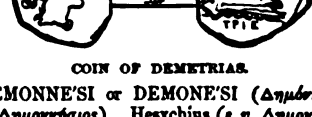
DEMETRIAS (Δημητριάς: *Eth.* Δημητριεύς), a city of Magnesia in Thessaly, situated at the head of the Pagasaean gulf, was founded about B. C. 290 by Demetrius Poliorcetes, who removed thither the inhabitants of Nelia, Pagasae, Ormenium, Rhizus, Spalathra, Olizon, Boebe and Iolcos, all of which were afterwards included in the territory of Demetrias. (Strab. ix. p. 436.) It soon became an important town, and the favourite residence of the Macedonian kings. It was favourably situated for commanding the interior of Thessaly, as well as the neighbouring seas; and such was the importance of its position that it was called by the last Philip of Macedon one of the three fetters of Greece, the other two being Chalcis and Corinth. (Pol. xvii. 11; Liv. xxxii. 37.) Livy remarks that it may have been recommended to the kings of Macedonia as a residence "not more for its convenience as a military and naval station in the centre of Greece, than for many natural advantages, in some of which it seems to have been very preferable to Pella. The surrounding seas and fertile districts of Thessaly supplied an abundance of the necessaries and luxuries of life: in summer the situation is cool and salubrious, in winter mild, even when the interior of Thessaly is involved in snow or ice. The cape on which the town stood commands a beautiful view of the gulf, which appears like an extensive lake surrounded by rich and varied scenery; the neighbouring woods supply an abundance of delightful retreats, embellished by prospects of the Aegaean sea and its islands, while Mount Pelion might at once have afforded a park, an icehouse, and a preserve of game for the chase."

After the battle of Cynoscephalae, B. C. 196, Demetrias was taken away from Philip, and garrisoned by the Romans. (Pol. xviii. 28; Liv. xxxiii. 31.) In B. C. 192, it was surprised by the Aetolians; and the news of its defection from the Romans determined Antiochus to defer no longer his departure to Greece. (Liv. xxxv. 34, 43.) After the return of Antiochus to Asia in B. C. 191, Demetrias surrendered to Philip, who was allowed by the Romans to retain possession of the place. (Liv. xxxvi. 33.) It continued in the hands of Philip and his successor till the overthrow of the Macedonian monarchy at the battle of Pydna, B. C. 169. (Liv. xliv. 13.) Demetrias is mentioned by Hierocles in the sixth century (p. 642, ed. Wesseling).

The ancient town is described by Leake as occupying "the southern or maritime face of a height, now called *Goritza*, which projects from the coast of Magnesia, between 2 and 3 miles to the southward of the middle of *Volo*. Though little more than foundations remains, the inclosure of the city, which was less than 2 miles in circumference, is traceable in almost every part. On three sides the walls followed the crest of a declivity which falls steeply to the east and west, as well as towards the sea. To the north the summit of the hill, together with an oblong space below it, formed a small citadel, of which the foundations still subsist. A level space in the middle elevation of the height was conveniently placed for the central part of the city. The acropolis contained a large cistern cut in the rock, which is now partly filled with earth . . . . Many of the ancient streets of the town are traceable in the level which lies midway to the sea, and even the foundations of private houses: the space between one street and the next parallel to it, is little more than 15 feet. About the centre of the town is a hollow, now called the lagúmi or mine, where a long rectangular excavation in the rock, 2 feet wide, 7 deep, and covered with flat stones, shows by marks of the action of water in the interior of the channel that it was part of an aqueduct, probably for the purpose of conducting some source in the height upon which stood the citadel, into the middle of the city." (Leake, *Northern Greece*, vol. iv. p. 375, seq.)



COIN OF DEMETRIAS.

DEMONNE'SI or DEMONE'SI (Δημόννησοι: *Eth.* Δημοννήσιος). Hesychius (*s. v.* Δημοννήσιος χάλκος) says that there are two islands near Byzantium, which are called by the common name Demonnesi, but have severally the names Chalcitis and Pityusa. These belong to the Prince's Isles. [CHALCITIS.] Stephanus (*s. v.* Δημόνησος) describes Demonesus as an island near Chalcedon, where cyanum and chrysocolla were found. In another place (*s. v.* Χαλκῖτις), where Stephanus is citing Artemidorus, the islands Pityodes, Chalcitis, and Prote are mentioned. It is sometimes assumed that the Demonesus of Stephanus is the same as his Chalcitis; but he does not say so, nor does his description of the two agree. Pliny (v. 32) places

Digitized by Google

Bithynia opposite to Nicomedia; and he also mentions Chalcitis and Pityodes. Pityodes seems to be the modern island of *Prinkipo*, east of Chalcitis. It is hardly worth while to attempt to reconcile the accounts. The simplest explanation is to follow Eustathius, who says that Chalcitis and Pityodes were the Demonesi. Prote retains its name. There are at least eight islands in the group of the Prince's Isles, besides some rocks. [G. L.]

DENDROBOSA (Δενδρώβοσα, Arrian, *Ind.* c. 27), a place on the coast of Gedrosia, in the district of the Ichthyophagi, visited by Nearchus's fleet. Dr. Vincent thinks that it is the Δεράιη Βίλλα of Ptolemy (vi. 8. § 9), and the Derenobilla (Δερενόβιλλα) of Marcian (p. 23), and that it is, perhaps, represented by the modern *Daram*. (*Voy. of Nearch.* vol. i. p. 252.) [V.]

DENTHELE'TAE (Δενθηλῆται, Strab. vii. p. 318; Δανθαλῆται, Steph. B.; Densseletae, Cic. *in Pis.* 34; Plin. iv. 11), a Thracian people who occupied a district called, after them, Dentheletica (Δανθηλητική, Ptol. iii. 11. § 8), which seems to have bordered on that occupied by the Maedi towards the SE., near the sources of the Strymon. Philip, son of Demetrius, in his fruitless expedition to the summit of Mount Haemus after rejoining his camp in Maedica, made an incursion into the country of the Dentheletae, for the sake of provision. (Liv. xl. 22.) (Comp. Polyb. xxiv. 6; Dion Cass. li. 23; Leake, *Northern Greece*, vol. iii. p. 474.) [E. B. J.]

DENTHELIA'TIS. [Messenia.]

DEOBRI'GA (Δεόβριγα). 1. (*Brinnos* or *Miranda de Ebro*), a town of the Autrigones in Hispania Tarraconensis, on the high road from Asturica to Caesaraugusta. (*Itin. Ant.* p. 454; Ptol. ii. 6. § 53.)

2. A town of the Vettones in Lusitania, only mentioned by Ptolemy; its site is unknown. (Ptol. ii. 5. § 9.) [P. S.]

DEOBRIGULA (Δεοβριγούλα: *Burgos?*), a town of the Murbogi or Turmodogi in Hispania Tarraconensis, on the high road from Asturica to Caesaraugusta, 15 M. P. from Segisamo, and 21 M. P. from Tritium. (*Itin. Ant.* pp. 449, 454; Ptol. ii. 6. § 52.) Its exact position is disputed. Cortes places it at *Urbiel*, Lapie at *Turdajoz*, and Mentelle at *Burgos*. (*Geog. Comp. Esp. Mod.* p. 336.) [P. S.]

DEO'RUM. [Fortunatae.]

DERAE (Δέραι), a place in Messenia, where a battle was fought between the Messenians and Lacedaemonians in the second Messenian War. (Paus. iv. 15. § 4.)

DERANEBILLA. [Dendrobosa.]

DERANGAE. [Drangae.]

DERBE (Δέρβη: *Eth.* Δερβήτης), a fortified place in Isauria, and a port, according to Stephanus (*s. v.*); but the port (λιμήν) is manifestly a mistake, and it has been proposed by the French translators of Strabo to write λίμνη for it. Stephanus also speaks of the form Derbeia as probably in use; and of the form Derme, according to Capito; and some, he says, called it Delbia (Δελβεία), which in the language of the Lycaonians means "juniper." The last remark rather contradicts the first part of the description, which places Derbe in Isauria; and we know from the Acts of the Apostles (xiv. 6—21) that Derbe was in Lycaonia. St. Paul went from Iconium to Lystra, and from Lystra to Derbe. Both Lystra and Derbe were in Lycaonia.

Strabo (p. 569) places Derbe "on the sides" of Isauria, and almost in Cappadocia. It was the residence of Antipater, a great robber. He was captured and killed by Amyntas, who seized Derbe and the rest of Antipater's possessions. Cicero, in a letter to Q. Philippus, proconsul (B. C. 54), speaks of the hospitable relations between himself and Antipater, and he adds that they were exceedingly intimate. Philippus, who was at this time proconsul of Asia, was displeased with Antipater for some reason. He had the sons of Antipater in his power, and Cicero writes to him on their behalf. It does not appear when Cicero made this respectable acquaintance. It could not be when he was proconsul of Cilicia (B. C. 51), if the letter to Philippus is assigned to the same time; but the date of the letter seems doubtful, and one does not see at what time Cicero could have become acquainted with Antipater, except during his Cilician proconsulship.

The position of Derbe is not certain. Strabo (p. 534), when he says that the eleventh prefecture of Cappadocia [Cappadocia, p. 507, b.] was extended as far as Derbe, may intend to include Derbe in it, though he says elsewhere, as we have seen, that Derbe is in Lycaonia. After Strabo's time, Derbe formed, with Laranda and the adjacent parts of Taurus, a district called Antiochana, which was between Lycaonia and Tyanitis. (Ptol. v. 6.) Lam (*Asia Minor*, p. 101) concludes that "Derbe stood in the great Lycaonian plain, not far from the Cilician Taurus, on the Cappadocian side of Lavanda, a situation precisely agreeing with that of the ruins called the 1001 churches of Mount Karadscha." It was certainly further than Lystra from Iconium, as St. Paul's travels show. Hamilton (*Researches*, &c. vol. ii. p. 313) thinks that Derbe may have been at a place now called *Dirlé*, a name which resembles the form Delbia. *Dirlé* is some distance south of the lake of *Ak Ghieul*, but near enough to be described with reference to the lake; which makes it almost certain that the passage of Stephanus may be safely corrected. The position of Lystra also, as it is rightly fixed at *Bir Bin Kilisseh*, where there are ruins, corresponds with that of Iconium (*Konieh*) and *Dirlé*. [G. L.]

DERBICCAE or DERBICES (Δερβίκκαι, Ptol. vi. 10. § 2; Aelian, *V. H.* iv. 1; Steph. B. s. v. Δέρβικες, Strab. xi. pp. 508, 514, 520; Dion. Per. Δερβέκιοι, Dionys. Per. 734, 738; Derbices, Mela, iii. 5. § 4), a tribe, apparently of Scythian origin, settled in Margiana, on the left bank of the Oxus, between it, the Caspian sea, and Hyrcania. They seem to have borne various names, slightly changed from one to the other,—as Ctesias, on the authority of Stephanus, appears to have added to those named above, those of Derbii and Derbissi. Strabo (l. c.) gives a curious account of their manners, which are clearly those of Scythians. "They worship," says he, "the earth; they neither sacrifice nor slay any female; but they put to death those among them who have exceeded their seventieth year, and the next of kin has the right to eat his flesh. They strangle and then bury old women. If any one dies before his seventieth year, he is not eaten, but buried." Aelian mentions the same anecdote, and states that the persons slain are first offered in sacrifice and then eaten in solemn feast (*V. H.* iv. 1). Strabo (xi. p. 517) had already shown that the manners of the people along the shores of the Caspian were exceedingly barbarous. [V.]

DERIS (Δερίς), a small town in the S. of Thrace, on the bay of Melas. (Scyl. p. 27.) [L. S.]

Digitized by Google

DERIS or DERRHIS (Δέρις, Strab. xvii. p. 799; Δέρρις, Ptol. iv. 5. § 7; Δέρρεον or Δέρρα, Stadiasm. p. 436), a promontory on the coast of Marmarica in N. Africa, between the harbours of Leucaspis and Phoenicus, named from a black rock in the shape of a hide. Pacho takes it for the headland now called *El Hesf*. (*Voyage dans la Marmarique*, &c. p. 18.) [P. S.]

DERRHIS (Δέρρις, Ptol. iii. 13. § 12; Strab. vii. p. 330; Steph. B. s. v. Τορώνη; Mela, ii. 3. § 1: *C. Drepano*), the promontory of Sithonia that closes the gulf of Torone to SE. (Leake, *Northern Greece*, vol. iii. p. 119.) [E. B. J.]

DERRHIUM (Δέρρειον), a place in Laconia on Mt. Taygetus, containing a statue of Artemis Derrhatis in the open air, and near it a fountain called Lacena. (Paus. iii. 20. § 7.) The site of the place is uncertain. Stephanus B. calls it DERA (s. v. Δέρα), and gives as Ethnic names Δερραῖος and Δερεάτης.

DERTO'NA (Δέρθων, Strab. v. p. 217; Δερτῶνα, Ptol. iii. 1. § 35: *Tortona*), an important city of Liguria, situated in the interior of that province, at the northern foot of the Apennines, and on the high road leading from Genua to Placentia. The Itineraries place it 51 miles from the latter city, and 71 from Genua, but this last distance is greatly overstated. (*Itin. Ant.* pp. 288, 294.) Strabo speaks of it as one of the most considerable towns in this part of Italy, and we learn from Pliny that it was a Roman colony. Velleius mentions it among those founded under the republic, though its date was uncertain; but it appears to have been recolonised under Augustus, from whence we find it bearing in inscriptions the title of "Julia Dertona." (Vell. Pat. i. 15; Plin. iii. 5. s. 7; Orell. *Inscr.* 74.) Decimus Brutus encamped here on his march in pursuit of Antonius, after the battle of Mutina (*Ep. ad Fam.* xi. 10), and it was one of the places where a body of troops was usually stationed during the later ages of the empire. (Not. Dign. ii. p. 121.) Ptolemy erroneously places Dertona among the Taurini; its true position is clearly marked by Strabo and the Itineraries, as well as by the modern town of *Tortona*, which retains the ancient name. Many ancient tombs were extant here in the time of Cluverius, and a remarkable sarcophagus is still preserved in the cathedral. (Cluver. *Ital.* p. 81; Millin, *Voy. à Piémont*, vol. ii. p. 281.) [E. H. B.]

DERTO'SA (Δερτῶσα or Δερτῦσσα, Strab. iii. p. 159, 160; Ptol. ii. 4. § 64; Colonia Julia Augusta Dertosa, coins: *Eth.* Dertosani, Plin. iii. 3. s. 4. *Tortosa*), a city of the Ilercaones in Hispania Tarraconensis, on the left bank of the Iberus (*Ebro*), not far above the delta of the river, which was here crossed by the high road from Tarraco to Carthago Nova. (*Itin. Ant.* p. 399; Mela, ii. 6; Suet. *Galb.* 9.) Though only mentioned by Pliny as one of the cities *civium Romanorum*, it is proved to have been a colony by the assertion of Strabo and the epigraphs of its coins, all of which belong to the early empire, and bear the heads of Julius Caesar, Augustus, and Tiberius. (Florez, *Med. de Esp.* vol. i. p. 376; Mionnet, vol. i. pp. 40, 44, *Suppl.* i. p. 81; Sestini, p. 138; Eckhel, vol. i. p. 47.) [P. S.]

DERUSIACI. [PERSIA.]

DERVE'NTIO, in Britain, mentioned in the first Itinerary as being seven miles from *York*, in the direction of Delgovitia (*Market Weighton*). Some place it on the *Derwent*. [R. G. L.]

DESSOBRI'GA, a town of the MURBOGI, or Turmogi, in Hispania Tarraconensis, 15 M. P. W. of Segisamo, on the high road from Asturica to Caesaraugusta. (*Itin. Ant.* p. 449.) [P. S.]

DESUDABA, a place in Maedica of Macedonia, 75 M. P. from Almana, on the Axius, where the mercenaries of the Gauls who had been summoned by Perseus in the memorable campaign of B. C. 168, took up their position. (Liv. xliv. 26.) Leake (*Northern Greece*, vol. iii. p. 472) has placed it at or near *Kumánovo*, on one of the confluents of the Upper Axius. [E. B. J.]

DESUVIATES, a people of Gallia Narbonensis, known only from a few words of Pliny (iii. 4), who says, "regio Anatiliorum, et intus Desuviatium Cavarumque." The Anatilii are supposed to have been at the mouth of the Rhone, and probably they occupied part at least of the isle of *Camargue*. The position of the Cavares, north of the *Durance* [CAVARES], is known; and there remains no place for the Desuviates except the small district south of the *Durance*, between the *Durance* and the *Rhone*. If this is so, the Desuviates were surrounded on the east and south by the Salyes. [G. L.]

DETUMO. [DECUMA].

DETUNDA. [DECUMA].

DEUCALEDO'NICUS OCEANUS (Δευκαλεδόνιος Ὠκεανός), the name given by Ptolemy to the ocean on the north of the Britannic Islands. "The table" of the British Isles "is bounded on the north by that" ocean "which is called Hyperborean or Deucaledonian" (viii. 3. § 2). The word occurs again in Marcianus Heracleota, whose text, for these parts at least, is but an abridgment of Ptolemy's. In another part of his work, this latter calls it "Deucaledonian or Sarmatic." [DICALEDONAE; PICTI.] [R. G. L.]

DEURIOPUS (Δευρίοπος, Strab. v. pp. 326, 327; Δουρίοπος, Steph. B.), a subdivison of Paeonia in Macedonia, the limits of which cannot be ascertained, but which, with Pelagonia and Lyncestis, comprehends the country watered by the Erigon and its branches. Bryanium, and Stymbara, an important place on the frontier of regal Macedonia, belonged to Deuriopus. (Liv. xxxix. 54; Leake, *Northern Greece*, vol. iii. p. 306.) [E. B. J.]

DEVA (Δηούα, Ptol. ii. 6. § 8), or DEVA'LES (Mela, iii. 1), a small river on the N. coast of Hispania Tarraconensis, probably identical with the stream now called *Deva*, near *S. Sebastian*. (Ukert, vol. ii. pt. 1. p. 300.) [P. S.]

DEVA. 1. The name of the river *Dee*, in Cheshire. Just, however, as DERVENTIO, though really the name of the *Derwent*, denotes a town on that river rather than the river itself, Deva means a town on the Deva rather than Deva (*Dee*) the river. The exact figure of speech by which this change is brought about is uncertain. Perhaps the fuller form may have been Ad Devam or Ad Dervention. Nothing, however, is more certain than that the name in both the cases before us (as well as in certain others) is originally and primarily the name of the *river* rather than the *station*. Another form is Deuna, given by Ptolemy as a city of the Cornabii, Viroconium and the station of the Twentieth Legion (or the Victorious) being the other two. As the Cornabii lay between the Ordovices of *North Wales* and the Coritani of *Leicester* and *Lincolnshire*, these correspond more or less with the present counties of *Derby*, *Stafford*, and *Cheshire*. In the second Itinerary we find the station Deva Leag. xx. victrix, in which (as far at least as the name of the station goes) we probably have the better reading. The com-

Digitized by Google

plication hereby engendered consists in the distinction suggested by Ptolemy between Deuna and Deva, it being assumed that the latter is the station of the Twentieth Legion; a complication which, though not very important, still requires unravelling. Possibly there were two stations on the *Dee* (Ad Devam). Possibly there was a change of station between the time of Ptolemy and the author of the Itinerary.

The Roman remains at Chester are important, numerous, and well described. (See Ormerod's *History of Cheshire*, vol. i. p. 295.) The Roman streets may be traced by the existence of pavements under the present existing street, some feet below the surface of the soil. The walls, too, of Chester follow their old Roman outline, and probably stand, for the greater part of their circuit, on Roman foundations. A postern on the bank of the *Dee*, called the Shipgate, consisting of a circular arch, is supposed to be Roman. Altars, coins, baths, with hypocausts and figures, have also been found. The earliest inscription is one bearing the name of Commodus, not the emperor so called, but "Cejonius Commodus qui et Aelius Verus appellatus est" (Spartian, *Hadrian*), who was adopted by Hadrian. One of the statues, supposed to represent either Atys or Mithras, bears a Phrygian bonnet on the head, a short vest on the body, and a declining torch in the hand. Others are given to Minerva, to Aesculapius, and to other more truly Roman deities. Sepulchral vases, too, have been found.

2. A river in Britain, mentioned by Ptolemy as being the third from the promontory of the Novantae (*Wigton*), in a southern direction, —the Abravannus and the Tena aestuary being the first and second. The *Dee* in *Galloway*. [R. G. L.]

DEVANA (Δηούανα), in North Britain, mentioned by Ptolemy (ii. 3. § 19) as the chief town of the Texali (Taezali), a people of *Aberdeenshire*, situated on the Aberdeenshire *Dee*. (See DEVA = *Chester*.) [R. G. L.]

DEVELTUS, DEVELTON, DIBALTUM, DEBELLION (Δεούελτος), a town in the east of Thrace, to the west of Apollonia (Ptol. iii. 11. § 11; Hierel. p. 635; Theophan. p. 422: Plin. iv. 18; Amm. Marc. xxxi. 8, who calls it *Debelcum*; Geogr. Rav. iv. 6). According to Zonaras (ii. p. 155), the place afterwards received the name *Zagora*, which it still bears. [L. S.]

DIA (Δία), a small island which lies 40 stadia (*Stadiasm.*) from the Heracleium of Cnossus in Crete (Strab. x. p. 484; Plin. iv. 20); the modern *Standia*. (Map of Crete, *Mus. Class. Antiq.* vol. ii. p. 308.) [E. B. J.]

DIA (Δῖα: *Eth.* Διεύς), "a town of Bithynia on the Pontus." (Steph. B. *s. v.* Δῖα.) Marcian (*Peripl.* p. 70) places it 60 stadia east of the mouth of the Hypius, which river is between the Sangarius and Heraclea. The name in Marcian, Δίας πόλις, may be a mistake for Diospolis, which Ptolemy has (v. 1). It seems probable that the Dia of Stephanus and this Diospolis are the same. There are some very rare coins with the epigraph Διας, which Sestini assigns to this place. [G. L.]

DIA. [BOSPORUS, p. 422, a.]

DIABE'TAE (Διαβῆται: *Eth.* Διαβαταῖος). Stephanus B. (*s. v.*) speaks of the Diabetae as islands about Syme, which is an island off the Carian coast. Pliny also names the Diabetae (v. 31). There are two or three small islands called *Siskle* off the south part of Syme; and there are also other small islands near it. [G. L.]

DIABLINTES. Caesar (*B. G.* iii. 9) mentions the Diablintes among the allies of the Veneti and other Armoric states whom Caesar attacked. The Diablintes are mentioned between the Meldi and Menapii, from which, if we did not know their true position, we might be led to a false conclusion. The true form of the name in Caesar is doubtful. Schneider, in his edition of the Gallic War has adopted the form Diablintres, and there is good MSS. authority for it. The Diablintes are the Diablindi, whom Pliny (iv. 18) places in Gallia Lugdunensis; and probably the Aulerci Diablintes of Ptolemy (ii. 8). We may infer their position to some degree from Pliny's enumeration, "Carnutes [CURIOSOLITAE], Diablindi, Rhedones." The capital of the Diablintes, according to Ptolemy, was Noeodunum, probably the Nudium of the Itin. The Notitia of the Gallic provinces, which belongs to the commencement of the fifth century, mentions Civitas Diablintum among the cities of Lugdunensis Tertia. A document of the seventh century speaks of "condita Diablintica" as situated "in Pago Cenomannico" (*Le Mans*), and thus we obtain the position of the Diablintes, and an explanation of the fact of the name Aulerci being given in Pliny to both to the Diablintes and Cenomanni [AULERCI CENOMANNI]. Another document of the seventh century speaks of "oppidum Diablintes juxta rupem Araenae fluvioli;" and the Arena is recognised in the *Aron*, a branch of the *Mayenne*. A small place called *Jubleins*, where Roman remains have been found, not far from the town of *Mayenne* to the S.E., is probably the site of the "Civitas Diablintum" and Noeodunum [NOEODUNUM]. The territory of the Diablintes seems to have been small and it may have been included in that of the Cenomani, or the diocese of *Mans*. (D'Anville, *Notice*, &c.; Walckenaer, *Géog.*, &c. vol. i. p. 387.) [G. L.]

DIACOPE'NE (Διακοπηνή), a district in Pontus. Strabo (p. 561), after speaking of the city Chiliocomon [AMASIA], says, "there is the Diacopene, and the Pimolisene, a country fertile all the way to the Halys; these are the northern parts of the country of the Amaseis." [G. L.]

DIA'CRIA. [ATTICA.]

DIAGON (Διάγων), a river separating Arcadia and Elis, and falling into the Alpheius on its left bank, nearly opposite the mouth of the Erymanthus (Paus. vi. 21. § 4.) It is conjectured by Leake to be the same as the Dalion (Δαλίων) of Strabo (p. 344), who mentions it along with the Acheron. (Leake, *Morea*, vol. ii. p. 89.)

DIA'NA, an island off the coast of Spain mentioned in the Maritime Itinerary (*Itin. Ant.* p. 510), where, however, the text is confused. If the name be genuine, it may be identified with the small island off the Pr. Dianium, which Strabo mentions, but without naming it. (Strab. iii. p. 159.) [P. S.]

DIA'NA VETERANO'RUM, a town of Numidia on the high road from Theveste to Sitifi, by Lambaesis, 33 M. P. from the latter place, is identified with *Izana* or *Zanah* by inscriptions on a triumphal arch in honour of Severus at that place. (*Itin. Ant.* pp. 34, 35; *Tab. Peut.*; Shaw, *Travels*, &c. p. 136.) [P. S.]

DIA'NION (Geog. Rav.), a place in Dalmatia, which is set down in the Peutinger Table as "ad Dianam," where a temple of Diana once stood, superceded in later times by the Church of St. George. It is now the promontory of *Marglian*, just below the mountain of the same name. (Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 143.) [E. B. J.]

Digitized by Google

DIA'NIUM (Διάνιον), or ARTEMI'SIUM (Ἀρτεμίσιον), a lofty promontory on the E. coast of Hispania Tarraconensis, named from a temple of Artemis which stood upon it, and having in its neighbourhood a town of the same name. Strabo tells us that between the river Sucro (*Jucar*) and Carthago Nova (*Cartagena*), and not far from the river, there were three small towns, founded by the Massaliots: of these the most celebrated was Hemeroscopium (τὸ Ἡμεροσκοπεῖον), having upon the adjacent promontory a most esteemed temple of the Ephesian Artemis, which Sertorius used as his naval head-quarters; for its site is a natural stronghold, and fit for a pirates' station, and visible to a great distance out at sea. It is called Dianium or Artemisium, and has near it excellent iron mines and the islets of Planesia and Plumbaria: and above it is a lake of the sea 400 stadia in circuit. (Strab. iii. p. 159; comp. Cic. *in Verr.* ii. 1, v. 36, Steph. B. s. v. Ἡμεροσκοπεῖον, and Avien. *Or. Marit.* 476). Pliny mentions the people of Dianium (Dianenses) among the *civitates stipendiariae* of the conventus of New Carthage (Plin. iii. 3. s. 4); and coins of the town are extant (Sestini, p. 154). It would seem, from these accounts, that the Massilians first chose the lofty promontory as a watch-station (ἡμεροσκοπεῖον), whence it derived its first name; that it became better known by the name of the temple of Artemis which they built upon it; and that this latter name was transferred to a town which grew up beside the temple. In the time of Avienus neither town nor temple existed; but the name is now preserved by the town of *Denia* (also called *Artemus*), lying a little to the NW. of the triple promontory called *C. S. Martin*) which is the chief headland on the E. coast of Spain. The lake, of which Strabo speaks, is supposed by some to be that of *Albufera* in *Valencia*, N. of the river *Jucar*. (Ukert, vol. ii. pt. 1, p. 404.) On account of the iron mines mentioned by Strabo, Mela calls the promontory FERRARIA (ii. 6. 7). [P. S.]

DIA'NIUM (Ἀρτεμίσιον: *Gianuti*), a small island off the coast of Etruria, immediately opposite to the Mons Argentarius or promontory of Cosa. It is distant 7 geog. miles from the nearest point of the mainland, and 8 from the neighbouring island of Igilium. Pliny calls it "Dianium quam Artemisium Graeci dixere:" it is evidently the same which is called Artemita by Stephanus (Ἀρτεμίτα, ἥτις Τυρρηνική), Steph. *s. v.*), but it is probable that it should be Ἀρτεμίσιον. The modern name of Giannuti is a corruption of the Latin Dianium. (Plin. iii. 6. s. 12; Mela, ii. 7. § 19.) [E. H. B.]

DIBIO (*Eth.* Dibionensis: *Dijon*) appears to have been in the territory of the Lingones, a people of Gallia Celtica; for the diocese of *Dijon* was a part of the diocese of *Langres*, and was only separated from it in 1721. Dibio is only known as a town of the Roman period from two inscriptions found at the place, which speak of the workers in iron there, "Fabri ferrarii Dibionenses," or "Dibione consistentes." The place is described by Gregorius of Tours in the sixth century. Many Roman remains have been found there. *Dijon* is in the departement *de la Côte d'Or*. (D'Anville, *Notice*, &c.; Walckenaer, *Geog.* &c. vol. i. p. 418, and *Voyage de Millin*, &c. vol. i. p. 365, to which he refers.) [G. L.]

DICAEA (Δικαία), a Greek port town on the coast of Thrace on lake Bistonis, in the country of the Bistones. The place appears to have decayed at a early period. Some identify it with the modern *Curnu*, and others with *Bauron*. (Herod. vii. 109; Scylax, p. 27; Strab. vii. p. 331; Steph. Byz. *s. v.*; Plin. iv. 18.) [L. S.]

DICAEA'RCHIA. [PUTEOLI.]

DICALEDONAE, in Britain, mentioned by Ammianus Marcellinus (xxvii. 8) as one of the divisions of the Picts; the Vecturiones forming the other. There can be but little doubt that in this word we have the root *Caledon-* (in *Caledonia*), with a prefix. As little can it be doubted that the same is the case with the Deu-caledonius Oceanus (*q. v.*). The meaning of the prefix is another question. See PICTI. [R. G. L.]

DICTAMNUM (Δίκταμνον, Ptol. iii. 17. § 8), a town of Crete, which Pomponius Mela (ii. 7. § 12), who calls it DICTYNNA, describes as being one of the best known in Creta. It was situated to the N.E. of Mt. Dictynnaeus, and S.E. of the promontory Psacum, with a temple to the goddess Dictynna. (Dicaearch. 13; *Stadiasm.*; Scylax.) Mr. Pashley (*Trav.* vol. ii. p. 29) identifies the site with a place called *Kastrillières*, about 3 miles from the extremity of Cape *Spádha*. Pococke (*Trav.* vol. ii. pt. i. pp. 244—245) has described the ruins, and speaks of cisterns and columns existing in his time; and in this, his statement agrees with that of the MS. of the 16th century which has been translated (*Mus. Class. Antiq.* vol. ii. p. 299), and fixes the site at a place called *St. Zorzo di Magnes*, 12 miles W. of *Canea* and 6 from *Cape Spádha*, on a conspicuous elevation of a lofty mountain. (Höck, *Kreta*, vol. ii. p. 158.) [E. B. J.]

DICTE (Δίκτη, Strab. x. p. 478; Diod. v. 70: Steph. B.; Δίκτον, Arat. *Phaen.* 33; Δίκταιον ὄρος, *Etym. M. s. v.*; Dictaeus M., Plin. iv. 12: *Juktas*), the well-known Cretan mountain where, according to story, Zeus rested from his labours on earth and in heaven. Here the "lying Cretan" dared to show the tomb of the "Father of gods and men," which remained an object of veneration or curiosity from an early period to the age of Constantine. (Cic. *de N. D.* iii. 21; Diod. iii. 61; Lucian, *de Sacrif.* 10, vol. i. p. 634, *de Jov. Tragoed.* 45, vol. ii. p. 693, ed. Hemst.; Origen. *c. Cels.* ii. 143, p. 475, ed. Par.) The stony slopes of the mountain rose to the SE. of Cnossus, on the E. side. Mr. Pashley found considerable remains of ancient walls at about 100 paces from the summit. The fragments offered good specimens of the polygonal construction. (*Trav.* vol. i. p. 220.) These, no doubt, are the remains of that ancient city described by the Venetian writer (*Descrizione dell' Isola di Candia*) as lying on the E. or opposite side of the mountain to Lyctus, of which Ariosto (*Orland. Fur.* xx. 15) makes mention: —

> "Fra cento alme città ch' erano in Creta,
> Dictea più ricca, e più piacevol era."

On the lower slopes was the fountain, on the wonders of which the Venetian writer gives a glowing description (*Mus. Class. Antiq.* vol. ii. p. 270), and which must, therefore, have existed at an earlier date than that recorded by the inscription as given by Mr. Pashley (*Trav.* vol. i. p. 211.) [E. B. J.]

DICTE. [SCEPSIS.]

DI'CTIS, in Britain, mentioned in the Notitia as the station of the *Praefectus Numeri Nerviorum Dictensium*. Generally, though perhaps on insufficient grounds, identified with *Ambleside* in *Westmoreland*. [R. G. L.]

DICTYNNAEUM. [CADISTUS.]

Digitized by Google

DICTYNNAEUM PR. [CADISTUS.]

DIDURI (Δίδουροι, Ptol. v. 39. § 12), a nomad tribe in the interior of Sarmatia Asiatica, who were found W. of the Alondae. [E. B. J.]

DIDYMA, DIDYMI. [BRANCHIDAE.]

DIDYMA TEICHE (τὰ Δίδυμα τείχη). This place is mentioned by Polybius (v. 77). Attalus took Didyma Teiche after Carseae. [CARSEAE.] Various guesses have been made about this place, but nothing is known. This may be the Didymon Teichos of Stephanus; and it is not decisive against this supposition that Stephanus places it in Caria, for he is often wrong in such matters. [G. L.]

DIDYME INSULA. [AEOLIAE INS.]

DIDYMI (Δίδυμοι), a town of Hermionis on the road to Asine, contained in the time of Pausanias temples of Apollo, Poseidon, and Demeter, possessing upright statues of those divinities. It is still called *Didyma*, a village situated in a valley 2 miles in diameter. On the north-eastern side of the valley rises a lofty mountain with two summits nearly equal in height, from which the name of Didymi is doubtless derived. The valley, like many in Arcadia, is so entirely surrounded by mountains, that it has no outlet for its running waters, except through the mountains themselves. Mr. Hawkins found at the village a curious natural cavity in the earth, so regular as to appear artificial, and an ancient well with a flight of steps down to the water. (Paus. ii. 36. § 3; Gell, *Itinerary of Morea*, p. 199; Boblaye, *Recherches*, &c. p. 62; Leake, *Peloponnesiaca*, p. 289; Curtius, *Peloponnesos*, vol. i. p. 464.)

DIDYMON TEICHOS (Δίδυμον τεῖχος: *Eth.* Διδυμοτειχῖται), a city of Caria. (Steph. B. *s. v.*) The place does not appear to be mentioned by any other authority. [G. L.]

DIDYMOTEICHOS (Διδυμότειχος), a Thracian town opposite to Plotinopolis, situated not far from the point where the Eurus empties itself into the Hebrus, on an island of the former. It is now called *Demotica*. (Nicet. *Chr.* p. 404.) [L. S.]

DIGBA (Plin. vi. 27. s. 31), a small town of Mesopotamia, on the Tigris, near the junction of that river with the Euphrates. Forbiger thinks it must be the same as the Διδιγούα or Διδουγούα of Ptolemy (v. 20. § 4). In the *Cod. Palat.* of Ptolemy it is written Διγούα, which is almost the same word as Digba. It was below Apameia. [V.]

DIGENTIA (*Licenza*), a small river in the country of the Sabines, falling into the Anio about 9 miles above Tibur, and a mile beyond Varia (*Vico Varo*). Its name is not mentioned by any of the geographers, and is known to us only from Horace (*Ep.* i. 18. 104), whose Sabine farm was on its banks. This circumstance gives it an unusual degree of interest, and it will be convenient to bring together here all the notices found in the poet of the valley of the Digentia and its neighbourhood. The modern localities were first investigated with care and accuracy by the Abbé Chaupy in his *Découverte de la Maison d'Horace*, vol. iii. Rome, 1769, but Holstenius had previously pointed out the identity of the Digentia with the *Licenza*, and that this must therefore have been the site of Horace's Sabine villa, which had been erroneously placed by Cluverius and other earlier topographers on the slope of the mountains towards the Tiber. (Cluver. *Ital.* p. 671; Holsten. *Adnot.* p. 106.)

1. The Digentia, according to Horace, was a stream of very cold and clear water (gelidus Digentia rivus, *l. c.*), deriving its principal supply of water from a fine fountain in the immediate neighbourhood of the poet's villa. It flowed by a village called MANDELA, in a very bleak situation (rugosum frigore pagus, *ib.* 105), the inhabitants of which were supplied with water from its stream. The *Licenza* joins the Anio immediately below a projecting rocky hill, now crowned by the convent of *S. Cosimato*; but on its left bank, about a mile from its confluence, stands the village of *Bardella*, the name of which is an obvious corruption of Mandela. But in addition to this, Chaupy discovered in the church of *S. Cosimato* an inscription of late Roman date, in which occur the words "in prediis suis masse Mandelæ" (Chaupy, p. 249; Orell. *Inscr.* 104.)

2. The villa of Horace, with the hamlet or group of five houses attached to it, was itself in the territory of, and dependent upon, the town of Varia (habitatum quinque focis et Quinque bonos solitum Variam dimittere patres, *Ep.* i. 14. 3): the position of this at *Vicovaro* on the Valerian Way, 8 miles from Tivoli, is established beyond doubt. [VARIA.]

3. In one of his Epistles, evidently written from his villa, the poet concludes (i. 10. 49):

"Haec tibi dictabam post fanum putre Vacunae,"

and his commentator Acron tells us, on the authority of Varro, that this Vacuna was a Sabine goddess equivalent to the Roman Victoria. It is a curious confirmation of this, that an inscription preserved at the village of *Rocca Giovane*, on the S. bank of the *Licenza*, 3 miles from *Vicovaro*, records the restoration of *a temple of Victory, which had fallen into ruin from its antiquity*, by the emperor Vespasian, whose Sabine origin would naturally lead him to pay attention to the objects of Sabine worship. (Imp. Caesar Vespasianus Aug. P. M. Trib. Pot. Cos. *Aedem Victoriae vetustate dilapsam* sua impensa restituit, Chaupy, p. 170; Orell. *Inscr.* 1868.) The identity of this Aedes Victoriae with the "fanum putre Vacunae" of Horace can scarcely admit of a doubt. The exact site of the temple, according to Chaupy, was about a mile beyond *Rocca Giovane* at a considerable elevation above the valley; here there still remain some fragments of Roman masonry, which may have formed part of the building, and it was here that the inscription above given was actually discovered. (Chaupy, p. 169.)

4. All these circumstances combine to fix the site of Horace's farm between the modern village of Rocca Giovane and that of *Licenza*, which rises on a hill, a little further up the valley; and the remains of a villa, consisting of a mosaic pavement and some portions of brick walls, have actually been discovered in a vineyard a short distance above the mill which now exists on the river *Licenza*. There seems every reason to believe that these are in reality the vestiges of the poet's villa, which appears, from various indications in his works, to have been on the S. side of the valley.

5. The fountain alluded to by Horace as in the neighbourhood of his villa (*Ep.* i. 16) is readily recognised in the source now called *Fonte Bello*, from which the *Licenza* derives a considerable part of its supply. It has been commonly supposed that this was identical with the Fons Bandusiae, celebrated by Horace in a well-known ode (Carm. iii. 13), or at least that that fountain was also situated in the same neighbourhood; but there is no authority for this, and Chaupy has given proofs which may be considered conclusive that the true Bandusia was in the neighbourhood of Venusia, and not of the Sabine farm. [BANDUSIAE FONS.]

Digitized by Google

The general aspect of the valley of the *Licenza* corresponds perfectly with the description of it given by Horace (*Ep.* i. 16. 1—14), and all travellers who have visited it concur in praising its beauty and picturesqueness. Until very lately it was a secluded spot, rarely visited by strangers, though within an easy ride of *Tivoli*, and the simple manners and rustic virtues of its inhabitants are said still to resemble those of the ancient Sabines.

Two other names remain to be mentioned, which there is reason to connect with the Sabine farm of Horace: the Mons Lucretilis, whose pleasant shades could allure Faunus from Lycaeus (*Carm.* i. 17), may be safely identified with the lofty *Monte Gennaro*, which forms the head of the valley of *Licenza*, and separates it from the Roman Campagna. [LUCRETILIS MONS.] The sloping Ustica (Ustica cubans, *ib.*), on the other hand, cannot be fixed with accuracy: it was probably one of the lower slopes or underfalls of the same mountain mass, in the immediate neighbourhood of the valley.

The modern localities of the valley of the *Licenza* have been described in great detail by Chaupy (*Maison d'Horace*, vol. iii. pp. 150—362), and more recently by Dennis in Milman's *Life of Horace*, pp. 97—110, and Nibby (*Dintorni di Roma*, vol. ii. p. 245, vol. iii. pp. 713—721). [E. H. B.]

1. Modern Village of *Licenza*.
2. Modern Village of *Civitella*.
3. Remains of the Villa of Horace.
4. *Fonte Bello*.
5. Village of *Rocca Giovane*.
6. Site of the Temple of Vacuna.
7. Varia (*Vicovaro*).
8. Village of *Bardella* (Mandela).

DILIS, a place in Gallia on the coast between Massilia (*Marseille*) and Fossae Marianae (*Foz-les-Martigues*). The Maritime Itin. (Wess. p. 507) places Incarus (*Carry*) next to Massilia, then "Dilis Massilia," 8 M. P. from Incarus, and then Fossae 12 M. P. further. The edition of Wesseling makes it 20 from Dilis to Fossae; but three MSS. have 12. Walckenaer (*Géog.*, &c. vol. iii. p. 122) supposes that the number 20 is derived from some Itinerary which named Dilis, and gave only the distance from Incarus to Fossae; which seems likely. The modern site may be *Carro*. [G. L.]

DILUNTUM. [DALLUNTUM.]

DIMALLUM (Δίμαλλος, Διμάλη, Διμάλλη, Polyb. iii. 18, vii. 9), an important fortress in Illyricum, taken by the Romans under L. Aemilius Paullus, in their war with Demetrius of Pharos; and which seems to have been in the neighbourhood of the Parthini, if not included within their territory. (Liv. xxix. 12; Polyb. *l. c.*) [E. B. J.]

DIMASTUS. [MYCONUS.]

DIMETAE or DEMETAE (Δημῆται), a people of Britain, mentioned by Ptolemy (ii. 3. § 23) as living west of the Silures, and having, as towns, Luentinum and Maridunum (*Caer-marthen*). This gives them *Pembrokeshire* and *Carmarthen* as certain portions of the area, and, probably, some parts of the neighbouring counties. *Divet*, as the Welsh name of a district, is the root *Dimet*, in its modern form. [R. G. L.]

DINARETUM. [CLEIDES.]

DINDYME'NE. [DINDYMUM.]

DI'NDYMUM. [CYZICUS.]

DI'NDYMUM (τὸ Δίνδυμον). Strabo (p. 567) speaks of a mountain Dindymum which rises above Pessinus in Galatia; and from this mountain the goddess called Dindymene has her name. He adds that the river Sangarius flows near it. In Ptolemy the name is incorrectly written Didyma. Strabo says in another place (p. 626), "the Hermus is close to Mysia, flowing from a mountain sacred to Dindymene, and through the Catacecaumene into the territory of Sardis." Perhaps he may have followed Herodotus as to the source of the Hermus, who says (i. 80) that the Hermus flows from a mountain sacred to the mother Dindymene, as our texts stand. This passage has been sometimes misunderstood, and the name Dindymene has been given to the mountain. Stephanus (*s. v.* Δίνδυμα) describes the Dindyma as "mountains of the Troad, whence Rhea is called Dindymene;" but there is a mistake here, for neither the mountain of Galatia, nor Dindymum near Cyzicus, is within the limits of the Troad. In some maps Mount Dindymum is placed near Pessinus, and Mount Dindymene at the source of the Hermus; but there is no Mount Dindymene. The mountain tract in which the Hermus rises is the *Morad Dagh*, which is the Dindymum of Herodotus. The Rhyndacus also rises in this mountain region, and the chief branch of the Maeander. It is possible that a

Digitized by Google

range of mountains may extend from the *Morad Dagh* east to the neighbourhood of Pessinus. Strabo could hardly be ignorant that there is a considerable distance between the source of the Hermus and the mountain that overhangs Pessinus. Hamilton describes the Dindymum, in which is the source of the Hermus, as rising to a great height, and forming "the watershed between the Hermus and the Rhyndacus, extending from Morad Dagh to Ak Dagh near Simaul." He adds that these mountains "join the range of Demirji, being a part of the great central axis of Asia Minor, which may be said to extend from SE. by E. to NW. by W., from the Taurus by Sultan Dagh to Mount Ida, forming the great watershed between the rivers which fall into the Mediterranean and the Archipelago, and those which fall into the Sea of Marmora and the Black Sea." (*Researches*, &c. vol. i. p. 105.) As to the Dindymum of Pessinus, see PESSINUS. [G. L.]

DINIA (*Digne*), a town in Gallia Narbonensis. Pliny (iii. 4) says that the Avantici and Bodiontici were added by the emperor Galba to the list (formula) of the people of Narbonensis, and he mentions Dinia as their capital, or he may mean the capital of the Bodiontici only, though he has ill expressed himself, if that is his meaning. The name of Dinia does not occur in the Itins.; but as *Digne*, now in the department of the *Basses Alpes*, became the chief place of a diocese, its identity with Dinia is easily made out. In the Notitia of the provinces of Galba, "Civitas Diniensium" occurs. Ptolemy (ii. 10. § 19) makes Dinia (Δινία) the chief place of the Sentii, which is either an error, or some change had been made between the time of Pliny and Ptolemy, and the Avantici and Bodiontici were included in the territory of the Sentii. [G. L.]

DINIAE, a place in Phrygia, through which the Roman consul Cn. Manlius marched in his Galatian expedition. (Liv. xxxviii. 15.) He came to the plain of Metropolis [METROPOLITANUS CAMPUS], and on the following day to Diniae. From Diniae he marched to Synnada; but there is no indication of the length of the march from Diniae to Synnada. Hamilton observes that Strabo (p. 663), in a passage where "he describes the great line of communication between Ephesus and Mazaca, places Metropolis (clearly the same as that alluded to by Livy) between Apamea and Chelidonii, probably the same place as the Diniae of the historian." (*Researches*, &c. vol. ii. p. 179.) Hamilton concludes that the plain of *Sitzhanli* represents the Metropolitanus Campus; "both from the narrative of Livy and its being on the great line of traffic." This seems a very probable conclusion. He also thinks that *Afiom Kara Hissar* is the representative of Synnada; and if he is right in these conclusions, the position of Diniae is fixed within certain limits, though the maps do not show any name that corresponds to it.

It is generally agreed that the words καὶ Χελιδονίων in Strabo (p. 663) are corrupt; but it is doubtful if Livy's Diniae is concealed under it. Cramer (*Asia Minor*, vol. ii. p. 30) and Groskurd (*Transl. Strabo*, vol. iii. p. 63) have some remarks on this reading. Palmerius proposed καὶ Φιλομηλίου, against which Cramer's objection is insufficient. [G. L.]

DINOGETIA, DINIGUTTIA, DIRIGOTHIA (Διωγέτεια), a town on the Danube in Moesia, nearly opposite the point where the Hierasus (*Pruth*) empties itself into the Danube. (Ptol. iii. 10. §§ 2, 11; It. Ant. 225; Notit. Imp.) [L. S.]

DIOCAESAREIA (Διοκαισάρεια: *Eth.* Διοκαισαριεύς). 1. A place in Cappadocia near Nazianzus. According to Gregorius of Nazianzus, it was a small place. It is mentioned by Ptolemy (v. 6); and by Pliny (vi. 3), who gives no information about it. Ainsworth, on his road from *Ak Serai* to *Kara Hissar*, came to a place called *Kaisar Koi*, and he observes "that by its name and position it might be identified with Diocaesarea." (*London Geog. Journal*, vol. x. p. 302.) Some geographers take Nazianzus and Diocaesareia to be the same place.

2. A town of Cilicia Trachea, mentioned by Ptolemy (v. 8) and the ecclesiastical authorities. Leake (*Asia Minor*, p. 117) supposes that it may have been between Claudiopolis (*Mout*) and Seleucia (*Selefke*). [G. L.]

DIOCAESAREIA. [SEPPHORIS.]

DIOCLEA (Δοκλέα, Ptol. ii. 16. § 12: *Eth.* Docleatae, Plin. iii. 28), a place in Dalmatia, where Diocletian was born, and from which he took his name. (Aurel. Vict. *Epit.* 54; comp. Eutrop. ix. 19.) It was really called Doclea, but the rising scribe changed the barbaric Docles into the Grecian Diocles, which, after his assumption of the purple, was Latinised into Diocletianus. The surrounding district bore the same name. (Const. Porph. *de Adm. Imp.* c. xxxv.) The town continued to be a place of considerable importance till the Turkish invasion. The ruins of it are found at the delta formed by the union of the rivers *Zetta* and *Moraça* in *Montenegro*. (Schafarik, *Slav. Alt.* vol. ii. pp. 239, 249, 272—275.) [E. B. J.]

DIOCLEIA (Διοκλεία), as the name is said to be written in one MS. of Ptolemy, though the common reading is Docela; but in one at least of the old Latin editions of Ptolemy, it is Dioclia (v. 2). Docea is a town of Phrygia Magna, mentioned by Hierocles. There are no means of fixing its position except what Ptolemy offers. It has been conjectured that the place is represented by some ruins at the passage of the *Pursek*, between *Kutahiyah* and *Inegöl*; but this is only a guess. [G. L.]

DIOCLETIANO'POLIS (Διοκλητιανούπολις, Procop. *Aed.* iv. 3), a town in Thrace, which the Antonine Itinerary places between Edessa and Thessalonica. Hierocles mentions another place of the name near Philippopolis. The site of neither of these has as yet been made out. [E. B. J.]

DIODO'RI INSULA (Διοδώρου νῆσος), an island situated in the narrow straits of the Red Sea, which is stated by Arrian, in his Periplus of the Red Sea (pp. 2, 14, ap. Hudson), to be 60 stadia in width at its mouth. The channel between it and the mainland was fordable. Its modern name is *Perim*. The straits and island are thus described by Commander Moresby (*Sailing Directions for the Red Sea*, pp. 1, 2): "The straits of *Bab-el-Mandeb* are 14½ miles wide at the entrance, between *Babel-Mandeb Cape* and the opposite point or volcanic peak, called *Jibbel Seajarn*. Near the former cape is *Perim Island*, which divides the two straits at the entrance, the larger being about 11 miles wide. *Perim* is a large rocky island, about 4½ miles long by 2 broad, rising 230 feet above the level of the sea, and without fresh water or inhabitants. The narrowest part of the little strait is nearly one and a half mile wide." [G. W.]

DIODO'RUM, a town in Gallia, placed by the Antonine Itin. on the road from Rotomagus (*Rouen*) to Lutetia (*Paris*). It lies between Durocasses (*Dreux*) and Paris, 22 Gallic leagues from *Dreux*, and 15 from *Paris*. The place was on a stream, as we may

Digitized by Google

rom the termination *dur;* the first part of the may be another form of Divo, as in Divodurum. eographers make the place *Dauros*. D'Anville a *Jouare* near *Pontchartrain*. [G. L.]

DLINDUM, a place in Gallia. The Table gives l from Burdigala (*Bordeaux*) through Agin- to Diolindum. Aginnum is *Agen;* and the station is Excisum, 13 Gallic leagues from Diolindum is 21 Gallic leagues from Excisum. dum is a doubtful position; but *La Linde* on ordogne, proposed by D'Anville, seems to be able site. [G. L.]

OMEDEAE INSULAE (*αἱ Διομήδειαι νῆσοι*), up of small islands off the coast of Apulia, alled ISOLE DI TREMITI: they are distant 15 miles from the nearest point of the coast, 8 from the mouth of the river Frento (*For-*. Their ancient name was derived from the d which represented them as the scene of the rmation of the companions of Diomed into ; a species of large sea-fowl by which they were ted (called by Pliny Cataractes — apparently d of diver) were supposed to be the descendants me Greek sailors, and were said to display a rd partiality for all visitors of Hellenic ex- ion. (Strab. vi. p. 284; Lycophr. *Alex.* 594 ; Pseud-Arist. *de Mirab.* § 79; Anton. Lib. Steph. B. *s. v.*; Ovid, *Met.* xiv. 482—509; s. 44. s. 61; Ael. *H. A.* i. 1; Dionys. Per. 483.) ost authors differ considerably in regard to their ber. Stephanus, Lycophron, and the mytho- hers, as well as Aelian and Dionysius, mention one island, which they call *Διομήδεια νῆσος*; he says there are two, one of which is inhabited, other not; Pliny (iii. 26. s. 30) calls the larger d "Diomedia insula," and adds that there is ther of the same name, but called by some Teu- . Ptolemy (iii. 1. § 80) says there are five, but ost giving their names. The real number is e islands, besides some mere rocks; they are called *S. Domenico*, *S. Nicola*, and *Caprara:* e three lie close together, while the small island of none (distant 11 geog. miles to the NE.) is not reckoned to belong to the group, but may perhaps be Teutria of Pliny. The island of *S. Domenico* ands the largest of the three, and is evidently the ancient Insula of the ancients, where a shrine of Diomed and his tomb were shown, together with a ove of plane trees, said to be the first introduced Italy. (Plin. xii. 3.) But the same island was known by the name of TREMERUS, probably its peculiar or native name, from whence comes the ern appellation of *Tremiti*, now applied to the e group. We learn from Tacitus that Augustus used it for the place of exile of his daughter ulia (Tac. *Ann.* iv. 71.) The name is already ven as "Tremetis" by the Geographer of Ravenna the 9th century. (Anon. Ravenn. v. 25, ed. ar.) [E. H. B.]

DNYSIA. [CRAMBUSA.]

DNYSIADES (*Διονυσιάδες*, Diod. v. 75), small s which lie off the coast of Crete to the NE. ir position is fixed by the Coast-describer at 120 from Sammonium (*Stadiasm.*) The Peu- Table places at the E. of the N. extremity of an island with the unfinished name of Dion. This must be one of this group of islands, now are called *Dhionysiádhes*. See the map Kiepert's *Transl.* (Höck, *Kreta*, vol. i. pp. 428, [E. B. J.]

DNYSOPOLIS (*Διονύσου πόλις*: *Eth. Διονυσοπολίτης*), a city of Phrygia. The Ethnic name occurs on medals, and in a letter of M. Cicero to his brother Quintus (*ad Q. Fr.* i. 2), in which he speaks of the people of Dionysopolis being very hostile to Quintus, which must have been for something that Quintus did during his praetorship of Asia. Pliny (v. 29) places the Dionysopolitae in the conventus of Apamea, which is all that we know of their position. We may infer from the coin that the place was on the Maeander, or near it. Stephanus (*s. v.*) says that it was founded by Attalus and Eumenes. Stephanus mentions another Dionysopolis in Pontus, originally called Cruni, and he quotes two verses of Scymnus about it. [G. L.]

COIN OF DIONYSOPOLIS IN PHRYGIA.

DIONYSOPOLIS INDIAE. [NAGARA.]
DIONYSOPOLIS MOESIAE. [CRUNI.]
DIO'POLIS. [CABIRA.]

DIOSCO'RIDIS INSULA (*Διοσκορίδου νῆσος*, Ptol. viii. 22. § 17; Arrian, *Peripl. Mar. Erythr.* p. 16; Steph. B. *s. v. Διοσκουριάς*), an island of the Indian Ocean, of considerable importance as an emporium in ancient times. It lay between the Syagrus Promontorium (*Cape Fartash*) in Arabia, and Aromata Promontorium (*Cape Guardafui*), on the opposite coast of Africa, somewhat nearer to the former, according to Arrian, which is very far from the truth, if the Dioscoridis be rightly identified with *Socotorra*, which is 200 miles distant from the Arabian coast, and 110 from the NE. promontory of Africa. It is described by Arrian as very extensive, but desert and exceedingly moist, abounding in rivers tenanted by crocodiles, many vipers, and huge lizards, whose flesh was edible, and their grease when melted was used as a substitute for oil. It produced neither vines nor corn. It had but few inhabitants, who occupied the north side of the island towards the Arabian peninsula. It was a mixed population, composed of Arabs, Indians, and Greeks, attracted thither by commercial enterprise. The island produced various species of tortoises, particularly a kind distinguished for the size and thickness and hardness of its shell, from which were made boxes, writing tablets, and other utensils, which were the chief exports of the island. It produced also the vegetable dye called Indicum, or dragon's blood. It was subject to the king of the frankincense country in Arabia, by whom it was garrisoned, and farmed out for mercantile purposes. Thus far Arrian. Pliny's notice is very brief. He calls it a celebrated island in the Azanian sea, so named from Azania or Barbaria, now *Ajan*, south of *Somauli* on the African mainland, and states its distance from the Syagrus Promontorium to be 280 miles (vi. 28. s. 32). It is still tributary to the Arabians. [G. W.]

DIOSCU'RIAS (*Διοσκουρίας*, Steph. B.; Ptol. v. 10; Isid. *Orig.* xvi.; *Διοσκουρίς*, Scyl. p. 22), one of the numerous colonies of Miletus, at the E. extremity of the Euxine (Arrian, *Peripl.* pp. 10, 18) on the mouth of the river Anthemus, to the N. of Colchis (Plin. vi. 5). It was situated 100 M.P. (Plin. *l. c.*)

Digitized by Google

or 790 stadia to the NW. of the Phasis, and 2260 stadia from Trapezus (Arrian, *l. c.*). The wild tribes of the interior, whose barbarous idiom was unintelligible to one another, made this their great trading place. The Greeks were so astonished at the multiplicity of languages which they encountered, and the want of skilful interpreters was so strongly felt, that some asserted that 70 different tongues were spoken in the market of Dioscurias. (Strab. xi. p. 497.) Timosthenes, the historian, had exaggerated the amount to 300, but Pliny (*l.c.*), who quotes him, contents himself by saying that the traders required 130 interpreters. (Comp. Gibbon, vol. iv. p. 102.) In B. C. 66, when Mithridates was compelled to plunge into the heart of Colchis from the pursuit of Pompeius, he crossed the Phasis and took up his winter quarters at Dioscurias, where he collected additional troops and a small fleet. (Appian, *Mithr.* 101.) Upon or near the spot to which the twin sons of Leda gave their name (Mela, i. 19. § 5; comp. Amm. Marc. xxii. 8. § 24) the Romans built SEBASTOPOLIS (Steph. B.; Procop. *B.G.* iv. 4), which was deserted in the time of Pliny (*l. c.*) but was afterwards garrisoned by Justinian (Procop. *Aed.* iii. 7). The SOTERIOPOLIS (Const. Porph. *de Adm. Imp.* c. 42) of later times has been identified with it. The position of this place must be looked for near the roadstead of *Iskuria*. Chardin (*Trav.* pt. i. pp. 77, 108) described the coast as uninhabited except by the Mengrelians, who come to traffic on the same spot as their Colchian ancestors, and set up their tents or booths of boughs. For a curious coin of Dioscurias, which, from the antiquity of its workmanship, is inferred to be older than the age of Mithridates, see Rasche, vol. ii. pt. i. p. 318. [E. B. J.]

DIOS HIERON (Διὸς Ἱερόν: *Eth.* Διοσιερίτης), a small place in Ionia between Lebedus and Colophon. Stephanus B. (*s. v.*) cites Phlegon as his authority for the Ethnic name. The position which Stephanus assigns to the place, seems to agree with the narrative in Thucydides (viii. 29), where it is mentioned.

Arundell (*Discoveries*, &c. vol. i. p. 36) says that the name of the river Cayster occurs on the medals of Dios Hieron, from which he concludes that it was not very far from the river. It is possible that there was another town of the name in Lydia and on the Cayster. Pliny (v. 29) makes the Dioshieritae belong to the conventus of Ephesus; and Ptolemy (v. 2) places it high up the valley of the Cayster, if we can trust his numbers. The epigraph on the coins is Διοσιερειτων. [G. L.]

DIO'SPOLIS MAGNA. [THEBAE.]

DIO'SPOLIS PARVA. There were two cities in Egypt bearing the appellation of the Lesser Town of Ammon-Zeus. 1. In the Thebaid, lat. 26° 3′ N. (Διόσπολις ἡ μικρά, Strab. xviii. p. 814; Ptol. iv. 5. § 67; Diospolis, It. Antonin. p. 159; Jovis Oppidum, Plin. v. 9. s. 10.), the chief town of the Nomos Diospolites. The Lesser Diopolis was seated on the left bank of the Nile, opposite to Chenobosciun, and nearly midway between Abydus and Tentyra. Pococke (*Travels*, vol. i. p. 140), D'Anville (*Mémoire sur l'Egypte*, p. 186), and Champollion (*l'Egypte*, vol. i. 238) identify this town with the modern village of *How* or *Hú*. Immediately below Diospolis began the canal or ancient branch of the Nile,—the *Bahr-Jusuf*, or River of Joseph, which flows between the Nile and the Libyan hills to the entrance of the Arsinoite Nome (*el-Fyoum*).

2. The modern *Lydda* (Strab. xviii. p. 802) was seated in the marshes of the Delta, east of the Pelusitic arm of the Nile. It was an inconsiderable place, and is mentioned only by Strabo. [W. B. D.]

DIO'SPOLIS (Διόσπολις). 1. In Bithynia. [Ed.] 2. In Lydia. (Steph. B. *s. v.*) [G. L.]

DIO'SPOLIS (Διόσπολις), the classical name of LYDDA, a city of the tribe of Benjamin, situated in the great plain of Sharon, which is probably identical with the Sarona of the Acts (ix. 35) to which Lydda is joined. Built by Shamed, the descendant of Benjamin (1 *Chron.* viii. 12), it was recovered by that tribe after the captivity (Neh. xi. 35), and is noted in the New Testament history for the healing of Eneas by St. Peter. (Acts ix. 32—35.) It was taken and destroyed by the proconsul Cestius Gallus on his march to Jerusalem, cir. A. D. 65. (Joseph. *B. J.* ii. 19. § 1.) St. Jerome mentions the fact of the change of name ("Lyddam versam in Diospolin," *Epit. Paulae*) and it is assumed by him and Eusebius as an important geographical terminus in the Onomasticon. In the Christian annals of the middle ages it is renowned as the burial place of the head of St. George, and the town is designated by his name in the Chronicles of the Crusades, and joined with Ramleh, from which it is not more than two miles distant on the north. It has retained its ancient name through all, unchanged, among the natives, and is now known simply as *Lydd*. It is a considerable village, situated in the midst of palm trees, and still shows large traces of the Crusaders' cathedral of St. George. It has been an episcopal see from very early times, and a synod of the bishops of Palestine was held there A. D. 415, in which the heresiarch Pelagius contrived, by misrepresentation, to procure his acquittal from the charge of heresy. (Williams, *Holy City*, vol. i. p. 263, foll.; see Robinson, *Bib. Res.* vol. iii. pp. 46—55.) [G. W.]

DIPAEA (Δίπαια: *Eth.* Διπαιεύς), a town of Arcadia in the district Maenalia, through whose territory the river Helisson flowed. Its inhabitants removed to Megalopolis on the foundation of the latter city. It is frequently mentioned on account of a battle fought in its neighbourhood between the Lacedaemonians and all the Arcadians except the Mantineians, sometime between B. C. 479 and 464. (Paus. iii. 11. § 7, viii. 8. § 6, 27. § 3, 30. § 1, 45. § 2. Herod. ix. 35.) Leake supposes that the ruins near *Daria* represent Dipaea; but since Pausanias does not mention Dipaea in his description of Maenalia, although he notices every insignificant place, Ross remarks that it is improbable that Pausanias should have passed over Dipaea, if these ruins really belong to the latter, since they are still very considerable. Ross regards them as the remains of Maenalus. (Leake, *Morea*, vol. ii. p. 52; Ross, *Reisen im Peloponnes*, vol. i. p. 118.)

DIPOENA. [ARCADIA, p. 193, No. 12.]

DIRCE. [THEBAE.]

DIRPHE, DIRPHYS, or DIRPHOSSUS. [TANAGRA, BOEA.]

DISCELADOS (Mela, ii. 7. § 13), an island [illegible] off the coast of Illyricum; it fell to the Narentanian branch of the Servian Slaves, and is now called *Mlit*, or, in Italian, *Meleda*. (Schafarik, *Slav. Alt.* vol. ii. p. 267.) [E. B. J.]

DITATTIUM (Διττάτιον) is one of the towns of the Sequani, in Gallia, which Ptolemy mentions (ii. 9); and he places it before Vesontio (Besançon). There is nothing to show the site, except Ptolemy's position, which is useless. D'Anville thinks that

Digitized by Google

ittium may be a place called *Citi*, where there some remains, not far from *Passavant*. Some graphers place Ditattium at *Dole* on the *Doubs*; rs again identify Ditattium with the ruins on hill of *Vieux Sceurre*, about a league SW. of rre. All this is mere guess, and a sample of ing; for there is nothing at all to determine the ation. [G. L.]

DITTANI. [CELTIBERIA].

DIUM. 1. (Δῖον: *Eth.* Διεύς, Steph. B.; Scyl. 66; Strab. vii. p. 330), a city which, though not ge (πόλισμα, Thuc. iv. 78), was considered as of the leading towns of Macedonia, and the great work of its maritime frontier to the S. Brasidas conducted to this place, which is described as ng in the territories of Perdiccas, by his Perrhae- guides, over the pass of Mt. Olympus. It suf- d considerably during the Social War from an asion of the Aetolians, under their strategus pus, who razed the walls, and almost demolished city itself (Polyb. iv. 28); an outrage which ip and the Macedonians afterwards amply ged by their attack on the Aetolian capital dyb. v. 9). In the war against Perseus Dium had, ppears, completely recovered from that disaster; in B. C. 169 it was occupied by Perseus, who un- untably abandoned his strong position on the proach of the consul. Q. Marcius Philippus, how- r, remained there only a short time; and Perseus rned to Dium, after having repaired the damage ich the walls of the city had received from the mans. (Liv. xliv. 7.) At a later period it became Roman colony. (Plin. iv. 10; Ptol. iii. 13. § 15.) ke (*Northern Greece*, vol. iii. pp. 408, foll.) has overed the site near *Malathria*, in a position ich agrees with the statements of the Itineraries in. Anton.; *Peut. Tab.*), and Pausanias (ix. 30.). In the space between the village and the ins of the BAPHYRUS he found some remains of fication and theatre; the stone-work which formed r walls and superstructure of these monuments no ger exists, except two or three squared masses nds the theatre. The original form and dimen- ns are sufficiently preserved to show that the dium was equal in length to the other buildings that kind in Greece, and that the theatre was out 250 feet in diameter. Below the theatre, on r edge of the water, are the foundations of a large lding, and a detached stone which seems to have longed to a flight of steps. Some foundations of e walls of the city can be just seen, and one se- l-hand "stele" was found. Dium, though situated a most unhealthy spot, was noted for its splendid dings and the multitude of its statues. (Liv. *l. c.*) thout the town was the temple of Zeus Olympius m which Dium received its name, and here were lebrated the public games called Olympia instituted Archelaus. (Diod. xvii. 16; Steph. B. *s. v.* Δῖον.) e theatre and stadium served doubtlessly for that lebration. Alexander placed here the group of chieftains who fell at the battle of Granicus,— work of Lysippus. (Arrian, *Anab.* i. 16.) Q. tius, after his victory over the Pseudo-Philip, ndered this "chef d'oeuvre" ("turma statuarum nstrium," Vell. i. 11) to Rome. Coins of the Colonia" of Dium are extant, usually with the e of a standing Pallas. (Eckhel, vol. ii. p. 70.)

2. A city in the peninsula of Acte (Herod. vii. 32; uc. iv. 109; Strab. vii. p. 331), which Scylax, ating from Torone, put before Thyssus and ome. The statements of Herodotus and Thucydides differ from that of the Periplus, as they tend to place Dium on the N. coast. But as they all agree in showing that it was the nearest town to the isthmus,—in which Strabo concurs,—it is very possible that Dium was neither on the N. nor S. shore of the peninsula, but on the W.; perhaps the promontory of *Platy*, in the Gulf of *Erisso*. (Leake, *Northern Greece*, vol. iii. p. 151.) [E. B. J.]

DIUM (Δῖον ἄκρον, Ptol. iii. 17. § 7), a promontory of Crete on the N. coast, where the island has its greatest breadth. Pliny (iv. 20) speaks of an inland town of this name (comp. Euseb. *Praep. Ev.* v. 31), which probably, however, was situated in the neighbourhood of this headland, which is now called *Kávo Stravró* (Höck, *Kreta*, vol. i. pp. 394, 398). [E. B. J.]

DIUM (Δῖον), a town in the NW. of Euboea near the promontory Cenaeum, from which Canae in Aeolis is said to have been a colony. Dium is mentioned by Homer. (Hom. *Il.* ii. 538; Strab. x. p. 446; Plin. iv. 12; Ptol. iii. 15. § 25.)

DIUR (Διούρ), the name given by Ptolemy (iv. 1 § 12) to one of the branch chains of the Atlas system of mountains, in Mauretania Tingitana; it appears to be the range which runs NW. from about the sources of the river Malva to the Straits. Ptolemy (iv. 1. § 3) mentions a river of the same name, having its mouth close to Mons Solis, probably the *Wad-el-Gored*. [P. S.]

DIVA (Δίουα: the *Dee*), a river in North Britain, mentioned by Ptolemy as falling into the Germanic Ocean, between the promontory of the Texalae (*Kinnaird Head*) and the aestuary of the Tava (*Τοῦα*). [R. G. L.]

DIVI'TIA (*Deutz*), a fort opposite to Colonia Agrippina (*Cologne*), which was erected for the purpose of protecting the bridge across the Rhine, and was occupied by a permanent garrison (*milites Divitienses*; Amm. Marc. xxvi. 7, xxvii. 1.) In the middle ages it was called *Duisia*, whence the modern name *Deutz*. [L. S.]

DIVODU'RUM (Διουδοῦρον: *Metz*), was the capital of the Mediomatrici, a people of Gallia, whose territory in Caesar's time extended to the Rhine (*B. G.* iv. 10). It is the only town of the Mediomatrici which Ptolemy mentions (ii. 9. § 12); and it occurs with this name in the Antonine Itin. on the road from Treviri (*Trier*, *Trèves*) to Argentoratum (*Strassburg*). It occurs in the Table in the form Divo Durimedio Matricorum, where the error is easily corrected. As is usual with Gallic towns, it took the name of the people, and it is called Mediomatrice by Ammianus Marcellinus (xvii. 1). The modern name *Metz* is from Mettis, a corrupted form which came into use in the fifth century. In the Notitia of the provinces of Gallia, we find "Civitas Mediomatricorum Mettis" mentioned after Treviri, the metropolis of Belgica Prima.

Metz, in France in the department of *Moselle*, is situated at the junction of the *Moselle* and the *Seille*, from which circumstance the town probably takes its name, for the first part of the word Divo-durum means "two." In A. D. 70 the soldiers of Vitellius, who had been received by the people of Divodurum in a friendly manner, suddenly through fear or some other cause fell on the unresisting inhabitants and killed 4000 of them. (Tacit. *Hist.* i. 63.) Divodurum was an important place on account of its position. Julian after his victory over the Alamanni at *Strassburg* sent his booty to Divodurum for safe keeping. *Metz* was ruined by the Huns in the fifth

Digitized by Google

century. It afterwards became the capital of Austrasia, or of the kingdom of *Metz*, as it was sometimes called.

The Roman buildings at *Metz* have disappeared; but the arrondissement of *Metz* contains many Roman remains. At or about *Sablon*, 1½ mile S. of *Metz*, were an amphitheatre, a naumachia, and baths. This indeed appears to have been the site of the old Roman town. The amphitheatre is said to have been as large as that of *Nimes*. The ruins of these edifices furnished a large part of the materials for the citadel and fortifications, which were added to the town in the 17th century. The aqueduct that supplied *Metz* with water, extended from the mills of the village of *Gorze* on the west side of the *Moselle* to *Metz*, a distance of more than 6 French leagues. It brought the water to the city across the river. There still remain of this great work 5 arches on the left bank of the *Moselle*, and 17 in the village of *Jouy* on the right bank. The piles or foundations in the river have been destroyed by the water. The masonry of the aqueduct is very good, and covered with a cement which is very well preserved wherever the aqueduct exists. It is estimated that it supplied every minute a volume of water equal to 1050 cubic feet. The arch under which the road to *Nancy* passes at *Jouy* is 64 feet high, or as high as one of our great viaducts. These arches supported two parallel canals. The two canals together were 11½ feet wide. Such was one of the Roman works in a town, the history of which is unknown. (*Guide du Voyageur*, &c., par Richard et E. Hocquart.) [G. L]

DI'VONA, afterwards CADURCI (*Cahors*). In Ptolemy (ii. 7. § 11) the name is written Δουήονα or Δούνκονα. In the Table the name is miswritten Bibona. In the Notitia of the Gallic provinces it appears under the name of Civitas Cadurcorum. The name Divona is in Ausonius (*Clarae Urbes Burdig.* v. 32), who gives the etymology of the name as he understood it: —

"Divona Celtarum lingua, Fons addite Divis."

He means to say that *Di* or *Div* means "God," and *von* or *on*, "water" or "fountain." It is said that it is the fountain at *Cahors* called "Des Chartreux" which gave the place the name Divona. It was the capital of the Cadurci, and there are four roads in the Table and the Itin., from Vesunna (*Périgueux*), Aginnum (*Agen*), Tolosa (*Toulouse*), and Segodunum (*Rhodez*), which meet at Divona, or *Cahors*, in the department of *Lot*. De Valois affirms that there is in *Cahors* a place still called *Las Cadurcas*, and it is further said that the ruins are those of a temple of Diana. The Roman aqueduct at *Cahors* was a great work. It was about 19 miles in length, and had a very winding course through valleys and along mountain sides. It crossed the valley of *Larroque-des-arcs* by a bridge of three tiers of arches, the elevation of which is estimated to have been nearly 180 feet. On the sides of two ranges of hills there are still some remains of this magnificent work, the dimensions of which must have equalled, or even surpassed, those of the *Pont-du-Gard*. It is said that it continued in pretty good preservation to the end of the 14th century. The aqueduct is generally cut in the rock on the sides of the hills along which it is carried. The channel for the water was constructed of masonry lined with cement and covered with tiles, so that no water could filter through. It was a work worthy of the grandeur of the Romans. Part of the wall of the baths remains, and a part of a doorway. Some beautiful mosaic work has been discovered on the site of the baths. The [illegible] was of a semicircular form. A plan of this [illegible] and an elevation were published in *L'Annuaire de Lot* for 1840. The fountain *Des Chartreux*, so called because it was in the inclosure of a convent of this religious society, the ancient Divona, is an abundant source. A large marble altar has been found at *Cahors*, with an inscription which records that it was set up by the Civitas Cadurcorum in honour of M. Lucterius Leo, the son of Lucterius Senecianus, who had discharged all the high offices in his native place, and was priest at the Ara Augusti, at the confluence of the Arar and the Rhodanus. One Lucterius, a Cadurcan, stirred up the people against Caesar in B. C. 52 (*B. G.* vii. 5. &c. vii. 44), and this man may have been one of the family. At least he had the name, with a Roman prenomen. The authority for the remains of Divona is a work entitled "Coup d'oeil sur les monumens antoriques du Lot, par M. le Baron Chaudruc de Crazannes." from whose work there are large extracts in the "Guide du Voyageur, par Richard et E. Hocquart." [G. L.]

DOANAS (ὁ Δοάνας, Ptol. vii. 2. § 7), a river in India extra Gangem, which there is some reason to suppose is represented by the present *Irawadi* or river of Ava. It discharged its waters into what Ptolemy calls the Sinus Magnus. It appears from Berghaus's map, that the modern *Salwen* bears the name of *Djaoen* near its embouchure, from which it might be inferred that this is the representative of the ancient Doanas. It seems, however, more likely that the *Salwen* is the Dorias of Ptolemy (vii. 2. § 7, 11). The two rivers flowed in parallel lines from N. to S., and it is clear that the ancients had no accurate account of them. The Doanas appears to have been about a degree to the W. of the Dorias, and the two streams must have really entered the sea in the Sinus Sabaracus or Gulf of *Martaban*. Mannert and Reichard have both supposed that they were rivers of the Chersonesus Aurea. [V.]

DOBE'RUS (Δόβηρος, Steph. B.; Δίσωρος, Δόσωρος, Δούβηρος), a Paeonian town or district which Sitalces reached after crossing Cercine, and where many troops and additional volunteers reached him making up his full total. (Thuc. ii. 98. Hierocles names Diaboros next to Idomene among the towns of the Consular Macedonia under the Byzantine empire; this, coupled with the statement of Ptolemy (iii. 13. 8. § 28) that it belonged to the Aestraei, would seem to show that Doberus was near the modern *Doghirán*.

The DOBERES (Δόβηρες, Doberi, Plin. iv. 18) are described by Herodotus (vii. 113) as inhabiting with the Paeoplae, the country to the N. of Pangaeum, — these being precisely the tribes which he had before associated with the inhabitants of the Lake Prasias (v. 16). Their position must therefore, be sought to the E. of the Strymon: they shared Mt. Pangaeum with the Paeonians and Pierians, and dwelt probably on the N. side, where, in the time of the Roman empire, there was a "mutatio," or station for changing horses, on the Via Egnatia, called DOBERUS, between Amphipolis and Philippi, 13 M. P. from the former and 19 M. P. from the latter (*Itin. Hierosol.*; comp. Tafel, *de Via Egnat.* p. 16. (Leake, *Northern Greece*, vol. iii. pp. 212. 466, 467.) [E. B. J.]

DOBU'NI (Δοβούνοι), a people in Britain, [illegible]

Digitized by Google

ned by Ptolemy twice: first (ii. 3. § 25), as being
nterminous to the east with the Silures, and as
ering Corinium (*Cirencester*) for their city; next
. 3. § 28), as lying to the north of the Belgae,
e of whose towns was the *Hot Springs* ("Υδατα
ρμά) = *Bath*. This places them in *Gloucester-*
re. The Boduni of Dion Cassius are generally,
d reasonably, believed to be the Dobuni, under
nother form (lx. 20). [R. G. L.]

DOCIDAVA (Δοκίδαυα, Ptol. iii. 8. § 6), a town
Dacia, which some have identified with *Debressia*,
d others with *Thorotzsko*. (Comp. Sulzer, *Ge-*
schichte Daciens, vol. i. pp. 179, 192.) [E. B. J.]

DOCI'MIA or DOCIMEIUM (Δοκίμια, Δοκίμιον: *Eth.* Δοκιμεύς). Stephanus (*s. v.*) ob-
ves that Docimeus is the correct Ethnic form, but
cimeus (Δοκιμηνός) was the form in use. It
s a city of Phrygia, where there were marble
rries. (Comp. Steph. B. *s. v.* Συνναδα.) Strabo
577) places Docimia somewhere about Synnada:
alls it a village, and says that "there is there a
rry of Synnadic stone, as the Romans call it, but
people of the country call it Docimites and Do-
mus; the quarry at first yielded only small pieces
he stone, but owing to the present expenditure of
Romans large columns of one piece are taken
which in variety come near the Alabastrites, so
, though the transport to the sea of such weights
troublesome, still both columns and slabs are
ght to Rome of wondrous size and beauty."
mp. Strabo, p. 437.) The word Docimaea (Δο-
μαία) in this passage of Strabo appears to be
ept. It should be either Δοκιμαῖον or Δοκιμία.
mke (*Asia Minor*, p. 54) supposes that the ex-
ive quarries on the road from *Khoorukan* to
ushir are those of Docimia. He interprets
bo as saying that Synnada was only 60 stadia
Docimia; but Strabo says that the plain of
nada is about 60 stadia long, and beyond it is
ssia. We may, however, infer that he supposed
ssia to be not far from the limit of the plain.
Table makes it 32 M. P. between Synnada and
ssia, and Docimia is on the road from Synnada
orylaeum; but the number is certainly errone-
The position of Synnada is not certain, and if
re, it would not absolutely determine the po-
n of Docimia; but Docimia was probably at the
where Leake fixes it, NE. of *Afiom Kara*
ar. East of *Afiom Kara Hissar*, at a place
d *Sarmanek*, Hamilton (*Researches*, &c. vol. ii.
No. 375) copied part of an inscription, the re-
der of which was buried under ground. The
which he copied contains the name Δοκιμεων.
ebi *Kara Hissar*, which may be the ancient
ssia [Bendis], Hamilton saw "numerous blocks
rble and columns, some in the rough, and others
fully worked." He also says: "In an open
near the mosque was a most exquisitely finished
h bath, intended perhaps to have adorned a
n villa; and in the walls of the mosque and
ery were some richly carved friezes and cor-
finished in the most elaborate style of the
and Corinthian orders I had ever beheld."
i. p. 461.) He observes that they could not
been designed for any building near the spot,
are probably worked near the quarries for the
ns of easier transport, as it is done at Carrara
ly. Though we do not know the exact site of
ia, it seems certain that the site is ascertained
nearly.

ere are coins with the epigraphs Δημος or Ιερα Συνκλητος Δοκιμεων Μακεδονων, whence it appears that it had received a Macedonian colony, if the coins are genuine. [G. L.]

COIN OF DOCIMIA.

DOCLEA. [Dioclea.]

DODECASCHOENUS (Δωδεκάσχοινος), a district between Egypt and Aethiopia, which derived its name from its comprising xii σχοῖνοι or 120 stadia = 18 geographical miles of land. (Ptol. iv. 5. § 74; Herod. ii. 29.) The northern frontier of this region was at Philae, and the southern at Pscelcis (*Dakkeh*), the furthest point at which any monumental vestiges of Macedonian or Roman dominion have been found. Under the later emperors, indeed, the province of Dodecaschoenus extended to Hiera-Sycaminos, in lat. 22° N. In the Roman era Dodecaschoenus was attached to the prefecture of Upper Egypt. The principal cities of Dodecaschoenus have been enumerated under Aegyptus. [W. B. D.]

DODON. [Dodona.]

DODO'NA (Δωδώνη; sometimes Δωδών, Soph. *Trach.* 172: *Eth.* Δωδωναῖος), a town in Epeirus, celebrated for its oracle of Zeus, the most ancient in Hellas. It was one of the seats of the Pelasgians, and the Dodonaean Zeus was a Pelasgic divinity. The oracle at Dodona enjoyed most celebrity in the earlier times. In consequence of its distance from the leading Grecian states, it was subsequently supplanted to a great extent by that at Delphi; but it continued to enjoy a high reputation, and was regarded in later times as one of the three greatest oracles, the other two being those of Delphi and of Zeus Ammon in Libya. (Strab. xvi. p. 762; Cic. *de Div.* i. 1, 43; Corn. Nep. *Lys.* 3.)

The antiquity of Dodona is attested by several passages of Homer, which it is necessary to quote as they have given rise to considerable discussion:

(1) Γουνεὺς δ' ἐκ Κύφου ἦγε δύω καὶ εἴκοσι νῆας· τῷ δ' Ἐνιῆνες ἕποντο, μενεπτόλεμοί τε Περαιβοί, οἵ περὶ Δωδώνην δυσχείμερον οἶκί' ἔθεντο οἵ τ' ἀμφ' Ἰμαρτὸν Τιταρήσιον ἤργ' ἐνέμοντο. (*Il.* ii. 748.)

(2) Ζεῦ ἄνα, Δωδωναῖε, Πελασγικέ, τηλόθι ναίων, Δωδώνης μεδέων δυσχειμέρου· ἀμφὶ δὲ Σελλοὶ σοὶ νάουσ' ὑποφῆται ἀνιπτόποδες χαμεύναι. (*Il.* xvi. 233.)

(3) Τὸν δ' ἐς Δοδώνην φάτο βήμεναι, ὄφρα θεοῖο ἐκ δρυὸς ὑψικόμοιο Διὸς βουλὴν ἐνακούσας, ὅππως νοστήσει 'Ιθάκης ἐς πίονα δῆμον. (*Od.* xiv. 327, xix. 296.)

The ancient critics believed that there were two places of the name of Dodona, one in Thessaly, in the district of Perrhaebia near Mount Olympus, and the other in Epeirus in the district of Thesprotia; that the Enienes mentioned (No. 1) along with the Perrhaebi of the river Titaresius came from the Thessalian town; and that the Dodona, which Ulysses visited in order to consult the oracular oak of Zeus, after leaving the king of the Thesproti, was the place in Epeirus (No. 3). With respect to the second passage above quoted there was a difference of opinion; some sup-

Digitized by Google

posing that Achilles prayed to Zeus in the Thessalian Dodona as the patron god of his native country; but others maintaining that the mention of Selli, whose name elsewhere occurs in connection with the Thesprotian Dodona, points to the place in Epeirus. (Strab. vii. p. 327, ix. p. 441; Steph. B. *s. v.* Δωδώνη.) There can be no doubt, that the first-quoted passage in Homer refers to a Dodona in Thessaly; but as there is no evidence of the existence of an oracle at this place, it is probable that the prayer of Achilles was directed to the god in Epeirus, whose oracle had already acquired great celebrity, as we see from the passage in the Odyssey. The Thessalian Dodona is said to have been also called Bodona; and from this place the Thesprotian Dodona is said to have received a colony and its name. (Steph. B. *s. v.* Δωδώνη.)

The Selli, whom Homer describes as the interpreters of Zeus, "men of unwashed feet, who slept on the ground," appear to have been a tribe. They are called by Pindar the Helli; and the surrounding country, named after them Hellopia (Ἑλλοπία), is described by Hesiod as a fertile land with rich pastures, wherein Dodona was situated. (Strab. vii. p. 328; Schol. *ad Soph. Trach.* 1167.) Aristotle places the most ancient Hellas "in the parts about Dodona and the Achelous," adding that the Achelous has frequently changed its course,—a necessary addition, since the Achelous does not flow near Dodona. He likewise states that the flood of Deucalion took place in this district, which "was inhabited at that time by the Selli, and by the people then called Graeci, but now Hellenes." (Aristot. *Meteor.* i. 14.) We do not know the authority which Aristotle had for this statement, which is in opposition to the commonly received opinion of the Greeks, who connected Deucalion, Hellen, and the Hellenes, with the district in Thessaly between Mounts Othrys and Oeta. (Grote, *Hist. of Greece*, vol. ii. p. 355.)

It is impossible to penetrate any further back into the origin of the oracle; and we may safely dismiss the tales related by Herodotus of its Egyptian origin, and of its connection with the temple of Thebes in Egypt, and of Zeus Ammon in Libya. (Herod. ii. 54, seq.) The god at Dodona was said to dwell in the stem of an oak (*φηγός*, the oak bearing an esculent acorn, not the Latin fagus, our beech), in the hollow of which his statue was probably placed in the most ancient times, and which was at first his only temple (*ναῖον δ' ἐν πυθμένι φηγοῦ*, Hes. *ap Soph. Trach.* 1167; Δωδώνην φηγόν τε, Πελασγῶν ἕδρανον, ἦκεν, Hes. *ap. Strab.* vii. p. 327; comp. Müller, *Archäol.* § 52, 2). The god revealed his will from the branches of the tree, probably by the rustling of the wind, which sounds the priests had to interpret. Hence we frequently read of the speaking oak or oaks of Dodona. (Hom. *Od.* xiv. 327, xix. 296; *αἱ προσήγοροι δρύες*, Aesch. *Prom.* 832; *πολυγλώσσου δρυός*, Soph. *Trach.* 1168.) In the time of Herodotus and Sophocles the oracles were interpreted by three (Sophocles says two) aged women, called Πελείαδες or Πέλειαι, because pigeons were said to have brought the command to found the oracle: —

> *ὡς τὴν παλαιὰν φηγὸν αὐδῆσαί ποτε*
> *Δωδῶνι δισσῶν ἐκ πελειάδων ἔφη.*

(Soph. *Trach.* 171.) Herodotus (ii. 55) mentions the name of three priestesses. (Comp. Strab. vii. *Fragm.* 2; Paus. x. 12. § 10.) These female priestesses were probably introduced instead of the Selli at the time when the worship of Dione was connected with that of Zeus at Dodona: and the Boeotians were the only people who continued to receive the oracles from male priests. (Strab. ix. p. 402.)

As Delphi grew in importance, Dodona was chiefly consulted by the neighbouring tribes, the Aetolians, Acarnanians, and Epeirots (Paus. viii. 21. § 2); but, as we have already remarked, it continued to enjoy great celebrity even down to the later times. Croesus sent to inquire of the oracle (Herod. i. 46); Pindar composed a Paean in honour of the Dodonaean god, since there was a close connection between Thebes and Dodona (Pind. *Fragm.* p. 571, ed. Böckh; Strab. ix. p. 402); Aeschylus and Sophocles speak of the oracle in terms of the highest reverence (Aesch. *Prom.* 829, seq.; Soph. *Trach.* 1164, seq.); and Cicero relates that the Spartans, in important matters, were accustomed to ask the advice of the oracles either of Delphi, or Dodona, or Zeus Ammon (Cic. *de Div.* i. 43). The Athenians also seem to have unfrequently to consulted the oracle, which they did probably through their suspicion of the Pythia at Delphi in the Peloponnesian War. Thus they are said to have been commanded by the Dodonaean god to found a colony in Sicily (Paus. viii. 11. § 12); Demosthenes quotes several oracles from Dodona (*de Fals. Leg.* p. 436, *in Mid.* p. 531, ed. Reiske); and Xenophon recommends the Athenians to send to Dodona for advice (*de Vect.* 6. § 2). Under the Molossian kings, who gradually extended their dominion over the whole of Epeirus, Dodona again rose again in importance. The coins of the Molossian kings frequently bear the heads of Zeus and Dione, or of Zeus alone, within a garland of oak.

In B. C. 219, Dodona received a blow from which it never recovered. In that year the Aetolians under Dorimachus, who were at war with Philip king of Macedonia, ravaged Aetolia, and razed to the ground the temple of the god. (Polyb. iv. 67.) Strabo, in describing the ruined condition of the towns of Epeirus in his time, says that the oracle also had entirely failed (vii. p. 327); but it subsequently recovered, and Pausanias mentions the temple and sacred oak-tree as objects worthy of the traveller's notice. (Paus. i. 17. § 6.) He elsewhere speaks of the oak of Dodona as the oldest tree in all Hellas, next to the *λύγος* of Hera in Samos. (Paus. viii. 23. § 3.) The town continued to exist long afterwards. The names of several bishops of Dodona occur in the lists of the Councils: according to Leake, the latest was in the year 516. Dodona is mentioned by Hierocles in the sixth century (p. 651, ed. Wesseling).

Of the temple of Dodona we have no description, notwithstanding the celebrity of the oracle. Even the building itself is first mentioned by Polybius in his account of its destruction by the Aetolians in B. C. 219. He says that when Dorimachus "arrived at the *ἱερόν* near Dodona, he burnt the Stoae or Colonnades, destroyed many of the dedicatory offerings, and razed the sacred house to its foundations." (*Παραγενόμενος δὲ πρὸς τὸ περὶ Δωδώνην ἱερὸν, τάς τε στοὰς ἐνέπρησε, καὶ πολλὰ τῶν ἀναθημάτων διέφθειρε, κατέσκαψε δὲ καὶ τὴν ἱερὰν οἰκίαν*, Polyb. iv. 67.) From the words *περὶ Δωδώνην* we may conclude that the *ἱερὸν* was not within the walls of Dodona. It appears to have occupied a considerable space, and to have contained several other buildings besides the sacred house or temple proper of the god. It was stated by a writer of the name of Demon that the temple was surrounded with tripods bearing

Digitized by Google

ldrons, and that these were placed so closely to-ther, that when one was struck the noise vibrated rough all. (Steph. B. *s. v.* Δωδώνη; Schol. *ad* m. *Il.* xvi. 233.) It appears that the greater rt of these had been contributed by the Boeotians, ho were accustomed to send presents of tripods ry year. (Strab. x. p. 402.) Among the remark-le objects at Dodona were two pillars, on one of hich was a brazen caldron, and on the other a atue of a boy holding in his hand a brazen whip, dicated by the Corcyraeans: when the wind blew, e whip struck the caldron, and produced a loud ise. As Dodona was in an exposed situation, this natantly happened, and hence arose the proverb the Dodonaean caldron and the Corcyraean whip. ikeron, *ap.* Steph. B. *s. v.* Δωδώνη; Suid. *s. v.* δωδωναῖον χαλκεῖον; Strab. vii. p. 329.) This ap-ars to have been one of the means of consulting e god; and hence Gregory Nazianzen, in describing e silence of the oracle in his time, says, *οὐκέτι ἴδοι μαντεύεται* (*Or.* iv. p. 127, c.). Respecting e way in which the oracles were given, there are fferent accounts; and they probably differed at fferent times. The most ancient mode was by eans of sounds from the trees, of which we have ready spoken. Servius relates that at the foot of e sacred oak there gushed forth a fountain, the se of whose waters was prophetic and was inter-eted by the priestesses (*ad Virg. Aen.* iii. 466). some occasions the will of the god appears to ve been ascertained by means of lots. (Cic. *de v.* i. 34.)

The site of Dodona cannot be fixed with certainty. remains of the temple have been discovered; and inscriptions have been found to determine its lo-lity. It is the only place of great celebrity in ece, of which the situation is not exactly known. ake, who has examined the subject with his usual ateness and learning, comes to the conclusion, with eat probability, that the fertile valley of *Ioánnina* the territory of Dodona, and that the ruins upon e hill of *Kastrítza* at the southern end of the lake *Ioánnina* are those of the ancient city. Leake marks that it can hardly be doubted by any per-n who has seen the country around *Ioánnina*, and s examined the extensive remains at *Kastrítza*, at the city which stood in that centrical and com-anding position was the capital of the district ring a long succession of ages. "The town not ly covered all the summit, but had a secondary bourg or fortified suburb on the southern side of e hill, so as to make the whole circumference be-ween two and three miles. Of the suburb the re-ains consist chiefly of detached fragments, and of ains of buildings strewn upon the land, which is w cultivated. But the entire circuit of the town lls is traceable on the heights, as well as those of e acropolis on the summit. These, in some places, extant to the height of 8 or 10 feet. The ma-ery is of the second order, or composed of trape-ital or polyhedral masses, which are exactly fitted ne another without cement, and form a casing r an interior mass of rough stones and mortar.... monastery, which stands in the middle of the ellenic inclosure, bears the same name as the hill, t although built in great part of ancient materials, does not preserve a single inscribed or sculptured rble, nor could I find any such relics on any part the ancient site." (Leake.)

Our space allows us to mention only briefly the ief arguments of Leake in favour of placing Do-dona at *Kastrítza*. It was the opinion of the ancient writers that Dodona first belonged to Thesprotia, and afterwards to Molossis. Stephanus B. calls it a town of Molossis, and Strabo (vii. p. 328) places it in the same district, but observes that it was called a Thesprotian town by the tragic poets and by Pindar. But even Aeschylus, through calling the oracle that of the Thesprotian Zeus, places Dodona on the Molossian plain (*Prom.* 829):—

> *ἐπεὶ γὰρ ἦλθες πρὸς Μολοσσὰ δάπεδα,*
> *τὴν αἰπύνωτόν τ' ἀμφὶ Δωδώνην, ἵνα*
> *μαντεῖα δῶκός τ' ἐστὶ Θεσπρωτοῦ Διός.*

Hence it would appear that the territory of Dodona bordered on the inland frontiers of Thesprotia and Molossis, and must in that case correspond to the district of *Ioánnina*. Pindar describes Epeirus as beginning at Dodona, and extending from thence to the Ionian sea (*Nem.* iv. 81); from which it follows that Dodona was on the eastern frontier of Epeirus. That it was near the lofty mountains of Pindus, on the eastern frontier, may be inferred from the manner in which Aeschylus speaks of the Dodonaean mountains (*Supp.* 258), and from the epithet of *αἰπύνωτος* attached to the place by the same poet (*Prom.* 830), and from that of *δυσχείμερος* given to it by Homer. (*Il.* xvi. 234.) The account of the destruction of Dodona by the Aetolians also shows that it was on the eastern frontier of Epeirus. Polybius says (*l. c.*) that the Aetolians marched "into the upper parts of Epeirus" (*εἰς τοὺς ἄνω τόπους τῆς Ἠπείρου*), which words appear to be equivalent to Upper Epeirus, or the parts most distant from the sea towards the central range of mountains.

Hesiod, in a passage already referred to (ap. Schol. *ad Soph. Trach.* 1167; comp. Strab. vii. p. 328), describes Dodona as situated upon an extremity in the district called Hellopia, "a country of cornfields and meadows, abounding in sheep and oxen, and inhabited by numerous shepherds and keepers of cattle;"—a description accurately applicable to the valley of *Ioánnina*, which contains meadows and numerous flocks and herds. Several ancient writers state that the temple of Dodona stood at the foot of a high mountain called Tomarus or Tmarus (Τόμαρος, Τμάρος), from which the priests of the god are said to have been called Tomūri (Τομοῦροι, Strab. vii. p. 328; Callim. *Hymn. in Cer.* 52; Steph. B. *s. v.* Τόμαρος, Hesych. *s. v.* Τμάριοι; Eustath. *ad Od.* xiv. 327, p. 1760, R., *ad Od.* xvi. 403, p. 1806, R.). Theopompus relates that there were a hundred fountains at the foot of Mt. Tomarus. (Plin. iv. 1.) Leake identifies Tomarus with the commanding ridge of *Mitzikéli*, at the foot of which are numerous sources from which the lake of *Ioánnina* derives its chief supply. He further observes that the name Tomarus, though no longer attached to this mountain, is not quite obsolete, being still preserved in that of the *Tomarokhória*, or villages situated on a part of the southern extremity of *Dhrysko*, which is a continuation of *Mitzikéli*.

The chief objection to placing Dodona near *Ioánnina* is the silence of the ancient writers as to a lake at Dodona. But this negative evidence is not sufficient to outweigh the reasons in favour of this site, more especially when we consider that the only detailed description which we possess of the locality is in a fragment of Hesiod, who may have mentioned the lake in the lines immediately following, which are now lost. Moreover, Apollodorus stated that there were marshes round the temple (*ap.* Strab. vii.

Digitized by Google

p. 328). The lake of *Ioánnina* was known in antiquity by the name of PAMBOTIS (Παμβῶτις λίμνη), which was placed in Molossis. (Eustath. *in Hom. Od.* iii. 189.)

We have already seen that the temple of Dodona was probably outside the city. Leake supposes that the former stood on the peninsula now occupied by the citadel of *Ioánnina*, but there are no remains of the temple on this spot. (Leake, *Northern Greece*, vol. iv. p. 168, foll.; respecting the oracle, see Cordes, *De Oraculo Dodonaeo*, Groningen, 1826; Lassaulx, *Das Pelasgische Orakel des Zeus zu Dodona*, Würzburg, 1840; Arneth, *Ueber das Taubenorakel von Dodona*, Wien, 1840; Preller, in Pauly's *Real-Enclopädie*, art. *Dodona*; Hermann, *Lehrbuch der gottesdienstlichen Alterth. der Griechen*, § 39.)

DOEANTEIUS CAMPUS. Stephanus B. (*s. v.* Δοίαντος πεδίον) places it in Phrygia: the name came from Doeas. The situation of the plain is unknown.

Apollonius Rhodius (ii. 370, &c. 989, &c.) places a Δοιάντιον πεδίον at the mouth of the Thermodon in Pontus, where the Amazons dwelled. [G. L.]

DO'LICHE (Δολίχη), a town in Perrhaebia in Thessaly, situated at the foot of Mount Olympus. Doliche, with the two neighbouring towns of Azorus and Pythium, formed a tripolis. Leake identifies it with the small village of *Dúklista*, "where in a ruined church are two fragments of Doric columns 2 feet 8 inches in diameter, and in the burying-ground a sepulchral stone, together with some squared blocks." (Polyb. xxviii. 11; Liv. xlii. 53, xliv. 2; Ptol. iii. 13. § 42; Leake, *Northern Greece*, vol. iii. p. 344.)

DOLICHE, DOLICHISTE (Δολίχη, Δολιχίστη: *Eth.* Δολιχεύς, Δολιχίστης). Stephanus B. (*s. v.*) describes Doliche as an island close to the Lycian coast, on the authority of Callimachus; and he adds that Alexander, in his *Periplus* of Lycia, calls it Dolichiste. It is mentioned by Pliny (v. 31) and Ptolemy (v. 3). Pliny places it opposite to Chimaera; and both Pliny and Ptolemy name it Dolichiste. Doliche or Dolichiste, a long island, as the name implies, is now called *Kakava*. It lies near the southern coast of Lycia, west of the ruins of Myra, and in front of the spacious bay also named *Kakava*. The island is a "narrow ridge of rock, incapable of yielding a constant supply of water; each house had therefore a tank hollowed in the rock, and lined with stucco." (Beaufort, *Karamania*, p. 21.) Leake (*Asia Minor*, p. 127) speaks of the "ruins of a large city, with a noble theatre, at *Kákava*, in a fine harbour formed by a range of rocky islands." But this theatre appears, from what Leake says, to be on the coast of the mainland; and Beaufort observes that "the whole of these islands and bays may be included under the general Greek name *Kakava*." The island of Doliche is now uninhabited. [G. L.]

DOLI'ONIS (Δολιονίς: *Eth.* Δολίονες). Stephanus B. (*s. v.* Δολίονες) describes the Doliones as the "inhabitants of Cyzicus," and he adds that Hecataeus called them Dolieis: they were also called Dolionii.

The Doliones (Strab. p. 575) are a people about Cyzicus who extended from the river Aesepus to the Rhyndacus and the lake Dascylitis. [DASCYLIUM.] The names Dolionis and Doliones are connected with the earliest traditions about Cyzicus; and in Strabo's time the Cyziceni had the Dolionis. Strabo (p. 564) found it hard to fix the limits of the Bithynians, the Mysians, the Phrygians, as well as of the Doliones, those about Cyzicus; and we cannot blame him more than he did. Apollonius Rhodius (*Arg.* i. 947) doubtless followed an old tradition when he describes the Doliones as occupying the isthmus, by which he means the isthmus of Cyzicus, and the plain which is probably the plain on the mainland; and Homer also says, reigned Cyzicus, a son of Aeneas. [G. L.]

DOLOME'NE (Δολομηνή, Strab. xvi. p. 750), one of the districts in the plain country of Assyria adjoining the capital Ninus (Nineveh). [V.]

DOLONCAE, DOLONCI (Δόλογκοι), a Thracian tribe, which seems to have belonged to the race of the Bithynians. (Plin. iv. 18; Solin. 10; Steph. B. *s. v.*; Eustath. *ad Dionys. Per.* 323.) [L. S.]

DO'LOPES, DOLO'PIA. [THESSALIA.]

DOMANITIS, or, as it is sometimes written, DOMANETIS. [PAPHLAGONIA.] [G. L.]

DOMERUS. [DOBERUS.]

DOMETI'OPOLIS (Δομετιούπολις: *Eth.* Δομετιουπολίτης), is described by Stephanus (*s. v.*) as a city of Isauria. Ptolemy (v. 8) makes Domitiopolis a city of Cilicia Trachea. The site is unknown. [G. L.]

DO'NACON (Δονακών), a village in the territory of Thespiae in Boeotia, where the river Narcissus rises. It is mentioned by Pausanias after reaching the river Olmius, and before describing Creusis and Thisbe. Leake places Donacon near a hamlet called *Tatezá*, at a spot "where there is a copious fountain surrounded by a modern enclosure, of which the materials are ancient squared blocks: in the corn-fields above are many remains of former habitations." (Paus. ix. 31. § 7; Leake, *Northern Greece*, vol. ii. p. 501.)

DONU'SA or DONY'SA (Δόνυσα; where we see the corrupt forms Δονουσία, Steph. B. *s. v.*; Eustath. *ad Dionys. Per.* 530; Dionysia, Mel. ii. 7), a small island near Naxos, said by Stephanus to have been the island to which Dionysus carried Ariadne from Naxos, when pursued by her father Minos. This tale, however, appears to have arisen from confounding Donusa, the name of the island, with Dionysus, the name of the god. Stephanus also states, though we know not on what authority, that the island belonged to Rhodes. Virgil (*Aen.* iii. 125) gives to Donusa the epithet of "viridis," which Servius explains by the colour of its marble: but this statement is probably only invented to explain the epithet. Donusa was used as a place of banishment under the Roman empire. (Tac. *Ann.* iv. 30.)

DORA (τὰ Δῶρα), a maritime town of Palestine, locally situated in the half tribe of Manasseh on this side Jordan, but left in possession of the old Canaanitish inhabitants. (*Judges*, i. 27.) Scylax (p. 42), who calls it DORUS, says that it was a city of the Sidonians. It is frequently mentioned by Josephus, whose notices enable us to identify it with the modern village of *Tantura*. It was a city of Phoenicia, near Mount Carmel. (Joseph. *Vit.* § 8; *c. Apion.* ii. 9.) It was a strong fortress when Tryphon held it against Antiochus Pius (*Ant.* xiii. 7. § 2). Caesarea is placed by him between Dora and Joppa, both which maritime towns are described as having bad harbours, owing to their exposure to the south-west wind, which rolled in heavy breakers upon the sandy coast, and forced the merchants to anchor in the open sea (xv. 9. 6). St. Jerome describes it as anciently a most powerful city, but a ruin in his time (*Epitaph. Paulae*), situated 9 miles from Caesarea, on the road to Ptolemais (*Onomast. s. v.*; Reland, *Palaest.* pp. 738—741.)

Digitized by Google

"There are extensive ruins here, but they possess nothing of interest." (Irby and Mangles, *Travels*, p. 190.) [G. W.]

DORA FLUMEN. [DARGOMENES.]

DORA'CIUM (Δωράκιον), a town of Illyricum, which Hierocles calls the metropolis of the "Provincia Praevalitana,"—a title which rightly belongs to Scodra. Wesseling has supposed that it might represent DOCLEA or DIOCLEA. [E. B. J.]

DORES. [DORIS.]

DORGAMENES FLUMEN. [DARA.]

DO'RIAS. [DOANAS.]

DORIEIUM (Δορίειον: *Eth.* Δοριεύς). Steph. B. (s. v.) mentions it as a city of Phrygia. He has also Doriaeum (s. v. Δορίαιον), a city of Phrygia: and it is supposed that this may be the same place. Pliny (v. 27) has also a Dorion, or Dorio, as it is said to be written in the MSS., in Cilicia Tracheia. [G. L.]

DORIS (ἡ Δωρίς: *Eth.* Δωριεύς, pl. Δωριῆς, Δωριεῖς; Dores, Dorienses), a small mountainous district in Greece, bounded by Aetolia, southern Locris, the Ozolian Locrians, and Phocis. It lies between Mounts Oeta and Parnassus, and consists of the valley of the river Pindus (Πίνδος), a tributary of the Cephissus, into which it flows not far from the sources of the latter. The Pindus is now called the *Apostolid*. (Strab. ix. p. 427; Leake, *Northern Greece*, vol. ii. pp. 72, 92.) This valley is open towards Phocis; but it lies higher than the valley of the Cephissus, rising above the towns of Drymaea, Tithronium, and Amphicaea, which are the last towns in Phocis. Doris is described by Herodotus (viii. 31) as lying between Malis and Phocis, and being only 30 stadia in breadth, which agrees nearly with the extent of the valley of the *Apostolid* in its widest part. In this valley there were four towns forming the Doric tetrapolis, namely, ERINEUS, CYTINIUM, and PINDUS. (Strab. x. p. 17.) Erineus, as the most important, appears to have been also called Dorium. (Aesch. *de Fals. Leg.* p. 286.) The Dorians, however, did not confine themselves within these narrow limits, but occupied other places along Mount Oeta. Thus Strabo ascribes the Dorians of the tetrapolis as the larger part of the nation (ix. p. 417); and the Scholiast on Pindar (*Pyth.* i. 121) speaks of six Doric towns, Erineus, Cytinium, Boium, Lilaeum, Carphaea, and Dryope. Lilaeum is Lilaea, which seems to have been a Doric town in the time of the Persian invasion, since it is not mentioned among the Phocian towns destroyed by Xerxes; Carphaea is probably Carphea near Thermopylae; and by Dryope is probably meant the country once inhabited by the Dryopes. The Dorians would appear at one time to have extended across Mt. Oeta to the sea-coast, both from the preceding account and from the statement of Scylax, who speaks (p. 24) of Δωριεῖς ὑπὲρ Μαλιέων. Among the Doric towns Hecataeus mentioned Amphanaea, called Amphanaea by Theopompus. (Steph. B. s. v. Ἀμφανεία.) Livy (xxvii. 7) places in Doris Tithronium and Drymae, which are evidently the Phocian towns elsewhere called Tithronium and Drymaea. There was an important mountain pass leading from Parnassus from Doris to Amphissa in the country of the Ozolian Locrians: at the head of this pass stood the Dorian town of Cytinium. [CYTINIUM.]

Doris is said to have been originally called Dryopis from its earlier inhabitants the Dryopes, who were expelled from the country by Heracles and the Malians. (Herod. i. 56, viii. 31, 43.) [DRYOPES.] It derived its name from the Dorians, who migrated from this district to the conquest of Peloponnesus. Hence the country is called the Metropolis of the Peloponnesian Dorians (Herod. viii. 31); and the Lacedaemonians, as the chief state of Doric origin, on more than one occasion sent assistance to the metropolis when attacked by the Phocians and their other neighbours. (Thuc. i. 107, iii. 92.) The Dorians were supposed to have derived their name from Dorus, the son of Hellen. According to one tradition, Dorus settled at once in the country subsequently known as Doris (Strab. viii. p. 383; Conon, c. 27); but other traditions represent them as more widely spread in earlier times. Herodotus relates (i. 56) "that in the time of king Deucalion they inhabited the district Phthiotis; that in the time of Dorus, the son of Hellen, they inhabited the country called Histiaeotis at the foot of Ossa and Olympus; that, expelled from Histiaeotis by the Cadmeians, they dwelt on Mount Pindus, and were called the Macednian nation; and that from thence they migrated to Dryopis; and having passed from Dryopis into the Peloponnesus, were called the Doric race." For this statement Herodotus could have had no other authority than tradition, and there is therefore no reason for accepting it as an historical relation of facts, as many modern scholars have done. In Apollodorus (i. 7. § 3) Dorus is represented as occupying the country over against Peloponnesus on the opposite side of the Corinthian gulf, and calling the inhabitants after himself Dorians. By this description is evidently meant the whole country along the northern shore of the Corinthian gulf, comprising Aetolia, Phocis, and the land of the Ozolian Locrians. This statement, as Mr. Grote justly remarks, is at least more suitable to the facts attested by historical evidence than the legends given in Herodotus. It is impossible to believe that the inhabitants of such an insignificant district as Doris Proper conquered the greater part of Peloponnesus; and the common tale that the Dorians crossed over from Naupactus to the conquest is in accordance with the legend of their being the inhabitants of the northern shore of the gulf.

An account of the conquest of Peloponnesus by the Dorians, which is said to have taken place under the guidance of the Heracleidae, is related elsewhere. (*Dict. of Biogr.* art. *Heracleidae*.) In the historical period the whole of the eastern and southern parts of Peloponnesus were in the possession of Dorians. Beginning with the isthmus of Corinth, there was first Megara, whose territory extended north of the isthmus from sea to sea; next came Corinth, and to its west Sicyon; south of these two cities were Phlius and Cleonae: the Argolic peninsula was divided between Argos, Epidaurus, Troezen, and Hermione,—the last of which, however, was inhabited by Dryopes, and not by Dorians. In the Saronic gulf Aegina was peopled by Dorians. South of the Argive territory was Laconia, and to its west Messenia, both ruled by Dorians: the river Neda, which separated Messenia from Triphylia, included under Elis in its widest sense, was the boundary of the Dorian states on the western side of the peninsula. The districts just mentioned are represented in the Homeric poems as the seats of the great Achaean monarchies, and there is no allusion in these poems to any Doric population in Peloponnesus. In fact the name of the Dorians occurs only once in Homer, and then as one of the many tribes of Crete. (*Od.* xix. 177.) The silence of Homer is to us a con-

Digitized by Google

vincing proof that the Dorian conquest of Peloponnesus must have taken place subsequent to the time of the poet, and consequently must be assigned to a much later date than the one usually attributed to it.

From the Peloponnesus the Dorians spread over various parts of the Aegaean and its connected seas. Doric colonies were founded in mythical times in the islands of Crete, Melos, Thera, Rhodes, and Cos. About the same time they founded upon the coast of Caria the towns of Cnidus and Halicarnassus: these two towns, together with Cos and the three Rhodian towns of Lindus, Ialysus, and Camirus, formed a confederation usually called the Doric Hexapolis. The members of this hexapolis were accustomed to celebrate a festival, with games, on the Triopian promontory near Cnidus, in honour of the Triopian Apollo; the prizes in those games were brazen tripods, which the victors had to dedicate in the temple of Apollo; and Halicarnassus was struck out of the league, because one of her citizens carried the tripod to his own house instead of leaving it in the temple. The hexapolis thus became a pentapolis. (Herod. i. 144.)

The Doric colonies founded in historical times are enumerated under the names of the countries which founded them. Corinth, the chief commercial city of the Dorians, colonised Corcyra, and planted several colonies on the western coast of Greece, of which Ambracia, Anactorium, Leucas, and Apollonia were the most important. Epidamnus, further north, was also a Doric colony, being founded by the Corcyraeans. In Sicily we find several powerful Doric cities:—Syracuse, founded by Corinth; the Hyblaean Megara, by Megara; Gela, by Rhodians and Cretans; Zancle, subsequently peopled by Messenians, and hence called Messene; Agrigentum, founded by Gela; and Selinus, by the Hyblaean Megara. In southern Italy there was the great Doric city of Tarentum, founded by the Lacedaemonians. In the eastern seas there were also several Doric cities:—Potidaea, in the peninsula of Chalcidice, founded by Corinth; and Selymbria, Chalcedon, and Byzantium, all three founded by Megara.

The history of Doris Proper is of no importance. In the invasion of Xerxes it submitted to the Persians, and consequently its towns were spared. (Herod. viii. 31.) Subsequently, as we have already seen, they were assisted by the Lacedaemonians, when attacked by the more powerful Phocians and neighbouring tribes. (Thuc. i. 107, iii. 92.) Their towns suffered much in the Phocian, Aetolian, and Macedonian wars, so that it was a wonder to Strabo that any trace of them was left in the Roman times. (Strab. ix. p. 427.) The towns continued to be mentioned by Pliny (iv. 7. s. 13; comp. Müller, *Dorians*, book i. c. 2; Leake, *Northern Greece*, vol. ii. p. 90, seq.).

DORIS. Pliny (v. 28) says, "Caria mediae Doridi circumfunditur ad mare utroque latere ambiens," by which he means that Doris is surrounded by Caria on all sides, except where it is bordered by the sea. He makes Doris begin at Cnidus. In the bay of Doris he places Leucopolis, Hamaxitus, &c. An attempt has been made elsewhere to ascertain which of two bays Pliny calls Doridis Sinus. [CERAMEICUS.] This Doris of Pliny is the country occupied by the Dorians, which Thucydides (ii. 9) indicates, not by the name of the country, but of the people: "Dorians, neighbours of the Carians." Ptolemy (v. 2) makes Doris a division of his Asia, and places in it Halicarnassus, Ceramus, and Cnidus. The term Doris, applied to a part of Asia, does not appear to occur in other writers. [G. L.]

DORISCUS (Δορίσκος), a coast town of Thrace, in a plain west of the river Hebrus, which is hence called the plain of Doriscus (Δορίσκου πεδίον). During the expedition of Darius the place was taken and fortified by the Persians; and in this plain Xerxes reviewed his forces before commencing his march against Greece. In the time of Livy it appears to have been only a fort — *castellum* (Herod. v. 98; vii. 25, 59, 105; Steph. B. *s. v.*; Liv. xxxi. 16; Plin. iv. 18; Pomp. Mel. ii. 2). The neighbourhood of Doriscus is now called the plain of *Romiglí*. [L. S.]

DO'RIUM (Δώριον), a town of Messenia, celebrated in Homer as the place where the bard Thamyris was smitten with blindness, because he boasted that he could surpass the Muses in singing. (Hom. *Il.* ii. 599.) Strabo says that some persons said Dorium was a mountain, and others a plain: but there was no trace of the place in his time, although some identified it with a place called Oluris (Ὄλουρις) or Olura (Ὄλουρα), in the district of Messenia named Aulon. (Strab. viii. p. 350.) Pausanias, however, places the ruins of Dorium on the road from Andania to Cyparissia. After leaving Andania he first came to Polichne; and after crossing the river Electra and Coeus, he reached the frontiers of Achaia and the ruins of Dorium. (Paus. iv. 33. § 7.) The plain of *Sulimá* appears to be the district of the Homeric Dorium. (Leake, *Morea*, vol. i. p. 484; Curtius, *Peloponnesos*, vol. ii. p. 154.)

DORO'STOLUM. [DUROSTORUM.]

DO'RTICUM (Δορτικόν), a town of Mysia, situated to the northwest of the mouth of the river Timaeus. It is identified with the modern *Ieni*, near Blasca. (Ptol. iii. 9. § 4; Procop. *De Aed.* iv. 6; Itin. Ant. 219; Geogr. Rav. iv. 7, where it is erroneously called *Clorticum*.) [L. S.]

DORUS. [DORA.]

DORYLAEUM (Δορύλαιον: *Eth.* Δορυλαεύς, Dorylensis), a town in Phrygia. Steph. B. (s. v.) names it Dorylaeium (Δορυλάειον), and observes that Demosthenes calls it Dorylaeum. Strabo (p. 576) also calls it Dorylaeum. Meineke (ad Steph. B. *s. v.* Δορυλάειον) has a note on the orthography of the word and the passage of Eustathius (ad *Dionys. Perieg.* 815). But it is doubtful if he is right in correcting the text of Eustathius, which as it stands, makes also a form Δορύλλειον, and so it stands in some editions of Ptolemy (v. 2), who mentions it as a city of Phrygia Magna in his division of Asia. Meineke conjectures the Demosthenes that Stephanus cites to be the Bithynian, and that he used the form Dorylaeum to suit his metre. The Latin form in Pliny (v. 29) is Dorylaeum, Dorylaeon, or Doryleum; doubtful which. The coins, which are only of the imperial period, have the epigraph Δορυλαέων. Dorylaeum is *Eski-shehr* (Leake, *Asia Minor*, p. 18), which "is traversed by a small stream, which at the foot of the hills joins the Pursak, the ancient Thymbres: this river rises to the south of *Kutáya*, passes by that city, and joins the Sangarius, a four hours to the north-east of *Eski-shehr*." The hot baths of *Eski-shehr* are mentioned by Athenaeus, and the water is described as being very pleasant to drink (ii. p. 43). There were ancient roads from Dorylaeum to Philadelphia, to Apameia Cibotus, to Laodiceia Combusta and Iconium, to Germa, and to Pessinus: "a communication which (their remote extremities being nearly certain) will not apply to any point but *Eski-shehr*, or some

Digitized by Google

ther in its immediate neighbourhood." (Leake.) Dorylaeum is in an extensive plain. The remains of antiquity do not appear to be of any note.

The origin of Dorylaeum is not known. The name occurs in the wars of Lysimachus and Antiochus (Diod. xx. 108), whence we may conclude that the place is older than the time of Alexander. Lysimachus made an entrenched camp at Dorylaeum, which place had abundance of corn and other supplies, and a river flowing by it." The Dorylenses were among those who joined in the prosecution against L. Flaccus, who was praetor of the province Asia (B.C. 62), and who was accused of maladministration. Cicero, who defended him, calls these Dorylenses "pastores" (*pro Flacc.* c. 17), from which we may collect that there was sheep feeding about Dorylaeum then as there is now. The roads from Dorylaeum and its position show that it must always have been an important town during the Roman occupation of Asia; and it was a flourishing place under the Greek empire. [G. L.]

DO'SARON (Δωσάρων), a river of India which discharges itself into the Sinus Gangeticus at 141° long., and 17° 4′ lat. (Ptol. vi. 1); and has been identified with the *Maha-Nadi*. (Comp. Gosselin, *Géographie des Anciens*, vol. iii. pp. 215, 216, 255, 256.) [E. B. J.]

DOTHAN (Δωθαείμ), a town of Palestine. mentioned in the history of Joseph (*Gen.* xxxvii. 17) and of Elisha (2 *Kings*, vi. 13). From the former it appears to have been on the high road between Gilead and Egypt. It is mentioned in the book of Judith in connection with Bethulia, over against Esdraelon, toward the open country (iv. 6); and it is clear, from vii. 4, that it must have been in the mountains bordering the plain of Esdraelon on the south. Consistently with this, Eusebius places it 12 miles to the north of Samaria (*Sebaste*) (*Onomast. s. v.*), where a village of the name *Dotân* still exists, a little to the east of the *Nablûs* road, south-west of *Jenin*. (Schultz, in Williams, *Holy City*, vol. ii. p. 469.) [G. W.]

DOTIUM, town. [Dotius Campus.]

DOTIUS CAMPUS (τὸ Δότιον πεδίον), the name of a plain in Pelasgiotis in Thessaly, situated south of Ossa, along the western side of the lake Boebeis. It is mentioned as the earliest seat of the Centaurs. (Strab. i. p. 61, ix. p. 442; Plut. *Quaest. Graec.* 13.) Hesiod speaks of "twin hills in the Dotian plain opposite to the vine-bearing Amyrus," said to have been the dwelling-place of Coronis, mother of Aesculapius by Apollo, who put her to death because she had favoured Ischys, son of Elatus. (Hesiod, *ap. Strab.* ix. p. 442, xiv. p. 647; comp. Hom. *Hymn.* xv.; Callim. *Hymn. in Cer.* 25.) Leake identifies this double hill of Hesiod with a very remarkable height, rising like an island out of the plain, about four miles in circumference, and having two summits connected by a ridge: between them is a village called *Petra*, from which the hill derives its name. The north-eastern summit of the hill is surrounded by foundations of Hellenic walls of remote antiquity. We learn from Pindar that a town on this hill was called Lacereia (Λακερεία, Pind. *Pyth.* iii. 59), to which, however, later writers give the name of Dotium (Steph. B. s. v. Δότιον; Plin. iv. 9. s. 16). (Leake, *Northern Greece*, vol. iv. pp. 420, 447, 451.)

DOURUS, in Ireland, mentioned by Ptolemy as flowing into the Western Ocean between the Senus (Shannon) and the Iernus (*Kenmare*). This makes it, in all probability, the river which falls into *Dingle Bay*. [R. G. L.]

DRABESCUS (Δραβήσκος, Strab. vii. p. 331; Steph. B.), a place where the Athenian colonists of Amphipolis were defeated by the Thracian Edoni. In the Peutinger Table (Daravescus) it is marked 12 M. P. to the NW. of Philippi, a situation which corresponds with the plain of *Dhráma*. The plain of Drabescus is concealed from Amphipolis by the meeting of the lower heights of Pangaeum with those which enclose the plain to the NE. Through this strait the '*Anghista* makes its way to the lake; and thus there is a marked separation between the Strymonic plain and that which contains Drabescus and Philippi. (Leake, *Northern Greece*, vol. iii. p. 183.) [E. B. J.]

DRACO (Δράκων), a small river which enters the southern side of the bay of Astacus, in the Propontis. It runs from the high land north of the lake Ascania, near Nicaea, and enters the sea at the promontory of *Dil*, and near Helenopolis (*Eresk*). The Draco is a rapid river, with a winding course, which by its alluvium has formed the *Dil*. (Procop. *de Aedif.* v. 2.) Leake observes (*Asia Minor*, p. 10):—"In riding from the *Dil* to *Kisderveût* (on the road to Nicaea, *Izmik*), I remarked that we traversed the river about twenty times, without being aware that Procopius has made precisely the same remark with regard to the Draco." [G. L.]

DRACO MONS. [Tmolus.]

DRAHO'NUS, a small river, now the *Drone* or *Traun*, which flows into the Mosella (*Mosel*) at *Neumagen*, the ancient Neomagus. *Neumagen* is in the circle of *Trier*. The Drahonus is mentioned by Ausonius:—

"Praetereo exilem Lesuram tenuemque Drahonum." (*Id.* x. *Mosella*, v. 365.) [G. L.]

DRANGIA'NA (Δραγγιανή, Strab. xi. p. 516, xv. p. 723; Ptol. vi. 19. § 1; Δράγγη, Strab. xi. p. 514; Δραγγική, Diod. xvii. 81, xviii. 3; Drangiana, Amm. Marc. xxiii. 6), a district at the eastern end of the modern kingdom of Persia, and comprehending part of the present *Sejestan* or *Seistan*. It was bounded on the N. by Aria, on the E. by Arachosia, on the S. by Gedrosia, and on the W. by Carmania. Its inhabitants were called Drangae (Δράγγαι, Arrian, *Anab.* iii. 28; Strab. xv. pp. 721, 723, 724; Plin. vi. 23. s. 25), or Zarangae (Plin. *l. c.*; Ζαραγγοί, Arrian, vi. 17; Ζαραγγαῖοι, Arrian, iii. 25; also called Ζαράγγαι, Herod. iii. 93, 117, vii. 67; Δαράνδαι, Ptol. vi. 9. § 3). The name is derived by M. Burnouf (*Comment. sur le Yaçna*, p. xcviii.) from *Zarayo*, a Zend word meaning sea, and might therefore signify those who dwelt on or near the sea or lake now *Zarah*, which undoubtedly retains its Zend name. (Comp. Wilson, *Ariana*, p. 152, 153.) Herodotus describes the Sarangae in the army of Xerxes as conspicuous for the dress they wore, dyed garments, boots which reached half up their legs, and bows and Median darts.

Drangiana was conquered by Alexander (Arrian iii. 28; Diod. xvii. 78), and united with the adjacent provinces under one satrap. At first Menon is mentioned as satrap of Arachosia (and therefore probably of Drangiana, as the two provinces were conquered in succession, Arrian, iii. 28); then, on the distribution of Alexander's empire among his generals, it fell to the lot of Stasanor of Solus, together with Aria. (Diod. xviii. 3; Justin, xiii. 4.) Lastly, it was given by Antipater to Stasander of Cyprus, with Aria, Stasanor having been removed

Digitized by Google

to the satrapy of Bactria and Sogdiana. (Diod. xviii. 39.) The district was mountainous towards the eastern or Arachosian side, but to the W. was one great sandy plain, analogous to the adjoining country of Carmania or *Kirman*. Its chief, indeed only, rivers were the Erymandrus or Etymandrus, Erymanthus (now *Elmend*), and Pharnocotis (now *Ferrah-Rud*). It has one lake of some size on the northern border, adjoining Aria, and named, from it, Aria Lacus (*Zarah*). [ARIA LACUS.] Besides the Drangae, some other tribes appear to have dwelt in Drangiana: as, the Ariaspae, who occupied a town called Ariaspe, on the southern end of the land towards Gedrosia; the Euergetae (probably a section of the last-named tribe), who possessed a territory called Tatacene and Batrii. The population appears to have mainly belonged to the same race as their neighbours, the people of Ariana, Arachosia, and Gedrosia. The capital of Drangiana was Prophthasia (perhaps the modern *Furrah;* Wilson, *Ariana*, p. 154). The actual capital of *Seistan* is *Dushak*, probably the *Zarang* of the early Mohammedan writers, which was evidently by its name connected with Drangiana. In the Persian cuneiform inscription at Behistun the country is called *Zasaka*. (Rawlinson, *Mem.* p. 1.) [V.]

DRAU'DACUM, a fortress belonging to the Penestae, which was taken by Perseus in the campaign of B. C. 169. (Liv. xliii. 19.) It has been identified with *Dardis* near *Elbasán*. [E. B. J.]

DRAVUS, DRAVIS (Δράβος, Δάρος: *Drau*), one of the chief tributaries of the Danube. Its sources are in the Norican Alps, on the Rhaetian frontier near the town of Aguntum (*Inichen*). It then flows through Noricum and Pannonia, and after receiving the waters of its northern tributary, the Murius, it empties itself into the Danube below Carpis. It is possible therefore that the river Carpis mentioned by Herodotus (iv. 49) as a tributary of the Danube, is no other than the Dravus. Strabo (vii. p. 314) represents the Dravus as flowing into the Noarus, a river altogether unknown, and then as emptying itself with this Noarus into the Ister. (Comp. Plin. iii. 28; Flor. iv. 12; Jornand. *De Regn. Succ.* 39; Paul. Diac. ii. 13; Ptol. ii. 16. § 2.) The current is very rapid, whence Pliny calls it *violentior*. [L. S.]

DREPANE, DREPANUM. [HELENOPOLIS.]

DRE'PANUM, a promontory of Achaia. [ACHAIA, p. 13, a.]

DRE'PANUM or DRE'PANA (τὸ Δρέπανον, Ptol., Diod. xxiii. 9, but τὰ Δρέπανα, Pol.; Steph. B.; Dionys.; Diod. xxiv, &c., and this seems the best authenticated form: *Eth.* Drepanitanus: *Trapani*), a city of Sicily, with a promontory and port of the same name, at the NW. extremity of the island, immediately opposite to the Aegates. The city did not exist until a comparatively late period, but the port and promontory are mentioned in very early times: the latter evidently derived its name from the resemblance of its form to that of a sickle (δρεπάνη), whence late mythographers described it as the spot where the sickle of Cronus or Saturn was buried. (Serv. *ad Aen.* iii. 707; Tzetz. *ad Lycophr.* 869.) The port was only a few miles from the foot of Mt. Eryx, and hence it is mentioned in connection with the Trojan legends that were attached to this part of Sicily. Virgil makes it the scene of the death of Anchises, and of the funeral games celebrated by Aeneas in his honour. (Virg. *Aen.* iii. 707, v. 24, &c.; Dionys. i. 52; Serv. *ad Aen. ll. cc.*) But with this exception we find no mention of the name previous to the First Punic War: it probably served as a port to the neighbouring city of Eryx, and was a dependency of that place [ERYX]; but in the earlier part of the war just named (about B. C. 260) the Carthaginian general Hamilcar proceeded to fortify the promontory of Drepanum, and founded a town there, to which he transferred a great part of the inhabitants of Eryx. (Diod. xxiii. 9, Exc. H. p. 503; Zonar. viii. 11.) Hence the statement of Florus (ii. 2) and Aurelius Victor (*de Viris Illustr.* 39), both of whom mention Drepanum among the cities of Sicily taken by the dictator Atilius Calatinus at an earlier period of the war, must be erroneous. The result proved the wisdom of the choice; from the goodness of its harbour, and its proximity to Africa, Drepana became a place of great importance, and continued throughout the remainder of the war to be one of the chief strongholds of the Carthaginians. In B. C. 250, indeed, Drepana and Lilybaeum were the only two points in the island of which that people retained possession; and hence the utmost importance was attached by them to their maintenance. (Pol. i. 41; Zonar. viii. 16.) During the long protracted siege of Lilybaeum by the Romans, it was at Drepana that Adherbal established himself with the Carthaginian fleet, to watch the operations of the besiegers, and it was off this port that he totally defeated the Roman consul P. Claudius, and destroyed almost his whole fleet, B. C. 249. (Pol. i. 46, 49—51; Diod. xxiv. 1, Exc. H. p. 507.) Not long after this, when Hamilcar Barca made himself master of the city of Eryx, he removed all the remaining inhabitants from thence to Drepana, which he fortified as strongly as possible, and of which he retained possession till the end of the war. It was, however, in B. C. 242 besieged by the Roman consul Lutatius Catulus; and it was the attempt of the Carthaginians under Hanno to effect its relief, as well as that of the army under Hamilcar, that brought on their fatal defeat off the islands of the Aegates, B. C. 241. (Pol. i. 59, 60; Diod. xxiv. 8, 11, Exc. H. p. 509; Zonar. viii. 17; Liv. xxvii. 40.)

From this time the name of Drepana appears no more in history, but it seems to have continued to be a flourishing commercial town, though apparently eclipsed by the superior prosperity of the neighbouring Lilybaeum, which throughout the Roman period was the most considerable city in this part of Sicily. Cicero and Pliny both mention it as a maritime town; and the Itineraries and Tabula prove that it still retained its name and consideration in the fourth century of the Christian era. (Cic. *Verr.* iv. 17. Plin. iii. 8. s. 14; Ptol. iii. 4. § 4; *Itin. Ant.* pp. 91, 97; *Tab. Peut.*) The modern city of *Trapani* has succeeded to the ancient importance of Lilybaeum, and is now the most populous and flourishing city in the west of Sicily, as well as a strong fortress. Great part of its wealth is derived from the manufacture and export of coral, of which there are extensive fisheries on the coast: these are alluded to by Pliny as already existing in his time (xxxii. 2. s. 11). Some vestiges of the ancient mole are the only remains of antiquity which it presents; but the site is undoubtedly the same with that of the ancient city, upon a low sandy peninsula, which has been artificially converted into an island by the ditch of the modern fortifications. (Smyth's *Sicily*, pp. 237—241; Parthey, *Wanderungen durch Sicilien*, p. 75, &c.) Immediately off the harbour of *Trapani* is a small island called *Colombara*, which appears to have been known in ancient times also as Colom-

Digitized by Google

ria Insula. It is mentioned by Zonaras (viii. 61) under the name of Πελειὰς νῆσος. [E. H. B.]

DRE'PANUM (τὸ Δρέπανον ἄκρον, Ptol. iv. 5. 14), a promontory on the eastern coast of Egypt forming one boundary of the Bay of Heroöpolis or W. branch of the Red Sea. There is, however, some difference in the statement of the ancient geographers with regard to its position. Ptolemy describes it, as above, in about lat. 28° N.; if so, Drepanum was exactly opposite to the S. extremity of the rocky Arabia, whereas Pliny (*N. H.* vi. 29. § 34) says it nearly six degrees further to S., between Myos-Hormos and Berenice, or lat. 22° N. Drepanum, like other similarly named headlands, derived its appellation from its semicircular form,—a reaping-hook. It was a projection of the limestone and sandstone hill-barrier of the Delta and Heptanomis on the E. The seaward termination of the modern mountain *El-Garîb* probably represents this ancient headland. [W. B. D.]

DRE'PANUM (τὸ Δρέπανον ἄκρον), a promontory on the NW. coast of Crete, which Ptolemy (iii. 17. § 5) describes as following the headlands Corycus Sacrum and Cyamum. There has been some difficulty in fixing the position, as there is no other ancient authority than this intimation of Ptolemy. Pashley (*Creta*, vol. i. p. 385) has placed it at the modern *Akrotéri*, but is in error, as there can be no doubt but that it is represented by the headland of *Drépano* further to the W. (Pashley, *Trav.* vol. i. p. 45.) [E. B. J.]

DREPSA. [Bactriana, p. 365, a.]

DRE'SIA (Δρεσία: *Eth.* Δρεσιεύς), called a city of Phrygia by Steph. B. (*s. v.*), who quotes the third book of the *Bassarica* of Dionysius, Βοῦδειαν Δρεσίην τε καὶ εὐμελίδεα γαῖαν. Nonnus, in his Dionysiaca, mentions it with the Obrimus, a branch of the Maeander. [Maeander.] [G. L.]

DRICCA, a river of Dacia which Jornandes (*de Reb. Get.* 34) places near the Tyras (comp. Geog. Rav.), but which, in the absence of further information, it is difficult to identify. [E. B. J.]

DRILAE (Δρίλαι), "a village in Pontus, not far from Trapezus, as Xenophon says in the fifth book of the *Anabasis*." (Steph. B. *s. v.*) Xenophon (Anab. v. 2. § 14), with his men, made an incursion into the country of the Drilae, which was mountainous and difficult of access. The Drilae were, he says, the most warlike people on the Pontus. They are mentioned by Arrian in his *Periplus* (p. 11), where the name is written Drillae. In the MSS. of Ephorus it is Drylae (Δρύλαι); but this is probably a copyist's error. [G. L.]

DRILO (Δρίλων, Ptol. ii. 16. § 5; Plin. iii. 22; Theophrast. *H. P.* ix. 7; Nicand. *Ther.* 607: *Drin*), a river of Illyricum which was navigable as far as the territory of the Dardanii. (Strab. vii. p. 316.) Julius Sequester (*Fluss.* 9; comp. Anna Comn. p. 71), who gives it the name of Drinius, is right in stating that its sources are to be found in the Lake Lychnitis. The Black *Drin* is the outlet for Lake Lychnis, and is joined by the White *Drin* at *Scheiasa Kipru*; the united waters discharge themselves into the sea at Lissus (*Leach*). (Leake, *Northern Greece*, vol. i. p. 77, vol. iii. p. 477.) [E. B. J.]

DRINUS (Δρεῖνος: *Drina*), a tributary of the Save (*Sava*), has its sources on mount Scordus, whence it flows in a northern direction, forming the boundary between Illyricum and Moesia, and falls into the Danube a little to the west of Sirmium. (Ptol. ii. 17. § 7.) [L. S.]

DRIUM. [Garganus.]

DROMISCUS, an island which Pliny (ii. 89) mentions with Perne as having been joined to Miletus, by the alluvium of the Maeander, we may suppose. The name does not appear to occur elsewhere. [G. L.]

DROMOS ACHILLIS. [Achilleos Dromos.]

DRO'PICI. [Persis.]

DRUBE'TIS (Δρουβητίς, Ptol. iii. 8. § 10), the first station (*Peut. Tab.*) on the Roman road which ran from Egeta in a NW. direction to Apala in Dacia. It has been identified with *Drivicza*. (Katanchsich, *Orb. Ant.* vol. i. p. 379.) [E. B. J.]

DRUE'NTIA (ὁ Δρουεντίας, ὁ Δρουέντιος: *Durance*). Ausonius (*Id.* x. *Mosella*, v. 479) makes the name feminine. Silius Italicus (iii. 478) makes it masculine:—

"Turbidus hic truncis saxisque Druentia laetum
Ductoris vexavit iter; namque Alpibus ortus,
Avulsas ornos et adesi fragmina montis
Cum sonitu volvens, fertur latrantibus undis," &c.

Strabo (p. 203) says of the Druentia: "Above, in certain hollow places, a great lake is formed, and there are two springs not far from one another, from one of which flows the Druentias, a torrent river, which has a rapid descent to the Rhodanus; and the Durias runs in the opposite direction, for it joins the Padus, flowing down through the country of the Salassi into Celtica south of the Alps." Strabo is mistaken about this Durias or Doria Minor (*La Doria Riparia*), for it is the other Doria which flows through the country of the Salassi. Two streams rise on *Mont Genèvre* near one another; one is the *Durance*, and the other is the *Doria*. The *Durance* is joined by a larger stream called *La Claire*. The river flows from *Briançon*, with a general southern course, past *Embrun* and *Sisteron*, as far as the junction of the *Verdon*. It then forms a curve, and runs W. by N. past *Cavaillon* (Cabellio), and joins the *Rhone* a little below *Avignon*. The lower part of the course is full of small islands. It is a rapid river, and subject to inundations. Though not navigable, it is used for floating timber down. Silius Italicus has well described this turbulent river. It has been inferred from an expression in the Notitia Imp., where a "Praefectus Classis Barcariorum Ebruduni Sapaudiae" is mentioned, and from an inscription in Gruter (pp. 413, 414), where "Patronus Nautarum Druenticorum et Utriclariorum" is mentioned, that the river was navigated in the time of the later empire. But the navigation could not be more than a boat navigation, and for a short distance. As to the Utricularii, see Cabellio.

Livy (xxi. 31) mentions the Druentia, and Pliny (iii. 4) as a rapid river. [G. L.]

DRUNA (*Drome*), a river of Gallia Narbonensis, which joins the *Rhone* on the left bank below *Valence*, and gives name to the department of *Drome*. Ausonius (*Id.* x. *Mosella*, v. 479) mentions the Druna:—

"Te Druna, te sparsis incerta Druentia ripis
Alpinique colent fluvii." [G. L.]

DRUSIPARA, DRUZIPARA, DRUZIPERA (Δρουσίπαρα, Δρυζίπαρος), a town in Thrace, situated somewhere on the river Melas, but its exact site is unknown. (Ptol. iii. 11. § 13; It. Ant. 230; Geogr. Rav. iv. 6; Suid. *s. v.* Δρυζίπαρος). [L. S.]

DRYAENA (Δρύαινα: *Eth.* Δρυαινίτης). Steph. B. (*s. v.*) mentions it as a city of Cilicia, afterwards called Chrysopolis; and in another place (*s. v.*

Digitized by Google

Χρυσόπολις) he quotes the *Polyhistor* as his authority. [G. L.]

DRYMAEA (Δρυμαία, Paus.; Δρύμος, Herod.; Δρυμία, Steph. B.; Drymiae, Liv.), a frontier town of Phocis, on the side of Doris, whence it is included in the limits of Doris by Livy. It was one of the Phocian towns destroyed by the army of Xerxes. Pausanias describes it as 80 stadia from Amphicleia: but this number appears to be an error of the copyists, since in the same passage he says that Amphicleia was only 15 stadia from Tithronium, and Tithronium 15 stadia from Drymaea, which would make Drymaea only 35 stadia from Amphicleia. He also speaks of an ancient temple of Demeter at Drymaea, containing an upright statue of the goddess in stone, in whose honour the annual festival of the Thesmophoria was celebrated. Its more ancient name is said to have been Nauboleis (Ναυβολεῖς), which was derived from Naubolus, an ancient Phocian hero, father of Iphitus. (Hom. *Il.* ii. 518.) According to Leake the site of Drymaea is indicated by some ruins, situated midway between *Kamáres* and *Glúnista*, and occupying a rocky point of the mountain on the edge of the plain. "Some of the towers remain nearly entire. The masonry is generally of the third order, but contains some pieces of the polygonal kind; the space enclosed is a triangle, of which none of the sides is more than 250 yards. At the summit is a circular acropolis of about two acres, preserving the remains of an opening into the town" (Herod. viii. 33; Paus. x. 3. § 2, x. 33. § 11; Liv. xxviii. 7; Plin. iv. 3. s. 4; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. pp. 73, 87.)

DRYMUS. 1. In Phocis. [DRYMAEA.]

2. In Attica. [ATTICA, p. 329, b.]

3. A spot in Euboea, at the foot of Mt. Telethrius, near Oreus. (Strab. x. p. 445.)

DRYMUSSA. [CLAZOMENAE.]

DRYNAE'METUM (ὁ Δρυναίμετος), a place in that part of Asia called Galatia, which the Galli occupied. Strabo (p. 567) says that the council of the twelve tetrarchs, consisting of 300 men, used to meet at Drynaemetum. The first part of the word may be Gallic, and the second seems to contain the same element as the names Nemetocenna, or Nemetacum, Nemausus, and Nemossus in Gallia. [G.L.]

DRY'OPES (Δρύοπες), one of the aboriginal tribes of Greece. Their earliest abode is said to have been on Mount Oeta and its adjacent valleys, in the district called after them, Dryopis (Δρυοπίς.) The Dorians settled in that part of their country which lay between Oeta and Parnassus, and which was afterwards called Doris [DORIS]; but Dryopis originally extended as far north as the river Spercheius. The name of Dryopis was still applied to the latter district in the time of Strabo, who calls it a tetrapolis, like Doris. (Herod. i. 56, viii. 31; Strab. ix. p. 434.) Heracles, in conjunction with the Malians, is said to have driven the Dryopes out of their country, and to have given it to the Dorians; whereupon the expelled Dryopes settled at Hermione and Asine in the Argolic peninsula, at Styrus and Carystus in Euboea, and in the island of Cythnus. These are the five chief places in which we find the Dryopes in historical times. (Herod. viii. 43, 46, 73; Diod. iv. 57; Aristot. *ap. Strab.* viii. p. 373; Paus. iv. 34. § 9, seq., v. 1. § 2.) Dicaearchus (v. 30, p. 459, ed. Fuhr) gives the name of Dryopis to the country around Ambracia, from which we might conclude that the Dryopes extended at one time from the Ambraciot gulf to Mount Oeta and the Spercheius. (Müller, *Dorians*, book i. c. 2; Grote, *Hist. of Greece*, vol. ii. p. 384.)

DRYS (Δρῦς), a town in Thrace of uncertain site (Scyl. p. 27; Steph. B. *s. v.*; Suid. *s. v.*) [L.S.]

DUBIS (Δοῦβις; *Doubs*), a branch of the Arar (*Saône*), a river of Gallia. This river is called Dubis by Ptolemy (ii. 10. § 2) and Strabo (p. 193); but in Caesar (*B. G.* i. 38) it is Alduasdubis, according to many MSS. Some MSS. have *Ald* or *Ald* in the first syllable instead of *Ald.* (Schneider's Caesar, *B. G.* p. 80.) The name has been altered to Dubis by most editors of Caesar, contrary to the MSS., in order to make the orthography agree with that of Strabo and Ptolemy. Caesar describes the Alduasdubis as nearly surrounding Vesontio (*Besançon*). A French writer, mentioned by Dunod, supposes that Alduasdubis is compounded of the names of two rivers, one of which he names Ald, and he says that it joins the *Doubs* below Montbéliard. D'Anville found in his maps a stream near *Porentrui* named *Hallen* or *Allen*. There is nothing strange in the name Alduasdubis being shortened into Dubis.

Strabo (p. 186) says that the Arar (Saône) rises in the Alps, and also the Dubis, a navigable river, which joins the Arar. He extends the name Alps, as it appears, to the Jura; for the *Doubs* rises in the highest parts of the Jura. It first runs N., but near Mont Terrible it suddenly turns W., and has a very irregular course to *Porentrui*; it then has a general SW. course past *Besançon* and *Dole* to its junction with the *Saône*. The whole course of the *Doubs* is above 200 miles; and it is now navigable a considerable distance above *Besançon*.

Strabo seems to have known the position of the Dubis, and yet he makes a mistake twice about the river (p. 192), in making the Dubis one of the boundaries of the Segusiani, and also of the Aedui. He should have written Ligeris in both cases instead of Dubis. [G. L.]

DUBRIS, in Britain, mentioned both in the Itinerary and the Notitia, in the latter as the station of the "Praepositus Militum Tungricanorum." Name for name, and place for place, Dubris = *Dover*.

The Octagon Tower attached to the old church is built chiefly of Roman bricks. How far, however, the materials may be older than the building is uncertain. The tower itself is considered to have been a lighthouse. [R. G. L.]

DULGIBINI (Δουλγούμιοι), a German tribe which, according to Tacitus (*Germ.* 34.) inhabited the country south or south-west of the Angrivarii, whereas according to Ptolemy (ii. 11. § 17) they dwelt further east on the right bank of the Weser. This discrepancy is no doubt the consequence of the migrations among the Germans; and both statements may be correct in regard to the different periods described by the two authorities. [L.S.]

DULI'CHIUM. [ECHINADES.]

DULO'POLIS (Δουλόπολις, Δούλιον πόλις, Hesych.), a city of Crete, which was mentioned by Hecataeus in the first book of his work on Crete (Steph. B. *s. v.*), and was said to have contained a thousand male citizens (Steph. B. *s. v.*). Unfortunately, none of these authorities give any hint which might serve to determine the situation of this city, which, from the singularity of its name, gives rise to tempting conjectures. (Höck, *Kreta*, vol. i. p. 433, vol. ii. p. 34; Pashley, *Trav.* vol. ii. p. 82.) [E. B. J.]

DULO'POLIS. [BUBASSUS.]

DUMNA, an island off North Britain, mentioned

Digitized by Google

by Ptolemy, as lying north of the Promontory Orcas and south of the Orcades. [ORCADES.] [R. G. L.]

DUMNISSUS, a place in Gallia, on the road from Bingium (*Bingen*) to Augusta Trevirorum (*Trier*). The Table gives 16 Gallic leagues from Bingium to Dumnissus, and 8 from Dumnissus to Belginum. Ausonius, in his poem on the Mosella (v. 1, &c.), mentions Dumnissus. After crossing the Nava (*Nahe*), which joins the Rhine at *Bingen*, he speaks of passing through forests without tracks, where there was no sign of human cultivation; and he adds, —

"Praetereo arentem sitientibus undique terris
Dumnissum, riguasque perenni fonte Tabernas."

The route of Ausonius from *Bingen* was through the Hunderück; but the site of Dumnissus is unknown. It is placed by some geographers at *Denzen*, near Kirchberg. Belginum is supposed to be *Belch*, which in fact is the same name. [G. L.]

DUNIUM, in Britain, mentioned by Ptolemy (ii. 3. § 29) as a town of the Durotriges. [R. G. L.]

DUNUM. 1. In Ireland, mentioned by Ptolemy (ii. 2. § 10) as a town of that island.

2. D. SINUS (Δούνου κόλπος), a bay in Britain, mentioned by Ptolemy (ii. 3. § 6). Name for name, and place for place, *Dun-s-ley* Bay, near Whitby, in Yorkshire. [R. G. L.]

DUODECIMUM, AD. 1. Tacitus (*Ann.* iii. 45), in his account of the revolt of Sacrovir, says that the Roman commander Silius marched upon Augustodunum after ravaging the lands of the Sequani, and that Sacrovir "ad Duodecimum lapidem," which seems to mean 12 M. P. from *Autun*, in an open country. Perhaps Tacitus does not mean to speak of Ad Duodecimum as a place. D'Anville concludes that the march of Silius was from Cabillonum (*Chalon*) on the *Saône*, which is likely enough. Cabillonum was on a road from Lugdunum to Augustodunum, and the Antonine Itin. places Cabillonum 33 M. P. from Augustodunum. The site of Sacrovir's defeat cannot be very far from the spot where the Roman proconsul C. Julius Caesar defeated the Helvetii, B. C. 58.

2. DUODECIMUM, AD. [DECEM PAGI.]

3. The Table places a Duodecimum 18 from Noviomagus (*Nymegen*), on the road to Leyden. D'Anville supposes that the 18 is an error, and should be 12, and that the 12 are 12 M. P. Some take the 18 to be M. P., and so the distance would be 13 Gallic leagues. D'Anville merely led by a name, and probably deceived by it, fixes on *Doodenweerd*, on the right bank of the *Waal*, as the place. [G. L.]

DURA. 1. (τὰ Δοῦρα, Polyb. v. 5; Amm. Marc. xx. 5, 6), a fortified castle in Assyria, on the left bank of the Tigris. It still bears the name of *Dûr* or *Dura*. (Lynch, *R. G. I.* vol. ix. p. 447; Layard, *Nineveh and Babylon*, p. 469.)

2. (Δοῦρα, Isid. Char. p. 4; Zosim. iii. 14; Amm. Marc. xxiii. 5), a place in the N. of Mesopotamia, at no great distance from Circesium and the Euphrates, at which, according to Zosimus, the military monument to Gordian was erected. Ammianus differs from him in this, stating that Gordian's tomb was at Zaitha, a few miles distant. Eutropius and Rufus Festus state that the monument was 20 M. P. from Circesium. Zosimus is therefore, in all probability, correct. Isidorus states that Dura was built by the Macedonians, and was called EUROPUS as well as DURA NICANORIS. It may be doubted whether the passage in Polybius (v. 48) does not refer to the Assyrian town of this name. The same remark applies to the reference in Stephanus, who simply refers to the 5th book of Polybius, in which both places are mentioned. [V.]

DURA'NIUS (*Dordogne*), a large river of Gallia, which joins the Garumna (*Garonne*), on the right bank below *Bordeaux*. Ausonius (*Mosella*, v. 464) says of the Duranius, —

"Concedes gelido Durani de monte volutus
Amnis."

The *Dordogne* rises in *Mont Dor*, which seems to have given the river its name. *Mont Dor* is in the department of *Puy de Dome*, and its summit is said to be the highest point of the mountains of central France. The name Duranius appears in the middle ages in various forms; and Dordonia, one of them, is the origin of the name *Dordogne*. [G. L.]

DURDUS (τὸ Δοῦρδον ὄρος), named by Ptolemy as one of the chief mountain ranges of Mauretania Tingitana, appears to be that part of the main chain of Atlas from which the river Malva takes its rise. Its name evidently contains the same root as Dyrin, the native name of the ATLAS. [P. S.]

DURE'TIE. The Table places Duretie 29 Gallic leagues from Portu Namnetum (*Nantes*), on the road to Gesocribate (*Brest*). The next station after Duretie is Dartoritum, which Ptolemy calls Dariorigum. [DARIORIGUM.] The distances in the Table cannot be trusted; and if they can, we must be sure about the direction of the Roman road between *Nantes* and *Vannes* before we can determine the position of Duretie. Some geographers place it at *Roche Bernard*, near the head of the aestuary of the *Vilaine*. D'Anville proposes to alter Duretie to Durerie, and he thinks that the second part of the word contains the word Herius, the name which Ptolemy gives to the *Vilaine*. The first part of the word Duretie is probably the common Celtic name *Dur*. [G. L.]

DU'RIA (Δοῦριας, Strab.: *Dora*), the name of two rivers of Cisalpine Gaul, both of them rising in the Alps, and flowing into the Padus. (Plin. iii. 16. s. 20.) They are commonly called by writers on ancient geography the Duria Major and Duria Minor, but we have no ancient authority for these appellations. Pliny calls them simply "Durias duas;" and Strabo mentions only one river of the name. This is evidently nothing more than the Celtic *Dur* or *Dur*, water; which sufficiently accounts for its double employment. The two streams are now known as the *Dora Baltea* and *Dora Riparia*: the former name is apparently of very early origin, as the geographer of Ravenna in the ninth century calls it "Duria Bantica." (*Geogr. Rav.* iv. 36.)

1. The *Dora Baltea*, which is much the larger of the two streams, has its sources in the Pennine and Graian Alps (*Great* and *Little St. Bernard*), and flows through the great valley of the Salassi (*Val d'Aosta*), receiving on its course numerous tributaries from the glaciers of the Pennine Alps, so that it is one of the most important of the feeders or tributaries of the Padus. It flowed under the walls of Augusta Praetoria (*Aosta*) and Eporedia (*Ivrea*), and joined the Padus about 22 miles from the latter city, and the same distance below Augusta Taurinorum. Strabo, who correctly describes this river as flowing through the country of the Salassians, and turned to much account by that people for their gold-washings [SALASSI], has evidently confounded it with the other river of the same name, where he

Digitized by Google

speaks of it as having its source close to that of the Druentia (*Durance*). (Strab. iv. pp. 203, 205.)

2. The Duria Minor or *Dora Riparia* rises in the Cottian Alps (the *Mont Genèvre*), almost in the same spot with the Druentia; it flows by *Susa* (Segusio), and falls into the *Po* at *Turin* (Augusta Taurinorum). The geographer of Ravenna calls it simply Duria, without any distinctive epithet. Though inferior to the preceding river, it is a large stream, having its source among the high Alps, and being fed by numerous torrents from perpetual snows and glaciers, so that at the point of its junction with the *Po* it is little inferior to that river. [E. H. B.]

DU'RIUS (*ὁ Δούριος* or *Δουρίας*, Strab iii. pp.153, foll., 162; *Δόριος*, Appian, *Hisp.* 72, 90; *Δωρίας*, Ptol. ii. 5. §§ 2, foll., Marc. Heracl. p. 43; *Δώριος*, Dion Cass. xxxvii. 52; Duria, Claudian. *Laud. Seren.* 72: *Duero*), one of the chief rivers of Hispania, rises in M. Idubeda (*Sierra de Urbion*), among the Pelendones, flows W. through the Celtiberi and Vaccaei, and past the cities of Numantia and Seguntia, and falls into the sea between Cale and Langobriga. Its lower course divided Lusitania on the S. from Hispania Tarraconensis on the N. Its whole length was estimated at 1370 stadia, of which 800 stadia, from its mouth upwards, were navigable for large vessels. (Strab. *ll. cc.*; Mela, iii. 1. §§ 7, 8; Plin. iv. 20. s. 34). Its deposits contained gold (Sil. Ital. i. 234). Its chief tributaries were, on the right or N. side, the AREVA, the PISORACA (*Pisuerga*), and the ASTURA (*Esla*); and on the left, the CUDA (Coa). [P. S.]

DURNOMAGUS. [BURNCUS.]

DURNOVARIA, in Britain, mentioned in the 12th and 15th Itineraries, and generally admitted to be, place for place, and (to a certain extent) name for name, the modern *Dor*chester (in the county of *Dorset*, as opposed to the Oxfordshire *Dor*chester). The root *d-r* is a *common* rather than a *proper* name, as is suggested by the fact of its re-occurrence. [DUROBRIVAE.] Definite remains of the old Roman wall have been noticed by Dr. Stukely as still standing "twelve foot thick, made of ragstones, laid side by side and obliquely, then covered over with very strong mortar." Roman coins, which are often found here, are called *Dorn*-pennies. Remains of Roman camps, and probable remains of a Roman amphitheatre, attest the importance of the ancient Durnovaria. [R. G. L.]

DUROBRIVAE, in Kent, mentioned in the second Itinerary as being the second station from London in the direction of *Richborough* (Rutupae), and by general consent fixed at *Rochester*. The prefix *dur*, being one which will reappear, may conveniently be noticed here. It is the Keltic *dwr* = *water*; so that the local names wherein it occurs are the Keltic analogues to the English terms *Water*-ford, Bridge-*water*, &c. Camden has pointed out the following corruptions of the form Durobrivae, viz.: *Durobrovae*, *Durobrevis*, and Civitas *Roibi*, from which comes the Saxon *Hrofe*-ceaster = *Rochester*. In the foundation charter of the cathedral, Rochester is expressly called *Durobrovae*. The Rochester river (*dwr*) is the Medway.

In the third and fourth Itineraries we also find Durobrivae (in all cases, twenty-seven Roman miles from London). This, along with the satisfactory character of the evidence in favour of Rochester, makes the present notice a convenient place for the investigation of *Duro*-levum and *Duro*-vernum. *Durolevum* is the next stage to Rochester in the second Itinerary, and here *Durovernum* is twenty-eight miles from *Durobrivae*. But in the next two Itineraries the distance is only twenty-five. This (as Horsely remarks) makes it necessary to consider Durolevum as lying somewhat out of the direct road.

Now at *Len*-ham (on the river *Len*) we have Roman remains, and so we have at Charing (also on the *Len*). One of these was probably the Roman Duro-*lerum*, or (considering the name of the river, along with the likelihood of that of the station being the same, the chances of confusion between *r* and *n*, and, lastly, the fact of the names *Dera* and *Lena* (q. v.) being actually confused) Duro-*lenum*; a reading already suggested by previous investigators. The present writer, then, fixes *Durolerum* (-*lenum*) on the *Len*, assuming the likelihood of an improved reading, and laying great stress on the name. At the same time, he adds that Newington, Sittingbourne, Milton, and Faversham (all on a different line of road) have found supporters.

Durovernum is generally identified with Canterbury. It is mentioned in the same Itineraries with the other two stations. The river (*dwr*) here is the Stour. Ptolemy's form is Darvenum (*Δαρούενον*).

At Rochester remains of the ancient Durobrivae are sufficiently abundant; e.g. coins of Vespasian, Trajan, Hadrian, Antoninus Pius, M. Aurelius Antoninus, Constantius, and Constantine, fibulae, and pottery.

At Canterbury the evidence is of the same kind; coins being numerous, and there being also traces of the two great Roman roads which led to *Dover* (Dubris) and *Lymne* (Lemanis). [R. G. L.]

DUROBRIVAE, in Britain, to the north of the Thames, and different from the Durobrivae last mentioned. It appears in the fifth Itinerary: and, as the form is Durobriv*as*, we are thus enabled to give the true termination to the word, here as elsewhere, and become justified in dealing with it as a feminine plural in *-ae*. In the Itinerary wherein it appears its place is the seventh on the road from Londinium to Luguvallium (*London* and *Carlisle*). Not one, however, of the six stations that precede it is identified in an absolutely satisfactory manner; although with some of them opinion is nearly unanimous. On the other hand, however, Durobrivae has, as the first station beyond it, Causennae, and, as the second, Lindum,—Causennae being almost certainly *Ancaster*, and Lindum being as unquestioned a locality as any in Britain, = *Lincoln*. Hence, Durobrivae was two stations from *Lincoln*, in the direction of London. The station immediately on the other side was Durolipons, a station which will be dealt with in the present notice, rather than under its own. The fifth Itinerary runs:—

"Itera Londinio Luguvallio ad vallum M. P. ccccxliii.: sic,—

	M.P.
Caesaromago - - -	xviii.
Colonia - - -	xviii.
Villa Faustini - - -	xxiv.
Icianos - - -	xviii.
Camborico - - -	xxiv.
Duroliponte - - -	xv.
Durobrivas - - -	xxiv.
Causennis - - -	xix.
Lindo - - -	xvi.*

&c.

Against Causennae = *Ancaster* the objections are so slight as to make the identification one of the second degree of certainty, at least. Again, the traces of a Roman road, running nearly due north and south of Ancaster (i. e. without any wide compass or

Digitized by Google

deviation), are numerous; and where they occur they are remarkable for the linear character of their direction. This makes any spot 30 Roman miles south of *Ancaster* likely to have been Durobrivae.

The boundary of the counties of *Hunts* and *Northampton*, at the spot where the river *Nene* (which divides them) flows between *Chesterton*, on the *Huntingdonshire*, and *Castor*, on the *Northamptonshire*, side of the river, suits this measurement,—nearly, though not exactly. There is, however, considerable evidence of other kinds in favour of one (or both) of these two places. The names originate in the word *castra*. The village (probably the crossing of the river) is found in Camden and certain old maps as DOBS-*ford*; and DOR-*man-ceaster* is said to have been the Saxon name of it. Roman remains, too, are numerous.

Whether the Huntingdon or the Northamptonshire village was the true *Durobrivae*, is uncertain and unimportant. It may have been both, or neither,—the term Durobrivae applying to the passage (ford, ferry, or bridge) interjacent, rather than to the two towns which defended it.

The present difference in the names is *not* unimportant. The distinction between the Danish and Anglo-Saxon nomenclature, in the case of geographical terms, has of late years commanded the attention of investigators; and it is well known, not only that certain words and forms are Danish, as opposed to Saxon (and *vice versâ*), but that the distribution of such words and forms as local names is remarkably regular. Thus, where one Danish form appears, others do so also; and, although there is no part of the island where Saxon forms are excluded, there are vast tracts where there is nothing Danish.

The Danish equivalent to the Saxon *-tun* is *-by*; as that *Neus-by* = *New-ton*.

The Danish equivalent to the Saxon *sh* is *sk*; so that *Skip*-ton and *Fisker*-ton=*Sk*ipton and Fishtoft.

The Danish *C* = the Anglo-Saxon *ch*,—*C*arlby, as opposed to *Ch*arlton.

The Danish *kirk* = the Anglo-Saxon *church*,—the Danish form generally being initial, the Saxon final; as *Kirk*-by, Dun-*church*.

Lastly (though the list could easily be enlarged), in the districts where the Saxon forms prevail, the metamorphosis of the Roman term *castra* is *-chester* or *-ceaster* (God-man-*chester*, *Chester*-ton, Ciren-*ceaster*, &c.); whereas, where the Danish forms prevail, it is *-caster* (Tad-*caster*, An-*caster*, *Caster*-ton, &c.). There is no exception to this rule of distribution. Now, what takes place in the very spot under consideration? Even this,—that whilst *Lincolnshire* (on the borders of which *Castor* stands) is the most Danish of all the counties of England,—whilst *Northamptonshire* (to which it belongs) is largely Danish,—whilst *Caster*-ton, Ancaster, &c., are the northern transformations of *castra*,—whilst every other Danish shibboleth (*sk*, *kirk*, *-by*, &c.) is rife and common as we advance towards *York*,—the moment we cross the *Nene*, and get into *Huntingdonshire*, *Beds*, and *Cambridgeshire*, the forms are *Chester*, in respect to the particular term *castra*, and exclusively Saxon in all others. No trace of Danish occupancy can be found in *Hunts*; so truly does the *Nene* seem to have been a boundary, and so abrupt was the transition from the Danes who said *castor*, to the Saxons who spoke of the *chester* (*ceastre*). More than this. At some time between the evacuation of the isle by the Romans and the Norman Conquest, the northern and southern defences—for such the castra of *Chester*-ton and *Castor* (details of the *Durobrivae*) were—may have constituted the opposed and hostile parts of a bilingual town; and the analogue between the present Germano-Danish frontier in Sleswick-Holstein may thus have been exhibited in England.

Just as the straight character of the remains of the Roman roads, now existing, between *Lincoln* and *Castor* induced us to draw our line as directly north and south as possible, the physical condition of the country south of *Castor* forbids us to assume any notable deviations either east or west. On the east lie the fenny tracts of *Whittlesea*, *Holme*, and *Ramsey*; and on the west the Oxford-clay tracts of *Hunts*,—tracts which probably were some of the last parts of the island to become occupied. This places Durolipons at God-man-*chester*. "Durolipons," writes Horseley, "has been generally settled at *Godmanchester* or *Huntingdon*. The situation on the north side of the river, and on a gentle descent, favours the opinion of *Huntingdon*,—the name, that of *Godmanchester*; but I believe there has been no Itinerary station at either one or the other." The reasoning of Horseley is more unsatisfactory here than in any other part of his work. He lays no stress whatever on the termination *-chester*. Identifying *Cambridge* with Durolipons, he writes that the "name intimates a bridge over a river, to which the name *Cambridge* is not unsuitable." But he never adds that between *Godmanchester* and *Huntingdon* there is the river *Ouse* and the necessity of a bridge. He continues: "Durobrivae" (which he strenuously urges to have been either *Castor* or *Chesterton*) "is the station next to Durolipons. The distance here is very exact. From Durobrivae to Durolipons, in the Itinerary, is 35 miles, and therefore the number of computed English miles should be nearly 26. For it is 5 miles from *Castor* on the *Nene* to *Stilton*, and 21 from *Stilton* to *Cambridge*, &c." Instead of this "21 miles," the real distance is 28. Hence, the numbers of Horseley, instead of coinciding, disagree. It should, however, be added that they do not come out clear for *Godmanchester*, which is no more than 18 English miles from the *Nene*. Nevertheless, *Godmanchester*, as the equivalent to Durolipons, involves the fewest difficulties. [R. G. L.]

DUROCASSES (*Dreux*). This name appears in the Antonine Itin. in the form Durocasis, and in the Table in the form Durocasio, on a road from Mediolanum Aulercorum, the capital of the Aulerci Eburovices, in Gallia, to Durocasses. Mediolanum is *Evreux*. The Itin. makes 17 Gallic leagues between Mediolanum and Durocasses, or 25½ M. P. *Dreux* is in the department of *Eure et Loir*, on the *Blaise*, a branch of the *Eure*. The place may have been within the territory of the Carnutes. If we compare the form of the word with Baiocasses, Viducasses, Velocasses, it seems probable that Durocasses is properly the name of a tribe. The name Durocasses was shortened to Drocae, and then to *Dreux*. [G. L.]

DUROCATALAUNUM. [CATALAUNI.]

DUROCOBRIVAE, in Britain, mentioned in the second Itinerary as being 12 miles from Verulamium (*St. Albans*), in the direction of Deva (*Chester*). Probably *Dunstable*. [R. G. L.]

DUROCORNOVIUM, in Britain, mentioned in the 13th Itinerary. The locality of *Duro-cornovium* is that of *Ciren-chester*, or the ancient *Corin*-eum. [CORINEUM.] It is 14 miles distant from Glevum (*Glo*-cester), and the military road between the two

Digitized by Google

places is traced at the present time. Where this crosses the *Fosse*-road, *Cirencester* stands, abundant in Roman remains of all kinds.

Name for name, as well as *place for place*, *Durocornovium* = *Corinium*, i. e. *Duro-corn*-ovium is *Corin*-ium in a compound form. The root lies in the name of the present river *Churn*; so that *Corinium* is simply the *Churn*, and *Duro-corn*-ovium is the *Churn*-water. The fact of the Roman towns being synonymous with the rivers on which they stood has already been noticed. [DEVA; DERVENTIO.] [R. G. L.]

DUROCORTORUM (*Reims*), is mentioned by Caesar (*B. G.* vi. 44) as a town of the Remi, the first Belgic people north of the Matrona (*Marne*). It afterwards took the name of the people, Remi, from which comes the modern name *Reims*. Strabo (p. 194), who writes the name Duricortora (Δουρικόρτορα), calls it the metropolis of the Remi, and says that it "receives the Roman governors;" which Walckenaer interprets to mean that it was the residence of the Roman governors of Gallia Lugdunensis. The importance of the position is shown by the great number of Roman roads which ran from Durocortorum to all points of the compass. Ptolemy (ii. 9), who mentions it as the principal town of the Remi, has the form Δουροκόττορον; and Stephanus B. (*s. v.*) has Δοροκόττοροs, with an Ethnic name Δοροκοττόριος. It is probable that the genuine name is given by Caesar and by Strabo; for *Dur* is a common element in Gallic names, both at the beginning and at the end; and the word *Cort* appears also in the names Corterate and Cortoriacum. Coins of Durocortorum are given by Mionnet.

In a fragment of an oration of Fronto (*C. Frontonis Reliquiae*, ed. Niebuhr, p. 271) there are the words "et illae vestrae Athenae Durocorthoro," from which it is inferred that there was a school at Durocortorum, where rhetoric, a favourite study of the Galli, was cultivated. In Ammianus (xv. 11) the place is called Remi, and enumerated among the chief cities of Belgica Secunda. It was made the Metropolis of Belgica Secunda, and became an archiepiscopal see. The beautiful cathedral, in which the French kings were crowned, is said to have been built originally on the site of a Roman temple. Reims is on a stream, as the name implies, the *Vêle*, a branch of the *Aisne*.

Reims contained many edifices of the Roman period, out of the materials of which it is probable that the great churches have been constructed. There is still a triumphal arch, commonly called "L'Arc de triomphe de la porte de Mars," of uncertain date. It consists of three arches with eight Corinthian columns. The central and largest arch is about 37 feet high; the whole is ornamented with bas-reliefs. The rubbish has been cleared away from the arch, and it has undergone some restorations, which do not appear to have improved it. There was another triumphal arch erected by Flavius Constantinus, but it has been destroyed. About 400 paces from the triumphal arch of the gate of Mars is the *Mont-d'Arène*, the form of which shows it to have been an amphitheatre; but there is no evidence that it was ever constructed of stone. It is conjectured that the enclosure was of wood. The cathedral contains a piece of Roman sculpture commonly called the tomb of Jovinus, who attained to the honour of the Roman consulship. The reliefs are said to be in a good style. There are some traces of ancient Thermae at *Reims* in three houses in the *Rue du Cloitre*. Bergier, who wrote on the Roman roads, traced seven which branched out from Reims. The authority for the antiquities of Reims is the *Description Historique et Statistique de la Ville de Reims*, par J. B. F. Gérusez. [G. L.]

DUROLEVUM. [DUROBRIVAE, in *Kent*.]

DUROLIPONS. [DUROBRIVAE, north of the *Thames*.]

DUROLITUM, in Britain, mentioned in the ninth Itinerary as being 15 miles from *London*, in the direction of *Norwich*. Another reading makes the distance 17 miles. The line of this road is probably indicated by the syllable *Strat-* in *Stratford* (east of London). *Leyt*-on or *Leyt*-on-stone = Durolit-um. [R. G. L.]

DURO'NIA, a city of Samnium, mentioned only by Livy (x. 39), who tells us that it was taken by the Roman consul L. Papirius in B. C. 293; and from the amount of booty taken, and number of persons put to the sword, it would seem to have been a considerable town. Its site is supposed by Italian topographers to be occupied by a place called *Civita Vecchia*, 10 miles N. of *Bojano* (Bovianum), and 3 from *Molise*, beneath which flows a small stream said to be still called the *Durone*, a tributary of the *Trigno* or Trinium. (Galanti, *Descr. della Due Sicil.* lib. ix. c. 4: Romanelli, vol. ii. p. 472.) The locality was certainly that of an ancient city, but the evidence to connect it with Duronia is far from satisfactory. [E. H. B.]

DURO'NUM, a town in North Gallia. The Antonine Itin. and the Table place Duronum between Bagacum (*Bavay*) and Verbinum (*Verrins*). The distance from Bagacum to Duronum is 12 Gaulish leagues in the Itin., and 11 in the Table. Both authorities make it 10 from Duronum to Verbinum. The term Duronum indicates a place on a stream, and the place which corresponds to the position in the Itin. is *Estreung la Chaussée*, or *Estrun Cauchie*, as D'Anville writes it. The word *Estrun* is a corruption of Strata, one of the later Roman names for a road, and *Cauchie* or *Chaussée* is a corruption of the late Latin form "Calceia." Before reaching Verbinum there is a place at the passage of the river (now named *Estrée-au-pont*, a clear indication of the direction of the old road. Nothing is known of Duronum; but these remarks of D'Anville are useful in showing what are the indications of ancient roads in France. (D'Anville, *Notice*, &c.) [G. L.]

DURO'STORUM, DURO'STOLUM (Δουρόστορον, Δουρόστολον or -os), a place of Lower Moesia on the southern bank of the Danube. It was an important town and fortress, in which, according to Ptolemy (iii. 10. § 10), the *legio prima Italica* was stationed, while according to others, it was the head-quarter of the *legio XI. Claudia*. Durostorum is also celebrated as the birthplace of Aëtius. (Jornand. *Get.* 43; comp. 115; Amm. Marc. xxvii. 4; Procop. *De Aed.* iv. 7; Hierocl. p. 636; Theophyl. i. 8, v. 9; Itin. Ant. 223; Geogr. Rav. iv. 7.) [L. S.]

DUROTRIGES, in Britain, mentioned by Ptolemy as lying south and west of the Belgae, = Dorsetshire. [R. G. L.]

DUROVERNUM. [DUROBRIVAE, in *Kent*.]

DURVUS MONS. The *St. Immerthal* and the *Münsterthal*, in the canton of *Bern* in Switzerland, are separated by a rocky barrier of the Jura, in which is the cleft through which the road leads from *Biel* to *Bâle* and *Porentruy*. It is supposed by some writers to have been a natural cleft in which the Romans formed their road, as a Roman inscription

Digitized by Google

n the rock shows; but the reading of it is said to e doubtful. The place is called the *Pierre Perse* or Pertuis (Pertusa). According to D'Anville Notice, &c.), the inscription contains the words VIA VCTA PER MONTEM DVRVVM; and he adds that he mountain keeps its name *Durvos*. According to he inscription, a IIVIR COL. HELVET. superintended the work; the colonia is probably Aventicum Avenches). [G. L.]

DYARDANES, a large river of India, mentioned nly by Curtius (viii. 9. § 9). Forbiger conjectures, appily, that it is the same as the *Brahmaputra*, as o other river but it and the Ganges is likely to ave nourished crocodiles and dolphins. Strabo (xv. . 719) gives a similar description of a river called he Ordanes (Οὔδανης), which Grosskurd and others, ithout much reason, have supposed to be the same s the Iomanes of Pliny. [V.]

DYMAE, DYME (Δύμη), a town in the south f Thrace, on the western bank of the river Hebrus, nd not far from its mouth. (Ptol. iii. 11. § 13; Itin. *Ant.* 333; Geogr. Rav. iv. 6; *Itin. Hier.* 602, here it is called *Demae*.) It is identified with the modern *Feredejik*. [L. S.]

DYME (Δύμη, Dymae, Liv. xxvii. 31: Eth. Δυμαῖος, also Δύμιος, Steph. B. *s. v.*, Dymaeus, Cic. *ad Att.* xvi. 1; the territory ἡ Δυμαία, Pol. v. 17: nr. *Karasoulás*), a town of Achaia, and the most westerly of the 12 Achaean cities, from which circumstance it is said to have derived its name. (Herod. i. 145; Pol. ii. 41; Strab. viii. p. 387.) It was situated near the coast, according to Strabo 60 stadia from the promontory Araxus, and according to Pausanias 30 stadia from the river Larisus, which separated its territory from Elis. It is further said by Strabo (viii. p. 337) to have been formed out of an union of 8 villages, one of which was called Teuthea (Τευθέα); and it is probable, that some of the different names, by which the city is said to have been called, were originally the names of the separate villages. Thus, its more ancient name is stated by Pausanias to have been Paleia (Παλέα), and by Strabo to have been Stratus (Στρατός). The poet Antimachus gave it the epithet Cauconis, which was derived by some from the iron Cancon in the neighbourhood, and by others from the Caucones, who were supposed to have originally inhabited this district. (Strab. pp. 337, 341, 342, 388; Paus. vii. 17. § 5, seq.) After the death of Alexander the Great, Dyme fell into the hands of Cassander, but his troops were driven out of the city by Aristodemus, the general of Antigonus, B. C. 314. (Diod. xix. 66.) This city had the honour, along with Patrae, of reviving the Achaean League in 280; and about this time or shortly afterwards its population received an accession from some of the inhabitants of Olenus, who abandoned their town. (Pol. ii. 41.) [OLENUS.] In the Social War (B. C. 220, seq.), the territory of Dyme, from its proximity to Elis, was frequently laid waste by the Eleans. (Pol. iv. 59, 60, v. 17.) It is mentioned by Livy in the history of the war between Philip and the Romans, and Pausanias says that, in consequence of its being the only one of the Achaean cities which espoused the cause of the Macedonian king, it was plundered by the Romans (Paus. *l. c.*). From this blow it never recovered; and it is said to have been without inhabitants when Pompey settled here a large number of Cilician pirates. In the civil wars which followed, some of these new inhabitants were expelled from their lands, and resumed in consequence their old occupation. (Strab. pp. 387, 665; Appian, *Mithr.* 96; Plut. *Pomp.* 28; Cic. *ad Att.* xvi. 1, "Dymaeos agro pulsos mare infestum habere, nil mirum.") Both Strabo (p. 665) and Pliny (iv. 6) call Dyme a colony; but this statement appears to be a mistake, since we know that Dyme was one of the towns placed under the authority of Patrae, when it was made a Roman colony by Augustus (Paus. *l. c.*); and we are expressly told that no other Achaean town except Patrae was allowed the privilege of self-government. The remains of Dyme are to be seen near the modern village of *Karavostási*. (Leake, *Morea*, vol. ii. p. 160.)

In the territory of Dyme, near the promontory Araxus, there was a fortress, called TEICHOS (Τεῖχος), which was said to have been built by Hercules, when he made war upon the Eleans. It was only a stadium and a half in circumference, but its walls were 30 cubits high. It was taken by the Eleans under Euripides in the Social War, B. C. 220, but it was recovered by Philip and restored to the Dymaeans in the following year. Its site is perhaps occupied by the castle of *Kallogriá*. (Pol. iv. 59, 88; Leake, vol. ii. p. 164.) There were also two other places in the territory of Dyme, between the city and the frontiers of Elis, named HECATOMBAEON (Ἑκατόμβαιον) and LANGON (Λάγγων), the latter of which, however, appears properly to have belonged to the Eleans. Near Hecatombaeon Aratus and the Achaeans were defeated by Cleomenes, who followed up his victory by gaining possession of Langon, B. C. 224. (Pol. ii. 51; Plut. *Cleom.* 14.)

DY'NDASUM (Δίνδασον; *Eth.* Δινδασεύς), a place in Caria, about which Stephanus (*s. v.*) quotes the second book of Alexander on Caria, in which passage Dyndasa is mentioned with Calynda. [G. L.]

DYRAS (Δύρας: *Gurgo*), a river in Malis, which in the time of Herodotus flowed between the Spercheius and the Melas into the Maliac gulf. At present, the *Gurgo* (the Dyras) and the *Mavranéria* (the Melas) unite their streams and fall into the Spercheius. (Herod. vii. 198; Strab. ix. p. 428; Leake, *Northern Greece*, vol. ii. pp. 11, 26.)

DYRIS, DYRIN. [ATLAS].

DYRRHA'CHIUM (Δυρράχιον, Steph. B.; Ptol. iii. 13. § 3, viii. 12. § 3: *Eth.* Δυρράχιος, Δυρραχηνός, Dyrrachinus), a city on the coast of Illyricum in the Ionic gulf, which was known in Grecian history as EPIDAMNUS (Ἐπίδαμνος, Strab. vii. p. 316.)

It is doubtful under what circumstances the name was changed to that of DYRRHACHIUM, under which it usually appears in the Latin writers. Some have affirmed that the Romans, considering the word Epidamnus to be of ill omen, called it Dyrrhachium from the ruggedness of its situation. (Plin. iii. 23; Pomp. Mela, ii. 3. § 12.) The latter word is, however, of Greek and not of Latin origin, and is used by the poet Euphorion of Chalcis. (Steph. B. *s. v.*) Strabo (p. 316) applied the name to the high and craggy peninsula upon which the town was built, as does also the poet Alexander. (Steph. B. *s. v.*) And as Dyrrhachium did not exactly occupy the site of ancient Epidamnus (Paus. vi. 10. § 2), it probably usurped the place of the earlier name from its natural features.

Epidamnus was founded on the isthmus of an outlying peninsula on the sea-coast of the Illyrian Taulantii, about 627 B. C., as is said (Euseb. *Chron.*), by the Corcyraeans, yet with some aid, and a portion of the settlers, from Corinth; the leader of the colony, Phalcus, belonging to the family of the Heraclidae,

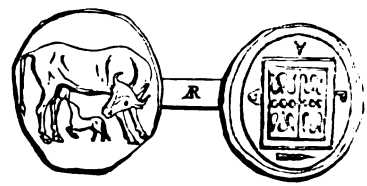
Digitized by Google

according to the usual practice, was taken from the mother-city Corinth. (Thuc. i. 24—26.) Hence the Corinthians acquired a right to interfere, which afterwards led to important practical consequences. Owing to its favourable position upon the Adriatic, and fertile territory, it soon acquired considerable wealth, and was thickly peopled.

The government was a close oligarchy; a single magistrate, similar to the "Cosmopolis" at Opus, was at the head of the administration. The chiefs of the tribes formed a kind of council, while the artisans and tradesmen in the town were looked upon as slaves belonging to the public. In process of time, probably a little before the Peloponnesian War, intestine dissensions broke up this oligarchy. The original "archon" remained, but the "phylarchs" were replaced by a senate chosen on democratical principles. (Arist. *Pol.* ii. 4. § 13, iii. 11. § 1, iv. 33. § 8, v. 1. § 6, v. 3. § 4; Müller, *Dor.* vol. ii. p. 160, trans.; Grote, *Greece*, vol. iii. p. 546.) The government was liberal in the admission of resident aliens; but all individual dealing with the neighbouring Illyrians was forbidden, and the traffic was carried on by means of an authorised selling agent, or "Poletes." (Plut. *Quaest. Graec.* c. 29, p. 297; Aelian, *V. H.* xiii. 16.) The trade was not however confined to the inland tribes, but extended across from sea to sea, even before the construction of the Egnatian Way, and an Inscription (Boeckh, *Corp. Inscr.* No. 2056) proclaims the gratitude of Odessus in the Euxine sea towards a citizen of Epidamnus.

The dispute respecting this city between Corinth and Corcyra was occasioned by a contest between the oligarchical exiles, who had been driven out by an internal sedition, and the Epidamnian democracy, in which the Corinthians supported the former. The history of this struggle has been fully given by Thucydides (*l. c.*), in consequence of its intimate connection with the origin of the Peloponnesian War, but we are left in ignorance of its final issue. Nor is anything known of its further history till 312 B.C., when, by the assistance of the Corcyraeans, Glaucias, king of the Illyrians, made himself master of Epidamnus. (Diod. xix. 70, 78.) Some years afterwards it was surprised by a party of Illyrian pirates; the inhabitants, on recovering from their first alarm, fell upon their assailants, and succeeded in driving them from the walls. (Polyb ii. 9.) Not long after, the Illyrians returned with a powerful fleet, and laid siege to the town; but fortunately for the city, the arrival of the Roman consul compelled the enemy to make a hasty retreat. Epidamnus from this time placed itself under the protection of the Romans, to whose cause it appears to have constantly adhered, both in the Illyrian and Macedonian wars. (Polyb. ii. 11; Liv. xxix. 12, xliv. 30.)

At a later period, Dyrrhachium, as it was then called, and a free state (Cic. *ad Fam.* xiv. 1), became the scene of the contest between Caesar and Pompeius. The latter moved from Thessalonica, and threw himself before Dyrrhachium; the Pompeians entrenched themselves on the right bank of the Apsus, so effectually that Caesar was obliged to take up his position on the left, and resolved to pass the winter under canvass. This led to a series of remarkable operations, the result of which was that the great captain, in spite of the consummate ability he displayed in the face of considerable superiority in numbers and position, was compelled to leave Dyrrhachium to Pompeius, and try the fortune of war upon a second field. (Caesar, *B. C.* iii. 42—76; Appian, *B. C.* ii. 61; Dion Cass. xli. 49; Lucan, vi. 29—63) Dyrrhachium sided with M. Antonius during the last civil wars of the Republic, and was afterwards presented by Augustus to his soldiers (Dion Cass. ii. 4), when the Illyrian peasants learned the rudiments of municipal law from the veterans of the empire. The inhabitants, whose patron deity was Venus (Catull. *Carm.* xxxiv. 11), were, if we can believe Plautus (*Menaechm.* act ii. sc. i. 30—40), a vicious and debauched race. The city itself, under the Lower Roman Empire, became the capital of the new province, Epirus Nova (Marquardt, *Handbuch der Rom. Alt.* p. 115), and is mentioned by the Byzantine historians as being still a considerable place in their time (Cedren. p. 703; Nicep. Callist. xvii. 3). Gibbon (*Decline and Fall*, vii. pp. 345—349; comp. Le Beau, *Bas Empire*, vol. xv. pp. 133—145) has told the story of the memorable siege, battle, and capture of Dyrrhachium, when the Norman Robert Guiscard defeated the Greeks and their emperor Alexius, A.D. 1081—1082. The modern *Durazzo* represents this place: the surrounding country is described as being highly attractive, though unhealthy. (*Albanien, Rumelien, und die Oesterreichisch Montenegrische Grenze*, Jos. Müller, Prag. 1844, p. 62.) There are a great number of autonomous coins belonging to this city, none however under the name of Epidamnus, but always with the *epigraph* ΔΥΡ, or more rarely ΔΥΡΑ,— the *type*, as on the coins of Corcyra, a cow suckling a calf; on the reverse, the gardens of Alcinous. (Eckhel, vol. ii. p. 155.) [E. B. J.]



COIN OF DYRRHACHIUM.

DYRTA (τὰ Δύρτα, Arrian, iv. 30), a small town in the country of the Assacani, in the western *Panjab*, visited by Alexander the Great. [V.]

DYSO'RUM (Δύσωρον), a mountain, the situation of which depends upon that of the lake Prasias and the extent that should be assigned to the Macedonia of Herodotus (v. 17), in his description of the embassy sent by Megabazus to Amyntas I., king of Macedonia. By Macedonia, Herodotus probably meant the kingdom of his own time, or at least that of Amyntas, who had already made great advances to the Strymon. Prasias will then be the same as the lake Cercinitis, and Dysorum that part of the mountain range towards *Sokhi* which separates the Strymonic plain from those that extend to Thessalonica and the Axius. (Leake, *Northern Greece*, vol. iii. p. 210, iv. p. 581.) [E. B. J.]

DYSPO'NTIUM (Δυσπόντιον: *Eth.* Δυσποντιεύς), an ancient town, in the territory of Pisa, said to have been founded by a son of Oenomaus, is described by Strabo as situated in the plain on the road from Elis to Olympia. It lay north of the Alpheius, not far from the sea, and probably near the modern *Skaphidi*. Being destroyed by the Eleians in their war with the Pisatae [ELIS], its inhabitants removed to Apollonia and Epidamnus. (Strab. viii. p. 357; Paus. vi. 22. § 4; Steph. B. *s. v.*; Curtius, *Peloponnesos*, vol. ii. p. 73.)

DYSTUS (Δύστος: *Eth.* Δύστιος: *Dhysta*), a town in Euboea in the vicinity of Eretria, mentioned by Theopompus. It still bears the name of *Dhysta*, which village is situated a little to the northward of *Porto Bisfalo*. (Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. pp. 436, 439.)

E.

EBAL MONS (ὄρος Γαιβάλ), a mountain of Palestine, always associated in the sacred narrative with the neighbouring Gerizim, from which it is separated by a narrow valley, in which is situated the town of *Nablouse* [NEAPOLIS], the ancient Shechem; Ebal being on the north of the valley, Gerizim on the south, which may account for a phenomenon remarked by some travellers, and thus described by Maundrell (p. 61): — "Tho' neither of the mountains has much to boast of as to their pleasantness, yet, as one passes between them, Gerizim seems to discover a somewhat more verdant, fruitful aspect than Ebal. The reason of which may be, because fronting towards the north, it is sheltered from the heat of the sun by its own shade: whereas Ebal, looking southward, and receiving the sun that comes directly upon it, must by consequence be rendered more scorched and unfruitful." It was from Mount Ebal that Moses commanded the blessings to be pronounced by the children of Israel, as the curses were from Mount Gerizim (*Deut.* xi. 29); and upon this mountain, according to the Hebrew text of the Pentateuch, they were to set up plaistered stones inscribed with the Decalogue, and to erect an altar and offer sacrifices (*Deut.* xxvii. 4, 5; comp. *Josh.* viii. 30, 31). The remarkable variation of the Samaritan Pentateuch, which assigns Gerizim to this use, is a matter of history and philology, which cannot be here discussed. It is remarkable that the identity of the two mountains in the vicinity of *Nablouse* with the Ebal and Gerizim of Scripture was called in question by Eusebius and S. Jerome, who assign to these Scripture names a position E. of Jericho and in the vicinity of Gilgal (*Onomast. s. v. Gabal*), in accordance, as the latter thinks, with the sacred narrative (*Comment. in Deut.*). Independently, however, of the fact that no mountains or hills are found in the Valley of the Jordan, between Jericho and the river, it may be observed that the objection to the received sites is based on a misunderstanding of the text; and although the transition in the history (*Joshua*, viii. 30) from the valley of the Jordan to the heart of Mount Ephraim is sudden and abrupt, yet the history of Jotham (*Judges*, ix.) unmistakeably places Gerizim in the immediate vicinity of Shechem, of the identity of which with *Nablouse* [NEAPOLIS], there can be no doubt. The question is fully discussed by Reland, with his usual learning and acumen. (*Dissert. Miscell.* pars i. p. 121, &c.) [G. W.]

EBELLINUM. [ILERGETES]

EBLANA, in Ireland, mentioned by Ptolemy as lying between the outlets of the rivers Bubinda (*Boyne*) and Oboca, = *Dublin*. [R. G. L.]

EBORA (Ἔβορα: *Evora*, Ru.), an important inland city of Lusitania, on the high road from Augusta Emerita (*Merida*) to Olisipo (*Lisbon*). It was a municipium, with the old Latin franchise and the surname of Liberalitas Julia. (*Itin. Ant.* pp. 418, 426; Plin. iv. 21. s. 35; Ptol. ii. 5. § 8; Coins ap. Florez, *Med.* vol. i. pp. 380, foll.; Mionnet, vol. i. p. 2, *Suppl.* vol. i. p. 3; Sestini, p. 6; Eckhel, vol. i. p. 11; Inscr. ap. Gruter, p. 225, No. 3, p. 489, No. 9.) Among the fine ruins of the city, the most remarkable are those of an aqueduct and a temple of Diana. (Florez, *Esp. S.* vol. xiv. p. 100; Murphy, *Travels in Portugal*, p. 302). [P. S.]

EBORACUM (Ἔβόρακον), the chief Roman town in Britain. The first author who mentions Eboracum is Ptolemy (ii. 3. § 16), with whom it is a city of the Brigantes, and the station of the Sixth (the Victorious) Legion. It is by no means certain, however, that the words Λεγίων ϛ νικεφόριος may not be the gloss of some later writer. That, place for place, the station of the legion was Eboracum, is shown by the context of the notice. For Eboracum and Camunlodunum, the latitudes and longitudes are given, but not for the locality of the Sixth Legion; these being the same with the former of those two places: —

Ἔβόρακον	κ.	ν ζ.	γ.
Λεγίων ϛ νικεφόριος	.	.	.
Καμουνλόδουνον	ιη.	δ.	η ζ.

That Eboracum is *York* has never been doubted. The Anglo-Saxon *Eoforwic*, and the Norse *Jorvik*, connect the ancient and modern forms, name for name. Place for place, too, the frequent notices of Eboracum (generally written Eburacum) in the Notitia, give us similar evidence. Lastly, a single inscription, which will be noticed in the sequel, with the name EBVRACVM, has been found within the area of the present city.

The early importance of English and Saxon *York* has drawn a considerable amount of attention to its history and antiquities; nevertheless, the Roman remains found within its precincts are by no means of first-rate importance. They fall short of, rather than exceed, the expectations suggested by the historical prominence of the town. On the other hand, they have engaged the attention of able local archaeologists. First comes the consideration of the actual site of the Roman town, as determined by its line of wall. Of this, satisfactory remains have been discovered, in the shape of foundations; as have also Roman bricks, transferred to several more recent structures. Remains, too, of one of the gates have been found, — probably the Praetorian; though of this the evidence is only circumstantial. It fronts the north, the part most exposed to hostile inroads. Its locality is that part of the modern city wall which adjoins Bootham Bar. Here we find two walls extending from 20 to 30 feet inwards, parallel to each other, and at right angles with the rampart-wall, and near them some rudely-sculptured grit-stones, which seem to have formed part of a pediment or frieze. On one is seen a quadriga; the carving being but rude and indifferent, and there being no inscriptions to throw a light over its meaning. Foundations, too, of more than one mural tower can be traced.

The remains which have been discovered form the walls of three sides of the ancient Eboracum only. For the fourth, the traces have still to be detected. From what, however, has been found, Mr. Wellbeloved considers that "we are warranted in concluding that the Roman city was of a rectangular form, of about 650 yards by 550, enclosed by a wall and rampart-mound of earth on the inner side of the wall, and perhaps a fosse without." This area is not only inconsiderable as compared with that of

Digitized by Google

the present city, but as compared with the *whole* extent of the ancient one, since the preceding measurements apply only to the parts within the walls; the suburbs being considerable, and the Roman remains (as opposed to the intra-mural part of the town) being abundant. The chief streets of these suburbs followed the chief roads, of which the most important was that which led to Calcaria (*Tadcaster*). Next to this was the one towards Isurium (*Aldborough*). The others, in the direction of Mancunium (*Manchester*) and Praetorium (*Patrington*), are less rich in relics. In other words, the streets of the suburbs of the ancient Eboracum seem to have been prolonged in the north and south rather than in the east and west directions. The river *Fosse*, however much it may be more or less a natural channel — a water-course rather than a cutting — retains its Roman name. Of private dwellings, baths (with the hypocausts), pavements (tesselated), the remains are numerous. So they are in respect to temples, altars, and votive tablets. From these some of the most remarkable inscriptions are —

1.

DEO . SANCTO.

4.

GENIO LOCI
FELICITER

5.

M . VEREC . DIOGENES IIIIILVIR COL
EBVRID∃DMQ MORTCIVESBITVRIX
CVBVS HAEC SIBI VIVVS FECIT

In the last of these inscriptions the combination IIIIILVIR gives us the title *Scvir*, a title applied to certain municipal, colonial, or military officers of unascertained value. It is this inscription, too, where we find the name EBVR (= *Eburacum*), the term *col* (= *colonia*) attached to it.

The first of them is interesting from another fact; viz. the foreign character of the god Serapis, whose name it bears. Besides this piece of evidence to the introduction of exotic superstitions into Roman Britain, a so-called Mithraic slab has been found at York, i. e. a carved figure of a man, with a cap and chlamys, stabbing a bull. The dress, act, and attitude, along with certain characteristics of the other figure of the group, appear to justify this interpretation.

Tombs, sepulchral inscriptions, urns, Samian ware in considerable quantities, form the remainder of the non-metallic Roman antiquities of York; to which may be added a few articles in glass. Fibulae, armillae, and coins, represent the metallurgy. Of these latter those of Geta are the most numerous. It has been remarked, too, that, although the coins of Britain generally, of the coins of the two usurpers those of Carausius are the more common, in the neighbourhood of York they are less abundant than those of his successor Allectus.

The evidence that Severus died at York is from his life in Spartianus (c. 19), whose statement is repeated by Aurelius Victor (*de Caes.* 20), Eutropius (viii. 19), and other later authorities. Victor (*l. c.*) calls Eboracum a municipium; but in an ancient inscription it is styled a colonia. The emperor Constantius also died at Eboracum, as we learn from Eutropius (x. 1). The other accredited facts, such as the residence of Paulinus, and the birth of Constantine the Great, at York, rest on no classical evidence at all. The supposed Roman mounds of Severus, near York, are natural, rather than artificial, formations. (Philipp's *Yorkshire*; Wellbeloved's *York*.) [R. G. L.]

EBREDUNUM, EBURODUNUM (*Yverdun*). This is the Castrum Ebredunense of the Notitia of the Gallic provinces, at the southern end of the lake of *Neuchâtel*, in the canton of *Vaud* in Switzerland. It is situated where the river Orbe enters the lake, and it is supposed to be the place which is mentioned in the Notitia of the empire: "in provincia Gallia Ripensi, praefectus classis Barcariorum Ebrodunensium Sapaudiae;" for the fleet, whatever it may have been, could not have been kept at Ebrodunum on the Durance. [G. L.]

EBRODU'NUM (Ἐβρόδουνον: *Embrun*). There is some variation in the writing of the first part of the name. It is Epebrodunum in Strabo's text, but Casaubon corrected it. Strabo (p. 179) says that "from Tarasco to the borders of the Vocontii at the beginning of the ascent of the Alps, through the Druentia and Caballio, is 63 miles; and from there to the other boundaries of the Vocontii, to the kingdom of Cottius, to the village of Ebrodunum, 99." Ebrodunum was in the country of the Caturiges, and just on the borders of the Vocontii, as it appears.

The position of Ebrodunum is easily determined by the Itins. and the name. Ptolemy (iii. 1) mentions Eborodunum as the city of the Caturiges, and no other. In the Jerusalem Itin. Ebrodunum is called Mansio, like Caturiges (*Chorges*), which was also in the territory of the Caturiges. [CATURIGES.] There are Roman remains at *Chorges*, and none are mentioned at Embrun, though it appears that the cathedral of Embrun is built on the site of a Roman temple, or that some of the materials of a temple were used for it. [G. L.]

EBUDA, EBUDAE INSULAE. [HEBUDES.]

EBU'RA or E'BORA. 1. (Ἔβορα, Ἔβορις, *Lucar de Barrameda*), a city and fortress of the Turduli, in Hispania Baetica, at the mouth of the river Baetis (*Guadalquivir*), on its left bank. (Strab. iii. p. 140; Mela, iii. 1, *Castellum Ebora* in text; Ptol. ii. 4. § 11; *Itin. Ant.* p. 426; Steph. B. s. v.; Inscr. ap. Gruter, p. 489.)

2. EBURA CERRALIS, an inland city of Hispania Baetica, probably in the neighbourhood of Seville

Digitized by Google

…ra. (Plin. iii. 1. s. 3; Inscr. ap. Muratori, p. 61; Flores, *Esp. S.* vol. xii. p. 390; Ukert, vol. ii. …i. p. 370.)

3. (Ἔβορα), an inland city of the Edetani, in Hispania Tarraconensis, SE. of Caesaraugusta, only mentioned by Ptolemy (ii. 6. § 63). (Brietius, *Tab. Itin.* vol. i. p. 268; Ukert, vol. ii. pt. i. p. 417.)

4. Mela (iii. 1) mentions an Ebora as a port of the Celtici, at the NW. extremity of the peninsula, which Ukert takes to be *Barra* on the Tambre. (Ukert, vol. ii. pt. i. p. 438.) [P. S.]

EBURI (*Eboli*), a town of the Lucanians, mentioned only by Pliny (iii. 11. s. 15), who expressly ascribes it to that people; though, from its situation on the Silarus, it would seem to have naturally belonged to Campania, or the Picentini. The ruins of the ancient town are visible on a hill called the *Monte d'Oro*, between the modern city of *Eboli* and the right bank of the Silarus, over which are the ruins of a fine Roman bridge. An inscription found there, with the words "Patr. Mun. Ebur.," i. e. Patronus Municipii Eburini, both proves the ruins in question to be those of Eburi, and attests its municipal rank. (Romanelli, vol. iii. p. 614; Mommsen, *R. N.* 189.) [E. H. B.]

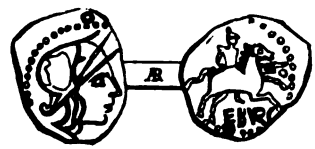
EBUROBRICA (in the Antonine Itin.), EBUROBRIGA (in the Table), was on a road between Autissiodurum (*Auxerre*) and Augustobona (*Troyes*). There is the usual difficulty about the distances, but it is not great. It is agreed that the place is *St. Florentin*, on the small river *Armance*, which flows to the *Armançon*, a branch of the *Yonne*. The termination *brica*, *briga*, or *briva* is all one, and always indicates the passage of a river. D'Anville observes that between *St. Florentin* and *Auxerre* the passage of the *Sérain* is at a place called *Pontigny*, in which case we have a Roman name indicating the same fact that the Celtic term "briva" or "briga" indicates. [G. L.]

EBUROBRITIUM (*Ebora de Alcobaza*), a town in Lusitania. (Plin. iv. 21. s. 35; Flores, *Esp. S.* vol. xiv. p. 176.) [P. S.]

EBUROMAGUS. [Hebromagus.]

EBURO'NES (Ἔβουρονες, Strab. p. 194), a name in that division of Gallia which Caesar names as Belgae. He says that the Condrusi, Eburones, Caerosi, and Paemani were called by the one name of Germani (*B. G.* ii. 4). When the Usipetes and Tenchtheri, who were Germans, crossed the Rhine from Germania (B. C. 55), they first fell on the Menapii, and then advanced into the territories of the Eburones and Condrusi, who were in some kind of political dependence on the Treviri. (*B. G.* iv. 6.) The position of the Eburones was this. On the Rhine the Eburones bordered on the Menapii, who were north of them, and the chief part of the territory of the Eburones was between the Mosa (*Maas*) and the *Rhine*. (*B. G.* vi. 5; v. 24.) South of the Eburones, and between them and the Treviri, were the Segni and Condrusi (*B. G.* vi. 32); and the Condrusi were in the country of *Liège*. [Condrusi.] The Eburones must have occupied *Limburg* and a part of the Prussian Rhine province. In B. C. 54, Caesar quartered a legion and a half during the winter in the country of the Eburones, under the command of his legati, Q. Titurius Sabinus and L. Aurunculeius Cotta. The Eburones, headed by their two kings, Ambiorix and Cativolcus, attacked the Roman camp; and after treacherously inducing the Romans to leave their stronghold on the promise of a safe passage, they massacred nearly all of them. (*B. G.* v. 26—37.) In the following year Caesar entered the country of the Eburones, and Ambiorix fled before him. Cativolcus poisoned himself. The country of the Eburones was difficult for the Romans, being woody and swampy in parts; and Caesar invited the neighbouring people to come and plunder the Eburones, in order to save his own men, and, also, with the aid of great numbers, to exterminate the nation. (*B. G.* vi. 34). While Caesar was ravaging the country of the Eburones, he left Q. Cicero with a legion to protect the baggage and stores, at a place called Aduatuca, which he tells us in this passage had been the fatal quarters of Sabinus and Cotta, though he had not mentioned the name of the place before (v. 24). He places Aduatuca about the middle of the territory of the Eburones; and there is good reason for supposing that the place is *Tongern*. [Aduatica.] Caesar burnt every village and building that he could find in the territory of the Eburones, drove off all the cattle, and his men and beasts consumed all the corn that the badness of the autumnal season did not destroy. He left those who had hid themselves, if there were any, with the hope that they would all die of hunger in the winter. And so it seems to have been, for we hear no more of the Eburones. Their country was soon occupied by another German tribe, the Tungri.

The annexed coin is usually assigned to the Eburones; bnt as the nation was extirpated by Caesar, it could have had no coins. The coin may perhaps belong to the Eburovices, or to Eburodunum. [G. L.]



COIN OF THE EBURONES.

EBUROVI'CES, a Gallic tribe, a branch of the Aulerci. [Aulerci.] They are mentioned by Caesar (*B. G.* iii. 17) with the Lexovii. Pliny (xv. 18) speaks of the Aulerci, "qui cognominantur Eburovices, et qui Cenomani." Ptolemy (ii. 8) makes the Αὐλέρκοι Ἐβουρϊκοί extend from the Ligeris to the Sequana, which is not true. Their chief place was Mediolanum (*Evreux*). Their limits correspond to those of the diocese of *Evreux*, and they are north of the Carnutes. [G. L.]

E'BUSUS. [Pityusae.]

ECBATANA (τὰ Ἐκβάτανα: the genuine orthography appears to be Ἀγβάτανα, as it is now written in Herodotus, and as we learn from Steph. B. it was written by Ctesias: Ἀνωβάτανα, Isid. *Char.* p. 6, ed. Hudson: Ecbatana-se, Hieron. *Chron. Euseb.*; Lucil. *Satyr.* vii.), a celebrated ancient city of Media. Its foundation was popularly attributed, like those of many other very ancient places, to Semiramis, who is said to have made a great road to it from Assyria, by Mt. Zarcaeus or Zagros, to have built a palace there, and to have plentifully supplied the district in which it was situated with water, by means of an enormous tunnel or aqueduct. (Diod. ii. 13.) According to the same author (*l. c.*), the city of Semiramis was seated in a place at the distance of twelve stadia from the Orontes (*Mt. Elwend*), and would therefore correspond pretty nearly with the position of the present *Hamaddn*. Herodotus tells a different story: according to him, the city was of later origin, and was built by the com-

Digitized by Google

mand of Deioces, who had been elected king by the people, after they had renounced their former independence. Herodotus describes with considerable minuteness the peculiar character of this structure,—which had seven concentric walls, each inner one being higher than the next outer one by the battlements only. The nature of the ground, which was a conical hill, favoured this mode of building. These battlements were painted with a series of different colours: the outermost was white, the second black, the third purple, the fourth blue, the fifth bright red, and sixth and seventh, respectively, gilt with silver and gold. It has been conjectured that this story of the seven coloured walls is a fable of Sabaean origin, the colours mentioned by Herodotus being precisely the same as those used by the Orientals to denote the seven great heavenly bodies, or the seven climates in which they are supposed to revolve. (Rawlinson, *J. R. Geogr. Soc.* vol. x. p. 128.) Herodotus adds, what is clearly improbable, that the size of the outer wall equalled in circumference that of the city of Athens. He probably obtained his information from the Medes he met with at Babylon. Diodorus, on the other hand, states that Arbaces, on the destruction of Nineveh, transferred the seat of empire to Ecbatana (ii. 24—28), so that, according to him, it must have been already a great city. Xenophon, at the foot of the Carduchian hills, heard that there were two principal roads from Assyria; one to the S. into Babylonia and Media, and the other to the E. to Susa and Ecbatana. It would seem pretty certain, that the former is the road by *Kermanshâh* to *Hamadân*; the latter, that by *Rowandiz* and *Keli Shin* into *Azerbaijan*, and thence through the valleys of *Kurdistân* (*Mah-Subadan*) and *Laristân* to Susa. He mentions that the great king passed his summer and spring respectively at Susa and Ecbatana (*Anab.* iii. 5. § 15), and, in another place, that the Persian monarch spent generally two summer months at Ecbatana, three spring months at Susa, and the remaining seven months at Babylon (*Cyrop.* viii. 6. § 22). The same fact is noticed by Strabo (xi. p. 523). During the period of the wars of Alexander the Great we have frequent mention of Ecbatana: thus, after Arbela, Dareius flies thither, taking, most likely, the second of the routes noticed by Xenophon (Arrian, *Anab.* iii. 19. § 2). Alexander marching in pursuit of him, comes to it from Susa (iii. 19. § 4), and transports thither as to a place of peculiar security the plunder which he had taken previously at Babylon and Susa, ordering Parmenio to place them εἰς τὴν ἄκραν τὴν ἐν Ἐκβατάνοις, and to leave there a force of 6000 Macedonians under Harpalus as their guard (iii. 19. § 7). Again, when Alexander at last overtook and captured Bessus, he sends him to Ecbatana—as to the most important place in his new dominions, to be put to death by the Medes and Persians (iv. 7. § 3); and, on his return from the extreme east, Alexander sacrifices at Ecbatana and exhibits games and musical contests (vii. 14. § 1). At Ecbatana, Alexander's favourite Hephaestion died, and the conqueror is said to have destroyed the famous temple of Aesculapius there, in sorrow for him; an anecdote, however, which Arrian does not believe (vii. 14. § 5). In Polybius we have a curious description of the grandeur of this ancient town, as it had existed up to the time of Seleucus. He states that, of all the provinces of Asia, Media was the one best fitted, from natural causes, for the maintenance of a great and settled monarchy, the richness of its land being remarkable and the abundance both of its inhabitants and of its cattle. He remarks of Ecbatana itself, that it was situated in the northern part of the province, adjoining the districts which extend thence to the Palus Maeotis and the Euxine,—and that it was under the roots of Mt. Orontes (*Elvend*) in a rocky situation. He adds that there were no walls round it, but that it had a citadel of enormous strength, and, adjoining the citadel, a royal palace full of rich and beautiful workmanship,—all the wood used being cedar or cypress, but wholly covered with silver and golden plates: most of these metallic ornaments, he subsequently states, had been carried away by the soldiers of Alexander, Antiochus and Seleucus, the temple of Aena (*Anâia*) alone preserving some of these decorations up to the time when Antiochus came there; so that a considerable sum of money was coined from them. The book of *Judith* gives a remarkable account of the building of Ecbatana "in the days of Arphaxad, who reigned over the Medes in Ecbatana," from which it is evident that it was a place of great strength (i. 2—4). It has not been quite satisfactorily made out who this Arphaxad was; but some have identified him with Phraortes and some with Deioces. The former is, perhaps, the most probable conclusion, as the same book relates a few verses further his overthrow by Nebuchadnezzar "in the mountains of Ragau" (v. 14), which corresponds with Herodotus's statement, that this king fell in a battle with the Assyrians (i. 102). The place is also mentioned in 2 *Maccab.* i. 3, where it is stated that Antiochus died there, on his flight from Persepolis; in *Tobit*, ii. 7, vi. 5, vii. 1, where it is evidently a place of importance; and in Ezra vi. 2, under the name of Achmetha, when the decree of Cyrus for the restoration of the Jews was found "in the palace that is in the province of the Medes." Subsequently to the period of the wars of the Seleucidae, we find scarcely any mention of Ecbatana,—and it might be presumed that it had ceased to be a place of any note, or that its site had been occupied by a city of some other name: Pliny, however, alludes to it, stating that it was built (more probably, restored) by Seleucus (vi. 14. s. 17); adding, a little further on, that it was removed by Dareius to the mountains (vi. 26. s. 29), though it would seem, that his two statements can hardly apply to the same place. Curtius speaks of it as "caput Mediae," remarking that it was at the time when he was writing) under the domination of the Parthians (v. 8. § 1); while Josephus preserves, what was probably a Jewish tradition, that Daniel built, at Ecbatana in Media, a tower of beautiful workmanship, still extant in his day, asserting that it was the custom for the kings both Persian and Parthian to be buried there, and for the custody of their tombs to be committed to a Jewish priest (*Ant. Jud.* x. 11. § 7). He states that it was in this tower that the decree of Cyrus was discovered. (*Ant. Jud.* xi. 4. § 6.) Lastly, Ammianus places it in Adiabene (or Assyria Proper),—on the confines of which province he must himself have marched, when accompanying the army of Jovian (xxiii. 6).

Various theories have been propounded as to the origin of the name of Ecbatana, none of which are, we think, satisfactory. Bochart supposed that it was derived from *Agbatha*, which, he says, means "variously coloured;" but it is more probable

Digitized by Google

that it should be derived from "Achmetha." Herodotus and Ctesias write Agbatana. There seems little doubt that the Apobatana of Isidorus refers to Ecbatana, and is perhaps only a careless mode of pronouncing the name; his words are curious. He speaks of a place called Adrogiananta or Adraganata, a palace of those among or in the Batani (τῶν ἐν Βατάνοις), which Tigranes, the Armenian, destroyed, and then of Apobatana, "the metropolis of Media, the treasury and the temple where they perpetually sacrifice to Anaitis." If the country of the Batani corresponds, as has been supposed, with Mesobatene, the position and description of Apobatana will agree well enough with the modern *Hamadán*. (C. Masson, *J. R. As. Soc.* vii. p. 121.) The coincidence of the names of the deity worshipped there, in Polybius Aena, in Isidorus Anaitis, may be noticed; and there is little doubt that the "Nanea" whose priests slew Antiochus and his army (2 *Maccab.* i. 13) was the goddess of the same place. Plutarch (*Artax.* c. 27) mentions the same fact, and calls this Anaitis, Artemis or Diana; and Clemens Alex. referring to the same place speaks of the shrine of Anaitis, whom he calls Aphrodite or Venus.

It is worthy of remark that Mr. Masson (*l. c.*) noticed outside the walls of *Hamadán* some pure white marble columns, which he conjectured might, very possibly, have belonged to this celebrated building.

It is, however, not a little curious that, though we have such ample references to the power and importance of Ecbatana, learned men have not been, indeed, are not still, agreed as to the modern place which can best be identified with its ancient position. The reason of this may, perhaps, be, that there was certainly more than one town in antiquity which bore this name, while there is a strong probability that there were, in Media itself, two cities which, generally at least, if not at the same time, had this title. If, too, as has been suspected, the original name, of which we have the Graecised form, may have meant "treasury," or "treasure-city," this hypothesis might account for part of the confusion which has arisen on this subject. It must also be remembered, that all our accounts of Ecbatana are derived through the medium of Greek or Roman authors, who themselves record what they had heard or read, and who, in hardly any instance, if we except the case of Isidorus, themselves had visited the localities which they describe. The principal theories which have been held in modern times are those of Gibbon and Jones, who supposed that Ecbatana was to be sought at *Tabríz*; of Mr. Williams (*Life of Alexander*), who concluded that it was at *Ispahán*; of the majority of scholars and travellers, such as Rennell, Mannert, Olivier, Kinneir, Morier, and Ker Porter, who place it at *Hamadán*; and of Colonel Rawlinson, who has contended for the independent existence of two capitals of this name, the one that of the lower and champaign country (known anciently as Media Magna), which he places at Hamadán, the other that of the mountain district of Atropatene, which he places at *Takht-i-Soleiman* in the province of *Azerbáijan*, in N. lat. 36° 25′ W., long. 47° 10 (*J. R. Geog. Soc.* vol. x. pt. 1). Of these four views the two first may be safely rejected; but the last is so new and important, that it is necessary to state the main features of it, though it would be obviously impossible to do more in this place than to give a concise outline of Colonel Rawlinson's investigations. It is important to remember the ancient division of Media into two provinces, Upper Media or Atropatene [ATROPATENE], and Lower or Southern Media or Media Magna (Strab. xi. pp. 523, 524, 526, 529); for there is good reason for supposing that, in the early history, contemporary with Cyrus (as subsequently in Roman times), Media was restricted to the northern and mountainous district. It was, in fact, a small province nearly surrounded by high ranges of hills, bearing the same relation to the Media of Alexander's aera which the small province of Persis did to Persia, in the wide sense of that word. It is on this distinction that much of the corroborative evidence, which Colonel Rawlinson has adduced in favour of his theory, rests: his belief being, that the city of Deioces was the capital of Atropatene, and that many things true of it, and it alone, were in after-times transplanted into the accounts of the Ecbatana of Media Magna (the present *Hamadán*). Colonel Rawlinson is almost the only traveller who has had the advantage of studying all the localities, which he attempts to illustrate, on the spot, and with equal knowledge, too, of the ancient and modern authorities to whom he refers.

In his attempt to identify the ruins of *Takht-i-Soleimán* with those of the earliest capital of Media, Col. Rawlinson commences with the latest authorities, the Oriental writers, proceeding from them through the period of the Byzantine historians to that of the Greek and Roman empires, and thence, upwards, to the darkest times of early Median history. He shows that the ruins themselves are not later than Tímúr's invasion in A. D. 1389; that they probably derive their present name from a local ruler of *Kurdistán*, Soleimán Shah Abúh, who lived in the early part of the thirteenth century A. D.; that, previous to the Móghels, the city was universally known as *Shíz* in all Oriental authors, and that *Shíz* is the same place as the Byzantine Canzaca. This is his first important identification, and it depends on the careful examination of the march of the Roman general Narses against the Persian emperor Bahrán, who was defeated by him and driven across the Oxus. (Theophylact. v. 5—10.) Canzaca is described by Theophanes, in the campaigns of Heraclius, as "that city of the East which contained the fire-temple and the treasuries of Croesus king of Lydia" (*Chronogr.* ed. Goar. p. 258: see also Cedren, *Hist.* p. 338; Tzetz. *Chil.* iii. 66; and Procopius, *Bell. Pers.* ii. c. 24); its name is derived from Kandzag, the Armenian modification of the Greek Gaza, mentioned by Strabo as the capital of Atropatene (xi. p. 523; Ptol. vi. 18. § 4). The notice of the great fire-temple (of which ample accounts exist in the Oriental authorities which Col. Rawlinson cites), and the Byzantine legend of the treasuries of Croesus (in manifest reference to Cyrus; compare Herod. i. 153), are so many links in the chain which connect Shíz, Canzaca, and Ecbatana together. Colonel Rawlinson proceeds next to demonstrate that Canzaca was well known even earlier, as it is mentioned by Ammianus, under the form Gazaca, as one of the largest Median cities (xxiii. c. 6), and he then quotes a remarkable passage from Moses of Chorene, who (writing probably about A. D. 445) states that Tiridates, who received the satrapy of Atropatene in reward for his fidelity to the Romans in A. D. 297, when he visited his newly acquired province of Azerbáijan "repaired the fortifications of that place, which was named the second

Digitized by Google

Ecbatana, or seven-walled city" (ii. c. 84; compare also Steph. Byz. *s. v.* Gazaca, who quotes Quadratus, an author of the second century, for the name of what he calls "the largest city in Media," and Arrian, who terms it "a large village"). During the æra of the Parthian empire, and its conflicts with the Roman power, Col. Rawlinson proves, as we think, satisfactorily, that the names Phraata, Praaspa, Vera, Gaza, and Gazaca are used indifferently for one and the same city. (Compare, for this portion of the history, Plut. *Anton.*; Dion Cass. xlix. 25—31; Appian, *Hist. Parth.* pp. 77, 80, ed. Schweigh.; Florus, iv. 10; and for the names of Gaza and Vera, and the distinction between them, Strab. xi. p. 523.) The next point is to compare the distances mentioned in ancient authors. Now Strabo states that Gazaca was 2400 stadia from the Araxes (xi. p. 523), a distance equivalent to about 280 English miles; while Pliny, in stating that Ecbatana, the capital of Media founded by Seleucus, was 750 miles from Seleucia and 20 from the Caspian gates, has evidently confounded Ecbatana with Europus (now *Veraïmin*) (vi. 14. s. 17). The former measure Col. Rawlinson shows is perfectly consistent with the position of *Takht-i-Solcimán*. Colonel Rawlinson demonstrates next, that the capital of Media Atropatene was in the most ancient periods called Ecbatana—assuming, what is certainly probable, that the dynasty founded by Arbaces was different from that which, according to Herodotus, commenced with Deioces, a century later. Arbaces, on the fall of Nineveh, conveyed the treasures he found there to Ecbatana, the seat royal of Media, and it is clear that here the Ecbatana of Media Magna is meant. (Diod. ii. 3.) To the same place belongs the story of Semiramis, also recorded by Diodorus, and previously mentioned. After five generations Artaeus ascends the throne at the same place. During his reign the Cadusians (who are constantly associated with the Atropatenians in subsequent history) revolt, under the leadership of Parsodes. Colonel Rawlinson happily suggests that this is no other than the Deioces of Herodotus, Parsodes or Phrazad being an affiliative epithet from his father Phraortes. (Diod. *l. c.*; Herod. i. 95—130.) When we examine the narrative of Herodotus, it is clear that he is speaking of some place in Atropatene or Northern Media. Thus he states that "the pastures where they kept the royal cattle were at the foot of the mountains north of Agbatana, towards the Euxine sea. In this quarter, toward the Sapires, Media is an elevated country, filled with mountains and covered with forests, while the other parts of the province are open and champaign." (Herod. i. c. 110.) Colonel Rawlinson then shows that the existing state of *Takht-i-Solcimán* bears testimony to the accurate information which Herodotus had obtained. It is clear from his account that the Agbatana of Deioces was believed to be an embattled conical hill, on which was the citadel, and the town was round its base in the plain below. Colonel Rawlinson adds that there is no other position in Azerbáïjan which corresponds with this statement, except *Takht-i-Solcimán*, and cites abundant evidence from the Zend Avesta, as compared with the Byzantine and other writers to whom we have alluded, in reference to peculiarities, too important to have been only imagined, which mark out and determine this locality. It is impossible here to state his arguments in their fulness; but we may add that from the Zend he obtains the word Var, the root of the *βάρις* of the Greeks (see Hesych. and Suidas, *s. v.*), which is constantly used to denote the Treasure Citadel of Ecbatana: of the Vera of Strabo: of the Balaroth (i. e. Vara-rúd, river of Vara) of Theophylact, whence we have *Βαριαμίαν*—the keeper of the Baris—the title used by the emperor Heraclius in reference to the governor of the fortress of this very place. In conclusion, Colonel Rawlinson suggests that the Ecbatana of Pliny and Josephus refers to the Treasure Citadel of Persepolis: that there are grounds for supposing a similar treasury to have existed in the strong position of the Syrian Ecbatana on Mount Carmel (Herod. iii. 62—64; Plin. v. 19. § 17); and that, if there ever was (as some have supposed) an Assyrian place of the same name (Rich, *Kurdistan*, i. p. 153), the castle of Amadiyáh—which, according to Mr. Layard (i. p. 161), retains the local name of Ek-baban—will best suit it. (See also *Journal of Education*, vol. i. p. 305; and Thirlwall, *Hist. of Greece*, vol. ii. Append. 2., where the site of Hamadán is ably defended.) [V.]

ECCOBRIGA or ECOBROGIS, as it appears in the Antonine Itin., is placed on a road from Accra (*Angora*) to Tavia. Eccobriga also is mentioned in the Table, on a road from Angora to Iuvium, but it is the only name in which the two itineraries agree. The place is within the limits of Galatia in Asia Minor, and an instance of a name with the Gallic termination *briga*. [G. L.]

ECDIPPA (Ἐκδίππα), a maritime town of Palestine, identical with the Scripture ACHZIB (Josh. xix. 29, Ἐχοζίβ LXX.), in the borders of Asher. Its ruins were first identified by Maundrell (A.D. 1697) near the sea-shore, about 3 hours north of Acre, which he thus describes: "We passed by an old town called *Zib*, situated on an ascent close by the shore. This may probably be the old Achzib mentioned in Joshua, xix. 29 and Judges, i. 31., called afterwards Ecdippa: for St. Jerome places Achzib nine miles distant from Ptolemais towards Tyre, to which account we found the situation of *Zib* exactly agreeing. This is one of the places out of which the Ashurites could not expel the Canaanitish natives." (*Journey*, p. 53). The Itinerarium Hierosolymitanum places it 12 miles to the north of Ptolemais (Acre) and as many south of Alexandroschene, the modern *Iskanderúna*. [G. W.]

ECETRA (Ἐκέτρα, Dionys., Steph. B.: Lat. Ἐκετρανός, Ecetranus), an ancient city of the Volscians, which figures repeatedly in the wars of that people with the Romans, but subsequently disappears from history; and its situation is wholly uncertain. Its name is first mentioned by Dionysius during the reign of Tarquinius Superbus, when, according to him, the Ecetrani and Antiates were the only two Volscian states which agreed to join the league of the Latins and Hernicans under that monarch. (Dionys. iv. 49.) Niebuhr, however, conceives this statement to belong in reality to a much later period (vol. ii. p. 257). In B. C. 495, after the capture of Suessa Pometia, the "Ecetrani Volsci" are mentioned as sending ambassadors to Rome to sue for peace, which they obtained only by the cession of a part of their territory. This was immediately occupied by Roman colonists, a circumstance which the Auruncans are said to have made a pretext for declaring war upon Rome two years afterwards. (Liv. ii. 25; Dionys. vi. 32.) Again, during the great Volscian war, supposed to have been conducted by Coriolanus, Ecetra appears as an important

Digitized by Google

place, at which the general congress of the deputies from the Volscian cities assembled, and where the booty captured at Longula and Satricum was deposited for safety. (Dionys. viii. 5, 36.) During the subsequent long-continued struggle of the Aequians and Volscians against Rome, Ecetra is repeatedly mentioned: it appears to have been one of the Volscian cities nearest to the Aequians, and which subsequently afforded a point of junction for the two allied nations. In accordance with this, we find Q. Fabius Vibulanus, in the campaign of B. C. 459, after defeating the Aequians on Mount Algidus, advancing against Ecetra, the territory of which he laid waste, but without venturing to attack the city itself. (*Liv.* iii. 4, 10; Dionys. x. 21.) On this occasion we are expressly told that Ecetra was at this time the most important city of the Volscians, and occupied the most advantageous situation (Dionys. *l. c.*): hence the Roman armies repeatedly adopted the same tactics, that of the one consul marching by Algidus upon Ecetra, the other along the low country near the coast upon Antium. (Liv. vi. 31.) After the Gallic War, when the Volscian power was beginning to decline, Ecetra and Antium appear to have assumed a position in some degree independent of the other cities, and, from their proximity to Rome, as well as their importance, seem to have generally borne the brunt of the war; but there is no authority for Niebuhr's assumption, that where we find the Volscians mentioned at this period we must understand it of these two cities only. (Nieb. vol. ii. p. 583.) The last occasion on which Ecetra is *directly* named by Livy is in the campaign of B. C. 378 (vi. 31): we have no account of its conquest or destruction, but its name totally disappears from this period, and is only met with again in Pliny's list of the extinct cities of Latium. (Plin. iii. 5. s. 9.)

The only clue to its position is what we may gather from the passages above cited, that it was situated on the NE. frontier of the Volscians, towards the Aequians and Mt. Algidus: and, in accordance with this, an incidental notice in Livy (iv. 61) speaks of a pitched battle with the Volscians "between Ferentinum and Ecetra." The suggestion of Abeken, that it was situated at *Monte Fortino*, and that the remains of ancient walls visible on the summit of the hill above that town (ascribed by Gell and Nibby to Artena) are those of the citadel of Ecetra, is at least highly plausible. (Abeken, *Mittel Italien*, p. 73.) The ruins are described by Gell (*Top. of Rome*, p. 110) and Nibby (*Dintorni*, vol. i. p. 263.) The site is still known as *La Civita;* and the position of this hill, forming a kind of advanced post, projecting from the great mass of the Volscian mountains, and facing both the Aequians and Mt. Algidus, precisely corresponds with the part assigned to Ecetra in the Roman history. [E. H. B.]

ECHEDAMEIA (Ἐχεδάμεια), a town of Phocis, destroyed in the Sacred War. Its site is unknown: it is enumerated by Pausanias between Medeon and Lilaeaea. (Paus. x. 3. § 2.)

ECHE'LIDAE. [ATTICA, p. 325, b.]

ECHETLA (Ἐχέτλα: *Eth.* Ἐχετλαῖος, Steph. B.), a city or fortress of Sicily, on the confines of the Syracusan territory. It is first mentioned by Diodorus, who tells us that it was occupied in B. C. 309 during the absence of Agathocles in Africa) by a body of troops in the Syracusan service, who from thence laid waste the territories of Leontini and Catana. But it was soon after reduced, notwithstanding the strength of its position, by Xenodicus of Agrigentum, who restored it to liberty. (Diod. xx. 32.) It is again mentioned by Polybius (i. 15) as a place situated on the confines of the Syracusan territory (as this existed under Hieron II.), and that of the Carthaginians: it was besieged by the Romans at the outset of the First Punic War. These are the only notices found of Echetla, and the name is not mentioned by Cicero or the Geographers. But the above data point to a situation in the interior of the island, somewhere W. of Syracuse; hence Fazello and Cluver are probably correct in identifying it with a place called *Occhiala* or *Occhula*, about 2 miles from the modern town of *Gran Michele*, and 6 miles E. of *Caltagirone*, where, according to Fazello, considerable ruins were still visible in his time. The town occupied the summit of a lofty and precipitous hill (thus agreeing with the expressions of Diodorus of the strong position of Echetla), and continued to be inhabited till 1693, when it suffered severely from an earthquake; and the inhabitants consequently migrated to the plain below, where they founded the town of *Gran Michele*. (Fazell. x. 2, pp. 446, 450; Amic. *Lex. Topog. Sic.* vol. ii. p. 150; Cluver. *Sicil.* p. 360.) [E. H. B.]

ECHIDO'RUS (Ἐχείδωρος, Scyl. p. 26; Ἐχέδωρος, Ptol. iii. 13. § 4), a small river of Macedonia, which rises in the Crestonaean territory, and after flowing through Mygdonia empties itself into a lagoon close to the Axius (Herod. vii. 124, 127). It is now called the *Gallikó:* Gallicum was the name of a place situated 16 M. P. from Thessalonica, on the Roman road to Stobi (*Peut. Tab.*). It is probable that when the ancient name of the river fell into disuse, it was replaced by that of a town which stood upon its banks, and that the road to Stobi followed the valley of the Echidorus. (Leake, *Northern Greece*, vol. iii. pp. 437, 439.) [E. B. J.]

ECHI'NADES (*al* Ἐχῖναι νῆσοι, Hom.; *al* Ἐχινάδες νῆσοι, Herod., Thuc., Strab.), a group of numerous islands off the coast of Acarnania, several of which have become united to the mainland by the alluvial deposits of the river. Herodotus says that half of the islands had been already united to the mainland in his time (ii. 10); and Thucydides expected that this would be the case with all of them before long, since they lay so close together as to be easily connected by the alluvium brought down by the river (ii. 102). This expectation, however, has not been fulfilled, which Pausanias attributed (viii. 24. § 11) to the Achelous bringing down less alluvium in consequence of the uncultivated condition of Aetolia; but there can be little doubt that it is owing to the increasing depth of the sea, which prevents any perceptible progress being made.

The Echinades are mentioned by Homer, who says that Meges, son of Phyleus, led 40 ships to Troy from "Dulichium and the sacred islands Echinae, which are situated beyond the sea, opposite Elis." (Hom. *Il.* ii. 625.) Phyleus was the son of Augeas, king of the Epeians in Elis, who emigrated to Dulichium because he had incurred his father's anger. In the Odyssey Dulichium is frequently mentioned along with Same, Zacynthus, and Ithaca as one of the islands subject to Ulysses, and is celebrated for its fertility. (Hom. *Od.* i. 245, ix. 24, xiv. 397, xvi. 123, 247; *Hymn. in Apoll.* 429; Πολύπυρον, *Od.* xiv. 335, xvi. 396, xix. 292.) The site of Dulichium gave rise to much dispute in antiquity. Hellanicus supposed that it was the ancient name of Cephallenia; and Andron, that it

Digitized by Google

was one of the cities of this island, which Pherecydes supposed to be Pale, an opinion supported by Pausanias. (Strab. x. p. 456; Paus. vi. 15. § 7.) But Strabo maintains that Dulichium was one of the Echinades, and identifies it with DOLICHA (ἡ Δολίχα), an island which he describes as situated opposite Oeniadae and the mouth of the Acheloüs, and distant 100 stadia from the promontory of Araxus in Elis (x. p. 458). Dolicha appears to be the same which now bears the synonymous appellation of *Makri*, derived from its long narrow form. (Leake, *Northern Greece*, vol. iii. p. 574.) Most modern writers have followed Strabo in connecting Dulichium with the Echinades, though it seems impossible to identify it with any particular island. It is observed by Leake that "*Petalá*, being the largest of the Echinades, and possessing the advantage of two well-sheltered harbours, seems to have the best claim to be considered the ancient Dulichium. It is, indeed, a mere rock, but being separated only by a strait of a few hundred yards from the fertile plains at the mouth of the Achelous and river of Oenia, its natural deficiencies may have been there supplied, and the epithets of 'grassy' and 'abounding in wheat,' which Homer applies to Dulichium (*Od.* xvi. 396),—

Δουλιχίου πολυπύρου, ποιήεντος,

may be referred to that part of its territory." But Leake adds, with justice, that "there is no proof in the Iliad or Odyssey that Dulichium, although at the head of an insular confederacy, was itself an island: it may very possibly, therefore, have been a city on the coast of Acarnania, opposite to the Echinades, perhaps at *Tragamesti*, or more probably at the harbour named *Pandokimona* or *Platyá*, which is separated only by a channel of a mile or two from the Echinades."

Homer, as we have already seen, describes the Echinades as inhabited; but both Thucydides and Scylax represent them as deserted. (Thuc. ii. 102; Scylax, p. 14.) Strabo simply says that they were barren and rugged (x. p. 458). Stephanus B. names a town Apollonia situated in one of the islands (*s. v.* Ἀπολλωνία). Pliny gives us the names of nine of these islands,—Aegialia, Cotonis, Thyatira, Geoaris, Dionysia, Cyrnus, Chalcis, Pinara, Mystus (iv. 12. s. 19). Another of the Echinades was Artemita (Ἀρτεμίτα), which became united to the the mainland. (Strab. i. p. 59; Plin. iv. 1. s. 2.) Artemidorus spoke of Artemita as a peninsula near the mouth of the Achelous, and Ithianus connected it with the Oxeiae. (Steph. B. *s. v.* Ἀρτεμίτα.) The Oxeiae (*αἱ Ὀξεῖαι*) are sometimes spoken of as a separate group of islands to the west of the Echinades (comp. Plin. iv. 12. s. 19), but are included by Strabo under the general name of Echinades (x. p. 458). The Oxeiae, according to Strabo, are mentioned by Homer under the synonymous name of Thoae (Θοαί, *Od.* xv. 299).

The Echinades derived their name from the echinus or the "sea-urchin," in consequence of their sharp and prickly outlines. For the same reason they were called Oxeiae, or the "Sharp Islands," a name which some of them still retain under the slightly altered form of *Oxiés*. Leake remarks that "the Echinades are divided into two clusters, besides *Petalá*, which, being quite barren and close to the mainland, is not claimed, or at least is not occupied by the Ithacans, though anciently it was undoubtedly one of the Echinades. The northern cluster is commonly called the *Dhragonara*, from *Dhragonára*, the principal island: and the southern, the *Oxiés* or *Scorpis*. By the Venetians they were known as the islands of *Kurtolari*, which name belongs properly to a peninsula to the left of the mouth of the Acheloüs, near *Oxiá*. Seventeen of the islands have names besides the four *Meathia*, two of which are mere rocks, and nine of them are cultivated. These are, beginning from the southward:—*Oxiá*, *Mati*, *Vromona*, *Pondikonisi*, *Karlonisi*, *Prorati*, *Lombrino*, *Sgili*, *Dhragonara*. *Oxiá* alone is hilly. *Makri* and *Vromona* are the two islands next in importance." (Kruse, *Hellas*, vol. ii. pt. ii. p. 455, seq.; Leake, *Northern Greece*, vol. iii. pp. 560, 570, 580, seq.; Mure, *Tour in Greece*, vol. i. p. 104.)

ECHINUS (Ἔχινος: *Eth.* Ἐχινεύς, Polyb. v. 41). 1. A town of Phthiotis in Thessaly, situated upon the Maliac gulf, between Lamia and Larisa Cremaste, in a fertile district. (Strab. ix. pp. 433, 435; Polyb. ix. 41; comp. Aristoph. *Lysist.* 1163.) It was said to derive its name from Echinus, who sprang from the dragon's teeth. (Scymn. Ch. 602; comp. Steph. B. *s. v.*) Demosthenes says that Echinus was taken by Philip, the father of Alexander the Great, from the Thebans (Dem. *Phil.* iii. p. 120); but whether he means the Thessalian town, or the one in Acarnania of the same name, is uncertain. At a later time we find the Thessalian Echinus in the hands of the Aetolians, from whom it was taken by the last Philip, after a siege of some length (Polyb. ix. 41, seq., xvii. 3, xviii. 21; Liv. xxxii. 33, xxxiv. 23.) Strabo mentions it as one of the Grecian cities which had been destroyed by an earthquake. (Strab. i. p. 60.) Its site is marked by the modern village of *Akhinó*, which is only a slight corruption of the ancient name. The modern village stands upon the side of a hill, the summit of which was occupied by the ancient Acropolis. Dodwell remarks that it appears, as well from its situation as its works, to have been a place of great strength. "Opposite the Acropolis, at the distance of a few hundred paces, is a hill, where there are some ruins and foundations of large blocks, probably a temple." (Dodwell, vol. ii. p. 80; Leake, *Northern Greece*, vol. ii. p. 20.)

2. A town in Acarnania, also said to have been founded by Echion. It was mentioned by the poet Rhianus, and occurs in the list of Acarnanian towns preserved by Pliny, where it is placed between Heraclia and Actium. Leake places it at *Ai Vasili*, remarking that, "from Stephanus and the poet Rhianus, it is evident that Echinus was an Acarnanian town of some importance: the story attached to it shows that it was one of the early colonies of this coast; the ruins at *Ai Vasili* indicate a remote antiquity, and their safe position on a mountain removed from the sea, is in conformity with that which is generally found in the early foundations of the Greeks." (Steph. B. *s. v.* Ἔχινος; Plin. iv. 2; Leake, *Northern Greece*, vol. iv. p. 23, seq.)

ECNOMUS (Ἔκνομος), a hill on the S. coast of Sicily, between Agrigentum and Gela, at the mouth of the river Himera (*Salso*). According to Diodorus (xix. 108), the tyrant Phalaris had a castle on this hill, in which he kept his celebrated brazen bull, and the spot derived its name from this circumstance. The etymology is obviously fanciful; but it seems clear that the site was inhabited at an early period, though there was no city there, for Plutarch tells us that Dion, in his advance against Syracuse (B.C. 357), was joined by the Agrigentine knights who

Digitized by Google

dwelt about Ecnomus. (Plut. *Dion.* 26.) It was subsequently occupied and fortified by the Carthaginians in their wars against Agathocles; and, in B.C. 311, witnessed a great defeat of the Syracusan tyrant by the former people. On this occasion the Carthaginians under Hamilcar had established their camp immediately adjoining Ecnomus, on the right bank of the Himera; while Agathocles occupied a hill on the opposite side of the river, where there was also a fortified post, ascribed to Phalaris, and called after him Phalarium. The details of the action, as related by Diodorus (xix. 107—110), entirely agree with this account of the position of the two armies, and with the actual nature of the ground: the localities have been fully described by D'Orville (*Sicula*, pp. 112, 113), who has clearly established the true position of Ecnomus. The hill to which the name was given is the extremity of a range of small elevation, extending between the sea and a plain about six miles in length, which stretches from thence to the river Himera. It was in this plain that the great slaughter of the troops of Agathocles took place, in their flight, after they were driven back from the Carthaginian camp. At the foot of the hill of Ecnomus, on a projecting tongue of land immediately W. of the mouth of the Himera, stands the modern town of *Licata* or *Alicata*, from which the hill above it derives the name of *Monte di Licata*. On the slope of this hill towards the sea, but above the modern town, are the ruins of an ancient city, unquestionably those of Phintias, founded by the Agrigentine despot of that name about B.C. 280; but which were regarded by Fazello and the earlier topographers as those of Gela, a mistake which threw the whole geography of this part of Sicily into confusion. (Cluver. *Sicil.* pp. 211, 214; D'Orville, *l.c.*) [GELA.] The name of Ecnomus is again mentioned by Polybius (i. 25) in the First Punic War, B.C. 256, when the Roman fleet under L. Manlius and M. Regulus touched there in order to take on board the land forces destined for the African expedition: these troops were encamped apparently on the hill, which would account for the otherwise singular omission of the name of Phintias.* [E.H.B.]

ECRON (Ἀκκάρων), one of the 5 cities of the Philistines (1 *Sam.* v. 10, 11, vi. 17), in the northern border of Judah (*Josh.* xv. 11.); but assigned to the children of Dan (xix. 43.), and accordingly ascribed to that tribe in Eusebius (*Onomast. s. v.*), where St. Jerome adds "ut ego arbitror in tribu Juda." They place it between Azotus and Jamnia to the east, and St. Jerome mentions that it was sometimes supposed to be identical with Strato's Tower, afterwards Caesarea—a manifest and inexplicable error. Its site is preserved by the modern village of *Akir*, NW. of Ramleh in the great plain. (Robinson, *Bib. Res.* vol. iii. pp. 22—24. [G. W.]

ECTINI. The name of this people occurs in the Trophy of the Alps, as preserved by Pliny (iii. 20). In the inscription on the arch at Segusio (*Susa*), the name Egdinii occurs, and it is supposed that the two names mean the same people. It is conjectured that they may have been in the valley of the *Tinea*, a river which flows down from near *Barcelonette* into the *Var*; and in that part which is called the *Val St. Etienne*, according to some modern authorities, where there are said to be Roman remains. This opinion of the site of the Ectini seems to rest on the resemblance of the name to that of the *Tinea*, which is not much. [G. L.]

EDEBESSUS (Ἐδεβησσός: *Eth.* Ἐδεβησσεύς, Ἐδεβήσσιος), a city of Lycia, for which Stephanus B. (*s. v.*) quotes Capito. [G. L.]

EDENA'TES, are mentioned in the inscription on the Trophy of the Alps. (Plin. iii. 20). The name of the Adanates occurs on the arch at Segusio (*Susa*), and D'Anville considers it the same as the name Edenates, but others do not. The difference is certainly not much; but the object of the two inscriptions is not the same. D'Anville conjectures that "the name of Sedena, which is that of the little town of *Seine*, in the north of Provence, in the diocese of Embrun, on the borders of that of *Digne*," may indicate the site of the Edenates. *Seine* was called Sedena in the middle ages. [G. L.]

EDESSA (Ἔδεσσα: *Eth.* Ἐδεσσαῖος, Ἐδεσσηνός), the ancient capital of Macedonia, was seated on the Egnatian way, at the entrance of a pass, which was the most important to the kingdom, as leading from the maritime provinces into Upper Macedonia, and, by another branch of the same pass, into Lyncestis and Pelagonia. (Polyb. v. 97. § 4, xxxiv. 12. § 7; Strab. vii. p. 323, x. p. 449; Ptol. iii. 13. § 39, viii. 12. § 7; *Itin. Anton.*; *Itin. Hierosol.*; *Peut. Tab.*; Hierocl.; Const. Porph. *de Them.* ii. 2.) Aegae and Edessa, though some have considered that they were different towns, are no doubt to be considered as identical, the former being probably the older form. (Comp. Niebuhr, *Lect. on Anc. Hist.* vol. ii. p. 254, trans.; Tafel, *Thessal.* p. 308, *de Viae Egnat. Parte Occid.* p. 48.) The commanding and picturesque site upon which the town was built was the original centre of the Macedonians, and the residence of the dynasty which sprang from the Temenid Perdiccas. The seat of government was afterwards transferred to the marshes of Pella, which lay in the maritime plain beneath the ridge through which the Lydias forces its way to the sea. But the old capital always remained the national hearth (ἑστία, Diod. *Excerpt.* p. 563) of the Macedonian race, and the burial-place for their kings. The body of Alexander the Great, though by the intrigues of Ptolemy it was taken to Memphis, was to have reposed at Aegae (Paus. i. 6. § 3),—the spot where his father Philip fell by the hand of Pausanias (Diod. xvi. 91, 92). The murdered Eurydice and her husband were buried here by order of Cassander, after having been removed from Amphipolis. (Diod. xix. 52; Athen. iv. p. 155.) Pyrrhus, king of Epirus, when he had taken the town, gave up the royal tombs to be rifled by his Gallic mercenaries, in hopes of finding treasure. (Plut. *Pyrrh.* 26.) After the Roman conquest, Edessa ("nobilis urbs," Liv. xlv. 30) belonged to the third region; and imperial coins, ranging from Augustus to Sabinia Tranquillina, wife of the third Gordian, have been found, with the epigraph ΕΔΕΣΣΑΙΩΝ. (Eckhel, vol. ii. p. 71; Sestini, *Mon. Vet.* p. 37.)

In the reign of Basil II., Bodena (Βοδηνά, Cedren. vol. ii. p. 705; Glycas, p. 309),—whence the modern name,—which was strongly fortified, was one

* Arnold, apparently misled by the marginal note in Schweighäuser's Polybius (vol. i. p. 69), has given the name of "Battle of Ecnomus" to the great sea fight in which Manlius and Regulus defeated the Carthaginian fleet on their way to Africa: but it is quite clear, both from Polybius (i. 25) and from Zonaras (viii. 12), that this battle took place off Heraclea Minoa, to which point the Roman fleet had proceeded from Ecnomus.

Digitized by Google

of the Bulgarian conquests of that emperor. (Le Beau, *Bas Empire*, vol. xiv. p. 195.)

Vodhená, in the grandeur of its situation, in the magnificence of the surrounding country, and the extent of the rich prospect which it commands, is not inferior to any situation in Greece. Notwithstanding its ancient importance, the Hellenic remains are few; the site, from its natural advantages, has doubtlessly been always occupied by a town, and new constructions have caused the destruction of the more ancient. The only vestige of Hellenic fortifications that has been discovered is a piece of wall which supports one of the modern houses on the edge of the cliff; but there are many scattered remains in the town, among which are some inscriptions of the time of the Roman Empire. (Leake, *Northern Greece*, vol. iii. pp. 272—279.) [E.B.J.]

EDESSA (ἡ Ἔδεσσα: *Eth.* Ἐδεσσαῖος, Ἐδεσσηνός), a town of great importance in the northern extremity of Mesopotamia, in the province of Osrhoëne, which itself is said to have derived its name from one of the early kings of the town. (Dionys. Patr. ap. Assem. ii. p. 98; Procop. *B. P.* ii. 17.) It was situated on the river Scirtus (now *Daisan*), a small tributary of the Euphrates, and was distant about 40 miles from Zeugma (*Itin. Ant. l. c.*), and a day's journey from Batna (Procop. *B. P.* ii. 12). Accounts differ as to the date of its foundation, some placing it extremely early, and ascending to mythical times, as St. Isidore, who attributes its origin to Nembroth or Nimrod, and St. Ephrem, who says Nimrod ruled at Arach and Edessa (*Comment. in Genesim.*) It is, however, most likely that Appian is correct in stating that it was really built by Seleucus, and that it was one of the many towns built or restored about the same period of history to which European names were given by the Macedonian rulers. (*Syr.* 57.) The same statement is made by Cedrenus (i. p. 166). Its position has not been clearly noted by some ancient writers. Thus Stephanus and Strabo placed it in Syria, the latter confounding it with Hierapolis, and stating that, like it, it bore anciently the name of Bambyce (Βαμβύκη, xvi. p. 748). Pliny asserts that it was in Arabia, and was called Antiocheia-Calirrhoes, from a fountain of that name which existed in the city (v. 24. s. 21). This position is certainly wrong; but the remark is curious, as it connects the town with some notices in other authors. Thus Stephanus (*l. c.*) states that it was called Edessa from the force of its waters (διὰ τὴν τῶν ὑδάτων ῥύμην οὕτω κληθεῖσα), and from the town of the same name in Macedonia; while, in his list of the places which bore the name of Antiocheia, the 8th is designated ἡ ἐπὶ τῆς Καλιῤῥόης λίμνης. Ancient coins of Edessa abound between the ages of Commodus and Trajanus Decius; the majority of them reading, on the reverse, ΚΟΛ. Μ. ΕΔΕϹϹΑ or ΕΔΕϹΑ, or with the insertion of the title "Metropolis," ΚΟΛ. ΜΑΚ. ΕΔΕϹϹΑ. ΜΗΤΡ. The exact meaning of the second word ΜΑΚ. has not been satisfactorily explained; but we cannot help suspecting that it refers to the popular belief in the Macedonian origin of the city, ΚΟΛ. ΜΑΚ. being short for ΚΟΛΩΝΙΑ ΜΑΚΕΔΟΝΩΝ. The obverses present busts of the Abgari or local rulers, and of the contemporaneous Roman emperors. There exists, too, a peculiar class of autonomous Greek copper coins, all of which bear on the obverses heads of Antiochus IV., and are perfectly alike in their fabric and art. Their reverses bear respectively the names of an Antiocheia in Ptolemais, Mygdonia, and near Daphne; the fourth has been till this time undetermined. It reads ΑΝΤΙΟΧΕΩΝ ΤΩΝ ΕΠΙ ΚΑΛΛΙΡΟΗΙ. With the evidence stated above, we make no doubt that this coin belongs to the 8th Antiocheia of Stephanus, one of the names, as it appears, of Edessa, and the title whereby it may have been usually recognised during the period of Antiochus IV. There is no reasonable objection to the belief that the modern town of *Urfah* or *Urfah* represents the site of the ancient Edessa. (Tavernier, ii. 4; Pococke, ii. p. 232; Niebuhr, i. p. 407.) In this instance the most ancient name appears to have been preserved, Isidorus speaking of Μαννούῤῥα, evidently the Orrha of Manuus, who was one of the kings of Edessa.

Little is known of the history of Edessa, subsequently to its foundation by Seleucus, till Christian times: but during the wars between the Graeco-Roman empire and the Persians, and in Ecclesiastical history, Edessa plays a very prominent part. Many notices of the events of the period may be found in the following authorities. (Procop. *B. P.* i. 17, &c., *B. G.* iv. 14, &c., *de Aedific.* ii. 7; Evagrius, *H. E.* iv. 8—26; Malala, *Chron.* 17. p. 418; Hieroel. p. 714; Dionys. Patriarch. ap. Assem. *l. c.*; Theophanes and Cedrenus.) It appears that the town suffered as much from natural causes as from the attacks of enemies. Of these, the river Scirtus was the principal cause, no less than four destructive floods being recorded in the Chronicon Edessenum (ap. Assem. p. 386) and other works. In A. D. 718 the town was nearly destroyed by an earthquake (Dionys. Patr. ap. Assem. ii. p. 259), yet the work of restoration (commenced by Justinian after one of the floods, Procop. *de Aedif.* ii. 7) must have been rapid, or the importance of the place itself very great, since it appears from the Chronicon of Bar Hebraeus, that as late as A. D. 1184 there were in less than 15 large churches which fell into the hands of the Saracens. (Assem. ii. p. 368). In A. D. 1265 it is coupled with other deserted and ruined towns, such as Beroea and Haran, by Maphrianus. (Assem. ii. p. 260.) Since then, it has never risen to its former greatness, though it is and has been a place of some importance for the inland trade between Kurdistan and Aleppo. The original government of Edessa appears to have been vested in kings or petty princes, more or less dependent on the neighbouring empires, first on the rulers of the Syro-Macedonian dynasty, and then under the Roman and Byzantine emperors. The local names of the kings were Abgarus and Mannus; titles which appear to have been preserved among them, like the names of the Pharaohs and Ptolemies in Egypt. These names are found (as stated before) on the Greek coins of Edessa, till the time of Trajanus Decius. A series of them is given by Dionysius (ap. Assem. *l. c.*), and many of them are mentioned in the histories of the times (Procop. *Bell.* iv. 17., Eusebius, and the *Chronicon Edessenum*).

Edessa was celebrated in Christian times for its schools of theology, to which students came from great distances. Of these, the most important was the *Schola Persica*. This school appears to have been limited to Christians of the Persian nation. The professors are memorable in history for the part they took in the Nestorian controversy, under the guidance of John, Patriarch of Antioch, and Ibas, Bishop of Edessa, A. D. 449—457, against St. Cyril. It is clear from a letter of Beth Arsamensis, and from the Chronicon Edessenum, that their Nestorian

Digitized by Google

teaching was the cause of the ruin of this school. The professors were expelled by Martyrus, Bishop of Edessa, and the school itself pulled down by order of Zeno the Roman emperor, A. D. 489, and a church dedicated to St. Mary was built on its ruins. (Simeon Beth Arsamensis ap. Assem. i. p. 353; Chron. Edess. ap. Assem. i. p. 406; Theodor. *H. E.* ii. 558. 566.) The expulsion of the professors was doubtless one chief cause of the immediate and subsequent spread of the Nestorian heresy. There was, besides the Schola *Persica*, at least one other school for miscellaneous pupils and learning. St. Epiphanius shows that the Syriac language was in his day much studied by the Persians (*Haeres.* 66), and it is manifest that Edessa was for many years the principal seat of Oriental learning. [V.]

COIN OF EDESSA IN MESOPOTAMIA.

EDE'TA or LEI'RIA (Ἥδητα ἡ καὶ Λείρια, Ptol. ii. 6. § 63), the chief city of the EDETANI, one name of which is still retained by the town of *Lyria*, where there are ruins and inscriptions. (Laborde, *Itin. de Espagne*, vol. i. p. 259.) [P. S.]

EDETA'NI (Ἥδηταvοί, Ptol. ii. 6. § 15; Plin. iii. 3. s. 4) or SEDETA'NI (Liv. xxiv. 20, xxviii. 24; Sil. Ital. iii. 371, foll.; Σιδηταvοί, Strab. iii. p. 165), a people of Hispania Tarraconensis, E. of the Celtiberi, Bastetani, and Contestani. Their country, EDETANIA, comprised the district lying between the rivers Iberus (*Ebro*) and Sucro (*Jucar*), and bounded by the mountains of Celtiberia on the W. (Concerning the occupation of parts of their territory by the Ilercaones and the Suessetani, see the articles.) It corresponded to the N. part of *Valencia*, and the S. part of *Aragon*. It was traversed by several rivers running from NW. to SE., the chief of which was the TURIA (*Turia* or *Guadalaviar*), and in its NE. part were some tributaries of the Iberus. The Edetani possessed some very celebrated cities. In the extreme NW., on the Iberus, was CAESARAUGUSTA (*Zaragoza*); and in the SE. were SAGUNTUM (*Murviedro*), on the Pallantia (*Palancia*), the modern capital VALENTIA (*Valencia*), on the Turia, and SUCRO (*Cullera?*), on the river of the same name, their last city on this side. These three cities lay upon the high road from Tarraco to Carthago Nova, the other cities upon which were as follows, beginning from Dertosa, on the left bank of the Iberus: ICTIBILI, 27 M. P. (*Itin. Ant.* p. 399: prob. *S. Mateo*); ILDUM, 24 M. P. (*Itin.* ib.: prob. *Villa de Cabanes*); SEPELACI (*Itin.* p. 400: prob. *Burriana*, near *Villa Real*); Saguntum 22 M. P., Valentia 16 M. P., Sucro 20 M. P. Between this road and the coast were: IBERA, on the right bank of the Iberus, near its mouth; ETOVISSA (Liv. xxi. 22; Ἠτόβησσα, Ptol.: prob. *Oropesa*), on the coast, NE. of Sepelaci; and, in the neighbourhood of Saguntum, Strabo mentions CHERRONESUS, OLEASTRUM, and CARTALIAS (Strab. iii. p. 159). The other principal places were: EDETA, the capital; HISMONICA (Liv. xxii. 20, where the reading is doubtful); TUBBA (Liv. xxxiii. 44: prob. *Tuejar* on the *Guadalaviar*); SEGOBRIGA (*Legorbe*, inscr. and coins ap. Vaillant, *Num. Imp.* vol. i. pp. 64, 116; Florez, *Esp. S.* vol. v. p. 21, vol. viii. p. 97, *Med. de Esp.* vol. ii. pp. 573, 650; Mionnet, vol. i. p. 50, *Suppl.* vol. i. p. 102; *Num. Goth.*; Eckhel, vol. i. p. 56); there are also Roman inscriptions at *Bezis*, E. of *Segorbe*; OSSIGERDA (Ὀσσιγέρδα, Ptol.: *Eth.* Ossigerdenses, Plin. iii. 3. s. 4; coins ap. Florez, *Med. de Esp.* vol ii. p. 532, vol. iii. p. 109; Mionnet, vol. i. p. 47, *Suppl.* vol. i. p. 95; Sestini, p. 177: prob. *Ossera* near *Zaragoza*); LEONICA (Λεονίκα, Plin. Ptol. *ll. cc.*: prob. *Alcaniz* in *Aragon*); DAMANIA (Δαμανία, Ptol.: *Eth.* Damanitani, Plin. *l. c.*), S. of Caesaraugusta; BELIA, a municipium (Βέλεια, Ptol.: *Eth.* Belitani, Plin. *l. c.*: prob. *Belchite*; Sestini, *Med. Isp.* p. 105): these four places had the civitas Romana and belonged to the conventus of Caesaraugusta. (Ukert, vol. ii. pt. 1. pp. 413, foll.) [P. S.]

EDOMI'TAE. [IDUMAEA.]

EDO'NES (Ἤδωνες, Strab. x. p. 470, xv. p. 687) or EDO'NI (Ἤδωνοι, Steph. B., Plin. iv. 11), a Thracian people, whose name was often used by the Greek and Latin poets to express the whole of the nation of which they formed a part. (Aesch. *Pers.* 493; Soph. *Ant.* 955; Eurip. *Hec.* 1153; Ov. *Met.* xi. 69, *Trist.* iv. 1. 42; Propert. i. 3. 5; Hor. *Carm.* ii. 7. 27.) It appears from Thucydides (ii. 99) that this Thracian clan once held possession of the right bank of the Strymon, as far as Mygdonia, but were driven from this by the Temenid princes of Macedonia. Afterwards they are found occupying, on the left bank of the Strymon, the district called EDONIS (Ἠδωνίς, Ptol. iii. 13. § 31), which extended from Lake Cercinitis as far E. as the river Nestus, between the spurs of Mt. Orbelus, and the Pieres to the S. (Comp. Herod. v. 11, vii. 110, 114; Thuc. iv. 102, 109.) Edonis was included in the first region of Macedonia, after the Roman conquest, B. C. 167. (Liv. xlv. 29.) The following are the principal towns of this important district: AMPHIPOLIS, with its harbour EION; MYRCINUS; PHAGRES; OESYMA; GASORUS; DOMERUS; PHILIPPI; DRABESCUS; NEAPOLIS; ACONTISMA; TRAGILUS; PERGAMUS.

A large coin of Geta, king of the Edoni, has been published by Mr. Millingen, the characters on which agree with the time when the Edoni possessed Drabescus and the Nine Ways, and had therefore the power of working some of the mines. It has been supposed that the coins of the Orescii, with the type, a satyr carrying off a nymph, belong to Edonis or its vicinity. The Satyrs were the Satrae, and refer to the worship of Dionysus in the mountains Pangaeum and Orbelus. (Herod. vii. 111.) Apollodorus (iii. 5) has handed down some traditions showing the connection between the kings of the Edoni, and the legends about Dionysus and the Satyrs. (Leake, *Northern Greece*, vol. iii. p. 213.) [E. B. J.]

EDO'NIS. [ANTANDRUS.]

EDREI (Ἐδρεΐ, LXX.; Ἀδρά, Euseb.), a town of the half tribe of Manasseh, beyond Jordan, mentioned with Ashtaroth (*Josh.* xiii. 31) as a city of the kingdom of Og in Bashan. Eusebius places it 20 miles from Bozra. (*Onomast. s. v.* Ἀσαρώθ.) The Arabian geographers mention a village under the name of *Edhra* in the *Hauran*, which has been identified with Edrei, by Dr. Robinson. (*Bib. Res.* vol. iii. Append. p. 155.) Burckhardt had supposed it to be represented by *Ed-Doad*, a village between *Daad* and *Mezmeib*, to the east of the *Hadj* road, between

Digitized by Google

Busrah and *Adjlun*. (*Travels*, p. 241.) The site of *Edhra* is not so accurately defined, but Dr. Robinson says, "it is nearer to *Busrah* than is *Deraa*, according to my information." [G. W.]

EDROS, an island off the coast of Britain, mentioned by Ptolemy (ii. 2. § 12) as one of the four islands eastward of Hibernia, viz.: Monaœda, Mona, Edros (desert), Leunos (desert). Another reading is Odros: Adros and Andros, also Edros,= *Bardsey Island* of the coast of Wales. [R. G. L.]

EDRUM (*Idro*), a town of Gallia Transpadana, situated on a considerable lake, now called the *Lago d'Idro*, formed by the river Cleusis or *Chiese*. Neither the lake nor the town is mentioned by any ancient author, but an inscription cited by Cluver (*Ital.* p. 108) proves the name and existence of the latter: it was probably not a municipal town, but a dependency of Brixia. [E. H. B.]

EETIONEIA. [Athenae. p. 308, a.]

EGDINII. [Ectini.]

EGELASTA. [Celtiberia.]

EGESTA. [Segesta.]

EGE'TA, AEGE'TA (Ἔγηταor Ἔτητα, Ptol. iii. 9. § 4), a town on the Danube in Moesia, near the spot where Trajan built his bridge across the river. According to the Notitia Imp. (30), its garrison consisted of a division of the thirteenth legion and a squadron of cavalry. (*Itin. Ant.* 218; Geogr. Rav. iv. 7.) [L. S.]

EGITA'NIA (*Idanna la Vieja*, W. of *Coria*, on the *Ponsul*), a city of Lusitania, only known by the inscriptions found among its extensive ruins. It was also called Igedita. (Gruter, p. 162, No. 31; Florez, *Esp. S.* vol. xiv. p. 137; Ukert, vol. ii. pt. 1. p. 397.) [P. S.]

EGNA'TIA or GNA'TIA (Ἐγνατία or Ἰγνατία: *Eth.* Γναθινος, Inscr.; Ignatinus, *Lib. Col.* p. 262), a considerable town of Apulia, situated on the sea-coast between Barium and Brundusium. The Itineraries place it at 27 M. P. from the former, and 29 from the latter city. (*Itin. Ant.* pp. 117, 315; *Tab. Peut.*) Both Strabo and Ptolemy mention it as a city of the Peucetians or southern Apulians: and Pliny also assigns it to the Pediculi (the same people with the Peucetians), though he elsewhere less correctly describes it as a town of the Sallentines. It must indeed have been the last city of the Peucetians towards the frontiers of Calabria. (Strab. vi. p. 282; Ptol. iii. 1. § 15; Mel. ii. 4; Plin. ii. 107. s. 111, iii. 11. s. 16.) Horace, who made it his last halting-place on his journey to Brundusium, tells us that it suffered from the want of good water*, and ridicules the pretended miracle (noticed also by Pliny) shown by the inhabitants, who asserted that incense placed on a certain altar was spontaneously consumed without the application of fire. (Hor. *Sat.* i. 5. 97—100; Plin. ii. 107. s. 111.)

No mention of it is found in history, and it seems to have derived its chief importance from its position on the high road to Brundusium, which rendered it a convenient halting-place for travellers both by land and sea. (Strab. *l. c.*) There is, however, no authority for the assertion of some Italian topographers (adopted from them by Cramer and others), that the road from hence along the coast to Barium and Canusium was named from this city the Via Egnatia, — still less that it gave name to the celebrated military road across Macedonia and Thrace, from Apollonia to the Hellespont. It appears probable, indeed, that the proper, or at least the original, name of the city was not Egnatia, but Gnatia; which form is found in Horace, as well as in some of the best MSS. of Pliny and Mela; and is further confirmed by a Greek inscription, in which the name of the people is written ΓΝΑΘΙΝΩΝ. (Tzschucke, *Not. ad Mel. l. c.*; Mommsen, *U. I. Dialekte*, p. 66.)

The period of the destruction of Egnatia is unknown, but its ruins are still visible on the sea-coast about 6 miles SE. of *Monopoli*. An old tower on the shore itself still bears the name of *Torre d'Agnazzo;* while considerable portions of the walls and other remains indicate the site of the ancient city a little more inland, extending from thence towards the modern town of *Fasana*. Numerous sepulchres have been excavated in the vicinity, and have yielded an abundant harvest of vases, terracottas, and other ancient relics, as well as a few inscriptions in the Messapian dialect. (Pratilli, *Via Appia*, iv. c. 15. p. 546; Romanelli, vol. ii. p. 146; Mommsen, *U. I. Dialekte*, p. 66.) [E. H. B.]

EGORIGIUM, a place mentioned in the Antonine Itin. and in the Table, on the road from Augusta Trevororum (*Trier*) to *Cologne*. The stations in the Table are Beda, 18 M. P.; Ausava, 18; Egorigium, 12. In the Table it is written Icorigium. The next station to Egorigium is Marcomagus (*Marmagen*), 12 M. P. Some geographers place Egorigium at *Kirchenbarcher*, not far from *Stadtkill* on the *Kill*, which flows into the *Mosel*, on the left bank. [G. L.]

EGO'SA. [Castellani.]

EGURRI. [Astures.]

EIDUMANNIA, in Britain, mentioned by Ptolemy (ii. 3. § 6) as a river between the prominence to the south of the Garrienus (*Yare*) and *Orford Ness*, and the Ἰάμισσα εἴσχυσις (*sic* in the current editions). Whatever may be the reading, this Ἰάμισσα means the *Thames*. Hence, the *Stour*, *Orwell*, *Blackwater*, or any of the Essex rivers may be the Eidumannia. The *Black*-water is the best: in which case the *dh* = the Welsh *dh*, Gaelic *dubh* = *black*. [R. G. L.]

EILE'SIUM (Εἰλέσιον), a town of Boeotia, of uncertain site, mentioned by Homer, the name of which, according to Strabo, indicates a marshy position. (Hom. *Il.* ii. 499; Strab. ix. p. 406; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 469.)

EĪON. 1. (Ἠιών: *Eth.* Ἠιονεύς, Steph. B.), a town and fortress situated at the mouth of the Strymon, 25 stadia from Amphipolis, of which it was the harbour. (Thuc. iv. 102.) Xerxes, on his return after the defeat at Salamis, sailed from Eion to Asia. (Herod. viii. 118.) The Persian Boges was left in command of the town, which was captured, after a desperate resistance, by the Athenians and their confederates, under Cimon. (Herod. vii. 107; Thuc. i. 98; comp. Paus. viii. 8. § 2.) Brasidas attacked it by land and by boats on the river, but was repulsed by Thucydides, who had come from Thasos with his squadron in time to save it. (Thuc. iv. 107.) It was occupied by Cleon; and the remains of his army, after their defeat at Amphipolis, mustered again at Eion. (Thuc. v. 10.) Extensive ruins of thick walls, constructed of small stones and mortar, among which appear many squared blocks

* This at least is the construction put by all the best commentators upon the phrase of Horace,— "Lymphis iratis exstructa:" but it is remarkable that modern topographers speak of the site as abounding in fresh water, and having one fountain in particular, still called the *Fonte d'Agnazzo*, which is one of the finest in the whole country. (Pratilli, *Via Appia*, p. 544; Romanelli, vol. ii. p. 146.)

Digitized by Google

the Hellenic style, have been found on the left nk of the Strymon beyond the ferry. These ruins ong to the Byzantine period, and have been attri- ted to a town of the Lower Empire, Κομιτίσση, ich the Italians have converted into *Contessa*. ese remains at the ferry stand nearly, if not ex- ly, on the site of Eion on the Strymon. (Leake, *rthern Greece*, vol. iii. p. 172.)

2. A town of Pieria. (Steph. B. *s. v.*; Eustath. *Hom. Il.* ii. p. 287.)

3. A colony of the Mendaeans, which was be- ed to the Athenians, and retaken by the Chalci- ns and Bottiaeans, B. C. 425 (Thuc. iv. 7); which stathius (*l. c.*) placed in the Chersonesus, but, as is much too remote for the Chalcidians to have rched thither to recover a town, Arnold (*ap. Thuc.*) supposed there might have been a fourth Eion, some point of the long and winding coast which nds from the Strymon to the Axius. [E. B. J.]

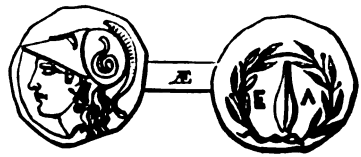
EION or EIONES (Ἠιών, Diod.; Ἠιόνες, Hom., ib.), a town in the Argolic peninsula, mentioned Homer along with Troezen and Epidaurus. It said to have been one of the towns founded by Dryopes, when they were expelled from their s in Northern Greece by Hercules. Strabo re- s that the Mycenaeans expelled the inhabitants Eiones, and made it their sea-port, but that it entirely disappeared in his time. Its position is rtain; but, in consequence of the preceding ment of Strabo, it is placed by Curtius in the of *Kandia*. (Diod. iv. 37; Hom. *Il.* ii. 561; b. viii. p. 373; Curtius, *Peloponnesos*, vol. ii. 467, 580.)

IRA. [IRA.]

IRE'SIDAE or ERESIDAE. [ATTICA, p. 334.]

LAEA (Ἔλαια: *Eth.* Ἐλαίτης), an Aeolic city sia, the port of the Pergameni. (Steph. B. *s. v.*) rding to the present text of Stephanus, it was called Cidaenis (Κιδαινίς), and was founded by estheus; but it seems likely that there is some in the reading Cidaenis (Meineke ad Steph. r.). Strabo (p. 615) places Elaea south of the Caicus, 12 stadia from the river, and 120 stadia Pergamum. The Caicus enters a bay, which called Elaiticus, or the bay of Elaea. Strabo the bay of Elaea part of the bay of Adramyt- , but very incorrectly. He has the story, h Stephanus has taken from him, that "Elaea a settlement made by Menestheus and the nians with him, who joined the war against " (p. 122); but Strabo does not explain how it be an Aeolian city, if this story was true. It pposed that the coins of Elaea, which bear the and name of Menestheus, are some evidence of Athenian origin; but it is no evidence at all. dotus (i. 149) does not name Elaea among the an cities. Strabo makes the bay of Elaea ter- te on one side in a point called Hydra, and on ther in a promontory Harmatus; and he esti- the width between these points at 80 stadia. ydides (viii. 101) places Harmatus opposite to rnena, from which, and the rest of the narra- it is clear that he fixes Harmatus in a different from Strabo. The exact site of Elaea seems uncertain. Leake, in his map, fixes it at a marked *Kliseli*, on the road from the south to mmus (*Bergamah*). Scylax (p. 35), Mela), Pliny (v. 32), and Ptolemy (v. 2), all of mention Elaea, do not help us to the precise : all we learn from them is, that the Caicus i between Pitane and Elaea.

The name of Elaea occurs in the history of the kings of Pergamum. From Livy (xxxv. 13), it appears, as Strabo tells us, that those who would reach Pergamum from the sea, would land at Elaea. (Comp. Liv. xxxvi. 43, xxxvii. 18. 37; Polyb. xvi. 41, xxi. 8). One of the passages of Livy shows that there was a small hill (*tumulus*) near Elaea, and that the town was in a plain and walled. Elaea was damaged by an earthquake in the reign of Trajan, at the same time that Pitane suffered. [G. L.]



COIN OF ELAEA.

ELAEA, an island on the Propontis, mentioned by Pliny (v. 32); but it is not certain which of the several small islands he means. [G. L.]

ELAEA (Ἔλαια, Ptol. v. 14. § 3), a promontory on the NE. coast of Crete, which Pococke (*Trav.* vol. ii. p. 218) calls *Chaule-burnau*. (Comp. Engel, *Kypros*, vol. i. p. 89.) [E. B. J.]

ELAEA, ELAEA'TIS. [ACHERON.]

ELAEUS. 1. (Ἔλαιος, written Ἔλαιους in Marcian, *Peripl.* p. 70), was an emporium or trading place on the coast of Bithynia at the mouth of a river of the same name. Elaeus was 120 stadia west of Cales. [CALES.]

2. Placed by Pliny in the Sinus Doridis; but nothing is known of it. [CERAMEICUS.] [G. L.]

ELAEUS (Ἔλαιοῦς, Ἐλεοῦς), the southernmost town of the Thracian Chersonese, within less than one day's sail of Lemnos with a northerly wind (Herod. vi. 140), and a colony of Teos in Ionia (Scymn. 786). It was celebrated for its tomb, temple, and sacred grove of the hero Protesilaus. The temple, conspicuously placed on the sea-shore, was a scene of worship and pilgrimage, not merely for the inhabitants of Elaeus, but also for the neighbouring Greeks generally; and was enriched with ample votive offerings, and probably deposits for security — money, gold and silver saucers, bronze implements, robes, and various other presents. (Herod. vii. 33, ix. 116; Strab. xiii. p. 595; Paus. i. 34. § 2, iii. 4. § 5; Plin. xvi. 99; Philostr. *Her.* ii. 1; Tzetz. *ad Lyc.* 532.)

Artayctes, the Persian commander at Sestus, stripped the sacred grove of Protesilaus of all the treasures, and profaned it by various acts of outrage, in consequence of which the Athenian commander, Xanthippus, and the citizens of Elaeus crucified Artayctes, when Sestus was taken by the Greeks. (Herod. ix. 118—120.) In B. C. 411, the Athenian squadron under Thrasyllus escaped with difficulty from Sestus to Elaeus (Thuc. viii. 102); and it was here, just before the fatal battle of Aegos-Potami, that the 180 Athenian triremes arrived in time to hear that Lysander was master of Lampsacus. (Xen. *Hell.* ii. 1. § 20.)

In B. C. 200, Elaeus surrendered voluntarily to Philip V. (Liv. xxxi. 16); but in B. C. 190 the citizens made overtures to the Romans. (Liv. xxxvii. 9.) Constantine's fleet in the Second Civil War, A. D. 323, took up its moorings at Elaeus, while that of Licinius was anchored off the tomb of Ajax, in the Troad. (Zosim. ii. 23; Le Beau, *Bas Empire*, vol. i. p. 216.)

[illegible] S. [illegible] 510 gives this name to [illegible] Crete. [G.L.]

ELATEIA (Ἐλάτεια), or "the [illegible] of the Peparethians with a good har- [illegible] (p. 586): "In [illegible] Parnassus is Pharae, there is also [illegible] and the island now called Proconnesus." [illegible] Elateia and that "Elaeonnesus is in the [illegible] of Thrace, where the marble of [illegible] and Proconnesus." [illegible] Elateia was named for its marble [illegible], which supplied materials [illegible] Thrace. It is plain that Pliny [illegible] Elaeonnesus to be the Proconnesus of Strabo [illegible] name Elaeonnesus probably means the same as [illegible] Proconnesus.

[illegible] Ἀλασσών) describes Halone as [illegible] Thessaly, which was also called North [illegible]. In the presence of Scopelos the [illegible] Neuvre, as it is in Piri's text [illegible] by Hardion (Plin. [illegible] Meinecke ad Steph.). Pliny [illegible] the Peparethians an island Halone, with [illegible] and now called Alo, which [illegible] from the south-western extremity of the [illegible] Thessaly by a narrow channel. Some [illegible] assume this island to be Euphorion, [illegible] undoubtedly a mistake. The text of Strabo [illegible] Halone with Neleia and Pteleon, [illegible] we can decide nothing; and the pas- [illegible] Pliny is such that it is possible he may [illegible] Halone with some island. Pliny's statement [illegible] is probably true. [G.L.]

ELATEIA (Ἐλάτεια: Eth. Ἐλατεύς), [illegible] Phocis and the most important place in the [illegible] which was situated, "about the banks [illegible] the great fertile basin which extends near 30 [illegible] in the narrows of the Cephissus below Amphi- [illegible] and which are at the entrance into Boeotia." [illegible] Elateia was admirably placed for com- [illegible] the passes into Southern Greece from [illegible] and was a post of great military import- [illegible] (Grote, *Hist. of Greece*, x. p. 424.) Pausanias describes [illegible] operations against Amphissa, at the distance [illegible] from Elateia in the latter town, on a gently [illegible] spot in the plain of the Cephissus (x. 34. [illegible] Elateia is not mentioned by Homer. In [illegible] times claimed to be Amphictionic, deriving [illegible] name from Elatus, the son of Arcas. (Paus. [illegible] It was a member with the other Phocian towns [illegible] the Amphictyonic Council. (Herod. viii. 33.) When [illegible] entered Phocis in B.C. 338, with the [illegible] object of overthrowing the war against Am- [illegible] he seized Elateia and began to restore [illegible] fortifications. The alarm occasioned at Athens by the news of this event shows that this place was then regarded as the key of Southern Greece. (Dem. *de Cor.* p. 284; Aeschin. *in Ctes.* p. 73; Diod. xvi. 84.) The subsequent history of Elateia is given at some detail by Pausanias (*l.c.*). It successfully resisted Cassander, but it was taken by Philip, the son of Demetrius. It remained faithful to Philip when the Romans invaded Greece, and was taken by assault by the Romans in B.C. 198. (Liv. xxxii. 24.) At a later time the Romans declared the town to be free, because the inhabitants had repulsed an attack which Taxiles, the general of Mithridates, had made upon the place.

Among the objects worthy of notice in Elateia, Pausanias mentions the agora, a temple of Asclepius containing a bearded statue of the god, a theatre,

ELAPHITES INS., a group of [illegible] the coast of Illyricum. (Ptol. ii. 16. 26), which have this name from their supposed resemblance in shape to a stag, of which *Cavalla* [illegible] the head, the small *Kodin* the neck, *Mezzo* the body, and *Calo* [illegible] the hinder parts, the tail being [illegible] by the rock of *Grebini* or *Pettini*. They are well [illegible], and producing abundance of excellent wine and oil, are considered [illegible] valuable part of the Ragusan territory, to which they were annexed A.D. 1050 by Sylvester. (Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 7.) [E. B. J.]

an ancient bronze statue of Athena. He also
tions a temple of Athena Cranaea, situated at
distance of 20 stadia from Elateia: the road to
as a very gentle ascent, but the temple stood
a steep hill of small size.
Elateia is represented by the modern village of
a, where are some Hellenic remains, and where
ancient name was found in an inscription extant
the time of Meletius. Some remains of the
ple of Athena Cranaea have also been discovered
the situation described by Pausanias. (Gell,
er. p. 217; Dodwell, vol. ii. p. 141; Leake,
thern Greece, vol. ii. p. 83.)
. A town in Pelasgiotis in Thessaly, described
Livy, along with Gonnus, as situated in the pass
ing to Tempe. ("Utraque oppida in faucibus
, quae Tempe adeunt: magis Gonnus," Liv. xlii.
) The walls of Elateia are seen on the height
Kabrikhóri, on the right bank of the Peneius, in
middle of the Klisóra, or rugged gorge through
ch the river makes its way from the plain into
valley of Darelí or Gonnus, and thence to Tempe.
ake, Northern Greece, vol. iii. p. 381, vol. iv.
98.) Elateia is called Iletia by Pliny (iv. 8. s.
, and Iletium by Ptolemy (Ἰλήτιον, iii. 13. §
. It is mentioned by Stephanus B. under its
t name.
1. Or ELATREIA (Ἐλατρία, Strab. viii. p. 324;
ph. B. s. v. Ἐλάτρεια), a town of the Cassopaei in
pirotis, in Epeirus, mentioned by Strabo, along
h Batiae and Pandosia, as situated in the interior.
exact site is uncertain. It is said to have been
ony of Elis. (Strab. l. c.; Dem. de Halonn. 32;
pocr., Steph. B. s. v.; Liv. xxxiv. 25; Leake,
thern Greece, vol. iv. p. 74, seq.)
ELATH, the Scriptural name of AELANA, under
ich an account of the town is given. It is there
ted that "the site is now occupied by a fortress
ed Akaba," &c. Dr. Robinson, however, and
er travellers regard Akaba as the representative
Ezion-Geber, and find the site of Elath on the
shore, a little to the north of Akaba. "At this
st extensive mounds of rubbish, which mark the
of Ailah, the Elath of Scripture, were on our
ht. They present nothing of interest, except as
isting that a very ancient city has here utterly
ished. We did not learn that they have now a
me." (Bib. Res. vol. i. p. 241.) [G.W.]
ELATRIA. [ELATEIA, No. 3.]
ELAVER. [LIGERIS.]
ELBO (Ἔλβώ, Steph B. s. v.: Eth. Ἐλβῶος),
among the numerous islands which studded the
ass marshes between the Phatnitic and Tanitic
ths of the Nile. It was in this island that, ac-
ding to Herodotus (ii. 140), the blind king
ysis took refuge during the occupation of his
dom by Sabaco, the Aethiopian; and thither also
yrtaeus fled from the Persians in B. C. 456—50
ruc. i. 110). From the former historian it would
pear that the area of Elbo had been raised by some
ficial means above the level of the surrounding
ntry. [W. B. D.]
ELCEBUS, or HELCEBUS. [HELVETUS.]
ELDIMAEI or ELIMAEI. [ELYMAEI.]
ELEALEH (Ἐλεαλή), a town of the Reubenites,
ntioned, according to Eusebius, in Gilead, and one
ile distant from Heshbon, the capital of Sihon,
ng of the Amorites. It was in his time a very
ge village (κώμη μεγίστη, Onomast. s. v.). It
always mentioned in connection with Heshbon.
Numb. xxxii. 3, 37; Is. xv. 4, xvi. 9; Jerem. xlviii.
34.) It was first identified in modern times by
Seetzen, in a ruined site named El-Âl, half an hour
north-east of Hesbân, the old Heshbon. It was also
visited by Burckhardt, who writes it El-Aal, and thus
describes it (Travels, p. 365): "It stands upon the
summit of a hill, and takes its name from its situa-
tion,—Aal meaning 'the high.' It commands the
whole plain, and the view from the top of the hill is
very extensive..... El Aal was surrounded by a
well-built wall, of which some parts yet remain.
Among the ruins are a number of large cisterns,
fragments of walls, and the foundations of houses;
but nothing worth particular notice." [G. W.]
ELECTRA (Ἠλέκτρα, Ptol. iii. 17. § 4), a river
on the S. coast of Crete, which Kiepert's map iden-
tifies with the Malogniti, the most important river
in the island, flowing in a direction parallel with the
coast from E. to W. Höck (Kreta, vol. i. p. 393)
considers it to be the same as the small stream Ga-
ligni, further to the W. [E. B. J.]
ELECTRA (Ἠλέκτρα), a small river in Messenia,
a tributary of the Pamisus, which was crossed in
going from Andania to Cyparissia. (Paus. iv. 33.
§ 6; Leake, Morea, vol. i. p. 482.)
ELEGEIA (Ἐλεγεία, Steph. B.). 1. (I'lijeh), a
city of the Greater Armenia, which Ptolemy (v. 13)
places in long. 73° 20′ and lat. 42° 45′, near the
sources of the Euphrates. Trajan, in his Armenian
campaign, advanced upon this town, where he granted
Parthamasiris an interview. (Dion Cass. lxviii. 18.)
In A. D. 162 Vologeses III., king of Parthia, invaded
Armenia, and cut to pieces a Roman legion, with its
commander Severianus, at Elegeia. (Dion Cass. lxxi.
2.) I'lijeh is remarkable for two warm springs
(whence its name), of the temperature of 100°
Fahrenheit, and is situated on a limestone rock
3779 feet above the sea, not far from Ers-Rûm.
(Journ. Geog. Soc. vol. x. pp. 359, 434; comp.
Tournefort, Voyage, vol. ii. p. 114; Ousely, Travels,
vol. iii. p. 471; Ritter, Erdkunde, vol. x. pp. 100,
116, 737, 829.)
2. A town of the Lesser Armenia, on the right
bank of the Euphrates, at the first or principal
curve which takes place before the river enters
Mount Taurus ("apud Elegiam occurrit ei Mons
Taurus," Plin. v. 20). Elegia is represented by the
modern I'z O'ghlú; and it is there that the Eu-
phrates — after issuing from the mountains of Kebân
Ma'den, and having turned to the W. round the
remarkable peninsula of 'Abdu-l-Wahhâb, terminated
by the rocks of Mumshûr (D'Anville's pass of Nushûr)
— receives the Tokhmah-Sú, and then takes an
easterly bend to pass the rocky mountains of Bhâgh
Khânlí and Beg Tâgh. (Journ. Geog. Soc. vol. x.
p. 331; Ritter, Erdkunde, vol. x. pp. 100, 116, 737,
829, 858.) [E. B. J.]
ELEIA (Ἐλήια, Ptol. v. 18. § 12; Eleia, Sext.
Ruf. c. 27; Hileia, Amm. Marc. xviii. 10), a village
to the westward of Singara, and probably within the
limits of the province now called the Sinjâr. It is
only memorable as having been the scene of a night
conflict between the Romans under Constantius and
the Persians, in which each army claimed the victory.
There is a slight difference between the account of
Ammianus and Rufus, the former mentioning two
battles, one at Eleia and the other at Singara; and
the latter, only one. The battle is alluded to by
Julian (Orat. 1. in Constant.) and by Eutropius
(x. 10). [V.]
ELEII. [ELIS.]
E'LEON (Ἔλεον, Heleon, Pl.

Digitized by Google

Boeotia, mentioned by Homer in the same line with Hyle and Peteon, is said by Strabo to have been one of the smaller places in the territory of Tanagra, and to have derived its name from its marshy situation. Its site is uncertain: Leake places it on the shore of the lake *Paralimni* [see p. 411], but Müller and Kiepert near Tanagra on the right bank of the Asopus. (Hom. *Il.* ii. 500; Strab. ix. pp. 404—406; Plin. iv. 7. s. 12; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. pp. 322, 468.)

ELEPHANTI'NE (Ἐλεφαντίνη νῆσος, Ptol. iv. 5. § 70; πόλις Αἰγύπτου. Steph. B. *s. v.*; Ἐλεφάντων πόλις, Joseph. *B. Jud.* v. 11; Ἐλέφαντις, id. *ib.*: *Eth.* Ἐλεφαντινίτης and Ἐλεφαντίτης; Strab. xvii. p. 817; Elephantis, Plin. *N. H.* v. 10. s. 59.) The original appellation of this island was EBO; EB being in the language of hieroglyphics the symbol of the elephant and of ivory. (Rosellini, *Mon. Stor.* 4, 204.) It was seated in lat. 24° N., just below the lesser cataract, directly opposite Syene, and near the western bank of the Nile. At this point the river becomes navigable downward to its mouths, and the traveller from Meroë and Aethiopia enters Egypt Proper. Its frontier position and its command of the river, no longer impeded by rapids, caused Elephantine to be regarded in all ages as the key of the Thebaid, and it was accordingly occupied by strong garrisons of native Egyptian troops, Persians, Macedonians, and Romans successively. (Herod. ii. 17, 29, 30; Agatharch. *de Rub. Mar.* p. 22; Mela, i. 9; Tac. *Ann.* ii. 61; Notit. Imp. Orient. c. 28.) Under the later Caesars, Diocletian, &c., it formed the southern limit of the Roman empire, and its garrison was engaged in continual wars with the Blemmyes and other barbarous tribes of Nubia. (Procop. *Bell. Pers.* i. 19.) The surrounding region is generally barren, consisting of lofty shelves of granite separated by bars of sand. But Elephantine itself, like the oases of the neighbouring Libyan desert was remarkable for its fertility and verdure. Its vines and fig-trees retained their leaves throughout the year (Theophrast. *Hist. Plant.* i. 6; Varro, *R. Rust.* i. 7): and the Arabs of the present day designate the island as *Djesiret el Sag*, the Blooming. The city of Elephantis was long the capital of a little kingdom separate from Egypt, which probably, as well as the kingdom of This or Abydos, declined as Thebes rose into importance. The names of nine of its kings are all that is known of the political history of Elephantine. Its successive possessors have left tokens of their occupation in the ruins which cover its area. Yet these are far less striking than the monuments of Philae at the opposite southern extremity of the cataracts. The most remarkable structures on the island were a temple of Kneph, built or at least completed by Amenouph II., a king of the eighteenth dynasty; another temple dedicated to Ammon; and the Nilometer, mentioned by Strabo (xvii. p. 817; comp. Plutarch, *Isis et Osir.* c. 43; Heliod. *Aethiop.* ix. 22; Euseb. *Praepar. Evang.* iii. 11); and thus described by Sir Gardner Wilkinson (*Manners and Customs*, 2nd series, i. p. 47): "The Nilometer in the island of Elephantine is a staircase between two walls descending to the Nile, on one of which is a succession of graduated scales containing one or two cubits, accompanied by inscriptions recording the rise of the river at various periods during the rule of the Caesars." The numerals in these inscriptions are Roman. [W. B. D.]

ELEPHANTO'PHAGI, ELEPHANTO'MAGI (Ἐλεφαντοφάγοι, Ἐλεφαντομάγοι, Diod. iii. 26; Strabo, xvi. p. 771; Plin. *N. H.* vi. 35. viii. 13; Solin. c. 25), one of the numerous tribes which roamed over the plains north of the Abyssinian highlands, and derived their names from their peculiar diet or occupation. The elephant eaters and hunters, who seem also to have been denominated Asachaei or Asachae (Agatharch. *de Rub. Mar.* p. 39), employed, according to Diodorus (*l. c.*), two methods of killing the elephant. The hunter singled out individuals from the herd, and ham-strung them with a sharp-pointed knife,—a feat which often terminated in the destruction of both the hunter and his prey; or, sawing nearly through the trees against which the elephants were accustomed to rest, watched for their falling with the sawn trunk, and as their unwieldy size prevented the animals from rising, destroyed the elephants at leisure. The Elephantophagi brought the hides and tusks of their game to the markets of Upper Egypt,—the hides being employed in covering bucklers, and the ivory for inlaid work in architecture, and for many of the ornaments of luxury. [W. B. D.]

E'LEPHAS, the name of a mountain and a river of Aethiopia on the western coast of the Red Sea. The promontory of Elephas (Ἐλέφας ἄκρον, Ptol. iv. 7. §§ 10, 26, 27; Strab. xvi. p. 774) was the eastern extremity of Mount Garbata, and situated between the headland Aromata (*Cape Guardafui*) and the entrance of the Red Sea, in lat. 11° N. The modern appellation of Elephas is Dsjibel-Fil (*Cape Fatir*). The position of the river Elephas is uncertain. (Heracl. *Peripl. Mar. Eryth.* p. 7.) It was, however, near the foreland of Elephas and in the Bay Cinnamomifera. Strabo (*l. c.*) mentions a canal (διώρυξ), apparently part of the river, or an artificial direction of its current. [W. B. D.]

ELEUSA. 1. (Ἐλεούσα, Ἐλαούσα) a small island off the coast of Caria (Strab. pp. 651, 652, *Stadiasmus*), between Rhodus and the mainland opposite to the mountain promontory Phoenix [CARIA, p. 519. b.], 4 stadia from Phoenix, and 120 stadia from Rhodes. It was 8 stadia in circuit. (Strab.) This seems to be the small island marked Λέρος in the latest maps.

2. ELEUSA (Ἐλεούσα, Strab. p. 671) or ELAEUSSA (Ἐλαιοῦσσα: *Eth.* Ἐλαιούσσιος, Steph. B. s. v.), an island close to the shore of Cilicia, afterwards called Sebaste [CILICIA, p. 622, a.]. (*Leake, Asia Minor*, p. 213.) The name is written Ἔλεα (Ἔλεοῦς) in the Stadiasmus.

Stephanus, after mentioning the Elaeussa of Caria, says that there are also seven other islands of the same name, we must infer. The writing of the word, as it has been shown, varies; but perhaps the form Ἐλαιοῦσσα is the best. [G. L.]

ELEU'SA or ELEU'SSA (Ἐλεοῦσσα). 1. An island opposite cape Astypalaea, off the western coast of Attica. (Strab. ix. p. 398.)

2. An island named by Pliny, along with eight others, as lying opposite the promontory Sparton, which separated the territories of Corinth and Epidaurus. There are several small islands opposite this promontory, one of which is now called *Lazareto*, probably a corruption of Eleussa. (Plin. iv. 12. s. 19, Bobiaye, *Recherches*, &c. p. 65.)

ELEUSIS (Ἔλευσις, or Ἐλευσίς: *Eth.* Ἐλευσίνιος). 1. (*Lepsina*), a demus of Attica, belonging to the tribe Hippothoöntis. It owed its celebrity to its being the chief seat of the worship of Demeter and Persephone, and to the mysteries celebrated in

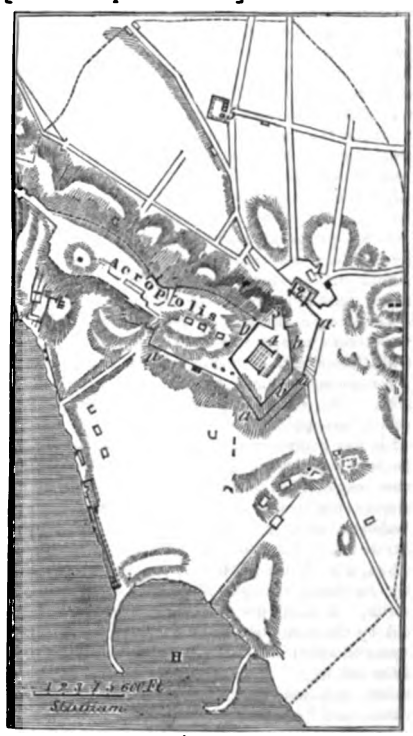
Digitized by Google

nour of these goddesses, which were called the leusinia, and continued to be regarded as the most ered of all the Grecian mysteries down to the fall of ganism. As an account of these mysteries, and of e legends respecting their institution, is given else-here (*Dict. of Ant.* art. *Eleusinia*), it only remains w to speak of the topography and history of the wn.

Eleusis stood upon a height at a short distance m the sea, and opposite the island of Salamis. s situation possessed three natural advantages. was on the road from Athens to the Isthmus; was in a very fertile plain; and it was at the head an extensive bay, formed on three sides by the st of Attica, and shut in on the south by the nd of Salamis. A description of the Eleusinian he called the Thriasian) plain, and of the river phissus, which flowed through it, is given under TTICA. The town itself dates from the most cient times. It appears to have derived its name m the supposed advent (ἔλευσις) of Demeter, ough some traced its name from an eponymous ro Eleusis. (Paus. i. 38. § 7.) It was one of the independent states into which Attica was said to ve been originally divided. (Strab. ix. p. 397.) It s related that in the reign of Eumolpus, king Eleusis, and Erechtheus, king of Athens, there s a war between the two states, in which the usinians were defeated, whereupon they agreed acknowledge the supremacy of Athens in every ng except the celebration of the mysteries, of ich they were to continue to have the manage-nt. (Thucyd. ii. 15; Paus. i. 38. § 3.) Eleusis rwards became an Attic demus, but in conse-nce of its sacred character it was allowed to retain title of πόλις (Strab. ix. p. 395; Paus. i. 38.), and to coin its own money, a privilege pos-ed by no other town in Attica, except Athens. s history of Eleusis is part of the history of ens. Once a year the great Eleusinian proces-n travelled from Athens to Eleusis, along the red Way, which has been already described at gth. [ATTICA, p. 327, seq.] The ancient tem-of Demeter at Eleusis was burnt by the Persians B. C. 484 (Herod. ix. p. 395); and it was not till administration of Pericles that an attempt was de to rebuild it (see below). When the power the Thirty was overthrown after the Peloponne-n War, they retired to Eleusis, which they had ured beforehand, but where they maintained them-es for only a short time. (Xen. *Hell.* ii. 4. §§ 8, , 43) Under the Romans Eleusis enjoyed great perity, as initiation into its mysteries became nonable among the Roman nobles. It was de-yed by Alaric in A. D. 396, and from that time ppears from history. When Spon and Wheler ted the site in 1676, it was entirely deserted. In following century it was again inhabited, and it now a small village called Λεψίνα, which is only rruption of the ancient name.

Eleusis was built at the eastern end of a low ky height, a mile in length, which lies parallel he sea-shore, and is separated to the west from falls of Mount Cerata by a narrow branch of the a. The eastern extremity of the hill was levelled cially for the reception of the Hierum of De-er and the other sacred buildings. Above these the ruins of an acropolis. ['Castellum, quod et anat, et circumdatum est templo,' Liv. xxxi. A triangular space of about 500 yards each lying between the hill and the shore, was occu-pied by the town of Eleusis. On the eastern side the town wall is traced along the summit of an artificial embankment, carried across the marshy ground from some heights near the Hierum, on one of which stands a castle (built during the middle ages of the Byzantine empire). This wall, according to a common practice in the military architecture of the Greeks, was prolonged into the sea, so as to form a mole sheltering a harbour, which was entirely artificial, and was formed by this and two other longer moles which project about 100 yards into the sea. There are many remains of walls and buildings along the shore, as well as in other parts of the town and citadel; but they are mere foundations, the Hierum alone preserving any considerable remains." (Leake.)

Pausanias has left us only a very brief description of Eleusis (i. 38. § 6): "The Eleusinians have a temple of Triptolemus, another of Artemis Propylaea, and a third of Poseidon the Father, and a well called Callichorum, where the Eleusinian women first instituted a dance and sang in honour of the goddess. They say that the Rharian plain was the first place in which corn was sown and first produced a harvest, and that hence barley from this plain is employed for making sacrificial cakes. There the so-called threshing-floor and altar of Triptolemus are shewn. The things within the wall of the Hierum [i. e. the temple of Demeter] a dream forbade me



PLAN OF ELEUSIS.

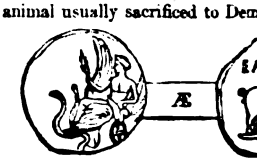
to describe." The Rharian plain is also mentioned in the Homeric Hymn to Artemis (450): it appears to have been in the neighbourhood of the city; but its site cannot be determined.

The present state of the antiquities at Eleusis is described by the Commission of the Dilettanti, of whose researches a brief account is given by Leake. Upon approaching Eleusis from Athens, the first conspicuous object is the remains of a large pavement, terminating in some heaps of ruins, which are the remains of a propylaeum, of very nearly the same plan and dimensions as that of the Acropolis of Athens. Before it, near the middle of a platform cut in the rock, are the ruins of a small temple, 40 feet long and 20 broad, which was undoubtedly the temple of Artemis Propylaea. (See plan, 1.) "The peribolus, which abutted on the Propylaeum, formed the exterior inclosure of the Hierum (plan, *a*, *a*, *a*). At a distance of 50 feet from the propylaeum was the north-eastern angle of the inner inclosure (plan, *b*, *b*, *b*), which was in shape an irregular pentagon. Its entrance was at the angle just mentioned, where the rock was cut away both horizontally and vertically to receive another propylaeum (plan, 3) much smaller than the former, and which consisted of an opening 32 feet wide between two parallel walls of 50 feet in length. Towards the inner extremity this opening was narrowed by transverse walls to a gateway of 12 feet in width, which was decorated with antae, opposed to two Ionic columns. Between the inner front of this propylaeum and the site of the great temple lay, until the year 1801, the colossal bust of Pentelic marble, crowned with a basket, which is now deposited in the public library at Cambridge. It has been supposed to be a fragment of the statue of Demeter which was adored in the temple; but, to judge from the position in which it was found, and from the unfinished appearance of the surface in those few parts where any original surface remains, the statue seems rather to have been that of a Cistophorus, serving for some architectural decoration, like the Caryatides of the Erechtheium."

The temple of Demeter itself, sometimes called *ὁ μυστικὸς σηκός*, or *τὸ τελεστήριον*, was the largest in all Greece, and is described by Strabo as capable of containing as many persons as a theatre (ix. p. 395). The plan of the building was designed by Ictinus, the architect of the Parthenon at Athens; but it was many years before it was completed, and the names of several architects are preserved who were employed in building it. Its portico of 12 columns was not built till the time of Demetrius Phalereus, about B. C. 318, by the architect Philo. (Strab. *l.* c.; Plut. *Per.* 13; *Dict. of Biogr.* vol. iii. p. 314, a.) When finished, it was considered one of the four finest examples of Grecian architecture in marble. It faced the south-east. Its site is occupied by the centre of the modern village, in consequence of which it is difficult to obtain all the details of the building. The Commission of the Dilettanti Society supposed the cella to be 166 feet square within; and "comparing the fragments which they found with the description of Plutarch (*Per.* 13), they thought themselves warranted in concluding that the roof of the cella was covered with tiles of marble like the temples of Athens; that it was supported by 28 Doric columns, of a diameter (measured under the capital) of 3 feet 2 inches; that the columns were disposed in two double rows across the cella, one near the front, the other near the back; and that they were surmounted by ranges of smaller columns, as in the Parthenon, and as we still see exemplified in one of the existing temples at Paestum. The cella was fronted with a magnificent portico of 12 Doric columns, measuring 6½ feet at the lower diameter of the shaft, but fluted only at a narrow ring at the top and bottom. The platform at the back of the temple was 20 feet above the level of the pavement of the portico. An ascent of steps led up to this platform on the outside of the north-western angle of the temple, not far from where another flight of steps ascended from the platform to a portal adorned with two columns, which perhaps formed a small propylaeum communicating from the Hierum to the Acropolis."

There are no remains which can be safely ascribed to the temple of Triptolemus, or to that of Pluto. "The well Callichorum may have been that which is now seen not far from the foot of the northern side of the hill of Eleusis, within the bifurcation of two roads leading to Megara and to Eleutherae; near it are the foundations of a wall and portico" (plan, 5). Near Eleusis was the monument of Tellus, mentioned by Herodotus (i. 30).

The town of Eleusis and its immediate neighbourhood were exposed to inundations from the river Cephissus, which, though almost dry during the greater part of the year, is sometimes swollen to such an extent as to spread itself over a large part of the plain. Demosthenes alludes to inundations at Eleusis (*c. Callicl.* p. 1279); and Hadrian raised some embankments in the plain in consequence of an inundation which occurred while he was spending the winter at Athens (Euseb. *Chron.* p. 81). In the plain about a mile to the south of Eleusis are the remains of two ancient mounds, which are probably the embankments of Hadrian. To the same emperor most likely Eleusis was indebted for a supply of good water by means of the aqueduct, the ruins of which are still seen stretching across the plain from Eleusis in a north-easterly direction. (Leake, *Demi of Attica*, p. 154, seq., from which the greater part of the preceding account is taken.) The annexed coin represents on the obverse Demeter in a chariot drawn by winged snakes, and holding in her hand a bunch of corn, and on the reverse a sow, the animal usually sacrificed to Demeter.



COIN OF ELEUSIS.

2. An ancient town of Boeotia, on the river Triton, and near the lake Copais, which, together with the neighbouring town of Athenae, was destroyed by an inundation. (Strab. ix. p. 407; Paus. ix. 24. § 2; Leake, *Northern Greece*, vol. ii. pp. 136, 293.)

ELEUTHERAE. [ATTICA, p. 399.]

ELEUTHE'RION. [ARGOS, p. 201, a.]

ELEUTHERNA (Ἐλεύθερνα, Ptol. iii. 17. § 10; Scyl.), a town of great importance in Crete, situated on the NW. slopes of Mt. Ida, at a distance of 30 stadia from the harbour of Astale (Stadiasm.), and 8 M. P. from Sybritia (*Peut. Tab.*). Its origin was ascribed to the legendary Curetes (Steph. B. s. v.), and it was here that Ametor or Amitor (comp. *Dict. of Biogr. s. v.*) first accompanied his son-

Digitized by Google

ngs to the "cithara." (Athen. xiv. p. 638.) It s in alliance with Croesus till the people of Polyrnium and Lampe compelled it to break off from e confederacy. (Polyb. iv. 53, 55).

Dion Cassius (xxxvi. 1) has an odd story about bout of traitors within who gave up the city to Metellus Creticus, making a breach through a ong brick tower by means of vinegar. It was exting in the time of Hierocles; and the number and nity of its silver coins show it to have been a ace of great consideration. (Eckhel, vol. ii. p. 311.) he Venetian MS. of the 16th century mentions e remains of this city as being so enormous as to rike the eye with wonder at the power and riches a people that could afford to rear such stately monuments. (*Mus. Class. Antiq.* vol. ii. p. 292.) r. Pashley (*Travels*, vol. i. pp. 145, 310) discovered vestiges of antiquity on the summit of a hy hill near a place still called *Eléitherna*, about five les S. of the great convent of *Arkádhi*, which means a *Metókhi* on the site. [E. B. J.]

COIN OF ELEUTHERNA.

ELEUTHEROCI'LICES. [CILICIA, p. 621, a.]

ELEUTHEROPOLIS. [BETHOGABRIS.]

ELEUTHERUS (Ἐλεύθερος), a river of Syria, the country of Hamath (Ἀμαθῖτις χώρα), according to the author of the book of Maccabees (1 *Macc.* . 25—30), a little to the south of which Jonathan s and defeated the army of Demetrius. Josephus s, that M. Antonius gave to Cleopatra all the cities ween Eleutherus and Egypt except Tyre and Sidon (*Ant.* xv. 4. § 1, *B. J.* i. 18, § 5), a notice sufficient of itself to disprove its identity with the modern *Kásimeh*, a little to the north of Tyre, and considerably uth of Sidon, — a theory not more ancient than e Chronicles of the Crusades. (See the references Robinson, *Bib. Res.* vol. iii. p. 410, note 2.) The assical geographers all place it considerably north this river. Thus, Ptolemy makes it the northern ndary of Phoenicia, and places Orthosia (*Tortosa*) and Simyra (*Sumra*) south of it (v. 15). abo also mentions it in connection with Orthosia, d nearly opposite to the rocky island Aradus (xvi. . 1071, 1072). Pliny places it between Orthosia d Simyra (v. 20). Maundrell was the first to indiate the *Nahr-el-Kebír* ("the great river"), north of ipoli, as the modern representative of the Eleutherus vels, pp. 24, 25); and he is followed by Pococke ii. p. 204, &c.), and Burckhardt (*Syria*, p. 161), d other later travellers. Maundrell found *Nahr-Kebír* to be six miles north of Tripoli, and the rtheramost and most considerable of three streams s water the very fruitful plain of Junia. He ssed also to the north of this, only a quarter of hour south of Tortosa, "a river, or rather a annel of a river, for it was now almost dry; though ertainless here must have been anciently no inderable stream; as we might infer both from e largeness of the channel, and the fragments of stone-bridge formerly laid over it" (p. 19). This is about half an hour north of the point on the coast opposite to which *Ruad*, the ancient Aradus, is situated, and therefore accords with Strabo better than *Nahr-el-Kebír*, which is too far south; as Maundrell also himself intimates (p. 25). [G. W.]

ELGOVAE. [SELGOVAE.]

ELGUS (Ἔλγος: *Eth.* Ἔλγιος, Ἐλγαῖος), a city of Lycia, mentioned by Xanthus in his *Lyciaca*. (Steph. B. *s.v.*) See Meineke's note *ad Steph.* [G.L.]

ELIBYRGE. [ILLIBERIS.]

ELIM (Αἰλείμ), the second station of the Israelites after their passage of the Red Sea, next to Marah (*Exod.* xv. 27), where were "twelve wells of water, and three score and ten palm-trees." This station is now commonly assigned to *Wady Ghurundel*, two and a half hours distant from *Ain Howárah*, assumed in this hypothesis to be Marah. There are fountains in this valley; and a few small palm-trees are scattered through it (Robinson, *Bib. Res.* vol. i. pp. 99, 100.) To obviate the difficulty suggested by the long interval of eight hours between *Wady Ghurundel* and the mouth of *Wady-el-Taiyibeh*, the next station of the Israelites, Dr. Robinson suggests *Wady Useit* as the Elim of Exodus (p. 105). But, on the whole, he inclines to the first-mentioned theory, originated by Niebuhr (*Descrip. de l'Arabie*, p. 348), and adopted by Burckhardt (*Syria*, p. 473). Dr. Wilson fixes Elim at *Wady Waseit*, the *Useit* of Dr. Robinson — for which he gives the following reasons (*Lands of the Bible*, vol. i. p. 174.):—"Here we found a considerable number of palm-trees, and tolerable water. . . . As this Wady, with these requisites, is exactly intermediate between the supposed Marah, and the situation of the Israelites near the Red Sea, . . . we did not hesitate to come to the conclusion that it is the Elim of the Scriptures." Tor, at the south of the peninsula, is quite out of the question. [G. W.]

ELIMAEI. [ELIMEIA.]

ELIMBERRUM. [CLIMBERRIS.]

ELIMEIA (Ἐλίμεια, Strab. vii. p. 326; Steph. B.) or ELIMIO'TIS (Ἐλιμιῶτις, Arrian, *Anab.* i. 7. § 5), a district to the SW. of Macedonia, bordering upon Eordaea and Pieria, while it extended to the W. as far as the range of Pindus. It was watered by the Haliacmon, and may be defined as comprehending the modern districts of *Grevená*, *Venja*, and *Tjerembá*. It was occupied in early times by the Elimaei or Elimiotae (Ἐλιμιῶται, Ptol. iii. 13. § 21; Strab. ix. p. 434; Steph. B.), but afterwards fell into the hands of the Macedonian princes. (Thuc. ii. 99.) Though a mountainous and barren tract, Elimeia must have been an important acquisition to the kings of Macedonia, from its situation with regard to Thessaly and Epirus, as there were several passages leading directly into those provinces from this division of the kingdom. In the war which the Lacedaemonians waged against Olynthus, Derdas was prince of this country. (Xen. *Hell.* v. 2. § 38.) It was finally included by the Romans in the fourth division of Macedonia. (Liv. xlv. 30.) There was a town called Elimeia (Ἐλίμεια, Steph. B.; Ἔλυμα, Ptol. iii. 13. § 21), where Perseus, in the second year of the war, B. C. 170, reviewed his forces. (Liv. xliii. 21.) The site of this town is probably near *Grevenó*, on the river *Grevenitikó*. (Leake, *Northern Greece*, vol. iii. pp. 305, 324, 339.) [E. B. J.]

ELINGA (Ἤλιγγα), a town of Hispania Baetica, mentioned only by Polybius (xi. 18). Ukert places it in the neighbourhood of Baecula (vol. ii. pt. 1. p. 379). [P. S.]

ELIO'CROCA (*Lorca*), a city of the Bastetani, in Hispania Tarraconensis, W. of Carthago Nova, and on the high road from that city to Castulo. (*Itin. Ant.* p. 401.) It is probably identical with ILORCI, which Pliny mentions as a *civitas stipendiaria*, belonging to the conventus of Carthago Nova. (Plin. iii. 1. s. 3; Wesseling, *ad Itin. l. c.*; Florez, *Esp. S.* vol. vii. p. 217; Mentelle, *Esp. Mod.* p. 153; Ukert, vol. ii. pt. 1, p. 406.) [P. S.]

ELIS (ἡ Ἦλις, Dor. Ἅλις, whence "Alis" in Plaut. *Capt.* Prol. 9, 26; acc. Ἦλιδα of the country, Ἦλιν of the town generally, in Lat. "Elin" and "Elidem." The word was originally written with the digamma ΓΑΛΙΣ, perhaps connected with "vallis," and signifying originally, a hollow. The country was also called ἡ Ἠλεία, Thuc. ii. 25, Polyb. v. 102; ἡ Ἠλείων χώρα, Polyb. iv. 77; Eliorum ager, Plin. iv. 5. s. 6. *Eth.* and *Adj.* Ἠλεῖος, Ἀλεῖος, FALEIΩN on coins, Elius, Eleus, Alius, Plaut. *Capt.* Prol. 24.; Ἠλιάδης, Steph. B. *s. v.*; Ἠλειακός, Ἠλιακός).—Elis, in its widest signification, was the country on the western coast of Peloponnesus between Achaia and Messenia, extending from the promontory Araxus and the river Larissus on the north to the river Neda on the south, and bounded on the east by the Arcadian mountains and on the west by the Ionian sea. (Strab. viii. p. 336.) It included three distinct districts, ELIS PROPER or HOLLOW ELIS, the northern portion, extending from the river Araxus to the promontory Ichthys; PISATIS, the middle portion, from the promontory Ichthys to the river Alpheius; and TRIPHYLIA, the southern portion, from the Alpheius to the Neda. Elis Proper was divided into two parts, the plain of the Peneius, and the mountainous country in the interior, called ACRO. REIA: the name of Hollow Elis (ἡ κοίλη Ἦλις Thuc. ii. 25) appears to have been originally given to the plain of the Peneius to distinguish it from the mountainous district of the Acroreia; but since Hollow Elis was the larger and more fertile part, this name came to be given to the whole of the northern territory, to distinguish it from the dependent districts of Pisatis and Triphylia.

Those of the ancient geographers, who represented Peloponnesus as consisting of only five divisions, made Elis and Arcadia only one district. (Paus. v. 1. § 1.) In fact Elis may be looked upon as a kind of offshoot of Arcadia, since it embraces the lower slopes of the mountains of Erymanthus, Pholoë and Lyceus, which sink down gradually towards the Ionian sea. Elis has no mountain system of its own, but only hills and plains. It contains more fertile land than any other country of Peloponnesus; the rich meadows of the plain of the Peneius were celebrated from the earliest times; and even the sandy hills, which separate the plains, are covered with vegetation, since they are exposed to the moist westerly winds. Thus the land with its green hills and fertile plains forms a striking contrast to the bare and precipitous rocks on the eastern coast. Hence Oxylus is said to have conducted the invading Dorians by the more difficult way through Arcadia, lest they should see the fertile territory of Elis, which he had designed for himself. (Paus. v. 4. § 1; Polyb. iv. 73.)

The coast of Elis is a long and almost unbroken sandy level, and would have been entirely destitute of natural harbours, if a few neighbouring rocks had not become united by alluvial deposits with the mainland. In this way three promontories have been formed,—Araxus, Chelonatas, Ichthys,—which interrupt the uniformity of the coast, and afford some protection for vessels. Of these the central and the largest is Chelonatas, running a considerable way into the sea, and forming on either side one end of a gulf. The northern gulf bears the name of Cyllene, and is bounded at its northern extremity by the promontory Araxus. The southern gulf is called the Cyparissian, and is bounded at its southern extremity by the promontory Ichthys, which also forms the commencement of the great Cyparissian gulf.

The sandy nature of the coast interrupts the natural outlet of the numerous smaller rivers, and absorbs them before they reach the sea. The sea also frequently breaks over the coast; and thus there is formed along the coast a series of lagoons, which are separated from the sea only by narrow sand-banks. Along the Cyllenian bay there are two such lagoons, and the whole Elean coast upon the Cyparissian bay is occupied by three almost continuous lagoons. The collection of stagnant water renders the coast very unhealthy in the summer months: and the vast number of gnats and other insects, which are generated in these marshes, makes it almost impossible to live near the sea. The modern harbour of *Kastro* has derived its name from the gnats, which abound in the neighbourhood (Κουνουπέλι from Κωνωπεῖον =κώνωψ); and even in antiquity the Eleans invoked Zeus and Hercules to protect them from this plague (Ζεὺς ἀπόμυιος, Paus. v. 14. § 1; comp. Aelian. *H. An.* v. 17.) These lagoons, however, supply the inhabitants with a vast abundance of fish. In the summer months, when the fish are very numerous on the coast, a small opening is made through the narrow sand-banks; and the lagoons thus become soon filled with fish, which are easily taken. They are dried and salted on the spot, and are exported in large quantities. This fishery was probably carried on in ancient times also, since we find Apollo worshipped among the Eleans under the epithet of Oxyphagos. (Polemon. p. 109. ed. Preller.)

The physical peculiarities of Elis are not favourable to its becoming an independent state. In fact no country in Greece is so little protected against hostile attacks. The broad valley of the Alpheus runs, like a highway, through the centre of Elis: the mountains, which form its eastern boundary, are a very slight defence, since they are only the offshoots of still higher mountains; while the towns and villages on the flat coast lie entirely exposed to an enemy's fleet. But these natural obstacles to its independence were more than compensated by the sacred character attaching to the whole land in consequence of its possessing the temple of the Olympian Zeus on the banks of the Alpheius. Its territory was regarded as inviolable by the common law of Greece; and though its sanctity was not always respected, and it was ravaged more than once by an invading force, as we shall presently see, it enjoyed for several centuries exemption from the devastations of war. Thus, instead of the fortified places seen in the rest of Greece, Elis abounded in unwalled villages and country houses; and the valley of the Alpheius in particular was full of various sanctuaries and consecrated spots, which gave the whole country a sacred appearance. The prosperity of the country continued down to the time of Polybius, who praises its populousness and the fondness of its inhabitants for a country life. (Strab. viii. pp. 343, 344; Polyb. iv. 73, 74.) The prosperity of Elis was also much indebted to the expenditure of the vast number of strangers, who visited the country once in four years at the festival of the Olympian Zeus

Hollow Elis is more extensive and more fertile than the two subject districts (*αἱ περιοικίδες πόλεις*) of Pisatis and Triphylia. It consists of a fertile plain, drained by the river Peneius (*Πηνειός*) and its tributary the Ladon (*Λάδων*). The Peneius rises in Mount Erymanthus between two lofty summits, and flows at first between the ravine of *Berbini*, and afterwards in a north-westerly direction till it reaches a more open valley. The Ladon, called Selleis by Homer [see Ephyra, No. 1.], rises a little more to the south; it also flows at first through a narrow ravine, and falls into the Peneius, just where it enters the broader valley. The united stream continues its course through this valley, till at the town of Elis it emerges near its mouth into the extensive plain of *Gastúni*, which is the name now generally given to the river throughout its whole course. The river *Gastúni* now flows into the sea to the south of the promontory of Chelonatas, but there is reason for believing that the main branch at least of the Peneius originally flowed into the sea north of the Chelonatas. This appears from the order of the names in Ptolemy (iii. 16. §§ 5, 6), who enumerates the promontory Araxus, Cyllene, the mouths of the Peneius, and the promontory Chelonatis, as well as from the statement of Strabo (viii. p. 336) that the Peneius flows into the sea between Chelonatas and Cyllene. Moreover, the legend of Hercules cleansing the stables of Augeias by diverting the course of the Peneius would seem to show that even in ancient times the course of the stream had been changed either by artificial or by natural means; and there are still remains of some ancient channels near the southern end of the Cyllenian hill.

The plain of *Gastúni* is still celebrated for its fertility, and produces flax, wheat, and cotton. In antiquity, as we learn from Pausanias (v. 5. § 2), this was the only part of Greece in which byssus (a species of fine flax) grew. This byssus is described by Pausanias (*l. c.*) as not inferior to that of the Hebrews in fineness, but not so yellow; and in another passage (vi. 26. § 6) he remarks that hemp and flax and byssus are sown by all the Eleians, because their lands are adapted for these crops. The vine was also cultivated with success, as is evident from the especial honour paid to Dionysus in the city of Elis, and from the festival called Thyia, in which three empty jars spontaneously filled with wine. (Paus. vi. 26. § 1.) Elis still contains a large quantity of excellent timber; and the road to Olympia along the coast passes through noble forests of oaks. The rich pastures of the Peneius were favourable to the rearing of horses and cattle. Even in the earliest legends Augeias, king of the Epeians in Elis, is represented as keeping innumerable herds of oxen; and the horses of Elis were celebrated in the Homeric poems (*Od.* iv. 634, xxi. 346). It was said that mules could not be engendered in Elis in consequence of a divine curse (Herod. iv. 30; Paus. v. 5. § 2); but this tale probably arose from the fact of the Eleian mares being sent into Arcadia, in order to be covered by the asses of the latter country, which were reckoned the best in all Greece. [Arcadia, p. 190, a.]

Pisatis (ἡ Πισᾶτις) is the lower valley of the Alpheius. This river, after its long course through Arcadia, enters a fertile valley in the Pisatis, bounded on either side by green hills, and finally flows into the sea through the sandy plain on the coast between the large lagunes. North of the Alpheius, Mount Pholoe (Φολόη), which is an offshoot of Erymanthus, extends across the Pisatis from east to west, and separates the waters of the Peneius and the Ladon from those of the Alpheius. (Strab. viii. p. 357.) It terminates in the promontory, running southwards far into the sea, and opposite the island of Zacynthus. This promontory was called in ancient times Ichthys (Ἰχθύς, Strab. viii. p. 343) on account of its shape: it now bears the name of *Katákolo*. It appears to be the natural boundary of the Pisatis; and accordingly we learn from Strabo that some persons placed the commencement of the Pisatis at Pheia, a town on the isthmus of Ichthys, though he himself extends the district as far as the promontory Chelonatas. (Strab. viii. p. 343.) Mount Pholoe rises abruptly on its northern side towards the Peneius, but on the southern side it opens into numerous valleys, down which torrents flow into the Alpheius.

Triphylia (Τριφυλία) is the smallest of the three divisions of Elis, and contains only a very small portion of level land, as the Arcadian mountains here approach almost close to the sea. Along nearly the whole of the Triphylian coast there is a series of lagoons already mentioned. At a later time the Alpheius was the northern boundary of Triphylia; but at an earlier period the territory of the Pisatis must have extended south of the Alpheius, though all its chief towns lay to the north of that river. The mountain along the southern side of the Alpheius immediately opposite Olympia was called originally Ossa (Strab. viii. p. 356), but appears to have been afterwards called Phellon (Strab. viii. p. 344, where Φίλλωνα should probably be read instead of Φολόην). Further south are two ranges of mountains, between which the river Anigrus flows into the sea [Anigrus]: of these the more northerly, called in ancient times Lapithas (Λαπίθας, Paus. v. 5. § 8), and at present *Smerna*, is 2533 feet high; while the more southerly, called in ancient times, Minthe (Μίνθη, Strab. viii. p. 344), and now *A'lvena* rises to the height of 4009 feet. Minthe, which is the loftiest mountain in Elis, was one of the seats of the worship of Hades; and the herb, fromw hich it derived its name, was sacred to Persephone. The river Neda divided Triphylia from Messenia.

II. History.

The most ancient inhabitants of Elis appear to have been Pelasgians, and of the same stock as the Arcadians. They were called Caucones, and their name is said to have been originally given to the whole country; but at a later time they were found only on the northern frontier near Dyme and in the mountains of Triphylia. (Strab. viii. p. 345.) The accessibility of the country both by sea and land led other tribes to settle in it even at a very early period The Phoenicians probably had factories upon the coast; and there can be no doubt that to them the Eleians were indebted for the introduction of the *byssus*, since the name is the same as the Hebrew *buts*. We also find traces of Phoenician influence in the worship of Aphrodite Urania in the city of Elis. It has even been supposed that *Elishah*, whose productions reached Tyre (*Ezek.* xxvii. 7), is the same word as the Greek Elis, though the name was used to indicate a large extent of country; but it is dangerous to draw any conclusion from a similarity of names, which may after all be only accidental.

The most ancient inhabitants of the country appear to have been Epeians (Ἐπειοί), who were closely

Digitized by Google

connected with the Aetolians. According to the common practice of the Greeks to derive all their tribes from eponymous ancestors, the two brothers Epeius and Aetolus, the sons of Endymion, lived in the country afterwards called Elis. Aetolus crossed over to Northern Greece, and became the ancestor of the Aetolians. (Paus. v. 1; Scymn. Ch. 475.) The name of Eleians, according to the tradition, was derived from Eleius, a son of Poseidon and Eurycyda, the daughter of Endymion. The Epeians were more widely spread than the Eleians. We find Epeians not only in Elis Proper, but also in Triphylia and in the islands of the Echinades at the mouth of the Achelous; while the Eleians were confined to Elis Proper. In Homer the name of Eleians does not occur; and though the country is called Elis, its inhabitants are always the Epeians.

Eleius was succeeded in the kingdom by his son Augeias, against whom Hercules made war, because he refused to give the hero the promised reward for cleansing his stables. [For details see *Dict. of Biogr.* vol. ii. p. 395.] The kingdom of the Epeians afterwards became divided into four states. The Epeians sailed to the Trojan War in 40 ships, led by four chiefs, of whom Polyxenus, the grandson of Augeias, was one. (Hom. *Il.* ii. 615, seq.) The Epeians and the Pylians appear in Homer as the two powerful nations on the western coast of Peloponnesus, the former extending from the Corinthian gulf southwards, and the latter from the southern point of the peninsula northwards; but the boundaries which separated the two cannot be determined. [PYLOS.] They were frequently engaged in wars with one another, of which a vivid picture is given in a well-known passage of Homer (*Il.* xi. 670, seq.; Strab. viii. pp. 336, 351). Polyxenus was the only one of the four chiefs who returned from Troy. In the time of his grandson the Dorians invaded Peloponnesus; and, according to the legend, Oxylus and his Aetolian followers obtained Elis as their share of the conquest. (*Dict. of Biogr.* art. *Heraclidae*).

Great changes now followed. In consequence of the affinity of the Epeians and Aetolians, they easily coalesced into one people, who henceforth appear under the name of Eleians, forming a powerful kingdom in the northern part of the country in the plain of the Peneius. Some modern writers suppose that an Aetolian colony was also settled at Pisa, which again comes into notice as an independent state. Pisa is represented in the earliest times as the residence of Oenomaus and Pelops, who left his name to the peninsula; but subsequently Pisa altogether disappears, and is not mentioned in the Homeric poems. It was probably absorbed in the great Pylian monarchy, and upon the overthrow of the latter was again enabled to recover its independence; but whether it was peopled by Aetolian conquerors must remain undecided. From this time Pisa appears as the head of a confederacy of eight states. About the same time a change of population took place in Triphylia, which had hitherto formed part of the dominions of the Pylian monarchy. The Minyae, who had been expelled from Laconia by the conquering Dorians, took possession of Triphylia, driving out the original inhabitants of the country, the Paroreatae and Caucones. (Herod. iv. 148.) Here they founded a state, consisting of six cities, and were sufficiently strong to maintain their independence against the Messenian Dorians. The name of Triphylia was sometimes derived from an eponymous Triphylus, an Arcadian chief (Polyb. iv. 77; Paus. x. 9. § 5); but the name points to the country being inhabited by three different tribes,—an explanation given by the ancients themselves. These three tribes, according to Strabo, were the Epeians, the Minyae, and the Eleians. (Strab. viii. p. 337.)

The territory of Elis was thus divided between the three independent states of Elis Proper, the Pisatis, and Triphylia. How long this state of things lasted we do not know; but even in the eighth century B.C. the Eleians had extended their dominions as far as the Neda, bringing under their rule the cities of the Pisatis and Triphylia. During the historical period we read only of Eleians and their subjects the Perioeci: the Caucones, Pisatans, and Triphylians entirely disappear as independent races.

The celebration of the festival of Zeus at Olympia had originally belonged to the Pisatans, in the neighbourhood of whose city Olympia was situated. After the conquest of Pisa, the presidency of the festival passed over to their conquerors; but the Pisatans never forgot their ancient privilege, and made many attempts to recover it. In the eighth Olympiad, B.C. 747, they succeeded in depriving the Eleians of the presidency by calling in the assistance of Pheidon, tyrant of Argos, in conjunction with whom they celebrated the festival. But almost immediately afterwards the power of Pheidon was destroyed by the Spartans, who not only restored to the Eleians the presidency, but are said even to have confirmed them in the possession of the Pisatis and Triphylia. (Paus. vi. 22. § 2; Strab. viii. p. 354, seq.; Herod. vi. 127.) In the Second Messenian War the Pisatans and Triphylians revolted from Elis and assisted the Messenians, while the Eleians sided with the Spartans. In this war the Pisatans were commanded by their king Pantaleon, who also succeeded in making himself master of Olympia by force, during the 34th Olympiad (B.C. 644), and in celebrating the games to the exclusion of the Eleians. (Paus. vi. 21. § 1, vi. 22. § 2; Strab. viii. p. 362; respecting the conflicting statements in the ancient authorities as to this period, see Grote, *Hist. of Greece*, vol. ii. p. 574.) The conquest of the Messenians by the Spartans must also have been attended by the submission of the Pisatans to their former masters. In the 48th Olympiad (B.C. 588) the Eleians, suspecting the loyalty of Damophon, the son of Pantaleon, invaded the Pisatis, but were persuaded by Damophon to return home without committing any further acts of hostility. But in the 52nd Olympiad (B.C. 572) Pyrrhus, who had succeeded his brother Damophon in the sovereignty of Pisa, invaded Elis, assisted by the Dyspontii in the Pisatis, and by the Macistii and Scilluntii in Triphylia. This attempt ended in the ruin of these towns, which were razed to the ground by the Eleians. (Paus. vi. 22. § 3, seq.) From this time Pisa disappears from history; and so complete was its destruction that the fact of its ever having existed was disputed in later times. (Strab. viii. p. 356.) After the destruction of these cities we read of no further attempt at revolt till the time of the Peloponnesian War. The Eleians now enjoyed a long period of peace and prosperity.

The Eleians remained faithful allies of Sparta in the Peloponnesian War down to the peace of Nicias, B.C. 421; but in this year a serious quarrel arose between them. It was a settled policy of the Spartans to prevent the growth of any power in Peloponnesus, which might prove formidable to themselves; and accordingly they were always ready to support the independence of the smaller states in the penin-

Digitized by Google

nds against the greater. Accordingly, when Lepreum in Triphylia revolted from the Eleians and ceived the assistance of the Spartans, the latter not only recognised its independence, but sent an armed rce to protect it The Eleians in consequence renounced the alliance of Sparta, and formed a new agrue with Argos, Corinth, and Mantineia. (Thuc. . 31.) The following year (B. C. 420) was the eriod for the celebration of the Olympic festival; nd the Eleians, under the pretext that the Spartans nd sent some additional troops to Lepreum after the roclamation of the Sacred Truce, fined the Spartans 000 minae, and, upon their refusing to pay the fine, xcluded them from the festival. (Thuc. v. 49, 50.) The Eleians fought with the other allies against the Spartans at the battle of Mantineia (B. C. 418); and hough the victory of the Spartans broke up this ague, the ill-feeling between Elis and Sparta still ontinued. Accordingly, when the fall of Athens ave the Spartans the undisputed supremacy of reece, they resolved to take vengeance upon the leians. They required them to renounce their uthority over their dependent towns, and to pay up he arrears due from them as Spartan allies for arrying on the war against Athens. Upon their efusal to comply with these demands, king Agis inaded their territory (B. C. 402). The war lasted early three years; and the Eleians were at length ompelled to purchase peace by relinquishing their uthority not only over the Triphylian towns, but also ver Lasion, which was claimed by the Arcadians, and ver the other towns of the hilly district of Acroreia B. C. 400). They also had to surrender their harour of Cyllene with their ships of war. (Xen. *Hell.* i. 2. §§ 21—30; Diod. xiv. 34; Paus. iii. 8. § 3, eq.) By this treaty the Eleians were in reality tripped of all their political power; and the Pisatans ralled themselves of their weakness to beg the Lacedaemonians to grant to them the management of the Olympic festival; but as they were now only villagers, nd would probably have been unable to conduct he festival with becoming splendour, the Spartans efused their request, and left the presidency in the ands of the Eleians. (Xen. *Hell.* iii. 2. § 30.)

Soon after the battle of Leuctra (B. C. 371), by which the Spartan power had been destroyed, the Eleians attempted to regain their supremacy over he Triphylian towns; but the latter, pleading their Arcadian origin, sought to be admitted into the Arcadian confederacy, which had been recently organised by Epaminondas. The Arcadians complied with their request (B. C. 368), much to the displeasure of the Eleians, who became in consequence ither enemies of the Arcadians. (Xen. *Hell.* vi. 5. 2, vii. 1. § 26.) In order to recover their lost dominions the Eleians entered into alliance with the Spartans, who were equally anxious to gain possession of Messenia. In B. C. 366 hostilities commenced etween the Eleians and Arcadians. The Eleians ained by force Lasion and the other towns in the Acroreia, which also formed part of the Arcadian onfederacy, and of which they themselves had been eprived by the Spartans in B. C. 400, as already reated. But the Arcadians not only recovered these owns almost immediately afterwards, but established garrison on the hill of Cronion at Olympia, and dvancing against the town of Elis, which was unfortified, nearly made themselves masters of the place. The democratical party in the city rose against the ruling oligarchy, and seized the acropolis; but they were overcome, and fled from the city. Thereupon, assisted by the Arcadians, they seized Pylus, a place on the Peneius, at the distance of about 9 miles from Elis, and there established themselves with a view of carrying on hostilities against the ruling party in the city. (Xen. *Hell.* vii. 4. 13—18; Diod. xv. 77.) In the following year (B. C. 365) the Arcadians again invaded Elis, and being attacked by the Eleians between their city and Cyllene, gained a victory over them. The Eleians, in distress, applied to the Spartans, who created a diversion in their favour by invading the south-western part of Arcadia. The Arcadians in Elis now returned home in order to defend their own country; whereupon the Eleians recovered Pylus, and put to death all of the democratical party whom they found there. (Xen. *Hell.* vi. 4. §§ 19—26.) In the next year (B. C. 364) the 104th celebration of the Olympic festival occurred. The Arcadians, who had now expelled the Spartans from their country, and who had meantime retained their garrison at Olympia, resolved to restore the presidency of the festival to the Pisatans, and to celebrate it in conjunction with the latter. The Eleians, however, did not tamely submit to this exclusion, and, while the games were going on, marched with an armed force into the consecrated ground. Here a battle was fought; and though the Eleians showed great bravery, they were finally driven back by the Arcadians. The Eleians subsequently took revenge by striking out of the register this Olympiad, as well as the 8th and 34th, as not entitled to be regarded as Olympiads. (Xen. *Hell.* vii. 4. §§ 28—32; Diod. xv. 78.) The Arcadians now seized the treasures in the temples at Olympia; but this act of sacrilege was received with so much reprobation by several of the Arcadian towns, and especially by Mantineia, that the Arcadian assembly not only denounced the crime, but even concluded a peace with the Eleians, and restored to them Olympia and the presidency of the festival (B. C. 362). (Xen. *Hell.* vii. 4. §§ 33, 34.)

Pausanias relates that when Philip, the father of Alexander the Great, obtained the supremacy in Greece, the Eleians, who had suffered much from civil dissensions, joined the Macedonian alliance, but at the same time would not fight against the Athenians and Thebans at the battle of Chaeroneia. After the death of Alexander the Great, they renounced the Macedonian alliance, and fought along with the other Greeks against Antipater, in the Lamian War. (Paus. v. 4. § 9.) In B. C. 312 Telesphorus, one of the generals of Antigonus, seized Elis and fortified the citadel, with the view of establishing an independent principality in the Peloponnesus; but the town was shortly afterwards recovered by Ptolemaeus, the principal general of Antigonus in Greece, who razed the new fortifications. (Diod. xix. 87.)

The Eleians subsequently formed a close alliance with their kinsmen the Aetolians, and became members of the Aetolic League, of which they were the firmest supporters in the Peloponnesus. They always steadily refused to renounce this alliance and join the Achaeans, and their country was in consequence frequently ravaged by the latter. (Polyb. iv. 5, 9, 59, seq.) The Triphylians, who exhibit throughout their entire history a rooted repugnance to the Elean supremacy, joined the Achaeans as a matter of course. (Comp. Liv. xxxiii. 34.) The Eleians are not mentioned in the final war between the Romans and the Achaean League; but after the capture of Corinth, their country, together with the rest of Peloponnesus,

Digitized by Google

became subject to Rome. The Olympic games, however, still secured to the Eleians a measure of prosperity; and, in consequence of them, the emperor Julian exempted the whole country from the payment of taxes. (Julian, *Ep.* 35.) In A. D. 394 the festival was abolished by Theodosius, and two years afterwards the country was laid waste with fire and sword by Alaric.

In the middle ages Elis again became a country of some importance. The French knights at *Patras* invaded the valley of the Peneius, where they established themselves with hardly any resistance. Like Oxylus and his Aetolian followers, William of Champlitte took up his residence at *Andrabida*, in a fertile district on the right bank of the Peneius. Gottfried of Villehardouin built *Glarenza*, which became the most important sea-port upon the western coast of Greece; under his successors *Castro Tornese* was built as the citadel of *Glarenza*. *Gastúni* and *Santaméri* were also founded about the same period. Elis afterwards passed into the hands of the Venetians, under whom it continued to flourish, and who gave to the western province of the *Morea* the name of *Belvedere*, from the citadel of Elis. It was owing to the fertility of the plain of the Peneius that the Venetians called the province of *Belvedere* the milk-cow of the Morea. But the country has now lost all its former prosperity. *Pyrgos* is the only place of any importance; and in consequence of the malaria, the coast is becoming almost uninhabited. (Curtius, *Peloponnesos*, vol. ii. p. 16, seq.)

III. The City of Elis.

The position of the city of Elis was the best that could have been chosen for the capital of the country. Just before the Peneius emerges from the hills into the plain, the valley of the river is contracted on the south by a projecting hill of a peaked form, and nearly 500 feet in height. This hill was the acropolis of Elis, and commanded as well the narrow valley of the Peneius as the open plain beyond. It is now called *Kaloskopi*, which the Venetians translated into *Belvedere*. The ancient city lay at the foot of the hill, and extended across the river, as Strabo says that the Peneius flowed through the city (viii. p. 337); but since no remains are now found on the right or northern bank, it is probable that all the public buildings were on the left bank of the river, more especially as Pausanias does not make any allusion to the river in his description of the city. On the site of the ancient city there are two or three small villages, which bear the common name of *Paleópoli*.

Elis is mentioned as a town of the Epeii by Homer (*Il.* ii. 615); but in the earliest times the two chief towns in the country appear to have been Ephyra, the residence of Augeias, in the interior, and Buprasium on the coast. Some writers suppose that Ephyra was the more ancient name of Elis, but it appears to have been a different place, situated upon the Ladon. [Buprasium; Ephyra.] Elis first became a place of importance upon the invasion of Peloponnesus by the Dorians. Oxylus and his Aetolian followers appear to have settled on the height of *Kaloskopi* as the spot best adapted for ruling the country. From this time it was the residence of the kings, and of the aristocratical families who governed the country after the abolition of royalty. Elis was the only fortified town in the country; the rest of the inhabitants dwelt in unwalled villages, paying obedience to the ruling class at Elis.

Soon after the Persian wars the exclusive privileges of the aristocratical families in Elis were abolished, and a democratical government established. Along with this revolution a great change took place in the city of Elis. The city appears to have been originally confined to the acropolis; but the inhabitants of many separate townships, eight according to Strabo, now removed to the capital, and built round the acropolis a new city, which they left undefended by walls, relying upon the sanctity of their country. (Diod. xi. 54; Strab. viii p. 336; Xen. *Hell.* iii. 2. § 27.) At the same time the Eleans were divided into a certain number of local tribes, or if the latter existed before, they now acquired for the first time political rights. The Hellanodicae, or presidents of the Olympic games, who had formerly been taken from the aristocratical families, were now appointed, by lot, one from each of the local tribes, and the fluctuating number of the Hellanodicae shows the increase and decrease from time to time of the Eleian territory. It is probable that each of the three districts into which Elis was divided,—Hollow Elis, Pisatis, and Triphylia,—contained four tribes. This is in accordance with the fourfold ancient division of Hollow Elis, and with the twice four townships in the Pisatis. Pausanias in his account of the number of the Hellanodicae says that there were 12 Hellanodicae in Ol. 103, which was immediately after the battle of Leuctra, when the Eleians recovered for a short time their ancient dominions, but that being shortly afterwards deprived of Triphylia by the Arcadians, the number of their tribes was reduced to eight. (Paus. v. 9. §§ 5. 6: for details see K. O. Müller, *Die Phylen von Elis und Pisa*, in *Rheinisches Museum*, for 1834, p. 167. seq.)

When Pausanias visited Elis, it was one of the most populous and splendid cities of Greece. At present nothing of it remains except some masses of tile and mortar, several wrought blocks of stone and fragments of sculpture, and a square building about 20 feet on the outside, which within is in the form of an octagon with niches. With such scanty remains it would be impossible to attempt any reconstruction of the city, and to assign to particular sites the buildings mentioned by Pausanias (vi. 23—26).

Strabo says (viii. p. 337) that the gymnasium stood on the side of the river Peneius; and it is probable that the gymnasium and agora occupied the greater part of the space between the river and the citadel. The gymnasium was a vast inclosure surrounded by a wall. It was by far the largest gymnasium in Greece, which is accounted for by the fact that all the athletae in the Olympic games were obliged to undergo a month's previous training in the gymnasium at Elis. The inclosure bore the general name of Xystus, and within it there were special places destined for the runners, and separated from one another by plane-trees. The gymnasium contained three subdivisions, called respectively Plethrium, Tetragonum, and Malco: the first so called from its dimensions, the second from its shape, and the third from the softness of the soil. In the Malco was the senate-house of the Eleians, called Lalichium from the name of its founder: it was also used for literary exhibitions.

The gymnasium had two principal entrances, one leading by the street called Siope or Silence to the baths, and the other above the cenotaph of Achaeus to the agora and the Hellanodicaeum. The agora was also called the hippodrome, because it was used for the exercise of horses. It was built in the second

Digitized by Google

gle, and, instead of being surrounded by an uninterrupted series of stoae or colonnades, its stoae are separated from one another by streets. The southern stoa, which consisted of a triple row of Doric columns, was the usual resort of the Hellanodicae during the day. Towards one end of this stoa on the left was the Hellanodicaeon, a building divided from the agora by a street, which was the official residence of the Hellanodicae, who received here instruction in their duties for ten months preceding the festival. There was another stoa in the agora called the Corcyraean stoa, because it had been built out of the tenth of some spoils taken from the Corcyraeans. It consisted of two rows of Doric columns, with a partition wall running between them: one side was open to the agora, and the other to a temple of Aphrodite Urania, in which was a statue of the goddess in gold and ivory by Pheidias. In the open part of the agora Pausanias mentions the temple of Apollo Acacesius, which was the principal temple in Elis, statues of Helios and Selene (Sun and Moon), a temple of the Graces, a temple of Silenus, and the tomb of Oxylus. On the way to the theatre was the temple of Hades, which was opened only once in the year.

The theatre must have been on the slope of the acropolis: it is described by Pausanias as lying between the agora and the Menius, which, if the name is not corrupt, must be the brook flowing down from the heights behind *Paleópoli*. Near the theatre was a temple of Dionysus, containing a statue of this god by Praxiteles.

On the acropolis was a temple of Athena, containing a statue of the goddess in gold and ivory by Pheidias. On the summit of the acropolis are the remains of a castle, in the walls of which Curtius noticed some fragments of Doric columns which probably belonged to the temple of Athena.

In the immediate neighbourhood of Elis was Petra, where the tomb of the philosopher Pyrrhon was shown. (Paus. vi. 24. § 5.)

IV. Towns in Elis.

1. In Hollow Elis. Upon the coast, proceeding northwards from the promontory of Araxus, Hyrmine, Cyllene. From the town of Elis, a road led northward to Dyme in Achaia passing by Myrtuntium (or Myrsinus) and Buprasium. East of Elis and commanding the entrance to the Acroreia or highlands of Elis was Pylos, at the junction of the Pamisus and Ladon. South of Pylos on the Ladon was the Homeric Ephyra, afterwards called Messē. North of Pylos in the mountainous country on the borders of Achaia was Thalamae. East of Pylos and Ephyra, in the Acroreia, were Lasion, Dyspontium, Thraustus (or Thraestus), Alium, Eupagium, Opus.

2. In Pisatis. Upon the Sacred Way leading from Elis to Olympia, Letrini and Dyspontium. Upon the coast, the town and harbour of Pheia. On the road across the mountains from Elis to Olympia, Alesiarum, Salmone, and Heracleia; also in the same neighbourhood, Margana (or Margalae) and Amphidoli. Olympia lay on the right bank of the Alpheius, nearly in the centre of the country: it was properly not a town, but only a collection of sacred buildings. A little to the east of Olympia was Pisa, and further east Harpinna.

3. In Triphylia. Upon the road along the coast, Epitalium (the Homeric Thryon), Samicum, Typaei. A road led from Olympia to Lepreum, on which were Pylos and Macistus. Lepreum in the southern part of Triphylia was the chief town of the district. Between these two roads was Scillus, where Xenophon resided. On the Alpheius to the east of Olympia was Phrixa, and southwards in the interior were Aepy (afterwards called Epeium), Hypana, Typaneae. The position of Bolax and Stillagium is uncertain.

(Respecting the topography of Elis, see Leake, *Morea*, vol. i. p. 1, seq., vol. ii. p. 165, seq., *Peloponnesiaca*, passim; Boblaye, *Recherches*, &c. p. 117, seq.; and especially Curtius, *Peloponnesos*, vol. ii. p. 1, seq., from whom a considerable part of the preceding account is taken.)

COINS OF ELIS.

ELISARI (Ἐλισάροι), a people of Arabia Felix, mentioned by Ptolemy, at the straits of the Red Sea (*Bab-el-Mandeb*), between the Cassaniti on the north, and the Homeritae on the east (vi. 7. § 7). They are doubtless identical with the *El-Asyr* tribe, a district of *Yemen*, described by Burchardt as "the most numerous and warlike tribe of those mountains, and exercising considerable influence over all their neighbours (*Notes on the Bedouins*, &c. p. 245); and Niebuhr has marked on his map of *Yemen* "a town or village still named Elasera, on the hills above Sabbia WNW." (Forster, *Arabia*, vol. i. p. 70, vol. ii. pp. 147, 148.) [G. W.]

ELISON (Ἔλισων), a tributary of the Lupia (*Lippe*), commonly identified with the *Alme*. At its confluence with the Lupia, the Romans built the fort Aliso. (Dion Cass liv. 33.) [L. S.]

ELLASAR (Ἐλλασάρ), mentioned only in Genesis (xiv. 1) as the country of Arioch, one of the kings associated with Chedorlaomer in his invasion of Canaan. Some have identified it with the *Elisari* of Arabia, others with Assyria, under the name El-Asur; but all is pure conjecture. [G. W.]

ELLEBRI. [Veliborī.]

ELLEPORUS. [Helleporus.]

ELLOME'NUS (Ἐλλομένος), a town in Leucas, mentioned by Thucydides, is supposed by Leake to be represented by the port of *Klimindó*. (Thuc. iii. 94; Leake, *Northern Greece*, vol. iii. p. 23.)

ELO'NE (Ἠλώνη), a town of Perrhaebia in Thessaly, mentioned by Homer along with Orthe and Oloosson, afterwards called Lemone (Λεμώνη), according to Strabo. The same writer says that it was in ruins in his time, and that it lay at the foot of Mt. Olympus, not far from the river Eurotas, which the poet calls Titaresius. Leake places it at *Selos*, where there are said to be some ancient

Digitized by Google

remains. (Hom. *Il.* ii. 739, ix. p. 440; Steph. B. *s. v.* Ἠλώνη; Leake, *Northern Greece*, vol. iii. p. 345).

ELLO'PIA. [EUBOEA.]

ELORUS. [HELORUS.]

ELU'RO. [LACETANI.]

E'LUSA. [ELUSATES.]

ELUSA'TES, a people of Aquitania who were subdued B. C. 56 by P. Crassus, a legatus of Caesar (*B. G.* iii. 27). Pliny (iv. 19) enumerates them between the Ausci and the Sotiates. [AUSCI.] Their chief town, Elusa, is mentioned in the Antonine Itin. on a road from Burdigala (*Bordeaux*) to Narbo (*Narbonne*). It is called Civitas Elusa, and is placed 12 M. P. after Mutatio Scittio, which is Sotium (*Sos*). From Civitas Elusa to Civitas Auscius (*Auch*) is 30 M. P. Claudianus (*in Rufin.* i. 137) mentions Elusa —

> "Invadit muros Elusae, notissima dudum
> Tecta petens."

The modern town of *Eauze*, in the department of *Gers*, is near the old site, which is called *Civitat*, a corruption of Civitas. Ammianus (xv. 11), if his text is right, places Elusa in Narbonensis, which is not correct. The Notitia of the Gallic provinces makes the Civitas Elusatium the metropolis of Novempopulana. [G. L.]

ELU'SIO, a city of Narbonensis, which the Jerusalem Itin. places on the road from Tolosa (*Toulouse*) to *Narbonne*. It is 20 M. P. from *Toulouse* to Elusio, and 33 M. P. from Elusio to Carcaso (*Carcassonne*). The position of *St. Pierre d'Elzonne* (Eglise de Montferrand) seems to be the site. [G.L.]

ELYCO'CI (Ἐλύκωκοι), a people of Gallia Narbonensis, mentioned only by Ptolemy (ii. 10), who makes Alba Augusta their capital. D'Anville, Walckenaer, and others, suppose that Ptolemy's Elycoci is a corruption of Helvii; and it may be some argument in favour of this supposition that both people had a capital Alba. [ALBA HELVIORUM.] But, on the other hand, Ptolemy places the Elycoci on the east side of the *Rhone*, and the Helvii are on the west side. [G. L.]

E'LYMA. [ELYMI.]

ELYMA. [ELIMEIA.]

ELYMA'IS (ἡ Ἐλυμαΐς, Strab. xvi. p. 744; Joseph. *Ant.* xii. 13; Steph. B. *s. v.*: in O. T. ELAM; Ἐλυμαία, Strab. xi. p. 524: *Eth.* Ἐλυμαῖοι, Strab. xi. pp. 522, 524: xvi. p. 739; Ptol. vi. 3. § 3; Ἐλαμῖται, *Act Apost.* ii. 9; Ἔλυμοι, Joseph. *Ant.* i. 7), a province usually considered part of the larger district of Susiana; but it is difficult to define its limits, as the classical writers speak of it, for the most part, with great indistinctness. Thus from Strabo (xi. p. 524) it might be inferred, that he considered it to extend considerably to the N. and quite up to the southern boundary of Media Magna; while, in another place, he would seem to consider it simply as one of several provinces which he enumerates to the eastward of Babylonia (xvi. p. 736). The most distinct statement which that geographer makes, is where he states that Elymais joins Susis (the province of Susiana), while the country round Mt. Zagros and Media join Elymais (xvi. p. 744). According to this view, Elymais would comprehend the rugged mountain tract formed by the southern spurs of Mt. Zagros, S. of Media and N. of Susiana. According to Stephanus, it was a part of Assyria in the direction and near the Persian province of Susis; and the sacred writers appear to indicate that it was sometimes subject to Assyria and sometimes to Babylonia (*Isaiah*, xxii. 6; *Ezek.* xxiii. 24). Pliny, on the other hand, extends Elymais to the shores of the Persian gulf (vi. 27. s. 31),—in which view he is supported by the Epitomizer of Strabo (xi. p. 148), and Ptolemy (vi. 3. § 3),—making its northern limit, towards Susiana, the river Eulaeus. According to this, Elymais would comprehend the country between the Eulaeus, the Oxus (the boundary of Persis), and the Persian gulf. It is probable that the character of the people, who were for the most part a warlike mountain tribe, at different periods of their history possessing a widely diverse extent of territory, led ancient geographers to describe their locality with so little precision. In its widest extent, Elymais is said to have had three eparchies which were included in it, Gabiana, Massabatica, and Corbiana. (Strab. xvi. p. 745.) In other places, the Cossaei, Paraetacae, and Uxii, and the district of Sittacene and Apolloniatis, are mentioned in connection with the people or land of Elymais. (Strab. xvi. pp. 732, 736, 739, 744.) In the Bible, Elam and Media are constantly in connection, and it is not improbable that at that remote period Elam and its inhabitants occupied much of the country which in the later and classical ages was assigned to Persia. (*Isaiah*, xxi. 2; *Jer.* xxv. 25.) It is not, however, possible to draw from the notices in Holy Scripture any certain geographical inferences. It would seem that it was generally held that Susis and Elymais, though adjoining, were separate territories, though the exact limits of the former, also, are not easily to be ascertained. Indeed, Strabo (xi. p. 524, xvi. p. 744) speaks of wastes between them, in which the people of Elymais were able to bring into the field as many as 13,000 cavalry. In the notice of Persian nations in Ezra, the people of Susa and Elam are separately enumerated (iv. 9); though, in Daniel, the metropolis of Susiana, is placed in Elam (viii. 2). The government of the country was from very early times under independent kings, probably minor chieftains; of these, two are mentioned by name in the Bible; Chedorlaomer, the contemporary with Abraham, in Genesis (xiv. 1), and Arioch, during the rule of Nebuchodonosor, in Judith (i. 6). Strabo bears testimony to the fact that the Elymaei alone were never subdued by the Parthian kings, but were able even to exact a yearly tribute from them (xi. p. 722). With regard to the name of this province, there can be no doubt that it is derived from the Hebrew Elam, while its population are considered to be Semitic, Elam being one of the sons of Shem (Gen. x. 92). Yet, from the position of the district, there was probably a large intermixture of an Indo-Germanic element. (See comparison of Elam with the Pehlvi Airjama by Müller, *Journ. Asiat.* vol. vi. p. 299.) The character of the people, as described in the Bible, is in accordance with the notices of the classical writers. Like the Persians of later times, and their neighbours the Cossaei, they seem principally to have used the bow and arrow. (*Isaiah*, xxii. 6; *Jer.* xlix. 35; Appian, *Syr.* 32; Strab. xvi. p. 744; Liv. xxxv. 48, xxxvii. 40.) There was, however, besides, a considerable settled population, who cultivated the plain-country. It has been usual to describe several towns, as Seleucela, Sidone, Samosata, Badaca, and Elymais, and the rivers Eulaeus, Hedyphon or Hedyphnus, and Coprates, as belonging to Elymais. As, however, they belong with equal justice to the larger and better known province of

Digitized by Google

Susiana, they are so considered in the present work. SUSIANA.]

2. A district of Media Magna, situated, according to Ptolemy (vi. 2. § 6), to the N. of the region which he calls Choromithrene. Polybius places a tribe, whom he calls Elymaei, in the mountain region to the N. of Media (v. 44). It is not clear where it was situated, and, as most of the authorities usually referred to (as Strab. xi. p. 524, xv. p. 732) apply well to the more important Elymais of Susiana, we think it may be doubted whether there was another Elymais in the position relative to Media which Ptolemy and Polybius seem to have imagined. It is, however, possible, that some of the people of the Susianian province may, at some period, have migrated to the north, or that that province may itself have been sometimes carelessly included within the varying boundaries of the greater country, Media. [V.]

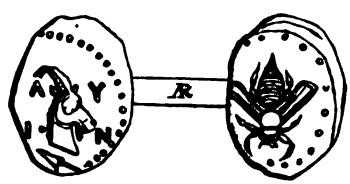
ELYMI (Ἔλυμοι: the form Ἔλυμοι and Helymi appears to be incorrect), a people in the extreme W. of Sicily, who are reckoned among the native tribes of the island, but distinct from the Sicelians and Sicanians. (Scyl. p. 4; Thuc. vi. 2.) The general opinion of the Greeks derived them from a Trojan origin: this is distinctly stated by Thucydides (*l. c.*); and the history of their arrival and the foundation of their two cities, Eryx and Egesta, is circumstantially related by Dionysius (i. 52). In all the legends connecting them their eponymous hero Elymus is a Trojan, and appears in close connection with Aeneas and Acgestus or Acestes. (Strab. xiii. p. 608.) This notion of their Trojan descent may probably be understood, as in many other cases, as pointing to a Pelasgic extraction. A wholly different tradition is, however, preserved by Hellanicus, who represented the Elymi as having been driven from the east of Italy by the Oenotrians, previous to the similar migration of the Siculi. (Hellan. *ap. Dionys.* i. 22.) Ephorus also, though he enumerates the Elymi among the barbarian inhabitants of Sicily, seems to reckon them distinct from the Trojans. (Scyl. p. 4. § 13.) They appear to have maintained constant friendly relations with the neighbouring Phoenician settlements of Motya, Solus, and Panormus, and are mentioned at an early period as co-operating with that people in expelling the Cnidians, who had attempted to form a settlement in Sicily itself, previous to their establishment at Lipara. (Thuc. *l. c.*; Paus. x. 11. § 3.) No mention of them occurs in later times as a separate people: their two cities Eryx and Egesta had become to a great extent Hellenised, and assumed the position of independent political bodies.

The existence of a *city* of the name of Elyma rests chiefly on the authority of a passage of Dionysius (i. 52), in which there is little doubt that the true reading should be Ἔρυκα, as suggested by Sylburg and Cluver. (*Sylburg. ad loc.*; Cluver, *Sicil.* p. 444.) [E. H. B.]

ELYMIA (Ἐλυμία), a town in Arcadia, near the boundaries of Mantineia and Orchomenus, probably situated at *Levidhi*, where there are ancient remains. (Xen. *Hell.* vi. 5. § 13; Leake, *Peloponnesiaca*, p. 229.)

ELYRUS (Ἔλυρος: *Eth.* Ἐλύριος, Steph. B.), a town of Crete, which Scylax (*Geog. Graec. Min.* vol. i. p. 265, ed. Gail) places between Cydonia and Rhaucus. It had a harbour, SULA (Σοῦλα, Steph. B.), situated on the S. coast of the island, 60 stadia W. of Poecilassus. (*Stadiasm.*) Pausanias (x. 16. § 3) states that the city existed in his time in the mountains of Crete. He adds that he had seen at Delphi the bronze goat which the Elyrians had dedicated, and which was represented in the act of giving suck to Phylacis and Phylander, children of Apollo and the nymph Acacallis, whose love had been won by the youthful god at the house of Casmanor at Tarrha. It was the birthplace of Thaletas (Suid. *s. v.*), who was considered as the inventor of the Cretic rhythm, the national paeans and songs, with many of the institutions of his country. (Strab. x. p. 480.) Elyrus appears in Hierocles' list of Cretan cities, then reduced in number to twenty-one. Mr. Pashley (*Travels*, vol. ii. p. 105) discovered the site at a *Palaeókastron* near *Rhodovóni*. The first object that presents itself is a building consisting of a series of arches; next, vestiges of walls, especially on the N. and NE. sides of the ancient city. The circuit of these must originally have been two miles; at a slight elevation above are other walls, as of an acropolis. Further on are some massive stones, some pieces of an entablature, and several fragments of the shafts of columns, all that now remains of an ancient temple. Traces of the wall of Suia, which still retains its ancient name, and of some public buildings, may be observed. Several tombs, resembling those of *Haghio-Kyrko*, and an aqueduct, are still remaining. (Capt. Graves, *Admiralty Chart*, in *Mus. Class. Antiq.* vol. ii. p. 298.)

The coins of this city have the type of a bee upon them. (Pellerin, *Rec. des Méd.* vol. iii. p. 68; Mionnet, *Supplément*, vol. iv. p. 319.) [E. B. J.]



COIN OF ELYRUS.

EMATHIA (Ἡμαθίη), a district which the Homeric poems (*Il.* xiv. 226) couple with Pieria as lying between the Hellenic cities of Thessaly and Paeonia and Thrace. The name was in primitive times assigned to the original seats of the Temenid dynasty of Edessa. It comprehended that beautiful region beyond the Haliacmon and on the E. side of the Olympene ridge, which is protected on all sides by mountains and marshes, at a secure but not inconvenient distance from the sea. Emathia, which had received the gift of three magnificent positions for cities or fortresses in *Vérmia*, *Nicaista*, and *Vodhend*, and possessing every variety of elevation and aspect, —of mountain, wood, fertile plain, running water, and lake,—was admirably adapted to be the nursery of the monarchy of Macedonia.

It appears from Justin (vii. 1) that part of Emathia was occupied by the Briges, who were expelled from thence by the Temenidae; and Herodotus (viii. 138), in stating that the gardens of Midas, their king, were situated at the foot of Mount Bermius, seems to show that their position was round Beroea.

Emathia, in later times, had more extensive boundaries than those which Homer understood; and Ptolemy (iii. 13. § 39) advanced its limits to the right bank of the Axius. Polybius (xxiv. 8. § 4) and Livy (xl. 3), who is his transcriber in this place, assert, in contradiction to the notice in the *Iliad*, that Emathia was formerly called Paeonia, but this

Digitized by Google

may be reconciled by supposing that previously it had been inhabited by the Paeonian race.

Emathia was, after the Roman conquest, included in the third region of Macedonia, and contained the following cities: — BEROEA, CITIUM, AEGAE, EDESSA, CYRRHUS, ALMOPIA, EUROPUS, ATALANTA, GORTYNIA, and IDOMENE. (Leake, *Northern Greece*, vol. iii. pp. 442—447.) [E. B. J.]

EM'BATUM (τὸ Ἔμβατον), a place in the territory of Erythrae, mentioned by Theopompus in the eighth book of his *Hellenica* (Steph. B. *s. v.*) It appears from Thucydides (iii. 29) that it was on the coast. [G. L.]

EMBO'LIMA (Ἐμβόλιμα, Arrian, iv. 28; Ptol. vii. 1. § 57; Ecbolima, Curt. viii. 12. § 1), a town apparently in Bactriana, though considered by Ptolemy to be within the arbitrary division of ancient India which he calls "India intra Gangem." It was, according to him, near the river Indus. It was visited by Alexander the Great after the rock Aornus, near which it stood. It must therefore have been on the west bank of the Indus, perhaps at the modern *Ambar*, or *Amb*. The narrative of Curtius cannot be reconciled with its position, nor indeed with any other place in this part of the country, as he places Embolima at sixteen marches from the Indus. It was made by Alexander a magazine for the troops of which Craterus was left in charge. (Wilson, *Ariana*, p. 191.) [V.]

EME'RITA AUGUSTA. [AUGUSTA EMERITA.]

EMESA or EMISSA (Ἔμισσα: *Eth.* Ἐμισηνοί), a city of Syria, reckoned by Ptolemy to that part of the district of Apamene, on the right or eastern bank of the Orontes (v. 15. § 19), to which Pliny assigns a desert district beyond Palmyra (v. 26). It is chiefly celebrated in ancient times for its magnificent temple of the Sun; and the appointment of its young priest Bassianus, otherwise called Elagabalus or Heliogabalus, to the imperial dignity, in his fourteenth year, by the Roman legionaries of Syria (A. D. 218; *Dict. of Biogr. s. v.* Elagabalus). It was in the neighbourhood of Emesa that Zenobia, queen of Palmyra, was defeated by the emperor Aurelian, A. D. 272. (Vopisc. *Aurel.* 25.) It was originally governed by independent chiefs, of whom the names of Sampsiceramus and Iamblichus are preserved. (Strab. xvi. p. 753.) It was made a colony with the Jus Italicum by Caracalla (Ulpian, *ap. Dig.* 50. tit. 15. s. 1), and afterwards became the capital of Phoenicia Libanesia. (Hierocl.; Malal. xii. p. 296, ed. Bonn.)

There are still extant coins of Caracalla and Elagabalus, in which it is called a colony and a metropolis. On the coins of Caracalla it is called a colony, and on those of Elagabalus a metropolis, to which dignity it was no doubt elevated by the latter emperor. The annexed coin of Caracalla represents on the reverse the temple of the Sun. (Eckhel, vol.

COIN OF EMESA.

iii. p. 311.) The present name of Emesa is *Hems*. [G. W.]

EMIMS (Ἐμείν, Ἐμαῖοι), the very ancient inhabitants of Moab, a gigantic race, as their name imports, dispossessed by the children of Lot [MOAB] (*Deut.* ii. 10, 11), having been then lately weakened, as would appear, by the defeat they had experienced in the valley of Kiriathaim from Chedorlaomer and the confederate kings, as recorded in *Genesis* (xiv. 5). [G. W.]

EMMA'US (Ἐμμαούς). 1. A village of Judaea mentioned by St. Luke (xxiv. 13), distant sixty furlongs from Jerusalem. This is doubtless identical with the Χώριον Ἀμμαοῦς of Josephus, which he says ἀπέχει τῶν Ἱεροσολύμων σταδίους ἑξήκοντα, in which Vespasian established a colony of 800 veterans. (*B. J.* vii. 6. § 6.) A tradition, originating apparently in the 14th century, which has fixed its site at the village of *El-Kubeibeh*, has no value whatever, and the distance does not coincide (Robinson, *B. R.* vol. iii. pp. 65. 66). A more ancient and consistent tradition, which still prevails among the Greeks, identifies it with the village of *Kuriyat-el-Anáb*, popularly called *Abu-Goosh*, on the road between Jerusalem and Jaffa, about 1¼ hour from the former city. The authenticity of this tradition is confirmed by the existence at the present day of a native village, on the road between Jerusalem and *Kuriyat-el-Anáb*, named *Colonia* or *Kulonia*, obviously deriving its name from the military colony established in the district of Ammaus by Vespasian. It is still celebrated for its waters, as it was in the time of Julius, who attempted to stop the fountain on account of its miraculous virtues imputed to it. (Theophanes, cited by Reland, *Palaest.* p. 759.) It is often confounded with the following, as it is, indeed, by Theophanes.

2. A city of Palaestine, about eight or ten miles from the former (with which it has been often confounded), still retaining its ancient name almost unchanged, being now called *Amwas*. In later times it was designated Nicopolis, in commemoration, as is suggested, of the destruction of Jerusalem (Willibald. *ap. Reland*, p. 760.) It is frequently mentioned in the book of Maccabees, and by Josephus (cited in Reland, pp. 428, 429. 758, 759), and is joined with Lydda and Thamna. The Itinerarium Hierosolymitanum places it 22 Roman miles from Jerusalem; and St. Jerome accurately states its position, "ubi incipiunt montana Judaeae consurgere" (*Comment. in Daniel.* xii.); but both he and Eusebius erroneously identify this city with the village mentioned by St. Luke. (*Epitaph. Paulae*, and *de Locis Hebraicis*, *ad voc.* Ἐμμαοῦς.) Pliny (v. 14) seems to make the same mistake, when he writes of it as a toparchy — "Fontibus irriguum Emmaum, Lyddam, Joppicam," — a characteristic certainly more descriptive of the village of St. Luke than of the city Nicopolis, whose site is still marked by a village bearing the same name, and traces of ancient ruins, on the right hand, or north, of the road from Jerusalem to *Jaffa*, in the immediate vicinity of *Latrún*, the "Castellum boni Latronis" of the Crusades.

3. (Ἀμμαοῦς.) The name given by Josephus (*Ant.* xviii. 2. § 3, *B. J.* iv. 1. § 2) to the medicinal hot-springs of Tiberias, and which he interprets to mean "warm baths," probably identifying the name with the Hebrew Hammath; which inclines Dr. Robinson to regard the ancient town of

Digitized by Google

Hammath of the tribe of Naphthali (*Josh.* xix. 35) is represented in these hot springs. (*B. Res.* vol. iii. p. 260.) [TIBERIAS.] [G. W.]

EMO'DI MONTES (τὰ Ἠμωδὰ ὄρη, Strab. xi. p. 511, xv. pp. 698, 715; Ptol. vi. 15; τὸ Ἠμωδὸν ὄρος, Diod. ii. 35; Dionys. 748, 1146; τὰ Ἠμωδά, Ptol. vi. 16; ὁ Ἠμωδός, Strab. xv. p. 689; Arrian, *Ind.* 2; Eustath. *ad Dionys.* 748; Emodus, Plin. v. 17; Hemodus, Mela, i. 15. § 2, iii. 7. § 6; Emodon, Amm. Marc. xxiii. 6. § 64). Although the expeditions of Alexander the Great opened out to the Grecian mind only that part of the chain of the *Himalayah* which is nearest the country of the five rivers of W. India, yet it is to this epoch that we must date a new era for Asiatic geography. The enterprise of the Macedonian conqueror, the campaign of Seleucus Nicator, the long residence of Megasthenes at the court of Sandracottus, and the researches made by Patrocles, the general of Seleucus, and the most veracious (ἥκιστα ψευδόλογος) of all writers concerning India (Strab. ii. p. 70), seem to have thrown great light upon the more E. portions of the peninsula. From this time there appear in the Greek, and subsequently in the Roman writers, views more or less generally accurate on the existence, direction, and continuity of a vast range of mountains extending over the entire continent from W. to E. Dicaearchus, the pupil of Aristotle, has the merit of having been the first to point this out, and it is clearly indicated in the geography of Eratosthenes. In both authors, more than 300 years before Pliny, the name of Imaus is met with under the form of Imaon. India is bordered to the N., from Ariana to the Eastern Sea, by the extremities of Taurus, to which the aboriginal inhabitants give the different names of Paropamisus, Emodon, Imaon, and others, while the Macedonians call them Caucasus. (Eratosth. *ap. Strab.* xv. p. 689; comp. ii. p. 68, xi. p. 490.) The idea of attaching to the Taurus of Asia Minor the W. extremity of the *Himalayah* range or *Hindoo-koosh*, the plateau which is prolonged towards the volcano of *Demavend*, and extends along the S. shore of the Caspian, is not strictly correct. But Strabo (xi. p. 511), in a passage where he describes the chain of the Taurus on the other side of the Caspian, illustrates the continuity of the chain with great detail. In proceeding from the Hyrcanian sea to the E., the mountains that the Greeks call Taurus are always on the right hand, as far as the Indian sea. These mountains begin in Pamphylia and Cilicia, and, receiving different names, are uninterruptedly prolonged to the E. All these mountains beyond the Arii have received from the Macedonians the name of Caucasus; but among the barbarians the mountains to the N. are called Paropamisus, the Emodes and Imaon taking different names in different parts. (Comp. Groskurd, *ap. l. c.*) It is remarkable that these indigenous denominations of the great Himalayan chain were so little altered by the Greeks, that in our time, more than 2000 years after Eratosthenes, we are enabled to interpret them from the Sanscrit. The name of *Himalaya*, applied to a chain of mountains limiting India to the N., has been recognised by Haughton in the laws of Manu. It is the "abode" (*dlaya*) of "snow" (*hima*). The great epic poems of India, the *Rámáyana* and the *Mahábhárata*, speak of *Himavan* and *Himavat*—"snowy," "wintry." Imaus is derived from *Himavat* (Bohlen, *Das Alte-Indien*, vol. i. p. 11), an etymology of which Pliny was aware, who, after speaking of the Montes Emodi, adds, "quorum promontorium Imaus vocatur, incolarum linguâ nivosum significante" (vi. 17). The Montes Emodi are the "golden mountains" (*hémádri*)—*héma*, "gold;" *ádri*, "mountain"—either because of the supposition that there were rich mines of gold, as in the other extremity of Central Asia, in the *Altai* and *Kinchan*, or in allusion to those fires of the setting sun reflected by the snows of the Himalayah which gild its highest summits, as described in The Cloud Messenger of *Kálidása*.

As it appears, therefore, that, according to the great geographical views conceived by Eratosthenes, and elaborated in detail from better and more numerous materials by Marinus of Tyre and Ptolemy, the ancients believed that the interior of Asia was traversed by one single great chain of mountains prolonged from the E. to the W. in the parallel of Rhodes, it only remains to mark off that portion of the great central cordillera to which they applied the name of Emodus or Emodi Montes. They may generally be described as forming that portion of the great lateral branch of the Indian Caucasus, the colossal *Himalayan* range (μέγιστον ὄρος, Agathem. ii. 9), extending along *Nepaul*, and probably as far as *Bhotan*. The prolongation was occasionally indefinitely made. Thus Dionysius Periegetes (ii. 62) describes the foot of the Emodes as bathed by the foaming waves of the Eastern Ocean. Ptolemy (vi. 16) gives the name of Ottorocorras (Ὀττοροκόρρας) to the E. extremity of the chain. The Greeks probably specially applied a general denomination in the systematic geography of India. The Ottorocorras of Ptolemy is the *Uttara-Kuru* of the *Vedds* and *Mahábhárata*, the upper or hyperborean regions of Asia. (Comp. Colebrooke, *Asiat. Research.* vol. viii. p. 398.) The text of Ammianus (xxiii. 6. § 64) has Opuro-Carra, which is the same Mount *Kuru*. The same historian describes in a very picturesque manner one of those Alpine forms ("Contra Orientalem plagam in orbis speciem consertae celsorem aggerum summitates ambiunt Seras; a Septentrione nivosae solitudini cohaerent," *l. c.*) which are so often repeated in the windings of the mountains of E. Asia. The S. spurs of this chain were called BEPYRRHUS (τὸ Βήπυρρον ὄρος, Ptol. vii. 2), with the sources of the DOANAS (*Iravaddy*); DAMASSI or DAMASII MONTES (τὰ Δάμασσα ὄρη, Ptol. *l. c.*), with the sources of the DORIAS; and SKMANTHINI MONTES (τὸ Σκμανθινὸν ὄρος, Ptol. *l. c.*), from which the rivers SERAS and ASPITHRA take their rise. (Humboldt, *Asie Centrale*, vol. i. pp. 140—145; Gosselin, *Géographie des Anciens*, vol. iii. pp. 173, 188, 297, 298; Ritter, *Erdkunde*, vol. ii. p. 185, vol. v. p. 449.) [E. B. J.]

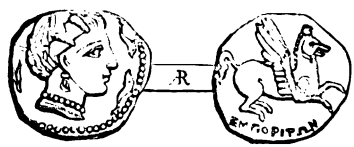
EMPERE'SIUM (Ἐμπερέσιον), a promontory mentioned by Dicaearchus between Aulis and Euripus. Leake supposes Emperesium to have been the name of the peninsula of Euboea immediately south of Chalcis and the Straits. (Dicaearch. *Stat. Graec.* 90; Leake, *Northern Greece*, vol. ii. p. 264, seq.)

EMPO'RIA (τὰ Ἐμπορεῖα), was at first the name of a number of seaport towns, Phoenician and Carthaginian settlements, on the shores of the Lesser Syrtis; afterwards of the district in which those towns lay. (Polyb. i. 82. § 6, iii. 23. § 2, *Exc. Leg.* 18; Appian, *Pun.* 72; Liv. xxix. 25, xxxiv. 62: see further AFRICA, p. 68, b., and BYZACIUM.) [P. S.]

EMPO'RIAE (Liv.) or EMPO'RIUM (Ἐμπορίαι, Ptol.; Ἐμπορεῖον, Polyb., Strab.; Ἐμπόριον, Ptol.: *Ampurias*), an ancient and important city of His-

Digitized by Google

pania Tarraconensis, on the small gulf (*G. of Rosas*) which lies below the E. extremity of the Pyrenees, and at the mouth of the river Clodianus (*Fluvia*), which formed its port. Its situation made it the natural landing-place from Gaul; and as such it was colonised at an early period by the Phocaeans of Massalia. Their first city (afterwards called the Old Town) was built on a small island, whence they passed over to the mainland: and here a double city grew up,—the Greek town on the coast, and an Iberian settlement, of the tribe of the Indigetes, on the inland side of the other. Julius Caesar added a body of Roman colonists to the Greeks and Spaniards; and the place gradually coalesced into one Roman city. On coins it is styled a municipium. (Liv. xxi. 60, 61, xxvi. 19, xxviii. 42, xxxiv. 9; Polyb. iii. 76; Strab. iii. pp. 159, 160; Mela, ii. 6; Plin. iii. 3. s. 4; Ptol. ii. 5. § 20; Steph. B. *s. v.*; Scylax, p. 1; Scymn. Ch. 203; Sil. Ital. iii. 369, xv. 176; Florez, *Med. de Esp.* vol. ii. pp. 409, 645, vol. iii. p. 66; Mionnet, vol. i. pp. 40, 41, *Suppl.* vol. i. p. 82; Sestini, p. 139; Num. Goth.; Eckhel, vol. i. p. 49; Ukert, vol. ii. pt. 1. p. 423.) [P. S.]



COIN OF EMPORIAE.

EMPO'RICUS SINUS (ὁ Ἐμπορικὸς κόλπος), a gulf on the W. coast of Mauretania Tingitana, between the towns of Sala (*Salee*) and Lixus (*El-Arraish*). It derived its name from the mercantile settlements of the Phoenicians. Strabo says that the tides were here so great, that at high water the country was overflowed 7 stadia inland; a statement confirmed by the great swamps which now cover the district. (Strab. xvii. pp. 825, 829; Ptol. iv. 1.) [P. S.]

E'MPULUM (*Ampiglione*), a small town of Latium, a dependency of Tibur, which was taken in B. C. 355 by the Roman consuls. (Liv. vii. 18.) This is the only mention of its name, and we have no clue to its position; but the resemblance of name has induced Gell and Nibby to regard the remains of an ancient town visible at a place called *Ampiglione* (about 5 miles E. of *Tivoli*, on the road to *Siciliano*), as those of Empulum. Considerable portions of the walls remain, constructed of polygonal blocks of tufo—the only instance of the employment of that material in this style of construction; but they are not of a massive character, and are intermixed with portions of reticulated and other masonry, decidedly of the Roman period. The site was probably used in later times as that of a Roman villa. (Gell, *Top. of Rome*, pp. 199—201; Nibby, *Dintorni*, vol. ii. pp. 10, 11.) [E. H. B.]

ENCHELANES (Ἐγχελάνες), a people and town of Illyricum, situated on the W. shore of Lake Lychnitis, in Dassaretia, subdued by Philip, B. C. 216. (Polyb. v. 108. § 8.) [E. B. J.]

ENCHE'LEES (Ἐγχέλεες), an Illyrian tribe, whom the ancient geographer Hecataeus (*Fr.* 66—70, ed. Klausen) placed to the S. of the Taulantii. Scylax (*Fr.* 58) has fixed their position N. of Epidamnus and the Taulantii. This tribe are connected with the cycle of myths concerning Cadmus. (Comp. Herod. v. 61.) [E. B. J.]

ENDOR (Ἀενδώρ, LXX.; Ἔνδωρον, Joseph.; Ἠνδώρ, Ἀηνδώρ, Euseb.), a village in Palestine famous in the closing scenes of the life of Saul for his consultation of the sorceress, on the eve of the battle of Gilboa. (1 *Sam.* xxviii. 7, &c.) It is reckoned to the half tribe of Manasseh, on this side Jordan (*Josh.* xix. 11), and is placed by Eusebius and St. Jerome (*Onomast. s. v.*) at the distance of four miles to the south of Mount Tabor. It was a large village in their time, and still exists under the same name, on the northern declivity of Little Hermon, and near to Nain,—another mark of identification furnished by Eusebius. (Robinson, *Bib. Res.* vol. iii. p. 225.) [G. W.]

E'NEA (Ἐνέα). Strabo (p. 552) mentions three places, on the authority of Demetrius of Scepsis, in the neighbourhood of Scepsis and the Aesepus; and these places are: "Enea, a village (κώμη), and Agyria and Alazia." In another passage Strabo (p. 602), on the same authority, says: "On the right hand of the Aesepus, between Polichne and Palaescepsis, is the Nea Come and silver mines;" and again he says that "Palaescepsis is distant 50 stadia from Aeneia, and 30 from the Aesepus." It is plain that Enea, Nea, and Aeneia, are all the same place, and therefore there is some error in Strabo's text. Groskurd (*Transl. Strab.* vol. ii. pp. 480, 536, note) takes Ἐνέα to be the true name in the first of these passages; and Ἐνέα or Αἰνεία to be the true name in the second. He takes Enea to be the modern *Ene* or *Einiéh*, near the junction of two branches of the *Menderes Chai*. As to this point, see NEA and NEANDRIA. [G. L.]

ENEGLAIM (Ἐναγαλλείμ, LXX.; Ἀγαλλείμ, Euseb.), a city of Moab, mentioned only in Ezek. (xlvii. 10); placed by Eusebius 8 miles south of Areopolis or Ar of Moab (*Onomast. s. v.*), but doubtless identical with the Eglaim of Isaiah, in the burden of Moab (xv. 8). St. Jerome (*Comment. in Ezek. l. c.*) says that it was at the northern extremity of the Dead Sea, at the mouth of the Jordan, as indeed the passage in Ezekiel implies that it was on the coast of the Dead Sea. [G. W.]

ENGANNIM (Ἠγαννά). 1. A city situated in that part of the tribe of Judah designated "the valley" or "the plain" (*Josh.* xv. 34), which bordered on the great plain of Philistia; and several of the cities mentioned in immediate connection with it, and which are still represented by villages bearing the same name, enable us to place it in the neighbourhood of the valley of Elah.

2. Another city of the same name was situated in the tribe of Issachar (*Josh.* xix. 21), and assigned to the Levites (*Josh.* xxi. 29). [G. W.]

ENGEDI (Ἀγκάδης, al. Ἐγγαδδί, al. Ἠγγαδδί, LXX.; Ἐγγαδέ, Ἐγγαδαί, Ἐγγαδί, Joseph.; Ἐγγάδδα, Ptol.: *Eth.* Ἐγγηδήνος), a city in the wilderness of Judaea (*Josh.* xv. 62), giving its name to a desert tract on the west of the Dead Sea (1 *Sam.* xxiv. 2). Its more ancient name was Hazezon-tamar, when it was inhabited by the Amorites. (*Genes.* xiv. 7; 2 *Chron.* xx. 2.) It was celebrated in old times for its vineyards (*Cant.* i. 14), and Pliny reckons it second only to Jerusalem for its fertility and palm-groves (v. 17). It is misplaced by St. Jerome at the southern extremity of the Dead Sea (*Comment. in Ezek.* xlvii. 10), and stated by Josephus to be 300 stadia from Jerusalem (*Ant.* ix. 1. § 2). It gave its name to one of the fifteen toparchies of Judaea (*B. J.* v. 3). It took its name—"Fountain of the wild Goats" (still called *'Ain-Jidy*)—from a copious

Digitized by Google

spring issuing out at the limestone rock at the base of an almost perpendicular cliff 800 or 1000 feet high, down the face of which was the only approach to the town, by a zigzag path cut in the rock. The city was situated on a small plain between the fountain and the sea, and some faint traces of buildings may still be discovered. Owing to the enormous depression of the Dead Sea, the climate of this spot, but in on all sides but the east by rocky mountains, has a temperature much higher than that of any other part of Palestine, and its fruits consequently ripen three weeks or a month before those of the hill country. It is now inhabited only by a few Arabs, whose deformed and stunted growth bears witness to the relaxing influence of this almost tropical climate. (Reland, *Palaestina*, p. 763; Robinson, *Bib. Res.* vol. ii. p. 209, &c.) [G. W.]

ENGUIUM or ENGYUM (Ἔγγυον, Diod., Steph. B., Ἔγγυιον, Plut.: *Eth.* Ἐγγυῖνος, Enguinus: *Gangi Vetere*), a city in the interior of Sicily, celebrated for its temple of the Magna Mater. Diodorus tells us that it was originally founded by a colony of Cretans, the survivors of the expedition of Minos, who were after the Trojan War reinforced by a fresh body of colonists from the same country under Merionus. (Diod. iv. 79.) The same tradition is related by Plutarch, who mentions that relics of Merionus and Ulysses were still shown there in consequence of it. (Plut. *Marc.* 20.) But it is certain that it was not in historical times a Greek colony: there is any mention of it found in history till the time of Timoleon, when the two cities of Engyum and Apollonia were subject to a tyrant named Leptines, who was expelled by Timoleon, and the cities restored to their liberty. (Diod. xvi. 72.) During the Second Punic War Engyum was one of the places that had zealously espoused the cause of the Carthaginians, and was in consequence threatened with severe punishment by Marcellus, but was spared by him at the intercession of Nicias, one of its principal citizens. (Plut. *Marc.* 20.) No further mention of it occurs in history: it appears in the time of Cicero as a municipal town, and is found also in the lists given by Pliny and Ptolemy of the cities of Sicily: but from this time all trace of it disappears. (Cic. *Verr.* ii. 43; Plin. iii. 8. s. 14; Ptol. iii. 4. § 14.) Plutarch tells us it was not a large city, but very ancient and celebrated on account of its temple, which Cicero also calls "angustissimum et religiosissimum fanum." Its reputation is sufficiently proved by the circumstance that Scipio Africanus had presented many offerings to it, including bronze armour and vases of beautiful workmanship, all of which were carried off by the rapacious Verres. (Cic. *Verr.* iv. 44, v. 72.) Cicero calls the deity to whom the temple was dedicated "Mater Magna," and distinctly identifies her with the Mater Idaea: Plutarch and Diodorus, on the contrary, mention the goddesses in the plural, *al* θεαὶ Μητέρες, like the Dese Matres of the Romans. It is probable that their worship was of Pelasgian origin, and the traditions that derived the foundation of the city from Crete evidently point to the same connection.

We have no clue to the precise situation of Engyum: but Cicero mentions it in conjunction with Aluntium, Apollonia, Capitium, and other cities of the NE. of Sicily; and the subjection of Apollonia and Engyum to the government of Leptines would seem to indicate that the two places were not very far distant from each other. Hence the suggestion of Cluverius, who places Engyum at *Gangi Vetere*, about 2 miles S. of the modern town of *Gangi*, and near the sources of the *Fiume Grande*, though a mere conjecture, is plausible enough, and has accordingly been followed by most subsequent writers. The elevated situation of this place would correspond with the strong position assigned it by Diodorus (iv. 79); and Silius Italicus (xiv. 249) also tells us it had a rocky territory. The ruins mentioned by Fazello as existing at *Gangi Vetere*, are however not ancient, but those of the old town of the name, now deserted. (Fazell. *de Reb. Sic.* x. 2; Amic. *ad loc.* p. 419; Cluver. *Sicil.* p. 367.) Ptolemy indeed seems to place Engyum in the more southern part of Sicily: but little dependence can be placed on his data for the towns of the interior. [E. H. B.]

ENI'PEUS, a river of the Macedonian Pieria, which is described by Livy (xliv. 8) as descending from a valley of Olympus, and as enclosed between high and precipitous banks, containing little water in summer, but full of quicksands and whirlpools in wintry weather. In B. C. 169, Perseus placed his army at a distance of 5 M. P. from Dium, behind the Enipeus, and occupied the line of the river. The description of the historian, and its distance from Dium, correspond to the river of *Litokhóro*, which has its origin in the highest parts of the woody steeps of Olympus, and flows in a wide bed between precipitous banks, which gradually diminish in height to the sea. (Leake, *Northern Greece*, vol. iii. pp. 406, 420.) [E. B. J.]

ENI'PEUS (Ἐνιπεύς, sometimes Ἐνισσεύς, Strab. viii. p. 356; Eustath. *ad Od.* xi. 328: *Fersalitis*), one of the principal rivers of Thessaly, rises in Mount Othrys, and after flowing through the plain of Pharsalus, flows into the Peneus. Its chief tributary was the Apidanus, which rises at the foot of the mountains of Phthia, probably at the springs of *Vrysiá*. The Apidanus is sometimes represented as the principal of the two rivers, and its name given to the united stream flowing into the Peneus. Herodotus relates that the Apidanus was the only river in Achaea, of which the waters were not drunk up by the army of Xerxes. (Strab. ix. p. 432, comp. viii. p. 356; Eurip. *Hec.* 451; Herod. vii. 196; Apoll. Rhod. i. 35.) The Enipeus is a rapid river, and is therefore called by Ovid "irrequietus Enipeus" (*Met.* i. 579), an epithet which, as Leake remarks, is more correct than Lucan's description (vi. 374):—

. . . . "it gurgite rapto
Apidanus; nunquamque *celer, nisi mixtus, Enipeus.*"

The Cuarius flowed into the Enipeus after its junction with the Apidanus. (Leake, *Northern Greece*, vol. iv. pp. 320, 330.) Respecting the river god Enipeus, see *Dict. of Biogr. and Myth. s. v.*

2. A river of Elis in the Pisatis, called Barnichius in the time of Strabo, flowed into the Alpheius at no great distance from its mouth. Near the sources of this river stood Salmone. (Strab. viii. p. 356.) [SALMONE.]

ENISPE (Ἐνίσπη), an Arcadian town mentioned by Homer, in the Catalogue of Ships, along with Rhipe and Stratia. It was impossible even in antiquity to determine the position of these towns, and Pausanias treats as absurd the opinion of those who considered them to be islands in the river Ladon. (Hom. *Il.* ii. 606; Strab. viii. p. 388; Paus. viii. 25. § 12.)

ENNA or HENNA (Ἔννα, Steph. B., Pol., Diod., &c., but in Livy, Cicero, and most Latin authors HENNA: *Eth.* Ἐννᾶιος, Ennensis or Hen-

Digitized by Google

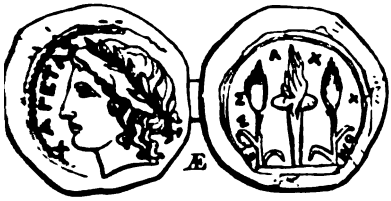
nensis: *Castro Giovanni*), an ancient and important city of Sicily, situated as nearly as possible in the centre of the island; whence Cicero calls it "mediterranea maxime" (*Verr.* iii. 83), and tells us that it was within a day's journey of the nearest point on all the three coasts. Hence the sacred grove of Proserpine, in its immediate neighbourhood, was often called the "umbilicus Siciliae." (Cic. *Verr.* iv. 48; Callim. *H. in Cer.* 15.) The peculiar situation of Enna is described by several ancient authors, and is indeed one of the most remarkable in Sicily. Placed on the level summit of a gigantic hill, so lofty as almost to deserve to be called a mountain, and surrounded on all sides with precipitous cliffs almost wholly inaccessible, except in a very few spots which are easily defended, abundantly supplied with water which gushes from the face of the rocks on all sides, and having a fine plain or table land of about 3 miles in circumference on the summit, it forms one of the most remarkable natural fortresses in the world. (Liv. xxiv. 37; Cic. *Verr.* iv. 48; Strab. vi. p. 272.) Stephanus of Byzantium tells us (*s. v.* Ἔννα), but without citing his authority, that Enna was a colony of Syracuse, founded 80 years after the settlement of the parent city (B. C. 654): but the silence of Thucydides, where he mentions the other colonies of Syracuse founded about this period (vi. 2.), tells strongly against this statement. It is improbable also that the Syracusans should have established a colony so far inland at so early a period, and it is certain that when Enna first figures in history, it appears as a Siculian and not as a Greek city. Dionysius of Syracuse seems to have fully appreciated its importance, and repeatedly attempted to make himself master of the place; at first by aiding and encouraging Aeimnestus, a citizen of Enna, to seize on the sovereign power, and afterwards, failing in his object by this means, turning against him and assisting the Ennaeans to get rid of their despot. (Diod. xiv. 14.) He did not however at this time accomplish his purpose, and it was not till a later period that, after repeated expeditions against the neighbouring Sicilian cities, Enna also was betrayed into his hands. (Id. xiv. 78.) In the time of Agathocles we find Enna for a time subject to that tyrant, but when the Agrigentines under Xenodicus began to proclaim the restoration of the other cities of Sicily to freedom, the Ennaeans were the first to join their standard, and opened their gates to Xenodicus, B. C. 309. (Id. xx. 31.) In the First Punic War Enna is repeatedly mentioned; it was taken first by the Carthaginians under Hamilcar, and subsequently recaptured by the Romans, but in both instances by treachery and not by force. (Diod. xxiii. 9. p. 503; Pol. i. 24.) In the Second Punic War, while Marcellus was engaged in the siege of Syracuse B. C. 214, Enna became the scene of a fearful massacre. The defection of several Sicilian towns from Rome had alarmed Pinarius the governor of Enna, lest the citizens of that place should follow their example; and in order to forestal the apprehended treachery, he with the Roman garrison fell upon the citizens when assembled in the theatre, and put them all to the sword without distinction, after which he gave up the city to be plundered by his soldiers. (Liv. 37—39.) Eighty years later Enna again [illegible] picuous as the head-quarters of the great [illegible] in Sicily (B. C. 134—132), which first [illegible] under the lead of Eunus, who made [illegible] first instance of Enna, which [illegible] ral great natural strength became the centre of his operations, and the receptacle of the plunder of Sicily. It was the last place that held out against the proconsul Rupilius, and was at length betrayed into his hands, its impregnable strength having defied all his efforts. (Diod. xxxvi. Exc. Phot. pp. 526—529, Exc. Vales. pp. 599, 600; Flor. iii. 19. § 8; Oros. v. 9.; Strab. vi. p. 272.) Strabo tells us (*l. c.*) that it suffered severely upon this occasion (which, indeed, could scarcely be otherwise), and regards this period as the commencement of its subsequent decline. Cicero, however, notices it repeatedly in a manner which seems to imply that it was still a flourishing municipal town: it had a fertile territory, well-adapted for the growth of corn, and diligently cultivated: it was rendered almost desolate by the exactions of Verres. (Cic. *Verr.* iii. 18, 42, 83.) From this time we hear little of Enna: Strabo speaks of it as still inhabited, though by a small population, in his time: and the name appears in Pliny among the municipal towns of Sicily, as well as in Ptolemy and the Itineraries. (Strab. *l. c.*; Plin. iii. 8. s. 14; Ptol. iii. 4. § 14; *Itin. Ant.* p. 93; *Tab. Peut.*) Its great natural advantages, as well as its central position, must have secured it in all times from complete decay, and it seems to have continued to exist throughout the middle ages. Its modern name of *Castro Giovanni* seems to be merely an Italianized form of *Castro Janni*, the name by which it is known in the native dialect of Sicily, and this is probably only a corruption of the name of Castrum Ennae or *Castro di Enna*.

The neighbourhood of Enna is celebrated in mythological story as the place from whence Proserpine was carried off by Pluto. (Ovid, *Met.* v. 385—408; Claudian, *de Rapt. Proserp.* ii.; Diod. v. 3.) The exact spot assigned by local tradition as the scene of this event was a small lake surrounded by steep and precipitous hills, about 5 miles from Enna, the meadows on the banks of which abounded in flowers, while a cavern or grotto hard by was shown as that from which the infernal king suddenly emerged. This lake is called Pergus by Ovid (*Met.* v. 386) and Claudian (*l. c.* ii. 112), but it is remarkable that neither Cicero nor Diodorus speaks of any lake in particular as the scene of the occurrence: the former however says, that around Enna were "arva lucique plurimi, et laetissimi flores omni tempore anni." (*Verr.* iv. 48.) Diodorus, on the contrary, describes the spot from whence Proserpine was carried off as a meadow abounding in flowers, especially odoriferous ones, to such a degree that it was impossible for hounds to follow their prey by the scent across this tract: he speaks of it as enclosed on all sides by steep cliffs, and having groves and fountains in the neighbourhood, but makes no mention of a lake (v. 3). The cavern however is alluded to by him as well as by Cicero, and would seem to point to a definite locality. At the present day there still remains a small lake in a basin-shaped hollow surrounded by great hills, and a cavern near it is still pointed out as that described by Cicero and Diodorus, but the flowers have in great measure disappeared, as well as the groves and woods which formerly surrounded the spot, and the scene is described by modern travellers as bare and desolate. (Hoare's *Classical Tour*, vol. ii. p. 252; Parthey, *Wanderungen d. Sicilien*, p. 135; Marquis of Ormonde, *Autumn in Sicily*, p. 106, who has given a view of the lake.)

The connection of this myth with Enna naturally

Digitized by Google

to (if it did not rather arise from) the peculiar ship of the two goddesses Ceres and Proserpine that city: and we learn from Cicero that there a temple of Ceres of such great antiquity and sity that the Sicilians repaired thither with a ng of religious awe, as if it was the goddess self rather than her sanctuary that they were at to visit. Yet this did not preserve it from the ilegious hands of Verres, who carried off from nce a bronze image of the deity herself, the most ient as well as the most venerated in Sicily. (Cic. r. iv. 48.) No remains of this temple are now ble: according to Fazello it stood on the brink of precipice, and has been wholly carried away by falling down of great masses of rock from the edge the cliff. (Fazell. x. 2. p. 444; M. of Ormoside, 12.) Nor are there any other vestiges of antiquity l remaining at *Castro Giovanni:* they were pro- bly destroyed by the Saracens, who erected the ir and several other of the most prominent ildings of the modern city. (Hoare, *l. c.* p. 249.) are exist coins of Enna under the Roman dominion, th the legend MUN. (Municipium) HENNA, thus strating the authority of Cicero, all the best MSS. which have the aspirated form of the name. mpt. *ad Verr.* p. 392.) The most ancient Greek in of the city also gives the name HENNAION ckhel, vol. i. p. 206): there is therefore little ubt that this form is the more correct, though nna is the more usual. [E. H. B.]



COIN OF ENNA.

ENOPE. [GERRENIA.]

ENTELLA (Ἔντελλα: *Eth.* Ἐντελλῖνος, En- ellanus: *Rocca d'Entella*), a city in the interior of ily, situated on the left bank of the river Hypsas plici), and nearly midway between the two seas, ng about 25 miles from the mouth of the Hypsas, much about the same distance from the N. coast the island, at the gulf of *Castellamare*. It was ery ancient city, and apparently of Sicanian in, though the traditions concerning its foun- ion connected it with the Elymi and the supposed gian colony. According to some writers it was ded by Acestes, and named after his wife En- (Tzetz. *ad Lycophr.* 964), a tradition to which Italicus alludes ("Entella Hectoreo dilectum gen Acestes," Sil. Ital. xiv. 205), while others ibed its foundation to Elymus (Serv. *ad Aen.* v. , and Virgil represents Entellus (evidently the ymian hero of the city) as a friend and comrade Acestes (*Aen.* v. 387). Thucydides, however, ns Eryx and Egesta the only two cities of the ni (vi. 2), and does not notice Entella at all, any e than the other places of native Sicanian or ilian origin. The first historical mention of lla is found in Diodorus, who tells us that in 404 the Campanian mercenaries, who had been e service of the Carthaginians during the war, ing been admitted into the city on friendly terms, ed their arms against the inhabitants, put all the male citizens to the sword, and made themselves masters of the place, of which they retained possession for many years. (Diod. xiv. 9; Ephorus, *ap. Steph. B. s. v.* Ἔντελλα.) During the subsequent wars of Dionysius with the Carthaginians, the Campanian occupants of Entella sided with their former masters, and even continued faithful to their alliance in B. C. 396, when all the cities of Sicily except five went over to that of Dionysius. (Diod. xiv. 48, 61.) It was not till B. C. 368 that the Syracusan despot was able to reduce Entella; the city appears to have still remained in the hands of the Campanians, but was now hostile to the Carthaginians, who (in B. C. 345) in consequence ravaged its territory, and blockaded the city itself. Soon after we find the latter apparently in their hands, but it was recovered by Timoleon, who restored it to liberty and independence. (Id. xv. 73, xvi. 67, 73.)

From this time we hear little more of it. The name is only incidentally mentioned during the First Punic War (Diod. xxiii. 8), but it seems to have taken no part in the struggles between Rome and Carthage. It continued, however, to be a tolerably flourishing municipal town: its territory was fertile in wine (Sil. Ital. xiv. 204) as well as corn, and Cicero praises the inhabitants for their industry in its cultivation (Cic. *Verr.* iii. 43), but, like most of the cities of Sicily, it suffered severely from the exactions of Verres. We still find its name both in Pliny (among the "populi stipendiarii," iii. 8. s. 14) and Ptolemy (iii. 4. § 15), but no further notice of it is found in ancient authors. It however continued to subsist throughout the middle ages, till the 13th century, when, having been converted into a stronghold by the Saracens, it was taken by the emperor Frederic II. and utterly destroyed, the inhabitants being removed to *Nocera* near Naples. The site, which still retained its ancient name in the form of Fazello, is described by him as a position of great natural strength, surrounded by almost precipitous cliffs on all sides but one, but having a town still of considerable extent on its summit. Accordingly in the maps, it stands at an angle of the Salso or Imera, the river encircles it on the E. and W. The ruins remaining there in the time of Fazello were said to have been only those of the modern town and its castle. (Fazell. *de Reb. Sic. Lex. Topogr. Sic.* vol. ii. p. 284. Amico, s. v. 376.)

There are extant coins of Entella, with the legend ΕΝΤΕΛΛΙΝΩΝ at full length, and on the reverse the Campanian symbol of the triquetra, with the legend ΤΕΛΛΑΣ, and on the obverse a head of Bacchus, one annexed is given in Mionnet, Supplément, pl. 26. fig. 1.

remark of Polybius (*ap. Strab.* vii. p. 323), that the Candavian way passed through the country of the Eordaei in proceeding from that of the Lyncestae to Edessa, and from the description of the march of Perseus from Citium in Lower Macedonia through Eordaea into Elimeia, and to the Haliacmon (Liv. xlii. 53), we obtain a knowledge of the exact situation of this district.

It appears to have extended along the W. side of Mount Bermius, comprehending *O'strovo* and *Katránitza* to the N., *Sarighioli* in the middle, and to the S. the plains of *Djumá Budja* and *Karaiánni*, as far as the ridges near *Kózani* and the *Klisura* of *Siatista*, which seem to be the natural boundaries of the province. The only Eordaean town noticed in history is PHYSCA (*Φύσκα*, *Φύσκας*, Ptol. iii. 13. § 36) or PHYSCUS (*Φύσκος*, Steph. B.), of which Thucydides (ii. 99) remarks that near it there still remained some of the descendants of the Eordaei, who had been expelled from all other parts of their original settlements by the Temenidae. But there is some reason to add to this name those of BEGORRA and GALADRAE as Eordaean towns. The central and otherwise advantageous position of the former of these places, leads to the conjecture that it may have been the city Eordaea (Hierocl.) of later times. As Lycophron (1342, 1444) couples Galadrae with the land of the Eordaei, and as Stephanus (*s. v.*) attributes that town to Pieria, it might best be sought for at the S. extremity of Eordaea towards the Haliacmon and the frontiers of Pieria, its territory having consisted chiefly, perhaps, of the plains of *Budji* and *Djumá*. If Galadrae was in the S. part of the province, Begorra in the middle, Physca was probably to the N. about *Katránitza*, towards the mountains of the Bermian range, a position which was most likely to have preserved the ancient race. Ptolemy (iii. 13. § 36) classes three towns under the Eordaei of Macedonia; but, as Scampa is one of them, he has evidently confounded the Eordaei with the Eordeti of Illyria. (Leake, *Northern Greece*, vol. iii. p. 316.) [E. B. J.]

EORDAICUS (*Εορδαϊκὸς ποταμός*, Arrian, *Anab.* i. 5. § 5), a river of Upper Macedonia, which has been identified with the *Devól*,—the principal, or at least the longest, branch of the Apsus. This river originates in a lake in the district of *Presp*a called *Ventrók*, and makes its way through the remarkable pass of *Tzangón*, which forms the only break in the great central range of Pindus, from its S. commencement in the mountains of Aetolia to where it is blended to the N. with the summits of Haemus and Rhodope. From thence it flows to the NW. and enters a large lake at the extremity of the plain of *Poyani*, and, on emerging, winds through a succession of narrow valleys among the great range of mountains which border on the W. of *Korytzá*, till it finally joins the *Beratinós* or ancient Apsus. (Leake, *Northern Greece*, vol. i. p. 334, vol. iii. p. 281.) [E. B. J.]

EO'RDETI (*Εόρδετοι*, Ptol. iii. 13. § 26), an Illyrian people S. of the Parthini, whose territory contained three towns, Scampa, Deboma, and Daulia. (Comp. Tafel. *de Viae Egnat. parte Occid.* p. 23; Pouqueville, vol. i. p. 382.) [E. B. J.]

EPAMANDUODURUM, or EPAMANTADURUM. This town is placed by the Antonine Itin. on a road from Vesontio (*Besançon*) to Larga (*Largitzen*). From Vesontio to Velatodurum the Itin. makes 22, and from Velatodurum to Epamanduodurum 12. In another place the distance is given 31, and Velatodurum is omitted. The Table makes it 13 to Loposagio, and thence 18 to Epomanduo, as it is written.

Epamanduodurum is *Mandeure*. A milestone that was dug up at *Mandeure*, with the name of Trajan upon it, bore the inscription "Vesont. M. P. XXXXIIX," from which we must infer that the numbers in the Itins. denote Gallic leagues.

Mandeure is in the arrondissement of *Montbéliard*, in the department of *Doubs*, in a pleasant valley. The *Doubs* flowed through the town which was, of course, on both sides of the river; and the two parts were united by three bridges, of which the traces are said to remain, and also of the wall which protected them. The position of the place with respect to the frontier of the Rhone made it an important post. The excavations that were made at *Mandeure* in the sixteenth and seventeenth centuries brought to light a great number of Roman remains, consisting of medals, pottery, gold, silver, and bronze ornaments, statues, fragments of columns, cinerary urns, and various utensils. The remains of an aqueduct and lead pipes were discovered, of three temples, of baths, and of a theatre cut in the rock. The Roman road to *Besançon* may also be traced. It is called in the neighbourhood the *Chaussée de César*, which proves nothing as to its antiquity, for Caesar's name is used by tradition like that of other great conquerors. However, Caesar's march from Vesontio to fight Ariovistus was up the valley of the *Doubs*, and probably even he went near Epamanduodurum. In the castle of *Montbéliard* there "are some vestiges of a Roman camp;" and, according to Schöpflin, an authority for the antiquities of Alsace and the neighbouring parts, it was in the plain about *Montbéliard* that Caesar defeated the German Ariovistus, B. C. 58; but this is impossible, if Caesar's text is rightly read. Epamanduodurum is a town unknown to history, and yet it appears to have been a considerable place. The name leads to the conclusion that it was an old Gallic town, and on a river, as the termination of the name shows, and the position of the modern site. (*Guide du Voyageur*, &c. par Richard et L. Hocquart.) [G. L.]

EPANTERII, a Ligurian tribe, mentioned only by Livy (xxviii. 46), from whose expressions they would appear to have been a mountain tribe, situated in the Maritime Alps above the Ingauni. They were at war with the latter people when Mago arrived in Liguria, B. C. 205. [E. H. B.]

EPEIACUM, in Britain, mentioned by Ptolemy as one of the cities of the Brigantes—*Bi*ovium (*Binchester*), *Caturhacto*nium (*Catterick* Bridge), Calcutum, Isurium (*Aldborough*), Rhigodunum (*Almna* (*Ilkly*), and Eboracum (*York*) being the others, arranged as above, and apparently in their order from north to south. In the "Monumenta Britannica" Epeiacum is identified with *Hexham*; by Maclauchlan (*Surrey of Watling Street*), with *Lanchester*. Each of these views is objectionable. *Hexham* lies (see AXELLODUNUM) too far north to belong to the Brigantes, whilst *Longo*vicum is a better equivalent to *Lan*-chester. Indeed so few have denied that this latter form represents the modern *Lanchester*, that *Epeiacum* and *Longovicum* have been considered simply as synonymes for the same place—one in Ptolemy, the other in the Notitia. Objecting to this, laying considerable stress on the name, and raising exceptions to the identification of *Vin*dovora with *Ebc*hester, the present writer believes that

Digitized by Google

name for name, as well as place for place, *Epiacum* = *Eb*-chester. Furthermore — as *Eb*-chester stands on an eminence, the *cum* may represent the British *cum* = *hill*. *Eb*-chester stands on the Watling Street. [R. G. L.]

EPEIL. [Elia.]

EPEIRUS or EPIRUS (Ἤπειρος: *Eth.* Ἠπειρώτης, Epirotes: Adj. Ἠπειρωτικός, Epiroticus), was the name given to the country lying between the Ionian sea and the chain of Pindus, and extending from the Acroceraunian promontory and the boundaries of Illyria and Macedonia on the north to the Ambracian gulf on the south. The word ἤπειρος signified the mainland, and was the name originally given to the whole of the western coast of Greece from the Acroceraunian promontory as far as the entrance of the Corinthian gulf, in contradistinction to Corcyra and the Cephallenian islands. In this sense the word was used not only by Homer (Strab. x. p. 451; Hom. *Il.* ii. 635, *Od.* xiv. 97), but even as late as the time of the Peloponnesian War. (Thuc. i. 5.) Epirus, in its more limited extent, is a wild and mountainous country. The mountains run in a general direction from north to south, and have in all ages been the resort of semi-civilised and robber tribes. The valleys, though frequent, are not extensive, and do not produce sufficient corn for the support of the inhabitants. The most extensive and fertile plain is that of *Jodnnina*, in which the oracle of Dodona was probably situated, but even at the present day *Jodnnina* receives a large quantity of its corn from Thessaly, and of its vegetables and fruit from the territory of *Arta* on the Ambracian gulf. Epirus has been in all times a pastoral and not an agricultural country. Its fine oxen and horses, its shepherds, and its breed of Molossian dogs, were celebrated in antiquity. (Pind. *Nem.* iv. 82; "quanto majores herbida tauros non habet Epirus," Ov. *Met.* xii. 282; "Eliadum palmas Epiros equarum," Virg. *Georg.* i. 57; "domus alta Molossis personuit canibus," Hor. *Sat.* ii. 6. 114; Virg. *Georg.* iii. 405.) The Epirots were not collected in towns, as was the case with the population in Greece Proper. It is expressly mentioned by Scylax (p. 28) that the Epirots dwelt in villages, which was more suitable to their mode of life; and it was probably not till the time when the Molossian kings had extended their dominion over the whole country, and had introduced among them Grecian habits and civilisation, that towns began to be built. It is in accordance with this that we find no coins older than those of Pyrrhus.

Along the coast of Epirus southward, from the Acroceraunian promontory, a lofty and rugged range of mountains extends. [Ceraunii Montes.] Hence the Corinthians founded no colony upon the coast of Epirus at the time when they planted so many settlements upon the coast of Acarnania, and founded Apollonia and Epidamnus farther north. Of the mountains in the interior the names of hardly any are preserved with the exception of Tomarus or Tmarus above Dodona. [Dodona.] Of the rivers the most important are: the Arachthus, flowing into the Ambracian gulf, and considered to form the boundary between Epirus and Hellas Proper; the Celydnus, flowing into the Ionian sea between Panormum and the Acroceraunian promontory, and forming probably the northern boundary of Epirus; and the Thyamis, Acheron, and Charadrus, all flowing into the Ionian sea more to the south.

Epirus was inhabited by various tribes, which were not regarded by the Greeks themselves as members of the Hellenic race. Accordingly Epirus was not a part of Hellas, which was supposed to begin at Ambracia. [Hellas.] Some of the tribes however were closely related to the Greeks, and may be looked upon as semi-Hellenic. Thucydides, it is true, treats both the Molossians and Thesprotians as barbaric (ii. 80); but these two tribes at all events were not entirely foreign to the Greeks like the Thracians and Illyrians; and accordingly Herodotus places the Thesprotians in Hellas (ii. 56), and mentions the Molossian Alcon among the Hellenic suitors of Agarista (vi. 127). It would appear that towards the north the Epirots became blended with the Macedonians and Illyrians, and towards the south with the Hellenes.

The northern Epirots, extending from the Macedonian frontier as far as Corcyra, resembled the Macedonians in their mode of cutting the hair, in their language and dress, and in many other particulars. (Strab. vii. p. 327.) Strabo also relates (*l. c.*) that some of the tribes spoke two languages, — a fact which proves the difference of the races in the country and also their close connection.

According to Theopompus, who lived in the fourth century B. C., the number of Epirot tribes was fourteen (ap. Strab. vii. pp. 323, 324). Their names, as we gather from Strabo, were the Chaones, Thesproti, Cassopaei, Molossi, Amphilochi, Athamanes, Aethices, Tymphaei, Paraunaei, Talares, Atintanes, Orestae, Pelagones, and Elimiotae. (Strab. viii. pp. 324, 326, x. p. 434.) Of these, the Orestae, Pelagones, and Elimiotae were situated east of Mt. Pindus, and were subsequently annexed to Macedonia, to which they properly belonged. In like manner, the Athamanes, Aethices, and Talares, who occupied Pindus, were united to Thessaly in the time of Strabo. The Atintanes and Paraunaei, who bordered upon Illyria, were also separated from Epirus.

The three chief Epirot tribes were the Chaones, Thesproti, and Molossi. The Chaones, who were at one time the most powerful of the three, and who are said to have ruled over the whole country (Strab. vii. p. 324), inhabited in historical times the district upon the coast from the Acroceraunian country to the river Thyamis, which separated them from the Thesprotians (Thuc. i. 46). The Thesproti extended along the coast from the Thyamis beyond the Acheron to the confines of the Cassopaei, and in the interior to the boundaries of the territory of Dodona, which in ancient times was regarded as a part of Thesprotia. [Dodona.] The Cassopaei, whom some writers called a Thesprotian tribe, reached along the coast, as far as the Ambracian gulf. The Molossi, who became subsequently the rulers of Epirus, originally inhabited only a narrow strip of country, extending from the Ambracian gulf between the Cassopaei and Ambraciotae, and subsequently between the Thesprotians and Athamanes, northwards as far as the Dodonaea. (Leake, *Northern Greece*, vol. iv. pp. 178, 179.) The Molossi subsequently obtained possession of the Cassopaea and the Dodonaea, and their country reached from the river Aous on the north to the Ambracian gulf on the south.

The most ancient inhabitants of Epirus are said to have been Pelasgians. Dodona is represented as an oracle of the Pelasgians. [Dodona.] Chaonia is also called Pelasgian; and the Chaones are said, like the Selli at Dodona, to have been interpreters of the oracle of Zeus. (Steph. B. *s. v.* Χαονία.) There appears to have been an ethnical connection between

Digitized by Google

the ancient inhabitants of Epirus and some of the tribes on the opposite coast of Italy. The Chones, on the gulf of Tarentum, are apparently the same people as the Chaones; and although we find no mention of the Thesprotians in Italy, we have there a town Pandosia, and a river Acheron, as in Epirus. There are good reasons for supposing that the Italian Oenotrians, to whom the Chonians belonged, were of the same race as the Epirots. (Niebuhr, *Hist. of Rome*, vol. i. p. 57.) [OENOTRIA.] If we were to accept the statement of Aristotle that Dodona was at one time inhabited by the people then called Graeci, but now Hellenes (*Meteor.* i. 14), Epirus must be regarded as the original abode of the Hellenes; but this statement is in opposition to the commonly received opinions of the Greeks, who placed the original home of the Hellenes in Thessaly. It may be that the Pelasgians in Epirus bore the name of Graeci, and carried the name to the opposite coast of Italy; which would account for the Romans and Italians in general giving the name of Graeci to all the Hellenes, looking upon the Hellenes who subsequently founded colonies in Italy as the same people. (Niebuhr, vol. iii. p. 451.) But, however this may be, the inhabitants of Epirus exercised, at an early period, considerable influence upon Greece. Of this the wide-spread reputation of the oracle of Dodona is a proof. The Thessalians, who conquered the country named after them, are represented as a Thesprotian tribe. [THESSALIA.] According to the common tradition, Neoptolemus or Pyrrhus, son of Achilles, settled in Epirus after his return from Troy, accompanied by Helenus, son of Priam. He transmitted his dominions to his son Molossus, from whom the Molossian kings traced their descent. (*Dict. of Biogr. s. vv. Neoptolemus* and *Molossus.*)

The chief Greek settlement in Epirus was the flourishing Corinthian colony of Ambracia, upon the gulf called after it. [AMBRACIA.] At a later period, probably between the time of Thucydides and Demosthenes, some Grecian settlers must have found their way into Thesprotia, since Demosthenes mentions Pandosia, Buchetia, and Elaea, as Eleian colonies (*de Halonn.* p. 84).

The Epirot tribes were independent of one another, though one tribe sometimes exercised a kind of supremacy over a greater or a smaller number. Such a supremacy may have been exercised in ancient times by the Thesprotians, who possessed the oracle. In the Peloponnesian War the Chaonians enjoyed a higher reputation than the rest (Thuc. ii. 80), and it is probably to this period that Strabo refers when he says that the Chaonians once ruled over all Epirus (vii. p. 323). The importance of the Chaonians at this period is shown by a line of Aristophanes (*Equit.* 78, with Schol.). It must not, however, be inferred that the Chaonians possessed any firm hold over the other tribes. The power of the Molossian kings, of which we shall speak presently, rested upon a different basis.

Originally each tribe was governed by a king. In the time of the Persian wars the Molossians were governed by a king called Admetus, who was living with the simplicity of a village chief when Themistocles came to him as a suppliant. (Thuc. i. 136.) Tharyps, also called Tharypas or Arrhybas, the son or grandson of Admetus, was a minor at the beginning of the Peloponnesian War, and was educated at Athens: he is said to have been the first to introduce among his subjects Hellenic civilisation. (Thuc. ii. 80; Paus. i. 11. § 1; Justin, xvii. 3; Plut. *Pyrrh.* 1.) The kingly government always continued among the Molossians, probably in consequence of their power being very limited: for we are told that the king and people were accustomed to meet at Passaron, the ancient Molossian capital, to swear obedience to the laws. (Aristot. *Pol.* v. 11; Plut. *Pyrrh.* 5.) But among the Chaonians and Thesprotians the kingly government had been abolished before the Peloponnesian War: the chief magistrates of the Chaonians were selected from a particular family (*ἐκ τοῦ ἄρχοντος γένους*, Thuc. ii. 80). After the Peloponnesian War the power of the Molossians increased, till at length Alexander, the brother of Olympias, who married Philip of Macedon, extended his dominion over most of the Epirot tribes, and took the title of king of Epirus. (Diod. xvi. 72, 91; Strab. vi. p. 280.) Alexander, who died B. C. 326, was succeeded by Aeacides, and Aeacides by Alcetas, after whom the celebrated Pyrrhus became king of Epirus, and raised the kingdom to its greatest splendour. He removed the seat of government from Passaron to Ambracia, which was now for the first time annexed to the dominions of the Epirot kings. Pyrrhus was succeeded in B. C. 272 by his son, Alexander II., who was followed in succession by his two sons Pyrrhus II. and Ptolemy. (For the history of these kings, see the *Dict. of Biogr.*) With the death of Ptolemy, between B. C. 239 and 229, the family of Pyrrhus became extinct, whereupon a republican form of government was established, which continued till the conquest of Macedonia by the Romans, B. C. 168. Having been accused of favouring Perseus, the Roman senate determined that all the towns of Epirus should be destroyed, and the inhabitants reduced to slavery. This cruel order was carried into execution by Aemilius Paulus, who, having previously placed garrisons in the 70 towns of Epirus, razed them all to the ground in one day, and carried away 150,000 inhabitants as slaves. (Polyb. *ap. Strab.* vii. p. 322; Liv. xlv. 34; Plut. *Aemil. Paul.* 29.) From the effects of this terrible blow Epirus never recovered. In the time of Strabo the country was still a scene of desolation, and the inhabitants had only ruins and villages to dwell in. (Strab. vii. p. 327.) Nicopolis, founded by Augustus in commemoration of his victory off Actium, was the chief city of Epirus under the Roman empire. Both this city and Buthrotum had the dignity of Roman colonies. Epirus formed a province under the Romans, and in the time of Ptolemy was separated from Achaia by the river Achelous. (Ptol. iii. 14.) Epirus now forms part of Albania. The Albanians are probably descendants of the ancient Illyrians, who took possession of the unpopulated country under the Roman or the early Byzantine empire. On the conquest of Constantinople by the Latins in 1204, a member of the celebrated Byzantine family of Comnenus established an independent dynasty in Epirus; and the despots of Albania, as they were called, continued for two centuries only second in power to the emperors of Constantinople. The last of these rulers, George Castriot, resisted for more than 20 years the whole forces of the Ottoman empire; and it was not till his death in 1466 that Albania was annexed to the Turkish dominions.

The chief towns in Epirus were:—

1. In Chaonia. Upon the road near the coast from N. to S.: PALAESTE; CHIMAERA: PHOENICE; BUTHROTUM; CESTRIA, also called Ilium or Troia, in the district Cestrine. [CESTRINE.] West of this road, upon the coast:. ONCHESMUS; CASSIOPE.

Digitized by Google

East of the road in the interior: PHANOTE; HELICRANON.

2. In Thesprotia. Upon the road leading from Cestria southwards: EUROEA (?); PANDOSIA, on the Acheron; ELATREIA or ELATEIA; CASSOPE; KICOPOLIS. West of this road, upon the coast: SYBOTA; CHEIMERIUM; TORYNE: BUCHAETIUM; ELAEA. Between this road and the coast: GITANAE; EPHYRA, afterwards called Cichyrus. In the interior: EURYMENAE (?); ISSORIA; BATIAE (?).

3. In Molossia. From N. to S.: PHOTICE; TECMON; DODONA; PASSARON; CHALCIS; PHYLACE; HOMBREUM.

In the annexed coin the heads on the obverse are those of Zeus and Hera: the ox on the reverse may have reference either to the excellence of the Epirot oxen, or to its being the victim sacred to Zeus. On all coins we find the name of the people in the Doric form ΑΠΕΙΡΩΤΑΝ, and not ΗΠΕΙΡΩΤΩΝ. (Eckhel, vol. ii. p. 160, foll.) (Niebuhr, *Hist. of Rome*, vol. iii. p. 450, seq.; Grote, *Hist. of Greece*, vol. iii. p. 549, seq.; Merleker, *Histor. geogr. Darstellung des Landes und der Bewohner von Epiros*, Königs. 1841; Leake, *Northern Greece*; Bowen, *Mount Athos, Thessaly, and Epirus*, 1852.)

COIN OF EPEIRUS.

EPETIUM. [AEPY.]

EPETIUM (Ἐπέτιον: *Eth.* Ἐπετῖνος, Ptol. ii. 16. § 4; Plin. iii. 25), a town of the Issii (Polyb. xxxii. 8), in Illyricum, with a harbour (Portus Epetius, *Peut. Tab.*). Remains of this town are found near Kolvetz. (Comp. Map in Wilkinson, *Dalmatia and Montenegro*, vol. ii.) [E. B. J.]

EPHESUS (Ἔφεσος: *Eth.* Ἐφέσιος, Ἐφεσίτης, Ἐφεσεύς), a city in Lydia, one of the twelve Ionian cities (Herod. i. 142), on the south side of the Cayster, and near its mouth. The port was called Panormus. The country around Ephesus was an alluvial plain, as Herodotus observes (ii. 10). The name of Ephesus does not occur in the Homeric poems, and there is no proof, says Strabo, that it was so old as the Trojan War (p. 620). According to a myth (Steph. B. *s. v.* Ἔφεσος), the place was originally called Smyrna, from Smyrna the Amazon: it was also called Samorna, and Trachea, and Ortygia, and Ptelea. The name Ephesus was said to be from one of the Amazons. The name Ptelea appears in an inscription of the Roman period which was copied by Kinneir at Ephesus. Pliny (v. 29) has also preserved this legend of the Amazonian origin of Ephesus, and a name Alope, which the place had at the time of the Trojan War; a story found in Hyginus also. Pliny also mentions the name Morges. The legend of the Amazons is connected with the goddess Artemis, the deity of Ephesus. Pausanias (vii. 2. § 6) has a legend about the temple of Ephesus being founded by Ephesus, the son of the river Caystrus, and Cresus an autochthon.

Strabo, who had been at Ephesus, gives a pretty good description of it (p. 639). As a man sailed northward through the channel that separates Samos from Mycale, he came to the sea-coast of the Ephesia, part of which belongs to the Samii. North of the Panionium was Neapolis, which once belonged to Ephesus, but in Strabo's time to the Samii, who had received it in exchange for Marathesium. Next was Pygela, a small place with a temple of Artemis Munychia, a settlement of Agamemnon, according to a legend; and next the port called Panormus, which contained a temple of Artemis Ephesia; and then the city. On this same coast, a little above the sea, there was also Ortygia, a fine grove of various kinds of trees, and particularly cypress. The stream Cenchrius flowed through it. The stream and the place were connected with a legend of Lato and the birth of Apollo and Artemis. Ortygia was the nurse who assisted Lato in her labour. Above the grove was a mountain Solmissus, where the Curetes placed themselves, and with the clashing of their arms prevented the jealous Hera, who was on the watch, from hearing the cries of Lato. There were several temples in this place, old and new: in the old temples there were ancient wooden statues; but in the later temples others (σκολιὰ ἔργα*). There was Lato holding a staff, and Ortygia standing by her with a child on each arm. The Cares and Leleges were the settlers of Ephesus, according to one story (Strabo), and these two peoples or two names are often mentioned together. But Pherecydes (Strab. p. 632) says that the Paralia of Ionia was originally occupied by Carians from Miletus to the parts about Mycale and Ephesus, and the remainder as far as Phocaea by Leleges. The natives were driven out of Ephesus by Androclus and his Ionians, who settled about the Athenaeum and the Hypelaeus, and they also occupied a part of the higher country (τῆς Παραρείας) about the Coressus. Pausanias preserves a tradition that Androclus drove out of the country the Leleges, whom he takes to be a branch of the Carians, and the Lydians who occupied the upper city; but those who dwelt about the temple were not molested, and they came to terms with the Ionians. This tradition shows that the old temple was not in the city. The tomb of Androclus was still shown in the time of Pausanias, on the road from the temple past the Olympieium, and to the Pylae Magnetides; the figure on the tomb was an armed man (vii. 2. § 6, &c.). This place on the hill was the site of the city until Croesus' time, as Strabo says. Croesus warred against the Ionians of Ephesus (Herod. i. 26), and besieged their city, at which time during the siege (so says the text) the Ephesii dedicated their city to Artemis by fastening the city to the temple by a rope. It was seven stadia between the old city, the city that was then besieged, and the temple. This old city was the city on the Paroreia. After the time of Croesus the people came down into the plain, and lived about the "present" temple (Strabo) to the time of Alexander.

King Lysimachus built the walls of the city that existed in Strabo's time; and as the people were not willing to remove to the new city, he waited for a violent rain, which he assisted by stopping up the channels that carried off the water, and so drowned the city, and made the people glad to leave it. Lysi-

* This word σκολιὰ has never been explained. Tyrrwhitt altered it to Σκόπα. See Groskurd's note on the passage (*Trans. Strab.* vol. iii. p. 14).

machus called his new city Arsinoë after his wife, but the name did not last long. The story of the destruction of the old city, which was on very low ground, is told by Stephanus (*s. v.* Ἔφεσος) somewhat differently from Strabo. He attributes the destruction to a violent storm of rain, which swelled the river. The town was situated too low; and as the Caystrus is subject to sudden risings, it was damaged or destroyed, as modern towns sometimes have been which were planted too near a river. Thousands were drowned, and valuable property was lost. Stephanus quotes a small poem of Duris of Elaea made on the occasion, which attributes that calamity to the rain and the sudden rising of the river. Nothing is known of Duris, and we must suppose that he lived about the time of the destruction of Ephesus, or about B.C. 322. (Comp. Eustath. *ad Dionys.* v. 827, who quotes the first two lines of the epigramma of Duris.) Pausanias (i. 9. § 7) states that Lysimachus removed to his new Ephesus the people of Colophon and Lebedus, from which time the ruin of these two towns may be dated. [COLOPHON.]

The history of Ephesus, though it was one of the chief of the Ionian towns, is scanty. As it was founded by Androclus the son of Codrus, the kingly residence (βασίλειον, whatever the word means) of the Ionians was fixed there, as they say (Strab. p. 633), "and even to now those of the family are named kings (βασιλεῖς) and have certain honours, the first seat in the games, and purple as a sign of royalty, a staff instead of a sceptre, and the possession or direction of the rites of Eleusinian Demeter" (comp. Herod. i. 147). Ephesus was it seems from an early period a kind of sacred city, for Thucydides (iii. 104), when he is speaking of the ancient religious festival at Delos to which the Ionians and the surrounding islanders used to go with their wives and children, adds, "as now the Iones to the Ephesia." Strabo (p. 633) has also preserved the tradition of Ephesus having been called Smyrna, and he has a very confused story about the Smyrnaei leaving the Ephesii to found Smyrna Proper. [SMYRNA.] He quotes Callinus as evidence of the people of Ephesus having been once named Smyrnaei, and Hipponax to prove that a spot in Ephesus was named Smyrna. This spot lay between Trecheia and the Acte of Lepra; and this Lepra was the hill Prion which was above the Ephesus of Strabo's time, and contained part of the wall. He concludes that the Smyrna of old Ephesus was near the gymnasium of the later town of Ephesus, between Trecheia and Lepra. The old Athenaeum was without the limits of the later city.

The Cimmerians in an invasion of western Asia took Sardis except the acropolis (Herod. i. 15), in the reign of the Lydian king Ardys: and it seems that they got into the valley of the Caystrus and threatened Ephesus. (Callinus, Bergk, *Poetae Lyrici Graeci*, p. 303.) Callinus also speaks of a war between the Magnetes or people of Magnesia and Ephesus his native city (Strab. p. 647), which war of course was before that inroad of the Cimmerii by which Magnesia was destroyed: for there was a tradition of more than one Cimmerian invasion. Ephesus fell successively under the dominion of the Lydian and Persian kings. In B.C. 499, when the Athenians and Eretrians with the Ionians went against Sardis, they sailed to Ephesus and left their ships at Coressus. Some Ephesii were their guides up the valley of the Caystrus and over the range of Tmolus. After the Ionians had fired Sardis they retreated, but the Persians overtook them at Ephesus and defeated the confederates there. (Herod. v. 102.) This is all that Herodotus says about Ephesus on this occasion. After the naval battle before Miletus, in which the Ionian confederates were defeated, some of the Chii, who had escaped to Mycale, made their way by night into the Ephesia, where the women were celebrating the Thesmophoria, and the Ephesii, who knew nothing of what had happened to the Chii, fell upon them supposing they were robbers and killed them or made a beginning at least. (Herod. vi. 16). The Ephesii had no ships in the fight before Miletus; and we must conclude that they took no part in the revolt. When Xerxes burnt the temple at Branchidae "and the other temples" (Strab. p. 634), the temple of Ephesus was spared. Near the close of the Peloponnesian War, Thrasyllus, an Athenian commander, who was on a marauding expedition, landed at Ephesus, to which the Persian Tissaphernes summoned all the country to Ephesus to the aid of Artemis. The Athenians were defeated and made off. (Xen. *Hell.* i. 2. § 6.) Lysander, the Spartan commander, entered the port of Ephesus (B.C. 407) with a fleet, his object being to have an interview with Cyrus at Sardis. While he was repairing and fitting up his ships at Ephesus, Antiochus, the Athenian, who was stationed at Notium as commander under Alcibiades, gave Lysander the opportunity of fighting a sea-fight, in which the Athenians were defeated. (Xen. *Hell.* i. 5. § 1, &c.) After the battle of Aegospotami the Ephesians dedicated in the temple of Artemis a statue of Lysander, and of other Spartans who were unknown to fame; but after the decline of the Spartan power and the victory of Conon at Cnidus, they set up statues of Conon and Timosthenes in their temple, as the Samii also did in their Heraeum. (Pans. vi. 3. § 15.)

There is no notice of Ephesus taking any active part in war against the barbarians from the time of Croesus, who attacked this town first of all the Ionian towns, and probably with the view of getting a place on the sea. For Ephesus was the most convenient port of Sardis, being three days' journey distant (Xen. *Hell.* iii. 2. § 11), or 540 stadia (Herod. v. 54). It was the usual landing-place for those who went to Sardis, as we see in many instances. (Xen. *Anab.* ii. 2. § 6.)

The Ionian settlers at Ephesus, according to tradition, found the worship of Artemis there or of some deity to whom they gave the name of Artemis (Callim. *in Dian.* 238.) A temple of Artemis existed in the time of Croesus, who dedicated in the temple "the golden cows and the greater part of the pillars," as Herodotus has it (i. 92). Herodotus mentions the temple at Ephesus with that of Hera at Samos as among the great works of the Greeks (ii. 146), but the Heraeum was the larger. The original architect is named Chersiphron by Strabo, and another architect enlarged it. The architect of the first temple that the Ionians built was a contemporary of Theodorus and Rhoecus, who built the Heraeum at Samos. When Xenophon settled at Scillus, he built a temple to Artemis like the great one at Ephesus; and he placed in it a statue of cypress like that of Ephesus, except that the Ephesian Artemis was of gold. There was a stream Selinus near the temple at Ephesus, and there was a stream so called at Scillus, or Xenophon gave it the name. Xenophon was at Ephesus before he joined Agesilaus

of Jerusalem (reckoning three Roman miles to the hour), adjacent to and overlooking the broad tract of desert country lying between it and the valley of the Jordan." (Robinson, *Harmony of the Four Gospels*, note on pt. vi. § 93.) He finds it also in the Ophrah of Benjamin mentioned in Josh. xviii. 23, 1 Sam. xiii. 17. Possibly, also, "Mount Ephron," mentioned in the northern border of the tribe of Judah, may be the mountain district of Benjamin, deriving its name from this city. (*Josh.* xv. 9.)

3. A woody country on the east of Jordan in Gilead, where the decisive battle between David and his revolted son was fought, one of whose oaks proved fatal to Absalom. (2 *Sam.* xviii. 6.) [G.W.]

E'PHYRA (Ἐφύρη), the name of several ancient cities in Greece. Meineke (ad Steph. B. p. 275) connects the word with *ἐφοράω*, and others suppose it to be equivalent to *ἐχυρά* (Curtius, *Peloponnesos*, vol. ii. p. 593); but the meaning of the word can only be a matter of conjecture.

E'PHYRA (Ἐφύρη). 1. The ancient name of Corinth. [CORINTHUS.]

2. A town of Elis, situated upon the river Selleeis, the ancient capital of Augeias, whom Hercules conquered. (Hom. *Il.* ii. 659, xv. 531: see below, 4.) Strabo describes Ephyra as distant 120 stadia from Elis, on the road to Lasion, and says that on its site or near it was built the town of Epitalium or Boeonoa. (Strab. viii. p. 338, where, for the reading *κειμένη τῇ ἐπιθαλασσίωνα*, we ought to read with Meineke, *κειμένη τῇ ἐπὶ Λασίωνα*.) Strabo also speaks of an Ephyra between Pylos and Elis, Pylos being the town at the junction of the Ladon and the Peneius. (Steph. B. *s. v.* Ἐφύρα.) Of these two accounts there can be little doubt that the Ladon, the chief tributary of the Peneius, is the Selleeis, which Strabo describes as rising in Pholoë. Curtius places Ephyra near the village of *Klisura* which lies on the Ladon, on the Pylia from Elis, by way of Pylos. Leake thinks much less probability, that the Selleeis, and that Ephyra was the more direct road of Elis. (Curtius, *Peloponnesos*, vol. ii. p. 593; Leake, *Morea*, vol. i. pp. 6, 7.)

3. A town of Sicyonia, mentioned by Strabo, on the river Selleeis, as situated near Sicyon. Leake conjectures that some ruins situated about 20 minutes south-east of *Suli* represent the Sicyonian Ephyra. (Strab. viii. p. 338; Leake, *Peloponnes*, p. 56.)

4. A town of Thesprotia in Epeirus, afterwards called Cichyrus, according to Strabo. Thucydides describes it as situated in the district Elaeatis in Chaonia, not far from the sea; and it further appears from his account, compared with that of Strabo, that it stood not far from the discharge of the Acheron and the Acherusian lake into the port called *Glykys Limen*. (Thuc. i. 46; Strab. vii. p. 324.) Ephyra is placed by Leake and other modern writers at a church, formerly a monastery of St. Nicholas, distant 3 or 4 miles direct from *Porto Fanari*: the church stands on remains of Hellenic walls of polygonal masonry.

The Thesprotian Ephyra appears to be the town mentioned in two passages of the Odyssey (i. 259, ii. 328). The Ephyri, mentioned in a passage of the Iliad (xiii. 301), were supposed by Pausanias to be the inhabitants of the Thesprotian town (Paus. ix. 36. § 3); but Strabo maintained that the poet referred to the Thessalian Ephyra (Strab. ix. p. 442). Some commentators even supposed

Digitized by Google

away from the goddess, though they belonged to her. The Romans gave them back to the goddess; but again the publicani by force seized on the revenue that was got from them; but Artemidorus, as he says himself, being sent to Rome, recovered the lakes for the goddess; and the city of Ephesus set up his golden (gilded) statue in the temple. Pliny (v. 29) seems to say that there were two rivers Selemnites at Ephesus, and that the temple of Diana lay between them. But these rivers have nothing to do with the lakes, which were on the north side of the Caystrus, as the French editor of Chandler correctly observes; and Pliny has probably confounded the river and the lakes. The mountain Gallesus (*Aleman*) separated the territory of Ephesus, north of the Caystrus, from that of Colophon. When Hannibal fled to Asia, he met king Antiochus near Ephesus (Appian, *Syr.* c. 4); and when the Roman commissioners went to Asia to see Antiochus, they had a good deal of talk with Hannibal while they were waiting for the king, who was in Pisidia. Antiochus, during his war with the Romans, wintered at Ephesus, at which time he had the design of adding to his empire all the cities of Asia. (Liv. xxxiii. 38). Ephesus was then the king's head-quarters. The king's fleet fought a battle with the fleet of the Romans and Eumenes at the port Corycus, "which is above Cyssus" (Liv. xxxvi. 43); and Polyxenidas, the admiral of Antiochus, being defeated, fled back to the port of Ephesus (B. C. 189). [CASYSTES.] After the great defeat of Antiochus at Magnesia, near Sipylus, by L. Cornelius Scipio, Polyxenidas left Ephesus, and the Romans occupied it. The Roman consul divided his army into three parts, and wintered at Magnesia on the Maeander, Tralles, and Ephesus. (Liv. xxxvii. 45). On the settlement of Asia after the war, the Romans rewarded their ally Eumenes, king of Pergamum, with Ephesus, in addition to other towns and countries. When the last Attalus of Pergamum died (B. C. 133) and left his states to the Romans, Aristonicus, the son of an Ephesian woman by king Eumenes, as the mother said, attempted to seize the kingdom of Pergamum. The Ephesii resisted him, and defeated him in a naval fight off Cyme. (Strab. p. 646). The Romans now formed their province of Asia (B. C. 129), of which Ephesus was the chief place, and the usual residence of the Roman governor. One of the Conventus Juridici was also named from Ephesus, which became the chief town for the administration of justice, and of a district which comprised the Caesarienses, Metropolitae, Cibiani inferiores et superiores Mysomacedones, Mastaurenses, Briullitae, Hypaepeni, Dioshieritae." (Pliny, *H. N.* v. 29).

When Mithridates entered Ionia, the Ephesii and other towns gladly received him, and the Ephesii threw down the statues of the Romans. (Appian, *Mithrid.* c. 21). In the general massacre of the Romans, which Mithridates directed, the Ephesii did not respect their own asylum, but they dragged out those who had taken refuge there and put them to death. Mithridates, on his visit to western Asia, married Monime, the daughter of Philopoemen of Stratonicea in Caria, and he made Philopoemen his bailiff (ἐπίσκοπος) of his town of Ephesus. But the Ephesii, who were never distinguished for keeping on one side, shortly after murdered Zenobius, a general of Mithridates, the same who carried the Chians off. [CHIOS.] L. Cornelius Sulla, after his victories over Mithridates, punished the Ephesii for their treachery. The Roman summoned the chief men of the Asiatic cities to Ephesus, and from his tribunal addressed them in a speech, in which, after stating them well, he imposed a heavy contribution on them, and gave notice that he would treat as enemies all who did not obey his orders. This was the end of the political history of Ephesus.

Ephesus was now the usual place at which the Romans landed when they came to Asia. When Cicero (B. C. 51) was going to his province of Cilicia, he says that the Ephesii received him as if he had come to be their governor (*ad Att.* v. 13). P. Metellus Scipio, who was at Ephesus shortly before the battle of Pharsalia, was going to take the money that had been deposited from ancient times in the temple at Ephesus, when he was summoned by Cn. Pompeius to join him in Epirus. After the defeat of Brutus and Cassius at Philippi, M. Antonius paid a visit to Ephesus, and offered splendid sacrifices to the goddess. He pardoned the partisans of Brutus and Cassius, who had taken refuge in the temple, except two; and it may have been on this occasion that he issued that order in favour of the rogues of Ephesus which Augustus repealed. Antonius summoned the people of Asia, who were at Ephesus represented by their commissioners, and after recapitulating the kindness that they had experienced from the Romans, and the aid that they had given to Brutus and Cassius, he told them that he wanted money; and that as they had given his enemies ten years' taxes in two years, they must give him ten years' taxes in one; and that they should be thankful for being let off more easily than they deserved. The Greeks made a lamentable appeal to his mercy, urging that they had given Brutus and Cassius money under compulsion; that they had even given up their plate and ornaments, which had been coined into money before their eyes. Antonius at last graciously signified that he would be content with nine years' taxes, to be paid in two years. (Appian, *B. C.* v. 4, &c.) It was during this visit that Antonius, according to Dion Cassius (xlviii. 24), took the brothers of Cleopatra from their sanctuary in the temple of Diana at Ephesus, and put them to death; but Appian (*B. C.* v. 9) says that it was Arsinoë, Cleopatra's sister, and that she was taken from sanctuary in the temple of Artemis Leucophryne at Miletus. Appian's account is the more trustworthy, for he speaks of the priest of Ephesus, "whom they call Megabyzus," narrowly escaping the vengeance of Antonius, because he had once owned Arsinoë as a queen. Before the sea-fight at Actium the fleet of M. Antonius and Cleopatra was collected at Ephesus, and he came there with Cleopatra. After the battle of Actium, Caesar Octavianus permitted Ephesus and Nicaea, the chief cities of Asia and Bithynia, respectively to dedicate temples to the deified dictator Caesar.

Strabo terminates his description of Ephesus with a list of the illustrious natives, among whom was Heraclitus, surnamed the Obscure; and Hermodorus, who was banished by the citizens for his merits. This is the Herm dorus who is said to have assisted the Roman Decemviri in drawing up the Tables. (Dig. 1. 2. 2. § 4.) Hipponax the poet was also an Ephesian, and Parrhasius the painter. Strabo also mentions Apelles as an Ephesian, but that is not certain. Of modern men of note he mentions only Alexander, surnamed the Light, who was employed in public affairs, wrote history, and astronomical and

Digitized by Google

eographical poems in hexameter verse. Strabo does ot mention Callinus, and it would seem, that as he peaks of him elsewhere, he did not take him to be a Ephesian; and, among the men nearer his own me, he has not mentioned the geographer Artemiorus in this passage, though he does mention Artedorus, the same man, as being sent to Rome about e lakes and the revenues from them. Accordingly, orsy and Groskurd suppose that the name Artedorus has dropped out of the MSS. of Strabo, and at Strabo must have mentioned him with Alexder the Light.

When Strabo was at Ephesus, in the days of ugustus, the town was in a state of great prosety. The trade of Ephesus had extended so far, at the minium of Cappadocia, which used to be rried to Sinope, now went to Ephesus. Apameia, the source of the Marsyas, was the second comercial place in the Roman province of Asia, phesus being the first, for it was the place that ceived all the commodities from Greece and Italy. Strab. pp. 540, 577.) There was a road from phesus to Antiocheia on the Maeander, through agnesia on the Maeander, Tralles, and Nysa. om Antiocheia the road went to Carura [CARURA], on the borders of Caria and Phrygia. From arura the road was continued to Laodiceia, Apaeia, Metropolis, Chelidonii (a corrupt word, which supposed to represent Philomelium), and Tyanum; then it ran through Lycaonia through andiceia, the Burnt, to Coropassus; and from ropassus, which was in Lycaonia, to Garsaura in ppadocia, on the borders; then through Soandus d Sadakora to Mazaca [CAESAREA], the metropolis of the Cappadocians; and from Mazaca rough Herphae to Tomisa in Sophene. (Strab. pp. 7, 663.)

It does not appear from Strabo how the Ephesii naged the affairs of the town in his time. He peaks of a senate (γερουσία) being made by Lysimachus, and the senate with certain persons called e Epicleti managed the affairs of the city. We ay conclude that it had a Boule, and also a ημος or popular assembly. A town clerk of phesus (γραμματεύς), a common functionary in reek cities, is mentioned. (*Acts of the Apost.* xix. 5.) An imperfect inscription, copied by Chishull *Travels in Turkey*, &c. p. 20), shows that there as an office (ἀρχεῖον) in Ephesus for the registry f titles within the territory.

In the time of Tiberius there were great complaints of the abuses of asyla. The Ephesii (Tacit. nn. iii. 61) were heard before the Roman senate in erence of the asylum of Artemis, when they told the ulous mythical story of the origin of the temple; ey also referred to what Hercules had done for the mple; and, coming nearer to the business, they said at the Persians had always respected it, and after em the Macedonians, and finally the Romans. Plutarch (*De vitando aere alieno*, c. 31) says that the mple was an asylum for debtors, and it is probable that the precincts were generally well filled. the reign of Nero, Barea Soranus, during his government of Asia, tried to open the port, which the ad judgment of the king of Pergamum and his rchitects had spoiled. (Tacit. *Ann.* xvi. 23.)

When St. Paul visited Ephesus (*Acts of the Apost.* xix.), one Demetrius, "a silversmith which made silver shrines for Diana, brought no small gain unto the craftsmen." He called his men together, and showed them that their trade was in danger from the preaching of Paul, who taught "that they be no gods, which are made with hands; so that not only this our craft is in danger to be set at nought; but also that the temple of the great goddess Diana should be despised, and her magnificence should be destroyed, whom all Asia and the world worshippeth." The town clerk, by a prudent and moderate speech, settled the tumult. Among other things, he told them that the image of Diana fell down from Jupiter. Pliny (xvi. 40) mentions an old wooden statue of Diana at Ephesus. Licinius Mucianus, a contemporary of Pliny, had examined it, and he said that it had never been changed, though the temple had been restored seven times. The representative of the Asiatic goddess was not that of the huntress Artemis of the Hellenes. Müller observes that, "Artemis, as the guardian of the Ephesian temple, which, according to the myth, was founded by the Amazons, appears in an Asiatic Amazonian costume. The worship of her image, which was widely spread, and in the later imperial period repeated innumerable times in statues and on coins, is connected with the Hellenic representations of Artemis by no visible link." (*Handbuch der Archaeologie.*) The old statue that fell down from Jupiter may have been a stone, an aërolite; and the wooden statue that Mucianus saw, some very rude piece of work. According to Minucius Felix (c. 21), the Ephesian Diana was represented with many breasts. (See the notes on Tacit. *Ann.* iii. 61, ed. Oberlin.)

The apostle established a Christian church at Ephesus, and we learn from what he said to the elders of the church of Ephesus, when they met him at Miletus (*Acts*, xx. 17—31), that he had lived there three years. He afterwards addressed a letter to the Ephesians, which forms part of the canonical New Testament. In the book of Revelations (ii. 1, &c.) the church of Ephesus is placed first among the seven churches of Asia. The heathen and the Christian church of Ephesus subsisted together for some time. The great festival called τὸ κοινὸν Ἀσίας was held in several of the chief towns in turn, of which Ephesus was one. In A. D. 341 the third general council was held at Ephesus. The Asiarchs who are mentioned in the Acts of the Apostles (xix. 31), on the occasion of the tumult in Ephesus, are probably, as Schleusner says, the representatives from the cities of Asia, who had the charge of the religious solemnities; or they may have been the Asiarchs of Ephesus only. Under the Christian emperors Ephesus has the title of ἡ πρώτη καὶ μεγίστη μητρόπολις τῆς Ἀσίας.

The remains of Ephesus are partly buried in rubbish, and overgrown with vegetation. They are near a place now called *Ayasaluk*. These remains have been visited and described by many travellers, but it is difficult without a plan of the ground to understand the descriptions. Spon and Wheler visited the place in 1675, and described it after the fashion of that day (vol. i. p. 244). The ruins have also been described by Chishull (*Travels in Turkey*, &c. p. 23, &c.), and at some length by Chandler (*Asia Minor*, c. 32, &c.), and by many other more recent travellers. The disappearance of such a huge mass as the temple of Diana can only be explained by the fact of the materials having been carried off for modern buildings; and probably this and other places near the coast supplied materials for Constantinople. The soil in the valley has also been raised by the alluvium of the river, and probably covers many old substructions. The

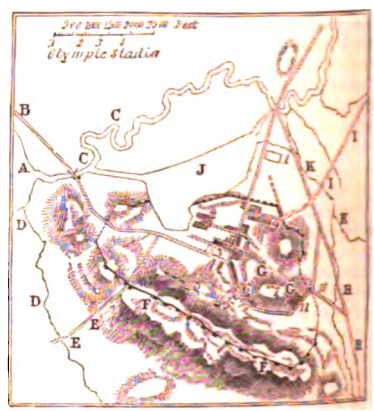
Digitized by Google

temple of Ephesus, being the centre of the pagan worship in Asia, would be one of the first to suffer from the iconoclasts in the reign of Theodosius I., when men in black, as Libanius calls them, overturned the altars, and defaced the temples. When the great Diana of the Ephesians was turned out of her home, the building could serve no other purpose than to be used as a stone quarry.

Chandler found the stadium of Ephesus, one side of which was on the hill which he identifies with Prion, and the opposite side which was next to the plain was raised on arches. He found the length to be 687 feet. He also describes the remains of the theatre, which is mentioned in the tumult which was caused at Ephesus by St. Paul's preaching. Fellows (*Asia Minor*, p. 274) observes that there can be no doubt about the site of the theatre. Chandler saw also the remains of an odeum or music hall. There are the remains of a temple of the Corinthian order, which was about 130 feet long, and 80 wide. The cella was built of massive stones. The columns were 4 feet 6 inches in diameter, and the whole height, including the base and capitals, above 46 feet. The shafts were fluted, and of a single piece of stone. The best preserved of these columns that Chandler saw was broken into two parts. The frieze contained a portion of bold sculpture, which represented some foliage and young boys. The quarries on Prion or Pion, for the name is written both ways, supplied the marble for the temples of Ephesus. Prion, as Strabo has it, was also called Lepre Acte; it was above the city of Strabo's time, and on it, as he says, was part of the wall.

Hamilton (*Researches*, &c. vol. ii. p. 24), one of the latest travellers who has visited Ephesus, spent several days there. He thinks that the site of the great temple is in some "massive structures near the western extremity of the town, which overlook the swamp or marsh where was the ancient harbour." This is exactly the spot where it ought to be according to Strabo's description. The place which Hamilton describes is "immediately in front of the port, raised upon a base thirty or forty feet high, and approached by a grand flight of steps, the ruins of which are still visible in the centre of the pile." Hamilton observes that "brick arches and other works have also been raised on various portions of the walls; but this was probably done by the Christians after the destruction of the temple and the removal of the columns by Constantine, when a church was erected on its ruins." The supposition that the basement of the temple has been buried by the alluvium of the Cayster is very properly rejected by Hamilton, who has pointed out the probable site. Pliny describes a spring in the city, and names it Callipia, which may be the Alitaea of Pausanias. Hamilton found a beautiful spring to the north of the harbour; the head of the spring was about 200 yards from the temple. The distance of the temple, supposed to be near the port, from the old city on the heights seems to agree with the story in Herodotus (i. 26). The position of the tomb of Androclus, as described by Pausanias, is quite consistent with this supposed site of the great temple. Hamilton observes that the road which Pausanias describes "must have led along the valley between Prion and Coressus, which extends towards Magnesia, and is crossed by the line of walls erected by Lysimachus. The Magnesian Gates would also have stood in this valley, and must not be confounded with those which are in the direction of *Aiasaluck*." Hamilton supposes that the Olympieium may have stood in the space between the temple of Artemis and the theatre in the neighbourhood of the agora, where he found the remains of a large Corinthian temple, which is that which Chandler describes.

Hamilton describes the Hellenic wall of Lysimachus as extending along the heights of Coressus "for nearly a mile and three quarters, in a S.E. and NW. direction, from the heights immediately to the S. of the gymnasium to the tower called the Prison of St. Paul, but which is in fact one of the towers of the ancient wall, closely resembling many others which occur at various intervals. The portion which connected Mount Prion with Mount Coressus, and in which was the Magnesian Gate, appears to have been immediately to the east of the gymnasium." The wall is well built. Hamilton gives a drawing of a perfect gateway in the wall, with a peculiar arch. He observed also another wall extending from the theatre over the top of Mount Prion, and thence to the eastern extremity of the stadium. He thinks that this may be the oldest wall. Besides this wall and that supposed to be Lysimachus', already described, he found another wall, principally of brick, which he supposes to have been built by the Byzan-



PLAN OF EPHESUS.*

A. Harbour, now filled up.
B. Road to Colophon.
CC. River Caystrus.
DD. River Cenchrius.
EE. Road to Samos.
FF. Coressus.
GG. Prion.
HH. Road to Magnesia.
II. Road to Sardes and Smyrna.
J. Inner harbour, now a swamp.
KK. River Selinus.
1. Temple of Artemis of Ephesus.
2. Great building belonging to the harbour, incorrectly supposed to be the temple of Artemis.
3. Agora surrounded by pillars.
4. Corinthian temple.
5. Tombs.
6. Odeium.
7. Olympieium.
8. Large theatre.
9. Stadium.
10. Magnesian gates.
11. Gymnasium.

* This plan is from Kiepert, and will be useful to the readers of this article; but the writer does not suppose that every spot here indicated can be considered as rightly fixed yet.

ines when the town had diminished in size: "considerable remains of this may still be traced at the foot of Mount Coressus, extending from near the theatre westward to the port and temple of Diana." There are remains of an aqueduct at Ephesus. Spon and Wheler also describe a series of arches as being five or six miles from Ephesus on the road to Scala Nova, with an inscription in honour of Diana and the emperors Tiberius and Augustus.

Hamilton copied a few inscriptions at Ephesus (vol. ii. p. 455). Chandler copied others, which were published in his "Inscriptiones Antiquae," &c. In the "Antiquities of Ionia," vol. ii., there are views of the remains of Ephesus, and plans. Some of the coins of Ephesus of the Roman period have a reclining figure that represents the river Cayster, with the legend Ἔφεσιων Καυστρος. Arundell (*Discourses in Asia Minor*, vol. ii.) has collected some particulars about the Christian history of Ephesus. The reader may also consult the "Life and Epistles of St. Paul" by Conybeare and Howson, vol. ii. p. 66, &c.

The name of the village of *Aiasaluck* near Smyrna is generally said to be a corruption of Ἅγιος Θεόλογος, a name of St. John, to whom the chief Christian church of Ephesus was dedicated (Procop. *de Aedif.* v. 1). But, as Arundell observes, this is very absurd: and he supposes it to be a Turkish name. Tamerlane encamped here after he had taken Smyrna. The name is written *Ayaslic* by Tamerlane's historian Sherefeddin Ali (French Translation, by Petis de la Croix, vol. iv. p. 58). It has been conjectured that Tamerlane destroyed the place, but his historian says nothing about that. Ephesus had perished before the days of Tamerlane. [G. L.]

COIN OF EPHESUS.

EPHRAIM. 1. One of the twelve tribes of Israel. [PALAESTINA.]

2. (Ἐφραίμ), a city named only by St. John (xi. 54), without any clue to its position, except that it was ἐγγὺς τῆς ἐρήμου, probably the wild and rocky wilderness of Judea, north-east of Jerusalem, usually so designated in the New Testament. This position would answer well enough to the situation assigned it by Eusebius (*Onomast. s. v.* Ἐφράιν), who describes it as a large village eight miles distant from Jerusalem to the north, where, however, St. Jerome reads 20 miles. In confirmation of this is the mention of the small town of Ephraim, in connection with Bethel, by Josephus (*B. J.* iv. 9. § 9), and the desert is probably the same which is called in Joshua (xviii. 12) the wilderness of Beth-aven, and Mount Bethel in viii. 14. (comp. xvi. 1.) (Reland, *Palaest.* pp. 376, 377.) Dr. Robinson believes it to be the same as "Ephraim with the towns thereof," which Abijah took from Jeroboam (cir. B. C. 957), also mentioned in connection with Bethel (2 *Chron.* xiii. 19). Assuming St. Jerome's statement of the distance to be correct, he identifies Ephraim with "the lofty site of the modern *El-Taiyibeh*, situated two hours NE. of Bethel, and six hours and twenty minutes NNE. of Jerusalem (reckoning three Roman miles to the hour), adjacent to and overlooking the broad tract of desert country lying between it and the valley of the Jordan." (Robinson, *Harmony of the Four Gospels*, note on pt. vi. § 93.) He finds it also in the Ophrah of Benjamin mentioned in Josh. xviii. 23, 1 Sam. xiii. 17. Possibly, also, "Mount Ephron," mentioned in the northern border of the tribe of Judah, may be the mountain district of Benjamin, deriving its name from this city. (*Josh.* xv. 9.)

3. A woody country on the east of Jordan in Gilead, where the decisive battle between David and his revolted son was fought, one of whose oaks proved fatal to Absalom. (2 *Sam.* xviii. 6.) [G. W.]

E'PHYRA (Ἔφυρη), the name of several ancient cities in Greece. Meineke (ad Steph. B. p. 275) connects the word with ἐφοράω, and others suppose it to be equivalent to ἐχυρά (Curtius, *Peloponnesos*, vol. ii. p. 593); but the meaning of the word can only be a matter of conjecture.

E'PHYRA (Ἔφύρη). 1. The ancient name of Corinth. [CORINTHUS.]

2. A town of Elis, situated upon the river Selleeis, and the ancient capital of Augeias, whom Hercules conquered. (Hom. *Il.* ii. 659, xv. 531: see below, No. 4.) Strabo describes Ephyra as distant 120 stadia from Elis, on the road to Lasion, and says that on its site or near it was built the town of Oenoë or Boeonoa. (Strab. viii. p. 338, where, for the corrupt κειμένη τῇ ἐπιθαλασσίωνα, we ought to read, with Meineke, κειμένη τῇ ἐπὶ Λασίωνα.) Stephanus also speaks of an Ephyra between Pylos and Elis, Pylos being the town at the junction of the Ladon and the Peneius. (Steph. B. *s. v.* Ἔφύρα.) From these two accounts there can be little doubt that the Ladon, the chief tributary of the Peneius, is the Selleeis, which Strabo describes as rising in Mount Pholoë. Curtius places Ephyra near the modern village of *Khiowra* which lies on the Ladon, about 120 stadia from Elis, by way of Pylos. Leake supposes, with much less probability, that the Selleeis is the Peneius, and that Ephyra was the more ancient name of Elis. (Curtius, *Peloponnesos*, vol. i. p. 39, seq.; Leake, *Morea*, vol. i. pp. 6, 7.)

3. A village of Sicyonia, mentioned by Strabo, along with the river Selleeis, as situated near Sicyon. Ross conjectures that some ruins situated upon a hill about 20 minutes south-east of *Suli* represent the Sicyonian Ephyra. (Strab. viii. p. 338; Ross, *Reisen im Peloponnes*, p. 56.)

4. A town of Thesprotia in Epeirus, afterwards called CICHYRUS, according to Strabo. Thucydides describes it as situated in the district Elaeatis in Thesprotia, away from the sea; and it further appears from his account, compared with that of Strabo, that it stood not far from the discharge of the Acheron and the Acherusian lake into the port called *Glycys Limen*. (Thuc. i. 46; Strab. vii. p. 324.) It is placed by Leake and other modern travellers at a church, formerly a monastery of St. John, distant 3 or 4 miles direct from *Porto Fasári*: the church stands on remains of Hellenic walls of polygonal masonry.

The Thesprotian Ephyra appears to be the town mentioned in two passages of the Odyssey (i. 259, ii. 328). The Ephyri, mentioned in a passage of the Iliad (xiii. 301), were supposed by Pausanias to be the inhabitants of the Thesprotian town (Paus. ix. 36. § 3); but Strabo maintained that the poet referred to the Thessalian Ephyra (Strab. ix. p. 442). Some commentators even supposed the

Digitized by Google

Ephyra on the Selleeis (Hom. *Il.* ii. 659, xv. 531) to be the Thesprotian town, but Strabo expressly maintains that Homer alludes in these passages to the Elean town. [No. 2.] (Strab. vii. p. 328; comp. viii. p. 338.) Pausanias represents Cichyrus as the capital of the ancient kings of Thesprotia, where Theseus and Peirithous were thrown into chains by Aïdoneus; and its celebrity in the most ancient times may also be inferred from a passage of Pindar (Paus. i. 17. § 4; Pind. *Nem.* vii. 55.) (Leake, *Northern Greece*, vol. iii. p. 7, vol. iv. pp. 53, 175.)

5. A town of Thessaly, afterwards called Cranon or Crannon. [CRANON.]

6. A town of the Agraei in Aetolia, of uncertain site. (Strab. viii. p. 338.)

7. An island in the Argolic gulf, supposed by Leake to be *Spétzia*. (Plin. iv. 12. s. 19; Leake, *Peloponnesiaca*, p. 294.)

EPICNEMI'DII LOCRI. [LOCRI.]

EPICTE'TUS PHRYGIA. [PHRYGIA.]

EPIDAMNUS. [DYRRHACHIUM.]

EPIDAURUS (Ἐπίδαυρος, Ptol. ii. 16. § 4, *Peut. Tab.*; Epidaurum, Plin. iii. 22, Geog. Rav.: *Ragusa-Vecchia;* Illyric, *Zaptal*), a maritime city of Illyricum, of which no notice occurs till the civil war between Pompeius and Caesar, when having declared in favour of the latter, it was besieged by M. Octavius. The opportune arrival of Vatinius relieved it. (Hirt. *B. Alex.* 44, 45.) Under the Romans it became a colony (Plin. *l. c.*); and, as in the cities of the same name in Peloponnesus, Asclepius was the principal deity of the Illyrian town. Constantianus, acting for Justinian in the Gothic War, occupied Epidaurus with his fleet. (Procop. *B. G.* i. 7; Le Beau, *Bas Empire*, vol. viii. p. 335.) It was afterwards destroyed, but there is some uncertainty as to the date of that event: it appears that the fugitives established themselves at Rausium, which in time was altered into *Ragusa*. (Const. Porph. *de Adm. Imp.* 29.) *Ragusa-Vecchia* no longer contains any remains of Epidaurus, and all memorials of its site are confined to inscriptions, fragments of walls, coins, and other things found by excavation. (Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 373; Neigebaur, *Die Sudslaven*, p. 82; Schafarik, *Slav. Alt.* vol. ii. p. 272; Engel, *Gesch. von Ragusa*, p. 44.) [E. B. J.]

EPIDAURUS (Ἐπίδαυρος: *Eth.* Ἐπιδαύριος), a town on the eastern coast of Peloponnesus, in the district called Argolis under the Romans. Throughout the flourishing period of Grecian history it was an independent state, possessing a small territory (Ἐπιδαυρία), bounded on the west by the Argeia, on the north by the Corinthia, on the south by the Troezenia, and on the east by the Saronic gulf. Epidaurus is situated on a small peninsula, which projects from a narrow plain, surrounded on the land side by mountains. In this plain the vine is chiefly cultivated, as it was in the time of Homer (ἀμπελόεντ' Ἐπίδαυρον, Hom. *Il.* ii. 561). North of the peninsula is a well protected harbour; south of it, an open roadstead. The original town was confined to the peninsula, which is 15 stadia in circumference. (Strab. viii. p. 374.) The town also extended upon the shore both north and south of the peninsula, and embraced the small promontory which forms the southern extremity of the northern harbour. Epidaurus is accurately described by Strabo (*l. c.*) as situated in a recess of the Saronic gulf, looking towards the NE., and shut in by high mountains.

Epidaurus possessed only a small territory; but various circumstances contributed to make it a place of importance at an early period. Of these the principal was its temple of Asclepius, situated at the distance of five miles from the city, of which we shall speak presently. Epidaurus lay near Aegina and the other islands in the Saronic gulf, and nearly opposite the harbours of Athens, from which it was distant only a six hours' sail. It was likewise nearly due east of Argos, from which there was a highway to Epidaurus, forming the chief line of communication between Argos and the Saronic gulf. Epidaurus was said by Aristotle to have been originally a Carian settlement. Hence it was called Epicarus. Strabo relates that its more ancient name was Epitaurus. (Strab. *l. c.*; Steph. B. *s. v.* Ἐπίδαυρος; Eustath. *ad Hom. Il.* ii. 561.) It was afterwards colonised by Ionians. According to Aristotle, it was colonised by Ionians from the Attic tetrapolis in conjunction with the Heracleidae on their return to Peloponnesus (*ap. Strab. l. c.*); but it is more in accordance with the generally received legend to suppose that Epidaurus had been previously colonised by Ionians, and that these latter were expelled by the Dorian invaders. Indeed, this is the statement of Pausanias, who relates that at the time of the Dorian invasion Epidaurus was governed by Pityreus, a descendant of Ion, who surrendered the country without a contest to Deiphontes and the Argives, and himself retired to Athens with his citizens. (Paus. ii. 26. § 1, seq.) Deiphontes is represented as the son-in-law of Temenus, who obtained Argos as his share of the Dorian conquests, having married Hyrnetho, the daughter of Temenus. The misfortunes of Deiphontes afforded materials for the tragic poets. (*Dict. of Biogr.* art. *Deiphontes.*) Whatever truth there may be in these legends, the fact is certain that the Dorians became masters of Epidaurus, and continued throughout the historical period the ruling class in the state. At an early period Epidaurus appears to have been one of the chief commercial cities in the Peloponnesus. It colonised Aegina, which was for a long time subject to it. [AEGINA, p. 33, a.] It also colonised near the coasts of Asia Minor, the islands of Cos, Calydnus, and Nisyrus. (Herod. vii. 99.) But as Aegina grew in importance, Epidaurus declined, and in the sixth century B. C. almost all the commerce of the mother-city had passed into the hands of the Aeginetans.

Epidaurus was originally governed by kings, the reputed descendants of Deiphontes; but, as in most of the other Grecian states, monarchy was succeeded by an oligarchy, which was in its turn superseded for a time by a tyranny. Amongst the tyrants of Epidaurus was Procles, whose daughter Melissa was married to Periander, tyrant of Corinth; and when Procles resented the murder of his daughter by Periander, the latter marched against his father-in-law and led him away into captivity after taking Epidaurus. (Herod. iii. 50—52.) After the abolition of the tyranny the government of Epidaurus again reverted to the oligarchy, who retained possession of it during the whole historical period. For this reason the Epidaurians were always firm allies of Sparta, and severed their connection with their mother-city, Argos, since the latter had adopted a democratical constitution. Of the exact form of the Epidaurian government we have no particulars. We only read of magistrates called Artynae, who were presidents of a council of 180 members. (Plut. *Quaest.*

Graec. 1.) The original inhabitants of the country were called *Κονιποδες* or *dusty-feet*, and cultivated the land for their Dorian masters in the city. (Plut. *l. c.*; Hesych. *s. v.* *Κονιποδες*; Müller, *Dor.* bk. ii. pp. 57, 151, transl.) In the Peloponnesian War (B. C. 419) the Argives made war upon the Epidaurians and attempted to take their city, but they were repulsed and obliged to retreat into their own territories. (Thuc. v. 53—57.) In the time of the Romans, Epidaurus was little more than the harbour of the temple of Asclepius. Pausanias gives only a brief account of its public buildings. He mentions a temple of Athena Cissaea on the acropolis; temples of Dionysus, Artemis, and Aphrodite, in the city; a sacred enclosure of Asclepius in the suburbs; and a temple of Hera on a promontory at the harbour, which promontory is doubtless the one forming the northern entrance to the harbour, and now called *C. Viboleo*. (Paus. ii. 29. § 1.) The name of Epidaurus is still preserved in the corrupted form of *Pidhavro*, which is the name of a neighbouring village. The foundations of the ancient walls may be traced in many parts along the cliffs of the peninsula. Here Cadwell noticed some fragments of columns, and a draped statue of a female figure, forming apparently the cover of a sarcophagus. The sea has encroached upon the shore on either side of the peninsula, and some remains of the outer city may still be seen under water.

The temple of Asclepius was situated at the distance of 5 miles west of Epidaurus on the road to Argos. (Liv. xlv. 28.) It was one of the most celebrated spots in Greece, and was frequented by patients from all parts of the Hellenic world for the cure of their diseases. The temple itself was only a small part of the sacred spot. Like the Altis at Olympia, and the Hierum of Poseidon at the Isthmus, there was a sacred enclosure, usually called the grove (*ἄλσος*) of Asclepius, and containing several public buildings. It stood in a small plain entirely surrounded by mountains. (Paus. ii. 27. § 1.) The sacred enclosure was "less than a mile in circumference; it was confined on two sides by steep hills, and on the other two by a wall, which appears to have formed a right angle in the lowest and most level part of the valley, and is still traceable in several places." (Leake.) The recollection of the sacred character of this valley has been preserved down to the present time. It is still called *Hierón* (*ἱερόν*), or the sanctuary; and it is a curious circumstance that the village, through which the road leads to the Hieron, bears the name of *Koróni*, evidently derived from Coronis, the mother of Asclepius, and which it must have preserved from ancient times, although the name is not mentioned by ancient writers. Of the mountains surrounding the sanctuary the highest lies to the north: it is now called *Bolonidiá*, and bore in ancient times the name of TITTHIUM (*Τίτθιον*), because the child of Coronis, which was exposed upon this mountain, was here suckled by a goat. (Paus. ii. 26. § 4, 27. § 7.) Mount CYNORTIUM (*Κυνόρτιον*, Paus. ii. 27. § 7), on which stood a temple of Apollo Maleatas, is probably the hill in the southeast of the valley, above the theatre, on the way to Troezen. Pausanias also mentions a hill called CORYPHAEUM, on the summit of which was a temple of Artemis Coryphaea. It appears to have been the height in the south-west of the valley, since some believed that an olive tree on the ascent to the mountain was the boundary of the territory of Asine. (Paus. ii. 28. § 2.) The buildings in the sacred grove are described by Pausanias. He mentions first the temple of Asclepius, containing a chryselephantine statue of the god, the work of Thrasymedes of Paros, and half the size of the temple of Zeus at Olympia. The god sat upon a throne, holding a staff in one hand, and resting the other upon the head of a serpent; a dog lay at his feet. On one side of the temple there were dormitories for those who came to consult the god. Near the temple was the Tholus, a circular building of white marble, built by Polycleitus of Argos, and containing pictures by Pausias. In the sacred enclosure there was a theatre, also built by Polycleitus, which Pausanias considered particularly worthy of attention. The other objects within the sacred enclosure specified by Pausanias were temples of Artemis, Aphrodite, and Themis, a stadium, a fountain covered with a roof, and several works erected by Antoninus Pius before he became emperor of Rome, of which the most important were the bath of Asclepius, a temple of the gods called Epidotae, a temple dedicated to Hygieia, Asclepius, and Apollo surnamed the Aegyptian, and a building beyond the sacred enclosure for the reception of the dying and of women in labour, because it was unlawful for any one to die or to be born within the sanctuary. (Paus. ii. 27.) A festival was celebrated in the sacred grove in honour of Asclepius with musical and gymnastic games: it took place every four years, nine days after the Isthmian games. (Schol. *ad Pind. Nem.* iii. 145; Plat. *Ion*, init.; *Dict. of Ant.* art. *Asclepieia*.) The site of the sacred enclosure is now covered with ruins, which it is difficult for the most part to assign to any definite buildings. The position of the Tholus is clearly marked by its foundations, from which it appears that it was about 20 feet in diameter. In its neighbourhood are some foundations of a temple, which was probably the great temple of Asclepius. The ruins of the theatre are the most important. Leake observes that this theatre is in better preservation than any other temple in Greece, except that which exists near *Trametzis* in Epirus, not far from *Ioánnina*. "The orchestra was about 90 feet in length, and the entire theatre about 370 feet in diameter: 32 rows of seats still appear above ground in a lower division, which is separated by a diazoma from an upper, consisting of 20 seats. Twenty-four scalae, or flights of steps, diverging in equidistant radii from the bottom to the top, formed the communications with the seats. The theatre, when complete, was capable of containing 12,000 spectators." Of the stadium there remain the circular end and a part of the adjacent sides, with 15 rows of seats. Near it are the ruins of two cisterns and a bath.

When L. Aemilius Paulus visited Epidaurus in B. C. 167 after the conquest of Macedonia, the sanctuary was still rich in gifts presented by those who had recovered from diseases; but it had been robbed of most of these votive offerings before the time of Livy. (Liv. xlv. 28.) It suffered most from the depredations of Sulla at the same time that he robbed the temples of Olympia and Delphi. (Diod. *Exc.* p. 614, ed. Wess.) It is described by Strabo as a place renowned for the cure of all diseases, always full of invalids, and containing votive tablets descriptive of the cures, as at Cos and Tricca. (Strab. viii. p. 374.)

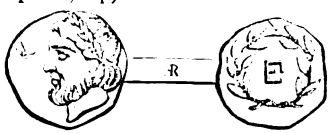
Of the worship of Asclepius by the Epidaurians, of his sacred snakes, and of the introduction of his worship into Rome and other places, an account is given elsewhere. (*Dict. of Biogr.* art. *Aesculapius.*) (Dodwell, *Tour through Greece*, vol. ii. p. 255; Leake, *Morea*, vol. ii. p. 416; Boblaye, *Recherches*, &c. p. 54, seq.; Curtius, *Peloponnesos*, vol. ii. p. 416, seq.)



COIN OF EPIDAURUS.

EPIDAURUS LIME'RA (Ἐπίδαυρος ἡ Λιμηρά), a town on the eastern coast of Laconia, situated at the head of a spacious bay, formed by the promontory *Kremidhi*, on the north, and the promontory of *Monemvasia*, on the south. It was a colony from Epidaurus in Argolis, and is said to have been built in consequence of an intimation from Asclepius, when an Epidaurian ship touched here on its way to Cos. (Paus. iii. 23. § 6.) Its foundation probably belongs to the time when the whole of the eastern coast of Laconia, as far as the promontory Malea, acknowledged the supremacy of Argos. (Herod. i. 82.) The epithet Limera was considered by the best ancient critics to be given to the town on account of the excellence of its harbours, though other explanations were proposed of the word (λιμηράν . . . . ὡς ἂν λιμενηράν, Strab. viii. p. 368). Pausanias describes the town as situated on a height not far from the sea. He mentions among its public buildings temples of Aphrodite and Asclepius, a temple of Athena on the acropolis, and a temple of Zeus Soter in front of the harbour. (Paus. iii. 23. § 10.) The ruins of Epidaurus are situated at the spot now called *Old Monemvasia*. "The walls, both of the acropolis and town, are traceable all round; and in some places, particularly towards the sea, they remain to more than half their original height. The town formed a sort of semicircle on the southern side of the citadel. The towers are some of the smallest I have ever seen in Hellenic fortresses; the faces ten feet, the flanks twelve: the whole circumference of the place is less than three quarters of a mile. The town was divided into two separate parts by a wall; thus making, with the citadel, three interior divisions. On the acropolis there is a level space, which is separated from the remaining part of it by a little insulated rock, excavated for the foundations of a wall. I take this platform to have been the position of the temple of Athena. On the site of the lower town, towards the sea front, there are two terrace walls, one of which is a perfect specimen of the second order of Hellenic masonry. Upon these terraces may have stood the temples of Aphrodite and Asclepius. There are, likewise, some remains of a modern town within the ancient inclosure; namely, houses, churches, and a tower of the lower ages." The harbour of Zeus Soter has entirely disappeared, but this is not surprising, as it must have been artificial; but there are two harbours, one at either extremity of the bay, the northern called that of *Kremidhi*, and the southern that of *Monemvasia*.

South of Epidaurus Pausanias mentions a promontory (ἄκρα) extending into the sea, called MINOA. (Paus. iii. 23. § 11; Strab. *l. c.*) This promontory is now an island, connected with the mainland by a bridge of 14 small arches; it is not improbable that it was originally part of the mainland, and afterwards separated from it by art.

Epidaurus is rarely mentioned in history. Its territory was ravaged by the Athenians in the Peloponnesian War. (Thuc. iv. 56, vi. 105.) In the time of Strabo there appears to have been a fortress on the promontory Minoa, since he calls it a φρούριον. Pausanias mentions Epidaurus Limera as one of the Eleuthero-Laconian towns. (Paus. iii. 21. § 7.) Ptolemy enumerates, as separate places, Minoa, the harbour of Zeus Soter, and Epidaurus. In the middle ages the inhabitants of Epidaurus abandoned their ancient town, and built a new one on Minoa, —which they now, for greater security, probably converted for the first time into an island. To their new town, because it was accessible by only one way, they gave the name of *Monemvasia* or *Monembasia*, which was corrupted by the Franks into *Malvasia*. In the middle ages it was the most important Greek town in the Morea, and continued purely Greek in its language and customs for many centuries.

Leake remarked, about a third of a mile southward of the ruins of Epidaurus, near the sea, a deep pool of fresh water, surrounded with reeds, about 100 yards long and 30 broad, which he observes is probably the "lake of Ino, small and deep," mentioned by Pausanias (iii. 23. § 8) as 2 stadia from the altars of Asclepius, erected to commemorate the spot where the sacred serpent disappeared in the ground, after landing from the Epidaurian ship on its way to Cos. (Leake, *Morea*, vol. i. p. 210, seq.; Boblaye, *Recherches*, &c. p. 100; Curtius, *Peloponnesos*, vol. ii. p. 292, seq.)

EPIDE'LIUM (Ἐπιδήλιον), called DELIUM simply by Strabo, a small place on the eastern coast of Laconia, situated within the territories of Boeae, at the distance of 100 stadia from Cape Malea and 200 from Epidaurus Limera. Epidelium, however, appears to have been little more than a sanctuary of Apollo, erected at the time of the Mithridatic War, when a wooden statue of the god floated to this spot from Delos, after the devastation of the island by Metrophanes, the general of Mithridates. Epidelium probably stood on Cape *Kamili*, where there are a few ancient remains. (Paus. iii. 23. § 2, seq.; Strab. viii. p. 368; Leake, *Morea*, vol. i. p. 214, seq.; Curtius, *Peloponnesos*, vol. ii. p. 298.)

EPIDII, in Britain, mentioned by Ptolemy as the people to the east of the Epidian promontory (*Mull of Cantyr*) = *Argyleshire*. [R. G. L.]

EPIDIUM, in Britain, mentioned by Ptolemy as a promontory = the *Mull of Cantyr*. [R. G. L.]

EPIEICIA (Ἐπιείκια), a fortress in Sicyonia on the river Nemea. (Xen. *Hell.* iv. 2. § 14, iv. 4. § 13; Leake, *Morea*, vol. iii. p. 373, seq.)

EPIMARANITAE, an Arab tribe mentioned under this name, only by Pliny, perhaps identical with the Anariti of Ptolemy. (Plin. vi. 28; Ptol. vi. 7; Forster, *Arabia*, vol. i. pp. 62, 64, 75.) Pliny places them between the Canis flumen and the Eblitaei montes; Ptolemy, between the Malaeni montes, or the promontory of the Asabi (*Cape Musendom*), and the river Lar, at the SE. quarter of the peninsula. Mr. Forster holds the name, in both its aspects, to be an anagrammatic form of "Rhamanitae, or the sons of Raamah," deriving their origin and name from "Raamah the son of Cush" (*Gen.* x. 7; *Ezek.* xxvii. 22); and this identification is supported by the fact that the first place

Digitized by Google

mentioned by Ptolemy in the country of the Nariti, a Khegma (Ῥεγμά), the precise form of Raamah n the LXX. He says that the tribe and province f Marah, and the town Ramah, are still found in his part of the Arabian peninsula. [G. W.]

EPIPHANEIA (Ἐπιφάνεια: *Eth.* Ἐπιφανεύς), a ity of Syria, placed by Ptolemy in 69° 36′, 30° 26′, n the district of Cassiotis, in which also Antioch nd Larissa were situated. The Itinerary of Antoinus places it 16 miles from Larissa, 32 from Emesa (Arethusa lying half way between it and the ther), and so 101 from Antioch of Syria. It was situated on the western bank of the Orontes, lower down the stream than Emesa (i. e. to the north), nd is supposed to be identical with the ancient Hamath (2 *Sam.* viii. 9; 1 *Kings*, viii. 65; *Is.* x. 9), called also "Hamath the Great" (*Amos*, vi. 2). t. Jerome states that both Antioch and Epiphaneia were formerly named Hamath, and mentions that the irst station on the road to Mesopotamia (qy. from Antioch) was in his day named Emmas, probably the modern *Hems* = Emesa. Eusebius (*Onomast. s. v.* Ἐμάθ) does not think it to be Epiphaneia near Emesa; but St. Jerome, in the same place, maintains heir identity, and says that Epiphaneia was still alled Hamath by the native Syrians. (Comp. Onomast. *s. v.* Aemath.) Aquila also rendered Ἐμάθ, τὴν Ἐπιφάνειαν τῆς Συρίας. (Theodoret. Quaest. 22 *in* 2 *King.*); and Theodoret, in common with St. Jerome, mentions both Epiphaneia and Emesa as Hamath, and says that the former was still so called. (*Comment. in Jerem.* xlvi. and iv.) Reland, however (*Palaest.* pp. 119, 120, 317), doubts he identity, and is disposed to place the Hamath of cripture further south, and nearer to the confines f the land of Israel, as indeed Numb. xiii. 21 and other passages above referred to seem to require. his, however, would not disprove the assertion that piphaneia was formerly called Hamath, the proof f which rests on independent ground, and is greatly nfirmed by the fact of its retaining that name mong the natives in St. Jerome's time, as indeed it as to this day, being still called *Hamah*, which is escribed by Irby and Mangles as "delightfully situated in a hollow, between and on the sides of two ills, near the west bank of the Orontes, but in itself presents nothing worthy of notice at this day." *Travels*, p. 244.) [G. W.]

COIN OF EPIPHANEIA IN SYRIA.

EPIPHANEIA (Ἐπιφάνεια: *Eth.* Ἐπιφανεύς), city of Cilicia, which, Pliny says (v. 27), was originally called Oeniandos: he places it in the interior f Cilicia. Cicero, in his description of his Cilician ampaign, says that he encamped at Epiphaneia, hich was one day's journey from the Amanus. n. Pompeius (Appian, *Mithrid.* c. 96) settled ome pirates here after he had broken up the robers, and also at Adana and Mallus. The Table laces Epiphaneia 30 M. P. east of Anazarbus ANAZARBUS], and the same distance from Alexandria ad Issum. If Ptolemy's figures are right (v. 8), we may collect that he supposed Epiphaneia to be near the place which he calls the Amanicae Pylae. It is mentioned by Ammianus (xxii. 11), but he gives no information as to its position.

2. Stephanus (*s. v.*) mentions an Epiphaneia in Bithynia. [G. L.]

EPIRUS [EPEIROS.]

EPITA'LIUM (Ἐπιτάλιον: *Eth.* Ἐπιταλιεύς), a town of Triphylia in Elis, near the coast and a little south of the river Alpheius. It was identified with the Homeric THRYON (Θρύον) or THRYOESSA (Θρυόεσσα), a town in the dominions of Nestor, which the poet describes as a place upon a lofty hill near the ford of the river Alpheius (Hom. *Il.* ii. 592, xi. 710, *Hymn. in Apoll.* 423; Strab. viii. p. 349.) Epitalium was an important military post, because it commanded the ford of the Alpheius and the road leading along the coast. Like the other dependent townships of Triphylia, it revolted from Elis when Agis, the Spartan king, invaded the country in B. C. 401; and when Agis returned home, after ravaging Elis, he left a garrison in Epitalium. (Xen. *Hell.* iii. §§ 25, 29.) The town was taken by Philip in the Social War, B. C. 218. (Polyb. iv. 80; Steph. B. *s. v.* Ἐπιτάλιον.) It appears to have occupied the height of *Agulenitza*. (Leake, *Morea*, vol. ii. p. 198, seq.; Boblaye, *Recherches*, &c. p. 133; Curtius, *Peloponnesos*, vol. ii. p. 88.)

EPOISSUM, in North Gallia, is placed by the Antonine Itin. on the road from Durocortorum (*Reims*) to Treveri Civitas (*Trier*). It is 22 Gallic leagues from Durocortorum to Vungus Vicus (*Vonc*), and 22 more to Epoissum (*Iptsch* or *Ivois*), now commonly called *Carignan*. *Iptsch* is the German name, which comes from Evosium or Ivosium, the name used in the middle ages. In the Notitia Imp. the place is called Epusum, and was a station for troops. [G. L.]

EPOMEUS MONS. [AENARIA.]

E'PORA (*Montoro*), a city of Hispania Baetica, on the Baetis, 28 M. P. east of Corduba, on the road to Castulo. (*Itin. Ant.* p. 403; Caro, *Ant. Hisp.* iii. c. 22; Inscr. ap. Gruter, p. 105, No. 2; Ukert, vol. ii. pt. 1, p. 379.) [P. S.]

EPOREDIA (Ἐπορεδία: *Ivrea*), an important town of Cisalpine Gaul, situated at the foot of the Alps, on the river Duria, just at the entrance of the great valley of the Salassi, now called the *Val d'Aosta*. It was a Roman colony, founded, as we learn from Velleius, as early as B. C. 100 for the purpose of keeping the Salassi in check, and protecting the plains from their incursions; but it was not till that people had been finally subdued under Augustus that it was able to rise to prosperity. (Vell. Pat. i. 15; Strab. iv. p. 205.) Neither Pliny nor Ptolemy gives it the title of a colony, but it certainly was a place of wealth and importance, and is mentioned by Tacitus among the most considerable provincial towns of the region north of the Padus ("firmissima Transpadanae regionis municipia," Tac. *Hist.* i. 70). Pliny tells us that it was founded according to the directions of the Sibylline books, and that its name was derived from a Gaulish word signifying "a tamer of horses." Velleius is certainly in error in placing it among the Vagienni; Ptolemy correctly assigns it to the Salassi. (Plin. iii. 17. s. 21; Ptol. iii. 1. § 34.) We learn from the Itineraries that it was distant 33 miles from Vercellae. (*Itin. Ant.* pp. 345, 347.) The strength of its position at the entrance of the *Val d'Aosta*, commanding two of

Digitized by Google

the most frequented passes of the Alps, must always have given it importance in a military point of view. Thus we find that it was for some time occupied by D. Brutus after the battle of Mutina, B. C. 43. before he crossed the Alps with his army. (Cic. *ad Fam.* xi. 20, 23.) It was still a considerable town, and occupied as a military station by a body of troops, as late as the close of the 4th century. (*Not. Dign.* ii. p. 121.) The modern city of *Ivrea* is a considerable place, with near 8000 inhabitants: it contains a fine Roman sarcophagus, and some other ancient remains. [E. H. B.]

EQUA'BONA (*Coyna*), a town of Lusitania, on the left bank of the estuary of the Tagus, 12 M. P. from Olisipo (*Lisbon*), on the road to Emerita. (*Itin. Ant.* p. 416.) [P. S.]

EQUUS TUTICUS or EQUOTUTICUS (Τούτικον, Ptol. iii. 1. § 67: *S. Eleuterio*), a town of the Samnites in the territory of the Hirpini, situated on the Via Appia Trajana, 21 M. P. from Beneventum. Its name is not mentioned as an ancient Samnite city, and the first notice of it that occurs is an incidental one in Cicero (*ad Att.* vi. 1. § 1), from which we may infer that it was on the road to Brundusium. This is confirmed by the Itineraries, in all of which it appears under slight modifications of name (Equus Tuticus, *Itin. Ant.* pp. 103, 112; Equus Magnus, *Itin. Marit.* p. 610; Aequus Tuticus, *Tab. Peut.*). Great discrepancy has arisen concerning its position, partly from a confusion between the different branches of the Via Appia, which separated at Beneventum [VIA APPIA], and partly from the belief, originating with an old Scholiast on the passage, that Equotuticus (as he writes the name) was the place described by Horace (*Sat.* i. 5. 87) as

"Oppidulum quod versu dicere non est."

But it is quite clear that the poet followed a different line of route; and Equus Tuticus is placed by the Itineraries on the road from Beneventum to Aecae (*Troja*), 21 M. P. from the former city. The line of the ancient road may be traced distinctly (by the assistance of bridges, milestones, &c.), from *Benevento*, by *Buonalbergo* and *Casalbore*, to a place called *S. Eleuterio*, about 8 miles N. of *Ariano*, and 2 from *Castel Franco*, where inscriptions and other ancient remains have been found; among others, a Roman milestone which wants the numerals, but the distance agrees exactly with the 21 miles of the Itinerary from Beneventum. The intermediate station of Forum Novum (Forno Novo, *Itin. Hier.* p. 610), placed by the Jerusalem Itinerary 10 miles from Beneventum, and 11 from Equus Tuticus, must have been at *Buonalbergo*. (Mommsen, *Topografia degli Irpini*, in *Bullett. d. Inst.* 1847, p. 170, 1848, pp. 7, 8.) It is probable that Equus Tuticus never enjoyed municipal rank: its name is not found in Pliny among the towns of the Hirpini, and at a later period it was certainly annexed to the territory of Beneventum. (Mommsen, *l. c.* p. 170.) This explains the expression of the Itinerary that it was on the confines of Campania ("Equotutico, ubi Campania limitem habet," *Itin. Ant.* p. 111. See the art. CAMPANIA, p. 494). If the Tuticum of Ptolemy be the same with Equus Tuticus, he has altogether misplaced it. [E. H. B.]

ERACTUM (Ἤρακτον, Ptol. iii. 5. § 30), a town on the frontier of Dacia between the Tyras and the mountains of the Bastarnae, the position of which cannot be made out. [E. B. J.]

ERAE (Ἔραι), a place on the coast of Ionia, mentioned by Thucydides (viii. 19), in the vicinity of Lebedus and Teos. It was fortified strong enough to keep out the Athenians, who attacked it. (Thuc. viii. 20.) Strabo (p. 644) mentions Erae as a small town belonging to Teos; but though the reading Ἔραι has been received into some texts of Strabo, some of the MSS. are said to have Γέραι, and Casaubon has kept that reading in his text. (See Groskurd, *Transl. Strab.* vol. iii. p. 23, note.) There seems some confusion about the name Gerae, Geraidae (Strabo), and the harbour Geraesticus (Liv. xxxvii. 27), on which Groskurd's note may be consulted. Palmerius conjectured that the name Erae, which he takes to be the true name of the place, is corrupted into Agra in Scylax (p. 37). Cramer (*Asia Minor*, c. 26) supposed the modern site of Gerae to be *Segigeck* (as he writes it), 8 hours from Smyrna. There is a view of the place in the "Ionian Antiquities." Chandler describes some remains of antiquity there. Some of the inscriptions found at this place were published by Chishull and some by Chandler. *Segigeck* is at the head of a fine bay. There is a good note on Gerae in the French edition of Chandler's Travels (vol. i. p. 420).

Hamilton (*Researches*, &c. vol. ii. p. 11) describes *Sighajik* as a snug harbour, and he seems to conclude correctly that it is Livy's Geraesticus, which Livy describes as the port of Teos "qui a tergo urbis est," and thus distinguishes it from the harbour, "qui ante urbem est." (Liv. xxxvii. 27.) The consideration of the inscriptions found at *Sighajik* belongs to the article TEOS. If we suppose Gerae to be the true reading in Strabo, we may identify Gerae and Geraesticus; but there is a difficulty about Erae in Thucydides, for his text does not enable us to determine exactly where it is, though it seems to have been not far from Teos. Proper names are not always right in the text of Thucydides, and this is probably one example. [G. L.]

ERANA (ἡ Ἔρανα), a town in Messenia, mentioned by Strabo as lying upon the road between Cyparissia and Pylos. It was, probably, near the promontory Cyparissium. According to Strabo, it was erroneously identified by some with the Homeric Arene. (Strab. viii. pp. 348, 361; Leake, *Morea*, vol. i. p. 426, seq.)

ERANA, a place in Cilicia. Cicero (*ad Fam.* xv. 4), after leaving Epiphaneia [EPIPHANEIA], ascended the Amanus, and he took Erana, a place not of the character of a village, but of a city, and the capital of the nation. He also took Sepyra and Commoris. The sites of these places are unknown, but they were in eastern Cilicia, on some part of Mount Amanus. [G. L.]

ERANNABOAS (Ἐρανναβόας, Arrian. *Ind.* 4; Plin. vi. 18. s. 22), a river which flowed into the Ganges at Palimbothra (*Patna*). There has been much discussion as to what river is indicated by this name. It seems, however, most likely that it is the same as the Sonus (*Soane*), though Arrian and Pliny both speak of two rivers which they call respectively Erannoboas and Sonus. The name is derived from the Sanscrit *Hyranyavāhas*, the poetical title of the Sonus. (See Ritter, *Erdkunde*, v. p. 508; Rennell, *Mem. in Hindostan*, p. 50.) It is clear, from the context, that Strabo knew of the existence of this river (xv. p. 702), though he does not mention its name. [V.]

ERAVISCI. [ARAVISCI.]

ERBESSUS or HERBESSUS (Ἔρβησσός, Pol., Steph. B., Ptol.; Ἕρβησσός, Diod.; Herbessus, Liv., Sic., Plin.: *Eth.* Ἐρβησσῖνος, Philist. ap. Steph. B., Herbessensis), the name of two cities in Sicily. It has been frequently attempted to limit the name of Erbessus to the one, and Herbessus to the other; but this distinction cannot be maintained, and the aspirated or unaspirated forms appear to be used indiscriminately.

1. A town or fortress not far from Agrigentum, which was made use of by the Romans during the siege of that city, B. C. 262, as a place of deposit for their provisions and military stores. (Pol. i. 18.) At a later period of the siege, Hanno the Carthaginian general made himself master of the place, and was thus enabled to reduce the Romans to great difficulties by cutting off their supplies. (Pol. *l. c.*) But after the fall of Agrigentum the Carthaginians were no longer able to maintain possession of Erbessus, which was abandoned by the inhabitants, probably from fear of the Roman vengeance. (Diod. xxiii. 9. p. 503.) These are the only notices which appear to refer to the town in question; it was probably a place of inferior importance, and a mere dependency on Agrigentum. Its exact site cannot be determined; but Fazello is probably right, in regard to its general position, in placing it near the upper course of the Halycus.

2. A city in the E. of Sicily, on the confines of the territories of Leontini and Syracuse. It was evidently a place of more importance than the preceding one, and may therefore be fairly assumed to be the place meant where no further designation is added. It is first mentioned in B. C. 404 as a city of the Siculi, which had furnished assistance to the Carthaginian army during the siege of Syracuse, and was in consequence one of the first places against which Dionysius turned his arms after the conclusion of peace with Carthage. (Diod. xiv. 7.) But the sudden defection of his own troops recalled him in haste to Syracuse; and some years after we find Erbessus still maintaining its independence, and concluding a treaty with Dionysius. (Id. *ib.* 78.) No further notice of it is found till the time of Agathocles, when it was occupied by that tyrant with a garrison, which in B. C. 309 was expelled by the citizens with the assistance of the Agrigentines and their allies under Demodicus. (Id. xx. 31.) In the Second Punic War Erbessus is again mentioned; it was the place to which Hippocrates and Epicydes fled for refuge from Leontini, and from whence they succeeded in exciting the defection first of the Syracusan force sent against them, and ultimately of the city itself. (Liv. xxiv. 30, 31; Pans. vi. 12. § 4.) Erbessus on this occasion espoused the Carthaginian alliance, but was soon recovered by Marcellus. (Id. 35.) We have no account of its fortunes under the Roman rule, but was probably a mere dependency of Syracuse, as its name is not once mentioned by Cicero. The Herbessenses, however, reappear in Pliny as an independent community; both he and Ptolemy place them in the interior of the island, but afford no further clue to the position. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 13; Philist. ap. Steph. B. *s. v.*)

From the passages of Diodorus and Livy it is clear that Erbessus was situated inland from Syracuse, and not very remote from Leontini: hence the site suggested by Fazello at a place called *Pantalica*, opposite to *Sortino*, about 16 mile W. of Syracuse, is at least a plausible conjecture. The site in question is now wholly desolate, and retains no ruins, but presents a curious assemblage of subterranean dwellings excavated in the cliffs of solid but soft calcareous rock, similar to those in the *Val d'Ispica* near *Modica*. The date of these excavations is very uncertain, though they are generally regarded as of great antiquity. (Fazell. *de Reb. Sic.* x. 2. p. 454; Amic. *Lex. Top. Sic.* vol. ii. p. 176.) [E. H. B.]

ERCTA or ERCTE (ἡ Ἕρκτη, Pol.; Ἔρκτη, Diod.), a mountain on the N. coast of Sicily, in the immediate neighbourhood of Panormus, now called *Monte Pellegrino*. It is a remarkable isolated mountain mass, rising to the height of 1950 feet above the sea, which washes its foot on the E. and N., while on the other two sides it rises abruptly from the plain near Panormus, a broad strip of which separates it entirely from the mountains on the W. of that city. It thus constitutes a kind of natural fortress, being bounded on three sides by lofty perpendicular cliffs, the only approach being on the S. side, facing the town of *Palermo*, where a steep zigzag road has been constructed in modern times, leading up to the convent of *Sta. Rosalia*, near the summit of the mountain, a shrine now visited by crowds of pilgrims, whence the name of *Monte Pellegrino*. No mention is found of the locality before the time of Pyrrhus, when it was occupied by the Carthaginians as a fortress or fortified post, but was taken by assault by the Epeirot king. (Diod. xxii. 10, Exc. H. p. 498.) Its chief celebrity, however, dates from the First Punic War, towards the

close of which Hamilcar Barca, finding himself unable to keep the field against the Romans, suddenly established himself with his whole army in this mountain fortress, where he maintained himself for nearly three years, in spite of all the efforts of the Romans to dislodge him. A Roman camp was established about 5 stadia from Panormus, for the purpose of covering that city, which was scarcely more than a mile and a half from the foot of the mountain. Hamilcar on his part fortified the only available approach, and skirmishes took place almost daily between the two armies. Polybius has left us a detailed and accurate account of the peculiar character of the locality; but he overrates its extent when he reckons the summit of the mountain as not less than 100 stadia in circuit. The upper part of it, he tells us, was capable of cultivation, and possessed abundance of fresh water; while it commanded a small but secure port, which enabled Hamilcar to carry on his maritime expeditions, with which he ravaged the coasts both of Sicily and Italy. (Pol. i. 56, 57; Diod. xxiii. 20, Exc. H. p. 506.) The determination of this port is the only topographical difficulty connected with Ercte. Arnold (*Hist. of Rome*, vol. ii. p. 613) supposes it to have been the small bay of *Mondello*, between *Monte Pellegrino* and *Capo di Gallo*; but this could hardly have been effectually commanded from Ercte, and it is more probable that the small cove of *Sta. Maria*, on the E. side of the mountain, is the one meant. Polybius speaks of the mountain being accessible at three points only; but two of these must have been mere paths, very steep and difficult. Besides the approach from *Palermo*, there are in fact only two breaks in the line of cliffs, one of which leads directly down to the cove of *Sta. Maria*. The accompanying plan (copied from Capt. Smyth's survey), and other view, will give a clear idea of the nature of the mountain fortress. (Cluver. *Sicil.* p. 277; Amm. *Fazell.* vii. 6. p. 318; Swinburne's *Travels*, vol. i. p. 209, &c.)

Mannert has erroneously transferred the site of Ercte to the headland now called *Capo S. Vito*, nearer to Eryx and Drepana than to Panormus: but Polybius's testimony to its close proximity to the latter town is perfectly distinct. [E. H. B.]

VIEW OF MOUNT ERCTA.

ERDINI, in Ireland, mentioned by Ptolemy as occupants of the western side of Ireland next to the Venniani (*Donegal*), and north of the *Nagnat* (Connaught) = the parts about Loch *Erne* = *Fermanagh*. [R. G. L.]

EREBINTHODES, an island in the Propontis, which Pliny mentions with Elaea and other unknown islets. [ELAEA.] [G. L.]

ERESUS or ERESSUS (Ἔρεσος: *Eth.* Ἐρέσιος, Ἐρεσιεύς), so called from Eresus the son of Macar. (Steph. B. *s. v.*) Eressus, as it is in the text of Strabo (p. 618), was a city of Lesbos, situated on a hill, and reaching down to the sea. From Eressus to Cape Sigrium is 28 stadia, as the MSS. have it, which Casaubon (ed. Strab.) has changed to 18. It was on the west side of the island, and its ruins are said to be at some little distance from a place now called *Eresso*, which is situated on a hill. Eressus joined Mytilene and other towns in Lesbos in the revolt from the Athenians during the Peloponnesian War (B. C. 428); but it was compelled to surrender to Paches, the Athenian commander, shortly after. (Thuc. iii. 25, 35.) There was a fresh revolt from Athens (B. C. 412), and a fresh subjugation. (Thuc. viii. 23.) It revolted a third time shortly after (Thuc. viii. 100), and was besieged by Thrasybulus with an Athenian force, but he was obliged to give up the siege to follow the Peloponnesians to the Hellespont. In B. C. 392 Thrasybulus lost many ships in a storm off Eresus, but he recovered the town, with other places in Lesbos, for the Athenians. (Diod. xiv. 94.) Eresus is mentioned by Pliny (v. 31) as one of the existing cities of Lesbos.

Eresus was the birthplace of Tyrtamus, to whom his master Aristotle gave the name of Theophrastus. Phanias, another of Aristotle's pupils, was also a native of Eresus. According to the poet Archestratus, in his Gastronomia, quoted by Athenaeus (iii. p. 111), if ever the gods eat flour, they send Hermes to buy it at Eresus.

The name of the town on the coins is said to be always ΕΡΕΣΙΩΝ, with one Σ. [G. L.]

ERETRIA. 1. (Ἐρέτρια: *Eth.* Ἐρετριεύς, fem. Ἐρετρίς, Ἐρετριάς: *Adj.* Ἐρετρικός, Ἐρετριακός), one of the most ancient, and next to Chalcis the most powerful city in Euboea, was situated upon the western coast of the island, a little south of Chalcis, and at the south-western extremity of the extensive and fertile plain of Lelantum. The Eretrians are represented as Ionians (Herod. viii. 46), and were supposed to have come from Eretria in Attica. (Strab. viii. p. 447; respecting the Attic Eretria, see ATHENAE, p. 294.) It seems, however, that the population was not purely Ionic, and, accordingly, some writers related that it had been colonised from the Triphylian Macistus in Elis. (Strab. *l. c.*) Strabo relates that it was formerly called Melaena and Arotria.

At an early period Eretria was one of the chief maritime states in Greece, and attained a high degree of prosperity and power. Andros, Teos, and Ceos, as well as other islands, were at one time subject to Eretria. (Strab. viii. p. 448.) According to some accounts, they took part in the colonisation of Cromae [CROMAE, p. 716], and they founded some colonies upon the peninsula of Chalcidice. Eretria is mentioned by Homer. (*Il.* ii. 537.) The inhabi-

Digitized by Google

ity strength of the state was attested by an inscription, preserved in the temple of the Amarynthian Artemis, about a mile from the city, recording that in the procession to that temple the Eretrians had been accustomed to march with 3000 hoplites, 600 horsemen, and 60 chariots. (Strab. *l. c.*)

Eretria and Chalcis were early engaged in war with each other. These wars seem to have been occasioned by disputes respecting the division of the plain of Lelantum, which lay between the two cities. (Strab. *l. c.*) In one of these early wars some of the most powerful states of Greece, such as Miletus and Samos, took part. (Thuc. i. 15; Herod. v. 99; Buttmann, ad Callim. *Del.* 289.) In gratitude for the assistance which the Eretrians had received on this occasion from Miletus, they sent five ships to the Athenian fleet which sailed to support Miletus and the other Ionic cities in their revolt from Persia, B.C. 500. (Herod. *l. c.*) But this step caused their ruin; for, in B.C. 490, a Persian force, under Datis and Artaphernes, sent to punish the Athenians and Eretrians, laid siege to Eretria, which was betrayed to the Persians after they had invested the place for six days. The town was razed to the ground, and the inhabitants carried away to Persia; but their lives were spared by Darius, who allowed them to settle in the Cissian territory. (Herod. vi. 25.) The old town continued in ruins, but a new town was rebuilt a little more to the south, which soon became a place of considerable importance. In B.C. 411, the Athenians were defeated by the Spartans in a sea-fight off the harbour of Eretria; and those of the Athenians who took refuge in Eretria, as a city in alliance with them, were put to death by the Eretrians, who therefore joined the revolt of the Euboeans in their revolt from Athens. (Thuc. viii. 95.)

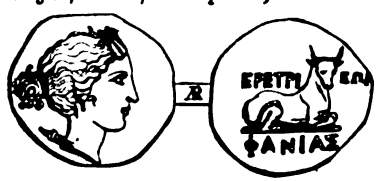
After the Peloponnesian War we find Eretria in the hands of tyrants. One of these, named Themison, assisted the exiles of Oropus in recovering possession of their native city from the Athenians in B.C. 366. (Diod. xv. 76; comp. Dem. *de Cor.* p. 256; Xen. *Hell.* vii. 4. § 1.) Themison appears to have been succeeded in the tyranny by Plutarchus, who applied to the Athenians in B.C. 354 for aid against his rival, Callias of Chalcis, who had allied himself with Philip of Macedon. The Athenians sent a force to his assistance under the command of Phocion, who defeated Callias at Tamynae; but Phocion, suspecting Plutarchus of treachery, expelled him from Eretria. [See *Dict. of Biogr.* vol. i. p. 429.] Popular government was then established; but shortly afterwards Philip sent a force, which destroyed Porthmus, the harbour of Eretria, and made Cleitarchus tyrant of the city. Cleitarchus governed the city in Philip's interests till B.C. 341, when Cleitarchus was expelled by Phocion, who had been sent into Euboea on the proposition of Demosthenes for the purpose of putting down the Macedonian interest in the island. [*Dict. of Biogr.* vol. i. p. 784.] Eretria was subsequently subject to Macedonia; but in the war with Philip V. it was taken by the combined fleets of the Romans, Attalus, and Rhodians, upon which occasion a great number of paintings, statues, and other works of art fell into the hands of the victors. (Liv. xxxii. 16.) After the battle of Cynoscephalae, Eretria was declared free by the Roman senate. (Polyb. xviii. 30.)

Eretria was the seat of a celebrated school of philosophy founded by Menedemus, a native of this city, and a disciple of Plato. [*Dict. of Biogr.* vol. ii. p. 1037.] The philosophers of this school were called Eretrici (Ἐρετρικοί, Strab. x. p. 448; Diog. Laërt. i. 17, ii. 126; Athen. ii. p. 55, d.; Cic. *Acad.* ii. 42, *de Orat.* iii. 17, *Tusc.* v. 39.) The tragic poet Achaeus, a contemporary of Aeschylus, was a native of Eretria. It appears from the comic poet Sopater that Eretria was celebrated for the excellence of its flour (ap. Athen. iv. p. 160).

Strabo says that Old Eretria was opposite Oropus, and the passage across the strait 60 stadia; and that New Eretria was opposite Delphinium, and the passage across 40 stadia (ix. p. 403). Thucydides makes the passage from Oropus to New Eretria 60 stadia (viii. 95). New Eretria stood at *Kastri*, and Old Eretria in the neighbourhood of *Vathý*. There are considerable remains of New Eretria. "The entire circuit of the ruined walls and towers of the Acropolis still subsist on a rocky height, which is separated from the shore by a marshy plain. At the foot of the hill are remains of the theatre, and in the plain a large portion of the town walls, with many foundations of buildings in the inclosed place. The situation was defended to the west by a river, and on the opposite side by a marsh." (Leake, *Northern Greece*, vol. ii. pp. 443, 445.)

The territory of Eretria extended from sea to sea. Between Old Eretria and New Eretria was AMARYNTHUS; south of Old Eretria, TAMYNAE; and further south, PORTHMUS. In the interior were DYSTUS and OECHALIA.

The annexed coin represents on the obverse the head of Artemis, who was worshipped in the neighbouring town of Amarynthus: the bull on the reverse probably has reference to the brazen bull which the Eretrians dedicated at Olympia. (Paus. v. 27. § 9; Eckhel, vol. ii. p. 324.)



COIN OF ERETRIA IN EUBOEA.

2. A town of Thessaly, in the district Phthiotis, near Pharsalus. It was here that Quintius Flamininus halted at the end of the first day's march from Pherae towards Scotussa, in B.C. 197. Leake places it at the village of *Tjangli*, where he found the ruined walls of an ancient city. "A long and narrow table-summit formed the citadel, of which the lower courses of the walls still exist in their whole circuit. The town walls are still better preserved, and are extant in some parts on the eastern side to the height of 18 or 20 feet. Here also are two door-ways still perfect." (Strab. ix. p. 434, x. p. 447; Polyb. xviii. 3, Liv. xxxiii. 6, xxxii. 13; Steph. B. *s. v.* Ἐρέτρια; Leake, *Northern Greece*, vol. iv. p. 466.)

ERE'TUM (Ἤρητον: *Eth.* Ἠρητῖνος: *Grotta Marozza*), a town of the Sabines, situated on the Via Salaria, at its junction with the Via Nomentana, a short distance from the Tiber, and about 18 miles from Rome. From the mention of its name by Virgil among the Sabine cities which joined in the war against Aeneas (*Aen.* vii. 711), we may presume that it was considered as an ancient town, and one of some importance in early times; but it never bears

Digitized by Google

any prominent part in history, though from its position near the frontiers of the Sabine and Roman territories, and on the line by which the former people must advance upon Rome, it was the scene of repeated conflicts between the two nations. The first of these occurred in the reign of Tullus Hostilius, during the war of that monarch with the Sabines (Dionys. iii. 32); his successor Tarquinius Priscus also defeated the Etruscans, who had taken advantage of the friendly disposition of the Sabines to advance through their territory, at Eretum (Id. iii. 59, iv. 3); and Tarquinius Superbus gained a decisive victory over the Sabines in the same neighbourhood. (Id. iv. 51.) Under the Roman republic also we find two victories recorded over the Sabines at the same place, the one by the consuls Postumius and Menenius in B.C. 503, the other by C. Nautius in B.C. 458. (Id. v. 46; Liv. iii. 29.) During the decemvirate also the Sabines established their headquarters at Eretum, from whence they ravaged the Roman territory. (Liv. iii. 38; Dionys. xi. 3.) It is again mentioned in the Second Punic War as the place from whence Hannibal diverged to attack the shrine of Feronia in Etruria, during his advance on Rome (or, according to others, on his retreat) by the Salarian Way. (Liv. xxvi. 11.) But though its position thus brings it frequently into notice, it is clear that it was, under the Roman dominion at least, a very inconsiderable place. Strabo says it was little more than a village, and Valerius Maximus terms it "vicus Sabinae regionis." Pliny does not even mention it among the towns of the Sabines, nor is its name found in the Liber Coloniarum: hence it is almost certain that it did not enjoy municipal privileges, and was dependent on one of the neighbouring towns, probably Nomentum. But its name is still found in the Itineraries as a station on the Salarian Way, and it must therefore have continued to exist as late as the fourth century. From this time all trace of it disappears. (Strab. v. p. 228; Val. Max. ii. 4. § 5; *Itin. Ant.* p. 306; *Tab. Peut.*) The position of Eretum has been a subject of much dispute, though the data furnished by ancient authorities are sufficiently precise. The Itineraries place it 18 miles from Rome; and Dionysius in one passage (xi. 3) calls it 140 stadia (17½ miles) from the city, though in another place (iii. 32) he gives the same distance at only 107 stadia. Strabo adds that it was situated at the point of junction of the Via Salaria and Via Nomentana; a circumstance which could leave no doubt as to its position, but that there is some difficulty in tracing the exact course of the Via Salaria, which appears to have undergone repeated changes in ancient times. [VIA SALARIA.] Hence Chaupy was led to fix the site of Eretum at a place called *Rimane*, where there were some Roman ruins near a bridge called the *Ponte di Casa Cotta*, but this spot is not less than 21 miles from Rome; on the other hand, *Monte Rotondo*, the site chosen by Cluverius, is little more than 15 miles from Rome, and could never by possibility have been on the Via Nomentana. The hill now known as *Grotta Marozza*, on the left hand of the Via Nomentana, rather more than 3 miles beyond Nomentum, has therefore decidedly the best claim: it is, according to Nibby, by actual measurement 17½ miles from Rome, and it is probable that the ancient Via Salaria did not follow the same line with the modern road of that name, but quitted the valley of the Tiber near *Monte Rotondo*, and joined the Via Nomentana near the spot above indicated. There are no ruins at *Grotta Marozza*, but the site is described as well-adapted for that of a town of small extent. (Cluver. *Ital.* p. 667; Chaupy, *Maison d'Horace*, vol. iii. pp. 85—92; Nibby, *Dintorni di Roma*, vol. ii. pp. 143—147; Gell, *Top. of Rome*, p. 202.) At a short distance from this hill are some sulphureous springs now known as the *Bagni di Grotta Marozza*, which are in all probability those anciently known as the AQUAE LABANAE, the Λαβανὰ ὕδατα of Strabo, who describes them as situated in the neighbourhood of Eretum. (Strab. v. p. 238.) [E. H. B.]

ERE'ZII, are placed by Pliny (v. 30) in Mysia and thus mentioned: "Apolloniatae a Rhyndaco amne, Erezii, Miletopolitae;" from which we conclude that the place was about Apollonia and Miletopolis. It is remarked (Plin. *H. N.* ed. Hard. *Notae* &c. ad lib. v. no. lxxxiv.) that all the MSS. of Pliny have Eresii. The correction seems probable enough for the reasons there given. The Table has a town Argesis on the road from Pergamum to Cyzicus, and 35 from Pergamum. Cramer (*Asia Minor*, vol. i. p. 58) considers this the same place as the Argiza of Hierocles (*Synecd.* p. 663), which seems probable. He would also identify it with Pliny's Erezii, which may be true, but is not quite so certain. [G. L.]

ERGA. [ILERGETES.]

ERGASTE'RIA, a place in Mysia, on the road from Pergamum to Cyzicus, and 440 stadia from Pergamum. "Galen, in proceeding to Ergasteria from Pergamum, remarked a great quantity of metallic substance, which he calls molybdaena. Gal. *de Medicam. Simp.* ix. 22." (Leake, *Asia Minor*, p. 271.) [G. L.]

ERGAVICA. [CELTIBERIA.]

ERGE'TIUM (Ἐργέτιον: *Eth.* Ἐργέτινος), a city of Sicily, mentioned by Stephanus of Byzantium (*s. v.*) on the authority of Philistus. No mention of it is found in history, but the Ergetini are enumerated by Pliny among the inland towns of Sicily of stipendiary condition. (Plin. iii. 8. s. 14.) It is evidently the same place called by Silius Italicus (xiv. 250) Ergētum, where the MSS. give the variations Ergentum and Hergentum, and this renders it probable that the Sergentium (Σεργέντιον) of Ptolemy (iii. 4. § 13) is only another form of the same name. The site assigned by this last author would agree fairly well with that of a place called *La Cittadella*, at the foot of the lofty hill now crowned by the town of *Aidone*. According to Fazello, considerable ruins of an ancient city were in his time visible on this spot, which he erroneously identifies with those of Herbita. (Fazell. x. 2. p. 445; Cluver. *Sicil.* p. 338.) [E. H. B.]

ERGI'NUS (Ἔργινος), a tributary of the river Hebrus in Thrace, the modern *Erkene*. (Apollon. Rhod. i. 217; Pomp. Mel. ii. 2; Plin. iv. 18.) This seems to be the same river as the one called by some authors *Regina* (Ῥηγῖνα; Leo Armen. p. 434; comp. also Strab. vii. p. 331). [L. S.]

ERGISCE (Ἐργίσκη), a town of Thrace, apparently in the neighbourhood of Doriscus, but its site is unknown. (Aeschin. *in Ctes.* p. 396, ed. Reiske; Dem. *de Cor.* p. 234, *de Halon.* p. 85.)

ERIBOEA. [ERIBOLUM.]

ERIBOLUM or ERIBOLUS (Ἐρίβολον, Dion Cass.; Ἐριβοία, Ptol. v. 1) is placed by the Table, under the name of Eribulo, south of the bay of Astacus, with the numeral XII., and north of Nicaea. It is Hyribolum in the Jerusalem Itin. Leake, in

Digitized by Google

his map of Asia Minor, places it, under the name of Eriboea, at the head of the gulf of Astacus, which agrees with Dion Cassius (Epit. Xiph. lxviii. 39), who speaks of it as a naval station opposite to Nicomedia. According to some authorities, the site is *Karamusal*; others call the site *Erekli* or *Eregli*. The figure of a house in the Table indicates a town, perhaps with warm springs. [G. L.]

ERICI'NIUM, a town of Perrhaebia in Thessaly, situated near the frontiers of Histiaeotis. Its site is uncertain, but Leake conjectures that it stood at *Lefkhero-khóri*, though there are no ancient remains at this place. (Liv. xxxvi. 13, xxxix. 25; Leake, *Northern Greece*, vol. iv. p. 315.)

ERICUSA [Aeoliae Insulae.]

ERI'DANUS (Ἠριδανός) was the name given by the Greeks to the Padus or Po, the great river of Northern Italy. The appellation was adopted from them by the Roman poets, and hence is occasionally used even by Latin prose writers. (Virg. *Georg.* i. 481; Ovid. *Met.* ii. 324; Propert. i. 12. 4; Martial, ii. 67. 2; &c.) But there is good reason to believe that the name was not in the first instance applied to the Padus, but belonged to quite a different region of Europe, and was some time before it acquired the signification in which it was afterwards employed. The name of the Eridanus appears in the earliest Greek authorities inseparably connected with the well-known fable of the sisters of Phaethon, and the river that wept tears of amber. This myth appears to have been already known to Hesiod (Hygin. 154; Hesiod, *Fr.* 184. ed. Markscheffel), who in his extant works notices the Eridanus among the Greek rivers of the world (*Theog.* 338): but we have no idea of the geographical position which he assigned it. The current opinion in the days of Herodotus appears to have been that the Eridanus was a river in the more westerly regions of Europe, but flowing into the sea in the north of that continent. (Herod. iii. 115.) The historian, however, rejects this notion, and treats with the name and existence of the Eridanus as a mere fiction of the Greek poets: a view adopted at a much later period by Strabo (v. p. 215). The ignorance of the notions entertained concerning its situation is further proved by the fact that, according to Pliny, Aeschylus spoke of the Eridanus as a river of Iberia, and identified it with the Rhodanus. (Plin. xxxvii. 2. s. 11.) According to Hyginus, Pherecydes was the first who identified the Eridanus with the Padus. (Hygin. 154.) Euripides evidently adopts the same view, as he connects the former river with the shores of the Adriatic (Eur. *Hipp.* 737); and this opinion seems to have become gradually established among the Greeks. Scylax, writing about the middle of the 4th century B. C., distinctly places the river Eridanus in the land of the Veneti, and there is no doubt that the Padus is the river which is meant. (Scyl. p. 6. § 19.) The same view was henceforth adopted by all the geographers except Strabo, who, not choosing to admit the identity of the two rivers, rejects altogether the Eridanus as a mere fiction, as well as the islands of the Electrides, supposed to be situated at its mouth (Strab. v. p. 215; Pol. ii. 16; Scymn. Ch. 391—397; Plin. iii. 16. s. 20, xxxvii. 2. s. 11; Dionys. Per. 289—293; Diod. v. 23; Paus. i. 3. § 6, v. 14. § 3.)

The real fact appears to be, that the name of Eridanus was originally applied by the Greeks to a great river *in the north of Europe*, on the shores of which amber was produced, and of which some vague report had reached them through means of the traders who brought the amber itself from the shores of the Baltic to the head of the Adriatic. It is idle to inquire what the river really meant was; whether the Oder or Vistula, at the mouths of which amber is now found in the greatest quantity, or some other river of the N. of Germany. The name *Eridanus* is evidently closely connected, if not identical, with that of *Rhodanus*, and it is probable enough that *Rhenus* is only another form of the same word. (Latham, *Germania*, p. 13.) Hence, in the vague geographical notions of the early Greeks, one great river was easily confounded with another. Aeschylus, as already mentioned, identified the Eridanus and Rhodanus: while Apollonius Rhodius, writing at a much later period, but evidently following some earlier poet, describes the two rivers as arms of the same great stream, another portion of which flowed into the ocean. (Apoll. Rhod. iv. 596, 627, 628.) Amber appears to have been brought in very early times (as it still was in the days of Pliny) overland from the shores of the Baltic to those of the Adriatic; here it was purchased by the Phoenicians and early Greek traders: whence it came to be regarded, by a very natural error, as a production of the country, and the name of the Eridanus being inseparably connected with the production of amber, the Greeks gave the name to the great river that forms so conspicuous a feature of this part of Italy. The gum-like nature of the substance itself evidently gave rise to the fable of its distilling or exuding from trees, which was afterwards applied by the poets and mythographers to the poplars that adorned the banks of the Padus, now assumed to be the true Eridanus. (Cluver. *Ital.* pp. 390—393; Wernsdorf, *Exc.* ii. *ad Aviem. Or. Marit.*)

The origin and history of the connection between the Eridanus and Padus have been given at some length, on account of its important bearing on the progress of ancient geography: the geographical account of the latter river and its tributaries is given under the head of Padus.

Several ancient writers placed near the mouth of the mythical Eridanus certain islands which they called the Electrides Insulae (Ἠλεκτρίδες νῆσοι), on the shores of which it was said that much amber was found, from whence their name was derived. But as there are in fact no islands in this part of the Adriatic, except those actually formed by the mouths of the Padus, Strabo and Pliny reject altogether the existence of the Electrides as fabulous, while other writers seem to have sought them among the numerous groups of islands which line the opposite shore of the Adriatic. (Strab. v. p. 215; Plin. xxxvii. 2. s. 11.) As much of the amber collected in the Baltic is really found in the islands at the mouths of the great rivers, it is not impossible that some obscure tradition of this fact may have given rise to the name of the Electrides, which were subsequently transferred, together with the Eridanus itself from the Baltic to the Adriatic. [E. H. B.]

ERI'DANUS, a river of Attica, a tributary of the Ilissus. [Attica, p. 323, a.]

ERIGON (Ἐριγών, Strab. vii. pp. 327, 330; Ἐρίγων, Ptol. iii. 13. § 8), the great W. branch of the river Axius, which, having its source in the Paeonian mountains, took a NE. course till its junction with the main stream at no great distance from Stobi. (Liv. xxxix. 53.) It is now called by the Bulgarians *Zrnu Rjeka*, and by the Turks *Kutjuk Kará-Su*. (Comp. Leake, *Northern Greece*, vol. iii. pp. 268, 275.) The geography of the basin of

Digitized by Google

this river is so imperfectly known that its course cannot be traced. [E. B. J.]

ERINEIA (Ἐρίνεια), a town in Megaris, in which was a monument of Autonoë, daughter of Cadmus. As it appears to have stood inland on the northern part of the isthmus, Leake places it at *Kúndura*. (Paus. i. 44. § 5; Leake, *Northern Greece*, vol. ii. p. 408.)

ERI'NEUS or ERI'NEUM. 1. (Ἐρινεός, Ἐρινεόν: *Eth.* Ἐρινεάτης, Ἐρινεεύς), one of the towns of the tetrapolis of Doris, described by Strabo as lying below the town of Pindus: it probably stood upon the river of the latter name. (Strab. viii. p. 362, ix. p. 427; Thuc. i. 107; Scymn. Ch. 591; Ptol. iii. 15. § 15; Steph. B. *s. v.*; Tzetz. *ad Lycophr.* 741; Schol. *ad Pind. Pyth.* i. 121; Mel. ii. 3; Plin. iv. 7. s. 13; Leake, *Northern Greece*, vol. ii. p. 91, *seq.*)

2. (Ἐρινεόν), a town of Phthiotis in Thessaly, mentioned only by Strabo. Its site is uncertain, but Leake conjectures that the remains on the left bank of the Enipeus near *Koklobáshi* may be those of Erineum. (Strab. ix. p. 434; Leake, *Northern Greece*, vol. iv. p. 471).

3. The sea-port of Rhypes in Achaia. [Rhypes.]

ERI'NEUS (Ἐρινεός), a small river on the E. coast of Sicily, between Syracuse and Helorum. It is mentioned by Thucydides (vii. 80, 82), from whom we learn that it was the second river crossed by the Athenians in their disastrous retreat from Syracuse, and intermediate between the Cacyparis and Asinarus. Hence it can be no other than the small stream now called the *Miranda*, which flows into the sea just to the N. of the modern town of *Avola*, and is hence frequently called *Fiume di Avola*. It is distant about 6 miles from the Cacyparis (*Cassibili*), and the same distance from the Asinarus (*Falconara*). (Smyth's *Sicily*, p. 176; Cluver. *Sicil.* p. 184.) It is evidently the same river which is called by Ptolemy (iii. 4. § 8.) Ὄριννος or Ἔρινος. [E. H. B.]

ERISANE. [Lobetani.]

ERI'TIUM, a town of Perrhaebia in Thessaly, appears to have been near Cyretiae, since it was taken along with the latter town by M. Baebius in B. C. 191. (Liv. xxxvi. 13.) Leake places it at *Paleókastro*, a village above *Sykiá*, on the left bank of the *Vúrgaris*, a river of Tripolitis. In the church of St. George, which occupies the site of the ancient Cyretiae, Leake noticed an inscribed stone, on which the name of Apollodorus is followed by a word beginning EPH, which he conjectures with much probability may be the place called Eritium by Livy. (Leake, *Northern Greece*, vol. iv. pp. 310, 313).

ERIZA (τὰ Ἔριζα: *Eth.* Ἐριζηνός). The Roman general Cn. Manlius, after reaching the river Chaus [Chaus], came to Eriza, a city which he took by assault. Livy (xxxviii. 14) does not say what was the time of the march from the Chaus to Eriza; but his narrative shows that Eriza was between the Chaus and the Indus. The Erizeli of Ptolemy (v. 2), it is supposed by some critics, are the Erizeni, and that the name should be written so; but Ptolemy's Erizeli are in a different place. Pliny (x. 43) speaks of a "regio Erizena" in Asia, by which he means the province of Asia. The ethnic name Erizeni appears on a rare medal, which also contains the name KAOC — the river Chaus. We need not infer from this that Eriza was on the Chaus, because there are many instances of towns being thus designated, though they were several miles distant from the river. Eriza became a town of episcopal rank. [G. L.]

ERIZE'LI. [Eriza.]

ERNAGINUM (Ἐρνάγινον), is placed by Ptolemy (ii. 10) among the towns of the Salyes in Gallia Narbonensis. In the Itins. it is the first station from Arelate (*Arles*). Though the distances in the Itins. do not quite agree, the site of the place seems to be *St. Gabriel*. D'Anville states that a marble has been found at *St. Gabriel* with the inscription Ernaginenses. *St. Gabriel* is a hamlet on the road from *Arles* to *Tarascon*. [G. L.]

ERNODU'RUM, a town in Gallia, which the Antonine Itin. places on a road from Burdigala (*Bordeaux*) to Augustodunum (*Autun*). The road passes through Avaricum (*Bourges*); and 13 Gallic leagues from *Bourges*, on the *Bordeaux* side of *Bourges*, was Ernodurum. The next place to Ernodurum, on the *Bordeaux* side, is Argentomagus. The place was called Ernotorum in the middle ages. The termination "durum" indicates a river, and the site of Ernodurum is fixed at *St. Ambroise*, at the junction of the river *Arnon*, a branch of the *Cher*. [G. L.]

ERO'CHUS (Ἔροχος), a Phocian town, destroyed by the army of Xerxes. Its position is uncertain. (Herod. viii. 33.)

ERPEDITANI, in Ireland, another name of the Erdini. [Erdini.] [R. G. L.]

ERU'BRUS, is a small branch of the Moselle, mentioned by Ausonius (*Mosella*, 359):—

"Te rapidus Gelbis, te marmore clarus Erubrus."

The Erubrus is the *Rover*, a small stream that flows into the *Mosel* a little below *Trier*. [G. L.]

ERYMANDRUS or ERYMANTHUS (Ἐρυμάνδρος, Arrian, *Anab.* iv. 6; Ἐρυμανθος, Polyb. v. 32; Plin. vi. 23. s. 25; Curt. viii. 9. § 20), the principal river of Drangiana, which rises in the lower range of the Paropamisan mountains, and, after flowing through Arachosia and Drangiana, enters the lake *Zarah*. Its present name is *Hirmend* or *Helmend*. The name of the river is not given by Ptolemy. M. Burnouf has supposed it to be the Arachotus; but Professor Wilson believes the Arachotus to have been one of the tributaries of the Helmend, and probably the modern *Arkund-ab*. (Wilson, *Ariana*, pp. 156, 157.) Arrian supposed, incorrectly, that it was lost in the sands; he places on its banks a tribe called Energitae, whom Professor Wilson suspects are really the Agriaspae. The modern river is described by Pottinger in his travels in *Baluchistan*. It appears to be of great size, and carries down with it a great body of water. (Pottinger, *Baluchistan*, p. 405.) [V.]

ERYMANTHUS (Ἐρυμανθός), a lofty range of mountains on the frontiers of Arcadia, Achaia, and Elis. It formed the western point of the northern barrier of Arcadia; and Mt. Lampeia, which extends southwards, is a portion of the range. The two principal heights are now called *Olonos* and *Kaloyoni*, the former being 7297 feet above the level of the sea, and the latter 6227 feet. From Erymanthus four rivers rise, — the Eleian Peneius, the Arcadian Erymanthus, and the Peirus and Selemnus of Achaia. The river Erymanthus, which is a tributary of the Achelous, is spoken of under the latter name. [Achelous.] Mount Erymanthus is celebrated in mythology as the haunt of the famous boar destroyed by Hercules. (Strab. viii. pp. 343, 357; Paus. v. 7. § 1, viii. 24. § 4, *seq.*; Hom. *Il.* vi. 104; Apollod. ii. 5; Leake, *Morea*, vol. iii. p.

Digitized by Google

153, *Peloponnesiaca*, pp. 203, 204, 224; Boblaye, *Recherches*, &c. pp. 118, 124; Curtius, *Peloponnesos*, vol. i. pp. 17, 384.).

ERYMNAE (Ἔρυμναι: *Eth.* Ἐρυμναῖος), a town of Lycia, on the authority of the *Lyciaca* of Alexander. (Steph. B. *s. v.*) [G. L.]

ERYTHEIA INSULA. [GADES.]

ERYTHI'NI (Ἐρυθῖνοι), a place on the coast of Paphlagonia, mentioned in the Homeric poems (*Il.* ii. 855). It has been supposed, however, that the whole of the passage on the Paphlagonians and their towns was an interpolation of later times, and that the old poet was unacquainted with the Euxine and its coasts. (Schlegel, *de Geogr. Hom.* p. 135; Ukert, *de Geogr. Myth.* p. 58.) Strabo (xii. p. 545) fixed the position of the town upon two rocks, called, from their colour, Ἐρυθρῶνοι. (Comp. *Anon. Peripl.* p. 6.) It was situated 90 stadia E. of Amastris, and 60 stadia N. of Cromna. [E. B. J.]

ERYTHRAE (Ἐρυθραί: *Eth.* Ἐρυθραῖος), an ancient town in Boeotia, mentioned by Homer, and said to have been the mother-city of Erythrae in Ionia. (Hom. *Il.* ii. 499; Strab. ix. p. 404). It lay a little south of the Asopus, at the foot of Mount Cithaeron. The camp of Mardonius extended along the Asopus from Erythrae and past Hysiae to the territory of Plataea. (Herod. ix. 15, 25.) Erythrae is frequently mentioned by other authorities in connection with Hysiae. It was in ruins in the time of Pausanias. Leake places it to the eastward of *Katzúla* at the foot of the rocks, where are some foundations of Hellenic walls, together with a church containing a Doric column and its capital. (Thuc. iii. 24; Eurip. *Bacch.* 751; Xen. *Hell.* v. 4. § 49, where it is called Ἐρυθρά; Paus. ix. 2. § 1; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 389.)

3. A town of the Locri Ozolae, probably the harbour of Eupalium. (Liv. xxviii. 8; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 618.)

ERYTHRAE (Ἐρυθραί: *Eth.* Ἐρυθραῖος), "a city of the Ionians" (Steph. B. *s. v.*), on the authority of the *Asia* of Hecataeus; to which the compiler adds,—"and it was called Κνωσσόπολις, from Cnopus." Erythrae was one of the Ionian cities. (Herod. i. 142.) According to the legend told by Pausanias (vii. 3. § 7), the place was originally settled by Erythrus, the son of Rhadamanthus, from Crete; and the city was occupied, together with Cretans, by Lycians, Carians, and Pamphylians. While all these people were living together in Erythrae, Cleopus the son of Codrus, having collected from all the cities of Ionia such as he could from each, introduced them into the place, to live with the Erythraei. Strabo (p. 633) has the tradition of Cnopus, an illegitimate son of Codrus, founding Erythrae. According to Casaubon, the MSS. of Strabo have the name "Cnopus," which he would alter to "Cleopus;" but perhaps "Cleopus" in Pausanias should be corrected. Polyaenus (viii. 43) has the story of Cnopus, and how, by a stratagem, he got possession of Erythrae, after killing the inhabitants; a story which has the advantage over that of Pausanias in probability, for we can conceive a general massacre of the original inhabitants of Erythrae and the seizure of their town, better than the story of Cnopus and his men walking in to live together with the original people. Hippias of Erythrae, in the second book of his Histories of his native place, told a story of the murder of Cnopus and the usurpation of his power by Ortyges, and of the extravagant tyranny and violent death of Ortyges; which Athenaeus has preserved (vi. p. 259). The early history of Erythrae, like that of most of the Ionian towns in Asia, was unknown. Strabo, in another place (p. 404), calls it a settlement from Erythrae in Boeotia.

Strabo (p. 644) describes Erythrae as being in the peninsula which he calls the peninsula of the Teians and the Erythraeans. He places the Teians on the south of the isthmus, and the Clazomenii on the north side [CLAZOMENAE]; and the Erythraei dwell within it. The boundary between the Erythraea and Clazomenae was the Hypocremnus. On the south, Erae or Gerae [ERAE] belonged to the Teians. The peninsula lying west of a line drawn from Gerae to Hypocremnus must be supposed to be the Erythraean territory. As we proceed north and west from Gerae we come to Coryeus [CORYCUS; CASYSTES], then another harbour named Erythras; and, after it, several others. After Corycus was a small island, Halonnesus, then Argennum, a promontory of the Erythraea, and the nearest point to Chios. [ARGENNUM.] On the west side of the Erythraean peninsula is a capacious bay, in which Erythrae is situated, opposite to the island of Chios; and there were in front of Erythras four small islands called Hippi. The rugged tract which lies north of a line drawn from Erythrae to the Hypocremnus was called Mimas, a lofty mountain region, covered with forests, and abounding in wild animals. It contained a village, Cybellia, and the north-western point was called Melaena, where there was a quarry for millstones. Pliny describes Mimas as running out "CCL M. P.," which is a great blunder or error in his text, whatever way we take it: he adds that Mimas sinks down in the plains that join it to the mainland; and that this level of 7½ Roman miles Alexander ordered to be cut through by joining the two bays, and so he intended to insulate Erythrae and Mimas. Pliny doubtless found the story somewhere; and possibly among other grand things that the Macedonian king talked of, this may have been one. The rugged insulated territory of the Erythraei produced good wheat and wine.

Herodotus (i. 142) makes four varieties or dialects of language among the Ionians; and the dialect of Chios and Erythrae was the same. The geographical position of Erythrae, indeed, places it among the insular rather than the continental states of Ionia. The neighbourhood of Chios and Erythrae and the sameness of language did not make the people the best friends always, for there is a story of a war between them (Herod. i. 18) at an early period. This may be the war to which Anticleides alluded in his *Nosti* (Athen. ix. p. 384). The Erythraei furnished eight ships to the confederate Ionian fleet which was defeated in the battle before Miletus, B. C. 494 (Herod. vi. 8), but the Chians had 100 ships. Erythrae afterwards became a dependency of Athens, for a revolt of Erythrae is mentioned by Thucydides (viii. 23) B. C. 412, in the twentieth year of the Peloponnesian War.

After the close of the war with Antiochus, the Romans rewarded the Chians, Smyrnaeans, and Erythraeans, with some territory in return for their services on the Roman side. (Liv. xxxviii. 39; Polyb. xxii. 27.) Parium on the Propontis was a colony from Erythrae (Paus. ix. 27. § 1); but Strabo makes it a joint settlement of the Erythraeans, Milesians, and the island of Paros (p. 588.)

Erythrae was famed in ancient times for a wise woman, Sibylla, as Strabo calls her; and in the

Digitized by Google

time of Alexander there was another who had like prophetic gifts, and her name was Athenais. (Comp. Paus. x. 12. § 7; Tacit. *Ann.* vi. 12.) Contemporary with Strabo was Heracleides of Erythrae, a physician of the school of Herophilus. Though Erythrae never was a town of great note, it existed for a long time, and there are coins of Erythrae to a late period of the Roman empire. The coins anterior to the Roman period are said to be very scarce.

The exact position of Erythrae is well ascertained. It is now called *Ritri*, and it stands on the south side of a small peninsula, which projects into the bay of Erythrae. Pliny (v. 29) mentions a stream called Aleos, which he seems to place near Erythrae (xxxi. 2). But the name of the river on the coins of Erythrae is Axus. Erythrae contained a very ancient temple of Hercules, whom the Erythraei worshipped under the name of the Hercules of the Idaei Dactyli; and also the Tyrians, as Pausanias discovered (vii. 5. § 5; ix. 27. § 8). Strabo (p. 613) says, that Hercules Ipoctonos "was worshipped by the Erythraeans who dwell about Melius, for the 'ips' is an insect that damages the vines; and this was the only country that was free from this plague." The name Melius in this passage has been, perhaps, correctly altered to Mimas. There was also a temple of Athena Polias at Erythrae: the goddess was a large wooden figure seated. The remains of Erythrae are described by Chandler (*Asia Minor*, cc. 25, 26.); and lately by Hamilton (*Researches*, &c., vol. ii. p. 6). "It is situated in a small alluvial plain at the mouth of the river Aleus, some of the sources of which are in the town itself. The city faces the west, and the whole extent of the Hellenic walls may be distinctly traced, from the commencement near the harbour, at the southern extremity of the town, to the northern point, where they terminate on a lofty rock of trachyte." (Hamilton.) "The walls are well built in the isodomous style, except a small part of that which traverses the plains, and they consist either of blue marble or red trachyte." There are remains of several gateways, and outside of them also remains of ancient tombs in various styles. Near the chief source of the Aleus there are "many remains of aqueducts, walls, terraces, and foundations of buildings with temples." (Hamilton.) One of these remains is a wall supporting a terrace 38 feet in length, "the lower part of which consisted of a beautiful specimen of cyclopian architecture, the angles of the different blocks being cut very sharp, while upon it was reared a superstructure in the isodomous style, built with great regularity." (Hamilton.) He conjectures that the site may have been that of the temple of Hercules, and that three large Ionic capitals of red trachyte, which were lying in the water-course, may have belonged to it.

The acropolis of Erythrae is within 200 yards of the shore; it is a mass of red trachyte, and stands quite detached in the centre of the plain. The remains of a large theatre are still visible, on the north side of it, excavated in the solid rock. Near the mouth of the Aleus there are some remains of the port, and traces of an aqueduct. The inscriptions copied by Hamilton at *Ritri* are printed in his Appendix, vol. ii. One of the inscriptions that he dug out was the architrave of a door, "on which was a dedication to Minerva or the sibyl Athenais, by a person whose name appears to be Artaxerxes." This is not quite a correct explanation, for the inscription clearly contains a dedication to Athenais Poliuchus.

Thucydides (viii. 24) mentions Pteleon and Sidussa as two forts or walled places within the territory of Erythrae; and Pliny mentions Pteleon, Helos, and Dorium as near Erythrae. There was also a place called Embatum [EMBATUM] in the Erythraean territory.

Mela (i. 17) names a place Coryna in the Erythraean peninsula; but it is doubtful what he means. The promontory Mesate of Pausanias (vii. 5. § 6) appears to be the double point which extends from the southern part of the Erythraean peninsula northward, separating what we may call the bay of Erythrae from the strait of Chios. [G. L.]

COIN OF ERYTHRAE.

ERYTHRAEA. [ERYTHRAEUM.]

ERYTHRAEUM (Ἐρυθραῖον ἄκρον, Ptol. iii. 17. § 4), a promontory on the SE. coast of Crete. The town of ERYTHRAEA, which, from its mention by Florus (iii. 7) along with Cydonia and Cnossus as submitting to Metellus, must have been a place of importance, probably was situated near the promontory of the same name. (Hoeck, *Kreta*, vol. i. pp. 426, 429.) [E. B. J.]

ERYTHRAEUM MARE. [RUBRUM MARE.]

ERY'THRUM (Ἔρυθρόν: *El-Natroun*, Rich.), a village (κώμη, *Stadiasm.*), or place (τόπος, Ptol.), on the coast of Cyrenaica, between Darnis and Naustathmus. (Synes. *Ep.* 51, 67; Ptol. iv. 4. § 5; *Stadiasm.*; Steph. B.) Its ruins are considerable; and it occupied a favourable site at the mouth of one of the most considerable streams of the district. (Beechey, p. 478; Barth, pp. 461, 496.) [P. S.]

ERYX (Ἔρυξ: *Eth.* Ἐρυκῖνος, Erycinus: *S. Giuliano*), the name of a city and mountain in the W. of Sicily, about 6 miles from Drepana, and two from the sea-coast. The mountain (MONS ERYX, Plin. iii. 8. s. 14; but MONS ERYCUS, Cic. *Verr.* ii. 47; Tac. *Ann.* iv. 43), now called *Monte S. Giuliano*, is a wholly isolated peak, rising in the midst of a low undulating tract, which causes its elevation to appear much more considerable than it really is, so that it was regarded in ancient as well as modern times as the most lofty summit in the whole island next to Aetna (Pol. i. 55; Mel. ii. 7. § 17; Solin. 5. § 9), though its real elevation does not exceed 2184 English feet. (Smyth's *Sicily*, p. 242.) Hence we find Eryx alluded to by Virgil and other Latin poets as a mountain of the first order of magnitude, and associated with Athos, Aetna, &c. (Virg. *Aen.* xii. 701; Val. Flacc. ii. 523.) On its summit stood a celebrated temple of Venus or Aphrodite, founded, according to the current legend, by Aeneas (Strab. xiii. p. 608; Virg. *Aen.* v. 759), from whence the goddess derived the surname of Venus Erycina, by which she is often mentioned by Latin writers. (Hor. *Carm.* i. 2. 33; Ovid, *Heroid.* 15. 57, &c.) Another legend, followed by Diodorus, ascribed the foundation both of the temple and city to an eponymous

Digitized by Google

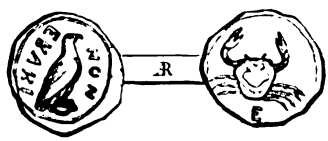
hero named Eryx, who was said to have received Hercules on his visit to this part of Sicily, and contended with that hero in a wrestling match, but was vanquished by him. This Eryx was a son of Aphrodite and Butes, a king of the country, and is hence repeatedly alluded to by Virgil as a brother of Aeneas, though that poet does not refer to him the foundation of the city. (Diod. iv. 23, 83; Virg. *Aen.* v. 24, 412, &c.; Serv. *ad loc.*) The legends which connected it with Aeneas and a Trojan chief named Elymus evidently pointed to what we learn from Thucydides as an historical fact, that Eryx as well as Segesta was a city of the Elymi, a Sicilian tribe, which is represented by almost all ancient writers as of Trojan descent. (Thuc. vi. 2; Strab. xiii. p. 608.) It does not appear to have ever received a Greek colony, but became gradually Hellenised, like most other cities of Sicily, to a great extent; though Thucydides (*l. c.*) still speaks of the Elymi, including the people of Eryx and Segesta, as barbarians. Nothing is known of its history previous to that period, but it seems probable that it followed for the most part the lead of the more powerful city of Segesta, and after the failure of the Athenian expedition became a dependent ally of the Carthaginians. In B. C. 406, a sea-fight took place between a Carthaginian and a Syracusan fleet off the neighbourhood of Eryx, in which the latter was victorious. (Diod. xiii. 80.) On occasion of the great expedition of Dionysius to the W. of Sicily, in B. C. 397, Eryx was one of the cities which joined the Syracusan despot just before the siege of Motya, but it was speedily recovered by Himilco in the following year. (Id. xiv. 48, 55) It again fell into the hands of Dionysius shortly before his death (Id. xv. 73), but must have been once more recovered by the Carthaginians, and probably continued subject to their rule till the expedition of Pyrrhus (B. C. 278). On that occasion it was occupied by a strong garrison, which, combined with its natural strength of position, enabled it to oppose a vigorous resistance to the king of Epeirus. It was, however, taken by assault, Pyrrhus himself leading the attack, and taking the opportunity to display his personal prowess as a worthy descendant of Heracles. (Diod. xx. 10, Exc. H. p. 498.) In the First Punic War we find Eryx again in the hands of the Carthaginians, and in B. C. 260 their general Hamilcar destroyed the city, removing the inhabitants to the neighbouring promontory of Drepanum, where he founded the town of that name. (Id. xxiii. 9.) The old site, however, seems not to have been wholly deserted, for a few years later we are told that the Roman consul L. Junius made himself master by surprise both of the temple and the city. (Id. xxiv. 1; Pol. i. 55; Zonar. viii. 15.) The former seems to have been well fortified, and, from its position on the summit of the mountain, constituted a military post of great strength. Hence probably it was that Hamilcar Barca, suddenly abandoning the singular position he had so long held on the mountain of Ercte, transferred his forces to Eryx, as being a still more impregnable stronghold. But though he surprised and made himself master of the town of Eryx, which was situated about half-way up the mountain, he was unable to reduce the temple and fortress on the summit, the Roman garrison of which was able to defy all his efforts. Meanwhile Hamilcar maintained his position in the city, the remaining inhabitants of which he transferred to Drepana; and though besieged or blockaded in his turn by a Roman army at the foot of the mountain, he preserved his communications with the sea, and was only compelled to abandon possession of Eryx and Drepana when the great naval victory of Lutatius Catulus over the Carthaginians forced that people to sue for peace, B. C. 241. (Pol. i. 58; Diod. xxiv. 8. p. 509; Liv. xxi. 10, xxviii. 41.)

From this time the town of Eryx sinks into insignificance, and it may even be doubted whether it was ever restored. Cicero alludes to the temple, but never notices the town; and Strabo speaks of it as in his day almost uninhabited. Pliny, indeed, enumerates the Erycini among the municipal communities of Sicily; but the circumstance mentioned by Tacitus, that it was the Segestans who applied to Tiberius for the restoration of the temple, would seem to indicate that the sanctuary was at that time dependent, in a municipal sense, on Segesta. (Cic. *Verr.* ii. 8, 47; Strab. v. p. 272; Plin. iii. 8. s. 14; Tac. *Ann.* iv. 43.) No trace of the subsequent existence of the town of Eryx is found; the remaining inhabitants appear to have settled on the summit of the hill, where the modern town of *S. Giuliano* has grown up on the site of the temple. No remains of the ancient city are extant; but it appears to have occupied the site now marked by the convent of *Sta. Anna*, about half-way down the mountain. (Smyth's *Sicily*, p. 243.)

The temple, as already mentioned, was generally connected by popular legend with the Trojan settlements in this part of Sicily; if any value can be attached to these traditions, they would point to its being an ancient seat of Pelasgic worship, rather than of Phoenician origin, as supposed by many writers. Even those authors who represent it as founded before the time of Aeneas relate that it was visited by that hero, who adorned it with splendid offerings. (Diod. iv. 83; Dionys. i. 53.) It is certain that the sanctuary had the good fortune to be regarded with equal reverence by the Phoenicians, Carthaginians, Greeks, and Romans. As early as the time of the Athenian expedition to Sicily (B. C. 415), we learn from Thucydides that it was rich in vessels and other offerings of gold and silver, of which the Segestans made use to delude the Athenian envoys into a belief of their wealth. (Thuc. vi. 46.) The Carthaginians appear to have identified the Venus Erycina with the Phoenician goddess Astarte, and hence showed her much reverence; while the Romans paid extraordinary honours both to the goddess and her temple, on account of their supposed connection with Aeneas. They were, indeed, unable to prevent their Gaulish mercenaries from plundering the temple at the time of its capture by Junius (Pol. i. 7); but this appears to have been the only occasion on which it suffered, and its losses were quickly repaired, for Diodorus speaks of it as in a flourishing and wealthy condition. The Roman magistrates appointed to the government of Sicily never failed to pay a visit of honour to this celebrated sanctuary; a body of troops was appointed as a guard of honour to watch over it, and seventeen of the principal cities in Sicily were commanded to pay a yearly sum of gold for its adornment. (Diod. iv. 83; Strab. v. p. 272; Cic. *Verr.* ii. 8.) Notwithstanding this, the decay of the city, and declining condition of this part of Sicily generally, appears to have caused the temple also to be neglected: hence in A. D. 25 the Segestans applied to Tiberius for its restoration, which that emperor, according to Tacitus, readily undertook "ut consanguineus," but did not carry into effect, leaving

Digitized by Google

it to Claudius to execute at a later period. (Tac. *Ann.* iv. 43; Suet. *Claud.* 25.) This is the latest mention of it that occurs in history; and the period of its final decay or destruction is unknown. At the present day the site is occupied by a castle, converted into a prison; a small portion of the substructions, built of very large and massive stones (whence they have been erroneously called Cyclopian), is all that remains of the ancient edifice; but some fine granite columns, still existing in other parts of the town, have doubtless belonged originally to the temple. It has been already mentioned that the temple itself was surrounded by fortifications, so as to constitute a strong fortress or citadel, quite distinct from the city below: a coin struck by C. Considius Nonianus* (in the first century B. C.) represents the temple itself, with this fortified peribolus, enclosing a considerable portion of the mountain on which it stands; but little dependence can be placed on the accuracy of the delineation. There was also a temple at Rome dedicated to Venus Erycina, which stood just outside the Colline Gate (Strab. v. p. 272); but the representation on the coin just cited is evidently that of the original Sicilian temple. The coins of the city of Eryx have types allusive to the worship of Venus, while others present a close analogy to those of Agrigentum, indicating a connection between the two cities, of which we find no explanation in history. (Eckhel, vol. i. p. 208; Torremuzza, *Num. Sic.* pl. 30.) [E. H. B.]



COIN OF ERYX.

ESDRAE'LA (Ἐσδραηλά), the classical form of the Hebrew name JEZREEL, which Eusebius places between Scythopolis and Legio. (*Onomast. s. v.*) In Judith (Ἐσδρήλων, iii. 11) it is placed near Dotaea or Dothaim, and in the Itinerarium Hierosolymitanum (where it is called Stradela) it is said to be 12 miles from Scythopolis, and 10 from Maximopolis, or Legio. Its modern name is *Zerin*, and it is situated on a rocky ridge extending from east to west in the great plain of Esdraelon, towards its southern extremity, and a little to the north of Mount Gilboa. It was the ancient capital of the kingdom of Israel, and is infamous in the history of Ahab and Jezebel. (1 *Kings*, xxi.) It belonged to the tribe of Issachar (*Josh.* xix. 18), and was known among the crusaders as "Parvum Gerinum." It is most celebrated for its noble plain, noticed in the next article; its fountain (1 *Sam.* xxix. 1) rises in the valley directly under the village at the NE. (Robinson, *Bib. Res.* vol. iii. pp. 163—167.) [G. W.]

ESDRAELON VALLIS v. CAMPUS (τὸ μέγα πεδίον Ἐσδρηλών, *Judith*, i. 8), the same as the valley of JEZREEL (*Josh.* xvii. 16; *Judges*, vi. 33; *Hosea*, i. 5.), a very extensive and fertile plain, shut in between the mountain ranges of Samaria and Mount Carmel on the SE. and of Galilee on the N., extending from the Mediterranean sea at the gulf of Caipha, to the valley of the Jordan, with occasional interruptions from the smaller ranges of Gilboa and Little Hermon, and Mount Tabor rising in solitary grandeur between the latter and the mountains of Samaria. This plain is watered, through its greatest extent, by the river Kishon and its tributaries; and is distinguished in its various parts by different names, e. g. the valley of Megiddo [LEGIO] (2 *Chron.* xxxv. 22); μέγα πεδίον Ἀσσυρίων, or simply μέγα πεδίον, like the valley of the Jordan (1 *Maccab.* xii. 49; Josephus ap. Reland, *Palest.* p. 366); or μέγα πεδίον Σαμαρείτιδος (ib. p. 366). It is now known among the natives as "Merj Ibn 'Amir." (Robinson, *Bib. Res.* vol. iii. pp. 227—230.) [G. W.]

E'SIA. [ISARA.]

E'SSUI. Caesar, in B. C. 54, distributed his troops in winter quarters in various places at some distance from one another. He placed (*B. G.* v. 24) L. Roscius, with one legion, among the Essui. A large force of Galli, from the states called Armoricae, assembled to attack Roscius in his winter camp, but were deterred by hearing unfavourable news of the rising of the Galli in other parts (v. 53). This fact, combined with what is said in the other chapter, shows that the Essui were between the Seine and Loire, and not far from the Armoric states. In the passage of Caesar (v. 24) there is no MSS. variation in the name "Essuos." In *B. G.* ii. 34, Caesar speaks of the Sesuvii as one of the Armoric or maritime states; and though there are MSS. variations in the form "Sesuvii," all the readings make the name begin with "Ses." In *B. G.* iii. 7, the Sesuvii are again mentioned with the Curiosolites and the Veneti; but in that passage there is a reading "Esubios," and other varieties. It seems very likely that the Essui, Sesuvii, and Esubii are the same, and that they occupied the diocese of *Sées*, which borders on that of *Mans* and *Evreux*.

Walckenaer (*Géog.*, &c. i. 398) places the Essui between the Nervii and the Remi, and near a place called *Esch* on the river *Sure*. But the narrative of Caesar (v. 53) shows that this conclusion is false. [G. L.]

ESTIO'NES (Ἐστίωνες), a Vindelician tribe, on the river Iller, with the capital Campodunum (Strab. iv. p. 206; comp. CAMPODUNUM.) [L. S.]

ESUBIA'NI. [VESUBIANI.]

ESURIS (Ru. near *Ayamonte*), the last city to the W. on the coast of Hispania Baetica, stood on the left (E.) side of the mouth of the Anas. (*Itin. Ant.* pp. 425, 431; Florez, *Esp. S.* vol. xiv. p. 206; Ukert, vol. ii. pt. 1. p. 339.) [P. S.]

ETAM (Ἦταν), a place in Judaea mentioned by Josephus, 50 stadia from Jerusalem, very pleasant in its fine gardens, and abounding in rivulets of water, to which the great king Solomon was accustomed to resort. (*Ant.* viii. 7. § 3.) It must obviously be the place celebrated in the book of Ecclesiastes (ii. 5, 6), and in the Canticles; and the Rabbinical notices of the fountain of Etam from which waters were conveyed by aqueducts to Jerusalem, teach us to look for the site between Bethlehem and Hebron. Accordingly we find the name perpetuated among the natives to this day, and assigned to gardens the largest and most luxuriant that are to be met with in the mountain region of Judaea. The three well-known pools of Solomon, on the road to Hebron, are situated at the head of a valley

* This coin is figured in the Biographical Dictionary, vol. ii. p. 1207; but, owing to the imperfect condition of the specimen figured, does not exhibit the pediment of the temple.

Digitized by Google

called *Wady Etâm*; and the aqueduct which derives its supply of water from these tributary fountains, has its proper commencement below the lowest of the pools, from whence it runs along the western side of *Wady Etâm* to Bethlehem. In the bed of the valley, below the aqueduct, is another copious fountain, 'Ain *Etâm*, and around this fountain are the gardens just mentioned. (Williams, *Holy City*, vol. ii. p. 500.) The aqueduct by which this water is conducted to Jerusalem was constructed by Pontius Pilate, the Roman procurator. (Joseph. *B. J.* ii. 9. § 4.)

The rock Etam ('Ητάμ) in the history of Samson, although in the tribe of Judah, was probably in no way connected with the foregoing, and cannot now be identified. (*Judges*, xv. 8, 11.) [G. W.]

ETANNA, a place in Gallia Narbonensis, appears in the Table on a road from Augustum through Condate to Geneva. It lies between Augustum and Condate. [CONDATE, 8.] Etanna appears to be *Yenne* or *Jenne*. [G. L.]

ETEIA ('Ητεία), a town of Crete. Pliny (iv. 20) places a town of this name (some of the MSS. and the old text have Elea or Elese), between Phalasarna and Cisamus. [E. B. J.]

ETEOCRETES. [CRETA, p. 704.]

ETEO'NUS ('Ετεών: *Eth.* 'Ετεώνιος), a town of Boeotia, mentioned by Homer, who gives it the epithet of πολύστυλος, lay to the right of the Asopus. Strabo says that it was afterwards called Scarphe. It probably lay between Scolus and the frontier of the territory of Tanagra. (Hom. *Il.* ii. 497; Strab. ix. pp. 408, 409; Stat. *Theb.* vii. 266; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 332.)

ETHO'PIA, a town or fortress of Athamania, situated on a hill commanding Argithea, the capital of the country. It contained a temple of Jupiter Aereaus. (Liv. xxxviii. 2; Leake, *Northern Greece*, vol. iv. p. 525, seq.)

ETIS ('Ητις), a town in the S. of Laconia, the inhabitants of which were removed to Boeae. (Paus. iii. 22. § 11; Steph. B. *s. v.*)

ETOCETUM, in Britain, mentioned in the second Itinerary as being 12 miles from *Pennocrucium* (*Pentridge*), on the road from the Vallum to Portus Lutupis (*Richborough*), in the direction of London. Probably, *Wall* in Staffordshire. [R. G. L.]

ETOVISSA. [EDETANI.]

ETRU'RIA, one of the principal divisions of Central Italy, bounded on the N. by the Apennines, on the E. by the Tiber, and on the W. by the Tyrrhenian Sea.

I. NAME.

It is almost universally called Etruria by the Latin writers of the best times: though the form TUSCIA is often found in later writers (Lib. Colon. p. 211; Ammian. xxvii. 3, &c.): and appears in the later ages of the Roman Empire to have become the official designation of the district in question, whence it is of frequent occurrence on inscriptions, and is found in the Notitia, and the Itineraries. (*Not. Dign.* ii. p. 63; *Itin. Ant.* p. 289; *Tab. Peut.*; Orell. *Inscr.* 1100, 1181, &c.) Hence it passed into general use in the middle ages, and is still preserved in the modern appellation of *Toscana* or *Tuscany*. On the other hand, the people were called indifferently ETRUSCANS, ETRUSCI, or TUSCANS, TUSCI; both of which forms are used without distinction by Livy, Varro, and other writers of the best age: though Tuscus and Tusci appear to be the most ancient forms, and perhaps the only ones in use in the time of Cato or Plautus. The Greeks on the contrary universally called them TYRRHENIANS or TYRSENIANS (Τυρρηνοί, Τυρσηνοί), and thence named their land TYRRHENIA (Τυρρηνία); a custom which they retained even under the Roman Empire: though the geographers sometimes render the Latin name by Ἐτρούσκοι or Τοῦσκοι (Strab. v. p. 219; Ptol. iii. 1. §§ 4, 47): and very late writers, such as Zosimus and Procopius, adopt Τουσκία for the name of the country (Zosim. v. 41; Procop. *B. G.* i. 16). The forms Hetruria and Hetruscus, as well as Thuscus, which are not unfrequently found in the MSS. of Latin authors, appear to be certainly incorrect.

There is little doubt that the two forms of the Latin name, Etruscus and Tuscus, are merely two modifications of the same, and that this was originally written Turscus, a form still preserved in the Eugubine Tables. (Lepsius, *Inscr. Umbr.* tab. i. b.) It is easy to go a step further and identify the Turscus or Tursicus of the Romans with the Τυρσηνός of the Greeks, a conclusion which has been generally adopted by modern scholars, though denied by some philologers. (Müller, *Etrusker*, vol. i. p. 100; Niebuhr, vol. i. not. 219, 244, p. 112; Abeken, *Mittel-Italien*, p. 126.) The inquiry as to the origin and derivation of these names must be deferred till we come to consider the national affinities of the Etruscans themselves. But one point of the highest importance has been preserved to us by Dionysius, namely, that the *native* name of the people was different from all these, and that they called themselves Rasena or Rasenna (Dionys. i. 30, where the editions have Ῥασένα, but the best MSS. give the form Ῥασέννα. See Schwegler, *Röm. Gesch.* vol. i. p. 255, note 8).

II. PHYSICAL GEOGRAPHY.

The general limits of Etruria have been already indicated: its more precise boundaries appear to have been generally recognised and clearly defined. On the NW. it was bounded by the river Macra (*Magra*), which separated it from Liguria: from the banks of that river to the sources of the Tiber, the main chain of the Apennines formed the boundary between Etruria and Cisalpine Gaul: while the Tiber from its source (or a point very near its source) to its mouth constituted the eastern limit of Etruria, dividing it first from Umbria, afterwards from the Sabines, and lastly from Latium. The length of the sea-coast from the mouth of the Macra to that of the Tiber is estimated by Pliny at 284 Roman miles, and by Strabo at 2500 stadia (312½ M. P.), both of which estimates exceed the truth: the actual distance is little more than 200 geographical or 250 Roman miles. The Maritime Itinerary gives 292 M. P., which, after allowing for the subdivision into a number of small distances, closely agrees with the statement of Pliny. (Plin. iii. 5. s. 8; Strab. v. p. 222; *Itin. Marit.* pp. 498—501.) The eastern frontier, formed by the course of the Tiber, has a length of about 180 R. miles, without taking account of the minor windings of the river: the greatest breadth of Etruria is justly estimated by Strabo (*l. c.*) at something less than half its length.

The region thus limited is extremely varied in its character, the tracts in the northern and north-eastern districts, immediately on the slope of the high Apennines, being very mountainous; while the greater part of the central region between the Arnus and the Tiber is occupied by masses and groups of great

Digitized by Google

hills, many of them rugged, and attaining to a considerable elevation, though hardly any can be said to assume the rank of mountains, with the exception of the lofty *Monte Amiata*, which forms the centre of a volcanic group, in the very heart of the province, and rises to the height of 5794 feet above the level of the sea. There are, however, considerable level tracts of rich alluvial soil, the most important of which are those on the banks and at the mouth of the Arnus; the valley of the Clanis, which connects the basin of that river with that of the Tiber; and a spacious tract along the coast, between the hills of the interior and the sea, now known as the *Maremma*. This last district is of very various width and irregular extent, owing to the manner in which the hills encroach upon it and throw out bold arms or detached masses quite down to the coast, of which the most conspicuous are the promontory of Populonium or *Piombino*, and the Mons Argentarius. With these exceptions, the coast is for the most part low and flat, with extensive marshes in some parts, which render the whole tract of the *Maremma* noted for its unhealthiness, a character it seems to have already earned as early as the days of the younger Pliny, and which was sometimes unjustly extended to the whole of Etruria. (Plin. *Ep.* v. 6. § 2; Sidon. Apoll. *Ep.* i. 5.)

It is very difficult to group the ranges of mountains or hills, with which almost the whole of Etruria is occupied, into any system of geographical arrangement. The two great valleys of the Arnus and the Tiber, the one having a general direction from E. to W., the other from N. to S., may be considered as forming the key to the geography of the country. Both these important streams rise in the central range of the Apennines, at no very great distance from one another, and follow for some space a nearly parallel direction, until the Arnus makes an abrupt turn near Arretium, and flows from thence towards the NW. till within a few miles of Florence, when it turns again, and pursues a course nearly due W. from thence to the sea. From the point where the Arnus thus suddenly turns off at Arretium, the remarkable trough-like depression or valley of the Clanis (the *Val di Chiana*) extends nearly S. as far as Clusium, from whence its waters find their way to the Tiber: thus separating the general mass of the Etrurian hills from those on the W. bank of the Tiber. So level is this singular valley that its stagnant waters may be led off at pleasure either into the Arnus on the N., or the Tiber on the S. [CLANIS.]

The portion of Etruria N. of the Arnus is occupied principally by the offshoots and ranges of the Apennines, the main chain of which forms its northern boundary, while it sends off towards the S. several minor ranges or arms, some of them however of elevation little inferior to the central chain. Of these the most conspicuous are the lofty and rugged group now called the *Alpi Apuani*, which separates the valley of the Macra from that of the Ausar (*Serchio*); a second, of inferior elevation, which separates the basin of *Lucca* from that of *Pistoja*, and sends out its ramifications to the banks of the Arnus between Pisa and Florence; thirdly, the range which separates the basin of *Pistoja* and valley of the *Ombrone* from that of the *Sieve*; fourthly, the much more lofty range, now called *Prato Magno*, which intervenes between the lower valley of the Arnus and its source, and causes the great bend of that river already noticed; and, lastly, the ridge called *Alpe della Catenaja*, which separates the upper valley of the Arnus from that of the Tiber. This last range (which rises in its highest point to 4590 feet) is continued by the great hills that extend at the back of Arretium and Cortona to the banks of the lake Thrasimene and Perusia, and are thence prolonged, though on a still diminishing scale, along the W. bank of the Tiber. Between these successive ranges and the Arnus, and, in some cases, almost enclosed by the mountains, lie several basins or valleys, affording a considerable extent of fertile plain, for the most part so perfectly level as to be subject to frequent inundations, and (in ancient times especially) abounding in marshes and great pools or lakes of stagnant water. Such are, besides the plain at the mouth of the Arnus and Ausar, the basin in which was situated the city of Luca, the nearly similar valley of Pistoria, and that in which stands the city of *Florence*, the modern capital of Tuscany.

S. of the Arnus, almost the whole breadth of Etruria is occupied by a range of hills, or, more correctly speaking, by a broad tract of hilly country, extending from the valley of the Clanis to the sea, and from the banks of the Arnus to the mouth of the Umbro. The greater part of these hills, many of which rise to a height of not less than 2000 feet, and some even considerably exceed 3000, belong to the formation termed by geologists the Subapennine, and present comparatively easy declivities and gently sloping sides, forming a marked contrast to the bold abrupt forms of the central Apennines. At the same time, they may all be considered as dependent upon the same system; though much broken and diversified, their ranges preserve a general parallelism to the direction of the central chain of the Apennines from NW. to SE. But about 40 miles S. of *Siena* there rises a range of a totally different character, and almost wholly insulated from the hills to the N. of it, — the volcanic group of which *Monte Amiata* already noticed is the centre, and the *Monte Labro* and *Monte di Radicopani* form the two extremities; the general direction of this range is nearly from E. to W. A short distance S. of this again (nearly on the present confines of Tuscany and the Papal States) commences the great volcanic tract which occupies almost the whole of Southern Etruria, and is directly connected with that of Latium and the *Campagna di Roma*. This district includes the extinct volcanic craters of the *Lago di Bolsena* (Lacus Vulsiniensis), *Lago di Vico* (Lacus Ciminus), and *Lago di Bracciano* (Lacus Sabatinus), all of them now occupied by lakes, as well as the smaller *Lago di Martignano* (Lacus Alsictinus) and the now dry basin of *Baccano*. None of these volcanic foci of eruption have been in a state of activity within historical memory, though of very recent date in a geological sense. Nor do any of the volcanic hills of Southern Etruria rise to any considerable elevation, like the Alban hills of Latium; but the range or tract of which the Mons Ciminus is the centre, forms a kind of hilly barrier extending, from E. to W., from the Tiber nearly to the sea-coast, which bounds the view of the Roman Campagna, and was for a long time the limit of the Roman arms. [CIMINUS MONS.]

The low tract of the *Maremma* already noticed extends between the hills of the interior and the sea: it may be considered as commencing a little to the N. of the mouth of the Caecina, and extending from thence as far as Centumcellae (*Civita Vecchia*);

Digitized by Google

ast it is far from presenting an unbroken and uniform plain, and rather forms a succession of basins etween the uplands and the sea, separated by intering ridges of hills, which descend in places quite the sea-coast, and constitute the natural limits of hese separate districts, now known as the *Maremma* f *Volterra*, *Maremma di Grosseto*, &c. Of these, he last-mentioned, which may be called the basin of he *Ombrone* (Umbro), and extends along the coast rom the promontory of Populonium to the Mons rgentarius, is the most extensive. S. of Centumellae the hills descend quite to the sea-coast, and ontinue to skirt it at a very short distance, till ithin a few miles of the Tiber.

The minor rivers of Etruria may be readily classed nto three groups: 1. those which fall into the rnus; 2. those which fall into the Tiber; and 3. hose which flow direct to the sea. 1. Of the first roup it is singular that not a single ancient name as been preserved to us, except that of the Auser r *Serchio*, which now no longer joins the Arnus, ut pursues its own course to the sea. The most mportant tributaries of the *Arno* are the *Sieve* and he *Ombrone* from the N., and the *Elsa* and *Era* on he S. side. 2. Of the affluents of the Tiber, the nly considerable one which joins it from the W. or Etruscan bank is the Clanis already mentioned, ogether with its tributary the Pallia or *Paglia* Pallia, *Tab. Peut.*): several small streams, howver, bring down to it the waters of the Etruscan ills; but the only one of which the ancient name s recorded is the Cremera, between Rome and Veii. 3. The rivers which discharge their waters irectly into the sea are more numerous and consirable. Proceeding S. from the mouth of the rnus, we find: the Caecina (*Cecina*), which waered the territory of Volaterrae; the Umbro (*Ombrone*), which flowed beneath the walls of Rusellae, nd is the most considerable stream between the rnus and the Tiber; the Albinia (*Albegna*), beween Portus Telamonis and Cosa; the Armina or rmenta (Arnine, Armine, *Itin. Marit.* p. 499; Arenta, *Tab. Peut.*), now called the *Fiora*, which onstitutes the modern boundary between Tuscany nd the Roman States; the Marta (*Tab. Peut.*; *Itin.* nt. p. 291), still called *Marta*, which carries off he waters of the lake of *Bolsena*, and flows beneath he walls of Tarquinii; and the Minio (*Mignone*), small stream, but better known than the preceding rom the mention of its name in Virgil (*Aen.* x. 83). Besides these, the name of the Osa (*Osa*), a ery small stream between the Albinia and Portus elamonis, is recorded by Ptolemy (iii. 1. § 4); and ast of the Alma (*Alma*), also a trifling rivulet, beween the Umbro and Populonium, by the Maritime tinerary (p. 500). N. of the Arnus, the Aventia and Tarquinia of the Tabula may probably be identified with the river *Lavenza*, which descends from the mountains of *Carrara;* and the *Versiglia*, which rises from those of *Serravezza*.

Of the lakes of Etruria the most considerable is he Lacus Trasimenus, still called the *Lago Trasimeno* or *Lago di Perugia*, about 36 miles in circumference, and celebrated for the great victory of Hannibal over the Romans in B.C. 217; next to this in magnitude is the Lacus Volsiniensis, or *Lago di Bolsena*, so called from the city of the same name, a crater-formed lake, as well as the more northerly Lacus Sabatinus (*Lago di Bracciano*) and the much smaller Lacus Ciminus (*Lago di Vico*) and Lacus Alsietinus (*Lago di Martignano*). The Lake of Clusium, on the contrary (*Lago di Chiusi*), was a mere stagnant accumulation of water connected with the river Clanis: and the Aprilis Lacus, or Prelius Lacus of Cicero, was a kind of lagoon or marshy pool on the sea-coast, not far from the mouth of the Umbro, now called the *Paduli di Castiglione*. Several similar lagoons or marshy lakes exist at different points along the coast of Etruria, of which the ancient names have not been preserved; as well as on the N. side of the Arnus, where the *Paduli di Fucecchio* and *Lago di Bientina* are evidently only the remains of far more extensive waters and marshes, which previously occupied this part of Etruria. [Arnus.] The Vadimonian Lake (Lacus Vadimonis), noted as the scene of two successive defeats of the Etruscans by the Romans, is a mere sulphureous pool of very small extent, now called the *Laghetto* or *Lago di Bassano*, a few miles from the town of *Orte* (Horta) and close to the Tiber.

The most prominent physical features of the *coast* of Etruria are the promontory of Populonium, and that of the Mons Argentarius, which seems to have been better known to the Romans by the name of Promontorium Cosanum: the latter is a remarkable, detached, and almost insulated mountain, joined to the mainland only by two narrow strips of sand. Several small islands are situated off the coast of Etruria, and between that country and Corsica. Of these by far the most considerable is Ilva, called by the Greeks Aethalia, celebrated for its iron mines, and separated from the promontory of Populonium by a strait only six miles wide. S. of Ilva lay the small low island of Planasia (*Pianosa*) and the still smaller Oglasa (*Monte Cristo*). Off the promontory of Cosa were Igilium (*Giglio*) and Dianium (*Giannuti*): and N. of Ilva, between the mouth of the Arnus and Corsica, lay Urgo or Gorgon (*Gorgona*) and Capraria (*Capraja*). Besides these Pliny mentions several smaller islets, probably mere rocks, of which Maenaria may probably be identified with *Meloria*, immediately opposite to the port of *Livorno;* Columbaria *may* be *Palmajola*, in the straits between Ilva and the mainland; and Barpana and Venaria may be the small islets off the Portus Telamonis now called the *Formiche di Grosseto*. (Plin. iii. 6. s. 12.) But these last identifications are merely conjectural.

III. Origin and National Affinities of the Etruscans.

There are few problems that have in modern times more exercised the ingenuity of scholars and philologers than that of the origin of the Etruscan nation, and few upon which opinions still remain more divided. Without attempting to notice all the various hypotheses that have been advanced and derivations that have been found for this remarkable people, it will be necessary to review the most important of them, beginning with the statements found in ancient authors on the subject.

The opinion generally received in ancient times, and almost universally adopted by Roman writers, ascribed to the Etruscans a *Lydian* origin. The earliest authority for this statement is that of Herodotus, who relates it according to the tradition reported to him by the Lydians. Their account (mixed up with many fabulous and legendary details) was, in substance, that a certain Atys, king of Lydia, had two sons, Lydus and Tyrrhenus, the one of whom had remained in Lydia and given name to

Digitized by Google

the people of that country; the other, having been compelled by a great famine to emigrate with one-half of the existing population of Lydia, had ultimately settled in the land of the Umbrians, and given to his people the name of Tyrseni. (Herod. i. 94.) The internal improbabilities of this narrative are obvious: and the fables with which it is mingled, as well as the introduction of the eponymous heroes Lydus and Tyrrhenus, impart to it a strongly mythical character. But the same tradition appears to have been related with some little variation by several other authors (Dionys. i. 28), among the rest by Timaeus (*Fr.* 19. ed. Didot), and is alluded to by Lycophron (*Alex.* 1351). It was also adopted by many Greek writers of later times, and, as already mentioned, became almost universally received among the Romans. (Scymn. Ch. 220; Strab. v. p. 219; Plut. *Rom.* 2; a long list of Roman authorities is collected by Dennis, *Etruria*, vol. i. p. xxxii.) We have, unfortunately, no means of knowing whether it existed as a national tradition among the Etruscans themselves, or, as appears more probable, was merely adopted by them, in the same manner as the legend of Aeneas and the Trojan colony was by the Romans.

But this view of the subject seems to have been far less generally received at the earliest period of historical research. We learn from Dionysius (i. 28) that Xanthus the Lydian historian (an elder contemporary of Herodotus) made no mention of this colonisation of Tyrrhenia, though he mentioned other less important settlements of the Lydians; and that he represented the two sons of Atys as being named Lydus and *Torrhebus*, and giving name to the two tribes of Lydians and *Torrhebians:* this latter name is known to us from other sources as that of an Asiatic people bordering upon the Lydians. (Steph. Byz. *s. v.* Τορρηβος). Hence it seems very probable that the legend related to Herodotus had confounded the two nations of Tyrrhenians and Torrhebians. On the other hand, Hellanicus represented the Tyrrhenians of Etruria as *Pelasgians*, whom he described, according to the custom of the logographers, as migrating direct from Thessaly to Italy, where they first founded the city of Spina near the mouth of the Padus, and thence pressed through the interior of the peninsula, and established themselves in Tyrrhenia. (Hellan. *Fr.* 1. ed. Didot; Dionys. i. 28.) Dionysius himself, the only author of a later period who rejects the Lydian tradition, discards the view of Hellanicus also, and says that the Etruscans in his day were wholly distinct from every other people in their language, as well as manners, customs, and religious rites; hence he inclines to consider them as an aboriginal or autochthonous people. (*Id.* i. 30).

Among modern authors, many have adopted the Lydian tradition as an historical fact, and have sought to support it by pointing out analogies and resemblances in the manners, religious rites, and architecture of the Etruscans with those of the Lydians and other nations of Asia Minor. (Dennis, *Etruria*, vol. i. p. xxxvii. &c.; Newman, *Regal Rome*, p. 100.) Others, while they reject this tradition, but admit the strongly oriental character of many of the customs and institutions of the Etruscans, have derived them from the Phoenicians, Egyptians, and other oriental nations: while Micali, a modern Tuscan writer of celebrity, is content to acquiesce in the opinion of Dionysius, that the Etruscans were an indigenous people of Italy, at the same time that he regards many of their arts and institutions as imported directly from Egypt. (Micali, *Antichi Popoli Italiani*, vol. i. c. 7. pp. 99, 140, &c.)

Niebuhr was the first to point out that the population of Etruria was of a mixed character, and that in all inquiries into its origin we must discriminate between two different races, which existed simultaneously in the country, during the period when we have any knowledge of its history. Of these two elements the one he regards as Pelasgic, composing the bulk of the population, especially of the more southern parts of Etruria, but existing in a state of serfdom or vassalage, having been conquered by a nation of invaders from the north, descending in the last instance from the mountains of Rhaetia. It is this conquering race whom he considers as the true Rasena, or Etruscans properly so called, while the name of Tyrrhenians (applied by the Greeks to the whole people) belonged of right only to the Pelasgic or subject population. The Rasena thus formed a dominant aristocracy, which however gradually became mingled into one people with the subject race, in the same manner as the Normans and Saxons in England. (Niebuhr, vol. i. pp. 109—142, *Lect. on Rom. Hist.* vol. i. pp. 57—67.)

The theory of C. O. Müller is in fact nothing more than an ingenious modification of the Lydian tradition of Herodotus, so contrived as to adapt it to the fact (which he recognises in common with Niebuhr and most recent inquirers) of the Pelasgic origin of a large part of the population of Etruria. He considers the Tyrrhenians of Italy to be identical with those Tyrrhenian Pelasgians (Τυρρηνοὶ Πελασγοί, Soph. *Fr.* 256), the existence of which as a sea-faring people on the islands and coasts of the Aegean Sea is a fact attested by many ancient authors. [PELASGI.] A body of these Pelasgians he supposes to have been settled on the coast of Lydia, where they obtained the name of Tyrrhenians from a city of the name of Tyrrha; and that, being compelled at a later period to emigrate from thence, they repaired to the coasts of Etruria, where they founded the cities of Tarquinii and Agylla, and gradually acquired so much influence as to impart to the whole people whom they found there the name of Tyrrhenians. This previously existing population he supposes to have been the Rasena or Etruscans proper, and declines with Niebuhr to derive them from the mountains of Rhaetia. (Müller, *Etrusker*, vol. i. *Einl.* c. 2, *Hetrurien, in Kl. Schr.* vol. i. pp. 136—140.)

Of the more recent theories, that of Lepsius (*Tyrrhenische Pelasger in Etrurien*, 8vo. Leipz. 1842) deserves especial mention. He discards altogether the hypothesis of a separate nation of Rasena, and considers the Etruscans as resulting from a mixture of the invading Pelasgians with the Umbrians, who, according to several authorities, previously occupied the country afterwards known as Etruria.

To the above speculations must be added the results of recent inquiries into the *language* of the ancient Etruscans. Unfortunately, the materials which exist for these are so scanty as to afford a very insecure basis for ethnological conclusions. The greater part of the inscriptions extant are merely sepulchral, and contain therefore but a very few words, besides proper names. A single inscription preserved at *Perugia* extends to 46 lines: but has hitherto defied all attempts at its interpretation. But the researches of recent philologers, and a careful comparison of this Perugian inscription with a few shorter ones, which have been discovered in the more southerly parts of Etruria, seem to justify the in-

Digitized by Google

wing conclusions: — 1. The Etruscan or Tuscan nguage is one radically different from the other nguages of Italy by which it was surrounded. his is in accordance with the express statement of ionysius (i. 30) and with several passages of the atin writers which represent the Tuscan as a lan- uage wholly unintelligible to the Latins. (Liv. ix. 6; Gell. xi. 7). 2. A comparison with the Eugubine ables proves it to be quite distinct from the Umbrian, s nearest neighbour, though they would seem to ave had words and inflections common to the two, a ircumstance which would naturally arise from their roximity, and still more probably from the subjection f a part of the Umbrians by the Etruscans. 3. It emains unquestionably a Greek or Pelasgic ele- ent: this is found so much more strongly in some nscriptions, discovered in the southern part of truria, as to raise a suspicion that they are almost urely Pelasgic. (Lepsius, *Tyrrhen. Pelasger*, pp. 0—43; Donaldson, *Varronianus*, pp. 166—170.) his, however, does not apply to the Perugian in- cription, or others found in the more central and orthern parts of the country. The existence of his Pelasgian or old Greek element explains the artial success of Lanzi in his elaborate attempt to xpret the Etruscan language by means of Greek nalogies (*Saggio di Lingua Etrusca*, 3 vols. 8vo. ome, 1789), while its total failure as a whole hows the main ingredients of the language to be adically different. 4. Besides these two partial lements, one akin to the Umbrian, the other to the d Greek, there exists a third, probably the most mportant of all, wholly distinct from both, and hich may be called the Rasenic element, being in l probability the language of the Etruscans pro- erly so called. Of this we can only assert, in the resent state of our knowledge, that although dis- nct from the Pelasgic or Greek family of languages n the one hand, and from that of the Umbrians, abans, and Latins on the other, there are good easons for believing it to belong to the same great mily, or to the class of languages commonly known s the Indo-Teutonic. Some arguments have lately een brought forward to show that its nearest affini- es are with the Gothic, or Scandinavian group. Lassen, *Philol. Abhandl.* p. 64, note; Schwegler, öm. Gesch. vol. 1. pp. 172, 268; Donaldson, *Varro- anus*, chap. v.)

The result of these philological inquiries is in ordance with, and strongly confirms, that of the ost historical researches. Both alike point to the ference that the Etruscans were a mixed people: at the bulk of the population, at least of Southern truria, was a Pelasgic race, closely akin to the ople who formed the substratum of the population Latium, as well as of Southern Italy, but who ppear to have been the most cultivated and civilised the early Italian races, and to have preserved ost strongly many peculiarities of their original haracter and institutions; but that this people ad been subdued, before the period when they first ppear in Roman history, by a more warlike race om the north, who established their dominion over e previously existing population, whom they re- uced to the condition of serfs (*πενεσται*, Dionys. . 5.): the conquerors retained their own language, hough not without modification, as well as their acerdotal and aristocratic institutions, while they erved to a great extent the arts and civilisation the people whom they conquered. A third element which must not be overlooked in the popu- lation of Etruria, was that of the Umbrians, who, according to the general tradition of antiquity, were the original inhabitants of this part of Italy. (Plin. iii. 5. s. 8, 14. s. 19; Müller, *Etrusker*, vol. i. p. 102.) They are generally represented as subdued or expelled by the Etruscans, but Pliny says that they were driven out by the Pelasgians, and these in their turn by the Etruscans. In either case it can- not be supposed that the whole people would be expelled or exterminated, and there is reason to believe that the subject Umbrians always continued to form a considerable ingredient in the population of Northern Etruria, as the Pelasgians did in that of the south. (Lepsius, *l. c.* pp. 27—34; Schwegler, *l. c.* p. 270.)

The period, as well as the circumstances, of these successive migrations and conquests are wholly unknown to us. Hellanicus (*ap. Dionys.* i. 28) represented the Pelasgians as invading the land afterwards called Tyrrhenia from the north, and establishing the seat of their power first at Croton (Cortona), from whence they gradually spread them- selves over the whole country. There can be no doubt that the same course was pursued by the later invaders, the Rasena: but it is remarkable, on the other hand, that there exist numerous traditions and mythical legends which point in the opposite direction, and represent the S. of Etruria, especially Tarquinii, as the centre from whence emanated all that was peculiar in the Etruscan rites, customs, and institutions. (Müller, *Etrusker*, vol. i. pp. 72, 73.) The name of Tarquinii itself, and that of its eponymous hero Tarchon, who was represented in some accounts as the founder of all the twelve cities of Etruria (Strab. v. p. 219), present strong analo- gies with those of the Tyrrhenians and Tyrsenus. These traditions have been frequently used as argu- ments to show that the Pelasgian or Tyrrhenian population came by sea and settled first on the coast, from whence it extended its influence over the in- terior. But we know that the Tyrrhenians were at an early period spread over the coasts of Latium and Campania as well as those of Etruria: and there is nothing improbable in the fact that their settlements in a maritime and fertile tract were really the first to attain to that degree of culture and civilisation which ultimately became common to all the Etruscan cities. The difference of these two classes of traditions, pointing to two different quarters for the birth-place of the Etruscan polity and their national institutions, may perhaps proceed from the combination of two national elements in the people who were collectively designated by the Romans as Etruscans or Tuscans, and by the Greeks as Tyrrhenians. But it is impossible for us to separate, in the historical traditions or legends that have been transmitted to us, the part that refers to the Etruscans properly so called, from what belongs to the Tyrrhenians or Pelasgic races. The same difficulty continually presents itself with regard to their sacred rites, political institutions, arts, man- ners, and customs.

The connection of the Rasena or conquering race of Etruscans with the Rhaetians, admitted both by Niebuhr and Müller, rests principally on the autho- rity of a passage of Livy, in which he tells us that the Alpine nations, particularly the Rhaetians, were un- doubtedly of Tuscan origin, but had lost their ancient civilisation from the nature of the country, retaining only the language, and even that much corrupted. (Liv. v. 33.) The same thing is told us by Pliny and

Digitized by Google

Justin, who add that the Rhaetians were driven into the mountains when the plains of Northern Italy were invaded by the Gauls. (Plin. iii. 20. s. 24; Justin, xx. 5.) A modern author has attempted (not altogether without success) to prove the same thing by an examination of the local names and appellations still existing in the country of the Grisons and the Tyrol (Steub, *über die Urbewohner Rhätiens*, Munich, 1843), and several philologers consider the names Rhaeti and Rasena to be connected with one another. Assuming the correctness of Livy's statement, on a point with which, as a native of Patavium, he was likely to be well acquainted, that the Rhaetians really spoke a language closely akin to that of the Etruscans, it is certainly most probable that the relation between them was the converse of that stated by Pliny and Justin, and that it was from the Rhaetian Alps that the Rasenic invaders [descended into the plains of Northern Italy, and from thence advanced into Etruria properly so called. This hypothesis, however, by no means renders it necessary to assume that the Rhaetian Alps were their *original* abode, but merely that it was from thence they first invaded Italy.

IV. History of Etruria.

1. *Early history and greatness of Etruria.* — Our knowledge of the history of Etruria, during the most flourishing period of the nation, is extremely vague and imperfect; and the few facts recorded to us, with the exception of the wars of the Etruscans with the Romans, are almost wholly devoid of chronological data. But the general fact of their early power and prosperity, and the extent of their empire, is sufficiently attested. Livy tells us that before the period of the Roman dominion the power of the Etruscans was widely extended both by sea and land: the amount of their influence both on the shores of the Upper and Lower Sea was sufficiently proved by the name of Tyrrhenian or Tuscan given to the latter, and that of Adriatic to the former, from the Tuscan colony of Adria. They are said to have formed two principal states or communities, the one on the S. side of the Apennines, in the country commonly known as Etruria, the other on the N. of those mountains, in the great plains of the Padus, where we are told that they extended their dominion quite to the foot of the Alps, with the exception of the territory of the Veneti. (Liv. v. 33; Strab. v. p. 219; Schol. Veron. *ad Aen.* x. 200.) Each of these states was composed of twelve principal cities, of which those on the N. of the Apennines were regarded as colonies of those in Etruria Proper (Liv. *l. c.*), though others considered them as Pelasgian settlements, emanating from the city of Spina near the mouth of the Padus (Diod. xiv. 113).

The existence of this Etruscan state in the country N. of the Apennines may be regarded as an unquestionable historical fact, though we are wholly unable to determine the period of its establishment. But those writers who adopt the hypothesis of the Rhaetian or northern origin of the Etruscans naturally regard these settlements in the plains of the Padus as *prior* in date, instead of subsequent, to their establishment S. of the Apennines. The Etruscans maintained their ground in this part of Italy until they were expelled or subdued by the invading Gauls; but though their national existence was at this time broken up, it is probable that in many other cities of Cisalpine Gaul, as we are told was the case in Mantua (Virg. *Aen.* x. 203: Plin. iii. 19. s. 23), they continued to form no inconsiderable part of the population. The only cities, however, in this part of Italy which are expressly noticed as of Tuscan origin are Felsina, afterwards called Bononia, Mantua, and Adria, to which may doubtless be added Melpum, a city known to us only by the notice of its destruction. Ravenna also appears to have been at one period a Tuscan city. (For a further account of the Etruscan settlements in this part of Italy and the history of their subjugation, see Gallia Cisalpina). There is reason to believe that during the same period the Etruscans had extended their power along the coast of the Adriatic, and occupied, or at least established colonies in, the country afterwards known as Picenum. Here the second Adria was in all probability a Tuscan foundation, as well as the city of the same name already mentioned [Adria]: both the name and origin of Cupra in the same region, are designated as Etruscan. (Strab. v. p. 241; Müller, *Etrusker*, vol. i. p. 145).

At the same time as the Etruscan power was thus extended towards the N. so far beyond the limits within which it was afterwards confined, it appears to have attained a corresponding extension on the S. also. Though our accounts of the Etruscan settlements in this direction are still more vague and indefinite than those of their dominion in the north, there is no doubt of the fact that they had at one period established themselves in the possession of the greater part of Campania, where, according to Strabo, they founded twelve cities in imitation of the confederacy of Central Etruria. (Strab. v. p. 242; Pol. ii. 17.) It is impossible to determine the names of all these: Capua, called by the Tuscans Vulturnum, was the chief among them: Nola also is referred by several authorities to a Tuscan origin, and several minor cities in the plain must certainly have been occupied, if not founded, by the same people. To these may be probably added the maritime towns of Pompeii, Herculaneum, Surrentum, Marcina, and Salernum, all of which are described as at one period or other Tyrrhenian towns, though it is possible that in some of these cases Tyrrhenian *Pelasgians*, rather than Etruscans, are meant. (Strab. v. pp. 247, 251; Müller, *Etr.* vol. i. p. 168.) The Etruscans, however, never made themselves masters of the Greek cities on the coast, Cumae, Dicaearchia, and Neapolis, but they continued to occupy the rest of Campania till they were themselves reduced by the Samnites. [Campania.] The period of their first establishment in these countries is very uncertain, the date assigned by Cato for the foundation or occupation of Capua differing by more than three centuries from that adopted by other authors. (Vell. Pat. i. 7.) Müller follows the view of these last authorities, and refers the first establishment of the Etruscans in Campania to a period as early as B.C. 800: Niebuhr, on the contrary, adopts the statement of Cato, and considers the Etruscan dominion in Campania as of brief duration and belonging to a comparatively late period. The account preserved by Dionysius of the attack on Cumae, about B.C. 525, by a great host of barbarians, among whom the Tyrrhenians (Etruscans) took the lead, may in this case be regarded as marking the first appearance of that people in this part of Italy. (Dionys. vii. 3; Niebuhr, vol. i. pp. 75, 76; Muller, *Etr.* vol. i. pp. 166, 172.)

Contemporary with this great extension of the Etruscan power by land was the period of their maritime and naval supremacy. Numerous asser-

Digitized by Google

nata, of Greek writers especially, attest that the Tyrrhenians were a bold and hardy race of navigators; they are repeatedly mentioned as fitting out great fleets for naval warfare, and exercising an almost undisputed supremacy over the sea which derived from them the name of the Tyrrhenian; while their expeditions on a smaller scale had earned for them a disgraceful reputation as pirates and corsairs. It is probable that these habits were principally confined to the southern Etrurians: the circumstance that Populonium was the only maritime city further north renders it evident that the inhabitants of Central and Northern Etruria were not a seafaring people; and there is great reason to suppose that these maritime enterprises originated with the Pelasgian population of the south, and continued to be carried on almost exclusively by them, not only after they had fallen under the dominion of the Romans, but even after their subjection to the power of Rome. The circumstance that these piratical habits were common to the Tyrrheno-Pelasgians of the islands and shores of the Aegaean Sea is an argument in favour of this hypothesis; we find also the inhabitants of Antium, who appear to have been of Tyrrhenian or Pelasgic origin, and closely connected with the people of Southern Etruria [ANTIUM], following the same course, and addicted both to navigation and piracy. (Strab. v. p. 232.)

The few chronological data we possess prove the naval power of the Etruscans to have extended over a period of considerable duration. The first distinct mention of it that occurs in history is in B. C. 538, on occasion of the Phocaean settlement at Alalia in Corsica, when the Tyrrhenians and Carthaginians combined their fleets to expel the new colonists, each nation furnishing 60 ships of war; and though defeated in the sea-fight that ensued, they attained their object of compelling the Phocaeans to quit the island. (Herod. i. 166, 167.) Their piratical expeditions must, however, date from a much earlier period. We find them engaged in maritime hostilities with the Greek colonists of Lipara soon after its foundation (Diod. v. 9; Strab. vi. p. 275; Paus. x. 11. § 3, 16. § 4); and Ephorus even represented the war of the Tyrrhenian pirates as one of the causes which long prevented the Greeks from establishing colonies in Sicily (Ephor. *ap. Strab.* vi. p. 410). At a later period we find Anaxilas, despot of Rhegium (B. C. 494—476), fortifying the Scyllaean rock for the purpose of preventing the Tyrrhenian pirates from passing the Straits of Messana. (Strab. vi. p. 257.) Shortly after this, the maritime power of the Etruscans sustained a severe blow by the great defeat of their fleet, combined with that of the Carthaginians, by Hieron of Syracuse, who had been called in by the Cumaeans to their assistance, B. C. 474. (Diod. xi. 51; Pind. *Pyth.* i. 136—146.) The union on this occasion, as well as in the expedition against Alalia, of the Etruscan and Carthaginian fleets seems to show that these people were in general on friendly terms, and we learn from an incidental notice that they had concluded treaties regulating their respective navigation and commerce in the Mediterranean (Arist. *Pol.* iii. 5), while they evidently regarded the Greeks as interlopers and common enemies. But after the great battle of Cumae, we hear no more of any direct enterprises on the part of the Etruscans against the Greek cities: the growing power of those of Sicily in particular enabled them, on the contrary, to assume the offensive, and in B. C. 453 the Syracusan commanders Phayllus and Apellas, sent out to punish the Tyrrhenian piracies, ravaged the coasts of Etruria, together with those of Corsica and Aethalia (Ilva), with a fleet of 60 ships, and even made themselves masters of the latter island, from which they carried off a great booty. (Diod. xi. 88.) Hence it was evidently the hostile feeling of the Tyrrhenians against Syracuse which led them to send an auxiliary force to the support of the Athenians in Sicily, B. C. 414. (Thuc. vi. 89, 105, vii. 53.) Thirty years later, B. C. 384, Dionysius of Syracuse made an expedition in person to the coast of Etruria, where he landed in the territory of Caere, and plundered the wealthy temple of Pyrgi. (Diod. xv. 14; Pseud.-Arist. *Oeconom.* ii 21.) By this time it is clear that the great power of the Etruscans was much broken: the Gauls had expelled them from the fertile plains on the banks of the Padus; the Samnites had conquered their Campanian settlements; and the cities of Central Etruria were engaged in an arduous struggle against the Gauls in the N., and the Romans in the S. The capture of Veii by the latter, which took place in the same year with the fall of Melpum, N. of the Apennines, B. C. 396, may be regarded as the turning-point of Etruscan history. The Tyrrhenians are, however, still mentioned by Greek historians as sending auxiliaries or mercenaries, sometimes to the assistance of the Carthaginians, at others to that of Agathocles, as late as B. C. 307. (Diod. xix. 106, xx. 61, 64.)

During the period of the naval greatness of the Etruscans, they appear to have founded colonies in the island of Corsica, and exercised a kind of sovereignty over it: this was probably established after the expulsion of the Phocaean colonists, and we find the island still mentioned near a century later, B. C. 453, as in a state of dependence on the Etruscans. (Diod. xi. 88.) With the decline of their naval power it appears to have passed into the hands of the Carthaginians. The evidences of their having extended similar settlements to Sardinia, are far from satisfactory. (Müller, *Etrusker*, vol. i. p. 183.) Strabo, indeed, speaks distinctly of that island having been occupied by *Tyrrhenians* prior to the arrival of Iolaus and the sons of Hercules (Strab. v. p. 225); but it is very doubtful whether any historical value can be attached to a statement referring to so mythical a period, and we have no account of Etruscan or Tyrrhenian colonies, properly so called, in the island. The attempts that have been made to prove the existence of an Etruscan population in Sardinia from the works of art discovered there, especially the curious architectural monuments called *Nuraghe*, will be considered elsewhere. [SARDINIA.]

2. *Wars and relations of Etruria with Rome.* — The history which has been preserved to us of Etruria in its relations to Rome, has much more appearance of a chronological and authentic character than the scattered notices above referred to: but, unfortunately, a critical examination proves it to be almost equally fragmentary and uncertain, for the three first centuries after the foundation of the city. The Roman traditions concur in representing the Etruscan state (i. e. the twelve cities of Etruria Proper) as already constituted and powerful at the period of the foundation of Rome; nor is there any reason to question this fact, though there appear good grounds for supposing that it did not attain to its greatest power till a later

Digitized by Google

period. The position of Rome itself on the immediate frontiers of Latium and Etruria, necessarily brought it into relations with the Etruscans from the very earliest periods of its existence. Accordingly we find Romulus himself, as well as Tullus Hostilius, represented as engaged in wars with the Veientines, the Etruscan state whose territory immediately bordered on that of the rising city. (Liv. i. 15, 27, 30.) That a part of the population of Rome itself was of Tuscan origin, is attested by numerous ancient traditions, though the time and circumstances of its settlement are very variously reported. In the legendary history of Rome we find three principal points of contact with Etruria: 1. the traditions connected with Caeles Vibenna, an Etruscan chieftain, who is represented as a kind of *Condottiere*, or leader of an independent mercenary force, and not the chief magistrate or general of any of the Etruscan states. He is said to have brought with him a considerable body of Tuscan troops, who settled on the Caelian hill (Mons Caelius), which derived its name from their leader. (Tac. *Ann.* iv. 65; Fest. v. *Caelius*, p. 44, v. *Tuscus Vicus*, p. 355; Varr. *L.L.* v. 8. § 46; Dionys. ii. 36.) But the period to which this immigration is referred was very uncertain, some assigning it to the reign of Tarquinius Priscus, which view appears to have been confirmed by the Tuscan annals cited by the emperor Claudius (See Orelli, *Exc. ad Tac. Ann.* xi.), others carrying it back to the age of Romulus. Tacitus himself considers the settlement of the Tuscans in the quarter which bore from them the name of Tuscus Vicus as connected with the same event, though Livy and other writers referred this to the expedition of Porsena. (Liv. ii. 14; Fest. p. 355.) 2. The traditions which point to the establishment of an Etruscan dynasty at Rome under the later kings, represented in the narrative of the received history by the reigns of the two Tarquins. It is remarkable that Dionysius represents the elder Tarquin as establishing his supremacy over the whole of Etruria, after a war of nine years' duration (iii. 59—62), an event of which neither Livy nor Cicero takes the least notice, and which cannot be regarded as historically true; but it seems probable that the rule of the Tarquins in Rome was coincident with the period of the greatest power of the Etruscans, and that at this time their sway was extended not only over Rome itself, but a great part of Latium also. (Niebuhr, vol. i. pp. 383—387.) Müller, with much plausibility, regards the dominion of the Tarquinii at Rome as representing a period during which the *city* of Tarquinii had established its power over the other cities of Etruria, as well as over Rome itself. (Müller, *Etrusker*, vol. i. pp. 118—122; *Biogr. Dict.* art. TARQUINIUS.) To the period of Etruscan domination at Rome were assigned, by universal tradition, the great architectural works of the Cloaca Maxima and the Capitol, which strongly resembled similar constructions in the cities of Etruria itself. 3. A little later than the period of the Tarquins occurs a somewhat similar extension of the Etruscan power under Porsena, king of Clusium. There is, perhaps, no part of the Roman story that bears more manifest marks of falsification than the legends connected with this prince: ...ons of a wholly different kind were, however, ...ed, which leave little doubt that he really ...ed Rome (*Biogr. Dict.* art. PORSENA), and ...l his dominion over a great part of Latium, until his conquests were checked at Aricia by the assistance of the Greeks of Cumae. This last fact, which is placed by Dionysius about 506 B.C., was, in all probability, derived from Cumaean chronicles, may fairly be depended upon as history. (Dionys. vii. 5.)

From the brief notices above given (the fuller development of which in this place is obviously impossible), it may fairly be inferred that the period when the Etruscan power was at its height, so far as we gather from the Roman traditions, was during the second and third centuries of the city, or about 620—500 B.C.; a result which accords with that previously derived from other sources. It is remarkable that after the war with Porsena, the Roman annals make no mention of hostilities with the Etruscans for above twenty years; and when they recommence (B.C. 483), it is the Veientines alone with whom the arms of the republic were engaged. The petty wars between these two neighbouring states were continued, with occasional interruptions and intervals of repose, for a period of nearly ninety years, till they ended in the capture of Veii by Camillus, B.C. 396. Throughout this whole interval we do not find that the other cities of Etruria lent any efficient aid to the Veientines: even when the progress of the Roman arms threatened Veii with destruction, the efforts of the Capenates and Faliscans to induce the other cities of the league to espouse its cause proved unavailing, while they served only to draw down the vengeance of Rome upon themselves.

The fall of Veii was the first step that marked the decline of the Etruscan power in their central dominions, or Etruria Proper. Previous to that event they had already lost the greater part, if not the whole, of their possessions N. of the Apennines: the fall of Melpum, one of the most considerable of their cities N. of the Padus, is said to have been precisely contemporary with that of Veii. (Com. Nep. ap. *Plin.* iii. 17. s. 21.) Before the same period, too, the Samnites had wrested from them the fertile plains of Campania, and the central Etrurians now stood alone, assailed by the growing power of Rome in the S., and exposed to the formidable attacks of the Gauls on their northern frontier. It was probably the danger that threatened them from this quarter that prevented their cities from combining to resist the Roman arms, which in consequence continued to gain ground in Southern Etruria. Caere appears to have fallen into the power of Rome shortly after Veii: Falerii, though not conquered, was compelled to sue for peace; and already before the Gallic invasion, B.C. 390, the Romans had carried their arms as far as Sutrium, and engaged in hostilities with the powerful city of Volsinii. (Diod. xiv. 98, 109; Liv. v. 24, 27, 31, 32.) Even that great calamity only interrupted their progress for a short time: we find them, within a few years after, not only carrying on warfare against the Etruscans in the neighbourhood of Sutrium and Nepete, but establishing Roman colonies in both those towns, which became in consequence an important barrier against the power of Etruria. In the subsequent wars it was sometimes Tarquinii, at others Volsinii (at this time one of the most powerful cities of Central Etruria), that took the lead; but in B.C. 351 the Tarquinians concluded a truce for forty years, which appears to have been observed on both sides: and it was not till 311 that mention again occurs of an Etruscan war. The next year (B.C. 310) was rendered remarkable by the passage of the Cimmi...

forest, a barrier never before crossed by the Roman arms. On this occasion the whole Etruscan confederacy appears to have really taken part in the war: the Perusians, Cortonans, and Arretians are mentioned as concluding a separate peace, and the combined forces of the other Etruscans were defeated by Q. Fabius Maximus at the Vadimonian lake,—a battle which, according to Livy (ix. 39), gave the first decisive blow to the ancient power of Etruria. The constant progress of the Roman arms is marked in subsequent campaigns by the circumstance that their victories were gained near Rusellae and Volaterrae (Liv. x. 4, 13),—places far in advance of the scene of their earlier wars. A brief period now ensued, during which the Etruscans and Umbrians united with the Samnites, and even with their ancient enemies the Senonian Gauls, against the rising power of Rome; but their efforts were unsuccessful, and two great defeats of the combined forces—the one at Sentinum in Umbria, B. C. 295, the other, in B. C. 283, at the same Vadimonian lake which had already proved disastrous to the Etruscans—appear to have finally crushed the power of that people. They were, however, still in arms two years later, when the consul Q. Marcius Philippus celebrated a triumph for the last time over the Etruscans in general (de Etruscis, Fast. Triumph.). The following year, B. C. 281, the Volsinians and Volcientes alone protracted the now hopeless contest, and were at length reduced to submission. (Fast. Triumph. *l. c.*) But as late as B. C. 265, the Volsinians were once more in arms; and though this contest appears to have arisen out of civil disturbances in their own city, the statement of Florus (i. 21) is probably correct, that they were the last of all the Italian states that accepted the supremacy of Rome. This event occurred the very year before the commencement of the First Punic War. The causes that led the Faliscans, who had so long been friendly to Rome, to engage in a hopeless contest with that formidable power, after the close of the war with Carthage, B. C. 241, are wholly unknown to us. (Liv. *Epit.* xix.; Eutrop. ii. 28.)

3. *Etruria under the Romans.*—We have no detailed account of the last years of the contest between Etruria and Rome, the leading events of which have been just recapitulated: and we are almost wholly in the dark as to the terms on which the several cities were received to submission, and the relations which in consequence subsisted between them and the dominant republic. That the terms were in general favourable, and that the Etruscan cities for the most part enjoyed a more privileged position than the generality of the Italians, may be inferred from various circumstances. In the Second Punic War they continued uniformly faithful to the Romans, and are mentioned as taking the lead in furnishing voluntary supplies towards fitting out the fleet of Scipio, in a manner that clearly indicates their semi-independent position. (Liv. xxviii. 45.) It is probable that most of them retained the rank of "allied cities" (civitates foederatae). Roman colonies were established only in the S. of Etruria, with the exception of Pisae and Luca (Liv. xl. 43, xli. 13), which were obviously founded as a barrier against the Ligurians, not with a view of controlling the Etruscans themselves. Hence, it is a complete mistake to suppose, as many writers have done, that the Roman conquest put an end to the national existence of Etruria: its inhabitants retained until a much later period their language, arts, religious rites, and national peculiarities. The immediate neighbourhood of the imperial city doubtless became early Romanised, but it was not till towards the close of the Republic that the same process was extended to the more distant portions of the country. The Etruscans were admitted to the Roman franchise in B. C. 89: they had taken no part in the general revolt of the Italians in the preceding year, but, after the war had continued for above a year, their fidelity began to waver, and the Romans hastened to forestal their defection by granting them the full rights of citizens. (Appian, *B. C.* i. 49.) In the civil wars of Marius and Sulla they were among the first to espouse the cause of the former (*Ib.* 67), and adhered to it steadfastly, long after the rest of his partisans had been subdued; the almost impregnable fortress of Volaterrae having defied the arms of Sulla himself for nearly two years (Strab. v. p. 223; Cic. *pro Rosc.* 7). Hence, the whole weight of the vengeance of Sulla fell upon Etruria; and the manner in which he ravaged the country during the war, followed up by the confiscations of property, and the numerous military colonies which he established in different parts of the country, gave the death-blow to the nationality of Etruria. Other events contributed in rapid succession to the same result: the northern districts of Etruria became the head-quarters of the revolt of Catiline [FAESULAE], and in consequence suffered a second time the ravages of civil war; while Caesar, and the triumvirs after his death, followed up the policy of Sulla, by establishing military colonies throughout the land, until there came to be scarcely a city of Etruria whose territory had not been thus assigned to new settlers. (Lib. Colon. pp. 211—225; Zumpt, *de Coloniis*, pp. 251, 253, 303.) The civil war of Perusia, B. C. 41, appears to have been closely connected with these changes, and the capture and destruction of that city crushed the last effort of the Etruscans to revive their expiring nationality. (Propert. ii. 1, 29.)

But notwithstanding all these calamities there appears to have still remained a strong element of the native Etruscan race. The language had not fallen altogether into disuse, down to a late period of the Roman empire: many extant monuments and works of art belong to the same epoch; and inscriptions attest that the Etruscans not only retained a municipal organisation, but that the "Quindecim Populi Hetruriae" still formed a kind of league or confederacy,—probably, however, only for sacred objects. (Orell. *Inscr.* 96, 3149; Müller, *Etrusker*, vol. i. pp. 357, 358.) For administrative purposes Etruria constituted the seventh region of Italy, according to the division of Augustus: in the reign of Constantine it was united into one province with Umbria, an arrangement which appears to have subsisted as late as A. D. 400, when we find in the Notitia a "Consularis Tusciae et Umbriae." (*Notit. Dign.* p. 63; Böcking, *ad loc.* p. 430; Mommsen, *Die Lib. Col.* p. 207.) A new distinction, however, occurs under the later Roman empire, between "Tuscia suburbicaria" and "Tuscia annonaria" (Amm. Marc. xxvii. 3. § 1; Mommsen, *l. c.*), of which the latter appears to have comprised the district N. of the Arnus: hence the expression met with in later writers, such as Cassiodorus and Jornandes, of "Tuscia utraque" (Cass. *Var.* iv. 14; Jorn. *de Reb. Get.* 60; Geogr. Rav. iv. 29). It was not till a much later period that the distinction was established between *Tuscany*, in the modern sense of the term, and the provinces adjoining Rome, including

Digitized by Google

Viterbo, *Bolsena*, and *Corneto*, which are now subject to the Papal dominion. The foundation of this division seems to have been laid during the period of the Lombard rule.

V. Political Constitution.

Imperfect as is our information concerning the history of Etruria,—its internal history especially,—we cannot wonder that our knowledge of its government and political institutions should be very incomplete. All ancient writers concur in representing the Etruscans as not united into one regular state under a national government, but forming a confederacy of twelve cities, each of which was a sovereign and independent state, possessing not only the right of internal self-government, but that of making war or peace on its own account. They were indeed in the habit of holding general assemblies of deputies from all the cities, analogous to those of the Latins at the Lucus Ferentinae, and which took place in like manner at a national sanctuary called the Fanum Voltumnae, the site of which cannot be determined with certainty. These meetings, which were held regularly once a year, appear to have been in the first instance rather of a religious than a political character; and the election of a head priest or pontiff, to officiate in the name of the twelve cities of Etruria (Liv. v. 1), must have had reference to these annual solemnities. They became, however, the usual occasion for deliberating on all political matters affecting the common welfare of the Etruscan nation; and besides these regular assemblies, it was not unusual to hold extraordinary ones at the same place, if any unusual emergency called for them. (Liv. ii. 44, iv. 23, 25, 61, v. 1, vi. 2, x. 16; Müller, *Etrusker*, ii. 1.) It is, however, manifest that the decisions of this congress were not considered binding upon the several states, which we find in many instances acting wholly independently; and we have no evidence that, even in time of war, there was any supreme authority established and recognised throughout the confederacy, though there must necessarily have been some general appointed to the chief command of the combined armies when actually in the field.

The cities which composed the league of Central Etruria or Etruria Proper (the only one with which we are here concerned) are universally reckoned as twelve in number: and Livy expressly tells us that the same number of cities was established in the territory N. of the Apennines in imitation of this parent league. (Liv. iv. 23, v. 33; Dionys. vi. 75; Strab. v. p. 219.) But no ancient writer has preserved to us a list of the cities that composed the confederacy, and it is impossible to determine with certainty which were the sovereign twelve, there being considerably more than that number of names that would seem to have an equal claim to the distinction. Hence the lists proposed by modern writers have varied greatly: the cities that appear to have the most unquestionable claim to be included are Tarquinii, Veii, Volsinii, Clusium, Volaterrae, Vetulonia, Perusia, Cortona, and Arretium: to these may probably be added Caere and Falerii: but the claims of Faesulae, Rusellae, Pisae, and Volci are nearly equally strong. Populonium, which appears to have been a powerful and flourishing city, is generally rejected as having been a colony of Volaterrae, but it is certain that it was at one period an independent state, and the same may be said of Capena, Luna, and several other towns in Etruria. It is probable indeed that, as in the case of the Achaean League, while the number was always preserved, the constituent members varied, from time to time, with the rise and fall, the growth and decay, of the different Etruscan cities. (Niebuhr, vol. i. pp. 118—120; Müller, *Etrusker*, vol. i. pp. 344—355; Dennis, *Etruria*, vol. i. p. xxviii.) But besides these, we find several other towns in Etruria which appear on different occasions as assuming an independent position and acting like sovereign states: the nature of the relations between these and the heads of the League are wholly unknown to us. But, as fully recognised was the existence of the regular confederacy, that the "Twelve states of Etruria" (duodecim Etruriae populi) was become a common designation for the whole Etruscan nation, like the "triginta populi Latini" for that of the Latins.

Of the internal government and constitution of the several Etruscan cities we know little more than that it was essentially aristocratic, and that the dominant body, like the patricians at Rome in the early days of the city, fortified their political power by sacerdotal influence, retaining in their own hands the exclusive possession of all the sacred offices and the discharge of the numerous and complicated functions and observances of their religious rites. It is apparently this aristocratic body in each city which is commonly designated by Roman writers as the "Principes," and it appears that it was these alone who assisted at the general councils of the nation already mentioned. (Liv. ii. 44, vi. 2, x. 16.) The exact meaning of the term Lucumo, an Etruscan word which appears to have designated certain members of this privileged order, cannot now be determined. It is not unfrequently misunderstood by Roman writers as a proper name, while others use it as equivalent to nobles in general (Censorin. 4, § 13; Val. Max. *de Nom.* § 18), and others again regard it as corresponding to a chief magistrate or even king (Serv. *ad Aen.* ii. 278). The genuine Etruscan form seems to have been Lauchme. (Müller, *Etr.* vol. i. p. 363), whence Propertius uses the form Lucmo (v. 1. 29). Besides this privileged body, there must have existed, at least in the towns of Etruria, a commonalty or free population analogous to the plebeians at Rome, but whose political power seems to have been very limited. The mass of the country population was composed of serfs (*penestae*), in all probability the descendants of the conquered people, the Umbrians and Pelasgians: these Penestae were led out to battle, like the Spartan Helots, by their respective lords, the nobles of the superior race. (Dionys. ix. 5; Niebuhr, vol. i. p. 121; Müller, *Etrusker*, vol. i. pp. 377, 378.) It is probable that the account of the civil dissensions at Volsinii, which are said to have thrown the political power into the hands of the *slaves*, must refer to a somewhat similar class of vassals or dependents (Niebuhr, vol. i. p. 134), but the version transmitted to us is too vague to be of much value.

The earliest traditions concerning Etruria, especially those of a mythical character, make frequent mention of *kings* of the several cities, of which Porsena, king of Clusium, is one of the latest instances. But in the period of the wars of Etruria with Rome the regal dignity had been abolished throughout the Etruscan cities, and an aristocratical government with annual chief magistrates established, probably not much unlike that of Rome in the first years of the republic. So strong, indeed, was at this time their objection to the monarchical form of govern-

Digitized by Google

ment that they even refused to assist the Veientines against Rome, because they had returned to it, and placed themselves again under the rule of a king. (Liv. v. 1.) Tolumnius, also, is called *king* of Veii about 40 years earlier. (*Id.* iv. 17.)

VI. Religion.

The Etruscans were celebrated beyond almost any other people of antiquity for their devotion to their national religion, and for the zeal and scrupulous care with which they practised the various observances of its rites and ceremonies. Livy calls them "gens ante omnes alias eo magis dedita religionibus, quod excelleret arte colendi eas" (v. 1). Hence they became the instructors of the Romans in many of their religious rites, and that people adopted from them a considerable part of what was in later ages received as the established national religion of Rome. Hence arises one great difficulty in regard to all inquiries into the Etruscan religion, that, as we have no account of it in its native purity, it is almost impossible to say what was truly Tuscan, and to separate it from other elements with which it had become in later ages intimately blended. Equally difficult is it to determine the precise extent and influence of the Greek religion upon that of Etruria. Much of what appears common to the two was probably derived through the Pelasgic population of Southern Etruria, but the fact appears incontestable that the operation of direct Hellenic influences at a much later period may be extensively traced in the Etruscan mythology. This is particularly obvious in the works of art which have been discovered in Etruria, and here the difficulty is still increased by the great influence which Hellenic *art* undoubtedly exercised over that of the Etruscans, irrespective of any direct religious operation. [See below, p. 868.] Hence this class of monuments, which, considering the vast numbers of them that have been preserved, would seem likely to throw so much light upon the subject, can only be employed with the utmost caution. It is impossible here to enter into the discussion of this abstruse and complicated subject: a few leading results only can be briefly stated.

1. The Etruscan religious system was not one wholly foreign to the other nations of Italy: it had many points in common with those especially of the Sabines and Latins; and though in many cases this may arise from the confusion of later writers, and the impossibility of distinguishing, in the 7th and 8th centuries of the Roman state, which of its religious institutions were really derived from Etruria, it seems impossible to doubt that the Etruscan mythology really contained much that was common to the two people just mentioned, and that had been derived by all three from some common source.

2. Some portions of the Etruscan mythology and religion unquestionably point to an Eastern origin. The number and importance of these evidences of Oriental influence have been greatly exaggerated by those writers who have insisted on the Lydian, or other Oriental, extraction of the Etruscans; but the existence of such an element in their religious system cannot be denied; though it is a question how far it proved in any particular case *direct* transmission from an oriental source.

3. There are not wanting indications which would connect the religious mythology of Etruria with that of the northern nations of Europe. The name of *Æsar*, which was the Etruscan appellation for the gods in general (Suet. *Aug.* 97), at once recals the *Æsar* of the Scandinavians (Müller, vol. ii. p. 81; Donaldson, *Varronianus*, p. 151); and much of the gloomy worship of the infernal deities, which forms so prominent a part of the Etruscan religion, presents a strong similarity with the northern mythology. (Gerhard, *Die Gottheiten der Etrusker*, p. 17.)

4. But whatever extent may be allowed to these last sources of influence, a much greater one was exercised by the Pelasgic element of the Etruscan people. With every reasonable allowance for the operation of later Hellenic ideas, and especially for the introduction on works of art of foreign deities, and a different cycle of mythology, there remains a pervading similarity with the religious system of the early Greeks, which can hardly be accounted for otherwise than by referring them to a common Pelasgic origin. From the same source, probably, proceeded much of that which we find common to the southern Etruscans and to their neighbours in Latium.

Of the special deities that were worshipped by the Tuscans, the most important were *Tina* or *Tinia*, corresponding to the Latin Jupiter; *Cupra*, who was identified with Juno; and Minerva, whose name was the same in the Tuscan language, and appears on Etruscan monuments as *Menerfa*. These three deities seem to have been regarded as the chief gods, whence we are told that every Etruscan city had three temples dedicated to them (as was the case in the Capitol at Rome), and three gates which bore their names. (Serv. *ad Aen.* i. 422). Besides these, we find particularly mentioned as Etruscan deities, and bearing names of clearly Etruscan origin: *Vertumnus*, whose worship seems to have especially prevailed at Volsinii, from whence it was transferred to Rome; *Nortia*, the Etruscan goddess of Fortune, also worshipped at Volsinii, apparently identical with the Fortuna of Antium and Praeneste; and *Voltumna*, whose sanctuary was the meeting-place of the whole Etruscan nation. To these must be added, partly from notices of ancient writers, partly from extant monuments: Vulcan, whose Etruscan name, as we learn from works of art, was *Sethlans*, the special object of worship at Perusia; Mercury, called by the Etruscans *Turms*, a name of frequent occurrence on mirrors; Venus, who appears in similar works under the name of *Turan*; Mantus, probably a genuine Etruscan name, and one of the principal infernal deities; Vedius or Vejovis, also an infernal power; Summanus, the god of nocturnal thunder, and one of the rulers of the shades. These two last *names* are Latin, and perhaps the deities themselves belong properly to Latium. *Ancharia*, who was the tutelary goddess of Faesulae, and *Horta*, who gave name to the town of that name near the foot of Soracte, are, apparently, mere local divinities, but of native Tuscan origin. Apollo and Hercules, whose names are written on Etruscan bronzes *Aplu* or *Apulu*, and *Herecle* or *Hercle*, would seem to be foreign divinities that had originally no place in the mythological system of Etruria, though their worship was at a later period extensively diffused in that country; and the same thing was still more clearly the case with the Greek Bacchus, though there existed an Etruscan divinity named *Phuphluns* with whom he appears to have been identified or confounded. On the other hand, *Usil* (Sol), the god of the sun, and *Losna* or Luna, as they bear native names, were probably also genuine Etruscan deities. The worship of Janus at Falerii, of Silvanus and Inuus at Caere, and of Saturnus at Saturnia (called

Digitized by Google

by the Tuscans Aurinia), is also attested by Roman writers, but the Etruscan names of these deities are unknown to us.

Besides these names of individual divinities, a few more general notices of the Etruscan mythology have been preserved to us, which bear more distinctly the stamp of its peculiar national character. Such is the statement, that, in addition to the supreme deity, Tinia or Jupiter, there were twelve other divinities, six male and six female, whose proper names were unknown, but who were termed collectively the Dii Consentes, and formed the counsellors of Tinia; they were regarded as presiding over the powers of nature, and not eternal, but destined to perish at some future time with the natural order of things over which they presided. Notwithstanding the statement that their real names were unknown, the more powerful of the divinities above enumerated seem to have been generally ranked among the Consentes. (Arnob. *adv. Nat.* iii. 40; Varr. *R. R.* i. 1; Müller, *Etr.* vol. ii. pp. 81—86; Gerhard, *l. c.* pp. 22, 23.) But superior to these, and to Tinia himself, were certain mysterious deities, called the Dii Involuti, apparently somewhat analogous to the Fates, who were supposed to exercise an irresistible controlling power over the gods themselves, while their own names and attributes remained unknown. (Arnob. *l. c.*; Seneca, *Nat. Qu.* ii. 41.) Another class of divinities which is expressly referred to the Etruscan religion are the Dii Novensiles, the nine deities to whom alone the power of hurling the thunderbolts was conceded; this classification appears to have had no reference to that of the Consentes, but must have included many of the same gods. (Plin. ii. 53; Arnob. iii. 38.)

Of purely Etruscan origin also was the doctrine of the Genii, of such frequent occurrence in the Roman religion, though the Etruscan word corresponding to the Latin Genius is unknown. As the Genius was the tutelary or presiding spirit of every individual man, so were the Lares those of the house or family; the word Lar is unquestionably Etruscan, and the Lasa or Lara, a kind of fortune or attendant genius (often represented on works of art under the form of a winged female figure), appears to be connected with the same notion. This idea of a class of intermediate beings, inferior to the true gods, but the immediate agents through which the affairs of mankind were controlled (imperfectly developed in the Greek Daemones), appears to have pervaded the whole Etruscan system of religious faith. It reappears in their conceptions of the infernal powers, where we find, besides the gloomy Mantus (the Pluto of their mythology), and the corresponding female deity, Mania, the numerous class of the Dii Manes, — "the *good* gods" as they were called by a natural euphemism,—who are aptly compared with the Lares and Genii of the upper world. (Serv. *ad Aen.* iii. 63, vi. 743; Gerhard, *l. c.* pp. 13—16.) The *name* of these is probably Latin, but the worship of them certainly prevailed in Etruria. Etruscan works of art abound in representations of infernal spirits or furies, sometimes as female figures, winged and armed with serpents, at others under forms the most hideous and horrible; one of these, characterised by his commonly bearing a great hammer, and apparently representing the messenger of death, bears in several instances the Greek name of Charon (ΧΑΡΥΝ), a clear proof how much the mythologies of the two nations have become intermingled on extant works of art. On the other hand, we find on these the genuine Etruscan names of *Leinth*, *Mean*, *Snenath*, *Nathum*, and *Munthuch*, all applied to deities of unknown power, but apparently goddesses of fate or destiny. (For fuller details concerning the religious system of the Etruscans, see Müller, *Etrusker*, vol. ii. book 3. ch. 3, 4; Gerhard, *Die Gottheiten der Etrusker*, Berlin, 1847.)

The Etruscan religion was especially characterised by the number and minuteness of its ritual observances, and particularly by those which had reference to the different modes of divination. Hence Etruria is called by Arnobius "genitrix et mater superstitionis." (Arnob. vii. 26.) To interpret the divine will, and to avert the divine wrath, were the objects which they proposed to themselves in their various religious ceremonies, and the modes of doing this constituted what was termed by the Romans the "disciplina Etrusca." This system had, according to the native tradition, been first revealed by a miraculous youth named Tages, who sprung out of the earth in the territory of Tarquinii, and had from thence been diffused throughout the twelve states of Etruria, where it was preserved and transmitted by the families of the Lucumones or chief nobles. (Cic. *de Div.* ii. 23; Censorin. 4. § 13; Fest. v. *Tages;* Lucan. i. 636.) Many of its rites were (in later times at least) committed to writing, but much was still preserved by oral tradition; and the exclusive possession of these precepts, without which no political or public affairs could be transacted, was one of the great engines of power in the hands of the sacerdotal aristocracy of Etruria. Hence the young nobles were trained up by a long course of study to the possession of this hereditary knowledge; and even after Etruria had fallen into dependence upon Rome, it was thought necessary to provide by special regulations for its perpetuation. (Cic. *de Div.* i. 41, *de Legg.* ii. 9, *ad Fam.* vi. 6, Tac. *Ann.* xi. 15.)

The modes of divination were principally three: 1. By augury, or observation of the flight of birds, a practice common to all the early nations of Italy, as well as in a less degree to the most ancient Greeks. 2. By inspection of the entrails of victims, a mode also familiar to the Greeks, and practised by other Italian nations, but which appears to have been reduced to a more systematic form and regular body of rules by the Etruscans than by any other people. On this account we find the Romans throughout all periods of their history consulting the Etruscan Haruspices. (Liv. v. 15, xxv. 16, xxvii. 37; Cic. *Cat.* iii. 8, *de Div.* ii. 4; Lucan, i. 584.) But though the name of these functionaries appears to be certainly connected with this peculiar branch of divination (Müller, *Etr.* vol. ii. p. 12), they did not confine themselves to it, but undertook to interpret portents and prodigies of all descriptions. 3. The divination from thunder and lightning was more peculiarly Etruscan than either of the two preceding modes. Its principles were embodied in certain books called *libri fulgurales* and *tonitruales*, which appear to have been still extant in the time of Cicero (Cic. *de Div.* i. 33; Lucret. vi. 380); and some of the numerous distinctions which they established between the different kinds of thunderbolts (of which there were eleven in all) have been preserved to us. (Plin. ii. 52, 53.) But this doctrine, like most others of the same kind, appears to have contained much that was secret and abstruse, and this formed part of the Disciplina Etrusca which was transmitted by oral, and often hereditary, tradition. Even under the Roman empire the art of the Haruspex

Digitized by Google

appears to have remained principally in the hands of the Etruscans; but it had fallen to a great degree into disrepute, and, though an attempt was made by the emperor Claudius to restore it (Tac. *Ann.* xi. 15), it gradually sunk into contempt, and the Tuscan Haruspex was regarded, like the Chaldaean astrologer, as a mere vulgar impostor. The superstition itself, however, continued down to the latest ages of the empire, and is mentioned in A. D. 408 during the wars of Alaric in Italy. (Zosim. v. 41.)

VII. *Arts and Sciences.*

It is especially from the still extant monuments and works of art discovered in Etruria that there has arisen in modern times a high, and in some degree certainly exaggerated, notion of the civilisation of the ancient Etruscans. But all accounts agree in representing them as by far the most cultivated and refined people of ancient Italy, and especially devoted to the practice of arts and handicrafts of various kinds. (Athen. xv. p. 700, c.; Heraclid. 16.) It was from them that the Romans confessedly derived many of the arts and inventions that conduced to the comfort of daily life, as well as many objects of luxury and magnificence. To the latter class belong the ornamental attire worn in the triumphal processions, — themselves probably an Etruscan custom (Appian, viii. 66), — as well as by the kings and chief magistrates of Rome: the Toga picta, the Praetexta, the golden Bulla, the ivory curule chair, &c. (Diod. v. 40; Flor. i. 5; Macrob. *Sat.* i. 6; Liv. i. 8; Strab. v. p. 220.) The numerous objects of an ornamental character found in the Etruscan tombs fully confirm the testimony of ancient writers to their proficiency in this branch of art, while the paintings on the walls of some of their sepulchres afford some insight into their habits of daily life, and lead us to infer that they were really, as represented by the Greeks, a luxurious and sensual people. The account of their abandoned vices and profligacy given by Theopompus (ap. *Athen.* xii. p. 517) is obviously much exaggerated; but Virgil also bears testimony to the general belief in their habits of debauchery (*Aen.* xi. 736; see also Plant. *Cistell.* ii. 3, 20). Isidorus, however, represents these luxurious and voluptuous habits as belonging to the degeneracy of the Etruscans, consequent on their long prosperity, and not characteristic therefore only of their decline. (Diod. v. 40.) And it must always be borne in mind that almost all the extant works of art belong to a late period of their national existence. They were especially noted for their devotion to the pleasures of the table, whence we find the Etruscans ridiculed in Roman times for their corpulence. ("Pinguis Tyrrhenus," Virg. *G.* ii. 193; "*Obesus* Etruscus," Catull. 39. 11.)

In the higher departments of art, it is clear that the Etruscans had made great progress in architecture, sculpture, and painting. 1. Of Etruscan *architecture* our knowledge is really but very limited. The so-called Tuscan order of architecture, as applied to the construction of temples and similar edifices, is really nothing more than a modification of the Doric, which it resembles too closely to have had a separate and independent origin. The principal difference was in the greater width between the columns, which admitted only of the use of timber instead of stone for the architrave; and in the arrangement of the cella, which occupied only half the length of the interior area of the temple. The general effect was, according to Vitruvius, unfavourable; the temples built according to the Tuscan order (of which there were several at Rome, including that of Jupiter in the Capitol) having a low and heavy aspect. This must have been aggravated by the custom, characteristic of the Tuscan architecture, of loading the outside of the pediment with statues. (Vitruv. iii. 3. § 5, iv. 7; Plin. xxxv. 12. s. 45, 46; Müller, *Arch. d. Kunst.* § 169.) The external architectural decorations of some of the Etruscan sepulchres (especially the façades of those hewn in the rock at *Castel d'Asso*, *Norchia*, &c.) present the same close approximation to the Hellenic, and particularly the Doric, style. The existing monuments of Etruscan architecture are confined to works of a more massive and simple description, among which the most remarkable are the fragments of their city walls, especially those of Faesulae, Volaterrae, Cortona, and Rusellae. In all these instances the masonry, which is of the most massive character, is composed of large irregular blocks, not united with cement, but rudely squared, and laid in horizontal courses. There is, however, little doubt that the difference of construction between these Etruscan walls and those of Latium and the Central Apennines is not a national characteristic, but results merely from the difference of material — the walls of Cosa and Saturnia, which are composed of the hard limestone of the Apennines, being of the same polygonal construction with those of the Latin and Volscian cities. (Specimens of both styles of construction are figured by Micali, *Popoli Antichi Italiani*, pl. 9—12.)

Of their edifices for the exhibition of games, such as theatres or amphitheatres, we have no distinct knowledge: they could hardly have been without something of the kind, as we are told that both the theatrical exhibitions of the Romans, and their gladiatorial combats, were derived from the Etruscans, who moreover delighted in horse-races and pugilistic contests. (Liv. i. 35, vii. 2; Athen. iv. p. 153; Val. Max. ii. 4. § 4; Tertull. *de Spect.* 5.) But the theatre at Faesulae (repeatedly referred to by Niebuhr as a great Etruscan work), and the amphitheatre at Sutrium, to which very exaggerated importance has been attached by some writers, are in all probability Roman works of comparatively late date. The Etruscans appear to have paid especial attention to the more practically useful objects of architecture, such as the laying out of streets and sewers. Of their skill in the latter, the Cloaca Maxima at Rome — the construction of which is universally attributed to the Etruscan monarchs of the city — is a striking example: the same monument proves also that they were acquainted at a very early period with the true principle of the arch, and possessed great skill in its practical application. Closely connected with this class of works were those for the drainage and outlet of stagnant waters by subterranean emissaries or tunnels, — an art for which the Etruscans appear to have been early celebrated. Of their domestic architecture we can judge only from some of their sepulchres, which bear unquestionable evidence of being intended to imitate, as closely as possible, the abodes of the living. (Dennis, *Etruria*, vol. i. p. lxvi.) But the common tradition of the Romans represented the Atrium, the most peculiar feature in the construction of a Roman house, as an Etruscan invention; and hence the most ancient and simple form of it was called Tuscanicum. (Varr. *L. L.* v. 33. § 161; Vitruv. vi. 3; Diod. v. 40.)

The sepulchres of the Etruscans have attracted

Digitized by Google

so much attention as to require a brief notice. They present many varieties in their construction and decoration, so that none of these styles can be fixed upon as peculiarly national or characteristic. They are sometimes chambers hewn out in a cliff or wall of solid rock, occasionally with architectural decorations cut in the same (*Castel d'Asso, Bieda, Norchia*); more frequently without such ornaments, or with a mere door cut in the rock: sometimes subterranean chambers surmounted by tumuli, either of loose earth and stones, or built up with masonry into a more regular form (Tarquinii, Volaterrae); often mere chambers sunk in the earth without any trace of such superstructure: again these chambers are sometimes circular, sometimes square; the entrances not unfrequently arched or vaulted, while the chamber itself is usually flat-roofed, and often has the ceiling adorned with beams and coffers, in imitation of the abodes of the living. The internal walls of some of the tombs are adorned with paintings, and this decoration is found both in those hewn in the rock, and those sunk beneath the level of the soil: it is, however, peculiar to Southern Etruria, and is by no means general even there. In one respect the sepulchres of Etruria are distinguished from those of the Romans, that they are always *subterranean*, never mere structures raised for the purpose of containing the tomb; there are in many instances, as already mentioned, *superstructures* of an architectural kind, but the actual chamber in which the dead bodies are deposited is sunk beneath these, often at a considerable depth below the surface. The account preserved to us by Pliny (xxxvi. 13. s. 19) of the tomb of Porsena is certainly exaggerated and fabulous in its details and dimensions, but had doubtless some foundation in truth; and some analogies to it have been remarked in the existing remains of several Etruscan monuments. (Dennis, vol. ii. p. 389.) A labyrinth, such as is said to have existed at the base of this tomb, has been also discovered in the *Poggio Gajella*, near *Chiusi*. [CUSIUM.]

2. Of Etruscan *Sculpture*, in the stricter sense of the term, as confined to works carved out of stone or wood, we hear but little from ancient authors; and the existing remains, though numerous, are mostly of inferior interest, from the late period to which they belong. Of this class are especially the numerous sarcophagi and urns or chests for ashes found at *Volterra, Perugia*, and *Chiusi*, the fronts of which are adorned with reliefs, generally representing subjects from the Greek mythology or poetical history, while on the lid is a recumbent figure of the deceased personage. These urns are carved in a soft sandstone or alabaster, and are for the most part of indifferent execution, and certainly belong to a declining period of art, though bearing unquestionable evidence of Greek influence, both in the subjects chosen and in the mode of their treatment. There remain, however, a few statues of figures in a sitting position, found only at *Chiusi*, which present a much more archaic character: as well as certain *cippi* or *stelae* with figures in a very low, almost flat, relief, and a strong rigidity or severity of style resembling the Egyptian. (Dennis, vol. ii. pp. 336—338; Micali, *Pop. Ant. Ital.* pl. 54—58.) But the Etruscans excelled in many other branches of the *Plastic Arts*, and especially in all kinds of works in bronze. Their skill in this department is celebrated by many ancient authors, and is attested also by specimens still extant. The "Tuscanica signa," which, according to Pliny (xxxv. 3. s. 12), were dispersed not only over all Italy, but other parts of the world also, were principally of this material: and so numerous were they, that the city of Volsinii alone was said to have contained two thousand bronze statues. (*Ibid.*) They were characterised by a stiff, archaic style of art, resembling the early Greek or what has been called the Aeginetan style, but which seems to have been retained in Etruria for a much greater length of time than in Greece. Some of the extant specimens, however, present more freedom of design and great boldness of execution. The best examples of Etruscan works of art of this character are the celebrated she-Wolf in the Capitol, the Chimaera in the gallery at Florence, the "Arringatore" or Orator in the same collection, and a statue of a boy in the museum at Leyden. (All these are figured by Micali, *Mon. Pop. Ital.* pl. 42—44.)

Innumerable smaller figures in bronze have been found in Etruria, and evidently represent the "Tyrrhena sigilla" of the Romans (*Hor. Ep.* ii. 2. 181; Tertull. *Apol.* 25): besides these, they were particularly celebrated for their bronze candelabra, which were eagerly sought after both by Greeks and Romans (Athen. xv. p. 700), and of which many beautiful specimens still remain; as well as for a variety of other ornamental utensils of the same material. (*Ib.* i. p. 28. b.; Micali, pl. 32—41.) Another branch of art which appears to have been peculiarly Etruscan, was that of the engraved bronze mirrors (erroneously termed Patere), of which some hundreds have been discovered. To no doubt can exist of their being of native Etruscan manufacture, the inscriptions which occur on them being uniformly in Etruscan characters: their style of execution, however, varies greatly, and is often of a very rude description. (Gerhard, *über die Etrusk. Metallspiegel der Etrusker*, Berlin, 1838.) Nor were they less skilful workmen in other metals: the richly bossed cups of gold were celebrated among the Greeks, even in their best days, and the beauty of their necklaces and other ornamental goldsmith's work is sufficiently proved by existing specimens.

Not less celebrated were the Etruscan works in earthenware or *Terra Cotta*. These were not confined to small objects, such as vases or domestic utensils, but included whole figures and groups, many of them of large size, with which they adorned the exterior, as well as the interior, of their temples. Hence the custom was introduced at Rome, where even the temple of Jupiter in the Capitol was in early times surmounted by earthenware statues of Tuscan manufacture. (Vitruv. iii. 3. § 5; Cic. *de Div.* i. 10; Plut. *Popl.* 13; Plin. xxxv. 12. s. 43.) Closely connected with this branch of art was the Etruscan pottery, in the manufacture of which they undoubtedly excelled; but the only descriptions of works of this kind that can be regarded as of true native origin are the red ware of Arretium, which seems to have been much used in Etruscan times, and the black ware of Clusium, adorned with figures in relief, many of them of a grotesque and strongly oriental character. [CLUSIUM.] The *painted vases*, on the contrary, which have been found in great numbers at Clusium, Tarquinii, and especially of late years at Vulci, though commonly known by the name of ETRUSCAN vases, bear unquestionable evidence of Greek origin. This is proved by their perfect similarity, and in many cases even identity, with similar works found in Cam-

the south of Italy, and Sicily, as well as in Greece itself; and by the fact that they uniformly represent subjects taken from the Greek mythology or heroic legends, and bear, inscribed on them, Greek names and words as well as in several instances the names of Greek artists: but while it is now generally admitted that this branch of art was a foreign importation, it is a still a disputed question whether the vases themselves were of foreign manufacture, or were made in Etruria by Greek artists settled there. The latter opinion has been maintained by Millingen and Gerhard; the former by Müller, Bunsen, Kramer, and Thiersch. (Müller, *Arch. d. Kunst.* § 177, *Kl. Schriften*, vol. ii. pp. 692—708; Gerhard, *Rapporto sui Vasi Volcenti*, in the *Ann. d. Inst. Arch.* 1831; Bunsen, in the same *Annali*, for 1834; Millingen, *On the late Discoveries in Etruria*, in the *Trans. of Roy. Soc. of Lit.* 1830 and 1834; Kramer, *über den Styl u. die Herkunft der bemahlten Griechischen Thongefässen*, Berlin, 1837; Thiersch, *über die Hellenischen bemahlten Vasen*, 1841; Abeken, *Mittel-Italien*, pp. 289—300.)

3. Of the skill of the Etruscans in *Painting* we can judge only from the specimens remaining in their sepulchres, the walls of many of which, especially at Tarquinii, Caere, and Clusium, are decorated with paintings. These are of very unequal merit: some of very rude design, and fantastic in their colouring; others showing much more progress in the art, though retaining a stiffness and formality of character akin to the style of the earliest Greek works, the influence of which is as unquestionable upon this as upon other branches of Etruscan art. The custom of thus adorning the interior of their sepulchres appears, however, to have continued down to a late period, and some of the painted tombs found at Tarquinii belong, without doubt, to the period of the Roman dominion. (Dennis, vol. i. pp. 303—306.)

The character of Etruscan art in general is well summed up by K. O. Müller in the remark that it was rather receptive than creative, and that it always retained the marks of a plant of exotic growth, which, not being indigenous to the soil, began to fade and decline as soon as the vivifying rays of Greek influence were withdrawn from it. (Müller, *Kl. Sch.* vol. i. p. 208; *Arch. d. Kunst.* § 178.)

Of the proficiency of the Etruscans in the more useful arts appertaining to ordinary life, there can be no doubt. They were noted for their skill in agriculture; and not only knew how to turn to the best account the natural fertility of the soil, but, by great works of drainage, and regulating the course of rivers, to bring under profitable cultivation tracts like those at the mouths of the Padus and the Arnus, which would otherwise have been marshy and pestiferous. The Etruscans are also generally regarded as the parents, or first inventors, of the peculiar modes of limitation and division of land in use among the Romans: an art which was indeed closely connected with the rules of the "disciplina Etrusca" appertaining to augury. (Hygin. *de Limit.* p. 166, *Fragm. de Limit.* p. 350.) The iron mines of Ilva, as well as the copper mines of the interior of Etruria itself, were worked by them from a very early period; and their skill in metallurgy was obviously connected with their proficiency in the more ornamental arts of working in bronze, gold, &c. Arretium, especially, seems to have been the seat of considerable manufacturing industry, and, at the time of the Second Punic War, was capable of furnishing a vast quantity of arms and armour to the fleet of Scipio. (Liv. xxviii. 45.) The abundance of copper, probably, also gave rise to the peculiar system of coinage in use among the Etruscans, as well as the other nations of Central Italy, and which must certainly have been of native origin, being wholly opposed to that in use among the Greeks. The Etruscan coinage, like the early Roman, was exclusively of copper, or rather bronze; and the coins themselves, which were of a large size, were cast in moulds instead of being struck with a die. (Müller, *Etrusker*, vol. i. pp. 303—308; Eckhel, vol. i. pp. 85—89.) This early introduction of coined money, as well as the accounts of their naval power, sufficiently proves that the Etruscans must have carried on an extensive commerce, but we have very little account of its details. Their luxurious habits of life would necessarily conduce to the same result, and we learn that they maintained close relations of amity with the Sybarites in Southern Italy, as well as with the Carthaginians. (Arist. *Pol.* iii. 5; Athen. xii. p. 519, b.)

The art of writing was represented by the traditions of the Etruscans themselves as introduced from Greece, and recent researches have led to the same result,—that the Etruscan alphabet was received by them directly from the Greeks, and not, as has been contended by some modern writers, from a common Oriental source. (Müller, *Etr.* vol. ii. pp. 290—309; Mommsen, *Unt. Ital. Dial.* pp. 3—7, 40.) But the Etruscans introduced, in the course of time, some changes in the forms and values of the letters; while, on the other hand, they retained down to the latest period the mode of writing from right to left, which had been early abandoned by the Greeks. Hence, even in the days of Cicero, their books were, as Lucretius phrases it, read *backwards*. ("Tyrrhena *retro* volventem carmina frustra," Lucr. vi. 381.) Of their literature we have no remains, and it may well be doubted whether they ever had anything worthy of the name. Besides their ritual books of various kinds, the "Libri Fulgurales" (alluded to by Lucretius in the above passage), "Libri Augurales," &c., the only works of which we find any mention are Histories or Annals (cited by Varro and by the emperor Claudius), but which appear to have been compiled as late as the second century B. C.; and Tragedies written by one Volnius, a native Etruscan, who seems to have flourished not long before the time of Varro, so that his literary attempts were evidently not of a truly national character. (Varr. *L. L.* v. 55; Id. *ap. Censorin.* 17. § 6.)

The scientific attainments of the Etruscans appear to have been almost confined to those branches of study directly connected with their religious rites and ceremonies, such as the observance of astronomical and meteorological phenomena, the calculation of eclipses, the regulation of the calendar, &c. Their doctrine of Saecula, or ages of varying length, was very peculiar (Censorin. 17. §§ 5, 6; Plut. *Sull.* 7): ten of these ages they regarded as the period allotted to the duration of their nation; and they even went so far as to assign a limit (like the Scandinavians) to the existence of the world, and of the gods themselves. (Varro, *ap. Arnob.* iii. 40.) It was from the Etruscans that the Romans derived their peculiar mode of dividing the months by the Ides, Nones, &c. (Macrob. *Sat.* i. 15; Varr. *L. L.* vi. 28.) Of unquestionable Etruscan origin was also the Roman system of numerals, which has been transmitted

Digitized by Google

through the latter people down to our own times. In the divisions of their money, weights, and measures, as well as in many of their other institutions, we trace a predilection for the duodecimal system, which was adopted from them by the Romans.

(For fuller information concerning the arts and sciences of the Etruscans, as well as their institutions, religious rites, &c., the reader may consult the work of C. O. Müller, *Die Etrusker*, 2 vols. 8vo. Breslau, 1828; and an excellent abridgment by the same author in the article *Hetrurien*, in Ersch and Gruber's *Encyclopaedia*, 1830, republished in Müller's *Kleine Schriften*, vol. i. pp. 129—219: also Micali, *Storia degli Antichi Popoli Italiani*, 3 vols. Florence, 1832; and Abeken, *Mittel-Italien*, 8vo. Stuttgart, 1843. The extant monuments and remains are fully described by Dennis, *Cities and Cemeteries of Etruria*, 2 vols. 8vo. Lond. 1848. Illustrations of the works of art will be found in the plates to Micali's work above cited, and in his *Monumenti Inediti*, 1844. A more numerous suite is given in the older work of Dempster, *Etruria Regalis*, 3 vols. fol. 1723—1767, and by Inghirami, *Monumenti Etruschi*, 7 vols. 4to. 1821—1826; also in the *Monumenti Inediti* published by the *Instituto di Corrispondenza Archeologica* at Rome, a work of which the text or *Annali* also contains much valuable information concerning Etruscan antiquities.)

VIII. Topography.

The physical features of Etruria have been already described, and it therefore only remains to notice the towns, which may be enumerated according to the natural divisions of the country. 1. N. of the Arnus were: Luna, Luca, Pisae, Pistoria, Faesulae, and Florentia, all considerable towns, which are described in separate articles. Besides these, we find in Ptolemy (iii. 1. § 47) the names of Viracelum, supposed to be *Verrucola* in the upper valley of the *Serchio*, and Bondelia, which cannot be identified: but he places in this part of Etruria also a colony of the name of Lucus Feroniae, which cannot therefore be the same place with the one mentioned by Pliny and other writers in Southern Etruria: but it is very doubtful whether this is not a mere error on the part of Ptolemy. [Feroniae Lucus.] 2. Between the Arnus and the Umbro were: Sena, Volaterrae, Populonium, and Rusellae, together with several smaller places or ports on the coast, which must have been dependencies of the inland cities: viz. Portus Pisanus, Portus Herculis Labronis or Liburni, Vada Volaterrana, Portus Faleria, and Portus Trajanus. 3. In the valley of the Clanis, or between that river and the Tiber, were the four powerful cities of Arretium, Cortona, Clusium, and Perusia. 4. S. of the Umbro and proceeding from that river to the Tiber were the important cities of Volsinii, Vetulonia, Cosa, Vulci, Tarquinii, Caere, Veii, and Falerii. But besides these there were in this part of Etruria a number of other towns, some of them scarcely inferior to those just mentioned, others known to us from the occurrence of their names in the early wars of the Romans with the Etruscans, others again whose names are found only in Pliny or Ptolemy, but which are proved by existing remains to have been places of consideration, and ancient Etruscan sites. Of these the following must be mentioned. Between the Umbro and the Marta were Saturnia, Suana, Statonia, Sudertum, and Tuscania. Eba, mentioned only by Ptolemy (iii. 1. § 49), is placed by him within the same limits: and the Verentum or Vesentum of Pliny (ii. 5. s. 8) may probably be placed near the *Lake of Bolsena*. Further to the S. were Ferentum, Falla, Sutrium, Nepete, Forum Cassii, Forum Clodii, Sabate, and Capena: and in the valley of the Tiber, N. of Falerii, were Fescennium, Horta, Polimartium, and Herbanum. Along the coast (proceeding from the mouth of the Umbro to that of the Tiber) were the Portus Telamonis, Portus Herculis or Cosanus, Graviscae, Centumcellae, Castrum Novum, Pyrgi, Alsium, Fregenae, and the Portus Augusti at the mouth of the Tiber. This southern portion of Etruria contains also numerous watering-places, which were frequented in the time of the Roman dominion, and possess at an earlier period also, on account of their mineral waters: among these may be mentioned the Aquae Apollinares, Aquae Passeris, and Aquae Tauri, at which last a considerable town had grown up, so that the "Aquenses Taurini" are enumerated by Pliny (iii. 5. s. 8) among the municipal communities of Etruria. The Aquae Caeretanae also had given rise to a town, which in Strabo's time was better peopled than the ancient city of Caere (Strab. v. p. 220), of which it nevertheless continued a dependency, as did the Aquae Populoniae and Aquae Volaterranae of the respective cities from which they derived their name. Martial alludes (vi. 42) to the abundance and fashionable repute of these Etruscan watering-places in his time. Two other sites which must be placed also in this part of Etruria were the Fanum Voltumnae, the meeting-place of the federal assemblies of the Etruscans, and the Lucus Feroniae, which seems to have been situated near the foot of Soracte.

In the above enumeration of Etruscan towns, the mere stations or obscure villages on the high roads, known only from the Itineraries, have been omitted. Their names will be found in the articles of the Viae on which they were situated. Of these, there were three great high roads proceeding from Rome and traversing Etruria almost in its whole extent. 1. The Via Aurelia, which led from Rome to Arsium, and from thence followed the line of the coast as closely as possible all the way to Pisae, and from thence to Luna, where it was joined by the Via Clodia. 2. The Via Cassia led from Rome through the heart of Etruria by Sutrium, Volsinii, and Clusium to Arretium, from whence it was continued across the mountains to Bononia (Cic. *Phil.* xi. 9: Liv. xxxix. 2), while another branch led from Arretium to Florentia, and thence by Pistoria to Lucca. This last line is called in the Itinerary of Antoninus the Via Clodia, and that name, though not mentioned by Cicero, seems to have in later times become the prevalent one (Orell. *Inscr.* 3143). 3. The Via Clodia, properly so called, was intermediate between the other two; and led by Rusellae, Tuscania, Saturnia, Rusellae, and Sena, to Florentia, where it joined the preceding route. There is, however, some confusion between the two, which is discussed under the articles Via Cassia and Via Clodia. Besides these, the first part of the Via Flaminia, from the Mulvian bridge till it recrossed the Tiber near Ocriculum, lay through Etruria, as well as the Via Amerina, which branched off from the Cassia at Baccanae, and led through Nepe and Falerii to Ameria. [Ameria.] [E. H. B.]

ETYMANDRUS (Ἐτύμανδρος), a river in Persagiana, usually written Erymandrus. [Erymanthus.]

Digitized by Google

EUASPLA (Εὐάσπλα, Arrian, *Anab.* iv. 24), a river in Bactriana. Alexander marched to its banks, and probably crossed it, though this fact is not mentioned. It is most likely the *Khonar* or *Kâma* river, and in size little more than a mountain torrent. The rivers in this part of the country have been variously identified by different scholars. Lassen thinks it the same as the Choaspes, the name being half Greek, half Sanscrit, Euaspes, that is, *Su-aspa;* Reichard takes it to be the *Alishoma*, a tributary of the *Kâbul* river; Ritter (*Erdkunde*, vol. iii. p. 421) and Thirlwall (*Hist. of Greece*, vol. vii. p. 6) consider it the same as the Coas or Choes. The character of the country, and of the tribes with whom Alexander came in contact in this part of his march, inclines us to think the opinion of Wilson (*Ariana*, p. 188), that it is represented by the *Khonar*, is, on the whole, the best. (See also Elphinstone, *Kâbul*, p. 328; Court. *J. As. Soc. Beng.*, April, 1839.) [V.]

EUBOEA (Εὔβοια: *Eth.* Εὐβοεύς, Εὐβοεύς, fem. Εὐβοΐς: Adj. Εὐβοϊκός, Euboicus, Euboeus: *'Egripo* or *Negropont*), the largest island in the Aegaean sea, lying along the coasts of Attica, Boeotia, Locris, and the southern part of Thessaly, from which countries it is separated by the Euboean sea, called the Euripus in its narrowest part. It is a long and narrow island. According to Strabo, its length from N. to S., from the promontory Cenaeum to the promontory Geraestus, is about 1200 stadia, and its greatest breadth 150 stadia. (Strab. x. p. 444.) Pliny describes it as 150 miles in length, and 365 miles in circuit; as in one place more than 40 miles in breadth, and nowhere less than two. (Plin. iv. 12. s. 21.) But these measurements are far from accurate. The real length of the island from N. to S. is about 90 miles; its extreme breadth is 30 miles, but in one part it is not more than 4 miles across.

Throughout the whole length of Euboea there runs a range of mountains, forming as it were the back-bone of the island, which may be regarded as a continuance of the range of Ossa and Pelion, and of that of Othrys. In several parts of the island these mountains rise to a great height. *Mt. Delphi*, on the eastern coast, is 7266 feet above the sea. These mountains consist of grey limestone, with a considerable quantity of clay-slate.

The interior of Euboea has never been thoroughly explored by any modern traveller; and the best description of its physical features is given in the "Penny Cyclopaedia" by a writer well acquainted with the island, to whose account we are chiefly indebted for the following remarks. The northern end of the island, facing the coast of Thessaly and the Pagasaean gulf, is of considerable width. Its north-western extremity is a small peninsula, terminating in the promontory Cenaeum (Κήναιον: *Lithádha*), and containing a mountain called *Lithádha*, which rises to the height of 2837 feet above the sea. Immediately south of the isthmus, which connects this peninsula with the mass of the island, is Mount Telethrius (Τελέθριος, Strab. x. p. 445), 3100 feet high, on the west coast opposite Aenia: at the foot of this mountain upon the coast are some warm springs, called *Therma*, which were celebrated in antiquity. [Aedepsus.] From Telethrius the mountains spread out across the island to the eastern coast, and contain several elevations above 2000 feet in height. Along the foot of these mountains, opposite Thessaly, is the fertile plain of Histiaea. Upon this northern coast was the promontory Artemisium, off which the Greeks gained their celebrated naval victory over the Persians, B. C. 480. [Artemisium.] South of Telethrius there is high land along the western coast as far as *C. Politikâ;* and one of the mountains between these limits, called *Kandíli*, is 4200 feet high. South of *C. Politikâ*, and extending south of Chalcis, is a fertile and extensive plain, bounded on the north and north-east by the high mountains which extend to the eastern coast; this plain, which is the largest in the island, was called Lelantum in antiquity, and was divided between the rival cities of Chalcis and Eretria. The centre of the mountain mass, which bounds this plain, is *Delphi*, already mentioned: it was called in ancient times Dirphys or Dirphe (Δίρφυς, Steph. B. *s. v.*; Δίρφη, Eurip. *Herc. Fur.* 185). South of Chalcis there is for some distance a track of low land along the western coast, backed however by lofty mountains. South of Eretria is the plain of *Alivéri*, after which there appear to be no longer plains of any size. The whole of the southern end of the island is filled by a mass of mountains, presenting a dangerous coast to mariners: the highest elevation of these mountains, called Ocne (Ὄχνη) in antiquity, now *Mt. Elias*, is 4748 feet above the level of the sea. On the summit of Mt. Ocne are the ruins of a very ancient temple, of which a description and drawings are given by Mr. Hawkins in Walpole's *Travels* (p. 288, seq.). The south-eastern extremity of the island was called Caphareus or Capherеus (Καφήρευς), now *Kavo Doro* or *Xylofágo:* the south-western extremity was named Geraestus (Γεραιστός), now *Mandíli*. The dangerous part of the coast, called the Coela or "Hollow," appears to have been a little north of the promontory Geraestus. [Coela.]

The eastern side of Euboea is much more rocky than the western coast. On the eastern side the rocks rise almost precipitously from the water, and are rarely interrupted by any level spot, except towards the northern end. "Fragments of wreck are found at the height of 80 feet perpendicular, washed up by the heavy sea which a north-east wind throws into this bay. These winds, which always blow very strong, are called by the Greeks 'meltem,' probably a corruption of 'mal tiempo.' In addition to this, the Dardanelles current, preserving the course communicated to it by the direction of that strait, sets strong to the south-west into this bay (between the promontories Capharens and Chersonesus), and renders it a most dangerous coast: no vessel once unbayed here can escape destruction. The current being deflected to the southward, sweeps round *C. Doro* (Capharens), frequently at the rate of three miles an hour. Port *Petries* is the only refuge which this coast offers, and so little has hitherto been known of this shore that even this shelter has only recently been discovered. Along the whole extent of this coast, which is upwards of 100 miles, there are only five or six villages near the shore."

It was believed by the ancient writers that Euboea was originally connected with the opposite coast of Greece, and was separated from the latter by an earthquake. (Plin. iv. 12. s. 21; comp. Strab. i. p. 58, x. p. 447.) The channel between the northern end of Euboea and the opposite coast of Thessaly, now called *Triberi* from the Thessalian town of this name, is an average width of about 4 miles, though in one part it contracts to not quite 1½ mile. Upon rounding the promontory Cenaeum, off which lie the small rocky islands called Lichades, and turning to

Digitized by Google

the southward, is the bay of *Tálanda*, so called from the Boeotian town of this name. "A remarkable feature in this part of the channel is the amazing depth of water under Mt. Telethrius, where, for about 12 or 15 miles, there is no bottom with 220 fathoms within half a mile of the shore; but from this point the water shoals gradually towards *Egripo* (Chalcis). Towards the north-west extremity of this shore there is a very safe and excellent harbour, now called Port *Ghialtra* (formerly Port Kalos)." At Chalcis the Euboean sea contracts into a narrow channel, called the Euripus, only 40 yards across. An account of this channel, and of the extraordinary tides which here prevail, is given elsewhere. [CHALCIS.] South of the Euripus are several islands along the Euboean shore, which afford good anchorage. Of these the most important are Glauconnesus, Aegiliae, and the islands Petaliae. (Plin. iv. 12. s. 21; Strab. x. p. 444.)

Euboea is deficient in water. There is not a stream in the whole island into which the smallest boat can enter. Those streams of which the names are mentioned, are: — CALLAS (Καλλάς, Strab. x. p. 445), on the north coast, flowing into the sea near Oreus; — CEREUS (Κηρεύς) and NELEUS (Νηλεύς), of uncertain position, of which it is recorded that the sheep drinking the water of the Cereus became white, while those drinking the water of the Neleus became black (Strab. x. p. 449; Plin. xxxi. 9. s. 2; Antig. Caryst. *Hist. Mirab.* 84); — LELANTUS, flowing through the plain of this name (Plin. iv. 12. s. 21); — and BUDORUS (Βούδωρος, Ptol. iii. 12. s. 25), flowing into the sea on the east coast by Corinthus.

In the plains of Euboea a considerable quantity of corn was grown in antiquity; and there is excellent pasture for sheep in the summer, on the slopes of the mountains. These mountain-lands appear in ancient times to have belonged to the state, and were let out for pasture to such proprietors as had the means of supporting their flocks during the winter. The mountains are said to contain copper and iron, and the marble quarries of Carystus in the southern part of the island were among the most celebrated in Greece. At the present day a light red wine is made from the vines grown in the northern plains of the island; while the plains towards the south are generally cultivated with corn and olives.

Euboea, like many of the other Grecian islands, is said to have borne other names in the most ancient times. Thus, it was called Macris, from its great length in comparison with its breadth. (Strab. x. p. 444.) It was also named Hellopia, properly a district near Histiaea in the northern part of the island, from Hellops, the son of Ion; — Ocha, from the mountain of this name in the south of the island; — and Abantis, from the most ancient inhabitants of the island. (Strab. *l. c.*; Plin. iv. 12. s. 21.) It is observed by Strabo that Homer (*Il.* ii. 536) calls the inhabitants of the island Abantes, though he gives to the island itself the name of Euboea. Hesiod related that the name of Abantis was changed into Euboea from the cow Io, who was even said to have given birth to Epaphus in the island. (Hes. *ap. Steph. B. s. v.* Ἄβαντις; Strab *l. c.*) It would be idle to inquire into the origin of these Abantes. According to Aristotle, they were Thracians who passed over to Euboea from the Thracian town of Abae; while others, in accordance with the common practice, derived their name from an eponymous hero. (Strab. *l. c.*) The southern part of the island was inhabited by Dryopes, who are expressly said to have founded Styra and Carystus (Herod. viii. 46; Thuc. vii. 57); but in the historical period the Abantes had disappeared from Euboea. Herodotus relates that the Abantes assisted in colonising the Ionic cities of Asia Minor. (Herod. i. 146.)

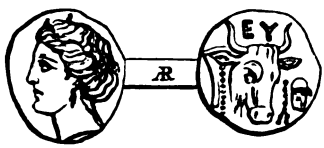
In the historical times most of the cities of Euboea were inhabited by Ionic Greeks; and the Athenians are said to have taken the chief part in their colonisation. Euboea was divided into six or seven independent cities, of which CHALCIS and ERETRIA, on the western coast in the centre of the island, were the most important. In the northern end of the island were situated HISTIAEA, afterwards called Oreus, on the coast opposite Thessaly; DIUM, AEDEPSUS, ATHENAE ISLANDS OROBIAE, and AEGAE, on the west coast opposite Locris; and CERINTHUS, on the east coast. In the southern end of the island were DYSTUS, STIRA, and CARYSTUS. There were also a few smaller places dependent upon these cities, of which a list is given under the names of the cities to which they respectively belonged. All the above-mentioned cities occur in the Iliad, with the exception of Athenae Diades. Scylax mentions only four cities—Carystus, Eretria, Chalcis, and Hestiaea.

As Euboea never formed one political state, it is impossible to give a general history of the whole island without repeating what is mentioned under each city. It is therefore only necessary to mention here a few leading facts, referring for the details of the history to other articles. At a very early period Chalcis and Eretria were two of the most important cities in Greece. They possessed an extensive commerce, and founded colonies on the coasts of Macedonia, Italy, and Sicily, and in the islands of the Aegaean. They continued in a flourishing condition down to the expulsion of the Peisistratidae from Athens, when the Chalcidians joined the Boeotians in making war upon the Athenians. But for this they paid dearly; for the Athenians crossed over to Euboea, defeated the Chalcidians, and divided their lands among 4000 Athenian colonists, B. C. 506. [CHALCIS.] Eretria was destroyed by the Persians in B. C. 490, in consequence of the aid which the Eretrians had rendered to the Ionians, in their revolt from Persia two years previously: and although the city was subsequently rebuilt near its former site, it never recovered its former power. [ERETRIA.] After the Persian wars the whole of Euboea became subject to the Athenians, who regarded it as the most valuable of all their foreign possessions. It supplied them with a considerable quantity of corn, with timber and fire-wood, and with pasture for their horses and flocks. In B. C. 445 the whole island revolted from Athens, but it was speedily reconquered by Pericles. In B. C. 411, shortly after the Athenian misfortune in Sicily, Euboea again revolted from Athens, and its cities continued for a time independent. But when Athens recovered its maritime supremacy, the influence of the Athenians again became predominant in Euboea, in spite of the Thebans, who attempted to bring it under their sway. The Athenians however were no longer able to exercise the same sovereignty over the Euboean cities as they had done during the flourishing period of their empire; and accordingly they did not interfere to put down the tyrants who had established themselves in most of the cities shortly before the time of Philip of Macedon. This monarch availed him-

Digitized by Google

elf of the overtures of Callias, the tyrant of Chalcis, a establish his influence in the island; which virtually became subject to him after the battle of Chaeroneia. From this time Euboea formed a part f the Macedonian dominions, till the Romans rested it from Philip V., and restored to its cities heir independence, B.C. 194. (Liv. xxxiv. 51.) he Euboean cities remained faithful to the Roman liance during the war with the Aetolians (Liv. xxv. 37, 39), but Chalcis fell into the hands of ntiochus when he crossed over into Greece (Liv. xxv. 50, 51). Under the Romans, Euboea was cluded in the province of Achaia.

In the middle ages Euboea was called *Egripo*, corruption of Euripus, the name of the town built pon the ruins of Chalcis. The Venetians, who btained possession of the island upon the dismemerment of the Byzantine empire by the Latins, alled it *Negroponi*, probably a corruption of *Egripo*, and *ponte*, a bridge. The island now forms art of the modern kingdom of Greece. (Comp. iedler, *Reise durch Griechenland*, vol. i. p. 420, eq.: Leake, *Northern Greece*, vol. ii. p. 252, seq.; Tingk, *Rerum Euboicarum Spec.*, Gedani, 1829.)



COIN OF EUBOEA.

EUBURIATES. [LIGURIA.]

EUCA'RPIA (*Εὐκαρπία*: *Eth.* *Εὐκαρπεύς*, Eucarpenus), a town in Phrygia, not far from the sources of the Maeander, on the road from Dorylaeum to Apameia Cibotus; it was situated in a very fertile district, to which it is said to have been indebted for its name. The vine especially grew there very luxuriously. (Steph. B. *s. v.*; Strab. xii. p. 576.) Under the Roman dominion Eucarpia belonged to the *conventus* of Synnada, to the southwest of which city it was situated. (Plin. v. 29; comp. Ptol. v. 2. § 24; Hierocl. p. 666; Geogr. Rav.) Both Arundell (*Discov. in As. Min.* i. p. 136) and Hepert place Eucarpia at no great distance from Cyclar, but its exact site is unknown. [L. S.]

COIN OF EUCARPIA.

EUCRATI'DIA (*Εὐκρατίδια*, Strab. xi. p. 516; Ptol. vi. 11. § 8; Steph. B. *s. v.*), a town in Bactriana, named after the king Eucratides. It has not been found possible to identify it with any modern site. [V.]

EUDEIELUS. [ASPLEDON.]

EUDIERU, a castle in Thessaly, on the southern side of Mt. Olympus, described by Livy as distant 15 miles from the Roman camp between Azorus and Doliche, in the direction of Ascuris and Lapathus. It is identified by Leake with *Konispoli*. (Liv. xliv. 3; Leake, *Northern Greece*, vol. iii. pp. 351, 417, 418.)

EUDIPHUS (*Εὔδιφος*), a town of Cappadocia, in what is called the Pontus Polemoniacus (*Πόντος Πολεμωνιακός*, Ptol. v. 6. § 10; Geogr. Rav., where it is called *Eudipis*.) [L. S.]

EUDO'CIA (*Εὐδοκία*), the name of four different towns in Asia Minor mentioned in the *Synecdemus* of Hierocles: one situated in Phrygia Pacatiana; the second in Pamphylia, in the neighbourhood of Termessus; the third in Lycia; and the fourth in Cappadocia. The last had formerly belonged to the Anatolian Thema, but was incorporated with Cappadocia by Leo VI. (Constant. Porph. *de Admin. Imp.* 50.) [L. S.]

EUDOSES, a people of Germany, mentioned only by Tacitus (*Germ.* 40), were one of the tribes of the Suevi, and probably dwelt in *Mecklenburg*.

EUDOXIOPOLIS [SELYMBRIA.]

EUESPE'RIDAE. [HESPERIDAE].

EUGA'NEI, a people of Northern Italy, who play but an unimportant part in historical times, but appear at an earlier period to have been more powerful and widely spread. Livy expressly tells us (i. 1) that they occupied the whole tract from the Alps to the head of the Adriatic, from which they were expelled by the Veneti. And it is quite in accordance with this statement that Pliny describes Verona as inhabited partly by Rhaetians, partly by Euganeans, and that Cato enumerated 34 towns belonging to them. (Plin. iii. 19. s. 23, 20. s. 24.) They appear to have been driven by the Veneti into the valleys of the Alps on the Italian side of the chain, where they continued to subsist in the time of Pliny as a separate people, and had received the Latin franchise. But they must also have occupied the detached group of volcanic hills between Patavium and Verona, which are still known as the Euganean Hills (*Colli Euganei*), a name evidently transmitted by uninterrupted tradition, though not found in any ancient geographer.

Lucan indeed speaks of the "Euganeus collis," which he associates with the baths of Aponus, and it is probable that the "Euganei lacus" of Martial refer to the same waters. (Lucan, vii. 192; Martial, iv. 25. 4.) The latter author in another passage gives the name of Euganean to the town of Ateste at the foot of the same hills, and Sidonius Apollinaris applies the epithet of "Euganeae chartae" to the writings of Livy. (Id. x. 93; Sidon. Apoll. *Paneg. Anthem.* 189.) Hence it is evident that the tradition of their having previously occupied these regions survived long after their expulsion by the Veneti. According to Cato, the mountain tribes of the Triumpilini and Camuni, considerably further west (in the *Val Camonica* and *Val Trompia*) were also of Euganean race (*ap.* Plin. iii. 20. s. 24).

We have no indication of the national affinities of the Euganeans. Ancient writers appear to have regarded them as a distinct race from the Veneti and from the Rhaetians, as well as from the Gauls who subsequently invaded this part of Italy, but from what stock they proceeded we have no account at all. The notion of their *Greek* descent (Plin. *l. c.*) was evidently a mere etymological fancy, based upon the supposed derivation of their name from *εὐγενῆς*, "the well-born."

The chief tribe of the Euganei was called, according to Pliny, Stoeni or Stoni, a name which is also found in Strabo among the minor Alpine tribes (*Στόνοι*, Strab. iv. p. 204), but we have no clue to their position. [E. H. B.]

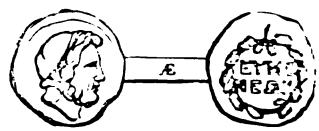
EUHY'DRIUM, a town in Thessaly laid waste by Philip, is supposed by Leake to have been situated upon a conspicuous insulated height on the left bank of the Enipeus, on the road from *Petrinó* to *Fersala*. (Liv. xxxii. 13; Leake, *Northern Greece*, vol. iv. pp. 492, 493.)

EUIA (Εὐία), a town of the Dassaretae (Ptol. iii. 13. § 32), the position of which is unknown. It was here that the undaunted Eurydice, daughter of Amyntas, and wife of Arrhidaeus, was abandoned by her troops and fell into the hands of Polysperchon and Olympias. (Diod. xviii. 11.) [E. B. J.]

EULAEUS (ὁ Εὔλαιος, Strab. xv. p. 728; Diod. xix. 19; Arrian, vii. 7; Plin. vi. 23. s. 26), a river of Susiana, which rises in the mountains to the east of that province, in the district called *Dinarún*, and, after passing the modern town of *Shuster*, flows into the Tigris by means of an artificial canal called the *Haffar*. Its present name is *Karún*. There have been some difficulties about the identification of the ancient Eulaeus, caused chiefly by the confusion which prevails in many of the ancient geographical notices of the rivers of Susiana, and the Choaspes and Coprates having been by some confounded with it. [CHOASPES.] Its principal tributary was the Coprates, now called the river of *Dizful*, which falls into it a little above the town of *Ahwaz*. (Selby, *Ascent of Karún*, in *J. R. Geogr. Soc.* vol. xiv. pt. ii.) In the lower part of its course it probably represents the ancient Pasitigris. (Rawlinson's Map, *J. R. Geogr. Soc.* vol. ix. pt. i.) Strabo, on the authority of Polycleitus, makes the Tigris, Choaspes, and Eulaeus end their courses in a marsh, and thence flow on to the sea; and remarks on the peculiar lightness and purity of its water (xv. pp. 728—735; compare remarks on the same subject by Lieut. Selby, *J. R. Geogr. Soc.* xiv. p. 223). Pliny speaks of the lakes made by the Eulaeus and Tigris near Charax (vi. 23, 26), and adds that the Eulaeus, whose source was in Media, separated Susiana from Elymais (vi. 27. s. 31). Where, however, he states subsequently in the same chapter that it flowed round the citadel of Susa, he is mistaking it for the Coprates, or, more strictly, for a small stream now called the *Shapúr* river, the ancient name of which, however, has not been preserved. In like manner, Pliny is probably in error when he makes the Eulaeus flow through Messabatene. This district is almost certainly the present *Mah-Sabaden* in Laristán, which is drained by the *Kerkhah* (Choaspes), and not by the Eulaeus. There can be no doubt that, in ancient times, the Eulaeus had a direct channel to the sea, which Lieut. Selby (*l. c.* p. 221) states to be at *Khor Bámushir*, about three miles to the E. of the *Shat-al-Arab*, or *Basrah* river. The same may be gathered from Arrian's account of the movements of Alexander, who states that Alexander the Great, having placed the main body of his infantry under the command of Hephaestion to be led to the Persian gulf, himself descended by the Eulaeus to the sea; that, having arrived at its mouth, he thence proceeded by the sea to the Tigris, leaving some of his ships to follow the canal which joined the Eulaeus and Tigris; and that then he ascended the Tigris (vii. 7). Ptolemy speaks of the mouths of the Eulaeus, and gives it a double source in Media and Susiana (vi. 3. 2). This view may perhaps be reconciled, by supposing the Median source to refer to the Coprates (*Dizful*), and the Susianian to the proper Eulaeus or *Karún*. Ptolemy, however, places the mouth of the river much too far to the E., and appears to have confounded it, in this instance, with either the Hidypnus (*Jerrahi*) or the Oroatis (*Tab*). There seems no reason to doubt that the name itself is a Graecised form of the Chaldee Ulai (*Daniel*, viii. 2, 16); though, as we have shown above, the Eulaeus could not in strictness be said to be the river of Susa. [W.]

EUMENEIA (Εὐμένεια: *Eth.* Εὐμενεύς: *Ismeck*), a town of Phrygia, situated on the river Glaucus on the road from Dorylaeum to Apameia. (Plin. v. 29; Strab. xii. 576; Hierocl. p. 667.) It is said to have received its name from Attalus II., who named the town after his brother and predecessor, Eumenes II. (Steph. B. *s. v.*) Ruins and curious sculptures still mark the place as the site of an ancient town. (Hamilton, *Researches*, &c. vol. ii. p. 165.) On some coins found there we read Εὐμενεων Ἀχαιων, which seem to allude to the destruction of Corinth, at which troops of Attalus were present. The district of the town bore the name *Eumenetica Regio*, mentioned by Pliny (*l. c.*). (Comp. Franz, *Fünf Inschriften u. fünf Städte in Kleinasien*, p. 10, fol.) [L. S.]



COIN OF EUMENEIA.

EUONYMI'TAE (Εὐωνυμῖται, Ptol. iv. 7. § 27; Steph. B. p. 288, *s. v.*; Agathemer. *Geogr.* ii. 5; Plin. vi. 35. § 29). Of these people, as of the district occupied by them, the accounts of the ancient geographers are conflicting. One fact alone concerning them seems ascertained, that they dwelt, as their name imports, on the west or left bank of the Nile. Stephanus of Byzantium says that the Euonymitae were an Egyptian people who dwelt on the borders of Aethiopia; Agatharchides places them above the Second Cataract; while Pliny on the authority of Nero's surveyors (*explorators*) describes them as living on the northern frontier of Aethiopia near the island Gagandes. Herodotus however (ii. 30), says that the Automoli, or that portion of the war-caste of Egypt which abandoned its country in the reign of Psammetichus, were called *Asmach*, and that this word signifies in the Greek language those whose station is on the king's left hand. Diodorus (i. 67), indeed, ascribes the insertion of the warriors to their anger at having been transferred by Psammetichus, during an invasion of Syria, from the right wing of the Egyptian army to their hereditary post, to the left. If these etymologies can be at all relied upon, it seems not unlikely that the Euonymitae were permitted by the king of Aethiopia to settle in a district bordering both on Egypt and Meroe, in which position they might be serviceable to their adopted country in its wars with the Pharaohs of Memphis. [W. B. D.]

EUPAGIUM (Εὐπάγιον), a town in the mountainous district of Acroreia in Elis, of unknown site. (Diod. xiv. 17.)

EUPA'LIUM (Εὐπάλιον, Strab., Thuc.: in some edits. of Thuc. written Εὐπάλιον; Eupalium, Liv. Εὐπαλία, Steph. B. *s. v.*; Eupalia, Plin. iv. 3. s. 6. *Eth.* Εὐπαλιεύς), one of the chief towns of Western Locris, situated near the sea, and between Naupactus and Oeantheia. (Strab. ix. p. 427, x. p. 450.) It was the place chosen by Demosthenes for the de-

Digitized by Google

past of his plunder, in B. C. 426; and it was shortly afterwards taken by Eurylochus, the Spartan commander, along with Oeneon. (Thuc. iii. 96, 102.) After the time of Alexander the Great, Eupalium fell into the hands of the Aetolians; and Philip, when he made a descent upon the Aetolian coast in B. C. 207, landed at Erythrae, which is described by Livy as near Eupalium. (Liv. xxviii. 8.) This Erythrae was probably the port of Eupalium. Leake supposes Eupalium to have stood in the plain of *Marathiá*, opposite to the islands *Trisónia* or *Trasónia*, where some ruins of an ancient city still exist on the eastern side of the plain, at no great distance from the sea. (Leake, *Northern Greece*, vol. ii. pp. 617, 618.)

EUPATO'RIA. [AMISUS].

EUPATO'RIUM. [TAURICA CHERSONESUS.]

EUPHO'RBIUM, a town in Phrygia, between Synnada and Apameia, on the spot of the modern *Sanlikli* (Leake, *Asia Minor*, p. 165), formed, together with the towns of Metropolis, Peltae, Acmonia, and some others, the conventus of Apameia. (Plin. v. 29; comp. Geogr. Rav.) It seems, like Eucarpia, to have received its name from the fertility of its territory. (Comp. Hamilton, *Researches in Asia Minor*, vol. ii. p. 169.) [L. S.]

EUPHRANTA or EUPHRANTAS TURRIS Εὐφράντας πύργος, Strab. xvii. p. 836; Εὐφράντα πύργος, Ptol. iv. 3. § 14; Εὐφραντᾶ, *Stadiasm.* p. 52: *Kasr-Safran*, Ru.), a fortress, and apparently also a town, near the bottom of the Great Syrtis. According to Strabo, it was the boundary between the Carthaginian territory and the dominions of the Ptolemies. Adjacent to it was a good harbour, the only one on this part of the coast. By this and other circumstances noticed by the ancients, it is identified with *Kasr-Safran*, where are still to be seen the large ruins of a tower of massive masonry. (Della Cella, p. 50; Barth. pp. 340, 369.) [P. S.]

EUPHRATENSIS. [COMMAGENE.]

EUPHRATES (ὁ Εὐφράτης, Εὐφρήτης), the river of Western Asia, which, with its twin-stream the Tigris, forms the third among the systems of double rivers, which are so peculiarly characteristic of the Asiatic continent, and have had such an important influence on its civilisation and political organisation.

1. *The Name.* — The Euphrates, as it was universally called by the Greek and Roman writers, obtained among the Hebrews the name of "The great river" which was to be the E. boundary of the land granted by Jehovah to the children of Abraham (*Deut.* i. 7), and did actually become the natural limit of the Hebrew monarchy under David. The Prophets when they use it to denote figuratively the Assyrian power, speak of it emphatically as "the river." (*Is.* viii. 5; *Jer.* ii. 18.) The word which still survives in the modern *Frat* or *Fórat*, bore the signification of "fertility" (Joseph. *Antiq.* i. 1. § 3: comp. Winer, *Realwörterbuch*, *s. v.*; Rosenmüller, *Handbuch*, vol. i. pt. i. p. 189.) According to Pliny (v. 20) it did not assume the epithet of Euphrates till it had broken through the defile formed by the E. extremity of Mons Amanus. In the earlier part of its course, as far as Elegia, it was called EXIRATES, and, afterwards, while working its circuitous course through Taurus, OMIRAS. Of its two great sources in the mountains of Armenia, the one is now called *Karâ-Sú*, the E. *Murâd-chái*, which rises on the S. slope of *Alá Tágh*, a mountain about 9000 feet high, and from its size, ought, perhaps, to be considered as the principal stream. The confluence of these two streams, after forming with the Tigris one tidal channel, receives the appellation of *Shatt-el-'Arab*.

2. *Comparative Geography.* — In comparing the statements of the ancients with modern researches and inquiry, it is important to bear in mind that none of the maps describing the course of the river, previous to the publication of the results obtained by Colonel Chesney's expedition, are to be trusted. We are indebted to his work (*Exped. Euphrat.*, London, 1850) for the first accurate and complete survey of the geography of this river-basin. Before entering upon the more precise details which have been supplied by Strabo, Pliny, Ptolemy, and others, it may be serviceable to cast a glance at the history of the progress of discovery of the banks of this mighty stream, which is connected in the earliest and most venerable records with the origin and cradle of the human race, — is linked with the most important events in the history of mankind, as forming the dividing-line for great empires, races, and tongues, — and is, probably, destined in after ages to become again one among the chief of the thoroughfares of the world.

According to Herodotus (i. 180) the Euphrates flowed from Armenia, being large, deep, and swift, discharging itself into the Erythraean sea. The river was navigable from Babylon upwards for those willow boats (i. 194), the counterparts of which, the modern *Kúfah* or basket boats, now float upon the Tigris and Lower Euphrates.

The expedition of the Ten Thousand, which brought the Greeks into contact with the Persian Empire, considerably enlarged the circle of their ideas respecting the Euphrates; and several modern travellers have borne testimony, from personal observation, to the accuracy of Xenophon's description, even at the present day. The army crossed the Euphrates at the ford of Thapsacus, which appears to have been the best known and most frequented passage down to B. C. 100. The breadth of the river here was 4 stadia. (*Anab.* i. 4. § 11.) After crossing the Euphrates, Cyrus proceeded for nine days' march along its left bank till he came to its affluent, the river Araxes or Chaboras, which divided Syria from Arabia. Still advancing along the banks of the river, he entered the Desert where there was no cultivation or even any tree, nothing but wormwood and various aromatic shrubs. (*Anab.* i. 5. § 1.) The country along the left bank of the river, as far as Pylae, being full of hills and narrow valleys, presented many difficulties to the movements of an army. Pylae, it would seem, marked the spot where the desert country N. of Babylonia, with its undulations of land and steep river banks, was exchanged for the fat and fertile alluvial soil of Babylonia Proper. After Cunaxa, the Greeks quitted the Euphrates, nor did they come within sight of it till they reached the E. branch (*Murâd-Chaí*), at a point where the water was not higher than the navel, and as they were told, not far from its sources. (*Anab.* iv. 5. § 2.) Koch (*Zug der Zehn Tausend*, pp. 88—93) is at issue with Colonel Chesney and Mr. Ainsworth as to the point where a ford could be found in mid-winter with snow on the ground. Colonel Chesney (vol. ii. p. 229) asserts that no passage could take place till they reached 39° 10′ N. lat. Koch, whose opinion is preferred by Mr. Grote (*Hist. of Greece*, vol. ix. p. 159), holds that the river would be fordable a little above its confluence with the *Tschorbaher* about lat. 39° 3′.

The third period of history which throws light upon the Euphrates system is the Macedonian Expedition into Asia, B. C. 331. Alexander marched through Phoenicia and Syria to the Euphrates, and following the footsteps of Cyrus, crossed the river at the Zeugma of Thapsacus, which derived its name from the bridge originally constructed for the transport of Alexander's army. (Arrian, *Anab.* iii. 8; Q. Curt. iv. 9; comp. Dion Cass. xi. 17; Kinneir, *Geog. Mem.* p. 316). Local tradition has transmitted the fact of the passage of *Iskender Acbir*, and there is the additional fact, that, tempted by the advantages of the situation, he ordered the city of Nicephorium (*Rhakkah*) to be built. In pursuance of his great plan of fusing the West with the East by the promotion, through Greek influence, of a union between different nations from the Nile to the Euphrates, the Jaxartes, and the Indus, the ancient city of Babylon in the East was intended by Alexander to be one of the metropolitan cities of the Macedonian universal empire. To carry out this design, as the course of the Lower Euphrates was hitherto unknown, Nearchus and other followers of Alexander, were despatched to collect materials: and the narrative preserved by Arrian, of the daring voyage of Nearchus to the estuary of the Euphrates, is the most valuable record of antiquity, by which an idea can be formed of the former condition of the Delta of that river and of Susiana. The fleet finished its course at Diridotes (Teredon), a port which was not unknown, as it was frequented by the Arabian merchants, who brought hither their frankincense and other spices for sale. Teredon or Diridotes, the foundation of which has been assigned to Nebuchadnezzar (comp. Abyd. *ap. Scal. Emend. Temp.* p. 13), was a village at the mouth of the Euphrates, at a distance, according to the reckoning of the Macedonian navigator, of 3300 stadia from Babylon (Arrian, *Ind.* xii.). The position of this place has been fixed at *Jebel Sanam*, a gigantic mound near the Pallacopas branch of the Euphrates, considerably to the N. of the embouchure of the present Euphrates. The fleet, in following the windings of the channel, might be carried much beyond the *Shatt el 'Arab*, which is easily missed, and thus might have reached the supposed mouth of the Pallacopas, opposite to the island of *Boobian* (comp. Chesney, *Exped. Euphrat.* vol. ii. p. 355; Ainsworth, pp. 185—195).

At the dissolution of the Macedonian empire considerable inland intercourse and traffic was encouraged by the Seleucidae; nor can it be doubted but that the marks of population and industry which have been found on the banks of the Euphrates should be referred to the two centuries of their dominion, when the course of the river would be better protected than when it became the boundary-line between Rome and the Parthians. The great highway from Asia Minor to the cities of Persia, which crossed the Zeugma of the Euphrates, and which in later times bore the imposing name of the "road of peace" ("Zeugma Latinae Pacis iter," Stat. *Silv.* iii. 2. 137), though improved and strengthened by the Romans when their power was established through the whole of Mesopotamia, was probably laid down on the lines which were in use at the time of the Seleucid princes. (Comp. Merivale, *Hist. of the Romans under the Empire*, vol. i. p. 517.) The Roman soldiers first crossed the Euphrates under Lucullus, when the passage, in consequence of an accidental drought, was rendered much easier (Plut. *Lucull.* 24); and in the fatal expedition of Crassus seven legions and 4000 horse took the passage at Thapsacus. (Plut. *Crass.* 20.) Augustus was contented to make the Euphrates the E. boundary of the Roman empire; nor was that frontier advanced, except during the short interval of the Eastern conquests of Trajan. Under Hadrian the Roman boundaries again receded within the Euphrates. The campaigns of Trajan, Severus, Julian, Lucullus, Chosroes, and Heraclius, illustrate in a very interesting manner many points in the geography of the banks of this river; but the consideration of them does not fall within the scope of the present article. It may, however, be observed, that Napoleon, when foiled before the walls of Acre in his projected march upon India, had conceived the plan of pursuing the steps of Trajan and Julian.

3. *Physical Geography.* — Strabo (xi. p. 527); Pliny (v. 20), among the ancients, have given a general view of the course of the Euphrates, while, as has been observed above, the narrative of the voyage of Nearchus gives the best account of the then state of the embouchure of the river. It must, however, be recollected that considerable changes have, even in the historic period, taken place in the configuration of the soil of the lower districts, in consequence of the great amount of alluvial matter brought down by the Euphrates to the Delta of the Persian Gulf. Nor is this the only circumstance which makes it difficult, in any satisfactory manner, to reconcile the positions of the ancients with modern investigations — as changes have also been effected by art. The great extent of the plain of Babylonia is everywhere altered by artificial works: mounds arise upon its otherwise uniform level; walls, and mud ramparts and dykes, intersect each other; elevated masses of friable soil and pottery are succeeded by low tracts inundated during the greater part of the year; and the old beds of canals are to be seen in every direction. Further researches may throw great light on the comparative geography of the course of the Lower Euphrates: till then, it may be better to keep our judgment in suspense. It is, however, probable, both from the statements of the ancients and the physical indications of the soil, that the united waters of the Euphrates and the Tigris at some very remote period emptied themselves into the sea by several distinct mouths; one of which was at Teredon, according to Nearchus, — the mouth of the Euphrates; the other the Pasitigris of Pliny, probably the *Shatt-el-'Arab*.

The extent of the basin of the Euphrates, notwithstanding the great length of the river (1800 English miles), has been estimated at not more than 108,000 geographical miles. (Ainsworth, *Researches*, p. 109.) The ancients correctly placed the sources of this river in Taurus, on the W. slopes of the elevated plateau of *Iran*. At *Kebban Maden* the two branches unite, and the Euphrates assumes an imposing character, struggling to make good its original course towards the Mediterranean ("Euphrates obstet Taurus in nostra maria venturus," Plin. *H. N.* iii. § 5), but still pressing against the Taurus chain at the elbow made by *Malatiyah* (Melitene), till it finally forces a passage through Taurus. After precipitating itself through this gap, the Euphrates winds through chalk hills of a moderate elevation, while its waters and those of the Tigris converge and surround Mesopotamia. It was in this district that the fords of the river were made, and the passages of *Sumeisat*, *Rûm Kala'h*, *Bir*, and *Hummam* [illegible]

Digitized by Google

ons identified with the ancient Zeugmas of Samosata, Commagene, Birtha, and Thapsacus, respectively. In the line of the river Euphrates the limits of the upper district terminate to the W. at the hills of *Mesjid Sandabiyah*, and to the E. at the hilly district N. of *Felujah*, including the Pylae of Xenophon. Here the Euphrates ("rapidus Euphrates," Stat. *Silv.* ii. 3. 136) plunges into the low-lying level plains of Babylonia, with the force of its current much diminished; as in the alluvial depressions it is often not a mile an hour, while in its upper course it averages from three to four miles. The current of the Tigris, notwithstanding its traditionary fame for swiftness, does not average more than a mile and a half an hour. After passing the ruins of Babylon, the river appears to become smaller than in its upper course, and was eventually supposed to lose itself in the marshes of *Lamlúm* (comp. Polyb. ix. 43), but, extricating itself from them, carries its waters with those of the Tigris at *Kurnáh*; and the two streams, forming one channel by the name of *Shatt-el-'Arab*, discharge themselves into the sea by the town of *Basrah*. Below the *Shatt-el-'Arab*, Pliny (vi. 29) notices 1. the point at which the mouth of the Euphrates had issued formerly into the gulf, "locus ubi Euphratis ostium fuit," D'Anville's "ancien lit de l'Euphrate;" 2. LUMEN SALSUM, the narrow salt-water channel which separates the low-lying island of *Boobian* off the mouth of the old bed of the Euphrates from the mainland; 3. PROMONTORIUM CHALDONE, the great headland at the entrance of the bay of *Dooat-Kasma*, from the S. opposite *Phelechs* island; and 4. a tract along a sea broken into gulfs, "vorago similibus quam mari," extending for 50 M. P. as far as the river ACHANA (comp. Forster, *Hist. Geog. of Arabia*, vol. ii. p. 212).

The permanent flooding of the Euphrates is caused by the melting of the snow on the mountains along the upper part of its course. This takes place about March, and increases till the end of May, when it is usually at its greatest height. (Colonel Chesney, *Exped. Euphrat.*; Ainsworth, *Researches*; Ritter, *Erdkunde*, vols. x. xi.; Layard, *Nineveh and Babylon.*) [E. B. J.]

EUPILIS LACUS, a small lake in the N. of Italy, at the foot of the Alps, S. of the Lacus Larius, and nearly intermediate between its two arms. Pliny speaks of it as giving rise to, or rather receiving and transmitting, the river Lambrus, still called the Lambro. There are now two small lakes, called the Lago di Pusiano, and *Lago d'Alserio*, which communicate with the *Lambro*, and are separated only by a low marshy tract, so that they probably in the days of Pliny constituted one larger lake. (Plin. iii. 19. s. 23; Cluver. *Ital.* p. 410.) [E. H. B.]

EUPOLIUM. [EUPALIUM.]

EUPORIA (*Εὐπορία*), a city of Macedonia (Steph. B.), and a station on the road from Heracleia to Philippi which passed round the S. side of Lake Bolbe or Cercinitis; according to the Tabular Itinerary, 17 M. P. from Heracleia. This distance, combined with the name, seems to indicate that it was at a ferry across the lake; perhaps at the spot where the lake first begins to narrow three or four miles to the NW. of Amphipolis; but more probably at the W. side of the lake, because Ptolemy (iii. 13. § 35) reckons it among the cities of Bisaltia. (Leake, *Northern Greece*, vol. iii. p. 228.) [E. B. J.]

EUPYRIDAE. [ATTICA, p. 326, a.]

EURIPUS. [CHALCIS; EUBOEA.]

EUROMUS (*Εὔρωμος*: *Eth.* *Εὐρωμεύς*), a town in Caria, at the foot of Mount Grion, which runs parallel with Latmus, was built by one Euromus, a son of Idris, a Carian. (Strab. xiii. pp. 636, 658; Steph. B. *s. v.*; Polyb. xvii. 2; Liv. xxxii. 33, xxxiii. 30, xlv. 25.) Under the Roman dominion Euromus belonged to the conventus of Alabanda. (Plin. v. 28.) Ruins of a temple to the north-west of Alabanda are considered by Leake to belong to Euromus. (*Asia Min.* p. 237.) [L. S.]

EUROPA (*Εὐρώπη*, Herod. et alii; *Εὐρώπεια*, *Εὐρωπία* (ī), Soph. *ap. Steph. B.*: *Eth.* *Εὐρωπαῖος*, fem. *Εὐρωπίς*.) Europe is that portion of the globe which constitutes the NW. division of the Old or Great Continent. Its proper boundaries are, to the N. and W., the Atlantic and Arctic Oceans; to the S., the Mediterranean sea; while to the E. an imaginary line drawn through the Archipelago, the Straits of the Dardanelles, the Sea of Marmora, and the Black sea, as far as the western extremity of Mount Caucasus, is its conventional limit on the side of Asia. From thence the supposed line runs along the Caucasian chain, in an ESE. direction, crosses the Caspian sea, and follows the course of the river Ural and the Uralian Mountains until it terminates at the mouth of the river *Kara*. The most northern point of the mainland of Europe is in lat. 71° 6′ N., its most southern in 36° N.; or, respectively, *C. Nord Kyn*, and the *Punta de Tarifa* in Spain. Its most western point is in long. 9° W., and its most eastern in 60° 20′ E.; or, respectively, *C. St. Vincent*, and a spot in the Uralian Mountains W. of *Ekaterinberg*. The surface of Europe is calculated at about 3,900,000 square miles: and a line drawn from *C. St. Vincent* to the mouth of the river *Kara* on the Frozen Ocean would measure a little above 3000 miles. These limits, however, apply to Europe at the present day, and include a space far exceeding any dimensions ascribed to it even by the best informed of ancient writers. In one respect, indeed, as regards this portion of the Great Continent, modern science and the imperfect knowledge of the early cosmographers singularly coincide. Herodotus and his contemporaries considered, and perhaps rightly, the whole of the earth then known as one single continent, representing Europe, Asia, and Africa as so many divisions of it. Science, on the other hand, looking to the geological continuity of the globe, considers the parts of the old continent as merely forming one organic whole, separable indeed for political purposes, but really connected with each other by common structural and ethnological properties.

The tripartite division of the old continent, with which we are so familiar, was, as regarded the ancients, an arrangement of comparatively recent date. The earliest cosmographers believed that the terraqueous globe consisted of two nearly elliptical hemispheres, surrounded by the great river Oceanus. The Hebrews, even in the 1st century B.C., maintained Palestine to be the centre of the world: and the Greeks ascribed a similar position to their oracles at Delphi or Dodona. By the former the regions west and north of the Great Sea — the Mediterranean — were denominated the Land of Javan and the Islands: and the poet of the Iliad and Odyssey does not include in his catalogue of countries the name of either Asia or Europe. (Steph. B. *s. v. Asia.*) Asia, indeed, in Homer, signifies merely an alluvial district near the Lydian river Cayster (*Il.* ii. 461); and Libya is confined to a small portion of the NE.

Digitized by Google

corner of Africa (*Od.* iv. 351). The geography of the ancients, like their physical science, was founded less upon observation, than upon fanciful cosmogonical correspondences. They imagined that the earth was divided into certain similar parts, of which those of the northern hemisphere answered generally to those of the southern: that, for example, as the Nile flowed in a northerly direction, so the Ister flowed south; and that the globe was encompassed by certain zones or belts of which two were uninhabitable from cold, and one from heat. Nor were these theories the only obstructions to more accurate acquaintance with the extent and configuration of the earth. The most adventurous navigators, the Phoenicians, both of Tyre and Carthage, jealously concealed the course of their voyages as commercial secrets: the Greeks who settled on the coasts of the Mediterranean and Black seas rarely penetrated far into the interior: the conquests of Alexander, which disclosed so much of Asia, scarcely affected Europe: and the best informed of the ancient writers on geography—those of Alexandria—had few, if any, means of ascertaining what regions extended beyond the Carpathian mountains, on the one hand, or the Persian gulf, on the other. The Romans were properly the first surveyors of Europe: yet their knowledge did not extend beyond Jutland, or the western bank of the Vistula. But within those limits, public roads issuing from the forum traversed every province of the empire; colonial towns superseded the rude hamlets of the Gauls and Iberians; and Italian merchants pervaded every district from Teviotdale to the Lilybaean promontory, and from the Atlantic Ocean to the mouths of the Danube. Yet even the Romans were timid navigators: they were content to import amber from the coasts of the Baltic, but never explored the gulfs and bays of that sea itself. They but imperfectly surveyed the shores of Spain and Gaul, preferred long journeys by land to compendious sea-voyages, and to the last regarded the western ocean with a kind of superstitious awe. (Flor. ii. 17. § 192.)

Europe, then, as it was known to the ancients, does not correspond with the modern continent either as respects its boundaries, its divisions, its physical aspect, or its population. We shall examine these points in succession, but must inquire first into the origin of the name itself.

I. *Name.*—The earliest mention of Europe by Greek writers, as a division of the globe, occurs in the Homeric Hymn to Apollo (vv. 250, 251. and 290, 291), where it is distinguished from Peloponnesus and the Greek islands. Aeschylus (*Fragm.* 177) alludes to a threefold partition of the earth, and mentions the river Phasis, in the region of Mount Caucasus, as the boundary between Asia and Europe, and the Columns of Hercules, at the opposite extremity of the continent, as its boundary on the side of Libya. Libya and Europe, indeed, are sometimes represented as one continent. (Agathem. *Geograph.* ii. 2; Sall. *B. Jug.* 17; Lucan, ix. 411). Respecting the origin of the name Europa various hypotheses have been started. (1). The vulgar opinion, sanctioned by the mythologers, was, that our continent derived its appellation from Europa, "the broad-browed" daughter of the Phoenician king Agenor. But such an etymology satisfied neither geographers generally, nor Herodotus in particular, who indeed wonders (iv. 45) how it should have come to pass that the three main divisions of the earth took their names from three females respectively—Asia, Libya, and Europa. The connexion of Europe with Phoenicia is obvious: Tyrian and Sidonian mariners were the earliest explorers of the bays and coast of the Mediterranean, and among the first colonisers of its principal islands and its western shores. They were the first also who passed through the Columns of Hercules, surveyed the coasts of Spain and Gaul, and entered the German Ocean and perhaps the Baltic sea. Also the name Europa bears a close resemblance to the Semitic word *Oreb* — the land of sunset. (Bochart, *Phaleg.* 34.) Such an appellation the Phoenicians of Asia might justly give to the regions westward of the Aegean, even as the Italian navigators in the middle ages, looking from the opposite quarter, denominated the eastern extremity of the Mediterranean the Levant, or the region of sunrise. (2). Agathemerus (*Geograph.* i. 1. p. 3) says that Europa, the SE. wind, is the root of Europa: and Hermann (*Prolegom. Versuch.* p. 33) derives the name from ἔρος, and ὠπία, a Scythian word denoting, as he says, the earth or land generally. Perhaps, however, the most satisfactory explanation of the term is that of Hermann (*ad Hom. Hymn. l. c.*); at least, it is less vague than any of the foregoing. The poet is speaking of the inhabitants of Peloponnesus and the islands, and Europe; of the latter, as distinct apparently from the former two. The Homeric bard was most probably a Greek of Asia Minor. Now, within a few hours' sail from the Asiatic mainland, and within sight of the islands of Thasos and Samothracia, stretched the long and deeply indented line of the Thracian shore — an extent of coast far exceeding that of any of the Greek islands, or even of Peloponnesus itself. Europe, then, as Hermann suggests, is the Broad Land (εὐρὺς ὤψ), as distinguished from the Aegean islands and the peninsula of Pelops. It is remarkable too that, under the Byzantine empire, one among the six dioceses of Thrace was called Europa, as if a vestige of the original designation still lingered on the spot. It may here be noticed that in mythical genealogy Europa is the wife of Zeus, while Asia is the sister or wife of Prometheus: and thus apparently the line of Zeus and the Olympian divinities is connected with the continent; and the line of Prometheus, Epimetheus, Atlas, &c., or the Titanic powers, with Asia and Libya.

II. *Boundaries.* — These have varied considerably at different epochs. We have already seen that Europe and Libya were at one time regarded as the same continent. The gradual discovery and distinction of Europe on charts, and in the language of the learned or the vulgar, arose from two opposite impulses of mankind — commerce and conquest. In the former the Phoenicians took the lead, in the latter the Greeks; but both of these nations rank to the Romans as discoverers of Europe, inasmuch as they explored the inland regions, while the Greeks and Phoenicians, unless attracted, as in the case of Iberia, by the mineral wealth of the interior, planted their colonies and emporia on the verge only of the Mediterranean and Atlantic.

We shall perhaps best understand the progress of discovery by a reference to the accounts of the earliest cosmographers, among whom must be included Homer. (Strab. *Proleg.* 1. p. 2.)

1. About 800 B. C., then, the earth seems to have been generally regarded as an irregular ellipse of which the northern and upper segment comprised

Digitized by Google

e islands of the Aegean sea, Peloponnesus, Hellas, hracia, Thriaacria, or the three-cornered island icily, and a small portion of the boot of Italy, south a line drawn between the Sinus Scylaceus and the inus Hipponiatis. Near the western verge of the rest Sea were the isles of the Sirens and Elysium, d far to the NE. the land of Ogygia. The ellipse as encompassed by the river Oceanus. This was e primitive Europe, as it was known to the con-mporaries of Homer. The author of the Homeric ems was indeed acquainted with the countries round the Aegean, and in some degree also with e southern coast of the Euxine. But when, as in e Odyssey, he mentions more westerly regions, he ails at best in vague rumours, which, if derived rough investigation at all, were probably the gends of Phoenician and Etruscan mariners, partly adulous themselves, partly desirous to exclude the reeks from their trade and settlements in the west Sicily.

2. Three hundred years afterwards the historian ecataeus described the globe as an irregular circle, which the northern hemisphere contained Europa, ith a very uncertain frontier on the side of Asia. me advance, however, in knowledge had been made the meanwhile. The Iberians, Celts, and Scythians cupied respectively Spain, Southern Gaul, the dis-icts between the sources of the Rhine and the Ister, d the S. Danubian plateau. The northern limit Thrace was supposed to be conterminous with an explored and uninhabitable Arctic region. Italy as not as yet known by any single name, but was signated, according to its races, as the land of the rrhenians, Ausonians, and Oenotrians. On the her hand, although the Mediterranean was still minated the Great Sea, — by which name is plied ignorance of the Atlantic Ocean, — the uxine, the Ionian, and Adriatic seas had attained eir permanent titles. Northern Greece, Peloponnesus, and the Mediterranean islands were intimately own. The Cyclopes and Laestrygonians had vanished from the shores of the latter, and even, in e NE., the coasts of the Palus Maeotis were described with tolerable accuracy.

3. Herodotus, who had both travelled extensively mself, and possessed the advantage of consulting e descriptions of his predecessors, Hellanicus, Hecataeus, &c., surpassed them all in his knowledge of circular regions. Yet he was much better acquainted with Western Asia and Aegypt than with Europe generally, to which indeed, if he does not confound it with Asia, he assigns a breadth greatly disproportioned to its true dimensions. He places e region of frost far below the Baltic sea, and presents the river Oceanus as the general boundary of the land. He seems also to have given the Danube a southerly inclination, in order that it may correspond with the northerly course of the Nile. e globe itself he conceived as elliptical rather than Sphaeroidal.

4. Even Eratosthenes, who composed his great work about B. C. 200, and Strabo, who probably had before him the recent surveys of the Roman provinces, made by order of Augustus after B. C. 29, entertained very imperfect notions of the extent of Europe to the north. Of Russia and the Baltic regions generally they knew nothing. The Roman negotiatores, who next to the legions made their way into the heart of every conquered land, did not, until another generation had passed, venture beyond the Rhine or the Weser. The campaigns of Drusus Nero in B. C. 12—9, and of his son Germanicus in 14—16 A. D., first contributed to a more exact acquaintance with central Europe. Pliny the elder was attached to one of the legions of Drusus, and both himself gives a lively account of the Regio Batavorum, and probably imparted to Tacitus many details which the historian inserted in his Treatise on the Germans. It is worthy of remark that, in the interval between the composition of his Germania and the Annals, Tacitus extended and improved his knowledge of the localities and manners of the Teutonic races. His names of tribes and their weapons are amended frequently in the later of these works. Ptolemy the geographer, who wrote about A. D. 135 and in the reign of Hadrian, mentions a considerable number of tribes and places N. of the Roman province of Dacia, as far N. apparently as Novogorod, which were unknown to former cosmographers. But his notices of these regions scarcely extend beyond mere names, which, both as respects their orthography and their relative situations, cannot possibly be identified with any known districts or tribes. The work of Ptolemy itself is indeed both fragmentary and corrupt in its text: yet even if we possessed the whole of it, and more correct manuscripts, we should probably gain little more accurate information. His statements were in the main, as regards those obscure tracts, derived from the vague and contradictory reports of Roman traders, who would naturally magnify the ferocity of the races they visited, and the dangers and privations they had undergone. During the progress of migration southward, as the barriers of the Roman empire successively receded, the population of the lands north of the Tanais, the Volga, and the Caspian sea, both in Europe and Asia, was constantly fluctuating, and its undulations stretched from China to the Atlantic. As race pressed upon race, with a general inclination towards the line of the Pyrenees, the Alps, and the Balkan, the landmarks of geography were effaced, and tribes which Pliny and Tacitus had correctly seated between the Elbe and the Vistula were pushed onward, if they continued to exist independently, into the Alpine regions, or as far westward as the Loire and Garonne. The barbarians indeed, who seized upon Gaul and Iberia after the 4th century A. D., brought with them some knowledge of the regions which they had quitted. But this knowledge was scarcely available for geographical purposes, even when it was not altogether vague and traditionary. It was needful that the great flood of migration should subside in fixed localities before certainty could be obtained. After the fall of the empire, two very different classes of men helped to complete the details of European geography: (1) the Scandinavian pirates, whose voyages extended from the German Ocean to the Black sea; and (2) the missionaries of the Greek church, the first real explorers of the tracts vaguely designated by the ancients as Scythia and Sarmatia. About the 9th century A. D. these pious men had penetrated into the interior of Russia, and brought the Sarmatian tribes into correspondence with the church of Constantinople. Civilisation, and with it a more regular survey of these regions, followed in their track. The preachers of the gospel were stimulated by their zeal to fresh discoveries; and their converts were attracted by the luxuries of the capital. In the same century Charlemagne extended the knowledge of Northern Europe by his crusade against the Saxon heathens; Alfred the

Digitized by Google

Great contributed to the same end by his expedition into the Baltic sea, and compiled from the journals of Other a succinct account of those countries, as well as of the sea-coast of Prussia. In the 13th century that region was annexed to Christendom by the victories of the knights of St. John. From that epoch dates the complete discovery of the European continent from Lapland to the Straits of Gibraltar.

To trace the course of geographical knowledge in Europe southward of its principal mountain-chains, we must revert to the series of Roman conquests in their chronological order. The Romans were, as we have remarked already, the first accurate surveyors of the continent. In the interval between the first and second Punic wars, Illyricum was humbled (B. C. 219) and the eastern shore of the Adriatic laid open to European intercourse. Their advance north of the Rubicon and the Magra was more gradual, yet colonies had been established as outposts among the Boian and Insubrian Gauls before the commencement of the Second Punic War. Epirus and Macedonia were reduced to the form of provinces in B. C. 167, and Illyricum finally broken up into three cantons in the year following. Even in the most flourishing period of the Macedonian empire, Illyricum and Epirus had been very imperfectly explored, and were regarded by the Greek republics as but one degree removed from barbarism. Before B. C. 149 the Romans had begun to attack the Gauls in the Alps, and gradually made themselves masters of the coasts of Dalmatia, of Liguria as far as Spain, and the entire island of Corsica. The Iberian peninsula was first completely subjugated by the Cantabrian wars of Augustus, B. C. 19, although Baetica and Tarraconensis, with the greater portion of Lusitania, had long before received Roman praetors for their governors. By far, however, the most important contributions to geographical knowledge ensued from Caesar's campaigns in Gaul, B. C. 58—50. These opened Europe from the maritime Alps to the Atlantic Ocean, and from the Massilian gulf to the Straits of Dover. Thenceforward the Rhine became one of the boundaries of the empire, and the German races were brought into direct collision with Rome. Beyond that river, indeed, the Romans made little or no progress, since it was the policy of the emperors, bequeathed to them by Augustus, and acted upon for nearly a century by the prudence or indolence of his successors, not to extend further the limits of their dominions. Noricum, Pannonia, Rhaetia, and Vindelicia were, however, humbled or reduced by the lieutenants of Augustus, and the arts of Rome were carried into the Tyrol, Styria, and the territories of modern Austria. In the reigns of Claudius and Vespasian the British islands were annexed to the circle of Roman provinces, and for nearly three centuries recruited its legions and paid tribute to its exchequer. The last important acquisition on the European mainland was Trajan's conquest of Dacia (A. D. 81), by which the frontiers of the empire were carried beyond the Danube, and the yoke of Italy was so firmly impressed upon the vanquished, that to this day the Wallachians entitle themselves in their own language the *Romini*. From the friths of Forth and Clyde, a line drawn across the modern Netherlands to the Crimea will pretty accurately represent the north-eastern verge of the Roman empire in Transalpine Europe. Beyond it the conquerors possessed little, if any, knowledge of the various Teutonic, Celtic, and Sclavonian races who then roved over the great central plateau between the N. bank of the Seine and the Carpathian hills: but with that line their dominion was firmly secured by fortified camps, and flourishing colonies, and bound all by the roads and bridges which connected its most distant provinces with Italy and the capital. These acquisitions were indeed the fruits of centuries of nearly uninterrupted war, and could have been made only by a people who preferred arms to commerce, and who, by fresh encroachments upon their neighbours, were perpetually imposing upon themselves the necessity of securing new and distant frontiers for their dominions. The aspect of Europe as known to the Greeks, was widely different. Of Gaul and Iberia they knew little more than the coasts contiguous to Massilia and Emporia in the east, and to Gades and Tartessus in the south. With the Alpine tribes they were wholly unacquainted, and never more than temporarily subjugated by barbarians on their own frontiers—the mountaineers who from Illyricum to the Euxine were conquered at war with the kings of Epirus and Macedon. In its utmost extent, therefore, the Europe of the ancients was bounded by the mountain-chain which on the north of Thrace, Italy, and Iberia, and comprised scarcely a third part of the modern continent.

The boundaries of this segment were on the western side long undefined. The Mediterranean and the Atlantic were indeed definite barriers: and the regions beyond the great mountain-chain were presumed to be trackless wilds, uninhabitable from cold. Even Polybius (iii. 37, xxxiv. 7, 8. *seq.*), in this respect was not more enlightened than Herodotus. Even Strabo and his contemporaries in the Augustan age conceived the German Ocean and the southern coast of the Baltic to be the proper limits of the continent. In Pliny (iv. 13. s. 17, 16. s. 30) and in Ptolemy (ii. 11. § 33, iv. 6. § 4) we meet with the earliest hints of the Scandinavian regions, which, however, those geographers regarded as groups of islands rather than continuations of the mainland. The boundary between Asia and Europe shifted, with the increase of knowledge, slowly to the west, thereby contracting the supposed breadth of the latter continent. It was originally placed on the right bank of the Caucasian Phasis or Hypanis, next at the Cimmerian Bosporus, and finally determined by the imaginary line drawn along the river Tanais, and across the Euxine, the Hellespont, and the Aegean sea. The Tanais and Hellespont, says Dionysius (*Perieg.* 14, 15), divide Asia from Europe. Procopius, indeed (*B. Goth.* v. 6), recurs to the earlier opinion, that the Phasis was the proper eastern limit.

The dimensions of Europe were consequently misunderstood by the ancient geographers. Herodotus imagined it to be of greater length than Asia and Libya combined. Even Strabo, with far superior means of ascertaining the fact at his disposal, represents Africa as smaller than Europe, and Africa and Europe together as of less extent than Asia alone. Agathemerus (*Geogr.* i. 7) was the first to assign the correct relative proportions to the subdivisions of the old continent. These erroneous computations no doubt arose, in some measure, from the exclusion of nearly the whole of modern Russia and Scandinavia from the calculation. We now know that Africa is more than thrice the size of Europe, and Asia more than four times as large.

Herodotus (iv. 45) complains that no one had discovered whether Europe were an island or not, nor much as its northern and eastern portions were explored. Some rumours, indeed, of islands NW

Digitized by Google

the mainland had in his time reached the civilised portions of the world, through the voyages of the Carthaginians to the Cassiterides, Cornwall, and the Scilly islands. But these enterprising navigators, who could have given the Greeks so much information respecting the western shores of the continent, jealously guarded the secrets of their voyages, and contributed but little to the science of geography. That Punic manuals of navigation existed is rendered probable by the facts that the Carthaginians possessed a literature, and that their treatises on agriculture were deemed of sufficient importance by the Romans to be translated into the Latin language: and it is not likely that they should have entrusted their fleets to the mere traditionary and empirical skill of successive generations of pilots. But their knowledge perished with them; and the Greeks, excellent as they have been in all ages as navigators of the narrow seas, were rarely explorers of the main ocean. For shore-traffic, indeed, Europe is the best calculated of continents, since it presents by far the greatest extent of coast-line, and hence is described by Strabo (ii. 126) as πολυσχημοτάτη, or the most variously figured of the earth's divisions. To a Greek, Europe, bounded on the north by a curve of mountains, and springing forth by three main projections into the seas southward of its mountain-bases, presented the aspect of three pyramidal peninsulas of land, — Iberia, Italia, Hellas (to which Polybius adds a fourth in Thrace and a fifth in the Crimea),—respectively resting upon the Pyrenees, the Alps, and the Balkan range. This supposed configuration was the theme of frequent comment among the ancient cosmographers, and the source of many ingenious theories regarding the agencies of fire or water in producing them. But it is intelligible only when we remember the limits in which Europe, as known to the Greeks, was confined. To an ancient navigator, however, sailing from a port in Asia Minor to the Columns of Hercules, this configuration would necessarily be a subject of remark, since he would pass alternate projections of land and the deeply embayed gulfs of the Aegean, Ionian, and Tuscan seas, and witness, as it seemed to him, successive confirmations of his preconceived notions of the form of the continent. In these respects, as well as in the more undulating character of its shore, Europe presented a marked contrast to both Asia and Africa. Yet the Greeks, ever on the alert for physical analogies, discovered a similar distribution of land and water in the Arabian peninsula and the seas which bound it, as well as in the long valley of the Nile; and they thus arrived at the conclusion, not only that this phenomenon was repeated in every zone, but also that the earth was constructed on a system of parallelisms, so that the northern and southern hemispheres were nearly counterparts of each other.

III. *The Climate and Products of Europe.* — The climate of central Europe affected the progress of discovery northward. The mean temperature of Rome, Italy, and Greece was lower than at the present day; while Gaul and Germany experienced almost the rigours of an Arctic winter. In their wars with Rome we find Gaulish clans, accustomed to a colder and more bracing atmosphere, exhausted by the heat of modern Lombardy, although that region is not now sensibly warmer than the south of France. But central Europe was, for many centuries, as regards its climate, what Canada is at the present day. The vast forests and morasses of Gaul and Germany were, until nearly the 9th century of our era, unfelled and undrained, and aggravated the cold and humidity of the northern sides of the Alps and Pyrenees. Nor was the southern flank of these mountains unaffected by the same causes. The Romans, even in their Italian wars, rarely took the field before the month of April, since they dreaded encountering the snow-storms of the Apennines, and the floods which at the melting of the ice converted the feeders of the Tiber into rapid torrents. The snow lay then periodically on Mt. Soracte, and the Sabellian herdsmen found fresh pastures as late as July in the upper valleys of the Abruzzi. Ovid, in the epistles which he wrote in exile, describes the cold of the Euxine and its adjacent coasts as a modern traveller would describe the temperature of Stockholm and the Baltic, and in the latitude of Saxony the legions of Drusus and Germanicus endured many of the hardships of a Russian winter. (Tac. *Ann.* i. 60, ii. 24.) We may indeed suspect that the legionaries owed some of their ill-success in the German wars less to the inclemency of the elements, than to the skill or valour with which they were opposed. Yet the horns of the moose-deer which are occasionally dug up in the fens of Southern Germany attest the presence of Arctic animals in those regions, and the tribute of furs imposed by the Romans upon their Rhenish provincials imply a temperature far below the ordinary climate of the same regions at the present time.

Upon the climate and productions, however, of those portions of Europe with which they were better acquainted, of Europe south of the Alps and Pyrenees, the ancients expatiated with pride and admiration. They ascribed to its soil and temperature generally, that golden mean which is most conducive to the increase, the health, and the physical and moral development of the human species. Europe, they alleged, was happily seated between the zones of insufferable heat and cold. It was exempt from the fiercer animals and the more noxious reptiles of the neighbouring continents. Asia and Africa were more abundantly endowed with the luxuries with which man can dispense — with gems, silks, aromatics, and ivory; but Europe produced more uniformly than either of them the necessaries which are indispensable to his health, strength, and safety — corn, wine, and oil, timber and stone, iron and copper, and even the more precious metals, gold and silver. (Strab. ii. pp. 126, 127.) The Scythians and Germans, indeed, were but scantily provided with these adjuncts of life and civilisation; nature had reserved her boons for the more refined and intelligent natives of the south. Greece was in these respects highly favoured: the horses of Thessaly, the corn of Boeotia, the figs and olives of Athens, the vineyards of Chios and Samos, were celebrated throughout the world. But Italy, in the estimation of its children at least, was the garden, as well as the mistress, of the world. (Varro, *R. R.* i. 2; Columell. *R. R.* iii. 7; Plin. iii. 1, seq.; Virg. *Georg.* i. 136, seq.) Its several provinces were distinguished each by its peculiar gifts — Campania by its wines, Tarentum by its fleeces, Etruria by its rich pastures, and Cisalpine Gaul by its cerealia. By its central position in the Mediterranean, Italy was enabled to impart to less favoured regions its own products, and to attract to itself the gifts of other lands — the minerals of Iberia, the hides, the timber, the herds, and horses of Gaul, the marbles and the fruits of Greece, and the beauty and strength

Digitized by Google

of the British Celts. In Europe, also, it was easy to acclimatise the fruits and animals of other regions. The almond, oleander, the cherry, the acacia, and syringa were imported from Asia Minor; the vine and apricot, from Armenia; from Persia, many species of the numerous genus Pomum,—the orange, peach, citron, &c.; while the fig, olive, and date-palm, the damask rose and the mulberry, had been transplanted from Libya and Syria. The European shores of the Mediterranean exhibit also many families of African plants, and the flora of Sicily and Baetica combine the productions of the temperate and tropical zones. Of these additions to the food or luxury of man, not a few were imported into Europe by the Greek or Roman conquerors of the East. Nor were these accessions confined to the districts which at first received them. To its Roman masters Gaul and the Rhenish provinces owed the vine, a finer breed of sheep, and several kinds of domestic poultry. The olive was carried from Greece to Spain, and the race of Gaulish horses improved by intermixture with the swifter and more delicately limbed varieties of Numidia and Arabia. Finally, the silkworm, whose productions scandalised the economists and philosophers of Rome by draining Italy of its gold and by adding new incentives to extravagance, was naturalised in Greece and Italy in the 6th century of our era, and by its introduction gave a new impulse to European manufactures.

IV. *Population of Europe.*—The history of the population of Europe belongs in part to the description of the several portions of it; and, as a whole, is both too speculative and too extensive an inquiry for a sketch like the present. Neither are our materials for such an investigation either abundant or satisfactory. Our only guides on this point, beyond some doubtful resemblances of manners and customs, and some data founded upon the structure of language, are Greek and Roman writers. But the prejudice which led the Greeks to regard all unhellenic races as barbarous was very unfavourable to ethnological science; and even when they treat of pre-historic races, they throw a mythological veil over the records of early colonisation. The movements of mankind from the east were, in their conceptions, either regulated by a god, like Dionysus, or by the son of a god, like Heracles. The Romans, again, were satisfied with incorporating races among their provincials, and incurious about their origin or physical characteristics. The Greeks also, inhabiting the SE. corner of Europe, and watching the movements of their own colonies alone, or at most gleaning the reports of Phoenician and Etruscan mariners, often purposely involved in fable, always, it is probable, exaggerated, imagined that the main stream of European population had flowed generally across the Aegean sea from the coasts of Asia Minor, with occasional interruptions or admixtures from Phoenicia and Aegypt. They were unaware of the fact which modern ethnology has brought to light, that the course of immigration was rather from central Asia to central Europe, by a route lying north of the Euxine sea and intersecting the great rivers which flow eastward and southward from the Alps and Russia. They traced the origin of music and song to Thrace, but they did not know, or would not admit, that the population of Hellas itself was derived quite as much from Thrace as from the Lesser Asia. Three main streams of population intermingling with each other in certain localities, yet sufficiently distinct for definition, may be discerned: (1). The Celts and Cimmerians, who entered our continent from the steppes of the Caucasus, and, passing round the head of the Black sea, spread themselves over the whole of Europe, and permanently settled in the west. (2). The Sclavonians, or, as the ancients denominated them, Scythians and Sarmatians, who occupied the east of Europe, where they are found beside the earliest Celtic colonies. The river Oder, however, seems to have been the western limit of the Sarmatians. Thence, without establishing themselves in the Alps, they turned in a southerly direction, and they contributed largely to the population of both Greece and Italy. (3). The Teutons—who appear at different epochs: (1). as Low Germans, from the regions between the Oxus and Jaxartes, and established themselves in the NW. of Europe, and (2). as High Germans, who, displacing the Celts and Sclavonians, occupied the middle-highlands of Germany, and in the historic period are found east of the Rhine and north of the Danube. The whole plateau of central Europe, however, was perpetually undergoing a change in its population from the flux and reflux of these principal elements; and at last towards the close of the 1st century B.C. the Roman legions passed the Rhine and entered the Hercynian forest, they found both Celts and High and Low Germans arrayed against them from the Hercynian *pagi* to the frontiers of Bohemia. The Iberian peninsula alone may serve for an example of the admixture of races in the European continent. In it we can trace no less than six waves of immigration. (1). The Celtic, pushed to its western barrier by the encroachments of the Sclavonians and Teutons; (2). the Iberian, whose language, as it appears in the modern Basque dialect, indicates a Celto-Finnish origin, and consequently a derivation of the Iberian people itself from the remote eastern steppes of Asia: the Celtiberi, as their name imports, were a hybrid race formed by the fusion of the two; (3). the Libyo-Phoenicians of the south, who were introduced by the Carthaginians; and (4) an Italian element brought in by the Romans. A fifth variety was occasioned by the irruption of the northern tribes—Vandals, Visigoths, and Suevi—in the 5th century A.D., by which movement a High and Low German element was added to the original population. Lastly, in the 8th century A.D., with the Arabian conquest came an infusion of Semitic blood. The Greek colonies—Saguntum and Emporium,—founded by Zacynthus and Massilians respectively, were scarcely so permanent or so important as to affect materially the population of Spain.

V. *Languages of Europe.*—Of the dialects spoken in ancient Europe we know even less than of its ethnography. The educated Romans used two languages familiarly, their own and the Greek; the Greeks, one only: and both alike, in general, contemned all other idioms as unworthy the attention of civilised men. Their communication with foreigners was carried on through the medium of interpreters, and a few instances only are recorded of a Greek (Corn. Nep. *Themist.* c. 10) or a Roman (Ovid. *Ep. ex Pont.* iv., *Ep.* 13) undergoing the drudgery of learning a foreign tongue. On the other hand, the dialects of the other races of Europe, being neither refined nor preserved by a native literature, speedily vanished. The Celtic gave place in the Gallic and Spanish provinces of Rome to the general employment of Latin; and even the Germans beyond the Rhine acquired the speech of their conquerors

Digitized by Google

Tac. *Ann.* i. 58, ii. 10). The confusion, or indeed the obliteration, of tongues was further accelerated by the collection within the Roman empire of soldiers and slaves from nearly every region of the world. It was easier for these aliens to forego their own vernacular dialects and to acquire the common language of their masters, than to communicate with each other in a *lingua franca* compounded of the most opposite varieties of speech. How easily a common language might supersede a native idiom appears from two remarkable cases in ancient history. (1). The Jews, after the foundation of Alexandria, generally adopted the Greek tongue in all their "cities of dispersion" west of Palestine. Their sacred books were translated into Hellenic, and that idiom was employed even in the service of their synagogues. (2). The Etruscans, for at least six centuries after the foundation of Rome, regulated the more solemn ceremonies and expounded the most startling prodigies of the Roman people. Yet the Romans themselves rarely acquired the language of their sacerdotal instructors, and Latin was the organ of communication for all the tribes between the Tiber and the Magra. This prevailing influence of two languages in the more civilised portions of ancient Europe, combined with the circumstance that nearly all our knowledge of its various races is derived from Roman or Greek writers, who, when they touched upon philology at all, either perverted it or made themselves ridiculous, throws an almost impenetrable cloud over the subject of the original dialects of Europe. A few broad lines and a few probable analogies are all that modern linguistic science is able to contribute towards elucidating a subject which, if clearly understood, would explain also, in a great degree, the movements, the interweaving, and the final position of the European races. The Sclavonian race, at one time, extended from the Adriatic to the Arctic sea, comprising the Sarmatae, Roxolani, from whom the Russians derive their name, the Illyrians, Pannonians, and Veneti, &c. Westward of Modern Saxony their progress was arrested by the Celts: in prehistoric times, indeed, the Celts may be described generally as the occupiers of the western half of the continent north of the Alps and Pyrenees, and the Sclavonians of the eastern. Both were respectively either interpenetrated or pushed onward by the third great stream of immigrants from Asia — the Teutonic family of nations. The Sclavonians indeed maintained themselves east of the Vistula, although even here they were encroached upon by Low German and even Mongol races, which the ancients described under the general appellation of Scythians. The Celts were more effectually displaced by the Teutons, and in historic ages were found in large masses in Gaul and the British islands alone. Yet even in these, their ultimate retreats, they yielded to the stronger and better organised races which followed their steps — to the Franks, a High German people, in Gaul; and to the Saxons, a Low German people, in Britain. There was indeed a perpetual shifting, interweaving, advance, and even, in some cases, retrocession of the central population of the continent. Among the Germans, as described by Tacitus, are to be found Celtic tribes: in Celtic Britain long strips of territory, as well in the interior as on the coast, were occupied by Teutons: the Sclavonians regained Bohemia from the High Germans; and the Gauls, who in the 4th century B.C. sacked Rome and Delphi, in the same generation established themselves between the Magra, the Rubicon, and the Alps, from which region they expelled Germans and Sclavonians. The basis of the original population of Greece and Italy was Pelasgian; at least, Pelasgians were the first national element which history acknowledges, or to which concurrent traditions point. So much of the population of Hellas as did not enter Europe from the sea-bord was derived from Thrace, and Thrace was peopled by Sclavonians. The most archaic forms of the Hellenic and Latin languages indicate such an original, and the traditions of the Greeks and the Latins equally confirm this supposition; for the former point to the Hyperborean regions — i. e. to the north of the range of Ossa and Olympus — as the cradle of their race (Diod. ii. 47. p. 198, Dindorf.; Clem. Alex. *Strom.* 1. p. 225), and the latter derive the royal line of Alba and Rome from Mysia and the Troad. Arcadians, too, — i. e. Pelasgians, — were settled on Mount Palatine before the arrival of colonists from Asia: and the subject population of Etruria bears numerous traces of a Pelasgian origin. The races of Western Asia and Eastern Europe were long identical, and we have already seen that no actual boundary for many ages was known between these divisions of the Great Continent. As the earliest stream from central Asia, the Sclavonian, occupied both sides of the Aegean sea, and spread over Pontus and Colchis, and round the head of the Euxine as far as Mount Haemus, we are probably justified in recognising a Sclavonian population throughout the region that intervened between the Taurian chain and the western coast of Italy, and in ascribing the Pelasgian inhabitants of the Hellenic and Ausonian peninsulas to the Sclavonian stem. In both instances, indeed, it was early and materially affected by Celtic and Teutonic admixtures. Finally, the Hellenes, a High German race, predominated in Greece; and Low German tribes, to which the Sabellian stock belonged, in Italy. The southern coasts of the Mediterranean were more nearly affected by Semitic immigrations from Phoenicia and Carthage than the interior of the continent, but not so much as to affect materially the stronger germs of population — whether Sclavonian, Celtic, or Teutonic.

The principal mountains and rivers of Europe are described under their respective heads, or in the general account of the countries to which they belong. We must, however, before closing our sketch of the NW. division of the Great Continent, briefly advert to some features of its geological system.

VI. *Geological Features.* — Since we are treating more especially of Europe as it was known to the ancients, it will be expedient to restrict our survey of its river and mountain-system to the boundaries assigned to the continent by geographers unacquainted with nearly two-thirds of it, — the whole of Scandinavia, and the greater portion of Russia. In fact, the Europe of the ancients, if we require definite accounts of it, is nearly conterminous with the European provinces of Rome. Nor by such exclusion do we omit, as respects Europe generally, any material feature or element of its configuration; for the Scandinavian Alps are separated from the body of the European mountains by the great NE. plains, and the Grampian Highlands, with their English and Welsh branches, are also an insulated group; whereas all the mountains of central and Southern Europe, from Calpe to the Bosporus, and from Aetna to the northern flank of the Carpathians, constitute in reality but one system, which custom has divided into certain principal masses or

Digitized by Google

families. The great mountain-zone which forms the base of the three or five southern peninsulas of Europe, and from which its principal northern rivers descend, commences with the promontory of Artabrum (*C. Finisterre*), and is terminated by the Hellespont and Propontis. Of this rocky girdle the highest points are the *Pic du Midi* in the Pyrenees, rising 11,271 feet above the level of the sea; Mont Blanc, 16,800 feet; and the summits of Mt. Haemus or the Great Balkan. All the other groups or chains, whether, like the Carpathians, running up the centre of the continent, or, like the Apennines and the Spanish and Greek mountains, descending to its southern extremities, are to be regarded, whatever their relative dimensions may be, as secondaries only of the principal zone,—its spurs or buttresses. To the southward these protuberances run for the most part in parallel ridges, such as the sierras of Spain, and the elliptical hollows of the Apennines; or, like Mount Haemus, they are split into narrow but profound fissures, into which the light of day scarcely penetrates. In Spain and Italy the mountains in general decline gradually as they approach the Mediterranean, whereas the Grecian ranges project strongly into the sea, and re-appear in the numerous rocky islands which stud the Aegean. The general geological features of this zone are, in the Iberian mountains, granite, crystalline strata, and primary fossiliferous rocks. On each side of the central chain of the Alps calcareous rocks form two great mountain-zones, and rise occasionally to an altitude of ten or twelve thousand feet. Crystalline schists of various kinds generally constitute the pinnacles of the Alpine crest and its offsets. The Apennines and the Sicilian mountains are mostly calcareous rocks. Secondary limestones occupy a great portion of the high land of Eastern Europe. Beginning from the western extremity of this zone, we find that the northern or Gaulish side of the Pyrenees is the more precipitous and abrupt, and its summits so notched and ragged that from the plains below they appear like the teeth of a saw, whence the term *Sierra* (Mons Serratus) has been appropriated to the Iberian mountains, where this conformation especially prevails. On the Spanish side, the Pyrenees descend towards the Ebro in gigantic terraces separated by deep precipitous valleys. The greatest breadth of the Pyrenean range is about 60 miles, and its length 270.

On the northern flank, the most conspicuous offsets of the zone are the volcanic mountains of Auvergne and the Cevennes. These, indeed, are the link between the more elevated masses of Western and Eastern Europe. The projections of the Cevennes extend to the right bank of the Rhone, and the Jura mountains of the Alpine range. The northern provinces of France form a portion of that immense plain, which, without taking into account smaller eminences and undulations, extends from the Seine to the shores of the Baltic and the Black seas, through Belgium, Prussia, Poland, and Russia.

The European mountain-zone attains a greater altitude as it proceeds eastward. About the 52nd parallel of north latitude, it begins to ascend by terraces, groups, and concentric or parallel chains, until it reaches its highest elevation in the range of the Alps and the Balkan. The immediate projections of the Alps, on the side of Cisalpine Gaul or Lombardy, are comparatively short, but rapid and abrupt. The spine of the Italian peninsula, however, the chain of the Apennines, as well as the Sicilian mountains, are really continuations of the Alps, even as the Grecian mountains through Northern Illyria as far as the Laconian highlands are continuations of Mount Haemus. The Carnic or more properly the Julian Alps connect, under the 18th meridian, the Balkan with the centre of the range of the Helvetian and Italian Alps. The river-system of Italy has no features in common with those of Spain. In the latter peninsula the valleys intersected by the sierras were, in some remote era, the basins of lakes, of which the Spanish rivers are the remainaries: whereas the watershed of the Apennines is generally brief and rapid; and the Arno, the Tiber the Liris, &c. have in all ages been subject to sudden overflow of their waters, and to as sudden subsidence. In Cisalpine Gaul, indeed, a network of streams, combining into central reservoirs, — the Po the Athesis, &c., — furnishes, with little aid from man, a natural irrigation to the rich alluvial plains. The whole region was probably at one period a vast lake, of which the banks were the Alpine promontories and the windings of the Apennines, and which gradually rose with the constant deposition of soil from those mountains. The rivers S. of the Po which flow into the Adriatic sea are generally inconsiderable in their length or volume of water; but those which discharge themselves into the Lower Sea, the Mare Etruscum, descend more gradually, and in the centre of the peninsula at least more equally subserve the purposes of tillage and inland navigation. Calcareous rocks constitute the principal range of the Apennines, and fill the greater part of Sicily. But at least half of that island is covered with the newer Pleiocene strata; while zones of the older Pleiocene period, filled with organic remains, cover each flank of the Apennines.

The principal projections of the zone north of Italy are the Hyrcanian mountains, the Sudetes, and the Carpathian mountains. The former stretch in three parallel ridges from the right bank of the Elbe, about lat. 51° or 52° N., to the centre of Germany. Eastward of this group the Sudetes begin, and terminate at the plain of the Upper Oder. At this point they are connected with the Carpathians, which, however, differ in configuration from the other links of the range. For they are not a single chain, but groups, connected by elevated plains, and attaining at certain points — as at Mount Tatra, under the 20th meridian — a considerable altitude. The breadth of the Alpine chain is greatest between the 15th and 16th meridians, and least at its junction with the Balkan, under the 18th, where it does not exceed 80 miles.

The Balkan, in respect of its elevated table-land, is a connecting link between the mountain-systems of Europe and Asia. With the exception of the Jura, this tabular form does not occur in the central Alps. On the other hand, the great lakes which are so frequently met with in European mountains are rarely found, except in the Altaian range, in those of Asia. Mount Haemus, the third of the mountain-bases of ancient Europe, begins near the town of Sophia, whence it runs along an elevated terrace for 600 miles to the Black sea. Longitudinal valleys of great fertility separate its parallel ridges; but its chains are rent and torn in all directions by profound and precipitous chasms, by which alone the range is permeable. Granite forms the bases of the mountain-system of Eastern Europe, but it rarely pierces the crust of crystalline schists and secondary limestones. Calcareous rocks, indeed,

Digitized by Google

compose principally the highlands of Bosnia, Macedonia, and Albania. Transverse fractures, like those of the Balkan, occur generally in the Greek mountains. The intervening valleys are mostly caldron-shaped hollows, both in Northern Greece and in Peloponnesus. Volcanic convulsions in some districts, and in Boeotia especially, have broken down the natural barriers of these hollows, and allowed their waters to escape: but in the Morea, where there have been no such outlets, they percolate through the soil. The rivers of Southern Greece are, for the most part, fordable in summer and torrents in winter and spring.

A glance at the map of Europe will suffice to show that, from its general configuration, the NW. division of the old continent is much more favourable to uniform civilisation and the physical well-being and development of its inhabitants, than that of either Africa or Asia. On the one hand, the extent of its coast-line, its numerous promontories and bays, act as causes of severance between the members of its family, and, by preventing their accumulation in masses like those of the Asiatic empires, preserve and stimulate the separate activity of the whole: on the other, the obstacles to national and federal union are not, as in many regions of the African continent, insurmountable, but, on the contrary, the central position of its sea, — the Mediterranean and its branches, — and the course of its rivers, running deep into the interior, afford natural paths of communication for all its races. No barren deserts divide its cities from one another: its table-lands are not, as in Asia, lifted into the region of snow, nor its plains condemned to sterility by the hot pestilential winds, such as sweep over the great Sahara. Europe, indeed, is not the cradle of civilisation, — *that* had attained at least a high formal maturity on the banks of the Tigris, the Euphrates, and the Nile, ages before Agamemnon ruled in Mycenae, or Theseus drew the demi of Attica within the precincts of a common wall. Neither to Europe do we owe the moral precepts of religion and ethics, nor the germs of the arts which civilise life. In every one of these elements of social progression Asia and Aegypt took the lead. But, although neither the original parent nor the earliest nurse of civilisation, Europe has been for nearly 3000 years that portion of the world which has most actively, assiduously, and successfully enriched, advanced, and perfected these rudiments of moral, intellectual, and political cultivation. Of civil freedom it was the birthplace: neither of the other continents, however mature may have been its peculiar civilisation, has ever possessed, without the aid of European contact and example, a community of free men, who distinguished the obedience which they owe to law from the subservience which is paid to a master. And, possessing civil freedom, at least among its nobler and its governing races, Europe has ever owed to a higher stage of development every lesson and every art which it derived from other regions, and elevated the type and standard of humanity itself. Asia and Africa have generically receded from, and, in the majority of their races, lost sight of entirely, the ideas and the conditions of progressive civilisation. In these regions man is a weed. He is ruled in masses; he thinks in masses. His institutions, his ideas, and modes of faith are unchanged through the most immemorial tracts of time. The opposite aspect presented by European civilisation may be ascribed, in the first place, to the physical advantages, which we have enumerated, and which render our continent the most uniformly habitable portion of the globe; (2) to the fact that our civilisation received its original impulse from the SE. corner of Europe, where the Hellenic race, in the small compass of a few degrees of latitude, rehearsed, as it were, the forms of government, federalism, and negotiation, which were destined afterwards to be the principles or postulates of European policy; (3) to the circumstance that the Roman Empire, by its conquests and colonies, stamped a general impress of resemblance upon the families of Europe; and (4) that, as the ancient civilisation declined, two new elements of life were infused into Europe, — a young and vigorous population from the North, and a purer and more comprehensive religion from the East. By the combination of these several elements our continent alone has been advancing, while the sister divisions of the globe have receded; and it is a consequence of such advance and of such recession, that Europe has repaid with large interest its original debt of civilisation to both Asia and Africa, and has become, in all the arts which elevate or refine our race, the instructor in place of the pupil. (See Ritter, *Die Vorhalle Europäischer Volkergeschichten*, &c. 1820; Ukert, *Geographie der Griechen und Römer;* Rennell, *Geography of Herodotus*, 2nd ed., 2 vols. 8vo.; Donaldson, *New Cratylus*, 2nd ed., *Varronianus*, 2nd ed.; Mrs. Somerville, *Physical Geography*, 2 vols. 12mo. 2nd ed.; Ersch and Grüber's *Encyclopädie*, art. *Europa*.) [W. B. D.]

EURO'PUS (Εὐρωπός, Strab. vii. p. 327), a town of Emathia (Ptol. iii. 13. § 39), between Idomene and the plains of Cyrrhus and Pella, probably situated on the right bank of the Axius below Idomene. Not far above the entrance of the great maritime plain, the site of Europus may perhaps hereafter be recognised by that strength of position which enabled it to resist Sitalces and the Thracians. (Thuc. ii. 100.) We have the concurring testimony of Ptolemy (iii. 13. § 24) and Pliny (iv. 10) that this town of Emathia was different from Europus of Almopia, which latter town seems from Hierocles — who names Europus as well as Almopia among the towns of the Consular Macedonia (a provincial division containing both Thessalonica and Pella) — to have been known in his time by the name of Almopia only; and hence we may infer that it was the chief town of the ancient district Almopia. (Leake, *Northern Greece*, vol. iii. p. 444.) [E. B. J.]

EURO'PUS (Εὐρωπός, Ptol. vi. 2. § 17, viii. 21. § 11.; Strab. xi. p. 524), a town in the north-eastern part of ancient Media Atropatene, according to Strabo, originally called Rhaga; it was rebuilt by Seleucus Nicator, and called by him Europus. Strabo considered it to be the same as the town called by the Parthians Arsacia. Colonel Rawlinson has identified it with the present *Verámin*, at no great distance from the ancient Rhages (*J. R. Geogr. Soc.* x. p. 119). Isidore of Charax, speaking of Dura, a city of Mesopotamia, states that it was built by Nicator and the Macedonians, and that it was called Europus. It is possible that he was confounding it with either the Median or the Syrian city of this name.

EURO'TAS. [LACONIA.]

EURYAMPUS (Εὐρύαμπος), a town of Magnesia in Thessaly, of uncertain site. (Lycophron, 900; Steph. B. *s. v.*)

EURY'MEDON (Εὐρυμέδων), a river flowing in a due southern direction through Pisidia and Pamphylia, in which latter country it was navigable; but

Digitized by Google

its entrance is now closed by bars. It empties itself into the Mediterranean, a little below Aspendus. (Respecting the famous battle on the river Eurymedon, in B. C. 466, see Thuc. i. 100; Diod. Sic. xi. 61; comp. Xenoph. *Hell.* iv. 8; Dionys. Perieg. 852; Strab. xiv. p. 667; Arrian, *Anab.* i. 27; Liv. xxxvii. 23; Plin. v. 26, and numerous other passages.) Its modern name is *Capri-Su*, and near its sources *Sar-Su*. [L. S.]

EURYME'NAE (Εὐρυμεναί, Apoll. Rhod., Steph. B. *s. v.*; Ἐρυμναί, Strab.: *Eth.* Εὐρυμένιος). 1. A town of Magnesia in Thessaly, situated upon the coast at the foot of Mt. Ossa, between Rhizus and Myrtae. (Scylax, p. 25; Strab. ix. p. 443; Liv. xxxix. 25.) Pliny relates that crowns thrown into a fountain at Eurymenae became stones. (Plin. xxxi. 2. s. 20.) Leake supposes the site of Eurymenae to be represented by some ancient remains between *Thanatu* and *Karitza*. (Leake, *Northern Greece*, vol. iv. p. 415.)

2. A town of Molossis in Epirus, is placed by Leake in the vale of the Upper Acheron, towards *Latriti*, *Variádhes*, or *Tervitziani*. (Diod. xix. 88; Leake, *Northern Greece*, vol. i. p. 253.)

EURYTA'NES. [AETOLIA, p. 64, a.]

EUSE'NE (Εὐσήνη), a town not far from the coast of Pontus, a little to the north-west of Amisus. (Arrian, *Peripl. P. Eux.*; Ptol. v. 4. § 6.) In the Tab. Peuting. it is called *Ezene*, and in the Geogr. Ravennas, *Aezene* and *Ecene*. (Comp. Hamilton, *Researches*, &c. vol. i. p. 293.) [L. S.]

EUTAEA (Εὔταια: *Eth.* Εὐταιεύς), a town in the S. of Arcadia, in the district Maenalia, probably between Asea and Pallantium, though not on the road between these towns. Leake places it at *Barbitza*. (Paus. viii. 27. § 3; Xen. *Hell.* vi. 5. § 12; Steph. B. *s. v.*; Leake, *Morea*, vol. iii. p. 31.)

EUTHE'NAE (Εὐθηναί: *Eth.* Εὐθηναῖος and Εὐθηνεύς), a town of Caria, on the Ceramicus Sinus. (Plin. v. 29; Steph. B. *s. v.*) [L. S.]

EUTRE'SIA, EUTRE'SII. [ARCADIA, p. 193, a.]

EUTRE'SIS (Εὔτρησις: *Eth.* Εὐτρησίτης), an ancient town of Boeotia, mentioned by Homer, and said to have been the residence of Zethus and Amphion before they ruled over Thebes. (Hom. *Il.* ii. 502; Eustath. *ad loc.*; Strab. ix. p. 411.) In the time of Strabo it was a village in the territory of Thespiae. Stephanus B. (*s. v.*) places it on the road from Thespiae to Plataea; but Leake conjectures that there is an error in the text, and that for Θεσπιῶν we ought to read Θισβῶν, since there is only one spot in the ten miles between Plataea and Thespiae where any town is likely to have stood, and that was occupied by Leuctra. We learn from Stephanus that Eutresis possessed a celebrated temple and oracle of Apollo, who was hence surnamed Eutresites.

Scylax, in his description of the coast of Boeotia, speaks of ὁ λιμὴν Εὔτρητος καὶ τεῖχος τῶν Βοιωτῶν, and Leake is disposed to identify these places with Eutresia, which would thus be represented by the ruins at *Aliki*; but we should rather conclude, from the words of both Strabo and Stephanus, that Eutresia was not so far from Thespiae. (Leake, *Northern Greece*, vol. ii. p. 521.)

EUTRE'TUS. [EUTRESIS.]

EUXI'NUS PONTUS (Πόντος Εὔξεινος: *the Black Sea*), the sea which washes the shores of Asia Minor, Sarmatia, and Colchis, and which was considered (as indeed physical and geological views require) by the ancients (Strab. ii. p. 126), to form together with the MAEOTIS, part of the same basin of the great "Interior Sea."

1. *The Name.*—The Euxine bore in earlier ages the epithet of *Axenus*, or "inhospitable." (Theon Ἄξενος, Scymn. 734; Strab. vii. p. 298; Schol. *Apollon. Rhod.* ii. 550; Pomp. Mela, i. 19. § 6. Plin. iv. 12, vi. 1.)

"Frigida me cohibent Euxini littora Ponti,
Dictus ab antiquis Axenus ille fuit."
(Ovid, *Trist.* iv. 4. 55.)

It owed this name probably to the weather so frequently described by the ancient writers to its discredit of this sea, as well as the reported cannibalism of its northern Scythian hordes. The more friendly title, no doubt, came into vogue when its waters were thrown open to Grecian navigation and commerce. It is questionable whether its existence was known to Homer, but it appears under both names in Pindar (Πόντος Ἄξεινος, *Pyth.* v. 362; Εὔξεινον Πέλαγος, *Nem.* iv. 79.)

Other appellations are Πέλαγος τὸ Πόντιον (Strab. i. p. 21, xii. p. 547); MARE EUXINUM (Pomp. Mela, ii. 1. § 3; Ovid, *Trist.* iv. 10. 97; MARE SARMATICUM (Ovid, *ex Pont.* iv. 3. 35; Val. Flac. viii. 207); PONTUS TAURICUS (Amm. *Or. Mar.* 2). The Black Sea is called by the Turks *Karadenghez*, by the Greeks *Mauri Thalassa*, and by the Russians *Czarne-More*.

2. *Historical Geography.*—The principal event which brought the shores of the Euxine into contact with other land, unless we accept the account of the expedition of Ramses-Sesostris to Colchis and the banks of the Phasis (Herod. ii. 103), was that national desire to open the inhospitable Euxine, which, clothed in mythical garb, is called the "Expedition of the Argonauts to Colchis."

"The legend of Prometheus and the unbinding the chains of the fire-bringing Titan on the Caucasus by Hercules in journeying eastward — the ascent of Io from the valley of the Hybristes towards the Caucasus — and the mythus of Phrixus and Helle — all point to the same path on which Phoenician navigators had earlier adventured." (Humboldt, *Cosmos*, vol. ii. p. 140, trans.)

In the historic ages the shores of the Propontis, the Black Sea, and the Palus Maeotis, were covered with Grecian settlements. Nearly all these were colonies of the city of Miletus alone, and were, with one exception, the marts of a prosperous trade. Although the dates of each cannot be precisely fixed, they must have arisen between the eighth and sixth centuries before our era.

The colonies in the Black Sea were HERACLEIA on the S. coast of Bithynia, in the territory of the Mariandyni. In Paphlagonia was SINOPE, which established a species of sovereignty over the other communities. In Pontus was AMISUS, the mother city of TRAPEZUS. On the east coast stood the cities of PHASIS, DIOSCURIAS, and PHANAGORIA; this last was the principal seat of the slave trade and during the Macedonian period, the staple for Indian commodities, imported across the Oxus and the Caspian Sea. PANTICAPAEUM, in the Taurian Chersonese, was the capital of the little kingdom of the Bosporus, so intimately connected with the corn trade of Greece, especially of Athens. On the north coast was the city of TANAIS, on the river of the same name; and OLBIA, at the mouth of the Borysthenes. These two places, and Olbia in particular, were of the highest importance for the inland

Digitized by Google

trade, which, issuing from thence in a northern and easterly direction, was extended to the very centre of Asia. The settlements on the south-west coast appear never to have attained any consideration; the principal traffic of Greek ships in that sea tended to more northerly ports.

ISTRIA was near the south embouchure of the Danube; TOMI, CALLATIS, ODESSUS and APOLLONIA, more to the south. (Comp. Heeren, *Man. of Anc. Hist.* p. 162, trans; Grote, *Hist. of Greece*, vol iii. p. 316, vol. iv. p. 337.)

The exchange of commodities led the traders beyond the Palus Maeotis, through the steppe, where the horde of the central *Kirghis* now pasture their herds, — and through a chain of Scythian-Sarmatic tribes of the Argippaeans and Isedones, to the Arimaspae, dwelling on the northern declivity of the *Altai*, and possessing much gold. This tract, the locality of which has been placed between the 53rd and 55th degrees of latitude, and which has again become famous by the Siberian gold-washings, opened up by means of the Black Sea an important source of wealth and luxury to the Greeks. While in another direction the inland traffic between the Prussian coasts and the Greek colonies, the relations of which are shown, by fine coins, struck probably before the eighty-fifth Olympiad, which have been recently found in the *Nets* district (*Abhandl. der Berl. Akad.* 1833, pp. 181–224), brought the coasts of the Northern Ocean into connection with the Euxine and Adriatic. The amber, of which this trade consisted, was conveyed to people from people, through Germany, and by the Kelts on either declivity of the Alps, to the Padus, and through Pannonia to the Borysthenes. (Humboldt, *Cosmos*, vol. ii. pp. 129, 141, trans.)

The Byzantines were masters of the commerce of the Euxine, and it was through them that the supply of articles for which it was celebrated, was brought into the markets of the Mediterranean. These are stated by Polybius (iv. 38) to be hides (some assert that *Δρέμματα*, and not *δίφθερα*, is the true reading), slaves of the best description, honey, wax, and salt-fish. The pickled fish of the Euxine was famous throughout antiquity (Athen. iii. p. 116), and the figure of a fish on the coins of the Greek towns on this sea, as well as of a fish-hook on those of Byzantium, shows what a value was set upon this trade.

The carrying trade of Central and Northern Asia, which even as early as the times of the Seleucidae had taken the route of the Black Sea, became for the Greeks under the Romans, and during the earlier portion of the Lower Empire, a most important branch of commerce.

The inroads of the Goths and Huns upon the provinces of the Black Sea diverted in great measure the Indian trade into other channels. When the route from Europe to India by the Red Sea was cut off in consequence of Aegypt being under the dominion of the Arabs, commerce sought and obtained an outlet in another direction, and Constantinople became the depôt of Eastern trade.

In the twelfth century Genoa owed her commercial prosperity to the overland trade with India, which she carried on by means of her mercantile establishments on the Euxine.

3. *Shape and Admeasurements.* — The ancients compared this sea to a Scythian bow; of which the north coast between the Thracian Bosporus and the Danube constituted the bow, and the south coast the string. (Hecat. *Fr.* 163; Strab. ii. p. 186; Dionys. 146; Plin. iv. 12.)

In respect of dimensions as far as regards the circumference, and some transverse lines across it, they seem to have been sufficiently informed. But though Strabo knew its general dimensions, he has totally failed in point of form, for he imagined the west side from the Bosporus to the Borysthenes was a straight line, while at Dioscurias it formed a narrow deep gulf. (i. p. 125.) On the other hand, the form as given by Ptolemy (iii. 10) is very tolerable. He places the Phasis and Gulf of *Varna* opposite to each other, as they nearly are, and the widest part between the Bosporus and the Borysthenes. He also approaches the truth in the space between Carambis and Criumetopon, as well as their relative bearings. But his Maeotis is disproportionably large. (Rennell, *Compar. Geog.* vol. ii. p. 276.) Strabo (p. 124) places the narrowest distance between Carambis and Criumetopon. [CARAMBIS.]

The entire circuit of the Euxine, according to Rennell (*l. c.*), measured through the different points mentioned in the Periplus, and in the line that an ancient ship would have sailed to coast it, is 1,914 geog. miles, and which turned into Roman miles in the proportion of 60 to 72 are equal to 2,392 M. P. It appears an extraordinary coincidence that 2,360 M.P. should be the estimate of Agrippa, as reported by Pliny (iv. 12) for the circuit of the Euxine. Other estimates in Pliny (*l. c.*) are Varro 2,150; Mutianus 2,865; Artemidorus 2,619. Strabo (ii. p. 125) makes it out at 25,000 stadia, while Polybius (iv. 5) has 22,000 stadia. It is a remarkable fact that Polybius, quoted by Pliny (iv. 12) states that the distance between the Thracian and Cimmerian Bosporus on a straight line was 500 M. P., which agrees so well with the actual distance, that it proves the exact knowledge of the ancients on this point; and that they had a more accurate method of determining a ship's way than has been believed. The Periplus of Arrian addressed to Hadrian contains, according to Gibbon's epigrammatic expression in his 42nd chapter, "whatever the governor of Pontus had seen from Trebizond to Dioscurias; whatever he had heard, from Dioscurias to the Danube; and whatever he knew, from the Danube to Trebizond." Thus, while Arrian gives much information upon the south and east side of the Euxine, in going round the north shore his intervals become greater, and his measurements less attended to. Rennell, in the second volume of the work already quoted, has identified most of the cities, promontories, and embouchures of rivers, that appear in the Periplus.

The area of the Black Sea differs but little from that of the Caspian. The Euxine and Maeotis, taken together, are about $\frac{1}{4}$ larger than the Caspian.

4. *Physical Geography.* — Polybius (iv. 39—43) has hazarded a prediction that the Euxine was doomed to become, if not absolutely dry land, at any rate unfit for navigation. The reasoning by which he arrived at this conclusion is curious. Whenever, he says, an infinite cause operates upon a finite object, however small may be the action of the cause, it must at last prevail. Now, the basin of the Euxine is finite, while the time during which the rivers flow into it, either directly or through the Palus Maeotis, bringing with them their alluvial deposit, is infinite, and should it, therefore, be only a little that they bring, the result described must

Digitized by Google

ultimately come to pass. But when we consider how great the accumulation is from the numerous streams that empty themselves into this basin, — that is, how powerful and active is the operation of the cause — then it is manifest that not only at some indefinite time, but speedily, what has been said will come to pass.

He then strengthens his position thus assumed, by stating that, according to all tradition, the Palus Maeotis, having been formerly a salt sea conjoined, as it were, in the same basin (*σύῤῥους*) with the Euxine, had then become a fresh-water lake of no greater depth of water than from five to seven fathoms, and no longer therefore navigable for large ships, without the assistance of a pilot; and he further instances, as an evidence of the progress of his cause, the great bank (*ταινία*) 1,000 stadia long, which appears in his time to have existed one day's sail off the mouths of the Danube, and upon which the sailors, while they thought themselves still out at sea, very often ran aground by night, and which was familiarly called by them *στήθη*, or the breast, as in Latin the word "dorsum" was applied to the same formation. (Comp. Strab. i. p. 50; Amm. Marc. xxvi. 8. § 46.) Arrian makes no mention of this bank, nor can any traces of it be found now. Either, therefore, the weight of water has been sufficient, at some time or other, to disperse this accumulation which it had before assisted to form, or the land at the mouth of the river has so increased since the time when Polybius and Strabo wrote, that what was then a bank at a distance of thirty-five or forty miles (a moderate computation for a day's sail), has now become an integral part of the main-land.

This opinion of Polybius was not altogether new. Straton of Lampsacus (Strab. i. pp. 49, 50) held the same view; indeed, he said more. According to him the Euxine is very shallow, — was then filling up with mud from the deposit of the rivers (*ἅλους πληροῦσθαι*), its water was perfectly fresh, and would shortly be choked up; and its west side was already nearly in that state.

However plausible the theory of Polybius may be, there seems no probability of his anticipation being realised. The depth of the Euxine itself, and the constant and vigorous rush of water through the comparatively straight, narrow, and deep passage of Constantinople, will always be sufficient to contain, or rather to carry off, any deposit, however large, which the Danube, the drainage of so large a portion of Europe, or the Phasis, the Halys and other Asiatic streams, or the mighty rivers of the North can bring down from the countries through which they flow. (*Journ. Geog. Soc.* vol. i. pp. 101—122; Lyell, *Princ. of Geology*, vol. i. p. 24.)

It has been thought that, at an epoch long anterior to the historical ages, the Caspian and the Euxine were united (comp. Humboldt, *Asie Centrale*, vol. ii. p. 146). The physical traces of this may easily have given rise to the fancies of the ancients connecting the Caspian with the Euxine by means of the river Phasis (Hecat. p. 92, Ed. Klausen), or through the Palus Maeotis (Strab. xi. p. 509), as well as their traditions about the overpourings of the swollen higher seas into those that were lower. [E. B. J.]

EVA. [CYNURIA.]

EVAN. [MESSENIA.]

EVARCHUS (*Εὔαρχος*), a river in Asia Minor, which, according to Steph. B. (*s. v.* *Καππαδοκία*), formed the boundary between Paphlagonia and Cappadocia. (Comp. Plin. vi. 2; Menippus, p. 176, ed. Hoffmann.) [L. S.]

EVAS. [LACONIA.]

EVE'NUS (*Εὔηνος*, less frequently, *Εὐηνός*, *Fidhari* or *Fidharo*), originally called LYCORMAS (*Λυκόρμας*), an important river of Aetolia, rising in the highest summit of Mt. Oeta in the territory of the Bomienses, a subdivision of the Aetolian tribe of the Ophienses. (Strab. p. 451.) Dicaearchus (61) was mistaken in saying that the Evenus rose in Pindus: Ptolemy (iii. 16. § 6) more correctly places its source in Callidromus, which is a part of Oeta. Strabo relates that the Evenus does not run at first through the territory of the Curetes, which is the same as Pleuronia, but more to the E. of Chalcis and Calydon, that it afterwards turns to the W. towards the plains in which Old Pleuron was situated, and that it finally flows in a southerly direction into the sea, at the distance of 120 stadia from the promontory of Antirrhium. (Strab. pp. 451, 460; comp. Thuc. ii. 83; Mel. ii. 3; Plin. iv. 3.) Its real direction however is first westerly, and afterwards south-west. It receives numerous torrents from the mountains through which it flows, and in winter it becomes a considerable river, flowing with great rapidity, and difficult to cross on account of the great stones which are carried down by its stream. ("Eveni rapidas undas," Ov. *Met.* ix. 104; *Ποταμὸν πολλῷ κυμαίνοντα ὑπὲρ τὰς ὄχθας αἰρόμενον*, Philostr. Jun. *Imag.* 16.) The Evenus is celebrated in mythology on account of the death of the centaur Nessus, who was slain by Hercules because he offered violence to Deianeira, as he carried her across this river. (Soph. *Trach.* 557.) This tale is, perhaps, only a type of the impetuosity of the river, and of the danger to which unwary travellers are exposed in crossing its channel from the rise of the waters when swollen by sudden showers. (Mure, *Tour in Greece*, vol. ii. p. 170.) The river is said to have derived its name from Evenus, the son of Ares, and the father of Marpessa. When his daughter was carried off by Idas, the son of Aphareus, he pursued the ravisher, but being unable to overtake him he threw himself into the Lycormas, which was henceforward called after him. (Apollod. i. 7. § 8; Ov. *Ibis*, 515; Hyg. i. 2. 18.) Its modern name of *Fidhari* or *Fidharo* is derived from *Φίδι*, the Romaic form of Ὄφις, and is therefore supposed by Leake to be a version of Ὀφιεῖς, the ancient people in whose territory the river rose. (Leake, *Northern Greece*, vol. ii. p. 625; comp. p. 599.) From Evenus is formed the adjective *Eveninus*. ("Matres Calydonides Eveninae," Ov. *Met.* viii. 527.)

EVE'NUS (*Εὔηνος*), a small river of Mysia, flowing in a southern direction from Mount Ida into the Elaeus Sinus, near Pitane. An aqueduct from it supplied the town of Adramyttium with water. (Strab. xiii. p. 614; Plin. v. 32.) [L. S.]

EVORAS. [TAYGETUS.]

EX, EXITANI. [HEXI].

EXAMPAEUS (*Ἐξαμπαῖος*, Herod. iv. 52. 81), a district of W. Scythia, between the Borysthenes and the Hypanis. Among the Greeks it was called the "Sacred Way" (*Ἱραὶ ὁδοί*, some read *Ἕππαι Ὁδοί*). The Greek is probably not a translation of the Scythian word, which may be connected with the Indo-European *pani peni* = "water." (Schafarik, *Slav. Alt.* vol. i. pp. 284. 505.) Pallas (*Voyage dans les Steps D'Astrakhan et du Caucase*,

Digitized by Google

vol. i. pp. 158. 186) places this district between the *Bog* and the *Dnieper*, and identifies the spring of bitter water, of which Herodotus (iv. 81) speaks with the *Sinaja-woda*, which falls into the *Bog*, at the village of *Bogopol*. Ritter (*Vorhalle*, p. 345) connects the bowl seen by Herodotus (*l. c.*) with the worship of Buddha, in accordance with his theory of deriving the religion of Scythia from that of India. The name of the king Ariantes he refers to Aria, the country of the worshippers of Buddha in Aria-Bactria, and considers the vessel to have been among the offerings to that deity. [E. B. J.]

EXCISUM, a place in Gallia, appears in the Antonine Itin. as the next place after Aginnum (*Agen*) on a road from *Burdegala* to Argentomagus (*Argenton*). The distance is 13 Gallic leagues from Aginnum to Excisum. The Table gives the same distance. D'Anville (*Notice*, &c.) says that the site of Excisum is *Villa Neuve*, which has succeeded to another and an older place, the monastery of which was named Exciense in the titles of the abbey of Moissac. [G. L.]

EZION GEBER (Γεσιὼν Γάβερ, LXX). [BEROTHAH; ARLANA; ELATH.]

F.

FA'BARIS, a river of the Sabines, mentioned under that name by Virgil (*Aen.* vii. 715), who is copied by Vibius Sequester (p. 10), and Sidonius Apollinaris (*Ep.* i. 5), but which, according to Servius, is the same as the FARFARUS of Ovid (*Met.* xiv. 330). This last is unquestionably the stream now called *Farfa*, which flows into the Tiber, a few miles above the *Correse*, and about 35 miles from Rome. It gives name to the celebrated Abbey of *Farfa*, which was founded in A. D. 681, and during the middle ages was one of the most famous monasteries in Italy. (Gell, *Top. of Rome*, p. 232.) [E. H. B.]

FA'BIA, a town of Latium on the Alban Hills, known to us only from the mention, by Pliny, of the "Fabienses in Monte Albano" (iii. 5. s. 9). It is at least a plausible conjecture, that they occupied the site of the modern village of *Rocca di Papa*, high up on the Alban Mount, and on the road which led from the lake to the temple of Jupiter, on the highest summit. (Gell, *Top. of Rome*, p. 373; Nibby, *Dintorni*, vol. iii. p. 20.) [E. H. B.]

FABRATE'RIA (Φαβρατερία, Strab. v. p. 237: *Vol. Fabraternus*: *S. Giovanni in Carico*), a city of Latium, situated on the Via Latina, between Frusino and Aquinum, and near the confluence of the Liris with the Trerus or *Sacco*. (Strab. *l. c.*; *Itin. Ant.* pp. 303, 305.) It was originally a Volscian city, but in B. C. 329 it is mentioned as sending deputies to Rome, to place itself under the protection of the republic against the Samnites, who were at that time pressing on in the valley of the Liris. (Liv. viii. 19.) We hear no more of it till B.C. 124, when it was one of the places at which a Roman colony was established by C. Gracchus. (Vell. Pat. i. 15.) From this circumstance probably arose the distinction, recognised both by Pliny and by inscriptions, between the "Fabraterni novi" and "Fabraterni veteres" (Plin. iii. 5. 9; Orell. *Inscr.* 101, 102), the latter being the original inhabitants of the municipium. It is uncertain whether the colony referred to by the Liber Coloniis is the same with that of Gracchus, or one of later date. (*Lib. Colon.* p. 234.) But though the colonists and the old inhabitants appear to have formed two separate municipal bodies, it is not certain whether they occupied different sites. It is clear that the Fabrateria of Strabo and the Itineraries, which they place *on* the Via Latina, could not have occupied the site of the modern *Falvaterra*, a village on a hill some distance to the S. of the line of that road: and there seems little doubt from the inscriptions found there that the ruins still visible on the right bank of the Liris, just below its junction with the *Tolero* or *Sacco*, are those of Fabrateria Nova. These ruins, which have been regarded by many writers as those of Fregellae [FREGELLAE], are situated in the territory of *S. Giovanni in Carico*, about three miles from *Falvaterra* and four from *Ceprano*: they indicate a town of considerable importance, of which portions of the city walls are still extant, as well as the remains of a temple, and fragments of other buildings of reticulated masonry. Numerous portions of pavements, mosaics, and other ancient remains have been also found on the spot. (Romanelli, vol. iii. p. 380; Chaupy, *Maison d'Horace*, vol. iii. p. 476; Mommsen, *Inscr. Regn. Neap.* p. 234.) The site of Fabrateria Vetus is uncertain: it may have occupied the same position as the modern *Falvaterra*; but the discovery of inscriptions relating to it at *Ceccano*, more than 12 miles higher up the valley of the *Tolero*, renders it probable that its site must be transferred thither. (Mommsen, *l. c.*)

Cicero incidentally notices Fabrateria as a town on the Via Latina, where Antony and his friends had concocted plots against him (Cic. *ad Fam.* ix. 24): and Juvenal mentions it as a quiet and cheap country town, like the neighbouring Sora, where a good house could be obtained at a moderate price (Juv. iii. 224). Both these notices probably relate to the *new* town of the name. [E. H. B.]

FAESULAE (Φαισῦλαι, Ptol., App.; Φαισόλα, Pol.; *Eth.* Faesulanus: *Fiesole*), an ancient and important city of Etruria, situated on a hill rising above the valley of the Arnus, about 3 miles from the modern city of *Florence*. The existing remains sufficiently prove that it must have been a place of consideration as an Etruscan city, and Silius Italicus alludes to it as eminent for skill in divination (viii. 477), a character which could never have attached to a place not of remote antiquity, but no mention of it is found in history previous to the Roman dominion, nor do we know at what time or on what terms it submitted to the Roman yoke. The first mention of its name occurs in B. C. 225, during the great Gaulish War, when the invaders were attacked by the Roman army on their march from Clusium towards Faesulae. (Pol. ii. 25.) It again appears in the Second Punic War as the place in the neighbourhood of which Hannibal encamped after he had crossed the Apennines and forced his way through the marshes in the lower valley of the Arnus, and from whence he advanced to meet Flaminius (who was then encamped at Arretium), before the battle of Trasymene. (Id. iii. 80, 82; Liv. xxii. 3.) Faesulae is described as at that time immediately adjoining the marshes in question, and it is probable that the basin of the Arno just below Florence was then still marshy and subject to inundations. [ARNUS]. According to Florus (iii. 18. § 11), Faesulae was taken and ravaged with fire and sword during the Social War (B. C. 90—89): but it seems more probable that this did not take place till the great devastation of Etruria by Sulla, a few years later. It is certain that after that event Faesulae was one of the places selected by the dictator for the establishment of a

Digitized by Google

numerous military colony (Cic. *pro Muren.* 24, *in Cat.* iii. 6. § 14), and, near 20 years after, we find these colonists of Sulla, a factious and discontented body of men, giving the chief support to the revolutionary movements of Catiline. It was on this account that that leader made Faesulae the headquarters of his military preparations under Manlius, and thither he betook himself when driven from Rome by Cicero. (Sall. *Cat.* 24, 27, 30, 32; Appian, *B. C.* ii. 3; Cic. *pro Muren.* 24, *in Cat.* ii. 6. § 14.) Here he organised a force of two legions, and continued to maintain his ground in the mountains near Faesulae, till, hemmed in by the armies of Metellus and Antonius, he was compelled to give battle to the latter near Pistoria. (Sall. *l.c.* 56, 57.) The curious legends concerning Catiline, which have passed into the early chronicles of Florence, where he figures almost as a national hero (Malespini, *Istor. Fiorent.* cc. 13—21), prove the deep impression left in this part of Etruria by the events connected with his fall. From this time we hear little more of Faesulae: it appears to have sunk into the condition of an ordinary municipal town under the Roman empire (Plin. iii. 5. s. 8, vii. 13. s. 11; Ptol. iii. 1. § 47), and the growth of the neighbouring Florentia was probably unfavourable to its prosperity. But in the Gothic wars, after the fall of the Western Empire, Faesulae again appears as a strong fortress, which was not reduced by Belisarius until after a long siege. (Procop. *B. G.* ii. 23, 24, 27.)

In the middle ages Faesulae was reduced to insignificance by the growing power of the Florentines, and gradually fell into decay. According to the ordinary histories of Florence (Machiavelli, Villani, &c.), it was taken and destroyed by the Florentines in A. D. 1010, but much doubt has been thrown on this statement by modern historians. *Fiesole* is now a mere village, though retaining its episcopal rank and ancient cathedral.

The ruins of Faesulae, especially the remains of its ancient walls, confirm the accounts of its having been an important Etruscan city. Large portions of these walls, constructed in the same style with those of Volaterrae and Cortona, though of somewhat less massive masonry, were preserved till within a few years, and some parts of them are still visible. The whole circuit however was less than two miles in extent, forming a somewhat quadrangular enclosure, which occupied the whole summit of the hill, an advanced post or buttress of the Apennines, rising to the height of more than 1000 feet above the valley of the Arnus. The highest point, now occupied by the convent of *S. Francesco*, formed the Arx of the ancient city, and appears to have been fortified by successive tiers of walls, in the same style as those which encircled the city itself. Within the circuit of the walls are the remains of the ancient theatre, which have been as yet but imperfectly excavated; but there appears no doubt that they are of Roman date and construction, though this theatre is repeatedly referred to by Niebuhr as a monument of Etruscan greatness. (Niebuhr, vol. i. pp. 130, 135; Micali, *Ant. Pop. Ital.* vol. i. p. 152; Dennis, *Etruria*, vol. ii. p. 127.) Near it was discovered a curious cistern or reservoir for water, probably of Etruscan date, roofed in by converging layers of stone, so arranged as to form a rude kind of vaulting. Of the numerous minor objects of antiquity that have been found on the site of Faesulae, the most interesting is a bas-relief of a warrior of very ancient style, and one of the most curious specimens of *early* Etruscan art. It is figured by Micali (pl. ii. fig. 3). All the remains of antiquity at Faesulae are fully described by Dennis (*l.c.* pp. 119—130). [E. H. B.]

FALACRI'NUM (Phalacrine, Sust.), a village and station on the Via Salaria, in the Sabine territory, and in the heart of the Apennines. 16 M. P. north of Interocrea. (*Itin. Ant.* p. 307; *Tab. Peut.*) It is noticed as the birthplace of the emperor Vespasian, but was a mere village ("vicus modicus," Suet. *Vesp.* 2). Its site is fixed by the distance from *Antrodoco*, at a spot just below the modern town of *Civita Reale*, where there exists an ancient church mentioned in documents of the middle ages as *S. Silvestro in Falacrino*. The name of *Falacrine* is still found in the 14th century, as one of the villages from which the town of *Civita Reale* was peopled. (Holsten. *Not. ad Cluv.* p. 118; D'Anville, *Analyse Géogr. de l'Italie*, p. 167.) [E. H. B.]

FALE'RIA or FALE'RIO (*Eth.* Faleriensis: Falerionensis: *Fallerona*), a town of Picenum on the left bank of the river Tinna, about 20 miles from the sea. We learn very little about it from ancient authors, but the Falerienses (written in our MSS. Falarienses) are mentioned by Pliny among the municipal towns of the interior of Picenum: and the "Falerionensis ager" is noticed among the "civitates Piceni" in the Liber Coloniarum. (Plin. iii. 13. s. 18; *Lib. Colon.* p. 256.) But its existence as a considerable municipal town, with its local senate and magistrates, is attested by inscriptions of the time of Domitian, Hadrian, and the Antonines: as well as by the ruins still visible on the left bank of the *Tenna*, about a mile below the modern village of *Fallerona*, among which those of a theatre and amphitheatre are the most conspicuous. The former has been recently cleared out, and the excavations have brought to light many statues and other ancient fragments, as well as the architectural features of the building itself, in good preservation. (De Minicis, in the *Ann. dell' Inst.* 1839, pp. 5—8.) From one of the inscriptions discovered here we learn that the territory of Faleria bordered on that of Firmum, and that it had received a colony of veterans under Augustus. (Orell. *Inscr.* 3118.) Ant. mentions its forum, capitolium, &c. (De Minicis, *l.c.* p. 49.) The correct designation of the citizens appears to have been "Falerienses *ex Picenis*," but another inscription gives the form Faleriensis or Falerione for the name of the town, which is preserved in the modern *Fallerone*. [E. H. B.]

FALE'RIA or FALE'SIA, a port on the coast of Etruria, nearly opposite to the island of Ilva and a little to the eastward of the promontory of Populonium. It is mentioned by Rutilius, in his voyage along this coast (*Itin.* i. 371—380), under the name of Faleria: but in the Maritime Itinerary (p. 501) the name is written *Falesia*, which appears to have been the prevalent form, as the Portus Faleseos, or *Porto Falese*, is repeatedly mentioned in the middle ages until it became so choked with sand as to render it useless. (Targioni-Tozzetti, *Viaggi nella Toscana*, vol. iv.) It was situated at the entrance of an extensive lagoon or padule, which, in the time of Rutilius, was converted into a fishpond. [E. H. B.]

FALE'RII (Φαλέριοι, Strab.; Φαλέριον, Dionys. Steph. B., Ptol.: *Eth.* Φαλίσκος, Faliscus: *San Maria di Falleri*), an ancient and powerful city of Etruria situated in the interior of that country, a few miles W. of the Tiber, and N. of Mount Soracte. It appears in historical times, and when it first came into collision with the Roman power, as a part

Digitized by Google

Etruscan city; and there is even much reason to believe that it was at that time one of the twelve cities which composed the Etruscan confederation. [ETRURIA, p. 864.] But there is much difficulty with regard to its origin; many ancient writers concurring in representing the population as one different from the rest of the Etruscan nation. A tradition, adopted by Dionysius and Cato, ascribed to them an Argive or Pelasgic origin; and the former author expressly tells us that even in his day they retained some traces of this descent, and especially that the worship of Juno at Falerii was in many points similar to that of the famous Argive Juno. (Dionys. i. 21; Cato, *ap. Plin.* iii. 5 s. 8; Steph. B. *s. v.* Φαλίσκοι.) The poets and mythographers went a step further, and ascribed the direct foundation of Falerii to a certain Halesus or Haliscus, a son of Agamemnon, whose name they connected with Faliscus, the ethnic appellation of the inhabitants of Falerii. (Serv. *ad Aen.* vii. 695; Ovid, *Fast.* iv. 73, *Amor.* iii. 13, 31; Solin. 2. § 7.) Strabo speaks of the Faliscans (whom he represents as inhabiting two towns, Falerium and Faliscum) as, according to some authors, a peculiar people distinct from the Etruscans, and with a language of their own (v. p. 166); but this was certainly not the case in his day, when all this part of Etruria was completely Etruscanised. If any dependence can be placed on these statements they seem to indicate that Falerii, like Caere, was essentially Pelasgic in its origin; and that, though it had fallen, in common with the other cities of Southern Etruria, into the hands of the Etruscans properly so called, it still retained in an unusual degree its Pelasgic rites and customs, and even a Pelasgic dialect. But it is strange to find, on the other hand, that some points seem to connect the Faliscans more closely with the neighbouring Sabines: thus, the very same Juno who is identified with the Argive Hera, was worshipped, we are told, under the name of Juno Curitis or Quiritis, and represented as armed with a spear. (Tertull. *Apol.* 24; Gruter, *Inscr.* p. 308. 1.) The four-faced Janus also (Janus Quadrifrons), who was transferred from Falerii to Rome (Serv. *ad Aen.* vii. 607.), would seem to point to a Sabine connection: there is, at least, no other evidence of the worship of this deity in Etruria previous to the Roman conquest.

Be this as it may, it is certain that during the historical period Falerii appears as a purely Etruscan city. It is first mentioned in Roman history in B. C. 437, when the Falisci and Veientes lent their support to the Fidenates in their revolt against Rome, and their combined forces were defeated by Cornelius Cossus. (Liv. iv. 17, 18.) From this period till the fall of Veii we find the Faliscans repeatedly supporting the Veientes against Rome; and when the siege of Veii was at length regularly formed, they did their utmost to induce the other cities of Etruria to make a general effort for its relief. Failing in this, as well as in their own attempts to raise the siege, they found themselves after the capture of Veii exposed single-handed to the vengeance of the Romans, and their capital was besieged by Camillus. The story of the schoolmaster and the generous conduct of the Roman general is well known: it is probable that this tale was meant to conceal the fact that Falerii was not in reality taken, but the war terminated by a treaty, which is represented by the Roman historians as a "deditio" or surrender of their city. (Liv. v. 8, 13, 19; Plut. *Camill.* 9, 10; Dionys. *Fr. Mai*, xiii. 1, 2; Diod. xiv. 96; Flor. i. 12.) From this time the Faliscans continued on friendly terms with Rome till B. C. 356, when they joined their arms to the Tarquinians, but their allied forces were defeated by the dictator C. Marcius Rutilus; and the Faliscans appear to have obtained a fresh treaty, and renewed their friendly relations with Rome, which continued unbroken for more than 60 years from this time. But in B. C. 293 we find them once more joining in the general war of the Etruscans against Rome. They were, however, quickly reduced by the consul Carvilius, and though they obtained at the time only a truce for a year, this appears to have led to a permanent peace. (Liv. vii. 16, 17, x. 46, 47; Diod. xvi. 31; Frontin. *Strat.* ii. 4.) We have no account of the terms on which this was granted, or of the relation in which they stood to Rome, and we are wholly at a loss to understand the circumstance, that, after the close of the First Punic War, in B. C. 241, long after the submission of the rest of Etruria, and when the Roman power was established without dispute throughout the Italian peninsula, the Faliscans ventured single-handed to defy the arms of the Republic. The contest, as might be expected, was brief: notwithstanding the strength of their city, it was taken in six days; and, at once to punish them for this rebellion, and to render all such attempts hopeless for the future, they were compelled to abandon their ancient city, which was in a very strong position, and establish a new one on a site easy of access. (Liv. *Epit.* xix.; Pol. i. 65; Zonar. viii. 18; Oros. iv. 11; Eutrop. ii. 28.)

This circumstance, which is mentioned only by Zonaras, is important as showing that the existing ruins at *Sta. Maria di Falleri* cannot occupy the site of the ancient Etruscan city, the position of which must be sought elsewhere. The few subsequent notices in history must also refer to this second or Roman Falerii; and it was here that a colony was established by the triumvirs which assumed the title of "Colonia Junonia Faliscorum," or "Colonia Falisca." (Plin. iii. 5. s. 8; *Lib. Colon.* p. 217; Gruter, *Inscr.* p. 288. 1.) It does not, however, appear to have ever risen into a place of importance; and, notwithstanding its cognomen of Junonia, it is evident that the ancient temple of Juno on the site of the abandoned city was that which continued to attract the votaries of religion. (Ovid, *Amor.* iii. 13. 6.) The period of its complete decay is unknown. The Tabula still notices "Faleros" (by which the Roman town is certainly meant) as situated 5 miles from Nepe, on the road to Ameria; and it retained its episcopal see as late as the 11th century. But in the middle ages the advantages of strength and security again attracted the population to the original site; and thus a fresh city grew up on the ruins of the Etruscan Falerii, which ultimately obtained the name of *Civita Castellana*. (Nibby, *Dintorni di Roma*, vol. ii. pp. 23—26.) The site of the Roman Falerii (which was about 4 miles distant from *Civita Castellana*, and 5 from *Nepi*) is now wholly deserted, with the exception of a single farm-house, and an ancient ruined church, still called *Sta. Maria di Falleri*. But a large portion of the ancient walls, with their gates and towers, still remains; and though obviously not of very early date, they have contributed to the mistake of several modern writers, who have not paid sufficient attention to the distinction between the earlier and later Falerii, and have thus regarded the existing remains at *Falleri* as those of the celebrated Etruscan city. But all accounts

Digitized by Google

agree in describing the Falerii besieged by Camillus, as well as the city taken by the Romans in B. C. 241, as a place of great natural strength, a character wholly inapplicable to the site of *Falleri*, the walls of which are on one side easily exposed to attack, just as the site of the *new* city is described by Zonaras (*εὐέφοδος*, Zonar. *l. c.*). On the other hand, this description applies perfectly to *Civita Castellana;* and there can be little or no doubt that the opinion first put forward by Cluver, and since adopted by many antiquarians, correctly regards that place as the representative of the Etruscan or original Falerii. No other ancient remains are visible there, except a few fragments of the walls; but these are of a more ancient style of construction than those of *Falleri*, and thus confirm the view that they are vestiges of the Etruscan city. (For a full discussion of this point, see Nibby, *Dintorni di Roma*, vol. ii. pp. 15—30; and Dennis, *Etruria*, vol. i. pp. 114—147.) Gell and Müller, the two chief authorities who were misled into placing the Etruscan city at *Falleri*, were thus led to regard *Civita Castellana* as the site of Fescennium, a town of far inferior importance; though the former himself admits that that place would correspond better with the descriptions of Falerii. (Gell, *Top. of Rome*, pp. 235—240; Müller, *Etrusker*, vol. i. p. 110.)

The site of *Civita Castellana*, indeed, is not only one of great strength, from the vast and deep ravines which surround it on almost all sides, but affords space for a city of considerable extent; and the population and power of the ancient Falerii are attested by the fact that, in its last hopeless struggle against the Roman power, it is said to have lost 15,000 men in the field. (Oros. iv. 11; Eutrop. ii. 28.) The existing walls of Roman Falerii enclose a much smaller space, being only about 2300 yards in circuit, and could therefore never have belonged to a city of the first class. (Gell, p. 241.) They are, however, of interest, from their excellent preservation, and present one of the best specimens extant of Roman fortification: they are flanked at short intervals by projecting square towers, which are most numerous on the two sides where they stand completely in the plain, and much fewer on the S. side of the city, where the wall borders on a small ravine, and is protected by the nature of the ground. The gateways, of which several remain in good preservation, are regularly arched, and the masonry of the walls themselves has throughout a character of regularity wholly different from any of those of ancient Etruscan origin.

The territory of Falerii appears to have been in ancient times extensive and fertile. Ovid, whose wife was a native of the place, speaks of the "pomiferi Falisci," and of the rich pastures in which its cattle were fed. (Ovid, *Amor.* iii. 13. 1.) It was celebrated also for its sausages, which were known as "ventres Falisci," and were considered to rival those of Lucania. (Varr. *L. L.* v. 111; Martial, iv. 46. 8.)

There is no doubt that Faliscus was only the ethnic form derived from Falerii, and the Falisci usually mean the inhabitants of that city. Those writers, indeed, who speak of the Falisci as a separate people, ascribe to them the possession of two cities, Falerii and Fescennium (Dion. Hal. i. 21); but the latter appears to have been a place of inferior importance, and was probably a mere dependency of Falerii in the days of its power. There is, however, much difficulty in a passage of Strabo (v. p. 226) in which he speaks of "Falerii and Faliscum" as two separate towns; and both Solinus and Stephanus of Byzantium seem to acknowledge the same distinction. Little dependence can, indeed, be placed upon the accuracy of these two last authorities: and the Faliscum of Strabo (if it be not merely a mistake for Fescennium) may probably be the same place which he again alludes to shortly after as "Aequum Faliscum" (*Αἰκουμφαλίσκον*), and describes as situated on the Flaminian Way between Rome and Ocriculi. No other author mentions a town of this name, but the "Aequi Falisci" are mentioned both by Virgil and Silius Italicus. (Virg. *Aen.* vii. 695; Sil. Ital. viii. 491.) Ancient commentators appear to have understood the epithet of *Aequi* as a Sabine one, signifying "just" (Serv. *ad Aen. l. c.*): while Niebuhr supposes it to indicate a national connexion with the Aequians (vol. i. p. 72): but there can be little doubt that in reality it referred to the peculiar position of the people, and was equivalent merely to "Faliscans of the Plain." It seems, however, impossible to understand this, as Müller has done (*Etrusker*, vol. i. p. 100), as referring to the site of the *new* city of Falerii. It is far more probable that the plain on the banks of the Tiber was meant: and this would agree with the statement of Strabo, who places his "Aequum Faliscum" on the Flaminian Way, where it is natural enough that a large village or *borgo* may have grown up during the flourishing ages of Rome, within the Faliscan territory, but distinct both from the more ancient and later Falerii, neither of which was situated on the line of the high road. Unfortunately the passage of Strabo is obviously corrupt, and none of the emendations proposed are altogether satisfactory. (See Kramer, *ad loc.*)

The coins ascribed by earlier numismatists to Falerii belong in fact to Elis, the inscription on them being **FAΛΕΙΩΝ**, the ancient Doric form with the digamma prefixed. [ELIS.] [E. H. B.]

FALERNUS AGER, a district or territory in the northern part of Campania, extending from the Massican hills to the N. bank of the Vulturnus. It was celebrated for its fertility, and particularly for the excellence of its wine, which is extolled by the Roman writers, especially by Horace, as surpassing all others then in repute. (Hor. *Carm.* i. 20. 10, ii. 3. 8, &c. Virg. *G.* ii. 94; Sil. Ital. vii. 162—165; Propert. iii. 6. 73; Plin. xiv. 6. s. 8; Strab. v. pp. 234, 243; Athen. i. pp. 26, 27.) It is probable that the district in question derived its name originally from a town of the name of Faleria, but no mention of such occurs in history: and it was a part of the domain of Capua until its conquest by the Romans, who, after the great battle at the foot of Mount Vesuvius in B. C. 340, annexed the whole district N. of the Vulturnus to the Roman domains, and shortly after divided the lands thus acquired among the plebeians. (Liv. viii. 11, 12.) In B. C. 295 a colony was founded at Sinuessa, immediately adjoining the Falernian district (Liv. x. 21), but it does not appear that the ager was annexed to it: nor do we know to which of the neighbouring cities this favoured tract belonged for municipal purposes. In B. C. 217 the whole district was laid waste by the Carthaginian cavalry under Maharbal. (Liv. xxii. 13.)

On this occasion Livy distinctly tells us that the "Falernus ager" which was thus ravaged extended as far as the Aquae Sinuessanae, and almost up to the gates of Sinuessa itself: shortly afterwards (c. 15) he speaks of the Falernus ager as separated

Digitized by Google

" Campanus ager " by the Vulturnus. It , therefore, that he used the term in the full given to it above. Pliny, on the contrary, to apply the name in a much more restricted he describes the " ager Falernus " as lying s left hand as one proceeded from the Pons ius to the Colonia Urbana of Sulla " (xiv. 6. which would exclude all the space between Appia and the Vulturnus. The exact limits district cannot be fixed with certainty: the as probably used in a narrower or a wider sometimes with reference to the especial wine- district, sometimes to the whole of the fertile n the N. of the Vulturnus.

y tells us that the Falernian wine was in his ady declining in quality, from want of care cultivation: the choicest kind was that called icum, from a village of that name, probably ed in honour of Sulla, who had established a in this district. (Plin. xiv. 6.) Immediately ing the Falernus ager was the " Statanus " the wine of which is already noticed by Strabo, this had in the time of Pliny attained even to a riority over the true Falernian. (Plin. *l. c.*; v. pp. 234, 243; Athen. i. p. 26.) The exact ation of this district is unknown: but it appears have bordered on the Falernian territory on the side and that of Cales on the other.

Pliny also mentions (*l. c.*) a village called Cediae Caedine in this district, which he places 6 miles m Sinuessa: it is evidently the same place which ve name to the " Caeditiae Tabernae " on the Via ia, mentioned by Festus (p. 45. ed. Müller).

An inscription preserved in the neighbouring m of *Carinola* notices the " coloni Caedicianei " ether with the Sinuessani. (Mommsen, *I. R. N.* 21.) [E. H. B.]

FALISCI. [FALERII.]

FANUM FORTUNAE (Φάνον Φορτοῦνας, Ptol.; Ἱερὸν τῆς Τύχης, Strab.: *Eth.* Fanestris: *Fano*), city of Umbria, situated on the coast of the Adriatic on the left bank of the river Metaurus, between Pisaurum (*Pesaro*) and Sena Gallica (*Sinigaglia*). It was here that the Via Flaminia, ascending the valley of the Metaurus from Forum Sempronii, joined the line of road which led along the coast from Ancona and Picenum to Ariminum. (Itin. Ant. pp. 100, 126.) It is evident that the town must originally have derived its name from the ancient temple of Fortune: but of this we have no account, nor do we know whether it existed prior to the Roman conquest of this part of Italy. There must, however, have soon grown up a considerable town upon the spot, as soon as the Flaminian Way was completed; and in the Civil War of B. C. 49, we find it mentioned by Caesar as a place of importance which he hastened to occupy with one cohort, immediately after his advance to Ariminum. (Caes. *B. C.* i. 11.) For the same reason, in A.D. 69, the generals of Vespasian made it their headquarters for some time before they ventured to attempt the passage of the Apennines, and advance upon Rome. (Tac. *Hist.* iii. 50.) These are the only occasions on which it figures in history; but we learn that it received a colony under Augustus, and appears to have become from thenceforth one of the most flourishing and considerable towns in this part of Italy. Its colonial rank is attested by inscriptions, on which it bears the title of " Colonia Julia Fanestris," or " Colonia Julia Fanum Fortunae," as well as by Mela and Pliny. (Plin. iii. 14. s. 19; Mel. ii. 4. § 5: *Lib. Colon.* p. 256; Orell. *Inscr.* 83, 1535, 3143, 3969.)

It was at the period of the establishment of this colony that the city was adorned with a basilica, of which Vitruvius, as we learn from himself, was the architect (Vitruv. v. 1. § 6), and to the same period belongs the triumphal arch of white marble, erected in honour of Augustus, which still forms one of the gates of the city on the Flaminian Way (Eustace, *Class. Tour*, vol. i. p. 287; Orell. *Inscr.* 602). Claudian, Sidonius, and the Itineraries attest the continued importance of Fanum, as it was commonly called, throughout the period, and it is probable that, like most of the cities on the Flaminian and Aemilian Ways, it retained some degree of prosperity long after the other towns of the province had fallen into decay. (Claudian, *in VI. Cons. Hon.* 500; *Itin. Ant.* pp. 126, 615; Sidon. Apoll. *Ep.* i. 5). But the city suffered severely in the Gothic wars, and its walls, which had been erected by Augustus, were destroyed by Vitiges. (Procop. *B. G.* iii. 11.) The modern city of *Fano* contains about 8000 inhabitants; it has no other relics of antiquity besides the arch above mentioned, and a few inscriptions. [E. H. B.]

FANUM FUGITIVI, a station on the Flaminian Way, between Interamna (*Terni*) and Spoletium (*Spoleto*). (*Itin. Hier.* p. 613.) It seems to have coincided with the spot now called *la Somma*, at the highest point of the pass between Interamna and Spoletium. [E. H. B.]

FANUM MARTIS, in Gallia Transalpina. 1. Mentioned in the Not. Imp., gave the name of Pagus Fanomartensis to a great part of the modern *Hainaut* in the kingdom of Belgium. The Fanum Martis was in the territory of the Nervii, and in the division of Belgica Secunda. *Fammars* near *Valenciennes*, in the French department of Nord, is the site of Fanum Martis. Fanum was the residence of the praefectus of the Laeti Nervii, as we may conclude from the Notitia. The remains of a large building of the Roman period have been discovered at *Fammars*.

2. The Ant. Itin. places a Fanum Martis on the road from Alauna to Condate Redonum (*Rennes*), between Cosedia and Fines. D'Anville conjectures that Fanum Martis may be the commanding position of *Mont-martin*, which is on the line of the Roman road. Walckenaer fixes it at a place called *Tanie*; and Ukert (p. 487), at *Le Faouet*. The position we may assume to be unknown.

The Table places Fanum Martis between Reginea and Condate. If the position of Reginea were certain, perhaps that of Fanum Martis might be found. D'Anville supposes this Fanum Martis not to be the same as that mentioned in the Antonine Itin. between Alauna and Condate, and he fixes it at *Dinan*; but Walckenaer, who supposes Reginea to be Granville, fixes Fanum Martis at *Tanie*. [G. L.]

FANUM MINERVAE, in Gallia, is placed by the Anton. Itin. on the road from Durocortorum (*Reims*) to Divodurum (*Metz*), and 14 Gal leagues from Durocortorum. The same place see to be intended by the corrupt word Tenomia, D'Anville has it, or Fanomia, as Walckenaer has in the Table, which places it 19 from *Reims*. may either correct the distance 14 in the Itin suppose a station to be omitted, for the purpo making the Itin. agree with the Table, which to have the true distance.

The site of the Fanum is supposed to be C

Digitized by Google

on the line of the Roman road, and near the camp called the camp of Attila. [G. L.]

FANUM VACUNAE. [DIGENTIA.]

FANUM VENERIS. [PORTUS VENERIS.]

FANUM VOLTUMNAE, a place in Etruria, at which it was the custom of the Etruscans to hold the general meetings of the deputies from the different states of the confederation. (Liv. iv. 23, 61, v. 17, vi. 2.) It is evident, from its name, that it was originally a temple or sanctuary, and it is even probable that the meetings in question had at first a purely sacred character, but gradually assumed a political signification. There is no reason to suppose there was ever a *town* upon the spot, though there appears to have been a kind of fair at these annual meetings, at which traders assembled from the neighbouring parts of Italy. (Liv. vi. 2.) The situation of this national sanctuary is nowhere indicated, nor, indeed, does any mention of it occur after the fall of Etruscan independence: hence the sites which have been assigned to it are wholly conjectural. The opinion most commonly received would place it at *Viterbo:* others have fixed it at *Castel d'Asso*, in the same neighbourhood; and Dennis places it at *Monte Fiascone*, 9 miles from *Bolsena*, on the banks of the lake which derives its name from that city. There are certainly circumstances which would appear to connect the Fanum Voltumnae with Volsinii, and render it probable that it was somewhere in that neighbourhood. (Dennis, *Etruria*, vol. i. pp. 516—522.) [E. H. B.]

FARFARUS. [FABARIS.]

FAUSTINO'POLIS, a town in the south of Cappadocia, about 12 miles south of Tyana. It was named after the empress Faustina, the wife of M. Aurelius, who died there in a village, which her husband, by establishing a colony in it, raised to the rank of a town under the name of Faustinopolis. (Jul. Capitol. *M. Ant. Philos.* 26.) Hierocles (p. 700) assigns the place to Cappadocia Secunda, and it is mentioned also in the Antonine and Jerusalem Itineraries. The exact position of the town has not yet been ascertained, but it must have been close to the defiles of the Cilician gates. [L. S.]

FAVE'NTIA (Φαουεντία, Ptol.; Φαβεντία, Steph. B.: *Eth.* Faventinus: *Faenza*), a city of Gallia Cispadana, situated on the Via Aemilia, 10 miles from Forum Cornelii (*Imola*), and the same distance from Forum Livii (*Forli*). (Plin. iii. 15. s. 20; Strab. v. p. 217; Ptol. iii. 1. § 46; *Itin. Ant.* pp. 126, 287.) It is noted in history as the place where Carbo and Norbanus were defeated with great loss by Metellus, the general of Sulla, in B. C. 82. (Appian, *B. C.* i. 91; Vell. Pat. ii. 28; Liv. *Epit.* lxxxviii.) With this exception, we find little notice of it in history; but it appears to have been, under the Roman empire, a municipal town of some consideration, and, in common with many of the other cities on the Via Aemilia, continued to retain its prosperity down to a late period. (Plin. vii. 49. s. 50; Spartian. *Hadr.* 7; Capit. *Ver.* 1; Procop. *B. G.* iii. 3; *Itin. Hier.* p. 616.) Its territory was peculiarly favourable to vines, and, according to Varro, exceeded all other districts in Italy in the quantity of wine produced. (Varr. *R. R.* i. 2. § 7; Colum. iii. 3. § 2.) Silius Italicus, on the other hand, speaks of it as crowned with pines (viii. 598). In the time of Pliny, Faventia was celebrated for its manufactures of linen, which was considered to surpass all others in whiteness. (Plin. xix. 1. s. 2.) We learn from the Itineraries that a cross road led from hence across the Apennines direct to Florentia in the valley of the Arno, a distance of 70 miles. (*Itin. Ant.* p. 283.) The intermediate stations are unknown, but the road must evidently have ascended the valley of the *Lamone* (the Anemo of Pliny), which flows under the walls of *Faenza*. [E. H. B.]

FECYI JUGUM, on the south coast of Gaul, near Agatha (*Agde*), is mentioned by Avienus as Mons Setius [BLASCON]:—

"Fecyi jugum
Radice fusa in usque Taurum pertinet."

Taurus seems to be the *E'tang de Thau*, on one side of which there is a range of hills called "les Monts *Feguie*." (Ukert, *Gallien*, p. 119.) [G. L.]

FELSINA. [BONONIA.]

FELTRIA (*Feltre*), a town of Venetia, but on the confines of Rhaetia, and included within that province according to the later distribution of Italy. It is situated about 3 miles from the river *Piave* (Plavis). Inscriptions prove it to have been a municipal town of some importance under the Roman Empire, and there can be little doubt that we should read "Feltria" for the "Fertini" who are enumerated by Pliny among the "Rhaetica oppida" which were comprised within the tenth region of Italy. (Plin. iii. 19. s. 24; Orell. *Inscr.* 993, 3084; Cassiod. v. 9.) The Itineraries give a cross road from Opitergium (*Oderzo*) to Feltria, and thence through the *Val Sugana* to Tridentum (*Trent*). (*Itin. Ant.* p. 280.) [E. H. B.]

FENNI, a population of the north and north-eastern parts of Europe, first mentioned by Tacitus (*Germania*, 46), as one different from and contrasted to those of *Germania*. In Ptolemy, the only other author who gives their name, the form is Φίννοι. The extent to which the Fenni coincided with the modern Laps of Lapland, rather than with the Finns of Finland (or *vice versâ*), is considered under the articles SITONES, SCYTHIA, and SARMATIA. At present the *name* alone will be noticed. It belongs to the same language with the word *Esthmen* (*q. v.*), viz. the German; and, of this, to the Scandinavian branch. *Finn* is *not* the name by which either the Finlanders or the Laplanders call themselves. It *is* the term by which they are known to the Northmen. This helps to verify the statement that the chief sources of the information of the classical writers concerning the Baltic were German. [R. G. L.]

FERE'NTINUM or FERE'NTIUM (Φερεντῖνον, Strab. v. p. 226; Φερεντία, Ptol. iii. 1. § 50: *Ferentino*), a city of Etruria, situated on the N. of the Ciminian range, about 5 miles distant from the Tiber, and the same distance from the modern city of *Viterbo*. It is not mentioned in history during the period of Etruscan independence, and must probably have been then a mere dependency of Volsinii: Strabo speaks of it as one of the smaller towns in the interior of Etruria, but we learn from other authorities as well as from existing remains, that it must have been in his time a flourishing municipal town: Vitruvius notices the excellent quality of the stone from the neighbourhood, and the numerous statues and other monuments hewn out of this material which adorned the town itself (Vitruv. ii. 7. § 4). In common with most of the cities of Etruria, it had received a Roman colony before the end of the Republic, but did not obtain the title of a colony; and is termed both by Vitruvius and Tacitus, a municipium (*Lex Colon.* p. 216; Vitruv. *l. c.*; Tac. *Hist.* iii. 50). It

Digitized by Google

derived some distinction from being the birth-place of the Emperor Otho, who was of a noble and ancient Etruscan family (Suet. *Oth.* 1; Tac. *l. c.*): we learn also that it possessed an ancient and celebrated temple of Fortune, i. e. probably of the Etruscan goddess Nursia or Nortia (Tac. *Ann.* v. 53). All these circumstances point to it as a place of consideration under the Roman Empire, and we find it termed in an inscription "civitas splendidissima Ferentinensium" (Orell. *Inscr.* 3507): it appears to have survived the fall of the Empire, and retained its episcopal see till the 12th century, when it was attacked and destroyed by the people of the neighbouring city of *Viterbo*, on account of some religious disputes which had arisen between the two Alberti. *Descrizione d'Italia*, p. 62).

The site is now uninhabited, but is still known by the name of *Ferento:* and the ruins of the ancient city are considerable, the most important of them being a theatre, which is, in some respects, one of the best preserved monuments of the kind remaining in Italy. The *scena*, or stage-front, is particularly remarkable: it is 136 feet long, and built of massive rectangular blocks of volcanic masonry, on which rests a mass of Roman brickwork with arches, doubtless of Imperial times: while seven gates, with their arches for architraves, open in the façade itself. The lower part of this construction is supposed by Mr. Dennis to be certainly an Etruscan work; but the Sig. Canina regards the whole edifice as a work of the Roman Empire. (Canina, in the *Annali dell' Inst.* 1837, pp. 62—64; Dennis, *Etruria*, vol. i. p. 204—210.) Besides the theatre, portions of the city walls and gates, and various ruins of buildings of Roman date, are still remaining on the site of Ferentino.

The ancient name is variously written: the MSS. of Tacitus and Suetonius fluctuate between Ferentinum and Ferentinum: Ptolemy writes it Ferentia (Φερεντία); and the ethnic form used by Vitruvius, "municipium Ferentis," is in favour of the form Ferentium: on the other hand, the inscription above cited (which certainly belongs to the Etruscan and not to the Hernican town) gives the form Ferentinas from Ferentinum, and the Liber Coloniarum also has "Colonia Ferentinensis" for the Etruscan colony. [E. H. B.]

FERENTYNUM (Φερέντυνον: *Eth.* Ferentinās, -ātis, but sometimes also Ferentinus, Sil. Ital. viii. 393; Jul. Obseq. § 87: *Ferentino*), a city of the Hernicans; but included, with the other towns of that people, in Latium, in the more extended and later sense of that term. It was situated on the Via Latina, between Anagnia and Frusino, and was distant 8 miles from the former (or, more strictly speaking, from the Compitum Anagninum), and 7 from the latter town. (Strab. v. p. 237; *Itin. Ant.* pp. 302, 305.) According to Livy, it would seem to have been at one period a Volscian city; for he describes the Volscians as taking refuge there when they were defeated by the Roman consul L. Furius in B. C. 413; but they soon after abandoned the town, which was given over, together with its territory, to the Hernicans. (Liv. iv. 51.) We subsequently find the Volscians complaining of this as a great spoliation (Id. 56); but from the position of Ferentinum, it seems most probable that it was originally a Hernican city, and had been wrested from them by the Volscians in the first instance. It continued after this to be one of the chief cities of the Hernicans, and took a prominent part in the war of that people against Rome in B. C. 361, but was taken by assault by the Roman consuls. (Liv. vii. 9.) In the last revolt of the Hernici, on the contrary, Ferentinum was one of the three cities that refused to join in the defection from Rome, and which were rewarded for their fidelity by being allowed to retain their own laws, which they preferred to the rights of Roman citizenship. (Id. ix. 43.) At what period they afterwards obtained the civitas is uncertain: in B. C. 195 they are mentioned as possessing only the Latin franchise (Id. xxxiv. 42); and an inscription still preserved, which cannot be earlier than the second century B. C., records their possession of their own censors, a magistracy which is not found in the Roman municipia. (Zumpt, *Comment. Epigr.* p. 77.) It is therefore probable that they did not obtain the Roman franchise till after the Social War; and the contrary cannot be inferred from the title of Municipium given to them by Gellius in citing an oration of C. Gracchus, in which that orator relates an instance of flagrant oppression exercised by a Roman praetor upon two magistrates of Ferentinum. (Gell. x. 3.) At a later period Ferentinum, in common with most of the neighbouring towns, received a colony (*Lib. Colon.* p. 234); but the new settlers seem to have kept themselves distinct from the former inhabitants, as we find in inscriptions the "Ferentinates Novani" (Orell. *Inscr.* 1011). In B. C. 211 the territory of Ferentinum was traversed and ravaged by Hannibal (Liv. xxvi. 9); but with this exception we hear little of it in history, though it appears from extant remains and inscriptions to have been a considerable town. Horace, however, alludes to it as a quiet and remote country place; a character it may well have retained, notwithstanding the proximity of the Via Latina, though some commentators suppose the Ferentinum noticed in the passage in question to be the Tuscan town of the name. (Hor. *Ep.* i. 17. 8; Schol. Cruq. *ad loc.*) It was distant 48 miles from Rome, on a hill rising immediately on the left of the Via Latina, which passed close to its southern side, but did not enter the town.

The existing remains of antiquity at *Ferentino* are of considerable interest. They comprise large portions of the ancient walls, constructed in the Cyclopean style, of large irregular and polygonal blocks of limestone, but less massive and striking than those of *Alatri* and *Segni*. They are also in many places patched or surmounted with Roman masonry; and one of the gates, looking towards *Frosinone*, has the walls composing its sides of Cyclopean work, while the arch above it is evidently Roman, as well as the upper part of the wall. A kind of citadel on the highest point of the hill crowned by the modern cathedral, is remarkable as being supported on three sides by massive walls or substructions which present a marked approach to the polygonal structure, but which, as an inscription still remaining on them informs us, were built *from the ground* by two magistrates of Ferentinum at a period certainly not earlier than B. C. 150. (Bunsen, in the *Ann. d. Inst. Arch.* vol. vi. p. 144; Bunbury, in *Class. Museum*, vol. ii. p. 164.) Numerous other portions of Roman buildings are still extant at *Ferentino*, as well as inscriptions, one of which, recording the munificence of a certain A. Quinctilius Priscus to his fellow citizens, is cut in the living rock on an architectural monument facing the line of the Via Latina towards *Frosinone*, and forms a picturesque and striking object. The inscription (which is given by West-

Digitized by Google

phal) records the names of three farms or *fundi* in the territory of Ferentinum, two of which, called Rojanum and Ceponianum, still retain the appellations of *Roana* and *Cipollara*. (Westphal, *Römische Kampagne*, p. 85; Dionigi, *Viaggio ad alcune Città del Lazio*, pp. 4—18.) [E. H. B.]

FERENTINAE LUCUS, a sacred grove with a fountain and shrine of the deity of the same name, celebrated as the place where the cities composing the Latin League used to hold their general assemblies. It is mentioned by Livy on occasion of the attempt of Turnus Herdonius to overthrow the power of Tarquinius Superbus (i. 50, 52), and again on several subsequent occasions (ii. 38, vii. 25); and we learn from a remarkable passage of Cincius (*ap. Fest. s. v. Praetor.* p. 241) that these assemblies continued to be held regularly till B. C. 340. The name is indeed corrupted in the passage in question; but there is no doubt that we should read "ad caput Ferentinae," which corresponds to the expressions employed by Livy, "ad caput aquae Ferentinae" and "ad caput Ferentinum." From these modes of expression it is evident that there was both a sacred grove, and a fountain forming the head or source of the stream called Aqua Ferentina. Dionysius, on the contrary, calls the place of assembly Ferentinum (Φερεντῖνον, iv. 45, v. 50), and appears to have regarded it as a town, though we need not suppose that he confounded it with the Hernican city of the name, as has been done by some modern writers. The only clue to its position is the passage above cited from Cincius, who places it "sub monte Albano;" but even without this testimony we could hardly hesitate to seek it in the neighbourhood of Alba Longa, and there can be little doubt that its site is correctly fixed by Gell and Nibby in the deep valley or ravine near *Marino*, where there is a copious fountain (supposed by some to be a subterranean outlet of the Lacus Albanus), which gives rise to the small stream now known as the *Marrana del Pantano*. The valley in which this source is found is now called the *Parco di Colonna*, and is still shaded with deep woods, which give it a picturesque and solitary aspect. (Gell, *Top. of Rome*, pp. 90—92; Nibby, *Dintorni*, vol. ii. p. 319.) [E. H. B.]

FERENTUM or FORENTUM (Φερέντη, Diod.: *Eth.* Forentanus), a town of Apulia, about 10 miles S. of Venusia. The name is written Ferentum in most editions of Horace, though Orelli has substituted Forentum, which is the form found in Livy and Pliny; but the first form is supported by Diodorus. It is still called *Forenza*; but from the expressions of Horace ("arvum pingue humilis Ferenti," *Carm.* iii. 4, 16), to whom it was familiar from its proximity to Venusia, the ancient town appears to have been situated in a valley, while the modern one stands on the summit of a hill; and according to local writers, some remains of the ancient Ferentum may be found in a small plain 2 miles nearer *Venosa*. (Romanelli, vol. ii. p. 236.) Livy terms it a strong town, so that it was one of the few places in Apulia which offered any considerable resistance to the Roman arms, and was one of the last subdued. (Liv. ix. 16, 20, but in the former of these passages it is probable that the true reading is "Frentani," not "Forentani;" Diod. xix. 65.) The Forentani are mentioned by Pliny (iii. 11. s. 16) among the municipal towns of Apulia; but we meet with no subsequent mention of it in any ancient author. [E. H. B.]

FERESNE, in Gallia, is placed by the Table on the road from Atuaca (that is, Atuatica or *Tongern*) to Noviomagus (*Nymegen*), and 16 Gallic leagues from *Tongern*. The next place to Feresne on the road is Catualium [CATUALIUM], and from Catualium comes Blariacum [BLARIACUM]. Feresne may be a corrupted name. The site is uncertain. [G. L.]

FERO'NIA or LUCUS FERO'NIAE (Φηρωνία, Strab.; Λοῦκος Φηρωνίας, Ptol.). 1. A town in Southern Etruria, at the foot of Mount Soracte, in the territory of Capena, with a celebrated temple and shrine of the goddess from whom it derived its name, and a sacred grove, attached to it. Strabo, who is the only author who mentions a *town* of the name which he calls Feronia (v. p. 226); other writers speaking of "Lucus Feroniae" and "Feronianum": but it is natural that in process of time a town should have grown up around a site of such sanctity, and which was annually visited by a great concourse of persons. Feronia appears to have been a Sabine goddess (Varr. *L. L.* v. 74), and hence the festivals at her shrine seem to have been attended especially by the Sabines, though the sanctuary itself was in the Etruscan territory, and dependent upon the neighbouring city of Capena (Liv. i. 30 and 4). The first mention of these annual festivals occurs as early as the reign of Tullus Hostilius, when we find them already frequented by great numbers of people, not only for religious objects, but as a kind of fair for the purposes of trade, a custom which seems to have prevailed at all similar meetings (Liv. i. 30; Dionys. iii. 32.) Great wealth had in the course of ages, been accumulated at the shrine of Feronia, and this tempted Hannibal to make a digression from his march during his retreat from Rome, in B. C. 211, for the purpose of plundering the temple. On this occasion he despoiled it of its gold and silver, amounting to a large sum; besides which there was a large quantity of rude uncoined brass, a sufficient proof of the antiquity of the sanctuary. (Liv. xxvi. 11; Sil. Ital. xiii. 84—90.) The only other notices of the spot which occur in history are some casual mentions of prodigies that occurred there (Id. xxvii. 4, xxxiii. 26); but Strabo tells that it was still much frequented in his time, and that many persons came thither to see the miracle of the priests and votaries of the goddess passing unharmed through a fire and over burning embers (Strab. v. p. 226). This superstition is noticed by other writers to the temple of Apollo on the summit of Mt. Soracte (Plin. vii. 2; Virg. *Aen.* xi. 785—790): it was probably transferred from thence to the more celebrated sanctuary at its foot. [SORACTE.]

The general position of the Lucus Feroniae is sufficiently fixed by the statements that it was "ad Capenate," and at the foot of Mt. Soracte. A fountain at the foot of the hill of *S. Oreste*, near the S. extremity of the mountain, is still called *Feronia*, and as such fountains were generally connected with sacred groves, there is every probability that this was the site of the grove and sanctuary of the goddess. The village of *S. Oreste*, which stands on the hill above (a shoulder or off-shoot of Soracte), and has some traces of having been an ancient site, is the one by Nibby and Dennis to occupy the position of the ancient town of Feronia. (Nibby, *Dintorni*, vol. ii. p. 108; Dennis, *Etruria*, vol. i. p. 180.)

Pliny mentions a Lucus Feroniae among the colonies of the interior of Etruria: and from the order in which he describes the towns of that province there can be little doubt that he means the celebrated one

Digitized by Google

ality of the name in Southern Etruria. But it is singular that Ptolemy, who also notices a Lucus Feroniae, to which he gives the title of a colonia, places it in the NW. extremity of Etruria, between the Arnus and the Macra. (Ptol. iii. 1. § 47; Plin. iii. 5. s. 8.) No other notice occurs of any such place in this part of Etruria; and the Liber Coloniarum, though unusually copious in its description of the province of Tuscia, mentions no such colony at all. An inscription, on the other hand, in which we find the name of "Colonia Julia Felix Lucoferonensis" (Orell. 4099), refers probably to the Southern Etrusean town: and on the whole it is more probable that the name should have been altogether misplaced by Ptolemy, than that there should have existed a second colony of the name, of which we know nothing. (Lampt, *de Colon.* p. 347.)

2. A place near Tarracina, on the border of the Pontine Marshes, where there existed also a shrine or sanctuary of the goddess Feronia, with a fountain and sacred grove. The latter is alluded to by Virgil as "Viridi gandens Feronia luco," *Aen.* vii. 800) in connection with Circeii and Anxur (Tarracina), and the fountain is mentioned by Horace, on his journey to Brundusium, as adjoining the place where the travellers quitted the canal through the Pontine Marshes, and from whence they had a long ascent of three miles to Anxur. (Hor. *Sat.* i. 5. 23.) Dionysius relates (ii. 49) a legend of the temple having been founded by some Lacedaemonian exiles, who afterwards settled among the Sabines; a tale which was probably derived from the fact of Feronia being a Sabine divinity. We learn from Servius that there was a stone seat in her temple here, on which if any slaves took their seat they obtained their liberty. Feronia, indeed, appears to have been especially worshipped by freed men and women. (Serv. *ad Aen.* iii. 564; Liv. xxii. 1.) Vibius Sequester erroneously speaks of a *lake* of Feronia: whether he meant the fountain of that name, or substituted "Lacus" for "Lucus," is uncertain. (Vib. Seq. p. 1; Oberlin, *ad loc.*)

The site of this sanctuary is clearly marked at a place now called *Torre di Terracina*, where there is a beautiful and abundant source of limpid waters, making out just at the foot of the hills which here bound the Pontine Marshes, and some remains of the temple are still visible. The spot is just 58 miles from Rome, by the line of the Appian Way. (Chaupy, *Maison d'Horace*, vol. iii. p. 453.) [E. H. B.]

FERRARIA PROM. [DIANIUM.]

FERRA'TUS M. (*Jebel Jurjura*), a mountain-chain of Mauretania Sitifensis, running SW. from the neighbourhood of Tubusuptus. (Ammian. Marc. xxx. 5.) [P. S.]

FESCE'NNIUM (Φασκένιον, Dionys.: *Eth.* Fescenninus), an ancient town of Etruria, situated not very far from Falerii, with which it always appears in close connection. Dionysius, indeed, expressly tells us that the Falisci had two cities, Falerii and Fescennium; and other authors confirm this by ascribing the same Argive or Pelasgic origin to both. (Dionys. i. 21; Solin. 2. § 7.) It is very probable also that the "Faliscum" of Strabo, which he speaks of as a town distinct from Falerii (v. p. 266), was no other than Fescennium. Virgil mentions the "Fescenninae acies" among the Etruscan forces that followed Turnus to the war against Aeneas (Aen. vii. 695); but no independent notice of Fescennium occurs in history, and it appears certain that it was merely a dependency of Falerii, and followed the fortunes of that city, during the period of its greatness and power. Pliny, however, speaks of Fescennia (as he writes the name) as in his time an independent municipal town (iii. 5. s. 8), but this is the only notice we find of it under the Roman Empire; and we have no clue to its position beyond that of its proximity to Falerii. Hence the determination of its site has been involved in the confusion which has arisen with regard to that of the more important city; and both Gell and Müller have placed Fescennium at *Civita Castellana*. It may, however, be regarded as certain that that city occupies the site of the ancient or Etruscan Falerii [FALERII]; and we must therefore seek for Fescennium elsewhere. A local antiquarian (Antonio Massa), whose opinion has been followed by Cluver and several other writers, would place it at *Gallese*, a village about 9 miles to the N. of *Civita Castellana*, where some Etruscan remains have been found. Mr. Dennis has pointed out another site, a short distance from *Borghetto* on the Tiber, between that village and *Corchiano*, where there are unquestionable remains of an Etruscan city (part of the walls, &c. being still visible), which appear to have the best claim to be regarded as those of Fescennium. They are distant about 6 miles from *Civita Castellana*, and indicate the site of a city of considerable magnitude. The spot is marked only by a ruined church, named *S. Silvestro*. (Dennis, *Etruria*, vol. i. pp. 152—162; Cluver, *Ital.* p. 551; Nibby, *Dintorni*, vol. ii. p. 28.)

It is singular that a place which seems to have been of so little importance as Fescennium, should apparently have given name to a particular branch of literature, — the "Fescennini versus," which appear to have been originally a kind of rude dramatic entertainment, or rustic dialogue in verse: though, when these were superseded by more polished dramatic productions, the name of Fescennini was retained, principally, if not exclusively, for verses sung at nuptial festivities, when great licentiousness of language was permitted, as had been the case in the older Fescennine dialogues. (Liv. vii. 2; Hor. *Ep.* ii. 1. 145; Catull. lxi. 127; Claudian, *Fescennina*, xi.—xiv.; Senec. *Med.* 113.) The only authors who *expressly* derive these dialogues from Fescennium are Servius (*ad Aen.* vii. 695) and Festus (v. Fescennini, p. 85); and the former, strangely enough, calls it a town *of Campania*, probably by a confusion between the Fescennini and Atellanae [ATELLA]: but the name is in itself strong evidence in favour of their derivation from thence. And though we are unable to account for the application of such a local epithet to a class of compositions which must have been to a great extent the spontaneous effusions of rustic character, the same remark applies in a great degree to the "fabulae Atellanae," which could hardly have been confined to the one city of Campania to which they owe their name. Hence, it appears unreasonable to reject the obvious derivation from Fescennium (as Klotz and Bernhardy have done), merely because we cannot explain the origin of the appellation. (See on this subject Müller, *Etrusker*, vol. ii. pp. 284—286; Klotz, *Römische Literat. Geschichte*, vol. i. p. 293; Bernhardy, *Röm. Literatur.* note 118.) [E. H. B.]

FIBRE'NUS, a small river of Latium, in the country of the Volsci, which falls into the Liris on its left bank, about 4 miles below Sora and less than 3 from Arpinum. It is still called the *Fibreno*, though more commonly known in the country as the *Fisme della Posta* from the village of *La Posta*,

Digitized by Google

beneath which it has its source. Its whole course does not exceed 7 or 8 miles in length; but, like many rivers in a limestone country, it rises all at once with a considerable volume of water, which forms, in the first instance, a deep and clear pool, or little lake, from whence its waters flow in a channel of 10 or 12 yards in breadth, but of great depth and remarkable clearness. This insignificant but beautiful stream derives a high degree of interest from the description of it by Cicero, whose paternal villa was situated on its immediate banks, or even as it would appear on an island surrounded by its waters. Great doubts have, however, been raised as to the exact locality of this villa. The opinion commonly adopted places its site in an island formed by two arms of the Fibrenus, just above its confluence with the Liris, where there now stands a convent called *S. Domenico*, and considerable remains of ancient buildings are certainly visible. Others, however, have transferred it to a smaller island, now called *La Carnella*, about a mile higher up the stream. This islet seems to agree perfectly with the description given at the beginning of the second book *De Legibus* of the spot, "insula quae est in Fibreno," where that dialogue was held; but this is clearly represented as at some distance from the villa itself, and approached by following the shady banks of the river. Hence it seems probable that the villa may have been at *S. Domenico*, while the "palaestra," or planted grove for exercise, which Cicero compares with the Amalthea of his friend Atticus, was in the little island of *Carnella*. This appears to be the same which he elsewhere (*ad Att.* xii. 12) calls "insula Arpinas." The *Fibreno* is still remarkable for its extreme coldness, a quality common to many rivers which rise under similar circumstances. (Cic. *de Leg.* ii. 1, 3. *Tusc.* v. 26, *ad Q. F.* iii. 1, *ad Att.* xiii. 16; Romanelli, vol. iii. pp. 366—371; Kelsall, *Excursion to Arpino*, pp. 89—100; Hoare, *Classical Tour*, vol. i. p. 293.)

The villa of Cicero passed, at a later period, into the hands of the poet Silius Italicus, who is the only other author besides Cicero that mentions the name of the Fibrenus. (Sil. Ital. viii. 401; Martial, xi. 48, 49.) [E. H. B.]

FICANA, an ancient city of Latium, which figures in Roman history only on the occasion of its conquest by Ancus Marcius, who is said to have removed the inhabitants to Rome, and destroyed the city itself. (Liv. i. 33; Dionys. iii. 38, where the editions have Fidenae, but there is little doubt that the event referred to is the same related by Livy.) It is certain that it was never repeopled; its name is found in Pliny's list of the extinct cities of Latium (iii. 5. s. 9), and is noticed also by Festus (v. *Pailia Saxa*) as a place no longer in existence. The latter passage, however, affords us a clue to its position; according to Antistius Labeo there cited, it was situated on the Via Ostiensis, eleven miles from Rome, and apparently immediately adjoining the Tiber, on which it had a port, at a place called by Fabius Pictor the Puilia Saxa. A rocky hill, abutting on the Tiber, to the right of the Via Ostiensis, at the required distance from Rome, now marked by a farm called *Dragoncello*, may therefore be presumed to be the site of Ficana, though no ruins remain. (Gell. *Top. of Rome*, p. 245; Nibby, *Dintorni*, vol. ii. p. 40.) [E. H. B.]

FICULEA or FICULNEA (Φικόλνεοι, Dionys.; *Eth.* Ficuleas-ātis, Varr.; Ficulensis, Cic. et Inscr.; *Cesarini*), a city of ancient Latium, situated on the Via Nomentana, between Rome and Nomentum. It is mentioned repeatedly in the early Roman history, both by Livy and Dionysius. The latter tells us that it was founded by the Aborigines, together with Antemnae and Tellenae (i. 16). Its name appears also among the cities of the Prisci Latini stormed by the elder Tarquin (Liv. i. 38): and as it is no longer found in the list of the thirty Latin cities that composed the League in B. C. 493 (Dionys. vi. 61), we may probably conclude that it continued subject to, or at least dependent on, Rome. Nor does it again figure in any of the ordinary histories of Rome; but Varro has preserved to us a notice (*de L. L.* vi. 18) which represents the Ficulenses, Fidenates, and other neighbouring "populi" as suddenly taking up arms against Rome, shortly after the departure of the Gauls, and producing for a time a panic terror in the city, the memory of which was recorded by a festival called the Populifugia.

No subsequent notice of Ficulea itself occurs in Roman history: and the change of name of the road which led thither from Via Ficulensis to Nomentana (Liv. iii. 52) may probably be regarded as a token of its declining importance. But the "ager Ficulensis" is mentioned by Cicero (*ad Att.* xii. 5. 4) as well as in the Liber Coloniarum (p. 256, where it is slightly corrupted into Ficiliensis): and Pliny places the Ficolenses among the existing towns of Latium (iii. 5. s. 9). These indications are confirmed by inscriptions, which prove that it still subsisted as a municipal town in the reign of M. Aurelius. But there seem reasons for supposing that it fell into decay soon after, and all trace of it disappears in the middle ages. (Nibby, *Dintorni*, vol. ii. pp. 45, 46.)

The inscriptions just mentioned, one of which is interesting, as recording the institution by M. Aurelius of a college or charitable institution for boys and girls, who were called "Pueri et Puellae Alimentarii Ficolensium" (Orell. *Inscr.* 3364), were found in the neighbourhood of a farm-house called *Cesarini*, on the left of the Via Nomentana, about 9 miles from Rome. They, therefore, leave no doubt that the Ficulea of Imperial times, at least, was situated in that neighbourhood. But the epithet of "Ficulnensis," applied by Livy to the ancient Latin city (v. 29), would seem to indicate that it was distinct from the town which bore that name in his day. Martial also speaks of "Ficulneas veteres" (vi. 27), as if there were in the immediate neighbourhood of Nomentum; and it is not improbable that the words used by Dionysius,—"Ficulnea, which adjoins the Crustumian mountains" (i. 16.),—were added for the same purpose of distinction. Hence it is probable that the Roman Ficulea was situated somewhere within the confines of the *tenimento* or domain of *Cesarini*, but that the ancient Latin city occupied a site more distant from Rome, and nearer to Nomentum, either on the hill called *Monte Gentile*, or more probably on that now marked by a lofty tower called *Torre Lupara*. The site, which is 11 miles from Rome, and on the Via Nomentana, is described as "strewed with tiles and pottery, perhaps one of the surest indications of an ancient city." (Gell, *Top. of Rome*, p. 247.)

One of the inscriptions above mentioned (Orell. 111) gives us the names of two Pagi in the territory of Ficulea, called the Pagus Ulmanus and Transalpinus: hence we may presume that the brook which now flows by *Cesarini*, and crosses the Via Nomentana near the *Casale dei Pazzi*, bore in ancient times the name of Ulmus. [E. H. B.]

FIDE'NAE (Φιδῆναι, Strab., Ptol., but Φιδήνη in Dionysius, and the singular form FIDENA is used by Virgil, *Aen.* vi. 773, and by Tacitus, *Ann.* iv. 62: *Eth.* Fidenās, -ātis; Φιδηναῖος, Dionys.: *Castel Giubileo*), an ancient city of Latium, situated on the left bank of the Tiber, and on the Via Salaria, five miles from Rome. There appears no doubt that it was originally and properly a Latin city. Virgil mentions it among the colonies founded by the kings of Alba; and in accordance with the same view, Dionysius relates that Fidenae, Crustumerium, and Nomentum were founded by colonists from Alba led by three brothers, the eldest of whom was the founder of Fidenae. (Virg. *Aen.* vi. 773; Dionys. ii. 53; Steph. B. *s. v.*) Still more decisive is it that its name is found in Pliny in the list of the towns that were accustomed to share in the sacrifices on the Alban Mount. (Plin. iii. 5. s. 9. § 69.) On the other hand, Livy expressly tells us it was of Etruscan origin ("Nam Fidenates quoque Etrusci fuerunt," i. 15); and not only gives this as a reason for the close connection between the Veientes and Fidenates, but even notices that the people of Fidenae had only learnt the Latin language from their intercourse with the Roman colonists (i. 27). The last statement is evidently a mere touch added by the historian himself, and only serves to prove his conviction of their Etruscan descent. No other writer alludes to this extension of the Tuscan power; and though Fidenae frequently appears in alliance with Veii (for which their relative position will sufficiently account), we find no trace of its holding any relations with the other Etruscan cities.

The close proximity of Fidenae to Rome would naturally bring it early into collision with the rising city: and accordingly we find that hardly any other city plays so important a part in the earliest history of Rome. All authors agree in representing it as engaged in war with Romulus: according to Plutarch (*Rom.* 17) it took part with Caenina and Antemnae in the war which arose out of the rape of the women; but neither Livy nor Dionysius mentions it on that occasion, and both refer the first hostilities to the period after the death of Tatius. According to their obviously fabulous account the city itself was taken by Romulus, who occupied it with a garrison or colony of 300 men; a number exaggerated by Plutarch to the absurd amount of 2500 colonists, of whom he represents 2000 as shortly after cut off by the Etruscans. (Liv. i. 14, 15; Dionys. ii. 53; Plut. *Rom.* 23, 25.) As usually happens in the early history of Rome, all trace of this Romulian colony subsequently disappears. Fidenae is noticed during the reign of Numa as an independent city, maintaining friendly relations with the peaceful king, while under his successor Tullus Hostilius it again united with the neighbouring Veii against the growing power of Rome. (Dionys. ii. 72, iii. 6; Liv. i. 27.) Their combined forces were defeated under the walls of Fidenae, and according to Dionysius the city itself was soon after besieged by Tullus, and compelled to surrender. Yet after this we find Fidenae again engaging in successive wars with Ancus Marcius and Tarquinius Priscus, and, if we may believe the Roman historians, successively captured by both monarchs, the latter of whom is even represented as having again established there a Roman colony. (Dionys. iii. 39, 40, 50, 57.) It is evident that no reliance can be placed upon these facts as historical; but the inference that Fidenae was really (as described by the Roman historians) a large and powerful city, almost on a par with Veii, may fairly be admitted. It is remarkable also that it appears to have held a very independent position, and appears sometimes in league with the Latins, at others with the Sabines, but most frequently with the Veientes. After the expulsion of the Tarquins from Rome, Fidenae is represented as taking an active part in attempting their restoration, and for this purpose entered into a league first with the Sabines, and afterwards with the Latins; but both attempts proved abortive, and in B. C. 496 the Fidenates, abandoned by their allies, were compelled to surrender to the Roman arms. (Liv. ii. 19; Dionys. v. 40, 43, 52, 60.) Hence the name of Fidenae does not appear in the list given by Dionysius immediately afterwards of the confederate cities of Latium, and it is probable that it did not at this time form part of the Latin League. From this time the Fidenates appear to have continued tranquil for a considerable period, till in B. C. 438 they were again induced to unite with their old allies the Veientes, and by the murder of the Roman ambassadors produced an irremediable breach with the republic. Their combined forces were, however, again defeated by Cornelius Cossus under the very walls of Fidenae (Liv. iv. 17—19), and a few years after Fidenae itself was again taken (Id. 22). Yet in B. C. 426 we find both the Veientes and Fidenates once more in arms, and the latter city was once more captured by the dictator Quinctius Pennus. (Id. iv. 31—34.) On this occasion we are told that it was plundered, and the inhabitants sold as slaves; and though it does not appear that the city itself was destroyed, — the expression of Florus, "Cremati suo igne Fidenates" (i. 12. § 4), being evidently a mere rhetorical flourish derived from Livy's language, — its humiliation must have been complete; for, with the exception of an obscure notice in Varro (*L. L.* vi. 18) of a sudden outbreak of the people of Fidenae, Ficulea, and the neighbouring towns just after the capture of Rome by the Gauls, we hear no more of Fidenae as an independent city. (For the history of these wars, see Niebuhr, vol. ii., and Bormann, *Alt.-Latinische Chorographie*, pp. 241—245.)

Though we have no account of the destruction of Fidenae, which according to Varro was certainly in existence after the Gaulish War, B. C. 389, it seems to have rapidly sunk into a state of complete decay, and before the close of the republic had dwindled into an insignificant village. Cicero speaks of it as a very poor and decayed place; and Strabo terms it (like Collatia and Antemnae) a mere village, the exclusive property of one individual. Horace also refers to Fidenae and Gabii as almost proverbial instances of deserted villages ("Gabiis desertior atque Fidenis vicus," Hor. *Ep.* i. 11. 7); and Juvenal more than once refers to the same places as poor and rustic country towns (Cic. *de Leg. Agr.* ii. 35; Strab. v. p. 230; Juv. vi. 57, x. 100). Yet it is evident that Fidenae never lost its municipal rank: Cicero, in the passage already cited, mentions it among the "oppida" of the neighbourhood of Rome, which he contrasts with the flourishing cities of Campania; and Juvenal notices it as retaining its local magistrates ("Fidenarum — potestas," x. 100), which are mentioned also in inscriptions. It is therefore a complete error on the part of Pliny to reckon Fidenae among the "populi" of Latium, which had become utterly extinct (iii. 5. s. 9); and, by a singular inadvertency, he himself afterwards mentions the Fidenates among the Sabines in the fourth region of Augustus (iii. 12. s. 17). The Anio being taken as the limit of that region, Fidenae, as well as

Digitized by Google

Nomentum, came to be considered as belonging to the Sabine territory, though originally included in Latium.

In the reign of Tiberius Fidenae was the scene of a fearful catastrophe, arising from the fall of a temporary wooden amphitheatre during a show of gladiators, that had drawn together vast crowds from Rome and the neighbouring towns. By this accident not less than 50,000 persons, according to Tacitus, were killed or seriously hurt. (Tac. *Ann.* iv. 62, 63; Suet. *Tib.* 40.) From this time we hear no more of Fidenae; but its name is still found in the Tabula as the first station on the Salarian Way, and its continued existence may be traced by inscriptions and ecclesiastical records down to the seventh century of the Christian era, when all trace of it disappears. (Ptol. iii. 1. § 62; *Tab. Peut.*; Murat. *Inscr.* p. 316, no. 4; Nibby, *Dintorni*, vol. ii. p. 57.)

Though no ruins exist on the site of Fidenae, its position may be identified with unusual certainty. Ancient authors concur in placing it at the distance of 5 miles or 40 stadia from Rome, on the Via Salaria; and we gather from the accounts in Livy and Dionysius that it was situated on a hill with steep or precipitous banks, and immediately above the Tiber. All these conditions are fully answered by the site at *Castel Giubileo*, which is well adapted for that of an ancient city. The hill next the Tiber, on which stand the ruins of the castle, was probably the ancient arx or citadel; while the more extensive *plateau* on the E. of the Via Salaria was occupied by the city itself. The sides of the hill appear to have been in many places cut down or scarped artificially, and these perpendicular faces contain hollows which were probably in their origin sepulchral. Other excavations indicate quarries; and we know from Vitruvius that the tufo of Fidenae was one of those extensively worked in ancient times. (Vitruv. ii. 7. § 1). The hill of *Castel Giubileo* is a conspicuous object in the view of the *Campagna* from the hills above Rome; hence we find Martial noticing "the ancient Fidenae," in describing the same view. (Mart. iv. 64. 15.) A plan, as well as description of the site, is given by Gell (*Top. of Rome*, pp. 250—253; Nibby, *Dintorni*, vol. ii. pp. 51—61; Dennis, *Etruria*, vol. i. pp. 68—72; Bormann, *Alt.-Latinische Chorographie*, p. 239). [E. H. B.]

FIDENTIA (Φιδεντία: *Eth.* Fidentinus: *Borgo S. Donnino*), a town of Gallia Cispadana, situated on the Via Aemilia, between Parma and Placentia, and distant 15 miles from the former city. (Plin. iii. 15. s. 20; Ptol. iii. 1. § 46; *Itin. Ant.* p. 288.) Its name is only mentioned in history during the civil wars between Marius and Sulla, when M. Lucullus, one of the generals of Sulla, was besieged within its walls by the lieutenants of Carbo, but by a sudden sally defeated them with great loss. (Plut. *Sull.* 27; Vell. Pat. ii. 28; Liv. *Epit.* lxxxviii.) It seems to have been at this time a place of consideration: but though noticed by Pliny and Ptolemy as a municipal town, it appears to have subsequently declined, and is called in the Itineraries in more than one passage "Fidentiola vicus," while still later the Jerusalem Itinerary terms it merely a "mansio." (*Itin. Ant.* pp. 99, 127; *Itin. Hier.* p. 616.) The modern *Borgo S. Donnino* derives its name from St. Domninus, who, according to ecclesiastical traditions, suffered martyrdom at a place called Julia, in the territory of Parma. Its distance from the latter city proves that it occupied the actual site of the ancient Fidentia, which has sometimes been erroneously transferred to *Fiorenzuola* (Florentia). [E. H. B.]

FIGLINAE, in Gallia, only appears in the Table, which places it on a road from Vienna (*Vienne*) to Valentia (*Valence*), on the east side of the Rhone. Figlinae was about half-way between Vienna and Tegna (*Tein*). The site is unknown, unless it be *Félines*, as Walckenaer makes it. [G. L.]

FILOMUSIACUM, a place in Gallia, only known from the Table, which places it on the road between Vesontio (*Besançon*) and Abiolica (Ariolica, *Jaucourtarlier*). D'Anville (*Notice, &c.*) has discussed the position of this place, which is uncertain. [G. L.]

FINES, in Gallia. D'Anville observes (*Notice, &c.*, Art. *Fines*), that there would be an infinite number of places with this name, if, in addition to those which appear in the records of the Roman period, we were to enumerate all the instances in which this name occurs, and which the Roman records do not mention. It is on the old roads between the towns that the Itineraries mark the places called Fines. D'Anville enumerates those that are so marked, proceeding in his enumeration from south to north.

1. FINES is marked by the Antonine Itin. and the Table between Cabellio (*Cavaillon*) and Apta Julia (*Apt*). Cabellio belonged to the Cavares and Apta Julia to the Vulgientes, and Fines marked the limits of the two peoples. In this and in other instances, owing to discrepancies in the Itins. and the want of any name corresponding to Fines, it is not possible to fix positions accurately; and it would be mere waste of time to give conjectures.

2. The Jerusalem Itin. places Fines between Davianum [DAVIANUM] and Vapincum (*Gap*), but it does not appear what territories this line separated.

3. The Table places Fines on a road between Tolosa (*Toulouse*) and Narbo (*Narbonne*); and we may consider it, perhaps, as indicating the boundary between the dependencies of these two great cities. The place cannot be found with certainty; but the Table makes it 15 from Toulouse to Badera, and 15 from Badera to Fines.

4. The Table places Fines on a road from *Toulouse* to Dibona, that is, Divona (*Cahors*); and Fines is 28 from *Toulouse*. This place must have marked the limit of the territory of *Toulouse* on the road to *Cahors*. The next station to Fines and 10 M. P. from it is Cosa (*Cos*). Thus we get pretty near to the site of Fines. Walckenaer fixes it at a place called *Le Fau*, that is, the limit.

5. The Antonine Itin. and the Table place Fines on a road from Burdigala (*Bordeaux*) to Aginnum (*Agen*). The determination of the position is very doubtful. We must suppose that this place marked the limit of the territory of Aginnum, for it is the next place to Aginnum.

6. The Table places Fines half way between Vesunna (*Perigueux*) and Augustoritum (*Limoges*), and we may conclude that it marked the limit of the territory of these two cities. The place is not certain. Walckenaer fixes it at *Thiviers*.

7. The Table marks Fines on the road from Augustoritum (*Limoges*) to Augustonemetum (*Clermont en Auvergne*). From Acitodunum (*Ahun*), the second place after *Limoges*, to Fines is 20 Gallic leagues, a distance which, it is supposed, conducts us to the commencement of the territory of the Arverni, to which Augustonemetum belonged.

8. The Antonine Itin. and the Table place Fines

Digitized by Google

between Limonum (*Poitiers*) and Argentomagus (*Argenton en Berri*); and half way between the two towns. D'Anville supposes that Fines may be represented by *Heins*, which is situated at the boundary of the territory of the Pictones or Pictavi, to which Limonum belonged, and at the commencement of the territory of the Bituriges. He adds, what seems probable, that *Heins* may be a corrupted form of Fines.

9. The Anton. Itin. places Fines between Condate Redonum (*Rennes*) and Alauna [ALAUNA], and 28 M. P. from *Rennes*. There can be no doubt that Fines marks the limits of the territory of the Redones on the road to Alauna; and D'Anville supposes that it marks the boundary between the Redones and the Abrincatui. [ABRINCATUI.] D'Anville finds here also a place called *Wines* or *Huines* near the sea, which he supposes to represent Fines; but his argument is more ingenious than satisfactory. Walckenaer fixes Fines at *Antrain*, which is in or very near to a straight line joining *Rennes* and *Avranches*.

10. Fines occurs in the Table between Subdinnum (*Le Mans*), the capital of the Cenomani, and Caesarodunum (*Tours*), as Walckenaer has it (*Géog. des Gaules, &c.* vol. iii. p. 60). D'Anville gives a different account of the matter, which is too obscure to be worth discussing. Walckenaer identifies Fines with *Château du Loir*.

11. The Table marks Fines between Genabum (*Orléans*) and Agedincum (*Sens*). The distance of Fines from *Orléans* is 15 M. P. The place seems to be at the boundary between the dioceses of *Orléans* and *Sens*, for as a general rule the limits of the old French dioceses indicate the territory of the Gallic cities. Walckenaer places Fines in the Forest of *Orléans*. The next place to Fines is Aquae Segeste AQUAE SEGESTE], and the next is *Sens*.

12. The Antonine Itin. places Fines between Augusta Suessionum (*Soissons*) and Durocortorum (*Reims*), 13 Gallic leagues from *Soissons*, and 12 from *Reims*. The inscription of *Tongern* places Fines halfway between the two cities, the interval between which it makes 24 Gallic leagues. There can be no doubt that a place named *Fismes* represents Fines, for the distances agree as well as we can suppose that they should, when we do not know precisely the points in the two towns from which they are measured; and *Fismes* is on the common boundary of the dioceses of *Soissons* and *Reims*.

13. The Antonine Itin. places Fines between Virodunum (*Verdun*) and Ibliodurum. The next town to Ibliodurum is Divodurum (*Metz*). The distance from *Verdun* to Fines is 9 Gallic leagues, and from Fines to Ibliodurum it is 6. Ibliodurum, the name shows, is on a river; and it is supposed to be *Hannonville*, at the passage of the *Iron*. The numbers in the Itin. fix Fines at a place called *Marcheville*, between *Verdun* and the passage of the *Iron*; and the word *Marcheville* contains the Celtic element *March* or *Mark*, which means a boundary or frontier. It is probable that Fines marked the limits of the Virodunenses and the Mediomatrici, whose chief place was Divodurum.

14. The Table places Ad Fines next to a place called Nasium (*Naix*), on the river *Ornes*, above *Bar-le-Duc*. Nasium is one of the towns which Ptolemy assigns to the Leuci, who were south of the Mediomatrici. Walckenaer places this Fines, according to his exposition (*Géog.* vol. iii. p. 87), between Nasium and Tullum (*Toul*), and at a place called *Foug*. D'Anville finds a place called *Feins*, on the same side of the *Ornes*; but its distance from *Naix* does not agree with the 14 Gallic leagues of the Table.

15. Both the Antonine Itin. and the Table place Fines between Vemania (*Immenstadt*) and Vindonissa (*Windisch*). The stations are in this order:—Vemania, Brigantia (*Bregenz*), Arbor Felix (*Arbon*), Fines (*Pfin*), Vitodurum (*Winterthur*), and Vindonissa. The two Itins. agree pretty nearly in the distance from Arbor to Fines. Arbor (*Arbon*) is on the west side of the Lake of *Constans*, and *Pfyn* or *Pfin* is on the river *Thur*, in the *Thurgau*. D'Anville observes that the position of this place (Fines) indicates the boundary which the Romans had fixed between Maxima Sequanorum and Rhaetia; for it appears by the Notitia of the Empire, that a post which was established at Arbore (*Arbon*), between Fines and Brigantia, was under the orders of the general who commanded in Rhaetia. [G. L.]

FINIS BITHYNIAE, a station on the road which led from Claudiopolis to Gordium or Juliopolis, in Galatia. (*Itin. Hierosol.*) In the Peutinger Table it appears under the form of Finis Ciliciae, with which it must not be confounded. [E. B. J.]

FIRMUM (Φίρμον: *Eth.* Firmanus: *Fermo*), an important city of Picenum, situated about 6 miles from the Adriatic, and 25 from Asculum. We have no account of it previous to the Roman conquest of Picenum, but it was doubtless one of the cities of that people, and after their subjugation was selected by the Romans for the establishment of a colony, which was settled there at the beginning of the First Punic War. (Vell. Pat. i. 14.) Hence Firmum is mentioned by Livy among the thirty Latin colonies during the Second Punic War: it was one of the 18 which continued steadfast to Rome under the most trying circumstances. (Liv. xxvii. 10.) During the Social War (B. C. 90) it again appears as a strong fortress, in which Pompeius took refuge after his defeat by the Italian generals Judacilius and Afranius, and in which he was able to defy the arms of the latter, whom he eventually defeated in a second battle under the walls of Firmum. (Appian, *B. C.* i. 47) It is again mentioned during the Civil War of Caesar and Pompey, when it was occupied by the former without resistance. (Cic. *ad Att.* viii. 12. B.) Under Augustus it received a fresh colony, and we find it in consequence bearing in inscriptions the colonial title, though Pliny does not mention it as such, but the name of Firmum appears to be accidentally omitted from his text. (Plin. iii. 13. s. 18, *Lib. Colon.* p. 226; Orell. *Inscr.* 2223, 3118, 3406; Zumpt. *de Colon.* p. 335.) After the fall of the Roman Empire Firmum again appears as a strong fortress, which was taken and retaken by Belisarius and Totila. (Procop. *B. G.* ii. 16, 20, iii. 11, 12.) It seems to have been then one of the principal towns of Picenum, as it continued under the exarchs of Ravenna, and has retained the same consideration ever since. It is still the see of an archbishop, and capital of a province called the *Marca di Fermo*. It is frequently distinguished by the epithet Picenum (Φίρμον Πικηνόν, Strab.; Firmum Picenum, Val. Max. ix. 15. 1; Orell. *Inscr.* 3406), as if for the purpose of avoiding confusion with some other town of the name, but no such is known.

About 5 miles from Firmum, at the mouth of the little river *Leta*, was the port or emporium of the city, called Castellum or Castrum Firmanum, which is confounded by Mela with Firmum itself. It is

Digitized by Google

still called *Porto di Fermo*. (Plin. *l. c.*; Mel. ii. 4. § 6; Strab. v. p. 241.) This town, which was on the line of the coast-road that united the Via Salaria with the Flaminia, is placed by the Itineraries 24 M. P. from the mouth of the Truentus, and 22 from Potentia. (*Itin. Ant.* pp. 101, 313; *Tab. Peut.*) Firmum itself, being situated in the interior on a lofty hill, could never have been on a great line of high road, but the Itineraries give a cross line passing from Septempeda (*S. Severino*) through Urbs Salvia, Firmum, and Asculum to Castrum Truentinum. (*Itin. Ant.* p. 316.) [PICENUM.] [E. H. B.]

FISCELLUS MONS, a lofty mountain forming part of the central and most elevated chain of the Apennines. Pliny tells us that it contained the sources of the river Nar; and this statement would lead us to identify it with the group now known as the *Monti della Sibilla*, one of the loftiest and most rugged portions of the central Apennines [APENNINUS], rising on the confines of the Sabines and Picenum. Silius Italicus, on the contrary, appears to connect it with the Vestini, which would indicate a situation somewhat further south. (Plin. iii. 12. s. 17; Sil. Ital. viii. 517.) The statement of Pliny would deserve the most credit, but that the passage is confused, and in all probability corrupt (see Sillig, *ad loc.*); and it would almost seem as if he confounded the Nar with the Velinus, which in fact rises in the lofty mountain group immediately on the confines of the Vestini. [NAR.] Varro speaks of the Mons Fiscellus and Tetrica (in the same neighbourhood) as abounding in wild goats; meaning probably the Ibex or Bouquetin of naturalists, an animal long since extinct in the Apennines. (Varr. *R. R.* ii. 1. § 5, 3. § 3.) [E. H. B.]

FIXTUINUM. The Table has a road from Agedincum (*Sens*) to Fixtuinum, passing through Riobe and Calagum (*Chailly*). D'Anville supposes it to be the Iatinum of Ptolemy, the chief town of the Meldi. [IATINUM.] [G. L.]

FLANATICUS SINUS (Plin. iii. 19), or FLANONICUS (Φλανωνικὸς κόλπος, Steph. B. *s. v.*), the gulf on the N.W. coast of Liburnia, which derived its name from a people called the FLANATES (Plin. iii. 21). There was a town called FLANONA (Plin. *l. c.*; Ptol. ii. 16. § 2, *Fianona*), between Alvona and Tarsatica. It is now called *Canal del Quarnéro*, well known for its dangerous navigation. (Wilkinson, *Dalmatia and Montenegro*, vol. i. p. 48; Neigebaur, *Die Süd-Slaven*, p. 249.) [E. B. J.]

FLAVIA CAESARIENSIS, mentioned in the *Notitia* as being a division of Britain under the superintendence of a *praeses*; the notice being as follows: —

Sub dispositione viri spectabilis, vicarii Britanniarum.

Consulares
Maximae Caesariensis;
Valentiae.
Praesides
Britanniae Primae;
Britanniae Secundae;
Flaviae Caesariensis.

The other notice (for there are only two) is in Rufus Festus (*Breviarium*, c. 3): "Sunt in Gallia cum Aquitania et Britanniis decem et octo provinciae . . . in Britannia, Maxima Caesariensis, Flavia, Britannia Prima, Britannia Secunda."

In the Map of the Monumenta Britannica, the province of Flavia Caesariensis is bounded by the (*a*) Thames, (*b*) Wales, (*c*) the Mersey, Don, and Humber, (*d*) the German Ocean; so that it comprises the midland and eastern counties and Lincolnshire.

The authority for these lines of demarcation is unsatisfactory. It is only *probable*, first, that the name was taken from the conquests made by *Flavius* Vespasianus; and secondly, that the area thus named was as aforesaid. [R. G. L.]

FLAVI'NIUM or FLAVINA, a small town of Etruria, known only from Virgil, who speaks of the "Flavinia arva," and Silius Italicus, who calls the name of the town Flavina, — though Servius tells us it was Flavinium. We may probably infer from the names with which it is associated by Virgil, that it was somewhere in the neighbourhood of the Faliscans and Soracte; and it has been placed with some plausibility, at *Fiano*, between the foot of Soracte and the Tiber, about 25 miles from Rome. (Virg. *Aen.* vii. 696, and Serv. *ad loc.*; Sil. Ital. viii. 492; Gell, *Top. of Rome*, p. 244.) [E. H. B.]

FLAVIOBRI'GA (Φλαουιόβριγα: prob. *Port-de-galete*), a sea-port town on the N. coast of Hispania Terraconensis, and on the W. side of the estuary of the Nerva (*Nervion*). From the notice of it in Pliny, we may infer that it received its name on its rank as a colony, under Vespasian or Titus, having formerly been called Amanum portus. (Plin. iv. 20. s. 34.) Pliny assigns it to the Varduli; but Ptolemy to the Autrigones. (Florez, *Esp.* S. xiv. p. 10; Mariana, *Hist. Hisp.* iv. 4.) [P. S.]

FLAVIOBRIGANTIUM. [BRIGANTIUM.]

FLAVIONA'VIA. [ASTURES.]

FLAVIO'POLIS (Φλαβιόπολις or Φλαουιόπολις), a town of Cilicia, to the west of Tarsus. From coins found at *Ushak*, it is manifest that this place occupies the site of the ancient Flaviopolis. Respecting its history scarcely anything is known, and it cannot be ascertained whether it owed its name to the emperor Vespasian, or to some member of the family of Constantine. In later times it was the see of a Christian bishop. (Ptol. v. 8. § 6; Arundell, *Asia Minor*, vol. i. p. 116.) [L. S.]

FLAVIO'POLIS. [CRATEIA.]

FLAVIUM SOLVENSE, a town in Noricum, probably situated in the neighbourhood of Virunum. (Plin. *H. N.* iii. 27.) In inscriptions (Orelli, n. 1376 foll.) it is called *Flavia Solva*. According to some the modern *Solfeld* has derived its name from Solvense; but comp. Linhard, *Gesch. von Kärnt.* i. p. 326. [L. S.]

FLENIO, a place which the Table fixes on a road from Noviomagus (*Nymegen*) to Lugdunum (*Leiden*). The next station to Lugdunum is Forum Hadriani (*Voorburg*); and the next station to Forum Hadriani is Flenio. The distance between Forum Hadriani and Flenio is 12 M. P. D'Anville fixes Flenium at *Vlaardingen* on the *Maas*. This place was probably the chief town on the river in the Roman time, as it was certainly for a long time after, and before the rise of *Rotterdam*, which is not mentioned until the 14th century. D'Anville establishes the fact of Flenio being the centre of some road by the existence of a milestone which was dug up at a place called *Monster* near *s'Gravesande*, with the number XII upon it, a distance which fits no place except Vlaardingen. The distances in this part of Gallia are in Roman miles. [G. L.]

FLETIO, is placed in the Table on the road along the Rhine from Lugdunum Batavorum (*Leiden*) to Noviomagus (*Nymegen*). The position of Arenacum (*Alphen*) between Leiden and Fletio is well

Digitized by Google

established; and the distance between Albanianae and Fletio is 19 M. P. Fletio is *Vleuten*, according to D'Anville and others who have followed his opinion. [G. L.]

FLEVO LACUS, and FLEVUM OSTIUM. Drusus, the son of Livia, and the brother of Tiberius, when he held a command on the Rhine, employed his men in making a canal to join the *Rhine* and the *Yssel*. This canal, called the Fossa Drusiana or Fossae Drusianae, commences below the separation of the *Rhine* and *Waal*, and joins the *Yssel* near *Doesburg*. (Tac. *Ann.* ii. 8; Suet. *Claud.* 1.) Germanicus, the son of Drusus, passed with his ships from the *Rhine*, through this canal, into the lakes and the ocean, and as far as the mouth of the Amisia (*Ems*). The water of the *Rhine* being thus partly diverted into the *Yssel* made a new outlet for that river, which outlet Pliny (iv. 15) calls Flevum. He says "that Helium and Flevum are the names of the two mouths into which the Rhine is divided, on the north flowing into lakes, on the west into the river Mosa; it preserves by an outlet intermediate between the two a moderate channel for its own name." The Helium Ostium is the outlet of the *Maas*, which now receives the Vahalis (*Waal*). The outlet of the Flevum Ostium was into a lake, which Mela (iii. 2) thus describes: "The Rhine not far from the sea is distributed in various directions, but to the left the Rhenus is a river even then and until it enters the sea; on the right it is at first narrow and like unto itself, afterwards the banks recede from one another far and wide; and now, no longer a river but a large lake, it is called Flevo where it has filled the plains; and surrounding an island of the same name it becomes again more contracted, and flows out again in the form of a river." Mela here mentions only two mouths, but Ptolemy (iv. 9), besides the outlet which he calls the Mosa [MOSA], enumerates a western outlet of the Rhine, a middle outlet, and an eastern outlet; the last ought to correspond to the Flevum. The lake which Mela describes corresponds to the *Zuider Zee*. Ukert (*Gallien*, p. 151) observes that Mela does not say that the Flevum enters the sea; and he translates the last words, "iterumque fluvius emittitur," "and comes as a river out of the lake." He admits, however, that Mela assumed that the Flevum entered the sea; and nobody can doubt that, when Mela says it flows out again in the form of a river, he means to say that it enters the sea in a form like the other branch, though its course had been made different by passing through a great lake. Geographers have attempted to determine Mela's island, which is a useless attempt, for the lake has undergone great changes since Mela's time; and, besides that, his description may not be exact. It is certain that there were large lakes, or a large lake, near the outlets of the *Rhine*; for, besides the passage of Tacitus already mentioned, he says that Germanicus, on a previous occasion (*Ann.* i. 60), after sending Stertinius through the country of the Bructeri to the Amisia, and appointing Pedo, who had the charge of the Frisian country, to command the cavalry, embarked four legions and took them through the lakes. Infantry, cavalry, and fleet all met at the Amisia. These lakes then were navigable in the Roman period; and it is an erroneous, though common statement, that the *Zuider Zee* did not exist then.

The enlargement that the *Zuider Zee* has received by the encroachment of the sea has probably been chiefly on the west side, where the coast is flat and the water is shallow. Along the east side there is deeper water. In 1219 the sea is said to have broken in and to have carried away the dikes; and another invasion, in 1282, which did great damage, is also recorded. It seems probable that the outlet of the *Zuider Zee* is the part that has been chiefly enlarged, the part that lies north of the channel between *Stavoren* and *Medenblik*, for it is said that old *Stavoren* was swallowed up by the sea.

It is conjectured by Walckenaer that the Nabalia of Tacitus (*Hist.* v. 26) is the *Yssel*, and that the Fossa of Drusus, from *Arnheim* to the *Yssel* at *Doesburg*, formed, with the course of the *Yssel* into the lake or lakes, the north-eastern limit of Gaul. He further conjectures that the name Flevum was given to the stream which flowed out of the lake into the North sea. Accordingly, he supposes that the Castellum Flevum (Tacit. *Ann.* iv. 72) may have been at the outlet of the Flevum, which channel completed the north-eastern limit of Gallia. He further supposes that the island of *Vlieland*, one of the four which lie in front of the *Zuider Zee*, and form a barrier against the ocean, may represent the Flevum Castellum. (Walckenaer, *Géog. des Gaules*, vol. ii. p. 294.)

Thus the *Vlie-Stroom*, between the islands of *Vlieland* and *Schelling*, may represent the old mouth of the Flevum, as it subsisted before the great flood of the 13th century enlarged the lake Flevo, detached the islands of *Schelling* and *Ameland* from the main, and buried in its waters the numerous villages of the district of *Stavoren*. (Walckenaer, vol. ii. p. 201.) [G. L.]

FLEVUM, a fortress mentioned by Tacitus (*Ann.* iv. 72), of which the probable position is given in the preceding article. [L. S.]

FLEXUM (Φλέξον), a town of some importance in Pannonia, in the south of Carnuntum. According to Ptolemy (ii. 15. § 3) it was the head-quarters of the 14th legion, while the Notitia Imperii describes it only as the station of a division of cavalry. (Comp. *Itin. Ant.* pp. 247, 267.) [L. S.]

FLORENTIA. 1. (Φλωρεντία, Ptol.: *Eth.* Florentinus: *Florence*; in Italian, *Firenze*, but in old writers *Fiorenza*), a city of Etruria, situated on the river Arnus, about 3 miles S. of Faesulae. Though celebrated in modern times as the capital of Tuscany, and in the middle ages as an independent republic, it was not a place of much note in antiquity. No trace of its existence is found in Etruscan times; and it is probable that it derived its first origin as a town from the Roman colony. The date of the establishment of this is not quite clear. We learn from the Liber Coloniarum that a colony was settled there by the triumvirs after the death of Caesar (*Lib. Colon.* p. 213); but there seems some reason to believe that one had previously been established there by Sulla. There is indeed no direct authority for this fact, any more than for that of the new town having been peopled by emigrants who descended from the rocky heights of Faesulae to the fertile banks of the Arnus; but both circumstances are in themselves probable enough, and have a kind of traditionary authority which has been generally received by the Florentine historians. (Niebuhr, vol. i. p. 135.) A passage of Florus also (iii. 21. § 27), in which he enumerates Florentia (or, as some MSS. give the name, Fluentia) among the towns sold by auction by order of Sulla, is only intelligible on the supposition that its lands were divided among new

Digitized by Google

colonists. (Zumpt, *de Colon.* p. 253.) But he is certainly in error in reckoning Florentia at this time among the "municipia Italiae splendidissima:" it could not have been a municipal town at all; and from the absence of all notice of it during the campaign of the consul Antonius against Catiline, in the immediate neighbourhood of Faesulae, it is evident that it was not even then a place of any importance. But from the period of the colony of the triumvirs it seems to have rapidly become a considerable and flourishing town, though not retaining the title of a colony. The Florentini are mentioned by Tacitus in the reign of Tiberius among the municipia which sent deputies to Rome to remonstrate against the project of diverting the course of the Clanis from the Tiber into the Arnus; a proceeding which they apprehended, probably not without reason, would have the effect of flooding their town and territory. (Tac. *Ann.* i. 79.) We subsequently find the Florentini noticed by Pliny among the municipal towns of Etruria; and the name of Florentia is found in Ptolemy, as well as in the Itineraries. (Plin. iii. 5. s. 8; Ptol. iii. 1. § 48; *Itin. Ant.* pp. 284, 285; *Tab. Peut.*) These scanty notices are all that we hear of it previous to the fall of the Western empire; but its municipal consideration during this period is further attested by inscriptions (Orell. 686, 3711, 3713; Gori, *Inscr. Etrur.* vol. i.), as well as by the remains of an amphitheatre still visible near the church of *Sta. Croce*. It is probable that its favourable position in the centre of a beautiful and fertile plain on the banks of the Arnus, and on the line of the great high road through the N. of Tuscany, became the source of its prosperity; and it is clear that it rapidly came to surpass its more ancient neighbour of Faesulae. In the Gothic Wars Florentia already figures as a strong fortress, and one of the most important places in Tuscany. (Procop. *B. G.* iii. 5, 6.)

The remains of the amphitheatre already noticed, which are in themselves of little importance, are the only vestiges of Roman buildings remaining in the city of *Florence*.

2. A town of Cispadane Gaul, noticed only in the Itineraries, which place it on the Via Aemilia between Placentia and Parma, at the distance of 15 miles from the former city, and 10 from Fidentia (*Borgo S. Donino*). It still retains its ancient appellation, converted into the diminutive form *Fiorenzuola* for the purpose of distinction from the more celebrated city of the name. (*Itin. Ant.* p. 288; *Tab. Peut.*) [E. H. B.]

FLORENTIA'NA (Φλωρεντίανα, Florentia), a town in Moesia, of which the site is unknown. (Procop. *de Aedif.* iv. 4. p. 285; *Notit. Imp.*, where it is called *Florentia.*) [L. S.]

FLORIA'NA, a town of uncertain site, in Lower Pannonia. It was connected by a road with Aquincum, 30 miles to the east of it, and was the residence of the praefectus classis Istriae. (*Itin. Ant.* p. 265; *Notit. Imp.*) [L. S.]

FLO'RIUS, a small river of Hispania Tarraconensis, in the territory of the Astures, near the N. extremity of the W. coast of Spain: probably the *Rio de Castro.* (Plin. iv. 20. s. 34; Ukert, vol. ii. pt. 1. p. 299.) [P. S.]

FLUMEN BIBALO'RUM. [GALLAECIA.]

FLUMEN OBLIVIO'NIS. [GALLAECIA.]

FLUMEN SALSUM. [SALSUM FLUMEN.]

FOENICULA'RIUS CAMPUS (τὸ Μαραθῶνος πεδίον), a large plain in the neighbourhood of Tarraco, in Spain, so called from the quantity of fennel (μάραθρον, Dor. and Att. μάραθον, Lat. *foeniculum*) which grew there. The plain was traversed by the great Roman road from the Pyrenees to Tarraco (Strab. iii. p. 160; Cic. *ad Att.* xii. 8.) [P. S.]

FONS TUNGRORUM. Pliny says (xxxi. 2) that "Tungri, a city of Gallia, has a famous fountain, sparkling with many bubbles: and it has a smack of iron, which is not perceived until after it is drunk: it purges the body, drives away tertian fevers, and disperses calculi. The same water becomes turbid if fire is applied to it, and finally grows red." Civitas is the whole territory of the Tungri, whence the modern town of *Tongern*, in Belgium, and it is generally supposed that this "famous fountain" is the springs of *Spa*, which are south-east of *Liège*. This would give to the territory of the Tungri a considerable extension; perhaps, however, not more than it had. No place suits the description of Pliny so well as the waters of *Spa*. [G. L.]

FONTES AMARI (*αἱ πικραὶ λίμναι*, Strab. xvi. p. 804; Diod. iii. 39; Plin. vi. 29. § 33), the Bitter Pools, the modern *Scheib*, derived their name from the saline flavour and deposition of their waters. These were strongly impregnated with alkaline salts and with muriate of lime, washed from the rocks which separate the Delta from the Red Sea. As salt entered largely into the culinary art of the Egyptians who preserved in it fish and fowl, as well as the flesh of cattle, and as it was required also in their manufactures of earthenware and glass, and in the composition of dyes and pigments, these pools, as well as the Natron Lakes on the western side of the Nile, were of great value, and were probably, on that account, regarded as the property of the kings. The Bitter Pools began a little to the S. of Arsinoë, in lat. 30° 4′ N., and extended nearly as far as Arsinoë at the head of the Heroöpolite bay. Through them passed the great canal which connected the Nile with the Red Sea. The canal had been planned and begun by Pharaoh Necho II., a monarch of the 26th dynasty; was carried by Darius Hystaspis from Phithoum, or Thaim, as far as the Bitter Pools (Herod. ii. 158); and was subsequently continued by Ptolemaeus Philadelphus to Arsinoë. [W. B. D.]

FORATH (Plin. vi. 28. s. 32), a small town of Southern Babylonia, stated by Pliny to have been on the banks of the Pasitigris, and subject to the rule of Characene. Sillig, in his new edition of Pliny, reads Fora. It is said to have been 12 miles from Charax-Spasinu. Mannert has supposed that it is represented by the present *Basrah*, and that the name has been preserved in *Feratk Maisan*, a name sometimes applied to that town: but this conjecture seems to be very doubtful. [V.]

FORENTUM. [FERENTUM.]

FO'RMIAE (*Φορμίαι*: *Eth.* Formianus: *Mola di Gaëta*), a city of Latium on the coast of the Sinus Caietanus, and situated on the Via Appia, between Fundi and Minturnae, 13 miles from the former and 9 from the latter city. (*Itin. Ant.* p. 121.) Though included in Latium, in the later and more extended sense of the term, it certainly was not originally a Latin city; but whether this and the neighbouring Fundi were Volscian, or, as is perhaps more probable, Ausonian, cities we have no information: indeed no mention occurs of either in history until they entered into municipal relations with Rome. But a legend

* There can be little doubt that the name of the far more celebrated Marathon had the same origin.

Digitized by Google

opted by late writers ascribed the foundation of Formiae to a Greek colony, which was derived from Lacedaemon, and connected with the origin of the neighbouring Amyclae. In accordance with this tradition, its name was said to have been originally Hormiae. It was derived from the excellent anchorage or roadstead for shipping (ὅρμος) which its bay afforded (Strab. v. p. 233; Plin. iii. 5. s. 9; Fest. *s.v. Formiae;* Serv. *ad Aen.* x. 564.) Another legend, still more generally received both by Greek and Roman writers, fixed Formiae as the site of the fable of the Laestrygones in the Odyssey; and the Roman family of the Lamiae, in the days of Augustus, even asserted their direct descent from Lamus, the king of the Laestrygones. (Cic. *ad Att.* ii. 13; Hor. *Carm.* iii. 17; Plin. *l. c.*; Sil. Ital. vii. 410; Solin. 2. § 23.)

The first historical mention of Formiae occurs immediately after the great Latin War, in B.C. 338. It appears that on that occasion the two cities of Fundi and Formiae had taken no part in the war, and had thus kept the passes through their territory of the highest importance in a military point of view) always open to the Roman armies. For this service they were rewarded with the gift of the Roman citizenship, but at first without the right of suffrage, which was not granted them till B.C. 190: they were then included in the Aemilian tribe. (Liv. viii. 14, xxxviii. 36; Vell. Pat. i. 14; Cic. *ad Att.* ii. 14.) From henceforth Formiae appears to have been a flourishing Roman municipal town, to which its situation on the Appian Way doubtless contributed; but it was probably still more indebted to the extreme beauty of its situation, which rendered it a favourite place of resort with the wealthy Roman nobles in the latter days of the Republic, as well as under the Empire. The charm of its beautiful climate and tranquil bay, the

"Temperatae dulce Formiae litus,"

celebrated by Martial in one of his most elegant epigrams; and all modern travellers concur in extolling *Mola di Gaëta* as one of the most lovely spots in all Italy. Among the villas with which Formiae was became adorned, far the most celebrated is that of Cicero, which appears to have become a favourite residence of the great orator, from whence many of his letters to Atticus are dated, and which afforded him a welcome retirement during the most disturbed periods of the civil wars. It was here also that, on his flight from Rome, he landed for the last time, and spent the night in his Formian villa, from whence he was attempting to escape when he was overtaken by the murderers and put to death, B.C. 43. (Cic. *ad Att.* ii. 13, 14, iv. 2, vii. 8, &c., *ad Fam.* xvi. 10, 12, &c.; Plut. *Cic.* 47, 48; Appian, *B. C.* iv. 19, 20; Val. Max. i. 4. § 5; Aurel. *de Vir. Illustr.* 81.) Several ancient writers, misleading Plutarch, represent Caiëta as the scene of this catastrophe; but this evidently arises from a mere confusion of the two: Caiëta, indeed, at this time, appears to have been in a municipal sense a mere dependency of Formiae, of which it served as the port; and it is certainly not necessary to suppose, as Middleton has done, that Cicero had a villa at Caiëta itself as well as at Formiae. (See this point fully discussed by Chaupy, *Maison d'Horace*, t. i. pp. 232—236.) Several other Romans had villas at Formiae in the days of the great orator, as well as in those of Horace; but the wealthy family of Mamurra, who was himself a native of Formiae, had at the latter period engrossed so great a part of the locality, that Horace calls it the "city of the Mamurrae." (Hor. *Sat.* i. 5. 37, and Schol. *ad loc.*; Plin. xxxvi. 6. s. 7.) Martial bears testimony that, at a later period, the charms of Baiae and the other places on the *Bay of Naples* had not caused Formiae to be neglected. (Mart. x. 30.) The hills at the back of it, and which bound the Sinus Caiëtanus, are also celebrated by Horace for the excellence of their wine. (Hor. *Carm.* i. 20. 12, iii. 16. 34.) We learn that Formiae received a colony under the Second Triumvirate, and it bears the title of a colonia in several inscriptions of imperial date. (*Lib. Colon.* p. 234: Orell. *Inscr.* 3782, 3884.) It appears to have continued a tolerably flourishing place till the close of the Roman Empire, and retained its episcopal see till the 9th century, when it was taken and destroyed by the Saracens, in 856. The remaining inhabitants took refuge at *Gaëta*, which succeeded to the episcopal dignity; and the modern town of *Mola*, which has grown up on the ruins of *Formiae*, is, as its appellation of *Mola di Gaëta* implies, a sort of dependency of the neighbouring city. The remains of antiquity still visible at Formiae are extensive; they appear to have all belonged to different Roman villas, of which there remain extensive substructions, with the ruins of terraces, vaulted passages, baths, grottoes, &c., lining the whole coast from *Mola di Gaëta* to the neighbouring village of *Castellone*. These ruins may be traced to have formed part of three ancient villas, of which the one next to *Mola* is commonly known as that of Cicero; but the Abbé Chaupy would assign to the great orator the more important remains in the garden of the modern *Villa Marsana*, the furthest of the three from *Mola*. The point is scarcely susceptible of precise determination; but a monument on the hill above is regarded as that of Cicero, and the discovery near it of an inscription bearing the names of some freedmen of the Tullian family, certainly affords some countenance to the attribution. Several other ancient inscriptions have been discovered at Formiae, and numerous sepulchres and ruins of ancient edifices are scattered along the coast for some miles eastward of *Mola* along the Appian Way. Among these the names of the *Torre di Scauri*, and a spot called *Mamurano*, evidently indicate the site of villas of Aemilius Scaurus, and of the wealthy Mamurra. (Chaupy, *Maison d'Horace*, vol. i. pp. 181—231; Romanelli, vol. iii. pp. 422, 423; Hoare, *Class. Tour*, vol. i. pp. 118—129.) [E. H. B.]

FORMIO (Φορμίων, Ptol. iii. 1. § 27), a small river, now called the *Risano*, falling into the Adriatic Sea between Tergeste (*Trieste*) and Aegida (*Capo d'Istria*), which formed the limit between Venetia and Istria, and consequently at one time the eastern limit of Italy, until Augustus included Istria also under that denomination, in consequence of which the Arsia became the boundary of Italy. (Plin. iii. 18. s. 22.) Ptolemy, however, reckons both the river Formio and the colony of Tergeste as included in Istria; but Pliny's statement is probably correct with regard to the limit as fixed in the time of Augustus, previous to the annexation of Istria to Italy. [ITALIA.] Pliny places the river Formio 6 miles S. of *Trieste*, which agrees very well with the *Risano;* and this river has accordingly been identified with the Formio both by Cluver and D'Anville. Walckenaer fixes on a smaller stream flowing into the sea near *Muja Vecchia;* but this seems too near *Trieste*, as well as too inconsiderable a stream. [E. H. B.]

FOROAUGUSTA'NA. [LIBISOSONA.]

FORTUNA'TAE INSU'LAE (*αἱ τῶν Μακάρων νῆσοι, the Islands of the Blessed*), one of those geographical names whose origin is lost in mythic darkness, but which afterwards came to have a specific application, so closely resembling the old mythical notion, as to make it almost impossible to doubt that that notion was based, in part at least, on some vague knowledge of the regions afterwards discovered. In the present case, the opinion embodied in the name will be more fitly discussed under OCEANUS: it is enough to say here that the earliest Greek poetry places the abode of the happy departed spirits far beyond the entrance of the Mediterranean, at the extremity of the earth, and upon the shores of the river Oceanus, or in islands in its midst; and that Homer's poetical description of the place may be applied almost word for word to those islands in the Atlantic, off the W. coast of Africa, to which the name was given in the historical period (*Od.* iv. 563, foll.): — "There the life of mortals is most easy; there is no snow, nor winter, nor much rain, but Ocean is ever sending up the shrilly breathing breezes of Zephyrus, to refresh men." (Comp. Pind. *Ol.* ii. 128.) Their delicious climate, and their supposed identity of situation, marked out the *Canary Islands*, the *Madeira* group, and the *Azores*, as worthy to represent the islands of the Blest. In the more specific sense, however, the name was applied to the two former groups; while, in its widest application, it may even have included the *C. de Verde* islands; its extension being, in fact, adapted to that of maritime discovery.

The Romans first became acquainted with these islands at the close of the civil wars of Marius and Sulla. Plutarch relates that, when Sertorius was at or near Gades (*Cadiz*), about B.C. 82, he found certain sailors lately returned from the Atlantic islands, which were also called the islands of the Blest; who described them as two in number, separated by a very narrow strait, and distant from Africa 10,000 stadia (1000 geographical miles, an enormous exaggeration, if the *Canaries* are meant). Watered moderately by rare showers, and refreshed by gentle and moist breezes, chiefly from the west, they not only rendered an abundant return to the cultivator, but produced spontaneously food enough for their indolent inhabitants. The climate was temperate at all seasons of the year; and, in short, such were their natural advantages, that even the barbarians identified them with that Elysian Plain and those Abodes of the Happy which had been sung by Homer, and the fame of which had reached to them. Enchanted by these accounts, Sertorius was seized with the desire of fixing his abode in the islands, and living there in peace; but, as the Cilician pirates of his fleet preferred the plunder of better known countries, he was compelled to abandon the design. (Plut. *Sertor.* 8; Flor. iii. 22.) However, the discovery must have been speedily followed up, if at least the writer Sebosus, whom Pliny quotes in his account of the islands (vi. 32. s. 37), be the same who is mentioned by Cicero (*ad Att.* ii. 14). Strabo speaks of them in a very cursory way; and the later geographers differ somewhat as to their number and names. The following table exhibits their statements, as compared with one another, and with the modern names, the order (after the first) being from E. to W.

Sebosus *ap.* Plin. *l. c.*	Juba, *ap.* Plin. *l. c.*	Ptolemaeus, iv. 6. §§ 33, 34.	Modern Names
Junonia	Purpurariae	Ἥρας [Ἡλίου], ἡ καὶ Αὐτολάλα	*Madeira* and *Palma*
	Junonia Minor	Ἀπρόσιτος	*Lanzarote.*
	Junonia	Ἥρας	*Fuerteventura.*
Planaria	Canaria	Καναρία	*Gran Canaria*
Convallis	Nivaria	Πιτνουαρία, ἢ Κεντουρία	*Tenerife.*
Capraria	Capraria	Καπρειρία	*Gomera.* *Palma.*
Pluvialia	Ombrios	Πλουϊτάλα	*Ferro.*

(iv. 21. s. 36, "Deorum sex, quas aliqui Fortunatas appellavere.") Instead of accounting for the coincidence, as above, by supposing him to have counted *Palma*, some modern writers identify this island with his Ἀπρόσιτος νῆσος, and with the Junonia Minor of Juba; making the Αὐτολάλα of Ptolemy, and the Purpurariae of Juba, *Lanzarote*, with the smaller islets of *Alegranza* and *Graciosa*, and so excluding Madeira. Those who desire to pursue the subject further should compare the longitudes and latitudes of Ptolemy with the distances preserved by Pliny from Juba and Sebosus. Of those, respecting the identification of which there is no dispute, Canaria, which is still so called, is said to have obtained its name from the multitude of dogs which ran wild there; the lofty snow-clad peak of *Tenerife* shows at a glance the origin of the name of Nivaria; while *Ferro* marks the place of the chief meridian from which longitudes were reckoned before the introduction of the practice of computing them from national observatories: the old practice dates from the time of Ptolemy, whose first meridian, however, is drawn through the group without specifying the exact island. (Ptol. i. 14 §§ 11, 12, et alib.) [P. S.]

FORULI (Φόρουλοι), a town of the Sabines situated, as we learn from Livy (xxvi. 11), on the road from Amiternum to Interocrea. It is mentioned by Virgil among the ancient cities of the Sabines (*Aen.* vii. 714), as well as by his imitator Silius Italicus (viii. 417); but in later times it appears to have been a mere village or vicus dependent upon Amiternum. (Liv. *l. c.*; Plin. *Forulani*, Inscr. *ap.* Romanelli, vol. iii. p. 361; Orell. *Inscr.* 3794.) Strabo describes it (v. p. 241) as built on a rock, in a position better suited for a band of outlaws than for peaceable inhabitants. Its site may be fixed with certainty at *Civita Tommasa*, about 5 miles from Amiternum, where there are numerous ancient remains, and the inscriptions above cited were discovered. The distance from *Antrodoco* also agrees with that of 13 M. P. assigned by the Tab. Peut. from Interocrea to "Furo," which name is evidently a corruption of Forulis. The precise situation of *Civita Tommasa* scarcely corresponds with the expressions of Strabo, but the general wild character of the neighbourhood is sufficient to justify them. (Romanelli, *l. c.*; Bunsen in *Ann. dell' Inst.* vol. vi. p. 109; Champy, *Mœurs d'Horace*, vol. iii. pp. 124—126.) [E. H. B.]

FORUM ALLIENI, a city of Gallia Cisalpina mentioned only by Tacitus (*Hist.* iii. 6) during the civil wars of Vitellius and Vespasian, A.D. 69. [E. H. B.]

Digitized by Google

in a manner that affords little clue to its position, except that it was situated on some river, the passage of which it was important to defend. Cluver was inclined to place it at *Ferrara*, on the *Po*; others have fixed on *Legnago*, on the *Adige*, between Mantua and *Padua*, which is certainly the more probable site, and agrees better with the movements of the campaign. (Cluver, *Ital.* p. 155; Orell. *ad loc. l. c.*) [E. H. B.]

FORUM APPII (Φόρον Ἀππίου: *Eth.* Forosappiensis), a town on the Appian Way, distant 43 miles from Rome. We learn from Horace that it was the usual resting-place for travellers at the end of the first day's journey from Rome, though he himself and his companion thought fit to divide the distance. (*Sat.* i. 5. 3—6.) It was here, also, that it was customary for travellers on the Appian Way to embark on a canal that extended from thence parallel with the line of road to the immediate neighbourhood of Tarracina. (Hor. *l. c.*; Strab. v. p. 233.) Hence it became, as Horace describes it, a town of boatmen and innkeepers,—

"Differtum nautis cauponibus atque malignis."

It is mentioned also by Cicero (*ad Att.* ii. 10), as well as in the journey of St. Paul to Rome (*Act. Apost.* xxviii. 15), as one of the usual halting-places on the Appian Way: on both occasions in conjunction with Tres Tabernae, which was the next stage in going to Rome, ten miles nearer the city (*Itin. Ant.* p. 107; *Itin. Hier.* p. 611). Its situation, in the midst of the marshes, sufficiently accounts for the badness of the water complained of by Horace.

It is probable from its name that Forum Appii was founded by Appius Claudius Caecus, who first constructed the celebrated road which so long bore his name; and the place appears to have always continued under the patronage of his family. (Suet. *Tib.* 2.) It seems to have grown up into a considerable town, which, under the Roman empire, enjoyed municipal privileges, and is mentioned by Pliny among the municipal towns of Latium. (Plin. iii. 5. s. 9.; Orell. *Inscr.* 780.) There are now no inhabitants on the spot; but the site is clearly marked by considerable ruins on each side of the Appian Way, as well as by the 43rd milestone, which is still preserved, at a spot distant four miles from the place still called *Treponti*, the ancient Tripontium or Tripuntium. (Chaupy, *Maison d'Horace*, vol. iii. pp. 387—452; Pratilli, *Via Appia*, pp. 99, 100.) [VIA APPIA.] [E. H. B.]

FORUM AURELII, a town or village on the coast of Etruria, situated on the Via Aurelia, and placed by the Itinerary 24 miles from Centumcellae and 25 from Cosa. (*Itin. Ant.* p. 291.) The former number is doubtful (those in the Tab. Peut. are altogether confused); but, on the whole, it is probable that Forum Aurelii was placed at or near *Montalto*, on the river *Fiora*, at the place where that stream was crossed by the Via Aurelia. There can be little doubt from its name that the Forum Aurelii was founded at the same time with the construction of the high road of the same name; but of the date of this we have no account. [VIA AURELIA.] We only know that both the road and town existed in the time of Cicero, who mentions the Forum Aurelium (sic) in connection with the proceedings of Catiline. (Cic. *in Cat.* i. 9.) It seems never to have been a place of any importance, and, after this incidental mention, its name is found only in the Itineraries. [E. H. B.]

FORUM BIBALO'RUM. [GALLAECIA.]

FORUM CASSII, a town of Etruria, situated on the Via Cassia, with the formation of which, from its name, it was certainly connected. It is known to us only from the Itineraries, which place it 11 M.P. beyond Sutrium, between that place and Volsinii, and 44 miles from Rome. (*Itin. Ant.* p. 286; *Tab. Peut.*) The distinct traces of the Via Cassia enable us to place it with certainty about a mile NE. of *Vetralla*, where an ancient church still retains the name of *Sta. Maria in Forcassi*, and some portions of Roman buildings are still extant. The inhabitants migrated during the middle ages to the neighbouring village of *Vetralla*. (Dennis, *Etruria*, vol. i. p. 245.) [E. H. B.]

FORUM CIGURRORUM, EGURRORUM, or GIGURRORUM. [ASTURES.]

FORUM CLAUDII. Ptolemy (iii. 1) mentions two towns in the country of the Centrones [CENTRONES], Forum Claudii and Axima (*Aisme*). As there is a place called *Centron* in the valley of *Aisme*, it is probable that *Centron* marks the site of a place called Centrones, for under the Empire it was usual in Gallia for the name of a people to be substituted for that of their chief place. If this be so, we may assume that *Centron* represents Forum Claudii. Guichenon (cited by D'Anville) gives two inscriptions which, he says, were found at *Aisme*; and in one of them, which is in honour of Nerva, the names Forum Claudii and Centrones occur thus — FOROCL. CENTRON. This might be used as an argument, that Forum Claudii is another name for Axima. [G. L.]

FORUM CLAUDII VALLENSIUM OCTODURENSIUM. [OCTODURUS.]

FORUM CLODII, a town of Etruria, situated (as might be inferred from its name) upon the Via Clodia, known to us chiefly from the Itineraries, but mentioned also by Ptolemy (iii. 1. § 50) among the towns of Southern Etruria. The Antonine Itinerary reckons it 32 M.P. from Rome, and the Tab. Peut. places it between Sabate and Blera; but the distances given in the Tabula are confused or corrupt. Hence its position has not been clearly ascertained; it is commonly placed at *Oriuolo*, about five miles N. of *Bracciano* (Sabate); but, according to Mr. Dennis, there are no ancient remains at that place, and the point is still doubtful. (*Itin. Ant.* p. 286; *Tab. Peut.*; Dennis, *Etruria*, vol. i. p. 273.) [E. H. B.]

FORUM CORNELII (Φόρον Κορνηλίου, Strab.; Φόρον Κορνηλίου, Ptol.; Κορνηλίου ἀγορά, Dion Cass.: *Eth.* Forocorneliensis: *Imola*), a considerable town of Gallia Cispadana, situated on the Via Aemilia, and distant 23 miles from Bononia and 10 from Faventia. It stood on the W. bank of the river Vatrenus, now called the *Santerno*. (Strab. v. p. 216; Plin. iii. 15. s. 20; Ptol. iii. 1. § 46; *Itin. Ant.* pp. 100, 127, 287; *Itin. Hier.* p. 616.) It is said to have derived its name from its foundation by the dictator Sulla (Prudent. *Peristeph.* 9, init.), and appears to have been already a place of some importance at the death of Caesar; as, in the civil war which followed, it was occupied by Octavian, who established his winter-quarters there. (Cic. *ad Fam.* xii. 5; Dion Cass. xlvi. 35.) It is afterwards noticed by Martial, who appears to have composed the third book of his epigrams during a residence in this town (iii. 1. 4), and continued under the Roman empire to be a flourishing municipal town. (Gruter, *Inscr.* p. 518. 4, &c.) Its name is again men-

Digitized by Google

tioned during the Gothic Wars, and as late as the seventh century P. Diaconus ranks it among the "locupletes urbes" of the province of Aemilia. He tells us that it had a citadel (castrum), which was called Imolas, from whence the modern town has derived the name of *Imola*. (Procop. *B. G.* ii. 19; P. Diac. ii. 18.) [E. H. B.]

FORUM DECII, a town of the Sabines, mentioned only by Pliny (iii. 12. s. 17), the site of which is wholly unknown. It has been identified by Cluver with the "Forocrei" of the Tabula; but there is no authority for this, and the latter name is probably corrupted from Forocrea or Forocria, analogous to Interocrea. (Cluver, *Ital.* p. 690; Holsten. *Not. ad Clur.* p. 118.) It is more probable that Forum Decii was situated much further S., in the neighbourhood of Forum Novum (*Vescovio*). [E. H. B.]

FORUM DIUGUNTORUM or JUGUNTORUM (*Φόρος Διουγουντῶν ἢ Ἰουγουντῶν*, Ptol. iii. 1. § 31), a town of Transpadane Gaul, known only from Ptolemy, who places it in the territory of the Cenomani, SW. of Bergomum; but its site is otherwise wholly unknown. [E. H. B.]

FORUM DOMITII, is placed by the Itins. on the great Roman road from Nemausus (*Nimes*) to Narbo (*Narbonne*). The distance from Cessero (*St. Tiberi*) on the *Hérault* to Forum Domitii is 18 M. P.: and the Antonine Itin. makes it 17 M. P. from Forum Domitii to Sextantio (*Soustantion*), which is a few miles west of *Montpellier*. Though Forum Domitii lies between two well-known places, its position is not known. We may conclude that it was on the Via Domitia, so called from Cn. Domitius Ahenobarbus, who defeated the Allobroges (Liv. *Epit.* 61). This road is mentioned by Cicero (*pro Font.* 4) as repaired by the legati of M. Fonteius. [G. L.]

FORUM FLAMINII (*Φόρον Φλαμίνιον*, Strab.; *Φόρος Φλαμινίου*, Ptol.: *Eth.* Foroflaminiensis), a town of Umbria, situated on the Flaminian Way, where it first entered the Apennines, 3 miles from Fulginium. It is evident from the name that it was founded by the censor C. Flaminius, at the time that he constructed the celebrated highway on which it was situated, B. C. 220: but its name is not mentioned in history. Strabo speaks of it as deriving its chief importance from the traffic along the road: but we learn from Pliny, and from inscriptions, that it was a municipal town of some consideration. (Strab. v. p. 227; Plin. iii. 14. s. 19; Ptol. iii. 1. § 54; Gruter, *Inscr.* p. 347. 1; Orell. *Inscr.* 98.) It was here that the emperors Gallus and Volusianus were defeated and slain by the pretender Aemilianus in A. D. 256. (Hieron. *Chron. ad ann.*; Cluver, *Ital.* p. 631.) Forum Flaminii is still termed a "civitas" in the Jerusalem Itinerary, and continued the see of a bishop till the eighth century, when it was destroyed by the Lombards, and the remaining inhabitants established themselves at Fulginium. The Itineraries place it 3 miles from Fulginium, and 12 from Nuceria: but the ruins which, according to Holstenius, still mark its site at a place called *S. Giovanni pro Fiamma* (or *in Foriflamma*), are hardly 2 miles from the former city. (*Itin. Ant.* p. 125; *Itin. Hier.* p. 614; *Tab. Peut.*; Holsten. *Not. ad Clur.* p. 92.) [E. H. B.]

FORUM FULVII (*Valenza*), a town of the interior of Liguria, mentioned by Pliny among the "nobilia oppida" of that province, between the Apennines and the Padus. He adds the distinctive appellation of "Valentinum" ("Forum Fulvii, quod Valentinum"), though no other place of the name is known. It is also mentioned in the Tabula in a manner that would afford but little clue to its position; but the distance of 22 M. P. from Asta (corruptly written *Hasia*) accords with the position of the modern *Valenza*, a considerable town on the right bank of the *Po*, about 16 miles below Casale, the name of which is evidently connected with the epithet of Valentinum given to the ancient city. In the Notitia (where it is called Forum Fulvense) we find it mentioned as the station of a body of troops, probably to defend the passage of the Padus at this point. (Plin. iii. 5. s. 7; *Not. Dign.* ii. p. 121; *Tab. Peut.*) [E. H. B.]

FORUM GALLORUM (*Ἀγορὰ Κελτῶν*, Appian), a village on the Via Aemilia, between Mutina and Bononia. It is remarkable only as the scene of the first battle between M. Antonius and the consuls Hirtius and Pansa, who were attempting to raise the siege of Mutina. The forces of Pansa which were first engaged with those of Antonius were worsted in the encounter, though not defeated, and the consul himself mortally wounded: but Hirtius, having unexpectedly fallen upon the rear of Antonius, when he was withdrawing to recross Forum Gallorum, completely routed his forces and compelled him to retreat to his camp before Mutina. This battle (which was fought on the 15th of April, B. C. 43, twelve days before the more decisive action of Mutina) is described in detail by Serv. Sulpicius Galba, in a letter to Cicero: from his account we learn that the place called Forum Gallorum was a mere village (vicus) and that it was situate on the Aemilian Way, which here, as through great part of its course, was a raised causeway, with low marshy ground on each side. (Cic. *ad Fam.* x. 30. Appian, *B. C.* iii. 66—70; Dion Cass. xlvi. 37. Frontin. *Strat.* ii. 5. § 39.) Nor did it ever rise to the dignity of a town: and though its name is already found in the Tabula Peutingeriana, its omission from all the other Itineraries shows that it was still only a village. The distances there given (8 miles from Mutina and 17 from Bononia) show that it must have occupied nearly the site of the modern *Castel Franco*. [E. H. B.]

FORUM GALLO'RUM. [ILERGETES.]

FORUM HADRIANI. One of the roads which the Table marks from Lugdunum Batavorum (*Leyden*) to Noviomagus (*Nymegen*), passes through Flenio [FLENIO]. Between Lugdunum and Flenio is Forum Hadriani, and though the distance from Lugdunum is not given in the Table, there is no doubt that it is represented by a place named *Voorburg*. Excavations have been made on this site, and there were found mosaic pavements, coins, and other memorials of the Roman period. (Ukert, *Gallien*, p. 532.) [G. L.]

FORUM JULII (*Fréjus*), a town of Gallia Narbonensis on the coast between Telo Martius (*Toulon*) and the Varus (*Var*). Strabo (p. 184) calls it *Φόρον Ἰούλιον*, and a naval station of Caesar Augustus, situated between Olbia and Antipolis, and distant from Massilia about 600 stadia. But the name Forum Julii existed before the time of Caesar Augustus, for it is mentioned in a letter of Plancus to Cicero, B. C. 43 (*ad Fam.* x. 15): and he makes it 24 M. P. from Forum Voconii to Forum Julii (x. 17). We may infer that it took its name from C. Julius Caesar, though there is no evidence about what he did to the place, and that Augustus improved it. Pliny (iii. 5) names it "Forum Julii Octavan-

Digitized by Google

rum Colonia quae Pacensis appellatur et Classica." The river Argenteus was within its limits. (Ptol. 10.) The name Octavanorum, mentioned also by Mela (ii. 5), is supposed to show that a detachment from the eighth legion was settled here. The name Classica is probably derived from the fleet being stationed here by Augustus. The place has the various names of Oppidum Forojuliense (Tacit. *Ann.* v. 5); Forum Julium Narbonensis Gallise Colonia (*Ann.* ii. 63); Colonia Forojuliensis (Tacit. *Hist.* 14).

Forum Julii was a naval station in the time of Tiberius, and ships of war were kept there, which Augustus took at the battle of Actium, and used for the defence of this part of the Gallic coast (Tacit. *Ann.* iv. 63); and it is again mentioned as an important naval station in the time of Vitellius (Tacit. *Hist.* ii. 43). It was the birthplace of Cn. Agricola, the conqueror of Britain (Tacit. *Agric.* 4); and an old and distinguished Colonia, as Tacitus calls it. The sauce called "garum" was made here. (Plin. xxi. 7, 8.)

The port of Forum Julii was at the bottom of a small bay, but the entrance has been filled up by the earth brought down by the Argenteus, which river flows a little to the west of Forum Julii. The traces of the two moles which formed the entrance of the port, still remain; but the entrance is now about 3000 feet from the sea. The width of the Roman port is estimated at about 1500 feet, and its depth from the entrance between the moles at 1680 feet. These dimensions show that the port of Forum Julium may be compared with those made by Trajan at the mouth of the Tiber and at Centum Cellae, and with the port of Antium. There is no water now in the port of *Fréjus*, except a small lagune, near a quay of Roman construction, which forms an angle with the mole on the right to one who enters the port. The traces of the walls show that the old town was much larger than the modern.

There is a triumphal arch, which is supposed to have formed one of the four gates of the town. The circuit of the amphitheatre is about 650 feet. The arena, which is buried under rubbish, is probably entire. A road has been formed through the two chief entrances right through it, as in the amphitheatre at *Trèves*. Near the amphitheatre is one of the old gates, which is at the bottom of a concave semicircle, formed of thick walls and defended by a tower at each extremity. The aqueduct brought into the town the waters of the *Siagne* from a distance of more than 20 miles. The channel for the water in some parts was under ground, in others it was supported on arches. At the gate of *Fréjus* it is divided into two branches, one of which entered the town and the other went to the port. Parts of this aqueduct are well preserved.

The Roman Via Aurelia passed by Forum Julii; and there were roads from Forum Julii to Aquae Sextiae, Massilia, and Arelate. (D'Anville, *Notice*, &c.; Walckenaer, *Géog. &c.* vol. ii. p. 9; Ukert, *Gallien*, p. 429; Richard et Hocquet, *Guide du Voyageur*, p. 797.) [G. L.]

FORUM JULII or JULIUM. 1. (*Φόρος Ἰούλιος*, Ptol.: *Eth.* Forojuliensis: *Cividale di Friuli*), a city of Venetia, situated about 25 miles N. of Aquileia, and nearly at the foot of the Julian Alps. Ptolemy reckons it in the country of the Carni, and there is little doubt that this is correct, though it is not possible to separate the territory of that people from the rest of Venetia. [CARNI.] Paulus Diaconus ascribes its foundation to Julius Caesar (P. Diac. *Hist. Lang.* ii. 14); and it is probable that this is correct, though we have no earlier authority for the fact. It appears that it was at first merely a sort of central place of meeting for the neighbouring Carni, and where probably the Roman magistrates held intercourse with the mountaineers. In Pliny's time it seems to have been still but an inconsiderable place, as he enumerates the "Forojulienses cognomine Transpadani" among the unimportant towns of Venetia, which were unworthy of fuller notice. But Ptolemy calls it a Roman colony, and it appears to have risen in importance during the latter ages of the Roman empire. It was not, however, till after the fall of the neighbouring Aquileia, A. D. 452, that it attained the dignity, which it continued to hold under the Gothic and Lombard rulers of Italy, of the capital of Venetia. (Plin. iii. 19. s. 23; Ptol. iii. 1. s. 29; Cassiod. *Varr.* xii. 26; P. Diac. ii. 14, iv. 28, 38.)

Forum Julii became under the Lombards the seat of a separate duchy, and has imparted to the whole province in which it is situated the name, by which it is still known, of the *Friuli*: the modern town being called *Cividad* or *Cividale*, obviously a corruption of "Civitas."

The period of the destruction of Forum Julii is unknown; but recent excavations on the site have brought to light numerous remains of antiquity, including the foundations of temples and other public buildings, scattered over a considerable extent of ground around and in the neighbourhood of the modern *Cividale*. The monuments discovered belong, however, for the most part to a very late period, and confirm the inference which we should draw from the few historical notices we possess, that Forum Julii did not rise to any great importance till near the close of the Western Empire. Very exaggerated ideas of its greatness, and of the value of the discoveries made on the spot, were spread abroad by the Canonico della Torre, who carried on the excavations. (*Annali dell' Inst. Arch.* 1835, pp. 213—220; *Bullett. d. Inst.* 1834, p. 5, 1835, p. 134.)

2. We learn from an inscription that the town of Iria in Liguria bore also the name of "Forum Julii Iriensium" (Orell. *Inscr.* 73), but no other notice of it occurs under this name. [IRIA.]

3. Pliny mentions among the municipal towns of Umbria, in the sixth region of Italy, the "Forojulienses cognomine Concubienses;" but these, as well as the "Forobrentani," who immediately follow them, are wholly unknown. [E. H. B.]

FORUM JULIUM. [ILLITURGIS.]

FORUM LEPIDI. [REGIUM LEPIDUM.]

FORUM LICINII, a town of Transpadane Gaul, mentioned only by Pliny (iii. 17. s. 21), who writes the name Licinitorum, and, strangely enough, tells us that it was a city of the Orobii, a people mentioned by Cato; though it is evident from its name that it was a Roman foundation, or at least settlement. From the same passage it would appear to have been in the neighbourhood of Comum and Bergomum, and has been fixed, plausibly enough, though only conjecturally, at a place called *Incino*, near the small town of *Erba*, on the road from *Como* to *Lecco*, and about 7 miles from the former city, where some inscriptions and other antiquities have been found. (Annoni, *Memoria intorno il Piano d' Erba*, Como, 1831.) [E. H. B.]

FORUM LIGNEUM, is placed by the Antonine Itin. on the road from Caesar Augusta (*Saragosa*),

Digitized by Google

in Spain, to Benecharnum, in Gallia. [BENEHARNUM.] The distance from Summus Pyrenaeus to Forum Ligneum is marked 5, and from Forum Ligneum to Aspaluca (*Pont Lesquit*), 7. Walckenaer takes these distances to be Gallic leagues, though one would suppose that they are Roman miles. However, distances measured in a mountain pass are very loose; and there is no certainty about the exact position of Forum Ligneum. [G. L.]

FORUM LIMICORUM. [LIMIA.]

FORUM LIVII (*Forli*), a town of Gallia Cispadana, situated on the Via Aemilia, between Faventia and Caesena. Its foundation is commonly ascribed by local historians to Livius Salinator, but there is no authority for this. Its name is not found either in Strabo or Ptolemy, but is mentioned by Pliny among the municipal towns of the region; and by the Itineraries, which place it 13 M. P. from Caesena and 10 from Faventia. It therefore occupied the same site as the modern city of *Forli*, on the right bank of the *Montone*, the Vitis of Pliny. (Plin. iii. 15. s. 20; *Itin. Ant.* p. 287; *Itin. Hier.* p. 616; *Tab. Peut.*) In A. D. 412 it was the scene of the nuptials of Placidia, the sister of Honorius, with the Gothic king Athaulfus (Jornand. *Get.* 31), but notwithstanding its selection for this purpose it seems to have never been a town of importance in ancient times. The modern city of *Forli*, on the contrary, is a populous and flourishing place. [E. H. B.]

FORUM NERONIS. [CARPENTORACTE.]

FORUM NOVUM. 1. (*Eth.* Foronovanus: *Vescovio*), a town in the territory of the Sabines, mentioned among the municipal towns of that region by Pliny, and in the Liber Coloniarum. (Plin. iii. 12. s. 17; *Lib. Colon.* p. 255.) From its name we may infer that it was of Roman foundation, and not an ancient Sabine town. Its position is clearly fixed at a place called *Vescovio* (no longer inhabited, but retaining an ancient church), about 3 miles W. of *Aspra* (Casperia) and 12 NW. of *Correse* (Cures). Here there are considerable ruins, which were mistaken by Cluver for those of Cures, but are clearly identified as the remains of Forum Novum by inscriptions found among them with the name of the Foronovani. From these we learn that it was a municipal town in the reign of Gordian: it subsequently became the see of a bishop, and, after the decay of Cures, appears to have claimed to be the metropolitan see of the Sabines, whence it came to be commonly known as *Il Vescovio di Sabina*. The ancient church that marks the site still bears the title of "Ecclesia Cathedralis Sabinorum." (Cluver, *Ital.* p. 675; Holsten. *Not.* p. 107; Chaupy, *Maison d'Horace*, vol. iii. p. 127.)

The name of Forum Novum was probably given to it for the purpose of distinguishing it from Forum Decii, which is also placed by Pliny in the Sabine territory, but is otherwise wholly unknown, and there is no clue to its situation.

2. A town of Gallia Cispadana, known only from an inscription in which we find it mentioned as a municipal town ("Municipium Foronovanorum," Gruter, *Inscr.* p. 492. 5); but as this inscription was found at Parma, there can be no doubt that the Forum Novum there meant is the place still called *Fornovo*, in the valley of the *Taro*, 15 miles SW. of Parma. It is evidently the same place called by P. Diaconus "Foronianum," and mentioned by him among the "castra Aemiliae." (P. Diac. *Hist. Lang.* vi. 49.)

3. A town of Samnium, mentioned only in the Itineraries, which place it 10 miles from Beneventum on the road to Equus Tuticus; this distance fixes it at *Buonalbergo*, a spot where numerous coins and other antiquities have been found. (*Tab. Peut.*; *Itin. Hier.* p. 610; Mommsen, in *Bullett. d. Inst.* 1848, p. 7.) [E. H. B.]

FORUM NARBASORUM. [GALLAECIA.]

FORUM POPILII. 1. (*Forlimpopoli*), a small town on the Via Aemilia about half-way between Forum Livii and Caesena, noticed by Pliny (iii. 15 s. 20) among the municipal towns of Gallia Cispadana, as well as in the Tabula and the Jerusalem Itinerary, in both of which the name is written "Foro *Populi*." The latter calls it a "civitas," but the total omission of its name in the same route as given in the Antonine Itinerary proves that it was (in ancient as well as modern times) but a small town. (*Itin. Hier.* p. 616; *Tab. Peut.*)

2. A town of Campania, mentioned by Pliny as situated in the Falernian district ("Forum Popilii ex Falerno," Plin. iii. 5. s. 9): it is also noticed by Ptolemy, who writes the name Φόρος Πόπλιος (Ptol. iii. 1. § 68), and incidentally by Dionysius (i. 21), who tells us that near it were the remains of a very ancient city, which had been long deserted, called Larissa and of Pelasgic origin. The name by which he refers are unknown, but it appears from the expressions that they, as well as Forum Popilii (ἀγορὰ Ποπιλία), must have been situated in the hilly district in the N. of Campania: Ptolemy appears to place the latter town between Capua and Teanum, but its exact site has not been determined. We learn from the Liber Coloniarum (p. 233, where the name is written Forum Populi), that it received a body of colonists under Augustus, to which a fresh settlement seems to have been added by Vespasian.

3. A town of Lucania, mentioned only in the Tabula, where the name occurs in a manner that would afford scarcely any clue to its position, the neighbouring lines of route being altogether confused. But a remarkable inscription found at a place called *Polla* in the *Valle di Diano* leaves scarcely any doubt that that place is the site of the Forum Popilii. This inscription records the reconstruction by a Roman magistrate (whose name is unfortunately lost) of a high road from Capua to Rhegium, giving the intermediate distances of the principal places: and a comparison of these with those given in the Tabula leaves little doubt that the modern village of *Polla* is the Forum Popilii, and that the magistrate's name which has disappeared at the beginning of the inscription, erroneously supplied by some writers as that of M. Aquilius, was in reality that of P. Popilius Laenas, who was praetor in B. C. 134. (Mannert, *Geog. von Italien*, vol. i. p. 146; Mommsen, *Inscr. R. N.* No. 6276; Bunsen, *Monum. Epigr.* pp. 11, 12.) From this document we learn that Forum Popilii was distant 51 M. P. from Nuceria and 74 from Muranum. [E. H. B.]

FORUM SEGUSIANORUM, a town of the Segusiani (Ptol. ii. 8), who were on the west bank of the Rhone, in the latitude of Lugdunum. The term Forum seems to indicate the chief town of the Segusiani, or a place where a Conventus was held; and the place has the usual mark of a capital or chief town in the Table. A place called *Feurs*, or more properly *Feur*, west of *Lyon*, represents the Forum Segusianorum. An inscription was found at *Feurs*, as it seems to this effect:—"Fabri Tign. qui Foro Segus. consistunt," and La Mure, in his *Histoire du Forez* (Lyon, 1671), mentions four milestones found at *Feurs*, with the inscriptions I, II, III, IIII, each preceded by

Digitized by Google

L, which means lenga or league. Thus, it appears that a road was measured from this Forum. It is also stated that the inscription C. IVL. F. SEG. LIBERA. occurs on these stones, or on some of them. From this the place appears to have been made a Colonia, with the title of Liberi, which Pliny (iv. 18) gives to the Segusiani. "The historian of the *Forez* (Forest) mentions a Roman copper weight, on which were marked in characters of silver DEAE SEG. F., a circumstance which shows that the Forum of the Segusiani was deified, and accordingly had an honour which we know to have been conferred on several other towns in Gaul." (D'Anville.)

The Table mentions Forum Segustavarum, on a road from Segodun (*Rhodez*) to Lugdunum (*Lyon*), and it is the next place to Lugdunum. Part of the route is this:—Icidmago (*Issengeaux*), Aquis Segete, Foro Segustavarum, Lugdunum. Another route in the Table, between Augustonemetum (*Clermont*) and Lugdunum, stands thus in the last part:—Rodamna (*Roanne*), Mediolanum (*Meylieu*), Foro Segustavarum, Lugdunum. D'Anville (*Notice*, art. *Mediolanum*) supposes that Mediolanum is wrongly placed in the Table, and he inserts it between Forum Segusianorum and Lugdunum. Walckenaer contends that the Table and its distances are right, that Forum Segustavarum is a different place from Forum Segusianorum, and he places it in the neighbourhood of *Farnay*. The measures, he says, are very exact, as we may convince ourselves by seeing how he has applied them to our modern maps. But we give no confidence to these assertions. Segustavarum and Segusianorum are evidently the same word, and the difference in a few letters is easily explained by their close resemblance, and the liability of one being put for the other.

The district of *Forez* or *Foreste* is supposed to derive its name from Pagus Forensis, the canton of the Forum. Parts of the aqueduct which brought water to Forum Segusianorum still remain. In one part the aqueduct is about 10 feet high to the spring of the arch, and about 3 feet wide. The outer wall is formed of small red stones, and the inner part of fragments of the same stone embedded in cement. A very remarkable mosaic was discovered at *Feurs* a few years ago, under the entrance door of a house. There are also in the courts of the same house some Corinthian columns, which support a staircase. The church of *Feurs* appears to have been built with the materials of Roman edifices. There are also remains of ancient baths near a part of the town called the *Palais*. Near this Palais were found, under the ground, the four milestones mentioned above. They are now placed in a part of the town, according to a recent authority, where they are much exposed to damage. (D'Anville, *Notice*, &c.; Walckenaer, *Géog. &c.* vol. i. p. 332; Ukert, *Gallien*; Richard et Hocquart, *Guide*, &c.) [G. L.]

FORUM SEMPRONII (Φόρον Σεμπρωνίου, Strab.; Φόρον Σεμπρωνίου, Ptol.: *Eth.* Forosemproniensis: *Fossombrone*), a town of Umbria, situated on the Flaminian Way, in the valley of the Metaurus, 16 miles from Fanum Fortunae (*Fano*), on the Adriatic. (Strab. v. p. 227; *Itin. Ant.* p. 125.) We have no account of its foundation, or the origin of its name: but it was the only town in the valley of the Metaurus, between its mouth and the central range of the Apennines; and from this circumstance, and its position on so frequented a highroad, it seems to have risen into a place of some importance, and was a flourishing municipal town under the Roman empire. (Strab. *l. c.*; Plin. iii. 14. s. 19; Ptol. iii. 1. § 53; Orell. *Inscr.* 3774, 4039, 4063.) The site of the ancient city is marked by the vestiges of a theatre, and other ruins of Roman date, which are visible about 2 miles from the modern city of *Fossombrone:* this last retains the ancient episcopal see, and its name is evidently a mere corruption of Forum Sempronii. (Calindri, *Statistica del Pontif. Stato*, p. 121.) The latter was 8 miles distant from the celebrated pass of Intercisa, or the *Furlo*. [INTERCISA.] The great battle in which Hasdrubal was defeated by the Roman consuls Livius and Nero, in B. C. 207, was probably fought in the neighbourhood of Forum Sempronii, but the exact site is uncertain. [METAURUS.] [E. H. B.]

FORUM TIBERII, is placed by Ptolemy (ii. 9) among the Helvetii. It is unknown where it is. D'Anville guesses *Kaiserstuhl* on the Rhine, chiefly because of the meaning of the German name; which is very unsatisfactory. Haller guesses *Zurzach* on the Rhine, where there are Roman walls. Another guesses *Steckborn* on the Lake of *Constanz*. (Ukert, *Gallien.*) [G. L.]

FORUM TRAJANI, a town in the interior of Sardinia, known only from the Itineraries, which place it on the road from Tibula, through the interior of the island, to Othoca. (*Itin. Ant.* p. 82.) Its site is fixed at a place called *Fordongianus*, on the left bank of the river *Tirsi* (Thyrsus), about 16 miles from *Oristano*, where there are considerable Roman remains, including those of a bridge, and of Thermae on a scale of great magnificence. These doubtless owe their origin to the emperor Trajan. (Valéry, *Voy. en Sardaigne*, vol. ii. c. 35). [E.H.B.]

FORUM TRUENTINORUM or DRUENTINORUM, a town of Gallia Cispadana, mentioned by Pliny among the municipal towns of that region (iii. 15. s. 20). His authority is confirmed by inscriptions, in which we find "Municipium Forodruent.," for Forodruentinorum. As the name is not mentioned in the Itineraries it seems clear that it was not situated on the Via Aemilia, and it has been supposed to occupy the site of *Bertinoro*, a small episcopal town about 3 miles S. of *Forlimpopoli;* this however is a mere conjecture. (Gruter, *Inscr.* pp. 492. 5, 1094. 2; Orell. *Inscr.* 80; Cluver, *Ital.* p. 295.) [E. H. B.]

FORUM VIBII (Vibi Forum, Plin. iii. 17. s. 21: *Eth.* Forovibiensis, Id. 16. s. 20), a small town of Liguria, near the sources of the Padus, and in the territory of the Vagienni. Pliny tells us that the Padus had its source in the Mons Vesulus (*Monte Viso*), and, after flowing a short distance, plunged under the ground, and again emerged "in Forovibiensium agro." (Plin. iii. 16. s. 20; Solin. 2. § 25.) As there is no truth in this account of the subterraneous course of the Padus, it affords us no assistance in determining the real position of Forum Vibii, which must have been situated somewhere in the upper valley of that river, in the neighbourhood of *Saluzzo*, but on the N. bank of the *Po*, as Pliny (iii. 17. s. 21) reckons it in the Regio Transpadana. [E. H. B.]

FORUM VOCONII, a place in Gallia Narbonensis, distant from Forum Julii [FORUM JULII; ARGENTEUS] 24 M. P., as it appears from the letter of Plancus to Cicero. The Antonine Itin. also makes the distance the same. D'Anville fixes Forum Voconii at a place called *Gonfaron*, which he supposes to be a corruption of such a word as *Vocon-foron*, which he invents for the occasion. Papon, who is followed by Walckenaer, fixes it at *Le Canet;* and

Digitized by Google

others fix it at *Vulauban*, east of *Le Canet*. Pliny (iii. 5) calls Forum Voconii a Latin town, that is, it had the Latinitas. [G. L.]

FORUM VULCANI. [PUTEOLI.]

FOSI, a small German tribe, of which nothing is known beyond what Tacitus (*Germ.* 36) relates of them, viz., that they were subject to the Cherusci, and became involved with them in their ruin. The banks of the stream *Ferse*, in *Brunswick*, are generally looked upon as the country once inhabited by them, and the little town of *Fosenbrock* may have derived its name from them. In the time of Ptolemy their country was already occupied by the Langobardi. [L. S.]

FOSSA CORBULO'NIS. When Corbulo commanded in the parts about the mouths of the Rhine, he employed his men in making a cut, 23 M. P. long, between the Mosa and the Rhenus, "qua incerta Oceani vetarentur." (Tac. *Ann.* xi. 20.) Some critics have proposed to change "vetarentur" into "vitarentur," but probably the text is right. Dion Cassius (lx. 30), who speaks of this canal, says that it was about 170 stadia long. If we take the usual estimate of the Roman mile, which is 8 stadia, the distance of Dion is somewhat too small, if the text of Tacitus is right. The reason for making the canal which the Greek historian gives, was, "that the rivers might not flood the country, by having their waters driven back by the high tides;" an explanation which seems to agree with "vetarentur" in Tacitus, and to be a probable explanation of Corbulo's design. There seems little doubt about the position of this canal, though there has been great difference of opinion. It is the channel which runs from *Leiden*, past *Delft*, to *Maasland-sluys* near *Vlaardingen* (Flevum). The distance agrees very well, and the position agrees with the purpose for which the canal was made. The old Rhine, or the Rhine proper, runs past *Leiden*, and was a more considerable stream in the Roman period than it is now. [G. L.]

FOSSA DRUSIA'NA. [FLEVO LACUS.]

FOSSA MARIA'NA or FOSSAE MARIA'NAE. Plutarch (*Marius*, c. 15) gives a sufficiently clear account of this canal. When C. Marius, B. C. 102, crossed the Alps to oppose the Teutones and their barbaric allies, he fixed his camp near the Rhone. The entrance to the river was choked with mud, sand, and clay, and "was thus made difficult and laborious, and shallow for the vessels that brought supplies. As the army had nothing to do, Marius brought the soldiers here and commenced a great cut, into which he diverted a large part of the river; and by making the new channel terminate at a convenient point on the coast, he gave it a deep outlet, which had water enough for large vessels, and was smooth and safe against wind and wave. This cut still bears the name of Marius." Plutarch supposed that the canal was on the east side of the outlets of the Rhone. Strabo (p. 183)—after quoting Polybius, who says that the Rhone had two outlets, and Artemidorus, who says that it had three—adds: "but Marius, afterwards seeing that the channel was becoming obstructed by the alluvium and difficult of access, cut a new channel, in which having received the greater part of the river, he gave it to the Massaliots, as a reward for their services in the war against the Ambrones and Toygeni; from which channel the Massaliots acquired great wealth, by exacting tolls from those who sailed up and down. However, the difficulties of the navigation continue, owing to the violence of the stream and the alluvium, and the lowness of the coast, which cannot be seen even when a vessel is near, in foggy weather: wherefore the Massaliots set up towers as beacons, making the country their own in every way: and especially they built there also a temple of the Ephesian Artemis, having taken possession of the part which is made an island by the mouths of the river. After there lies beyond the mouth of the Rhodanus, a new lake, which they call Stomalimne: some have mentioned it one of the mouths of the Rhodanus, as especially those who say that the river has seven mouths (or five, as the text perhaps should be—being right neither in one thing nor the other, for there is a hill between, which separates the lake from the river." Here Strabo finishes his description of the coast as far as Massalia, and he then describes the coast as far as the Var. His description of this coast of Gallia shows that the canal of Marius was on the east side of the outlets of the Rhone. Mela's description must be interpreted the same way (ii. 5). Pliny (iii. 4) calls one of the mouths of the Rhodanus the Massaliotic; and this is the most eastern of the mouths. (Polyb. iii. 41.) Beyond, that is east of, the Massaliotic branch are "the canals from the Rhodanus, the work of C. Marius, which bears his name: a lake (stagnum) Mastramela; a town Maritima, of the Avatici, and above it the stony plains (campi lapidei)." The stony plains are the *Crau*, an extensive flat tract, which is covered with stones. Pliny's text has "Astromela," which Harduin has changed to Mastromela, to make it agree with the name in Stephanus Byzantinus and Avienus; for which Walckenaer finds fault with him, without reason,—for it is plain that, as "stagnum" ends with "m," the next word if it began with "m," might easily lose it in transcription

The Itineraries also place the Fossa Mariana on the east side of the Rhone. But Ptolemy (iii. 1) in the common texts, has it on the west side. Proceeding from west to east he has: Setis River; Fossae Marianae; the west mouth of the Rhone; and the east mouth. He correctly places Marseilles east of the east mouth of the Rhone. It is hard to explain how Ptolemy made a mistake in a matter which was known to every body. Walckenaer (*Géog. &c.* iii. p. 133) supposes that we ought to read Marinae for Marianae (Μαρίνα Φόσσα) in Ptolemy's text; and he adds, that the edition of 1475 has "Fossae Marinae." There is also the reading "Fossae Marinae," in the Latin edition of Pirckheimer (1524.) The two words might easily be confounded. If we do not accept this conjecture we must either allow that Ptolemy has made a very great mistake, or that the Fossae Marianae have been transposed in his text, without transposing the numbers. For it is hardly possible that he should place in his geography Fossae Marinae, a name otherwise unknown, and omit the Fossae Marianae, the great work that was familiar to all geographers.

The best and most recent authority for the antiquities of this part of France (*Statistique du département des Bouches du Rhône*) states that the canal of Marius ran in a straight line from east to west from the gulf of Stomalimne, now the *Etang de l'Est*, west to the Rhone, which it joined about a mile above its mouth. The length was 16 miles. There are many proofs of the existence of the canal in the place here assigned to it. The village of Foz, which retains the name of this canal, stands just

Digitized by Google

hove the place where the canal entered the gulf. There is still visible on one of the sides a long cutting made in the rock at the base of the hill, and it is probable that the sluice was here. West of Fos is a large marsh, called *Le Marais de Fos*, which the canal crossed. This marsh ends in an *étang* of the same name, which joins the *étang de Valcarès*, where was the outlet of the Massaliot branch of the Rhone in the time of Marius. The marsh of Fos, along the whole line, where the canal is supposed to have run, still presents a hollow, which is filled with water in the rainy season.

The Maritime Itinerary makes it xvi M. P. from the Fossae (*Fos*) to "Ad Gradum Massiliensium," which was on the Rhone; and the Itinerary, which gives the land routes, places Fossae between Massilia and Arelate (*Arles*). The order of places is: Massilia, Calcaria [CALCARIA], Fossae Marianae (*Fos*), Arelate: the direct distance from Fossae Marianae to Arelate is 13 M. P., which is too small. In another place the Itineraries make it 22, which is too much. However, there is no doubt that Fossae is *Fos*, or *Fos-les-Martigues*. The direct road from Fossae to Arelate ran through *Ad Crau*, the Campi Lapidei. The "Ad Gradum" seems to have been at or near the place where the canal of Marius joined the Rhone. The distance from "Ad Gradum" along the river up to Arelate is marked 30 M. P. in the Maritime Itinerary.

The "Statistique, &c." supposes that the canal of Marius was continued due north about twelve miles, choosing from Ad Gradum to the *étang* of the three Maries, which comprised the marshes of *Arles*, *Mont-Majour*, and of *Baux*: this étang received the Vigueirat, at least, of the water of the Louérion, a canal which runs from the *Durance* (Druentia) near Orgon. It is further stated that the Louérion fed the Fossae Marianae; and that Marius also made another canal, which has since been replaced by that of *Craponne*. Some of these assertions are very doubtful; but the canal to the Rhone from the Stoechiannae (*étang de l'Estomac*, or *Estrama*, as it is also still written) seems to be the work of Marius. In a place called *Pont-du-Roi*, in front of the bar of Fos, there are the remains of the foundations of masonry; and this agrees with the Table, which marks the Fossae Marianae, by a semicircular building open to the sea, as a haven and station. The hill mentioned by Strabo, as separating the Stoechiannae from the Rhone, is supposed to be a hill between *Fos* and *Istres*. Whether Marius made more than one cut, and whether Fossae or Fossa is the true name, we cannot tell. It is likely enough that there was more than a single cut; or, at least, some small cuts, besides the large cut. This great work of the Roman soldier was a monument of his talent and his perseverance, as glorious as the victories by which he saved Italy from a barbaric inundation. (D'Anville, *Notice*; Mela, ed. J. Voss, who has a good note on the Fossae; Ukert, *Gallien*, p. 431, &c., which contains the references to the various authorities.) [G. L.]

FRANCI, the name of a confederation of German tribes to which belonged the Sigambri (the principal people), Chamavi, Ampsivarii, Bructeri, Attuarii, Marsi, Tubantes, Attuarii, Dulgibini, and others. This confederation, which had stepped into the place of that of the Cherusci on the Lower Rhine, is mentioned for the first time by Vopiscus (*Prob.* 7), about A. D. 240. The name Franci gradually absorbed the names of the separate tribes forming the confederation, which, however, is sometimes designated by the name of the leading people, the Sigambri (e. g. Claudian, *de IV. Cos. Hon.* 446). These Franci, or Franks, as they are commonly called, conquered the northern parts of Gaul; and, having amalgamated with the Romanised Celts of that country, they adopted the civilisation of the conquered people, and soon acquired such power that, under their great king Clovis, A. D. 496, they returned and subdued their own kinsmen in the north and south of Germany, and thus established the great Frankish empire. But their history belongs to the middle ages. [L. S.]

FRATUERTIUM or FRATUENTUM, a town of Calabria, mentioned by Pliny (iii. 11. s. 16), in conjunction with Soletum and Lupiae. Its municipal existence is confirmed by an inscription on which the Fratuentini are associated with the citizens of Neritum, a town in the same neighbourhood (Lupai, *Itor. Venus*, p. 108; Orell. *Inscr.* 3108); but its site is unknown. It seems, however, probable that the ruins of an ancient city, described by Galateo (*de Situ Tapygiae*, p. 96) as existing at *Muro*, may be those of Fratuertium.* The name is written in the inscription just cited Fratuentum, which is probably the correct form. [E. H. B.]

FRAXINUS. [LUSITANIA.]

FREGELLAE (Φρεγέλλαι, Strab.; Φρέγελλα, Steph. B.: *Eth.* Φρεγελλανός, Fregellanus), a city of Latium, in the more extended sense of the term, but properly a city of the Volscians, situated on the left bank of the Liris, nearly opposite to its confluence with the Trerus, and a short distance on the left of the Via Latina. (Strab. v. p. 237.) According to Livy it was originally occupied by the Sidicini, and afterwards by the Volscians, from whom it was again wrested by the Samnites. The latter are said to have destroyed the city; but in B. C. 328, the Romans, having made themselves masters of this part of the valley of the Liris, restored Fregellae, and established there a colony of Roman citizens, an act which was so strongly resented by the Samnites, that it became the immediate occasion of the outbreak of the Second Samnite War. (Liv. viii. 22, 23; Appian, *Samn.* iv. 1.) During the course of that war Fregellae was more than once surprised by the Samnites, but on every occasion recovered by the Romans. (Liv. ix. 12, 28.) During the advance of Pyrrhus upon Rome, in B. C. 279, he is said to have ravaged Fregellae ("Fregellas populatus," Flor. i. 18. § 24); but whether he actually took the town, or only laid waste its territory, is uncertain. At a later period (B. C. 211), we know that it was able to defy the arms of Hannibal, and its citizens had the courage to break down the bridge over the Liris, for the purpose of retarding his march upon Rome, while they sent in all haste to the city, to give warning of his approach. (Liv. xxvi. 9.) As a punishment for this offence their territory was ravaged by him with peculiar severity, but, notwithstanding this, the Fregellans were two years afterwards (B. C. 209) found among the eighteen colonies faithful to Rome (Liv. xxvii. 10), and a body of their cavalry is mentioned with peculiar distinction in the action in which Marcellus perished (Id. xxvii. 26, 27; Plut. *Marc.* 29). It is singular that Fregellae, which was at this time distinguished

* These are assigned by Romanelli to Sarmaticum, a name found in the old editions of Pliny, but for which there is no authority.

Digitized by Google

for its fidelity to Rome, should have subsequently taken the lead in an insurrection against that city, when at the height of its power. The circumstances of this revolt are very imperfectly known to us, but it is evident that it was only a symptom of the discontent then beginning to prevail among many of the Italian cities. The outbreak was, however, premature: Fregellae alone had to bear the brunt of the unequal contest, and was quickly reduced by the praetor L. Opimius, B. C. 125. The city was utterly destroyed, as a punishment for its rebellion, and appears never to have again arisen to prosperity: the establishment of a new colony at Fabrateria, in its immediate neighbourhood, in the following year, was evidently designed to prevent Fregellae from recovering its former position. (Liv. *Epit.* lx.; Vell. Pat. ii. 6; Val. Max. ii. 8. § 4; Jul. Obseq. 90; Cic. *de Fin.* v. 22; Auct. Rhet. *ad Herenn.* iv. 9, 15.) In the time of Strabo it was a mere village, which was, however, still resorted to by the people of the surrounding towns, for sacrificial and other purposes. (Strab. v. p. 237.) Hence, its name is not found in Pliny among the towns of Latium: the Fregellanum mentioned in the Itineraries (*Itin. Ant.* pp. 303, 305) was apparently a station distinct from the town of the name.

Both Strabo and the rhetorical writer above cited affirm that Fregellae was previous to its destruction one of the most flourishing and important cities of Italy: but its ruin appears to have been complete, and hence considerable difficulty has arisen in determining its exact site. Ruins of a city of considerable extent having been found on the right bank of the Liris, just opposite a spot called *Isoletta*, and below the village of *S. Giovanni in Carico*, these have been regarded by local antiquarians at those of Fregellae, but the inscriptions found there, as well as the character of the remains themselves, which are wholly of Roman date, and for the most part not earlier than the time of the empire, seem to prove these to be the ruins of Fabrateria Nova, the Roman colony of that name. [FABRATERIA.] The true site of Fregellae appears to be that indicated by the Abbé Chaupy, on the left bank of the Liris, nearly opposite the modern town of *Ceprano*, where there is a plain of considerable extent, filled throughout with foundations and substructions of ancient buildings, including among others the foundations of the city walls, built in a very massive style. No part of these ruins however rises above ground; and as they have served for ages as a quarry for the supply of building materials to *Ceprano* and the other neighbouring villages, even the substructions have much disappeared. The quarter still retains the name of *Opi* or *Opio*, probably a corruption of "Oppidum." (Chaupy, *Maison d'Horace*, vol. iii. p. 475.) This position of Fregellae would account for its importance in a military point of view, as commanding the passage of the Liris. The modern town of *Ceprano*, which has grown up on the right bank of the river, is supposed by the Abbé Chaupy to occupy the site of the Fregellanum of the Itineraries; but it is not easy to understand how the Via Latina should have proceeded so far as that point, and then turned south to Fabrateria Nova before it crossed the Liris. The remains of two ancient bridges of Roman imperial times at the latter place clearly prove that it was there the Via Latina of later days crossed the river, though it is evident from Livy's narrative (xxvi. 9) that in the time of Hannibal the bridges were close to Fregellae itself. The whole neighbourhood certainly requires, and would reward, a more careful inspection of the localities, especially of the remains of the ancient roads. (Chaupy, *l. c.* p. 476; Romanelli, vol. iii. pp. 377—381). [E. H. B.]

FREGE'NAE (Φρεγῆναι, Strab.), a maritime town of Etruria, situated between Alsium and the mouth of the Tiber. (Strab. v. p. 226; Plin. iii. 5. s. 8; *Itin. Ant.* p. 300.) It is mentioned by Livy among the "coloniae maritimae" (xxxvi. 3); and there is every reason to suppose that it was established at the same time with Alsium, in B. C. 245, and that we should read *Fregenae* for *Fregellae* in Velleius Paterculus (i. 14), where he speaks of the foundation of these two colonies. This is confirmed by the Epitome of the 19th book of Livy, where, though Alsium is not mentioned, the foundation of Fregenae is coupled with that of Brundusium, which Velleius refers to the following year. (Vell. Pat. *l. c.*; Liv. *Epit.* xix., where the reading Fregenae is supported by the best MSS., though the old editions have Fregellae.) No subsequent notice of it occurs in history: its marshy and unhealthy situation (alluded to by Silius Italicus, viii. 475) probably prevented its rising to prosperity; and, after the construction of the Portus Augusti on the right bank of the Tiber, it seems to have gradually sunk into insignificance. Hence, though its name is found in Strabo, Pliny, and the Itineraries, it is not noticed by Rutilius in his description of the coast of Etruria, and no ruins now mark the site. But the distances given in the Itinerary of 9 M.P. from Alsium, and the same from Portus Augusti at the mouth of the Tiber, enable us to fix its position with certainty at a spot now called the *Torre di Maccarese*, as midway between *Palo* and *Porto*, and at the mouth of the river *Arone*. (Cluver, *Ital.* p. 499; Nibby, *Dintorni di Roma*, vol. ii. p. 280.) [E. H. B.]

FRENTA'NI (Φρεντανοί, Strab., Ptol.; Φρεντανοί, Pol., Dionys.), a people of Central Italy, occupying the tract on the E. coast of the peninsula from the Apennines to the Adriatic, and from the frontiers of Apulia to those of the Marrucini. They were bounded on the W. by the Samnites, with whom they were closely connected, and from whom they were originally descended: hence Scylax assigns the whole of this line of coast, from the frontiers of Apulia to those of Picenum, to the Samnites. (Scyl. § 15. p. 5.) Their exact limits are less clearly defined, and there is considerable discrepancy in the statements of ancient geographers: Larinum, with its territory (extending from the Tifernus to the Frento), being by some writers termed a city of the Frentani (Ptol. iii. 1. § 65), while the more general opinion included it in Apulia, and thus made the river Tifernus (*Biferno*) the limit of the two countries (Plin. iii. 12. s. 17; Mel. ii. 4. § 6). The northern boundary of the Frentani is equally uncertain; both Strabo (v. p. 242) and Ptolemy (l. c. § 19) concur in fixing it at the river Sagrus or *Sangro*, while Pliny extends their limits as far as the Aternus, and, according to Mela, they possessed the mouths both of that river and the Matrinus. The latter statement is certainly inaccurate: for Strabo distinctly tells us, that the Marrucini held the right bank of the Aternus down to its mouth, while the Vestini possessed the left bank (v. p. 241); hence, the former people must have intervened between the Frentani and the mouth of the Aternus. Pliny's account is, however, more near the truth than that of Strabo and Ptolemy; for it is certain that Ortona and Anxanum, both of which are also

Digitized by Google

considerably to the N. of the Sagrus, were Larinum cities. The latter is indeed assigned by many himself to that people (iii. 1. § 65), while he also terms Ortona the port or naval station of Frentani (*ἐπίνειον Φρεντανῶν*, v. p. 242), but wrongly places it to the S. of the river Sagrus. Thus, their confines must have approached within few miles of the Aternus, though without actually resting upon that river. On the W. they were probably not separated from the Samnites by any well-marked natural boundary, but occupied the lower slopes of the Apennines as well as the hilly country extending from thence to the sea, while the more lofty and central ridges of the mountains were included in Samnium.

The Frentani are expressly termed by Strabo a Samnite people, and he appears to distinguish them much from the neighbouring tribes of the Marsi, Peligni, and Vestini, with whom they had otherwise much in common. (Strab. v. p. 241). They, however, appear in history as a separate people, having their own national organisation; and though they may at one time (as suggested by Mahr) have constituted one of the four nations of the Samnite confederacy, this seems to have been no longer the case when that power came into collision with Rome. Their conduct during the long struggle between the Samnites and Romans renders this almost certain. In B. C. 326, indeed, when their name occurs for the first time in history*, they appear in arms against Rome, but were quickly defeated and reduced to submission (Liv. ix. 16); and a few years afterwards (B. C. 304), at the close of the Second Samnite War, the Frentani are mentioned, together with the Marsi, Marrucini, and Peligni, as coming forward voluntarily to sue for a treaty of alliance with Rome (Id. ix. 45), which they seem to have subsequently adhered to with steadfastness. Hence we find more than once express mention of the Frentanian auxiliaries in the war with Pyrrhus; and one of their chiefs, of the name of Oblacus, distinguished himself at the battle of Heraclea. (Dionys. *Fr. Didot.* 2; Plut. *Pyrrh.* 16; Flor. i. 18. § 7). They gave a still more striking proof of fidelity during the Second Punic War, by adhering to the Roman cause after the battle of Cannae, when so many of the Italian allies, including the greater part of the Samnites, went over to Hannibal. (Liv. xxii. 61; Sil. Ital. viii. 521, xv. 567). Throughout this period they appear to have been much more closely connected in their political relations with their neighbours the Marrucini, Peligni, and Vestini, than with the Samnites: hence, probably, it is that Polybius, in enumerating the forces of the Italian confederacy, classes the Frentani with the Marsi, Marrucini, Vestini, while he reckons the Samnites separately (Pol. ii. 24.) Notwithstanding their vaunted fidelity, the Frentani joined in the general outbreak of the Italian allies in the great Social War, B. C. 90 (Appian, *B. C.* i. 39; Strab. v. p. 241): they do not, however, appear to have taken any prominent part, and we can only infer that they received the Roman franchise at the same time with the neighbouring tribes. Hence we find them mentioned by Cicero, a few years later, as sending some of their chief men ("Frentani, homines nobilissimi," *pro Cluent.* 69) to support the cause of Cluentius, a native of Larinum. Their territory was traversed without resistance by Caesar at the outbreak of the Civil War, B. C. 49 (Caes. *B. C.* i. 23): and this is the last occasion on which their name appears in history. Their territory was comprised in the fourth region of Augustus, together with the Marrucini, Peligni, Marsi, &c. (Plin. iii. 12. s. 17); but at a later period it appears to have been reunited to Samnium, and was placed under the authority of the governor of that province (Mommsen, *ad Lib. Col.* p. 206). It is now included in the kingdom of Naples, and divided between the provinces of *Abruzzo Citeriore* and *Samnio*.

The territory of the Frentani is for the most part hilly, but fertile. It is traversed by numerous rivers which have their sources in the more lofty mountains of Samnium, and flow through the land of the Frentani to the Adriatic: the principal of these, besides the TIFERNUS, which (as already mentioned) constituted the southern limit of their country, are the TRINIUS or *Trigno*, which, according to Pliny, had a good port at its mouth ("Flumen Trinium portuosum," Plin. iii. 12. s. 17); and the SAGRUS or *Sangro*, a very important stream, which enters the Adriatic about half way between Histonium and Ortona. The Tabula also gives the name of a river which it places between Ortona and Anxanum, and calls "Clotoris" (?) The name is probably corrupt; but the stream meant (if its position can be depended upon) can be no other than the *Moro*, which falls into the Adriatic a few miles S. of *Ortona*. The coast-line of this part of the Adriatic presents few remarkable features, and no good natural harbours. The mouths of the rivers, and the two projecting points of *Termoli* (Buca) and the *Punta della Penna*, afford the only places of anchorage.

The towns of the Frentani mentioned by ancient writers are few in number: but the topography of the district has been thrown into great confusion by the perverted zeal of certain local antiquarians, and by the reliance placed on inscriptions published by some early writers, which there is great reason to regard as forgeries. The *Antichità Frentane* (2 vols. 8vo., Naples, 1809) of the Abbate Romanelli, who was a native of this part of Italy, is a very uncritical performance; but the author was led astray principally by the inscriptions and other documents put forth by Polidoro, an Italian antiquary of the last century, who appears to have had no hesitation in forging, or at least corrupting and altering them in such a manner as to suit his purpose. (Mommsen, *Inscr. Regn. Neap., Appendix*, p. 30.) Romanelli, in his later and more extensive work (*Antica Topografia Istorica del Regno di Napoli*, 3 vols. 4to., Naples, 1818), simply abridged the results of his former book; and Cramer, as usual, blindly follows Romanelli. Along the sea-coast (proceeding from N. to S.) were situated ORTONA, HISTONIUM, and BUCA. The two former may be clearly fixed, Ortona retaining its ancient name, and the ruins of Histonium being still extant at *Il Vasto d'Aimone*: but there is considerable difficulty in determining the site of Buca, which may however be fixed with much probability at *Termoli* [BUCA]; the arguments that have led many writers to place it at *Sta. Maria della Penna* being based principally upon the spurious inscriptions just alluded to. The existence of a town called Interamna, supposed by Romanelli and Cramer to have

* The old editions of Livy have "Ferentani;" the conjecture of Sigonius that we should read "Frentani," is supported by some of the best MSS., and may be regarded as certainly correct. (See Weissenborn, *ad loc.*; Niebuhr, vol. iii. p. 225.)

Digitized by Google

occupied the site of *Termoli*, is derived only from the same apocryphal source; and, even were the inscription itself authentic, the Interamna there meant is probably the well-known town of the Praetutii. (Murat. *Inscr.* p. 1050, no. 7; Mommsen, *l. c.*) The only inland town of importance among the Frentani was ANXANUM, now *Lanciano;* but, besides this, Pliny mentions, in the interior of the country, the "Carentini supernates et infernates," and the "Lanuenses;" both of which peoples are otherwise unknown, and the site of their towns cannot be fixed with any approach to certainty. On the other hand, the Tabula gives the name of a place called PALLANUM, of which no other mention occurs; but the site of which, according to Romanelli, is marked by extensive ruins at a place called *Monte di Pallano*, about 3 miles S.W. of *Atessa*. The previous station given by the same authority is called "Annum;" a name probably corrupt, but the true reading for which is unknown. (*Tab. Peut.*; Geogr. Rav. iv. 31.) USCOSIUM, a place given in the Itinerary of Antoninus, which reckons it 15 miles from Histonium, on the road into Apulia (*Itin. Ant.* p. 314), is fixed by this distance at a spot near the right bank of the little river *Sinarca*, about 5 miles S.W. of *Termoli*, but in the territory of *Guglionisi*, where considerable remains of an ancient town are said to exist. (Romanelli, vol. iii. p. 24.)

There is considerable obscurity in regard to the Roman roads through the territory of the Frentani. The name of the "Via Trajana Frentana" rests only on the authority of a dubious inscription; nor is there any better evidence for the fact that the construction of the high road through this district was really owing to that emperor. But it is certain that an ancient road traversed the territory of the Frentani, in its whole length from Aternum to Larinum, keeping for the most part near the sea-coast, but diverging for the purpose of visiting Anxanum. The stations along it are thus given in the Itinerary of Antoninus:—

	M.P.
Ostia Aterni.	
Angelum (Angulus) -	x.
Ortona - - -	xi.
Anxano - - -	xiii.
Histonios - - -	xxv.
Uscosio - - -	xv.
Arenio (Larinum?) -	xiv.

Of these, Angulus is certainly misplaced, and should have been inserted between Hadria and the Aternus. The distance from the mouths of the Aternus at *Pescara* to Ortona is considerably understated, and that from Ortona to Anxanum as much overrated; but still the line of the road may be tolerably well made out, and an ancient Roman bridge, over the *Sangro* between *Lanciano* and *Il Vasto*, supplies a fixed point in confirmation. The road given in the Tabula, on the contrary, strikes inland, from the mouth of the Aternus to Teate, and thence to Ortona, and again between Anxanum and Histonium makes a bend inland by Annum and Pallanum. The distances given are very confused, and in many instances probably corrupt. They stand thus:—

	M. P.
Ostia Aterni.	
Teano Marrucino -	xvi.
Ortona - - -	xi.
Anxana - - -	iii.
Annum - - -	iiii.
Pallanum - -	xii.
Istonium - -	xxiii.
Larinum.	

There exist copper coins with the Oscan legend "Frentrei," which may probably be referred to the Frentani rather than to the town of Frentum in Apulia, to which they have been assigned by some writers. Others are of opinion that they indicate the existence of a *city* of the name of Frentum as the capital of the Frentani, which is supposed to be the one referred to by Livy (ix. 16) where he says—"Frentanos vicit *urbemque ipsam*—in deditionem accepit,"—without naming the city; but this inference is, to say the least, very dubious. (Friedländer, *Oskische Münzen*, p. 42; Millingen, *Numismatique de l'Italie*, p. 180.) [E. H. B.]

FRENTO (*Fortore*), a river of Apulia which rises in the Apennines near *Baselice*, and has a course of near 50 miles from thence to the Adriatic. In the lower part of its course it formed the boundary between the territory of Larinum and that of Teanum in Apulia, and, consequently, formed the northern limit of Apulia if Larinum was not included in that country. Pliny tells us it has a port at its mouth, whence he terms it "fluvius portuosum Frento:" some remains of this are still visible on its right bank, at a place called *Torre di Fortore*. About 10 miles from its mouth it was crossed by an ancient bridge constructed on a scale of great magnificence, and still known as the *Ponte di Civitate*, from the ruins of Teanum, now known as *Civitate*, which are situated at a short distance from it. It was traversed by the high road leading from Larinum to Teanum. (Plin. iii. 11. s. 16; *Tab. Peut.*; Romanelli, vol. iii. p. 11.) [E. H. B.]

FRETUM GADITA'NUM, HERCULEUM, TARTESSIUM, &c. [GADITANUM FRETUM.]

FRETUM GALLICUM, is a name which Solinus (c. 25, ed. Steph.) gives to the straits which separate Gallia and Britannia. Tacitus (*Agric.* c. 40) calls it "Fretum Oceani." It is the πορθμὸς Βορτανικὸς of Strabo (p. 128). Thus, in ancient times, both the countries which it separates gave this sea a name; and it has no general name. The English call it the Straits of Dover, and the French sometimes Pas de Calais. [G. L.]

FRIGIDUS FLUVIUS, a river of Venetia in the country of the Carni, placed by the Itineraries on the road from Aquileia to Aemona across the Julian Alps. (*Itin. Ant.* p. 128; *Tab. Peut.*) It can be no other than the stream now called the Wipao (in Italian, *Vipao*), which falls into the Isonzo (Sontius), near *Gorizia*. It was on the banks of this river that the usurper Eugenius was defeated and slain by Theodosius, A.D. 394. Claudian, alluding to this victory, notices the extreme coldness of the waters from which the river derived its name. (Claudian. *de III. Cons. Honor.* 99; Zosim. iv. 58; *Hist. Miscell.* xii. p. 530.) [E. H. B.]

FRISIABO'NES, are placed by Pliny (iv. 17. s. 31) in North Gallia, between the Sunici and Betasii. [BETASII]. We cannot tell exactly where to fix them, unless they were near the Betasii; nor is it certain that the name is right, for the Frisii being in another place. The "Frisaei" appear on an inscription in Gruter, but this is a different name. Forbiger, who refers to his authorities, states that Frisiabones is only another way of writing the name Frisaevones (Gruter, p. 522. 7, &c.). (Forbiger, *Handbuch*, &c. vol. iii. p. 254; Ukert, *Gallien*, p. 271.) [G. L.]

FRISII (Frisones, Paul. Diac. vi. 37; Frisiavones, Geogr. Rav. iv. 23; and Frisei. Frisaei, or Frisavones, in inscriptions; Φρίσσιοι, Ptol. ii. 11. § 11;

Digitized by Google

Φρίσιοι, Dion Cass. liv. 32; Φρίσσονες, Procop. *B. G.* v. 20), one of the great tribes of North-western Germany, belonging to the Ingaevones. They inhabited the country about Lake Flevo and other lakes, between the *Rhine* and *Ems*, so as to be bounded on the south by the Bructeri, and on the east by the Chauci. Tacitus (*Germ.* 34) distinguishes between *Frisii Majores* and *Minores*, and it is supposed that the latter dwelt on the west of the canal of Drusus in the north of *Holland*, and the former between the rivers Flevus and Amisia, that is, in the country still bearing the name of *Friesland*. Pliny mentions a tribe, under the name of *Frisiabones*, as dwelling in Northern Gallia between the Sunici and Betasii. They have been identified by many writers with the lesser Frisii, but without sufficient reason. [FRISIABONES.]

The Frisians joined the Romans from the first, and remained faithful to them after the undertakings of Drusus, until, in A. D. 28, irritated by the oppression of the governor Olennius, they rose in arms, and expelled or massacred the Romans. (Tac. *A.* 4, iv. 72, xi. 19; Dion Cass. liv. 32.) Corbulo's attempt to reconquer them in A. D. 47, was unsuccessful, as he was recalled. Under Nero, they invaded the Roman dominion on the Rhine, but were obliged to retreat. On this occasion, their kings Verritus and Malorix went to Rome to negotiate, and were honoured with the Roman franchise, though they behaved with noble independence. (Tac. *Ann.* xi. 54.) During the fourth and fifth centuries, the Frisians were allied with the Saxons, with whom they sailed across to Britain, and shared their conquests. (Procop. *B. G.* iv. 20.) Their chief occupation was agriculture and the breeding of cattle. (Tac. *Ann.* iv. 72, xiii. 54; comp. Latham on Tac. *Germ.* p. 116.) [L. S.]

FRUDIS (*Φρούδιος λεβολαί*) is placed by Ptolemy (ii. 9) between the mouth of the Sequana (Seine) and the Promontory Itium. The reading *Φρούσιον λεβολαί* in Marcian (p. 50) is conjectured by Ukert (*Gallien*, p. 146) to be an error for *Φρούδιον λεβολαί*. D'Anville supposes that Ptolemy's Frudis is the outlet of the Samara (*Somme*). [G. L.]

FRUSINO (*Φρουσίνων* or *Φρούσωνος*: *Eth.* Frusinas, -ātis: *Frosinone*), a city of Latium, situated on the Via Latina, 7 miles from Ferentinum, between that city and Fregellae. (*Itin. Ant.* pp. 303, 305.) It seems to have been originally a Volscian city, though entertaining close relations with its neighbours the Hernicans: hence, on the first occasion in which its name appears in history, it is mentioned as having joined in exciting the Hernicans to revolt against Rome. For this offence the city was punished with the loss of a third part of its territory. (Liv. x. 1; Diod. xx. 80.)

Frusino is next mentioned on the occasion of the march of Hannibal against Rome, B. C. 211 (Liv. xxvi. 9), and incidentally alluded to by Plautus, together with some other towns in the same neighbourhood (Plautus, *Capt.* iv. 2. 103). Silius Italicus also notices its rocky situation and the hardy character of its inhabitants. (viii. 398, xii. 532). Cicero appears to have possessed a farm in its territory, to which he alludes more than once in his letters to Atticus (*ad Att.* xi. 4, 13). We learn from the Liber Coloniarum (p. 233) that it received a colony of veterans; but it remained a place of only municipal rank, and is mentioned, by Strabo, Pliny, and Ptolemy, among the towns in this part of Latium. Its position on the Via Latina probably caused it to retain some degree of prosperity, and Juvenal notices it as a respectable country town where houses were cheap. (Juv. iii. 224; Strab. v. p. 237; Plin. iii. 5. s. 9, Ptol. iii. 1. § 63.) Its existence at a later period is attested by the Itineraries, and it appears to have retained its ancient site throughout the middle ages down to the present day. It is now an episcopal town with about 7000 inhabitants, standing on a hill which rises above the river *Cosa* (Κόσας, Strab.) about 5 miles above its confluence with the *Sacco* (Trerus). Some remains of an amphitheatre are still visible in the plain beneath, but the town itself contains no relics of antiquity. [E. H. B.]

FU'CINUS LACUS (ἡ Φουκίνα λίμνη, Strab.: *Lago Fucino* or *Lago di Celano*), a lake in the centre of Italy, in the country of the Marsi, remarkable as being the only one of any extent that is found in the central Apennines. Strabo calls it "in size like a sea" (πελαγία τὸ μέγεθος, v. p. 240); but this expression would convey a very exaggerated notion of its magnitude: it is, however, the largest lake in Central Italy, though but little exceeding those of Trasimene and Volsinii. Its circumference is variously estimated at 30, 40, or even 50 miles, but according to the best maps does not really exceed 25 Italian, or about 29 English miles. Its form is nearly oval; and it is situated in a basin, surrounded on all sides by mountains, without any visible natural outlet. In a geographical point of view the lake Fucinus is of importance as being situated almost exactly in the centre of the peninsula of Italy, being just about half way between the Tyrrhenian sea and the Adriatic, and also at the middle point of a line drawn from the northern ridge of the Apennines to the gulf of Tarentum. It would therefore have justly deserved the name of the "Umbilicus Italiae," applied with much less reason to the insignificant pool of Cutilia. [CUTILIAE LACUS.] The basin of the lake Fucinus is itself at a considerable elevation, the waters of the lake being not less than 2176 feet above the level of the sea; but the mountains rise on all sides of it to a much greater height, especially on the N., where the double-peaked *Monte Velino* attains the elevation of 8180 feet. On the E. and W. the basin of the lake is bounded by limestone ridges of much inferior elevation, but steep and rocky, which separate it from the valleys of the Liris and the *Gisio*. Towards the NW. its shores are gentle and sloping, and separated only by a very moderate acclivity from the waters of the *Imelo* or *Salto*, which flow towards *Rieti* and the valley of the Tiber.

The lake Fucinus is almost always described as situated in the country of the Marsi (Strab. v. p. 240; Vib. Seq. pp. 16, 23; Dion Cass. lx. 11), and that people certainly occupied its shores for at least three-fourths of their extent; but Alba (surnamed Fucensis from its proximity to the lake) appears to have been more properly an Aequian city. [ALBA FUCENSIS.] Alba stood on a hill about 3 miles from the NW. extremity of the lake; on its eastern shore, close to the water's edge, was situated MARRUBIUM, the capital of the Marsi, of which the ruins are still visible at *S. Benedetto*. CERFENNIA, also a Marsic town, occupied the site of *Sta. Felicità*, about 2 miles N. of Marrubium, and at the foot of the steep mountain pass known as the Mons Imeus or *Forca Caruso*, which afforded the only communication from the basin of the Fucinus to that of the Aternus and the Adriatic. On the W. shore of the

Digitized by Google

lake stood the LUCUS ANGITIAE, a sanctuary and sacred grove of the goddess Angitia, who was in all probability a native Marsic divinity, whose supposed connection with Circe and Medea was derived from the fact of her presiding over the magic herbs and incantations for which the Marsi were always famous. [MARSI.] At a later period there grew up a town upon the spot, which is called in inscriptions ANGITIA, but must have also been currently known as Lucus; for we find the Lucenses mentioned by Pliny among the towns of the Marsi. and the name is still retained by the modern village of *Luco* or *Lugo*. [LUCUS ANGITIAE.] The beautiful lines of Virgil, in which he associates the grove of Angitia with the "glassy waters" of the Fucinus, are well known. (Virg. *Aen.* vii. 759; Sil. Ital. iv. 344.)

According to a tradition mentioned by Pliny and Solinus there had formerly existed on the shores of the Fucinus a town named Archippe, which had been swallowed up by the waters of the lake (Plin. iii. 12. s. 17; Solin. 2. § 6); and Holstenius tells us that the neighbouring inhabitants still preserved the tradition, and pretended that the remains of the lost city were visible, when the waters were low, at a spot between *Trasacco* and *Ortucchio*, near the S. shore of the lake. (Holsten. *Not. ad Cluv.* p. 154.) But the whole story has a very fabulous aspect. Another marvel related of the lake Fucinus was, that it was traversed by a river called the Pitonius, without their waters becoming mingled. (Vib. Seq. p. 16; Plin. ii. 103. s. 106, xxxi. 3. s. 24.) The story (which is told of many other lakes) is the more singular in this case, because the Fucinus has no visible natural outlet, no stream flowing *from* it in any direction. But there can be no doubt that its surplus waters were originally carried off by a subterranean channel, the opening of which, at a spot a little to the N. of *Luco*, is distinctly visible, and is still called *La Pedogna*, a name evidently retaining that of the ancient Pitonius. On the other hand, the only stream of any magnitude that flows *into* the lake is that now called the *Giovenco*, which enters it close to Marrubium, and is a perennial stream of clear water, supposed by some local writers to be derived from the neighbouring *Lago di Scanno*: this, therefore, must be the Pitonius of the ancients. There can be little doubt that a part of the waters of the Fucinus sink into a chasm or natural cavity at *La Pedogna*, from which they emerge (as is often the case in limestone countries) at some distant point: and this is precisely the statement of Lycophron, whose expressions are unusually clear upon the subject of the Pitonius, though he has distorted the name of the Fucinus into that of λίμνη Φόρκη Μαρσωνίς (*Alex.* 1275). Later writers went further, and conceived that they could recognise the spot where these waters emerged again from their subterranean channel, which they identified with the sources of the Aqua Marcia in the valley of the Anio, though these are more than 20 miles distant from the lake Fucinus, and separated from it by the deep valley of the Liris. This belief appears to have had no better foundation than the great clearness of the water in both cases (which would apply equally to many other sources much nearer to the lake), but it was generally adopted in antiquity: Strabo states it as a well-known fact; and Pliny, combining both marvels in one, relates that the Aqua Marcia, which was called at its source Pitonia, took its rise in the mountains of the Peligni, flowed through the Marsi and the lake Fucinus, then sunk into a cavern and ultimately emerged in the territory of Tibur, from whence it was carried by an aqueduct to Rome. Statius also speaks of the Aqua Marcia as derived from the snows of the Marsic mountains. (Strab. v. p. 240; Plin. xxxi. 3. s. 24; Stat. *Silv.* i. 3.)

The subterranean outlets of the Fucinus were, however, often insufficient to carry off its surplus waters; and the lake was in consequence subject to sudden rises, when it overflowed the low grounds on its banks, and caused much mischief. Strabo tells us that it sometimes swelled so as to fill up the whole basin to the foot of the mountains, at others would sink and leave dry a considerable tract, which then became susceptible of culture. (Strab. v. p. 240.) The project of obviating the evils arising from this cause, by the construction of an artificial emissary or subterranean canal from the lake into the valley of the Liris, was among the great designs entertained by Caesar, but frustrated by his death. (Suet. *Caes.* 44.) Its execution was afterwards repeatedly urged upon Augustus by the Marsi, but without effect, and it was reserved for Claudius to accomplish this great work. The main difficulty consisted in the hardness of the limestone rock through which the gallery had to be cut: the length of this is stated by Suetonius at three Roman miles (an estimate somewhat below the truth*): and he tells us that 30,000 workmen were employed on it continuously for a period of 11 years. The opening of it was celebrated by Claudius with great magnificence, and a mock naval combat was exhibited on the lake upon the occasion; but owing to the defective arrangements, a catastrophe ensued, in which many persons lost their lives, and the emperor himself narrowly escaped. (Suet. *Claud.* 20. 21. 32; Tac. *Ann.* xii. 56, 57; Dion Cass. lx. 33.) The emissary, however, appears to have fully answered its purpose at the time; but Nero, through hatred of Claudius, suffered the works to fall into decay, and it became necessary for Hadrian to restore them, on which account his biographer gives him the credit of having constructed them. (Plin. xxxvi. 15. s. 24; Spartian. *Hadr.* 22, who says briefly, "Fucinum emisit.") From this period we have no further account of it; but it appears to have fallen into decay in the middle ages, and became obstructed by the falling in of stones and earth from above; and though many attempts have been made from the year 1240 to the present day to clear it out, and restore it to a serviceable state, they have been hitherto without effect. It is, however, readily accessible at both ends, and even in its present state sufficiently attests the justice of Pliny's admiration, who deservedly ranks it among the most memorable proofs of Roman greatness. (Plin. *l. c.*) The whole work was examined in detail and described, in 1825, by a Neapolitan engineer named Rivera: the results of his researches are given by Kramer, whose excellent monography of the lake Fucinus (*Der Fuciner See*, 4to. Berlin, 1839) and the surrounding country is one of the most valuable contributions to our knowledge of Italian geography. Its authority has been generally followed in the present article. [E. H. B.]

* The actual length, according to the measurements of Rivera, is 21,395 palms, or about 15,000 English feet. (Kramer, *Der Fucinersee*, p. 40.) The *Monte Salviano*, through the solid limestone rock of which it was pierced, rises more than 1000 feet above the level of the lake.

FULGI'NIUM (Φουλγίνιον, App.: *Eth.* Fulginas, -ātis: *Foligno*), a municipal town of Umbria, situated on the Via Flaminia at the western foot of the Apennines. It was distant only 8 miles from Mevania, and 3 from Forum Flaminii. It appears to have been a place of no great importance, at least till a late period, as its name is wholly omitted by Strabo, who enumerates all the other towns on or near the Via Flaminia. But we learn from Cicero that it was a municipal town, though in the subordinate condition of a praefectura. (Municipium Fulginas, Praefectura Fulginas, Cic. *Fr. ap. Priscian.* vii. 14. § 70. The notion that it was a "foederata civitas" rests upon the false reading of "Fulginatium" for "Iguvinatium" in Cic. *pro Balb.* 20. See Orelli, *ad loc.*) It is mentioned also during the Perusian War in B. C. 41, when it was occupied by Ventidius and Asinius, the generals of Antony. (Appian, *B. C.* v. 35.) Silius Italicus describes it as situated in an open plain, without walls (viii. 461): the proximity of the more important towns of Mevania and Hispellum probably kept it from rising to consideration, though its position at the junction of the main line of the Via Flaminia with the same branch which led by Interamna and Spoletium must have been favourable to its development, and it is mentioned as a "civitas" in the Jerusalem Itinerary. (*Itin. Hier.* p. 613.) The modern city of *Foligno* has risen to importance after the destruction of the neighbouring Forum Flaminii, and is now the most populous and flourishing town in this part of Italy. An inscription discovered here has preserved the name of a local nymph or divinity named Fulginia (Orell. *Inscr.* 2409): another records the erection of a statue to a certain C. Betuus Cilo, by 15 towns of Umbria, of which he was the common patron. (Orell. *Inscr.* 98.) This has been absurdly interpreted as indicating the existence of a league or confederacy of these cities of which Fulginium was the head. (Cramer, *Anc. Italy*, vol. i. p. 268). [E. H. B.]

FUNDI (Φοῦνδοι: *Eth.* Φουνδανός, Fundanus: *Fondi*), a city of Latium, in the more extended sense of the term, situated on the Appian Way between Tarracina and Formiae, and about 5 miles from the sea-coast. In the marshy plain between it and the sea is a considerable lake or pool, known in ancient times as the LACUS FUNDANUS (Plin. iii. 5. s. 9), and still called the *Lago di Fondi*. The city was probably at one time in the hands of the Volscians; and in B. C. 340, during the great Latin War, it would appear to have occupied a sort of neutral position between the Latins and Campanians, and, as well as its neighbour Formiae, continued faithful to the Romans during that trying period. For this conduct the inhabitants of both cities were rewarded with the Roman "civitas," but without the right of suffrage. (Liv. viii. 14.) Shortly after this, however, a part of the citizens of Fundi joined in the revolt of their neighbours of Privernum, under the lead of Vitruvius Vaccus, who was himself a native of Fundi. But the authorities of the city succeeded in excusing themselves to the Roman senate, and escaped without punishment. (Ib. 19.) They did not however obtain the full Roman franchise with the right of voting till B. C. 190, when they were for the first time enrolled in the Aemilian tribe. (Liv. xxxviii. 36 Vell. Pat. i. 14.) Hence it is to this interval that Pompeius Festus must refer when he speaks of Fundi as well as Formiae as having been in the condition of praefecturae. (Fest. p. 233.) At a subsequent period it received a colony of veterans under Augustus (*Lib. Colon.* p. 234), and appears to have continued under the Roman empire to be a flourishing municipal town (Strab. v. p. 234; Mel. ii. 4. § 9; Plin. iii. 5. s. 9; Ptol. iii. 1. § 63; Orell. *Inscr.* 821, 2951), for which it was probably indebted to its situation on the Appian Way, which is here compelled to deviate from the sea-coast, and make an angle inland from Tarracina to Fundi, and thence again to Formiae, where it rejoins the coast. According to the Itineraries, Fundi was distant 13 miles from each of the above towns. (*Itin. Ant.* pp. 108, 121: *Itin. Hier.* p. 611.) The mention of its name by Horace on his journey to Brundusium, and the ridicule cast by him on the pompous airs assumed by its local magistrate or praetor, Aufidius Luscus, are familiar to all readers. (Hor. *Sat.* i. 5. 34.) It is incidentally mentioned also by Cicero and Suetonius, from whom we learn that the family of Livia, the wife of Augustus, came originally from Fundi: some writers also represented Tiberius himself as born there. (Cic. *ad Att.* xiv. 6; Suet. *Tib.* 5, *Cal.* 23, *Galb.* 8). Silius Italicus seems to include Fundi as well as Caïēta in Campania (viii. 524—530), but it is certain that they were both comprised within Latium, according to the bounds assigned to it under the Roman empire, or what was called Latium Novum. [LATIUM.]

The modern city of *Fondi* still retains the ancient site, and considerable remains of antiquity, of which the most important are an ancient gateway with a portion of the walls adjoining it, the lower part of which is of polygonal construction, and the upper part of later Roman style. An inscription over the gate (now called the *Portella*) records the construction of the walls and gates of the city by the local magistrates or aediles. (Hoare, *Class. Tour*, vol. i. p. 106.) The principal street of the town is still formed by the Via Appia, and retains great part of the ancient pavement: numerous fragments of ancient buildings are also scattered throughout the modern town, or have been employed in the middle ages in the construction of its castle, cathedral, &c.

Fundi was celebrated among the Romans for the excellence of its wines: the famous Caecuban wine was in fact produced within its territory [CAECUBUS AGER], but besides this the wine of Fundi itself (Fundanum vinum) seems to have enjoyed a high reputation, though inferior to that of the Caecuban and Falernian. (Martial, xiii. 113; Plin. xiv. 6. s 8.) It was probably on this account that the "Fundanus ager" was one of those districts which the agrarian law of Servilius Rullus sought to apportion among the needy citizens of Rome. (Cic. *de Leg. Agr.* ii. 25.) [E. H. B.]

FURCAE CAUDI'NAE. [CAUDIUM.]

FURCO'NIUM. [VESTINI.]

G.

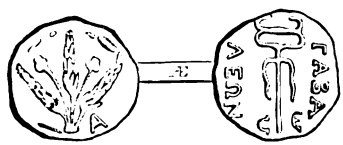
GABAE (Γάβαι). 1. A strongly fortified post in Sogdiana, mentioned in the invasion of that country by Alexander's army. (Arrian, iv. 17.) It is not possible to identify it with any known place, but it has been supposed not improbable that it may be the same as that mentioned by Arrian under the name of Gaza (iv. 2), and by Curtius under that of Gabaza (viii. 4. § 1). It is clear that the three places were occupied by a Scythian race sometimes called generically Massagetae, and sometimes by a more local

Digitized by Google

title, Sogdiani; but the identity of the three places is by no means certain.

2. One of the royal palaces of the kings of Persia, situated, according to Strabo (xv. p. 728), in the upper country of Persis. According to Ptolemy (vi. 4. § 7) it must have been situated at no great distance from the Pasargadae. The name is probably connected with the district Gabiene, which was in Susiana, and may not unlikely have comprehended a part of Persis. [V.]

GABALA (Γάβα, Γάβαλα), a place in Galilee fortified by Herod the Great (Joseph. *B. J.* xv. 9. § 5), supposed to be identical with Gamala. [GAMALA.] [G. W.]



COIN OF GABALA.

GABALENE. [GEBALENE.]

GA'BALI or GABALES (Γαβάλεις, Strab. p. 191). "The Ruteni and the Gabales," says Strabo, "border on the Narbonitis." In Caesar's time the Gabali were under the supremacy of the Arverni. (*B. G.* vii. 75.) In another passage, he speaks of the "Gabalos proximosque pagos Arvernorum" (*B. G.* vii. 64). Their position is in a mountainous country between the Arverni and the Helvii. It corresponds to the *Gévaudan* of the ante-revolutionary history of France, a name derived from the middle-age term Gavaldanum, and nearly to the present department of *Lozère*. There were silver mines in the country of the Ruteni and Gabali (Strabo). The cheese of this country was famed at Rome (Plin. xi. 42); it came from the "Lesorae Gabalicique pagi." The Lesora is the mountain *Lozère*. Sidonius Apollonaris (*Carm.* xxiv. 27) says,

"Tum terram Gabalum satis nivosam."

A large part of it is a cold, mountainous country. The chief town of the Gabali, according to Ptolemy, is Anderitum. [ANDERITUM.] [G. L.]

GABAZA, a district of Sogdiana apparently from the description of Curtius, who states that Alexander's army suffered much there from the severity of the cold in the northern part of that province (viii. 4. § 1). [GABAE, No. 1.] It must have been between the 40th and 42nd parallels of N. lat., and near the furthest limit northward of Alexander's march. [V.]

GABIE'NE (Γαβιηνή, Strab. xvi. p. 745), one of the three eparchies into which Elymais was divided in ancient times: the other two were Mesabatica and Corbiana. It appears from the notice in Strabo that Gabiene was in the direction of Susa. It is mentioned in the wars of Alexander's successors, Antigonus having attempted to cut off Eumenes in that locality, and Eumenes having succeeded in wintering there in spite of the enemy. (Diod. xix. 26, 34; Plut. *Eumen.* 15; Polyaen. *Strat.* iv. 6. § 13.) [V.]

GA'BII (Γάβιοι: *Eth.* Γάβιος, Gabinus: *Castiglione*), an ancient city of Latium, situated between 12 and 13 miles from Rome on the road to Praeneste, and close to a small volcanic lake now called the *Lago di Castiglione*. All accounts represent it as a Latin city, and both Virgil and Dionysius expressly term it one of the colonies of Alba. (Virg. *Aen.* vi. 773; Serv. *ad loc.*; Dionys. iv. 53.) Solinus alone ascribes to it a still earlier origin, and says it was founded by two Sicilian brothers, Galatas and Bius, from whose combined names that of the city was derived. (Solin. 2. § 10.) In the early history of Rome it figures as one of the most considerable of the Latin cities, and Dionysius expressly tells us (*l. c.*) that it was one of the largest and most populous of them all. According to a tradition preserved both by him and Plutarch, it was at Gabii that Romulus and Remus received their education, a proof that it was believed to have been a flourishing city at that early period. (Dionys. i. 84; Plut. *Rom.* 6.) Yet no subsequent mention occurs of it in history during the regal period of Rome till the reign of Tarquinius Superbus. At that time Gabii appears as wholly independent of Rome, and incurred the hostility of Tarquinius by affording shelter to fugitives and exiles from Rome and other cities of Latium. But it was able successfully to withstand the arms of Tarquin, who only succeeded in making himself master of the city by stratagem and by the treachery of his son Sextus, who contrived to be received at Gabii as a fugitive, and then made use of the influence he obtained there to betray the city into the hands of his father. (Liv. i. 53, 54; Dionys. iv. 53—58; Val. Max. v. 4. § 2; Ovid, *Fast.* ii. 690—710.) The treaty concluded on this occasion between Rome and Gabii was among the most ancient monuments preserved in the former city: it is evidently one of those alluded to by Horace as the

"foedera regum
Cum Gabiis aut cum rigidis aequata Sabinis,"

and was preserved on a wooden shield in the temple of Jupiter Fidius at Rome. (Hor. *Ep.* ii. 1. 25; Dionys. iv. 58.) Its memory is also recorded by a remarkable coin of the Antistia Gens, a family which appears to have derived its origin from Gabii. (Eckhel, vol. v. p. 137.) Whatever were the relations thus established between the two states, they did not long subsist: Sextus Tarquinius took refuge at Gabii after his expulsion from Rome, and though according to Livy (i. 60) he was soon after murdered by his enemies there, we find the name of the Gabians among the Latin cities which combined against the Romans before the battle of Regillus (Dionys. v. 61.) We may hence conclude that they at this time really formed part of the Latin League, and were doubtless included in the treaty concluded by that body with Sp. Cassius in B. C. 493. (Niebuhr, vol. ii. p. 17.)

From this time their name is but rarely mentioned; and, whenever they appear in history, it is as allies or dependents of Rome. Thus in B. C. 463 we are told that their territory was ravaged by the Volscians (Liv. iii. 8) in a predatory incursion against Rome; and in B. C. 381 they suffered in like manner from the incursions of their neighbours the Praenestines, who were at that time on hostile terms with the Republic (Id. vi. 21). Even in the last great struggle of the Latins for independence, no mention occurs of Gabii, nor have we any account of the terms or conditions on which it was admitted to the position in which we subsequently find it, of a Roman municipium. In B. C. 211 it is again mentioned on occasion of Hannibal's march against Rome (Liv. xxvi. 9); and an incidental notice of it occurs in B. C. 176 (Id. xli. 16): but, with these exceptions, we hear little more of it in history. In B. C. 41, however, we find it selected for a conference between

Digitized by Google

ctavian and L. Antonius, probably on account of s position midway between Rome and Praeneste. Appian, *B. C.* v. 23.) But long before this period had ceased to be a place of importance and appears have fallen into complete decay. We learn, indeed, that the dictator Sulla restored its walls, and valed its territory among his veterans (*Lib. Colon.* 234); but this measure, if it did not accelerate decline, at least did nothing to arrest it: and in c. 54 we find Cicero speaking of Gabii among he towns of Latium which were so poor and decayed hat they could hardly take their accustomed part in he sacrifices on the Alban Mount. (Cic. *pro Planc.* 9.) Dionysius also attests its decayed condition at a somehat later period, and tells us that in his time the reater part of the space enclosed within the ancient alls was no longer inhabited, though the traffic long the high road (the Via Praenestina) preserved he adjacent parts of the town from depopulation iv. 53). This distinct statement explains, at the ame time that it confirms, the expressions of poets f the Augustan age, which would otherwise give an xaggerated idea of its state of desolation. Thus Horace calls it a "deserted village," and Propertius peaks as if it were almost devoid of inhabitants. Hor. *Ep.* i. 11. 7; Propert. v. 1. 34.) The still stronger xpressions of Lucan (vii. 392) are scarcely meant o be historical. Juvenal also repeatedly alludes to as a poor country town, retaining much of rustic implicity, and in imitation of Horace couples its ame with that of Fidenae. (Juv. iii. 189, vi. 56, 100.) But we know from other sources, that it ad been considerably revived at this period; it is ot improbable that its cold sulphureous waters, hich are already noticed by Horace (*Ep.* i. 15. 9), ad become a source of attraction, but the monuments and inscriptions which have been recently discovered on the site, prove that it not only continued to exist as a municipal town, but recovered to a considerable extent from its previous decay. This revival, which appears to have commenced as early as he reign of Tiberius, was greatly accelerated by Hadrian, and continued under his immediate successors down to the commencement of the third century. From this time all trace of the town disappears; though it is probable that the bishops of Gabii, mentioned in early ecclesiastical documents down to the 7th century, belong to this city, rather than to a distinct Gabii, of which nothing else is known. (Visconti, *Monum. Gabini*, pp. 7—14; Nibby, *Dintorni*, vol. ii. pp. 76—78.)

The site of Gabii is clearly fixed by the statements of Dionysius and Strabo, that it was distant 100 stadia from Rome, on the Via Praenestina, with which the Itineraries, that place it 12 M. P. from the city, closely accord. (Dionys. iv. 53; Strab. v. p. 238; *Itin. Ant.* p. 302; *Tab. Peut.*) Strabo correctly adds that it was just about equidistant from Rome and Praeneste; and as the ruins of an ancient temple have always remained to mark the spot, it is strange that its site should have been mistaken by the earlier Italian topographers, who before Cluverius) transferred it to *Gallicano* or *La Colonna*. The temple just mentioned stands in a commanding position on a gentle eminence, a short distance on the left of the ancient road, the line of which is clearly marked by its still existing pavement: and the site of the ancient city may be readily traced, occupying the whole ridge of hill from thence to an eminence on the N. of the lake, which probably formed the ancient citadel, and is crowned by the ruins of a mediaeval fortress, now known as *Castiglione*. Some remains of the walls may be still observed near this castle: their extent, to which Dionysius appeals as proof of the former greatness of Gabii, is considerable, the circuit being about three miles, but the ridge nowhere exceeds half a mile in breadth. The only ancient edifice now visible is the temple already noticed, which has been supposed, with much probability, to be that of Juno, who, as we learn from Virgil and his constant imitator Silius Italicus, was the tutelary deity of Gabii. (Virg. *Aen.* vii. 682; Sil. Ital. xii. 537.) Livy, however, notices also a temple of Apollo in the ancient city (xli. 16), and the point is by no means clear. The existing edifice is of a simple style of construction, built wholly of Gabian stone, and with but little ornament. It much resembles the one still remaining at Aricia; and is probably, like that, a work of Roman times [ARICIA], though it has been often ascribed to a much earlier date. Nothing else now remains above ground; but excavations made in the year 1792 brought to light the seats of a theatre (or rather, perhaps, ranges of semicircular seats adapted to supply the place of one) just below the temple, facing the Via Praenestina,—and a short distance from it, immediately adjoining the high road, were found the remains of the Forum, the plan of which might be distinctly traced: it was evidently a work of Imperial times, surrounded with porticoes on three sides, and adorned with statues. The inscriptions discovered in the same excavations were of considerable interest, as illustrating the municipal condition of Gabii under the Roman Empire; and numerous works of art, statues, busts, &c., many of them of great merit, proved that Gabii must have risen, for a time at least, to a position of considerable splendour. Both the inscriptions and sculptures, which are now in the Museum of the Louvre, are fully described and illustrated by Visconti. (*Monumenti Gabini*, Roma, 1797, and Milan, 1835.)

Gabii was noted in ancient times for its stone, known as the "lapis Gabinus," a hard and compact variety of the volcanic tufo or *peperino* common throughout the Roman *Campagna*: it closely resembles the "lapis Albanus," but is of superior quality, and appears to have been extensively employed by the Romans as a building-stone from the earliest ages down to that of Augustus and Nero. (Strab. v. p. 238; Tac. *Ann.* xv. 43; Nibby, *Roma Antica*, vol. i. p. 240.) It is singular that no allusion is found in any ancient writer to the lake of Gabii: this is a circular basin of small extent, which must at one time have formed the crater of an extinct volcano; it immediately adjoins the ridge occupied by the ancient city, which in fact forms part of the outer rim of the crater. Pliny, however, alludes to the volcanic character of the soil of Gabii, which caused it to sound hollow as one rode over it. (Plin. ii. 94.)

A strong confirmation of the ancient importance of Gabii is found in the fact that the Romans borrowed from thence the mode of dress called the Cinctus Gabinus, which was usual at sacrifices and on certain other solemn occasions. (Virg. *Aen.* vii. 612; Serv. *ad loc.*; Liv. v. 46, &c.) Still more remarkable is it that, according to the rules of the Augurs, the "Ager Gabinus" was set apart as something distinct both from the Ager Romanus and Ager Peregrinus. (Varr. *L. L.* v. 33.) The road leading from Rome to Gabii was originally called the VIA GABINA, a name which occurs twice in the earlier books of Livy (iii. 6, v. 49), but appears to

Digitized by Google

have been subsequently merged in that of the Via Praenestina, of which it formed a part. [E. H. B.]

GABRANTOVICI. Γαβραντονίκων εὐλίμενος κόλπος is one of the notices in Ptolemy (ii. 3. § 6) of a locality lying between *Dunum Sinus* (Δοῦνον κόλπος) and *Ocellum Promontorium* (Ὀκέλλου ἄκρον). Name for name, and place for place, Dunum is *Dun*-s-ley Bay near Whitby in Yorkshire. Ocellum is probably *Flamborough Head*. This makes the bay of the Gabrantovici the equivalent to the present *Filey Bay*. Philipps (in his *Mountains and Rivers of Yorkshire*) takes this view; which is, probably, the right one. Others, however, and amongst them the editor of the *Monumenta Britannica*, place it at *Burlington*, or *Hornsea*—in which case the Ocellum Promontorium must be *Spurn Head*. If so, a promontory so important as *Flamborough Head* has no name in Ptolemy. If so, too, the entrance to the *Humber* is mentioned twice over — first, as *Spurn Head* (Gabrantovicorum Sinus), and next, as the outlets of the river Abus, i. e. the headland is mentioned, and so are the waters immediately in contact with it. This is not the ordinary form of Ptolemy's entries. Hence, the reasoning lies in favour of *Filey Bay*, strengthened by the fact of the entry in this case being a double one in a single form—Γαβραντονίκων εὐλίμενος κόλπος.

But the "bay with the good harbour" was one thing, the "Gabrantovici" was another: indeed, the form in -*vici* (rather than -*vicae* or -*vica*) is an assumption. All that we collect from the form of the word is, that the object expressed by the crude form Gabrantovici- was an object of which the name had a plural number. It might be the name of a population; it might be the name of something else.

Whatever may have been the real case, it is a word which in the eyes of what may be called the minute ethnologist is one of great interest; since it bears upon a question which, every day, acquires fresh magnitude, viz. the extent to which German or Scandinavian settlements had been made in Britain anterior, not only to the time of Hengist and Horsa, but to the time of Roman conquest. Professor Philipps, and probably others besides the present writer, have believed that German glosses and German forms are to be found in the British part of Ptolemy.

Now, if we admit the possibility of *Gabrantovic* being a German word, we have as a probable analysis of it the participle *gebraunte* (=*burnt*) and the substantive *wic* (*village, station, bay*). What determined the name is uncertain. It might be the presence of a beacon. This, however, is not the main point; the main point is the extent to which it is an equivalent to the modern compound *Flam-borough*. This, in the mind of the present writer, is *not* an accident. Further remarks on the question to which this notice relates are found under the words PETUARII and VANDUARII. [R. G. L.]

GABRETA or GABRITA SILVA (Γαύβρητα, Γάβριτα, or Γάβρητα ὕλη), a range of mountains in Germany, mentioned by Strabo (vii. p. 292) and Ptolemy (ii. 11. §§ 5, 7, 24) in such a manner as to lead several of the earlier geographers to identify it with the *Thüringerwald*; but later investigations have shown that the *Böhmerwald*, in the north of Bavaria, is meant. The name is evidently of Celtic origin (compare the name *Vergobretus* in Caes. *B. G.* i. 16), and probably signifies "a woody mountain." [L. S.]

GABROMAGUS, a town in the interior of Noricum, on the south of the river Anisa. It is identified by some with *Lietzen*, on the *Ins*, and by others with *Windish-Garstein*. (*Itin. Ant.* p. 276; *Tab. Peut.*) [L. S.]

GABROSENTUM, in Britain, probably the nominative form of the *Gabrosente* of the Notitia, and the *Gabrocentio* of the geographer of Ravenna. It was a station along the line of the Vallum (*per lineam Valli*) and was occupied by the second cohort of the Thracians. The editor of the *Monumenta Britannica* identifies Gabrosentum with *Irwinstead* in Cumberland: Mr. Bruce, with *Bowness*. At Bowness slight traces of the walls of a station may with difficulty be detected, "its southern lines near the church being those which are most apparent." A small altar, dedicated to Jupiter, by Sulpicius Secundianus, has been dug up at *Bowness*. [Ed.]

GAD. [PALAESTINA.]

GADAR (Γάδαρ, Isid. *Stath. Parth.* p. 2), appears to have been a small place between Nisa and Antiochia of Margiana. Rennell (*Geogr. of Herod.* vol. ii. p. 390) has conjectured, from the names of two or three small places mentioned also by Isidorus, that Gadar is represented now by *Gandar* or *Gandur*, called by Abulfeda *Kondor*, and not improbably one of the later seats of the Gandarii or *Gandārae*. [V.]

GADARA (τὰ Γάδαρα: *Eth.* Γαδαρεύς, Γαδαρίς), a city of Palestine, accounted the capital of Peraea by Josephus (*B. J.* iv. 7. § 3), to the S. of the sea of Tiberias, and 60 stadia distant from the town of Tiberias, on the confines of Tiberias, and of the region of Scythopolis (*Vita*, §§ 65. 9). It is placed by Pliny (v. 16) on the river Hieromax, now the Yermuk; and the district which took its name from it, the Γαδαρήνων γῆ of the Evangelists (*St. Mark*, v. 1; *St. Luke*, viii. 26), was the eastern boundary of Galilee (*B. J.* iii. 3. § 1). Polybius, who records its capture by Antiochus, calls it the strongest city in those parts (v. 71, and *ap.* Joseph. *Ant.* xii. 3. § 3). It was restored by Pompey (*Ant.* xiv. 4. § 4), having been shortly before destroyed, and was the seat of one of the five Sanhedrims instituted by Gabinius (*Ant.* xiv. 5. § 4), which is the more remarkable, as it is reckoned one of the Grecian cities (πόλεις Ἑλληνίδες), on which account it was exempted from the jurisdiction of Archelaus (*Ant.* xvii. 13. § 4, *B. J.* ii. 6. § 3) and subjected to the prefecture of Syria, although it had been granted as a special grace to Herod the Great (*B. J.* i. 20. § 3). It was one of the first cities taken by the Jews on the outbreak of the revolt (*B. J.* ii. 18. § 1), which act was soon afterwards revenged on its Syrian inhabitants (§ 5); but Vespasian found it in occupation of the Jews, on his first campaign in Galilee, when he took it, and slaughtered all its adult inhabitants, and burnt not only the city itself, but all the villages and towns in the neighbourhood (iii. 7. § 1). It seems to have been again occupied by the Jews, for, on his next campaign in Galilee, it was voluntarily surrendered to the Romans; a measure prompted by a desire of peace, and by fear for their property, for Gadara was inhabited by many wealthy men (iv. 7. § 3). This last observation is in some measure confirmed by the existing remains of the city, among which are the ruins of stately private edifices, as well as of important public buildings.

Om Keis, the ancient Gadara, is situated on the mountains on the east side of the valley of the Jordan, about 6 miles SE. by E. of the sea of Galilee, and to the south of the river *Yarmuk*, the Hieromax of Pliny. The ruins are very considerable. The

Digitized by Google

walls of the ancient Gadara are still easily discernible. Besides the foundations of a whole line of houses, and the remains of a row of columns which lined the main street on either side, there are two theatres, on the north and west sides of the town, one quite destroyed, but the latter in very tolerable preservation, and very handsome; near it the ancient pavement, with wheel-tracks of carriages, is still visible. Broken columns and capitals lie in every direction, and sarcophagi to the east of the town, where is the necropolis, the tombs of which are by far the most interesting antiquities of *Om Keiss*. The sepulchres, which are all under ground, are hewn out of the live rock, and the doors, which are very massy, are cut out of immense blocks of stone; some of these are now standing, and actually working on their hinges." (Irby and Mangles, p. 297; Lord Lindsay, vol. ii. pp. 96, 97; Traill's *Josephus*, vol. i. p. 35, vol. ii. p. 88, and the Plates there referred to.)

The hot springs and baths of Gadara were celebrated in ancient times, and reckoned second only to those of Baiae, and with which none other could be compared. (Eunap. Sardian. *ap.* Reland, *Palaest.* p. 775.) They are mentioned in the Itinerary of Antoninus Martyr: "In parte ipsius civitatis, miliario tertio, sunt aquae calidae quae appellantur thermae Helisa, ubi leprosi mundantur;" and again: "Ibi est etiam fluvius calidus qui dicitur Gadarra, et descendit torrens, et intrat Jordanem, et ex ipso amplificatur Jordanis et major fit" (*ap.* Reland, *l. c.*). Eusebius and St. Jerome are more accurate; they describe the hot springs as bursting forth from the roots of the mountain on which the city is built, and having baths built over them. (*Onomast. s. vv.* Ἀλλάθ and Γάδαρα, cited by Reland, p. 302.) They were visited by Captains Irby and Mangles. "They are not so hot as those of Tiberias. One of them is inclosed by palm-trees in a very picturesque manner. The ruins of a Roman bath are at the source; we found several sick persons at these springs, who had come to use the waters." (*Travels*, p. 298.) [G.W.]

GADDA (Γάδδα), a town of the tribe of Judah, mentioned only in *Joshua* (xv. 27). A village of this name is noticed by Eusebius as existing in his day, on the site of the ancient town, in the extremity of the country, called Daroma. St. Jerome adds, "contra orientem, imminens mari mortuo." (*Onomast. s. v.*) [G. W.]

GADENI (Γαδηνοί), in Britain, mentioned by Ptolemy (ii. 3. § 10) as lying to the north of the Damnii. [Damnii.] *Berwickshire*, with (perhaps) parts of *Roxburgh* and *Haddington*. [R. G. L.]

GADES (-IUM; also GADIS, and GADDIS), the Latin form of the name which, in the original Phoenician, was GADIR (or GADDIR), and in the Greek GADEIRA (τὰ Γάδειρα; Ion. Γήδειρα, Herod.; and, rarely, ἡ Γαδείρα, Eratosth. *ap. Steph. B. s. v.*), and which is preserved in the form *Cadiz* or *Cadix*, denotes a celebrated city, as well as the island on which it stood (or rather the islands, and hence the *plural* form), upon the SW. coast of Hispania Baetica, between the straits and the mouth of the Baetis. (*Eth.* Γαδειρεύς, fem. Γαδειρίς, also, rarely, Γαδειρίτης, Γαδειραῖος and Γαδειρανός, Steph. B.; *Adj.* Γαδειρικός, *e. g.* with χώρα, Plat. *Crit.* p. 114, b: Lat. *Adj.* and *Eth.* Gaditanus). The fanciful etymologies of the name invented by the Greek and Roman writers, are barely worthy of a passing mention. (Plat. *Critias*, p. 114, Steph. B. *s. v.*; *Etym. M.*; Suid.; Hesych.; Eustath. *ad Dion. Perieg.* 64.) The later geographers rightly stated that it was a Phoenician word (Dion. Per. 456; Avien. *Ora Marit.* 267—269:

> "Gaddir hic est oppidum:
> Nam Punicorum lingua conseptum locum
> Gaddir vocabat.")

It was the chief Phoenician colony outside the Pillars of Hercules, having been established by them long before the beginning of classical history. (Strab. iii. pp. 148, 168; Diod. Sic. v. 20; Scymn. Ch. 160; Mela, iii. 6. § 1; Plin. v. 19. s. 17; Vell. Paterc. i. 2; Arrian. and Aelian. *ap.* Eustath. *ad Dion. Perieg.* 454.) To the Greeks and Romans it was long the westernmost point of the known world; and the island on which it stood (*Isla de Leon*) was identified with that of Erytheia, where king Geryon fed the oxen which were carried off by Hercules; or, according to some, Erytheia was near Gadeira. (Hesiod. *Theog.* 287, et seq., 979, et seq.; Herod. iv. 8; Strab. iii. pp. 118, 169; Plin. iv. 21. s. 36; and many others: for a full discussion of the question, see Ukert, vol. ii. pt. 1, pp. 240, 241.) The island was also called Aphrodisias, and Cotinussa, and by some both the city and the island were identified with the celebrated Tartessus.

The early writers give us brief notices of Gades. Herodotus (*l. c.*) places Gadeira on the ocean, beyond the Pillars of Hercules, and near it the island of Erytheia. Scylax states that, among the Iberi, the first people of Europe (on the W.), there are *two* islands, named Gadeira, of which the one has a city, a day's journey from the Pillars of Hercules. (Scylax, pp. 5, 120, ed. Gronov., pp. 1, 51, ed. Hudson.) Eratosthenes mentioned the city of Gadeira (*ap.* Steph. B. *s. v.*), and the "happy island" of Erytheia, in the land of Tartessis, near Calpe (*ap.* Strab. iii. p. 148, who refers also to the views of Artemidorus). In the period of the Carthaginian empire, therefore, the situation of the place was tolerably well known to the Greeks; but it is not till after the Punic Wars had given Spain to the Romans, that we find it more particularly described. The fullest description is that of Strabo (iii. pp. 140, 168), who places it at a distance of less than 2000 stadia from the Sacred Headland (*C. S. Vincent*), and 70 from the mouth of the Baetis (*Guadalquivir*) on the one side, and about 750 from Calpe (*Gibraltar*) on the other, or, as some said, 800. Mela (ii. 7) transfers it to the entrance of the *Straits*, which he makes to begin at Junonis Pr. (*C. Trafalgar*). Pliny, who makes the entrance of the Straits at Mellaria, places Gades 45 M. P. outside (iv. 22. s. 36, with Ukert's emendation: the MSS. vary between 25 and 75). The island is described as divided from the mainland of Baetica by a narrow strait, like a river (Mela, iii. 6), the least breadth of which is given by Strabo as only 1 stadium (606 ft.), and as barely 700 ft. by Pliny, who makes the greatest breadth 7½ M. P. (ii. 108. s. 112): it is now called the *River of St. Peter*, and the bridge which spanned it (*Itin. Ant.* p. 409) is called the *Puente de Zuazo*, from Juan Sanches de Zuazo, who restored it in the 15th century. The length of the island was estimated at about 100 stadia (Strab. *l. c.*), or 12 M. P. (Polyb. *ap. Plin. l. c.*: Pliny himself says 15): its breadth varied from one stadium to 3 Roman miles (Strab., Plin., *ll. cc.*). The city stood on the W. side of the island, and was from the first very small in comparison with its maritime importance. Even after it was enlarged by the building of the "New City," under the

Digitized by Google

Romans, by its wealthy and celebrated citizen, the younger Balbus, the "Double City" (ἡ Διδύμη), as it was called, was still of very moderate dimensions, not exceeding 20 stadia in circuit: and even this space was not densely peopled, since a large part of the citizens were always absent at sea. In fact, the city proper seems to have consisted merely of the public buildings and the habitations of those immediately connected with the business of the port, while the upper classes dwelt in villas outside the city, chiefly on the shore of the mainland, and on a smaller island opposite to the city, which was a very favourite resort (*Trocadero* or *S. Sebastian*). The territory of the city on the mainland was very small; its wealth being derived entirely from its commerce, as the great western emporium of the known world. Of the wealth and consequence of its citizens Strabo records it as a striking proof, that in the census taken under Augustus, the number of Equites was found to be 500, a number greater than in any town, even in Italy, except Patavium; while the citizens were second in number only to those of Rome. Their first alliance with Rome was said to have been formed through the centurion L. Marcius, in the very crisis of the war in Spain, after the deaths of the two Scipios (B. C. 212): another instance of the disaffection of the old Phoenician cities towards Carthage; a feeling all the stronger in the case of Gades, as she had only submitted to Carthage during Hamilcar's conquest of Spain after the First Punic War. The alliance was confirmed (or, as some said, first made) in the consulship of M. Lepidus and Q. Catulus, B. C. 78. (Cic. *pro Balbo*, 15; comp. Liv. xxxii. 2.) C. Julius Caesar, on his visit to the city during the Civil War in Spain, B. C. 49, conferred the *civitas* of Rome on all the citizens of Gades. (Dion Cass. xli. 24; Columella, viii. 16.) Under the empire, as settled by Augusta, Gades was a municipium, with the title of AUGUSTA URBS JULIA GADITANA, and the seat of one of the four *conventus juridici* of Baetica. (Plin. iii. 1. s. 3, iv. 22. s. 36; Inscr. *ap.* Gruter, p. 358, no. 4; Coins *ap.* Florez, *Med.* vol. ii. p. 430, vol. iii. p. 68, who contends that the city was a colony; Mionnet, vol. i. p. 12, Suppl. vol. i. p. 25; Sestini, p. 49; Eckhel, vol. i. pp. 19—22.) There are extant coins of the old Phoenician period, as well as of the Roman city; the former are, with one exception, of copper, and generally bear the head of the Tyrian Hercules (Melcarth), the tutelary deity of the city, on the obverse, and on the reverse one or two fish, with a Phoenician epigraph, in two lines, of which the upper has not been satisfactorily explained, while the lower consists of the four letters which answer to the Hebrew characters אגדר or הגדר, *Agadir* or *Hagadir*, that is, the genuine Phoenician form of the city's name, with the prosthetic breathing or article, the omission of which gives GADIR, the form recognised by the Greek and Roman writers. (Eckhel, *l. c.* and vol. iii. p. 422.) The coins of the Roman period are very remarkable for the absence of the name of the city, which occurs only on one of them, a very ancient medal, having an ear of corn, with the epigraph MUN (i. e. Municipium) on the obverse, and on the reverse GADES, with a fish. The remaining medals bear, for the most part, the insignia of Hercules, and naval symbols, with the names of the successive patrons of the city, namely, Balbus, Augustus, M. Agrippa, and his sons Caius and Lucius, and the emperor Tiberius. (Eckhel, vol. i. pp. 20—22.)

The first of these names refers to two eminent citizens of Gades, who are distinguished by the names of Major and Minor. L. Cornelius Balbus Major, who is generally surnamed Gaditanus, or, as Cicero writes jestingly, Tartesius (*ad Att.* vii. 3), served against Sertorius, first under Q. Metellus, and then under Pompey, whom he accompanied to Rome, B. C. 71, and who conferred upon him the Roman citizenship, his right to which was defended by Cicero in an extant oration. With both he lived in terms of intimacy, as well as with Crassus and Caesar, and afterwards with Octavian. He was the first native of any country out of Italy who attained to the consulship. But his nephew, L. Cornelius Balbus Minor, who, as proconsul of Africa, triumphed over the Garamantes in B. C. 19, and who attained to the dignity of Pontifex (Vell. Paterc. ii. 51, and coins), is probably the one to whom the coins refer, as he was the builder of the New City of Gades. He undertook this work when he was quaestor to Asinius Pollio in Further Spain, B. C. 43. (Dion Cass. xlviii. 32.) Balbus also constructed the harbour of Gades,— Portus Gaditanus,—on the mainland (Strab., Mela, *ll. cc.*; *Itin. Ant.* p. 408; Ptol. ii. 4: now *Puerto Real*), and the bridge already mentioned, which was so constructed as to form also an aqueduct. The Antonine Itinerary places the bridge 12 M. P. from Gades, and the harbour 14 M. P. further, on the road to Carteia. Of the other public buildings the most remarkable were the temples of the deities whom the Romans identified with Saturn and Hercules. The former was in the city itself, opposite to the little island already mentioned; the latter stood some distance S. of the city, 12 M. P. on the road to Malaca, in the Itinerary, and still further according to Strabo, who has a long discussion of a theory by which the temple was identified with the Columns of Hercules (iii. pp. 169, 170, 172, 174, 175; Plin. ii. 39. s. 100; Liv. xxi. 21; Dion Cass. xliii. 40, lxxvii. 20). The temple had a famous oracle connected with it, and was immensely rich. It was also remarkable for a spring, which rose and fell with the tide. Its site is supposed to have been on the *I. S. Petri* or *S. Pedro* (*St. Peter's Isle*), a little islet lying off the S. point of the main island of *Leon*. The city had one drawback to its unrivalled advantages as a port: the water was very bad. (Strab. iii. p. 173.) Besides the general articles of its commerce, its salt-fish was particularly esteemed. (Athen. vii. p. 315; Pollux, vi. 49; Hesych. *s. v.* Γάδειρα.) The immense wealth which its inhabitants enjoyed led naturally to luxury, and luxury to great immorality. (Juv. xi. 162; Mart. i. 61, foll., v. 78, vi. 71, xiv. 203.) The modern city of *Cadiz* stands just upon the site of Gades, that is, on the NW. point of the island of *Leon*, together with the island of *Trocadero*. (The following are the authorities for the antiquities of *Cadiz* cited by Ford, *Handbook of Spain*, p. 6: J. B. Suarez de Salazar, *Grandezas*, &c., Cadiz,

COIN OF GADES.

1610, 4to.; Geronimo de la Concepcion, *Emporio de el Orbe*, Amst. 1690, folio; Ms. de Mondejar, *Codis Phenicia*, Madrid, 1805, 3 vols. 4to.; *Historia de Cadiz*, Orosco, 1845, 4to.) [P. S.]

GADILONI'TIS. [GAZELON.]

GADITANUM FRETUM (*Straits of Gibraltar*), the well-known channel connecting the Mediterranean and Atlantic [ATLANTICUM MARE], and separating the continents of Europe and Libya, only needs a notice in a work on *ancient*, as distinguished from *general*, geography, for the sake of recording the many different names by which it was known to the Greeks and Romans. These are collected as follows by Ukert, who gives ample references to ancient authorities:—Fretum and Πορθμός, simply: Γαδειρικὸς πορθμός: Ἡρακλειος πορθμός: Πορθμὸς ὁ Πόρος κατὰ τὰς Ἡρακλείους στήλας: Στόμα καθ' Ἡρακλείους στήλας: τὸ τῆς Θαλαττης τῆς Ἀτλαντιαῆς στόμα: Fretum Gaditanum: Fretum Herculeum: Fretum Tartessium: Fretum Iberum: Fretum Hispanum: Fretum nostri maris et Oceani: Ostium Oceani: Maris Ostium: Limen Interni Maris: Herculis Via or Herma: and lastly Fretum Septem, or Septe Gaditanum, or Septe simply, from the hills called Septem Fratres on the Libyan shore. (Ukert, *Geogr. d. Griechen u. Römer*, vol. ii. pt. 1. p. 248, b.) Its extent is sufficiently marked on the E. by the hills of ABYLA and CALPE, the Pillars of Hercules, and on the S. side of its W. entrance by the promontory of AMPELUSIA; but the NW. point was variously placed [GADES], the proper position being the Pr. Junonis (*C. Trafalgar*). [P. S.]

GADITA'NUS OCEANUS. [ATLANTICUM MARE.]

GAESUS, GESSUS (Γάισος), a small river in Ionia, near Mount Mycale and the town of Priene. (Plin. v. 31; Mela, i. 17; comp. Herod. ix. 97.) Athenaeus (vii. p. 311) observes that Gaeson or Gesonis was, according to some, a lake between Priene and Miletus, which had a communication with the sea. [L. S.]

GAETARA. [ALBANIA.]

GAETU'LIA (Γαιτουλία, sometimes written Γετουλία: *Eth.* Γαιτοῦλος, and sometimes Γαιτούλιος, Gaetūlus: *Adj.* Γαιτούλιος, Gaetūlus, Gaetulicus), a country in the NW. of Libya, S. of Mauretania and Numidia: on the E. divided by hills from the GARAMANTES, who dwelt S. of Africa and Syrtica: on the W. extending to the Atlantic Ocean; and on the S to a margin of the great basin of the river NIGIR, or, according to Pliny, to the river Nigir itself, which he considers as the boundary between Africa and Aethiopia, that is, the country of the Negroes (v. 4). According to the tradition preserved by Sallust (*Jug.* 18, 19), the Gaetulians and the Libyans were the two great races which originally inhabited Africa; i. e. the NW. portion of the continent. When the N. sea-board came into the possession of various tribes from Asia (afterwards known as Numidians and Mauretanians), the Gaetulians were forced back into the region to the S. of Atlas; and they led a nomade life in the oases of the W. part of the Great Desert belt (*Sahara*), which lies between the Atlas and the basin of the Nigir, while the GARAMANTES inhabited its E. portion. Strabo extends the habitations of the Gaetulians even as far as the Syrtes (xvii. p. 829); and it may well be believed that the land on the margin of the Great Desert, though nominally a part of Numidia, was really a sort of neutral ground, into which the Gaetulians may have extended their wanderings. (Comp. Strab. xvii. p. 838.) Strabo uses Gaetulia as a sort of general name for Inner Africa, and calls the Gaetulians the greatest of the Libyan peoples. (Comp. Mela, i. 4: "Natio frequens multiplexque Gaetuli.") Up to the time of the war with Jugurtha, they were ignorant, says Sallust, of the Roman name; but in that war they served as cavalry in the army of Jugurtha, besides making predatory attacks on the Romans. (Sall. *Jug.* 80, 88, 97, 99, 103.) Sallust expressly states that a part of the Gaetulians were subject to the kings of Numidia. (*Jug.* 19.) It appears that a body of them took service under Marius, who assigned them lands; and, being placed, at the close of the war, under the authority of Hiempsal, they and their successors remained in the service of the Numidian kings until the Civil War, when we find considerable numbers of them deserting from Juba to Caesar, and employed by him as emissaries to stir up their tribes to revolt. (*Bell. Afr.* 25, 32, 35, 55, 56, 61, 93.) Under Augustus, a portion of the people, who were nominally subject to Juba, king of Mauretania, became so troublesome, that an army was sent against them under the command of Cornelius Cossus Lentulus, who obtained a triumph and the surname of Gaetulicus, A. D. 6. (Dion Cass. lv. 28; Tac. *Ann.* iv. 42, 46, vi. 30; Flor. iv. 12, 40; Juv. viii. 26.) We find some traces of the improved knowledge of the Romans respecting the country in Pliny (v. 1, 4, 8, vi. 31. s. 36, xxi. 13. s. 45, xxv. 7. s. 38, xxxv. 6. s. 26). He includes under the name of Gaetulians some tribes which had also their own specific names, such as the Autololes Gaetuli and the Gaetuli Darae (v. 1). Ptolemy includes Gaetulia under his very extensive appellation of Libya Interior, of which it is the northern part, immediately S. of the Mauretanias. (Ptol. iv. 6. § 15, viii. 13. §§ 1, 2.)

The ancients clearly recognised the distinction between the Gaetulians and the Negro peoples who dwelt S. of them. The former they justly considered as a Libyan people of the same stock as the later settlers on the N. coast who displaced them: their darker colour and fiercer disposition were ascribed to their greater proximity to the torrid zone. ("Gaetuli sub sole magis [quam Libyes] haud procul ab ardoribus," Sall. *Jug.* 18.) They resembled their northern neighbours in their nomade mode of life; and there was a theory which ascribed the origin of the nomade peoples of the Algerian Sahara (for the exact meaning of this phrase see AFRICA) to an intermixture of the Gaetulians with the later Asiatic settlers. On the other hand, the southern Gaetulians mingled their blood with their Negro neighbours, the Nigritae, thus giving origin to a people called the Melanogaetuli, or Black Gaetulians (Μελανογαιτοῦλοι, Ptol. iv. 6. § 16; Agathem. ii. 5).

The Gaetulians are described as men of a warlike disposition and savage manners, living on milk and flesh, clothed with skins (Varro, *R. R.* ii. 11. § 11), part dwelling in tents and others wandering about without settled abodes, and under no settled government (Sall. *Jug.* 18, 19, 80; Plin. v. 73. s. 94). They seem, however, like their eastern neighbours, the Garamantes, to have carried on a portion of the trade of Inner Africa; and their country furnished some highly esteemed productions of nature, especially the purple dye, which was obtained from the shell-fish of the W. coast, and gigantic asparagus. (Ath. ii. p. 62; Eustath. *ad Dion Per.* 215; Steph. B. *s. v.*; Mela, iii. 10; Plin. v. 1, vi. 3. s. 36, ix. 60, xxxv. 6. s. 26.)

Digitized by Google

The Gaetulians appear to be the chief ancient representatives of the great aboriginal people of modern Africa, who call themselves *Amazygh* or *Amazergt* (i. e. *free* or *noble*), and to whom belong the *Berbers* of M. Atlas, as well as the *Tuaricks*, who still wander over the oases of the Great Desert, and are supposed to be the lineal descendants of the Gaetuli. (Ritter, *Erdkunde*, vol. i. pp. 1034, foll.; Hornemann, *Reise*, p. 223.) The ancient Gaetulia included the S. regions of *Marocco*, as well as the W. part of the Great Desert. [P. S.]

GAGAE (Γάγαι: *Eth.* Γαγαῖος), a town on the south-east coast of Lycia, from which the *Gagates lapis* derived its name. (Plin. v. 18, xxxvi. 34; Steph. B. *s. v.*; Nicand. *Ther.* 37; Galen, vol. xii. p. 203, ed. Kühn; Hierocl. p. 683, with Wesseling's note.) Ruins at *Aladja* are regarded by Leake (*Asia Minor*, p. 185, foll.) as marking the site of the ancient Gagae, while Sir Charles Fellowes identifies the place with the modern village of *Hascooe*, where ruins stand upon and between two isolated rocks, now literally covered with walls. (*Discov. in Lycia*, p. 210.) [L. S.]

GAGANA GAGANAE, a station in Dacia, on the road from *Orsova* to the frontier of *Moldavia*, which the Peutinger Table places between Ad Pannoniam and Masculiana. The geographer of Ravenna calls it Gazana. Its position must be sought along the valley of the *Temes*. [E. B. J.]

GALACTOPHAGI. [Hippemolgi; Abii.]

GALACUM, in Britain, mentioned in the 10th Itinerary. [Galava]. [R. G. L.]

GALADRAE. [Eordaea.]

GALAESUS or GALESUS (Γαλαῖσος, Pol.), a small river of Calabria, flowing into the gulf of Tarentum, at the distance of a few miles from that city. It was famed in ancient times for the pastures on its banks, on which were fed the sheep that produced the celebrated Tarentine wool: hence its praises are sung by several of the Roman poets. (Hor. *Carm.* ii. 6. 10; Virg. *Georg.* iv. 126; Propert. ii. 34. 67; Stat. *Silv.* iii. 3; Claudian. *Prob. et Ol. Cons.* 260; Sidon. Apoll. *Carm.* 24. 59.) Polybius tells us it was often called the Eurotas, from the river of that name in Laconia (Pol. viii. 35); but the Galaesus, which was probably its indigenous name, is the only one by which it is mentioned in any other author. Both Livy and Polybius notice it on the occasion of the siege of Tarentum by Hannibal (B. C. 212), who encamped on its banks with his main army to watch and protect the blockade of the citadel. (Pol. *l. c.*; Liv. xxv. 11.) Though its name was so celebrated, the Galaesus was a very trifling stream, and there is considerable difficulty in identifying it. The name is generally given by local antiquarians, and apparently by a kind of local tradition, to a small stream of limpid water which flows into the great port of Tarentum or *Mare Piccolo*, on its N. side, now known as *Le Citrezze;* and, according to Zannoni's map, there still exists in its neighbourhood a church called *Sta. Maria di Galeso.* Both Polybius and Livy, however, give the distance of the Galaesus from Tarentum at 5 miles or 40 stadia, a statement wholly irreconcilable with the popular view; and the stream in question is moreover so small that it is impossible for an army to have encamped on its banks, its whole course being only a few hundred yards in length. Swinburne's supposition that the *Cervaro*—a much more considerable stream, flowing into the *Mare Piccolo* at its head or E. extremity—is the true Galaesus, would certainly accord better with the statement of Polybius and Livy, and at least as well with the poetical epithets of the stream, on which, however, too much stress must not be laid. (Romanelli, vol. i. p. 292, D'Aquino, *Delizie Tarentine*, with the notes of Carducci, p. 49; Swinburne, *Travels*, vol. i. pp. 227, 232; Craven, *Travels*, p. 181.) [E. H. B.]

GALA'RIA (Γαλαρία, Diod., but the other editions have Γαλερία; Γαλαρίνα, Steph. B.: *Eth.* Γαλαρῖνος, Diod.: *Gagliano*), a city of Sicily, which according to Stephanus, was founded by the Sicel chief Morges or Morgus. (Steph. B. *s. v.*) Though we may infer from this statement (which is evidently meant to connect it with the establishment of the Morgetes in Sicily) that it was a city of great antiquity, we find no mention of it in history till B. C. 345, when it was the only city that ventured to send succours to the Entellini when besieged by the Carthaginians under Hanno. But their small force, amounting to only 1000 men, was intercepted and entirely cut off. (Diod. xvi. 67.) Again, in B. C. 311, Galaria was occupied by the Syracusan exiles under Deinocrates, who were, however, soon after defeated and driven out by the generals of Agathocles. (Id. xix. 104.) No subsequent notice of it is found in history; and as its name does not occur among the Sicilian towns enumerated by Cicero, Pliny, or Ptolemy, it would seem to have ceased to exist under the Roman dominion. It would indeed be natural to suspect that the Galatini of Pliny (iii. 8. 14), whom he enumerates among the "populi stipendiarii" of the interior of Sicily, were identical with the Galarini of Diodorus, but that there seems to be some reason to admit the existence of a separate town of the name of Galata. We find the name of that town apparently still preserved in the village of *Galati*, E. of *Militello*, and about 10 miles from the N. coast of the island; while that of Galaria is supposed by Cluverius and Sicilian topographers to be retained by *Gagliano*, on the opposite side of the *Caronia* mountains, and about 6 miles N. of the ancient Agyrium. (Cluver. *Sicil.* pp. 350, 351; Amico, *Lex. Topog. Sic. s. v. Galaria.*) But it does not appear that ancient remains exist at either locality, and the evidence of name alone is inconclusive.

There is nothing in Diodorus to lead us to suppose that Galaria was a Greek city, and the contrary seems to be implied by Stephanus; but there exists a coin of very early date, and of pure Greek style, which bears the inscription ΓΑΛΑ., and must certainly be referred to this city. On the reverse it has a sitting figure of Zeus, with the epithet ΣΟΤΕΡ in ancient characters. (It is figured by T. Combe, *Num. Mus. Brit.* pl. 4. fig. 6.) [E. H. B.]

GALATA. [Galaria.]

GALA'TIA (Γαλατία, Γαλατική, Gallograecia). The history of the establishment of this province is connected with the emigration of Gallic nations to the East. This emigration is an obscure subject, but we may collect enough from the extant authorities to establish the main facts.

Strabo (p. 187) says that the Tectosages, who occupied part of Gallia adjacent to the Pyrenees and extended along a portion of the north side of the Cevennes, were once a powerful people, and had a large population. Domestic dissension drove some of them from home, who were joined by others from various tribes; and these were a part of the Gauls who occupied Phrygia, bordering on Cappadocia and the Paphlagonians. As a proof of this, he says

he fact of the Galatians about the city Ancyra being named Tectosages. There were two other Gallic tribes in Galatia, named Trocmi and Tolistobogii; and he infers that they also came from Gallia, because they were akin (*σύμφυλον*) to the Tectosages; but he cannot say what parts the Trocmi and Tolistobogii came from, for he had not heard of any Trocmi or Tolistobogii in his time who dwelt either north of the Alps, or in the Alps, or south of the Alps. Justin (xxiv. 4), after mentioning the Gallic invaders of Italy who took Rome, says that other adventurers passed into Illyricum and settled in Pannonia. They subdued the Pannonians, and for many years carried on war with the neighbouring nations. The Galli, then, according to these authorities, spread along the east side of the Adriatic, and along the valley of the Danube. When Alexander (B. C. 335) made his expedition over the Haemus to the banks of the Danube, he had an interview with some Celtae, who lived about the Adriatic. This is on the authority of Ptolemaeus, the son of Lagus. (Strab. p. 301.) Arrian (*Anab.* i. 4), who also used the work of Ptolemaeus, speaks of the Celtae on the Ionian gulf sending an embassy to Alexander when he was near the Danube. This appears to be the first time that the Hellenic and the Gallic nation saw one another beyond the limits of Gallia.

The Galli seem to have been established in the neighbourhood of Macedonia during the troublesome times that followed Alexander's death, or probably still earlier. At the close of the reign of Ptolemaeus in Macedonia, who is named Ceraunus, a band of Galli, under a leader Belgius or Bolgius, invaded his kingdom. The king despised the invaders, because they offered to retire for a sum of money; but his army was totally defeated by them, and he was taken prisoner. The barbarians cut off the king's head, and carried it about on a spear to terrify their enemies (B. C. 280). The Macedonians shut themselves up in their cities, and made no resistance; but when all hope seemed lost, Sosthenes, a Macedonian noble, collected a force, and for the time saved his country from further ravage. (Justin, xxiv.; Pausan. i. 16. § 2, x. 19. § 7.) But another Gallic chieftain, named Brennus, — probably a title of rank, and not a name, — entered Macedonia with a large force, defeated Sosthenes, and ravaged the country. (Justin, xxiv. 6.) Either in the same campaign, or perhaps in another (B. C. 279), Brennus led the Galli to plunder Delphi, for the fame of this temple's wealth excited his cupidity. The Galli were an immense force, under several commanders; but they could not agree, and a large division under Leonorius and Lutarius, — as the Greeks and Romans write the names, — separated from Brennus, and, taking their way through Thrace (Liv. xxxviii. 16), reached Byzantium.

Brennus, with several commanders, one of whom the Greeks named Acichorius, led his savage troops through Thessaly to the pass of Thermopylae, where the Greeks under Leonidas had tried to stop the Persians about 200 years before. The Greeks, who had been weakened and disunited since the establishment of the Macedonian supremacy, were roused by a danger that threatened their very existence. A large force from the states north of the Isthmus, and some troops from Macedonia and Asia, reached Thermopylae while the Galli were still in Thessaly, and a detachment was sent forward to destroy the bridges over the Sperchius, and to dispute the passage of the river. The Gaul, who had the talents of a general, seeing the enemy opposite to him and a rapid river between, made no attempt to cross in that part, but he got over a large body of troops by night near the lower part of the river, and prepared to force the defile of Thermopylae. He was driven back in disorder and with great loss. The Athenians distinguished themselves most of all the Greeks on this day.

The Gallic chief now sent off a division to ravage Aetolia, in order to detach from the confederate army of the Greeks the Aetolians, who had left their homes in a numerous body, to repel the invaders at Thermopylae. The barbarians under Combutis and Orestorios (the second seems to be a Greek name) committed dreadful devastation in Aetolia, though they were at last compelled to retreat with great loss. (Pausan. x. 22.) Less than half of them returned to the Gallic camp at Thermopylae. Brennus at last made his way to Delphi, with the assistance of the Aenianes and Heracleotae, through the country of the Aenianes, by the very pass by which Hydarnes the Persian led his troops in the invasion of Xerxes. (Herod. vii. 215; Pausan. x. 22. § 8.) The story of the defeat of Brennus at Delphi is told with many miraculous circumstances; but it seems that the weather greatly helped the Greeks in defeating the barbarians, who made their retreat with difficulty, and amidst dreadful sufferings. Only a few out of so many got back to their camp at Heracleia, where Brennus put an end to his life. Pausanias says that none of the Galli escaped. Justin contradicts himself, for he says in one place (xxiv. 8) that not one escaped, but in another place (xxxii. 3), following, as we may suppose, a different authority, he says that some of the Galli made their way into Asia, and some into Thrace. He also adds that the Tectosages returned to their city Tolosa (*Toulouse*), carrying with them the gold and silver that they had got in their marauding expeditions. Strabo (p. 188) mentions the tradition of the Tectosages returning with their booty to Tolosa, but he does not believe the story. It is possible that some of these Galli did effect a retreat; for the Galli Scordisci, who were settled at the confluence of the Save and the Danube, were said to be a remnant of them (Justin, xxxii. 3; Strab. p. 293, 313), and to be mingled with Thracians and Illyrians. Caesar was told that Volcae Tectosages once settled in Germany about the Hercynian forest (*Bell. Gall.* vi. 24), and continued to maintain themselves there to his time. But instead of concluding that a remnant of the Tectosages returned from the expedition of Brennus, and settled in the basin of the Danube, it seems more likely that their settlements east of the Rhine were made by emigration from Gallia; and it may be that the Tectosages in the army of Brennus did not come direct from Gallia, but from some of the settlements already made beyond the limits of Gallia. Polybius says that some Galli under Comontorius, having escaped the danger at Delphi, reached the Hellespont, and settled in the neighbourhood of Byzantium. The Byzantines paid them a heavy tribute, until the Thracians, who had been subdued by the Gallic invaders, by a change of good fortune succeeded in destroying them. (Polyb. iv. 46.)

Leonorius and Lutarius escaped the misfortunes of Brennus by having taken a different road, as already observed, and through a less difficult country. Livy (xxxviii. 16) does not mention the arrival of Comontorius at Byzantium. Leonorius and Lutarius

Digitized by Google

levied contributions along the coast of the Propontis, and having seized Lysimachia by treachery, they got possession of all the Thracian Chersonesus. They saw the tempting coast of Asia separated from them by a narrow sea, and they applied to Antipater, the Macedonian, who had then the command of these coasts, to supply them with ships. While waiting on the shore of the Hellespont, the chieftains quarrelled, and Leonorius with the larger part of the Galli returned to Byzantium. Lutarius seized two decked vessels and three boats, which Antipater had sent to the Hellespont, nominally to negotiate with the Gaul, but in fact to watch him. In a few days Lutarius conveyed all his men over the straits. Shortly after, Nicomedes I., king of Bithynia, carried Leonorius and his men over the Bosporus, to help him in his war against his brother Zybœtes. The terms on which the Galli were to serve him were fixed before they left Europe. The Gallic chief promised every thing: he only wanted to get across the strait. (Memnon, *ap. Phot.* c. 20). This disgraceful bargain, which brought so much misery on Asia, was made B. C. 278. There were seventeen chieftains in the Gallic army, of whom Leonorius and Lutarius were the chief (Memnon); from which we may collect that the two principal chieftains were reconciled after they reached Asia, which Livy expressly states (xxxviii. 16). Nicomedes, with the help of the Galli, had the superiority over his brother, and secured the kingdom of Bithynia. During this war, in which it seems that many of the Bithynians perished, the Galli divided among themselves the booty, and probably they had the women, for it is not said that they brought any with them. (Memnon, *ap. Phot.* c. 20.) Justin states (xxv. 2) that Nicomedes gave the Galli part of his conquests, and that they thus got the country called Gallograecia. But they were not permanently settled in Galatia so early, if we follow Livy (xxxviii. 16) and other authorities. After seating Nicomedes on his throne, they set out on a marauding expedition, 20,000 in number, of whom not more than half were armed. All the authorities agree in making three divisions of these Galli, Tolistobogii or Tolistoboii, Trocmi or Trogmi, and Tectosages or Tectosagi. They struck such terror into the people west and north of the Taurus, that all submitted to their demands. They divided the country among them. The Trocmi had the shores of the Hellespont on which to levy contributions; the Tolistoboii took Aeolis and Ionia; and the Tectosages, the central parts of Asia. Their fixed abode, however, says Livy, was about the Halys; but it is hardly consistent to speak of their having yet a settled habitation, when they were rambling about Asia. The Ilium of the historical time was one of the places that the Galli occupied in the Troad, but they soon left it, as Hegesianax says (quoted by Strabo, p. 594), because it was unwalled. It is quite uncertain to what time this event must be referred. No record has been left of the miseries inflicted by the barbarians on the unwarlike Greeks of Western Asia. A few lines in the Anthologia tell us that Miletus was one of the cities that suffered.

The Galli at last found an enemy who resisted them, Antiochus Soter, king of Syria. Lucian (*Zeuxis*, vol. i. p. 838, ed. Hemst.) tells circumstantially, whether truly it is hard to say, the story of this Antiochus fighting a desperate battle with the Galli and defeating them. Indeed, it was owing to this victory that Antiochus took or had the title of Soter, or Saviour (Appian, *Syriac.* c. 65) an appellation which shows that his victory was thought no small affair. It is said, however, by several authorities, that this Antiochus fell in battle against the Galli, B.C. 261; but this must have been a second battle subsequent to his victory, if it is true that he gained his name of Soter from his success against these barbarians. The kings of the East in their wars with one another often employed the Asiatic Galli. (Justin, xxv. 2). The second Ptolemaeus, king of Egypt, had some of them in his pay, and they formed a design to seize on the country and were all cut off by a stratagem. In the dispute between the two Syrian kings, Seleucus Callinicus and his brother Antiochus Hierax, Antiochus employed Gallic mercenaries, who, after gaining him a victory, compelled him to ransom himself, and to form an alliance with them. (Justin, xxvii. 2.) And these were Galli in the battle of Raphia between Antiochus Magnus and Ptolemaeus Philopator, B.C. 217.

Attalus, the ruler of the petty state of Pergamus, was the first of the Greek kings who effectually checked the licence of the Galli. He defeated them in a great battle, and thereupon assumed the title of king. (Strab. p. 624; Polyb. xviii. 24; Liv. xxxiii. 21.) The reign of Attalus was from B.C. 241 to B. C. 197. It was the glory of Attalus that he was the first prince to refuse to pay tribute to the Galli, and that he confined them within the limits of that part of Asia which is called Galatia. (Plin. i. 8. § 1.)

This invasion of Asia by the Galli, and the victory of Attalus over them, were foretold in the prophecies of Phaennis, a full generation before the events happened. (Paus. x. 15. § 2.) It must have been a great necessity which compelled Attalus in his war with Achaeus, to invite a body of Tectosages (the text of Polybius, v. 77, has Αἰγοσαγῶν) to cross the Hellespont to assist him. The Galli came with women and children. Whether this was a fresh body of emigrants to the East, or a part of those who had settled in Thrace, as mentioned before, is not stated. Attalus employed these mercenaries against the cities of Aeolis, which had joined Achaeus by compulsion. While Attalus was encamped at the Macistus an eclipse of the moon took place, which the Galli took to be an unfavourable sign; and they were also wearied of moving about with their wives and children, who followed in the carts. Accordingly they refused to march on. Attalus, being afraid of the treachery of his hirelings, and, unlike the king of Egypt, too scrupulous to destroy the people whom he had himself invited into Asia, left them on the Hellespont, with fair promises. The consequence was what might have been foreseen. The Galli began to plunder the cities along the Hellespont, and nothing is said of Attalus checking them. They attacked Ilium, the siege of which was raised by the people of Alexandria in Troas, and the Galli were driven out of the Troas. The barbarians then seized Arisba near Abydus, which they made their head-quarters, and from thence annoyed the neighbouring cities, until Prusias I., king of Bithynia, overcame them in a regular fight, B. C. 216. Nearly all their children and women were massacred in their fortified place; and the soldiers of Prusias had the monopoly for their booty. Thus Prusias, says the historian (Polyb. v. 111), released the Hellespontine cities from great alarm and danger; and he left a noble warning to posterity that barbarians should not rashly pass over from Europe into Asia.

The three tribes, when permanently settled, occupied part of the country between the Sangarius and the Halys. Memnon incorrectly says that the chief city of the Trocmi was Ancyra; of the Tolistoboii, Pessinus or Tavium; and of the Tectosages, Pessinus. (Memnon, *ap. Phot.* c. 20.) The complete reduction of the Asiatic Galli was reserved for their hereditary enemies the Romans. Though they had now a country of their own, they still plundered their neighbours, and were a formidable power to the time of the wars of Antiochus the Great with the Romans. They fought on the side of Antiochus in the great battle at Magnesia ad Sipylum, in which the Syrian king was defeated (B. C. 190); and the consul Cn. Manlius, in B. C. 189, made this a pretext for invading their country. But his real grounds were better than his pretext. He saw that the Romans could not secure their power in Western Asia, if the Galli were not subdued. He led his troops from Ephesus by a circuitous route into Gallograecia, as Livy calls it (xxxviii. 12). The consul, after entering Phrygia, passed by Synnada, Beudos vetus, Anabura, and the sources of the Alander to Abbassus, which was on the borders of the Tolistoboii, where he halted and encouraged his men. He then marched through the woodless tract [AXYLOS], crossed the Sangarius, and reached Gordium. He was accompanied in this expedition by Attalus, the brother of Eumenes, king of Pergamum, who was now at Rome.

The Galli had enemies in their own country, the native Phrygians. The priests of the Mater Magna from Pessinus met the consul with sacerdotal pomp, and declared that the goddess had promised the Romans victory. The Galli had moved off with their women, children, flocks, and carts to the mountains. The Tolistoboii occupied a strong place on the range of Olympus; the Tectosages chose another mountainous spot named Magaba; and the Trocmi, leaving their wives and children to the care of the Tectosages, armed to help the Tolistoboii, against whom the consul was marching. Manlius, who was both bold and cautious, looked at the ground well before he attacked such desperate fighters. He had a great superiority in all munitions of war, and chiefly in light troops, who could annoy the enemy at a distance. The entrenchment of the Galli was stormed and the ground was covered with their dead bodies, whether 40,000 or a smaller number the authorities do not agree, and it is not material. An immense number of men, women, and children were made prisoners. (Liv. xxxviii. 18—23; Florus, ii. 11.)

The consul now marched to Ancyra to attack the Tectosages, who were 10 miles from that town. While the Galli were amusing him with negotiations, a event happened, for which there is better evidence than for most romantic stories; and it gives us some insight into the character of these Galli. Chiomara, the wife of a Gallic prince, Ortiagon, was among the prisoners, and she was the captive of a Roman centurion. The man not being able to corrupt her chastity, used violence. But lust was not his only passion. He was greedy of money; and he accepted the offer of a large ransom. According to agreement, he went alone with the woman to the banks of a river, on the opposite side of which the Gallic friends of Chiomara were ready with the money. The Galli crossed the river, gave the money, and received the woman; and while the greedy Roman was counting it, one of them, on a signal given by Chiomara in their own language, cut off the centurion's head. She wrapped up the bloody head in her clothes, and on meeting her husband, threw it down before him. She told her story, and her husband exclaimed, "My wife, fidelity is a glorious thing." "True," she replied, "but still more glorious that there should be only one man living who has known me." The historian Polybius says that he talked with Chiomara at Sardis, and he was amazed at her noble spirit and her good sense. We may perhaps infer that Chiomara had learned the Greek language in Galatia. (Liv. xxxviii. 24; Plut. *Moral.* ii. p. 58, Wytt.; Valer. Max. vi. 1. § 2.)

The treachery of the Tectosages, according to the Roman historian, stopped the negotiations. They only wanted to get time to send their women and children, and moveables, beyond the Halys; and they made an attempt to seize the Roman consul. Manlius carried the strong position of the Tectosages as he had done that of the Tolistoboii, and this victory ended the campaign. As the cold weather was coming on, the consul retired after giving the Galli orders to see him at Ephesus. In the winter there came to Manlius, who was now proconsul, the year of his consulship having expired, embassies from all the states west of the Taurus. They brought him golden crowns, and their thanks for delivering them from the incursions of the Galli. The Gallic envoys were told that they must wait the arrival of king Eumenes, who was still absent, before their affairs could be settled. It was on the banks of the Hellespont, a country which the Galli well knew, that the Roman proconsul dictated his terms to the Gallic chiefs, who had been summoned there: they were to keep the peace with Eumenes, to give up wandering about, and to confine themselves within their own limits. (Liv. xxxviii. 40.) The humiliation of these terrible invaders, who for a century had kept Western Asia in alarm, made the Roman name known in the East, and, even more than their victory over Antiochus the Great, contributed to their future dominion in Asia. Judas Maccabeus, the heroic leader of the Jews, heard of the fame of the Romans: "It was told him also of their wars and noble acts which they had done among the Galatians, and how they had conquered them, and brought them under tribute" (Macc. i. 8. v. 2). The commentators suppose that the Galli of Europe are meant here, and the context is consistent with this explanation; but the Jews could not be ignorant of the defeat of the Asiatic Galli, which so soon followed that of Antiochus, "the great king of Asia" (Macc. i. 8. v. 6); and we must conclude that the Galatians of this chapter included the Galatians of Asia, whom the Jews had seen or heard of in the armies of the Egyptian and Syrian kings, and whose horrible barbarities were known through all the East. Manlius did not obtain a triumph at Rome for his great victories without opposition from the majority of the ten Roman legati who had attended him to assist in the settlement of Asia after the defeat of Antiochus. They objected that he had no commission from the senate or the Roman people to carry on war with the Galli, and they meanly attempted to disparage his generalship and the enemies whom he had subdued. Manlius defended himself in a vigorous speech, of which Livy (xxxviii. 47) has given the substance, and he got a triumph. In the procession he displayed gold and silver crowns of great value, and an immense amount of coined money, probably the gift of the grateful Asiatic cities, for Manlius had maintained strict discipline, and he is not accused of plundering. Gallic arms and Gallic spoils were carried

Digitized by Google

in chariots, for it was called a Gallic triumph; and fifty-two Gallic chieftains walked in front of the triumphal car. (Liv. xxxix. 6.) Whether the Galli would have ever established a Gallic kingdom in Asia, is doubtful, for the nation, though it has carried its arms into all parts of the world, has never yet been able to subsist as a nation out of the limits of Transalpine Gallia. But Manlius did not give these Galli an opportunity of trying the experiment; and he did a good work in stopping the career of these merciless plunderers.

Though the Galli no longer ravaged Asia, they were still troublesome to Eumenes, king of Pergamum, whose family they had no reason for liking. In B. C. 167 Attalus, the brother of Eumenes, was sent to Rome to complain of a Gallic rising (tumultus). The Romans sent commissioners into Asia to expostulate with the Galli; but P. Licinius, who had an interview with a Gallic chieftain, Solovettius by name, at Synnada, reported that his remonstrances only increased the insolence of the Gaul. (Liv. xlv. 19. 34; Polyb. xxx. 1.) Livy remarks that it seemed strange, when the words of Roman commissioners had so much weight with powerful kings like Antiochus and Ptolemaeus, that they had no weight with the Galli. The Romans had their reasons, which may be easily conjectured, for leaving Eumenes to deal with the Galli; and it seems that he was successful. (Diod. *Excerpt.* xxxi.) The fragments of Polybius show that the Romans were jealous of Eumenes, who had great talents, and they did not choose that he should reduce the Galli under his dominion. One passage (xxxi. 2) states that certain ambassadors of the Galli, who came to Rome, were told that they should be independent, if they would stay at home, and not move with any force beyond their own boundaries.

In the wars of Mithridates against the Romans, the Galli were again in arms, both on the side of the king and of the Romans. There were Asiatic Galli in the great army which Mithridates sent into Greece under the command of Archelaus. This army was defeated by L. Sulla at Chaeroneia (B. C. 86). Mithridates, fearing that he should be deserted by the Galli if Sulla should come into Asia, murdered all the Gallic tetrarchs, both those who were about him as friends, and those who had not joined him. He murdered also their women and children. Some of the Galli were killed at a feast to which the king invited them, and the rest in various ways (Appian, *Mithrid.* c. 46); three only of the chiefs escaped. Mithridates seized all the property of the men whom he had murdered, put garrisons in the towns, and set over them as governor Eumachus, probably a Greek. He could not, however keep Galatia, but he kept the money that he had got. The Galli served Cn. Pompeius in the subsequent wars against Mithridates, and Pompeius rewarded the tetrarchs by securing them in their Galatian dominions. (Appian, *Syriac.* c. 50, *Mithrid.* c. 114.) One of them was Deiotarus, who had done good service in the war by defeating Eumachus. (Appian, *Mithrid.* c. 75; Liv. *Epit.* 94.) Mithridates kept some Galli about him to the last; and, in the hour of his extreme need, one of them named Bitoctus, a genuine Gallic name, did the king the last service that he could, by killing him at his earnest request, B. C. 63. (Appian, *Mithrid.* c. 111; Liv. *Epit.* 102.) Pompeius, in settling the affairs of Galatia, extended the Gallic limits, for he gave Mithridatium, a town in the former kingdom of Pontus, to a Gallic chief named Bogodiatorus, whose name, with a slight variation, appears on a silver coin. (Strab. p. 567.) Pompeius gave to Deiotarus part of Gaulonitis in Pontus, an excellent sheep country, and the parts about Pharnacia and the Trapezusia, as far as Colchis and the Less Armenia, of all which countries Pompeius made him king; and Deiotarus kept also his paternal tetrarchy of the Tolistobii. (Strab. p. 547.) Galatia and its chieftains were now under Roman protection, and Deiotarus was involved in all the troubles that followed the wars of Caesar and Pompeius. He was with Pompeius at the battle of Pharsalia (B. C. 48), and escaped with him. Cicero, in an extant oration, pleaded before Caesar at Rome the cause of Deiotarus, who was charged with a treacherous design against Caesar's life when Caesar was in Galatia. After all his reverses Deiotarus died a king; and was succeeded by his son Deiotarus, who went to Actium on the side of Antonius, but had the Gallic prudence to go over to Octavius before the battle, in company with Amyntas (B. C. 31). Amyntas was one of the tributary Asiatic kings that M. Antonius set up (B. C. 39). He had Pisidia first, and in B. C. 36 he received from the same king-maker Galatia, with a part of Lycaonia and Pamphylia (Dion Cas. xlix. 32), and he was confirmed in these possessions by Augustus, B. C. 31 (Dion, li. 2). He died B. C. 25, having held besides Galatia, Lycaonia, and Isauria, the south-east and east part of Phrygia, Pisidia, and Cilicia Tracheia (Strab. pp. 568, 569, 571, 577, 671.) Amyntas was one of the great flock-masters of Asia Minor. He had above 300 flocks on the high, waterless table-lands of Lycaonia. Plutarch (*Ant.* c. 61) calls Amyntas king of the Lycaonians and Galatians at the time of the battle of Actium; and he also calls Deiotarus a king. This is not inconsistent with other authorities, if we suppose that Deiotarus had his father's kingdom that was beyond the limits of Galatia, and that Amyntas had Galatia or a great part of it, and the title of king of the Galatians. On the death of Amyntas, Augustus made a Roman province of Galatia, Lycaonia, Isauria, East and North Phrygia, and Pamphylia. The extent of the province of Galatia to the south is expressed by Pliny when he says that Galatia reaches both to the Cabalia of Pamphylia and the Milyes, who are about Buris and the Cyllanticus and Orcandicus tract of Pisidia (*Hist. Nat.* v. 32). But the Galatia of Ptolemy is still more extensive (v. 3), being bounded on the west by Bithynia and part of Phrygia, on the south by Pamphylia, and on the east by a part of Cappadocia; it thus extended from the Euxine to the Taurus. The sea-coast of Ptolemy's Galatia commences at Cytorus, which is in Bithynia, and extends to the mouth of the Halys and to Amisus. Sinope is within these limits. The three Gallic tribes and their three several cities assumed, under Augustus, the names Σεβαστηνοί and Σεβαστή: the people of Tectosages were named Σεβαστηνοὶ Τολιστοβώγιοι: those of Ancyra, Σεβαστηνοὶ Τεκτοσάγες: and those of Tavium, Σεβαστηνοὶ Τρόκμοι. The first Roman governor of this Galatia was M. Lollius, who governed it as the legatus of the emperor, with the title of pro-praetor. This province of Galatia is supposed to have continued in this form to the time of Constantine. The metropolis of the province was Ancyra; and Termessus and Sagalassus were two towns.

The Romans established in Galatia Proper the colony of Germe, which is known both from Pliny

Digitized by Google

and its coins. Ptolemy also has a place called Claudiopolis in the country of the Trocmi.

The country properly called Galatia lay south of the range of Olympus. The limits can only be approximated to by the enumeration of the towns. The Tolistoboii, the most western tribe, made Pessinus, near the left bank of the Sangarius, their chief town. There were also in their territory, Tricomia, the Roman colony Germe, and Vindia; Abrostola, Amorium on the road to Laodicea Catacecaumene; and a place Tolosochorion, a compound of a Gallic and a Greek word, the first part of which looks like the name Tolosa. The Tolistoboii probably occupied the principal part of the country between the Alander, a branch of the Sangarius, and the Sangarius up to its junction with the Alander. They bordered on Bithynia and Phrygia Epictetus. Pliny (v. 32), besides the Tolistoboii, mentions the Gallic tribes Voturi and Ambitui as settled in this part. They were probably the names of tetrarchies. The Tectosages, who were between the Sangarius and Halys, had the old town of Ancyra for their chief place. [Ancyra.] Pliny mentions the Teutobodiaci as a Gallic tribe, occupying this country with the Tectosages. There were few places in the territory of the Tectosages, and they are insignificant. There were several roads from Ancyra, but the names in the Itineraries are apparently so corrupted, that it is difficult to say if we can discover a Gallic element in them. Ptolemy has a list of places among the Tectosages, and among them Corbeus [Corbeus]: Aspona [Aspona] is mentioned by Ammianus. The Trocmi seem to have been partly on the east side of the Halys: they bordered on Pontus and Cappadocia; and Strabo says that their country was the most fertile part of Galatia. Their chief town was Tavia or Tavium. There were also in this territory Mithridatium, already mentioned, and Danala, where Cn. Pompeius and L. Lucullus had an interview, before Lucullus gave up the command to Pompeius in the Mithridatic War. Ptolemy has a list of unknown Trocmic towns.

One undoubted Gallic name appears in the Itineraries on the road from Ancyra to Tavium, Ecobriga, a place at the ford or bridge of some river.

When the Galli settled in the country which was called from them Galatia, or Gallograecia, there were Phrygians in it, Greeks, Paphlagonians, and probably some Cappadocians. The Paphlagonians were on the north of Galatia. The Phrygians were the most numerous race, and occupied the west and centre of Galatia. The Greeks probably were not in any great numbers in Galatia till after the time of Alexander; but they must have been numerous at the time of the Gallic occupation, for their language became the common language of the country. The three Gallic tribes had each their territory, as we have seen; and each tribe was divided into four divisions, which were called tetrarchiae. Plutarch (*de Virt. Mul.* vol. ii. Wytt.) mentions the Tosiopi as forming a tetrarchy, that is, one of the subdivisions of the tribes. Each tetrarchia had its tetrarch, and one judge and one general, both subordinate to the tetrarch; and two lieutenant-generals. The council of the twelve tetrarchs was a body of 300 men, who met at Drynaemetum. [Drynaemetum.] The council were judges in cases of murder; but the tetrarchs and the judges heard all other cases. "This," says Strabo (p. 567), "was the old constitution; but in my time the power had come into the hands of three rulers, then two, and finally one, Deiotarus, who was succeeded by Amyntas." He seems to mean the elder Deiotarus, and to take no notice of the younger, whose Galatian kingship is a doubtful matter.

The Galli probably at first, after their fashion, treated the Phrygian worship with contempt. At any rate we have seen that at the time of Manlius' invasion the Phrygian hierarchy turned against the Galli. The Romans and the Phrygians were already acquainted, for in the Second Punic War the Romans sent five commissioners to Attalus, king of Pergamus, who politely conducted them to Pessinus in Phrygia, where they got what they wanted,—a large stone. But this stone was the Mother of the Gods, and the deliverance of Italy depended on her being brought to Rome. (Liv. xxix. 10, &c.) We are not told how the Phrygians were persuaded to part with such a treasure; but the transaction, which was a friendly one, was well adapted to make them favour the Romans, especially as the Galli were intruders. Caesar says of the European Galli (*B. G.* vi. 15), "Natio est omnis Gallorum admodum dedita religionibus"; and the Asiatic Galli got a taste for the Phrygian worship, as the temples were rich, and priesthood was profitable. Cicero (*pro Sestio*, c. 26) mentions one Brogitarus, who was the chief priest of the Mother of the Gods at Pessinus; and he had a good title to the place, for he bought it: also another Gaul, Dyteutus, in the time of Augustus obtained the valuable place of chief priest at Comana [Comana]. We also read of Camma, a priestess of Artemis, a deity held in great veneration by the Galli. Camma is one of Plutarch's noble women (*de Virt. Mul.*) of whom he tells the tragic story of her fidelity to her husband, and her vengeance on his murderer. The nation had its wonderful women in Asia as it has had in Europe. The Galli, the richer at least, adopted with Phrygian and Greek superstitions the language of the Greeks, even before the time of Augustus. Deiotarus had a Greek wife whose name was Stratonice, and the evidence of coins and inscriptions fully establishes the fact of the Galli being Hellenised; which indeed we might infer from their name of Gallograeci, if there were no other evidence. Yet we have the testimony of Hieronymus, who visited Galatia in the fourth century of our aera, in his preface to his Commentary on the Epistle to the Galatians, that the Galli still kept their own language, which was almost the same as the language of the Treviri or the people of Trèves; and Hieronymus, who was a good linguist, and had lived at Trèves, was a competent judge of this. Thierry (*Histoire des Gaulois*), who cites this passage of Hieronymus, misinterprets it however, when he infers from it that the Gallograeci did not use the Greek language. He also derives from this passage a confirmation of his hypothesis that the Tolistoboii and the Volcae Tectosages of Narbonensis were Kymri, and that the Volcae Tectosages were Belgae, and came to the south of Gallia from the north.

The Apostle Paul visited Galatia after it had been made a Roman province, and established churches there. (*Ep. to the Galatians*, i. 2.) His first visit is mentioned in the Acts of the Apostles, xvi. 6; and his second, in xviii. 23. In his epistle to the Galatians he does not speak of more than one visit, from which some commentators derive very unfairly the conclusion that he wrote the epistle in the short interval between the two visits. This inquiry, however, does not belong here. It is generally assumed that St. Paul in his epistle addresses the

Digitized by Google

Galli or Gallograeci; but there is nothing in the epistle from which this can be inferred. In the Acts of the Apostles, the term Galatia is indeed used in its limited and proper sense, and not in the sense of a Roman provincial division; for Lycaonia is also mentioned in the Acts, and Pisidia. There is no doubt, then, that the Epistle to the Galatians is addressed to the inhabitants of Galatia Proper; but to the Greek inhabitants of Galatia and perhaps the Hellenised Galli, who were the wealthier and better instructed part of the Galli. For this Gallic constitution of Galatia was evidently an aristocratic constitution, like the political systems of Gallia Transalpina, in which the common sort went for nothing, "paene servorum loco habentur" (*B. G.* vi. 13). The bulk of the Galli of Asia, the herdsmen, shepherds, and tillers of the land, probably knew no language except Gallic; and it is clear that the epistle was not addressed to such people.

The student may read with profit Amedée Thierry's *Histoire des Gaulois*, if he will always turn to the ancient authorities, which will set the author right, when he gets wrong. [G. L.]

COIN OF GALATIA.

GALAVA, in Britain, mentioned in the 10th Itinerary, which runs —

Iter a Clanoventa Mediolano M. P. cl. (*sic*).

Galava	-	M. P.	xviii.
Alone	-	„	xii.
Galacum	-	„	xviii.
Bremetonaci	-	„	xxvii.
Coccio	-	„	xx.
Manconio	-	„	xvii.
Condate	-	„	xviii.
Mediolano	-	„	xviii.

For the elements of uncertainty in this Itinerary see CLANOVENTUM. In the Monumenta Historica Britannica *Galacum*=*Appleby*, *Whallop Castle*, or *Kendal*, and *Galava*=either *Old Town* or *Great Keswick*. [R. G. L.]

GALEPSUS (Γαληψός, Herod. vii. 122), a town on the N. coast of the peninsula of Sithonia, which Colonel Leake (*Trav. in North. Greece*, vol. iii. p. 155) takes to have been the same place afterwards called PHYSCELLA (Plin. iv. 10; Pomp. Mela, ii. 3. § 1), a distinction which was required, as there was another Galepsus at no great distance.

2. A colony of Thasos, on the coast of Thrace, which was taken by Brasidas after the capture of Amphipolis (Thuc. iv. 107), and retaken by Cleon in the ensuing year. (Thuc. v. 6.)

Livy (xliv. 45) relates that Perseus, when flying from the Romans, after the defeat at Pydna, sailed from the mouth of the Strymon to Galepsus on the first day, and on the second to Samothrace, which renders it probable that it was one of the most remarkable harbours of the intervening coast, which data can only be reconciled at the harbour of *Neftér*, which is situated 2 hours to the S. of *Prárista*, just within the Cape forming the W. entrance of the Gulf of *Kavála*, where still remain the ruins of a Greek city, now known by the names of *Pórgos*, or *Nefterópoli*, or *Dhefteripoli*. (Leake, *Trav. in North. Greece*, vol. iii. p. 178.) [E. B. J.]

GALIBA (Γάλιβα ἄκρα, Ptol. vii. 4. § 3), a promontory on the northern coast of the ancient Taprobane, or *Ceylon*, at no great distance, as it would seem, from *Cory Island*. The name is also connected with those of certain mountains in the immediate neighbourhood of the promontory, called Γάλιβα ὄρη (Ptol. vii. 4. § 3), and the inhabitants of which were called Galibi (Γάλιβοι, Ptol. vii. 4. § 9). From the Galibi Montes, according to Ptolemy (vii. 4. § 8), flowed down two rivers to the sea, the Pharis and the Ganges,—a statement which, as regards the latter river, is erroneous. In the plains at the foot of these mountains Ptolemy states that there were elephants in his day, as there are now. [V.]

GALIBI. [GALIBA.]

GALILAEA. [PALAESTINA.]

GALINDAE (Γαλίνδαι), mentioned by Ptolemy (iii. 5. § 21) in connection with the Venedae, Sudini and Stavani. There can be but little hesitation in identifying the names (as Zeuss has done) with that of the Galinditae of *Dusberg* and the Prussian antiquarians; whose locality was the tract called Galindia, Galandia, Galendia, Golentz, &c. in East Prussia on the Spirding Lakes, and in contact with that of the *Sudo*-witae the equivalents of the *Sudini*. Galindia was one of the eleven divisions of Prussia, that is of Prussia before it became German; its language being that of the *Old* Prussians, a branch of the Lithuanic. The name of the Galindae is said to occur on the coin of the emperor Volusianus (A. D. 253) which has been the subject of so much controversy. (Vaillant, *Num. Imp. Rom.* vol. ii. p. 317; Eckhel, vol. vii. p. 369; *Mém. de l'Acad. des Inscr.* vol. xxvii. p. 606.)

Jornandes (*de Get.* 23) enumerates this people under the name of GOLTHES, among the northern tribes who were vanquished by Hermanric, king of the Ostrogoths. [R. G. L.]

GALLAE'CIA or CALLAECIA (Καλλαικία, Καλλαϊκία: *Eth.* Καλλαϊκοί, Callaïci, Callaeci, Gallaeci: *Galicia* and part of *Portugal*), a large district in the extreme NW. of Hispania Tarraconensis, N. of LUSITANIA, and W. of the ASTURES and VACCAEI, its boundaries being on the S. the river Durius (*Douro*), on the NE. the river Navia or Narinbo (*Navia*), and on the E. the mountains of the Asturs: so that it corresponded almost exactly to the modern *Gallicia*, with the addition on the S. of the Portuguese provinces of *Entre Douro et Minho* and *Tras os Montes*, and, on the E., of small portions of *Asturias* and *Leon*. Sometimes a wider extent was assigned to the country, so as to include the Asturs (Dion Cass. xxxvii. 53; Plin. iii. 3. s. 4, xix. 1. s. 2), and even, as used by late writers, the whole of Cantabria (Oros. vi. 21; Isid. xiv. 15; Zosim. iv. 24). In the earliest times, however, Gallaecia, or at least its S. part, was reckoned a part of Lusitania. (Strab. iii. p. 152). The people were divided into two great tribes, the CALLAÏCI (or GALLAECI) BRACARII (Καλλαϊκοὶ οἱ Βρακάριοι), and the CALLAÏCI (or GALLAECI) LUCENSES (Κ. οἱ Λουκήνσιοι), besides the ARTABRI, who, though geographically belonging to the country, were regarded as a separate people. The Callaïci Bracarii received their name from their chief city, BRACARA AUGUSTA, and inhabited the S. of Gallaecia, from the Durius (*Douro*) up to the Minius (*Minho*): and the Callaïci Lucenses the N.

Digitized by Google

part, from the Minius to the Navia; these received their name from their capital, LUCUS AUGUSTI. It should be observed, however, that this division was not an arbitrary one, as might perhaps be inferred from the derivation of the names from the two Roman cities; but the river Minius established a natural boundary between the two tribes. Each of the two capital cities was, under the Romans, the seat of a *conventus juridicus*, that of Lucus including 16 peoples besides the Celtici (i. e. Artabri) and the Lebuni, and a free population of about 166,000; that of Bracara, twenty-four cities, and 175,000 persons, among whom Pliny mentions, besides the Bracarii themselves, the Bibali, Coelerini, Gallaeci, Hequaesi, Limici, Querquerni (Plin. iii. 3. s. 4). Ptolemy (ii. 6. §§ 24—27) mentions, as minor tribes of the Callaïci Lucenses, the Capori (Καπορoί), Cilini, (Κιλανοί), Lemavi (Λεμαυοί), Baedyes (Βαίδυες), and Seurri (Σεουρροί, vulgo Σεβουρροί); and, (§§ 40—49), as minor tribes of the Bracarii, the Turodi (Τουρόδοι), Nemetatae (Νεμήτατοι), Coelerini (Κοιλερανοί, comp. Plin. iv. 20, s. 34), Bibali (Βιβαλοί, comp. Plin. iii. 3. s. 4), Limici (Λιμικοί, comp. Plin. *l. c.*) on the river Limia, Luanci (Λουαγκοί), Gruii (Γρούιοι, the Grovii of Pliny and Mela, and the Gravii of Silius Italicus, i. 235, iii. 366, who assigns to them the whole country from the Durius to the Limia, while Mela gives them even a wider extent, from the Durius to some distance N. of the Minius; perhaps originally the Grovii were between the Durius and Limia, and the Bracarii between the Limia and Minius), Quacerni (Κουακερνοί, the Querquerni of Pliny, *l. c.*, and Quarquerni of an inscription *ap.* Grater, p. 245, no. 2), Lubaeni (Λουβαυνοί, the Lebuni of Pliny, *l. c.*), and Narbasi (Ναρβασοί).

Gallaecia is a rugged, mountainous country, formed by the extreme branches of the great mountain chain which strikes off from the Pyrenees westward along the north side of the peninsula. Its chief river was the MINIUS (*Minho*), flowing through the plain enclosed between the range just named and its SW. branch, the mountains of the Astures, and falling into the Atlantic on the W. coast. Between this and the Durius are three smaller rivers, one of them, at least, possessing considerable interest, but of which the names are somewhat difficult to identify, probably on account of the imperfect knowledge possessed by the earlier writers. Ptolemy gives them in regular order, from S. to N., as follows:—AVUS (Ἄουος ποταμοῦ ἐκβολαί, Ptol. ii. 6. § 1; Mela, iii. 1: *Ao d Ave;* the Celadus, which Mela mentions next, seems to be the N. tributary of the *Ave*, now called *Ilha* or *Deste*, which flows down from near *Braga*): NABIS (Νάβιος ποταμοῦ ἐκβολαί, Ptol. *l. c.*; Mela, iii. 1: *R. Cavado;* this would be taken, on the evidence of the name, for the Βαῖρις of Strabo (iii. 153), were it not that he expressly identifies the Baenis with the Minius, evidently by a confusion of names; and this, and the next to be mentioned, are the only considerable rivers that he knows in these parts): LIMIA, or LIMIAS (Λιμίου ποταμοῦ ἐκβολαί: *Lima*), besides the river which Strabo (*l. c.*) calls the river Lethe, adding that some named it Limaea and others Belion (ὁ τῆς Λήθης, ὃν τινες Λιμαίαν, οἱ δὲ Βέλιον καλοῦσι), and that it flowed from the Iberi and Vaccaei. Mela, who transposes it to N. of the Minius, calls it Limia, or the River of Oblivion ("et cui Oblivionis cognomen est Limia;" for some scholars find in the word "Oblivionis" the origin of Strabo's Βελίων; comp. Plin. iv. 21, s. 35 "ab Minio cc. M. P. ut auctor est Varro, abest Aeminius, quem alibi quidam intelligunt et Limaeam vocant, Oblivionis antiquus dictus, multumque fabulosus;" Sil. Ital. i. 235, 236.; comp. xvi. 476, 477:

"Quique super Gravios lucentes volvit arenas,
Infernae populis referens oblivia Lethes"):

it is also mentioned under the name of Lethe by Appian (*Hisp.* 72) and Plutarch (*Quaest. Rom.* 34), who relate that the first Roman that crossed it was Decimus Brutus, when, after his conquest of Lusitania, he advanced against the Bracarii, as far as the Minius, B. C. 136. From Livy's history of the same event, it would seem that the river was an object of superstitious terror to the soldiers of Brutus, for they were only incited to pass it by the example of their general, who snatched a standard from the bearer, and led the way in person. (Liv. *Epit.* lv., where the name is "flumen Oblivionem;" comp. Flor. ii. 17, "formidatumque militibus flumen Oblivionis.") But whether the name originated in the superstition of the soldiers, who had been taught to look for the abodes of the dead in that far west to which they seemed to be advancing, aided by some resemblance in the native name, or from the latter cause only, is all uncertain. (Comp. Strab. p. 106.) It deserves notice, however, that a trace of the name Belion, given to it by Strabo, appears to be preserved in that of the lake *Beon*, from which the river flows; and hence Belion may perhaps have been the true name, and Flumen Oblivionis its corruption. The names of the rivers in the country of the Callaïci Lucenses, N. of the Minius, which possess no particular interest, are obtained from Mela, Pliny, and Ptolemy, though with some uncertainty, as follows: LARRON (*Ler*), ULLA (Mela; Οὐΐα, Ptol.: *Ulla*), TAMARIS (*Tambre*), SARS (*Sar*), FLORIUS (*Rio de Castro*), NELUS (*Rio de la Puente*), VIRUS (*Allones*), MEARUS (*Mero*), IVIA (prob. the Νάβιος of Ptol.: *Juvia*); the two last falling into the Sinus Artabrorum (*G. of Ferrol*) and the NAVILUBIO (*Navia*).

The only natural productions for which Gallaecia was famed among the ancients were its minerals. Besides the golden sands of the Limius referred to in the passages quoted above from Silius Italicus, the country yielded abundance of tin (Strab. iii. p. 147), and a sort of precious stone, called *gemma Gallaïca*. (Plin. xxxvii. 10. s. 59.) The people were among the least civilised in Spain; the very prototypes of the modern *Gallegos*. Their chief serious employment was divination, their superstitious addiction to which art alone rescued them from the imputation of Atheism. Engrossed by this occupation, or else engaged in sports, or sunk in indolence, except when roused by wars, they left all husbandry to the women. (Sil. Ital. iii. 344—353:

"Fibrarum et pennae divinarumque sagacem
Flammarum misit dives Callaecia pubem,
Barbara nunc patriis ululantem carmina linguis,
Nunc pedis alterno percussa verbere terra,
Ad numerum resonas gaudentem plaudere cetras.
Haec requies ludusque viris, ea sacra voluptas.
Cetera femineus peragit labor: addere sulco
Semina, et impresso tellurem vertere aratro,
Segne viris; quidquid duro sine Marte gerendum,
Callaïci conjux obit irrequieta mariti.")

They were a most warlike people, preferring death to flight, and even the women went armed to the battle-field, and put themselves to death when they were taken captive. (Appian, *Hisp.* 27.) Their conquest by Decimus Brutus has already been referred to. But, although he is said, in general terms,

Digitized by Google

to have subdued all the peoples of Gallaecia (Flor. ii. 17), yet, from the few particulars recorded, his conquests appear clearly not to have extended far, if at all, N. of the Minius, so that they included only the Callaïci Bracarii. As, at the very same time, the proconsul M. Aemilius Lepidus failed in an expedition against the Vaccaei (Liv. *Epit.* lvi.), and as the Astures were not subdued till the time of Augustus, the country of the Callaïci Lucenses, being only open to the Romans on the S., must have been very imperfectly, if at all, subjected, until it yielded to Augustus with the other NW. tribes.

Besides the two capitals of BRACARA AUGUSTA (*Braga*) and LUCUS AUGUSTI (*Lugo*), the following cities and towns are mentioned:—

I. Towns of the Callaïci Bracarii: 1. CALE or CALEM (*Oporto*), at the mouth of the Durius, and on the road from Olisipo to Bracara, 35 M. P. from the latter. 2. On the road from Bracara to Asturica, which made a great bend southwards to, and perhaps even beyond, the Durius (*Itin. Ant.* pp. 422, 423): SALACIA, 20 M. P. (*Salamonde?*); PRAESIDIUM, 26 M. P. (*Castro de Codeceso?*); CALADUNUM, 16 M. P. (*Ciadia?*); AD AQUAS, 18 M.P. (*Trindad?*); PINETUM, 20 M. P. (*Pinhel?*); ROBORETUM, 36 M. P. (*Robledo* or *Bragança?*); COMPLEUTICA, 29 M. P. (*Compludo*); VENIATIA, 25 M. P. (*Vinhaes?*); the remaining stations belong to the Astures. Besides these, Ptolemy mentions TUNTOBRIGA (Τουντόβριγα) and ARADUCTA (Ἀραδοῦκτα), as towns of the Bracarii (ii. 6. § 39). 3. On another and more direct road, leading N. from Bracara to the Minius, and thence up the river towards Asturica (*Itin. Ant.* pp. 427, 428): SALANIANA, 21 M. P. (*Santiago de Villela*); AQUAE ORIGINIS, 18 M. P. (*Bannos de Bande* or *Orense*); AQUAE QUERQUENNAE, 14 M. P. (Ὕδατα Κουακερνῶν, Ptol. *l. c.* § 47: *Rio Caldo*); GEMINAE, 16 M. P. (*Baños de Molyas* or *Sandras?*); SALIENTES, 14 M. P. (*Caldelas* or *Orense?*); PRAESIDIUM, 18 M. P. (*Castro de Caldelas* or *Rodicio?*), on the border towards the Astures. 4. On the road from Bracara to Lucus (*Itin. Ant.* p. 429): LIMIA, 19 M. P., or Forum Limicorum (*Ponte de Lima*), probably different from the Φόρος Λιμικῶν of Ptolemy (§ 44); TUDE, 24 M. P., or Tyde (Plin. iv. 20. s. 35; Sil. Ital. iii. 367, xvi. 369; Τοῦδαι, vulgo Τοῦνδαι, Ptol. *l. c.* § 45: *Tuy*), a fortress of the Gruii or Gravii, said to have been founded by Diomed and a colony of Aetolians. (Plin., Sil. Ital., *ll. cc.*; Dion. Per. 485; Avien. *Descr. Orb.* 651: other notices of supposed Greek settlements in this quarter are found in Strabo, iii. p. 157.) Besides these, Ptolemy (*l. c.*) mentions the following: AQUAE LAEVAE (Ὕδατα Λαιά, § 40), among the Turodi; VOLOBRIGA (Οὐολόβριγα, § 41), among the Nemetatae; COELIOBRIGA (Κοιλιόβριγα, § 42), among the Coelerini; FORUM BIBALORUM (Φόρος Βιβαλῶν, § 43: prob. *Viana de Bollo*), the city of the Bibali; MERVA (Μερούα, § 46), that of the Luanci; CAMBAETUM (Κάμβαιτον, § 48), that of the Lubaeni; and FORUM NARBASORUM (Φόρος Ναρβασαῶν, § 49), that of the Narbasi. To these must be added the baths of AQUAE FLAVIAE, the ruins of which are found E. of Bracara, at *Chaves* on the river *Tamega*, which is still crossed by the ancient Roman bridge of 18 arches. (Inscr. *ap.* Gruter, p. 162. no. 4, p. 245. no. 2; Florez, *Esp. S.* vol. xv. p. 79; Miñano, *Diccion.* vol. iii. p. 85; Ukert, vol. ii. pt. 1. p. 346.)

II. Towns of the Callaïci Lucenses: 1. On the road already mentioned (No. 4) from Bracara to Lucus, and thence to Asturica (*Itin. Ant.* pp. 429, 430): from Tude (see above), BURBIDA, 16 M. P. (*Borriño?*); TUROQUA, 16 M. P. (*Torres?*); AQUAE CELENAE or CELINAE, 24 M. P. (Ὕδατα Θερμὰ τῶν Κιλινῶν, Ptol. ii. 6. § 25: *Caldas del Rey*); PRIA, 12 M. P., which is probably an error for IRIA FLAVIA, a city of the Capori (Ptol. *l. c.* § 24; Inscr. *ap.* Gruter, p. 305. no 8: *El Padron*, where the road, which has thus far kept to the N. along the sea-coast, turns NE. up the valley of the *Ulla* or the *Sar;* ASSECONIA, 23 M. P. (*Santiago Compostella* or *Assorey?*); BREVIS, 12 M. P. (*Padron* or *Burres?*); MARCIAE, 20 M. P., probably an error for PONS NARTIAE (Geog. Rav. iv. 45: *Narla*, on the river of the same name); LUCUS AUGUSTI, 13 M. P. (*Lugo*). 2. On the continuation of the same road to Asturica: TIMALINUM (*Fontenova?*), 22 M. P., or TALAMINA, a city of the Seurri (Ταλαμίνη, Ptol. *l. c.* § 27, who mentions N. of it another town of the same people, AQUAE QUINTINAE, Ὕδατα Κουίντινα, *Quinta?*); PONS NEVIAE or NAVIA, i. e. the *Bridge of the River Navia* (prob. *Navia de Suarna*), whence the road turns S. to UTARIS, 20 M. P. (*Cerredo* or *Doncos*), 16 M. P. from Interamnium in Asturia. [ASTURES.] 3. Another route, beginning and ending in the same general direction, but striking further to the NW. through the ARTABRI, is given in the Itinerary as follows (pp. 423—425). From Bracara by sea to Aquae Celenae, 165 stadia; thence again by sea, 195 stadia to VICUS SPACORUM (Οὶκοια ἢ Οὶκα, Ptol. *l. c.* § 23: *Esposende*); thence 150 stadia by sea to AD DUOS PONTES (*Puente Ponteredra*); thence 180 stadia by sea to GRANDIMIRUM or GLANDIMARIUM (Geog. Rav. iv. 43; Γλανδόμιρον, Ptol. *l. c.*: prob. *Muros*, at the mouth of the *Noya*), whence, avoiding the promontory of Nerium (*C. Finisterre*), the road proceeded by sea NE. to TRIGUNDUM, 22 M. P. (*Berreo* or *Arnoia*; apparently the Τούρριγα ἢ Τούργυα of Ptolemy, *l. c.*), and thence to BRIGANTIUM, 30 M. P., the chief sea-port of the country (see art.); whence it struck inland to Lucus Augusti, with the intermediate station of CARANICUM, 18 M. P. from Brigantium and 17 from Lucus (prob. the Καρανικα of Ptolemy, *l. c.*: *Guitinez?*). Ptolemy mentions in addition to the above places, the following: among the Callaïci Lucenses (§ 23), BELIUM (Βήλιον), OLINA (Ὀλίνα), LIBUNCA (Λιβοῦγκα), PINTIA (Πιντία), TURUPTIANA (Τουρουπτιάνα), OCELUM (Ὄκελον); and among the Lemavi (§ 25), DACTONIUM (Δακτόνιον); and Pliny (iv. 20. s. 34) mentions ABOBRICA, as a not inconsiderable [illegible] (*Bayona*). [P. S.]

GA'LLIA CISALPI'NA (Caes. *B. G.* vi. 1), also called GA'LLIA CITE'RIOR (Caes. *B. G.* i. 54, Cic. *de Invent.* ii. 37), and simply GA'LLIA (Cic. *ad Fam.* xii. 5), is the name which the Romans gave to North Italy as late as the time of the dictator Caesar and Cicero, and even to B. C. 43. Caesar (*B. G.* i. 10, 54; ii. 35) sometimes includes Gallia Cisalpina under the name Italia: but he then uses the term in a geographical, and not in a political sense. The name Cisalpina denoted Gallia south of the Alps, as opposed to Transalpina Gallia, or Gaul north of the Alps; and Citerior is the nearer Gaul, as opposed to Ulterior (Caes. *B. G.* i. 7, 10; *B. C.* i. 33) or the further, which in Caesar means the Provincia. Ulterior Gallia was also used sometimes generally, to signify all Gallia north of the Alps. The name Gallia Togata, applied to Cisalpine Gaul

Digitized by Google

which occurs in the eighth book of the Gallic War (viii. 24, 52), and in later writers, was given at some time after the country was settled by the Romans, and it indicated the numerical superiority of the Togati or Romans over the Gallic population. The inhabitants north of the Po were sometimes called Transpadani (Cic. *ad Fam.* xvi. 12), a term which implies Cispadani, or the inhabitants south of the Po; but there does not appear to be any Latin authority for the word Cispadani.

Among the various names by which the Greek writers designate this country, some are simply descriptive of its geographical position, and others represent the Roman names. Plutarch (*Caes.* c. 20) calls it ἡ περὶ Πάδον Γαλατία; but there is no Latin authority for the name Circumpadana. Walckenaer conjectures that the names Gallia Circumpadana, Transpadana, and Cispadana are older than the term Gallia Cisalpina; and if he could prove that all these terms were used, we might accept his hypothesis. Livy (xxi. 35) calls the plains about the Po "Circumpadanos campos."

Polybius names this country both Κελτική and Γαλατία (iii. 77, 87); but though he applies the Latin word Transalpini to the Galli north of the Alps, and explains it (iii. 15) as a term in use in his time, he does not use the word Cisalpini, or any equivalent Greek word. He comprehends this Celtice or Galatia in the geographical term Italia, and describes it as a part of the Italian peninsula. We may conclude that the term Gallia Cisalpina was not used by the Romans before they were acquainted with Gallia Transalpina; and that the oldest name of North Italy among the Romans was simply Gallia. The fact that the Romans gave the name of Gallia to the chief part of the basin of the Po, and the name of Galli to the people, would be some evidence of the identity of the Galli north and south of the Alps. We have no historical evidence of the emigration of the Galli into Italy before the time that Livy mentions; but there was a tradition, partially preserved, that this was not the first time that the nation appeared south of the Alps. Cornelius Boccbus proved that the Umbri were of the stock of the Galli Veteres. (Solinus, *Polyhist.* c. 8.) Servius (*ad Virg. Aen.* xii. 753), using nearly the same words as Solinus, refers to Marcus Antoninus as his authority, by which name is meant M. Antonius Gnipho. It appears, then, that some of the Roman men of letters believed that the ancient nation of the Umbri were Galli Veteres; but we know nothing of the facts which led to this conclusion. Nor do we know who the Galli Veteres were; but we may suppose that these writers meant a nation of Galli who were in Italy before the Galli who crossed the Alps at a later period. There are no means of approximating to a solution of this question, except by a comparison of the old Italian languages with the existing Cumri (Welsh), or with the Gaelic, and by an examination of the names of the mountains, rivers, and other natural features of the Italian peninsula, which we may assume to be the oldest historical records that exist of the inhabitants of Italy. There is no ancient language of Italy, except the Latin, of which we have any correct knowledge; and there is no ancient language now known, with which we can compare the Latin and the names in the Italian peninsula, except the Basque, the Cumri, and the Gaelic dialects. This comparison has been made, to some extent, for the Cumri, by Archdeacon Williams, who is well acquainted with the Welsh language. (On one source of the non-Hellenic portion of the Latin language, by the Rev. Archdeacon Williams, *Transact. of the Royal Society of Edinburgh*, vol. xiii.) In this essay the author limits himself, as he states, "to the subject of the original population of Central Italy," of which he affirms, "that it was of the Cumrian or Cimbrian race, cognate with the Cumri of our island, and that their language formed some portion of the non-Hellenic elements of the Latin tongue." The question is one that requires great nicety in dealing with, for resemblances of words are very deceptive; but it is a fair conclusion that we cannot absolutely reject as a probable hypothesis, the existence of a people in the peninsula long before all historical periods commence, whose language was nearly related to some one or all of the languages which come under the general denomination of Celtic. The great mountain-range which forms the back-bone of the peninsula has a pure Celtic name, A-penninus; for whether the A is a euphonic prefix, or whether we prefer the form Ap-penninus, and consider the *Ap* to be significant, we have in either case the root *Pen*, "a summit," which appears in the Alpes Penninae, and in numerous mountain names in Great Britain. The names of rivers in the basin of the Po, and as far as the limits of Central Italy at least, the Duria, Stura, Tura, Turia, Athesis, Bedesis, Medoacus, Aesis, Tinia, Ausar, and many others, are either precisely the same with the names of many rivers in France and Great Britain, or may be reduced to the same forms by a perfectly fair process. (See Mr. Williams's Essay.)

The Romans, after they had got a footing in Transalpine Gallia, often recognised the Aedui, a people once the chief of all Gallia, as their "brethren and kinsmen" (Caes. *B. G.* i. 43); and this has been used as evidence that the Romans thought the relationship to be proved, or they would not have given such a title to barbarians, and those who were their greatest enemies. If the relationship did exist, we must of course go a long way back for its origin, to the ante-historical times when a Roman nation rose out of a mixture of races, one of which was Celtic. But this fraternising with the Aedui seems as easy to be explained, as the kinship of the Romans and the Segestani of Sicily through their common ancestor Aeneas. (Cic. *Verr.* ii. 4. c. 33.) It may be observed, that if we admit the probability of Celtic nations (Galli Veteres) having existed in Italy before the great invasion which Livy mentions (v. 34), this probability is not diminished by the fact of the Galli Veteres not having maintained themselves as a nation; unless they be the Umbri, as to which we shall never make all the learned agree. For the Galli have not been able to fix themselves permanently anywhere out of their native limits; and their second settlement in Italy, recorded by Polybius and Livy (admitting the fact of a prior settlement) was ultimately unsuccessful. The proof of some Celtic nation having been in the peninsula long before all historical times, rests on the incorruptible evidence of the geographical names of the peninsula.

The authorities which Livy followed state that the great immigration of the Galli into Italy took place in the reign of the Roman king Tarquinius Priscus, at which time the Bituriges in the basin of the Loire were the dominant people in Transalpine Gallia. The causes of the emigration were excessive population (Liv. v. 34), or, as Trogus, Justin's authority, says, civil commotions. The cause is not very material,

Digitized by Google

nor can we with certainty say what it was; but it may have been both these causes, and something else. The Galli have always been a military people; and the desire of active employment, the weariness of doing nothing, and the hope of plunder would at any time be sufficient to put their fighting men in motion. Two chieftains led the emigrants. Sigovesus conducted his men into Germany, into the great Hercynian forest. Livy does not mention what tribes accompanied him; nor is it certain whether he is following the same authority as Caesar (*B. G.* vi. 24), who speaks of the Gallic settlements in the Hercynian forest. Bellovesus, the other chief, led to the conquest of North Italy, Bituriges, Arverni, Senones, Aedui, Ambarri, Carnutes, and Aulerci, all which nations belonged to that division of Gallia which Caesar calls the country of the Celtae (i. 1). The invaders entered Italy by the Taurinus Saltus, or the pass of *Mont Genèvre*, and defeated the Tuscans or Etruscans, who then held the plain of the Po, not far from the banks of the Ticinus. Finding here a people named Insubres, which was also the name of a pagus of the Aedui, they built a city and called it Mediolanum (*Milan*). The Insubres of Gallia Transalpina are only known from this passage; but there was a Mediolanum near Lugdunum, and it is supposed that this place may mark the position of the pagus of the Insubres. Of the names of all these tribes menti ned by Livy, not one appears in the geography of Italy except that of the Senones, and the country which the Senones occupied was south of the Po. Livy, or the authorities that he followed, probably attempted to explain the origin of the Cisalpine tribe of the Insubres or Isombri (Ἰσομβροι) as the Greek writers call them, by the clumsy expedient of supposing all these invading tribes to have changed their name for one that they found on the spot, which happened to be the name of a small Transalpine pagus. But Livy has not explained the origin of the Insubres; and if the Insubres were in North Italy before this invasion, and were a Celtic people, they must have come in a former immigration; and if Is-umbri is the genuine form of the word, we may assume that they were Umbri, who had long been settled in the basin of the Po. Indeed, if we look carefully at Livy's narrative, we shall see that he does not say that these Insubres whom the invaders found in Italy were Galli; nor does he say who they were. He lets all the names of the invaders disappear, and that of the Insubres remain in their place. Yet the Insubres were Galli beyond all doubt. Polybius merely fixes the position of the Insubres as one of the Gallic nations of Cisalpine Italy. The name appears in his text in various forms. Strabo has the Roman form Insubri, and in one place Σύμβροι (p. 218; and Groskurd's Note, Transl. Strab. vol. i. p. 373).

A new band according to Livy's authorities soon crossed the Alps by the same pass, the Cenomani (Liv. v. 35) under Elitovius, and occupied the places where in Livy's time Brixia (*Brescia*) and Verona were: the Libui were the previous occupiers of these parts. Livy may not have perceived that he has already mentioned (v. 34) the Aulerci as Gallic invaders of Italy, and that the Cenomani were a division of the Aulerci. [CENOMANI.] Cato found a tradition somewhere (Plin. iii. 19) that the Cenomani once dwelt near Massilia (*Marseille*) in the country of the Volcae, which, if the tradition is true, may have been during their migration from their original country between the *Loire* and the *Seine*. The Cenomani (Livy) were followed by the Salluvii, who settled near "an ancient people, Laev. Ligures," as some texts have it, "who dwelt about the river Ticinus." But here Livy has not observed, though he knew the fact, that the Salluvii or Salyes were Ligurians, and dwelt between the Lower Rhone and the Alps. In this passage (v. 35) perhaps he may mean the Salassi.

Another band of invaders, Boii and Lingones, crossed the Alps by the Pennine pass (the *Great St. Bernard*), and finding all the country occupied between the Alps and the Po, they passed the river on rafts, and drove out of the country both Etruscans and Umbri; but they did not advance beyond the Apennines. (Liv. v. 35.) The position of the tribe of Lingones of Caesar's time is marked by the city of *Langres*, in the country at the head of the Seine: but the original country of the Boii [Boii] is uncertain. The Senones (Liv. v. 35) were the last invaders, and they occupied the coast of the Adriatic from the river Utis (*Montone*) to the Aesis (*Esino*), which is a little north of Ancona. Livy has already mentioned Senones among the first invaders. The Senones and Lingones were also Celtae; and the Senones were from the basin of the Seine. All the tribes which Livy here enumerates appear in Caesar's history of the Gallic War, except the Insubres and the Salluvii, who were in Caesar's time within the limits of the Provincia.

At the time of the Gallic invasion the Tuscans, who were the masters of this country, had built many towns, cleared the forests, cut canals, and made embankments; at least, tradition assigned to them the credit of doing this. Polybius (ii. 17) assigns a very simple cause to the Gallic invasion of this fine country. The Galli had often crossed the Alps to trade with the inhabitants of the plain, and they soon found a pretext for seizing this land of plenty, as they have done since. Mantua, one of the old Tuscan towns north of the Po (Plin. iii. 19), survived the Gallic invasion, being probably saved by its position amidst marshes; but Melpum (as it stands in Pliny's text, iii. 17), one of the richest Tuscan cities, was destroyed by the Insubres, Boii, and Senones, on the day on which Camillus took Veii. The description which Polybius gives of the habits of these Transalpine nations (ii. 17) is just what we might expect. They lived in unwalled villages,—in houses of some kind, we must suppose, or they could not have been villages,—but they had no household stuff: their bed was straw, leaves, or grass, and flesh their food; their only business and all that they understood was agriculture and war. Their agriculture did not consist in tilling the ground, but in feeding sheep and cattle, which, with gold, formed their wealth, because these were the things that they could most easily carry about with them: the chiefs were most concerned to have a large train of followers, for a man was feared and respected in proportion to the number of folk that he had about him. Such a people would not found towns on their first invasion of Italy: indeed, the founding of towns would have been useless, for they did not live in them, and if they had chosen that mode of life they might have been content with the Tuscan cities. Livy's story of the foundation of Mediolanum, Brixia, and Verona is a fable; and yet Mediolanum at least is an undoubted Gallic name, for there are several cities in Transalpine Gallia called Mediolanum; and Brixia and Verona are probably Gallic too.

These audacious barbarians levied contributions on

all their neighbours. The most memorable event in the early history of Rome is the capture of the city by a band of these Italian Galli, who, after threatening Clusium (Liv. v. 33), turned their arms against the Romans, who had taken this Etruscan city under their protection. The Galli and the Romans first tried their strength on the Allia, a small affluent of the Tiber. The Romans were defeated, and this was for ever a black day in their calendar (B. C. 390). The capture of Rome and the siege of the Capitol by the Galli were embellished with the fiction that characterises all the early Roman history. To the Galli this was no more than one of their ordinary marauding expeditions. An invasion of the lands of the Galli by their neighbours the Veneti is assigned as the immediate cause of their retreat from Rome. Domestic quarrels kept them at home for some time; and they had also enemies around them. The Galli had become possessed of the plains only, and the mountaineers of the Alps knew the value of plunder as well as the Galli. They were probably kept fully employed in taking care of themselves for the space of thirty years that elapsed between the capture of Rome and the next expedition to the south. But, from the time of their little city being sacked, the Romans knew that they had an enemy whom they must destroy, or perish themselves. "Gallicus tumultus," or simply "tumultus," was the name that they gave to a hostile movement of the Gallic tribes of North Italy. This was the signal to prepare for a desperate fight (Liv. viii. 20); for with the Galli, says Sallust, the Romans fought for their existence, not for glory (*Bell. Jug.* c. 114). They set apart a reserved treasure in the Capitol for the emergencies of a Gallic war; for the fear of the Galli seems to have been the origin of the aerarium sanctius, as it was sometimes called. (Appian, *B. C.* ii. 41; Liv. xxii. 10.)

Thirty years after the capture of Rome, as Polybius (ii. 18, 19) fixes the time, the Galli came again with a large force as far as Alba, and the Romans were afraid to meet them. The historian does not say how long they staid in the neighbourhood of Rome; but, as he says that they came twelve years afterwards with a great force, we may infer that they staid the first time as long as the country could maintain them. The second time that they came the Romans with their allies were ready to meet them; but the Galli fled as the Romans advanced, and, returning to their own country, remained quiet for thirteen years. Finding that the Romans were increasing in power, the Galli consented to a treaty of peace with them, which they strictly observed for forty years. This dry narrative of Polybius is enough to show what a dangerous enemy the Gaul was to the city on the Tiber. We can easily imagine what Latium suffered from these pitiless barbarians. The Romans had many traditions or fictions about these Gallic wars; and a marvellous story of Titus Manlius fighting a duel with a Gallic giant on the banks of the Anio, in presence of both armies, and killing him. (Liv. vii. 10.) Manlius took from the neck of his enemy a blood-stained chain (*torques*), and put it on his own neck; and the soldiers gave him the name Torquatus, which became the distinctive appellation of a noble Roman family. The narrative of Livy contains two facts worth notice. The Galli made Tibur on the Anio their strong post in some war or more of these invasions, and the people of Tibur joined them against the Romans. The Galli also carried their incursions into Campania (Liv. vii. 11), and, either going or returning, plundered the country about Lavicum, Tusculum, and the Alban territory. The Roman annalists here repeat the story of Torquatus under another form. A Gallic giant challenges the Romans, and is killed in a duel by M. Valerius; but his glory was not equal to that of Manlius, for a raven came to his assistance and pecked and scratched the face and eyes of the Gaul, till, blinded and frightened out of his senses, he was pierced by the sword of the Roman. (Liv. vii. 26.)

About B. C. 299 some fresh bands of Transalpine Galli crossed the mountains into the valley of the Po, without being invited. Though we do not know when the Transalpine people first found their way across the Alps, we know that they have at intervals, whenever the opportunity has offered, repeated these visits up to the present time. To get rid of these dangerous kinsmen, the Cisalpine Galli pushed them on against the Romans, and joined them in an expedition to the south. In their way through Etruria their numbers were increased by some Tuscans. They got a good booty within the Roman territory, and returned; but, as usual with the nation, they had a dispute about the division of the spoil, and came to blows. They were given to drink and all kinds of excess, and fond of quarrels. Four years later (B. C. 296) the Galli and the Samnites were leagued together. (Polyb. ii. 19.) Livy (x. 21) mentions the Umbri and Etruscans also as joining the league against the Romans. Polybius states that the Romans were defeated with loss in the territory of the Camertii, as he calls it. (Comp. Liv. x. 26). But in another battle, fought a few days after in the neighbourhood of Sentinum, on the north side of the Apennines, the Romans defeated the Galli and their allies. Livy, in his description of this battle (x. 28), for the first time mentions the war-chariots of the Galli (*esseda*). Caesar, in his Gallic War, never speaks of the Transalpine Galli using war-chariots; and when he invaded Britain and found them there, the strangeness of the thing led him to describe it minutely. These war-chariots of Livy are probably a rhetorical embellishment. The chariots (*συνωρίδες*) which Polybius (ii. 28) speaks of do not seem to have been war-chariots. Livy is, however, satisfied with fixing the number of the enemy that fell at 25,000, which later writers raised to 40,000 and 100,000. It was a victory won after a hard fight, and on Gallic ground. It was a sign that Rome was growing stronger, and that the latter days of the Galli were approaching.

About ten years later (B. C. 283) the Galli Senones, with a large force, besieged Arretium (*Arezzo*), an Etruscan town under the protection of Rome. The Romans came to its relief, under L. Caecilius Metellus. Roman ambassadors, however, were first sent to expostulate with the Senones, and to induce them to retire; but they were murdered by the Galli, contrary to the law of nations. Polybius tells the story of the massacre somewhat differently. Upon this the consul P. Cornelius Dolabella entered the country of the Senones, burnt all before him, put the men to the sword, and carried off the women and children. He treated the Galli as they had treated other nations. In the mean time Metellus was defeated by the Senones before Arretium, with great loss; but it does not appear that the town was taken by the enemy. (Comp. Polyb. ii. 19 with Liv. *Epit.* 12, and Freinsheim's *Supplement*). The quarrel between the Romans and the Senones was soon decisively settled. The Romans gave them a com-

Digitized by Google

Plete defeat. Most of the Senones fell in the battle, and the Romans, driving the remainder out of the country, at last got a firm footing north of the Apennines, and on the coast of the Adriatic. This was the first part of Gallia to which they sent a colony. It was named Sena Gallica (*Senigaglia*), to distinguish it from Sena in Etruria. The *Epitome* of Livy (*Ep.* 11) places the foundation of Sena Gallica before the complete conquest of the Senones, which must be a mistake. This occupation of the country of the Senones alarmed their neighbours the Boii, who, prevailing on the Tuscans to join them, advanced as far as Lake Vadimon in Etruria, apparently on their way to Rome. But they were met at the lake by the Romans, who slaughtered the greater part both of the Tuscans and the Boii. The next year the Etruscans and Boii mustered all the youth that could bear arms, and again were defeated by the Romans. The Galli and Etruscans were now glad to accept terms of peace. "These events," says Polybius (ii. 20), "took place in the third year before Pyrrhus crossed into Italy, and in the fifth year before the destruction of the Galli at Delphi; for at these times Fortune put into all the Galli a kind of pestilential disposition for war." This statement fixes the events at the year B. C. 282. These wars with the Galli were the Roman apprenticeship to danger, for they never met with more desperate enemies; and the interval of forty-five years' rest from all further disturbance from that quarter which followed the peace, left the Romans leisure to fight with Pyrrhus, who invaded Italy, and to carry on their first war with the Carthaginians.

The Romans had excited the fears of the Galli by founding the Roman colony of Sena; but in 268 they went further north, and founded the Latin colony of Ariminum (*Rimini*). Polybius (ii. 21), in a few words full of meaning, shows how the new war began: "When those of the Galli who had seen the terrible things departed from this life by reason of their years, and a new race came on, full of passion, without reason, and having no experience of and never having seen all kinds of evil and events, they began again to stir the state of affairs, as is natural, and to be irritated against the Romans by any thing that occurred." The chiefs privately sent for a body of Transalpine Galli, who marched to Ariminum; but there the common sort among the Boii, distrusting the new comers, and quarrelling with their own leaders, killed their chiefs Atis and Galatus, and then came to a pitched battle with their Transalpine allies. Five years after this (B. C. 232) the tribune C. Flaminius carried a bill for the division of the land in Picenum, from which they had ejected the Senones, and the distribution of it among Roman citizens. This is the allotment of the "Gallicus ager" which is often mentioned (Cic. *de Sen.* c. 4); a measure which Polybius considers to have been the beginning of a change in the Roman state to the worse, but which was certainly the cause of a dangerous war; for the Galli now saw that the Romans aimed at their total destruction. The Boii, who were nearest to the new Roman territory, and the Isombri (Insubres), the most powerful of the Gallic peoples in Italy, invited some Galli from beyond the Alps to come and help them against the Romans. These Galli, who were from the Alps and the Rhone, were called Gaesati, or "mercenaries," for that, says Polybius, is the proper meaning of the word. But though the word might have got that sense in the time of Polybius, it was apparently not the original meaning; for "gaesum" is a Gallic name for a javelin. The men from beyond the Alps came under the kings Concolitan and Aneroest; and never did a larger, more famous, or more warlike body of troops go out of these parts of Gallia. (Polyb. ii. 22.) The Romans made great preparations for this war, which was to decide whether they or the Galli were to be the masters of Italy. It was eight years after the division of the lands of Picenum, and in B. C. 225 when the Gaesati came to the Po. They were joined by the Isombri and Boii; but the Cenomani and the Veneti, having been visited by some Roman ambassadors, forsook the Gallic confederation for the Roman alliance, and the Galli were obliged to leave a force behind them to watch these people. They entered Tuscany with 50,000 foot and 20,000 horse and waggons, under the command of Concolitan, Aneroest, and Britomar. (Florus, ii. 3.)

The alarm of the Italians was shown by their readiness to assist the Romans with men and all kinds of supplies; for they did not view the Galli simply as the enemies of Rome, but as the enemies of the whole peninsula, from whom they could expect no mercy. Polybius (ii. 24) has given an enumeration of the force of Italy at this critical time for the purpose of showing what a bold undertaking Hannibal's subsequent invasion was. The whole number of men capable of bearing arms, Romans and Socii, was 700,000 foot, and 70,000 horse. The number that was called out for the defence of Italy was above 150,000 foot, and 6000 horse. The Gallic army advanced through Etruria as far as Clusium, plundering all before them; but learning that there was a Roman army in their rear, they retreated towards Faesulae, followed by the Romans. A battle was fought, in which the Romans were defeated. The consul L. Aemilius Papus, who had been sent to Ariminum to oppose the enemy's march in that quarter, hearing of the advance of the Galli upon Rome, moved from the upper sea, and came up with the Galli after their victory over the Romans. The Galli, who wished to save their booty, moved down to the coast, with the consul after them: and it happened at this time that C. Atilius Regulus, the other consul, who was returning from Sardinia, had landed with his troops at Pisae, and was marching towards Rome by the opposite road to that which the Galli had taken. They were going north, and the consul was coming south. Thus they were hemmed in between two armies; but, like brave and skilful soldiers, finding an enemy before and behind them, formed two lines of battle, and presented two fronts to their enemy's two armies. The Galli were near Telamo, as Polybius says, on the coast of Etruria, when their foragers fell in with the advanced troops of Atilius; but it is not easy to see why they had got so far south, as their object was to retreat as quickly as they could. The Galli fought with the most resolute courage, being in no respect inferior to their enemy, except in the quality of their weapons and their armour. It is said that 40,000 Galli perished, and 10,000 were made prisoners. "In this manner then, the most formidable of the Celtic invasions was brought to nought, after threatening all the Italians, and especially the Romans, with great and terrible danger." (Polybius.)

In the following year the Boii submitted: and in B. C. 223 the Romans for the first time crossed the Po with their armies, and invaded the country of the Insubres, under the command of the consul C. Flaminius, who defeated the enemy in a great battle,

Digitized by Google

Polybius on this occasion states a curious fact about the Gallic swords: they were made only for cutting, and were so bad that they were bent by the first heavy blow, and could not be used again till the men had straightened them on the ground by means of their feet. The Roman sword was pointed and fitted for a thrust. In the following year (B. C. 222) the consuls M. Claudius Marcellus and Cn. Cornelius Scipio continued the war against the Insubres, who sent for a fresh body of Gaesati to help them. The Romans took Acerrae on the Addua, and Mediolanum, the chief town of the Insubres, by storm. This ended the war; and the Insubres submitted without terms. Marcellus (B. C. 221) had a triumph in which he carried the Spolia Opima, having killed with his own hand a Gallic prince, Virdomarus. (Plut. *Marcellus*, 8.) In B. C. 218 the Romans planted two Latin colonies in their new conquests, each of 6000 men,—Placentia (*Piacenza*) on the south side of the Po, and Cremona near the north bank of the river a little lower down. The Italian Galli, though beaten, were not disposed to remain quiet, and it was in the hope of rousing this formidable people against the Romans that Hannibal determined to invade Italy through their country (B. C. 218). He hoped with the aid of the Galli to destroy the Roman empire. When Polybius began his history of the Second Punic War, he wrote as an introduction to it an historical sketch of the history of the Cisalpine Galli down to B. C. 218, which has often been referred to here. But as he well knew the value of a geographical description of a country which is the scene of historical events (iii. 36), he prefixed to his historical sketch of the Cisalpine Galli an outline of the geography of the country which they occupied (ii. 14, &c.). This is the first attempt that we find of a geographical description that deserves the name. Polybius (ii. 14) compares Italy to a triangle, the apex of which is at the south, in the promontory which he calls Cocynthus. [COCINTHUS.] The base of this triangle is the hill country along the foot of the Alps (ἡ τῶν Ἄλπεων παραρεία), which, beginning from Massalia (*Marseille*) and the parts above the Sardinian sea, extends without interruption to the innermost recess of the Adriatic; but it does not quite reach the Adriatic, for it stops short, and leaves a small intervening space. At the base of this hill country, on the south, lie the most northern plains of Italy, which were the seat of the Gallic peoples. These plains also form a triangular figure, the apex of which is at the junction of the Alps and Apennines, not far from the Sardinian sea above Massalia. The northern side of this triangle, which is formed by the Alps, is 2200 stadia long; and the southern, which is formed by the Apennines, is 3600 stadia long. The sea-coast of the Adriatic forms the base of the triangle, which from the city Sena to the northern extremity of the Adriatic is 2500 stadia long. Consequently, the text says, the whole circuit of these plains is not far short of 10,000 stadia. The Ligustini (Ligures) inhabit the Apennines, from the place where they commence above Massalia and their junction with the Alps. They inhabit both the slope towards the Tyrrhenian sea and the slope towards the plains; along the coast as far as Pisae, the most western city of the Tyrrheni, and inland as far as Arretium (*Arezzo*), where the Tyrrheni begin. Next to them, the Umbri occupy both slopes of the Apennines. At the place where the Apennines are about 500 stadia from the Adriatic, they turn to the right and run through the middle of Italy. The remainder of this side of the triangle belongs to the plain country, and extends to the sea and the city Sena. The Po, famed by the poets under the name of Eridanus, has its sources in the Alps, about the apex of the triangle described above, and it descends to the plains by a southern course. Having reached the plain country, the river turns to the east, and flowing through it, enters the Adriatic by two mouths. The greater part of the plain country, which is divided into two parts by the Po, lies on the side towards the Alps and the northern part of the Adriatic.

The junction of the Alps and Apennines is an arbitrary point. [APENNINUS.] There is no branch of the Po which answers the description of Polybius, except the Duria Major (*Dora Baltea*); and if he means this branch, he makes the Apennines extend as far north as the *Little St. Bernard*. This may seem to explain why he gives so large an extent (3600 stadia) to the Apennines, from the point of junction with the Alps to the latitude of Sena. But a place so remote from the Sardinian sea and from Massalia does not agree with the rest of his description, which would apply better to the branch of the Po which rises in Mons Vesulus (*Monte Viso*). But this branch runs north before it turns to the east. His choice of Massalia as a point of reference is not exact; but it was the best known place on the coast between the Var and the Rhone. The conclusion is, that his knowledge of the western part of the basin of the Po was not very exact; but his general description of the great plain is correct, and, with such means and maps as he had, it is good. [ALPES.]

This basin of the Po consists of a hill country, which lies at the base of the highest ranges, and of a plain country, a fact which Polybius had observed in his travels; for he says, "On each side of the Alps, the side to the Rhodanus, and the side to the plains, the hilly and earthy (not rocky) parts, those towards the Rhone and the north, are inhabited by the Transalpine Galatae, and those towards the plains by the Taurisci and Agones, and several other barbaric peoples." The northern slope of the Apennines is formed by lateral branches, which run down from the axis of the mountain to the plain. The direction of these branches is shown by the numerous river valleys, from the Stura in the west, which flows into the Tanarus, which flows into the Po, to the streams which enter the sea about Ravenna, which town may be considered near the southern limit of the basin of the Po. The streams that flow from the Apennines south of Ravenna as far as the Aesis, which is a little south of Sena, run into the Adriatic, and are beyond the basin of the Po. The boundary between the plain and the hill country in the eastern part of the Po is marked pretty nearly by the road from Ariminum through Modena to Parma.

On the north side of the Po, the valleys which lie within the hill country (ἡ παρόρεια) along the base of the Alps have a general southern direction, as the course of the rivers shows by which they are drained. In several of these valleys there are deep, longitudinal depressions, into which the rivers flow at the north, and, filling them up, flow out from the southern extremity through the plain to the Po. The depressions filled with water are the lakes of the sub-Alpine region,—Verbanus (*Lago Maggiore*), Larius (*Lake of Como*), Sebinus (*Lago d'Iseo*), Benacus (*Lago di Garda*), and some smaller lakes. The southern end of these lakes marks in a general way the limit of the hill country, and south of this limit

Digitized by Google

the great plain begins. The most eastern of these affluents of the Po is the Mincius, which flows through the great lake Benacus. A ridge of hills lies between this lake and the river Athesis (*Adige*), which descends from the Rhaetian Alps in a long valley, which has a general southern direction. On reaching the plain, the Athesis turns SE. and E., and, running parallel to one of the branches of the Po, enters the Adriatic. The Athesis forms a natural boundary in this great plain, and is the limit of Gallia Cisalpina, considered as the country of the Galli. The territory east of it, Venetia, or the country of the Veneti, extended along the Adriatic to the head of the gulf. It is drained by numerous streams, whose upper courses are in narrow valleys in the mountain region: and the lower part of their course is through the flat country which borders the coast of the Adriatic from Ravenna northwards to the bay of Tergeste (*Trieste*). The Po, and the numerous streams that enter the Adriatic through the plains north of it, are described under their several names [ATHESIS, PADUS, &c.].

The length of the great plain from Augusta Taurinorum (*Torino*) to the delta of the Po is above 200 miles; the breadth varies in different parts. Between Bononia (*Bologna*) and Verona it is near 70 miles wide. From the towers of Bologna, a man can see over this wide level as far as the Euganean hills at the back of Verona.

Gallia Cisalpina, as already observed, has a narrow meaning, if we limit the term to the parts which were occupied by the Galli. There is no doubt that the Romans first used it as a general name for North Italy, without fixing its meaning exactly, though they meant by it the country of the Cisalpine Galli. Afterwards they gave the name to all the basin of the Po, and included in it at least so much of the hill country as they had subdued; but the people within the Alps (Inalpini) and on the Italian side were not subdued till the time of Augustus.

The following are the chief Alpine tribes of Gallia Cisalpina, proceeding from west to east. The Lepontii were both on the north and on the south side of the Alps, in the country that lies between the sources of the Rhodanus, Rhenus, and Ticinus. The Focunates were probably on the west side of the Lago Maggiore; the Mesiates, at the north end of the lake; and the Isarci, on the south-east side. The Genauni are placed by some writers on the north-east side of the Maggiore. About the lake Larius, or *Como*, in the south part, were the Orobii, in whose country Caesar established the Latin colony of Novum Comum. The Culicones [CULICONES] were on the NE. side of the lake of Como; and the Vennones are supposed to be the inhabitants of the Valteline. The Suanetes and Rugusci seem to have been in the hills north of Bergomum (*Bergamo*). The Camuni [CAMUNI], a tribe akin to the Euganei, were in the upper valley of the Ollius (*Oglio*); and the Euganei, an old Italian people, were situated, in the historical times, about the lake Benacus (*Garda*) and about Edrum (*Idro*). The Stoni, mentioned by Pliny, may, perhaps, be somewhere north of the Benacus. The warlike nation of the Rhaeti, who gave name to a part of the High Alps, were east of the Lepontii, but only a small part could be within the limits of Italy. The valley of the Adige, which forms one of the great roads into Italy from the basin of the Danube, contained the Tridentini, whose position is determined by that of Tridentum (*Trento*) on the Adige; and the Brixentes are the people of *Brixen*, higher up in the valley of the Adige. The Breuni were still farther north [BREUNI]: they are incorrectly placed by some modern writers east of the *Lago Maggiore*.

East of the Athesis in the hill country the position of the Medoaci was probably in the upper valleys of the two rivers named Medoacus or Meduacus; and in the mountains above the head of the Adriatic were the Carni, a Celtic people.—for they were Celtae in these parts. [CARNI.] The country between the Adige and the Carni was Venetia or the country of the Veneti, which is generally excluded from the descriptions of Gallia Cisalpina in the limited sense; and this is correct enough, for the Romans had no wars with the Veneti, and their writers have not told us that they were Galli. This name, one of the oldest national names of Italy, has subsisted to the present day. If the Veneti were Celtae or not, they belong to some very early migration, and the supposition that they were Celtae, is at least as probable as any other. The remark of Polybius (ii. 17) as to their language, is not decisive against the supposition of their being of Gallic or Celtic stock. Herodotus (v. 9) had heard of the Illyrian or Eneti on the Adriatic, and he speaks of Eneti (i. 196) as Illyrians, from which, even if it is true, we can conclude nothing, except that the Eneti, who are probably the Veneti, were on the Adriatic in the fifth century before our era. Strabo (p. 212) gives two traditions about the Veneti, one that they were from the Armoric Veneti in Gallia, and another that they were from the Paphlagonian Heneti. In another place (p. 195) he has a sensible remark on this matter: he says, "I think that the Veneti of Transalpine Gallia were the parent stock of the Veneti on the Hadriatic, for nearly all the rest of the Celtae who are in Italy, here migrated thither from the country beyond the Alps, like the Boii and the Senones; but on account of the sameness of name (some) say that they are Paphlagonian. However, I do not speak positively, for in such matters probability is sufficient." This passage contains a good deal. First, it states that nearly all the Celtae of Italy came from the country beyond the Alps, which implies that there were some Celtae who did not come from Transalpine Gallia: secondly, he means to say, that the Veneti are Celtae, for he says, "nearly all the rest of the Celtae," which implies that the Veneti were Celtae. Besides, if they were not Celtae, but something else, he would not have supposed that they were descendants of the Transalpine Veneti. His text clearly means that they were Celtae. His argument for their Transalpine origin is not worth much. We might just as well suppose these Italian Veneti to be the progenitors of the Transalpine Veneti; for, as Herodotus says, "in a very long time any thing may take place."

Polybius (ii. 17) enumerates the principal Gallic tribes, for he does not profess to mention all, from west to east; and first, those on the north side of the Po. He places the Lai and Lebecii or Laevi and Libui about the sources of the Po, which is not very precise. Probably they did not extend farther east than the Ticinus. Polybius only mentions the Salassi once (*Frag.* xxxiv. 10), and he describes one of the passes over the Alps as lying through their country. They were north of the Laevi and Libui in the valley of the Duria Major, the *Val d'Aosta*, in which was the subsequent Roman settlement of Augusta Praetoria, and lower down at the entrance

Digitized by Google

f the valley was Eparedia, also a Roman settlement; nd, according to Pliny (iii. 17), a Gallic name. here is no evidence that the Salassi were Celtae, hough the want of evidence does not prove that ey were not. They were mountaineers, not inha- itants of the plains. They took no part in the ars of the Cisalpine Galli against Rome; and they ere not subdued till the time of Augustus, though revedia, at the southern entrance of the great alley, was settled before that time. [EPOREDIA.] ext to the Laevi and the Libicii were the Isombri, Insubres, between the hill country and the Po. heir eastern limit seems to have been the Addua Adda); and their chief city, Mediolanum, had a allic name, but its origin is unknown. There is a rious confusion in the MSS. about the name of is people. In the passage already quoted from olybius (ii. 16), where he describes the Apennines s to the Ligurians as occupied by Umbri, three SS. (ed. Bekker) have Isombri instead of Umbri; nd in iii. 86 one MS. has Isombri. But in both assages the Umbri are meant. Another form of e name, Sambri, has been mentioned, which occurs Strabo. Editors generally take great pains to t rid of all these troublesome varieties, and to duce them to uniformity. The forms Insobares, nsobri, are stated to be the forms in Polybius by tephanus (*s. v.*); and the form Insobri occurs in e Fragments of Polybius, but this does not prove at it was his genuine form. In the Roman form nsubres, the *n* does not seem to be a radical part the name, and *subr* is the real element. There no authority for the existence of a tribe in Gallia lled Insubres, except the passage of Livy already ted; and this name ought to be excluded from the aps of Transalpine Gallia. The Isombri are an lian people, of whose origin nothing is known; t they were Galli.

The Cenomani or Gonomani, as Polybius writes r name, were due east of the Isombri along the o, and their eastern limit was probably the Adige; t we do not know whether they occupied the untry between the Lower Adige and the Po. Mantua uld lie within their territory, and Cremona, the rst Roman settlement north of the Po (B. C. 218), e choice of which may have been determined in me measure by the friendly relations between the omans and the Cenomani at that time. Verona, st of the Adige, is named by Livy as one of the wns of the Cenomani, which is certainly not true, nless the territory of the Cenomani extended some stance east of the Adige; for this river is a natural d a political boundary. Brixia was one of the wns of the Cenomani, and there may be no reason doubt that Bergomum was one also. The northern rt of the Cenomani was the hill country of the gusci.

The tribes on the south of the Po were also all the plain. The most western were the Anares Polyb. ii. 17), whom Polybius, the only author who entions them, describes as about the Apennine, by ich he means the base of the hills. They are herwise unknown. Their neighbours on the east re the Boii. Polybius (ii. 32) speaks of Anamares, ho have been identified with the Ananes; but the me is different enough, and Polybius places the namares in Gallia Transalpina near Massilia. The ii occupied the country along the south side of e Po to the foot of the Apennines, and the northern pes of these mountains. Their limits can only be proximated to by mentioning the towns within their territory. Bononia, originally called Felsina, when it was an Etruscan city, was one of them, and Mutina and Parma were two others. Placentia, near the junction of the Trebia and the Po, may have been within their limits; if it was not, we must place it in the country of the Ananes. East of the Boii were the Lingones, "towards the Adriatic" (Polybius). This would place them in the low flat land east of Modena and Bologna, in the Ferrarese, a country that cannot be inhabited without keeping up the canals and embankments any more than many parts of the Netherlands. If the Lingones really maintained themselves in this place, they must have been an industrious people. We know nothing at all of their history in Italy, except what a modern writer says, founding his remark on Livy (v. 35), that the Lingones came into Italy with the Boii, and probably shared all their undertakings and their fate, since there is no other special mention of them. A man who has the gift of reason would come to a different conclusion: that the Lingones shared neither the undertakings nor the fate of the Boii. They were in their marshes, keeping out the water and looking after their hogs and beasts, and the Romans would not touch such people till all the rest were subdued. The last tribe was the Senones, "on the sea" (Polybius). The limits of the Senones cannot be exactly defined. The river Aesis may have been their southern limit. Strabo (p. 217) says that the Aesis was originally the boundary of Gallia Cisalpina (*ἐντὸς κελτική*), and afterwards the river Rubico.

Thus we see that these Gallic nations, with whom the Romans had so long a struggle, were all inhabitants of the plains, and only of those parts of the hilly region which are contiguous to the plains; but not a hill people, nor mountaineers. Only two nations make a great figure among them, the Isombri and the Boii. There is no evidence that the Isombri came from Gallia Transalpina; and very little to connect the Boii with this Gallia. These facts are worth the consideration of a future historian of ancient Italy. Niebuhr, who rejects Livy's account of the time of these Cisalpine Galli settling in Italy, supposes them to have crossed the Alps only some ten or twenty years before they took Rome, and he affirms this on the authority of Polybius. Diodorus certainly places the passage of these Galli over the Alps (xiv. 113) immediately before the capture of Rome; but we cannot infer from Polybius at what time he supposed these Cisalpine Galli to have crossed the Alps. He says nothing of ten or twenty years, for he knew nothing of the time, and like a prudent man he leaves the thing as obscure as he found it. The true conclusion is, that we know nothing at all of the Gallic settlements in North Italy; and yet there were Galli there, and the country which they occupied was Gallia in Italy. We cannot suppose that the Galli exterminated all the people of the plains which they got possession of. If any were left, they would be Umbri; for as to the Tuscans, they, probably, during their possession of the Po country, lived in strong towns, and made somebody else cultivate the ground for them. There is one remarkable place in the country, Spina, an Hellenic settlement near the sea, and perhaps on the southern branch of the Po. What effect it had on the civilisation of Cisalpine Gallia, we do not know; and, indeed, it may have been at an early period reduced to insignificance. It was fixed in a like position with respect to inland Galli and barbarous tribes with the Phocaean town of Massalia, on the south coast of Trans-

Digitized by Google

alpine Gallia; but it had a less fortunate and less brilliant history. (Strab. v. p. 214.)

The other tribes in the plain of the Po, which have not yet been spoken of, are Ligurians, or else tribes of unknown origin. Polybius (ii. 15) has already mentioned Taurisci and Agones as inhabiting the hill country in the basin of the Po. He does not say that they were Galli, but he seems to mean that they were. There were Taurisci in the Gallic army at the great battle near the Telamo. (Polyb. ii. 28.) After mentioning these Taurisci, Polybius adds that the Ligustini inhabit both sides of the Apennines. As he places the junction of the Alps and Apennines considerably north, and describes the position of the Taurisci in the terms already stated, he may intend to place them a great way to the east, and they may be a people belonging to the Taurisci of Noricum. If this is true, it shows that the Cisalpine Galli in their contests with the Romans got help from other Galli besides those within the limits of Gallia Transalpina as determined by the Romans. It is at least certain, notwithstanding the similarity of name, that Polybius, when he speaks of the Taurisci does not mean the Taurini, whom he places in the west part of the basin of the Po, in the higher part of the river (iii. 60). We might infer from Polybius that the Taurini were not Galli; and Strabo (p. 204) and other authorities distinctly state that they were Ligures. Their chief town, afterwards Augusta Taurinorum (*Torino*), determines their position in a general way, which is all that is necessary here. In that angle of the Po which is drained by the Stura and other branches of the Tanarus were the Vagienni, whose limits Pliny (iii. 16) extends to Mons Vesulus. Their chief town was afterwards Augusta Vagiennorum (*Bene*). [AUGUSTA VAGIENNORUM.] East of the Vagienni were the Statielli, one of whose places, Aquae Statiellae, is the modern *Acqui* in the valley of the Bormida. None of these Ligurian tribes in the basin of the Po belong to Gallia Cisalpina in its limited sense of the country of the Galli; but they were included in the political Gallia Cisalpina of a later period, together with Liguria south of the Apennines. As Ligurians however they are properly treated under that name. We cannot fix the limit between the Ligures and Ananes on the south side of the Po. It was probably west of the Trebia, and certainly east of the Tanarus. Nor can we fix the limit between the Ligures and Galli on the north side of the Po; but it seems likely that the Duria Major may have been the limit.

Hannibal arrived in the north of Italy B. C. 218, with his forces diminished and weakened by a long march and the passage over the Alps. Before he reached Italy the Boii and Insubres took up arms and invaded the lands of Placentia and Cremona. The Roman triumviri, who had come to mark out the allotments, fled to Mutina, where they were besieged by the Galli. (Liv. xxi. 25; Polyb. iii. 40.) L. Manlius, who was hurrying to Mutina to relieve the Romans there, lost many of his men from the attacks of the Galli in his march through the forests, but at last he made his way to Tanetum near the Po, where some Cenomani from Brixia came to him. Manlius was also joined at Tanetum by the praetor C. Atilius, who was sent to his aid.

Though Hannibal had prepared the Italian Galli for his arrival, and relied on them for the success of his invasion, he was coldly received at first. The Cenomani, Veneti, and some of the Ligures, were on the Roman side; and the Boii and Insubres were kept in check by the presence of the consul P. Cornelius Scipio. The victory of Hannibal at the Ticinus, though it was only a fight between cavalry, determined the disposition of his wavering allies, and from this time the Galli followed him through his Italian campaigns. In the battle on the Ticinus there were still Cenomani on the Roman side (Liv. xxi. 55), who fought against the other Galli who were with Hannibal. The Carthaginian won the battle of the Trebia, with little loss of his Iberian and Libyan soldiers. His Gallic auxiliaries lost a great number of men. When he crossed the Apennines he had a large body of Galli with him, and required all the prudence of this great commander to keep his turbulent, discontented auxiliaries in order. The Galli, however, served him well in the great battle at the Trasymene lake (B. C. 217), and also at Cannae (B. C. 216), where 4000 of them fell — more than two-thirds of the whole loss on the Carthaginian side. (Polyb. iii. 117.)

Though the victory of Cannae brought many of the Southern Italians to the side of Hannibal, they were not like the desperate fighters who had driven him from the banks of the Po, and of whom he had now lost the greater part without being able to get fresh supplies. He never could recover his communication with North Italy after he had gone to the south. The Romans turned their arms against Gallia Cisalpina, both to punish the revolted Galli and to cut Hannibal off from getting recruits. L. Postumius (B. C. 216), consul designatus, was sent over the Apennines into the country of the Boii, and he and nearly all his army perished in the great forest called Litana, which was somewhere on the northern slope of the Apennines which looks into the basin of the Po. The story is told by Livy, with marvellous circumstances of exaggeration, probably founded on some small truth (xxiii. 24). The consul's head was cut off by the Boii; and the skull, being cleaned, was lined with gold, after their fashion, and used as a cup in their great temple on solemn occasions. This barbaric practice of the Galli was not so inhuman as Roman superstition of the year before at Rome they had buried alive a vestal virgin who was accused of unchastity: and among the extraordinary religious ceremonies performed after their great defeat at Cannae they buried a Gaul male and female, and a Greek male and female, alive, in a stone vault in the cattle-market. (Liv. xxii. 57.)

Hannibal was still in South Italy in B. C. 207, eleven years after he had crossed the Alps. He attempted to open his communication with North Italy by his brother Hasdrubal, who marched from Spain through Gallia and crossed over the Alps into the basin of the Po, by the route that his brother had taken. Hasdrubal had been joined in Gaul by the Arverni, — the warlike people of the Auvergne, — and by other Gallic and Alpine tribes (Liv. xxvii. 39); and he got recruits from the Cisalpine Galli. One of the consuls, M. Livius Salinator, who was sent to oppose him, posted himself near the small stream Metaurum, which flows from the central Apennines into the Adriatic between Pisaurum and Sena. The other consul, C. Claudius Nero, who was watching Hannibal in the south, intercepted a letter from Hasdrubal to Hannibal. He saw the danger of letting the two brothers unite their forces, and determined to prevent it. He hurried to the north with a division of his army, and joined his colleague

Digitized by Google

Hasdrubal was compelled to fight, and he made the best disposition of his troops that he could. Against the right wing of the Romans, where Nero commanded his picked men, Hasdrubal placed the Gauls on his own left,—not so much because he confided them, as because he suspected that the Romans feared them. On the banks of the Metaurus the Romans got full satisfaction for Trasimenus and Cannae. The enemy was slaughtered by thousands: and so complete was the victory that Livius all but some Ligures and Cisalpine Gauls, who either had not been in the battle or had escaped from the rout, to march off without being followed: "Let some remain," he said, "to be the messengers of the enemy's defeat and of our victory." (Liv. xxvii. 51). Hasdrubal perished in the battle: and when Nero returned to his camp in the south he ordered his head to be thrown before the Carthaginian outposts, that Hannibal might have no doubt about his brother's fate.

The Carthaginians made another and last effort to assail the Romans through North Italy. In the summer of B.C. 205, in the fourteenth year of the war, Mago, the son of Hamilcar, landed in the Ligurian coast and seized Genua, where the Gauli furnished him. Here also Mago received twenty-five ships from Carthage, 6000 infantry, 800 horsemen, and seven elephants, a large sum of money to hire troops with, and orders to move on towards Rome and join Hannibal. (Liv. xxix. 4). Mago maintained himself in Cisalpine Gaul as late as B.C. 203, when he was defeated in the territory of the Insubres by the Romans, and dangerously wounded. He was recalled to Africa by the Carthaginians, and he set sail, but he died on the voyage. Hannibal, who was recalled about the same time, took with him some of the men who had followed him all through the Italian campaigns; and in the battle of Zama (B.C. 202), where he was defeated by P. Scipio, one-third of his men, it is said, were Ligures and Gauli. The Second Punic War ended B.C. 201.

Mago left one of his officers, Hamilcar, behind him in Cisalpine Gaul (Liv. xxix.). If he was one of those who escaped from the battle of the Metaurus; it is not certain which. Hamilcar stirred up the Insubres, Boii, and Cenomani, and some Ligurians, and fought on Placentine land and burnt it. He then crossed the Po to attack Cremona. L. Furius Purpureo, the governor of the province, as Livy (xxxi. 10) terms it, was near Acherrae with a force too small to relieve Cremona. He wrote to the senate for help, and his letter makes the fact of Placentia and Cremona having maintained themselves all through the Punic War. Furius soon after defeated the Gauli before Cremona, and Hamilcar fell in the battle. (Liv. xxxi.). But the war still continued, and the praetor M. Aemilius Tamphilus fell into an ambuscade in the territory of the Insubres, and was compelled to leave the country with the loss of above 4000 men. (Liv. xxxi. 7.) Sex. Aelius, one of the consuls of B.C. 198, did no more in Gallia than secure the interests of Placentia and Cremona, which had been ingored in the late troubles. It was not by securing these two colonies that the Romans were to subjugate this country, and they proceeded to the work with the characteristic [illegible]. In B.C. 197 both the consuls [illegible] and Q. Minucius Rufus, went to [illegible]. [illegible] went direct against the Insubres. Rufus went to Genua and began the war with the Ligures in the basin of the Po. Having received all the Ligurians on the south of the Po except the Ingauni, and all the Gauli except the Boii, he led his troops into the country of the Boii, who had gone over the river to help the Insubres. The Boii returned to defend their lands. The two armies Cenomani were induced by Celtillus to betray the Insubres, whom they had joined, and the story is told in the battle which followed the Cenomani fell upon their own countrymen and contributed to their defeat. About B.C. 194 Gauli are said to have taken [illegible] in some skirmishes: it was in this battle that Hamilcar fell. (Liv. xxxi. 21, xxxii.). Livy knew even some particulars which affirmed that Hamilcar appeared in the character of Hannibal. (Liv. xxxii. 21). The news of this defeat discouraged the Boii, who declared to their chiefs and left the Roman commander to dictate their terms and turn their hostile [illegible] against the Ligures. The Boii were [illegible] and [illegible] Ligures, who had joined the Insubres, were [illegible] in a great battle, and lost the town of Clastidium, upon which eight-and-twenty strong places surrendered to him. Flaminius carried on the war in the country of the Boii in the year [illegible] [illegible] [illegible]

narrative of the Roman historian admits the obstinate resistance of the Galli, of whom 14,000 fell, and 1092 of the foot were taken prisoners. The mention of the exact number of the captives is curious (Liv. xxxv. 5), and Livy probably had good authority for it. The number of prisoners could be ascertained, for they would be sold. The Romans also counted their loss in this battle by thousands.

The complete subjugation of this brave people was accomplished by the consul P. Cornelius Scipio Nasica (B. C. 191), a cruel man, who slaughtered the Boii without mercy, and made it one of the grounds for claiming a triumph that he had left only children and old men alive. (Liv. xxxvi. 40.) In the triumph of Scipio a great quantity of the precious metal appeared. Like most uncivilised people, and civilised too, as they are called, the Boii were fond of gold ornaments. They had also bronze vessels and silver vessels, which they made themselves, and not without skill, for the nation has always excelled in ingenuity, and shown an aptitude for all works of taste. They must have become a very different people in their habits from the Gallic invaders whom Polybius describes. The brutal consul led in his triumph, all together, the nobles of the Boii and the horses that he had taken from them. The nation had surrendered ("sese dediderunt"), according to Roman phrase; and about half the land was declared the property of the Roman people. This was the end of the nationality of the Boii in Italy. The survivors are said to have left the country. [BOII.] In B. C. 189 the Romans made Bononia a Latin colony (Liv. xxxvii. 57), and six years later the Roman colonies (Liv. xxxix. 55) of Parma and Mutina were settled. Polybius incorrectly speaks of Mutina as a colony in B. C. 218. The name of the Senones had been effaced long ago; the Boii now disappeared, and of the Lingones we know nothing, nor of the Ananes. The whole of Gallia Cispadana was Roman. In Gallia Transpadana there were no enemies except the Insubres, who, next to the Boii, had made the most vigorous resistance to Rome; but they had taken no part in the last wars, and they were now quiet. The perfidious Cenomani were long since the slaves of the Romans, and the Veneti never gave them any trouble.

It is generally supposed that Gallia Cisalpina was made a province upon the conquest of the Boii, B. C. 191. But though a great part of the basin of the Po was now brought under Roman dominion, and colonies were planted, we have no account of a regular provincial administration being established. In fact, the Romans dealt with their conquered countries in different ways, according to circumstances. Gallia Cisalpina was a Roman province, in one sense, long before B. C. 191, for every praetor or consul who was commissioned by the senate to carry on war there, had it for the time as his "provincia," the field of his operations. However, the making of the great road, called the Via Flaminia, from Rome to Ariminum, and the Via Aemilia from Placentia to Ariminum (B. C. 187), proves that the Romans were now settling in the country, and it must have had some kind of administration. A road was also made from Bononia across the Apennines to Arretium. (Liv. xxxix. 1, 2; Strab. p. 217.) But the limits of this provincial administration were less than those of the Cisalpine Gallia of Caesar's time. The conquest of the Ligurians, both those in the plains of the Po, and those in the mountains, was not yet completed; but these industrious, brave people were incessantly attacked by the Romans. The consul, M. Popillius, made war on the Statielli, near Carystum (B. C. 173), and sold the people and their property, though they had never attacked the Romans. The senate however, made amends for this monstrous injustice so far as they could, by an order for restoring the people to their liberty, and giving back what could be given of their goods; an order which we may be certain could only be imperfectly executed. (Liv. xlii. 7, 22.) It was probably from B. C. 109, when M. Aemilius Scaurus made the road from Pisae, past Luna, over the Apennines to Dertona, that we may date the subjugation of the Ligures. The Ligurian country was certainly a separate province, in the Roman military sense, for some time after the final defeat of the Boii. (Liv. xlii. 1, 10.)

In B. C. 186, 12,000 Transalpine Galli crossed the Alps into Venetia. Probably they came down the valley of the *Adige*. They began to build a town near the site where Aquileia afterwards stood. The Roman consul Marcellus (B. C. 183) gave them notice to quit. He took from them the implements that they had seized in the country, and what they had brought with them. These poor people sent some of their number humbly to state their case to the Roman senate: poverty had compelled them to cross the Alps, and they had chosen an uninhabited spot where they had settled without troubling anyone, and they had begun to build a town, which was a proof that they had not come to plunder. They were told that they must quit Italy, and their arms would be restored to them. They quietly packed up their moveables and crossed the Alps under the inspection of three Roman commissioners, who were well received by the Transalpine Galli. So humane was this warlike nation, that the Transalpine Gauls affected to complain of the great lenity that the Romans had shown to a body of men who, without permission of their nation, had dared to intrude on Roman ground. (Liv. xxxix. 54.) The consul Marcellus now asked permission of the senate, which he got, to lead his legions into Istria. At the same time the Romans founded the Latin colony of Aquileia, in the same year that they sent colonists to Parma and Mutina. Thus they secured a position at the head of the gulf of Venice, which they carefully maintained, to check the inroads of the barbarians on that side of Italy, and to extend their own dominion to the east of the gulf. In B. C. 173 3000 Transalpine Galli crossed the Alps peaceably, and begged the consul, Q. Fulvius Flaccus, and the senate to allow them to settle in Italy as subjects of the Roman people; but the senate ordered them to quit the country, and the consul received instructions to punish the leaders of the emigrants. We do not know from what part these men came, whether from Transalpine Gallia, as limited by Caesar in his Commentaries, or from the country north of the eastern Alps. But, if we consider the state of Gallia as it was in Caesar's time, when the poor were oppressed by the rich, and the cultivator of the soil was a serf, we can easily understand what drove these men to seek for a new home.

We know very little of the history of Gallia Cisalpina as a Roman province. It was rapidly filled with Romans, and became one of the most valuable of the Roman possessions. An instance of the wanton exercise of power by the consul C. Cassius is recorded when he held the province (B. C. 170). The ambassadors of a Gallic prince, Cincibilus, a mountaineer, complained to the senate that Cassius had invaded the country of the Alpine people, who

Digitized by Google

were Socii of the Romans, and carried off many thousands into slavery. The consul filled his pockets by selling his prisoners. He was no better than a barbarous African chief, who catches men, and sells them to the white man of Europe or America. A like instance of gross injustice occurred at a later time (B. C. 44), when D. Brutus, then governor of Cisalpine Gallia, led his men against the people in the Alps (Inalpini), to please his soldiers, and secure their fidelity. (Cic. *ad Fam.* xi. 4.) The senate declared their willingness to hear the evidence against Cassius, when he returned from Macedonia, where he then was. But in the mean time they got rid of their troublesome complainants by handsome presents, and allowing them to purchase ten horses and take them out of Italy. (Liv. xliii. 7.) The peace of Cisalpine Gallia was not disturbed again, except in B. C. 101, when the Cimbri came over the Eastern Alps, and crossed the Adige. They were defeated by Marius and Catulus in the great battle near Vercellae.

Gallia Cisalpina remained quiet during the Social War, and it was probably to reward the people for their fidelity that the consul Cn. Pompeius was empowered, B. C. 89, by a Lex Pompeia to give the political condition called Jus Latii or Latinitas to the towns north of the Po. Asconius, who is the authority for this, does not say that the Latinitas was given to all the towns north of the Po; but it is probable that it was. He remarks that Pompeius did not establish new colonies, but gave this Jus Latii to the towns which existed. The Latinitas placed the Transpadani in a middle position between Romani Cives and Peregrini, for those who had filled a magistratus in the towns that had the Latinitas acquired thereby the Roman civitas. This new Latinitas or Jus Latii is a different thing from the former condition of the towns of Latium and the Latinae coloniae. The Roman colonies (coloniae civium Romanorum) consisted only of Roman citizens, and they were Roman communities. Latinae coloniae might be composed either of Roman citizens or of Latini; but a Roman citizen who joined a Latina colonia in order to get a house and land, lost his civitas; and these Latinae coloniae were viewed as Latin communities. The Lex Julia, B. C. 90, after the Social War had broken out, gave the Roman civitas to all the Nomen Latinum, that is, to all such towns of Latium as were not already municipia or coloniae; and to all the Latin colonies in Italy. Thus all the Latinae coloniae became municipia; and when it is said that the Latinitas or Jus Latii was given by Cn. Pompeius to the Transpadani, it means to those towns which were not Latinae coloniae. The new political condition of these Transpadani was expressed by this term Latinitas or Jus Latii; and accordingly the word Latini now received a new signification, designating a class of people in a certain legal condition, and having no reference to a particular country and people.

It is not stated by any ancient authority what was done with the inhabitants of Gallia south of the Po, when the Transpadani received the Latinitas; but we cannot refuse to accept Savigny's conjecture, which he supports by the strongest arguments, that they received the Roman civitas; and it may be, as he supposes, by virtue of the same Lex Pompeia. It appears from Cicero (*ad Att.* i. 1, B. C. 65), that Gallia, which means all Cisalpine Gallia, had great influence over the elections at Rome by their votes; and therefore a large part of Gallia had the civitas at this time, and it must have been given either in B. C. 89, or between B. C. 89 and B. C. 65. But there occurred no occasion between these two dates for giving new political rights to Cisalpine Gallia, so far as we know; and there was a good reason for giving them after the close of the Social War. The conclusion, then, of Savigny is this: "In B. C. 89 the towns of the Cispadan regions became Roman municipia, and the Transpadani became Latinae coloniae. We must except Placentia, Cremona, and Bononia, which, being old Latinae coloniae, were changed into municipia by the Lex Julia (B. C. 90); also Mutina and Parma, which, being old Roman coloniae, underwent no change in their condition; we must also except Eporedia in Gallia Transpadana, which must have belonged to the one or the other of these two classes, for we do not know whether it was a Roman or a Latin colonia." This explains why Mutina is called by Cicero (*Phil.* v. 9) a colonia. It was in its origin a colonia, and might always be called so; but in Cicero's time it was a Roman town, and a municipium in the sense of that period. Cicero also calls Placentia a municipium, and he calls it so correctly, for such it was in his time; but it was originally a Latina colonia.

There is a passage of Suetonius (*Caes.* c. 8) in which he says that Caesar, when he was quaestor in Spain (B. C. 66), left it sooner than he ought to have done, in order to visit the Latinae coloniae, who were agitating about the civitas. This is explained by Savigny to refer to the Transpadani. In the following year (Dion Cass. xxxvii. 9) the censors could not agree whether they should admit the Transpadani as cives or not; which is another proof that the people south of the Po had the civitas. It was again talked of in B. C. 51, as we infer from the letters of Cicero (*ad Att.* v. 2, *ad Fam.* viii. 1), when they are rightly explained. Finally, in B. C. 49, Caesar, after crossing the Rubicon, gave the Transpadani the civitas. (Dion Cass. xli. 36.) Thus the towns of the Transpadani became municipia, except Cremona, Aquileia, and Eporedia, which were already municipia by virtue of the Lex Julia. When it is said that the towns of Gallia Cisalpina became municipia, we must understand this of course only of the larger towns: the smaller places were attached to the large towns, and depended on them. During Caesar's government of Gallia Cisalpina he added a body of colonists, some of whom were Greeks, to the inhabitants of Comum, and put them on the same footing as the former inhabitants. (Strab. p. 212.) Appian (*B. C.* ii. 26), states that Caesar established Novum Comum, and gave it the Latinitas; and he shows that he understood what he was speaking about, for he says, "Those who discharged an annual magistracy there became Roman citizens, for this is the effect of the Latinitas." Caesar's enemies at Rome took a malicious pleasure in treating a magistrate of Comum as if he were not a Roman citizen, intending by this to insult Caesar. Suetonius (*Caes.* c. 28) says that it was by virtue of a Rogatio Vatinia that Caesar gave the civitas to the people of Comum. He may be mistaken about the civitas, but Caesar no doubt acted under some lex.

The limit of Gallia Cisalpina on the south-east, during Caesar's proconsulate, was the Rubico; and it was this circumstance that made his crossing the river with his troops into Italy equivalent to treason against the state. The boundary on the west side

Digitized by Google

is fixed at the Macra (*Magra*), which enters the sea a little west of Luna. Some (Sigonius, *de Ant. Jur. Italiae*, i. c. 22) would extend the boundary to the Arnus. Polybius certainly (ii. 15) extends the Ligurian territory to the neighbourhood of Pisae, yet not to the Arno; for Pisae was an Etruscan city. But the boundary of Liguria, in the time of Augustus, was the Macra; and on the Gallic frontier the boundary was the Varus (*Var*): and this may have been so when Caesar was proconsul of Gallia. In the NE. the province extended at least to Aquileia. Caesar had Gallia Cisalpina and Illyricum as his provinces, besides Transalpina Gallia. Liguria was certainly within his province. At Aquileia he had three legions at the commencement of the Helvetic War (B. C. 58), which he carried over the Alps with him. (*B. G.* i. 10.) Aquileia was in the country of the Carni, but it was at this time within the province of Cisalpine Gallia; and this explains Livy (xl. 34), when he says that Aquileia was in the Ager Gallorum, which he might say in a certain sense. Venetia was of course in the province of Gallia Cisalpina. It seems from a passage in the eighth book of the Gallic War (*B. G.* viii. 24), that Caesar considered Tergeste (*Trieste*) to be in Gallia Togata; or at least the author of this book did. Sigonius makes the Formio (*Risone*), a little south of Tergeste, the boundary of Gallia Cisalpina in this part; but the boundary probably was not fixed. If the province included Istria, into which the proconsuls of Cisalpine Gallia had carried their arms, we may perhaps extend the limit here as far as the river Arsia (*Arsa*), which was at a later time the boundary of Italia. But there is no evidence to show how far the civitas was extended when the Transpadani became Roman citizens; it must have extended to Aquileia, or further, but we know nothing about this. Caesar generally passed the winter in North Italy during his Gallic wars, and he used to hold the conventus at this season. (*B. G.* i. 54, vi. 44.) Gallia Cisalpina, therefore, at this time had its division into conventus, like Sicily, and Hispania and Lusitania at a later time; but we do not know the names of the conventus, nor the divisions of the country for judicial and administrative purposes. The proconsul had the complete civil power in his hands.

Even after B. C. 49, when Gallia Cisalpina had the civitas, and consisted of Roman communities organised after Roman fashion, there was still one exception. The towns had no II. vir juri dicundo, or magistrates for the administration of justice. The proconsul had the general administration of justice, which he exercised either in his own person, or by praefecti, to whom he delegated his authority. "The towns were consequently here, on the whole, in a like condition with the single praefecturae elsewhere, which however were not numerous; with this exception, that they had not, like the praefecture, separate praefects, but the proconsul was the general praefectus for the whole province. Only one place, Mutina, was a real praefectura. The praetor did not exercise jurisdiction there, but a praefectus juri dicundo was sent from Rome." (Savigny.)

After the dictator's murder, B. C. 44, D. Brutus, one of his friends and assassins, held the province of Gallia Cisalpina, as governor, by the authority of the senate. He was beseiged in Mutina by M. Antonius; and in the spring of B. C. 43 the battle took place, before Mutina, in which the consuls Hirtius and Pansa fell. Cicero, in his Philippics, still speaks of the Provincia Gallia to the end of April B. C. 43. In the autumn of B. C. 43 the last proconsul of Gallia Cisalpina, D. Brutus, was caught and put to death by order of M. Antonius. No governor of Cisalpine Gallia was again appointed. Dion Cassius (xlviii. 12) speaks of Galatia Togata, as he calls it, in the year B. C. 41, as being already included in Italia; "so that no one, on the pretext of having the government there, could maintain troops on the other side of the Alps." This seems to imply an arrangement made between Octavianus and M. Antonius. From this time the name Italia, which in the popular language had sometimes been extended to Gallia Cisalpina, as already observed, comprehended all the country south of the Alps.

A lex was enacted for the regulation of the jurisdiction in Gallia Cisalpina, which is termed the Lex de Gallia Cisalpina. A considerable part of it was found A. D. 1760, in the ruins of Veleia, and it is preserved in the Museum at Parma. The date of its enactment was probably soon after B. C. 43. The name of the lex is now generally admitted to be the Lex Rubria, or Lex Rubria de Gallia Cisalpina, though some critics do not think that the name of the proposer of the lex is known. In his first essay on this subject Savigny doubted about the propriety of calling this lex the Lex Rubria, and he also supposed the object of the lex to be to give directions to the newly established magistrates in Gallia as to procedure. In the additions to his original essay he has expressed himself perfectly satisfied with Puchta's explanation of the purpose of the lex, and he derives from this explanation satisfactory evidence that the true name of the lex is Lex Rubria. The purpose of the lex is important for the understanding of the municipal organisation of Italy under the empire.

In the Digest we find the jurisdiction of the municipal magistrates limited in two ways: first, by the amount of the sum of money or matter in dispute: secondly, by the fact that they had the powers which belonged to the proper jurisdictio only, and not those which were comprised in the imperium. The origin of this double limitation, which appears in the Digest as a general rule for all municipal magistrates, must be sought for in the Lex Rubria. The second limitation deprived those magistrates of the power of granting a missio, bonorum possessio, and restitutio, and of compelling a praeterio stipulatio. As to the amount or value of the matter in dispute, the magistrates of Gallia were not allowed to decide in cases where it was above 15,000 sesterces. The lex then, had two objects: one was to limit the amount, as just stated, and to exclude the magistrates from the exercise of those powers which were contained in the imperium; the other was to provide rules for their direction, which these limitations made necessary, in order to prevent the administration of justice from being impeded. The magistrates mentioned in the lex are II. vir, IIII. vir, praefectus. The first is the ordinary name for a municipal magistrate; but probably II. viri I. D. (juri dicundo) were in Gallia, as in other places, more common than IIII. viri I. D. The third name, praefectus, occurs twice with the designation of Mutinensis. The old colony of Mutina was a praefectura, and the only one in Gallia. Accordingly, all the Gallic towns had for magistrates either II. viri I. D. or IIII. viri I. D. except Mutina, which had a praefectus I. D.

The amount of the matter in dispute in which a Gallic magistrate had jurisdiction was, as we have

Digitized by Google

sen, 15,000 sestertii. It remains to be explained what was the process, if the party who was condemned to pay did not obey the judgment. Puchta, who keeps close to the principle (which is true in the main) that execution belongs to the imperium, infers that the municipal magistrates had no power to order execution, but that the praetor at Rome must be applied to. This monstrous unpractical conclusion is a simple impossibility. According to this, as Savigny remarks, if a plaintiff at Padua obtained judgment in his favour in the matter of a few denarii, or for a bushel of wheat that he had sold, and the defendant did not pay, the plaintiff must make a journey to Rome to get execution. We must conclude that it was one of the objects of the lex, after having limited the jurisdiction of the Gallic magistrates to a fixed sum, to provide the means of enforcing their judgments, though we have no evidence of this. But both the general principles of Roman law as to jurisdictio (Javolenus, L. 2. *de Jurisdict.* 2. 1), and other arguments urged by Savigny, are decisive against the absurd conclusion of Puchta.

The names by which these Gallic communities are mentioned in the lex are various. In one passage "municipium" is used as a generic name, comprehending coloniae and the praefectura; and this denomination could be correctly used, for the whole country contained only Roman communities. In another passage occur "municipium," "colonia," "locus;" where "locus" means any place which does not belong to the other two classes. Savigny supposes that "coloniae" may mean such places as had not consented to be changed into "municipia;" but that these could only be a few, for he thinks that the towns south of the Po, when that country obtained the civitas, and the Transpadani, when they also, at a later time, obtained the civitas, must first have become fundus, as the Romans termed it (see *Dict. Antiq.*, art. Fundus); that is, must have given their consent to become Roman municipalities, like the Italian cities which received the civitas by virtue of the Lex Julia. This explanation of the word "coloniae" in the Lex Rubria seems doubtful; and it may be nothing more than a legal superabundance of language. It is true that, if there was not and could not be a colonia in Gallia, the name would have no meaning in the lex, and would be not only an idle, but an absurd redundancy; but there had been coloniae, and the lex may mean, whether you call the place municipium or colonia, or any other name which is applicable to it. In another passage there is a larger enumeration of places, if the abbreviations are rightly explained:—"oppidum, municipium, colonia, praefectura, forum, vicus, castellum." Here "oppidum" is generic, not particular class; "municipium" comprehends most of the chief towns; "colonia," according to Savigny, only a few towns; and "praefectura," only Mutina. The other three names denote smaller places, which had a less complete organisation. Places of this kind, it is assumed (and there can be no doubt of it), had not their separate magistrates; a village had not its own judge. This appears from the general system of town organisation in Italy, where each chief place had its district or territory, the smaller places or villages in which were attached to the chief place, and included in its jurisdiction. A "forum," "vicus," or "castellum," would be a part of the territory of a "municipium." The municipium was the centre of administration, as we see in the fact of the census being taken there. When the lex, in speaking of these smaller places, says, "qui ibi juri dicundo praest," this does not lead to the conclusion that these places had their separate magistrates, for this expression may apply just as well to the II. viri of the town to whose jurisdiction the "vicus" or the "forum" belonged. (Savigny, *Vermischte Schriften*, vol. iii., *Tafel von Heraklea*; Puchta, *Zeitschrift für Geschicht. Rechtsw. Lex Rubria*, &c. vol. x.)

The division of Italy into eleven "regiones" by Augustus had for its immediate object the taking of the census, which was conducted in a new way, and was taken in the several districts. The regiones into which Gallia was divided were: Regio XI., which was Transpadana, or Italia Transpadana; Regio X., which was Venetia et Histria, sometimes called Venetia only; Regio IX., which corresponded to the former Liguria; and Regio VIII., which was bounded on the north by the Po, on the east by the Hadriatic, on the south by the Rubicon, and on the west by the Trebia, which separated it from that part of Regio IX. which was north of the Apennines. [G. L.]

GA'LLIA TRANSALPINA, or simply GALLIA (ἡ Κελτική, Γαλατία: *Adj.* Gallicus, Κελτικός, Γαλατικός). Gallia was the name given by the Romans to the country between the Pyrenaei Montes and the Rhenus. When it became Roman, and was divided into several parts, they were called Galliae. (Plin. iii. 3; Tac. *Ann.* i. 31.) It is sometimes called Ulterior Gallia, to distinguish it from Citerior Gallia or Gallia in North Italy; though the name Ulterior is applied by Caesar in one or two passages to the Provincia only. It was also called Gallia Comata (Cic. *Phil.* viii. 9), with the exception of the Narbonensis, because the people let their hair grow long. The southern part of this country along the shore of the Mediterranean, which Caesar calls Provincia, was originally called Braccata, because the natives wore "braccae" or breeches; afterwards it was termed Narbonensis. (Mela, ii. 5; Plin. iii. 5.)

The Greek name Celtice (ἡ Κελτική) was earlier in use than the Roman name, for the Greeks were settled on the south coast of France long before the Romans knew anything of the country. But the name Celtice was used in a vague sense by the early Greek writers. [Celtica.] The name Galatia came into use from the time of the historian Timaeus; and even the compound Κελτογαλατία (Steph. B. *s. v.* Λούγδουνον; Ptol. ii. 7) was afterwards used. In the Roman period the Greek writers sometimes also used the Roman form Γαλλία. The Greek names by which Transalpina Gallia was distinguished from Cisalpina, were merely descriptive of its position, as: ἡ ὑπὲρ τῶν Ἄλπεων Κελτική, ἡ ὑπεράλπειος, ἡ ἔξω, ἡ ἔκτος. The Romans used the name Galli as a general term for all the people whom they considered to be of Gallic race. But the oldest Greek form of the name was Κελτοί (Herod. ii. 33), and Κελται, and Γαλάται. Polybius (ii. 15) uses the Roman word Τρανσαλπινοί, to distinguish the Transalpine from the Italian Galli, which word Strabo renders by the Greek ὑπεράλπειοι (p. 212).

A complete geography of Gallia might be a chronological exposition of all that the Greeks and Romans said or supposed about this country; but, as much of this is erroneous, and as their knowledge of it was gradually extended and corrected, the proper purpose of such an article as this is to say what can be said within reasonable limits, and what is useful for reading the best Greek and Roman writers. When Herodotus (ii. 33) says that the "Istrus (*Da-*

Digitized by Google

nube), which has its source in the country of the Celti and at the city Pyrene, in its course divides Europe into two equal parts," and "that the Celti are out of the Pillars of Hercules, and that they border on the Cynesii, who are the remotest inhabitants of Europe to the west," it is clear that he was entirely ignorant of the geography of Northern and Western Europe. Nor does he mend the matter when he says, in another place (iv. 49), that the "Istrus flows through the whole of Europe, rising in the country of the Celti, the remotest people towards the setting of the sun, after the Cynetes, that dwell in Europe." It is the universal practice of all who write and speak of distant places of which they know nothing, to suppose them indefinitely removed from the writer or speaker, but near to one another. Ignorance makes all the unknown meet in a point of indeterminate position. Even when we come to the time when Gallia was pretty well known to the Greeks and Romans, there is a great deal that is erroneous in their geographical notions which it would take many words to correct. A great part of our labour in comparative geography consists in determining what are the countries, mountains, rivers, and places which they designated by certain names: but if we attempt to correct all the erroneous notions which they attached to such names, we shall undertake a labour of infinite extent; nor shall we be able to correct it completely, for geographical knowledge always admits of improvement. With their imperfect means and imperfect maps, the Greeks and Romans were not bad geographers. They were often better than many modern historical writers, who have much superior means at their command.

The chief ancient authorities for Gallia are few. They are: Caesar's Gallic War; Strabo (lib. iv.), who used Caesar, but got much from Posidonius, who had travelled in Gallia; Mela (ii. 7, and iii. 2); Pliny (iii. 4, and iv. 17—19), and Ptolemy who made a map of Gallia, not very correct. His particular merit, as D'Anville observes, consists in having assigned a chief town, and sometimes two, to each people; for without his assistance we should be less accurately acquainted with the names of the capitals, since in the period after Ptolemy the original names of the chief cities were replaced by those of the several peoples of which they were the capitals. Thus, Caesarodunum, the chief town of the Turones, became Turones (*Tours*); Avaricum, the chief town of the Bituriges, became Bituriges (*Bourges*); and Andematunum, the chief town of the Lingones, became Lingones (*Langres*).

From the historians we obtain incidental information — from Polybius, Tacitus, Appian, Dion Cassius, and some little on the later period from Ammianus Marcellinus; something also from Ausonius, Sidonius Apollinaris, and the description of the Mediterranean coast called that of Festus Avienus. Something is got from the Notitia Imperii for the later period. But the most valuable information is obtained from the Roman Itineraries. The Itinerary named that of Antoninus, and the Table generally named the Theodosian, extend to all parts of Gallia. There is also a route very particularly described in the Itinerary from Burdigala (*Bordeaux*) to Jerusalem, which runs through the southern parts of Gallia to the Alps. The Roman remains in Gallia are very numerous, particularly in the Provincia or the basin of the Lower Rhone, and they often give information which we find in no writers. The French have a very large number of valuable works on the history and Roman antiquities of their country; and they continue to add to them.

The first description of Gallia that we have, is by the man who conquered it, the Roman proconsul Caesar. His description is brief, after his fashion. It is founded chiefly on his own observation; but for the parts of Gallia, Germania, and Britannia of which he knew nothing, we may infer that he inquired of the "mercatores" or bold traders who carried their wares among barbarous tribes, though his good sense would make him use their information cautiously. He also used the Greek writers, and particularly the geographer Eratosthenes, as we see from his own words (*B. G.* vi. 24). An instance will show that the knowledge of these geographers was not very exact. Hipparchus (Strab. pp. 104, 115), who lived in the second century before the Christian aera, placed Massilia (*Marseille*) and Byzantium in the same parallel; and he did this on the authority of Pytheas of Massilia, who says that the proportion of the gnomon to its shadow is the same in both places. We see, from this and other passages, that the Greeks of Massilia were the authorities for the earlier knowledge of Gallia. Strabo disputes the accuracy of this statement, and proves in his way, that Byzantium is much further north than Massilia. But Strabo also was mistaken, for Byzantium is about 41° N. lat. and Massilia is north of 43°. Hipparchus also supposed Celtice to extend so far north that the sun never set at the summer solstice; a great mistake (Strab. p. 75), which is corrected by Strabo. Caesar (*B. G.* iv. 10) fixes the northern limit of Gallia at the outlets of the Rhenus.

It is useful to examine the boundary of this extensive country, as the inquiry will show the nature of the mistakes which the ancient geographers made. They used to determine their latitudes with tolerable accuracy by ascertaining the length of the longest day at various places, which they measured (Strab. p. 133; Ptol.) by the hours of the equator when the night and day are equal. Their methods for the longitude were of course very rude, and here they fail. The part of Gallia that they were best acquainted with was the coast of the Mediterranean. We do not know the earliest boundary between the SE. part of Gallia and Liguria; nor can we suppose that there was one. The boundary in the time of Augustus between Gallia and Italia was the river Varus (*Var*). The boundary at the eastern extremity of the Pyrenees was the Promontorium Pyrenaeum, or *Cap Creux*, which projects into the sea south of Portus Veneris (*Port Vendre*). The most southern Gallic town along the eastern pass of the Pyrenees, in the country of the Sardones, was Cervaria. [CERVARIA.] From the mouth of the *Var* to the delta of the Rhone the coast of Gallia presents an irregular convex outline to the Mediterranean. The interior is a hilly country, which extends to Massilia. Between Massilia and Narbo, which Strabo (p. 106) knew to be in nearly the same latitude, the coast forms a bay called Gallicus Sinus or Massalioticus. Strabo considered this bay to be divided into two bays by the hill Setion (a necessary correction of the false reading Σίγειον), which term comprehends also the island Blascon. [BLASCON.] The coast from the mouth of the Rhone to the country at the foot of the Pyrenees is flat. The whole length of this coast from the *Var* to *Cap Creux* is about 500 English miles; and it was well known to the ancient geographers.

The Pyrene (Πυρήνη) or Pyrenaei Montes were the boundary between Gallia and Iberia, or Hispania, as the Romans called it. Strabo supposed that they ran in a direction parallel to the Rhine (p. 128), which he makes the eastern boundary of Gallia. He must therefore have supposed that the Pyrenees ran from south to north, instead of nearly from east to west; and in another passage he distinctly affirms (p. 137) that they do run north. In a third passage (p. 199) he supposes that the directions of the Rhine and the Pyrenees may deviate from the parallel direction as they severally approach the sea, so as to reduce the 5000 stadia—the greatest distance that he supposes between the Pyrenees and the Rhine—to the smaller distance of 4300 or 4400 stadia between the mouth of the Rhine and the northern extremity of the Pyrenees. Strabo, in fact, makes the range of the Pyrenees the east side of Spain (p. 137), and the coast on the Mediterranean the south side of Spain. He knew, however, that the narrowest part of Gallia was between *Narbonne* and the bay on the Atlantic, which he also calls the Gallicus Sinus,—the bay that is formed between the coasts of France and Spain at the bottom of the bay of Biscay. Posidonius (Strab. p. 188) made the length of this isthmus, as he calls it, less than 3000 stadia. Strabo more correctly says that the isthmus is less than 3000, but more than 2000, stadia wide. The length of the Pyrenees in a direct line from *Port Vendre* to the mouth of the *Bidasoa*, the lower part of which little river is the boundary between France and Spain, is about 255 miles. The limit between Gallia and Hispania on the west coast, according to Ptolemy (ii. 6. § 10) was Oeasso, a promontory of the Pyrenees. We may certainly fix it between Lapurdum, in the Tarbelli (supposed to be *Bayonne*), and Oeasso or Olarso (*Oyarço*, near *Fuente Rabia*) in Spain. The *Bidasoa* is near to *Fuente Rabia*. The passes through the eastern and western Pyrenees were used long before the Romans were in this country. Hannibal crossed from Spain into France through the pass at the east end; and Cn. Pompeius went this way to oppose Sertorius in Spain. The Romans afterwards laid a road between *Narbonne* and *Barcelona* in Spain, by the pass where the Tropaea Pompeii were erected. On the west side a road ran from Aquae Tarbellicae (*Dax*), on the *Adour*, to Pompelo (*Pamplona*), in Spain. The boundary may have been at the station of Summus Pyrenaeus, the summit level of the road, between *Dax* and *Pamplona*. Another road led from Aquae Tarbellicae, by Aspaluca [Aspaluca], and over another Summus Pyrenaeus, to Caesaraugusta (*Saragossa*) in Spain. In Caesar's time the passes were used for commercial purposes, for he bought horses in Spain during his Gallic War; but they had doubtless been used many centuries before.

The coast of Gallia on the Atlantic runs nearly due north, with a flat sandy shore, to the great aestuary of the Garumna (*Garonne*), which Strabo (p. 190) aptly calls a lake-sea (λιμνοθάλασσα). From the aestuary of the *Garonne* the direction of the coast turns a little to the west of north as far as the mouth of the Ligeris (*Loire*). From the mouth of the *Loire* its general course is about WSW. as far as Uxantis Insula (*Ouessant*), which is opposite to the western termination of the great peninsula between the mouth of the *Loire* and the bay of Cancalle. The distance along the coast from the mouth of the *Bidasoa* to the point of the mainland opposite to *Ouessant* is about 814 English miles.

The west coast of this peninsula, the *Bretagne* of ante-revolutionary France, is broken by singular headlands and deep bays. In the latitude of *Ouessant* the French coast runs due east to the bottom of the *bay of Cancalle*, where another peninsula (*Cotantin*) runs nearly due north into the *English Channel* and terminates in *Cap de la Hogue*. The great bay that lies between the *Cotantin* and *Bretagne* contains the islands of Caesarea (*Jersey*), Sarnia (*Guernsey*), and Riduna (*Alderney*). From *Cap de la Hogue* the French coast has a general east direction to the outlet of the Sequana (*Seine*); and from the outlet of the *Seine* its general course is NE. to the mouth of the Samara (*Somme*), and then nearly due north to Itium Promontorium (*Cap Gris Nez*), the nearest point of the European continent to Britannia. The ancient navigators had observed that the coast of Britain from the *Land's End* runs eastward nearly parallel to the French coast, forming a long channel (*La Manche*, or the Sleeve, as the French aptly call it), wide at the western extremity, and narrowing to the eastern, where it terminates in the *Straits of Dover* or *Pas de Calais*, between *Dover* and *Cap Gris Nez*. The length of this channel measured along the French coast is about 660 miles, which is much greater than the distance measured along the English coast of the channel, for the form of the French coast is much more irregular. The distance along the coast from *Cap Gris Nez* to the mouth of the old Rhine near *Leiden* is about 170 miles. The coast of Gallia from the Itium to the mouth of the Rhine is flat: it belongs to the great plain of Northern Europe. Strabo supposed the mouths of the Rhine to be opposite to the *North Foreland* in *Kent*; no very great mistake, for the whole tract from the mouth of the old Rhine at *Leiden* to the aestuary of the Scaldis (*Schelde*) might easily be taken as belonging to the Rhine. Caesar was told that the Scaldis flowed into the Mosa, which receives the Vahalis (*Waal*) from the Rhine (*B. G.* vi. 33). This general parallelism of the NW. coast of France and the south coast of England, led Strabo into a strange mistake. He supposes these two coasts to be exactly of the same length, 4300 or 4400 stadia. He makes the Gallic coast extend from the mouths of the Rhine to the northern promontories of the Pyrenees in Aquitania, and the English coast from Cantium (*Kent*) to the western extremity of Britannia, which he supposes to be opposite to Aquitania and the Pyrenees (p. 199). Consequently he supposed that the *Seine*, *Loire*, and *Garonne* flowed into the *English Channel*. He also says that the distance from the (mouths of the) rivers of Gallia to Britain is 320 stadia; a monstrous mistake, but consistent with what he has said. Ptolemy's map of this coast of Gallia is much better than Strabo's delineation. Mela, who probably wrote somewhat later than Strabo, and compiled a very scanty geography, had however a much more correct notion of the Atlantic coast of Gallia than Strabo. After describing the north coast of Spain up to Oeasso, he says: "Then follows the other (Atlantic) side of Gallia, the coast of which at first not projecting at all into the ocean, soon advancing almost as far into the sea as Hispania had receded from it, becomes opposite to the Cantabrian land, and, winding round with a great circuit, turns its shore to the west; then turning to the north, it again spreads out in a long and direct line to the banks of the Rhine": which is indeed a very fair description. And Mela proves that he under-

Digitized by Google

stood the form of the coast, by saying, "that from the outlet (exitu) of the Garumna commences that side of the land which runs out into the sea, and the coast opposite to the Cantabrian shores." Ptolemy's notion of the coast was also much more correct than Strabo's. Agrippa (Plin. iv. 17) ascertained by measurement the whole west coast of Gallia to be 1800 M. P.; and the general form of the coast must have been learned when the measurements were made. We do not know, however, from what point on the Spanish border he reckoned, nor to what mouth of the Rhine they were carried; but Gossellin, by assuming that they commenced at Oeasso (*Cape Machicaco*, as he names it), which he takes to be the boundary between Gallia and Hispania, "to the mouth of the Rhine called the passage of the *Vlie*," finds that the Roman measures agree with the truth. But this contains an assumption more than many people will allow, which Walckenaer, who adopts Gossellin's opinion, expresses as a fact as follows:—"The measures show that Ptolemy's eastern outlet of the Rhine is that which is known at present under the name of *Flie-Stroom*, between the islands of *Flieland* and of *Schelling*, which represents the old mouth of the Flevum or of the *Yssel*, before the great inundations of the 13th century converted into a vast lake the ancient Flevo." (*Géog. Ancienne, &c. des Gaules, &c.* vol. ii. p. 291.) However, the true length of the French coast from the Pyrenees to the old Rhine shows that the measurement of Agrippa was a fact.

The great mass of the Alps that lies between the basin of the *Po* and the Rhone forms a natural boundary between Italy and France; but this mountain range, which has a general northern course from near the borders of the Mediterranean to the pass of the *Great St. Bernard* (Alpis Pennina), covers a great extent of country from west to east, and boundaries can be fixed in such a country only at the heads of the valleys which penetrate the mountain mass on each side. The Romans did not trouble themselves with these mountain tribes till they had subdued the people in the lower country. In B. C. 58, when Caesar passed from Aquileia over the Alps into Ulterior Gallia, he had to fight his way. He crossed the Alpes Cottiae by the pass that leads from *Turin*; and he remarks that the last place in Cisalpine Gallia is Ocelum, *Uxeau* or *Ocello*, in the valley of the Cluso. He was attacked by Centrones, Graioceli, and Caturiges, all of them Alpine tribes, and it was on the seventh day from Ocelum that he reached the Vocontii in the Ulterior Provincia (*B. G.* i. 10). It is clear that Caesar did not consider these Alpine tribes as belonging either to the province of Citerior or Ulterior Gallia. [ALPES COTTIAE.]

At *Mont Blanc*, the highest point in the mountains, the axis of the Alps takes a general east and then a NE. direction towards the snow-covered masses in which the Rhone and the Rhine rise. The road from *Aosta*, in the basin of the *Po*, to the Summus Penninus (the pass of the *Great St. Bernard*), was used at a very early period. It leads down to Octodurus (*Martigny*), where Caesar's troops were attacked in the winter of B. C. 57. Octodurus is at the great bend which the Rhone makes after descending the longitudinal valley which lies between the Pennine Alps and their continuation on the south side, and the Bernese Alps, one of the chief Alpine ranges on the north side. The lower part of this valley, between Octodurus and the head of the Lacus Lemanus (*Lake of Geneva*), into which the Rhone flows, was occupied by the Nantuates. Above Octodurus in this long valley were the Veragri and the Seduni, all Gallic tribes, but neither included in the Provincia by Caesar's description nor in the country of the Helvetii. In fact, this long valley is entirely within the Alps. Caesar has not attempted to fix any boundary between the Citerior and Ulterior Provincia from the sea to the sources of the Rhine. He heard of an Alpine people named Lepontii (*B. G.* iv. 10) in the high valley of the Upper Rhine, and he found it convenient to define the eastern limit of Helvetia and of Gallia, which was his Provincia, by the course of the Rhine from its source to the German Ocean. After the Lepontii he mentions Vatuantes or Mantuantes (Nantuates in the common texts is a corruption), the Helvetii, Sequani, Medionatrici, Tribocci, and Treviri, as the nations on the Gallic side past which the river flows. It would be useless to inquire which of the branches of the Rhine above *Chur* Caesar meant; but from *Chur* to the *Lake of Constanz* he obtained a well-defined boundary in the river. The Rhine within the Alpine region was certainly not the limit of the Gallic mountaineers, who extended along the north face of the Alps into the basin of the Danube. The *Lake of Constanz* and the course of the Rhine in a general western direction from the outlet of that lake to *Bâle*, formed a well-defined boundary of Gallia in this part. Caesar's description shows that he excluded from the country of the Helvetii all the parts to the south of the Lemanic lake and of the Bernese Alps; and he knew that the Rhine where it entered the hill and the plain country was the disputed boundary between the Germanic and the Celtic nations (*B. G.* i. 1). From *Bâle* to the outlets of the Rhine the river was the boundary of the two races, though there were Galli east of the Rhine in the Hercynian forest, and Germans had got to the west side in several parts long before Caesar's time.

The Rhine, as Caesar was told (*B. G.* iv. 10), entered the sea by many outlets, between which great islands were formed. Asinius Pollio (Strab. p. 193), who took a pleasure in finding fault with Caesar, says that the Rhine had only two mouths. The Batavorum Insula was within the limits of Caesar's Gallia. In the time of Augustus, when Drusus made his Fossa [FOSSA DRUSIANA], which established a navigation between the Rhenus and the Flevo [FLEVO] and thence to the North Sea, this river line became a frontier against the Germans, extending from *Arnheim* on the Rhine along the canal of Drusus to *Doesburg*, and thence along the *Yssel* to the lakes. This new river frontier seems to be Ptolemy's eastern outlet of the Rhine: the middle outlet being that at *Leiden*, and the western being where the *Leck* now is. (Ptol. ii. 9.)

This extensive country lies between 42° 35′ and 52° 10′ N. lat., if we carry the boundary no further than Lugdunum Batavorum (*Leiden*). It lies between the meridians of 4° 45′ W. of London and 9° 40′ E. of London. The following measurements will give a better notion of its extent. A straight line from the mouth of the *Var* to the NW. extremity of *Bretagne* is about 660 miles long. A line drawn from the Spanish frontier on the west side of the Pyrenees to 48° 50′ N. lat., 8° 10′ E. long. on the Rhine, near *Radstadt*, is about 615 miles long; and a line drawn from this point on

Digitized by Google

the Rhine, through *Paris*, nearly due west to *Bec du Raz* in *Bretagne*, is about 594 miles long. A line from the eastern extremity of the Pyrenees to *Paris* is 445 miles; and a line from *Paris* to *Arnheim* on the Rhine is about 270 miles long. It comprehends all France, Belgium, Luxembourg, and a part of the kingdom of the Netherlands, those parts of the German states which lie west of the Rhine, the greater part of Switzerland, and the country south of the Leman lake which belongs to the kingdom of Sardinia. The area of France within its present limits is estimated at about 200,000 square miles.

Gallia has the best position of any country in Europe. It has a large coast on the Mediterranean and a larger on the Atlantic, which give it a communication with all the world. These seas are well stocked with fish. Except the mountains that form its boundaries, and a few ranges that cover only a comparatively small part of its surface, it is a plain country with a very large proportion of fertile soil. It produces corn in abundance, wine of the best quality, and, in the southern part of the valley of the Rhone, the olive. Some parts have good pasture, and it is well adapted for the growth of timber. Though the winters are cold in the north, the summer is warm, and fruits generally ripen well. It is not so rich in minerals as Britain, but it contains coal, and iron in abundance; also lead, copper, and a great variety of valuable stone. It is rich in mineral springs, and it has brine springs and rock salt. This wealth was not neglected even in the period before the Roman conquest; but under Roman dominion it was still more productive. The Galli of Caesar's time were an ingenious people: they had made some progress in the working of metals and other useful arts, and they were apt learners. Of all the nations of Western Europe none has had more influence on civilisation than the Galli, both before and during the Roman dominion, except the Romans themselves; and since the establishment of the Franks in Gallia, the country between the Rhine and the Pyrenees, though now containing several states and parts of states, has still a unity both natural and social which makes it the most important part of the whole world.

The ancient geographers had a better notion of their work than some of the moderns. Strabo says (p. 177), in his book on Gallia: "It is the office of the geographer to describe natural divisions, and national, and also all that is worthy of mention; but whatever rulers variously dispose in their political arrangements according to circumstances, it is enough if a man mention it in a summary way. As to the particulars, he must leave that to others." The Roman geographers (Pliny, Mela), as well as Strabo, had a right conception of the great natural divisions of Gallia. Pliny and Mela describe Gallia Narbonensis apart from the rest of Gallia, and they place their description of it between the descriptions of Spain and Italy, not only because Narbonensis was then completely Romanised, but for better reasons. "Narbonensis," says Pliny (iii. 4), "is divided from the rest of Gallia on the north side by the mountains Gebenna and Jura, a country in its cultivation, population, and civility of manners, and in its wealth, inferior to no provincia, and in brief Italia rather than a provincia." The range of the *Cévennes*, as these geographers rightly saw, separates Gallia on the Mediterranean from the Gallia that is bordered by the ocean. [CEVENNA.] Strabo made a mistake about the position of the *Cévennes*; for as he supposed it to be at right angles to the Pyrenees, he must also have supposed that it ran from west to east. The basin of the Rhone below *Lyon*, bounded on the west by the *Cévennes*, and on the east by the Alps, is a country by itself, and in all respects more like Italy than the rest of Gallia. Pliny may have supposed or he may not have supposed that the Jura was a continuation of the *Cévennes*, which it is not; but the Jura also forms a natural division between Gallia to the east and the west, as Caesar saw. The Jura, as Caesar supposed (*B. G.* i. 2), extends from the north bank of the Rhone at *Fort l'Ecluse* about 20 miles below Geneva to the Rhine; for he estimates the width of the country of the Helvetii at 180 M. P., and this is about the length of the Jura from the Rhone to the junction of the Rhine and *Aar*. The Jura is a natural boundary between France and Switzerland. Caesar makes the length of the country of the Helvetii 240 M. P., which may be measured from *Fort l'Ecluse* along the Rhone, the Leman lake, and the northern base of the snow-covered Bernese Alps to the source of the *Reuss*, and thence along the *Vorderrhein* to *Chur*, the Roman Curia, where the Rhone begins to be navigable with rafts. But the longest straight that can be drawn in Switzerland eastward from *Fort l'Ecluse* is to *Bregenz* on the *Lake of Constanz*, and this line agrees very well with Caesar's length. Neither the Valais or Wallis, down which the Rhone flows, as already observed, nor any part of the highest Alpine country, is included in Caesar's Helvetia, though a large part of it is a mountainous country. He says, therefore, quite correctly, "Undique loci natura Helvetii continentur,"—on the west by the Jura, on the south by the Rhone, the Leman lake, and the mountains, on the east and the north by the Rhine. The basin of the Upper Rhone is a distinct country from the basin of the Lower Rhone, and from the rest of Switzerland: it is shut in between the Bernese and Pennine Alps as far as a point somewhat lower down than the bend at *Martigny*. The valley widens before it reaches the *Lake of Geneva*, which is a deep cavity in the valley of the Rhone filled with water. The level of this large lake, the lowest part of the valley of the Upper Rhone, is more than 1000 feet above the Mediterranean. The high lands on the west side of the Rhone basin extend northward under various modern names, from the utmost limit that we can assign to the *Cévennes* [CEBENNA], but with diminished elevation. They extend to the heights of *Langres*, the country of the Gallic Lingones, and form the west limit of the basin of the Arar (*Saône*) which joins the Rhone at *Lyon*. The heights of *Langres* run eastward, and are connected with the Vosegus of Caesar (*B. G.* iv. 10), the *Vosges*. This Vosegus, which Caesar saw, runs northward from the valley of the Alduasdubis (*Doubs*), a branch of the *Saône*, and parallel to the Rhine as far as Bingium (*Bingen*) on the Rhine. Between the *Vosges* and the Rhine is a long, narrow, and fertile plain, one of the finest parts of Gallia, which the Germans from the other side of the river looked on with a longing eye. The high lands about *Langres* and the neighbouring *Vosges* contain the sources of the *Mosel*, the *Maas*, the *Seine*, and the *Saône*; and from this elevated, but not mountainous country, a tract of moderate height runs NW., forming the northern boundary of the basins of the *Seine* and the *Somme*, and terminates in the chalk cliffs (*Cap Gris Nez*) which project into the *English Channel* between

Digitized by Google

Calais and *Boulogne*. All the streams north of this watershed, the *Schelde*, the *Maas*, and the western branches of the Rhine, belong to the great flat which extends northward along the coast from *Cap Gris Nez* to the mouths of the Rhine. The streams which lie south of this watershed, and between it and the Pyrenees, flow into the *English Channel* and the Atlantic,—the *Somme*, the *Seine*, the *Loire*, the *Garonne*, and other smaller rivers. Thus four large river-basins west of the *Cévennes* and the *Vosges* discharge their waters into the Atlantic. The basin of the great central stream, the *Loire*, drains a surface as large as England. One large river-basin, the Rhone, discharges its waters into the inland sea. The rest of the surface of Gallia is drained into the Rhine, and the North Sea. The *Mosel* and part of the course of the *Maas* lie in a deep bed sometimes several hundred feet below the level of the high irregular plains through which they flow; and part of this country, which extends from the Rhine at *Coblenz* in a western direction through *Luxembourg* and the north of France into Belgium, is the Arduenna Silva of Caesar (*Ardennes*), to which he gives an extent far beyond the truth. [ARDUENNA.] Nearly the whole of Gallia west of a line drawn from *Narbonne* to *Coblenz* is a plain country. A man may walk from *Leiden* to the *Auvergne* for 450 miles without meeting with a mountain or a really hilly country. The peninsula of *Bretagne*, which contained the Armoricae Civitates of Caesar, is rough and hilly, but not mountainous. The centre of France is the only mountainous country which is completely within the modern limits, the *Auvergne*, an extensive region of extinct volcanoes, which on the east is connected, so far as elevation of surface makes the connection, with the rugged *Cévennes*. This country of the Arverni of Caesar contains many lofty summits, some of them 6000 feet high. The *Auvergne* and the highest parts of the *Cévennes* have a short summer, and a long cold winter, during which the mountains are covered with snow, which, when it melts, swells the Duranius (*Dordogne*), Oltis (*Lot*), and Tarnis (*Tarn*), three of the great branches of the *Garonne*; and the heavy rains in the upper valley of the *Loire* and its great branch the Elaver (*Allier*) pour down floods into the basin of the *Lower Loire* which fill the river (Caes. *B. G.* vii. 35), and often do great damage.

This outline of the geography of Gallia, if it is well understood, will enable a student to comprehend many things in the history of the people which are otherwise unintelligible. He will see that this extensive country has natural limits, two seas, two great mountain ranges, and a large river. It is subdivided into a western and north-western, and into an eastern and south-eastern, part by natural, well-defined boundaries.

Caesar divides this country into four parts. The first is the Provincia, afterwards Narbonensis, which lies altogether in the basin of the Rhone, except that small part of the basin of the *Garonne* between *Toulouse* and *Narbonne* which for political reasons was included in the Provincia before Caesar's time. He divides the rest of Gallia into three parts, the limits of which he marks in a general way. Between the Pyrenees and the Garumna he places the Aquitani. North of them he places the people whom the Romans called Galli, but who called themselves Celtae or Celts, as he says (*B. G.* i. 1). He makes the Sequana and the Matrona (*Marne*), its chief branch, the northern limit of these Celtae; and though he does not express himself with great precision, he means to say that they extended from the ocean to the Rhine. The Helvetii were Celtae, and also their northern neighbours the Sequani, who reached to the Rhine; and north of them the Lingones. North of the Lingones were the Leuci, in the highest part of the basin of the *Maas* and the *Mosel*; and north of them the Mediomatrici, on the *Mosel*, whose position is shown by Divodurum (*Metz*): the Leuci and Mediomatrici were Belgae. North of the *Seine* and the *Marne* were the Belgae. [BELGAE.] We should conclude that there was a great diversity in the language and manners of a people spread over such a country as Gallia, if nobody told us so, for the fact is the same even now. But Caesar, who observed this diversity, saw also that there was both difference enough between the peoples of the great divisions to show that they were not the same, and resemblance enough among the peoples of the several divisions to show a nearer relationship among them. The division of the Aquitani seems satisfactorily established. They were Iberians, probably mixed with Celts. The Celtae form a well-determined division, but they were not confined to this country between the *Garonne* and the *Seine*: they were the natives of the Provincia, a fact that Caesar of course knew, and that the Ligurians also were there; but in his general description he purposely omits the Provincia. The Belgae properly so called may have been a pure race; but the Germans had long been in this part of Gallia, and we must suppose an intermixture to have taken place between them and some of the native Belgae, if Belgae was their true name.

As an hypothesis which rests on probable grounds is better than no opinion at all, if the hypothesis is not accepted as final, and so as to exclude inquiry, we may take that of Thierry (*Histoire des Gaulois*) without taking all his reasons and all his history. The Gallic race seems to consist of two great divisions, which we may call Galli and Cumri: and while we admit the relationship of these races to be shown by their language, religion, and usages, we may also admit that the differences are sufficiently marked to distinguish them. The modern representatives of the Cumri, the Welsh, have preserved their integrity better than any of the Gallic tribes. Of the other peoples in the north of Great Britain and in Ireland, who belong to the Gallic race, the writer has no distinct opinion, and is not required to express any here; nor has he the knowledge that would enable him to form an opinion. The Belgae, as Caesar calls the Galli north of the *Seine*, though the name properly belonged in his time to the inhabitants of a part only of this country, were different from the Celtae, and they may be the Cumri: and this, probably, was the race that occupied all the Armorica or the sea-coast as far as the *Loire*. The representatives of these people are the modern Bretons, a fact which cannot be denied, whatever opinion there may be about the origin of their present name and that of their country (*Bretagne*), or about settlers from Britannia having gone over there in the fourth century of our aera, or later. Of the two races the Celtae seem to be superior in intelligence, and we found this opinion on the character of the French nation at the present day; for it is admitted by all competent judges, that though the Romans formed a dominion in Gaul which lasted several centuries, though many Germanic nations have settled in it, and though the Franks founded the empire now called the French, the great mass of the

Digitized by Google

people south of the *Seine* are still of Celtic stock. The Franks, who were a small tribe, probably had less effect on the Celtic population except in the north than the Italians who, during the Roman dominion, settled in all parts of Gallia in a peaceable way. Whatever may be the exact truth within the limits of these probabilities, the Celtic race, as now modified, is superior to the Cumri and to the German in some respects; superior certainly in the striking talents of distinguished individuals, inferior probably in the solid qualities that fit the bulk of a nation for daily life.

The physical type of the Gallic race and its various branches, may be better fixed now than by the doubtful evidence of the ancient authorities; for the race exists and may be examined, and the ancient authorities are vague. To enter on such an investigation without prejudice, a man must get a firm conviction, which may be got, that, though nineteen centuries have now passed since Caesar subdued the Galli, the population in a large part of the country is still essentially what it was then. The Romans and the Greeks describe the Galli as big men, and as having a white skin, blue eyes, and light-coloured hair, which they even reddened by artificial means. (Diod. v. 28; Plin. *H. N.* xviii. 12.) Their desperate courage, warlike character, fickle temper, and great ingenuity are also recorded. If a man will read attentively their history two thousand years ago, he will find the good and the bad, the weak and the strong, part of the Gallic character very much the same that it is now.

All the ante-historical history of the Gallic race, which some writers amuse themselves with producing, must be rejected as fiction. Nothing is certain except that the Gallic race has been widely diffused over Europe, but on what soil it first displayed its restless activity and versatile talent we do not know. The Galli have been in various parts of Spain, in Italy, probably, as far at least as the central parts, and east of the Rhine to a limit that we cannot fix. Within the historical period they have crossed the disputed boundary of the Rhine into Germany, and the Germans have crossed into Gallia; and even in our times the French have, by their warlike talents, reduced Germany to a temporary subjection. But in the long contest the slow and heavy German has had the advantage over his more lively neighbour, and his race occupies extensive tracts on the west side of the Rhine, and he made good his footing there in some parts even before Caesar's time.

The historical period of Gallia commences with the settlement of Massilia or Massalia, as the Greeks called it, by the Phocaeans of Asia Minor (about B. C. 600), on the south coast of Gallia east of the Rhone, in a country occupied by Ligures. Few settlements on a barbarous coast have had a longer or more brilliant history than this ancient city, which still subsists, though it does not occupy exactly the same ground. The Greeks brought with them the cultivation of the vine, though the vine is a native of Gallia, and they taught the Galli the use of letters. The origin of Gallic civilisation is probably purely Greek. The history of this town and its settlements requires a separate article. [MASSALIA.]

In the article GALATIA the history of a Gallic invasion of Delphi and of Asia Minor is briefly told; and the fact of the Galli being in the country north of the Julian and Carnic Alps, in the basin of the Danube, has been stated. It seems that this people must have been also on the east side of the *gulf of Venice*, either mingled with Illyrians, whoever they may be, or among them as a separate race. For Pyrrhus, the adventurous king of Epirus, after his unlucky knight-errantry in Italy, took a body of Galli into his pay, who probably came from the country north of Epirus. Pyrrhus was a captain quite to the taste of the Galli. He led them into Macedonia against Antigonus Gonatas, who had a Gallic army too. Pyrrhus defeated Antigonus, whose Galli, as usual, made a desperate resistance. Having got possession of Aegae, he left a garrison of Galli there, who, as the biographer says, being a nation most greedy of money, plundered the royal sepulchres of the precious metals that they contained, and kicked about the bones of kings. (Paus. i. 11—13; Plut. *Pyrrhus*, c. 26.) His Galli followed Pyrrhus into the Peloponnesus, and were with him at Argos, where he was killed (B. C. 273). We know not if any of them returned.

The Carthaginians, who had settlements on the Spanish coast, and in Sardinia and Sicily, and composed their armies of mercenaries, found employment for some Galli in the First Punic War. These men served them in Sicily; but they were turbulent and dangerous auxiliaries. When the Romans were besieging Eryx, in the west part of Sicily, during this war, the Carthaginians had some Galli in garrison there, who, after failing in an attempt to betray the place and their comrades, went over to the Romans. The Romans afterwards entrusted them with the place, and they pillaged the temple. When the First Punic War was over, the Romans, disgusted with these fellows, put them in vessels, after disarming them, and got them out of Italy. The Epirotae received them, and suffered for their folly in trusting men who could not be trusted. (Polyb. ii. 7.) After the close of the First Punic War the Carthaginians had a dreadful struggle with their own mercenary troops, — Iberians, Ligurians, Galli, and a race of mongrel Greeks. A Gallic chief, Autaritus, made a great figure in this war; for though he had only 2000 men, the remainder of his troops having gone over to the Romans during the siege of Eryx (Polyb. i. 77, 80), he had great influence with the rebels from being able to speak the Punic language, which the long service of these men in the Carthaginian armies had made the common language. The mercenaries were finally destroyed, after a war of three years and four months; a war distinguished above all others, says Polybius, for the cruelty with which it was conducted, and the disregard of all morality.

The history of the Galli in Italia is placed under GALLIA CISALPINA.

The Romans had carried their arms into Africa, Macedonia, Greece, and Asia, before they got a firm footing in Transalpine Gallia. In B. C. 154 the Massaliots came to ask their assistance against the Ligurian Oxybii and Deceates, who were besieging the Greek settlements of Antipolis (*Antibes*) and Nicaea (*Nizza*). The senate sent three commissioners, who landed at Aegitna, a town of the Oxybii, near Antipolis. The people of Aegitna were not willing to receive the Romans; and, a quarrel ensuing, two Roman slaves were killed, and Flaminius, one of the commissioners, escaped with difficulty. The consul Q. Opimius was sent with a force against the Ligurians. He marched from Placentia, across the Apennines, took Aegitna, made slaves of the people, and sent those who were the prime movers in the attack on Flaminius in chains to Rome. Opimius,

Digitized by Google

who was a bold and prudent commander, defeated the Oxybii and Deceates in two successive battles. The Ligurians now submitted, with the loss of part of their land, which the consul gave to the Massaliots. (Polyb. xxxii. 7. &c., ed. Bekker.) A second demand of aid from the Massaliots, who were pressed by the neighbouring Ligurian tribe of the Salyes, brought the consul M. Fulvius Flaccus into the country (B. C. 125). Flaccus defeated the Salyes, and even invaded the country of the Vocontii, who lived north of them; though it does not appear that they had given the Romans any provocation. (Liv. *Ep.* 60.) C. Sextius Calvinus, consul B. C. 124, and afterwards proconsul in Gallia, completed the subjugation of the Salyes, whom he sold (B. C. 123). The Salyes had a king Teutomal, who, with other chiefs, fled for refuge among the Allobroges, a people higher up the Rhone. Calvinus cleared the way for the passage of the Romans from Etruria into Gallia, along the Ligurian coast, by removing all the barbarians to a certain distance from the sea-shore. During a winter residence north of Marseille, near some hot springs, he found the place so pleasant that he chose it as the site of a town; and here the Romans planted the Latin colony of Aquae Sextiae (*Aix*), their first settlement north of the Alps (B. C. 122). (Liv. *Ep.* 61.)

At this time, the Aedui, a people between the *Saône* and the upper course of the *Loire*, were at war with the Allobroges, whose allies were the powerful people of the Arverni, who lived in the mountains of Auvergne. The Romans chose the party of the Aedui, made an alliance with them, and gave the barbarians, as they called them, the grand title of brothers and kinsmen. (Caes. *B. G.* i. 45, vi. 12.) The consul Cn. Domitius, who now commanded in Gallia (B. C. 122), demanded of the Allobroges the refugee chiefs of the Salyes. Bituit (as Appian calls him, perhaps incorrectly), king of the Allobroges, sent an ambassador to the consul, to deprecate his anger. The ambassador was richly dressed, and had with him a splendid train and a number of fierce dogs. He was accompanied by his bard, who sung the glories of his king, of his nation, and of the ambassador; but the Roman consul was not moved by his music. The Allobroges now crossed the *Isère*, and found the consul at Vindalium, at the junction of the Sulgas (*Sorgue*) and the Rhone, a little north of Avignon. The Allobroges were entirely defeated (B. C. 121). The consul for this year, Q. Fabius Maximus, came with large reinforcements, and Cn. Domitius had a command under him. The Roman generals crossed the *Isère*, and entered the territory of the Allobroges. The Arverni, with their neighbours the Ruteni, were now advancing upon the Romans, who found that they had just crossed the Rhone by a bridge of boats, near the junction of the Rhone and the *Isère*. (Strab. p. 191.) The king of the Arverni, called Bituit by Livy (*Ep.* 61), who was at the head of more than 200,000 men, no doubt a greatly exaggerated number, looked with contempt on the Roman legions, whom he considered hardly enough for a dinner for his dogs. But he soon discovered what an enemy he had to deal with. His men were frightened by the elephants in the Roman army (Flor. iii. 2); and in the rout the Arverni fled across the bridge, which broke under their weight, and men and horses were swallowed up in the rapid current of the Rhone. It appears that the Allobroges also were in the battle. King Bituit wandered about the mountains, till Domitius treacherously got him into his hands, and sent him to Rome. The senate put him in prison at Alba, on the lake Fucinus; and they afterwards put his son Congentiat into their hands. The Arverni, though defeated, were not further molested by the Romans: in fact, it was not easy to enter their country. But the Allobroges were declared Roman subjects; and the Romans constituted the country on the east side of the Rhone as far north as Geneva, the remotest town of the Allobroges, a Roman province, which they designated simply by the name of Provincia. Fabius, who got the name of Allobrogicus from his victory, and Domitius, recorded their victory by erecting a trophy of marble near the battle-field (Strab. p. 185), or each erected one; and Fabius built two temples. Domitius, a worthy ancestor of the emperor Nero, went about the new province riding on an elephant, with a train of soldiers after him. (Sueton. *Nero*, c. 2.) Fabius and Domitius had a triumph at Rome for their victories, in which king Bituit appeared in his native coloured armour and his silver chariot. The Provincia had now always a Roman army in it, and a Roman army was always kept employed. The successors of Fabius extended the province, west of the Rhone, along the *Cévennes*; and the Helvii, Volcae Arecomici, and Sardones, at the foot of the Pyrenees, were included in it. They also made an alliance with the Volcae Tectosages, whose chief town was Tolosa (*Toulouse*); and thus they prepared the way for getting into the basin of the *Garonne*. The Romans had hitherto no passage into Gallia except that along the sea. It was to secure some passage over the Alps, as it seems, that the consul Q. Marcius Rex (B. C. 118) attacked the brave tribe of the Stoni, an Inalpine Ligurian people, all of whom perished either by the sword of their enemies or by their own hand. (Oros. v. 14; Liv. *Ep.* 62.) A brief notice is preserved of a memorable defeat of the Romans about this time. The Scordisci, a people somewhere about the *Save*, a Gallic race, or a mixed race, among the Macedonian frontier, and threatened Italy. The consul C. Porcius Cato crossed into their country, where he and his army perished. These savage people, however, still annoyed the Northern Greeks, whom they horribly maltreated. It is to these and the like incursions of the Galli that Polybius seems to allude when he says (ii. 35): "The alarm from the Galatae, not only of old, but in my time also several times, has terrified the Hellenes." We have here, and in many other places, evidence of the existence of a great number of Galli in the country north of Macedonia and Epirus.

The Roman dominion in the Provincia was secured (B. C. 118) by the establishment of Narbo Marcius (*Narbonne*), a Colonia Romana, on the Atax (*Aude*). The Romans thus commanded the road into Spain through the Eastern Pyrenees, and had an easy access to their new friends the Tectosages. They spared no pains to secure and embellish the important position of Narbo, which became a commercial rival to Massilia.

An invasion of barbarians from the east of the Rhone and north of the Danube now threatened the Roman dominion. Livy (*Ep.* 63) speaks of a nation called Cimbri who entered the country over the mountains north-east of the Adriatic, the country which the Romans called Noricum. This was the first time that the Romans heard the name of the Cimbri. (Tacit. *Germ.* c. 37.) Appian (*de Reb. Gall.* xiii) calls these invaders Teutones. The consul Cn. Papirius Carbo (B. C. 113) crossed the

Digitized by Google

Alps against them, and, after coming to terms with the barbarians, treacherously attacked them, but he lost a large part of his army, and narrowly escaped (B. C. 113). The Cimbri then, according to Appian's story, which is worth very little, retreated to the country of the Galatae; but what Galatae are meant we do not know. Some few years later Teutones and Cimbri entered the country of the Belgae. (Caes. *B. G.* ii. 4.) This seems to have been a fresh set of barbarians: Caesar says that the Belgae were the only people of Gallia who prevented the Cimbri and Teutones from invading their territory, which may be true if he means the Belgae properly so called [BELGAE]; but it is not exact, if he has told the truth in another place (ii. 29), where he says, that the Aduatuci on the Mosa were a part of those barbarians, who were left behind to guard the cattle and baggage, while the rest moved on to the south. A short notice of the terrible devastations of these barbarians is preserved by Caesar (*B. G.* vii. 77.) They ravaged Celtica; and the people, who shut themselves up in their towns, were compelled by famine to eat one another. From Celtica the invaders passed into the Provincia; and, in B. C. 109, the consul M. Junius Silanus was defeated by them (Liv. *Ep.* 65). In B. C. 107 L. Cassius Longinus had the province of Transalpine Gallia. The Tigurini, one of the Helvetian pagi, under the command of Divico, were entering the country of the Allobroges, who were within the Provincia, and the consul went to meet them. The Roman commander fell in the battle, and his army was ignominiously compelled to pass under the yoke. The text of Orosius (v. 15), which is undoubtedly corrupt, states that Cassius pursued the Tigurini to the ocean, where he was defeated: but the Leman lake was probably the place. (Liv. *Ep.* 65.) L. Calpurnius Piso, who commanded under Cassius, perished in the battle. He was the grandfather of the Piso whose daughter Caesar married (*B. G.* i. 12). M. Aemilius Scaurus, a legatus probably of Caepio, the consul of the following year, was defeated about this time by the Cimbri, and being taken prisoner was killed by a prince named Boiorix, because he advised the Cimbri not to invade Italy. (Liv. *Ep.* 67.)

In B. C. 105 the consul, Cn. Manlius Maximus, was in Gallia north of the Alps, with Q. Servilius Caepio, consul in the preceding year. It was during Caepio's consulship, it seems, that he took and plundered Tolosa, the capital of the Volcae Tectosages, who had formed an alliance with the invading barbarians, or showed a disposition to do so. (Dion. Cass. *Frag.* 97.) The consul and Caepio were encamped separately near the Rhone, when the barbarians fell upon them, and stormed one camp after the other. The incredible number of 80,000 Roman soldiers is said to have perished. (Liv. *Ep.* 67.) Among the few who escaped was Q. Sertorius, who saved himself by swimming over the Rhone. After such a victory it is not surprising that the invaders advanced further south. The Cimbri ravaged the country between the Rhone and the Pyrenees, and entered Spain. But they were driven back by the Celtiberi, and returning into Gallia joined the Teutones. The brief notices of these wars generally mention the Cimbri and Teutones together. We have hardly any evidence whether they were two people or one. It is generally assumed that the Teutones must be a Teutonic race, as their name would show; but this is not conclusive. The Cimbri are also supposed by some writers to be a Germanic people, though the reasons for this supposition are not sufficient. Plutarch (*Marius*, c. 11) has collected some of the opinions about the origin and nationality of these people, and nobody has found out anything better yet. It was a whole nation in movement, with their waggons, dogs, wives, and children. The Romans appointed C. Marius consul for the third time, B. C. 103, to continue the war against the barbarians. Soon after his arrival in the province he made the cut at the outlet of the Rhone the traces of which still remain. [FOSSA MARIANA.] Marius had with him L. Cornelius Sulla, as legatus, who defeated the Tectosages, who were in arms against the Romans, and took their king Copill prisoner. (Plut. *Sulla*, c. 4.) The barbarians now divided themselves into two parts. The Cimbri, with the Helvetic Tigurini, crossed Helvetia to make their way into Italy by the Tridentine Alps. The Teutones, and a people with them named Ambrones, moved on towards the Ligurian country. (Plut. *Mar.* c. 15.) The story of the movements of the barbarians cannot be accepted as true. The fact of a body of barbarians advancing along the Rhone towards Italy, and of another body about the same time entering the basin of the Po from the north-east, is all that we know. C. Marius (B. C. 102.), now consul for the fourth time, entrenched himself near the junction of the Rhone and the *Isère*, while the countless host of barbarians past him on their way to the south. Marius followed the Teutones, and in a battle near Aquae Sextiae destroyed and dispersed them. Their king Teutobocchus, a gigantic barbarian, was made prisoner, and afterwards walked in Marius' triumph at Rome. (Florus, iii. 3.) In the next year, C. Marius, consul for the fifth time, with his colleague Lutatius Catulus, defeated the Cimbri in the country north of the Po. The destruction of these invaders kept Northern Gallia quiet for a time, and there was no great movement of the barbarians until B. C. 58.

In the wars which followed Sulla's usurpation, Q. Sertorius, he who escaped from the rout of Caepio's army on the Rhone, maintained in Spain the cause of the Marian faction; and many of this party fled to the Provincia. Some of the Aquitani served under Sertorius in Spain, where they learned the art of war. (*B. G.* iii. 23.) In B. C. 78 L. Manilius, proconsul of Gallia, was obliged to quit Aquitania with the loss of his baggage; and the legatus, L. Valerius Praeconinus, was defeated and killed. (*B. G.* iii. 20.) In B. C. 76 Cn. Pompeius marched into Spain against Sertorius. He made his way into the Provincia, over the Alps, by a new route to the Romans, and his road to Narbonne was marked by blood. The Galli of the Provincia were in arms against the Romans. Pompeius gave the lands of the Helvii and Volcae Arecomici, who had been the most active in the rising, to the Massaliots. (Caes. *B. C.* i. 35.) Pompeius left M. Fonteius governor of the Provincia. During his administration the Provincia was in rebellion, and the Galli attacked both Massilia and Narbo, but Fonteius drove them off. He was three years in Gallia, during which time the country was drained of its resources to supply the Roman armies opposed to Sertorius in Spain. Fonteius was also charged with enriching himself by illegal means; and when affairs were more settled, B. C. 69, he was tried at Rome, on charges made by the Allobroges and Volcae, for the offence of Repetundae. He was

Digitized by Google

defended by Cicero; part of whose oration on this occasion is extant.

Another governor of the Provincia, during B. C. 66, 65, C. Calpurnius Piso (consul B. C. 67), was prosecuted by C. Julius Caesar B. C. 63 on a charge of repetundae and other offences. Cicero defended him, and he was acquitted.

In the consulship of Cicero (B. C. 63) Catilina and his desperate associates made proposals to the ambassadors of the Allobroges who were then at Rome. The ambassadors had come to get protection from the senate against the greediness of the Roman governors. They were overwhelmed with debt, both the state and individuals; a common complaint of the provincial subjects of Rome. The Romans levied heavy contributions on those people who had made most resistance, and both communities and individuals felt it. Besides this, the Gallic cultivator seems to have been always in debt. He borrowed money from the Roman negotiatores at a high rate, and his profits would be hardly sufficient to pay the interest of the money. The profitable business of feeding sheep and cattle was in the hands of Romans, who probably got the exclusive use of much of the pasture land. As the Allobroges were a conquered people, we may conjecture that their waste lands had been seized by the Roman state, and were covered with the flocks of Romans who paid to the Roman treasury a small sum for the right of pasture. P. Quinctius, for whom Cicero made a speech which is extant, had a good business in Gallia as a flock-master ("Pecuaria res satis ampla," *pro P. Quinctio*, c. 3) A Roman named Umbrenus, who had been a "negotiator" in Gallia, undertook to open the conspiracy of Catiline to the Allobroges, and he promised them great things if their nation would join in the rising. From fear, however, or some other cause, the Allobroges betrayed the conspirators to the consul Cicero. (Sallust, *Cat.* 40; Appian, *B. C.* ii. 4.) It does not appear that the ambassadors got anything for their pains, though they well deserved it. There were signs of insurrection in Southern Italy as well as in Gallia Citerior and Ulterior, and the revelations of the ambassadors saved Rome at least from a civil war.

The Allobroges at home were not satisfied with the mission to Rome, for they rose against the Romans, and ravaged the country about *Narbonne*. Manlius Lentinus, a legatus of the governor C. Pomptinus, narrowly escaped perishing with his army near the *Isère*, having fallen into an ambuscade laid by Catugnat, the commander of the Galli. By sending fresh forces across the Rhone, Pomptinus defeated the Galli near Solonium (perhaps *Sallonaz*), and ended the war by taking the place. (Dion Cass. xxxvii. 47; Liv. *Epit.* 103.)

Though the Greek and Roman writers give us no satisfactory information about the Cimbri and Teutones, they are quite clear about the people whom they call Germani. The Germani were on the east side of the Rhine, opposite to the Helvetii, with whom they were constantly fighting (Caes. *B. G.* i. 1), and to the other Celtic and Belgic peoples who lived along the Rhine from the territories of the Helvetii northward. The Germani had got a footing in the country of the Belgae long before Caesar's time [BELGAE]; and the Tribocci, also a German people, were settled in the plain between the *Vosges* and the Rhine about *Strassburg*, and consequently within the limits of the Celtae. A quarrel between the Aedui, who were east of the *Saône* and in the valley of the *Doubs*, brought fresh Germans into Gallia. One matter in dispute was the tolls on the navigation of the Arar. (Strab. p 192.) The Sequani made an alliance with the Arverni to annoy the Aedui on one side, and on the other they brought over the Rhine Ariovistus, a chief of the Suevi. The German came with his hardy men, and soon reduced the Aedui to submission. An Aeduan named Divitiacus, a Druid who had the title and rank of Vergobretus, escaped into the Provincia, and thence made his way to Rome to complain of the tyranny of the Germans. (Caes. *B. G.* i. 30.) Cicero (*de Divin.* i. 40) entertained this learned Celt at Rome, and his brother Quintus was acquainted with him when he was one of Caesar's legati in the Gallic War. Ariovistus, after defeating the Aedui, took possession of one third part of the lands of his friends the Sequani; and as new comers from the other side of the river had to be provided with lands, he demanded of the Sequani another third. (*B. G.* i. 31.) This was the state of affairs in that part of Gallia when (B. C. 60) a rumour reached Rome that the Helvetii were projecting to move from their country. (*B. G.* i. 2.) The Boii had already suffered from the arms of the Tigurini, one of the four Helvetic pagi. This movement of a whole people was an attempt to seize the supremacy of Gallia, and in the end to eject the Romans. In B. C. 59 C. Julius Caesar was consul; and it happened that during this year Gallia was quiet, partly owing to Caesar's own contrivance, perhaps, for it was during his consulship that the savage German Ariovistus was honoured with the title of "rex atque amicus" (*B. G.* i. 35) by the Roman senate. Caesar obtained for his "provincia," after the expiration of his consulship, Gallia Cisalpina and Illyricum, with Gallia north of the Alps, for five years; and he had a general commission for doing what he liked north of the Alps under the name of protecting the friends and allies of the Roman people. (*B. G.* i. 35.) Early in B. C. 58 he hears that the Helvetii were beginning to move from their country, and the road they were going to take was through the Provincia. Caesar hastily quitted Rome, crossed the Alps, and in a few days he was at Geneva.

The conquest of Gallia by Caesar is told with great brevity by himself. His purpose was to describe his military operations, and he tells us very little more about Gallia than what strictly belongs to the matter. In one instance (vi. 11—20) he has made a digression to speak of the institutions and manners of the people; but he has given no description of the country except his brief introduction (*B. G.* i. 1). All the rest that we learn about the country and the people is told as part of his military operations; but we may learn from it more of the state of Gallia than from the learned labours of a modern compiler. His war with the Helvetii may be more conveniently spoken of under that heading. [HELVETII.] After driving this nation back to their homes he went against the German Ariovistus. His course was to Vesontio (*Besançon*), the capital of the Sequani, on the *Doubs*, the position of which he has well described. From *Besançon* the direction of his march is not clearly stated: but he reached a large plain, and defeated Ariovistus five miles from the Rhine; for five miles is the true reading, not fifty. (Caes. *B. G.* i. 31—54.) The battle was fought in the plain between the *Vosges* and the Rhine, somewhere north of *Bâle*. Nothing more is

Digitized by Google

aid of Germans in this part of Gallia after the battle near the Rhine: the news of the defeat prevented others from coming over. Caesar only came into the country of the Sequani to drive out the Germans, but he left his army there for the winter, and crossed the mountains into Cisalpine Gallia to hold his circuits ("conventus agere," *B. G.* i. 54). In the winter the Belgic nations formed a union to defend themselves, for they suspected that Caesar would attack them after he had reduced the country of the Celtae. They were urged to arms by some of the Celtae, who did not like to see the Romans wintering in their country. Caesar, who gives these reasons for the combination of the Belgae, adds another; that the great men in Gallia, and those who had the means of hiring followers, were accustomed to usurp royal power whenever they had a chance, and, if the Roman dominion were established, they knew this mode of making what their modern imitators call a "coup d'état" would not be possible (*B. G.* ii. 1). Caesar in his Commentarii mentions several instances of this kind of usurpation. His second book contains his history of the war with the Belgae (B. C. 57). The Remi submitted from the first. The submission of the Suessiones, Bellovaci, and Ambiani followed. He defeated the Nervii and their allies in a great battle on the Sabis (*Sambre*); and then took the stronghold of the Aduatuci, who were the descendants of the Cimbri and Teutoni. (*B. G.* ii. 29.) The survivors of the Aduatuci were sold, and the number reported to Caesar was 53,000. They were purchased by the mercatores who of old followed the Roman camp (*Liv.* x. 12) and followed Caesar's camp (*B. G.* vi. 31). We do not see how the mercatores could make anything of their bargain, unless they had some escort to assist in conveying the slaves to the nearest market, which would be the Provincia; or it may be that the Belgians would have no objections to buy a few of these intruders. The sale of slaves was one way that Caesar had of raising money. After the great battle with the Nervii, P. Crassus with a single legion was sent to the Veneti, Unelli, Osismi, Curiosolitae, Sesuvii, Aulerci, and Redones, whom Caesar calls "the maritime states which border on the Ocean." All these people submitted to a mere youth at the head of a few thousand men. The Transrhenane Germans also sent to Caesar to proffer hostages and to do as they were bid. The proconsul was in a hurry to visit Italy and Illyricum, and he told the Germans to come and see him the next summer. We have no evidence of the Roman armies having been led north of the basin of the Rhone before Caesar's Belgian campaign. The rapidity of his movements, his success, and his savage treatment of those who resisted, struck terror into the barbarians. He placed his soldiers in winter quarters between the *Seine* and the *Loire*, and south of the *Loire*, in the territory of the Carnutes, Andes, and Turones, and immediately went to Italy. (*B. G.* ii. 35.)

Caesar sent a legion and some cavalry under Ser. Galba to winter in the country of the Nantuates, Veragri, and Seduni, who occupied the country from the north-eastern boundary of the Allobroges and the Leman lake to the highest Alps. They were in the great valley called the Vallais, between the Pennine and the Pennine Alps. Galba placed part of his troops in the country of the Nantuates, who were nearest to the lake, and he fixed himself with the remainder at Octodurus (*Martigny*). Caesar says that the purpose of Galba's mission was to clear the pass over the Alps by which the "mercatores" were accustomed to go at great risk and with the payment of heavy tolls. These "mercatores" were the enterprising Italian traders who crossed the pass of the *Great St. Bernard* from Cisalpine Gallia to carry their wares among the Galli. Galba was attacked by the people in his quarters at Octodurus, which he left after driving off the enemy; and, retreating through the country of the Nantuates into the territory of the Allobroges, where he was within the Provincia, he spent the winter there. (*B. G.* iii. 7.)

Caesar was recalled from Italy (B. C. 56) by a rising of the maritime states, whose submission had perhaps only been made to gain time: but the immediate provocation was the demand for supplies made on some of them by P. Crassus, who was wintering somewhere about *Angers* with a legion. The movers of this war were the Veneti, a skilful maritime people, who had many ships with which they traded to Britain. (*B. G.* iii. 8.) Caesar's campaign against these states, and the sea-fight, are one of the most difficult parts of the Commentarii to explain [VENETI.] He defeated the fleet of the Veneti; and Q. Titurius entered the country of the Unelli, who submitted. Before the battle Caesar sent P. Crassus into Aquitania with twelve cohorts, to prevent the Aquitani from coming to the aid of the Armoric states. Crassus first defeated the Sotiates, who lived about the modern *Sos*, between *Auch* and *Bazas*. (*B. G.* iii. 21.) The Vocates and Tarusates, who were next attacked, sent for aid from Spain, which is some evidence in confirmation of the relationship of these Aquitani to some of the Spanish peoples. [AQUITANI.] The Spanish auxiliaries whom Caesar names were Cantabri. (*B. G.* iii. 26.) After defeating the Aquitani and their Spanish allies in the wide plains south of the *Gironde*, Crassus received the submission of the greater part of Aquitania; the names of the peoples are mentioned by Caesar. (*B. G.* iii. 27.) The position of several of these tribes can be determined; but the position of others is uncertain.

The summer was near ended, and Caesar had put down all his enemies except the Morini and Menapii, who were in arms. The Morini lived along the channel, from Gesoriacum (*Boulogne*) northwards at least as far as Castellum Morinorum (*Cassel*). [CASTELLUM MORINORUM.] The enemy fled into the forests and marshes, where the Romans followed them, not without loss. Caesar began to cut a road through the forests, and he had just reached the enemy, when the heavy rains compelled him to retire. (*B. G.* iii. 29.) Before taking leave of the Morini he wasted their lands, and burnt all the buildings that he could reach. He placed his army in quarters between the *Seine* and the *Loire*, in the country of the Aulerci and Lexovii.

In the next year (B. C. 55) the Usipetes, whom Caesar calls Germani (iv. 1), and the Tencteri, crossed the Rhine, and fell on the Menapii. These invaders were themselves driven on by more powerful enemies, the Suevi, whose habits Caesar describes (*B. G.* iv. 1); and he states that the "mercatores" used to go into their country. Here we have the evidence of the Roman procensul to the fact of mercatores crossing the Rhine into Germany before the Roman arms had been carried over the river. It is here assumed that these mercatores were Romans. Caesar determined to stop these Germans immediately,

Digitized by Google

who, after living on the Menapii during the winter, had moved south into the territories of the Eburones and the Condrusi, who were dependents of the Treviri. The Germans had got as far south as *Liège*, when Caesar came towards them. He tells us his own story of the treacherous dealing of the Germani with him, but he also shows that he was quite a match for them in cunning. The Germans at last were fallen upon by the Romans at the confluence of the Mosa and Rhenus ("ad confluentem Mosae et Rheni," as it is in Caesar's text, iv. 15), where those who escaped the Roman sword were drowned in the river. There is a great difference of opinion about the explanation of this campaign. But the writer still thinks that this river Mosa is the *Mosel*, and that the Germans were beaten and drowned near *Coblenz*. A little below *Coblenz*, if this explanation is accepted, and between *Coblenz* and *Andernach*, Caesar built a wooden bridge on which he passed over the Rhine to the German side (*B. G.* iv. 17). rather to make a display of Roman power than for any other purposes. He stayed eighteen days in Germany, and returning into Gallia destroyed his bridge (iv. 19). The rest of the summer was occupied with Caesar's first expedition to Britain, the immediate motive for which, he says, was the information that he had of aid being supplied from Britain to the Roman enemies in almost all the Gallic wars. (*B. G.* iv. 20.) The fact may be true or not: he does not say that it was so. He has mentioned one occasion (*B. G.* iii. 9) when the Veneti sent to Britain for aid; but he does not say that it came. What he says (iv. 20) may be fairly interpreted to apply to the wars of the Romans with the Galli before his time, as well as to his own time. Caesar remarks that "few persons" went to Britain except "mercatores," and they were only acquainted with the coast and the parts which were opposite to Gallia. These "mercatores" may have been Italians from the Provincia, and also Galli. One would suppose that in those days nobody would go to Britain except traders, but Caesar's expression of "few persons" is explained by other parts of his work. (*B. G.* ii. 14.) Political refugees used to run away from Gallia to Britain. Caesar sailed from Portus Itius (*Wissant*), and landed about *Deal* on the *Kent* coast. On his return to the French coast the Morini, whom he had left on good terms, could not resist the temptation of plundering some 300 Romans, who had landed on a different part of the coast from the rest of the troops (iv. 37). But the Morini got nothing by their treachery; and they lost many of their men in the pursuit by the Roman cavalry. Labienus also entered their country, and the Morini submitted; for this autumn had been a dry season, and the Romans were not stopped by the waters. The country of the Menapii, who lived on the Lower Rhine and the Lower Mosa, was mercilessly ravaged this autumn. The people hid themselves in their thickest forests, while the Romans wasted their lands, cut down the corn, and burnt the buildings. (*B. G.* iv. 38.) Caesar placed all his men in winter quarters within the territory of the Belgae.

Caesar prepared for his invasion of Britain in B. C. 54 by building a great number of ships in Gallia, but he had to get from Spain the materials for fitting them out. (*B. G.* v. 1.) In this spring he visited the country of the Treviri, who were on the Rhine above and below *Coblenz*, and he settled the disputes between the two factions. These Gallic states were continually distracted by quarrels among the chief people. Caesar sailed on his second expedition to Britain from Portus Itius, and landed on the same part of the British coast as in his first expedition. (*B. G.* v. 8—23.) On his return he found that the harvest had failed in Gallia, which made it necessary for him to disperse his troops in winter quarters (v. 24). He had various ways of keeping the Gauls quiet. If he found a man who could be useful and was fit for the place, he would make him a king as in the case of Tasget, who was a man of high rank among the Carnutes, for his ancestors had held royal power. Caesar, finding Tasget useful, restored him to his ancestral rank; but in the third year of his reign he was murdered, and a great number of persons were implicated in the conspiracy. (*B. G.* v. 25.) In this winter the Romans had a great loss: a division of the army was cut off in the country of the Eburones; and Q. Cicero, the brother of M. Cicero, had great difficulty in defending his camp against the Nervii till Caesar came to his assistance (*B. G.* v. 38—52.) Caesar spent all this winter in Gallia. Things were in too disturbed a state to let him leave. The Senones had a king, Cavarinus, whom Caesar had made them a present of. They were going to put their king to death by a determination of the whole people, or the senate at least (pro consilio); but the king, hearing of their designs, escaped to his friend the proconsul. Caesar summoned the senate of the Senones, and the senate refused to come. In this winter the Treviri attacked the camp of Labienus, who was on their border, but Induciomar, the leader of the Treviri, was killed and the assailants were defeated. (*B. G.* v. 58.)

In B. C. 53, Caesar, expecting fresh troubles in Gallia, increased his forces. (*B. G.* vi. 1.) After checking a rising of the Nervii, he summoned the states of Gallia to assemble in the spring, as his practice had been, and all came except the Carnutes, Senones, and Treviri. He does not mention the place to which they were summoned: but he named the meeting to Lutetia Parisiorum (*Paris*), in order to be nearer to the Senones, who soon submitted, and also the Carnutes. (*B. G.* vi. 4.) His principal business now was with the Treviri and Ambiorix, king of the Eburones, who had cut off the Roman troops in the previous winter. The Menapii were friends to Ambiorix, and they had been guilty of the insolence of never having sent ambassadors to Caesar. He entered their country with his forces in three divisions, burnt as usual all that he came near, and carried off many head of cattle and many prisoners. (*B. G.* vi. 6.) This brought them to terms, and the proconsul without delay set off to pursue the Treviri, who had got Ambiorix some friends among the Germans east of the Rhine. Before Caesar came Labienus had defeated the Treviri, and on his arrival Caesar built a second wooden bridge over the Rhine, a little above the place where he built the first, and went a second time into Germania. (*B. G.* vi. 9.) This second passage of the Rhine was not marked by any great event. The Ubii, a nation on the east bank, who will afterwards appear on the Gallic side, humbly submitted: and Caesar, finding that his real enemies on the German side were the Suevi, made inquiries about them. They had retired with all their forces a long way, and planted themselves at the place where a forest of boundless extent commenced. There they were waiting for the Romans, who prudently turned their backs on the Suevi and returned by their bridge (vi. 10). Being bent on taking Ambiorix, who had

Digitized by Google

lone him so much mischief, Caesar entered the country of the Eburones. He left his heavy material with Q. Cicero at Adnatuca, the winter quarters of the troops that had been destroyed the year before. (*B. G.* vi. 32.) Adnatuca seems to be the site of *Tongern*, and, as Caesar says that it was about the middle of the territory of the Eburones, it fixes their position. [ADUATUCA; EBURONES.] While Caesar was wasting the lands of this unfortunate people, some Germans, Sigambri, crossed the Rhine, and fell on the camp of Q. Cicero. (*B. G.* vi. 35.) Caesar returned to the camp, but the Sigambri had time to get safe off with their booty. (*B. G.* vi. 41.) Again he set out to vex the Eburones, as he expresses it; and we have his own word for what he did: he burnt every building that he could see, drove off the cattle, and the corn that his men and beasts did not consume was laid by the rains. He left the country with the belief that, if any of the Eburones had escaped him, they would die of hunger. (*B. G.* vi. 43.)

After this merciless devastation Caesar summoned the states of Gallia to Durocortorum (*Rheims*). There he made inquiry into the conspiracy of the Senones and Carnutes. Acco, who had been the cause of the rising, was flogged to death; and his accomplices ran away. (*B. G.* vi. 44.) Caesar put his troops in quarters among the Treviri, the Lingones, a people who had always been quiet, and at Agendicum (*Sens*), the chief town of the Senones. He went into Italy to hold the conventus.

The Galli, hearing of disturbances at Rome this winter, thought that Caesar would be detained in Italy (*B. G.* vii. 1), and this would be a good opportunity for getting rid of the Romans. The Carnutes began, and the Arverni next rose under a brave and skilful commander Vercingetorix, who stirred up the Galli north and west of the Arverni as far as the ocean. This brought Caesar into the Provincia in the depth of winter. (*B. G.* i. 52.) He cut his way through the snows on the *Cevennes*, six feet deep, and came down on the Arverni, who did not expect him by that way. (*B. G.* vii. 8.) But Caesar was in the neighbourhood of Vercingetorix, who, at the request of the Arverni, advanced to their aid from the country of the Bituriges, whom he had brought over to his side. Unless Caesar could collect his scattered forces, he could not make head against Vercingetorix. He resolved to do this himself, without the knowledge of his men, whom he left under the care of Brutus; he went across the Cevennes again in the depth of winter to Vienna (*Vienne*) on the Rhone, where he found some newly raised troops of horse, who had been ordered to assemble there. From Vienna he travelled day and night to the country of the Lingones, where he had two legions. Having reached these troops, he summoned the rest of his forces from the country of the Senones and the Treviri, and got these all together before the Arverni could hear of his approach. He left two legions and all his heavy material at *Sens*, and set out towards the country of his allies, the Aedui, between the *Allier* and the *Loire*, whom Vercingetorix was threatening. His march was rapid and terrible. In two days he took Vellaunodunum, a town of the Senones, and then came right upon Genabum (*Orléans*) on the *Loire*, where the Carnutes, at the beginning of the outbreak, had murdered the Roman "negotiatores" who were living there. [GENABUM.] He broke into the town, which his men sacked; he left it in flames, and crossed the *Loire*. (*B. G.* vii. 11.) He was now in the country of the Bituriges (*Berri*). The first town that he took was Noviodunum. He then came on the capital Avaricum (*Bourges*), which was defended by a strong wall, made with great skill. The Galli had a way of building their town walls, which Caesar describes very briefly and very well (*B. G.* vii. 23): they people had made some progress in the art of defending places. The siege was a work of great difficulty, and the sufferings of the Roman soldiers were extreme; for it was winter, and they had to work in the mud, the cold, and in continual rain. The Roman commander tells the end of the affair in a few words (*B. G.* vii. 28): "The soldiers, whose passions were roused by the massacre at Genabum and their own sufferings, spared neither the helpless through age, nor the women, nor the children; out of the whole number, who were about 40,000, only 800, who had hurried out of the place on hearing the shouts of the invading enemy, escaped safe to Vercingetorix."

Caesar found stores in Avaricum, and, the winter being over, he was ready for a regular campaign. But he had first to settle a domestic dispute among the Aedui. (*B. G.* vii. 32.) Two men had been elected to the chief magistracy, an annual office, and the constitution allowed only one. The whole state was in arms, one party against the other. Caesar summoned the Aedui to Decetia (*Décize*), an island on the *Loire*, and settled the dispute in favour of one of the men. He exhorted the Aedui to give him their assistance in the war, with fair promises of what he would do for them after Gallia was completely subdued. The position of the Aedui, between the *Upper Loire* and the *Seine*, made their alliance most important for the Romans. It was the easiest line of communication between the north part of the Provincia and the basin of the Seine. Caesar was still afraid of the Senones and the Parisii, and he sent Labienus with four legions into that country. [PARISII.] He marched south with six legions, with the intention of taking the hill town of Gergovia, in the country of the Arverni, in the upper part of the basin of the *Allier*. This, his most signal failure in Gallia, is told in another place. [GERGOVIA.] After his defeat before Gergovia Caesar was in great straits. He moved northwards to join Labienus; but his treacherous friends, the Aedui, seized Noviodunum (afterwards Nevirnum, *Nevers*) on the *Loire*, where Caesar had great stores, and the booty that he had got in the Gallic War. (*B. G.* vii. 55.) His military chest also was there. His enemies lined the banks of the *Loire* with troops, and the river being swollen by the melted snows was difficult to pass. He could not think of retreating. It would be a confession that he was beaten. Nor could he attempt to cross the *Cevennes*, where the roads were almost impassable: besides, Labienus was on the *Seine*, and he was afraid that he would be cut off. Nothing remained but to cross the river which he accomplished. He found [illegible] on the east side, and was joined by Labienus who was as lucky as himself in escaping from a very dangerous position (*B. G.* vii. 57—62, and [illegible] safe to *Sens*. All Central and Western Gallia was now in arms, and Vercingetorix was chosen commander-in-chief. The Remi and [illegible] to the Roman alliance; and the Treveri, while [illegible] kept busy by their German [illegible] neither side. Vercingetorix [illegible] rouse all the country [illegible]

He pushed on the Gabali, and some of the Arverni against the Helvii, who were within the Provincia; and the Ruteni and Cadurci were sent to ravage the land of the Volcae Arecomici, who were also within the Provincia. (*B. G.* vii. 64.) Caesar, knowing that the enemy was superior in cavalry, and that all the roads into the Provincia and Italy were blocked up, got cavalry from over the Rhine, from some of his German friends there, and light troops who fought among the cavalry after German fashion. The proconsul, however, had an eye to the safety of the Provincia, and he began to move through the borders of the Lingones into the country of the Sequani. He was on his road to the Provincia, with the intention, no doubt, of returning when he had got reinforcements. The occasion was tempting to the Galli. They attacked him on his march, and were defeated. (*B. G.* vii. 67.) The Germans contributed largely to the victory. All the cavalry of Vercingetorix was routed, and he fled to Alesia, a town of the Mandubii. [ALESIA.] The siege of this place and the capture of Vercingetorix put an end to the campaign, the result of which was more unfortunate to the Galli than glorious to Caesar. But a man of less ability and energy would have perished, with all his army.

The eighth book of the Gallic War is not by Caesar, though it is possible that he left some memoranda which have been used by the author. Gallia (B. C. 51) was still not quiet. The Bituriges were again preparing to rise, but they were soon checked. The divisions among these Gallic people were more fatal to them than the Roman army. The Carnutes were quiet while Caesar was putting down the Bituriges, and they began to attack them as soon as they had yielded to the Romans. The Bituriges applied to Caesar for protection. It was a hard winter when the Romans again entered the territory of the Carnutes. Caesar sheltered his infantry as well as he could in the ruins of Genabum, and sent out his cavalry to scour the country. The houseless Carnutes had no place of refuge except the forests, which could not protect them against the severity of the season. A large part of them perished, and the rest fled to the neighbouring states. (*B. G.* viii. 5.)

The last great struggle of the Galli was made north of the *Seine* by the Bellovaci and their allies. This campaign, which is not very well told by the author, contains some difficulties (*B. G.* viii. 7—22), but it is well worth a careful study. These Belgae and their allies showed considerable military skill. They seem to have learned something from their enemy, and the Roman general is said to have acknowledged that their plans were "very judicious, and showed none of the rashness of a barbarous people." (*B. G.* viii. 8.) The defeat of the Bellovaci and their allies was considered by Caesar the end of his Gallic wars. (*B. G.* viii. 24.) The revengeful proconsul had not yet caught Ambiorix, nor forgotten him. He once more entered his country, and did all the mischief that he could, thinking, as the historian says (*B. G.* viii. 24), that if he could not catch Ambiorix, the next best thing for his honour (dignitas) was to treat his country in such a way that his people, if any were left, might hate him so much, for the misfortunes that he had brought on them, as never to let him come among them again.

The last town that Caesar had to besiege was Uxellodunum, the site of which is uncertain. It was a town of the Cadurci, in the basin of the *Garonne*, and perhaps on the Oltis (*Lot*). When Gallia revolted in B. C. 52, Drappes, a Senon, had got together what the historian calls (*B. G.* viii. 30) some men of desperate fortune. He had also induced slaves to join him, men banished from the various towns of Gallia, and robbers; with this rabble he had raised Dumnacus, a leader of the Andes, who was up in arms in the country of the Pictones (*Poitou*). C. Caninius and C. Fabius easily defeated the mob, as the Romans would call them, near the *Loire*. Drappes escaped from the dreadful slaughter with about two thousand men, and, in company with another adventurer, Lucterius, a Cadurcan, entered the country of the Cadurci. It is worthy of note that the Carnutes were in the battle on the *Loire*. This obstinate people had not yet come to terms with the Romans. They had been cut to pieces, driven from their homes and dispersed, and again appeared in arms. But it was the last time. They now submitted to the Roman tyranny, and all the Armoric states followed their example. (*B. G.* viii. 31.) The geographical position of the Carnutes, and their courage, made them the defence of all the states to the west between the *Seine* and the *Loire*.

Drappes and Lucterius shut themselves up in Uxellodunum, and Caninius began the siege. Caesar, leaving M. Antonius among the Bellovaci, came among the Carnutes, against whom he had a heavy grudge; for the Carnutes began the great rising in B. C. 52, which had nearly driven him out of Gallia. He caught Gutruat, whom he charged with being the author of all the mischief, and put him to death. (*B. G.* viii. 38.) This example was considered sufficient. Nobody else was punished. The reports that he had from Caninius about the resistance of Uxellodunum, irritated Caesar. He despised the rebels, but he thought that he ought to make an example of them. The first five years of his government had been extended by another five years, which commenced from the beginning of B. C. 53. It was now B. C. 51, and the Galli knew that he had not long to stay; it was necessary, therefore, to show them what they might expect, if they were rebellious. His treatment of the prisoners after the capture of Uxellodunum [UXELLODUNUM] is the most disgraceful part of his history. (*B. G.* viii. 44.)

He now thought that he had finished his work, and he had. Gallia remained for centuries a Roman country. Caesar, who had never seen Aquitania, paid that country a visit, and found it submissive. After going to Narbo, he spent a few days in visiting all the conventus of the Provincia, and settling its affairs. He placed his forces, for the winter, in Belgium, and west of the *Cévennes*; four legions in Belgium, a sign that he still feared that warlike people. He only placed two legions east of the *Cévennes*, and they were in the country of the Aedui, a nation that had still great influence among the Gallic people. He spent the winter at Nemetocenna (*Arras*) in the present department of the *Pas de Calais*, not a place which an Italian would choose to winter in. But the author (*B. G.* viii. 49) explains this. He wished to conciliate the people north of the *Seine*. He treated the states with respect, made presents to the chief men, imposed no new contributions; and he endeavoured to make them satisfied by a mild administration, after being exhausted by long and bloody wars. After the winter he went into North Italy, a sign that he feared no rising in Gallia. He was received with rejoicings by all the municipia and colonies

f Gallia Togata. [GALLIA CISALPINA.] The wn gates, the roads, and all the places by hich he passed were decorated with every de- ice that could be thought of. The whole popu- ation, with their children, came out to meet him. he temples and the fora were set out with all the geantry of a Roman religious festival. The ealthy showed their magnificence, and the poor heir good will. The Italians of Cisalpina Gallia ere proud of their governor; for he had tamed the arlike nations north of the Alps, the men who for enturies had been the terror of Italy. No com- ander ever better deserved such fame as is due to ilitary success. The conquest of Gallia is the reatest exploit that a soldier has ever accom- lished.

Caesar returned to Nemetocenna; and, for some eason which does not appear, called all his troops om their quarters, and led them to the borders of e Treviri. There he, the Pontifex Maximus of he Romans, the head of the religion of the state, erformed the solemn ceremony of a lustratio, or urification. Both he and his men had much need f it. The war was over, the country was quiet; nd he moved about just enough to keep himself in ealth and his troops. (*B. G.* viii. 52.) It was c. 50, the year before he crossed the Rubicon. t is hard to understand how so busy a man got hrough an idle summer. The next year he had lenty to do in Italy.

Caesar really makes four divisions of Gallia, hough he formally mentions only three, for he ex- ludes the Provincia; nor does he determine the imits of the Provincia, though we can make them ut accurately enough. Of these four divisions, Provincia, Aquitania, the country of the Celtae, and he country of the Belgae, two have been described. AQUITANIA, BELGAE.] The limits of the Pro- incia are described in that article. [PROVINCIA.] The Alpine tribes do not belong to any of these ivisions.

Caesar's threefold division of Gallia, excluding he Provincia, was not arbitrarily made by himself; t is a division founded on the geographical cha- acter of the country and the national character of he people. We see from his Commentaries that he Celtae knew their own limits well, both on the ide of the Aquitani and on the side of the Belgae. He has traced the northern boundary of the Celtae by the *Seine* and its great branch the *Marne*, but he has not mentioned the boundary from the source of the *Marne* to the Rhine. He did not go further north in this part than the country of the Lingones; and it is not his manner to tell us what he did not know, or what did not concern his military opera- tions. However, the boundary of the Celtae, from the source of the *Marne* to the Rhine, may be determined well enough for all purposes. [BELGAE.] These natural divisions of Caesar are mentioned by later writers as existing divisions, though the poli- tical divisions were changed. Mela (iii. 2) makes the *Garonne* the boundary of Aquitania, though it was not so in his time; but if we take his division to be a division according to races, which he seems to mean, it is true. Pliny (*H. N.* iv. 17) also says that Gallia Comata, which is all Gallia except the Provincia, is distributed among three peoples, whose boundaries are chiefly marked by rivers: from the Scaldis (*Schelde*) to the *Seine* is Belgica; from the *Seine* to the *Garonne* is Celtica; and thence to the Pyrenees is Aquitania. This is correct for Celtica considered as the country of the Celtae; but when he adds, "which Celtica is also called Lug- dunensis," he makes an error, for Lugdunensis did not extend to the *Garonne*. But the error is in the form of expression, and it is easy to see how he fell into it.

The following are the nations of Celtica, as Pliny calls the country of the Celtae. Caesar does not use the term Celtica. The HELVETII were be- tween the Jura, the Leman lake, and the Rhine. The SEQUANI were west of the Helvetii, and ex- tended to the *Saône*: they had the valley of the Alduasdubis or Dubis (*Doubs*). The south part of the country between the *Saône* and the Rhone, the modern department of *Ain*, was occupied by the AMBARRI. The ALLOBROGES, who belonged to the Provincia, had some possessions north of the Rhone, and they would in this part be the neigh- bours of the Ambarri. The RAURACI, neighbours of the Sequani, were along the west bank of the Rhine: they extended from a point on the river above *Bâle* to the borders of the TRIBOCCI.

The AEDUI were west of the Sequani, and their territory extended westward to the *Loire*. The MANDUBII on the north were a dependent state of the Aedui. The position of the BRANNOVICES, or BRANNOVII, also dependents of the Aedui, is un- certain. The SEGUSIANI, or Sebusiani, on the west side of the Rhone, were also dependents of the Aedui; the colony of LUGDUNUM (*Lyon*) was planted in their country.

The ARVERNI were west of the southern part of the territory of the Aedui; and they had as de- pendent states the GABALI and VELLAVI, or Vel- launi, on the south-east, and the CADURCI on the south-west.

The RUTENI, south of the Arverni, were in Caesar's time divided into two parts, Ruteni Pro- vinciales (*B. G.* vii. 7), who belonged to the Pro- vincia; and Ruteni, who belonged to the country of the Celtae. The NITIOBRIGES were west of the Ruteni, and on the *Garonne*. The smaller part of their territory seems to have been south of the river, and they were considered to belong to the Celtae; but they may have been a mixed people. (Caes. *B. G.* vii. 31.) The BITURIGES VIVISCI, not mentioned by Caesar, were about *Bordeaux*.

The PETROCORII were north of the Nitiobriges, partly in the basin of the Duranius (*Dordogne*); and north-west of them were the SANTONES, extending along the sea from the aestuary of the *Garonne* to the borders of the PICTONES or Pictavi. The Pic- tones occupied the country along the sea northwards to the mouth of the *Loire*, and a considerable dis- tance inland. The position of the LEMOVICES east of the Santones and Pictones, is indicated by that of the town of *Limoges*, and the extent of their country by the old diocese of *Limoges*. The BITURIGES CUBI, north of the Lemovices, occupied the rest of Celtica south of the *Loire*. The BOII, who had joined the Helvetii, were settled by Caesar (*B. G.* i. 28) in the territory of the Aedui. The INSUBRES, who are placed in the maps on the *Upper Loire*, north of the Vellavi, are unknown to Gallic history. [GALLIA CISALPINA.]

The TURONES had territory both north and south of the *Loire*; and their limits are those of the dio- cese of *Tours*. The ANDES or ANDECAVI were west of the Turones, and on the north side of the *Loire*. The NAMNETES or NANNETES were west of the Andes, on the north side of the *Loire*. North

Digitized by Google

of the Namnetes, along the coast, were the VENETI; and, further west, the OSISMI or OSISMII occupied the extremity of this peninsula. The CORISOPITI, a small people in the territory of the Osismi, are not mentioned by Caesar. The CURIOSOLITAE, one of the Armoric states, are north of the Veneti and east of the Osismi. The REDONES are mentioned by Caesar among the Armoric states: if they really extended to the sea, they could only have had the coast about the bay of *St. Michel*. The town of *Rennes* shows their position in the interior. As to the Biducesii mentioned by Ptolemy, or Viducasii (ii. 8. § 5), see the articles BIDUCESII and VIDUCASSES.

The position of the AMBILIATES, one of the Armoric states mentioned by Caesar, is unknown. The ABRINCATUI are not mentioned by Caesar. The UNELLI, an Armoric state (*B. G.* vii. 75), occupied the peninsula of *Cotantin*. The DIABLINTES and CENOMANI were east of the Redones, and north of the Andes. [AULERCI.] A territory adjoining to that of the Cenomani on the west was occupied by the ARVII, a small people not mentioned by Caesar. The SESUVII (*B. G.* ii. 34) were neighbours of the Diablintes to the north. Caesar and Ptolemy (ii. 8. § 5) place only the LEXOVII on the coast between the mouth of the *Seine* and the Unelli; but two small peoples, BAIOCASSES and VIDUCASSES seem to have been comprised within their territory. The position of the EBUROVICES is north of the Cenomani, and on the south side of the *Seine*.

The CARNUTES were on the middle course of the *Loire*; and they also touched a part of the *Seine*. This position made their territory a central point of union for the Celtic nations, as we see in the history of the Gallic War. The Carnutes began the great rebellion in B. C. 52, and their submission in B. C. 51 was followed by that of the Armoric states. Their country was also the head-quarters of the Celtic Druids. (*B. G.* vi. 13.)

The position of the AMBIVARETI, who are mentioned by Caesar as dependents of the Aedui, has hitherto been undetermined. In a note to Long's edition of the Gallic War (vii. 90) reasons are given, which the editor thinks satisfactory, for placing them on the east side of the *Loire*, opposite to the Bituriges Cubi.

The PARISII had part of their territory north of the *Seine*; but still they were a Celtic people. Their chief place was Lutetia (*Paris*). Their neighbours the MELDI were on the *Marne*; and part of their territory was north of this river, which Caesar makes the boundary between the Celtae and the Belgae; which, as well as other like instances, shows that when he names the *Garonne*, the *Seine*, and the *Marne*, as boundaries of the Celtae, he speaks in general terms, and does not affect perfect accuracy — which, in fact, was impossible. *Paris* was an important position even in Caesar's time, — being on an island, *La Cité*, — and here he held a meeting of the states of Gallia. Under the later empire it became a chief residence. The Meldi on the *Marne* are not the Meldi whom Caesar speaks of.

The SENONES occupied the basin of the *Seine* and the *Yonne*, above *Paris*, — a nation that sent a colony to Italy, and once captured Rome. Their capital, *Sens*, retains the name of the people, and fixes a central point in their territory. The TRICASSES were on the main branch of the *Seine*, above the junction of the Icauna (*Yonne*): their chief town Augustobona is *Troyes*. The LINGONES were at the sources of the *Seine* and *Marne*, and on the high lands which run east to the Vosegus (Vosges). Caesar does not tell us that they were Celtae, but this conclusion may be easily derived from his work. Ptolemy and Pliny assign them to Belgica, which is true as to the political divisions of their time; but the Lingones were a Celtic people, and one of those that settled in Italy. No Belgic people crossed the Alps or invaded Italy: a fact which, among many others, proves that, politically and nationally, there was a marked distinction between the Belgae and the Celtae.

There is an ambiguity in Caesar's Commentaries which is owing to the words Gallia and Galli having two meanings. All Gallia (omnis Gallia) consists of three parts, one of which the people inhabit, who call themselves Celtae, but the Romans called them Galli. (*B. G.* i. 1.) When Caesar uses the word Gallia, he often means all Gallia: and when he uses Galli, he sometimes means the Gallic people generally. (*B. G.* iv. 20.) But his description of the habits of the Galli applies mainly, perhaps altogether, to Celtica; and in many passages, where he uses the word Galli, he means only the inhabitants of the central part south of the *Seine*. If any person will read attentively the description of the Galli (*B. G.* vi. 13, &c.), he will see that it does not apply to the Aquitani, of whom Caesar knew very little, and had little to do with; and certainly not at all to a very large part of the people whom he includes in the general term Belgae. He considered many of these Belgae to be Germans, pure and mixed. Of the Menapii and Nervii he knew little. The Treviri he considered to be as brutal as their neighbours the Germans. (*B. G.* viii. 25.) The Morini have a Celtic name, and were of Gallic stock, but they were chiefly hog-feeders and cattle-feeders: they had not the civilisation of the cultivators of the ground. The Bellovaci and the other part Belgae were a warlike race, and they had towns, which indicates a certain degree of civilisation. They were nearer, both in position and character, to the Celtic tribes than any other of the Belgae, except the Remi. It seems probable that the Armoric peoples, the Veneti and others, being maritime, were in many respects different from the inland Celtae. Those Celtae, whose habits Caesar describes, the most civilised of the nation, were the Helvetii, Sequani, Aedui, Arverni, Carnutes, Senones, and their dependents. The Remi, though included in Caesar's general term Belgae, seem to have been closely connected with their southern neighbours, and in Caesar's time they were the rivals of the Aedui. (*B. G.* vi. 12.)

In a vine-growing country, and one where the vine is indigenous, as it is in Gallia, the culture of this plant is an indication of greater civility and of general social improvement. Strabo (p. 178) seems to suppose that in his time the vine hardly produced any thing north of the *Cévennes*. In the third century of the Christian aera it was cultivated on the slopes along the waters of the *Mosel*. But Gallia was, in Strabo's time, and even earlier, rich in cattle and hogs: and it had abundance of rich pasture and good horses, as their large cavalry force shows. The Galli would give a large sum for a good horse. (*B. G.* iv. 2.) The southern and eastern parts were cleared to a great extent, and corn was grown in abundance even north of the *Seine*. The Provincia was considered by the Romans as another Italy in climate and products; and Strabo says

Digitized by Google

p. 178) of Gallia generally, that "no part of it emained unproductive, except where there were wamps or forests, and even these parts were inhaited, yet rather on account of the populousness han by reason of the industry of the people; for the omen are good breeders and careful mothers, but he men are more inclined to war than tilling the round: but now," he says, "they are compelled to ill the ground since they have laid down their rms."

There is no doubt that Gallia was a populous ountry in Caesar's time, populous at least after the easure of antiquity. There were not so many, nor uch large, towns as there are now; and there may ave been a larger surface covered with forest. We ay suppose, also, that the lands on the rivers and the low countries were less completely embanked: there would be more swamp and marsh. But the ry lands were cultivated, and well-inhabited. The roofs are abundant. The news of the insurrection Genabum in B.C. 52 was carried into the country f the Arverni, a distance of 160 Roman miles, as aesar reckons it, between sun-rise and before the d of the first watch of the evening on a winter's ay. (*B. G.* vii. 3.) This passage, which has sometmes been most absurdly explained, is a clear proof at the country was populous. The news was assed on from village to village. Men must have en to carry it; those who received the news ran on fast as they could to the next village, and so on. his wars we find that Caesar had few supplies om Italy. He could hardly get much, even from isalpine Gallia, except horses. The resources of e Provincia helped him greatly; but in many parts Gallia he got all that he wanted from the country, -corn, cattle, hides, and materials for clothing. The er supported him, and even made him rich. The mmunications seem to have been pretty good in me parts. There were roads; well-known fords at e rivers, which imply roads; and wooden bridges, Celtica at least. Caesar even mentions a bridge *G.* ii. 5) over the Axona (*Aisne*), in the territory the Remi.

The Galli were acquainted with the use of the etals. The Bituriges had skill in mining (*B. G.* i. 22), which they found useful when the Romans eaged their town Avaricum. They worked iron es extensively. Some of the Celtic nations coined oney; the Sequani, for instance. They may have arned this from the Massaliot Greeks and their lonies, as well as the use of letters; for they used e Greek alphabet. There appears to be no evi-nce that the Galli ever had any other than the eek or the Roman alphabet, which are the same.

Strabo (p. 189) has some remarks on the great atural advantages of Gallia, both for internal and reign trade. He says, that it is worth while to serve the adaptation of the country to the rivers d to the sea, both the ocean and the inland sea; , if any one will attentively examine, he will find at this is not among the least of the advantages of country: "I mean," he says, "that the neces-ies of life are easily interchanged among all, and advantages are made open to all; so that, even such things as these, one may believe that there evidence of the work of Providence, the parts of s country being placed with respect to one another, as chance might have it, but with wise purpose." e basin of the Atax (*Aude*), on which *Narbonne* nds, is connected with the basin of the *Garonne* an easy country; and the basins of both rivers are connected with Spain by the passes at the two ends of the Pyrenees. Between the head of the *Saône* and the waters of the *Seine* is a portage of small extent; and there was a navigation down the *Seine* to the sea, and thence an easy voyage to Britain. As the navigation up the Rhone was difficult, some of the goods from the Provincia were taken in carts by an easy land road to the country of the Arverni and the *Upper Loire*, and so carried down to the ocean. There were four sea-routes from Gallia to Britain,—from the country of the Morini, from the *Seine*, from the *Loire*, and from the *Garonne*. These natural advantages of France were not neglected before it became a Roman provincia; but they were used much more afterwards, when the Romans made so many excellent roads in the country. It is a signal example of bad administration in this fine country, that its natural capabilities were neglected for so many centuries, and that till comparatively recent times so little has been done to facilitate the interchange of the necessaries of life, and "make these advantages open to all." The political divisions of ancient Gallia would be a reason for the demanding of tolls or duties on goods carried from one country to another; a mode of raising money obvious to the rudest barbarian, and practised by all nations that call themselves civilised. The Galli had river tolls before Caesar's time, and this impediment to commerce existed in France till the great Revolution of 1789, up to which time the map of France and its political divisions preserved many of the great features of a map of Gallia that would fit the time of Caesar. The division of France into departments is one of the great monuments of her revolutionary convulsion. But political divisions cannot all at once erase national character; and France, only a part of Caesar's Gallia, is still a country of many tribes.

The maritime commerce of the south was chiefly in the hands of the Massaliot Greeks, until the Romans came in for their share by settling *Narbonne*, and finally by reducing all the Greek towns under their dominion. This Massaliot commerce requires a notice by itself. The trade on the Atlantic in Caesar's time seems to have been in the hands of the Armoric states. The course of the tin trade with Britain is described by Diodorus (v. 22), and his description may be true for centuries before his time. The traders sailed to the promontory Belerion (*the Land's End*) for the tin which the natives of Britain conveyed to an island, Ictis (*Mount St. Michael*). The merchants took it from Ictis to the French coast, whence it was conveyed on pack-horses to the Rhone, and so down the river.

The social and political condition of the Gallic nation before the Roman conquest would supply materials for a long chapter. Thierry (*Histoire des Gaulois, Deuxième Partie*, chap. i.) has treated this subject at some length, and in an instructive manner, though a careful reader will not accept all the conclusions that he derives from his authorities. The stories that are told of the great ferocity of the Gallic nations may be true only of some of them, and their manners were improving when the Romans came among them. Posidonius (Strab. p. 198), who travelled in Gallia in the second century before our aera, speaks of practices which probably belonged to some of the northern peoples only. "After battle," he says, "they used to fasten the heads of their enemies to their horses' necks, and when they got home nailed them to their doors." He saw this often,

Digitized by Google

and at first he found it strange, but habit made him indifferent to it. Posidonius was a Stoic.

There is hardly a vice of which the Galli are not accused by the Greeks and Romans; drunkenness, cruelty, and abominable lust. We may easily guess what the Galli would have said of Caesar and his men, if they had written the history of the conquest. The Italian and Massaliot merchants encouraged the Gallic propensity to drink, just as the white trader now demoralises the Indians of North America. (Diod. v. 26.) The Belgae had less intercourse with these greedy adventurers (*B. G.* i. 1), and they were less corrupted than the Celtae. The Galli made beer and mead; but they liked wine better, and would drink till they were mad. A Gall would give a boy for a good jar of wine.

The political condition of the Celtae and of all the Gallic nations was miserable. The country was divided into numerous independent states, the most powerful of which were always contending for the supremacy. The weaker states served one or the other of the more powerful states, and paid them tribute. The political system was a tyranny of the rich over the poor; and the religion was a horrible superstition. Two classes of men had the power and the wealth: the noble, as we may call him, and the priest. The poorer sort went for nothing. (*B. G.* vi. 13.) The Celtae had slaves, and many of the poor chose the state of servitude to some noble, instead of freedom, when they became overloaded with debt, or unable to pay their taxes, or when they were wronged by some powerful neighbour. In servitude the poor Celt would have at least a master to feed him and protect him against other tyrants. These nobles were "equites,"—mounted men,—and each maintained as many dependents as he could, and horses for them. They were always fighting and quarrelling; almost every year till Caesar's arrival. Caesar does not explain how the poorer sort got into debt; nor how the land was divided. The rich had doubtless large tracts. There is no evidence that the poor had any land in full ownership. They were probably in the condition of tenants who paid their rent in kind, or partly in money and partly in kind; and their debts might either arise from arrears of rent, or from borrowing to supply their wants. There is no difficulty in seeing where they might borrow: the towns would contain the traders, and the market would be in the towns. Arms, agricultural implements, and clothing must be bought with corn, cattle, and hogs. The poor cultivator, whether a kind of proprietor or a tenant, would soon find himself in bad plight between his lord, the shopkeeper, and the "mercator," who travelled the country with his cart loaded with the tempting liquor that he could not resist. (Diod. v. 26.) The enormous waste of life in the Gallic domestic quarrels, their foreign expeditions, and in their wars with the Romans, was easily supplied. A poor agricultural nation, with such robust women as the Galli had (Diod. v. 32), is exactly the people to produce soldiers. Among such a people more male children are born than the land requires; and those who are not wanted for the plough, the spade, or to watch the cattle, are only fit to handle the sword. A braver set of men never faced the enemy than the Galli with whom Caesar fought. Most of them were the children of poverty, brought up to suffer and to die. We often read, at earlier periods, of their losing, through intemperance, the fruits of a hard-fought battle; but nothing of this kind appears in the Gallic wars.

The nobles were immensely rich, while the mass of the people was poor. Of their great wealth there is conclusive evidence. Caesar (*B. G.* i. 18) informs us that Dumnorix, an Aeduan, had made a great fortune by farming the tolls and other taxes, and that he was able to maintain a large body of horse. The rich Galli were polygamists, and they had the power of life and death over wife and children. Caesar does not expressly limit this power to the rich; but we may be sure that it was a power which no poor man ever exercised. He mentions a kind of marriage settlement among the rich,—for to them only it can apply,—which shows that the condition of women of that class was not so bad. If the husband received a portion with his wife, he added to it as much from his own fortune. The produce of the joint stock was accumulated, and the whole stock, with its accumulations, belonged to the survivor. (*B. G.* vi. 19.) This is like an English estate by entireties, as it is called. It was a good contrivance for keeping up the wealth of a family and providing for the wife, if she survived. Caesar says nothing of the law of succession among the Galli.

It seems that in Caesar's time things were changed. Gallia had gone though many revolutions. He gives some instances of the superstition of the Galli and of the barbarous practices of their religion (*B. G.* vi. 15); and he mentions the Druids and the nobles as the ruling classes. But we see little of priestly rule: it had evidently declined before the power of the nobles, and the growth of the numerous towns which Gallia then contained; and probably the influence of the Greeks was felt over a large part of the country. Caesar (*B. G.* vi. 13) was told that the Druidical system was the growth of Britain, and imported into Gallia. He merely tells us what he heard; but he states that in his time those who wished to master thoroughly this mysterious learning generally went to school in Britain. It is much more likely that some revolution in Gallia drove the Druids into Britain, and we must suppose that they carried their most learned doctors with them. The Galli were, as the Roman says, "a nation greatly given to superstitions," a circumstance in which their conqueror and his officers did not resemble them at all. The Gallic Druids had a pontiff: and when one died, the next in merit (dignitas) succeeded: but if several were equal, a successor was chosen by the votes of the Druids, or, as it sometimes happened, the title to the office was decided by arms. Many young men flocked to the Druids to learn what they had to teach; and the priests, we may suppose, were taken from these pupils. It would be an object of ambition to get into this sacred class; for the Druids were highly respected. They were priests, and judges in almost all disputes, public and private. Like the old Roman patricians, they had both religion and law in their hands. The priest did not fight, and he paid no taxes. This explains why parents were so eager to get their sons into this privileged class. (*B. G.* vi. 14.) It was a provision for them. The pupils learned by heart a vast number of verses, though the Druids were well able to write, and used the Greek character for writing their language, both in public and private affairs. Here we have clear evidence that before the Christian aera the Celtic was a written language, a circumstance that would fix it; and the practice of committing to memory this long string of verses would have the same effect. Caesar supposes that the verses were not committed to writing, partly to prevent the learning from being

Digitized by Google

divulged,—which implies that other people could read besides the Druids,—and partly to exercise the memory. They taught the immortality of the soul and the transmigration into different bodies. They taught their youths also astronomy, and much about the nature of things, and the immortal gods.

In the different states we read of a concilium or assembly, variously constituted. One thing the Galli provided against carefully: there was to be no talk on political matters except in the concilium. If a man heard anything by rumour or report that concerned the state, he must open it only to the magistrates, who concealed what they thought fit, and told the people just as much as they thought proper. (*B. G.* vi. 20.) There was no liberty of speech. Caesar speaks of senates among the Gallic tribes (*B. G.* ii. 5); that is, a governing body to which he gives a name which a Roman would understand. He does not explain the constitution of these senates, which might not always be the same. The head of the state seems to have been elective. The chief magistrate of the Aedui, named Vergobretus (*B. G.* i. 16), was elected for a year, and had "vitae et necis in suos potestatem;" which is sometimes misunderstood to mean, that he could do as he liked. It simply means that he was the chief judge. Something of a popular assembly, of a democratic element, appears in some of the states. Usurpations were common things. A man who was rich enough to get a large body of adherents, would seize on power, and keep it as long as he could. In the early period of Gallic history kings appear more frequently than in Caesar's time; and we read of kings whose fathers had been kings,—which, however, was rather a rare occurrence. A long regular dynasty of princes was not to the taste of the Galli. Either popular insurrection or a successful rival displaced them. These frequent revolutions filled the country with desperate men, who had nothing to lose, and were always ready for adventure. Exiles, fugitives, and men who had saved their lives by running away, swarmed in the country. Those who could not find safety in Gallia found a refuge in Britain. The attempt of Thierry (*Histoire des Gaulois*) to explain the early revolutions and constitutions of Gallia, is ingenious, but not satisfactory. A careful perusal of Caesar will give a better notion of the confusion that reigned between the Pyrenees and the Rhine, when the Romans came to settle all disputes and teach the people how to live.

Caesar was assassinated in B. C. 44. Little is said of what he did with Gallia from the time when he left it to the time of his death; but we may be sure that he did not neglect so profitable a conquest. Suetonius says (*Caes.* 25): "All Gallia which is bounded by the Saltus Pyrenaeus, and the Alps, and the Gebenna, by the rivers Rhine and Rhone, except the allied states and those that had done him service, he reduced to the form of a province, and imposed on the people an annual payment to the amount of 'quadringenties stipendii nomine.'" It was not called "tributum" or "vectigal." Ammianus Marcellinus (xv. 11), who wrote in the fourth century of our aera, has a passage which has caused much difficulty. He speaks of four divisions after Caesar's conquest, made by him as dictator; but he uses terms that can only be understood by referring to the divisions that existed in his time. He says that Narbonensis contained also Lugdunensis and Viennensis; Aquitania was a second division; the Superior and Inferior Germania and the Belgae were under two jurisdictions at the same time." (See the Note of H. Valesius.) Walckenaer attempts to explain this passage, and to show that it agrees with what Strabo (p. 177) says: but it is not worth the labour. Both authors are very obscure here; and Ammianus is too uncritical to be trusted for such a matter, even if one were quite sure what he meant.

The conqueror of the Gauls knew the value of the men whom he had conquered. He had formed a legion of Transalpine Galli, to which he gave the Gallic name Alauda: he fitted them out like Roman soldiers, and drilled them after Roman fashion. (Sueton. *Caes.* c. 24.) Finally he made them Roman citizens, which must have taken place after he was dictator. In the Civil War he had Galli in his army,—Aquitanians, mountaineers from the border of the Provincia, archers from the Ruteni, and Gallic cavalry, which he had found useful also in his Gallic wars. His last military operation in Gallia was the siege of Massilia [MASSILIA], B. C. 49. He afterwards sent, under Ti. Claudius Nero, a supplementary colony to Narbo, and a colony to Arelate (*Arles*), both of which are mentioned by Suetonius (*Ti. Caes.* 4), who speaks of other colonies, but he does not mention them. Baeterrae (*Béziers*) may have been one, and Forum Julii (*Fréjus*) another. All these were colonies of old soldiers. Caesar had Galli with him in his campaigns in Greece and Africa; and there were also Galli on the side of the Pompeian party. These war-loving men had never a better commander, for Caesar led them to victory and paid them well. The civil wars of Rome threw a great number of Gallic adventurers on the coasts of the Mediterranean. Juba, the African, had a picked guard of Gallic and Spanish cavalry (*B. C.* ii. 40); and M. Antonius made a present to Cleopatra of some hundreds of these men. Caesar even placed some of his Transalpine friends in the Roman senate,—some of the semibarbarous Galli, as Suetonius calls them (*Caes.* c. 76, 80),—a measure which well deserved the ridicule that attended it.

Dion Cassius (xliii. 51) says that, in the year B. C. 44, Caesar united the government of the Provincia and Hispania Citerior under M. Aemilius Lepidus. Hirtius had Belgica, and L. Munatius Plancus had Celtica. In B. C. 43, the year after Caesar's death, Lepidus still held his provinces. L. Munatius Plancus, who was also in Gallia, founded the colony of Augusta Rauracorum (*Augst*), in Switzerland, and Lugdunum (*Lyon*), at the confluence of the Rhone and *Saône*, which soon became one of the first cities of Transalpine Gallia (Dion Cass. xlvi. 50); but the colony of Augusta Rauracorum perhaps was not completely settled till the time of Augustus, as we may infer from the name.

The final settlement of Gallia was the work of Octavianus Caesar, afterwards the emperor Augustus. His success in administering the Roman empire is due to his great abilities and to the name that he bore. His able assistant was M. Vipsanius Agrippa, who led his troops from Aquitania, which he found in a state of insurrection (Appian, *B. C.* v. 92), to the banks of the Lower Rhine, B. C. 37. He was the second Roman commander who crossed this river into Germany. The Ubii, a nation already well known to the Romans, had crossed the Rhine into Gallia, and Agrippa permitted them to settle there. (Tac. *Ann.* xii. 27; Strab. p. 194.) The Oppidum Ubiorum afterwards became the Roman colony Agrippinensis. [COLONIA AGRIPPINENSIS.] Probably about this time the Tungri, another Germanic tribe,

Digitized by Google

were allowed to occupy the country from which the Eburones had perished. Agrippa seems to have established the policy of planting German tribes on the west bank of the Rhine,—nations that were driven by their countrymen from the other side of the river. The true German hated and despised the men who shut themselves up within walls; and the Gallicised German who enjoyed his possessions on the west bank of the Rhine, was ready to defend them against his less civilised brothers.

The disputes of Octavianus Caesar with M. Antonius prevented him from directing all his attention to the Galliae. For some years the country was in a disturbed state. The Treviri were reduced to obedience by Nonius Gallus. C. Carinas defeated the Morini, and drove back the Suevi, who had crossed the Rhine. (Dion Cass. li. 20, 21.) The Aquitani, the last people who continued in arms, were subdued by M. Valerius Messalla, B. C. 28. In B. C. 27, nearly a quarter of a century after Caesar ended his campaigns, and when Octavianus, now Augustus, had become master of the Roman world, Gallia Comata was definitively organised. Augustus, who took into his own hands the administration of the most important provinces, of those which required the largest military force, went to *Narbonne* in B. C. 27. From this time we may date the regular administrative division of Gallia into four parts; but Augustus made very little change. The Provincia received the name of Narbonensis, from the Roman town of Narbo; but its limits were not altered. Aquitania retained its name; but it was extended to the *Loire*, and consequently comprised a large part of Celtica. [AQUITANIA.] The rest of Celtica received the name of Lugdunensis, from the new settlement of Lugdunum. The remainder of Gallia was Belgica. (Strab. p. 177.)

The organisation of the provincia of Narbonensis was the first labour of Augustus. During the Civil Wars it had been hostile to the party of Caesar; and particularly Massilia and its dependencies. [PROVINCIA.] The policy of the emperor was to destroy the nationality of the Galli, to confound the old divisions, and to stamp a Roman character on the country. From Lugdunum, the capital of one of the new divisions, Agrippa made four great roads (Strab. p. 208): one over the *Cévennes* to the Santones, at the mouth of the *Garonne*, and into Aquitania; a second to the Rhine; a third to the Ocean, in the country of the Bellovaci and the Ambiani, the termination of which would be at Bononia (*Boulogne*); and a fourth into Narbonensis and the Massaliot coast. Lugdunum was in fact the centre of Gallia, a kind of acropolis; and in the history of modern France its position has always been of the greatest importance. It was on the high road from North Italy into Gallia Transalpina and to the Ocean: for a carriage road led from Augusta Praetoria (*Aosta*), over the Alps, to Lugdunum; and another, steep and short, from the same town, over the Pennine Alps, into the basin of the Leman lake, and thence to Lugdunum. This road over the Pennine Alps also passed to the Rhone or the Leman lake, after crossing which the traveller proceeded into the plain country of the Helvetii, whence there was a road over the Jura into the country of the Sequani and the Lingones. In the country of the Lingones the road divided; one branch led to the Ocean, and the other to the Rhone. Agrippa made a measurement of the whole ocean coast of Gallia, and of the coast of Narbonensis.

To the time of Augustus we may certainly ascribe the Roman names of many of the Gallic towns. Caesar probably began the work, as we may infer from the name Julia, which appears in several places. Juliomagus (*Anger*), for instance, was a site that Caesar had visited. Gergovia, in the country of the Arverni, where Caesar was defeated, lost its name, and the neighbouring city of Augustonemetum took its place. The capital of the Suessiones, Noviodunum, became Augusta Suessionum; and the capital of the barbarous Treviri, whose Gallic name is unknown, became Augusta Trevirorum. Bibracte, the capital of the Aedui, received the name of Augustodunum. Some of the old states were put in the class of Foederati; others were Liberi, as the Senonesiani. (Plin. *H. N.* iv. 18.) The Lingones and the Remi, two people that had always been friendly to Caesar in his Gallic wars, are mentioned by Pliny (iv. 17) among the Foederati. The Auscii in Aquitania had the Latinitas. [AUSCI.] The Roman civitas was sometimes conferred on great families for their merit, that is, their services to the Romans.

Augustus made a census of the three Gallias (Liv. *Epit.* 134; Dion Cass. liii. 22) at the time when he visited *Narbonne*. The object of this census was taxation, for which purpose a register was made of the people and of all their properties.

The Romanising of Gallia under Augustus was rapid, and the measures adopted for this purpose were judicious. Schools were established in the chief towns of the Provincia; and Tacitus mentions Augustodunum, the chief town of the Aedui, in the Lugdunensis, as a great school in the time of Tiberius. (*Ann.* iii. 40.) The Latin language took root in Gallia, and also Roman law; and both subsist to the present day. The religion of the Galli was an obstacle to Roman civilisation; but the Romans were too prudent to attack the religion of a nation openly. A kind of mixture of Gallic and Roman religion grew up in many of the towns, and temples to Roman deities were built in all the places where the Romans settled. Some curious proofs remain of the blending of the two religions. On the site where the venerable cathedral of Notre Dame of Paris now stands, on the ancient island of Lutetia, once stood a temple whose sculptures indicate the blending of the Roman and the Gallic superstitions. But among the people of the country the old religion maintained its ground, and it would be very difficult to say that all traces of it have yet entirely disappeared. The importance of pacifying and organising the Galliae explains why the prudent emperor did not attack Britain. He was too much in Gallia, and the invasion of Britain was not a light matter. Augustus had also a decent excuse; for the Britons, it is said, sent him a pacific embassy. He made a second visit to Gallia in B. C. 16 to settle the disturbance that had risen on account of the census (Liv. *Epit.* 137) and the tyranny of C. Licinius his procurator (Dion Cass. liv. 21). Drusus, the step-son of Augustus, completed the census of the Galliae, and he secured the defence of the Rhenish frontier by building numerous forts, chiefly along the left bank of the river. The Roman Itineraries along the west side of the Rhine, from Lugdunum Batavorum southward, show the numerous positions along this route, and indicate the origin of many modern towns. In the time of Tiberius this bank of the river (Tacit. *Ann.* iv. 5) was guarded by eight legions, a force almost equal

Digitized by Google

s that which protected all the other frontiers of the mpire.

Pliny (iv. 17) and Ptolemy (ii. 9) include the Leuci, Lingones, Sequani, and Helvetii in Belgica, which was true for their time; but it is not known when this change was made. The commander in Belgica and on the Rhenish frontier had not only he Belgica of Augustus under him, but the four eoples which have just been mentioned. Thus Celtica was a second time reduced in its extent, the irst reduction being that made by Augustus. But Transalpine Gallia still consisted of four great divi-ions,—Narbonensis, Aquitania, Celtica, and Belgica. hese are the divisions in the geography of Ptolemy, but he places in Belgica, or, as he calls it, Κελτο-ελγική Βελγική, two subdivisions,—Germania In-erior (ἡ κάτω), and Germania Superior (ἡ ἄνω). lis Germania Inferior extended along the Rhine om the sea to the river Obrincus; but we do not now what river Ptolemy means. The southern mit, however, is fixed by the towns that he men-ons. Meguntiacum (*Mainz*) is the furthest town to s south. From the Obrincus southward he enu-merates, in Germania Superior, the Nemetes, Van-ones, Tribocci, and Rauraci. The Tribocci were the Gallic side in Caesar's time; the other three ibes came over afterwards. The most southern wn in Ptolemy's Germania Superior was Augusta auracorum (*Augst*), a little higher up the Rhine an Basilia (*Bâle*). The Germaniae, in fact, were opled by transplanted Germanic peoples, who were der a military government. This will explain iny, when he says that Belgica extended from the *Scheldt* to the *Seine:* he means that the part be-ween the *Scheldt* and the Rhine was occupied by rmanic peoples. The establishment of the Ger-aniae belongs to the time of Augustus. They e mentioned by Tacitus (*Ann.* iii. 41, iv. 73); t Dion Cassius (liii. 12, lv. 23) assigns the forma-n of the Germaniae to Augustus. We learn m Tacitus that Drusus and Germanicus had the mmand both of Belgica and the Germaniae. At later period (*Ann.* xiii. 53) he speaks of Aelius acilis, as legatus of Belgica, and of L. Vetus, commanding in the Germania Superior. Vetus D. 59) wished to join the *Saône* and the *Mosel* by anal, in order that there might be a water com-nication between the Mediterranean and the rth Sea, up the Rhone and the *Saône*, and down *Mosel* and the Rhine. Gracilis would not let us bring his legions into his province of Bel-a; and the canal was not made. The Germaniae n had at this time a distinct administration; but i division existed, as it appears from other passages, n in the time of Tiberius.

Three Alpine provinces are mentioned. On the hority of Dion Cassius (liv. 24), it is said that gustus formed the Alpes Maritimae into a rince. In A. D. 63 Nero certainly gave them Latinitas or Jus Latii (Tacit. *Ann.* xv. 32); in A. D. 69 they formed a province, for they e then governed by a procurator (Tacit. *Hist.* 2).

The Alpes Cottiae formed a kingdom under Cot-, an Alpine chief, until the time of Nero, who e this country into a province. (Sueton. *Nero*, 3.) It consisted of fourteen communities, and ipied a tract on both sides of the Alps. The f place was Segusio (*Susa*) on the Italian side.

The Alpes Penninae are mentioned as a province r the later Empire.

In the Geography of Ptolemy all these parts of the Alps are included in Italy. They were not united to Gallia until after the time of Constantine, as some modern writers maintain.

At the very commencement of the administration of Tiberius, the successor of Augustus, Gallia gave a sign of what might be expected from the legions of the Rhine, who were then distributed in two camps, an upper and a lower. Germanicus, the nephew of Tiberius, was busied with the census of the Gallias when the news arrived of the death of Augustus. (Tac. *Ann.* i. 31.) The soldiers on the Rhine were dissatisfied; they broke out into mutiny, and Germanicus with great difficulty reduced them to obedience. Some of them would have had him assume the imperial power, the first indication that is mentioned of the legions assuming to name a successor to the power of Augustus. In A. D. 21 there was a rising in Gallia headed by Julius Florus among the Treviri, and Julius Sacrovir among the Aedui, those brothers of the Roman people, who were their most uncertain friends. (Tac. *Ann.* iii. 40.) Both these men were Galli of noble rank, and Roman citizens, a personal distinction that had been conferred on some of their ancestors, after Roman fashion, for their services, which means their fidelity to Roman interests. The taxation, the heavy rate of interest with which they were loaded, and the tyranny of their governors, were the alleged causes of this rebellion of the Galli. Both communities and individuals, under Roman dominion, were always complaining of debt. We do not know what particular contributions oppressed the Gallic states; but it seems probable that the great works undertaken by the towns, probably by the order of the governors, may have been one cause of debt. Temples and other public buildings rose up all over the country, and must have cost immense sums. Works of more direct public utility also, such as bridges, roads, and aqueducts, of which there are so many traces in France, could not have been accomplished without a very large expenditure. The Romans embellished and improved the country, but the people paid dear for it. Gallia not only had to supply all its own expenditure, but to furnish contributions to the empire. This rising, which, if the beginning had been more successful, might have ended in a general rebellion, had no results. The Andecavi, and Turonii or Turones, on the *Loire*, who were the first to begin, were soon put down. Florus did not succeed in stirring up the Treviri, though he made a beginning in true Gallic style by murdering some Roman "negotiatores;" these men of money, who settled themselves in every place where gain was to be got. A body of debtors and clients, as they are called,—needy dependents,—fled into the *Ardennes*, a country which in some parts, even at the present day, is no bad place of refuge. Another Julius, named Indus, also a Trevir, and an enemy of Florus, helped to put down the rising, which ended by Florus killing himself. Among the Aedui the matter was more serious. Sacrovir was defeated by the Roman commander C. Silius, near Augustodunum, in a pitched battle. He retired to his villa with his most faithful adherents, and there he died by his own hands. His men killed one another; and the house, which they had set on fire, consumed them all. This is a sample of Gallic desperation, which is a part of the national character.

Caius Caesar, named Caligula, the successor of Tiberius, went into Gallia, but he did nothing except exhibit his madness and brutality at Lugdunum.

Digitized by Google

His uncle Claudius, who succeeded Caius, was born at Lugdunum, on the day in which the altar at Lugdunum was dedicated to Augustus. (Sueton. *Claud.* c. 2.) This learned pedant and imperial fool wished to extirpate the old Gallic religion, and he commenced a furious persecution of the Druids. His biographer (Sueton. *Claud.* c. 25) says that he completely abolished the religion of the Druids. Augustus had gone no further than to forbid Roman citizens embracing this superstition. Pliny ascribes the extirpation of Druidism to Tiberius Caesar; but whatever these emperors may have intended to do, they did not succeed. Claudius was the first Roman emperor who set foot in Britain. Aulus Plautius, his general, was already there, and engaged in active warfare. The emperor landed at Massilia, whence he went by land to Gesoriacum, afterwards Bononia (*Boulogne*), and from *Boulogne* he crossed the straits. *Boulogne* became from this time a Roman port, and the usual place of embarkation for Britain. Claudius crossed the Thames with his army, and took Camalodunum, the town of king Cunobelin. He was only sixteen days in Britain, and on his return he had a triumph for the victories which his general had gained. (Dion Cass. lx. 19 23.) It was probably when Claudius was in Gallia that the chief persons (primores) of Gallia Comata, "having," as Tacitus says (*Ann.* xi. 23) "long ago had treaties with Rome (foedera) and the Roman civitas, claimed the privilege of obtaining the honores at Rome." This passage of Tacitus has sometimes been misunderstood. The "civitas" had not been given to any of the states of Gallia Comata; but some of the chiefs had obtained the Roman civitas, as we have seen in the examples of Florus and Sacrovir. But it appears from this passage, that it was not the complete civitas, for they had not access to the high offices at Rome and the senate; and yet the Roman "civitas" implies both the suffragium and the honores. The "suffragium" was indeed nothing now; and the "honores" were only a name; but it was something for a Gaul to have the title of praetor and consul, and a seat in the Roman senate. Claudius made a speech to the senate, which is a singular mixture of pedantry and good sense. He supported the claim of the Gallic chiefs by the universal practice of Rome of admitting foreigners into the senatorial body; and the first instance that he mentions was that of his Sabine ancestor, Clausus, the progenitor of the Claudia Gens. He observed that the Galli were already mingled with the Romans by sameness of manners, arts, and marriage; and he argued that it was better they should bring their gold and wealth to Rome than keep it to themselves. The wealthy Gallic nobles often visited Rome, and some of them resided there. The emperor thought it better to attract to Rome the rich men of the provinces than to keep them away. A senatus consultum followed the speech of the princeps; and "the Aedui were the first who obtained admission to the senate in the city" (senatorum in urbe jus). "This," adds Tacitus, "was granted in respect of their ancient foedus, and because they were the only Gallic people that had the title of fraternity with the Roman people" (A. D. 48). It is not said if other Gallic peoples, after the Aedui, obtained access to the senate. Probably we may conclude that they became admissible. But this was purely a personal distinction, conferred at the pleasure of the emperor on such rich Galli as chose to reside in Rome.

The Provincia, the first part of Gallia in which the Romans fixed themselves, became, under the Empire, completely Italian in language, in manners, and in civility; and the parts of Gallia Comata nearest to it soon showed the effects of this proximity. The younger Pliny (*Ep.* ix. 11) says that there were booksellers at Lugdunum in his time, and he was glad to hear that they sold his books. The language and literature of Rome soon extended beyond the limits of the Narbonensis; for Latin was the language of administration, and of the numerous "negotiatores" and "mercatores" who covered the country. It was also the language of most of the legionary soldiers. The great nobles learned it as a matter of course: for their ambition was to live at Rome, and intrigue in public affairs. Julius Africanus, a Santon, was involved in the ruin of Seianus at Rome (Tac. *Ann.* vi. 7): and Valerius Asiaticus, twice consul, and a man who claimed the merit of having planned the death of Caligula, was a native of Vienna (*Vienne*) on the Rhine: but whether he was of pure Roman blood, for Vienna was a colonia, or Gallic, does not appear. (Tac. *Ann.* xi. 1.)

From Gallia came the blow which struck down the emperor Nero. C. Julius Vindex, the governor of Lugdunensis, an Aquitanian by descent, and a Roman senator through his father, hated Nero, whose infamous debaucheries he had been witness of at Rome. He stirred up the Galli of his province (A. D. 68) to insurrection, not against the Romans, but against a sanguinary tyrant whom he despised. The conspirators fixed on Ser. Sulpicius Galba, then governor of Hispania Tarraconensis, as the successor of Nero, the first example of a Roman emperor being named on a foreign soil. Galba vacillated, and with good cause: for the legions of Gallia had the power in their hands, and they were divided. Lugdunum was the only large city that continued faithful to Nero (Tac. *Hist.* i. 51), who had given 4,000,000 sesterces to restore it when it was burnt (Tac. *Ann.* xvi. 13); but its rival and neighbour, Vienna, was on Galba's side. The legions on the Rhine had not yet declared themselves, and the states in their neighbourhood waited for the decision of the troops. Verginius Rufus, who commanded in the Upper Germania, felt or affected respect for the Roman senate, and would not support an election made by insurgents. He entered the country of the Sequani, who had declared for Galba, and had sent to Vesontio (*Besançon*). Vindex, with the force that he had collected, hurried to defend the place, and though the two generals had an interview, and are supposed to have come to terms, their men fell to blows, and the army of Vindex was routed. Vindex ended his life by his own sword.

Galba had now declared himself, and advanced into the Narbonensis; Rufus, in the mean time, kept his men in suspense. The news of the death of Nero decided the fortune of Galba. The messengers from the Roman senate met him at *Narbonne*, and urged him to hasten to Rome, where he was eagerly expected. (Plut. *Galba*, c. 11.) The new emperor belied the hopes that were formed of his moderation and prudence. He punished the Gallic peoples which had not declared for him; he deprived some of their territory, imposed on them heavier taxes, and even destroyed their fortifications. (Tac. *Hist.* i. 8; Sueton. *Galba*, c. 12.) Plutarch (*Galba*, c. 18) speaks of the Gallic partisans of Vindex obtaining the "civitas," and Tacitus (*Hist.* i. 8) has the same: but, whatever the historians mean by this civitas it was a name and nothing more. When Tacitus asks

that there was a diminution of taxation, we understand what he means. The troops on the Rhine soon chose a new emperor. Galba had appointed Vitellius to command in the Lower Germania, in place of Fonteius Capito, whom his officers murdered. Vitellius was more contemptible than Galba, but he had art enough to gain the affection of his men, and he was saluted emperor in the Roman colony of Agrippina (*Cologne*) in January, A. D. 69. Thus Rome got an emperor from the banks of the Rhine, just after receiving one from Spain. In fact, it had now two at the same time. Galba was murdered at Rome, before the end of the month in which Vitellius was proclaimed; and another emperor, Otho, had reigned and died before Vitellius crossed the Alps into Italy. The eastern part of Gallia suffered terribly from the march of Vitellius' troops towards the Alps. They went in two divisions under his generals Valens and Caecina; the lazy emperor followed slowly after. As he was passing through Gallia, Maric, a Boian, one of the meaner sort (Tacitus is almost ashamed to mention so low a fellow, *Hist.* ii. 61), assumed the title of "Vindicator of the Galliae and God." He got about eight thousand men together, and was gaining ground in the nearest cantons of the Aedui, when this honoured state and the elegant youths who had been brought up at Augustodunum, with the help of a few cohorts from Vitellius, dispersed the fanatical rout. Maric was thrown to wild beasts, and because he was not torn, the stolid rabble considered him invulnerable; but Vitellius, who was present, broke the charm by ordering the man to be put to death. The story is significant of the popular ignorance; but a parallel may be found even in our own days.

Vitellius had another rival almost before half the year was over. Vespasian was proclaimed emperor at Alexandria on the first of July, A. D. 69; and not quite twelve months passed from the time when Vitellius was proclaimed at *Cologne* to his ignominious death at Rome. One of the men who mainly helped to place Vespasian on the imperial throne, was a native of Tolosa in the Narbonensis, Antonius Primus.

During the contest between the partisans of Vitellius and Vespasian an insurrection broke out in Gallia, the most formidable since the time when Caesar reduced this country to obedience. It began in the swamps of Holland. Claudius Civilis, of a powerful Batavian family, had served in the Roman armies from his youth, and had the rank of a Roman citizen. Both he and his brother Paulus had fallen under the suspicion of Fonteius Capito, the governor of the Lower Germania. Paulus was put to death by the order of Capito, and Claudius was given up to Nero, who put him in prison. Galba set him at liberty, and sent him back to the Germaniae. Civilis pretended to take the side of Vespasian when the news reached the Rhine of the east having declared for him, but his real object was to establish the independence of his country, and to get power himself. In a short time he drove the Roman troops out of the Insula Batavorum, and besieged two legions in Castra Vetera [CASTRA] near the Rhine. (Tac. *Hist.* iv. 22.) The success of Civilis brought him aid from the Germaniae and the Galliae; and deliverance from Roman oppression was now talked of. The Batavi themselves paid no "tributum" or taxes to the Romans; and an inscription preserves the record of their being honoured with the title of brothers (fratres), as the Aedui of old had been. But Civilis affected to take up arms against their common tyrants, and the Galli were invited to assist in expelling them. When the news of the death of Vitellius reached the Galliae and the Germaniae (Tac. *Hist.* iv. 54), the war against the Romans was carried on by Civilis with new vigour. He did not affect any longer to be on the side of Vespasian. He was fighting against the power of Rome. The burning of the Roman capitol in the contest between the partisans of Vitellius and Vespasian, seemed to the Galli an omen of the end of the Roman empire. The Druids declared that this conflagration was a sign of the wrath of heaven, and that the dominion of the world was given to the Transalpine nations. The Druids were not wrong: they only mistook the time. The Roman camp on the Rhine was full of discord. Hordeonius Flaccus, an old and feeble commander, a partisan of Vespasian, was murdered by his own men. (Tac. *Hist.* iv. 36.) Upon this messages passed between Civilis and Classicus, a Trevir, who commanded a body of cavalry of the Treviri. Classicus was of royal descent, and he boasted rather of his ancestors' hostility to Rome than of their alliance. Two other men joined them; Julius Tutor, a Trevir, and Julius Sabinus, a Lingon. Tutor was set over a part of the banks of the Rhine by Vitellius. Sabinus, a vain man, was puffed up by a false conceit of a Roman descent; he gave it out that one of his female ancestors had an adulterous connection with Caesar during the Gallic War. These men met at *Cologne* to concert their plans, but in secret; for most of the Ubii were still disinclined to revolt. Indeed, it was only a part of Gallia, the north and some parts of the east, that was ready for insurrection; and chiefly the Treviri and the Lingones. The Sequani refused to join any league against Rome. The conspirators made an attempt to corrupt the legions, which were now under the command of Vocula, who was murdered by a deserter from the first legion. (Tac. *Hist.* iv. 59.) Classicus entered the Roman camp, having assumed the insignia of the Roman empire, as Tacitus expresses it, and the Roman soldiers took the military oath in defence of the empire of the Galliae. Tutor compelled the people of *Cologne* and the soldiers on the Upper Rhine to take the same oath. Civilis was still employed on the blockade of the Roman troops at Vetera. Famine at last compelled the soldiers to yield; but before the surrender was accepted, they were required to swear fidelity to the Gallic empire. Civilis cut off his long light hair, which he had let grow, pursuant to a vow made, after the fashion of his country, when he began the war against the Romans. (Tac. *Hist.* iv. 61.) But he neither took the oath to the Gallic empire, nor allowed any Batavian; he trusted to the power of the Germans, and he had ambitious views of dominion. There was among the Bructeri at this time a virgin, named Veleda, who had great authority, for the Germans thought that most women had the gift of divination; and Veleda had proved her claim to this distinction. She had foretold the success of the Germans and the destruction of the Roman legions.

Civilis and Classicus, elated by their success, deliberated whether they should give up *Cologne* to their men to plunder. (Tac. *Hist.* iv. 63.) The Transrhenane people hated this strong walled place, and a deputation from the Tencteri brought their wishes to the municipal body of *Cologne*. The speech which Tacitus puts in the mouth of these Germans is valuable, because it gives us some in-

Digitized by Google

formation of the state of this flourishing city at that time. The original Roman settlers had intermarried with the German Ubii, and they had become one people. There were duties levied on goods that passed through *Cologne*, and doubtless on goods passing up and down the river. The Ubii consented to abolish these imposts, and to allow the Germans to pass through their town unarmed and in the day-time. The Agrippinenses satisfied the Tencteri by their concessions; and it was agreed that Civilis and Veleda should be the witnesses to the compact. Commissioners from *Cologne* were sent with presents, and the business was amicably settled. But the holy woman could not be approached: she staid in a lofty tower; and one of her kinsmen brought to her the words of the commissioners, and carried back her answers, as if he were a messenger between a divinity and men. (Tac. *Hist.* iv. 65.)

The insurrection of the Batavians had been prosecuted with vigour and success. In the country of the Lingones it was a miserable failure. Julius Sabinus, proclaiming himself Caesar, led a disorderly rabble into the territory of the Sequani; and the Sequani, faithful to Rome, accepted the challenge. The Lingones were routed, and Sabinus was one of the first to run. His fate does not concern us here, and his name might be forgotten but for the constancy and devotion of his wife Epponina for nine years, during which he lurked in his hiding-places. She was one of the illustrious women of Gallia; for it is one of the characteristics of the nation to produce women above the common stamp. (Plut. *Amatorius*, vol. iv. ed. Wytt.)

The defeat of the Lingones and the news of the approach of the armies of Italy under Annius Gallus and Petilius Cerialis, checked the Gallic insurrection. Seven legions were marching upon Gallia: four from Italy, two from Spain, and one that was summoned from Britain. The Remi, who had received Caesar in a friendly manner when he first entered the country of the Belgae, summoned the Gallic states to deliberate on the question of peace or war. It seems probable that their object was to secure peace, and that they were resolved against war. The deputy of the Treviri, a Gaul with a Roman name, Tullius Valentinus, was the eager advocate of war; but he was more a man for words than for deeds. Julius Auspex, the orator of the Remi, spoke in favour of peace. The states were divided by interests and jealousies; there was discord among them before they had got the victory. (Tac. *Hist.* iv. 69.) This meeting showed that a Gallic rebellion was impossible; for the Galli could not agree as to the conduct of the war, nor what they should do if the Romans were driven from the country. Nor was Rome yet so feeble as to fear the nations of the North. She had good soldiers, able generals, and a man of ability as emperor. Civilis was engaged in a quarrel with a countryman, Labeo, who had a faction of his own. Neither Classicus nor Tutor made any vigorous preparations to resist the Romans. Tutor met one division of the Roman army with the forces of the Treviri, Vangiones, Tribocci, and Caracates, the last a people who lived about *Mainz;* he had also some of the Roman soldiers who had taken the oath of fidelity to the Gallic empire. The Romans of Tutor deserted to the enemy, and the Germans followed their example. Tutor, with his Treviri, retired to Bingium (*Bingen*) on the Rhine, where he was surprised and routed. Cerialis had now got to Moguntiacum (*Mainz*),—a general full of confidence in himself and contempt for the enemy. He declined the aid which the states of Gallia sent, and ordered their troops home: he told the Galli they might turn to their usual occupations; he could finish the war himself. He passed from *Mainz* to Rigodulum on the *Mosel*, where Valentinus had posted himself with a large force of Treviri, and fortified himself. Cerialis quickly dislodged him, and on the next day entered Colonia Treverorum, the ancient city of *Trier*, on the *Mosel*, the capital of the Treviri. With difficulty he prevented his men from destroying a city which was the native place of Classicus and Tutor. Cerialis summoned the Treviri and Lingones to *Trier*. The speech which Tacitus (*Hist.* iv. 73) has put in the soldier's mouth is a wonderfully brief and masterly composition, well suited to make the Galli satisfied with the Roman dominion, as the only means of averting anarchy, and to detach them from alliance with the Germans. The Treviri and Lingones were well satisfied to be told that they had better be obedient and enjoy what they had, than run the risk of losing all by persevering in their resistance. This was the end of the Gallic rising, which was not a national movement, but the rebellion of a few states. The real rebellion was among the Batavians and the German settlers in Gallia, though there were still some Lingones in the army of Civilis.

Civilis, with Classicus and Tutor, fell upon the camp of Cerialis near *Trier;* for Cerialis, though an able commander, was careless and a man of pleasure. The enemy was not repelled without difficulty. (Tac. *Hist.* iv. 77.) This failure of Civilis encouraged the Agrippinenses to come over to the Roman side, which they had unwillingly deserted for the German and Batavian alliance. They sent to offer to Cerialis the wife and sister of Civilis and the daughter of Classicus, who were with them, as hostages; and they massacred the Germans who were dispersed in the houses of the city. Fearing the vengeance of Civilis, they sent for help to Cerialis. Civilis was marching upon *Cologne*, hoping to find at Tolbiacum (*Zulpich*), in the territory of the colony, a cohort of Chauci and Frisii, on whom he greatly relied; but on the way he heard the news of all these Germans being destroyed by the treachery of the Agrippinenses. The Chauci and Frisii had been gorged with food and wine, and while they were drunk and asleep the Agrippinenses closed the doors of the place, set fire to it, and burnt them all alive. (Tac. *Hist.* iv. 79.) Civilis hastened to *Cologne*, and this important city was again in the hands of the Romans.

Cerialis carried the war into the Insula Batavorum. Civilis at last came to terms, and obtained his pardon. The history of the last part of this campaign is imperfect in Tacitus, whose work breaks off suddenly. (*Hist.* v. 25.)

The political divisions of Gallia remained unchanged till the fourth century of our aera. The origin of the new division is unknown. The history of the Galliae under Roman dominion belongs to the history of the Roman empire, and cannot be separated from it. The subject is instructive, but it belongs to a different kind of work.

This article, though long, is not complete, but perhaps complete enough for its purpose, and within such limits as are reasonable. The following references will be useful. There is a good article on *France* in the *Penny Cyclopaedia*. D'Anville, *Notice de la Gaule Ancienne;* Thierry, *Histoire des*

The references in these works will show what a large mass of literature has accumulated on the geography and history of the Gallise. [G.L.]

GA'LLICA FLA'VIA. [ILERGETES.]

GA'LLICUM. [ILERGETES.]

GA'LLICUM, in Macedonia. [ECHIDORUS.]

GA'LLICUM FRETUM. [FRETUM GALLICUM.]

GA'LLICUS SINUS (ὁ Γαλατικὸς κόλπος, Strab. p. 137 : *Golfe du Lion*) was the Roman name of the bay of the Mediterranean, formed by the south coast of Gallia Narbonensis. It was also called Mare Gallicum. (Plin. iii. 5.) The western limit was the Pyrenees Promontorium (Liv. xxvi. 19); the eastern may be fixed near Massilia, and the bay was sometimes called Massaliotic. Strabo gives the same name to the opposite bay on the Atlantic, which is formed by the north coast of Spain and the south part of the Atlantic coast of Gallia; but no other writer seems to have given the name to the Atlantic gulf. [GALLIA.] [G. L.]

GALLINA'RIA INSULA. [ALBIUM INGAUNUM.]

GALLINA'RIA SILVA (Γαλλινάρια ὕλη, Strab. vi. p. 243), a forest on the coast of Campania, occupying the sandy shore which extends from the mouth of the Vulturnus towards Cumae. It is mentioned by Cicero in one of his letters (*ad Fam.* ix. 23) as lying on the road to the latter place. Shortly afterwards it became the headquarters of Sextus Pompeius, where he first organised the predatory bands with which he subsequently undertook his piratical expeditions. (Strab. *l. c.*) Even at ordinary times it was noted as a favourite resort of banditti, and was in consequence often guarded by bands of soldiers. (Juv. iii. 307.) Strabo speaks of it as a forest of brushwood (ὕλη θαμνώδης); but from Juvenal's expression of "Gallinaria pinus" it is evident that there was also a wood of tall pine-trees, such as grow luxuriantly on many of the sandy shores of Italy. In the 13th century we find it mentioned under the name of *Pineta di Castel Volturno*; by which it is still known, though the pines seem to have disappeared. The forest extends from the mouth of the Vulturnus to the *Torre di Patria* (the site of the ancient Liternum), and some distance beyond that towards Cumae. The Via Domitiana, constructed by that emperor as the direct road to Cumae, ran through the midst of the forest, and many portions of it are still visible. (Pratilli, *Via Appia*, ii. 7. p. 183.) [E. H. B.]

GALLITAE, an Alpine people (Plin. iii. 20), supposed to have been about the junction of the *Estecon* and the *Var*, because there is a place there named *Gillette*. [G. L.]

GALLUS (Γάλλος: *Lefke*), a small river of Bithynia, having its sources near Modra in the north of Phrygia, and emptying itself into the Sangarius a little more than 300 stadia from Nicomedeia. (Strab. xii. p. 543.) Ammianus Marcellinus describes its course as very winding (xxvi. 8). Martianus Capella (6. § 687, ed. Kopp) confounds this river with another of the same name in Galatia, which seems likewise to have been a tributary of the Sangarius, and on the banks of which Pessinus is said to have been situated. From the river Gallus in Galatia the Galli, or priests of Cybele, were said by some to have derived their name, because its water made those who drank of it mad. (Steph. B. *s. v.*; Plin. v. 42, vi. 1, xxxi. 5; Herodian, i. 11; Ov. *Fast.* iv. 364.) [L.S.]

GAMALA (τὰ Γάμαλα), a town of Palestine, frequently mentioned by Josephus, and from which the district Gamalitis (*B. J.* iii. 3. § 5) derived its name. This district was apparently identical with that otherwise called Lower Gaulanitis by the same historian, in which Gamala was situated (iv. 1. § 1). It is first mentioned as a fortress of great strength, in the life of Alexander Jannaeus, who reduced it (*B. J.* i. 4. § 8). It is placed by Josephus opposite to Tarichaea, and on the lake. Its site and character are minutely described: "A rugged ridge, stretching itself from a high mountain, rises in a lump midway, and elongates itself from the rise, declining as much before as behind, so as to resemble a camel in form, whence it derives its name. Both in flank and in front it is cleft into inaccessible ravines; but at the back it is somewhat easier of ascent, being there joined to the mountains, from which, however, the inhabitants severed it by a trench, and rendered the approach more difficult. Against the precipitous face of the mountain numerous houses had been built, closely crowded one on another; and the city, apparently suspended in the air, seemed to be falling upon itself, by reason of its perpendicular site. It inclines towards the mid-day sun; and the hill, stretching upward with a southern aspect to a prodigious height, served as a citadel to the town: while an impregnable cliff above it extended downward into a ravine of vast depth. Within the ramparts was a fountain, at which the city terminated." (*B. J.* iv. 1. § 1). At the first outbreak of the Jewish rebellion it was for a time maintained in its fidelity to the Romans, through the influence of Philip, the lieutenant (ὕπαρχος) of King Agrippa (*Vita*, § 11); but subsequently it revolted, and was garrisoned and fortified by Josephus (§ 37) with mines and trenches, so as to make it the strongest fortress in that part of the country (*B. J.* iv. 1. § 2). Accordingly, when its recovery was attempted by the younger Agrippa, his troops were occupied for seven months in an ineffectual attempt to take it by siege. It was taken, however, by Vespasian, after a spirited resistance of the garrison, when the loss sustained by the legionaries was revenged by the indiscriminate slaughter of the survivors, of whom 4000 perished by the sword, and 5000 threw themselves from the walls, and were dashed to pieces in the ravines below.

The site of this strong fortress, though so remarkable, and so minutely described by Josephus, had been forgotten for nearly eighteen centuries, when Lord Lindsay attempted to recover it in a steep insulated hill to the east of the sea of Tiberias, and nearly opposite to that town. It is now called *El Hosen*, and lies, according to Burckhardt, between the village of *Feik* and the shore, three quarters of an hour from the former; "having extensive ruins of buildings, walls, and columns on its top." (Burckhardt, *Syria*, p. 278, with a wood-cut of the site.) According to Lord Lindsay, the hill, "at a distance, so strongly resembles the hump of a camel, that I think there can be little doubt of its being the ancient Gamala. It has been a place of tremendous strength, and no slight importance. Valleys, deep and almost perpendicular, surround it on the north, east, and south. On the south side, the rock is scarped angularly for defence; on the eastern, it is built up so as to bar all approach from below; to the south-east a neck of

Digitized by Google

land, of much lower elevation, and scarped on both sides, connects it with the neighbouring mountains, and communicates by a steep descent with the southern valley; travellers from the east and west appear to have met at this neck of land, and thence ascended to the city. If, as I conclude, the houses were built on the steep face of the mountain, Josephus might well describe them as hanging as if they would fall one on the other. All traces of them have been swept away, and the mountain is now covered with thick grass. The top is sprinkled with trees; we found many ruins on it, apparently of the citadel, but not very interesting." (*Travels*, vol. ii. pp. 92, 93.) [G. W.]

GAMBRIVII. [CHAMAVI.]

GAMPHASANTES. [GARAMANTES.]

GANDARAE (Γανδάραι, Ptol. vii. 1. § 4; Steph. B. *s. v.*), a widely extended people of Indian or Arianian origin, who occupied a district extending more or less from the upper part of the *Panjáb* to the neighbourhood of *Kandahar*, and variously called in ancient authors Gandaris (Strab. xv. p. 699) or Gandaritis (Strab. xv. p. 697). The name is of Sanscrit origin, and is found in the *Mahábhárat* under the form Gandhára, in which work these people are classed with the Bahlíkas and other tribes beyond the Indus; the country they inhabited being described as difficult of access, and famous then, as it still is, for its breed of horses. Owing to the distinction which seems to be drawn, in the passages cited above from Strabo, between Gandaris and Gandaritis, some authors, as Groskurd and Mannert, have been led to assign different places for these districts; determining the latter to be the same as Peucelaotis, between *Attok* and the Indus. It is much more probable that one and the same country was intended, the boundaries of which varied according to the reports of the travellers from whom Strabo and others compiled their geographical notices of these remote regions. From Strabo (*l. c.*) it may be inferred that he considered the country of the Gandarae to be to the W. of the Indus; from Ptolemy, that it was somewhat more to the E., in the direction of Caspatyrus (*Kashmir?*). The latter view agrees with a notice of Hecataeus preserved by Stephanus B. (*s. v. Caspapyrus*), who calls that city πολίς Γανδαρικὴ Σκυθῶν ἀκτή. Herodotus, like Ptolemy, calls it Caspatyrus (iii. 102, iv. 44). In Herodotus these people are called Gandarii, and are included by him in the seventh satrapy of Dareius, along with the Aparytae, Dadicae, and Sattagydae (iii. 91): they are also found with the same name in the armament of Xerxes, in company with the Dadicae, under the same commander, and wearing the same arms, as the Bactrians.

Rennell (*Geogr. of Herod.* vol. i. p. 390) has been induced to place them to the W. of Bactriana; but more minute examination leads to the belief that in this he is in error, and that east and south of Bactriana is really the more correct determination. (Wilson, *Ariana Antiqua*, p. 131; *Asiatic Res.* vol. xv. p. 103; Lassen, *Pentapot. Indica*, p. 105; M. Troyer, *Raja-Tarangini*, tom. ii. p. 319.)

Stephanus speaks of another Indian people whom he calls Gandri, who fought, according to him, against Bacchus; adding, however, that Hecataeus called them Gandarae. There can be no doubt that the real and the mythical people are meant to be one and the same. Professor Wilson draws the general conclusion that Heeren and Rennell have both erred in placing most of these tribes to the N. of *Khorassan*, and that they may be located with more accuracy in the vicinity of the Paropamisan mountains, being the predecessors, if not the ancestors, of the modern *Hazáras*. [V.]

GANDARIS. [GANDARAE.]

GANDARITIS. [GANDARAE.]

GANGANI, in Ireland, mentioned by Ptolemy as lying south of the Auteri. [AUTERI.] Probably = *Clare*. [R. G. L.]

GANGARIDAE (Γαγγαρίδαι, Ptol. vii. 1. § 81. 2. § 14), a people who lived along the coast of the bay of Bengal, at the mouths of the Ganges, from which they probably derived their name. According to Ptolemy their capital was named Gange (vii. 1. § 81); in another place, however, he omits the name of the chief town, but adds that there are six towns, whose names he gives, in the country. It would appear from Pliny that a portion at least of these people extended considerably to the south, in the country now occupied by the Circars of the *Coromandel* coast, — as he speaks of "gente Gangaridum Calingarum" (vi. 18. s. 22). The Calingae were probably near *Calinapatnam*, between the *Godavery* and *Mahanuddy*. Virgil (*Georg.* iii. 27) and Valerius Flaccus (*Argon.* vi. 66) mention the name of the Gangaridae. Curtius places them beyond the Ganges to the eastward, along with the Prasii (ix. 7). Their name seems to have been sometimes confused with that of the Gandaridae. Thus when Dionysius Periegetes writes Gargaridae (v. 1144), he probably means Gandaridae and not as some commentators have supposed, this people. [V.]

GANGAS, GANGITES (Γάγγας, Γαγγίτης, Appian, *B. C.* iv. 106), a river of Macedonia, which takes its rise at and flows round Philippi; after its confluence with the ZYGACTES the united streams bore the name of the ANGITES (*Á'ngkista*), which was so called from the branch at Philippi. (Leake, *Northern Greece*, vol. iii. p. 225.) It was by this "river side" (*Acts*, xvi. 13), the fountains of which gave the name to the city, before the time of Philip of Macedon—Crenides,— the Place of Fountains,— that the "Proseucha" was situated (in consequence of the ablutions which were connected with the worship) in which the Gospel was first preached within the limits of Europe. (Comp. Conybeare and Howson, *Life and Epistles of St. Paul*, vol. i. p. 316.) [E. B. J.]

GANGE (Γάγγη, Ptol. vii. 1. § 81; Γάγγη, *Peripl. Mar. Erythr.* p. 36), according to Ptolemy, the capital town of the Gangaridae, at the mouth of the Ganges. The author of the Periplus of the Erythraean sea speaks of this place as the chief mart for the finest cotton stuffs, for frankincense, and Chinese *malabathron*. It must have been in the neighbourhood of the modern *Calcutta*, though its exact position cannot be identified. Strabo speaks of a town which he calls Gange, but places it far up the river, in the vicinity of Palibothra or Patna (xv. p. 719). [V.]

GANGES. 1. (ὁ Γάγγης, Strab. xv. pp. 686, 719 &c.; Ptol. vii. 1. § 29, &c.; in Lat. Ganges, -is: Adj. Gangeticus, Gangetis), one of the largest rivers of Asia, and the most important one of Eastern India or *Hindostán*. It was unknown to Herodotus. Ctesias, and the earlier writers of ancient times, and it was not described by ancient authors till the Greeks under Alexander the Great and his successors penetrated into Western India. It is, indeed, only in very modern times that the exact position of its sources has been determined; the earlier of European

Digitized by Google

geographers having conjectured that, like the Indus, it arose on the northern side of the chain of the Himálaya mountains, in the direction of Thibet. It is now ascertained that the true river is made up of three separate streams, which bear the respective names of the *Gáumasi*, *Bhágirathí*, and *Alakánanda*. The second is held to be the most hallowed, and is the one to which the largest concourse of pilgrims resorts. The spot where it bursts forth from the glaciers is called *Gungótri* (*Gangavitari*), and is situated in lat. 30° 59′ 30″ N., long. 96° 44′ W., at an altitude of nearly 10,000 feet above the sea. Above it is the summit of *Panksparvata*, which rises to the height of about 21,000 feet. (Schlegel, *Ind. Bibl.* vol. i. p. 387; Ritter, vol. ii. pp. 947—952; Lassen, *Ind. Alt.* vol. i. p. 49.) From its sources it flows nearly S. till it reaches *Hástinapura*; thence, with an easterly inclination, as far as *Allahabád*, where it receives the *Jumna*; and thence nearly SE. till it reaches the bay of Bengal, into which it falls, after a course of about 1150 miles, by numerous mouths. On its way it receives a great number of affluents, of which we shall speak hereafter,—one of which, the *Jumna*, considerably surpasses itself in length.

The ancients held different opinions as to the sources of this celebrated river. Strabo, on the authority of Eratosthenes, made it rise in the Indian Caucasus (the Paropamisus, or *Hindu-Kush*), and, after flowing for some distance, take an eastern direction on reaching the plains, and, after passing the great city of Palibothra, enter the Indian ocean (or bay of Bengal) by a single mouth (xv. p. 690). In another place (xv. p. 719) he quotes Artemidorus, who stated that the Ganges had its source in the Montes Emodi (Imaus or *Himálaya Ms.*), and that it flowed southwards till it reached the city Gange, when it turned off to the E. and passed Palibothra. The same view is implied in Dionysius Periegetes (v. 1146) and in Mela (iii. 7). Pliny seems to have been unable to make up his mind, but states generally that some gave to the Ganges an uncertain source, like that of the Nile, while others placed it in the Scythian mountains (vi. 18. s. 22; see also Solin. c. 52; Mart. c. 6). Orosius placed its source in an unknown mountain, which he calls Osrobares. There is a more general consent as to its magnitude; most authors agreeing that it is a great stream even from its first commencement. Thus Arrian asserts, on the authority of Megasthenes, that where it is smallest it is at least 100 stadia broad, that it is far greater than the Indus, and that it receives no rivers which are not themselves as large and as navigable as the Macander. (*Indic.* c. 4.) In another place he states that if all the Asiatic rivers which flow into the Mediterranean were joined together, they would not make one Ganges in body of water; while it is equally superior to the European Ister, and the Egyptian Nile. (*Anab.* v. 6.) Strabo considered it the greatest river in the three continents of which he had any knowledge; that the Indus, the Ister, and the Nile, ranked next in order after it (xv. p. 702); and that its average breadth, in the opinion of Megasthenes, was about 100 stadia, and its depth 20 fathoms. The historians of Alexander's invasion agree generally in its size, making it 32 stadia broad, by 100 fathoms deep. (Diod. xvii. 93; Plut. *Alex.* c. 62.) Later writers, like Pliny and Aelian, give to the river a fabulous size; the former asserting that at the narrowest place it was 8 miles broad, and nowhere less than twenty paces deep (vi. 18. s. 22); the latter, that from its first origin it was 80 stadia broad and 20 fathoms deep,—and that, after it had received several tributaries, it acquired a breadth of 400 stadia, and contained many islands as large as Lesbos and Corsica, with a depth of 60 fathoms (*Hist. Anim.* xii. 41). Aelian is most likely here confounding the natural stream with its breadth during great floods. The ancients had similar differences of opinion with regard to the number of mouths by which it entered the ocean. Strabo asserted that it had but one (xv. p. 690), in which view Pliny agrees (ii. 108); Ptolemy (vii. 1. § 18) and Marcian (ap. Huds. *Geogr. Gr. Min.*), five; Mela (iii. 7), Virgil (*Aen.* ix. v. 30), Propertius (iii. 22. 16), and other authors, seven. The fact is, like all rivers flowing with a vast body of water through an alluvial plain, and bringing down an immense annual deposit, its mouths were perpetually changing; and old ones were filled up, while new ones were continually made. The names of some of the ancient mouths have been preserved, and can even now be identified. Their names are given by Ptolemy, in order from W. to E., and are: (1) Κάμβυσσον στόμα, now the river *Hoogly*, on which Calcutta stands; (2) τὸ μέγα στόμα, now the river *Roymongul*; (3) Καμβήριχον στόμα, now the *Marjatta*; (4) τὸ Ψευδόστομον στόμα, now the *Hwringotta*; (5) Ἀντιβολὴ στόμα, the one nearest the *Brahmaputra*, and for which there does not seem to be any well-ascertained name.

The Ganges, on its course to the sea, is fed by several large rivers, some of which were known to the ancients, and have been satisfactorily identified with their original Sanscrit names. The fullest account of them is in Arrian (*Ind.* 4), and from him or from the journals which he copied most of the other writers who allude to them have probably themselves copied. The following are the seventeen which this author mentions, to which we have added (in parentheses) those Sanscrit names that are probably well ascertained:—the Jobares, no doubt the same as the Jomanes (*Jamuná* or *Jumna*); Cainas, Erannoboas (*Hiranjavahu*), Cossoanus (*Cúsavdhá*), Sonus (*Çoná*), Sittocatis (*Çtutá*), Solomatis (*Saravati*), Condochates (*Gandaki*), Sambus, Magon, Agurania, Omalis (*Vimalá*), Commenases (*Carmanaça*), Cacultris, Andomatis (*Andhámati* or *Tamasá*), Amystis, Oxumagis (*Ixumati*), Erennesis (*Varanasí*). Pliny speaks of the Jomanes, Prinas, and Cainas, which he calls tributaries of the Ganges (vi 17. s. 21); and adds that there were in all nineteen such affluents, of which he notices (apparently for their superiority) the Condochates, Erannoboas, Cosoagus or Cossoanus, and Sonus (vi. 18. s. 22). Curtius speaks of three tributaries of the Ganges, the Acesines, Dyardenes, and Erymanthus (viii. 9); but he has clearly here made some confusion with the accounts of the Indus, or there is a defect in our MSS. of his work. The Acesines (now *Chendb*) is one of the principal rivers of the *Panjáb*; the Dyardenes is not improbably the same as the Oedanes (Οἰδάνης) of Strabo (xv. p. 719), and most likely to be identified with the *Brahmaputra*; while the Erymanthus belongs to neither Indus nor Ganges, but may be the same as Etymandrus (now *Helmend*), the principal river of Arachosia and Drangiana. The Ganges was evidently considered by the ancients as a very wonderful river. Pliny speaks of snakes thirty feet long which live in its waters (ix. 3. s. 2), which, like Pactolus, brought down gold also (xxiii.

Digitized by Google

4. s. 21); and other authors ascribe to some of its tributaries crocodiles and dolphins (Οἰδάνης, Strab. xv. p. 719; Dyardenes, Curt. viii. 9). The Sanscrit name *Ganga* may be, as Pott has suggested, an intensitive form from the root *ga*, to go. Plutarch gives another and fabulous origin of its name (*de Flumin.* ap. Hudson, *Geogr. Gr. Min.* ii. p. 8). (Rennell, *Hindostan;* Lassen, *Ind. Alterth.* vol. i. p. 130; Kiepert u. Lassen, *Karte v. Alt. Indien*, 1853; Pott, *Etym. Forsch.* p. 86.)

2. (ὁ Γάγγης, Ptol. vii. 4. § 6), the most important river in the ancient island of Taprobane (*Ceylon*), still known by the name of the *Mahavelle-Ganga*. It rises in the mountains to the S. and W. of *Kandy*, and after flowing round the town pursues a NE. course, till it enters the sea by two mouths, one near *Trincomalee* (close to the Ὀξεῖα ἄκρα of Ptolemy), and the other about 25 miles to the S. It appears from modern surveys that the Trincomalee branch is now nearly dry, except in the rainy season, and that the main body of water passes to the sea by the southern branch, which is now called *Virgel*. (Brooke on *Mahavelle-Ganga*, *Journ. R. Geog. S.* vol. iii. p. 223.) Much of the country through which this river flows is now uninhabited, but there are extensive remains, tanks, and ruins, indicating that it was once thickly peopled. Forbiger has conjectured with some reason that the *Mahavelle-Ganga* is the same river which Pliny calls Palaesimundus (vi. 22. s. 24), and which he says flowed to the N. by a city of the same name, and entered the sea by three mouths; of which the narrowest was five, and largest fifteen, stadia wide. It is curious that the larger stream, which he calls *Cydara*, is the northern or Trincomalee branch; and from modern researches, it is proved that this was originally the principal stream, the water having been diverted into the *Virgel* by the priests of a temple situated at the point where the two streams naturally bifurcate. (Davy, *Account of Ceylon*, Lond. 4to. 1821; Ritter, *Erdk.* vol. vi. 24.) [V.]

GANGETICUS SINUS (Κόλπος Γαγγητικός, Ptol. i. 13. § 4, vii. 1. § 16), the great gulf into which the Ganges flowed, now generally called the bay or gulf of Bengal. According to Ptolemy it was usual with the mariners of his day to call it 13,000 stadia across; whence, in order to allow for the irregularity of the course pursued, Ptolemy takes off one-third, and reduces the breadth to 8670 stadia. This is, however, more than twice the breadth of the real bay of Bengal. The fact is, Ptolemy, in common with all his predecessors, Hipparchus, Polybius, Marinus of Tyre, greatly extended the degrees of longitude of this part of the world; hence his Caspian Sea, Persian Gulf, and bay of Bengal are all much greater in breadth E. and W. than in length N. and S., which is just contrary to the fact. [V.]

GANGRA (Γάγγρα: *Kiengareh*, *Kangreh*, or *Changeri*), a town of Paphlagonia, to the south of Mount Olgasys, and at a distance of 35 miles from Pompeiopolis, appears to have been a princely residence, for we know that Morzus or Morzeus, and afterwards Deiotarus, the last king of Paphlagonia, resided there. (Strab. xii. p. 564; comp. Liv. xxxviii. 26.) Strabo, notwithstanding this, describes it as only "a small town and a garrison." According to Alexander Polyhistor (*ap. Steph. B. s. v.* Γάγγρα), the town was built by a goatherd who had found one of his goats straying there; but this is probably a mere philological speculation, *gangra* signifying "a goat" in the Paphlagonian language. In the ecclesiastical writers Gangra is often mentioned as the metropolitan see of Paphlagonia. (Socrat. ii. 43, Sozom. iii. 14, and elsewhere.) The orchards of this town were celebrated for the excellence of their apples. (Athen. iii. p. 82.) [L. S.]

GANNARIA PR. [Libya.]

GANODU'RUM (Γανόδουρον), one of the two Helvetian cities mentioned by Ptolemy (ii. 9. s. 20). The termination *dur* seems to show that it was on some river, but there is no evidence of any kind, except Ptolemy's figures, to fix its position; and that evidence is worth nothing. Some reasons have been given for supposing it to be near the entrance of the Rhine, on to the *lake of Constanz*, not far from *Stein*. (Walckenaer, *Géographe des Gaules*, vol. i. p. 317.) [G. L.]

GANUS (Γάνος or Γᾶνος), apparently a mountain fortress in Thrace, on the coast of the Propontis (Xenoph. *Anab.* vii. 5. § 8; Harpocrat. and Suid. *s. v.*; Plin. iv. 18; Scylax, p. 28.) Aeschines (*de Ctesiph.* p. 65) speaks of Ganus along with other places as scarcely known to the Athenians, and mentions *Ganis* along with Ganus, from which we may infer that the former was the name of the district in which the latter was situated. [L. S.]

GARAMA. [Garamantes.]

GARAMAEI (Γαραμαῖοι, Ptol. i. 12. § 5, vi. 2. § 2), a tribe of ancient Assyria, who lived along the banks of the Lycus (*Zab*), between Arrapachitis and Apolloniatis. [V.]

GARAMANTES (Γαράμαντες), a great nation of Inner Africa. In the widest sense the name is applied to all the Libyan tribes inhabiting the oases in the E. part of the Great Desert, as the Gaetulians inhabited its W. part; the boundary between the two nations being drawn at the sources of the Bagradas and the mountain Usargala. In this wide sense they were considered as extending S. and E. to the land Nuba and both banks of the river Gir, as far as the mountains called Garamantica Pharanx (ἡ Γαραμαντικὴ Φαράγξ), which Ptolemy places in 40° long. and 10° N. lat., E. of M. Thala, and N. of M. Arangas. (Ptol. iv. 6. §§ 12, 13, 16.)

In the stricter sense, however, the name denoted the people of Phazania (*Fezzan*), a region lying S. of the Great Syrtis, between 24° and 31° N. lat. and 12° and 18° E. long., and forming by far the largest oasis in the Great Desert (*Sahara*), which it may be considered as dividing into an eastern and a western part. It is surrounded by hills of stone and sand, not exceeding 1200 feet high, which protect it from the sands of the desert: the chief of these are the two parallel ranges on the NE. called the *Black and White Harruj* (i. e. *Mountains*), the former being of basalt, and the latter of limestone (the former is the Mons Ater of the ancients); and that on the W. called *Waring*, perhaps the ancient Usargala. It is, however, only a small part, not above one-tenth, of the surface that is cultivable; the region being intersected by ridges of hills from 300 to 600 feet high: and even in the valleys between these ridges the soil is a stratum of sand, on chalk or clay, needing constant irrigation to supply which there are no water-courses, and very few natural springs; so that the water has to be obtained from wells, at the depth of about 100 feet. The soil is impregnated with saline matter, serving as a manure for the date-palms, which are the chief vegetable products of the country: a little grain is also grown at the present day.

Digitized by Google

The country of the Garamantes was known to Herodotus, who mentions the people twice: first, as dwelling S. of the Nasamones, and E. of the Macae, in the "Country of Wild Beasts," that is, the second of the three belts into which he divides N. Libya (iv. 174). In the second passage (iv. 183) he says that the Garamantes are a very great nation, inhabiting one of those oases formed by salt-hills, which he places at intervals of 10 days' journeys along the interior of N. Africa. (Comp. ATARANTES: ATLANTES; AUGILA.) This one lies between Augila and the Atarantes; but here arises a difficulty, inasmuch as the regular allowance for the caravans from *Aujelah* to *Zuila* on the E. border of *Fezzan* is 20 days, and it took Hornemann 16 days' very rapid travelling to accomplish the distance. The best solution of the difficulty appears to be the supposition that one station has been omitted by Herodotus (or by the copyists), namely, the small oasis of *Zala*, which is just half-way between *Aujelah* and *Zuila*. Herodotus makes the distance from the Lotophagi (i. e. the coast between the Syrtes) thirty days, which corresponds exactly to the time occupied by the caravans in the journey from *Tripoli* to *Fezzan*, which appears to have been the established route in all ages. He describes the country as having many fruit-bearing palms, and as being cultivated for corn by manuring it with salt, by which some suppose him to mean the white clay which is still used for manuring the sandy soil. His story of the oxen with singularly thick hides, and with horns bending so far forward that the beasts were obliged to walk backwards as they fed (comp. Mela, i. 8; Plin. viii. 45. s. 70), is not so absurd as it may seem; for, although modern travellers have not confirmed this part, as they have the rest, of the old inquirer's story, we have evidence from the Nubian monuments (Gau, pl. xv.) that the ancient neatherds of Africa, like their successors to this day, exercised their ingenuity in giving artificial forms to the horns of their cattle. (Heeren, *Africans Nations*, vol. i. p. 222: for other stories about cattle walking backwards as they fed, see Alexander Myndensis, *ap. Ath.* v. p. 221, e.; Aelian. *N. A.* xvi. 33; Aristot. *de Part. Animal.* ii. 17.) In another, and a very sad part of his account, Herodotus is but too well supported by modern testimony. He tells us of a degraded negro tribe, who dwelt in caves (τοὺς Τρωγλοδύτας Αἰθίοπας) among or near the Garamantes, who hunted them with chariots, for these negroes were the swiftest runners known. The wretches thus, like their race in all ages, hunted after for slaves, lived on reptiles, and used a speech which resembled no other language, but was like the shrieking of bats. (Comp. Mela, i. 8; Plin. v. 5, 8.) The *Rock Tibboos*, so called from their dwelling in caves (Troglodytae), in the *Tibesti* range of mountains, are still hunted by the chieftains of *Fezzan;* though, by a kind of retribution, these *Tibboos* are the successors of the ancient Libyans, who have fled from more powerful conquerors into the former haunts of their negro *game*. (Lyon, *Narrative, &c.* pp. 250, foll.) To complete the resemblance, the people of *Aujelah* compare the language of these degraded tribes to the whistling of birds. (Hornemann, p. 143.)

The account of Herodotus contains an apparent inconsistency; for the Garamantes are described in the former passage (c. 174) in terms which would far better apply to these Aethiopian Troglodytes, as avoiding men and all society, possessing no weapons of war, and unable to defend themselves. This description corresponds exactly to what Mela (i. 8) and Pliny (v. 8) say of a people whom they call Gamphasantes; and hence some critics have proposed to alter the reading in Herodotus: but, besides the fact that there is not a shadow of variation in the MSS., the position assigned by Herodotus to this people is precisely that occupied by the Garamantes; and the same statements are repeated by later geographers, expressly on the authority of Herodotus. (Steph. B. *s. v.;* Eustath. *ad Dion. Per.* 217.) The discrepancy is, probably, one of those so often found in a writer who picks up news eagerly from all quarters; for it is evident that the one account was obtained through the Nasamones and Cyrenaeans, and the other through the merchants who traded between *Fezzan* and Egypt; and we may fairly suppose that the one class of informants repeated only what they had heard of some of the degraded tribes who lurked, as has been seen, in corners of the country. If any change be necessary, we suspect it to be, of the two, rather in the Roman compilers; for their story seems copied from Herodotus.

From the time of Herodotus to that of the Caesars, we have no further information worth mention. When the Romans had become the masters of N. Africa, they found it necessary to repress the barbarian tribes; and this office was committed, in the case of the Garamantes, to Cornelius Balbus Gaditanus the younger, who, as proconsul, defeated them in a sense sufficient to warrant his investment with triumphal insignia, B. C. 19, though, of course, conquest was out of the question. (Flor. iv. 12; Tac. *Ann.* iii. 74, iv. 26, *Hist.* iv. 50.) The results obtained from this expedition in the form of additional knowledge are recorded by Strabo (xvii. pp. 835, 838), Mela (i. 4. § 4, 8. § 7), and Pliny (v. 5, 8). Strabo places them 15 days' journey from the oases of Ammon (*Siwah*), and 10 days' journey from the Aethiopians on the Ocean; a striking proof of the scantiness of his information respecting Inner Libya: he describes their position relative to the N. coast with tolerable accuracy. Mela copies Herodotus, mixing up with his story a statement which Herodotus makes concerning the Ausenses. Pliny (v. 5) gives a good description of the position of the Garamantes, with an account of the expedition of Balbus, and a list of the cities whose images and names graced his triumph: he also speaks of the difficulty of keeping open the road, because of the predatory bands belonging to the tribe, who filled up the wells with sand. He mentions Phazania as if it were distinct from the country of the Garamantes. Ptolemy also (iv. 6. § 30) gives a list of their cities, none of which need particular mention, except the metropolis Garama (Γαράμη: *Germa*, with considerable ruins). This city has 13¼ hours in its longest day, is distant 1¼ hour W. of Alexandria, and has the sun vertical twice a year, 15° on each side of the summer solstice. (Ptol. viii. 16. § 7.)

The Garamantes were a Libyan (not Negro) people, of the old race called Amazergh [GAETULIA], a name perhaps preserved in that of the modern capital *Moursouk*. The inland trade between Egypt, Cyrenaica, the Tripolis, and Carthage, on the one hand, and the interior of Africa on the other, was to a great extent carried on by them. (The *Travels* of Hornemann, Captain Lyon, Denham and Clapperton, Richardson, Barth, Overweg, &c.; Rennell, *Geog. of Herod.* vol. ii. pp. 273, foll.; Heeren. *Africans Nations*, vol. i. pp. 221, foll.) GA'RAPHI MONTES (τὰ Γάραφα ὄρη), a mountain chain of Mauretania Caesariensis, forming a part of the range which separates the valleys of the Chinalaph and Savus. (Ptol. iv. 2. § 14.) [P. S.]

GARBATA MONS (Γάρβατα ἢ τὸ Γάρβατον ὄρος, Ptol. iv. 7. §§ 26, 31), was the southern portion of the ridge of mountains which separated Aethiopia from the Red Sea, and of which the most southerly and loftiest projection was Mount Elephas (*Cape Felix* or *Djebel Feel*). The entire range commenced at the eastern frontier of Egypt and Aethiopia, and extended from the 15th to the 11th degree of lat. N., running for the most part in a SE. direction. Aethiopia, or the modern *Abyssinia*, is a region of highlands which, as they advance southward, increase in altitude. Mons Garbata commenced to the S. of Axume, and was the loftiest portion of the range. It contained mines of gold and quarries of porphyry. [W. B. D.]

GA'REA, GAREA'TES. [TEGEA.]

GARESCUS (Γαρήσκος al. Γαρίσκος, Ptol. iii. 13. § 25; Geresci, Plin. iv. 10), a place in Macedonia, probably somewhere in the head of the valley of the river Zygactes — *Nerrócopo*. [E. B. J.]

GARGA'NUS (τὸ Γάργανον, Strab.), a mountain and promontory on the E. coast of Italy, still called *Monte Gargano*, which constitutes one of the most remarkable features in the physical geography of the Italian peninsula, being the only projecting headland of any importance that breaks the monotonous line of coast along the Adriatic from *Otranto* to *Ancona*. It is formed by a compact mass of limestone mountains, attaining in their highest point an elevation of 5120 feet above the sea, and extending not less than 35 miles from W. to E. Though consisting of the same limestone with the Apennines, and therefore geologically connected with them, this mountain group is in fact wholly isolated and detached, being separated from the nearest slopes of the Apennines by a broad strip of level country, a portion of the great plain of Apulia, which extends without interruption from the banks of the Aufidus to those of the Frento. (Swinburne's *Travels*, vol. i. pp. 151, 152; Zannoni, *Carta del Regno di Napoli*.) Its configuration is noticed by many ancient writers. Strabo speaks of it as a promontory projecting out to sea from Sipontum towards the E. for the space of 300 stadia; a distance which is nearly correct, if measured along the coast to the extreme point near *Viesti*. (Strab. vi. p 284.) Lucan also well describes it as standing forth into the waves of the Adriatic, and exposed to the N. wind from Dalmatia, and the S. wind from Calabria. (Lucan, v. 379.) In ancient times it was covered with dense forests of oak ("Querceta Gargani," Hor. *Carm.* ii. 9. 7; "Garganum nemus," Id. *Ep.* ii. 1. 202; Sil. Ital. iv. 563), which have of late years almost entirely disappeared, though, according to Swinburne, some portions of them were still visible in his time (*Travels*, vol. i. p. 155; Giustiniani, *Diz. Geogr. del Regno di Napoli*, pt. ii. vol. iii. pp. 92—98). Strabo mentions in this neighbourhood (but without directly connecting it with the Garganus) a hill called Drium, about 100 stadia distant from the sea, on which were two shrines of heroes (ἡρῶα), the one of Calchas, with an oracle which was consulted in the same manner as that of Faunus in Latium; the other of Podalirius, from beneath which flowed a small stream gifted with extraordinary healing powers. The same circumstances are alluded to by Lycophron, from whom it would appear that the stream was named Althaena. (Strab. vi. p. 284; Lycophr. *Alex.* 1047—1055.) The exact locality has been a subject of dispute; but as we find a similar mention of a stream of limpid water which healed all diseases, in the legend of the appearance of St. Michael that gave rise to the foundation of the modern town of *Monte S. Angelo*, — on a lofty hill forming one of the offshoots of the Garganus, about 6 miles from *Manfredonia*, — it seems very probable that this was no other than the Drium of Strabo, and that the sanctuary of the archangel has succeeded, as is so often the case, to another object of local worship. The whole range of Mt. Garganus is now frequently called *Monte S. Angelo*, from the celebrity of this spot; and the name of Drium seems to have been sometimes used with the same extension among the Greeks, as there is very little doubt that for Ἀρίον in Scylax we should read Δρίον, the promontory of which he is there speaking being evidently the same as the Garganus. (Scyl. § 14; Gronov. *ad loc.*)

On the southern slope of Mt. Garganus, about 4 miles E. of *Monte St. Angelo*, a straggling village still called *Mattinata*, with a tower and small port, has preserved the name of the MATINUS of Horace, which is correctly described by an old commentator as "mons et promontorium in Apulia." The name appears to have properly belonged to this southern offshoot of the Garganus; but in one passage Horace would seem to apply the name of "Matina cacumina" to the loftiest summits of the range. All these hills are covered with aromatic herbs, and produce excellent honey, whence the well-known allusion of the same poet to the "apis Matina." (Hor. *Carm.* i. 28. 3, iv. 2. 27, *Epod.* 16. 28.) Lucan also speaks of the "calidi buxeta Matini" as adjoining and overlooking the plains of Apulia (ix. 182). There is no evidence of the existence of a town of this name, as supposed by one of the old scholiasts of Horace; and certainly no authority for the change suggested by some modern writers, that we should read in Pliny *Matinates* for "Merinates ex Gargano." Holstenius and others have clearly shown that an ancient town called MERINUM stood near the NE. point of the promontory, about 5 miles from the modern Vieste. It continued to be a bishop's see until late in the middle ages, and the site is still marked by an ancient church called *Sta. Maria di Merino*. (Holsten. *Not. in Cluver.* p. 278; Romanelli, vol. ii. p. 214.)

The flanking ridges which extend down to the sea on both sides of the Garganus afford several coves or small harbours well adapted for sheltering small vessels. Of these the one now called *Porto Greco*, about 8 miles S. of *Viesti*, is generally supposed to be the AGASUS PORTUS of Pliny, which he appears to place S. of the promontory. The PORTUS GARNAE of the same author was situated between the promontory and the Lacus Pantanus (*Lago di Lesina*); it cannot be identified with certainty; but it seems probable that it was situated at the entrance of the lake now called *Lago di Varano*. [E. H. B.]

GARGA'PHIA FONS. [PLATAEA.]

GARGARA (Γάργαρα or Γάργαρον), one of the heights of Mount Ida in Troas (Hom. *Il.* viii. 48, xiv. 292), which continued to bear this name even in the time of Strabo (xiii. p. 583; comp. Plin. v. 32; Macrob. *Sat.* v. 20; Steph. B. s. v.). Its modern name is said to be *Kazdag*. (Walpole's *Memoirs relating to Turkey*, p. 120.) A town of the same name existed from early times upon that height, or rather on a branch of it forming a cape on the north of the bay of Adramyttium, between Antandrus and

Digitized by Google

Assus. In the earliest times it is said to have been inhabited by Leleges, but afterwards to have received Aeolian colonists from Assus, and others from Miletopolis. (Strab. *l. c.* pp. 606, 610; Mela, i. 18; Ptol. v. 2. § 5.) The name of this town is in some authors misspelt Ἰάργανον, as in Ptolemy, and Σάγαρα, as in Hierocles. The territory round Gargara was celebrated for its fertility. (Virg. *Georg.* i. 103; Senec. *Phoen.* iv. 608.) The modern village of *Iné* probably occupies the site of ancient Gargara. [L. S.]

GARGA'RIUS LOCUS, a place in Gallia Narbonensis, known only from an inscription of the time of Hadrian. D'Anville (*Notice*, &c.) received an exact copy of it from Barthélemy. This inscription records the "Pagani pagi Lucreti qui sunt finibus Arelatensium loco Gargario." The place, which is still called *Garguies*, is at the foot of a mountain called *St. Pilon;* "and the plain which extends from the foot of this mountain as far as *Aubagne*, in the direction of *Marseille*, is called *Lacrau*, and this may be the Pagus Lucretus of the inscription" (D'Anville). [G. L.]

GARGETTUS. [ATTICA, p. 327.]

GARI (Γάρι, Isid. Char. *ap. Huds.* vol. ii. p. 9), a small place in Ariana, most likely represented now by *Ghore*, to the east of Ferrah. Perhaps it is the same as *Ghirane*, which lies to the NE. from Ferrah. Mannert (v. 2. s. 61) has supposed that it is the same as *Greishk* to the NE. of *Bost*, on the Hirmend, which, however, is more likely to be the Chatmache or Chatrische of Ptolemy (vi. 17. s. 5). [V.]

GARINAEI (Γαρινάιοι and Γαρηναῖοι), mentioned by Ptolemy (vi. 16. § 5) as a population of the country of the *Seres*. [SERES.] [R. G. L.]

GARITES, a people of Aquitania (Caes. *B. G.* i. 27), who submitted to P. Crassus, B. C 56. They are mentioned by Caesar between the Elusates and Ausci, and the position of both of these peoples is known within certain limits. [ELUSATES, AUSCI.] Some writers would connect the name Garites with the name *Gers*, a branch of the *Garonne*. But the reading Garites is not certain in Caesar's text. Schneider (ed. Caes. *Bell. Gall.*) has taken the reading Gates. [G. L.]

GA'RIUS (Γάριος), a place on the coast of Paphlagonia, 80 stadia to the east of Callistratia. (Marcian Heracl. *Peripl.* p. 72; Anonym. *Peripl. Pont. Eux.*) [L. S.]

GARIZIM. [GERIZIM.]

GAROCELI or GRAIOCELI, an Alpine people, who with the Centrones and Caturiges attacked Caesar (B. C. 58) in his march from Ocelum, the most western place in Gallia Cisalpina, over the Alps to the country of the Vocontii. (*B. G.* i. 10.) The reading Graioceli is said to have the best authority for it. (Schneider, ed. Caes. *B. G.* i. 10.) These people are mentioned by no other writer; but, as we know where the Centrones and Caturiges lived, we may suppose that the Garoceli were near them. D'Anville, as he often does, determines their position rightly by the aid of a name. The resemblance between the names Ocelum and Garoceli, he says, fixes the place of the Garoceli in the valley of *Pralas* and of *Cluson*, and consequently in Gallia Cisalpina. But it is clear that Caesar means that they were an Alpine people, whom he met after leaving Ocelum. Walckenaer has a conjecture about them which is ingenious; and it may also be true. He says that they occupied the *Maurienne* and the valley which is contiguous to the *Maurienne*, to the east of *Mont Cenis*, the *Val di Viù*, which contains a place called *Usseglio* and a canton of the same name. And he adds, what is more to the purpose, that in an ancient document, St. Jean de Maurienne is called Johannes Garocellius. He has other arguments also. (*Géog.*, &c. *des Gaules*, vol. i. p. 542.) [G. L.]

GARRHUENUS, a river in Britain, mentioned by Ptolemy, =*the Yare* (or *Yar*-mouth River) both in respect to name and place. [R. G. L.]

GARRIANNONUM, in Britain, mentioned in the Notitia as a station under the *Comes Littoris Saxonici* for the *Equites Stablesiani=Burgh Castle* in Norfolk, where Roman remains are found. [R. G. L.]

GARSAURA (Γαρσάουρα), a small town in Cappadocia from which the praefectura *Garsauria* or *Garsauritis* derived its name. (Strab. xiv. p. 663; comp. xii. 534, and, 568, where, perhaps Γαρσαούρων is to be read for Kramer's Γαρσαβώρων; Plin. vi. 3; Ptol. v. 6. § 14.) [L. S.]

GARSAURITIS. [GARSAURA.]

GARUMNA (ὁ Γαρούνᾶς, Γαρύνα: *Garonne*). Tibullus (i. 7, 11) calls this river "Magnus Garumna:" but Ausonius (*Mosella*, v. 483) makes the name feminine (sequoreae ... Garumnae). The forms Garumna, Garonna, and Garunda occur; the last in a letter of Symmachus to Ausonius, and it is perhaps the origin of the name *Gironde*.

The *Garonne*, the most southern of the three great rivers of France which flow into the Atlantic, rises in the Pyrenees, within the present kingdom of Spain. The river has a north and NNE. course to Toloса (*Toulouse*), from which town it has a general NNW. course to Burdigala (*Bordeaux*). Below *Bordeaux* it forms a large aestuary, which Strabo (p. 190) calls a sea-lake (λιμνοθάλασσα). The navigation of the *Upper Garonne* as far down as the junction of the Tarnis (*Tarn*) below *Toulouse* is much impeded. At *Bordeaux* it is a fine tide river, and the tide ascends 20 miles above *Bordeaux*. This river has several large branches: on the right bank, the *Arriège*, the *Tarn*, the *Lot* (Oltis), and the *Dordogne* (Duranius), which flows into the aestuary; on the left bank, the *Gers*, the *Bayse*, and some others. The length of the *Garonne* is said to be about 360 miles, and the *Dordogne* is near 300 miles long. In fact, the *Dordogne* and *Garonne* are two distinct rivers which flow into one aestuary, now called the *Gironde*. The basin of the *Garonne* is much less than that of the *Loire*, but larger than the basin of the *Seine*. It is a country which lies within well-defined limits, the Pyrenees, the *Cévennes*, the mountains of the *Auvergne*, and the Ocean. Part of the basin of the *Garonne* was the Aquitania of Caesar, who makes the Garumna the boundary between the Aquitani and the Celtae (*B. G.* i. 1).

Strabo (p. 190) and Mela (iii. 2) describe the Garumna as rising in the Pyrenees. Strabo makes the Garumna flow parallel to the Pyrenees, and the navigable part of it he says is 2000 stadia: it is increased by three streams, and then enters the sea between the Santones and the Bituriges Iosci [BITURIGES], both Celtic nations. He speaks of the mouths of the river (αἱ ἐκβολαί) as forming the aestuary: he probably means the proper *Garonne* and the *Dordogne*. Mela's description is much more complete: he describes the upper part of the river as shallow for a great distance and scarcely navigable, except when it is swollen by wintry rains or melted snow; as it approaches the ocean tides it is fuller, and becomes wider as it proceeds; at last it

Digitized by Google

is like a great sea channel, carries large ships, and tosses navigators about in a furious manner, particularly when the wind and the stream are not the same way. Mela may probably have heard of the violence with which the tide enters the *Gironde*. Mela says that there is an island, Antros, in the aestuary of the *Garonne;* but there is no island now. [G. L.]

GARUMNI, an Aquitanian people mentioned by Caesar. [GARITES.] It may be inferred from the name that they were on the Garumna. A. de Valois supposes that they occupied a tract now called *Rivière* along the *Garonne*, to the north of the Convenae, or of the diocese of *St. Bertrand de Comminge*, as far as the borders of the diocese of *Rieux*. This conjecture is accepted by D'Anville and other writers; and it may be true. But there is no direct evidence that it is true. [G. L.]

GASANDES (Γασανδεῖς), an Arab tribe, mentioned by Diodorus Siculus (iii. 44), identical with the Cassanitae of Ptolemy, and the Cassandreis of Agatharchides. Diodorus places them, with the Alibaei, next to the Debae, on the south, in agreement with Ptolemy, who finds them south of the Cinaedocolpitae,—his name for the Debae,—and gives Badeo as the name of their capital (vi. 7. § 6). Diodorus and Agatharchides agree in remarking on the difference of the climate of this part of Arabia from that of the other parts. "This country," says Diodorus, "is not scorched as are the neighbouring regions, but is often covered with soft and thick clouds, from which distil snows and refreshing showers, which render even the summer temperate. The country produces all kinds of fruits, and is remarkably rich, but, owing to the ignorance of the inhabitants, it is not properly cultivated; they collect gold in large quantities, which they find in the natural fissures of the earth, not in the form of gold-dust, but in nuggets, the smallest of which equal in size the olive-stone; the largest are little inferior to the walnut. The natives wear them round their wrists and necks, alternated with transparent pebbles. Having an abundance of gold, but a scarcity of copper and iron, they are glad to barter the former with the merchants for an equal weight of the latter." An identity both of climate and name enables us to fix the Gasandes immediately to the south and south-east of Mekka, in *Mount Gazuan*, the country of Zohran, of which Burckhardt reports: "Grapes abound in the mountains. Most other fruits are cultivated in these mountains, where water is at all times abundant, and the climate temperate. Snow has sometimes fallen, and water been frozen, as far as Sadâ." (*Travels in Arabia*, vol. ii. p. 377, quoted by Forster, *Arabia*, vol. ii. p. 144.) [G. W.]

GASO'RUS, GAZO'RUS (Γάσωρος, Ptol. iii. 13. § 31; Γάζωρος, Steph. B.), a town of the Edoni in Macedonia, and, probably, the same place as the GRAERO of the Peutinger Table. Gasorus, therefore, probably stood between Tragilus and Euporia, towards the NW. end of Mons Pangaeus. (Leake, *Trav. in North. Greece*, vol. iii. p. 229.) [E. J. B.]

GATH (Γέθ, Γέτθα: *Eth.* Γεθαῖος), one of the five principal cities of the Philistines (*Josh.* xi. 22; 1 *Sam.* v. 8, vi 17), the birthplace and home of Goliath and his gigantic family. (1 *Sam.* xvii. 4; 2 *Sam.* xxi. 18—22.) It was taken by Uzziah, and dismantled. (2 *Chron.* xxvi. 6.) Josephus reckons it to the tribe of Dan (*Ant.* v. 1. § 22), and says that Hezekiah took the cities of the Philistines from Gaza to Gath. (*Ant.* ix. 13. § 3.) St. Jerome speaks of it as a city of the Philistines on the confines of Judaea, between Eleutheropolis and Gaza, where a very extensive village existed in his day. (*Comment. in Mich.* i. 10). There can be little doubt that this same is intended in the *Onomasticon* (*s. v.* Γέθ), though it is there erroneously stated to be five miles from Eleutheropolis, on the road to Diospolis or Lydda. (Reland, *Palaest. s. v.*) The inhabitants of *Beit-Jebrin* (Eleutheropolis) speak of a village named *Kuryet-el-Gat*, a quarter of an hour distant from *Beit-Jebrin*, on the road to *Askelan*. It may, perhaps, be permitted to hazard the conjecture that the present *Beit-Jebrin*—the classical Betogabra or Eleutheropolis—marks the site of the ancient Gath. [BETHOGABRIS.] [G. W.]

GATH HEPHER (Γεθχοφές, Γαιθθί, LXX.; Γεθθεφά, Euseb. *Onom.*), a town of Galilee in the tribe of Zabulon (*Josh.* xix. 13), the native place of the prophet Jonah (2 *Kings*, xiv. 25). St. Jerome places it two miles from Sepphoris, on the road to Tiberias, a small village in his day, where the tomb of the prophet was shown. (*Procem. in Jonam.*) The tomb was shown to Benjamin of Tudela, in the mountains near Sepphoris, in the twelfth century (*Travels*, vol. i. p. 80, ed. *Asher*); and in the ruins of *El-Meshhad*, situated two miles east of the ruins of Sepphoris, the Moslems show at this day the tomb of the prophet Jonah. (Robinson, *Bib. Res.* vol. iii. p. 209, note 1.) [G. W.]

GATH-RIMMON (Γεθρεμμών), a city of the tribe of Dan (*Josh.* xix. 45), assigned to the Levites (xxi. 24; 1 *Chron.* vi. 69), is described by Eusebius and St. Jerome as situated 12 miles from Diospolis, towards Eleutheropolis (*Onomast. s. v.*): but this can scarcely be, as Dr. Robinson conjectures, identical with that which they place 5 miles from Eleutheropolis, on the way to Diospolis, as the distance between the two termini is much more than 17 miles. (Robinson, *Bib. Res.* vol. ii. p. 421.) Neither can it be that large village then named Githha, which the *Onomasticon* supposes to be the Gath to which the ark of the covenant was carried from Azotus, and which is placed (*s. v.* Γεθθά) between Antipatris and Jamnia. (Reland, *Palaest.* p. 786.) [G. W.]

GA'THEAE (Γαθεαί: *Eth.* Γαθεάτης), a town of Arcadia in the district Cromitis, situated upon the river Gatheatas (Γαθεάτας), which rose near the place, and which, after receiving the Carnion (Καρνίων), rising in the territory of Aegys, flowed into the Alpheius. Gatheae is placed by the best modern authorities at *Kyrnádhes*. (Paus. viii. 34. §§ 5, 6. Steph. B. *s. v.*; Boblaye, *Recherches, &c.* p. 169. Leake, *Peloponnesiaca*, p. 234; Curtius, *Peloponnesos*, vol. i. pp. 291, 336.)

GATHEATAS. [GATHEAE.]

GAUGAME'LA (τὰ Γαυγαμήλα, Ptol. vi. 1. § 5; Steph. B. *s. v.*), a small village of Assyria, about 12 miles on the other side of the Lycus, at no great distance from the river Bumadus. It was the actual scene of the last great battle between Darius and Alexander the Great, which is sometimes called that of Arbela, though this place was at some distance from the real battle-field. [ARBELA.] Strabo states that the word Gaugamela means "Camel's house," and that it was so called because Darius gave the place for the support and nourishment of one of his camels which was much wearied with the march (xvi. p. 737). Pliny places the town to the west of the Orontes (vi. 26. 8. 30). Each of the two forms Gangamela and Gaugamela admits of explana-

Digitized by Google

m from the Persian; the first might be derived from
ánach (the house-home), the second from *Gâh*
end, Gâ), (the place). Arrian, on the authority
Ptolemy and Aristobulus, has corrected the mis-
ke about the place where the battle was really
ught, stating that it was at Gaugamela, and not
Arbela; he adds the conjecture, that Arbela,
ing a well-known place, while Gaugamela, on the
her hand, was one little known, obtained the credit
having been the exact site of the conflict; he
ggests that the two places are as far apart as
lamis from the Isthmus of Corinth, or Artemisia
m Aegina or Sunium (*Anab.* vi. 12). Plutarch
rees with Arrian. (*Alex.* c. 31.) Ammianus
llows the same opinion (xxiii. 6). Curtius,
the other hand, calls the field of battle Arbela
. c. 9). Stephanus calls it a place of Persis, pro-
bly because, in his time, all that part of Meso-
tamia was subject to the Persian Empire. It is,
rhaps, represented by a small place now called
rmelis; yet it can hardly be the one marked in
ebuhr's Map (ii. p. 284, tab. 45), as that is too
r to Mosul and too far from Arbela; Niebuhr
mself is inclined to place the scene of action on
banks of the *Khauser*, which he calls a small
butary of the *Greater Zab*. [ARBELA.] [V.]

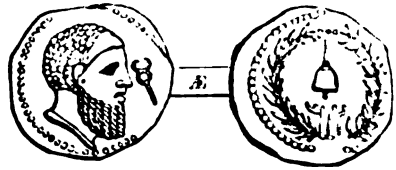
GAULANITIS (Γαυλανῖτις), the name of a di-
ion of Palaestine, the limits of which are not very
urately defined by Josephus. He assigns Gala-
a and Gaulanitis to the dominion of Og, king of
shan (*Ant.* iv. 5. § 3), and extends these districts
e former he now calls Galaaditis) to Mount Le-
non (viii. 2. § 3), making them identical with
at is described in Scripture as Ramoth Gilead, the
es of Jair, the regions of Argob, which is Bashan,
y large cities, &c. (1 *Kings*, iv. 13.) He makes
s with Hippene and Gadaris, the eastern limit of
ilee, and therefore the westernmost of the districts
ch he assigns as the dominions of king Agrippa,
Gamalitica, Gaulanitis, Batanaea, and Trachonitis.
J. iii. 3. §§ 1, 5.) These divisions, however, are not
ays observed, even by the Jewish historian him-
; for Gamala, which in the last-cited passage
s its name to a district, is elsewhere reckoned to
lanitis (*Ant.* xviii. 1. § 1); and Judas, who is
his passage called a Gaulanite, is usually desig-
d a Galilaean (Ib. § 6, xx. 5. § 2, *B. J.* ii. 8.
and 17. § 8), as he is also in *Acts* (v. 37) For
solution of this difficulty, it is not necessary to
t, as Reland and others have done, to the hypo-
s of two Gamalas, but to suppose that Galilee is
times used in a wider sense, to include the east-
ide of the sea of Tiberias. From these scattered
es, the district of Gaulanitis Proper may be
fixed to the eastern side of the river Jordan,
the northern extremity of the sea of Galilee (for
ssida Julias was situated in Lower Gaulanitis,
ii. 9. § 1) to the sources of the Jordan and the
of Lebanon and Hermon. Its extent in width
mpossible to define with any accuracy, as there
well-defined natural boundary to the mountain
and high table-land of the country east of the
n, until it sinks into the great plain of the
m. [BATANAEA.] It is supposed to have de-
ed its name from the town of Gaulan, the Scrip-
GOLAN. (Reland, *Palaest.* p. 317.) [G. W.]

GULOPES, an Arab tribe, mentioned only by
(vi. 28), who places them, with the CHATENI,
Sinus Capeus, on the west of the Persian
in the vicinity of the modern *Chat* or *Katif*
(Forster, *Arabia*, vol. ii. p. 216.) [G. W.]

GAULOS (Γαῦλος: *Eth.* Γαυλίτης, Gaulitanus: *Gozo*), an island in the Mediterranean Sea, between Sicily and the coast of Africa, separated only by a narrow strait from the much larger and more important island of Melita or *Malta*. Gaulos is itself, however, of considerable extent, being 10 miles in length by about 5½ in breadth, and the soil is fertile: hence the island appears to have been inhabited from a very early period; and Scylax, the most ancient author by whom it is noticed, already mentions it as containing a town of the same name. (Scyl. § 110, p. 50; Mela, ii. 7. § 18; Strab. vi. p. 277; Plin. iii. 8. s. 14; Diod. v. 12; Steph. B. *s. v.*) Gaulos must at all times have followed the fortunes of its more powerful neighbour Melita; hence it is seldom mentioned separately in history. But we learn that it was first visited and colonised by the Phoenicians, and subsequently passed into the hands of the Carthaginians, in whose power it remained for the most part till the conquest of Sicily by the Romans. At what period, or how, it fell into the hands of the Greeks, we know not; but that it must have done so may be inferred from the circumstance that there exist coins of the island with the inscription, in Greek characters, ΓΑΥΛΙΤΩΝ. Nor have we any account of its conquest by the Romans, which doubtless took place at the same time with that of Melita, at the beginning of the Second Punic War. (Liv. xxi. 51.) Under the Roman government Gaulos appears to have enjoyed separate municipal rights, as we learn from an inscription still extant there. (Cluver. *Sicil.* p. 444.) It is mentioned, together with Melita, by Procopius (*B. V.* i. 14), who tells us that the fleet of Belisarius touched there on its way to Africa.

The island of *Gozo* is at present a dependency of that of *Malta*. It contains about 8000 inhabitants, but has no port, being bounded on all sides by steep or perpendicular cliffs, though of no great elevation. It is strange, therefore, that Diodorus should especially mention it as "adorned with advantageous ports" (λιμέσιν εὐκαίροις κεκοσμημένη, v. 12), the want of which convenience so strikingly distinguishes it from the neighbouring island of *Malta*. Besides several inscriptions of Roman date, *Gozo* contains a remarkable monument of antiquity called the Giant's Tower (*Torre dei Giganti*); it is of circular form and built of massive blocks of stone in an irregular manner, resembling the Cyclopian style. Near it are the remains of other buildings, constructed in the same rude and massive style of architecture, which appear to have formed part of an edifice of considerable extent consisting of several chambers. These remains, which are wholly distinct in character from anything found in Sicily, are generally ascribed to the Phoenicians; but this rests wholly on conjecture. Their nearest analogies are found in the buildings called *Nuraghe*, in Sardinia. (Hoare, *Class. Tour*, vol. ii. p. 293; *Bullett. d. Inst. Arch.* 1833, pp. 86, 87.)

The view, adopted by some ancient as well as



COIN OF GAULOS.

modern authors, which identified Gaulos with the Homeric island of Calypso, is discussed under the article OGYGIA. [E. H. B.]

GAURA MONS. Part of the Jerusalem Itin. contains a route from Civitas Valentia (*Valence*), on the Rhone, to Mansio Vapincum (*Gap*). After leaving Mansio Lucus (*Luc*), 9 Roman miles bring us to Mutatio Vologatis, which is perhaps *Vaugelas;* and the Itin. adds, "inde ascenditur Gaura Mons." The next station, 8 Roman miles from Vologatis, is Mutatio Cambonum. [CAMBONUM.] D'Anville found, in a manuscript map of the *Dauphiné*, a hill called *Col de Cabre*, which, as he supposes, preserves the name Gaura. Walckenaer supposes the Gaura to be the chain of mountains which extends from *Serre*, on a branch of the Durance, to Rimusa, at the foot of which is the place named *Le Ga*. Probably D'Anville and Walckenaer mean the same range of hills. [G. L.]

GAURELEON. [ANDROS.]

GAURION. [ANDROS.]

GAURUS MONS, a mountain of Campania, now called *Monte Barbaro*, in the immediate neighbourhood of Puteoli, and about 3 miles NE. of Cumae. It is in fact the central and most elevated summit of a range of volcanic hills which extend from the promontory of Misenum to Neapolis [CAMPANIA, p. 491], and is itself unquestionably an extinct volcano, presenting a distinct and tolerably regular crater. (Daubeny *on Volcanoes*, p. 200.) Its sloping sides, composed of volcanic sand and ashes, were very favourable to the growth of vines: hence the wines which it produced were in ancient times among the most celebrated in Italy, and were considered to vie with those of the Falernian and Massican hills. (Plin. iii. 5. s. 9, xiv. 6. s. 8; Flor. i. 16. § 5; Athen. i. p. 26; Stat. *Silv.* iv. 3. 64; Sil. Ital. xii. 160.) The position of Mt. Gaurus, towering over the lower hills which encircled the lakes Avernus and Lucrinus, is distinctly pointed out by Lucan (ii. 667) and by Sidonius Apollinaris (*Carm.* v. 345), and is implied also by Silius Italicus (*l. c*), who places it in the immediate neighbourhood of Puteoli. Aurelius Symmachus also, in a poetic description of Bauli (*Anthol. Lat.* 268, ed. Meyer), distinctly points to the vine-covered flanks of Mt. Gaurus as rising above the hot springs of Puteoli and the lovely bay of Baiae; but there is a confusion in the passage of Pliny where he speaks of the wines of Mt. Gaurus and Massicus, which has led some writers to assume that the two hills must have been near together, and has thus given rise to much confusion. The Mons Gaurus was celebrated in Roman history as the scene of a great victory gained by the Romans under M. Valerius Corvus over the Samnites, B. C. 340. (Liv. vii. 32, 33.) This was the first in the long series of conflicts between those two nations, and on that account (as Niebuhr remarks) "is one of the most memorable in the history of the world: it decided, like the *praerogativa*, upon the great contest which had now begun between the Sabellians and the Latins for the sovereignty of the world" (vol. iii. p. 119). The exact scene of the battle is not indicated; we are only told that it was fought at the foot of Mt. Gaurus. At a later period Cicero mentions this hill among the fertile districts of Campania which the agrarian law of Rullus proposed to sell for the benefit of the Roman people (*de Leg. Agr.* ii. 14). [E. H. B.]

GAUZACA or GAZACA (Γαύζακα ἡ Γαζάκη, Ptol. vi. 18. § 4), a town seated in the district of the Paropamisadae. It is no doubt the same as Agazaca, one of the three cities of this tribe mentioned by Ammianus (xxiii. 6). It is conjectured by Forbiger that it may be the same as the modern *Ghazni*. The name is probably connected with Gaza, a word of Persian origin, signifying a treasure-house. [V.]

GAZA (Γάζα: *Eth.* Γαζαῖος), a very ancient and important city of Palestine Proper, first mentioned in the southern border of the Canaanites (*Gen.* x. 19), but originally inhabited by the Avims, who were dispossessed by the Caphtorims. (*Deut.* ii. 23.) It was included in the tribe of Judah (*Josh.* xv. 47), but remained in possession of the Philistines (1 *Sam.* vi. 17), whose capital it apparently was (*Judges*, xvi. 21). Josephus says that it was taken by Hezekiah. (*Ant.* ix. 13. § 3.) It is celebrated in secular, as in sacred history. Arrian, in his *Expedition of Alexander* (ii. 27), describes it as a large city, distant 20 stadia from the sea, situated on a lofty mound, and fortified by a strong wall. It was well provisioned, and garrisoned by a force of Arab mercenaries under the command of an eunuch named Batis (or, according to Josephus, Babemeses), and its high walls baffled the engineers of Alexander (B. C. 332), who declared themselves unable to invent engines powerful enough to batter such massive walls. Mounds were raised on the south side of the town, which was most assailable, and the engines were erected on this artificial foundation. They were fired by the besieged, in a spirited sally, and the rout of the Macedonians was checked by the king in person, who was severely wounded in the shoulder during the skirmish. During his slow recovery the engines that had been used at Tyre were sent for, and the mound was proceeded with until it reached the height of 250 feet, and the width of a quarter of a mile. The besiegers were thrice repulsed from the wall; and when a breach had been effected, in the third assault, and the city carried by escalade, its brave garrison still fought with desperate resolution until they were all killed. The women and children were reduced to slavery. The siege had apparently occupied three or four months; and the conquerors introduced a new population into the place from the neighbouring towns, and used it as a fortress (Arrian, ii. 27, followed by Bp. Thirlwall, *Greece*, vol. vi. pp. 354—357.) If this be true, the statement of Strabo, that it was destroyed by Alexander, and remained desert, must be taken with some qualification (p. 759). Indeed, the figure which it makes in the intermediate period discredits the assertion of Strabo in its literal sense. Only twenty years after its capture by Alexander, a great battle was fought in its neighbourhood, between Ptolemy and Demetrius, wherein the latter was defeated, with the loss of 5000 slain and 8000 prisoners. "Gaza, where he had left his baggage, while it opened its gates to his cavalry on his retreat, fell into the hands of the pursuing enemy." (Thirlwall, vol. vii p. 340.) Again, in the wars between Ptolemy Philopator and Antiochus the Great (B. C. 217), it was used as a depôt of military stores by the Egyptian king (Polyb. v. 68); and when the tide of fortune turned it retained its fidelity to its old masters, and was destroyed by Antiochus (B. C. 198). And it is mentioned, to the credit of its inhabitants, by Polybius, that, although they in no way excelled in courage the other inhabitants of Coelosyria, yet they far surpassed them in liberality and fidelity and invincible hardihood, which had shown itself in two former emergencies, viz., in first resisting the Persian invaders,

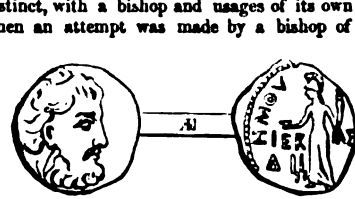
Digitized by Google

and then in maintaining their allegiance to the Persians against Alexander (xvi. 40). It was evidently a strong-place in the time of the Asmonean princes, for it stood a siege from Jonathan (1 *Maccab.* xi. 61, 62; Joseph. *Ant.* xiii. 5. § 5); and having been taken by Simon, not without resistance, he cast out its idolatrous inhabitants, peopled it with Jews, "made it stronger than it was before, and built therein a dwelling-place for himself" (xiii. 43—48). Only a little later, Alexander Jannaeus besieged it in vain for twelve months, when it was betrayed into his hands. Its importance at this period is attested by its senate of 500, whom the conqueror slew, and utterly overthrew their city. (Joseph. *Ant.* xiii. 13. § 3.) It did not long continue in ruins, for it was one of the many cities rebuilt by the command of Gabinius (xiv. 5. § 3). It was given to Herod the Great by Augustus (*B. J.* i. 20. § 3), but not included in the dominions of his son Archelaus, as being a Grecian city (ii. 6. § 3). These notices sufficiently expose the error of Strabo's statement above cited; nor does there seem to be any authority for the theory of the transference of the site, by which it has been attempted to reconcile his statement with these historical notices. It is true that Strabo places the city 7 stadia from the harbour (p. 759); whereas Arrian (*l. c.*) states it to be 10 stadia at the most; but this discrepancy concerning the site of a town of which neither of them could have any very accurate knowledge, cannot justify the conclusion that the ancient city had been deserted, and another city of the same name erected in its vicinity. Another and a decisive argument against this theory is, that while the modern city occupies an eminence corresponding with that described by Arrian, and is covered with ancient ruins, no vestiges have been discovered in the neighbourhood which could mark the site of an earlier city. A succession of coins, struck at Gaza, some few prior to the emperors, but many more from Hadrian downwards, attest the importance of the city subsequently to the Christian aera, and present some peculiarities worthy of observation. The cypher, or characteristic sign of the city, impressed on almost all the coins, has been variously explained, but by no one satisfactorily: but all that is intelligible clearly attests it to have been a pagan city, in accordance with the historical notices above cited. The city itself is represented by a woman's head; and the Greek deities, Zeus, Artemis, Apollo, Hercules, which figure on the coins, with the absence of the local deity, Astarte, by far the most common in the coins of other maritime cities of Syria, prove the city to have been, as Josephus asserts (*B. J.* xvii. 13. § 4), a Grecian city, probably a colony, which may account for its inveterate adhesion to the exploded superstition in the reign of Constantine (Sozoman, *H. E.* v. 3). The legends of the various coins serve no less to elucidate the history of the city. The earliest (probably A. U. C. 693) proves the city to have been autonomous; and as history bears witness to its senate (Βουλή) of 500, so does this coin to its ΔΗΜΟC. ΙΕΡ. ΑCΤ. further prove it to have enjoyed the privileges of a sacred city and an asylum. The name ΕΙΩ serves to connect this city with the mythic Io; and the name ΜΕΙΝΩ, applied to an armed warrior with a sceptre in his hand, connects it also with the Cretan hero Minos, and suggests the idea that it may have been colonised from that island; and this idea is confirmed by another inscription, ΙΑΡΝΑ, the signification of which is furnished by early Christian writers, who tell us that the most magnificent temple in Gaza (afterwards converted into a Christian church) was dedicated to Marna, and thence called Marnion. This Marna, they add, was identical with the Cretan Jove. (Eckhel, vol. iii. pp. 448—454.) Many of the Jewish captives taken by Hadrian (A. D. 119) were sold at a fair instituted at Gaza, which was called, from this fact, the fair of Hadrian for many centuries after. (*Chron. Paschale in ann.*). The town is frequently noticed in Christian and Moslem annals. It early became an episcopal see, and the names of its bishops are found in many councils. (Le Quien, *Oriens Christ.*, vol. iii. pp. 603—622). It was a frontier town of great importance in the middle ages; and the historical notices have been collected by Quatremère (*Les Sultans Mamlouks de Makrisi*, tom. i. liv. 2. pp. 228—239).

The modern town, still called by its ancient name, *'Azzah*, signifying "the strong," "is situated on a low round hill of considerable extent, not elevated more than 50 or 60 feet above the plain around. This hill may be regarded as the nucleus of the city, although only the southern half is now covered with houses. But the greater part of the modern city has sprung up on the plain below: a sort of suburbs stretching far out on the eastern and northern sides. The ancient city lay obviously chiefly on the hill. The present town has no gates; yet the places of the former ones remain, and are pointed out around the hill." (Robinson, *Bib. Res.* vol. ii. pp. 374, 375.) "It contains, with the two villages or suburbs adjoining, about 10,000 inhabitants. It is situated a short league from the coast, which is here an open beach, and the landing difficult, excepting in very calm weather. It is surrounded by gardens, which produce fruit in abundance." (Alderson, *Notes on Acre*, p. 7, note 6.)

The port of Gaza was called "Majuma Gazae;" the Arabic word "Majuma," signifying *portus* or *navale*, being applied alike to Ascalon, Jamnia, Azotus, and Gaza. (Le Quien, *Oriens Christ.* vol. iii. p. 622.) It was situated, according to Strabo, only seven stadia from the city (*l. c.*). Arrian, in agreement with Sozomen, makes the interval 20 stadia. (Sozomen, *H. E.* ii. 5, p. 450, ed. *Vales.*) All that we know of it we learn from the last-mentioned historian. Having been formerly strongly addicted to pagan superstition, it was converted to the faith of Christ in the reign of Constantine, who consequently honoured it with special privileges, and erected it into an independent civitas, and called it *Constantia*, exempting it from its subjection to Gaza, whose inhabitants still retained their attachment to the pagan superstition. (Sozomen, *l. c.*) Under the emperor Julian the people of Gaza reasserted their supremacy, and the emperor decided in favour of their claim. Its new name was withdrawn, and it was comprehended again within the name and municipal jurisdiction of Gaza.

The ecclesiastical position of Gaza still continued distinct, with a bishop and usages of its own; and when an attempt was made by a bishop of Gaza



COIN OF GAZA.

Digitized by Google

in the fifth century to unite the two churches, the provincial synod confirmed it in its former independence of that see. (Sozomen, *H. E.* v. 3, p. 597). Several of its bishops are mentioned in the ecclesiastical annals. (Le Quien, *Oriens Christ. l. c.*) [G. W.]

GAZA. 1. (Γάζα, Arrian, *Anab.* iv. 2), a city or strongly fortified place in Sogdiana, taken by Alexander the Great in person, on his advance beyond the Jaxartes or *Sihun*. Bishop Thirlwall (*Hist. of Greece*, vol. vi. p. 286), and others, conjecture that this place may be recognised at *Ghaz* near *Urtappeh*, in the desert between that place and the river. Ibn Haukil (p. 270) describes *Ghaz* as the summer residence of the rulers of this district. It seems, however, probable that this and other cities taken at this time by Alexander the Great were more to the eastward, in the hilly country. (Wilson, *Ariana*, p. 165, &c.; *Mem. of Emp. Babur*, Introd. p. xii.)

2. In Media. [GAZACA.] [V.]

GAZACA (Γάζακα, Strab. xi. p. 523), the Palace of the Parthians, situated in a plain in Atropatene. The name in the earlier editions of Strabo was always written Gaza, but Groskurd detected the error in the MS., and proposed the reading Γάζακα for Γάζα καὶ, which has been adopted by Kramer, and is doubtless the correct one. The name is connected with Gaza, and is, perhaps, a modification of it. It is probably connected with the Persian Ghaz, a place of treasure. (For the name, see Ptol. vi. 18; Ammian. xxiii. 6, where it is written Agazaca; Theoph. Chronogr. pp. 257, 270; Cedren. p. 412; Niceph. Patriarch. ep. 12; *Hist. Misc.* xviii. 16; Theoph. Simocatt. *Hist. Maur.* v. 8, 10; and GAUZACA). Pliny speaks of a place he calls Gazae, at a distance of 450 M. P. from Artaxata; this should probably be corrected to Gazaca (vi. 13, 16).

If Colonel Rawlinson be right, as we think he is, in his theory with respect to Ecbatana, this town underwent many curious changes of name, according to the rulers who successively occupied it. [ECBATANA.] [V.]

GAZELON or GADILON (Γαδιλών), a town in the north-west of Pontus, in a fertile plain between the river Halys and Amisus. (Strab. xii. 547; Plin. vi. 2.)

From this town the whole district received the name of Gadilonitis, which is probably the right form, which must, perhaps, be restored in two passages of Strabo, in one of which (p. 553) the common reading is Γαλαυνῖτις, and in the other (p. 560) Γαζηλωτός. [L. S.]

GAZIU'RA (Γαζίουρα: *Azurnis?*), a town in Pontus, on the river Iris, near the point where its course turns northwards. It was the ancient residence of the kings of Pontus, but in Strabo's time it was deserted. (Strab. xii. p. 547.) Dion Cassius (xxxv. 12) notices it as a place where Mithridates took up his position against the Roman Triarius. (Comp. Plin. vi. 2.) [L. S.]

GAZO'RUM, the same as *Zagorum*, *Zagorus*, or *Zagora* (Ζάγωρα, Ζάγωρον, Ζάγωρος), a town of Paphlagonia, on the Euxine, between Sinope and the river Halys. (Arrian, *Peripl. P. Eux.* p. 15; Marcian Heracl. p. 73; Ptol. v. 4. § 5, where it is called Ζάγειρα.) [L. S.]

GAZO'RUS. [GASORUS.]

GEBAL, GEBALE'NE (Γεβαληνή, Γαβαληνή), a people and district of that part of Arabia Petraea to which Josephus gives the name of Idumaea. (*Antiq.* i. 1.) Eusebius and S. Jerome properly regard it as identical with Mount Seir (*Onomast. s. v.* Σηειρ), the habitation of Esau and his descendants. (*Genes.* xxxvi. 8, 31.) The name describes the mountainous character of the country situated around Petra. (*Onomast. s. v.* Ἰδουμαία.) [IDUMAEA.] [G. W.]

GE'BALA, GEBALAECA. [VARDULI.]

GEDERAH, GEDEROTH (Γάδηρα, Γαδηρώθ: *Eth.* Γαδαραθίμ). There can be no doubt that the same place is intended under these various forms, probably identical also with Gedor, Γεδώρ (Josh. xv. 58, there reckoned to the tribe of Judah). Gederah is reckoned as one of the cities presided over by a king or sheikh of the Canaanitish tribes (Josh. xii. 13) reduced by Joshua. Gederah or Gederothaim is reckoned to that part of the tribe of Judah situated in the valley or plain (xv. 36); in conformity with which notice it is said in 2 *Chron.* xxviii. 18: "The Philistines also had invaded the cities of the low country, and of the south of Judah, and had taken Beth-shemesh and Ajalon, and Gederoth, and Soco with the villages thereof, and Timnah with the villages thereof," &c. [G. W.]

GEDOR (Γεδώρ), one of the towns of Judah situated in the hill country. (*Josh.* xv. 58; 1 *Chron.* iv. 39.) Eusebius mentions a village named Gedor, 10 miles distant from Diospolis (Lydda), on the road to Eleutheropolis (*Onomast. s. v.*), which may possibly be identical with "a place with ruins on the brow of the high mountain ridge . . called Jedur, which is doubtless the same as the Gedor of the mountains of Judah." (*Biblical Res.* vol. ii. p. 338.)

GEDRO'SIA (Γεδρωσία, Strab. xv. pp. 721, 722; Ptol. vi. 21. § 1, &c.; Κεδρωσία, Dicd. xvii. 105; Eth. Γεδρώσιοι, Strab. xv. pp. 723, 724; Γεδρῶσοι, Dionys. v. 1086; Γαδρώσιοι, Arrian, vi. 26, 27; Γάδρωσοι, Arrian, vi. 23; Gedrosi, Plin. vi. 20. s. 23; Gedrosi, Plin. vi. 23, 24; Gedrosii, Curt. ix. 10), an extensive district of Asia, which is washed on the S. by the Indian Ocean, and bounded on the E. by the Indus, which separates it from India, on the N. by the Montes Baetii (now *Washáti Mountains*), Drangiana, and Carmania Deserta, and on the W. by Carmania. It comprehended probably nearly the same district which is now known by the name of *Mekrán*. Little was known of this province in ancient times, and its existence was most likely not heard of till Alexander's return from India, when he and Craterus marched across it by two separate routes, while the fleet under Nearchus coasted along its shore. Arrian has given some description of it, as it appeared to Nearchus; and there is a later and fuller account, so far as the names of places, in Ptolemy and Marcian, from which we may infer that after the foundation of Alexandria some trade existed between that part of Asia and that city. Strabo differs from Ptolemy, by interposing between Gedrosia and the sea-coast some maritime tribes, as the Arabii or Arbii, between the Indus and the Arabis, and the Orreitae, between them and the Persian Gulf. The probability is that Gedrosia did include the whole district between the sea and the borders of Seistan and the kingdom of *Kábul*. Sir Alexander Burnes, in his Map, gives the whole country the name of *Beluchistan*, and makes *Mekrán* its sea-board. The Beluchis, from their language, must be comparatively modern colonists from Persia.

The northern part of Gedrosia was hilly, and comprehended the Baetii Montes (now *Washáti*). Towards the middle ran another chain connected with the river Arabis, and called the Arbiti Montes,

Digitized by Google

—these are probably the *Bala* or *Brahui Mountains*; and to the W. an extensive range, which was the boundary of the province in the direction of Caramania, the Persici Montes (now *Bushkurd* or *Burkind Mountains*). There were few rivers in Gedrosia, and these chiefly mountain torrents, or little better, which in the summer were almost dry or lost in the sands. The best known appears to be the Arabis (now *Purali*) (Arrian, *Ind.* cc. 22, 23) [ARABIS], which enters the Indian Ocean about 90 miles to the W. of the mouths of the Indus: there are two smaller streams mentioned in ancient authors, one the Nabrus, which Pliny calls a navigable river (vi. 23, 26), and which may, perhaps, be the modern *Dustee* or *Bhugwur* (Burnes' Map), and Tomerus (Arrian, *Ind.* c. 24), or Tuberum flumen (Plin. vi. 23, 26), probably the modern *Bhusul*. Marcian and Ptolemy mention several other rivers; but these are probably only small streams, and nothing is known of them but their names.

The character of Gedrosia seems to have been for the most part unfruitful, owing to the heat of the climate and the scarcity of water for irrigation. Arrian, however, and Strabo mention that it produced many rare plants, such as myrrh, spikenard, and different kinds of palms. Aristobulus (*ap. Arrian*, vi. c. 22) speaks of the vast quantities of the Arabian myrtle (μίῤῥα) which the soldiers of Alexander met with, and states that the Phoenician merchants came thither to collect the gum of this shrub, which grew there to a great size. Besides this, were some species of spikenard and laurels, from which the Phoenicians also procured sweet-scented gums, and a plant armed with thorns so sharp that hares running through them are often caught by them (cactus). The inhabitants of the country constructed their huts of shells, and covered them (for roofs) with the bones of fish (Arrian, vi. c. 23), and probably subsisted, like their neighbours the Ichthyophagi, chiefly upon fish. There was a current story there that Semiramis, on her return from India, lost all her army, except twenty, in traversing Gedrosia, and that Cyrus escaped through the same district with seven only. (Arrian, vi. 24.) Arrian has described with much minuteness the difficulties under which Alexander himself laboured.

The Gedrosii appear to have been an Arianian race, akin to the Arachosii, Arii, and Drangiani. They are first known to us by Alexander's invasion; but they do not seem to have been completely subdued by him: hence it is that very little is known of their political state. At the same time, it must be borne in mind, that between the time of Alexander and Ptolemy many changes may have taken place in the country, and that a district which Alexander and his generals found nearly devoid of towns may, in later times, have had all the cities which Ptolemy enumerates, but which we are not now able to identify. A considerable number of the places along the coast have been satisfactorily made out by Dr. Vincent (*Voyage of Nearchus*), with the aid of some modern surveys. At the time of Nearchus's voyage and Alexander's march, the people were apparently under the government of a number of petty chieftains, who ruled the different districts which are mentioned in the accounts we have of those expeditions. Along the coast we find (to proceed from E. to W.) the districts named Saranga, Ascala, and Morontobaca, between the Indus and the Arabis (Arrian, *Ind.* xxii.), with a harbour in the last called Γυναικῶν λιμήν, mentioned also by Marcian (p. 24) and Ptolemy (vi. 21. § 2). Then follow the Arabitae, along the banks of the Arabis; and Oreitae, Orae, Ori, or Horitae, like the last, a people said to be of Indian extraction. (Strab. xv. p. 720; Arrian, *Ind.* 23, *Anab.* vi. 22; Curt. ix. 10.) The land of the last tribe produced corn, wine, rice, and dates. Nearchus founded, at the mouth of the Tomerus (*Bhusul*), a town which bore in after-times the name of Oraea (Ὥραια),—now *Urmara* (*Peripl. M. Er.* p. 21), to serve as a port of export for the surrounding country. D'Anville has suggested *Hair* as its representative. Vincent rejects the position of Oraia as given by the author of the Periplus altogether. (*Voy. of Nearchus*, vol. i. p. 218.) At no great distance from, and perhaps within the limits of, the same tribe was Rhambacia (Ῥαμβακία), which Alexander considered so well placed that he ordered Hephaestion to establish a colony there. (Arrian, vi. 21, 22.) Mannert supposes this is now *Hair* (v. 2. § 13); others, that it is represented by *Ramghur*. To the W. commenced the territories of another tribe, the Ichthyophagi (Arrian, *Ind.* c. 26), who lived, as their name indicates, along the seaboard of the land. Their territory was probably a long narrow strip of land (Strab. xv. p. 720), and containing a few places, for the most part only small fishing villages (Arrian, *Ind.* 26; Plin. vi. 23. s. 26). Still further to the W. are several towns enumerated by Arrian, and indicative of a more fruitful and habitable soil; as, Balomum, Dendrobosa, Cyiza, Canasis or Canasida, Troesa, and Dagasiris. The author of the Periplus (p. 18) adds another town, which appears to have had some importance in his time as an emporium, Omana (τὰ Ὄμανα), mentioned also by Marcian (p. 22), and perhaps the same which Ptolemy mentions under the name of Commana (vi. 8. § 7). In the interior of Gedrosia Alexander met with a large place, which, from the description, would seem to have been a sort of metropolis, called Pura (Πούρα, Arrian, vi. 24). Forbiger supposes that this town is represented by the modern *Bun-pur*: Wilson (*Ariana*, p. 158), that it may be *Pukra*—a place visited by Major Pottinger in his journey through this country. Major Pottinger's town would, however, seem to be too far inland to answer the description in Arrian. Pura, as a word of Sanscrit origin, signifying "town, may, after all, have only meant "the city," as the chief place of the neighbourhood. [V.]

GEIDUNI or GEIDUMNI, a people mentioned by Caesar as dependent on the Belgian nation of the Nervii. The reading of the name is not quite certain (Caes. *B. G.* v. 39., ed. Schneid.), and the position of the people is unknown. [G. L.]

GEIR or GIR FL. [LIBYA.]

GELA (Γέλα: *Eth.* Γελῷος, Gelensis: *Terranova*), one of the most important Greek cities of Sicily, situated on the S. coast of the island, between Agrigentum and Camarina, and at the mouth of the river of the same name. It was founded, as we learn from Thucydides, forty-four years after the foundation of Syracuse, or B. C. 690, by a joint colony of Cretans and Rhodians under the guidance of Antiphemus of Rhodes and Entimus of Crete. The Rhodian colonists came, for the most part, from Lindus; hence the spot on which the new city was first built obtained the name of Lindii, by which it continued to be known in the days of Thucydides, though the city itself acquired that of Gela, from the river of that name on the banks of which it was situated. (Thuc. vi. 4; Herod. vii. 153; Schol. *ad Pind. Ol.* ii. 16; Diod.

Digitized by Google

viii. 25. Exc. Vat. p. 11; Callim. *ap. Schol. Pind. l. c.*; Virg. *Aen.* iii. 702; Sil. Ital. xiv. 218.) Like most of the Greek colonies in Sicily, we have very little information as to its history for nearly two centuries after its foundation. Some obscure notices of its struggles with the barbarians of the interior (Paus. viii. 46. § 2; Schol. Pind. *l. c.*), and of internal dissensions between conflicting factions, in one of which Telines, the ancestor of Gelon, bore a conspicuous part (Herod. vii. 153), are all that we hear of it during this period. But the fact that in B. C. 582 the Geloans were able to found the powerful colony of Agrigentum, may be taken as a proof that they themselves, at that period, were in a flourishing condition. The new colony, indeed, rapidly outstripped its parent city, and rose for a time, under Phalaris, to be the most powerful state in Sicily [AGRIGENTUM]: but Gela subsequently obtained its turn of prosperity, if not of supremacy, under the rule of Hippocrates. The form of government at Gela had at first been oligarchical, as was the case with most of the Greek cities in Sicily (Arist. *Pol.* v. 12); and this constitution continued till it was subverted by Cleander, who raised himself to despotic power. We have scarcely any information concerning the circumstances of his reign; but we know that he ruled seven years (B. C. 505—498), and transmitted the sovereign power, without opposition, to his brother Hippocrates, who, during a reign of about the same duration (B. C. 498—491), raised Gela to a pitch of power and prosperity far surpassing what it had previously attained, and even extended his dominion over a great part of Sicily. He successively reduced Leontini, Callipolis, and Naxos under his yoke, took the city of Zancle, which he made over to the Samians [MESSANA], and waged successful war against the Syracusans themselves, who were compelled to purchase peace by the cession of Camarina. (Herod. vii. 153, 154.) At the death of Hippocrates (B. C. 491) Gelon succeeded to the sovereign power, and rapidly followed in the same career of successful aggrandisement; till, in B. C. 485, he succeeded in making himself master of Syracuse itself. [GELON, *Biogr. Dict.*] But this event, which seemed likely to raise Gela to the position of the first city in Sicily, became, on the contrary, the cause of its decline. Gelon from this time despised his native city, and directed all his efforts to the aggrandisement of his new capital, with which object he even compelled half of the inhabitants of Gela to migrate to Syracuse. (Herod. vii. 156.) His successor Hieron also appears to have driven a large number of the citizens of Gela into exile: but after the expulsion of Thrasybulus (B. C. 466) all these returned to their native city, and Gela not only became itself repeopled, but was able to settle a fresh colony at Camarina, which had been rendered desolate by Gelon. (Diod. xi. 76.) The period which followed, from the restoration of its liberty to the Carthaginian invasion (B. C. 466—406), seems to have been one of great prosperity for Gela, as well as for the rest of Sicily. The Geloans appear to have adhered uniformly to the same line of policy with the other Doric cities in the island: and hence they were among the first to promise their support to the Syracusans on the approach of the Athenian expedition (B. C. 415). Immediately after the arrival of Gylippus, the Geloans sent a small body of troops to his support, and, after the first successes of the Syracusan arms, they furnished a more considerable force of 600 troops, with a squadron of five ships. (Thuc. vii. 33, 58; Diod. xiii. 4, 12.)

A few years later the great Carthaginian invasion brought destruction on Gela, as it had previously done on Himera, Selinus, and Agrigentum. After the capture of the last city (B. C. 406), the Geloans afforded a temporary refuge to its inhabitants, and treated them with the utmost kindness: at the same time they urgently applied to the Syracusans for assistance; but Dionysius, who was at that time just rising to power, though he visited Gela, and brought about a democratic revolution in the city, took no further steps for its protection. (Diod. xiii. 89, 91.) The next spring (B. C. 405) the Carthaginians appeared before Gela, and laid siege to the city, which was a place of no natural strength, and not well fortified: notwithstanding which, the inhabitants made a gallant resistance, and were able to repulse all the attacks of the enemy till the arrival of Dionysius at the head of a large army to their relief. But that general, having been defeated in his first attack on the Carthaginian camp, renounced all further efforts, and compelled the Geloans to follow the example of the Agrigentines, and abandon their city with their wives and families. The unhappy exiles withdrew to Leontini, while Gela itself was plundered and laid waste by the Carthaginians. (Diod. xiii. 108—111. 113.)

By the peace which Dionysius soon after concluded with Himilco, the Geloans were permitted to return to their own city, on condition of not restoring its fortifications, and of paying tribute to Carthage (Diod. xiii. 114), and there is no doubt that they availed themselves of these terms; but Gela, though repeopled, never rose again to its former prosperity. In B. C. 397 the citizens gladly declared themselves free from the Carthaginian yoke, and joined Dionysius in his expedition against the western cities of Sicily (Id. xiv. 47): and, notwithstanding the various vicissitudes of fortune that marked the wars between the Syracusan despot and the Carthaginians, they succeeded in maintaining their independence of the latter people, which was secured to them by the treaty of B. C. 383 (Id. xv. 17). Of their subsequent fortunes we hear nothing for some time; but they are mentioned as among the first to join the standard of Dion, when he landed in Sicily, B. C. 357 (Plut. *Dion.* 26), and, after the victory of Timoleon (B. C. 338), Gela, which was at that time in a very decayed state, was replenished with a fresh body of colonists, composed in part of her old inhabitants, with the addition of new settlers from the island of Ceos. (Plut. *Timol.* 35.) This colony appears, for a time, to have restored Gela to a tolerable degree of prosperity; and it figures in the wars of Agathocles as an independent city, possessing considerable resources. But a severe blow was again inflicted on it by that tyrant, who, in B. C. 311, being apprehensive of its defection to the Carthaginians, contrived to introduce a body of troops into the city, and massacred above 4000 of the principal citizens. (Diod. xix. 71, 107.) By this means he established his power there for the time, and after his great defeat at Ecnomus he took refuge with the remains of his army at Gela, where he was able to defy the arms of the Carthaginians. (Id. xix. 110.) But in B. C. 309, when the Agrigentines, under Xenodicus, raised the standard of independence, and proclaimed the freedom of the separate cities, the Geloans were the first to join them, and took an active part in their enterprise. (Id. xx. 31.) Gela appears to have, at this time, recovered a considerable degree of power and prosperity, but we hear nothing more of it during

Digitized by Google

the time of Agathocles, and when its name next occurs we find it subject to the rule of Phintias, the despot of Agrigentum, who, with the view of augmenting the city that he had lately founded near the mouth of the Himera and called after his own name [PHINTIAS], not only removed thither the inhabitants of Gela, but demolished the walls and houses of the older city. (Diod. xxii. 2. Exc. Hoesch. p. 495.)

It is evident that Gela never recovered from this blow: we find, indeed, incidental mention of its being again devastated soon after by the Mamertines (Diod. xxiii. 1. Exc. H. p. 501); but in the First Punic War no notice occurs of the city, though the territory is mentioned on one occasion in connection with Phintias (Diod. xxiv. 1. Exc. H. p. 508). Under the Roman rule, however, the "Gelenses" certainly existed as a separate community (Cic. *Verr.* iii. 43), and the statement of Cicero, that, after the capture of Carthage Scipio restored to them the statues that had been carried off from their city (*Verr.* iv. 33), would seem to prove that the latter was then still in existence. Strabo, indeed, tells us that Gela was in his day uninhabited (vi. p. 272), and associates its name with those of Callipolis and Naxos, as cities that had wholly disappeared; but his expressions must not be construed too literally, and the name is still found both in Pliny and Ptolemy. (Plin. iii. 8. s. 14; Ptol. iii. 4. § 15.) But it was probably at this period a poor and decayed place, and no subsequent trace of it is found

The site of Gela has been the subject of much controversy in modern times, many local writers contending for its position at the modern *Alicata*, at the mouth of the river *Salso*, while Cluverius, who has been generally followed by the most recent authorities, places it at *Terranova*, about 18 miles farther E., and at the mouth of the river now known as the *Fiume di Terranova*. All arguments derived from the statements of ancient writers are in favour of the latter view, which may, indeed, be considered as clearly established: the only evidence in favour of *Alicata* is the fact (in general, certainly a strong one) that an honorary inscription with the name of the Geloans has been found there. But as the ruins still visible near *Alicata* are in all probability those of Phintias, a city which was peopled with the inhabitants of Gela, it is easy to understand how such an inscription (which is of small dimensions) may have been transported thither. No doubt exists that *Terranova* occupies an ancient site; we learn from a writer of the 13th century, that it was founded by the Emperor Frederic II., "super ruinis deletae atque obrutae urbis" (Guido Columna, cited by Fazello): and the remains of an ancient temple are still visible there, of which the massive basement was preserved in the days of Fazello; and one column remained standing as late as the visit of D'Orville (1727), but is now fallen and half buried in the sand. Numerous coins and painted vases have been brought to light by excavations on the site. (Fazell. *de Reb. Sic.* v. 2. p. 232; Cluver. *Sicil.* pp. 199, 200; D'Orville, *Sicula*, pp. 111—132; Smyth, *Sicily*, p. 196; Biscari, *Viaggio in Sicilia*, p. 111; Siebert, *Akragas u. s. Gebiet.*, pp. 47, 48.)

The situation of *Terranova*, on a slight eminence, a little more than a mile from the sea, precisely corresponds with the account given by Diodorus of the operations of Dionysius when he attacked the Carthaginian camp, from which it is evident that, although situated near the sea-coast, it was sufficiently distant from it to admit of the passage of one division of the army between the walls and the sea. (Diod. xiii. 109, 110.) No importance can be attached to the circumstance that Ptolemy reckons Gela among the *inland* towns of Sicily, as he includes in the same category Phintias and Camarina, both of which were situated almost close to the coast.

The position of the city of Gela being ascertained, that of the river follows it. This can be no other than the one now called *Fiume di Terranova*, from its flowing by the walls of that town, which rises in the neighbourhood of *Piazza*, about 25 miles N. of *Terranova*. It still retains the character of a violent and impetuous torrent, alluded to by Ovid (*Fast.* iv. 470); but has little water in the dry season. Ancient grammarians derive the name of the river (from which that of the city was taken) from a Siculian word, γέλα, signifying cold or frost, evidently connected with the Latin *gelu*. (Steph. B. *s. v.*; Suid. *s. v.*; *Etym. Magn. s. v.*) An absurd story is, however, related by the same authorities, which would derive the name of the city from γελάω. The river-god Gelas is represented on most of the coins of the city, under the usual form of a bull with a human head: on one of them he bears the title of ΣΩΣΙΠΟΛΙΣ, a strong instance of that veneration for rivers which appears to have particularly characterised the Greeks of Sicily.

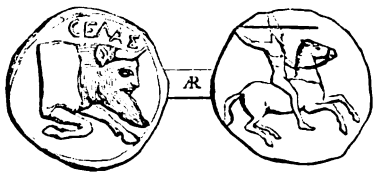
To the west of Gela extended a broad tract of plain, between the mountains and the sea, but separated from the last by an intervening range of hills. This is the Γελῷον πέδιον of Diodorus and the CAMPI GELOI of Virgil (*Aen.* iii. 701). It is still, as in ancient times, one of the most fertile corn-growing tracts in the whole of Sicily; whence Gela is termed, by the author of an ancient epigram, πυρόφορος, "the wheat-bearing" (*Epigr. ap. Anon. Vit. Aesch.*). According to an earlier writer (Amphis, *ap. Athen.* ii. p. 67), it was renowned for the excellence of its lentils (φακῆ). We learn also from Pliny (xxxi. 7. s. 39, 41), that its territory produced abundance of salt.

Gela was the birth-place of Apollodorus, a comic poet of some note, who is frequently confounded with his more celebrated namesake of Carystus. (Suid. *s. v.* Ἀπολλόδωρος; Athen. iii. p. 125.) It was also the place to which Aeschylus retired when driven from Athens, and where he was soon after killed by a singular accident (B. C. 456). The Geloans paid great respect to his memory, and his tomb was still visible there in after-ages. [AESCHYLUS, *Biogr. Dict.*] We learn from Pausanias that they had a treasury at Olympia, in which they dedicated valuable offerings. (Paus. vi. 19. § 15.) The same author alludes to some statues, the reputed work of Daedalus, which had formerly existed at Gela, but had disappeared in the time of the historian. (Id. ix. 40. § 4.) A colossal statue of Apollo, which stood outside the town, was carried off by the Carthaginians, in B. C. 405, and sent to Tyre, where it still remained when that city was taken by Alexander the Great. (Diod. xiii. 108.)

It is certain that Gela, in the days of its power and prosperity, possessed an extensive territory; though we have no means of fixing its exact limits. It was probably separated from that of Agrigentum on the W. by the river Himera: of its extent towards the interior we have no account; but the name of a station given in the Itineraries as "Gelasium Philosophianis," seems to prove that this point (which apparently coincided with the modern town of *Piazza*,

Digitized by Google

about 24 miles from *Terranova*) must have been comprised in the territory of Gela. [E. H. B.]



COIN OF GELA.

GELAE (Γῆλαι, Strab. xi. pp. 508, 510; Γέλαι, Plut. *Pomp.* c. 35; Γέλοι, Ptol.), a warlike tribe who lived along the shores of the Caspian sea, in the district now called *Gilan*, which not impossibly derives its name from them. They were probably allied to, and an offshoot of, the still greater tribe of Cadusii, who occupied nearly the same localities. [CADUSII.] Strabo divides the territory along the S. shores of the Caspian between the Gelae, Cadusii, Amardi, Witii, and Anariacae (xi. p. 508). If, as is likely, this order from W. to E. is correct, the Gelae would be the tribe next to Armenia, and immediately to the E. of the Araxes or *Kür*. Their land is said to have been poor and unfruitful. Little is known of their history as distinct from that of the Cadusii. Pliny considers the Cadusii to be a Greek, and Gelae an Oriental name (vi. 16. s. 18), which would favour the hypothesis that the modern *Gilan* is connected with the ancient Gelae. [V.]

GELBIS, a branch of the *Mosel*, mentioned by Ausonius in his poem (*Mosella*, v. 359):—

"Te rapidus Gelbis, te marmore clarus Erubrus,—
Nobilibus Gelbis celebratus piscibus."

The Gelb may be the *Kill*, which joins the *Mosel* on the left bank, below Augusta Trevirorum (*Trier, Trèves*). [G. L.]

GE'LDUBA, is described by Pliny (xix. 5) as a "castellum Rheno impositum." It is mentioned by Tacitus several times (*Hist.* iv. 26, 32, 36, &c.), from whom we may collect that it was near Novesium. The Antonine Itin. places it on the left bank of the Rhine, on the road from *Cologne* to *Leiden*, between Novesium (*Neuss*) and Calo [CALO]. The distances and the modern name, *Gellep* or *Gelb*, determine the position of Gelduba. [G. L.]

GELLA. [VACCAEI.]

GELO'NI (Γελωνοί, Herod. iv. 108; Plin. iv. 12; Amm. Marc. xxxi. 2. § 14), a people associated with the Budini [BUDINI] by Herodotus (*l. c.*).

Schafarik (*Slav. Alt.* vol. i. p. 186) remarks that, beyond the mention in Herodotus, nothing is known about the Geloni. The later writers appear to have misunderstood his statement while repeating it. It is possible that the name Geloni might be formed out of that of Hellenes among the Slaves and Fins. Such Μιξέλληνες were common enough in the towns upon the Euxine. Schafarik, who believes the Budini to belong to the Slavic family, asserts that the wooden town GELONUS, described as being in the middle of the Budini, is an exact representation of the primitive Slavic towns down even to the twelfth century. (Comp. Grote, *Hist. of Greece*, vol. iii. p. 327.) [E. B. J.]

GEMELLA. [ACCI, TUCCI.]

GEMINAE. [GALLAECIA.]

GEMINAE, in Gallia Narbonensis, a station in the Table on the road from Lucus (*Luc*) over the Cottian Alps. It is an uncertain position. (Walckenaer, *Géog., &c.* vol. iii. p. 45.) [G. L.]

GEMINIACUM, a place in North Gallia on a route in the Antonine Itin. from Castellum (*Cassel*) to Colonia (*Cologne*). The Table has a route from Teruanna (*Thérouenne*) also to *Cologne*. The two roads unite at Nemetacum (*Arras*), whence the road ran through Camaracum (*Cambray*) and Bacacum (*Bavay*) to Vodgoriacum (Voroborgiacum in the Table), and thence to Geminiacum. The distances in the Itin. and the Table do not agree, though they seem to differ less than D'Anville makes them differ. The next station after Geminiacum is Pernicicum, and the next is Aduatuca Tungrorum (*Tongres*), a certain position. The road from *Bavay* to *Tongres* is straight. D'Anville identifies the Geminiacum with *Gemblou*, and he adds that in later times Geminiacum was written Gemmelacum and Gemblacum. Walckenaer makes the place *Vieuville*. It was probably within the limits of Caesar's Nervii. A great number of places in this part of Gallia have the termination *acum*. De Valois (quoted by D'Anville) supposes that the Roman troops mentioned in the Notitia under the name Geminiacenses, and placed "intra Gallias," derived the name from the place. [G. L.]

GENABUM (Κήναβον: *Orléans*), a city of the Carnutes, a Celtic people. Ptolemy (ii. 8. § 13) places the Carnutae along the *Seine;* and he names two cities in their country, Autricum and Cenabum. The latitude in which he places Cenabum is pretty near the truth: and he places Autricum (*Chartres*) correctly, both north and west of *Orléans*. Strabo (p. 191) states, that Genabum (Γήναβον) is on the Liger (*Loire*), about half way between the source and the outlet, or, perhaps, about the middle of the navigable part; a description which agrees very well with the position of *Orléans*. He calls it the emporium of the Carnutes. The Roman Itineraries fix the position of Genabum at *Orléans*. One road runs from Nevirnum (*Nevers*), on the east side of the *Loire*, to Genabum, and thence direct to Lutetia. The distance from Genabum to Lutetia does not quite agree in the Table and in the Antonine Itin.: but both are near enough to show that, if we assume Lutetia to be *Paris*, Genabum must be *Orléans*.

Caesar (*B. G.* vii. 3) mentions Genabum as a town of the Carnutes, in which the great insurrection began in B. C. 52. He describes it (*B. G.* vii. 11) as situated on the *Loire*. The true reading in the passage is—"oppidum Genabum pons fluminis Ligeris contingebat" (not "continebat.") The narrative of Caesar shows that the town was on the north side of the *Loire*, as *Orléans* is: and there was a bridge from it to the south side. Caesar broke into Genabum (B. C. 52) after the insurrection there, set it on fire, and crossed the *Loire* to besiege Avaricum. [AVARICUM.] In his winter campaign against the Carnutes in the next year, he quartered his men amidst the ruins of the town and in the huts.

Under the later empire this town had the name of Aureliani, of which word the name *Orléans* is a corruption. The name "Civitas Aurelianorum" occurs in the Notitia Imp., and *Orléans* was then the chief town of a diocese, distinct from that of the Carnutes. Aimoin, a writer of the sixth century, (quoted by Walckenaer), distinctly states that "Genabus," as he calls it, is Aureliani. Walckenaer also says that a faubourg of *Orléans* "has long had the name of *Génabie*." There are some traces of the Roman walls of *Orléans*, which may have been built as late as the time of the emperor Aurelian,

Digitized by Google

from whom it is conjectured that the place took its new name. [G. L.]

GENAUNI (Hor.; Γεναῦνοι, Strab.) or GENAUNES (Plin.), a fierce and warlike tribe (implacidum genus) of Rhaetia, subdued by Tiberius and Drusus in the reign of Augustus. They lay between the lakes *Maggiore* and *Como* in the modern *Valle di Non*. (Hor. iv. 14. 10; Strab. iv. p. 206; Plin. iii. 20. s. 24.) It has been conjectured that, instead of Βενλαῦνοι in Ptolemy (ii. 13. § 1), we ought to read Γεναῦνοι; and in Florus (iv. 12), instead of "Brennos, Senones," we ought to read "Brennos, Genaunos." (Forbiger, *Geographie*, vol. iii. p. 444.)

GENE'SIUM (Γενέσιον), a place in the Argeia upon the Argolic gulf, S. of Lerna, and N. of the mountain pass, called Anigraea, leading into the Thyreatis. (Paus. ii. 38. § 4.) Pausanias, in another passage (viii. 7. § 2), calls the place Genethlium (Γενέθλιον), and says less correctly that near it was the spring of fresh water rising in the sea, called Dine; whereas this spring of fresh water is to the S. of the Anigraea. [ARGOS, p. 202, b.] Near this place Danaus is said to have landed. [APOBATHMI.] No remains of Genesium have been found, but it must have stood near the village of *Kyvéri*. (Leake, *Morea*, vol. ii. pp. 477, 480; Boblaye, *Recherches, &c.* p. 48; Ross, *Reisen im Peloponnes*, p. 152; Curtius, *Peloponnesos*, vol. ii p. 371.)

GENETES (Γενήτης), the name of a small river and harbour on the coast of Pontus, near Cotyora. (Strab. xii. p. 548; Steph. B. *s. v.*; Scylax, who calls it Γενέσιος.) Some authors also mention a promontory (ἄκρα Γενητάλα) in that neighbourhood (Steph. B. *l. c.*; Apollon. Rhod. ii. 1009; Val. Flacc. v. 148); and Pliny (vi. 4) speaks of a people *Genetae* in the same district. [L. S.]

GENE'THLIUM (Γενέθλιον). 1. A place near Troezen, where Theseus is said to have been born. (Paus. ii. 32. § 9.)

2. In the Argeia, also written Genesium. [GENESIUM.]

GENEVA. Caesar (*B. G.* i. 6) describes Geneva as the furthest town of the Allobroges, and nearest to the borders of the Helvetii. The Rhodanus was the boundary between the Allobroges and the Helvetii; and a bridge over the Rhone at Geneva connected the two territories.

Since the time of Aldus the editors have kept the reading "Geneva" in Caesar's text; but there is hardly any good MSS. authority for it. The best MSS. have "Genua," which reading Schneider has in his edition of the Gallic War. The authority for Geneva is an inscription of doubtful age, which has GENEVENS. PROVINCIA: but two other inscriptions have GENAVENSIBVS. The Greek version of Caesar has Γενούα and Γενούα. (Schneid. ed. Caesar.) In the Antonine Itin. the form Cenava occurs, and Cennava or Gennava in the Table. Neither Strabo nor Ptolemy mentions Geneva. The French form of the name is *Genève*, and the German is *Genf*. After Caesar's time we hear no more of Geneva for about 400 years. There is no authority for naming it Colonia Allobrogum.

The operations of Caesar in the neighbourhood of Geneva are described under the article HELVETII. [G. L.]

GENNESARET. [PALAESTINA; TIBERIAS MARE.]

GE'NUA (Γένουα, Strab., Ptol.: *Eth.* Genuensis: *Genoa*), the chief maritime city of Liguria, situated on the coast of the Mediterranean Sea, at the bight of the extensive bay now known as the *Gulf of Genoa*, but in ancient times called the Sinus Ligusticus. It appears to have been from a very early period the chief city on the coast of Liguria, and the principal emporium of trade in this part of the Mediterranean; an advantage which it naturally owed to the excellence of its port, combined with the facility of communication with the interior by the valley of the Porcifera. Its name, indeed, is not mentioned in history until the Second Punic War; but it then appears at once as a place of considerable importance. Hence, when the consul P. Scipio abandoned the intention of pursuing Hannibal up the valley of the Rhone, he at once returned with his fleet to Genua, with the view of proceeding from thence to oppose the Carthaginian general in the valley of the Padus. (Liv. xxi. 32.) And at a later period of the war (B. C. 205), when Mago sought to renew the contest in Liguria and Cisalpine Gaul, it was at Genua that he landed, and made himself master of that city in the first instance; though he subsequently transferred his head-quarters to Savo, for the purpose of carrying on operations against the Ingauni. (Liv. xxviii. 46, xxix. 5.) He appears to have destroyed the town before he quitted the country; on which account we find (in B. C. 203) the Roman praetor Sp. Lucretius charged with the duty of rebuilding it. (Id. xxx. 1.) From this time Genua is rarely mentioned in history, and its name only occurs incidentally during the wars of the Romans with the Ligurians and Spaniards. (Liv. xxxii. 29; Val. Max. i. 6. § 7.) It afterwards became a Roman municipium, and Strabo speaks of it as a flourishing town and the chief emporium of the commerce of the Ligurians; but it is evident that it never attained in ancient times anything like the same importance to which it rose in the middle ages, and retains at the present day. (Strab. iv. p. 202, v. p. 211; Plin. iii. 5. s. 7; Ptol. iii. 1. § 3; Mel. ii. 4. § 9.) It was from thence, however, that a road was carried inland across the Apennines, proceeding by Libarna to Dertona; and thus opening out a direct communication between the Mediterranean and the plains of the *Po* (Strab. v. p. 217; *Itin. Ant.* p. 294; *Tab. Peut.*), a circumstance that must have tended to increase its commercial prosperity. The period of the construction of this road is uncertain. Strabo ascribes it to Aemilius Scaurus; but from an inscription we learn that it was called the Via Postumia.

A curious monument, illustrative of the municipal relations of Genua under the Roman government, is preserved in an inscription on a bronze tablet, discovered in the year 1506, and still preserved in the *Palazzo del Comune* at *Genoa*. It records that, a dispute having arisen between the Genuates and a neighbouring people called the Veiturii, concerning the limits of their respective territories, the question was referred to the senate of Rome, who appointed two brothers of the family of Minucius Rufus to decide it; and their award is given in detail in the inscription in question. This record, which dates from the year of Rome 637 (B. C. 117), is of much interest as a specimen of early Latin; and would also be an important contribution to our topographical knowledge, but that the local names of the rivers (or rather streamlets) and mountains therein mentioned are almost without exception wholly unknown. Even the position of the two tribes, or "populi," most frequently mentioned in it, the Veturii, and Langenses or Langates, cannot be determined with any certainty:

Digitized by Google

but the name of the latter is thought to be preserved in that of *Langareo*, a castle in the valley of the *Polcevera*; and it is evident that both tribes must have bordered on that valley, the most considerable in the neighbourhood of *Genoa*, and opening out to the sea immediately to the W. of that city. The name of this river, which is called Porcifera by Pliny (iii. 5. s. 7), is variously written Porcobera and Procobera in the inscription, which was itself found in the valley of the *Polcevera*, about 10 miles from *Genoa*. The orthography of that document is throughout very irregular; and the ethnic forms Genuates and Gemenses, as well as Langates and Langenses, are used without any distinction. (The inscription itself is published by Gruter, vol. i. p. 204, and Orelli, *Inscr.*, 3121; and from a more accurate copy by Rudorff, 4to., Berlin, 1842; and Egger, *Reliq. Latini Sermonis*, p. 185.)

On the E. of Genua flows the river now called the *Bisagno*, which must be the same with the Feritor of Pliny (*l. c.*); it is a less considerable stream than the *Polcevera*, and is always dry in summer.

No ancient authority affords any countenance to the orthography of Janua for Genua, which appears to have come into fashion in the middle ages, for the purpose of supporting the fabulous tradition that ascribed the foundation of the city to Janus. This form of the name is first found in Liutprand, a Lombard writer of the tenth century. (Cluver. *Ital.* p. 70). [E. H. B.]

GENU'NII (Γενουνία μοῖρα), in Britain, mentioned only by Pausanias, who states that Antoninus "deprived the Brigantes in Britain of a great portion of their land, because with arms they had overrun the territory of the Genunii, who were tributary to the Romans" (viii. 43. § 4.) [R. G. L.]

GENU'SIUM (*Eth.* Genusinus: *Ginosa*), a town of Apulia, not far from the frontiers of Lucania. It is mentioned by Pliny (iii. 11. s. 16) and by the author of the Liber de Coloniis (p. 262), of whom the latter reckons it among the towns of Calabria; but Pliny is correct in assigning it to Apulia. The site is marked by the modern town of *Ginosa*, which retains the name. It is about 15 miles from the gulf of Tarentum, and 10 from *Matera*. [E. H. B.]

GE'NUSUS (Vib. Seq. p. 10; *Peut. Tab.*: Genesis, Geog. Rav.), a river of Illyricum, upon the lines of which Appius Claudius had his camp when he was employed against Gentius, at the same time that the consul Aemilius was carrying on the war against Perseus in Macedonia, B. C. 168. (Liv xliv. 30.) Caesar (*B. C.* 75, 76; Lucan, v. 462), while attempting to effect a junction with the division of Calvinus, on the frontiers of Epirus and Thessaly, crossed this river.

It is the river now called *Tjerma*, or *Skumbi*. The latter is obviously a corruption of Scampis, at or near *Elbasán*. The branch of the Genusus, upon which that town is situated, may have been named Scampis as well as the town, and by a common kind of change may have superseded the name of Genusus as that of the entire course of the stream below the junction. (Leake, *Trav. in North. Greece*, vol. iii. p. 280.) [E. B. J.]

GEPHYRA (Γέφυρα, Γεφυρεῖς), a place in Attica at the bridge over the Cephissus, on the sacred road from Athens to Eleusis, where the initiated assailed passengers with vulgar abuse and raillery, hence called γεφυρισμοί. (Strab. ix. p. 404; Suid. *s. v.* Γεφυρίζων; Hesych. *s. v.* Γεφυρισταί.)

GEPIDAE, GEPIDI (Γήπαιδες), one of the principal tribes of the Goths. They are first mentioned by Vopiscus (*Prob.* 18). After their first migration, they are said to have settled in the country between the Oder and the Vistula, from which they expelled the Burgundiones. In the fifth century we find them, under their king Ardaric, joining the hosts of Attila, with whom they traversed Gaul, and afterwards settled in Dacia, on the banks of the Danube. As they were regarded as dangerous neighbours to the Eastern Empire, Justinian invoked the aid of the Langobardi against them. The consequence of this was that the Gepidae and their kingdom were destroyed. (Paul. Diac. i. 27; *Excerpt. e Menand. Historia*, pp. 303, 310, 340, 387, ed. Bekker and Niebuhr; Procop. *B. G.* iv. 5; comp. Latham, *Eyeleg to Tac. Germ.* p. lxxxvi.) [L. S.]

GERAE. [Erae.]

GERAEA. [Lusitania.]

GERAESTICUS. [Erae.]

GERAESTUS (Γεραιστός: *Eth.* Γεραίστιος), a promontory of Euboea, forming the south-west extremity of the island, now called Cape *Mandili*. There was a town on this cape, with a celebrated temple of Poseidon, and at its foot there was a well-frequented port, which seems to have been small, though Livy, as Leake observes, calls it "nobilis Euboeae portus." (Hom. *Od.* iii. 177; Herod. viii. 7. ix. 105; Thuc. v. 3; Xen. *Hell.* iii. 4. § 4. v. 4. § 61; Strab. x. p. 446; Steph. B. *s. v.*; Liv. xxxi. 45; Plin. iv. 12. s. 21; Mela, ii. 7; Leake, *Northern Greece*, vol. ii. p. 423.)

GERANDRUS (Γεράνδρος), a town of Cyprus near Soli, where a peculiar kind of marble was found. (Apoll. Dysc. *Hist. Mirab.* xxxvi.; Engel, *Kypros*, vol. i. p. 157.) [E. B. J.]

GERANEIA. [Megaris.]

GERANTHRAE. [Geronthrae.]

GERAR (Γέραρα), a town and country of the Philistines, situated between Cadesh and Shur, where Abraham and Isaac sojourned for many years. (Gen. xx. 1, &c., xxvi. 1, &c.) According to S. Jerome it was situated 25 miles south of Eleutheropolis (Betogabra). (*Onomast. s. v.*; Reland, *Palaest.* p. 804.) Its site was recovered by Mr. Rowlands in 1843, and is thus described: "From Gaza our course was to *Khalasa*; on our way we discovered ancient Gerar. We had heard of it at Gaza under the name of *Joorf-el-Gerár* (the 'Rush' or 'Rapid of Gerár') which we found to lie three hours SSE. of Gaza, within *Wady-Gaza*, a deep and broad channel coming down from the SE., and receiving, a little higher up than this spot, *Wady-es-Sheriah*, from the ENE. Near *Joorf-el-Gerár* are traces of an ancient city, called *Khirlet-el-Gerár* ('The ruins of Gerar'). Our road beyond to *Khalasa* lay along a plain slightly undulated. This plain must be the land of Gerar." (Williams, *Holy City*, vol. i. appendix, p. 464.) [G. W.]

GERASA (Γέρασα: *Eth.* Γερασηνός), a city of Coelesyria, according to Ptolemy (v. 15); reckoned to the Decapolis by Pliny, for it is clear that Gerasa must be substituted for Galasa, as by Harduin (Plin. v. 18.) It is associated with Philadelphia as the eastern boundary of Peraea, by Josephus (*B. J.* iii. 2), and mentioned in conjunction with Pella and Scythopolis (i. 4, ii. 19). But, according to Ptolemy, it was 35 miles from Pella. Its site is marked by the very extensive ruins of *Gerash*, about 35 miles east of the Jordan, at the eastern extremity of the land of Bashan, and on the borders of the great desert of the *Hauran*. It is remarkable, em-

Digitized by Google

sidering the importance of the ruins, that the historical notices are so scanty; but it appears to have attained its celebrity posterior to the classical geographers, as all the fragments of the inscriptions to be found among the ruins bear the name of the emperor Antoninus. It is much to be regretted that the results of the careful survey of this interesting city by Captains Irby and Mangles, in company with Mr. Bankes, have never yet been given to the world. It was first discovered by Seetzen, in 1805—1806, and afterwards described by the enterprising Burckhardt; since which time it has been frequently visited and described by European travellers. The summary description of those most accurate observers Captains Irby and Mangles must suffice in this place; but for fuller particulars the reader may consult Burckhardt (*Syria*, pp. 252—264) and Buckingham (*Travels in Palestine*, caps. xx. xxi.), the former of whom has furnished a general plan of the city, and the latter a more accurate plan, with details of the principal buildings. But the best idea of the extent and grandeur of the ruins may be obtained from the wonderfully accurate reproduction in three engravings from Daguerreotype drawings by Dr. Keith, published in illustration of the 36th edition of his father's work on "The Evidence of Prophecy," in which the principal streets and buildings are clearly to be distinguished. The summary description above alluded to is as follows:—

"It has been a splendid city, built on two sides of a valley, with a fine stream running through it; the situation is beautiful. The town has been principally composed of two main streets, crossing each other in the centre at right angles, like Antinoe. The streets have been lined with a double row of columns, some of which are Ionic and some Corinthian; the pavement is exceedingly good, and there is an elevated space on each side for foot passengers; the marks of the chariot wheels are visible in many parts of the streets. *Djerash*, supposed to be either Pella or Gerasa, but in some respects answering to neither, can boast of more public edifices than any city we have seen. There are two theatres, two grand temples, one, as appears by a Greek inscription, dedicated to the sun, like that at Palmyra, and not unlike that edifice, being constructed in the centre of an immense double peristyle court. The diameter of the columns of the temple is five feet, and the height of just proportions; the capitals are Corinthian and well executed. One singularity in this edifice is a chamber under ground, below the principal hall of the temple, with a bath in the centre. Five or six inferior temples are scattered about the town, and a magnificent Ionic oval space, of 309 feet long, adds greatly to the beauty of the ruins. The scene of the larger theatre is nearly perfect, presenting a singularity very rarely to be met with. There are two grand baths, and also two bridges crossing the valley and river. The temples, and both theatres, are built of marble, but not of very fine sort. Three hundred yards from SW. gate is the Circus or Stadium, and near it is the triumphal arch. The cemetery surrounds the city, but the sarcophagi are not very highly finished; upwards of 230 columns are now standing in the city. There is to the NE., about 200' yards distance, a very large reservoir for water, and a picturesque tomb fronted by 4 Corinthian columns; near it also is an aqueduct. These ruins, being overgrown with wood, are objects of considerable interest. There are numerous inscriptions in all directions, chiefly of the time of Antoninus Pius; most of them are much mutilated; but the one I allude to about the Temple of the Sun, was on the propyleum of that edifice, which has been a grand piece of architecture. On the whole, we hold Djerash to be a much finer mass of ruins than Palmyra; the city has three entrances of richly ornamented gateways, and the remains of the wall, with its occasional towers, are in wonderful preservation." [G. W.]

GERASUS, a river of Dacia (Amm. Marc. xxxi. 3. § 7), which Jornandes (*de Get.* 22) calls GRESSIA, and the Geographer of Ravenna GRESIA. Schafarik (*Slav. Alt.* vol. i. p. 507), who makes it out to be the same as the CUSUS of Tacitus (*Ann.* ii. 63), identifies it with the *Körös*, an affluent of the *Theiss*. [E. B. J.]

GERE'NIA (Γερηνία, Paus., Steph. B. *s. v.*; τὰ Γέρηνα, Strab.; Γέρηνος, Hes. *Fragm.* 22: *Eth.* Γερήνιος), a town of Messenia, where Nestor was said to have been brought up after the destruction of Pylos, and whence he derived the surname Gerenian, which occurs so frequently in Homer. There is, however, no town of this name in Homer, and many of the ancient critics identified the later Gerenia with the Homeric Enope. (*Il.* i. 150; Paus. iii. 26. § 9; Strab. viii. p. 360.) Under the Roman empire Gerenia was the most northerly of the Eleuthero-Laconian towns, and was situated on the eastern side of the Messenian gulf, upon the mountainous promontory now called Cape *Kepháli*. It possessed a celebrated sanctuary of Machaon, which bore the name of Rhodon. Pausanias says that in the district of Gerenia there was a mountain called Calathium, upon which there was a sanctuary of Ceres, and close to the latter a cavern, of which the entrance was narrow, though within there were many things worthy to be seen. (Paus. iii. 26. § 11.) This cavern is undoubtedly the one noticed by Leake, which is situated at the head of a little valley behind the beach of *Kitriés*, and immediately under a rocky gorge in the mountains: at present the entrance is not narrow, but it appears to have been widened to make it more convenient for a sheep-fold, for which purpose it is at present used. Leake observed two or three sepulchral niches in the side of the cliffs about the valley. Two very ancient inscriptions discovered at Gerenia are published by Böckh. (*Corp. Inscr.* no. 13, 42.)

Gerenia is placed by the French Commission at *Zarnáta*, about three miles from the coast, where a castle built by the Franks rests upon very ancient foundations. But Leake observes that the words of Pausanias (iii. 26. § 11) — Ἱερηνίας δὲ ὡς ἐς μεσόγαιαν ἄνω τριάκοντα ἀνέχει σταδίους Ἀλαγονία — leave little or no doubt that Gerenia was a maritime town, and that it is now represented by *Kitriés* on the coast. He further supposes that *Zarnáta* is the site of Alagonia. But since the most ancient towns in Greece were almost universally built at some distance from the coast, it is not improbable that the acropolis and the original town of Gerenia stood at *Zarnáta*, but that the town itself was afterwards removed to the coast. (Leake, *Morea*, vol. i. p. 323, *Peloponnesiaca*, p. 180; Boblaye, *Recherches, &c.* p. 93; Curtius, *Peloponnesos*. vol. ii. p. 286.)

GERGIS, GERGI'THUS, GERGI'THES (Γέργις, Γέργιθος, Γέργιθες: *Eth.* Γεργίθιος), a town in Troas, on the north of the river Scamander, was inhabited, according to Herodotus (v. 122, vii. 43), by descendants of the ancient Teucrians. In the

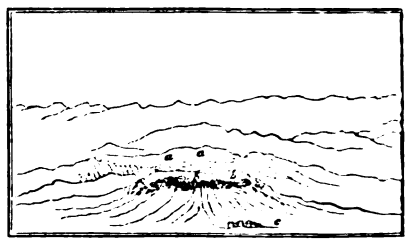
Digitized by Google

time of Xenophon (*Hell.* iii. 1. § 15) Gergis is called a strong place; it had an acropolis and strong walls, and was one of the chief towns of the Dardanian princess Mania. (Comp. Plut. *Phoc.* 18; Liv. xxxviii. 39; Strab. xiii. p. 589; Plin. v. 32; Steph. B. *s. v.*; Athen. vi. p. 256, xii. p. 524.) King Attalus of Pergamus transplanted the inhabitants of Gergis to a place near the sources of the Caicus, whence we afterwards find a place called *Gergetha* or *Gergithion*, near Larissa, in the territory of Cyme. (Strab. *l. c.* 616.) The old town of Gergis was believed by some to have been the birthplace of the Sibyl, whence coins found there have the image of the prophetess impressed upon them. [L. S.]

GERGOVIA. In most texts of Caesar's Gallic War (*B. G.* vii. 9) there is mention made of "Gergovia, a town of the Boii, whom Caesar planted there after their defeat in the Helvetic War, and made dependent on the Aedui." But the name of the town in this passage of Caesar is uncertain, though it may be something like Gergovia. And if Gergovia is the right name, we do not know where the place was.

The Gergovia which Caesar tried to take was a city of the Arverni (*B. G.* vii. 34), the position of which may be determined with tolerable accuracy from Caesar's narrative. After the capture of Avaricum, Caesar went to Decetia (*Décise*) on the *Loire* to settle the differences of the Aedui, after which, taking six legions and some of his cavalry, he set out for the country of the Arverni, and of course he must march southward. His course was along the river Elaver (*Allier*). But before he could reach Gergovia he had to cross the *Allier*. Gergovia, therefore, is south of Decetia, and west of the *Allier*. Vercingetorix, who was on the west side of the *Allier*, broke down all the bridges on the river; and, while Caesar was marching along the east bank, he marched along the left, and kept him in sight. Caesar could not make a bridge over the river in face of his enemy; and the *Allier*, he observes (*B. G.* vii. 35), is generally not fordable before the autumn. Caesar got out of the difficulty in this way. He encamped in a wooded place opposite to one of the bridges which Vercingetorix had broken down, and on the following day he remained there with two legions. He sent forward the other four legions with all his heavy material, distributing these troops in such a way as to present to Vercingetorix the appearance of six complete legions. The four legions had orders to make a long march; and when Caesar judged from the time of the day that they were at their camping ground, he began to repair the broken bridge, of which the lower part of the piles remained entire. This was soon done; the two legions were taken over, and orders sent to the four legions to return. Vercingetorix, discovering what had happened, and not choosing to risk fighting a battle against his will, marched ahead of Caesar as hard as he could, and reached Gergovia (*B. G.* vii. 35). From the place where he crossed the *Allier* Caesar reached Gergovia in five days' march. We neither know where he crossed the river, nor the length of his marches, nor the precise direction; but it was south.

He describes Gergovia as situated on a very high mountain, difficult of access on all sides. (*B. G.* vii. 36.) The camp of Vercingetorix was near the town on the mountain, and around him were encamped, at moderate distances and separately, the forces of the several states under his command. The Gallic troops occupied all the heights which commanded a view into the plain below, and presented a terrible appearance. Opposite to the town and close to the foot of the mountain was a hill, excellent for defence, and with a steep face all round. This hill was held by the Galli, but Caesar saw that if he could take it, his men would be able to cut off the enemy from a large part of their water and prevent them from foraging so freely. The force that the Galli had on this hill was not very great; and Caesar, attacking it in the dead of the night, before any aid could come from the town, got the place and put two legions in it. He also cut two ditches, twelve feet wide, from this hill to his principal encampment, which was in the plain. The road between the two ditches was the communication between the two camps. The mountain of Gergovia is marked *a. a* in the view; the hill in front of it, marked *b, b*, is the small hill which Caesar took, now called *Puy de Jussat*. This view is from Scrope's *Central France*.



PANORAMIC VIEW OF THE GERGOVIAN HILLS.

From this hill that he had occupied, the *Puy de Jussat*, Caesar attempted to surprise Gergovia. He moved his men, a few at a time, from the large camp to the *Puy de Jussat*, while he diverted the attention of the enemy by a feint of attacking the mountain of Gergovia on the north-west side. When all was ready, he ordered his allies, the Aedui, to go up the mountain of Gergovia on the south-east side, while he with his men climbed up the steep side of the mountain which is opposite to the *Puy de Jussat*. The movement was successful, and he got on the plateau of Gergovia and took three of the Gallic camps. But the impetuosity of the Roman soldiers marred all.

They pursued the enemy up to the town wall and the gates, in full confidence that they should take the place at once. One of the centurions with the help of three of his men climbed up the wall, and helped them up after him. The noise brought up the rest of the Galli, who were busy in fortifying that part of the approaches to the city on which they supposed that Caesar had a design, and a fierce fight took place under the walls, to the great disadvantage of the Romans, who were not a match for the enemy in numbers, were on unfavourable ground, and were also exhausted by running and fighting. Caesar sent to T. Sextius, whom he had left on the *Puy de Jussat*, to bring up some cohorts and place them at the foot of the hill on the enemy's right, that if the Romans were driven down the mountain, he might check the pursuit. While the fight was going on the Aedui made their appearance, whom Caesar had ordered to climb the mountain on the right, that is, on Caesar's right, or the south-east side of the mountain. The resemblance of their armour to that of the enemy made the Romans take them for the troops of Vercingetorix, though the Aedui gave

Digitized by Google

the usual signal of being friends. The Romans being now hard pressed, and, having lost forty-six centurions, were driven down the mountain. The tenth, Caesar's favourite legion, checked the hot pursuit of the enemy, and the cohorts of T. Sextius also came to the relief. When the Romans got down to the plain they faced about, and stood ready to renew the fight; but Vercingetorix led his men back to their entrenchments. Caesar lost near 700 men in this affair. Shortly after he left the place for the country of the Aedui, and again crossed the *Allier*, which confirms the fact, if it needs confirmation, that Gergovia was in the hill country on the west side of the *Allier*. (*B. G.* vii. 53.)

There is nothing to be got from the other ancient writers who mention Gergovia. (Strab. p. 191; Dion Cass. xl. 35.) D'Anville (*Notice*, *&c.*) gave some good reasons for fixing on this part as the site of Gergovia. The place still keeps its name *Gergoie*. It is about 4 miles south of *Clermont*, in the *Auvergne*. The summit of the mountain is a flat, somewhat more than an English mile in length from east to west, and about one-third of a mile in width. Excavations have laid open the foundations of walls strongly built, wells lined with cement, and pavements. Broken utensils, medals, and red pottery have also been found. Gallic medals, some gold and silver, but most of bronze, are picked up there, when the earth is stirred for cultivation. Undoubtedly there was once a town here, and it was probably inhabited after the Roman conquest; though Augustonemetum, or *Clermont*, was the capital of the Arverni in the Roman period. [AUGUSTONEMETUM.]

The plan of Gergovia is from Caylus (*Recueil d'Antiquités*, tom. v. pl. 101). There is also a plan of the place in Pasumot (*Mémoires Géog. sur quelques Antiquités de la Gaule*, i. p. 216). Walckenaer (*Géog.*, *&c.* vol. i. p. 341, note) says that the plan of Pasumot is copied from that of Caylus, but with the addition of two or three names. He adds that the commentary of Caylus and that of Pasumot on the plan of Gergovia are both very good; but the researches, and probably the opinions contained in them, are the property of Masson, prior of St. André, who read a *Mémoire* on this subject to the literary society of *Clermont*. The plan shows the *Puy de Jussat*, separated from the hill of Gergovia by a depression. The hill to the west of the *Puy de Jussat* is that from which Scrope's view is taken. On the south is a stream which flows into the *Allier*, and Caesar's camp must have been near it. Another stream flows on the north side of the *Puy de Jussat* and of the mountain of Gergovia; which will explain Caesar's remark about the chance of cutting off part of the enemy's water. The plan shows a descent from the mountain of Gergovia on the NW., near *Romagnat*, and another on the SE., near *Merdogne*. The high ground above *Romagnat* seems to be the point of Caesar's feigned attack. D'Anville says that the mountain of Gergovia is called Podium Mardoniae in a document of the fourteenth century, and there is now a place called *Merdogne* or *Mardogne*, at the foot of the mountain of Gergovia, between it and *La Roche*. He takes the *Puy de Monton*, due south of Gergovia, to be the hill which Caesar got possession of before he attempted to surprise Gergovia.

PLAN OF THE MOUNTAIN OF GERGOVIA AND ITS ENVIRONS.

9. *Montagne de la Serre.*
10. *Puy de Monton.*

Ukert (*Gallien*, p. 399) concluded that Gergovia was SW. of the *Allier;* but that is all that he has done. It would hardly be worth while noticing Reichard's absurd attempt to fix the position of Gergovia, if it had not been accepted by one editor of Caesar (Herzog), who, knowing nothing of geography, has added to his edition of Caesar's Gallic War a map by Reichard, in which Gergovia is placed on the *Loire*, east of *Orléans*. [G. L.]

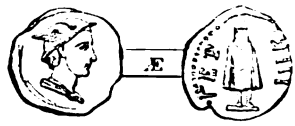
GERIZIM or GARIZIM (Γαριζίν, Γαριζείν). The general situation and appearance of Mount Gerizim are described, and its position identified, in the article EBAL. Josephus calls it the highest of all the mountains of Samaria (*Ant.* xi. 8. § 2), and uniformly places it in the immediate vicinity of Shechem, in agreement with holy Scripture (e. g. *Ant.* v. 1. § 19, xi. 8. § 6, xiii. 9. § 1), so that the observation of St. Jerome, "Samaritani arbitrantur hos duo montes juxta Neapolim esse, sed vehementer errant," — as though only the Samaritans assigned them that position, — is inexplicable. That Gerizim was regarded with special veneration by the Samaritans prior to the erection of the temple, by which the schism was perpetuated, cannot be doubted. The circumstances which led to the erection of the temple are mentioned by Josephus (*Ant.* xi. 8. § 2). Manasseh, the brother of Jaddua the high priest, having married Nicaso, the daughter of Sanballat, was required by the Jews either to divorce his wife, or to withdraw from the priestly office. His father-in-law persuaded him to retain his wife, on the promise that he would procure permission to erect on Mount Gerizim a temple similar to that at Jerusalem. This permission he obtained from Alexander the Great, while engaged in the siege of Tyre, and its erection could scarcely have been completed when Sanballat died (§ 4). From this time forward sacrifices were offered at this temple to the Most High God, until the Samaritans, in order to escape a participation in the persecutions of the Jews under Antiochus Epiphanes, requested of him that their temple might be dedicated to Jupiter Hellenius, according to Josephus (*Ant.* xii. 5. § 5), but, according to the author of the second book of *Maccabees* (vi. 2), followed by

Digitized by Google

Eusebius (*Chron.*), to Jupiter Xenius. Shortly after, in the debate before Ptolemy Philometor (*Ant.* xiii. 3. § 4), the Samaritan advocates ignore its Pagan dedication, and claim Mosaic authority for its erection; failing to establish which, they were put to death. The temple of Sanballat was destroyed by Hyrcanus, the Jewish high priest, after it had stood 200 years (*Ant.* xiii. 9. § 1); and we have no notice of its restoration. Indeed, the allusion of the Samaritan woman (*John*, iv. 20) would seem to intimate that "this mountain" was no longer the seat of their worship; but a temple was afterwards erected, probably over the ruins of the former, — whether for the Samaritans or the Pagans is not clear, as Διὸς ὑψίστου ἀγιώτατον ἱερὸν, in a heathen author, may mean either. (Damasc. *ap.* Phot. *Bibl.* cod. 242. p. 1055.) But there can be no doubt that this is the temple represented on the reverse of the coins of Flavia Neapolis from the time of Titus to Volusianus. The temple is situated on the summit of a mountain, with numerous steps leading to it. (Eckhel, vol. iii. pp. 433, 434; Williams, *Holy City*, vol. i. p. 241, n. 4.) It was in the possession of the Samaritans in the fifth century, when, in A. D. 474, it was transferred to the Christians by the emperor Zeno, in reprisals for the ruin and desecration of five churches, by the Samaritans, in the city of Neapolis. The church dedicated to the Virgin was slightly fortified, and guarded by a small detachment of the large garrison of the city. In the reign of Anastasius it was recovered for a short time by the Samaritans, who were finally ejected by the emperor Justinian, when the mountain was more strongly fortified. (Procop. *de Aedif.* v. 7; Robinson, *Bib. Res.* vol iii. pp. 123—125.) From that time to the present the Samaritans have had no edifice on the site, but for a very long period have been in the habit of sacrificing on the mountain at their three great festivals; a practice which is continued to the present day. "The spot where they sacrifice the passover, seven lambs among them all, is pointed out just below the highest point, and before coming to the last slight acclivity. It is marked by two parallel rows of rough stone laid upon the ground; and a small round pit, roughly stoned up, in which the flesh is roasted." A little beyond this, and higher up the mountain, "are the ruins of an immense structure, bearing every appearance of having once been a large and strong fortress." They are called *El-Kâl'ah* (the castle) by the Samaritans, and are probably the remains of the fortress erected by Justinian. (Robinson, *Bib. Res.* vol. iii. p. 99.) Round a large naked rock, a little to the south of the castle, which is reputed the most sacred place of all, are traces of walls, which may possibly indicate the position of the temple, particularly as the Samaritans profess that this is the place where the ark formerly rested in the tabernacle. Further south, and indeed all around upon this eminence, are extensive foundations, apparently of dwellings, as if ruins of a former city. There are also many cisterns; but all now dry. [G. W.]

GERMA (Γέρμη: *Eth.* Γερμηνός), also called Ἱερὰ Γέρμη, a town of Mysia, situated between the rivers Macestus and Rhyndacus. (Ptol. v. 2. § 14; Steph. B. *s. v.*; Hierocl.) Ruins of this town are still found in the neighbourhood of *Germasloo*. Another town of the name of Germa is mentioned in Mysia, between Pergamus and Thyatira. (*Itin. Anton.*; comp. Arundell, *Seven Churches*, p. 278.)

The following coin belongs probably to the former of these two places. The letters on the obverse on the right of the standing figure ought to be MHN.



COIN OF GERMA IN MYSIA.

The third and most celebrated place of this name was situated in Galatia, on the site of the modern *Yerma*, between Pessinus and Ancyra. Ptolemy (v. 4. § 7) calls it a Roman colony, which title is confirmed by the coins found there, and which seems to have been conferred upon it by Vespasian or his sons, for none of these coins are older than Domitian. From ecclesiastical writers we learn that Germa was an episcopal see of Galatia Salutaris, and a Byzantine writer (Theophan. *Chron.* p. 203) informs us that at a later period Germa took the name of *Myriangeli*. (Comp. Hamilton's *Researches*, i. p. 442.) [L. S.]

GERMA'NIA (ἡ Γερμανία: *Eth.* Germanus, Γερμανός: *Adj.* Germanicus, Γερμανικός: Germany; *French*, Allemagne; *Ital.* Alemagna; *Germ.* Deutschland or Teutschland), one of the great divisions of continental Europe, acts no very prominent part in the history of antiquity until the period of the Roman empire; but during the last period of the Western empire it attracted the attention of the civilised countries of Southern Europe, by sending forth hosts of barbarians, who, in the end, overthrew the empire, established new dynasties in the conquered countries, and infused a better blood into the effete inhabitants of the south-west of Europe.

I. *Name.* — Tacitus (*Germ.* 2) states: "Germaniae vocabulum recens et nuper additum, quoniam qui primum Rhenum transgressi Gallos expulerint, et nunc Tungri tunc Germani vocati sint. Ita gentis nomen, non gentis, evaluisse paulatim, ut omnes primum a victore ob metum, mox a se ipsis invento nomine Germani vocarentur." According to this passage, the name Germania had been recently given to the whole country; the name itself had been known long before his time (Cic. *in Pis.* 33. *Fam.* xi. 6; Vell. Pat. ii. 67), though we are, perhaps, not quite warranted in assuming that it occurred in the Capitoline Fasti as early as the year B. C. 222 (Niebuhr, *Lect. on Rom. Hist.* vol. ii. p. 65, note 16). Tacitus further regards *Germani* as a proper name of the tribe afterwards called Tungri, and not as an appellative, and intimates that from this one tribe it was afterwards transferred to the whole nation. But others among the ancients (Strab. vii. p. 290, iv. p. 195; Vell. Pat. *l. c.*; Eustath. *ad Dionys. Per.* 285) believed that *Germani* was the well-known Latin appellative which was given to the Germans to describe them as "brothers" of the Gauls or Celts. This latter view, which has been adopted by some eminent Germans of modern times, was probably the reason which often led the ancients to confound Germans and Celts, whence Virgil calls the Arar a river of Germany (*Eclog.* i. 63); and the Germans on the east of the Rhine are sometimes called Celts. (Dion Cass. liii. 12, lxxi. 3; Diod. Sic. v. 31.) The French and Italian names (*Allemagne* and *Alemagna*) are derived from the German tribes of the *Alemanni*, *Alamani*, or *Alamanni*, who, as their name indicates (*Alle Männer*), formed a confederation of several tribes on the upper Rhine and Danube, and

Digitized by Google

from whom the Gauls transferred the name to the whole German nation; for these Alemanni made frequent inroads into the Roman dominion in Gaul. They are first mentioned by Dion Cassius (xxvii. 14: Ἀλαμαννοί) on the occasion of a war which Caracalla had to carry on against them. Some modern inquirers derive the name Germani from the Persian, referring to the Persian tribe called Germani (Herod. i. 125), and to the Persian *Kerman* (Caramania), that is, hospitality; their view is supported by the resemblance existing between the manners and customs of the ancient Germans and those of the Persians. But if it were true that the Germans brought the name with them from Asia, it would have been indigenous among them; but down to the present day, neither any German tribe, nor the whole nation, ever called itself German, but always *Deutsch* or *Teutsch* (Gothic *Thiudiskô*, old High German *Diutisc*, and Anglo-Saxon *Theodisc*). The same remark applies to the derivation of the name from the German *Ger*, *Gwer*, *Heer*, or *Wehr*, which has been proposed by some. Surely the Romans would not have called the nation by a name derived from a German root that was unknown to them, seeing that the Germans themselves did not use that name. The probability is that the name *Germani* is of Celtic origin, and that it had come into general use among the Celts in Gaul before the time of Caesar, who there heard it applied to the whole nation dwelling on the east of the Rhine. In Haupt's *Zeitschrift für Deutsche Alterthümer* (vol. v. p. 514), H. Leo has proposed a very probable etymology from the Celtic, laying great stress upon Tacitus's expression, *ob metum*. He derives the name from the Gaelic *gair* or *gair* (to cry out), and *gaire*, *gairm*, *gairmeann* (a cry); so that Germanus would signify something like the Homeric *βοὴν ἀγαθός*, a fierce, terrible warrior. Thus much, then, is certain, that *Germani* was the name given to the people by their neighbours, and for a time the Germans themselves may have used it in their intercourse with Celts and Romans; but it never was adopted by the Germans so as to supersede their own name. *Teutones*, the name of the German hosts invading the south of Europe in the time of Marius, contains indeed the same root as *Deutsch* or *Teutsch*, but it does not follow that this was originally the common name for the whole German nation; it is, on the contrary, almost certain that, in the earliest times, the Germans had no name comprising all their different tribes. Our view of the Celtic origin of the name Germani is confirmed by the fact that the Belgae (Celts) applied it even to the inhabitants of Mt. Arsenna, and that the Celtiberians in Spain designated by it the Oretani in Spain (Caes. *B. G.* ii. 3, 4, 6; Plin. iii. 4), neither of which belonged to the German stock.

II. *Boundaries, Extent, and Divisions.* — The ancients are pretty well agreed in fixing the boundaries of Germany. In the west, it was bounded by the Rhine; in the north-east, by the Vistula (*Weichsel*) and the Sarmatian mountains, or the Carpathians; in the south, by the river Danubius; and in the north, by the ocean (Mare Germanicum, Oceanus Septentrionalis) and the Baltic (Mare Suevicum). Tacitus (*Germ.* 1) and others are of opinion that the eastern frontier towards Sarmatia and Dacia cannot be accurately fixed. In the north, ancient Germany extended much farther than at present, as it comprised the countries now called Denmark, Sweden, and Norway. In the south, the frontier was not the same at all times; for, according to Pliny (iii. 23; comp. Plin. *Paneg.* 14), Germania extended as far as the foot of the Alps, which separated it from Italy; but it is well known that in Caesar's time the country from the Alps to the Danube, and even further north, was still inhabited by Celts, who must afterwards have been subdued or expelled by the Germans. On the west, the Rhine is distinctly said by Caesar to form the boundary between Gaul and Germany; but from his own account, it is clear that this is only a very loose statement. The Belgae in the north of Gaul (Belgium and Holland) were a mixed race of Cymri (not Gauls, as Caesar states) and Germans; but the frontier between the Belgae and Germans is extremely uncertain, and in regard to some tribes, such as the Menapii, it is even doubtful as to whether they were Germans or Cymri. The Treviri, moreover, were ambitious to be regarded as Germans, and modern Alsatia was occupied by Germans. Hence we are probably justified in assuming that, about the time of Augustus, the western bank of the Rhine was as much occupied by Germans as it is at present. This view is also confirmed by the fact that the Romans applied the name *Germania* to the western banks of the Rhine, calling the southern part *Germania Superior*, and the northern *Germania Inferior*. Hence Tacitus divides Gaul into six provinces, two of which are formed by the two Germaniae just mentioned. [GALLIA, p. 967.] This part of Germany, which was conquered by the Romans during the reigns of Augustus and Tiberius, was distinguished from Germany on the east of the Rhine, which bore the name of *Germania Magna* (Γερμανία ἡ μεγάλη, Ptol. ii. 11. § 6), and *Germania Transrhenana*, or *Barbara* (Caes. *B. G.* iv. 16, v. 11; Tac. *Hist.* ii. 76; Capitol. *Maximin.* 12; Eutrop. vii. 5; Vopisc. *Prob.* 13; Am. Marc. xviii. 4). Regarding the extent and magnitude of ancient Germany, we have the following statements, which, however, greatly differ from one another, and cannot be accepted without caution. According to Strabo (iv. p. 193), the breadth of the country along the Rhine amounted to 3000 stadia; according to Agrippa (ap. Plin. iv. 25), the distance from the Danube to the coast of the ocean was 1200 Roman miles; while, according to another statement in Pliny (xxxvii. 11), the distance from Carnuntum on the Danube to the seacoast amounted only to 600 Roman miles; and the length along the southern frontier (including Rhaetia and Noricum) was computed at 696 miles (Plin. iv. 28). Along the northern frontier, the distance from Asciburgium to the mouth of the Vistula was estimated at 1350 stadia (Marcian. Heracl. p. 99); while, according to the same authority, the coast from the mouth of the Rhine to that of the Vistula amounted to from 10,000 to 13,000 stadia. Ptolemy, the principal authority on the topography of Germany, places the country between 28° and 44° of longitude, and between 47° and 59° of northern latitude, and enumerates within this extent 68 tribes, 94 towns, 7 chains of mountains, and 14 rivers.

III. *Physical Aspect of the Country.* — Although at a very early time Phoenician merchants sailed through the German ocean into the Baltic for the purpose of obtaining amber, still no information about the country was communicated to the inhabitants of Southern Europe, all the useful geographical discoveries made by the Phoenicians being kept secret, from commercial jealousy. The voyage of Pytheas of Marseilles (about B. C. 330), who likewise visited the Baltic, yielded little information

Digitized by Google

about Germany; and it was not till the time of Caesar, when the Romans commenced their military operations against the Germans, that the nature of their country became better known. The Romans describe Germany as a wild and inhospitable country, covered with forests and marshes, and of a melancholy aspect (Tac. *Germ.* 2; Mela, iii. 3); cold winds are said to blow constantly, and the barren soil to be covered during the greater part of the year with snow and ice (Senec. *de Prov.* 4; Herodian, vi. 7). The country was reported to produce little corn and luxuriant grass (Plin. xvii. 3), but no fruit-trees. The immense forests were the abodes of a great variety of wild beasts, some of which appear to have since become extinct. (Caes. *B. G.* vi. 25.) There can be no doubt that these statements contain much that is true; but it seems equally certain that they are in many points a little exaggerated, the Romans being anxious to account in some honourable way for their repeated failures in attempting to make themselves masters of the country. At present, the draining of marshes, the clearing away of extensive forests, and the improved cultivation of the land, have produced changes in the climate which have led some modern writers unjustly to charge the ancients with monstrous exaggeration. The north of Germany, as Tacitus correctly remarks, is flat and marshy, and mountains exist only in the south. (*Germ.* 5, 30.) Almost all the mountains are called by the name *Silvae*, showing that they must have been thickly wooded. The most celebrated of these mountains, which are discussed in separate articles, are the HERCYNIA SILVA, ABNOBA, ALPII MONTES, BACENIS SILVA, MELIBOCUS MONS, GABRETA SILVA, ASCIBURGIUS MONS, TAUNUS, SEVO, LUCUS BADUHENNAE, NAHARVALORUM SILVA, SEMNONUM SILVA. The principal rivers of Germany are the RHENUS, DANUBIUS (Ister), VISTULA, AMISIA, VISURGIS, ALBIS, VIADUS. Among the lakes, the most remarkable is the BRIGANTINUS LACUS; besides which, many lakes are mentioned near the mouth of the Rhine, between this river and the Amisia, and several extensive marshes are noticed by Pomponius Mela (iii. 3).

IV. *Productions.* — Among the wild beasts inhabiting the forests, none appeared so formidable to the Romans as the *alces* and *uri*; but besides them, we hear of bears, wolves, lynxes, wild cats, wild boars, stags, and deers: the oxen were of small size, and had small horns, but the cows, especially in the south, yielded great quantities of milk. The horses also were small, and not handsome, but strong, and capable of undergoing great hardships. The dogs, especially those of the Sigambri, were thought well suited for the chase. Pigs were bred in great quantities, and hams formed a considerable article of commerce for exportation. (Strab. iv. p. 301.) Sheep and goats were bred for food and clothing. The most common of the feathered tribes were eagles and geese; bees and fishes abounded in the forests and rivers. The extensive forests furnished plenty of wood, especially oak and beach-wood; but notwithstanding this, the inhabitants also used peat as fuel. Many of the trees were of gigantic size; fruit-trees existed, indeed, but had not yet been improved by cultivation, which seems to be the meaning of *poma agrestia* in Tacitus (*Germ.* 23; comp. with 10). Although the country is described as, on the whole, not fertile, still we are informed that it produced wheat, barley, oats, flax, turnips, large radishes, asparagus, and beans. Oatmeal, prepared, as in Scotland, into a sort of porridge, was an article of food very extensively used; and Tacitus (*Germ.* 23) informs us that a beverage (beer) was prepared from wheat and barley. Among the metals, we hear of silver, iron, copper, and calamine; crystals, onyxes, turquoises, opals, and even diamonds, were found in the mountains of Germany. The north coast was rich in salt, but one of the products of the north was so celebrated in antiquity as the amber (*electrum*), and it was this substance which first drew the attention of the Greeks and Romans to the coasts of the Baltic. The cultivation of the vine is said to have been introduced into Germany by the Franks during the 6th century of our era; but on the left bank of the Rhine, on the Moselle, and in Rhaetia, the vine had been cultivated at a much earlier period. (Vopisc. *Prob.* 18; Aur. Vict. *Caes.* 37; Suet. *Aug.* 7; Strab. iv. p. 206.)

V. *Population and Inhabitants.* — Although Germany was covered with extensive marshes and forests, still there is good evidence that the country was thickly peopled; though, owing to the constant wars and migrations, the population was in many parts very fluctuating. The tribe of the Suevi sent every year into the field an army of 100,000 men (Caes. *B. G.* i. 37, iv. 1), and Ariovistus, their king, crossed the Rhine with an army of 120,000 men (Caes. *B. G.* iv. 2). The Usipetes and Tencteri together amounted to 430,000. (Ib. iv. 15.) Marbodus kept an army of 74,000 men (Vell. i. 109); in the war with the Sigambri, the Romans carried off 40,000 men (Suet. *Tib.* 9); and in the war of the Chamavi and Angrivarii against the Bructeri, 60,000 men are said to have been slain. (Tac. *Germ.* 33.) But all these facts do not enable us to form even an approximate idea of the exact population of Germany in ancient times. It would seem, however, that in consequence of the mountains and forests in the south, the population of that part was less numerous than in the north and east.

The Germans considered themselves as autochthones, that is, as the offspring of the land they inhabited (Tac. *Germ.* 2, 4); but there can be no doubt that they, like all the nations of Europe, had immigrated from Asia, though neither history nor the national legends of the Germans contain the slightest allusion to such an immigration. But what history conceals from us is revealed in the language of the people, which bears the strongest organic resemblance to the languages spoken in India and Persia. The German language belongs to what is now generally termed the Indo-European family of languages. Hence we must infer that at some remote and unknown period the Germans issued from a country of Upper Asia, and passed by Mount Caucasus and through the countries in the north of the Euxine and the Caspian sea, into Europe. They accordingly belonged to the same great stock of nations as the Greeks, Romans, and Celts, to the last of which they are said to have borne a very marked resemblance in stature, character, and manners. (Strab. iv. p. 200.) The Germans are universally described as very tall and handsome men, of a white complexion, with blue eyes, and fair or red hair, which they took great care of, and the colour of which they rendered still more bright by a peculiar kind of soap. The red hair of the Germans formed a considerable article of commerce with the Romans during the imperial period, for it was a fashion with the Roman ladies to wear peruques or curls of red hair. Men as well as women wore long hair; but they shaved their beards, though

Digitized by Google

some let their moustaches grow. The blue eyes peculiar to the Germans, which generally have a soft expression, are nevertheless described as full of defiance. The women were almost equal to the men, both in strength and in size; a fact which is confirmed by skeletons found in tombs of ancient Germans. As regards the classification of the inhabitants of Germany, even the ancients divided them into several groups. Tacitus (*Germ.* 2) mentions three great groups, viz., the *Ingaevones*, on the ocean; the *Herminones*, in the interior; and the *Istaevones*, in the east and south of Germany. These three names are said to have been derived from the three sons of Mannus, the ancestor of all the Germans. Pliny (iv. 28) indeed mentions five groups of German tribes, adding to those just mentioned the *Vindili* as the fourth, and the *Peucini* and *Basternae* as the fifth; but this classification seems to have arisen from a mistake: for Zeuss, in his work to be referred to hereafter, has shown that the Vindili belonged to the Herminones, and that Peucini and Basternae are only names of individual tribes, and not of groups of tribes. But how the numerous tribes of Germany are to be arranged under these three groups is a question which it is impossible ever to answer with any degree of certainty: and Tacitus himself appears to have felt the difficulty; for, in his account of the several tribes, he omits to mention to which group they belonged. As the Scandinavian peninsula is regarded as a part of Germany, its inhabitants, bearing the general name of *Hilleviones*, and again divided into *Suiones* and *Sitones*, must be added as a fourth group.

VI. *Mode of Life and Character of the People.* — The physical constitution of the Germans was, no doubt, in a great measure the result of their way of living. Their commerce was inconsiderable, and they depended chiefly on the breeding of cattle, the chase, and war, pursuits which created in the people an unquenchable love of freedom, and made them impatient of foreign sway. Tacitus (*Germ.* 14) speaks of the faithfulness and trustworthiness of the Germans; but other statements lead to a somewhat opposite opinion, and we are probably not far wrong in assuming that the ancient Germans, like all other barbarians, had a considerable degree of honesty, combined with cunning and falsehood.

The dress of the Germans, in early times, was extremely simple, and almost the same for both sexes; children up to the time of maturity are said to have worn no dress at all, not even in winter. The chief article of dress of men was a cloak, sometimes made of woollen cloth, and sometimes consisting of the skin of an animal. The women wore close-fitting garments of linen, which they spun and wove themselves, and which were sometimes adorned with purple stripes; the arms and part of the bosom were generally uncovered. In later times, men also, especially nobles, wore similar close-fitting garments, cloaks adorned with gold, shoes, and a kind of coat reaching down to the knee. But the German attached much more importance to his arms, which he even took with him into the grave. The defensive armour was at first very simple and defective, for few only had helmets and breast-plates; the place of the former was often supplied by the skin of the head of some animal, on which the horns were left standing: most men had no other defensive armour but a long shield, made of wood or wicker-work, covered with leather. The most ancient weapon of attack was a kind of hammer or axe made of stone; for which, at a later period, brass was substituted. Next in importance to the axe were the spear (*framea*), club, sword, slings, and bows and arrows. The habitations of the Germans were equally simple, forming shapeless masses, probably of clay, covered with straw or turf; caverns covered with dunghills served as store-houses, and also as places of refuge in winter. Such houses generally stood isolated in the fields and forests, near a spring or brook, and were very rarely united into villages or hamlets. Some tribes, which led a half nomadic life, appear to have had no regular houses at all.

The principal article of food consisted of flesh which was cooked or roasted, but often prepared only by being beaten or kneaded, or dried and smoked; besides this, the Germans lived on milk, butter, cheese, eggs, fishes, and especially porridge made of oatmeal, and beer. Generally speaking, the Germans were moderate in their diet, but they were particularly fond of social meals, and no other nation ever was more hospitable to strangers; but it is at the same time well attested that they were given to excessive drinking, and no festival of a public or private character passed without great excesses in drinking (generally beer, rarely wine), which very often led to quarrelling, fighting, and even murder. For this reason, the women seem to have withdrawn as soon as the drinking commenced. The ancient Germans were as fond of singing as their modern descendants; for we are told that they sang at weddings and funerals, as well as on going out to battle. They were also much given to gambling, in which they would sometimes go so far as to stake their personal freedom, when all their property was lost; in such a case, the loser became the slave of the winner. Marriages were not contracted till a very mature age, and required the sanction not only of the parents, but of all the kinsmen, and, instead of receiving a dowry, the bridegroom had to present one to his bride. Women were probably nowhere so much honoured as among the Germanic nations; and it is owing to the influence exercised by the Germans upon all the nations of Europe, combined with that of Christianity, that women, during the middle ages, enjoyed the respect and esteem with which they are still regarded by all truly civilised nations. The ancient Germans entertained the greatest reverence for women, for they believed them to possess a certain divine and prophetic power; the women not only conducted all the domestic affairs, but also accompanied the armies on their military expeditions, attended to the wounded, cheered on the wavering to fresh deeds of valour, and sometimes even took an active part in the battles. The children grew up without much care on the part of their parents, and thus became accustomed to endure all kinds of hardship from their very infancy. Young men at the age of 20 received their armour from their father or some kinsman in the public assembly, and from that moment they enjoyed all the rights of a citizen.

In times of peace the Germans generally indulged in ease and laziness, leaving the care of domestic concerns and of their fields to the women, old men, and slaves. All the cultivated land was regarded as public property, and was annually distributed anew by the magistrates among the families, or was let out to farm. In regard to other occupations, the Germans were distinguished for their potteries, and also worked as carpenters, masons, and smiths, while the women were engaged in spinning and weaving. In the interior of the country commerce was insignificant; but on the Rhine and the Danube it was

Digitized by Google

rather active, the more important articles for exportation being amber, goose-quills, furs, hides, hams, red hair, soap for dyeing the hair, and slaves. In return for these they received wine, trinkets, and probably also arms. The Germans had no coinage of their own; but a vast quantity of Roman silver coins was in circulation among them. Navigation was carried on by sea as well as on the lakes and rivers, and their vessels consisted of simple canoes, or boats covered with leather, or regular ships. But of all the occupations none was in greater favour with the Germans than war, in which all men capable of bearing arms took part. A regular system of tactics was unknown; but their battle order was generally formed by the men arranging themselves according to their tribes, families, or clans. Their cavalry was not numerous. The first attack upon an enemy was generally very ferocious; but when a war was protracted, the men generally lacked perseverance, and became desponding. The booty made in war, and sometimes the prisoners also, were sacrificed to the gods. No kind of death was considered more desirable than that on the field of battle; to die on a sick bed was so much dreaded, that, among some tribes, sick persons and old men caused themselves to be killed rather than wait for their natural dissolution.

VII. *Religion.* — On this subject the Greeks and Romans have left us no connected information, and what they do state is not always trustworthy: for sometimes they only give the name of a German divinity, and endeavour to identify the same with some one of their own gods; or they call the German divinities at once by names of their own gods, without mentioning the names they bore among the Germans. The ancients, however, are agreed in stating that the Germans worshipped several divinities, among whom they mention the sun, the moon, the stars, Tuisco the ancestor of their whole race, and his son Mannus. Besides these, we hear of Mercury (probably Wodan or Odin), who is said to have been the most revered among all their divinities; of Isis (probably Freia, the wife of Wodan); Mars (no doubt the German Tyr or Zio); Nerthus, the mother of the gods; and the two Alces (compared with Castor and Pollux). Jupiter (i. e. Thunar, Thor, the god of thunder) is not mentioned by any earlier writer than Gregory of Tours (ii. 29). Besides these principal divinities, which, however, do not appear to have been equally worshipped among all the tribes of Germany, they believed in a variety of secondary and inferior deities, partly of a kind and partly of a malignant nature, and almost every tribe had its own peculiar divinities of this sort. The form of worship was very simple; and both Caesar and Tacitus assert that the Germans had neither statues nor temples. But this statement is opposed to facts which come out at the conversion of the Germans to Christianity, when the destruction of pagan idols is frequently spoken of. In regard to temples also, the statement must not be taken in too strict a sense; for Tacitus himself (*Ann.* i. 51) expressly mentions a temple of a goddess Tanfana among the Marsians, and the Christian missionaries of a later period called upon the Germans to change their heathen temples into Christian churches. But it is nevertheless true that many of their gods were worshipped in the open air, in groves and forests, on mountains and rocks. Priests are indeed mentioned among the Germans; but a father was always entitled in the circle of his family to assume the functions of a priest. The priests were at the same time the highest civil functionaries next to the king: they ascertained the pleasure of the deity in all public undertakings, and executed the sentence of death upon all persons guilty of high treason; they moreover presided at the popular assemblies, and kept the national standards. There also existed prophetic priestesses, who foretold the future from the intestines of victims, from the blood of the slain prisoners of war, from the murmuring of the waves, and the like. The sacrifices offered to the gods were often extremely splendid, but we likewise hear of human sacrifices. Respecting their religious festivals little is known, and the little that is known belongs to a period beyond the limits of this work.

VIII. *Political Institutions.* — The various tribes inhabiting Germany were free and independent of one another, and the territory inhabited by each was divided, apparently for military purposes, into districts or *pagi*. Each separate tribe was governed by a king, who was elected from among the nobles in an assembly of all the free people: this king, however, was in the earliest period only the highest magistrate in times of peace; for, in case of war, special commanders were chosen, to whom the supreme civil power was likewise entrusted. The kingly power was altogether very much limited by the nobles and the popular assembly, the latter having the power even of deposing the king. Each *pagus* had its own magistrate (*princeps*), who at the same time administered justice, in which he was assisted by a college of 100 men. There were also tribes which had no kings or central government at all, but in which the pagi were governed by the *principes* alone.

The whole body of the German nations was generally divided into four classes or ranks. 1. The nobles (*nobiles*, *proceres*, *optimates*), probably consisting of families whose ancestors had particularly distinguished themselves by their valour, or had acquired great influence from their possession of extensive estates. The kings, and probably also the *principes* of the *pagi*, were chosen from these nobles exclusively. Clients of the nobles are also mentioned. 2. The *freemen* (*ingenui*) formed the real strength of the nation; freemen and nobles alone had the right to possess hereditary landed property, and to change their place of residence according to their own pleasure; they were obliged to attend the popular assembly, and serve in the national armies. 3. The *freedmen* (*liberti* or *libertini*) formed a kind of middle class between the freemen and the slaves: they might, however, purchase their freedom, and were obliged to perform military service, but were not allowed to take part in the popular assemblies: they had no landed property, but tilled the lands of others as farmers. 4. The *slaves* (*servi*) had no rights at all, but were mere tools in the hands of their masters, without whose consent they could not even marry, and who might even put them to death without fear of punishment. It would appear, however, that the slaves were, on the whole, treated very mildly, and lived under far more advantageous circumstances than the slaves of the Romans. (Tac. *Germ.* 25.) They had their hair cut short, were not allowed to bear arms or to serve in the armies, but were employed as domestic servants, field-labourers, or herdsmen. All slaves were either born in the house of their master, or were prisoners of war, or they had been degraded to their position by judicial verdict, or, lastly, they had been purchased.

Digitized by Google

The popular assembly, consisting of the nobles and freemen, deliberated upon all the more important national affairs; in it the kings and other magistrates were elected, capital offences were tried, &c. The meetings were either regular and stated, especially at the seasons of the new moon and full moon, or they were extraordinary meetings convened for certain emergencies. A considerable time often elapsed before all the men arrived at the place of meeting, which was generally near some sacred grove, or on a mountain. The men appeared in full armour, and a priest conducted the business; such a meeting seldom separated without a symposium. Justice also was administered in the open air, both on stated and on extraordinary occasions. All trials were carried on publicly and *viva voce*: the judges tried the cases; but the verdict was given by juries. In doubtful cases a question was sometimes decided by lot, or by a judicial single combat. Priests were generally present at all the trials, which commonly ended with a drinking bout. In the earlier times the Germans had no written laws; and it was not till after the migration of nations, when all relations had become changed, that various codes of laws, such as the Salian, Ripuarian, Thuringian, Burgundian, and others, were drawn up. The punishments inflicted were intended as a compensation to the injured party, and consisted of money, horses, cattle, and other fines, even in case of murder; it was only in cases where the condemned was unable to pay or make amends that he was put to death. No freeman could be subjected to corporal punishment, except when it was inflicted by a priest in the name of the deity. Persons guilty of high treason against their country, however, cowards, and such as were guilty of unnatural lust, were hanged or drowned in marshes. Exile and captivity are mentioned only as punishments for political offences. The right of a family to take bloody vengeance, if one of its members had been murdered, is clear from Tacitus (*Germ.* 21).

IX. *Language and Literature.*—It has already been remarked that the language of the Germans belongs to the Indo-European family, and accordingly is a sister of the Greek, Latin, and Celtic. Its sound to the ear of the Romans was harsh and terrible: it was of course little cultivated; and the art of writing can scarcely have been known to the Germans at the time of Augustus, except, perhaps, among the tribes occupying the left bank of the Rhine. The laws, legends, and history were propagated only as traditions from mouth to mouth. National songs in praise of Tuisco, Mannus, and of the glorious deeds of ancient heroes, are expressly mentioned; and the last were termed *barritus* or *barditus*, and were generally sung before the commencement of a battle. Writing, as has been said before, was little practised by the Germans. Tacitus (*Germ.* 3) indeed speaks of German monuments with inscriptions in Greek characters on the frontiers of Rhaetia; but as Rhaetia was inhabited by Celts, the inscriptions were in all probability Celtic. Certain it is that the Germans had no alphabet of their own; when they began to write at all, they unquestionably adopted the Celtic characters, and especially the secret symbols of the Druids, called *runic*. At a later period they adopted the Latin alphabet, ornamented in the Gothic fashion, which may still be seen in the old English black letter, and in the modern German alphabet. [Comp. GOTHI.]

X. *History.*—If we set aside the doubtful reading of the Capitoline Fasti for the year B. C. 220, the first authentic record of events connected with German tribes is met with in the accounts of the war against the Cimbri and Teutones or Teutoni, for the latter were as decidedly Germans as the Cimbri were Celts or Cymri. But we have no connected history of the German nations until the time of Julius Caesar, from whom we learn that in B. C. 72 the aid of king Ariovistus was called in by the Arverni and Sequani against the Aedui in Gaul. On that occasion Ariovistus crossed the Rhine with an army of 120,000 Germans, and subdued the greater part of Eastern Gaul. But he was defeated by Caesar in the country of the Sequani, and driven back across the Rhine. Caesar himself crossed the same river twice, in B. C. 55 and 54, by means of bridges but he was not able to maintain himself in Germany In B. C. 37, Agrippa transplanted the Ubii, who were hard pressed by the Suevi, to the western bank of the Rhine, that they might serve there as a bulwark against the attacks of the other Germans upon Gaul: this plan, however, was not always successful; whence Nero Claudius Drusus, the step-son of Augustus, in B. C. 12, commenced his expeditions against the Germans from the insula Batavorum. During these undertakings Drusus advanced as far as the river Albis (*Elbe*); but he was killed by a fall from his horse in B. C. 9. The command of his forces was then undertaken by his brother Tiberius (afterwards emperor), who, as well as Domitius Ahenobarbus, was on the whole more successful than Drusus; for he actually compelled the part of Germany between the Rhenus and the Visurgis for a time to submit to the dominion of Rome, until after some years, A. D. 9, Arminius, prince of the Cherusci, who had lived at Rome and was acquainted with the Roman mode of warfare, defeated the Romans in the Teutoburg forest, and put an end to the Roman dominion in that part of Germany. About the same time Marobodnus, the Marcomannian, held out manfully against the Romans, until disturbances in the south obliged them to conclude peace. Germanicus, the son of Drusus, who was then sent out to wipe off the disgrace of the Roman arms, succeeded in gaining some advantages over the barbarians, but he was unable to regain the ascendancy in Western Germany. Scarcely, however, had the wars with the Romans terminated, than a violent commotion broke out among the Germans themselves, in which they lost their ablest chiefs, and which caused several German tribes to be transplanted into the Roman dominion. The consequence of these things was, that the Romans now established themselves in the south-western parts of Germany. During this period, from A. D. 16 to 68, the AGRI DECUMATES were formed on the east of the Upper Rhine, and on the north of the Upper Danube. This Roman part of Germany was then separated from and protected against the rest of the country in the north by a wall and a ditch running from the Rhine near Cologne to Mount Taunus and the Odenwald, and from Lorch to Ratisbon. The great revolt of the Batavi in A. D. 70 and 71, in which the Western Germans also took part, was followed by repeated wars with several German tribes, until at last, in the reign of M. Antoninus the philosopher, the great Marcomannian war broke out on the Danube; many other German tribes joined the Marcomanni, and the enemy even advanced into Italy, where they laid siege to Aquileia. M. Antoninus had to carry on the war until the end of his reign, and his suc-

Digitized by Google

cessor Commodus, in A. D. 180, purchased a peace of the Germans, and gave up the forts which had been built along the Danube. Soon afterwards it was found that the Roman dominion on the western bank of the Rhine also was not safe; for several German tribes, especially the Alemanni and Franks, harassed Gaul by frequent invasions, until in the end Germany poured forth its hosts across the Rhine, the Danube, and the Alps, conquering Gaul, Italy, Spain, and even crossing over into Africa, and establishing a new kingdom on the ruins of ancient Carthage. This happened towards the end of the 5th century; while somewhat earlier other tribes, such as the Angli, Saxons, and Frisians, had crossed over into Britain, and, partly subduing and partly expelling the Celtic population, established in this island a new order of things, which lasted for upwards of five centuries. Nearly the whole of the west of Europe was thus governed by German tribes.

Our chief authorities among the ancients concerning the ethnography and geography of Germany are Tacitus, especially in his *Germania*, and Ptolemy. Pliny, too, who himself served in Germany (xvi. 1), furnishes much valuable information, although his great work in 20 books on the wars of the Romans with the Germans is lost. Besides these, Strabo, Pytheas, Eratosthenes, Dion Cassius, Velleius Paterculus, Suetonius, and others must be consulted. The works of moderns, especially Germans, are almost countless; but the principal ones are Cluverius, *Germania Antiqua*, Lugd. Bat. 1616, fol.; A. B. Wilhelm, *Germanien u. seine Bewohner*, &c. Naumburg, 1823; Von Wersebe, *Über die Völker u. Völkerbündnisse des alten Deutschlands*, Hanover, 1825; Zeuss, *Die Deutschen u. die Nachbarstämme;* Grimm's *Deutsche Mythologie;* Latham's *Prolegomena* and *Epilegomena*, in his edition of Tacitus's *Germania*. An able statement of the results at which these and other inquirers have arrived is contained in the 3rd vol. of Forbiger's *Handbuch der alten Geographie*, Leipzig, 1848. [L. S.]

GERMA'NIA INFE'RIOR. [GALLIA, p. 967.]

GERMA'NIA SUPE'RIOR. [GALLIA, p. 967.]

GERMANICO'POLIS (Γερμανικόπολις), a town in Bithynia, not far from Prusa, was in earlier times called *Helgas* or *Booscoete* (i. e. βοὸς κοίτη, Plin. v. 40). A second town of the same name (though Ptol., v. 4. § 5, calls it Γερμανόπολις) is mentioned in Paphlagonia, not far from Gangra. (*Norell.* 29.) This town, like the one in Bithynia, appears to have been named after Germanicus, but none of the coins found on its site are older than the reign of M. Aurelius. A third Germanicopolis was a town in Isauria. (Hierocl. p. 709: Concil. Chalced. p. 659; Const. Porphyr. *de Them.* i. 13.) [L.S.]

GERMA'NICUM MARE (Γερμανικὸς Ὠκεανός), the German Ocean, the sea between Great Britain in the west, and Belgium, Holland, Germany, Denmark, and Sweden in the east. (Plin. iv. 30; Ptol. ii. 3. § 5, viii. 3. § 2, 6. § 2.) [L. S.]

GERMA'NII (Γερμάνιοι, Herod. i. 125), one of the three agricultural tribes of the ancient Persians, according to Herodotus. There has been much dispute among the learned who these people were. The probability seems to be, that they were connected with Carmania, now *Kirman*. Agatharchides, indeed, calls the Carmania of Diodorus (xviii. 6) and Strabo (xiv. 723) by the name of Germania (*Perip. M. E.* p. 27). Others, with less probability, have connected the Germanii with a people N. of the Oxus, which was sometimes called Erman, and now bears the name *Khawarezm*, and have supposed that they are the real ancestors of the modern Germans; but this is fanciful. (Hammer, *Wien Jahrb.* ii. p. 319; Krusii *Archiv.* i. 2. p. 124; Ancient. *Mith.* i. p. 278.) [V.]

GERMIHERA, a place in Dacia which, from its position in the Peutinger Table, must be sought for in the valley of the *Maros*, possibly at *Szaszvaros*, where there are ruins. It is the same as the Germigera of the Geographer of Ravenna, and the Ζερμίζιργα of Ptolemy (iii. 8. § 8). [E. B. J.]

GERONTHRAE or GERANTHRAE (Γερόνθραι, Paus. iii. 21. § 7, 22. § 6; Γεράνθραι, Paus. iii. 2. § 6; Steph. B. *s. v.*; Γερέν θραι, Hierocl. 392. 14. *Eth.* Γερονθρήτης), an ancient town of Laconia situated in a commanding position upon the south-western face of the mountain above the plain of the Eurotas. It is represented by *Gheraki*, a ruined town of the middle ages, the name of which is a corruption of Geronthrae, while its distance from the site of Acriae upon the coast corresponds to the 120 stadia mentioned by Pausanias. We learn from the same writer that Geronthrae possessed a temple and grove of Ares, to whom a yearly festival was celebrated, from which women were excluded. Around the agora there were fountains of potable water. On the acropolis stood a temple of Apollo. (Paus. iii. 22. §§ 6, 7; στάλα πετρίνα ἐν τῷ ἱερῷ τῷ τοῦ Ἀπόλλωνος, Böckh, *Inscr.* no. 1334.) On the northern side of the summit of the citadel are the remains of a very ancient wall: the position of the agora is indicated by the fountains of water lower down the hill.

Geronthrae was one of the ancient Achaean cities which resisted for a long time the Dorian conquerors. It was at length taken and colonised by the Spartans, along with Amyclae and Pharis. In the time of the Roman empire it belonged to the Eleutherolacones. (Paus. iii. 2. § 6, 21. § 7, 22. § 6.) At the beginning of the fourth century of the Christian era it must have been a market-town of some importance, since a Greek translation of the edict of Diocletian, "De Pretiis Rerum Venalium," has been discovered at *Gheraki*. In the middle ages it was the seat of a bishopric, and one of the most important places in the valley of the Eurotas. (Leake, *Morea*, vol. iii. p. 7, *Peloponnesiaca*, pp. 149. 362; Boblaye, *Recherches, &c.* p. 95; Curtius, *Peloponnesos*, vol. i. p. 302.)

GERONTIS ARX. [CAEPIONIS TURRIS.]

GERRHA, GERRHAEI (Γέρα, Γέρρα: *Eth.* Γερραῖος), a town and people of Arabia Felix on the Persian gulf (Ptol. vi. 7), between the Aetaces on the south, and the Themi on the north. Strabo's description is more full and satisfactory than usual. "When you have sailed along the coast of Arabia 2300 stadia (apparently from the mouth of the Persian gulf, to which he assigns a length of 10,000 stadia), the city of Gerrha lies in a deep gulf, where Chaldaean exiles from Babylon inhabit a salt country, having houses built of salt, the walls of which, when they are wasted by the heat of the sun, are repaired by copious applications of sea-water. The city is distant 200 stadia from the sea. The land-carriage of goods, especially of spicery, is conducted by the Gerrhaeans; Aristobulus, on the contrary, says that they traffic with Babylon by barges, and then sail up the Euphrates to Thapsacus, where they commence the land-carriage in all direct line." (Strab. xvi. p. 766.) Pliny (vi. 32) describes it as a city of 5 miles in circumference, with a tower

Digitized by Google

built of square blocks of salt. D'Anville first identified it with the modern *El-Katif*; Niebuhr finds its site in the modern *Koneit* of the Arabs, called *Gras* by the Persians (*Description de l'Arabie*, p. 295). Lastly, Mr. Forster thinks that he has discovered the ruins of this once important city "in the East India Company's Chart, seated where all the ancient authorities had placed it, at the end of the deep and narrow bay at the mouth of which are situated the islands of Bahrein." (*Arabia*, vol. ii. p. 209.) His proofs of this identification are fully given (pp. 216—221), and are interesting and plausible; but exception may be taken to the following assertion: "From Strabo we learn that the city of Gerrha lay at the bottom of a deep bay; the depth of this bay and its geographical position are defined by Pliny: from the shore or extreme recess of the Sinus Gerraicus on which the city stood, the Regio Attene (manifestly a peninsular district) projected at a distance of 50 Roman miles from the opposite shore into the Persian gulf." Now, as Strabo is the only authority for the site of the city, and his description is contained in the words διέχει δὲ τῆς θαλάττης διακοσίους σταδίους ἡ πόλις, it must be admitted that "the bottom of a deep bay," "or 25 Roman miles *from the open sea*," is a wide deduction from this statement; and the position of "the extensive ruins of an ancient city," marked in the Company's Chart *on the coast*, is perhaps the strongest argument against their identity with the ancient Gerrha, which, however, seems to be sufficiently confirmed by the other evidence cited by Mr. Forster. (See also vol. i. p. 197.) [G. W.]

GERRHAICUS SINUS, mentioned in connection with Gerrha only by Pliny (vi. 32), between the Sinus Capeus on the north and the Regio Attene on the south. [ATTA VICUS.] Identified by Mr. Forster with the modern *Gulf of Bahrein* in the passages referred to under the last article. [G. W.]

GERRHUS (Γέρρος, Ptol. iii. 5. § 12; Plin. iv. 12; Steph. B. *s. v.*), a river of Scythia, and region bearing the same name, where the tombs of the Scythian kings were. (Herod. iv. 19.) This region must have been at a considerable distance up the Borysthenes, as we are told that forty days' navigation on that river were required before it was arrived at. (Herod. iv. 53.) Potocki (*Voyage dans les Steppe d'Astrakhan et du Caucase*, Paris, 1829, vol. i. pp. 145, 163, 172, 388) has identified this with the district below the cataracts of the *Dnieper*, where the river becomes navigable, and where there are now in fact a number of ancient tombs or "tumuli" in the neighbourhood of *Takmak*. (Comp. Schafarik, *Slav. Alt.* vol. i. p. 516.) It is difficult to reconcile the description of the courses and confluence of the Gerrhus, Panticapes, and Hippacyris with modern topography.

Beyond the Panticapes (*Kolúskawoda*) was the country of the nomad Scythians. It is a steppe destitute of wood, and comprehending a space of 14 days' journey, in an eastern direction, as far as the river Gerrhus, or the steppe of the *Nogaï*. Beyond the river Gerrhus the ruling horde of the Scythians who were named "royal," first appear. (Herod. iv. 19.) The Hypacyris is generally considered to be the same as the *Kalantchak*. According to Herodotus, the Gerrhus fell into the Hypacyris; by which must be understood, not the *Kalantchak*, but the *Outlouk*. The course of this river appears clear enough in Pliny and Ptolemy (*l. c.*). Pliny agrees with Herodotus in making it the boundary between the Nomad and Royal Scythians, and with Ptolemy in conducting it finally into the Palus Maeotis; the difference only is, that Pliny leads it into the lake BUGES, which communicates with the gulf CORETUS and the Palus Maeotis, while Ptolemy discharges it considerably to the E. of the lake Buges or Byce (Βύκη λίμνη). The Gerrhus is probably represented by the *Moloschnijawoda*, which forms still a shallow lake or marsh at its embouchure. (Comp. Schafarik, *Slav. Alt.* vol. i. p. 270; Rennell, *Geog. of Herod.* vol. i. pp. 75, 88, 93, 94.) [E. B. J.]

GERRHUS, GERRHI. [ALBANIA.]

GERRU'NIUM, a fortress of Phaebates, a district of the Dassaretii on the Illyrian border of Macedonia, which was taken and sacked by L. Apustius, a Roman officer, detached by Sulpicius, to ravage the territory of Philip, in the breaking out of the war against that prince. (Liv. xxxi. 27.) Gerrunium (Gertunium ?) is the same place as the GERTUS (Γερτοῦς), a place on the frontier of Dassaretis, which Scerdelaïdas had taken from Philip, and which the latter retook in the second year of the Social War (Polyb. v. 108). GERUS (Γερούς), mentioned in the same chapter of Polybius, is a different place from Gerrunium, which was, probably, lower down on the valley of the *Usumi* than Antipatria (*Berát*), perhaps near the junction of the *Uzúmi* and *Devól*. (Leake, *Trav. in North. Greece*, vol. iii. p. 327.) [E. B. J.]

GERULA'TA or GERULA'TIS, a town in Pannonia, where a Roman frontier garrison was stationed. (*It. Ant.* p. 247; *Not. Imp.*) It is identified with the modern *Carlburg* or *Oroszvar*, and some believe it to be the same as the town Χερτόβαλος, mentioned by Ptolemy (ii. 15. § 3). [L. S.]

GERUNDA (Γερούνδα, Ptol. ii. 6. § 70: *Eth.* Gerundenses, Plin. iii. 3. s. 4), a small inland town of the Ausetani, in the NE. corner of Hispania Tarraconensis, on the S. side of the river Alba (*Ter*), and on the high road from Tarraco to Narbo Martius. Under the Romans it was a *civitas Latinorum*, belonging to the conventus of Tarraco. It stood on a hill near Gerona. (Plin., Ptol., *ll. cc.*; *Itin. Ant.* p. 390; *Tab. Peut.*; Geog. Rav. iv. 42; Prudent. Peisteph. iv. 29, where it is called *parva*; Ukert, vol. ii. pt. 1. p. 426.) [P. S.]

GERU'NIUM (Γερούνιον), a small town or fortress of Apulia, not far from Larinum, in which Hannibal established his winter-quarters after the campaign against Fabius, B. C. 217. The Roman general encamped at Calela in the territory of Larinum, and it was between these two places that the action took place in which Minucius was defeated by the Carthaginian general, and saved only by the timely assistance of Fabius. (Pol. iii. 100—102, 105, 107; Liv. xxii. 18, 24—28.) No subsequent mention of Gerunium is found in ancient writers; it is termed by Livy a "castellum inops Apuliae" (xxii. 39), and was probably always a small place. But its name (written Geronum) is found in the Tab. Peut., which places it 8 M. P. from Larinum, on a road leading from thence to Bovianum; and this distance accords with the statement of Polybius (iii. 100), that it was 200 stadia (25 M. P.) from Luceria. Its site is fixed by local antiquarians at a place still called *Geriono* or *Girone*, between *Casa Calenda* and *Montorio*, where a town or village still existed down to a late period, and where some ancient remains have been found. This position would appear to be rather too near Larinum (from which it is only 4

Digitized by Google

miles); but the evidence of the name is certainly strong in its favour. Cluverius is undoubtedly wrong in transferring it to *Dragonara* on the right bank of the *Fortore*, which is above 16 Roman miles from Larinum, and about the same distance from Luceria. (Cluver. *Ital.* p. 1213; Romanelli, vol. iii. pp. 12—15; Tria, *Mem. di Larino*, pp. 18—23; Biondo, *Ital. Illustr.* p. 421.) [E. H. B.]

GESDAO or GESDAONE, as it appears in the oblique case in the Itin. Jerusalem; Gascido in the Table, which D'Anville read Gadao. The Jerusalem Itin. places it on a road from Brigantio (*Briançon*) to *Susa:* and it makes 10 M. P. from Brigantium to Gesdao, and 9 from Gesdao to Mutatio ad Marte. The Antonine Itin. makes 18 M. P. from Brigantio to Ad Martis, and omits Gesdao. The Table makes 6 M. P. from Brigantio to Alpis Cottia (*Mont Genèvre*), and then 5 M. P. to Gascido, and 8 from Gascido to Ad Martis. All these numbers agree pretty well, and by following the road from *Briançon* the position thus determined seems to be *Cesano* or *Sezano*. [G. L.]

GESHUR. 1. A people of the south of Palestine, reckoned with the Philistines and Canaanites (*Josh.* xiii. 3), apparently contiguous to the Amalekites, against whom David made hostile incursions from Ziklag in the country of the Philistines. (1 *Sam.* xxvii. 8.)

2. Another Bedouin tribe, on the east of Jordan, in the borders of the country occupied by the half-tribe of Manasseh, in the land of Bashan (*Deut.* iii. 14; *Josh.* xii. 5, xiii. 11, 13), in all which passages they are joined with the Maachathites. They were not dispossessed by the Israelites.

3. Geshur in Syria was apparently distinct from the last named. It was governed by a petty king of its own, to whose protection Absalom fled after the murder of his brother Amnon (2 *Sam.* xiii. 37, 38, xiv. 23), his mother Maacah being daughter to Talmai, king of Geshur. [G. W.]

GESOCRIBATE, a place in Gallia, which appears in the Table as the termination of a road from Juliomagus (*Angers*) through *Nantes*, *Vannes*, Sulim, and Vorgium. Walckenaer takes it to be *Brest*. [BRIVATES.] The first part of this name is the same as the first part of Gesoriacum. [G. L.]

GESONIA. Florus (iv. 12) says that Drusus established more than fifty forts along the banks of the Rhine; and in the next sentence he says, "Bonnam et Gesoniam cum pontibus junxit, classibusque firmavit." Those who think it worth the trouble to see what has been said on this corrupt passage may consult Duker's note. The reading Gesonia is very doubtful; and it is equally doubtful what the true reading is: probably some name ending in *cum*, so that it would be "Bonnam et G.... cum pontibus junxit." Cluverius put Moguntiacum in place of "Gesoniam cum." D'Anville is here misled by trusting, after his fashion, to resemblance of names. He saw on the map a place called *Zons*, as he has it, below *Cologne;* and "it seems that the name *Zons* preserves some analogy to that of Gesonia." [GESORIACUM.] [G. L.]

GESORIACUM or BONO'NIA (*Boulogne*), a place on the NW. coast of Gallia. Mela says (iii. 2): "From the Osismii the face of the Gallic shore looks to the north, and reaches to the Morini, the remotest of the Gallic nations, and it contains nothing that is better known than the port Gesoriacum." This was the port from which the emperor Claudius embarked for Britain. (Suet. *Claud.* c. 17.) A road in the Antonine Itin. passes from Bagacum (*Bavay*) through Castellum (*Cassel*) and Taruenna (*Therouenne*), to Gesoriacum. The Table has the same road, with the remark that Gesogiacum (Gesoriacum) was then called Bononia. Ptolemy (ii. 8. § 3) has "Gesoriacum, a naval place of the Morini," between Portus Itius and the river Tabudas or Tabullas. But *Boulogne* is south of the Itius. Pliny (iv. 16) makes the shortest passage from Gesoriacum to Britain to be 50 M. P.; which is too much as D'Anville remarks, whether we measure to *Lympne* or to *Hythe*, where he erroneously supposed that Cæsar landed. But Pliny's measurement is probably made to Rutupiae (*Richborough*), near *Sandwich*, where the Romans had a fortified post, and which was their landing-place from Gallia. This would make Pliny's distance nearer the truth, though still too much. Gesoriacum is also the "Portus Morinorum Britannicum" of Pliny (iv. 23), as appears from his giving the length of Gallia to the Ocean along a line from the Alpes "per Lugdunum ad portum Morinorum Britannicum." There was a district (pagus) round Gesoriacum, named from the town.

Dion Cassius (lx. 21) states that the Roman senate voted that a triumphal arch should be erected in honour of the emperor Claudius on the spot from which he sailed to Britain; and if this is true, it was erected at *Boulogne*, or that was the place where it was intended to be erected. D'Anville follows other writers in supposing that the Pharos or tower which Caligula erected on this coast, whence he meditated an invasion of Britain, was at *Boulogne*. (Suet. *Calig.* c. 45.) But there is no proof of this, except the fact of there having been an old tower at *Boulogne* near the sea up to the end of the seventeenth century. Eginhard, the biographer of Charlemagne, speaks of the emperor repairing this tower, and of its being an ancient construction.

Walckenaer (*Géog., &c.* vol. i. p. 454) observes that there is no historical record of the name Gesoriacum being changed to Bononia; and he presumes that Bononia was the name of another part of the town, or of a town built on the other side of the port. This conjecture "is confirmed by a passage of Florus (iv. 12) which no commentator or editor has understood, and which has often been spoiled by corruptions more or less improbable." He reads the passage thus: "Bononiam et Gessoriacum pontibus junxit, classibusque firmavit." But he does not say what authority he has for "Bononia;" and we have observed [GESONIA] that the other name is uncertain. Any person may see that Florus in this passage is speaking of the Rhine, and not of the coast. Besides, the notion of enumerating among the great exploits of Drusus the making bridges over the *Liane*, the small river of Boulogne, is rather ridiculous. This is not the only instance in which this laborious geographer has discovered what never existed. He adds that in the little place called *Portel*, at the foot of the hill of *Boulogne*, and half a league from the town, there were discovered, at the beginning of the 17th century, a large wall exceedingly hard, three pieces of marble seven feet long, and a sarcophagus of a single piece, well worked; all which he supposes to confirm his conjecture.

Bononia is named Oceanensis on a medal of Constans, to distinguish it from the Bononia of Italy. At this time the name Bononia was probably the only name used; and so Ammianus calls it (xx. 9), and Zosimus (vi. 2), who, however, speaks of it as a city of Lower Germania, though he knew it was on the

Digitized by Google

coast. Constantine passed over from Britain to Bononia, and this was probably the regular landing-place from Britain since the time of Claudius. It appears, indeed, as the naval station on this coast, for Carausius was set over the fleet at Bononia to protect the Belgic and Armoric shore against the Franks and Saxons. (Eutrop. ix. 21.)

There are no Roman buildings at *Boulogne*. The tower, already mentioned, is entirely gone. It was no doubt a Roman work. Within the present century Roman medals and tombs have been discovered at *Boulogne*, and other remains. [G. L.]

GESSORIENSES, a *civitas Latina*, in the conventus of Tarraco and the province of Hispania Tarraconensis. (Plin. iii. 3. s. 4.) Ukert conjectures that their city stood in the district between the Sicoris and Nucaria, where inscriptions and coins have been found bearing the names ARSONENSIS and JESSONENSIS. (Muratori, *Nov. Thes.* p. 1021, nos. 2, 3; Spon. *Misc. Erud. Ant.* p. 188; Cellar. *Not. Orb.* vol. i. pp. 118, 119; Ukert, vol. ii. pt. 1. p. 452.) [P. S.]

GETAE. [DACIA.]

GETHSE'MANE. [JERUSALEM.]

GEVI'NI (Γηουινοί), mentioned by Ptolemy as a population of European Sarmatia (iii. 5. § 24) lying to the north of the Carpiani, and the south of the Bodini (Βοδινοί). *Buchowinia* is as likely a place as any for these Gevini. The name of this locality is generally deduced from *Buch*=*Beech-tree*, so that it=*the land of the beeches*. But the word *Buch* is German; whereas Buchowinia is Slavonic. Now if we allow ourselves to suppose the root *gevin* to be a *geographical* term (i. e. the name of a tract of land), we have a better derivation. No habit is commoner with the Slavic populations than to prefix to a noun denoting a locality the preposition *po* (*bo*)=*on*. Hence *Po-morania* is the country *on the sea*: a population on the Elbe (in Slavonic, *Laba*) was called the *Po-labingi*. As examples of this kind may be multiplied, the hypothesis that the *Buchowinia* is the country of the population on the *Gevin* (*po-gevin*) becomes allowable. [R. G. L.]

GEZER (Γαζήρ), mentioned in *Josh.* xvi. 10 as a city of the Philistines, tributary to the Israelites of the tribe of Ephraim. (Comp. *Judges*, i. 29.) It was taken and burnt by Pharaoh, king of Egypt, and given to his son-in-law Solomon, who rebuilt it. (1 *Kings*, ix. 15—17.) In the last passage it is joined with Bethoron the nether, with which it also occurs in *Josh.* xvi. 3, where the order shows that it was situated between Bethoron and the coast. Consistently with this, Gazer or Gazara is placed by Eusebius and St. Jerome 4 miles north of Nicopolis [EMMAUS, 2.] (*Onomast. s. v.*) It is probably identical with the Gadaris of Strabo, in the neighbourhood of Jamnia, otherwise called Gadara. (Reland, *Palaest.* pp. 434. 678—680.) [G. W.]

GIBEAH (LXX. Γαβαέ: *Eth.* Γαβαθίτης), called also Gibeah of Benjamin (1 *Sam.* xiii. 2) and Gibeah of Saul (1 *Sam.* xi. 4), Γαβαθαούλη by Josephus, who in one place states its distance 30 stadia from Jerusalem (*B. J.* v. 2. § 1) and in another only 20 (*Ant.* v. 2. § 8). It obtained a bad notoriety in very early times, in the matter recorded in *Judges*, xix. xx., which resulted in its entire destruction. It was the native place of Saul. (1 *Sam.* x. 26, xi. 4.) It was obviously nigh to Ramah (*Judges*, xix. 13), and on the high road to Nablouse between Jerusalem and Ramah. (Comp. Joseph. *B. J. l. c.*) This makes against its identity with the modern village of *Jeba'*, which no doubt marks the site of the ancient Geba, situated as it is on the direct road between Michmash and Jerusalem. (See *Isaiah*, x. 28, 29.) Ramah and Gibeah of Saul were not in the line of march of the invading army from the north, but from their contiguity to it naturally shared in the panic. Gibeah then must be sought to the west of the modern *Jeba'*, and on the direct Nablouse road; and there is a remarkable conical hill, conspicuous from Jerusalem, close to the high road, about the stated distance from the city, which appears to have been occupied by an ancient city, as its modern name indicates. Accordingly, in consistency with the above notices, though inconsistently with himself, Dr. Robinson decides for *Tuleil-el-Fûl* (more properly *Tell-el-Fûl*) as the representative of Gibeah of Saul. (*Theological Review*, vol. iii. p. 645.) [G. W.]

GIBEON (LXX. Γαβαών: *Eth.* Γαβαωνίτης), the metropolis and royal city of the Hivites, strongly fortified; whose inhabitants, having deceived the Israelites under Joshua, were allowed to live under bondage, with their fellow-citizens in Chephirah, Beeroth, and Jirjath-jearim: together with which, it was assigned to the tribe of Benjamin. (*Josh.* ix., x. 2, xviii. 25.) It was a priestly city (*Josh.* xxi. 17), which may account for the tabernacle being placed there, prior to its removal to the temple prepared for it at Jerusalem. (1 *Chron.* xvi. 1. 37—40, xxi. 29; 2 *Chron.* i. 2—6; 1 *Kings*, viii. 4, &c.) "Josephus, in one place, gives the distance of Gabaon from Jerusalem at 50 stadia, and in another at 40 stadia. (*B. J.* ii. 19. § 1, *Ant.* vii. 11. § 7.) Eusebius places Gibeon 4 Roman miles west of Bethel, while the corresponding article of Jerome sets it at the same distance on the east. (*Onomast. s. v.* Γαβαών.) The text of Jerome is here probably corrupted." (Robinson, *Bib. Res.* vol. ii. p. 137. n. 2.) Its site is fixed by *Josh.* x. 10, 11, where the Philistines, on their rout at Gibeon, retreat to the plain by Bethoron. (Comp. Joseph. *B. J.* ii. 19. § 1.) Accordingly, on the camel-road between Jaffa and Jerusalem, by way of Lydda and the two Bethorons, we find a modern village named *el-Jib*, situated on a rocky eminence, and exhibiting traces of an ancient city. It is distant from Jerusalem about 2½ hours, by the nearest route, which would equal 60 stadia. It has a fine fountain of water, which discharges itself into a cave excavated so as to form a large subterranean reservoir, near which are the remains of another open reservoir, about 120 feet in length by 100 in breadth, doubtless intended to receive the superfluous waters of the cavern. (Robinson, *Bib. Res.* vol. ii. pp. 136—138.) This may be the Pool of Gibeon (2 *Sam.* ii. 13), called in *Jeremiah* "the great waters in Gibeon" (xli. 12). [G. W.]

GIBLITES. [BYBLOS.]

GIFIL (Jornand. *de Get.* 22; Gilpit, *Geog. Rav.*), a river of Dacia, which has not at present been identified. [E. B. J.]

GIGLIUS (τὸ Γίγλιον ὄρος, vulgo Γίγιον), a mountain in the interior of Cyrenaica. (Ptol. iv. 3. § 20.) [P. S.]

GIGO'NIS PROM. (Γίγωνις ἄκρα, *Etym. Mag. s. v.* Ἠγωνίς, Ptol. iii. 13. § 23), a promontory on the coast of the Crossaea, in Macedonia, with a town GIGONUS (Γίγωνος, Steph. B.), to which the Athenian force, which had been employed against Perdiccas, marched in three days from Berasa. (Thuc. i. 61.) It appears, from the order of the names in Herodotus (vii. 123), that it was to the S. of Cape Aeneium, the great *Karaburnú*; hence its situation

Digitized by Google

was nearly that of Cape *Apanomí*. (Leake, *Northern Greece*, vol. iii. p. 452.) [E. B. J.]

GIGONUS. [GIGONIS PROM.]

GIGURRI. [ASTURES.]

GIHON. [JERUSALEM.]

GILBOA MONS (Γελβουὲ ὄρος), a low mountain district to the south-east of the plain of Esdraelon, situated in the tribe of Issachar, infamous for the defeat of the Israelites under Saul and Jonathan, by the Philistine hosts. (1 *Sam.* xxviii. 4, xxxi.) From this fact they are called ὄρη ἀλλοφύλων (alienigenarum montes) by Eusebius, who places them six miles from Scythopolis, where a large village named Gelbus (Γελβοῦν) existed in his day. This village still exists, under the name of *Jelbón*, and serves to identify the mountain tract which it occupies as the Mount Gilboa of Scripture. The road from *Beisan* (Scythopolis) to *Jenín* passes near this village, and over the mountains. (Robinson, *Bib. Res.* vol. iii. pp. 157, 170.) The village of *Jelbún*, however, "lies south of Taanach, on the western declivity of Mount Gilboa, and not on the east side, as it is marked in Robinson's map." (Dr. Schultz, in Williams, *Holy City*, vol. i. p. 469.) [G. W.]

GILEAD. [PALAESTINA.]

GILGAL (Γάλγαλα, LXX.; Γολγών and Γαλγάν, Euseb.), the first station of the Israelites after crossing the Jordan, and, therefore, between Jericho and that river, "in the east border of Jericho." (*Josh.* iv. 19.) It was here that the twelve stones taken out of the bed of the Jordan were deposited, that the first passover was celebrated in the promised land, and the ordinance of circumcision renewed, from which last circumstance the place derived its name. "This day have I rolled away the reproach of Egypt from off you; wherefore, the name of the place is called Gilgal (i. e. *rolling*) unto this day." (v. 9.) It seems to have been the head-quarters of Joshua during the subjugation of the land (ix. 6, x. 6. 43), and was probably invested with a sacred character from that time forward: for there Samuel judged, in his annual circuit (1 *Sam.* vii. 16); there he publicly inaugurated the kingdom (xi. 14, 15); and there he commanded Saul to await his arrival, when he should come to offer sacrifice (x. 8. xiii. 4, &c.). According to Eusebius, it was 2 miles from Jericho (*Onomast. s. v.*); but Josephus, with greater show of accuracy, places it 10 stadia from Jericho, and 50 from the Jordan (*Ant.* v. 1. § 4). It was a desert place in the time of Eusebius, but regarded with great veneration by the inhabitants of the country. No traces of an ancient city can now be discovered between the site of Jericho, which is clearly identified, and the river. It may be doubted whether the Gilgal mentioned in 2 *Kings*, ii. 1, where there was a school of the prophets (iv. 38), is identical with the one above noticed. Eusebius alludes to another in the vicinity of Bethel (*s. v.*), whose site is still marked by the large modern village of *Jiljília*, to the left of the *Nablús* road, about 2 hours north of Bethel. (Robinson, *Bib. Res.* vol. iii. 81, 82.) This is possibly the Gilgal mentioned in *Deut.* xi. 29, 30, in the vicinity of Mounts Ebal and Gerizim; a notable difficulty, which Eusebius and St. Jerome propose to solve by transferring these mountains to the banks of the Jordan. Another modern village of the same name near the coast, a little south of Antipatris, seems to indicate the site of a third town of the same name. Dr. Robinson thinks that "the Gilgal of *Nehemiah*, xii. 29 and of 1 *Macc.* ix. 2 may be referred to the place so called in the western plain, near Antipatris. (*Bib. Res.* vol. ii. p. 287. n. 3.) [G. W.]

GILIGAMMAE (Γιλιγάμμαι, Herod. iv. 169; Γιλιγάμβαι, Steph. B. *s. v.*), a Libyan people, who dwelt originally on the N. coast of Libya, W. of the ADYRMACHIDAE, as far as the island of Aphrodisias, W. of the port of Cyrene; but were afterwards pushed back by the Greek settlers to the inner parts of Marmarica and Cyrenaica. [P. S.]

GINDANES (Γίνδανες or Γινδᾶνες), a Libyan people, who dwelt W. of the MACAE, and S. of the Tripolis in the Regio Syrtica; and of whose customs some curious particulars are given by Herodotus (iv. 176; Steph. B. *s. v.*). [P. S.]

GINDARUS (Γίνδαρος), a city of the Syrian district of CYRRHESTICA; an acropolis, and resort of robbers, according to Strabo (p. 751.) Ptolemy, however, places a city of this name in the district of Seleucis (v. 15). [G. W.]

GIR FL.; GIRA METROPOLIS. [LIBYA.]

GIRBA. [MENINX.]

GIRGASHITES (Γεργεσαῖοι), one of the seven idolatrous nations descended from Canaan (Gen. x. 16), and dispossessed by the children of Israel (*Josh.* xxiv. 11). They do not occur in the lists in *Exodus*, iii. 8, 17, or *Deuteronomy*, xx. 17; nor is there any indication of their position in Palestine. Dr. Wells supposes them to have been a family of the tribe of the Hivites; as in nine out of ten places where the nations of Canaan are reckoned they are omitted, while in the tenth, where they are inserted, the Hivites are omitted. [G. W.]

GIRGIRI M. (τὸ Γίργιρι ἢ Γίργυρις ὄρος), a mountain of Libya Interior, above the Regio Syrtica, containing the sources of the river CINYPS. (Ptol. iv. 6. §§ 11, 17.) It is probably the Mons Gir of Pliny (v. 5) and the GRATIARUM COLLIS of Herodotus. [P. S.]

GITANAE, a town of Epirus, described by Livy as being near Corcyra, and about 10 miles from the coast. (Liv. xlii. 38.) It is not mentioned by any other ancient writer, and it has therefore been conjectured that the word is a corrupt form of Cassope, which Ephorus spoke of as a place in Epirus colonised by the Clazomenii. (Steph. B. *s. v.* Χάων: Leake, *Northern Greece*, vol. i. p. 76.)

GITTITES (Γεθαῖος), the ethnic of Gath. (2 *Sam.* vi. 10, 11, xxi. 19.) [GATH.]

GLANDIMA'RIUM. [GALLAECIA.]

GLANIS. [CLANIS.]

GLANNIBANTA, in Britain, the form in the Notitia of Clanoventum. [CLANOVENTUM.] [R. G. L.]

GLANUM (Γλανόν: *Eth.* Glanicus), is one of the five towns which Ptolemy (ii. 10. § 15) mentions in the country of the Salyes in Gallia Narbonensis. Pliny (iii. 4) enumerates it among the Oppida Latina of Narbonensis, and calls it Glanum Livii, a name due, as it is supposed, to Livius Drusus, who settled a colony here about B. C. 4. Glanum is placed in the Antonine Itin. on a road from Cabellio (*Cavaillon*) to Arelate (*Arles*): it is 16 M. P. from Cabellio to Glanum, and 12 from Glanum to Ernaginum. [ERNAGINUM.] The Table has the same route and the same names, — but it makes 12 M. P. from Cabellio to Glanum, and 8 from Glanum to Ernaginum; and these distances appear to be correct. Glanum is the village of *St. Remi*, which is proved by an inscription found there with the words "Reipublicae Glanicorum" on it. The exact site of Glanum is above a mile south of *St. Remi*, near which there are at present, in a good state of

Digitized by Google

preservation, a Roman mausoleum, and also a Roman triumphal arch, which are engraved in several works. (*Mém. de l'Acad.* tom. vii. p. 263; Millin, *Voyage dans les Départ. Méridionaux*, tom. iii. p. 394. pl. 63. fig. 1.)

The triumphal arch is much damaged. The lower part contains eight columns, two on each side of the arch, or four on each front; and four bas-reliefs without inscriptions: the figures, which are above six feet high, represent captives chained, men and women; only two heads are entire. A garland of leaves and fruits, sculptured with great skill, ornaments the archivolt. In the intercolumniations there are the remains of consoles, which, it is supposed, supported statues. The building, which is called a mausoleum, is about 60 feet high, resting on a square base formed of large stones, and consisting of three stories or stages. The lowest is a quadrangular stylobate, on the upper part of each face of which is a bas-relief. The next stage, which is also square in the plan, has four open faces, and fluted pillars engaged, with Corinthian capitals. The third stage rests on a circular basement, above which are ten fluted columns with Corinthian capitals, surmounted by an entablature, above which is a kind of dome. This third stage is a kind of little temple, with open spaces between the columns. The friezes and the archivolts are ornamented with bas-reliefs. There were two male figures in this little temple clothed with the toga, which used to rest against the columns, where they had fallen or been thrown down. They have been set again on their base, and the heads have been restored; but, as generally happens, the heads make a miserable contrast with the rest of the figures. It is generally supposed that this building is a tomb, though some writers deny it. But it has the following inscription, as reported in a recent work: SEX. L. M. IVLIEI C. F. PARENTIBVS. SVEIS. The three names appear to be Sextus, Lucius, and Marcus named Julii; and the C. F. siguify "curaverunt faciendum." It is, therefore, clearly a monumental building. On Italian sepulchral inscriptions "fecerunt" or "fecit" is the common expression; but "faciendum curaverunt" also occurs. (Fabretti, *Inscr. Ant., &c.*, Romae, 1699, p. 358, &c.) Perhaps some careless copier of the inscription has put the C. before the F. It is a conclusion of some French writers, which must be rejected, that the Julii who erected this monument were connected by blood or alliance with the Roman Julii. Some even conclude that it was erected in honour of the dictator Caesar and of Augustus. They further conclude, without their premises, that it was erected in the first century of the Christian aera, and that the bas-reliefs represent the conquests of Caesar in Gallia. It was usual for Galli to take the names of their Roman patrons; and these Julii may be Galli whose ancestors had received some favour from the dictator, and probably the Roman citizenship. The style of the edifice certainly shows that it does not belong to a late period of the empire; and that is all that we can say.

A silver coin of Glanum is mentioned, with the stamp of Massilia and the legend Γλανικων, from which we may conclude that this place was at some time dependent on Massilia. (D'Anville, *Notice, &c.*; Walckenaer, *Géog., &c.* vol. ii. p. 214; Ukert, *Gallien*, p. 435; Richard et Hocquart, *Guide du Voyageur, &c.*) [G. L.]

GLA'PHYRAE (Γλαφυραί), a town of Thessaly, mentioned by Homer along with Boebe and Iolcos (*Il.* ii. 712; comp. Steph. B. *s. v.*), but of which the name does not subsequently occur. Leake conjectures that it is represented by the Hellenic ruins situated upon one of the hills above the modern village of *Káprena*, between Boebe and Iolcos. The entire circuit of the citadel on the summit of the hill may be traced, and on its lower side part of the wall is still standing. (Leake, *Northern Greece*, vol. iv. p. 432.)

GLAUCANITAE, or GLAUSAE (Γλαυκανῖται, or Γλαῦσαι, Arrian, v. 20), the name of a people conquered by Alexander during his Indian expedition. They appear to have lived near the banks of the Hydaspes. Alexander gave their country to Porus. Arrian says that the name is written Glaucanicae by Aristobulus, and Glausae by Ptolemy. [V.]

GLAUCONNE'SUS. [EUBOEA, p. 872, a.]

GLAUCUS (Γλαῦκος). There are no less than four rivers of this name in Asia Minor: 1. A tributary of the Phasis in Colchis, now called *Tchorocsou*. (Strab. xi. p. 498; Plin. vi. 4.) 2. One of the two small rivers by the union of which the Aesorrhus or Acampsis, in Pontus, is formed. (Ptol. v. 6. § 7.) 3. A tributary of the Maeander in Phrygia, not far from Eumeneia. (Plin. v. 29.) There are coins with the name of this river. (Leake, *Asia Minor*, p. 157.) 4. A river in Lycia, on the frontier of Caria, which empties itself into the bay of Telmissus, whence that bay is sometimes called *Sinus Glaucus*. (Plin. vi. 29; Quint. Smyrn. *Posthom.* iv. 6, foll.; Strab. xiv. p. 651.) The modern name of the bay is *Makri*. Steph. B. mentions a δῆμος Γλαύκου, which was probably a place on the banks of the river. [L. S.]

GLAUCUS, a river of Achaia. [ACHAIA, p. 13, b.]

GLESSARIA INSULA. [AUSTERAVIA.]

GLINDITIONES, a people or town of Illyricum (Plin. iii. 22), probably represented by *Ljubinje* in the *Herzegowina*. [E. B. J.]

GLISAS (Γλίσας or Γλίσσας: *Eth.* Γλισάντιος), an ancient town of Boeotia, mentioned by Homer in the same line with Plataea (*Il.* ii. 504), and celebrated in mythology as the place where the Epigoni fought against the Thebans, and where the Argive chiefs were buried who fell in the battle. (Paus. i. 44. § 4, ix. 5. § 13, ix. 8. § 6, ix. 9. § 4, ix. 19. § 2.) Pausanias, in his description of the road from Thebes to Chalcis, says that Glisas was situated beyond Teumessus, at the distance of seven stadia from the latter place; that above Glisas rose Mount Hypatus, from which flowed the torrent Thermodon. (Paus. ix. 19. § 2.) Strabo (ix. p. 412) places it on Mt. Hypatus, and Herodotus (ix. 43) describes the Thermodon as flowing between Glisas and Tanagra. Leake identifies Glisas with the ruins on the bank of the torrent of *Platanáki*, above which rises the mountain of *Siamatá*, the ancient Hypatus. (Leake, *Northern Greece*, vol. ii. p. 250.)

GLOTA. [CLOTA.]

GLYCYS LIMEN. [ACHERON, p. 19, a.]

GLY'PPIA or GLY'MPIA (Γλυπτία, Paus. iii. 22. § 8), a village of Laconia, situated near the frontiers of Argolis. Glyppia is the name in Pausanias, who simply describes it as situated in the interior above Marius. It appears to be the same place as the fortress called Γλυμπεῖς by Polybius, who places it near the borders of the Argeia and Laconia, and who relates that the Messenians were defeated here in B. C. 218 by the Spartans, when they were endeavouring, by a round-about march

Digitized by Google

from Tegea, to penetrate into the southern valley of the Eurotas. (Polyb. v. 20.) It is also mentioned on another occasion by Polybius (iv. 36). The ancient town is probably represented by the Hellenic remains at *Lympiáda*, which is probably a corruption of the ancient name. The district south of *Lympiáda* is called *Olympo-khória*, which name would seem to indicate that one of the mountains in the neighbourhood bore the name of Olympus in ancient times. Leake indeed conjectures that Γλυμπία was the ancient local form of Ὀλυμπία, and consequently that *Lympiáda* and *Olympo-khória* may both originate in the same ancient name Olympia having the local form of Glympia. (Boblaye, *Recherches, &c.* p. 362; Leake, *Peloponnesiaca*, p. 362; Curtius, *Peloponnesos*, vol. ii. p. 303.)

GNOSUS, GNOSSUS. [Cnosus.]

GOBAEUM (Γόβαιον ἄκρον), is placed by Ptolemy (ii. 8. § 1) in Gallia Lugdunensis, and it is the most western part of Gallia. D'Anville concludes that it is *Finistère* or *Mahé*, commonly called *Pointe St. Mathieu*. It is certainly some point between the *Pointe de Penmarche* and the place where the French coast turns east. Gossellin and others make it the cape on which stands the light of *Audierne*, and which terminates on the east the road of *Gob-estan*. In such a case as this the name helps to a probable conclusion. [G. L.]

GOBANNIO, in Britain, mentioned in the 12th Itinerary, probably = Aber-*garenny* in Wales. [R.G.L.]

GOGANA (Γώγανα, Arrian, *Ind.* c. 38), a small place on the coast of Persis, to which the fleet of Nearchus came, at the mouth of a small stream or torrent called the Areon. It is now called *Konkún*. (Vincent, *Voy. of Nearchus*, vol. i. p. 385.) [V.]

GOGARE'NE (Γωγαρηνή), a canton of Armenia, which Strabo (xi p. 528) places to the N. of the Cyrus. It is the same as the Armenian *Koukar* or *Kowkark'h*, and is represented by the modern *Akhaltskhaï*, lying between *Guria*, *Imiretia*, *Georgia*, and the river *Joràk*. St. Martin (*Mém. sur l'Armenie*, vol. i. p. 81) corrects the reading Ὠσαρηνοί in Stephanus of Byzantium (*s. v.*) into Γωγαρηνοί. [E. B. J.]

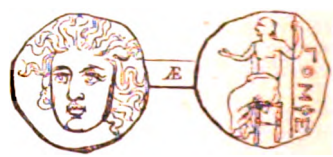
GOLGI (Γολγοί: *Eth.* Γόλγιος, Γολγία, Γολγηΐς, Steph. B.), a town of Cyprus, famous for the worship of Aphrodite (Theocr. xv. 100; Lycophr. 589; Catull. xxxvi. 15, *Nupt. Pel. et Thet.* 96), which, according to legend, had existed here even before its introduction at Paphos by Agapenor. (Pausan viii. 5. § 2.) The town is mentioned by Pliny (v. 35); but its position is not known. (Engel, *Kypros*, vol. i. p. 145, vol. ii. p. 81.) [E.B.J.]

GOLGOTHA MONS. [Jerusalem.]

GOLOE. [Cabyle.]

GOMPHI (Γόμφοι, Strab. ix. p. 437; Steph. B. *s. v.*: *Eth.* Γομφός, Γομφεύς, Gomphensis), a town of Histiaeotis in Thessaly, situated upon a tributary of the Peneius, and near the frontiers of Athamania and Dolopia. Its position made it a place of historical importance, since it guarded two of the chief passes into the Thessalian plains: "that of *Musáki*, distant two miles, which was the exit from Dolopia, and the pass of *Portes*, at a distance of four miles, which led into Athamania, and through that province to Ambracia." (Leake, *Northern Greece*, vol. iv. p. 521.) In the war against Philip, Amynander, king of the Athamanes, in co-operation with the Roman consul Flamininus, having descended from the latter pass ("Fauces angustae, quae ab Athamania Thessaliam dirimunt"), first took Pheca, a town lying between the pass and Gomphi, and then Gomphi itself, B. C. 198. The possession of this place was of great importance to Flamininus, since it secured him a communication with the Ambracian gulf, from which he derived his supplies. The route from Gomphi to Ambracia is described by Livy as very short but extremely difficult. The capture of Gomphi was followed by the surrender of the towns named Argenta, Pherinum, Thimarum, Listar, Stimo, and Lampsus, the position of which is quite uncertain. (Liv. xxxii. 14, 15.) When Athamania revolted from Philip in B. C. 189, he marched into their country by the above-mentioned pass, but was obliged to retire with heavy loss. (Liv. xxxviii. 2.) There can be no doubt that it was by the same route that the Roman consul Q. Marcius Philippus marched from Ambracia into Thessaly in B. C. 169. (Liv. xliv. 1.) In the campaign between Caesar and Pompey in B. C. 48, the inhabitants of Gomphi, having heard of Caesar's repulse at Dyrrhachium, shut their gates against him, when he arrived at the place from Aeginium; but he took the place by assault in a few hours. Caesar, in his account of these events, describes Gomphi as the "first town in Thessaly to those coming from Epirus." (Caes. *B. C.* iii. 80; Appian, *B. C.* ii. 64; Dion Cass. xli. 51.)

The Greek geographer Meletius placed Gomphi at *Stagús*, but, from an inscription found at *Stagus*, it is clear that this is the site of Aeginium. [Aeginium.] Leake, however, has shown that Gomphi is represented by *Episkopí*, which is the name of an uncultivated height lying along the left bank of the *Blíuri*, at a distance of two or three miles from the mountains. On this height there are still some remains of the ancient town. The modern name is owing to the fact of Gomphi having been a bishopric in later times. (Hierocl. p. 642.) Leake places Pheca at a small village called *Bletzi*, midway between the hill of *Episkopí* and the pass of *Portes*. (Leake, *Northern Greece*, vol. iv. p. 519. seq.)



COIN OF GOMPHI.

GO'NGALAE. [Libya.]

GO'NGYLUS. [Sellasia.]

GONNO-CONDYLON. [Condylon.]

GONNUS or GONNI (Γόννος, Herod., Strab.; Γόννοι, Polyb., Steph. B.: *Eth.* Γόννιος, also Γοννεύς, Γονατᾶς, Steph. B. *s. v.*), an ancient town of the Perrhaebi in Thessaly, which derived its name, according to the later Greek critics, from Gonneus, mentioned in the Iliad. (*Il.* ii. 748; Steph. B. *s. v.* Γοννοί.) Its position made it one of the most important places in the north of Thessaly. It stood on the northern side of the Peneius, near the entrance of the only two passes by which an enemy can penetrate into Thessaly from the north. The celebrated vale of Tempe begins to narrow at Gonni; and the pass across Mt. Olympus a little to the west of Tempe leads into Thessaly at Gonni. It was by the latter route that the army of Xerxes entered Thessaly. (Herod. vii. 128, 173.) The position of Gonni with respect to Tempe is clearly shown by

Digitized by Google

the numerous passages in which it is mentioned by Livy. After the battle of Cynoscephalae, in B. C. 197, Philip fled in haste to Tempe, but halted a day at Gonni, to receive such of his troops as might have survived the battle. (Liv. xxxiii. 10; Polyb. xviii. 10.) In the war against Antiochus, in B. C. 191, when the king, having marched from Demetrias, had advanced as far north as Larissa, a portion of the Roman army under the command of App. Claudius marched through the pass across Mt. Olympus, and thus arrived at Gonni. On this occasion Livy says that Gonni was 20 miles from Larissa, and describes it as situated "in ipais faucibus saltus quae Tempe appellantur." (Liv. xxxvi. 10.) In B. C. 171 it was strongly fortified by Perseus; and when this monarch retired into Macedonia, the Roman consul Licinius advanced against the town, but found it impregnable. (Liv. xlii. 54, 67.) Gonni does not occur in history after the wars of the Romans in Greece, but it is mentioned by Strabo (ix. p. 440; Ptol. iii. 13. § 42).

The site of Gonni is fixed by Leake at a place called *Lykóstomo*, or the "Wolf's Mouth," in the vale of *Dereli*, at the foot of a point of Mt. Olympus, about a mile from the Peneius. Here are some remains of a Hellenic city, mixed with other ruins of a later date. It would therefore appear that the town of LYCOSTOMIUM (Λυκοστόμιον), which occurs in Byzantine history as early as the eleventh century (Cantacuz. ii. 28, iv. 19), was built upon the site of Gonni. (Leake, *Northern Greece*, vol. iv. p. 388.)

GONOESSA, GONUSSA. [PALLENE.]

GOPHNA (Γόφνα, Joseph.; Γοῦφνα, Ptol.), a town of Palaestine, situated in the country of Benjamin. It gave its name to one of the ten toparchies (Γοφνιτικὴ τοπαρχία, Joseph. *B. J.* iii. 3. § 5; "toparchia Gophnitica," Plin. v. 14). Josephus reckons it second in importance to Jerusalem, and usually joins it with Arcahatta. It was one of four cities taken by Cassius and reduced to slavery (*Ant.* xiv. 11. § 2), but restored to freedom by a decree of Marcus Antonius, after the battle of Philippi (12. §§ 2, 3). It was taken by Vespasian in his last campaign in Palaestine (*B. J.* iv. 9. § 9), and, as Titus marched on Jerusalem by way of Caesareia and Samaria, he passed through Gophna (v. 2. § 1). Eusebius makes it the Φάραγξ Βότρυος, Vallis Botri, or Eshcol of Holy Scripture, — its name being identical in signification, — (from אֶשְׁכּוֹל, *a vine*), which proves the fertility of the place in his days. He places it 15 miles from Jerusalem, on the road to Neapolis (*Nablouse*), in near agreement with the Peutinger Tables, which state the distance at 16 miles. The site is still marked by an inconsiderable Christian village, retaining its ancient name unchanged, pronounced by the natives *Jufna*. It is situated in a deep basin formed by the concurrence of several valleys, and surrounded on all sides by hills. Considerable traces of the Roman road between this town and Jerusalem, are to be seen to the south of the village. The soil around is remarkably fertile, and its grapes are celebrated throughout the country. (Robinson, *Bib. Res.* vol. iii. pp. 77—79.) [G. W.]

GORDIUM (Γόρδιον), a town of Bithynia, a little to the north of the river Sangarius, was in later times called Juliopolis. This city must have been of considerable antiquity, having been the residence of the ancient Phrygian kings: but in the time of Strabo (xii. p. 568) it had sunk to the condition of a mere village it appears, however, that it was rebuilt and enlarged in the time of Augustus under the name of Juliopolis, and thenceforth it continued to flourish for several centuries. (Strab. *l. c.* p. 574; Polyb. fxii. 20; Liv. xxxviii. 18; Plin. v. 42; Ptol. v. 1. § 14.) In the time of Justinian it had suffered from the inundations of the river Scopas, and was therefore repaired by that emperor. (Procop. *de Aed.* v. 4.) Gordium is celebrated in history as the scene of Alexander's cutting the famous Gordian knot. This adventure took place in the acropolis of the town, which had been the palace of king Gordius. (Arrian, *Anab.* i. 29, ii. 3; Q. Curt. iii. 1, 12; Justin, xi. 7.) [L. S.]

GORDIUTI'CHOS (Γορδίου τεῖχος), a town in Caria, one day's march from Antioch. (Liv. xxxviii. 13.) Steph. B. says that it was founded by Gordius, a son of Midas, whence it must once have belonged to Phrygia. [L. S.]

GORDYE'NE, GORDYE'NI. [CORDYENE.]

GORGON or URGO (Γοργών, Ptol. iii. 1. § 78: *Gorgona*), a small island in the Tyrrhenian sea, between the coast of Etruria and Corsica, and distant about 20 miles from the mainland. Its name is written Urgo by Pliny and Mela; but Rutilius, who describes it in his poetical itinerary, calls it Gorgon, and this form is confirmed by the authority of Ptolemy (*l. c.*), as well as by its modern name of *Gorgona*. (Plin. iii. 6. s. 12; Mel. ii. 7. § 19; Rutil. *Itin.* i. 515.) It is a small island, only about 8 miles in circumference, but elevated and rocky, rising abruptly out of the sea, which renders it a conspicuous object from a distance. Between it and the port of *Livorno* is the islet of *Meloria*, a mere rock, which is supposed to be the Maenaria of Pliny. [E. H. B.]

GO'RGYLUS. [LACONIA.]

GORNEAS, a fortress in the north of Armenia (Tac. *Ann.* xii. 45), which D'Anville identifies with *Khorien*. [E. B. J.]

GORTYN, GORTYNA (Γορτύν, Γόρτυνα: *Eth.* Γορτύνιος), a town of Crete which appears in the Homeric poems, under the form of Γορτύν (*Il.* ii. 646, *Od.* iii. 294); but afterwards became usually Γόρτυνα (comp. Tzchuck *ad Pomp. Melam*, vol. iii. pt. ii. p. 811), according to Steph. B. (*s. v.*) it was originally called Larissa (Λάρισσα) and Cremnia (Κρήμνια).

This important city was next to Cnossus in importance and splendour; in early times these two great towns had entered into a league which enabled them to reduce the whole of Crete under their power; in after-times when dissensions arose among them they were engaged in continual hostilities (Strab. x. p. 478). It was originally of very considerable size, since Strabo (*l. c.*) reckons its circuit at 50 stadia; but when he wrote it was very much diminished. He adds that Ptolemy Philopator had begun to enclose it with fresh walls; but the work was not carried on for more than 8 stadia. In the Peloponnesian War, Gortyna seems to have had relations with Athens. (Thuc. ii. 85). In B. C. 201, Philopoemen, who had been invited over by the inhabitants, assumed the command of the forces of Gortyna. (Plut. *Philop.* 13.) In B. C. 197, five hundred of the Gortynians, under their commander, Cydas, which seems to have been a common name at Gortyna, joined Quinctius Flamininus in Thessaly (Liv. xxxiii. 3.)

Gortyna stood on a plain watered by the river Lethaeus, and at a distance of 90 stadia from the Libyan Sea, on which were situated its two harbours, Lebena and Metallum (Strab. *l. c.*), and is men-

Digitized by Google

tioned by Pliny (iv. 20), Scylax (p. 19), Ptolemy (iii. 17. § 10), and Hierocles, who commenced his tour of the island with this place.

In the neighbourhood of Gortyna, the fountain of Sauros is said to have been surrounded by poplars which bore fruits (Theophrast. *H. P.* iii. 5); and on the banks of the Lethaeus was another famous spring, which the naturalists said was shaded by a plane-tree, which retained its foliage through the winter, and which the people believed to have covered the marriage-bed of Europa and the metamorphosed Zeus. (Theophrast. *H. P.* i. 15; Varr. *de Re Rustic.* i. 7; Plin. xii. 1.)

The ruins of Gortyna, as they existed previously, have been described more or less diffusely by various writers (Belon, *Les Observ. des plus Singul.* p. 8; Tournefort. *Voyage du Levant*, pp. 58—64; Pococke, *Trav.* vol. ii. pt. i. pp. 252—255; Savary, *Lettres sur la Grèce*, xxiii.); their statements, along with the full account of the Venetian MS. of the 16th century, will be found in the *Museum of Classical Antiquities*, vol. ii. pp. 277—286. The site of Gortyna cannot, till the survey of the island is completed, be made out, but Mr. Pashley (*Trav.* vol. i. p. 295) has placed it near the modern *Hagios Ilhéka*, where the ten Saints of Gortyna, according to tradition, suffered martyrdom in the reign of Decius (comp. Cornelius, *Creta Sacra*, vol. i. pp. 156—166). In this neighbourhood is the cavern which Mr. Cockerell (Walpole, *Memoirs*, vol. ii. pp. 402—406) has conjectured to be the far-famed labyrinth; but as the ancients, with the exception of Claudian (*Sext. Cons. Hon.* 634), who, probably, used the name of the town as equivalent to Cretan, are unanimous in fixing the legend of the Minotaur at Cnossus, the identification must be presumed to be purely fanciful. The coins of Gortyna are of very ancient workmanship. Besides the autonomous, there are numerous imperial coins, ranging from Augustus to Hadrian. (Eckhel, vol. ii. p. 312; Sestini, p. 82.) [E. B. J.]

COIN OF GORTYNA.

GORTY'NIA (Γορτυνία, Γορδονία: *Eth.* Γορδυνιάτης, Steph. B.; Γορδηνία, Γορδουνία, Ptol. iii. 13. § 39), a place in Macedonia which the host of Sitalces passed in their march between Idomene and the plains of Cyrrhus and Pella (Thuc. ii. 100). Hence its position must be looked for in the upper valley of the river Axius. (Leake, *Northern Greece*, vol. iii. p. 444.) [E. B. J.]

GORTY'NIUS. [Gortys.]

GORTYS, or GORTYNA (Γόρτυς, Paus, viii. 27. § 4; Γόρτυνα, Paus. v. 7. § 1, Pol. iv. 60. § 3, Plin. iv. 6. s. 10), a town of Arcadia in the district Cynuria, situated near the river Gortynius (Γορτύνιος), also called Lusius (Λούσιος) nearer its sources, which was a tributary of the Alpheius, and was remarkable for the coldness of its waters. The town is said to have been founded by Gortys, a son of Stymphalus, and is described by Pausanias as a village in his time, though it had formerly been a considerable city. Most of its inhabitants were removed to Megalopolis upon the foundation of the latter city in B. C. 371; but it must have continued to be a place of some importance, since Polybius says that it was taken by Euripidas, the general of the Eleians, in the Social War, B. C. 219. At that time it was subject to Thelpusa. It contained a celebrated temple of Asclepius, built of Pentelic marble, and containing statues of Asclepius and Hygieia by Scopas. Cicero alludes to this temple, when he says (*de Nat. Deor.* iii. 22) that near the river Lusius was the sepulchre of one of the Aesculapii, of whom he reckoned three. Its ruins are seen upon a height near the village of *Aitéka*. There are still remains of its principal gate and of its walls, consisting of polygonal masonry. (Paus. v. 7. § 1, viii. 4. § 8, viii. 27. § 4, 28. §§ 1, 2; Pol., Plin. *ll. cc.*; Leake, *Morea*, vol. ii. p. 24; *Peloponnesiaca*, p. 233; Curtius, *Peloponnesos*, vol. i. p. 349, seq.)

GORYA (Γώρυα, Ptol. vii. 1. § 43), the capital of the small district of Goryaea (Γωρυαία, Ptol. vii. 1. § 42), in the country at the foot of the *Hindu-Kush*, to the N. of the *Panjab*, on the banks of the Suastus, one of the tributaries of the Cophes or River of Cábul. The Suastus is, doubtless, the *Suvastu*, or *Suwad* (Lassen's *Karte v. Alt-Indien*). There is a manifest connection between this name and its territory and the Guraei and Guraeus, and there can be hardly any doubt that they refer to the same people and localities. In Arrian (iv. 23) Alexander crosses the Guraeus (Γουραῖος) with some difficulty, and passes through the country of the Guraei (Γουραῖοι), on his way to attack the Assaceni or Aspasii (*Açvaka.*) Here the Suastus and Guraeus are probably the same, and, as Forbiger suggests, only other names for the Choaspes or *Khonár*, one of the tributaries of the Cophes or *Cabul* river from the north. In another place Arrian distinguishes the two rivers; stating that the Cophes flowed into Peucelaotis, carrying with it its tributaries, the Malamantus, Soastus, and Garua (Γαρόα, Arrian, *Ind.* c. 4). In Lassen's Map appears a stream called the *Gauri*, to the W. of the *Súvastú*, which probably represents the name of this stream and people. In the Mahábhárata are found Súvastú, Gáuri, and Campaná—rivers of this part of the country; the second is no doubt the Greek Guraeus. Pott suggests another derivation which seems much less probable (*Etym. Forsch.* p. xlvi.) [V.]

GORYAEA [Gorya].

GORYS (Γώρυς, Strab. xv. p. 697), a small town of Bactriana, near the junction of the Choaspes and Cophes. The passage in Strabo in which the name occurs is very corrupt, and has led to various readings. The older editions read παρὰ Γωρύλιν πολίν, and hence made Gorydale the name of the place. The later ones of Coray, Groskurd, and Kramer have παρὰ Γώρυδι ἄλλην πολιν, which seems to be a preferable reading, and gives Gorys for the name of the place. The similarity of the sound, and the neighbourhood of the place, suggest a connection between it and Gorya. [V.]

GOTHI, GOTONES, GOTHONES, GUTAE, GUTTONES (Γόθοι, Γόττοι, Γοῦθαι, Γουτωνες), a tribe of Germans, noticed even by Pytheas of Marseilles, in his account of the coasts of the Baltic. (Plin. xxxvii. 2.) According to him, they dwelt about the Aestuarium Oceani Mentonomon

the *Frische Haff*). Tacitus (*Germ.* 43), who places them beyond the Lygii, that is, on the north-east of them, points to the same district, though he does not intimate that they were inhabitants of the coast. Ptolemy (iii. 5. § 20) mentions them under the name of Γύθωνες as a Sarmatian tribe, and as dwelling on the east of the Vistula, and in the south of the Venedae or Wends; so that he, too, does not place them on the sea-coast. Strabo (vii. p. 290) speaks of the *Butones* (Βοῦτωνες) as a tribe subject to king Marobodnus, which agrees with the story of young Catualda, the Goth, in Tacitus (*Ann.* ii. 62). The later form of the name of this people, *Gothi*, does not occur until the time of Caracalla (Spartian. *Carac.* 10. *Antonin. Get.* 6), and approaches the native name of the people, *Gutthiuda*, which is preserved in the Fragments of Bishop Ulphilas.

From the statements above referred to, it is manifest that in the earliest times the Gothi, or Goths, as we shall henceforth call them, inhabited the coast of modern Prussia from the Vistula as far as Braunsberg or Heiligenbeil, where the country of the Venedae commenced. After the time of Tacitus we hear no more of the Goths until the beginning of the third century, when, simultaneously with the appearance of the Alemanni in the west, the Goths are spoken of as a powerful nation on the coasts of the Black Sea. The emperor Caracalla, on an expedition to the East, is said to have conquered the Goths in several engagements (Spartian. *Carac.* 10); Alexander Severus soon discovered that they were most dangerous neighbours of the province of Dacia; for those German tribes on the Lower Danube showed as determined a hostility against the Romans as their brethren on the Rhine. The most formidable of these tribes were the Goths, who now occupied the countries once inhabited by the Sarmatian Getae and Scythians, whence they themselves are sometimes called Getae or Scythians, as, for example, in Procopius, Capitolinus, Trebellius Pollio, and even by their own historian Jornandes. In the reign of the emperor Philippus (A. D. 244—249) they took possession of Dacia, and laid siege to Marcianopolis, the capital of Moesia Secunda, which purchased peace for a large sum of money. (Jornand. *de Reb. Goth.* 16.) Afterwards, however, they again ravaged Moesia: in A. D. 250 they indeed retreated before the army of Decius in the neighbourhood of Nicopolis, on the Danube; but not long afterwards they annihilated the whole Roman army near Philippopolis at the foot of Mount Haemus. (Jornand. *l. c.* 18; Amm. Marc. xxxi. 5.) The Goths now poured down upon Macedonia and Greece, and advanced as far as Thermopylae; but the pass was well guarded, and the invaders were obliged to return northward: in Moesia, however, they defeated Decius a second time, and destroyed his whole army near Abrutum or Forum Trebonii. (Zosim. i. 23; Aurel. Vict. *de Caes.* 29, *Epit.* 29; Syncell. p. 375; Zonar. xii. 20, foll.; Amm. Marc. xxxi. 13.) Meanwhile the Goths extended more and more on the east of the Euxine; and having become possessed of a fleet, they sailed in A. D. 253 with a large number of boats against Pityus. Meeting with a powerful resistance there, they raised the siege; but they afterwards returned and took the town. Trapezus experienced the same fate; and in its harbour the barbarians captured a large fleet, with which they sailed away, in A. D. 258. In the following year they undertook a fresh expedition against the Thracian Bosporus, in which they conquered Chalcedon, Nicomedeia, Nicaea, Prusa, Apamea, and Cius. A third expedition, undertaken with a fleet of 500 ships, was still more terrible for the Roman empire. They landed at Cyzicus, which they destroyed; then sailed down the Aegean, and made a descent upon Attica: the whole coast, from the south of Peloponnesus as far as Epirus and Thessaly, was ravaged in a fearful manner, and Illyricum was literally ransacked. At length, apparently tired of their roving expeditions, a portion of the Goths returned through Moesia and across the Danube into their own country, on the north-west of the Euxine: the remainder continued their devastations on the coast of Asia Minor; but afterwards they also returned home. (Zosim. i. 32, foll.; Trebell. Poll. *Gallien.* 5, 6, 13; Jornand. 20; Zonar. xii. 26; Oros. vii. 22; Syncell. p. 382.) But they did not remain quiet for any length of time; for in A. D. 269 they undertook another vast maritime expedition, in which, notwithstanding many reverses in Thrace and on the coast of Asia Minor, they ravaged Crete and Cyprus, and laid siege to Cassandreia and Thessalonica. At length, however, the emperor Claudius, in A. D. 269, gained a brilliant victory over the Goths in three great battles, from which he derived the surname *Gothicus*. (Trebell. Poll. *Claud.* 8, foll.; Zosim. i. 43, foll.; Zonar. xii. 29, foll.) Although only few returned to their own country after these battles, the Gothic tribes still continued to harass the frontiers of the Roman empire under the two successors of Claudius; and Aurelian was even obliged, in A. D. 272, to cede to them the large province of Dacia. (Zosim. i. 48, foll.; Eutrop. ix. 15; S. Ruf. 9; Amm. Marc. xxxi. 6.) There now followed a period of about 50 years, during which the Goths appear to have remained quiet, except that in the reign of Tacitus they made an unsuccessful expedition into Colchis and Asia Minor. (Zosim. i. 53; Vopisc. *Tacit.* 13.) At the time when Constantine had overcome all his enemies, the Goths again came forward against the Romans, but soon concluded peace. (Zosim. ii. 21; Jornand. 21.) In A. D. 332 their king Araric crossed the Danube: in his first encounter with Constantine he was successful; but in a second engagement he was worsted, and, as his own dominion was invaded by the inhabitants of the Crimea, he concluded a peace. The consequence was, that henceforth, so long as the family of Constantine occupied the imperial throne, that is, till A. D. 363, the Goths never made any attack upon the frontiers of the empire. Their great king Hermanric never made war against the Romans. In the reign of Valens the western portion of the Goths carried on a war against the Romans, which lasted three years (from A. D. 367—369), but in which no decisive battle was fought, and which was terminated by a peace, in which the Goths acted the part of victors. (Amm. Marc. xxxvii. 4, 5; Themist. *Orat.* x. p. 129, foll.) At the time when the Huns invaded Europe from the east, the southern portion of the branch of the Goths, called Visigoths, took refuge in the country on the right of the Danube, imploring the emperor of Constantinople to admit them and protect them against the barbarians; in A. D. 375 they accordingly crossed the Danube under their chiefs, Fridigern and Alavivus, amounting to 200,000. The Ostrogoths, another part of the nation, being refused admission into the Roman empire, took refuge in the mountains with their king Atha-

naric. The Visigoths, when settled in Moesia, were insolently treated by their protectors, in consequence of which they attacked and defeated the Roman general Lupicinus, traversed the neighbouring countries, and, conjointly with the bands of Goths that served in the Roman armies and with others of the Ostrogoths, defeated the Roman army near Adrianople, where the emperor Valens himself lost his life, A. D. 378. The Visigoths then appeared before Constantinople, but without being able to take it, and advanced westward as far as the Julian Alps. In the reign of Theodosius they spread devastation both in the south and in the north; and their hosts, though reduced by many reverses, remained masters of Thrace and Dacia (Jornand. 26), for their numbers were constantly increased by fresh reinforcements from the north, and the court of Constantinople saw no other way of securing itself against their attacks than by forming friendly relations with them, and making them an integral part of the empire. (Oros. vii. 34; Socrat. v. 10; Themist. *Orat.* xvi. p. 252, foll.; Zosim. iv. 56.) Henceforth the Goths were regularly engaged in the service of the Roman empire; but after the death of Theodosius, swarms of Goths, under the command of Alaric, quitted Thrace, advanced unmolested through the pass of Thermopylae towards Thebes and Athens, plundered Argos, Corinth, and Sparta, and then returned to Epirus, where they remained. (Zosim. v. 5, foll. 26.) In the meantime Gaina, another chief in the east, attempted to make himself master of Constantinople and put himself at the head of the empire, but was compelled to withdraw with his army across the Danube. (Zosim. v. 13, foll.; Socrat. vi. 6.) After this Alaric again appears in the service of the empire with the title of *Dux Illyrici*, whence he made an invasion into Italy, but was obliged to withdraw, about A. D. 400. (Claudian, *de Bell. Get.* 535; Jornand. 29; Oros. vii. 37.) His example, however, was followed by Radagaisus, who, in A. D. 405, crossed the Alps with a numerous army of Goths, though apparently without producing any results. Alaric himself then again poured down his hosts upon Italy, and thrice advanced to Rome, which had not seen an army of northern barbarians within its walls since its capture by the Gauls. From Rome Alaric turned to the south of Italy, where death cut short his victorious career. In A.D. 412 the Goths quitted Italy, the south of Gaul being given up to them; after having remained there for a short time, they crossed the Pyrenees and took possession of a large part of Spain, where Athaulf, the successor of Alaric, was assassinated. His successor, Wallia, assisted the Romans against the Vandals and Alani in Spain, and was rewarded by a portion of Western Gaul, from Tolosa to the ocean. The succeeding kings of the Goths extended their empire on both sides of the Pyrenees, and the kingdom reached its highest point of prosperity during the latter half of the fifth century under Euric. The empire of the Visigoths then embraced the greater part of Spain and a large portion of Gaul, and the kings resided at Tolosa, Arelate, or Burdigala; but after Euric's death the Goths in Gaul were compelled to retreat before the Franks, while in Spain their empire was overthrown about two centuries later by the Saracens.

At the time when the Visigoths were received by the emperor Valens within the Roman dominion, the application of the Ostrogoths, as already stated, was rejected; but they took the first opportunity of crossing the Danube notwithstanding, and joined Fridigern, during whose expedition to the south, however, they marched into Pannonia. (Ammian. Marc. xxxi. 5, 12; Jornand. 27.) In the reign of Theodosius, when the Visigoths had become reconciled with the Romans, there appeared a new host of Ostrogoths about the mouth of the Danube, but in attempting to cross the river they were completely defeated by the Romans. (Zosim. iv. 35; Claudian, *de IV. Cons. Hon.* 623, foll.) During the ascendancy of the Huns, the Ostrogoths did not by themselves commit any act of hostility against the Romans, but joined Attila in his expedition into Gaul. (Jornand. 38.) After the overthrow of the Huns the Ostrogoths appear again in Pannonia, which was ceded to them, and the Eastern empire was in fact obliged to purchase their peace with large sums of money. But after some time the Ostrogothic king Widemir led his hosts into Italy; but his son, being prevailed upon by the emperor Glycerius by presents, quitted the country to join the Visigoths in the west. In the meantime other hosts under different leaders traversed the Eastern empire, and finally received settlements in the country between the Lower Danube and Mount Haemus, in the very heart of the empire. The town of Nova in Moesia is said to have been the residence of their king Theodoric, who, in A. D. 489, on the instigation of the emperor Zeno, entered on his grand expedition, the object of which was the conquest of Italy. He was successful, and established the kingdom of the Ostrogoths in the heart of Italy, upon the ruins of the kingdom of Odoacer. The new empire was so powerful that during the lifetime of Theodoric no one ventured to attack it. But his death involved the downfall of his kingdom; for while the members of his family were embroiled in domestic feuds, the kingdom was attacked by foreign enemies, and, though it was bravely defended, became a prey of the Eastern empire, and the Ostrogoths ceased to be an independent people.

Such is a sketch of the history of the Goths and their two chief branches down to their disappearance from history. The part which they acted in the history of the Roman empire was so important and conspicuous, that down to the present day their name is often used as synonymous with Germans, although they were only a branch of the great German nation. Having traced their history, we shall now subjoin a brief account of the various tribes of which the nation of the Goths consisted, and of their sub-divisions. Pliny (iv. 28) describes the Goths as belonging to the groups of tribes which he calls *Vindili*, while some modern critics regard them as a part of the *Istaevones*. Thus much, however, is certain, that ever since the beginning of the third century the name Goths embraced the German tribes occupying the south-eastern part of the country. The different branches making up the Gothic group are the following: —

1. The *Gothi minores*, also called *Moesogothi*, were the branch of the Western Goths who, after having received permission to settle in Moesia, remained there in fixed habitations, applying themselves to the peaceful pursuits of agriculture. (Jornand. 51, 52.)

2. *Gothi Tetraxitae*, belonging to the Eastern Goths on the Palus Maeotis (Procop. *Bell. Goth.* iv. 4, 5, 18): they maintained their national peculiarities for a long period.

3 The *Taifalae*, on the Danube in Dacia, were

Digitized by Google

a part of the Western Goths. (Amm. Marc. xvii. 13, xxxi. 3; Eutrop. viii. 2.)

4. The *Gepidae.* [GEPIDAE.]
5. The *Rugii.* [RUGII.]
6. The *Sciri* and *Turcilingi*; see these articles.
7. The *Heruli* [HERULI], and
8. The *Juthungi.* [JUTHUNGI.]

Some writers also include the Alani and Vandali among the Goths; but see ALANI and VANDALI. The whole nation of the Goths, in the strict sense of the name, was divided into two main groups or tribes, the *Ostrogothi*, occupying the sandy steppes in the east, and the *Visigothi*, inhabiting the more fertile and woody countries in the west. The former occur under the names of *Austrogothi* (Pollio, *Claud.* 6) and *Ostrogothi* (Claudian, *in Eutrop.* ii. 153). The earliest traces of the name of the Visigoths (*Visigothi*), which occurs only in very late writers, are found in Sidonius Apollinaris (*Carm.* vii. 399, 431, v. 476) in the form *Vesus*; and in Cassiodorus (*Varr.* iii. 1, 3) we find *Vuisigothi* and *Vuisirigothae*; while Jornandes has *Wesegothae* and *Wisigothae.* As to the meaning of these names, there can be no doubt that they were derived from the countries occupied by the two branches of the nation, the one signifying the Eastern, and the other the Western Goths. Zosimus and Ammianus Marcellinus know neither of these two names, which do not appear to have been used until the time when the Goths were in possession of a large extent of country in the north of the Black Sea. The two writers just named frequently mention the *Greutungi* or *Grutungi* and the *Tervingi* or *Thervingi*, where they are evidently speaking of Goths. In regard to these names, different opinions are entertained by modern writers, some believing them to be merely local names, which accordingly disappeared after the migration of the Goths from the country north of the Euxine, whence they are not mentioned by Jornandes; others think that Grutungi is only another name for the whole of the Ostrogoths; but it is most probable that the Grutungi were the most illustrious tribe among the Ostrogoths, and that the Tervingi occupied the same rank among the Visigoths.

As the Goths were a thoroughly German race, their religion must, on the whole, have been that common to all the Germans; but ever since the time of Constantine the Great, Christianity appears to have gradually struck root among the Goths settled in Moesia (the Moeso-Goths), whence a Gothic bishop is mentioned as present at the council of Nicaea in A. D. 325. Their form of Christianity was probably Arianism, which was patronised by their protector Valens, and which was certainly the form of Christianity adopted by their celebrated bishop Ulphilas. Athanaric, one of their chiefs, however, made great efforts to destroy Christianity among his people, and punished those who resisted his attempts in a most cruel manner; but he did not succeed. The introduction of Christianity among these Goths, and the circumstance of their dwelling near and even among civilised subjects of the Roman empire, greatly contributed to raising them, in point of civilisation, above the other German tribes. Their bishop Ulphilas, in the fourth century, formed a new alphabet out of those of the Greeks and Romans, which in the course of time was adopted by all the German tribes, and is essentially the same as that still in general use in Germany, and is known in this country by the name of "black letter." (Socrat. *Hist. Eccl.* iv. 27; Sozom. vi. 36; Jornand. 51; Philostorg. ii. 5.) The same bishop also translated the Scriptures into the Gothic language, and this translation is the most ancient document of the German language now extant. Unfortunately, the translation has not come down to us complete; but the fragments are still quite sufficient to enable us to form an opinion of the language at that time. It contains many words which the Goths in their intercourse with Greeks and Latins borrowed from them, and a few others may have been derived from the Sarmatians or Dacians. Besides this translation of the Scriptures, we possess a few other monuments of the Gothic language, which, however, are of less importance. It may be observed here, by the way, that of all the Germanic dialects the Swedish is least like the Gothic, though there is a tradition according to which Scandinavia (Scandia) was the original home of the Goths. (Jornand. 4, 5.) The fact that Goths once did dwell in Scandinavia is indeed attested by a vast amount of evidence, among which the names of places are not the least important; but the probability is, that the Goths migrated to Scandinavia from the country east of the Vistula, even before they proceeded southward: at least Ptolemy (ii. 11. § 35) mentions *Gutae* (Γοῦται) in Scandia. The Visigoths, lastly, appear to have been the first of all the German tribes that had a written code of laws, the drawing up of which is ascribed to their king Euric in the fifth century. (Comp. Eisenschmidt, *de Origine Ostrogothorum et Visigothorum*, Jena, 1835; Zahn, Ulfilas's *Gothische Bibelübersetzung, &c.*, Weissenfels, 1805; Aschbach, *Geschichte der Westgothen*; Manso, *Gesch. der Ostgothen in Italien*, 1824, together with the works referred to at the end of the article GERMANIA, and Dr. Latham on Tacit. *Germ.* p. 162, and *Epilegom.* p. xxxviii., foll.) [L. S.]

GOTHI'NI or GOTI'NI, a tribe on the east of the Quadi and Marcomanni, that is, in the extreme south-east of ancient Germany, who, according to the express testimony of Tacitus (*Germ.* 43), spoke the Celtic language. Some believe that the Cotini, mentioned by Dion Cassius (lxxi. 12), and the Κόϊνοι of Ptolemy (ii. 11. § 21), are identical with the Gothini. Tacitus's description of their habitations, "Terga Marcomannorum Guadorumque claudunt," is somewhat ambiguous, whence some have placed them on the Vistula, in the neighbourhood of Cracow, while others understand Tacitus to refer to the south-east of the Quadi and Marcomanni, that is, the country now called Styria. Others again regard the country about the river March as the original seats of the Gothini: and this view derives some support from the fact that the names about the Lunawald are Celtic, and that the mountain contains ancient iron mines; for Tacitus expressly states that the Gothini were employed in iron mines. (Comp. Wilhelm, *Germanien*, p. 231, fol.; Duncker, *Orig. German.* i. p. 55, foll.; Latham, on Tacit. *Germ.* p. 156.) [L. S.]

GOTHONES. [GOTHI.]

GRAAEI (Γρααῖοι), a Paeonian tribe, situated on the Strymon. (Thuc. ii. 96.) [E. B. J.]

GRABAEI, a people and place in Illyricum (Plin. iii. 22. s. 26), perhaps *Grahovo* in the S. of the *Herzegowina.* [E. B. J.]

GRACCURRIS (*Eth.* Graccuritanus: near *Corella*), a town of the Vascones, in Hispania Tarraconensis, on the great road from Asturica to Tarraco, 64 M. P. west of Caesaraugusta. Its former name, Ilurcis, was changed in honour of Sempronius Grac-

Digitized by Google

chus, who placed new settlers in it, after his conquest of Celtiberia. It belonged to the *conventus* of Caesaraugusta, and was a *municipium*, with the *civitas Romana*. (Liv. *Fr.* xii., *Epit.* xii., comp. Freinsh. *Suppl.*, Liv. xii. 4; Festus, *s. v.*; Plin. iii. 3. s. 4; *Itin. Ant.* p. 450; Coins *ap.* Florez, *Med. de Esp.* vol. ii. p. 448; Mionnet, vol. i. p. 44, Suppl. vol. i, p. 88; Sestini, p. 52; Eckhel, vol. i. p. 50; Ukert. vol. ii. pt. 1. p. 448.) [P. S.]

GRADUM, AD, or GRADUS, AD. The Maritime Itin. of the south coast of Gallia makes it a distance of 16 M. P., "a fossis ad gradum Massilitanorum fluvius Rhodanus;" and then 30 M. P. "a gradu per fluvium Rhodanum Arelatum." The Fossae are the Fossae Marianae (*Foz-les-Martigues*), and "ad gradum" must be one of the old mouths of the Rhone. The site of "ad gradum" is supposed by some French writers to be *Galejon*. Ammianus Marcellinus (xv. 11) describes the Rhone as entering the sea "per patulum sinum quem vocant Ad Gradus." There may have been several Gradus at the mouths of the Rhone, for "gradus" is a landing-place, or steps for getting in and out of ships (Valer. Max. iii. 6); and D'Anville observes that the name Gradus is not limited to the mouths of the Rhone, but occurs on the coasts of Spain and Italy, where it is pronounced *Grao* and *Grado*. Ammianus places this "sinus" 18 miles from *Arles*, which is a great deal too little. The word "scala," a Latin word of the same meaning, adopted by the Greeks, is also used to signify a landing-place or maritime town in the eastern part of the Mediterranean. [G.L.]

GRAE'CIA, the name given by the Romans to the country called HELLAS (Ἑλλάς: *Eth.* Ἕλλην, pl. Ἕλληνες) by the inhabitants themselves. It is proposed in the following article to give a brief outline of the physical peculiarities of the country, and to make a few general remarks upon the characteristic features of its geography. The following sketch must be filled up by referring to the names of the political divisions of Greece, under which the reader will find a detailed account of the geography of the country. The general political history of the country, and discussions respecting its early inhabitants, are purposely omitted, as these subjects more properly belong to a history of Greece, and could not be treated here at sufficient length to be of real value to the student.

I. NAME.

The word *Hellas* was used originally to signify a small district of Phthiotis in Thessaly, containing a town of the same name. (Hom. *Il.* ii. 683; Thuc. i. 3; Strab. ix. p. 431; Dicaearch. p. 21, ed. Hudson; Steph. B. *s. v.* Ἑλλάς.) From this district the Hellenes gradually spread over the rest of Greece; but even in the time of Homer their name had not become common to the whole Greek nation. The poet usually calls the Greeks by the names of Danai, Achaei, or Argeii; and the only passage (*Il.* ii. 530) in which the name of Pan-Hellenes occurs was rejected by Aristarchus and other ancient commentators, as spurious. But at the commencement of Grecian history we find all the members of the Hellenic race distinguished by this name, and glorying in their descent from a common ancestor, Hellen. And not only so, but they gave to every district in which they were settled the name of Hellas, which was thus the land of the Hellenes, and did not indicate any particular country, bounded by certain geographical limits. In this general sense the most distant Hellenic colonies belonged to Hellas; and accordingly we read that the cities of Cyrene in Africa, of Syracuse in Sicily, and of Tarentum in Italy, formed as essential parts of Hellas as the cities of Athens, Sparta, and Corinth. (Comp. Herod. i. 182, iii. 136, vii. 157; Thuc. i. 12.)

Besides this extensive use of the word, as the land of the Hellenes, Hellas was also employed in a more restricted sense to signify all the country south of the Ambracian gulf and the mouth of the river Peneus, as far as the isthmus of Corinth. In this signification it is called by Dicaearchus and Scylax *Continuous Hellas* (ἡ Ἑλλὰς συνεχής), by modern writers *Hellas Proper*. The two former writers stated that Continuous Hellas commenced with the town and gulf of Ambracia on the Ionian sea, and extended as far as Mount Homole and the mouth of the Peneius, on the opposite side. Ephorus, in his manner, makes Hellas commence at Acarnania (Scylax, p. 12, ed. Hudson; Dicaearch. 31. p. 3; Ephor. *ap. Strab.* viii. p. 334.) According to these accounts, the northern frontier of Hellas was a line drawn from the Ambracian gulf upwards along Mt. Pindus, and then at right angles to the latter, along the Cambunian mountains, to the mouth of the Peneius. Epeirus consequently formed no part of Hellas; for, though there was a mixture of Hellenic blood among the Epeirot tribes, they differed too widely in their habits and general character from the great body of the Hellenes, to be entitled to a place among the latter. The same remark would apply, with even still greater force, to some of the mountaineers of Aetolia, who are described by Thucydides as eating raw meat and speaking a language which was unintelligible. (Thuc. iii. 102.)

There seems to have been some discrepancy respecting the exact boundaries of Hellas Proper. When the Aetolians called upon the last Philip of Macedon to withdraw from Hellas, he retorted by asking them where they would fix its boundaries? and by remarking them that the greater part of their own body were not Hellenes, adding, "The tribes of the Agraeans, of the Apodoti, and of the Amphilochi, are not Hellas." (Polyb. xvii. 5; quoted by Thirlwall, vol. i. p. 4.)

Herodotus, in opposition to the preceding accounts, appears to have extended the boundaries of Hellas north of the Ambracian gulf, and to have reckoned the Thesprotians as Hellenes. (Herod. ii. 56.) On the other hand, some ancient writers would even exclude Thessaly from Hellas, and would make as its northern boundary a line drawn from the Ambracian to the Malic gulf: but Dicaearchus justly argues that the country in which the original Hellas was situated ought surely to be included under this name (p. 21, seq.).

Peloponnesus, or the Island of Pelops, formed no part of Hellas Proper, although it was of course inhabited by Hellenes (Dicaearch. p. 20; Plin. iv. 4. s. 5); but sometimes Peloponnesus and the Greek islands were included under the general name of Hellas, in opposition to the land of the barbarians. (Dem. *Phil.* iii. p. 118; Diod. xi. 39; comp. Strab. viii. p. 334.) At a later period, when the Macedonian monarchs had become masters of Hellas, and had extended the Hellenic language and civilisation over a great part of Asia, Macedonia and the southern part of Illyria were included in Hellas. Thus we find that Strabo (vii. p. 332) calls Macedonia Hellas; but he immediately adds, *νυνὶ μέντοι τῇ φύσει τῶν τόπων ἀκολουθοῦντες καὶ τῷ σχήματι χωρὶς ἐχομεν αὐτὴν ἀπὸ τῆς ἄλλης Ἑλλάδος τάξει*, &c.

The reason why the Romans gave to Hellas the name of *Graecia*, and to the Hellenes the name of *Graeci*, cannot be ascertained; but it is a well-known fact that a people are frequently called by foreigners by a name different from the one in use among themselves. Thus, the people called Etruscans or Tuscans by the Romans, and Tyrrhenians or Tyrsenians by the Greeks, bore the name of Rasena among themselves; and the different names given to the Germans in their own country and among foreigners supplies a parallel instance in modern times. The word *Graeci* first occurs in Aristotle, who states that the most ancient Hellas lay about Dodona and the Achelous, and that this district was inhabited by the Selli, and by the people then called Graeci but now Hellenes. (Aristot. *Meteor.* i. 14.) The Selli are mentioned in the Iliad as the ministers of the Dodonaean Zeus. (Hom. *Il.* xvi. 234.) By Pindar they were called Helli; and Hesiod spoke of the country about Dodona under the name of Hellopia. (Strab. vii. p. 328.) We do not know what authority Aristotle had for his statement; but it was in opposition to the general opinion of the Greeks, who supposed the original abode of the Achaeans to have been in the Achaean Phthiotis, between Mounts Othrys and Oeta. According to another authority, Graecus was a son of Thessalus. (Steph. B. *s. v.* Γραικός.) In consequence of the statement of Aristotle it has been inferred that the name of Graeci was at one period widely spread on the western coast, and hence became the one by which the inhabitants were first known to the Italians on the opposite side of the Ionian sea. (Thirlwall, vol. i. p. 82.) After the conquest of Greece by the Romans the country was reduced into the form of a province, under the name of *Achaia*, and did not bear the name of Graecia in official language. [ACHAIA, p. 17.]

II. SITUATION, BOUNDARIES, AND SIZE.

Hellas is the southern portion of the most easterly of the three great peninsulas which extend from the south of Europe into the Mediterranean sea. These peninsulas are very different in form. Spain is an irregular quadrangle, possessing very little of the character of a peninsula, except in its northern part, where it is united by an isthmus to the rest of Europe. Italy does not commence with an isthmus, but projects from the continent in the shape of a long tongue of land, down which runs from north to south the back-bone of the Apennines, dividing it into two nearly equal parts. The most easterly of the three peninsulas commences with so large a breadth of country that one is hardly disposed to recognise at first its peninsular shape; but as it proceeds to the south it gradually assumes the form of a triangle. The base extends from the top of the Adriatic to the mouths of the Danube; and the two sides of the triangle are broken into a number of bays and gulfs, which form a series of peninsulas, the last and most perfect being the peninsula of Peloponnesus.

The great peninsula to which Hellas belongs is shut off from the rest of Europe by the lofty range of the *Balkan Mountains*, known in ancient times by the names of Haemus, Scomius, and the Illyrian Alps, which extend along the base of the triangle from the Euxine to the Adriatic. South of these mountains dwelt the various Thracian, Macedonian, and Illyrian tribes; but these formed no part of Hellas, though many modern geographers have designated their country by the name of Northern Greece, and have given to Hellas Proper the name of Middle or Central Greece. But Hellas Proper begins only at the 40th degree of latitude; and, including Epeirus under this name for the sake of convenience, is separated from Macedonia and Illyria by a well-defined boundary. At the 40th degree of latitude the peninsula is traversed from east to west by a chain of mountains, commencing at the gulf of Therma, in the Aegaean sea, and terminating at the Acroceraunian promontory, on the Adriatic. This chain was known in its eastern half by the names of Olympus and the Cambunian mountains, and in its western by that of Mount Lingon. On every other side Hellas was washed by the sea. At that period in the history of the world when the Mediterranean was the great highway of commerce and civilisation, no position could be more favourable than that of Hellas. It is separated from Asia by a sea, studded with islands within sight of one another, which even in the infancy of navigation seemed to allure the timid mariner from shore to shore, and rendered the intercourse easy between Hellas and the East. Towards the south it faces one of the most fertile portions of Africa; and on the west it is divided from Italy by a narrow channel, which in some parts does not exceed 40 geographical miles in breadth. An account of the seas which wash the Grecian coasts is given under their respective names. It is only necessary to mention here that the sea on the eastern side bore the general name of the Aegean, of which the southern portion was called the Cretan; that the sea at the southern end of the Peloponnesus was called the Libyan; and that the sea on the western side of Greece usually bore the name of the Ionian, of which the northern extremity was called the Adriatic gulf, while its southern end opposite Sicily was frequently named after that island. [AEGAEUM MARE; IONIUM MARE; ADRIATICUM MARE.]

Hellas, which commences at the fortieth degree of latitude, does not extend further than the thirty-sixth. It is well remarked by Thirlwall, that in one respect Greece stands in the same relation to the rest of Europe that Europe does to the other continents, — in the great range of its coast compared with the extent of its surface; so that, while its surface is considerably less than that of Portugal, its coast exceeds that of Spain and Portugal put together. Its greatest length, from Mount Olympus to Cape Taenarus, is not more than 250 English miles; its greatest breadth, from the western coast of Acarnania to Marathon in Attica, is about 180 miles; and the distance eastward from Ambracia across the Pindus to the mouth of the Peneius is about 120 miles. (Grote, vol. ii. p. 302.) Its area, as calculated by Clinton from Arrowsmith's map, exclusive of Epeirus, but including Euboea, is only 21,121 square English miles, of which Thessaly contains 5674 miles, the central provinces 6288 miles, Euboea 1410 miles, and Peloponnesus 7779 miles. (Clinton, *F. H.* vol. ii. p. 385.) The small extent of the surface of Greece will be more fully realised by recollecting the area of some of the smaller states of modern Europe, — Portugal containing 35,268 square English miles, the kingdom of Naples 31,350, and the kingdom of Sardinia 29,102. When it is further recollected that the small area of Hellas was subdivided among a number of independent states, — Attica, for example, containing only 720 miles, — the contrast is striking between the grandeur of the deeds of the people and the inconsiderable spot of earth on which they were performed. (Comp. A. P. Stanley, in *Classical Museum*, vol. i. p. 50.)

III. Configuration of the Surface.

The chain of Lingon and the Cambunian mountains is intersected at right angles, about midway between the Ionian and Aegaean seas, by the long and lofty range of Pindus, running from north to south, the back-bone of Greece, like the Apennines of the Italian peninsula. Mount Pindus forms the boundary between Thessaly and Epeirus. At the thirty-ninth degree of latitude, at a point in the range of Pindus called Mount Tymphrestus (now *Velukhi*), various branches radiate, as from a centre. On the east the two chains of Othrys and Oeta branch off towards the sea, the former running nearly due east, and the latter more towards the south-east. To the west of Tymphrestus there is no chain of mountains extending towards the western sea and corresponding to the gigantic twins of Othrys and Oeta, but only a continuation of the Epeirot mountains running from north to south. Southward of Tymphrestus the chain of Pindus, which here divides into two branches, no longer bears the same name. One strikes south-westward, and passes across Aetolia, under the names of Corax and Taphiassus, to the promontory of Antirrhium at the entrance to the Corinthian gulf, opposite the corresponding promontory of Rhium in Peloponnesus. The other diverges to the south-east, passing through Phocis, Boeotia, and Attica, under the names of Parnassus, Helicon, Cithaeron, and Hymettus, down to Sunium, the southernmost point of Attica; but even here it does not end, for the islands of Ceos, Cythnos, Seriphos and Siphnos may be regarded as a continuance of this chain.

Such is a brief sketch of the general direction of the mountain-ranges of Northern Greece; but it is now necessary to enter a little more into detail, referring the reader for a fuller account to the names of the political divisions of the country. Taking Mount Pindus again as our starting-point, we observe that from it two huge arms branch off towards the eastern sea, enclosing the plain of Thessaly, the richest and largest in all Greece. These two arms, which run parallel to one another at the distance of 60 miles, have been already mentioned under the names of the Cambunian mountains and Mount Othrys. The Cambunian mountains terminate upon the coast in the lofty summit of Olympus, which is the highest mountain in all Greece, being 9700 feet above the level of the sea, and scarcely ever free from snow. Mount Othrys reaches the sea between the Pagasaean and Malian gulfs. South of Olympus a range of mountains, first called Ossa and afterwards Pelion, stretches along the coast of Thessaly, parallel to Mount Pindus; Ossa is a steep conical peak, rising high into the clouds, and, like Olympus, generally covered with snow, while Pelion exhibits a broad and less abrupt outline. Thus Thessaly is enclosed between four natural ramparts, and is only accessible on the north by the celebrated vale of Tempe, between Mounts Olympus and Ossa, through which the Peneius finds its way to the sea. Towards the south, however, Thessaly was open to the sea, which here forms the extensive gulf of Pagasae, the cradle of Greek navigation, from whose shores the Argo was launched. Epeirus, the country to the west of Pindus, is of an entirely different character from Thessaly. It contains no plain of any extent, but is almost entirely covered with mountains, whose general direction, as already observed, is from north to south.

The mountains of the island of Euboea, which lies opposite to the coasts of Boeotia and Attica, may be regarded as only a continuation of the chain of Ossa and Pelion and of that of Othrys. The mountain-system of Euboea is further prolonged by the islands of Andros, Tenos, Myconos, and Naxos, belonging to the Cyclades.

At the foot of Mt. Lacmon (now *Zygos*), the point where Mount Pindus bisects the northern barrier of Hellas, four considerable rivers take their rise. Of these rivers two, the Aous and the Haemon, do not belong to Hellas; the former flows through Illyria, and the latter through Macedonia, but the other two, the Peneius and the Achelous, are the most important in Northern Greece. The Peneius flows with a slow and winding course through the plain of Thessaly, and finds its way into the sea through the pass of Tempe, as mentioned above; the Achelous, which is the larger of the two, flows towards the south through the rude and mountainous country of Epeirus, then forms the boundary between Acarnania and Aetolia, and after a course of 130 miles finally falls into the Ionian sea opposite the entrance of the Corinthian gulf.

A little south of Mt. Tymphrestus, at the thirty-ninth degree of latitude, Greece is contracted into a kind of isthmus by two opposite gulfs, the Ambracian on the west and the Malian on the east. This isthmus separates the peninsula of Middle Greece from the Thessalian and Epeirot mainland.

The peninsula of Middle Greece may again be divided into two unequal halves. The western half, which bears the names of Aetolia and Acarnania, is of the same character as Epeirus, with which it is connected by the Achelous. The branch of Mount Pindus which extends from Mount Tymphrestus in a south-westerly direction, here unites with the continuation of the Epeirot mountains, and forms rugged and inaccessible highlands, which have been at all times the haunt of robber tribes. There are, however, a few broad and fertile plains, through which the Achelous flows.

The eastern half of the peninsula of Middle Greece is traversed by the branch of Mount Pindus which extends from Mount Tymphrestus in a south-easterly direction. It is shut in on the north by the rugged pile of Oeta, extending from Tymphrestus to the sea at Thermopylae, and forming the barrier of this portion of the midland peninsula. The only pass through it is the celebrated one of Thermopylae, between the mountain and a morass upon the coast, which in one part is so narrow as to leave room for only a single carriage.

North of Oeta, and between this mountain and the nearly parallel range of Othrys, is a fertile valley about 60 miles in length, stretching eastward to the Malic gulf, and drained by the Spercheius, which rises at the foot of Mount Tymphrestus at the head of the valley and falls into the Malic gulf. Although this valley is usually considered a part of Thessaly, it is entirely separated from the great Thessalian plain by the range of Othrys.

It has been already remarked that the south-easterly continuation of Mount Pindus passes through Phocis, Boeotia, and Attica, under the names of Parnassus, Helicon, Cithaeron, and Hymettus, till it reaches the sea at Sunium. There is, however, another range, which takes its departure from the easterly extremity of Oeta, and extends along the coast of the Euboean sea, through the Locrian tribes and Boeotia, under the various names

Digitized by Google

of Cnemis, Ptoon, and Teumessus, till it joins Parnes, which is a lateral branch of Cithaeron extending from west to east. By means of Pentelicus, with its celebrated marble quarries to the south of Parnes, the range is further connected with the chain running from Cithaeron to Sunium.

Between Parnassus and Oeta is a narrow plain called Doris, from which the Dorians are said to have descended to the conquest of Peloponnesus. Here rises the Cephissus, which flows through the plain of Phocis and Boeotia, and falls into the lake Copais. Phocis possesses some fertile plains on the Cephissus, lying between Parnassus and the Locrian mountains. Boeotia is a large hollow basin shut in on every side by mountains, and containing a considerable quantity of very fertile land. Attica is another peninsula, resembling in shape the great peninsula to which Greece itself belongs. It is in the form of a triangle, having two of its sides washed by the sea, and its base united to the land. As the Cambunian range forms the outer, and Mount Oeta the inner barrier of Greece, so the chain of Cithaeron and Parnes, extending along the base of Attica, is a natural rampart protecting this country.

It has been already seen that the range of Cithaeron is continued towards the east under the name of Parnes. In like manner it is prolonged towards the south-west, skirting the shores of the Corinthian gulf and forming the mountainous country of Megaris. Here it rises into a new chain, between four and five thousand feet in height, under the name of the Geraneian mountains, which stretch across Megaris from west to east parallel to Cithaeron. It is highest on the western side, and gradually sinks down towards the Saronic gulf. The island of Salamis and its surrounding rocks are only a continuation of this chain. Southwards the Geraneian mountains sink down still more towards the isthmus which separates Hellas Proper from Peloponnesus. Here the Corinthian gulf on the west and the Saronic gulf on the east penetrate so far inland as to leave but a narrow neck of land between them, only four miles across at its narrowest part. The isthmus is comparatively level, being in its highest point not more than 246 feet above the level of the sea, but immediately to the south rise the lofty range of the Oneian hills, parallel to the Geraneian, with which they have often been confounded. Here stood the city of Corinth, with its impregnable fortress the Acrocorinthus, and here the isthmus opened out into the Peloponnesus.

Before proceeding to the description of Peloponnesus, it deserves remark that Strabo divides Greece into five peninsulas. The first is the Peloponnesus, separated by an isthmus of 40 stadia. The second is the one of which the isthmus extends from the Megarian Pagae to Nisaea, the harbour of Megara, being 120 stadia from sea to sea. The third is the one of which the isthmus extends from the recess of the Criasaean gulf to Thermopylae, an imaginary straight line, 508 stadia in length, being drawn, which includes within it the whole of Boeotia, and cuts across Phocis and the Locri Epicnemidii. The fourth has an isthmus of about 800 stadia, extending from the Ambracian gulf to the Malian gulf. The fifth isthmus is more than 1000 stadia, extending from the same Ambracian gulf through Thessaly and Macedonia to the Thermaic gulf. (Strab. viii. p. 334.)

The mountain-system of Peloponnesus has no connection with the rest of Greece. The mountains in Hellas Proper form an uninterrupted series of chains, running out from the mountains in the countries to the north of Greece. The mountains of Peloponnesus on the contrary, have their roots in Arcadia, the central district of the country, where they rise to a great height. Hence Arcadia has been aptly called the Switzerland of Peloponnesus, to which it stands in the same relation as Switzerland does to the rest of Europe. Upon closer inspection it will be seen that this Alpine district is encircled by an irregular ring of mountains, forming a kind of natural wall, from which lateral branches extend in all directions towards the sea.

The mountains forming the northern boundary of Arcadia are the loftiest and most massive. They extend from west to east, terminating in the magnificent height of Mount Cyllene (*Zýria*), 7788 feet above the level of the sea, the first of the Peloponnesian mountains seen by a person coming over the isthmus from Northern Greece. The most westerly point of this northern barrier is Erymanthus (*Olonos*), 7297 feet high; and between it and Cyllene are the Aroanian mountains (*Khelmós*), 7726 feet in height. The eastern boundary is also formed by a continuous series of mountains, stretching from Mount Cyllene towards the south. Those bearing a special name in this range are Artemisium (*Turnáki*), 5814 feet in height; and Parthenium (*Róino*), 3993 feet in height, south of the former. The range terminates in Parnon. On the southern frontier of Arcadia there is no clearly defined chain of mountains, but only a series of heights forming the water-shed between the tributaries of the Alpheius and those of the Eurotas. It is not till reaching the south-west frontier that the highlands again rise into a lofty and continuous chain, under the name of Lycaeus (*Dhioforti*), 4659 feet high. From Lycaeus a range of mountains, running south till it joins Erymanthus, constitutes the western boundary of Arcadia; but it bears no special name, except in its northern half, where it is called Pholoë. The northern, eastern, and southern barriers of Arcadia are unbroken; but the western wall is divided by the Alpheius, which finds its way through an opening on this side, and thence descends to the western sea.

The other chief divisions of Peloponnesus are Laconia and Messenia, on the south; Argolis, on the east; Elis, on the west; and Achaia, on the north. From the southern frontier of Arcadia a lofty chain of mountains, under the name of Taygetus, runs from north to south, forming the boundary between Messenia and Laconia, and terminating in the promontory of Taenarum, the southernmost point of Greece and Europe. The chain of Taygetus is the longest and highest in all Peloponnesus, being in one part 7902 feet above the level of the sea, or more than 100 feet above Cyllene. From Mount Parnon, at the south-eastern corner of Arcadia, another range of mountains extends from north to south along the coast, parallel to the range of Taenarus, and terminating in the promontory of Malea. Between this range, which may be called by the general name of Parnon, and that of Taygetus, was the valley of the Eurotas, in which Sparta lay, and which to the south of Sparta opened out into a plain of considerable extent. Messenia, in like manner, was drained by the Pamisus, whose plain was still more extensive than that of the Eurotas; for Messenia contained no continuous chain of mountains to the west of the Pamisus, answering to the range of Parnon in Laconia. Both the Pamisus and the Eurotas flow into gulfs

Digitized by Google

running a considerable distance into the land, and separated from one another by the range of Taygetus.

The river Neda separated Messenia from Elis. This country is covered, to a greater or a less extent, with the offshoots of the Arcadian mountains; but contains many plains of considerable size and fertility. Of these the two most important are the one in the centre of the country drained by the Alpheius, in which Pisa stood, and the one in the north through which the Peneius flows.

Achaia was the name of the narrow slip of country between the great northern barrier of Arcadia and the Corinthian gulf. From the Arcadian mountains there project several spurs, either running out into the sea in the form of bold promontories, or separated from it by narrow levels. The plains on the coast at the foot of these mountains, and the valleys between them, are for the most part very fertile.

Argolis, taking the name in its most extended sense, was used to signify the whole peninsula between the Saronic and Argolic gulfs; but during the times of Grecian independence it contained several independent states. The Argolic peninsula was united to the mainland by a broad base, at one extremity of which stood the cities of Corinth and Sicyon, and at the other the city of Argos. Corinth and Sicyon possessed a level track of country along the coast, and Argos was situated in a plain, 10 or 12 miles in length and from 4 to 5 in breadth; but the peninsula itself was nearly covered with a lofty range of hills.

The shape of Peloponnesus was compared by the ancients to the leaf of the plane tree or the vine. (Strab. viii. p. 335; Dionys. Per. 403; Agathem. i. p. 15; Plin. iv. 4. s. 5.) This isthmus is so small in comparison with the outspread form of the peninsula, that it was regarded by the ancients as an island, and was accordingly called the island of Pelops, from the mythical hero of this name. It has all the advantages of an insular situation without its disadvantages. It was sufficiently protected by the mountains at the foot of the isthmus to secure the inhabitants from all attacks from the mainland, and to allow them to develop their own character and institutions without any disturbing influences from without. At the same time, it was so closely connected with the mainland by the isthmus as to possess at all times an uninterrupted communication with the rest of Greece. From its position, approachable only by a narrow access easily guarded, the Peloponnesus was called by the ancients the acropolis of Greece. (Eustath. *ad Dionys. Per.* 403.)

IV. Rivers and Lakes.

Most of the Grecian rivers are entirely dependent upon the atmosphere for their supply of water. During five months of the year, in the autumn and winter, rain falls in large quantities, which fills the crevices in the limestone of the hills, and is carried off by torrents. In summer hardly any rain falls; and these torrents, so full of water in the winter, are then perfectly dry. Even many of the rivers, which are partly supplied by springs, dwindle in the summer into very insignificant streams. Most of the Grecian rivers, which give to the country upon the map the appearance of a well-watered district, are nothing but winter torrents, to which the Greeks gave the expressive name of χειμάρρους. None of the rivers of Greece are navigable. The most considerable in Northern Greece are the Peneius and the Achelous, already spoken of. To these may be added the Evenus, which flows through Aetolia, parallel to the Achelous; the Spercheius, which drains the valley between Oeta and Othrys; the Cephisus and Asopus in Boeotia; and the Cephissus and Ilissus in Attica, the last of which is dry in summer, and only deserves mention on account of its poetical celebrity. The chief river of Peloponnesus is the Alpheius in Arcadia and Elis; next come the Eurotas in Laconia, the Pamisus in Messenia, and the Peneius in Northern Elis.

Though there are few perennial rivers in Greece, the nature of the country is favourable to the formation of marshes and lakes. Many of the plains and valleys are so entirely encircled by mountains that the heavy rains which descend in the autumnal and winter months find no outlet, and remain as lakes in the winter and as marshes in the summer. In Thessaly are the lakes Nessonis and Boebeis; in Aetolia, Trichonis; in Boeotia, Copais; and in Arcadia, Stymphalis and others. The waters of some of these lakes find their way through natural cavities in the limestone mountains, called *katavothra* by the modern Greeks, and after flowing underground rise again after a greater or less interval. This is the case with the waters of the Copais [BOEOTIA], and of several of the lakes of Arcadia in which country this phaenomenon is very frequent [ARCADIA].

V. General Remarks upon Grecian Topography.

The two most striking features in Grecian topography are the mountainous character of the country and the great extent of its sea-coast. Next to Switzerland, Greece is the most mountainous country of Europe; but this general description conveys no correct idea of its peculiar nature. In the preceding account we have attempted to give a sketch of the direction of the mountain-ranges or chains, but from these project in all directions innumerable branches having very few valleys or plains of any extent. These plains, whether large or small, are for the most part either entirely surrounded by mountains or open on one side to the sea. At all times mountains have proved the greatest barriers to intercourse between neighbouring tribes. Each of the Grecian cities, situated in a plain, and separated from its neighbours by lofty mountains, always difficult, and often impossible to surmount, grew up in perfect isolation. They had the less temptation to try to scale the lofty barriers which surrounded them, since the sea afforded them an easy communication with the rest of the world. Almost all the Grecian states had ready and easy access to the sea; and Arcadia was the only political division which did not possess some territory on the coast.

The mountainous nature of the country exercised an important influence upon the political destinies of the people. The chain of Lingon and the Cambunian mountains defended Hellas from foreign invasion; and the mountains in the country itself rendered it difficult for one section of the race to attack another. The pass of Thermopylae, the passes over Cithaeron, and those over the Geranian and Oncian mountains at the isthmus, could easily be defended by a handful of resolute men against vastly superior numbers. The same causes produced a large number of independent states, politically distinct from each other, and always disinclined to form any kind of federal union even for the purpose of resisting foreign invasion. This political separation led to disputes and hostilities; and these

Digitized by Google

intestine wars eventually proved their ruin by opening their country to Philip of Macedonia. (Comp. Grote, *History of Greece*, vol. ii. p. 300, seq.)

VI. Chief Productions.

The most fertile districts in Greece, according to Thucydides (i. 2), were Thessaly, Boeotia, and a great part of Peloponnesus: the least fertile were Arcadia and Attica. Wheat, barley, flax, wine, and oil, were the chief productions; but more careful attention seems to have been bestowed upon the culture of the vine and of the olive than upon the cereal crops. Bread seems to have been more generally made of barley than of wheat. We are told that by one of Solon's laws barley-cakes were provided on ordinary days, and wheaten loaves on festivals, for those who dined in the Prytaneium. (Athen. iv. 137.) The hills afforded excellent pasture for cattle, and in antiquity supplied plenty of timber, though they are at present nearly destitute of woods. The disappearance of these forests has been one of the causes of the diminished fertility of Greece as compared with ancient times. By losing the shade which they afforded, the springs have been burnt up; and, in consequence of less moisture, vegetation has become poorer.

Among the domestic animals we find horses, asses, mules, oxen, swine, sheep, goats, and dogs. Horses were not numerous in Greece, since the country is too mountainous to rear any number. Hence the Greek cavalry was always insignificant. Mules were extensively used in Peloponnesus, where they were found more useful than horses in traversing the mountains. Swine were very numerous, and pork was a favourite article of food, especially among the Arcadians. The milk of sheep and goats was preferred to that of cows. (Aristot. *Hist. An.* iii. 15. § 5, seq.)

Among the wild animals we find mention of bears, wolves, and boars. Bears seem to have been common in the forests of the Arcadian mountains. Herodotus relates that lions were found between the Nestus in Thrace and the Achelous in Aetolia (Herod. vii. 126); and the existence of lions in Greece, at least at an early period, is rendered probable by the legend of the Nemean lion.

The mountains of Greece consist for the most part of hard limestone, of which were built those massive Cyclopian walls and fortifications the remains of which still exist upon the summits of the hills. In almost every part of Greece there were rich and varied veins of marble, affording abundant and beautiful materials to the architect and the sculptor. The best marble-quarries were at Carystus in Euboea, at Pentelicus and Hymettus in Attica, and in the island of Paros.

In the precious metals Greece was poor. Gold and silver were found in the island of Siphnos; but the most productive silver-mines were at Laurium, in the south of Attica. Both copper and iron were found near Chalcis in Euboea; and there were also iron-mines in the mountains of Taygetus in Laconia.

VII. Climate.

The climate of Greece was probably more healthy in ancient than in modern times. The malaria, which now poisons the atmosphere during the summer months, probably did not exist to the same extent when the land was more thickly populated and better cultivated. Herodotus remarks that of all countries in the world Greece possessed the most happily tempered seasons (Herod. iii. 106); and Hippocrates and Aristotle considered the climate as highly favourable to the intellectual energy of the inhabitants, since it was equally removed from the extremities of heat and cold. (Hippocrat. *de Aëre*, 12, 13; Aristot. *Pol.* vii. 6. § 1.) But owing to the inequalities of its surface, to its lofty mountains and depressed valleys, the climate varies greatly in different districts. In the highlands in the interior the winter is often long and rigorous, the snow lying upon the ground till late in the spring; while in the lowlands open to the sea there is hardly ever any severe weather, and snow is almost entirely unknown. Modern travellers who have suffered from excessive cold and snow-storms passing through Boeotia in the middle of February, have found upon arriving in Attica warm and genial weather. In like manner, in the month of March, travellers find midwinter on the highlands of Mantineia and Tegea in Arcadia, spring in Argos and Laconia, and almost the heat of summer in the plain of *Kalamáta*, at the head of the Messenian gulf. To a native of the northern latitudes of Europe one of the most striking phaenomena of the Grecian climate is the transparent purity of the atmosphere and the brilliant colouring of the sky: though even in this point there was a great difference between the various parts of Greece; and the Athenian writers frequently contrast the thick and damp air of Boeotia with the light and dry atmosphere of Athens.

VIII. Volcanic Changes.

Traces of volcanic agency are visible in many parts of Greece, although no volcanoes, either in activity or extinct, are found in the country. There were hot-springs at Thermopylae, Aedepsus in Euboea, and other places; but the peninsula of Methana in the Peloponnesus, opposite Aegina, and the island of Thera in the Aegaean are the two spots which exhibit the clearest traces of volcanic agency. The greater part of Methana consists of trachyte; and here in historical times a volcanic eruption took place, of which the particulars are recorded both by Strabo and Ovid. (Strab. i. p. 59; Ov. *Met.* xv. 296, seq.) In this peninsula there are still two hot sulphureous springs, near one of which exist vestiges of volcanic eruption. The island of Thera is covered with pumice-stone; and it is related by Strabo (*l. c.*) that on one occasion flames burst out from the sea between Thera and the neighbouring island of Therasia, and that an island was thrown up four stadia in circumference. In modern times there have been eruptions of the same kind at Thera and its neighbourhood: of one of the most terrible, which occurred in 1650, we possess a circumstantial account by an eye-witness. (Ross, *Reisen auf den Griech. Inseln*, vol. i. p. 194.)

Earthquakes have in all ages been of frequent occurrence in Greece, especially in Peloponnesus. Laconia was called a land "easily shaken" (*εὐσείστος ἡ Λακωνική*, Strab. viii. p. 367); and in the terrible earthquake which happened in B. C. 464, not more than five houses are said to have been left standing at Sparta; more than 20,000 persons were believed to have perished, and huge masses of rock were rolled down from the highest peaks of Taygetus. (Thuc. iii. 89; Diod. xi. 63; Plut. *Cim.* 16.) On the Peloponnesian shores of the Corinthian gulf the earthquakes have been still more destructive. In consequence of the waves having no outlet into a wide-spread and open sea, they have in these convulsions

Digitized by Google

rushed upon the land and swallowed up whole cities. This was the fate of Helice and Bura, which in one day (B. C. 373) disappeared from Achaia. [HELICE.] Similar disasters have occurred in the same neighbourhood in subsequent times. In the reign of Tiberius the inhabitants were relieved from taxation in consequence of their suffering from an earthquake (Tac. *Ann.* iv. 13); and in 1817 the town of *Vostitza* (the ancient Aegium) narrowly escaped the fate of Helice and Bura, since the sea rushed inland with great force and inundated all the level immediately below the town (Leake, *Morea*, vol. iii. p. 402).

IX. Modern Works.

Greece was, down to the middle of the 16th century, almost an unknown country to the western nations of Europe. In 1573, soon after Greek had begun to be studied in Germany, Martin Kraus, or Crusius, professor at Tübingen, contrived to open a correspondence with some learned Greeks in Constantinople; and, in one of his letters addressed to Theodore Zygomalas, he states that it was the general opinion in Germany that Athens was totally destroyed, and wishes to know from his correspondent whether this is the truth. Zygomalas answers that he had frequently visited Athens; but in his attempt to describe the antiquities of Athens he commits many blunders, among other things, calling the Pantheon the Parthenon. The information, thus obtained, Crusius published in his *Turco-Graecia*, of which the first book contained the political history, the second the ecclesiastical, and the remaining six his correspondence with the learned Greeks. Deshayes, who was French ambassador to the Porte in 1621, visited Athens in 1621, and wrote some *Observations*, which, though of little value, are interesting as the first account of any part of Greece from the personal observation of a native of Western Europe. Deshayes supposed the Parthenon to be the Church of the Unknown God. Some years afterwards, Palmerius (Paulmier de Grentemesnil), a French nobleman of Normandy and a scholar, who died at Caen in 1670, undertook a voyage into Greece for the purpose of illustrating its ancient geography. His work, entitled *Graeciae Descriptio*, of which a second edition was published in 1678, Lugd. Batav., was the first of any value upon Grecian geography, but it gave an account of only Illyricum, Macedonia, Epirus, and Acarnania. In 1674, Nointel, who was sent as French ambassador to the Porte, carried with him a young artist, named Carrey, who for about five weeks was employed in making drawings, which are now in the National Library of Paris, and are of great interest, as among them are the architectural decorations of the Parthenon, which was then almost entire.

A new era in the knowledge of Grecian geography commenced with Spon, a French physician at Lyons, and Sir George Wheler, an Englishman, who travelled together through Attica, Boeotia, Phocis, and Locris, in 1675 and 1676. Spon published his account of their travels under the title of *Voyage d'Italie, de Delmatie, de Grèce, et du Levant, fait en* 1676 *par Jacob Spon, D. M., et George Wheler, Gentilhomme Anglois*, Lyon, 1678. Wheler, who was a more careful observer than Spon, gave his account of their travels four years later, under the title of *Journey into Greece in company of Doctor Spon*, London, 1682. The learned Greek, Meletios, wrote at Naupactus, in 1682, a work upon general geography, in which he gives some valuable information upon many parts in Greece, which he had visited in person and in which he has also preserved many inscriptions that have been subsequently lost. This work was first published at Venice, in 1728, under the title of Γεωγραφία παλαιὰ καὶ νέα συλλεχθεῖσα ἐκ διαφόρων Συγγραφέων παλαιῶν τε καὶ νέων, and of which a second edition appeared at the same place in 1807. The next work of importance was that of the French botanist, Tournefort, who travelled through the islands of the Levant, and other countries on the coasts of the Levant, in 1700—1703. Though his journey was undertaken chiefly with a scientific object, he gives us an interesting account of the antiquities of the countries which he visited. His work was published after his death, in 1717, 2 vols. 4to., under the title of *Relation d'un Voyage du Lévant fait par ordre du Roi*: it was translated into English, and published in London, 1718, 2 vols. 4to. Fourmont, who travelled in Greece in 1729, by order of Louis XV., copied a large number of inscriptions, which he deposited in the Royal Library of Paris. He boasted of having defaced the inscriptions which he copied, and also of having destroyed the remains of several Grecian cities; but he greatly exaggerated his barbarous proceedings, and his chief object in making the boast was that he might palm upon the world a number of forged inscriptions: for, though Raoul-Rochette defended the genuineness of these inscriptions (*Lettre sur l'Authenticité des Inscriptions de Fourmont*, Paris, 1819), it is now admitted that many of them are forgeries.

In 1751 Stuart, an English artist at Rome, accompanied by Revett, another artist, travelled to Greece, and spent the greater part of three years at Athens. The result of their labours was the celebrated *Antiquities of Athens*, of which the first volume appeared in London in 1762. The second volume was published after Stuart's death, edited by Newton, in 1790; the third, by Reveley, in 1794; and the fourth, by Woods, in 1816. Revett had no connection with this work after the publication of the first volume; and in the same year in which it appeared the Society of Dilettanti engaged him, together with Mr. Pars and Dr. Chandler, to undertake an antiquarian journey to Greece. Chandler published the results of their researches in Greece and Asia Minor, of which the volume relating to Greece appeared at Oxford in 1776. Chandler was a man of learning, and did much to illustrate the geography of Greece; but he has been justly censured by Leake for having omitted to cite the ancient authorities when he had recourse to them, in consequence of which it is often difficult to test the accuracy of his conclusions. Choiseul-Gouffier published in 1782, his *Voyage pittoresque de la Grèce*, with fol., which is a handsome book, but of no critical value. In 1784 he was sent, as French ambassador, to Constantinople; and in 1809 he published the first part of the second volume of his *Voyage pittoresque*, which is much more carefully executed than the first volume. The second part of the second volume appeared in 1820, after the author's death.

Sibthorp and Hawkins visited Greece together in 1786; and Sibthorp undertook another journey to the country in 1794. His object was to form a complete Flora of Greece; and on his death, in 1796, he bequeathed, by his will, to the University of Oxford, an estate of 200*l.* a-year for the purpose of pub-

Digitized by Google

ing a *Flora Graeca* in 10 folio volumes, with 100 plates in each, and a *Prodromus* of the work, without plates. These works afterwards appeared; and extracts from the Journal of his Travels were given by Walpole in *Memoirs relating to European and Asiatic Turkey*, Lond. 1817, 4to., and in *Travels to various Countries of the East*, Lond. 1820, 4to. In both of these works there are also some valuable papers by Hawkins.

Of the numerous books of travels in Greece which have appeared in the present century, the following require mention:—Pouqueville, *Voyage en Morée à Constantinople, en Albanie, et dans plusieurs autres Parties de l'Empire Othoman, pendant les années* 1798 *et* 1801: but this well-known work is full of great inaccuracies; and the author, probably, did not visit many of the places which he describes. In 1805 he was appointed French consul at Janina, where he resided several years, and from whence he visited the adjoining countries, Thessaly, Epirus, &c. The results of these travels appeared in a new work —*Voyage dans la Grèce*, Paris, 1820—1821, 5 vols. 8vo. This work is of more value than the former one, but still must be used with caution. Hobhouse, *Journey through Albania, and other Provinces of Turkey in Europe and Asia, to Constantinople, during the years* 1809 *and* 1810, London, 1813. H. Holland, *Travels in the Ionian Islands, Albania, Thessaly, Macedonia, &c., during the years* 1812 *and* 1813, London, 1815; and, 2nd ed., 2 vols. 8vo. 1819. Dodwell, *A Classical and Topographical Tour through Greece, during the years* 1801, 1805, *&* 1806, London, 1819, 2 vols. 4to.,—the most valuable work on Grecian geography that had hitherto appeared, and one which may still be consulted with advantage. Sir W. Gell travelled in Greece at the same time as Dodwell, and partly in company with him; and his works are of still more value than the Travels of the latter. They are:—1. *Itinerary of the Morea*, Lond. 1817; 2nd ed. 1827: 2. *Itinerary of Greece, with a Commentary of Pausanias and Strabo*, Lond. 1818 (containing only *Argolis*): 3. *Itinerary of Greece*, Lond. 1819: 4. *Narrative of a Journey in the Morea*, Lond. 1823. But it is to Colonel Leake that we are indebted for the most valuable information which we yet possess respecting many parts of Greece. A first-rate observer, a good scholar, and a man of sound judgment and great sagacity, he combined qualities rarely found in the same individual, and may safely be pronounced the first geographer of the age. He travelled in Greece for several years at the commencement of the present century; but it was long before he published detailed accounts of these travels. His works are:—*The Topography of Athens, with some Remarks on its Antiquities*, Lond. 1821, 8vo.; of this work, a second edition appeared in 1841, accompanied by a second volume, on *The Demi of Attica*, which had originally appeared in the Transactions of the Royal Society of Literature: *Travels in the Morea, with a Map and Plans*, Lond. 1830, 3 vols. 8vo.: *Travels in Northern Greece*, Lond. 1835, 4 vols. 8vo.: *Peloponnesiaca; a Supplement to Travels in the Morea*, Lond. 1846, 8vo. This last work was written in consequence of the researches of the French Commission in the Morea, spoken of below, and is accompanied by a large map of the Peloponnesus, reduced from the French map, on a scale of something more than a third, but not without some variations. We may close our notice of the works of English travellers in Greece with Colonel Mure's valuable, though unpretending, volumes, entitled, *Journal of a Tour in Greece and the Ionian Islands*, Edinburgh, 1842, 2 vols., which we have frequently consulted, in the course of this work, with great advantage.

Of the modern French and German works, we must mention first the publications of the French Commission of Geography, Natural History, and Archaeology, which was sent to the Peloponnesus in 1829, and remained there two years. These publications are:—*Expédition Scientifique de Morée, ordonnée par le Gouvernement Français*, par Abel Blouet, Amable Ravoisié, Achille Poirot, Félix Trézel, et Fréd. de Gournay, Paris, 1831—1838, 3 vols. fo.: *Travaux de la Section des Sciences Physiques, sous la direction de M. Bory de St. Vincent*, Paris, 1831, fo.: *Recherches Géographiques sur les Ruines de la Morée*, par M. E. Pouillon Boblaye, Paris, 1836, 4to.: also, Bory de St. Vincent, *Relation du Voyage de la Commission Scientifique de Morée*, Paris et Strassb., 1837, 2 vols. 8vo. This Commission also constructed a map of the Peloponnesus, on a scale of the two hundred-thousandth part of a degree of latitude, or twenty-one English inches and three-fifths.

Ross, who resided several years at Athens, where he held the post of professor in the university, and who travelled through various parts of Greece, has published several valuable works:—*Reisen und Reiserouten durch Griechenland*, Berlin, 1841; vol. i., containing travels in Peloponnesus, is all that has appeared of this work: *Reisen auf den Griechischen Inseln des Aegäischen Meeres*, Stuttgart & Tübingen, 1840, 2 vols. 8vo.; the third volume appeared in 1845, and the fourth at Halle in 1852: *Wanderungen in Griechenland*, Halle, 2 vols. 8vo. 1851. One of the most important of all the modern German works is by Curtius, *Peloponnesos, eine historisch-geographische Beschreibung der Halbinsel*, Goth. 2 vols. 8vo. 1851—1852. Besides these, the following works all deserve mention, of which the two first are particularly valuable. Forchhammer, *Hellenika Griechenland im Neuen das Alte*, Berlin, 1837. Ulrichs, *Reisen und Forschungen in Griechenland*. Erster Theil, *Reise über Delphi durch Phocis und Boeotien bis Theben*, Bremen, 1840. Buchon, *La Grèce continentale et la Morée; Voyage, Séjour, et Etudes Historiques en* 1840—41, Paris, 1843. Fiedler, *Reise durch alle Theile des Königreiches Griechenland*, Leipzig, 2 vols. 8vo. 1840—41. Aldenhoven, *Itinéraire descriptif de l'Attique et du Péloponnese, avec cartes et plans topographiques*, Athens, 1841, taken almost entirely from the publications of the French Commission. Brandis, *Mittheilungen über Griechenland*, 3 vols. 1842. Stephani, *Reise durch einige Gegenden des nördlichen Griechenlandes*, Leipz. 1843.

The following are the chief systematic works on the geography of Greece:—Mannert, *Geographie*, of which the volume containing Thessaly and Epirus appeared in 1812, and the one containing Northern Greece, Peloponnesus, and the islands of the Archipelago in 1822; but neither is of much value. Kruse, *Hellas, oder geographisch-antiquarische Darstellung des alten Griechenlandes*, Leipz. 3 vols. 8vo. 1825—1827, which, besides the general introduction, contains only an account of Attica, Megaris, Boeotia, Phocis, Doris, Locris, Aetolia, and Acarnania. Cramer, *A Geographical and Historical Description of Ancient Greece, with a Map and a Plan of Athens*, 3 vols. 8vo. Oxf. 1828. Hoffmann, *Griechenland und die Griechen im Alterthum*, Leipzig,

Digitized by Google

1841, 2 vols. 8vo.; FORBIGER, *Handbuch der alten Geographie*, 3 vols. 8vo. Leip. 1842—48: but the part relating to Greece contains little more than mere references to ancient authors and modern works. The numerous monographs on separate countries and islands are given under their respective names. A good general account is given by K. O. MÜLLER, in his work on the *Dorians;* by THIRLWALL and GROTE, in their *Histories of Greece;* and by WORDSWORTH, in his *Greece, Pictorial, Descriptive, and Historical.* The best collection of Maps of Greece is by KIEPERT, *Topographisch-Historischer Atlas von Hellas und den Hellenischen Colonien in* 24 *Blättern*, Berlin, 1846.

GRAECIA MAGNA. [MAGNA GRAECIA.]

GRAIOCELI. [GAROCELI.]

GRAMATUM, a place in Gallia between Epamanduruum and Larga [EPAMANDURUM]; but it is not certain that the name ought to appear in the Itin.: and if it should, we have no evidence where it is; though Ukert says that it is *Giromagny.* D'Anville has his usual kind of guess: he makes it *Granvillars.* [G. L.]

GRAMMIUM (Γράμμιον, Steph. B.), a town of Crete, which Coronelli (Höck, *Kreta*, vol. i. p. 434) has placed to the SW. of *Kavo-sidhero*, but on Pashley's map it is identified with *Eremopoli*, on the E. coast. [E. B. J.]

GRAMPIUS MONS, in Britain, the scene of Galgacus's resistance to the Roman arms = *the Grampian Hills.* (Tac. *Agric.* 29.) [R. G. L.]

GRANDE, a station which the Jerusalem Itinerary places on the Egnatian Way, 14 M. P. from Cellae. (Comp. Tafel, *de Viae Egnat. Part. Occid.* p. 42.) [E. B. J.]

GRANDIMI'RUM. [GALLAECIA.]

GRANI'CUS (Γράνικος), a river in Troas which had its source in Mount Cotylus, a branch of Ida, and flowing through the Adrastian plain emptied itself into the Propontis. (Hom. *Il.* xii. 21; Strab. xiii. pp. 582. 587, 602; Mela, i. 19; Plin. v. 40; Ptol. v. 2. § 2.) This little stream is celebrated in history on account of the signal victory gained on its banks by Alexander the Great over the Persians in B. C. 334, and another gained by Lucullus over Mithridates (Arrian, *Anab.* i. 13; Diod. Sic. xvii. 19; Plut. *Alex.* 24, *Lucull.* 11; Flor. iii. 5.) Some travellers identify the Granicus with the *Dimotico* (Chishull, *Travels in Turkey*, p. 60), and others with the *Kodsha-su.* [L. S.]

GRANIS (Γράνις, Arrian, *Ind.* c. 39), a small river of Persis, to which the fleet of Nearchus came. There seems no reason to doubt that it is the same stream as that called by D'Anville and Thevenot the *Boschavir.* It is, in fact, the river of *Abushir.* Niebuhr speaks of a stream which passes *Grá* and flows into the Persian Gulf (*Travels*, vol. ii. p. 91). Can *Grá* be considered as preserving part of the ancient name? (Vincent, *Voy. of Nearchus*, vol. i. p. 400.) [V.]

GRANNONUM, in Gallia, "in Littore Saxonico," according to the Notitia Imp. Sanson supposed it to be *Granville.* D'Anville and others guess other names; and D'Anville finds places both for Grannona and Grannonum. [G. L.]

GRANUA (Γρανούα), a river in the extreme south-east of Germany, in the country of the Quadi, and emptying itself into the Danube. Its modern name is *Graan.* (Anton. *Meditat.* i. 17.) [L.S.]

GRATIA'NA (Γρατιανά), a town on the frontier of Illyricum, not far from Moesia. (Procop. *Bell. Goth.* i. 3, *de Aed.* iv. 11; Hierocl. p. 657.) The modern town of *Graczanicza*, on the left bank of the river Drina, is said to occupy the site of the ancient Gratiana. [L. S.]

GRATIANO'POLIS. [CULARO.]

GRATIA'RUM COLLIS (ὁ λόφος ὁ Χαριτων: *M. Ghuriano*), a well-wooded range of hills in the Regio Syrtica of N. Africa, 200 stadia from the sea, containing the sources of the river CINYPS (Herod. iv. 175; Callim. *ap. Schol.* Pind. *Pyth.* v. 32; Della Cella, *Viaggio*, p. 29.) [P. S.]

GRA'VII. [GALLAECIA.]

GRAVINUM, a station in Gallia, placed in the Table on a road from Juliobona (*Lillebonne*), which joins another road, the termination of which is Gesoriacum (*Boulogne*). As to this obscure and unknown place, see D'Anville, *Notice*, &c.: Ukert, *Gallien*, p. 547. [G. L.]

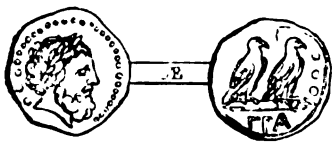
GRAVISCAE (Γραουΐσκαι, Ptol.; Γραουΐσκαι, Strab.), a town on the coast of Etruria, between Cosa and Castrum Novum. We have no account of its existence previous to the establishment there of a Roman colony in B. C. 181 (Liv. xl. 29; Vell. Pat. i. 15), and we know that its site had originally formed part of the territory of Tarquinii. It is not impossible, indeed, that Graviscae may, during the independence of that city, have served as its port, just as Pyrgi did to the neighbouring Caere, but we have no authority for the fact. The mention of Graviscae, by Virgil (*Aen.* x. 184), in conjunction with Pyrgi, among the places supposed to have taken part in the wars of Aeneas, is the only argument in favour of its remote antiquity; for the authority of Silius Italicus, who calls it "veteres Graviscae" (viii. 475), is on such a point of no value. The colony sent thither was a "colonia maritima civium," but seems, like most settlements of a similar class established on the coast of Etruria, to have enjoyed but little prosperity; which—in the case of Graviscae at least—may be ascribed to the extreme unhealthiness of its situation, alluded to both by Virgil and Rutilius. ("Intempestaeque Graviscae," Virg. *Aen. l. c.*; Rutil. *Itin.* i. 282.) It is, however, noticed as a subsisting town by Strabo, Pliny, and Ptolemy, as well as in the Itineraries; but in the time of Rutilius (A. D. 416) it had sunk into complete decay, and retained only a few scattered houses. (Strab. v. p. 225; Plin. iii. 5. s. 8; Ptol. iii. 1. § 4; Rutil. *l. c.*; *Itin. Marit.* p. 498; *Tab. Peut.*)

The exact site of Graviscae has been a subject of much discussion, though the data afforded by ancient authorities would appear sufficiently precise. Strabo says it was 300 stadia from Cossa, and rather less than 180 from Pyrgi: but the former distance is certainly too great, as it would carry us to a point beyond the river Minio; and it is certain, from Rutilius, as well as the Itineraries, that Graviscae lay to the N. of that river. On the other hand, the distance from Pyrgi would coincide with a position at or near the mouth of the river *Marta*, and there seems on the whole to be little doubt that Graviscae was situated in the neighbourhood of that stream. Two localities have been pointed out as its exact site, at both of which there are some ancient remains: the one on the right bank of the *Marta*, about a mile from its mouth, which is adopted by Westphal and Dennis; the other on the sea-coast, at a spot called *S. Clementino* or *Le Saline*, about a mile S. from the mouth of the *Marta*. The latter must, according to Dennis's own admission, have certainly been a Roman station, and seems to have the best

Digitized by Google

claim to represent the Roman colony of Graviscae. If there ever existed an Etruscan town of the name, it is highly probable that it may have occupied a somewhat different site. (Dennis, *Etruria*, vol. i. pp. 387—395.)

The annexed coin, with the Greek legend ΓΡΑ, is commonly assigned to Graviscae; but this attribution, though admitted by Eckhel (vol. i. p. 92), is certainly erroneous. It belongs to some town of Apulia or Calabria, but its correct attribution has not yet been determined. (Millingen, *Numismatique de l'Italie*, pp. 148, 172.) [E. H. B.]



COIN ASSIGNED TO GRAVISCAE.

GRINNES, a place in Northern Gallia, mentioned by Tacitus (*Hist.* v. 20) in his history of the insurrection of Civilis. The Table places Grinnes on a road between Noviomagus (*Nymegen*) and Lugdunum (*Leiden*). It is 18 M. P. from Noviomagus to Ad Duodecimum [DUODECIMUM, AD], and 9 M. P. from Ad Duodecimum to Grinnes. The next station after Grinnes is Caspingium, 18 M. P. It seems that hardly any two geographers agree about the site of Grinnes. Walckenaer has no doubt that it is *Warick* and *Bochstein*, as he writes the names. The only thing that is certain is, that we do not know where Grinnes is. [G. L.]

GRION (Γρίον), a chain of mountains running parallel to Mount Latmos, on the western side of the Latmic bay, and extending from the neighbourhood of Miletus to Euromus in Caria. (Strab. xiv. p. 635.) Some identified this range with that of PITHIRA. (Hom. *Il.* ii. 868; Steph. B. *s. v.* Φθίρα.) [L. S.]

GRISELUM (*Eth.* Griselicus), a place in Gallia Narbonensis. Spon published an inscription found at the baths of *Greoulx*, near *Rics*, in the department of *Basses Alpes*. *Greoulx* is near the right bank of the *Verdon*, a little above its junction with the *Durance*. The inscription is "Nymphis xi. Griselicis." Papon made the ridiculous mistake of supposing that the numerals marked the number of these water nymphs. Walckenaer observes that XI. M. P. is the exact distance between *Greoulx* and Reii (*Rics*). [G. L.]

GRISSIA. [GERASUS.]

GROVII. [GALLAECIA.]

GRU'DII, a people of North Gallia enumerated by Caesar (*B. G.* v. 39) as dependent on the Nervii, and mentioned nowhere else. D'Anville finds the name in *Groede* or *Gronde*, the name of a small place and canton in *Cadsant*, in Zeeland. [G. L.]

GRUII. [GALLAECIA.]

GRUMENTUM (Γρουμέντον: *Eth.* Grumentinus: *Saponara*), a city of Lucania, and one of the chief towns situated in the interior of that province. From its inland position it is evident that it was never a Greek settlement, and there is little doubt that it was a native Lucanian town; but no mention occurs of it in history previous to the Second Punic War. Its name is first found in B. C. 215, when the Carthaginian general Hanno was defeated under its walls by Tib. Sempronius Longus (Liv. xxiii. 37): and again in B. C. 207, when Hannibal himself, having broken up from his winter quarters in Bruttium and marched into Lucania, established his camp at Grumentum, where he was encountered by the consul C. Claudius Nero, and sustained a slight defeat (Id. xxvii. 41, 42). Grumentum appears to have been at this time one of the Lucanian cities that had espoused the Carthaginian cause, and was therefore at this time in the possession of Hannibal, but must have been lost or abandoned immediately after. We hear no more of it till the period of the Social War (B. C. 90), when it appears as a strong and important town, in which the Roman praetor Licinius Crassus took refuge when defeated by M. Lamponius, the Lucanian general. (Appian, *B. C.* i. 41.) But it would seem from an anecdote related by Seneca and Macrobius that it subsequently fell into the hands of the allies, and withstood a long siege on the part of the Romans. (Senec. *de Benef.* iii. 23; Macrob. i. 11.)

It now became a Roman municipium, but seems to have continued to be one of the few flourishing or considerable towns in the interior of Lucania. Strabo, indeed, terms it a small place (μικρὰ κατοικία, vi. p. 254), and the Liber Coloniarum includes it among the towns of Lucania which held the rank of Praefecturae only. (*Lib. Col.* p. 209.) But we learn from an inscription that it certainly at one time enjoyed the rank of a colony; and other inscriptions, in which mention is made of its local senate and various magistrates, as well as the ruins of buildings still remaining, sufficiently prove that it must have been a place of consideration under the Roman Empire. (Mommsen, *Inscr. R. N.* pp. 19—22; Plin. iii. 11. s. 15; Ptol. iii. 1. § 70.) The Itineraries attest its existence down to the fourth century, and we learn from ecclesiastical records that it was an episcopal see as late as the time of Gregory the Great; but the time of its destruction is unknown.

The site of Grumentum, which was erroneously placed by Cluverius at *Chiaromonte*, on the left bank of the *Sinno* or Siris, was first pointed out by Holstenius. Its ruins are still visible on the right bank of the river *Agri* (Aciris), about half a mile below the modern town of *Saponara*: they include the remains of an amphitheatre, with many walls and portions of buildings of reticulated masonry, and the ancient paved street running through the midst of them. Numerous inscriptions have also been discovered on the site, as well as coins, gems, and other minor objects of antiquity. (Cluver. *Ital.* p. 1279; Holsten. *Not. ad Cluver.* p. 288; Romanelli, vol. i. pp. 399, 400; Mommsen, *l. c.* p. 19.) The position thus assigned to Grumentum — which is clearly identified by early ecclesiastical records — agrees well with the distances given in the Itineraries, especially the Tabula, which reckons 15 M. P. from Potentia to Anxia (still called *Anzi*), and 18 from thence to Grumentum. (*Itin. Ant.* p. 104; *Tab. Peut.*) Many of the other distances and stations in this part of the country being corrupt or uncertain, the point thus gained is of the highest importance for the topography of Lucania. [LUCANIA.] At the same time its central position, near the head of the valley of the Aciris, sufficiently accounts for its importance in a military point of view. [E. H. B.]

GRUMUM (*Eth.* Grumbestinus: *Grumo*), a town of Apulia, in the Peucetian territory, the name of which is preserved only in that of the modern village of *Grumo*, about 9 miles S. of *Bitonto* (Butuntum), and 14 SW. of *Bari* (Barium), where ancient remains have been found. But there is no doubt

Digitized by Google

that the "Grumbestini" of Pliny (iii. 11. s. 16) are no other than the inhabitants of Grumum, though the ethnic form is singular. Many numismatists assign to Grumum the coins with the legend ΓΡΤ, which other authorities refer to Grumentum in Lucania. (Romanelli, vol. ii. p. 174; Sestini, *Class. Gen.* p. 15.) [E. H. B.]

GRUNAEI (Γρυναῖοι and Γρυναῖοι), mentioned by Ptolemy (vi. 13. § 3) as a population of Scythia. [SCYTHIA.] [R. G. L.]

GRYNIUM or GRYNIA (Γρύνιον, Γρύνεια: *Eth.* Γρυνεύς), one of the Aeolian cities in Asia Minor, 40 stadia from Myrina, and 70 from Elaea. In the early times the town was independent, but afterwards became subject to Myrina. It contained a sanctuary of Apollo with an ancient oracle and a splendid temple of white marble. (Herod. i. 149; Strab. xiii. p. 622; Virg. *Ecl.* vi. 72, *Aen.* iv. 345; Plin. v. 32, xxxii. 21; Steph. B. *s. v.* Γρύνοι; Paus. i. 21. § 9; Scylax, p. 37.) Xenophon (*Hell.* iii. 1. § 6) mentions Grynium as belonging to Gongylus of Eretria; and it is possible that the *castrum Grunium* in Phrygia, from which Alcibiades derived an income of 50 talents was the town of Grynium. (Nep. *Alcib.* 9.) Parmenio took the town by assault, and sold its inhabitants as slaves, after which the place seems to have decayed. (Diod. Sic. xvii. 7.) [L. S.]

GUGERNI. Tacitus (*Hist.* iv. 28), in his history of the insurrection of Civilis, speaks of the Roman commander Vocula encamping at Gelduba, and thence attacking the nearest districts of the Gugerni, who had joined Civilis. They were Germans who lived on the west side of the Rhine, in the Lower Germania, as appears from Tacitus (iv. 28, v. 16). They are mentioned by Pliny (iv. 17) in this order: "Ubii, Colonia Agrippinensis, Gugerni, Batavi," which shows that they were between *Cologne* and the Batavorum Insula. We may infer from Tacitus (*Hist.* iv. 28) that Gelduba [GELDUBA] was south of the boundary of the Gugerni, but not far from it. There is no record of these Germans passing the Rhine, and they are not mentioned by Caesar. Suetonius (*August.* c. 21; *Tiber.* c. 9) speaks of Ubii and Sicambri submitting to the Romans, and being transplanted to the west side of the Rhine. In the first passage of Suetonius some read "Suevos et Sicambros," in place of "Ubios et Sicambros." It is an old conjecture that these Gugerni were transplanted Sicambri; which may be true, or it may not. More probably not true; for why should they change their name, when the Ubii did not? If the true reading in Suetonius is "Suevos," the Gugerni may be one of the pagi of the Suevi. But the true reading is probably "Ubios." We may suppose then that other tribes may have been transplanted besides Ubii and Sicambri, for a great many Germans were settled on the left bank of the Rhine in the time of Augustus. [G. L.]

GUJUNTA. [BALEARES, p. 374. b.]

GULUS (Γοῦλου ποταμοῦ ἐκβολαί, Ptol. iv. 2. § 11: *Wad Daab* or *Kammeil*), a river of Mauretania Sitifensis, falling into the sea between Igilgilitis and the mouth of the Ampsaga. [P. S.]

GUMFGI (Κανουκις, Ptol.: *Bereshk*), a city on the coast of Mauretania Caesariensis, 12 M. P. west of Caesarea Iol; made a colony by Augustus. (Plin. v. 1; *Itin. Ant.* p. 15; Ptol. iv. 2. § 2; Geog. Rav.; *Not. Afr.*) [P. S.]

GUNTIA. 1. A town in Vindelicia, on the road leading from Campodunum to Augusta Vindelicorum. (*Itin. Ant.* p. 250; Orelli, *Inscript.* no. 2054.) It is identified with the modern *Ober-Günzburg*, near the sources of the river Günz.

2. (*Günz*), a river in Vindelicia, and a tributary of the Danube; near its source the town of Guntia was situated. This river is not expressly mentioned by the ancients; but the town of the same name, and the expression, "Danubii transitus Guntiensis" (Eumen. *Paneg. Const.* 2), show that its name was known to them. [L. S.]

GURAEI. [GORYA.]

GURAEUS. [GORYA.]

GURGURES MONTES, a range of mountains in Central Italy, known only from a passage in Varro, who tells us that it was the custom to drive the mules which were fed in large herds in the Rosei Campi near Reate, into these lofty mountains ("in Gurgures altos montes," Varr. *R. R.* ii. 1. § 16) for their summer pasturage. It is evident that they were a portion of the central and highest ranges of the Apennines, but the particular mountains meant cannot be identified. [E. H. B.]

GURULIS (Γουρουλις), is the name given by Ptolemy (iii. 3. § 7) to two cities of Sardinia which he distinguishes as Gurulis Vetus (Γουρουλις παλαιά) and Gurulis Nova (Γουρουλις νέα). The latter, according to De la Marmora, is represented by the modern town of *Cuglieri*, about 6 miles from the W. coast of the island, and 12 NE. of the ancient Cornus: there still exist Roman remains on this spot. Gurulis Vetus is supposed by the same author to have occupied the site of *Padria*, a village in the interior, NE. of *Bosa*; but this is a mere conjecture. (De la Marmora, *Voy. en Sardaigne*, vol. ii. pp. 366, 403.) Ptolemy again mentions Gurulis Nova in the 8th book (viii. 9. § 3) among the places at which he records astronomical observations, whence we are led to infer that it must have been a place of some importance, but its name is not found in the Itineraries. [E. H. B.]

GURZUBITAE (Γουρζουβῖται, Procop. *de Aed.* iii. 7), a fortress erected by Justinian in the Taurian Chersonese, the ruins of which are still seen at *Kherssuf*, to the W. of *Lambat*. (Comp. Clarke, *Travels*, vol. ii. p. 258.) [E. B. J.]

GUTAE. [GOTHI.]

GUTTALUS, a small river on the coast of the Baltic, which, according to Solinus (20), existed to the west of the Vistula, and would therefore belong to Germany; but Pliny (iv. 28) places it on the east of the Vistula, whence it must be regarded as a Sarmatian river, and is perhaps the same as the modern *Pregel*. [L. S.]

GYAROS, or GYARA (Γύαρος, Strab., Steph. B.; Gyarus, Tac.; τὰ Γύαρα, Arrian, *Peripl.* iv. 4: Gyara, Juv., Plin.: *Eth.* Γυαρεύς), a small island in the Aegaean sea, reckoned one of the Cyclades, and situated SW. of Andros. According to Pliny it was 62 (Roman) from Andros and 12 miles in circumference. (Plin. iv. 12. s. 23.) It was little better than a barren rock, though inhabited in antiquity. It was one of the few spots in Greece visited by Strabo, who relates that he landed in the island and saw there a little village inhabited by fishermen, who deputed one of their number to go to Augustus, then at Corinth after the battle of Actium, to beg him to reduce their yearly tribute of 150 drachmae, since they could scarcely pay one hundred. (Strab. x. p. 485.) So notorious was it for its poverty that it was said, in joke, that the mice in this island gnawed through iron. (Athen. Carys. 21; Plin. viii. 43. s. 82; Steph. B. *s. v.*

Digitized by Google

Γύαρος). Under the Roman empire it was used as a place of banishment, and was one of the most dreaded spots employed for that purpose:—

"Aude aliquid brevibus Gyaris et carcere dignum." (Juv. i. 73; comp. Tac. *Ann.* iii. 68, 69, iv. 30; Plut. *de Exsil.* 8.) Among others, the philosopher Musonius was banished to Gyaros, in the reign of Nero. (Philostr. *Vit. Apoll.* vii. 16.) In the time of the Antonines a purple fishery was carried on here by divers. (Lucian, *Toxar.* 18.) The island is now uninhabited, except in the summer time by a few shepherds who take care of the flocks sent there by some of the inhabitants of Syros, to whom the island now belongs. It is called τὰ Γιούρα, pronounced *Jura*. (Tournefort, *Voyage, &c.* vol. i. p. 263, Engl. Transl.; Ross, *Reisen auf den Griech. Inseln*, vol. i. p. 5, vol. ii. p. 170, seq.; Fiedler, *Reise durch Griechenland*, vol. ii. p. 158, seq.)

GYENUS. [CYANEUS.]

GYGAEUS LACUS (Γύγαία λίμνη: *Mermere*), a lake in Phrygia, on the road from Thyatira to Sardes, between the rivers Hermus and Hyllus. (Hom. *Il.* ii. 864, xx. 391; Herod. i. 93; Strab. xiii. p. 626; Plin. v. 30.) This lake was afterwards called *Coloë*, and near it was the necropolis of Sardes. It was said to have been made by human hands, to receive the waters which inundated the plain. (Comp. Hamilton's *Researches*, vol. i. p. 145.) [L. S.]

GYMNE'SIAE. [BALEARES.]

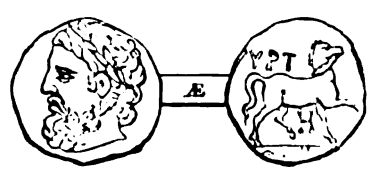
GY'MNIAS (Γυμνίας, Xen. *Anab.* iv. 7. § 19; called Gymnasia by Diod. Sic. xiv. 29), "a great, flourishing, and inhabited city," which the Ten Thousand reached, in seven marches, after they had made the passage of the Harpasus. (Xen. *l. c.*) Colonel Chesney (*Exped. Euphrat.* vol. ii. p. 232) thinks that it may be represented by the small town of *Gemeri*, on the *Karâ Sû*, an affluent of the river *Frât*. But Mr. Grote (*Hist. of Greece*, vol. ix. p. 161), with reason, thinks it is more probably the same as *Gúmisch-Khâna*, on the road from *Trebizond* to *Erzerum*, "celebrated as the site of the most ancient and considerable silver mines in the Ottoman dominions." (Hamilton, *Asia Minor*, vol. i. pp. 168, 234.) The existence of these mines, as Mr. Grote observes, furnishes a plausible explanation of that which would be otherwise surprising, the existence of so important a city in the midst of such barbarians as the Chalybes, Scythini, and Macrones. [E. B. J.]

GYNAECO'POLIS (Γυναικόπολις, Strab. xvii. p. 803; Steph. B. *s. v.*; Plin. v. 9. § : *Eth.* Γυναικοπολίτης), was, according to the ancient geographers, the chief town of the Gynaecopolite nome, and coins bearing its impress in the age of Hadrian are still extant. Many writers doubt, however, whether there was such a nome or such a city. The name seems rather allusive to circumstances unknown than to the proper appellation of a place, and Stephanus of Byzantium relates no less than three legends by way of accounting for it:—(1) The women maintained the town against a hostile inroad, during the absence of their husbands and male relatives. (2) A woman whose sons had been maltreated by a king, took up arms and expelled him. (3) The men of Naucratis were afflicted with the plague; and while all other of the Aegyptian cities kept them at bay, the Gynaecopolites, through cowardice, admitted them, and were named *women* for their pains. Each of these stories is palpably an attempt to explain the name. D'Anville conjectures that Gynaecopolis is but another name for Anthylla in the Delta. That city, as Herodotus (ii. 97, 98) relates, was appointed by the Pharaohs to furnish the Egyptian queens with sandals or some articles of female attire. The tribute of pin-money procured for the place the appellation of Gynaecopolis, or "Woman-ton:" but see ANTHYLLA. [W. B. D.]

GYNDES (Γύνδης, Herod. i. 189; v. 52), a river which has been considered to belong in part to both Assyria and Susiana; as the upper course of its stream, from the mountains of Matiene, in which it takes its rise, passes through part of the former country, while the latter part belongs to Susiana, if its identification with the *Kerkhah* is admissible. Herodotus is not clear in his account of the river: in one place (i. 189), where he speaks of Cyrus's crossing it, his account would answer best with the position of the modern *Diala*, which enters the Tigris near the ancient Ctesiphon: in another place (v. 52), he seems to imply a river at no great distance from the Choaspes and Susa. Hence the most contradictory views of geographers. Rennell (*Geogr. of Herod.* vol. i. p. 266) has, in one place, conjectured that the Gyndes is the present *Diala*; in another, the *Mendeli*. Larcher has thought that Herodotus means only one and the same river, and that the *Mendeli* best represents it. D'Anville appears to have thought there were three rivers of the name. On the whole, it is probable that the *Mendeli* was the ancient Gyndes; while it can hardly have been the *Kerkhah*, as Forbiger has supposed. It is clear that Herodotus had himself a very indistinct notion of it, as he makes the Gyndes and Araxes (the *Aras*) both flow from the mountains of Matiene (i. 202). [V.]

GYRISOENI (Γυρισοῖνοι), a people of Hispania Baetica, in the neighbourhood of Castulo. (Plut. *Sertor.* 3; Ukert, vol. ii. pt. 1. p. 410.) [P. S.]

GYRTON, or GYRTONA (Γυρτών, Thuc., Polyb., Strab.; Γυρτώνη, Hom.: *Eth.* Γυρτώνιος: *Tatári*), a town of Perrhaebia in Thessaly, situated in a fertile plain between the rivers Titaresius and Peneius. Its site is represented by the modern village of *Tatári*. Strabo, indeed, connects Gyrton with the mouth of the Peneius (ix. pp. 439, 441), and the Epitomiser of the seventh book (p. 329) places it near the foot of Mt. Olympus; but it is evident from the description of Livy, whose account has been derived from Polybius, that it stood in some part of those plains in which Phalanna, Atrax, and Larissa were situated. (Liv. xxxvi. 10, xlii. 54.) It was only one day's march from Phalanna to Gyrton (Liv. xlii. 54); and the Scholiast on Apollonius (i. 40) says that Gyrton was near Larissa. (Leake, *Northern Greece*, vol. iii. p. 382, vol. iv. p. 534.) It was an ancient town, mentioned by Homer (*Il.* ii. 738), and continued to be a place of importance till later times, when it is called opulent by Apollonius Rhodius (i 57). It was said to have been the original abode of the Phlegyae, and to have been founded by Gyrton, the brother of Phlegyas. (Strab. ix. p. 442; Steph. B. *s. v.* Γυρτών.)



COIN OF GYRTON.

Digitized by Google

The Gyrtonians are mentioned among the Thessalians who sent aid to the Athenians at the commencement of the Peloponnesian War. (Thuc. ii. 22.) The name of the city frequently occurs at a later period. (Liv. *ll. cc.*; Polyb. xviii. 5; Mela, ii. 3; Plin. iv. 9. s. 16; Ptol. iii. 13. § 43.)

GYTHIUM (Γύθιον, Strab., Polyb., Plut.; Gythium, Liv.; Γυθεῖον, Steph. B. *s. v.*; Gytheum, Cic.: *Eth.* Γυθεάτης), an ancient Achaean town in Laconia, situated near the head of the Laconian gulf, south-west of the mouth of the Eurotas, at the distance of 240 stadia from Sparta according to Strabo (viii. p. 363), and 30 Roman miles according to the Table. This distance agrees with the 43 kilometres which the French commission found to be the distance by the road from the ruins of Gythium to the theatre of Sparta. In Polybius Gythium is said to be 30 stadia from Sparta; but this number is evidently corrupt, and for περὶ τριάκοντα we ought to read with Müller περὶ τριακόσια. (Polyb. v. 19.) Gythium stood upon the small stream Gythius (Mela, ii. 3), in a fertile and well-cultivated plain. (Polyb. v. 19.) Its cheeses are celebrated in one of Lucian's dialogues. (*Dial. Meretr.* 14.) After the Dorian conquest it became the chief maritime town in Laconia, and was therefore regarded as the port of Sparta. It was also the ordinary station of their ships of war. Accordingly, when war broke out between Athens and Sparta, Gythium was one of the first places which the Athenians attacked with their superior fleet; and in B. C. 455 it was burnt by Tolmidas, the Athenian commander. (Thuc. i. 102; Diod. xi. 84.) On the invasion of Laconia by Epaminondas in B. C. 370, after the battle of Leuctra, he advanced as far south as Gythium, but was unable to take it, though he laid siege to it for three days. (Xen. *Hell.* vi. 5. § 32.) Even then it must have been well fortified, but its fortifications appear to have been still further increased by the tyrant Nabis; and when it was taken by the Romans in 195 it is described by Livy as "valida urbs, et multitudine civium incolarumque et omni bellico apparatu instructa" (xxxiv. 29). Augustus made it one of the Eleuthero-Laconian towns; and under the Roman empire it again became a place of importance, as is shown by its ruins, which belong almost exclusively to the Roman period. Its port, according to the information received by Strabo, was artificial (ἔχει δ', ὡς φασι, τὸ ναύσταθμον ὀρυκτόν, Strab. viii. p. 363).

Pausanias saw in the market-place of Gythium statues of Apollo and Hercules, who were reputed to be the founders of the city; near them a statue of Dionysus; and on the other side of the market-place a statue of Apollo Carneius, a temple of Ammon, a brazen statue of Asclepius, the temple of which had no roof, a fountain sacred to this god, a sanctuary of Demeter, and a statue of Poseidon Gaeaochus. A fountain still flowing between the shore and the Acropolis seems to have been the above-mentioned fountain of Asclepius, and thus indicates the site of the Agora. On the Acropolis was a temple of Athena; and the gates of Castor mentioned by Pausanias appear to have led from the lower city to the citadel. (Paus. iii. 21. §§ 8. 9.) Opposite Gythium was the island Cranaë, whither Paris was said to have carried off Helen from Sparta. [CRANAE.]

The coast on the mainland south of Gythium was said to have derived its name of Migonium (Μιγώνιον) from the union of Paris and Helen on the opposite island. On this coast was a temple of Aphrodite Migonitis, and above it a mountain sacred to Dionysus called Larysium (Λαρύσιον), where a festival was celebrated to this god in the beginning of spring. (Paus. iii. 22. § 1.) Pausanias further describes, at the distance of three stadia from Gythium, a stone on which Orestes is said to have been relieved from his madness. This stone was called Ζεὺς (according to Sylburg, Λεὺς) καταπώτας, i. e. καταπαύτης, the Reliever. The town *Marathonisi*, which was built at the beginning of the present century, and is the chief port of the district *Mani*, occupies the site of Migonium; and the hill above it, called *Kúmaro*, is the ancient Larysium. The remains of Gythium, called *Paleópoli*, are situated a little north of *Marathonisi*. They lie upon the slope of some small hills, and in the plain between them and the sea. These remains, which are considerable, belong chiefly to the Roman period, as has been already stated. Near the edge of the shore are the remains of two large buildings, probably Roman baths, consisting of several small rooms and divisions. The foundations of buildings may also be seen under water. Ninety yards inland from the shore, on the slope of the larger hill, are the remains of the theatre, built of white marble. Some of the marble seats still remain in their places, but most of them have disappeared, as the space enclosed by the theatre has been converted into a vineyard. The diameter appears to have been about 150 feet. From 50 to 100 feet from the theatre, in a slight hollow between the hills, are the ruins of a Roman building of considerable size. The Acropolis was on the top of the hill above the theatre, but of its walls there are only a few fragments. All round the town, and especially on the hills, are twenty or thirty ruins of small buildings of tiles and mortar, in the Roman style, containing niches in the walls. These were Roman sepulchres; one of them was excavated by Ross, who found there some sepulchral lamps.

On the left of the road from *Paleópoli* to *Marathonisi* is an inscription on the rock, which has not yet been deciphered (Böckh, *Inscr.* 1469); and close to it, hewn in the rock, is a chair with a foot-step, which appears to be the spot where Orestes was said to have been relieved from his madness. Most of the inscriptions found at *Paleópoli* are of the Roman period. (Böckh, *Inscr.* 1325. 1326. 1391. 1392, 1469.) (Weber, *de Gytheo et Lacedaemoniorum Rebus Navalibus*, Heidelberg, 1833; Leake, *Morea*, vol. i. p. 244; Boblaye, *Recherches*, &c. p. 86; Ross, *Wanderungen in Griechenland*, vol. i. p. 232, seq.; Curtius, *Peloponnesos*, vol. ii. p. 270.)

COIN OF GYTHIUM.

GYTHO'NES (Γύθωνες, Ptol. iii. 5. § 20), a Sarmatian people, situated to the W. of the Veneti, whose position must be sought for in the eastern parts of Prussia. (Comp. Schafarik, *Slav. Alt.* vol. i. pp. 121, 204, 301.) [E.B.J.]

H.

HABESSUS, the ancient name of the town of Antiphellus in Lycia. (Plin. v. 28; comp. ANTIPHELLUS.) [L. S.]

HABITANCUM, in Britain. The following inscription is the authority for the name, which occurs in neither the Notitia nor the Itineraries: —

MOGONT CAD
ET N. D. N. AVG
M. G. SECUNDINVS
BF. COS. HABITA
NCI PRIMA STA
PRO SE ET SVIS POS.
(*Monum. Brit.* 130.)

This was found near *Risingham* in Durham.

Another from the same locality (*Monum. Britann.* 102) runs —

DEO INVICTO
HERCVLI SACR
L. ÆMIL. SALVIANVS
TRIB COH I VANGI
V. S. P M.

A third (*Mon. Brit* 102*a*) is —

* * * * * * *
* * ICO MAXI
COS III ET M AVREL ANTONINO PIO
COS II AVG . . . . .
PORTAM CVM MVRIS VETVSTATE DILAPSIS IVSSV ALIENI SENECINIS VO
COS CVRANTE COL ANITI ADVENTO PRO
AVG NN.C[I] VANGON O PF S
CVM ÆMI SALVIAN TRIB
SVO A SOLO RESTI.

Many important remains have been found here: e. g., altars, and traces of the walls of the station; so that the identification of Habitancum with *Risingham* has been generally sanctioned. The inscriptions inform us of important restorations, and also of its being the station for a cohort of the Vangiones: "The rude but celebrated figure of Rob of Risingham, sculptured upon the face of the natural rock, is to the south of the station. A portion of the rock was rent off by gunpowder some years ago, carrying the upper part of the figure with it. He carries a bow in one hand, and what appears to be a hare or rabbit in the other." (Bruce's *Roman Wall*, p. 306.)

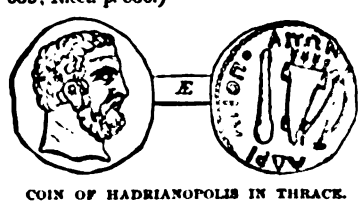
To the ethnographical philologist the termination *-enc-* is important. Its presence in such a word as *Habitancum* shows it to be British, and, as such, Keltic. It is well known, however, that the name by which the river *Po* was known to the Ligurians was *Bodincus;* a gloss which, even in the classical times, was translated *fundo carens*. Seeing this, Prichard suggested the reading *Boden-los*, and from it the Germanic character of the Ligurians. His doctrine has been taken up by others. It is clear, however, that the more we find other forms in *-nc-*, the less the reason for refining on the current form *Bodincus*. The more, too, such forms are Keltic, the less the probability of the inference that the *Ligurians* were German, and the greater that of their being Kelts. [R. G. L.]

HADRANUM. [ADRANUM.]

HADRIA. [ADRIA.]

HADRIA'NI (Ἀδριανοί: *Eth.* Ἀδριανεύς), a town in Bithynia, not far from the western bank of the river Rhyndacus. It was built, as its name indicates, by the emperor Hadrian, and for this reason did not exist in the time of Ptolemy; it was situated on a spur of Mount Olympus, and 160 stadia to the south-east of Poemanenus. (Aristid. i. p. 596.) Hamilton (*Researches*, i. pp. 90, foll.) thinks that he discovered its ruins near the village of *Beyjik*, on the road from *Brusa* to *Bergamo;* but this does not quite agree with the above-mentioned distance from Poemanenus, according to which it ought to be looked for much further westward. Adriani was the birthplace of the rhetorician Aelius Aristides, who was born in A. D. 117. In the ecclesiastical writers the town is known as the see of a bishop in the Hellespontine province. (Hierocl. p. 693; Socrat. *Hist. Eccles.* vii. 25; Concil. Nicaen. ii. pp. 51, 572; Concil. Chalced. p. 176; comp. Sestini, *Geo. Num.* p. 35.) [L. S.]

HADRIANOPOLIS (Ἀδριανούπολις). 1. (*Adrianople* or *Edrene*), the most important of the many towns founded by the emperor Hadrian, was situated in Thrace, at the point where the river Tonzus joins the Hebrus, and where the latter river, having been fed in its upper course by numerous tributaries, becomes navigable. From Ammianus Marcellinus (xiv. 11, xxvii. 4) it would appear that Hadrianopolis was not an entirely new town, but that there had existed before on the same spot a place called Uscudama, which is mentioned also by Eutropius (vi. 8). But as Uscudama is not noticed by earlier writers, some modern critics have inferred that Marcellinus was mistaken, and that Uscudama was situated in another part of the country. Such criticism, however, is quite arbitrary, and ought not to be listened to. At one time Hadrianopolis was designated by the name of Orestias or Odrysus (Lamprid. *Heliog.* 7; Nicet. pp. 360, 830; Aposp. Geog. *ap. Hudson*, iv. p. 42); but this name seems afterwards to have been dropped. The country around Hadrianople was very fertile, and the site altogether very fortunate, in consequence of which its inhabitants soon rose to a high degree of prosperity. They carried on extensive commerce and were distinguished for their manufactures, especially of arms. The city was strongly fortified, and had to sustain a siege by the Goths in A. D. 378, on which occasion the workmen in the manufactories of arms formed a distinct corps. Next to Constantinople, Hadrianopolis was the first city of the Eastern empire, and this rank it maintained throughout the middle ages; the Byzantine emperors, as well as the Turkish sultans, often resided at Hadrianopolis. (Spart. *Hadr.* 20; Amm. Marc. xxxi. 6, 12, 15; *It. Ant.* 137, 175, 322; Procop. *B. G.* iii. 40; Ann. Comn. x. p. 277: Zosim. ii. 22; Cedren. ii. pp. 184, 284, 302, 454; Hierocl. p. 635; Nicet. p. 830.)



COIN OF HADRIANOPOLIS IN THRACE.

2. A town built by Hadrian in the northern part of Bithynia, which was little known in consequence of its distance from the high roads, for which reason the place is not noticed in the Itineraries. (Hierocl. p. 695; Novell. 29; Concil. Nicaen. ii. p. 52.) We possess coins of this town from the time of Hadrian to the reign of Philip. (Sestini, p. 68.) Leake (*Asia*

Digitized by Google

Min. p. 309) identifies it with the Turkish town *Boli* near the Filbas.

3. A town built by the emperor Hadrian in Phrygia, between Philomelium and Tyriaeum. (Hierocl. p. 672; Concil. Chalced. p. 670; Concil. Const. ii. p 241.) Kiepert is inclined to identify this town with the ruins of *Arkutchan*. [L. S.]

HADRIANO'POLIS (Ἁδριανούπολις), a town of Illyricum, founded by Hadrian, and situated on the road from Apollonia to Nicopolis, about midway between those two towns. (*Peut. Tab.*) It was repaired by Justinian, and called JUSTINOPOLIS (Procop. *de Aed.* iv. 1), and became one of the cities of the government of old Epeirus and the see of a bishop (Hierocles). The small theatre and other vestiges in the plain below *Libókhovo* mark the position of this city. Ten or twelve miles lower down the river are the ruins of a fortress or small town of the Byzantine age, called *Drynópoli*, which name has been taken for a corruption of the old city, though it really is derived from the river on which the place is situated, still called *Dhrýno* or *Drýno*. These remains are of a later age than the theatre, which belongs to Paganism.

The probability is, that when Hadrianopolis fell in ruins Drynopolis was built on a different site, and became the see of the bishop. (Leake, *Northern Greece*, vol. i. p. 76.) [E. B. J.]

HADRIANUTHE'RAE (Ἁδριάνου θῆραι), a town of Mysia, on the road from Ergasteria to Miletopolis, was built by the emperor Hadrian to commemorate a successful hunt which he had had in the neighbourhood. (Dion Cass. lxix. 10; Spartian. *Hadr.* 20.) This town, of which we possess coins from the reign of Hadrian onwards, is identified by Sestini (*Viaggi Diversi*, p. 135) with the village of *Trikala*, one hour and a half from Soma. (Comp. G. Cedren. i. p. 437, ed. Bonn; Aristid. i. p. 500.) It seems to have been a place of some note; for it was the see of a bishop, and on its coins a senate is mentioned. (Hierocl. p. 6.) [L. S.]

HADRIATICUM MARE. [ADRIATICUM MARE.]

HADRUME'TUM or ADRUME'TUM, and in late writers (Mart. Cap. vi. 216) ADRUME'TUS (ἡ Ἁδρύμη, ὁ Ἁδρύμης, -ητος, Strab. xiii. p. 834, Polyb. xv. 5. § 3, 15. § 3, Steph. B. *s. v.*; ἡ Ἁδρύμητος, Scyl. p. 49, Steph. B.; Ἁδρυμητός, Appian, *Pun.* 33, 47; Ἁδρούμητος or Ἁδρούμιττος, Ptol. iv. 3. §§ 9, 37, viii. 14. § 6; Ἁδρούμητον, *Stadiasm.*, &c.; Ἁδράμητος, Procop. *B. V.* i. 17, ii. 23; see, on the various forms of the name, Groskurd's note to his translation of Strabo, vol. iii. p. 435: *Eth.* Ἁδρυμητινός, and sometimes also Ἁδρυμήσιος and Ἁδρυμήτιος, Steph. B.; Hadrumetinus: *Susa*, Ru.), one of the chief cities of Africa Propria, and, after the division of the province, the capital of Byzacena, stood on the sea-coast, a little within the S. extremity of the Sinus Neapolitanus (*Gulf of Hammamet*). It was a Phoenician colony, older than Carthage (Sall. *Jug.* 19), under the dominion of which city it fell to the extent described under CARTHAGO. Pliny mentions it among the *oppida libera* of Byzacium (v. 4. s. 3; comp. Mela, i. 7. § 2). Trajan made it a colony, and its full name is found on inscriptions as COL. CONCORDIA ULPIA TRAJANA AUGUSTA FRUGIFERA HADRUMETINA, and on coins as COLONIA CONCORDIA JULIA HADRUMETINA PIA. (Gruter, p. 362; Eckhel, vol. iv. p. 134.) It stood in a very fertile district, as one of the above titles denotes, and was one of the chief sea-ports for the great corn-producing country of Byzacium. Its site formed an amphitheatre overlooking the sea, and surrounded by strong walls, which did not, however, enclose its harbour (Cothon), which lay immediately below it. (*Bell. Afr.* 3, 5, 62, 63; Ruins; the statement of the *Periplus*, that it was ἀλίμενος, does not prove that its harbour was at a distance, but simply that it had been choked up by the sands which are always encroaching on this coast.) It is often mentioned in the Punic and Civil Wars. (Polyb., Appian, *ll. cc.*; Liv. xxx. 29; Nep. *Hann.* 6; Caes. *B. C.* ii. 28; *Bell. Afr. ll. cc.*) Having shared the fate which so many other cities of Africa suffered from the Vandals, it was restored by Justinian, and named JUSTINIANA or JUSTINIANOPOLIS. (Procop. *l. c.*: Forbiger, vol. ii. p. 845, asserts, without giving his authority, that it was afterwards named HERACLIA, after the emperor Heraclius, and on this ground identifies Shaw in placing it at *Herklah*, 10 miles higher up along the coast; but the distances in the Itinerary, pp. 52, 53, 56, clearly show the identity of *Susa* with Hadrumetum, and of *Herklah* with HORREA COELIA: the name of the latter place suggests that it was a great depôt for the agricultural produce which formed the staple of the commerce of Hadrumetum. The conjecture of Barth deserves notice, that the name *Susa* may be the representative of ἡ σώζουσα, as we know to be the case with Apollonia on the Cyrenaic coast.) This city was the native place of the Caesar Clodius Albinus (Capitolin. Clod. *Alb.* 1.) It is one of Ptolemy's points of recorded astronomical observations, having 14 hrs. 12 min. in its longest day, and being 1 hr. 35 min. W. of Alexandria (viii. 14. § 6).

Extensive ruins were still to be seen at *Susa* in the time of the Arabian geographer Abou Obeid Bekri of Cordova, who describes, among the remains of many other great ancient buildings, two in particular: the one, which he calls *Mela'b*, an immense building of light volcanic stone from Etna, with arched galleries, appears to have been a theatre or amphitheatre; and the other, which he calls *El Kubtas*, was a temple on an enormous basement four steps high, of which a quadrangular mass of masonry still in existence, and called the *Medinah*, i. e. *fallen*, is supposed by Barth to be the remains. At the present time, however, the ruins are of little magnitude; consisting of some remains of a mole which formed a part of the ancient harbour, some traces of the walls, chiefly on the SW., eight great reservoirs lying parallel to one another, scattered fragments of pillars, a few inscriptions, and, at a short distance from the city, a few mosaics, which seem to mark the site of the villas of the wealthy citizens. (Shaw, *Travels in Barbary*, &c. p. 105, 2nd ed.; Barth, *Wanderungen durch das Barbarische und Kyrenäische Küstenland*, pp. 152, foll.: it seems worth while to correct Dr. Barth's extraordinary error in making the ship of Adramyttium in which St. Paul sailed, *Acts*, xxvii. 2, a ship of Hadrumetum; for the position, see the map on p. 532.) [P. S.]

HAEBRIDES. [HEBUDES.]

HAEMIMONTUS, the name of a province comprising the country about mount Haemus, from which it derived its name. This province, of which Adrianopolis and Anchialus were the principal towns, is not mentioned until a late period of the Roman empire, when it is described by Ammianus Marcellinus as a distinct province in the northeast of Thrace. (Comp. Hierocl. p. 635; *Notit. Imper. Or.* c. 1, with Boecking's note, 145.) [L. S.]

Digitized by Google

HAEMODAE. [HEBUDES.]

HAEMUS or AEMUS (ὁ Αἷμος, τὸ Αἷμον ὄρος, or Αἷμος: *Balkan*), a large range of mountains in the north of Thrace, which in its widest sense is said to extend from the Adriatic in the west to the Euxine in the east. (Anonym. *Peripl. Pont. Eux.* p. 13); Amm. Marc. xxi. 10.) Herodotus (iv. 49) does not describe the extent of the range, though he applies the name to heights west of mount Rhodope, where the river Cius, a tributary of the Ister, is represented as dividing mount Haemus into two halves. But most other writers apply the name Haemus, like the modern Balkan, only to the eastern part of this range from mount Scomius in the west to the Euxine, where it terminated between the towns of Naulochus and Mesembria. Its western beginning is about the sources of the rivers Isker and Maritza. (Strab. vii. pp. 319, 320; Arrian, *Peripl.* p. 24; Plin. iv. 18.) The range of Haemus is in no part particularly high, although there was a notion among the ancients, that from its highest peak both the Adriatic and the Euxine could be seen. (Pomp. Mel. ii. 2.) But even Strabo (vii. pp. 313 and 317) has refuted this error, which apparently originated with Theopompus and Polybius, though the last author admitted that a person might ascend the mountain in one day. Pliny (iv. 18), who estimates its height at 6000 paces, states that on its summit there existed a town called Aristaeum. The highest parts of the mountain are described as covered with snow during the greater part of the year. (Hom. *Il.* xiv. 227; Theocrit. vii. 76.) Modern travellers estimate the height of the great Balkan, between Sofia and Keczaulik, at 3000 feet, and that of the little Balkan at 2000. The northern side of mount Haemus is less precipitous than the southern one. (Amm. Marc. xxi. 10.) The mountain has altogether six passes by which it may be crossed without much difficulty, but the principal one, which was best known to the ancients, is the westernmost, between Philippopolis and Serdica, and is called by Amm. Marcellinus the pass of *Succi* or *Succorum angustiae* (xxi. 10, xxii. 2, xxvi. 10, xxvii. 4, xxxi. 16); it now bears the name of *Szulu Derbend*, and is sometimes called Porta Trajani.

The people dwelling on and about mount Haemus are generally called Thracians, but the following tribes are particularly mentioned: the *Crobyzi* (Herod. *l. c.*; Strab. vii. p. 318), the *Coralli* (Strab. vii. p. 301), the *Bessi*, and some less known tribes. All of them were regarded by the Romans as robbers, and the *Asti* in particular are described as pirates infesting the coasts of the Euxine, until they were transplanted by Philip of Macedonia. The name Haemus seems to be connected with the Greek χείμα, χειμών, and the Sanscrit *himan* and *héman*, according to which it would signify the cold or stormy mountain; but it is possible also that the name is of Thracian origin. (Comp. Boué in Berghaus, *Geogr. Almanach*, 1838, pp. 26, foll., and by the same author *La Turquie d'Europe*, Paris, 1840, in 4 vols. 8vo.) [L. S.]

HAGNUS. [ATTICA, p. 327.]

HALAE (Ἅλαι), a town situated upon the Opuntian gulf, but belonging to Boeotia in the time of Strabo and Pausanias. It is described by Pausanias as situated to the right of the river Platanius, and as the last town of Boeotia. It probably derived its name from some salt springs which are still found in its neighbourhood. Leake places it on the cape which projects to the northward beyond *Malesina* and *Proskynd*, where some ruins are said to exist at a church of St. John Theologus. (Strab. ix. pp. 405, 425; Paus. ix. 24. § 5; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 288.)

HALAE ARAPHE'NIDES. [ATTICA, p. 332, a.]

HALAE AXO'NIDES. [ATTICA, p. 327, b.]

HALAESA. [ALAESA.]

HALES or HALE'SUS (Ἅλης, gen. Ἄλεντος), a small river of Ionia in Asia Minor, descending from Mount Cercaphus, and emptying itself, after a short course, into the Aegean near Colophon. (Plin. v. 31; Liv. xxxvii. 36.) Its water is said to have been colder than that of any river in Asia Minor. (Paus. vii. 5. § 5, viii. 28. § 2; Tzetz. *ad Lycoph.* 424.) Some suppose that this river is spoken of in a fragment of Mimnermus, quoted by Strabo (xiv. p. 634), where, however, the common reading is Ἀστήεντος (see Cramer's note). Arundell (*Visit to the Seven Churches*, p. 306) believes this river to be the same as the *Havagichay*, while others identify it with the *Tartalu*. [L. S.]

HALI'SION (Ἁλήσιον πεδίον) "the salt-plain," a small district in the south-west of Troas, south of the river Satnioeis. (Strab xiii. p. 605.) It derived its name from the circumstance that, during a part of the year, the country was overflown by the sea, which, on withdrawing, left behind a sediment of salt. Salt-works accordingly existed there at a place called the Tragasaean Salines (τὸ Τραγασαῖον ἁλοπήγιον). There was a story that Lysimachus levied a duty on the collectors of the salt, and that thereupon the salt disappeared altogether, but reappeared on the withdrawal of the tax. (Athen. iii. p. 73; comp. Pollux, vi. 10; Plin. xxxi. 41; Galen, *de Temp. Med. Simpl.* ii. p. 151; Hesych *s. v.* Τραγασαῖοι; Steph. B. *s. vv.* Ἁλήσιος and Τράγασαι, who, however, by mistake transfers the plain to Epirus.) According to Leake, the neighbouring hills are composed of salt rock; and the salt-works, which are still in existence, are called by the Turks Tuzla. (*Asia Minor*, pp. 273, foll.) [L. S.]

HALEX or ALEX (Ἅληξ or Ἄληξ: there is much discrepancy with regard to the aspirate), a small stream in the S. of Bruttium between Locri and Rhegium, which, according to Strabo (vi. p. 260), formed the boundary between the territories of the two cities. Thucydides tells us that the Locrians had a small fort or out-post (περιπόλιον) on its banks, which was taken by the Athenians under Laches (iii. 99). This has been magnified by geographers into a town of the name of Peripolium: but was evidently nothing more than a fortified post to guard the frontier. (See Arnold's note.) Strabo relates of the Halex the peculiarity assigned by other writers to the Caecinus, another river of Bruttium, that the cicadae on the one side of it were silent, and those on the other musical; and he cites from Timaeus a mythical explanation of the phenomenon. (Strab. vi. p. 260; Timaeus, *ap. Antig. Caryst.* 1; Conon. *Narrat.* 5.) Diodorus gives another version of its origin, but describes the silence as extending to both confines (iv. 22). The river Halex still retains its name with little variation as the *Alice*: its mouth is about 8 miles E. of the *Capo dell' Armi*, the ancient Leucopetra, and 15 miles W. of *Cape Spartivento*. [E. H. B.]

HALIACMON FL. (Ἁλιάκμων, Hesiod, *Th.* 341; Herod. vii. 127; Scyl. p. 26; Strab. vii. p. 330; Ptol. iii. 13. §§ 15, 18; Caesar *B. C.* iii. 36; Liv. xlii. 53; Plin. iv. 10; Claud. *B. Get.* 179: *Vistritza*; Turkish, *Inje-Kara*), a river of Macedonia,

Digitized by Google

rising in the chain of mountains to which Ptolemy (*l. c.*) gave the name of Canalovii. According to Caesar (*l. c.*), it formed the line of demarcation between Macedonia and Thessaly.

In the upper part of its course it takes a SE. direction through Elymiotis, which it watered; and then, continuing to the NE., formed the boundary between Pieria, Eordaea, and Emathia, till it discharged itself into the Thermaic gulf. In the time of Herodotus the Haliacmon was joined by the Lydias, or discharge of the lake of Pella; but a change has now taken place in the course of the latter, which joins not the Haliacmon, but the Axius. The Haliacmon itself appears to have moved its lower course to the E. of late, so that, in time, perhaps all the three rivers may unite before they join the sea.

The *Vistritza*, although betraying a Slavonic modification in its termination, may possibly be a corruption of ASTRAEUS (Aelian, *H. A.* xv. 1), which was perhaps the ordinary appellation of the river below the gorges of Beraea, as Haliacmon was that above them; in the same manner as *Injčkara* and *Vistritza* are used in the present day.

Its banks are now confined by artificial dykes to restrain its destructive inundations, and the river itself is noted at *Vérria* for *guliani* of immense size: the same fish grows to enormous dimensions in the lake at *Kastoria* [CELETRUM], which is one of the sources of the *Vistritza*. (Leake, *Northern Greece*, vol. i. pp. 303, 316, vol. iii. pp. 292, 437.) [E. B. J.]

HALIARTUS (Ἅλιαρτος: *Eth.* Ἁλιάρτιος), a town of Boeotia, and one of the cities of the confederation, was situated on the southern side of the lake Copais in a pass between the mountain and the lake. (Strab. ix. p. 411.) It is mentioned by Homer, who gives it the epithet *ποιήεις* in consequence of its well-watered meadows. (Hom. *Il.* ii. 503, *Hymn. in Apoll.* 243.) In the invasion of Greece by Xerxes (B. C. 484) it was the only town that remained true to the cause of Greece, and was in consequence destroyed by the Persians. (Paus. ix. 32. § 5.) It was, however, soon rebuilt, and in the Peloponnesian War appears as one of the chief cities of Boeotia. (Thuc. iv. 95.) It is chiefly memorable in history on account of the battle fought under its walls between Lysander and the Thebans, in which the former was slain, B. C. 395. (Xen. *Hell.* iii. 5. § 17, seq.; Diod. xiv. 81; Plut. *Lys.* 28, 29; Paus. iii. 5. § 3, ix. 32. § 5.) In B. C. 171 Haliartus was destroyed a second time. Having espoused the cause of Perseus, it was taken by the Roman praetor Lucretius, who sold the inhabitants as slaves, carried off its statues, paintings, and other works of art, and razed it to the ground. Its territory was afterwards given to the Athenians, and it never recovered its former prosperity. (Polyb. xxx. 18; Liv. xlii. 63; Strab. ix. p. 411.) Strabo speaks of it as no longer in existence in his time, and Pausanias, in his account of the place, mentions only a heroum of Lysander, and some ruined temples which had been purposely left in that state. (Paus. ix. 33. §§ 1, 3, x. 35. § 2.)

The HALIARTIA (Ἁλιαρτία), or territory of Haliartus, was a very fertile plain, watered by numerous streams flowing into the lake Copais, which in this part was hence called the Haliartian marsh. (Strab. ix. pp. 407, 411.) These streams, which bore the names of Ocalea, Lophis, Hoplites, Permessus, and Olmeius, have been spoken of elsewhere. [See p. 412, a.] The territory of Haliartus extended westward to Mt. Tilphossium, since Pausanias says that the Haliartians had a sanctuary of the goddesses called Praxidicae situated near this mountain. (Paus. ix. 33. § 3.) The towns Peteia, Medeon, Ocalea, and Onchestus were situated in the territory of Haliartus.

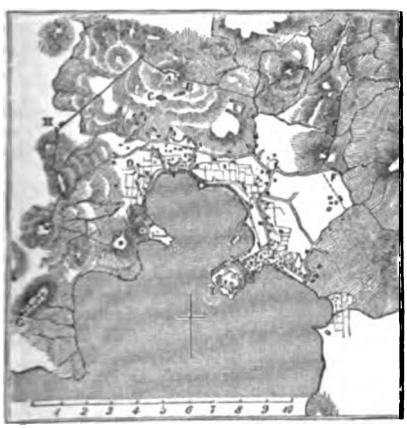
The remains of Haliartus are situated upon a hill about a mile from the village of *Mazi*, on the road from Thebes to Lebadeia, and at the distance of about 15 miles from either place. The hill of Haliartus is not more than 50 feet above the lake. Leake says, "that towards the lake the hill of Haliartus terminates in rocky cliffs, but on the other sides has a gradual acclivity. Some remains of the walls of the Acropolis, chiefly of polygonal masonry, are found on the summit of the hill; and there are several sepulchral crypts in the cliffs, below which, to the north, issues a copious source of water, flowing to the marsh, like all the other streams near the site of Haliartus. Although the walls of the exterior town are scarcely anywhere traceable, its extent is naturally marked to the east and west by two small rivers, of which that to the west issues from the foot of the hill of *Mazi*; the eastern, called the *Kefalári*, has its origin in Mount Helicon. Near the left bank of this stream, at a distance of 500 yards from the Acropolis, are a ruined mosque and two ruined churches, on the site of a village which, though long since abandoned, is shown by these remains to have been once inhabited by both Greeks and Turks. Here are many fragments of architecture and of inscribed stones, collected formerly from the ruins of Haliartus. From this spot there is a distance of about three-quarters of a mile to a tumulus westward of the Acropolis, where are several sarcophagi and ancient foundations near some sources of waters, marking probably the site of the western entrance of the city."

The stream which flowed on the western side of the city is the one called Hoplites by Plutarch, where Lysander fell, and is apparently the same as the Lophis of Pausanias. (Plut. *Lys.* 29; Paus. ix. 33. § 4.) The stream on the eastern side, called *Kefalári*, is formed by the union of two rivulets, which appear to be the Permessus and Olmeius, which are described by Strabo as flowing from Helicon, and after their union entering the lake Copais near Haliartus. (Strab. ix. pp. 407, 411; see BOEOTIA, p. 413, a.) The tumulus, of which Leake speaks, perhaps covers those who were killed along with Lysander, since it was near this spot that the battle was fought. (Leake, *Northern Greece*, vol. ii. p. 206, seq.)

HALICARNASSUS (Ἁλικαρνασσός: *Eth.* Ἁλικαρνασσεύς, Halicarnassensis: *Bodrum* or *Bendroum*), a Greek city on the coast of Asia Minor, on the Ceramian gulf. It was a colony of Troezene in Argolis established on the slope of a precipitous rock, and one of the six towns constituting the Dorie hexapolis in Asia Minor, the five other towns being Cnidos, Cos, and the three Rhodian towns Ialysus, Lindus, and Camirus. (Herod. vii. 99, iii. 14; Strab. xiv. pp. 653, 656; Paus. ii. 30. § 8; Ptol. v. 2. § 10; Pomp. Mel. i. 16; Plin. v. 29; Steph. B. *s. v.*) The isthmus on which it was situated was called Zephyrium, whence the city at first bore the name of Zephyria. Halicarnassus was the largest and strongest city in all Caria (Diod. Sic. xv. 90), and had two or even three very impregnable *acropoleis*: the principal one, called *Salmacis*, was situated on a precipitous rock at the northern extremity of the city

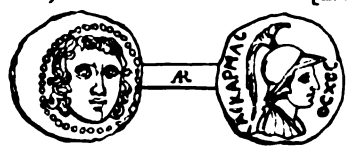
Digitized by Google

(Arrian, *Anab.* i. 23; Vitruv. ii. 8; Diod. xvii. 23, foll.), and received its name from the well Salmacis, which gushed forth near a temple of Aphrodite at the foot of the rock, and the water of which was believed to exercise an enervating influence (Ov. *Met.* iv. 302). But Strabo justly controverts this belief, intimating that the sensual enjoyments and the delicious character of the climate must rather be considered to have produced the effects ascribed to the Salmacis. Another arx was formerly believed to have been in the island of *Arconnesus* in front of the great harbour, which is now called *Orak Ada;* but this belief was founded upon an incorrect reading in Arrian. (Strab. *l. c.*; Arrian, *Anab.* i. 23; Hamilton, *Researches*, ii. p. 34.) Besides the great harbour, the entrance to which was narrowed by piers on each side, there was a smaller one to the south-east of it. Halicarnassus, as already remarked, originally belonged to the Doric hexapolis; but in consequence of some dispute which had arisen, it was excluded from the confederacy. (Herod. i. 144.) During the Persian conquests it was, like all the other Greek towns, compelled to submit to Persia, but does not appear to have been less prosperous, or to have lost its Greek character. While the city was under the dominion of the Persians, Lygdamis set himself up as tyrant, and his descendants, as vassals of the kings of Persia, gradually acquired the dominion of all Caria. Artemisia, the widow of Lygdamis, fought at Salamis in the fleet of Xerxes. The most celebrated among their successors are Mausolus and his wife and sister Artemisia, who, on the death of Mausolus, erected in his honour a sepulchral monument of such magnificence that it was regarded as one of the seven wonders of the ancient world. This Carian dynasty, though subject to Persia, had themselves adopted Greek manners and the Greek language, and had a taste for the arts of Greece. But notwithstanding this, Halicarnassus was faithful to Persia, and was one of the great strongholds of the Persians on that coast, and a chief station of the Persian forces. This, and the gallant defence with which the Halicarnassians defended themselves against Alexander, induced that conqueror, after a protracted siege, to destroy the city by fire. He was, however, unable to take the acropolis Salmacis, in which the inhabitants had taken refuge. (Strab. and Arrian, *l. c.*; Diod. Sic. xvii. 23, foll.; Curtius, ii. 9, foll.) From this blow Halicarnassus never recovered, though the town was rebuilt. (Cic. *ad Quint. Frat.* i. 1.) In the time of Tiberius it no longer boasted of its greatness, but of its safety and freedom from earthquakes. (Tac. *Ann.* iv. 55.) Afterwards the town is scarcely mentioned at all, although the Mausoleum continued to enjoy its former renown. (Const. Porph. *de Them.* i. 14; see the descriptions of it in Plin. xxxvi. 9, and Vitruv. ii. 8.) The course of the ancient walls can still be distinctly traced, and remains of the Mausoleum, situated on the slope of the rock east of Salmacis, and of the arx, as well as the spring Salmacis, still exist. (Hamilton's *Researches*, ii. pp. 34, foll.) Among the numerous temples of Halicarnassus, one of Aphrodite was particularly beautiful. (Diod.; Vitruv. *l. c.*) To us the city is especially interesting as the birthplace of two historians, Herodotus and Dionysius. Some interesting sculptures, brought from *Boudroum*, and supposed to have originally decorated the Mausoleum, are now in the British Museum. (Ross, *Reisen auf den Griech. Inseln*, vol. iv. pp. 30, foll., from which the accompanying plan is taken.) [L. S.]



BOUDROUM, OR HALICARNASSUS.

A. Salmacis, the acropolis.
B. Tombs in the rock.
C. Theatre.
D. Spring Salmacis.
E. The Mausoleum.
F. Gate leading to Mylasa.
G. Hill of the Windmills.
H. Gate leading to Myndus.
I. Palace of the ancient kings.



COIN OF HALICARNASSUS.

HA'LICE. [HALIEIS.]

HALICYAE (Ἁλικύαι: *Eth.* Ἁλικυαῖος, Halicyensis: *Salemi*), a city in the west of Sicily, about midway between the two seas, and 10 miles S. of Segesta. Stephanus of Byzantium correctly describes it as situated between Entella and Lilybaeum. (Steph. B. *s. v.*) Its name frequently occurs in history, and generally in connection with the adjacent cities of Entella and Segesta, but we have no account of its origin: it was probably a Sicanian town, and followed the fortunes of its more powerful neighbours. Hence, when it first appears in history* we find it subject to, or at least dependent on, Carthage, the power of which was at that time predominant in the W. of Sicily. In B. C. 397, when the great expedition of Dionysius caused the greater part of the Carthaginian allies and subjects to revolt, Halicyae was one of the five cities which remained faithful to them, on which account its territory was ravaged by Dionysius. (Diod. xiv. 48.) But the next year the Halicyans were so alarmed at his progress that they concluded a treaty of alliance with him, which, however, they soon broke on the appearance of Himilco in Sicily at the head of a large army, and rejoined the Carthaginian alliance. (Id. xiv. 54, 55.) They are not again mentioned till B. C. 276, during the expedition of Pyrrhus to Sicily, when they followed the example of the Selinuntines and Segestans, and

* The name of the Ἁλικυαῖοι is first found in Thucydides (vii. 32) at the time of the Athenian expedition in Sicily; but is generally considered corrupt: it is certainly difficult to conceive that Halicyae is really the place there meant.

Digitized by Google

declared themselves in favour of that monarch (Id. xxii. 10. Exc. H. p. 498.) Again, in the First Punic War they were among the first to imitate the conduct of the Segetans, and, throwing off the Carthaginian yoke, declared themselves on the side of Rome. (Id. xxiii. 5, p. 502.) For this signal service Halicyae was rewarded by the grant of peculiar privileges, which we find its citizens still enjoying in the time of Cicero, who reckons it among the five cities of Sicily which were "sine foedere immunes ac liberae." (*Verr.* iii. 7, 40.) But even this privileged condition did not preserve them from the exactions of Verres. (Ib. ii. 28, iii. 40, v. 7.) From this time we hear little of Halicyae, which appears to have lost its peculiar privileges, and had sunk in the time of Pliny into an ordinary stipendiary town. (Plin. iii. 8. s. 14.) That author is the last who mentions its name. The passage already cited from Stephanus is the only direct authority for the position of Halicyae, but agrees well with what we may gather from Diodorus; and there seems no reason to doubt that the site has been correctly identified by Fazello and Cluverius with that of the modern town of *Salemi*. It stands on a hill in a commanding position, and must have been a place of considerable strength. There are no ancient remains; but the modern, as well as the ancient name, appears to have reference to the *salt* springs in the neighbourhood. It is distant about 20 miles E. from *Marsala* (the ancient Lilybaeum) and 16 N. from the site of Selinus.

It is not improbable that we should read Ἁλικυαίων in Diodorus (xxxvi. 3. p. 531), where he speaks of a Servile outbreak taking place,—*κατὰ τὴν Ἀγκυλίων χώραν*,—a name otherwise unknown. In a previous passage of the same author already cited (xiv. 48) the MSS. have Ἀγκυραίων, but there seems no doubt that here the true reading, as suggested by Wesseling, is Ἁλικυαίων. Cluverius, however, contends for the correctness of the old reading, and admits the existence of a city named Ancyra, which he identifies with the Ἄγκυρα of Ptolemy (iii. 4. § 15). [E. H. B.]

HALICYRNA (Ἁλίκυρνα: *Eth.* Ἁλικυρναῖος), a village of Aetolia, described by Strabo as situated 30 stadia below Calydon towards the sea. Pliny places it near Pleuron. Leake discovered some ruins, midway between *Kurt-aga* (the site of Calydon) and the eastern termination of the lagoon of *Mesolonghi*, which he supposes to be the remains of Halicyrna. (Strab. x. p. 459, sub fin., where the common text has the false reading Αἴκυρνα; Scyl. p. 14; Plin. iv. 3; Steph. B. *s. v.*, where it is erroneously called a village in Acarnania; Leake, *Northern Greece*, vol. iii. p. 533.)

HALIEIS (Ἁλιεῖς), the name of a sea-faring people on the coast of Hermionis, who derived their name from their fisheries. (Strab. viii. p. 373.) They gave their name to a town on the coast of Hermionis, where the Tirynthians and Hermionians took refuge when they were expelled from their own cities by the Argives. (Ephor. *ap. Byz. s. v.* Ἁλιεῖς; Strab. viii. p. 373.) This town was taken about Ol. 80 by Aneristus, the son of Sperthias, and made subject to Sparta (ὃς εἶλε Ἁλιέας [not ἁλιέας] *τοὺς ἐκ Τίρυνθος*, Herod. vii. 137). The district was afterwards ravaged on more than one occasion by the Athenians. (Thuc. i. 105, ii. 56, iv. 45; Diod. xi. 78.) After the Peloponnesian War the Haliеis are mentioned by Xenophon as an autonomous people. (Xen. *Hell.* iv. 2. § 6, vi. 2. § 3.)

The district is called ἡ Ἁλιάς by Thucydides (ii. 56, iv. 45), who also calls the people or their town Ἁλιεῖς; for, in i. 105, the true reading is ἐς Ἁλιάς, i. e. Ἁλιέας. (See Meineke, and Steph. B. *s. v.* Ἁλιεῖς.) In an inscription we find ἐν Ἁλιεῖσιν. (Böckh, *Inscr.* no. 165.)

Scylax (p. 20) speaks of HALIA (Ἁλία) as a port at the mouth of the Argolic gulf. Callimachus calls the town ALYCUS (Ἄλυκος, Steph. B. *s. v.*), and by Pausanias it is named HALICE (Ἁλίκη), and its inhabitants Halici. (Paus. ii. 36. § 1.) The town was no longer inhabited in the time of Pausanias, and its position is not fixed by that writer. He only says that, seven stadia from Hermione, the road from Halice separated from that to Masoe, and that the former led between the mountains Pron and Coccygius, of which the ancient name was Thorax. In the peninsula of *Kranidhi*, the French Commission observed the remains of two Hellenic sites, one on the southern shore, about three miles from Hermione and the same distance from *C. Masoli*, the other on the south-western side, at the head of a deep bay called *Kheli* or *Bizíti*: the former they suppose to represent Halice, and the latter Masoe, and, accordingly, these two places are so placed in Kiepert's map. But Leake, who is followed by Curtius, observes that the ruins which the French Commission have named Halice are probably some dependency of Hermione of which the name has not been recorded, since the position is too near to Hermione to have been that of Halice, and the harbour is too inconvenient for a people who were of considerable maritime importance. It is far more likely that such a people possessed the port of *Cheli*, the situation of which at the mouth of the Argolic gulf agrees exactly with the description of Scylax. Masoe probably stood at the head of the bay of *Kiládhia*. [MASOE.] (Leake, *Morea*, vol. ii. p. 462, *Peloponnesiaca*, p. 286, seq.; Boblaye, *Recherches*, &c. p. 61; Curtius, *Peloponnesos*, vol. ii. pp. 461, 579.)

HALIMUS. [ATTICA, p. 327, b.]

HALISARNA (Ἁλίσαρνα or Ἁλασάρνη), a town on the south coast of the island of Cos, near Cape Lacterium. (Strab. xiv. p. 657: comp. Ross, *Reisen auf den Griech. Inseln*, vol. iii. p. 136, and iv. p. 22.) [L. S.]

HALIUSSA (Ἁλιοῦσσα), one of the three small islands lying off the promontory Bucephala in Troezenia in Argolis. (Paus. ii. 34. § 8; Leake, *Peloponnesiaca*, p. 283.)

HALMYRIS (Ἅλμυρις), a salt-lake, south of the southernmost mouth of the Danube. It was properly a part of the Euxine, with which it communicated by a narrow channel. It extended from the town of Istrus in the south, nearly as far as Aegyssus on the Danube. On its western coast existed a town of the name of Halmyris. (Plin. iv. 24; Procop. *de Aed.* iv. 7; Philostorg. x. 10; Niceph. *Hist. Eccles.* xii. 29.) [L. S.]

HALONE (Ἁλώνη: *Alonê*), an island in the Propontis, south of Proconnesus. It was also called Neuris and Prochone (Steph. B. *s. v.*; Plin. v. 44), and is probably the same as the island Elaphonesus mentioned by Scylax (p. 35), who notices its excellent harbour, which still exists. [L. S.]

HALONNE'SUS (Ἁλόννησος: *Eth.* Ἁλοννήσιος), an island in the Aegaean sea, lying off the southern extremity of the Magnesian coast in Thessaly. The possession of this island gave rise to a dispute between Philip and the Athenians in B.C. 343.

Digitized by Google

and is the subject of an oration which is included among the works of Demosthenes, but which was ascribed, even by the ancients, to Hegesippus, who was the head of the embassy sent by the Athenians to Philip to demand restitution of Halonnesus. [See *Dict. of Biogr.* Vol. I. p. 989.] Halonnesus lies between Sciathus and Peparethus, and appears to be the same island as the one called SCOPELUS (Σκόπελος) by Ptolemy (iii. 13. § 47) and Hierocles (p. 643, Wessel.), which name the central one of these three islands still bears. Strabo (ix. p. 436) speaks of Sciathus, Halonnesus, and Peparethus without mentioning Scopelus; while in the lists of Ptolemy and Hierocles the names of Sciathus, Scopelus, and Peparethus occur without that of Halonnesus. Halonnesus is also mentioned by Pliny (iv. 12. s. 23), Mela (ii. 7), and Stephanus B. (*s. v.*); but they do not speak of Scopelus. The modern island of *Skopelo* is one of the most flourishing in the Aegaean, in consequence of its wines, which it exports in large quantities. (Leake, *Northern Greece*, vol. iii. p. 111, seq.; Fiedler, *Reise durch Griechenland*, vol. ii. p. 13, seq.)

HALUS or ALUS (ὁ or ἡ, Ἅλος, Ἄλος: *Eth.* Ἁλεύς), a town of Phthiotis in Thessaly, mentioned by Homer. (*Il.* ii. 682.) It is described by Strabo as situated near the sea, at the extremity of Mount Othrys, above the plain called Crocium, of which the part around Halus was called Athamantium, from Athamas, the reputed founder of Halus. (Strab. ix. pp. 432, 433.) Strabo also says that the river Amphrysus, on the banks of which Apollo is said to have fed the oxen of Admetus, flowed near the walls of Halus. [AMPHRYSUS.] Halus is likewise mentioned by a few other writers. (Herod. vii. 173; Dem. *de Fals. Leg.* p. 392; Mela, ii. 3; Plin. iv. 7. s. 14.) Leake places Halus at *Kefálosi*, which is situated at a short distance from the sea on a projecting extremity of Mt. Othrys above the Crocian plain, exactly as Strabo has described. "A Hellenic citadel occupied the summit of the projecting height; and remains of the walls are seen also on the northern slope of the hill, having short flanks at intervals, and formed of masonry which, although massive, is not so accurately united as we generally find it in the southern provinces of Greece. The walls may be traced also on the descent to the south-east, and seem to have been united at the foot of the hill to a quadrangular inclosure situated entirely in the plain, and of which the northern side followed the course of the stream, and the western the foot of the height. The walls of this lower inclosure are nine feet and a half thick, are flanked with towers, and their masonry, wherever traceable, is of the most accurate and regular kind; two or three courses of it still exist in some places." (Leake, *Northern Greece*, vol. iv. p. 336.)

HALUS, a small place in Assyria, probably in the neighbourhood of Artemita, mentioned only by Tacitus (*Ann.* vi. 41). [V.]

HALYCUS (Ἅλυκος: *Platani*), a considerable river of Sicily, which rises nearly in the centre of the island, and flows towards the SW. till it enters the sea close to the site of Heraclea Minoa. Its name was evidently derived from the salt or brackish quality of its waters, a circumstance common to those of the *Platani* and of the *Fiume Salso* (the ancient Himera), and arising from the salt springs which abound in this part of Sicily. It obtained considerable historical importance from the circumstance that it long formed the eastern boundary of the Carthaginian dominions in Sicily. This was first established by the treaty concluded, in B.C. 383, between that people and Dionysius of Syracuse (Diod. xv. 17): and the same limit was again fixed by the treaty between them and Timoleon (Id. xvi. 82). It would appear, however, that the city of Heraclea, situated at its mouth, but on the left bank, was in both instances retained by the Carthaginians. The Halycus is again mentioned by Diodorus in the First Punic War (B.C. 249), as the station to which the Carthaginian fleet under Carthalo retired after its unsuccessful attack on that of the Romans near Phintias, and where they awaited the approach of a second Roman fleet under the consul L. Junius. (Diod. xxiv. 1.; Exc. Hoesch. p. 508.) Polybius, who relates the same events, does not mention the *name* of the river (Polyb. i. 53): but there is certainly no reason to suppose (as Mannert and Forbiger have done) that the river here meant was any other than the well-known Halycus, and that there must therefore have been two rivers of the name. Heracleides Ponticus, who mentions the landing of Minos in this part of Sicily, and his alleged foundation of Minoa, writes the name Lycus, which is probably a mere false reading for Halycus. (Heracl. Pont. § 29, ed. Schneidewin.) Though a stream of considerable magnitude and importance, it is singular that its name is not mentioned by any of the geographers. [E. H. B.]

HALYS (Ἅλυς, sometimes Ἄλυς: *Kisil Irmak*, i. e. the "red river"), the principal river of Asia Minor, has its sources in the Armenian mountains which form the boundary between Pontus and Armenia Minor, that is, at the point where the heights of Scoedises and Antitaurus meet. (Herod. i. 72; Strab. xii. p. 546; Dionys. Perieg. 786; Ov. *ex Pont.* iv. 10. 48.) At first its course has a south-western direction, traversing Pontus and Cappadocia; but in the latter country it turns to the north, and, continuing in a north-eastern direction, discharges itself by several mouths into the Euxine, the latter part of its course forming the boundary between Paphlagonia in the west, and Galatia and Pontus in the east. (Strab. xii. p. 544; Ptol. v. 4. § 3; Arrian, *Peripl.* 16.) According to Strabo, the river Halys received its name from the salt-works in its vicinity (pp. 546, 561); but this is probably incorrect, as the name is often written, without the aspiration, Alys (Eustath. *ad Dionys. Per.* 784). Pliny (vi. 2), making this river come down from Mount Taurus and flow at once from south to north, appears to confound the Halys with one of its tributaries (*Jechel Irmak*). According to Xenophon (*Anab.* v. 6. § 9), the breadth of the Halys is at least 2 stadia. At the time of the greatness of the Lydian empire the Halys formed the boundary between it and Persia, and on its banks Cyrus gained the decisive victory over Croesus. (Herod. i. 53, 75. 84; Justin, i. 7; Cic. *de Div.* ii. 56; Lucan, iii. 272.) The importance of the river is attested by the fact that Asia is frequently divided by it into two parts, *Asia cis* and *Asia trans Halyn*. (Strab. xii. p. 534, xvii. p. 840.) Respecting the present condition of the river, see Hamilton's *Researches*, vol. i. pp. 297, 324, 411, vol. ii. p. 240 [L. S.]

HAMAE, a place in Campania, between Capua and Cumae, where the Capuans were in the habit of assembling annually for a solemn religious festival; an occasion of which they endeavoured to make use during the Second Punic War (B.C. 215) to reduce

Digitized by Google

the Cumaeans under their subjection, but their plans were frustrated and they themselves put to the sword by the Roman consul Sempronius Gracchus. (Liv. xxiii. 35.) Livy, who is the only author that mentions Hamae, tells us that it was 3 miles from Cumae; but the exact site cannot be determined. [E. H. B.]

HAMA'XIA (Ἁμαξία), a small town in the western part of Cilicia Aspera. (Strab. xiv. p. 669.) It had a good roadstead for ships, and excellent cedars for ship-building. (Lucan, viii. 259.) Hamaxia is perhaps the same place as Anaxium (*Stadiasm. Mar. Magni*, § 188), which, however, is placed west of Coracesium, so that it would belong to Pamphylia. (Comp. Leake, *Asia Minor*, p. 197.) [L. S.]

HAMAXITUS (Ἁμαξιτός), a town on the south-western coast of Troas, 50 stadia south of Larissa, and close to the plain of Halesion. It was probably an Aeolian colony, but had ceased to exist as early as the time of Strabo. (Scyl. p. 36; Thucyd. viii. 101; Xenoph. *Hellen.* iii. 1. § 13; Strab. x. p. 473, xiii. pp. 604, 612, 613.) According to Aelian (*Hist. An.* xii. 5), its inhabitants worshipped mice, and for this reason called Apollo, their chief divinity, Sminthеus (from the Aeolian σμίνθα, a mouse). Strabo relates the occasion of this as follows: When the Teucrians fled from Crete, the oracle of Apollo advised them to settle on the spot where their enemies issued from the earth. One night a number of field-mice destroyed all their shields, and, recognising in this occurrence the hint of the oracle, they established themselves there, and called Apollo Sminthеus, representing him with a mouse at his feet. During the Macedonian period, the inhabitants were compelled by Lysimachus to quit their town and remove to the neighbouring Alexandria. (Comp. Steph. B. *s. v.*; Plin. v. 33.) No ruins of this town have yet been discovered (Leake, *Asia Minor*, p. 273); but Prokesch (*Denkwürdigk.* iii. p. 362) states that architectural remains are still seen near Cape Baba, which he is inclined to regard as belonging to Hamaxitus.

Another town of the same name is mentioned by Pliny (v. 29) as situated in Caria, on the north coast of the Cnidian Chersonesus. [L. S.]

HAMAXO'BII (Ἁμαξόβιοι, Ptol. iii. 5. § 19; Iamblich. *de Abstin.* iii. 15; Pomp. Mel. ii. 1. § 2; Plin. vi. 12; Steph. B. *s. v.* Ἄβιοι), a people of Sarmatia, situated to the E. of the Scythian Alauni, who wandered with their waggons along the banks of the *Volga*, and belonged to the Sarmatian stock. (Schafarik, *Slav. Alt.* vol. i. p. 204.) [E. B. J.]

HAMAXOECI (Ἁμάξοικοι, Eustath. ad *Hom. Il.* xiii. 5; Hesiod. *ap. Strab.* vii. p. 302; Herod. iv. 46; Aesch. *Prom.* 709; Strab. ii. p. 87, vii. p. 209, xi. p. 492). This name was applied by the ancients to the Nomadic hordes who roamed over the N. E. of Europe, neither sowing nor planting,—but living on food derived from animals, especially mares' milk, and cheese,—and moved from place to place, carrying their families in waggons covered with wicker and leather, in the same manner as the Tartars of the present day. [E. B. J.]

HAMMANIENTES, a Libyan tribe beyond the Macae, who dwelt 12 days' journey W. of the Greater Syrtis in an oasis of the sandy desert, and made their houses partly of stone, and partly of rock-salt cut from the hills by which they were surrounded. (Plin. v. 5.) Solinus (28) calls them Amantes. Mannert supposes them to be the Atarantes of Herodotus. [P. S.]

HANNIBALIS CASTRA. [Castra Hannibalis.]

HARENATIO. [Arenacum.]

HARMA (Ἅρμα: *Eth.* Ἁρματεύς). 1. An ancient town of Boeotia, mentioned by Homer, which is said to have been so called, either because the chariot of Adrastus broke down here, or because the chariot of Amphiaraus disappeared in the earth at this place. (Didym. and Eustath. *ad Il. l. c.*; Strab. ix. p. 404; Paus. ix. 19. § 4, comp. i. 34. § 2; Steph. B. *s. v.*) Strabo describes it as a deserted village in the territory of Tanagra near Mycalessus; and Pausanias speaks of the ruins of Harma and Mycalessus as situated on the road from Thebes to Chalcis. Aelian (*V. H.* iii. 45) speaks of a lake called Harma, which is probably the one now called *Mavrati* or *Paralimni*, to the east of Hylica. [Boeotia, p. 413, b.] The exact site of Harma is uncertain. It is supposed by Leake to have occupied the important pass on the road from Thebes to Chalcis, leading into the maritime plain. (Leake, *Northern Greece*, vol. ii. p. 251.)

2. A fortress in Attica. [Attica, p. 329, b.]

HARMATE'LIA (τὰ Ἁρματήλια, Diod. xvii. 102), a place probably in the *Panjab*, which Diodorus describes as the last of the cities of the Brachmanes which fell into the hands of Alexander the Great. The people were a very warlike race, and made a gallant stand. They made use of poisoned arrows. See also Strabo (xv. p. 723), who does not, however, mention this place by name, though he alludes to an incident which, according to Diodorus, happened there. The exact position of this place has not been determined; but it was most likely in the territory of the Malli (now *Multán*). [V.]

HARMATOTROPHI, one of several small tribes who are mentioned by Pliny (vi. 16) as living at the foot of the Indian Caucasus between the Mardi and Bactri. [V.]

HARMATHUS (Ἅρμαθοῦς), a town on the north coast of the bay of Adramyttium, on the east of Cape Lectum; it is mentioned only by Thucydides (viii. 101) as opposite to the town of Methymna in Lesbos. It cannot have had any connection with Cape Amathus, which was situated much further south (Strab. xiii. p. 622), and is probably the same as Cape Canae. [Canae.] [L. S.]

HARMOZEIA (Ἁρμόζεια, Arrian. *Ind.* c. 33; Armuzia, Plin. vi. 23. s. 27), the district surrounding Harmuza, the port at which Nearchus's fleet arrived on their return from India, and which was situated in the SE. corner of Carmania. There can be no doubt that the name of the district Harmozeia, of the port Harmuza, and of the promontory Harmozon at the entrance of the harbour, are all derived from the name of the Persian good spirit *Horsand* or Auramazda, which name has been preserved in the present *Ormuz*, the name of an island off the site of the former port. The neighbouring land is now called *Moghistán*. The Anamis or Andanis flowed through Harmozeia into the sea at Harmuza. Its present name is *Ibrahim Rúd*. [V.]

HARMOZICA. [Aragus.]

HARMOZON PROM. (Ἁρμόζου ἄκρον, Ptol. vi. 8. § 5; Strab. xvi. p. 765), a promontory at the entrance of the Persian gulf, on the N. or Carmanian side of it, just at the part where the sea between Arabia and Asia is most narrow. Eratosthenes (*ap.* Strab. *l. c.*) and Ammianus (xxiii. 6) both assert that the coast of Arabia can be plainly seen from this point. The promontory may perhaps be repre-

Digitized by Google

sented by the modern *C. Bombareck*, nearly opposite to *C. Mussendom*. [V.]

HARMU'ZA (Ἁρμουζα πόλις, Ptol. vi. 8. § 5), the capital of the district which Arrian has called Harmozeia. There seems to be some doubt whether there is any present representative of this place along the coast. The only place which now bears the name of Ormus is an island off the mouth of the Anamis, to which it has been conjectured by D'Anville that the inhabitants of the coast must have fled shortly after the time of Timúr. The modern history of this island is well known. It was taken by Albuquerque in 1507, and held with great commercial prosperity by the Portuguese till Shah Abbás, aided by the English, took it from them in 1622. While *Ormus* lasted, the Portuguese had an emporium second to none but Goa. Shah Abbás built on the opposite coast *Bender-Abbassi*, and tried to win for it the commerce which *Ormus* had possessed. In this, however, he signally failed, and both places are now utterly ruined and abandoned. (Vincent, *Voy. of Nearchus*, vol. i. pp. 324—334.) [V.]

HAROSHETH (Ἀρισώθ), mentioned only in *Judges* (iv. 2, 13, 16) as the royal garrison of Jabin king of Canaan. In all these passages it is called Harosheth of the Gentiles, and was obviously situated in the northern part of Palestine, called "Galilee of the nations." (*Is.* ix. 1.) It was probably situated in the tribe of Naphtali, between Kadesh Naphtali, and HAZOR, the capital of Jabin [HAZOR]. As the name signifies *wood* in the Aramæan, the fortress is supposed by some to have been situated in a woody district. The name is regarded as an appellative by the Chaldee paraphrast, whose translation for "Harosheth of the Gentiles" is equivalent to "in fortitudine (in munitione) arcinm gentium." (Rosenmüller in Jud. iv. 2.) [G. W.]

HARPAGEIA (τὰ Ἁρπαγεῖα), a district between Priapus and Cyzicus, about the mouth of the river Granicus in Mysia, whence Ganymede is said to have been carried off. (Strab. xiii. p. 587.) Thucydides (viii. 107) also mentions a town Harpagion, which is otherwise unknown. (Comp. Steph. B. *s. v.* Ἁρπάγια.) [L. S.]

HA'RPASA (Ἅρπασα: *Eth.* Ἁρπασεύς), a town in Caria, on the eastern bank of the river Harpasus, a tributary of the Maeander. (Ptol. v. 2. § 19; Steph. B. *s. v.*; Plin. v. 29; Hierocl. p. 688.) The ruins found opposite to *Nasli*, at a place called *Arpas Kalessi*, undoubtedly belong to Harpasa. (Fellowes, *Discov. in Lyc.* p. 51; Leake, *Asia Minor*, p. 249; Richter, *Wallfahrten*, p. 540.) Pliny mentions a wonderful rock in its neighbourhood, which moved on being pressed with a finger, but did not yield to the pressure of the whole body. [L. S.]

HA'RPASUS (Ἅρπασος: *Harpa*), a river of Caria, flowing from south to north, and emptying itself into the Maeander. (Plin. v. 29; Steph. B. *s. v.* Ἅρπασα; Quint. Smyrn. *Posthom.* x. 144.) In the war against Antiochus the Romans encamped on its banks. (Liv. xxxviii. 13.) [L. S.]

HA'RPASUS (Ἅρπασος: the reading Ἅρπαγος, in Diod. Sic. xiv. 29, is faulty), a river which the Ten Thousand crossed (400 feet broad) from the territory of the Chalybes, who were separated from the Scythini by this river. (Xen. *Anab.* iv. 7. § 17.) This river, which has been identified by several writers with the *Arpa-Chai*, a northern affluent of the Araxes, and forming the E. boundary of *Kars*, is more probably represented by the *Tcharik-Sú* (*Jordk*), as Colonel Chesney (*Exped. Euphrat.* vol. ii. p. 231) and Mr. Grote (*Hist. of Greece*, vol. ix. p. 161) suppose. [E. B. J.]

HARPINA or HARPINNA (Ἅρπινα, Ἅρπιννα: *Eth.* Ἁρπιναῖος), a town of Pisatis (Elis) situated on the right bank of the Alpheius, on the road to Heraea, at the distance of 20 stadia from the hippodrome of Olympia. (Lucian, *de Mort. Peregr.* 35.) Harpina is said to have been founded by Oenomaus, who gave it the name of his mother. The ruins of the town were seen by Pausanias. According to Strabo, Harpina stood upon the stream Parthenius; according to Pausanias, upon one called Harpinates. The ruins of the town stand upon a ridge a little northward of the village of *Miráka*: there are two small rivulets on either side of the ridge, of which the eastern one appears to be the Parthenius, and the western the Harpinates. (Strab. viii. pp. 356, 357*; Paus. vi. 20. § 8; Steph. B. *s. v.*; Leake, *Morea*, vol. ii. p. 211, *Peloponnesiaca*, p. 218.)

HARPIS FL. (Ἅρπις, Ptol. iii. 10. § 14), a river of Sarmatia Europaea, probably the same as the *Kugal'nik* in *Bessarabia*. There was a people called the HARPII (Ἅρπιοι, Ptol. iii. 10. § 13) in the district about this river. [E. B. J.]

HARPLEIA (Ἁρπλεια), a place in Laconia upon the slopes of Mt. Taygetus, but at the entrance of the plain. Leake places it at the village of *Xerokambi*. (Paus. iii. 20. § 7; Leake, *Peloponnesiaca*, p. 361.)

HARUDES, a German tribe in the army of Ariovistus in his war with Caesar, of whom 24,000 had crossed over into Gaul and established themselves there. (Caes. *B. G.* i. 31, 37, 51.) Some writers suppose that these Harudes are the same as the *Charudes* (Χαροῦδες) mentioned by Ptolemy (ii. 11. § 12) among the inhabitants of the Chersonesus Cimbrica. If this be admitted, the army of Ariovistus would have consisted of tribes from the most distant parts of Germany, and its great numbers would cease to be matter of surprise. [SUEVI.] The Harudes are also mentioned in the Monumentum Ancyranum. (Comp. Wersebe, *Die Völker u. Völkerbündnisse*, p. 230.) [L. S.]

HASSI. In Pliny (iv. 17) some texts place after the Bellovaci, a people of Belgica, another people named Hassi, or, as some editions have it, Bassi. Harduin omits the name, and he does not say that any MS. has it. D'Anville mentions a forest named *Hais*, or *Hez*, in a canton of the diocese of *Beauvais*, or the country of the Bellovaci; and he would therefore keep Hassi in Pliny's text. [G. L.]

HASTA. [ASTA.]

HATERA, a station on the road from Dium to Berasa, 12 M. P. from the former (*Peut. Tab.*), and identified with *Katerina*, to the S. of Pydna. (Leake, *Northern Greece*, vol. iii. p. 424.) [E. B. J.]

HAURAN, AURANITIS (Αὐρανῖτις, Ἀβρανῖτις), the name given by Josephus to the country called Iturasa by St. Luke (iii. 1), as is evident from the fact that, neither in his description of the tetrarchy of Philip, nor elsewhere, does Josephus make any mention of Iturasa, but substitutes Auranitis. Thus he states that Augustus granted Auranitis, together with Batanaea and Trachon to Herod the Great, on whose death he assigned them to Philip. (*Ant.* xv. p. 10. § 1, xvii. 13. § 4; *B. J.* ii. 6. § 3.) It describes the great desert tract south of Damascus, still called *the Hauran*, and comprehended by Ptolemy under the names of

* Strabo in this passage confounds Φηραία with Ηραία.

Digitized by Google

Arabia Petraea and Deserta (v. 17. § 19), the Palestina Tertia of the Ecclesiastical annals (Reland, pp. 205. 212). Ptolemy, however, makes Auranitis a district of Babylonia, contiguous to the Euphrates. (Id. 20.)

The district is more correctly described by Strabo, as lying to the south of the two Trachons (*δύο λεγόμενοι Τράχωνες*), consisting of inaccessible mountains, inhabited by a mixed people of Ituraeans and Arabs, a wild and predatory race of villains, a terror to the agricultural inhabitants of the plains. They dwelt in deep caves of such extent, that one could hold 4000 men, in their incursions on the Damascenes, and in their ambuscades against the caravans of merchants from Arabia Felix. But the most formidable band under the noted chief Zenodorus, had been dispersed by the good government of the Romans, and by the security afforded by the garrisons maintained in Syria. (Strabo, xvi. p. 756.) A comparison of this description of Ituraea by the classical geographer, with Josephus's account of Trachonitis and the doings of the robber-chief Zenodorus and his Arabs (*Ant.* xv. 10. § 1, 2), exhibits many striking points of resemblance; and there is an amusing account given by William of Tyre of these very caves between Adraa and Bozra, into whose narrow mouths the thirsty travellers would let down their water-skins, in the hope of finding a supply of water; but drew back the curtailed rope, minus the skins, which had been seized and appropriated by the robbers concealed in the caves. (*Hist.* xv. 10.) The marauding inhabitants of this wild country at the present day keep up the character of their predecessors; and their daring attacks upon the caravans of pilgrims on the annual Haj, are scarcely repressed by a numerous escort of regular troops. The extent of the modern Hauran is thus described by Burckhardt: "The *Haouran* comprises part of Trachonitis and Ituraea, the whole of Auranitis, and the northern districts of Batanaea. . . . The flat country, south of *Jebel Kessouc*, east of *Jebel el Sheikh*, and west of the *Hadj* road, as far as *Kasem*, or *Nowa*, is called *Djedour*. The greater part of Ituraea appears to be comprised within the limits of *Djedour*." (*Travels in Syria.*) The whole district abounds in ruins; and the frequent Greek inscriptions, not only at Bozra, its ancient capital, but in numerous other towns and villages, prove it to have been thickly inhabited in former times, and well garrisoned by Roman soldiers; thereby illustrating and confirming the remark of Strabo above cited, concerning the greater security of the country while under imperial rule. Many of the inscriptions were copied by Burckhardt. (*Syria*, pp. 59—118. 215—234.) The name Hauran (of which Auranitis is only the classical form) is supposed to be derived from the town mentioned by the prophet Ezekiel as in the vicinity of Damascus (xlvii. 16. 18), where the LXX. write Αὐρανίτιδος.

The name Ituraea is supposed to be derived from the Ishmaelite patriarch Jetur, or Itur (1 *Chron.* i. 31); and the Alexandrine version of the LXX. reads Ἰτουραῖοι, in 1 *Chron.* v. 19, a passage which, as Reland remarks, enables us to fix the position of Ituraea to the east of the land of Israel; for the Hagarites, to whom Jetur belonged, were dispossessed by the Reubenites who "dwelt in their tents throughout all the east of the land of Gilead" (v. 10) "unto the entering in of the wilderness from the river Euphrates" (v. 9). (Reland, *Palaestina*, p. 106.) Forster (*Arabia*, vol. i. pp. 309—311) further identifies the modern name *Jedour* with the patriarchal Jetur. [G. W.]

HAVILAH (Εὐιλάτ), the land encompassed by the Pison, the first-named of the four rivers of Eden, abounding in gold of a fine quality, in "bdellium and the onyx stone." (*Genes.* ii. 11, 12.) Its situation is further fixed as the eastern limit of the Ishmaelite Bedouins, as Sheer was their western limit. (*Gen.* xxv. 18.) They seem to have been subsequently dispossessed by the Amalekites, who have the same limits assigned to them in 1 Sam. xv. 7. [AMALEKITAE.] It doubtless derived its name from Havilah the son of Cush (*Gen* x. 7), by whose descendants the district was first peopled, not from the later Joktanite patriarch of the same name (x. 29).

"The land of Havilah mentioned in *Genesis*, and there described as encompassed, or inclosed rather, by the river Pison, has been assigned, by consent of the learned, as the first and chief settlement of the son of Cush, and identified with the province, on the Persian Gulf, now denominated *Hagar* or *Bahrein*; a district anciently watered, as we gather from the concurrent testimonies of Pliny, and the Portuguese traveller Pereira, by a branch of the Euphrates, which, diverging from the course of its other channels, ran southward parallel with the gulf, and fell into it nearly opposite to the *Bahrein* islands. A direct proof, unnoticed by preceding writers, that this region once bore the name of Havilah, is furnished by the fact, that the principal of the *Bahrein* islands retains to this day the original name of that of *Aval*." (Forster, *Geogr. of Arabia*, vol. i. pp. 40, 41.) Mr. Forster then traces this patriarchal name through its various modifications (as Dr. Wells had done before, though not so fully) in the classical geographers, and shows clear examples of it, under its several dialectic changes, from the head of the Persian Gulf to its mouth, both in Ptolemy and Pliny, and in the modern geography of the country; and that the great tribe or people intended under those denominations, formed in the time of those geographers, and continue to compose at the present day, a chief part of the population of the Havilah of Scripture, the modern province of *Hagar* or *Bahrein*. (Ib. pp. 41—54.) He accounts for the modern name of the district of Havilah, by the fact already noted, that the Ishmaelite Arabs had dispossessed the ancient Cushite race, and imposed on the conquered territory the name of their mother Hagar. (Vol. i. pp. 199, 200.) [G. W.]

HAZEZON-TAMAR. [ENGEDI.]

HAZOR (Ἀσώρ), the royal city of the most powerful Canaanitish nation in the north of Palestine at the period of the entrance of the Israelites. It was the capital of king Jabin, and head of a confederacy against Joshua; on which account he made an example of it, exterminating its inhabitants, and destroying it alone with fire. (*Josh.* xi. 1—14.) It had recovered its independence and importance at the commencement of the period of the Judges, about two centuries and a half later, when we find it still the royal residence of the Canaanite king, Jabin, —a name signifying *wise*, which seems to have been the common designation of the sheikhs of Hazor, as *righteous* was of the Jebusite kings. It does not appear that Hazor was again taken on this occasion after the defeat of Sisera by Deborah and Barak. (*Judges*, iv. v.) Nor is it all clear that the two

Digitized by Google

of that name mentioned in the later books of Holy Scripture is identical with the Canaanitish capital, the site of which was recovered by the writer in 1843, still called by the same name, and situated on a hill above Banias, a little to the east of the ruins of the Castle of Banias, commanding the Damascus road. [G. W.]

HEBOSO. [HEBUDES.]

HEBRAEI. [PALESTINA.]

HEBROMAGUS, a place in Southern Gallia, which the Jerusalem Itinerary places on the road from Tolosa (*Toulouse*) to Carcaso (*Carcassonne*), and 14 M.P. short of *Carcassonne*. The Table gives the same distance, or some critics read the same distance in the Table by changing xvii. to xiiii. D'Anville supposes Hebromagus to be a place called *Brum*. Hebromagus is mentioned in the Epistolae of Ausonius to Paullinus (xxii. 35; xxiv. 124); and if there was only one Hebromagus, it is the place mentioned in the Itineraries. [G. L.]

HEBRON (Χεβρών, LXX., Joseph.), a very ancient city of Palestine, situated in a mountainous district, 22 Roman miles south of Jerusalem. (Eusseb. *s. v.* Ἀρμέ.) Its original name was Kirjath-Arba, or the city of Arba, so called from Arba, a chief of the Anakim, who dwelt in this neighbourhood. (*Gen.* xxiii. 2; *Josh.* xiv. 15; *Judg.* i. 10; Joseph. *Ant.* xiv. 15.) It was frequently the residence of Abraham, Isaac, and Jacob, who were buried here in the cave of Macpelah, which Abraham purchased of the sons of Heth. (*Gen.* xxiii. 2, seq.) Upon the conquest of Palestine by the Israelites, Hebron was given by Joshua to Caleb, who expelled the Anakim from the district. (*Josh.* xiv. 13—15, xv. 13, 14; *Judg.* i. 20.) It was afterwards appointed one of the cities of refuge. (*Josh.* xx. 7.) Hebron was the residence of David, as king of Judah, for seven years and a half. (2 *Sam.* ii. 1, v. 5.) It was fortified by Rehoboam (2 *Chron.* xi. 10); and was occupied by the Jews after their return from captivity (*Nehem.* xi. 25). It afterwards fell into the hands of the Idumaeans, from whom it was recovered by Judas Maccabaeus. 1 *Macc.* v. 65; Joseph. *Ant.* xii. 8. § 6, *B. J.* iv. 9. § 7.) It was taken and burnt by the Romans in the great Jewish War. (Joseph. *B. J.* iv. 9. § 9.) The modern town is called *El Khulil*, "the friend" of God, the name given by the Moslems to Abraham. Here are shown the tombs of the patriarchs, of which an account is given by modern travellers. Outside the town are two reservoirs for rain-water, evidently of great antiquity, one of which is probably the "pool in Hebron" mentioned in the history of David. (2 *Sam.* iv. 12.)

HEBRUS (Ἕβρος: *Maritza*), the principal river of Thrace, has its sources near the point where mount Scomius joins mount Rhodope, in the north-eastern corner of Thrace. Its course at first has a south-eastern direction; but below Adrianopolis it takes a south-western turn, and continues to flow in that direction until it reaches the Aegaean near Aenus. (Thucyd. ii. 96; Plin. iv. 18; Aristot. *Meteor.* i. 13.) The tributaries of the Hebrus are so numerous and important, that it becomes navigable even at Philippolis, while near its mouth it becomes really a large river. (Herod. vii. 59.) Near its mouth it divides itself into two branches, the eastern one of which forms lake Stentoris. (Herod. vii. 58; Acropolita, p. 64.) The most important among its tributaries are the Suemus, Arda, Artiscus, Tonatus, and Agrianes. About Adrianople the basin of the Hebrus is very extensive; but south of that city it becomes narrower, the mountains on both sides approaching more closely to the river. During the winter the Hebrus is sometimes frozen over. (Comp. Herod. iv. 90; Polyb. xxxiv. 13; Eurip. *Herc. Fur.* 386; Strab. vii. pp. 322, 329, xiii. p. 590; Ptol. iii. 11. § 2; Arrian, *Anab.* i. 11; Mela, ii. 2; Virg. *Ecl.* x. 65, *Georg.* iv. 463, 524; Val. Flac. ii. 515, iv. 463, viii. 228.) [L. S.]

HEBUDES, the *Hebrides* off Britain, mentioned by Pliny, Solinus, and in the Cosmography ascribed to Aethicus. The notices are as follows: — "Sunt autem xl. Orcades modicis inter se discretae spatiis. Septem Acmodae et xxx. Hebudes." (Plin. iv. 30.) "A Caledoniae promontorio Thylen petentibus, bidui navigatione perfecta, excipiunt Hebrides insulae, quinque numero, quarum incolae nesciunt fruges, piscibus tantum et lacte vivunt. Secundam a continenti stationem Orcades praebent: sed Orcades ab Hebudibus porro sunt septem dierum, totidemque noctium cursu, numero tres. Vacant homine: non habent silvas: tantum junceis herbis inhorrescunt. Ab Orcadibus Thylen usque v. dierum et noctium navigatio est." (Solin. c. 23.) The *Cosmography* merely gives the form Heboso, as applied to an island or archipelago off Britain. The difficulties raised by the text of Solinus apply to the geography of the *Orkneys*, *Shetlands*, and *Faroe* Isles, to some of which he has transferred the name Hebrides. [For this, see ORCADES.] The difficulties in the text of Pliny lie in the difference between the Acmodae and the Hebudes. It is only clear that one word means the islands west, the other, the islands east, of the Minch. Now *either* group will give us seven larger and twenty-three smaller islands, neither having so many as thirty islands of any considerable magnitude, and neither having so few as seven, if the smaller members of the group are included. Without deciding which are the Hebrides, and which the Acmodae, we may say that, on one side, we have *Lewis* (with *Harris*), *North Uist*, *Benbecula*, *South Uist*, *Barra*, &c. — on the other, *Skye*, *Rum*, *Tiree*, *Coll*, *Mull*, *Jura*, *Islay*, &c. [R. G. L.]

HECALE. [ATTICA, p. 330, b.]

HECATO'MPEDUM (Ἑκατόμπεδον, Ptol. iii. 14. § 7), a town in the interior of Chaonia in Epeirus; probably situated in the vale of the *Sukha*, above *Libókhovo*. (Leake, *Travels in Northern Greece*, vol. iv. p. 120.) [E. B. J.]

HECATO'MPYLOS (Ἑκατόμπυλος, Strab. xi. p. 514; Ptol. i. 12. § 5, viii. 21. § 16; Ἑκατόμπυλον βασίλειον, Ptol. vi 5 § 2; Steph. B.), a town of some importance in Parthia, and one of the capitals of the Arsacidan princes. There is, however, great doubt where it was situated, the distances recorded by ancient writers not corresponding accurately with any known ruins. According to Strabo (xi. p. 514), it was 1960 stadia (about 224 miles) from the Pylae Caspiae, and, as we may infer from the passage, in the direction of India, eastward; while Ptolemy places it on the same parallel of latitude (N. 37°) as Rhodes. Again, Pliny makes the same distance to be only 133 Roman (or about 122 English) miles. It has been supposed that *Damgham* corresponds best with this place; but *Damgham* is too near the Pylae Caspiae: on the whole, it is probable that any remains of Hecatompylos ought to be sought in the neighbourhood of a place now called *Jah Jirm*. (Cf. Burne, *Travels*, vol. ii. p. 129; Frazer, *Khorassan*, Append. p. 118; Wilson, *Ariana*, p. 171.) The place itself was

Digitized by Google

ancient date, and is stated to have been a distinguished city when Alexander marched through Parthia (Curtius, vi. 2; cf. Diod. xvii. c. 75), though it is clear that it was not, as Curtius states, founded by the Greeks. Polybius affirms that it derived its name from its position in a locality where many roads met (x. 25). Appian asserts that Hecatompylos, in common with many other cities in Asia, derived its Greek name from Seleucus. (*Syr.* c. 57.) In the second century A. D., when Isidorus of Charax wrote his Itinerary, Hecatompylos had apparently ceased to exist, or perhaps, as Mannert (v. 2. p. 76) has conjectured, had given up its Greek name. Isidore calls Saubo the chief place of Parthia in his day; hence Mannert has suggested, though we think without much reason, that this was the native form of the Greek Hecatompylos. [V.]

HECATOMPYLOS AFRICAE. [CAPSA.]

HECATONNESI (Ἑκατόννησοι: *Musconisi*), a group of islands in the bay of Adramyttium, between Lesbos and the mainland. Their name, apparently from ἑκατόν, a hundred, seems only in a general way to allude to the great number of islands, which is stated by some to have been twenty, and by others forty. (Diod. Sic. xiii. 77; Steph. B. *s. v.*) According to Strabo (xiii. p. 618), however, the name Hecatonnesi signified "the islands of Apollo," from his surname Ἕκατος, "the far-darter." [L. S.]

HEDUI. [AEDUI.]

HEDYLIUM. [BOEOTIA, p. 412, a.]

HEDYPHON (Ἡδύφων, Strab. xvi. p. 744), a river of Susiana, which flowed into the Eulaeus, on which stood a town called Seleucia. It is probably that now called the *Djerrahi*. Pliny (vi. 27. s. 31) speaks of a river which he calls the Hedyphonus, and which is most likely the same as the Hedyphon. [V.]

HELCEBUS (Ἕλκηβος, or Ἥλκηβος). Ptolemy (ii. 9. § 18) mentions Elcebus as one of the two towns of the Tribocci on the Rhine; the other is Brocomagus [BROCOMAGUS], which he places north of Elcebus. The Antonine Itinerary has Helvetum, on the road from Augusta Rauracorum (*Augst*) to Moguntiacum (*Mainz*); and it places Helvetum between *Augst* and Argentoratum (*Strassburg*), and 18 M.P. short of *Strassburg*. The Table places Helellum 18 M.P. from *Strassburg*, and Brocomagus north of Argentoratum, which is consistent with Ptolemy's position of Elcebus and Brocomagus; but Ptolemy has incorrectly placed Argentoratum in the country of the Vangiones instead of the Tribocci. Helcebus, Helvetum, Helellum, seem to be *Ell*, a small place on the right bank of the river *Ill*, opposite to *Brunfeld*. It is said that Roman remains have been found there. [G.L.]

HELELLUM. [HELCEBUS.]

HELENA (Ἑλένη: *Eth.* Ἑλεναῖος, Ἑλενίτης, Ἑλένειος: *Makronisi*), a long narrow island, extending along the eastern coast of Attica from Thoricus to Sunium, and distant from two to four miles from the shore. It was also called MACRIS (Μάκρις), from its length. (Steph. B. *s. v.* Ἑλένη.) Strabo (ix. p. 399) describes it as 60 stadia in length; but its real length is seven geographical miles. It was uninhabited in antiquity, as it is at the present day; and it was probably only used then, as it is now, for the pasture of cattle. Both Strabo and Pausanias derive its name from Helena, the wife of Menelaus: the latter writer supposes that it was so called because Helena landed here after the capture of Troy; but Strabo identifies it with the Homeric Cranaë, to which Paris fled with Helena (*Il.* iii. 445), and supposes that its name was hence changed into Helena. There cannot, however, be any doubt that the Homeric Cranaë was opposite Gythium in Laconia. [CRANAE.] (Strab. ix. p. 399, x. p. 485; Paus. i. 35. § 1, viii. 14. § 12; Steph. B. *s. v.*; Mela, ii. 7; Plin. iv. 12. s. 20; Leake, *Demi of Attica*, p. 66; Bröndsted, *Voyage*, vol. i. p. 77; Ross, *Reisen auf den Griech. Inseln*, vol. ii. p. 8.)

HELENA. [ILLIBERRIS.]

HELGAS. [GERMANICOPOLIS.]

HELIADAE (Ἡλιάδαι), a people said to have succeeded the Telchines as inhabitants of the island of Rhodes, and to have been produced from the earth by the agency of the solar heat, whence their name, from Ἥλιος. (Strab. xiv. p. 654.) They are further said to have been skilled in all the arts, especially in astronomy, to have advanced navigation, and to have divided the year into days and hours. (Diod. Sic. v. 57.) In consequence of the Heliadae, the whole island of Rhodes was sacred to the sun, who favoured it so much that not a day passed in the whole course of a year during which the island was not warmed by his rays. (Plin. ii. 62; comp. RHODUS.) [L. S.]

HELICE (Ἑλίκη: *Eth.* Ἑλικώνιος, Steph. B. *s. v.*; Ἑλικεύς, Strab. viii. p. 385), a town in Achaia, one of the 12 Achaean cities, was situated on the coast between the rivers Selinus and Cerynites, and 40 stadia E. of Aegium. It seems to have been the most ancient of all the cities in Achaia. Its foundation is ascribed to Ion, who is said to have made it his residence, and to have called it after his wife Helice, the daughter of Selinus. It possessed a celebrated temple of Poseidon, who was hence called Heliconius; and here the Ionians were accustomed to hold those periodical meetings which were continued in Asia Minor under the name of Panionia. After the conquest of the country by the Achaeans, the latter likewise made Helice the place of meeting of their League, and it continued to be their capital till the destruction of the city by an earthquake in B. C. 373, two years before the battle of Leuctra. This earthquake happened in the night. The city and a space of 12 stadia below it sank into the earth, and were covered over by the sea. All the inhabitants perished, and not a vestige of Helice remained, except a few fragments projecting from the sea. Its territory was taken possession of by Aegium. The neighbouring city of Bura was destroyed by the same earthquake. The catastrophe was attributed to the vengeance of Poseidon, whose wrath was excited because the inhabitants of Helice had refused to give their statue of Poseidon to the Ionian envoys in Asia, or even to supply them with a model. According to some authorities, the inhabitants of Helice and Bura had even murdered the Ionian deputies. (Hom. *Il.* ii. 575, viii. 203, xx. 404; Herod. i. 145, 148; Paus. vii. 1. § 3, vii. 24. § 5; Strab. viii. pp. 384, seq., 387; Diod. xv. 48; Ov. *Met.* xv. 293; Plin. ii. 94, iv. 6; Steph. B. *s. v.*)

"On the 23rd of August, 1817, the same spot was again the scene of a similar disaster. The earthquake was preceded by a sudden explosion, which was compared to that of a battery of cannon. The shock which immediately succeeded was said to have lasted a minute and a half, during which the sea rose at the mouth of the Selinus, and extended so far as to inundate all the level ground between Vostitza (the ancient Aegium). After its retreat not a trace was left of some magazines which had stood on the shore, and the sand which had covered

Digitized by Google

the beach was all carried away. In *Vostitza* 65 persons lost their lives, and two thirds of the buildings were entirely ruined. Five villages in the plain were destroyed." (Leake, *Morea*, vol. iii. p. 402.)

HELICE or ILIGA (Ἑλίκη), a town in Moesia, in the corner formed by mounts Scomius and Haemus, is identified with the modern *Ikliman* or *Itchiman*. (*Itin. Ant.* 136; Senec. *Herc. Oet.* 1539; *Itin. Hier.* 567.) [L. S.]

HE'LICE, an *E'tang* or sea-lake, mentioned by Avienus (*Or. Marit.* v. 588) at the outlet of the Attagus, which is the Atax (*Aude*), the river of *Narbonne*. D'Anville assumes the Helice to be the *E'tang de Vendres*. The name Helice suggested to Walckenaer that this may show where the Helisyci of Herodotus (vii. 165) came from, who are mentioned with Ligyes, and Sardonii and Cyrnii. Hecataeus, also (Steph. B. *s. v.* Ἑλίσυκοι), mentions the Elisyci or Helisyci (for the aspirate may be doubtful) as a Ligurian tribe. As there is no place for these Helisyci within the limits of Italy, we may with some probability fix them on the Gallic shore of the Mediterranean. Niebuhr's notion that they were Volsci is very absurd. [G. L.]

HE'LICON (Ἑλικών), a mountain in Boeotia lying between lake Copais and the Corinthian gulf, and which may be regarded as a continuation of the range of Parnassus. It is celebrated as the favourite haunt of the Muses, to whom the epithet of Heliconiian is frequently given by both the Greek and Roman poets (*αἱ* Ἑλικώνιαι *παρθένοι*, Pind. i. 7. 57; *αἱ* Ἑλικωνιάδες, Hes. *Theog.* 1; Soph. *Oed. Tyr.* 1008; Heliconiades, Lucret. iii. 1050; Heliconides, Pers. procem. 4). Its poetical celebrity is owing to the fact of its having been the seat of the earliest school of poetry in Greece Proper; for at its foot was situated Ascra, the residence of Hesiod, the most eminent poet of this school.

Helicon is a range of mountains with several summits, of which the loftiest is a round mountain now called *Paleovúni*. Helicon is described by Strabo as equal to Parnassus, both in height and circumference (ix. p. 409); but this is a mistake as far as height is concerned, since the loftiest summit of Helicon is barely 5000 feet high, while that of Parnassus is upwards of 8000 feet. Pausanias says that of all the mountains in Greece Helicon is the most fertile, and produces the greatest number of trees and shrubs, though none of a poisonous character, while several of them are useful in counteracting the bites of venomous serpents. (Paus. ix. 28.) There is, however, a considerable difference between the eastern and western sides of the mountain; for while the eastern slopes abounded in springs, groves, and fertile valleys, the western side was more rugged and less susceptible of cultivation. It was the eastern or Boeotian side of Helicon which was especially sacred to the Muses, and contained many objects connected with their worship, of which Pausanias has left us an account. On Helicon was a sacred grove of the Muses, to which Pausanias ascended from Ascra. On the left of the road, before reaching the grove of the Muses, was the celebrated fountain of Aganippe (Ἀγανίππη), which was believed to inspire those who drank of it, and from which the Muses were called Aganippides. (Paus. ix. 25. § 5; Catull lxi. 26; Virg. *Ecl.* x. 12.)

Placing Ascra at *Pyrgaki*, there is little doubt that Aganippe is the fountain which issues from the left bank of the torrent, flowing midway between *Paleo-panaghia* and *Pyrgaki*. Around this fountain Leake observed numerous squared blocks, and in the neighbouring fields stones and remains of habitations. The position of the Grove of the Muses is fixed at *St. Nicholas* by an inscription which Leake discovered there relating to the Museia, of games of the Muses, which were celebrated there under the presidency of the Thespians. (Paus. ix. 31. § 3.) *St. Nicholas* is a church and small convent beautifully situated in a theatre-shaped hollow at the foot of Mt. *Marandáli*, which is one of the summits of Helicon. In the time of Pausanias the grove of the Muses contained a larger number of statues than any other place in Boeotia; and this writer has given an account of many of them. The statues of the Muses were removed by Constantine from this place to his new capital, where they were destroyed by fire in A.D. 404. (Euseb. *Vit. Const.* iii. 54; Sozom. ii. 5; Zosim. ii. 21, v. 24, quoted by Leake.)

Twenty stadia above the Grove of the Muses was the fountain HIPPOCRENE (Ἱπποκρήνη), which was said to have been produced by the horse Pegasus striking the ground with his feet. (Paus. ix. 31. § 3; Strab. ix. p. 410.) Hippocrene was probably at *Makariótissa*, which is noted for a fine spring of water, although, as Leake remarks, the twenty stadia of Pausanias accord better with the direct distance than with that by the road. The two fountains of Aganippe and Hippocrene supplied the streams called Olmeius and Permessus, which, after uniting their waters, flowed by Haliartus into the lake Copais. (Hes. *Theog.* 5, seq.; see BOEOTIA, p. 413, a.)

Another part of Helicon, also sacred to the Muses, bore the name of Mount LEIBETHRIUM (Λειβήθριον). It is described by Pausanias (ix. 34. § 4) as distant 40 stadia from Coroneia, and is therefore probably the mountain of *Zagará*, which is completely separated from the great heights of Helicon by an elevated valley, in which are two villages named *Zagará*, and above them, on the rugged mountain, a monastery. This is Leake's opinion; but Dodwell and Gell identify it with *Granitza*, which is, however, more probably Laphystium. [BOEOTIA, p. 412, b.] On Mount Leibethrium there were statues of the Muses and of the Leibethrian nymphs, and two fountains called Leibethrias and Petra, resembling the breasts of a woman, and pouring forth water like milk. (Paus. ix. 34. § 4.) There was a grotto of the Leibethrian nymphs. (Strab. ix. p. 410, x. p. 471; Serv. *ad Virg. Ecl.* vii. 21.) (See Leake, *Northern Greece*, vol. ii. pp. 141, 205, 489—500, 526.)

HELICYSI. [HELICE.]

HELIO'POLIS AEGYPTI (Ἡλιούπολις, Steph. B. *s. v.*; Ptol. iv. 5. § 54; Herod. ii. 3, 7, 59; Strab. xvii. p. 805; Diod. i. 84, v. 57; Arrian, *Exp. Alex.* iii. 1; Aelian, *H. A.* vi. 58, xii. 7; Plut. *Solon.* 26, *Is. et Osir.* 33; Diog. Laert. xviii. 8. § 6; Joseph. *Ant. Jud.* xiii. 3, *C. Apion.* i. 26; Cic. *Nat. Deor* iii. 21; Plin. v. 9. § 11; Tac. *Ann.* vi. 28; Mela, iii. 8: *Eth.* Ἡλιουπολίτης: the Semitic names BETH-SCHEMESCH and ON, *Gen.* xli. 45, *Ezech.* xxx. 17., as well as the Arabic *Ainshems* or Fountain of Light, corresponded with the Greek appellation in signifying the City of the Sun). Heliopolis was a city of Lower Egypt, 12 miles from the Egyptian Babylon (*It. Anton.* p. 169), on the verge of the eastern desert, and at the SE. point of the Delta, a little NE. of its apex at Cercasorum, lat. 30° N. It stood on the eastern side of the Pelusiac arm of the Nile, and near the right bank of the Great Canal, which, passing through the Bitter Lakes, connected the river with the Red Sea. In Roman times

Digitized by Google

belonged to the Regio Augustamnica. Its population probably contained a considerable Arabian element. (*Plin.* vi. 34.) Heliopolis, however, the On, Rameses, or Beth-Schemesch of the Hebrew Scriptures,—for it has claims to be regarded as any one of the three,—was long anterior even to the Pharaonic portion of this canal, and was, indeed, one of the most ancient of Egyptian cities. Its obelisks were probably seen by Abraham when he first migrated from Syria to the Delta, 1600 years B. C.; and here the father-in-law of Joseph filled the office of high priest. It may be regarded as the University of the land of Misraim: its priests, from the most remote epochs, were the great depositaries of theological and historical learning; and it was of sufficient political importance to furnish ten deputies, or one-third of the whole number, to the great council which assisted the Pharaohs in the administration of justice. At Heliopolis Moses probably acquired the learning of the Egyptians, and the prophet Jeremiah wrote his Lamentations over the decline of the Hebrew people. From Ichonuphys, who was lecturing there in B. C. 308, and who numbered Eudoxus among his pupils, the Greek mathematician learned the true length of the year and month, upon which he formed his "octaeterid," or period of eight years or ninety-nine months. Solon, Thales, and Plato, were reputed each to have visited its schools,—the halls, indeed, in which the latter studied were pointed out to Strabo: while in the reign of the second Ptolemy, Manethon, the chief priest of Heliopolis, collected from its archives his history of the ancient kings of Egypt. Alexander the Great, on his march from Pelusium to Memphis, halted at this city (Arrian, iii. 1); and, according to Macrobius (*Saturn.* i. 23), Baalbek, or the Syrian City of the Sun, was a priest-colony from its Egyptian namesake.

The Heliopolite nome, of which this city was the capital, contained, after the decline and dispersion of the kingdoms of Israel and Judah, a Hebrew population almost equal in numbers to that of the native Egyptians. (Joseph. *Antiq. Jud.* xiii. 3.) But, even so early as the invasion of Cambyses, B. C. 525, Heliopolis had much declined; and in the time of Strabo, who visited it during the prefecture of Aelius Gallus, B. C. 24, its ruins had nearly vanished.

The sun, as the name of the city proves, was the principal object of worship at Heliopolis; and the legends of the Phoenix, the emblem of the solar year, centred around its temples. It was also the seat of the worship of the bull Mnevis, the rival of Apis in this region of Aegypt. In all respects, indeed, it merited the distinction ascribed to it by Diodorus of Sicily, who calls Heliopolis πόλις ἐπιφανεστάτη.

The ruins of Heliopolis occupy a quadrangular area of nearly 3 miles in extent, and were described by Abd-Allatif, an Arabian physician, who wrote his account of Egypt about the close of the 12th century A. D. He speaks of its surprising colossal figures cut in stone more than 30 cubits high, of which some were standing on pedestals and others were in sitting postures. He saw the two famous obelisks called Pharaoh's Needles, one standing and the other fallen and broken in two by its own enormous weight. The name of Osirtesen I., king of Thebes, of the xiith dynasty, who was lord of both the Upper and Lower country, was inscribed on them. The standing obelisk is still erect, and is even now studied as the earliest known specimen of Egyptian architecture. (Plin. xxxvi. 9.) Zoega (*de Obeliscis*, p. 642) supposes that the obelisk which was transported to Rome and set up in the Campus Martius, by order of Augustus, came also from Heliopolis. (Comp. Ammian, xvii. 4.) The obelisks of Osirtesen were each 60 feet high, and consisted of a quadrangular column or cone, rising out of a square base 10 feet high. The pointed top of the column was once covered with a copper cap, shaped like a funnel, and 3 cubits in length. These structures formed the most conspicuous figures in the centre of converging avenues of smaller obelisks.

The hamlet of *Matarieh*, about 6 miles NE. of Cairo, covers a portion of the ancient site of Heliopolis, and is still distinguished by its solitary obelisk of red granite, and contains—no common feature in Egypt—a spring of sweet and fresh water. Some remains of sphinxes, with fragments of a colossal statue, indicate the ancient approaches to the Temple of the Sun. Heliopolis, from its position on the verge of the desert, must have been contiguous to, and must have overlooked, the pastures of Goshen, where the Children of Israel were allowed to settle by the priest-kings of Memphis; and earlier still, the city, if not indeed Abaris itself, was probably one of the last fortresses held by the Shepherd Kings before their final evacuation of Egypt. [W. B. D.]

HELIO'POLIS SYRIAE (Ἡλιούπολις Συρίας, Strab. xvi. p. 753, Ptol. v. 15. § 22; Steph. B. s. v.; Malala, *Chronic.* xi. p. 119; *Chron. Paschale*, i. p. 513; Solis Oppidum, Plin. v. 18), the modern *Baalbec*, was a city of Coele-Syria, situated about lat. 34° 1′ 30″ N. and long. 36° 11′ E. (Ritter, *Compar. Geogr. of Western Asia*, vol. i. p. 7[illegible]). Baalbec, which in the Syrian language means City of the Sun, was probably the original appellation of this celebrated place. Its Hellenic equivalent—Heliopolis—was imposed by the Seleucid sovereigns of Syria, and continued by the Romans. After the conquest of Syria by the Arabs in the seventh century A. D. the city regained its Semitic, or at least its Aramean name. (See Ammian. Marcell. xiv. 8.) Heliopolis was seated upon a gentle elevation at the NE. extremity of the plain of *Bekah* or *Bekaa*, which stretches from the western slope of Anti-Libanus nearly to the shores of the Mediterranean. Three rivers—the Litanè, the Barbourî, and the Asè (Orontes?)—flow through this plain, which in the spring season is also watered by numerous rills formed by the melting of the snows of Anti-Libanus. Heliopolis itself is supplied with water from a fountain close to the NE. angle of its walls,—*Kasr-el-Ain*, or the Spring Head. The whole region of *Bekaa* was in ancient times one of singular fertility, and even now, under Mohammedan oppression, is remarkable for the number and beauty of its orchards.

At what epoch or by whom Heliopolis was founded is unknown. According to Macrobius (*Saturn.* i. 23), it was a priest-colony from Egypt, or rather from Assyria. The sun, the Osiris of the Egyptians, was in all ages the principal object of worship here. The Greeks, however, indifferently attributed the temple to Zeus and Apollo. As a sacerdotal city Heliopolis may have found room for a pantheon of deities. Atergaté or Astarté, the Syrian Aphrodite, had certainly a temple there.

The city, however, was probably indebted for its greatness to the advantages it afforded as an emporium of the trade between Tyre, Palmyra, and Western India. It was 18½ geographical miles from Palmyra, and 11½ from Tyre. (Ritter, *l. c.*) It was made a Roman colonia by Julius Caesar, and veterans from the 5th and 8th Legions were sent

Digitized by Google

ished there by Augustus, on the coins of whose reign it is entitled "COL. JULIA AUGUSTA FELIX HELIOPOLIS." In the second century A. D. its oracle was in such repute that it was consulted by the emperor Trajan previous to his second campaign with Parthia. The emperor at first tested the science of the oracle by sending a blank sheet of paper inclosed in a sealed envelope (*diploma*); and on receiving a similar blank reply, he conceived a high opinion of the prescience of the god, and again consulted him in earnest. The second time the response was symbolically conveyed by the dead twigs of an ancient vine wrapped in a cloth. The interpretation was found in the decease of Trajan, and in the transmission of his bones or remains to Rome in a coffin. From John Malala (*Chronicon, l. c.*) we learn that Antoninus Pius built, or more probably repaired and enlarged, the great temple of Zeus, which became a wonder of the world then, and of many generations of travellers afterwards (e. g. Maundrell, Pococke, Volney, Duke of Ragusa, &c.). From Septimius Severus Heliopolis received the *Jus Italicum* (Ulpian, de *Censibus*, 9), and its temple appears for the first time upon the reverse of the coins of that reign (Akerman, *Rom. Coins*, vol. i. p. 339). The moneyers of Julia Domna and Caracalla inscribe the legend Heliopolis upon their coins, and vows in honour of that emperor and his mother are still partially legible on the pedestals of the portico of the great temple. Its name occurs also on the money of Philip the Arabian, and of his wife Otacilia. The great temple contained, according to Macrobius, a golden statue of Apollo or Zeus, represented as a beardless youth, in the garb of a charioteer, holding in his right hand a scourge, and in his left thunderbolts and ears of corn. On certain annual festivals this statue was borne on the shoulders of the principal citizens of Heliopolis, who prepared themselves for such solemnities by a species of Nazarene discipline, by shaving the head, and by vows of abstinence and chastity. Macrobius compares these ceremonies with the rites practised in the worship of Diva Fortuna at Antium. At Heliopolis also were reverenced the Baetylia, or black conical stones sacred to the sun, one of which was brought to Rome by the emperor Elagabalus, and placed in a temple erected upon the Palatine Mount. (Comp. Damascius, *ap. Phot. Biblioth.* p. 342, B., ed. Bekker; and Gibbon, vol. i. ch. 6.)

Heliopolis is mentioned by the church historians Sozomen (*Hist. Eccles.* v. 10) and Theodoret (*Hist. Eccles.* iii. 7, iv. 22), but little is known of its fortunes under the Byzantine emperors, beyond the names of some Heliopolitan martyrs and bishops. Abulpharagius indeed (*Hist. Compend. Dynast.* c. 75) says that Constantine I. erected a church at Heliopolis, and abolished a custom which had obtained there of plurality of wives. According to the Chronicon Paschale (cclxxxix. p. 303, ed. Bonn), the emperor Theodosius converted the Temple of the Sun into a Christian church, at the same time that he proscribed Paganism, and destroyed the inferior chapels and shrines of the city. Under the Caliphs of the Ommiad House, *Baalbec* gradually declined, although its natural and commercial advantages long retained their influence. (D'Herbelot, *Bibliothèque Orient. s. v. Baalbec.*) Whatever may have been its origin, or the circumstances which favoured its growth, there is no doubt that Heliopolis was for many centuries the most conspicuous city in the region of Libanus, and second to Damascus and Antioch alone in the whole kingdom or province of Syria, whether under Greek or Roman sovereigns.

The walls of Heliopolis, so far as they have been traced, occupy a space of somewhat less than four miles in compass. But this circuit will hardly afford an accurate measure of the population or greatness Heliopolis. For it is probable that the greater portion of it was occupied by public edifices and gardens alone, and that the private dwellings of the city were either extemporary, or made of very light and perishable materials. Such at least was the case with many of the great Eastern emporia. At certain seasons of the year, when the caravans passed through on their route to the East, or on their return, the cities resembled a great fair, and were filled with streets and squares of booths, which were taken down as soon as the caravans moved onward. The religious structures alone were permanent, and around them were grouped the Fora, the Basilicae, and the corridors, in which, under the sultry sun of Syria, the business of the fair was carried on. The population of Heliopolis, therefore, may have varied much at different seasons of the year. In the autumn it would be filled with merchants making up their cargoes for the Eastern markets: in the spring it would again overflow with purchasers of Indian wares: in the winter and summer seasons this city was probably little more than a colony of priests with their numerous assistants in the temple-worship.

The ruins of Heliopolis favour this supposition. They consist of the great Temple; of a smaller temple, or perhaps a Basilica; and of a circular temple of singular form and style. On the highest elevation within the walls, and in the SW. portion of the city, stood a column which may possibly have served for a clepsydra or water-dial.

The great Temple consisted, so far as we can ascertain, of the Propylaea or portico: of an Hexagonal court or Forum; of an inner quadrangular court; and finally of the Shrine of the Sun itself. The courts were probably the exchange of Heliopolis: the Propylaea was its custom-house, and so to speak its wharf, where the caravans received their ladings.

No ruins of antiquity have attracted more attention than those of Heliopolis, or been more frequently or accurately measured and described. They were visited by Thevet in 1550; by Pococke in 1739–40; by Maundrell in 1745; by Wood and Dawkins in 1751; by Volney in 1785; and by many subsequent travellers, including the Duke of Ragusa, in 1834. That more recently they have attracted less notice is owing to the more important discoveries of much higher antiquity on the banks of the Nile and the Tigris. Heliopolis, indeed, so far as it has been known to modern travellers, is a Roman city, of the second century A. D. The Corinthian order of architecture — the favourite order with the Romans — prevails, with few exceptions, in its edifices. A Doric column, the supposed clepeydra, is, indeed, mentioned by Wood and Dawkins; and the Ionic style is found in the interior of the circular temple. For the particular descriptions, measurement, and plans of the structures of Heliopolis, we must refer to the works already cited, as without diagrams they would be unintelligible. The walls of Heliopolis, however, require and deserve a short notice.

As they at present exist they cannot have been the original walls of the city; and would seem to have been constructed in haste under the pressure of some danger, and, like the long-walls betwee Athens and its havens, to have been built of

Digitized by Google

first materials that came to hand. They are from ten to twelve feet in height, with large square towers at certain intervals. The gate on the north side alone exhibits any beauty or magnificence, or indeed any remote antiquity. The other entrances to the city are as rude as the general texture of the walls. The latter are, indeed, a rough congeries of shapeless stones, mingled with broken columns, capitals, and reversed Greek inscriptions. One feature in Heliopolitan masonry is remarkable — the enormous bulk of some of the stones employed in the construction of the temples. Twenty of these stones have especially attracted the wonder of travellers. (See Pococke, Wood and Dawkins, &c.) They are from 24 to 37 feet in length and 9 feet thick, and these form the *second* layer of the basement of the great Temple. At the NW. angle of this building, and about 20 feet from the ground, there are three stones which alone occupy 182 feet 9 inches in length, and these are about 12 feet thick: two are 60 feet, and a third 62 feet 9 inches, in length. The Arabs, with some pretext for their belief, point to them as the work of the Jin.

The materials from which the structures of Heliopolis were built were obtained from the hills close at hand. They consist principally of white granite. The more ornamental portions of the buildings were carved out of a coarse white marble obtained from more distant quarries westward of the city. The buildings of Heliopolis have suffered greatly from violence. They have served as a stone-quarry to the Turks; and as the columns of the temples were cramped together with iron, the Pashas of Damascus have overthrown many of these pillars merely for the sake of the metallic axles contained in them. The progress of this devastation may in some measure be traced in the accounts of the travellers who at different periods have visited Heliopolis. Thus, in 1550, Thevet (*Cosmographie Universelle*, liv. 6. ch 14) saw 27 columns in the great Temple. Pococke, Wood, &c. mention only nine; and, in 1785, Volney says that only six were standing. The Turks have also contributed to the work of ruin by converting the temples of Heliopolis into Mohammedan buildings. In 1745, they had turned the Propylaea into a fortress called, according to Maundrell, "The Castle;" and on the road to Damascus there is a Mohammedan sepulchre of octagonal form, supported by granite columns, brought apparently from the great Temple. The circular temple, mentioned above, is now a Greek church called *St. Barbe*.

Volney (*Voyage en Syrie*, vol. ii. p. 215) describes the fine groves of walnut trees which screen the approaches to Heliopolis from the west. But although the soil of the plain of *Bekah* would undoubtedly well repay cultivation, a little cotton and maize, with a few leguminous plants, are all its produce under its Mohammedan governors. The population also has rapidly declined within a century. In 1751 the number of inhabitants amounted to about 5000; in 1785 Volney estimates them at about 1200; and in 1834 they had been still further reduced. An earthquake in 1759, an oppressive government, the absence of all trade and manufactures, and frequent wars between the Turks and the mountain tribes of the region of Libanus, have each in turn contributed to the decay of the City of the Sun. (Volney, *Voyage en Syrie et Egypte*, tom. ii. pp. 215—230; Maundrell, *Journey from Aleppo to Jerusalem*, pp. 134, 139; Pococke, *Description of the East*, vol. ii. pp. 106—113.) [W. B. D.]

HELISSON (Ἑλισσών, Paus.; Ἑλισσοῦς, Diod.), a town of Arcadia in the district Maenalia, situated on Mt. Maenalus near the territory of Mantinea. The town was taken by the Lacedaemonians in one of their wars with the Arcadians, B. C. 352; but most of its inhabitants had been previously removed to Megalopolis upon the foundation of the latter city in 371. Near it rose the river Helisson, which flowed through Maenalia into the Alpheius. The site of Helisson is doubtful. Leake places it at the village *Alonistena*, from which the river takes its modern name, and near which it rises; but as there are no ancient remains at this village, Ross conjectures that its site is represented by the *Palaeokastro* near the village *Pinna*, lower down the mountain. (Paus. viii. 3. § 3, 27. §§ 3. 7, 30. § 1; Diod. xv. 39; Leake, *Morea*, vol. ii. p. 54; Ross, *Reisen im Peloponnes*, vol. i. p. 117.) The Elisphasii mentioned by Polybius (xi. 11. § 6) are conjectured by some modern writers to be a corrupt form of Helissontii. For details, see MANTINEIA.

HELISSON. 1. A river in Arcadia, and a tributary of the Alpheius. [See above.]

2. A river near Sicyon. [SICYON.]

HELIUM OSTIUM. [MOSA.]

HELLAS, HELLENES. [GRAECIA.]

HELLENOPOLIS (Ἑλληνόπολις), a town on the coast of the Propontis, on the south side of the Sinus Atacenus, and near the little river Draco. Its original name, which it bore until the time of the emperor Constantine, was Drepanum or Drepane (Δρέπανον, Δρεπάνη; Steph. B. *s. v.* Δρεπάνη; Etym. M. *s. v.*; Amm. Marc. xxvi. 8), and it was probably a place of little note; but, as it was the birthplace of Helena, the mother of Constantine, he changed its name into Hellenopolis, and enlarged the place by inducing many people of the neighbourhood to settle in it. (Hierocl. p. 691; Niceph. Call. vii. 49; Socrat. *Hist. Eccles.* i. 4, 18; Philostorg. *Hist. Eccles.* ii. 13.) Afterwards the emperor Justinian also did much to increase the prosperity of the town (Procop. *de Aed.* v. 2); but it became, nevertheless, so reduced that it was called in mockery ἐλεεινοῦ πόλις (Glyc. *Ann.* p. 327). In its vicinity there existed mineral springs, in consequence of which Constantine often resided there during the latter years of his reign. (Sozom. *Hist. Eccles.* ii. 34; Euseb. *Vit. Const.* iv. 61.) The modern place called *Hersek* probably occupies the same site as the ancient Hellenopolis, and the ancient mineral springs seem to be those of *Jalakabad*. (Leake, *Asia Minor*, pp. 9, foll.) [L. S.]

HELLESPONTUS (ὁ Ἑλλήσποντος, Hom. *Il.* ii. 845, *Odyss.* xxiv. 82; ὁ Ἕλλης πόντος, -ῆδος, -πορθμός, Aesch. *Pers.* 722; Hellespontus, Plaut. Helles, Hellespontum Pelagus, Fretum Hellespoticum: *Eth.* Ἑλλησποντίτης, Ἑλλησποντιάς, Ἑλλησποντίς, Steph. B.: *The Dardanelles; Gulf of Gallipoli; Stambul Denghiz*), the strait which divides Europe from Asia and unites the Propontis with the Aegaean sea.

The Greeks explained the origin of the name by the well-known legend of Phryxus and Helle, and to the later poets (Ovid, *Her.* xviii. 117, 137; Prop. i. 20. 19; Lucan. v. 56; Avien. 692) frequent allusion is made to this tradition.

The "broad Hellespont" of the Homeric poems (*Il.* vii. 86) — for the interpretation of Mr. Ward and Dr. Clarke (*Trav.* vol. iii. p. 91) of πλατὺς Ἑλλήσποντος by "salt Hellespont" is too unpoetical to be adopted — was probably conceived to

Digitized by Google

ɔe a wide river flowing through thickly wooded anks iuto the sea. (Comp. Herod. vii. 35; Walole, *Turkey and Greece*, vol. i. p. 101; Schlichorst, *Geogr. Homer.* p. 127.)

Herodotus (iv. 85), Strabo (xiii. p. 591), and Pliny (iv. 12, vi. 1) give 7 stadia as the breadth of he Hellespont in its narrowest part. Tournefort vol. ii. lett. iv.) and Hobhouse (*Albania*, vol. ii. p. 305) allow about a mile. Some modern French admeasurements give the distance as much greater. The Duc de Raguse (*Voyage en Turquie*, vol. ii. p. 164) nearly coincides with Herodotus.

The bridge, or rather two separate bridges, which Xerxes threw across the Hellespont, stretched from he neighbourhood of Abydos, on the Asiatic coast, o the coast between Sestus and Madytus, on the European side; and consisted of 360 vessels in the ridge higher up the stream, and 314 in the lower ne. If the breadth be estimated at a mile or 5280 eet, 360 vessels, at an average of 14½ feet each, ould exactly fill up the space. (Grote, *Hist of Greece*, vol. v. p. 26; comp. Rennell, *Geog. of Herod.* vol. i. p. 158; Kruse, *Uber die Schiffbrücken der Perser*, Breslau, 1820; Choiseul-Gouffier, *Voyage Pittoresque*, vol. ii. p. 449; Bähr, *ad Herod.* ii. 36.) The length of the strait was estimated by Herodotus (iv. 85) at 400 stadia. This admeasurement of course depends upon the point assigned by he ancients to the extremity of the Hellespont, a oint which is discussed by Hobhouse (*Albania*, vol. i. p. 791). In the later years of the Peloponnesian War the Hellespont was the scene of the memorable attles of CYNOSSEMA and ARGOSPOTAMI.

In B. C. 334 the Hellespont was crossed by Alexander, with an army of about 35,000 men. (Arrian, *Anab.* i. 11; Diod. Sic. xvii. 1.)

The Hellespont issues from the Propontis near *Gallipoli* [CALLIPOLIS], the road of which is the nchorage for the Ottoman fleet. A little lower, on he Asiatic side, is *Lampsaki* [LAMPSACUS], close o which the current sweeps as before, nearly SW. o the bay of Sestos, a distance of about 20 miles, ith an ordinary width of from 2½ to 3 miles. At ESTOS the stream becomes narrower, and takes a SE. direction as it passes ABYDOS, and proceeds to he town of *Charnák Kal'eh-Si;* from the last point flows SW. for 3 miles to *Point Berber*, and from hence onward in the same direction, but rather increasing in width, for a distance of 9¾ miles to the Egæan sea.

About 1½ miles below the W. point of the bay of ADYTUS are the famous castles of the Dardanelles, hich give their name to the straits; or the old astles of *Anatóli* and *Rúm-ili: Tchannak-Kal'eh-si*, on the Asiatic side, and *Kilidu l-Bahr*, on the uropean. (Chesney, *Exped. Euphrat.* vol. i. p. 18.) [E. B. J.]

HELLI, HELLO'PIA. [DODONA; GRAECIA, p. 1011 a.]

HELMA'NTICA. [SALMANTICA.]

COIN OF HELMANTICA.

HELO'RUM, HELO'RUS, or ELO'RUS (Ἕλωρος or Ἕλωρος, Ptol., Steph. B.; Ἕλωρον, Scyl.: *Eth.* Ἑλωρῖνος, Helorinus), a city of Sicily, situated near the E. coast, about 25 miles S. of Syracuse, and on the banks of the river of the same name. (Steph. B. *s. v.*; Vib. Seq. p. 11.) We have no account of its origin, but it was probably a colony of Syracuse, of which it appears to have continued always a dependency. The name is first found in Scylax (§ 13. p. 168); for, though Thucydides repeatedly mentions "the road leading to Helorus" from Syracuse (τὴν Ἑλωρίνην ὁδόν, vi. 66, 70, vii. 80), which was that followed by the Athenians in their disastrous retreat, he never speaks of the town itself. It was one of the cities which remained under the government of Hieron II. by the treaty concluded with him by the Romans, in B. C. 263. (Diod. xxiii. Exc. H. p. 50, where the name is corruptly written Αἰλώρων): and, having during the Second Punic War declared in favour of the Carthaginians, was recovered by Marcellus in B. C. 214 (Liv. xxiv. 35). Under the Romans it appears to have been dependent on Syracuse, and had perhaps no separate municipal existence, though in a passage of Cicero (*Verr.* iii. 48) it appears to be noticed as a "civitas." Its name is again mentioned by the orator (*Ib.* v. 34) as a maritime town where the squadron fitted out by Verres was attacked by pirates: but it does not occur in Pliny's list of the towns of Sicily; though he elsewhere (xxxii. 2), mentions it as a "castellum" on the river of the same name: and Ptolemy (iii. 4. § 15) speaks of a *city* of Helorus. Its ruins were still visible in the days of Fazello; a little to the N. of the river Helorus, and about a mile from the sea-coast. The most conspicuous of them were the remains of a theatre, called by the country people *Coliseo:* but great part of the walls and other buildings could be traced. The extent of them was, however, inconsiderable. These are now said to have disappeared, but there still remains between this site and the sea a curious column or monument, built of large stones, rising on a square pedestal. This is commonly regarded as a kind of trophy, erected by the Syracusans to commemorate their victory over the Athenians. But there is no foundation for this belief: had it been so designed, it would certainly have been erected on the banks of the river Asinarus, which the Athenians never succeeded in crossing. (Fazell. iv. 2. p. 215; Cluver. *Sicil.* p. 186; Smyth, *Sicily*, p. 179; Hoare, *Classical Tour*, vol ii. p. 136.) [E.H.B.]

HELO'RUS or ELO'RUS (Ἕλωρος or Ἕλωρος), a river in the SE. of Sicily, the most considerable which occurs between Syracuse and Cape Pachynum. It is now called the *Abisso*, but in the upper part of its course is known as the *Tellaro* or *Telloro*, evidently a corruption of Helorus. It rises in the hills near *Palazzolo* (Acrae), and flows at first to the S., then turns eastward, and enters the sea about 25 miles S. of Syracuse. Near its mouth stood the town of the same name. [HELORUM.] In the upper part of its course it is a mountain stream, flowing over a rugged and rocky bed, whence Silius Italicus calls it "undae clamosus Helorus" (xiv. 269); but near its mouth it becomes almost perfectly stagnant, and liable to frequent inundations. Hence Virgil justly speaks of "praepingue solum stagnantis Helori" (*Aen.* iii. 698). Ovid praises the beauty of the valley through which it flows, which he terms "Heloria Tempe" (*Fast* iv. 476). Several ancient

Digitized by Google

authors mention that the stagnant pools at the mouth of the river abounded in fish, which were said to be so tame that they would eat out of the hand, in the same manner as was afterwards not uncommon in the fishponds of the Romans. (Apollodor. *ap. Steph. Byz.* v. Ἔλωρος; Athenaeus, viii. p. 331; Plin. xxxii. 2. s. 7.)

It was on the banks of the Helorus, at a spot called Ἀρέας πόρος, the precise locality of which cannot be determined, that the Syracusans were defeated by Hippocrates, tyrant of Gela, in a great battle. (Herod. vii. 154; Pind. *Nem.* ix. 95; and Schol. *ad loc.*) [E. H. B.]

HELOS (τὸ Ἕλος), the name of several towns in Greece, so called from their vicinity to marshes.

1. A town of Laconia, situated east of the mouth of the Eurotas, close to the sea, in a plain which, though marshy near the coast, is described by Polybius as the most fertile part of Laconia. (Polyb. v. 19.) In the earliest times it appears to have been the chief town on the coast, as Amyclae was in the interior; for these two places are mentioned together by Homer (*Il.* ii. 584, *Hymn. in Apoll.* 410). Helos is said to have been founded by Helcius, the youngest son of Perseus. On its conquest by the Dorians its inhabitants were reduced to slavery; and, according to a common opinion in antiquity, their name became the general designation of the Spartan bondsmen, but the name of these slaves (εἵλωτες) probably signified captives, and was derived from the root of ἑλεῖν. (Paus. iii. 20. § 6: the account differs a little in Strab. viii. p. 365, and Athen. vi. p. 265, c.; but on the etymology of the word Helots, see *Dict of Ant.* p. 591.) In the time of Strabo Helos was only a village; and when it was visited by Pausanias, it was in ruins. (Strab. viii. p. 363; Paus. iii. 22. § 3: Helos is also mentioned by Thuc. iv. 54; Xen. *Hell.* vi. 5. § 32; Steph. B. *s. v.*) Leake conjectures that Helos may have stood at *Priniko*, since this place is distant from *Trinisa*, the ancient Trinasus, about 80 stadia, which, according to Pausanias, was the distance between these two places; but we learn from the French Commission that *Priniko* contains only ruins of the middle ages, and that there are some Hellenic remains a little more to the east near *Bizani*, which is therefore probably the site of Helos. The name of Helos is still given to the plain of the lower Eurotas. (Leake, *Morea*, vol. i. p. 230; Boblaye, *Recherches*, p. 94; Curtius, *Peloponnesos*, vol. ii. p. 289.)

2. A town belonging to Nestor, mentioned by Homer, was placed by some ancient critics on the Alpheius, and by others on the Alorian marsh, where was a sanctuary dedicated by the Arcadians to Artemis; but its position is quite uncertain. (Hom. *Il.* ii. 594; Strab. viii. p. 350; Plin. iv. 5. s. 7.)

3. Near Megalopolis. [MEGALOPOLIS.]

HELVECO'NAE (Αἰλουαίωνες, Ptol. ii. 11. § 17), a tribe of the north of Germany, on the west of the Vistula, between the Rugii and Burgundiones. According to Tacitus (*Germ.* 43), the Helveconae were one of the bravest tribes of the Lygii. [L. S.]

HELVETII (Ἑλουήττιοι, Ἑλβήττιοι), a Celtic people who in Caesar's time occupied the country between the Jura on the west, the Rhone and Leman lake on the south, and the Rhine on the east and north. Caesar (*B. G.* i. 2) gives the dimensions of their country, as they were reported to him, and probably the dimensions are not far wrong if we take the measurements in the right directions. [GALLIA, p. 951.] Cluverius and others would correct these numbers, which shows a want of judgment. Caesar says nothing, for he knew nothing, of the southern limit of the Helvetii east of the Leman lake. There is no evidence in his work that the Helvetii in his time occupied any of the mountainous part of Switzerland. They seem to have occupied hilly tracts and plains, but not mountains or high mountain valleys. Strabo (p. 292) makes the Rhaeti occupy on a small part of the *lake of Constanz*, and the Helvetii and the Vindelici on the larger part of it. The words are ambiguous, and may apply both to the south or Swiss side of the lake, and to the north or German side; and so some people interpret them. Strabo observes that the Helvetii and Vindelici inhabit mountain plains (ὀροπεδία). By which he means elevated levels and hilly tracts, but not mountains. The part which Strabo (p. 208) calls the Helvetian plains is the country north of the Leman lake. The Rhaeti and the Nerici, he says, dwell right up to the mountain passes, and over them into Italy. There was a tradition that the Helvetii were once in Germany. Tacitus (*Germ.* c. 28) thinks that this is probable; and he fixes the German residence of the Helvetii between the Hercynia Silva, the Rhine, and the Moenus (*Main*); he supposed the Boii to have occupied the parts beyond further north and east. But it seems that the Germans had driven the Helvetii back, for in Caesar's time the Rhine was the frontier, and the two nations were continually fighting on it. If we assume that Caesar's Helvetii extended to the south side of the lake *of Constanz*, from the eastern extremity of the Leman lake, we may suppose their country not to have comprised any part south of the lakes of Thun and Luzern. This will leave room enough for them.

The Jura, which Ptolemy (ii. 9. § 5) calls Jurassus (Ἰουρασσός), and Strabo names Ἴουρασιος and Ἰουρα, separated the Helvetii from the Sequani. The Jura of Caesar extends from the north bank of the Rhone in a NE. direction, leaving on the east the basins of the Leman lake and the *lakes of Neufchâtel* and *Bienne*. That part of the Jura which is bounded on the east by the basins of the *lakes of Neufchâtel* and *Bienne* has for its western boundary the valley of the Doubs (*Doubs*). From the neighbourhood of Salins (*Soleure*) a branch of the Jura runs into the angle between the junction of the Rhine and the *Aar*. The Jura is a mass of limestone, consisting of parallel ranges, which form longitudinal lines. The *Dôle*, north of Geneva, is about 5500 feet, and the *Reculet*, which lies further south, is still higher. Caesar (*B. G.* i. 6) knew of only one pass from the country of the Helvetii into the country of the Sequani, which pass is SW. of Geneva, where the Jura abuts on the Rhone, leaving only a narrow road between the mountains and the river. At present there are several passes over the Jura: one over the *Dôle*, leads from *Nyon* on the *lake of Geneva* to *Besançon* on the *Doubs*; the *Orbe-Ballaigues* leads from *Yverdun* to *Pontarlier* in France; the pass called *La Cluzette*; the pass of the *Pierre Pertuis*; and the pass of the *Immenthal*. Ptolemy's description of the position of the Helvetii is not exact. After fixing the position of the Lingones, he says: "and after the mountain which lies next to them, which is called Jurassus, are the Helvetii about the river Rhine." The Lingones bordered on the Sequani.

The country of the Helvetii was divided into four districts or *Pays* (pagi), and they had twelve towns and 400 villages. (Caes. *B. G.* i. 12. 27.) Caesar has mentioned the names of two pagi, the Tigurini

Digitized by Google

and the Verbigenus. The critics are not quite agreed whether we should write Urbigenus or Verbigenus in Caesar's text; but there is the better MS. authority for Verbigenus. (Schneid. ed. Caesar, *Bell. Gall.*) Those who write Urbigenus have identified "Urb" with the town of *Orbe*, on the river *Orbe*, SW. of *Yverdun*, a place on the site of Urba. [URBA.] But an altar was found at Salodurum (*Solothurn*), by Schoepflin, with the inscription GENIO VERBIG.; and this discovery is supposed to determine *Solothurn* to be in the pagus Verbigenus. The letters VE on this inscription are said to be joined together; but some authorities still say that the true reading is VERBIG. The inscription, however, belongs to the 3rd century of our aera, and it is no authority for the orthography of Caesar's time. Whether the name is Urbigenus or Verbigenus, we may assume that the inscription belongs to the place where it was found, and therefore we may conclude that Salodurum was a town of the Verbigenus pagus. We may also suppose that the pagus extended northward to the Rhine; and as far as *Baden* on the *Limmat*, a branch of the *Aar*, if it be true that there is an inscription with the words Aquae Vergenae; for these Aquae are probably the same as the Aquae Helveticae, which are proved by inscriptions to be the baths of *Baden* on the *Limmat*. One of these Baden inscriptions, in honour of M. Aurelius, contains the words REIP. AQ. *Baden* is supposed to be the place which Tacitus (*Hist.* i. 58) alludes to without mentioning the name.

An inscription has been found near *Avenches* [AVENTICUM], with the words GENIO PAGI TIGOR.; and, so far as this evidence goes, we must place the Tigurini south of the Verbigeni. Their *Pagus*, then, was bounded by the Jura on the west as far south as *Fort l'Ecluse*, and on the south by the Rhone from *Fort l'Ecluse* to the Lake, and then by the Lake. The northern boundary would be about the *lake of Morat*. We cannot determine the eastern boundary of the Tigurini. There is no authority for connecting the name of *Zürich* with the Tigurinus pagus, for an inscription which has been found there shows that the name was different: the inscription is STA, that is Statio, TVRICEN; and in the middle age documents *Zürich* is named Turicum and Turegum. D'Anville (*Notice*, &c.) states his authority for affirming that an inscription "Genio pagi Tigur," with some others, was found near *Zürich*. If this were so, it would weaken the testimony of the *Avenches* inscription, for we cannot suppose that this pagus comprehended both *Avenches* and *Zürich*. But Walckenaer solves the difficulty by affirming that such an inscription has not been found near *Zürich*. The opinion of B. Rhenanus, not quite rejected by D'Anville, that the name of the canton *Uri* may represent the name Tigurini, need only be mentioned to be rejected.

The names of the two other Helvetian Pagi are unknown; but it is a fair conjecture that one of them may have been the pagus of the Tugeni. Strabo (p. 293) mentions the Tugeni with the Tigurini, when he is giving Posidonius' opinion of the Cimbri. Posidonius says that "the Boii once inhabited the Hercynian forest; and that the Cimbri, who invaded their country, being repelled by the Boii, came down upon the Danube and the Scordisci Galatae, and then to the Teuristae and [read 'or"] Taurisci, who were also Galatae: and after that they came to the Helvetii, who were rich in gold and a peaceable people; but when the Helvetii saw that the wealth got by plunder was greater than their own, they were induced, and chiefly the Tigurini and Tougeni, to join the Cimbri; but they were all defeated by the Romans, both the Cimbri and those who joined them." It seems then that there was an Helvetian people named Tugeni, and Walckenaer (*Géog.*, &c. vol. i. p. 311) has no difficulty in finding a place for them. He says: "The name of the modern village of *Tugen*, at the eastern extremity of the *lake of Zürich*, and that of the valley formed by the river *Thur*, which is *Toggenburg* or *Tuggenburg*, do not permit us to doubt that the Tugeni inhabited the neighbourhood of these places; and in the time of Caesar it is probable that this people occupied the country between the *lake of Constanz*, the *Limmat*, the *lake of Wallenstadt*, and the two parts of the course of the Rhine to the west and to the east of the lake." Within the limits of the Tugeni, if this conjecture is true, we find *Zürich*, Vitodurum (*Oberwinterthur* near *Winterthur*), Arbor Felix (*Arbon*) on the *lake of Constanz*, and Vindonissa (*Windisch*).

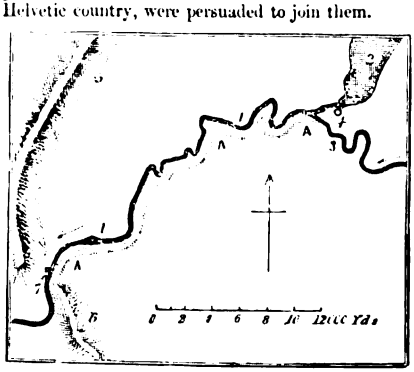
The name of the fourth pagus is unknown; but as there was a people named Ambrones, who were with the Teutones when Marius defeated them at Aquae Sextiae, Walckenaer supposes that they may have formed the fourth canton. Strabo (p. 183), in speaking of this campaign of Marius, mentions only the Ambrones and Tugeni. Eutropius, who of course was copying some authority, says (v. 1) that "the Roman consuls Manilius and Caepio were defeated by the Cimbri and Teutones, and Tigurini and Ambrones, which were German and Gallic nations, near the Rhone." As the Cimbri and Teutones are here supposed to be Germans, and as the Tigurini were certainly Galli, it is plain that the writer, or the authority which he followed, took the Ambrones also to be Galli. The Epitome of Livy (*Ep.* 68) mentions the Teutones and Ambrones as the names of the barbarians whom Marius defeated east of the Rhone; and also Plutarch (*Mar.* c. 19), who adds that Ambrones is also a name of the Ligures. If the Ambrones were a Gallic people, there is no place for them except in Switzerland: and if the position of the three other Pagi is rightly determined, the Ambrones occupied the part south of the Verbigeni and Tugeni; and they would extend from the eastern extremity of the *lake of Geneva*, in the upper valleys of the *Aar* and the *Reuss*, as far east as the course of the Rhone above the *lake of Constanz*. But all this is only a conjecture, founded on no very strong probabilities; and it is not likely that the inhabitants of the high valleys of Switzerland joined the Helvetic emigration.

The story of the migration of the four Helvetic Pagi is told by Caesar (*B. G.* i. 2). Orgetorix (B. C. 61), a rich Helvetian, persuaded the nobles to leave their country with all their people and movables; for he argued that, as they were the bravest of the Galli, it would be easy to make themselves masters of all the country. They did not, however, intend to attack either their neighbours the Sequani, or the Aedui, or the Allobroges on the south side of the Rhone; but to make terms with the Allobroges, in order to secure a free passage through their country. Orgetorix prevailed on the Helvetii to get ready as many waggons and beasts of draught as they could, and to sow largely, in order to have a stock of provisions for their journey. Two years were considered enough for preparations, and the third was to be the year of emigration. Orgetorix, in the meantime,

Digitized by Google

visited the Sequani, and persuaded Casticus, whose father Catamantaloedes had held for many years the kingly power there, to seize the place which his father once had. He also persuaded Dumnorix, the brother of Divitiacus, to do the same among the Aedui, and he gave Dumnorix his daughter to wife. He told them that they might easily do what he advised, for he was going to have the supreme power among the Helvetii, that the Helvetii were the most powerful Gallic people, and that he would help to secure their royal power with the Helvetian army. This was agreed: the three conspirators were to make themselves kings, and then they had good hopes of mastering all Gallia. This conspiracy being known to the Helvetii by some informer, Orgetorix was summoned to trial. The punishment for treason among the Helvetii was burning. The man came on the day fixed for the trial, but he had a train of 10,000 slaves and dependents about him, and there was no trial. Orgetorix was in open rebellion, and while the magistrates were getting together a force from the country to maintain the law and put him down, he died, or, as the Helvetii supposed, he put an end to himself. Though usurpation was a common thing in the Gallic states, the people were never long pleased with it, and a usurper had generally a short reign.

The Helvetii still determined to leave their country. They burnt their 12 towns, their 400 villages, and all the private buildings. They burnt also all the corn which they did not want; and they were directed by their leaders to take meal and flour enough to last three months. They persuaded the Rauraci to join them, a tribe who were situated on the Rhine about *Bâle*, but probably within the territory of the Sequani; and also Tulingi and Latobrigi, who were on the east side of the Rhine, and either a German people or a remnant of those Helvetii who once occupied the country. They also got some Boii to join them, whom Caesar describes as Boii "who had settled beyond the Rhine and had passed into the Noric territory, and had attacked Noreia." This is very obscure. The simplest explanation is, that some of the Boii who had been long settled in Germany, and who happened now to be on the eastern borders of the Helvetic country, were persuaded to join them.



MAP SHOWING THE POSITION OF CAESAR'S MURUS ON THE RHONE.

A, A. Caesar's earthwork or wall.
1. The Rhone.
2. L. Leman.
3. The Arve.
4. Geneva.
5. Mt. Jura.
6. Mt. aux Vaches.
7. Fort l'Ecluse.

The Helvetii, says Caesar, could only get out of their country by two ways; an expression which implies that the direction of their route was determined, for they could certainly have got out by the north as well as by the south. One of these two ways led along the Rhone, on the right bank, to the place where the Jura abuts on the river, leaving only room for a single waggon. This is the place where *Fort l'Ecluse* stands. The other road was over the Rhone at Geneva, and through the country of the Allobroges and the Provincia. The route of the Helvetii was therefore to the south-west. At the point where the Rhone flows out of the lake of Geneva is an island on which stood the town of Geneva, which belonged to the Allobroges. The modern town is on the island and on both sides of the Rhone. There was a bridge from Geneva to the territory of the Helvetii, and we assume that there was another bridge from the island to the south side. All the Helvetii were to meet at Geneva on the 28th of March of the unreformed calendar, expecting to prevail on the Allobroges to allow them a passage, and intending to force a passage if it was not granted. Caesar, who was now proconsul of Gallia Cisalpina and of the Provincia, was at Rome; and, hearing of this preparation, he hurried from the city and arrived at Geneva. He does not tell us where he crossed the Alps. He mustered as many men as he could in the Provincia, for he had only one legion with him, and he ordered the bridge at Geneva to be destroyed,—the bridge which connected the island with the north bank of the Rhone, if he only destroyed one bridge. The Helvetii sent to say that they intended to pass through the Provincia without doing any harm, and begged that he would give them permission. Caesar, recollecting what had happened to L. Cassius and his army, whom the Helvetii had sent under the yoke [GALLIA, p. 955], resolved not to allow them to pass through the Provincia. He told them that he would consider about it, and they must come again on the 13th of April. (B. C. 58.)

In the mean time Caesar employed his legions and the troops that he had raised in the Provincia, the number of which is not mentioned, in building a wall (murus), probably an earthen rampart, on the south side of the Rhone, from the place where it flows out of the Leman lake to the Jura. The wall was 19 Roman miles long and 16 feet high with a ditch; which may mean that it was 16 feet high from the bottom of the ditch. The wall was manned, and at intervals there were towers (castella). When the day came for Caesar's answer, he refused to allow the Helvetii to pass through the Provincia and told them, that if they made the attempt, he should prevent them. The Helvetii tried to break through the wall. Some crossed the river by bridges of boats and planks fastened together, and others forded the Rhone where it was shallowest: sometimes they attacked the wall by day, and sometimes by night; but the Roman troops drove them back, and they failed to break through the Roman lines. Some persons who have explained Caesar's operations before Geneva, or rather have found fault with his story, begin by supposing that his wall was made on the north side of the Rhone. If men can make such a blunder as this, there is no need to waste any words on them. The wall began on the south side of the river, close to the lake, and was made along the river to the point where the *Arve* enters the Rhone, just below Geneva: and it was continued along the Rhone to the point where the Rhone passes through the Jura. (In the form

Digitized by Google

side of the river, at the base of the mountain named Credo, is now *Fort l'Ecluse*, or *Fort la Cluse*, as it is sometimes written. On the south side is the range of high land, which is a continuation of the Jura; and here the wall ended. As the Rhone cannot be forded below this point, and is indeed hardly fordable above, if Caesar kept the Helvetii from crossing between Geneva and *Fort l'Ecluse*, his enemies must go some other way. The length of Caesar's wall, measured from a point a little above Geneva along the Rhone to a point opposite to *Fort l'Ecluse*, agrees with Caesar's length; and we may suppose that the text is right as to the numbers, which has only been doubted by those editors who have supposed that his wall was made from the lake on the north side of the Rhone to the Jura, which would be a manifest absurdity, and is contrary to Caesar's narrative. Appian (*Gall. Excerpt.* xiii.) found the same length of wall, either in Caesar's text or elsewhere; for he makes it 150 stadia, which, at 8 stadia to a Roman mile, is 18¾ M.P. Another objection to Caesar's narrative is, that the Rhone below the junction of the *Arve* is not fordable now; it is rapid, and sunk in a deep bed between rocks, which circumstances would render the passage of the river either by bridges of boats, rafts, or wading impossible. But it has been maintained, even in modern times, that such a passage over the Rhone would not be impossible. Caesar says that in his time it was done; and it is certain that some change must have taken place in the bed of such a river, through which a rapid stream has been running for 2000 years.

There now only remained the other way for the Helvetii, which they could not take if the Sequani opposed them (*B. G.* i. 9)—the narrow pass between the Jura and the Rhone. Dumnorix managed this for the Helvetii, and the two peoples gave hostages to one another; the Helvetii promising to do no mischief, and the Sequani undertaking not to molest them. Now the objectors say there were many other roads that the Helvetii could have taken, and particularly the road from *Orbe* in the *Pays de Vaud* to *Pontarlier* on the *Doubs*: and General Warnery, a great authority in this matter, for he places Caesar's wall on the wrong side of the river, really believes they did go this way; to which the answer is, that Caesar says they did not. The road to *Pontarlier*, says Warnery, is the most open, easy, and practicable of all the roads through the Jura. The general should have proved that it was so in Caesar's time, and the best road for waggons early in spring; not, even if he had done that, he would not have confuted the author of the Commentarii. Caesar was told that the Helvetii intended to pass through the territory of the Sequani and the Aeiui, and that their purpose was to reach the country of the Santones on the north side of the *Lower Garonne*. The route by *Pontarlier* was quite out of their way. They wanted to cross the Rhone, and pass through the territory of the Allobroges; and if they could not do this, their best road, their only road, was past *Fort l'Ecluse*. Besides, if the Sequani were willing to let the Helvetii pass through their country, they would let them pass along the southern border rather than through the middle of their lands; and, as the Allobroges had some lands north of the Rhone below *Fort l'Ecluse*, which lands the Helvetii plundered, there is a very good reason for the Sequani allowing the Helvetii to take this road, and no other, if there was at that time, and at that season of the year, another waggon-road, which cannot be proved. Caesar left Labienus to take care of his wall, while he went to North Italy for fresh troops. He raised two legions, took three more from their winter quarters about Aquileia, and again crossing the Alps came into the territory of the Vocontii, and thence crossed the Isara (*Isère*) into the country of the Allobroges. From the territory of the Allobroges he crossed the Rhone, into the territory of the Segusiani. The Segusiani, whose chief place was afterwards Lugdunum (*Lyon*), had also a part of the country in the angle between the *Saône* and the Rhone. Caesar crossed the Rhone above the junction of the Rhone and *Saône*.

Labienus had let the Helvetii move through the pass at *Fort l'Ecluse*. It was enough for him to defend his wall. When Caesar was coming up with the Helvetii, some of them were in the country of the Aedui, having crossed the Arar (*Saône*). They got across with boats and rafts, some of which they would find on the river, for it was much used at that time for navigation; but we may suppose that they would also have to make rafts to carry across so many people and so much baggage. Caesar waited till three parts of the Helvetii had got over the river, when he attacked the remaining fourth part, the Tigurini. These were the people who had defeated L. Cassius and killed L. Piso, the grandfather of Caesar's father-in-law. A great part of the Tigurini were cut to pieces, and the rest took to flight and hid themselves in the woods. Plutarch and Appian say that Labienus defeated the Tigurini, which may be true. It is not said where the Helvetii were crossing the *Saône*; and there is no authority for placing the passage at *Mâcon*, as some people will place it, though *Mâcon* cannot be much out of the way. The march of the Helvetii from *Fort l'Ecluse* to *Mâcon* could not be direct; and by the nearest road it would be about 90 or 100 miles. This was the distance that they had travelled with their women, children, carts, and baggage while Caesar went to Italy, returned, and overtook them on the *Saône*. The Helvetii, with such roads as they had, or no roads at all, and the immense number of people and waggons, would not travel at that season more than a few miles a day. The Helvetii had also some cavalry. The roads, such as they were, would be all mud, and full of ruts. Caesar made a bridge over the Arar, and followed those who had crossed the river. He got over in one day, and the Helvetii had taken twenty days to do it, a length of time not at all unreasonable, if we consider that there were about 300,000 of them and many waggons. If we add these twenty days to the time of the march from *Fort l'Ecluse* to the passage of the *Saône*, there will be plenty of time for Caesar's hasty march into Italy and back. Divico, who had commanded the Tigurini (B. C. 107) in the war against Cassius, came with other Helvetii to Caesar after he had crossed the *Saône*, to propose terms of peace; but he and the proconsul could not agree. Though Divico had commanded an army in B. C. 107, that would not prove that he was too old to be a counsellor fifty years after; as some suppose who find fault with Caesar's narrative. Caesar followed the Helvetii for about fifteen days, keeping five or six miles in their rear; easy work for his men, for the Helvetii could not move quickly. The route was up the valley of the *Saône* on the west side, but not close to the river. (*B. G.* i. 10.) Caesar's supplies were brought up the Arar in boats, and it caused

Digitized by Google

him inconvenience to be at a distance from them: but he would not leave the rear of the Helvetii. When Caesar was within 18 M. P. of Bibracte (*Autun*), he left the rear of the Helvetii, and moved towards the town to get supplies, for the Aedui had not kept their promise to send him corn. The Helvetii were of course about the same distance from the place, and probably nearly due south of *Autun*; for this position would be on their march towards the *Loire* through *Bourbon L'Anci*. They were thus on the road to the Santones.

The Helvetii, perceiving Caesar's movement, faced about and were upon his rear. This brought on a general battle. The Helvetii fought desperately: though the battle lasted from about mid-day to night-fall, no one saw an Helvetian turn his back on the Romans. The fight was continued till late in the night, at the place where the Helvetii had their baggage, for they had put their carts (carri) as a fence all round. The Romans at last got possession of the baggage and the camp, as Caesar calls it; and we know what took place, though he does not tell us. Women and children were massacred without mercy. A daughter and son of Orgetorix were taken prisoners. About 130,000 men (hominum, a term which may include women), who survived the battle, moved from the field, and without halting in the night reached the country of the Lingones. Caesar was employed for three days in burying his dead and looking after his wounded men, and could not follow immediately. But he sent a threatening message to the Lingones, if they should venture to assist his enemies; and after the third day he marched in pursuit of them. On his road he was met by a deputation of the Helvetii, who prayed for mercy. The proconsul ordered them to tell their people to stay where they were, and wait for him. On his arrival he demanded their arms, hostages, and the slaves who had run away to join them. During the night 6000 men of the Pagus Verbigenus ran away towards the Rhine and the borders of the Germans. Caesar sent an order to the people through whose territory they were moving to bring them back; and they brought them back — 6000 men with arms in their hands, but dispirited, and probably perishing of hunger. Caesar treated these men as enemies: they were all massacred. Dion Cassius (xxxviii. 33) speaks of the 6000 being destroyed, but his narrative does not quite agree with Caesar's. The rest of the Helvetii were sent home, to the places they came from, and told to rebuild their towns and villages. They had lost all their corn, and the Allobroges were required to supply them. Caesar would not allow the Helvetic territory to be unoccupied, for fear of the Germans from the other side of the Rhine coming over and seizing it, and so becoming neighbours of the Provincia and the Allobroges. But the Germans now occupy the largest part of Switzerland, and it is very probable that they did come over and occupy many of the parts which had been depopulated. It does not appear that Caesar ever went into the country to see what was going on. [BOII.]

Tablets were found in the Helvetic camp, written in Greek characters, and were brought to Caesar; in which tablets were registered the whole number of the Helvetii able to bear arms who had left their homes, and there was a separate register of children, old men, and women. The numbers were as follows: Tulingi, 36,000; Latobrigi, 14,000; Rauraci, 23,000; Boii, 32,000; Helvetii, 263,000: in all 368,000. The fighters were 92,000, about one fourth of the whole number. A census was taken of all who returned, and the number was found to be 110,000. If all the numbers are right in Caesar, we find some inconsistency here; for 130,000 escaped into the country of the Lingones, of whom 6000 were massacred: the remainder would be 124,000. Out of this number, however, many might die before they reached their home, and some might run away. We can hardly suppose that all the children and women perished in the camp near Bibracte, though it is possible they might get hard treatment from the Aedui, whose lands the Helvetii had plundered. However, the result was that less than a third of the whole number returned home, and the number of women that perished must have been so large as to leave very few for the men who survived the calamity.

Most of the Gallic states sent to congratulate Caesar on his victory, which they affected to consider as much for their own interest as that of the Romans; for the Helvetii, they said, or so Caesar makes them say, though prosperous at home, had left their country to conquer all Gallia, to choose for their residence such part as they should like best, and to make all the states tributary. Great revolutions had taken place in Gallia before; but a whole nation, who possessed towns and villages, quitting their home to look out for a new one, must have been moved by some strong motives. The proximity to the Germans, who were troublesome neighbours, and the want or the wish for more room, are reasons for the migration which we can deduce from Caesar. The Helvetii were a warlike people, and their men wanted a wider field than a country which was shut in by natural boundaries. The restlessness of the wealthy Helvetii, and exaggerated notions among the people of a better country in the south and west of Gallia, were probably the strongest motive for the emigration. A few centuries earlier they might have taken the road to Italy, and have got there: but that country had been closed against adventurers by the Romans: and if the Helvetii did emigrate, there is no country that we can name to which they were more likely to go than that which they set out for.

Caesar does not mention the name of a single town in the Helvetian country. A few names of towns appear later, and the names seem to be these: Noeoduum or Colonia Equestris [COLONIA EQUESTRIS]; Salodurum; Eburodunum; Aventicum; and Minnodunum. Augusta Rauracorum (*Augst*) was founded in the time of Augustus; the name is not Roman, and it is not within the limits of Caesar's Helvetii. Basilia (*Basle*) is also a late foundation. Vitodurum, in the east part of Switzerland, may be a Gallic name also; but Switzerland does not retain a great many names of Gallic original. It seems that the boundary between the country of the Helvetii on the east, and Rhaetia under the later empire, was not the Rhine above the *lake of Constance*, but the boundary was west of the lake. [PEUTINGER, No. 15.] The name Helvetia belongs to a later period, though Caesar uses the expression "Helvetia Civitas."

The Romans made several roads in the Helvetic territory. That which was made over the Jura [GALLIA, p. 966] is probably the road from Orba (*Orbe*) to Ariolica [ARIOLICA]. There was a road from Orba, through Lacus Lausonius (*Lousonne*) and Equestris, to Geneva. There was a road from Vibiscum (*Vevay*), through Bromagus [BROMAGUS],

Digitized by Google

and Minnodunum, to Aventicum (*Avenches*); and thence through Salodurum to Augusta Rauracorum. There was also a road from Augusta Rauracorum eastward through Vindonissa (*Windisch*) to Ad Fines (*Pfyn*), Arbor Felix, and Brigantia (*Bregenz*) on the *lake of Constans*.

A work by J. F. Roesch, *Commentar. über die Commentarien*, &c, Halle, 1783, contains some good remarks on General Warnery's *Remarques sur César*. Roesch was an officer and lecturer on military science. There is a map in his book of the country between Geneva and *Fort l'Ecluse*. [G. L.]

HELVETUM. [HELCEBUS.]

HE'LVII, a people of the Provincia or Gallia Narbonensis, who bordered on the Arverni, but were within the limits of the Provincia. The Cevenna formed the boundary between the Helvii and the Arverni. (Caes. *B. G.* vii. 7, 8.) The Helvii were east of the *Cévennes*, and occupied the old French division of the *Vivarais*. When, however, Caesar speaks of the Helvii as bordering on the Arverni, he means the Arverni and their dependencies; for the Gabali, and Vellauni or Vellavi, were between the Helvii and the Arverni [GABALI], and they were dependent on the Arverni. (*B. G.* vii. 75.) The name is written Ἕλουοι in the texts of Strabo, who makes their territory commence on the east, at the bank of the Rhone, which is no doubt correct. He places them in Aquitania, which is generally supposed to be a mistake; but Augustus, who enlarged the Provincia of Aquitania, may have attached the Helvii to it. In Pliny (iii. 4) they appear in Narbonensis, and their chief town is Alba. [ALBA HELVORUM.] It is generally supposed that Ptolemy's Elycoci Ἐλύκωκοι, ii. 10. § 18), whose chief town was Alba Augusta, are the Helvii. But Ptolemy's Elycoci are east of the Rhone, and Alba Augusta is a different name from Alba Helvorum. Pliny (xiv. 3) mentions a vine that was discovered, seven years before he was writing, at Alba Helvia in the Narbonensis, which vine flowered and lost its flower in a single day, and for that reason was the safest to plant. It was named Narbonica, and when he wrote was planted all over the Provincia. [G. L.]

HELVILLUM, a town of Umbria, on the Via Flaminia, known only from the Itineraries, which place it 27 M. P. from Forum Flaminii, or 15 M. P. from Nuceria. These distances coincide with the position of *Sigillo*, a village that still forms one of the stages on the modern road which follows the line of the Flaminian Way. (*Itin. Ant.* p. 125; *Tab. Peut.*) At the same time, the name of *Sigillo* suggests a relation with the Suillum of Pliny, who enumerates the Suillates among the towns of Umbria (iii. 14. 19); and it is not improbable that the Helvillum of the Itineraries is either identical with the Suillum of Pliny, or was situated in its immediate neighbourhood. [E. H. B.]

HEMEROSCO'PIUM. [DIANIUM.]

HE'NETI. [VENETI.]

HENIOCHI (Ἡνίοχοι, Dionys. 687; Arrian, *Peripl.* p. 11; Anon. *Peripl.* p. 15), a Colchian tribe, who appear in geography as early as Hellanicus (p. 91, ed. Sturz). Strabo (xi. p. 496), who derives their name from the legendary charioteers of the Dioscuri, describes them as a sea-faring, piratical race, using small boats, called *καμάραι* by the Greeks, and containing from twenty-five to thirty men.

From the account of the escape of Mithridates Eupator, from Pontus to the Bosporus, they appear occupying the country between the W. edge of Caucasus and the Euxine, with an area of 1000 stadia. (Strab. *l. c.*; comp. Plin. vi. 4; Scyl. p. 31; Ptol. v. 10.) [E. B. J.]

HENNA. [ENNA.]

HEPHAE'STIA. [LEMNOS.]

HEPHAE'STIA, the ancient name of the small island now called *Comino*, between Malta and Gozo. [MELITA; GAULOS.] (See Wesseling, *Itiner.* p. 518.) The island is about two miles long from NE. to SW., with a good channel on each side. It has always been, with Gozo, a dependency of Malta. To the SW. is a small rocky islet called *Cominotto*, of which the ancient name is unknown. [J. S. H.]

HEPHAE'STIADAE. [ATTICA, p. 326, b.]

HEPHAE'STIAE INSULAE. [AEOLIAE INSULAE.]

HEPHAE'STION (Ἡφαίστιον), a district near Phaselis, in the south of Lycia; it derived its name from the fact that fire constantly was issuing from the loose soil. (Ctesias, *ap. Phot. Cod.* 73, p. 146; Senec. *Ep.* 79.) According to Pliny (ii. 110) these fires appear to have arisen from springs of burning naptha. (Comp. Plin. v. 28; Solin. 39.) [L. S.]

HEPTACOME'TAE (Ἑπτακομῆται), a barbarous tribe of the Mosynoeci on the coast of Pontus, inhabiting Mount Scoedises, and living on chesnuts and game. From their houses, which are said to have resembled towers, they attacked and robbed travellers. (Strab. xii. p. 549; Steph. B.; *s. v.*; comp. MOSYNOECI.) [L. S.]

HEPTA'NOMIS (ἡ Ἑπτανομίς, Ptol. iv. 5. § 55; more properly Ἑπτὰ Νομοί or Ἑπτανομίς, Dionys. *Perieg.* 251; sometimes ἡ μεταξὺ [γῆ]), the modern *Mesr-Wostani* of the Arabian geographers, or Middle Egypt, may be described generally as the district which separates the Thebaïd from the Delta. Inasmuch, however, as the appellation of the Seven Nomes is political rather than territorial, it is not easy to define the actual boundaries of this region. The northern portion belonged to the kingdom of Lower Aegypt, of which it contained the capital, Memphis; the southern appertained to the elder kingdom of Thebes, so long at least as there continued to be two monarchies in the Nile valley. It is not possible to determine at what period, if indeed at any, the Heptanomis was regarded as an integral third of Aegypt. About the number of its nomes there can be no question; but which, at any given era, were the seven principal nomes, it is less easy to decide. They probably varied with the vicissitudes of local prosperity—war, commerce, or migration, from time to time, causing a superior nome to decline, and, on the contrary, raising an inferior nome to eminence. According to Ptolemy and Agatharchides (*De Rubr. Mar. ap. Phot. Biblioth.* p. 1339. R.), both of whom wrote long after the original divisions had been modified, the Seven Nomes were the following: (1.) Memphites. (2.) Heracleopolites. (3.) Crocodilopolites or Arsinoites. (4.) Aphroditopolites. (5.) Oxyrhynchites. (6.) Cynopolites. (7.) Hermopolites. The Greater and Lesser Oases were always reckoned portions of the Heptanomis, and hence it must apparently have sent nine, and not seven, nomarchs to the general assembly in the Labyrinth. The capitals of the Nomes, whose names are sufficiently indicated by the respective appellations of the divisions themselves—e. g. Hermopolis of the Nomos Hermopolites, &c.—were also the chief towns of the Middle Land. This district comprised the three greatest works of Egyptian art and enterprise, e. g., the Pyramids, the Labyrinth

Digitized by Google

and the artificial district formed by the canal *Bahr-Jusuf*, the Nomos Arsinoites or the *Fyoum*. These, as well as the chief cities of the Heptanomis, are described under their separate designations. [APHRODITOPOLIS, CYNOPOLIS, &c.]

The Heptanomis extended from lat. N. 27° 4′ to 30° N.: its boundary to S. was the castle of Hermopolis (Ἑρμοπολιτάνη φυλακή); to N. the apex of the Delta and the town of Cercasorum; W. the irregular line of the Libyan Desert; and E. the hills which confine the Nile, or the sinuous outline, the recesses and projections of the Arabian mountains. Thus, near Hermopolis at the S. extremity of this region, the eastern hills approach very near the river, while those on the western or left bank recede to a considerable distance from it. Again, in lat. 29°, the Libyan hills retire from the vicinity of the Nile, bend toward NW., and sharply return to it by a curve to E., embracing the province of Arsinoë (*El-Fyoum*). Between the hills on which the Pyramids stand and the corresponding elevation of *Gebel-el-Mokattam* on the eastern bank of the river, the Heptanomis expands, until near Cercasorum it acquires almost the breadth of the subjacent Delta.

The Heptanomis is remarkable for its quarries of stone and its rock-grottoes. Besides the Alabastrites, already described, we find to N. of Antinoë the grottoes of Benihassan,—the Speos Artemidos of the Greeks. Nine miles lower down are the grottoes of *Koum-el-Ahmar*, and in the Arabian desert, on the east, quarries of the beautiful veined and white alabaster, which the Egyptians employed in their sarcophagi, and in the more delicate portions of their architecture. From the quarries of Tourah and Massarah, in the hills of *Gebel-el-Mokattam*, east of Memphis, they obtained the limestone used in casing the pyramids. The roads from these quarries may still be traced across the intervening plain.

Under the Ptolemies the Heptanomis was governed by an ἐπιστράτηγος, and by an officer of corresponding designation,—procurator,—under the Roman Caesars. We find him described in inscriptions (Orelli, *Inscr. Lat.* n. 516) as "procurator Augusti epistrategiae Septem Nomorum." Under the later Caesars in the 3rd century A. D. the five northern Nomes, Memphites, Heracleopolites, Arsinoites, Aphroditopolites, and Oxyrhynchites, together with the Nomos Leptopolites, constituted the province of Arcadia, which subsequently became a metropolitan episcopal see. The natural productions of the Heptanomis resemble those of Upper Egypt generally, and present a more tropical Fauna and Flora than those of the Delta. Its population also was less modified by Greek or Nubian admixture than that of either Lower or Upper Egypt; although, after the 4th century A. D., the Heptanomis was overrun by Arabian marauders, who considerably affected the native races. [W. B. D.]

HERACLEIA (Ἡράκλεια). 1. *In Europe.*

HERACLEIA, a town or fortress of Athamania of uncertain site. (Liv. xxxviii. 2.)

HERACLEIA, an ancient place of Pisatis in Elis, but a village in the time of Pausanias, was distant 40 or 50 stadia from Olympia. It contained medicinal waters issuing from a fountain sacred to the Ionic nymphs, and flowing into the neighbouring stream called Cytherus or Cytherius, which is the brook near the modern village of *Bruma*. (Strab. viii. p. 356; Paus. vi. 22. § 7; Boblaye, *Recherches*, &c. p. 129; Curtius, *Peloponnesos*, vol. ii. p. 72.)

HERACLEIA LYNCESTIS (Ἡράκλεια, Polyb. xxviii. 11, 15, xxxiv. 12; Strab. vii. p. 319; Ptol. iii. 13. § 33; Liv. xxvi. 25, xxxi. 39; *Itin. Anton. Peut. Tab.*; Ἡράκλεια Λύκκου, Hierocl.; Geog. Porph. *de Them.* ii. 2), the chief town of the province of Upper Macedonia, called Lyncestis, at a distance of 46 M. P. from Lychnidus and 64 M. P. from Edessa. According to the proportional distances, Heracleia stood not far from the modern site of *Filúrina*, at about 10 geog. miles direct to the S. of *Bitolia*, nearly in the centre of the Egnatian Way.

Calvinus narrowly escaped being intercepted by the Pompeians on his rear, after having fallen back upon Heracleia, which Caesar (*B. C.* iii. 79) rightly places at the foot of the Candavian mountains, though his transcribers have interpolated the passage, and confounded it with the Heracleia Sintica of Thracian Macedonia.

The writer of a geographical fragment (ap. Hudson, *Geog. Min.* vol. iv. p. 43; comp. Joann. Cinnam. p. 127, ed. Bonn) has identified this city with Pelagonia [PELAGONIA], but incorrectly. (Leake, *Northern Greece*, vol. iii. pp. 281, 311, 318; Lapie, *de Viae Egnat. Part. Occid.* p. 39.) [E. B. J.]

HERACLEIA SYNTICA (Ἡράκλεια Συντική, Ptol. iii. 13. § 30; Steph. B.; Const. Porph. *de Them.* ii. 2; Ἡράκλεια Στρυμόνος, Hierocles; Heracleia Sintiis, Liv. xliii. 51), the principal town of Sintica, a district on the right bank of the Strymon, in Thracian Macedonia. It was distant from Philippi by the Roman road which passed round the N. side of the lake, 55 M. P., and by that which passed on the S. side, 52 M. P. (*Peut. Tab.*)

Demetrius, son of Philip V. king of Macedonia, was murdered and put to death here. (Liv. xl. 24.) It stood on the site of the modern *Zerveni*, a small village where the peasants find in ploughing the ground great numbers of ancient coins. (Leake, *Northern Greece*, vol. iii. p. 226.) The coins of this place are very numerous. (Sestini, *Mus. Fet.* p. 37; Eckhel, vol. ii. p. 71.) [E. B. J.]

COIN OF HERACLEIA IN MACEDONIA.

HERACLEIA TRACHINIA. [TRACHIS.]

HERACLEIA (Ἡράκλεια: *Eth.* Ἡρακλεώτης, Heracliensis or Heracleensis: *Policoro*), a city of Magna Graecia, situated in Lucania on the gulf of Tarentum, but a short distance from the sea, and between the rivers Aciris and Siris. It was a Greek colony, but founded at a period considerably later than most of the other Greek cities in this part of Italy. The territory in which it was established had previously belonged to the Ionic colony of Siris, and after the fall of that city [SIRIS] seems to have become the subject of contention between the neighbouring states. The Athenians, we know, had a claim upon the territory of Siris (Herod. viii. 62), and it was probably in virtue of this that they remonists the Thurians, almost immediately after their establishment in Italy, advanced similar pretensions

Digitized by Google

These were, however, resisted by the Tarentines, and war ensued between the two states, which was at length terminated by an arrangement that they should found a new colony in the disputed district, which, though in fact a joint settlement, should be designated as a colony of Tarentum. The few remaining inhabitants of Siris were added to the new colonists, and it would appear that the settlement was first established on the ancient site of Siris itself, but was subsequently transferred from thence, and a new city founded about 24 stadia from the former, and nearer the river Aciris, to which the name of Heracleia was given. Siris did not cease to exist, but lapsed into the subordinate condition of the port or emporium of Heracleia. (Strab. vi. p. 264.) The foundation of the new city is placed by Diodorus in B. C. 432, fourteen years after the settlement of Thurii; a statement which appears to agree well with the above narrative, cited by Strabo from Antiochus. (Antiochus, *ap. Strab. l. c.*; Diod. xii. 36; Liv. viii. 24.) Diodorus, as well as Livy, calls it simply a colony of Tarentum: Antiochus is the only writer who mentions the share taken by the Thurians in its original foundation. Pliny erroneously regards Heracleia as identical with Siris, to which it had succeeded; and it was perhaps a similar misconception that led Livy, by a strange anachronism, to include Heracleia among the cities of Magna Graecia where Pythagoras established his institutions. (Liv. i. 18; Plin. iii. 11. s. 15.) The new colony appears to have risen rapidly to power and prosperity, protected by the fostering care of the Tarentines, who were at one time engaged in war with the Messapians for its defence. (Strab. vi. p. 281.) It was probably owing to the predominant influence of Tarentum also that Heracleia was selected as the place of meeting of the general assembly (συνέδριον) of the Italiot Greeks; a meeting apparently originally of a religious character, but of course easily applicable to political objects, and which for that reason Alexander, king of Epirus, sought to transfer to the Thurians for the purpose of weakening the influence of Tarentum. (Strab. vi. p. 280.)

But beyond the general fact that it enjoyed great wealth and prosperity,—advantages which it doubtless owed to the noted fertility of its territory,—we have scarcely any information concerning the history of Heracleia until we reach a period when it was already beginning to decline. We cannot doubt that it took part with the Tarentines in their wars against the Messapians and Lucanians, and it appears to have fallen gradually into a state of almost dependence upon that city, though without ever ceasing to be, in name at least, an independent state. Hence, when Alexander, king of Epirus, who had been invited to Italy by the Tarentines, subsequently became hostile to that people [TARENTUM], he avenged himself by taking Heracleia, and, as already mentioned, transferred to the Thurians the general assemblies that had previously been held there. (Liv. viii. 24; Strab. vi. p. 280.) During the war of Pyrrhus with the Romans, Heracleia was the scene of the first conflict between the two powers, the consul Laevinus being totally defeated by the Epirot king in a battle fought between the city of Heracleia and the river Siris, B. C. 280. (Plut. *Pyrrh.* 16, 17; Flor. i. 18. § 7*; Zonar. viii. 4; Oros. iv. 1.)

Heracleia was certainly at this time in alliance with the Tarentines and Lucanians against Rome; and it was doubtless with the view of detaching it from this alliance that the Romans were induced shortly afterwards (B. C. 278) to grant to the Heracleians a treaty of alliance on such favourable terms that it is called by Cicero "prope singulare foedus." (Cic. *pro Balb.* 22, *pro Arch.* 4.) Heracleia preserved this privileged condition throughout the period of the Roman republic; and hence, even when in B. C. 89 the Lex Plautia Papiria conferred upon its inhabitants, in common with the other cities of Italy, the rights of Roman citizens, they hesitated long whether they would accept the proffered boon. (Cic. *pro Balb.* 8.) We have no account of the part taken by Heracleia in the Social War; but from an incidental notice in Cicero, that all the public records of the city had been destroyed by fire at that period, it would seem to have suffered severely. (Cic. *pro Arch.* 4.) Cicero nevertheless speaks of it, in his defence of Archias (who had been adopted as a citizen of Heracleia), as still a flourishing and important town, and it appears to have been one of the few Greek cities in the S. of Italy that still preserved their consideration under the Roman dominion. (Strab. vi. p. 264; Cic. *l. c.* 4, 5; Mel. ii. 4. § 8; Plin. iii. 11. s. 15.) Its name is unaccountably omitted by Ptolemy; but its existence at a much later period is attested by the Itineraries. (*Itin. Ant.* p. 113; *Tab. Peut.*) The time and circumstances of its final extinction are wholly unknown; but the site is now desolate, and the whole neighbouring district, once celebrated as one of the most fertile in Italy, is now almost wholly uninhabited.

The position of the ancient city may nevertheless be clearly identified; and though no ruins worthy of the name are still extant, large heaps of rubbish and foundations of ancient buildings mark the site of Heracleia near a farm called *Policoro*, about three miles from the sea, and a short distance from the right bank of the Aciris or *Agri*. Numerous coins, bronzes, and other relics of antiquity have been discovered on the spot; and within a short distance of the site were found the bronze tables commonly known as the Tabulae Heracleenses, one of the most interesting monuments of antiquity still remaining. They contain a long Latin inscription relating to the municipal regulations of Heracleia, but which is in fact only a copy of a more general law, the Lex Julia Municipalis, issued in B. C. 45 for the regulation of the municipal institutions of the towns throughout Italy. This curious and important document, which is one of our chief authorities for the municipal law of ancient Italy, is engraved on two tables of bronze, at the back of which is found a long Greek inscription of much earlier date, but of very inferior interest. The Latin one has been repeatedly published (Murat. *Inscr.* vol. ii. p. 582; Haubold, *Mon. Legal.* pp. 98—133, &c.), and copiously illustrated with legal commentaries by Dirksen (8vo. Berlin, 1817—1820) and Savigny (in his *Vermischte Schriften*, vol. iii.). Both inscriptions were published, with very elaborate commentaries and disquisitions on all

* It is a striking instance of the carelessness of the Roman epitomisers, and their consequent worthlessness as geographical authorities, that Florus places this battle "apud Heracleam et *Campaniae flumen Lirim*," mistaking the river Siris for the Liris; and the same blunder occurs in Orosius, who says, "apud Heracleam *Campaniae* urbem, fluviumque Lirim"; for which last the editors substitute "Sirim," though the mistake is evidently that of the author, and not of the copyist.

points connected with Heracleia, by Mazocchi (2 vols. fol. Naples, 1754, 1755).

Heracleia is generally regarded as the native country of the celebrated painter Zeuxis, though there is much doubt to which of the numerous cities of the name that distinguished artist really owed his birth. [*Biogr. Dict.* art. ZEUXIS.] But the flourishing state of the arts in the Lucanian Heracleia (in common with most of the neighbouring cities of Magna Graecia) is attested by the beauty and variety of its coins, some of which may deservedly be reckoned among the choicest specimens of Greek art; while their number sufficiently proves the opulence and commercial activity of the city to which they belong. (Eckhel, vol. i. p. 153; Millingen, *Numismatique de l'Anc. Italie*, p. 111.) [E. H. B.]

COIN OF HERACLEIA IN LUCANIA.

HERACLEIA, surnamed MINOA (Ἡράκλεια Μινῴα: *Eth.* Ἡρακλεώτης, Heracliensis), in Sicily, an ancient Greek city, situated on the south coast of the island, at the mouth of the river Halycus, between Agrigentum and Selinus. Its two names were connected with two separate mythological legends in regard to its origin. The first of these related that Hercules, having vanquished the local hero Eryx in a wrestling match, obtained thereby the right to the whole western portion of Sicily, which he expressly reserved for his descendants. (Diod. iv. 23; Herod. v. 43; Paus. iii. 16. § 5.) He did not, however, found a town or settlement; but, somewhat later, Minos, king of Crete, having come to Sicily in pursuit of Daedalus, landed at the mouth of the river Halycus, and founded there a city, to which he gave the name of Minoa; or, according to another version of the story, the city was first established by his followers, after the death of Minos himself. Heraclides Ponticus adds, that there was previously a native city on the spot, the name of which was Macara. (Diod. iv. 79, xvi. 9; Herael. Pont. § 29.) The two legends are so distinct that no intimation is given by Diodorus of their relating to the same spot, and we only learn their connection from the combination in later times of the two names. The first notice of the city which we find in historical times represents it as a small town and a colony of Selinus, bearing the name of Minoa (Herod. v. 46); but we have no account of its settlement. It was in this state when Dorieus the Spartan (brother of Cleomenes I.) came to Sicily, with a large body of followers, with the express view of reclaiming the territory which had belonged to his ancestor Hercules. But having engaged in hostilities with the Carthaginians and Segestans, he was defeated and slain in a battle in which almost all his leading companions also perished. Eurykon, the only one of the chiefs who escaped, made himself master of Minoa, which now, in all probability, obtained for the first time the name of Heracleia. (Herod. v. 42—46.) This is not, indeed, expressly stated by Herodotus, who gives the preceding narrative, but is evidently implied in his statement at the beginning of it, that Dorieus set out for the purpose of founding Heracleia, combined with the fact that Diodorus represents him as having been its actual founder. (Diod. iv. 23.) Hence there seems no reason to suppose (as has been suggested) that Heracleia and Minoa were originally distinct cities, and that the name of the one was subsequently transferred to the other. From the period of this new settlement (B.C. 510) it seems to have commonly borne the name of Heracleia, though coupled with that of Minoa for the sake of distinction (Ἡράκλειαν τὴν Μινῴαν, Pol. i. 25; "Heraclea, quam vocant Minoa," Liv. xxiv. 35.)

Diodorus tells us that the newly founded city of Heracleia rose rapidly to prosperity, but was destroyed by the Carthaginians, through jealousy of its increasing power. (Id. iv. 23.) The period at which this took place is uncertain. It was probably related by Diodorus in his 10th book, which is now lost: at least he makes no mention of any such event on occasion of the great expedition of Hamilcar, in B.C. 480, to which epoch we might otherwise have referred it; while, from the absence of all notice of Heracleia during the subsequent century, and the wars of Dionysius with the Carthaginians, it seems certain that it did not then exist, or must have been in a very reduced condition. Indeed, the next notice we find of it (under the name of Minoa), in B.C. 357, when Dion landed there, represents it as a small town in the Agrigentine territory, but at that time subject to Carthage. (Diod. xvi. 9; Plut. *Dion.* 25.) Here it is probable that the treaty between Dionysius and the Carthaginians which had fixed the Halycus as the boundary of the latter, had left Heracleia, though on its left bank, still in their hands: and in accordance with this, we find it stipulated by the similar treaty concluded with them by Agathocles (B.C. 314), that *Heracleia*, Selinus, and Himera should continue subject to Carthage, *as they had been before*. (Diod. xix. 71.) From this time Heracleia reappears in history, and assumes the position of an important city; though we have no explanation of the circumstances that had raised it from its previous insignificance. Thus we find it, soon after, joining in the movement originated by Xenodicus of Agrigentum, B.C. 307, and declaring itself free both from the Carthaginians and Agathocles; though it was soon recovered by the latter, on his return from Africa. (Id. xx. 56.) At the time of the expedition of Pyrrhus it was once more in the hands of the Carthaginians, and was the first city taken from them by that monarch as he advanced westward from Agrigentum. (Diod. xxii. 10. Exc. H. p. 497.) In like manner, in the First Punic War it was occupied by the Carthaginian general Hanno, when advancing to the relief of Agrigentum, at first time besieged by the Roman armies, B.C. 260. (Id. xxiii. 8. p. 502; Pol. i. 18.) Again, in B.C. 256, it was at Heracleia that the Carthaginian fleet of 350 ships was posted for the purpose of preventing the passage of the Roman fleet to Africa, and where it sustained a great defeat from the consuls Regulus and Manlius. (Pol. i. 25—28. 30; Zonar. viii. 12.) It appears, indeed, at this time to have been one of the principal naval stations of the Carthaginians in Sicily; and hence in B.C. 249 we again find their admiral, Carthalo, taking his post there to watch for the Roman fleet which was approaching to the coast of Lilybaeum. (Id. i. 53.) At the close of the war Heracleia, of course, passed, with the rest of Sicily, under the Roman dominion; but in the Second Punic

Digitized by Google

War it again fell into the hands of the Carthaginians, and was one of the last places that still held out against Marcellus, even after the fall of Syracuse. (Liv. xxiv. 35, xxv. 27, 40, 41.)

We hear but little of it under the Roman dominion; but it appears to have suffered severely in the Servile War (B. C. 134—132), and in consequence received a body of fresh colonists, who were established there by the praetor P. Rupilius; and at the same time the relations of the old and new citizens were regulated by a municipal law, which still subsisted in the time of Cicero. (Cic. *Verr.* ii. 50.) In the days of the great orator, Heracleia appears to have been still a flourishing place (Ib. v. 33); but it must soon after have fallen into decay, in common with most of the towns on the southern coast of Sicily. (Strab. vi. p. 272.) But though not noticed by Strabo among the few places still subsisting on this coast, it is one of the *three* mentioned by Mela; and its continued existence is attested by Pliny and Ptolemy. The latter author is the last who mentions the name of Heracleia: it appears to have disappeared before the age of the Itineraries. (Mel. ii. 7. § 16; Plin. iii. 8. s. 14; Ptol. iii. 4. § 6.)

The site of Heracleia is now wholly deserted, and scarcely any ruins remain to mark the spot; but the position of the ancient city may still be clearly traced. It was situated a few hundred yards to the south of the river *Platani* (the ancient Halycus), extending nearly from thence to the promontory of *Capo Bianco*. In Fazello's time the foundations of the walls could be distinctly traced, and, though no ruins remained standing, the whole site abounded with remains of pottery and brickwork. An aqueduct was then also still visible between the city and the mouth of the river; but its remains have since disappeared. The site does not appear to have been examined with care by any modern traveller. (Fazell. *de Reb. Sic.* vi. 2; Smyth's *Sicily*, p. 216; Biscari, *Viaggio in Sicilia*, p. 188.)

The *Capo Bianco*, a conspicuous headland in the immediate neighbourhood of Heracleia, is evidently the one called by Strabo, in his description of the coasts of Sicily, the Heracleian promontory (vi. p. 266), which he correctly reckons 20 miles distant from the port of Agrigentum. [E. H. B.]

HERACLEIA PERINTHUS. [PERINTHUS.]

HERACLEIA, in Gallia Narbonensis. Pliny (iii. 5) has preserved a tradition of a town named Heraclea, at the mouths of the Rhone; but he knew no more about it, and we can add nothing to what he knew. Ukert (*Gallien*, p. 418) has a few words on this place.

Stephanus (*s. v.* Ἡράκλεια) in his list of towns named Heracleia mentions one in Celtice. The Maritime Itin., proceeding west from Forum Julii (*Fréjus*), places "Sambracitanus Plagia" 25 M. P. from Forum Julii, and Heraclea Caccabaria 16 M. P. from the Sinus Sambracitanus. D'Anville follows Honoré Bouche in placing Heracleia at *S. Tropez;* but in order to do this he suppresses the number 25 between Forum Julii and Sinus Sambracitanus, and assumes that 16 is the whole distance between Forum Julii and Heracleia. This is a very bad way of proceeding; for, unless he can prove some error in the MSS., he ought to assume that the distances along the coast are most correctly measured in the Itinerary, as they doubtless were. Walckenaer fixes Heracleia at the *Pointe Cavalaire*. *S. Tropez* is within the Sinus Sambracitanus. A complete map of this coast is necessary for the purposes of comparative geography. This Heracleia is one of the Greek towns on the south coast of France. [G. L.]

HERACLEIA (Ἡράκλεια). II. *In Asia.*

HERACLEIA (Ἡράκλεια). 1. A town of Caria of uncertain site. (Strab. xiv. p. 658; Steph. B. *s. v.*) Ptolemy (v. 2. § 19) describes it by the addition πρὸς Ἀλάβανδῳ. (Comp. Plin. v. 29; Suid. and Eudoc. *s. v.*, where the town has the surname Ἀλάβανδη.) This town should not be confounded with the following.

2. A town on the confines between Caria and Ionia, which is generally described as πρὸς Λάτμῳ, or ἡ ὑπὸ Λάτμῳ, from its situation at the western foot of mount Latmus, on the Sinus Latmicus. It was a small place in the south-east of Miletus, and south-west of Amazon, and was sometimes designated simply by the name Latmus. In its neighbourhood a cave was shown with the tomb of Endymion. (Scylax, p. 39; Strab. xiv. p. 635; Ptol. v. 2. § 9; Plin. v. 31; Polyaen. vii. 23; Paus. v. 1. § 4; Schol. *ad Apollon. Rhod.* iv. 57.) Ruins of this town still exist at the foot of mount Latmus on the borders of lake Baffi, which is probably a portion of the ancient Sinus Latmicus, formed by the deposits of the river Maeander. (Comp. Leake, *Asia Minor*, p. 239; Fellowes, *Exc. in As. Min.* p. 263, who, confounding the lake of Baffi with that of Myus, considers the ruins of Heracleia to be those of Myus.)

3. A town on the coast of Aeolis, opposite to Hecatonnesi. This town and the neighbouring Coryphantis are called villages of the Mytilenaeans. (Strab. xiii. p. 607; Plin. v. 32, who speaks only of a *Heracleotes tractus;* Steph. B. *s. v.*)

4. Surnamed *Pontica*, on the coast of Phrygia, in the country of the Mariandyni, was a colony of the Megarians, in conjunction with Tanagraeans from Boeotia. (Paus. v. 26. § 6; Justin. xvi. 3.) Strabo (xii. p. 542) erroneously calls the town a colony of Miletus. It was situated a few miles to the north of the river Lycus, and had two excellent harbours, the smaller of which was made artificially. (Xen. *Anab.* vi. 2. § 1; Diod. xiv. 31; Arrian, *Peripl.* p. 15; Memnon, p. 52.) Owing to its excellent situation, the town soon rose to a high degree of prosperity, and not only reduced the Mariandyni to subjection, but acquired the supremacy of several other Greek towns in its neighbourhood; so that, at the time of its highest prosperity, it ruled over the whole territory extending from the Sangarius in the west to the Parthenius in the east. A protracted struggle between the aristocracy and the demos (Aristot. *Polit.* v. 5) at last obliged the inhabitants to submit to a tyrannis. In the reign of Dionysius, one of these tyrants, who was married to a relation of Darius Codomannus, Heracleia reached the zenith of its prosperity. But this state of things did not last long; for the rising power of the Bithynian princes, who tried to reduce that prosperous maritime city, and the arrival of the Galatians in Asia, who were instigated by the kings of Bithynia against Heracleia, deprived the town gradually of a considerable part of its territory. Still, however, it continued to maintain a very prominent place among the Greek colonies in those parts, until, in the war of the Romans against Mithridates, it received its death blow; for Aurelius Cotta plundered and partly destroyed the town (Memnon, c. 54). It was afterwards indeed restored, but remained a town of no importance ("oppidum," Plin. vi. 1; comp. Strab. xii. p. 543; Scylax, p. 34; Ptol. v. 1. § 7; Marcian. pp. 70, 73; Schol. *ad Apollon. Rhod.* ii. 748, *ad Nicand. Alex.* 13; Eustath. *ad Dionys. Per.* 791)

Digitized by Google

Heracleia, which was the birthplace of Heraclides Ponticus and his disciple Dionysius Metathemenus, still exists under the name of *Herakie* or *Erekli*. For the history of this important colony see Justin, xvi. 3—5; Polsberw, *de Rebus Heracleae*, Brandenburg, 1833, 8vo. (Niebuhr, *Lect. on Anc. Hist.* iii. pp. 113, fol.)

COIN OF HERACLEIA IN BITHYNIA.

5. A town of uncertain site in Lydia, perhaps not far from Magnesia at the foot of mount Sipylus. From this town the magnet derived its name of *Heracleus lapis*. (Steph. B. *s. v.*; Hesych. *s. v.*; Zenob. *Prov.* ii. 22, p. 90, ed. Leutsch.) [L. S.]

HERACLEIA (Ἡράκλεια, Strab. xvi. p. 751; Plin. v. 20), a small town on the coast of N. Syria to the N. of Laodicea-ad-Mare (*Ladikiyéh*). Pococke (*Trav.* vol. ii. pt. i. p. 194) has identified it with *Meinet Borja*, the small town and half-ruined port from which salt and wheat are brought from Cyprus (comp. Chesney, *Exped. Euphrat.* vol. i. p. 453), and found, on the small flat point that makes out into the sea, several graves cut into the rock, some stone coffins, and pieces of marble pillars; to the N. he saw some remains of piers built into the sea, of foundations of walls of large hewn stones, and signs of a strong building at the end of the pier. (Ritter, *Erdkunde*, vol. xv. pt. i. p. 99.) [E. B. J.]

HERACLEIA PARTHIAE (Ἡράκλεια, Strab. xi. p. 514). Strabo mentions a town of this name, which he places, together with Apameia, in the direction of Rhagae. Nothing certain is known about it; but it has been conjectured by Forbiger that it is the same as a town of the same name mentioned by Pliny, which was founded by Alexander the Great, and subsequently, when destroyed, was named by Antiochus, Achais (vi. 16. s. 18). [V.]

HERACLEIUM (Ἡράκλειον). 1. A town on the north coast of the Chersonesus Taurica; it was situated on the coast of the Palus Maeotis, near Parthenium, but its exact site is unknown. (Strab. xi. p. 494; Ptol iii. 6. § 4.)

2. A promontory on the east coast of the Euxine, south of cape Toretice, and 150 stadia north of the mouth of the river Achaeus. (Arrian, *Peripl.* p. 79.)

3. A cape and town on the same coast of the Euxine, 150 stadia south of the mouth of the Achaeus. (Arrian, *Peripl.* p. 78.) Pliny (vi. 5) mentions Heracleium on this coast as 70 miles distant from Sebastopolis; but, although we have no means of ascertaining whether this or the other Heracleium be meant, the distance renders it probable that Pliny is speaking of the Heracleium south of the Achaeus.

4. A promontory and river on the same coast of the Euxine, between the rivers Phasis in the north and the Bathys in the south. (Plin. vi. 4.)

5. A promontory and port-town on the coast of Pontus, between Amisus and Polemonium. (Strab. xii. p. 548: Ἡράκλειος ἄκρα: Ptol. ii. 3. § 3: Ἡρακλέους ἄκρον: Arrian, *Peripl.* p. 73: Apollon. Rhod. ii. 969). The modern name is *Thermeh*.

6. The name of the arx of the town of Cnidus in Caria, which was taken and destroyed by Ptolemy of Egypt in his expedition against Asia Minor. (Diod. Sic. xx. 27.)

7. A small town in the district Cyrrhestica, between mount Amanus and the Euphrates: near this place the Parthian Pacorus was defeated by the Roman general Ventidius. (Strab. xvi. p. 751.) [L. S.]

HERACLEIUM (Ἡράκλειον, Ptol. iii. 17. § 6), a place in Crete, which Strabo (x. pp. 476, 484) calls the port of Cnossus, was situated, according to the anonymous coast-describer (*Stadiasm.*), at a distance of 20 stadia from that city. The name HERACLEIA (Ἡράκλεια, comp. Plin. iv. 20) is simply mentioned by Stephanus of Byzantium as the 17th of the 23 Heracleias he enumerates. Although the ecclesiastical notices make no mention of this place as a bishop's see, yet there is found among the subscriptions to the proceedings of the General Seventh Council held at Nicaea, along with other Cretan prelates, Theodoros, bishop of Heracleopolis. (Comp. *Creta Sacr.* vol. i. p. 254.) Mr. Pashley (*Trav.* vol. i. p. 263) has fixed the site at a little rocky hill to the W. of *Kakou-óros*. There are remains of buildings, probably of no earlier date than the Venetian conquest, but the position agrees with the indications of the ancients. [E. B. J.]

HERACLEIUS, river. [BUTLIS.]

HERACLEOPO'LIS MAGNA (Ἡρακλέους πόλις μεγάλη or ἡ ἄνω, Ptol. iv. 5. § 7: Steph. B. *s. v.*; Strab. xvii. pp. 789, 809, 812; Hercules Oppidum, Plin. v. 9. § 9, 11: *Eth.* Ἡρακλεοπολίτης), was the capital of the Nomos Heracleotes in Middle Egypt. It was situated at the entrance of the valley of the Fyoum (Nomos Arsinoites), on an island formed by the Nile, the *Bahr Jusuf*, and a canal. After Memphis and Heliopolis it was probably the most important city south of the Thebaid. When in the eighth dynasty of kings Memphis apparently lost its pre-eminence, the Aegyptian monarchy passed over, in the first instance, to Heracleopolis, before it was established at Thebes. The Lists of Manetho exhibit two dynasties of Heracleopolite kings, the ixth and xth, each containing nineteen names. But we know the appellation of the founder of them alone, Achthoes, a ferocious tyrant, who went mad and was destroyed by a crocodile. Centuries afterward the crocodeinumon was worshipped at Heracleopolis, from which we may infer that the hostility to the crocodile was handed down. (Agatharch. *ap. Photium*, p. 1353. R.; Aelian, *Hist. An.* x. 47.) It is probable that under these dynasties commenced at least those great works which tradition connected with the name of Moeris, and that the canal and terraces of the Arsinoite nome were their works. The Heracleote nome partook, indeed, of the exuberant fertility of the Fyoum district. Under the Lower empire it formed part of the Roman prefecture of Africa. (*Not. Dign. Imp.*) Its ruins are inconsiderable; the modern hamlet of *Anasieh* covers a portion of them. (Ritter, *Erdkunde*, vol. i. p. 789.) [W. B. D.]

HERACLEOPO'LIS PARVA (ἡ κατὰ or Ἡρακλέους πόλις μικρά, Ptol. iv. 5. § 56; Joseph. *Bell. Jud.* iv. 11. § 5; Steph. B. *s. v.*; Heraclea, *It. Anton.* p. 152; Heraclium, *Tab. Peut.*), is mentioned only in the later times of Egyptian history. It stood near Pelusium, in the Sethroite nome, and beyond the westernmost branch of the Delta. Here it appears to have been sometimes denominated Sethrum (Σέθρον, Steph. B. *s. v.*), and regarded as the capital of the nome. It was about 22 miles

Digitized by Google

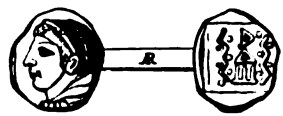
from Tanis. Its ruins are now covered by the lake *Menzaleh*, near whose western border it was probably situated. (Champollion, *L'Egypte*, vol. ii. p. 130; D'Anville, *Mém. sur l'Egypte*, p. 96.) [W. B. D.]

HERACLEUSTIBUS, the name of a station in the Jerusalem Itinerary, 11 M. P. from Apollonia. Tafel (*de Viae Egnat. Part. Orient.* p. 6) has conjectured that it is equivalent to Ἡρακλέους στίβος. [E. B. J.]

HERAEA (Ἡραία: *Eth.* Ἡραιεύς, Ἡραεύς, in an ancient inscription Ἡραιῶος: the territory Ἡραιᾶτις), the most important Arcadian town on the Lower Alpheius, was situated near the frontiers of Elis, and on the high road from Arcadia to Olympia. It is said to have been founded by Heraeeus, a son of Lycaon, and to have been called originally Solygorgus. (Paus. viii. 26. § 1; Steph. B. *s. v.* Ἡραία.) At an early period the Heraeans concluded a treaty with the Eleians for mutual protection and support for one hundred years; the original of which treaty, engraven on a bronze tablet in the old Peloponnesian dialect, was brought from Olympia by Gell, and is now in the Payne Knight collection in the British Museum. This treaty is placed about the 50th Olympiad, or B. C. 580, since it belongs to a time when the Eleians exercised an undisputed supremacy over the dependent districts of Pisatis and Triphylia; and the Heraeans consequently were anxious to avail themselves of their support. (For a copy of the inscription see Leake, *Peloponnesiaca*, p. 1; Böckh, *Inscr.* no. 11, vol. i. p. 26.) Heraea was, at that time, the chief village among eight others which lay scattered upon the banks of the Alpheius and its tributaries the Ladon and Erymanthus; but the inhabitants of these separate villages were transferred to Heraea, and a city there was founded by the Spartan king Cleombrotus or Cleonymus. (Strab. viii. p. 337.) In consequence of their close connection with Sparta, the Heraeans incurred the hostility of the other Arcadians, who laid waste their territory in B. C. 370. (Xen. *Hell.* vi. 5. § 22.) At a later time Heraea was a member of the Achaean League; and, as Elis was one of the chief places of the Aetolian League, it is frequently mentioned in the contests between these two powers. (Polyb. ii. 54, iv. 77, seq.) It was afterwards in the hands of Philip, but it was restored to the Achaeans. (Liv. xxviii. 8, xxxii. 5, xxxiii. 34; Polyb. xviii. 25, 30.) Heraea is mentioned by Strabo (viii. p. 388) as one of the deserted cities of Arcadia; but when it was visited by Pausanias, it was still a place of some importance. The latter writer describes its temples, baths, plantations of myrtles and other trees along the banks of the Alpheius: among its temples he mentions two sacred to Dionysus, one to Pan, and another to Hera, of the latter of which only some ruins were left. (Paus. viii. 26. §§ 1, 2.)

The site of Heraea is fixed by its distance from the mouth of the Ladon, which, according to Pausanias, was 15 stadia. The same writer says that the greater part of the city lay upon a gently sloping hill, and the remainder upon the banks of the Alpheius. The remains of Heraea are visible on a hill west of the village of *Aiánni* (St. John), bounded on either side by a ravine, and sloping down towards the river. These ruins extend along the summit of the hill and the slope towards the river; but they are inconsiderable, and have for the most part been cleared away in consequence of the fertility of the land. A sweetish red wine is grown upon the spot, which Leake says has more flavour and body than almost any other he met with in the Morea. This wine was also celebrated in antiquity, and was said to make women fruitful. (Theophr. *H. Pl.* ix. 20; Athen. i. p. 31; Plin. xiv. 18. s. 22; Aelian, *V. H.* xiii. 6.)

Heraea was favourably situated in several respects. Its territory was fertile, and it was situated, as we have already said, on the high road from Olympia into the interior of Arcadia. From the north of Arcadia a road led into the valley of the Alpheius, near Heraea; and two roads led into the Heraeatis, one from Megalopolis, and the other from Messene and Phigalia, which joined the former close to the town. There was a bridge over the Alpheius close to Heraea, which Philip restored in B. C. 219. (Polyb. iv. 77, 78.) The Heraeatis was separated from Pisatis by the river Erymanthus, and from the territory of Megalopolis by the river Buphagus. (Gell, *Itiner. of the Morea*, p. 113; Leake, *Morea*, vol. ii. p. 91; Boblaye, *Recherches, &c.* p. 159; Curtius, *Peloponnesos*, vol. i. p. 363, seq.)



COIN OF HERAEA.

HERAEI MONTES (τὰ Ἡραῖα ὄρη), a group or range of mountains in Sicily, mentioned by Diodorus (iv. 84), who describes in glowing colours the pleasant shaded valleys in which they abounded, the rich forests with which they were covered, and the abundance of wild fruits they produced. He gives no clue to their position, and they are not mentioned by any of the geographers in their descriptions of the island: but Vibius Sequester tells us (p. 8) that the river Chrysas had its source in the Heraean mountains; and this shows that they must have formed part of the range which occupies the whole north of Sicily, from the neighbourhood of Messana to that of Panormus. The natural beauties of this mountain tract accord well with the description of Diodorus, whence the name of Cale Acte, "the beautiful shore," was given to the N. coast of Sicily, which extends along the foot of the range: and Fazello describes the fertility and pleasantness of their southern slopes in terms which fully justify the rhetorical praises of Diodorus (Fazell. ix. 4. p. 385). The great contrast presented by the whole of this range of mountains, to the dry and bare calcareous hills of the centre and south of Sicily, can indeed leave no doubt as to their being those intended by that author. It is impossible, however, to fix the precise limits within which the term was applied. The lofty mass of the *Monte Madonia*, the Mons Nebrodes of the ancients, is in fact only a portion of the same chain, while on the E. the continuation of the range, towards Messana and the promontory of Pelorus, appears to have been designated as the Mons Neptunius. The central portion of the range, between *Caronia* and *Traina*, is still covered with an immense forest, now called the *Bosco di Caronia*: the highest summit of this group, *Monte Sori*, attains an elevation of nearly 3000 feet above the sea.

It is certainly erroneous to extend the name of the Heraei Montes, as has been done by Cluver and

Digitized by Google

Parthey, not only to the mountains about Enna, but to the great calcareous hills which extend from thence to the S.E. and fill up the greater part of the *Val di Noto*. The natural characters of that part of Sicily must always have been essentially different from those of the mountainous region of the north. [E. H. B.]

HERAEUM (Ἡραῖον: *Karauli*), a town on the Thracian coast of the Propontis, a little to the east of Bisanthe. (Herod. iv. 90; Steph. B. *s. v.*) In some of the Itineraries, the place is called *Hiereum* or *Ereon*. [L. S.]

HERAEUM. [CORINTHUS, p. 685, b.]

HERA'TEMIS (Ἡράτεμις, Arrian, *Ind.* c. 39), a canal in Persis, mentioned by Arrian as cut from a larger river at no great distance. This river was probably the Padargus mentioned in the same chapter by the Greek historian. The canal terminated at the sea; but we are not aware that any traces of it now remain, unless the *Khore-esseri* of D'Anville's map represents it, which is possible. [V.]

HERBANUM, a town of Etruria, the name of which is found only in Pliny's list of the towns in the interior of that country. (Plin. iii. 5. s. 8.) It has been generally assumed, but entirely without authority, to be the place called Urbs Vetus by Paulus Diaconus (iv. 33), a name which has been probably corrupted into that of the modern city of *Orvieto*. The Urbiventum of Procopius (Οὐρβίεντον, *B. G.* ii. 20), which he describes as a strong fortress, very difficult of access, is probably the same place with the Urbs Vetus of Paulus. *Orvieto* certainly occupies the site of an ancient Etruscan town, as is proved by tombs and antiquities discovered there, and the name of Urbs Vetus could obviously not have been the original one; but the identification of Urbs Vetus with Herbanum is mere conjecture. (Dennis, *Etruria*, vol. i. p. 526.) [E. H. B.]

HERBESSUS. [ERBESSUS.]

HE'RBITA (Ἕρβιτα, Steph. B., Ptol.: *Eth.* Ἑρβιταῖος, Herbitensis), a city of the interior of Sicily, in the northern part of the island, and on the southern slope of the Heraean mountains. It was a city of the Sicanians, and is first mentioned about 445 B.C., when it was subject to the rule of a prince, or despot, named Archonides, who co-operated with Ducetius, chief of the Siculi, in founding his new settlement at Cale Acte. (Diod. xii. 8.) [CALACTE.] In B.C. 403, it was besieged by Dionysius of Syracuse, but without effect; and several years after we find it still maintaining its independence against that monarch. Meanwhile Archonides, who was still ruler of the city, proceeded to extend his power by founding the colony of Alaesa, on the north coast of the island. (Diod. xiv. 15, 16, 78.) Diodorus tells us that the citizens of Alaesa, having subsequently attained to great prosperity [ALAESA], disdained to acknowledge their descent from so inferior a city as Herbita; but the latter seems to have been by no means an unimportant place. Its name does not again occur in history, but Cicero calls it "honesta et copiosa civitas" (*Verr.* iii. 32); it had a fertile and extensive territory, which was cultivated with great care, and produced abundance of corn: the inhabitants were diligent and active agriculturists (summi aratores), and a quiet, frugal race. They, however, suffered severely from the exactions of Verres; so that the number of the cultivators (aratores) was reduced from 257 to 120, and their territory rendered almost desolate. (Cic. *Verr.* iii. 18, 32—34, 61.) Herbita is still mentioned among the towns of Sicily both by Pliny and Ptolemy: but after this all trace of it disappears, and the data for fixing its position are sufficiently vague. Ptolemy appears to place it between Agyrium and Leontini, but the other towns with which it is associated by Cicero and Diodorus would point to a more northerly position: and Cluverius is probably right in placing it at *Nicosia*, a town about 10 miles NW. of *S. Filippo d'Argirò* (Agyrium), or rather at a place called *Sperlinga*, about 2 miles W. of it, in a more elevated situation, and now uninhabited. (Plin. iii. 8. s. 14: Ptol. iii. 4. § 13; Cluver. *Sicil.* p. 329.) [E. H. B.]

HERCULA'NEUM (the form Herculanum appears to be erroneous: in the passage of Cicero (*ad Att.* vii. 3. § 1) generally cited in support of it the true reading seems to be "Aeculanum:" see Orell. *ad loc.* Ἡράκλειον, Strab.: Ἡρακλάνειον, Dion Cass.: *Eth.* Herculanensis: *Ercolano*), a town of Campania, situated on the gulf called the Crater (the *Bay of Naples*), and at the foot of Mt. Vesuvius. The circumstances attending its discovery have rendered its name far more celebrated in modern times than it ever was in antiquity, when it certainly never rose above the condition of a second-class town. It was, however, a place of great antiquity: its origin was ascribed by Greek tradition to Hercules, who was supposed to have founded a small city on the spot, to which he gave his own name. (Dionys. i. 44.) Hence it is called by Ovid "Herculea urbs" (*Met.* xv. 711). But this was doubtless a mere inference from the name itself, and we have no account of any Greek colony there in historical times, though it is probable that it must have received a considerable mixture at least of a Greek population, from the neighbouring cities of Neapolis or Cumae: and there is no doubt of the extent to which Greek influences had pervaded the manners and institutions of its inhabitants, in common with those of all this part of Campania. Strabo's account of its early history is confused: he tells us it was at first occupied (as well as its neighbour Pompeii) by Oscans, afterwards by Tyrrhenians and Pelasgians, and after this by the Samnites. (v. p. 247.) It is doubtful whether he here means by Tyrrhenians the Etruscans, or rather uses the two names of Tyrrhenians and Pelasgians as nearly synonymous: but there seems no reason to doubt the fact that Herculaneum may have been at one time a Pelasgic settlement, and that its population, previous to its conquest by the Samnites, was partly of Pelasgic and partly of Oscan extraction. Its name, and the legends which connected it with Hercules, may in this case have been originally Pelasgic, and subsequently adopted by the Greeks. It fell into the hands of the Samnites in common with the rest of Campania (Strab. *l. c.*): and this is all that we know of its history previous to its passing under the Roman dominion. Nor have we any particular account of the time at which this took place; for the Herculaneum mentioned by Livy (x. 45) as having been taken by the consul Carvilius from the Samnites in B.C. 293, must certainly be another town of the name situated in the interior of Samnium, though we have no further clue to its position. The only occasion on which it plays any part in history is during the Social War, when it took up arms against the Romans, but was besieged and taken by P. Rutilius, supported by a Hirpinian legion under Minatius Magius. (Vell. Pat. ii. 16.) It has been supposed that a body of Roman colonists was afterwards established there by Sulla (Zumpt, *de Col.* p. 259), but there is no proof of this. It seems, however, to have

Digitized by Google

been certainly a place of some importance at this time: it enjoyed the rights of a municipium and appears to have been well fortified, whence Strabo calls it a fortress (φρούριον): he describes it as enjoying a peculiarly healthy situation, an advantage which it owed to its slightly elevated position, on a projecting headland. (Strab. v. p. 246.) The historian Sisenna also, in a fragment preserved by Nonius (iii. p. 207. *s. v.* Fluvius), describes it as situated on elevated ground between two rivers. Its ports also were among the best on this line of coast. (Dionys. i. 44.) It is probable that, when the shores of the beautiful bay of Naples became so much frequented by the Romans, many of them would have settled at Herculaneum, or in its immediate neighbourhood, and its municipal opulence is sufficiently proved by the results of recent discoveries; but though its name is mentioned by Mela and Florus, as well as by Pliny, among the cities of the coast of Campania, it is evident that it never rose to a par with the more flourishing and splendid cities of that wealthy region. (Mela, ii. 4. § 9; Flor. i. 16. § 6; Plin. iii. 5. s. 9.) It is important to bear this in mind in estimating the value of the discoveries which have been made upon the site.

In the reign of Nero (A. D. 63) Herculaneum suffered severely from an earthquake, which laid great part of the city in ruins, and seriously damaged the buildings that remained standing. (Senec. *N. Qu.* vi. 1.) This was the same earthquake which nearly destroyed Pompeii, though it is referred by Tacitus to the preceding year. (*Ann.* xv. 22.) Sixteen years later, in the reign of Titus (A. D. 79), a still more serious calamity befell both cities at once, the memorable eruption of Vesuvius in that year having buried them both under the vast accumulations of ashes, cinders, and volcanic sand poured forth by that mountain. (Dion Cass. lxvi. 24.) Herculaneum, from its position at the very foot of the mountain, would naturally be the first to suffer; and this is evident from the celebrated letter of the younger Pliny describing the catastrophe, which does not however mention either Herculaneum or Pompeii by name. (Plin. *Ep.* vi. 16, 20.) But Retina, where the elder Pliny first attempted to land, but was prevented by the violence of the eruption, was in the immediate neighbourhood of the former city. Its close proximity to Vesuvius was also the cause that the bed of ejected materials under which Herculaneum was buried assumed a more compact and solid form than that which covered Pompeii, though it is a mistake to suppose, as has been stated by many writers, that the former city was overwhelmed by a stream of lava. The substance with which it is covered is only a kind of volcanic tuff, formed of accumulated sand and ashes, but partially consolidated by the agency of water, which is often poured out in large quantities during volcanic eruptions. (Daubeny *on Volcanoes*, p. 222, 2nd edit.) The destruction of the unfortunate city was so complete that no attempt could be made to restore or rebuild it: but it appears that a small population gradually settled once more upon the site where it was buried, and hence we again meet with the name of Herculaneum in the Itineraries of the 4th century. (*Tab. Peut.*) This later settlement is supposed to have been again destroyed by the eruption of Vesuvius in A. D. 472; and no trace is subsequently found of the name.

Though the position of Herculaneum was clearly fixed by the ancient authorities on the coast between Neapolis and Pompeii, and at the foot of Vesuvius, its exact site remained long unknown; it was placed by Cluverius at *Torre del Greco*, nearly two miles too far to the E. (Cluver. *Ital.* p. 1154.) But in 1738 the remains of the theatre were accidentally discovered in sinking a well, in the village of *Resina;* and excavations, being from this time systematically carried on, have brought to light a considerable portion of the ancient city, including the Forum, with two adjacent temples and a Basilica. Unfortunately, the circumstance that the ground above the site of the buried city is almost wholly occupied by the large and populous villages of *Resina* and *Portici* has thrown great difficulties in the way of these excavations, which have been carried on wholly by subterranean galleries; and even the portions thus explored have been for the most part filled up again with earth and rubbish, after they had been examined, and the portable objects found carried off. The consequence is, that while the works of art discovered here far exceed in value and interest those found at Pompeii, and the bronze statues especially form some of the choicest ornaments of the Museum at Naples, the remains of the city itself possess comparatively little interest. The only portion that remains accessible is the theatre, a noble edifice, built of solid stone, in a very massive style; it has 18 *cunei*, or rows of seats, and is calculated to have been capable of containing 8000 persons. Fragments discovered in it prove that it was adorned with equestrian statues of bronze, as well as with two chariots or bigae in gilt bronze; and several statues both in bronze and marble have been extracted from it. For this splendid edifice, as we learn from an inscription over the entrance, the citizens of Herculaneum were indebted to the munificence of a private individual, L. Annius Mammianus Rufus: the date of its erection is unknown; but it could not have been earlier than the period of the Roman empire, and the building had consequently existed but a short time previous to its destruction. From the theatre a handsome street, 36 feet in breadth, and bordered on both sides by porticoes, led to a large open space or forum, on the N. side of which stood a Basilica of a noble style of architecture. An inscription informs us that this was erected at his own cost by M. Nonius Balbus, praetor and proconsul, who at the same time rebuilt the gates and walls of the city. No part of these has as yet been discovered, and the plan and extent of the ancient city therefore remain almost unknown. Not far from the Basilica were discovered two temples, one of which, as we learn from an inscription, was dedicated to the Mother of the Gods (Mater Deum), and had been restored by Vespasian after the earthquake of A. D. 63. Another small temple, at a short distance from the theatre, apparently dedicated to Hercules, was remarkable for the number and beauty of the paintings with which the walls were adorned, and which have been from thence transported to the Museum at Naples. At some distance from these buildings, towards the W., and on the opposite side of a small ravine or watercourse, was found a villa or private house of a most sumptuous description; and it was from hence that many of the most beautiful statues which now adorn the Neapolitan Museum were extracted. Still more interest was at first excited by the discovery in one of the rooms of this villa of a small library or cabinet of MSS. on rolls of papyrus, which, though charred and blackened so as to be converted into a substance resembling charcoal, were found to be

Digitized by Google

still legible. But the hopes at first entertained that we should here recover some of the lost literary treasures of antiquity have been signally disappointed, the works discovered being principally treatises on the Epicurean philosophy of very little interest.

A full account of the early excavations and discoveries at Herculaneum will be found in Venuti (*Prime Scoverte di Ercolano*, 4to. Roma, 1748), and in the more recent work of Iorio (*Notizie sugli Scavi di Ercolano*, 8vo. Naples, 1827). The works of art and other monuments discovered on the site, are figured and described in the magnificent work of *Le Antichità di Ercolano*, in 8 vols. folio, published at Naples, from 1757 to 1792. The inscriptions are given by Mommsen (*Inscr. Regn. Neap.* pp. 122—127); and an account of the papyri will be found prefixed to the work entitled *Herculanensium Voluminum quae supersunt*, of which only two volumes have been published, in 1793 and 1809. A summary account of the general results will be found in Romanelli (*Viaggio ad Ercolano*, 8vo. Naples, 1811), and in Murray's *Handbook for Southern Italy*. It is much to be regretted that the superior facilities afforded by Pompeii have for many years caused Herculaneum to be almost wholly neglected: even the excavations previously carried on were conducted without system, and no regular plans were ever taken of the edifices and portions of the city then explored.

The modern village of *Resina*, which now covers a large part of the ruins of Herculaneum, has evidently retained the name of RETINA, a place mentioned only in the letter of Pliny describing the great eruption of Vesuvius in A. D. 79. (Plin. *Ep.* vi. 16.) It appears to have been a naval station, where a body of troops belonging to the fleet at Misenum (Classiarii) were at that time posted, who applied in great terror to Pliny to extricate them from their perilous position. Hence, it is clear that it must have been close to the sea-coast, and probably served as the port of Herculaneum. The exact position of this cannot now be traced, for the whole of this line of coast has undergone considerable alterations from volcanic action. The point of the promontory on which the ancient city was situated is said to be 95 feet within the present line of coast; and the difference at other points is much more considerable. We learn from Columella (*R. R.* x. 135) that Herculaneum possessed salt-works, which he calls "Salinae Herculeae," on the coast to the E., immediately adjoining the territory of Pompeii. The Tabula marks a station, which it calls "Oplontis," between Herculaneum and Pompeii, 6 miles from the former town; but the name, which is otherwise unknown, is probably corrupt. [E. H. B.]

HERCULEUM FRETUM. [GADITANUM FRETUM.]

HERCULIS ARENAE (*αἱ τοῦ Ἡρακλέους Θῖνες*), a range of sand-hills in the NW. of Cyrenaica, behind Hesperides, containing the source of the river Lathon. (Ptol. iv. 4. §§ 8, 10.) They form the N. part of the *Jebel Barkah*, its S. part being the VELPI M. of Ptolemy. [P. S.]

HERCULIS COLUMNAE (*αἱ Ἡρακλέους στῆλαι, αἱ Ἡράκλειοι στῆλαι*, Strab. &c.; *Ἡρακλέους στάλαι, Ἡρακλεοι κίονες*, Pind.: Herculeae Columnae, Mel., Plin., &c.: Herculis Speculae, Flor. iv. 2: also simply Στῆλαι and Columnae: the *Pillars of Hercules*), is a name commonly understood now, as it was generally among the ancients, in one particular sense, namely, as denoting the twin rocks which guard the entrance of the Mediterranean (Mare Internum, &c.) at the E. extremity of the *Straits of Gibraltar* [GADITANUM FRETUM]: of which the one on the N. or European side was called CALPE, that on the S. or African side ABYLA. But this simple statement is far from containing a sufficient account of the meaning attached to the name by the Greeks and Romans.

Its origin goes back into the legendary period, and we are here again involved in the oft-recurring difficulty as to whether the legend was founded on a certain amount of knowledge, or whether, the legend being purely imaginary at first, a positive sense was given to it as geographical discovery advanced. It should be borne in mind that *columns*, as well as *altars*, were erected to mark the furthest points reached by conquerors and discoverers [ALEXANDRI ARAE]; and hence, in connection with the mythical expedition of Hercules to the extreme west, such memorials would be sought. In accordance with this view, we find Pillars of Hercules mentioned in other distant regions of the earth to which Hercules was supposed to have penetrated, namely, in the N. of Germany, and the W. extremity of Gaul. (Tac. *Germ.* 3. 34; Scymn. Ch. 188; Serv. *ad Virg. Aen.* xi. 262, where we have a parallel case in "the Pillars of Proteus" for the borders of Egypt.) Other examples are mentioned in the interesting discussion on this use of columns by Strabo (iii. pp. 170, 171). But there was also another reason to look for columns in those regions; for Aeschylus tells us of the "Pillar of Heaven and Earth," that is, the pillar which, resting on earth, supported the vault of heaven, and which was upborne by Atlas (*Prom.* 349, 425). That the Pillars of Hercules were identified by some with those of Atlas is proved by the fact that the former are also called the *Pillars of Kronos* and of *Briareus*, deities, like Atlas, of the Titan race. (Aristot. *ap.* Aelian, *V. H.* v. 3; Hesych. *s. v.* Βριάρεω στῆλαι; Eustath. *ad Dion. Per.* 561; Schol. Apoll. Rhod. i. 165; the Scholiast to Pindar, *Nem.* iii. 37, calls them the Pillars of Aegaeon, which is another name of Briareus; and elsewhere Briareus himself is called Hercules, Zenob. *Prov.* Cent. v. 48.)

But when the ancient writers began to investigate the matter more closely, they were greatly divided in opinion as to *where* the Pillars were to be sought, *what* they were, and *why* they were called by the name of Hercules.

1. The name is not found in Homer, although the manner in which he speaks of Ulysses's passage out of the sea into the ocean and back again, seems to imply that he had some knowledge of the Straits.

The earliest distinct mention of the Pillars of Hercules in Greek poetry is by Pindar, who more than once names them as the point to which the fame of his heroes reached, but beyond which no mortal could advance, whether he were wise or foolish; and in one passage he speaks of Gades in the same terms, thus evidently regarding the two positions as closely connected. (Pind. *Ol.* iii. 79. *Nem.* iii. 35, iv. 112, *Isthm.* iv. 20.) Herodotus, whose knowledge was derived from the records of Phoenician navigation, speaks of the Pillars with perfect familiarity, as of a well-known position, and the tenour of his remarks on those regions leaves little, if any doubt, that he placed them at the Straits. (Herod. iv. 42, 181, 185.) Scylax assigns to them the same position, at the mouth of the Mediterranean and near Gades. He places them at the distance of a day's journey from one another, and distinguishes

Digitized by Google

between the *Columns in Europe* and the *Columns in Libya*, using the plural by a kind of attraction, for, when he describes them more particularly, he speaks of each in the singular. (Scylax, pp. 1, 51, ed. Hudson; pp. 1, 120, 126, ed. Gronov.) From these testimonies, as well as from the numerous allusions of other writers, it appears that the common opinion had become pretty well established from the time of Herodotus. (Comp. Polyb. iii. 35; Diod. Sic. iv. 18; Dion. Per. 64, 454, and Eustath. *ad loc.*; Palaeph. 52; Philostr. *Vit. Apollon.* v. 1, 5, &c.) The same thing is evident from numerous passages of Strabo, who, in the course of a very interesting discussion on the whole subject, accounts for the various positions assigned to the Pillars as follows (iii. pp. 169—172). An oracle had commanded the Tyrians to found a colony at the Pillars of Hercules. The settlers sent out for this purpose, on arriving at the Straits, thought they had reached the term both of the inhabited world, and of the expedition of Hercules; and, taking the rocks of Calpe and Abyla for the Pillars of which they were in search, they landed at a spot within the Straits, where stood, in Strabo's time, the city of the Exitani [SAXETANUM]; but, finding the sacrifices inauspicious, they returned. Another party, sent out some time afterwards, proceeded 1500 stadia beyond the Straits, as far as an island sacred to Hercules, opposite to the spot on the Iberian coast where the city of ONOBA afterwards stood; but, again finding the sacrifices inauspicious, these also returned home. A third attempt had for its result the foundation of GADES. Hence it came to pass that some sought the Pillars in the headlands of the Straits, others at Gades, and others at some place even beyond Gades in the Ocean. The general opinion was in favour of Calpe and Abyla; but some, among whom was Artemidorus, took the Pillars to be the small islands near each, of which one was called the *Island of Hera*, by which he seems to mean the islands off *C. Trafalgar*, the ancient Junonis Prom., which headland the authors of this opinion seem to have confounded with Calpe. (Comp. the Note to Groskurd's translation, *l. c.*) Some even transferred the celebrated rocks called Planetae and Symplegades to the Straits, and identified them with the Pillars of Hercules. Scymnus Chius, who, like Artemidorus, took the Pillars for islands, places them far within the Straits, at MAENACA, near the city of the Exitani, above mentioned. (Vv. 142—145).

2. As to *what* the pillars were believed to be, Strabo also gives some interesting information. Some took them for rocky headlands, others for islands; the former rising up from the land, the latter out of the sea, like gigantic columns. But others, regarding the custom previously referred to, or even taking the word στῆλαι literally, looked for cities, or artificial mounds, or columns, or statues, erected either by Hercules himself, to mark the term of his conquests, or dedicated by Phoenician navigators to this their tutelary deity, to record the extent of their discoveries. (Comp. Hesych. *s.v.* στῆλαι διστόμους.) This literal interpretation, he tells us, prevailed among the Iberians and Libyans, who denied that there was anything at the Straits resembling columns, but pointed out, as the Pillars of Hercules, the bronze columns in the temple of the god at Gades, on which the expenses of building the temple were inscribed. He adds that this opinion was held by Poseidonius, in opposition to the Greeks in general, who considered the pillars to mean *promontories*. Strabo's refutation of this opinion is an interesting effort of ancient criticism. (Comp. Strab. i. pp. 21, 32, 47, 49, 51, 52, 56, 58, 64, ii. pp. 67, 68, 71, 78, 79, 84, 86, 89, 90, 93, 101, 105, 108, &c. &c.) Not only the *nature*, but also the *number*, of the Pillars was disputed; the common opinion making them *two*, while others gave the number as *one*, or *three*, or *four*. (Hesych. *l. c.*)

3. The true *reason of the name* must be sought for in the fact that Melcarth, whom the Greeks identified with Heracles, was the tutelary god of the Phoenicians, as well as in the Greek legends respecting Hercules: how far those legends originated in the Phoenician worship, this is not the place to inquire. The view generally taken by the Greeks may be collected from the passages of Strabo just quoted. But the later writers sought for an interpretation from their physical views of the legends of Hercules. One story was that he tore asunder the rocks which had before entirely divided the Mediterranean Sea from the ocean. (Mela, i. 5. § 3, ii. 6. § 6.) Pliny assigns both reasons (iii. procem. "Abila Africae, Europae Calpe, *laborum Herculis meta:* quam ob causam indigenae columnas ejus Dei vocant, creduntque perfossas exclusa antea admisisse maria, et rerum naturae mutasse faciem.") The interesting speculations of the ancients, respecting the physical changes resulting from the supposed disruption, especially the opinion, discussed by Strabo, that the Mediterranean had previously been connected with the Red Sea, and that the *Isthmus of Suez* was formed by the lowering of the Mediterranean through its new outlet, belong rather to other places in this work [ERYTHRAEUM MARE, MARE INTERNUM]: but it may be worth while to point out here that Mela (*l. c.*) indicates just the opposite opinion, namely, that the Mediterranean was elevated by the influx of the Atlantic; and the same idea is conveyed by Pliny's phrase of "*admisisse* maria." Another legend was that Hercules forced the two rocks into temporary union to make a bridge for the safe conveyance of the herds of Geryon to Libya (Avien. *Ora Marit.* 326); and another, that he narrowed the Strait, so as to shut out the sea-monsters which had previously made their way in from the Ocean and infested the Mediterranean (Diod. Sic. iv. 18). It only remains to notice that one of the principal parallels of latitude, by which Eratosthenes and other ancient geographers divided the earth into κλίματα, was drawn through the Pillars, passing also through the Straits of Messina, Athens, Rhodes, and the Taurus, to Thinae. (Strab. ii. pp. 67, 68, 79, &c. &c.; Schwartz, *Diss. de Columnis Herculis*, Altorf, 1749, 4to; Gosselin, *Rech. sur la Geogr. Syst. des Anc.* tome iv. pp. 1—10, Paris, 1813; Humboldt, *Kritische Untersuchungen*, vol. i. pp. 451, foll.; Ukert, vol. ii. pp. 248, b. foll.) [P. S.]

HE'RCULIS INSULA. [CARTHAGO NOVA: ONOBA].

HE'RCULIS LIBURNI PORTUS [LIBURNUM.]

HE'RCULIS MONOECI PORTUS. [MONOECUS.]

HERCULIS PORTUS. 1. A small port on the coast of Etruria, on the S. side of the promontory of *Monte Argentaro*. [ARGENTARIUS MONS.]

2. (ὁ Ἡρακλέους λιμήν, Strab. vi. p. 256; Portus Herculis, Plin. iii. 5. s. 10), a port on the W. coast of Bruttium, placed by Pliny between Hipponium and the mouth of the Metaurus. Strabo tells us that it was between Hipponium and the Portus Herculis that the coast began to curve round towards the Sicilian Strait. Hence, it is probable that the name was

Digitized by Google

given to the port of *Tropea*, which is close to the headland called *Capo Vaticano*, where the coast actually begins to trend to the S., and must always have been of importance as a port. The modern name of *Tropea* seems to point to a Roman origin, but is not found in any ancient writer.

3. (Ἡρακλέους λιμήν, Ptol. iii. 3. § 3), a port on the south coast of Sardinia, between Sulci and Nora, mentioned only by Ptolemy, is, in all probability, the one now known as *Porto di Malfatano*. (De la Marmora, *Voyage en Sardaigne*, vol. ii. p. 394.) [E. H. B.]

HERCULIS PROMONTORIUM (τὸ Ἡράκλειον, Strab. vi p. 259), a promontory of Bruttium, which is regarded by Strabo as the extreme S. point of that country, and consequently of all Italy. It is now called *Cape Spartivento*, and is, in fact, the SE. point of the great headland forming the extremity of Bruttium, as Cape Leucopetra (*Capo dell' Armi*) is the SW. Hence, Strabo is perfectly correct in saying that, immediately after doubling the Herculean Promontory, the course of a voyager would lie to the NE. It is, however, in just the same latitude as Leucopetra, which was more commonly regarded by the ancients as the extreme point of the Italian peninsula. [E. H. B.]

HERCULIS PROMONTORIUM (Ἡρακλέους ἄκρον; *C. Mogador*), a promontory on the W. coast of Mauretania, half a degree S. of the mouth of the river Pinthi. (Ptol. iv. 1. § 4.) [P. S.]

HERCULIS SILVA, a forest of Germany, mentioned only by Tacitus (*Ann.* ii. 12) as situated on the east of the river Visurgis, whence modern writers identify it with the *Suntelgebirge*, on the west of the town of Minden. [L. S.]

HERCULIS TEMPLUM. [GADES.]

HERCUNIATAE or HERCUNIATES (Ἑρκουνιαται), a tribe in Pannonia, occupying the district between the Danubius and lake Pelso. (Plin. iii. 28; Ptol. ii. 16. § 3.) Their name is believed to indicate that they were a Celtic people. [L. S.]

HERCYNA. [BOHEMIA, p. 412, b.]

HERCYNIA SILVA (*Hercynius Saltus*, Liv. v. 34; *Hercyniam jugum*, Plin. iv. 28; Ἑρκυνία ὕλη, Ἑρκύνιον ὄρος, Ἑρκύνιος δρυμός, τὰ Ἑρκύνια), a range of mountains in Germany, the extent and situation of which are described very differently by the writers of different ages. Some of the earlier authors place the Hercynian forest near the Pyrenees (Schol. *ad Dionys. Perieg.* 286), while others assign to it a place near the northern ocean (Diod. v. 21; Eustath. *ad Dion. Perieg.* 285; Senec. *Med.* 712) or in the country of the Celts (Schol. *ad Apollon. Rhod.* iv. 640). The earliest mention of it occurs in Aristotle (*Meteor.* i. 13: Ἀρκύνια ὄρη), who speaks of it generally as a range of mountains in the north of Europe; but the first author that affords any more detailed information is Julius Caesar (*B. G.* vi. 24, 25), according to whom its breadth was nine days' journey and its length sixty. It commenced on the frontiers of the Helvetii, Nemetes, and Rauraci, and extending in an eastern direction parallel to the Danube reached the country of the Daci and Anartes; it then turned northward, traversing the countries of many nations. He therefore makes the mountains commence on the east bank of the Rhine, and leaves its eastern termination undefined. On the whole, Pomponius Mela (iii. 3) and Strabo (iv. p. 292) agree with this description, according to which the Hercynia Silva would be a general name for almost all the mountains of Southern and Central Germany, that is, from the sources of the Danube to Transylvania, comprising the Schwarzwald, Odenwald, Spessart, Rhön, Thüringer Wald, the Harz mountain (which seems to have retained a trace of the ancient name), Rauhe Alp, Steigerwald, and the Fichtel-, Erz-, and Riesengebirge. At a later period, when the mountains of Germany had become better known to the Romans, the name Hercynia Silva was applied to the more limited range of mountains extending around Bohemia, and extending through Moravia into Hungary. (Tac. *Germ.* 28, 30; Plin. iv. 25, 28.) Ptolemy (ii. 11. § 7) applies the name only to the range connecting the Sudetes with the Carpathian mountains. Caesar (*B. G.* vi. 26, foll.) gives a full account of some of the more interesting animals that were found in those extensive forests. At the time when they became better known, the separate parts of the mountain chain were designated by separate names, as *Abnoba*, *Rauraci Montes*, *Alpes Montes*, *Bacenis Silva*, *Melibocus*, *Sudeti Montes*, *Gabreta Silva*, *Asciburgius Mons*, and *Sarmatici Montes*. The name Hercynia, which some regard as a name of Celtic origin, is probably connected with the old German *Hart*, *Hard*, and *Harz*, signifying a woody mountain. [L. S.]

HERDO'NEA (Ἑρδωνία, Ptol.: *Ordona*), a city of the interior of Apulia, situated on the branch of the Appian Way which led from Canusium, by Equus Tuticus, to Beneventum. It was distant 26 R. miles from Canusium and 19 from Aecae (*Troja*). (*Itin. Ant.* p. 116; *Tab. Peut.*; Strab. vi. p. 283, where the name is corruptly written in all the MSS. and ed. editions Κερδωνία.) Herdonea is remarkable in Roman history for having witnessed the defeat of two different Roman armies by Hannibal at an interval of only 2 years: the one in B.C. 212, under the praetor Cn. Fulvius Flaccus; the other in B.C. 210, under the proconsul Cn. Fulvius Centumalus. (Liv. xxv. 21, xxvii. 1.) After the second of these victories, Hannibal, having no confidence in the fidelity of Herdonea (which was one of the places that had joined the Carthaginians after the battle of Cannae), destroyed the city, and transferred all its inhabitants to Metapontum and Thurii. It must have been subsequently rebuilt, but appears never to have risen again into a place of importance. Silius Italicus speaks of it as an obscure and deserted place (viii. 568); and though its existence as one of the municipal towns of central Apulia is attested by the geographers and itineraries (Plin. iii. 11. s. 16; Ptol. iii. 1. § 72; Strab. *l. c.*), its name is never again mentioned in history. It appears however to have survived till the middle ages, and was finally destroyed by the Saracens.

The ruins of the ancient city, which are described as extensive and indicating a place of importance, are still visible on the summit of a slight hill, a short distance to the south of the modern *Ordona*, a mere group of houses between *Borino* and *Cerignola*, on the high road from Naples to *Otranto*. They are described by Mola (*Peregrinaz. per la Puglia*, p. 44), and by Romanelli (vol. ii. p. 258).

The name of Herdonea is variously corrupted into Erdonias (*Itin. Ant.* p. 116), Serdonis (*Itin. Hier.* p. 610), Ardona (*Lib. Colon.* p. 260): and there is little doubt that the ARDONEAE mentioned by Liv (xxiv. 20), where Fabius established his winter quarters in B.C. 214, is only a corruption of the same name. [L. H. B.]

HERIUS (Ἥριος). Ptolemy (ii. 8. § 1) places the Herius on the coast of Gallia Lugdunensis, between

Digitized by Google

the Brivates Portus and the Vindana or Vidana Portus. Ptolemy's latitude of the mouth of the Herius (49½°) makes it nearly as far north as the outlet of the *Seine*. D'Anville [DURETIE] supposes the Herius to be the *Vilaine*, the first large river north of the *Loire*. He adds (*Notice, &c.*, Herius Fluv.) that the passage of the *Vilaine* between *Roche-Bernard* and the mouth of the river is now called *Treig-hier*, and that we may readily believe *Treig-hier* to be a corruption of Trajectum Herii. This may be so; or *Treig-hier* may be the old Celtic name. Some geographers assume the Herius to be the small river *Asray* north of the *Vilaine*; but this is only a guess like the other. [G. L.]

HERMAEUM PROM. (Ἑρμαῖα ἄκρα, Ptol. iii. 17. § 3), a point on the S. coast of Crete, which has been identified with *Ponta Trividi*. (Höck, *Kreta*, vol. i. p. 388.) [E. B. J.]

HERMAEUM PROM. (Ἑρμαῖα ἄκρα). 1. A headland on the coast of Marmarica, between Phoenicus and Paraetonium. (Ptol. iv. 5. § 7; *Stadiasm.* p. 437). 2. In Africa Propria. [MERCURII PROM.] [P. S.]

HERMI'NIUS MONS (τὸ ὄρος Ἑρμίνιον: *Sierra de la Estrella*), a mountain range of Lusitania, S. of the river Durius (*Douro*), a position of some importance in Caesar's campaign in Lusitania. (Dion Cass. xxxvii. 52; Hirt. *Bell. Alex.* 48; Suet. *Caes.* 54.) In the middle ages it was still called *Hermeno* and *Armimna* (Resendius, *Antiq. Lusit.* p. 58; Link, *Reise durch Portugall*, vol. ii. p. 142; Florez, *Esp. S.* vol. xiii. p. 166; Ukert, vol. ii. pt. 1. p. 277). [P. S.]

HERMIONE or HERMION (Ἑρμιόνη, Herod., Xen., Strab.; Ἑρμιών, Eurip. *Herc. Fur.* 615; Polyb. ii. 52; Ἑρμιών, Scylax, p. 20: *Eth.* Ἑρμιονεύς; fem. Ἑρμιονίς: *Adj.* Ἑρμιονικός, Hermioneus, Hermionius, Hermionicus: the territory Ἑρμιονίς), a town at the southern extremity of Argolis, in the wider use of this term, but an independent city during the flourishing period of Grecian history, and possessing a territory named Hermionis. The sea between the southern coast of Argolis and the island of Hydrea was called after it the HERMIONICUS SINUS (Ἑρμιονικὸς κόλπος, Strab. viii. p. 335), which was regarded as distinct from the Argolic and Saronic gulfs.

Hermione was founded by the Dryopes, who are said to have been driven out of their original abodes on Mount Oeta and its adjacent valleys by Heracles, and to have settled in the Peloponnesus, where their three chief towns were Hermione, Asine, and Eion. (Herod. viii. 43. 47; Diod. iv. 37.) Hermione is mentioned by Homer along with its kindred city Asine. (Hom. *Il.* ii. 560.) Asine and Eion were conquered at an early period by the Dorians, but Hermione continued to exist as an independent Dryopian state long afterwards. Hermione appears to have been the most important of the Dryopian towns, and to have been in possession at one time of a larger portion of the adjacent coast, as well as of several of the neighbouring islands. Strabo, following ancient authorities, places the promontory Scyllaeum in Hermionis (Strab. viii. p. 373), and the Hermionic gulf extended along the coast of Troezen as far as this promontory. Hermione is mentioned first among the cities of the Amphictyony, the representatives of which were accustomed to meet in the adjacent island of Calaureia (Strab. viii. p. 374), from which it has been inferred that Hermione had the presidency of the confederacy, and that the island belonged to this city. It is expressly stated that Hydreia belonged to the Hermionians, and that they surrendered this island to the Samian pirates, who gave it into the charge of the Troezenians. (Herod. iii. 59.) The Hermionians are mentioned as Dryopes at the time of the Persian wars: they sent three ships to Salamis, and 300 men to Plataea. (Herod. viii. 43, ix. 28.) Subsequently the Argives took possession of Hermione, and settled there an Argive colony. There is no account of its conquest, and Pausanias supposes that the Argives obtained peaceable possession of the town; but it probably came into their power about the same time that they subdued Mycenae and Tiryns, B. C. 464. Some of the expelled Hermionians took refuge at Halieis, where the Tirynthians had also settled; and it was perhaps at this time that the lower city was deserted. (Paus. ii. 34. § 5; Strab. viii. p. 373; comp. Steph. B. *s. v.* Τίρυνς; Müller, *Dor.* vol. i. p. 199, Engl. trans.) Hermione now became a Doric city; but the inhabitants still retained some of the ancient Dryopian customs. Thus it continued to be the chief seat of the worship of Demeter Chthonia, who appears to have been the principal deity of the Dryopians; and we learn from a remarkable inscription that the Asinaeans, who had settled in Messenia after their expulsion from Argolis, continued to send offerings to Demeter Chthonia at Hermione. (Böckh, *Inscr.* no. 1193.) Although Hermione had fallen into the hands of the Argives, it did not continue permanently subject to Argos, and it is mentioned subsequently as an independent town and an ally of Sparta. (Thuc. ii. 56, viii. 3.) After the capture of the Acrocorinthus by Aratus, the tyrant who governed Hermione voluntarily surrendered his power, and the city joined the Achaean league. (Polyb. ii. 44.) Hermione continued to exist long afterwards, as is proved by its numerous coins and inscriptions.

Pausanias describes Hermione at considerable length. The old city, which was no longer inhabited in his time, stood upon a promontory seven stadia in length, and three in breadth at its widest part; and on either side of this promontory there was a convenient harbour. There were still several temples standing on this promontory in the time of Pausanias, of which the most remarkable was one sacred to Poseidon. The later town, which Pausanias visited, stood at the distance of four stadia from this temple upon the slopes of the hill Pron. It was entirely surrounded by walls, and was in earlier times the Acropolis of the city. Among its ruins lies the modern village of *Kastri*. Of the numerous temples mentioned by Pausanias the most important was the ancient Dryopian sanctuary of Demeter Chthonia, situated on a height of Mount Pron, said to have been founded by Chthonia, daughter of Phoroneus, and Clymenus her brother. (Eur. *Herc. Fur.* 615.) It was an inviolable sanctuary; but it was plundered by the Cilician pirates. (Phot. *Lex. s. v.* Ἑρμιόνη; Plut. *Pomp.* 24.) Opposite this temple was one sacred to Clymenus; and to the right was the Stoa of Echo, which repeated the voice three times. In the same neighbourhood there were three sacred places surrounded with stone fences; one named the sanctuary of Clymenus, the second that of Pluto, and the third that of the Acherusian lake. In the sanctuary of Clymenus there was an opening in the earth which the Hermionians believed to be the shortest road to Hades, and consequently they put no money in the mouths of their dead to pay

Digitized by Google

the ferryman of the lower world. (Paus. ii. 35; Strab. viii. p. 373.)

From Hermione a peninsula, now called *Kranidhi*, extends towards the south and west. It contains two promontories, on each of which there are Hellenic remains. Pausanias names two ancient places, called Halice and Mases, on the road from Hermione to Asine, both of which must have been situated in this peninsula, but he gives no further indication of their position. It has been conjectured that the Hellenic remains near *C. Muzaiki*, on the more easterly of the two promontories above mentioned, are those of Halice; and that the remains on the more westerly promontory at Port *Kheli* represent Mases: but there are good reasons for believing that the ruins near *C. Muzaiki* are those of some town the name of which has not been recorded; that Halice, or, as it is also called, Halieis, stood at Port *Kheli*; and that Mases was situated more to the north, on the western coast, at Port *Kilaïdhia*. In the time of Pausanias, Mases served as the harbour of Hermione. [HALIEIS; MASES.] Towards the east the frontier of the Hermionis and Troezenia was marked by a temple of Demeter Thermasia, close to the sea, 80 stadia westward of Cape Scyllaeum, the name of which has been preserved in that of *Thérmisi*. (Paus. ii. 34. § 6.) Near this temple, on the road from Troezen to Hermione, was a small place called Eilei (Ἕλεοι), the name of which has been preserved in the modern *Ilio*. Westward the Hermionis seems to have extended as far as the territory of Asine. On the road from Mases to Asine Pausanias mentions the promontory Struthus (Στρουθοῦς); at the distance of 250 stadia from which, by a mountain path, were Philanorium (Φιλανόριον) and Bolei (Βόλοι), the latter being the name of a heap of stones: 20 stadia beyond Bolei was a place called Didymi [Didymi]. (Leake, *Morea*, vol. ii. p. 457, seq., *Peloponnesiaca*, p. 281, seq.; Boblaye, *Recherches*, &c. p. 60; Curtius, *Peloponnesos* vol. ii. p. 454, seq.)

HERMIONES, one of the three great divisions into which, according to Tacitus (*Germ.* 2), the German nation was divided. These divisions were the *Ingaevones*, inhabiting the country near the ocean; the *Herminones*, occupying the central parts of Germany; and the rest were called *Istaevones*. All three were said to have received their names from the three sons of Mannus; and as the one after whom the Herminones were called, bore the name of *Hermino*, *Irmino*, or *Irmin*, Grimm (*Deutsche Mythol.* i. p. 320, 2nd edit.) suggests that their name should be written *Hermiones*, which is actually the reading of one of the MSS. of Tacitus. Pliny (iv. 28), instead of three, mentions five great divisions of the Germans, and makes the Hermiones the fourth, adding that they included the Suevi, Hermunduri, Chatti, and Cherusci. Modern writers have hazarded numerous conjectures as to the different tribes contained in these three or five groups; but it will ever remain impossible to arrive at any satisfactory result. (See also Mela, iii. 3; Orph. *Argon.* 1134.) [L. S.]

HERMIONICUS SINUS. [HERMIONE.]

HERMIONIS. [HERMIONE.]

HERMISIUM (Ptol. iii. 5. § 3; Plin. iv. 12), a town on the W. coast of the Tauric Chersonesus. [E. B. J.]

HERMON. [ANTHEDANUS.]

HERMONACTIS VICUS (Ἑρμωνάκτιος Κώμη, Strab. vii. p. 306; Ptol. iii. 10. § 14), a place in Thessalia Europaea, near the mouth of the Tyras, where was the tower of Neoptolemus (Strab. l. c.; comp. Anon. *Peripl.* p. 10), perhaps a lighthouse. In this neighbourhood, not long since, the remains of an old tower were found. (Köler, *Mem. de l'Acad. de St. Petersb.* vol. x. p. 580.) [E. B. J.]

HERMONACUM or HERMOMACUM, one of the many names of towns ending in *acum* in North Gallia, is placed by the Table between Camaracum and Bagacum (*Cambray* and *Bavay*), and 8 from Bagacum, which is 8 Gallic leagues. D'Anville finds a place *Bermerain*, between *Cambray* and *Bavay*, which he supposes to represent Hermonacum. [G. L.]

HERMONASSA (Ἑρμώνασσα, Dionys. 552; Scymn. *Fr.* 152; Pomp. Mela, i. 19. § 5; Ptol. v. 9; Steph. B. *s. v.*), a place lying between Sindica and Phanagoria, which Rennell (*Compar. Geog.* vol. ii. p. 331) fixes at the opening of the lake into which the *Kuban* river flows. [E. B. J.]

HERMONTHIS (Ἑρμωνθίς, Steph. B. *s. v.*; Strab. xvii. p. 817; Aristid. *Aegyptius*, p. 568; Hermunthis, *It. Anton.* p. 160; Plin. v. 9. § 11; Macr. *Saturn.* i. 21), the modern *Erment*, was the chief town of the Hermonthite nome in the Thebais — "Thebais Superior" of the Itineraries. It stood about eight miles SW. of Thebes, and 24 NE. of Latopolis, in lat. 25° 10′ N. A little above Hermonthis the sandstone rocks which had confined the Nile like a wall disappear, and limestone hills succeed, leaving, especially on the western bank of the river, wider margins of cultivable land. In a part of this expanding character, and on the left side of the Nile, stood Hermonthis. In the Pharaonic times it was celebrated for the worship of Isis, Osiris, and their son Horus. Its ruins still attest the magnificence of its buildings; but the Iseion, of which the remains are extant, was built in the reign of the last Cleopatra (B.C. 51—29), and the sculptures appear to allude to the birth of Caesarion, her son by Julius Caesar, symbolised as that of the god Harpocrates, the son of Mandon and Ritho. Its astronomical ceiling is probably genethliacal, referring to the aspect of the heavens at the time of Caesarion's nativity. Adjacent to the temple are the vestiges of a tank, which probably served as a Nilometer, since its sides exhibit the grooves usual in such basins. Under the later Caesars, Hermonthis was the head-quarters of the Legio IIda Valentiniana. (Champollion, *L'Egypte*, vol. i. p. 195.) [W. B. D.]

HERMOPOLIS MAGNA (Ἑρμοῦ πόλις μεγάλη, Steph. B. *s. v.*; Ptol. iv. 5. § 60; Hermopolis, Ammian. ii. 16; Hermupolis, *It. Anton.* pp. 154, seq.; Mercurii Oppidum, Plin. v. 9. § 11; *Eth.* Ἑρμοπολίτης or Ἑρμουπολίτης), the modern *Eshmoun*, was situated on the left bank of the Nile, about lat. 27° 4′ N., and was the capital of the Hermopolite nome in the Heptanomis. It is sometimes named as by Pliny, reckoned among the cities of Upper and not of Middle Egypt. Hermopolis stood on the borders of these divisions of Egypt, and, for many ages, the Thebaïd or upper country extended much further to the N. than in more recent periods. As the border town, Hermopolis was a place of great resort and opulence, ranking second to Thebes alone. A little to S. of the city was the castle of Hermopolis, at which point the river craft from the upper country paid toll (Ἑρμοπολιτῶν φυλακή, Strab. xvii. p. 813; Ptol. *l. c.*; the *Bahr Jusuf* of the Arabians). The grottos of Beni-hassan, near Antinoë, upon the opposite bank of the Nile, were the common cemetery of the Hermopolitans, i.e. although the river divided the city from its sepul-

Digitized by Google

polis, yet, from the wide curve of the western hills at this point, it was easier to ferry the dead over the water than to transport them by land to the hills. The principal deities worshipped at Hermopolis were Typhôn and Thoth. The former was represented by an hippopotamus, on which sat a hawk fighting with a serpent. (Plut. *Is. et Osir.* p. 371, D.) Thoth or Tauth, the Greek Hermes, the inventor of the pen and of letters, the Ibis-headed god, was, with his accompanying emblems, the Ibis and the Cynocephalus or ape, the most conspicuous among the sculptures upon the great portico of the temple of Hermopolis. His designation in inscriptions was "The Lord of Eshmoon." This portico was a work of the Pharaonic era; but the erections of the Ptolemies at Hermopolis were upon a scale of great extent and magnificence, and, although raised by Grecian monarchs, are essentially Egyptian in their conception and execution. The portico, the only remnant of the temple, consists of a double row of pillars, six in each row. The architraves are formed of five stones; each passes from the centre of one pillar to that of the next, according to a well-known usage with Aegyptian builders. The intercolumnation of the centre pillars is wider than that of the others; and the stone over the centre is twenty-five feet and six inches long. These columns were painted yellow, red, and blue in alternate bands, and the brilliancy of the colours is well represented in Minutoi's 14th plate. There is also a peculiarity in the pillars of the Hermopolitan portico peculiar to themselves, or, at least, discovered only again in the temple of *Gournou*. (Dénon, *L'Egypte*, plate 41.) Instead of being formed of large masses placed horizontally above each other, they are composed of irregular pieces, so artfully adjusted that it is difficult to detect the lines of junction. The bases of these columns represent the lower leaves of the lotus; next come a number of concentric rings, like the hoops of a cask; and above these the pillars appear like bunches of reeds held together by horizontal bonds. Including the capital, each column is about 40 feet in height; the greatest circumference is about 28½ feet, about five feet from the ground, for they diminish in thickness both towards the base and towards the capital. The widest part of the intercolumnation is 17 feet; the other pillars are 13 feet apart. Hermopolis comparatively escaped the frequent wars which, in the decline both of the Pharaonic and Roman eras, devastated the Heptanomis; but, on the other hand, its structures have suffered severely from the ignorance and cupidity of its Mohammedan rulers, who have burned its stones for lime or carried them away for building materials. [W. B. D.]

HERMO'POLIS PARVA (Ἑρμοῦ πόλις μικρά, Steph. B. *s. v.*; Strab. xvii. p. 802; Ptol. iv. 5. § 46; *It. Anton.* p. 154), the modern *Damanhur*, was a city of the Egyptian Delta, in the nome of Alexandria, or, as it was sometimes described, the chief town of a Deltaic Hermopolite nome. It stood in lat. 31° N. on the banks of a canal which connected the lake Mareotis with the Canopic or most westerly arm of the Nile. It was 44 miles SE. of Alexandria. (Champollion, *L'Egypte*, vol. ii. p. 249.) There were, besides, two other towns of the same name: 1. on an island near the city Butosos (Strab. xvii. p. 802); 2. another a little below Thmuis (Strab. *l. c.*; Steph. B. *s. v.*). [W. B. D.]

HERMUNDU'RI (Ἑρμουνδοῦροι or Ἑρμόνδουροι), a large and powerful tribe of Germany, occupying the extensive country between the mountains in the north-west of Bohemia and the Roman wall in the south-west, which formed the boundary of the Agri Decumates. On the east they bordered on the Narisci, in the north-east on the Cherusci, and in the north-west on the Chatti. The accounts of the ancients about the Hermunduri are very contradictory. They belonged no doubt to the Suevi; but respecting their earliest place of abode, and the reasons which induced them to quit their homes, nothing is known. They first appear in history at the time of Domitius Ahenobarbus, as a host expelled from their country and wandering about, until Ahenobarbus assigned to them a part of the territory of the Marcomanni, between the Main and the Danube. That district had been abandoned by the Marcomanni, and continued to be inhabited by the Hermunduri at the time of Tacitus, who describes them as friends of the Romans. (Dion Cass. *Fragm.* 32, ed. Morell.; Tac. *Germ.* 41.) Their original country was, according to some, in the north of Bohemia and the neighbouring mountains; for Tacitus places the sources of the Albis in the country of the Hermunduri, while Strabo (vii. p. 290) places them beyond the Albis. At all events, however, they were always hostile to the Marcomanni. (Tac. *Ann.* ii. 63, xii. 29, xiii. 57.) After the overthrow of Maroboduus and Catualda, which they themselves had assisted to effect (Tac. *Ann.* ii. 63), they spread in a north-eastern direction, taking possession of the north-western part of Bohemia and the country about the sources of the *Main* and *Saale*, that is, the part of Franconia as far as *Kissingen*, and the south-western part of the kingdom of Saxony. (Vell. Pat. ii. 106; Tac. *Ann.* xiii. 57.) Henceforth they continued to occupy that extensive country, and soon after we find them allied with their old enemies, the Marcomanni, in their war against the Romans. (Jul. Capitol. *M. Anton.* 22; Eutrop. viii. 13.) After this war they are no longer mentioned, but seem to be comprised under the general name of the Suevi; for Jul. Capitolinus expressly mentions the Hermunduri on the same occasion, where others, such as Eutropius and Orosius (vii. 15), speak only of Suevi. Even Ptolemy appears not to have known them, for, in ii. 11. § 24, he enumerates in their country quite different tribes, which are otherwise unknown to us. The name Hermunduri is believed by some to signify highlanders, and to be a compound of *Her* = *Ar*, that is "high," and *Mund* = Man. (Wilhelm, *Germanien*, pp. 208, fol.) [L. S.]

HERMUS. [ATTICA, p. 325, b.]

HE'RNICI (Ἕρνικοι, Strab.; Ἕρνικες, Dionys.), a people of Central Italy, whose territory was in later times included in Latium, but who appear in the early history of Rome as a separate and independent nation. They inhabited the upper valley of the Trerus or *Sacco*, together with the mountain district N. of that river; and bordered on the Aequians towards the N., and on the Volscians to the S. and E. We are told that their name was derived from an old Sabine or Marsic word "herna," signifying a rock, an appellation well suited to the character of their country, the "Hernica saxa" of Virgil. (Virg. *Aen.* vii. 684; Serv. *ad loc.*; Festus, *v. Hernici.*) This derivation would seem to point to their being a race akin to the Sabines; and Servius distinctly calls them a Sabine colony (Serv. *ad Aen. l. c.*): nor does there seem to be any reason to reject this statement, although the authority of that commentator is in itself of little weight (Niebuhr, vol. i.

Digitized by Google

p. 102). An older commentator on Virgil assigns them a Marsic origin (Schol. Veron. *ad Aen. l. c.*), which comes to much the same thing, as the Marsi were certainly closely related to the Sabines. [MARSI.] On the other hand, Julius Hyginus (*ap. Macrob.* v. 18) affirmed that the Hernicans were a Pelasgic race; and Macrobius regards the description of their arms and attire given by Virgil as pointing to the same conclusion. No value can, however, be attached to this inference: and the former tradition seems to be the best attested, as well as in itself the most probable. The peculiarly close relation which we find subsisting between the Hernicans and Latins, probably arose from their common interest in opposing their formidable neighbours, the Aequians and Volscians, rather than from any community of origin.

The Hernicans first appear in Roman history in the reign of Tarquinius Superbus, when, according to Dionysius, they concluded a treaty of alliance with that monarch, who sought to unite the Hernicans and Latins into one common league with Rome. (Dionys. iv. 49.) This fact is not noticed by Livy, but is not in itself improbable; and the alliance thus concluded may have been only the forerunner of that which we know to have existed at a later period. An ancient tradition, indeed, not noticed by the historians, but preserved to us by Festus (*s. v. Septimontium*), represents the Hernican chief, Laevius Cispius of Anagnia, as conducting a body of auxiliaries to Rome at a still earlier period. But it is probable that this legend, as so often happens in the early history of Rome, is chronologically misplaced. After the expulsion of the Tarquins, the Hernicans appear for a short time on terms of hostility with Rome (Liv. ii. 22, 40; Dionys. vi. 5, 50); but this state of things was soon terminated by a treaty, which established between the two nations those relations of amicable alliance which from this time subsisted for a long period without interruption (Liv. ii. 41; Dionys. viii. 69). It is true that this treaty, which was concluded by Sp. Cassius in B. C. 486, is represented by the Roman historians as granted to the Hernicans after they had been vanquished in war; and Livy even tells us that they were deprived by it of two-thirds of their territory, but this appears wholly inconsistent with the position in which we afterwards find them: and there is every probability that Dionysius is correct in stating that the treaty with the Hernicans was a counterpart of that concluded seven years before, by the same Sp. Cassius, with the Latins. (Niebuhr, vol. ii. p. 87.) The motive for both treaties was indeed obviously the same—the necessity of combining their forces against the increasing power of the Aequians and Volscians. The latter people had already made themselves masters of the Hernican town of Ferentinum, and were threatening to drive the Hernicans from the whole valley of the Trerus. The statement of Livy already alluded to, may possibly, as suggested by Niebuhr, have arisen from a misconception of the fact that a third of all conquered lands, as well as of the booty taken in war, was thenceforth to be assigned to the Hernicans: a condition which is expressly stated by Dionysius (viii. 71, 77), and which shows that they entered into the league as an equal and independent power. From this time forth, during a period of more than a century, they continued, in pursuance of the terms of their alliance, to take part with the Romans and Latins in their long and continuous struggle against the Aequians and Volscians, and they were even, from their position, often the first to bear the brunt of hostilities. (Liv. iii. 6; Dionys. ix. 5, 67, x. 20.)

But the relations which had so long subsisted between the Hernicans and Rome, appear to have been broken up by the great Gaulish invasion: and soon after the capture of the city, in B. C. 387, we find the Hernicans as well as the Latins appearing in arms against the republic, and even lending assistance to their old enemies the Volscians. (Liv. vi. 2, 6, 8, 11, 17, &c.) From this time they appear to have been sometimes in open hostility; at others a suspension of arms at least must have taken place: but in B. C. 361, after an interval of some years during which a precarious peace seems to have existed, the whole Hernican nation took up arms and engaged with all their forces in the struggle with Rome. (Id. vii. 6—9.) Though at first successful, they were afterwards twice defeated by the Romans, and the strong city of Ferentinum taken: but still the war seems to have lingered on, till in B. C. 358, we are told that the Hernicans were defeated and subdued ("devicti subactique sunt") by the consul C. Plautius. (Liv. vii. 15; Fast. Capit.) The exact force of these expressions, and the terms on which they were now reduced to submission, we are left to conjecture; but it seems certain that they were either effectually humbled, or again admitted to such favourable terms as secured them to the Roman alliance, for, even on occasion of the great outbreak of the Latins in B. C. 340, the Hernicans did not follow their example, but were steadfast to the Roman cause. At a later period they were less faithful: in B. C. 306, it was discovered that Hernican auxiliaries had fought in the ranks of the Samnites against Rome; and an investigation being ordered by the senate, the Hernicans resented this interference, and declared war against Rome. Their counsels were, however, divided: and the city Anagnia, their chief city, put itself at the head of the warlike party, the three powerful cities of Aletrium, Ferentinum, and Verulae refused to take part in hostilities. The consequence was that the war was carried on with little spirit, and the consul Q. Marcius in a single campaign was able to reduce the whole people to subjection. (Liv. ix. 42, 43; Fast. Capit.) Their relations to the conquerors were now established on a permanent footing: the three cities that had taken no part in the war were allowed to retain their own laws and magistrates, with the privileges of mutual intercourse, while Anagnia, and the other towns that had taken arms against Rome, received the nominal boon of the Roman civitas, but without the right of suffrage: their magistrates were deprived of all civil jurisdiction, and they were reduced to the subordinate and degraded condition of praefecturae. (Liv. *l. c.*; Festus, *v. Praefectura.*)

From this time the Hernicans disappear from history. They must have obtained the full rights of Roman citizens by the Lex Julia in B. C. 90, and became gradually merged in that condition in common with the Latins and Volscians. Although their territory was included in Latium, in the sense in which that term was understood in the days of Augustus, the Hernicans were still distinguishable as a separate people, and are mentioned even at a later time as retaining many characteristics of their rude and simple forefathers. (Juv. *Sat.* xiv. 180.) The exact limits of their territory

Digitized by Google

cannot be fixed with any certainty, and they probably varied at different times, as did those of the neighbouring Volscians. The only cities which we can assign to them with certainty are, ANAGNIA, the capital or chief city of the league, FERENTINUM, ALATRIUM, and VERULAE, to which may be added the small town of CAPITULUM, and probably also TREBIA. FRUSINO appears to have been a Volscian rather than a Hernican town, though it may have originally belonged to the latter people. But it is evident from a passage of Livy, in which he tells us that *all the states of the Hernicans* ("omnes Hernici nominis populi," ix. 43), besides the four above mentioned, joined in the war against Rome, that there must have been several other towns of sufficient importance to have taken part in the war, and in the assembly which preceded it, as independent states. And it is at least a plausible inference of Niebuhr's, that, of the 47 cities stated by Dionysius to have taken part in the sacrifices on the Alban Mount, 16 must have belonged to the Hernicans. It is however probable that these were for the most part merely little mountain towns, of which we are unable to point out either the names or localities. Strabo's statement (v. p. 231) that the Hernicans dwelt near to Lanuvium and Alba and Rome itself, is utterly unintelligible, and is probably nothing more than a mere mistake.

The country of the Hernicans is well characterised by Virgil in a single line, where he speaks of the "roscida rivis Hernica saxa" (*Aen.* vii. 684; Sil. Ital. iv. 226, viii. 393). The mountains on the N. of the valley of the Trerus are everywhere watered with beautiful streams, and clothed with magnificent woods of oak and chesnut, which render them one of the most beautiful regions of the Apennines. They are separated from the range of the Volscian mountains, the Montes Lepini, by the broad and fertile valley of the *Sacco*, which communicates with the plains of Latium by the pass or opening below Praeneste. Towards the interior the Hernican mountains rise in a lofty group or range which separates the valley of the *Sacco* and the upper course of the Anio from the waters of the Liris. Besides the TRERUS or *Sacco*, the only other stream in the land of the Hernici of which the ancient name is preserved to us, is the COSAS (Κόσας, Strab. v. p. 237), still called the *Cosa*, which flows beneath the walls of *Alatri* and *Frosinone*, and joins the Sacco about 5 miles below the latter city. [E.H.B.]

HERODEIUM. (Ἡρώδειον, Ἡρώδιον, Ἡρώδια, Suid. *s. v.*) 1. A city and fortress of Palestine, erected by Herod the Great, and situated about 60 stadia from Jerusalem, and not far from Tekoa. Joseph. *Antiq.* xv. 9. § 4, *B. J.* i. 21. § 10, *B. J.* v. 9. § 5.) Here on a hill of moderate height having the form of a woman's breast, and which he raised still higher, or at least fashioned by artificial means, Herod erected a fortress with rounded towers, having in it apartments of great strength and splendour. The difficult ascent was overcome by a flight of two hundred steps of hewn stone. At the foot of the mountain he built other palaces for himself and his friends, and caused water to be brought thither from a distance in large quantity and at great expense. The whole plain around was also covered with buildings, forming a large city, of which the hill and fortress constituted the acropolis. (Joseph. *l. c.*) It was to this place apparently, that the body of Herod was brought for burial, 200 stadia from Jericho, where he died. (Joseph. *Antiq.* xvii. 8. § 3, *B. J.* i. 33. § 9.) This city was so important that one of the toparchies afterwards took the same name, and Pliny ("Herodium cum oppido illustri ejusdem nominis," v. 15) mentions it as a town of great note. It does not occur either in Ptolemy or Eusebius and Jerome.

The "Frank Mountain," with which Herodium has been identified, bears in Arabic the name of *el-Fureidîs*, a diminutive of the word signifying Paradise. The mountain has not been usually ascended by travellers; among those who speak of having been upon it are, Von Troilo, Nau. Le Brun, Pococke, Irby and Mangles, and some others. Dr. Robinson (*Researches*, vol. ii. pp. 169—175), whose account has been here followed, describes it as rising steep and round, precisely like a volcanic cone, but truncated. The height above the base cannot be less than from 300 to 400 feet, and the base itself has at least an equal elevation above the bottom of *Wady Urtâs* in the SW., towards which there is a more general descent. There are traces of terraces around the foot of the mountain, but not higher up; nor is there any road to the top or fosse upon the S., as described by Pococke (*Trav.* vol. ii. pt. i. pp. 42, fol.). The top of the mountain, constituting a circle of 750 feet in circumference, is inclosed by the ruined walls of a circular fortress, built of hewn stones of a good size, with four massive round towers standing at each one of the cardinal points. Either the ruins have formed a mound round the circumference, or the middle part of the inclosure was once excavated; it is now considerably deeper than the circumference. The tower upon the E. is not so thoroughly destroyed as the rest, and in it a magazine or cistern may still be seen. The present name of the "Frank Mountain" is known only among the Franks, and is founded on a report that this post was maintained by the Crusaders for 40 years after the fall of Jerusalem; but the silence of the historians of the Crusades, and the small size of the position, lead to the conclusion that this was a legend of the fifteenth century, when, in A.D. 1483, the story first appears, in Felix Fabri (*Evagatorium: de Monte Rama et ejus Oppido fortissimo*, vol. ii. pp. 335—337), and has been repeated under different forms by subsequent travellers.

An earlier mention of this mountain than the times of Herod, or indeed any mention of it in the Scriptures, cannot be assumed with any certainty. Pococke has suggested that it may have been the Beth-Haccerem of the prophet Jeremiah (vi. 1), where the children of Benjamin were "to set up a sign of fire," while they blew the trumpets in Tekoa. Jerome (*Comm. in Jer.* vi. 1) also says that there was a village called Bethacharma, situated on a mountain between Tekoa and Jerusalem. If BETH-ACCAREM was indeed succeeded by the fortress and city of Herod, it is difficult to see why Jerome, who usually employs the Greek names by preference, should here and elsewhere make no allusion to the more important Herodium. (Reland, *Palaestina*, vol. ii. p. 820; Von Raumer, *Palästina*, pp. 220—464; Ritter, *Erdkunde*, vol. xv. pt. i. pp. 617—624; Hirt. *Ueber die Baue Herodes des Gross. Abhand der Berl. Akad.* 1816-1817, p. 5.)

2. Another fortress of the same name was built by Herod on a mountain towards the Arabian frontier (τῷ πρὸς Ἀραβίαν ὄρει: Joseph. *B. J.* i. 21. § 10), not "of Arabia," as Dr Robinson (*Researches*, vol. ii. p. 173) says. [E. B. J.]

HEROOPOLIS (Ἡρώων πόλις or Ἡρώ, S

Digitized by Google

xvi. 759, 768, xvii. 803, 804; Arrian, *Exp. Alex.* iii. 5, vii. 20; Joseph. *Ant. Jud.* ii. 7. § 5; Plin. v. 9. § 11, vi. 32. § 33; Mela, iii. 8; Steph. B. *s. v.*; Ptol. ii. 1. § 6, iv. 15. § 54), a city east of the Delta, situated near the mouth of the Royal Canal which connected the Nile with the Red Sea. Although not immediately upon the coast, but nearly due N. of the Bitter Lakes, Heroöpolis was of sufficient importance, as a trading station, to confer its name upon the arm of the Red Sea (Ἡρωοπολίτης κόλπος, Ptol. v. 17. § 1) which runs up the Egyptian mainland as far as Arsinoë (*Suez*) (κόλπος Ἡρώων). (Theophrast. *Hist. Plant.* iii. 8.) It was the capital of the Nomos Heroöpolites or Arsinoites. (Orelli, *Inscr. Lat.* no. 516.) The ruins of Heroöpolis are still visible at *Abu-Keyscheid*. (Champollion, *L'Egypte*, vol. ii. p. 88.) [W. B. D.]

HEROOPOLITES SINUS. [Heroopolis; Arabicus Sinus, p. 183, a.]

HERPEDITA'NI. [Mauretania].

HERULI, ERULI, AERULI (Ἔρουλοι, Ἕρουλοι, Αἴρουλοι, also Οὔρουροι, Ἕλουροι, and Αἴλουροι; Etym. Mag. *s. v.* Ἕλουροι), a German tribe first mentioned among the Gothic nations when these latter had established themselves on the north coast of the Euxine, in the reigns of Gallienus and Claudius. (Trebell. Poll. *Gallien.* 13, *Claud.* 6, 12.) Zosimus (i. 41) calls them Scythians. Until that time the Heruli had been independent, and were only allied with the Goths; but Hermanric, the king of the Ostrogoths, after defeating them in a bloody battle, reduced them to the condition of subjects. (Jornand. *de Reb. Get.* 43.) The country on the Euxine was not the original seat of the Heruli, any more than it was the original country of the Goths; and this is manifest from the circumstance that, not long afterwards, Heruli together with Chaviones invaded the western parts of the Roman empire, and apparently settled in the neighbourhood of the Batavi; for, in the reign of Valentinian, they are mentioned together with Batavi as engaged in the service of Rome against the Alemanni. (Amm. Marc. xx. 4, xxv. 10, xxvii. 1, 8.) Afterwards we find them even fighting in Britain; and it is possible that the 700 Heruli who with their ships ravaged the coasts of Galicia and Cantabria, were adventurous descendants of the Heruli who had crossed over into Britain. (Mamert. *Paneg. Maxim.* 6, 7; Amm. Marc. xxvii. 1, 8; Sidon. Apollin. *Epist.* viii. 9.) At the time when the Huns invaded Europe from the east, the Heruli established in the north of the Euxine, in conjunction with other tribes, as the Turcilingi and Rugii, joined Attila (Paul. Diac. *Hist. Misc.* p. 97) and followed his army into Gaul: but subsequently the Heruli allied themselves with other German tribes, and assisted in breaking the power of the Huns; and, in conjunction with the Turcilingi, Sciri, and Rugii, and commanded by Odoacer, who is styled king of the Heruli, they overthrew, in A. D. 476, the Western empire. (Jornand. 46, 50; Paul. Diac. *Hist. Longob.* i. 19.) After the power of the Huns was broken, about A. D. 480, a large body of Heruli established a considerable empire on the Danube, or rather about the upper course of the *Theiss*, as the banks of the Danube were in the hands of the Rugii, Longobardi, and Gepidae. The second of these tribes, however, soon became subject to the Heruli. (*Vita S. Severini*, 24; Procop. *B. G.* ii. 14.) The great power of the Heruli in those parts is attested by the fact that Theodoric, the Ostrogoth, solicited their alliance against the Franks, declaring their king his son in arms. (Cassiod. *Var.* iii. 3, iv. 2.) But about A. D. 512 the Longobardi, impatient to bear the rule of the Heruli any longer, rose in arms against them, and almost destroyed them. The survivors, after wandering about for some time, turned southward, where some received settlements within the Roman dominions; while others, disdaining, it is said, to seek the protection of the Eastern empire, migrated northward, and established themselves in Scandinavia. (Procop. *B. G.* ii. 14, 15; Jornand. *de Reb. Get.* 12.) Those Heruli who had received settlements in lower Pannonia remained a dangerous and unruly horde, in consequence of which they were severely chastised by the emperors Anastasius and Justinian, under the latter of whom they adopted the Christian religion. About the same time they murdered their own king Ochon, and then petitioned Justinian to appoint another king, while they addressed a similar request to their brethren in Scandinavia. Justinian gave them a king Suartua, and soon after Todasius was recommended by the Scandinavian Heruli. After the expulsion of Suartua, the greater part of these Pannonian Heruli, led on by Todasius, emigrated and joined the Gepidae: but a minority remained behind and faithful to the empire, so that, in the war against the Gepidae, Heruli were arrayed against Heruli. Henceforth these fierce warriors distinguished themselves in the wars of the Eastern empire against the Ostrogoths in Italy, as well as in the wars which were carried on at that time in Asia and Africa. (Procop. *B. G.* ii. 11, 13, 22, iii. 13, iv. 26, 28, 31, *B. Pers.* i. 13, 14, ii. 24, 25, *B. Vandal.* ii. 4, 17.) During these wars the Heruli were distinguished for their swiftness and bravery; but their habits and customs appear to have been of a very barbarous character, for they are said to have put to death the aged and the sick, that they might not be a burden upon the others, and to have required of every widow to make away with herself on the tomb of her husband.

In regard to the country originally inhabited by the Heruli, before they appeared in the north of the *Black Sea*, nothing satisfactory can be said. Jornandes is inclined to believe them to have come, like the Goths, from Scandinavia; while, according to Mamertinus (*Panegyr. Maxim.* 4) and Sidonius Apollinaris (*Ep.* viii. 9), it would seem that their original abodes, like those of the Goths, were on the coast of the Baltic, on the east of the Vistula. They appear to have consisted of unsettled hordes, and to have sought warlike occupations wherever they were to be found; hence they appear in the most distant parts of the Roman empire, from the mouth of the Danube to that of the Rhine: they probably did not acquire the character of a compact nation until they settled on the banks of the Danube or the *Theiss*. (Comp. Latham, *Epileg. to Tac. Germ.* pp. xxiv. fol.) [L. S.]

HESBON (Ἐσεβών, LXX., Hesych.: Ἔσσεβαν, Euseb. *Onom.*: *Eth.* Ἐσσεβών, Ἐσσεβωνῖτις, *Judith*, v. 15; Χασφών Χασχώρ; 1 *Macc.* v. 26, 36: *Hesbân*, *Hisbân*), a town in the territory of the Hebrews, E. of the Jordan, and parallel with Jericho, nearly midway between the rivers Jabbok and Arnon. It originally belonged to the Moabites, but had been wrested from them by their northern neighbours the Amorites a short time before the arrival of the Israelites from Aegypt. (*Numbers*, xxi. 23—26; comp. Ewald, *Gesch. des Volkes Israel*, vol. ii. p. 212.) At that time it was the capital of Sihon, the Amorite chieftain who "reigned in Heshbon." (*Numbers*,

Digitized by Google

xxi. 26; *Deut.* ii. 9; *Josh.* iii. 10.) It belonged to the tribe of Reuben (*Numbers*, xxxii. 37; *Josh.* xiii. 17); but, as it was on the confines of Gad, is sometimes assigned to the latter tribe (*Josh.* xxi. 39; 1 *Chron.* vi. 81). When the ten tribes were carried off, Hesbon fell into the hands of the Moabites, and is mentioned by the prophets in their denunciations against that people. (*Is.* xv. 4; *Jer.* xlviii. 2, 34, 45.) Under king Alexander Jannaeus it was again reckoned as a Jewish city. (Joseph. *Ant.* xiii. 15. § 4.) Ptolemy (v. 17) mentions it under the name Esbuta (Ἐσβοῦτα), and the "Arabes Esbonitae" of Pliny (v. 12) must be referred to this place. Eusebius and Jerome (*Onom.*) speak of it as a place of some consequence in their day, under the name of Esbus (Ἐσβοῦς), at a distance of 20 M. P. from the river Jordan. There is a coin of the emperor Nero, with the epigraph HEEBA, the type a female figure with a crown and palm. (Mionnet, *Supplément*, vol. viii. p. 387.) But the best known are the coins of Caracalla, with the type a temple of Astarte, or a "Deus Lunus" with a Phrygian cap, and the epigraph ECBOT. (Eckhel, vol. iii. p. 503; Mionnet, vol. v. p. 585.) It occurs in the list of the Eparchies of Arabia under the name of Ἐσβοῦς. (Reland, *Notit. Vet. Eccles.* p. 218), but is not mentioned by Hierocles, though a πόλις Ἐσβοῦντων occurs in the Acts of the Council of Chalcedon. Under the name of *Chesban* it became the metropolis of *El-Belka*. (Abú-l-fedá, *Tab. Syr.* p. 11.)

The region of the *Wady Hesbán* was first visited in modern times by Leetzen (Zach's *Monatl. Corr.* xviii. p. 431), then by Burkhardt (*Trav.* p. 365), and afterwards by Irby and Mangles (*Trav.* p. 471). These latter writers speak of the "ruins as uninteresting, and the only pool they saw too insignificant" for the "fish-ponds" famous in Hebrew poetry. (*Cant.* vii. 4.) Near the tent village of *Hüsban* are the ruins of ancient Hesbon, where there are some cells excavated in the rock, a ruined castle, and a large cistern, which only requires to be cleared of the rubbish to be still available. (Chesney, *Exped. Euphrat.* vol. i. p. 516.)

(Reland, *Palestina*, vol. ii. p. 720; Rosenmüller, *Handbuch der Bibl. Alt.* vol. ii. pt. i. p. 266; Von Raumer, *Palestina*, p. 253; Winer, *Biblisches Real-wörterbuch*, *s. v.*; Ritter, *Erdkunde*, vol. xv. pp. 114, 143, 574, &c.) [E. B. J.]

HESPE'RIA. [ITALIA.]

HESPE'RIDES or HE'SPERIS (Ἑσπερίδες, Ἑσπερίς), afterwards BERENI'CE (Βερενίκη: *Ben Ghazi*, Ru.), the westernmost city of the Cyrenaic Pentapolis, stood just outside the E. extremity of the Great Syrtis, on a promontory called Pseudopenias, and near the river Lathon. It seems to have derived its name from the fancy which found the fabled Gardens of the Hesperides in the fertile terraces of Cyrenaica; and Scylax distinctly mentions the gardens and the lake of the Hesperides in this neighbourhood, where we also find a people called Hesperidae, or, as Herodotus names them, Euesperidae. Its historical importance dates from the reign of the Ptolemies and it was then named Berenice after the wife of Ptolemy III. Euergetes. It had a large population of Jews. (Strab. xvii. p. 836; Mela, i. 8; Plin. v. 5; Solin. 27, 54; Ammian. Marc. xxii. 16; Steph. B. *s. v.* Ἑσπερίς; Hierocles, p. 733, where the name is Βερενίκη; *Stadiasm.* p. 446, Βερνικὶς; *Itin. Ant.* p. 67, Beronice; *Tab. Peut.*, Bernicide; Ptol. iv. 4. § 4, viii. 15. § 3.) Having been greatly reduced by that decline of commercial importance and those ravages of the barbarians which were so severely felt by all the cities of the Pentapolis [CYRENAICA], it was fortified anew by Justinian, who also adorned it with baths. (Procop. *de Aedif.* vi. 12.) Its name is sometimes as an epithet for Cyrenaica, in the form of the adjective Berenicis. (Sil. Ital. iii. 249; Lucan, ix. 524: Beechey, Della Cella, Pacho, Barth.) [P.S.]

HESPE'RIDUM HORTI. [HESPERIDES.]

HESPE'RIDUM LACUS. [HESPERIDES.]

HE'SPERIS. [HESPERIDES.]

HESPE'RIUM PROMONTORIUM. [LIBYA.]

HESSUS (Ἥσσός: *Eth.* Ἥσσιος), a town of the Locri Ozolae, upon the coast of the Corinthian gulf, and on the road to Naupactus. Its exact site is uncertain, but it is probably represented by the Hellenic remains at *Vithari* or *Polypórtu*. (Thuc. iii. 101; Steph. B. *s. v.*; Leake, *Northern Greece*, vol. ii. p. 620.)

HETRICULUM. [BRUTTII.]

HETRU'RIA. [ETRURIA.]

HEXI. [SAXETANUM.]

HIBE'RNIA. [IERNE.]

HICE'SIA. [AEOLIAE INSULAE.]

HI'ERA (Ἱερά), the name of several islands.

1. One of the Aegates. [AEGATES, No. 1.]

2. One of the Aeolian or Liparaean islands. [AEOLIAE INSULAE.]

3. An island close to Calaureia, to which it is now united. [CALAUREIA.]

4. A small island between Thera and Therasia [THERA.]

HIERA SYCAMINUS (Ἱερὰ Συκάμινος, Ptol. iv. 5. § 74; Συκάμινος, Philostrat. *Vit. Apoll.* vi. 2; Plin. vi. 29. s. 32; *It. Anton.* p. 162), the southern frontier town of the Regio Dodecaschoenus. [AETHIOPIA.] The island Tachompso had been the original boundary; but the Romans extended it southward to Hiera-sycaminos. Here Apollonius of Tyana (Philostrat. *l. c.*) found one of those African markets in which wares,—gold, linen, ivory, and gums,—are exposed for sale, while the buyers and sellers kept apart from each other until each party had deposited a satisfactory equivalent. Hiera Sycamines is now probably represented by *Wady Maharrakah*, where the ruins of a temple are still visible. The distance between Syene, the N. boundary of this district, and *Wady Maharrakah* (720 stades = 12 schoeni = 90 miles), favours this supposition. Lat. 22° N. [W. B. D.]

HIERA'CON (*It. Anton.* p. 167) or THERACON (*Not. Imp.*), was a castle of Upper Egypt, situated on the right bank of the Nile. Here, in Roman times, was quartered the cohors prima of the Lusitanian auxiliaries. It stood nearly midway between the W. extremity of Mons Alabastrites and the city of Lycopolis, lat. 27° 15′ N. Hieracon (Ἱεράκων κώμη, Ptol. vi. 7. § 36) is to be distinguished from Hieracompolis (Ἱεράκων πόλις, Strab. xvii. p. 817), which was S. of Thebes, lat. 25° 5′ N., nearly opposite the town of Eileithuia. [W. B. D.]

HIERA'POLIS (Ἱεράπολις: *Eth.* Ἱεραπολίτης). 1. A considerable town in Phrygia, situated upon a height between the rivers Lycus and Maeander, about five miles north of Laodiceia, and on the road from Apameia to Sardis. It was probably founded by the Greeks, though we have no record of the time or circumstances of its foundation. It was celebrated for its warm springs and its Plutonium, to which two circumstances it appears to have owed its sanctity. The warm springs formed stalactites and incrustations. (Strab. xiii. p. 629; Vitruv. viii. 3.)

Digitized by Google

The Plutonium was a deep cave with a hollow opening, from which a mephitic vapour arose, which poisoned any one who inhaled it, with the exception of the Galli, who are said to have received no injury from it; but it appears to have lost its poisoning influence in the time of Ammianus. (Strab. *l. c.*; Plin. ii. 93. s. 95; Dion Cass. lxviii. 27; Amm. Marc. xxiii. 6.) The waters of Hierapolis were much used for dyeing. (Strab. xiii. p. 630.) Among the deities worshipped in Hierapolis the Great Mother of the Gods is especially named. (Plin. ii. 93. s. 95.) There was a Christian church in this town as early as the time of St. Paul. (*Coloss.* iv. 13.) At a later time it claimed the title of metropolis of Phrygia. (Hierocles, p. 665, with Wesseling's notes.) It was the birthplace of the philosopher Epictetus. The ruins of Hierapolis are situated at an uninhabited place called *Pambuk-kalessi*. They are of considerable extent, and have been visited and described by several modern travellers, who have also noticed the stalactites and incrustations mentioned by Strabo. Chandler speaks of a cliff as one entire incrustation, and describes it as "an immense frozen cascade, the surface wavy, as of water at once fixed, or in its headlong course suddenly petrified." (See the Travels of Pococke, Chandler, Arundell, Leake, Hamilton, and Fellowes.)

COIN OF HIERAPOLIS IN PHRYGIA.

2. A city of Cilicia, known only from coins, from which however we learn that it was situated upon the river Pyramus (Ἱεροπολιτῶν τῶν πρὸς τῷ Πυράμῳ: see below). The name of this city is always written Hieropolis, while that of Phrygia is Hierapolis. From the absence of all mention of this Cilician town by the ancient writers, Eckhel conjectures that it is a more recent name, and that it is perhaps the same place as Megarsus, since we find upon the coins of the latter Μεγαρσῶν τῶν πρὸς τῷ Πυραμῷ. (Eckhel, vol. iii. p. 57.)

COIN OF HIERAPOLIS IN CILICIA.

HIERA'POLIS (Ἱερὰ πόλις), the "Sacred City" of Cyrrhestica in Syria, situated on the high road from Antioch to Mesopotamia, 24 M. P. to the W. of the Euphrates and 36 M. P. to the SW. of Zeugma (*Peut. Tab.*), 2½ days' journey from Beroea, and 5 days' from Antioch (Zosim. iii. 12).

Hierapolis, or Hieropolis as it is called always on coins and in Stephanus of Byzantium, obtained its Hellenic name from Seleucus Nicator (Aelian, *H. A.* xii. 2), owing to the circumstance of BAMBYCE (Βαμβύκη), as it was called by the natives, being the chief seat of the worship of the "Syrian goddess" Astarte, or personification of the passive powers of Nature. (Lucian, *de Dea Syr.* c. i.)

"Bambycen quae alio nomine Hierapolis vocatur; Syris vero Magog. Ibi prodigiosa Atargatis. Graecis autem Deeceto dicta, colitur," Plin. v. 19. Solinus (*l. c.*) has in his text "Mabog," which is the correct reading, and appears in the Oriental forms "Mabedj" (Jaubert, *Géog. d'Edrise*, vol. ii. pp. 138, 155), "Manbesja," "Manbesjum" (Schultens, *Vita Saladini*), "Menba," "Manba" (Schultens, *Index Geogr.*), "Manbegj" (Abú-l-fedá, *Tab. Syr.* p. 128), and the modern name *Karâ Bambuche*, or *Bugûk Mambej*. Under the Seleucidae, from its central position between Antioch and Seleuceia on the delta of the Tigris, it became a great emporium. Strabo (xvi. p. 748) has given an interesting account of the passage of the caravans from Syria to Seleuceia and Babylon; the confusion of Edessa and Hierapolis is an error probably of the transcriber (comp. Groskurd, *ad loc.*). Crassus plundered the rich temple of the goddess, who presided over the elements of nature and the productive seeds of things, and seized upon the treasures, which it took several days to weigh and examine. And it was here that an ill omen befel him. (Plut. *Crass.* 17.)

Under Constantine, Hierapolis became the capital of the new province Euphratensis. (Malal. *Chron.* xiii. p. 317.) Julian, in his Persian campaign, appointed Hierapolis as the rendezvous for the Roman troops before their passage of the Euphrates. He has given an account of his march to it, which took up five days, in a letter to Libanius (*Ep.* xxvii.), and remained there three days, at the house of Sopater, a distinguished pupil of Iamblichus. At Hierapolis one of those unlucky signs which Ammianus (xxiii. 2. § 6) has so carefully recorded, took place at his entrance into the town. (Comp. Gibbon, c. xxiv.; Le Beau, *Bas Empire*, vol. iii. p. 58.)

With the establishment of Christianity, Hierapolis recovered its ancient indigenous Syrian name, but lost its splendour and magnificence by the downfall of the old worship (A.D. 540). Buzes, who commanded during the absence of Belisarius in the East, concentrated his forces at Hierapolis, but it only escaped being pillaged by Chosroes by the payment of tribute. (Procop. *B. P.* ii. 6; Gibbon, c. xlii.; Le Beau, vol. ix. p. 12.)

A.D. 1068 it was captured by the emperor Romanus Diogenes, in his valiant efforts to resist the progress of the Turks. (Zonar. vol. ii. p. 279; Le Beau, vol. xiv. p. 472.)

It does not fall within the province of this article to trace the connection between Bambyce = "Bambycina urbs," "Bombyciis copiis gaudens," and the introduction of the silk-worm from the East; much curious information on this point will be found in Ritter (*Erdkunde*, vol. x. pp. 1056—1062).

The ruins of this city were first discovered and described by Maundrell (*Journal*, p. 204) and by Pococke (*Trav.* vol. ii. pt. i. p. 166). But it was not till the period of Colonel Chesney's Expedition that the position was accurately fixed.

At a distance of 16 miles W. by S. of the passage of *Kal'-at-en-ejm*, at about 600 feet above the Euphrates, the ruins of Hierapolis occupy the centre of a rocky plain, where, by its isolated position, the city must not only have been deprived of running water, but likewise of every advantage which was likely to create and preserve a place of importance.

Digitized by Google

Some ruined mosques and square Saracenic towers, ith the remains of its surrounding walls and ditches, ark the limits of the Muslim city, within which e four large cisterns, a fine sarcophagus, and, nong other ancient remains, the scattered ruins of acropolis and two temples.

Of the smaller, the inclosure and portions of ven columns remain; but it seems to possess little terest compared with the larger, which may have en that of the Syrian "Queen of Heaven." Among e remains of the latter are some fragments of assive architecture, not unlike the Aegyptian, and l arches form one side of a square paved court, er which are scattered the shafts of columns and pitals displaying the lotus.

A little way to the W. of the walls there is an tensive necropolis, which contains many Turkish, ith some Pagan, Seljukian, and Syriac tombs; the st having some almost illegible inscriptions in the cient character. (Chesney, *Exped. Euphrat.* ol. i. p. 516.) Hierapolis was the ecclesiastical etropolis of the province Euphratensis. (Neale, *ist. of East. Church*, vol. i. p. 134.)

Eckhel (vol. iii. p. 261) has noticed the fact, at the coins of Hierapolis copy the type of those Antioch: they are Seleucid, autonomous, and imerial, ranging from Trajan to the elder and younger hilip. [E. B. J.]

HIERAPYTNA (Ἱεράπυτνα, Strab. ix. p. 440, pp. 472, 475; Plin. iv. 20; Ἱερὰ Πύτνα, Ptol. . 17. § 4, where some MSS. have Ἱερὰ Πέτρα; teph. B.; Inscrip. *ap.* Gruter, p. 595; Ἱεράπυδνα, ion Cass. xxxvi. 8; Hierocl. Ἱερὰ Πύδνα, *Stadiasm.*; iera, *Peut. Tab.*), a town of Crete, of which Strabo l. c.) says that it stood in the narrowest part of the land, opposite Minoa. Hierapytna, according to e Coast-describer, was 180 stadia from Biennus, hich agrees with the distance of 20 M. P. assigned it by the Peutinger Table. It was a town of reat antiquity, and its foundation was ascribed to e Corybantes; it bore the successive names of yrba, Pytna, Camirus, and Hierapytna. (Strab. p. 72; Steph. B. *s. v.*) From an inscription preerved among the Oxford marbles, it appears that e Hierapytnians were at one time allied with the eighbouring city of Priansus. (Böckh, *Corp. Inscrip. Graec.* n. 2556; Höck, *Kreta*, vol. iii. p. 72.) Traces of this city have been found at the *Castéle of Hierápetra*. (Pashley, *Trav.* vol. i. p. 71.) There are both autonomous and imperial oins belonging to Hierapytna; the symbol on the ormer is generally a palm tree. (Eckhel, vol. ii. p. 13.) [E. B. J.]

COIN OF HIERAPYTNA.

HIERASUS FL. (Ἱέρασος, Ptol. iii. 8. § 4), a iver of Dacia, which has been identified with the TIARANTUS (Τιαραντός, Herod. iv. 48; Schafarik, *lav. Alt.* vol. i. p. 506). Perhaps the river now called *erat*. [E. H. B.]

HIERA'TIS (Ἱέρατις, Arrian, *Ind.* c. 39), a town belonging to the province of Persis, on an island formed by a channel from a river in the neighbourhood. The whole country in its immediate neighbourhood appears to have been a peninsula, and to have borne the name in ancient times of Mesambria. It is not easy to fix its exact position; but it could not have been far from the modern *Abushir*. (Vincent, *Voy. of Nearchus*, vol. i. p. 390.) [V.]

HIERICUS. [JERICHO.]

HIEROMIAX. [JORDANES.]

HIERO'POLIS. [HIERAPOLIS.]

HIEROSO'LYMA. [JERUSALEM.]

HILLEVIO'NES, according to Pliny (iv. 27) the general name for all the inhabitants of Scandinavia. The name is not mentioned by Tacitus, who (*Germ.* 44, 45) divides all the inhabitants of Scandinavia into two groups, called *Suiones* and *Sitones*. The Hilleviones form one of the great groups into which all the German tribes were divided. (Comp. GERMANIA.) [L. S.]

HIMELLA, a river in the country of the Sabines, mentioned by Virgil in the same line with Casperia and Foruli. (*Aen.* vii. 714.) According to Vibius Sequester (p. 11. Oberlin), it was a river in the neighbourhood of Casperia; and if this is not a mere hasty inference from the line of Virgil, we may probably identify it with a small stream called *Aia* or *l'Aia*, which rises in the mountains to the N. of *Aspra*, and falls into the Tiber about 10 miles from that town. According to some authorities, this river is still called the *Imelle*, but this name appears to have been unknown to earlier topographers, and is perhaps merely a piece of classical learning. (Cluver. *Ital.* p. 675; Bunsen, in the *Ann. d. Inst.* vol. vi. p. 110.) [E. H. B.]

HI'MERA (Ἱμέρα: *Eth.* Ἱμεραῖος, Himeraeus, but the adj. Himeraeus: near *Termini*), an important Greek city of Sicily, situated on the N. coast of the island, at the mouth of the river of the same name, between Panormus and Cephaloedium. Thucydides says it was the only Greek city on this coast of Sicily (vi. 62, vii. 58), which must however be understood with reference only to *independent* cities; Mylae, which was also on the N. coast, and certainly of Greek origin, being a dependency of Zancle or Messana. All authorities agree that Himera was a colony of Zancle, but Thucydides tells us that, with the emigrants from Zancle, who were of Chalcidic origin, were mingled a number of Syracusan exiles, the consequence of which was, that, though the institutions (νόμιμα) of the new city were Chalcidic, its dialect had a mixture of Doric. The foundation of Himera is placed subsequent to that of Mylae (as, from their relative position, might naturally have been expected) both by Strabo and Scymnus Chius: its date is not mentioned by Thucydides, but Diodorus tells us that it had existed 240 years at the time of its destruction by the Carthaginians, which would fix its first settlement in B.C. 648. (Thuc. vi. 5; Strab. vi. p. 272; Scymn. Ch. 289; Diod. xiii. 62; Hecat. fr. 49; Scyl. p. 4. § 13.) We have very little information as to its early history: an obscure notice in Aristotle (*Rhet.* ii. 20), from which it appears to have at one time fallen under the dominion of the tyrant Phalaris, being the only mention we find of it, until about B.C. 490, when it afforded a temporary refuge to Scythes, tyrant of Zancle, after

Digitized by Google

his expulsion from the latter city (Herod. vi. 24). Not long after this event, Himera fell itself under the yoke of a despot named Terillus, who sought to fortify his power by contracting a close alliance with Anaxilas, at that time ruler both of Rhegium and Zancle. But Terillus was unable to resist the power of Theron, despot of Agrigentum, and, being expelled by him from Himera, had recourse to the assistance of the Carthaginians, a circumstance which became the immediate occasion of the first great expedition of that people to Sicily, B.C. 480. (Id. vii. 165.) The magnitude of the armament sent under Hamilcar, who is said to have landed in Sicily with an army of 300,000 men, in itself sufficiently proves that the conquest of Himera was rather the pretext, than the object, of the war; but it is likely that the growing power of that city, in the immediate neighbourhood of the Carthaginian settlements of Panormus and Solus, had already given umbrage to the latter people. Hence it was against Himera that the first efforts of Hamilcar were directed: but Theron, who had thrown himself into the city with all the forces at his command, was able to maintain its defence till the arrival of Gelon of Syracuse, who, notwithstanding the numerical inferiority of his forces, defeated the vast army of the Carthaginians with such slaughter that the battle of Himera was regarded by the Greeks of Sicily as worthy of comparison with the contemporary victory of Salamis. (Herod. vii. 166, 167; Diod. xi. 20—23; Pind. *Pyth.* i. 152.) The same feeling probably gave rise to the tradition or belief, that both triumphs were achieved on the very same day. (Herod. *l. c.*)

This great victory left Theron in the undisputed possession of the sovereignty of Himera, as well as of that of Agrigentum; but he appears to have bestowed his principal attention upon the latter city, and consigned the government of Himera to his son Thrasydaeus. But the young man, by his violent and oppressive rule, soon alienated the minds of the citizens, who in consequence applied for relief to Hieron of Syracuse, at that time on terms of hostility with Theron. The Syracusan despot, however, instead of lending assistance to the discontented party at Himera, betrayed their overtures to Theron, who took signal vengeance on the unfortunate Himeraeans, putting to death a large number of the disaffected citizens, and driving others into exile. (Diod. xi. 48.) Shortly after, seeing that the city had suffered greatly from these severities, and that its population was much diminished, he sought to restore its prosperity by establishing there a new body of citizens, whom he collected from various quarters. The greater part of these new colonists were of Dorian extraction: and though the two bodies of citizens were blended into one, and continued to live harmoniously together, we find that from this period Himera became a Doric city, and both adopted the institutions, and followed the policy, of the other Doric states of Sicily. (Id. xi. 49.) This settlement seems to have taken place in B.C. 476*, and Himera continued subject to Theron till his death, in 472: but Thrasydaeus retained possession of the sovereignty for a very short time after the decease of his father, and his defeat by Hieron of Syracuse was speedily followed by his expulsion both from Agrigentum and Himera. (Id. xi. 53.) In B.C. 466 we find the Himeraeans, in their turn, sending a force to assist the Syracusans in throwing off the yoke of Thrasybulus; and, in the general settlement of affairs which followed soon after, the exiles were allowed to return to Himera, where they appear to have settled quietly together with the new citizens. (Id. xi. 68, 76.) From this period Diodorus expressly tells us that Himera was fortunate enough to escape from civil dissensions (xi. 49), and this good government must have secured to it no small share of the prosperity which was enjoyed by the Sicilian cities in general during the succeeding half-century.

But though we are told in general terms that the period which elapsed from this re-settlement of Himera till its destruction by the Carthaginians (B.C. 461—408), was one of peace and prosperity, the only notices we find of the city during this interval refer to the part it took at the time of the Athenian expedition to Sicily, B.C. 415. On that occasion, the Himeraeans were among the first to promise their support to Syracuse: hence, when Nicias presented himself before their port with the Athenian fleet, they altogether refused to receive him; and, shortly after, it was at Himera that Gylippus landed, and from whence he marched across the island to Syracuse, at the head of a force composed in great part of Himeraean citizens. (Thuc. vi. 62, vii. 1, 58; Diod. xiii. 4, 12.) A few years after this the prosperity of the city was brought to a sudden and abrupt termination by the great Carthaginian expedition to Sicily, B.C. 408. Though the ostensible object of that armament, as it had been of the Athenian, was the support of the Segestans against their neighbours, the Selinuntines, yet there can be no doubt that the Carthaginians from the first, entertained more extensive designs: and immediately after the destruction of Selinus, Hannibal, who commanded the expedition, hastened to turn his arms against Himera. That city was ill prepared for defence; its fortifications were of little strength, but the citizens made a desperate resistance, and by a vigorous sally inflicted severe loss on the Carthaginians. They were at first supported by a force of about 4000 auxiliaries from Syracuse, under the command of Diocles; but that general became seized with a panic fear for the safety of Syracuse itself, and precipitately abandoned Himera, leaving the unfortunate citizens to contend single-handed against the Carthaginian power. The result could not be doubtful, and the city was soon taken by storm: a large part of the citizens were put to the sword, and not less than 3000 of them, who had been taken prisoners, were put to death in cold blood by Hannibal, as a sacrifice to the memory of his grandfather Hamilcar. (Diod. xiii. 59—62; Just. *Hist.* i. 1. § 37.) The city itself was utterly destroyed, its buildings razed to the ground, and even the temples themselves were not spared: the Carthaginian general being evidently desirous to obliterate all trace of a city whose name was associated with the great defeat of his countrymen.

Diodorus, who relates the total destruction of Himera, tells us expressly that it was never rebuilt, and that the site remained uninhabited down to his own times (xi. 49). It seems at first in contradic-

* There is a confusion about this date: for, though Diodorus relates the circumstances in the year of Pharsalus, Ol. LXXVI. 1, which would place it in B.C. 476, he adds that the new colony subsisted 58 years, till its destruction by the Carthaginians, which would refer it to the year 466 B.C. This last date (which has been inadvertently adopted by Mr. Clinton, *F. H.* vol. i. p. 198) is clearly incompatible with that Theron died in B.C. 472.

Digitized by Google

on with this statement, that he elsewhere includes ie Himeraeans, as well as the Selinuntines and grigentines, among the exiled citizens that were lowed by the treaty concluded with Carthage, in .c. 405, to return to their homes, and inhabit their rn cities, on condition of paying tribute to Carthage id not restoring their fortifications. (Id. xiii. 114.) nd it seems clear that many of them at least ailed themselves of this permission, as we find the Himeraeans subsequently mentioned among the states iat declared in favour of Dionysius, at the commencement of his great war with Carthage in B. C. 97; though they quickly returned to the Carthaginian alliance in the following year. (Id. xiv. 47, 6.) The explanation of this difficulty is furnished y Cicero, who tells us that, "after the destruction Himera, those citizens who had survived the calmity of the war established themselves at Thermae, ithin the confines of the same territory, and not ar from their old town." (Cic. *Verr.* ii. 35.) Diodorus indeed gives us a somewhat different acount of the foundation of Thermae, which he reresents as established by the Carthaginians themselves before the close of the war, in B. C. 407. Diod. xiii. 79). But it is probable that both statements are substantially correct, and that the Carthaginians founded the new town in the immediate eighbourhood of Himera, in order to prevent the ld site being again occupied; while the Himeraean xiles, when they returned thither, though they ettled in the new town, naturally regarded themselves as still the same people, and would continue o bear the name of Himeraeans. How completely, ven at a much later period, the one city was regarded as the representative of the other, appears rom the statement of Cicero, that when Scipio Africanus, after the capture of Carthage, restored to he Agrigentines and Gelenses the statues that had een carried off from their respective cities, he at the ame time restored to the citizens *of Therma* hose that had been taken from *Himera*. (Cic. *Verr.* ii. 35, iv. 33.) Hence we cannot be surprised o find that, not only are the Himeraeans still spoken f as an existing *people*, but even that the name f Himera itself is sometimes inadvertently used as hat of their city. Thus, in B. C. 314, Diodorus ells us that, by the treaty between Agathocles and he Carthaginians, it was stipulated that Heracleia, elinus, and *Himera* should continue subject to Carthage as they had been before. (Diod. xix. 71.) t is much more strange that we find the name of Himera reappear both in Mela and Pliny, though re know from the distinct statements of Cicero and Strabo, as well as Diodorus, that it had ceased to xist centuries before. (Strab. vi. p. 272; Mel. ii. 7. § 16; Plin. iii. 8. s. 14.)

The new town of THERMAE or THERMA, called or the sake of distinction THERMAE HIMERENSES Θερμαὶ αἱ Ἱμεραῖαι, Pol.; Θερμαὶ Ἱμέραι, Ptol.; Θερμὰ, Θερμὰ Ἱμεραία, Diod.: *Eth.* Θερμίτης, Thermitanus), which thus took the place of Himera, obviously derived its name from the hot springs for which it was celebrated, and the first discovery of which was connected by legends with the wanderings of Hercules. (Diod. iv. 23, v. 3; Pind. *Ol.* xii. 28.) It appears to have early become a considerable town, though it continued, with few and brief exceptions, to be subject to the Carthaginian rule. In the First Punic War its name is repeatedly mentioned. Thus, in B. C. 260, a body of Roman troops were ncamped in the neighbourhood, when they were attacked by Hamilcar, and defeated with heavy loss. (Pol. i. 24; Diod. xxiii. 9. Exc. H. p. 503.) Before the close of the war, Thermae itself was besieged and taken by the Romans. (Pol. i. 39; Diod. xxiii. 20. Exc. H. p. 506.) We have, however, no clue to the circumstances which led to the peculiar favour which this city seems to have received at the hands of its Roman conquerors. Cicero tells us that the Roman government restored to the Thermitani their city and territory, with the free use of their own laws, as a reward for their steady fidelity ("quod semper in amicitia fideque mansissent," Cic. *Verr.* ii. 37). As we see that they were on hostile terms with Rome during the First Punic War, it can only be to the subsequent period that these expressions apply; but the occasion to which they refer is unknown. In the time of Cicero, Thermae appears to have been a flourishing place, carrying on a considerable amount of trade, though the orator speaks of it as "oppidum non maximum." (Id. ii. 46, 75, iii. 42.) It seems to have received a colony in the time of Augustus, whence we find mention in inscriptions of the "Ordo et Populus splendidissimae Coloniae Augustae Himeraeorum Thermitanorum" (Castell. *Inscr. Sicil.* p. 47; Gruter. *Inscr.* p. 433, no. 6.): and there can be very little doubt that the "Thermae colonia" of Pliny in reality refers to this town, though he evidently understood it to be Thermae Selinuntiae, as he places it on the S. coast between Agrigentum and Selinus. (Plin. iii. 8. s. 14.) We have little subsequent account of Thermae; but, as its name is found in Ptolemy and the Itineraries, it appears to have continued in existence throughout the period of the Roman Empire, and probably never ceased to be inhabited, as the modern town of *Termini* retains the ancient site as well as name. (Ptol. iii. 4. § 4; *Itin. Ant.* p. 92; *Tab. Peut.*) Considerable remains of the ancient city are still visible, but all of the Roman period; among these, the most interesting are those of the ancient Thermae, which are still applied to their original purpose, and are now known as the *Bagni di S. Calogero:* their form and construction is peculiar, being probably determined by the circumstances of the locality in which they were built. Besides these, the ruins of a theatre were still extant in the days of Fazello, but have been since destroyed; some portions of an aqueduct still remain, and the ruins of a large building of Roman date, but of uncertain destination: numerous inscriptions and fragments of ancient sculpture are also preserved in the modern city, (Fazell. *de Reb. Sic.* ix. 1; Biscari, *Viaggio in Sicilia*, pp. 235—239.)

No doubt can therefore exist with regard to the site of Thermae, which would be, indeed, sufficiently marked by the hot springs themselves; but the exact position of the more ancient city of Himera is still a subject of controversy. The opinion of Cluverius, which has been followed by almost all subsequent writers, would place it on the left bank of the river which flows by *Termini* on the west, and is thence commonly known as the *Fiume di Termini*, though called in the upper part of its course *Fiume S. Lionardo*. On this supposition the inhabitants merely removed from one bank of the river to the other; and this would readily explain the passages in which Himera and Thermae appear to be regarded as identical, and where the *river* Himera (which unquestionably gave name to the older city) is represented at the same time as flowing by Thermae. (Sil. Ital. xiv. 232; Plin. iii. 8. s. 14; Vib. Sequest.

Digitized by Google

p. 11.) On the other hand, there is great difficulty in supposing that the *Fiume S. Lionardo* can be the river Himera (see the following article); and all our data with regard to the latter would seem to support the view of Fazello, who identifies it with the *Fiume Grande*, the mouth of which is distant just 8 miles from *Termini*. This distance can hardly be said to be too great to be reconciled with Cicero's expression, that the new settlement was established "non longe ab oppido antiquo" (Cic. *Verr.* ii. 35); while the addition that it was in the same territory ("in ejusdem agri finibus," *l. c.*) would rather seem to imply that it was *not very near* the old site. It may be added, that, in this case, the new site would have had the recommendation in the eyes of the Carthaginians of being *nearer* to their own settlements of Solus and Panormus, and, consequently, more within their command. But Fazello's view derives a strong confirmation from the circumstance, stated by him, that the site which he indicates, marked by the *Torre di Bonfornello* on the sea-coast (on the left bank of the *Fiume Grande*, close to its mouth), though presenting no ruins, abounded in ancient relics, such as vases, bronzes, &c.; and numerous sepulchres had also been brought to light. (Fazell. ix. 2.) On the other hand, neither Cluverius nor any other writer has noticed the existence of any ancient remains on the west bank of the Himera; nor does it appear that the site so fixed is one adapted for a city of importance. The localities do not appear to have been carefully investigated by any recent traveller, though such an examination would probably set the whole question at rest. In the mean time the probabilities seem strongly in favour of the views of Fazello.

Himera was celebrated in antiquity as the birthplace of the poet Stesichorus, who appears, from an anecdote preserved by Aristotle, to have taken considerable part in the political affairs of his native city. His statue was still preserved at Thermae in the days of Cicero, and regarded with the utmost veneration. (Arist. *Rhet.* ii. 20; Cic. *Verr.* ii. 35; Sil. Ital. xiv. 232; Paus. iii. 19. § 13.; Suid. *s. v.* Στησίχορος.) Ergoteles, whose victory at the Olympic games is celebrated by Pindar, was a citizen, but not a native, of Himera. (Pind. *Ol.* xii.; Paus. vi. 4. § 11.) On the other hand, Thermae had the honour of being the birthplace of the tyrant Agathocles. (Diod. xix. 2.) The magnificence of the ancient city, and the taste of its citizens for the encouragement of art, are attested by Cicero, who calls it "in primis Siciliae clarum et ornatum;" and some evidence of it remained, even in the days of that orator, in the statues preserved by the Thermitani, to whom they had been restored by Scipio, after the conquest of Carthage; and which were valuable, not only as relics of the past, but from their high merit as works of art. (Cic. *Verr.* ii. 35.) [E. H. B.]

COIN OF HIMERA.

HIMERA (Ἱμέρας), the name of two rivers in Sicily, the one flowing to the N. into the Tyrrhenian Sea, the other to the S. coast of the island, but which, by a strange confusion, were regarded by many ancient writers as one and the same river, which is in consequence described as rising in the centre of the island, and flowing in two different directions, so as completely to divide Sicily into two parts. It is singular that, if we may believe Virgil's Sequester, this absurd notion is as old as the time of Stesichorus, who was himself a native of Himera. Mela is, however, the only one of the ancient *geographers* who adopts it. (Mel. ii. 7. § 17; Solin. v. § 17; Vib. Sequest. p. 12; Sil. Ital. xiv. 253. Antig. Caryst. 133; Vitruv. viii. 3. § 7.)

1. The southern and most important river of the name, is certainly the one now called the *Fiume Salso*, one of the most considerable streams in Sicily, which rises in the *Monti di Madonia*, the Nebrodes Mons of the ancients, and flowing nearly due S. enters the sea at *Alicata* (Phintias). In the upper part of its course it is composed of two branches, running nearly parallel with one another: the one now called the *Fiume Grande* rising near *Gangi*, the other, called the *Fiume di Petralia*, from the town of the same name: it is only after the junction of the two that it obtains the name of *Fiume Salso*. It is impossible to say which of the two branches was regarded by the ancients as the true Himera; but in either case that river has a course of above 50 miles from N. to S., and its sources are not above 15 miles from the N. coast of the island. Hence the expression of Polybius and Livy, that the Himera nearly divides the whole of Sicily into two parts, is by no means inaccurate. (Pol. vii. 4; Liv. xxiv. 6.) But it is evidently this circumstance, coupled with the fact that there was another river of the same name flowing into the Tyrrhenian Sea, which gave rise to the fable above noticed. Strabo, who does not notice the southern Himera, appears (evidently by mistake) very nearly the same words as Polybius to the northern river of the name. (Strab. vi. p. 266.) Diodorus notices the brackish quality of the waters of the Himera, which gives rise to its modern name of *Fiume Salso*: this is caused by the junction of a small stream near *Castanisetta*, that flows from the salt mines in that vicinity. (Diod. xix. 109; Smyth's *Sicily*, p. 198.) Solinus erroneously ascribes this quality to the *northern* Himera (Solin. v. § 17); while Vitruvius rightly attributes it to the southern river only (viii. 3. § 7).

Historically, the southern Himera is remarkable for the great battle fought on its banks between Agathocles and the Carthaginians, in which the latter obtained a complete victory, B. C. 311. (Diod. xix. 107—110.) The scene of this action was a short distance from the mouth of the river, the Carthaginians occupying the hill of Eknomus, while Agathocles was encamped on the left bank. [EKNOMUS.] At a much earlier period, B. C. 446, it witnessed a defeat of the Agrigentines by the Syracusans (Diod. xii. 8); and, again, in the Second Punic War, B. C. 212, became the scene of an action between Marcellus and the Carthaginian forces under Hanno and Epicydes of Syracuse, in which the latter were defeated and driven to take shelter within the walls of Agrigentum. (Liv. xxv. 40, 41.) By the treaty concluded with Carthage by Hieronymus of Syracuse, it was agreed to divide the whole of Sicily between the two powers, so that the river Himera should be the boundary of their respective dominions. (Polyb. vii. 4; Liv. xxiv. 6.)

Digitized by Google

But this arrangement was never actually carried into effect. Ptolemy correctly places the mouth of the southern Himera to the E. of the emporium of Agrigentum (Ptol. iii. 4. § 7): he is the only one of the geographers who mentions both rivers of the name. An inscription recorded by Torremuzza, containing a dedication ΑΣΚΛΗΠΙΩ ΚΑΙ ΙΜΕΡΑ ΠΟΤΑΜΩ, must, from its being found at *Caltanisetta*, refer to the southern Himera. (Castell. *Inscr. Sicil.* p. 4; Boeckh. *C. I.* no. 5747.)

2. The northern Himera, a much less considerable stream than the preceding, is uniformly described as flowing by the city to which it gave its name (Plin. iii. 8. s. 14; Steph. B. *s. v.* Ἀκράγας; Vib. Sequest. p. 11); and Pindar speaks of the great victory of Gelon (which we know to have been fought in the immediate vicinity of the city) as gained "upon the banks of the fair waters of the Himera" (*Pyth.* i. 153). Hence its identification is necessarily connected with the determination of the site of that city, a question still the subject of dispute. Cluverius, and those who have followed him in placing Himera itself in the immediate neighbourhood of *Termini*, and on the left bank of the river which flows by that town, have, in consequence, assumed the stream just mentioned (now called the *Fiume di Termini*, or, in the upper part of its course, the *Fiume S. Lionardo*) to be the ancient Himera. Fazello, on the contrary, identifies the latter with the river now called the *Fiume Grande*, which rises in the *Madonia* mountains near *Polizzi*, and flows into the sea about 8 miles E. of *Termini*. The arguments in favour of the latter view are certainly very strong. 1. Strabo, in giving the distances along the N. coast of Sicily, reckons 18 miles from Cephaloedium (*Cefalù*) to the mouth of the Himera, and 35 from thence to Panormus. The first distance is overstated, the true distance to the mouth of the *F. Grande* being only 15 miles; the latter is not about right if we follow the windings of the coast: whereas, if we place the Himera beyond *Termini*, both distances are equally wrong. 2. Ptolemy distinctly places the mouth of the river Himera between Thermae (*Termini*) and Cephaloedium, and, therefore, to the east of the former city. (Ptol. iii. 4. § 3.) This is assumed by Cluverius to be a mistake of Ptolemy, and it must be admitted that many such mistakes occur in that author's description of Sicily; but still there is no occasion to multiply them *unnecessarily*. Lastly, the *northern* Himera be recognised in the *Fiume Grande*, — the sources of which near *Polizzi* are in the very same group of mountains with, and a very short distance from, those of the *Fiume di Petralia*, the branch of the *southern* Himera, — the notion of these being one and the same river becomes in some degree intelligible; while it is difficult to conceive how such a notion should have arisen, if the head waters of the two were separated by an interval of many miles. The other arguments connected with the site of the *city*, are considered in that article. Theocritus more than once alludes to the river Himera as a celebrated Sicilian stream; but in such general terms as to afford no indication which of the two rivers he means: the Scholiast, however, understands him to refer to the northern Himera. (Theocr. 24, vii. 75; Schol. *ad loc.*) [E. H. B.]

HINNOM. [Jerusalem.]

HI'PPANA (Ἵππανα, Pol.), a town of Sicily, mentioned by Polybius as being taken by assault by the Romans in the First Punic War, B. C. 260. (Pol. i. 24.) Diodorus, in relating the events of the same campaign, mentions the capture of a town called Sittana, for which we should in all probability read Hippana. (Diod. xxiii. 9. Exc. Hoesch. p. 503; Wesseling, *ad loc.*; Cluver. *Sicil.* p. 392.) The correctness of the name found in Polybius is confirmed by Stephanus of Byzantium (*s. v.*), who, however, writes it Ἴπανα, but cites Polybius as his authority. No other author mentions the place, which appears to have been situated in the neighbourhood of Panormus, but of which nothing further is known. According to Sillig's recent edition of Pliny, it appears that some of the best MSS. give the name of "Ipanenses" in that author's list of Sicilian towns (iii. 8. s. 14. § 91), where the older editions have "Ichanenses." If this reading be adopted, it in all probability refers to the same place as the Hippana of Polybius: but as the reading Ichanenses is also supported by the authority of Stephanus (who notices Ichana as a town of Sicily), the point must be considered doubtful. [E. H. B.]

HI'PPARIS (Ἵππαρις), a small river of Sicily, flowing by the city of Camarina, whence it is now called the *Fiume di Camarana*. It is mentioned by Pindar in connection with that city (Pind. *Ol.* v. 27), from its proximity to which it derives its celebrity. [Camarina.] Though but a small stream, and having a course of only 12 miles, it has a copious and perennial supply of clear water, a rare circumstance in Sicily: hence the expression of Silius Italicus, "pauperis alvei Hipparis," is singularly inapplicable. (Sil. Ital. xiv. 230; Vib. Sequest. p. 12; Schol. *ad Pind. l. c.*; Nonnus. *Dionys.* xiii. 317.) It is evidently the same river of which the name is erroneously written in Ptolemy, Hippōrus. (Ἵππωρος, Ptol. iii. 4. § 7.) The tutelary divinity of the stream is represented on some of the coins of Camarina, accompanied by his name, ΙΠΠΑΡΙΣ. (Eckhel, vol. i. p. 199.) [E. H. B.]

HIPPA'SII (Ἱππάσιοι, Strab. xv. p. 698), an Indian tribe who occupied the district between the Cophes and the Indus along the southern spurs of the Paropamisus. There seems good reason for supposing that they are one and the same tribe as the Aspasii or Aspii mentioned by Arrian (*Anab.* iv. 23—25). The name is derived from the Sanscrit Aspa or Aswa, "a horse," and is probably intended as a Greek translation of it. Lassen has conjectured that they are the same as the Aswasilas of ancient Hindoo geography. The name is variously written *Pasii* and *Hypasii*. (Wilson, *Ariana*, p. 187; Groskurd's *Strabo*, vol. iii. p. 119.) [V.]

HIPPEMOLGI (Ἱππημολγοί), "mare-milkers," a general name applied by the Greeks to the nomad tribes who moved about with their tents and herds over the steppes of Northern Europe and Asia. Thus Zeus, in the Iliad (xiii. 4), when he turns away his eye from Troy towards Thrace, sees, besides the Thracians and Mysians, other tribes, whose names cannot be made out; but are known as milk-eaters, and mare-milkers. The same characteristic attributes appear in Hesiod (*Fr.* 63—64, ed. Marktscheffel), connected with the Scythians. (Comp. Strab. vii. pp. 300—302; Niebuhr, *Kleine-Schrift.* vol. i. p. 365; Schafarik, *Slav. Alt.* vol. i. p. 272.) The mares' milk was made into cheese (Hippocrat. vol. i. p. 556, ed. Kühn), and, as Mr. Grote (*Hist. of Greece*, vol. iii. p. 323) remarks, probably served the same purpose of procuring the intoxicating drink called *kumiss*, as at present among the Bashkirs and the Kalmucks. [E. B. J.]

HIPPI PROM. [HIPPO REGIUS.]

HIPPICI MONTES (τὰ Ἱππικὰ ὄρη, Ptol. v. 9), the N. continuation of the Ceraunii M., a chain of mountains on the W. bank of the Rha. [E. B. J.]

HIPPO, in Spain. 1. [CARPETANI.] 2. H. NOVA. A town belonging to the province of Baetica and the conventus of Corduba, near Cisimbrum. (Plin. iii. 1. s. 3.) [P. S.]

HIPPOCORO'NIUM (Ἱπποκορώνιον), a city in Crete mentioned by Strabo (x. p. 472), which Höck has placed near Hierapytna. Mr. Pashley (*Trav.* vol. i. p. 62) considers that the modern *Apokórona* is a corruption of the ancient name. [E. B. J.]

HIPPOCRE'NE FONS. [HELICON.]

HIPPOCU'RA (Ἱππόκουρα, Ptol. vii. 1. § 6. viii. 26. § 15), a town of some importance in India intra Gangem, in the district called Ariaca. It was situated on or near the Nanaguna, and appears from another passage of Ptolemy to have been the seat of the palace of a king, whom he calls Baleocarus (vii. 1. § 83). It has been conjectured by Forbiger that it is the same as the modern *Hydrabad*, and, with less probability by Ritter, that it is represented by *Bangalore* (v. p. 487). [V.]

HIPPO DIARRHYTUS or ZARITUS (Ἵππων Διάρρυτος, Ptol. iv. 3. § 6; H. Zaritus, *Itin. Ant.* p. 21, *V. R.* H. Zarrhytus; Ippons Diaritus, *Tab. Peut.*; and simply Ἵππου πόλις, Scyl. p. 30; *Benizert* or *Bizerta*), a Tyrian colony in Zeugitana, close to the extreme N. headland of Africa [CANDIDUM PR.], 36 M. P. W. of Utica, and 126 M. P. E. of Hippo Regius. It stood on W. side of the entrance of a large lake which communicated with the sea, and which received the waters of another lake: the former was called HIPPONITIS PALUS (Ἱππονῖτις λίμνη), and the latter SISARA (Σίσαρα). Its situation exposed it to frequent inundations, whence, as the Greeks said, the epithet διάρρυτος. But it seems more probable that this is the remnant of some Phoenician title: the ancient writers were by no means agreed on the true form of the name, as is seen above, and of this uncertainty we have a further proof in the expression of Pliny, who is apparently attempting an etymology: "oppidum quod Hipponem *diarrhytum* vocant, Diarrhytum a Graecis dictum." (Plin. v. 4. s. 3.) Polybius and Appian give the forms Ἱππακρίτων πόλις (Polyb. i. 82), and Ἱππάγρετα (Appian, viii. 110).

The city was fortified and provided with a new harbour by Agathocles (Appian, *l. c.*): under the Romans it was a free city (Plin.): and it seems to have been raised to the rank of a colony, for the younger Pliny calls it Hipponensis colonia. (*Epist.* ix. 33; comp. Strab. xvii. p. 832; Mela, i. 7. § 2; Plin. ix. 8; Barth, *Wanderungen, &c.* pp. 202, 211). [P. S.]

HIPPO REGIUS (Ἵππων Βασιλικός: Ra. S. of Bona), a maritime city of Numidia, which received its surname from its being a residence of the Numidian kings, but is of higher fame as the see of St. Augustine. It was a colony of Tyre, and stood 5 M. P. NW. of the river Ubus, on the W. side of a large bay to which it gave its name (HIPPONENSIS SINUS: *Golfe de Bone*), as well as to the promontory at its entrance on the W. (Hippi Promontorium, Ἵππου ἄκρα: *Cape of Hermes*). It was a free city and a place of importance in the Roman times, by which it was made a colony; and it continued to be one of the most flourishing cities of N. Africa, till it was destroyed by the Vandals in A. D. 430. It was during the progress of the siege that the great Augustine died. (Sall. *Jug.* 19; Hirt. *Bell. Afr.* 96; Strab. xvii. p. 832; Mela, i. 7; Plin. v. 3. s. 2; *Itin. Ant.* p. 20; *Tab. Peut.*; Diod. xx. 57; Sil. Ital. i. 3. iii. 259; Shaw, *Travels in Barbary*, p. 44; Barth, *Wanderungen, &c.* p. 70). [P. S.]

HIPPOLA (Ἵππόλα; *Eth.* Ἱππολαΐτης, fem. Ἱππολαΐτις), a town of Laconia, a little north-west of the promontory of Taenarum, in ruins in the time of Pausanias. It contained a temple of Athena Hippolaitis. It stood either at *Kipúla*, which is apparently a corruption of the ancient name, or at the ruins called *κάστρον τῆς ὠραίας* on the highest point of the peninsula of *Kavo Grosso*. (Leake, *Morea*, vol. i. p. 287, *Peloponnesiaca*, p. 175; Boblaye, *Recherches, &c.* p. 91; Curtius, *Peloponnesos*, vol. ii. p. 282.)

HIPPONENSIS SINUS. [HIPPO REGIUS].

HIPPONIATES SINUS (Ἱππωνιάτης κόλπος, Strab. vi. pp. 255, 261; Ptol. iii. 1. § 9), a gulf or bay on the W. side of the Bruttian peninsula so called from the city of Hipponium, near its southern extremity. It was however known also by various other names: thus Thucydides calls it the Terinaean Gulf (Τεριναῖος κόλπος, Thuc. vi. 104), and Pliny also names it the SINUS TERINAEUS, though he mentions also, as if it were a *different* bay (which is certainly a mistake), the SINUS VIBONENSIS (Plin. iii. 5. s. 10). The latter name is used also by Cicero (*ad Att.* xvi. 6). But besides these, we find that it was called the SINUS NAPETINUS or NAPITINUS by Antiochus of Syracuse (ap. Strab. vi. p. 255; Dionys. i. 35), and LAMETINUS by Aristotle (*Pol.* vii. 10). The last name was evidently derived from a town named Lametium or Lametia situated at the mouth of the river Lametus (*Lamato*), which flows into the gulf in question [LAMETUS]: and the name of Napetinus would seem to point in like manner to the existence of a town called Napetium, though we have no other authority for this fact. The gulf itself, which is now known as the *Golfo di Sta. Eufemia*, from a village of that name, deeply indents the coast of Bruttium on the W., as the *Golfo di Squillace*, or Scylletium Sinus, does on the E.: the neck of land between them is composed only of low hills of tertiary strata, presenting a striking contrast to the lofty masses of the Apennines, which rise abruptly on the N. and S. of this isthmus. [BRUTTII.] The northern limit of the Gulf of *Sta. Eufemia* is formed by the point called *Capo Surero*, probably the promontory cited by Lycophron Lampetes [CLAMPETIA]: and its southern by the bold projecting headland now called *Capo Vaticano*: but there is no authority for supposing this name to be ancient. [E. H. B.]

HIPPONITIS PALUS. [HIPPO DIARRHYTUS.]

HIPPONIUM (Ἱππώνιον: *Eth.* Ἱππωνιεύς, Steph. B.: but on coins, Ἱππωνιενς, Hipponiates), or HIPPO (Mel., Plin.), called by the Romans VIBO, or VIBO VALENTIA (Οὐιβὼν Οὐαλεντία, Ptol.: *Eth.* Vibonensis: *Bivona*), an important Greek city on the west coast of Bruttium, on the shores of the bay to which it gave the name of Sinus Hipponiates, now the *Gulf of St. Eufemia*. It was undoubtedly of Greek origin, and we are told by Strabo that it was a colony from the Italian Locri, on the opposite side of the Bruttian peninsula. (Strab. vi. p. 256; Scymn. Ch. 308; Scyl. p. 4. § 12.) No mention of it is found in history, though it seems to have been a considerable town, till B. C. 389, when it was taken by Dionysius of Syracuse, who destroyed the city, removed the inhabitants to Syracuse, and gave its

Digitized by Google

its territory to the Locrians. (Diod. xiv. 107; Dionys. xix. *Fr.* p. 2359, Reiske.) But 10 years afterwards (B. C. 379) the city was restored by the Carthaginians, and the exiled inhabitants re-established there. (Id. xv. 24.) It did not long, however, continue to enjoy its independence, having fallen into the hands of the Bruttians, apparently soon after B. C. 356, the date given for the first rise of the Bruttian people. (Diod. xvi. 15; Strab. vi. p. 256.) It was wrested from the latter nation for a time by Agathocles, in B. C. 294, who appears to have regarded the place as a stronghold of importance, and constructed a port or naval station (*ἐπίνειον*) there: but after the departure of Agathocles himself the garrison he had left at Hipponium was put to the sword, and the city recovered by the Bruttians. (Diod. xxi. 8. Exc. H. p. 491; Strab. *l. c.*) It now continued in their hands until it fell with the rest of the Bruttian peninsula under the yoke of Rome; but no mention of it is again found, except that the "Vibonensis ager" was in B. C. 218 ravaged by a Carthaginian fleet (Liv. xxi. 51), until after the close of the Second Punic War: and it is remarkable that the name is not even once mentioned during the long-protracted operations of Hannibal in the Bruttian territory. But shortly after the close of the war (in B. C. 192) a Roman colony was established there, consisting of not less than 4000 settlers, including 300 knights (Liv. xxxv. 40; Vell. Pat. i. 14), which was thenceforth known by the name of Vibo Valentia. Strabo tells us that the name of Hipponium was at this time changed into Vibo Valentia, or, as he writes it, Vibona Valentia (*Οὐιβῶνα Οὐαλεντία*, Strab. vi. p. 256); but this is not quite correct: the new colony, as we learn from its coins, having assumed the name of Valentia only; while that of Vibo (which is evidently only the Bruttian or Oscan form of Hippo, and was very probably the original name of the city before it became a Greek colony at all) was retained with it in common usage, or was still employed without the addition of Valentia. Thus, Cicero twice uses the name of Vibo alone to designate the town, but in another passage calls the inhabitants "Valentini." (Cic. *in Verr.* ii. 40, v. 16, *ad Att.* xvi. 6.)

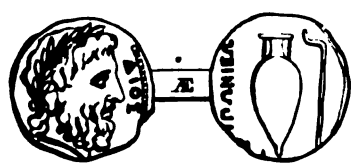
The Roman colony seems to have rapidly risen into importance, and became one of the most considerable towns in this part of Italy. Its port, constructed by Agathocles, served to export the timber from the forests of Sila; and, for the same reason, extensive dockyards for ship-building were established there. Cicero terms it a noble and illustrious municipal town (*in Verr.* v. 16), and Appian enumerates it among "the most flourishing cities of Italy" of which the possession was promised by the Triumvirs to their soldiers. (*B. C.* iv. 3). During the Civil Wars, indeed, it plays no inconsiderable part in history. In the war between Caesar and Pompey, the former made Vibo the station of a part of his fleet, which was attacked there by Cassius (Caes. *B. C.* iii. 101); and in the war of Octavian against Sextus Pompey, it became the head-quarters and chief naval station of the Triumvir (Appian, *B. C.* v. 91, 99, 103, &c.). In order to secure its attachment at that period, Octavian had been compelled to exempt Vibo from the threatened distribution of its lands among the soldiery. (Id. *B. C.* iv. 86.) It is not clear whether it subsequently received a colony, for the "ager Vivonensis" is mentioned in the Liber Coloniarum (p. 209), but in a manner which leaves it doubtful whether it was colonised or not. But it is certain, from inscriptions, that it continued under the Roman empire to be a flourishing municipal town: its name is mentioned by all the geographers, and is still found in the Itineraries of the fourth century. (Plin. iii. 5. s. 10; Ptol. iii. 1. § 74; Mel. ii. 4; *Itin. Ant.* p. 111; *Tab. Peut.*; Orell. *Inscr.* 3703; Mommsen, *Inscr. R. N.* 16, 26, &c.) It was situated on the principal high road, leading down through Bruttium to the Sicilian Strait, and is already noticed, under the name of Valentia only, in the inscription of the Via Popillia: according to that document, it was distant 57 M. P. from Consentia, and 51 from the column on the Straits. (Mommsen, *l. c.* 6276.) Its position also rendered it a convenient place to touch at for persons proceeding by sea to or from Sicily: thus, we find Cicero, in B. C. 44, proceeding from Velia to Vibo by sea, and thence to Rhegium. (Cic. *in Verr.* ii. 40. *ad Att.* xvi. 6.)

The plains near Vibo were celebrated for the variety and beauty of the flowers with which they were covered: hence the Greek colonists of Hipponium maintained it to be the place from whence Proserpine was carried off (Strab. vi. p. 256); and it would seem that that goddess had a celebrated temple here, as well as at the parent city of Locri. The ruins of this temple are said to have existed till the 11th century, when the columns were carried off by Roger, Count of Sicily, to adorn the cathedral of *Mileto*. The historian Duris also mentioned that near the city was a grove, watered with fountains, and of surpassing beauty, in which was a place called "the horn of Amalthea," which had been adorned and arranged by Gelon of Syracuse. (Duris, *ap. Athen.* xii. p. 542.)

Considerable remains of the ancient port of Hipponium are visible at a place still called *Bivona*, on the shore about 3 miles from *Monte Leone*: they are of a very massive style of construction, which has been erroneously termed Cyclopean, but are probably of Greek rather than Roman date. The city of Hipponium itself, as well as the Roman colony of Vibo Valentia, probably occupied the same site with the modern city of *Monte Leone*, on an elevation of moderate height, commanding an extensive view over the sea and adjacent plain. No ruins, however, remain on this spot, and the modern town dates only from the 13th century; but it is said that the remains of the ancient walls were formerly visible, and could be traced through an extent of several miles, communicating with those at *Bivona*. (Romanelli, vol. i. pp. 51—56; Barrius, *de Sit. Calabr.* ii. 12; Giustiniani, *Dis. Geogr.* vol. vi. pp. 88—90; K. Craven, *Travels*, p. 321.)

The poet Archestratus, cited by Athenaeus (vii. p. 302), praises the tunny-fish of Hipponium as surpassing all others in excellence; an eulogium which they are said by native writers still to merit.

[E. H. B.]



COIN OF HIPPONIUM.

HIPPU'RIS (*Ἱππουρίς*), a small island in the Aegaean sea, one of the Sporades, lying between

Digitized by Google

Thera and Amorgos. (Schol. *ad Apoll. Rhod.* iv. 1711; Mela, ii. 7; Plin. iv. 12. s. 23; Steph. B. *s. v.* Ἱππουριακός.)

HIPPU'ROS (Plin. vi. 22. s. 24), a haven in the southern part of India, near or perhaps opposite to the island of Ceylon, to which Annius Plocamus, a freedman of Claudius, was driven in a gale of wind from the coast of Carmania. The present representative of it is not known. [V.]

HIPPUS (Ἵππος, Steph. B. Plin. v. 15; Euseb. *Onom.: Eth.* Ἱππηνός), a town of the Decapolis and "Palaestina Secunda." It was situated to the E. of the sea of Galilee, 30 stadia from Tiberias (*Tubariya*). (Joseph. *Vita*, § 65.) Augustus presented it to Herod (Joseph. *Antiq.* xv. 7. § 3). After his death it was annexed to Syria (*Antiq.* xvii. 2. § 4; comp. Marquardt, *Handbuch der Röm. Alt.* p. 201). It was sacked in the Jewish War by the Jews (*B. J.* ii. 18. § 1), but the people afterwards revolted, and slew many of the Jews (*B. J.* ii. 18. § 5).

The district HIPPENE (Ἱππηνή, *B. J.* iii. 3. § 1; comp. *Vita*, § 31) lay to the E. of Galilee. There were bishops of Hippus at the councils of Seleuceia A. D. 359, and of Jerusalem A. D. 536. Burkhardt (*Trav.* p. 278) has the merit of having discovered the site of the ancient Hippos, which he fixes at *Khurbet es-Sûmrah*, an hour from *Semakh*. (Comp. Robinson, *Researches*, vol. iii. p. 264, note.)

(Reland, *Palaestina*, vol. ii. p. 821; Von Raumer, *Palestina*, p. 242.) [E. B. J.]

HIPPUS, a town in Caria, mentioned only by Pomponius Mela (i. 17), who places it near the mouth of the Maeander, whence some have inferred that the name is a mere mistake for Myus; it must, however, be observed that Pliny (v. 29) speaks of a people in Caria called Hippini or Halydenses, though he places them in a different part of the country. [L. S.]

HIPPUS (Ἵππος, Ptol. v. 9; Plin. vi. 4), a river of Colchis, the embouchure of which the Periplus of Arrian (p. 10) fixes at 150 stadia from that of the Tarsuras. Rennell (*Compar. Geog.* vol. ii. p. 322) has identified it with the *Ilori*. [E. B. J.]

HIRPINI (Ἱρπῖνοι, Pol.; Ἱρπῖνοι, Strab. App.), a people of Central Italy, of Samnite race, and who were often regarded as constituting only a portion of the Samnite people, while at other times they are treated as a distinct and independent nation. They inhabited the southern portion of Samnium, in the more extensive sense of that name, — a wild and mountainous region bordering on Lucania towards the S., on Apulia to the E., and on Campania towards the W. No marked natural boundary separated them from any one of these neighbouring nations; but they occupied the lofty masses and groups of the central Apennines, while the plains on each side, and the lower ranges that bounded them, belonged to their more fortunate neighbours. The mountain basin formed by the three tributaries of the Vulturnus, — the Tamarus (*Tamaro*), the Calor (*Calore*), and the Sabatus (*Sabbato*), which unite their waters near Beneventum, with the valleys of these rivers themselves, surrounded on all sides by lofty and rugged ranges of mountains, — may be regarded as constituting the centre and heart of their territory; while its more southern portion comprised the upper valley of the Aufidus and the lofty group of mountains in which that river takes its rise. Their name was derived, according to the statement of ancient writers, from "hirpus," the Sabine or Samnite name of a wolf; and, in accordance with this derivation, their first ancestors were represented as being guided to their new settlements by a wolf. (Strab. v. p. 250; Serv. *ad Aen.* xi. 785.) This tradition appears to indicate that the Hirpini were regarded as having migrated, like the other Sabellian races in the S. of Italy, from more northerly abodes: but we have no indication of the period, or supposed period, of this migration, and, from their position in the fastnesses of the central Apennines, it is probable that they were established from a very early time in the region which we find them occupying when they first appear in history.

The early history of the Hirpini cannot be separated from that of the Samnites in general. Indeed it is remarkable that their name does not often occur in history during the long protracted struggle between the Romans and the Samnite confederacy, though their territory was often the theatre of the war, and several of their cities, especially Maleventum, are repeatedly mentioned as bearing an important part in the military operations of both powers. Hence it is evident that the Hirpini at this time formed an integral part of the Samnite league, and were included by the Roman annalists (whose language on such points Livy follows with scrupulous fidelity) under the general name of Samnites, without attempting to distinguish between the several tribes of that people. For the same reason we are unable to fix the exact period at which their subjugation was effected; but it is evident that it must have been completed before the year 268 B. C. when the Roman colony was established at Beneventum (Liv. *Epit.* xv.; Vell. Pat. i. 14), a position that must always have been, in a military point of view, the key to the possession of their country.

In the Second Punic War, on the contrary, the Hirpini appear as an independent people, acting apart from the rest of the Samnites; Livy even expressly uses the name of Samnium in contradistinction to the land of the Hirpini. (Liv. xxii. 13, xxiii. 43.) The latter people was one of those which declared in favour of Hannibal immediately after the battle of Cannae, B. C. 216 (Id. xxii. 61, xxiii. 1); but the Roman colony of Beneventum never fell into the hands of the Carthaginian general, and as early as the following year three of the smaller towns of the Hirpini were recovered by the Roman praetor M. Valerius (Id. xxiii. 37). In B. C. 214 their territory was the scene of the operations of Hanno against Tiberius Gracchus, and also in B. C. 212 of those of the same Carthaginian general with a view to the relief of Capua. (Id. xxv. 14—16. xxv. 13, 14.) It was not till B. C. 209, when Hannibal had lost all footing in the centre of Italy, that the Hirpini were induced to make their submission to Rome, and purchased favourable terms by betraying the Carthaginian garrisons in their towns. (Id. xxvii. 15.)

The next occasion on which the Hirpini figure in history is in the Social War (B. C. 90), when they were among the first to take up arms against Rome; but in the campaign of the following year (B. C. 89), Sulla having taken by assault Aeculanum, one of their strongest cities, the blow struck such terror into the rest as led them to make offers of submission, and they were admitted to favourable terms. (Appian, *B. C.* i. 39. 51.) Even before this time appears to have been a party in the nation favourable to Rome, as we are told that Minatius Magius (the ancestor of the historian Velleius), who was a native

Digitized by Google

of Aeculanum, was not only himself faithful to the Roman cause, but was able to raise an auxiliary legion among his countrymen, with which he supported the Roman generals in Campania. (Vell. Pat. ii. 16.) The Hirpini were undoubtedly admitted to the Roman franchise at the close of the war, and from this time their national existence was at an end. They appear to have suffered less than their neighbours the Samnites from the ravages of the war, but considerable portions of their territory were confiscated, and it would seem, from a passage in Cicero, that a large part of it had passed into the hands of wealthy Roman nobles. (Cic. *de Leg. Agr.* iii. 2; Zumpt, *de Colon.* p. 258.)

By the division of Italy under Augustus, the Hirpini were separated from the other Samnites, and placed in the 2nd Region together with Apulia and Calabria, while Samnium itself was included in the 4th Region. (Plin. iii. 11. s. 16, 12. s. 17.) The same separation was retained also in the later divisions of Italy under the Empire, according to which Samnium, in the more confined sense of the name, formed a small separate province, while Beneventum and the greater part, if not the whole, of the other towns of the Hirpini, were included in the province of Campania. The Liber Coloniarum, indeed, includes all the towns of Samnium, as well as those of the Hirpini, among the "Civitates Campanae;" but this is probably a mistake. (*Lib. Col.* pp. 229—239; Mommsen, *ad Lib. Col.* pp. 159, 205, 206; Marquardt, *Handb. d. Röm. Alterthümer*. vol. iii pp. 62, 63.)

The national characteristics of the Hirpini cannot be separated from those of the other Samnites, which are described under the general article of SAMNIUM. Under the same head is given a more particular description of the physical geography of their country: the mountain chains and groups by which it is intersected being so closely connected with those of the more northern districts of Samnium, that it is convenient to consider them both together. Nor is it always easy to separate the limits of the Hirpini from those of the neighbouring Samnite tribes; more especially as our authorities upon this point relate almost exclusively to the Imperial times, when the original distinctions of the tribes had been in great measure obliterated. The rivers and valleys which constitute the main features of the Hirpinian territory, have been already briefly noticed. Pliny's list of the towns in the 2nd Region is more than usually obscure, and those of the Hirpini and of Apulia are mixed up together in a most perplexing manner. The towns which may be assigned with certainty to the Hirpini are: BENEVENTUM, by far the most important city in this part of Italy, and which is often referred to Samnium, but must have properly been included in the Hirpini, and is expressly called by Pliny the only Roman colony in their territory (Plin. iii. 11. s. 16); AECULANUM, also a flourishing and important town, nearly in the heart of their territory; ABELLINUM, on the confines of Campania, and near the sources of the Sabatus; COMPSA, near the head waters of the Aufidus and bordering on Lucania; AQUILONIA and ROMULEA, near the frontiers of Apulia, in the SE. portion of the Hirpinian territory; TRIVICUM and EQUUS TUTICUS, also adjoining the Apulian frontiers; and, N. of the last-mentioned city, MURGANTIA, near the sources of the Frento, which seems to have been the furthest of the Hirpinian towns towards the NE., if at least it be correctly placed at *Baselice*. In the valley of the Tamarus, N. of the territory of Beneventum, were situated the LIGURES BARBIANI ET CORNELIANI, a colony of Ligurians transplanted to the heart of these mountain regions in B. C. 180 (Liv. xl. 38, 41), and which still continued to exist as a separate community in the days of Pliny. (Plin. iii. 11. s. 16; *Lib. Col.* p. 235.) Of the minor towns of the Hirpini, three are mentioned by Livy (xxiii. 37) as retaken by the praetor M. Valerius in B. C. 215; but the names given in the MSS. (see Alschefski, *ad loc.*), "Vescellium, Vercellium, and Sicilinum," are probably corrupt: they are all otherwise unknown, except that the "Vescellani" are also found in Pliny's list of towns. (Plin. *l. c.*) Ferentinum, mentioned also by Livy (x. 17), in connection with Romulea, is also wholly unknown. Fratulum (*Φρατούλον*, Ptol. iii. 1. § 71), of which the name is found only in Ptolemy, is equally uncertain. TAURASIA, mentioned as a town only in the celebrated epitaph of Scipio Barbatus, had left its name to the Taurasini Campi not far from Beneventum, and must therefore have been itself situated in that neighbourhood. Aletrium, of which the name is found in Pliny (Aletrini, iii. 11. s. 16), has been conjectured to be *Calitri*, a village in the upper valley of the Aufidus, not far from *Conza*. Of the other obscure names given by the same author, it is impossible (as already observed) to determine which belong to the Hirpini.

The most remarkable natural curiosity in the land of the Hirpini was the valley and lake, or rather pool, of AMSANCTUS, celebrated by Virgil in a manner that shows its fame to have been widely spread through Italy. (Virg. *Aen.* vii. 563.) It is remarkable as the only trace of volcanic action remaining in the central chain of the Apennines. (Daubeny *on Volcanoes*, p. 191.)

The country of the Hirpini, notwithstanding its rugged and mountainous character, was traversed by several Roman roads, all of which may be regarded as connected with the Via Appia. The main line of that celebrated road was carried in the first instance direct from Capua to Beneventum: here it branched into two, the one leading directly by Aeculanum, Romulea, and Aquilonia, to Venusia, and thence to Tarentum: this was the proper VIA APPIA; the other known from the time of the emperor Trajan (who first rendered it practicable throughout for carriages) as the VIA TRAJANA, which proceeded from Beneventum by Forum Novum (*Buonalbergo*), and Equus Tuticus (*S. Eleuterio*), to Aecae in Apulia, and thence by Herdonea and Canusium to Brundusium. The fuller consideration of these two great lines of highway is reserved for the article VIA APPIA. Their course through the country of the Hirpini has been traced with great care by Mommsen. (*Topografia degli Irpini*, in the *Bullettino dell' Inst. Archeol.* 1848, pp. 6—13.) [E. H. B.]

HIRRI, a people mentioned by Pliny (iv. 13) along with the Venedae, and who were connected with the Heruli. They appear to have come from Scandinavia, and occupied that part of the coast of *Esthonia*, which was called in the Middle Ages *Harria*, after them. Thus, it seems that the coasts of the Baltic, as far as the mouth of the Oder, were exposed to the piratical attacks of the Goths, in very early times, as in later ages other European shores were devastated by the Normans. (Comp. Schafarik, *Slav. Alt.* vol. i. p. 116.) [E. B. J.]

HIRROS, a river of Asiatic Sarmatia, with a

Digitized by Google

town of the same name, 136 M. P. from Heracleum, and 67 M. P. from Sindica (Plin. vi. 5). It is, probably, the same place as the HIEROS PORTUS of the Periplus, which Rennell (*Compar. Geog.* vol. ii. p. 325) identifies with the deep inlet or small gulf of *Sunjuk-Kala* in the Russian chart. [E. B. J.]

HISPALIS (Ἴσπαλις: also HISPAL. Mela, ii. 6, Sil. Ital. iii. 392: *Eth.* Hispaliensis, Adj. Hispalensis: *Sevilla*), one of the chief cities of Hispania Baetica, stood on the left bank of the Baetis (*Guadalquiver*), about 500 stadia from its mouth; but still within the tidal part of the river, which was navigable for large vessels up to the city: so that it had, to a great extent, the advantages of a sea-port. It was made a colony by Julius Caesar; and although an attempt seems to have been made to exalt the neighbouring colony of Baetis above it, the very site of which is now doubtful, it ranked, in Strabo's time, among the first cities of Turdetania, next after Corduba and Gades; and afterwards even advanced in dignity: so that, in the time of Ptolemy, it had the title of μητροπόλις, and under the Vandals and Goths it ranked above Corduba, and became the capital of Southern Spain. In the Roman empire it was the seat of a *conventus juridicus*, and bore the titles of JULIA ROMULA and COLONIA ROMULENSIS. (Strab. iii. pp. 141, 142; Hirt. *Bell. Alex.* 51, 56; Dion. Cass. xliii. 39; Plin. iii. 3; *Itin. Ant.* pp. 410, 413, 416; Geog. Rav. iv. 45; Philostr. *Vit Apoll.* v. 3, 6; Anson. *Clar. Urb.* 8; Isidor. *Etym.* xv. 1; Inscr. *ap.* Gruter, pp. 201, 257, Orelli, vol. ii. p. 396; Florez, *Esp. S.* vol. ix. pp. 89, 90; Coins *ap.* Florez, *Med. de Esp.* vol. ii. p. 543; Mionnet, vol. i. p. 24, Suppl. vol. i. p. 42; Eckhel, vol. i. p. 28.) [P. S.]

HISPA'NIA (Ἱσπανία, Σπανία), and IBE'RIA (Ἰβηρία), and, with reference to its division into two parts, very frequently HISPANIAE (so also Ἰβηρίαι, Steph. B.), the ancient names of the great peninsula now divided into the countries of *Spain* and *Portugal*. In this article, for convenience, the whole peninsula will be often called simply SPAIN.

I. ANCIENT NAMES.

As in the case of other countries, which only became known to the Greeks and Romans by portions, there was at first no general name for the whole peninsula. Polybius states that the part of the land on the Mediterranean, as far as the Pillars of Hercules, was called IBERIA (Ἰβηρία), while the portion onwards from that point along the ocean had no general name, as it had not long been known, and was entirely occupied by numerous barbarian peoples. (Polyb. iii. 37).

1. The name in general use among the Greeks, during the historical period, was IBERIA, which was understood to be derived from the river IBERUS (Plin. iii. 3. s. 4; Justin. xliv. 1; Steph. B. *s. v.*; Avien. *Or. Mar.* 248): whence it was applied to the surrounding country, first vaguely, as will presently appear, and afterwards more exactly, as they gradually became acquainted with those physical features which so strikingly define its limits. (Hecat. Fr. 11—13; Herod. i. 163, vii. 165; Scyl. pp. 1, 2; Strab. iii. p. 166; Eustath. *ad Dion. Per.* 281; Hor. *Carm.* iv. 528. (comp. below on the boundaries.)

2. The other and still more familiar name, HISPANIA (Ἱσπανία, Strab. iii. p. 166; Agathem. i. 2), came into use after the Romans began to have a direct connection with the country; and has remained the prevailing appellative ever since. There is little doubt that the genuine form of the name is SPAN or SAPAN, the vowel sound being prefixed for easier pronunciation, as is common in southern as well as eastern languages when an initial *s* is followed by another consonant (of this usage examples may be seen in the Arabic and Turkish names of Greek cities): and the name is used without the prefix (Σπανία: Artemidor. *ap.* Steph. B. *s. v.* Ἰβηρία; Plin. *de Flum.* p. 32, Huds., vol. x. p. 774, Reiske; Paul. *Epist. ad Rom.* xv. 28, &c.) The origin of the name is not known with any certainty, nor whether it was used by the inhabitants themselves. Bochart derives it from the Phoenician and Hebrew word ŠPN (tsapan), which means a *rabbit*; and arguments are adduced in favour of this etymology from the numerous testimonies of the ancients to the abundance of these animals in the country (Strab. iii. pp. 144, 168; Aelian, *N. A.* xiii. 15; Varro. R. R. iii. 12; Catull. xxxv. 18; Plin. viii. 58. s. 83, xi. 37. s. 76), as well as from a medal of Hadrian, on the reverse of which is seen a female figure, as the personification of Spain, with a rabbit at her feet. (Flor. *Med. de Esp.* vol. i. p. 109.) Others explain the Phoenician word to mean *concealed*, that is, the country little known; but this seems to be a mere fancy. (Maltebrun, *Précis de la Géogr.* vol. vii. p. 21.) On the other hand, W. von Humboldt, in his invaluable essay on the primitive history of Spain, maintains that it was a native name, and that its genuine form, vowel prefix and all, is preserved almost unaltered in the modern native name *Espana*, which he derives from the Basque *España*, a border, *margin*, or *edge*, denoting that the peninsula was the margin of Europe towards the ocean. (Humboldt, *Prüfung der Untersuch. über die Urbewohner Hispaniens*, Berlin, 1821; comp. on the etymology of both names, Plut. *de Flum. l. c.*; Solin. 23; Ammian. Marc. xxiii. 6; Const. Porph. *de Admin.* Imp. ii. 23, Eustath. *ad Dion. Per.* 282; Bochart, *Chan.* i. 35, *Phaleg*, iii. 7; Oberlin, *ad Vib. Seq.* p. 397; Grot. *ad Mart. Cap.* p. 201; Wesseling, *ad Itin.* p. 268; Tzschucke, *ad Mel.* ii. 6.)

3. HESPERIA was an old Greek name, chiefly used by the poets, in connection with the notion that the world consisted of four parts, of which LIBIA was the southern, ASIA the eastern, EUROPA the northern, and HESPERIA the western: and, according to this idea, Spain was the westernmost part of Hesperia. (Niebuhr, *Lectures on Ancient Ethnography and Geography*, vol. ii. p. 279.) Hence the country is sometimes called simply Hesperia (Mart. i. 3; Serv. ad Virg. Aen. i. 530; Isid. *Orig.* xiv. 4), and sometimes, in contradistinction to Italy, Hesperia Ultima (Horat. *Carm.* i. 36. 4; comp. Dictys Cret. *Celtica* iii. 32).

4. CELTICA (ἡ Κελτική) was also a general name for the West of Europe, and was used specifically for the interior of Spain, which was originally peopled, or believed to have been peopled, by Celts (Aristot. *de Mundo*, vol. i. p. 850, Du Val.; Scymn. 173.) Ephorus (*ap.* Strab. iv. p. 199; Marc. Her. p. 142) extended Celtica to Gades, and applied the name of Iberia only to the W. part of the peninsula. So too Eratosthenes (*ap.* Strab. ii. p. 107) extended the Galatae (i. e. Celts) to Gadeira. This usage is, however, uncommon, the name being generally confined to those parts of the peninsula in which fragments of the old Celtic population held their ground. [CELTAE: CELTICA.]

5. TARTESSIS was a name applied to the S. portion of the peninsula, and especially to the part beyond the Straits, in contradistinction to the rest

Digitized by Google

Iberia, in its narrower sense, that is, the maritime district from the Straits to the Pyrenees. (Polyb. *loc. sup. cit*) : but this is a subject which needs a separate discussion under its proper head. [TARTESSUS.]

6. *Ethnic and Adjective Forms.* — (1.) From IBERIA : *Eth.* Ἴβηρ, gen. Ἴβηρος, pl. *οἱ* Ἴβηρες, fem. Ἰβηρίς ; Lat. Iber, Lucan. vi. 255, Hor. *Carm.* ii. 20. 20, pl. Iberes, Catull. ix. 6, also Hiber, Hiberes ; and Iberi or Hiberi, Virg. *Georg.* iii. 408, fem. Iberina, *Juv.* vi. 53 : *Adj.* Ἰβηρικός, whence ἡ Ἰβηρική for the country itself ; fem. ἡ Ἰβηρίας, *-ιάδος* ; Lat. Iberus, Ibericus, and rarely Iberiacus (Sil. Ital. xiii. 510). (2.) Connected with HISPANIA : *Eth.* and *Adj.* Ἰσπανοί, Const. Porph. *de Admin. Imp.* i. 23 ; Zonar. iii. p. 406 ; Hispānus, Hispani, *Adv.* Hispane ; also Spanus, Schol. *Juv.* xiv. 279 ; Ampelius 6 ; and Spanicus, Geogr. Rav. iv. sub fin. ; *Adj.* Hispaniensis (the distinction between this and the ethnic being nicely drawn in the following examples : Vell. ii. 51, *Balbus Cornelius non Hispaniensis natus, sed Hispanus*, that is, not merely *belonging to Spain*, like, for example, a Roman born in Spain, but *a true Spaniard*, and Mart. xii. Praef. : *Ne Romam, si ita decreveris, non Hispaniensem librum mittamus, sed Hispanum*), and rarely Hispanicus. (Suet. *Aug.* 82, Vitruv. vii. 3.)

II. SPAIN AS KNOWN TO THE GREEKS.

The west of Europe was to the early Greeks a land of fancy as well as mystery. Vague reports had reached them, probably through the Phoenicians, from which they at first learnt little more than the bare existence of lands, so far distant from their own country as to reach the region of the setting sun and the banks of the all-encompassing river Ocean. According to the very natural tendency which led them to place the happiest regions and the choicest productions of the earth at its extreme parts, confirmed perhaps by exaggerated accounts of the fertility and beauty which some of these regions (Andalucia, for instance) actually enjoy, they fancied them as happy plains or as enchanted islands, and peopled them with the divine nymphs, Circe and Calypso, who there detained in sweet bondage the hero whom fate had cast upon their shores, with the happy spirits of departed heroes, with the primitive and pastoral Cyclopes, and the wealthy maritime Phoenicians, or with the exiled dynasty of gods,

> "Who with Saturn old,
> Fled over Adria to the *Hesperian fields*,
> Or o'er the *Celtic* roamed the *utmost isles*."

These poetic fancies were succeeded by historical inquiries, and then came all the difficulties of reconciling meagre and conflicting testimonies with the facts and with each other ; mistakes arising from first assigning positions vaguely and variously, and then, instead of the discovery of such errors, the attempt to reconcile them by supposed migrations and other arbitrary devices ; so that such names as BEBRYCES, CHALYBES, CIMMERII, and IBERES, scarcely ever associated with any exact locality, and are freely transferred backwards and forwards between the shores of the Atlantic and those of the Euxine. To this was added the polemical spirit, which we find so rampant among the old geographers (as among the African and Arctic critics now), which "by decision are embroiled the fray;" while all the time the later poets were adding to the confusion by imitating the legends of the ancients, and inventing others of their own. Amidst all these elements of uncertainty it is no wonder that we generally find no sure basis of information concerning the more distant countries of the world until the arms of Rome had cleared the way for the inquiries of the learned Greek.

But yet the neglect of this period would deprive the science of ancient geography of a great portion of its interest, and of its use, too, in throwing light on the progress of our race. And in no case is this period more attractive than in that of the remotest country towards the West, one which is invested with the double interest of having been familiar to the Phoenicians, as a principal scene of their commerce and colonisation, while the Greeks were still making it a favourite theatre for the creations of their fancy.

1. Of the purely *Mythical Period* little is to be said, and that little more properly belongs to other articles. [CIMMERII, OCEANUS ; FORTUNATAE INSULAE ; HESPERIDES, AEAEA ; HERCULIS COLUMNAE, &c. ; and the articles GERYON, HERCULES, &c. in the *Dictionary of Greek and Roman Mythology and Biography*.]

2. Advancing to the *Semi-Mythical Period of Hesiod and the Lyric Poets*, we begin to meet with names which have at least the appearance of a specific geographical significance, though still most uncertain as to their position ; such as TARTESSUS. In connection with the legends of the Hyperboreans, the Rhipaean mountains appear as a great range intersecting Europe from W. to E. The ISTER and ERIDANUS were known by name to Hesiod (*Theog.* 338, 339) as rivers of W. Europe ; and his island Erytheia, the abode of Geryon, is so described as to prepare the way for its subsequent identification with GADES.

3. The transition to the period of more real, though still most imperfect knowledge, marked by the age of the *Logographers and Tragic Poets*, is extremely gradual, for while the avowed writers of fiction are seen to invest their scenes with only an appearance of fact, the investigators of facts are found recording under that guise the strangest fictions. But yet there is no doubt that both give us what is meant to be objective knowledge ; and no reader of the *Prometheus*, for example, can doubt that Aeschylus expends all the resources of his geographical knowledge, be they less or more, on his description of the wanderings of Io. Indeed, with reference to our present subject, we have now reached a period when the maritime enterprise of the Phocaeans had placed the Greeks in direct connection with the shores of the W. part of the Mediterranean ; and had made them acquainted with Tyrrhenia, Iberia, and Tartessus. (Herod. i. 163.) Accordingly we find the logographer Pherecydes and the poet Stesichorus not only acquainted with the name TARTESSUS ; but the latter making it a river, in such a manner as to suggest its identification with the *Guadalquivir* [BAETIS], while the former accurately represents it as a city on the straits which divide Libya from Europe [TARTESSUS]. Stesichorus mentions also the island of Erytheia, and an island Sarpedonia in the Atlantic (Strab. iii. p. 148 ; Schol. Apoll. Rhod. i. 211.) Pindar seems well acquainted with the Pillars of Hercules, as the limit of the known world [HERCULIS COLUMNAE] ; and Aeschylus, besides some other interesting allusions, too doubtful, however, to be discussed here, seeks for the sources of the Ister in the Rhipaean mountains, a fact of which the importance will be more clearly seen when the views of Herodotus have been discussed (Schol. Apoll. Rhod. iv. 28 ; Ukert, vol. ii. pt. 1. pp. 238—243.)

Digitized by Google

From these fragmentary notices we pass on to the first writer who gives us a systematic account of any portion of the country,—namely HECATAEUS of Miletus (about B.C. 500); for we have no remains of the earlier work of Charon of Lampsacus, which contained a Periplus of the coast outside of the Pillars of Hercules. (Eudoc. *Violar.* p. 435.) The Greeks of this period seem to have been acquainted with the S. coast so far as to know the names of a number of places along it, but not so as to form any accurate idea of it as a whole. From the few extant fragments of Hecataeus, and from the passages in which Festus Avienus follows his authority, Ukert deduces the following results:—West of the Straits, which he makes scarcely 7 stadia in width, dwelt the TARTESSII (Avien. *Or. Mar.* 370), among whom was the town of ELIBYRGE (Steph. B. *s. v.* Ἐλίβυργη), which no other ancient writer names, but which the moderns have sought to identify, on account of the resemblance in the names only, with ILLIBERIS or ILLITURGIS. East of the Pillars dwelt the MASTIANI, with the capital, MASTIA; a people and city long after mentioned also by Polybius (iii. 24): they had also the cities of Syalis [SUEL.], Mainobora [MAENOBA], Sixos [SAXETANUM], Molybdana, and Calathe (Steph. B. *s. vv.*). Further to the E. the country began to be called Iberia, and was inhabited by numerous peoples; among whom were the Ilaraugatae, on a river of the same name (Steph. B. *s. v.* Ἱλαραυγαταί), who seem to be the Ilurgetae or ILERGETAE of later writers; and the Misgetes (Steph. B. *s. v.* Μίσγητες). Among the cities of Iberia are mentioned Crabasia and Hyops, with a river Lesyros near the latter. (Steph. B. *s. v.* Τόψ.) Hecataeus also mentions the town of Sicane (Steph. B. *s. v.* Σικάνη), a name of much interest, as showing the existence of Sicanians in Spain, which is also asserted by Thucydides, who makes them dwell upon a river Sicanus, next the Ligyes who expelled them thence to Sicily. (Thuc. vi. 2; Strab. iii. p. 270; SICANI.) Two islands, Cromyusa and Melussa, are mentioned by Hecataeus as belonging to Iberia. (Steph. B. *s. vv.*)

5. HERODOTUS touches on the W. of Europe only incidentally, as but very distantly related to his main subject. In one passage, when speaking of the extreme regions of the earth, he plainly states that he has nothing certain to say of the western parts of Europe: and he even doubts the existence of the river Eridanus and the islands Cassiterides (iii. 115); and elsewhere he mentions the belief of the Persians that there were no countries of any great importance W. of Greece (vii. 8). His views may be summed up as follows:—Beyond the Pillars of Hercules lay Gadeira, and near it the island of Erytheia (iv. 8). Elsewhere he mentions the CYNESII or CYNETES as the westernmost people of Europe (ii. 33; iv. 49); and next to them the great nation of the Celtae, whose country is remarkable for its precious metals, and for the long life of the inhabitants (i. 163; iv. 49, 152, 192; comp. Strab. iii. pp. 150, 151; Lucian, *Macrob.* 10; Phlegon. *de Longaev.* 4; Cic. *de Senect.* 19; Plin. vii. 48; Val. Max. viii. 13). Among the Celtae were the sources of the river ISTER, in the neighbourhood of a city called PYRENE. (Herod. ii. 33; iv. 49.) It is important to remember that this statement respecting the source of the Ister is connected with a theory entertained by Herodotus,—that the two great rivers of Libya and Europe, the Nile and the Ister, followed courses right through the respective continents, from W. to E., almost exactly parallel and equal to each other: the introduction of the name Pyrene is discussed in its proper place. [PYRENAEI MONTES.] The name of Iberia is mentioned by him twice. The one passage is that already cited respecting the discoveries of the Phocaeans, where the relation in which it stands to Tyrrhenia suggests that it signifies the peninsula of Spain, *so far as it was known by maritime discovery* (i. 163). In the other passage he mentions the Iberians in the army of Hamilcar in Sicily; and he connects them with the Ligyes in such a manner as to suggest the inference, that the name was applied to the whole Mediterranean coast, from the Straits to the Gulf of Lyon (vii. 165). In the former of these passages, again, he mentions TARTESSUS in close connection with Iberia, and describes the Phocaeans as holding most friendly intercourse with Arganthonius, the king of the Tartesii (i. 163); and he speaks elsewhere of the wealth and commercial importance of Tartesus [TARTESSUS]. These several views seem to have had little more connection in the mind of the historian than the passages referring to them have in his works; but, on comparing them with the actual facts, and having regard to the probable sources of information, something like a whole may be made out. On the S. coast, his knowledge, derived from Phoenician and Phocaean sources, seems to have extended as far as the SW. point of the peninsula, the SACRUM PROMONTORIUM (*Cape St. Vincent*), which long remained the westernmost limit of ancient maritime discovery; if, at least, his Cynetes are the CONII of other writers — that is, the inhabitants of the southern projection of Portugal, called CUNEUS. Justin (xliv. 43) mentions Cuneus in the mountains of the Tartessii; a confirmation of the hint given under CONII, that the name is truly ethnic, and that its resemblance to the Roman *cuneus*, which so well describes the name of the district, is merely an accidental coincidence. Next, the great colony of GADES was a subject of which he would hear much from the Phoenicians; and separate accounts respecting Tartessus and the surrounding country would be obtained from the same people, who had long traded to it under the name of Tarshish, and from the Phocaeans, as we have seen. The name Iberia seems to have been derived exclusively from the Phocaeans. Lastly, apart from these results of maritime discovery, he had obtained from the Phocaeans and other sources the impression that the great Celtic race overspread pretty well the whole interior of Western Europe; a region, however, of which he possessed scarcely one detail of accurate knowledge.

6. The historians, geographers of the century after Herodotus had obtained a larger amount of materials, but without a corresponding improvement in the accuracy of their knowledge. The wide extent of the Celtic name, and the confusion between Celts and Iberians, are found still prevalent; and the courses of the great rivers of W. Europe are very imperfectly known. Thus, EUDOXUS of Cnidus (about B. C. 380—360), of whose geographical work Aristotle made great use, mentions the mountain Pyrene in Celtica, towards the W. extremity of the equinoctial line (πρὸς δυσμὴν ἰσημερινήν), as containing the sources of the rivers Ister and Tartessus, of which the latter flowed outside of the Pillars, and the former through all Europe. (Aristot. *Meteor.* i. 13.) He places Iberia S. of Celtica, and describes its shores towards the ocean as high and rocky, with promontories running far out into the sea. (Strab.

Digitized by Google

ii. p. 153.) About the same time, EPHORUS, who devoted the 4th book of his work on geography to the W. of Europe, assigns a vast extent of country to the Celts, and carries them on the W. as far as Gades; while he confines the name of Iberia to the region W. of Gades, and, if we are to believe Josephus, even fell into the error of making Iberia a city with a comparatively small territory. He relates some absurd fables about these regions. (Strab. iii. p. 153, iv. p. 199, vii. p. 302; Joseph. *c. Apion.* i. 12; Marx, *ad Ephor. Frag.* p. 142.) The *Periplus* of SCYLAX, which also belongs to about the same period, is very vague as to the shores of Spain. He makes special mention of the commercial settlements of the Carthaginians outside the Pillars, and of the tides and shoals which characterise that sea: a great sandbank stretches across from the Sacred Promontory (*C. S. Vincent*) to the promontory of Hermaeum in Lybia. The Iberians are the first people in Europe; and there is the river Iber, and two islands called Gadeira [GADES]; and then comes the Greek city EMPORIUM. Probably there is here a gap in the text; for he passes over the whole coast from the Pillars to the Pyrenees, the voyage along which, he says, occupies 7 days and nights. (Scylax, pp. 1, 51, ed. Hudson, pp. 1—3, 123, ed. Gronov.) Next to the Iberians, he places the Ligurians (Λίγυες) and the "mixed Iberians" ("Ιβηρες μιγάδες) as far as the Rhone.

In the Pseudo-Aristotelian work *de Mirab. Auscult.* (86), the peoples of Western Europe are mentioned in the following order, from W. to E.: Iberes, Celtoligyes, Celtae, as far as Italy. HECATAEUS tells us that the Iberians, who dwell on the shores of the Straits, though belonging to one race, have various names, according to their several tribes. (Fr. *ap.* Const. Porphyr. *de Admin. Imp.* i. 23.) Those most to the W. are called CYNETES (Steph. B. *s. v.* Κυνησιώδε); N. of them are the ILETES (Steph. B. *s. v.* Γάλητες; comp. Strab. iii. p. 166, who says that the country E. of the Iberus was formerly called after the IOLETES, a great and powerful nation, who dwelt in it); then the TARTESSII; then the ELBYSINII; then the MASTIANI and the CALPIANI, as far as the Rhone. (This enumeration, and the order of it, might be made to throw much light on the names and positions of the Spanish peoples, if the argument were not somewhat too speculative for this article).

We likewise find a vast amount of error and confusion among the geographers of this age respecting the distances and bearings of the shores of the W. Mediterranean. Eudoxus states that a person sailing through the Straits into the Inner Sea has immediately on his left hand the Sardoan, Galatian (Gallic), and Adriatic Sea, on the right the bay of the Syrtes (Arist. *de Mund.* 3); and Dicaearchus estimates the distance from the Sicilian Strait (*Straits of Messina*) to the Pillars of Hercules (*Straits of Gibraltar*) at only 7000 stadia. (Strab. ii. p. 105.)

7. *Age of Alexander and the Ptolemies.*—The reign of Alexander the Great forms an epoch in the geography of W. Europe. While his followers were wielding by their own direct observations to the knowledge of the extreme East, we are told that from the opposite end of the known world his fame attracted the envoys of numerous nations, and among the rest from the Celts and the Iberians, whose dress was then for the first time seen, and their language first heard, by the Greeks and Macedonians. (Arrian, *Anab.* vii. 15.) From these and other sources, the learned men of Alexandria, under the Ptolemies, obtained the information which is recorded in the works of ERATOSTHENES, his contemporaries, and his followers. It appears that Eratosthenes was indebted for much of his knowledge to Timosthenes, the admiral of Ptolemy Philadelphus, and the author of a large geographical work; but the views of both on the W. of Europe in general, and on Iberia in particular, are severely criticised by Strabo and Marcian. (Strab. ii. pp. 92—94.)

Eratosthenes describes 3 peninsulas as running out S. from the mainland of Europe; the one that which ends with the Peloponnesus, the second the Italian, and the third the Ligurian (Λιγυστική); and these contain between them the Adriatic and Tyrrhenian gulfs. (Strab. vii. p. 92.) In another passage, the westernmost of these 3 peninsulas is described as that which extends to the Pillars, and to which Iberia belongs. (Strab. ii p. 108.) Of this peninsula he assigns a large part to the Celts (Γαλάται), whom he makes to reach as far as Gadeira. (Strab. ii. pp. 107, 108.) He places the Columns of Hercules on the Straits [HERCULIS COLUMNAE], to the W. of which he represents the peninsula as running out into several large promontories. Of these, the first is the Sacred Promontory (*C. S. Vincent*), which he placed at the greatly exaggerated distance of 5 days' voyage from Gades. (Strab. ii. p. 148.) The other chief promontory is that of CALBIUM, about which dwelt the OSTIDAMNII; and opposite to it lay several islands, of which UXISAMA, the furthest to the W., was distant 3 days' voyage from Calbium: in this part of his description he follows Pytheas. (Strab. i. p. 64.) The region adjacent to Calpe he calls Tartessis, and places there the "happy island" of Erytheia. Besides GADES, he mentions the town of TARRACO (Tarragona), and adds that it has a good roadstead, a statement contradicted by Artemidorus and Strabo. (Strab. iii. p. 159.) He makes the Pyrenees the E. boundary. [PYRENAEI.] In general, his knowledge seems not to have extended beyond the coast.

8. We are now brought down to the time of the First Punic War, and to the eve of the period when the imperfect, and often merely speculative, notions of the Greeks respecting Spain were superseded by the direct information which the Romans gained by their military operations in the country. But before passing on to the Roman period, a few words are necessary on the *extent of Iberia, as understood by the Greek geographers.*

While, as we have already seen, many of them gave the greater part of the peninsula to the Celts, and confined the Iberians either to the part W. of the Straits, or to the Mediterranean shore; others extend the name of Iberia as far E. as the Rhone, and even as far N.E. as the Rhine, and so as to include the peoples on both sides of the Alps. Thus Aeschylus, if we are to believe Pliny, took the Eridanus to be another name for the Rhodanus, which he placed in Iberia. (Plin. xxxvii. 2. s. 11.) Nonnus applies the epithet *Iberian* to the Rhine. (Dionys. xxiii. p. 397, xliii. p. 747.) Plutarch places Iberian tribes in the Alps. (*Marcell.* 3.) In fine, Strabo sums up these opinions as follows:—"The name of Iberia, as used by the earlier writers, includes all the country beyond the Rhone and the Isthmus which is confined between the Gallic Gulfs (i. e. the *Bay of Biscay*, and the *Gulf of Lyon*): but those of the present age assign M. Pyrene as its boundary, and called it indifferently Iberia and His-

Digitized by Google

pania, [whereas by those of old the name of Iberia] was applied only to the part within the Iberus. (Strab. iii. p. 166; the words within brackets are supplied as the most probable restoration of a gap in the text.)

It must be observed that such statements as these express something more than a confusion in the minds of the Greek writers between the territories of the Celts and of the Iberians: they express the fact in ethnography, that the Iberian race extended beyond the boundaries of Spain as defined by the Pyrenees, and that they were to a great extent intermixed with the Celts in W. Europe. (See below, on the earliest inhabitants of Spain: No. VII.)

III. Spain as known to the Carthaginians and the Romans.

1. *Down to the End of the First Punic War.*— The internal state of the peninsula, down to the period at which we have now arrived, will be spoken of below; but, in order to estimate the knowledge of the country possessed by the Romans, we must first glance at its relations to the other great power of the Mediterranean. From the earliest known period of antiquity the Phoenicians had held commercial intercourse with Spain; and there is more than a probability that Tyre had established a sort of dominion over the part adjacent to the S. coast, the Tarshish of Scripture, and the Tartessus of the Greeks. (*Isaiah*, xxiii. 10, where the prophet compares the liberty of Tarshish, consequent on the fall of Tyre, to the free course of a river, — such, for example, as her own *Guadalquivir*, — when a mighty obstacle is removed.) The phrase "ships of Tarshish" appears to have been as familiar in the mercantile marine of Tyre as "Indiamen" in our own (2 *Chron.* ix. 21, xx. 36, 37; *Ps.* xlviii. 7; *Is.* lx. 9; *Ezek.* xxvii. 25); and the products of the Spanish mines, "silver, iron, tin, and lead," are mentioned by Ezekiel as among "the multitude of all kind of riches, by reason of which Tarshish was her merchant." (*Ezek.* xxvii. 12.) Phoenician settlements were numerous on the S. coast of the peninsula, within the Straits, and beyond them there was the great commercial colony of Gades, the emporium for the traffic of Tyre with the shores of the Atlantic. But this was not all. From the very physical nature of the country, it was scarcely possible that the Phoenicians should have abstained from extending their power up the navigable stream of the Baetis, of which Gades may be regarded as the port, over the fertile plains of Baetica (*Andalucia*), as far N. as the *Sierra Morena*, which at once contained the mineral wealth in quest of which they came, and formed a barrier against the natives of the centre. Be this as it may, we know for certain that in the narrower tract between the sea-shore and the *Sierra Nevada* [Ilipula] the people were a mixed race of Iberian and Phoenician blood, called **Μιξοφοίνικες** (Strab. iii. p. 149: Bastuli). The power which the Carthaginians obtained during this period over the natives cannot be positively defined; but they received many of them into their armies by voluntary enlistment.

2. *The Viceroyalty of the House of Barca.*— Such were the relations of Spain to Carthage; and as to Rome, she had had as yet nothing to do with the peninsula, when the First Punic War was brought to an end, B. C. 241. Carthage seemed to have expended all her resources in the vain effort to secure Sicily; and, when the revolt of her African mercenaries gave Rome an opportunity of filching away from her her oldest provinces, Sardinia and Corsica (B. C. 236), the contest might well be thought to have concluded. "I believe," says Niebuhr, "that there were fellows at Carthage, such as Hanno, who, partly from envy of Hamilcar, and partly from their own stupidity, would not or could not see that, after the loss of Sicily and Sardinia, there were yet other quarters from which the republic might derive great benefits. When, after the American War, it was thought that the ignominious peace of Paris had put an end to the greatness of England, Pitt undertook with double courage the restoration of his country, and displayed his extraordinary powers. It was in the same spirit that Hamilcar acted: he turned his eyes to Spain: . . . . he formed the plan of making Spain a province, which should compensate for the loss of Sicily and Sardinia. The latter island was then and is still very unhealthy, and its interior was almost inaccessible. Sicily had an effeminate and unwarlike population, and, rich as it was, it might indeed have increased the maritime power of Carthage, but it would not have given her any additional military strength. The weakness of Carthage consisted in her having no armies; and it was a grand conception of Hamilcar's to transform Spain into a Carthaginian country, from which national armies might be obtained. His object, therefore, was, on the one hand, to subdue the Spaniards, and on the other to win their sympathy, and to change them into a Punic nation under the dominion of Carthage." (Polyb. ii. 1; Diod. Fr. Lib. xxv.; Eclog. ii. p. 510.) The conduct of the Romans towards their subjects was haughty, and always made them feel that they were despised. The highly refined Greeks, who were themselves wont to look with contempt on all foreigners, must have felt that haughtiness very keenly. The Spaniards and Celts were of course less respected. Common soldiers in the Roman armies not unfrequently, especially in the times of the emperors, married native women of the countries in which they were stationed. Such marriages were regarded as concubinage, and from them sprang a class of men who were very dangerous to the Romans. The Carthaginians acted more wisely by making no restrictions in regard to such marriages. Hannibal himself married a Spanish woman of Castulo (Liv. xxiv. 41: comp. Diod. Fr. Lib. xxv.; Eclog. ii. p. 510, foll.), and the practice must have been very common among the Carthaginians. This was an excellent way to gain the good will of the natives. The whole of the southern coast of Spain had resources of no ordinary kind: it furnished all the productions of Sicily and Sardinia, and in addition to them it had very rich silver mines, the working of which has been revived in our own days. Hamilcar was the first who introduced there a regular and systematic mode of mining, and this led him, or his son-in-law, to build the town of New Carthage (*Carthagena*). When the Carthaginians thus gained the sympathy of the nation, they acquired a population of millions which relieved them from the necessity of hiring faithless mercenaries, as they had been obliged to do in the First Punic War; they were enabled to raise armies in Spain just as if it had been their own country. The Romans no doubt observed these proceedings with feelings of jealousy, but could not prevent them, as long as the Cisalpine Gauls stood on their frontiers, ready to avenge the defeats of the Senones and Boians." (Niebuhr, *Lectures on Roman History*,

Digitized by Google

vol. ii. p. 69.) It was in the year B. C. 237 that Hamilcar commenced this mighty work, not without an ultimate design, unless he is grossly misrepresented by Polybius and Livy, of founding for his house an empire in Spain, in case the Anti-Barcine faction should prevail at Carthage. [CARTHAGO NOVA.] For eight years he carried on his plan with great success, and he appears to have extended the Carthaginian empire as far N. as the *Sierra Morena*, so that it included the whole of *Andalucia*, and pretty well all *Murcia*. On his death, B. C. 229, he left his power and his schemes as an inheritance to Hasdrubal, his son-in-law, who carried on the plan for nearly nine years, till he was cut off by an assassin, B. C. 221, and left its fulfilment to the mighty genius of Hannibal. Meanwhile the Romans, occupied with the war in Cisalpine Gaul, had no power to interfere. Just, however, before that war began, they had done the best they could by making a separate treaty, not with Carthage, but with Hasdrubal himself (as a sort of supplement to the existing treaty with Carthage), by which the river Iberus (*Ebro*) was fixed as a limit beyond which the Carthaginians were not to extend their conquests (as Polybius states), or (according to Livy) as the boundary between the two states, B. C. 228. (Polyb. iii. 27; Liv. xxi. 2; xxxiv. 13). That the latter expression, even if used in the treaty (which seems from Polybius to be more than doubtful) does not imply that the Roman arms had actually extended to the Iberus, is shown by Livy himself in the second passage quoted, where he says that Spain was then in the hands of the Carthaginians, held by their generals and armies, while Rome had not a single general nor any soldiers in the country. The previous treaty itself, made at the close of the First Punic War, had provided that the allies of each state should be safe from molestation by the other; and now, if we are to believe Livy (Polybius being silent on the point), an express stipulation to the same effect was introduced on behalf of Saguntum, a city lying within the portion assigned to the Carthaginians, but in alliance with the Romans. [SAGUNTUM.] The dispute upon this question, and its bearing upon the rights of the two parties in the Second Punic War, are of little consequence here, except as throwing light on the connection of the Romans with the peninsula. Thus much is certain, that Saguntum was in alliance with Rome when Hannibal laid siege to it, and it is also probable that the Romans had some footing in TARRACO.

3. *The Second Punic War.*—When Hannibal, on his march to Italy, had effected the passage of the Rhone, and turned the flank of Scipio, B.C. 218, the bold resolution, by which that general sent the bulk of his army into Spain under his brother Cneius, to oppose Hasdrubal, while it perhaps determined, however remotely, the issue of the war, began a struggle, first with the Carthaginians, and then with the Spaniards themselves, which lasted almost 200 years, and only ended with the subjugation of the northern mountaineers, the CANTABRI and ASTURES, by Augustus, B.C. 25. It is needless to dwell on those details, which are familiar to every reader as a part of the Second Punic War: the successes of Cn. and P. Scipio, and their unfortunate end, B. C. 218—212; the almost romantic expedition of young P. Scipio, 211, his capture of New Carthage, 210 [CARTHAGO NOVA], and the final expulsion of the Carthaginians from Spain, B.C. 206, which was followed by its erection into a Roman province. From this time the Romans had to deal with the natives, a people always willing to make use of foreigners against each other, but never ready to yield them obedience.

4. *Conquest of the country by the Romans.*—Neither the dominion of Hannibal, nor that acquired by the Romans in the Second Punic War, extended over so much as one half of the peninsula. The part which they had entirely subdued, seems to have comprehended *Catalonia*, *Valencia*, *Murcia*, and *Andalucia*, or the country between the sea and the great chain which runs parallel to the E. coast, and on the S. the country between the *Sierra Morena* and the sea. The province (its division will be spoken of presently) was governed by praetors; there being sometimes one, and sometimes two; and two legions were kept stationary in Spain. This arrangement, besides its effects on the Roman constitution, with which we are not here concerned, had a most important influence on Spain. "The legions remained there for a number of years, married Spanish women, and became estranged from Italy. When, therefore, such legions were disbanded, many soldiers would remain in Spain, unwilling to return to a country to which they had become strangers." (Niebuhr, *Lectures on Roman History*, vol. ii. p. 208.)

The central tribes, forming the great Celtiberian nation, retained their own government, which seems to have been of a republican form, in nominal alliance with the Romans, to whom the independent tribes of the N. and W. were as yet scarcely known by name. (Liv. xxiii. 21, xxix. 3; Flor. ii. 17.) The Roman settlements were continually exposed to the attacks which the natives, as provocation was given or opportunity offered, made upon them from their strongholds in the mountains. (Liv. xxviii. 4.) To abate the evil Cato the Elder, when consul, undertook an expedition against the Celtiberians and some smaller tribes, whom he induced, by a stratagem, to demolish the defences of their towns, and so to place themselves in his power, which, it must be added, he used with such justice and moderation as to win their hearts, B. C. 184. (Appian, *Hisp.* 41; Liv. xxxiv. 17; Plutarch, *Cat.* 10; Flor. ii. 17.) Indeed, as Niebuhr has more than once observed in his *Lectures*, the wars of Rome in Spain give constant illustrations of that point which (like most others) is still conspicuous in the national character, their great susceptibility of *personal influence*, which often proved a corrective to their bitter jealousy of foreigners. "It is indeed surprising" (he says, vol. ii. p. 209) "to see how a Roman general with humane feelings was always able to win the affections and confidence of those tribes [in central Spain], and to establish the authority of Rome for a time, until fresh acts of injustice provoked their resentment." Of this we have another striking example in the success of Tib. Sempronius Gracchus, the father of the celebrated brothers, who concluded a fierce war, in which the Romans had been for some time engaged with the Celtiberians, by an honourable peace, which at once secured the Roman supremacy and won the hearts of the natives. By this peace the Roman power became established in *Catalonia*, *Valencia*, *Arragon*, and the E. part of Castile, and the tribes who were parties to it bound themselves to build no more towns, B. C. 179. (Polyb. *ap Strab.* iii. pp 111, 170; Liv. xl. 49, et seq., xli. 3; App

Digitized by Google

Hisp. 43; Flor. *l. c.* CELTIBERI.) From this time it becomes difficult, from the paucity of materials, to give a consecutive account of the progress of the Roman arms: nor would the details be very interesting. The war seems to have been more or less constant, in the valleys of the Tagus and the Durius, with various tribes, among which the most conspicuous are the VACCAEI and the LUSITANI; what was gained by the skill and wisdom of one general being generally put to hazard by the cupidity and oppressions of another. On the whole it seems probable that, before the epoch of the Macedonian War (B. C. 171), the domination of Rome had been extended over the whole peninsula, except the mountainous regions of the north, and the mountain fastnesses of the centre. In B. C. 153, some new provocation, the exact nature of which is obscure [CELTIBERIA], drove the Celtiberians into open revolt, and the consul Q. Fulvius Nobilior made an unsuccessful campaign against them. (Liv. *Epit.* lib. xlvii; Appian, *Hisp.* 44—47.) The consul of the next year, the celebrated M. Claudius Marcellus, concluded an armistice with them on very fair terms, and turned his arms against the Lusitanians. But his moderation was alike distasteful to the Senate, who demanded an unconditional submission, and to his successor in the consulship, L. Licinius Lucullus (B. C. 151), who renewed the war with much cruelty and avarice, but with little success, against a part of the Celtiberians; but he gained some advantages against the VACCAEI and CANTABRI, and other peoples as yet unknown to the Romans. (Polyb. xxxv. 3, 4; Liv. *Epit.* xlviii; Appian, *Hisp.* 51—55.) After the war had lasted for four years, B. C. 153—149 (a period which is therefore sometimes called "the First Celtiberian War," to distinguish it from the war of NUMANTIA, which was, in fact, but its continuation), it appears to have been suspended, partly because the attention of Rome was now occupied with the Third Punic War (B. C. 149), but still more on account of the more serious occupation which the cruelty and treachery of Lucullus and the praetor Galba had made for the two armies of Spain in the great war against the Lusitanians and Viriathus, which was only finished by the consul D. Junius Brutus, in B. C. 138. [LUSITANIA.] Brutus, remaining in his province of Further Spain as proconsul, devoted the next year to the completion of the conquest of Lusitania, and then marched across the river Durius (*Douro*) into the country of the Callaici Bracarii, into which no Roman army had ever before penetrated, and advanced as far as the Minius (*Minho*), though his conquests can hardly have been permanent. [GALLAECIA.]

Meanwhile the state of affairs in the other province, Hither Spain, had become critical; and the Celtiberians, long known as the bravest and most noble-minded of the Spaniards, were engaged in that final struggle which was only quelled by the skill and the stern resolution of the younger Scipio Africanus. In B. C. 143 Q. Caecilius Metellus Macedonicus had entered his province of Hither Spain with the resolution to confirm, by its final conquest, the fame he had already acquired in Macedonia; and he gained great successes against the Celtiberians. (Liv. *Epit.* liii.; Val. Max. ix. 3. § 7, vii. 4. § 5, iii. 2. § 21; Appian, *Hisp.* 76; Eutrop. iv. 16.) The reverses of his successor Q. Pompeius, the varied fortunes of the war, and its conclusion by Scipio, belong to the history of NUMANTIA, whose fall and destruction established the Roman dominion in Central Spain, B. C. 133; and left nothing to be done except the subjection of the CANTABRI and ASTURES, which was effected by Augustus in B. C. 25. (See the articles: the Wars of Sertorius and those of Caesar belong to the internal history of Rome: and only deserve notice here on account of their effect in still further consolidating the Roman power in the peninsula.)

The Romans had thus been long quietly established in the south and east; and in the centre the constant presence of Roman armies, and the settlements of Roman veterans, had necessarily exerted a great influence on the language and manners of the natives, besides infusing into the population no small share of Roman blood. And, during the whole period of two centuries, no other foreign influence had been brought to bear upon the people: we hear only of one invasion by barbarians, that of the CIMBRI, who, after their great victory over Manlius and Caepio (B. C. 105), turned off into Spain, where they ravaged in the most fearful manner for the greater part of two years (B. C. 104, 103), until the desperate resistance of the Celtiberians induced them to give up the hope of a permanent conquest, and to retire from the peninsula. (Niebuhr, *Lect. on Rom. Hist.* vol. ii. p. 330.)

Under Augustus the Romanising process was carried on by the foundation of many and very considerable colonies, as, for example, CAESAR AUGUSTA (*Zaragoza*), EMERITA AUGUSTA (*Merida*), PAX JULIA (*Beja*), PAX AUGUSTA (*Badajoz*), LEGIO VII. GEMINA (*Leon*), and others. These cities were adorned with some of the finest productions of Roman architecture, of many of which magnificent ruins still remain.

The system of internal communication also, which had been commenced as early as B. C. 124 (Plin. iii. 39; Freinsheim, *Suppl. Liv.* lxi. 72), and further developed by Pompey's military roads over the Pyrenees (Sallust, *Frag. Hist.* iii. p. 820, Cort.), was made tolerably complete by Augustus. Thus the peninsula, with all its natural advantages, was laid open to travellers and settlers, who flocked over the Pyrenees to all quarters of the land; so that, by the time of Strabo, the Turdetani in the S., and the people about the Baetis in general, had been entirely converted to Roman manners (τελέως εἰς τὸν Ῥωμαίων μεταβέβληνται τρόπον), and they had even forgotten their own language. Most of them had obtained the *civitas Latina*, and had received Roman settlers; so that little was wanting of their being all Romans. The Iberians who were in this condition were called Togati; and among these were included even the Celtiberians, who had been regarded as the wildest (θηριωδέστατοι) of all (Strab. iii. p. 151); that is, of all the tribes in the S. and centre of the peninsula, for of them only is Strabo here speaking. The tribes of the northern mountains long after retained those fierce rugged manners which led Juvenal to write (*Sat.* viii. 119) "Horrida vitanda est Hispania."

Having thus become more thoroughly Roman than any other province out of Italy, Spain furnished many names distinguished in the history and literature of Rome, such as the poet Lucan, the two Senecas, Columella, Pomponius Mela, Quintilian, Martial, and many others.

IV. POLITICAL DIVISIONS AND CONSTITUTION UNDER THE ROMANS.

1. *The two provinces of Hither and Further Spain.*—The provincial constitution dates from

Digitized by Google

he year after the expulsion of the Carthaginians, B. C. 205; and at the same time the division of the peninsula into two parts, which appears already to have been used as a geographical distinction, was made a part of the political constitution; so that the peninsula formed, from the first down to the time of Augustus, *two** provinces, the eastern, called HISPANIA CITERIOR (ἡ ἐντὸς Ἰσπανία or Ἰβηρία), and the western called HISPANIA ULTERIOR (ἡ ἐκτὸς or ἔξω L), the words ἐντὸς and ἐκτὸς having reference to the river IBERUS (*Ebro*) which was at first adopted as the natural boundary. (Strab. iii. p. 166; Caes. *B. C.* iii. 73; Cic. *pro Leg. Manil.* 12; *pro Font.* 56. 3; Liv. xxviii. 18, xxx. 30, xxxii. 27, 28, xlv. 16; Plin. iii. 1. s. 2; Tac. *Ann.* iv. 13; Flor. iv. 2.) The boundary, however, was drawn differently at different times; so that we find, in Caesar (*B. C.* i. 38), Hispania Citerior extending as far as the SALTUS CASTULONENSIS, on the NE. margin of the valley of the BAETIS (*Guadalquivir*); and afterwards the boundary was drawn from this range, or from the sources of the Baetis to New Carthage, and later still to the town of URCI (*Almeria*), a little W. of the SE. point of the peninsula (CHARIDEMI PR.; *C. de Gata*), or even to MURGIS, a little further to the W. (Artemid. *ap.* Steph. B. *s. v.* Ἰβηρίαι; Strab. *l. c.*; Plin. iii. 3. s. 4; Const. Porph. *de Admin. Imp.* ii. 23.) Polybius, having probably in his mind the old Greek distinction between the country of the Celts and that of the Iberians, calls the eastern province Celtiberia and the western Iberia, and makes the boundary near Saguntum; but by this he probably refers to the *Ebro* as the boundary, for he fell into the common mistake about the position of Saguntum (Polyb. iii. 17; comp. SAGUNTUM; see also Artemid. *ap.* Steph. B. *s. v.* Ἡμεροσκοπεῖον; Strab. iii. p. 148; Plut. *Sertor.* 3). Other writers use Celtiberia as a synonym for Hither Spain (Plin. iv. 36; Solin. 23). Lastly, some late writers used the terms *Great* and *Little Spain* (Ἰσπανία μεγάλη and μικρά) as equivalent respectively to Hither and Further Spain (Charax, ad Const. Porph. *de Admin. Imp.* ii. 23; comp. Steph. B. *s. v.* Ἰσπανία). Even after the division into three provinces, we still find the phrases Hispania Citerior and Ulterior, the latter including Baetica and Lusitania.

2. *Administration before Augustus.*—The two provinces were governed, at first, by proconsuls elected *extra ordinem* (Liv. xxviii. 38; xxix. 13, xxxi. 20), and afterwards by two praetors, who were usually invested with the power of proconsuls and the insignia of the 12 fasces. (Liv. xxxii. 28, xxxiii. 26; Duker. *ad* Liv. xxxvii. 46, xxxix. 29; Drakenborch. *ad* Liv. xl. 39.) At the time of the Macedonian war, the provinces were united under one governor; but only as a temporary arrangement, and the double government was restored in B. C. 167 (Liv. xliv. 17, xlv. 16). As already observed, there were two armies stationary in Spain; two legions in each province (comp. Caes. *B. C.* i. 38). The seat of government for Hither Spain was at first TARRACO, and afterwards also CARTHAGO NOVA; that of the Further Province seems generally to have been at CORDUBA, and sometimes at GADES.

3. *The Three Provinces of Tarraconensis, Baetica, and Lusitania.*—Already in the time of Julius Caesar we find a distinction made between the part of Further Spain which lay SE. of the Anas (*Guadiana*), and the country of the Lusitani and Vettones to the W. and N. of that river. He represents the country as divided between the three legati of Pompeius, of whom Afranius held Hispania Citerior, with three legions; Petreius, the country from the Saltus Castulonensis to the Anas, with two legions; and Varro, the territory of the Vettones and Lusitani, on from the Anas, with two legions. (*B. C.* i. 38.) This distinction was adopted in the settlement of the provinces by Augustus; Hispania Ulterior being divided into the two provinces of BAETICA and LUSITANIA, while Hispania Citerior* was called by the new name of HISPANIA TARRACONENSIS, after its old capital TARACO. (Appian, *Hisp.* 3, 102; Strab. iii. p. 166; Mela, ii. 6; Plin. iii. 2; Dion Cass. liii. 12; Const. Porph. *de Admin. Imp.* ii. 23: the phrase *tres Hispaniae* is found in an inscription, *ap.* Marini, ii. p. 785: respecting the boundaries of the three provinces, see the several articles.)

4. *Imperial Administration.*—Baetica was a senatorial province; the other two were *provinciae Caesaris* (Strab. xvii. p. 840; Suet. *Aug.* 27; Dion Cass. liii. 12): all three were governed by praetors, of whom the praetor of Tarraconensis had consular power; and under him were three *legati* and three legions. His residence was generally at Tarraco, but sometimes also at New Carthage: that of the praetor of Baetica at Corduba; that of the propraetor of Lusitania usually at Augusta Emerita. The finances were administered, in Baetica, by a quaestor, in the two other provinces by *procuratores Caesaris*.

5. *Conventus Juridici.*—For judicial purposes, the whole country was divided into districts, called *conventus juridici*, in each of which the courts were held at a chief city, to which the *conventus* was considered to belong. There were, according to Pliny, who makes this division the basis of his description, 14 *conventus* in all; of which Tarraconenses had 7, Baetica 4, and Lusitania 3; as follows (Plin. iii. 3. s. 4, iv. 20. s. 24, 21. s. 35):—

(1). The 7 conventus of TARRACONENSIS were those of CARTHAGO NOVA, TARRACO, CAESARAUGUSTA, CLUNIA, LUCUS AUGUSTI, BRACARA AUGUSTA, and probably ASTURICA AUGUSTA; besides the Balearic islands. [BALEARES INSULAE.] These 7 conventus contained 472 towns and villages, of which 293 were reckoned as belonging to the other (*contributas aliis*) 179, which were made up as follows: 12 *coloniae*, 13 *oppida civium Romanorum* (i. e. with the full Roman citizenship), 18 *Latinorum veterum* (i. e. with the *jus Latii*), 1 *foederatorum* (allied, but without the civitas), and 135 *stipendiaria* (i. e. tributary, Plin. iii. 3. s. 4).

(2). The 4 conventus of BAETICA had their seats at GADES, CORDUBA, ASTIGI, and HISPALIS, and contained 175 towns; namely, 9 *coloniae*, 8 *muni-*

* Hence, as already observed, the names *Hispaniae* and Ἰβηρίαι; and also *duae Hispaniae*, Cic. *ll. sup. cit.*

* The name *H. Citerior* still continued to be used; and so, though less commonly, was that of *H. Ulterior*, sometimes in its old sense (Plin. iii. 3. s. 4), and sometimes for Baetica alone. (Plin. iii. 1. s. 2, where both senses occur at once: "Ulterior appellata, eadem Baetica .... Ulterior in duas, per longitudinem, provincias dividitur." Perhaps, however, the first words only mean that the first land of Europe *begins with* H. Ulterior or H. Baetica, without positively implying the full *equivalence* of the names.

Digitized by Google

cipia, 29 with the Latin franchise (*Latio antiquitus donata*), 6 free (*libertate donata*), 7 allied (*foedere donata*), 120 *stipendiaria*. (Plin. iii. 1. s. 3).

(3). LUSITANIA had for the head-quarters of its 3 conventus, the cities of EMERITA AUGUSTA, PAX JULIA, and SCALABIS; at which justice was administered to the peoples of 46 towns, including 5 *coloniae*, 1 *municipium civium Romanorum*, 3 with the Latin franchise (*Latii antiqui*), and 36 *stipendiaria*. (Plin. xxi. s. 35.)

Further particulars, including the names of the chief of the towns here counted up, are given under BAETICA, LUSITANIA, and TARRACONENSIS.

6. *Changes after Augustus.* — Vespasian rewarded the Spaniards for the readiness with which they espoused his cause by conferring the *Jus Latii* on all the cities of the peninsula. (Tac. *Hist.* iii. 53, 70; Plin. iii. 3. s. 4; coins of Vespasian, with the epigraph HISPANIA, ap. Eckhel, vol. vi. p. 338.)

Long before the new arrangement of the provinces under Constantine, the subdivision of Tarraconensis had begun by the erection of GALLAECIA and ASTURIA into a *Provincia Caesaris* under the Antonines, perhaps even under Hadrian. (Orelli, *Inscr.* No. 77.) Under Constantine, Spain, with its islands, and with the part of Africa which included the ancient Mauretania, now reckoned to Spain, was divided into the 7 provinces of BAETICA, LUSITANIA, GALLAECIA, TARRACONENSIS, CARTHAGINIENSIS, INSULAE BALEARES, and TINGITANA, which had for their respective capitals, HISPALIS, EMERITA, BRACARA, CAESARAUGUSTA, CARTHAGO NOVA, PALMA, and TINGIS. Of these 7 provinces the first 3 were governed by *Consules*, the other 4 by *Praesides;* and all were subject to the *Vicarius Hispaniarum*, as the deputy of the *Praefectus Praetorio Galliae*. (S. Rufus, *Brev.* 5; *Not. Dig. Occ.* c. 20; Böcking, *Annot. ad N. D.* vol. ii. p. 458, where much interesting matter is collected; Zosim. ii. 32, 33; Cod. Theod. L. v. et lxi.) Entirely independent of the Vicarius Hispaniae were 3 military governors (*comites*, Cod. Theod. L. iv. L. iii. &c.).

7. To complete this summary of the political geography of Spain, we subjoin a tabular list, from Ukert (vol. ii. pt. 1. p. 322), of the *Peoples and Districts of the Several Provinces*, as enumerated by the principal ancient authorities: —

[See next page.]

V. DESCRIPTIVE GEOGRAPHY FOR THE TIME OF THE ROMAN EMPIRE.

1. *Position and general form.* — In the period which has passed under our review, it has been seen that two leading facts respecting Spain had been established from the earliest period of historical research; namely, that it was the westernmost country of Europe*, and that it was not (as some of the poets seem to have fancied) an island, but had its Mediterranean shore continuous with that of LIGURIA. Of its actual separation from Libya there never was a doubt, even among the poets, though they look back in imagination to a time when the separation was effected by superhuman power. [HERCULIS COLUMNAE.] The early knowledge of the Straits led necessarily to some knowledge of the ocean which lies beyond them [ATLANTICUM MARE]; and we have seen that, at a very early period, the Greeks were acquainted with the Atlantic coast as far as the Sacred Cape (*C. S. Vincent*). The campaigns in Lusitania gave them a general idea of the W. coast: and the Cantabrian War, in which the fleet of Augustus, for the first time, sailed along the N. coast, united its evidence with the knowledge already obtained of the S. of Gaul, to complete the true notion of the *general form* of the country, as it is well described by Arnold: — "The Spanish *peninsula*, joined to the main body of Europe by the isthmus of the Pyrenees, may be likened to one of the round bastion towers which stand out from the walls of an old fortified town, lofty at once and massy." (Arnold, *History of Rome*, vol. iii. p. 391.) This passage is quoted for the sake of the striking form in which it puts the general idea of the object; but we may venture to improve the details, by observing, that a modern *polygonal* bastion might be a better image, and that the *isthmus* of the peninsula is more accurately described by an ancient geographer than by the modern historian, as "the isthmus" — not *of the Pyrenees* — but, with reference to its narrowest part, "*between* in between the two Gallic gulfs" (Strabo, as already quoted*); and it is *within* this isthmus that the Pyrenees rise, like gigantic lines of fortification to cover the whole peninsula which lies beyond them. (Comp. Strab. ii. p. 127; Agathem. ii. p. 36.)

These *general* views were held by the geographers under the Roman empire, but with some interesting differences as to details. They all describe the country as narrowest at the Pyrenees, and gradually widening out from thence. Mela makes its width at the Pyrenees half as much as at the W. coast; Strabo in the proportion of 3 to 5. Strabo compares it to the hide of a beast, having the neck turned towards the E., and by it joined on to Gaul (Κεφαλή: Strab. ii. p. 127, iii. pp. 137, 138, comp. ii. pp. 119, 120; Dion. Per. 287; Eusth. *ad Dion. Per.* 285; Mela, ii. 6. iii. 1; Plin. iii. 3. s. 4). It should be borne in mind that Strabo regarded the peninsula as a four-sided figure, of which the E. side was formed by the Pyrenees, which he believed to lie N. and S. parallel to the Rhine; from their extremities the N. coast ran on to the PR. NERIUM (*C. Finisterre*), and the S. coast

* This involved its being the W.-most country of the known world, according to the views of the ancient historians and geographers, from Herodotus down to Ptolemy, all of whom believed the W. coast of Africa to fall off to the SE. either at once from the Straits, or from a point opposite to the Sacred Promontory. [LIBYA.] Of course, we speak here of the mainland, excepting the FORTUNATAE INSULAE and the semi-fabulous ATLANTIS.

* This correction may appear trifling to some: but, apart from the general requirement of minute accuracy in descriptive geography, the point is really an important one. The chain of the Pyrenees is *not*, as people often think, perfectly continuous from sea to sea. Beginning, on the E., at *C. de Creus*, above the *gulf of Rosas*, it maintains an unbroken line, penetrable only by difficult mountain passes, till it ALMOST touches the bay of Biscay; but, instead of *actually* reaching the sea, the main chain continues its westward course, parallel to the N. coast, only throwing off lateral spurs to the coast, and thus leaving a pass which has proved in all ages the vulnerable point in the line. Indeed, if the *actual chain* were to be insisted on as the N. boundary of Spain, the whole line of coast, including *Guipuzcoa*, *Biscay*, *Santander*, the *Asturias*, and part of *Gallicia*, would belong *physically* to France. [See further, under PYRENAEI M.]

to the PR. SACRUM*, and the fourth side by the W. coast, extending N. and S., between the two headlands named, *parallel to the Pyrenees.* (Strab. iii. p. 137; comp. Justin. xliv. 1.) When others call it triangular they probably reckon the whole N. side, along the Pyrenees and N. coast, as one, which is more accurate. (Oros. i. 2; Aeth. Ister. *Cosmog.* p. 43, ed. Simler.) Its true form may be regarded, by a rough process of estimation, as a trapezium contained by lines drawn from the *C. Creus* to *C. Finisterre*, on the N.; from *C. Finisterre* to *C. S. Vincent*, on the W.; from *C. S. Vincent* to *C. de Gata*, on the S.; and from *C. de Gata* to *C. Creus*, on the E.: but, by drawing intermediate lines from headland to headland, the number of sides might be considerably varied.

2. *Boundaries.* — No country which is not insular has its boundaries so well defined as Spain: namely, on the E. and part of the S. side (the S. side of Strabo and other ancient writers), the *Mediterranean* [MARE INTERNUM]; on the rest of the S., the W., and part of the N. sides, the *Atlantic* [ATLANTICUM MARE]; and on the remainder of the N. side (the E. side of Strabo and other ancient writers), the *Pyrenees* [PYRENAEI M.]. Different names were applied to the seas which washed the coasts (the *bays* will be mentioned presently), as follows: the part of the Mediterranean on the S. coast was called BALEARICUM MARE and IBERICUM MARE; the part along the S. coast, INTERNUM MARE specifically; then came the Straits of Gades or Hercules [GADITANUM FRETUM]; the part of the ocean along the S. side was called GADITANUS OCEANUS, and that along the N. coast CANTABRICUM MARE.

3. *Size.*—The Spanish peninsula lies between 36° 1′ and 43° 45′ N. lat., and between long. 3° 20′ E. and 9° 21′ W. Its greatest length from N. to S. is about 460 miles, and its greatest breadth from E. to W. about 570 miles; its surface, including the Balearic isles, about 171,300 square miles. As might naturally be expected, the numbers given by the ancients vary greatly from these figures and from one another.† Eratosthenes made the distance from the Gades to the Sacred Cape 5 days' sail (Strab. iii. p. 148), and otherwise, from the Sacred Cape to the Pillars, 3000, and thence to the Pyrenees 3000 stadia; and therefore the greatest length 9000 stadia (Strab. i. p 64, ii. p. 106). Artemidorus reckoned 1700 stadia from the Sacred Cape to the Pillars. (Strab. iii. p. 148.) Polybius gives the distance from the Pillars to the Pyrenees as somewhat less than 8000 stadia, as follows: from the Pillars to New Carthage, 3000 stadia; thence to the Iberus, 2600 stadia; thence to Emporium, 1600 stadia (Polyb. iii. 39; Strab. ii. p. 106): the remaining distance, to the Pyrenees, he does not specify, but it is manifestly so much too great that, for this and other reasons, Ukert proposes to change the last-mentioned number from 1600 to 2000, or 2200, which would make the total from the Pillars to Emporium 7800 stadia (Ukert, vol. ii. pt. 1. p. 256 b. If this emendation be sound, we may account for the error as made by a copyist to agree with the 1600 stadia given by Strabo from the Ebro to the Pyrenees). Strabo makes the length from the Pyrenees to the W. coast, *in a straight line*, 6000 stadia, and he also calls this expressly the *greatest length:* elsewhere he assigns the same length to that part of the S. coast which lay within the Straits as follows: from Calpe to New Carthage, 2200 stadia; thence to the Iberus, about the same; thence to the Pyrenees, 1600: the greatest breadth, namely, along the W. coast, he makes 5000 stadia; the least, namely along the Pyrenees, 3000 stadia. (Strab. ii. pp. 106, 127, 128, iii. pp. 137, 156.)

Pliny quotes various statements, according to which the length varied from 1200 to 1500 M. P., the breadth from 900 to 1100, and the whole circuit of the coast from 2600 to 3000 M. P. (Plin. iii. 1. s. 2, 3. s. 4; iv. 21. s. 35). Ptolemy places Hispania between 3° and 9° long. and 36° and 46° lat. (ii. 4). In all these statements, it is important to observe that the geographers founded their estimates of the distances almost entirely on the itinerary measurements.

4. *Outline of the Coast, Promontories, and Bays.*

A glance at the map of Spain will show at once *twelve* salient points in the outline of the coast, besides some others of secondary importance. The first, beginning at the N. end of the E. coast, is that formed by the E. extremity of the Pyrenees, PYRENES PROM. (τὸ τῆς Πυρήνης ἄκρον) or VENERIS PROM. or PYRENAEA VENUS (τὸ Ἀφροδίσιον, ἱερὸν τῆς Πυρηναίας Ἀφροδίτης). A mountainous headland, projecting far into the sea, and dividing the gulf of CERVARIA (*Cerrera*) or PORTUS VENERIS on the N. from that of RHODA and EMPORIAE (*Bay of Rosas*) on the S.; its name being obtained from a temple of Venus which stood upon it. (Liv. xxvi. 19; Strab. iv. pp. 178, 181; Mela, ii. 5. § 8; Plin. iii. 3. s. 4.) From the S. side of the *Bay of Rosas* the coast preserves a pretty even direction, about SW. to a little S. of BARCINO (*Barcelona*), whence it forms a very large bay, which is terminated on the S. by the headland of DIANIUM (*C. S. Martin*), running far out to the east. In the upper part of this large bay are TARRACO and the delta of the IBERUS; its lower part, from about 40° N. lat., forms the SUCRONENSIS SINUS (*G. of Valencia*), facing the east. To the SSW. of the Dianium Pr. and E. of Carthago Nova lies the almost equally conspicuous headland of SATURNI PR. (*C. de Palos*); and the bay between them was called ILLICITANUS SINUS (*B. of Alicante*). Proceeding SW. from the Saturni Pr. we come to the CHARIDEMI PR. (*C. de Gata*), running out far to the S. and forming the turning point from the E. to the S. coast: between this and the former lay the MASSIENUS SINUS, which has no specific modern name. These are the four great headlands and the three large bays of the E. coast.

Doubling the Charidemi Pr. and passing by the comparatively small URCITANUS SINUS (*G. of Almeria*), upon which the boundary between Tarraconensis and Baetica comes down to the coast, the coast pursues almost a straight line to MALACA (*Malaga*), which forms the E. extremity (as the M. of the Baetis forms the western) of the base of the great triangular projection of the S. coast which runs out to meet a similar projection of the African coast, leaving between them only the narrow passage called the GADITANUM or HERCULEUM FRETUM (*Straits of Gibraltar*). The E. end of the Strait is guarded by the two rocky headlands called the Pillars of Hercules [HERCULIS COLUMNAE], of which the one on the European side, so celebrated under the names of CALPE and *Gibraltar*, [illegible]

* Elsewhere, however (ii. p. 128), he makes the S. coast end at CALPE, Gibraltar.

† N. B. 10 stadia = 1 geog. mile.

Digitized by Google

the termination of the Mediterranean coast of Spain.* The W. entrance of the Straits is formed by a headland, named, like most of those which have been mentioned, after a temple which stood upon it, JUNONIS PR., doubtless an object of deep reverence from the time of the Phoenicians downwards; its ancient sanctity has been long forgotten, but, even in a work like this, a tribute must be paid to the glories of *Cape Trafalgar*. Proceeding NW. past the island and city of Gades, we come to one of the minor headlands, that which lies outside of the mouth of the BAETIS (*Guadalquivir*), marked by the CAEPIONIS TURRIS (*Chipiona*). Hence the coast sweeps round a bay which has no name, NW. and W. to the mouth of the ANAS (*Guadiana*), where the coast of BAETICA terminates, and that of LUSITANIA begins. The first object on the S. coast of Lusitania is the projection called CUNEUS (*C. de S. Maria*); and about 1¼° W. of this, the S. side of the peninsula terminates at the frequently mentioned SACRUM PR. (*C. S. Vincent*), where, as at *Trafalgar*, ancient sanctity is eclipsed by modern glory.

The W. coast of LUSITANIA is so straight as to form no large bays, and it has only three headlands worth mentioning; namely, the long and sharp promontory S. of the estuary of the TAGUS, named BARBARIUM PR.† of Strabo (*C. Espichel*); then the W. point both of the estuary of the Tagus and of the whole coast, the MAGNUM PR.* of Mela and Pliny (*C. da Roca*); and lastly, about 40′ N. of this, the LUNAE or LUNARIUM PR. of Ptolemy (*C. Carvoeiro:* but see note just above).

At the mouth of the DURIUS (*Douro*) the coast of Lusitania ends, and that of GALLAECIA begins. It preserves the same character of straightness as far N. as the MINIUS (*Minho*), beyond which it is broken into a series of estuaries of river (enumerated under GALLAECIA), the points of land between which require no specific notice, till we come to the extreme NW. corner of the peninsula. Here the W. coast terminates at the headland called CELTICUM or NERIUM (*C. de Finisterre*), which lies almost at the intersection of two lines, each of which may be taken as a "datum line" for the W. and N. sides of the peninsula. These lines are the meridian of 9° W. long. and the parallel of 43° N. lat. The former runs through the W. side of the Sacred Cape (*C. S. Vincent*), just *outside* of the W. coast, except for the portion which projects westward about the mouth of the Tagus: while the latter keeps from about 50 to about 20 miles *within* (i. e. S. of) the N. coast, and coincides very nearly with the chain of mountains which form the W. continuation of the Pyrenees.‡ The greatest rise of the N. coast above the datum line of 43° N. lat. is made at once from the Pr. Nerium, whence the coast runs NE. up to the CORU or TRILUCUM PR. (*C. Ortegal*), which forms the extreme N. point of the whole peninsula. Hence the N. coast proceeds nearly straight to the E., but with a gradual declination to the S., having no large bays, and no promontories worth naming till we reach that of OEASO (*C. del Higuer*), at its E. extremity, which is formed by a spur of the Pyrenees.

In this outline, the statements of Strabo, Mela, Pliny, Ptolemy, and other ancient writers have been arranged in their several places, according to the true figure of the coast: further details are given under the respective articles. One matter which requires especial notice, namely, Pliny's great error in making the W. coast end, and the N. coast begin, *immediately above the estuary of the Tagus*, is more fully referred to under ARTABRI.

Before proceeding to the interior, it should be mentioned that, besides the lesser islands near the coast, the great group now known as the Balearic Islands, E. of *C. S. Martin* (Pr. Dianium), were always considered to belong to Hispania. [BALEARES, PITYUSAE.]

5. *The Interior, with its Mountains and Rivers.* —Few maps present to the eye a more striking picture than that of Spain; and yet, clearly as the physical features stand forth, an unpractised eye may easily misunderstand them. A single glance suffices to show that the country is intersected, through the greatest portion of its breadth, by five great chains of mountains, the two outermost of which fall off at once, on the N. and S. respectively, to the bay of Biscay and the Mediterranean, while between them and the other three there are inclosed four great valleys, forming the river-basins of the Douro, Tagus, Guadiana, and Guadalquivir; and that another chain, though less regular, running across, and, to some extent uniting, the E. extremities of these five, divides the sources of the rivers just named from another great river-basin, that of the *Ebro;* and, lastly, that, on the E. side of this basin, a great branch of the Pyrenees, running to the S., forms on its E. declivity another maritime border along the entire NE. coast of the peninsula. All this is very obvious; but it is quite insufficient for a clear outline of the structure of the peninsula. There is another element: one not quite so obvious on the map; but one which makes Spain so entirely unlike every other country of Europe, and which has so materially influenced its climate, its population, the foreign settlements in its several parts, the commerce of other nations with it, the campaigns carried on within its boundaries by contending empires, and its own intestine struggles, both in ancient and in modern times, that a right knowledge of it is of the first consequence to the whole study of the history of the country. This peculiar feature of the peninsula is well described by Arnold:—"Spain rises from the Atlantic on one side, and the Mediterranean on the other, not into one or two thin lines of mountains divided by vast tracts of valleys or low plains, but into a huge tower of table-land, from which the mountains themselves rise again, like the battlements on the summit. The plains of Castile are mountain plains, raised nearly 2000 feet above the level of the sea, and the elevation of the city of Madrid is nearly double that of

* The *Cape of Tarifa*, in the middle of the Straits, deserves notice as the southernmost point of the peninsula, though it has no specific name in ancient geography.

† Possibly these two names may be meant to denote one and the same headland, viz. the *C. Espichel;* and the next, PR. LUNAE, may be the *C. da Roca.*

‡ For the sake of those who find such modes of reference useful, another pair of co-ordinate axes may be given for the peninsula in general. Taking TOLETUM (*Toledo*), as a centre, it will be found that the meridian of 1° W. long. and the parallel of 40° N. lat. intersect a very little N. of it, dividing the peninsula into four quarters, the lengths and breadths of which along the axes (though not their areas) are nearly equal.

Digitized by Google

the top of Arthur's Seat, the hill or mountain which overhangs Edinburgh." (*History of Rome*, vol. iii. p. 391.) The elevation of this central table-land is, in fact, higher than that of any other table-land in Europe, while its extent is so great as to comprehend nearly one-half of the area of the peninsula. Its limits correspond pretty nearly to that of the quadrangle formed by the parallels of 38° and 43° N. lat. and the meridians of 1° and 8° W. long. Its boundaries on the N. and S. are strikingly defined by the continuous and lofty chains of mountains called respectively the *Mountains of Asturias* [VASCONUM SALTUS, and VINDIUS M.] and the *Sierra Morena*. On the E. its separation from the basin of the *Ebro* and the E. maritime district is effected by a less perfectly continuous series of high lands and mountain ridges, called by the ancients IDUBEDA in the N. part, and OROSPEDA in the S.; and on the W. it subsides to the Atlantic by means of the extreme portions of the mountains which traverse it from E. to W., with a declination more or less to the S.*, becoming more decided towards the extremities, till at last their W. slopes fall down to the Atlantic, forming the valleys and terraces of Portugal. [Comp. LUSITANIA.] Of the ranges which thus traverse the table-land the most important is that which runs SW. almost through its centre, and terminates in *C. da Roca* (Magnum Pr.), W. of the mouth of the Tagus (where it was called HERMINIUS M.: no specific names are given to the other portions of the chain), dividing the region into two nearly equal parts. Of these divisions the northern contains the river basin of the *Douro* [DURIUS], and is now known as the table-land of *Old Castile* and *Leon*; the southern, or table-land of *New Castile* and *Estremadura*, is much more mountainous, and is subdivided by another range, which has no specific ancient name, into the river-basins of the *Tagus* [TAGUS] and the *Guadiana* [ANAS].

Of the lower districts by which this table-land is inclosed on all sides, like a platform surrounded with ascents of various slopes, that on the W. coast is so closely connected with the valleys of the table-land itself, that (however distinct from it in *modern* geography and history) the former may be considered by the student of ancient history as an appendage to the latter. The N. maritime district forms the narrow strip along the *bay of Biscay*, which was peopled by tribes as rugged as itself. [ASTURES, CANTABRI, GALLAECIA.] The districts E. and S. of the central table-land are of the utmost importance in history. Lying open to the Mediterranean, with a vast sea-board, and abounding in valuable productions, they early came to be more closely connected with the civilised states around the Inner Sea than with the wild regions in the interior of the peninsula. The E. portion consists properly of two parts; the river basin of the *Ebro* [IBERUS], which lies much lower than the central table-land, but still considerably higher than the sea; and the E. maritime region, extending from the Pyrenees to New Carthage: but the two parts are so closely connected in ancient history that they may be regarded as one division. Thus viewed, the E. district is of a triangular form, having the Pyrenees for its base, and its vertex at New Carthage and the *C. de Palos*, its E. side formed by the Mediterranean shore, and its W. side by the ranges which divide it from the central table-land; and answering to the provinces of *Catalonia*, *Aragon*, with the S. part of *Navarre*, *Valencia*, and parts of *New Castile* and *Murcia*.

The S. district is of still far greater importance, and may be regarded as forming, to a great degree, a country by itself, distinct from all the rest of the peninsula; as, indeed, it has been politically and historically a separate country during some of its most important periods of Spanish history. This country — the TARTESSIS and BAETICA of the ancients, the *Andalucia* of modern geography — is severed from the rest of Spain by the great chain of the *Sierra Morena* [MARIANUS MONS], on the S. of which lies the valley of the *Guadalquivir* [BAETIS], open entirely to the W. shore, but inclosed on the S. by another chain of lofty mountains, named, from their snowy summits, the *Sierra Nevada* [ILIPULA], which sink down to the S. coast by the intermediate chain of the *Alpujarras*, and form on the N. the plain of *Granada*. On the E. side, the valley of the Baetis is entirely shut in by ranges which run NE. and SW., linking the *Sierra Nevada* and the *Sierra Morena* to one another and to the chain of OROSPEDA on the W. border of the eastern district. Of these cross chains, the chief are those called the CASTULONENSIS SALTUS and the ARGENTARIUS MONS.

While thus separated by mountains from the rest of Spain, *Andalucia* lies perfectly open to Africa and the Mediterranean,—a fact of the utmost importance in relation to its ancient ethnography as well as its modern history. No one who rightly appreciates this fact will wonder that it was a Phoenician dependency while all the rest of Spain was still barbarian, nor that it was united to *Marocco* under the later Roman empire, under the Vandals, and under the Arabs, nor that the kingdom of Granada should have so long survived the expulsion of the Moors from the rest of Spain.

To sum up this description. For the purposes of ancient history and geography the peninsula of Spain is divisible into four main parts: — (1.) The central table land, with the W. coast, containing the river basins of the Douro, Tagus, and Guadiana [ANAS]: (2.) The mountainous N. coast, comprising the ancient GALLAECIA, ASTURIA, and CANTABRIA: (3.) The valley of the IBERUS, and the E. coast: (4.) BAETICA, or *Andalucia*.

The details respecting the mountains and rivers which have been mentioned, as well as the lists of many others, not important enough to be included in this general outline, are given under the several articles bearing their names, and under those describing the three provinces and the smaller districts of the peninsula.

VI. CLIMATE AND PRODUCTIONS.

The diversities in the surface of the peninsula are attended with a corresponding variety of climate: so that Spain, though the southernmost country of Europe, has, in different parts, the climates of nearly all the rest of the continent. This is well set forth by Niebuhr: — "Andalucia, the southernmost part, is almost identical with ancient Baetica, and, as is observed even by Strabo, is a country quite different from the rest of Spain. ... While Valencia is flat and well watered, but wanting in energy, Andalucia and Granada are countries matured by the sun in the highest degree; they are scarcely European, but almost like tropical countries. The eastern division

* The northernmost range does not come exactly under this description: its course is almost due W. until it throws off a number of branches, by which it subsides to the Atlantic, forming the mountain region of *Gallicia*.

Digitized by Google

or the country of the Iberus, if we examine its northern parts, Aragon and Catalonia, already greatly resembles a northern country. Valencia stands in the middle between them. The whole country of the Tagus is throughout a table-land, very high at its commencement, piercingly cold and unhealthy as far as the frontier of Portugal..... Between the Sierra Morena and the Douro we have the large plain of Estremadura, which is fertile but unhealthy, and perfectly flat. The plain of Leon is scarcely inhabitable on account of its drought and barrenness. The southern parts of Castile are productive, and the continuation of the valley into Portugal changes its character so much as to become extremely rich: it still contains large plains, but the greater part is a beautiful hilly country." (*Lectures on Ancient Ethnography and Geography*, vol. ii. pp. 282, 283.) Arnold also has a brief passage on the subject, well worth quoting:—"The centre of Spain, notwithstanding its genial latitude, only partially enjoys the temperature of a southern climate; while some of the valleys of Andalucia, which lie near the sea, present the vegetation of the tropics, the palm-tree, the banana, and the sugar-cane. Thus, the southern coast seemed to invite an early civilisation; while the interior, with its bleak and arid plains, was fitted to remain for centuries the stronghold of barbarism." (*History of Rome*, vol. iii. pp. 391, 392.)

With these descriptions the statements of the ancient writers agree tolerably well. It would be tedious to refer at length to the passages of Polybius, Strabo, Pliny, Justin, and other writers, which are collected by Ukert (vol. i. pt. 1. pp. 323, 324).

Its fertility is generally celebrated by the ancients, who mention among its products, corn, wine, oil, fruits, pasturage, metals of all kinds, and precious stones. Baetica was famed for its abundant harvests; Lusitania, for its numerous flocks; Turdetania, for its timber; the fields of Carthago Nova and other plains, for the *spartum*, from which cordage was made. But the great attraction of the peninsula to civilised nations, from the earliest times, was found in its mines of the precious metals, especially the silver mines in the mountains of the south. It also yielded gold, iron, quicksilver, cinnabar, rock-salt, and other valuable minerals. (See the authorities *ap.* Ukert, *l. c.*: comp. BAETICA, CARTHAGO, CARTHAGO NOVA.)

VII. POPULATION.

The ethnography of the Spanish peninsula is a very difficult subject. It is certain that, in the historical period, the chief stock of the population was the race called Iberian, with a considerable intermixture of Celts, and, in the S., of Phoenicians also. But as to the precise position of the Iberians in the human family, and as to the questions, whence they came into the peninsula, in what exact relation they stood to the Celtic population, and what has become of them in the subsequent movements of races, which have swept like mighty tide-waves backwards and forwards over the face of the peninsula:—these are problems of which we cannot yet be said to have obtained a very satisfactory solution.

The prevailing opinion among the ancients, and the one most in favour with modern scholars, represents the Iberians as an aboriginal people, in addition to whom the peninsula received an immigration of Celts from beyond the Pyrenees, who overpowered the Iberians. The two peoples coalesced to a great extent, forming the great nation of the CELTIBERI; but pure Iberian and pure Celtic tribes were still to be found in various parts of the peninsula. (Herod. ii. 33; Diod. Sic. v. 33, 35; Strab. i. p. 33, iii. pp. 148, 151, 153, 157, 158, 162; Polyb. ii. 31; Appian, *Hisp.* 2; Plin. iii. 1. s. 3; Lucan, iv. 9; Sil. iii. 140.) The Celtiberians occupied chiefly the centre of the country, as well as parts of Lusitania and of the N. coast. [CELTIBERI.] The pure Iberians dwelt chiefly in the Pyrenees and on all round the coast, and the pure Celts on both sides of the river Anas, and in the extreme NW. of the peninsula, about the promontory Nerium. [CELTICA.] Lastly, there was a large admixture of Phoenicians in Baetica; and on other points of the S. and E. coasts colonies were established by the Phoenicians and Carthaginians, and by various Greek states, as the Phocaeans, Rhodians, Zacynthians, Samians, and Massaliots (Herod. i. 163; Strab. iii. pp. 151, 157, 159; Mela, iii. 6; Plin. v. 19. s. 17); besides the great influx of Romans at a later period.

But, as regards the first inhabitants, a directly opposite opinion has been held by not a few eminent scholars, and is supported by the high authority of Niebuhr, who expounds it as follows:—"Spain is destined by nature almost more than Italy, to form one compact state: no one can have a doubt about this, when looking at the three seas by which it is surrounded. Nevertheless, however, it did not become united as one whole till a late period, though this happened before the time of which we have written records; for there can be no doubt that previously it was divided into two distinct countries. On the one side, the Pyrenees formed its natural boundary towards Gaul (in the course of time, however, they were crossed, and the Iberians ruled over the country from the *Garonne* to the Rhone); but at an earlier period another natural boundary line was formed by the Sierra Morena, an extensive range of mountains, which, for a couple of centuries, formed the boundary between the Christian and Mahommedan parts of Spain. These same mountains, no doubt, also separated the Iberians from the Celts. The heights in the north of Spain, whence the Tagus, Durius, and Minius flow towards the sea, and whence, on the other side, smaller rivers carry their waters towards the *Ebro*, were inhabited by Celts, who were also called Celtiberians. Other Celts bearing the name Celtici dwelt in *Algarbia* and the Portuguese *Estremadura*, and others again inhabited the province *Entre Douro e Minho* in the north of Portugal. These three Celtic nations were quite isolated in Spain. The Celtiberians were not pure Celts, but, as even their name indicates, a mixture of Celts and Iberians; but the Celts in Portugal are expressly stated to have been pure Celts. The latter attracted the attention even of the ancients, especially of the excellent Posidonius, who made so many correct observations, but allowed himself in this instance to be misled. He is of opinion that the Celts had immigrated into Spain, for he reasoned thus: as the Celts could migrate into Italy and across the *Danube* as far as the *Dnieper* it was far less difficult for them to enter the neighbouring country of Spain. But such isolated parts of a nation cannot have arrived in a country by immigration; on the contrary, the Iberians appear extending themselves and in possession of *Aquitania* and *Languedoc* at a very early period; how then could the Celts, not being able to maintain the Pyrenees, have spread over the whole peninsula?

Digitized by Google

It is probable, nay almost evident, that it was the Iberians that migrated and extended themselves; and this opinion agrees with the most ancient traditions of the Celts in Ammianus Marcellinus, according to which they were once masters of all the west of Europe, but were expelled from many parts. If we suppose that the Celts dwelt as far as the Sierra Morena, and that the Iberians, perhaps reinforced by their kinsmen from Africa, pressed them forward, this supposition would account for some Celtic ruins which are still extant; and the Celts may have capitulated in a similar manner to that described in the book of Joshua. As one part of England was occupied by Germans so completely as to destroy every trace of the ancient inhabitants, while elsewhere, as e. g. in *Devonshire*, the Britons, in large numbers, lived among the Germans and became mixed with them, so the Iberians expelled the ancient Celtic population, wherever the nature of the country did not protect it; but the Celts maintained themselves in the mountains between the *Tagus* and the *Iberus*, and the Iberians only subdued them, and then settled among them. In course of time the two nations became amalgamated, and thus formed the Celtiberians, whose character, however, is essentially Iberian." (*Lectures on Ancient Ethnography and Geography*, vol. ii. pp. 280, 281.)

In further support of these views, we have the fact already mentioned, that Spain lies quite open to immigration from the East by way of the Mediterranean and the Straits; the now established fact that N. Africa, with which Spain is thus connected, was peopled from the East; and traditions of settlements from that side, of no great value certainly by themselves, but of some interest as agreeing with the results of other investigations. (Sall. *Jug.* 18; Strab. xv. p. 687; Joseph. *Ant.* x. 11. § 1.) The decision of the question, if it is to be decided at all, requires a more profound examination than has yet been made of the remnants of the old Iberian language as preserved in inscriptions, in geographical names, and in the dialects of the Basques, who are now admitted on all hands to be the lineal descendants of the old Iberians. The foundations of such an investigation have been laid by the late W. von Humboldt, in his work already mentioned. (*Prüfung der Untersuchungen über die Urbewohner Hispaniens vermittelst der Baskischen Sprache*, Berlin, 1821: comp. Freret, *Mém. de l'Acad. des Inscr.* vol. xviii. p. 78; Hoffmann, *die Iberer ina Western und Osten*, Leipz. 1838.)

Thus much is certain that, in the whole period of ancient history, the great bulk of the population was Iberian; and, through all subsequent infusions, large as they have been, of Roman, Gothic, and Arab blood, the great mass of the nation still retains the leading characteristics which are ascribed to the Iberians in general and to the Celtiberians in particular, by Strabo and other ancient writers, and which are summed up by Arnold in the following words: — "The grave dress (Strab. iii. p. 145), the temperance and sobriety, the unyielding spirit, the extreme indolence, the perseverance in guerilla warfare, and the remarkable absence of the highest military qualities, ascribed by the Greek and Roman writers to the ancient Iberians, are all more or less characteristic of the Spaniards of modern times. The courtesy and gallantry of the Spaniard to women has also come down to him from his Iberian ancestors: in the eyes of the Greeks, it was an argument of an imperfect civilisation, that among the Iberians the bridegroom gave, instead of receiving, a dowry; that daughters sometimes inherited, to the exclusion of sons, and, thus becoming the heads of the family, gave portions to their brothers, that they might be provided with suitable wives. (Strab. iii. p. 165.) In another point, the great difference between the people of the south of Europe, and those of the Teutonic stock, was remarked also in Iberia: the Iberians were ignorant, but not simple-hearted; on the contrary, they were cunning and mischievous, with habits of robbery almost inimitable — fond of brigandage, though incapable of the great combinations of war. (Strab. iii. p. 154.) These, in some degree, are qualities common to almost all barbarians; but they offer a strong contrast to the character of the Germans, whose words spoke what was in their hearts, and of whose most powerful tribe it is recorded that their ascendancy was maintained by no other arms than those of justice." (*Hist. of Rome*, vol. iii. pp. 396, 397.)

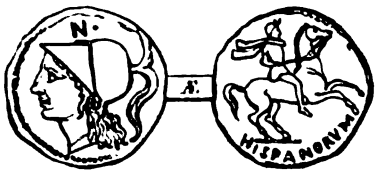
The different tribes, however, were distinguished by very different degrees of character. The Cantabrians, and the peoples of the N. coast in general, were the wildest and rudest: the Celtiberians, though scarcely more civilised, were of a very noble disposition: the Vaccaei were (under the Romans, at least) highly civilised, and only inferior to the Turdetani of Baetica, who cultivated science and had a literature of their own. [TURDETANIA.]

There remain two very striking points in which the ancient Iberians and the modern Spaniards bear the closest resemblance to each other. The one is, not merely the disunion, but the alienation and exasperation, which the several nations have ever displayed towards each other, and which has made them the almost helpless victims, or the still more helpless dependents, of foreign foes or friends, whom they have afterwards requited with intercine hatred or bitter ingratitude. The other point referred to is the obstinate endurance with which they have fought behind walls, as attested among other instances, by the sieges of SAGUNTUM and NUMANTIA, *Gerona* and *Zaragoza*; a quality, in both cases, strangely contrasted with their inability to stand the shock of armies on the open field of battle. "In Condé's History of the Arabs, a general, in his despatch to the Caliph, says of the Spaniards: On horseback they are eagles; in the defence of their towns, lions; but in the field they are women." (Niebuhr, *Lectures on Anc. Eth.*, &c. vol. ii. p. 286: the whole Lecture, as well as the passage on Spain in Arnold's *History*, to both of which such frequent reference has been made in this article, deserve the most attentive perusal: the half-volume devoted to Hispania in Ukert's *Geographie der Griechen und Römer* is a masterly production, and contains a collection of references to nearly all the materials required for the study; but the reader of Ukert must be constantly on his guard against false references. Forbiger, *Handbuch der alten Geographie*, vol. iii. pp. 4—109, follows close in Ukert's steps, correcting many of his false references, but introducing others of his own; he adds, however, some valuable notices of the modern literature of the subject. Among the works of the ancient writers, Strabo's third book stands pre-eminent for its fulness and general accuracy. The conquest of the peninsula by the barbarians, and the transition to its medieval history, form too large a subject to be entered on here: all that is necessary for the pur-

Digitized by Google

ose of this work will be found in the articles on he Alans, Goths, and Vandals.)

The annexed coin, with the Roman legend HIS-ANORUM, is generally considered as belonging to he Hispanians in general: but there is much reason o believe that it does not really belong to Spain at ll, but was struck in *Sicily* by a colony of Spanish uxiliaries settled in that country. [P. S.]



COIN ASCRIBED TO HISPANIA.

HISPA'NUM MARE or HISPA'NUS OCE-ANUS, also called MARE IBERICUM and BALEA-RICUM (πόντος Ἰβηρικός, τὸ Ἰβηρικὸν πέλαγος, τὸ Βαλλιαρικὸν πέλαγος), the specific name of the W. art of the MARE INTERNUM (*Mediterranean*), bout the Balearic islands, and along the E. coast, nd also, according to some of the ancients, the S. oast of Hispania. Thus Agathemerus makes it xtend from the Pillars of Hercules to the Pyrenees. Strab. ii. p. 122; Dion. Per. 69; Agathem. i. 3, i. 14; Flor. iii. 6, 9; Plin. iii. 5. s. 10; Solin 23; Priscian. Perieg. 75; Claudian. xxiii. 8.) [P. S.]

HISPELLUM (Ἑλσπέλλον, Strab.; Ἴσπελλον, Ptol.: *Eth.* Hispellas, -ātis: *Spello*), a town of Umbria, at the foot of the Apennines, and on the eft of the Flaminian Way, about 4 miles from Fulginium (*Foligno*) and 6 from Mevania (*Bevag-na*). It is noticed by several writers among the more considerable towns of this part of Umbria. Strab. v. p. 227; Ptol. iii. 1. § 54; Sil. Ital. viii. 458; Orell. *Inscr.* 98.) Pliny terms it a colony, nd we find it bearing in inscriptions the titles of "Colonia Julia Hispelli" and "Colonia Urbana Flavia," whence it appears that it must have re-eived two successive colonies, the one under Augus-us, the other under Vespasian. (Plin. iii. 14. s. 19; Orell. *Inscr.* 2170, 3885; Hygin. *de Limit.* p. 79.) Augustus, indeed, seems to have shown it special favour, and bestowed on Hispellum the rove and temple of Clitumnus, though these were more than 12 miles distant from the town, and eparated by the intervening territories of Mevania nd Fulginium. (Plin. *Ep.* viii. 8.) We learn from he Liber Coloniarum that it received a fresh acces-ion of colonists under Hadrian. (*Lib. Colon.* p. 224; Zumpt, *de Col.* p. 409.) Inscriptions, as rell as extant remains, testify to its flourishing ondition under the Roman empire: besides con-iderable ruins of its amphitheatre in the plain below he modern town, there exists one of the Roman ates, called Porta Veneris, in good preservation, ome remains of a triumphal arch in a street thence alled the *Via dell Arco*, and considerable portions of he ancient walls. The inhabitants profess to show he house and tomb of the poet Propertius, for which here is certainly no authority: but many critics onsider Hispellum as having a better claim than Mevania to be regarded as his birthplace. [ME-VANIA.] Hispellum was an episcopal see till the ixth century, when it was taken and destroyed by he Lombards, and the see transferred to *Foligno;* ut the modern town of *Spello* is still a consider able place. (Rampoldi, *Corogr. d'Italia*, vol. iv. p. 1066.) [E. H. B.]

HISTIAEA (Ἱστίαια). 1. A town in the north of Euboea, better known under its later name Oreus. [OREUS.]

2. In Attica. [ATHENAE, p. 294.]

HISTIAEOTIS (Ἱστιαιῶτις, also Ἑστιαιῶτις). 1. A district in the north-west of Thessaly. [THESSALIA.]

2. A district in the north of Euboea, of which the chief town was Histiaea, afterwards called Oreus. [OREUS.]

HISTO'NIUM (Ἱστόνιον: *Eth.* Histoniensis: *Il Vasto* or *Vasto d'Ammone*), one of the chief towns of the Frentani, situated on the coast of the Adriatic, about five miles S. of the promontory called *Punta della Penna*. No mention of it is found in history, but the name is noticed by all the geographers among the towns of the Frentani, and we learn from the Liber Coloniarum that it received a colony, apparently under Caesar. (Mel. ii. 4. § 9; Plin. iii. 12. s. 17; Ptol. iii. 1. § 18; Lib. *Colon.* p. 260; Zumpt, *de Colon.* p. 307.) It did not, however, obtain the rank of a colonia, but continued to bear the title of a municipium, as we learn from inscriptions. (Orell. *Inscr.* 2603, 4052; Zumpt, *l. c.*) The same authorities prove that it must have been under the Roman empire a flourishing and opulent municipal town; and this is further attested by existing remains, which include the vestiges of a theatre, baths, and other public edifices, besides numerous mosaics, statues, and columns of granite or marble. Hence there seems no doubt that it was at this period the chief city of the Frentani. (Romanelli, vol. iii. p. 32.) Among the numerous inscriptions which have been found there, one of the most curious records the fact of a youth named L. Valerius Pudens having at thirteen years of age borne away the prize of Latin poetry in the contests held at Rome in the temple of Jupiter Capitolinus. (Romanelli, *l. c.* p. 34; Orell. *Inscr.* 2603; Mommsen, *I. R. N.* 5252.) The name of Histonium is still found in the Itineraries of the fourth century (*Itin. Ant.* p. 314; *Tab. Peut.*), and it probably never ceased to exist on its present site, though ravaged successively by the Goths, the Lombards, and the Arabs. Some local writers have referred to Histonium the strange passage of Strabo (vi. p. 242), in which he speaks of a place called Ortonium (as the name stands in the MSS.) as the resort of pirates of a very wild and uncivilised character. The passage is equally inapplicable to Histonium and to Ortona, both of which names naturally suggest themselves; and Kramer is disposed to reject it altogether as spurious. (Kramer, *ad loc.*)

Histonium has no natural port, but a mere road-stead; and it is not improbable that in the days of its prosperity it had a dependent port at the *Punta della Penna*, where there is good anchorage, and where Roman remains have also been found, which have been regarded, but probably erroneously, as those of Buca. [BUCA.] The inscriptions published by a local antiquarian, as found on the same spot, are in all probability spurious. (See Mommsen, *Inscr. Regn. Neap.* p. 274, *App.* p. 30; who has collected and published all the genuine inscriptions found at Histonium.) [E. H. B.]

HISTRIA. [ISTRIA.]

HITTITES (Χετταῖοι, LXX.), one of the tribes of the Canaanites, whom the Israelites found in Palestine. (*Gen.* xv. 20; *Exod.* iii. 8, xxiii. 23.) They

Digitized by Google

dwelt in the district of Hebron, and in the neighbourhood of the Amorites. (*Gen.* xxiii. 7, seq.; *Numb.* xiii. 29.) Solomon compelled them to pay tribute along with the other Canaanitish tribes (1 *Kings*, ix. 20, seq.); but we find them at a later period (in the time of Joram, king of Israel) governed by kings of their own (2 *Kings*, vii. 6). The Hittites are also mentioned after the return of the Jews from captivity (*Ezra*, ix. 1); but after this time their name does not occur again.

HIVITES (Εὐαῖοι, LXX.), one of the tribes of the Canaanites, whom the Israelites found in Palestine. (*Gen.* x. 17; *Exod.* iii. 8, 17, xxiii. 23; *Josh.* iii. 10.) They dwelt in the north of the country, at the foot of Mount Hermon (*Judg.* iii. 3), and appear to have been driven by the Israelites to the north-west, as we find them mentioned in the time of David together with Tyre and Sidon. (2 *Sam.* xxiv. 7.) The remnant of the nation was reduced to subjection by Solomon (1 *Kings*, ix 20), after which they disappear from history.

HOLMI (Ὅλμοι: *Eth.* Ὁλμεύς), a town on the coast of Cilicia Tracheia, a little to the south-west of Seleucia; during the period after Alexander its inhabitants were transferred to form the population of the neighbouring Seleuceia. (Strab. xiv. p. 670; Scylax, p. 40; Steph. B. *s. v.*; Plin. v. 22, who calls the place *Holmia*.) Leake (*Asia Minor*, p. 205) thinks the modern town of *Aghaliman* occupies the site of the ancient Holmi, which Scylax describes as deserted even in his time.

Another town of the same name existed in Phrygia, on the road from Apameia to Iconium, at the entrance into a pass of Mount Taurus. (Strab. xiv. p. 663.) It is probable that it may have been the same place as the fort Myriocephalon, by which the emperor Manuel Comnenus passed in A. D. 1172, before the battle of Iconium. (Nicet. Chonat. p. 115.) [L. S.]

HOLMO'NES. [OLMONES.]

HOLOPHYXUS. [OLOPHYXUS].

HOMANA, mentioned by Pliny (v. 23) as a town in Pisidia, is no doubt the same as Οὐμανάδα in Hierocles (p. 675). It was, probably, situated at the southern extremity of lake Caralitis, and was the capital of the Homanades on the frontier of Isauria, who, besides Homana, are said to have possessed 44 forts (comp. Tac. *Ann.* iii. 48), a statement opposed to the remarks of Strabo (xii. pp. 569, 668, 679), according to which the Homanades (Ὁμαναδεῖς), the most barbarous of all Pisidian tribes, dwelt on the northern slope of the highest mountains without any towns or villages, living only in caves. In the reign of Augustus, the consul Quirinius compelled this little tribe, by famine, to surrender, and distributed 4000 of them as colonists among the neighbouring towns. [L. S.]

HOMANADES. [HOMANA.]

HOMERITAE (Ὁμηρῖται, *Peripl.* p. 13; Marcian, p. 13; Plin. vi. 28; Ptol. vi. 7), a people of Arabia Felix who occupied its S. promontory (*Yémen*). The Arabs of *Yémen*, who are well known in Oriental history under the name of *Himyari*, and to the Greeks by the name of Homeritae, were a civilised people in very remote ages. They possessed a rich and fertile territory, very advantageously situated for commerce. The Himyaritic dynasty of the *Tobbaie* (from the Arabic *Tabbáïah*, which had a general signification like that of Emperor, Khán, Pharaoh, Caesar, &c.; D'Herbelot, *Bibliothèque Orientale s. v. Tobba*) referred to a very early period, and their power appears to have been very extended, as monumental traces of the *Himyari* have been found not only in *Yémen*, but in distant countries both to the E. and W. There is a considerable affinity between the *Himyari* character and the well-known and most ancient *Dévanagari Sanscrit*. The earliest writing was probably the Himyaritic, even anterior to the Cuneiform characters.

The independence of the Homeritae was first violated by an Aethopian conqueror. (Procop. *B. P.* i. 19, 20.) Those who wish to study the very obscure question of the Jewish and Abyssinian kingdoms in Homeritis will find much valuable information in Dean Milman's notes upon the 42nd chapter of Gibbon, and the authorities there quoted, especially the very able notes of Saint Martin upon Le Beau (*Bas Empire*, vol. viii. pp. 46—67, 153—158), to which may be added Ritter, *Erdkunde*, vol. xiv. p. 38; Ewald, *Gesch. des Volkes Israel*, vol. i. p. 383, 2nd edit. 1851; Humboldt, *Cosmos*, vol. ii. p. 206, trans.; and the 2nd volume of Colonel Chesney's *Expedition to the Euphrates*. It may be sufficient here to quote the words of Gibbon:—

"If a Christian power had been maintained in Arabia, Mahomet must have been crushed in his Orad, and Abyssinia would have prevented a revolution which has changed the civil and religious state of the world." [E. B. J.]

HO'MOLE or HOMO'LIUM (Ὁμόλη, Strab. ix. p. 443; Ὁμόλιον, Strab. *l. c.*, Liv. xlii. 38; Plin. iv. 9. s. 16), a town of Thessaly, situated at the foot of Mt. Homole, and near the edge of the vale of Tempe. Mt. Homole was the part of the chain of Ossa [Ossa] between Tempe and the modern village of *Karitza*. Mt. Homole is sometimes used as synonymous with Ossa. It was celebrated as a favourite haunt of Pan, and as the abode of the Centaurs and the Lapithae. Pausanias describes it as the most fertile mountain in Thessaly, and well supplied with fountains. (Paus. ix. 8. § 6; Eurip. *Herc. Fur.* 371; Theocr. *Idyll.* vii. 104; Virg. *Aen.* vii. 675; Steph. B. *s. v.* Ὁμόλη.) The exact site of the town is uncertain. Both Scylax and Strabo seem to place it on the right bank of the Peneius near the entrance of the vale of Tempe, and consequently at some distance from the sea (Scylax, p. 12; Strab. ix. p. 443); but in Apollonius Rhodius and in the Orphic poem Homole is described as situated near the sea-shore, and in Apollonius even another town, Eurymenae, is placed between Homole and Tempe. (Apoll. Rhod. i. 594; Orpheus, *Argon.* 460.) Eurymenae, however, stood upon the coast more to the south. [EURYMENAE.] Leake conjectures that the celebrated convent of St. Demetrius, situated upon the lower part of Mt. *Kissavo*, stands on the site of Homolium. (Leake, *Northern Greece*, vol. iii. p. 402, vol. iv. p. 415.)

HONO'RIAS (Ὡνωριάς), the name given by Theodosius II., in honour of his uncle Honorius, to the town of Claudiopolis in Bithynia, which at a still earlier time had been called Heracleia. (Malalas, *Chron.* ii. 14; Hierocl, p. 694.) [L. S.]

HOPLI'TES. [BOEOTIA, p. 413, a.]

HOR. [IDUMAEA.]

HORCA. [ORCA.]

HOREB. [SINAI.]

HORESTI, in North Britain, mentioned by Tacitus (*Agric.* 38). After the battle of the Grampians Agricola moved into their country—*Stirling*, or the north part of *Lanark*. [R. G. L.]

HORITES. [IDUMAEA.]

HORMA. [ALMOPIA.]

HORMANUS. [OMANITAE.]

HO'RREA, AD. a place in Gallia Narbonensis, which signifies a depôt for corn and perhaps other merchandise. Such names of places occur occasionally. Beaufort (*Karamania*, p. 27) describes one of these Horrea, or Roman granaries, near the ruins of Syra, which bears a perfect inscription beginning HORREA IMP., &c. The Antonine Itinerary places Ad Horrea on the road from the *Var* to Forum Julii (*Fréjus*), and between Antipolis (*Antibes*) and *Fréjus*. From Antipolis to Ad Horrea is 12 M.P.; and from Ad Horrea to Forum Julii it is 17 M.P. The Table gives the same distances. The geographers differ wonderfully about the site of Ad Horrea. Some place it at *Grasse*, NW. of *Antibes*, according to which the road must have made a great bend between Antipolis and Forum Julii. Others would have it to be *Napoul*, which is much too near *Fréjus* to agree with the distance. D'Anville places it at *Cannes*, in favour of which there are two things:—*Cannes* is on the coast, where grain might be landed, for in the days of the Romans the Provincia imported corn, as it does now, from Africa; and it is probably on the old road. But it is too near to Antipolis; which difficulty D'Anville removes by a common device of his,—he reads vii. for xii. Others fix Ad Horrea at a place called *Horibel* or *Auribeau*, at the mouth of the stream of *Viviers*. [G. L.]

HORREA COELIA. [HADRUMETUM.]

HO'RREUM, a town of Molossis in Epirus, of uncertain site. (Liv. xlv. 26.)

HORREUM MARGI (*Moravca Hissar*), a town in Moesia, on the river Margus, where, according to the Ant. Itinerary (219), the Legio XIV Gemina, and according to the Not. Imperii (30) the Legio VIII Gemina, was stationed. (Comp. *Itin. Ant.* 134; Geogr. Rav. iv. 7; *It. Hieros.* 565, where the name is *Oromagus*; Hierocl. p. 657, Ὀρθόμαρχος: and Ptol. iii. 9. § 5, Ὄρμια. [L. S.]

HORTA or HORTANUM (*Orte*), an ancient town of Etruria, situated on the right bank of the Tiber, nearly opposite to its confluence with the Nar (*Nera*). Its name is mentioned only by Pliny, who calls it Hortanum (probably an adjective form), and by P. Diaconus, who writes it Horta, and mentions it with Sutrium, Polimartium, Ameria, and other towns on the two sides of the Tiber. (Plin. iii. 5. s. 8; P. Diac. iv. 8.) There can, therefore, be no doubt that it is the place still called *Orte*, where, besides some relics of Roman times, numerous Etruscan sepulchres have been discovered, and objects of considerable interest brought to light. (Dennis, *Etruria*, vol. i. pp. 162—167.) It probably derived its name from the Etruscan goddess Horta, who is mentioned by Plutarch. (*Quaest. Rom.* 46; Müller, *Etrusker*. vol. ii. p. 62.) The celebrated Lacus Vadimonis, the scene of two of the most decisive defeats of the Etruscans by the Romans, was situated about 5 miles above Horta, close to the banks of the Tiber. [VADIMONIS LACUS.] The Via Amerina, which led from Falerii to Ameria [AMERIA], crossed the Tiber just below Horta, where the remains of a Roman bridge are still visible. (Dennis, *l. c.* p. 167.)

The "Hortinae classes" mentioned by Virgil (*Aen.* vii. 715) must probably be connected with this city, though he places them on the left bank of the Tiber, among the Sabines, and the adjective formed from Horta would naturally be Hortanus, and not Hortinus. [E. H. B.]

HORTONA. [ORTONA.]

HO'SSII, O'SSII (Ὄσσιοι, Ptol. iii. 5. § 22), a people of Sarmatia Europaea, who occupied the E. coasts of the Baltic—*Esthonia* and the island of *Oesel*, and belonged to the Finnish stock. (Schafarik. *Slav. Alt.* vol. i. pp. 298, 302.) [E. B. J.]

HOSTI'LIA, a small town of Cisalpine Gaul, situated on the N. bank of the Padus, about 10 miles below the confluence of the Mincius: it is still called *Ostiglia*. Pliny (xxi. 12. s. 43) calls it only a village (vicus); and we learn from Tacitus that it was dependent on Verona ("vicus Veronensium," *Hist.* iii. 9). But in the civil war between Vitellius and Vespasian it was occupied by Caecina, the lieutenant of the former, as a military post of importance, commanding the passage of the Padus, and secured on its flank by the extensive marshes of the Tartarus. (Id. *Hist.* ii. 100, iii. 9, 14, 21, 40.) It is again mentioned by Cassiodorus in the 6th century (*Var.* ii. 31), and was probably a considerable place in ancient as well as modern times, though it did not enjoy municipal privileges. The Itinerary correctly places it 30 M. P. from Verona on the road to Bononia (*Itin. Ant.* p. 282), while the Table gives 33 (*Tab. Peut.*). [E. H. B.]

HOSUERBAS, a Mutatio, or place, in the Jerusalem Itinerary, on the road from *Bordeaux* to *Narbonne*. It is the next place to *Narbonne*, and 15 Roman miles from it. The Table has it Usuerna or Usuerva, and 16 M.P. from *Narbonne*. It is supposed to be a place at the ford of the torrent *Jourre* or *Jourve*. [G. L.]

HUNGUNUERRO, one of the places called Mutationes in the Jerusalem Itinerary, on the road from *Bordeaux* to *Narbonne*. From Civitas Auscius (*Auch*) to Mutatio ad Sextum is 6 Gallic leagues; and from Mutatio ad Sextum to Hungunuerro is 7 Gallic leagues. The road is direct from *Auch* as far as *Toulouse*; and if anybody can get a good map of that part, he will be able to guess where the place is, for it is on the straight road between *Auch* and *Toulouse*. D'Anville guesses *Gircaro*; Walckenaer guesses "*Hundu de devant* et *Menjoulet*." [G. L.]

HUNNI or CHUNI (Οὖννοι, Χοῦνοι). Observe the absence of the *aspirate* in Οὖννοι.

So early a writer as Ptolemy has the following passage:—μεταξὺ Βασταρνῶν καὶ Ῥωξαλάνων Χοῦνοι (iii. 5. § 25). The full value of the notice will appear in the sequel.

AUTHORITIES.—The two best authorities are Ammianus Marcellinus and Priscus, each contemporary with the actions he describes, but Priscus the better of the two. Sidonius Apollonaris notices their invasion of Gaul; and that as a contemporary. The other authorities are all of later date, *i. e.* referable to the sixth century or later, *e. g.* Jornandes, Procopius, Agathias, Gregory of Tours. Cassiodorus, the best authority of Jornandes, wrote under the reign of Theodoric, 40 years after Attila's death. The whole history of Jornandes is written in a spirit eminently hostile to the Huns; the spirit of a *Goth* as opposed to his conqueror, the *Hun*.

HUNS OF AMMIANUS.—The earliest of the two really trustworthy writers who speak with authority concerning the Huns is Ammianus Marcellinus (xxxi. 1, et seq.). But his evidence is by no means of equal value throughout. He describes their appearance, partly after what he may have read in older authors respecting the *Scythians*, and partly after what he may have learned from those who had seen him. At any rate he draws

Digitized by Google

a distinction between them and the closely allied *Alani*. The Alani were tall and good-looking ("proceri, pulcri") with yellow hair—"Hunnisque per omnia suppares, verum victu mitiores et cultu" (§ 21). The Huns were "imberbes"—"spadonibus similes—pandi ut bipedes existimes bestias" (2). When Ammianus wrote, the geographical relations of the Huns to the populations around them seem to have been as follows. The Alans occupied the present government of Caucasus, and the frontier of Circassia. Due north and west of the Alans came the Huns themselves, concerning whom Ammianus tells us that "monumentis veteribus leviter nota, ultra paludes Maoticas Glacialem Oceanum accolens, omnem modum feritatis excedit." He tells us this; but we must remark the loose character of his geography in respect to the *Icy Ocean*, and also the likelihood of his views concerning their original migrations being mere inferences from the phenomena of their sudden appearance. The western part of the government of Caucasus, Taurida, and Cherson formed the area of the Huns of Ammianus at the time before us, viz. A. D. 375, in the joint reigns of Valens, Gratian, and Valentinian II.

It is just in the midst of these notices that the necessity for criticism upon the text of Ammianus is so necessary. Between his notice of the Huns and his notice of the Alans, in each of which he speaks in his own proper person, as a contemporary inquirer with sufficient means of information, he brings in the account from Herodotus of the Neuri, Geloni, Agathyrsi, Melanchlaeni, Anthropophagi, and Amazones. This archaic and semi-fabulous part must be separated from the rest.

However, next come the Grutungi, conterminous with the Alani of the Don. How near the Grutungi came to the Tanais is uncertain. They spread, at least, to the valley of the Dniester. Here was the "vallis Gruthungorum." The Thervings lay between the Dniester and the Danube; and besides the Thervings, the Thaifalæ on the R. Gerasus (the *Sereth*). The ethnological connection seems to have been between the Huns and Alans on the one side, and the Thervings and Grutungs on the other—the Thaifalae being uncertain. The political alliances *generally* coincided with the ethnological.

The Huns drove the Grutungs and Thervings (the Goths, as they are mostly called) across the Danube—from Dacia into Moesia and Thrace, from the modern *Moldavia* or *Bessarabia* into *Bulgaria* and *Rumelia*. This is the first great event in their usual history; for the conquests and migrations previous to their appearance on the Dneister are unauthenticated. The quarrels between the Goths of Moesia and the Romans begin, and the Huns and Alans—no longer enemies but allies—side with the former. So at least it appears from the loose and unsatisfactory notices which apply to the period between the history of the Huns of Ammianus and that of the

Huns of Priscus.—A clear light is thrown over the reign of Attila, the son of Mundzak. He began to reign A.D. 433, and, over and above the notices of his battles, we find in Priscus references to as many as five embassies, viz. in A.D. 433 (just after Ruas' death), 441, 448, 449, 450,—this last being abortive and incomplete. In the one A.D. 448 Priscus took a part. Gibbon has abridged the account of it. A.D. 448 was the time, and the royal camp or court of Attila, between the Theiss and the Danube, the place. In A.D. 453 Attila died.

What were his acts, and what his power? Both have been much exaggerated,—by Gibbon as much as by any one. He overran Italy, Greece, Illyria, the countries on the Lower Danube, and penetrated as far into Gaul as Châlons. He claimed either a subsidy or a tribute from the Romans of the Eastern Empire. He seems to have entertained the idea of an incursion into Persia,—at least, the practicability of making one was one of the topics which Priscus heard discussed during the embassy. He spread his negotiations as far as Africa; and so got the co-operation of Genseric.

In these we have the measure of his operations. They were undoubtedly great; though not greater than those of Alaric, and Genseric, and other conquerors of the time.

His method was that of a politician quite as much as that of a soldier. We hear of more embassies than campaigns during the reign of Attila.

The nations that fought under his banner were numerous; but some (if not several) fought as allies, not as subjects. These allies and subjects—collectively—fall into 2 divisions.

1st. The particular population to which *Hun* was given as a generic name, i. e. the *Huns* themselves in detail.

2nd. The populations other than Hun, i. e. Goth, Alan, &c.

The latter will be noticed first; the former will find a place hereafter.

Sidonius Apollinaris writes:—

Barbaries toties in te transfuderat Arctos
Gallia, pugnacem Rugum, comitante Gelono:
Gepida trux sequitur, Suevum Burgundio cogit:
Chunus, Bellonotus, Neurus, Basterna, Toringus,
Bructerus ulvosa vel quem Nicer abluit unda
Prorumpit Francus."—vii. 320.

This applies to the invasion of Gaul.

From Jornandes we get the additional names of Sarmatae, "Cemandri, Marcomanni, Sueri, Quadi, Heruli, Turcilingi."

These lists give Attila an inordinately large, or a moderate-sized kingdom, according to the interpretation we give to each name, and according to the character of the dominion over the populations which bore them, which we attribute to the invader of Gaul. He might have ruled them as an absolute master; he might have availed himself of their arms as simple confederates; he might have taken up some portion of some of them in passing through their country.

Another point may be collected in its full details from Gibbon,—viz. the relations between the Roman general Aëtius and Attila. Aëtius was by blood a Scythian, and it is possible that the language of his childhood was a dialect of the Hun. Until the last year of his life, he was the friend and guest of the Hun kings—Rugelas (Ruas), Bleda and Attila. In the affair of the usurper John, he intrigued with the Huns. He settled a colony of Alans in Gaul; and the Alans and Huns only differed in their politics, not in their language and ethnological affinities. The chief mercenaries of Aëtius were Huns. With these he effected some of his chief conquests, and to these he made over several considerable districts. Hence, when we hear of certain Hun conquests, we hear of the conquests of Aëtius as well; and when we read of such or such areas being occupied, and such or such enemies being reduced, by Aëtius and the Huns, we are in doubt

Digitized by Google

as to the true sovereignty. Was it Roman, or Hun? due to the arms of Aëtius, or due to the arms of Attila? If everything be Hun that was conquered by Aëtius and his Huns, the empire of Attila enlarges: if everything be Roman, it decreases.

Pannonia was Hun — probably in the very widest sense that can be given to the term.

Dacia was Hun; but not altogether. This we learn from Priscus. When he visited the royal village of Attila, one of the Hun magnates, by name Onegesius, was absent, and had to be waited for. This was because he was settling the affairs of the Acatziri, who had just come under the dominion of Attila.

Now, if the Acatziri be placed (see below) in the more mountainous parts of Transylvania, a certain portion of that province must be subtracted from even the Dacia of Huns. Be it observed, that neither of the authors just quoted mentions these Ἀκάτζιροι.

The Neuri. — If these were Hun *subjects*, rather than *confederates*, and if, as is probable [NEURI], they lay around the marshes at the head-waters of the *Dniester*, we must make the northern extension of the Hun area very irregular in outline, since it was narrow in the direction of the Acatziri, but broad in that of the Neuri. Perhaps the boundary of the Hun territory in the present parts of Southern Russia followed the line of the rivers. If so, it comprised Bessarabia, Cherson, Taurida, and something more.

The Alani who fought under their king Sangiban at Châlons were the Alani of the Aëtian settlements in Gaul, rather than those of the Circassian frontier.

Turning westwards, and changing the direction, we come to some important areas, which must not be too lightly and gratuitously given over to the Huns; viz. the lands of the Thuringians, Burgundians, Suevi, Alemanni, with parts of Rhaetia and Vindelicia. The districts are large, the occupants powerful, the reign of Attila short.

For this period we cannot expect to find absolute evidence of the independence of these several countries. We find them, however, generally speaking, independent and powerful, both before and afterwards. When Attila died his kingdom broke up; and one of the measures of the magnitude of Attila's dominion, is the magnitude of the kingdoms that grew out of it. Three of these were more important than the rest; *a.* that of Theodoric the Ostrogoth; *b.* that of the Gepidae; *c.* the Lombards. Suppose these to have been carved out of the Hun monarchy in all their integrity, and we suppose a vast Hun area. But this was not the case. Theodoric's kingdom was large, because Italy was added to it. At Attila's death it was limited to a portion of Pannonia, and that a moderate-sized portion. The Italian addition was subsequent. The Gepidae are the obscurest of all the populations of Daco-Pannonia; the exact ethnological relations being unknown, though the evidence of Procopius and Jornandes makes them Goths. It is more important to remember that their empire was by no accounts a large one. In the reign of Justinian it was destroyed by the Lombards. The Lombard power, although generally spoken of as if it grew out of the wreck of Huns, really arose out of that of the Gepidae, and was later in date than the immediate dissolution of Attila's dominion. It only became formidable in the reign of Justinian. Odoacer, like Theodoric, was remarkable for what he effected against Rome, rather than for the magnitude of his kingdom.

But whatever may have been the importance of these kingdoms, it is a matter of history that the area out of which they grew was limited to Pannonia, Western Dacia, Eastern Rhaetia, and Northern Moesia. Hence no inordinate magnitude need be given to the dominion of Attila in order to account for the kingdoms that grew out of its decay.

On the south of the Danube, a belt of country, five days' journey across, from the Save to Novi in Thrace, was ceded by the Romans to the Huns.

It is submitted that the sovereign sway of Attila was bounded by the eastern frontier of Bohemia on the west, and by the Maeotis (there or thereabouts) on the east. There was also the strip of land to the south of the Danube. The northern boundary was uncertain. It probably reached to Minsk in one part, and no further than the northern part of Transylvania on the other. This is by no means a small area. It is less, however, than the one usually suggested by the name of Attila.

TRADITIONARY VIEW OF ATTILA'S POWER AND CHARACTER. — In thus curtailing the historical dimensions of Attila, the writer has not forgotten his subsequent reputation, and the space he has filled in the minds of his after-comers. He has not forgotten the terrible term, *Scourge of God*. He has recognised the place that *Etzel* takes in the fictions of Germany, and *Atla* in those of Scandinavia — sharing the Nibelungen-lied and the Edda with Sigfrid and Theodoric; not less in mythic reputation than Arthur or Charlemagne. And not in prose and verse only. The *tumuli* of Northern Germany are called the *Hünengräbe* (=*Graves of the Huns*); and the *Hunderuck* Mountain has, erroneously, been looked upon as the *Hill of the Huns*. More than this — it is admitted that the subsequent reputation is, to some degree, *primâ facie* evidence of a real historical basis. Why should the Attila of men's imagination be so much greater than the corresponding Alarics and Genserics, if there was not some difference in their original magnitudes? Such a remark is legitimate as criticism. *Valeat quantum*. There *are* reasons why Attila and the Huns should become exaggerated — reasons which influenced our early, reasons which have influenced our modern, authorities.

The halo of fiction around Attila is not of Italian origin, nor yet of Greek. It is *German*, and Germano-Gallic; German, essentially and originally. It has already been stated, that the chief source is Jornandes; in many respects the Geoffroy of Monmouth to Germany and Scandinavia.

Tradition (it is believed), tradition and error have engendered exaggerated notions of Attila's power, and distorted ideas of his personal character and actions. Whence come the overstatements? The size of a king's dominions may be magnified without the king being made a monster; and, *vice versâ*, a hideous picture may be drawn of a king without magnifying the size of his dominions. Whence come the overstatements? The historian is a Goth. The more nations the Huns conquered, the less the shame to the Goths. Here lay a bounty upon exaggeration — exaggeration which was easy for two reasons: 1. The joint conquests of Aëtius might be credited to the Huns exclusively; 2. Any kingdom of which the king was worsted might be dealt with as absolutely conquered, and reduced in its full integrity Let us apply this to one man's dominion only — Hermanric's, *according to Jornandes*. The Huns conquer Hermanric. What had Hermanric conquered? First comes a list of names difficult to make out —

Digitized by Google

"habebat" (Hermanric) "siquidem quos domuerat Golthes, Etta, Thividos, Inaxungis, Vasinas, Brovoneas, Merens, Mordens, Remniscans, Rogans, Tadgans, Athaul, Navego, Bubegenas, Coldas" (c. 23). The little that can be made out of this may be seen in Zeuss (v. *Ostfinnen*). *Mordens* is the most satisfactory identification, and then *Merens* = the Mordwa (Mordiuns) of Nestor, and the Mirri of Adam of Bremen (Merja of Nestor). The Mordian country is in the governments of Simbirsk and Saratov.

The sequel in Jornandes tells us something more, viz. that the Heruli, Veneti, Antes, Sclavi, and Haesti were reduced; a list that gives Hermanric all the country between the Vistula and the *Sea of Azov;* since the Haesti are the Aestyii of Tacitus, or the occupants of amber country, East Prussian.

Now, allow all this to Hermanric, and then transfer it to the Huns, and any amount of area will be the result. But was it so transferred? The Huns that conquered the Goths of Hermanric are said to have moved from the Maeotis to the Danube as quickly as they could. Who believes that they consolidated such dependencies as Courland, Livonia, East Prussia, Poland, &c. *en route?* But our reasonable doubts go further still. The magnitude of Hermanric's empire is problematical. Ammianus (his contemporary), besides giving an account of his death different from that of Jornandes, merely writes that when the Alans and Huns had coalesced, "confidentius Ermenrici, late patentes et uberes pagos *repentino impetu* perruperunt, bellicosissimi regis, et per multa variaque fortiter facta vicinus nationibus formidati" (xxxi. 3. § 1). It is submitted that the words *late patentes* by no means denote *vast dominions*. Take the geography of the countries into consideration, and they mean the wide open plains of the Ukraine. Gibbon clearly saw this discrepancy; but, nevertheless, he preferred Jornandes, whose "concise account of the reign and conquest of Hermanric seems to be one of the valuable fragments which Jornandes borrowed from the Gothic histories of Cassiodorus and Ablavius." (Chap. xxv. 5. note j.) The text of Jornandes indicates the contrary of this. Ablavius is quoted specially and by name for one particular fact, viz. the origin of the Heruli; the inference from which is, that the other parts are not from him. We have seen how they differ from Ammianus.

The indefinitude of the term Scythia gave other exaggeration: and the king of the Huns was often called the king of Scythia. So he was — but only of *European* Scythia.

For further elements of confusion, see SCYTHIA. One, in addition, however, still stands over. When the *Danes* of *Denmark* took their place in history, they had not long been known under that name, before they were attributed to Attila; and Scandinavia became a part of Hundom. Why? Because the *Daci* were more or less Hun; and because, as early as the time of Procopius, we find them called *Dani*, the *Dani* (in after-times) being called *Daci*. The Heruli were undoubtedly Hun, in politics if not in blood. Now, both Jornandes and Procopius bring the Heruli and Dani (not Daci) in contact. There was a confusion here. How it arose is a complex question. Its effect was to carry Attila's power beyond all reasonable limits northwards.

Jornandes and Procopius give us the chief elements of those errors in ethnology and geography, which carry the Hun power unduly *north*wards. How they got carried unduly *east*wards may be seen in Gibbon (chap. 26). Gibbon (chap. 20) has thus been tempted to connect an invasion of France with movements in the north of China, the battle of Chalons with the history of the Sienpi; De Guignes having suggested and worked out the connection. Thus—

Many centuries before our era there were Huns on the north-western frontier of China — conquerors. About B. C. 100 one of the more warlike Chinese emperors subdued them. They fled westwards. A tribe of Sibeia or Central Asia, named Sienpi, harassed them. They divided into 3 portions. One amalgamated with the Sienpi; one settled in Charismia, and became the White Huns (see below) of the Persian frontier; the third, pressed forward by the Sienpi, pressed forward the Goths. "While Italy rejoiced in her deliverance from the Goths, a furious tempest was excited amongst the nations of Germany, who yielded to the irresistible impulse that appears to have been gradually communicated from the eastern extremity of Asia. The Chinese annals, as they have been interpreted by the learned industry of the present age, may be usefully applied to reveal the secret and remote causes of the fall of the Roman empire" (chap. 30). The details are, that the Sienpi grew in strength, called themselves *Topa* (masters of the earth), conquered China, and threw off an offset called Geougen, who were robbers; and the descendants of Moko, a slave of Toulun, one of Moko's descendants, achieved the independence of these Geougen, and effected conquests from the Corea to the Irtish, and beyond. To the north of the Caspian he conquered the Huns. These, of course, moved westwards, but the Huns, who conquered the Alans, and the Thervings, and who are mentioned by Ammianus, had already occupied the parts between the Don and Danube, — "the countries towards the Euxine were already" (A. D. 405 is the date for *this* migration) "occupied by these kindred tribes; and their hasty flight, which they soon converted into a bold attack, would more naturally be directed towards the rich and level plains through which the Vistula gently flows into the Baltic Sea. The north must appear have been alarmed and agitated by the invasion of the Huns, — the inhabitants might embrace the resolution of discharging their superfluous numbers on the provinces of the Roman empire. About 4 years after the victorious Toulen had assumed the title of Khan of the Geougen, the haughty Rhodogast, or Radagaisus, marched from the northern extremity of Germany almost to the gates of Rome," &c. In a note it is remarked that "Procopius (*de Bell. Vand.* i. 3) has observed an emigration from the Palus Maeotis to the north of Germany, which he ascribes to famine. But his views of ancient history are strangely darkened by ignorance and error." The criticism of this extension of the Hun power in the direction of China, will be found in the notice of the *Cidante* Huns, towards the end of this article.

It is on the authority of Jornandes that the murder of his brother is attributed to Attila: Gibbon follows it; the Comte de Buat demurs to it. Probably it must stand as we find it, subject only to being invalidated by the slightest amount of opposing evidence, in case the care and criticism of future inquirers elicit any.

As a conqueror, Attila seems to have been strongest as the head of a confederation than as a sovereign. He acted, too, more as a politician than a warrior.

Digitized by Google

Bloody as is his memory, history gives us but three campaigns,—one in Thrace, Illyricum, and Greece; one in Gaul; one (during which he died) in Italy. With Aëtius he intrigued long and steadily; so he did with Genseric (in Africa); so he did with Theodoric, king of the Franks. Add to this, the five embassies from Constantinople, and the one (probably more) from Rome, and we know the so-called *Scourge of God* better in the council than in the field. The steady object of his enmity was the Gothic name. Rome was only an ordinary and occasional foe. His alliances and intrigues coincide remarkably with the diffusion of the Alani, who, either as allies or mercenaries, had penetrated the western parts of Europe before him. Spain was conquered by Alani (the proposed correction, *Alemanni*, is gratuitous), Suevi, and Vandali; and when Genseric led his Vandals into Africa, some of the Alani accompanied him. Now Genseric and Attila were mutual coadjutors. There were Alani in France, and the Frank king intrigued with Attila. The Scythian (*Alan* or *Hun*) extraction of Aëtius has been mentioned.

Populations akin to the Huns under other Names.—When Attila died, his kingdom broke up; but as we are not so much writing the history of a *name*, but that of a *people*, we may ask whether the Hun history be not continued under other denominations? The answer is in the affirmative. The erudition and comprehensiveness of the closest investigator of the widest field in all history—the unrivalled historian of the decline and fall of the Roman empire—makes any exception that may be taken to his great work distasteful. Nevertheless, it may truly be said that few pages of Gibbon are more objectionable than those which deal with the ethnology of the Bulgarians. (See chap. lv.) After remarking that "Theodoric, the Ostrogoth, had trampled on the arms of the Bulgarians;" that "after this defeat the name was lost during a century and a half,"—he suggests that "the same or a similar appellation was revived by strange colonies from the Borysthenes, the Tanais, or the Volga." He farther adds, that "the unquestionable evidence of language attests the descent of the Bulgarians from the original stock of the Slavonian race." He also speaks of "the Servians, Bosnians, Rascians, Croatians, *Wallachians*, &c.," being "kindred bands." The italics are the present writer's, who remarks that, in the case before us the evidence of language, always exceptionable (though strong *primâ facie*) evidence, is eminently exceptionable here, and also that it is inconsistently applied. The language of the Wallachians is not Slavonic, but Romanyo, i. e. Roman, even as French and Spanish are Roman. In respect to the Bulgarians, the present language is Slavonic,—but Slavonic of a very exceptional character.

But to return to Gibbon. His note states that "Chalcondyles, a competent judge, affirms the identity of the language of the Dalmatians, Bosnians, Servians, *Bulgarians*" (the italics are Gibbon's), "Poles, and—Bohemians." Now, granting Chalcondyles to be a competent judge, he is so only for his own times, the 13th century. Between, however, his time and that of the Bulgarian predominance, the Slavonian king Sviatoslav (A.D. 955—973) conquered Bulgaria. This accounts for the change of language. It should be added, that neither the Tanais nor the Volga, in the 7th century, could supply a Slavonic population; and that the evidence in favour of the more distant river of the two having been the home of the Bulgarians is unexceptionable,—unexceptionable, and scarcely excepted to by Gibbon himself. "Theophanes places the old Bulgaria on the banks of the Atel, or Volga; but he deprives himself of all geographical credit by discharging that river into the Euxine" (note).

On the other hand, one of the most valuable articles in Zeuss (*Deutsche und seine Nachbarstämme*) is the one on *Bulgari*: wherein he proves, as clearly as matters of the kind can be proved, that the Bulgarians were Huns under another name (or *vice versâ*); or, at least, that the Bulgarians were part of the Hun confederation. Ennodius is the first author who mentions them, and he does so in his Panegyric on Theodoric, their conqueror—their conqueror already alluded to. Ennodius writes: "Stat ante oculos meos *Bulgarum* ductor—dextera tua—prostratus.—Haec est natio cujus ante te fuit omne quod voluit.—His ante mundus pervius esse credebatur." Zeuss rightly remarks that, though this is the first mention of the *Bulgarians*, it is not the first mention of a nation very like them, if not the same. They eat horse-flesh, like the Huns and other Scythians,—"Credunt esse satis ad delicias equini pecoris lac potare. Quis ferat adversarium, qui pernicis jumenti beneficio currit et pascitur?"

Again—Procopius mentions no Bulgarians; only Huns: but certain deeds that Jornandes and others attribute to the former he gives to the latter.

A third passage, that, admitting some distinction to have existed between the Huns and Bulgarians suggests the likelihood of its having been but slight, is from Fredegarius (c. 72): "Eo anno, in Avarorum, cognomenti Chunorum, regno in Pannonia surrexit vehemens intentio, eo quod de regno certarent, cui deberetur ad succedendum, unus ex *Avaris* et alius ex *Bulgaris*."

Fourthly. We must remember that both *Hun* and *Bulgarian* are collective names. Having done this, we have two divisions. The exact names are difficult to ascertain; but names sufficiently like to pass for denominations of the same tribe are found in one author amongst the Huns, in another amongst the Bulgarians—*ἐν τούτῳ τῷ χρόνῳ τὸ τῶν Βουλγάρων ἔθνος ἀπῆλθεν τῇ Θράκῃ· ἀναγκαῖον δὲ εἰπεῖν καὶ περὶ τῆς ἀρχαιότητος τῶν Οὐογουνδούρων Βουλγάρων καὶ Κουτρήγων.* (Theophan. ed. Par. p. 296.) The place, however, the Huns is more usual; and here the names are *Οὐογοῦροι* (*Hunigari*) and *Κουτζιγοῦροι* (*Kutziagiri*.)

Such is the evidence of Zeuss as opposed to that of the passage of Gibbon that preceded it. But Gibbon himself, in another part of his great work (ch. xlii.), identifies the Bulgarians with the Huns. "I adopt the appellation of Bulgarians from Ennodius, Jornandes, Theophanes, and the Chronicles of Cassiodorus and Marcellinus. The name of Huns is too vague: the tribes of the Cutturgurians and Utturgurians are too minute and harsh." Again: "the same year...was marked by an invasion of the Huns or Bulgarians." The Cutigurians are the *Κουτζίγουροι*, or Cutziagiri, of the last extract. Their name will reoccur.

The next population akin to the Huns (the proofs of this will be seen in the sequel and in Avarks) is that of the Avars. The reign of Justinian gives the first, that of Charlemagne the last, of this name. For further details, see Avarks.

The fourth great name is that of the Khazars; who are unequivocally mentioned under that designation as early as A.D. 626, though not by a contemporary historian. The evidence, however, of

Digitized by Google

their power is sufficient. The emperor Leo IV., son of Constantine Copronymus, was the son of the Irene, daughter of the Khan of the Khazars. He reigned from A. D. 775 to A. D. 780. Their *time* ranges from the seventh century to the tenth; the power being at its *maximum* about A. D. 850. In *space* they spread from the Caspian to the Dnieper: from the Caspian, inasmuch as the Arab name of that lake was the *Sea of the Khazars;* to Dnieper, because they are mentioned under the name *Chwalisy* by the earliest Russian historian—Nestor.

Much in the same way as the name Hun is succeeded by that of Bulgarian, the name Khazar is succeeded by that of *Patzinaks, Petshinegues* (*Pizenace, Pecenatici, Pincenates, Pecinei, Petinei, Postinagi,* Πατζινακῖται, *Peczengezi* (Russian name), *Besseni, Bessi* (Hungarian names). The *Kanghar* are a section of the *Petshinegues*. Time from A. D. 900 (there or thereabouts) to A. D. 1050. Place—the parts between the Lower Danube and the Lower Don = Bessarabia, Cherson, and part of Taurida Like the Khazars, they attack Russia; pressing northwards and westwards.

The *Uzi* (*Guss*, Arabic name) replace—or appear to replace—the Petshenegi; time, the 11th century.

Lastly, come the Cumani, scarcely distinguishable from the Uzi. Of all the tribes akin to the Huns, the Cumani seem to have pressed furthest westwards. Probably, they occupied Volhynia—certainly a part of Hungary. The last individual who spoke a language allied to that of the Huns—a language of Asiatic origin—the last of the Cumanians—Varro, an old man of Karizag—died A. D. 1770. With him closes the history of the populations allied to Hun, who at one and the same time dwelt north of the Balkan, and retained their language. The *blood* of the population is still abundant—in some cases predominant; in Bulgaria, Hungary, the Danubian Principalities, Volhynia, Podolia, Cherson, Taurida, and the Crimea.

It may be said that the evidence of the *Hun succession* is deficient; that the *Catena Attiliariorum* (so to say) is broken. Upon this, the writer remarks that the absolute identity of the preceding populations with the Hun is not predicated. They are only said to belong to the same family with the Huns to Attila, and to illustrate the same *general* historical phenomenon; viz. *the intrusion into Eastern Europe of certain frontier populations from Western Asia*, a phenomenon which is seen in its truer light when seen as a whole, than when seen in fragments.

But what are the proofs that these nations are all in *reality*, though not all in *name*, Hun? And in what sense are they so? They are *not* so politically at any rate. They are so ethnologically, and they are so geographically. They are so *geographically;* inasmuch as they can all be deduced from some portion of the area which lay between the most western occupancies of the Pannonian Huns, and the most northern occupancies of the Avar Huns.

THE HUNS ETHNOLOGICALLY MEMBERS OF THE TURK FAMILY.—They are so ethnologically, as can be shown by the following train of reasoning:—

a. That the Cumani and Petshinegi spoke the same language is expressly stated by Anna Comnena, a contemporary testimony.

b. There is the evidence of the early Arab geographers, that the Khazars and Bulgarians spoke the same language.

c. There are the reasons already given for connecting

α. The Bulgarians and Huns;

β. The Avars and Huns.

d. There is a specimen of the Cumanian, and there are glosses from the Khazar, Avar, Bulgarian, all referable to one and the same language.

e. That language is the Turk of Independent Tartary.

It is submitted that this evidence is sufficient: sufficient when we consider that no material facts traverse it, and that the *à priori* probabilities are in its favour. What country so likely to have discharged a population upon South-eastern Russia, the Danubian Principalities, Bulgaria, and Hungary, as Independent Tartary and Caucasus (i. e. the *government* so called)? At the same time, the fact of the evidence of the *Huns* of Attila being of a more indirect kind than we might *à priori* expect, is by no means kept back. We only find what they are by what the Avars were.

EARLY EUROPEAN HISTORY OF THE POPULATIONS AKIN TO THE HUNS.—1. *Details of the name.*—Hitherto, the history of the populations akin to the Hun has been the history of certain populations connected with the decline of the Roman empire: indeed, it has been treated as if it began during the reign of Valens, with the attack upon the Goths and the subsequent passage of the Danube. This has been the first fact recognised—the first fact supported by competent testimony. At the same time, a great deal of the *Asiatic* history has been objected to; a small part only admitted. Now, this leaves the early history of the Hun name untouched. If they did not come from the wall of China, whence came they? The name *Hun* is new; but we have seen that there is a long and late history of the Hun population under other names. May there not also be a long *early* one as well? May not the line run backwards as well as forwards? This question is best treated after a preliminary notice of what may be called the details of the Hun name. If the name *Hun* (and indeed the names *Bulgarian, Khazari*) are *general and collective*, what are the *specific* designations? That such details exist has already been suggested by the remark of Gibbon, that the names *Kutigari, &c.* were too specific and limited. We have, then, the following names:—

1. *Amilzuri* of Priscus; *Alpilzuri* of Jornandes. 2. *Itimari*, Priscus and Jornandes. 3. *Alcidzuri*, Jornandes. 4. *Tonosures* of Priscus; *Tunsura* of Jornandes. 5. *Boisci*, Priscus and Jornandes. 6. *Sorosgi*, Priscus. 7. *Kuturguri* (*Kotriguri* in Agathias), Procopius. *Cutziagiri*, Jornandes. 8. *Uturguri* of Agathias. 9. *Ultizuri* of Agathias. *Ultzinzures* of Jornandes. 10. *Angisciri*, Jornandes. 11. *Bitugures*, Jornandes. 12 *Saragi*, Jornandes; probably same as Satagarii. 13. *Sabiri*, Procopius. 14. *Urugi*. 15. *Onoguri*, belonging to the country called Onoguria, Geogr. Ravenn. 16. *Zali*, Menander. 17. *Saraguri*. The list can probably be increased. It is considered, however, sufficient to show that the statement that the term *Hun* was a generic and collective name, was based upon a sufficient list of species. The evidence as to the Hun affinities of the preceding tribes is not uniform. It is stronger in some cases than in others. In all, however, it seems sufficient. For further information see Zeuss, *vv. Hunni, Alani, Bulgari, Avares.*

THE ACATZIRI.—One name of greater importance

Digitized by Google

than the rest has been reserved, *Acatziri*. What Priscus found, on his visit to Attila's court or camp, respecting these *Acatziri*, has been already noticed. We must remember where they lay, viz. in the mountain districts of the parts about Hungary, (say) in Transylvania. Contrast this locality with that of the Avars, who, in their original locality, seem to have been the most northern of Huns; and who (we must remember) are distinctly designated by that name. So are the *Acatziri*. Now, between these limits lay the Scythia of Herodotus. That the Scythians of Herodotus belonged to the great Turk family is, in the present article, a postulate; but evidence will be given of this fact in the articles SCYTHAE, SCYTHIA. And the Huns, with their allied populations, were Turk also. Neither, however, were indigenous to Europe: but, on the contrary, each intrusive, each originally Asiatic; each, under an *à priori* view of their probable origin, from the north-western parts of Independent Tartary. Now, whatever may be the actual facts of the Hun history, there is no need of any migrations later than that of the Scythae (Skoloti) to bring them into Europe, *and there is no evidence of such*. And, whatever may have been the actual facts in the history of the Scythae, there is *no evidence of their having either been ejected from their European occupancies, or extinguished as populations*. The only definite fact is a change of the names by which the populations of a certain portion of Europe are known. It is suggested, then, that the history of the populations akin to the Hun, from the 5th century forwards, is, in the *main*, a continuance of the history of the Scythae of the 4th century B. C. But is there any evidence of such continuity? It is submitted that there is *some*. The Καταῖροι of Herodotus are, probably, the *Cutiguri* of later writers. The Huns of Attila are not only called Scythae, but more specifically *Royal Scythae*. (Priscus, *de Legat.* 8. 1.) Lastly, comes the notice of the Χοῦνοι (*vid. sup.*) by Ptolem.

But what if the *Acatziri=Agathyrsi*? Mr. Newman, in a paper on the *Scythia of Herodotus*, places them in Transylvania. So much for the coincidence of place and place. What as to name and name? There is a certain amount of difference we must expect *à priori*. The two words have come to us through different routes, and at different times. *Agathyrsi* is Greek—early, classical Greek; as (as Greek) Roman also. It was taken by our early Greek authorities at second-hand; perhaps even less directly than that. This means, that it was not taken from the *Agathyrsi* themselves, but that it passed through an intermediate language, becoming thereby liable to change.

But the Greeks of the time of Priscus got it either first-hand, or through the Goths, and *their* forms are, Ακάτιροι and Ἀκατζίροι, *Acatsiri* (in certain MSS., *Acatziri*). It would be strange if the words were liker than they are. There has been a difference of medium, and a difference of form is the natural result. The present writer makes no secret of laying great stress on these words, *Acatziri* and *Agathyrsi*, even at the risk of being accused of indulging in etymologies. He will, ere long, strengthen it by another; submitting that the two combined are more than twice as strong as one standing alone: they confirm each other. At present he sums up with the inference, that if the Acatziri were Huns, and the Agathyrsi Scythae, and each occupied the same locality at times so distant as the ages of Herodotus and Priscus, *some* member of the Hun name, at least, was *in situ* in Transylvania six centuries before Attila's time,—*some* Scythians coincided with *some* Huns.

It is now suggested that the history of these parts be read backwards. For the parts between the Aluta and the Dniester, it was the Romans of Trajan who displaced the descendants of the Scythae of Herodotus, fragments of whom remained in Transylvania as *Acatziri* in the time of Attila. And why not the Huns of Attila be what the Acatziri were? *No evidence brings them from any point east of the Aluta*. All that evidence does is to say that certain Huns fought against certain Alans on the Maeotis; that certain Huns ejected certain Thervings from Bessarabia; that certain Huns occupied the country between the Aluta and Theiss. All beyond is *inference*; and the inference of the present writer is, that the Huns of Attila were no new comers in Hungary. Where was Attila's court or camp? Not in Roman Dacia, nor yet in Roman Pannonia: but just in that part between the two that was never Romanised; a likely spot for the remains of such independence as the Scythian portion of Dacia might preserve, but not a likely spot for a new invader from the Don or Volga. Part, then, of Dacia was Scythian or Turk? Certainly. No man can say how much. And the subjects of Decebalus may have been Scythian or Turk, descendants of the Agathyrsi, ancestors of the Acatziri, close kinsmen of the Huns of Attila. Such is the inference. If soldiers, why not captains? why not Decebalus himself? There are those who may think that the notion of Decebalus being a Turk supplies a *reductio ad absurdum*. Yet it is only our preconceived notions that are shocked. No facts are against it. Why should not the Agathyrsi of Dacia have supplied a leader as well as any other? Decebalus is a word strange to Gothic, strange to Slavonic, *not strange to Turk history*. When the proper and specific Turks first appear in the field of history, as they do in the reign of Justinian, the name of the first Turk khan is that of the last Dacian king—Disbul, in Gibbon; Δισζαβούλος, in Menander (p. 301).

The true historical character of Attila will, perhaps, never be recognised; but, if we must have extremes, the doctrine that he was the reconstructor of an impaired nationality, and the analogue of Pelagius in Spain rather than of Tamerlane in Asia, is as little removed from the probable truth as the notion that he was the Scourge of God and the symbol of barbarism. The ejection of the Goths seems to have a simple detail in the history of Dacia,—possibly the first great event in the reconstruction of a Scythic (or Scytho-Sarmatian) kingdom as opposed to a Romano-Germanic one. At any rate, it is much more certain that the Goths were the intruders than it is that the Huns were.

WHITE HUNS (Οὖννοι λευκοί), CIDARITAE, NEPTHALITAE, EPHTHALITAE.—Cidriate is the name in Priscus; *white*, the epithet of Procopius. Their locality was the south-western part of Turkestan: their affinities, probably Turk; the present Turcomans being their likeliest descendants. They appear in history as being engaged in a war against Piroses, king of Persia, in the sixth century. (Procop. *B. P.* i. 3.) They are distinctly stated by Procopius to have agreed with the Huns chiefly in name; to have been designated by the epithet *white*, because their complexion was fair; to have been comparatively civilised, settled, and agricultural.

CHIONITAE.—Neumann considered that a popu-

Digitized by Google

lation named by Ammianus Marcellinus *Chionitae*, are Huns — name for name. Their king Grumbates, along with the king of the Caucasian Albania, was an ally of Sapor in the war against Julian (xviii. 6. § 22). Populations akin to the Huns in Northern Armenia, or along the Georgian frontier, are by no means improbable.

Relations of the Hunni to the Hun-jo of Chinese history. — The criticism upon the connection (real or supposed) of the Huns with a population that came in contact with the Chinese, has been deferred until the present occasion. It comes best after a notice of the White Huns. Gibbon's account is that of De Guignes. Neumann has adopted, and in some degree sanctioned, the views of the French and English historians. As Neumann is well versed in Chinese literature, his opinion is important. The criticism of the present writer is based upon no pretence of anything of the sort. He only takes the evidence as he finds it. Let us see what is stated, and then compare it with what is proved. A writer (Sse-ma-ts'ien) whose date is fixed about B. C. 100, but whose writings have not come down to us, and who is only known from being quoted by Ma-tu-an-lin (a writer of the eighth century A. D.), is said to have stated that, between B. C. 2357 and B. C. 2205, there lived on the Upper Hoangho a tribe called by the Chinese Shan-jang (*armed mountaineers*). Between B. C. 2205 and B. C. 1766, the name for the population of these localities is Hun-jo. That the Shan-jang are the Hun-jo under a Chinese, and the Hun-jo the Shan-jang under a native name, is stated by Neumann; but it *is an inference of his own*, unsupported (so far as his text goes) by anything Chinese. Hence, admitting the Hun-jo to be Huns, the evidence of their being Shan-jang is incomplete. This subtracts something from their antiquity. The history proceeds with the statement that — about B. C. 300 there was a great Tanjou (sovereign) of the Hun-jo named Teúman, and that he came 1000 years after an individual named Shun-wei; nothing being known for the interval. This subtracts again from the historical antiquity of the Hun-jo. About B. C. 207 Maotun conquers great part of China, and about A. D. 90 his descendants are themselves conquered and ejected. This we get from the Chinese. We also get the statement that these broken and ejected Hun-jo moved westwards. They are now getting towards a time and place where European history takes cognisance of them. The Hun-jo are pressed by the Chinese, press upon the Alans, and come out as the Huns of the time of Valens.

It may narrow the question if we criticise this last fact in the history of the Hun-jo only; leaving out the earlier ones, as being but remotely connected with that of the Huns. Can the fugitive from China, A. D. 90, be connected with the invaders of South Russia in the time of Valens? The best attention which the writer of this article has been able to give to the modern writers on this subject, has left him with the conviction that the connection is one of their own making. No western writer carries the Huns east of the Volga; no Chinese one, west of the latitude of Lake Baikal. Neumann's references lead us to believe that the Alans are mentioned by the Chinese historians. The context shows that they are not. The link, then, is hypothetical and unsatisfactory.

It may have struck some that the whole of the Chinese evidence for these early times is unsatisfactory, — unsatisfactory even as a general view. But there are suspicious details as well. Tedrun, the first Tanjon of the Huns, reappears some centuries later as the first Khan of the Turks. Neumann himself argues that the word Gan-tsai (or Antsai) in the Chinese books means Asia, world for word; and that it was a name taken from the western world. If this, why not more? Why not the name Hun-jo? The facts that are found in the writers who have dealt with the Hun-jo history, as taken from the Chinese, are suspiciously like the facts of the Byzantine historians. The name *Jabgu* is given as being a Chinese form for Διζάβουλος, a king certainly connected with Byzantine, not so certainly with Chinese, history. It is by no means certain that the whole history of the Hun-jo is older than the influence of those Syrian Christians in China and Mongolia, who gave the Mongolians their alphabet, and with it (perhaps) a sufficient inkling of the history of Western Asia to be adapted to the antiquities of their own country.

But, granting this view to be untenable, and that the Chinese history is authentic, we must remember that the Huns of Attila were one thing, the White Huns of Turkestan another; and it may be added that, if some Huns or other must be brought in contact with China, the case is the stronger for those of Turkestan. At the present moment, the Turk populations of Yarkend and Khoten belong to what is called *Chinese Tartary*; whereas, between the Northern Turks (Tartary) and China, the vast tract of Mongolia intervenes.

Such is a sketch of the reasons for disconnecting the Huns of Attila and the Hun-jo of Chinese authors. (Gibbon, *Decline and Fall*, &c.; Creasy, *Decisive Battles of the World* (Chalons); De Guignes, *Histoire des Huns;* Neumann, *Die Völker des Südlichen Russlands.*) [R. G. L.]

HUNNUM, in Britain, the fifth station along the line of the Vallum, beginning at Segedunum (*Wallsend*), where the Notitia places the Ala Sabiniana — a body of troops probably named after Hadrian's empress, Sabina. It coincides with the present locality of *Halton*, where Roman remains are abundant, and where, in A.D. 1600, Camden found a monumental slab erected to the memory of a soldier of the Ala Sabiniana. For a notice of the excavation made at Hunnum and its results, as well as for that of Roman road, and a bridge made out an older Roman one, see Bruce's *Roman Wall*, pp. 126—141. [R. G. L.]

HYAEA. [Hyle, No. 2.]

HYAMPEIA. [Delphi, p. 764, a.]

HYA'MPOLIS (Ὑάμπολις: *Eth.* Ὑαμπολίτης), an ancient town of Phocis, mentioned by Homer (*Il.* ii. 521), and said to have been founded by the Hyantes after they had been expelled from Boeotia by the Cadmeians. (Paus. ix. 35. § 5; Strab. ix. p. 424.) It was situated on the road leading from Orchomenus to Opus (Paus. *l. c.*), and, as it stood at the entrance of a valley which formed a convenient passage from Locris into Phocis and Boeotia, its name frequently occurs in history. It was at the entrance of this pass that the Phocians gained a victory over the Thessalians. (Herod. viii. 28.) Hyampolis was afterwards destroyed, along with the other Phocian towns, by the army of Xerxes. (Herod. viii. 33.) In B. C. 371 Jason, in his march through Phocis, when he was returning from Boeotia after the battle of Leuctra, is said to have taken Ὑαμπο-

Digitized by Google

Ἀντῶν τὸ προάστειον (Xen. *Hell.* vi. 4. § 27), which is supposed by some to be the same place as Cleonae, a village belonging to Hyampolis. (Plut. *de Virt. Mul.* p. 244; Valcken. *ad Herod.* viii. 28.) In B. C. 347 a battle was fought near Hyampolis between the Boeotians and Phocians. (Diod. xvi. 56.) The city is said to have been destroyed by Philip; but, as Pausanias states that the ancient agora, senate-house, and theatre were still remaining in his time, it must have been chiefly the fortifications which were destroyed by Philip. At all events it continued to be an inhabited city, and is mentioned in the Roman wars in Greece. (Liv. xxxii. 18.) It was embellished by Hadrian with a Stoa. Pausanias mentions also a temple of Artemis, who was the deity chiefly worshipped in the city. (Paus. x. 35. §§ 6, 7.) Pliny (iv. 7. s. 12) and Ptolemy (iii. 15. § 20) erroneously describe Hyampolis as a city of Boeotia.

The ruins of Hyampolis may be seen upon a height about five minutes northward of the village of *Vogdhâni*. "The entire circuit of the fortifications is traceable, but they are most complete on the western side. The masonry is of the third order, nearly approaching to the most regular kind. The circumference is about three-quarters of a mile. The direct distance to this ruin from the summit of Abae is not more than a mile and a half in a north-west direction. Below *Vogdhâni*, on the side of a steep bank which falls to the valley of *Khûbavo*, a fountain issuing from the rock is discharged through two spouts into a stone reservoir of ancient construction, which stands probably in its original place." (Leake, *Northern Greece*, vol. ii. pp. 167, seq.)

Strabo relates (*l. c.*) that there was another town, named Hyampolis, in Phocis, situated on Parnassus.

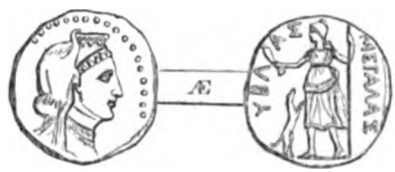
HYANTES (Ὕαντες), are mentioned among the aboriginal inhabitants of Boeotia, who were driven out of this country by the Cadmeians, whereupon they founded the town of Hyampolis in Phocis. (Paus. ix. 5. § 1, ix. 35. § 5; Strab. vii. p. 321, ix. pp. 401, 424, x. p. 464.)

HYBLA (Ὕβλα: *Eth.* Ὑβλαῖος, Hyblensis, but the adjective form is Hyblaeus), is the name of no less than three cities of Sicily, which are often confounded with each other, and which it is sometimes very difficult to distinguish.

1. The largest and most considerable of the three, thence called for distinction's sake *Hybla Major* or *Magna* (Ὕβλα ἡ μείζων, Steph. B.; Paus. v. 23 § 6: on coins Ὕβλα Μεγάλη: Eckhel, vol. i. p. 216), was situated on the southern slope of Mount Aetna, not far from the river Symaethus. Hence it is described by Pausanias (in whose time it had ceased to be an independent city) as situated in the territory of Catana (*ἐν τῇ Κατανείᾳ, l. c.*). In like manner, we find it noticed by Thucydides as a place between Catana and Centuripa, so that the Athenians, on their return from an expedition to the latter city, ravaged the corn fields of the Inessaeans and Hyblaeans. (Thuc. vi. 96). It was clearly a Siculian city; and hence, at an earlier period, it is mentioned among the other towns of that people in the interior of the island which Ducetius sought to unite into a common league, a measure to which the Hyblaeans alone refused to accede. (Diod. xi. 88). It is quite clear that, in all the above passages, the *Aetnaean* Hybla is the one meant: and it seems probable that the city of Hybla, which was attacked by the Athenians soon after their landing in Sicily (Thuc. vi. 62), but without success, was no other, though Thucydides calls it Hybla Geleatis (Ὕβλα ἡ Γελεᾶτις), an epithet which has been generally supposed to belong to the second city of the name. (See No. 2.)

During the Second Punic War, Livy mentions Hybla as one of the towns that were induced to revolt to the Carthaginians in B. C. 211, but were quickly recovered by the Roman praetor M. Cornelius. (Liv. xxvi. 21.) In the time of Cicero the Hyblenses (evidently the people of the Aetnaean city) appear as a considerable municipal community, with a territory fertile in corn (Cic. *Verr.* iii. 43): and Hybla is one of the few places in the interior of Sicily which Pomponius Mela thinks worthy of mention. Its name is also found both in Pliny, who reckons it among the "populi stipendiarii" of the island, and in Ptolemy. Hence it is strange that Pausanias appears to speak of it as in his time utterly desolate. The passage, however, is altogether so confused that it is very difficult to say of *which* Hybla he is there speaking. (Mel. ii. 7. § 16; Plin. iii. 8. s. 14; Ptol. iii. 4. § 14; Paus. v. 23. § 6.) We find no later notice of it, though an inscription of Christian times found at Catana appears to refer to Hybla as still existing under its ancient name. (Castell. *Inscr. Sicil.* p. 253, no. 42.)

The site cannot be fixed with certainty: but the position suggested by Cluverius, at *Paternò* (about 12 miles from *Catania*), is probable enough, and derives strong confirmation from the discovery in that city of an altar dedicated "Veneri Victrici Hyblensi." (Cluver. *Sicil.* p. 235; Castell. *Num. Vet. Sicil.* p. 36.) The difficulty of its determination arises from our uncertainty as to the site of the neighbouring city of Aetna. [AETNA.]



COIN OF HYBLA MAJOR.

2. Hybla, called by Stephanus "the Little" (ἡ μικρὰ), and by Pausanias Hybla Gereatis (ἡ Γερεάτις, Paus. v. 23. § 6), was intimately connected, if not identical, with the Greek colony of MEGARA, which thence derived the name of MEGARA HYBLAEA. There is considerable discrepancy between the different accounts of the foundation of that colony [MEGARA], but all agree that it was founded in the territory, if not exactly on the site, of the Siculian town of Hybla. (Thuc. vi. 4; Strab. vi. p. 267; Scymn. Ch. 277; Serv. *ad Virg. Ecl.* i. 55.) Megara was destroyed by Gelon of Syracuse after it had subsisted 245 years, and its inhabitants expelled or removed elsewhere. (Thuc. *l. c.*) Its territory was naturally incorporated with that of Syracuse, and the site of the city itself appears to have remained desolate till the Athenian expedition to Sicily, B. C. 415, when we find Lamachus judiciously proposing to occupy it as the naval station of the Athenian fleet. (Thuc. vi. 49.) But this advice was overruled, and the next spring the Syracusans erected a fort for the protection of the site, which the Athenians repeatedly attacked, but with-

Digitized by Google

out success. (Id. vi. 75, 94.) After this we hear nothing more either of Megara or Hybla until the Second Punic War, when the former is mentioned as a small town which was occupied by the Syracusans during their hostile operations against Marcellus, and was in consequence taken by assault, plundered, and destroyed by that general, B. C. 214. (Liv. xxiv. 30, 35.) A small town seems, however, to have again grown up upon the site: Cicero notices it under the name of Megaris, but calls it only "a place" near Syracuse, without indicating that it was a town; but both Mela and Pliny distinctly call it such. (Cic. *Verr.* v. 25; Plin. iii. 8. s. 14; Mel. ii. 7. § 16.) Strabo, on the other hand, says that the city of Megara no longer existed, but the name of Hybla still remained: and Pausanias speaks of the latter as a village in the territory of Catana. (Strab. vi. p. 267; Paus. v. 23. § 6.) The inference which we may probably draw from these contradictory statements is, that there was a small place on the spot which was sometimes known as Megara, sometimes as Hybla. The latter name, as Strabo tells us, still retained some celebrity from the fame of the Hyblaean honey, which was produced on the neighbouring hills, and the praises of which are sung by the Latin poets. (Strab. *l. c.*; Virg. *Ecl.* i. 35, vii. 37; Ovid, *Trist.* v. 13. 22, *Ex. Pont.* iv. 15. 10; Sil. Ital. xiv. 199.)

Pausanias appears to apply to this Hybla the epithet of Gereātis (Γερεᾶτις), which must certainly be the same word with the Γελεᾶτις of Thucydides (vi. 62), though (as already observed) the latter author seems to give the name to the Aetnaean Hybla: the circumstances of the campaign rendering it highly improbable that the Megaraean Hybla can be there meant, even if there was any such place then in existence. But Stephanus also gives the name of Galeotae to the citizens of Megara Hyblaea ("Τβλα ἡ μικρὰ, ἧς οἱ πολῖται Τβλαῖοι Γαλεῶται Μεγαρεῖς, Steph. B. *v.* "Τβλα): and these Galeotae are noticed by Cicero, on the authority of Philistus, as celebrated for their skill in the interpretation of dreams (Cic. *de Divin.* i. 20), a quality which Pausanias expressly ascribes, on the *same* authority, to the inhabitants of Hybla Gereatis. (Paus. v. 23. § 6.) We seem, therefore, compelled to admit that these Galeotae were the native or Siculian inhabitants of the territory in which Megara was founded: and it seems at least highly probable that there always existed a Siculian town of Hybla, distinct from the Greek city of Megara, though of course dependent upon the latter in the days of its power. But the passage of Pausanias as it stands, is so confused (if not corrupt) that it is difficult to rely on it: and he himself admits the confusion that frequently existed between the two cities of the name, and which prevented him from pronouncing positively *which* of them it was that had dedicated offerings at Olympia. (Paus. *l. c.*)

The site of the Megaraean Hybla appears to be clearly fixed near the mouth of the little river *Cantaro*, the ancient Alabus, a small stream flowing into the Sinus Megarensis: a short distance from its right bank, Fazello describes the ruins of a considerable town as visible in his day, but in D'Orville's time there remained only very slight and uncertain vestiges. (Fazell. *de Reb Sic.* iii. 4. p. 159; D'Orville, *Sicula*, p. 172.) Cluverius follows Fazello in regarding these as the remains of the Greek colony of Megara, but there seems much reason to suppose that that city was situated nearer to the modern *Agosta*. [MEGARA.] The neighbouring village of *Melilli* is supposed by local writers to have derived its name from the honey of the Hyblaean hills, in the midst of which it is situated.

3. The third city of the name, called by Stephanus "the Less" ("Τβλα ἡ ἐλάττων), and surnamed HERA or HERAEA ("Ηρα, Ἡραία), is much the least known of the three. No allusion to it is found in Pausanias, where he is distinguishing the other two cities of the name, nor in any of the geographers: but we find in the Itineraries a town of Hybla, placed on the line of road from Syracuse to Agrigentum, which is certainly distinct from both the preceding, and can therefore be no other than the *third* Hybla of Stephanus. It was situated, according to the Itineraries, 18 miles from Acrae (*Palazzolo*), on the road to Agrigentum, but its precise site has not been identified. (*Itin. Ant.* p. 89; *Tab. Peut.*). A passage in which Cicero speaks of a town called Hera, in Sicily (*ad Att.* ii. 1. § 5), has been thought to refer to this town; but the reading is very doubtful.

The circumstance that there were so many towns called Hybla in Sicily probably arose from the fact mentioned by Pausanias, that there was a local divinity of the name. (Paus. v. 23. § 6.) [E.H.B.]

HY'CCARA or HY'CARA ("Υκκαρα, Thuc.; "Υκαρα, Diod., Steph. B.: *Eth.* "Υκάρεις, Id.), a small town on the N. coast of Sicily between Panormus and the port of Segesta. Thucydides tells us it was a Sicanian town; and it appears to have been independent of, and on hostile terms with, the neighbouring city of Segesta. Hence, during the Athenian expedition to Sicily, B. C. 415, Nicias, as he was proceeding with the fleet along the N. coast of the island, landed at Hyccara, which he took and plundered, and afterwards made it over to the Segestans. (Thuc. vi. 62; Diod. xiii. 6.) The Athenians are said to have realised 100 talents by the booty thus acquired: among the captives taken on this occasion was the celebrated courtesan Lais, then a mere child, who was carried to Corinth and there sold as a slave. (Plut. *Nic.* 15, *Alcib.* 39; Athen. xiii. p. 589; Paus. ii. 2. § 5; Steph. B. *s. v.* "Υκαρα; Schol. *in Aristoph. Plut.* 179.) No subsequent notice of Hyccara is found in history: it probably continued to be but a small place, and a mere dependency of Segesta or Panormus: but it did not cease to exist, for its name reappears in the Itinerary of Antoninus (pp. 91, 97), which places it M. P. from Panormus, proceeding along the coast to the westward. This distance coincides with a place called *Muro di Carini*, where, according to Fazello, the ruins of an ancient town were still visible in his time. The modern town of *Carini* (the name of which is probably derived from that of Hyccara) has been removed to a distance of three miles inland. (Fazell. *de Reb. Sic.* vii. 6; Cluver. *Sic.* p. 272.) [E. H. B.]

HYDASPES ("Υδάσπης, Strab. xv. p. 686; Plin. vi. 20. s. 23; Mela, iii. 7. 6; Curt. ix. 5; Dion. Perieg. v. 1139), one of the principal rivers of that part of India called the *Panjáb*. It rises in the north-western *Himáleh* mountains in *Kashmir*, and, after flowing nearly S., falls into the Acesines or *Chenáb*. Its Sanscrit name was *Vitastá*, which is probably preserved in that of one of its modern titles, of the river of *Behut*. Its present most usual name is *Jelum*. It was on the banks of this river that Alexander built his fleet of timber which he procured from the Montes Emodi (western *Himáleh*) (Strab.

Digitized by Google

xv. p. 698), and fought the great battle with Porus, founding, after its successful termination, two cities in commemoration of it,—Nicaea (now *Bekut ?*) and Bucephala. (Arrian, *Anab.* v. 19.) Arrian remarks that the Hydaspes, on flowing into the Acesines, lost its name; but that the Acesines, after receiving the Hydraotes, preserved its title unchanged (vi. 14; Curt. ix. 4). The river seems to have been considered one of great size by the historians of Alexander's invasion, as it is stated that Alexander saw crocodiles on its banks. (Strab. xv. p. 696.) Many wonderful stories seem to have been related about it by the poets, whence Horace speaks of "fabulosus Hydaspes" (*Carm.* i. 22. 8). Virgil calls it "Medus Hydaspes" (*Georg.* iv. 211), using Medus in the general sense of eastern. Ptolemy calls it Bidaspes (Βιδάσπης, vii. 1. 26), which is nearer to its native name than the more common Greek appellation. [V.]

HY'DATA (Ὕδατα, Ptol. iii. 8. § 9), a town in Dacia, which has been identified with *Kurte Ardschisch* in *Wallachia*. (Köppen, *Nachr. von einigen in Ungarn, Siebenbürgen, befindlichen Alt.*, Wien, 1823, p. 19.) [E. B. J.]

HYDE, a town of uncertain site, on the frontier between Cappadocia and Galatia. (Plin. v. 25; Hierocl. p. 675; Concil. Chalced. p. 526.) [L. S.]

HYDISSA (Ὕδισσα), a small town in Caria, respecting the site of which nothing is known, except that it was situated on the east of Mylassa. (Ptol. v. 2. § 20; Steph. B. *s. v.* Ὕδισσος; Plin. v 29.). [L. S.]

HYDRA (Ὕδρα), a promontory on the south of the gulf of Elaea in Aeolis, forming the south-western corner of the bay, and now called *Cape Foklia*. (Strab. xiii. p. 622; Ptol. v. 2. § 6.) [L. S.]

HYDRA. [Aetolia, p. 64, a.]

HYDRAMUM (Ὕδραμον, *Stadiasm.*; Ὕδραμα, Steph. B.: *Eth.* Ὑδραμεύς), a city of Crete, which the Maritime Itinerary places at 100 stadia to the E. of Amphimatrium. There can be no doubt but that it is represented by the modern Sfakian village of *Dhrámia*, situated in the fertile little plain running between the mountains and the shore along the bay of Amphimalla. (Pashley, *Trav.* vol. i. p. 72; Höck, *Kreta*, vol. i. pp. 395, 434.) [E. B. J.]

HYDRAOTES (Ὑδραώτης, Arrian, *Anab.* vi. 8, 13, 14, *Ind.* c. 3), a river of the *Panjáb*, which flows nearly SW. from the lower chain of the western *Himálek* mountains till it joins the Acesines (*Chenáb*). Its Sanscrit name is *Irávatí*, which has been slightly modified into its present appellation of the *Ravi*. According to Arrian, the river joined the Acesines in the territory of the Cambistholi, after having already received as tributaries the Hyphasis (now *Vipása*), the Saranges, and the Neudrus. (*Ind.* c. 4.) This is not strictly correct, as the Hyphasis falls into the Acesines somewhat below the *Hydraotes*. Strabo calls this river Hyarotis (Ὑαρῶτις, xv. pp. 694—697), which is perhaps the nearest to the form of the native name. Curtius, on the other hand, writes Hydraotes (ix. 1. § 13). Ptolemy speaks of a river he calls the Adris or Ruadris, which is probably the same stream (vii. 1. §§ 26, 27). [V.]

HY'DREA (Ὕδρέα: *Eth.* Ὑδρεάτης: *Hydra*), a small island off the coast of Hermionis and Troezenia. It originally belonged to the inhabitants of Hermione, who gave the island to the Samian exiles instead of money, and the latter pawned it to the Troezenians. (Hecat *ap. Steph. B. s. v.*; Herod. iii. 59; Paus. ii. 34. § 9.) Hydrea, which is rarely mentioned in antiquity, became in modern times the head-quarters of Grecian commerce and the cradle of modern Grecian freedom. Although *Hydra* is only a few miles in circumference, so rocky as scarcely to yield the common vegetables, and with no water except what is collected in cisterns, it attained by its commerce an extraordinary degree of prosperity. Before the Greek revolution it had a wealthy population of more than 25,000 souls, and upwards of 300 trading vessels. But the losses which the Hydriotes experienced gave a blow to their prosperity from which they have never recovered. (Holland, *Travels*, vol. ii. p. 202, 2nd ed.; Boblaye, *Recherches, &c.* p. 63; Leake, *Peloponnesiaca*, p. 284, seq.; Curtius, *Peloponnesos*, vol. ii. p. 456.)

HYDRE'LA (Ὕδρηλα), a town in Caria, said to have been founded by Hydrelus, one of three brothers who emigrated from Sparta. (Strab. xiv. p. 650; Steph. B. *s. v.*; Liv. xxxvii. 56.) The *Hydrelitae*, no doubt the people of Hydrela (Plin. v. 29), belonged to the conventus of Cibyra. [L. S.]

HYDRIACUS (Ὑδριακός), a small stream which ran into the sea along the coast of Gedrosia, which is mentioned by name by Marcian (p. 22) and Ptolemy (vi. 8. § 8). [V.]

HYDRUNTUM, called in Greek and sometimes also in Latin HYDRUS (Ὕδρους: *Eth.* Ὑδρούντιος; Hydruntinus, but an inscription has Hudrentinus: *Otranto*), a city of Calabria, on the coast of the Adriatic, and a port of considerable importance, for which it was indebted to the circumstance of its being the nearest point of Italy to the coast of Greece, the passage being shorter even than that from Brundusium. (Cic. *ad Att.* xv. 21.) We have very little information as to its early history; but it seems probable that it was a Greek city, or at least had received a Greek colony, though the tradition related by Stephanus of Byzantium (*s. v. Βίεννος*), which represented it as founded by Cretans, is probably connected with the legends which ascribed a Cretan origin to the Sallentines and Messapians, rather than to any *historical* Greek colony. But Scylax distinctly notices "the port of Hydrus," in a passage where he is speaking only of Greek towns (Scyl. p. 5. § 14); and though he there seems to imply that it was not an independent city like Metapontum or Tarentum, he elsewhere (p. 11. § 27) calls it πόλις ἐν τῇ Ἰαπυγίᾳ: hence it seems highly probable that it was at that time merely a dependency of Tarentum. Nor do we hear anything of Hydruntum for some time after it had fallen, with the rest of the Messapian peninsula, under the Roman yoke; the establishment of the Roman colony at Brundusium and the increasing importance of that port having, doubtless, tended to throw Hydruntum into the shade. But as early as B. C. 191 we find that it was a customary place of landing in Italy, for those who came from Greece and crossed over from Corcyra (Liv. xxxvi. 21); and this probably continued to be a route much frequented, while Brundusium was the point of communication with Apollonia and the coast of Epirus. Cicero, however, recognises the fact, that the shortest passage from Italy to the opposite coast was from Hydruntum, which for that reason he himself seems to have preferred to Brundusium; though Pliny tells us that the latter route, though longer, was the safer of the two. (Cic. *ad Att.* xv. 21, xvi. 6, *ad Fam.* xvi. 9; Plin. iii. 11. s. 16.) All the ancient geographers mention Hydruntum as situated

Digitized by Google

at the mouth or entrance of the Adriatic: Pliny states the width of the strait which separated it from the opposite coast near Apollonia at 50 M. P., which is just about the truth; and this accords also with Strabo's statement, that it was 400 stadia (50 M. P.) from Hydruntum to the island of Sason near the Acroceraunian Promontory. Pliny adds a strange story, that Pyrrhus had at one time formed the project of closing up the passage with a bridge of boats, and that the same idea had been taken up at a later time by M. Varro, in the war against the pirates. (Plin. iii. 11. s. 16; Strab. vi. p. 281; Mel. ii. 4. § 7; Ptol. iii. 1. § 14.) Strabo speaks of Hydruntum as in his time but a small place (πολίχνη, *l. c.*); but it seems to have risen into a considerable municipal town under the Roman empire (Orell. *Inscr.* 2570; *Lib. Col.* p. 262), and increased gradually in importance as Brundusium declined. [BRUNDUSIUM.] In the fourth century it appears to have become the usual place of passage, not only to Greece, but to Apollonia, Dyrrhachium, and thence to Constantinople; so that the Itineraries all give the routes of communication between Italy and the East upon this supposition. (*Itin. Ant.* pp. 115, 323, 329; *Itin. Marit.* p. 489; *Itin. Hier.* p. 609.) The same state of things continued also after the fall of the Western Empire: hence, during the wars of the Goths with Belisarius and Narses, Hydruntum assumes an importance very different from what it possessed in Roman times. (Procop. *B. V.* i. 1, *B. G.* iii. 30, &c., where the name is corruptly written Δρυοῦς.) It was one of the last cities in the S. of Italy which remained in the hands of the Greek emperors, from whom it was not finally wrested till the 11th century. The modern town of *Otranto* is a poor decayed place, though still the see of a bishop: it was taken and plundered in 1480 by the Turks; a calamity which it has never recovered. Galateo, a local historian, who saw it previous to that event, describes it as then a flourishing and populous place, though, like *Taranto*, occupying only the citadel or arx of the ancient city: the circuit of the ancient walls could be distinctly traced, inclosing a space of 11 stadia, and fortified with towers; but, he adds, "all this is now levelled with the ground." Recent travellers have found no vestiges of antiquity but the pavement of the Via Trajana, and some marble columns and mosaic pavements in the present cathedral. A ruined church of St. Nicholas is supposed to occupy the site of an ancient temple. (Galateo, *de Situ Iapygiae*, pp. 47—50; Romanelli, vol. ii. pp. 110, 111; Craven, *Travels*, pp. 142—144.) Though in such a decayed condition, *Otranto* still gives name to the province, which is known as the *Terra di Otranto*, and includes the whole of the Iapygian or Calabrian peninsula.

The little river *Idro*, the sluggish waters of which enter the harbour of *Otranto*, is evidently the stream called in ancient times the Hydrus, whose name has been preserved to us in a line of Lucan (v. 375). [E. H. B.]

HYDRUSSA (Ὑδροῦσσα), an island off the western coast of Attica, now called *Prasonisi*. (Strab. ix. p. 398; Leake, *Demi of Attica*, p. 56.)

HYELE. [VELIA.]

HYETTUS (Ὑηττός: *Eth.* Ὑήττιος), a village of Boeotia, said to have been founded by the Argive Hyettus, contained in the time of Pausanias a temple of Asclepius, frequented by the sick for the cure of their diseases, where the deity continued to be worshipped in the form of a rude stone. Pausanias says that Olmones was situated 12 stadia to the left of Copae, and Hyettus 7 stadia from Olmones. Forchhammer places Olmones on the small island of *Trion-Yani* in the lake Copais, and Hyettus at *Strurili* to the west of this island, where some ancient ruins are found on a small hill jutting out into the lake. (Paus. ix. 24. § 3, ix. 36. § 6; Steph. B. *s. v.*; Forchhammer, *Hellenika*, p. 178.)

HYGRES (Ὕγρεῖς, Ptol. iii. 5. § 13), a place on the N. coast of the Palus Maeotis between the rivers Lycus and Porites. [E. B. J.]

HYLA, a port at the head of the bay of Schoenus, in Caria. (Pomp. Mela, i. 16; Plin. v. 29, where some read *Hyda*.) [L. S.]

HYLAEA (Ὑλαία, Ὑλέη, Steph. B.), the peninsula which lies to the NW. of Taurica, formed by the lower part of the Borysthenes, the Euxine, the gulf of Carcinitis, and the river Hypacyris, which flows through it. According to Herodotus (iv. 9, 18, 54, 76), it is a woody region lying to the E. of the Borysthenes (*Dnieper*), of which Pliny makes mention: "Inde silvestris regio. Hylaeum mare, quo alluitur, cognominavit" (iv. 12). It would seem to be indicated by Pomponius Mela: "Hypacaris per Nomadas evolvitur, Silvae deinde sunt, quas maximas hae terrae ferunt" (ii. 1. § 45: comp. Scymn. *Fr.* 105; *Anon. Peripl.* p. 3).

It is uncertain whether there remain any traces of this woodland. Some old maps present the name of the Black Forest in the very same place: and this may have had a much wider extent in earlier times. From the communications of several travellers, however, it appears that there is no wood now, although the fact of its having once existed is preserved in the popular traditions of the country; nor does the woody country occur till the banks of the river *Don* are reached. (Heeren, *Ideen*, vol. i. pt. 2. p. 272; trans. vol. ii. p. 8.) It has been identified with the great plain of *Jamboyluk* in the steppe of the *Nogai*. (Rennell, *Geog. of Herod.* vol. i. p. 83: Potocki, *Voyage dans les Steps d'Astrakhan*, vol. i. p. 179; Köler, *Mém. de l'Acad. de St. Petersb.* vol. x. p. 655; Kohl, *Süd Russland*, vol. i. p. 75.) [E.B.J.]

HYLAETHUS or HYLAETUS (Ὑλαῖθος or Ὑλαιτος), a river in Locris Ozolis, flowing through Locris near the eastern frontier of Aetolia into the Corinthian gulf. Leake supposes it to be the modern *Morno*, and to have derived its name from Hyle, a town in Phocis mentioned by Stephanus B. (Dicaearch. 67; Steph. B. *s. v.* Ὕλη; Leake, *Northern Greece*, vol. ii. p. 619.) [HYLE, No. 2.]

HYLE (Ὕλη: *Eth.* Ὑλαῖος). 1. An ancient town in Boeotia, situated upon the lake Hylica, which derived its name from this place. (Hom. *Il.* ii. 500, v. 708, vii. 221; Strab. ix. pp. 407, 408; Nonn. *Dionys.* xiii. 66; Plin. iv. 7. s. 12; Steph. B. *s. v.*) Moschus, who calls the town Hylae, speaks of it as if he seemed to believe that it was the native place of Pindar (Πίνδαρον οὐ τοθέοντι τόσον Βοιωτίδες Ὕλαι, Mosch. iii. 89); but this is in opposition to all other ancient authorities. The site of Hyle is uncertain, and is variously placed by modern authorities. Leake supposes it to be represented by the *Paleókastro* on the height between the northern end of the lake and the foot of Mount *Palesi*. Ulrichs places it at the southern end of the lake, near the mouth of the river Ismenus. (Leake, *Northern Greece*, vol. ii. p. 313; Ulrichs, *Reisen in Griechenland*, p. 257.)

Digitized by Google

2. A town in Locris Ozolis, mentioned by Stephanus B. (*s. v.* Ὕλη), from which the river Hylaethus perhaps derived its name. Thucydides (iii. 101) speaks of a Locrian people named Hyaei (Ὑαῖοι), which name Leake supposes to be a corruption of Hylaei; but the objection to this hypothesis is that Stephanus, who mentions Hyle as a Locrian town, also speaks of Hyaea as a Locrian town, giving Hyaeus as their ethnic name, whence we may infer that he distinguished between the two towns. (Steph. B. *s. v.* Ὑαία; comp. Leake, *Northern Greece*, vol. ii. p. 615.)

HYLE (Ὕλη), a town of Cyprus whence Apollo was called Hyletes. (Steph. B. *s. v.*)

HYLIAS (Ὑλίας), a river on the E. coast of Bruttium, mentioned only by Thucydides (vii. 35), from whom we learn that it was situated between Thurii and Crotona, and apparently formed the northern boundary of the territory of the latter city. It is supposed by Swinburne to be the *Acquanile*, while Romanelli would identify it with the *Calonato*, little more than a mile further W.: the *Fiumenicà*, a more considerable stream, about 10 miles nearer Crotona, has perhaps a better claim than either. (Swinburne, *Trav.* vol. i. p. 309; Romanelli, vol. i. p. 221.) [E. H. B.]

HY'LICA LACUS. [Boeotia, p. 413, b.]

HY'LICUS. [Troezen.]

HYLLI, HYLLINI. [Illyricum.]

HYLLUS (Ὕλλος), a tributary of the river Hermus, in Lydia, flowing into it from the north. (Hom. *Il.* xx. 392; Herod. i. 80; Plin. v. 31.) In the time of Strabo (xiii. p. 626) this river was called *Phrygius*. [L. S.]

HYLO'PHAGI (Ὑλοφάγοι, Diod. iii. 24; Arrian, *Peripl. Mar. Eryth.* p. 2), were one of the numerous and obscure tribes of Aethiopians who derived their appellations, with the Greeks at least, from their modes of living and diet. The Hylophagi, or eaters of beech-mast, or perhaps dates and fruit generally, dwelt on either bank of the Astaboras or White Nile. The Shangallas occupy these districts at the present day, and are scarcely less uncivilised. The account of the Hylophagi in Diodorus (*l. c.*) is, however, hardly credible, and seems to be founded upon rumours of the ourang-outan. According to him, the Hylophagi fed in the summer upon fruits, in winter upon the long rank grasses of the river-meadows, sprang from tree to tree like birds or apes, went perfectly naked, were armed with clubs, and had their females in common. The most curious fact in his story is the liability of the Hylophagi to cataract (γλαυκώματα) on their eyes, which, by preventing them from climbing, caused the majority of the race to die of hunger. [W. B. D.]

HYMETTUS. [Attica, p. 322, b.]

HYPACYRIS FL. [Carcina.]

HYPAEA. [Stoechades.]

HYPAEPA (τὰ Ὕπαιπα), a small town in Lydia, on the southern slope of Mount Tmolus, according to the Tab. Peut., 42 miles from Ephesus. There, as in some other towns of Asia Minor, the Persian worship of fire was introduced during the time when the country was under Persian supremacy. (Strab. xiii. p. 627; Ptol. v. 2. § 16; Ov. *Met.* vi. 13, xi. 150; Plin. v. 31; Paus. v. 27. § 5; Tac. *Ann.* iv. 55.) The town appears to have continued to exist till a late period of the empire, as we possess coins of it as late as the time of Gordian. Leake (*Asia Minor*, p. 256) believes that the remains at *Berélí* belong to Hypaepa. [L. S.]

HY'PANA (Ὕπανα: *Eth.* Ὑπανεύς), a town in the interior of Triphylia in Elis, which surrendered to Philip V. in the Social War. Its inhabitants had been transferred to Elis when Strabo wrote. Hypana is mentioned along with Typanese. Both these towns must have been situated in the mountains of Triphylia, but their site is uncertain. Leake places Hypana at *A'lvena* in the heights above the maritime plain of Lepreum; but Boblaye more to the north, at *Mundritsa*, in the hills above Samicum. (Strab. viii. p. 343; Polyb. iv. 77, 79; Steph. B. *s. v.*; Ptol. iii. 16. § 18, who calls it Ὑπάνεια; Leake, *Morea*, vol. ii. p. 85; Boblaye, *Recherches, &c.* p. 133; Curtius, *Peloponnesos*, vol. ii. p. 89.)

HY'PANIS FL. (ὁ Ὕπανις, Herod. ii. 102, iv. 17, 47, 51, 81, 178, v. 89; Strab. ii. p. 107, vii. p. 306, xi. p. 494; Ptol. iii. 5. § 6; Dion. Chrys. *Or.* xxxi. p. 75; Athen. p. 42; Pomp. Mela, ii. 1. § 6; Plin. iv. 12; Propert. i. 12. 4; Ov. *ex Pont.* iv. 10, 47; Ὑπάνης, Arist. *H. A.* v. 19: *Bog*), a river of Sarmatia Europaea, which sprung from a large lake (Herod. iv. 42; comp. Potocki, *Voyage*, vol. i. p. 158), though according to Ptolemy (*l. c.*) it took its rise in the Amadoci Montes. It flowed parallel with the Borysthenes (Strab. pp. 306, 494). The water in the upper part of the course was sweet, but after receiving the bitter waters of Exampaeus became brackish (Paus. iv. 35. § 6; Ov. *Met.* xv. 285; Vitruv. viii. 3. § 11; Eustath. *ad Dionys. Per.* 1143), and discharged itself into the Euxine at the town of Olbia. It received its present name in the sixth century; in Jornandes (*de Get.* 5) and the Geographer of Ravenna it appears under the form Bagossola = Bagos river (*Sola*, in old German, meaning water). Constantine Porphyrogeneta (*de adm. Imp.* 42) called it Bogu.

It is difficult to determine the original meaning of the name; but as the Slavonians paid divine honours to their rivers, it may be connected with the Slavonic word *Bog*, "God." The Greek name Hypanis is traceable to the Indo-European *pani*, "water." (Schafarik, *Slav. Alt.* vol. i. p. 505.) (Kohl, *Reisen in Süd-Russland*, vol. i. p. 34; Köler, *Mém. de l'Acad. de St. Petersb.* vol. x. p. 126; Eichwald, *Geographie d. Kasp. Meer*, p. 295.) [E. B. J.]

HY'PANIS. [Hyphasis.]

HY'PATA (ἡ Ὑπάτη, τὰ Ὕπατα: *Eth.* Ὑπαταῖος, Hypataeus, Liv.; also Ὑπατεύς, Steph. B. *s. v.*), the chief town of the Aenianes, in the valley of the Spercheius, and at the foot of Mt. Oeta. In the Roman wars in Greece it belonged to the Aetolian league. (Polyb. xx. 9, 11, xxi. 2, 3; Liv. xxxvi. 14, 26.) The women of Hypata, as of many other Thessalian towns, were noted for their skill in magic; and it was here that Lucius, in the story of Lucian, was metamorphosed into an ass. (Lucian, *Asin.* 1, seq.; comp. Apul. *Metam.* i. p. 104; Theophr. *H. Plant.* ix. 2.) The town is mentioned by Hierocles in the 6th century. (Hierocl. p. 642, ed. Wess.; comp. Ptol. iii. 13. § 45.) It occupied the site of the modern *Neópatra*, where inscriptions have been discovered containing the name of Hypata. The town appears to have been called Neae Patrae in the middle ages, and is mentioned in the 12th century as a strongly fortified place. (Niceph. Gregor. iv. 9. p. 112, ed. Bonn.) There are still considerable remains of the ancient town. Leake observed many large quadrangular blocks of stones and foundations of ancient walls on the heights of *Neopatra*, as well as in the buildings of the town. In the

Digitized by Google

metropolitan church he noticed a handsome shaft of white marble, and on the outside of the wall an inscription in small characters of the best times. He also discovered an inscription on a broken block of white marble, lying under a plane-tree near a fountain in the Jewish burying-ground. (Leake, *Northern Greece*, vol. ii. p. 14, seq.)

HYPATUS MONS. [BOEOTIA, p. 414, a.; GLISAS.]

HYPELAEUS (Ὑπέλαιος), a fountain in the neighbourhood of Ephesus. (Strab. xiv. pp. 634, 640; Athen. viii. p. 361.) This spring was still seen by Mr. Hamilton during his excursion in Asia Minor. (*Researches*, ii. p. 25.) [L. S.]

HYPERBOREI (Ὑπερβόρειοι). The legendary race of the Hyperboreans, though mentioned neither in the Iliad nor Odyssey, are spoken of in the poem of the Epigoni and in Hesiod (Herod. iv. 32), and occur in the traditions connected with the temples of Tempe, Delphi, and Delos. (Comp. Müller, *Dor.* vol. i. p. 284, trans.)

The situation assigned to this sacred nation was, as the name indicates, in the remote regions of the North. They were said to dwell beyond Boreas (Βορέας), the mountain wind, which came from the Rhipaean mountains, the name of which was derived from hurricanes (ῥιπαί), issuing from a cavern, which they warded off from the Hyperboreans, and sent to more southern nations; so that they never felt the cold north wind, but had their lot fixed in some happy climate, where, like an Alpine summit rising above the storms, they were surrounded by an atmosphere of calm and undisturbed serenity. "Here," says Von Humboldt (*Asie Centrale*, vol. i. p. 403), "are the first views of a natural science which explains the distribution of heat and the difference of climates by local causes,—by the direction of the winds,—the proximity of the sun, and the action of a moist or saline principle." And thus the "meteorological myth," which placed the Hyperboreans in the North at the sources of the Ister, as conceived by Pindar (*Olymp.* iii. 14, viii. 47, *Pyth.* x. 31, *Isthm.* v. 22), and Aeschylus in the Prometheus Unbound (*ap. Schol. ad Apoll. Rhod.* iv. 284), was, when the Ister was supposed to be a river running through all Europe from its western extremity, transferred to the regions of the West. In consequence of this we find, in later writers, a confusion of this happy land with that of Italy and other western countries, as well as of the Rhipaeans with the Alps and Pyrenees. But whatever arbitrary license was assumed by the poets and geographers who wished to mould these creations of the fancy into the form of a real people, as to their local habitation, the religious idea always remained the same. They were represented as a pious nation, abstaining from the flesh of animals, and living in perpetual serenity in the service of their God for a thousand years. (Hellanic. *ap. Clem. Alex. Strom.* vol. i. p. 305; Simonides, Pindar. *ap. Strab.* xv. p. 711.) "The muse is no stranger to their manners. The dances of girls, and the sweet melody of the lyre and pipe, resound on every side, and twining their hair with the glittering bay they feast joyously. There is no doom of sickness or disease for this sacred race; but they live apart from toil and battles, undisturbed by exacting Nemesis." (Pind. *Pyth.* x. 56.) But at length, tired out with this easy life, betwixt the sun and shade, they leapt, crowned with garlands, from a rock into the sea. (Plin. iv. 26; Pomp. Mela, iii. 1. § 5.) We are conducted almost involuntarily to the ARGIPPAEI, ISSEDONES, and the "ancient kingdom of the Griffin," to which Aristeas of Proconnesus, and two hundred years after him, Herodotus, have given such celebrity.

East of the Kalmuck Argippaei were the Issedones, but to the N. of both, nothing was known (Herod. iv. 25), since high mountains presented an impassable barrier. In descending the chain of *Ural* to the E., towards the steppes of *Obi* and *Ichim*, another lofty range of mountains, forming the W. extremity of the *Altaï*, does in fact appear. The commercial route crossed the first chain (*Ural*) from W. to E., which indicates a "meridian" chain with its main axis running from S. to N. In marking off the second chain, Herodotus clearly distinguishes that which is to the E. of the Argippaei (the country of the Issedones) from that which is beyond the huge mountains towards the N.—where the men sleep half the year, and the air is filled with feathers,—where the Arimaspi live who steal gold from the "Griffins." This distinction serves to establish the existence of a chain running from W. to E. The region of the "Griffins" and the Hyperboreans commences beyond the N. slope of the "chain of the Aegipodes" (the *Altaï*). The position of the Issedones to the N. of the Jaxartes (Araxes) appears justified by the account of the campaign of Cyrus against the Massagetae, who occupied the plain to the S. of the Issedones.

The most precious mineral riches are stored up in the extremities of the earth, and it is in the N. of Europe that the greatest abundance of gold is found. (Herod. iii. 116.) Now the N. of Europe in the geography of Herodotus, comprehends the N. of Asia, and we are irresistibly reminded of the gold-washings to the S. of the *Ural*, among the mountains of *Kousnetsk*, and the ravines of the Lowlands of S. Siberia. The locality of the gold trade of NW. Asia may be placed between the 53rd and 55th degrees of latitude.

An ingenious hypothesis has been started (Ermann, *Reise*, vol. i. p. 712), which refers the origin of the "Griffins," guardians of the gold of the Arimaspi, to the phenomenon of the frequent occurrence of the fossil bones of the great pachydermatous animals found in the alluvium of N. Siberia;—bones which to this day the native tribes of wild hunters believe to be the claws, beak, and head of some gigantic bird. Von Humboldt (*Asie Centrale*, vol. i. pp. 389—411), to whose interesting discussion on this subject reference has been made, justly severely condemns this confusion between ancient and modern fable; and shows that the symbolic image of the "Griffins," as a poetic fiction and representation in the arts, did precede, among the Greeks, the time when relations were formed among the colonies of Pontus and the Arimaspi. The "Griffin" was known to the Samians, who figured it upon the vase which commemorated the good fortune of their first expedition to Tartessus. (Herod. iv. 152.) This mysterious symbol of an animal acting as guardian over gold, seems to have been the growth of India and of Persia (Aelian, *N. A.* iv. 26; Ctesias, *Ind.* § 12; comp. Bähr, *Excurs. V. ad Herod.* iii. 116); and the commerce of Miletus contributed to spread it in Greece along with the tapestries of Babylon. The region of auriferous sand, of which the Daradae (Dardars, or Derders, mentioned in the *Mahabharata*, and in the fragments of Megasthenes) gave intelligence to travellers, and with which the now repeated fable of the ants became connected, ex-

Digitized by Google

to the accidental double meaning of a name, belongs to a more S. latitude, 35° or 37°. (*Cosmos*, vol. ii. p. 142, trans.) [E. B. J.]

HYPERBOREI MONTES. [RHIPAEI MONTES.]

HYPERBOREUS OCEANUS. [SEPTENTRIONALIS OCEANUS.]

HYPERE'SIA. [AEGEIRA.]

HYPERIS (Plin. vi. 23. s. 26), a small stream mentioned only by Pliny, which falls, according to him, into the middle of the Persian gulf. Forbiger has conjectured that it may be the same as that now called the *Djayrah*. [V.]

HYPERTELEATUM (Ὑπερτελέατον), a place in the territory of the Laconian Asopus, at the distance of 50 stadia from the latter town, containing a temple of Asclepius. The French Commission discovered on the coast below the village of *Demónia* some remains of the inclosure of this temple on a rock artificially cut, with many tombs excavated in the rock, and at 500 steps from the temple, nearer *Demónia*, a fine source of water. (Paus. iii. 22. § 10; Boblaye, *Recherches, &c.* p. 98; Leake, *Peloponnesiaca*, p. 168; Curtius, *Peloponnesos*, vol. ii. p. 294.)

HYPHANTEIUM. [BOEOTIA, p. 412, a.]

HYPHASIS (Ὕφασις, Arrian, *Anab.* vi. 8, *Ind.* c. 2, 3, 4), the most eastern and the most important of the five rivers which water the *Panjáb*. Rising in the western *Himálch*, it flows in two principal branches in a course nearly SW. (under the names respectively of *Vipáśa* and *Sátadru*), till, at their junction, it takes the one name of *Sátadru*, which it retains till it falls into the Indus at *Mittunkote*. It is best known, however, by its modern name of *Sutledge*, which is perhaps a corruption of the Sanscrit Sátadru. It bore in ancient as in modern times various appellations, probably according to the different parts of its course to which the writers referred. Thus in Arrian (*l. c.*) and Diodorus (xvii. 93) it appears under the form of Hyphasis; in Pliny (vii. 17, 21) and Curtius (ix. 1) under that of Hypasis; while Ptolemy calls it Bibasis (Βίβασις, vii. 1. §§ 26, 27); all these being evidently derived from the native name of the western of its two principal arms, the *Vipáśa*. On the other hand, in Strabo (xv. pp. 686, 691, 701), in Diodorus (ii. 37), in Solinus (c. 52), and in Dion. Perieg. (v. 1145), it bears the title of Hypanis. There can be no doubt that all these writers refer to one and the same river: for Strabo (xv. p. 700) and Arrian (*Ind.* c. 2) both speak of it as the last of the rivers, that is, in reference to the advance of Alexander the Great into the East; while Pliny directly states that the Hypasis was the limit of Alexander's march (vi 17. s. 21). The Sanscrit name for the main stream after the junction of the two principal feeders, namely, the *Sátadru*, seems not to have been wholly unknown to the ancients; for Ptolemy makes the Zaradrus one of the tributaries of the Hyphasis (*l. c.*), and Pliny notes a river which he calls the Sydrus or Hesidrus, which is probably the same (*l. c.*). A little way before the *Sutledge* falls into the Indus it receives the *Chenáb*, and with it the waters of all the other rivers of the *Panjáb*. [V.]

HYPIUS (Ὕπιος: *Karasu*), a river of Bithynia, not far westward from the Sangarius. The river itself is very small; but at its mouth it is so broad that the greater part of the fleet of Mithridates was enabled to take up its winter quarters in it. (Apollon. Rhod. ii. 795; Scylax, p. 34; Marcian. Heracl. p. 70; Steph. B. *s. v.*; Arrian, *Peripl.* p. 13, who calls it Hyppius; Memnon, *ap. Phot. Cod.* 44.) According to Scylax, this river formed the boundary between the territories of the Bithyni and the Mariandyni. [L. S.]

HYPSALTAE, one of the tribes of Thrace mentioned by Pliny (iv. 18), but apparently the same as the Ὑψηλῖται spoken of by Steph. B. (*s. v.* Ὑψηλίς). [L. S.]

HYPSAS (Ὕψας), is the name of two rivers in Sicily, both in the southern part of the island. 1. The larger of the two, which may be called the Selinuntine Hypsas, from its flowing through the territory of that city, is the river now known as the *Belici*, a large stream which enters the sea about 4 miles E. of the ruins of Selinus. (Cluver. *Sicil.* p. 230; D'Orville, *Sicula*, p. 78.) It rises near *Corleone*, and has a course of above 30 miles from thence to the sea. No mention occurs of the Hypsas in history, but its name is noticed by Silius Italicus, as well as by Ptolemy and Pliny. (Sil. Ital. xiv. 227; Plin. iii. 8. s. 14; Ptol. iii. 4. § 6; Vib. Sequest. p. 12.) The importance of this river to the Selinuntines is attested by the coins of Selinus, on some of which the river-god Hypsas (ΗΥΨΑΣ in Archaic characters) is represented as sacrificing at an altar; apparently referring to the river having been restrained from inundations which proved injurious to the salubrity of the city and its neighbourhood. (Eckhel, vol. i. p. 239; *Mus. Hunt.* pl. 48. fig. 25.)

2. A second river of the same name flowed beneath the walls of Agrigentum on their W flank, and joined the Acragas just below the city. [AGRIGENTUM.] It is now called the *Drago*, and is a small stream, though flowing through a deep valley, till immediately below the walls of Agrigentum. Considerable confusion exists among some modern writers with regard to the two rivers of Agrigentum: but the point is fully cleared up by Siefert (*Akragas u. sein Gebiet.* pp. 20—22). [AGRIGENTUM]. Polybius (ix. 27) is the only author who mentions the Agrigentine Hypsas by name, and he states distinctly that it was the river flowing at the foot of the hill of Agrigentum on the W. and SW. [E.H.B.]

HYPSE'LA (Ὑψήλη, Ptol. iv. 5. § 64; Ὑψηλις, Steph. B. *s. v.*; Ὑψηλοπολιτῶν πόλις, Socrat. *H. E.* i. 32: *Eth.* Ὑψηλίτης), the capital of the Nomon Hypselites in Upper Egypt. (Lat. 27° N.) It stood on the western side of the Nile, nearly opposite Antaeopolis. [W. B. D.]

HYPSI (Ὕψοι), a place in Laconia, containing temples of Asclepius and Artemis Daphnaea, situate 30 stadia from the Carneium on Mt. Cnacadium. Leake places Hypsi at *Vathý*, on the coast, but it was probably in the mountains in the interior. (Leake, *Morea*, vol. i. p. 276; Curtius, *Peloponnesos*, vol. ii. p. 275.)

HYPSU'S (Ὑψοῦς, -οῦντος), a town of Arcadia, in the district Cynuria, situated upon a mountain of the same name, said to have been founded by Hypsus, a son of Lycaon. It is placed by the French Commission at *Stemnítza*. (Paus. viii. 3. § 3, 35. § 7; Steph. B. *s. v.*: Boblaye, *Recherches, &c.* p. 161; Leake, *Peloponnesiaca*, p. 240.)

HYRCA'NIA (ἡ Ὑρκανία: *Eth.* Ὑρκάνιος, Ὑρκάνιος, Hyrcanius), a province of Asia, which was bounded on the north by the Caspian, sometimes called from it the Hyrcanian sea; on the east by the Oxus (the *Jihon* or *Amu-Darja*), which separates it from Margiana; on the S. by the northern spurs of the Montes Sariphi (now *Hasari*), which separate

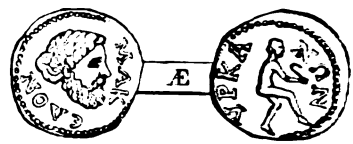
Digitized by Google

it from Ariana and Parthia; and on the W. by the M. Coronus and the river Charindas, which formed its limits in the direction of Media. Its boundaries at different periods of history were, however, various; and it is probable that in later times it comprehended the greater part of the districts now known by the names of *Mazanderán*, *Khorassán*, *Dahistán*, and *Dahistán*. More strictly, it would have included only *Mazanderán*. According to Arrian, the district was situated on the left of the road which led to Bactra, and was intersected by high and steep mountains, but with, however, a champaign country extending along the sea (iii. 25). This would correspond with the present state of *Mazanderán*. According to Strabo, it extended along the Caspian sea, which was very marshy along its shores, and was watered by both the Ochus and the Oxus on their way into that sea: he states also that it was separated from the desert by the river Sarneius (xi. pp. 508—511). Professor Wilson has remarked that this view would give far too great an extent to this province, the name of which is undoubtedly preserved in the modern *Gurkan* or *Jorjan*, a town to the E. of Asterabad. (*Ariana*, p. 142.) The principal rivers of Hyrcania were the Sarneius (now the *Atrek*), the Socanaa, the Syderis, the Maxera, and the Charindas. Its chief city appears to have borne at different times various appellations; but it is most probable that the TAPE of Strabo (xi. p. 508), the Zadracarta of Arrian (iii. 23, 25), and the CARTA of Strabo (*l. c.*) were, as the chief residence of the rulers of the land, one and the same place. Besides this, was TALABROCA (Strab. *l. c.*), probably the same as the TAMBRAX of Polybius (x. 31); HYRCANIA or HYRCANA; and SAMARIANA. Some part of Hyrcania, especially that near the sea, is stated to have been very fertile, especially in wine and fruits (Strab. xi. p. 508); corn, however, was not sown there (Strab. *l. c.*), and the mountain land was covered with dense woods (Diod. xvii. 75), which were full of wild bees (Strab. *l. c.*). The land also contained many wild beasts, as the tiger. (Mela, iii. 5; Amm. Marc. xxiii. 6.) The people of the land bore the generic name of Hyrcani; but the country itself was divided into several smaller districts, such as Astabene, Siracene, and Arsitis.

Of the Hyrcani, as distinct from the nations in their neighbourhood, the ancient writers say little; but Xenophon states that they were subdued by the Assyrians (*Cyrop.* i. 5), and Curtius that 6000 of them were in the army of Dareius when he was preparing to resist the invasion of Alexander (iii. 2). They probably partook of the character of the wild tribes adjoining them; and the statement of Strabo, that no corn was sown in Hyrcania, would lead to the inference that the bulk of the population was an unsettled one. On their NE. frontier we know that many Scythian tribes were settled, as the Dahae. [V.]

HYRCA'NIA (Ὑρκανία μητρόπολις, Ptol. vi. 9. § 7, viii. 23. § 3; Hyrcana, Amm. Marc. xxiii. 6), a town placed by Ptolemy to the east of the river Maxera in Hyrcania (probably the modern *Tedjin*). It is most likely represented by the modern *Gurkan* or *Jorjan*, a place to the NE. of Asterabad. [V.]

HYRCA'NIA (Ὑρκανία: *Eth.* Ὑρκανός), the name of a town in Lydia, situated in the Hyrcanian plain (τὸ Ὑρκάνιον πεδίον), which is said to have derived its name from a colony of Hyrcanians being settled here by the Persians. (Strab. xiii. p. 629; comp. Steph. B. *s. v.*) They were afterwards mingled with some Macedonians, who also settled in this district, whence they are called by Pliny and Tacitus "Macedones Hyrcani." (Plin. v. 29. s. 31; Tac. *Ann.* ii. 47.) There were two towns in this plain: one called Hyrcania, and the other Mosteni. (Tac. *l. c.*; Ptol. v. 2. § 16.)



COIN OF HYRCANIA IN LYDIA.

HYRCA'NIUM MARE. [CASPIUM MARE.]

HY'RIA, HY'RIUM, or U'RIA, is the name of several ancient towns in Italy, which is very variously written, and often corrupted, in our extant MSS.: but all these forms appear to be originally the same.

1. (Ὑρίη, Herod.; Ὑρία, App.; Οὐρία, Strab.: *Eth.* Uritanus: *Oria*), an inland city of Calabria, situated nearly in the heart of that country, on the Appian Way, about midway between Brundusium and Tarentum. (*Tab. Peut.*) Strabo correctly describes it as situated in the midst of the isthmus, as he terms it, between the two seas. (Strab. vi. p. 282.) He tells us that a palace of one of the ancient native kings was still shown there: and Herodotus represents it as the metropolis of the Messapians, founded by a colony of Cretans on their return from Sicily. According to this statement, it was the most ancient of the Messapian cities, from whence all the others were founded. (Herod. vii. 170.) But though it thus appears to have been in early times a place of importance, we hear very little of it afterwards, though its name again appears in Appian during the civil war between Octavian and Antony, while the latter was besieging Brundusium. (Appian. *B. C.* v. 58.) The people of Hyria must also be understood by the "Urites" of Livy, whom he enumerates among the allied cities that furnished ships to the praetor C. Lucretius in B. C. 171 (Liv. xliii. 4?), if the reading be correct: but it is difficult to understand how an inland town like Hyria could be one of those bound to furnish a naval contingent. The "Uritanus ager" is mentioned in the Liber Coloniarum (p. 262) among the "Civitates Provinciae Calabriae," and it therefore appears to have held the rank of an ordinary provincial town under the Roman Empire: and there is little doubt that in Pliny (iii. 11. s. 16. § 100) we should read Uria for Varia. In Ptolemy also (iii. 1. § 77) we should probably substitute Οὔριων for Οὐργίτιον, as Veretum (Οὐερετον) had been already mentioned just before.

It still retains the name of *Oria*, a considerable town situated on a hill of moderate elevation, but commanding an extensive view over all the country round. There are no ancient remains, but inscriptions have been found there in the Messapian dialect, and numerous coins, bearing the name of Oria, which, though written in Roman characters, was probably the native name of the city. (Millingen, *Numism. de l'Anc. Italie*, p. 281.)

2. (Uria, Plin.; Οὔριον, Strab.; Οὔριον, Ptol.: Τριον, Dionys. P.: *Eth.* Τριανῖνος, Urias or Urianus: *Rodi*), a city of Apulia, situated on the coast of the Adriatic N. of the promontory of Garganus. It gave to the extensive bay formed by that projecting headland with the coast of Apulia on the N., the name of URIAS SINUS. (Mel. ii. 4. § 7.) Its name is

Digitized by Google

mentioned both by Pliny and Ptolemy among the cities of the Daunian or Northern Apulians: the former, indeed, appears to place it S. of the promontory of Garganus, but this is probably only an apparent inaccuracy arising from the order of enumeration. But he afterwards notices the Hyrini (by which it is impossible that he can mean the Hyria in Calabria) in his general list of towns in the *interior* of the Second Region. There is no mode of explaining this, except by supposing it to be a simple mistake. (Plin. iii. 11. s. 16; Ptol. iii. 1. § 17.) Dionysius Periegetes also mentions Hyrium as a maritime city at the entrance of the Adriatic Sea (which he probably regarded as commencing at the promontory of Garganus), and the limit of Iapygia towards the N. (Dionys. Per. 380): hence, it is clearly of the Apulian city that he is speaking. No mention of it is found in history: and the best clue to its position is derived from Strabo, who tells us it was the first city which occurred on the N. side of Mt. Garganus, after doubling the promontory of that name. Hence, we may place it, approximately at least, on the site of *Rodi*, a small town on a projecting point or headland, about 20 miles W. of *Vieste*, and near the entrance of a salt-water lake, or lagoon, called *Lago di Varano*, a name which is very probably only a corruption of Lacus Urianus. (Romanelli, vol. ii. p. 283.)

To this city may probably be ascribed the coins with the legend ΤΡΙΑΤΙΝΩΝ, which were assigned by Millingen (*Num. de l'Italie*, p. 119) to Veretum in Calabria.

3. (*Eth.* Τρυαῖος). The existence of a third city of the name in Campania, though resting only on numismatic evidence, may be considered as well established. The coins in question, which are of silver and very numerous, have not only types peculiar to Campania, but are always found in that country, and frequently together with coins of Nola, which they so closely resemble that some numismatists are of opinion that Hyrium or Hyrina was a native name of that city. It is more probable that it was situated in its immediate neighbourhood; perhaps standing in the same relation to it that Palaeopolis did to Neapolis: but, in either case, the absence of all notice of the name in any ancient writer is very remarkable. (Millingen, *Num. de l'Anc. Ital.* p. 138; Cavedoni, *Num. Ital. Vet.* p. 31; Friedländer, *Oskische Münzen*, pp. 37, 38.) The legend ΤΡΙΝΑ is abbreviated from ΤΡΙΝΑΙΟΣ or ΤΡΙΝΑΙΩΝ: others, however, have (though much more rarely) ΤΡΙΑΝΟΣ and ΤΡΙΕΤΗΣ. [E. H. B.]

COIN OF HYRIA IN CAMPANIA.

HY'RIA (Τρία: *Eth.* Τριάτης), a Boeotian town, mentioned by Homer along with Aulis. (Hom. *Il.* ii. 496.) Hence it was placed near Aulis; but its position was quite uncertain, and some of the ancient critics identified it, though without sufficient reason, with Hysiae. Strabo placed it in the territory of Tanagra. (Strab. ix. pp. 404, 408; Steph. B. *s. v.*; Plin. iv. 7. s. 12.)

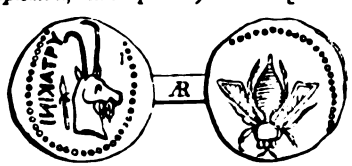
HY'RIE, a lake in Aetolia. [AETOLIA, p. 64, a.]

HYRMI'NE (Τρμίνη), a town of Elis, upon the coast, mentioned by Homer as one of the towns of the Epeii. It appears to have been regarded as one of the most ancient of the Epeian towns, since it is said to have been founded by Actor, the son of Hyrmine, who was a daughter of Epeius. In the time of Strabo the town had disappeared, but its site was marked by a rocky promontory near Cyllene, called Hormina or Hyrmina. Leake supposes that the town occupied the position of *Kastro Tornése*, on the peninsula of *Klemútzi*; but both Boblaye and Curtius, with more probability, place it further north, at the modern harbour of *Kumupéli*, where, on a projecting point of land, are some ancient ruins. (Hom. *Il.* ii. 616; Strab. viii. p. 341; Paus. v. 1. §§ 6, 11; Steph. B. *s. v.*; Plin. iv. 5. s. 6; Leake, *Morea*, vol. ii. p. 176; Boblaye, *Recherches, &c.* p. 120; Curtius, *Peloponnesos*, vol. ii. p. 33.)

HYRTACI'NA (Τρταικίνα: Τρσακίνα, Scyl. p. 18; Ἀρτάκινα, Ptol. iii. 17. § 10: *Eth.* Τρταιος, Τρτακίνιος, Steph. B.), a city of Crete, which, little as we learn of its position from Ptolemy and Stephanus of Byzantium, yet we may safely infer from the former's words that it was situated to the SE. of Polyrrhenia, and to the W. of Lappa. Scylax (*l. c.*) teaches us more respecting its site; he places it on the S. of the island, and to the S. of the Dictynnean temple of Artemis and the Pergamian district. These indications agree well with the situation of the ruins discovered by Mr. Pashley (*Trav.* vol. ii. p. 111) on a hill near the village of *Teménia*.

Numerous vestiges of polygonal masonry on the N. and W. sides, and measuring little more than half a mile in length, are still existing. On the other sides the city was precipitous. It is curious to observe the care taken by the inhabitants in defending the gateways of their city. Not only do walls project without the gate, but flanking walls are executed within, forming passages through which the enemy would have to pass before he could set foot within the city.

The coins of Hyrtacina present types similar to those of Elyros, with the retrograde epigraph ΑΤΦΤ and ΤΡΤΑΚΙΝΙΩΝ. (Rasche, vol. ii. pt. i. p. 600; Mionnet, *Descr. des Méd.* vol. ii. p. 277; Mionnet, *Supplément*, vol. iv. p. 324.) [E. B. J.]



COIN OF HYRTACINA.

HY'SIAE (Τσαί, Τσία, Steph. B. *s. v.*). 1. (*Eth.* Τσιεύς), a town of Boeotia, in the Parasopia, at the northern foot of Mt. Cithaeron, and on the high road from Thebes to Athens. It was said to have been a colony from Hyria, and to have been founded by Nycteus, father of Antiope. (Strab. ix. p. 404.) Herodotus says that both Hysiae and Oenoë were Attic demi when they were taken by the Boeotians in B. C. 507. (Herod. v. 74.) It probably, however, belonged to Plataea. (Comp. Herod. vi. 108.) Oenoë was recovered by the Athenians; but, as Mt. Cithaeron was the natural boundary between Attica and Boeotia, Hysiae continued to be a Boeotian town. Hysiae is mentioned in the operations which preceded the battle of Plataea. (Herod. ix. 15, 25.) [PLATAEA.] Hysiae was in ruins in the time of Pau-

Digitized by Google

sanias, who noticed there an unfinished temple of Apollo and a sacred well. (Paus. ix. 2. § 1.) Leake observed "a little beyond the great road at the foot of the mountain, a great quantity of loose stones in the fields, together with some traces of ancient walls, and the mouth of a well or cistern, of Hellenic construction, now filled up." This we may conclude to be the site of Hysiae. (Leake, *Northern Greece*, vol. ii. p. 327.) Hysiae is mentioned also in the following passages: Eurip. *Bacch.* 751; Thuc. iii. 24, v. 83.

2. (*Eth.* Ὑσιάτης), a town in the Argeia, on the road from Argos to Tegea, and at the foot of Mt. Parthenium. (Paus. ii. 24. § 7, viii. 6. § 4, 54. § 7; Strab. viii. p. 376.) It appears to have been destroyed by the Argives, along with Tiryns, Mycenae, and the other towns in the Argeia, after the Persian wars (Paus. viii. 27. § 1); but it was afterwards restored, and was occupied by the Argives in the Peloponnesian War as a frontier-fortress, till it was taken and destroyed a second time by the Lacedaemonians in B. C. 417. (Thuc. v. 83; Diod. xii. 81.) The defeat of the Lacedaemonians by the Argives, near Hysiae, of which Pausanias (ii. 24. § 7) speaks, is placed in B. C. 669.

The ruins of Hysiae stand on an isolated hill above the plain of *Achladokampos* (Ἀχλαδόκαμπος, from ἀχράς, ἀχλάς, "a wild pear-tree," and κάμπος, "a plain"). They consist of the remains of the acropolis, which escaped the notice of Leake. (Le Bas, *Morea*, vol. ii. p. 334; Boblaye, *Recherches*, p. 48; Ross, *Reisen im Peloponnes*, p. 147.)

HYSPIRATIS. [CAMBALA.]

HYSSUS (Ὕσσος), a small river in the east of Pontus, 180 stadia to the east of Trapezus. (Arrian, *Peripl.* p. 6.) There can be little doubt that the river is the modern *Sourmou*; for the port at its mouth, which bore the name *Hyssus* or *Hyssus portus*, was afterwards called Σουσα and Σουσάρμινα. (Anonym. *Peripl.* p. 13), and, according to Procopius (*B. G.* iv. 2). Σουσούρμινα. This port-town is mentioned by Arrian (*l. c.*) and by the Anonymus (p. 14), is called in the Tab. Peut. *Hyssi Portus*, and seems to have been a place of some importance, as it was fortified, and had the "cohors Apulorum Romanorum" for its garrison (*Notit. Imp. Or.* xl. 27). [L. S.]

HYSTOË, a town of Crete, which the Scholiast on Aratus (*Phaen.* vol. ii. p. 40, ed. Buhle) connects with the Idaean nymph Cynosura, one of the nurses of Zeus. (Hock, *Kreta*, vol. i. p. 434.) [E. B. J.]

HYTANIS or HYCTANIS, a river of Caria, mentioned by Pliny (vi. 23. s. 26), and which is said to have washed down gold. Strabo, on the authority of Onesicritus, speaks of a similar river, but does not give its name (xv. p. 726). [V.]
