

PALESTINE

INDEX GAZETTEER

Price 500 Mils

Survey of Palestine, 1948

1. MAPS USED

This Index Gazetteer is compiled from the 16 sheets of the 1/100,000 Palestine series PDR/1512/3776-91, the 1/250,000 South sheet PDR/1509/3951 for the area between the Egyptian Frontier and 35° E (Easting 150) and south of grid north 040, and from five sheets of the 1/100,000 South Levant series PDR/1522 which cover the area between 35° E and the Trans-Jordan border south of grid north 040.

2. TRANSLITERATION

Names are transliterated according to the "Rules of Transliteration.-Notice regarding Transliteration in English of Arabic names" issued by the Government of Palestine (Palestine Gazette No. 1133 of 2-Oct-41), but without using the diacritical signs of this system.

As there are many similar characters in the Arabic and Hebrew alphabets the following list of alternative letters should be consulted if a name is not found under the letter it is looked for:-

a - e	e.g.:-	Tall, Tell, ar-er, al-el
c - s - ts - z		Saghira, Tsiyon, Zion
d - dh		Dahrat
g - j		Jabal, Jisr
h - kh		Hadera, Khudeira
k - q		Karm, Qevutsa, Qibbut

3. GRID REFERENCES

Definite points such as villages, trig.points etc. have been given the reference of the kilometre square in which they are situated. In all other cases the reference is to the square in which the first letter of the name is printed.

Names of rivers and wadis which appear more than once have been treated as follows:- The map reference of the name which is nearest the source and that of the one farthest downstream have both been listed. No reference has been made to intermediate names. When a river or wadi appears on more than one sheet the sheet numbers are shown in parenthesis in the order of the flow of the river.

4. ALPHABETICAL ARRANGEMENT

As many names in Palestine are preceded by a generic term such as Khirba, Tall etc. and as the use of these terms is not always consistent all such names have been listed twice to facilitate the use of the gazetteer. They appear once in the form they are printed on the map and a second time for the main part of the name. To indicate double listing these names are preceded by an asterisk *

E.g.:- * Kh. Sharati
 * Sharati, Kh.

5. ABBREVIATIONS

Note:-

Cirque

a natural amphitheatre.

Topographically a cirque consists of a lower central area surrounded by steep cliffs facing the central depression.

The origin is geological and results from

the erosion of the central or highest portions of anticlines; that is to say, regions where the geological strata have been bent upwards in the form of an arch. There are many such in Southern Palestine. Khirba means either an abandoned or a temporary site of habitation. This term may be used to describe anything from a few scattered stones to permanently inhabited villages and appears several hundred times, on Palestine maps. An attempt has been made to classify the more important.

Locality name

used to describe a small area which is not related to a particular topographical feature.

Ruin

in contrast to khirba is a ruin of a particular building, part of which at least remains standing.

Tall

is a wholly or partly artificial mound; often the site of ancient towns or villages.

Tomb

refers to ordinary tombs as well as to "Weli's" i.e. tombs of Sheikh's, usually small, square, cupola roofed buildings.

Wadi

is a watercourse, in which water flows periodically, during the rains.

6. APPENDIX

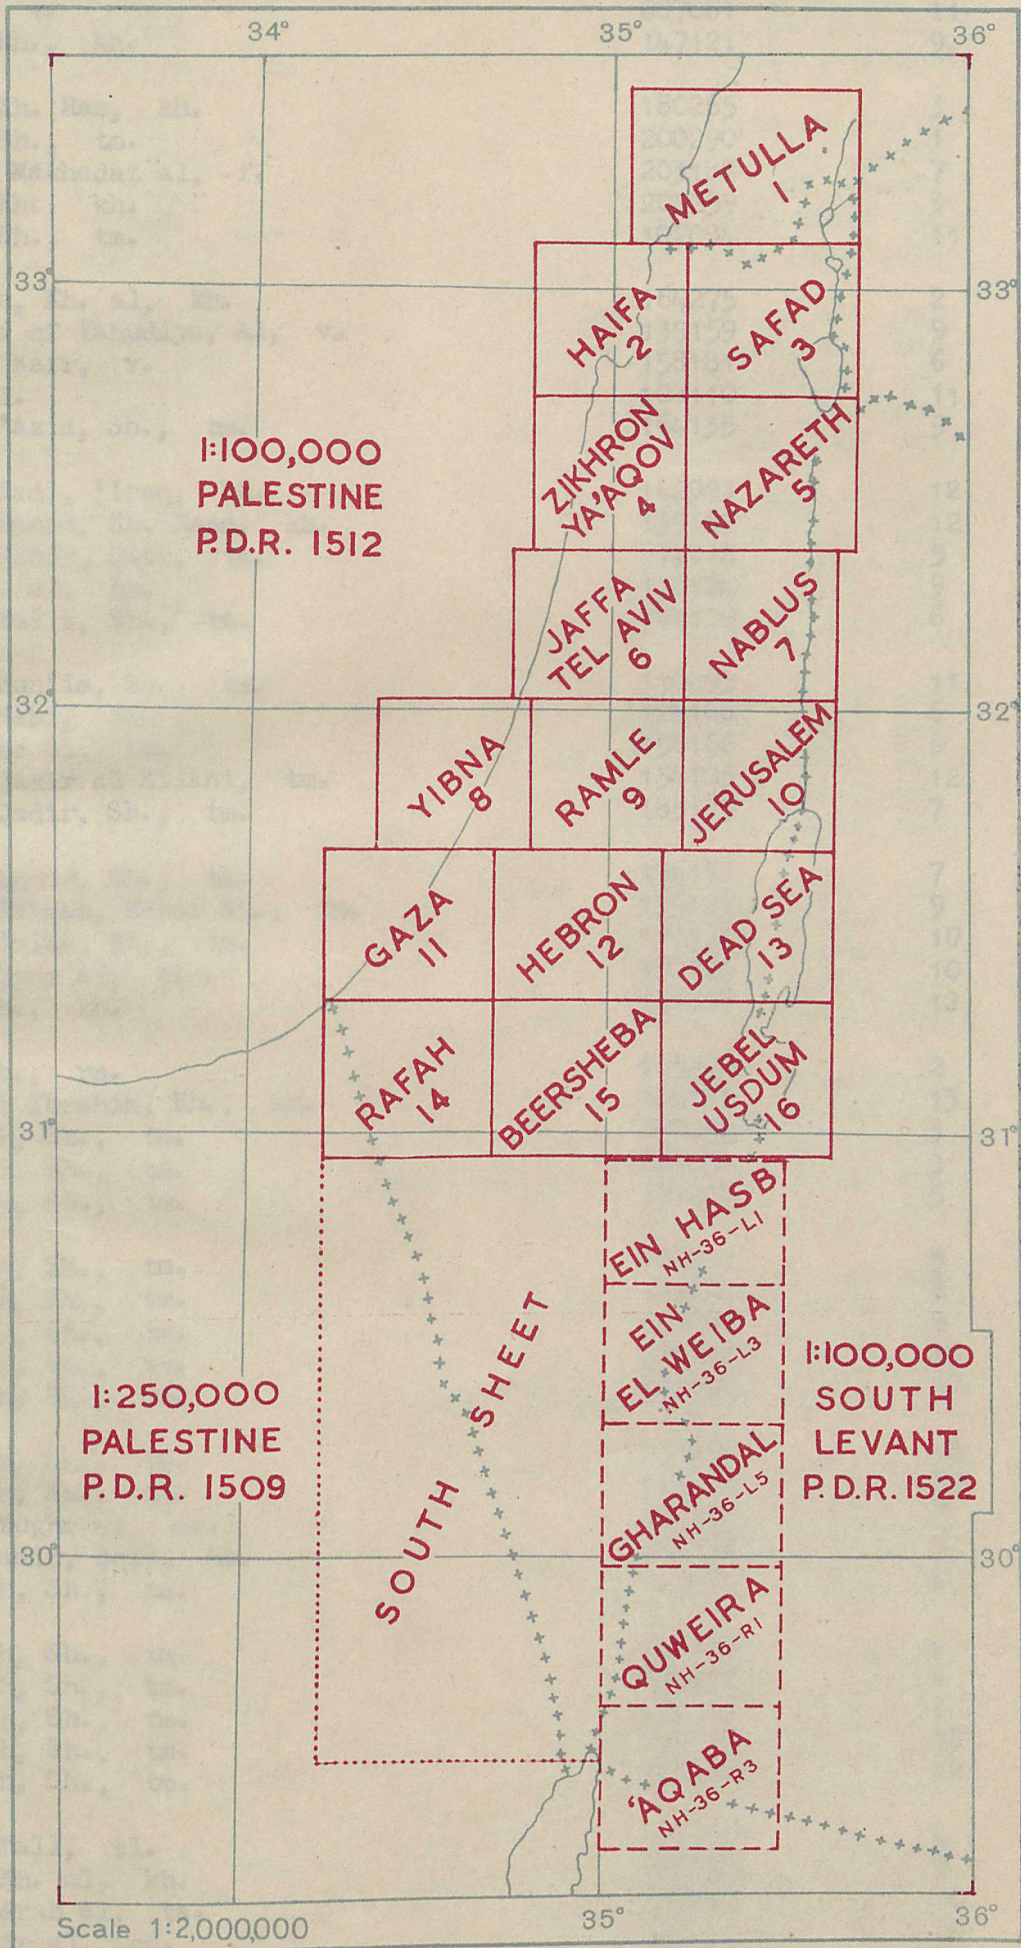

A short Gazetteer Index of Palestine 1/250.000 Southern sheet appears separately at the end of this volume.
