**Green Goods** Smilax is one of our specialties. We have it when it isn't to be had elsewhere, as was the case for a good while this spring. Also Asparagus, Sprengeri, etc.

**Ferns** Good Ferns are scarce. We are about the only unfailing source of supply in this market. True Berkshire stock.

Considerable quantities still in cold storage. Per 100, 25c; per 1000, \$2.50. Enough for everybody. Lay in a supply for Decoration Day now.

We can at all times supply everything which is to be had in the Chicago market. We keep enlarging our facilities just a step ahead of the increase in our business and are at all times ready to meet new demands upon us. Write, telegraph or, better yet, telephone.

CHICAGO, ILL.

St. Louis.

MARKET STILL OVERLOADED WITH SECOND RATE MATERIAL.—ROSES AND CARNATIONS PRACTICALLY IMMOVABLE.—PÆONIAS DO FAIRLY WELL.—A VARIETY OF NOTES AND JOTTINGS.

The market is still glutted as badly as it was last week, especially in roses and carnations, they being sold at any price they will bring and a large amount dumped. Sweet peas are also quite plentiful but as yet have not become unmanageable, though there are a few more than are needed. Pæonias are selling quite lively at from \$1.50 to \$3 per hundred and are about the only item sold out clean. Some cornflowers are coming in and bring 25 cents per hundred. The stock that is sent in is principally of second grade and lower.

The fern house of the Missouri Botanical garden is at present pretty well torn up as they are transplanting the whole house and planting cycads in this range. The century plant in bloom is attracting quite a number of visitors to the Garden and things are looking well. Most of the transplanting has been done. Shrubs are well in flower.

Geo. M. Kellogg, of Pleasant Hill, Mo., has been in the city a few days and reports that out his way things are looking fine. He has put up a number of new Beauty houses and is going to take good care that thrips do not get ahead of him. He lost a large portion of his crop last year on account of this pest.

Mr. Scheidegger, of Kirkwood, was in the city on Sunday. He is sending in some very fine Katherine Tracy peas, and several other varieties that are well grown.

Fred. Ammann, at Edwardsville, has his new Beauty house finished and we hope that he will have better luck this year than last. R. J. M.

FREEPORT, ILL.—John Bauscher, Jr., is cutting large quantities of carnations and shipping many to out of town buyers and to the Chicago market. The other day 15,000 went to Chicago in one shipment.

a full line of all the leaders. Write for prices.

Providence, R. I.

TRADE ON THE DECLINE FOR THE FIRST TIME THIS YEAR.—BEDDING PLANT TRADE THE PRINCIPAL DEPENDENCE.—PERSONAL AND TRADE DOINGS.

The past week has been the duller since the first of the year, all hands reporting a noticeable slackening in the call for design work. The weather has been cool and clear, just right for planting bedding stock. Cut flower prices rule as follows: Carnations, \$1.50 per hundred; roses, \$3 to \$6; lilies, \$6 to \$8. Small white flowers are scarce, and ferns are hard to obtain of good quality. It looks as though there will be a good supply of flowers for Memorial day, with a shortage in all kinds of green stock. Several florists are talking of abandoning the old-time 50-cent bouquet and trying to obtain a better price for their hard efforts at that time.

S. J. Reuter, of Westerly, exhibited some fine examples of high grade carnations at the recent meeting of the local Florists' Club, his best white being the Mary Wood, grown to perfection.

The Budlongs are making good progress with their greenhouse building and promise to be a factor in next year's production.

Cushing, of Quidneik, has fallen off on the quantity of his carnation cut. He has cut very heavily up to the present time.

The quality of pinks is slightly on the decline, although appearances promise a good cut for a full month yet.

M. Sweeney is using a large shipment of geraniums in his bedding work just now.

Mr. Hazard now devotes most of his time to his downtown place.

T. F. Keller's showing of metal designs is worthy of mention. M. M.

GREENSBORO, N. C.—Peabody Park at the Normal and Industrial College, for which G. F. Peabody donated the sum of \$10,000, is to be laid out and beautified and when completed will be one of the most beautiful recreation spots in the south.

TRADE FALLING OFF IN THE STORES AND STOCK ACCUMULATES IN GROWERS' HANDS.—CARNATIONS OVERPLENTIFUL FOR THE FIRST TIME THIS SEASON.—NOTES OF THE STATE OF TRADE AND OTHER MATTERS.

Retailers have noticed a diminution in the figures on the cash register the past week and with the growers stock is accumulating rapidly. It is not the quality that keeps it from selling, for stock is exceptionally fine and, contrary to reports from other localities, our Brides and Bridesmaids were never better. Beauties are not so good, as many seem affected with the blight and others are of very poor color, but Meteor, Perle and Morgan are quite up to the mark. Liberty, if not a complete failure with us the past season, was nearly so, and very seldom are they seen. A few good Hoste and occasionally Golden Gate make their appearance. Carnation growers report the same state of oversupply, for the first time since last season, consequently some very good ones are seen. The most remarkable are Prosperity, which are beautifully colored, and with good strong stems, a failing of this variety being weak stems. Lorna is also doing well, as are most other varieties at present.

The recent heavy frost damaged the early crop of tulips, but later varieties are commencing to come in and are in good shape. Previous experience with this same element kept the young carnation plants from a nip so badly felt in the northern part.

From present indications there will be a palm slaughter in a few weeks. Most firms have bought heavily; in fact, they have arrived by the car-load and no doubt the department stores will derive the benefit.

Wholesale plantmen report good sales for the early season. H. G. D.

HOLYOKE, MASS.—The horticultural society is considering the advisability of abandoning its June rose show because of lack of public appreciation.

NEW DURHAM, N. J.—Jerome W. Bolmer died in the hospital May 15, from blood poisoning, the result of a slight cut on his thumb two months ago. It is presumed that the poison of an insecticide solution must have entered his system through the wound. He was 30 years old and leaves a wife and two children, one of them born last month.

# "Indispensable"

This is the only word which describes the American Florist Company's Directory, just out. This book, 418 pages of facts tersely told, is issued annually and is an aid to business and money making which no wholesaler or traveling salesman can afford to be without. It contains the name of every Florist, Nurseryman and Seedsman, arranged both by states and towns and alphabetically; and new lists of Gardeners or Superintendents of private estates, Experiment Station Horticulturists, Landscape Architects and Horticultural Supply Concerns. It will save many times its cost by enabling you to cover America with your catalogue and at the same time waste no printed matter or postage on dead names.

HOT WEATHER CUTS A HOLE IN DEMAND AND RECEIPTS PILE UP.—SOME GOOD STOCK IN EVIDENCE.—BIG BUSINESS IN BEDDING PLANTS.—NO SHOW THIS SPRING.—NOTES.

The excessively warm weather has very suddenly cut off demand at the moment supplies increased and the craft is dependent upon orders for several large wedding decorations and a number of luncheons and dinners which were booked in advance. In roses the Kaiserin leads; they are magnificent. Brides and Bridesmaids are still deteriorating and some of this stock is mildewed. Home grown Liberties are very fine and Perle and Jacqueminot are also very good. Genevieve Lord, Hector, Mrs. Bradt, Prosperity, Flora Hill and Mrs. Joost are the leaders in carnations. Lily of the valley is only fair. Mignonette and asparagus is good and quite plentiful.

The Pittsburg and Allegheny Florists' and Gardeners' Club held a special meeting, May 20, to pass upon the advisability of having a public flower show. After much discussion it was decided not to have one.

The sale of bedding plants has been enormous. Shipping orders alone will sum up to an extraordinary figure. Pittsburg is the base of supplies for bedding plants within a radius of seventy-five miles.

The shortage of moonvines last year caused the various florists to prepare for an increased demand this spring, but it again looks as though a shortage is inevitable.

The catastrophe at Sheridan, a suburb of Pittsburg, caused by an explosion of naphtha, cost thirty-three lives and created unusual activity in funeral work.

W. C. Beckert reports that his business has shown an unusual increase over last year.

Blind Brothers are sending in some remarkably fine geraniums.

E. L. M.

RANDOLPH, VT.—F. Burnell, who has been in the employ of H. M. Totman, has bought an interest in the concern and the firm name will be Burnell & Totman hereafter.

# Another Victory For

# NEPHROLEPIS PIERSONI

We were also Awarded  
For this Fern

# THE GOLD MEDAL

Of the Massachusetts Horticultural Society at its March Meeting.

These substantial awards testify to the sterling merit of *Nephrolepis Piersoni*. The plant is as easy to grow and propagate as the well-known Boston Fern, of which it is a sport, and which it will assuredly supplant in popular favor. Admired wherever shown. Will be introduced to the Trade next Spring.

Detroit.

TRADE GOOD ALL ALONG THE LINE.—FUNERAL WORK USES UP LARGE QUANTITIES OF STOCK.—BEAUTIES IN GOOD DEMAND.—CLUB ATTENDS A LECTURE.—NOTES.

The present time is one of great activity in florists' circles. Trade in all branches is good and in the plant line, including bedding sorts, it is daily improving as the warmer days suggest it. Last week the funerals of many persons of note required the use of all flowers obtainable here and many were shipped in from other points. The local supply, because of the whimsical weather, unseasonable cold alternating with excessively warm spells, had a baneful effect upon stock, both in quantity and quality. The call for American Beauties was considerable and all good stock is well used up. The only appearance of anything moving slowly is in carnations of the cheaper grades; an abundance of lilacs is now to be seen and they, too, sell fairly well, as also outdoor valley.

There was no meeting of the Florists' Club this week, but under the auspices of the club, Rev. Lee McCollister gave an illustrated lecture Tuesday evening in Cowie Hall, on "The Alps and Italian Lakes." About twenty-five members with their families and friends attended and were well pleased with the lecture, which was enlivened by the music of the Amphion orchestra.

C. W. Asman, brother of Geo. Asman, of Asman & Dunn, has opened a retail store at Port Huron, Mich.

John Carey is building a house 16x120 to be used for chrysanthemums.

Visitors: W. H. Watson, Lapeer, Mich.; A. Ringier, Chicago. J. F. S.

SHORB, CAL.—Business has been very good with all the florists and all are happy, but none are happier than Alfred Roeder, at whose home a strong baby boy arrived a few months ago.

TOLEDO, O.—Geo. A. Heintz has been having a sale of bedding plants. He advertised in the local papers, stating what the goods were, that the terms were "5 cents a plant, cash, and not delivered," and the buyers fairly overran the place on the days of the sale.

# Grafted Roses

LIBERTY 3 1-2-inch pots, \$18.00 per 100.

BRIDESMAID, BRIDE, GOLDEN GATE, KAISERIN, } 3 1/2-inch pots, \$15.00 per 100.

Our roses are grown with the greatest care and are fine bushy plants ready for immediate planting. We do not think better roses can be grown.

VERBENAS—Choice varieties in bud and bloom, 3-in. pots \$3.00 per 100; 2 1/2-in. pots \$2.50 per 100; \$20.00 per 1000.

GERANIUMS—Finest bedding varieties in bud and bloom, 3 1/2-in. pots \$6.00 per 100.

CUT FLOWER MARKET DEMORALIZED BY WARM WEATHER.—STOCK PLENTIFUL AND DEMAND LIGHT.—FINE SHOW OF SPRING FLOWERS IN THE PARKS—GRAHAMS HAVE BIG STOCK.—TROUBLE WITH AURATUM LILIES.

The warm weather for the past week has had a demoralizing effect on the cut flower market, the supply exceeding the demand about tenfold. Prime stock could be bought on the street for a mere trifle, 25 cents per dozen being the highest price asked for a good grade of roses, and good carnations bring only 10 cents a dozen. Lilacs by the wagonload are to be had. Shrubbery blooms do not take well except for decorations. The parks are beginning to put on their gala spring attire. Some beautiful varieties of pyrus and prunus are to be seen. The splendid condition of the parks reflect great credit upon Superintendent Kegg and his able assistant, M. Hovarth. Mr. Kegg, in his annual report to the Director of Public Works, earnestly urged the necessity of erecting a range of greenhouses in one of the parks for the enjoyment of the people and to grow the necessary bedding plants for use in the parks. Owing to a succession of rain storms the large beds of tulips in the public square did not look as well as in former years.

A. Graham & Son have as fine a lot of Crimson Ramblers in pots outdoors in a frame as one would wish to see. They will just be right for Memorial day. Their stock of bedding plants is in fine condition, especially geraniums. There is a red variety grown here, I think it is called De Brasse, which is a decided improvement on Heteranthe. The color is brighter and the truss almost double the size of the last named variety. Mr. Graham claims it is an excellent bedder. Nutt is grown by the thousands and is considered the best of its color. Liliun speciosum, album and rubrum are looking fine, but the auratums are the same here as elsewhere, a lot of mongrel seedlings not worth bench room. This auratum business is worse than the longi-florum fizzle. Something ought to be done to secure good bulbs true to name. Bate Brothers' new house is to be 20x300 feet, for roses, and will make a fine addition to their establishment.

ECHO.

STOCK STILL VERY ABUNDANT.—RETAIL PRICES FAIRLY WELL MAINTAINED.—A SUIT FOR DAMAGES.—NEW PARK SUPERINTENDENT.—PERSONAL AND TRADE NOTES.

Continued fair weather has not diminished the cut of roses and carnations and has increased the supply of outdoor stock. Tulips are fine. Parrot tulips were in May 20 for the first time. A little valley has appeared but in no quantity as yet. Pansies, sweet peas and swainsona are in good supply and having ready sale. Roses of all qualities and in abundance are to be found in all stores. The better grades of carnations still bring 75 cents and \$1 per dozen; other kinds at all prices. Beauties still sell well and at from \$6 to \$9 for good stock.

All the florists have been watching with interest a suit for damages against S. A. Anderson. The mother of one of his former employes fell through a trap door in the rear of his store and \$10,000 damages were asked. The case has just been tried in the Supreme Court, before a jury, where a verdict was given for \$50, merely enough to cover court costs. From the evidence a "no cause for action" verdict was expected.

The park commissioners at their last meeting removed Superintendent John C. Graves and appointed the auditor of the board, J. L. Brothers, superintendent. While Mr. Brothers is a very fine gentleman and has been in the park department for eleven years, we are no better off than before as to having a practical man at the head of affairs.

Jerry Brookins, of Orchard Park, has fine pansies and sweet peas. "Frank," who has the stand in the Mooney building, has a big stock of carnations daily, but the sun withers them very fast, there being no shade in that doorway.

Next week we will be busy with Memorial day stock, for it seems as if new life were being instilled in the buyers and a greater interest displayed in getting flowers for that day than has been shown for several years past.

W. F. Bullock & Company, who succeeded Adams, have made several alterations in the store.

S. A. Anderson has gone to New York and Cromwell, Conn.

Professor Cowell is busy at South Park.

BISON.

Sewickley, Pa.

RAILROAD GARDENERS IN THE MOST OF THEIR BUSY SEASON.—MANY PLANTS REQUIRED.

During the present month R. W. Hutchinson, florist of the Northwest system, Pennsylvania lines, is one of the busiest men connected with the road. He is also the first official bearing this title on the Pennsylvania system. The demand for plant decorations for the beautifying of railway stations has grown so rapidly that Mr. Hutchinson, whose jurisdiction extends from Allegheny to Chicago, keeps a large force of employes constantly at work. Recently he stated that his chief work at present is the planting of vines which will act as a screen for handcar houses and watch boxes. There are 200 places along the Ft. Wayne and the Cleveland & Pittsburg to be thus provided, implying the use of 2,500 plants, chiefly honeysuckle, clematis and Boston ivy. These are trained to grow upon wire netting, and during the early summer hundreds of comparatively unsightly buildings will be hidden in a mass of flowers and foliage. The railway greenhouses which supply much of the material used by Mr. Hutchinson are at Sewickley. The demand for flowers for dining cars is another feature of this interesting branch of railway management and equipment. The first bit of railway property hereabout to receive such attention was the office of Stationmaster Cole, Allegheny, a place which was last week obliterated to make room for the elevated track system. The amount of flowers, sodding, plants, trees and shrubbery devoted to improving the appearance of the Pennsylvania railroad property east and west of Pittsburg would equip a good-sized park.

NORTH WALES, PA.—D. L. German has sold his greenhouse property on Pennsylvania avenue to John Holt, of Germantown, for \$2,800.

PROVIDENCE, R. I.—The Florists' and Gardeners' Club of Rhode Island held an exhibition of carnations and roses on May 8 which was attended by a large number of visitors. Certificates of merit were awarded to John Macrae, S. J. Reuter and C. Warburton in several classes of carnations, to Edward Clark and S. J. Reuter for roses, and to James Hockey for a handsome seedling geranium called Sensation.

NOT every man that runs a mill is an expert judge of lumber. Fewer still are familiar with the peculiar requirements of greenhouse construction.

We have made it a special study, know exactly what to furnish. You are welcome to the benefits of our wide experience. If you contemplate building, write us.

and the principles on which it is constructed have stood the test of years. If you want a reliable heater, there are none as good as the WEATHERED. Endorsed by hundreds of Florists. Send for descriptive list.

**Thos. W. Weathered's Sons,**  
 56 MARION ST., NEW YORK CITY.

**THE KINNEY PUMP.**  
 For applying Liquid Manure it has no equal!  
 Sent prepaid for \$2.00.  
 Address **The HOSE CONNECTION CO.** KINGSTON, R. I.  
*Please mention the American Florist when writing.*

### SPECIAL DECORATION DAY RATES

over the Nickel Plate Road, at one fare for the round-trip, within a radius of 150 miles from starting point. Tickets on sale May 29th and 30th, good returning from destination to and including May 31st, 1902. Three through daily trains in each direction Chicago, Cleveland, Buffalo, New York, Boston and New England points. Every facility offered for the comfort of the traveling public. Fast time and low rates. Meals in dining cars on a la carte plan. For particulars, write or call on John Y. Calahan, General Agent, 111 Adams St., Chicago, Phone Central 2057.

# STEEL vs. CAST IRON

The day of the sectional hot water heater is past. It has given way before the improved

## KROESCHELL GREENHOUSE BOILER.

Kroeschell Hot Water Greenhouse Boilers are made of the same steel as is used in building the best high pressure steam boilers. ❀ ❀ ❀ ❀ ❀

### NO DANGER OF BURSTED SECTIONS.

If you need a boiler this year, write us about it NOW. These are not stock boilers. Each one is made to order.

**KROESCHELL BROS. CO.** 45 Erie St., CHICAGO.

The Highest award at the New York Carnation Show was given to a man who has forty-three (43) of our Automatic Ventilators. Our Ventilators are at work in the Central Park Conservatories, New York.

Prevents Mildew  
 Operates to perfection in catchy weather.  
 Commercial growers use them largely.  
 The Automatic Ventilator does its own thinking.

Saves all labor.  
 Improves the growth of plants.  
 Especially good for Roses.  
 Will last a lifetime and soon pay for themselves.  
 The Automatic Ventilator ventilates as necessity requires.

## THE CHADBORN PATENT AUTOMATIC VENTILATOR

For Greenhouses, and also Temperature Regulator for Radiators.

CHADBORN MFG. CO., NEWBURG, N. Y. BUFFALO, N. Y., March 28, 1902.  
*Gentlemen:*—Your Automatic Ventilator was installed in one of my houses in January. It has answered every purpose for which it is designed. In a large establishment it must be a great saving of labor; and it does its work accurately. Wishing you the success you deserve, I am  
 Very truly yours, WILLIAM SCOTT.

Manufactured by **THE CHADBORN MFG. CO.,** Broadway and High Streets, Newburg, N. Y.

Our Illustrated Catalogue, Prices, Etc., is yours for the asking.

WE VENTILATED THE NORTH CONSERVATORY AT THE PAN-AMERICAN EXPOSITION AND TOOK THE GOLD MEDAL.

### Notes on Plant Growing.

The spring clean-up is now in progress in most establishments, and it means a great deal of work and frequently quite a lot of expense, for many repairs are generally found necessary each year, and while fixing up the stock and refilling the houses these repairs may be most conveniently done.

The bedding out business is about over for the season, Memorial day marking the conclusion of that branch of the trade in many of our cities, though those having a seaside trade or catering to the mountain resorts are frequently compelled to defer the planting out of tender stock until quite late.

Plants of hardy constitution, like geraniums, carnations, verbenas and hardy roses are most satisfactory when planted out reasonably early, but it is an unwise plan to put out tender foliage plants too soon, for it generally results in a severe check and loss of foliage, this applying especially to such plants as crotons, ficus and pandanus, all of which are useful for foliage bedding under proper conditions. These proper conditions have been frequently noted before, but for the benefit of new readers it may be in order to refer to them again, as follows:

The first condition to be observed in the use of tender foliage plants outdoors is that of having strong and well-rooted plants and then giving them some little preparation for the change by gradually hardening them off, giving plenty of ventilation while the plants are still in the greenhouse and then moving them out to a frame or pit in which they may be protected by sahes for a few nights before planting out in the open ground.

By working after this method we seldom have any injury or check, even to such tender subjects as the crotons, unless there should happen to be some very cold and wet weather during June, a state of affairs that will sometimes occur even in such a favored locality for torrid waves as our good city of Philadelphia.

Another condition to be observed in outdoor decoration with tender foliage plants is that of thorough preparation of the beds in which they are to be planted, this including deep digging and a plentiful supply of short, well-rotted stable manure.

Mixed beds of foliage plants may be made a most interesting feature if one has the stock to use, and among the plants adapted for such use are some of the tougher palms, for example, Cham-

ærops excelsa, Corypha Australis, Rhaps flabelliformis and some of the sabals, also some of the aralias, A. pulcher being among the most attractive of the large growing species, and having very large digitate leaves that are bright green and glossy, and also tough enough to stand the wind without injury.

Dracæna indivisa and D. Australis, also D. congesta, are useful plants for this purpose, and to give color to the arrangement some of the dark-leaved forms of ricinus, or castor oil plant, a few plants of Black Beauty canna, some crotons, acalypha and amarantus may be added, while Ficus elastica and Pandanus Veitchii may also be included with good effect.

And while considering the subject of outdoor planting we may remark that an example of this sort of bedding should find a place about the florists' establishment in order to encourage the public taste in these matters, for an object lesson is one of the most effective methods of teaching.

Every progressive florist has, of course, selected his stock plants of the various species he uses before the best of the stock is sold, these stock plants being properly labeled before being planted out, so that there may be no question as to the variety and color of the geraniums, for example, when cuttings are taken for the stock of the following season. Without some precautions of this character are taken there is likely to be some difficulty in stocking up for the following season, and it is far from satisfactory to depend on getting cuttings of some favorite variety from a charitable neighbor.

Various flowering plants to cut from during the summer should also be remembered, for there are times when the stock of indoor flowers runs low and is also of very indifferent quality; further, the cost of production being such a small item with these outdoor flowers, they may be used quite liberally when occasion offers. Some tea roses should be included among those that are planted for outdoor cutting, and by keeping them well cultivated and giving a mulching of light manure, or even of grass clippings from the lawn mower, some nice buds may be cut each morning.

The old bouvardias that have been in cut during the past winter may also be put to use outdoors in the summer, and if cut back moderately at the time they are planted out they will soon start away and give a great quantity of good flowers. The best way to make business dur-

ing dull portions of the year is to have something of better quality than the general run, and also to keep a sufficient variety whether it be of flowers or plants to suit the market.

But the outdoor department is not the only one demanding attention just now, for the houses are to be emptied and thoroughly cleaned and repaired if one desires the best results. It is taken for granted that the not uncommon custom at one time of making the space beneath the benches in the greenhouses a depository for all kinds of rubbish in the form of dead plants, broken pots and all sorts of waste material, is rapidly becoming obsolete, but, even so, there may be some decayed matter that finds its way under the benches and the sooner this harbor for vermin is removed the better it is for all concerned.

The fumigating of the empty houses with sulphur or hydrocyanic acid gas is also good, but must not be turned over to inexperienced or careless hands, else serious injury may result either to the operator or to plants in adjoining structures. It should always be borne in mind that hydrocyanic acid is one of the most deadly poisons known to science, and that to draw a full breath of this gas will usually result in death within five minutes, so it will be readily understood that this is not a substance for the children to play with.

But even if fumigation may not be conveniently practiced, a good coat of fresh whitewash on all woodwork of benches, posts and side walls will go a good way toward purifying the atmosphere and will also dispose of various insects. If a good force of water is available the remaining woodwork should be thoroughly washed with the hose.

No time should now be lost in getting to work at the decorative stock that may be kept over and also in attending to the needs of the young stock that is being grown on. It is a safe rule in handling large palms that their roots do not need pruning at any time unless it may be in the case of a plant that from some accident or on account of disease has become in bad condition at the root, and in such a case the removal of the diseased portions would be an advantage.

It sometimes becomes necessary to re-pot these large plants and to return them to the same size of pot or tub in which they have been growing, and the best way to manage this is by washing out the roots. A convenient method for this operation is to lead a hose outdoors, then fasten the nozzle in such a position as to be handy as to height and direction, and with a good pressure of water all the soil may be washed out from the roots without any injury to the latter. Having washed the roots out, no time should be lost in repotting, for should the roots be allowed to dry out by being exposed to the air for any length of time the plant would be likely to suffer. Repot the palms firmly, then water well and place them in a shaded greenhouse with a moist atmosphere, and in a few weeks some benefit should be apparent, and by next October the plants so treated and properly cared for in the interval should be greatly improved.

During the winter the decorator has but little time for cleaning plants, and in consequence some of the palms in question are liable to furnish support to quite an entomological collection by spring and the removal of these insects should be proceeded with vigorously at this season in order to make the plants presentable for the following winter. A

thorough cleaning just before the plants are repotted is a good start, but afterward they should be looked over from time to time while the work is slack, remembering that there is a special outbreak of insects in plant houses about twice a year, the first crop usually appearing in May and the second in August or September. W. H. TAPLIN.

#### English Method of Growing Poinsettias.

Few plants are more useful for winter decoration than *Poinsettia pulcherrima*. It does not need any words of mine in its praise, and in referring to it I shall confine my remarks to describing the method by which plants may be grown from six to fifteen inches high, instead of from two to three feet, as generally seen,

THE LATE THOMAS YOUNG.  
(See page 689.)

writes a correspondent of the *Gardeners' Magazine*. I consider their value for decorations is much less when they are above fifteen inches high than when below that height. A few taller examples may be useful where extensive groups have to be made, but for general purposes the dwarfer plants are preferable.

Most of the old plants will by this time (May 3) be showing signs of breaking, and when the new growths are fairly started they should be shaken out and repotted in a good compost. This should consist of equal parts of fibrous loam and leaf soil, well mixed together, with a little bone meal and coarse silver sand. Cut the shoots back, leaving not more than two sound eyes to each. After potting place them in a brisk, moist house, exposed to full sunshine, where the night temperature does not fall below 60°. They will require little water until the growth is making considerable progress. Grown in this way poinsettias will make strong, hard growths that will be of the highest value for the increase of stock.

The third week in July the first batch of cuttings should be taken. Remove the strongest shoots with three or four leaves, insert them singly in 3-inch pots, using a mixture consisting of two-thirds leaf soil and one-third loam and plenty of silver sand. Plunge the pots in a brisk bottom heat and keep the propagating case quite close by day, but admit air at night to prevent the leaves from damp-

ing. In about sixteen days they will be well rooted and should be gradually hardened off. Then shift them into 5-inch pots, using a compost prepared as I have advised for the old stools. When the roots are running freely in the compost reduce the temperature to that of the greenhouse, and during the time they are in the cool house it will be necessary to use great discretion as regards watering. The roots are made so quickly that if the plants are over-watered they are liable to decay. As soon as they have become well established they should be placed close to the glass and grown with but little, if any, shading. When the bracts begin to be developed they must be returned to the warmer and moister house, when an occasional watering with weak liquid manure will be found beneficial. On no account should liquid be used before the bracts are seen.

I will return to the old plants from which the earliest cuttings were taken. About the end of August some good side cuttings can be had. These can be struck singly, using in this case 3-inch pots; after they are rooted harden off, but let them remain in the pots they were struck in. This will give some most useful heads of bracts. If this principle is followed out, the result will be most gratifying and instead of the plants being three and four feet high they will be about six inches in height. The late struck side shoots will produce heads of bracts from eight to ten inches in diameter without being put in pots exceeding three inches in diameter. Those in 5-inch pots will range from twelve to fifteen inches high, with leaves to the rim of the pot, and carrying heads of bracts from twelve to eighteen inches in diameter.

Few plants can be used to more advantage in decoration, either on tables or for rooms generally, especially during the Christmas festivities. A very fine effect can be made by shaking out some of the plants and arranging them in a vase with Roman hyacinths. Although many valuable plants have been introduced of recent years not one really surpasses *Poinsettia pulcherrima* for decorative purposes during the winter season.

## CHRYSANTHEMUMS.

### BENCHING YOUNG STOCK.

Anyone who expects his plants to produce high grade blooms, whether for exhibition or commercial purposes, will now have to attend strictly to business and get them planted into their permanent quarters as soon as possible. The young stock should be well established in the pots, clean and in vigorous growth. Any plants not in this condition, through having been neglected and which have become hard or stunted, will not do. It will be far better to throw them out, at the expense of having to wait a couple of weeks for a fresh lot to take their place.

The man who engineers the planting of the house will need to use his brains to guard against lots of trouble later on by seeing that each variety, according to the height it grows, is given enough head room for its proper development. All of the varieties classed as dwarf growers will need at least four feet of head room when planted at this time and given proper treatment afterwards. The necessary allowance should, therefore, be made accordingly. It also is a good plan to plant varieties of a uniform height of growth on benches by themselves; they do much better, besides enabling the grower to handle them easier, and it

adds greatly to the attractiveness of the house.

There is another important point that must not be lost sight of; that is to plant the early varieties, mid-season and late, in separate places, so that they can be given their special treatment. Among the most popular varieties there are Col. D. Appleton, Vivian-Morel, Mrs. Henry Robinson, Major Bonnaffon and Timothy Eaton, which can be grown on the same bench. Another lot can be made up of Golden Wedding, Mrs. Perrin, Nivens, Pennsylvania and Mayflower. These are all tall growers and need plenty of head room. It is also a good scheme to plant any new varieties that you are not acquainted with on a bench by themselves, giving them plenty of space in which to show their character.

For a compost use a good live soil of firm texture, to which add one part in four of well rotted cow manure. When in the benches, make as firm as possible. If the benches are the usual six inches deep, fill them well up; the plants will need it before the season is over. The distance apart to set the plants must be governed by the vigor of the variety, but it is well to bear in mind that a little extra room makes a big difference in the quality of the blooms. Do not bench any plants when they are in a dry state and after planting water only directly around the plants until they commence to root out, also syringe frequently for a few days to prevent wilting.

C. W. JOHNSON.

## CARNATIONS.

### THE EMPIRE STATE.

The accompanying illustration is from a very handsome photograph of a vase of Empire State, a seedling now in its fourth year with L. E. Marquisee, Syracuse, N. Y. In speaking of it Mr. Marquisee says:

"It is a pure white of beautiful form, very full and double, with serrated edges, and possesses an exceptionally strong clove fragrance. In size it will easily average three and one-half inches in diameter and often four inches. Toward the end of May, without having been disbudded, they measure three inches. It has unusual substance and is a remarkably good keeper. Its calyx has the correct form and measures seven-eighths to an inch in diameter. It has a strong stem which properly supports the flower. It is without exception by far the strongest and most robust grower I have ever seen. It has the ideal habit, produces no grass, but a constant succession of strong flowering shoots. It is therefore a free and continuous bloomer."

It was awarded a certificate of merit by the American Carnation Society and has been certificated wherever shown.

### TEMPERATURES FOR VARIOUS VARIETIES.

ED. AM. FLORIST:—Please let me know what temperatures are required for the following carnations: Bradt, Daybreak, Crane, Flora Hill, Norway, Prosperity, Joost, Jubilee, Roosevelt and Marquis. How much nourishment do they require?

J. G.

It is almost impossible to answer this question intelligently as the difference in soils makes so much difference in the line of treatment needed that to recommend any certain line might be the opposite of what is required. In general 50° to 55° at night is a comparatively safe temperature to give most carnations, with 10°

L. E. MARQUISEE'S WHITE SEEDLING CARNATION, EMPIRE STATE.

higher during the day. When it comes to the nourishment required no one can give any advice unless he is on the ground and sets them growing. The safest method is to make the soil moderately rich with well rotted cow manure and then during the winter the grower can add any other fertilizer that the plants may need, being very careful if any prepared fertilizer is used not to give them too much, as he can easily add more if needed, but once the soil is made too rich it is almost impossible to get it in the proper condition for good results.

ALBERT M. HERR.

### THE SEASON'S SUCCESSES.

We have heard from Mr. Herr in regard to the value of the various carnations as grown in his locality, and acting on his suggestion I will endeavor to state the good and bad points of the different varieties as grown for the New York and Boston markets.

White Cloud will now have to fall out of the line of whites. It is too late in coming in flower in the fall, and when the hot days come it soon loses its size and form.

Queen Louise has proven itself to be a valuable white the past winter. It is very early in coming into flower and is a continuous bloomer. The flowers are

borne on a stem of sufficient stiffness and only a very few of them come with bursted calyxes. The one thing lacking in this flower is form; it is not what is styled a fancy but where a fancy is not needed, it is invaluable. It is quite a vigorous feeder and is well suited in a temperature of 48° to 50°.

Lorna did not do well during the early part of the winter, but later it sent out a good supply of very long, stiff stems topped with strictly first-class flowers. The flower is very large, well built up in the center and the calyx does not split. I am very much afraid that it will be impossible to bring this variety in early, but perhaps another year, with good strong stock to start with, it may be coaxed into flower a little earlier. At any rate it is worth a good trial.

Norway has been a complete failure. It was grown in a light soil, with liberal feeding, and although the plants looked healthy and vigorous they refused to send out flowers. What we need now in white is one that commences to flower early, which has the size and form lacking in Queen Louise.

In pink we can safely depend upon Lawson as a variety to grow in quantity. It always finds a good market, and with a little care in regard to temperature can be made to pay very well. The temperature should be kept to 55° in

order to check the bursting of the calyxes. Give the plants a liberal amount of nourishment after they are started along nicely and they will not stop blooming at all during the winter and spring.

In light pink there is none at present which I should like to advocate for another year. Morning Glory, I find, is the best, but it has shown too much disease this year to allow it to be classed as a safe one. Let us hope that Enchantress will prove to be as valuable as it appears to be at the present time, as we are in sore need of a good light pink.

With many growers Genevieve Lord has increased in favor. I find it a vigorous grower, sending out flowers on long, stiff stems. The flower is somewhat lacking in size, but there has no other kind shown up, ready to take its place. I think it does better on raised benches than in solid beds and 48° to 50° in temperature suits it very well.

The Marquis has been as much of a disappointment this year as it was last, and we have fully decided to discard it altogether. There are several strong objections to it. The flower is sleepy looking, is a poor keeper and the first crop of flowers is altogether too late.

Ethel Crocker seems to lose supporters every year and next season will find it lost entirely. It does very well from April right through the summer, but we cannot afford to grow them in the houses all winter for a few summer blooms.

In crimson, Gov. Roosevelt has taken the place of Gen. Maceo. It is one which is not difficult to grow and it does not need as high a temperature as many; 46° to 48° suits it very well. The form of the flower is very fine, but the size is not quite up to our ideal.

Estelle has the field all to itself as a scarlet. The color is very fine and the habit of the plant is good; it is a free bloomer, with good stems. If all that is said of the Adonis is true we will also have to drop the Estelle next year, but we find it at all times the best to stand by "good enough" and let "better" speak for itself.

Eldorado has paid very well the past winter and I find it inadvisable to give it up entirely. It likes a temperature of 48°, and if you can keep the young plants in the houses during the summer, when fall comes you will have good plants which will not be so badly covered with rust as they are when planted outside.

Golden Beauty was a trifle late this year, but as the flower is larger than that of Eldorado and the habit of the plant a little better, I would not advise anyone to drop it until he has given it a fair trial. I think that by using early struck cuttings and keeping them indoors all summer it can be improved upon.

Mrs. Bradt has been the same carnation as ever. It pays well when good but unless you watch it carefully you will get it with weak stems. It is also losing in regard to constitution, being subject to stem rot. If Gaiety is all that is said for it we will consider it a welcome substitute.

For a fancy we find the Prosperity a good variety and it has paid well, as it always will command a high price. I think that it is an improvement on raised benches over those grown in solid beds. Grown in a light soil, with not a great deal of nourishment, in a temperature of 50°, it has done very well. Some of the growers have been bothered with weak stems, but I have not been troubled in this way.

There are, at the present time, several new varieties which appear to be worth a great deal, but this can only be determined by giving them a thorough trial. But up to the present time I find the following varieties to pay the best: Queen Louise, Lawson, Genevieve Lord, Roosevelt, Estelle and Prosperity. R. I.

#### A Valuable Asparagus.

*Asparagus Comerensis* was first illustrated in the AMERICAN FLORIST of November 30, 1901, but the photographs then reproduced did not do the plant justice, nor give the credit afforded by the accompanying half-tone. The present photograph, like the others, is from a plant grown by Christian Eisele, of Philadelphia, who stands sponsor for the American debut of the plant. It is much like *A. plumosus* but more robust, darker green and the foliage is softer. It is a rapid grower and Mr. Eisele thinks it to be the plant of the period for "green" for decorators, also that it makes a good selling, enduring pot plant for the home.

#### An Unappreciated Climbing Plant.

*Adlumia cirrhosa* is listed in almost every seed catalogue ever published, but it must be from force of habit, for it doesn't sell the way it should; that is it didn't sell so long as it was called the climbing fumitory, the mountain fringe or, still more commonly, the Allegheny vine, but now that some genius has dubbed it the "wonderful climbing maidenhair fern vine" it gives promise of returning popularity.

I am led to the conclusion, however, that a small stock of *adlumia* lasts for years by the fact that the first two or three packets of seed usually fail to germinate for me, despite the fact that the vine, once obtained, is so very easily retained. The foliage is as delicate as that of the maidenhair fern and an added charm is the pinkish lavender flowers. It is a vine so beautiful that thousands of people would use it if florists would provide it in time and grow sample plants that those who know it not might view its charms. It hardly equals the cobra for rapid growth, but is a close second, and when once established comes up annually. It is a biennial, like the hollyhock, and will not produce the running vine the first season if sown in spring.

The seeds should be planted in autumn and developed into good pot plants by

TRAINED PLANT OF ASPARAGUS COMORENSIS.

spring, which will run during the summer if planted out. The plants prefer a situation where they will not be subjected to the hot, drying sun too severely. For this reason they have been found most satisfactory on the north side of buildings, where ferns, columbines and trilliums are at home. Once established it provides its own successor.

The accompanying illustration is from a photograph of a vine which last season induced not less than fifty ladies to order plants for this spring. This porch, with its very limited front yard, would be much improved in appearance and the adlumia much benefited by the protection afforded by planting an aralia at the corner and a cut-leaved sumach in front that would shade the ground from the morning and noon sun, as this porch faced the east. The few stalks projecting out from the building, with their whorls of leaves at the top, would have had their stems covered with the vine and look much more graceful than where the wire netting is the only support. This is too graceful and charming a vine to be required to flatten itself in that way.

C. B. W.

#### Coronation of Edward VII.

Many, if not most, readers of the AMERICAN FLORIST will probably imagine that the coronation of King Edward VII will be an excellent opportunity for British nurserymen and market growers to turn over an extra honest penny. In theory or imagination it may appear so on the surface, but from personal experience, observation and inquiry, I fear that from a gardening business point of view the coronation will be a "frost." Indeed, some large growers of floral and vegetable produce around London, become quite angry at the very mention of the word coronation, and they express nothing but the most pessimistic views on the matter. Trade has been abnormally dull for a long time past. Money is difficult to obtain, and with the increased war expenditure, it is likely to become more so as time goes on. It is gradually coming home to the people that the spending of over £200,000,000 (a billion dollars) on South Africa has not been exactly beneficial from a trade point of view whatever it may be from a patriotic one.

A few growers, however, are trying to make the best of matters and have been booming their particular specialties as "the" coronation flower. In this respect pæonias, lilies of the valley, lilac and roses have been chiefly mentioned. There is not much doubt, however, as to which flower will be most generally worn. The rose will easily hold the field, and millions of blooms, both British and continental, will no doubt be in evidence during coronation week. It is doubtful, however, whether they will fetch much of a price, perhaps not more than a penny or threepence (2 cents or 3 cents) a blossom when retailed. The other flowers referred to have not much of a chance, except, perhaps, the lily of the valley. The pæonias are too large for wear, although they will come in useful for dinner decorations and so forth.

The lilac in a natural state will be over altogether by coronation week and any that may be used will be retarded stock. A nurseryman of my acquaintance who grows about 60,000 strong lilacs for forcing or retarding, as the case may be, has a good deal of faith in white lilac for the coronation and is preparing himself for the event. The lily of the valley, of course, must be also retarded pips, but

THE ADLUMIA AS A PORCH CLIMBER IN A CITY DOOR-YARD.

as it makes a sweet corsage flower and a useful decorative plant for indoor work it is likely to be used to a fairly large extent.

London, of course, will be thronged with multitudes from all parts of the world. With the exception of the hotels and restaurants, I fear little business will be done and for this reason London tradesfolk are not so keen as to the amount of material they are likely to get rid of.

One great and obvious effect of the feasting that will take place all over England will be to make salad a useful and perhaps lucrative article of commerce. Tomatoes, cucumbers, lettuces, radishes, beet root, etc., are likely to be used in enormous quantities, especially if the weather is warm and agreeable, instead of bitterly cold as it has been for some weeks past. All around the market gardens near London acres of lettuce are maturing and will be just in proper condition for the coronation festivities. Radishes also have been sown in great abundance and there is no doubt the growers have had an eye on the coronation all the time.

Although I have been around among the florists a good deal I have been astonished at the lack of originality or enterprise in inventing anything new or striking. It is true the wire workers have produced a few foundations but there is a monotonous similarity between them. They partake chiefly of crown shapes on cushions, with the letters

"E. R." worked out. No doubt a certain amount of ingenuity will be displayed by the florists in filling them in but it may be taken for granted that roses, lilies of the valley and Alexandra orchids, as they are called (*Odontoglossum crispum*, or *Alexandra*) in honor of Queen Alexandra, will form the staple of flowers used. The other flowers will probably be selected from a color point of view and the Union Jack, with its red, white and blue, is sure to be an attractive and easily worked design.

The floral decorations at Buckingham Palace, the Royal Gardens, Windsor and Sandringham, I understand, are to be extensive in character, but it is difficult to secure any information that could be considered trustworthy in regard to the matter.

Bedding out will all be finished by coronation week and I hear from certain quarters that attempts at reproducing the Union Jack in floral colors will be attempted in many gardens. The triumphal arches that are being erected in London and the provinces and the huge stands near Westminster Abbey, Parliament Square, Trafalgar Square, St. Paul's and other noteworthy places along the route for the great procession may possibly have climbers of various kinds, either natural or artificial, on the pillars and along the front to hide the timber and lend an effect to the drapery of flags and other material.

From a horticultural point of view

little more can be said of the coronation preparations. Whatever excitement and business take place at the time, there seems to be a universal feeling that after the event is over there will be a tremendous slump in everything. One never knows, however, what is likely to happen, and perhaps the general impression at present prevailing may turn out to be unfounded. W.

#### Clematis Indivisa.

In some instances many years elapse from the introduction of a new plant before its value becomes generally apparent, and *Clematis indivisa* seems to be among the plants to which such treatment has been accorded. Introduced from New Zealand in 1847, until the past year or two it has been seldom seen, though doubtless of value as a greenhouse climber.

The plant in question is a vigorous growing evergreen climber, and is not hardy unless it may be in some of the southern states or on the Pacific coast, and is therefore not likely to become so generally useful as *C. paniculata* for example. *C. indivisa* is a spring flowering species, and does not need much heat in order to produce its bloom freely, the temperature of a carnation house being high enough for this clematis. Planted out in such a house, and trained on wires, where it could be syringed freely in order to avoid red spider, given a liberal allowance of water during the summer and an occasional top dressing of manure, and one could then expect a vigorous growth. During the winter rather less water would be required, thus hardening the growth and giving a partial rest, this period being arranged according to the time in the spring at which the flowers would be most useful, it being somewhat doubtful if one could force it into bloom successfully until the sun gets strong.

The flowers of *C. indivisa* remind one to some extent of those of *C. paniculata*, and are creamy white in color, but as may be noted from the accompanying illustration, they are larger than those of the last named species, and also have more sepals, *C. paniculata* usually having but four sepals while *C. indivisa* has seven or eight.

Propagation may be effected by means of seeds, or by root grafting on one of the common species, *C. flammula* or *C. viticella* furnishing good roots for grafting purposes. W. H. TAPLIN.

#### Westerly, R. I.

Some time ago local surveyors were engaged on the Foster farm, commonly known as Riverside farm, on Beach street, taking levels and plotting out the lay of the land. William W. Foster is to erect and manage a range of greenhouses there. The plant is to be built some distance from the roadway, near the river bank, where the facilities are exceptional. Mr. Foster proposes to build two houses, each 22x200 feet, with a north side propagating house. On the east end of the houses will be built a work shed and another shed in which two twenty-five horse-power boilers are to be placed. A cooling cellar has also been planned. The work of construction of the plant will be under Mr. Foster's personal supervision and he will endeavor to have the work completed in time for the planting in the fall. It is the intention to grow carnations for wholesale trade.

CLEMATIS INDIVISA.

#### Chicago.

BUSINESS VERY QUIET UP TO THE HOUR OF MEETING REQUIREMENTS FOR MEMORIAL PURPOSES.—MILLIONS OF CARNATIONS BUT ROSES TOO SOFT TO SHIP.—PÆONIAS THE ONLY SHORTAGE.—MANY OUT OF TOWN ORDERS.—FERNS RUN SHORT AT HEIGHT OF THE BUYING.—HEAVY RAIN.—VARIOUS LOCAL DOINGS.—VISITORS.

The not unexpected turn to cold weather came promptly after the big rain last Saturday night and resulted in an apparent case of suspended animation in the producing end of the cut flower industry. But appearances were deceitful; the cut early in the week was not retarded nearly so much by the cold as by the growers, who were "saving up" for Memorial day. At that the growers were not able to do much at holding back carnations; they had not storage room enough. All through the week the receipts on this item have been unwieldy, far ahead of that part of the demand which could use the stock at any reasonable figure, and just before Memorial day the daily receipts ran into seven figures, undoubtedly heavier than ever before on record. While the rose cut was materially reduced by cold, it was not a matter of great concern to the wholesalers, for the stock was so soft that they did not care to ship it to good customers, and there were ample supplies for all the local buyers. Beauties

averaged rather better than the other roses, but they, too, were selling cheaply, particularly the long-stemmed stock, which continues to form a large proportion of the receipts. Early in the week the market was very quiet, with pæonias about the only active commodity, but on Wednesday all the wholesalers who do anything at all in the shipping line had their hands full. At this close view it is impossible to state accurately whether or not the Memorial day business ran ahead of a year ago, but it is certain that there were more orders in town, only they did not average so large. As earlier in the week, the principal demand was for pæonias, there being a noticeable decrease in the number of carnations called for on out of town orders. On Thursday and again early on Friday morning local buying was fairly active. The only shortage aside from sound roses proved to be on good pæonias. Amasa Kennicott estimates the available supply for the three days' business as from 5,000 to 6,000 dozens, but many of them were poor. Of good stock three times as many might have been sold at from 75 cents to \$1 a dozen. There were large receipts of splendid cape jasmines from Alvia, Texas, and they sold well. As Memorial day approached the supply of ferns ran out and the last few cases brought advanced rates without fully satisfying the demand.

At the regular meeting of the Florists'

Club, May 28, Edgar Sanders presented the report of the committee on the recent entertainment. The report was very encouraging and the committee deserves much credit for the success attending its efforts. The arrangements for the annual summer outing were left with President Winterson and the entertainment committee. An important communication from Secretary Barron, of the American Rose Society, with reference to holding the next spring exhibition of that organization in this city, was handed to the secretary by Emil Buettner. This matter will be discussed at the next meeting of the American Rose Society, June 11, and immediate action is necessary. The chairman was instructed to appoint a committee to confer with the Horticultural Society of Chicago regarding the communication and he has selected Emil Buettner, C. L. Washburn, Peter Reinberg, N. J. Wietor and A. H. Budlong to act in this capacity. In the absence of President Winterson, M. Barker presided.

The outing of the employes of Vaughan's Seed Store, May 24, was well attended and the ladies, heavily laden with baskets of choice delicacies, conspired with the weather man to make it a most enjoyable event.

The rainfall has been very heavy in May. On Saturday night, May 24, the precipitation exceeded an inch, the average monthly rainfall, and in the month it was nearly twice the normal.

P. S. Peterson & Son have supplied the material and executed the decorative work at the Coliseum, which opens as a summer garden to-day.

Frederick Hunt, formerly with the Chicago Carnation Co., is now foreman for W. N. Rudd at the Mount Greenwood cemetery.

Albert Ericsson, of Vaughan's Greenhouses, Western Springs, says the latest arrival is a 15-pound boy. Good luck to him.

Friedman is handling the Eldredge B carnation from Belvidere and finds it a fine seller.

John Weiland, of Evanston, is rejoicing in the recent arrival of a baby girl.

James S. Wilson, of Western Springs, leaves to-day on an eastern trip.

Miss Jessie Ludlow is spending a short vacation in Michigan.

John Degnan returned from New York early in the week.

Visitors: Andrew Peterson, Hoopston, Ill.; Mr. Button, Lake Geneva, Wis.; A. H. Burt, Kankakee, Ill.

### New York.

WHOLESALE MARKET GIVEN A BRACE BY COOL WEATHER.—PRODUCTION SOMEWHAT RETARDED.—PÆONIAS MORE POPULAR THAN BEAUTIES.—DOINGS OF PERSONAL AND TRADE INTEREST.

The wholesale cut flower market is still in an unsatisfactory condition, but the unforeseen cool weather has had the welcome effect of retarding production and conditions for Memorial day were more nearly normal than was expected. Pæonias from the south are coming in and are finding a fair sale, while American Beauty roses go principally to the street Greeks. Some lilac and bulbous stock is still in market.

The proceedings against Adolph LeMoult have been dismissed and the plaintiff reprimanded by the court for hasty action. Mr. LeMoult threatens suit for \$50,000 damages.

Friday, May 30, was the silver wed-

ding anniversary of Mr. and Mrs. Julius Roehrs. A legion of friends join in congratulations and more would have been present at the festivities which marked the occasion had it not fallen on a busy holiday.

There were many floral tributes at the funeral of Charles H. Downie, of Peter Henderson & Co. He was a general favorite and leaves a widow and son.

John Kral, foreman for Moore, Hentz & Nash, has been dangerously ill with pneumonia for two weeks.

A. Dimmock sails for London June 14. B. Suzuki, of Suzuki & Iida, starts for Japan June 10.

Visitors: S. A. Anderson, Buffalo; Wm. Griffin, Thompson, Conn.

### Philadelphia.

MARKET IS HEAVILY SUPPLIED WITH PÆONIAS HURRIED ALONG BY WARM WEATHER.—BEAUTIES AND TEA ROSES SELLING LOW.—PRICES ON OTHER STOCK DOWN TO SUMMER LEVEL.—WHOLESALESALEERS SHOULD GET TOGETHER—EUROPEAN TRAVELERS.—VARIOUS NOTES.

This is pæonia week, the warm weather of the past few days bringing them in with a rush. They are very fine but they do not keep very well. They should be cut when in bud, for they pop open at once when they get into the store and often in a wagon during carriage. S. S. Pennock is handling in the neighborhood of a thousand blooms a day, a large van load being received each morning from one consignor, the H. A. Dreer Company. They are a great boon to the decorator, but entail an amount of labor that seems hardly repaid with the price received, which ranges from \$3 to \$4 per hundred blooms. All other flowers are plentiful, particularly Beauties, sweet peas and carnations. Beauties are now \$1 to \$2 per dozen and in large lots are sold away below. Teas average from \$4 to \$6 per hundred. Carnations are quoted at from \$1 to \$2 and they are still very good. Sweet peas are good sellers as spring flowers and move quickly at from 50 cents to 75 cents per hundred. Gardenias that were started December, January and February are now arriving in large quantities and of excellent quality. Instead of \$1 each, about that price per dozen is the quoted figure. Perhaps Brother Dorrance, of Wilkesbarre, could be induced to give us a few pointers.

We note with interest the gathering of the wholesale markets of New York under one roof. There is no attempt to regulate prices, only a place where buyers and sellers meet and the question of price regulates itself and becomes more uniform than by any other system. Everything is convenient and business all over in two hours. What a contrast to the Philadelphia style, where the growers spend half the day hunting up their customers instead of standing still in some convenient spot and selling out in a jiffy.

Robt. Craig & Son are having a great sale on their crotons. They make this plant a specialty and carry probably the largest stock in the country. A house of cyclamens is coming on nicely. The plants have been growing the past season planted on a bench and have made very nice stock, many of them, on being lifted, being put into 5-inch pots. They will now be placed outside in a frame, where they will be grown on through the summer.

Fred. Ehret, the genial up-town wholesaler, has finally selected a route and will sail for Europe on the Fatherland from

New York on June 21. Rueben Keinle will accompany him. The essay committee has been notified and about the first week in September the members of the Florists' Club can expect a treat, in the dual description of the trip abroad. Harry Bayersdorfer and wife will also go abroad about the middle of June.

Godfrey Aschmann has just received twenty cases of palms and araucarias from Belgium, arriving in fine condition. He reports good business in spring bedding plants.

Dennis Connor has associated himself with the Lord & Burnham Company, the New York greenhouse builders.

Don't forget George C. Watson's "All about Boston" at the June meeting of the club next Tuesday evening.

K.

### Boston.

TRADE CONDITIONS CONTINUE VERY UNSATISFACTORY.—TOO MUCH STOCK IN ALL LINES.—PROTRACTED DROUGHT BROKEN.—SPRING FLOWERING SHRUBS HEAVILY LADEN THIS YEAR.—VARIOUS NOTES.

Very unsatisfactory, things have been in and about the wholesale marts during the past week, not only because of the extreme feebleness of the demand for flowers, but on account of the very heavy supply that has been piling in upon the market daily. This is true of carnations and roses especially. Both are represented by every variety under cultivation, in unwieldy abundance and there is not a single variety of either that holds pre-eminence enough in any feature to give it a push ahead of the sluggish procession into which all sorts, regardless of "color or previous condition" have been forced to drag along. And now Decoration day gives cause for speculation. Coming, as it does, this year on Friday, we shall not be able to record the result until our issue of next week, but the conviction is growing on all interested, a few days ahead of the holiday, that although lilacs and bulbous material have all gone by, there will be no difficulty in supplying all demands from the bountiful store of greenhouse product that is at hand, not to mention a number of outdoor subjects rarely seen at this date here, but which the early season makes available this year, such as rhododendrons, Japan snowballs and so forth.

The unusually severe drought which has prevailed for some weeks seems to have been successfully broken and there have been several good showers, which were much needed by grass and trees that were suffering for lack of moisture. Carnations in the field had begun to give solicitude to their owners. Most of the spring flowering shrubs have bloomed full this season, including the exochordas, which are not always a sure crop here, but are at the present time loaded down with flowers. Rhododendrons are scarcely as good as they were last year. Although the winter seemed not unfavorable to them, yet they lost considerable foliage in exposed locations and the blossoming now shows many buds partially blighted and imperfect.

F. O. Santheson, who has been gardener at Mt. Feake Cemetery for the past four years, has gone into business and opened a place at 71 Hammond street.

Visitor: J. W. Withers, New York.

FULTON, N. Y.—D. A. Northrop has opened an attractive floral establishment at 42 South First street.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—8 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

EGANDALE is still well up among the  
favorite cannas.

THERE is less complaint this season of  
stem rot in G. H. Crane carnation.

THE supply of cannas from pots is hold-  
ing out, despite increased demands.

THE improved forms of the gladiolus,  
the light colors, are very acceptable for  
funeral work.

Cut fronds of *Adiantum Farleyense*  
have been short of the demand in the best  
markets nearly all season.

THE diploma of Grand Prix awarded  
at the Paris Universal Exposition of 1900  
has been received by the AMERICAN  
FLORIST.

MEMORIAL day sees even a greater pro-  
portion of the bedding work accom-  
plished this year than usual owing to the  
early season.

WM. H. CHADWICK, after Timothy  
Eaton and Col. Appleton, has been the  
chrysanthemum most in demand this  
spring, according to the rooted cutting  
men.

THE production of window glass has  
practically ceased for the summer; stocks  
are low and those who need quantities  
for new work or repairs will gain noth-  
ing by delay in placing the order.

WESTERN rose growers should interest  
themselves promptly and energetically in  
the suggested meeting and exhibition  
next March of the American Rose Society  
in Chicago. It is an opportunity not to  
be lost sight of.

### We Like Letters Like This.

ED. AM. FLORIST:—Enclosed is \$1 for  
another year's subscription to your  
paper. We can't do without it.

Richmond, Mo. N. J. FLINT.

### American Rose Society.

The stated June meeting of the Ameri-  
can Rose Society will be held in New York  
on June 11 in connection with the June  
show of the Horticultural Society of New  
York, at the New York Botanical Garden.  
The rose society offers a silver medal for  
the best display of garden roses on this  
occasion. Further particulars of the  
exhibition and the full schedule may be  
had from the secretary, 136 Liberty  
street, New York. The rose society is now  
arranging to offer its gold and silver  
medals at some of the leading exhibitions  
next year, particulars of which will be  
made public very shortly. The gold  
medals will be offered for novelties.

### The Iron Gutter Patents.

ED. AM. FLORIST:—I see in last week's  
edition that my iron gutter patents are  
being offered for sale, and as the reputa-  
tion earned for them is not such as would  
warrant this action, I therefore request  
that you announce in your columns that  
such parties are assuming unauthorized  
responsibility. GEO. M. GARLAND.  
Des Plaines, Ill., May 29.

### Greenhouse Building.

Phillipston, Mass.—Chas. H. Stewart,  
cucumber house.

Canonsburg, Pa.—J. B. Murdoch &  
Co., range of houses.

Westerly, R. I.—W. W. Foster, two  
houses 20x200.

Mt. Clemens, Mich.—John Carey, house  
16x120.

Redondo, Cal.—Martin Wolfskill, three  
houses 20x210.

San Francisco, Cal.—Louis Chlappari,  
ten houses 20x110. F. Gonzalez, two  
houses 18x150.

Randolph, Vt.—Burnell & Totman,  
house 19x100.

Huntington, Mass.—John Eagan, two  
houses 15x50.

Derry, N. H.—N. G. Pillsbury, one  
house.

Pontiac, Ill.—W. J. Miller, three houses  
30x100.

### Diseased Begonia Leaves.

ED. AM. FLORIST:—I enclose some dis-  
eased begonia leaves and would like, if  
possible, a diagnosis of the trouble, also  
suggestions as to the remedy. Whatever  
it is it seems to attack healthy tissues as  
readily as those of plants in a weakened  
condition. It made its appearance in  
our carnation house, which we have  
ventilated night and day, except in the  
most extreme weather. Since then it has  
spread to other houses. We have given  
them all the ventilation they would  
safely stand but without checking the  
disease. N. J. F.

Unfortunately we can give you no  
satisfactory information in regard to the  
diseased condition of the begonia leaves.  
The spots with concentric lines suggest  
the presence of a fungus and, in some,  
mycelium can be found but scarcely in  
sufficient quantity to be responsible for  
the entire injury. The leaves were placed  
in moist air under conditions favorable  
for the development of the fungus, hoping  
that its identification might thereby be  
established, but in that we have been  
disappointed. The making of that experi-  
ment explains the delay of this reply. We  
have learned that a disease which is  
probably the same has been the cause of  
serious loss in some greenhouses but it  
remains an unsolved problem. A. F. WOODS.

### Trouble With Jasmines.

ED. AM. FLORIST:—Can you suggest the  
cause and remedy for my trouble with  
Maid of Orleans jasmines? I have  
reotted them into several kinds of good  
soil and kept them in a temperature of  
from 40° to 60°, but they keep going  
back on me. J. G.

It is taken for granted that the jasmine  
in question is Duchesse d'Orleans, one of  
the double forms of *Jasminum Sambac*.  
This is one of the tender jasmines, and  
would not be very likely to go ahead  
while kept in a temperature of 40°,  
though a winter temperature of 60°  
ought to prove satisfactory. This plant

is an evergreen, and during the summer  
months may be planted outdoors in the  
open ground, and exposed to the full sun,  
where it usually makes more growth  
than when pot-grown for the whole sea-  
son, the course of treatment being prac-  
tically the same as that given to garde-  
nias. A light and rather open soil is best  
for these jasmines, for while they enjoy  
plenty of water when growing freely, yet  
the drainage should always be in good  
working condition. Pot firmly and try  
a moderate quantity of bone dust as a  
fertilizer, the bone dust being mixed in  
the potting soil. During the winter  
rather less water will be required, but  
unless these jasmines are syringed freely  
they are quite liable to an attack of red  
spider. Plants that have been grown  
outdoors for the summer should be lifted  
before any frost has touched them in the  
autumn and should be potted up and  
placed in a partly shaded greenhouse for  
a time, until the roots begin to move  
afresh, also syringing frequently until the  
plants are established, but at the same  
time, being careful not to get the soil  
sodden, and when in good condition will  
produce flowers in moderate quantities  
throughout the winter and spring.

W. H. TAPLIN.

### Pittsburg.

STOCK RETROGRADES UNDER THE INFLU-  
ENCE OF SHIFTING TEMPERATURES—  
KAISERIN THE ONLY GOOD ROSE—LILIES  
AND PÆONIAS SCARCE FOR MEMORIAL  
PURPOSES.—VARIOUS NOTES OF VARIOUS  
DOINGS.

The condition of the rose stock is  
worse than at any time since last sum-  
mer. The cut of almost every grower is  
mildewed and there are absolutely no  
good roses to be had excepting Kaiserin.  
Eastern Brides and Bridesmaids may be  
all right in the east but, with rough hand-  
ling, they come in badly bruised. Carna-  
tions have deteriorated very much in  
quality, but not to the same extent as  
roses. Lilies are scarce for Memorial day  
and outdoor flowers are very backward.  
We cannot depend on our home supply of  
pæonias, so they come from the east and  
south. Business is dormant but the out-  
look for June is very encouraging, as the  
various stores have an unusual number  
of advance orders.

Fred. Brnki and family have vacated  
their beautiful home in Bellevue and  
taken up their residence at Crystal  
Farm, which is in close proximity to the  
greenhouses of the Pittsburg Rose and  
Carnation Company, of which Mr.  
Brnki is president.

The construction of the range of houses  
by J. B. Murdoch & Company is rapidly  
nearing completion and it is expected  
that the rose stock will be planted by  
July 1.

Otto Reisch and Harry Grayes have  
departed for Beloit, Ohio, to superintend  
the construction of their new houses.

E. L. M.

### Nashville.

MANY OUTDOOR FLOWERS AT HAND FOR  
MEMORIAL PURPOSES.—FLORISTS REAP  
NO HARVEST.—PLANT TRADE HEAVY AND  
COMMENCEMENT SEASON HERE.

Memorial day, as a commercial event,  
cuts very little figure with the florists in  
this city, coming, as it does, when all the  
old-fashioned flower gardens that abound  
in this vicinity are gorgeous with bloom  
and beautiful flowers are to be had for  
the asking. Pæonias have been very  
abundant, but are finishing now and  
*Lilium candidum* is just coming in, for

decoration days, for there are two dates here when flowers are strewn on the graves, the national date, May 30, and June 3, when all confederate graves are decorated. But neither makes much difference to the florist. If called upon at all he is expected to donate his flowers. However, the commencement season is now on and there is a good call for flowers, as well as for plants to decorate platforms in which to embower the sweet girl graduate. The plant trade has been most excellent, and already flower beds are in full bloom. The call for plants will, however, continue for some time yet before it is too hot and dry for the making of beds, by which time the plant supply will have been pretty well sold out. The cut flower trade continues brisk and in quality the roses have been unsurpassed.

The street fakir has made his appearance and may be seen numerous with baskets of sweet peas and other blossoms. He has not fully caught on to the tricks of the trade, but as an advance guard he is surely here.

The new venture of Currey's, under the management of George R. Currey, has made an excellent start and promises to become a feature in next season's trade, when they will do all classes of floral work.

M. C. DORRIS.

Lowell, Mass.

TRADE IN LAST WEEK THE BEST OF MONTH.—CUT FLOWER BUSINESS ACTIVE BECAUSE OF WEDDINGS AND FUNERAL WORK.—CARNATION PRICES SKYROCKET.—NO OTHER SHORTAGE.—MUCH PLANTING OUT BEING HURRIED ALONG.

Business has spruced up wonderfully, compared with the first part of the month. The past week has been the busiest one of the month. There have been several small weddings. Patten produced some very pretty effects for the Taylor-Sewell nuptials. There have been several large funerals, the obsequies of ex-Mayor Dimon calling for particularly large quantities of flowers of the best grade. Wreaths seemed to predominate and Patten, Whittet and McManamon seemed to get the bulk of it. The supply of cut flowers is in good condition, with no shortage of any kind. Carnations that were coming in by the thousands last week have slackened up considerably and the prices have jumped skyward, \$4 per hundred being asked for ordinary varieties, but if this warm weather continues they will surely have to take a slump. Brides and Bridesmaids are very small. Carnot and Kaiserin are the roses now sought for, although Beauties seem to be holding their own.

At this early date it seems as if we had plunged into summer. Such intense heat followed by heavy rains has been trying on the newly planted out stock.

D. Hartford, of Bedford, is cutting some outdoor valley of excellent quality. Last year at this time Mr. Hartford was just uncovering it.

Gus. W. Patten, D. D. G. E. R. of Elks for Massachusetts, was tendered a banquet at North Adams last week, by the Elks of that city.

The men who handle bedding plants seem to be rushed with orders, filling vases, window boxes and so forth.

There seems to be no end to sweet peas but the finest coming to town are from Otto Bourdy.

Some very fine pink pond lilies are coming to town. The first sold at \$1 a dozen.

A. M.

OBITUARY.

THOMAS YOUNG.

The demise of venerable Thomas Young came on Tuesday, May 27, after a protracted illness, from which he had several times rallied so strongly that hopes were entertained for his renewed health. Mr. Young was born in Eastbourne, Sussex, England, in 1818. He began his career as a gardener on the estate of the Duke of Devonshire. He went from there to Boddegan Hall on the island of Anglesea, North Wales, and thence to the Pine Apple nurseries of Messrs. Henderson. His next position was with Mrs. Lawrence at Eaton Park and afterwards he was employed at Abernath Park, Glamorganshire, whence after fifteen years of service he came to this country in 1870. Throughout his career he gained and maintained a wide knowledge and celebrity as a gardener of high attainments, excelling especially in the difficult branch of pine apple growing. Personally he was jovial, hearty and kindly, a perfect type of the old-time gardener, in love with his profession and honored by his colleagues. He leaves a widow and a family of seven sons and daughters. Two of the sons, Thomas, Jr., and John, are engaged in the flower business in New York city, John Young being also secretary of the New York Florists' Club. Two others, William and George, are rose growers at Clifton, N. J.

NAUGATUCK, CONN.—F. C. Miller has opened a new florists' store on North Main street.

ROCHESTER, N. H.—The greenhouse of N. Gauthier, on North Main street, has been sold to C. W. Bradley for removal.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

## THE SEED TRADE.

### AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

VISITED CHICAGO: Mr. Lilly, of Lilly, Bogardus & Co., Seattle, Wash.

THE Plant Seed Co., of St. Louis, put four salesmen on the road in the south and southwest this week.

F. H. HENRY, of Henry & Lee, New York, expects to leave for Bermuda June 7. We are sorry to learn that Mr. Henry is now restricted to two meals per diem.

THEODORE PAYNE, for many years in charge of the seed department of the German Seed and Plant Company, Los Angeles, Cal., has become manager for the firm, succeeding H. Zander, who resigned to engage in other business.

NEBRASKA growers report stronger demand than usual for the following varieties of vine seeds: Long Green, Arlington White Spine and Extra Long Giant cucumbers; Rocky Ford, Paul Rose, Defender and Emerald Gem muskmelons; Kleckle Sweets, Alabama Sweet, Holbert Honey, Sweet Heart and Iceberg watermelons; Mammoth pumpkin; Hubbard, Golden Hubbard and Golden Bronze squash.

### Salzer Seed Company Sued.

The John A. Salzer Seed Company, of LaCrosse, Wis., is party to a \$5,000 suit in New York city, involving the question of duty on Thousand Headed kale seed. The company imported a carload from Germany and when it reached New York the United States customs officers demanded \$5,000 duty. The company defends on the ground that the seed is not a vegetable but is to be used as fodder and so no duty should be charged.

### Labor Shortage in California.

The seed growers of California are face to face with a labor problem. Chinese labor is practically out of the market and the usual figure of the Japanese has advanced twenty-five to forty per cent, many of them going to Alaska to work in the canneries. There is no other help available on the coast, and with the large fruit crop to gather, it will be almost impossible to secure help to harvest the seed crops.

### Seed Firms of Rochester.

Regarding a rumor of consolidation among the various Rochester, N. Y., seed firms, the *Post Express* of that city prints the following, quoting W. J. Mandeville:

"There has never been even any thought of consolidating the interests which our firm represents, with those represented by Mr. Hathaway, nor will any such consolidation be effected. The fact of the matter is that as individuals Mr. King and myself own a controlling interest in James Vick's Sons' business and recently we also purchased the plant, franchises, business and good will of the Cleveland Seed Company. These two businesses, as well as our own, will continue to run entirely independent of each other. The reason for this is perfectly obvious. The Mandeville & King Company does a com-

mission business, James Vick's Sons a catalogue business and the Cleveland Seed Company a jobbing business. These three lines are distinct from each other and as distinctive businesses can be run more profitably than if they were all consolidated.

"Moreover, I want emphatically to deny the false and damaging assertion that the name of Vick will disappear from the seed history of this city. It will always be retained so far as we have anything to do with it. It would be the height of business folly for us to throw away an honorable name and reputation that has taken years and millions of dollars to build up."

### Investigation of Government Seed Purchases.

Representative Fitzgerald, of New York, on May 12, introduced in the house a resolution calling on the Secretary of Agriculture for a statement of everything relating to his purchase and distribution of all government seeds for the years 1898-99, 1900-01 and 1902, including all contracts, papers and correspondence relating to the same; price, character, kind, quality, and amount of seeds, the reason why any payments for seeds are withheld, all evidence taken, and correspondence relating to his withholding payments, and all information in his possession in regard to the failure of the several contractors to perform their several contracts, also the reason why an investigation is now being or has lately been held in regard to the subject, and all papers and correspondence leading up to the matter. The resolution was referred to the committee on agriculture.

According to a report around the capitol, Secretary Wilson has been making a quiet investigation into the method and manner in which seeds have been supplied to the department by the contractors. Representative Fitzgerald having heard of it wants all the correspondence published.

### Cincinnati.

GOOD BUSINESS AND A MARKET FOR MORE FIRST GRADE MATERIAL.—RECEIPTS ARE LARGELY OF POOR STOCK.—HAIL INFLECTS MUCH DAMAGE TO THE GROWERS.—CLUB ELECTION.—NOTES.

Trade is keeping up first rate and more first-class stock could be disposed of. The bulk of flowers received are second and third grade and the demand is for good stock. George & Allan will be right in it with *Lilium longiflorum* for Memorial day, having several thousand to cut, which sell readily at \$8 per hundred. Gus Meier is sending in a nice lot of Brides and Bridesmaids. The retailers all report a good trade, with funeral work predominating. *Pæonias* and *irises* are pretty well done for.

Last Saturday a severe hail storm struck Murphyville, doing considerable damage. Will Murphy, C. C. Murphy, Edw. Murphy and Mrs. Robt. Murphy all sustained considerable loss. Altogether about 10,000 feet of glass was broken. Will Murphy also had four houses blown down in the storm of last week and his loss will be the greatest.

There is considerable building going on now. The question arises, "when is it going to stop?" To hear the growers talk, they are never making any money, but they still continue putting up new houses and rebuilding the old ones.

Don't forget the meeting and election of officers of the Cincinnati Florists' Society June 14, and don't fail to climb up the stairs and vote. D.

## THE NURSERY TRADE.

**AM. ASSOCIATION OF NURSERYMEN.**  
R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
Twenty-seventh annual convention, Milwaukee,  
Wis., June 11-13, 1902.

ONE well-known writer on trees and shrubs says that the whiffletree is the only one reliably hardy.

THE new arboretum at Springfield, Mass., the gift of Dwight O. Gilmour, is to be located in Forest Park.

THE city of North Adams, Mass., is to have a very pretty little park on the site of the old Fort Massachusetts, one of the important historic spots of the state.

IT is said that Haverhill, Mass., is to have the finest children's park in New England, mainly through the hard work and philanthropy of City Forester Frost.

THE management of Crosswood Nurseries, of Hopkinsville, Ky., formerly of Casky, Ky., desires it to be known that Wm. F. Snyder is not an employe of that firm.

GOVERNOR'S ISLAND, the site of Fort Winthrop in Boston Harbor, is to be given by the government to the city of Boston as a recreation ground. The island contains an area of about seventy-two acres.

THE summer meeting of the Missouri State Horticultural Society at Eldon, June 10-12, would attract many western nurserymen did the date not conflict with that of the convention of the American Association of Nurserymen at Milwaukee.

CITY FORESTER CHAS. GREENWOOD, of Worcester, Mass., has set out 400 each rock and Norway maples along the public streets this season, rock maple being selected for the high and dry situations and Norway for low or moist places.

R. ULRICH, who had charge of the landscape work for the Pan-American Exposition, has prepared a plan for the improvement of the 50-acre tract upon which Indiana University is located at Bloomington, Ind. The plan will be executed by degrees in the next few years.

THE annual report of Theodore Wirth, superintendent of the department of public parks of Hartford, Conn., for the year ending April 30, 1902, shows that steady progress in improving the many beautiful reservations has been made and that the people take full advantage of their splendid opportunities. The total amount spent for pay rolls for the year was \$49,533.02.

### San Francisco.

**SUCCESSFUL EXHIBITION OF STATE FLORAL SOCIETY.—FEW GROWERS PARTICIPATE.—GOOD STOCK AND NOVELTIES SHOWN.—BUSINESS BRACES UP AFTER A PERIOD OF DEPRESSION.—HORTICULTURAL SOCIETY MEETS AND ACCEPTS AN INVITATION.—PERSONAL AND TRADE DOINGS.**

THE eighteenth annual spring exhibition of the State Floral Society was quite a success, at least as far as wild flowers are concerned, but considerably behind other shows held by the same society owing to the withdrawal of the growers and the lateness of the show. With the exception of John H. Sievers no other grower of cut flowers exhibited. This exhibit was the best, as usual, and some wonders in carnation seedlings were shown. Mrs. Whitelaw Reid, a sport of

Hannah Hobart, deep pink, and the Hobart itself, are worth a trip from New York to San Francisco to see. Besides his carnations he had a table with named pelargoniums and was given a gold medal. P. Thiesen, of the Golden Gate Nursery, in Berkeley, exhibited a seedling rose and a climbing sport from Caroline Testont, flowers and leaves exactly like it but throwing up shoots from five to ten feet and very near a Lamarque, only stronger. A. Carboni and Robt. Ford, gardeners for D. O. Mills, made a very nice exhibit of Adiantum Farleyense, A. cuneatum, Beauties and carnations. The Cox Seed Company made a very fine display of decorative plants. The Vawter Carnation Company, of Ocean Park, showed some outdoor grown carnations, the size being Portia and small Scotts, with all their side buds, and would not find a sale in this city. Domoto Brothers showed a collection of dwarf Japanese trees and Pelicano & Company had their usual fine exhibit of cut flowers and palms.

Business for the past three weeks has been very poor. With an occasional bright day considerable stock has gone begging and prices were therefore very low, but in the last few days there has been a stiffening up of business and prices all along the line, very likely owing to the approach of Decoration day, for which more flowers are sold here than for any other day in the year. White and scarlet carnations are scarce, as the spring crop is off with almost all the growers, but of pink and variegated any amount are to be had. Roses are not so plentiful but some good stock is to be seen. Several of the largest rose growers have already begun to throw out the old stock and replant. Lilies are good and bring \$2.50 per dozen stalks. Sweet peas experienced the quickest and biggest drop in prices they ever had two weeks ago, when they went down from \$2.50 per dozen bunches to 50 cents, but have recovered somewhat since.

Fick & Faber are undoubtedly bring-

ing in the longest-stemmed carnations on record. It is a seedling now in its fourth year, of very fine pink color, averaging three inches, the stems erect and between three and four feet long. Its name is Miss Louise Faber. Their white seedling, Purity, is better now than ever and commands the top prices for white. It will be sent out the coming spring. All other stock is looking well at their place in San Mateo.

At a recent meeting of the Pacific Coast Horticultural Society six new members were admitted and five proposed. Additional cash prizes were offered for the August show, which will be held in the Ferry building. An invitation of I. Rock was accepted for the next meeting. Mr. Rock has the largest nurseries near San Francisco, some 600 acres planted with shrubs and trees and general nursery stock.

Thomas Stevenson is preparing for a trip to England, where he will don his knee breeches and do homage to King Edward. He will sail on Saturday. We all hope he may regain his lost strength and enjoy his short stay.

Gustave Gagne is erecting a greenhouse 20x100 and a two-story dwelling for his increasing family and business.

John Berry now has hold of Pottet's place and is working like a beaver to get things in shape to suit him.

Edw. Schwerin has taken unto himself a bride and the couple are in Texas for a short honeymoon.

Goertzhain, of Redwood City has lost his first crop of sweet peas through heavy frost. GOLDEN GATE.

CAMBRIDGE, MASS.—H. E. Whiting, superintendent of public parks, has sent in his resignation and will go into business.

FARMINGTON, ILL.—Isaac Cook has bought Mrs. Heaton's greenhouse and stock, for removal to his property. Mrs. Cook will assist him in pushing the business.

### FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

**FRUIT GROWERS AND NURSERYMEN** owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

**GARDENERS AND FLORISTS** have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

**MILLERS AND GRAIN DEALERS** have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

**FARMERS OF THE COUNTRY** have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

**COLLEGE AND STATION WORKERS** will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

## OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

## At New York.

The following is the record of the three games bowled last Monday, May 26:

Player	1st	2d	3d
Hafner.....	194	181	202
Siebrecht.....	191	157	154
Lang.....	181	184	189
Bunyard.....	123	133	146

## At Jamestown, N. Y.

The silver cup has fallen to the rose growers, for they were 255 pins to the good at the conclusion of the series of games rolled during the past three months. The employes of the Lakeview Rose Gardens held a very successful ball on the evening of May 29.

## At Philadelphia.

The annual contest is beginning to loom up and from the account of scores noticed as the weeks fly by we will have to "get a hump on" if we shall retain our present championship title. President Westcott had best get his committee together and determine who shall comprise the team or select some method looking to the formation of one that shall be a credit to the club. Bowling goes on merrily and many good scores are being recorded. The most complete record is kept of each game bowled; in fact, every game is recorded and an average made up each month for the benefit of the members. An exciting match was bowled last Thursday by the "Friday-nighters" and the first team. The Mackereels had Geo. Moss and "Jack" Dunham, of the first team, but, although they put up a good game, they could not pull out winners and were defeated by seventy-four pins. The score follows:

FLORISTS	1st	2d	3d	T'1

## Utica, N. Y.

BUSY SEASON FOR THE GROWERS.—PLANTING OUT AT ITS HEIGHT.—BUSINESS GOOD EVERYWHERE.—MUCH BUILDING AND REMODELING IN PROGRESS.—GOOD STOCK THE RULE.—WHAT THE GROWERS ARE DOING.

The planting season is well under way and hustle, in all that this term implies, is the order of the day. Utica is rather tardy so far as favorable spring weather is concerned. Only two weeks ago frost made its re-appearance, leaving the imprint of its icy embrace upon the young carnation plants in the field; not enough, however, to cause irreparable damage. Business has never been better, as may be inferred from the fact of the additional houses that are being built and the gen-

eral overhauling and remodeling of places which is everywhere going on.

Wm. Pfeifer is regarded as one of the most successful carnation growers in this section. A glance at his stock certainly bears out this opinion, especially the Marquis and Lawson. Prosperity also seems to be grown on a prosperous basis at his place. Queen Louise is without a doubt the leading white. Mr. Pfeifer's right hand man, Wm. Kauffer, takes a great interest in the place, the result being high grade stock and in paying quantity.

J. C. Spencer, as usual, has things about his establishment in an attractive, up-to-date way. He is a staunch believer in the trite, though ever true saying, that "whatever is worth doing at all is worth doing well." His general stock, as a consequence, looks thrifty, healthy and well grown. Mr. Spencer has a scarlet carnation seedling which bids fair to rank among the best.

Wm. Mathews, of orchid fame, has no complaint whatever to register. His orchids, as usual, show up fine and pay well. His general stock is likewise in the pink of condition. Mr. Mathews contemplates rebuilding two orchid houses, and while at it will give his other houses some overhauling.

Peter Crowe is at it tooth and nail, building an additional range of rose houses to his already extensive place. As a rose grower Mr. Crowe's reputation is well established and, having dispensed with his retail store, he will give his entire attention to roses for the wholesale market.

Dr. A. W. Rowlands is building two additional rose houses, each 20x100. Dr. Rowlands' experience as a florist has been in no wise disappointing. His two carnation houses, built a year ago at Whitestown, a suburb of Utica, are remunerative, the stock being of high grade.

F. E. Shaw intends growing carnations on a larger scale than heretofore. While enjoying a fine retail trade, Mr. Shaw finds it profitable to grow for the wholesale market as well. His carnations invariably find a brisk demand at good prices. His general stock looks equally well.

Frank J. Baker, alderman, fern man, carnationist, rosarian and all-around good grower and good fellow, has in course of construction two additional fern

houses, each 28x100. Nine houses, each 18x150, are given to roses and carnations.

Chas. F. Seitzer, the veteran, reports a good all-around trade with plenty of stock to meet demands. He lost his only son, a young man in the twenties, shortly after New Year and, I am sure, has the sincere sympathy of every man in the craft. NOMIS.

WALLA WALLA, WASH.—The Phillips Floral Company, formerly C. W. Phillips, is building a 100-foot carnation house and making other important improvements in the plant.

FALL RIVER, MASS.—Charles Smith, former superintendent of Oak Grove Cemetery, has been appointed general superintendent of the park system and a contract has been closed with Olmsted Brothers for the planning and supervision of work of park improvement for a period of three years. Work was started on May 19.

LARGE CALL FOR PERENNIALS AND SHRUBBERY FOR SPRING. — EASTERN STOCK SLOW TO ARRIVE AND LOCAL FIRM PREPARES TO MEET DEMAND NEXT SEASON.—NOTES OF VARIOUS DOINGS IN THE TRADE.

The demand for shrubbery and perennials has been a marked feature of the spring trade. Our local landscape men have been overtaxed, partly because the demand has been beyond the most sanguine expectations. Having no well equipped local nursery, drafts upon eastern establishments have always been necessary and this season orders have been filled slowly, much of the stock arriving in bad condition. This is especially true of perennials wrapped in paper, which were badly mildewed before arrival, particularly divided clumps. The Holton & Hunkel Company has made preparations to supply dealers promptly with all they may require of this sort of stock in fall and spring seasons. This is an enterprise in which none of our western commission houses has as yet embarked. Holton & Hunkel are also handling palms and ferns, having leased the Whitnall greenhouse plant on Humboldt avenue, a portion of which is to be rebuilt and extensive additions made, to be completed by August 1. Among the working force one sees the familiar countenance of Wm. G. Schucht.

A new establishment has been opened in the center of the fashionable trading portion of the city, 115 Wisconsin street, under name of the Ellis Floral Company, taking its name from Wm. H. Ellis, late of Ellis & Pollworth.

The C. C. Pollworth Company's rose houses are still turning out good stock under Mr. Kennedy's management.

C. B. Whitnall will devote his time entirely to landscape work now that the greenhouse plant has been leased.

Nic Zweifle is adding one more span to his carnation plant. C. B. W.

WATERTOWN, CONN.—H. A. Roeske, who has bought the Violet Valley Greenhouses of his brother, Otto Roeske, is adding a new house 20x150 feet. The old range embraced 7,000 square feet of glass and three acres of land.

Washington.

TRADE ACTIVE BECAUSE OF MANY PUBLIC AND SOCIAL EVENTS.—NOTABLE FUNERAL CALLS FOR USE OF MANY FLOWERS.—STOCK PLENTIFUL BUT NONE TOO GOOD.—VARIOUS NOTES.

Trade is brightening up a little with the weather, which is getting quite warm, with a much needed rain, the ground being so dry that it keeps back spring planting very much. Everybody is making preparations for Memorial day. Funeral work still takes the lead, but the school commencements will come in for a share for the next few weeks. Roses in general are plentiful and fine, especially American Beauties. Carnations are very good, but outdoor stock is so plentiful that it keeps down the prices. The pæonias are coming in full tilt. The American Rose Company and J. Louis Loose are making fine shows at their stores with them.

A. Gude & Brother had the decoration of the French warship Goulois at Annapolis, May 23, using about 300 American Beauty and 1,000, other roses, pæonias and Harrisii. They also had the decoration for the dinner Friday night given by Ambassador Cambon, and made a large wreath of leucothæ which was placed at the Lafayette statue, and another placed on Washington's tomb.

The large barn of the American Rose Company was totally destroyed by fire on May 21, together with their two fine delivery wagons, harnesses and about \$600 worth of hay and corn. Luckily the nine horses were saved. Loss \$3,500; insurance \$800.

The American Rose Company supplied Ivory rose for the Rochambeau dinner at the White House, May 23, also 2,000 Crane carnations which they obtained from Pennock, of Philadelphia.

J. H. Small & Sons made a very large wreath for the Daughters of the American Revolution, used at the dedication of the Rochambeau monument.

The obsequies of Lord Pauncefoot created a demand for a great deal of funeral work of the finest sort.

Geo. Leisler had a fine lot of longiflorum lilies just right for Memorial day. P. G.

MADISON, N. J.—At the monthly meeting of the Morris County Gardeners' and Florists' Society, on May 14, State Entomologist Smith talked on insect pests and was listened to with much interest. The schedule of premiums for the fall exhibition was reported as ready for distribution. A goodly number of visitors were present.

ELECTROS...

**Buffalo.**

TRADE SHOWS LITTLE CHANGE.—WEATHER VARIABLE AND CEMETERY FLORISTS GETTING MOST OF MEMORIAL BUSINESS.—NOTES AND VISITORS.

Trade is about as last week, with a good demand for cheap stock. The weather has been very unsettled and the usual warning to customers not to fill lawn vases until after Memorial day, which is sometimes not appreciated, holds good. What promised to be a good demand for Memorial day was only a bubble and has burst. It looks as if the places near the cemeteries will have the largest trade, excepting at the market, which is always crowded with buyers.

Two greenhouses near the entrance to Forest Lawn Cemetery will make things lively, but both handle good stock.

Palmer is making nice window displays and Anderson is well supplied with Beauties, which look fine at night.

Visitors: Geo. W. Goldner, New York; E. J. Fancourt, Philadelphia; J. M. Gasser, Cleveland. **Bison!**

**Minneapolis.**

LARGE DEMAND FOR BEDDING MATERIAL.—BARGAIN SALES OF OUTDOOR VALLEY.—VARIOUS NOTES.

Last week the weather was warm and sultry and there was not a demand for cut flowers, but in bedding stock the call was heavy and the growers all report the largest portion of their plants already engaged and by Decoration day will be entirely cleaned out. Lily of the valley is a plentiful article in the cut flower market at present, it being outdoor grown and good clean stock. One dealer purchased a large quantity at \$4 per thousand and had a special sale at 15 cents per dozen spikes.

The Elks' fair and carnival, which opens June 2 and continues until June 14, will cause a good demand for flowers and many of the florists have engaged booths for the display of their stock.

A. S. Swanson has had a beautiful display of gloxinias in his window. **C. F. R.**

UTICA, N. Y.—George C. Boldt, florist at Heart Island, St. Lawrence river, reports a loss of \$500 in the May frost.

PORTLAND, ORE.—Announcements are out for the wedding of Lillian, daughter of Louis G. Pfunder, and William Ellis Mitchell, June 18.

**'MUMS! ROSES! SPECIAL!**  
Col. Appleton, 2½-inch, \$20.00 per 1000; rooted cutting, \$15.00 per 100. Maj. Bonnaffon, 2½-inch, \$18.00 per 1000; rooted cuttings, \$11.00 per 1000. Our selection in proper proportion of color, 2½-inch, \$20 per 1000; rooted cuttings, \$12.00 per 1000. 100,000 2½ and 3-inch Maids, Brides, Gates, Meteors, Perles and Beauties. 25,000 2½-inch Stevia and rooted cuttings, \$20 and \$12 per 1000. Printed price list furnished on application. Pöehlmann Bros. Co., Morion Grove and Chicago, Ill.

**Fancy-Leaved CALADIUMS and LARGE PALMS, Very Cheap.**

Fancy-leaved Caladiums, from 2½-inch pots, mixed, in good colors, at \$4.00 per 100. Very large PALMS at one-half their value. Will exchange or buy water lifting apparatus, if in good condition. Please address **F. J. ULBRICHT, Lock Box 113, ANNISTON, ALA.**

## St. Louis.

MARKET SHOWS VERY LITTLE CHANGE ALTHOUGH BOTH QUALITIES AND DEMAND IMPROVE SOMEWHAT.—NOTES OF DOINGS WITH THE GROWERS.—PLANT TRADE GOOD.

The market is in about the same condition this week as the two previous ones, although a little better stock is to be seen, and as high as \$4 to \$5 is obtained for the best roses and \$1 to \$1.50 for carnations. Some very good Beauties are being sent in and sell up to \$2.50 per dozen. Pæonias have not lasted very long this season; they now bring \$3 to \$4 per hundred. Sweet peas are coming in plentifully, but qualities and prices are not high. White stock has been going quite lively of late and therefore the market is at least not glutted in this direction. Some cape jasmines are to be had cheap.

The Michel Plant and Bulb Company has had a very good season. Most of their chrysanthemums are planted and their stock plants all out. They have grouped most of their large stock plants into several large beds and they make a very fine show. They still have some very fine geraniums in stock, but think they will be sold without any trouble, at \$1.50 per dozen retail.

The Egging Floral Company reports a very good spring trade, being still very busy, with a large force at work all the time. They had the decoration for the banquet of the trustees of the Missouri Botanical Garden on May 17.

Fred. H. Weber has shaken the dust of St. Louis from his feet, having gone to Kansas City to take charge of Mr. Kellogg's wholesale and retail store.

R. J. M.

NEWPORT, KY.—John Freis & Son, of the Highlands, has done the bedding work on the courthouse grounds in fine shape.

SPRINGFIELD, MASS.—George Reynolds, formerly of Sackett & Reynolds, one of the oldest landscape gardeners in Springfield, died on May 16, aged 79 years.

LUDWIG MOLLER, ERFURT, Germany

Columbus, O.

VARIOUS JOTTINGS AS TO THE STATE OF TRADE.—BEDDING PLANT DEMAND CONTINUES HEAVY.—MUCH GOOD STOCK SHOWN —CUT FLOWER STOCK SHORTENS UP.

A long looked and hoped for shower made its appearance this week, it being the first of the spring season, and the carnations in the field where no water is available are saved from what threatened to be an entire loss. Those who handle trees are lamenting, as the rain came too late to prevent a considerable mortality in freshly planted stock.

A good demand for cut stock still continues. Roses are getting poor, with carnations a close second, although a few of the latter are being shipped in from the north that are in pretty good condition.

Pæonias and other outdoor stock figured on for Memorial day are not yielding the crop hoped for and there will be a shortage in this section on account of the long season of dry weather.

The Livingston Seed Company is displaying a lot of bedding stock at their High street store, the rush in the seed department being somewhat diminished.

Hellenthal has about cleaned out his large stock of hybrid roses and Ramblers, the latter retailing at \$1 and readily bringing \$6 per dozen wholesale.

Good business is reported from every florist in and about this city. Bedding stock is holding out well, especially in geraniums.

Underwood Brothers had a fine lot of hydrangeas, of which those in bloom have all been disposed of. CARL.

OSKALOOSA, IA.—The Kemble Floral Company is preparing to begin the rebuilding of its entire plant immediately after Memorial day.

ALEXANDRIA, IND.—The Alexandria Greenhouse and Floral Company has been merged into a stock corporation by Ernest Marland and the new company will at once proceed to erect large greenhouses, presumably on South Harrison street. Five thousand dollars worth of stock has been subscribed, Ernest Marland being retained as manager, with J. G. Brannum, A. H. Jones, S. J. Mack, Virgil Wilson, F. P. Boyd, D. C. Jordan, Joseph Hall, J. H. Frank and J. F. Merker as stockholders.

 Please mention the American Florist when writing.

Los Angeles.

EVENTS AFFORD LITTLE PROFIT TO FLO-  
RISTS—STOCK DONATED OR SOLD VERY  
CHEAP.—PRICES DOWN TO THE ALL-  
SUMMER SCALE.—NOTES OF PERSONAL  
AND TRADE DOINGS.

The Fiesta and biennial meeting of the  
Parliament of Women's Clubs have come  
and gone. Each of these gave the florists  
some work, most of which may be said  
to have been unprofitable. The flowers  
for Fiesta were sold at very low prices,  
while for the Women's Clubs nearly all  
were donated. One grower gave 12,000  
carnations, and many gave smaller quan-  
tities. These events show the wonderful  
profusion of flowers. One day 10,000  
callas were used to decorate Simpson  
Tabernacle for the ladies' meetings.  
Prices on all cut flowers are now down  
to the summer level, carnations 35 cents  
to 50 cents per hundred; sweet peas \$1.50  
per thousand; roses \$1 to \$2 per hun-  
dred; splendid amaryllises 5 cents per  
stalk; centaureas 50 cents per hundred.  
Until very recently trade has kept up well  
and Decoration day, and then the June  
commencements, should liven up business  
to some extent.

Morris Goldenson has removed to a  
larger and in every way more desirable  
store at 229 West Third street, the  
change being necessitated by the increase  
in business.

Henry Christensen, who was in the  
florist business here for a number of  
years prior to his departure for Mexico,  
is visiting old friends.

E. R. Meserve has removed his green-  
houses from Pico Heights, Los Angeles,  
to Burnett Station, where they are now  
being rebuilt.

Miss Ethel Lord has sold a half interest  
in the Elysian Nursery and Gardens to  
Hugh Evans. The new firm will be Lord  
& Evans.

Chas. H. Cohen, a San Francisco  
florist visited old friends here during the  
Fiesta. D. R. M.

MANCHESTER, ILL.—John T. Cherry  
has had a fine season in his greenhouse  
department, having had a good local  
trade and shipped large quantities of cut  
blooms, principally to St. Louis. He is  
now giving his attention to trucking.  
He has already shipped 200 bushels of  
radishes to Chicago and has leased a  
piece of land on which he has five acres of  
onions and 100,000 celery plants.

"DORIC" HEATER.

**Profitable Greenhouses**  
"Gurney" greenhouses are profitable greenhouses because they're operated under the most economical conditions.  
**"Gurney" Heaters**

maintain an even heat with the least amount of care, burn a minimum amount of coal to maintain the desired temperature, require no brick setting, and are without question the most efficient constructions on the market. A host of nurserymen already use the "Gurney." If you're not on the list, send for catalogue and find out more about it. Gurneys promote the greatest hothouse success.

Boston As It Appears to a Philadelphian.

[An address by George C. Watson before the  
Philadelphia Florists' Club, June 2, 1902.]

The bonds of amity, political, commer-  
cial and otherwise, between the two  
great communities of Philadelphia and  
Boston, are numerous and ancient and  
cordial; but in no relation are these bonds  
more emphatic than in the field of gar-  
dening.

I use the word gardening in its broad-  
est meaning, which includes horticulture,  
floriculture, arboriculture and landscape  
gardening, or the art of laying out  
grounds. I use the word purposely  
because it is ancient and appropriate and  
catholic. I use it purposely because in  
recent years some people of pretensions  
would appear to be ashamed of it, while  
they on the contrary ought to be proud  
of it as being in its highest reaches equal  
in grandeur to its sister arts, music,  
poetry and painting.

And so, when a Philadelphian looking  
back on his city's ancient and modern  
achievements in gardening and feeling a  
sense of elation in contemplating the  
great figures that did their day's work so  
nobly in their chosen field, when this  
proud feeling is strong on him and he  
suddenly finds himself in the midst of that  
other great center of gardening, the city  
of Boston, he experiences a new feeling.

That new feeling is not envy; neither is  
it shame. It is a higher pride, a more  
exalted elation. The Philadelphian's  
pride is still there, but it is merged in  
the cosmopolitan glory of a common her-  
itage, for gardening knows no latitude  
and no longitude and the appreciative  
visitor cannot view the art as practiced  
in Boston and New England to day with-  
out feelings of the deepest respect and  
admiration.

To some it may appear difficult to say  
when one community has reached a  
higher stage than another in the difficult  
art of "gardening finely;" but a little  
reflection will reveal the distinction. Of  
the four grand divisions of gardening as  
laid down by London, horticulture, flori-  
culture, arboriculture and landscape gar-  
dening, the latter is undoubtedly the  
branch that calls for the highest order of  
talent. There are thousands in this coun-  
try who call themselves landscape gar-  
deners who are little more than kall gar-  
deners and who have but the faintest  
idea of the true significance of the term.  
Many of them know about as much about  
it as a cat does about the Lord's Prayer.  
When I speak of landscape gardeners,  
therefore, I do not mean the quack kind,

but those who have true taste and genius  
for their profession and they are rare  
indeed.

Now it is because Boston has produced  
most of the genius in that crowning  
branch of gardening that she takes rank  
as the mecca to which we all turn and  
worship. In one great man alone, the  
late Frederick Law Olmsted, Boston had  
a shining light that illuminated the  
remotest corners of the land with exam-  
ples of correct taste in the matter of lay-  
ing out grounds, both public and private.  
Many younger talents have been lighted  
from that torch and they are bidding fair  
to carry on the work on the sound prin-  
ciples laid down by Mr. Olmsted and  
other eminent men of the older genera-  
tion.

Monuments of the taste and liberality  
of the citizens of Boston in gardening are  
visible in every direction—in her park  
system, in her cemeteries, in her model  
suburban railroad station grounds and  
in her innumerable elegant private  
estates. Taking an impartial survey of  
the whole field I have no hesitation in  
saying that Boston is the most advanced  
community in gardening matters in North  
America if not in the world, and while  
Philadelphia was the mecca half a cen-  
tury ago and is still a good second, her  
citizens are as ready to applaud superior  
merit as they are capable of understand-  
ing such merit when they see it. This  
distinction is merited by Boston solely on  
the grounds of the higher culture in lan-  
dscape gardening.

Other cities outrank Boston in some  
branches of gardening by reason of cli-  
mate, location or other accidental cir-  
cumstance, but in most things it was  
Boston and Philadelphia that first  
showed them the way. The rigorous  
climate and rocky soil of Massachusetts  
called for gardeners of the right kind and  
that was the kind produced. We Phila-  
delphians are proud of our roll of great  
men in gardening, from Bartram, Hamil-  
ton, Jackson, Pierce, Marshall, McMahon  
down to Buist, Landreth, Meehan and  
others. In like manner, the Bostonians  
cherish an equally ancient and eminent  
golden scroll blazoned with such names  
as Endicott, Feneuil, Fessenden, Ken-  
rick, Breck, Hovey, Wilder, Manning,  
Olmsted, Hunnewell and dozens of others  
of notable importance in their contribu-  
tions to the art of gardening in the new  
world.

In seeking for the causes which pro-  
duced the present proud pre-eminence of  
Boston in gardening we naturally attach

much importance to her Horticultural Society, established in 1829, two years later than our own organization. While McMahon, of Philadelphia, published the first American book on gardening in 1806, Boston had the first periodical that treated on gardening extensively, "The New England Farmer," which was edited by Fessenden and Breck and led up to the formation of the Massachusetts Horticultural Society, which in turn influenced the founding of Mt. Auburn Cemetery, the first in America in the modern style as distinguished from the old-fashioned churchyard. Then for thirty odd years, from 1835 to 1868, we see "Hovey's Magazine" flourishing and shedding a great influence in the community just as "Meehan's Monthly" did here from 1859 to the present time. The character and standing of the men in the Boston society have always been of the highest order also and the effect of these influences on the modern community is quite apparent and most gratifying to contemplate.

These reflections are the result of a recent visit to Boston and my only excuse for troubling you with them is to remind you that each and every one of us has to strive to do his share in keeping the light burning however small the raggot he brings. The mere facts, or most of them, you knew before and I do not pretend to teach, only to remind you, and my experience is that it is reminding we all need more than teaching.

Now, in conclusion, I suppose you want to know how the world wags for your many friends in the trade about the Hub. I am glad to report all well; they have had a prosperous season and most of them are looking forward hopefully and planning bigger things for the future.

William Edgar has become the owner of a charming estate about half a mile from his present location and has the model place of North America already full-fledged under his bonnet. When finished you will all want to go and see it. New ideas, new methods, the utmost that a masterful mind and ample means can do in these expansive times, will be there, the model place of the day and a hearty welcome thrown in.

E. N. Pierce has his improvements about finished and you would hardly know the place now. A complete railway system is one of the unique features introduced. There's a main line down the center, with branches into each house on both sides. Pot plants by the hundred thousand are handled by this means with the greatest smoothness and dispatch. The only familiar thing I saw on this place was the old cupola over the office. It's still there and the owner dispenses as of yore his wit and wisdom from this lofty perch.

Fred. Mathieson is still on the retired list and occupying his time hoeing his potato patch for physical exercise and communing with the ancient philosophers for the good of his soul. A ripe experience, a well stored mind and a generous heart are a fine combination and an hour's chat on things in general with such a personality is one of the reconciling consolations of a vexatious world.

Mr. Mathieson also likes a good horse and complimented me by giving Euripidus and Cervantes and Ben Butler the shake for an afternoon drive to Auburndale and Newton, where we saw among others your old friend Elijah Wood, who had many kind inquiries to make about his Philadelphia friends.

Another day I went to Waban, where I

found Mr. Montgomery, affable as ever and busy with rebuilding. I saw the celebrated 700-foot house and it certainly was an eye-opener to stand at one end and look away into the distance so far that one could hardly see where it stopped. The Morgan rose is grown here very successfully on the side benches, and is grafted on Manetti. Morgan is apt to decay at the graft and I asked if the multiflora stock had been tried. Mr. Montgomery said it was too vigorous, flooded the plant too much with sap, gave it apoplexy, in fact, and spoiled its flowering capacity. Grafted roses are used almost exclusively and the difference in first cost is said not to be worth considering when compared with after results. Asparagus plumosus is grown to a considerable extent and the demand has always been ahead of supply. A com-

FREDERIC W. TAYLOR.  
Acting Chief of Horticulture, Louisiana Purchase  
Exposition.

plete refrigerating plant is a feature of the place, which, as you all know, is one of the largest and best conducted in the country.

I saw Mr. Foster's new nephrolepis on its native heath and was impressed with it. It is a very distinct and valuable development of the common Boston fern, with finely divided graceful pinnæ along the outer edges of the fronds. In addition it is an equally strong grower and seems to me to have all the other good points of the original with its own peculiar merits in addition.

The new Farquhar rose was on exhibition during my visit at the regular weekly show of the Horticultural Society and was awarded a silver medal. This rambler is the largest yet—being quite two inches in diameter, very double and of the liveliest bright pink imaginable, borne in large clusters and with the individual flowers on longer stems than Crimson Rambler, so that they could be used in design work. It will make a magnificent Easter plant and its vigor, hardness, etc., make it a sure winner for outside. The introducers (Messrs. Farquhar) will have over 100,000 plants ready for sending out next season.

My last Sunday I spent with Mr. Stewart at his country home in Winchester Highlands and I will not soon forget the

many interesting trees, shrubs and hardy plants he had to show me, each one with a history and known and loved like a personal friend. In fact, most of them were mementos of personal friends and had been gathered from the four corners of the earth to that little paradise on the hillside. On my way from the station to Mr. Stewart's I met in with a member of the Boston Micological Society gathering mushrooms on the roadside for his Sunday dinner and I don't know how it happened without any introduction, but pretty soon he and I were as thick as Kentucky colonels on the merits of the various species of that toothsome esculent so that I was for a while in some danger of completely forgetting what I had gone to Winchester for. I am very glad I did remember, however, else the micological man might have invited me to dinner and tried his mushrooms on me and in that case, well there's no telling, I'm no Captain McIlvalne and can't undertake to tell all the four hundred and odd species of mushrooms on the spur of the moment.

Of course I saw Warren Ewell, and the Welches, and the Nortons, and "Tom" Cox, and "Jim" Rough and "Sam" Neil, and Lawrence Cotter and George Sutherland and "Nick" McCarthy and a whole lot of other celebrities too numerous to mention and they all put on an added sprightliness when they heard there was a Philadelphian about and nothing in the house was too good. I'm afraid I reaped some of the harvest sown by the rest of you in days past when it was your pleasure to play host, but anyhow the fatted calf was there and the national flower of Kentucky, the mint julep and the sacred codfish and the Festive Fagus, not forgetting a welsh rabbit with all its feathers on, and Professor Elson with no frills at all on, but with a voice that would make the Grampian Hills dance and sing with joy.

So you see I had other dangers on my journey besides the usual fire, flood, har-ratry, and Queen's enemies and came very near being killed with kindness. I'm thankful to be back home again for after all wherever we roam, my friends, there's no place like Philadelphia.

#### The St. Louis World's Fair.

Official announcement has been made that the St. Louis World's Fair will not be held until 1904. No class of exhibitors will be more benefited by the change to a later date than those who will make the outdoor horticultural exhibits. It is, therefore, a pleasure to make this announcement to them, and to call attention to the arrangements which are to be made for them.

The great area of the grounds, over 1,000 acres, and their beautiful contour, will furnish by far the best setting for outdoor exhibits of trees, shrubs and plants ever given by any exhibition. There are exposures in every direction, as well as considerable stretches of level ground, giving locations to meet every requirement. In cases where for special reasons planting should be made in the fall of 1902, every effort will be made by the department to meet the requirements. For the spring of 1903 it is expected that everything will be in readiness for all the planting that should be made at that time. This will include practically all trees and shrubs, as well as many of the hardy perennials. Planting at that time will ensure thorough establishment. Every facility in the way of soil, abundant water, etc., will be provided,

TREES IN THE NURSERYMEN'S CONVENTION CITY.

(The County Court House, Milwaukee, Wis., and surrounding.)

and an earnest effort made to render every needed assistance by the management. In due time special rules will be issued covering this class of exhibits, but in the meantime the following general observations may be made:

Exhibitors will be expected to deliver all stock, which has been accepted for exhibit, at the exposition grounds, all charges paid. This department will, when desired, receive, unbox, plant and care for all such exhibits, or should the exhibitor prefer, he may retain charge of the planting and care of his exhibit. In all cases the exhibits, as well as the persons in charge of them, will be under the jurisdiction of the chief of the department of horticulture, and subject to such rules and regulations as may be from time to time promulgated.

The department of horticulture will maintain a sufficient corps of competent gardeners and workmen to give proper care to all outdoor exhibits.

The early springs at St. Louis, as well as the long summers, supply an ideal opportunity to display to the best possible advantage all this great class of decorative and ornamental trees and plants, and it is sincerely hoped that the nurserymen of the country will do their part toward bringing about the splendid results that may be attained.

The acting chief of the department has been requested by President Berckmans to present the subject "The Nursery Interests at the St. Louis World's Fair" at the meeting of the American Association of Nurserymen at Milwaukee, June 11 to 13. Those who think of exhibiting are asked to make themselves known. His badge number will be 136.

FREDERIC W. TAYLOR, Acting Chief.

#### The Trees of Milwaukee.

The city in which the nurserymen will convene on June 11 is peculiarly interesting to the craft on account of its trees. Although the city is famous for several things, the chief interest for the nurserymen will be the luxuriant foliage and the abundance of it. While it is called the Cream City, on account of the color of its brick, it might be called the Elm City. While there are many other varieties, the elm predominates. The chief reason, however, that it is so conspicuous is that the old settlers made use of it and their plantations have developed into most beautiful monuments. The impatient planted soft maple, the level-headed planted elms and the careless planted Lombardy poplars. Of the thousands of Lombardy poplars planted we seldom ever find one growing in a place suited to its general characteristics. While there are a few native oaks, none were planted until one gardener the last three years has been using the pin oak, the linden and hard maple. They will notice many cut-leaved weeping birches planted in groups of three, which has been quite a fad here for years, while Wier's cut-leaved maple is comparatively little known. One essential the nurserymen will find too conspicuous by its absence. That is, scientific care of trees. This is not only true of the multitude of trees under private ownership but particularly in our parks. While much is being done in new work, the old settlers are allowed to perish.

There are also quantities of well developed shrubbery, although comparatively little attention was paid to shrubbery until the past five years. The meeting of the American Outdoor Art Association

last summer gave quite an impetus to ornamental planting. As one drives around he can see that people are thinking more of the fitness of things and striving for harmony rather than falling in line for some particular fad. C. B. W.

#### Notes on Aquatics.

The conditions of the weather for the month of May have been normal and on the whole it has been a very favorable spring, although locally there has been a deficiency of rainfall and in some sections late frosts. In our section we are occasionally favored with a few flowers of *Nymphaea pygmaea* and *N. Laydekeri* in April, but this year it was the first week in May. Although many perennial hardy plants and shrubs and trees are in flower at this period, the nymphæas have an irresistible attraction and charm of their own and the first flowers are more welcome than the first flowers of spring.

Although *N. Laydekeri rosca* is still limited in production, and the price higher than some varieties of later introduction, it is most interesting and has its own distinctive merits and attractiveness. It is pre-eminently the earliest flowering water lily, one of the brightest and most attractive in color, can be grown in a small tub or planted in a natural pond, can always be depended upon not to overstep its boundary, is perfectly hardy and a single plant will continue to grow and flower without interruption from early spring to late fall, with little or no variation in size or color of flower. A pond with half a dozen or more plants at this season of the year eclipses anything else in the way of aquatic gardening. Outside of this variety there are but a few straggling flowers on other varieties,

the European sort *N. alba* having precedence.

Hardy varieties planted late in April and early May are making satisfactory progress, yet there are instances where too much haste has resulted in failure or nearly so. Especially is this the case with nelumbiums. As it has been frequently stated, nelumbiums are very impatient of removal and whenever dug and subjected to transportation and a decided change in temperature not conducive to new growth, it invariably tends to the deterioration and decay of the tuber. The early part of May was not altogether ideal weather for transplanting and shipping, and April was far from propitious, yet many were called for, and great risks were taken, excepting in southern states, and where tubers were planted indoors.

Too much haste was again evinced by planting the tender nymphæas in May and already complaints are heard that plants are not doing satisfactorily. It is not safe to plant tender nymphæas out of doors without artificial heat in the middle Atlantic states until the last week of May; the first week in June may even be better. Conditions of the weather and temperature of the water must be taken into account.

Victorias are, of course, the last in the line of planting, especially where no artificial heat is at command, and the middle to the end of June is early enough. Failure may attend our best efforts and often plants suffer when planted in a new pond, constructed with masonry, through want of thought. Lime or the caustic properties of cement will kill both animal and vegetable life. After the work is completed and the cement "set," fill with water and let it stand two or three days, then draw it off and refill before venturing to plant.

Now is a good time to plant tender nymphæas, also hardy varieties; in fact, this operation may be continued all summer and where nelumbiums are desired and tubers not procurable, established pot-grown plants will prove most satisfactory.

Look out for leaf miners on water lily leaves. Their presence may be easily detected by a kind of scrollwork over the leaf. On examination it will be found that these insects, or rather the larvæ of an insect, a small fly, has cut channels in all directions and devoured so much of the leaf in its path. Of course leaves chewed up in such a fashion are very unsightly, but that is not all, as it means the loss of these leaves to the plant. A simple remedy may be found by the use of kerosene emulsion and if the early broods are destroyed much trouble and annoyance is saved later on, besides much benefit accruing to the plant.

Among marginal plants and plants for shallow water or grown in submerged tubs no plant lend such graceful plumage as *Papyrus antiquorum*. Planted on the margin of the pond in wet ground it grows rapidly and attains a height of six to eight feet. It may also be planted in tubs and submerged in the pond but should not be more than six inches under water. Such plants are liable to be blown over if tubs or boxes are not firmly placed. It is also a most desirable plant grown in a tub sunken in the ground and kept well supplied with water. *Cyperus alternifolius*, the umbrella plant, makes a very ornamental plant grown under the same conditions and will attain a height of four to five feet.

Tub culture of water lilies has been but little urged or advocated in these columns

and as many beginners have adopted this method with but partial success I venture to give some reasons or causes of failure. One of these is that the selection of plants and varieties of nymphæas has not been suitable for the purpose. Vigorous plants, or such that make rapid growth and produce large plants, are too often selected instead of the moderate growers that produce small flowers. Very often the less expensive varieties are selected for trial. These, embracing the odorata section, are very beautiful in their native haunts but are certainly not at home in a tub; neither is the Egyptian or any lotus without special care.

Another cause of failure is the extreme heat the plants are subjected to. The

WHITE GRUBS FEEDING AT ROOT OF ASTER PLANT.  
(Reproduced from bulletin of the New York Experiment Station.)

small quantity of water in the tub is quickly heated by the sunshine and the temperature will rise above 90°. It also rapidly cools at sundown and may drop below 60° before the next morning. Such extremes are not good for plants. Where plants are grown in tubs it will be well to use some floating plant for surfacing the water until the leaves of the water lilies cover the surface.

It should be borne in mind that the hardy varieties cease blooming when hot weather sets in and that the best hardy native water lilies, especially the Cape Cod pink lily, thrives nowhere as well as it does in Massachusetts and probably at Cape Cod. Why? To succeed in the culture of this charming lily and other hardy lilies. We must consult nature, and follow such dictates in the artificial production.

The results achieved at the Pan-American Exposition last season may have been brought about more or less by natural causes, local conditions, but the fact remains that hardy nymphæas can be successfully grown and make a continuous good display till the close of the season.

WM. TRICKER.

#### White Grubs Attacking Aster Plants.

The larvæ of the May beetle and allied species feed upon the roots of a large variety of plants, according to a recent bulletin of the New York Experiment Station. The adults or beetles feed upon the leaves of many trees and shrubs. In western New York nursery stock, especially young fruit trees, is often seriously injured. The grubs of the species above referred to are evidently the most numerous and consequently do the most damage. They feed upon the roots, often eating the main root nearly off.

The field of asters in question that was injured by the grubs is located on the outskirts of Geneva, N. Y. It contained about 20,000 plants of several varieties. The soil was principally sandy loam. The year previous a crop of nursery trees had been removed from the field. The aster plants began to show injury from the work of the beetles about the middle of July. The injured plants began to wilt suddenly and soon died. Examinations made during the latter part of July showed about ten per cent of the plants injured. Later a few more plants were destroyed by the grubs, making the percentage of injured plants somewhat higher. The grubs were usually found feeding at the crown of the root and for a short distance above. The accompanying illustration shows two grubs, natural size, feeding. In every case the bark had been eaten off all the way around the stem and in many cases the stem was completely severed. From one to four grubs were found at each plant.

The grubs were nearly all full grown and hence were in their second year. If left undisturbed they would have emerged as beetles the year following. The eggs were laid in the ground during the spring of the year previous and the young grubs were evidently supplied with food by the roots of the nursery trees. The removal of the trees took this food away from them, which meant that the crop that followed the next year would be sure to be injured by them.

No attempt was made to revive the injured aster plants, but as soon as one was observed to be wilting it was dug out and the grubs destroyed. By going over the field every day for about a week during the middle of July large numbers of the grubs were killed; probably most of them, as there was but comparatively little injury later. White grubs are difficult to check after a field has become infested. Prevention is by far the most satisfactory. If land is left in meadow for several years it is more apt to become seriously infested than if a short rotation of crops is practiced.

#### Herbaceous Plant Notes.

One of our neatest hardy plants at present in bloom is the light pink *Valeriana montana*. Although an old plant it is, like so many other perennials, hardly known, even by professionals, but surely it deserves to be grown in every garden, large or small. The plant is compact and clean in growth, has oblong, slightly toothed leaves, the stems are erect, twelve to fifteen inches high, bearing numerous flowers, shaped like those of *V. officinalis*, in dense, branched short panicles. Being a most useful cut flower and a very profuse bloomer, it seems strange that it has not yet found its way to the front. There is not the least difficulty in growing it to perfection, as any ordinary garden soil, even if rather poor, will grow the plants. They are never injured by our

TREES IN THE NURSERYMEN'S CONVENTION CITY.

(Looking south on Milwaukee Street, Milwaukee, Wis.)

most severe winters and require no special care at any time.

Another serviceable outdoor cut flower we have is the early blooming *Anthemis Cupaniana*, also but little known. The flowers are large, daisy-like, white with a yellow disk, as freely produced, but earlier than those of the yellow *A. tinctoria*. The foliage, too, is more graceful than in the last named, longer, arching and silvery, pinnately cut and divided and the whole plant is more ornamental. It attains a height of from fifteen to eighteen inches.

The pretty little *Pentstemon humilis*, flowers beautiful blue with a purple throat, borne on three to five-flowered peduncles all along the slender, slightly branched stems, has been out for a week or longer now. It is the earliest pentstemon I know of, an elegant but dwarf species and also rare and little known. The leaves are small, lance-shaped and pale green. It is said to be related to the better known *P. gracilis*, but the latter is a late summer and fall bloomer, while the species under consideration flowers very early and again later in the season. Its height is only from six to ten inches, including the flower stems.

*Veronica Teucrium* follows closely after *V. Chamædrys*, of which I wrote in my last notes. The deep blue flowers are produced in dense spikes and last for about six weeks. It is a low-spreading, ground-covering species, but the flower-stems grow erect and are self-supporting, eight to twelve inches high. The flowers keep well after being cut. We seldom meet with the true species in gardens. I have seen five or six different species under this name in various collections.

*Crucianella stylosa* is a most profuse bloomer, decidedly showy with its terminal crimson pink heads of flowers, which are about an inch in diameter. Occasionally we see this plant under the name of *Asperula stylosa*; *crucianella*, however, is the correct name. Its growth is rambling but it covers the ground effectually, will spread over rock or stones very fast, forming a dense mat. For many purposes this is a desirable plant, still we rarely see it employed anywhere. J. B. K.

#### Pennsylvania Horticultural Society.

The usual May meeting of the above society was held at Horticultural Hall, Philadelphia, May 20, with a good attendance of gardeners and florists and a creditable exhibit of plants, flowers and vegetables. Henry F. Michell occupied the chair. Professor Stewardson Brown, the society's botanist, gave an interesting lecture entitled "Influence of Environment on Plant Variation." An important and interesting exhibit was the new fern "Anna Foster" from L. H. Foster, Dorchester, Mass. A sport from the Boston fern, its much divided pinnae give it a very graceful and feathery appearance. A certificate of merit was awarded by the committee. Well grown *Calceolaria hybrida* from Wm. Robertson, gardener to J. W. Pepper, Jenkintown, took a first prize. *Calceolaria rugosa*, best pair, was won by John Thatcher, gardener to E. Le Bontilier, Wynnewood, with splendid plants. An intermediate form of *calceolaria* from Ernest Schriber, gardener to W. L. Elkins, Ogontz, were well grown and received a prize. An extensive display of

cauliflower for the Dreer and Michell prizes showed strong competition, John McCleary and George Robertson each taking a first prize. Lorillard tomatoes from F. Canning, fine asparagus from E. Uffler and several vases of cut flowers completed the display. The vase of sweet sultans from Geo. Morrison, gardener to Curwen Stoddart, Rydal, with three-foot stems, were exceptionally well grown.

The American Rose Society has determined to hold exhibitions, which have proved such a success at New York, at different cities, in order to increase the sphere of usefulness. This announcement came through Robert Craig, who made a motion that the American Rose Society be invited to hold its exhibition next year in conjunction with the Pennsylvania Horticultural Society's spring show. This was unanimously adopted and many members present expressed themselves as being delighted with the prospect of having such an important event in our city. FRANCIS CANNING.

#### Horticultural Society of New York.

The following arrangements have been made for the meeting at the New York Botanical Garden, Wednesday, June 11. Members and their friends leaving the Grand Central Station, Harlem division, by the 1:35 p. m. train for Bronx Park Station will be met by James Wood, president of the society, and escorted to the herbaceous ground and hemlock grove. Those leaving Grand Central Station by the 2:35 p. m. train will be met at Bronx Park Station by Dr. N. L. Britton, Director in Chief, New York Botanical Garden. The formal meeting

will commence in the lecture hall of the Museum building at 4:15 o'clock, and will be followed by an address on "Horticultural Prospects," by the president of the society. Members and their friends leaving Grand Central Station by the 3:35 p. m. train will arrive in time for the formal meeting. The council of the society will meet in the administration office, Museum building, at 3:15 o'clock. The museum, library, herbarium and laboratories in the Museum building will be open for inspection until 6:30 o'clock.

An exhibition will be held in connection with the meeting, in the hall of the Museum building immediately adjoining the lecture hall. This exhibition will be open from 1 p. m. until 6:30 p. m. on Wednesday, June 11, and from 10 a. m. until 5 p. m. Thursday, June 12. Members of all allied and kindred organizations are invited to be present.

The premium list includes, besides classes for cut roses, pæonias and flowering shrubs and wild flowers, classes for strawberries and vegetables. The American Rose Society's silver medal is offered for the best collection of garden roses. George Skene will have charge of the arrangements on the part of the New York Botanical Garden.

#### Floriculture in Oklahoma.

How many persons have any conception of the state of floricultural affairs in Oklahoma? Doubtless it has not occurred to many that the southwest offers a congenial soil in which florists' establishments may take root and thrive. The average person east of the Missouri probably knows no more of this fertile

the population is less than eleven to the square mile.

It is not every ten-year-old community that supports florists as progressive as any in the country, but Guthrie, the capital of Oklahoma, with its 10,000 population provides a splendid business for Furrow Brothers, who have built up a range of 10,000 feet of glass, the largest greenhouse establishment in the territory, growing principally carnations and chrysanthemums but including such items of miscellaneous stock as are essential to a rapidly developing retail business. One of the accompanying illustrations is a view in their show house, another is from a photograph taken in the cool room, showing a day's cut in April, and the third is a view in a thoroughly modern carnation house added to the plant last year. Two older houses have this year been planted to Armazindy, which does remarkably well, producing fine, large blooms on long, strong stems and in the greatest profusion.

In the autumn chrysanthemums are the principal crop and there are now ready for benching 11,000 plants of the leading varieties, which will be grown to single stem for fall. A new house 16x100 is now going up for this stock. Another branch of the business is mushroom growing, which is also one of the best of their successes, and, just to keep things moving in summer, they grow ten acres in beans, onions, rhubarb and ornamentals.

Furrow Brothers believe that their territory is the garden spot of the universe and that Oklahoma is destined to be one of the greatest states in the Union. It is certain to maintain its

A CARNATION HOUSE OF FURROW BROS., GUTHRIE, OKLAHOMA.

land than that politically it is a territory organized out of the western portion of Indian Territory. Those who have good memory for dates may recall that this was in May, 1890, and that the population then was slightly above 60,000, more than 13,000 of whom were red men. He doubtless still thinks of it as the home of the Indian, but as a matter of fact the original American now has no home; he has been crowded out of Oklahoma by the 335,000 whites who have settled there in the past ten years, although there is still room to grow, for

present rate of development at least for some years to come and to afford a rich and fallow field for the horticulturist. It is the intention of the firm to maintain its expanding business in step with the progress of the community and here we may one day find the greatest floricultural establishment of the whole southwest.

LA CROSSE, WIS.—The newspaper reports of damage inflicted by the recent storm were greatly exaggerated. There was no injury done to greenhouse property.

#### Memorial Day Business.

READING, PA.—Henry J. Huesman reports Memorial day trade about the same as last year, there being a large supply of outdoor flowers.

ELMIRA, N. Y.—H. N. Hoffman says that in his experience Memorial day trade showed an increase of twenty per cent in the amount of bedding and vase work and that the call for cut flowers was fully up to the average.

BATAVIA, ILL.—Memorial day trade was much heavier than a year ago; McAllister & Company say double. They sold out of cut flowers early in the day and every 4 inch geranium went, with many in 2½-inch pots.

PUEBLO, COL.—The business of the week in which Memorial day came was double that of a year ago, possibly largely due to fine weather. Twice as much bedding stock as last year was sold and all cut flowers were cleaned up. There was a brisk call for carnations at 75 cents a dozen.

ALTON, ILL.—Cut flower sales for Memorial day largely exceeded those of a year ago. The scarcity of pæonias and outdoor flowers in general gave the florists a chance to sell out their entire stock at fair prices. Joseph Krug says he was kept busy until the middle of the afternoon on Memorial day.

SCHENECTADY, N. Y.—Business is very good here this season, has been so all winter and spring. J. E. Felthousen says it is running double last year with him and that Memorial day was at least three times as heavy as usual. This may be in part accounted for by the late frosts, which cleaned up the outdoor stock and left the field clear for florists' material.

BINGHAMTON, N. Y.—S. G. Ellis thinks the only complaint as to the business of the last week of May is that sufficient stock was not obtainable. Because of late frosts there was little bloom on flowering shrubs, no pæonias and lilacs past. Carnations and roses were the principal cut flowers available and every potted plant was sold that had a flower.

BELLEVILLE, ILL.—E. W. Guy says that all the local florists shared in the good business for Memorial day and just preceding. He estimates sales as at least one-fourth larger than a year ago, with prices about at the level usual at the season. The demand for carnations was far greater than the supply. Bedding plants also sold well, good geraniums being scarce.

ROCKFORD, ILL.—Because of cold and unfavorable weather bedding out was scarcely begun before May 20 and everyone had all he could handle in the ten days before Memorial day, the bedding and vase filling in the cemeteries far exceeding any previous year. J. J. Soper figures the Decoration day business as twenty per cent greater than last year, all blooming plants being cleaned up. Geraniums in 2-inch pots sold at \$1 a dozen and those in 4-inch at \$1.50.

NEWTON, MASS.—Memorial day trade was only about sixty per cent as good as last year. F. W. Fletcher & Company report many inquiries but few sales of cut flowers. If they could have sold roses at 50 cents and good carnations at 25 cents per dozen, they say they could have done a land office business. The present high prices of necessities is undoubtedly causing a lessened demand for flowers. Mr. Fletcher thinks that if the trusts are not soon restrained there will be a lot of unhappy florists.

A DAY'S CUT OF FURROW BROS., GUTHRIE, OKLAHOMA.

#### Bo ton.

GROSS SALES OF MEMORIAL MATERIAL EXCEED CHRISTMAS AND EASTER RECORDS.—ALMOST ALL LINES CLEANED OUT.—SHORTAGE RELIEVED EARLY THIS WEEK—OVERSUPPLY NOW AT HAND.—SHRUBS IN BLOOM IN THE PARKS—FINE SHOW OF EARLY BLOOM.—WATER LILIES JUST BEGINNING.

Memorial day trade is still a timely subject and it is pleasant to be able to record that the great floral holiday went this year far beyond any previous record in the quantity and value of flowers sold in this section. Not only was it the greatest Memorial day on record, but the oldest wholesale house in Boston reports it as the biggest holiday of any kind in its history, over-topping by many hundreds of dollars any Christmas or Easter trade. To do this at the low valuation of flowers at this season required the handling of a quantity of material vast beyond the comprehension of anyone not on the spot and distant markets were heavily drawn upon for roses, pæonias and carnations. The usual Memorial day fate befell lily of the valley, of which large quantities were unsalable. Deutzia and astilbe, also white stocks, were badly left, too, there being entirely too much of this cheap white material exactly in season. Outside of these things the market was cleaned bare of about everything.

On Saturday, the day after the holiday, there was a sharp stringency in the early morning and stiff prices were realized for such material as was available, but as the day wore on values began to descend rapidly, until the close of the day, when they had nearly reached the vanishing point, since which time demoralization has held sway, the weather being exceedingly hot, and the product which had been retarded by last week's cold wave is coming in with a vengeance, the quality being inferior and showing the effects of the wilting temperature. The weddings and similar festivities have not yet "got a gait on" and it would seem that there is stock enough in sight to take care of any possible demand ten times over, as it is unlikely that growers of any extent will throw out their plants until after the school exercises are over. So, if anybody needs flowers of any kind he can depend on getting his wants supplied if he will confide his needs to any of our Boston advertisers.

*Viburnum tomentosum*, the most beautiful of all viburnums, of which *plicatum* is the sterile form, has been blooming

regally in the parkway plantations during the past week. *Viburnum Opulus* is also flowering with unusual freedom and makes a glorious display. *V. pubescens* is another one, with numerous small white flowerheads, blooming at the same time. Many of the roses are now beginning to open, *R. rugosa*, *R. cinnamomea* and *R. nitida* leading the procession, which will make a gorgeous spectacle in about ten days. In the meadows along the Back Bay ferns, tamarisk has been planted freely and its feathery effect in bloom is very pleasing. Weigelas, *Lonicera Morrowii* and the hardy azaleas, particularly the gorgeous *Azalea calendulacea*, are among the other present attractions of the shrubbery borders.

The dogwoods and cercises are all through and the latest and best of the pyruses, Bechtel's double flowering crab, is just dropping its bloom, but many of the thorns are blooming on the fringe of the woodlands and they make a fine show. *Rhododendrons* are out fully a week ahead of their average blooming time. Among the early bloomers which seem to have withstood the hard winter

without noticeable injury are *Everestianum*, *F. L. Ames*, *Mrs. Milner*, *Chas. Baglev*, *Vardon*, *Atrosanguinea*, *Hannibal*, *Henrietta Sargent*, *Melton*, *Album elegans*, *Album grandiflorum* and *Lady Grey Egerton*. *Lady Armstrong* is blooming perfectly, also, where the plants are alive, but several plants are wholly dead, the cause being not apparent. The variety is beautiful enough, however, to be retained.

The water lilies, just beginning to bloom in Wards' Pond, are a prime attraction for park visitors. The first to open are the *Marliac* hybrids and in a few days more of sunshiny weather there will be a host of flowers. On the edges of the pond clumps of white and yellow irises are blooming among the sedges, *lythrums* and other water-loving subjects.

#### New York.

DECORATION DAY BROUGHT A FAIR AMOUNT OF BUSINESS.—STOCK NOW ACCUMULATES WHILE QUALITIES RETROGRADE.—WHAT IS GOING ON IN MARKET.—CLUB MEETING MONDAY.—DOINGS OF GROWERS AND RETAILERS—MANY PERSONAL ITEMS OF VARYING INTEREST.—NOTES HERE AND THERE.

The weather has turned hot again and prices and stock are sharply on the down grade. On Saturday stock cleaned up fairly, coming, as it did, after a holiday, but this week, practically the first of summer, will be proverbial as to market conditions. The atmospheric changes of the past month have had their effect on roses and mildew is the rule rather than the exception. June weddings should help out to a certain degree, but the rank and file in general lines will go by the board. *Top Beauties* bring at times \$15 per hundred; *Bridesmaids* and *Brides*, specials, \$5; *Golden Gates*, \$4 to \$5; straight slips of roses 50 cents to \$1 per hundred. *Carnations* are off, tancies selling slow at \$1 per hundred and ordinary stock at 25 cents to 50 cents per hundred. *Pæonias* are received in large quantities and selling cheap. *Smilax* is selling fairly well and lily of the valley is doing as well as anything at \$4

SHOW ROOM OF FURROW BROS., GUTHRIE, OKLAHOMA.

per hundred. A few hybrid roses are to be seen, and some outdoor Jacqs. are among the flotsam and jetsam. Orchids clear up, as there are few to be had, cattleyas having, as usual, the call. Decoration day passed off fairly well but the majority of the stores in the wholesale district were closed at 12 o'clock. "Decoration day ain't what it used to be," said an old timer. In fact the ordinary old timer would scarcely recognize the trade as it is to day.

John Scott, of Keap Street Greenhouse fame, is turning out an enormous quantity of stock at his greenhouses in Flatbush as well as at the old place at Keap street. The number of seedling ferns that will be in condition to offer next month is estimated at half a million and later on there will be 10,000 rubbers. Pandanus Veitchii, Dracæna Lindenii and a big shoal of seedling kentias are among the specialties that catch the eye of the visitor. Mr. Scott shows with much pride a new form of the Boston fern to which he has given the name of Nephrolepis exaltata Scottii. It is much more dense in growth than the type, of compact habit, and the fronds are narrow and graceful.

Frank H. Traendly, chairman of the outing and excursion committee, reports a steady increase in the demand for tickets. The outlook is bright for a large party. To speak in the vernacular, I understand he has a dark horse and unknown in training to accept the challenge of Theo. Lang, the contest to be bowled off at the Grove. The secretary also reports that contributions for prizes are being received, all the way from a pair of suspenders to a jackknife.

The regular monthly meeting of the New York Florists' Club will occur Monday evening, June 9, and President Sheridan reports that he has secured a temporary meeting room at the Civic hall, 128 East Twenty-eighth street, between Fourth avenue and Lexington, with the option of a lease. Important committees will make reports and preparations made for the trip to Asheville.

Charles Dards met with a serious accident last Sunday afternoon, while driving with his daughter and two friends at his home in New Rochelle. The horses shied at a trolley car and overturned the carriage, dragging Mr. Dards, who was clinging to the reins. He received a bad scalp wound and other contusions. Miss Dards, too, received some severe bruises.

Charles A. Bird, of Hallinan's, made two huge floral horseshoes this week for friends of Chas. F. Murphy, the Tamany leader. They contained over 1,500 roses, one being ten feet high and six feet broad, the other eight feet high. The big designs were delivered at Tamany Hall just before a meeting of the triumvirate of which the recipient is chairman.

Mr. Trumppore, the popular buyer for J. H. Small & Sons, is fondly exhibiting a white sport of the Lawson carnation. It is said that this is the second to be shown from two different places in this city. It is certainly a good thing as it has all the good attributes of its parent.

I regret to note the death of Max Lowenthal, on May 28, from pneumonia and a complication of diseases. He was well known in the trade, having been bookkeeper for Reed & Keller for over six years and lately with Maximilian Limprecht.

Isabel Louise Siebrecht, daughter of Henry A. Siebrecht, and William Stanley Munroe were married at Rose Hill, New Rochelle, N. Y., Wednesday evening, June

4. About 300 guests were present and the presents were both numerous and rich.

Those who have called on the redoubtable Louis Schmutz report him progressing very favorably. His only fears are that the recent accident will shorten his legs.

"Johnny" Kral, who has been on the sick list, expects to return to work with Mr. McConnell, of the New York Cut Flower Company, sometime during the week.

The New York Cut Flower Company announces that on and after June 15 and during the summer months they will close at 4 o'clock in the afternoon.

C. B. Weathered left on Wednesday for an extensive western business trip.

Visitors: J. S. Wilson, Chicago; R. E. Loeben, Gloversville, N. Y.; Benj. Dorrance, Dorranceton, Pa.

#### Chicago.

MEMORIAL DAY MAKES A PLACE FOR MORE CUT FLOWERS THAN EITHER CHRISTMAS OR EASTER.—LOW PRICES THE ONLY FAULT TO BE FOUND.—ROSES TOO SOFT TO SHIP AND CARNATIONS AVERAGE LOW BUT AGGREGATE OF SALES AHEAD OF LAST YEAR.—SHIPPING DEMAND VERY HEAVY.—STOCK NOW ON THE IMPROVE.—PÆONIAS THE FAVORITE FLOWER.—JUNE PROMISES WELL.—DOINGS OF VARYING INTEREST.

The summing-up shows that Memorial day is entitled to first place as to quantity of flowers consumed this year. None of the holidays touch it—Christmas or Easter—only it does not run into so much money. Every house in town had all the business it could handle and at the last minute the rush of telegraphic orders precluded anything like exact meeting of requirements. It used to make the wholesalers fear for the safety of their trade if they couldn't fill holiday orders, but now, bearing in mind that practically every house is in the same situation, they feel comforted when the total of the season's business is ahead of expectations, and this was very generally the case at Memorial day, although most of the houses were practically without roses fit to ship and did not attempt to meet this portion of the demand. Another feature which makes the aggregate of sales more surprising was that carnations averaged a full dollar a hundred less than they did a year ago. There were larger quantities at hand than ever before, and on advance orders the requirements were less than usual, but as the condition of the rose market became apparent and pæonias ran low the buying became very heavy and a good many late orders went unfilled in some houses, although buying was checked the moment the price was put above \$2 per hundred for ordinarily good stock. By closing time on Friday all the odds and ends were pretty well cleaned up and Saturday brought a brisk market, carnations selling above the Memorial day level. But it required only a day or two for the market to become heavily stocked again in all lines, although trade continued brisk. City business has been fair and shipping demand heavy, with the result that the good roses, and the average quality shows considerable improvement, have been well taken up. Carnations have not been able to maintain their position and prices are again pretty low on clean-up sales. Pæonias are plentiful and selling well but such a large proportion of the receipts are open and too soft to ship that there is a wide divergence in prices. Few cape jasmincs

are now seen. They suffered severely this year because of the large supply of carnations. For ferns the trade is for the moment dependent upon the Michigan crop.

Joliet has been under water this week and railroad communication interrupted but J. D. Thompson reports all the florists safe and dry. The creek near the Thompson range and that of the Chicago Carnation Company was so swelled by the cloud burst that it was four feet higher than was ever known before, but it didn't affect the greenhouses.

The George Wittbold Company is making good progress on its new range of glass just outside the city. Heretofore they have sold the dealers much stock for growing on, but in the future they propose to also be in position to handle the constantly increasing call for palms and ferns of the larger sizes.

P. M. Broadbeck, at Evanston, says he never had anything like his present trouble with thrips. He thinks he is investing as much in fumigants as the crop will be worth at the present state of the rose market, and apparently without seriously inconveniencing the thrips.

This is pæonia week at the Peterson nursery and open house will be kept, as usual. The early prospect was for unusually good blooms but the unfavorable weather has worked some injury. They have had wonderful tree pæonias and very fine irises this spring.

The wholesalers in the Atlas block had a narrow escape on Sunday, June 1, from fire which originated in that portion of the building the basement of which is occupied by McKellar & Winterson. Prompt work by the fire department saved the property.

George Asmus, with Mrs. H. Schiller, at 899 West Madison street, says that the plant trade for Memorial day was about as last year but that cut flower sales advanced twenty to twenty-five per cent.

C. J. Stromback has practically completed the bedding at Lincoln Park. Some 150,000 plants were used, principally geraniums, and besides the beds large numbers of lawn vases were filled.

Genevieve Lord is one of the best carnations now coming into this market. All the reds except one show the effects of the heat. E. C. Amling says America seems to enjoy the summer temperature.

The roses on the Wooded Island at Jackson Park and in the new sunken garden at Washington Park will be at their best within the next two weeks. The plants are in fine shape.

The teamsters strike was beginning to give concern to the wholesale florists, for some of them were running out of shipping boxes and their source of supply was shut off.

E. E. Pieser says that it is noteworthy the way the call for pæonias increases from year to year. It has come to be the leading flower in this market in June.

John Degnan who returned to Chicago from New York early last week, has retired from the firm of McKellar & Winterson Company.

Paul Goerler, who has been with C. W. Ward, at the Cottage Gardens, Queens, N. Y., is now with Bassett & Washburn, at Hinsdale.

Mrs. J. P. Hauswirth, who has been seriously ill, is now improving slowly, though still confined to her room.

Henry Wehrman, of Maywood, is sending in some Genevieve Lord carnations with forty-inch stems.

Stollery Bros. are adding to their premises a two-story flat and store.

The old P. J. Saunders place, at Fiftleth street and Cottage Grove avenue, is being dismantled.

Visitor: John Willus, of Danville, Ill.

### Philadelphia.

RETAILERS HAVING THEIR HANDS FULL WITH COMMENCEMENT WORK.—OUTDOOR FLOWERS ON THE WANE.—WARM WEATHER AFFECTS STOCK.—ALL ABOUT PRICES.—CLUB HOLDS BUSINESS SESSION AND SMOKER.—PLANS FOR TRIP TO ASHEVILLE.—BIG BUSINESS IN OUTDOOR STOCK.

This has been commencement week and the orders for flowers for the graduates show no falling off, as everybody seems to have had his hands full keeping up with the demand. A warm spell has set in and this has used up the pæonias, snowballs and other outdoor blossoms. It is also having its effect on the roses and they are getting smaller and lighter in color, particularly the Brides and Bridesmaids. Beauties are still good, also plentiful. Carnations are holding their own and sell well. Prices range as follows: Beauties \$1.50 to \$2 per dozen; teas \$4 to \$8 per hundred; carnations \$1 to \$2; sweet peas, which are now much in demand, 50 cents to 75 cents per hundred; lily of the valley \$3 to \$4 per hundred.

The June meeting and smoker of the Florists' Club was quite a success. The business of the meeting was getting ready for Asheville and the paper of Geo. C. Watson, who gave a very entertaining account of his trip to Boston. He made a happy allusion to the landscape gardening work of the two communities and the various influences that had made them leaders over other cities in this respect. The straight car fare to the convention will be \$20 and a fraction. A communication was received from the Baltimore club inviting the Philadelphia delegation to come to Baltimore the night before and proceed the next morning with the Baltimore brethren via the Chesapeake Bay route to Norfolk and thence by rail. Arrangements are not far enough ahead, however, to take any action on this at present. The smoker annex was all right and all hands who could pulled away at the pipe and sampled "Johanie's" punch and lemonade ad libitum. The games were well patronized and everyone seemed to have a royal good time.

The Pennsylvania Horticultural Society has just issued its schedule of classes and prizes for the annual exhibition, November 11 to 15, also appending a list of seedsmen's and other premiums offered for competition at the monthly meetings of the society. Those desiring a copy of the pamphlet can obtain it by addressing David Rust, Secretary, Horticultural Hall, Broad street below Locust.

Bedding plant men are about all sold out. It has been a great season for them. The nursery men have also had a great business. Thos. Meehan's Sons say their sales have increased wonderfully and taxed their increased facility to the utmost to meet the demands of the trade.

Those who take palms to board now keep their wagons on the go, gathering up the boarders, and a motley crowd they make when gotten together. About half are ready for the dump and it requires great manoeuvring to return them in the fall, please their owners and come out ahead.

George Anderson is cutting some nice Carnots, which seem to get better as the warm days come on. K.

### Cleveland.

CALL FOR STOCK GREATLY EXCEEDS RECORDS OF PREVIOUS YEARS.—EASTER WOULD HAVE BEEN ECLIPSED HAD STOCK BEEN AVAILABLE.—BOTH CUT FLOWERS AND BLOOMING PLANTS SHORT OF REQUIREMENTS.—PROPOSITION TO POSTPONE MEMORIAL DAY FOR TWO WEEKS.

Never before has this market experienced such a demand for flowers for Memorial day as that which has just passed. The local and out of town call was fully double that of other years. The stock on hand was entirely inadequate to meet the demand. The result was a great deal of disappointment all around, more especially on the part of the out of town buyer. All orders coming in had to be cut in half and in a great number of cases orders were refused entirely. Owing to a hot wave the week previous, flowers were rushed on the market by the wagon load and everything was badly overstocked. Everybody predicted that should a cool spell set in Memorial day would find this market pretty bare of flowers and this is precisely what occurred. Not only did the cut flower market suffer, but the plantmen also. Double the quantity of plants could have been disposed of had they been in bloom. Other seasons shrubby flowers and pæonias helped out. This year there were scarcely any to be had. What few shrubs were in bloom were spoiled by rains and thrips, and the pæonias were not in, at least, not enough to cut any figure. Had there been sufficient stock the total sales would have equaled if not exceeded those of Easter. The June business promises to be good, but good stock, especially roses, will be scarce. The weather has just been right for field carnations and as a rule they are looking fine.

Quite a discussion was indulged in by several of the members at the last club meeting as to getting the consensus of opinion of the florists throughout the country as to the advisability of bringing the matter before congress in the shape of a petition from the Society of American Florists to have the date of Memorial day changed from May 30 to June 15, thereby giving the florists more time and a better chance to get their stock in more salable condition for that event. The claim is made that owing to the lateness of spring throughout the middle and western states the time between the opening of the bedding season and Memorial day is insufficient. All the work of a month or more has to be crowded into a couple of weeks. The consequence is that justice cannot be done by florists, either to their patrons or themselves. While those interested here have no hopes of ever having a custom changed that has been established thirty odd years, yet they would like to have the opinion of others on the subject. ECHO.

### Detroit.

TRADE FOR MEMORIAL DAY SHOWS SUBSTANTIAL INCREASE EACH YEAR.—THIS SEASON MUCH THE BEST OF ALL.—STOCK COMPLETELY CLEANED UP.—CLUB MEETING.—ROSE GROWERS FIGHTING THRIPS.

With each recurring year the importance and extent of Memorial day trade is more noticeable. This year, the weather, which was extraordinarily fine, was largely responsible for the substantial increase of business over that of a year ago. Shipping to the smaller towns throughout the state was a marked feature which

affected the trade of nearly all the retailers. It was difficult in many cases to completely fill the orders and this was especially true of roses, which were quite short of the demand. The entire loss of outside flowers except lily of the valley resulted in heavier demand upon greenhouse stock, which was soon exhausted. In plants, too, everything in bloom was easily disposed of and in many instances orders could not be satisfactorily filled.

Nearly every rose grower of Detroit and Mt. Clemens is seriously annoyed by thrips on the roses. This pest was heretofore but little known here but its ravishes at present are so extensive and destructive that its victims are much alarmed, leaving nothing undone to avert further damage.

Frank Beard presided at the club meeting Wednesday evening. The attendance was good, as usual, and the time was devoted chiefly to the discussion of the troublesome thrip. Arrangements were made for a fishing outing up the lakes next week and the trip to Asheville in August was also a theme of interest, the party going from here promising to be quite large.

C. H. Plumb is about to build two houses each 27x88 for roses, also a new boiler room 20x60.

F. Gutschow & Son, Mt. Clemens, are building two houses 30x112 for carnations.

Theo. Dameron, of Grosse Pointe, is about to rebuild two houses each 20x90. J. F. S.

### Indianapolis.

JUNE MEETING OF THE STATE SOCIETY VERY SUCCESSFUL.—VARIOUS DOINGS OF INTEREST.—MEMORIAL DAY TRADE WAS HEAVY.—BEDDING OUT PRACTICALLY COMPLETED.

The club meeting of June 3 was one of the best we have had for a long time. President J. A. E. Haugh, of Anderson, presided. The amendment to the by-laws, as proposed by the committee, was voted on and accepted. It was also decided to have a directory of all members in good standing printed once a year, to be distributed among all Indiana florists. Following Fred. Hukriede's timely suggestion, Billingsly, Hukriede and Junge were appointed a committee to arrange for a family outing, to report at next meeting. One member objected to the white pine flavor which has heretofore always been a feature of our lemonade. He therefore suggested that old tubs be provided instead of new ones. Complaint has reached the association from Louisville that the Jeffersonville prison greenhouses sell flowers in competition to Louisville florists. On a motion of John Hartje the secretary was instructed to investigate. As usual at our June meeting Harry Balsley, of Detroit was our guest. All were very glad to see him looking as well as ever after his illness.

Memorial day business was very satisfactory all around. It is safe to say that no cut flowers remained unsold. Along in the middle of May things looked very blue for the cut flower grower. A good percentage of the stock could not be disposed of at any price. The stores likewise experienced a very dull time about the middle of last month.

John Bertermann has returned from California where he found his brother, William G. Bertermann, improved in health.

Robt. McKeand is now with the Indianapolis Flower and Plant Company. H. J.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

PUT the young rubbers in a well pre-  
pared bed outdoors and see them stretch.

THE growers are making preparations  
to turn out a few more hundreds of  
thousands of Boston ferns by fall.

THE early promise of particularly good  
pæonias this spring has been blighted by  
the changeableness of the weather.

ON another page will be found Frederic  
W. Taylor's official announcement of the  
postponement of the St. Louis World's  
Fair to 1904.

THOSE growers who have by now suc-  
ceeded in working off their surpluses of  
small latanias, as premiums in the tea  
stores, are now stocking up on kentias.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

In our notes on Clematis lativiva,  
issue of May 31, we omitted to state  
that the accompanying illustration was  
prepared from a photograph supplied by  
Henry A. Dreer, of Philadelphia. This  
firm has been handling the plant for the  
past two seasons.

It is the consensus of opinion that  
Memorial day has now become the great-  
est flower consuming occasion of the  
year, largely exceeding both Christmas  
and Easter in the quantity of stock  
required to satisfy demands. But it is  
not a day for high prices, both because  
of the season of the year and the use to  
which the material is put. This year the  
volume of business was everywhere  
greatly in excess of last year, partly  
because outdoor flowers were scarce,  
partly because of fine weather and  
partly because the people have money  
and have acquired the habit of leaving  
some of it with the florists.

### The Iron Gutter Patents.

ED. AM. FLORIST:—I notice in your last  
issue that Geo. M. Garland comments on  
my advertisement regarding "iron gut-  
ter patents," which refers to his illus-  
trated advertisement in your issue of  
March 8, 1902. I have a patent upon  
the gutter that was illustrated in Mr.  
Garland's advertisement published in  
your aforesaid issue of March 8, 1902.  
The patent is No. 661370, dated Novem-  
ber 13, 1900. In justice to Mr. Garland  
I wish to state, however, that the date  
in my advertisement of "iron gutter  
patents" should have been changed, but  
in the pressure of work this was over-  
looked.  
E. HIPPAED.

Youngstown, Ohio, June 3, 1902.

### Worth An Extra Man.

ED. AM. FLORIST:—Enclosed find check  
for \$2 for subscription to two copies of  
your paper. We cannot do without it;  
can better spare one man than be with-  
out the FLORIST.  
A. E. LUTEX.  
Calumet, Mich.

### Coming Exhibitions.

[Secretaries are requested to supply any omis-  
sions from this list.]

pany, twelve houses 16x130.

East Rochester, N. H.—Chas. Bradley,  
two houses.

Brooklyn, N. Y.—C. J. Wilson, conserv-  
atory.

### A Question of Piping.

ED. AM. FLORIST:—I have a house fifty  
feet long heated by 2½-inch hot water  
flows overhead and 1½-inch returns on  
the side. The water circulates well. If I  
should make the house fifty feet longer  
would the water circulate as well in that  
size of returns, or would it be better to  
put in 2-inch pipes for returns? I like the  
1½ inch pipes, as they are easily heated,  
containing less water. I intend to build  
three connected houses 100 feet long and  
nineteen feet wide, running east and  
west, short span to south, five-foot side  
walls, about thirteen feet to ridge. I  
want a night temperature, when it is 10°  
below zero outside, of 60° in No. 1 house,  
50° in No. 2, and 40° to 45° in No. 3.  
Flows will be overhead, of proper size,  
returns on side walls. How many returns  
will I want on each side of each house to  
have the desired temperature if I use

1½-inch pipe, and how many would be  
required if I use 2-inch pipe? H. E. B.

When the flows are overhead 1½-inch  
returns can be used in a house 100 feet  
long, provided there are no more than  
seven returns for each 2½-inch flow. For  
the new houses there should be two  
2½-inch flows and the following number  
of returns: No. 1, seven; No. 2, five, and  
No. 3, four, on each side. For the same  
houses with 2-inch returns, the number  
should be six and four for Nos. 1 and 2,  
and in No. 3, four pipes on one side and  
three on the other, if 45° is desired.  
Three on a side will answer for 40°.

L. R. TAFT.

### Piping Three New Houses.

ED. AM. FLORIST:—I am erecting three  
new houses 30x100, using the iron gut-  
ter and post construction. In one house  
I shall grow roses, in the two others  
carnations, and wish to ask about heat-  
ing. I have a No. 3 Kroeschell boiler,  
3 000 square feet of hot water radiation.  
Will this take care of the three houses?  
How deep should the boiler be set? How  
many and what size of pipes shall I need  
in each house and how arranged?

M. J. W.

The amount of radiation required will  
depend something on the amount of  
glass in the roofs and outside walls as  
well as on the minimum outside tempera-  
ture, but for average conditions it will be  
slightly in excess of 3,000 square feet  
and, as a slight excess in boiler capacity  
is always desirable for economy in fuel  
and care, it would be better to have a  
boiler capable of handling 4,000 feet of  
radiating surface. For the rose house  
three 2½-inch flow pipes and sixteen  
2-inch returns will be needed for a zero  
temperature if there is thirty-six feet of  
glass in the roof measured over the ridge.  
If there is more than this, or if there is  
exposed glass in the wall, one additional  
return will be needed for every two feet  
of glass. For the carnation houses the  
same number of flows will be needed,  
with three less returns. The location of  
the pipes will depend upon the arrange-  
ment of the benches, but it is a good plan  
to have one-third on each of the walls  
and the others distributed under the  
benches. The top of the boiler should be  
below the level of the floor, if possible.

L. R. TAFT.

### St. Paul.

MEMORIAL DAY BUSINESS VERY GOOD.—  
MUCH BEDDING AND MANY WINDOW  
BOXES KEEP UP THE SUPPLY OF BLOOM-  
ING PLANTS.—CUT FLOWERS SELL  
BRISKLY.—WEATHER FAVORABLE.—  
DOINGS OF AN ORCHID COLLECTOR.—  
NOTES HERE AND THERE.

Another milestone in the florists' trade  
has been passed and Decoration day,  
1902, stands out prominently as one of  
the best if not the very best on record.  
The weather was perfect, stock of good  
quality and abundant, shoppers plentiful  
and the weather fine. Everyone has  
been busy early and late for the past two  
weeks. Bedding, window boxes and  
lawn vases have been filled and the first  
of June finds nearly all outside work done  
and nearly all stock exhausted. A few  
belated jobs will be finished up and then  
repairs and replanting for another sen-  
sion will be in order with the growers.  
The greatest demand in the plant line  
has been for geraniums. Cannas, ver-  
benas, coleus and pansies have also sold  
well. For boxes and vases geraniums,

lobelias and vincas have been used. Prices have been better than for several years. In cut flowers big sales were reported. Everything was in good demand. The only outside flowers to be had were some snowballs and valley. Carnations sold extremely well, also roses. Stock was of uniformly good quality. Those who do a shipping trade report an increase of nearly 100 per cent over 1901 sales.

Dr. Schiffman, of orchid fame, has returned from a three months' trip to the Philippines and Japan, bringing with him the largest collection of phalanopsis ever imported to this country. The collection consists of over 1,200 plants and all are showing new growth. In addition to these he brought over several hundred rare specimens of other varieties. His collection now contains about 4,000 plants. Mr. Whatton, an expert grower from England, is in charge of the place. Hybridizing on quite an extensive scale is done and an accurate record kept of all crosses. At present there are several varieties of cattleyas in bloom, also arides, dendrobiums and cypripediums.

R. C. Seeger is cutting some fine Beauties from young plants. He has a plant stand outside and a cut flower stand inside a large department store and reports very satisfactory sales.

L. L. May & Company are cutting very nice Carnot and Kaiserin roses from early planted stock. They report spring sales the largest in the history of their business. FELIX.

## OBITUARY.

HENRY ARDEN.

Henry Arden, well-known as a florist and landscape gardener about Winchester, Va., died May 26, from the effects of injuries sustained four days previously, when he fell and fractured his hip. He was born in Wobley, England, 76 years ago. At one time he was proprietor of the Grafton (W. Va.) Hotel. A widow survives him.

PONTIAC, ILL.—W. J. Miller is preparing to tear down a part of his plant and replace it with three new houses 30x100, erected on land a few blocks east of his present location. He will continue the salesroom and packing room as heretofore, running the two plants jointly.

LYNN, MASS.—On June 2 the Houghton Horticultural Society held a public entertainment in Park Hall. Superintendent Wm. Stone, of Pine Grove Cemetery, gave an interesting talk on gardens. The twenty-sixth annual exhibition will be held on September 23 and 24.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

## THE SEED TRADE.

**AMERICAN SEED TRADE ASSOCIATION.**  
J. E. NORTRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

PRESENT prospects for California seed crops are extremely good.

J. CHARLES McCULLOUGH, of Cincinnati, with wife, son and daughter, will sail for Europe early next month.

THE recent very heavy rains have submerged the land of many market gardeners about Chicago, including many acres of onion sets. Drying weather is badly needed at once.

THE Chicago seedsmen are very anxious to have the delegates for Minneapolis join them, starting from Chicago on the evening of June 23. See notice elsewhere on this page. A good time is expected.

CARL BECKERT, the 16-year-old son of W. C. Beckert, of Allegheny, Pa., died May 27 from injuries received in an elevator in his father's seed store. Mr. and Mrs. Beckert were on the ocean en route to Japan when the accident occurred.

PRESIDENT NORTRUP telegraphs as follows regarding railroad fares to the Minneapolis meeting of the American Seed Trade Association, June 24-26: "Western Passenger Association, Trunk Line Association and New England Passenger Association grant fare and one-third rate for round trip."

### American Seed Trade Association.

Secretary Willard, of the American Seed Trade Association, writes May 29, stating that indications favor such a full attendance at the Minneapolis meeting, June 24-26, that the reduced rate of one fare and one-third may be depended on. Members should therefore ask for a certificate when buying their railroad tickets going and will then be entitled to one-third fare returning.

### CHICAGO TO MINNEAPOLIS.

Seedsmen from the east and south of Chicago should purchase tickets from starting point through to Minneapolis, taking certificate receipt for same. This receipt when properly executed at Minneapolis will secure return ticket at one-third of the regular rate. In purchasing tickets be sure to see they read from Chicago to Minneapolis via the Chicago, Milwaukee & St. Paul R. R., so as to accompany the Chicago party, who are very desirous that all visitors passing through Chicago travel in the same car or cars, leaving Chicago from the Union Depot at 6:30 p. m., June 23. Reservation on sleeping cars can be made through J. C. Vaughan, 84 Randolph street, Peter Hollenbach, 12 North Halsted street, or Goodwin Harries Company, 115 East Kinzie street, all at Chicago.

### San Francisco.

CALL FOR MEMORIAL FLOWERS VERY HEAVY.—FEW PLANTS SOUGHT.—CARNATIONS AND ROSES SCARCE.—OUTDOOR STOCK PLENTIFUL.

The week in which Memorial day came was a very profitable one to the growers as well as to the retailers. That is to say, in the line of cut flowers; in plants very little business is done here on this occasion. Of all the cut flowers, carnations were the scarcest and white especially so. Prices averaged 25 cents per dozen and 35 cents to 50 cents for fancy. Roses were the next scarce article and teas sold the same as carnations, Beauties bringing from \$1 to \$2 per dozen. Lilies brought \$2 to \$2.50. Asparagus and ferns were plentiful but smilax scarce and only short strings could be had. Sweet peas were abundant and sold for from 75 cents to \$1.25 per dozen bunches, all colors and varieties. Other cheap outside flowers were callas, stocks, marguerites, poppies and candytuft. All were plentiful and a very good business was done in that line.

GOLDEN GATE.

### Columbus, O.

TRADE VERY HEAVY FOR MEMORIAL DAY.  
—STOCK SHORT AND FINE PRICES REALIZED.—GOOD CALL FOR POTTED PLANTS.  
—VARIOUS NOTES.

We were all as busy as beavers all last week up to and including Sunday, which is quite as important to the state militia as Memorial day itself. Flowers were very scarce but what were on hand brought good prices. The farmers usually supplying this market with pæonias had little to offer this season and those who were fortunate enough to market some of this stock were brave enough to ask \$1.50 per dozen and had no trouble in getting it. Roses were scarce and poor, the few good ones bringing \$1.50 per dozen. Carnations and lilies, of which there was a fair supply, brought good money. There was quite a call for potted plants in bloom, which could have been sold at fine prices but by Thursday night there was not a good looking blooming geranium or any other potted plant in Columbus.

CARL.

**THE NURSERY TRADE.**

**AM. ASSOCIATION OF NURSEYRMEN.**  
 R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
 GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
 Twenty-seventh annual convention, Milwaukee,  
 Wis., June 11-13, 1902.

It is estimated that the Georgia peach crop, the first of which is now moving, will aggregate more than 15,000 car loads.

TWENTY laborers employed by the Oregon Nursery Company, Salem, Ore., went on strike May 22 for a raise in pay from \$1.50 to \$1.75 per day. The places were immediately filled with other men.

A RECENT shipment of fruit trees by Ellwanger & Barry, Rochester, N. Y., arrived in good condition at Chemulpo, Korea, after sixty-three days on the way and, being planted within two days, made a nice start.

NURSEYRMEN handling the improved forms of *Syringa vulgaris* report that the recent flowering season has brought many orders for such new lilacs as Charles Joly, Ludwig Spath, President Grey and others.

THE annual meeting of the American Association of Nurserymen at Milwaukee next week will be its twenty-seventh and probably its best to date, both in point of attendance and business transacted between the members.

THE Stark Brothers' Nursery and Orchard Company, of Louisiana, Mo., has issued a call for a stockholders meeting July 26 to vote on a proposition to increase the capital stock of the company from \$300,000 to \$1,000,000.

**American Rose Society.**

The stated June meeting of the American Rose Society will be held in New York on June 11 in connection with the June show of the Horticultural Society of New York, at the New York Botanical Garden. The rose society offers a silver medal for the best display of garden roses on this occasion. Further particulars of the exhibition and the full schedule may be had from the secretary, 136 Liberty street, New York. The rose society is now arranging to offer its gold and silver medals at some of the leading exhibitions next year, particulars of which will be made public very shortly. The gold medals will be offered for novelties.

**Cincinnati.**

**RAPID CHANGE OF FORM IN THE WHOLESALE MARKET.**—FROM A CONDITION OF OVERSUPPLY A PRONOUNCED SHORTAGE HAS DEVELOPED.—JUNE STARTS OFF WELL.—GOOD WEDDING DECORATIONS.—NOTES OF VARIOUS DOINGS.

Conditions have been somewhat reversed in business the past few days. Until last Thursday there were not near enough orders to consume the flowers coming in, but since then the wholesale houses are having a hard time of it to secure enough flowers to fill their orders with. Frank Ball says that never before has he handled as many flowers for Memorial day as he did this year and that the month of June has started off with a rush of business. There is quite a demand for sweet peas and this city at present seems to be unable to supply one-half of the call for them. Louis Kyok is handling quite a number of carnations. He received 12,000 blooms from his con-

signors last Friday and they were completely sold out by 10 o'clock. The bedding out season in this city is nearly over and all those handling this line of goods seem well satisfied with the volume of business done. This week there are quite a number of big weddings and the commencement exercises of the high schools take place Friday evening.

The R. A. Kelley Company had the decorations for the Rawson wedding and put up something very elaborate. Chas. Jones decorated the church for the Longworth wedding and Sunderbruch had the decorations for the Seasongood wedding

at the Phoenix Club. All were big jobs and consumed an immense amount of flowers.

The Cincinnati Cut Flower Company is receiving some very fine carnations from Samuel Batson, of Kalamazoo, Mich. His cut seldom varies in quantity or quality.

In my last notes I stated that the damage done by hail at Murphyville was 10,000 feet of glass, which should have been 10,000 panes of glass broken.

HOMER, MICH.—Mrs. D. F. Spencer has sold her greenhouse to Miss Sarah Cox.

## OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

## At New York.

The usual happy contingent turned up at the alleys last Wednesday and Captain Lang had considerable difficulty in arranging an even team. He is keeping the boys guessing who will be "it" for the team to Asheville. Of course the captain will be too modest to bowl himself. That it will be a strong team, however, can be gleaned from the following scores:

Player	1st	2d	3d	4th
Captain Lang.....	179	204	200	188
Burns.....	175	183	202	153
Siebrecht.....	150	158	164	170
Smith.....	130	149	155	162
Traendly.....	172	151	172	201
Bunyard.....	130	147	159	132

## Baltimore.

PROSPECT FOR A LARGE DELEGATION TO THE ASHEVILLE CONVENTION.—DOINGS OF THE TRADE ORGANIZATION.—BEDDING PLANT BUSINESS HEAVY.—STOCK GOOD AND WELL CLEANED UP.—PERSONAL NOTES.

At the last Gardeners' Club meeting C. L. Seybold, Thomas Patterson and Fred G. Burger were appointed a committee to arouse interest in the Asheville convention of the S. A. F. They hope to secure a goodly delegation from here. It was decided to invite the delegations from Philadelphia, Boston and New York to come by way of Baltimore, staying one night here and leaving with our party by boat to Norfolk, Va. This will afford a beautiful trip on Chesapeake Bay at a much reduced fare.

The attendance at the May meetings of the Baltimore Gardeners' and Florists' Club was very satisfactory, about forty-five being present at the first and thirty-five at the second. At the latest session Prof. Qualtance, of the Maryland Agricultural College, gave an hour's lecture on destructive insects, dwelling particularly on greenhouse pests.

C. L. Seybold and Mrs. Seybold were made seriously ill not long since by potmaine poisoning due to eating fish. Mr. Seybold has been very busy this spring in improvements at Patterson Park. The carpet bedding there is of the usual elaborate character.

Bedding roses are very scarce, also coleus and alternanthera. Trade in bedding plants has been very good and the market men have been cleaned up in good shape, most of the stock being of good size and well grown.

Halliday Brothers, I. H. Moss and others have large numbers of young carnation plants in the fields, looking fine.

Decoration day was a busy one for the florists, many of whom had large orders for cut flower work.

A large party of florists and gardeners visited College Park, Maryland Agricultural College, June 4.

The seventeen year locust has made its appearance but it is doing comparatively little damage.

Bedding work in the parks is almost finished and the work is of the very best.

Sweet peas are being received in very limited quantity.

## Hail at Oshkosh, Wis.

On the afternoon of Saturday, May 24, heavy hail fell at Oshkosh, Wis., inflicting much damage. The proprietors of the Isaac Miles greenhouse, 76 Frankfort street, report their loss at about \$200 or \$300. Miss Miles states that about 1,500 panes of glass were broken, most of the damage occurring on the north and northwest sides of the houses, the wind blowing from that direction. Plants inside the houses were braten down and destroyed by the hail. The damage to outdoor stock was large. In the hail storm last spring the number of panes broken [these greenhouses at was about 2,400.

At John Nelson's, 485 Ninth street, it is reported that the loss was not serious and is not over \$25 or \$35. There were between 300 and 400 panes of glass broken. The damage outside was considerable, plants and vegetables being injured.

At the South Side Exchange there was much damage, according to the owners,

Fugleberg & Flister. The hail broke about 3,500 panes of glass on the south side of the greenhouses. On the west and south sides was double thick glass and this was broken apparently as easily as that on the other sides. The hot beds were cut to pieces and thousands of pansy plants, stocks, carnations and chrysanthemums were destroyed. Inside the greenhouses 6-inch pots were broken by the force of the hail. The total loss on the glass is about \$600, partly insured.

LINVILLE, N. C.—Charles H. Ricksecker has sold out his business in galax leaves to C. W. Burleson & Son and has removed to Hutchinson, Kans., where he has bought an abstract office.

RIVERTON, N. J.—The H. A. Dreer Company has been consigning large quantities of fine cut pæonias to both the New York and Philadelphia markets, where they have averaged good returns considering the depression in the staple lines of stock.

## Lilium Harrisii

Indispensable for Early Forcing.

Our own growers pack all our Bermuda Bulbs and personally grow half our supply. Careful attention to the growing crop, weeding out diseased plants, proper grading of the bulbs when dug, business-like packing and handling, all go to make success with Harrisii. We invite your orders under these conditions. Our bulbs will pay you.

Write for Prices before closing any forcing stock orders.

VAUGHAN'S SEED STORE

Providence, R. I.

DEALERS MAKE SUCCESSFUL EFFORT TO RAISE THE PRICE OF MEMORIAL BOUQUETS.—STOCK NOT PLENTIFUL.—PERSONAL AND TRADE DOINGS.

Memorial day brought the usual rush of bouquet orders, ranging from 75 cents upwards. Previous to this year there has been a large demand for the old-fashioned 50-cent bouquet, and this demand has been filled by most florists at very little margin, until it became quite imperative that an effort be made to discontinue it. This year the trade asked 75 cents and upwards for ordinary round bouquets, with a successful result, inasmuch as there is more profit in it, and customers receive better work. Flowers were not plentiful, carnations especially finding a short market and bringing an average of \$2 per hundred for ordinary stock. Deutzia was abundant and desirable. All in all, business was very good and the weather was clear and cool.

Metal designs were in abundance and sold slowly. This was a surprise, as the local showing was very fine and deserved a better patronage.

N. D. Pierce cut large quantities of foliage of fancy shrubs, which added to the efficiency of bouquets, and sold readily.

T. J. Johnston and O'Connor closed very early Memorial eve, evidently being too busy to accept further orders.

This has been a good year for the sale of bedding stock. Prices have been good, with a steady demand.

Richard Higgins entered the ranks of the married men some little time since.

M. M.

BATAVIA, ILL.—T. J. McAllister & Company have a branch store at 31 South Broadway, Aurora, where they are doing a good business.

KANKAKEE, ILL.—Charles Schafer has been cutting carnations in quantity these past few weeks, his cut for the week preceding Memorial day reaching 9,000 a day.

Pittsburg.

CALL FOR FLOWERS FOR MEMORIAL DAY PROVES FAR BEYOND ANTICIPATIONS.— ALL STOCK CLEANED OUT IN SHORT ORDER.—NOTES OF VARYING INTEREST TO THE CRAFT.

Memorial day always makes a market for great quantities of flowers, but the business done on May 29 this year in Pittsburg and Allegheny was an unbounded surprise. The stores were liberally supplied with stock, but it was sold in much less time than was anticipated. The grade of all kinds of stock was much lower than usual, but this feature was generally disregarded, as purchasers seemed to merely want flowers, and any kind or quality would do. Our pæonias were late, but the east and south satisfied this shortage. Lilies were quite plentiful and were easily sold. Carnations met the most popular demand. On Saturday the supply of stock was amazingly short and the preponderance of funeral work was very marked. Some of the retail stores were sold out by noon.

John Wyland, of De Haven, is perfectly satisfied with the outlook of his rose and carnation stock. He has a fine range of houses and owns sixty acres of land perfectly fenced. The yield of his peach crop last year amounted to over 5,000 bushels.

On Tuesday the dedication of the new temple of Pittsburg Lodge B. P. O. E. caused a strong demand for flowers. There was a big parade in which Julius and Ernest Ludwig had prominent places.

The death of Mrs. Alexander Nelson occurred May 26, after a short illness. Mr. Nelson has the sympathy of his many friends among the florists and gardeners of the two cities.

H. P. Joslin, secretary of the Florists' and Gardeners' Club, states that the use of the basement hall for social and recreation purposes has been discontinued.

Blind Brothers are interested in Begonia Gloire de Lorraine and have just received a fine lot of the plants. E. L. M.

LITTLE ROCK, ARK.—Vestal & Son report trade good. Tipton & Hurst have added another large house, making eight in all. Wm. Gallagher says that outdoor roses, verbenas and cannas were badly killed out last winter and the very heavy run on these items this spring soon cleaned them up.

**CHRYSANTHEMUMS.**

Helena, Mont.

STATE NURSERY COMPANY ADDING LARGELY TO ITS RANGE OF GLASS.—LARGEST PLANT IN THE NORTHWEST.—FINE BUSINESS DOING.

The season's addition to the plant of the State Nursery Company consists of an even dozen houses 16x130. They are well built, well equipped structures and when completed will be planted mostly to carnations, for which there has been a call much greater than the supply the past year or two. With this addition the State Nursery Company will have a total of 78,000 square feet of glass, all in good shape and turning out profitable crops. It is considerably the largest place in its section of the country. One of its advantages is natural hot water for heating.

The firm conducts two retail stores, one in Helena and the other at Butte, each doing a nice business in cut flowers and plants and handling considerable quantities of seeds in season. C. W. S.

Minneapolis.

DEMAND VERY LARGE FOR MEMORIAL FLOWERS.—BEDDING STOCK ALL CLEANED UP.—CARNATIONS PLENTIFUL BUT ROSES SCARCE.

Memorial day trade was very heavy, a much larger business than last year. Bedding stock was cleaned out and by Friday noon none could be secured. In cut flowers it was the same way. Although there seemed to be an abundance of carnations, they were soon taken, as there were few roses to be had. The fancy roses brought up to \$8 per hundred. Carnations were small, because of the intense heat of late. Outdoor lily of the valley is in market and looks prime, finding ready sale. Shipping trade was heavy, but trouble was experienced in filling all orders up to the notch. A large consignment of cape jasmine from Texas found ready sale, there being no outdoor flowers to speak of.

C. F. R.

HOLYOKE, MASS.—E. D. Shaw filed a petition in bankruptcy at Boston May 29. His liabilities are placed at about \$3,300 and the assets nothing. Mr. Shaw's financial troubles began several years ago, when the Rosemont greenhouse became his property. R. A. Allyn has charge of Mr. Shaw's interests.

Lowell, Mass.

TRADE TAXES ALL FACILITIES FOR MEMORIAL DAY. — WONDERFULLY HEAVY DEMAND—LARGE QUANTITIES OF MATERIAL AT HAND BUT ALL CONSUMED—GOOD BUSINESS FOR JUNE.

Memorial day is the hardest holiday we have to handle and this year business was unusually heavy. The weather was fine and the call for flowers something enormous, and the supply of flowers outside of greenhouse stock was more than abundant. Rhododendrons, Japan snowballs, irises and other outdoor material were just the things for making up cheap bouquets, and a good many thousands have to be made here on this day. There was a large supply of stocks and candytuft and feverfew, which sold readily at \$1 a bunch. Carnations that were leaping skyward before the rush, fell in price and blooms of excellent quality sold for \$2 per hundred. Brides and Bridesmaids were in good supply, but on this particular day customers do not want many roses. Sweet peas sold well and were in unlimited quantity. The supply of pæonias was limited and they were soon snapped up at \$1.50 per dozen. Longiflorums were to be had in large quantities, the quality being excellent, even better than those seen here at Easter. Everything being figured up, Memorial day was very satisfactory from a financial point. Many of the stores previous to the rush were open all night, getting things in shape, and when Friday noon came it found most of them cleaned up in good shape, with no stock for Saturday and not much chance of getting any. Business, with the hot weather, continues to hold up well since the beginning of June. Some of the schools are having their commencements and the "sweet girl graduates" will come in for a large supply of cut flowers during the next few weeks. A. M.

UTICA, N. Y.—A. & J. Williams, on the Deerfield road, are removing their stock to 183 Mohawk street, opposite St. Agnes' Cemetery.

Hanover, Pa.

MEMORIAL DAY BRINGS LARGE CALL FOR FLOWERS IN BATTLE SCARRED REGION.—SOLDIERS' CEMETERIES REQUIRE MUCH STOCK.—VARIOUS NOTES OF INTEREST.

Memorial day kept Frank C. Cremer more than busy. It was hustle from early morning till late at night, for besides his local trade Mr. Cremer had Gettysburg to provide for. Carnations have been much in demand, the supply, as usual upon such occasions, running short. Roses went well and everything having the semblance of a flower was pressed into service. Galax wreaths took well but immortelle designs had a limited call. Nowhere else, perhaps, does Decoration day recall the sad, or shall I say the glorious events of the past as vividly as it does in this section, where great battles have been fought. Every child, it seems, is imbued with a feeling of reverence for the memory of the fallen heroes. Flowering plants of all sorts sold exceptionally well. There is scarcely a home, humble or pretentious, but what has been made more attractive by the artistic touch of the landscape gardener, that is, the local florist.

D. Z. Stover, of Gettysburg, has concluded to quit, having sold his greenhouses, stock, fixtures and all to Mr. Cremer, who will transfer it to Hanover. It is Mr. Cremer's intention to grow more carnations than heretofore, although roses will by no means be relegated to a back seat. His carnation plants in the field look clean and vigorous.

NOMIS.

Springfield, Mass.

Last week the golden jubilee was held to celebrate Springfield's fiftieth year as a city. The jubilee was a great success and brought lots of outside trade to the city. The florists came in for their share, as everyone reports having all he could attend to. Decoration day was ahead of last year, there being a good demand for roses, carnations, lily of the valley, sweet peas, viburnums and hawthorns. Funkia variegata was plentiful and was largely used in made up work. Prices were about the same as former years.

Fairfield reports business ahead of last year with a good call for galax wreaths. Schlatter & Sons report sales good, with everything used up.

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been for over SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4 20 per year. Remittances to be made payable to H. G. GOVE.

OFFICE:—

41 Wellington St., Covent Garden, London, England.

### The Retail Flower Store.

[A paper by J. F. Coombs read before the Florists' Club of Hartford, Conn., May 13, 1902.]

It is my opinion that the present season, which is now about at an end, is one of the most prosperous that the florists in this locality have had. Stock of all kinds has been generally good and better prices have been obtained than usual. We note this more especially of carnations. A year or two ago 35 cents a dozen was considered a good price for them, and even last season a number of these flowers were sold at that price, but this season few were sold for less than 50 cents a dozen, and many for 75 cents and \$1 and sold more readily than those for 35 cents a dozen a few years ago. To be sure the cost is greater to produce the flowers which sell for 50 cents, 75 cents or \$1 a dozen than those that sell at 35 cents, but there is more money in it, and it goes to show that the average customer is willing to pay a better price for good stock.

It seems to me that it is the general rule among florists to give too much credit, by letting accounts run too long and giving credit to people they do not know. I cannot tell the reason for this but it seems to be a falling that the majority of them have. If our business could be run on a cash basis what a fine business it would be. But this is not possible, especially in the business that is conducted on a comparatively large scale, for in many cases you take an order and run the risk of getting your money. For instance, if there has been a death in a family and one or more of the members come to order a design, or several designs, amounting to \$10 or \$25, or perhaps more, as the case may be, it happens very often that they do not have the money with them and will ask you to charge it, or perhaps they will walk out without saying anything about the pay, taking for granted that you will charge it anyway. That is the time you are running the risk. If you refuse the order you may be so much out, for your customer may be good for the amount and pay the next day after the funeral, and, on the other hand, if you do take the order you may lose.

But as a rule there is a smaller percentage of loss on funeral work than on any other part of the business. If you will try to get your money for funeral work immediately after the funeral, when the people are feeling bad, you are more apt to get it than if you let the account run. My experience is, the most difficult person

to collect a bill for flowers from is the young man who has been in the habit of sending his lady friend flowers and for some reason they have had a falling out. In a case like this the florist ought to have the credit of sending the flowers, but he does not, as his card is not in the box. This sort of a customer will pay for his flowers at first and then commence to have them charged, and before you know it, or perhaps before he will realize it himself, he has run up a good-sized account and then does not want to pay for the flowers because his girl has gone back on him.

The question has been asked, is it advisable to have lady clerks in a flower store? I should say that it is, if the right kind can be had, though it is hard to find that kind, for the reason that many lady customers would rather trade with them than with a man. There are also many customers who think that a lady has more taste in arranging flowers, which I think in many cases is so. They are handy in tying ribbons and have an inclination to keep the store neat and clean. But they cannot demand the salary the man clerk gets for they cannot do the heavy work or stand the long hours the men have, nor is it expected of them. I understand in the western cities there are a number of women florists in business for themselves and conduct it very successfully.

I might say a few words here in regard to advertising. Does advertising pay the retail florist? I should say that a little of it does if it is done in the right way, but how are you going to tell? People are not coming in to tell you that they saw your "ad" in such and such a paper. The only way I know of telling is if, when you advertise some special flower, you have an unusual demand for the flower advertised it is a pretty good proof your "ad" has been read. I think the only way to advertise, if you are going to advertise at all, in a city the size of ours is by the line in the reading notices in the daily papers. General advertising in fair souvenir programmes, dance programmes, church, lodge or college papers, is not worth the time it takes to write the copy, but in many instances the storekeeper feels obliged to take a space because the person who is canvassing for advertising is one who has left him an order for flowers sometime previous. Of course there are exceptions, for I know of a few instances where an advertisement of this kind has really paid, but I think it is very rare.

I believe that the storekeeper who has

the neat store, a good display in his window and an attractive delivery team is the one who is doing the business, and I know that the florists in our city are lacking in some of these respects. But this is not all the successful one must necessarily have, for above all he must have a good supply and assortment of fresh flowers in his ice box. If a person is attracted by a fine display in a florist's window he naturally thinks he can get a good variety of flowers inside and a storekeeper, in order to hold his trade, should have, if possible, a good assortment of flowers always on hand.

I think it is more profitable in the end to have a little stock left over at night, once in a while, than to be sold out early in the day, for if a customer goes into a store two or three times in succession and finds he cannot get what he wants he is liable to go somewhere else for flowers the next time. I believe that the florists in our city should go in for novelties more than they do, for if something out of the ordinary is displayed in a window it will attract attention and serve to a certain extent as an advertisement, and, too, there are people who are looking for something different in flowers as well as in other things, and are willing to pay for them.

Probably the hardest part of our business is the long hours, for when you go to work in the morning you do not know what time you will get your dinner, whether you will get any supper or not, what time you will get through at night, or whether you will have to work all night. Our business is not of the kind in which you can get your orders ready very much ahead of the time they are wanted, especially a funeral order, for when an order of this kind comes in it has to be done in a hurry and the working force has to stay until it is finished.

I will close my paper by telling of a few of the different types of customers we have to deal with. Perhaps the most difficult customer to handle is the one who comes in to order flowers for a funeral and, having never purchased flowers before, does not know what he

hunch of something else, or a sheaf of wheat, palm leaves, something made of ivy leaves, or loose flowers, or something that no one ever saw or heard of.

Let us suppose, for instance, that you have found out that a design of some kind is what is wanted. Then you will begin to show the different sizes of frames of the different designs, and when the price is asked you will say that you can make a wreath this size for \$3, or that size for \$5, or that cross for \$5, or this one for \$10, or that pillow for \$5, or this one for \$8. Then, after you have spent your valuable time in trying to find something to suit your customer, you will very often hear him say: "Have you no design you can make for 50 cents or \$1?" Or perhaps they will tell you that they are not ready to decide just yet; they want to consult some of the rest of the family before they leave the order. And that is the last you ever hear from them.

I have in mind a little incident which happened one day which perhaps would not be out of place to tell here. A woman came in and wanted an elegant pillow with the word "husband" engraved on it. She mentioned some of the flowers she wanted it composed of, which were roses, carnations, violets, lily of the valley and other flowers, and when she was asked about what price she wanted to pay she said: "Oh I guess 75 cents ought to buy a pretty good one hadn't it?" I believe she left an order for one at \$7 before she went out.

How many times a day do we hear the question asked: "Are these fresh?" It seems some days as if nine-tenths of the people purchasing cut flowers ask this question, and how it will make you feel like swearing when a customer will come in for perhaps a dozen roses and you will pick out a dozen of the best you have in stock and when you are about to put them in a box she will say, "I don't think I like them; they do not look fresh," when perhaps they have not been in the store over half an hour. You will do your best to look pleasant and try to convince her they just came in from the

are customers who know just what they want and how much they want to pay. These are the ones it is a pleasure to wait on and the ones you try hardest to suit.

#### An Iowa Establishment.

C. G. Anderson & Company, in which firm C. G. Anderson and Charles Olson are partners, have the only greenhouses in Red Oak, Iowa, a modern place in every particular and doing a nice business. Their place is shown in the accompanying illustration. The houses were built last summer and the establishment is up-to-date in all its appointments. Besides a fine retail business the firm handles a large shipping trade to nearby towns. They grow a general stock of plants such as are usually provided for a local trade and also produce quantities of cut flowers, one of their specialties being funeral designs, many of them for wholesale customers.

#### Massachusetts Horticultural Society.

The annual rhododendron exhibition of the Massachusetts Horticultural Society, which had been planned for three days in the first place, was held on Saturday, June 7. The committee of arrangements in view of the fact that there would be no exhibit this year from the estate of the late H. H. Hunnewell and from other large collections, deemed it best to hold the show open only one day, and the decision was a wise one. The loss of the usual displays of rhododendrons from Wellesley, Lexington and other estates, left the exhibition a mere ghost of its former self, and it is to be hoped that other large growers will step in to fill the breaches another year. The show of cut rhododendrons was the smallest we ever remembered to have seen in Boston, more especially as the plants were just at their best. Mrs. J. L. Gardner, Wm. Thatcher, gardener, and Mrs. B. P. Cheney, John Barr, gardener, captured all the premiums for rhododendrons and azaleas. Mrs. Gardner was first for a fine display of *Iris Germanica* and Anthony McLaren's first prize pyrethrums were very good. Mrs. E. M. Gill and Miss N. B. Winter took the prizes for the best vase of flowers in the order named.

For the best table of orchids arranged for effect on a table eight feet by five feet J. S. Bailey, A. J. Newell, gardener, was a good first, J. E. Rothwell, Emil Johansen, gardener, being second. Silver medals were awarded to Oakes Ames, R. M. Grey, gardener, for *Cypripedium callosum Sanderæ*, and to J. E. Rothwell for *Lælio Cattleya Phoebe*. A certificate of merit was awarded the last named for *Cypripedium Mars.* J. S. Bailey was awarded honorable mention for *Kentia Duckhami*. Gratuities were awarded to E. J. Mitton for a nice display of pelargoniums, to J. L. Little for *Campanula Medium calycanthema*, and J. S. Bailey for the popular old bedding *Calceolaria Golden Gem*, which is so much grown in Europe. In the way of miscellaneous cut flowers, E. S. Converse, D. F. Roy, gardener, showed rhododendrons; F. J. Rea, a collection of *Iris Germanica* which received a certificate of merit; A. H. Fewkes and W. J. Clemson, *præonias*; C. W. Parker, *Iris pallida Dalmatica*; W. H. Heustis & Son, *Kalmia latifolia*; N. T. Klidder, Wm. Martia, gardener, *aquilegias*; and Julius Heurlin a grand lot of perennials. There were several other displays of a promiscuous nature.

The native plant class as usual evoked

THE ESTABLISHMENT OF C. G. ANDERSON & CO., RED OAK, IA.

wants and has not the least idea of the cost of flowers. Usually the clerk can tell at once, if he is any way bright, whether his customer is in the habit of purchasing flowers or not and has to use his own judgment accordingly. The customer who is not in the habit of so doing, will approach the clerk something like this: "I want to get something for a funeral." Then you have to find out the best way you can what that something is. Perhaps it may be a design of some kind, or a bunch of roses, or carnations or a

greenhouse, but then she will doubt your word and tell you that she will have some other kind of flowers or will look elsewhere.

Then we have the customer who will ask if all the different colored Lawson carnations are the same price, and the one who will ask the price of white Jacq. roses, and the one who will ask if we keep rain plants, meaning umbrella plants. Now I do not want to have you think that the majority of customers are of this type, for they are not, for there

VIEW OF THE RHODODENDRON SHOW ON THE F. B. HAYES ESTATE, LEXINGTON, MASS., IN THE OLD DAYS.

keen competition, Mrs. W. S. Eager, Mrs. Arthur Clark and Miss R. L. Mann winning in the order named. There was a good assortment of seasonable vegetables shown. W. N. C.

#### An Historical Rhododendron Show.

Several years ago when Oakmount, the famed estate of F. B. Hayes, of Lexington, Mass., was at the height of its glory, the rhododendron show in the great tent was an annual event of absorbing interest to horticultural Boston. There was the unrivaled collection of superb varieties, with their wealth of bloom giving testimony to the loving care and skill of unassuming, kind hearted, genial James Comley, and there was open hearted hospitality on the part of proprietor and gardener to all who wished to come and enjoy the great sight.

Now it has all passed into history. Oakmount is for sale in house lots, and this week is announced the final scene, the sale at auction of the household furniture and the stock of plants belonging to the estate of the late James Comley. Only a few days ago we chronicled the passing away of H. H. Hunnewell, who, with the late Mr. Hayes, was the mainstay for the grand rhododendron exhibition in June of each year at Horticultural Hall. Instead of the intended three-days show the exhibition this year was cut down to a Saturday afternoon affair and, with the passing away of the two main exhibitors of the past, it does not seem likely that it will ever again reach its former dimensions.

Under these circumstances the two illustrations which we present will be

interesting and particularly so in a reminiscent way to many. Most of the plants shown under the tent were of the half hardy and tender varieties. They were stored over winter in an enormous pit, well-protected from cold and the labor of moving them and caring for them in tubs and pots was no light matter. Mr. Comley may be seen in one of the pictures surveying the beautiful scene which he had created.

#### The New York Exhibition.

The exhibition of the Horticultural Society of New York, held at the New York Botanical Garden, Wednesday, June 11, contained many good and interesting plant and cut flower displays, especially noticeable being the cut rhododendrons of Lowell W. Palmer, Greenwich, Conn., which was probably the most comprehensive exhibit ever staged in this country.

For the American Rose Society's medal, F. R. Newbold, Thos. Bell, gardener, Ponghkeepsie, N. Y., made undoubtedly the best exhibit. It contained the following especially good roses: Margaret Dickson, Capt. Christy, Paul Neyron, Clio and Pres. Carnot.

Geo. C. Rand, John J. Nicol, gardener, Lawrence, L. I., showed a comprehensive collection of flowering shrubs, also a miscellaneous collection of hardy herbaceous flowers, the following among the most noticeable: *Dictamnus Fraxinella* alba and rubra, *Thermopsis Caroliniana*, *Iris ochroleuca*, a beautiful waxy white, and some good pæonias and so forth.

W. A. Manda, South Orange, N. J., showed a collection of cut dianthus, seedlings from *D. plumarius* and ever-flowering, also some good gaillardias

and the pretty *Gillenia trifoliata*. He also exhibited the new rose, Bridal Wreath, a double white of the Wichuriana type, very attractive and very floriferous.

For the best twelve pæonias W. H. S. Wood, Greenwich, Conn., L. H. Martin, gardener, showed twelve excellent blooms. The same exhibitor staged a collection of sweet peas which he said were grown by the following method: The seed was sown outdoors in the middle of October and when about three inches high the plants were protected by cold frames until spring. They were then staked and he commenced cutting about May 20. The following varieties were very fine: Peach Blossom, a quite novel salmon pink, approaching yellow; Boreaton, purple; Captain of the Blues, blue; Salopian, crimson.

Mr. Wood also showed a good collection of hardy perennials, the beautiful but rarely seen *Pentstemon Murryanus grandiflorus* being noticeable, also *Heuchera sanguinea* and *Digitalis ambigua*, yellow.

C. W. Ward, of Queens, L. I., also showed a very comprehensive collection of pæonias, including the officinalis and Chinese sections, double and single.

Mrs. J. B. Trevor, Yonkers, N. Y., Howard Nichols, gardener, exhibited cut roses, outdoor hybrids, among which were Baroness Rothschild, Clio, Gabriel Luizet, Anna de Diesbach and many others well grown. The display of one variety was also a fine lot of Mme. Gabriel Luizet.

The New York Botanical Garden exhibited a collection of species of roses rightly named and very interesting, also a collection of flowering shrubs.

But the collection of cut rhododendrons

shown by Lowell W. Palmer, A. Haas, gardener, containing nearly fifty varieties, was quite the feature of the show, the following showing up to best advantage: The Queen, white; Chas. Sargent, crimson, and Purpleum elegans. There were also shown a fine lot of strawberries and vegetables of high merit by T. A. Havemeyer, Hempstead, L. I.; Mrs. Jos. Eastman, Tarrytown, N. Y.; Hugh J. Grant and Geo. C. Rand, Lawrence, L. I.

### The Best Twenty-five Paeonias.

The following list is the result of an afternoon spent among the paeonias at the estate of John T. Morris, Esq., Chestnut Hill, Philadelphia, Frank Gould, gardener. This paeonia collection is a large one and much pains has been taken to keep them correctly labeled. The varieties selected for the best twenty-five were the best in my opinion and this was concurred in by Mr. Gould and Mr. Lonsdale, who were present at the time the notes were made, and I mention also three good Japanese single varieties:

#### THREE JAPANESE SINGLES.

Nine-no-ichi, claret and gold.  
Kasae-Jishi, pale pink and orange.  
Kaibe-no-kegoroma, light magenta and gold.

#### THE BEST TWENTY-FIVE.

Amandine Mechin, bright claret, very high and double, no collar.  
Augustine D'Hon, very deep pink, very double.  
Belle Chatelaine, white, pale pink collar, large and round.  
Comtesse de Montalivet, white shading to blush at outside, large, rather flat.  
Festiva Maxima, pure white, center petals touched carmine, large flower.  
Jeanne D'Arc, white, large, wide guard petals, center fringed.  
Lady Anna, pink, medium size, round and perfect.  
La Coquette, medium, very deep, pale pink, good collar.  
Livingstone, pink, round, no collar.  
Mme. Barillet Deschamps, blush, large, ragged but pretty good.  
Mme. Boulauger, pale pink, flat, smooth and perfect.  
Mme de Verneville, grand, snow white, large, flat, no collar.  
Compt de Nieperg, ruby, medium.  
Mlle Desbailson, pale pink, shading to deeper at base of petals, medium, ragged, no collar, flat.  
Meissouier, crimson, round, medium, fringed center, ragged, wide guard petals.  
Mme. Edourd Andre, like Festiva Maxima but smaller and not as perfect.  
M. Boucharlet, bright pink, round, perfect shape, very double, well expanded.  
M. Dupont, pure white, loose, but quite double, medium, no guard, fine shape.  
M. Gaillard, magenta, conical, large guard petals.  
M. Lemoine, white, blush guard, large, loose, conical.  
Pagalini, show, white, medium, ragged, fine flower.  
Potsi Plena, claret, large, ragged, fine flower.  
Souv. de Auguste Mieliez, pale pink, very double, good.  
Solfaterre, white, shading to orange at base.  
Virgo Maria, white, very large, flat, a grand flower.

GEO. C. WATSON.

### Brooklyn Horticultural Society.

At a meeting of Brooklyn and Long Island florists held on Tuesday, June 10, at the Association rooms, 502 Fulton street, Brooklyn, N. Y., a society was formed to be named the Brooklyn Horticultural Society, organized for the purpose of taking in hand the preparatory work consequent upon the forthcoming meeting of the American Carnation Society, which is to be held in Brooklyn, N. Y., in February, 1903. The following officers were elected: C. W. Ward, Queens, N. Y., president; Alfred H. Langjahr, Brooklyn, N. Y., vice-president; Alex. Wallace, 2 Duane street, Box 1697, New York City, secretary; C. G. Weeber, Brooklyn, N. Y., treasurer. Another meeting will be held at same place on

Tuesday evening, June 17, at 8 o'clock and all interested are invited.

A fund to provide ways and means for the entertainment of the members of the carnation society was instituted, and from the amount subscribed at the initial meeting it is very evident that the Brooklyn and Long Island florists will take no second place in providing a most cordial and hospitable reception to the visiting brethren in February next.

All communications regarding the new society should be addressed to the undersigned. ALEX. WALLACE, Sec'y.

### Chicago.

OPTIMISTIC SPIRIT PREVAILS IN THE WHOLESALE MARKET—BRISK DEMAND ON MANY ITEMS.—PÆONIAS SELLING VERY RAPIDLY.—WHOLESALE RELUCTANT TO CHEAPEN CARNATIONS TO CURBSTONE DEALERS PRICES.—WEDDING MATERIAL WANTED.—COMMISSION MEN REPORT BIG BUSINESS.—NOTES OF VARIOUS PERSONAL AND TRADE DOINGS.

There has been a fairly active market this week but values have been low. The shipping trade continues brisk and local weddings have called for considerable stock. The receipts of roses are not unwieldy, but qualities are poor and a large proportion of the daily receipts are unfit to send to a buyer who is not in touch with market conditions. Beauties are no longer over-plentiful. Carnations continue to come in heavily and with some growers the quality is deteriorating on account of hot sun and lack of care. The consequence is that there is a considerable accumulation of the lower grade stock but the wholesalers are manifesting a disposition to steer clear of the error into which they fell last year. There is nothing in handling carnations at less than 40 cents per hundred, but last season, as soon as clean-up sales began to be made at 5 cents a bunch that was all the street salesmen were at any time willing to pay. Now, however, the growers, seem to prefer to throw away a few carnations rather than cheapen their product to last year's level. Aside from roses and carnations the paeonia is still the leading flower in this market. They are in very active demand and very large quantities are being moved, good, bad and indifferent. The choice stock is bringing 75 cents a dozen, although Drop White, as Festiva Maxima has long been known locally, is being sold at 50 cents. But the poor stock is bringing little money. A large proportion of the receipts lately have been too far open and, no matter how choice the variety, such material cannot be shipped, nor can it be sold except for immediate use and necessarily at cheap prices. Sales are on record where this class of stock has been sold at 5 cents a dozen. While the returns for this material average lower than ever, because there never before were so great quantities of it, the sale of the choice bunches is not affected; indeed both E. E. Pieser and A. Kennicott agree that it is averaging rather better money than usual. While the garden crops approach an end, there are two or three firms with good quantities in cold storage. However, the supply is not likely to last long and Mr. Kennicott, for one, thinks it will be exhausted before school closing, June 27. Certainly the paeonia is gaining in popularity every year. A few poppies and gladioli and other summer flowers are seen but in general the odds and ends, like pansies and swainsona, do not find much of a market, although

good sweet peas, lily of the valley, smilax and asparagus move briskly, being in demand for weddings. For a couple of days this week there was no valley to be had.

All the retail florists of the city were invited to attend a meeting of the Horticultural Society of Chicago, June 10, for the purpose of consulting and advising as to the premiums that should be offered for floral arrangements at the annual fall exhibition. It is to be regretted that only two of the strict retailers, P. J. Hauswirth and Walter Retzer, put in an appearance. Beyond an informal discussion of the subject, no action was taken on account of the small attendance of retailers.

At the regular meeting of the Florists' Club, June 11, two summer outings were suggested, one a lake trip and one in the vicinity of Chicago. Arrangements and dates will be announced in due course. The regular meetings were suspended until the second week of September.

Although Prosperity has brought regularly the highest price of any carnation in this market this winter, Peter Reinberg says there has been no money in it for him, even including the sales of cuttings, and he will not bench any of it next autumn.

James Hartshorne has been sending in great quantities of paeonias from Joliet, where he has undoubtedly the largest field of paeonias in the United States, approximately ten acres. They have sold well, except those which were too open.

Paul Swanson sold \$2,500 worth of mushrooms from four small sheds up to May 1, and expects to increase the amount to \$3,000 before the first of July. He attributes his success to the home-made spawn which he employs.

Fire did several hundred dollars damage at Peter Reinberg's place on Sunday evening. The blaze destroyed a boiler shed and one side of an adjoining empty greenhouse. There was no insurance.

Leopold Koropp is adding a new house 20x100 to his place at Wellington and West Ravenswood Park avenue. He says that this season he is going to plant all his Asparagus decumbens seed.

Walter Kreitling & Company secured the decorative work on the Washington Park Club for the annual celebration which takes place before the opening of the popular race track next Saturday.

E. C. Amling filled an order for ninety dozen American Beauties on Wednesday. Mr. Amling says that the first week in June was the biggest outside of holidays in his business career.

J. B. Deamud is well pleased with June business. It is about one third heavier than a year ago with him, but he has found a good increase right along.

"Paeonia affairs" appear to be popular with local society people this year. It is a good idea to encourage them as they use up a lot of the flowers.

W. S. Ross & Son, of Alma, Ill., are shipping in great quantities of sweet peas. They are mostly short-stemmed but are selling well.

If the rains let up for a while now the stock in the fields will be in great shape. The ground has been too soft to work on for three weeks.

One of Bassett & Washburn's boys, Hugh Woell, is at Alexian Brothers Hospital as the result of catching his foot in the elevator.

O. W. Frese is again at his accustomed post this week after a few day's vacation.

VIEW OF THE RHODODENDRON SHOW ON THE F. B. HAYES ESTATE, LEXINGTON, MASS., IN THE OLD DAYS.

J. A. Budlong is just home from a three week's cycle trip to St. Paul. Rains and soft wheeling made the trip going take two weeks.

A. F. Longren is doing all the glazing on the new houses of Poehlmann Brothers, Morton Grove, and John Brod, Niles Center.

M. Winandy is cutting some very fine roses, the Meteors exceptionally good for such warm weather. Deamud handles his cut.

Miss Kennicott, daughter of Flint Kennicott, graduated from the Conservatory of Music Tuesday evening.

At Klehm's Nursery they are cutting longiflorum lilies which are a long way ahead of the Easter crop.

Visitors: P. J. Van Heiningen, representing P. Loeb Az. & Co., nurserymen, Boskoop, and J. Van Reisen & Son, bulb growers, Haarlem, Holland; Mr. Currie, of Currie Bros., Milwaukee; Benjamin Chase, Derry, N. H.; Joseph Heintz, Jacksonville, Ill.; N. Zweifel, Milwaukee; W. B. Lovell, Sabula, Ia.; R. C. Chase, Huntsville, Ala.; Chas. Brown, Canton, O.; J. J. Styer, Concordville, Pa.; J. H. McFarland, Harrisburg, Pa.; R. C. Berckmans, Augusta, Ga.; G. C. Perkins, Newark, N. Y.; J. C. Rennison, Sioux City, Ia., and others attending the waterworks convention in Chicago or enroute to the nurserymen's meeting at Milwaukee.

NEW CASTLE, IND.—Myer Heller and his family have gone east for the summer. Mr. Heller has not been in good health lately and feels the need of rest. At the greenhouses everything is in good shape, the Beauties particularly fine for the season. They have thrown out very few plants yet, the plants having been given rather different treatment than a year ago. They expect to cut good Meteor

all summer, also Golden Gate. A few Kaiserins are giving a good account of themselves.

#### Boston.

MARKET GLUTTED WITH FLOWERS—HOT WEATHER RESPONSIBLE.—DROUGHT TELLING ON STOCK OUTDOORS.—EXPRESS COMPANY MAKES NEW DEPARTURE.—AIDS WHOLESALE FIRM DURING BUSINESS RUSH.—NOTES.

The hot dry spell we have been suffering from for the last two weeks is responsible for the glut of flowers on the market at time of writing. The depreciation in quality from the preceding week is accounted for by the same cause. American Beauty ranges from \$2 50 a dozen to \$1.00 per 100. Queen of Edgely sells fully as well as American Beauty. Bride, Bridesmaid, etc., running very small and off color, from 50 cents to \$6 and \$8 per 100; the latter in small quantities. Carnations last Saturday went well at \$2 to \$3 per 100; now they go hard at \$1 per 100, except a few fancies, which reach \$2. Sweet peas in vast quantities at 20 cents to 50 cents per 100. Smilax goes well at \$1.50 to \$2.00 per dozen. Pæonias in bulk bring from \$2 to \$6 per 100. Asparagus plumosus is in good demand. Cold-frame lily of the valley in large quantities brings from \$1.50 to \$2, forced material going fairly well at \$2 to \$3 per 100.

We hear that the American Express Co. placed at Welch Brothers' disposal for three days previous to Decoration day, a team and two men to help them handle their goods with greater dispatch. We believe this is the first time in the history of the Boston flower business that such a thing has been done.

The prolonged drought, combined with the hot windy weather we are experienc-

ing, is beginning to have an effect on outside planting that will have to be offset with the sprinkler or the results will be apparent when we come to house in the fall.

There is not the slightest doubt but that the demand for flowers at Decoration day is growing more rapidly in this section than at any other of the "red letter" days in the calendar.

The scarcity of hardy ferns just previous to Decoration day was a handicap to many of the bouquet makers, but quantities came on just at the last and helped out amazingly.

Late spring work is probably responsible for the scarcity of the boys in town the past week.

Visitors: A. T. Boddington, of Clucas & Boddington, New York; James S. Wilson, Vaughan's Greenhouses, Western Springs, Ill. C. I.

#### New York.

CLUB HAS AN INTERESTING SESSION AT CIVIC HALL.—COMMITTEES REPORT PROGRESS.—DISCUSSION ON PÆONIAS.—THE EXHIBITS.—EUROPEAN VOYAGERS.—THE MARKET.—THE OUTING ANNOUNCEMENT.—PERSONAL DOINGS.—NOTES.

The regular monthly meeting of the New York Florists' Club was held at the Civic Hall on Monday evening, and on a motion it was decided to meet there until a permanent place could be found. Secretary Young being absent, Alex. Wallace filled the position for the evening. President Sheridan announced his transportation committee to look after the matter of going to Asheville. The Southern railway sent a letter making a very favorable rate and quite a number are preparing to go. The committee on associate members reported and considerable discussion was brought out. The

matter was referred back, as it necessitated the changing of the by-laws. The exhibition and excursion committees reported progress. Messrs. Rennie, Gray and DuRie were appointed to report on the exhibits of the evening. Geo. Lawrence was nominated for membership. A committee on resolutions was appointed to tender to Secretary Young the sincere condolence of the club on the loss of his father. On invitation from the chair, C. W. Ward gave a lengthy discourse on the pæonia, of which he had a very fine exhibit. Messrs. O'Mara, Troy, Beaulieu and others also took part. Among other things Mr. Ward stated it is almost impossible to get the true nomenclature of pæonias, either here or in Europe, and deplored the fact. Mr. Wilson, of Western Springs, Ill., also took part in the discussion and gave an interesting talk on the keeping of pæonias in cold storage in Chicago. C. W. Ward was awarded a cultural certificate for his exhibit of pæonias, of which he showed some excellent double and single varieties. H. Beaulieu, of Woodhaven, staged some pansies, a new cactus dahlia named Uncle Sam and a seedling rose of the polyantha type. Frank Weinberg, Woodside, showed *Tillandsia Costaricensis*, which was awarded a certificate of merit, also some rare cacti.

Alfred Dimmock sails for Europe next Saturday on the *Etruria*. Quite an exodus, too, of florists occurs during this and next month. Geo. W. Stumpp sails on June 17. Henry Siebrecht, Jr., sails on the *Symrna* June 20. Albert Small sails in the early part of July. Aug. Rhotert and one or two prominent wholesalers may also cross the ocean. C. F. Bertzangle sails on the *Prince Bismarck* June 26. The veteran sailor, Thos. W. Weathered, sailed on the *Lucania* last Saturday. He has been crossing since 1859.

"O! yez, O! yez. All aboard for ye second annual bean-feast of ye New York Florists' Club, to be holden at ye beautiful spotte called Witzel's Point, View Grove, L. I., on ye Monday, July seventh. Ye paddle-boate will leave at ye foot of Thirty-first street at 9:45 in ye earlie morning. God save the Republic (also the Committee)," is the way the announcement reads.

The less said about the market this week the better. Matters are worse, if anything, this week than last and prices are as variable as the moon's changes. Sweet peas are coming in large quantities and the mildew roses are "mildewer." A few auratum lilies are to be seen, but as a whole the market is demoralized.

Visitor: Robert Craig, Philadelphia.

#### Denver.

TRADE GOOD FOR MEMORIAL DAY.—BOTH CUT FLOWERS AND PLANTS WELL CLEANED UP.—THE CARNATION THE POPULAR FLOWER.

The demand for cut flowers for Memorial day exceeded that of previous years. At the beginning of the week there looked to be enough stock to go around but hardly a flower was on sale Friday morning. Carnations sold best, ranging from 50 cents to \$1 per dozen. Roses also had a good call. American Beauties were scarce and in demand. The shortage of outdoor flowers helped make greenhouse stock short. The trade largely was shipping to the mountain towns and Wednesday and Thursday were very busy days in that line. The greenhouse men report business good in the plant line and about sold out.

The Park Floral Company were fortunate in having in for Decoration week a house of hybrid roses which sold exceptionally well and were fine in quality.

Stock is plentiful at present and though the weather is very hot quality holds out except on pæonias, which wilt very quickly. B.

#### Toronto.

BUSINESS GOOD.—HIGH GRADE STOCK SCARCE.—PAVILLION OF HORTICULTURAL GARDENS DESTROYED BY FIRE.—LOSSES HEAVY.—NOTES AND COMMENTS.

Local florists all seem pleased with the way business holds up. Orders for weddings, decorations and funerals are unprecedented for this season, and all kinds of stock is well used up. Growers also report heavy shipping orders and plantmen are having unusual activity. Roses are beginning to show the effects of warm weather and Brides and Bridesmaids are comparatively small, but mostly free from mildew. Meteor and Perle are much better and a few good Kaiserins have made their appearance, but were it not for the outdoor stock, which is at present very plentiful, the supply of roses would not equal demands. The above conditions also apply to carnations, and though there are some good ones on the market, they are mostly of inferior grades. In white *Flora Hill* is exceptionally good. Genevieve Lord and *The Marquis* hold predominance in pink and Governor Roosevelt is no doubt the best of the dark reds. Eldorado is the best yellow, and from its keeping qualities is profitable to handle, but Prosperity is at present the pride of them all. At a recent wedding the buffet table was decorated with quantities of these choice blooms, with *Adiantum cuneatum* used for green, and was without doubt the prettiest and daintiest table seen for many a day. This season has seen the best outdoor lily of the valley ever produced in this country, and was far ahead of any that had been forced last season. Grobba & Wandrey, of Mimico, had thousands grown in the field from pips of their own raising, which are proving very profitable. This firm bids fair to compete with European growers in a short time, as they now have this part of the business down to a science. Pæonias are just making their appearance, and are a welcome addition to the cut flower trade. Lilies are about over, and the outlook for green goods is again propitious.

On Thursday night fire broke out in the pavillion of the Horticultural Gardens and reduced to a complete wreck what had a few minutes before been the scene of feasting and beauty. The banquet hall had been elaborately decorated by Dunlop for the local board which was giving a dinner to the visiting delegates of the Canadian boards of trade, and the decorations were the best ever undertaken in this building heretofore. Covers were laid for 415 guests and the tables gorgeously decorated with roses, carnations, valley, etc. Shortly after the guests departed, fire broke out and all the contents of the building were totally destroyed. Dunlop suffered to the extent of over 200 fine palms, besides numerous pedestals, jardinières, vases, baskets and some nice bougainvillea, hydrangea and other plants. The city's loss was considerable damage to the conservatories which adjoined the building besides losing quite a number of specimen plants which will be hard to replace. The florists themselves are losers, as they had an agree-

ment to have the hall each year as a place to hold the annual show without charge, and having stored in the cellar of the building all their vases, tables and other paraphernalia, all is lost. The pavillion was the scene of the S. A. F. convention held in Toronto about eleven years ago.

Charles Grobba, while coming to town with a wagon double decked with flowering plants which protruded over the side, had an accident which might have been serious. His horses took fright at a passing car, and swerving to the side, the top deck came in contact with a telegraph post and Mr. Grobba was thrown to the ground, the heavy wagon passing over his ankle. The doctors straightened it and after spending several days at home quietly, he is again on active service.

Decorations on three different occasions called for considerable design work for the monuments in Queen's Park, but the color combinations used in some of the designs last Saturday lead me to remark that a color chart would not be amiss with some of our local talent.

A recent hurricane caused considerable damage to trees and shrubbery, and several of the florists who were unfortunate enough to receive the full force of the winds lost considerable glass.

R. Jennings, of Brampton is sending in some good Beauties, about the only ones around. He reports a very prosperous season and forecasts a better one coming.

George Sewell, an employe at Dunlop's, was quietly married on Monday night.

Visitors: Wm. Fendley and R. Jennings, of Brampton. H. G. D.

#### Philadelphia.

SIGNS THAT SUMMER IS CLOSE AT HAND.—WEDDINGS AND COMMENCEMENTS KEEP STOCK MOVING.—PRICES AND QUALITIES NOT HIGH.—GOOD PÆONIAS HAVE THE CALL—A VARIETY OF PERSONAL AND TRADE NOTES OF GENERAL INTEREST.

The signs of approaching summer dullness are not lacking. Closing time is now seven instead of eight o'clock and very soon the "this store closes at six p. m." sign will be found in the windows. There were quite a number of weddings the past week, and these, with the school commencements, kept the stock moving. Of course flowers are cheaper; in fact, down almost to the summer level. The best Beauties range from \$1.50 to \$2. Teas tetch from \$4 to \$6, with a few extra specials at \$8. Quality has also taken a drop, as cool nights have brought on a lot of mildew, which, together with the scorching sun, has had a bad effect on the teas. Carnations are very good for the season and look as if they will hold out for a month yet. Pæonias are just about done. Perhaps it would be well to say here that growers should take some pains to get good varieties, which, while they do not cost any more to grow than the common sorts, bring far better prices and sell well at a time when the common sorts go begging. *Centaura* is now seen in all the windows and is a welcome addition to the assortment of the season. Sweet peas are fine and, although plentiful, are well cleaned up every day.

John Westcott is to have a house warming or opening for the season at his bungalow at Warctown next Saturday. Invitations have been generously given and quite a number of the boys will journey to the bayside and enjoy themselves to the full. Fish have not commenced to run much as yet, but that

there will not be a dull moment goes without saying.

Robert Craig says he is only just beginning to realize the possibilities of the business. Particularly is this the case in the adornment of country estates, which are now being planted and cared for with lavish hand, and many of which he is sure will soon approach in beauty the noted establishments of Europe.

Joseph Heacock's palms are moving lively but he is still cramped for room to report and expand his rapidly growing stock. He is a great believer in the future and expects to see the demand for plants increase with greater rapidity than in the past.

John Lucas & Company had an attractive and interesting glass exhibit at the Charleston Exposition and were awarded a gold medal. The display was very complete and included all the latest in the line of plate glass, mirrors and window glass.

David Rust and Edwin Lonsdale have been attending the Agricultural College the past week as delegates of the Pennsylvania Horticultural Society.

S. S. Pennock has been receiving some extra fine lily of the valley, which brings readily \$5 per hundred. He handles from 5,000 to 8,000 per day.

Colfesh & Koehler had in a lot of Easter lilies for the first two weeks of June that found a good sale at from \$5 to \$8. K.

#### Cleveland.

INTERESTING CLUB MEETING.—SUMMER OUTING PLANNED.—NEW PARK BOARD TO BE APPOINTED.—BUSINESS BOOMING.—THRIP TROUBLESOME.—CARPET BEDDING.

The Florists' Club held its regular meeting last Monday evening and quite a goodly number were present. J. C. and F. F. Andrews, the famous fruit and pansy growers of Lakewood, O., were elected to membership. Subjects of a very entertaining character held the attention of the members until a late hour. The annual summer outing was talked over and A. Schmitt, A. Graham, H. A. Hart and F. C. Bartels were appointed a committee to take the matter in charge and select the time and place to hold the jollification. Mr. Schmitt wants the picnic to be held at least fifteen miles from any greenhouse. He says he wants to get out of sight of a plant shop for at least one day. Another matter of mighty import was the park board business. As a new park board is about to be appointed (according to a recent law passed in this state) by the probate judge of this city, the club deemed it advisable to take some action in the matter and endeavor to secure the appointment of at least one practical horticulturist a member of said board. Heretofore, under the old regime, it was customary to select men who had absolutely no knowledge, as our friend Watson would say, of horticulture, floriculture, arboriculture or landscape gardening; therefore, the club deemed it advisable to appoint a committee comprising the following: Wm. Brinker, Isaac Kennedy, J. M. Gasser, H. A. Hart and Gordon Gray, to wait upon the eminent jurist with a petition from the club asking the privilege of suggesting the name of a practical gardener to comprise one of the board. It is to be hoped their efforts in this matter will meet with success, as it is very essential that Cleveland should retain the enviable reputation it has acquired of having some of the most beautiful parks and boulevards in the

country. Robert Kegg, the present superintendent, has worked wonders in improving and beautifying the park system.

Business is booming, every storeman in town having all he can attend to in the way of decorations, commencements, etc. Stock keeps up pretty well; carnations are fine; roses are only fair, a great many being injured by thrip, which is creating havoc in a number of places. This little pest seems to be worse this year than ever. The outdoor flowers are nearly ruined by it. Pæonias are about over except those in cold storage. Planting is about all done; the next move will be benching chrysanthemums and asters. About the usual quantity will be grown. Carnation weather is still keeping up.

Charlesworth is executing some beautiful carpet bedding around the Soldiers' and Sailors' Monument in the public square. These beds attract a great deal of attention. Thousands daily admire the charming and intricate designs. Of alternanthera alone 200,000 are required, besides thousands of other plants suitable for such work. The work certainly reflects great credit upon Mr. Charlesworth and his able assistants.

ECHO.

#### Pittsburg.

STATE OF TRADE.—WEDDINGS NUMEROUS.—BEDDING PLANTS IN GREAT DEMAND.—SCHENLEY PARK IMPROVEMENTS.—CLUB PICNIC JUNE 19.—JOTTINGS.

The volume of business continues well up to the average for this season of the year and the promise for steady improvement for the balance of the month is bright. Wedding decorations are quite numerous this week; white bridal sets are the main issue. Roses are not nearly as cheap as they look, and the percentage of good roses is very low, when you take them collectively. Carnations, with the exception of whites, are doing well. Of course, lily of the valley is in great demand; the supply seems to be sufficient and the quality excellent. Palms and Boston ferns are having their inning, too.

Superintendent William Falconer has had a force of ten men at work decorating part of the Schenley Park near the Panther Hollow bridge for the American science convention. He is having it planted with echeveria, the words, "Our Guests, 1902," and underneath that the initials, "A. A. A. S.," standing for the American Association for the Advancement of Science. Another improvement being made is the excavating of a lily pond on the south side of the conservatory, which will be 20x35 feet. It will be one of the prettiest lily ponds in the country. About 100 laborers were started at work last week on the cementing of the many broad walks that lead to the conservatory.

The Pittsburg and Allegheny Florists' and Gardeners' Club will hold its annual picnic at Ross Grove, on Thursday June 19. Music, baseball, refreshments and foot racing will be the features. The club is composed of about 130 members. Each detail necessary for the success of this outing will be diligently looked after by the committee, which is composed of George Reineman, John Bader and Ernest Ludwig.

The Cut Flower Company, displayed some very fine gardenias during the week. Pittsburg is really a good market for them. In the winter season it is necessary to send to New York for them. Good white sweet peas are out of the race, as very few are to be seen here.

There seems to be no end to the quantity of bedding plants, as the markets have completely replenished the supply, and the activity of this branch of the business this season has been most remarkable.

John Bader secured the contract for decorating the Grand Opera House this week. This is one of the features of the last week of the theatrical season.

"Tom" Ulam is wishing for the coming of summer; he is anxious to get to Atlantic City to watch the tide go out.

David Geddes, of the south side, has been securing his share of funeral work, as usual. E. L. M.

#### Buffalo.

TRADE NOT ACTIVE.—OUTDOOR STOCK NOT WANTED WHILE ROSES AND CARNATIONS ARE SO CHEAP.—SOME ELABORATE WEDDING DECORATIONS.—ANDERSON DOES THE BEST JOB OF THE SEASON.—VARIOUS NOTES OF LOCAL DOINGS.

Changeable weather, the last two days cold and rainy, does not help the flower trade very much. Outdoor stock cannot be found in the stores while carnations from 10 cents per dozen upward are common in the windows. Roses are plentiful still and American Beauties sell well at \$6 per dozen. Funeral work has not been very brisk, but this week has had its share of weddings, both large and small; nearly everyone has had from one to three wedding jobs, which called for a good many roses and palms. One on Monday, at the Jewish synagogue, was quite elaborate, but that on Tuesday at the residence of Gustav Fleischman, was the most elaborate of the season. The whole house was turned over to S. A. Anderson and he handled the job in first-class style. Two school commencements called forth a lot of roses sent to the graduates, but not as many as a few years ago, when flowers were allowed at the hall.

William Scott was in town last week and from the reports from his greenhouses he was here on Decoration day, for all the stores near the cemeteries had more than they could do, while I am told that down town stores were as quiet almost as on the Fourth of July.

There was to have been a meeting of the B. F. C. this week but all greenhouse men were so busy it was not thought advisable to call it and I am afraid it will be postponed until July.

From my out of the way place of business I have not heard any rumors of a florists' holiday, but by July Scott, Cowell, Braik and Kasting will want a hall game.

George Reichert, formerly with L. H. Neubeck, has severed his connection with C. D. Zimmerman, after about two months' work.

Margaret Skinner is now with J. H. Rebstock. BISON.

DAVENPORT, IA.—John T. Temple has completed the bedding on the courthouse lawn.

SEDALIA, MO.—Gelven & Son have their new range of houses up and planted and are much pleased with them. They are new style, short-span, connected houses with iron gutters set six feet six inches above the ground.

TARRYTOWN, N. Y.—The annual rose and strawberry show of the Tarrytown Horticultural Society will be held at the Lyceum on June 16. There are sixteen classes on the schedule, with useful articles offered as premiums in each.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—4 times, 5 per cent; 12 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THERE is very little butted glass laid  
on this season's greenhouses.

THE supply of bedding plants has  
proved to be, in general, equal to all  
demands.

MILWAUKEE is "a bright spot" this  
year. It is entertaining its conventions  
most hospitably.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

THE florists are handling more and  
more nursery stock every year. Those  
who have grounds on which to grow a  
collection of specimens of the things most  
easily handled find this a very important  
branch of their business.

THE supply of paeonias throughout the  
country this season was more than the  
cut flower markets could assimilate  
without a break in values. One of the  
attributes of this flower is that it may  
be readily held in cold storage and doubt-  
less this method of relieving the pressure  
will be more frequently employed in the  
future.

EVERYONE commends the move post-  
poning the St. Louis exposition to 1904  
and, while neither Chicago nor Buffalo  
envy her the undertaking, the whole  
country is interested in the success of the  
show. If the railroads will do their part  
as well as the horticultural trades will  
do theirs, which they did not for Buffalo,  
the success of the exposition will be  
assured.

### An Old Friend.

ED. AM. FLORIST:—I forward you \$2, for  
which credit my subscription to 1904.  
Your paper is an old friend of mine; I  
cannot be without it.  
Huntington, N. Y. WM. O'HORA.

### Diseased Begonia Leaves.

ED. AM. FLORIST:—I notice in your  
issue of May 31, "N. J. F." sends you a  
diseased begonia leaf and asks name of  
disease and the remedy. My impression  
is that it is the same thing that I have  
had in my greenhouse for several years.  
There is nothing that it will not attack.  
Begonias, ferns, marantas, dieffenbachias  
and cacti are all attacked by it. I find  
that tobacco stems about an inch thick  
around the pots, changing them every  
two or three weeks, will keep it down, if  
not eradicate it entirely. I have had no  
trouble with my begonias since I adopted  
this course. J. B. DAVIS.

### Worth \$5 A Year.

ED. AM. FLORIST:—Enclosed find  
renewal of my subscription. Your paper  
is a great benefit to me. I would not  
cease taking it if the price was \$5 a year  
instead of \$1. S. M. WILE.  
Wellesley Hills, Mass.

### Correction.

The item with reference "Johnnie"  
Kral, in our New York notes of last  
week, appears to be incorrect, as we are  
now informed that when he does return  
to work, he will be found with his old  
firm and that congratulations addressed  
to him in care of Moore, Hentz & Nash  
will surely reach their destination.

### Greenhouse Building.

Detroit, Mich.—C. H. Plumb, two  
houses 27x88.  
Mexico, Mo.—C. C. Wonneman, two  
houses 28x75.  
Philadelphia, Pa.—Craig & Son, four  
carnation houses.  
Mt. Clemens, Mich.—F. Gutschow &  
Son, two houses 30x112.  
Chicago, Ill.—Leopold Koropp, house  
20x100.  
Des Moines, Ia.—W. L. Morris, rose  
house 48x200.  
Canandaigua, N. Y.—Robert McKerr,  
three carnation houses.  
Chasell, Mich.—A. E. Lutey, range of  
houses.  
Champaign, Ill.—C. E. Ferdinanson,  
three houses.  
Mt Sterling, Ky.—E. Fredrich, house  
20x80.  
Hagerstown, Md.—Wm Bester, three  
houses 18x100. H. A. Bester, two car-  
nation houses.

### New Members of the S. A. F.

During a recent call on the secretary of  
the S. A. F., in Boston, he reminded me  
that I was a state vice-president of that  
body for eastern Pennsylvania. I made  
some remark about that being an easy  
job, and was inclined to make light of it;  
for which top-lofty air, I promptly got  
rapped over the knuckles. Assuming a  
more serious attitude, I asked, "Well,  
then, what are the duties of a state vice-  
president, anyway?" Among the most  
important of all, I was informed, was  
the duty of keeping the membership  
fences of the district he belongs to in  
repair. I quickly realized that that was a  
job indeed. I have worked in too many  
societies not to be well aware of what it  
means to go for the laggard, the dis-  
gruntled and the indifferent. However,  
I set to work and here is the result of my  
last week's work: Ira H. Landis, Lan-  
caster, Pa.; H. H. Battles, 108 S. Twelfth  
street, Philadelphia; J. Henry Bartram,  
Lansdowne, Pa.; David Bearn, Bala, Pa.;  
Frank Polites, Thirteenth and Chestnut  
streets, Philadelphia; Chas. Meckey, Sev-  
enteenth street and Eric avenue, Phila-  
delphia; Jno. G. Gardner, Villa Nova, Pa.;  
Frank Whiteley, Sixteenth and Chestnut  
streets, Philadelphia; Eugene Bernheimer,  
1604 Ludlow street, Philadelphia.

Next week I hope to have another  
batch to report, and if I do not it will  
not be my fault. I publish these names  
because, although not a very large bag  
for a week, it shows that something can  
be done and there may be some other  
vice-president like myself requiring a  
little stirring up. Individual members  
can also talk to their neighbors, and  
everyone should try to send in at least

one new name. Three dollars a year is  
not much and will not be missed. Never  
mind whether one intends going to Ashe-  
ville or not; all should be members  
whether they go to conventions or not.  
It's rather a disgrace, I think, for a florist  
not to belong to his national society.  
G. C. WATSON.

### A Rose Pest.

ED. AM. FLORIST:—Please give name of  
and remedy for the worm which you will  
find in the green balls on the rose leaves  
which I send you by mail under a separa-  
te cover. J. W.

The green balls on the rose leaves  
which you send, are known as galls and  
are produced by an insect called the two-  
colored gall fly, *Rhodites bicolor* Harris.  
These and several other galls or excres-  
cences are of common occurrence on rose  
bushes throughout the country, and the  
present form was described by the veter-  
an economic entomologist, Dr. T. W.  
Harris, in 1841. The galls, as you note,  
are round, and when more mature  
become of a reddish color and of about  
the size of a pea, rarely measuring more  
than three-tenths of an inch. The insect  
which produces it is a four-winged, wasp-  
like fly which attains a measurement of  
about one-fifth of an inch in length. It is  
black, with brownish red legs. These  
galls seldom do permanent injury to use-  
ful plants, but, of course, their presence  
is objectionable on account of their  
appearance. There is no way of reach-  
ing the insects within the galls by means  
of poisons, hence there is no better  
method of preventing galls than by  
destroying them as soon as they appear,  
before the issuance of the insects to pro-  
duce others. If you open these galls you  
will find that they contain, in a more or  
less advanced stage of growth, little  
pale-whitish creatures somewhat resem-  
bling a grub or a honey bee, but more  
slender. The mouth-parts are well devel-  
oped, and at the tip there is a tail-like  
appendage. A single larva or grub  
inhabits a gall, as a rule. This species of  
gall appears to have no particular com-  
mon name attached to it, but a similar  
larger gall is known as the bedeguar of  
the rose. F. H. CHITTENDEN.

### Catalogues Received.

V. Casazza & Bro., New York, insecti-  
cide; John Lucas & Company, Philadel-  
phia, paint; James Vick's Sons, Roches-  
ter, N. Y., bulbs; T. H. Thompson Seed

Perry, London, plants; Ad. De Clercq-Van Ghysseghem, Ghent, Belgium, plants; Frantz De Laet, Antwerp, Belgium, cacti.

**OBITUARY.**

PROF. E. S. GOFF.

E. S. Goff, professor of horticulture at the College of Agriculture, Madison, Wis., died June 6. He was in his forty-ninth year.

P. H. THERKILDSON.

P. H. Therkildson, formerly manager of the Miller greenhouses at Ironton, Ohio, died May 1. Mr. Therkildson was born in Denmark and came to this city twenty-seven years ago. He was married to Miss Mattie Miller in July, 1878. About three years ago he removed to Richmond, Ind., and later to Chillicothe, Ohio, where he was engaged in the flower trade. He had been ill since March 1. As Mr. Therkildson had expressed a wish to die at his old home, he was removed to Ironton a few hours before the end came. His wife and seven children survive him. The elder son, Frank, is manager of the Miller greenhouses, with which his father was so long connected.

**SITUATIONS, WANTS, FOR SALE.**

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By Aug. 1st, in the orchid shipping business by young man, age 20. Three years' experience as a florist. Address ORCHID, care American Florist.

**SITUATION WANTED**—By a first-class rose grower; best of references from some of the leading rose growers of New England. Address F H A, care American Florist.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

VISITED NEW YORK: Arnold Ringier, representing W. W. Barnard & Co., Chicago.

HENRY F. MICHELL, of Philadelphia, is on his wedding tour, having been married last week.

B. SUZUKI, of Suzuki & Iida, New York, is on his way to Japan, via San Francisco. He expects to return next December.

WESTERN reports indicate a twenty-five per cent loss of crop by washouts, hail and rain, with prospects for lots of over-sized sets.

VISITED CHICAGO: John T. Buckbee, Rockford, Ill.; James McHutchison, representing Aug. Rhotert, New York; W. B. Hoyt, Cambridge, N. Y.

TORONTO, ONT.—A. W. Annandale and John Regal, of the Steele, Briggs Seed Company, sailed for Europe June 6 to purchase supplies for their different departments.

THE directors of the Wholesale Seedsmen's League will hold their next meeting in Minneapolis, Thursday, June 26. The annual meeting of the league will be held at 8 p. m. that date.

ALL seedsmen are requested to write at once to their congressman asking his support of House Resolution No. 249 regarding investigation of government seed contracts for the last four years.

THE Chicago seedsmen are very anxious to have the delegates for Minneapolis join them, starting from Chicago on the evening of June 23. See notice elsewhere on this page. A good time is expected.

THE Lawrence, Kan., correspondent of the *New York Commercial* wires June 6: The Kansas seed house of Barteldes & Company received a large telegraph order to-day for seeds to be sent by express for the restoring of Boer farms in South Africa devastated by the recent war.

## Seed Company Incorporated.

The incorporation papers of the Mandeville & King Company, Rochester, N. Y., were filed June 3. The new company will deal in seeds and is capitalized at \$250,000. The directors are Willard J. Mandeville, Fred. B. King, William T. Fonda, all of Rochester, and Seth H. Pearse, of Cape Vincent, N. Y.

## French Roman Hyacinths.

The situation of the French Roman hyacinths is very bad at present but as yet this has not influenced other bulbs, says *Le Petit Marseillais*, of May 23, 1902. The current price of hyacinths seems to be eighty francs. This price is now offered by the merchants but is not always accepted by the growers, who anticipate a rise.

## Bermuda Lilies.

The following communication from a well informed correspondent in Bermuda, under date of May 30, will be interesting at this time:

"I am sending you a small photograph

FIELD OF LILIES IN BERMUDA.

(From a photograph of 1901.)

of lilies growing in Bermuda, on which you will be able to trace the foliage to the ground and see in what a healthy condition they existed in 1901. The 5-7 bulbs from these were planted in two large fields in the autumn of that year. The plants are of the true *Harrisii* type, very strong and vigorous, between three and four feet in height, feathered to the ground and scarcely with a blemish when visited about May 15.

"There are other fields throughout Bermuda which compare favorably with these and the whole of the lilies this year are far ahead of anything that has been produced for years; although the yield may be considerably more per area as compared with other years, the quantity produced will not be larger than that of last year, due to the fact that less were planted. The farmers are confining themselves to planting good stock on selected land. The lilies at St. David's Island this year are in excellent condition, much pains being taken by the various growers to produce fine exporting bulbs."

## American Seed Trade Association.

President Northrup advises us as follows regarding railroad fares to the Minneapolis meeting of the American Seed Trade Association, June 24-26: "Western Passenger Association, Trunk Line Association and New England Passenger Association grant fare and one-third rate for round trip. Receipts for fare paid will not be accepted in lieu of certificates."

## CHICAGO TO MINNEAPOLIS.

Seedsmen from the east and south of Chicago should purchase tickets from starting point through to Minneapolis, taking certificate receipt for same. This receipt when properly executed at Minneapolis will secure return ticket at one-third of the regular rate. In purchasing tickets be sure to see they read from Chicago to Minneapolis via the Chicago, Milwaukee & St. Paul R. R., so as to accompany the Chicago party, who are very desirous that all visitors passing through Chicago travel in the same car

or cars, leaving Chicago from the Union Depot at 6:30 p. m., June 23. Reservation on sleeping cars can be made through J. C. Vaughan, 84 Randolph street, Peter Hollenbach, 12 North Halsted street, or Goodwin Harries Company, 115 East Kinzie street, all at Chicago.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THROUGHOUT the south there is a constantly growing call for nut trees, the leaders being hickory and pecan.

THE Chico Nursery Company, of Salem, Oregon, has been incorporated with \$50,000 capital stock to do a general nursery business. The incorporators named are Malcom McDonald, Archie McGill and Leon Girod.

THE only charter members of the American Association of Nurserymen present at its twenty-seventh annual meeting, at Milwaukee, June 11 to 13, were Edgar Sanders, of Chicago, and Z. K. Jewett, of Sparta, Wis.

GEORGE S. JOSSELYN, the big grower of grape vines at Fredonia, N. Y., says that he believes not one grape vine in twenty sold to amateurs produces a good crop of first quality fruit because the top is not cut back sufficiently during the first two years of its life in the garden.

### American Association of Nurserymen.

Coming at the close of the best season on record it is well in keeping that the twenty-seventh annual meeting of the American Association of Nurserymen should establish a new high water mark for that prosperous organization. Large as were the conventions at Chicago two years ago and at Niagara Falls last June, this meeting was larger, both in attendance and in interest. Furthermore the business transacted between the members was most satisfactory; indeed, it was one of the best features of the convention, in pleasing contrast to the experience last year. The Plankinton House afforded excellent accommodations.

The assembly hall contained not less than 250 persons when President Berckmans called for order. He introduced Mayor Rose, to whom, as was to be expected, it "afforded much pleasure" to welcome such a fine gathering of "the flower of the land." The mayor did not omit to "hand over the keys of the city." He was responded to by N. H. Albaugh, and everyone who has attended a nurserymen's meeting knows what that means. President Berckmans then read his address. He spoke of the wonderful development of the nursery business in the past few years and pointed out that those who are on the best footing are the ones who send out nothing but good stock, true to name. He recommended that every nurseryman have a specimen orchard, to be resorted to for budding or grafting wood. He urged the necessity of cutting from nothing but hearing wood. The school of instruction for employes recently started by Thos. Meehan & Sons was commended. In conclusion Mr. Berckmans spoke of the importance of arranging the convention programme to permit of full discussion of trade matters.

Secretary Geo. C. Seager reported 766 names on the membership roll. Treasurer C. L. Yates showed receipts for the year to have been \$1,598.22 and cash on hand June 1, 1902, \$2,717.07.

Prof. L. H. Bailey was introduced and spoke extemporaneously for nearly an hour on the trend of the nursery business and its future. He thinks the most successful nurseryman is the one who is

imbued with the idea that he is doing a work for humanity. He said that the tendency is to specialize, to get away from the dead level of growing just such stocks in just the way every other man grows it. It was advised that the home market he cultivated. Prof. Bailey also urged that the school children be encouraged to grow plants as a means of fostering the local demand.

Thursday's session opened with the recommendations of the state vice-presidents and the election of officers, as follows: President, Charles A. Ilgenfritz, Monroe, Mich.; vice-president, D. S. Lake, Shenandoah, Ia.; secretary, George C. Seager, Rochester; treasurer, C. L. Yates, Rochester; executive committee, Wm. Pitkin, Rochester; N. W. Hale, Knoxville,

CHARLES A. ILGENFRITZ.  
President American Association of Nurserymen.

Tenn.; Peter Youngers, Geneva, Neb. It was voted unanimously to meet in Detroit next year.

N. H. Albaugh, of Phoneton, O., was introduced by President Berckmans to "read a paper." Of course it was a slip of the tongue, an inadvertence, for the Buckeye orator was never known to "read" any of his famous addresses. He gave an extemporaneous dissertation on "Who's a What," dealing facetiously with "bugs, buggers and humbugs."

He was followed by C. L. Watrous with the report of the legislative committee, dealing with the national inspection law now pending in congress. The conclusion of the reading of this report is always a sign for the orators of the association to clamor for the floor. N. W. Hale introduced a resolution in which the association emphatically endorsed the pending legislation, after remarks by Silas Wilson, N. H. Albaugh, George A. Sweet, A. L. Brooke, E. W. Kirkpatrick, J. S. Kerr and others. On motion of Z. K. Jewett, the committee was given a unanimous rising vote of thanks for its labors on this bill, which is thought to as nearly represent the interests of the nurserymen as any law can which will be able to get through both houses of congress.

Prof. F. W. Taylor spoke of the provisions made for horticulture at the St. Louis exposition of 1904, outlining the plans of the department and suggesting

means by which it is hoped, and almost assured, the nursery display will be the finest on record at any exposition in the world. He was closely listened to and on motion of G. W. Sallee, a resolution was adopted giving hearty endorsement to the exposition plans. The afternoon of Thursday was spent in a trolley ride about the city and in a visit to the places where the beverage is made which makes Milwaukee famous.

On Friday morning there was a paper by A. Willis, of Ottawa, Kans., on "The Relation of the Nurseryman to the Community in which he Lives." Unfinished business and the report of the committee on final resolutions brought a close to the convention.

This trade exhibit was about the same as usual as to stock shown, but not quite so large in extent as in recent years. Following is the list: Gage County Nursery, Beatrice, Neb., apple and pear seedlings; H. T. Jones, Elizabeth, N. J., raffia; Dayton Fruit Tree Label Company, wooden labels; August Rhotert, New York, raffia; D. Hill, Dundee, Ill., evergreens; Rochester Lithographing Company, Rochester, N. Y., fruit plates; Benjamin Chase, Derry, N. H., wooden labels; Greening Bros., Monroe, Mich., photographs; Stecher Lithographic Company, Rochester, N. Y., fruit plates; E. W. Kirkpatrick, McKinney, Tex., plums and peaches; Joseph Heintz, Jacksonville, Ill., junipers and roses; J. H. McFarland Company, Harrisburg, Pa., photographs; McMillan Company, New York, horticultural books; Jackson & Perkins Company, Newark, N. Y., tree counter registers.

### Retail Nurserymen's Protective Association.

The usual yearly meeting of the American Retail Nurserymen's Association was held at Milwaukee, June 12. The principal business was the election of officers, as follows: President, C. J. Brown, Rochester, N. Y.; vice-president, F. H. Stannard, Ottawa, Kans.; secretary and treasurer, L. R. Bryant, Princeton, Ill.

### Mutual Protective Association.

The Nurserymen's Mutual Protective Association is one of those harmonious bodies which meet, listen to the reports of a prosperous year, re-elect officers and adjourn. The meeting at the Plankinton House, Milwaukee, June 11, took less than half an hour. The officers are: President, N. H. Albaugh, Phoneton, O.; vice-president, Wm. C. Barry, Rochester; secretary and treasurer, Geo. C. Seager, Rochester; executive committee, E. Albertson, Bridgeport, Ind.; Irving Rouse, Rochester; F. H. Stannard, Ottawa, Kans.

### Nurserymen's Protective Association.

The American Nurserymen's Protective Association has seldom had a larger or more interesting session than that at Milwaukee, June 12. A good majority of the ninety-five members were present. Seven new members were elected. The society deals with credits and allied subjects and its condition is so satisfactory that there was no disposition to alter the control. The officers are: President, Wm. Pitkin, Rochester; vice-president, A. L. Brooke, North Topeka, Kans.; secretary, T. B. Meehan, Germantown, Pa.; treasurer, Peter Youngers, Geneva, Neb.; executive committee, Wm. Pitkin, Rochester; J. H. Dayton, Painesville, O.; C. J. Brown, Rochester.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At New York.

William Burns and William Siebrecht were the only bowlers who turned up at the alleys last Monday afternoon. They had a nice little game all to themselves. Following is the score:

Player	1st	2d	3d	Av.
Buros	190	165	172	176
Siebrecht	166	166	172	168

At Philadelphia.

At last the machinery that is to grind out the convention team has been set in motion and from now on the pins will fly in earnest. The meeting of the committee that adopted rules under which this preparatory contest is to be conducted was about the worst in point of confusion that it has ever been our lot to attend. It resembled a Quaker meeting in this respect, that the spirit moved one or two of the members to speak once each, this occurring when the meeting opened, and they were hard at it when weary Chairman Westcott dropped his gavel and declared the meeting adjourned. The summary of the rules is about as follows: Four matches of three games each are to be bowled on strange alleys, the first seven men in each match to be given a point and if any are ties for last place they get a half point. At the end of the tournament the six men having the highest number of points are to comprise the team and the next best player to go as substitute. Some rattling good games are being put up on the alleys these days. A four-handed game the other day developed 247, 211, 207, 177. Pretty fast company this. The following are the averages of all games played during May, 990 games being the total:

Player	Av	Player	Av
Dunham	178	Ronsail	153
Moss	169	Kirk	153
Kuestner	168	Harris	152
Kift	167	Holmes	149
Moore	165	Sweet	149
Mooney	161	Anderson	148
Connor	163	Hitschler	148
Adelberger	161	Gibson	143
Fletcher	160	McElroy	133
Westcott	155	Hoegerle	132
Eimermann	155	Leaver	132
Archer	155	Eikineyer	130
Craig	155	Hanna	128
Allen	154	Dunlap	126

K.

Cincinnati.

HOT WEATHER INJURES STOCK.—GOOD DEMAND FOR THE SUPERIOR GRADES — GROWER SUFFERS FROM HAIL.—HERE AND THERE.

Stock is beginning to show the effects of warm weather and about three-quarters of that received is second grade. Good material is selling well at fair prices, but it is a hard matter to move the poor stock at any price. The market is glutted with *Lilium candidum* and it looks as though every market woman coming in adds a few hundred to the already glutted stands. The demand is for white roses and this is about the only article that seems scarce. Sweet peas are coming in more freely, in fact there is about as many again as can be sold, quite a change from last week.

A TRADE PICNIC PARTY AT WESTERN SPRINGS, ILL.

Carnations are holding up wonderfully well both in quality and quantity. Bridesmaid roses, too, are good in size and color for this time of the year. Graduation exercises are about over and any week now we can look for the summer dullness to set in.

C. H. Roney, manager of the Lakeview Rose Gardens, Jamestown, N. Y., was in town the past week sizing up the market. Undoubtedly Mr. Roney thinks this is a good market, judging from the amount of flowers he shipped in during the past few days.

Theo. Bock, of Hamilton, was in town Tuesday looking for different kinds of stock and judging from his smiling countenance he must have got what he was after.

Gus. Hofmeister reports this season's business as a record breaker. He contemplates erecting a house of good size this summer for smilax and asparagus.

Wm. Sunderbruch now has charge of the Clifton Rosehouses and is sending in a nice lot of La France roses.

Frank Beason, of Newport, Ky., lost about 250 panes of glass by the hail last Saturday.

ELLIS, MASS.—Peter Fisher has lately been on the sick list.

DAYTON, O.—On the evening of June 2 W. G. Matthews and a companion were thrown from their buggy by the force of a collision with another vehicle. Mr. Matthews was rendered unconscious by the fall but no serious results followed.

# Roses

## For Winter Flowering.

Fine healthy stock from selected cuttings: Perles Brides, Maids, Kaiserins, Wootton, Bon Silene, Mme. Hoste, Meteor, Safrano, Papa Gontier, Golden Gate, 3-inch pots, \$7.00 per 100; 4-inch pots, \$10.00 per 100. American Beauty, Sunrise, Liberty, 3-inch pots, \$9.00 per 100; 4-inch pots, \$12.00 per 100.

**BEAULIEU, the Pansy Man, WOODHAVEN, N. Y.**

Washington.

MANY FINE FUNERAL PIECES CALLED FOR AS TRIBUTES TO LORD PAUNCEFOTE.—ORCHIDS AND BEAUTIES.—MEMORIAL DAY BROUGHT MUCH BUSINESS.

The obsequies for Lord Pauncefote called for some very fine funeral work, a feature of which was the number of orchids used. Either these or American Beauty roses were a part of a large proportion of the designs and of nearly all the best pieces. J. H. Small & Sons thatched the vault at Rock Creek Cemetery with deutzias, white pæonias and longiflorum lilies. They also made the greater number of the designs, having orders from the diplomatic corps, Secretary Hay, Secretary Hitchcock, General and Mrs. Miles, Hon. Levi P. Morton, Mrs. James G. Blaine, Mrs. Cornelius Vanderbilt and others. A. Gnide & Brother made a very large wreath of American Beauty roses and lily of the valley which was the tribute of King Edward to his departed representative. They also made a fine wreath for the members of the British Embassy.

Memorial day brought a great demand for cut flowers and greens of all descriptions, especially such outdoor flowers as pæonias, deutzias, philadelphus and even the common field daisy. The cool weather, approaching frost, made the better class of flowers rather scarce. There was a large demand for small flat baskets filled with cut flowers.

P. G.

Grandville, Mich.

The Stover Floral Company reports that last Decoration day was the busiest one with them for many years. The call for stock for cemetery planting was particularly large. The weather here recently has been exceedingly rainy, there being a heavy shower almost every day. Crabb & Hunter have abandoned their usual carnation ground on account of the water, leasing another location west of Grand Rapids. This has delayed planting with them somewhat.

CARSON, IA.—James McSweeney, who is a grower of garden and field seeds and berry plants, is this season adding two new greenhouses to his establishment.

## FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland  
A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

**FRUIT GROWERS AND NURSERYMEN** owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest, and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

**GARDENERS AND FLORISTS** have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

**MILLERS AND GRAIN DEALERS** have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

**FARMERS OF THE COUNTRY** have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

**COLLEGE AND STATION WORKERS** will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

**AMERICAN FLORIST CO.**  
324 Dearborn St. CHICAGO, ILL.

# VAUGHAN'S INTERNATIONAL PRIMULA

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt., (250 seeds), 50c; 5 pkt., (1250 s.), \$2.00.

Des Moines, Ia.

SPRING BUSINESS UP TO BEST PREVIOUS RECORDS.—SHORTAGE OF STOCK FOR MEMORIAL PURPOSES—LARGE SHIPPING DEMAND.—NOTES.

I do not know that I can say anything new by the way of trade notes in this part. Our spring business has been good. Memorial day was as good as last year, but our people have been holding the memorial services in the Auditorium instead of at the cemetery, as in past years. This, I think, has dampened the enthusiasm over decorating the soldiers' graves in this place. Our shipping business was much better than in other seasons and the demand for blooming plants was good. There was a scarcity of flowers. Carnations were not first-class and the local supply of roses was not nearly sufficient. We were unable to buy any that were fit to sell.

Chas. McAniff, rose grower for W. L. Morris, is setting up cigars over a twelve pound girl that arrived in his home June 8.

We had a little hail here last week, but no damage was reported. The weather is fine and all outdoor stock is doing well.

W. L. Morris is building a new rose house 48x200 feet. M.

Hartford, Conn.

GOOD MEMORIAL DAY TRADE.—CHEAP FLOWERS MOSTLY IN DEMAND.—OUTDOOR STOCK SCARCE FOR THE HOLIDAY.

Memorial day trade was far ahead of that in any previous year, most call being for cheap flowers, and this was the hardest kind to get, as scarcely any hardy stock was in bloom. Prices ranged about the same as last year with the exception of carnations, which brought a little higher price; they sold for 50 and 75 cents a dozen and were most in demand. Greenhouse roses brought \$1 and \$1.25 a dozen and were fairly good in quality; outdoor roses were not in abundance; deutzia was in full bloom and was used principally in making baskets, bouquets, etc. There was not much call for Easter lilies, a few being sold at \$2 a dozen. Pæonias were much called for but few could be had, as it was a few days too early for them. J. J.

MAROA, ILL.—Eliza A. Cooper is leaving for a trip through Europe, expecting to return about September 1.

**BOILER EXPLOSION CAUSES SERIOUS LOSS.**  
—G. L. GRAHAM THE VICTIM.—DAMAGE TO BE REPAIRED AT ONCE.

A boiler at the greenhouses of G. L. Graham, on the extension of Jackson avenue, exploded June 8 at about 9:45 o'clock, wrecking the buildings and contents. The loss is \$2,000. Two boilers were used for heating the greenhouses, but because of the mild weather they had not been used for several weeks. Last Sunday evening Mr. Graham visited the greenhouses and fearing the cold might be injurious, started a fire. Just before retiring, about two hours later, he started to again visit the greenhouses to see if all was well for the night. He had just emerged from his house, which is next to the greenhouses, when the explosion occurred. The detonation aroused the whole neighborhood, and could be heard for a long distance. The boiler house was almost entirely demolished, only a small portion being left standing. The boiler was rent in two by the force of the explosion. One portion of it was found later outside the pump station near the Erie railroad, 300 feet away. The other half was lodged in an orchard 500 feet from the greenhouse. The other boiler was badly damaged.

Two of the carnation houses were almost totally destroyed. The one nearest the boiler was reduced to a heap of debris and the other almost a total loss. The glass was blown to atoms and scattered broadcast. Mr. Graham has a force of men at work clearing the wreckage and he will rebuild or repair the houses at once.

Pennsylvania Horticultural Society.

At a meeting of the Pennsylvania Horticultural Society, held May 20, these prizes were presented for competition at the coming fall and spring shows:

James W. Paul, Jr., president of the society, \$100, in classes for chrysanthemum plants.

Mrs. Thomas Wanamaker, \$25, for chrysanthemum plants; \$25 for display of bulbs.

Bailey, Banks & Biddle, a silver cup, to be placed in the classes for chrysanthemum plants.

American Rose Society, gold and silver medals for the November show, for the best new rose, foreign or home grown, not yet disseminated.

**CHRYSANTHEMUMS.**

San Francisco.

TRADE CONTINUES VERY GOOD.—STOCK SCARCE AND PRICES HIGH.—SCHOOL EXERCISES CREATE STRONG DEMAND.—JOTTINGS OF THE TRADE.

Business since Memorial day has been very active and good carnations scarce. Prices have been keeping the same pace and only very poor stock of carnations can be had below the 2 cents each mark and 35 cents and 50 cents per dozen for fancies. Roses are about the same, scarce, high in price and very much sought for. Lilies have jumped up to \$4 per dozen stalks and sweet peas bring 75 cents per dozen bunches; other stock in proportion. Considerable fine funeral work has been going of late and now the closing of schools with accompanying balls and dinners is causing a brisk demand for cut flowers and greens.

F. A. Miller, of 1550 Market street, who keeps the only store on that large thoroughfare, has returned from two weeks' vacation at Tocoloma, where he spent his time catching trout, baking and eating same. He is full of fish stories and good spirits and only wishes he could have enjoyed it longer.

M. Lynch, of Menlo Park, has started to dry his roses, Brides and Bridesmaids. His outside chrysanthemums are now all planted and look fairly well. Some 25,000 are grown here outside. His carnations are also looking well but somewhat off crop.

Mr. Podesta, Sr., of the firm of Podesta, Baldachini & Podesta, has sold his share to the two younger members of the firm Baldachini & Podesta, who will continue to do business at the same stand.

Fred. Cleis, our Valencia street artist and decorator, has also returned from a two weeks' vacation at the Byron Springs, where he found relief from his old malady, rheumatism.

P. W. Grallert is at present bringing in some fine Minnie Cook carnations and coreopsis and gaillardias by the thousand bunches. He says there is lots of money in that kind of stock. GOLDEN GATE.

PEKIN, ILL.—It will be just nineteen years in July since such a cyclone as that of June 10 struck this place. Geo. A. Kuhl had a brick stack sixty feet high blown down and the end of one of the houses was blown out. Trees blown down and uprooted by the hundred; 200 panes of glass broken; greenhouse stock not damaged.

KIFT'S Patent ADJUSTABLE VASE HOLDER

No. 1.—Brass, nickel, 4 feet long, 6 clasps to each rod. Price complete (with green or white tumblers) \$2.25. Price complete (with green or white cornucopia vases) \$2.50. No. 2.—Heavy 4 ft. rod, brass and nicked, with three clasps for 5 to 6-inch pots, each \$1.75.

KIFT'S PATENT Rubber Capped FLOWER TUBES, 1 1/2-inch diameter, per 100, \$3.50. JOSEPH KIFT & SON, 1725 Chestnut St., Phila., Pa.

PLENTY OF GOOD STOCK AT LOW RATES.—FINE HARDY FERNS FROM NEW HAMPSHIRE.—GOOD WINDOW DISPLAYS.

At the present time business continues to hold up in good shape, with plenty of good stock that can be bought for almost any old price. With commencements and June weddings, of which latter there are a good many, although none very large, everyone is kept hustling. Just at present the supply of flowers is far greater than the demand. The way that loost carnations are coming in just now is enough to jar one; there seems to be no end to them, and the price realized is not very much, selling as low as 50 cents per 100; in fact, the supply of colored carnations is more than abundant, while white varieties seem to be in more limited quantity. With the intense hot weather we are having just now Bride and Bridesmaid roses are getting very small and in some cases mildewed, although fairly good in length of stems. They don't bring much, however, selling as low as 50 cents per 100. Kaiserins and Carnots of excellent quality are now coming in, especially the latter. Some of the Carnot buds are as large as hens' eggs and sell well at \$1.50 to \$2 per dozen. Lily of the valley from outside is almost all gone. Pæonias are now arriving in large quantities and bring \$6 per 100.

At last we have no longer to depend on the south for our supply of hardy ferns, which have been so unsatisfactory this year, a great many heating and spoiling in transit. Some very fine ferns are being shipped from New Hampshire.

With so many schools coming to a close at almost the same time last week the demand for flowers of good quality was heavy, particularly at Rogers Hall school, where a great many bunches of good flowers were called for.

Since the supply is greater than the output, some very fine window displays are to be seen. Patten's window last Saturday filled with Joost carnations and Asparagus Sprengeri, looked very pretty. A. M.

DUBUQUE, IA.—W. A. Harkett says he has little to report in regard to Decoration week, further than to say it was a little the busiest he ever had and thinks all good cut flower stock in the city sold, with prices the same as last year.

Minneapolis.

STOCK NOT OVER-ABUNDANT FOR A MODERATE BUSINESS.—PÆONIAS VERY PLENTIFUL AND CHEAP.—VARIOUS LOCAL NOTES.

The last seven days have witnessed something of a shortage in roses and carnations, especially with Meteor. The demand has been good and dark weather held stock back. Teas are bringing from \$2 to \$6 per hundred and carnations from \$1.50 to \$2. There is a great supply of pæonias in the market and they have been sold as low as 20 cents per dozen, but good stock is bringing from 50 cents to \$1 retail and \$2 to \$3 per hundred wholesale.

Considering the season of the year and with the stock left for decorative purposes, there are still some fine window displays.

Donaldson & Company report an exceedingly heavy funeral trade last week.

The Elks fair, which is now on, is causing quite a demand for flowers.

C. F. R.

New Orleans.

LITTLE DOING AND SOCIETY MEETS FOR PLEASURE.—OUTING IN THE GULF.—CHRYSANTHEMUMS PLANTED.—NOTES.

Business has been very dull for the last few weeks. Plant sales have been dropping considerably and we are now experiencing hot dry weather which will make things dull for some time to come.

Our regular or special society meetings have been held lately more for pleasure than for business, the only important discussion being about our annual picnic, which will take place at Grand Isle as several times before. It will be nothing new for us, but considering the time and means at our disposal it is the best trip we can take for the occasion.

Chrysanthemums have been planted in good quality. H. Papworth has two houses full. Should his trial be successful and the season be as favorable as last year, we will have a good supply of our home production.

M. M. L.

MADISON, N. J.—A schedule of prizes has just been issued for the seventh annual flower show of the Morris County Gardeners' and Florists' Society to be held in the Assembly rooms here November 6 and 7.

### Care of the Rose Garden.

[A paper by J. F. Huss, gardener to Jas. J. Goodwin, read before a recent meeting of the Florists' Club, of Hartford, Conn.]

To meet with success, where a permanent bed of roses is to be planted, the soil should be dug out from two to three feet in depth and should the soil prove good and wholesome, should be well mixed up with rich, rotted cow manure. The bed should be filled up with this well prepared soil. Should the soil be gravel, sandy or stony, all should be removed and my method is to fill such a bed with well prepared soil from top sod and well rotted cow manure, which should have laid on a stack for six months or a year, well cut up and mixed before filling the bed.

Planting should be done in the fall, if possible, say October or November, before frost. I find budded or grafted plants are the best. The plants should be set about two feet apart each way. The grafts should be planted two or three inches below the surface and the earth pressed gently around, which serves to protect the grafts. Planted in this manner there is much less liability of suckers being put forth from the stock, and opportunity is afforded for the plant to put forth roots from the bud or graft. This often takes place so that ultimately the plant is virtually on its own roots. I would also especially recommend, as all French rosarians do, that the roots be not cut or pruned at all. After the first frost, the plants should, in our northern latitude, where the mercury goes down to zero, be protected with a good cover of leaves, say at least six inches deep, and covered with long manure or a few pine branches to hold the leaves in place.

As soon as spring is opening, by the end of March or beginning of April, the protection should be removed, before the buds or eyes begin to swell, so that no injuries will occur. The pruning should then take place. I believe in pruning severely and keep the plants always low, from six to ten inches from the ground, and renewing every year the pruning. By keeping the plants always low we attain a good, strong, long stem and fine flower. After the pruning the soil should be dug up and loosened all about the plants. During the first week in June, when the sun is becoming warmer and the ground begins to dry, I have the rose beds mulched two inches deep with short manure. This is to prevent the soil from drying off and also to keep the roots cool and moist. This mulch will also serve to keep weeds down.

I believe in giving the roses a drenching after sundown during growth and the hot days. During the flowering season the flowers that are fading from day to day should be removed every morning, so as to give the rose garden a clean appearance. As soon as the blooms have passed I prune my plants about half way on the new growth. The plants will, in this handling, invariably give another flower crop. Some varieties will give flowers all the season long.

Among these hybrid perpetual roses I find Alfred Colomb, Ulrich Brunner, Jules Margottin, Prince Arthur, Paul Neyron, Mrs. John Laing and many others. Hybrid teas are treated the same way and will give blooms from June till the frost cuts them down. Among these I would recommend the following varieties, which will give the best of satisfaction:

#### HARDY ROSES.

Alfred Colomb	Gloire de Margottin
Anne de Diesbach	Gloire Bourg-la-Reine
Baroness Rothschild	Grant of Battles
Captain Christy	George Washington
Captain Hayward	Prince Camille de Rohan
Comtesse de Serenye	John Hopper
Duke of Edinburgh	Paul Neyron
Duke of Teck	Prince Arthur
Fisher Holmes	Magna Charta
General Jacqueminot	Mme. Gabriel Luizet
Mrs. John Laing	Ulrich Brunner
Marie Baumann	Baron de Bonstetten
Margaret Dickson	Marshall P. Wilder.

#### HYBRID TEA

La France	Clothilde Soupert
Souvenir de Malmaison	Maman Cochet
Kaiserin Aug. Victoria	Duchess de Brabant
Souv. du Pres. Carnot	Marie Van Houtte
M.de Francois Kruger	Souvenir de Wootton
Hermosa	Queen's Scarlet.

### Roses In a Connecticut Park.

The hardy roses at Elizabeth Park, Hartford, Conn., have been at the height of their beauty during the past week and the magnificent display to be seen there is undoubtedly one of the finest in the country. The collection consists of about 1,300 plants and embraces over sixty varieties of hybrid remontants, a number of climbers and a few teas. All of the older, standard kinds, such as Gen. Jacqueminot, Monsieur Boncenne, Jean Liabaud, Baroness Rothschild, Countess of Oxford, Gloire Lyonnaise, and so forth, are there, likewise the newer ones, such as Margaret Dickson, Marchioness of Londonderry, Clio, Mrs. R. G. Sharman Crawford and others.

Clio is white, slightly tinged with yellowish pink, and has proven very satisfactory, its one drawback, if such it is, being its habit of producing such a quantity of buds on the end of each flowering shoot, as many as nineteen having been

counted in one cluster. It is quite different in this respect from Marchioness of Londonderry, which almost invariably has only one bud on a flowering shoot. However, this habit results in the plant bearing an enormous quantity of flowers. Mrs. Sharman Crawford is a fine pink, and is a valuable addition to the list of hardy roses.

Most of the hybrid remontants are worked plants, principally on Manetti, and are planted deeply, about two and one-half feet apart. These beds were carefully prepared by excavating to the depth of two feet and filling in with a good, heavy loam, which was afterwards enriched by a liberal application of manure and fertilizers. The beds are located in a spot which was originally quite wet, but which is now tile drained. In this way the ideal moisture conditions

of the Yellow Rambler, which is rather tender. This is a great pity, as it certainly is a fine rose. Nevertheless, enough of it survived on the trellis to give an idea of its beauty.

It is really remarkable that the so-called climbing roses are so seldom used as shrubs free from any support. A few plants of Pink Roamer at Elizabeth Park which have been left to grow as they will are now great, drooping but tall masses, studded with thousands of the beautiful single flowers of this rose. Such a sight conjures up visions of the marvelous effects to be obtained by the judicious grouping of this class of roses, not as climbers, but as shrubs, in connection with other shrubs. A large planting of this kind has been made this spring at Elizabeth Park which in two years from now will be a gorgeous sight

and an object lesson as to what can be done in this line.

The following is a list of the varieties at present in the garden, supplied by Mr. Karlstrom, the city forester:

Ulrich Brunner	Gloire of Cheshunt
Doctor Andry	Jules Margottin
Victor Verdier	Baron de Bonstetten
Miss Annie Wood	Duke of Teck
Abel Carriere	Maurice Vilmorin
Gloire de Margottin	Mme. Gabriel Luizet
Etienne Levet	Duke of Connaught
Maurice Bernardine	Capt. Hayward
Fisher Holmes	Mrs. Joha Laing
La France	Magna Charta
General Jacqueminot	Clothilde Soupert
Anna de Diesbach	Francois Levet
John Hopper	Margaret Dickson
Hippolyte Jamaica	Marie Baumann
Mlle. Marie Rady	Lady Helen Stewart
Marchioness of Dufferin	M. P. Wilder
Duke of Edinburgh	Prince Camille de Rohan
Alfred Colomb	Heinrich Schultheis
Gloire de Lyonnaise	Pierre Notting
Chas. Lefevre	Paul Neyron
Senator Vaisse	Gloire de Dijon
Kaiserin A. Victoria	Baroness Rothschild
March. of Londonderry	Jean Liabaud
Bon Silene	Monsieur Boncenne
Geo. Washington	Ohio
Mrs. Sharman Crawford	Earl of Dufferin
Countess of Oxford	Captain Christy
Caroline Testout	Mabel Morrison
Helen Keller	La Reine
Marchioness of Lorne	Marguerite de St. Amand
Oakmont	La Rosiere
Francois Michelon	Baroness Rothschild
Blanche Moreau	White Bath
White La France	American Beauty
Liberty	Ivory
Soleil d'Or	Mrs. Hovey
Baltimore Belle	Universal Favorite
Hybrid Sweet Briar	Russell's Cottage
Pink Rambler	Yellow Rambler
Crimson Rambler	Rosa setigera
Manda's Triumph	Pink Roamer
Dawson Rose	Queen of the Prairie

H. J. KOEHLER.

#### Parks of the Twin Cities.

When the seedmen and their friends get together at the Twin Cities next week they will find much of horticultural interest close at hand. Minneapolis and St. Paul have two of the finest park systems in the country and numerous private estates well worth inspection. The total acreage under the control of the Minneapolis park board is 1,553 and it had cost to December 31, 1901, a total of \$3,641,623, the expenditure for 1901 being \$201,103. Como Park is the pride of St. Paul, the park system in that city being now undergoing rapid development, the expenditure for maintenance

RIVERSIDE PARK,  
MINNEAPOLIS.

of the ground, conducive to the welfare of roses, are obtained.

In the spring the plants are cut down to about four inches from the ground, and all weak wood is removed entirely. This severe pruning keeps the plants low, the flowers being produced at a height of not more than two and one-half feet, with the coloring, size and form brought out in superb perfection. The stems are firm and long and clothed with the richest and most luxuriant foliage. The color effect of the garden is delightful. After flowering the plants are again severely pruned, with the result that quite a good second crop of flowers is produced. In the fall soil is drawn around the stems of each plant, and the ground heavily mulched with manure.

Of the climbing and other roses now in full bloom there are the Dawson, Pink Rambler, Yellow Rambler, Russell's Cottage, Pink Roamer, and some of the hybrid sweetbriars. Manda's Triumph and South Orange Perfection are just coming in, while Crimson Rambler is beginning to show color, and Rosa setigera, one of the last of the glorious pageant, gives no hint as to the character of its bloom, except that the buds are visible in great abundance. All of the above are perfectly hardy at Elizabeth Park, with the excep-

ANDREW M'CONNELL.

THREE PROMINENT MEN WHO DIED RECENTLY--SEE PAGE 788.

and improvements in 1901 being \$64,896. Both park systems make large use of greenhouse material and some of the picturesque views with which they abound are shown in the accompanying illustrations.

In addition to the public grounds, St. Paul has one of the finest private places in the northwest, that of James J. Hill, recently illustrated and described in these columns, and those who have an interest in orchid culture, and their number is constantly increasing, will find one of the largest collections in America in the range of houses of Dr. R. Schiffmann, St. Paul, whose place is shown and whose work is described in this issue.

#### The Greatest of British Exhibitions.

It is hardly necessary to say that the Temple Show attracted horticulturists to London from all parts of the kingdom, and the number of continental visitors was greater than usual. The King and Queen visited the exhibition on the first day and walked about and chatted with the officers in attendance in a most unconventional manner. They appeared particularly interested in the orchids, roses, carnations and the quaint Japanese dwarfed trees which were shown by Barr & Sons and several others.

Turner's Crimson Rambler roses were the finest I have seen. Cuthbert's hardy azaleas were also a feature. The trusses of bloom were very large but there was an entire absence of foliage. This is a cultural detail worth noting, for it is evident that by taking off the young shoots the flowers attain greater size.

Some marvelous new orchids were seen, of the *odontoglossum*, *lælio-cattleya* and *phalænopsis* sections. The principal trade exhibitors were Sander & Company, Hugh Low & Company, Cowan & Company, Charlesworth & Company and J. Cypher. There were also several continental exhibitors, including Linden, of Brussels, whose exhibit was remarkable for the fine spotted forms of *Odontoglossum crispum*. M. Jules Hye de Crom's exhibit included *O. Wilckeanum imperatorium*, which gained a first-class certificate.

Cutbush & Son's group, which consisted chiefly of carnations, was a great

attraction, all the best Malmaison and border varieties being represented. *Calla Elliottiana* was also shown and a very distinct strain of dwarf tuberous begonias, which seem likely to be valuable for bedding. There were eleven different shades of color, Little Pet, with the colors added, being the distinctive name.

Tuberous begonias of the larger-flowered varieties showed a further advance in form and size of flowers, many of the doubles being especially fine. The principal exhibitors were T. S. Ware, R. R. Davis & Son, Cannell & Sons, H. J. Jones and J. R. Box.

Cannell & Sons' group of cannas was the finest that has ever been seen at this season of the year. Hugh Low & Company's carnations were very fine, chiefly Malmaison varieties. Mr. Hudson, Leopold de Rothschild's gardener, also staged a fine group of these.

Grand groups of roses came from G. Paul & Son and W. Paul & Son, fine bush plants and tall standards, showing remarkable cultural skill. Of newer varieties Lady Battersea gives promise of being valuable. B. Cant & Son also had a fine group of roses, the tall standards among the dwarfier plants producing a fine effect.

Veitch & Sons' streptocarpi showed still further improvement, dwarf and compact in habit with plenty of bloom of large size and distinct colors. Phylloctacti were also well shown, the colors being remarkably vivid. Their large group of stove plants contained a great variety of valuable material, the nemeses, caladiums, aloccasias, dracænas and others making a most imposing group. They also had a finely arranged group of greenhouse and hardy flowering plants.

Waterer & Sons' rhododendrons were very fine, Pink Pearl being conspicuous. Fisher, Son & Sibray also had a fine group, including some distinct varieties of which Countess Fitzwilliam, Mrs. J. Clutton and Kate Waterer were worthy of special note. This firm also secured the Sherwood cup for a really grand display of hardy foliage and flowering plants, the Japanese maples being very conspicuous. Lilac Mme. Lemoine was grandly flowered. *Cytisus Handsworthensis* and *Pyrus Aria* were especially good.

T. Cripps & Sons and Messrs. Russell also had fine groups in the open, the acers being a feature. *Dimorphanthus Mandshuricus* fol. *Argentens marginata* (a beautiful name) is good for sub-tropical gardens.

Clipped trees in various shapes were shown by Cutbush & Sons. Balchin & Sons had a fine group of hard-wooded plants, *Leschenaultia biloba major* being particularly worthy of note. Carter & Company occupied the whole of the center of one tent with groups of *Cineraria cruenta*, *calceolarias*, *petunias* and many other things. The Misses Hopkins attracted much attention with rock plants. These enterprising ladies seemed to be doing a good trade.

A. J. A. Bruce had a splendid collection of sarracenias. Capt. G. L. Holtford's group of amaryllises showed great cultural skill. Ferns were not quite so numerous as usual but J. Hill & Sons made a grand display, the *platyceriums* on cork being most conspicuous. L. J. Cling also staged an interesting group, Backhouse & Sons had a good collection of filmy ferns and H. B. May showed a fine *Polypodium Mayii*.

Clematises were well shown by Jackman & Sons. Among the novelties, Marcel Moser was fine, also some of the hybrids of *C. calycina*. Those from R. Smith & Company were also good.

Caladiums were well represented by J. Peed & Son's exhibit, and from Sander & Company came some distinct novelties. J. J. Upton showed *gloxinias* which had travelled from Manchester, but not a single flower had been damaged.

*Schizanthus Wisetonensis* was shown by H. Low & Company, also by Veitch & Sons. A grand lot of specimens of *Pelargonium capitatum* and other scented varieties came from Leopold de Rothschild.

Cut tulips were a strong attraction. There is a great revival in the interest taken in the Darwins, Parrots and old English garden tulips. The "St. Brigid" anemones from Reamshotbottom & Company, of Ireland, attracted a deal of comment. These are sometimes called poppy anemones, and are hybrids between *A. coronaria* and *A. hortensis*, both of which were introduced over 300 years ago, but it is only recently we have had

these beautiful varieties in such perfection.

There was a beautiful display of cut roses by George Mount, many of them being cut with long stems. Frank Cant also had a fine collection, the new tea, Lady Roberts, which I referred to in previous notes, being very fine. H.

#### Orchids From the Philippines.

Dr. Rudolph Schiffmann, of St. Paul, is an enthusiast in orchid growing and has probably the largest collection of plants in the northwest, as well as one of the largest collections in the country, largest both in point of number of plants and varieties. The Doctor began his collection about ten years ago and has steadily added to it, both by purchase from American and European collectors and by orchid hunting trips to Mexico and Central and South America. He but recently returned from his most ambitious trip, to the Philippines, bringing the largest importation of phalænopsis ever brought to this country.

Among the thousands of plants now under cultivation Dr. Schiffmann has about 200 from the famous collection of the late Erastus Corning, of Albany. There are four houses, heated by hot water and heavily stocked. The cattleya house is 18x70 and also shelters the *lælias*, many of them grand specimens, also the *ærides*, *burlingtonias*, *miltonias*, *dendrobiums* and *cyripediums*. In the intermediate house, a lean-to 8x20 facing south, are the Mexican *lælias*, *odontoglossums*, *lycastes* and *ocidiums*.

The East Indian house is an even-span building 16x20 and in it is a splendid collection of phalænopsis in many rare varieties, *saccolabiums*, *vandas*, the heat-loving varieties of *dendrobium*, *Cattleya Dowiana*, *C. chrysotoxa*, *C. speciosissima*, *C. superba*, *C. Schilleriana*, *Miltonia Rœzlii* in quantity and a choice

importation of phalænopsis the Doctor says: "The plants were secured a year ago by my collectors and were established on blocks of wood of a uniform length, about fifty plants on each. In preparation for shipment the blocks were fixed securely to the inside of the cases and as many rows along the center as could be attached without endangering the foliage. Oblong holes were sawed through the sides and ends of the cases and these openings covered with wire cloth to protect the plants from the ravages of roaches and other insects which infest all steamers of the Orient.

"The plants were in transit thirty-two days between the Philippines and St. Paul and arrived in fine condition. Had I not accompanied them and looked after their welfare every day, giving light and air on all favorable occasions, the result would have been different. As it is, the loss will not exceed ten per cent. As an experiment a portion of the plants were securely packed in dry excelsior, with holes for air, but the cases were not opened during the passage, and these did not arrive in as good condition as those which were placed upright in cases and given occasional light and air.

"I am convinced that the reason it has been so difficult heretofore to import phalænopsis in good condition is that they had not been properly prepared for the voyage and because of the careless manner in which they are handled on ship board. It was with the greatest difficulty that the stevedores could be made to understand that the rope handles at the ends of each case were for use and not for ornament. Unless you stand by and watch each case as it is brought aboard they will be treated as though they were bales of hemp, shaking the plants loose in the cases and bruising the leaves, with consequent loss of foliage which means weeks of subsequent careful nursing.

absurdity of charging duty on these plants although derived from our own colony, prices are likely to be maintained for a long while to come. Steamers will receive plants only at owner's risk and refuse to assume any responsibility whatever. Besides, owing to the prevalence of cholera in the Philippines at the present time, a clean bill of health must be secured from the U. S. Marine Hospital service, or the plants are liable to be denied a landing when reaching our shores.

"Let me suggest that the Society of American Florists take up this matter of duty imposed upon plants from our new colonies at the next meeting and petition congress for a repeal. The Philippines offer a great field for exploration for floral treasures, but under present conditions England and other countries derive the benefit, which should first accrue to Americans.

"The plants I brought with me consist of *Phalænopsis amabilis*, *P. Schilleriana*, *P. intermedia*, *P. Luddemanniana*, *P. leucorrhoda*, *P. Sanderiana* and *P. Stuartiana*; *Vanda Boxalli*, *V. lamellata* and *V. Sanderiana*; *Saccolabium guttatum* and *S. violaceum*; *dendrobiums* in variety; *Cyripedium Argus*, *C. Haynaldianum* and *Renanthera Storiei*. I shall make the experiment of growing phalænopsis flowers for the market and expect to return to the Philippines next year for a still larger lot of plants, which are now being secured by my collectors." William Whatton is the gardener in charge.

## ROSES.

### BENCHING THE YOUNG STOCK.

All those rose growers who have not planted their young stock in the benches should lose no time in doing so. The hot weather is upon us and you will find it almost impossible to keep the plants in pots in a growing condition; they dry out so quickly that it is necessary to water at least twice a day and on account of this treatment they are soon in need of nourishment, as this frequent watering has washed all of the nutriment out of the soil.

Of course, while the planting is being done, you will be very anxious to use all your men, but do not trust this work to any but those whom you know to be competent. If you have grafted stock you will find that a careless man will either break them off or he will not plant them deep enough. In planting grafted stock sink the ball into the soil far enough to allow the union to be completely covered. By so doing you obviate the danger of breaking and it also keeps the union strong.

I think it is a good plan to place the stakes at once and if you are too badly rushed with work, make only one tie to a plant, so as to hold them in place when syringing, but as soon as possible they should all be tied, being careful to tie each branch separately and not in bunches.

After the young stock is planted and has started to grow you will find that mildew is not quite as liable to bother you as when the plants were in pots. If you see that it is appearing, the sulphur machine should be put in action. Always take advantage of a rainy day and start the fires. By doing this you will do more towards checking mildew than is possible in any other way.

Attend carefully to the disbudding and watch for the Manett shoots to appear. These should be cut out at once, as they

PORTION OF DR. SCHIFFMANN'S IMPORTATION OF PHALÆNOPSIS FROM PHILIPPINES.

lot of ornamental foliage plants. The *odontoglossum* house, a lean-to 8x20, contains over 500 specimens, principally of the *Odontoglossum crispum* section, also some fine *sobralias* in variety. The climate of Minnesota, especially the cool nights in summer, seems particularly well adapted to the requirements of *odontoglossums*, as shown by their robust growth, healthy foliage and fine flower spikes.

With regard to the recent great

"*Phalænopsis amabilis* and *P. Schilleriana* are found principally on the Island of Luzon. I am told the latter is found on none of the other islands. The plants are found growing on trees and rocks near the lagoons. *P. Stuartiana* is found in Mindanao. While plants are said to be plentiful in the islands, yet on account of the present disturbed condition of affairs, which is likely to last for some time, coupled with the hazard of transportation and last, but not least, the

CATTLEYA HOUSE OF DR. RUDOLPH SCHIFFMANN, ST. PAUL, MINN.

draw very heavily on the plants. The black spot is not liable to bother you much on Brides or Bridesmaids but many of the other sorts are very susceptible to it, such as Liberty and Beauty. As fast as this appears it should be picked off, and care should be taken not to let water remain on the foliage over night.

The houses should be gone through at least twice a week after planting to attend to the Manetti shoots and the disbudding. Do not let them flower until you have large, strong plants, as the early flowers will not pay as well as a good crop for Christmas. R. I.

#### Tarrytown, N. Y.

The annual rose exhibition of the Tarrytown Horticultural Society at the Academy last Monday evening brought out some brilliant and creditable displays. D. McFarlane, gardener to H. Walter Webb, was the largest exhibitor of outdoor roses, staging ninety varieties in splendid form. The F. R. Pierson Company led in the climbing rose section. There were a number of other exhibitors, but Mr. McFarlane was first in all the remaining classes, and his set of twelve Margaret Dickson could not be excelled. L. A. Martin was first with a collection of fifty varieties of flowering shrubs. In this class Thos. Cockburn also made a good record. Nothing more attractive was staged than Mr. Scott's display of hardy herbaceous flowers. Strawberries from a number of contributors were splendid. The show was free to all visitors.

#### Chicago.

WEEK OF LARGE SUPPLIES OF POOR MATERIAL AND BRISK DEMAND FOR GOOD STOCK—ROSES AND CARNATIONS BOTH SHOW DETERIORATION.—SPLENDID PÆONIAS FROM COLDSTORAGE.—LARGE SALES LIKELY TO EXHAUST SUPPLY EARLY.—SUMMER LILIES COMING IN.—MANY WEDDINGS.—MANY LOCAL DOINGS.—PERSONAL AND TRADE JOTTINGS.

Midway in June there is usually a first class market for good stock, and such has been the case this year, with the one unfortunate circumstance that there has been no really good stock with which to meet the demand, that is, as to roses. There has been a big call for Beauties with few to be had, these small and many of them cripples. Brides have been in active demand for wedding work

and Bridesmaids, too, but there are few to be had up to shipping grade even by sorting the thousands which the growers are still sending in. The graded material has only brought moderate prices because of quality and the culled stock has to be jobbed off at very low rates. There are practically no Perles and the summer rose cut is not yet large. The supply of carnations still continues above the legitimate requirements, although the cut is not quite so heavy as a few weeks ago, and quality shows a marked deterioration. There are now few really first-class carnations and the big houses have receded from their determination to keep the market up to 10 cents a bunch. At that price a large proportion of the receipts went to waste and now clean-up sales are made at almost any figure the buyer may offer. The pæonia is really queen of the market at present, although the only stock available is from cold storage. The most active call is for pæonias and there was never better stock than that now at hand, so that at from 75 cents to \$1 a dozen these flowers offer considerably the best value for the money of anything in market. It is nothing for the big retailers, both local and in other cities, to each use from

twenty-five to fifty dozen a day and at this rate the supply is likely to run out any day. There are quantities of gladioli arriving now, also large numbers of longiflorum lilies, a few speciosum and auratum lilies and water lilies. These last do not seem to sell as well as usual. Sweet peas are doing pretty well by reason of the numerous weddings and smilax is going to meet the same demand.

John Mangel started June 15 on a trip to his old home in Greece, also to Turkey and the south of Europe. He said he might be gone six months or a year, but his friends do not think he could deprive himself of the opportunity to admire his own handsome store front for that length of time.

We are informed that the item in this column, issue of June 14, with reference to A. F. Longren, was incorrect, as he was simply in the employ of Michel Schawel, who has the contracts for glazing work with Poehlmann Brothers, John Brod, Peter Reinberg and the George Wittbold Company.

E. C. Amling says that although the school board may have shut off the use of flowers at the high school graduation exercises, thousands of bouquets find their way to the closing exercises of the grammar schools. The small retailers near the schools did a big business this week.

The big growers are getting pretty well along with the work of benching young rose stock. It is a tremendous task where there are scores of houses to plant but now there will be a breathing spell until the equally large job of moving the carnations presents itself.

Kennicotts report their pæonia supply dwindling at a great rate, but the commencements are well over and E. E. Pieser says the supply is likely to last pretty nearly as long as the demand, for the wholesalers are all expecting rather quiet times after the first of July.

Fleischman had the order for the Mandel-Mandelbaum wedding June 18, one of the largest of the season. Pæonias were the principal flower and 500 strings of smilax went into the decoration.

The Morton Floral Company, 753 Forty-seventh street, occupies a one-story store and is building a large greenhouse on the roof, which will be a considerable addition to their facilities.

The roses at the south side parks have

CORNER IN THE ODONTOGLOSSUM HOUSE OF DR. R. SCHIFFMANN, ST. PAUL, MINN.

been a great attraction in the last couple of weeks. The show has been even finer than usual but the many heavy rains did some damage to the flowers.

Bassett & Washburn had twenty-six men at work cultivating their field of carnations this week. The stock shows up nicely considering the very heavy rains.

McKellar & Winterson report the sales of baskets for commencement exercises to have been rather ahead of any previous year, but most of them went outside the city.

John Huebner, with the Central Floral Company, has the sympathy of many friends in the loss of his father, who died Thursday. Funeral June 22.

Jacob Wiesenthal, president of the Invalid Appliance Company, took unto himself a wife and went to Omaha on a wedding trip June 10.

George Reinberg has about finished his new range of houses and has things in good shape for a nice summer rose cut.

There is already talk of early closing and beginning July 1 most of the houses, if not all, will lock the door at 5:30.

Frank Garland is at work rebuilding one house and may conclude to add one or two new ones a little later.

J. J. McGill, of W. W. Barnard & Company, has been at his old home in Iowa this week, on vacation.

The Poehlmann Brothers Company is pushing along the work of glazing their new houses.

The J. D. Thompson Carnation Company increased its capital stock by \$18,000 June 10.

Joseph Foerster, of George Reinberg's, is at Mildmay, Ontario, this week on vacation.

Peter Reinberg was a delegate to last week's big democratic county convention.

The latest quotation on small lots of window glass is \$4.65 per box.

Jas. S. Wilson has returned from the east.

Visitors: F. H. Hall, Denver, Col., enroute to Europe; G. H. Blackman and J. C. Elsperrmann and wife, Evansville, Ind.; Ernest Marland, Alexandria, Ind.; N. Bommersbach, Decatur, Ill.; D. R. Woods, Los Angeles, Cal.

#### Boston.

PAEONIA EXHIBITION OF HORTICULTURAL SOCIETY PROVES GOOD.—DATE A FEW DAYS LATE.—FINE EXHIBITS FOR THE KELWAY PREMIUMS.—GRAND DISPLAY OF SPRING BLOOM AT ARNOLD ARBORETUM.—BUSINESS ABOUT AS USUAL AT THE SEASON.—VARIOUS JOTTINGS OF HORTICULTURAL INTEREST.—PERSONAL DOINGS.

The annual pæonia exhibition took place at Horticultural Hall on Saturday, June 14. Owing to the advanced season a few days earlier would have been a better date for the show, but nevertheless the display was very fine. The coveted Kelway special medals offered for eighteen named varieties of *P. albiflora* were won, first, by A. H. Fewkes and, second, by George Hollis. For a collection of thirty or more varieties T. C. Thurlow was awarded first premium and George Hollis second, J. H. White winning first for specimen bloom. The large vases of blooms arranged for effect were, as heretofore, an effective feature, the winners, in order named, being Mrs. J. L. Gardner, George Hollis, Mrs. E. M. Gill and A. F. Estabrook. Pæonias from O. B. Hadwen and J. S. Chase, foxgloves from Mrs. Gardner and W. Whittmann and campanulas, gloxinias, pansies, roses and other seasonable flowers from many other exhibitors helped to make up a very attractive general display.

This is the month of roses at the Arnold Arboretum and the show of native and foreign species and varieties in flower is superb. The laurels are now at their best, also, following close upon the rhododendrons, all of which, except the late flowering *R. maximum*, are now through blooming. Viburnums and philadelphuses are still flowering profusely and the beautiful fountain-like *Ligustrum Iyota* is just opening. A visit

to the Arboretum and other parts of the Boston park system is on the programme for the entertainment of the members of the New England Park Superintendents' Association which meets here on Friday and Saturday of this week.

Business continues about as reported last week. There is as yet no diminution of the product and considerable surplus is apparent in many lines, but the coming two weeks will provide a good market on account of the many school and college graduation exercises and the Boston school festival on June 28 will wind up the season with a snap.

A meeting was held on the evening of June 7, at the rooms of the Twentieth Century Club, of those interested in providing a fitting reception for the visitors to the convention of the American Park and Outdoor Art Association next August, at which it is expected several hundred park commissioners and superintendents will be in attendance.

The annual exhibition of roses and strawberries originally scheduled for next week is on for Thursday and Friday of this week, the extreme earliness of the season having made it necessary to change the date for the show. A full account thereof will appear in next week's notes.

Governor's Island, in Boston harbor, on which Fort Winthrop is located, has been transferred by the national government to the city for use for park purposes. It is expected that it will be the most beneficial and popular feature of the entire park system.

Fred. S. Davis, the genial secretary of the Horticultural Club, was slightly injured by being pushed from the platform against a moving car in the subway at Park street on Saturday, June 7. He had a narrow escape from serious injury.

"Uncle Dick" Richards, the rose enthusiast, of Brookline, celebrated his ninety-first birthday on June 10.

P. Welch and F. R. Mathison spent a few days at Mr. Welch's Old Orchard Beach home last week.

W. E. Doyle has vacated his old store on Tremont street.

Visitors: J. S. Wilsou, Western Springs, Ill.; C. W. Ward, Queens, N. Y.; Julius Roehrs, Rutherford, N. J.

LAKE IRIS PARK, ST. PAUL, MINN.

## New York.

ORGANIZATION AT BROOKLYN A NOTABLE HORTICULTURAL EVENT.—HOPE THAT NEW SOCIETY MAY ENJOY A LONG AND USEFUL LIFE.—GOOD PROGRESS MADE.—A SPURT OF GOOD BUSINESS BEFORE THE SUMMER SOLSTICE.—VERY LARGE RECEIPTS AND BUYERS CRITICAL.

The most notable recent horticultural event in this neighborhood is the formation of the Brooklyn Horticultural Society. Organized principally for the purpose of perfecting arrangements for a suitable welcome to the American Carnation Society, which is to meet here next spring, it is the hope of its promoters that the new society may find encouragement and support sufficient to establish it as a permanent institution which shall at last provide the metropolis with the long-desired representative horticultural organization. Located as it is, in the midst of the largest residential community on the continent, in touch with, and yet sufficiently removed from, the active business life of the great city, it is reasonable to hope that with wise council and discerning foresight public enthusiasm may be adequately aroused and thus an honorable and useful career assured for this new enterprise. The second meeting in the work of primary organization was held in the lecture room of the Y. M. C. A., on Tuesday evening, June 17, with about twenty-five of the leading florists present, Mr. Ward presiding. Reports of progress were made by the several committees appointed at the previous meeting and the guarantee subscription list toward the expense of entertaining the visitors next spring received a number of substantial additions. A rough draft of proposed by-laws was recommitted to the committee to be presented in perfected

form at the next meeting which will be held on Tuesday evening, July 1.

Business conditions are more hopeful this week, there being a continuous succession of weddings, steamer departures and school and college graduation exercises which for a brief time previous to the summer quiet will keep the retailers busily engaged. The worst feature at present is the enormous receipts at the wholesale establishments. Buyers can afford to be critical as to quality and they are. The result is a very large stock of unacceptable material which, if sold at all, must be disposed of at unquotable prices. Carnations are badly over-stocked and even those of good quality are placed with difficulty at anything more than customary rubbish price. Cateyas are magnificent. Especially fine was a box of C. glgas noted at Young & Nugent's.

The committee in charge of the New York Florists' Club's excursion, which takes place July 7, are very anxious to hear from all who propose to participate. They are working hard to make the affair one of great pleasure to all who attend and it is due to them that a generous response should be made to their appeal and that they should know as soon as possible how many they will be expected to provide for. The boat can carry 600 or 800 people comfortably.

George M. Stumpp sailed for Europe on Tuesday and H. Looymans Wednesday on the Southward. Henry Siebrecht, Jr., sails next week.

Harry Bayersdorfer and Mrs. Bayersdorfer, of Philadelphia, sailed for Europe on June 17, on the Kaiser Wilhelm der Grosse.

Thomas Knight, American representative of Linden & Company, Belgium, will sail shortly for Europe.

Visitors: Robert Craig and Wm. P. Craig, Philadelphia.

## Philadelphia.

EXTREMES OF TEMPERATURE RESULT IN DETERIORATING ROSE CROP.—CARNATIONS ALSO SHOW EFFECTS OF HOT DAYS.—PRICES LOW.—TRADE FAIR.—OUTING AT BARNEGAT BAY.—HORTICULTURAL SOCIETY HOLDS GOOD SESSION.—NOTES OF VARIOUS LOCAL HAPPENINGS.

We have had some extremes of weather, one day hot enough for the shirtwaist man and the next the temperature was such that an overcoat felt very comfortable. Such rapid change has had its effect on the tea roses and many of them show it in their mildewed foliage. The percentage of specials in a shipment of Beauties is now very low and it is hard to fill orders for such stock. Teas are also very poor. Prices have fallen in proportion and \$6 per hundred is about the best price for teas, with \$1.50 to \$2 a dozen for special Beauties. Carnations are also getting smaller and \$1 per hundred is about all they will bring, except for something very fancy. Although the price is low some of the growers say they are selling well and bring in as much money per day now as at any time in the winter, as the crop is so abundant. Sweet peas are about at their height and much difficulty is experienced in getting anything like paying prices. This week winds up the commencements, which have helped the spring business more than ever before.

A number of the boys journeyed to Waretown last Saturday, at the invitation of John Westcott. His club house is right on the banks of Barnegat Bay and is everything that such a place should be. Underneath the national emblem which flies from a tall pole a

the front steps is a pennant of the colors of the Florists' Club. Commodore Westcott is a Philadelphia Florists' Club man to the core and never tires in doing anything that is of interest to, or for the club. It was mainly to entertain his many friends that he provided this haven of rest far from the busy hubbub of the city. Among the club members present on this occasion were Wm. Westcott, George Anderson, George Craig, John Habermehl, George Moss, John Dunham, Charles Eimmerman, Benjamin Leever, Wm. B. Westcott and George Redford. Business kept some of the craft at home, but George Watson was afraid of the tiny mosquito. As, however, there was not one to be seen he lost one of the times of his life. John N. May graced the company with his presence late Saturday. The amusements consisted of target shooting, quoits, sailing and fishing. This latter was not very successful as the fish have not commenced to run much as yet. Richard Lynex, the retired wire worker, who at one time made all the work for the florists of the city, was present and although past 80 years of age is as spry as a man of 60 and favored the boys with some great singing. On Monday morning all hands joined in cheers for their host and promises in reply to his hearty invitation to come again soon.

has had the best season in his business experience. His Beauties did exceptionally well and so did the English rose, Sunrise, which he will grow in larger quantities the coming season.

Trolley rides through the suburbs at this time show how popular the Crimson Rambler has become, as its gorgeous clusters of blossoms are to be seen everywhere.

Robert Craig is under the weather and has gone to the seashore to recuperate. K.

#### Before and After.

The two accompanying illustrations are from photographs at the Pavillion at the Horticultural Gardens, Toronto, Ont. One shows the elaborate decorations of the banquet hall as arranged by J. H. Dunlop, for the Canadian Boards of Trade. Covers were laid for 415 guests and the decorations were undoubtedly the finest ever seen in the Pavillion. Shortly after the guests had departed fire broke out and the building, which was a frame structure, was burned to the ground with all its contents. The smaller illustration shows how it looked the next day. The Florists' and Gardeners' Association deplores the loss in particular, for it was here that the chrys-

the north. Eastern stock seems to have improved during the week. Carnot, Liberty and Beauty are first-class and there is a special demand for the two latter. Goethe is the best carnation, while Scott and Joost are good. Prosperity, in this hot weather, seems to retain very little of its pink shading and they are invariably selected for white, this absence of color being not undesirable. Lily of the valley is good and quantities of lavender and pink sweet peas are to be had, and they sell well. Orders for bridal sets are coming in with the usual regularity and they will continue to do so until the last day of June.

A great many bay trees have been sold in and around Pittsburg during the past month. The standards seem to be the best sellers. When florists order trees of this character they should have them completely encased, as the express companies charge a double or triple rate if the tops are unprotected or exposed.

Jos. H. Seaman, of Washington, Pa., who is a "W. & J." man and successor to I. S. Crall, controls the college trade, which is valuable. He had a great run on Beauties during the commencement week.

Thos. Malbranc and Schrader & Schmid, of Johnstown, Pa., are enjoying the height of the June business. Both firms have developed a fine trade and expect to increase it.

"Sid" Gibbs, of McKees Rocks and Carnegie, Pa., is more than gratified with the success of both his ventures.

A. W. Smith is displaying some pretty and nicely arranged hanging baskets. E. L. M.

#### Cincinnati.

CLUB HOLDS AN ACTIVE SESSION.—MANY DEBATES—OFFICERS ELECTED FOR THE ENSUING YEAR.—TRADE GOOD BUT STOCK IN HEAVIEST SUPPLY EVER KNOWN.—VARIOUS DOINGS OF LOCAL INTEREST.

Considering the warm weather of the past few days business continues very good, but there is not near enough call to consume all the flowers coming in. Never before have we had as many flowers in this market at this time of the year as we had last week. It seems as though flowers are coming to this city from all directions. One of the express companies had so many boxes to deliver one morning that they could not get them all on one wagon. This is something unusual for our town and this was only one company of the half dozen located here. Funeral work used up the largest percentage of the stock received. There are some wedding decorations and a few dinners now and then. Hardesty & Company had two dinners last Saturday, both calling for Beauty roses, of which they used 2,000. Of course they had to go to Chicago for these, as Beauties are a scarce article in this city at present writing. Mrs. Kresken has been very busy with funeral work, having two wagon loads of designs for Capt. Hadley's funeral last Thursday. The balance of the florists all had their share of work and seem contented.

The meeting of the Florists' Society last Saturday night, owing to the election of officers for the ensuing year, was well attended. There were twenty-two members present and the meeting proved quite a spirited one. Never before were the discussions entered into by so many different persons and it proved we have quite a number of orators in our society. It was decided to give an outing next month and Ben. George, Will Murphy,

RUINS OF THE PAVILLION, HORTICULTURAL GARDENS, TORONTO, ONT.

The June meeting of the Horticultural Society was very well attended. There was a fine exhibition of Iris Kämpferi, H. A. Dreer having some forty varieties. There were also fine sweet peas, gloxinias and a vase of seedling anthuriums in nearly all shades from white to dark red. Dr. Henry Skinner, entomologist of the society, gave an illustrated address on "Beneficial and Injurious Insects." The first named variety cat up the other kind and for this season are called beneficial. Seventeen year locusts, so-called, were described and the lecturer stated that they are perfectly harmless, as they do not eat except when in the ground and the only damage they do is when they deposit their eggs in the ends of the branches of trees, which does but little harm.

John Welsh Young, of Germantown,

anthemum and carnation shows were held, and there was no charge for rent or heat. The Pavillion was the scene of the convention of the S. A. F. in 1891.

H. G. D.

#### Pittsburg.

TRADE HELD UP BY WEDDING AND COMMENCEMENT ORDERS.—LITTLE ELSE DOING.—ROSES SHOW CONSIDERABLE IMPROVEMENT.—RETAILERS EXPECT PROSPERITY TO CONTINUE THROUGH JUNE.—NOTES OF VARIOUS DOINGS.

Transient business took a sudden drop during the week, but the exceptional number of orders for bouquets and baskets for commencement exercises will greatly assist in maintaining the volume of sales. Good white roses are in great demand and we do not get half enough. Some very good roses are coming in from

THE PAVILLION, HORTICULTURAL GARDENS, TORONTO, ONT., DECORATED BY JOHN H. DUNLOP.

(As it appeared the night it was destroyed by fire.)

J. W. Rodgers, Max Rudolph and Richard Witterstaetter were appointed a committee to arrange for the affair. Ben. George procured a fine portrait of our late friend, Edwin Hoffmeister, to hang in the club room and was tendered a vote of thanks by the society. The following directors were then elected: Wm. Murphy, Wm. Schuman, Frank W. Ball, Ben. George and George Murphy, who went into executive session and elected the following officers: President, Wm. Murphy; vice-president, Wm. Schuman; secretary, Frank Ball; treasurer, Ben. George. The next meeting of the society will be held at Chas. Pommert's place, Amelia, O. All those wishing to attend this meeting will kindly notify E. G. Gillett, who will make all arrangements in regard to transportation.

Quite a hail storm struck this vicinity last Sunday evening, doing considerable damage at Hartwell and Hyde Park. J. F. Conger, of Hartwell, had about 800 feet of glass broken and congratulates himself that he has insurance. Gus. Meier, at Hyde Park, states that the hailstones that fell on his glass were of good size, but he did not lose a pane of glass.

W. T. and F. P. Butz, of New Castle, Pa., were in the city this week, visiting the different growers to get some new ideas of greenhouse building and to place an order with the Lockland Lumber Company for material for a new range of greenhouses.

Richard Witterstaetter is sending to this market at present a white carnation which is pretty hard to beat. It is

about three inches in diameter and I am told the plants growing in the benches are a mass of bloom and buds.

Invitations are out for the wedding of Fred. W. Bramestrin to Miss Louisa Esther Rutley, June 25, at the home of the bride, Chatham, Ontario. At home after October 1 at Covington, Ky. D.

#### St. Louis.

TRADE WELL AHEAD OF THE SAME PERIOD LAST YEAR.—LITTLE GOOD STOCK TO BE HAD BUT HEAVY RECEIPTS CLEAN UP WELL.—VARIOUS LOCAL NOTES.

Trade is somewhat better this week than it has been in the past and is much better than at this same period in 1901. The exceedingly hot and dry spell of the last two weeks is showing in the quality of the flowers sent into the market. Roses, especially, are very small and of poor color. Golden Gates are about the best sent in, but a few Liberties are also very good. They bring up to \$6 per hundred for the best. Some Beauties are sent in but only a few are good enough to bring fair prices. Carnations have stood the heat much better than roses and the receipts are large. The best varieties are Triumph and Joost, for pink, and Flora Hill and White Cloud, for white. Eldorado and Crane are also very good. Daybreak is entirely played out and very few are to be had.

F. W. Ude, Jr., is building a new greenhouse and has Mr. Berdan to help him put it up. Gross Brothers are also building some new houses.

Mrs. M. M. Ayers had bad luck last

week, in that she lost both her new wagons in the fire at the Academy of Riding building, and also her harness, all valued at \$600. One of the wagons was just out of the shop and the other one was not quite a year old.

Bentzen & Reuter will start on their new houses next week, for violets and carnations.

Eugene Boudinet, partner of Christ. Holst, of New Orleans, is in the city on business. R. J. M.

#### St. Paul.

SPRING SEASON THE BEST ON RECORD.—MANY WEDDINGS AND SCHOOL COMMENCEMENTS REQUIRE MUCH STOCK.—PLANT TRADE VERY HEAVY.—BUILDERS BUSY.—NOTES.

School commencements, weddings and funerals have created an unusually good demand for cut flowers, while civic pride coupled with good times has made the call for bedding stock very brisk. Cut flowers have been fairly abundant and of good quality, though sudden changes in temperature have mildewed some and extreme heat shriveled others. The demand for Beauties has been exceptionally good. Meteors sell at sight and are so far superior to Liberty in lasting qualities and length and stiffness of stem that this new candidate for favor will surely take a secondary place with the growers for summer blooming. Kaiserius and Brides have the call for weddings, while Golden Gates are most effective in funeral designs. Roses retail at \$1.50 per dozen, with the best Meteors at \$2. Carnations are feeling the effect of warm

weather. Lawsons are badly faded and discolored and cannot compare with the Marquis, which appears to be first-class at all times. Prosperity is faded to nearly pure white, but Mrs. Bratt retains its size, markings and keeping qualities as in the winter. Carnations have retailed generally at 75 cents per dozen, a few of the smaller ones going at 50 cents. Pæonias have sold fairly well at from 50 cents to \$1 per dozen. The flower buyers are beginning to appreciate anew the beauty of these old time favorites.

L. L. May & Company have commenced building six new houses with an aggregate of 20,000 square feet of glass and are also rebuilding their large show houses, erected fifteen years ago.

Mr. Ickes, of A. Dietsch & Company, Chicago, and J. McHutchison representing Ang. Rhotert, New York, were recent callers.

Holm & Olson have broken ground for a range of houses on Duke street near Pleasant avenue. FELIX.

#### Omaha.

SPRING BUSINESS ENTIRELY SATISFACTORY. —PLANTS ALL CLEANED OUT.—MUCH BUILDING UNDER WAY.—HAIL DOES DAMAGE.—A NEW STORE.—OTHER NOTES.

Business has been good all spring and all the florists around here and in the state of Nebraska say the same. Memorial day was almost as good as Christmas, only stock was scarce, which prevented the florists from doing much more business. Pæonias were almost all gone and very few could be had. After Memorial day spring bedding plants were all sold out and geraniums, cannas, verbenas and so forth could not be found anywhere. Stock sold at good prices.

Hess & Swoboda have taken new quarters one door west on Farnam street, where they have more room. After they get their new fixtures they will have one of the best stores in the country. Mr. Hess was blessed with a daughter June 12.

John Ederer & Son are building two new houses 18x125. A. Donaghue is rebuilding two houses and Hess & Swoboda are building two new houses 18x200, using Garlaad's iron gutter. P. B. Floth has his new range under way.

We had a hail storm in April, one in May and one in June. They did quite a good deal of damage to the north side florists A. Donaghue, Hess & Swoboda and J. Ederer were the losers each time.

The Florists' Club had its monthly meeting June 12 and decided to have an outing in July. GRIPPE.

#### Seattle, Wash.

MUCH GREENHOUSE BUILDING UNDER WAY. —MANY REMOVALS AND IMPROVEMENTS AMONG THE GROWERS.—TRADE GOOD ALL SPRING.—A LULL JUST BEFORE COMMENCEMENTS.—VARIOUS NOTES.

There is a boom on just now in greenhouse building which looks as if there must have been good times with the florists this last year. Malmo & Company are building a store on Broadway and East Pike street, a show house 18x50, a warehouse and cold storage and boiler house to heat four greenhouses 18x120. John Holze, proprietor of the Madison Park Floral Company, is moving to Thirteenth avenue and East Madison, where he is going to build six new houses 20x100. He says he has sold

more bedding plants this year than ever before. His Alaska trade has been something extra. Bodie Bros., of East Seattle, are adding 15,000 feet of space to their establishment to grow carnations and chrysanthemums. They have planted 10,000 chrysanthemums for single stems. H. Harrington, on Vashon Island, is building five new houses 18x150, for carnations, chrysanthemums and asparagus. The Seattle Floral Company is moving to get more room at Fifth and Virginia streets, where they are putting up four new houses for general trade. The Washington Floral Company is adding one new house 18x110. Peter Saul is building 5,000 feet of glass on the east side of Lake Washington, to grow vegetables.

The florist business has been rather dull since Memorial day, but this week the florists are preparing for school commencement, which always uses up a good many flowers. Carnations are nearly done in the greenhouses but outdoor roses are plentiful and of very good quality. Outdoor carnations will be in this coming week. The state flower, the rhododendron, is just about over. Frank Bathurst, nursery manager for Malmo & Company, took a trip up to Whidby Island last week. He said that he struck one place of about twenty acres of rhododendrons that was very fine. There are thousands of seedlings on the island.

There are two new flower stores opened on Second avenue, the Evergreen Floral Company in the drug store formerly occupied by Mrs. McCoy, who moved across the street; and one at the entrance to the Butler Hotel.

The Florists' Club held a meeting on Saturday to nominate a new fruit inspector in place of W. Brown, who has been having trouble with the greenhouse men about scale on palms and ferns.

J. C. R.

#### Cleveland.

HAIL DOES DAMAGE TO A NUMBER OF GREENHOUSE ESTABLISHMENTS.—LOSERS ALMOST ENTIRELY UNINSURED.—SINGLE THICK GLASS MOSTLY BROKEN.—GRAHAM ENDORSED FOR PLACE ON PARK BOARD.

A heavy hail storm visited this city during the early part of last week and several florists' establishments bordering on the lake front suffered considerably thereby. Herman Hart reports a loss of about fifteen boxes, Fred. Aul ten boxes, August Schmitt about thirty boxes, Jno. Mollenkopf ten boxes, D. Gamble about the same amount, and James Eadie was the heaviest loser but no estimate of his loss was obtained. Few if any of the losers were insured. Perhaps this lesson will bring them into line. The greater part of the glass broken was single thick. The hailstones were about the size of walnuts. Double thick glass did not suffer to any extent. Mr. Schmitt was unable to tear down those houses affected by the storm and rebuild, using double strength glass.

The outlook for a florist being placed on the Board of Park Commissioners is exceedingly encouraging. The probate judge to whom the resolutions adopted by the club were submitted, replied very promptly, thanking the club for their assistance in the matter and requesting the club to name some capable horticulturist. The committee thereupon agreed to submit the name of Adam Graham as the most suitable one for the position, which was accordingly done. The board is to be non-partisan and to comprise four members.

The picnic committee will report at our next club meeting when and where the outing will be held. All the members are requested to be on hand, as important matters are to be discussed. ECHO.

#### San Francisco.

HORTICULTURAL SOCIETY HOLDS VERY SUCCESSFUL MEETING.—PRIZE LIST NOW READY FOR FALL SHOW.—FIRST BIG OUTING PLANNED.—TRADE FAIRLY STEADY.—ASTERS IN BUT NOT WANTED.

A very successful meeting of the Pacific Coast Horticultural Society was held June 14. Five new members were initiated and four proposed. The prize lists for the approaching show were distributed. Conspicuous among the prizes are those given by the Cox Seed and Plant Company, \$60 in various classes. The day for the excursion to the California Nursery Company's place at Niles was set for the first Sunday in July and it promises to be a large affair. It will be the first joint outing for all those interested in the flower and plant business and most of the flower stores will very likely be closed for that day. The first anniversary of this society will be celebrated at the same time. After the meeting the committee on entertainment kept the members together until almost midnight by music and recitals by a phonograph.

Business for the last week was good up to the last two or three days, when a considerable falling off was noticed. The visiting Shriners have made things quite interesting for the stores and go away with the very best impression of California flowers, carnations especially.

J. W. Shanahan is at present at Douglas City, in Trinity county, on pleasure and business.

Some asters are in, but do not take well as it is too early for them and the stems are too short.

GOLDEN GATE.

#### Denver.

LIBERAL USE OF STOCK FOR SCHOOL CLOSINGS.—PÆONIA CROP A FAILURE IN MONEY RETURNS.—BUSINESS CHANGES.—BOLDT TAKES A NEW POSITION.

The use of flowers for school commencements this year was quite encouraging and seems to be gradually getting back where it belongs. Medium priced roses were mostly used, although quantities of carnations were disposed of. The old custom of sending baskets of flowers has died out and I do not know of a single instance where a basket was called for this year. Pæonias did not go off well and, while quality this season has been up to previous years, the crop has proved a failure in so far as money returns go. Of course they could be figured as a show, but then to sell them is far better, or in the vernacular, we'd rather "deliver the goods".

Quite a few changes are noted. Miss Bessie Hortop, who formerly conducted a small store on one of the side streets, has branched out into a larger one on our leading street, which gives all a little more competition. Another concern has opened under the name of the New York Floral Company, but who they are other than Grecks, I do not know.

Ben. Boldt, for the past two years foreman for the Park Floral Company, has left to take charge of the Daniels & Fisher greenhouses. Before leaving his old job he was presented with a fine watch charm by his fellow employees and Mr. Valentine, president of the Park

Floral Company, presented him with a beautiful gold watch, so Ben. went away perhaps sorrowful, but knowing he stood well with those he left behind.

#### Detroit.

FESTIVITIES OF JUNE CREATING A DEMAND WHICH OVERTAKES THE SOURCES OF SUPPLY.—ROSES POOR BUT MOVING WELL.—CLUB HAS AN OUTING AND A MEETING.

June weddings and school commencements are giving an impetus to business that is taxing the sources of supply to the utmost. American Beauty and Meteor roses lead in the popular demand, while the stock of pink roses and colored carnations of good quality is easily disposed of, and the present activity gives indications of holding out well for another week. It is a trying time for the rose growers, as the weather is so changeable and unseasonable, close and humid one day, suddenly changing to cold and rain. Then they have the additional trouble of the dreaded thrip, which is new to most local growers, but no one is now escaping its ravages.

The club meeting Wednesday evening was given to miscellaneous work, including preparations for an outing in the near future to Bois Blanc Island. From present indications a party of about fifteen will attend the convention at Asheville in August.

A party of eighteen members of the club enjoyed an outing Thursday of last week, going to Algonac, above Lake St. Clair. The day was pleasantly spent in fishing, ending with a banquet in the evening.

J. F. Sullivan is about to build one house, for chrysanthemums, 24x100 feet.

Visitors: W. H. Watson, Lapeer, Mich.; J. W. Begbie, New York. J. F. S.

#### Columbus, O.

GOOD PÆONIAS FROM CHICAGO A WELCOME ADDITION TO THE STOCK.—GOOD ROSES NOT TO BE HAD.—VARIOUS NOTES.

Some very fine pæonias are still being shipped in from Chicago and they have been a great help in some of the decorations. A good rain last week helped the sweet pea crop so that we are now getting some good stock from the suburban growers. The closing of schools and colleges is creating quite a demand for roses, but the supply is short; in fact, good stock is out of the question. We are longing for the asters, of which there will be a good supply in this section if we are favored with a little more rain. Some of the growers are starting to replant their roses and it will not be long until all the old stock is replaced with a new crop.

Mr. Crabb, formerly with the Livingston Seed Company, has charge of the new establishment on West Seventh avenue. Mr. Smith, a well known furniture man of this city, is the proprietor.

#### Hagerstown, Md.

HEAVY RUN OF SPRING BUSINESS—BOTH BEDDING STOCK AND CUT FLOWERS IN GOOD DEMAND.—BUILDING OPERATIONS.—THE MAYOR.

Spring trade is at its height, the florists reporting a brisk trade all along the line. Geraniums, verbenas and all sorts of bedding stock are much in demand and, while no shortage is anticipated, all indications point to a clean sweep. The

usual quota of June weddings, school commencements and so forth will keep things moving throughout this month. After that a general cleaning up, rebuilding and remodeling will be the order of day. Wm. Bester has already commenced building three additional rose houses each 18x100. These are being built in the most modern, up-to-date way, with no partitions between. While at it Mr. Bester will give his other houses a general overhauling. Henry A. Bester will add two good-sized carnation houses. While growing a general stock for his retail trade. Mr. Bester will pay particular attention to the carnation. At both places I found things in splendid condition.

A call upon the mayor of the city, Hon. Henry Holzappel, proved interesting. Mayor Holzappel is first, last and all the time a florist of the progressive school, but to be mayor of a progressive city at the age of 27 or 28 is an honor achieved by few. He entered office with the sole purpose of doing his duty as behooves a good citizen and that the city of Hagerstown will profit by his services is a foregone conclusion. NOMIS.

#### Providence.

BUSINESS DULL.—STREET RAILWAY STRIKE DOES NOT AFFECT FLORISTS.—BOWLING CLUB IN PROSPECT.

Business has resolved itself into a state of pronounced quietness. Flowers are coming in fast and meet an overflowing market. One day last week a department store announced a sale of five thousand carnations at 15 cents per dozen. Carnations move with difficulty at anything over 50 cents per hundred; roses stand for 2 cents to 5 cents wholesale. Sweet peas from outdoors sell unevenly at 25 cents to 35 cents per hundred.

The city has a street railway strike on its hands, but luckily the florists have not been at a loss thereby, the busy season being over.

A florists' howling club is anticipated for the coming season.

Early closing should be in order soon. M. M.

#### Minneapolis.

The demand for flowers has been greater than the supply the whole week through, especially so in roses. Most crops are off and stock very inferior. Carnations are quite plentiful but the effects of warm weather begin to show. Some fancy pæonias have been in the market but have only averaged wholesale \$2 per hundred. Kaiserin is the whole thing in the rose market now and thrives during the hot weather. Bedding trade still holds up and the plant dealers are well pleased. Rice Brothers report business progressing well.

C. F. R.

#### Removals and New Firms.

CANTON, N. Y.—N. E. Farmer has moved into the old library building.

SCHENECTADY, N. Y.—Chas. Limmer moved on May 26 to the handsome new Lorraine block.

SEYMOUR, CONN.—Chas. F. Doll has decided to discontinue his greenhouse business.

PASSAIC, N. J.—M. L. Hundertmark has opened an attractive establishment at 5 Bloomfield avenue.

GLOUCESTER, MASS.—A. L. Tuck is erecting a new greenhouse establishment on Washington street.

## NEWS NOTES.

BALTIMORE, MD.—Henry Wiedey was overcome by the heat June 14.

NEWPORT, R. I.—The annual rose and strawberry show of the Newport Horticultural Society will be held at Odd Fellows Hall on June 24 and 25.

SIOUX CITY, IA.—J. C. Rennison, who returned last Sunday from a trip to Chicago, is rebuilding three houses 20x150 and will add one house 35x80.

PORTLAND, CONN.—Chas. Sellew, who has been engaged in the florist business for the past four years, has decided to discontinue and will remove to Moscow, N. Y.

WILLIAMSPORT, PA.—Harry Chaapel lost a few dollars in damage to his seed and cut flower stock and suffered much inconvenience because of fire next door June 9.

MARLBORO, MASS.—F. B. Gleason has sold his flower business in the Phoenix Block to Misses Grace and Belle A. Stevens. Miss Grace has been employed by Mr. Gleason for the past four years.

POUGHKEEPSIE, N. Y.—Cards are out announcing the arrival of a young son and heir to W. T. Rynders, who made his appearance on June 12. Roger Pritchard Rynders is the young man's name.

ROCHESTER, N. Y.—The Woman's Union, which made such a pronounced success of its flower show last fall, is planning another for September. The displays are expected to be largely amateurs.

BANGOR, ME.—Contracts for supplying plants and shrubbery for the public parks have been awarded to Adam Sekenger for Chapin Park, Mrs. Thos. Allen for Whitney Park and Carl Beers for Union and Seavey Parks.

LANSING, MICH.—The Lutey Floral Company has filed articles of incorporation with the secretary of state. The capital stock is \$25,000. The company will take over the business of A. E. Lutey at Calumet, Mich., and the new range of houses going up at Chassell.

CADILLAC, MICH.—A. W. Tweedie had a large stock of bedding plants for spring and cleaned them out nicely, the Memorial day trade being half again larger than last year. He is building up his plant with the idea of supplying all that section of the state which naturally looks to Cadillac for plants and cut flowers.

NASHVILLE, TENN.—The pressure of work promises to keep both T. S. Joy and his son, T. C. Joy, away from the S. A. F. convention, but they will send their foreman, whose old home is in the vicinity of Asheville. T. C. Joy is already planning to attend the Brooklyn carnation meeting which he thinks will be the next best thing to tickling the angel's feet.

LYNN, MASS.—S. A. Davenport is given great credit for his fine work in planting and decorating the Common. He has altered the arrangement of the beds, sodded some portions that were before planted and laid out new beds in a very attractive manner. Under the supervision of Mr. Reeves, his head gardener, they put in some ornamental beds that are a credit to Mr. Davenport and a pleasure to the city.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 12 times  
10 per cent; 24 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts apply-  
ing only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THERE is a growing tendency toward  
the use of colored flowers at the funerals  
of adults.

PROF. L. H. BAILEY says that now-  
days no one thinks of getting along  
without his trade paper.

THE article on mignonette to which  
"Subscriber" refers will be found on page  
665, issue of January 6, 1900.

THERE seems a likelihood that machine-  
made window glass will shortly be  
turned out on a commercial scale. The  
trust is installing a number of machines  
at its plant at Alexandria, Ind.

THE men of the craft in Maryland  
seem to be active forces in politics as well  
as trade. Henry Holzapel is mayor of  
Hagerstown and Orlando Harrison has  
recently been re-elected mayor of Berlin.

F. W. TAYLOR, acting chief of horti-  
culture for the St. Louis exposition, says  
that it is practically assured that the  
management will provide a glass build-  
ing for floriculture and a separate  
structure for pomology.

### Is Well Pleased.

ED. AM. FLORIST:—Enclosed is \$1 to  
renew my subscription to the AMERICAN  
FLORIST. I am well pleased with your  
paper and would not like to be without  
it. J. WM. SIMPSON.

Woburn, Mass.

### Greenhouse Building.

Seattle, Wash.—John Holze, six houses  
13x80.

Sioux City, Ia.—J. C. Rennison, one  
house 35x80.

Syracuse N. Y.—L. E. Marquisee, one  
house 11x256 and adding 31 feet to two  
houses.

Milwaukee, Wis.—N. Zwiefel, one house  
28x200.

Philadelphia, Pa.—Wm. Dedden, one  
house. J. F. Hunter, house 20x30. A. H.  
Ritter, house 15x33.

Leominster, Mass.—Geo. M. Kendall,  
vegetable house.

Fall River, Mass.—F. Bath, house  
16x47.

Phillipston, Mass.—Chas. H. Stewart,  
vegetable house.

East Mansfield, Mass.—John Conrod,  
one house.

South Sudbury, Mass.—F. W. Good-  
now, cucumber house 20x50.

West Haven, Conn.—Charles Palmer,  
violet house.

Hathoro, Pa.—H. Weiss, house 24x180.

### Treatment For Cycas.

ED. AM. FLORIST:—I should be pleased  
to have information as to the way to  
treat cycas in drying off growing plants  
and bringing dormant stems into growth.  
E. A. I.

Unless it may be in the case of a cycas  
that has become so badly infested with  
insects that it is necessary to cut off all  
the leaves, there does not seem to be any  
reason for drying off the growing plants,  
from the fact that this plant is an ever-  
green. But in such a case it would be  
best to keep the plant moderately dry at  
the root until it showed signs of starting  
a new crown of leaves, and this would  
probably not be very long at this season  
of the year. After the plant began to  
grow a liberal quantity of water would  
be needful, also a moist atmosphere and  
moderate shading.

The dormant cycas stems, such as are  
imported from Japan in such great quan-  
tities each year, are usually quite denuded  
of both roots and leaves, and should be  
potted firmly in as small pots as the size  
of stem will permit, given then a good  
watering and placed in a warm and  
shaded house, after which they should be  
syringed each day in bright weather, but  
not overwatered before they have a  
chance to make some roots. Some grow-  
ers prefer to plunge the pots containing  
the cycas stems in a hotbed of manure or  
spent hops, but the disadvantage of this  
method is found in the fact that under  
such conditions the plants start into leaf  
before they have formed roots enough to  
support the foliage, and consequently the  
leaves do not develop perfectly. During  
the growth of the young foliage on the  
cycas it is well to be rather careful in  
syringing them, the unfolding leaves  
being very tender and readily bruised,  
but after the leaves are fully grown they  
may be syringed vigorously, and the  
plants should then be given plenty of air.  
W. H. TAPLIN.

that Prof. Goff invented the kerosene  
attachment for spray pumps. This  
device, so commonly known as the Wood  
and Galloway attachment, was first  
applied to the old Nixon tripod pump  
and the original model is now in the  
horticultural building at Madison.

ANDREW M'CONNELL.

Andrew McConnell died at the Hab-  
neman hospital, New York City, of meain-  
getis, on June 16, in his sixty-first year.  
Mr. McConnell has been identified with  
horticultural pursuits from his early boy-  
hood. He was a thoroughly practical  
plantsman, especially in outdoor work.  
One of his earliest positions was that of  
gardener to R. L. Stewart, at the fine  
old place at 154 Fifth avenue, where he  
was successor to Mr. Davidson and  
served for seven or eight years. Later  
he filled the position of second gardener  
under the renowned Wm. Chorlton, on  
the estate of John C. Green, at Staten  
Island. Afterwards a partnership was  
formed and a commercial enterprise  
launched under the title of Chorlton &  
McConnell. For many years this firm  
was noted as the largest camellia pro-  
ducers in this section. On the retirement  
of Mr. Chorlton the business was merged  
into the firm of McConnell & Grimshaw.  
For the past eight years Mr. McConnell  
has been connected with the establish-  
ment of his brother, Alexander, at Fifth  
avenue and Forty-fifth street. While  
there he had charge of the planting of  
the Gould estate at Lakewood, N. J., for  
two years. His wife, who was a daughter  
of the late Wm. Chorlton, died some  
years ago, and he leaves one son only,  
Jas. F. McConnell, who is a salesman for  
J. N. May and L. M. Noe at the New  
York Cut Flower Company's rooms. The  
funeral took place from the residence of  
Alexander McConnell, at New Rochelle,  
on Wednesday, June 18.

WILLIAM BULL.

By the death of William Bull, of King's  
Road, Chelsea, British gardeners lose one  
of the most remarkable and enterprising  
gardeners and nurserymen of the Victo-  
rian era. I often think the modern flo-  
rist has been born too late. All the good  
things seem to have been thought of by  
his predecessors and unless he can strike  
out a new and original line for himself  
his chances of becoming a shining light  
in the horticultural world are rather  
remote. It seems to have been a some-  
what similar idea that induced Mr. Bull  
at the age of 32 to strike out on the line  
which have since made his name a house-  
hold word among gardeners of all  
nationalities. When about 14 years of  
age he started gardening in a nursery at  
Winchester, his native town, and three  
years later he entered the then famous  
firm of E. G. Henderson & Son, of St.  
John's Wood, London, now out of exist-  
ence. After a time he became a traveler  
for his firm, and at the age of 26 he  
transferred his abilities to W. Rollison  
& Sons, of Tooting, for whom he trav-  
eled far and wide. There was some talk  
of taking him into partnership, but the  
negotiations failed and in 1861 Mr. Bull  
started on his own account, in the King's  
Road, Chelsea, dealing in "new, beautiful  
and rare plants." He carried on the  
business until June 1, 1902, when he died.  
For many years he was a great exhibi-  
tor, but for several years past he has  
held a perennial exhibition of his own at  
his nurseries. So far as his work in hor-  
ticulture is concerned, perhaps there is no  
one man living who has introduced so  
many fine plants of all kinds. He has

## OBITUARY.

EDWIN V. GAGE.

Edwin V. Gage, of Bradford, Mass., for  
many years a successful florist, died on  
June 8, aged 62 years. He leaves a widow  
and three sons.

EMMETT S. GOFF.

Emmett Stull Goff, professor of horti-  
culture at the University of Wisconsin,  
and a frequent contributor to horticul-  
tural literature, died June 6, as noted in  
our last issue. Born on a farm near  
Elmira, N. Y., he graduated from Elmira  
Academy in 1869 and was appointed  
horticulturist at the Agricultural Experi-  
ment Station at Geneva, N. Y., in 1882.  
He removed to Wisconsin in 1889. At  
that time the horticultural department  
at the Madison university was very  
small, with meager equipment and less  
than a dozen students pursuing that spe-  
cial branch. During the past school year  
over 300 students received instruction  
from Prof. Goff, in a splendid building  
devoted to horticulture and with the  
added advantage of field work in several  
acres of nursery and fruit plantations.  
This growth, though following to some  
extent the growth of the Agricultural  
College in general, was due in no small  
measure to the untiring efforts of Prof.  
Goff. His "Principles of Plant Culture"  
and "Lessons in Pomology" were the  
outgrowth of his experience in the class  
room. He was a pioneer in the use of  
fungicides. It is not generally known

made introductions from all parts of the world, through such famous collectors as Dr. Berthold, Szemann, Roehl, Bruckmuller, Shuttleworth and Carder, the last-named, I believe, being the only one at present living. That Mr. Bull was honored and respected throughout the entire horticultural world is shown by the honors that were conferred upon him by various British and foreign societies. The business will be carried on as usual by his two sons, William and Edward Bull. W.

### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By Aug. 1st, in the orchid shipping business by young man, age 20. Three years' experience as a florist. Address ORCHID, care American Florist.

**SITUATION WANTED**—By a first-class rose grower; best of references from some of the leading rose growers of New England. Address F H A, care American Florist.

Greenhouses, 25,000 square feet of glass, all in good condition and paying well; within 20 miles of Chicago. Owner is going to retire from business. Address F S, care American Florist.

## FOR SALE—Florist Business.

3,000 feet of glass, established over 20 years. Plenty of land for extension of business; best location in city of Rome 16,000 inhabitants, center of New York State, on New York Central R. R., five hours' ride from New York City. Progressive party can make a lot of money. Address MRS. MORRIS R. JONES, Rome, N. Y.

## For Sale or Lease.

**OLD ESTABLISHED FLORIST BUSINESS**—11 acres of ground, 11 greenhouses, outhouses, barn, office, dwelling house, and good water mill (Corcoran build), in City of New York, Borough of Bronx. Entire property will be sold at reasonable price, or leased for number of years. Greenhouses heated by hot water boiler, all in good order. Good chance for right party.

FRANK GASS, Unionport, Westchester, New York City.

## For Sale.

I offer for sale, on account of impaired health my seed establishment, 64 and 66 N. Front street, Philadelphia, Pa., finely located at the terminal of four trolley lines and near all steamboat and railroad depots; rent very moderate; stock is small, clean and fresh; complete fixtures; several specialties; well advertised; good retail counter trade. An established market gardeners' and wholesale trade. Will be sold as a whole at a moderate price to good party.

H. G. FAUST,

64-66 No. Front St., PHILADELPHIA, PA.

## Greenhouses For Sale.

At public auction. On Wednesday, June 25th, at 2 p. m., the Reinert Greenhouse property at Etna, N. J., will be sold at public auction. Two acres of land, water tower, six hot houses with about 8,000 sq. ft. of glass, etc., etc. Terms liberal. Property is situated at Etna on the line of the N. J. and N. Y. R. R.; 20 miles from New York; near the R. R. station. For information address

CHAS. REINERT, Northport, N. Y.,

Or M. H. ANGELL, ETNA, BERGEN CO., N. J.

## Circulation

which Circulates

The actual paid circulation of the American Florist is, we believe, the largest in its class. The contents are of real present value and are preserved for reference. Advertisers who use regularly our columns establish permanent business with the best trade in the United States.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

VISITED CHICAGO: G. B. McVay, of the Amzi Godden Company, Birmingham, Ala.

Dry weather prevails in the tuberose districts and the crop is suffering somewhat therefrom.

L. A. BUDLONG, of Chicago, has returned to his home after an enjoyable fishing trip in Texas.

HENRY F. MICHELL, of Philadelphia, has suffered a loss of \$3,000 from fire in an adjoining store. The property is fully insured.

THUS far a sleeper and a half have been engaged for the Minneapolis trip on the Chicago, Milwaukee & St. Paul R. R., train leaving Union Depot, Chicago, at 6:30 p. m., June 23.

CHARLES A. HEATH, of the Albert Dickinson Company, Chicago, is at Williams College, Williamstown, Mass., for commencement week. He is an alumnus of the class of 1882.

## H. G. Faust to Retire.

We are sorry to learn that H. G. Faust, trading as H. G. Faust & Company, Philadelphia, is by the advice of his physicians compelled to relinquish business on account of his health. The house was established in 1887 at the present location, 64-66 North Front street and 100 Arch street, in the double five-story buildings, and by means of catalogues and advertising combined with hard work a growing business was established in wholesale, retail and market gardeners' lines. Close attention was paid to several specialties in which a large trade has been done at home and abroad. The business will be sold as a whole.

## A High Handed Proceeding.

The United States Treasury Department issued June 4 the following remarkable order:

At the instance of the Secretary of Agriculture, it is hereby directed that, commencing July 1, 1902, and continuing for six months, 2-ounce samples of all importations of 100 pounds or more of grass, clover and forage plant seeds be prepared at the earliest practicable date after entry and forwarded to the Seed Laboratory, Department of Agriculture, Washington, D. C., labeled with names and addresses of consignors and consignees, name of seed as given in the invoice, and quantity of the consignment.

Charles D. Boyles, secretary of the Albert Dickinson Company, Chicago, in reference to the above said: "This order is news to us. The Secretary of Agriculture did not favor us with an announcement of his intentions. Had he done so I think we should have felt it necessary to file our objections. I do not see how the operation of this order could accrue to the interest of the large importers who are spending their money to discover and keep in touch with the best sources of supply. On the other hand, much harm might result. It all depends on what Mr. Pieters proposes to do with the samples, labeled with all possible information except the price, when they reach the Seed Laboratory. Nothing is said on that point and it may be that the Department does not intend to publish the valuable information thus

collected, but in view of the well known propensity of the Department to print all it knows I think this order may be a cause for alarm on the part of those houses which have invested considerable capital in perfecting their European connections."

Charles A. Heath, manager of the grass seed department of the same house, said: "If this order is to be carried into effect the importers who wish to safeguard their European sources of supply will doubtless find it expedient to have shipments pass through the hands of forwarding agents, but it will add to the expense of doing business."

A. H. Goodwin, of the Goodwin, Harris Company, Chicago, said: "We are living under a strenuous government."

## European Seed Crops.

There has been too much rain in nearly all the seed growing sections of continental Europe, according to the *Horticultural Advertiser* of June 11. The weather has also been cool and the season is generally backward. Among vegetables, cucumbers (now too late to sow again), beans, lettuce, tomatoes, potatoes and peas have all been injured. Plants of carrots and beets have also suffered in southern France and kohlrabi and turnips in Germany. Prospects for radish, spinach, celery, leek and cabbage seem good. Favorable weather from date onward will materially change the outlook. Flower seeds have not been specially damaged so far. Pansies are looking well, myosotis not so good.

## American Seed Trade Association.

President Northrup advises us as follows regarding railroad fares to the Minneapolis meeting of the American Seed Trade Association, June 24-26: "Western Passenger Association, Trunk Line Association and New England Passenger Association grant fare and one-third rate for round trip. Receipts for fare paid will not be accepted in lieu of certificates."

## CHICAGO TO MINNEAPOLIS.

Seedsmen from the east and south of Chicago should purchase tickets from starting point through to Minneapolis, taking certificate receipt for same. This receipt when properly executed at Minneapolis will secure return ticket at one-third of the regular rate. In purchasing tickets be sure to see they read from Chicago to Minneapolis via the Chicago, Milwaukee & St. Paul R. R., so as to accompany the Chicago party, who are very desirous that all visitors passing through Chicago travel in the same car or cars, leaving Chicago from the Union Depot at 6:30 p. m., June 23. Reservation on sleeping cars can be made through J. C. Vaughan, 84 Randolph street, Peter Hollenbach, 12 North Halsted street, or Goodwin Harris Company, 115 East Kinzie street, all at Chicago.

## AT ST. PAUL.

L. L. May is planning to entertain the seedsmen on Wednesday, June 25. A trip down the river, a carriage ride around the city, supper at the club and a trolley ride in the evening are a few of the pleasures planned.

## LILIUM HARRISII.

Indispensable for Early Forcing.

OUR own growers pack all our Bermuda Bulbs and personally grow half our supply. Careful attention to the growing crop, weeding out diseased plants, proper grading of the bulbs when dug, business-like packing and handling, all go to make success with Harrisii. We invite your orders under these conditions. Our bulbs will pay you.

Write for Prices before closing any forcing stock orders.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSEYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

**VISITED CHICAGO:** Martin Foley, of the Great Northern Nursery, Baraboo, Wis.

ONE of the features of the past season is said to have been the demand for weeping trees.

The Greenmount Nurseries, of Philadelphia, are in bankruptcy, E. F. Hoffman, 560 Bullitt building is referee.

CONIFERS were planted in increased numbers this spring, particularly the Colorado blue spruce and the Douglas spruce.

EXTENSIVE advertising in journals of general circulation has resulted in greatly increasing the call for Schwedler's maple. It is a splendid tree for the lawn.

N. W. HALE, of Knoxville, Tenn., says that he considers the woolly aphis a more dangerous pest than the San Jose scale, the Hurrah scale, as N. H. Albaugh calls it.

### The Catalpa As An Economic Tree.

The hardy catalpa, *C. speciosa*, has long been recognized as a tree of great economic value by individual botanists, foresters and business men, but it is only now meeting with the wide acceptance to which its utility entitles it. Recent practical experiments with the catalpa in the west are described in a bulletin of the Kansas State Agricultural College and are summarized as follows:

"Two species of catalpa are native to the United States, *Catalpa catalpa* (*C. bignonioides*), indigenous in the south-east, and *Catalpa speciosa* in the central west. Planting of the southeastern species in the west long caused confusion between the two trees, since both were planted together indifferently, under the supposition that they were of the same species. The low, scraggy habit and the tendency of the tops to winter-kill, seen in many catalpa trees, and peculiar to *C. catalpa*, was a supposed characteristic of all catalpa trees. *C. speciosa* was first distinguished as a separate form by Warder in 1853, and first described by Engelmann in 1880.

"*Catalpa speciosa* is distinguished from the other native species by greater stature, hardness north of the forty-fourth parallel, north latitude; larger flowers, fewer in panicles, and appearing about two weeks earlier than those of *C. catalpa*; by furrowed rather than scaly bark and by wider and more deeply notched seeds, bearing a fringe of hairs not drawn to a point, as in *C. catalpa*.

"Wood of *C. speciosa* is remarkable for durability in contact with the soil. Well authenticated and reliable observations give life-record of 100 years for timber from large, mature specimens. Seasoned timber from trees ten inches or more in diameter will last fifteen to thirty years in continuous contact with the soil.

"Seed should be sown about twenty-five to the foot, in shallow drills one inch deep. Spring sowing is best in northern states. Seedlings 'heeled in' over winter are set permanently the following spring. Planting should not be closer than 5x8 feet and thin to 10x8 from the eighth to twelfth year. Thinning should be continued until the trees stand 20x16 feet, or

16x16 if the original planting was 8x8. Crops of corn, etc., can be grown between the eight-foot rows the first year after setting. If cut to the ground the second year from setting and a single sprout allowed to grow, the resulting trunk will be straighter than if not cut back. Sprouts from older roots produce post timber in four years. Pruning is necessary for the formation of straight trunks, the first pruning in the fifth or sixth year, the second in the tenth year. Trees in the forest increase in diameter from one-third to one-half inch annually, if not planted closer than 5x8 feet (1,000 trees per acre). Trees standing 16x16 feet (170 per acre) may increase in diameter one inch annually up to about the twelfth year. From that time on, the probable annual rate of increase will be one-half inch. Post timber is produced in from seven to ten years, tie timber, telegraph and telephone poles in from fifteen to twenty-five years.

"White oak, the best tie timber hitherto used, is nearing exhaustion. The expense of chemically treating cheap ties of perishable wood is great. Metallic ties are out of the question on American roadbeds. A strong demand exists for durable tie timber to replace oak. In 1900 there were 535,668,000 ties in the tracks in the United States. The renewals in that year were 48,000,000, worth, at 40 cents apiece, \$19,200,000, nine per cent of the total in track. If laid with catalpa ties, annual renewals would not exceed four per cent, counting the life of catalpa ties at but fifteen years. They have been known to last twenty years. The annual saving of expense of renewals thus affected, estimating the cost of catalpa ties also at 40 cents apiece, would be \$10,600,000.

The durable quality of catalpa renders it especially valuable for fence posts and for telephone and telegraph poles. The value for post timber lies not only in its resistance to decay, but also in its not checking or splitting with age.

"The first catalpa forest was planted in southern Missouri in the late 70's by

the St. Louis, Iron Mountain & Southern railroad. It was not cared for and finally abandoned.

"The Farlington plantation, near Farlington, Kan., owned by the Frisco system, has 640 acres, planted between 1879 and 1882. The trees were planted 4x4 feet, not regularly thinned or pruned and consequently the trees have not made proper development. Thinning now going on and plantation may yet be successful.

"The Tincher plantation of sixty acres, near Wilsey, Kan., is successful and promising, producing in some parts of the plantation 2,000 posts per acre, at 10 cents each. The trees are well pruned and properly thinned. It is a commercial success, the soil an upland prairie.

"The Yaggy plantation, situated in the Arkansas river valley, near Hutchinson, Kansas, consists of about 500 acres in trees. Conditions at this plantation are better adapted for growth of the catalpa than those of any other in the state. Cropped entirely for posts, the trees are in splendid condition and the plantation a decided success.

"Cost and profits in catalpa growing depend on local conditions. Careful estimates based on the Yaggy forest give the total cost of growing and marketing the timber on one acre for ten years as \$51.70; gross value of product in ten years, \$267.15; net profit, \$215.45; net profit less six per cent compound interest on expenditures, \$197.55 per acre; net annual profit for first ten years, \$19.75; owner's estimate of present gross value of product (three years later than above valuation) \$400 per acre; annual income of plantation at present, as estimated by owner, \$50 per acre.

JACKSONVILLE, ILL.—Joseph Heintz says that he sold several hundred dollars worth of cuttings of his specialty, *Juniperus compacta*, while at the nurserymen's convention at Milwaukee. He has a large stock of it and it is a fine thing but difficult to propagate.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Bowling at Asheville.

The bowling committee of the Florists' Club of Philadelphia had a meeting on June 10, and made arrangements for a series of four outside matches, open to all active members of the club, on each Wednesday, beginning June 18, to determine who shall be on their team at Asheville.

Incidentally some talk was indulged in about prizes at the convention and two members put their names down for \$10 each as a starter.

It is about time now that we were hearing something from the officers of the Bowling League, if that august body is still in existence. If not then some other means should be adopted to work up a programme for the convention.

Perhaps some of our enterprising horticultural supply concerns want to put up a trophy this year? In that direction \$25 or \$50 would prove a very good advertisement. G. C. WATSON.

At Philadelphia.

"They're off." The convention contests have begun, at least the preparatory ones. It was announced that the Philadelphia team will be composed of those scoring highest in four matches to be rolled June 18 and 25, July 2 and 9, but the name of the alleys is not given out, so there can be no practicing. Sixteen players turned up for the first contest, on the Pennsylvania Bicycle Club's alleys, which shows the interest taken. Harris and Westcott, the veterans, were made captains and sides chosen. The point winners were Moss, 544; Robertson, 488; Starkey, 481; Kift, 478; Polites, 473; Craig, 465, and Anderson, 460. The team scores follow:

Player	1st	2d	3d	T'l
Harris, Capt.	167	126	117	450
Connor	123	167	149	439

At New York.

The attendance at the bowling alleys last Monday evening was gratifyingly large and enthusiastic. It was decided to give up the Eighth street alleys and meet weekly at Thnm's alleys, at Thirty-first street and Broadway for the summer. These are the most perfect alleys in New York and it is expected that the practice on the strange floor will so develop and perfect the rollers that when they go to Asheville they will be practically invincible. A proposition to do something towards providing trophies to be contested for at Asheville was

defeated by a unanimous vote. A feature of Monday's rolling was the rivalry between F. H. Traendly and W. H. Siebrecht, the result of which was the transferring of most of Mr. Siebrecht's loose change to Mr. Traendly's pocket as a beginning towards the purchase of a \$200 Panama hat at a cut price. Following are the scores:

Player	1st	2d	3d	4th
Lang	177	158	169	135
Bunyard	140	140	166	126
Traendly	143	159	188	117
Shaw	154	167	131	119
Thielmann	145	116	154	161
O'Mara	169	134	187	165
Siebrecht	113	121	132	122
Sorly	161	102	140	120

Springfield, Mass.

NO LARGE WEDDING JOBS THIS SEASON BUT MUCH SMALL WORK.—CUT FLOWER TRADE BRISK.—OUTDOOR STOCK BENEFITS BY RAINS.—NOTES.

Business is quite brisk, although we are not favored with any large wedding decorations so far. The store men have been quite busy with smaller decorations and there is a good demand for cut flowers, which are fair considering the very warm weather, more like August than June. We have had some good showers, which have helped the carnations, asters and sweet peas, which else

must have suffered with the extreme heat. Bedding out is all done and reports are very satisfactory. Everything was sold out. Cleaning up is in order now and refilling benches for chrysanthemums, of which quite a number are grown here.

L. D. Robinson reports sales away ahead of last year, with good prospects for fall.

Mark Aitken is going to build two houses 10x50 feet. A. B.

LYNN, MASS.—The wedding of Alex Solomon and Miss Annie Maud Brewer is announced to take place in June.

FALL BULBS

Tulips, Hyacinths, Narcissus, Lilies. You can save money by placing order now. Send us your list; we will make bottom prices.

James Vick's Sons, Rochester, N. Y.

J. van Reisen & Son, VOORHOUT, HOLLAND, Wholesale Bulbs and Roots.

NEW YORK ADDRESS: care P. J. VAN HEININGEN, 136 Water St.

ORCHIDS! A RARE OPPORTUNITY ORCHIDS!

To make room for a large importation with which I have just returned from the Orient, I offer healthy, well established plants of the following varieties at reduced rates. Write for what you want. I will make the price right. Aerides Quinquenervium, extra fine in spike; Cattleya Bowringiana, Eldorado, Forbesii, Gaskelliana, Guttata, Intermedia, Labiata, Mendellii, Mossiae, Quadricolor, Skinneri, Trianae; Dendrobium Superbum; Lælia Purpurata and Superbiens; Lycaste Skinneri, strong.

ODONTOGLOSSUM CRISPUM.

Of this variety I can spare about 100 fine healthy, vigorous plants.

PHALAENOPSIS.

Amabilis, Amethystina, Intermedia, Leucorrhoda, Luddemanniana, Rosea, Sanderiana, Schilleriana, Stuartiana; Pilumnna Fragrans (strong plants); Renanthera Storiei; Saccolabium Violaceum; Vanda Sanderiana, Lamellata, Boxalli.

Above plants all sizes, small to specimen plants. Write for prices.

R. Schiffmann, M. D., St. Paul, Minn.

....AN....

Indispensable Adjunct

TO a successful wholesale business is an up-to-date, accurate, complete Trade Directory. Such a book, 418 pages, containing the name and address of every florist, nurseryman and seedsman in America, new list of private gardeners and horticultural supply concerns and much other information will be mailed from this office on receipt of \$2.

AMERICAN FLORIST CO.

324 Dearborn St., CHICAGO, ILL.

Dallas, Tex.

TRADE DOWN TO THE INACTIVE SUMMER LEVEL.—STOCK NONE TOO PLENTIFUL.—CANNAS IN FULL BLOOM.—VARIOUS NOTES OF LOCAL AND TRADE INTEREST.

Business is virtually at a standstill, little doing outside of school commencements and funeral work. The stores are making but little showing in the way of window display and the dull season is on in full force. Sweet peas are quite plentiful but carnations and roses are rather scarce. While outdoor stock is doing well, the ground is getting a little dry and a good rain would do much good. Roses and carnations in the fields are looking fine and prospects are good for nice stock for fall planting.

Cannas are blooming finely this season and many displays are to be seen in the parks and private estates. The canna lives out all winter with little or no protection. The fancy sorts such as Italia and Austria, are grand at this writing. Chas. Henderson is a great favorite here and is the best red for this climate, although President Cleveland is largely planted.

The street merchants are selling gardenias "three for a nickel," and nearly everyone you meet has one or more pinned on. There are lots of this flower sold here during the flowering season, and you can get all you want for 50 cents per hundred. There is one consolation, they will soon be a thing of the past for this season.

The planting at the City Park is up to its usual standard and gives great credit to the superintendent, Mr. Dietz. There is a movement on foot for a large park, also for several more small parks, one for each ward. This is something Dallas is deficient in.

Several of the boys are contemplating attending the convention at Asheville in August, but nothing definite as yet. It will depend somewhat on the rates to be had.

LONE STAR.

Washington.

Trade in general is good. Most of the florists are kept busy with commencement exercises, of which quite a number took place last week. Carnations are plentiful and of good size and color. Roses are not so plentiful. Home-grown American Beauties are rather light in color. There are some fine ones used from out of the city. Yuccas and hardy phloxes are coming in handy. A Gude & Brother had a number of decorations for commencement exercises, including Georgetown University, The National College of Pharmacy, National University and N. U. Law department, also for the Georgetown University Debating Society.

P. G.

TROY, N. Y.—John H. Duke has a modern greenhouse at Sycaway. It is 20x100, divided into two sections by a partition. The house and heating apparatus were built by Lord & Burnham. Mr. Duke has 5,000 carnation plants in the field in fine shape.

NICKEL PLATE EXCURSIONS,

TRADE REPORTED AS A GOOD INCREASE OVER LAST YEAR.—NEW RANGE OF HOUSES IN PROSPECT.—CARNATIONS THE PRINCIPAL CROP.

"A marked advance over that of last season." Such was the report obtained by your correspondent from W. M. Deyoe & Company. The tardy spring in no wise checked the sales of bedding stock. Everything sold well, the supply being about equal to the demand. Ground has been cleared and a range of five houses, the combined dimensions of which will be 76x100, will soon be in course of construction. This will make a handsome addition to their already extensive place. A new boiler of sufficient capacity to heat the entire range will be put in. Gas is the fuel used.

It is Mr. Deyoe's intention to devote most of his space to carnations, for besides his retail trade, he ships considerable stock to the wholesale market. They have over 15,000 plants in the field and they look clean and vigorous. Flora Hill, as grown here, is decidedly the best white. Its weakest point, the stem, has certainly improved in this soil. Marquis and Lawson are the leading and only pinks worth growing on the place and Crane is still the leader among scarlets. NOMIS.

RUSHVILLE, ILL.—Miss Effie Pemberton is just starting in the flower and plant business here.

# Geraniums

Lowell, Mass.

BUSINESS WELL MAINTAINED ON WEDDING AND SCHOOL ORDERS.—SUPPLY VERY LARGE.—DEPARTMENT STORE GETS CHEAP CARNATIONS.—NOTES OF A VARIETY OF PERSONAL DOINGS.

Trade continues to hold up remarkably well with an extra spurt now and then, although funeral work is not coming in as fast as it was a while ago. Supply is more than enough to meet the demands. Auratums have made their appearance and fill the bill since longiflorums are on the wane. Smilax is about the only green that is short in supply, for a very large amount has been used the past two weeks for weddings.

The florists of this city will follow the rule of last year and close their stores every Thursday at noon during the month of July and August. It has been rumored that a base ball team will be organized to play on that afternoon.

A grower of carnations not many miles from Lowell, and who makes this his market during the winter, furnished the Bon Marche with 15,000 carnations last Saturday for 25 cents per hundred.

This has been a very busy season for the plantmen; some of them say it goes ahead of last year. Harvey Green has just finished delivering his contract for plants to the city.

C. L. Marshall, who is located next to the Union National Bank, has moved into temporary quarters, to make room for the bank people, who are remodeling their building.

John W. Parker, assistant superintendent at the Edson Cemetery, has resigned to return to his old position as foreman with J. J. McManamon, at Brookside.

Thomas Waterworth has returned to town after being away several months on the estate of F. W. Ayer.

Geo. W. Patten left last Monday for Vermont, on a fishing and hunting trip. A. M.

DOVER, DEL.—The Dover Nurseries have been sold to Harry C. Walker.

KIFT'S PATENT ADJUSTABLE VASE HOLDER

No. 1.—Brass, nickel, 4 feet long, 6 clasps to each rod. Price complete (with green or white tumblers) \$2.25. Price complete (with green or white cornucopia vases) \$2.50. No. 2.—Heavy 4 ft. rod, brass and nicked, with three clasps for 5 to 6-inch pots, each \$1.75.

KIFT'S PATENT Rubber Capped FLOWER TUBES, 1½-inch diameter, per 100, \$3.50. JOSEPH KIFT & SON, 1725 Chesnut St., Phila., Pa.

TRADE FAIRLY ACTIVE FOR THE SEASON.—BUSINESS CHANGES GOING ON.—TRADE ASSOCIATION ELECTS NEW OFFICERS.—PERSONAL DOINGS AND OTHER NOTES.

Business continues fairly good and there is always something doing to consume a large supply of flowers. As the dull season approaches some of the growers are making material changes. F. Ed. Gray, of the Ingleside Nurseries, is removing all his greenhouses from Alhambra to Main and Adams streets, this city. Captain Gray has found it very inconvenient and expensive to grow his decorative plants and cut flowers under glass ten miles away from the store and will save the expense and damage to plants of a twenty mile drive for every decoration by this location.

Miss Ethel Lord has disposed of her remaining interest in the business at 440 South Broadway to Hugh Evans and will hereafter devote her entire attention to growing plants and cut flowers at her Elysian Gardens. Mr. Evans has purchased the entire stock of the Meserve Nursery, at 635 Broadway, and has removed the plants to 440 Broadway, where he now has his space filled to overflowing.

At the last meeting of the Los Angeles Florists' and Nurserymen's Association the following officers were elected: President, A. Campbell Johnson; vice-president, L. P. Edlefson; secretary, John E. Dey; treasurer, Jacob Dietrich; executive committee, Miss Reese, Mrs. R. F. Whitteley, Miss Lord, John Dey and E. F. Rust.

W. A. Peschelt, the landscape gardener and florist, has gone to San Francisco to spend several months.

Morris Goldenson is highly pleased with the business he is doing in his new location.

D. R. Woods is on a long business trip in the east. D. R. W.

### Notes on Fern Growing.

The present is a time of action among plants in general and the ferns are no exception to the rule, for while we find some few ferns that will continue to grow with more or less rapidity throughout the year under favorable conditions, yet the special season for growth in most cases is during the spring and summer. Comparatively few florists grow specimen ferns, with the possible exception of that universal favorite, the Boston fern, but this condition will not always prevail, for with the growth of the conservatory habit among our wealthy people there will gradually arise a greater demand for specimen plants in general and the quiet loveliness of the ferns will appeal to the more cultured taste of the plant-loving public.

That this fact is becoming more apparent is evidenced by the great interest taken in the displays of specimen ferns that are seen at some of our exhibitions of late years and also in the demand that has been created for ferns of larger sizes in the chief cities of our country. The general public must be shown improved plants, just as they have been shown improved flowers, if the florist desires to create a market for such stock, and one of the ways to bring these matters before the public is through the medium of the local exhibition, a method that is admitted to be a good way of advertising at low cost. Some magnificent Boston ferns have been shown by various growers within the past five years, and the easy culture and rapidity of growth that has been proved in the case of this variety may readily be duplicated with some other species.

There was an idea prevalent among growers at one time that in order to grow any fern one had to have a carefully compounded soil of which peat was the foundation, and that to apply stable manure to the roots of a fern was rank heresy, but we grow wiser as the years roll by, and we now discover that these fine Boston ferns, specimen adiantums of several species, and a number of others make the best of progress in just about the same compost that we may grow our show chrysanthemums in. Adiantum Parvense is another fern in the culture of which there has been somewhat of a revolution, or rather in regard to which there has been a wider dissemination of knowledge of late years, for the approved method of growing this fern in pure loam with a goodly quantity of manure was practiced by a few growers fully twenty

years ago, and with just as good results. The chief points in the successful culture of this most beautiful fern are to keep it moving during the growing season, to give it enough to feed upon, to ventilate freely but carefully so as to avoid direct drafts, and to use a little judgment in watering the freshly potted plants. If these points are observed there is no great difficulty in growing a well furnished plant in a 10 inch pan from a young plant in a 2½ inch pot within a year, a sufficiently profitable operation if one has a market for plants of that character.

Another fern that has displayed its merits to the trade of late years is Cibotium Schiedeii, one of the most graceful of the tree ferns, and one that shows its beauty to some extent by the time it is established in a 6-inch pot, and from that time forward is indeed a thing of beauty, whether it be in the florist's window or in the window of his customer, it being a good fern for house purposes.

Other tree ferns will doubtless be taken up by some of our enterprising growers as the probability of a market for them is seen, and some of the dicksonias are among the most likely subjects for experiment, the species of this genus usually possessing fronds of much substance and likely to prove durable under adverse conditions. There may be a possibility of profit in Woodwardia radicans, a cool house fern of strong growth and elegant habit, and having much-divided fronds of good substance. Another advantage in the woodwardia in question is the fact that propagation would be easier than in the case of some of the tree ferns, for this fern not only produces spores but is also to some extent viviparous, young plants frequently appearing quite thickly near the ends of the long drooping fronds.

Cyrtomium falcatum is also a cool house fern that has been used in large quantities in the past for table ferneries, seedling plants in 2 inch and 3-inch pots being used for this purpose, but this being a fern of strong and rapid growth and also evergreen, may be readily gotten up into larger sizes and quite attractive and salable plants by potting up two or three of the small plants together in a 5-inch or 6 inch pot, just as one may do with small plants of the Boston fern late in the season.

Those intending to grow Adiantum cuneatum for cutting from next winter should not now delay planting out the young stock, for not only do these young

plants suffer from starvation when neglected in small pots, but there is also the loss of valuable time if the planting out be postponed. The planting and treatment of this fern were considered only a few weeks ago in these columns, and it is not therefore necessary to refer to it in detail at this time, but it may be remarked that while the plants are still small and do not cover the bench to any great extent some weeding and cultivating with a hand weeder may be required, but after the plants are well started it is best to stir the surface of the soil but little, many of the young roots being quite near the surface and likely to be disturbed by careless stirring of the soil. It is also quite an easy matter to perpetuate the stock from an established bench of *Adiantum cuneatum*, the spores falling on the soil beneath the plants and germinating freely, from whence they may be pricked out into pans or flats as soon as the seedlings are large enough to be handled.

The Boston fern and its various sports or variations will be planted out on the benches in many establishments in greater numbers than ever, this being one of the easiest methods of handling this easy subject and producing large and handsome plants in a short time, but there is a somewhat mistaken idea that is sometimes met with to the effect that a Boston fern that is lifted from a bed will become established in a pot or pan in a week or two. Such a plant may have the appearance of being established, but it is not quite a square deal toward our

the hands of a few specialists nowadays, but there are still some growers and retailers who prefer to sow for themselves, and those who did so during the past winter should now have some stock that is ready for potting off, and the sooner that operation is performed the better. And in connection with the potting of these seedling ferns the suggestion may be offered that it is best not to expose these delicate young growths to the air any longer than is absolutely necessary, to water them in at once after potting and also to protect the young plants from the sun and from drafts until they become established. And unless it may be in the case of some specially choice species that one is desirous of having in single plants it is preferable to pot up the seedling ferns in clusters, thus gaining bushy plants quickly. Those of limited experience in fern culture sometimes fail to understand how readily these dust-like seeds may become mixed, and thus may find fault with their source of supply, when a few minutes' observation would soon prove to them how easy it is for such seeds to be blown from one plant to another or to be carried from one greenhouse to another on the clothing of those employed there or passing through. An example may be cited as follows: In a certain range of houses under my observation no ferns had ever been cultivated, and yet within three years from the time these houses were built I counted no less than twenty-six species of ferns growing in one of them, the spores having been carried from

#### The Dutch Horticultural Society.

At the meeting of the Dutch Horticultural Society, Overveen, near Haarlem, on May 14, the floral committee awarded first-class certificates to *Odontoglossum Hunnewellianum* var. *nigrum* as a rare plant, exhibited by W. C. Baron Van Boetzelaer, Maartensdijk; to *Odontoglossum citrosnm*, from H. C. Hacke, Baarn. Awards of merit were made to *Oncidium Marshallianum* and *Cattleya Mendellii* from H. Horasveld, Baarn; to *Primula elatior* Zwijndrecht's *Gloire* as a new plant from Van Namen Bros., Zwijndrecht. Honorable mention was given to *Odontoglossum Rossii asperum* from H. C. Hacke, Baarn; to *Odontoglossum crispum* from C. J. Vrikkert, Haarlem. A silver gilt medal was awarded to a fine collection of odontoglossums from J. H. Van Vloten, Haarlem. A silver medal went to C. J. Vrikkert, Haarlem, for a collection of orchids. Bronze medals were awarded to the collections of orchids grown in different materials, from J. H. Van Vloten, W. C. Baron Van Boetzelaer, H. Horasveld, J. C. Ballego and C. J. Vrikkert. The committee could not determine which material was the best since all were a success.

#### A Remarkable Cymbidium.

For many years past there has been talk in orchid circles of a scarlet-lipped cymbidium which grew somewhere in the swamps of Madagascar and which had cost the lives of more than one intrepid collector in search of it. When in June, 1892, a plant under the name of *Cymbidium Loise Chaavieri* was shown in London, and secured a botanical certificate it was mistakenly thought the "scarlet" cymbidium had arrived. It had been discovered by Leon Hamblot, in Madagascar, but there was nothing scarlet whatever about its flowers. These were of a yellowish green, with black spots on the petals and blotches of a similar color on the three-lobed, wrinkled lip, the whole flower reminding one forcibly of *Cœlogyne pandurata* owing to the peculiarity of its coloring and markings.

The new cymbidium, however, now under notice is a quite distinct plant. It has been named *C. rhodocheilum* by Mr. Rolfe, of Kew, and now that it has flowered for the first time in cultivation in that establishment, it is unanimously admitted to be one of the most remarkable cymbidiums in cultivation. It has oblong, conical pseudo-bulbs, more or less compressed and about six inches in length. The leathery leaves are two to two and one-half feet long, not more than an inch broad, channeled down the front, and strongly keeled behind. The flower spike springs from the base of the new and leafy pseudo-bulb, and is two feet or more high. It stands quite erect, and carries about twenty flowers. Only about eight or nine of these, however, are open at the same time, and the still unopened buds are remarkable for the exudation of large drops of crystalline nectar at the base.

The flower itself is about four inches across, with oblong, lance-shaped sepals of a soft and pleasing yellowish green without any spots. The petals stand more or less erect, but are broader. They have the same ground color as the sepals but are heavily blotched and dotted with black all over the surface, the blotches being thicker in the center. The lip, however, is the remarkable feature of the flower. It is very large in proportion to the other segments, and has an extraor-

CYMBIDIUM RHODOCHEILUM.

(A new species, never before figured botanically in any journal.)

friend, the retail florist, to send him such stock, for these recently lifted plants often fail in the hands of his customers in the course of a week or two, and in consequence the well-earned reputation of this fine plant may be torn to shinders in that particular locality.

The seedling fern business is largely in

other houses on the clothing of those passing through. W. H. TAPLIN.

AMELIA, O.—Charles Pommert hopes to see a great many florists at his place the day of the July meeting of the Cincinnati Florists' Society there. He promises a good time to all who can attend.

FOR ADMIRAL SAMPSON BY Z. D. BLACKSTONE, WASHINGTON.

FOR LORD PAUNCEFOTE, BY GUDE &amp; BRO., WASHINGTON.

TWO OF THE HANDSOMEST FLORAL DESIGNS OF THE SEASON.

dinary spreading front lobe, broadly obcordate in outline, and of a rich and pleasing rosy-red color with deeper veins radiating from the center to the margins. The side lobes at the base stand erect, one on each side of the bright yellow disk, with purple warts, while at the very base is a raised semi-circular callus of shining ivory white, somewhat similar to the boss in the flower of *Cynoches chlorochilon*.

*Cymbidium rhodocheilum* was introduced from Madagascar by a Belgian collector named Warpur, in the year 1890. One or two plants were sent to Kew. One has now flowered there and enabled me to furnish this description and illustration. A few other plants were put into commerce, but so far they have not flowered, although they are doing well. In its native state this *cymbidium* is invariably found growing on masses of stag's horn fern, *Platyserium Madagascarlense*. It seems to delight in plenty of peat and a very humid atmosphere, but not too much water. Judging by the Kew specimen it is an easy plant to grow if one has just the right kind of house, and it is a great pity that only a few plants of it are known. W.

#### The Coal Strike Versus Florists.

Fortunate is the florist whose greenhouse heating apparatus is equipped with gas, and those who are not so equipped may do well to turn their attention to the heating of their plants with oil, for, as these hot days are upon us, it might be dangerous to the mental equilibrium of the florist, working as he is obliged to work, some of these days, with the temperature up to 120°, to worry over the question of the coal strike. This may be a very serious problem to the florists here in the vicinity of

Scranton, Pa., and to others who depend upon hard coal for heating purposes, as the question of the settlement of the strike looks very grave from this standpoint. The men are prepared for a long struggle. Mr. Mitchell, with his corps of officers is upon the ground here watching every move of the operators, who appear to be very indifferent as to when they resume operations. They have undoubtedly fortified themselves for a long struggle and it looks as though it would be a case of "the survival of the fittest."

Hundreds of florists have made no provision for their winter supply, and many of the smaller florists, buying only in small quantities, possibly may be required to shut down operations if they depend upon hard coal, and who can divine but that the soft coal men may be called out before fall. If so, there would be a wailing among the florists equal to that of the Israelites when they were in the wilderness without food. Already we have heard of florists in this vicinity who had intended increasing their plants to a considerable extent, but the question of coal supply has called a halt upon their projects. These parties already have their glass on hand but are waiting developments.

Those florists who are out of the gas belt would do well to look into the oil heating appliances, and I believe in the end they will find it a cheaper fuel than the use of either hard or soft coal. While the coal strike will have its most serious effect here in the anthracite regions, and before snow flies there will be thousands of hungry men, women and children and much suffering, yet, with all this, general and permanent good will come out of this strike. New devices and schemes will be developed and put into use because of the necessities that these conditions are making. Heating by elec-

tricity and the use of oil as a fuel will take a great stride forward.

Oil is being produced by the millions of gallons, and at some wells is sold as low as 50 cents per barrel. With the proper equipment a barrel of oil will do as much work as two tons of coal, so, here is an opportunity for some ingenious florist to make a fortune in perfecting a device of this kind, else it may be possible that they will have to resort to the old time fuel, wood, for heating purposes.

Many florists have said, and are saying now, "O, these difficulties will be settled before our need of coal." They are looking forward more with hope than with any assurance of these grave matters being settled. To me it is a most serious state of affairs and florists should not allow their interests to be jeopardized with hope, for if fall comes on and no coal is being mined, to what will the florists resort? I do not believe in looking at things with a pessimistic view, but a number of florists were caught without much of a supply in the 1900 strike, which caused many serious countenances over the shortage of supplies. The strikers' idea is to force these stringent necessities and with these necessities will be sure to come an advance in price when coal is again on the market. Much could be said upon this matter, but these lines will serve to call attention to the florists' relation to the condition of affairs and will give many an opportunity to make other provisions for winter in case the strike continues. G. R. CLARK.

CHAMPAIGN, ILL.—Thos. E. Franks will sail July 8 for a summer visit to England.

EMSWORTH, PA.—Mrs. J. F. Zimmerman died June 6, aged 36 years. Mr. Zimmerman is gardener at Dixmont Hospital.

### The Importation of Bay Trees and Palms.

The accompanying illustrations give an idea of the proportions to which the importations of bay trees have grown in the past few years, although this is an exceptional shipment, the largest of which there is any record. It was recently entered by Bobbink & Atkins, of Rutherford, N. J., and a special train of ten cars was made up to convey the consignment from the dock to the nursery. One illustration shows the train, the other the trees themselves, almost 1,500 in all. In addition to this Bobbink & Atkins recently brought from Europe a consignment of palms which amounted to eight carloads.

### The Rose Show at Boston.

The annual rose and strawberry exhibition of the Massachusetts Horticultural Society was held in Horticultural Hall on Thursday and Friday, June 19 and 20. The roses were excellent, much better in fact than has been the case in recent years so far as local exhibitors are concerned. Mr. Walsh, of Wood's Holl, who has put up invincible rose exhibits annually for a number of years, was unable to compete this year, owing to his plants having been badly damaged by a "smoke nuisance." The most prominent exhibitors of roses were J. H. White, Jas. Wheeler, gardener; Miss E. J. Clark, John Ash, gardener; Dr. O. S. Paige, Mrs. E. M. Gill, Peter B. Bradley, A. F. Estabrook, Geo. Barker, gardener; W. J. Clemson, Ed. Powell, gardener, and Mrs. J. L. Gardner, Wm. Thatcher, gardener.

The special Theodore Lyman prizes for twenty-four hardy roses went, first, to J. H. White and, second, to Miss Clark. In the other classes Mr. White secured three first prizes and one second and Miss Clark two firsts and four seconds and her exhibit of Black Hamburg grapes was a prime attraction for visitors. The best single bloom of any variety was adjudged to be Mr. Bradley's Paul Neyron and the second best Dr. Paige's Her Majesty. The stands of 100 bottles each for general display were well filled,

the six premiums being won by Mrs. Gill, Messrs. Clemson, Paige, Mrs. Gardner, Miss Clark and Mr. Bradley respectively. In other classes the prizes were well distributed among the above named exhibitors.

On sweet williams the prizes were won by W. J. Clemson, Mrs. J. L. Gardner and W. E. Coburn. There was a small tank of nymphæas from Miss E. A. Wilkie and large vases of pæonias, foxgloves, delphiniums and other seasonable flowers from various contributors. H. A. Wheeler showed a group of *Amaryllis formosissima* and F. J. Rea received a silver medal for *Campanula persicifolia* Moerheimil, a handsome double, or rather triple flowered variety. George Hollis showed ten of his seedling pæonias, receiving certificates of merit for Maud H. Richardson and Goliath and honorable mention for an unnamed seedling.

Oakes Ames exhibited for the first time a plant of *Cypripedium* × *Y'Mir* var. *Hallii*, with a flower stem two feet high and a pedigree as long as a clothesline. There were two splendid groups of decorative plants from Mrs. J. L. Gardner and E. S. Converse, D. F. Roy, gardener. The contributors to the orchid classes were J. E. Rothwell, E. J. Mitton and H. A. Wheeler. E. S. Converse also staged a fine group of tuberous begonias and Mr. Roy received a certificate of merit for superior cultivation of *Pteris ensiformis* var. *Victoriae*.

Strawberries were up to the usual standard.

### Pennsylvania Horticultural Society.

The usual meeting of the Pennsylvania Horticultural Society was held at Horticultural Hall, Philadelphia, June 17, Edwin Lonsdale presiding. Dr. Henry Skinner, Professor of Entomology, gave an instructive and interesting lecture entitled "Beneficial and Injurious Insects," illustrated by colored lantern slides. The June meeting for some years past has developed into an annual sweet pea exhibition, liberal prizes having been offered by the seedsmen for collections and mixed varieties. We have in the past had excellent displays, but nothing

to equal the range of varieties and quality of exhibits seen at this meeting. These same competitions have developed several expert growers and consistent winners, showing that cultural methods tend toward success rather than localizing the seed crop in a given neighborhood, as Mr. Hutchins suggested in a recent issue of this journal.

The display of Japanese irises, about seventy-five vases, including some thirty varieties, were much admired, and a collection of seedling anthuriums of the *Andræanum* type, covering a range of colors from pure white to Daybreak pink and the varying shades of red. Among other exhibits were well grown gloxinias, vases of Rambler roses and dahlias, also cucumbers and lettuce. The attendance was large and included a number of visitors.

The prize winners were: The Bodine prize for best pair of gloxinias, first to G. McCracken, gardener for Mrs. G. B. Roberts, Bala, Pa.; second to William Robertson, gardener to John W. Pepper, Jenkintown. The Michell prizes for vase of mixed sweet peas, first to Ernest Schreiber, gardener to W. L. Elkins, Ogontz, Pa.; second to R. Carey, gardener to T. Hoyl, Rosemont, Pa. For best collection of sweet peas, first to William Robertson, second to Ernest Schreiber. The Dreer prizes for sweet peas were divided between Wm. Robertson and Ernest Schreiber, the judges being unable to decide between the two exhibits. The prize for Iris *Kämpferi* went to Joseph McGregor, gardener to Edgar Scott, Landsdowne, Pa.

The Dreer premium for All Heart lettuce went to John McCleary, gardener to Wm. Weightmann, Germantown, Pa. Henry A. Dreer and Joseph McGregor received certificates of merit for collection of Japanese irises. Alphonse Pericat, gardener to Mrs. G. B. Wilson, Philadelphia, received a certificate for seedling anthuriums. Special mention went to John McCleary for cucumbers.

The new schedule for the chrysanthemum show just issued bears evidence to the concerted efforts of some of the gardener members of the society. A great

A SPECIAL TRAIN CONVEYING BAY TREES TO THE NURSERIES OF BOBBINK & ATKINS, RUTHERFORD, N. J.

THE RECENT IMPORTATION OF BAY TREES BY BOBBINK &amp; ATKINS, RUTHERFORD, N. J.

many of the regular prizes have been subscribed by business firms and private individuals, and show a desire to have the society in as prosperous a condition financially as when the old hall burned down in 1893. In this connection one member, Thomas Long, gardener to G. W. C. Drexel, Bryn Mawr, secured subscriptions amounting to over \$300.

FRANCIS CANNING.

#### The Newport Rose Show.

The Newport Horticultural Society held its annual rose and strawberry show at Odd Fellows Hall, Newport, Tuesday and Wednesday, June 24 and 25. The date was rather early for a full display and the exhibits were not as extensive as has frequently been the case, but the quality of the roses was excellent. There was much interest manifested, both by the visitors, the exhibitors and their gardeners.

The principal trophy was the Mrs. Burke-Roche silver cup for the best display of roses arranged for effect. This was won by H. Perry Belmont, W. Barth, gardener, with a group mainly composed of American Beauty and Bridesmaids. Second prize went to Mrs. Robert Goelet, Calib Robertson, gardener; third to Mrs. Cornelius Vanderbilt, Jr., Hugh Williamson, gardener.

On other rose classes Mr. Belmont won one first and one second, Mrs. Goelet, three firsts; Mrs. Vanderbilt, one first and one second; Miss E. J. Clark, John Ash, gardener, one first and one second; Mrs. Arthur Beebe, James Nichol, gardener, one first and three seconds; J. J. Van Alen, Richard Gardener, gardener, two firsts.

Prizes for gardeners' assistants were won as follows: Basket of flowers, first to Thomas Fieldhouse, assistant to A. Griffin; second, to A. Jenkins, assistant to A. Meikle; third, to Samuel Williams, assistant to W. Barth. Corsage bouquet, first, to John Finn, with C. Robertson; second, to Thomas Fieldhouse. J. J. Van Alen showed a group of *Cattleya gigas*, well grown and well arranged, for which a special prize was given. Commodore E. T. Gerry, A. Griffin, gardener, was

represented by two showy specimens of *Clerodendron fallax* and by a fine collection of Spanish irises. Miss Helen Mason, John Falkenholm, gardener, showed campanulas and foxgloves. Miss Clark staged an exceptionally meritorious group of hothouse fruit.

There was no competition for the S. A. F. medals for new plants.

It is expected that the show at the Casino July 21 and 22 will be a record breaker.

## CHRYSANTHEMUMS.

### SPECIMEN PLANTS.

Our specimen chrysanthemums are going into 10-inch and 12-inch pots this week. As our soil this season is rather heavy, we shall pot them only moderately firm and shall leave about half an inch more than the usual space, for a top dressing later. The pots are clean. If new they should be soaked well before being used. They are well drained. Over the crocks we place a layer of crushed charcoal. We prefer to use it in this way to mixing with the soil. It better answers the purpose for which it is intended, as a filter. We see that the plants are thoroughly watered the day before potting, and if by any chance we find the balls dry, they are soaked. By doing this it is not necessary to water more than to settle the soil, for a day or two, and then sparingly, until root action is well in evidence.

Our soil is moderately rich, but we have been in the habit of mixing, say, a 5-inch pot of Clay's fertilizer with a barrow-load of soil at potting time. Bowker's greenhouse chemicals are equally good, but we should be careful about using any artificial manure we are not well acquainted with. We object to bone meal at potting time. It is an excellent manure, if mixed some time previously, and allowed to heat up and cool again before using.

Our plants for decorative purposes, now in 5-inch pots, will go into "sevens" and "eights" in a week or two. They are stopped somewhat, but in general we allow them a natural growth. Such plants have a better effect when not too

set in form. The Mizpahs in pink, white and yellow; Midge, Mrs. Mitchell, a gem of a dwarf Chinese incurved; Garza, white, anemone; Savannah and Antonius, yellow pompon anemones; Garda and Firefly, a small red anemone; Golden Ball and Crimson King make naturally dwarf bushy plants which need little or no pinching, or staking, and are indispensable for the front line.

Some stopping will be necessary for a few weeks yet and runaway shoots must be looked after well into August. Thrip and the red mite make havoc if allowed to get hold and must be watched carefully. A plentiful use of water will keep them down, but we must spray occasionally with some tobacco compound. Duplicates may be planted out. Some of these will make better plants than those kept in pots and may be taken up later.

T. D. HATFIELD.

### NOTES ON SEASONABLE TREATMENT.

After planting is done the principal work connected with the culture of chrysanthemums for a little while will be to keep the weeds down. They will begin to come up quite thickly in a very little time and should be removed as soon as large enough to handle. This should be done thoroughly, so that after the first weeding or so there will be very little trouble from weeds. The beds can then be leveled off and made as even as possible.

Extra care will be necessary in watering your plants until they have commenced to take hold of the soil and as a general thing after once being well watered in at planting time they will get enough water from the syringing for the first two weeks, except in places at the edge of the bench where the soil dries out much faster.

Some varieties soon begin to branch out and all surplus shoots must be removed without delay to give the main one, which is being reserved to do the work, all the strength possible.

We are having moist hot weather just now, which seems to make the black aphids thrive exceedingly. They need attention at once or in a little while they

get to be more than troublesome. The most effective remedy I have found is to take a large-sized watering can, fill it as full as possible with tobacco stems, covering them with water, and let it stand about twenty-four hours. The strength will then be thoroughly drawn out of the stems. Then strain the liquid and apply with a sprayer. If the aphides are very thick it will take two or three applications to remove them, after which we spray our plants every week as a preventive. It is safest to do the spraying after the sun has left the house, not that we have ever found it to burn the young shoots any but we like to be on the safe side.

If it is your intention to grow some single-stemmed stock or some late plants, the cuttings should be put into the sand right away. They will need clean, sharp sand, with ample watering. At this season a north-side propagating house is the best place in which to root them.

C. W. JOHNSON.

#### American Art Industries.

The third of a series of illustrated articles under the above heading appeared in the *New York Tribune* June 15 and was devoted to the manufacture of the modern conservatory, being a description of the development of that industry in the hands of the Lord & Burnham Company. It said that the business was founded by Frederick A. Lord, who was building greenhouses as early as 1856, and in which year he invented the ventilating apparatus now in use. But it was not until 1881 that the modern greenhouse made its appearance, that being the year in which the first iron-frame structure was erected, at Irvington, N. Y., for the late Jay Gould. The article on greenhouse construction in Bailey's *Cyclopedia of American Horticulture* was written by W. Addison Burnham, son-in-law of the founder of the firm, who came into the business in 1872 and is now president of the company.

### WITH THE GROWERS.

N. ZWEIFEL, MILWAUKEE, WIS.

The most thoroughly modern establishment producing cut flowers for the Milwaukee market is the new range of carnation houses built last season by N. Zweifel, at North Milwaukee, about seven miles from the city. Here this enterprising grower has three houses 28x200 built on the plan approved by the most successful and the largest growers in the country. They are such houses as are being added to the big ranges about Chicago and this is doubtless the embryo from which a very large establishment will grow, for the first season's success has been so satisfactory that Mr. Zweifel is now proceeding with the erection of one more house of the same dimensions.

The houses are high, light and airy, being built with the Garland iron gutter and no partition walls. The glass used is 20x24, and excellent ventilation is provided. Each house has four benches, the heating system being admirably constructed. A Kroeschell hot water boiler does the work, the main supply pipe and the return being down the center crossway of the range. Under each bench there are four 2-inch pipes, one flow and three returns. So well does the water circulate that the foreman states that all last winter one of the returns was cut out, being unnecessary.

The entire range is devoted to carna-

tions, and the results achieved in the first season are particularly good in view of the fact that the stock was planted late and that the soil in the benches was taken directly from the field, without the addition of manure or any other fertilizer. Neither has liquid food been supplied during the winter. With the use of the compost now prepared for next fall's benching, much better results should be secured, although one could find little cause for complaint in a cut of 19,000 blooms in the first week of June.

The varieties grown are G. H. Crane, Flora Hill, Genevieve Lord, Guardian Angel, Estelle, Triumph, Evanston, Norway, Armaziudy, Melba and Peru. The latter will be dropped next year, as the few plants on trial have failed thus far to produce any perfect flowers. Melba

FRED W. BARTELDES AT MINNEAPOLIS.

(From the *Minneapolis Journal*)

is a good pink but it is hardly up to the present day requirements. Crane has given good results, the cut being heavy and the plants showing very little trace of stem rot. At least in health Crane has the advantage of Estelle, the latter being badly affected with rust; otherwise Estelle has the preference and it will be more largely planted next year. Hill has been the best white this season but a part of a bench of Norway has given such good results that 4,000 plants will be housed this fall. Of the pinks Guardian Angel has given a heavy yield of first-class flowers and of the light pinks Genevieve Lord has the best record to date. Evanston and Morning Glory are not in the running and Triumph does not show up in comparison with the others.

Mr. Zweifel has a large field of young stock in very fine shape for next season. He has an old range of glass at the

corner of Fourteenth and Groeling streets where he produces pot plants and miscellaneous stock for his retail trade.

#### Commercial Floriculture in Italy.

Peter Crovetto, who has spent several years in American commercial floriculture, now located in Chiavari, Italy, writes to a friend in Tewkesbury, Mass., so entertainingly of what he has observed in that distant country that we have obtained permission to publish the following abstract of his letter:

"The principal flowers here are roses, which are grown as are currants and similar stock in America. In summer they get rested naturally by the dry spell, often of five, six or seven months' duration. From the latter part of August until October 20 they are carefully pruned, cultivated and mulched. The first rain generally comes in September and after that they start to grow as though spring was approaching. The first flowers come in November but the full crop is generally between December 1 and January 15, when the Bordighera, Nice and Cannes roses come in full blaze and last until the first of March, after which the flowers are generally poor, but by that time so many bulbs are flowering that the roses are not missed.

"Next in importance to the rose and camellia are the carnations. These are planted out in like manner but they being very particular about soil and it being next to impossible to obtain sod here, we must work the soil to a depth of more than three feet to turn up the deep subsoil, otherwise the plants get the stem-rot, fully ninety per cent of them. The result of this hard work is that we get good carnation plants and the culture is much the same as in America when grown in the field. All colors are grown, the scarcest being good pink sorts. Every flower bursts the calyx, but the blooms are so nice and large and so double that the bursting is hardly noticeable. I have several American varieties and the most of them burst also but on account of their long calyxes these flowers are useless, while ours are short in calyx and when open hold the petals well together without appearing ragged. Flora Hill splits eighty per cent, Crocker fifty, White Cloud fifty, Maceo thirty and Joost bursts but seldom. Crane is too single and light in color. Crocker is fine in color, form and tissue and is much liked. Over here nobody thinks of dis-budding carnations. The blooms are picked short and all the buds allowed to come along, as was done in America twelve or fifteen years ago.

"We have, besides, one class of carnations, different from all the others called the 'big carnations.' They are fully five to seven inches in diameter and, notwithstanding that they are all bursters, I think they could be made to pay in America, for the colors are very fine and they are preferred to anything else by American or English travelers. They are grown by but a few of the best growers, for they are difficult and require much care. They bloom all winter alongside the American varieties. They are grown in 7-inch pots and kept well staked.

"Camellias are grown here very extensively. They are shipped all over Germany, North Italy, Switzerland, Austria and largely in Russia, for they have the quality of lasting twelve or fifteen days. Stocks are a staple, very fine, in all shades but mostly white and pink, also daffodils, many anemones, daisies, the large white and yellow ones; callas and gladioli.

Freesia is simply a weed, but all of the yellow variety. Acacia is a stand-by crop and is sold by tons. We have acacias fifteen to fifty feet high, in many species, such as *semperflorens*, *dealbata*, *cultriformis*, *microphylla*, *floribunda* and six or eight others. Violets are abundant and much cheaper than in America.

Chrysanthemums are grown by everybody but few grow them well. Last October at the Geneva exhibition many very large and beautiful blooms were shown, but only by four or five growers out of the many hundreds who grow flowers at Geneva. I have planted 3,000 chrysanthemums and have more to plant yet and my brother will plant about as many. Of these 750 are Modesto, 550 Hill, our best early pink; 550 Robinson, 550 Soliel d' Octobre, 200 Carnot, 200 Warren, 150 Niveus, and about fifteen other varieties. We are short on late and middle season pink.

"I have tried three years to sell sweet peas. The people here say peas are only for eating! They grow and bloom splendidly but cannot be sold. A lot of annuals are grown here, such as candytult, gypsophila, mignonette, mysotis and so forth, also cyclamens, ericas, gardenias and epacris, all outside. A geranium when planted in the garden is there for all time and a heliotrope will last for fifty years.

One of my brothers has planted 15,000 *Clivia miniata* of the finest strain; he sends the blooms to Berlin. We are very anxious now about the new tariff that Kaiser William wants to put on flowers and mad with our rotten railroad."

#### Chicago.

MARKET BARE OF ROSES.—SUPPLIES SHORTEN REMARKABLY.—BIG MONEY FOR POOR STOCK.—CARNATIONS ALSO UNDER THE DEMAND—MANY SHIPPING ORDERS GO UNFILLED.—BUYERS DISAPPOINTED.—PÆONIA SEASON IS OVER.—FLOWERS FILL IN NICELY AND AVERAGE GOOD RETURNS—ARRANGEMENTS FOR ASHEVILLE TRIP.—VARIOUS NOTES.

It is remarkable the way the rose cuts shortened up at the beginning of this week. Where a few days before found almost unwieldy quantities in market, Monday saw the wholesalers unable to fill orders with shipable material and local buyers paying \$2 and \$3 per hundred for trash which the cheapest Greek would not have looked at before the hot weather came. The sudden diminution of receipts was probably due principally to the throwing out of stock preparatory to replanting and to the dark, cool weather which prevailed for a few days. Carnations, too, are off grade, getting small, soft and bedraggled. The receipts are still fairly large, but they will not last long. Trade has been active this week and local buyers have had to skirmish for supplies, while out of town people have experienced considerable difficulty in getting orders filled for either roses or carnations, which has resulted in some complaint, for those not in touch with the market could not understand the radical change in the situation. The pæonia has been a saving clause under the circumstances. So far as reported no one has been obliged to refuse an order for this item, although it is expected the supplies will be pretty well at an end by to night. The pæonia has done well in this market this season. It has found a ready sale and, taking the receipts as a whole, the returns have been above the ordinary. Now that they are gone, there may be more of a market for the

Photo by Elgin R. Shepard.  
MEMBERS AND FRIENDS AT THE ANNUAL CONVENTION OF THE AMERICAN SEED TRADE ASSOCIATION, MINNEAPOLIS, MINN., JUNE 24-26, 1902.

summer stock, gladioli, auratum and specious lilies and such things, which have not moved any too briskly as yet. There is plenty of smilax now on hand, and more asparagus, but little adiantum. While there will be largely increased supplies of the two former greens next season, few growers are giving attention to adiantums.

Kreiting does all the work for the Washington Park Club and it therefore devolves upon him to make the floral saddle which is each year placed upon the Derby winner. Last week's piece is shown on this page. The body of the design is galax leaves, the edges of sweet peas, the seat of roses, the lettering and stirrups of carnations. On one side was "1902" and on the other "W," the latter standing for "winner," not Wyeth; the shadow of coming events did not fall in Walter's workroom.

The Chicago Florists' Club will go to Asheville via the Big Four, the Queen & Crescent and the Southern railway, with a stop-off at Cincinnati. The plans have all been laid and E. F. Winterson, of McKellar & Winterson, will book sleeping reservations in the special cars.

F. A. Chapman, for several years foreman for Poehlmann Bros., and for some time in charge of a rose section for Bassett & Washburn, has taken the management of the A. C. Brown greenhouses at Springfield, Ill.

As a rule the wholesalers found it the best June on record. There was good business right along and most houses report substantial increases in the total of sales as compared with last year.

Phil. Hauswirth returned yesterday from Mt. Clemens, Mich., where he went Tuesday to install Mrs. Hauswirth for a stay until after the Fourth. She hopes to be rid of her rheumatism there.

There are more window boxes in use this year than ever before. The Lexington Hotel has some fine ones, planted for Samuelson, and the Chicago Club also makes a nice down town show.

John Reitmeyer went out to Joliet Tuesday to begin the construction of the two new houses for the Thompson Carnation Company. It is expected to have them finished in ten days.

Friedman is showing the Eldredge B carnation in his window, where it attracts considerable attention for its odd coloring, but it is not in great demand.

There were a great many florists mixed up in the 65,000 people at the Derby last Saturday and it is surprising how many of them were on the right horse.

Wietor Brothers are beginning to cut from their summer roses, Kaiserin and La France among them. They have planted four houses of Ivory.

There are fine candidum lilies in the market. Retailers use them for window display, and they come in handy for funeral work.

Max. Ringier, of E. C. Amling's staff, welcomed a baby girl into his home on Wednesday.

N. J. Wietor has been at Woodruff, Wis., this week, fishing.

Early closing will be the rule, beginning July 1.

Visitors: J. H. Vesey, of Kansas City, Mo., enroute to Fort Wayne, Ind.; Fred. Hall, Montclair, Col.

CAMDEN, N. J.—C. W. Turnley has been kept away from business recently by sickness in the family. He says the spring trade was highly satisfactory.

### New York.

TRADE TAKES ON RENEWED ACTIVITY AND STOCK MOVES WELL—PRICES STIFFEN.—PLENTRY OF MISCELLANEOUS STOCK.—ROSE SOCIETY PLANS SPRING SHOW AND MEDAL AWARDS.—WEIR GETS A MEMENTO FOR COOLNESS—VARIOUS NOTES.

All varieties of cut flower stock are moving better this week. School closings and steamer trade have developed a demand for the past few days which takes all the really good material. The supply of roses is diminishing. Brides are in reduced supply and average better in price than Bridesmaids. American Beauty brings advanced prices, the best being worth \$25 per hundred; from this they range down to 50 cents per hundred for the "shorts." Red roses, such as Liberty and Meteor, are selling well at figures considerably above those of last week. Kaiserin, Testout and Car-

FLORAL SADDLE FOR DERBY WINNER.

not, the summer favorites, are in good shape and find a willing market. Carnations have risen, also, in sympathy with the general market and are faring better than for some time past. Sweet peas are very plentiful and cheap. Lily of the valley is in fair supply, with prices varying according to demand. Asparagus Sprenger, smilax and adiantum are overstocked, while gladioli, Lilium auratum, centaureas, candytuft and so forth are being received in abundance.

At a meeting of members of the American Rose Society held last Friday at the residence of President Newbold in New York city, it was decided to accept the formal invitation extended by the Pennsylvania Horticultural Society to hold the next meeting and exhibition at Philadelphia in connection with the spring show of 1903. It was voted that gold and silver medals be offered for new roses to be shown at Philadelphia and New York next spring and at Chicago in the coming fall. To get the gold medal a variety must score ninety-five points and for the silver medal eighty-five points. Returns of all scores must be made to

the secretary before the awards will be confirmed and only one medal can be awarded to any one rose.

James Welr has been presented with a silver cigarette case, suitably engraved, by the committee which had in charge the Brooklyn Heights Assembly at the Academy of Music on January 7, last, in recognition of Mr. Welr's coolness and promptness in extinguishing a fire which had started among the hall drapings, from a photographer's flashlight.

Miss Emma Schroeder, sister of Mrs. A. H. Langjahr, and for the past year bookkeeper at Mr. Langjahr's Brooklyn wholesale house, died July 24, aged 22 years. She was an industrious, capable young lady and a general favorite.

### St. Louis.

CLUB HOLDS ITS JUNE MEETING IN ILLINOIS.—GOOD PARTY AT BELLEVILLE—MUCH DOING OF INTEREST—AMMANN IS BUILDING—STOCK SHORTENS UP DECIDEDLY.—JOTTINGS OF WHAT THE GROWERS ARE DOING.

The June meeting of the St. Louis Florists' Club was held in Belleville, Ill., with twenty-one members and several visitors present. The meeting was opened by Mayor John B. Hay, who made a short speech. After this the regular order of business was carried out. The World's Fair business came up again and it was decided to drop it entirely. What money has been paid in on the second assessment will be refunded. The position of trustee that had been declared vacant on account of the retirement of Mr. Guy, of Belleville, was filled by the selection of Wm. Adel to serve the rest of the term. J. J. Benke was appointed to see what terms can be had by the florists who wish to attend the meeting of the S. A. F. at Asheville. Mr. Fleming, of the L. & N., stated that the fare would be one fare for the round trip. Carew Sanders gave the club a very interesting talk about his journey through California about the first of the year. Dr. A. S. Halstead was given a vote of thanks for entertaining the club. It was decided to hold a picnic some time the latter part of July at Priester's Park, midway between Belleville and East St. Louis. The next meeting will be held at the home of J. W. Dunford, at the St. Louis Carnation Company's place. The members are all asked to be at Delmar Garden at 1 p. m. to take the car which Mr. Dunford will meet with teams.

J. F. Ammann, of Edwardsville, has asked the club to hold its August meeting at his place. He will have his range of houses looking fine by that time he says. He has about 10,000 square feet of glass yet to put up on his new range and at present has only the benches finished. He has planted his roses out in the benches and will build over them. He tore down 12,000 square feet of glass this spring and when he has this new addition finished he will have 25,000 square feet in almost new houses.

The market has changed considerably in the quantity of stock sent in and prices have risen all along the line. Nothing that can be called fancy is to be had. This remarkable change is due to the very cold spell that we had the latter part of last week and also to dark weather. A very fine rain has fallen, which has done outdoor stock great good. A few gladioli are coming in. Retail business is reported as good.

A. S. Halstead's carnations in the field are coming on nicely and will make fine plants by the time that they are to be

lifted. His stock geraniums are growing strongly and are planted out in groups. The carnations in the houses are still in flower, especially his white seedling and Marquis.

E. W. Guy is planting chrysanthemums. He has several benches of roses that are still doing well and also some in solid beds. His carnations are in good flower. Mr. Guy intends to take down two of his houses that are three-quarter span and rebuild them even-span.

Mr. and Mrs. H. G. Berning are away on a trip up the lakes. Last week someone drove off with one of Mr. Berning's teams. He recovered the horse and wagon but the harness is gone. R. J. M.

#### Philadelphia.

CUTS GO OFF JUST AS DEMAND CEASES.—LITTLE DOING AND FEW GOOD FLOWERS IN MARKET.—SWEET PEAS SELL AS WELL AS ANYTHING.—THE PRICES.—PERSONAL NOTES.

The summer dullness has set in; the "last of the season" weddings and commencements have shown with more or less brilliancy and now, so to speak, we are "up against it" for the next two months. The growers seem to have timed the demand almost to a day, as for the past week it has been very difficult to get flowers of any kind that were at all presentable. Beauties and tea roses are off color, and of the smallest size. Carnations are also on the same list. The weather has been cool the past week and the conditions apparently favorable, but for some reason the crops all seem to have failed and nothing choice can be looked for until the next season's stocks commence to flower. The first of these is a house of Kaiserin from which John Burton is cutting some good buds. Sweet peas are still good and sell as well as anything. Jos. Kift, of Westchester, has been sending in some nice auratum, the first of the season. It is hardly worth while to quote prices, as there is no standard. However, \$1 to \$2 per dozen is asked for special Beauties, while teas of the same grade sell at from \$4 to \$8 per hundred. Sweet peas are 25 cents to 35 cents per hundred, lily of the valley \$3 to \$4, as usual.

Robert Craig has returned from the seashore. The trip seems to have braeed him up considerably.

John A. Ruppert, of Dreer's was married to Miss Mary A. Ebert on June 25.

The July meeting of the club next Tuesday evening will be all about Asheville.

K.

#### Boston.

FARQUHARS SEND THEIR NEW ROSE TO LONDON EXHIBITION.—PLANT IN A GLASS CASE ON STEAMER DECK.—VARIOUS LOCAL NOTES.

R. & J. Farquhar & Company exhibited the original plant of their new rose, The Farquhar, at the coronation rose show at London, England, this week. The show was scheduled to be held June 24 and the plant was shipped June 10, from Boston, in a large glass case on the deck of the Cunarder Saxonia. The flower buds were then almost ready to open and it was expected that the plant would be in good bloom for the exhibition. William Donald went with the rose, to care for it and exhibit it.

A society for the protection of native plants has been organized in Boston for the purpose, especially, of awakening public sentiment against the wholesale destruction of wild flowers and plants. It

has the endorsement of the Massachusetts Horticultural Society and the New England Botanical Club. Mrs. Asa Gray is honorary president.

Ed. Welch has recovered sufficiently to appear at his accustomed post once more.

Ed. Hatch is booked to sail for England on July 8.

Visitors: J. Henry Small, Jr., Washington; Wm. Griffin, Thompson, Conn.

#### Cleveland.

BUSY SEASON CLOSURES WITH THE LAST GRADUATION AND JUNE WEDDING.—BUSINESS FAR AHEAD OF LAST YEAR.—GOOD STOCK FOR DECORATIONS.—PERSONAL AND OTHER DOINGS OF LOCAL INTEREST.

Business is slackening up perceptibly. School commencements are about over and this week will wind up the weddings. The weddings the past month were both numerous and elaborate. Flowers and plants were used extensively. The retailers are unanimous in their verdict that the business the past month surpassed that of the same period of last year. The changeable weather has had its effect on stock, especially roses. Mildew is the rule everywhere, and quality, with few exceptions, is at a low ebb. Carnations, owing to the cool weather, are holding out well. Some very good ones are to be seen, especially Ethel Crocker, Genevieve Lord, Melba and Scott. These four varieties seem to be the old stand-bys. The difficulty experienced in other localities with Ethel Crocker is not much in evidence here, where it is considered one of the bread and butter kind. Prosperity does not pay for the wire it takes to hold it up and will be discarded. Marquis will share the same fate, owing to its tendency to go to sleep a few hours after being cut.

Sweet peas are here in abundance and sell well, especially Blanche Ferry, which is very popular for wedding decorations. Crimson Rambler is in fine shape and used extensively for the same purpose. Sprays from three to six feet long are used with charming effect. English irises are on the market and their striking colors blend harmoniously with the other flowers in the show windows. Their consins, the Spanish irises, are gone.

The club meeting was well attended last Monday evening. The outing committee, not having been able to decide upon a place, asked and was granted an extension of time for two weeks wherein to make their report.

Mrs. G. M. Naumann, wife of the popular east side florist, started on Tuesday for a visit to the Fatherland. Her sojourn there will last until September. The craft wish her bon voyage.

The Essex Greenhouses, Coe Ridge, J. G. Schman, foreman, report all their rose planting done. Another house of Beauties was added this season.

Chrysanthemum planting is being pushed and the middle of July will see all planted.

R. Hoffman will add another house 20x100 to his plant.

We could do very nicely with a little less rain. ECHO.

NEW HAVEN, CONN.—The annual exhibition of the New Haven Horticultural Society is scheduled to take place November 11 to 13.

MEXICO, MO.—This has been an excellent season and C. C. Wonneman is increasing his facilities by two additional houses 28x75.

#### Meetings of Florists' Clubs.

The accompanying list gives the cities in which there are active florists' clubs. Following the name of the club is the place of meeting, the day of meeting, the hour and the name and address of the secretary:

BALTIMORE, MD.—Gardeners' Club of Baltimore, Royal Arcanum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1440 Delaware avenue, Buffalo.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

IF "Ex Ray" will send in his real name  
and address, we can advise him with  
regard to book.

WINDOW glass prices were advanced  
five per cent last week and another rise is  
shortly to be anticipated.

PROF. L. H. BAILEY believes there is a  
field for the grower of the old favorites  
of our grandmother's garden, of most of  
which there are now improved forms.

THE American Rose Society has decided  
to hold its exhibition for the spring of  
1903 at Philadelphia, in conjunction  
with the spring show of the Pennsylv-  
ania Horticultural Society.

WITH a chapter on "Achievements"  
Edward J. Wickson, of the University of  
California, concludes a four part paper on  
the life and work of Luther Burbank,  
published in *Sunset*, of San Francisco.  
The improvement of the gladiolus, the  
ennoblement of the amaryllis, the work  
with the crinum, calla, canna and many  
other subjects is described.

### Special Notice.

The national anniversary, July 4, falls  
on Friday. In order that our subscribers  
may receive their paper at the usual time  
it is necessary that the AMERICAN FLORIST  
go to press on Thursday night, twenty-  
four hours earlier than usual. Corre-  
spondents and advertisers will please  
take note.

### To The Florists of New England.

The rate of one fare for the round trip  
from Washington to Asheville and return  
makes it possible for those attending the  
convention from the New England states  
to use local excursion tickets for that  
portion of the trip this side of Washing-  
ton, thus getting the desirable privilege  
of stopping off at New York and Wash-  
ington at a cost about equal to the one  
and one-third fare with limitation to  
continuous passage, which is the best  
concession that the New England rail-  
roads are willing to make. I would like  
to hear from any in this section who  
think of making the trip to Asheville and  
shall be glad to furnish all desired  
information regarding transportation,  
and so forth, to such applicants. It is  
desirable that the attendance from the  
north should be as large as possible and  
those who embrace this opportunity to  
visit the beautiful "land of the sky" in  
congenial company and at a low cost  
will not regret it. Please address  
WM. J. STEWART, 79 Milk St., Boston.

### Yes, It Certainly Does.

AM. FLORIST Co.—Your paper cer-  
tainly does bring orders from good,  
reliable firms.  
Cleveland. F. R. WILLIAMS Co.

### To Asheville.

Arrangements have been made whereby  
a special train will leave Cincinnati over  
the Queen & Crescent route at 2 p. m.,  
on August 18, arriving at Asheville, N.  
C., at 7:30 a. m. on the opening day of  
the S. A. F. convention. It is hoped and  
expected that the eastern contingents,  
from Pittsburg, Buffalo, Rochester, Can-  
ada, Cleveland, from the west and north-  
west, will come together at Cincinnati  
and take this train.

The special train is so timed as to take  
the party through the beautiful French  
Broad by daylight, affording a view of  
some of the grandest scenery in America,  
where Mr. Deake asserts the party may  
"tickle the angels' feet" to their hearts'  
content any time after 6 a. m.

The railroad fare is based on a fare  
and one-third north of Cincinnati and  
one fare for the round trip for that por-  
tion of the journey south of the Ohio  
river.

The Chicago Florists' Club has  
arranged to leave Chicago over the Big  
Four on Sunday evening, August 17,  
arriving at Cincinnati Monday morning,  
where the party will have a few hours  
for sight seeing and hand-shaking with  
arriving delegations prior to the depart-  
ure of the special train. The Chicago  
club will have special sleepers, buffet  
cars, well stocked all the way through,  
and all the usual accessories assure the  
best of attention to the creature com-  
forts. It is expected that all the mem-  
bers from the west will take this train.  
Sleeping car berths may be engaged by  
addressing E. F. Winterson, president of  
the Chicago Florists' Club, 45 Wabash  
avenue, or the AMERICAN FLORIST will  
attend to such details on request from  
those of its friends and subscribers who  
will take this glorious trip.

### Building A Propagating Bench.

ED. AM. FLORIST:—I shall be pleased to  
read in your columns a description of the  
methods of constructing a propagating  
bench for roses and carnations.

J. H. W.

The propagating bench should be three,  
or at most three and one-half feet wide,  
if single, or six feet if double, and should  
stand about three feet high to the top of  
the sides. A rather expensive, but a  
durable and satisfactory bench can be  
constructed from angle iron and bench  
tile. Gas pipe or wooden supports may  
be used if a cheaper bench is desired.  
They should not be more than three feet  
apart, owing to the weight of the wet  
sand. For the bottom of the bench,  
boards laid one-half inch apart may be  
used, or 2x6 joists may be placed at the  
edges and middle of the bench, with flat  
tile or roofing slate between. The bench  
should be about five inches deep inside.  
In filling it place one inch of sphagnum  
on the bottom, and cover with four  
inches of clean, sharp sand, of medium  
fineness. To furnish bottom heat, four  
1½-inch pipes should be used for steam  
and the same number of 2-inch pipes for  
hot water for a narrow bench, or twice  
as many for a double one. For carnations  
reduce the number of pipes one-fourth.

L. R. TAFT.

### The Use of Soft Coal.

For several years, Wm. H. Elliott, of  
Brighton, Mass., has been contesting an  
action for damages and a plea for an  
injunction on the part of one J. R. Down-  
ing, an iceman, who claimed that the  
use of soft coal under Mr. Elliott's green-  
house boilers so polluted an adjoining  
pond, from which the plaintiff was  
accustomed to cut ice in winter, that the  
ice was no longer fit for use. The first  
hearing resulted in a judgment for  
\$2,451 but Mr. Elliott carried the case  
up and on June 19 the full bench of the  
Supreme Court, at Boston, reversed the  
original finding and denied the prayer for  
an injunction on the ground that "The  
defendant's business is a lawful one; he  
has a right to use his premises in any  
manner that will not interfere with the  
legal rights of others; it cannot be said  
that the use of soft coal for the purpose  
of generating steam of itself constitutes  
a nuisance, and there was nothing to  
show that his business was not properly  
carried on, and that the locality was  
improper."

### Greenhouse Building.

Oil City, Pa.—W. M. Deyoe & Co., five  
houses 20x76.

Springfield, Mass.—Mark Aitken, two  
houses 10x50.

Omaha, Neb.—Hess & Swoboda, two  
houses 18x200. Ederer & Son, two  
houses 18x125.

St. Paul, Minn.—Holm & Olson, range  
of houses. L. L. May & Co., range of  
houses.

New Carlisle, Pa.—W. T. & F. P. Butz,  
range of houses.

Lansdowne, Pa.—T. E. Bartram, one  
house.

Owensboro, Ky.—Mrs. J. W. Bishop,  
one house.

Detroit, Mich.—J. F. Sullivan, house  
24x100.

Kirkwood, Mo.—H. & H. Gross, range  
of houses. F. W. Ude, Jr., one house.

Vashon, Wash.—H. Harrington Com-  
pany, five houses 18x150.

Hamilton, Ont.—Walter Holt, house  
18x100.

Philadelphia, Pa.—Wm. Berger one  
house.

Seattle, Wash.—Bodie Bros., range of  
houses. Seattle Floral Company, four  
houses. Washington Floral Company,  
house 18x110.

### To Raise Egg Plants.

ED. AM. FLORIST:—What is the proper  
course of procedure to raise egg plants  
from seed. We have tried it for several  
years and failed each time. W. T. G.

When sowing seed of many plants, it is  
sometimes necessary to inquire whether  
the plants are indigenous to a temperate  
or tropical climate. In growing egg  
plants it will soon become evident that a  
warm temperature is necessary, cold and  
sudden changes being fatal to them.  
Acting upon this knowledge gardeners  
either choose a warm greenhouse in  
which to sow their seed or else adopt the  
hotbed system. In either case the end of  
March will prove a satisfactory time to  
sow the seed, as the object will be to  
have strong plants for planting out  
when settled warm weather is in order,  
which in Pennsylvania is usually about  
the middle of June. To accomplish this  
if grown in the greenhouse, sow in flats  
and cover lightly, in a temperature of not  
less than 60°. As soon as large enough  
pot into small pots, and from this time

keep them constantly growing by potting on at intervals. A daily syringing and moist atmosphere will hold thrip and red spider in check. Strong plants in 5-inch or 6-inch pots may be secured by this method, transplanting into well prepared hills three feet apart in the garden. This operation will hardly be felt by the pot-grown plants. When growing them in the hotbed, transplanting in the earlier stages, thus gradually hardening off and choosing a dull day for transplanting to the garden will be a sufficient outline to those familiar with the hotbed. An enriched and light soil throughout is conducive to success.

FRANCIS CANNING.

**OBITUARY.**

A. S. M'KIRCHER.

Alexander Steele McKircher, who died June 11, at his home in Washington, D. C., was born in Perth, Scotland, June 25, 1836. Mr. McKircher had been a resident of Washington for nearly half a century and employed at the greenhouses of the Department of Agriculture for over forty years. Mrs. McKircher, two sons and two daughters survive him.

KANSAS CITY, Mo.—Arthur Newell sailed for Europe on the S. S. Oceanic June 25.

WESTFIELD, MASS.—C. H. Jacobs has discontinued his down town store and will hereafter be found only at his Smith avenue establishment.

DANVILLE, VA.—J. H. Rhodes is joining the S. A. F. and will attend the Asheville convention. He urges every other southern florist to join him in both.

HOLYOKE, MASS.—Miss Nellie Nolan, who has been in the employ of E. H. Howland for fifteen years, has bought out Mr. Howland's flower store at 64 Dwight street. Mr. Howland will confine himself hereafter to the business of growing for the wholesale market.

**SITUATIONS, WANTS, FOR SALE.**

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Minneapolis.

CUT FLOWER SEASON HAS BEEN GOOD.— STILL BRISK DEMAND FOR CHOICESTOCK.— A SHORTAGE OF GOOD MATERIAL.— VARIOUS NOTES.

The cut flower season is nearing a close and from all records it has been a most prosperous and satisfactory one. It is difficult to secure stock of first-class quality and a good figure is still realized for the best. Hybrid roses are coming in and, because tea roses are scarce, they sell rapidly at a good price. Carnations are small and of inferior quality. A few pink pæonias are still being cut.

Christ. Hansen, of St. Paul, has purchased three acres of ground on Dale and Maryland streets and will erect a range of houses.

The Lakewood Cemetery Greenhouses are in good shape under the careful management of Thos. Hall.

The Minnesota Horticultural Society held a very successful summer meeting here last week.

Jacob Hartman and family are enjoying a trip to Mr. Hartman's old home in Germany.

A trip among the growers shows their carnations in the field to be in prime condition. C. F. R.

Louisville, Ky.

TRADE GOOD BUT HOT WEATHER HURTS STOCK.— MATERIAL FROM CHICAGO.— PERSONAL NOTES.

Stock is showing the effects of the warm weather and all the best material, such as auratums, roses and carnations, comes from Chicago. It has been a good season all along and every one is pleased with results.

P. A. Reynolds, foreman for C. H. Kunzman, and Miss Josie Bellinger were married on June 16. They spent their honeymoon in Chicago.

C. H. Kunzman has erected a fine new house, 32x140, iron gutters, 16x24 glass, 46x60 side ventilators and hot water heat.

The hail storm June 15 did a great deal of damage to stock in the fields and broke quite a little greenhouse glass. L. A.

COLUMBUS, O.—The Livingston Seed Company has been doing a fine cut flower trade this month. They wholesale tomato plants in great quantities and report this year's demand as unusually heavy.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

SOME of the speculators in cowpeas regret investing so heavily.

JESSE E. NORTHRUP, of Minneapolis, expects to visit Chicago next week.

NEBRASKA seed crops are reported very backward on account of continued cold weather.

THE critical time, generally, for the California onion seed crop is between June 25 and July 10.

C. C. MASSIE, of Northrup, King & Co., Minneapolis, left June 27 to spend his vacation on the Pacific Coast.

SEVERAL of the southern visitors to the Seed Trade convention will spend their vacations this year in the vicinity of St. Paul and Minneapolis, including H. M. Schisler and wife, of St. Louis, and L. H. Archias and wife, of Sedalia, Mo.

## The American Seed Trade Association.

The twentieth annual meeting of the American Seed Trade Association, held at Minneapolis, June 24 to 26, was highly successful in attendance as well as in work accomplished. President Northrup called the meeting to order at eleven o'clock Tuesday forenoon. Prof. Conway MacMillan, of the University of Minnesota, delivered the address of welcome, on behalf of the Minneapolis Commercial Club, to which fitting response was made by C. L. Allen, of Floral Park, N. Y. An amendment to the by-laws, relating to the election of members, having been adopted, Secretary Willard read his report, which showed that the association is in a prosperous condition. The following twenty-two firms or individuals were then admitted to membership:

Cadwell & Jones, Hartford, Conn.; Fred. Meier, Sleepy Eye, Minn.; Geo. A. Weaver Co., Newport, R. I.; John Bodger & Son, Santa Paula, Cal.; R. G. Craig & Co., Memphis, Tenn.; J. Will Jefferson, of John R. Watts & Co., Louisville, Ky.; L. Tewelles & Co., Milwaukee, Wis.; L. H. Archias, Sedalia, Mo.; Missouri Valley Seed Co., St. Joseph, Mo.; N. J. Burt & Co., Burlington, Ia.; A. E. McKenzie & Co., Brandon, Manitoba; Funk Bros. Seed Co., Bloomington, Ill.; W. A. Barrett, Adrian, Mich.; Hickox, Mull & Hill Co., Toledo, Ohio; E. W. Conklin & Son, Binghamton, N. Y.; Farmer Seed Co., Fairbault, Minn.; C. C. Hunter, Minneapolis, Minn.; Chas. P. Braslan, San Jose, Cal.; Theo. Koss, Milwaukee, Wis.; Crocker Seed Co., Minneapolis, Minn.; Sioux City Seed & Nursery Co., Sioux City, Ia.; A. A. Berry Seed Co., Clarinda, Ia.

At the afternoon session Dr. B. T. Galloway, of the Department of Agriculture, Washington, D. C., addressed the members on government seed distribution, but added nothing new to present knowledge of the subject. Secretary Wilson, contrary to programme, did not put in an appearance. The visitors spent the remainder of the day as guests of the Minneapolis members of the association, dinner being served to a party of about 125 at the St. Louis Hotel, followed by a very enjoyable trip on Lake Minnetonka.

On Wednesday the report of the committee on tariff customs and express rates was taken up and it was the general opinion that the laws affecting same should be changed. The committee will look into the matter further. A resolution indorsing the World's Fair at St. Louis in 1904 was passed. In the afternoon Prof. MacMillan delivered a brief, but highly interesting discourse on the "Fundamental Structure of Seeds," illustrated by microscopic projections. The

party was then taken in hand by L. L. May, of St. Paul, and given a very enjoyable trip on the Mississippi, followed by a tally-ho ride in St. Paul and an elaborate luncheon at the Commercial Club, of the same city. Later in the evening Mr. May's extensive party made a brief sojourn in Como park, where light refreshments were served.

The proceedings of Thursday opened with routine business and numerous papers were read during the day. One of the most interesting was that of Walter P. Stokes, on "Rural Free Delivery," and that of J. C. Vaughan, "The Dollar and the Test," attracted much attention. Much valuable information was given by S. F. Leonard, on "Uniform Order Sheets" "Contracts" were discussed by Albert McCullough, "Collection Bureau"

W. ATLEE BURPEE AT MINNEAPOLIS.

(From the Minneapolis Journal.)

by C. H. Breck, and Seed Trade Association work in general by F. H. Ebeling, W. Atlee Burpee, Mel. L. Webster, S. E. Briggs and H. H. Harries.

The following resolution of the obituary committee was adopted unanimously:

The members of the American Seed Trade Association convened at Minneapolis, June 25, 1902, extend to the sorrowing family and friends of the late Herbert A. Clark their sympathy and here record their appreciation of his sterling Christian character, his straightforward, cordial manner, his prompt and manly dealings. Through his loss we miss for the first time in twenty years the ever welcome presence and wise counsel of Everett B. Clark and all reach to him and his family the hand of friendship to-day. We hope their hearts may be upheld and consoled in this deep trouble.

Signed,  
J. C. VAUGHAN,  
W. S. WOODRUFF,  
W. ATLEE BURPEE, } Committee.

The officers selected for the ensuing year are as follows: President, Walter P. Stokes, of Johnson & Stokes, Philadelphia; first vice-president, C. N. Page, of the Iowa Seed Company, Des Moines, Ia.; second vice-president, C. S. Burge, Toledo, O.; secretary and treasurer, S. F. Willard, Wethersfield, Conn.; assistant secretary, A. N. Clark, Millford, Conn.; executive committee, W. Atlee

Burpee, J. C. Vaughan, H. W. Wood, H. G. Courteen and W. H. Grenell.

At the close of the meeting Jesse E. Northrup, the retiring president, was presented with a silver loving cup and L. L. May with a handsome bronze fern dish. Visiting ladies were given a tally-ho ride about the city in the afternoon and the entire party joined in a trip to Lake Harriett, where Ellery's Italian band closed the proceedings with its sweetest strains. The local press gave the meetings liberal notices and printed portraits of Jesse E. Northrup, S. F. Willard, S. F. Leonard, F. Barteldes, W. Atlee Burpee, C. L. Allen and Dr. B. T. Galloway.

## THE VISITORS.

In addition to those named as traveling with the Chicago party, the following were registered:

L. L. May and S. D. Dysinger, St. Paul; Frank T. Emerson and J. C. Robinson, Waterloo, Neb.; H. G. Windheim, Omaha; J. G. Peppard, Kansas City; F. W. Barteldes Lawrence, Kans.; C. N. Page and A. H. Luck, Des Moines, Ia.; Mel. L. Webster, Independence, Ia.; N. J. Burt, Burlington, Ia.; B. P. Cornell, H. M. Schisler and F. S. Plant, St. Louis; J. E. Sloan, of D. L. Sloan & Son, Palo Alto, Cal.; H. J. Sewles, S. G. Courteen and R. M. Koss, Milwaukee; Chas. S. Burge, Toledo; A. G. Samuel, of the Missouri Valley Seed Co., St. Joseph, Mo.; L. H. Archias, Sedalia, Mo.; B. Fink, Fayette, Ia.; P. G. Holden, Bloomington, Ill.; Fred. Meier, Sleepy Eye, Minn.; S. F. Manglesdorf, Atchison, Kans.; O. H. Will, Bismarck, N. D.; F. D. Craig, Memphis, Tenn.; H. F. Conklin, of E. W. Conklin & son Binghamton, N. Y.; A. A. Berry Clarinda, Ia.; Fred. B. King and S. M. Pease, Rochester; H. W. Wood, Richmond, Va.; L. H. Coryell, Oshawa, Ont.; R. Bolzano, Baltimore; C. P. Braslau, San Jose, Cal.; S. F. Willard, Wethersfield, Conn.; W. H. Barrett, Adrian, Mich.; A. F. McKenzie, Brandon, Manitoba; E. J. Sheep, with S. M. Isbell & Co., Jackson, Mich.; Jerome B. Rice, Cambridge, N. Y.; J. S. Michaels, Sioux City, Ia.; L. L. Olds, Clinton, Wis.; Wm. Kueker, Fairbault, Minn.; Burnett Landreth, Philadelphia; J. I. Reynolds, Kansas City; F. W. Bruggerhof, New York.

The ladies in attendance included Mrs. C. S. Clark, Mrs. W. S. Woodruff, Mrs. Jerome B. and Misses Margurite and Josephine Rice, Mrs. Lovejoy, Mrs. L. L. May, Mrs. Preston King, Mrs. W. Atlee Burpee, Mrs. Chas. S. Burge, Mrs. O. H. Dickinson, Mrs. H. M. Schisler, Mrs. L. H. Archias, Mrs. Chas. P. Braslau, Mrs. J. C. Robinson, Misses Jessaline, Sadie and Isabel Northrup, Mrs. C. C. Massie, Mrs. W. H. Crossland, Mrs. S. G. Courteen, Mrs. R. M. Koss, Miss Grace May and Miss Nina Olds.

## Chicago to Minneapolis.

A large party of the seedsmen bound for the Minneapolis meeting of the American Seed Trade Association, left Chicago in the special cars of the C. M. & St. P. Pioneer Limited at 6:30 p. m., June 23. The visitors had dinner on the train as the guests of Chicago seedsmen and the trip proved very enjoyable to all concerned. The party included the following:

C. L. Allen, Floral Park, N. Y.; Alfred J. Brown, Grand Rapids, Mich.; W. W. Templin, Calla, O.; G. B. McVay, Birmingham, Ala.; W. E. Stone, with Churchill & Co., Toledo, O.; Walter P. Stokes, of Johnson & Stokes, Philadelphia; J. H. Ford, of the Ford Seed Co., Ravenna, O.; W. F. Jones, of Cadwell & Jones, Hartford, Conn.; W. H. Grenell and A. T. Farrell, Saginaw, Mich.; Frank H. Battles and F. A. Stecher, Rochester, N. Y.; Prof. B. T. Galloway, Washington, D. C.; S. E. Briggs and E. F. Crossland, of the Steele, Briggs Seed Co., Toronto; W. C. Langbridge, with the Jerome B. Rice Seed Co., Cambridge, N. Y.; E. L. Page, of the Page Seed Co., Greene, N. Y.; C. S. Clark and Mrs. Clark, Wakeman, O.; F. H. Frank, of Frank Bros. Seed Co., Bloomington, Ill.; John T. Buckhee, Rockford, Ill.; Clyde H. Walker and R. R. Ricketts, of the Springfield Seed Co., Springfield, Mo.; W. S. Woodruff and Mrs. Woodruff, Orange, Conn.; O. H. Dickinson, with B. L. Bragg & Co., and Mrs. Dickinson, Springfield, Mass.; Albert McCullough, J. Chas. McCullough, Geo. H. Parvlin, with J. M. McCullough's Sons; H. W. Dulaney, with J. Chas. McCullough, Cincinnati; W. W. Barnard, Edw. S. Leonard, S. F. Leonard, M. Barker, Leonard H. Vaughan, J. C. Vaughan, Peter Hollenbach, A. H. Godwin, Howard H. Harries, Frank B. White, E. W. Rankin, Geo. S. Green, of the Illinois Seed Co.; G. N. Davis, of the Albert Dickison Co.; E. P. Daggart, western representative of the Stecher Lithographic Co., all of Chicago. Another party, including W. Atlee Burpee and Mrs. Burpee, left ahead of the main Chicago contingent.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

JACOB W. MANNING, of Reading, Mass., has been in the nursery business at the same place for forty-eight years.

SOME of the big nurserymen are using excelsior instead of moss, for packing material, and say it is not only cheaper but better.

JOHN F. MORRIS, president of the Pennsylvania Horticultural Society, advocates the use of the double flowering cherry as a street tree.

E. W. KIRKPATRICK has sold his nursery at McKinney, Tex., and retired from active business although he continues as president of the Texas Nursery and Floral Company, of Sherman.

CHARLES E. GREENING, of Greening Bros., Monroe, Mich., gave an address on planting home grounds, illustrated by photographs, at the June meeting of the Grand River Horticultural Society, at Grand Rapids, Mich.

GEORGE B. GALBRAITH, of Fairbury, Neb., reports that there is a rapidly growing demand in Nebraska and surrounding states for forest trees of kinds adapted to the climate. Mr. Galbraith reports prosperous conditions in Nebraska and has doubled his storage capacity, having recently completed a cellar 64x100 feet, and nine feet in depth.

### American Association of Nurserymen.

The following are the state vice-presidents selected at the Milwaukee meeting:

Alabama, W. F. Heikes, Huntsville.  
 Arkansas, G. A. Gamble, Fort Smith.  
 Colorado, G. J. Speer, Greeley.  
 Connecticut, J. H. Hale, So. Glastonbury.  
 Delaware, Alex. Pullen, Milford.  
 Florida, G. L. Tabor, Glen St. Mary.  
 Georgia, C. T. Smith, Concord.  
 Illinois, I. E. Spaulding, Spaulding.  
 Indiana, E. Albertson, Bridgeport.  
 Indian Territory, J. A. Taylor, Wynnewood.  
 Iowa, Samuel Lorton, Davenport.  
 Kansas, A. C. Griesa, Lawrence.  
 Kentucky, F. N. Downer, Bowling Green.  
 Maryland, C. M. Peters, Snow Hill.  
 Massachusetts, Jacob Manning, Reading.  
 Michigan, Chas. E. Greening, Monroe.  
 Minnesota, E. A. Smith.  
 Missouri, J. W. Schuette, St. Louis.  
 Nebraska, H. W. Marshall, Arlington.  
 New Hampshire, Jno. C. Chase, Derry.  
 New Jersey, Hiram T. Jones, Elizabeth.  
 New York, D. H. Henry, Geneva.  
 North Carolina, J. Van Lindley, Pomona.  
 Ohio, J. W. Gaines, Xenia.  
 Pennsylvania, Earl Peters, Uria.  
 Tennessee, J. C. Hale, Knoxville.  
 Texas, E. W. Kirkpatrick, McKinney.  
 Utah, Wm. Young, Salt Lake City.  
 Virginia, R. A. Wickersham, Winchester.  
 Wisconsin, T. J. Ferguson, Milwaukee.

President C. A. Ilgenfritz has reappointed the standing committees, as follows:

Legislation, C. L. Watrous, Silas Wilson, Chas. J. Brown and Howard A. Chase.  
 Tariff, Irving Rouse, T. B. Meehan and J. H. Dayton.  
 Transportation, A. L. Brooke, Wm. Pitkin, Peter Youngers and N. W. Hale.

### New England Park Superintendents.

The fifth annual meeting of the Association of New England Park Superintendents was held in Boston on Friday and Saturday, June 20 and 21. The business meeting was held at the Quincy House on Friday evening and officers for the coming year were elected as follows: President, J. D. Fitts, Providence, R. I.;

vice-presidents, A. W. Smith, Portland, Me.; W. H. Richardson, Concord, N. H.; Chas. S. Anthony, Taunton, Mass., and Theo. Wirth, Hartford, Conn.; secretary, J. W. Duncan, Boston; treasurer, J. H. Hemingway, Worcester, Mass.

The annual banquet followed, about fifty gentlemen participating and James Draper, of Worcester, acting as toastmaster. He introduced first the retiring president, J. A. Pettigrew, who briefly addressed the society in words of congratulation and welcome. T. W. Cook, of New Bedford, responded in eloquent appreciation of the cordial hospitality of the Boston people and anticipation of the joys of the morrow in inspecting the many beautiful park reservations of the city. President G. H. Fox, of the Cambridge Park Board, extended a cordial invitation to visit the park system of his city and told briefly of the work being accomplished, especially along the shores of Charles river, on which \$850,000 have already been expended. W. S. Egerton, of Albany, responded to Mr. Fox's invitation.

A pleasant feature was next in order, the presentation by Nathaniel Morton, of Plymouth, on behalf of the members, of a handsome gold watch and chain to the retiring secretary, G. A. Parker, of Hartford. Mr. Morton's allusion to Mr. Parker's devotion and faithfulness in his duties met with an uproarious response and the recipient of the gift was completely nonplussed, a vigorous rendition of "For he's a jolly good fellow" even failing to unloose his eloquence and all he could say was "I thank you." Then followed an address by Prof. A. H. Kirkland on the subject of insect problems, illustrated by lantern slides, and J. K.

M. L. Farquhar concluded the exercises with a talk on plant life in Hawaii, also illustrated with beautiful stereopticon views. Throughout the evening entertaining songs and recitations were rendered by "Chick" Fox, assisted by a fine quartette and orchestra.

Saturday was spent in a carriage ride, taking in the Charles bank, with its gymnasiums and playgrounds, the Cambridge park reservations and historical grounds, the Esplanade, Riverway, Back Bay Fens, Olmsted Park, Arnold Arboretum, Franklin Field and Franklin Park under the guidance of Mr. Pettigrew. Refreshments were lavishly served at the Colonial Club in Cambridge, Pine Bank and Franklin Field. The following named gentlemen were present:

A. W. Smith, Portland, Me.; B. Worthen, Manchester, N. H.; Jos. D. Flits, Providence, R. I.; J. S. Viles, Montpelier, Vt.; W. S. Egerton, Albany, N. Y.; H. D. Goodale and J. W. Thompson, Watertown, N. Y.; Chas. Hildre, Newburg, N. Y.; Le. nard Barron, New York City; G. X. Amrhn, New Haven, Conn.; H. G. Fuller, New London, Conn.; Walter Hubbard, Meriden, Conn.; Chas. E. Keith, Bridgeport, Conn.; H. G. Clark, R. N. Clark, J. F. Huss, C. R. Karistrom, H. J. Koehler, G. A. Parker, Theo. Wirth, Hartford, Conn.; Frank Dings, Hyde Park, Mass.; H. W. West, Crescent Beach, Mass.; H. E. Whiting and Gen. H. Cox, Cambridge, Mass.; Jno. A. Duan, Gardner, Mass.; Nathaniel Morton, Plymouth, Mass.; Jno. C. Olmsted, Brookline, Mass.; Henry Frost Haverhill, Mass.; Chas. W. Ross, Newton, Mass.; Edmund Putnam, Beverly, Mass.; A. P. Capen, Holyoke, Mass.; Chas. Smith, Fall River, Mass.; Isaac Kelly, Lawrence, Mass.; Thos. W. Cook, New Bedford, Mass.; Christ. Clark, Northampton, Mass.; Robt. Eider, Waverley, Mass.; Chas. S. Anthony, Taunton, Mass.; C. P. Price, Stoneham, Mass.; H. A. Hastings, Springfield, Mass.; E. P. Adams, Medford, Mass.; Amos Stillman and Col. H. A. Hyde, Salem, Mass.; Jas. Draper and J. H. Hemingway, Worcester, Mass.; Jackson Dawson, J. W. Duncan, J. A. Pettigrew, D. H. Sheehan, G. R. Clark, J. K. M. L. Farquhar, Ed. Hatch, Prof. A. H. Kirkland and W. J. Stewart, Boston.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.  
Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 824 Dearborn St., Chicago, Ill.

At Flatbush.

Thursday evening, June 26, was a gala occasion at the Flatbush alleys, for President Charles Zeller was presented, by his fellow members of the Bowling Club, with a beautiful silver loving cup suitably inscribed in honor of his seventy-fifth birthday anniversary. The presentation was made by Eugene Dailedonze at a little lunch following the weekly

CHARLES ZELLER.  
(President Flatbush Florists' Bowling Club.)

game. Mr. Zeller made an appreciative response and each gentleman present spoke a few words, congratulatory and expressive of the affectionate esteem in which the old gentleman is held.

At Philadelphia.

The second trial match to select the team for Asheville was rolled last Wednesday evening on unfamiliar alleys, which looked good but proved difficult, for splits were more numerous than strikes. The point winners were. Connor, 475; Gibson, 450; Moss, 417; Starkey, 417; Watson, 412; Kift, 404, and Robertson, 401. The total scores follow:

Player	1st	2d	3d	T'l
Connor	171	118	186	475
Moss	164	128	125	417
Gibson	168	148	114	450
Robertson	146	138	117	401
Westcott	133	108	104	345
Kift	128	131	146	404
Habermehl	155	157	122	434
Dunlop	134	116	141	391
Anderson	137	135	91	363
Polites	129	121	123	373
Starkey	165	133	119	417

K.

PEORIA, ILL.—D. U. Ausburger will rebuild four of his houses this season.

Providence, R. I.

HORTICULTURAL SOCIETY HOLDS ANNUAL ROSE SHOW.—ATTENDANCE LIGHT.—TRADE GOOD.—VARIOUS LOCAL NOTES.

The Rhode Island Horticultural Society held its annual exhibition of roses and strawberries on Thursday, June 19, and made the usual good display. In flowers, special mention should be made of the Misses Marion and Josephine Kirby, of Warwick, and S. H. Manchester for their showing of hardy roses. Mrs. V. R. Joslin always makes a good display, and so did F. L. Gay, the latter being one of our best known amateur florists. The strawberries from Messrs. Razez and Clark, of Ashton, R. I., were excellent in color and size, and there were a number of seedlings from the Rhode Island Experiment Station. The attendance was light.

Business has been good this week, a number of schools having the exercises in the evening instead of afternoon. This helped matters, as it allowed the florists to deliver in the cool of the day, thus insuring a fresher appearance to the bouquets.

Eugene Seymour has torn down three houses and started building a better range this week. Mr. Seymour will grow some novelties the coming season and

has a new idea in violet culture which will prove profitable.

Wm. B. King, of Apponaug, is sending in a good cut of his seedling white pink. It is much like the old Fisher carnation.

The Robinson-Hazard wedding at Peacedale was one of O'Connor's events last week.

Thomas Keller rejoices in a young son.  
M. M.

BALTIMORE, MD.—The past season has been one of the best experienced by E. A. Seidewitz for a long time.

KENT, O.—C. F. Brayton is preparing to erect three houses this fall to cover a city lot. He grows a diversified stock for a retail trade and has had a good season.

SPRINGFIELD, MASS.—The lily ponds at Forest Park are a glorious sight these June days. Thousands of nymphæas, yellow, pink and white, are blooming and in the pools set apart for the tender varieties flowers are also opening fast.

ST. JOHNS, N. B.—At a meeting of the directors of the Horticultural Association Dr. Geo. U. Hay was appointed to represent that body at the annual meeting of the American Park and Outdoor Art Association in Boston, next August.

RUPP XXX SEEDS.

CHINESE PRIMROSE. Finest grown, large flowering, fringed, single and double, 15 vars., mixed, 500 seeds, \$1.00; half pkt., 50c. Have also the 15 vars. separate.

Please mention the American Florist when writing.

Society of American Florists National Convention,

AUGUST 19th to 22nd, 1902,

ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at reduced rates from all "Big Four" stations.

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l Nor. Agt. "Big Four", 234 S. Clark Street, Chicago.

Remember we are **HEADQUARTERS** on all **CUT FLOWERS**.

# McKellar & Wintererson Co.

45-47-49 Wabash Ave., Chicago.

### Seedling Carnation Pres. McKinley

This Carnation has never been exhibited except at the Kansas City Flower Show last November. At that time it won its name and the prize of \$100 offered by the Union Bank Note Co. for the best pink seedling. We will endeavor to place this variety on exhibition at the leading flower shows this Fall and Winter. The color is similar to that of Lawson, with a better stem and a more regularly formed flower than the latter variety, averaging in size from 3½ to 4 inches in diameter, with a good strong calyx and as free as Dorothy. We will book orders for Rooted Cuttings of this famous Carnation at \$12.00 per 100; \$100.00 per 1000, for January, February and March delivery. Orders filled in strict rotation. We will also furnish Rooted Carnation Cuttings of all the new and leading varieties at reasonable prices for No. 1 stock. Read what JOHN THORPE writes of President McKinley:

KANSAS CITY, Mo., November 26 1901.  
E. T. Grave, Richmond, Ind. Dear Sir:— I desire to inform you of the great keeping qualities of your President McKinley Carnation. At the close of the exhibition on Sunday evening most of the flowers were even better than on the first day of the exhibit, the color equally as bright and without a trace of purple. It is exceedingly brilliant in artificial light. Respectfully yours,  
JOHN THORPE.

Read the clipping in the *Kansas City Star*, November 21, 1901.  
"President McKinley Carnation is a splendid flower, said Edwin A. Kanst, one of the awarding judges. The petals are perfect and it is well built. The general construction of the plant indicates that it may prove better than the Lawson. The color is deeper and brighter than the Lawson and the coloring is more distinct. The peculiar purplish tinge noticeable in the Lawson is absent from the President McKinley. It will become a favorite Carnation."

**E. T. GRAVE, RICHMOND, IND.**

Please mention the *American Florist* when writing.

## ROSE PLANTS

CHEAP TO CLOSE OUT. Nothing but good stock sent.

Am. Beauties, 2-inch, \$5.00 per 100; \$40.00 per 1000.  
Bridesmaids, 2-inch, \$2.50 per 100; \$20.00 per 1000.  
Meteors, 2-inch, \$2.50 per 100; \$20.00 per 1000.

**J. A. BUDLONG,**

Toronto.

NO TRANSIENT TRADE BECAUSE OF STREET CAR STRIKE.—GOOD ROSES SCARCE.—MUCH CORONATION STOCK ON HAND.—PLANT TRADE DISAPPOINTING.—NOTES.

The strike of the street railway employes has demoralized transient trade but otherwise business has been good, with stock so scarce that when a few fairly good roses are seen they are appreciated. Kaiserins lead in quality but are not near plentiful enough to go around. Brides and Bridesmaids are so poor that nothing commendable can be said of them. Perle and Morgan are a little better but the supply of Meteor shortens more each day. Beauties are only noticeable for their absence. Carnations hold their quality fairly and are more plentiful. Auratum lilies have commenced to come in and a few good callas and longiflorums are still around. Paeonias have been in splendid shape and move well. The early crop is about over but the later varieties are only just coming along. Sweet peas are good, but now that the outdoor varieties have commenced to bloom values are depreciating.

The postponement of the coronation festivities will have its effect on the florists, numbers having grown large quantities of lily of the valley and unless unusual activity prevails for the balance of the week it is hard to see how the surplus stock can be utilized. But when we think of those in England who held back houses of orchids, valley and loads of other stock, we think how really fortunate we are.

The inclemency of the weather the past spring was detrimental to the sale of bedding plants and at this late date there are many left over. Growers of soft-wooded stock are consequently complaining and, with the low figures at which stock was sold, several will discard this branch.

Visitors: Wm. F. Bullock, Buffalo; Samuel White, Montreal. H. G. D.

PEORIA, ILL.—B. Jurgens sailed for Europe June 21.

CHELMSFORD, MASS.—The Vickery Brothers will engage in the greenhouse business here.

JACKSONVILLE, ILL.—Joseph Heint says that Marquis has been his best paying carnation the past season.

**PETER REINBERG,**

51 Wabash Avenue, CHICAGO.

Syracuse, N. Y.

SPRING SEASON UNUSUALLY GOOD.—ACTIVE BUSINESS IN BOTH BEDDING STOCK AND CUT FLOWERS.—MUCH WEDDING WORK.—NOTES OF THOSE IN THE TRADE.

Considering the cold and rainy weather, the spring trade has been phenomenally good. The bedding and outdoor plant trade has been excellent and more money was spent in this way than in many years. There is a scarcity of good flowers, especially of red roses. The June wedding business was enormous, breaking the record for number and elaborateness of decorations.

David Campbell, superintendent of parks, has placed in the Clinton Square Park one of the finest specimens of *Ficus elastica* in the state. The cold weather has done much damage to the looks of the various parks.

Former congressman James J. Belden has given to the Oakwood Cemetery Association his valuable collection of plants and the officials are considering the building of greenhouses to accommodate them.

Henry Morris had a large trade in filling boxes and beds and has had his share of the wedding and graduation business. He expects a big summer trade.

P. R. Quinlan & Company says that there is a scarcity of good stock. This firm also reports the biggest spring trade in years. A. J. B.

TIPTON, IND.—It is reported that A. C. Anderson, who has run the greenhouses here for about a year, has left town with creditors to the extent of \$2,000.

WASHINGTON, D. C.—With a number of June weddings and the school exercises, the last was a busy week, for there was also great demand for funeral work.

SPRINGFIELD, O.—The Springfield Floral Company, which purchased the John A. Doyle Company business for \$21,000, has been incorporated with \$40,000 capital stock by V. Y. Smith, Geo. Steele, James P. Goodwin, John Mellinger, Gustave Schneider and Leman Bradford.

## A FEW GOOD THINGS YOU WANT.

For sleeping-car accommodations, call at City Ticket Office, 111 Adams St., or address John Y. Calahan, General Agent, Chicago.

Pittsburg.

**BEDDING AT SCHENLEY PARK**—CLUB HAS A MOST SUCCESSFUL OUTING.—MARKET IN A VERY QUIET WAY.—ROSES OF LOW GRADE.—VARIOUS DOINGS AND NOTES OF INTEREST.

Superintendent Falconer, of Schenley Park, has finished a handsome flower bed in honor of President Roosevelt, who will visit Pittsburg on July 4, and deliver an address in Schenley Park. The bed is set in a frame of golden coleus, with an edging on the outer side of crimson coleus and an inner border of dark red. The inscription on the bed is, "President, Welcome to Pittsburg." The letters are of South African cotyledons, with a row of red alternanthera set in close to the cotyledons. The ground-work between the letters is golden or crimson alternanthera or dwarf allyssum.

The club picnic June 19 was a great success. The weather on that day was delightful and the condition of business in the stores was such that there was a large representation from this branch. More than 200 people were present, of whom many were ladies. The magnificent natural surroundings served as decorations and the richness and elegance of the color effect was wonderful. Ball games were played in a manner that created fun for players and spectators. Racing, dancing, music and the conversation of old friends helped to make the day one of much pleasure.

John Bader started for Europe on Tuesday. He will visit London, Paris, Berlin and Stuttgart, where he has relatives. He will also visit various plant and bulb growers in Holland and Belgium, returning home about September 10.

Business is very erratic and the remarkable scarcity of good roses continues to prevail. Carnations are still holding their own. Lily of the valley, sweet peas and yellow daisies do much to help out the flower market.

T. P. Langhans, secretary of the Pittsburg Cut Flower Company, is trying to locate a nice stream where a lot of fish want to be caught.

Mr. Faber, of W. C. Beckert's, is suffering with typhoid fever. E. L. M.

**KALAMAZOO, MICH.**—Van Bochove & Brother now have about 65,000 feet of glass and the fruits of sixteen years in the business are seen in a large trade. The past season has been their best.

Cincinnati.

BUSINESS HOLDS UP WELL BUT GOOD STOCK IS SCARCE.—OUTING COMMITTEE NAMES PLACE AND DATE—A VISITOR FROM THE SOUTH.—VARIOUS NOTES OF LOCAL DOINGS.

Trade remains first-class, but the majority of the stock coming in shows the effects of warm weather. All the rose growers have started to throw out the old stock and are getting ready for next season's campaign. As a result very few good roses are coming in. Those received are eagerly sought after and good prices prevail. George & Allan and J. A. Peterson are sending in some good lily of the valley, which finds ready sale. Sweet peas, too, are in good demand and there are not many left after the day's business is over. Candytatt, feverfew and mignonette are hard to move at almost any price. Carnations are holding up wonderfully well and sell out pretty clean every day.

The outing committee held a meeting Tuesday evening and decided to hold the outing at Norwood Inn Park, July 24. Let everybody come and have a good time, for this is going to be a genuine picnic for florists, their families and friends. Heretofore it has been at Coney Island and when we got there we encountered three or four other societies having outings also, and it was pretty hard to find the florists, but that will not happen this year.

Charles Critchell, formerly of this city, but now with the Atlanta Floral Company, Atlanta, Ga., was in the city this week, looking for different kinds of stock and shaking hands with friends. From his glowing description of the florists' business it must be one grand sweet song, down in Atlanta.

Alex Ostendarp, shipping clerk for the Cincinnati Cut Flower Company, has the sympathy of the craft in the death of his brother, which occurred last Monday.

Miss Cronan reports that she furnished flowers for forty-four different weddings the past week. D.

STATE VICE-PRESIDENT FOR CALIFORNIA WANTS TO SEE NATIONAL SOCIETY COME TO THE COAST.—THE STATE OF TRADE.

At the regular monthly meeting of the Pacific Coast Horticultural Society in Mission Opera Hall, the members were addressed by State Vice-president H. H. Lilienthal, of the Society of American Florists, who spoke on "The Importance of Horticulture As a Factor in State Development." Mr. Lilienthal said that San Francisco will soon become the ideal convention city of America and he hopes to see the S. A. F. here some day.

The summer is making itself felt and flowers are once more down to the "anything you can get" mark. Nothing is doing except funeral work and but very little of that. This will give the growers a chance to thoroughly overhaul their places.

Preparations are progressing apace for the exhibition August 14 to 16 in the nave of the Ferry building. A good prize list assures success.

GOLDEN GATE.

**Buffalo.**

DISAGREEABLE WEATHER CUTS INTO TRANSIENT TRADE.—BOUQUETS FOR GRADUATES HARD TO SUPPLY AT REASONABLE PRICE.—NOTES.

Cold weather and rain have made trade slow for several days. The extra supply of carnations is about over and school commencements this week call for a lot of cheap bouquets which are hard to provide. Sweet peas are just coming in. Beauties are still good and selling well, Bridesmaid and Bride scarce and small. This week will about finish all our greenhouse work and give the proprietors a chance to make out bills and see what are the results of the season. From reports the down town florists were very busy with funeral work on Monday.

### Smilax and Asparagus.

To the specialist there is but one subject of prime importance, that subject being the particular specialty in which he is most interested, but in the florists' trade all cannot be specialists, for location and available market have much to do with the direction of the growers' efforts. While there are many specialists in roses, carnations, violets, palms and so on, yet there are a much greater number who find it necessary to include a variety of plants in their stock in order to meet the demands of a varied trade. The latter class of growers has many things to remember and to make preparation for, there being not only the great flower festivals of Christmas and Easter to be taken into consideration, but also all sorts of calls to be met between times.

For the cut flower end of the business there must be some stock of green stuff prepared, for though it is possible to get such material from the commission houses in the large cities, yet one cannot profitably buy everything of this character for each hurried job that may be secured, and it is therefore wise to have some home supply, to be used in emergencies at least.

There are still many uses for smilax in the retail trade and it is not always easy to get it of good quality. Some space should, therefore, be given to this plant and the sooner the bed is prepared and the young stock planted out, the better, the latter part of June or the early part of July being the most favorable time to plant smilax. It allows for cutting three to four crops within the year, provided that the proper conditions are maintained.

Any good loam will answer for a smilax bed, though a moderately heavy soil usually gives the best results, and in the preparation of the bed about one part in six of good stable manure should be incorporated in the soil, a sprinkling of bone dust being also an advantage. Strong young plants from 3-inch pots are a good size for planting out, these being spaced from nine inches to one foot apart in the bed, planted firmly and the glass given a light shading. The surface of the bed should be kept free from weeds and stirred up with a hoe or weeder until the plants begin to cover up the space, after which but little cultivation will be required.

As soon as the young growths begin to run no time should be lost in stringing the bed, colored twine or silkline being much the neatest material upon which to

train the smilax. This avoids the necessity of removing the strings when the smilax is used in decorating.

The most dangerous pests to which smilax is subject are thrips and red spiders, both of which will increase with amazing rapidity during the hot weather and either will be liable to do great injury in a short time if unchecked. Fumigating is the surest remedy for thrips, and aphid punk is a reliable preparation to use for this purpose. Fumigating with tobacco stems will also kill the thrips and possibly cost less money than the preparation named above, yet there is more risk of injuring the foliage by using the tobacco stems.

Red spiders may be controlled by careful and forcible syringing throughout the hot weather, and in fact should be followed up in bright weather all through the year. There is also some trouble from caterpillars at times, a worm very similar to the common cabbage worm having a great appetite for the smilax leaves, an appetite that may be permanently appeased by the use of a liquid preparation of Paris green on the plants.

After the first crop of smilax has been cut off no time should be lost in replacing the strings, so that the new growths may find a support at once, it usually being necessary to look over the bed at least once a week in order to guide the young shoots in the way they should go. This is a much easier method than to allow the growths to get tangled up and then endeavor to separate them.

If the soil used for the bed is of good quality it may not be necessary to add fertilizers after the first cutting, but unless the soil is very rich a light top-dressing of short manure will prove profitable to the second crop, for smilax is allied to the garden asparagus and like that toothsome vegetable responds abundantly to liberal treatment. It also resembles that vegetable in being benefited by a light application of common salt occasionally, the best time to apply the salt being when the strings are nearly ready to cut, the effect being to harden the foliage to some extent and to give it better substance and color. But owing to the variations in the composition of different soils any experiments with salt in smilax growing should be carefully made, for some soils may not need the salt or may be better without it.

Smilax may be readily grown from the same bed for two years without replanting, but many growers prefer to replant each year, and taking into consideration the low price at which young stock may

be had it would seem that the latter method was the best.

There are other greens to be provided for besides smilax, and the most useful of these are found in the asparagus family. Of these we see but little of *A. tenuissimus* nowadays, though some floral artists still find use for this species at times, but *A. plumosus* is now well in the lead, with *A. Sprengeri* a fairly good second in the public esteem. In considering *A. plumosus* we include the form of this species known as *A. Comorensis*, a very useful form and one that in addition to being grown in Philadelphia for several years past, as was noted in a recent issue of this paper, was also known to some of the New York growers, J. M. Keller, of Bay Side, Long Island, having grown this form for many years, considering it superior to the type.

The retail grower naturally cannot put up special houses for asparagus growing, such as those built for that purpose by the Massachusetts expert, W. H. Elliott. He may, however, look for a reasonable measure of success by growing this plant under much the same conditions as those suggested for smilax, but with the full understanding that there is not likely to be three or four crops of asparagus the first season, for under favorable conditions the second year's growth is needed to produce a good crop of long strings.

It will, therefore, be readily seen that asparagus growing on a large scale means considerable outlay, and some waiting before large dividends are realized, for the maintenance of a temperature of 60° to 65° in large houses, as should be done for either smilax or asparagus, means that a large and effective heating apparatus must be included in the outfit.

Both *A. plumosus* and *A. Sprengeri* are good stock to have as pot plants, the seedlings potted up two or three together in a small pot soon forming salable stock to be used in table ferneries and other decorative work, and as they grow larger and are potted on into 5-inch or 6-inch pots such plants become quite useful for the retail trade, remembering that they may be used up in short sprays in design work even if the stock is not all cleaned up by retail sales.

W. H. TAPLIN.

#### The Value of Meadow Muck.

In order to use meadow muck with economy it is necessary to know something about its value in comparison with barnyard manure, writes Fred. W. Morse in a bulletin of the New Hampshire Experiment Station. This bulletin is intended to show the comparative values per cord of the two materials, based on data taken from the work of our agricultural experiment stations.

The amount of fertility in barnyard manure was reckoned from analyses of nineteen different lots used by the Massachusetts Experiment Station in a series of co-operative field experiments. These lots of manure were from different farms and represented actual farm-practice, which makes them more suitable for this bulletin than the average of all analyses published in experiment station literature.

The average percentage composition of these manures was: Water, 70.27; nitrogen, .387; phosphoric acid, .249; potash, .388. Six of the lots had the organic matter in them determined with an average result of 26.74 per cent.

In a part of the experiments the manure was both weighed and measured, with

the result that eleven lots ranged between 5,120 pounds and 7,400 pounds per cord, and gave an average for all of 6,060 pounds per cord, or approximately three tons.

On a basis of three tons, one cord of the average barnyard manure would contain: Nitrogen, 23¼ lbs.; phosphoric acid, 15 lbs.; potash, 23¼ lbs.; organic matter, 1,600 lbs.

The average composition of wet meadow muck was calculated from the results of ten analyses made at this station together with twenty-eight reported from the Vermont and ten from the Maine Experiment Stations.

Water, nitrogen and organic matter are the only constituents considered in

THE LATE WILLIAM G. BERTERMANN.  
(See page 848.)

the mucks because potash and phosphoric acid are not present in quantity and of availability sufficient to warrant analysis.

The average percentage of water and nitrogen in forty-eight samples and of organic matter in twenty-nine samples were as follows: Water, 77.36; nitrogen, .452; organic matter, 17.04.

The mucks were somewhat wetter than the manures, the former having from fifty-five to eighty-nine per cent of water and the latter from fifty-three to seventy-nine per cent.

No weights of a cord of wet muck have been found, therefore it has been necessary to assume that a cord of it is as heavy as a cord of manure, which is probably an underestimate.

On the basis of three tons, a cord of the average muck would contain: Nitrogen, 27 lbs; organic matter, 1,022 lbs.

To put the muck on a basis comparable with the manures, the following facts have been considered: In fertilizers, nitrogen costs about three times as much as available phosphoric acid and potash. Therefore the thirty-eight and one-quarter pounds of phosphoric acid and potash in the cord of manure would be equivalent to twelve and three-quarters pounds of nitrogen, and its total fertilizing constituents would be equivalent to thirty-six pounds of nitrogen.

Experiments at the New Jersey Experiment Station have shown that the nitrogen in fresh solid and liquid manure is as

available as the nitrogen in ammonia salts and dried blood, but the nitrogen left in such manure after prolonged leaching is but three-eighths as available. It is not known whether the nitrogen of muck is as available as that in leached manure; but for convenience it is assumed to be equally so. On this basis twenty-seven pounds of nitrogen in a cord of muck would be equivalent to about ten pounds of nitrogen in barnyard manure. The organic matter in muck may be considered worth as much as that in manure.

Therefore, on the basis of fertilizing constituents as calculated, one cord of manure is worth three and one-half cords of muck, while on the basis of organic matter, a cord of manure is equivalent to one and one-half cords of muck.

In connection with the amount of organic matter in muck, it is of interest to consider the amount of organic matter turned under in a crop of rye. Experiments at the Pennsylvania Experiment Station show an average yield of 1,800 pounds of organic matter per acre in a crop of green rye at the stage of growth when it could be plowed under, or about eighteen inches in height. Two cords of average muck would be fully equivalent to this amount of organic matter.

It is often the case that muck is exposed to the weather for several months, in order to dry it. One experiment is reported by the New York Experiment Station in which the changes undergone in such weathering are shown. In a year of exposure, a compost consisting largely of muck lost over one-fifth of its nitrogen. In compiling these muck analyses it was noticed that the dry mucks contained less nitrogen in dry matter than the wet mucks, and upon comparing averages it was found that twenty mucks with low percentages of water contained only 1.55 per cent of nitrogen in the dry matter, while the forty-eight wet mucks had two per cent. The experimental and the analytical results both show that muck should be dried under cover, when it is being prepared as an absorbent.

## CARNATIONS.

### EARLY BENCHING.

We hear of several growers who are contemplating very early planting of some varieties of carnations and within the next week or so housing will commence. This is getting more than close to entire indoor summer culture. I am firmly convinced that with some of the best fancy varieties that are slow to arrive at their best and those, also, which take a long time to stem up, this is the proper method to follow.

My experience has been that small, healthy plants, planted into their permanent quarters at this time, if properly treated, will give better results than a plant twice as large planted a month later, notably varieties of heavy growth, like Mrs. Lawson and Marquis. These varieties seem to take a certain length of time to get thoroughly established before throwing the fancy blooms that they are capable of. Therefore, start them early.

We are getting more rain than we care for just now; consequently the plants are making a rapid growth. It has rained so much during the last two weeks that we have hardly been able to get on the land to keep the plants topped and the weeds down. I would not advise planting into the house while the plants are so saturated with moisture, for when in that condition we find them slow to take

HOUSE OF CARNATION G. H. CRANE, PHOTOGRAPHED MAY 25, BY THE THOMPSON CARNATION CO., JOLIET, ILL.

hold. But as soon as they have had a week or so of clear, drying weather, in they go.

As the weather is liable to be very hot now, close attention must be given the plants when planted, to get them started. They will need to be well shaded for a time or until the roots have taken hold of the soil, when the shading can be partially removed, leaving just enough to break the direct rays of the sun during the very hot weather, but not so much as to cause a spindly growth. After the plants have been watered in at planting time, careful and frequent syringings will be necessary to prevent the plants wilting. Also beware of draughts through open doors or slide ventilators, particularly during the first two weeks after planting.

We can begin to see the character of growth of some of this year's novelties now and among them we note the following to have a vigorous, sturdy habit: Gov. Wolcott, Mrs. Higinbotham, Mrs. Potter Palmer and Gaiety. The last named at present bids fair to be the most rapid grower of the variegated varieties we have seen.

C. W. JOHNSON.

#### PREPARATION OF THE SOIL.

It is not many weeks before we will have to get ready for planting the houses and with some growers the preparation of the soil is quite a problem. One grower uses soil that he has had in preparation a year or more, and there is no question but that this sort of soil intelligently prepared is the best to use. Another grower will plow up a batch of sod early in the spring and compost

this with manure, turning it twice or oftener during the summer. Where this sort of soil has proven successful the grower is foolish to make any change, for, no matter what any other grower may advise, there is nothing succeeds like success. If your plan is successful do not make a change, excepting it be in a small way as an experiment. As a rule this soil is not very desirable, as the sod is likely to contain germs of the fungus that produces stem rot; at least this is what some of our learned professors tell us and our own results prove them correct.

Sterilizing has come to be an item in carnation culture and is likely to become more general every year as the results obtained in sterilized soils seem to warrant the extra expense in preparation. This process has several advantages and one of them is that almost any soil can be used, so that it has the proper amount of fertility and is mechanically adapted to plant growth, the sterilization ridding it of weed seeds and fungus growths.

My own method of preparation is very crude and might not apply to many soils, but the results I obtain lead me to conclude that for me it is the very best method. We take the soil right from the field, one that has been in cultivation for at least two years. This soil has no preparation excepting that it is brought up to a high state of fertility. It is brought into the houses as soon as they are cleaned out and left to get thoroughly dried out and baked, with the houses kept closed and hot from the sun.

This method does not kill the weeds but is otherwise almost as effective as

sterilization by steam. The weeds can be killed by watering the beds a few weeks before planting and then destroying the weeds. This does not clean them all up but is considerable of a help. This soil when first brought into the houses has well rotted manure mixed with it or dug under, so that the manure gets the heating and drying process along with the soil and no doubt loses a goodly percentage of its strength, but this is more than counterbalanced by the fine condition in which the soil is put for plant growth.

Another point in regard to soils is that different varieties of carnations require different soils, some requiring more manure than others. This is easily regulated after the houses are planted by adding fertilizer to those which require it and adding nothing to those that show no need of it. Some varieties also do better in soil of a heavy texture and others in a lighter soil. This is a harder problem than the question of manure and as my soil is of a very loose character I have been compelled to use the clay subsoil for some varieties.

This clay subsoil is the soil taken to the depth of about eight inches after that amount of top soil is first taken off and put aside. This soil is not much to look at; in fact, it looks as if nothing could thrive in it, but with a liberal application of cow manure it produces a quality of flowers that it is impossible to obtain in the loose top soil. Most of the whites are considerably better as to quality of bloom, stiffness of the stem and strength of the calyx in this soil than in the top soil. Carnations of the Daybreak type are also much improved, while

the Scott class of pinks are very decidedly deteriorated. It seems almost incredible but it is an actual fact that White Cloud was increased in value forty to fifty per cent by the use of this soil the first year I tried it; and Scott was reduced in value to that extent.

I would not want to advise the general use of subsoil, as many subsoils might be of no value or even ruinous to the plants; but I do cite this experience of my own to show the value of a careful study of soils and their relation to each variety of carnation grown. If the very best results are aimed for, one pile of composted soil for all your houses is not to be taken into consideration, and it might almost be laid down as a rule to avoid the use of sod soil where you want to grow carnations, but the best rule of all is to make your own observations carefully and then make your own rules as to what is the best soil.

ALBERT M. HEER.

#### RESULTS AT CROMWELL.

Carnations have done very well during the present season at A. N. Pierson's, Cromwell, Conn. Sterilization has had a very beneficial effect upon the plants and

Louise. This variety gives a very clear color, is of vigorous habit and a free bloomer. Norway is not quite clear enough in color. White Cloud will be grown, but in small quantity, while Flora Hill is to be discarded. In pink, Lawson is, of course, at the top. An entire house will be devoted to this variety next season. Joost has been the best pink, in its grade. Genevieve Lord will be tried on a larger scale. Scott and Crocker are out of it. The Nelson will be given a thorough trial.

The Marquis has done very well here and is one of the most popular carnations. Morning Glory will be grown for a light pink. Goethe is out of it, as it sends too many single blooms. Crane and Estelle will be the scarlets. Roosevelt and Maceo will be grown for dark red. In yellow, Eldorado and Golden Beauty are the best. California Gold and Cervera are good varieties to produce, but there is but very little call for varieties of their color. Gold Nugget is to be thrown out. Novelty will also be grown.

In variegated, Prosperity is by far the best yet tried. It has bloomed freely and plants are of vigorous habit. Bradt will also be grown. Olympia has not been a

#### The S. A. F. and the Southland.

There is not a glint of glass in the sunlight every half mile as one rides through the southland, as there is in many northern communities, but those engaged in floricultural pursuits in the southeast are alive to the impetus which the industry will receive from the visit of the Society of American Florists to Asheville in August. The leading florists in the contiguous and adjacent states are beginning to take hold of the matter in earnest and interest is being aroused throughout the south. The active spirits have opened correspondence with those of the craft in many states, urging them to be present at the big meeting at Asheville, to join the S. A. F. and to drum up all the recruits possible.

From these first efforts it is evident that much interest will be created and manifested as the date approaches. Much enthusiasm has been awakened and much good will result from holding this meeting in the south. It goes without saying that the attendance from south of the Ohio will be the largest in the history of the organization and, as every effort is being made to book new members, it is hoped that the society will at least not lose, if it does not gain, in membership by journeying far into new fields. Among those who have already said they will be at the convention are:

C. H. Hune, Memphis, Tenn.; W. J. Ellsworth, Jessamine, Fla.; J. L. O'Quinn, Raleigh, N. C.; A. L. Hatch, Rockledge, Fla.; E. N. Reasoner and Mrs. Reasoner, Oneco, Fla.; James Morton, Clarksville, Tenn.; A. C. Oelschig, Savannah, Ga.; Harlan P. Kelsey, Kawana, N. C.; J. Van Lindley, Pomona, N. C.; J. H. Nunnally, Atlanta, Ga.; H. S. Chase and W. F. Heikes, Huntsville, Ala.; Otto Katzenstein, Pinchurst, N. C.; George W. Caldwell, Evergreen, Ala., and L. A. Berckmans, Augusta, Ga. In addition the C. A. Dahl Company, of Atlanta, and the Griffing Brothers Company, of Jacksonville, Fla., say they will be represented.

John Wolf, of Savannah, Ga., will be on hand and will be one of those to exhibit southern grown bulbs, Roman hyacinths. J. E. Jackson, of Gainesville, Ga., will be present to exhibit some novelties in the plant line and P. J. A. Berckmans, Jr., of the Fruitland Nurseries, Augusta, Ga., will have a large exhibit, including palms, fancy-leaved caladiums and conifers. There promises to be a goodly delegation from Birmingham, Mobile, New Orleans and Texas, with several parties bringing stock to exhibit.

There is a very general opinion that this convention will be a great aid to southern growers who are working up a wholesale business. Retail trade is increasing steadily all over the south. The demand for cut flowers is growing apace with the plant trade and all the florists in that great section of the Union have had a satisfactory business during the past season.

Taking Augusta, Ga., as a representative community in the new south, we find purchasers becoming more critical as to the quality of the stock they buy and poor material is not readily disposed of. The demand for palms and other decorative material is on the rapid increase and during the past season the cut flower trade has been very brisk, partly because of the number of winter resort hotels in the neighborhood. With the erection of a new hotel, to cost \$300,000 on the heights of North Augusta, the prospects are for an even better business next year.

ORIGINAL PLANT OF THE CLIMBING OLOTHILDE SOUPERT ROSE AT AUGUSTA, GA.

it will be practiced in preparing the soil for next year. The cost of sterilization is comparatively slight when the helpful results are considered. Stem rot, and especially the wet rot, has caused but very slight damage and the few plants that were lost might have been affected in the field. The absence of weeds saves a great deal of labor and gives the houses a better appearance.

The varieties which will be grown largely next season are: In white, Queen

success; too large a proportion of the flowers split the calyx.

Some of the new ones to be tried are Wolcott, Floriana, Cressbrook, Wild Rose, Enquirer and Lorna. W. A. D.

BROCKTON, MASS.—H. E. Barrows has sold his business to Chas. A. Reed.

HANCOCK, MICH.—A. M. York has bought the greenhouse property in Ripley and is making a number of improvements.

RHODODENDRONS ON THE MOUNTAINS NEAR ASHEVILLE, N. C.

The cut flower business at Augusta has been handled by J. Rival, The Huss Floral Company and C. C. Stubb, the P. J. Berkmans Company doing almost exclusively a wholesale trade, growing no cut flowers. This company's grounds are located about a mile and a half west of the terminus of the Lake View electric line and there are some famous sights to repay the visitor. The business was established in 1856 and over 400 acres are given to nursery stock, the tract affording almost every sort of soil found in the state. There are roses, coniferous and broad-leaved evergreens, deciduous trees and shrubs, fruit and nut trees, grapes and small fruits grown under the most suitable conditions.

The greenhouse department includes over 60,000 square feet of glass in greenhouses, not to mention a large area in cold frames, in which a considerable variety of plants can be safely wintered in this section. Over half the glass is devoted to palms and the fancy-leaved caladium is another decorative plant which is grown in large quantities. Several acres are devoted to cannas.

One of the features of the business done here is the foreign trade. For years they have been shipping trees and plants to Australia, India, South Africa and many other distant countries with excellent success.

One of the accompanying illustrations shows the Berkmans range of greenhouses, another shows the original plant of the Climbing Clothilde Soupert rose, which is growing on their place, and the third is a picture of rhododendrons in the mountains near Asheville, from a photograph recently taken by L. A. Berkmans.

#### Prizes for Growers.

Moore, Hentz & Nash, of New York, being of the opinion that the actual grower of any flowers that take a prize should be recognized and rewarded in some way, as well as the owner and exhibitor, have again this year offered four handsome medals for that purpose, to be competed for at the seventh annual flower show of the Morris County Gardeners' and Florists' Society, to be held in Madison, N. J., November 6 and 7, and elect that they shall be awarded as an additional prize as follows: One to go with the first prize for eighteen American Beauty roses, one with first prize for twelve Bridesmaid roses, one with twelve Bride roses, to be grown in commercial establishments only, the fourth to go with the first prize for the best exhibit of chrysanthemums, open for both private and commercial growers. In the event

of anyone being both grower and exhibitor, taking the first prize, he shall also be entitled to the medal offered in that class.

#### Asheville.

Oh! mountain-girt city of Asheville,  
The gem of "The Land of the Sky,"  
The rose of the beautiful valley,  
With the French Broad flowing by.  
How grand is the sweep of the mountains,  
Encircling the hill and the vale;  
How pure are the musical fountains,  
And soft the caress of the gale.

'Tis here that the zephyrs are fondest,  
For they heal with a touch of their wings;  
'Tis here that the flowers are fairest,  
And here that the mountain rill sings;  
'Tis here that the trill of the bluebird  
Sweetly blends with the oriole's song,  
As they flit over meadow and hillside,  
In the sunlight, all the day long.

'Tis here that the cheeks of the maiden  
Bloom out with the roses of health,  
And the invalid lover of Mammon  
Feels a joy that is better than wealth,  
For the skies are bright as Italian,  
With the green wooded mountain and glen,  
Bring back the full vigor of manhood,  
And life is worth living again.

Oh! beautiful city of Asheville,  
Romancer nor poet can write  
The beauties that cluster around thee  
Like glittering stars of the night!  
But the eye of enraptured beholder  
Alone in the soul of them speaks,  
From the scenes of the swift-rolling river  
All around to the tall mountain peaks.  
—W. Cotton Downing.

#### Prof. Maynard.

"Shameful outrage" is the only characterization of the Massachusetts Agri-

cultural College trustees' action in forcing Prof. Samuel T. Maynard from the faculty. It is as if the trustees of Amherst College should kick out "Old Doc" Hitchcock to satisfy some personal spite. This incident is a demonstration of the unsafe and unwise policy of placing the management of such an institution in the hands of politicians and men who care little for the school beyond its value to their personal interests. The alumni and friends of the college are waxing wroth over this treatment of the venerable teacher who has given his life work to the institution and who is the peer of any member of its faculty, and the incident is not closed. They are enlisted in a good cause and should fight on until justice is done.—*Northampton Herald*.

[Prof. Maynard deserves much better consideration.—Ed.]

#### Two Rare Freesias.

An extremely pretty freesia was recently in flower at Kew under the name of *Freesia refracta* (aurea), which is totally distinct from the *F. refracta alba* of gardens, the flowers being smaller, and less sweetly scented, while the color is a clear bright yellow, not a mere sulphur hue, but a decided golden tint. It is later in flowering than the garden form, being at its best about the middle of April, says a correspondent of the *Gardeners' Magazine*. A second freesia that I have seen in bloom at Kew and elsewhere is *F. Armstrongi*, in which the flowers are of a bright rosy-pink hue, that deepens in tint towards the edges of the expanded segments. The outside of the tube is nearly white, while there is a blotch of yellow in the interior of the throat. This freesia first flowered at Kew some two or three years ago, the bulbs having been sent by W. Armstrong, of Port Elizabeth, after whom it is named. Though very beautiful, it does not possess the delicious fragrance of the common kind. Not only are both these freesias very beautiful and distinct, but their possibilities for hybridizing purposes are great. Their cultural requirements are about the same as the commonly grown form, as a good deal of the success or otherwise attending their cultivation depends upon the bulbs being thoroughly ripened by perfecting their growth in the sunshine, and not under stages or in similar places, when the blossoms are past. *Freesia Armstrongi* appears to be more vigorous than the others.

GREENHOUSE DEPARTMENT, FRUITLAND NURSERIES, AUGUSTA, GA.

## Chicago.

STOCK VERY SCARCE WITH NO EXTRAORDINARY DEMAND.—ROSES IN MUCH IMPROVED QUALITY.—WHITE CARNATIONS THE SHORTEST ARTICLE.—PRICES WELL UP.—LILIES PLENTIFUL.—CONTINUED RAINS THREATEN CARNATION FIELDS.—ASTERS SHOW INJURY.—JOTTINGS OF MANY DOINGS OF WHOLESALERS AND GROWERS.

There has been no unusual demand this week but stock has been scarce. Things were cleaned up so well in the last week of June that the market was almost bare at the beginning of the current week. The shortage was particularly noticeable in white carnations. There are no long-stemmed Beauties and only very light receipts of the short stock, but there are more Brides and Bridesmaids. The quality shows a considerable improvement over that of the past few weeks, Meteors being exceptionally good for the season. Golden Gate is blooming most profusely of all. There are a considerable number of pink carnations in market, but in general the quality is very low. The whites and fancy sorts have been so scarce that prices have ranged up to \$2 for anything that was worth having, and \$3 for the best stock, something quite unprecedented for July. There are still a few pæonias about, but selling slowly. Sweet peas are in heavy supply but not moving actively since the month of weddings ended. A noticeable feature is the number of longiflorum lilies coming in. They do not move except for funeral work. The receipts of adiantum are again quite heavy, smilax is in big supply and asparagus is quite plentiful. All told, business was never better for the first of July. The demand exceeds the supply and on many items considerably more stock could be handled without affecting values.

Not in ten years has the rainfall in June been anything like the record for the past month. In thirty days, 6.22 inches of rain fell in the vicinity of Chicago and the prospect of continued showers is causing the growers considerable alarm. Already asters in the field are showing a big percentage of loss, but it is to the carnations that the greatest injury is feared. On low fields there has already been considerable damage, many of the plants being drowned out and others badly attacked by stem rot. There are reports that some growers will lose their entire stock, but doubtless these are exaggerations and conditions will not prove to be so bad as now appears if we have a cessation of precipitation. At the old Reissig place at Riverside the violet plants have been drowned out and F. W. Timme, in Irving Park, is reported to have lost practically all his carnations, while most growers report some loss.

A. L. Vaughan, of E. H. Hunt's, is at home from a trip of several months and says that in his travels he has found everybody prosperous and happy. He thinks that never before were geraniums and other bedding plants so closely cleaned up and says there is likely to be a big demand for stock plants this fall.

Wietor Brothers are adding many miscellaneous items to their stock. They have a big field of asters for summer, six houses of chrysanthemums for fall and are planting a house of Sprenger and another of smilax.

The Poehlmann Brothers Company has completed its eight new houses, two of them 23x300, two 23x400 and four 23x200. One will be given to Bridesmaid roses and the others all to Beauties.

The Kennicott Brothers Company has begun the extensive alteration of its store. It is expected that the changes will take six weeks' time, for every feature of the place will be brought up to date.

There were a few early asters in market this week and within a short time the cut will be heavy if the rains let up. J. Duerr and J. T. Anthony, at Geneva, will soon be cutting from 40,000 plants.

The wholesalers have sent out practically their last price lists for the season, suspending publication until September 1, but prices will be quoted right along in this journal.

Louis Gresenz is having a two weeks' vacation from Bassett & Washburn's but is spending it at home, for Mrs. Gresenz is ill.

Through the efforts of F. F. Benthey, the wholesalers have decided to make it unanimous and all close at 5 o'clock for two months.

Mathias Mann, at 3793 North Clark street, is rebuilding nine houses and putting his range into first-class shape.

A. C. Kohlbrand, with E. C. Amling, is at his old home at Cincinnati for a two weeks' vacation.

A. L. Randall and family are at their summer home on the St. Joe river in Michigan.

C. M. Dickinson is in New York this week.

Visitors: John R. Fotheringham, Tarrytown, N. Y.; W. A. Hartman, South Haven, Mich.

## New York.

GOOD BUSINESS THE LAST OF JUNE.—FIRST WEEK OF JULY THE DULLEST OF THE YEAR.—NO DEMAND AND GROWERS THROW OUT STOCK.—MANY EUROPEAN VOYAGERS.—VACATIONS NOW IN ORDER.—NOTES HERE AND THERE.

The current week is doing its best to maintain the reputation of the first week in July as the dullest period in the whole year. There are frequent times when more unsold material is on the market, for the growers generally understand that if they have any stock to throw out and benches to replant, there is nothing after June 30 in the way of business or demand to prevent their doing so, and therefore the receipts are falling off very rapidly. Last week was a good one all through the city, the call from all sides being generally in excess of the available material in acceptable grades. Steamer departures this week are about all there is left to struggle for and after that early closing, vacations, renovating, and so forth will be in order.

It is quite an undertaking to follow up and keep record of the fortunate tourists who have made money enough the past year to go abroad with. Each season sees a larger list. August Rhotert went on the Konigen Louise on Thursday, July 3. C. Albert Small left on Tuesday and L. C. Bobbink is already half way across the Atlantic. A letter announcing the safe arrival of A. Dimmock on his native heath has been received and a recent report from B. Suzakl tells of his arrival at Vancouver enroute to Japan, after a rare experience with June snowstorms and blockades westward from St. Paul. P. Smith, of John I. Raynor's has gone on a rustivating trip but America is good enough for him this time. W. H. Gunther will omit his usual summer sojourn in the Berkshire Hills this year and attend to business in his newly equipped store.

Mrs. Hallinan had a busy June. She gets a great deal of the political floral work, two of the pieces made last week by her manager, Chas. A. Bird, being horseshoes for officers of the fire department. One was for Chief Croker, sent him on the eighteenth anniversary of his connection with the department, the other for Capt. Donohue, who has been in the service thirty-two years.

The wife of Arthur Pawlowski, of Chas. Scallen's, died June 25.

## Boston.

NEW ENGLAND NEEDED MANY FLOWERS IN LAST DAYS OF JUNE.—NO USE FOR STOCK IN JULY.—QUIET PREVAILS IN THE WHOLESALE SECTION.—THE NEW FERN.—SCHOOL CHILDREN CAPTURE MOTHS FOR PROFIT.—PERSONAL AND OTHERWISE.

The cut flower situation has changed since last report, as was expected. Last week was a busy one in every corner of these New England states, with their thousands of schools and seminaries, each sending out its annual finished product of graduates, and Boston wholesalers were kept hustling, and they in turn kept growers hustling, to supply the needed material up to the final wind-up on Saturday—the annual school festival in which the mayor of Boston presents a bouquet of flowers to each of the 3,000 or 4,000 graduating pupils. This week there is "nothing doing." Express messengers and telegraph boys have vanished from the vicinity of the wholesale flower marts and everybody has an abundance of time to devote to the questions of the day, Fourth of July fireworks, vacations, and Asheville. Receipts of roses, carnations and other cut flower stock have now fallen off and the supply will be at a minimum for a while. Plant marketing has also come to its finish and all are glad, especially the auctioneer, to whom the closing plant sales of the season are dreary and hollow mockeries.

I had the privilege of a thorough inspection of L. H. Foster's stock of his pretty new fern, Anna Foster. Readers of the AMERICAN FLORIST are not strangers to the quality of the Boston fern stock Mr. Foster has been putting on the market for several years past and hence will require no assurance that when the much-talked-of novelty is put out next September it will be found "all right." As to the variety itself, its future is assured. It is totally distinct in many respects from other improved forms of the Boston variety of Nephrolepis exaltata, one of its special characteristics being the effectiveness of the cut fronds in table decorative work or elsewhere, where the delicate tracery of the finely cut pinnæ is brought out.

Moth destruction is being carried on in the liveliest manner by the school children of Malden. It is said that about one-half of all the children in town are at it, under the incentive of the 10 cents per quart which the street department pays for the captured insects. Over 500 quarts were brought in on the first forenoon of the summer vacation and the indications are that there will be plenty of pin money afloat around the fire-cracker, candy and ice-cream soda emporiums of Malden for some time to come.

Capt. Dave Simpson had the Horticultural Club of Boston on one of his fast tugs for an afternoon trip in the harbor on Saturday, June 23. It was a stormy day but this had no terrors for the veterans, all of whom enjoyed themselves in

the highest degree, and Capt. Simpson proved himself a model host.

Part I of the transactions of the Massachusetts Horticultural Society for 1901 has been received. It records the meetings for business, lectures and discussions from January 5, 1901 to March 30, 1901 inclusive.

Arthur H. Newman has gone on a month's vacation to Puget Sound, where he has some investments.

Visitor: Arthur Cowee, Berlin, N. Y.

#### Philadelphia.

OUTDOOR FLOWERS SUFFER FROM INCLEMENT WEATHER.—GREENHOUSE MATERIAL ALSO POOR.—RETAILERS HAVE DIFFICULTY IN GETTING STOCK FOR A LIGHT BUSINESS.—GROWERS BUSY REPLANTING.—MEETING OF THE CLUB.—NOTES.

Violent rain storms are injuring the crop of outdoor flowers and this, together with the poor quality of the greenhouse stock, keeps the retailers hustling to get anything at all worth having with which to fill orders. It is, perhaps, useless to quote prices, as the stock varies so much in quality and the demand is so light that the figures depend mainly on the business of the day and move up and down accordingly. The best teas bring \$6 per hundred, Beauties \$1 to \$2 per dozen, carnations \$1 to \$2 per hundred, sweet peas 20 cents to 35 cents per hundred, auratum lilies \$6 to \$10 per hundred, longiflorums \$5 to \$6.

The growers are now busy planting their houses and from all accounts there should be no lack of Beauties the coming season, as almost without exception each grower is dropping a house or two of teas to make way for more plants of this popular variety. Perhaps if this keeps up there will be no others and instead of the "big four" there will be but one.

The July meeting of the Florists' Club on Tuesday evening was rather slimly attended. Convention matters furnished the principal topic. Definite arrangements for the trip cannot yet be announced, but it is likely a goodly delegation will go.

Mr. Strohle, of the H. A. Dreer Company, goes abroad next week on the annual, or semi-annual, trip for novelties and to see the quality of the import orders is up to the required standard.

It seems that the spirit of the muses has deserted the Bard of Kingsessing and now hovers near the scribe of Germantown.

Robert Craig is recuperating at Summit, N. J., at the residence of John N. May. K.

#### Toronto.

TRADE EXCELLENT THROUGH JUNE.—ROSES SHOW DECIDED IMPROVEMENT IN QUALITY.—UP TO WINTER GRADE.—CARNATIONS GOOD BUT NOT PLENTIFUL.

Business was good for the last week in June, weddings and commencements contributing largely to the increased activity, funeral work being only a small factor the past month. Roses, which had been deteriorating rapidly, have improved in the cool weather, so much disliked at this season. Meteors are excellent, with a nice velvety appearance, closely resembling Liberty, with long stems and good, dark green foliage. Brides and Bridesmaids are a decided improvement and mildew, to which they are so susceptible, has mostly disappeared. Kalsersins are more plentiful. Carnations have also

improved, though they are not as plentiful as desired. A few *Cattleya Mossiae* are occasionally seen and are quickly disposed of. *Lilium album* and *L. roseum* are on the market. Gladioli from Rositer's are the first of the season. Some splendid varieties of late pæonias are still coming from Frank Duffort.

The Manton brothers, Thomas and George, took a day's outing in the swamps back of Anzora and secured a large number of *Cypripedium* spectabile plants and some fine blooms of sarracénias.

H. B. Jones, of the J. M. Gasser Company, Cleveland, was a visitor Monday and expressed surprise and pleasure at the quality of our roses.

Robert Greenlaw, of Boston, and Miss Murray, of Montreal, are visitors.

H. G. D.

#### Buffalo.

TRADE GOOD AT THE END OF JUNE IN SPITE OF BAD WEATHER.—GREENHOUSE MEN ALL PLEASED.—NOTES OF VARIOUS PERSONAL AND TRADE DOINGS.

With weather about as disagreeable as it was possible to be, trade last week was very brisk on account of school commencements and an unusual lot of weddings. Several receptions also called for material and, altogether it was a hard time to get good stock, which consequently brought good prices, carnations 50 cents to \$1 per dozen, roses \$1 to \$2, while Beauties sold readily at \$6 per dozen retail. Some outdoor sweet peas were sent in this week from Brookings that were the finest ever seen here.

The greenhouse work this season has been very satisfactory and in my travels around last week I found Neubeck, Scott, Rebstock, Zimmerman and Anderson all looking pleased. Palmer has been busy, but not in the plant line.

Now that it is July, the retail stores should close at 6:30 p. m., excepting Saturday, and give all the help the benefit.

J. B. Wiese, of the Chippewa Market, is going to Europe, which shows good trade on the market.

Adulock & Company, who bought the Adams business, are doing a good trade from reports.

"Andy" Adams is spending the Fourth and a few days on the lake shore.

Visitors: Harry Balsley, of Detroit; Henry Wise, of East Aurora, and others. BISON.

#### Columbus, O.

Too much rain is now the cry, after a fall of five and one-half inches, and it is still raining. There is great danger of failure in the aster crop where the land is not properly drained, as the fields are flooded. Our surrounding country resembles the picture of a Philippine rice field. Carnations are looking fine now but they have had quite enough water and there is danger of a washout in most of the fields if the downpour continues.

There is a lull in the cut flower trade this week. Aside from a few funeral orders there is little going on, but everyone is busy just the same, repairing, building or planting. The usual hot time was not experienced planting roses this season as the weather was cool and pleasant.

Miss Anna Hellenthal, daughter of J. R. Hellenthal, became Mrs. William Leonard on the morning of June 23, at a nuptial high mass at St. Mary's church. The groom is a popular young business man, and both are to be congratulated. CARL.

#### Meetings of Florists' Clubs.

The accompanying list gives the cities in which there are active florists' clubs. Following the name of the club is the place of meeting, the day of meeting, the hour and the name and address of the secretary:

BALTIMORE, MD.—Gardeners' Club of Baltimore, Royal Arcanum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1440 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wienhoeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. Geo. S. Bartlett, Sec'y, 113 East Second street.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 244 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodcliffe, Lake avenue, Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month, at 8 p. m. F. T. Rushmore, Sec'y, 2316 Franklin street.

DES MOINES, IA.—Des Moines Florists' Club, at various florists' establishments. Last Monday of each month, at 8 p. m. J. T. D. Fulmer, Sec'y, 702 Walnut street, Des Moines.

DETROIT, MICH.—Detroit Florists' Club, Cowie Building, Farran and Gratiot avenue. First and third Wednesday of each month at 8 p. m. J. F. Sullivan, Sec'y, 214 Woodward avenue.

HARTFORD, CONN.—Hartford Florists' Club. Second and fourth Tuesday of each month at 8 p. m. J. F. Coombs, Sec'y, 688 Main street.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, Commercial Club rooms, Indianapolis. First Tuesday of each month, at 8 p. m. H. Junge, Sec'y, 456 E. Washington street, Indianapolis.

MILWAUKEE, WIS.—Milwaukee Florists' Bowling Club, Plankinton House. Thursday evenings at 8 p. m. C. C. Pollworth, Sec'y, 137 Oneida street.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Alexandria rooms, 2204 St. Catherine street. First and third Monday of each month. W. H. Horbin, Sec'y, 23 Closse street.

NEW YORK, N. Y.—New York Florists' Club, Elk's Hall, 19 West Twenty-seventh street. Second Monday of each month, at 7:30 p. m. John Young, Sec'y, 51 West Twenty-eighth street, New York.

OMAHA, NEB.—Nebraska and Iowa Florists' Society, Fuller's Hall, Fourteenth and Douglas streets. Second Thursday in each month at 8 p. m. Louis Henderson, Sec'y, 1519 Farnam street, Omaha.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce. First Tuesday of each month, at 8 p. m. Edwin Lonsdale, Sec'y, Wyndmoor, Philadelphia, Pa.

PITTSBURG, PA.—Pittsburg and Allegheny Florists' and Gardeners' Club, at rooms of Pittsburg Cut Flower Co., 504 Liberty street. Second Thursday of each month, at 8 p. m. T. P. Langhans, Sec'y, 504 Liberty street, Pittsburg.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street, Providence. Second Thursday of each month, at 8 p. m. Alexander Rennie, Sec'y, 41 Washington street, Providence.

RICHMOND, IND.—Richmond Florists' Club, Commercial Club rooms. First and third Friday of each month. H. C. Chessmann, Sec'y.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday and third Monday of each month. Thos. H. Munroe, Sec'y.

ST. LOUIS, MO.—St. Louis Florists' Club, Odd Fellows Hall No. 2, Ninth and Olive streets. Second Thursday of each month, at 3 p. m. Emil Schray, Sec'y, 4101 Pennsylvania avenue, St. Louis.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association, St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. W. C. Jay, Sec'y, 438 Spadina avenue.

UTICA, N. Y.—Utica Florists' Club, 183 Genesee street. First Thursday of each month at 8 p. m. J. C. Spencer, Sec'y.

WEST HOBOKEN, N. J.—North Hudson Florists' Club, store of H. C. Steinhoff, Hudson boulevard, West Hoboken. First Tuesday of each month, at 8 p. m. Geo. E. Kogge, Sec'y, 616 Washington street, Hoboken.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

A FEW cents spent now for repairs will  
save dollars a year from to-day.

THE propagators of Begonia Gloire de  
Lorraine have been having a busy season.

OF the new chrysanthemums Eaton  
and Appleton are being heavily planted  
all over the country.

THE rose growers in many sections of  
the country have been overrun by thrips  
this spring. It has been a hard battle in  
the greenhouses and now the plants out-  
doors are suffering.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

FRANCE proposes to make a great out-  
door display at the St. Louis exposition.  
Her commissioner has asked for eight  
acres of land surrounding the French  
building, to be planted by the nursery-  
men, florists and seedsmen.

THE long continued rains have brought  
much injury to asters and the carnation  
growers are alarmed at the condition of  
the plants in the fields. From present  
indications surplus field grown plants  
will be good property two months hence.

### Brought Many Replies.

AM. FLORIST CO.:—My advertisement  
of orchids in your paper brought me so  
many replies that I think I will sell all  
the plants I care to spare; another inser-  
tion would swamp me with orders.

St. Paul. R. SCHIFFMANN.

### Greenhouse Building.

Grove City, Pa.—C. W. Clelland, house  
28x200.

St. Paul, Minn.—Christ. Hansen, range  
of houses.

Dunkirk, N. Y.—Wm. Schwan, one  
house.

Cleveland, O.—R. Hoffman, house  
20x100.

Minneapolis, Minn.—Wm. Donaldson  
Company, two houses 14x57. Lake-  
wood Cemetery Association, three houses  
16x100. R. Will, violet house 22x110.

North Adams, Mass.—A. J. Schmutz,  
one house.

house 22x75.

Medway, Mass.—O. T. Mason, cucumber  
house.

Adams, Mass.—T. D. Brown, house  
16x60.

Wilson Station, Conn.—W. Bancroft,  
one house.

### The Rainfall in June.

The rainfall in the month of June of the  
present year shows a marked increase  
over that of 1901. In many of the states  
the government has not collected its  
statistics, but there is enough at hand to  
show the rainfall for June throughout  
the United States has broken all records.

	June 1902.	June 1901.
	inches.	inches.
Illinois.....	6.22	2.41
New York.....	6	.....
Ohio.....	6.58	3.32
Nebraska.....	9	.....
Missouri.....	6.19	1.23
Minnesota.....	2.49	7.21
Wisconsin.....	4.71	4.09
Louisiana.....	1.70	4.70
Indiana.....	7.52	4.66

### Infested Palms.

ED. AM. FLORIST:—Enclosed find pieces  
of leaves of several palms infested with  
some scale or bug or what? I bought  
the palms and found them not clean.  
Water has little effect. What will have?  
F. J. A.

The specimens of palm leaflets in ques-  
tion are badly infested with scale insects  
of two or three different species, and also  
show some indications of having been  
attacked by thrips, and water alone  
would have but little effect upon these  
pests. The large flat brown scale found  
on some of the specimens is perhaps less  
injurious than some of the others, and  
appears most frequently on the leaves of  
ptychosperma and phoenix, but the small  
white scale seems less particular in its  
diet and may be found upon many differ-  
ent species of plants. The safest method  
to get rid of them would be by giving  
the plants a careful sponging with solu-  
tion of whale oil soap or fir tree oil, and  
the insects may be removed more readily  
if the plants are given a dip in the solu-  
tion a short time previous to the spong-  
ing. W. H. TAPLIN.

### Heating A New Range.

ED. AM. FLORIST:—I am building this  
season six new greenhouses, four of them  
in a block covering a ground space 52x80  
feet, with no partitions. The north wall is  
six feet high, of wood, the south, east and  
west sides of the range nearly all glass.  
The other two houses, covering 26x80,  
are of the same character, eight feet dis-  
tant from the larger structure. All are  
thirteen feet to the ridge. For steam  
heating what size of boiler will be  
required? How many runs of 1-inch  
pipe will be needed in each house for 60°  
in zero weather? Will a 2-inch pipe be  
large enough to supply the flows and  
returns? If the boiler is set one foot  
below the walks of the houses can the  
main and return pipes be placed under  
the cross walks? J. Z. H.

A twenty horse power boiler will fur-  
nish all of the steam needed for the six  
houses, but the care required in operat-  
ing it will be less if a somewhat larger  
boiler, say thirty horse-power, is put in.  
In case it is desired at any time to  
increase the amount of glass, a boiler  
of this size would handle sixty per cent  
more. The inside houses can be heated  
with ten 1-inch pipes, but the number  
will need to be increased in the houses  
with glass in the south walls, one pipe  
being added for each eighteen inches of  
glass. It will be well to use 2½-inch  
pipe for the main flow pipes to each  
range, with 2-inch returns. The branch  
flow and return pipes to each house can  
be respectively 2-inch and 1½-inch.  
While a greater difference is desirable,

there should be no trouble about the  
arrangement of return pipes proposed, if  
the lower end of the coils is one foot  
above the walks. L. R. TAFT.

### Details of a Carnation House.

ED. AM. FLORIST:—In building a car-  
nation house 28x200 I need some advice  
regarding the amount of drop to allow  
the returns. I will heat with steam with  
the boiler in a pit at one end of the house.  
How much fall should I allow the returns  
and flows and what is the minimum fall  
that I can get along with from the pipes,  
after the steam has made the circuit, to  
where it enters the boiler again. I am  
unable to dig a very deep pit and drain  
it and I do not want to use a trap if I  
can avoid it. Also, the house is wooden  
frame, with 16x24 glass, ventilators  
hinged at ridge and two purlins on each  
side. In what way would you advise me  
to support it? C. W. C.

If the flows and returns are of ample  
size to permit the free movement of the  
water a very slight fall, say one inch in  
twenty feet, will answer, but care should  
be taken to give an even grade to the  
pipes. While three or four feet are desira-  
ble, there should be no trouble if the  
lower end of the coils is two feet above  
the top of the boiler. The arrangement  
for supporting the roof will depend upon  
the location of the purlins. If so located  
that the sash bars are divided into three  
equal sections, it will be desirable to have  
a row of one-inch gas pipe posts under  
each, but if one purlin is under the headers  
it could be supported by means of brace  
posts from those under the ridge.  
L. R. TAFT.

## OBITUARY.

WILLIAM FABER.

William Faber, of Allegheny, Pa., died  
on Wednesday, June 25, after a three  
weeks' illness of typhoid fever. Mr.  
Faber was 26 years of age, a well liked  
and highly respected employe of W. C.  
Beckert, the seedsman. He is survived  
by a young wife.

GEORGE CARP.

George Carp, Sr., died at Ashland,  
Ky., June 21, interment being at Wood-  
land Cemetery, Ironton, O. Mr. Carp  
was born at Burnham, England, March  
7, 1830, and for the past ten years had  
been associated with his son, William H.  
Carp, in the floral business at Ashland.

WM. G. BERTERMANN.

William G. Bertermann, of Indianapolis,  
died at Sacramento, Cal., on Sunday,  
June 29, of pulmonary troubles, from  
which he last December sought surcease  
in the mild climate of New Mexico, going  
thence to California. He was thought  
at one time to be considerably benefited  
by the change but to those of his many  
friends who had kept in touch with the  
progress of his illness his demise did not  
come quite unexpectedly, although its  
announcement was nevertheless a shock.  
Mr. Bertermann was born March 2,  
1857, at Wilhelmshöhe, near Cassel, Ger-  
many, where his father was overseer of  
the estate of the German Emperor where  
the third Napoleon was held a prisoner  
in 1871. William Bertermann came to  
America in 1872, preceding his brother,  
John, by some four years. Columbus, O.,  
was the first home selected by William  
but when his brother joined him they  
removed to Indianapolis, finding employ-

ment in the florist business. It was in 1879 that the two set up for themselves, buying the store of their employer, Gustav Lange, and at the same time building three small greenhouses, the first in Indianapolis to be heated by steam. The start was at 74 E. Washington street but after a few years the plant was removed to 241 Massachusetts avenue, its present location. The business passed through many vicissitudes but forged to the front and is now a model of its kind, with 25,000 feet of glass and a large, high-class retail trade. William G. Bertermann was a bachelor; he made his home with a sister, Mrs. Gertrude Pfifferman. In health he was an active worker in many public affairs and in secret, fraternal and trade societies. He was president of the American Carnation Society last year, but absence because of illness prevented his presiding at the Indianapolis convention. He was also a member of the Society of American Florists, of the American Rose Society and the Florists' Association of Indiana. Mr. Bertermann was a believer in the value of exhibitions to the florists' trade and was always a worker in the Indianapolis shows. He was a great traveler and had visited most of the important horticultural establishments in this country and Europe. His remains will be brought home from Sacramento for interment.

W. H. HALL.

W. H. Hall, who for the past fifteen years has been with W. Atlee Burpee & Company, Philadelphia, died suddenly from heart failure on Monday night, June 30, at his home in Tioga, Pa. Mr. Hall was in his forty-fifth year and had been connected with the seed business for more than twenty-five years. Ten years of this time he spent with the house of D. Landreth & Sons, having been employed at first by them at Bloomsdale and later traveling on the road through the south for them. In 1887 he joined the forces of W. Atlee Burpee & Company, with whom he has been ever since. At the time of his death he occupied a very responsible position as head of the freight and express order department. Mr. Hall was a widower and leaves one child.

CROMWELL, CONN.—On Wednesday, June 25, Miss Ruth P. Coc was married to Frank A. Pierson, elder son of A. N. Pierson. The ceremony was performed at the home of the bride's sister, Mrs. Russell A. Frisbie. Mr. and Mrs. Pierson are away for an extended trip to Maine, after which they will be at home in Cromwell.

### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By a thoroughly experienced young lady, who is a good designer, saleslady and book-keeper. Address G L, care American Florist.

NOTINGS OF A JOURNEY AMONG GROWERS AND RETAILERS.—SIGNS OF GOOD BUSINESS EVERYWHERE.—TRADE OPTIMISTIC AND BETTERMENTS IN ORDER.—NEW GLASS FOR NEXT YEAR.—PERSONAL DOINGS.

James Souden, manager for the Wm. Donaldson Company, has worked up a very fine retail trade. He has had great success with two-year-old roses, grafted stock as well as plants on their own roots, and will grow all he can of them in this way for next season. The teas are only slightly pruned, but the hybrids are pruned quite closely. The transplanting of the roses is pretty well advanced and Mr. Souden believes in retaining a portion of the old soil about the roots. He expects to have some cut-flower stock for the Kansas City flower show and is now planning two new houses, each 14x57 feet, for smilax and asparagus.

R. Will has had a fine crop of carnations the past season and the plants are still producing exceedingly well, although severely crippled by hail early last season. The 32,000 plants in the field are in splendid condition. Pæonias are grown here extensively, there being about 3,000 plants in good market sorts on the place at present, and it is the intention to increase the plantation extensively, the coming fall. A violet house 22x110 feet will be put up immediately and plans are under way for the erection of a range of rose houses, 60,000 feet of glass, this fall or early next year. Some fine beds of geraniums may be seen now on this place, especially General Garfield and Jean Viand.

Northrup, King & Company will open a handsome new store this fall in the Dayton building, Nicollet avenue and Seventh street, for the wholesale and retail sale of seeds, plants, cut flowers, etc. The establishment on Hennepin avenue will be continued as heretofore.

T. Hall, of the Lakewood Cemetery, says the past season has been an unusually busy one with him. Two of the houses here will be rebuilt this summer and three new ones added, each 16x100 feet.

John Monson, of the Minneapolis Floral Company, has some fine Kaiserin roses coming on for the summer trade.

Otto Will, with several others from the Twin Cities, expects to attend the S. A. F. convention at Asheville next month.

Smoke from a small fire in the building occupied by Rice Brothers did them a slight damage June 21.

There is very little good cut flower stock now in market and prices are well maintained.

H. Barsch reports good business for the past season and stock pretty well cleaned up.

The florists of the Twin Cities will have a picnic about the middle of July.

Visitors: F. X. Kindler, St. Cloud, Minn.; Will Desmond, Anoka; M. Barker, Chicago; J. F. Marshall, Des Moines, Ia.

**Springfield, Ill.**

The firm of Brown & Canfield has been dissolved, Mr. Canfield retiring to build a range of greenhouses in the southwestern part of the city for cut flowers for the wholesale markets. The business will be carried on by A. C. Brown, who established it in 1884. The firm had built up a nice trade in wholesale as well as retail lines, in plants, cut flowers and seeds. Mr. Brown proposes to push things briskly during the next season.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

J. W. KILEY, recently of California, is again located in Boston.

D. I. BUSHNELL, of St. Louis, is on his way homeward from Honolulu.

ALBERT McCULLOUGH, of Cincinnati, will spend his vacation at the seaside in the east.

ADAM CURRIE, of Currie Brothers, Milwaukee, is in California looking over the seed crops.

THE family of H. W. Wood, of Richmond, Va., will spend the summer on Long Island, N. Y.

G. B. McVAY, of the Amzi Godden Company, Birmingham, Ala., is en route to the Pacific coast.

THE demise of W. H. Hall, of Burpee & Company, well known in the trade, is chronicled on page 849.

F. L. ZIEGLER, formerly with the Geo. A. Weaver Company, has opened a seed store at 18 Broadway, Newport, R. I.

W. ATLEE BURPEE and wife proceeded on a tour to the Pacific Coast, via Vancouver, B. C., after the Minneapolis meeting.

E. C. DUNGAN, with Wm. Henry Maule, Philadelphia, has been inspecting the California seed crops and is now on his way home.

W. C. BECKERT and Mrs. Beckert, of Allegheny, Pa, have reached home, having been recalled from their trip to Japan by the death of their son.

It is now thought that seed peas will be about two-thirds of a crop this season and less than that if the weather continues unfavorable.

THE Schisler-Corneli Seed Company, of St. Louis, reports that business for the past few months has been the best yet experienced by that house.

DRY weather continues in the tuberose districts, with very little rain. Growers are doing all possible in the way of cultivation to keep the crops in growing condition.

J. CHARLES McCULLOUGH, Mrs. McCullough and their daughter, of Cincinnati, who had been delayed in their trip to Europe, sailed from New York July 1, on the Kronprinz Wilhelm.

THE crops on the trial grounds at Fordhook Farms, says Mr. Burpee, are looking fine just now, especially the sweet peas, notwithstanding all that has been written about inferior California seed of the latter.

S. F. LEONARD and his son, Edward, who went north fishing, to Clearwater Lake, Annandale, Minn., after the Minneapolis meeting last week, returned home to Chicago, July 2, well laden with bass and pickerel, some of the former weighing over four pounds.

THE present outlook for onion sets in the neighborhood of Chicago is from fifty-five to sixty-five per cent of a crop. The sets will probably be small and of good quality but the amount in bushels will be short. The recent rains have continued to work further injury.

It is reported that the Department of Agriculture at Washington have supplied market gardeners with names of European seed growers and as a consequence many gardeners were sending orders for European seeds to such sources.

VISITED CHICAGO: Returning from the Minneapolis meeting: J. E. Sloan, Palo Alto, Cal; Jerome B. Rice and party, Cambridge, N. Y.; John T. Buckbee, Rockford, Ill.; G. B. McVay, Birmingham, Ala.; C. H. Walker and R. R. Ricketts, Springfield, Mo.; Walter P. Stokes, Philadelphia; W. F. Jones, Hartford, Conn.; W. W. Templin, Calla, Ohio; Burnet Landreth, Philadelphia; F. W. Brugerhoff, New York; F. H. Battles, Rochester; C. P. Braslan, San Jose, Cal.

## The Wholesale Seedsmen's League.

The members of the Wholesale Seedsmen's League met at the West Hotel, Minneapolis, June 27, for the transaction of routine business. The retiring members of the board of directors, F. W. Brugerhoff, S. F. Leonard, Jerome B.

WALTER P. STOKES.  
(President American Seed Trade Association.)

Rice and S. M. Pease were again elected. The officers are: President, F. W. Brugerhoff, New York; vice-president, S. F. Leonard, Chicago; secretary and treasurer, Burnet Landreth, Philadelphia.

## The Western Seedsmen's Association.

At a recent meeting of the Western Seedsmen's Association, held at Omaha, Neb., all the old officers and committees were re-elected. The officers are: President, H. A. Johns, Sioux City, Ia.; secretary, Mel. L. Webster, Independence, Ia.; treasurer, J. O. Littlejohn, Independence, Ia. The society is making very favorable progress and is now represented in ten of the western states.

## Seedsmen Bowlers.

A number of exciting bowling contests took place during convention week at Minneapolis. Many efforts were made to induce Albert Dickinson to come on from Chicago and meet his competitors of former years, Fred. Barteldes and A. H. Goodwin, but he failed to respond.

The scores caught in one of the Minneapolis games were as follows: A. H. Goodwin, 123; A. T. Ferrell, 124; A. J. Brown, 134; F. Barteldes, 173.

## Walter P. Stokes.

Walter P. Stokes, the president elect of the American Seed Trade Association, is one of the most energetic and progressive men in the business. He is not one of those who believe that any employe around the office can get up the catalogues. In his opinion no one can make these properly but the man who has every detail of the business at his fingers' ends and he says that it is next to impossible to get a photographer to take good pictures for catalogue purposes. Mr. Stokes is a member of the firm of Johnson & Stokes, of Philadelphia, of which city he is a native, having been born there in 1856. On first going into business he engaged in the wholesale and retail grocery trade. Here he came in contact with a number of market gardeners who called on him frequently to fill orders for certain special strains of seeds, and thus he came into occasional consultation with H. W. Johnson, who was then manager for the late C. B. Rogers, one of the pioneers in the Philadelphia seed trade. This was about 1880 and two years later the relations and transactions of the two men were such that it was considered expedient to engage in the seed business exclusively on a partnership basis. The first start of the firm was accordingly made at 114 Market street. This building having been razed for improvements, the concern moved to 219 Market street in 1888, where in a few years the business developed to such an extent that the adjoining store was acquired, making a double front, five-story building running back 250 feet to the street in the rear. The business of Johnson & Stokes has continued to prosper notwithstanding that their heaviest customers include many of the most critical and exacting New Jersey market gardeners.

## St. Louis.

TRADE FALLS OFF WITH THE ADVENT OF JULY.—STOCK FAIRLY PLENTIFUL AND OF IMPROVED QUALITY.—VARIOUS NOTES OF LOCAL INTEREST.

The market is slightly changed from last week in that there is more stock and of slightly better grade, although there is still a shortage in white, owing to the call for funeral material. There has been a decided falling off in trade since Sunday but up to that time stock was pretty well cleared out every day. The cool and rainy weather of the last week has brought the sweet peas along in large quantities and some are very good, but the the best bring only 25 cents a hundred. Some very good Liberty, Golden Gate and Bridesmaid roses are coming in and bring up to \$5 and \$6 per hundred. Carnations can be had in large numbers at from \$1 to \$2 per hundred. Eldorado, Bradt, Morning Glory, Hill and White Cloud are the best.

The picnic of the St. Louis Florists' Club will be held at Priester's grove on Thursday, July 24, and all in the trade are cordially invited.

Mrs. Ayers is having new wagons made to take the place of those destroyed by fire a couple of weeks ago.

Theo. Faller is building an addition to his place. His stock is looking very fine.

Retail trade in the West End is holding up nicely. R. J. M.

# VAUGHAN'S PANSIES.

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

## VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; ½ oz., \$5.00; ¼ oz., \$1.50; trade pkt., 50c.

## VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimar-deau, the Giant Bugoot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, per ¼ lb., \$14.00; oz., \$4; ½ oz., 60c; trade pkt., 25c.

## VAUGHAN'S PREMIUM PANSIES MIXED.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past fifteen years and it has given general satisfaction. Per pkt., 25c; ½ oz., 80c; ¼ oz., \$3.00; oz., \$5.50.

## IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; ½ oz., 40c; ¼ oz., 60c; oz., \$2.00.

## MASTERPIECE—NEW GIANT CURLLED.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often three inches across, and the color variations and combinations are odd and striking. Pkt. 50c; ½ oz. \$1.00.

Send for our Mid-Summer Price List for Pansy Seed in separate colors and complete list of Hardy Perennials.

## Vaughan's International Chinese Primrose Mixture

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

**CHINESE PRIMULA**, Chiswick red; Alba Magnifica, white, blue, pink, striped. Each, per pkt. of 20 seeds, 50c; 1000 seeds, \$1.75.

**DOUBLE CHINESE PRIMULA**, white, pink, red or mixed, per pkt. 50c.

**CINERARIA VAUGHAN'S COLUMBIAN MIXTURE**. A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

**CALCEOLARIA HYBRIDA**, choicest mixture, pkt. 50c.

10 PER CENT discount on flower seed orders amounting to \$2 and over for Cash with order.

14 Barclay Street, NEW YORK, **Vaughan's Seed Store**, 84-86 Randolph St., CHICAGO.

# ROSE PLANTS

CHEAP TO CLOSE OUT.

Nothing but good stock sent.

## Carnations, Geraniums Cannas, Etc.

Prices quoted upon application.

The Cottage Gardens, Queens, L. I.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

FOSTER & GRIFFITH, the new firm of nurserymen at Fredonia, N. Y., report their first season a good one.

JONES BROS. & COMPANY, of Hobart, O. T., have been granted a charter to conduct a general nursery business. The capital stock is \$25,000.

THE 275 members of the North Madison County, Indiana, Horticultural Society will each plant catalpas to supply the need for fence posts which is in sight.

SHIPMENTS of apples from Portland, Oregon, September 28, 1901, reached Niuchwang, China, November 10. The fruit was in boxes 10x11x22 inches. The percentage of loss was: Red Russian, 75; Jonathan, 50; Spitzenberg, 10; Ben Davis, 2.

At the recent Pittsburg meeting of the entomological section of the American Association for the Advancement of Science, in discussing San Jose scale remedies, it was said that the lime, salt and sulphur wash has been found generally to be the most satisfactory.

THE Kingdom of Saxony has one of the best regulated systems of forestry in the world. The country is divided into twelve principal forest districts. The total value of forests is \$79,538,399, the income, as given in the latest statistics, \$3,246,976 per annum, at an expense of \$1,005,364.

CARL SONDEREGGER, of Beatrice, Neb., is enthusiastic over the outlook for fruit and fruit trees. His advertising in general has given good returns, but on being asked regarding the paying qualities of the German farm papers on his list, he said that the returns from them had been surprisingly large. He is already preparing for increased business next spring. He is planning to visit Switzerland, the land of his birth, this summer.

SUIT has been entered in the U. S. Circuit Court, at Pittsburg, by the Oregon Nursery Company, of Salem, Ore., against Effie L. Kemp, trading as the Village Nurseries Company, of Harnedsville, Pa. It is an action to recover \$7,817.75 damages for an alleged breach of contract. It seems that the Village Nurseries Company contracted to furnish the Oregon Nursery Company with 48,000 peach trees free from insect pests and disease. It is claimed that 46,785 trees were shipped from Confluence, Pa., to Salem and that the state inspector of Oregon pronounced them diseased and ordered them destroyed.

Fruit Raising in Japan.

The Japanese government is fostering the hitherto little practiced industry of fruit growing, and has introduced peaches, pears and grapes from Europe and America. The soil and climate are well adapted to them, so that their production commercially is already a success, but of the fruits wholly unknown in Japan until introduced from abroad, the apple has proved most popular. It has become a chief product of some districts in the Hokkaido, or northern islands.

The fruit is of fine appearance and excellent flavor, and the trees yield a profit very encouraging to the cultivator, so that the plantings are being rapidly increased.

Cleveland.

NEW RECORD FOR RAINFALL FOR JUNE — WET WEATHER INTERFERES WITH WORK OF ROSE GROWERS.—TRADE ON THE DOWN GRADE.—SOME GOOD STOCK.—VARIOUS NOTES.

June in this locality, proved to be the month of rain, as well as roses. Twenty-three days out of the thirty it rained. That is a new record for the Forest City. With one or two exceptions the rose growers will be from a month to six weeks behind time this year, all owing to their inability to get soil dry enough to cart into the houses. Carnations are beginning to suffer from the excessive moisture. The usual summer dullness is with us. Except funeral work there is nothing doing. Stock is plentiful; carnations are holding out fine. Testout, Kaiserin, American Beauty and Meteor, grown for summer work, are about the only good stock in the rose line to be had. Bride and Bridesmaid are off. Painesville nurserymen are sending in some grand Japanese irises. Liliun candidum is grown quite extensively in this vicinity by truckers, who dispose of them to the retail florists, and for funeral work they are quite acceptable. This week will wind up the lily of the valley for a couple of months. Some very fine stock has been coming into market lately.

Park Superintendent Kegg was a heavy loser at his own establishment during the recent severe hailstorm.

The boys are beginning to talk Asheville. Nothing definite is known as to the number going.

Another hailstorm struck us this week but fortunately without doing any serious damage.

John Merkel, of Mentor, is adding another house 20x120. ECHO.

Pittsburg.  
UNFAVORABLE WEATHER PUTS AN END TO THE GOOD BUSINESS OF EARLY JUNE.—STOCK IMPROVES UNDER THE INFLUENCE OF COOL TEMPERATURES.—PERSONAL DOINGS.

For the first twenty days of June the business situation was exceedingly active although the deteriorated condition of the rose stock was an impediment. From the period stated to the end of the month the weather underwent a complete change, becoming unseasonable in the extreme. Rain has been falling almost continuously and in some sections the temperature has been as low as 49°, so the lapse of trade for the last ten days is chargeable mainly to the April weather of late June. Roses are improving in quality. Some very fine Liberty, Bridesmaid and Kaiserin are to be had. Beauties are scarce and not so good. Bon Silene and Perle are also fair. Carnations are of a very high standard and demand for them is good. Lily of the valley is good but the supply is short.

J. B. Ferguson sold out his bedding stock much earlier than he thought possible and had to buy to fill orders. He now has 10,000 feet of glass and expects to add 2,000 feet more this fall.

Two consignments of cactus are now en route for the new cacti houses in Schenley Park. One consignment comes from Arizona and the other from southern Mexico.

The growers in this vicinity have their chrysanthemums planted and expect big results this fall.

A. M. Murdoch is displaying some specimen gladioli. They are the first of the season. E. L. M.

DUNKIRK, N. Y.—Wm. Schwan has had a good season and is planning to add another greenhouse to his range of three.

OSKALOOSA, IA.—The wet weather is delaying work on the Kemble greenhouses, which are being rebuilt. The ground level is being raised several feet, making considerable filling necessary.

**Anna Foster**

**A SPORT FROM THE BOSTON FERN.**

Certificates of merit from the Boston Flower Growers' Association, March 8; Mass. Horticultural Society, March 19; Penn. Horticultural Society, May 20, 1902. As good a house plant as the Boston and far more beautiful and graceful. There is no more beautiful fern for the trade than this. The Fronds will be as valuable for cut purposes as the Farleyense and much more prolific.

**Description**—Origin: Found by Mr. Foster Nov. 1900. A Sport of the Boston Fern

**Principal Characteristic**—Original type of Frond, each Pinna unwinding as in main Frond, making a miniature Frond itself, unwinding indefinitely.

**Sturdiness of Growth**—As easily grown as its parent the Boston; as free in producing Plants, as good keeping qualities in Dwelling.

**Beauty and Gracefulness**—Much finer foliage than its Parent. Quicker in making length of Frond.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Minneapolis.

In an afternoon contest at the Koppel & Carter bowling alleys, June 30, the following scores were made:

Table with 3 columns: Player, 1st, 2d. Rows include O. J. Olson, St. Paul; C. F. Rice, Minneapolis; F. X. Kindler, St. Cloud, Minn.; M. Barker, Chicago.

At Philadelphia.

The interest in the national contest continues to grow as the time draws nigh and the trial matches are getting to be quite strenuous affairs. The third contest was rolled on the Columbia alleys: which are elegant in appointments, although they do not have the finish of the up-to-date Brunswick-Balke. The surfaces appeared easy but the scores were not good. The point winners were: Anderson, 468; Dunlap, 455; Stanley, 440; Moss, 435; Habermehl, 432; Watson, 423; Westcott, 416; Adelberger, 416. The complete score follows:

Table with 4 columns: Player, 1st, 2d, 3d, Ttl. Rows include Starkey, Moss, Robinson, Polites, Habermehl, Kift, Craig, Gibson, Connor, Anderson, Adelberger, Westcott, Dunlap, Watson.

The following are the averages of games bowled on the home alleys for the month of June, where many a spirited contest takes place:

Table with 4 columns: Player, Av, Player, Av. Rows include Moss, Connor, Kuestner, Dunham, Bonsall, Mooney, Kift, Polites, Elmerman, Fletcher, Kirk.

K.

Cricket Among Philadelphia Gardeners.

The cricket season among the Philadelphia gardeners opened on Saturday, June 28, when John McCleary, with his team from Germantown, crossed bats with the gardeners principally from the main line section captained by John Thatcher, on the lawn of E Le Boutillier, Wynnewood, Pa. It was a two-inning contest and everyone played with spirit and determination. The Main Line team eventually won by thirteen runs, the light in the latter part of the second innings being bad for the losing side or it might have been still closer. The batting and fielding of Le Boutillier and the bowling of Blackman, for the winning side, the all-around playing of John McCleary, Jr., and Bovington, on the losing side, were the features of the contest and each won well merited applause. Edward Campbell and E. Le Boutillier were umpires and Wm. Fowler scorer.

It may be pertinent to remark the democratic spirit shown by Mr. Le

Boutillier in allowing the use of his beautiful lawn surrounded by real examples of good gardening in beds, trees, lily ponds, etc. These features were enjoyed and appreciated by all and inspired each to act his part in a manner becoming such a privilege. The score follows:

THATCHER'S ELEVEN.

Table with 2 columns: First innings, Second Innings. Rows include F. Le Boutillier, David Rust, J. Thatcher, E. Godley, H. Sharswood, J. Dodds, H. Roberts, F. Canning, J. Cullen, T. Tordoff, Extras.

Total.....45 Total.....51

M'CLEARY'S ELEVEN.

Table with 2 columns: First Innings, Second Innings. Rows include J. McCleary, W. Robertson, J. McCleary, Jr., D. Atkins, W. McCleary, H. Bovington, J. Thompson, W. Reed, M. Neely, F. McCord, D. Bletcher, Extras.

Total.....40 Total.....43

FRANCIS CANNING.

Base Ball at Natick.

The Waban Rose Company base ball nine having done considerable challenging recently, their defiance was answered last Saturday by a nine made up from the Boston Flower Market and retail stores in the city, who went out to Natick and won by a score of 26 to 18. The winning team was made up as follows: Hawkes, c; Norton, p; Nicholson, 1st b; Charnock, 2d b; Evans, 3d b; Lee, ss; Pierce, lf; Beck, cf; Tailby, rf. Mr. Montgomery extended generous hospitality in the line of refreshments and all the participants had a jolly time. Welch Brothers' employes are preparing to challenge the winners.

New Orleans.

HORTICULTURAL SOCIETY CELEBRATES SEVENTEENTH ANNIVERSARY.—A TRIP TO THE GULF.—EICHLING BUSINESS UNDERGOES A CHANGE.

The seventeenth anniversary of the New Orleans Horticultural Society was celebrated by a trip to Grand Isle. By taking a route different from the usual one we had the pleasure of passing our new large floating dock, where the largest men of war can find ample accommodation; also Port Chalmette, long to be remembered in connection with the South African war. Passing in sight of some of the largest rice and sugar plantations of Louisiana, we left the Mississippi fifty miles below New Orleans, reaching the Gulf through canals and lakes. Coming back by the same old way we passed the Bay of Barataria, celebrated for the quality of its oysters. The inhabitants of the island number about 500. The majority are cultivators who take advantage of the peculiar position of the place. The soil is not rich, still a few vegetables can be raised better and earlier than in New Orleans. During the past season 20,000 crates of cucumbers and about 200,000 cauliflower were shipped from the island. The trip was all that could be desired but we regret that only half of the society was present. Out of thirty strong, the members aboard were: J. A.

Newsham, M. M. de Lapouvade, John Eblen, D. Newsham, T. A. Chopin, M. Huber, John St. Mard, E. Eble, C. R. Panter, F. B. Fassell, Paul Abele, Otto Abele, J. Alost, E. Valdejo, J. A. Shalk and R. Eichling, also a number of invited guests.

The Eichling Seed and Nursery Company is closing up its business. The greenhouses, stock and so forth will be sold at auction July 9 and the seed stock, fixtures and so forth on the following day. C. W. Eichling will continue the business on his own account at the old stand, 129 Champ street.

M. M. L.

ASHEVILLE, NORTH CAROLINA.

'The Land of the Sky.'

The eighteenth annual meeting American Florists will be held at Asheville, August 19th to 22d, 1902.

Low rates have been made via Queen & Crescent Route and Southern Railway. Special train, composed of Pullman sleepers, will leave Cincinnati, Monday, August 18th, 2:00 p. m., via Queen & Crescent Route, and run through to Asheville via Southern Railway, arriving at Asheville next morning 7:00 o'clock.

Members will meet at Cincinnati and all go through together from there.

For sleeping car reservations and full particulars regarding rates, write

J. S. MCCULLOUGH, W A. BECKLER, N. W. P. A., Southern Ry., N. P. A., Queen & Crescent Route, 225 DEARBORN ST. 113 ADAMS ST. CHICAGO, ILL.

Society of American Florists

National Convention,

AUGUST 19th to 22nd, 1902,

ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at reduced rates from all "Big Four" stations.

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTENSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Nor. Agt. "Big Four", 231 S. Clark Street, Chicago.

**JOHN N. MAY, Summit, N. J.**

OUR DIRECTORY FOR 1902 WILL BE MAILED TO YOU PROMPTLY UPON APPLICATION. PRICE TWO DOLLARS.

St. Paul.

STOCK SCARCE.—ROSES IMPROVE BUT MUCH MILDEW IS SEEN.—BEAUTIES IN DEMAND.—DOINGS OF THE GROWERS.

The scarcity of flowers is daily becoming more and more apparent, with no immediate relief in sight unless trade should drop away entirely. Stock has improved a little in quality but much of it is badly mildewed. Beauties are very frequently called for, with but little stock to meet the calls. Sweet peas are becoming more abundant and sell readily. Swanson is cutting some fine long-florum lilies and May & Company some good lily of the valley.

The growers are busy replanting stock and repairing houses. One firm reports a cut of 91,000 roses during the season from 2250 plants, an average of over forty per plant. Golden Gates, Brides and Bridesmaids are grown.

L. L. May & Company have one bench of early chrysanthemums planted and are replanting roses, using last year's stock. FELIX.

The annual picnic of the florists of the Twin Cities is very much discussed these days and strong efforts are being made to complete arrangements so that it may be held next week. O. J. Olson, of this city, and Otto Will and C. F. Rice, of Minneapolis, are pushing the matter and should be given every possible assistance of the local trade.

The bedding at Como Park is very attractive this season. Pansies and Crimson Rambler and Queen of the Prairie roses are exceptionally fine, but coleus, abutilons, crotons and similar tender plants have thus far failed to start into growth owing to the cool weather.

C. Hansen is carrying over most of his roses another year, having found this system entirely satisfactory. He grows only grafted stock. Mr. Hansen has had some very fine pansies this season.

Holm & Olson are receiving some fine Queen of Edgely roses from Haugen & Swanson.

J. J. De Borions, with W. W. Seekins, of Duluth, is spending his vacation in this vicinity.

E. F. Lemke is rebuilding a portion of his Snelling avenue place.

A. S. Swanson is making good progress with his new houses.

Springfield, Mass.

TRADE SLACKENS AND STOCK IS EQUAL TO ALL DEMANDS.—RAMBLER ROSES FINE.—PARK TO HAVE GREENHOUSES.

Store men report business quiet, with plenty of cut flowers of fair quality to supply the demand. Sweet peas are coming in and are of good quality. Hardy roses have done well this spring and some very fine blooms were seen at Adams & Sons' nursery. Crimson Rambler is in its glory now and some very fine bushes are to be seen.

The Springfield park commissioners meet to-day to award the contract for building the greenhouses in Forest Park, donated by D. O. Gilmore. We hope to see some good man put in charge of same when completed. Mr. Ladd is the superintendent. A. B.

JACKSONVILLE, ILL.—Joseph Heisl is not going to add to his range this year but he will invest in a 35-foot brick tower with a big water tank on top. A boiler underneath will keep the water from freezing and the height will insure a good pressure in the houses.

CHINESE FRINGED PRIMULA.

Half trade packet of any of the following, 60c. Full trade packet of any of the following, \$1 00. A trade packet contains from 500 to 1000 seeds, according to the variety.

FUMIGATION METHODS

By PROF. W. G. JOHNSON Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for coppers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

Denver.

HEAVIEST HAILSTORM ON RECORD HITS GROWERS HARD.—MUCH GLASS BROKEN AND STOCK CUT UP.—OUTDOOR MATERIAL BADLY INJURED.—LIST OF THE LOSERS.—STATE OF TRADE—DOINGS OF THOSE IN THE CRAFT.

On Friday, June 27, there started a storm which played havoc with Denver florists. It rained very heavily that night and continued till Saturday noon, when we passed through about ten minutes of hail. Some of the greenhouses escaped untouched, while a few suffered only a little damage, but those who chanced to be in the belt received an awful beating. Considerable damage was done to young stock that had just been planted and field stock was badly cut up and knocked down. Vegetable gardeners also caught it badly and strawberries, of which there are great quantities grown here, are about done up. Cabbage plants proved very tender things before the hail. Flower beds, vases, and so forth, are badly cut up, as well as shade trees. The Park Floral Company was the heaviest loser and from the look of the place they seem to have held the center of the platform during the performance. All the houses show that they were hit and considerable damage was done to young stock, besides a field of outdoor plants laid low. They estimate their loss at about 13,000 square feet of glass. The Colfax Avenue Floral Company got off more fortunately, for while their place is of equal size and situated only two blocks from the Park Floral Company plant, their loss is only half as much. The Chapman Greenhouses, in West Denver, suffered heavily and place the loss at \$1,000. The above three were all insured. The Gallup Floral Company, although the place is small, got it about as hard as any. The place is right in the business part of town and presents a sorry appearance, about half the glass being broken. They place their loss at \$500, not insured. Mrs. Mauff's city place is badly damaged, while her large range of glass at Harmon escaped untouched. She was insured. Benson's new range of glass is about completed except glazing. He has it all planted up. The hail did considerable damage to the stock. His old place at Petersburg was untouched. Work was begun quickly on repairing and Monday morning all hands were busy cleaning up and getting ready for glaziers.

Business remains fair, mostly funeral work, of which there have been two or three good days. Stock is in ample supply for all demands, excepting sweet peas, which are poor. Perhaps what are left standing after our severe storm will do better.

There will be two picnics given by the florists this week, one by the Denver Florists' Club at Harmon Park and one individually by the Park Floral Company to their employes and families, up the Platte Canon.

W. J. Crowe, who has been out to California for the past two months, is back again. "Billy" says California is a great country and is telling great tales of things floricultural there. B.

**BEGONIA GLOIRE DE LORRAINE,**

HENRY EICHHOLZ, Waynesboro, Pa.

MEETING B. Y. P. U., PROVIDENCE, R. I.

The Nickel Plate Road will sell tickets July 7, 8 and 9 at one fare for round trip, with stopover at Niagara Falls and Chautauqua Lake if desired; also via New York City if preferred. For sleeping-car accommodations, call at City Ticket Office, 111 Adams St., or address John Y. Calahan, General Agent, Chicago. 23

Cincinnati.

GOOD WEATHER MAKES STOCK OF IMPROVED QUALITY.—SUPPLIES UNDER THE DEMAND—PICNIC PLANS.—THE CLUB MEETING.—A NEW ARRIVAL.—PERSONAL DOINGS.

Delightful cool weather the past week had a tendency to improve the quality of stock, particularly Brides and Bridesmaids, also of shortening the supply of these two most useful roses. Last week Thursday it was impossible to buy roses at any of the wholesale places, everything being sold out clean and the demand for flowers on this day was something extraordinary. The shipped stock does not arrive in the best condition and last week the writer saw a box of carnations arrive at one of the commission houses in such poor shape that they were consigned to the garbage barrel without further ceremony. No wonder the growers kick about the returns at times. Had this stock arrived in good shape every flower would have been sold, as carnations, too, were a little scarce. There is plenty of smilax, asparagus and adiantum on the market, also an abundance of sweet peas. The beginning of this week found business a little slow and stock more plentiful.

The programme for the next outing, July 24, is ready and it looks as though the florists are going to have all kinds of fun. There will be baseball, bowling, running races, sack races, fat men's races, quoit pitching and numerous other games. The ladies will also have their contests. The committee in charge has been very liberal in offering prizes for all events.

"Tom" Hardesty came over Friday morning, wearing an unusually broad smile. He said the stork had been at his home the night before and left a bouncing baby boy. Mother and son are doing well and we might incidentally add that the father will pull through all right.

The next meeting of the Florists' Society will be held at Chas. Pommert's place, Amelia, O., July 10. Trains will leave Carrol Street Station, C. G. and P. R. R., at 11:20 a. m. returning leave Amelia at 4:30 p. m. The fare for the round trip is 80 cents.

A. C. Kohlbrand, of Amling's, Chicago, is spending his vacation in this city, visiting relatives and renewing acquaintance with friends.

LANCASTER, PA.—Albert M. Herr is preparing to add a range of new houses to his plant.

# Roses AND Celery

Maid, Meteora, Golden Gates, Brides and Kaiserin, 3-inch, at \$3 per 100. Grown for own planting and are A 1 stock.

**N. F. McCARTHY, Treas. and Manager,**  
34 Hawley St., BOSTON, MASS.

Lowell, Mass.

LAST WEEK IN JUNE A GOOD ONE BUT IT BRINGS THE END OF THE BUSY SEASON.—ROSES SHORTEN UP AND TREBLE IN PRICE.—NOTES OF VARIOUS DOINGS.

This week will see the end of the commencements and weddings which have kept us on the move for the past few weeks. The supply of cut flowers continues to hold up well, although carnations seem to be gradually falling off in supply, due to the fact that some of the growers are throwing them out. The price realized on fairly good stock is only 25 cents per hundred, while the better varieties bring \$1 and in some cases \$1.50 per hundred. A week ago roses were abundant and could be bought for "any old price," but last week the receipts shortened wonderfully and with an unusually heavy demand the supply was soon exhausted. At times it looked rather doubtful about getting enough to fill orders. Brides and Bridesmaids that sold previously at \$2 and \$3 per hundred jumped to \$6 and \$8 for the same grade, while red roses were selling at a premium.

The past week has been a strenuous one down at Patten's, in Tewksbury, making preparations to plant out their enormous supply of carnation plants, which will be near the 50,000 mark.

A. M.

Washington, D. C.

Trade in general for June was exceptionally good. Many of the florists say they never had such good business in that month. But now trade is steadily on the decrease and as congress has adjourned and the entertainers have gone to the summer resorts, there will be little doing.

At the gardens and grounds of the Department of Agriculture they have almost completed two houses 10x140 for experimental purposes.

### Herbaceous Plant Notes.

In June, July and August the perennials in the gardens are at their best. A confusing number of species and varieties are then in full blast, all are pretty in their way and I find it difficult to decide which of them to mention, but in going over the grounds this morning I noticed a few of the rarer things in bloom and concluded to select a few of these for to-day's talk.

*Hypericum Coris*, though old, is scarcely known. It is a very neat and compact grower, with glaucous, linear, heath-like foliage, arranged in whorls around the slender, erect growth, which is terminated by loose clusters of five-petaled flowers, pure golden yellow and quite large for so small a plant, about three-fourths of an inch across and freely produced from June to September. The stems are woody and attain a height of from six to nine inches with us, rarely over that. The tips are occasionally winter killed, but as the plants break freely from below, the damage, if any, is soon repaired. A spring shearing is beneficial; the plants start more vigorously when so treated. They are evergreen and succeed in almost any soil with good drainage. We have had them here for some years, but I never mentioned the name under the heading of hardy plants, not being sure of its hardiness in this latitude. Now I do not hesitate to recommend it to all as the daintiest of all the hypericums. It is one of my favorites and ought to be everybody's.

*Centaurea orientalis* is an ornamental, branching plant with twice divided, archingly-bent foliage, silvery gray in its younger state. The stems attain a height of two to two and one-half feet and the numerous glabrous flower heads are borne on long, stiff stems, from June to September. Various colors are represented, ranging from bright bronzy crimson, deeper or lighter yellow and sulphur to almost white. It is a desirable cut flower and easily grown in border or field.

*Coronilla montana* is a compact, free flowering plant with bright yellow, many-flowered peduncles springing from the axils of the leaves as the growth elongates from June to September. It grows from six to ten inches high in central New York and has glaucous foliage, similar to the well-known tender *C. glauca* grown in greenhouses. Like all the *leguminosæ*, it does best in rather dry, well drained situations, is perfectly hardy, but a slow grower and should not

be disturbed when once planted in a suitable place, unless you should desire to increase the stock by dividing the old plants. As it can readily be grown from soft cuttings, I do not approve of this method of propagation in their case. The rockery is an ideal place for this coronilla.

*Digitalis Sibirica* has stems four to six feet high, with a yard or sometimes more of pretty flowers, ground color white or nearly so, veined and clouded purplish. It remains in perfection for a long time. The stems are branching along their lower half and often form candelabra-like pyramids of great beauty. An erect, robust grower, it is by no means coarse or spreading.

*Digitalis orientalis* has long, slender, self-supporting stems, with very numerous, small, straw-colored flowers. As in the above-mentioned species, the stems are branching but it is much dwarfer in habit, elegant and graceful. The height is two to two and one-half feet. Both are true perennials and perfectly hardy, like *D. ambigua*, not like the ordinary foxgloves of gardens, which are biennials. For a number of years I have been trying to hybridize the various biennials with the true perennials to obtain a greater variety of color, but am not yet prepared to report on the results, which, however, are, after a number of failures, promising at last.

*Eryngium giganteum* is perhaps the showiest in the family. The bluish, conical heads are very large and the involucre surrounding the flower proper, and the bracts around the nodes of the branchy stems, are silvery white, deeply divided and finely lacerated. The upper half of stems has a pale steel-blue tinge. The height is three or three and one-half feet when full grown.

*Eryngium alpinum* is another species worth mentioning for its attractive coloring. Fully one-half of the plant shows the deep steel-blue tinge on the stems, as well as on the bracts, but the plant is much smaller than the foregoing, being only one and one-half to two feet in height.

*Dianthus Knappii*, to my knowledge, the only yellow flowered hardy dianthus. It is easily grown when once you get it, but increases very slowly. The flowers are quite large, pure sulphur yellow and borne in small clusters, remaining in perfection for a long time. With all the dianthus, an open, well-drained, sunny situation is preferable and this rare species is no exception. Its height varies from eight to twelve inches.

The old *Aconitum tauricum* we rarely

see. I mention it here because it is the earliest of all the blues. Its long spikes are well furnished with large, deep blue helmet-like flowers and it is one of the best for cutting.

*Erodium Manescavi* blooms all summer. The flowers are very large, borne in long stalked, loose umbels, color a bright, pleasing shade of rose, with a slight tinge of purple. It is an elegant species and very free flowering.

*Genista tinctoria* does not seem to be appreciated as it ought to be. It is a half-shrubby plant, bearing terminal, racemose spikes of pure golden yellow, pear-shaped flowers. A patch on the rockery is at present a dense mass of yellow and will continue to make a show for six weeks to come. The tips of the branches are usually winter killed, but the plant wants an annual shearing back at any rate, else it would grow too straggling and therefore we never pay any attention to this fault, if we should call it a fault. A rather dry soil is preferable, though we grow some of our plants in a moist place on the borders.

J. B. K.

## CARNATIONS.

A HOUSE OF FLORA HILL.

There are in some quarters complaint of the results with Flora Hill, but Sidney Clack, of Menlo Park, Cal., is not one of the dissatisfied growers. The accompanying illustration shows that he has ample reason for complacence. The photograph was taken just before Easter. That same day 1,080 flowers had been picked in the house and for two weeks before the average had been from 720 to 960 a day. The flowers were of excellent quality and on good stems. They sold well in the San Francisco market, aver-

most of the stems exceed thirty-six inches in length. This is by no means an exceptional lot. The flower is a deep Bridesmaid color and the average size is three inches in diameter. This seedling is now in its fourth year with Flick & Faber and they find it as free a bloomer as one could ask.

### LESSONS OF THE WET WEATHER.

With excessive rains in almost every section of the country, now is a good time to decide whether or not your system of field planting is the best you can adopt for general results, and if not then there is no better time than the present, with the facts all before you, to decide which system you will follow for next season.

Planting on ridges, with space enough between the rows to get in with a horse cultivator, is far ahead of the ten-inch-each-way system of planting, and especially so for a season like this one; with me it is the best for all seasons.

If the ten-inch-each-way system, or, rather, the hand cultivator system, is all right for a wet season, then there is no use to make a change to any other, but from the looks of some fields I have seen where this system is in use, I would as soon think of sowing carnation seeds and expecting paying results next winter as by planting close on level ground in a wet season. The worst feature of the matter is that the stem rot does not stop in the field but is carried into the house and is a constant source of annoyance and loss the entire winter.

By planting on ridges and having abundant space between the rows you overcome all the difficulties from excessive rain, supposing of course that the land is properly drained, either naturally or artificially, so that it does not become water-logged. The plants on the ridges

cultivators, you can throw up to your ridged row a nice lot of this loose soil without disturbing the roots of the plants, and everyone knows that this deep mulch of loose soil along the row is the sort of treatment that gives the best results in dry weather.

Another point that has been hashed over so often that it seems as if every grower ought to remember it is to avoid throwing dirt into the hearts of the plants, either by hoeing or cultivation. There is nothing which will help along the stem rot fungus so much as to pile dirt around and into that portion of the plant that requires light and air for its proper development. This sort of treatment is bad enough at any time but in a wet season it is almost suicidal, yet I have this season seen some good growers (of other stock) using a hand cultivator with a wheel running each side of the row and the shovels throwing dirt into and around the top of the plant until less than half the plant's foliage was above ground. This sort of treatment is bound to bring stem rot to a greater or less degree in the field, and more especially so when the plants are housed.

There is not much chance for treatment outdoors but when carnations have been subjected to the culture described, the damage can be partially overcome by going over the patch carefully and cleaning all the soil away from the plants until they show not less than half an inch of stem between the first leaves and the top of the soil. After this has been attended to give the patch a good application of air-slaked lime, working it well into the soil. This done you have used about all the available means at hand to check the stem rot and keep it from spreading into the houses. This is not an infallible cure, but does the work in six or more cases out of every ten.

In speaking of stem rot I mean the sort of stem rot that takes the whole plant at one time, the kind that means a heavy loss to the grower unfortunate enough to get it in his stock. There is another form of stem rot that is present with most growers to a greater or less extent each season. This is the sort that affects the plant a branch at a time, eventually killing it. This sort does not spread with the same rapidity as the other, but is just as much to be fought against, by destroying every plant affected as soon as noticed in the patch; destroying them by taking them off the patch, not simply pulling them out and throwing them down, between the rows. Some growers claim that they have had good results from plants affected in this manner, simply cutting the diseased branches off, but it is not a policy to follow except in cases where stock is exceptionally scarce and then such plants should not be used for propagating purposes, as this sort of stem rot is hereditary.

ALBERT M. HERR.

HOUSE OF WHITE CLOUD GROWN BY SIDNEY CLACK, MENLO PARK, CAL.

aging as good returns as any white variety. It is Mr Clack who is seen in the picture.

### CARNATION MISS LOUISE FABER.

Flick & Faber, of San Mateo, Cal., with whom this variety originated, claim that Miss Louise Faber is the longest-stemmed pink carnation in existence. In the illustration opposite it can be seen that a yard stick is standing beside the vase of blooms and that

are cleaned up by each rain, instead of having the soil washed into their hearts, as is the case when planted on level ground.

The wide space between the rows admits of cleaning the patch and keeping the plants open to the air, even when continual rains do give the weeds a start. In dry weather, with the ridge system and horse cultivation you can loosen the soil to a good depth and then, with a hand plow, such as comes with all hand

### Brooklyn Horticultural Society.

The meeting of the Brooklyn Horticultural Society held Tuesday evening, July 1, was largely attended. President Ward occupied the chair. A constitution governing the society was submitted and after a few minor changes, adopted. It provides for a permanent organization. The annual meeting will occur the first Thursday in February, 1903. Officers will be elected for two years. The annual dues are set at \$5. The society intends to hold exhibitions at stated times and will bend its efforts to developing, in Brooklyn and district, a taste for things

horticultural. The field is wide, the opportunities many, and it is believed that much good work will be accomplished.

A very gratifying addition was made to the entertainment fund. The Long Island florists are responding nobly to the call for assistance along this line and a cordial and hospitable reception to the American Carnation Society next February will be the result of this liberality. There are, however, many more to hear from, and those desiring to help along the good work should send their contributions to the undersigned.

The society adjourned for the summer months, probably till October next. Beaulieu, Woodhaven, made an exhibit of dahlia and pansy flowers, receiving honorable mention.

ALEX. WALLACE, Secretary.

Box 1697 New York City.

#### Rose Society's Medals For Novelties.

The executive committee of the American Rose Society, at its last meeting, held on June 20, took final action upon the conditions under which its medals for novelties will be offered for competition at exhibitions of other societies. It was resolved that the gold medal and silver medal of the American Rose Society be offered to the Pennsylvania Horticultural Society and to the American Institute of the City of New York for competition at the March shows of these bodies in 1903; and to the Horticultural Society of Chicago for the fall show of 1902. In each case the conditions governing the awards of the medals are:

Gold medal for the best new rose not yet disseminated, whether of domestic or foreign origin. Exhibits to be judged by the official scale of the American Rose Society and no medal to be awarded to any rose scoring less than ninety-five points. Silver medal is offered at the same time and under the same conditions for a novelty scoring not less than eighty-five points.

It is further ordered that the complete scores of all the entries in the competition be filed with the secretary of the American Rose Society before the award of any medal is confirmed. No duplicate medals will be awarded. It is understood that though the award of the gold or silver medal may be made to the same variety from one exhibitor in different centers only one medal will be delivered to the exhibitor.

The executive committee of the American Rose Society reserves to itself the right of selection of the judges who shall pass upon the exhibits in the competition for these medals.

LEONARD BARRON, Sec'y.

#### Massachusetts Horticultural Society.

The exhibition of the Massachusetts Horticultural Society, scheduled for July 12, was held on Saturday, July 5, on account of the very forward condition of all garden products. It was in many respects an exceptionally fine show. The larkspurs from Mrs. J. L. Gardner were superb. So, also, was the herbaceous flower display from the Blue Hill Nurseries. The neat and instructive manner in which the latter were labeled was an object lesson to all other exhibitors for future imitation. Iris Kämpferi was shown in old-time perfection by Mrs. J. L. Gardner and others. Mrs. E. M. Gill's vase of flowers was the most skillful arrangement of mixed material seen here in many years.

CARNATION MISS LOUISE FABER.

The novelties were many. Joseph Tailby & Son showed a seedling calla, *Richardia alba maculata* × *Elliottiana*, the flowers lemon yellow and the foliage spotted with white. The specimen shown bore many flowers and received a silver medal. H. T. Clinkaberry received a bronze medal for *Cypripedium Mahleræ* var. *platytænum* (*C. Rothschildianum*), Trenton var. × *Lawrenceanum giganteum*) and J. E. Rothwell received a similar award for *Cypripedium Cowleyanum* (*C. Curtisii* × *niveum*). Certificates of merit were given to Oakes Ames for hybrid *Cypripedium l'Ansonii* (*C. Morganæ* × *Rothschildianum*), to J. E. Rothwell for hybrid *Cypripedium Frau Ida Brandt* (*C. lo Grande* × *Younglanum*), to George Melvin, gardener for Col. Chas. Pfaff, for superior cultivation of *Odontoglossum læve*, and to Arthur A. Brigham for a beautiful pure white variety of *Cypripedium spectabile*. Honorable mention was given to F. J. Rea for the hybrid *Wichuraiana* rose Dorothy Perkins and to H. A. Wheeler for *Shasta* daisy. Other exhibits of merit were roses, sweet williams, sweet peas and

herbaceous flowers from W. J. Clemson, delphiniums and herbaceous flowers from Carl Blomberg, *Cattleya Gaskelliana* and *Oncidium incurvum* from E. J. Mitton and Shirley poppies from L. H. Atkins.

The quarterly meeting of the Massachusetts Horticultural Society was held on Saturday, July 5. A large amount of routine business was transacted, including the admission of twenty-five new members, the presentation of a memorial of the late secretary, Robert Manning, and the appointment of committees to prepare memorials of the late H. H. Hunnewell and James Comley. The executive committee reported the appointment of W. P. Rich as secretary. A motion presented by Wm. H. Spooner was passed authorizing the appointment of a committee of seven members to prepare a revision of the constitution and by-laws and Messrs. Walcott, Jose, Rawson, Spooner, Saltonstall, Weld and Farquhar were appointed by the president, accordingly, the make up of the committee being equally divided between the progressive and conservative wings

of the society and Dr. Walcott, as chairman being equally acceptable to both. This action looks to a conciliatory settlement of the difficulties of the past few years arising from divergent views as to the best mode of government for this influential institution.

#### Four Generations.

Four generations of Henry Siebrechts—three of them florists and the fourth—is what we have in the accompanying picture. The eldest and the youngest are readily identified, but to decide as to which is "No. 2" and which "No. 3" will not be so easy for those not having a personal acquaintance with these estimable gentlemen, so here is a chance for a guessing match. It is permitted to but few families to present a group such as this. May the quartette remain unbroken for many years to come.

#### The Coronation Rose Show.

The unexpected illness of King Edward was not the only, although it was the greatest, intervention between the Royal Horticultural Society of Great Britain and the entire success of its recent London rose exhibition. In the first place, because of the unfavorable season, roses were not much in evidence, although as to some other subjects it was one of the best shows ever held. The announcement of the king's illness and the indefinite postponement of the coronation, as may be readily appreciated, threw a dampener on the whole affair.

Except of roses, the exhibits were in every way admirable, and of roses some good things were shown. Mr. Turner's standards of the Rambler type were very fine, having long, drooping well flowered branches, quite unique in their way, and most effective for decorations. Paul &

Son's group was also very attractive and contained some new things of the Rambler type. Frank Cant exhibited Lady Roberts in good shape. In G. Prince's exhibit Souvenir de Pierre Notting was most worthy of note. Dorothy Perkins, shown by Cutbush & Sons, is a rose of great merit.

The miscellaneous groups of stove and greenhouse foliage and flowering plants were a great feature. Cyphers' group was a glorious combination of choice orchids, crotons, ferns, dracenas, and other good things. Veitch & Sons and Fisher, Son & Sibray also made grand displays. Cutbush & Sons' group consisted chiefly of carnations, including Cecelia, yellow, and Avalanche, a good white. C. Blick, grower to Martin Smith, also showed carnations, the Cecelia being the largest blooms I have seen of any yellow variety.

H. Gow & Company staged some fine hydrangeas. J. Laing & Sons had some fine caladiums, tuberous begonias, streptocarpus and hardy flowers. Cannell & Son's great feature were cannas and aquilegias. Carter & Company staged a grand lot of gloxinias, with a fine mound of lily of the valley in the center. Sutton & Sons also had a fine display of gloxinias shown in a large glass case. J. Peed & Sons had good gloxinias and begonias.

The ferns from Hill & Son were one of the most imposing groups in the show, but too much crowded. In H. B. May's group there were some good ferns, but ivy and zonal pelargoniums were the feature. H. J. Jones also exhibited some good varieties of several sections of pelargoniums, Queen Alexandra, a new ivy-leaved variety being worthy of note. Prince of Wales, a variety of the H. Jacoby type, should become a valuable bedding variety. Davis & Sons staged one of the finest groups of begonias I have ever seen, the double varieties being

of enormous size and in great variety of colors. Blackmore & Langdon had a smaller group, but the varieties were of the highest quality.

The most attractive object in Wallace's exhibit was Sparaxis Fire King. In Mr. Perry's the water lilies and other aquatics were a great attraction. The St. Brigid anemones from Reamsbottom were very fine for the season. Dobbie & Company had a fine display of aquilegias and violas.

The nymphæas from Henry A. Dreer, of Philadelphia, U. S. A., attracted much attention and looked very fresh considering the distance they had travelled.

Barr & Sons' exhibit included many rare and beautiful hardy flowers. T. S. Ware had a large collection of hardy flowers, in which pyrethrums were fine. Kelway's pæonias made a gorgeous display. G. Bunyard & Company made a large exhibit, including a variety of hardy flowers and some fruits. Carter & Company also had a large collection of rock plants. Rhododendrons and kalmias were the features of a large group from J. Waterer & Sons.

Sweet peas were well shown by Jones & Sons and R. Sydenham. P. Waterer, an enthusiastic amateur, also made a tasteful arrangement of a few choice varieties.

Orchids occupied a large space, some superb collections being shown. Sander & Sons made a magnificent showing and many others put up good groups. The large collection of clipped trees from Cutbush were in grand condition.

The pretty pink verbenas Miss Ellen Willmott was shown by B. S. Williams & Sons, who also had some good ixias and other hardy flowers. Jackman & Sons made a nice display in which campanulas were a feature. The Misses Hopkins again came up with a fine display of Alpine plants.

Many other subjects were worthy of note if space would allow, but the above will give some idea of the extent and variety brought together for what would have been one of the most brilliant meetings of the season, had it not been for the unlooked for news of our king's illness.

H.

#### Notes on Aquatics.

In most sections of the country June weather was below the normal. While such was most satisfactory for hardy nymphæas and other hardy aquatics, excepting nelumbiums, it was disastrous for tender nymphæas, especially those planted early, or with the intention of being early, and thus securing the full benefits of a long season. In many cases it means replanting and although this replanting necessarily was done late in June it is surprising what satisfactory growth has been made. Flowers have been produced in three weeks on *N. gracilis* and its varieties. These facts are conclusive and, as has been stated before, to achieve the best results, the plants from the start should be subjected to no check or interruption in growth.

June and early July have favored us with many fine flowers on most of the hardy nymphæas and some of the newer varieties and those recently imported kinds that were not disturbed this spring have shown up to their best advantage, giving us the opportunity to make comparisons between the French and American hybrids. I think without exception, we have flowered every hybrid that has been disseminated in France or any other country and truly there are many beau-

FOUR GENERATIONS OF HENRY SIEBRECHTS.

A WEDDING DECORATION BY THE HUDDART FLORAL CO., SALT LAKE CITY, UTAH.

tiful varieties. The only trouble is that in numbers they are getting somewhat perplexing and the time has arrived when it is necessary to discriminate. There are several too much alike in color, others, again, inferior in size, as well as lacking distinct coloring. It has been our purpose right along, since the introduction of American hybrid nymphæas, not to introduce an inferior variety, and when a superior variety appears, to withdraw, or discontinue offering for sale, an inferior variety.

By this I do not mean that all small forms are discarded. Several of these possess beautiful forms and distinct colors and are suitable for different purposes, but the idea is to get and hold the very best, suitable for all purposes, and at the same time to offer only sterling novelties.

A connoisseur a few days ago asked another in my presence which he considered the best hardy nymphæas. He replied, James Brydon, Wm. Falconer, Gloriosa, Wm. Doogue, Rubra punctata and Gladstoniana. This really is the cream of any selection and of these two are of French origin. A writer in an English horticultural paper of recent date stated that "the best water lilies came from France." He would better soon make other acquaintances.

As usual there are more claimants for first honors and among them is one of the odorate group, named after a distinguished cultivator and lover of aquatics, W. B. Shaw. This is a seedling from *N. odorata Caroliniana*, superior in every way; color a rich deep pink, like a La France rose. It will rank high among pink water lilies.

This season a western grower of aquatics listed a new pink named Mark Hanna, claiming the same to be a hybrid of *N. Gladstoniana* and *N. Devoniensis*, and

superior to everything and asked a big price for it. There must be a wonderful difference in climate, soil or water, something very different between west and east, or else I have not got the right Mark Hanna, for the plants I have show no resemblance to *N. Gladstoniana* and less to *N. Devoniensis*. It is really an extra good *N. odorata rosea* and may possibly be worth one-tenth of what the originator asks for it. He has certainly made his "mark" amiss.

Among new French varieties *N. atropurpurea* and *N. Colossa* are distinct and worthy of note. The former is deep, brilliant crimson color, the latter delicate flesh pink. One would imagine it is of gigantic proportions but so far it is not by any means as large as *N. Gladstoniana*, but is nearer to an extra good *N. Marliacea albida*. Both these nymphæas resemble flowers of the *Marliacea* group.

At this season of the year ponds are sometimes affected by various forms of soft, slimy green growth, others again like threads. Where any such growth is troublesome and difficult to eradicate a simple method is to use Bordeaux mixture in any form. That with caustic lye or potash is preferable to lime, as the latter leaves a white deposit. A copper solution, ammonical, is perhaps the simplest and very convenient for use. This can be purchased from seedsmen or may be made by dissolving an ounce of copper carbonate in ammonia and diluting as necessity demands. An ounce is sufficient for ten gallons of water. It is only necessary to spray the surface of the pond occasionally or till the foreign growth disappears. The same remedy is also valuable in the case of any sporadic disease or spot, which occasionally affects some varieties of nymphæa during moist, warm, sultry weather.

WM. TRICKER.

#### Coming Exhibitions.

[Secretaries are requested to supply any omissions from this list.]

BOSTON, MASS., September 11-14, 1902.—Annual exhibition of plants and flowers Massachusetts Horticultural Society. Robert Manning, Sec'y, Horticultural Hall, 301 Massachusetts avenue.

BOSTON, MASS., November 6-9, 1902.—Chrysanthemum show Massachusetts Horticultural Society. Robert Manning, Sec'y, Horticultural Hall, 301 Massachusetts avenue.

CHICAGO, ILL., November 4-8, 1902.—First annual exhibit of Chrysanthemum Society of America and twelfth annual exhibition Horticultural Society of Chicago, to be held jointly. E. A. Kanst, Assistant Secretary, 5700 Cottage Grove avenue, Chicago.

KANSAS CITY, Mo., November 3-8, 1902.—Flower show, Convention Hall Directors, Kansas City, Mo.

LENOX, N. J., October 23, 1902.—Fall exhibition Lenox Horticultural Society. F. Herremans, Sec'y.

LOUISVILLE, KY., November 12-15, 1902.—Chrysanthemum exhibition, Business Women's League. H. Nanz, superintendent, Louisville, Ky.

MADISON, N. J., November 6-7, 1902.—Seventh annual flower show Morris County Gardeners' and Florists' Society. C. H. Atkins, Sec'y, Madison, N. J.

NEW YORK, N. Y., October 30-November 6, 1902.—Annual exhibition New York Florists' Club. John Young, Sec'y, 51 W. Twenty-eighth street.

PHILADELPHIA, PA., November 11-15, 1902.—Annual autumn exhibition Pennsylvania Horticultural Society. David Rust, Sec'y, Horticultural Hall, Broad street below Locust, Philadelphia.

PROVIDENCE, R. I., November 13-14, 1902.—Chrysanthemum exhibition Rhode Island Horticultural Society. C. W. Smith, Sec'y, 27-29 Exchange street, Providence.

SAN FRANCISCO, CAL., August 14-16, 1902.—Summer exhibition Pacific Coast Horticultural Society. Wm. Eldred, mgr., 1518 Mason street, San Francisco.

TARRYTOWN, N. Y., November 11-13, 1902.—Fourth annual exhibition Tarrytown Horticultural Society. Edw. W. Neubrand, Sec'y, Tarrytown, N. Y.

#### A Western Wedding Decoration.

The accompanying illustration is from a photograph in St. Paul's church, Salt Lake City, Utah, as it appeared June 10, decorated by the Huddart Floral Com-

pany for the Dern-Cunningham wedding. The principal flowers were longiflorum lilies and carnations, with palms and baskets of Asparagus Sprengeri. At the bride's home there were also elaborate decorations in white and pink, roses and sweet peas being used, with Asparagus plumosus. Some fine La France roses were employed in the dining room.

A recent very fine decoration by Huddart was for a reception where each room was done in a different color, the dining room, for instance, being in red, the flowers being American Beauty roses, red sweet peas and red carnations.

#### Chicago.

MARKET OVERLOADED WITH SOFT MATERIAL.—LITTLE LOCAL BUSINESS.—ROSES TOO POOR TO SHIP.—MANY MORE LILIES THAN USUAL.—RAINS CONTINUE AND GROWERS ARE RETARDED.—STOCK INJURED BY WATER.—DEMISE OF A LEADING BOHEMIAN.—A VARIETY OF PERSONAL AND TRADE NOTES.

The market has been in a bad way since the Fourth. Up to that day there had been less stock than was needed and everything sold, for qualities were good, but there is nothing doing on the national anniversary, yet receipts were large despite wholesalers' instructions not to ship, for the change to hot weather was forcing the buds open and the growers were helpless. The result was an oversupply which affords no prospect of a let-up until one of the almost daily heavy showers brings a cool wave, and then the relief will be only temporary. There has been very little local trade, the retailers buying lightly and making no attempt at window decoration, except with palms and Boston ferns, or a few auratum lilies. While there have been large receipts of roses, it has often been impossible to fill the few shipping orders which have come into the market, for the stock is again too soft to stand a journey. Of course, under these conditions, average returns have been very low, sales of roses at 10 cents a pot being not unusual. Carnations are faring a little better, but there are lots of them and they are too small to command much of a price. The few asters coming in are injured by the rains. The most pronounced over-stock in the market is sweet peas. They come in by the thousands and some of them, particularly those from C. W. Northrup, at La Grange, are very fine. They would have brought big money during the wedding season but now it is hard to move even the best of them and many thousands of the lower grades go to waste. There are unusually large receipts of auratum lilies and they, too, are moving slowly, while longiflorums were never so plentiful in July, although the principal cause may be that the receipts are accumulating, the only outlet being for funeral work. Gladioli are not yet in heavy supply. Since the weddings were over there has been a plenty of green.

And still it rains! The continuance of almost daily heavy rains is causing increasing concern to local growers. Not only is the fall of water injuring all stock in the fields but it is retarding indoor work. Those who have not benched chrysanthemums and replanted roses are having a hard time to get soil in fit condition for use. Many growers would bench carnations, rather than leave them out in the wet, if the soil was in shape.

Frank Holy, who had two stores on the southwest side, died at five o'clock

last Saturday morning of pneumonia. He was 51 years of age, a native of Bohemia, and had lived in Chicago for twenty-seven years, being engaged in the retail flower business nearly all of that time. He leaves four sons and four daughters, who will continue the business.

Freight does not enter largely into the florists' business, but, nevertheless, much inconvenience has been caused to builders, boiler makers, and others by the freight handlers' strike. No goods could be shipped out of Chicago in the early days of this week.

Kennicotts have had considerable water in some portions of their place during the recent heavy rains. When they have finished the improvements now under way they intend that the basement shall be absolutely water and gas proof.

P. J. Saunders, whose greenhouses at Cottage Grove and Fiftieth street have been demolished, is now located in a store on Cottage Grove just south of Forty-seventh street, under the name of N. Saunders.

The Moninger Company is very busy with hurry-up orders for greenhouse material. They say that one disadvantage of prosperity is that the factory hands are too independent to work overtime.

C. A. Roth, of Columbus, O., who was called this week, expects to go eastward, visiting a number of the principal cities, and will leave for the Asheville convention with the New York contingent.

Despite reports to the contrary, there was no quarterly meeting of the Horticultural Society of Chicago last Tuesday afternoon, but flower show matters are progressing satisfactorily.

W. N. Rudd says that they will have all the carnations beached at Mt. Greenwood Cemetery by July 15, the work having been begun in earnest last Monday morning.

Wm. A. Peterson, accompanied by Ben. Gage, Jr., of his staff, is sailing on Barnegat Bay, in New Jersey. They visited a number of nurseries en route east.

At last reports Deamud was still selling pæonias. The last of them did not do very well but he sold many thousands of dozens from Joliet this season.

John Muno is usually the first grower in this vicinity to begin replanting roses and he has his new stock now all on the benches and looking fine.

Mrs. C. L. Washburn is at Athelstane, Wis., where she has been several summers and where Mr. Washburn can run up for over Sunday.

Charles W. Erbe, of E. H. Hunt's, is carrying his left arm in a plaster cast as the result of an accident on July 3 which broke a bone.

Flint Kennicott is spending the summer at The Grove as usual and says there is no lack of moisture anywhere north of town.

John Reitmeyer says that he has about all the greenhouse building in hand that he can handle in the next few weeks.

H. C. Egan, son of W. C. Egan, of Highland Park, was a successful participant in the golf games last week.

John Brod, at Niles Center, is getting well along with his new range of houses. Wietor Brothers have planted 7,000 Timothy Eaton chrysanthemums.

Visitors: Victor Wayman, Madison, Wis.; P. Kapsalis, Milwaukee; R. S. Mackintosh, St. Anthony Park, Minn.

MONTPELIER, VT.—Ernest Jackobsen's flower store was burglarized one evening recently. The loss was \$25 and a watch.

#### New York.

BUSINESS VERY DULL AND STOCK HARD TO MOVE.—RECEIPTS ARE LARGE.—SUMMER FLOWERS ABUNDANT.—CUT FLOWER COMPANY HAD GOOD YEAR.

About all there is to tell in New York this week will be found in the "Pastimes" column. Outside of the club excursion, and that of the Bogart employes, which took place two days later, there is little of general interest going on. Business is as dull as it can be and the embarrassment is accentuated by the very heavy receipts of flowers, which far exceed any previous record at this date. They serve the purpose of keeping the wholesalers on the anxious seat all day as to their disposal but it cannot be expected that their sale will enrich the growers to any extent. Summer flowers, such as asters, auratum lilies, hollyhocks, gypsophila and so forth, add volume to the accumulations of roses, carnations and sweet peas.

The New York Cut Flower Company's annual meeting was held on Monday, July 7. Eugene Dailedouze was elected president, Henry Hentz, Jr., vice-president, and Mr. Hillman succeeds himself as secretary and treasurer. A very profitable year was reported and the treasurer's statement was very gratifying to the stockholders.

#### Philadelphia.

FLORAL EXCHANGE PLANTING LARGE ADDITIONS TO RANGE.—PINK BEAUTY WINNING INFLUENTIAL FRIENDS.—WEATHER HOT AND VACATIONS IN ORDER.—BUSINESS DULL.—LITTLE GOOD STOCK.—PERSONAL AND OTHER DOINGS.

The Floral Exchange has completed, and is planting Beauties in, the new house 63x300. It is a little different in the matter of uprights and braces from the one erected a year ago, but in the main the house is the same. Roses have done admirably in this house and it has fulfilled expectations in every way. Another range, ridge and furrow style, 60x100 and consisting of seven houses with no dividing walls is also finished and being planted. They have planted 12,000 Beauty and 10,000 Queen of Edgely. More of the Queen would have been set out but a large batch of the cuttings met with a mishap and this, together with a large demand, entirely cleaned them out. Myers & Samtman have planted about 5,000 Queen of Edgely and are very much pleased with the way the stock is looking. A few trial plants last season paid them very well and they say that almost the entire crop for next season is engaged. Edwin Lonsdale is also in line with 1,500, he being satisfied that it is quite equal to the Beauty as a money getter.

Edward Habermehl had a trying experience the past week, as he came near losing his three-year-old daughter by abduction. It seems a colored man who worked for him was discharged for cause and, threatening to be revenged, attempted to steal the little girl. The attempt failed, however, and the police are hot on his trail.

Business is good for the season of the year and very little good, or comparatively good, stock goes to waste. There are a few Kaiserin and Liberty roses about, as well as some Carnots that can be offered without apologies, but these, with sweet peas and some lilies and a few asters, complete the assortment.

It is red hot with us at present and how to keep cool is now the principal

topic. Many are taking short trips to the country and seashore. John Westcott and family, together with Mr. and Mrs. John Habermehl and family, spent a few days at the Commodore's cottage at Waretown last week.

The H. A. Dreer Company is doing all it can to cultivate a taste for perennials and each week during the summer one of the windows of the store is filled with flowers from the grounds at Riverton. All the specimens are correctly labeled and attract much attention.

George Waterfield has taken the old Butler place, adjoining Mr. Lonsdale's, and put it in complete repair. John Fertsch is back to his old love again and will help Mr. Waterfield make the old place blossom the coming season.

Charlie Grey, of Leo. Niessen's staff, is taking a team of ball players out to play the hustlers at Robt. Craig & Son's, Forty-ninth and Market, next Saturday.

Leo. Niessen is handling a lot of lilac candytuft that is very pretty and appropriate for funeral clusters and designs.

The interest in the national convention continues and from what we hear it seems that quite a number will take their vacation in the "land of the sky." K.

#### Indianapolis.

OBSEQUIES OF THE LATE WILLIAM BERTERMANN.—MANY FLOWERS.—DOINGS OF THE GROWERS.—CLUB PLANS OUTING.—VARIOUS NOTES.

The funeral of the late William G. Bertermann was held Saturday afternoon, July 5, from the residence of John Bertermann. Among a large number of friends and relatives were thirty members of the State Florists' Association, many of whom came from outside the city. Floral contributions were very numerous. A token from the society was a large broken column. It was a beautiful piece of work and Mr. Billingsly is to be commended. In place of the regular meeting in August a memorial meeting will be held by the society.

H. W. Rieman, who is remodeling his store, putting up an 80-foot brick smokestack, adding two new boilers and a large rose house, is getting along nicely with his work.

Baur & Smith are progressing well with their large carnation house. As it departs in many respects from the usual style, its building is being watched with interest.

The annual outing of the florists will take place July 23 at Broadripple Park.

The market is very dull, hardly any of the florists being in their places.

E. A. Nelson is camping and fishing on the Kankakee river. H. J.

#### Detroit.

TRADE HOLDS UP IN MOST UNUSUAL FASHION.—MUCH WEDDING WORK.—STOCK OF FAIR QUALITY AND GOOD SUPPLY.—CLUB MEETING.—VARIOUS NOTES.

Extraordinarily good trade still holding up gives little indication of the summer season being upon us, although it is true that funeral work comprises the most of it. There is, nevertheless, considerable doing in other work, including decorations for weddings, the season for the latter seeming to continue longer than in other years. Of flowers there is a good supply at present, of carnations of excellent quality and roses, fair for summer season. Some good candidum and auratum lilies are on the market and sell well. Greenhouse operations are

being seriously hindered by the incessant rains, occurring nearly every day during the past month. Many fields of carnations are much of the time under water and serious loss in that line is already apparent.

The club meeting Wednesday evening was well attended. Interest centered upon the coming convention at Asheville, many signifying their intention of going. Another outing was arranged to take place at Bois Blanc Island down the river on July 22. The trip will be by boat and a programme of amusements will be indulged in during the day.

Geo. A. Rackham and wife are on a visit to their son, Avery, at Summit, N. J. Before returning they will visit New York and other points of interest east.

A. Hupprich, the Michigan avenue pot manufacturer, is laid up with an acute attack of rheumatism.

Visitors: Chas. B. Weathered and Leopold Oesternei, New York; Harry D. Byers, Dayton. J. F. S.

#### St. Louis.

TRADE DULL BUT STOCK NOT OVERPLENTIFUL.—CARNATIONS UNDER THE DEMAND.—ROSES GOOD.—NEW GREENHOUSES AT BOTANICAL GARDEN.—VARIOUS NOTES.

Trade this week is somewhat at a standstill. Stock is improving but there is still a shortage on white carnations. Roses are much more plentiful than carnations. Some very fine Flora Hill, Ethel Crocker and Triumph are coming in and the best being as high as \$2 per hundred. Some very fine Golden Gate, Liberty and Bride roses are coming in but the first named are by far the best sellers and also best blooms. The best bring \$5 to \$6 per hundred. Very few Beauties are to be had. Gladioli are quite plentiful, and asters very good.

The new greenhouses that are being put up at the Missouri Botanical Garden are well under way and will make a fine addition. They will be used for growing purposes only. The aquatics here and in Tower Grove Park are fine as are also the new collections of roses in both of these parks.

The daily rains that we are now having are doing worlds of good to all plants outdoors and carnations in the field are showing marked improvement.

Mrs. John Young fell down stairs last Sunday, breaking her left arm and cutting her head.

Geo. Whiteman, formerly with F. M. Ellis, is now with H. G. Berning.

Alex. Siegel has closed his store for the two summer months. R. J. M.

#### Buffalo.

TRADE CONDITIONS SHOW THAT SUMMER HAS ARRIVED.—A WEDDING.—VACATION SEASON IS AT HAND.—PERSONAL AND OTHER DOINGS.

Summer is here in every sense of the word. Trade kept up until the last day of June in very good shape and the stores had about as good a season as last year, when the Pan-American made some extra business. There is a very fair supply of flowers, roses, carnations and fine sweet peas, which are greatly improved by the rain.

Will H. Grever, so many years with Adams and now the working partner of W. F. Bullock & Co., and Miss Emma Wagner, a very charming young lady, were married recently.

Palmer started the early closing on July 1, and has locked the door at 6:30

whether any others did or not. Of course not all close early.

Phll. Breitmeyer, of Detroit, has been paying his yearly visit to relatives in this city.

S. A. Anderson and family are going to Willow Bay for an outing.

J. H. Rebstock and family are now at Crystal Beach. BISON.

#### Cleveland.

FUNERAL WORK THE ONLY CAUSE OF ACTIVITY IN RETAIL STORES.—ROSES OF VERY LOW GRADE.—CARNATIONS READY FOR BENCHING.—GREENHOUSE BUILDING.—NOTES.

Vacations, renovations and early closing are the order of the day among the store men, for there is nothing doing outside of funeral work and a few shipping orders, but it is almost impossible to get stock good enough for shipping at the present time. The last few days of scorching hot weather placed the rose business *hors de combat*. Carnations are fair, especially the pink varieties. White is very scarce. Early planting of carnations is contemplated by the growers this year. While a great many plants have suffered somewhat from the continuous rains during June, yet what remain are, on the whole, in fine condition. The J. M. Gasser Company, The Essex Greenhouses and several other growers have plants of sufficient size for immediate benching.

The J. M. Gasser Company hopes to have its new range of 50,000 feet of glass completed in a couple of weeks. The inclement weather is responsible for the delay.

H. A. Hart has given up the notion of building this year and will confine his efforts to getting things in ship-shape order for the next season's campaign.

G. W. Smith, the hustling Wade Park Avenue florist, is adding another house 9x65 for ferns, also a show house to his neat establishment.

Harry B. Jones has gone on a month's vacation, which will include a trip down the St. Lawrence.

Adam Graham is getting uneasy and it would not be a surprise to see a house or two go up shortly. ECHO.

SALEM, MASS.—The Salem Floral Company, Essex street, has discontinued business.

LANDISVILLE, PA.—Jacob Trout is building a greenhouse and will go into carnation growing.

MELROSE, MASS.—The annual rose show of the Amateur Gardeners' Society took place on June 17.

FERGUS FALLS, MINN.—Spencer O. Tuve, the nurseryman, and Miss Anna Magnusen were married a few days ago.

TIPTON, IND.—J. H. Bornhoeft has bought the greenhouses formerly conducted by A. C. Anderson. He was formerly in business for himself at Chicago and has since worked for Gullett & Sons, Lincoln, Ill.; Stuart & Haugh, Anderson, Ind., and the South Park Floral Company, New Castle.

PLEASANT HILL, MO.—George M. Kellogg reports this one of the best seasons he ever enjoyed, particularly for the past six weeks, on outdoor stock. He is adding 50,000 square feet of glass to his range this season and has the new Beauty houses already up and planted. His range will hereafter contain 250,000 square feet of glass.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—8 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

ever space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts apply-  
ing only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

Now is the time to make the repairs.

THE success of the garden rose, with  
reasonable care, is very largely a matter of  
the selection of adaptable varieties.

ONE of the most interesting items of  
Cincinnati news has failed to appear in  
the weekly letter because of the modesty  
of our correspondent, Albert Sunderbruch,  
whose marriage with Miss Pauline Slou-  
smeister, of Cleveland, will be celebrated  
July 16.

PROF. L. H. BAILEY has announced his  
intention of beginning work at once  
upon the Cyclopaedia of American Agri-  
culture, supplementing the Cyclopaedia of  
American Horticulture but differing from  
it in that it will be a book of instruction  
rather than a reference work. Prof.  
Bailey told the nurserymen in convention  
at Milwaukee that the aim of his life is  
"the spiritualization of agriculture."

### Summer Advertising.

There is a trade in summer as well as  
in the fall or spring—not so much of it,  
to be sure, but trade there is, and trade  
is what every advertiser wants. If there  
is not so much going during the heated  
term, then there is so much the greater  
reason why dealers should advertise to  
catch what is going.—*Printer's Ink.*

### Chicago to Asheville.

Everyone from the west and north-  
west is invited to join the Chicago party  
to the S. A. F. convention. If you buy  
through tickets see that they read via  
Big Four railroad Chicago to Cincinnati.  
Write E. F. Winterson, 45 Wabash ave-  
nue, or the AMERICAN FLORIST and  
accommodations will be reserved for you  
on the cars from Chicago, which will be  
a part of the special train from Cincinnati  
to Asheville.

### Society of American Florists.

DEPARTMENT OF PLANT REGISTRATION.

H. Beaulieu, Woodhaven, N. Y., regis-  
ters the following named dahlia: Alex-  
ander Wallace, show; large flower, color  
bright red; stem fourteen inches or more;  
plant four feet high; bloomed in four  
months from seed and last year flowered  
steadily from July 12 till frost. Uncle  
Sam, cactus; color carmine, growing  
lighter; early and continuous bloomer,  
never growing over two feet in height.  
Mrs. E. T. Royle, show; flower three  
inches across, color of Daybreak carnation;  
height two and one-half feet; early,  
free bloomer.

WM. J. STEWART, Sec'y.

### Completes the List.

ED. AM. FLORIST:—I enclose check to  
renew my subscription to the AMERICAN  
FLORIST. I take a number of papers and  
magazines but my list would not be com-  
plete without this one.

Marlboro, Mass. W. L. LEWIS.

### Piping For Ordinary Temperature.

ED. AM. FLORIST:—How many 2-inch  
flows and 1¼ inch returns will it take for  
two connected houses 15¼x100, six feet  
to eaves and ten feet five inches to ridge?  
The location is central Ohio and the tem-  
peratures required are those for roses and  
carnations. The boiler is a Kroeschell  
No. 5.

For a 15¼ foot rose house three 2-inch  
flows and twelve 1¼-inch returns will be  
needed. Three flows and eight returns will  
suffice for carnations. If new pipe is to  
be obtained it will be better to use either  
eight 2-inch or ten 1½-inch return pipes  
for the rose house, and six 2-inch or  
seven 1½ inch in the carnation house.

L. R. TAFT.

### Greenhouse Building.

Springfield, Ill.—A. C. Canfield, range  
of houses.

Mentor, O.—John Merkel, one house  
20x120.

Landisville, Pa.—Jacob Trout, carnation  
house.

Marlboro, Mass.—W. L. Lewis, house  
25x80.

Washington, D. C.—J. R. Freeman, two  
houses 25x100.

North Leominster, Mass.—E. L.  
Durkie, one house.

Philadelphia, Pa.—J. L. Milner, four  
houses.

Rhinebeck, N. Y.—W. R. Tremper, violet  
house.

Fryeburg, Me.—W. Tarbox, one house.

Springfield, Mass.—Forest Park, house  
24x100

So. Manchester, Conn.—S. L. Cheney,  
vegetable house 40x100.

Whitman, Mass.—R. E. Moir, one  
house 150 feet long.

### Areca Lutescens.

ED. AM. FLORIST:—What is the best  
temperature in which to grow *Areca*  
*lutescens*? What does it require in the  
way of soil and watering? F. A. C.

This palm grows best in a temperature  
of 65° at night, a higher temperature  
than this making the foliage soft and  
also encouraging attacks of red spiders.  
In zero weather we prefer to let the areca  
houses fall in temperature to 60°, but  
consider this the minimum to produce  
good results. When using no artificial  
heat, say from June 1 to the latter part  
of September, a little ventilation is kept  
up throughout the night in order to  
avoid too much condensation of mois-  
ture on the foliage, and during the day  
abundant ventilation is given. A good  
rose soil will grow *Areca lutescens*, and  
the safest fertilizer is short stable manure,  
though chemical fertilizers and bone dust  
are also used to some extent, but it is  
well to use the latter with caution, for it  
is quite possible to over-do the enrich-  
ment of the soil for arecas with the  
chemical preparations and bone dust.  
Areca should never be allowed to become  
very dry at any time, there being more  
danger of injury from dryness than from  
over-watering with any well established  
palm.

W. H. TAPLIN.

### The American Chrysanthemum Exhibition.

We are pleased to learn that very satis-  
factory arrangements have been made  
by the Horticultural Society of Chicago  
for holding its next fall show and the first  
exhibition of the Chrysanthemum Soci-  
ety of America at the Art Institute,  
November 4-8 inclusive. The terms are  
more advantageous to the society than  
those made in any former year. The  
main exhibition hall is sixty feet wide by  
220 feet long and thirty feet high, with  
an annex 40x80 feet. The conference  
hall—a beautiful and commodious cham-  
ber—in the same building can be secured  
for meetings and discussions as may be  
found necessary. More delightful and  
appropriate surroundings for the great  
chrysanthemum renaissance of America  
could hardly be imagined and the build-  
ing is located in the very best section of  
the city for the accommodation of vis-  
itors of every class and from every  
direction. The preliminary list of pre-  
miums has been out for some time and  
copies of same may be had by addressing  
Edwin Lonsdale, Sec'y, Chestnut Hill,  
Philadelphia, Pa., or E. A. Kanst,  
assistant secretary, 5700 Cottage Grove  
avenue, Chicago.

### Will Build Greenhouses.

The rapid increase in the business of  
greenhouse construction has, in the past  
few years, led to the organization of a  
number of new concerns for the purpose  
of supplying the demand for buildings for  
horticultural purposes. The latest addi-  
tion to the firms in the field is the Pierson-  
Sefton Company, of Jersey City, N. J.  
The president of the corporation is  
Lincoln Pierson, for twelve years secre-  
tary of the Lord & Burnham Company,  
Irvington, N. Y.; the vice-president is  
Paul M. Pierson, the well-known rose  
and carnation grower of Scarborough,  
N. Y., and the secretary and treasurer is  
William Sefton, for the past six years  
superintendent of manufacturing and  
construction for Hitchings & Company,  
New York. The Pierson-Sefton Com-  
pany has purchased the patents of Paul  
M. Pierson and has a number of others  
pending. They have secured an admir-  
able manufacturing site on West Side  
avenue, Jersey City, and have equipped  
their factory to give them facilities for  
a large output during their first season.

### Meeting of American Botanists.

Section G of the American Association  
for the Advancement of Science, with the  
Botanical Society of America, met July  
1, in the Phipps Hall of Botany, Carnegie  
Institute, Pittsburg, Pa. The session  
was chiefly given over to the Botanical  
Society of America, and some interesting  
papers and discussions were heard. Many  
of the papers were illustrated either by  
blackboard drawings or by plates and  
photographs.

Past President Dr. B. D. Halsted read  
an interesting paper on "Two Centuries  
of American Botany." His paper dwelt  
upon the rudimentary state of botany  
years ago, and of its gradual growth  
and development into the science it is  
to-day. Other papers heard during the  
day were: "The Relations of the Botani-  
cal Associations of the Country," J. M.  
Coulter; "Suggestions for Ecological Car-  
tography," H. C. Cowles; "Fossil Ferns  
From the Laramie Group of Florence,  
Colorado," Arthur Hollick; "The Genus  
Gymnogramma and Its Treatment by  
English Botanists," L. M. Underwood;

"Studies on Reproduction of Gemmae of the Prothallus of Ferns," Mrs. E. G. Britton; "Tea Fermentation," by Dr. R. H. True, read by Dr. H. M. Richards; "Some Disorganization Products of Plant Cells," A. F. Woods; "Studies in Cyperus and Other Cyperaceae," N. L. Britton; "A Disease of Catalpa Speciosa," H. von Schrenk, and "The Geysers of the United States," by Miss V. S. White, was read, the author being unable to be present.

The Botanical Club of the association met in the morning at the Botanical Hall. The following papers were read: "Notes for Class Demonstration Material," M. T. Cook; "The Eastward Spread of a Fungus Grass Disease," Dr. F. L. Stevens. A new method for mounting algae was described. J. A. Shafer, of Carnegie Institute, exhibited interesting specimens of plants rare in Pennsylvania. President Shearer spoke of a new fern. By vote of the society an annual grant of \$500 has been made for the advancement of botanical research.

OBITUARY.

WM. M'ROBERTS, JR.

William McRoberts, Jr., of Govanstown, Md., lost his life on July 3 by falling into the large water tank at his place on Bellona avenue. Mr. McRoberts was a sufferer with epilepsy. While leaning over the tank he was attacked, fell into the water and was drowned. The deceased was born in Baltimore on August 20, 1854, but when about 9 or 10 years old moved to Louisville, Ky., where he lived until he was about 18 years old. He then moved to Indiana, where he remained for about six or eight years, after which time he returned to Baltimore county. Mr. McRoberts had a half interest in the florist business with William Breckinridge, and on the latter's death took full charge of the business. He was widely known as a skillful florist and competent landscape gardener. For many years he was a regular contributor to the AMERICAN FLORIST. The Gardeners' Club of Baltimore numbered him among its active workers and for several terms he was its president. His father, who came from the north of Ireland, still lives and Mrs. McRoberts, who was the widow of the late Archibald Breckinridge, survives with three children.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By all-around grower, 10 years in one place. Reference. West preferred. Wm. KIRKHAM, 148 Dearborn St., Chicago.

**SITUATION WANTED**—By a thoroughly experienced young lady, who is a good designer, saleslady and book-keeper. Address G. L., care American Florist.

**SITUATION WANTED**—By young man in commercial place, American, married, 5 years' experience. All references. Address HUSTLER, care American Florist.

**SITUATION WANTED**—By a young man, age 23, in a floral store; good designer and decorator, 6 years' experience, first-class references. Address STORE, care American Florist.

**SITUATION WANTED**—To learn growing roses, carnations and chrysanthemums. 5 months' experience in general greenhouse work. Moderate wages to start. Address Box 391, Des Plaines, Ill.

**SITUATION WANTED**—As assistant decorator and designer by young man 21 years of age; not afraid of work. Seven years experience in retail stores; best references. Address K. D., care American Florist.

**SITUATION WANTED**—A first-class grower of roses, carnations, mums and general stock, wants situation as working foreman. Best of references. State wages. Address R. S. 100, care American Florist.

**WANTED**—Two good carnation growers near Chicago. Address C. C., care Am. Florist.

**WANTED**—Good designer and decorator; must be a hustler for business. Box 1315, But'e, Mont.

**WANTED**—Married man, good gardener and greenhouse-man for country place. Mrs. P. R. KING, Delavan, Wis.

**WANTED**—Rose grower to take charge of section; steady position to right party. J. F. WILCOX, Council Bluffs, Iowa.

**WANTED**—Greenhouse men; steady work; will pay good wages. With or without board. Address R., care American Florist.

**WANTED**—Good rose, carnation, mum and violet grower. Want hustler; good wages to right man. SIMON HELMFIELD, Muncie Floral Co., Muncie, Ind.

**WANTED**—Two young men to work in greenhouses—Roses and carnations. State wages wanted with board. Address COLE BROS., Box 577, Peoria, Ill.

**WANTED**—Rose growers and helpers; also one man that understands growing chrysanthemums. The highest wages and steady work. BASSETT & WASHBURN, Hinsdale, Ill.

**WANTED**—A young man with some experience in greenhouse work. State wages with room and board. Must be sober, reliable and good worker. FRED. J. KING, Ottawa, Ill.

**WANTED**—A good florist, in a commercial place of about 35,000 square feet of glass; principally roses; wages \$10 per week. Apply with references to C. HANSEN, St. Paul, Minn.

**WANTED**—A young man with experience, for general greenhouse work; must be sober, reliable and a good worker. State wages wanted with room. References. Address J. A. BISSINGER, Lansing, Mich.

**WANTED**—Assistant in rose and carnation houses, also boy to learn the business. State age and wages wanted, including board and washing. Apply to JOHN L. WYLAND, De Haven, Pa.

**WANTED**—August 1, a young man with some experience in greenhouse work; must be sober, reliable and good worker. State wages with room and board, and give references. TH. F. VAN DER MEULEN, Dunkirk, N. Y.

**WANTED**—A young man who understands something about orchid and fern growing. State where last employed and wages wanted, with board. Address J. M. GASSER CO., Euclid Ave., Cleveland, O.

**WANTED**—Single man to take care of about 2,000 feet of glass, garden, lawn, horse and do a few chores around house. Permanent position. Wages \$30.00 per month and board and room. Address J. P. ESCH, Huron, Ohio.

**WANTED**—To lease, with prospect of buying, about 7,000 feet of glass, no stock, with good cottage and some land, near or within about one hundred miles of Boston. Write, stating details, GERMAN, care Wm. J. Stewart, 79 Milk St., Boston, Mass.

**WANTED PARTNER**—For a young man with business ability, of temperate habits and \$3,500 cash to pay for his share in the business, there is a fine chance to become active partner in a good paying commercial greenhouse business in Western New York. Write only if you mean business and give references to EXCELSIOR, care American Florist.

**FOR SALE**—Greenhouses, 4,000 square feet of glass, ground and dwelling; on electric car line and railroad; good retail business. Good chance for a young man. Address T., care American Florist, Chicago.

**FOR SALE OR LEASE**—Under favorable terms, florist's business at Chester, Pa., old established place, 15,000 square feet of glass, one acre of land. Good opportunity for energetic young man. Address JOHN J. LEUNEY, Chester, Pa.

**FOR SALE**—In Leominster, Mass., florist's business with large stock and supplies; best location in town. Owner is about removing from town and will sell out. This is your opportunity. Address A. L. WALKER, Leominster, Mass. Telephone 127-13.

**FOR SALE**—For \$8,000, good paying 8,000 sq. ft. greenhouses, dwelling, barn and grounds; in a city of Western New York, where a good up-to-date florist can be assured of success. Write only when you mean business and have the cash. FLORIST, care American Florist.

**FOR SALE**—2,000 feet second-hand greenhouse glass in good condition; no putty on. Price, \$3.50 per 100 feet. Also pipe, from 1-inch to 4-inch; not cast stuff; fittings and sash bars. Let me hear from you if you can use any of these. CHARLES HELM, Stevens Point, Wis.

**Wanted** EXPERIENCED TRAVELER to sell European Plants, Bulbs, Seeds, etc., to Wholesale Seedsmen, Florists and Nurserymen. Must be of gentlemanly appearance, healthy, sober and energetic. Steady position. State references, former occupation and salary wanted. Address confidentially, AUG. RHOTERT, 26 Barclay St., New York.

**A REAL CHERRY HARD WOOD ICE BOX** in good condition, size 5 feet 3 inches wide, 8 feet high, 3 feet deep. Price \$50.

**A PINE ICE BOX** 6½ ft. high, 1½ ft. long, 45 in. deep. Price \$25. G. A. DARDS, 341 Madison Ave., N. Y. City.

**FOR SALE.** Business twelve years established; greenhouses with 12,000 feet of glass, all well kept up, near R. R. station; hotwater heating in best of condition. Carnations, callas and smilax mostly grown. Good dwelling house. If you wish to go into business, try to find out how cheap you can get this. Address E. H., care American Florist, Chicago.

SPECIAL.

We have to offer to acceptable party only, a partnership in a large, old-established and growing nursery business, located near New York city. About 75 acres controlled, of which about half is owned by present proprietor and free from encumbrance. Business can be DOUBLED within a short time, (proof of which can be furnished, together with absolutely satisfactory evidence of what has been accomplished). A person of undoubted ability, either grower or salesman, especially desired. Detailed statement of past business will be presented for inspection to such parties as Actually mean business. For further particulars and information address

Cleary & Co., 60 Vesey St., N. Y.

New Glass FOR SALE.

We have 150 boxes glass, B. D. S. 16x18, more than we shall need for our own building, which we can offer at \$4.00 per Box.

J. A. BUDLONG, 37-39 Randolph St. CHICAGO, ILL.

Salt Lake City.

FLORISTS ORGANIZE FOR TRADE PURPOSES.—OFFICERS ELECTED.—A FLOWER SHOW FOR THE FUTURE.—MEMBERS WANTED.

The Salt Lake City Florists' Club was organized on the evening of June 27, at a meeting of about twenty members of the trade at the office of the Huddart Floral Company. Officers elected were: President, V. V. Morris; vice-president, Christopher Henerkey; treasurer, Thos. Hobday; recording secretary, Walter King; corresponding secretary, P. T. Huddart. Meetings will be held twice a month, on Friday evenings, the second and fourth, at the Huddart Company's office. The objects of the organization are similar to those of florists' clubs all over the United States. In the first place, fellowship and fraternal spirit are to be stimulated, resulting in closer business relations. The trade here is developing rapidly and many orders for stock are sent outside the city which could be filled at home, were home production encouraged and sustained. It is to be hoped that everyone in the craft will affiliate with the new organization. A flower show will be considered in due time.

The Salt Lake Floral Company is doing a fine business and is now adding five houses 16x165 to its plant. Mr. Mitchell says they will shortly open a retail store on Main street. V. V. Morris has the management of all their stores.

The Huddart Floral Company is renovating its place, anticipating many visitors August 12 to 14, when the Grand Lodge of Elks meets here, for Mr. Huddart is an active member of Salt Lake Lodge No. 85.

Thomas Hobday now has the entire management of the business of the B. C. Morris Floral Company.

Trade is at a standstill at present but, taking the past season as a whole, it was a very good one.

The Sugar House Floral Company is contemplating the erection of a carnation house 20x100.

Mr. Ulmer is the manager of a new firm which is erecting four greenhouses. J. M. Lonsdale has sold out his retail store to a Mr. Bloomsterberger.

Harry Parks has sold out to F. O. Poole & Company. P. T. H.

Baltimore.

The recent rains have been very fine for outdoor stock and bedding plants look well. The Charles R. Diefenderfer place shows the best work in the vicinity.

Charles L. Seybold sailed for Europe July 8, intending to visit Paris and his old home at Stuttgart.

Trade is now rather dull.

SCHENECTADY, N. Y.—Julius W. Eger has opened a flower store at 621 State street.

THE GARDENERS' CHRONICLE.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been for over SIXTY YEARS the LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4.20 per year. Remittances to be made payable to H. G. COVE.

CUT FLOWERS AT WHOLESALE.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

M. HERB has succeeded Herb & Wulle, of Naples, Italy, in business.

THE outlook for tuberosc crops has improved somewhat with local showers during the last ten days.

HENRY A. SALZER and wife, of La Crosse, Wis., with Mr. and Mrs. Schumacher, will sail for Germany about August 1.

VISITED CHICAGO: Theo. Cobb, representing D. M. Ferry & Co., Detroit, Mich.; J. A. Robinson, with Jerome B. Rice Seed Company, Cambridge, N. Y.

C. B. COE, formerly with D. M. Ferry & Co., Detroit, Mich., resigned his position with that firm a short time ago and is now farming at Grass Lake, Mich. Theo. Cobb has succeeded him on the road.

PROF. H. J. PATTERSON, of the Maryland Agricultural College, is conducting experiments with clovers and says that the American grown seed produces the strongest plants, with the Russian superior to other imported seeds.

THE prices of some vegetables on the Chicago market last week were interesting, as follows: Telephone peas, 1½ bushel sack \$2.50; Illinois State wax beans, bushel \$1.30; home-grown wax beans, 1½ bushel \$3.00; home-grown cabbage, crate \$2.25.

## Seed Work in the Department of Agriculture.

On July 1 the following changes were made in the work of foreign seed and plant introduction, the congressional seed distribution and the seed laboratory of the Bureau of Plant Industry, U. S. Department of Agriculture.

The work of foreign seed and plant introduction and of the congressional seed distribution has been combined under the head of Seed Introduction and Distribution, with A. J. Pieters, botanist in charge. Mr. Pieters has for several years been in charge of the seed laboratory. All communications in regard to the introduction of foreign seeds, plants and distribution should be addressed to Mr. Pieters, Botanist in charge of Seed Introduction and Distribution, U. S. Department of Agriculture. All communications in regard to pure seed investigations, as well as samples sent for test, either for purity or vitality, should be addressed to Edgar Brown, Botanist in Charge of Seed Laboratory, U. S. Department of Agriculture.

## Nebraska Seed Crops.

A correspondent at Waterloo writes as follows, July 7:

During the month of June we have had more cold weather, together with a light frost, and more rain than we have ever experienced before during the same time of year. This put our crops back in growth and also prevented suitable cultivation to quite an extent. Last Saturday night we had what might be ordinarily classed as a waterspout. Many of our fields are flooded and our rivers are bank full and still rising. What effect this is going to have on contract crops is hard to tell. My present estimate is that we have lost

THE TALLY-HO PARTY AT THE SEEDSMEN'S CONVENTION, MINNEAPOLIS.

fifteen per cent of our acreage. This may include some entire fields, but it will consist more largely of low spots in the different fields, on which the water has stood and destroyed the crops. We are having rain again this morning and it is hard to tell just what the outcome may be.

Generally speaking our crops started out in very fair condition, and if the rains cease we will stand a fair prospect of a good crop on the acreage remaining.

The large black squash bugs that injured the crops so badly last year, are already hurting them again this year, and in some cases have taken the crops. The melon louse is also appearing on some fields of musk melons. Every effort will be made to destroy the infected spots and save the crops if possible. This report will be followed by another if prospects change materially.

LA CROSSE, WIS.—The Salzer Seed Company is preparing to put up a new range of houses, having ordered the material shipped in a hurry from Chicago.

MANCHESTER, MASS.—The North Shore Horticultural Society held its annual rose and strawberry show at Lee's hall Thursday afternoon and evening, June 26. It was by far the finest exhibition yet given by the society, many of the wealthy summer residents being represented by displays indicating the high cultural attainments of Manchester's private gardeners.

## Marlboro, Mass.

W. L. Lewis has about 10,000 feet of glass in his range, all in good shape, and is now adding another house 25x80. He does both a good local retail trade and a growing wholesale business.

F. B. Gleason has sold out his store to Miss Grace Stevens, the young lady who worked for him, has closed his greenhouses and gone out of business.

**CALLA BULBS.**

Vaughan's Seed Store, CHICAGO, New York

Please mention the American Florist when writing.

### VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; ½ oz., \$5.00; ¼ oz., \$1.50; trade pkt., 50c.

### VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimar-deau, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, per ¼ lb., \$14.00; oz., \$4; ½ oz., 60c; trade pkt., 25c.

### VAUGHAN'S "PREMIUM" MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past sixteen years and it has given general satisfaction. Per pkt., 25c; ½ oz., 80c; ¼ oz., \$3.00; oz., \$5.50.

### IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; ½ oz., 40c; ¼ oz., 60c; oz., \$2.00.

### MASTERPIECE—NEW GIANT CURLED.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pa sy flowers, but they are crimped and curled in such a fashion that the fl wers appear double. The flowers are of enormous size, often three inches across, and the color variations and combinations are odd and striking. Pkt. 50c; ½ oz. \$1.00.

### "Vaughan's International" Primrose Mixture.

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. P t. (257 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.

**CHINESE PRIMULA**, Chiswick Red; Alba Magnifica, white; Blue, Pink, Striped. Each, per pkt. of 250 seeds #0c; 1000 seeds, \$1.75

**DOUBLE CHINESE PRIMULA**, white, pink, red or mixed, per pkt. 50c.

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

**CINERARIA VAUGHAN'S COLUMBIAN MIXTURE.** A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

**CINERARIA HYBRIDA, LARGE FLOWERING**, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.

**CALCEOLARIA HYBRIDA**, choicest mixture. pkt. 50c. **10 PER CENT** discount on flower seed orders amounting to \$2 and over for **Cash with order.**

## VAUGHAN'S SEED STORE, 14 Barclay Street, New York. 84-86 Randolph St., Chicago.

NOW COMPLETE IN FOUR VOLUMES.

## THE NURSERY TRADE.

## AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

VISITED NEW YORK: Chas. A. Maxson, of the Central Michigan Nursery, Kalamazoo, Mich.

THERE promises to be more fall planting this year than ever before. Orders for ornamental stock are coming along nicely.

EVERY nurseryman doing a retail trade should have a show ground. The visitors' appreciation will be apparent in the increased facility with which orders are booked.

PROF. L. H. BAILEY says that the American Association of Nurserymen should establish a bureau of publicity, to inform the members of constantly changing conditions and to aid in the development of new fields.

J. H. HALE is figuring on marketing some peaches this year. He estimates the probable crop of his Georgia orchard as 75,000 bushels, of his orchard at Glastonbury, Conn., at 25,000 bushels and of his Seymour, Conn., orchard as 20,000 bushels.

WILLIAM PITKIN, of Rochester, N. Y., secretary of the Eastern Nurserymen's Association, says that there is misapprehension as to the New York fumigation law. He says it requires all New York grown nursery stock to be fumigated if infested or grown near an infested place; also that all stock shipped into the state shall be fumigated by the party receiving it if it does not bear a certificate of fumigation. That is all there is to it.

## The Gypsy Moth.

When the available funds gave out and the work of moth extermination was temporarily suspended last week in Malden, Mass., the school children had brought in over 2,000 quarts of gypsy moths, for which they were paid 10 cents a quart. This gives a faint idea of the magnitude of this nuisance which, without constant and persistent fighting, is bound to spread over the whole country, causing inestimable destruction. On a visit to Malden a few days ago the ravages of the insect were impressively apparent in many localities. One colony on Glenwood street had completely stripped oaks, elms, apples and even pines and on Glen street, in addition to a similar destruction, the grass was also completely gone as though it had been swept by fire. At the Malden entrance to Middlesex Fells and for a distance of 100 feet into the reservation all the trees were stripped bare and an arbor-vitæ hedge left without a vestige of green attested the indiscriminate voraciousness of the pest. Although 17,000 egg masses were collected from the Dutton estate this spring, the caterpillars are now crawling over the sidewalks and buildings in vast patches, so close that they touch each other and at the railroad station it is found necessary to sweep the platforms half a dozen times a day. The worms dropping from the trees onto wagons, cars and clothing, are carried to other places more or less remote and thus the trouble is rapidly spreading.

## Cincinnati.

HOT WEATHER PUTS A QUIETUS ON TRADE.—CUT FLOWER STOCK POOR.—REGRET AT DEMISE OF MR. BERTERMANN.—PERSONAL NOTES.

With the mercury hovering in the nineties in the shade we think more of seeking the ice cellar than we do of business. It is certainly very hot and of course trade, in consequence, has fallen off considerably. Stock received is very poor and getting worse every day. This, however, is to be expected for this time of the year and now we can get ready to clean shop Frank Ball, of the Cincinnati Cut Flower Company, has already started to have things painted and cleaned up. Frank wants his vacation pretty soon and that is the reason he is hustling.

We notice by the last issue that Wm. Bertermann, of Indianapolis, has

passed away. He was well known in our city and leaves a host of friends to mourn his demise. I take this method of extending the sympathies of the craft in this city to the bereaved family.

At a recent funeral in this city we noticed a bunch of longiflorum lilies which contained 250 blooms. Quite a good sized bunch.

Miss Cronan has sold her interest in the ice business and will now devote her entire time to her flower store.

J. A. Peterson is first in the market with asters. He sent in the first lot Tuesday, July 8.

S. S. Skidelsky spent the Fourth in town and says he did not get much sleep. D.

WILLIAMSBURG, IA.—Hugh G. Williams, a nurseryman of this place, was married July 2, at Iowa City, to Miss Mabel Thomas.

....AN....

## OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kilt, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

## At Philadelphia.

The alleys used July 10 were more like the Florists' and the scores were better. The point winners were Anderson, Moss, Craig, Kilt, Robertson, Harris and Westcott.

Player	1st	2d	3d	T1
Moss	161	176	165	502
Watson	129	118	110	355
Anderson	155	201	154	510
Westcott	143	154	139	448
Adelberger	145	155	147	447
Harris	143	167	168	478
Dunlap	128	141	112	381
Robertson	138	146	191	474
Connar	129	138	168	435
Gibson	133	119	181	433
Kilt	141	188	167	496
Polites	131	138	167	439
Craig	184	178	159	521
Habermehl	167	142	124	433

This leaves the convention team: Moss, Robertson, Starkey, Kilt and Anderson, with Craig and Watson tied for the remaining place. K.

## Outing of the New York Club.

Monday, July 7, was a red-letter day in the social history of the New York Florists' Club and the energetic committee which, under the lead of H. A. Bunyard, has been laboring industriously for many weeks to make a success of the club's annual outing, has now the gratification of looking back upon one of the most enjoyable picnics ever held by a florists' organization. The weather was perfect for a ride on the water and every detail of the event was carried out in good shape. Two hundred and thirty-five, not including the smaller children, was the attendance, there being full as many ladies as gentlemen. Plenty of good music was furnished on the boat by a band and a bunch of "coons" with mandolins and melodious voices. The usual sea appetites were not lacking and the first 500 sandwiches had disappeared an hour after the boat had left the dock. Dinner was served in the pavilion at Witzel's Point grove. Then the various sporting events, for which a tempting array of prizes had been provided, were in order, and there was no end of fun for the spectators. The prizes, consisting of cigars, canes, watches, fans, bicycle sundries and so forth, donated by Messrs. Sheridan, Wallace, Weathered, Bunyard, Traendly, Elliott, Scollay and Clucas & Boddington, were spread out in tempting array on a table where all could admire them.

The baschall match between the married and single men developed some wonderful performers. The married nine lined up as follows: Mellis, 2db; Scollay, c; Wheeler, p; Phillips, 3db; L. Schmutz, Jr., lf; Rose, cf; Langjahr, ss; Barns, rf; Hildebrandt, 1stb. The single men were Brant, 1stb; Guttman, c; O'Mara, rf; A. Schmutz, p; J. Manda, ss; Kessler, 3db; Roth, lf; Fennich, 2db; Haydie, cf, with Scollay for coach, Morse, umpire. The single men won out by a score of 18 to 15 but the wives of some of them will be surprised to learn of their being "single." The married men never knocked the ball outside the diamond, yet the prize for the only home run made in the game went to one of their number, Mr. Wheeler, who didn't care what became of the box of

cigars but did want the "glory." Prizes for the most "base" hits went to Messrs. Traendly, Manda and Mellis.

Twenty-four ladies competed in the married vs. single ladies' bowling match, Mrs. Cook winning in the former and Miss Demusy in the latter. The three-legged race made the usual amount of sport, the winners being Masters Thielmann and Vonderschmidt. In the girls' race Miss Elizabeth Nugent and Lizzie Butterfield proved the fleetest and in the fat men's handicap the sprinters came in in the following order: Traendly, Nugent and "somebody's uncle" but it was generally admitted that Nugent made the most graceful performance. In the fat men's bicycle race Messrs. Traendly and Bunyard furnished the entertainment, the former coming in at a good pace, the latter performing a number of somersaults and other feats not provided for in the schedule. Masters Donaldson and Duncan were the winners in the boys' bicycle race. A game of quoits between Messrs. Herrington and Duckham, representing Madison, and Messrs. O'Mara and Manda, representing New York, was won by the former with a score of 21 to 11. The prize to which they were entitled, "nine-tenths of the gate receipts," has been chalked down to their credit on the ice.

On the return trip to the city, on the steamer, the prizes were presented to the winners by Mr. O'Mara in his customary happy manner. A group photograph of the party was taken and if it is not a good one it is not the fault of Mr. Phillips, who bossed the job.

## Denver.

ALL THE CRAFTSMEN PICNIC ON THE FOURTH.—FLORAL CLUB HAS AN OUTING AND PARK FLORAL COMPANY ENTERTAINS ITS EMPLOYEES AND THEIR FAMILIES.

Fourth of July was a day of recreation for the Denver florists, some going to the Denver Floral Club's picnic and sixty-five employes and their families attended the Park Floral Company's picnic at Deansbury. After the sports the party sat down to a good and welcome spread, served at the hotel. After dinner toasts were in order, Mr. Valentine acting as toastmaster. John Berry responded to the toast "Our Lady Customers" but John did not say all he thought. Philip Scott responded to the toast "Holiday Made." E. J. Reynolds was called upon to give a few words on "Our Traveling Salesman" and Will Crowe spoke for "Our Visitors." His speech, though short, was very neat and he was greeted with great applause. To Warren Smith was assigned the toast "The Dreams of a Night Fireman," and in Mr. Smith's dream all came in for a good-natured roast. Mrs. Philip Scott was asked to relate a few of the "Troubles of a Florist's Wife," but as "she did not want to squeal on her husband she could not say anything." J. A. Valentine was called upon for a few remarks and, with a bundle of wit thrown in, directed his remarks to those who had responded. In the games Phil Scott won the 50-yards race from scratch, and Frank Otto the boys' handicap from one yard. C. H. Garwood won the running broad jump and Roy Jackson the hop, step and jump. Roy Jackson and E. McDaniels won the three-legged race. Miss Evans won the ladies' race of thirty-five yards and Miss Evarts captured the peanut race.

About 200 people attended the Floral Club's picnic, which was held in Arlington Grove. As with the other picnic the

day was given over to sports and a merry time was had. A few good old Scotsmen being present, quoits were played and the true Scots came out ahead, for they say that Mr. Graham is the champion and willing to defend his title. At any rate the club now owns the quoits and as Mr. Graham says he will lay out the grounds, matches will be frequent. B.

FORT DODGE, IA.—P. L. Larson is enlarging his range by the addition of three houses 22x74, using double strength "A" glass, 16x18. He is also putting in a new fifty horse power tubular boiler.

ASHEVILLE,  
NORTH CAROLINA.

## 'The Land of the Sky.'

The eighteenth annual meeting American Florists will be held at Asheville, August 19th to 22d, 1902.

Low rates have been made via Queen & Crescent Route and Southern Railway. Special train, composed of Pullman sleepers, will leave Cincinnati, Monday, August 18th, 2:00 p. m., via Queen & Crescent Route, and run through to Asheville via Southern Railway, arriving at Asheville next morning 7:00 o'clock.

Members will meet at Cincinnati and all go through together from there.

For sleeping car reservations and full particulars regarding rates, write

J. S. McCULLOUGH, W. A. BECKLER,  
N. W. P. A., N. P. A., Queen &  
Southern Ry. Crescent Route.  
225 DEARBORN ST. 113 ADAMS ST.  
CHICAGO, ILL.

Society of American Florists  
National Convention,

AUGUST 19th to 22nd, 1902,

ASHEVILLE,  
NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at reduced rates from all "Big Four" stations.

Florists' Special train will leave Chicago 8:30 P. M. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 P. M. on the Florists' Special. Every Florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Nor. Agt. "Big Four", 231 S. Clark Street, Chicago.

# CHRYSANTHEMUMS.

Pittsburg.

BIG GROWERS MAKING MANY PREPARATIONS FOR ANOTHER PROSPEROUS SEASON.—CARNATIONS ON THE BENCHES IN UNGLAZED HOUSES.—TRADE NARROWED DOWN TO FUNERAL WORK.—VARIOUS NOTES OF VARYING INTEREST.

The Pittsburg Rose and Carnation Company is constructing one rose and four carnation houses. The carnation houses are without partition walls. The rose house will measure 50x450 feet and the carnation houses will be 50x350 feet. Iron frames and iron gutters will be used. Iron gutters are a novelty in this section, as only houses of very recent construction are equipped with them. In the four carnation houses the stock is on the benches, and all that is necessary to complete them is the glazing. In addition to the above a new 200 horse-power boiler is being placed and a new ice house erected. The room for storing the daily cut is 20x30 feet. The activity displayed in construction and improvement of the plant seems to indicate the company's confidence in another good season.

Business is at a standstill and the occasional funeral order is the only thing that breaks the monotony. The stock on the flower market is weak and sickly looking, but the weather conditions are sufficient excuse for the condition. The continuous fall of rain has ceased, and now the heat is intense. Kaisersins, Liberty and some fair Bridesmaids are to be had. American Beauties are scarce. Carnations are better than they usually are at this season, although they are becoming poorer each day. Gladioli, asters, sweet peas and lily of the valley are good and plentiful.

C. W. Ward, of Queens, N. Y., sent 1,000 Roosevelt carnations, at his own expense, to be placed on the speakers stand, on July 4, when the president was the guest of the city of Pittsburg. When the president finished his speech and departed from the stand a rush was made for the carnations as souvenirs of the occasion. Randolph & McClements had charge of the table and general decorations at the dinner given by Attorney General Knox to the president on the same day.

Wm. Clark, of the Pittsburg Cut Flower Company, is taking his summer rest, at his summer home at Sheridan, Pa. E. L. M.

VARIOUS DOINGS OF MORE THAN LOCAL INTEREST.—SPRING SEASON ONE OF THE BEST ON RECORD.—PREPARATIONS FOR NEXT YEAR.

L. H. Marquisee is building a new greenhouse and two additions. The new house will be 11x256 feet, one addition will be 14x31 and the other 18x31. The new house will be for propagating. Mr. Marquisee will commence housing some plants this month. Some of the Empire State have already been housed and a few of three or four other new seedlings.

Henry Morris is planting American Beauties and chrysanthemums. He will start building in a few days a house 27x100 feet for palms. He has finished putting in city water throughout his plant at Elmwood and has done away with the ram which formerly furnished him water.

A successful rose carnival was held at Geneva, N. Y., June 26. Among the large displays were fifty varieties of German iris from Henry A. Dreer, of Philadelphia. A large collection of Crimson Rambler roses, carnations and phloxes was received from Cottage Gardens, Queens, L. I.

The number of June weddings was greater than usual and, considering the bad weather, business during the month was good. There was more outdoor work this year than usual and all bedding stock was cleaned up.

Florists are generally out of coal, the long cold spring making it necessary to keep fire much later than usual. They are living in hopes that the coal strike will soon be ended.

Work has begun on the \$45,000 arch, the \$15,000 greenhouses and the \$20,000 office building, which James J. Belden gave to Oakwood Cemetery.

There were twenty rainy days in June and as one of the florists said: "Nothing is doing well but grass and weeds."

A. J. B.

Washington, D. C.

A. Gude & Brother have replanted six of their large rose houses, with Beauty, Golden Gate, Ivory, Liberty, Bride, Bridesmaid, Meteor and Mme. Chatenay. They are getting a nice cut of La France and Kaiserin.

Because of the improvements at the White House, the conservatories are being torn down and the plants removed to temporary houses near the propagating gardens.

There was a good deal of funeral work last week, many flowers being sent to the obsequies of Col. G. A. Shallenberger.

Columbus, O.

NEW CONCERN STARTS OUT WITH BRIGHT PROSPECTS.—SORROW AT THE DEATH OF WILLIAM BERTERMANN.—VARIOUS PERSONAL NOTES.

The King Avenue Floral Company, with a range of four houses, is making a good showing and has the right foundation for a model place. The houses are equal span, 20x100, running north and south. There is no reason why this new firm will not rank with the best in this locality, with such a man as R. H. Crabbe, who has been with the Livingston Seed Company for a number of years, at the head of the growing department, and S. W. Smith, one of our leading local business men, at the head of the business end of it.

The many Columbus friends of Wm. G. Bertermann were grieved to hear of his death. Mr. Bertermann lived in this city for four years, serving as an apprentice under John Underwood, father of the Underwood Brothers, now one of the leading firms here. His visits to Columbus were frequent.

J. C. Collom, of the Franklin Park Floral Company, will spend the summer with his sons, who are in business in New York.

The Livingston Seed Company is making an extra display of Boston ferns this week. They have some beautiful specimens.

CARL.

Lowell, Mass.

COOL WEATHER HOLDS BACK OUTDOOR STOCK.—GREENHOUSE WORK PROGRESSING RAPIDLY.—CUT FLOWER SUPPLY GOOD.—NOTES.

Up to the present time we really have had no hot weather; in fact, it has been so cold that the tender bedding plants have scarcely moved. This is especially true of such tender plants as coleus, ricinus and so forth. But it is an ill wind that blows no one good and the cool weather has been a blessing to the greenhouse men, who are taking advantage of it to push their work along. The supply of flowers holds up well, there being a plenty of everything except roses. Carnot and Kaiserin are in splendid condition just now, both in flower and stem.

John Haynes is enjoying his vacation this year in England, after an absence of nearly twenty years.

Geo. W. Patten is preparing for his trip to Salt Lake City and probably will go on to San Francisco.

All the stores now close at noon on Thursdays to give everyone a half holiday.

Arthur Mellor, at Patten's, is spending his vacation down in Portland, Maine.

Harvey B. Green is away on his annual trip, pleasure combined with business.

A. M.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, postpaid, \$1.00.

**UNFAVORABLE WEATHER CAUSES STOCK TO DETERIORATE.—OUTDOOR MATERIAL SERIOUSLY AFFECTED.—PERSONAL NOTES AND OTHER DOINGS.**

The weather conditions the past week have been very unfavorable for the production of flowers, it being wet, cold and then sultry and hot. It caused much mildew and what first-class stock there is brings a good price. The rainy weather has injured the outdoor flowers, so that they are not fit for market, and unless a change comes soon there will be little outdoor material for the remainder of the season.

Wm. Donaldson & Company have been busy with planting and getting things in shape for the coming season. They will make no addition this year but will probably drop hedding stock and devote their time to the growing of cut flowers. Ralph Lathom is again at Donaldson's.

Thos. Lyne, of the East Side Floral Store, is visiting friends in England. The store is in charge of his brother, James.

R. Will says ventilation is the great point in violet growing and his new house will be well equipped in this respect.

A. Rice is on a trip through southern Michigan. C. F. R.

**Louisville, Ky.**

**SOCIETY OF FLORISTS HAS A PLEASANT OUTING.—GROWER USES LARGE GLASS.—CARNATIONS DOING WELL—PERSONAL NOTES.**

The Kentucky Society of Florists held the regular monthly meeting at Fountain Ferry Park on Wednesday, July 2, and it proved to be the most pleasant meeting ever held. After the session refreshments were served and the evening spent in bowling and rowing on the Ohio.

C. H. Kuzman is having excellent success with his field-grown carnations this year. The glass in his new carnation house is 24x36, not 16x24 as previously stated.

Chris. Haupt, who has been ill with blood poisoning caused by handling plants and roses, is at his post again.

The weather has been very hot for the past week but cut flowers have been fairly good, all things considered.

Miss Carrie, daughter of Geo. Hodges, is spending her vacation in the valleys of Indiana. L. A.

# ANNOUNCEMENT.

**R**EALIZING the large and growing demand for high grade glass structures for horticultural purposes, the undersigned have organized a stock company, to design, manufacture, and construct such buildings and to supply the materials which enter into their construction. We have secured property on West Side Avenue, Jersey City, N. J., near the West Side Avenue Station of the Newark branch of the Central R. R. of N. J., which is admirably suited for manufacturing purposes. Our factories are new and equipped with machinery of the most approved type. We are in a position to manufacture and build a large amount of work of a high grade, quickly, thoroughly and economically. Mr. Lincoln Pierson has been Secretary of the Lord & Burnham Co. for the past twelve years, having had charge of the Architectural and Sales department of that company. Mr. William Sefton has been Superintendent of Hitchings & Co. for the past six years, having had charge of their Manufacturing and Construction department. During this period both have had a large and varied experience, having been responsible for the designing and construction of many of the largest and most notable glass structures in this country, including both park, private and commercial work. We have purchased the Paul M. Pierson patents, and have other patents pending which will enable us to erect a very much better appearing and more durable structure than any of the existing types of houses now on the market. While we can build a better house than any of the old companies, we can also build any of the existing types equally as well and as cheaply.

To all contemplating the erection of such buildings, we beg to be allowed to submit for consideration, plans, specifications and estimates of cost for their complete erection or for any of the materials needed therein. Our best services are at your command.

## THE PIERSON-SEFTON COMPANY.

### Seasonable Plant Notes.

A valuable portion of the stock of plants carried by retail dealers is found among those that are adapted for use in table ferneries and window boxes, for the filling of such receptacles requires considerable numbers of plants and also quite a variety of species. The use of window boxes is doubtless increasing in our large cities, and is a custom that should be encouraged by making the boxes just as satisfactory as possible, a satisfied customer being always one of the best advertisements for the man who supplied the goods.

Window boxes require a large number of plants in proportion to their size from the fact that an immediate effect is the only satisfactory one. Some of the large hotels and apartment houses use up a good deal of such material in a year, beginning in the early spring with hyacinths, tulips and other spring bulbs, following these with pansies and English daisies, after which come Boston ferns and foliage plants, and these in turn giving way to chrysanthemums, the latter to be followed as frosty weather comes on with small evergreens or other hardy stock.

Many factories have taken up this idea of window decoration, one of the first to do so having been a large tobacco concern in Jersey City, in which window boxes became a feature fully twenty-five years ago, and apparently the tobacco trade has taken up this feature in other cities also, for a factory of that character in Detroit was quite noticeable for the beauty of its window boxes during the year of the S. A. F. convention in that city. In Philadelphia, so far the utilitarian idea regarding factory buildings continues to be most prominent, and in consequence bare brick walls and windows unadorned are the prominent features of our factory district, but there may still come a change of heart among our conservative mill men, and we of the trade are a hopeful lot, anyway.

The location or exposure of a window has much to do with the plants that may be used in its decoration, and it must always be remembered that a narrow box containing many plants, little soil, and exposed to the wind besides, does not provide ideal conditions for plant growing. In addition, smoke and dust must be included in the calculation.

For window decoration in particularly dusty and smoky localities there is nothing more lasting than some of the many

forms of Aucuba Japonica, these various varieties differing in the variegation of the foliage and also in the habit of growth, some being much more dwarf than others. The foliage is not the only point of beauty connected with the aucubas for they also bear large and showy red berries that are especially attractive toward winter.

The aucubas are by no means difficult to grow or to propagate, the latter process being accomplished either by means of cuttings or seeds. Cuttings made from firm young growths four to six inches in length will root in sand in a few weeks and, from the fact that the plant in question is almost hardy, it will be readily understood that strong bottom heat would be out of place for the cuttings.

These young plants that have been raised in the spring should be potted off as soon as the roots are about half an inch long, kept in a temperature of about 55° until the weather is suitable for planting outdoors, and then put out in the open ground and treated just as one would young Hydrangea hortensis. In the autumn the young aucubas should be lifted before severe frost, potted into pots proportionate to their size, and may then be kept in a greenhouse averaging 45° to 50° at night during the winter.

Seedlings are also readily raised, but are quite likely to produce some variations from the parent plant, and it is therefore safer to depend upon cuttings for the perpetuation of any given variety. Another point that should be remembered is that all aucubas cannot be depended upon to bear berries, from the fact that the male and female flowers are borne upon different plants. It therefore becomes necessary to make sure of having both sexes among the plants and to fertilize the flowers at the proper time.

Standard grown plants of aucuba having a round head and a stem possibly two feet high were not uncommon a number of years ago, and when nicely berried are quite attractive specimens for house decoration, but naturally plants of this character require some time for their development, much the same as a standard bay tree.

Another nearly hardy variegated plant that has value for window boxes is Osmanthus ilicifolius variegatus, a shrub that much resembles a variegated holly and that, like the aucuba referred to above, may be exposed to light frosts in the autumn without injury. Osmanthus ilicifolius variegatus may also be propagated by cuttings, and may be readily

grafted upon the common privet, the latter being a good method for the production of standard plants.

Our old friend, the aspidistra, will naturally suggest itself for the window box, and whether it be the plain green leaves of the type or the prettily marked ones of the variegated form, there are but few plants with such tough and enduring foliage. Unless it has been already attended to, the division and repotting of aspidistras should be performed at once in order to get a good and well developed growth on them before winter.

The division of the old rhizomes of aspidistras has been noted before, but another reminder may not be out of place at this time regarding the fact that those under-ground stems that are so plentiful in an old pot or tub of aspidistra form very useful material for propagation, by being cut into pieces about one inch in length and then planted in a cutting bed with a covering of one inch of sand over them, or in shallow boxes, if it may be more convenient. Such cuttings seldom fail to start sooner or later, the stems in question having a dormant eye at nearly every joint.

Pittosporum Tobira is another shrub that may be used in window boxes. It has tough, dark green leaves somewhat like those of a rhododendron, the small white and rather fragrant flowers being succeeded by bunches of nearly black berries about the size of peas. This pittosporum is a rather short jointed hard-wooded shrub, introduced, I think, from Japan, and is not a new plant though more uncommon than those noted before, and is also slower in growth.

Some ivies, both green and variegated, must not be forgotten, the common English ivy being always in demand, provided one has strong, clean plants and neatly trained so that they may be either used as a screen or by the removal of the stakes may be planted to hang down. Another good ivy of the broad-leaved section is Hedera Algeriensis, while both the plain and the variegated forms of *H. poetarum* are good and may be used in the work referred to.

Several of the euonymuses are also useful, for these plants stand the trials of city life very well, *E. japonicus* varie-

gatus being a good example of the upright, bushy growers, while *E. radicans* variegatus is more given to a creeping habit. Both may be increased quickly and easily by cuttings of firm wood put in late in winter or early in the spring, the young plants being planted out in

THE LATE WILLIAM M. ROBERTS, JR.

(See page 877 issue of July 12.)

the open air for the summer and lifted and potted before severe frost.

W. H. TAPLIN.

## CHRYSANTHEMUMS.

### SPECIMEN PLANTS.

Specimen plants are now well established in the flowering pots. They will need careful attention in watering; the more vigorous plants will take it twice a day. Frequent syringing will be beneficial, and it may be done morning and evenings, too, on bright days. If they are plunged outdoors, the pots should be set up on bricks to keep the bases from

contact with the soil, unless it be a bed of coal ashes, when it would not be necessary.

Worms get in sometimes, and stop the drainage. This can be seen when the pots do not drain within a reasonable time after watering. Years ago, we were bothered with root aphides, "ants' crows," which they "larded." These are very difficult to get rid of. Soot water will clear them out in time, but if persistent, they should be immersed for half an hour or longer.

Plants which are grown indoors, will be getting into shape, and a few stakes will be required to keep them so. We used to keep our staking well up, but late experience shows it is as well, if not better, to just keep them together until a final staking a week or two before exhibition time. It is easier to regulate the shoots. We treat the outdoor plants in the same way. It is a bad plan to let the shoots trail on the ground. Beside its being difficult to get water under them when syringing, they lose many leaves for want of light.

Planted out plants are usually left too long. They should be taken up in August. There is then a better chance to get good root action, which means better foliage, and better flowers.

It is yet early to apply liquid manure. When given early, it is liable to cause a gross growth, which is difficult to ripen. The plants get surfeited, so to speak.

Our decorative varieties, generally small flowered sorts embracing many forms and including representatives of all types, are now being put into 8-inch pots. They will be large enough for our purpose.

Some of the most promising plants at the present time are Mutual Friend, Mrs. Trinker, a very fine white; Golden Shower, Mrs. Weeks, Lavender Queen, one of the finest in color; Miss Alice Byron, white; Elna, yellow, a good dwarf grower, and fine color; Zarnivara, Chestnut Hill, dwarf, yellow; Jubilee, pink; William Kennedy, purple; Hooper Pierson, yellow; T. Carrington, pink. Adrian, Bentley and Mrs. Wm. Fraser, among newer kinds, are showing well.

T. D. HATFIELD.

MACOMB, ILL.—S. T. Danley has a fine field of 18,000 carnation plants.

A FIELD OF IRISES AT THE ESTABLISHMENT OF ROWEHL & GRANZ, HICKSVILLE, L. I., N. Y.

# ASHEVILLE

“LAND OF THE SKY”

BILTMORE HOUSE, HOME OF THE VANDERBILTS, AT ASHEVILLE, NORTH CAROLINA.

(The annual convention of the S. A. F. will be held at Asheville next August.)

**A**SHEVILLE, the S. A. F. convention city, “land of the sky,” off the main traveled roads, few of those who will visit it in August conceive the character of the place. Those

who know all sing its praises.

“Carolina” has a southern sound and, in truth, the convention city is four degrees of latitude south of Washington and five south of New York. In distance by rail Asheville is from:

Buffalo.....	942 miles
Boston.....	950 “
Cleveland.....	705 “
Cincinnati.....	442 “
Chicago.....	747 “
Detroit.....	703 “
Louisville.....	394 “
Milwaukee.....	832 “
New York.....	705 “
Philadelphia.....	615 “
Pittsburg.....	853 “
St. Louis.....	817 “
Washington.....	478 “

But Asheville is not a southern city in any sense. Situated on a plateau 2,250 feet above sea level it cannot have a hot climate. Sheltered on the east and north by high mountains of the Blue Ridge and Great Smoky ranges, it cannot be cold. At a greater elevation than any city east of Denver, the climate is equable, neither hot nor cold, and without the sudden changes which make the seaboard and lake cities so trying. In the past twenty-five years the average winter temperature has been 38.87°, the summer temperature 70.72° and the mean temperature for the year 54.14°, which is just about the mean temperature of a number

of the world's greatest summer resorts, including Genoa, in Italy, Milan and Vienna.

Nor in population is Asheville typical of the south. It is a matter of common remark with those who visit Asheville that they always meet there people whom they know. It is a cosmopolitan population; of the 14,000 inhabitants only one-fifth of the whites are native. A little less than one-fifth the population is colored. People come to Asheville from all over the Union to breathe its lung-preserving atmosphere and, liking the place, settle there. But it is not a city of invalids.

Asheville is the commercial center of a region rich in natural resources. One of the principal occupations is hotel keeping but another is stock-raising and thousands of head of fancy beef cattle are annually marketed, mostly at Richmond, Va. With the present high prices for live stock, prosperity prevails on the farms and in the town. Truck gardening is a rapidly developing industry, where most people doubtless expect to find cotton the staple crop, but there is no cotton. Fruit growing is attracting attention, for the Winesap and the York Imperial, two of the highest-priced varieties in both the New York and Liverpool markets, attain great perfection here. The apple, not the sugar cane, is destined to become one of the greatest revenue producers for this region. Strawberries are a profitable crop and the Concord grape grown here is better than in the north.

The one thing about which there can

be no misconception is the character of the scenery about Asheville; the region is often referred to as the Switzerland of America. North and east of the city the mountains pile thousands of feet in the air and two miles from the city, on the steps of the mountain range, the white walls of the Vanderbilt chateau reflect the summer sun. This is the most magnificent home in America, being estimated to have cost \$3,000,000. The plans for the entertainment of the S. A. F. contemplate a tour of the estate of 10,000 acres laid out by the master hand of Frederick Law Olmsted. Ten miles of road traverse the estate and the most pretentious private arboretum in the world is well under way, the work having progressed for nearly ten years.

Another misconception of the Asheville trip is as to the expense attached thereto. Many florists have an idea that it is going to cost too high, but to those at equal distances it will not cost as much as the New York trip did. The railroad fares average the lowest ever granted the S. A. F. and good hotel accommodations in Asheville do not cost as much as in New York. Then again, in a town of 14,000 there are neither the necessities nor the opportunities for spending money afforded in the greatest city in the land. It will be not only one of the most novel trips the S. A. F. has ever taken, but it will also be one of the most satisfactory. Better make your plans now and go. Join one of the large parties if you can, from Chicago, Cincinnati, New York or Philadelphia.

## CARNATIONS.

### DANGERS OF EARLY PLANTING.

Early planting is the vogue in carnation culture to-day and there is no denying the fact that the stock is better in every way than when the plants were left in the field until danger of frost. But we must not give all the credit to early planting as the great improvement in varieties has more to do with the advance in the quality of the flowers than any one detail of culture. In addition, we now cater to the wants of our carnations with much more intelligence than we did a few years ago; if we do not, then neither early planting nor late planting will give us the high grade blooms the market demands.

One very prominent grower, the largest and most successful in his city, scarcely ever houses his carnations before the middle of September, but his houses are just right, and no detail of good culture is overlooked. Only the very best varieties are planted and the result is as good carnations as are grown anywhere. This shows that early planting is not the whole thing, but does not prove that early planting is not a good thing, as

if I am not very much mistaken, sterilizing produces the best results when done in lettuce houses and where done several times during the season. As sterilizing is likely to become a factor in the florists' business it would be well to secure some reliable information as to the length of time soil is benefited by it. If sterilizing will put the soil into such condition that, with good care, it will keep sweet for, say, ten months, then we could perhaps bring our planting several weeks earlier.

A point on which all growers seem to agree is as to the proper condition of the plants for early housing. If the plants have been growing soft and rank they are not in a fit condition to be taken into the confined air of the houses. No matter how good your ventilation may be, at this season of the year the air in the houses is several degrees hotter than outdoors, unless kept cool by an excessive amount of humidity, through syringing the paths, sides of the house and plants. The carnation is a water-loving plant, but an excess either in the soil or in the atmosphere will soon cause it to lose its vitality. This is another point against extremely early planting, as just the proper point to reach and stop

requires more care and attention than most growers are able to give.

The whole question resolves itself under one heading and that is to avoid extremes. There has been more money lost through extreme culture in our business than through any other one cause. Occasionally some extreme change in cultural methods will produce wonderful results and then the following season a host of imitators will make a complete failure of the same method, the originator of the method often being among the unsuccessful. Those of us who have to make our living from our business do not want to be left behind in the race for high grade flowers; neither can we afford to risk our whole season's crop by departing from known successful methods.

There are very few carnation growers who do not plant at least three houses to carnations and instead of planting the three in the month of July try one of them and the balance of your place at your usual time of planting. As an experiment it is worse than useless to plant part of a house, as that part is sure to be neglected at one time or another during the summer, but with a whole house at stake you will be inclined to let some other work go and attend to the carnations as they should be attended to. It may sound unprogressive, but for the man who only grows a house or two it is better to wait until the larger grower has made his experiments and found them practical and announced them through the trade papers, as he is sure to do.

ALBERT M. HERR.

### Boston.

GOOD SATURDAY SHOW AT HORTICULTURAL HALL.—CUT FLOWER TRADE VERY DULL.—SHIPMENTS HARDLY WORTH EXPRESSAGE.—NO STANDARD VALUE—DOINGS OF AGRICULTURISTS AND HORTICULTURISTS.—EUROPEAN VOYAGERS.—SEASON CONTINUES ADVANCED.—VARIOUS NOTES.

The exhibition at Horticultural Hall on Saturday, July 12, was quite extensive as regards native flowers and garden perennials. George Hollis showed some fine phloxes, W. J. Clemson a very large collection of named sweet peas, Mrs. J. B. Lawrence and Blue Hill Nurseries herbaceous perennials, and there was a good showing of hollyhocks from

KENTIA HOUSE OF HOLTON & HUNKEL CO., MILWAUKEE, WIS.

these houses are an exception to the most of those that are planted the middle of September.

Owing to the rapid growth made by the plants in the field this season one hears considerable about planting in the middle of July. Where every detail of good culture is carefully followed up, this may be a good thing to do, but for the large majority of growers August 15 to August 20 is a good time to plant, a little earlier or a little later, according to weather conditions. This gives the plants plenty of time to become well established in their new surroundings before the crop of flowers is expected.

We all know that constant watering in the houses over the hot summer of July and early August will sour the soil to a greater or less degree, and we also know that a carnation, even if it does not die outright with stem rot in such a soil, will become stunted and sickly; instead of producing high grade flowers in paying quantities, will give just the opposite results. This is the main objection to extremely early planting.

While I have no data to work from, I do not believe that sterilizing the soil will entirely overcome this objection, as

LATANIA HOUSE OF HOLTON & HUNKEL CO., MILWAUKEE, WIS.

THE NEW YORK FLORISTS' CLUB AT WITZEL'S POINT GROVE, JULY 7, 1902.

(See page 886, issue of July 12.)

E. L. Lewis and J. S. Crane. J. E. Rothwell was given a certificate of merit for *Cypripedium Lord Derby* (*C. Rothschildianum* × *superbiens*.) The display of small fruits was exceedingly fine.

Cut flower trade is as dull as it can be. Last week was even worse than its predecessor—large receipts of roses and carnations, most of which had to go to the street fakir because nobody else would touch them at any price. It is not likely the supply will continue so large, as the growers cannot get enough out of the shipments to make it pay to send them to the city. There is practically no standard of value at present on anything in the flower line.

The semi-centennial of the Massachusetts State Board of Agriculture will be celebrated with appropriate observance at Horticultural Hall on July 22. Many eminent speakers will give addresses. Among these will be Hon. James Wilson, Secretary of Agriculture; Gov. Crane, Lieutenant-Governor Bates and four ex-governors of Massachusetts.

The most notable feature of the arborway and other parts of the park system at present is the blooming of the beautiful Michigan wild rose, *Rosa setigera*. The winter was again unkind to them and many plants were killed back, yet the display is exceedingly brilliant.

Wakefield is worried over the ravages of the larvæ of the pine saw fly which has attacked fiercely and denuded sections of the splendid pine grove which has been the pride of the town. After having had to destroy some 600,000 nests of the brown-tail moth this seems rather severe.

Mr. and Mrs. W. W. Edgar sailed for England on the Commonwealth, on July 16. A. Leuthy also went on the same

steamer. James Rough is contemplating a trip later. Secretary W. J. Stewart has gone to Asheville on convention business.

The exhibitions scheduled for every Saturday in July and August at Horticultural Hall have all been set ahead one week owing to the forward season. Among the visitors at the show last Saturday was Dr. Robt. Huey, the rose expert, of Philadelphia.

Mrs. Endicott, wife of W. E. Endicott, for many years chairman of the library committee of the Massachusetts Horticultural Society, died at Canton on July 10.

Thomas Roland, of Nahant, of Lorraine begonia fame, is rejoicing over the advent of son number three, who came to his home on Saturday, July 12.

Extensive preparations are being made for the meeting of the American Park and Outdoor Art Association which takes place in Boston, August 5 and 6.

#### New York.

SMALL ATTENDANCE AT THE MONTHLY MEETING OF THE CLUB BUT MUCH BUSINESS DOING.—RESOLUTIONS OF SYMPATHY FOR THE FAMILY OF THOMAS YOUNG.—PLANS FOR ASHEVILLE TRIP.—TRADE STILL QUIET.—STOCK VERY POOR.—VACATIONS NOW IN ORDER.—VISITORS.

The July meeting of the Florists' Club last Monday evening was the slimmest in attendance on record, a fact for which the very warm weather was, no doubt, responsible. The business of the evening was confined mainly to committee reports. The Asheville transportation committee recommended that the 8 a. m. train on the Pennsylvania R. R. Monday, August 18, be selected. This will

bring the New York party in time to join the Philadelphians. It was so decided. The outing committee was not prepared to make a full report, but was able to say that the excursion had been a financial success. The members of the committee, as a whole, came in for some complimentary remarks for the successful manner in which the affair was arranged and conducted, and the secretary of the committee was mentioned as having contributed much in the way of original work to the success of the excursion. The committee on membership reported amendments to the by-laws, which were laid over until the next meeting of the club for action. The exhibition committee reported progress and announced a meeting of the committee for Wednesday, July 23, at 7 p. m., at the store of the president. Messrs. Wallace, Scott and Renney were appointed by the chair as the committee of awards for the evening and recommended a cultural certificate to H. Beaulieu for a collection of dahlias, very fine for the season. George Lawrence was elected a member of the club. The committee on resolutions on the death of Thos. Young, Sr., reported the following resolutions of sympathy:

WHEREAS, We, the members of the New York Florists' Club, having learned that Mr. Thomas Young, Sr., recently passed beyond this earthly sphere to his rest eternal, full of years and honors, called hence by the immutable decree of an all-wise Providence, and,

WHEREAS, We bow in humble submission to the will of the Great Ruler of the universe, yet we cannot fail to express our deep regret at his passing away from the scenes of his useful labors.

While not wishing to intrude with our regrets in the natural grief of his family, yet, having been associated so long in this association with his worthy sons, our esteemed fellow members, we respectfully and feebly ask that we be permitted to express to them our heartfelt sympathy in their great loss and sad bereavement. And be it therefore

*Resolved.* That we hereby and in this manner tender to the family of the deceased our sincere condolence in their hour of sorrow. They mourn the loss of a loving and loved parent, we mourn an exemplary citizen, a just and upright man, a generous and genial companion.

We desire to have it recorded that in losing him the community in which he lived has lost an honored member, the horticultural world a man who throughout his long, useful and honorable career played well his part in his chosen calling.

To his faithful helpmate, the revered partner of his joys and sorrows for so many long and pleasant years, we tenderly offer our sympathy, coupled with it a prayer that the God of Love and Mercy may lighten the heavy sorrow which has fallen upon her, that He may give her strength to bear her great affliction.

We offer her such solace as is ours to give and hers to receive at our hands, not wishing to open afresh the wounds of her grief, but to aid as best we may in assuaging the pain. May the soft lullaby of merciful time soothe her and the sweet memories of her departed life partner sustain her. God rest his soul. And be it further

*Resolved.* That these resolutions be spread in full upon the minutes of this club and a copy of same be sent to Mrs. Thos. Young, Sr.

PATRICK O'MARA.  
CHAS. B. WEATHERED.  
ALEX. WALLACE.

The president announced the following members of the nominating committee for next year's officers: John Morris, C. W. Ward, Jas. Donaldson, S. C. Nash, John Phillips, S. S. Butterfield and W. S. Rennie. A communication was read from the secretary of the plant breeding conference, inviting suggestions from the club. In moving the acknowledgment of this letter Mr. O'Mara made some very timely and interesting remarks on the effect of the work to be done by the conference in that it would prove educational to the public and employers present and prospective. Mr. O'Mara was, on motion of Alex. Wallace, appointed to represent the club at the conference.

Business is at a standstill. The receipts of roses are still disproportionately heavy, but the stock sent in as such can hardly be honored by the name of roses. Most of it is the raggedest kind of rubbish ever seen. Sweet peas are still a daily avalanche. They are well sold if they bring a cent a bunch. Carnations are on the downward path as regards size of flower, but the stems grow bigger and bigger. There are heavy shipments of gladioli coming in and a few asters of fair quality are seen.

Vacations are in order. J. I. Raynor is an absentee this week. Mr. Mallon, the sage of Brooklyn, is about to start for a six weeks' sojourn at Mattituck, where he will fish and crab and incidentally reflect on the serious problems his friends, the commission men, have to face in July, and on his return may be expected to emit some rare philosophy. John Kral, of Moore, Hentz & Nash, goes away for three weeks, and after his return the boss will have a chance at it.

J. Fleischman says that his new apartment hotel on East Thirty-first street, built at a cost of \$700,000, has been leased for twenty-one years at \$50,000 per year.

Wm. F. Kaeting, of Buffalo, sailed for Europe on the S. S. Kaiser Wilhelm der Grosse July 15. He expects to return about September 2.

Visitors: W. J. Palmer, Buffalo; W. J. Elliott, Pittsburg; Mr. and Mrs. Ohlmer, Washington, D. C.

#### Philadelphia.

SUMMER FLOWERS NOW SUPPLEMENT THE GENERAL STOCK.—DOUBLE WHITE PETUNIAS HANDY FOR FUNERAL WORK.—DISTINGUISHED VISITORS.—PERSONAL NOTES.

Asters are now coming along in fair shape. The colors are varied, there being good white, purple, lavender and shades of pink. They make quite an addition to the general stock, which is now at its low-

est ebb. Water lilies are also to be had in quantity and quite a show can be made with them for little money, which is a strong point these dull summer days. S. S. Pennock is getting quite a lot of gladioli from the south. They are good but not quite so long in the stem as they grow with us. Kaiserin, Carnot, Liberty and Meteor, with some Golden Gate and a few left over Beauties, make up the rose assortment. Prices range from \$4 to \$6 per hundred, with perhaps a dollar or two more for something a little extra. Double white petunias come in handy at this season for design work, as white carnations are scarce and at from 25 cents to 50 cents per hundred they also have the advantage of being much cheaper.

We were honored on Wednesday with a visit from Patrick O'Mara, W. J. Stewart and Robt. Halliday, who came to consult with President Burton. Messrs. Stewart and O'Mara proceeded on to Asheville to make final arrangements for the convention.

Robert Craig is still at Summit, N. J., and we are glad to say he is reported on the mend. We sincerely hope to soon see him home again.

W. W. Crawford, son of Robert Crawford, Jr., sailed last Wednesday for a three months' European trip. K.

#### Chicago.

CUT FLOWER MARKET IN THE MIDST OF ITS DULL SEASON.—LITTLE LOCAL BUSINESS AND SHIPPING ORDERS HARD TO FILL.—STOCK TOO SOFT TO TRAVEL.—DOINGS OF THE GROWERS.—CARNATIONS BEING BENCHED EARLY.—A NEW GERMAN ROSE AT EVANSTON.—VACATIONS NOW THE ORDER OF THE DAY.—PERSONAL DOINGS AND OTHER NOTES.

This has been another very quiet week in the wholesale market. The city trade is very light, the local retailers, particularly those of the better class, reporting business as practically dead. Samuelson, Wienhoeber, Fleischman, Smyth and Wittbold all say there is nothing doing except an occasional funeral order. The people upon whom these stores depend for their trade are always away for weeks at a time in the summer and little is to be looked for from them before the middle of September. The stores the customers of which are not of the class which summer at the seashore are doing a little better, but not much; none of them can use more than a very little stock. Shipping trade is holding up better than the city business but the orders are usually small and, at that, it is sometimes impossible to fill them, for the stock averages so poor that sometimes it is not possible to pick out shipping material. Under these conditions of course the small percentage of tight buds brings good money and the great majority of the wide open stock fetches almost nothing at all. Rose prices, therefore, range from 25 cents a hundred to 10 cents apiece, the latter for some of Bassett & Washburn's good Liberties. Carnations run all the way from 20 cents a hundred to \$2, the whites doing the best, but some of the wholesalers complain that the keeping quality of the stock is even less than usual in summer. The receipts are falling down each day but asters are more plentiful, so that the carnations will not be missed. Wietors are cutting some very good asters. The glut of sweet peas is not so heavy, although receipts are still above requirements. Lilies the buyers do not seem to want at any price, particularly auratum.

The many specialties of summer stock are all hanging fire, but gypsophila is selling steadily at cheap prices for use in funeral bunches, to make the flowers stand up, the design makers lacking ambition to wire the stock in the hot weather, and then it gives a very graceful effect.

Weiland & Risch are busy benching carnations. They are making a specialty of Mrs. Lawson, devoting two-thirds of their big range of carnation houses to it. They had splendid results with this variety last year but did not get the cut until after Christmas, because of late housing, they think. One of the features of the place this winter will be the new rose, Souvenir de Pierre Notting. Mr. Risch, Sr., saw the stock in Luxembourg last year and thinks highly of it. The color is a deep yellow.

John S. Forster, of Evanston, has disposed of his place and will locate in California, leaving for the coast about August 1. Mr. Forster has been a continuous subscriber to the AMERICAN FLORIST since the first number was issued in 1885 and is one of the original charter members of the Society of American Florists. He has the best wishes of a large circle of friends for success and long life in his new home.

Some of the big Beauty growers have this year found a tidy sum of easy money in the sale of their year-old plants. It was not long ago that the Beauties were dumped when it came time to replant the houses, but now there is a ready market for the old stock, as high as \$6 a hundred being realized.

E. E. Pieser, of Kennicott's, thinks there will be ready sale for field grown carnations from now on for a number of nearby growers report losses of plants from the rains. Those who have their stock on high or sandy ground have fine plants.

Louis Gresenz is now installed in his new home on Southport avenue and is happy, for Mrs. Gresenz is recovering from her recent surgical operation, one of almost exactly the character of that performed on the King of England.

The daily papers report that, C. M. Anderson and his wife disagreeing, Anderson offers to give her his business at 14 Colorado avenue if she will raise their two children. He wants to go to Wyoming for his health.

Hugh Woell, of Bassett & Washburn's city force, is able to be about on crutches after six weeks in Alexian Brothers' Hospital as a result of catching his foot in an unprotected elevator.

James Jensen, the landscape architect, will attend the annual convention of the Park and Outdoor Art Association at Boston next month and read a paper on "Parks and Politics."

D. R. Woods, of Los Angeles, Cal., who has been spending a month's vacation at his old home in Pittsburg, Pa., passed through the city July 15 enroute to the coast.

If you failed to get your greenhouse material or other supplies out of Chicago as promised, blame the freight handlers' strike. It tied up shipments for ten days.

Among those who are planning to take in the trip to Asheville are C. A. Samuelson, E. S. Enders, of his staff, and John Pochlmann.

Miss Florence, daughter of F. F. Bentley and bookkeeper for Bentley & Company, is spending her vacation at New Castle.

Miss Jennie Daniels, bookkeeper for Weiland & Risch, is away on vacation.

All the wholesale houses are closing at five o'clock. Get your orders in early.

E. C. Amling was at New Castle the early part of the week and now is away at the lakes with his family.

Brant & Noe are preparing to add four houses 20x195 to their range.

A. C. Kohlbrand and Max. Ringier are again on duty at Amling's.

Visitors: Harry Balsey, Detroit; E. B. Krieger, formerly gardener for S. H. Barbour, Spokane, Wash., enroute home from Europe.

#### Milwaukee.

STOCK MORE PLENTIFUL THAN BUYERS — SWEET PEAS IN GREAT OVERSUPPLY. — LARGE STOCKS OF PALMS IN PREPARATION. — ABOUT NEXT YEAR'S CONVENTION. — MANY INSECT PESTS — VARIOUS NOTES.

In the flower market the supply exceeds the demand. Sweet peas are particularly plentiful. If some growers would cut back half the crop so as to break out in new shoots with long-stemmed flowers when almost everyone's crop is off, things would even up in better shape. Roses are soft and off color. Carnations are very poor, except those of Heitman & Baerman, which are almost equal to winter flowers. Some good gloxinias have been appreciated in market as a novelty and some good displays of perennial flowers have met with favor, such as coreopsis, gaillardias, light blue larkspur, candidum lilies, the upright growing white clematis, *Splraea sorbifolia*, and so forth.

Concerning the S. A. F. convention, there has been some talk of the next meeting coming here, but when any such rumor is traced to its source it is invariably found to have emanated from outside, perhaps due to some expressions prompted by sympathy. However, don't let these rumors deter any city from making a bid for the convention, because Milwaukee dropped the matter with the best of feelings long ago and has not the slightest desire for taking it up again for some time to come.

Looking forward to fall trade, the C. C. Pollworth Company is filling up its houses with the usual good stock of palms and other decorative plants. In this particular line the hustle of the Holton & Hunkel Company has been somewhat remarkable. Of their plant taken in charge June 1, four houses have already been well prepared and filled with palms in variety. Their new house 40x200 is well under way. The two illustrations on page 900 give just a peep at their latanias and kentias.

The insect enemies to shade trees are out in force. There is an interesting quartette consisting of the elm leaf beetle, elm tree louse, cottony maple scale and the tussock moth. The spraying, thinning and fertilizing of trees is being carried on as never before in this city. The weather being so favorable just now, there is little doubt that, with our aid in spraying, the pests will soon be under control.

There has been too much rain of late, although no serious damage has been done. Trees and all decorative plantings have done well, particularly where subsoils were thoroughly dried out last year.

James Currie has made a decided improvement in remodeling the entrance to Forest Home Cemetery.

Heltman & Baerman, the carnation specialists, have well under way five new short-span houses.

Frank Dilger has pulled down one old house and is rebuilding it somewhat larger. C. B. W.

#### Buffalo.

LITTLE TRADE AND VACATIONS ARE THE ORDER OF THE DAY. — TWO CELEBRITIES START FOR EUROPE. — CLUB MEETS. — THE ASHEVILLE TRIP. — PERSONAL NOTES.

Trade is very quiet and the weather fine. Funeral work was good last Saturday but nothing doing since then. The store men have started their employes on vacations. W. J. Palmer has just returned from New York. W. F. Kasting and J. B. Wiese started Sunday for Europe. They expect to visit England, France and Germany and will be gone about six weeks.

From the talk it is certain that between six and ten will go to Asheville. President Barton is certainly entitled to a good crowd. We do not know of any city which is desirous of having the 1903 convention. Toronto or Rochester would certainly be good places for it.

The B. F. C. had a meeting last week and arrangements were made for the annual outing. I trust that the enthusiasm will be as great as it was in New York and Denver. Buffalo is still furnishing athletes, even in Denver, for we still have a claim on Phil Scott.

L. H. Neubeck has rented the George Troup greenhouses at Corfu. It shows prosperity and Louis is a hustler.

Jerry Brookins' new houses at Orchard Park are fine and in keeping with the fancy stock turned out there.

Emil Brucker will look after W. F. Kasting's business during his absence.

BISON.

#### St. Louis.

CLUB MEETS OUTSIDE THE CITY AND HAS A GREAT TIME. — CARNATION COMPANY PLAYS HOST — LITTLE TO SEE IN THE GREENHOUSES AT PRESENT. — PLACE THOROUGHLY MODERN. — NOMINATIONS FOR OFFICES. — VARIOUS DOINGS. — LOCAL MATTERS.

The July meeting of the St. Louis Florists' Club was held last Thursday at the greenhouses of the St. Louis Carnation Company. Twenty-three members and two visitors were present and a very enjoyable afternoon was spent in looking over the place under the guidance of J. W. Dunford and his partner, Mr. Call. Mr. Dunford met the club with wagons at the end of the car line. The first place to be inspected was the machine shop, containing a gasoline engine, a pipe cutter and threader, a steel drill and emery wheel. In the greenhouses the stock was mostly thrown out. One 200-foot house was already replanted, principally with Mrs. Lawson. The field plants are looking fine, as are also the violets, of which some are planted in the house. In the business meeting the nomination of officers resulted in the selection of the following list of candidates: For president, J. W. Dunford; vice-president, George Windler, Henry Emmons and R. J. Mohr; secretary, Emil Schray; treasurer, J. J. Beneke; trustees, F. M. Ellis, H. G. Berning, Wm. Adels, John Steidle and J. Juengel. The election will take place at Edwardsville, Ill., August 14, at the residence of Fred Ammann. The trustees reported that the Negro Minstrel Band would be engaged for the picnic July 24 and started a collection for expenses. All members, with their friends, are requested to be at the east end of Ead's bridge at 10 a. m., where special cars will be in waiting to take them to the grounds. H. G. Berning gave a short talk, on the best ways of increasing good feeling between the growers and the wholesalers. He brought out some very good points,

which were enjoyed by all. Mr. Dunford read a very interesting report of his average cut and returns for the last two years, comparing the months for each year, and showed that though some think one year better than the other, they average the same. After the meeting a very enjoyable lunch was set up by the host and Mr. Steidle then invited the club to visit his place, not very far off. Here were seen some carnations that were very fine for this hot weather, especially Melba. Mr. Steidle has rebuilt his residence that was destroyed by fire some time ago.

Geo. Waldbart has finished repainting his store and greenhouse. He made a very large design this week. It was seven and one-half feet from base to top, an arch with a cleft in center. Carnations, roses and gladioli were used.

The Michell Plant and Bulb Company is hard at work fixing up the place. The geraniums, of which they have a large assortment, and chrysanthemums are looking fine in the field.

Mr. Hurst, of Tipton & Hurst, Little Rock, Ark., passed through the city last week on his way to Denver.

R. J. M.

#### Cleveland.

CLUB MEETS AND PLANS A PICNIC. — FLOWER MARKET PRESENTS DILAPIDATED APPEARANCE. — HAGENBURGER BUILDING. — OTHER NOTES.

The club held its regular meeting last Monday evening, between twenty-five and thirty members being present. The outing committee made its report and recommended Euclid Beach Park as a suitable place for the outing. Tuesday, July 22, was the date selected. It will be an all day affair. Members and their families are requested to be on hand and a pleasant time is guaranteed. There will be all kinds of amusement for old and young.

The flower stands in the Sheriff street market present a weary appearance on a Saturday night, a few palms and rubbers, some belated bedding stock, a bunch or two of cut flowers, and, last but not least, the regulation number of grandmother's bouquets. All they need is the "ruffle" to carry one's memory back several decades, but for all that they find favor in the eyes of a certain class of customers. On August Schmitt's stand was noticed an exceptionally nice lot of carnations, considering the season.

Carl Hagenburger, of Mentor, O., has started on his new range of seven houses, three 20x110 and four 20x89. Palms, ferns and carnations will be grown for the wholesale trade. His stock of young ferns is in fine condition. ECHO.

NEWPORT, VT.—Dr. T. H. Hoskins, the eminent horticulturist, died at his home here June 25.

WOODFORDS, ME.—Hans J. Neilson was married last month without taking his friends in the business into his confidence.

JACKSONVILLE, ILL.—Jos. Heint hopes to join the St. Louis party to the Asheville convention. He is a very regular attendant at S. A. F. meetings.

DANVILLE, ILL.—Rhoten Brothers & Company are building a greenhouse 34x250 for violets. They are just starting in business, considering this city a good point from which to conduct a shipping business, with trains to Chicago, St. Louis, Indianapolis, Detroit and many smaller cities without change.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 23 times, 20 per cent;  
52 times, 30 per cent.

Every space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts apply-  
ing only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THERE continues to be a demand for  
competent greenhouse help in all depart-  
ments.

A GOOD coat of white paint is an invest-  
ment which many florists make too infre-  
quently.

THE country florist shows wisdom  
when he keeps the place always "tidied  
up;" it draws trade.

THE showing made this spring by the  
Crimson Rambler rose is a guarantee of  
a big demand for it next season.

THERE is a steadily increasing sale for  
raffia in this country. To have the best  
success in its use it should be tied dry,  
just as it is taken from the bales.

WE are indebted to Messrs. Bottomley  
and Kerstein for an excellent series of  
North Carolina photographic views, one  
of which appears in this issue, page 899.

INCARVILLEA DELAVAYI has proved  
hardy in the vicinity of Chicago, with  
light protection. It is a fine addition to  
the list of desirable border plants and  
apparently prefers a sunny situation to  
one that is shaded.

LEGITIMATE "want" advertisements  
are an index to a paper's circulation, its  
standing with the people and its value to  
general advertisers. Each "want" adv.  
in the AMERICAN FLORIST is genuine; it  
pays to answer them.

### Greenhouse Building.

Floral Company, five houses 16x165.

Cleveland, O.—G. W. Smith, house  
9x65.

Niles Center, Ill.—John Brod, range of  
houses.

Indianapolis, Ind.—H. W. Rieman, rose  
house. Baur & Smith, carnation house.

La Crosse, Wis.—Salzer Seed Company,  
range of houses.

St. Louis, Mo.—Missouri Botanical  
Garden, range of houses.

Syracuse, N. Y.—Henry Morris, house  
27x100.

Milwaukee, Wis.—Holton & Hunkel  
Company, house 40x200. Heitman &  
Baerman, five houses.

Chicago, Ill.—Brant & Noe, four houses  
20x195.

Brooklyn, N. Y.—H. Stalhut, house  
15x65.

Fall River, Mass.—Seth A. Borden,  
two conservatories.

### Heating Surface.

ED. AM. FLORIST:—Under ordinary con-  
ditions how many feet of heating surface  
are required to maintain 70° tempera-  
ture in a range of 10,000 feet of glass  
when it is zero outside? J. C. F.

If hot water is to be used from 4,500  
to 5,000 square feet will be desirable, but  
it can be done with 2,500 feet of steam  
pipe. L. R. TAFT.

### Chicago to Asheville.

Everyone from the west and north-  
west is invited to join the Chicago party  
to the S. A. F. convention. If you buy  
through tickets see that they read via  
Big Four railroad Chicago to Cincinnati.  
Round trip fare from Chicago, \$24.80.  
Write E. F. Winterson, 45 Wabash ave-  
nue, or the AMERICAN FLORIST and  
accommodations will be reserved for you  
on the cars from Chicago, which will be  
a part of the special train from Cincinnati  
to Asheville.

### Washington to Asheville.

If there is any one in Washington or  
vicinity who has not been seen by the  
writer in regard to the trip to Asheville  
for the S. A. F. convention, and who  
would like to join us, will he kindly let  
me know at once, so that arrangements  
can be made for the convenience of all.  
I can assure all of a delightful time in the  
wonderful country to which we go this  
year. The rate from Washington will be  
\$14.95 for the round trip, over the  
Southern R. R. Quite a number are  
planning to go in a party and I will be  
pleased to furnish further information  
about the trip. P. BISSET,

State Vice-President.

Twin Oaks, Washington, D. C.

### Piping a House.

ED. AM. FLORIST:—Would be pleased to  
be advised how many runs of 1-inch pipe  
will be required for steam in a green-  
house 20x100 to maintain 60° when the  
temperature outside is 15° below zero.  
The walls of the house are five and eight  
feet respectively, and the ridge twelve  
feet. What size flow and return pipes  
should be used? H. N.

The house can be heated as desired by  
means of fifteen 1-inch steam pipes.  
Although a 2-inch pipe might be used, it  
will be better to have a 2½-inch flow and  
either a 1½-inch or 2-inch return. If the  
main is run through the house and feeds  
the coils at the farther end it will take  
the place of two of the returns.

L. R. TAFT.

### Heating With Flues.

ED. AM. FLORIST:—I have two green-  
houses, one a lean-to nine feet wide and  
nineteen feet long, built just back of the  
store and potting shed, attached to and  
protected by them. The other is an even-  
span house 11x27 running at right  
angles to the lean-to, the two houses  
being connected. How can I heat these  
two houses by flues from one furnace? If  
this is not feasible what is the best  
arrangement for two furnaces. The  
temperature outside sometimes goes 14°  
below zero. The houses are used for  
palms, ferns and miscellaneous house  
plants and bedding stock. In Nebraska  
which will be more economical, coke or  
wood? C. N.

If a good rise can be given the flue and

a good draft can be secured it will be  
possible to use one flue running through  
both houses. Otherwise it will be neces-  
sary to build two furnaces and run one  
flue in each house. It will not be satis-  
factory to run two flues from one furnace  
unless it is constructed with two fire  
boxes. The economy of the two kinds  
of fuel cannot be stated without know-  
ing what they cost. Either will give  
good results. If coke is cheap I would  
advise that it be given a careful trial, as  
if the furnace is shut up after the fire is  
well started it will give off a steady heat  
for a long time. L. R. TAFT.

### White Ants or What?

ED. AM. FLORIST:—Our gardener is in  
trouble and has been for the past two  
seasons and he now turns to you for  
information and possible relief. We have  
a great number of flower beds on the  
grounds and something has attacked and  
destroyed them to such an extent that  
the beds were replanted sometimes twice  
over. He showed me the cause to-day  
and at the roots are numerous insects,  
whitish in appearance which bore into  
the stalks and make them as hollow as  
pipe stems, eventually destroying the  
plant. He has been advised to dose them  
with coarse salt, and that is what he has  
done for three springs, but this year they  
seem as bad as ever and he is discour-  
aged. Can you suggest any remedy?  
They look to me to be white ants; just  
the form and actions of ants. This last  
spring he changed the loam entirely,  
thinking perhaps that would improve  
matters, but without any improvement.  
Do you recognize this condition and can  
you suggest any remedy? J. W.

I think there is very little doubt that  
the damage described is due to the white  
ant (*Termes flavipes*). In addition to  
the better known and more serious dam-  
age which they often cause to buildings  
or to books and papers, they occasion-  
ally become a distinct pest in greenhouses  
and conservatories, attacking cuttings  
and the roots and stems of plants. The  
damage is apt to be more noticeable in  
the case of large-stemmed herbaceous  
plants such as geraniums, but the injury  
is not infrequent in the propagating  
benches and on roots of smaller plants.  
The source of the termite in greenhouses  
is usually the woodwork of the building,  
or plant benches, which, when somewhat  
moistened and partly decayed, are espe-  
cially attractive to these insects. From  
such locations they carry their galleries  
to the roots of plants. In one instance  
the termites were found working on the  
label sticks, the removal of which gave  
immediate relief. The remedy is not  
always easy, unless the old wooden  
framework of the benches and propagat-  
ing beds be removed and replaced with a  
framing of gas pipe and stone plates.  
The individuals about the plants can  
often be killed by injecting into the  
ground about the plants kerosene emul-  
sion or bisulphide of carbon, using the  
latter, however, in very small quantities  
and not too near the plants, otherwise  
the death of the latter will result.

All such remedies are merely palliative,  
for unless the woodwork in which these  
creatures are breeding is examined and  
corrected they will continually re-intro-  
duce themselves among the plants.  
Creosote is an effectual preventive. The  
means of controlling this pest are given  
in detail in circular No. 50, second series,  
of the U. S. Department of Agriculture,  
Washington, D. C. C. L. MARLATT.

## OBITUARY.

WILLIAM J. CROWE.

At the age of 32 years, William J. Crowe died at Denver, Col., on July 11, after a brief but ineffectual struggle to regain his health. He went west nearly two years ago, from Utica, N. Y., in which city his father, Peter Crowe, has successfully conducted a large rose growing establishment for many years. The sincere sympathy of the craft goes out to the bereaved wife and two little daughters and no less to the aged father and mother whose dearest hope has been to save this only child. He was esteemed by all who knew him and was affectionately called "Billy" by his acquaintances. Exactly one week before his death he attended a picnic of The Park Floral Company employes, where he responded to a toast and feelingly alluded to the affection which he recognized was evidenced by this nickname. He made a brave fight and was cheerful and sunny to the last. Fortunately when the end came it came quickly and without pain. Mr. Valentine accompanied the widow and the remains to Utica where the interment took place under the auspices of the Masonic order.

SAN ANTONIO, TEX.—Mrs. C. Hauser has a fine range of glass and a good business, although trade is always quiet here in midsummer. The business was established thirty years ago. Mrs. M. Frederick is another successful florist. She succeeded Hensel & Company some years ago and, besides her gardens and greenhouses at 102 Cherry street, has a store at 313 Alamo Plaza.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By all-around grower, 10 years in one place. Reference. West preferred. WM. KIRKHAM, 148 Dearborn St., Chicago.

**SITUATION WANTED**—By a thoroughly experienced young lady, who is a good designer, saleslady and book-keeper. Address G L, care American Florist.

**SITUATION WANTED**—By young man in commercial place, American, married, 5 years' experience. All references. Address HUSTLER, care American Florist.

About 26,000 square feet of glass, near Philadelphia, population 80,000, no wholesale place in the city. Rent \$60 per month; owner will take rent in cut flowers for his retail place.

BROOKSIDE GREENHOUSES, Reading, Pa.

## FOR SALE.

Complete Floral Establishment

AT WHITE HALL, ILL.

Only one there; 6,000 feet of glass, steam heated; also dwelling adjoining, all in good condition. Terms easy. Address

P. H. BRUECK, Decatur, Ill.

## FOR SALE,

## IRON TANK

16 ft. long, 8 ft. wide, 3 ft. deep.  
IN GOOD CONDITION.

KENNICOTT BROS. CO., 42-44 Randolph St., Chicago, Ill.

## Stenographer,

## Typewriter,

## Bookkeeper

And party to take general charge of office wanted by eastern firm doing general Florist and Nursery business. Please apply with full particulars, salary expected, references, etc., to

EXPERT, care Wm. J. Stewart,  
79 Milk St., Boston, Mass.

## For Sale, a First-Class

## Florist's Establishment

containing over 20,000 feet of glass, consisting of 9 houses all in fair condition. Doing a large growing business, wholesale and retail, and is situated within 4 miles of City Hall, Boston. Must sell on account of sickness. The above houses and stock can be bought for \$6,500. Cost of buildings alone was over \$12,000. There are over 45,000 feet of land which can be bought for a reasonable price, or will lease the land for any number of years. This land is increasing very fast in value. Located on the best avenue around Boston, 2 minutes walk from steam cars, and electric cars pass the door every minute.

Address BOSTON, care American Florist.

Pittsburg.

NOTHING OF IMPORTANCE DOING IN A TRADE WAY.—OUTDOOR FLOWERS HELP MEET DEMAND.—DOINGS OF PROMINENT GROWER.—VARIOUS OTHER NOTES.

There are absolutely no features connected with trade to arouse the slightest interest. We are at last getting reasonable weather and this will be most acceptable to the men working under glass. Gladioli and asters are plentiful and fine in quality, bringing good prices. Roses are much improved over last week. Harrisii lilies are still to be had and frequent calls are made for them. Genevieve Lord is the best carnation we get. Joost is fair, but the whites are inclined to look sleepy. The sale of palms is active.

Fred. Burki's houses, at Bellevue, have been reduced from thirty-six to twenty-six in number. Five of these were destroyed by the great wind storm last Easter. The others were dismantled at convenient periods, and it is Mr. Burki's intention to do away with the Bellevue establishment altogether and put this property on the market. He devotes his entire time to the Pittsburg Carnation Company's plant at Bakerstown.

Otto Reich and Harry Graves, of Beloit, Ohio, report that they are making rapid progress in the completion of their new houses. Roses and carnations are to be their specialties.

Julius Ludwig is preparing to go east. A trip on the Hudson and a visit to Boston will be two of the features.

Sam. McClements and family will spend the summer at Bakerstown, where he has a large stock farm.

Fred. Burki will attend the S. A. F. convention at Asheville. E. L. M.

Newport, R. I.

"The First Grand Horticultural Exhibition" of the Newport Horticultural Society will be held at the Casino, Newport, R. I., July 22 and 23. The schedule provides for displays of plants, cut flowers, fruits and vegetables and the prize money aggregates a handsome sum. Secretary Thomas Fieldhouse reports entries to insure a very successful show. Among the special prizes are three offered by Mrs. Perry Belmont, aggregating \$95 for groups of miscellaneous plants, \$25 by F. P. Garretson for groups of palms and foliage plants, a silver cup and \$15 offered by Mrs. Burke-Roche for groups of caladiums and ferns, F. Neilson's cup and \$10 for display of gardenia blooms, Mrs. Fish's cup and \$15 for stove and greenhouse plants, \$25 for groups of ferns, \$25 for displays of carnations, \$25 for fancy basket of flowers and \$50 for table decorations. The society's prizes include \$35 for displays of orchids and \$35 for mantel decoration, the latter competition open to florists only. The S. A. F. medals are offered for new plants.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

NEBRASKA prospects for Evergreen seed corn are reported poor.

JOHN DEGNAN, of Chicago, left that city for Minneapolis, Minn., July 17.

PEAS in the Sturgeon Bay, Wis., district are looking well except on low lands.

VISITED CHICAGO:—Wm. Markurth, of the Harnden Seed Company, Kansas City, Mo.

JAMES McHUTCHISON, of New York, sailed from that city for Europe on the S. S. Barbarossa July 17.

LATEST reports indicate a crop shortage of fifteen per cent from early estimates on Roman hyacinths in grades above twelve centimeters.

NEW ORLEANS, LA.—Armand Kerlec & Son are well satisfied with their mail order business, which was inaugurated last January. This firm is adding a warehouse for onion sets to its facilities.

M. M. MIESSE, of Lancaster, Ohio, has been awarded a contract from the government for a limited amount of tomato seed of the variety known as Maule's Success, according to the *Cannery Producer*. This variety was originated by Mr. Miesse.

SOUTH HAVEN, MICH.—The continued wet weather has done more or less damage to growing seed crops and at this time it looks as if there is likely to be a shortage on Dwarf Champion and Trophy tomatoes and on Scarlet Olive, Half Long Scarlet, Cincinnati Market and Chartier radishes. All other items promise a full crop.

BAY CITY, MICH.—The Harry N. Hammond Seed Company, Limited, increased its capital stock July 1. The officers of the company are Harry N. Hammond, chairman; P. H. Gage, secretary and treasurer, and S. Allan Wilson, superintendent. This concern has purchased another lot of land about two blocks from their present location for a new four-story warehouse to be used in connection with the old plant.

## Onion Set Prospects.

The onion set prospects about Chicago have not improved recently. The heaviest rainfall of the season occurred July 18, putting all the low lands afloat again. Dry weather is badly needed for pulling, which on some of the earliest lots should begin the coming week. The present outlook is for sixty per cent of a crop.

## Michigan Bean and Pea Crops.

One of our well informed correspondents in Michigan writes as follows under date of July 9:

Frequent heavy rains in June seriously damaged the Michigan bean crop in the central and northern sections. Many fields on flat lands were ruined, and most of those remaining look pale and sickly. June conditions were most favorable for the pea crop, except that the growth was too rapid to be hardy. All varieties made a phenomenal growth. Nott's Excelsior, Gradus, Thos. Saxton and Gems are perfect. First earlies are, for the greater part, out of danger, but hot

weather and high winds would work havoc with the second early and late varieties, owing to their very rapid and tender growth of vine.

## The Nebraska Seed Crops.

Another of our Nebraska correspondents writes as follows, July 11: "We have to report that vine seed crops are disastrously damaged by rain and flood throughout the district. The rainfall has been so heavy as to flood all low lylog fields and both the Platte and Elkhorn rivers have overflowed and destroyed large areas of crops. The

THE LATE W. J. MANDEVILLE.

crops that escaped the overflow are late and small owing to much rain and cold weather and the impossibility of giving them proper cultivation. We cannot tell the extent of the damage yet, or make itemized reports, but would advise purchasers of vine seeds to protect themselves as far as possible on all varieties."

## Death of W. J. Mandeville.

W. J. Mandeville, of the firm of Mandeville & King, Rochester, N. Y., died July 14, at his summer home, Despatch, N. Y., after a long illness. Mr. Mandeville was born in Webster, N. Y., February 9, 1852. He graduated from the DeGraff Military Institute, of Rochester, and later was connected with the firm of S. Boardman & Son, nurserymen and seedsmen. In 1875 he commenced in the flower seed business in his own name, and in 1879 became associated with Herbert S. King under the firm name of Mandeville & King. On the death of his partner in 1890, he formed a partnership with Fred. B. King, under the same firm name. The firm has been incorporated during the present year, Mr. Mandeville being chosen president. He was also a director in James Vick's Sons, and vice-president of the Cleveland Seed Company.

Mr. Mandeville was one of the ablest men in the seed trade, giving each branch of it which he took up most careful and studious consideration, with the result that all the lines of work undertaken by him were successful. It was pleasure for him to compare notes with those prominent in his line of trade and those with

whom he consulted did not fail to note his far-seeing, logical, business mind whatever branch of the trade might be under discussion. He invented and introduced new and very successful methods in the box commission flower seed trade. His personal acquaintance with the seedsmen of the country was much increased by his active participation in the seed trade conventions at Chicago in 1900 and Rochester in 1901, where his ability and character were recognized. He was one of nature's noblemen—modest, unassuming and considerate—and his loss is sincerely regretted.

Mr. Mandeville is survived by his wife, two daughters and one son, Edna, Lois and Arthur.

ESTABLISHED 1802

## BURPEE'S SEEDS PHILADELPHIA.

Wholesale Price List for Florists and Market Gardeners.

ONION SETS—NO MORE OF THEM.

Sow my Hardy White Onion.

SEND FOR CIRCULAR.

BEAULIEU, the Pansy Man, WOODHAVEN, N. Y.

PAEONIAS FOR FALL... 10 distinct, best kinds, \$10.00 per 100.

Poets Narcissus, dbl. & sgl., home grown, \$5 a 1000. Clematis, large flowering, \$2.50 per doz.; \$16 per 100. F. A. BALLER, Bloomington, Ill.

Our Pansies, Cannas and Roses received gold medals at the Omaha Exposition in 1898 and the Pan-American Exposition in 1901.

**VAUGHAN'S "INTERNATIONAL"**

Received the only reward for Mixed Pansies at the World's Fair! It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10 00; ½ oz., \$5.00; ¼ oz., \$1.50; trade pkt., 50c.

**VAUGHAN'S "GIANT MIXTURE."**

This mixture is specially made by us from all the separate colors of Giant Trimar-deau the Giant Bugoot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, per ¼ lb., \$14.00; oz., \$4; ½ oz., 60c; trade pkt., 25c.

**VAUGHAN'S "PREMIUM" MIXTURE.**

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past sixteen years and it has given general satisfaction. Per pkt., 25c; ½ oz., 80c; ¼ oz., \$3.00; oz., \$8.50.

**IMPROVED GERMAN MIXTURE.**

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; ½ oz., 40c; ¼ oz., 60c; oz., \$2.00.

**MASTERPIECE—NEW GIANT CURLED.**

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often three inches across, and the color variations and combinations are odd and striking. Pkt. 50c; ½ oz. \$1.00.

**"Vaughan's International" Primrose Mixture.**

Unquestionably the best mixture of Chinese Primroses. It contains the largest variety of the best selling colors. Flowers large, beautifully fringed, borne in large clusters well above the rich green leaves. Pkt. (250 seeds) 50c; 5 pkts. (1250 seeds) \$2.00.  
— CHINESE PRIMULA, Chiswick Red; Alba Magnifica, white; Blue, Pink, Striped. Each, per pkt. of 250 seeds, 50c; 1000 seeds, \$1.75.  
DOUBLE CHINESE PRIMULA, white, pink, red or mixed, per pkt. 50c.

**CINERARIA VAUGHAN'S COLUMBIAN MIXTURE.** A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.  
**CINERARIA HYBRIDA, LARGE FLOWERING,** white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.  
**CALCEOLARIA HYBRIDA,** choicest mixture, pkt. 50c.  
**10 PER CENT** discount on flower seed orders amounting to \$2 and over for Cash with order.

**'The Land of the Sky.'**

The eighteenth annual meeting American Florists will be held at Asheville, August 19th to 22d, 1902.

Low rates have been made via Queen & Crescent Route and Southern Railway. Special train, composed of Pullman sleepers, will leave Cincinnati, Monday, August 18th, 2:00 p. m., via Queen & Crescent Route, and run through to Asheville via Southern Railway, arriving at Asheville next morning 7:00 o'clock.

Members will meet at Cincinnati and all go through together from there.

For sleeping car reservations and full particulars regarding rates, write

**J. S. McCULLOUGH, W. A. BECKLER,**  
N. W. P. A., N. P. A., Queen & Southern Ry. Crescent Route.  
**225 DEARBORN ST. 113 ADAMS ST.**  
**CHICAGO, ILL.**

**Society of American Florists National Convention,**

**AUGUST 19th to 22nd, 1902, ASHEVILLE, NORTH CAROLINA.**

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at \$24.80 for the round trip from Chicago and similarly reduced rates from all "Big Four" stations.

Florists' Special train will leave Chicago 8:30 p. m. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 p. m. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l Nor. Agt. "Big Four", 234 S. Clark Street, Chicago.

**OUR DIRECTORY FOR 1902 WILL BE MAILED TO YOU PROMPTLY UPON APPLICATION. PRICE TWO DOLLARS.**

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Farmers' Nursery Company, of Phoneton, O., will remove to Tippecanoe, O., in time for the fall packing.

THE Texas Nurserymen's Association has been in session at Bryan this week. E. W. Kirkpatrick, of McKinney, presided.

GENERAL WILLIAM J. PALMER, of Colorado Springs, Col., has been elected president of the International Society of Arboriculture.

JAMES TROOP, State Entomologist of Indiana, has sent out a public notice that the seventeen-year locusts have done practically no damage to the nursery stock in that state.

G. H. POWELL, pomologist of the U. S. Department of Agriculture, has been visiting the Berckmans' nurseries at Augusta while on a tour investigating the possibilities of shipping southern fruit to European markets.

THE Upland Nursery Company, at Lansing, W. Va., has bought the E. W. Reid equipment and reorganized with \$5,000 capital stock. The officers are: President, J. M. Brown; vice-president, J. C. Dent; secretary and treasurer, E. B. Bowie.

ACTING on the suggestion contained in Prof. Bailey's recommendation that the American Association of Nurserymen establish a bureau of publicity, President Ilgenfritz has appointed C. M. Stark, Louisiana, Mo.; Ralph T. Olcott, Rochester, N. Y., and F. H. Stannard, Ottawa, Kans., as a committee on publicity.

### New Climbing Rose Dorothy Perkins.

When an introduced novelty proves an exceptionally good addition to the floral gems of the garden I feel like calling the attention of my friends to it.

I have grown about all the so-called Ramblers, among the roses, and the justly praised hybrids of R. Wichuraiana, but none among them, not even the Crimson Rambler itself, the foliage of which is not good with me, can compare with the new climbing rose, Dorothy Perkins, a hybrid of R. Wichuraiana and Mme. Gabriel Luizet. It possesses the glossy foliage of the former and the satiny sheen in the texture of the pink buds that characterizes the flowers of Mme. Gabriel Luizet.

It flowers in clusters of from ten to thirty, each flower considerably over an inch in diameter, the stem to the cluster being quite long, thus making them available for cutting and interior decoration. The buds are of good length and rival those of that charming fairy rose, Mme. Cecil Brunner, resembling bisque work in their daintiness. The flowers are fragrant and last a long time in good condition. It is said to have withstood a winter temperature of 20° below zero uninjured.

W. C. EGAN.

Meriden, Conn.

CRAFTSMEN FROM NEAR-BY CITIES ENJOY OUTING AT HUBBARD PARK.—UNANIMOUS IN PRAISING THE BEAUTIES OF THE PLACE.

On Wednesday, July 9, members of the Hartford Florists' Club and the New Haven Horticultural Society were the

guests of Arthur Hubbard, at Hubbard Park, Meriden. A gaily decorated tally-ho carried the Hartford visitors over and the eighteen-mile ride through the country was greatly enjoyed. At Meriden they were met by the New Haven party, who had come by train, accompanied by Superintendent Keith, of the Bridgeport parks, and Secretary W. J. Stewart, of the S. A. F. The party, numbering about thirty, was then taken in charge by Mr. Hubbard and his associates on the Meriden park board, Messrs. Bradley, Rockwell and Linsley, and Mayor Seeley.

After light refreshments in the pavilion at Mirror Lake, the ascent to Fairview and on to Castle Craig tower and the east and west peaks of Meriden's famed hanging hills, more than 1,000 feet altitude, was made. Alpenstocks were provided for all and they were found mighty useful in the arduous climb. The view in all directions from these majestic peaks, the highest elevation within fifty

miles of the coast from Maine to Florida, is indescribably grand. A bountiful lunch was served in the shadow of Castle Craig, on the top of the crag, after which several of the visitors spoke appreciatively of the scenic beauty and the rare enjoyment of the day.

Mr. Hubbard, who is as unassuming and genial as he is public-spirited and generous, appeared to enjoy the outing as much as the most enthusiastic of his guests. Meriden has good cause to feel proud of her 1000-acre pleasure ground with its "forest and stream, cliff and cascade, hill and dale, lake and island, meadow and mere," and of her first citizen, whose gift it was and who has bountifully supplied the means for its maintenance. Hearty were the cheers given for their indulgent friend and host as the boys climbed into their tally-ho and started for the homeward drive in the cool evening after a holiday filled with delight and instruction.

## Lilium Harrisii

### Indispensable for Early Forcing.

Our own growers pack all our Bermuda Bulbs and personally grow half our supply. Careful attention to the growing crop, weeding out diseased plants, proper grading of the bulbs when dug, business-like packing and handling, all go to make success with Harrisii. We invite your orders under these conditions. Our bulbs will pay you.

Write for Prices before closing any forcing stock orders.

Cricket at Haverford.

The employees of the Griscom estate, Haverford, Pa., and the cricket team of the Montgomery Nurseries, Villa Nova, Pa., played their first match July 9, with an easy victory for the Montgomery Nurseries. The batting of J. Hushen, who gave a good exhibition of ran getting, making fifty-three runs in thirty minutes, and the howling of G. Gardner, were the features of the contest. John G. Gardner feels justly proud of their performance and is looking forward to many successful games now that the season is well started. For the Griscom team A. Weston, captain, batted well in the first innings but was unfortunate in his second venture. George Gardner captained the nursery team. The score follows:

GRISCOM ESTATE.

First inning.		Second inning.	
T. Archfield c N Gardner	4	c G. Gardner	10

Californians Picnic.

The first picnic of the Pacific Coast Horticultural Society was held July 6 at the grounds of the California Nursery Company, a special train being run from San Francisco to Niles for 275 members and their friends. It is a journey of an hour and forty-five minutes. Arrived at the nursery, which is the largest on the coast, the party was taken in hand by John Rock, the manager, who led the way to a shady spot on the grounds where a table 200 feet in length stood laden with sandwiches and luscious fruit, upon which the crowd fell without waiting for a second invitation.

After lunch a number of photographs were taken, some of which are reproduced herewith, and then the party broke up into small bands to inspect the grounds. The most imposing sight was the main entrance, which is a drive some fifty feet in width and about 600 feet long, planted on both sides with stately rows of Washingtonia filifera some thirty feet in height, the trunks being between two and three feet in diameter. Then the visitor passes some comfortable little cottages, where the heads of the firm are living, and comes to the office, a two-storied structure, the offices being in the front part and the balance given over to the kitchen, dining room, sitting room and sleeping apartments for the men. The employees at present number seventy-

OFFICERS OF THE PACIFIC COAST HORTICULTURAL SOCIETY.

SAN FRANCISCO PICNICKERS AT NILES, CAL., JULY 6, 1902.

five, but in the shipping and spring season between 150 and 200 are needed. Around the rear of the office building are half a dozen smaller ones, also for sleeping apartments for single men, and about a dozen small four-room cottages for the foreman and some steady married help.

Six greenhouses are used for propagating purposes, from cuttings and seeds, and from here the young stock goes into a large lath shed, to be transplanted into pots or boxes, as the case may be, and later planted into the ground, after the stock is large enough. Some 650 acres are in cultivation at present, principally in fruit trees, but including many ornamental trees and shrubs, also palms, pelargoniums, cannae, geraniums and some other miscellaneous stock. Many

of the California orchards are planted with trees from this nursery, and besides shipments throughout the United States, stock is sent regularly to Australia, South America, Africa and Europe. Everything is as clean and neat as it is possible to make it.

After the sight-seeing came the amusements, including dancing, music and athletics, which kept everyone in a merry mood well along through the summer afternoon. C. F. Fick won the men's hurdle race, also the sack race. C. Tledemann won the 100-yard race for men, A. Ferrari the boys' race and Miss Bessie Waddington the girls' race. A. Dinnevan won the boys' sack race and R. Rock the boys' hurdles. A. Clark won the hurdle race for young men and Miss Frohm that for ladies. Speeches

SOME OF THE MEMBERS OF THE PACIFIC COAST HORTICULTURAL SOCIETY.

PACIFIC COAST HORTICULTURAL SOCIETY ON PICNIC AT NILES, CAL.

were next on the programme and H Plath, president of the Pacific Coast Horticultural Society proposed three cheers for the hosts; they were given with a will. Mr. Rock said it gave him much pleasure that the visitors were enjoying themselves and then there were cheers for the ladies and for Mr. Reimers, the oldest nurseryman on the coast. Then everybody took the train back to town. GOLDEN GATE.

DULUTH, MINN.—The Improvement League is planning an autumn flower show, the first held in this city.

NEBRASKA CITY, NEB.—William Peirce, who has built up a flourishing business here, is opening a branch at Auburn, where there seems a fine opening.

Cincinnati.

PICNIC PARTY SPENDS HOURS WAITING FOR A DERAILED TRAIN—MUCH BUILDING IN PROGRESS.—LITTLE TRADE AND STOCK MOSTLY POOR—PARTY FOR ASHEVILLE CONVENTION.—VARIOUS NOTES.

The train bearing the club members to Amelia on July 10 jumped the track within six miles of Amelia, delaying the passengers about two hours. It must have been a sight to behold the boys sitting on the railroad track eating hard boiled eggs, sardines and such for dinner. The meeting in consequence was postponed until Tuesday evening at the club-rooms, and at this meeting it was decided to hold three exhibitions the coming season, one of chrysanthemums in November, carnations in December and roses in

January. The annual outing will be held at Norwood Inn Park, Thursday, July 24.

There is a good deal of building going on around the city. G. Bruner's Sons are rebuilding two houses and erecting a new one 25x140. Richard Witterstaetter is building a propagating house. Wm. Murphy is remodeling six houses. A. Sunderbruch's Sons are rebuilding eight houses. Corbett & Wilson are rebuilding three. W. K. Partridge is adding a new range for American Beauties. Sunderbruch & Meier are building a house for Liberty roses. Max. Rudolph has his new range completed and planted to Brides and Bridesmaids.

There is not much to be said about business, a little funeral work being about all there is to it at present. Roses and carnations are poor in quality and sweet peas are also on the decline. Peterson is sending in some very good asters, which sell readily at \$1.50 per hundred. Gladioli are plentiful, also such other outdoor stock as candytuft, hollyhocks, snapdragon and so forth. A limited amount of lily of the valley is to be had.

So far only five of the local florists have signified their intention of attending the S. A. F. convention but as the time draws near there will be about a dozen get into the hand wagon and we expect to have our city pretty well represented.

C. W. Scott and J. S. Wilson, of Vaughan's brigade, were in town a few days this week and Harry Balsley, of Detroit, blew into town one day and out the next.

The item in last issue with reference to wedding of the writer was wholly incorrect.

Harry Donnelly has taken charge of the McFadden greenhouses. D.

ADRIAN, MICH.—Elmer D. Smith is away upon a two weeks' outing in the northern part of the state, securing needed rest, for it has been a busy season with him.

TRADE QUIET BUT DEMAND CONSUMES RECEIPTS.—FEW ROSES.—TESSON CASE HEARD IN SUPREME COURT.—DECISION AGAINST THE FLORIST.—PERSONAL MOVEMENTS.

Trade has settled down to its usual summer level, although all good stock finds a ready market. Beauties are in good demand and everything salable goes. Sweet peas are now abundant and help to fill a want in cheap flowers. The growers have thrown out nearly all their stock and replanted their rose benches. Chrysanthemums are also being planted. Carnations in the field have grown remarkably well and will probably be lifted by August 1 or sooner.

The Ladies' Auxiliary of the Northwestern Manufacturers' Association will hold a chrysanthemum and orchid show in St. Paul the first week in November. Prizes will be offered for the three best collections and exhibitors will have the privilege of selling the flowers, to be delivered the day after the show. Schedules and entry blanks may be obtained by addressing the secretary, Mrs. H. M. Moss, 649 Endicott building.

R. F. Tesson, of St. Louis, had a case here in the U. S. Supreme Court the past week. The Louisiana Purchase Exposition management sought to condemn fifteen acres of property owned by Mr. Tesson and his mother. Mr. Tesson asked for an injunction restraining them from taking possession. Judge Sanborn, who heard the case, found for the Exposition.

The Twin City florists will picnic at Spring Park, Lake Minnetonka, Thursday, July 24. An excellent programme of sports has been arranged and nearly \$100 is offered in prizes. It is hoped that there will be a large attendance.

We do not hear of any of the trade going to Asheville next month but presume there will be one or two at least from the North Star state.

A. S. Swanson has one large new rose house completed and planted, and two chrysanthemum houses well under way.

Fred. Schultze has sailed for his old home in Germany to be gone several weeks.

Chris. Hansen expects to leave for Denmark in about a week.

Otto Hiersekorn is rustivating near Fertile, Minn. **FELIX.**

**ACTIVE CALL FOR FUNERAL FLOWERS.—GOOD ROSE SCARCE.—A PICNIC PLANNED.—VARIOUS PERSONAL NOTES.**

Trade has been exceedingly brisk during the week, caused by the death of some prominent citizens. White flowers were scarce and in heavy demand. There are hardly any first-class roses to be had, and mildew is affecting most of the stock. On the other hand, some excellent carnation blooms are being sent in and bring a good price. Sweet peas are in surplus, although there is a good call for them. The carnation Frances Joost is showing up fine this hot weather.

The committees on florists' picnic have about completed arrangements for this event, which will be held on July 24. All stores will close, and any visiting tradespeople are invited to attend.

A small fire which started in range of R. Wessling, on Thirty-sixth street, was subdued before any damage was done.

The Lakewood Cemetery Association is figuring on an additional range of glass.

N. C. Hansen is cutting sweet peas by the thousands. Rice Brothers handle the cut.

Wm. Donaldson & Company had some prize-winner gloxinias last week.

Almost all the growers will cut from grafted stock the coming season.

C. F. R.

**Bryn Mawr, Pa.**

The plot of ground in front of the Pennsylvania Railroad Station in this town is to be converted into a public park through the generosity of the railway company and the Citizen's Committee of Bryn Mawr. The improvement will add very materially to the appearance of this section of the town, and its central location is ideal for the benefits intended. It may be interesting to learn the contract for laying out the same has been awarded to John G. Gardner, of the Montgomery Nurseries, Villa Nova, Pa. Mr. Gardner is now engaged with many important operations.

Toronto.

LITTLE CALL FOR FLOWERS BUT GOOD STOCK NOT TO BE HAD.—SWEET PEAS AND CANDIDUM LILIES DO WELL.—OUT-DOOR STOCK NOT SALABLE.—VARIOUS LOCAL NOTES.

We are experiencing the usual summer lull. Hot weather has had a bad effect on the rose crop and there is not enough good stock to fill the few orders. Kaiserin and Meteor hold up fairly well, but Bridesmaid and Bride are small and mostly mildewed, although scarcity keeps the price up to \$6 per hundred. Carnations are plentiful and good, but the past week has seen a drop in values and some large quantities changed hands at very low figures. The best flowers at present are sweet peas and candidum lilies, which help in making the stores look cool this hot weather. Not for many seasons have there been such quantities of coreopsis and other outdoor flowers on the market and, unfortunately for the grower, they do not sell readily. White and mauve centarea, usually so much in demand, are not selling.

Five Toronto firemen lost their lives while fighting fire July 10 and many floral tributes were sent by citizens and comrades.

Wm. Mackay, of Toronto Island, is wreathed in smiles, the stork having visited at his house and left a baby boy.

Stephen Hembrow, of Davisville, has sold his greenhouses to P. Nesbitt, for \$3,000.

Hailstones fell on July 14, breaking glass and doing damage to small fruits.

Visitor: Mrs. H. E. Philpott, of Winnipeg. H. G. D.

WALTHAM, MASS.—Callie Slick has sold out her flower store and business to Wm. S. Cooney.

Mr. THERON N. PARKER,  
Harrison, N. J.  
Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.  
Yours truly,  
F. DORNER & Sons Co.

Denver.

STOCK NOT PLENTIFUL AND GOOD MATERIAL MOVES WELL.—SWEET PEAS IN FAVOR.—OUTDOOR FLOWERS IN GENERAL OF LITTLE USE.—DEATH OF A POPULAR YOUNG MAN.

The market is not any too well supplied. Owing to the intense heat stock is poor and of little substance. Roses are small and the foliage badly mildewed. Carnations, also, are getting scarce and the supply has considerably shortened up, as several growers have emptied their houses. Sweet peas help to fill the gap and are fine, but still in limited supply. They seem more popular this year than ever and large bunches of them seem to be the right thing. This, though, may be owing to the fact that there is nothing else good. The death of a prominent society woman called for a great deal of funeral work on Saturday and Sunday last. Stock being scarce, it was hard filling orders. Sweet peas were used in large quantities and some pretty wreaths of them were seen. There is an abundance of outdoor stock, but it does not take well and might just as well be left uncut, with the exception of hollyhocks, which come in useful for funeral work.

J. A. Valentine is in the east, having gone to Utica with the body of W. J. Crowe, who died in Denver on Friday, July 11. Mr. Crowe came here about two years ago to benefit his health, and, while he never took an active part, he was well known by all those in the trade. He was a fine fellow and leaves to mourn him a charming wife whose every thought was for her husband.

Summer vacations have started and several of the boys are enjoying outing trips. B.

DAVISVILLE, ONT.—The greenhouse and residence of S. Hembrow has been sold to P. Nesbitt for \$3,000.

WASHINGTON, D. C.—Philip Ganges has been confined to his couch the past week with rheumatism in the foot. He is now recovering and expects to be on deck for the Asheville trip.

**Profitable Greenhouses**  
"Gurney" greenhouses are profitable greenhouses because they're operated under the most economical conditions.

**"Gurney" Heaters**

maintain an even heat with the least amount of care, burn a minimum amount of coal to maintain the desired temperature, require no brick setting, and are without question the most efficient constructions on the market.

A host of nurserymen already use the "Gurney." If you're not on the list, send for catalogue and find out more about it. Gurneys promote the greatest hot-house success.

### The Window Glass Situation.

Most of this season's large additions are now well under way and the glass bought, if not already laid, but there are, in the aggregate, such large quantities of the various sizes needed for repairs, and so many growers are, as usual, planning the erection of from one to a dozen houses "next year" that the situation in the glass trade is one of considerable interest to greenhouse men.

It is well understood that there has been a lack of harmony among the glass makers. Two years ago the American Window Glass Company, being the most influential factor in the glass trade, put prices up to a level which deterred many florists from building, but as business was good the trust was able to get its price. But so did the independents; the sun shone and they all made hay. When the trust wearied of holding the umbrella over the outsiders prices receded to something like normal and part of the independents organized. Nobody lost money in the business this year, for glass once gladly sold at \$2.50 per box is now bringing \$4.65 and trade has been so good that stocks are at a very low ebb.

The labor problem is a large factor in the production of glass. Blowing is a trade which is handed down from father to son. It has not, therefore, been possible to increase the output at will. There is now a prospect of machine-made window glass, but the trust controls the patents, and it is yet no more than a prospect at best. Thus far there have not been blowers enough to man all the pots, and there is, with a fair field and good business, always more or less competition among the factories for help. That is the principal reason why wages have steadily advanced, but another reason for the rate paid the last fire was that the trust thought it could afford to make glass expensive for the small factories. The wage scale has not yet been fixed for the fall blast.

Window glass factories suspend operations in the summer; the workmen cannot endure the heat. It is on this summer shut-down that the turn of the game now rests. To some of the glass men it looks as if things are right for a good play. The American closed its plants June 15 and has not its usual summer stock on hand. The Independent Glass Company was over-sold and worked to July 1 with all the men who needed the money. The outsiders did the best they could; none of them had too much glass on hand. The Independent Company

promises to start up September 1, which is fully two weeks earlier than usual, for a ten month's fire.

To a man up a tree it looks as though, if this early resumption can be prevented, the stocks now on hand ought to be worth pretty good money. It was this, and the hope of securing harmony and the maximum of profit for next year, which caused J. A. Chambers, president of the American Company, to call a meeting of all the glass interests, at Cleveland recently. It was the largest meeting of glass men ever held, but the Independent Company was not officially represented. An influential committee was appointed to wait on the Independent and if its efforts are successful next season's blast will begin October 15 and not exceed eight calendar months.

In such a case the result will be an immediate and probably well maintained advance in prices, and higher prices will rule next year. But if the plan fails to work there is no telling what may happen. A well posted glass man says that, under existing circumstances, glass buying for future use is simply a speculation, but Frank Hayes, of the H. M. Hooker Company, Chicago, tells the florists that they may rest assured of getting the bottom price whenever they buy, for the competition is so keen for the florists' trade that there is only a very low margin of profit left in the business, particularly as the factories cut as little of the small sizes as circumstances will allow. The larger the sizes the center can get out of a sheet the more money there is in it to the manufacturer, and it is not an unprecedented occurrence for the jobber to have to pay a bonus to the factory to get small sizes cut with which to fill florists' orders.

### Herbaceous Plant Notes.

Hypericum Olympicum is in flower now. It blooms in terminal peduncles during summer and fall months. The flowers are fully as large as those of the well-known H. Moserianum, but of a deeper golden yellow and surrounded by leafy bracts. The foliage is glaucous green, narrower and longer than in the last named, and the shrubby stems are round. Here in central New York it is hardier than H. Moserianum, which is winter killed occasionally, though not often when planted a trifle deeper than ordinarily. Only the tips of the stems freeze back in winter and, therefore, the older plants attain a better height than H. Moserianum, which loses all previous

growth down to the ground when not protected.

Among the harebells I noticed *Campanula rotundifolia alba* doing remarkably fine in the borders. Its flowers are of the purest white, as large as those of the best blue types and produced in unlimited numbers all summer and fall. It is not common and deserves wide distribution, being, like the blue, an easy plant to manage in almost any situation and soil when not too much shaded.

*Grindelia inuloides* looks very pretty all summer. It keeps its clean foliage well and grows erect, one and a half to two feet high. The flowers are daisy-like, golden yellow, the disk also yellow, borne singly on the tips of the many branches. The leaves are dark green, narrow, oval with serrated edges. Sometimes, or in some situations, it acts like a biennial, though usually we find no trouble in keeping old plants over winter and as self-sown seedlings appear annually between the rows it is an easy matter to keep up a stock of these charming plants.

*Iris aurea*, I speak of the species, not of the beautiful deep, pure yellow variety of *I. Germanica*, which is also very rare in its true form, is a tall Himalayan iris with bright yellow flowers and dark green, sword-like leaves two to three feet long and flower stems one or two feet taller still, bearing several loose clusters of gorgeous bloom. It blooms with *I. Kämpferi* or *I. laevigata*, and as yellow is not represented in that family, a few plants of *I. aurea* intermixed with them are decidedly effective, though the flowers are not as large as those of the best varieties of the six-petaled Japanese irises. In moist ground it succeeds best, but requires good drainage, certainly more than *I. Kämpferi*, which is sometimes planted in boggy places, with water standing around the roots for months at a time. I am in doubt whether *I. aurea* would flourish in such a situation.

*I. gigantea* is equally tall in growth and resembles the former in shape of foliage, only it is more glaucous. This iris may be used in the same way, intermingled with the Japanese, as their flowering time is also during June and July. It is lighter yellow in color, shading off to almost white toward the edges of the petals, and the flowers are of good size and substance.

*Hemerocallis aurantiaca major* is vastly superior to any of the so-called orange colored day lilies. Not only is its color pure and clear, without the rusty reddish tinge we find in the older varieties, but the flowers are also twice as large as in any of the others and are produced very freely. Of course some of the other varieties are quite indispensable, especially the lemon-colored, the variegated and double forms and the dwarfs, but none of these can be compared with it for brilliancy of color.

J. B. K.

#### Newport Horticultural Society.

The great Casino exhibition, for which the expert gardeners of Newport have been busily preparing for months, was successfully launched on Tuesday, July 22, with music and the attendance of large numbers of the society people. In arrangement and quality of the exhibits it was an unqualified success and creditable in the highest degree to the workers. In the special prizes, of which there were many, Arthur Griffin, gardener to Commodore E. T. Gerry, was well nigh invincible, taking first place in the Mrs. Perry

Belmont prize for 150-foot group of decorative plants with an arrangement that elicited admiring praise from everybody for its elegance and finish, first in the Hon. F. P. Garrettson prize for 50-foot group, first in the Mrs. Burke-Roche prize for 100-foot group of caladiums and ferns and first in the Mrs. Stuyvesant Fish prize for twelve specimen stove and greenhouse plants. Second and third Belmont prizes went to Richard Gardner, gardener to J. J. Van Alen, and David McIntosh, gardener to Dr. Bell, respectively, for splendid groups of anthuriums, crotons, dracaenas and ferns. C. D. Stark, gardener to Mrs. George Collord, won the second Garrettson prize and Bruce Butterton, gardener to Mrs. E. J.

THE LATE JOHN BRADSHAW.  
(See page 933.)

Berwind, second Burke-Roche prize with very strong groups. W. Barth, gardener to Perry Belmont, was first in the F. Neilson prize for gardenias, the Mrs. F. K. Sturgis prize for display of carnations and the Mrs. F. K. Sturgis prize for fancy basket of flowers, consisting of allamandas.

In the society prizes Mr. Griffin was again very fortunate, taking first for twelve crotons, six caladiums, specimen kentia, pair of kentias, and dish of foliage plants for table. Mr. McIntosh was first on twelve foliage plants in 6-inch pots. J. G. Kyle, gardener to Mrs. J. J. Wysong, won out on dish of *Adiantum Farleyense*, Richard Gardner on dish of other ferns, with Mr. Barth and Mr. Griffin second, respectively, and on dish of foliage plants second and third went to Mr. Gardner and the Findlay Greenhouses. There were fine displays of cut flowers, Mr. Barth and the Findlay Greenhouses being first and second on American Beauty roses and also on Liberty. Several of the competitions were arranged to take place on the second day and the results of these as well as several other awards unavoidably omitted from this report will be chronicled next week.

The S. A. F. silver medal was not awarded but the bronze medal went to Richard Gardner for *Cypripedium Gardinerianum*, *C. insigne* × *C. barbatum*. Certificates of merit were given to Mr. Gardner for rose Newport Rambler (*Wichuraiana* × *Crimson Rambler*) and

to John G. Allen, gardener to J. R. Drexel, for a superb gloxinia with a suggestion that it be named Mrs. John R. Drexel. Honorable mention was also given to Mr. Allen for gloxinia plants and for collection of dahlias, to W. Barth for finely grown Mrs. John Laing roses and for hollyhocks, to D. F. Roy for seedling canna Mrs. E. S. Converse with a suggestion that it be shown again in plant form, to Alex. Fraser, gardener to H. McK. Twombly, for a superb display of cactus dahlias, one of which was a seedling named Catherine Duer and was especially admired, to Gibson Bros. for Rose Dorothy Perkins, to Major Gibbs for dwarf Japanese plants and to F. L. Ziegler for artistic display of flowers and seedsmen's supplies. Cultural certificates were awarded to Arthur Griffin for specimens of *Allamanda Williamsii* and D. F. Roy for *Pteris ensiformis* var. *Victoria*. Master Jas. H. Williamson received a special gratuity for a geometrical garden design in flowers and a special prize offered by Clarence Dolan but not printed in the schedule, for display of cut flowers, was won by the Findlay Greenhouses. H. A. Dreer had a fine show of about fifteen species and rare varieties of nymphæas, Major Gibbs a large collection of hardy garden flowers and F. E. Green an interesting lot of seedling perennial phloxes. The fruit displays from the greenhouses of H. McK. Twombly and from A. G. Ferretti were unusually fine. The judges were James Wheeler, H. A. Siebrecht, H. A. Bunyard and W. J. Stewart.

#### The Embellishment of a Dwelling.

The camera was turned on this Delaware avenue residence in Buffalo for the purpose of illustrating a few ideas in regard to the arrangement of such vines and trees as many florists or gardeners are continually called upon to establish. Here we have a very large house built of red brick. Although the architect diversified the outlines for appearance as well as utility's sake, it was nevertheless a large mass of red brick, lacking harmony with its surroundings. But the beautiful birch trees to the left have grown up in such a position that one can only see a part of the building at a time, there being nothing more beautiful than a birch for a close or foreground view. The nearer walls of the house blend in with the birch so well that you must look very close and carefully to discern which is birch or ampelopsis. At the same time the architect's principal outlines are preserved. The glimpse of stairway ornamented with vases leading to the protection of an awning is always pleasant. The one blemish here is the exposure of the stone wall under the awning. A cluster of tamarisk with hydrangeas or a combination of sumach, eulalias and phloxes would be a pleasing relief.

The other half of the picture is equally important. First, the large elm together with the birch make the foreground complete, forming a vista, the uncovered portion of building where the porch is arched adding to the effect much better than if it were all completely covered with vine. One great trouble with cultivators generally is that after they become convinced that vines are ornamental and desirable, the more the better without limit is their mistaken rule. The opening through which the well lighted front of a dwelling is seen in the distance adds materially to the distant effect and creates an impression of more

THE EMBELLISHMENT OF A DWELLING.

(A private residence in Buffalo, N. Y.)

room or space. To prevent the appearance of crowding is always desirable. These people have gone to unwarranted expense in placing the two tubs of laurel on the lawn. If they had been more careful in selecting a place for them and had sunk the tubs below the surface of the lawn, we might not say money was wasted on such stock for lawn decoration.

It is surprising how the demand for ampelopsis is kept up in the west by people who visit Buffalo, New York, Philadelphia or Boston and, returning, want to cover their houses with it. If you tell them truthfully that the plant is not hardy and offer *Ampelopsis Englemanni*, they will reject your advice. The *Englemanni*, although not quite so close clinging, is the only one satisfactory after the third or fourth year, but our native bittersweet (*Celastrus scandens*) for running up lightning rods, water spouts or strands of copper wire is most beautiful of all, where loose graceful effects are desired. C. B. W.

#### Spraying For San Jose Scale.

[The following is a report of the work at Keney Park, Hartford, Conn., by Hans J. Koehler.]

Our spraying for the San Jose scale was done during the months of January, February, March and April. The materials used and the quantities were as follows: Three thousand pounds of whale oil soap, of three different brands, all supposed to be made of potash instead of soda; four barrels of crude petroleum, seven barrels of refined kerosene, and enough of the materials for the lime, sulphur and salt wash to make one mixing as the recipe is given by the Department of Agriculture.

The greater part of the whale oil soap was dissolved in water at the rate of two pounds of the former to one gallon of the latter, and the rest at the rate of one and one-half pounds to one gallon of water, the manufacturers of one of the brands recommending this reduction in the usual ratio for his soap. The directions for use which accompany the soaps often state that they can be dissolved in cold water. This, however, we found impossible after several attempts. Possibly in the summer, with the water naturally many degrees warmer than in winter, it might be done, although it is doubtful. One brand proved refractory even with boiling water, and a barrel full of the dissolved mixture left standing over night was so hard the next morning that it could almost be cut and had to be heated over again before using. The other two brands when once dissolved stayed so and could be used without difficulty even when ice cold.

For heating purposes a sixty-gallon iron kettle was used. This was set into an iron ring which fitted just under the flange of the rim. The ring was supported by five legs. The whole was set up out of doors, and sheet iron was used to confine the fire, an opening being left to secure draft. As the wind shifted the iron was turned accordingly. One man was kept constantly at the kettle, his time being occupied in weighing soap, getting water, splitting wood for the fire, and so forth. He was termed the cook.

The crude petroleum was ordered from the Providence agency of the Standard Oil Company, P. M. Watt, manager, 136 South Water street, Providence, R. I., as recommended in Bulletin No. 135, of the

Connecticut Agricultural Experiment Station. We tested it and found it to be of the required specific gravity, that is, between 43° and 45° Beaume. A testing outfit consisting of a hydrometer and hydrometer glass, and a thermometer were bought of a wholesale druggist and cost only \$1.50. The cost of the petroleum was 10 cents a gallon, including barrel, shipping charges extra. It was applied pure.

The refined kerosene was ordered from a local dealer and was the same quality we use for illuminating purposes. The barrels were marked "150 Water White Oil." It was applied in the form of a mechanical mixture with water, most of it with the pump set at twenty-five per cent. We found it impossible to maintain the percentage accurately. It was usually greater than that at which the pump was set. In testing it without a nozzle, so that no pressure accumulated in the pump, it worked quite accurately, but soon after putting the nozzle on again pressure would accumulate and the accuracy would be impaired.

Possibly the proportion of accumulated compressed air in the air pump was greater than that in the oil pump, and therefore not enough water was pumped per stroke. Attempts were made to get the desired percentage by setting the pump at a lower percentage than what was wanted. This scheme did not work on account of the varying pressure in the pump, so it is safe to say that we tried all percentages between ten and fifty, the average being probably about twenty-five.

On account of the amount of spraying we had to do, it was impossible to wait until the weather conditions were just

those which are usually prescribed for the use of kerosene and crude petroleum. It might be fine in the morning, at the time of starting out, and then change. Unless it actually began to rain we usually kept right on until quitting time, which was then 4:30 p. m.

We sprayed an old orchard consisting mostly of apples, and a few pears, with twenty-five per cent on a day when the sky was uniformly overcast and which during part of the time was foggy. Up to date (June 19) no injury is apparent; in fact, no injury to anything has yet been noticed where the oil and water mixture was used. Considerable injury was done with the crude oil. A number of peach trees and *Cornus florida* were killed outright and most, although not all, plants sprayed with crude oil seemed to be retarded in their growth, so that they have not even yet caught up with plants sprayed with other materials.

The peach trees were sprayed in the afternoon of a fairly bright, still day which came in between two rainy days, with snow on the ground, so that there must have been considerable moisture in the air. The other plants were sprayed on an ideal day, that is, clear and windy.

It may be said that all of the plants on which crude oil was used were quite thoroughly drenched. To merely moisten the plants as prescribed was in our experience an impossibility with the pump. The only way we could do this was by making the application with a "cyclone bug exterminator," a syringe made on the plan of an atomizer, and which gives the finest possible spray, much finer than that of any nozzle I have yet come across.

Crude oil applied with this syringe was used on one peach tree about twelve feet high, and the tree given a fine film of oil all over. The difference in favor of this tree and those sprayed with the pump, even where such trees showed no effect of the oil except a retardation of growth, was quite marked. In fact, it seemed to me that this tree started out more vigorously than unsprayed ones even. The application was made on a bright, still day, about two o'clock in the afternoon. A friend of mine sprayed an elm in full leaf in June with pure kerosene with one of these syringes and no injury resulted.

The variety of plants sprayed was quite extensive. Some of those sprayed with kerosene and water were *Sorbus nigra*, *Rosa blanda*, *R. lucida*, *R. Carolina*, *R. multiflora* and *R. rugosa*, *Viburnum Opulus* and *V. dentatum*, *Cornus stolonifera*, *C. sericea*, *C. paniculata*, *C. florida* and *C. alternifolia*, *Pyrus Aucuparia* and *P. baccata*, *Prunus maritima*, *P. serotina*, *P. Virginiana* and *P. pumila*, *Crataegus Crus-galli*, *C. coccinea*, *C. cordata* and *C. Oxyacantha*, peaches, pears, apples, plums, cherries and currants.

Just to see what the effect would be, some *Pinus strobus*, *Tsuga Canadensis*, *Picea excelsa* and *Kalmia latifolia* were sprayed with oil and water, with the pump set at twenty per cent, and some with whale oil soap. No injury resulted in either case. Some of the above mentioned conifers were sprayed with crude oil. All were considerably retarded, although none seem to have been killed.

When applying the lime, sulphur and salt wash care was taken to keep it well agitated. The application was followed by several dry days. The pouring rains which came soon after had no visible effect in washing it off, and weeks afterward the plants looked as white as at the time they first became dry after the spraying, and the smell of sulphur was still noticeable. At first it was thought

that this smell might come from sulphur on the ground under the plants, but this proved not to be the case, as an inspection by smell, of the twigs, showed.

It has been suggested that in a moist climate, like that prevailing here in the east, the various compounds of sulphur and calcium which are formed in the preparation of the wash would soon leach out and that the sprayed plants would still be white and seem to have the wash on them, but that in reality very little would be left but calcium carbonate. Would not the presence of the sulphur weeks afterwards as shown by its odor indicate that the insecticidal compounds were still present and that the wash is efficacious even here in the

THE LATE THOMAS H. HOSKINS.

(See page 933.)

east? Nevertheless, even if it proves a reliable insecticide, it is hardly to be recommended for extensive use on landscape plantings on account of the ugly whiteness which it imparts. It is nevertheless the cheapest of all materials and objections against its use on aesthetic grounds would have little weight on commercial places.

We found the mechanical mixture of kerosene and water the most convenient of all materials to handle. A supply of kerosene can be taken along and water can be picked up almost anywhere.

Although we bought four different kinds of nozzles we finally eliminated all but one, the Seneca. It is simple in construction, easily adjusted, quickly cleaned when clogged, and is so made that it can be used as a shut-off, a feature lacking in the others. A shut-off of some kind is necessary, as, on account of accumulated pressure, merely stopping the pump does not stop the flow of liquid. This is an item of importance in spraying landscape plantings where plants subject to infestation are mixed in with others which are immune. Even when using the oil and water mixture a shut-off can be used. The two liquids remain mixed long enough so that it is not necessary to empty the hose each time after stopping for only a few moments.

All the various materials enumerated above were applied with a pump made for

using a mechanical mixture of kerosene and water, such a pump doing quite well for both the latter and ordinary liquids. It had two hose attachments. Sometimes two leads of hose were used and part of the time only one, in lengths varying from 100 to 300 feet. When two leads of hose were used the spraying gang consisted of five men, one to do the driving and pumping, one at each nozzle and one for each line of hose to help handle it among the trees and shrubs. The men were provided with oilcloth suits consisting of pants, jacket and hat, costing about \$2 50 per suit.

An important fact to remember when spraying for the San Jose scale insect is that in the case of shrubs and small trees the insect seems to have a preference for the base of the plants. It will there be found in the greatest numbers and the spraying should be very thorough at that point.

#### Some Recent Publications.

DEAN'S SYSTEM OF GREENHOUSE HEATING.—By Mark Dean.—This is a handy book, containing in compact form many tables and data of great practical utility to those concerned with the arrangement and construction of heating apparatus. The work differs from others of a similar character in that it may be readily mastered by the layman. Price \$2 00.

FORESTRY IN MINNESOTA.—By Prof. Samuel B. Green.—It was in 1898 that this book first appeared and it met with much favor, as may be judged from the fact that the first edition of 10,000 copies is practically exhausted. The work is divided into three sections, "Elementary Forestry," "Trees in Minnesota" and "Forest Trees of the United States." It is extensively used as a text book in the agricultural colleges and this second edition has been improved by additions and corrections. The volume of some 400 pages is well illustrated and substantially bound.

YEARBOOK OF AGRICULTURE FOR 1901.—A large amount of valuable information has been compiled for this annual publication of the Department of Agriculture. The volume for 1901 has just been issued and contains 846 pages. In addition to the usual reports, statistics, etc., we find in the contents a number of original papers likely to interest our readers, as follows: "The Relation of Nutrition to the Health of Plants," by Albert F. Woods; "The Timber Resources of Nebraska," by William L. Hall; "Progress in Plant and Animal Breeding," by Willet M. Hays; "Agricultural Seeds—Where Grown and How Handled," by A. J. Pieters; "The Cotton Seed Industry," by Charles M. Daugherty; "Influence of Environment on the Chemical Composition of Plants," by H. W. Wiley; "Agriculture in the Tropical Islands of the United States," by O. F. Cook; "Little-Known Fruit Varieties Considered Worthy of Wider Dissemination," by William A. Taylor; "The Home Fruit Garden," by L. C. Corbett; "Floods and Flood Warnings," by H. C. Frankenfield; "Progress of the Beet Sugar Industry in the United States," by Walter H. Evans; "Commercial Apple Orchard," by G. B. Brackett. The book contains numerous illustrations of high character. It is well printed on good paper and attractively bound in cloth. Write your congressman or your senator requesting a copy.

\*\* Where the price is given, we can supply any of the foregoing publications on receipt of the necessary amount.

# ASHEVILLE

## Child of the Mountains.

SECRETARY STEWART is just home to New England after a trip to Asheville to further the preparations for the S. A. F. convention, now little more than three weeks away. He returned to Boston with the enthusiasm engendered by his first trip, to the executive committee meeting in March, stimulated by the summer journey to "the land of the sky" and his sanguine expectations of a most successful convention were given further incitement by word that the Central Passenger Association has joined the Southern in granting a rate of one fare for the round trip. A large section of the country is now assured of the cheapest railroad fares ever enjoyed by the S. A. F. and it looks as though the whole country may be admitted to the same privilege.

The success of the convention is assured by this reduction in fare, for numbers make for success more than any other factor in such matters, and Ohio, Indiana and Illinois may be counted upon to respond most heartily to the inducement. It will be a great special train which will pull out of Cincinnati on the afternoon of Monday, August 18, bound conventionward, and it will be a merry party that it carries.

Aside from the direct personal and business benefit derived from the meeting, there could be no finer summer outing than is afforded by a trip to Asheville in congenial company. All who have made the journey agree upon its pleasures. J. F. Sullivan, of Detroit, who was in Asheville in March, told his fellow florists, in an address at a club meeting a few weeks later, that his powers of description utterly failed him when he tried to tell of the clear-aired scenic grandeur of this "Switzerland of America." C. L. Washburn, of Bassett & Washburn, Chicago, who was down last winter on account of Mrs. Washburn's health, says the sights are among the finest he has ever beheld and that the climate is perfect. It is so high the air is light and pure and there are none of the sudden changes, seven kinds of weather in one day, which make life so trying in many of the seaboard and lake cities.

The florists' special train will pass through the famous blue grass region of

Kentucky by daylight and will wend its way up the Great Smoky mountains as the party sleeps (such of it as care to and don't mind the noise of those who won't) reaching the wonderful valley of the French Broad river by the early light of morning. Here follow three hours ride through one of the most wonderful scenic regions of the world, and the train gets into Asheville in time for breakfast and the opening session of the convention.

Sherry's or Rector's. But the town has few southern characteristics, although its population is one-fifth negroes, the negroes of the south. The observant young woman who noted that the cake-walkers of her northern home were divided into three social groups, "the lily whites, the chocolate drops and the smuts," at Asheville found none but "smuts," a light hearted, happy folk of few cares and no responsibilities.

The people have none of that deliberation and lack of push which one is apt to associate with the south. The town is northern in its industries, in its architecture and in its associations; fourth-fifths its white people were born outside the state. The town is advertising itself by means of the conventions obtained for it by its Board of Trade.

One of the accompanying illustrations shows the Auditorium, where the business sessions of the S. A. F. will be held. It is a recently completed structure and affords ample accommodations for the society and for the trade exhibits. The theatre proper is 90x150 and will seat nearly 2,000 persons. The stage is 40x90 and it is here that the exhibits will be displayed, in full view of the convention. The present indications are that the showing of southern products will be large and comprehensive. The hall has a number of well appointed ante-rooms and the whole structure will be at the service of the visitors. The trade exhibition is in the hands of Secretary Stewart and Vice-President Deake.

The sporting arrangements were intrusted to Messrs. A. B. Cartledge, of Philadelphia, and Robert Halliday, of Baltimore. There are several pairs of good alleys in the town, but no one place where there are more than two alleys.

The place selected as the principal bowling headquarters is the Albemarle Club, whose establishment is shown in the picture. Here there are excellent alleys, much better than those used at Buffalo, and here the bowling will be conducted should there not be so many teams as to necessitate dividing the contest into sections. Another of the amusement features will be an old-fashioned watermelon feast at Overlook Park high up in the mountains, where the facilities are best for "tickling the angels' leet."

THE AUDITORIUM WHERE THE S. A. F. WILL MEET.

ALBEMARLE CLUB, SELECTED FOR CONVENTION BOWLING CONTESTS.

The misapprehensions about the convention city are being rapidly dispelled; it is now generally understood that, being in the mountains, it is not a typical southern city but a hustling town not far different from those of its size in the north except that it has vastly greater accommodations for tourists of varying degrees of wealth. The visitor can domicile where the unfamiliar cookery of the southland is served in the typical southern style, or he can dine with all the appointments of

## A Crop of Cucumbers.

Many florists are finding it profitable to devote a portion of their glass to the forcing of vegetables, disposing of the principal portion of their crop to the local people and shipping the balance either to hotels, restaurants or other steady outside customers, or to commission houses in the principal markets. Such a successful vegetable grower is Mrs. Cal. Richardson, of Waverly, Ill., whose house of cucumbers is shown in the accompanying illustration. The house, ninety feet long, was planted in the last week of March and the photograph taken June 25. Mrs. Richardson did all the work of growing and feels well repaid by the crop.

## Chicago.

RECEIPTS VERY LIGHT AND DEMAND NOT GREAT.—TRADE DECIDEDLY UNDER A YEAR AGO.—CARNATIONS NOW SCARCE.—GROWERS THROWING OUT THE OLD STOCK.—CEASELESS RAINS DO MUCH DAMAGE TO OUTDOOR FLOWERS.—VARIOUS DOINGS OF THE GROWERS.

The market is "pursuing the noiseless tenor of its way," little stock coming in and little demand for what there is. The growers who base their expectations upon last year's returns at this season are all protesting to their commission men and the latter have lost heart for the moment, as few of them are in a position to claim that sales foot up anywhere near the record for last July. Furthermore they say that the stock is so poor that if one ships it to an out of town buyer there is complaint, while if the order is left unfilled it goes somewhere else next time. The rose cut has been both light and poor for several weeks but there have been plenty of carnations up to within the past few days. Now most of the old stock has been thrown out and replanting is in order, so that supplies are very light and all the stock which is any good at all, particularly white, is easily sent out on shipping orders. It is in the line of asters, field grown carnation blooms and sweet peas that the bad effects of the long continued heavy rains are most severely felt. There is little prospect of a profit from the asters this year. Unless on high ground they are severely injured, and the outdoor carnations will give few salable

flowers, from present indications. The sweet peas, too, show the effects of rain, and few good ones are to be found. Gladioli seem to fare the best of outdoor stock and tuberose sell for funeral purposes. The receipts of lilies continue heavier than the demand and there are all the greens which anyone may need.

The Chicago Carnation Company has two of its new rose houses finished and the third glazed and nearly completed. The Beauties have been benched nearly a month and are in splendid shape. They have been planting Brides and Bridesmaids this week. The carnation plants in the field, in common with those of nearly all growers in this vicinity, show the effects of the rains.

The South Park Improvement Association is planning a neighborhood movement to secure the horticultural embellishment of that section between the Midway and Fifty-fifth street, Washington Park and Jackson Park. James Jensen has been employed to direct the work. It ought to give the South Side florists some good work next spring.

A. C. Brown, the well known Springfield florist, has been making very creditable showings in the big golf tournaments here the last two weeks. In the American championship match at Glen View he encountered H. C. Egan, son of W. C. Egan, and was beaten by only a narrow margin. At Onwentsia this week Mr. Brown did equally well.

They say that at Vaughan's Greenhouses at Western Springs the cannas are backward because of cool weather and rains, but not so far behind as they were at this date last year when we had had no rains at all.

A meeting of the executive committee of the Horticultural Society of Chicago will be held at the Rialto Building, room 630, at four o'clock this (Saturday) afternoon.

Miss Rose Last, clerk at Vaughan's Seed Store, when bathing at St. Joseph, Mich., one day this week, saved a young girl from drowning.

James S. Wilson, of Vaughan's Greenhouses, Western Springs, celebrated his seventeenth wedding anniversary July 24.

W. N. Rudd practically completed benching his carnations July 21 and he says that date is late enough for him.

Paul Retzer, of Walter Retzer & Company, is seriously ill.

The Boston fern, the gladiolus and the auratum lily are the features of the average window decoration nowadays.

The five new houses of the Guardian Angel Orphan Asylum, each 14x284, are almost ready for planting.

One fare for the round trip to Asheville. Let Ed. Winterson reserve a berth for you.

We are informed that the annual picnic of the Florists' Club will be held August 12.

J. B. Deamud has gone to his farm at Caro, Mich., for a brief vacation.

McKellar & Winterson are receiving large quantities of fine gladioli.

C. M. Dickinson, of E. H. Hunt's, is at home from his New York trip.

Bassett & Washburn redecorated their store during the week.

Visitors: Henry Gaethje, Jr., and Emil Boehm, Rock Island, Ill.; A. C. Brown, Springfield, Ill.; J. A. Shaw, New York; R. C. Whitehill, Fishkill, N. Y.; S. S. Skidelsky, Philadelphia; Geo. H. Bancroft, Cedar Falls, Ia.

## Philadelphia.

GROWER IMPORTS BELGIAN WINDOW GLASS WITH SATISFACTION AND A PROFIT.—DUTY THE GREATEST EXPENSE.—BREAKAGE LIGHT.—INTEREST IN THE CONVENTION TRIP.—LITTLE DOING IN LOCAL STORES.—SHIPPING DEMAND EXCEEDS SUPPLY.—VARIOUS NOTES OF DOINGS OF THE GROWERS.

The following recent experience of a firm doing a lot of building in the neighborhood of this city may be of interest to growers who contemplate making additions in the near future. As glass has advanced to such a high figure, the firm, needing some 500 boxes, concluded to import and gave an order to Belgian glass factories direct for this amount. The order was placed with two houses and one shipment turned out much better than the other, although the quality promised was the same. The saving after all charges were paid was about twenty-five per cent over the price of the same size of glass of American make, with the standard of quality considerably in favor of the imported stock. After the cost of the glass the main item of expense is, of course, the duty, it being \$1.50 per box of eighty pounds, which is the weight of a box of 16x24 double thick glass, or 17½ cents per pound. The cost of ocean carriage from Belgium to Philadelphia is only 20 cents per box and the risk of breakage is very slight, as in the first ten boxes opened every pane was found perfect. A lot of boxes of 24x30 also carried safely and proved of excellent quality. Every man should be loyal and consistent and if he voted for high tariff buy his glass where the trusts get the duty but if his convictions carried him with the minority then he can save 25 cents on his dollar or about 75 cents on each box of glass, besides helping Uncle Sam out with his household expenses to the extent of the duty paid.

As it comes near convention time the desire to visit the "sky land" appears to be spreading and it now seems as if the convention crowd from this city will assume creditable proportions. It is a great pleasure to hear that the temperature is almost sure to be about 70°, as one of the discomforts of many such journeys to different parts of the country has been the great heat experienced during convention week. At the last meeting of the club Messrs. A. B. Cartledge, David Rust and Robt. Kirt were appointed a committee on hotel accommodations

MRS. RICHARDSON, OF WAVERLY, ILL., IN HER HOUSE OF CUCUMBERS.

and any one desiring information in this direction will get it by addressing them.

Business is very quiet just now, there being but very little doing. Good flowers are scarce and the commission men, who seem to find more business out of town than in the city, have a great time to get stock good enough to ship. A good many of the store help are now having their vacations and those left in charge are getting the various properties, such as pot covers, stands, and so forth, in order for the coming season. The growers, who seldom take vacations, as they do not have the time, are busy with repairs and planting, although most of the rose planting has been done where the houses are ready for it.

W. J. Stewart passed through our city on Sunday evening on his way home from Asheville to Boston. President Burton expressed himself as much gratified with the prospects for a successful meeting, after listening to Mr. Stewart's account of the cordial attitude of the Asheville Board of Trade, the Biltmore estate, and the local florists' trade. All difficulties seem to be now smoothed away and nothing remains but to "whoop 'er up" for Asheville, Biltmore, and the "Land of the Sky."

Jos. Heacock has a large force at work putting new gutters and benches in a large range. The walks are to be changed to the sides of the houses, which will give the plants a better chance and adds at least twenty per cent to the efficiency of the houses. Mr. Heacock thinks it is strange it took the trade so long to find this out, but it only shows how custom makes precedents which are blindly followed, even at a loss.

The European travelers from this city are having a good time if one may judge from the souvenir postal cards that are received from time to time.

Robert Craig reached home last Tuesday and looks better and says he is much benefited by his rest. K.

#### Boston.

WEEKLY SHOW AT HORTICULTURAL HALL.—NEW NYMPHÆAS A FEATURE.—MARKET DULL.—RECEIPTS AT LOW EBB.—SUMMER ROSES SELL BEST.—BOARD OF AGRICULTURE CELEBRATES SEMI-CENTENNIAL.—NOTES.

The exhibition at Horticultural Hall, July 19, included two tanks of very fine aquatic flowers from Mrs. J. L. Gardner, Wm. Thatcher, gardener, and Oakes Ames, R. M. Grey, gardener, to whom the premiums were awarded in the order named. The collections were conspicuous for the many fine nymphæas of recent production which they contained. J. E. Rothwell, E. Johanssen, gardener, contributed a group of cattleyas, miltonias, cypridiums and oncidiums which attracted much attention. In the line of summer flowers there were tuberous begonias from E. S. Converse, D. F. Roy, gardener; hollyhocks from E. L. Lewis, sweet peas and Phlox Drummondii from W. J. Clemens, Ed. Powell, gardener; dahlias in large variety from B. F. Flanders and hardy phloxes from Geo. Hollis. Among the latter was one seedling named Gaiety for which Mr. Hollis received honorable mention.

Nothing worthy of especial remark is going on in cut flower business. Receipts of greenhouse products are lighter than they have been, with a beneficial effect on general results. Much of the rose stock coming in is very inferior in quality and is practically unsalable, the only kind that can be disposed of for summer demand being clean and well up in the

SEVEN-FOOT FUNERAL DESIGN BY GEORGE WALDBART, ST. LOUIS.

points that go to make a rose desirable in winter. The varieties that do this most readily in summer, such as Kaiserin Augusta Victoria and President Carnot, are the best sellers. Cool weather has benefited the sweet peas, which are still offered in excellent quality. A few early asters are seen.

The semi-centennial of the Massachusetts State Board of Agriculture was observed in Horticultural Hall on Tuesday, July 22. There were many speakers of note. Dr. H. Fernald was elected inspector of nurseries. Prof. F. A. Waugh was selected to fill the vacancy caused by the resignation of Prof. Maynard as chairman of the horticultural committee of Amherst Agricultural College.

Fire in the pottery of A. H. Hews & Company, at North Cambridge, caused a damage of nearly \$2,000 on Tuesday morning. It is supposed to have been a case of spontaneous combustion. The property was mostly covered by insurance.

L. W. Hastings, a florist of Brookline, has brought a bill against his wife and secured a temporary injunction restraining her from leasing the estate and ousting him from it. He claims that she is of unsound mind.

#### Hailstorm at Erie, Pa.

Early on the morning of July 17 the vicinity of Erie, Pa., was visited by the heaviest hailstorm in its history, much damage being done to vegetation and every greenhouse owner in the city lost glass, save John Laver.

The Schluraff Floral Company was the greatest loser, the breakage being between 2,500 and 3,000 panes of glass, with an attendant loss of some \$400 to \$500. They were partially protected by the Florists' Hail Association.

S. Alfred Baur lost between 600 and 700 lights of glass and Clark & Robb counted up 400 perforated panes.

E. C. Hill reports 300 lights broken and John Frost figures a loss of \$200.

Leonard A. Spoden thinks he will not get out much under \$200 and J. M. Hoeffner and H. Tong count on \$100 loss in glass.

In one of F. H. Hermann's houses more than half the glass was broken, while the other escaped much easier; \$200 will pay the bill.

Ernest Neuberger was one of the heaviest losers and it will take from \$400 to \$500 to repair the damage.

Of course, with such heavy hail the stock in the houses was cut up.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Every space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements most reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

DON'T let the summer slip by without  
making the little repairs which will be  
big ones by next year.

THE general business prospect is for  
heavy trade in fall and you will do well  
to make ample preparations for it.

THE big carnation growers are reduc-  
ing their plantings of Mrs. Bradt this  
year, giving the space to white and red.

ALTHOUGH the violet growers did not  
last year do as well as in the years pre-  
ceding they have nearly all this summer  
found means to increase their planting.

OF the less known pæonias seen in the  
cut flower markets this spring none has  
made a better impression than Lady  
Elonora Bramwell, a fine rose pink.  
Kelway & Sons, the large English grow-  
ers, list it seventh in naming the best  
twelve.

HEAVY rains are still falling almost  
daily over the great central section of the  
country, from Ohio to Nebraska, and the  
injury to outdoor stock will amount to  
a vast sum in the aggregate. Asters are  
almost a failure for summer cut flowers,  
but the greatest loss will be on carnation  
plants, many growers who annually  
sell thousands of surplus plants this sea-  
son counting themselves fortunate if they  
have stock to plant their own houses.

### New York to Asheville.

A reduced railroad rate of \$23.72 for  
the round trip has now been secured  
from New York to Asheville. No certifi-  
cates are necessary; through round trip  
tickets to destination will be issued at  
the figure named—\$23.72. Sleeping car  
berth from Washington to Asheville  
costs \$3.

The New York delegation will leave on  
Monday, August 18, by the 10:10 a. m.  
train, via Pennsylvania Railroad. This  
will enable the eastern delegates to join  
those from Philadelphia and other points  
en route to Washington, at which city  
a special train will be made up, arriving  
in Asheville about 8:30 a. m. Tuesday,  
August 19.

No more favorable rate concession has  
ever been granted to S. A. F. dele-  
gates than that given by the Southern  
Railway Company, and a large eastern  
representation should result.

Delegates intending to travel with the  
New York party should at once notify  
any one of the Florists' Club's transpor-  
tation committee, which is composed of  
Alex. Wallace, Box 1697, New York; A.  
H. Langjahr, 19 Boerum Place, Brooklyn,  
N. Y., and Theodore J. Lang, 670 Sixth  
avenue, Manhattan.

### Society of American Florists.

RATES TO ASHEVILLE.

The Central Passenger Association,  
including all the territory from St. Louis,  
Keokuk, Chicago and Lake Michigan,  
eastward to Toronto, Erie and Pittsburg  
and southward to the Ohio river, now  
announces co-operation with the South-  
ern Passenger Association in the conces-  
sion of one fare for the round trip to the  
Asheville convention, for continuous  
passage in each direction.

WM. J. STEWART, Sec'y.

### Half Fare to Asheville.

Largely through the efforts of G. H.  
Mitchell, of the Big Four R. R., the  
Central Passenger Association has at  
last granted a rate of one fare for the  
round trip to Asheville from all points in  
its territory. This means that every  
florist in the states of Wisconsin, Illinois,  
Indiana, Michigan and Ohio can attend  
the convention for one-half the regular  
fare. We believe this to be the lowest  
general rate ever given the society. If  
there is a large attendance at Asheville,  
no doubt this rate may be obtained for  
future conventions; but if the trade does  
not respond and make the returns profit-  
able to the railroads interested, it is very  
doubtful whether so low a rate can be  
obtained again for many years.

### Greenhouse Building.

New Albany, Ind.—A. Rasmussen,  
range of houses.

Danville, Ill.—Rhoten Bros. & Com-  
pany, house 34x250.

Newark, O.—Geo. L. Miller, house  
30x120. A. J. Baldwin, one house.

West Mentor, O.—Carl Hagenburger,  
four houses 20x89, three 20x110.

Cincinnati, O.—G. Bruner's Sons, house  
25x140.

Hyde Park, O.—Sunderbruch & Meier,  
rose house.

Beverly, Mass.—George Ward, three  
houses.

Lockland, O.—W. K. Partridge, range  
of rose houses.

Maywood, Ill.—H. Wehrman, house  
24x100.

### Orchids of Easy Culture.

ED. AM. FLORIST:—We have some fine  
clumps of Epidendrum venosum growing  
on pieces of charred oak hanging from  
the rafters in our greenhouses. Some of  
them have had from twelve to twenty  
spikes of bloom this season and have  
filled the houses with their fragrance.  
They are no trouble to grow here and  
are in bloom about six weeks. I would  
like to know if there are any other  
orchids that can be grown in the same  
way and bloom as freely as the above.

W. C.

Many of the Mexican and South  
American orchids can be grown success-  
fully on boards, rafts and so forth hang-  
ing from the roofs of greenhouses. The  
temperature and moisture required will  
depend upon the species grown. I will  
name a few that will do finely in a tem-  
perature of from 50° to 55° at night and  
60° to 65° in daytime, used for general  
stock of greenhouse plants: *Lælia anceps*,  
*L. albida*, *L. autumnalis*, *Dendrobium*  
*nobile*, *Odontoglossum citrosum*, *Oncid-*  
*ium sphacelatum*, also *Oncidium vari-*  
*cosum*. With a temperature 60° at night  
and 70° in day almost all varieties of  
cattleya may be grown. These will

require more shading than the Mexicans.  
A moderate amount of orchids on the  
roofs does not detract from the culture of  
many kinds of greenhouse stock, say  
azaleas, aspidistras, *Dracæna indivisa*  
and so forth. Of course, over a bed of  
verbenas, geraniums and other soft-  
wooded stock the moisture through  
syringing would not be just the thing  
during the flowering season.

WM. MATHEWS.

### Tuberose Bulblets.

ED. AM. FLORIST:—I wish to know if  
the small bulblets on tuberose should be  
removed before planting out the bulbs  
and whether the dry roots should be cut  
off.

L. C. L.

Tuberose bulblets should be removed  
before planting the parent bulbs and the  
dried fibrous roots at the bottom of the  
bulbs may be pulled off, but there is no  
object in cutting away any of the root  
base unless it is dead, in which case the  
dried or rotted part may be removed. It  
is important that the soil be pressed  
firmly about the bulbs, especially at the  
base when planting them either in pots  
or in the open ground.

### Heating With Boiler Flues.

ED. AM. FLORIST:—I have a lot of 4 inch  
boiler tubes with which I would like to  
heat two small houses. One is 21x30  
feet, side walls five feet high and eleven  
feet to ridge. Here I want 50° to 60°  
when it is 20° below zero outside. The  
other is a carnation house 12x30 feet. It  
is attached to the first house on the  
north and the south wall is four feet  
high, the ridge seven feet. Here 45° to  
50° is the temperature required. Each  
house is three-quarter span. How many  
feet of the old flues will be required in  
each house?

L. D. H.

For the wide house four pipes running  
around three sides will answer. If there  
is a doorway in the end return the pipes  
on each side from the door. For the  
other house use two pipes instead of  
four.

L. R. TAFT.

### Piping and Stack.

ED. AM. FLORIST:—We are building  
eight connected houses, no partition  
walls, and wish to heat them with steam.  
Four of the houses are 21x206 and the  
other four 21x140. The gutters are six  
feet six inches from the ground and the  
ridges thirteen feet. The west end is pro-  
tected by a brick wall and bank to the  
level of the gutters, and the north side  
gutter is level with the street, leaving  
only the east ends and south side exposed.  
The main flow pipe will run along one  
end of the range. For roses and general  
stock in Iowa how many 1½-inch pipes  
under the benches will it take with one  
overhead flow, and how large should  
this flow pipe be? We have a fifty horse-  
power boiler and wish to put in another  
of equal size or a little larger. Will our  
present stack, 30x30 and fifty feet high,  
be able to handle both boilers or will it  
be necessary to build a larger stack for  
best results?

K. F. C.

For the long houses use one 3-inch or  
two 2½-inch overhead flows. One  
2½-inch flow will answer for the short  
ones. In the rose houses ten 1½-inch  
pipes will be needed, but eight will suffice  
in the carnation houses. If the south  
walls are much exposed one additional  
return may be necessary. One sixty  
horse-power boiler should heat the eight

houses in all but very severe weather. With a good grade of coal the present chimney should answer for both boilers, if the draft is not obstructed. Fully as good results can be obtained if the overhead flows are not used, making up the radiation by means of two additional pipes in the coils of each house and bring back the condensed water in a common return for all the house. L. R. TAFT.

## OBITUARY.

SIMON DELAUX.

European papers announce the death of Simon Delaux, who was well known as the originator of many of the best French varieties of the chrysanthemum. He died at Toulouse June 8.

STEPHEN CRANE.

Stephen Crane died suddenly at Norwich, Conn., on July 14. Mr. Crane had been to a funeral and returned to his home about 3 p. m. He was sitting in a chair when without any warning he fell forward and almost immediately died. Mr. Crane was born in Barre, Orleans county, New York, March 24, 1828, and was the son of Jerry Crane and Orissa Fisher. He went to Norwich in 1861 as traveling salesman for the nurseries of Ellwanger & Barry, of Rochester, N. Y. His early experience gave him a thorough training for this business and he became a very successful salesman. Six years later he went into business for himself and established the Crane nurseries. Mr. Crane was a non-affiliating Mason, having in early life joined a lodge in Albion, N. Y. He was a stockholder and member of the board of directors of the Norwich Bulletin. His first wife, who was Miss Mary E. Starr, of Barre, N. Y., died in November, 1878. In 1879 he married Mrs. Sarah L. Brown, a daughter of the late O. E. Reynolds, of Norwich. She survives him, together with three children by his first marriage.

JOHN BRADSHAW.

John Bradshaw, an old, respected and highly esteemed citizen of Ossining, N. Y., died July 18, in the 74th year of his age. He was born in Northwich, Cheshire, England, in 1828, and came to this country at the age of 21. He first started as head bookkeeper for the firm of Stratton-Storms & Company. In 1858 he took the position of general superintendent and manager of Gen. Aspinwall's country seat, then called Rockwood, now the country seat of Wm. Rockefeller, where he remained for twelve years. He resigned and started a large greenhouse establishment at Glendale, three miles north of Ossining. He first grew grapes and afterward was one of the pioneers in Marechal Niel roses. From those he changed to the specialty of Perles and American Beauties, of which he sent in the finest quality to the New York market. In 1898, because of old age and poor health, he was compelled to retire from the growing business, when he joined his son, George E. Bradshaw, the wholesale florist, as bookkeeper, which position he faithfully filled until August 18, 1901, from which time until his death he suffered greatly, and five children, Herman N., Mrs. Edward Pietsch, Katherine, George E., and E. Warley, remain to mourn his departure. He was a man of sterling character, genial and unassuming, and will be lovingly remembered by many friends. The funeral service took place at St. Paul's church, Sunday, July 20. Interment was at Sleepy Hollow Ceme-

tery, Tarrytown, N. Y. The floral tributes were the most beautiful ever seen in Ossining, numbering fifty in all, of which many came from the leading commission and retail houses in New York city. The trade in general was well represented at the service. G. E. Bradshaw wishes to thank all his friends and customers for himself and family for the beautiful floral offerings which they sent, as a last token of love for his father.

THOMAS H. HOSKINS.

Thomas H. Hoskins, fruit grower, experimenter and exemplary citizen of Vermont, whose demise was chronicled in our issue for July 19, was born at Gardiner, Me., in 1828. He lived at Louisville, Ky., for a time and practiced medicine. Then he removed to Boston and for many years contributed to the New England agricultural press. As the result of an injury he gave up his medical practice in 1866 and located at Newport, Vt., to go into fruit raising. He thought he saw an opportunity where no one else believed fruit could be grown and for these many years he has possessed orchards which were an inspiration to the whole section of northern Vermont and the Province of Quebec. The farm lies within five or six miles of the Canada line, on one of the higher ridges of the Green Mountains, sloping toward the north. It is in a spot famous for its long, cold, bleak winters. Amid these surroundings Dr. Hoskins' orchard has been looked upon as the final testing ground for all the "iron clad" fruits. He brought out the Yellow Transparent and had an interest in the introduction of the Scott Winter apple. In 1870 Dr. Hoskins founded the *Vermont Farmer* and made it a power in the land. For twenty years he was agricultural editor of the *Vermont Watchman*. His third wife survives him.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By a thoroughly experienced young lady, who is a good designer, saleslady and book-keeper. Address G. L., care American Florist.

**SITUATION WANTED**—By first-class all-around grower and florist, roses, pinks, etc., general stock; sober, reliable, married man; references; commercial or private. East preferred. GROWER, care W. J. Stewart, 79 Milk St., Boston.

**SITUATION WANTED**—To take charge of a private estate, or as manager of commercial business. Large experience in greenhouse and out of door work, and capable of filling either position to satisfaction of employer. Address A. B., care American Florist.

**SITUATION WANTED**—By Aug. 4, a first-class carnation grower, aged 28, German, experienced in every branch of the trade, would like to take charge of department or run a medium sized place. First-class recommendations as an honest, sober and faithful worker. Good wages expected. Address ALABAMA, care American Florist.

**WANTED**—Man as helper in general greenhouse work. FRANK BEU, 278 N. 40th Avenue, Chicago.

**WANTED**—2 good men, roses and general stock; steady place for quiet men. C. H. FREY, 1133 O Street, Lincoln, Neb.

**WANTED**—A man with experience in growing roses. References required. ROBT. SCOTT & SON, Sharon Hill, Del. Co., Pa.

**WANTED**—Greenhouse men; steady work; will pay good wages. With or without board. Address R, care American Florist.

**WANTED**—Hot water boiler, large enough to heat 2,500 feet of glass. Must be in good condition. Address J. P. ESCU, Huron, O.

**WANTED**—Florist, single, German, middle age, with good reference to grow cut flowers and pot plants. MRS. GEJ. WALDBAUEL, Saginaw, Mich.

**WANTED**—Two young men to work in greenhouses—Roses and carnations. State wages wanted with board. Address COLE BROS., Box 577, Peoria, Ill.

**WANTED**—Rose growers and helpers; also one man that understands growing chrysanthemums. The highest wages and steady work. BASSETT & WASSBURN, Hinsdale, Ill.

**WANTED**—Assistant in rose and carnation houses, also boy to learn the business. State age and wages wanted, including board and washing. Apply to JOHN L. WYLAND, De Haven, Pa.

**WANTED**—A young man who understands something about orchid and fern growing. State where last employed and wages wanted, with board. Address J. M. GASSER CO., Euclid Ave., Cleveland, O.

**FOR SALE**—1 Spence hot water boiler, No. 5, capable of heating 3,500 to 4,000 feet of glass, first-class condition. Price \$75.00. JANSVILLE FLORAL CO., Jansville, Wis.

**FOR SALE**—Greenhouses and dwelling, (no stock), centrally located in city of 4,500; long established paying business; no competition; 3,200 feet of glass. Cause, death of owner. Address MRS. MARY BEZNER, Extrinsic, Jerseyville, Ill.

**FOR SALE OR LEASE**—In a city of about 50,000 population, a well established greenhouse plant of 25,000 feet of glass, good dwelling, barn and everything complete. Will sell on easy terms or rent as long as parties want, but parties leasing same must buy stock. Don't answer unless you mean business. B. J., care Am. Florist.

**FOR RENT**—At Frederick, Md., greenhouses in complete order, 162x20, 63x18, 107x11, boiler room 60x18, equipped with No. 8 Furman boiler, small heater and all necessary pipes; large mushroom pits, stable, two acres of ground; dwelling for rent in immediate neighborhood; coal, maure, labor cheap, city water; no stock on hand. Rent \$300 per annum, half payable in advance every six months. Ill health of owner compelled retirement from successful business; principally vegetables under glass and mushroom for Washington and New York. Address HENRY TRAIL, Frederick, Md.

**Wanted** EXPERIENCED TRAVELER to sell European Plants, Bulbs, Seeds, etc., to Wholesale Seedsmen, Florists and Nurserymen. Must be of gentlemanly appearance, healthy, sober and energetic. Steady position. State references, former occupation and salary wanted. Address confidentially.

AUG. RHOTERT, 26 Barclay St., New York.

## Ice Boxes For Sale.

A real cherry hard wood ice box in good condition, size 5 feet 3 inches wide, 8 feet high, 3 feet deep, price \$54.

A PINE ICE BOX, 6½ feet high, 11½ feet long, 3 feet 9 inches deep, price \$25.

P. H. BRUECK, Decatur, Ill.

## NOTICE

—OF—

### STOCKHOLDERS' MEETING.

CHICAGO, July 19, 1902.

Stockholders of the American Florist Company:

You are hereby notified that the annual meeting of the Stockholders of the American Florist Company will be held in the Battery Park Hotel, Asheville, N. C., Wednesday, August 20, 1902, at 3 o'clock p. m., for the purpose of electing directors and officers for the ensuing term, and for the transaction of such other business as may come before the meeting.

J. C. VAUGHAN, Pres.  
M. BARKER, Sec'y.

Providence.

BUSINESS NARROWED DOWN TO FUNERAL WORK.—LITTLE VARIETY IN STOCK BUT QUANTITIES SUFFICIENT.—PERSONAL AND TRADE NOTES.

If it were not for the good run of funeral work business would not be worth mentioning. So valuable is this branch of our trade that all florists should zealously guard its welfare. Flowers are scarce in variety but sufficient in quantity for all needs. Carnations at 50 cents and roses at \$2 and \$3 per hundred constitute the chief stock. Sweet peas bring 20 cents per hundred and gypsophila 25 cents per bunch. The florists downtown are closing early, although it is desirable that it be made more general.

The Florists' Club held its July meeting with satisfactory attendance and interesting proceedings. The members are arranging for an "outing" this month.

The Sons of Temperance and the Baptist Young People's Union held conventions in our city the past week, but nothing accrued to the florists thereby.

O'Connor, T. J. Johnston and Macnair are the only ones giving their employes an afternoon each week. Perhaps the others will fall into line soon.

There has been a plenty of moist weather, but nothing like the rainfall on our western brethren. Plants are in satisfactory shape in the fields.

George Barker will assume command of the store while Mr. Keller is on his vacation to Watch Hill for a month.

M. M.

VERONA, N. Y.—J. E. Hughes recently had a wedding decoration at Oneida for which he received over \$1,100 and which Peter Crowe, of Utica, said was as fine a thing as he had ever seen. The church was decorated with pæonias and greens, to represent a Japanese garden, and at the home of the bride all the pictures were removed from the walls, their places being supplied by panels of satin trimmed with orchids.

ESTABLISHED 1802

# THORBURN'S SEEDS

FREESIAS, CALLAS, LILIUM HARRISII, ETC., ETC.

If our trade bulb list has not been received, we shall be glad to send it on application.

## THE SEED TRADE.

## AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STORES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

BEAN crop reports continue unfavorable; white beans have advanced sharply.

IMPORTED red clover is said to be much inferior to American grown for use in this country.

A. H. GOODWIN, of the Goodwin, Harries Company, Chicago, is in Michigan inspecting pea and bean crops.

LOUISVILLE reports indicate a very good crop of yellow and white onion sets; the red is not grown there.

A. J. BROWN, of Grand Rapids, Mich., who is spending his vacation at Ottawa Beach, paid a brief visit to Chicago July 22.

LILIUM HARRISII bulbs are beginning to come in. From twenty per cent to thirty per cent of the crop used in the United States arrived in New York July 15.

PEA crop reports are very indefinite; the Sturgeon Bay, Wis., district evidently has a better crop than New York state, the Michigan outlook being something between the two.

THE attitude of Secretary Wilson, of the Department of Agriculture, on government seed distribution, dated May 9, 1902, is shown in the latest yearbook of the department. We hope to refer to this at greater length in an early issue.

## Bermuda Grass.

The "Yearbook of the Department of Agriculture" for 1901, page 27, gives an economical plan for getting a start with this valuable grass, using imported seed, which is said to germinate much better than that raised in this country.

## Nebraska Seed Crops.

One of the growers writes as follows: under date of July 16: "We beg to advise that owing to the abnormal rainfall and the extremely cold weather experienced during the past month, crops in our line of specialties have been retarded in growth and are therefore generally later than we have ever known them to be at this season of the year. In many instances the continuous rains have flooded the fields, resulting in the crops being drowned out and destroyed.

"It is too early to form any definite conclusions excepting in relation to Stowell's Evergreen sweet corn and Improved Long Green cucumbers, which we can now see will be short with us, in all probability at least fifty per cent. Exceedingly favorable weather for the next four weeks will make a material change in other crops for the better."

## European Flower Seed Crops.

An Erfurt correspondent writes as follows under date of July 5:

"Everything is about two weeks late this year as compared with former years. This is due to the extremely cold weather in May and the hard frosts in April, when the thermometer went down to 20° Fahrenheit. In spite of this the outlook for good crops is encouraging. Myosotis seed was not harvested until the end of June instead of the beginning of that month as usual and the crop

turned out much better than expected. Pansies are also late, many of the flowers having been killed by frost in May. It is only now that the first gathering of seed is being made.

"Asters, verbenas, dianthus and other summer flowers look well. Stocks in pots are now in full bloom. Early flowering perennials, such as aubretia, Papaver nudicaule, arabis and others were also injured by the May frosts. The outlook for all annuals, on the whole, is promising."

## Lilium Harrisii in South Carolina.

In reply to an inquiry of last month, one of the South Carolina experimenters with Lilium Harrisii bulbs wrote June 22 as follows:

"The Agricultural Department three years ago inaugurated a number of experiment stations for the growth of Lilium Harrisii or Bermuda lilies. Out of all these stations I understand that this is the most successful. From 300 bulbs first sent I have now on hand several thousand at a pecuniary profit.

"The bulbs grown so far have only been planted for propagation purposes and do not bloom in this climate in the open ground until May, but I see no reason why, if they are taken in hand by florists and planted early enough, they should not be ready for the market in time for Easter. This part of it I know nothing about but may take it up this fall and try what forcing will do.

"This year owing to a severe drought the bulbs did not appear to do so well as in former years, but from samples taken up the bulbs show good growth, and are in good condition—firm and quite a number of young bulbs. Of course it is difficult to tell the crop increase now, as we will not begin to dig the bulbs for a month yet. I may say that so far the experiment is very successful and demonstrates conclusively to me that the home grown bulbs propagate freely and can be grown, with ordinary care, in this climate."

## Canadian Horticultural Association.

The convention this summer of the association will celebrate its fifth birthday. The organization and first convention was held at Toronto, then at Ottawa, Montreal and London respectively. This year the convention is to be held at Hamilton, Ont., a thriving city forty miles nearer the boundary line than Toronto. Though Hamilton does not possess any of the very largest glass areas in the Dominion yet it is a thriving center of floriculture. The vast amount of flowers and plants grown and sold is surprising to many outsiders, as is also the high standard and quality which is maintained.

September 3 and 4 are the convention dates and a third day will doubtless be arranged for sight-seeing. Three of the most interesting features of Hamilton's scenery are the mountain overlooking the city, the long beach well patronized as a summer resort, washed by Lake Ontario on the one side and Hamilton Bay on the other, the great Winona and Grimsby peach and fruit belt, beginning just east of the city and aptly termed the "Garden of Canada."

The Hamilton Gardeners' and Florists' Club has joined with the local Horticultural Society for the purpose of holding a flower fete and trade exhibit in the Thistle Curling Rink on September 3 and 4. The Gardeners' and Florists' Club intends to make the trade exhibit a matter of special effort, believing that there is much stock grown in the country which nearby consumers do not know of. A trade paper is looked forward to as the best remedy for this state of affairs but one has not as yet been successfully launched.

Information concerning objects, membership, etc., of the Canadian Horticultural Association may be obtained from A. H. Ewing, Woodstock, Ont. Information concerning exhibition matters may be obtained from Chas. M. Webster, Hamilton, Ont.

# JUST ARRIVED!

First Consignment of

## French Bulbs.

WE CAN SUPPLY FOR IMMEDIATE DELIVERY:

**WHITE ROMAN HYACINTHS**, finest quality bulbs, 12 to 15 cm. in circumference, \$3.00 per 100; \$26.00 per 1000.

**NARCISSUS PAPER WHITE GRANDIFLORA**, \$1 per 100; \$9 per 1000.

**GALLAS**—We can offer an unusually fine stock of these for delivery early in August at the following low prices, viz.:

Extra quality bulbs, 1¼ to 1½ inches diameter, \$5.00 per 100; \$40.00 per 1000.

Selected bulbs, 1½ to 1¾ inches diameter, \$5.00 per 100; \$50.00 per 1000.

Mammoth bulbs, 1¾ to 2 inches diameter, \$8.00 per 100; \$70.00 per 1000.

Exhibition bulbs, 2 to 3 inches diameter, \$10.00 per 100.

### Sow my Hardy White Onion.

SEND FOR CIRCULAR.

**BEAULIEU, the Pansy Man, WOODHAVEN, N. Y.**

Please mention the American Florist when writing.

### VAUGHAN'S "INTERNATIONAL"

Received the only reward for Mixed Pansies at the World's Fair. It is to-day better and more complete than ever. It contains the cream of the stock of 10 Pansy specialists. There is no better mixture in existence, as all the florists who saw or used it can tell you. Price per oz., \$10.00; ½ oz., \$5.00; ¼ oz., \$1.50; trade pkt., 50c.

### VAUGHAN'S "GIANT MIXTURE."

This mixture is specially made by us from all the separate colors of Giant Trimardeau, the Giant Bugnot and Cassier and several special strains which cannot be had any other way. If your trade demands large flowers there is no better mixture. Price, ¼ lb., \$14; oz., \$4; ½ oz., 60c; td. pkt., 25c.

### VAUGHAN'S PREMIUM MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past 16 years and it has given general satisfaction. Per pkt., 25c; ½ oz., 50c; ¼ oz., \$3.00; oz., \$5.50.

### MASTERPIECE—NEW GIANT CURLED.

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often three inches across, and the color variations and combinations are odd and striking. Pkt. 50c; ½ oz. \$1.00.

### IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 25c; ½ oz., 40c; ¼ oz., 60c; oz., \$2.00.

### NEW GIANT MADAME PERRET (True).

This novelty is specially distinguished from other pansies by the plant being full and spreading, with very broad and extremely dark green leaves. The straight and stiff stems it possesses cause the flowers to stand out well from the foliage. The color of the blossom ranges through all the shades of red from a pink to a fine deep purple, with an intermediate bright red edged with white. Trade pkt., 25c; ½ oz., 50c.

**CINERARIA VAUGHAN'S COLUMBIAN MIXTURE.** A mixture of the best English and German strains, unsurpassed. Pkt. (1000 seeds) 50c; 3 pkts. \$1.25.

**CINERARIA HYBRIDA, LARGE FLOWERING**, white, blood-red or crimson, double white or best double mixed, each, per trade pkt., 50c.

**CALCEOLARIA HYBRIDA**, choicest mixture, pkt. 50c. 10 PER CENT discount on flower seed orders amounting to \$2 and over for Cash with order.

### RUPP XXX SEEDS.

**CHINESE PRIMROSE.** Finest grown, large flowering, fringed, single and double, 15 vars., mixed, 500 seeds, \$1.00; half pkt., 50c. Have also the 15 vars. separate.

**CINERARIA.** Finest, large flowering, dwarf varieties, mixed, 1000 seeds, 50c.

**DAISIES.** Finest Double Giant, pure white and rose, mixed or separate, 1,000 seeds, 25c.

### PANSY, FINEST GIANTS.

The best large flowering varieties in choicest mixture; critically selected, 5,000 seeds, \$1.00; half pkt., 50c. **CASH.** A pkt. of new everblooming Forget-me-not "Constance" added to every order.

**JOHN F. RUPP, Shiremanstown, Pa.** "The Home of Primroses."

### Society of American Florists National Convention, AUGUST 19th to 22nd, 1902, ASHEVILLE, NORTH CAROLINA.

For this convention the "Big Four Route" (C. C. C. & St. L. Ry.) will sell tickets August 16, 17 and 18, good for return leaving Asheville not later than August 25, at one fare for the round trip from all "Big Four" stations. (\$20.00 round trip from Chicago.)

Florists' Special train will leave Chicago 8:30 P. M. Sunday, August 17th, running via "Big Four" to Cincinnati, thence via the Queen & Crescent and Southern Railways. Monday forenoon will be spent in Cincinnati, sight-seeing, etc., leaving there at 2 P. M. on the Florists' Special. Every florist should make a big effort to attend this convention, the first to be held in the beautiful Southland.

For berths in sleepers from Chicago or Cincinnati, and further information call on, or address E. F. WINTERSON, President Chicago Florists' Club, 45 Wabash Avenue, or J. C. TUCKER, Gen'l. Nor. Agt. "Big Four", 234 S. Clark Street, Chicago.

### ASHEVILLE, NORTH CAROLINA.

'The Land of the Sky.'

The eighteenth annual meeting American Florists will be held at Asheville, August 19th to 22d, 1902.

A rate of one fare for the round trip has been made via Queen & Crescent Route and Southern Railway. Special train, composed of Pullman sleepers, will leave Cincinnati, Monday, August 18th, 2:00 p. m., via Queen & Crescent Route, and run through to Asheville via Southern Railway, arriving at Asheville next morning 7:00 o'clock.

Members will meet at Cincinnati and all go through together from there.

For sleeping car reservations and full particulars regarding rates, write **J. S. McCULLOUGH, W. A. BECKLER, N. W. P. A., N. P. A., Queen & Southern Ry. Crescent Route.**

**225 DEARBORN ST. 113 ADAMS ST. CHICAGO, ILL.**

PLEASE MENTION US TO OUR ADVERTISERS.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

VISITED ST. PAUL: Louis Goeppinger, representing Peignaux & Lorin, of Angers, France.

VISITED CHICAGO: John P. Brown, Connersville, Ind., secretary of the International Society of Arboriculture, enroute home from Colorado.

THE twenty-sixth annual meeting and exhibition of the Georgia State Horticultural Society will be held at Macon, Ga., August 6 and 7.

PROF. F. A. WAUGH, of the Vermont Experiment Station, has been appointed professor of horticulture at the Massachusetts Agricultural College, Amherst, succeeding Prof. S. T. Maynard.

### Look Out for Red Spider.

Those owning or caring for hemlock or Norway spruce hedges will do well to watch for the appearance of red spider and promptly adopt a means of eradication. Its appearance is generally recognized by a yellow and sickly appearance of the foliage. Perennial phloxes this year seem to be more or less troubled with the same enemy and many apparently diseased plants will, on inspection, be found covered with red spider on the under side of the leaves. The antidote is kerosene emulsion applied through a good spraying nozzle and force pump. If not possessing one, a hand syringe will do but, remember, promptness in such matters will bring its own reward. F. C.

### Detroit.

CLUB HAS ITS MOST ENJOYABLE OUTING.—A PICNIC ON AN ISLAND.—BUSINESS DROPS OFF.—FUNERAL FLOWERS THE PRINCIPAL DEMAND.—PARTY OF TEN LIKELY FOR CONVENTION TRIP.—A WEDDING AND OTHER NOTES.

The Florists' Club outing on Tuesday, July 22, was the most successful and enjoyable of any in the history of the club, the party numbering about seventy-five. Leaving the city on the new excursion boat, Columbia, the trip was made to Bois Blanc Island, one of Detroit's most popular picnic grounds, in Detroit river, sixteen miles from the city. The weather was clear and beautiful, which in itself was a treat and contributed much to the general enjoyment of the day. Games of baseball, quoits and jumping, with dancing and other amusements, were indulged in till dark, when the return trip was made to the city. Prizes aggregating in value to about \$20 were distributed to the victors in the various games. The day will long be remembered by the many happy participants.

Summer dullness is now everywhere evident, although occasional funeral orders give relief to the monotony. There are few good roses to be had but carnations are holding out well in both quality and quantity. Lawsons are especially fine and command good prices. There is an abundance of asters of fair quality, but little call for them. Sweet peas are plentiful but they, too, meet with the same fate as asters. The excessive rains are still retarding greenhouse work to a serious extent. Many are unable to do their planting of roses and

chrysanthemums. Carnations in the field are suffering considerably and in some cases a great loss of plants will be felt.

The club meeting of July 16 was well attended and full of interest, the chief topic of the evening being President Rackham's very complete and interesting description of his recent trip east, which included Buffalo, New York and the prominent establishments of New Jersey and on Long Island. By present indica-

THE LATE STEPHEN CRANE.

(See page 933.)

tions a party of about ten from here will attend the convention at Asheville. The route selected is over the Michigan Central and C. H. & D. R. R., joining the northern delegations at Cincinnati. At the next meeting of the club, August 6, the annual election of officers will take place. A full attendance is expected.

The business difficulties of Charles Schaible have finally culminated in the

abandonment of his store at 308 Woodward avenue. His plans for the future are uncertain.

Miss Emily Taplin, daughter of the veteran florist, was married last week to Edward Stapleton. The congratulations of her many friends in the trade are extended to her.

Visitors: Chas. Nall, Dayton; Geo. A. Heinl, Toledo. J. F. S.

### New York.

MARKET ENJOYS A LITTLE SPURT OF GOOD BUSINESS.—LILIES AND ROSES WANTED.—DOINGS OF THE VACATION TOURISTS.—VISITORS.

A little spurt of activity in the cut flower community has occurred to break the monotony of midsummer existence for the few who are on duty at the present time. It was only a zephyr, but even the most insignificant movement helps wonderfully these dull weeks. Lilies felt the influence and good roses of several varieties were also the gainers. Most of the stores are nearly deserted. In every place either proprietor or some one of the employes is away on recuperation bent and as soon as one returns another is ready to take his turn.

John I. Raynor and wife are now on the second week of their vacation. Nic. Schriener, of J. K. Allen's, has just returned to work and Mr. and Mrs. Allen have gone to Greenwood Lake and will return in season to let Miss Riley drop her cash book and ledger on August 9 for a season of recreation.

Already the transatlantic tourists are beginning to return. Chas. Loechner is at his post once more at Suzuki & Iida's.

Among recent visitors are J. A. Valentine, Denver, Colo., and Reynold Schiller, of Chicago.

DES MOINES, IA.—Julius Ledig's greenhouses were submerged in ten feet of water during the recent flood and one of the houses is badly wrecked. He is in doubt as to whether he will rebuild at present.

Philadelphia Gardeners' Cricket League.

The schedule of the matches of the Gardeners' Cricket League has been arranged. Three teams are in the field, namely, the Ravenhill, Captain John McCleary; Wolruh, Captain J. Thatcher, and the Wootton, Captain Thomas Long. Each team plays two games with each other. The second game of the series between Ravenhill and Wolruh took place on Saturday, July 19, at Ravenhill, Germantown, Pa., and resulted in a victory for Ravenhill by twelve runs. The deficiencies of the Wolruh wicket-keeper were mainly responsible for the defeat, there being no less than nineteen extras recorded. For Ravenhill D. Atkins made the best score of the day, with first-class cricket, and his position behind the stumps was in direct contrast to the Wolruh's, allowing only two extras. The remarkable bowling of Wm. Robertson was the feature of the contest, he taking eight wickets for sixteen runs. For Wolruh the bowling of Blackman and Gardner and the batting and fielding of Roberts were the features. The score follows:

RAVENHILL.	
J. McCleary, Jr., c Pollicutt b Blackman.....	0
P. Bovington c Pollicutt b Blackman.....	5

FRANCIS CANNING.

Twin City Florists' Picnic.

Well, the Twin City florists' tenth annual picnic is now a thing of the past. It is the event everybody looks forward to for many weeks beforehand and dreams of the prizes he is going to win.

The morning was perfect and florists and members of their families to the number of nearly 300 turned out to have a good time. It was the Minneapolis florists' turn to select the picnic grounds and act as hosts. They chose Spring Park, at Lake Minnetonka, one of the finest summer resorts in the country.

Through the kindness of all the growers and storemen and some friends outside of the two cities we had some very liberal and attractive prizes for the different sporting events, St. Paul, as usual, winning a majority of the events, chief of which was the base ball game,

HARTFORD FLORISTS' CLUB OUTING.

(See Meriden, Conn., notes, issue of July 19, page 912.)

which they won by a score of nine to four.

In the bowling a St. Paul man carried off first prize, winning a fine, large mantel clock. Then in the tug of war St. Paul won easily, one man remarking that "we hardly had to pull at all." The boat race also went to St. Paul, our friends up the river not getting a place in it, even. Take it all in all, it was a great day for St. Paul. There is great rivalry, though friendly, existing between the two cities and St. Paul can now crow for a whole year at least.

NOTES.

A good bet on the fat men's race next year will be Peter Holm and "Grandpa" Nagel, such sprinters as John Monson, Charlie Vogt and Wessling not having the least show.

St. Paul has won all the base ball games played at the florists' picnics and the prizes, which are florists' knives, keep the boys well supplied in that line.

And St. Paul won the tug of war without "Our Bill" Fleischer. "Bill" forgot to wind his watch the evening before and we couldn't hold the train any longer.

In a little private bowling match Haugen and Krinke, of St. Paul, had nearly as big a score as Swahns, Monson, Rudolph and Wessling put together.

Next year "Cal" Rice will put in Mathewson or Chesbro if he has to pay their expenses himself to pitch in the ball game.

Johnny Freeberg is still pulling at the nursing bottle. He had low score in bowling.

Alfred Clausen, of Albert Lea, came up to help down the Minneapolis boys.

At Philadelphia.

A very exciting match was played on the club alleys on July 17, for prizes which were nicely packed away in a wooden box so that they could not be spirited away until the game was over. The two veterans, Harris and Westcott, were elected captains and selected the teams, which were quite evenly matched. With the exception of Moss, who was under the weather and unable to get his stride, the bowling was good. Connor and Mooney tied for first place and a

match of five frames was bowled between them, with the result that the high prize was won by Mooney. Each of the winning team and four of the highest men on the losing side were then presented with something in a corrugated paste-board wrapper and all departed in good spirits. The score follows:

HARRIS' TEAM.				
Player	1st	2d	3d	T'1

Omaha.

HEAVY RAINS AND DULL BUSINESS.—PLANTING AND REPAIRS DELAYED.—DOINGS OF VARIOUS CRAFTS-PEOPLE.—NOTES.

After an extraordinarily wet June, July is affording continued heavy rainfall. Summer dullness has set in. There is very little going on outside of funeral work. The wet season delayed the planting of roses and interfered with repairs and the construction of new greenhouses.

L. Lecluse has sold out his stock at the old B. Haas place and Mr. Floth has bought the greenhouses, which he intends tearing down and re-erecting on his own grounds.

L. Zadina's greenhouses at South Omaha suffered very much by the heavy rains. Mr. Zadina is a young beginner and is set back a year as the result.

Mrs. S. B. Stewart is back from her Colorado outing and Mr. Stewart went on his much needed vacation to Lake Okoboji, Iowa.

There is very little enthusiasm felt among the florists in this part of the country in regard to the S. A. F. convention this year.

BUSINESS GOES ALONG QUIETLY.—NO ACTIVITY OUTSIDE OF FUNERAL WORK.—DEATH OF A FORMER MEMBER OF THE CRAFT.—GROWERS INCREASING THEIR FACILITIES—VARIOUS NOTES OF LOCAL INTEREST.

News has been received from Germany announcing the death of Benjamin Kissling, who conducted a store on Federal street, Allegheny, for Charles Siebert, several years ago and later purchased some houses in McKees Rocks and operated them successfully until his health failed. He then sold his plant and went to Germany to try and recover his health. He possessed a happy disposition that made him a host of friends who will regret to hear of his death.

There has been no marked change in the condition of business for this week. In fact the same dormant condition prevails as during the first three weeks of this month. Any display of activity during this period is generally chargeable to funeral work. Few florists have started on their vacations as yet, but the months of August and the early part of September will be utilized for this purpose.

Blind Bros., of West View, are making extensive improvements to their plant. They are adding 10,000 feet of glass and are equipping the plant with a new steam heating apparatus in a new boiler house 40x50 feet. The two new boilers are 150 horse-power each. The capacity of the coal bunkers will be 10,000 bushels of soft coal.

Stock is in about the regular summer supply. The retailers carry very little of it and these are the days when the wholesale houses must assume most of the responsibility. Carnations are poor, while roses are somewhat improved. Asters are fine and plentiful. Gladioli are fair, as are sweet peas and lily of the valley.

T. Langhans, of the Pittsburg Cut Flower Company, has gone with his family to Bemus Point. He expects to be away for three or four weeks.

The Oakwood Rose Gardens, of Oil City, Pa., continue to supply Pittsburg daily with a large quantity of roses.

E. L. M.

UNIONVILLE, PA.—On July 14 Joseph Renard died from poison administered by his own hand. It is supposed that domestic troubles had unsettled his mind.

**FUMIGATION METHODS**

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

**FRUIT GROWERS AND NURSERYMEN** owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

**GARDENERS AND FLORISTS** have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

**MILLERS AND GRAIN DEALERS** have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

**FARMERS OF THE COUNTRY** have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

**COLLEGE AND STATION WORKERS** will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

TRADE DOWN TO THE USUAL MIDSUMMER LEVEL.—PLENTY OF STOCK FOR ALL ORDERS BUT LITTLE OVERSUPPLY.—GROWERS GETTING READY FOR ANOTHER GOOD SEASON.—VARIOUS LOCAL NOTES.

Business has finally reached the usual July stage and, in the words of Mr. Dooley, there is "nothin' doin'." Flowers are very good in quality, owing partly to the unusually cool summer, and the daily supply is fully equal to the demand, which is mostly confined to funeral work. Carnations have held out splendidly and we are now getting a few from outside which were planted early for summer blooming. In roses we are receiving good Carnot, Kaiserin and Marquise Litta, although it has been a difficult task to keep them from mildew, caused by the cold, damp nights. Of sweet peas, achillea, hollyhocks, coreopsis and other outside flowers there is a sufficiency but not a great surplus.

Carnations in the field are strong and stocky and not at all soft, as we have had good growing weather and not the excessive rains reported from other sections of the country. Lawson is especially strong and large enough to house.

Building and repairing is in full swing. Littlefield's two houses are nearly completed and will be planted with carnations. Lange is making extensive repairs, replacing all his wooden sides with cement walls.

The Crimson Rambler roses have been unusually beautiful this season and the number seen throughout the suburbs bear witness to the quantities sold last spring.

Indoor planting is finished at nearly all the different establishments and roses, chrysanthemums and violets are looking very promising.

Wm. Braun, who leased the Gormley place about a year ago, has gone out of business and is now with Green, of Spencer.

The weekly exhibitions of the Horticultural Society have been unusually fine and well patronized.

Carl C. Lange is renewing old acquaintances in Boston, Providence and adjoining towns. A. H. L.

BUSINESS FALLS AWAY.—NOT MUCH STOCK IN SIGHT.—SWEET PEAS ABUNDANT AND SELLING CHEAPLY.—VARIOUS TRADE NOTES.

Trade conditions remain about the same, although a little decline has been noticed the past week. Stock is in limited quantities, so that the dealers do not get discouraged by an oversupply. Sweet peas are in abundance and are being sold as low as 80 cents and \$1 per thousand. The stock is fine and it seems like giving goods away. The weather has been most unfavorable for the growers, it being rainy, dark and cold, with some very threatening storms.

Chrysanthemums are all benched and in prime shape. There will be about the usual varieties grown again this year, excepting a few fancy sorts being discarded.

Asters are appearing in market but the stems are rather short. A few gladioli are in. C. F. R.

Buffalo.

CLUB WILL PICNIC AT THE HEAD OF GRAND ISLAND.—ESSAYS TO BE A FEATURE OF WINTER MEETINGS.—TRADE DULL.—VOYAGERS REACH SOUTHAMPTON SAFELY.

Active preparations are being made for our annual outing. At the meeting July 22 the committee reported having selected the beautiful Bedell House, at the head of Grand Island, where Scott, Troup and McClure made their reputations as runners, as the place for the event. President Braik appointed Wm. Scott, C. H. Keitsch and Wm. Legg as a committee to secure essayists for the winter meetings.

A cablegram received from W. F. Kasting says that he and J. B. Wiese arrived at Southampton after a pleasant voyage.

Continued rainy weather has made trade dull and flowers poor and scarce.

—Visitors: Mr. McKorie, South Orange, N. J.; W. J. Boas, Philadelphia.

The Model Extension Carnation Support.

Flushing, Long Island, Dec 11th, 1901.

Mr. THERON N. PARKER, Brooklyn, N. Y.

Dear Sir—I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time. Very truly,

A. L. THORNE, La Fayette, Ind., July 8th, 1902.

Mr. THERON N. PARKER, Harrison, N. J.

Dear Sir:—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,

F. DORNER & SONS Co.

Louisville.

RAYNOR HAS FINE NEW PLACE NEARLY FINISHED.—GROWER PLANS NEW RANGE ACROSS THE RIVER.—PERSONAL AND TRADE DOINGS OF INTEREST.

Charles Raynor has his new range of houses well under way. He has the roses and chrysanthemums planted and is putting on the glass. The houses have the Garland gutter and are the most up-to-date around Louisville. One house is 31x300 feet and will cost about \$10,000. He has 30,000 as fine carnation plants as were ever seen in this locality and is cutting hundreds of fine blooms from the outdoor stock.

Anders Rasmussen has purchased eight acres of ground and will erect greenhouses for the purpose of growing roses and carnations. The location is an excellent one, on Vincennes street, New Albany, Ind.

Wood & Stubbs have moved their store from Main street and now have two stores opposite each other at Brooks and Jefferson.

Several florists will attend the S. A. F. convention from here. Several outsiders interested in horticulture will attend.

This has probably been the best year for business the florists have ever had and they all wear a contented look.

One of C. H. Kunzman's greenhouses under construction was blown down by a wind storm recently.

Prof. Ernest Walker, of Fayetteville, Ark., formerly with F. Walker & Company, is visiting here.

Mrs. Ed. J. Marrett is selling her place off in building lots and will discontinue the business.

F. Walker & Company have purchased twelve acres of ground adjoining their plant.

H. Kleinstarink is building a handsome residence adjoining his greenhouses.

Oscar Trimler is making a specialty of Kaiserin roses for summer trade.

Jacob Schulz will celebrate his silver wedding in August. H. G. W.

View of a piece of ground 40 ft. respectively 41 ft. 6 in. in width, covered by one roof (old style), and also by three sections of our Patent "Short-Roof" Construction. Compare headroom over benches and number of supports.

American Florist Advertisers Pay Advertisers.

This is a funny looking thing but it will do the work easier and cost less than any other apparatus on earth or any other place. Send for a descriptive circular to J. D. CARMODY, Evansville, Ind.

**Holds Glass Firmly**  
See the Point **PEERLESS**  
FULL SIZE No 2  
Glazing Points are the best. No rights or lefts. Box of 1,000 points 75 cts. postpaid.  
HENRY A. DREER, 714 Chestnut St., Phila., Pa.

**Profitable Greenhouses**  
"Gurney" greenhouses are profitable greenhouses because they're operated under the most economical conditions.

**"Gurney" Heaters**

maintain an even heat with the least amount of care, burn a minimum amount of coal to maintain the desired temperature, require no brick setting, and are without question the most efficient constructions on the market.

A host of nurserymen already use the "Gurney." If you're not on the list, send for catalogue and find out more about it. Gurneys promote the greatest hothouse success.

**GURNEY HEATER MFG. CO.**

111 FIFTH AVE., NEW YORK CITY.  
Western Selling Agents, JAMES B. CLOW & SONS, Franklin and Harrison Sts., Chicago, Ill.

"DORIC" HEATER.

**WATER.**

If you want water only when the wind blows a windmill will do your work and cost less money than our Rider and Ericsson Hot Air Pumps, but if you want water every day while your flowers are growing and do not want your pump blown down when the wind blows too hard, no pump in the world can equal ours. We have sold about 20,000 of them during the past twenty-five years, which is proof that we are not making wild statements.

Our Catalogue "A 3" will tell you all about them. Write to nearest store.
