again rifled by Nero, who carried off 500 brazen statues (Paus. x. 7. § 1). This emperor, angry with the god, deprived the temple of the Cirrhaean territory, which he distributed among his soldiers, and abolished the oracle. (Dion Cass. lxiii. 14.) But Hadrian, who did so much for the restoration of the Grecian cities and temples, did not neglect Delphi; and under his reign and that of the Antonines it appeared probably in a state of greater splendour than had been the case from the time of the Sacred War. In this condition it was seen and described by Pausanias; and we learn from Plutarch that the Pythia still continued to give answers (*de Pyth. Orac.* c. 24). Coins of Delphi are found down to the time of Caracalla. Constantine carried off several of its works of art to adorn his new capital. (Sozom. *H. E.* ii. 15.) The oracle was consulted by Julian, but was finally silenced by Theodosius.

III. TOPOGRAPHY.

n describing Delphi we shall follow the steps of nanias. He entered Delphi on its eastern side, ing came by the road called Schistè. On the side of the road before the town was the ancient cemetery, of which there are still numerous remains: many of the graves are cut out of the face of the rock. Upon entering the town Pausanias saw four temples in succession: the first was in ruins; the

Digitized by Google

second was empty; in the third were a few statues of Roman emperors; and the fourth was the temple of Athena Pronoea. (Paus. x. 8. § 7.) The last is described by Demosthenes as a very large and beautiful temple; and here sacrifices were offered before consulting the oracle of Apollo. This goddess is also called Pronaea from her dwelling in front of the temple of Apollo, that is, upon the road leading to the main entrance of the latter. (Dem. *c. Aristog.* i. p. 780; Aeschin. *c. Ctesiph.* p. 69; Aristid. *Or. in Minerv.* p. 26; Herod. i. 92, viii. 37; Diod. xi. 14; Aeschyl. *Eum.* 21, Παλλὰς Προναία δ' ἐν λόγοις πρεσβεύεται.) The site of the four temples is marked by an extensive platform resting upon polygonal walls, on which lie fragments of pillars, triglyphs, and other remains of temples, which give to the place the name of *Marmariá*.

A little above the temple of Athena Pronoea Pausanias saw the sanctuary of Phylacus, a native hero, who along with his comrade Autonous assisted the Delphians, both when the Persians and the Gauls made an attempt upon the temple. The masses of stone still lying upon this spot have been already mentioned. A short distance further was the Gymnasium to the left of the road, the site of which is now occupied by the monastery of the *Panaghía*, surrounded by olives and mulberry trees. In the church of the monastery two ancient inscriptions have been found (Böckh, *Inscr.* 1687, 1723), as well as triglyphs and other architectural remains. Pausanias says, that on turning to the left from the Gymnasium the distance down to the river Pleistus appeared to him to be only three stadia, but it is considerably more. The Pleistus is now called *Xeropótamos*, because it is dry in the summer months.

"In ascending from the gymnasium to the temple of Apollo, the water of Castalia was on the right of the road." (Paus. x. 8. § 9.) The far-famed fountain of Castalia issues from the fissure between the two lofty cliffs with peaked summits, of which we have already briefly spoken in describing the site of Delphi. The spring rises close to the eastern of the two cliffs, now called *Flembúko*. In antiquity it bore the name of Hyampeia (Ὑάμπεια), as appears from the statement of Herodotus, that the sanctuary of Autonous was near the Castalia at the foot of the Hypampeian summit. (Herod. viii. 39.) From this height criminals were hurled, who had been guilty of any act of impiety towards the Delphian sanctuary. (Schol. *ad Lucian. Phal.* i. 6; Schol. *ad Aristoph. Vesp.* 1444; del. *Var. Hist.* xi. 5; Eurip. *Ion*, 1222, 1266.) After the murder of Aesop, who was hurled from the Hyampeia, the Delphians, out of respect to his memory, transferred the place of punishment to the peak Nauplia (Ναυπλία, Plut. *de Ser. Num. Vind.* c. 12; comp. Herod. ii. 134). This has been usually supposed to be the western of the two summits, now named *Rodhini*; but there is no authority for this statement, and Ulrichs transfers the name to the steep rocks on the western side of the town, from which many Turkish prisoners were hurled in the war of independence.

The celebrity of the two peaks through which the Castalia flows led the poets and later writers to speak of two summits of Parnassus, although one, namely that of Lycoreia, towers above all others. Some writers even seem to have supposed that the two peaks of the Castalia were actually the summits of Parnassus itself, although the latter rises in reality several thousand feet above them: —

"Mons ibi verticibus petit arduus astra duobus
Nomine Parnassus, superatque cacumine nubes."

(Ov. *Met.* i. 316; comp. Lucan, v. 71; Stat. *Theb.* vii. 346; Lucian, *Contempl.* 5; Nonn. *Dionys.* xi. p. 358.) The two peaks were sacred to Dionysus. Above them was the Corycian cave, of which we shall speak below, which also belonged to Dionysus and his attendants, the Corycian nymphs: hence the name of Corycian was sometimes given to the two summits themselves: —

σὲ δ' ὑπὲρ διλόφου πέτρας
στέροψ ὄπωπε λιγνὺς, ἔνθα Κωρύκιαι Νύμφαι
στείχουσι Βακχίδες,
Κασταλίας τε νᾶμα. (Soph. *Antig.* 1126)

σέβω δὲ νύμφας, ἔνθα Κωρυκὶς πέτρα
κοίλη, φίλορνις, δαιμόνων ἀναστροφή·
Βρόμιος δ' ἔχει τὸν χῶρον. (Aesch. *Eum.* 21)

πόθι Νύσας ἄρα τᾶς θηροτρόφου θυρσοφόρος
θιάσους, ὦ Διόνυσ', ἢ κορυφαῖς Κωρυκίαις;
(Eurip. *Bacch.* 556)

The semicircular range of rocks, to which the two summits belonged, bore the general name of Phaedriades (Φαιδριάδες), as was remarked above. Diodorus gives this name to the western rock, where Philomelus gained a victory over the Locrians (xvi. 28); and the eastern rock Hyampeia, from which Aesop is said to have been precipitated, is included by Suidas among the Phaedriades (Suid. *s. vv.* Αἴσωπος, Φαιδρίας). They faced nearly due south, and thus received the rays of the sun during the most brilliant part of the day. It was apparently owing to this circumstance that they were called Phaedriades, or "Resplendent." Receiving the full rays of the sun, they reflected them upon the temple and works of art below: and hence Ion represents himself as "serving the living ray beneath the sun's bright wing" (παπταίνων ἔξω ἀελίου πτέρυγι δοῦ λατρεύων, Eurip. *Ion*, 122: see Mure, *Tour in Greece*, vol. i. p. 188). In the inaccessible rocks of the Phaedriades innumerable birds build their nests; and eagles, vultures, and other birds of prey constantly hover over the valley below. The same was the case in ancient times; and accordingly, in Euripides, Ion, when about to discharge his daily service in the temple, carries with him a bow and arrows in order to keep off these intruders. (Eurip. *Ion*, 154, seq.)

The fissure between the two summits is the bed of a torrent, which forms in seasons of rain a fine cascade of about 200 feet in height. "At the lower extremity of the dry torrent bed, just where it emerges from between the cliffs, issue the waters of the Castalian spring, oozing at first in scarce perceptible streamlets from among the loose stones, but swelling into a considerable brook within not many yards of their first appearance above ground." (Mure.) It flows through a hollow dell down to the Pleistus, passing by the monastery of the *Panaghia* on its north or eastern side.

The Castalia was the holy water of the Delphian temple. All persons who came to consult the oracle, or who wished to pray to the god before engaging in any of the matches of the Pythian games, or who visited Delphi for any religious object whatsoever, were obliged to purify themselves at this sacred fountain. (Heliod. *Aeth.* ii. 26; Find. *Pyth.* iv. 254, v. 39; Plut. *Arist.* 20.) Even the servants of the temple used the water for the same purpose. (Eurip. *Ion*, 94.) The bathing of the hair seems to have

Digitized by Google

was the chief form of the purification, and hence it is attributed by the poets to Apollo himself:—

ἔτι δὲ Κασταλίας ὕδωρ
ἁγνεύει με κόμας ἰμάς
θεόθεν. (Eurip. *Phoen.* 222.)

"Qui rore puro Castaliae lavit
Crines solutos"

(*Carm.* iii. 4. 61; comp. Ov. *Met.* i. 371; Stat. *Theb.* i. 698). There can be no doubt that those who visited Delphi for the purpose of being purified from murder bathed their whole body in the Castalian spring. There are still remains of a bath cut out of the rock, which received the waters of the spring, and to which steps led down. It is called by Ulrichs the "Bath of the Pythian Pilgrims." Preceding writers had given it the name of the "Bath of the Pythia," an appellation which has arisen from the erroneous statement of a Scholiast (*ad Eurip.* Phoen. 230). The aged women, who were elected to the office of Pythia from the Delphian families, appear never to have bathed in the fountain, or at most only upon their consecration to their prophetic office, since they lived in the temple without coming in contact with any profane objects, and consequently needed no further purification. In the Ion of Euripides the Pythia is in the adytum before the sun-rise, and in the *Eumenides* of Aeschylus there is no mention of the bath of the Pythia before she ascends the tripod.

In later times the Castalian spring was said to impart to those who drank of it poetic inspiration; but this is an invention of the Roman poets, who appear to have attributed to it this power from its being the protector of the Muses:—

"Mihi flavus Apollo
Pocula Castalia plena ministret aqua."

(Ov. *Am.* i. 15. 35; comp. Stat. *Silv.* v. 5, init.; Martial, xii. 3. 11.)

The Castalia is now called the fountain of St. John, from a small chapel of St. John which stands near to its source.

Near the spring there is at present a plane tree, which is the only one in *Kastrí* and the immediate neighbourhood. It is conjectured by Ulrichs to be a very tree celebrated in antiquity as the one which Agamemnon was said to have planted at Delphi (Theophr. *Hist. Plant.* iv. 13. s. 14), since it seems scarcely possible to assign any limits to the life of plane trees in Greece, especially when they grow by the side of perennial streams.

The road from the Castalian spring led to the principal entrance into the Pythian sanctuary. The sanctuary, which contained several other buildings besides the temple, was called τὸ ἱερὸν, τὸ τέμενος or Πύθιον in a narrower sense. It was enclosed by a wall, named ὁ ἱερὸς περίβολος. Pausanias entered the sacred enclosure by the principal gate, which faced the east, and quitted it by a western door near the theatre. He remarks that there were numerous means of exit, which was unusual in Grecian sanctuaries. He describes the sanctuary as occupying the highest part of the city, and the whole as of great size (x. 8. § 9). It appears to have been nearly in the form of a triangle, of which the basis lying towards the south is marked by the ruins called *Hellenicó*. The peasants gave these ruins this name, because they regarded them as the wall of a fortress; and the modern name of *Kastrí* has arisen out of the belief that a fortress once existed here. Ulrichs also discovered a portion of the northern corner half-way between the church of Nicolaus and the fountain *Kerná*. From the nature of the ground, which is a steep declivity, the buildings in the sacred enclosure must have stood upon terraces; and it was probably upon the walls of these terraces that many of the inscriptions were cut which we now find at Delphi.

The most remarkable objects in the sacred enclosure lay between the principal or eastern entrance and the temple. Both Pausanias and the strangers in Plutarch's Dialogue on the Pythian Oracle went from the Castalia to the temple by the same way; and, consequently, the objects which they both agree in describing must be placed between the principal entrance and the temple.

Upon entering the enclosure from the eastern gate the first objects seen were statues of athletes and other dedicatory offerings, of which Pausanias has given us a long account (x. 9, seq.). Their number was very great. Even in Pliny's time they were not less than 3000. (Plin. xxxiv. 7. § 7.) Nero alone, as we have already seen, carried off 500 bronze statues. (Paus. x. 7. § 1.) Many of them could be seen, rising above the peribolus, by persons ascending the eastern road to the sanctuary. (Justin, xxiv. 7; Polyaen. vii. 35. § 2.)

Pausanias and Plutarch next mention the Stone of the Sibyl, which was a rock rising above the ground, and was so called because it was the seat occupied by the first Sibyl. (Paus. x. 12. § 1; Plut. *de Pyth. Or.* 9; Clem. Alex. *Strom.* i. p. 304.)

Near the Stone were the Thesauri (θησαυροί), or treasuries, which did not stand on a single platform as at Olympia, but were built separately about the Stone as far as the great altar. They were small buildings, partly above and partly below the ground, in which were kept the more valuable offerings, and such as could not be exposed without injury to the air. The most celebrated of all the treasuries was that of the Corinthians, said to have been built by Cypselus, in which were preserved, among other things, the gold and silver offerings of Gyges. (Paus. x. 13. § 5; Herod. i. 14, iv. 162; Plut. *Sept. Sap. Conviv.* 21, *de Pyth. Or.* 12.) The Stoa, built by the Athenians, also served the purpose of a treasury. (Paus. x. 11. § 6.) It stood apparently east of the Stone of the Sibyl.

Near the Stoa of the Athenians was the Bouleuterion (βουλευτήριον) or Senate-House of the Delphians. (Plut. *de Pyth. Or.* 9; Clem. Alex. *Strom.* i. p. 304.)

In front of the temple, and under the open heaven, stood the great altar of Apollo, where the daily sacrifices were offered. It is probably the same as the altar mentioned by Herodotus (ii. 135) as a dedicatory offering of the Chians. It is called by Pausanias βωμὸς ὁ μέγας (x. 14. § 7), by Euripides βωμός (*Ion*, 1275, 1306, 1314), βωμοί (422), and βωμὸς Θεοῦ (1280). The court in which it stood is called by Euripides θυμέλη (114) and θυμέλαι (46). Near the altar stood a brazen wolf, dedicated by the Delphians themselves. (Paus. x. 14. § 7.)

We now come to the temple itself. It appears from the existing fragments of columns that the exterior was of the Doric order, and the interior of the Ionic. It would seem to have been a hexastyle temple, and smaller by one-seventh than the temple of Zeus at Olympia. Still it was reckoned one of

Digitized by Google

the largest in Greece (Philostr. *Vit. Apoll.* vii. 11), and vied in beauty with the temples of Athens (Eurip. *Ion*, 184; Pind. *Pyth.* vii. 9). It has been already related that it was erected by the Alcmaeonidae, under the superintendence of the Corinthian architect Spintharus, after it had been burnt down in B. C. 548, and that the front was built of Parian marble, while the remainder was of ordinary stone. The tympana of the pediments of the two porticoes were filled with sculptures, the one with statues of Artemis, Leto, Apollo, the Muses, and the setting sun, and the other with those of Dionysus and the Thyiades, both of them the works of Athenian artists. (Paus. x. 19. § 4.) Euripides has described five of the metopes, probably those on the eastern front. The subjects were, Hercules and Iolaus slaying the Lernaean hydra, Bellerophon killing the Chimaera, Zeus killing Mimas, Pallas killing Enceladus, and Bacchus another of the giants. (Eurip. *Ion*, 190—218.) As in the Parthenon, there were gilded shields upon the architraves of the two fronts beneath the metopes: those in the eastern front were dedicated by the Athenians from the spoils of the Persians at Marathon, and those on the western front by the Aetolians from the spoils of the Gauls. (Paus. x. 19. § 4.)

The interior of the temple consisted of three divisions, the Pronaus (*πρόναος*), the Cella (*ναός, σηκός*), and the Adytum, where the oracles were delivered (*ἄδυτον, μαντεῖον, χρηστήριον*).

In the Pronaus stood a brazen statue of Homer (Paus. x. 24. § 2), and also, in the time of Herodotus, the large silver crater presented by Croesus (Herod. i. 51). On the walls of the Pronaus were inscribed, by order of the Amphictyons, in golden letters, the celebrated sayings of the Seven Wise Men, such as "Know thyself," "Nothing too much." (Plut. *de Garrul.* 17; Paus. x. 24. § 1; Plin. vii. 33.) Here also was set up in wood the fifth letter of the Greek alphabet, which, according to tradition, was dedicated in common by the Seven Wise Men. It was a simple E, which in the ancient Greek writing also represented the diphthong *εἰ*. There were various interpretations of its meaning, of which Plutarch has given an account in his treatise upon the subject.

The Cella was supported by Ionic columns, as appears from existing fragments. In it Pausanias saw an altar of Poseidon, to whom the oracle belonged in the most ancient times, statues of two Moerae or Fates, together with statues of Zeus and Apollo as leaders of the Fates, the hearth upon which the priest of Apollo slew Neoptolemus, the son of Achilles, and the iron chair of Pindar, on which he is said to have sung his hymns to Apollo. (Paus. x. 24. § 4, seq.)

On the hearth burnt a perpetual fire, and near it was the Omphalos, or Navel-Stone, which was supposed to mark the middle point of the earth. (Aeschyl. *Choëph.* 1034, seq.; *Φοιβήϊος γᾶς μεσόμφαλος ἑστία*, Eurip. *Ion*, 461.) According to tradition, two eagles, which had been sent by Zeus, one from the east, and the other from the west, met at this point, and thus determined it to be the centre of the earth. (Pind. *Pyth.* iv. 131, vi. 3; Strab. ix. p. 419.) The Omphalos was a white stone, adorned with stripes of various kinds, and upon it were the representations of the two eagles (*ὀμφαλός . . . ταινιωμένος*, Strab. *l. c.*; *στέμμασί γ' ἐνδυτός*, Eurip. *Ion*, 224; Paus. x. 16. § 3). It is frequently represented in vase-paintings, in which Orestes is exhibited sitting upon it, exactly as described by Aeschylus. (*Eum.* 40 ; Müller, *Aeschl. Eum.* § 27.) The site of the Omphalos is not mentioned by Pausanias. It was clearly in the interior of the temple, for in Aeschylus the Pythia, in going through the temple to the Adytum, perceives Orestes seated upon the Omphalos (*Eum. l. c.*). It probably stood, along with the sacred hearth, as nearly as possible in the centre of the Cella. The sacred hearth was usually in the centre of the house or the temple. Thus, the altar in the middle of the palace at Mycenae is called by Clytaemnestra *μεσόμφαλος ἑστία*. (Aesch. *Agam.* 1056.)

The temple was hypaethral, that is, there was an opening in the roof of the Cella. This follows from the narrative of Justin, who relates that, when the temple was attacked by the Gauls, the priestess saw the god descend into the sanctuary through the open part of the roof ("per culminis apertum fastigium," Justin, xxiv. 8). In fact, all temples which had in the interior an altar on which sacrifices were offered, or a hearth on which fire was kept burning, were obliged to have some opening for carrying off the smoke.

The Adytum, in which the oracles were delivered, was a subterraneous chamber, which no one was allowed to enter except the priests, or those to whom special permission was given. That the Adytum was under-ground appears from the expressions by which it is frequently designated in the ancient writers, and which refer not only to natural caves and grottoes, but to chambers built under ground (*ζάθεά τ' ἄντρα δράκοντος*, Eurip. *Phoen.* 951; *ἄντρον*, Strab. ix. p. 419; *τὸ τοῦ Ἀληθέντος Διὸς σπήλαιον*, Athen. xv. p. 701, c.; "specus," Liv. i. 56; "Castalium antrum," Ov. *Met.* iii. 14; "cavernа," Lucan, v. 135, 162.) It is described as situated in the inmost part of the temple, and is frequently called *μυχός*. (Paus. x. 24. § 5; Aesch. *Eum.* 39.) No account of it is given by Pausanias, who simply says that "few are admitted into the inmost part of the temple, and that in it there is a second statue of Apollo, made of gold." (Paus. *l. c.*) Ulrichs conjectures that the entrance into the Adytum may have been either on the eastern side of the Cella, opposite the great door of the temple, or on the northern side, where an excavation could be made in the rock in the direction of the course of the Cassotis, which flowed into the Adytum.

Stephanus B. says (*s. v.* Δελφοί) that the Adytum was built of five stones, by the celebrated Trophonius and Agamedes, who appear in the Homeric Hymn to Apollo as the original architects of the temple. And it is natural to conclude that the Adytum and the polygonal substruction of the west escaped the fire which destroyed the building in the 58th Olympiad.

In the inmost part of the Adytum stood a tripod over a deep chasm in the earth, whence proceeded an intoxicating vapour, which was supposed to inspire the priestess with the gift of prophecy. (Strab. *l. c.*) This opening is described by various writers in the ancient writers. (*χάσμα*, Diod. xvi. 26. *τὸ στόμα*, Stobaeus, *Ecl.* i. 42; *Πυθικὸν στόμιον*, Lucian, *Nero*, 10, Dion Cass. lxiii. 14; "hiatus," Lucan, v. 82; "terrae foramen," xxiv. 6.) According to Plutarch this vapour arose from a fountain (*de Def. Or.* 50, *de Pyth. Or.* 17), which is said by Pausanias to have been the fountain Cassotis that disappeared beneath the ground in the Adytum (x. 24. § 7). Pausanias also relates that the tripod

Digitized by Google

as discovered in consequence of some shepherds, who had driven their flocks to the spot, becoming inspired by the vapour and uttering prophecies (x. § 7). The Pythia sat upon the tripod when she gave the oracles of Apollo, and the object of it was to prevent her falling into the chasm. (Diod. xvi. 1) Between the three legs of the tripod hung a circular vessel, called λέβης and *cortina*, in which were preserved the bones and teeth of the Pythian priest. (Dionys. Per. 441, and Eustath. *ad loc.*; Serv. *ad Virg. Aen.* iii. 360, vi. 317.) For a further description of this tripod, see *Dict. of Ant.* s. *Tripos*. No vapour is now found issuing from any part of the Delphian rocks.

Upon leaving the temple, we again follow Pausanias in his account of the remaining objects, which lie north of the temple within the peribolus. Pausanias, upon going out of the temple, turned to the left, where he noticed a peribolus enclosing the tomb of Neoptolemus, the son of Achilles, to whom the Delphians offered sacrifices every year. (Paus. x. 24. § 6; Strab. ix. p. 421.) He was said to have been murdered in the temple, near the sacred hearth; but the manner of his death was differently related. Here the ruins of the temple, and a little to the west, Ulrichs noticed the remains of an ancient wall, which he supposed to be a part of the peribolus of the tomb of Neoptolemus.

Still higher up above the tomb, was the stone which Cronus was said to have swallowed instead of the son Zeus, and afterwards to have vomited up. (Paus. *l. c.*) Upon leaving the stone, and returning as it were to the temple, Pausanias came to the fountain Cassotis (Κασσοτίς), the access to which was through a small wall built near it (x. 24. § 7). Ulrichs identifies Cassotis with the fountain near the church of St. Nicolaus, before which are some remains of an ancient polygonal wall. Pausanias further says, as we have already seen, that the Cassotis flowed into the Adytum. Accordingly, we find that the fountain of St. Nicolaus lies immediately before the ruins of the temple; and lower down the rock we now find some water springing out of the ground at the present *Hellenicó*, which water is probably the same that once flowed into the Adytum, but has now made an exit for itself below, in consequence of being buried by the ruins of the temple. Some previous travellers had identified the Cassotis with the fountain *Kerná*, which flows between the ruins of the theatre and the Stadium; but, in addition to other objections that might be urged, it is impossible to believe that the peribolus of the temple extended so far.

The name Cassotis occurs only in Pausanias, but the fountain itself is mentioned in other ancient writers. It is mentioned in the Homeric Hymn as a beautifully flowing fountain, where Apollo slew the serpent (*in Apoll.* 300); and Euripides alludes to its watering the sacred grove surrounding this temple (*Ion*, 112). This sacred grove, which is frequently mentioned by the ancient writers, consisted of laurel-trees and myrtles, but one laurel-tree in particular was called pre-eminently the Pythian laurel, and branches of it were used for sacred purposes within the temple.

Above the Cassotis was the Lesche (Λέσχη) of the Delphians (Paus. x. 25. § 1), part of the stone wall of which was discovered by Ulrichs in the outbuildings of a house above the fountain of St. Nicolas. Leschae were public buildings, in which persons might meet together and converse, since private houses were generally too small for such a purpose. The Delphian Lesche was adorned with two large paintings by Polygnotus, dedicatory offerings of the Cnidians; the painting on the right hand represented the capture of Troy and the departure of the Greeks, and that on the left the descent of Ulysses into Hades. A long description of these pictures is given by Pausanias (x. 25—31; comp. Plut. *de Def. Or.* 6, 47; Plin. xxxv. 9. s. 35). The figure of Cassandra was particularly admired. (Lucian, *Imag.* 7.)

The site of the theatre is marked by a high wall, a little to the west of the Cassotis. This wall, which is covered by several inscriptions, was the southern wall of the theatre, which, as usual with Grecian theatres, was built in a semicircular form upon the slope of the hill. The inner part of the theatre is almost entirely covered, and only a small portion of the upper seats is visible. It appears from an inscription that the theatre lay within the Pythian sanctuary (Böckh, *Inscr.* No. 1710), and according to Pausanias it adjoined the wall of the enclosure (x. 32. § 1). Accordingly, the ruins of the theatre determine the extent of the enclosure to the north-west. In the theatre the musical contests of the Pythian games were carried on, from the earliest to the latest times. (Plut. *de Def. Or.* 8.)

Ascending from the Peribolus (*ἀναβάντι δὲ ἐκ τοῦ περιβόλου*, Paus. x. 32. § 1), Pausanias came to a statue of Dionysus, and then to the Stadium, situated in the highest part of the city. It was built of Parnassian stone, but was adorned with Pentelic marble by Herodes Atticus. (Paus. *l. c.*; Philostr. *Vit. Sophist.* ii. p. 550.) There are still considerable remains of the Stadium, now called *Lákkoma*, and its whole length may be distinctly traced. Many of the seats remain, composed of the native rock; but the Pentelic marble with which it was decorated by Herodes Atticus is no longer found. It has been already mentioned that the Stadium was originally in the maritime plain, where it continued to be in the time of Pindar (*Pyth.* xi. 20, 73); and we do not know when it was removed to the city.

It has been shown above that the large fountain *Kerná* near the Stadium was not the Castalia. There can be little doubt that the ancient name of *Kerná* was Delphusa (Δελφοῦσα), which we learn from Stephanus B. was the fountain of the place (*s. v.* Δελφοί). The Castalia, from its position, could supply only the lower and eastern part of the city; and that the Pylaea, in the western part of the city, was well provided with water is expressly stated by Plutarch (*de Pyth. Or.* 29). It is not improbable that *Κερνᾶ*, the modern name of the fountain, is only a corruption of the ancient *κρήνη*.

Pylaea (Πυλαία) was a suburb of Delphi, on the road to Crisea. It derived its name from the meeting of the Amphictyonic Council in this place, the council, as is well known, being called Pylaea. In the time of Plutarch, Pylaea was provided with "temples, synedria, and fountains." The synedria appear to have been built in later times for the use of the Amphictyons; and the two ancient walls supporting the artificial platform, upon which the chapel of St. Elias stands, are probably the remains of such a building. (Plut. *de Pyth. Or.* 29; Dion Chrysost. *Or.* lxxvii. p. 414.) A little above the chapel of St. Elias, in the direction of the Stadium, there are some ancient sepulchres cut out of the rock.

It was upon approaching the suburb of Pylaea that Eumenes was attacked by the conspirators, for the

Digitized by Google

buildings mentioned by Livy are evidently those of Pylaea ("escendentibus ad templum a Cirrha, priusquam perveniretur ad frequentia aedificiis loca," Liv. xlii. 15).

Above Delphi was the celebrated cave called CORYCIUM (τὸ Κωρύκιον ἄντρον), distant, according to Leake, about 7 miles from the city, to the north-eastward, and about the same distance to the north-west of *Arákhova*. The usual way from *Kastri* to the heights of Parnassus leads past the Stadium, and then turns more to the west than the ancient path, which ascended the mountain immediately above the city. The ancient way was an astonishing work. It was a zigzag path, consisting of more than a thousand steps cut out of the hard rock, and forming an uninterrupted flight of steps to the highlands above. There are still considerable remains of it, but it is now seldom used, as the modern path is easier. It takes about two hours to reach the highlands of Parnassus, which are divided by hills and mountain-summits into a number of larger and smaller valleys and ravines, partly covered with forests of pine and fir, and partly cultivated as arable and pasture land. This district extends about 16 miles in a westerly direction from the foot of the highest summit. It formed the most valuable part of the territory of Delphi. Leake describes it as "a country of pasture, interspersed with firs, and peopled with shepherds and their flocks," and remarks that he "occasionally passed fields of wheat, barley, and oats all yet green, though it was the 27th of July, and the harvest in the plains of Boeotia had been completed a month before."

The Corycian cave is situated in the mountain on the northern side of the valley. It is thus described by Leake: — "We ascended more than half-way to its summit, when a small triangular entrance presented itself, conducting into the great chamber of the cavern, which is upwards of 200 feet in length, and about 40 high in the middle. Drops of water from the roof had formed large calcareous crystallizations rising at the bottom, and others were suspended from every part of the roof and sides. The inner part of this great hall is rugged and irregular; but after climbing over some rocks, we arrived at another small opening leading into a second chamber, the length of which is near 100 feet, and has a direction nearly at a right angle with the outer cavern. In this inner apartment there is again a narrow opening, but inaccessible without a ladder; at the foot of the ascent to it is a small natural opening." Pausanias says (x. 32. § 2) that there were 60 stadia from Delphi to a brazen statue, from whence it was easier to ascend to the cavern on foot than on a horse and mule; and, accordingly, Leake supposes the statue to have stood at the foot of the mountain, since the distance from thence to Delphi is nearly that mentioned by Pausanias. The latter writer remarks that this cave is larger than any of the other celebrated caverns which he had seen, and that a person can proceed a very long way through it even without a torch. He adds that it was sacred to Pan and the Nymphs, which is also attested by other ancient writers, and is confirmed by an inscription found in the cave. (Strab. ix. p. 417; Aesch. *Eum.* 22; Böckh, *Inscr.* No. 1728; Raikes, in Walpole's *Collection*, vol. i. p. 314.) Pan and the Nymphs were regarded as the companions of Dionysus, whose orgies were celebrated upon these heights. [See above, p. 764, b.] When the Persians were marching upon Delphi, the inhabitants took refuge in this cave (Herod. viii. 36), and it has been used for the same purpose by the inhabitants of Arakhova in recent times.

According to Ulrichs, the Corycian cave is now called Σαρανταύλι by the peasants, from its being supposed to contain 40 chambers (from σαράντα, τεσσαράκοντα αὐλαί).

Pausanias says, that "from the Corycian cave it is difficult even for a well-girt man to reach the summits of Parnassus; that they were above the clouds; and that upon them the Thyiades performed their frantic rites in honour of Dionysus and Apollo" (x. 32. § 7). The way from the Corycian cave to the highest summit of Parnassus turns to the north-east. The summit which the traveller at last reaches, but which is only the second in height, is called *Gerontóbrachos* (ὁ Γεροντόβραχος). On its northern and eastern sides lay great masses of snow, which never melt. Opposite to it, towards the east, there rises in a conical form the highest summit of Parnassus, upwards of 8000 feet in height, called *Lykéri* by the peasants, who consider it the highest point of the world, from which the Polis (i. e. Constantinople) may be seen.

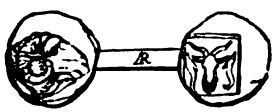
Parnassus, with its many summits and highlands, is called by the inhabitants *Liákura* (Λιάκουρα), a word which is usually supposed to be a corruption of Λυκώρεια, the ancient name of the highest summit of Parnassus. But Ulrichs considers *Liákura* an Albanian word, observing that ancient Greek words, the roots of which have retained their meaning, are never changed so much in the modern Greek language, and that Λυκέρι, the name of the highest summit, is the representative of the old word Λυκώρειον, since modern Greek words ending in ι are shortened forms of the termination —ιον or —ειον. Stephanus B. (*s. v.* Λυκώρεια) mentions a Lycoreium, which appears to have been a sanctuary of the Lycorian Zeus, whose altar was on the highest summit of Parnassus, where Deucalion is said to have landed after the Deluge. (Lucian, *Tim.* 3; Schol. *ad Pind. Ol.* ix. 70; Apollod. i. 7. § 2.)

IV. MODERN AUTHORITIES.

The antiquities of Athens for a long time engrossed the attention of travellers; and so little was known of Delphi, that when Spon visited Greece in 1676 he first looked for the ruins of the city at *Sálona*, the ancient Amphissa. He afterwards discovered the site of Delphi, but erroneously supposed the temple to have stood upon the same site as the church of St. Elias; he rightly identified the Castalian fountain and the position of the gymnasium. A more accurate account of the ruins of Delphi was given by Chandler (A. D. 1765), who examined more correctly the site of the temple, and published several inscriptions which he found there. Clark, Dodwell, and Gell did not add much new information; but Leake has given us an accurate view of the place, distinguished by his usual sagacity and learning, which is far superior to any previous description. (*Northern Greece*, vol. ii. p. 533.) Still even his accurate account has been superseded by the fuller description of Ulrichs, who passed several weeks at Delphi in 1838, and published the results of his investigations under the title of *Reisen und Forschungen in Griechenland*, Berlin, 1840. To this valuable work we are indebted for

Digitized by Google

a considerable part of the preceding article. The modern works relating to the temple of Delphi are enumerated in the *Dict. of Ant.* art. *Oraculum*. The inscriptions discovered by K. O. Müller at Delphi are published and illustrated by Curtius, *Anecdota Delphica*, Berol. 1843.



COIN OF DELPHI.

DELPHI'NIUM. [CHIOS, p. 610, b.]

DELPHI'NIUM (Δελφίνιον), the port-town of Dropus. [OROPUS.]

DELTA. The appellation of Delta, or the triangular land, was given to various regions by the Greeks, and implies a space of land bounded by two or more diverging branches of a river, and resembling, in the general form of its area, the fourth letter of the Greek alphabet. These were the Deltas of the Nile, the Ister, the Rhone, the Padus or Eridanus: but the name was originally and specially conferred upon that triangular region which lies between the Heptanomis, or Middle Egypt, and the Mediterranean sea. Among the Greeks this tract of alluvial soil bore various designations. (τὸ Δέλτα; the lower Country, ἡ κάτω χώρα, Ptol. iv. 5. § 55; μέσον χθὸν Νειλῶτις, Aesch. *Prom.* 814; Strab. vi. p. 791; Herod. ii. 6, seq.; Diod. i. 34, seq.; Plin. v. 9. s. 9.) [AEGYPTUS.] [W. B. D.]

DELUS. [DELOS.]

DEMETAE. [DIMETAE.]

DEMETRIAS (Δημητριάς), a town of Assyria, stated by Strabo to have been in the neighbourhood of Arbela (xvi. p. 738; Steph. B. *s. v.*). Isidore of Charax mentions another place of this name in Media. [V.]
