Cincinnati.

TRADE ACTIVE AND SUPPLIES SHORT OF THE DEMAND.—PLEASANT PROSPECTS FOR NEXT WEEK.—VARIOUS NOTES.

Business is first-class, with not near enough roses and carnations to fill orders. Bulbous stock, too, is moving better than at any time this season. The demand for flowers for St. Patrick's day was good. Onr over-the-Rhine florists dyed a large number of carnations for this occasion, but the demand for green carnations was not extraordinary, consequently a good number were consigned to the barrel. The prospects for a big Easter business were never better and all the florists are busy getting stock ready. From present indications roses and carnations will be scarce. There will be enough lilies and bulbous stock to meet all demands.

Spring openings have been in order for the past two weeks and all the florists handling decorative plants have been busy accordingly. A. Sunderbruch's Sons handled eight decorations of this kind last week.

Jos. Goldman, of Middletown, was a caller this week. He reports business as very good and contemplates the erection of two new houses the coming summer.

BARABOO, WIS.—The residence of M. F. Foley was damaged \$5,000 by fire March 5. The loss was covered by insurance.

DAVENPORT, IA.—Mr. and Mrs. H. D. Campbell have welcomed a new flower into their home on Eastern Avenue in the shape of a ten-pound baby boy.

HEADQUARTERS for EASTER PLANTS BLOOMING EASTER WEEK.

I have the largest stock in Philadelphia; 7 large houses and some hot beds, are crowded with them. Secure your supply by ordering now.

AZALEA INDICA

As I am agent for a large concern in Belgium and being a large importer of these choice Easter plants, I can sell you these direct at first hand and not through a middleman. Mme. Van der Cruyssen is a rare article this Easter. I was fortunate enough to get all this variety in Belgium I wanted and can offer you plants at the following prices: 5-in. pots, 40c to 50c; 6-in. pots, very bushy and large, fine shape, \$1.00; specimens 7 and 8-in. pots, \$1.25 and \$1.50 each; extra choice specimens, very large, can't be beat, 9 and 10-in. pots, \$3.50, \$1.00, \$5.00 each. Other varieties of Azaleas, such as Bernard Andre Alba, (white), also other white, Princess of India, Prof. Wolters, and other varieties of my own selection, 6-in. pots, 50c, 60c, 75c, \$1.00 each; larger plants from \$1.25 to \$1.50 each. Also 5-in. pots, 40c each.

Cineraria—I have an immense quantity, best colors, 5 1/2 and 6-in. pots, \$3.00 to \$4.00 per doz.

Spiraea Compacta and Floribunda, perfect jewels, 5 1/2 and 6-in. pots, \$3.00 to \$4.00 per doz.

Hydrangea Olaksa, 6-in. pots, \$3.00 to \$4.00 per doz.; 7-in. pots, 60c, 75c and \$1.00 each.

Begonia, Pres. Carnot, Metallica and other good varieties, 5 1/2 and 6-in. pots, \$3.00 to \$4.00 per doz.

Begonia Vernon, very fine, red, large, 4-in. pots, \$1.50 per doz. Other good mixed varieties, 4-in. pots, \$1.20 per doz.

Daisies, (white), Marguerite, 5 1/2 and 6-in. pots, very bushy, \$3.00 to \$4.00 per doz.

Yellow Daisies, 5 1/2 and 6-in. pots, \$3 to \$4 per doz.

Lilium Harrisii, raised from Henry F. Mitchell's selected 7-9 bulbs. (\$100 per 1000) fine plants, 6-in. pots, from 5 to 10 buds to a plant at the rate of 10c per bud. No Lillies sold by themselves—other plants must accompany the order.

Dracæna Bruantii, 6-in. pots, 25 inches high, very fine, 60c.

Dracæna Indivisa, (imported), very large for decoration, 7-in. pots, 75c to \$1.00 each.

Hyacinths, my own importation, raised from the finest named bulbs. all colors, 4-in. pots, \$10 a 100.

Tourensol Tulips, (double red and yellow striped), 3 in a pot, \$1.50 per doz. pots. Belle Alliance, (single), scarlet striped, 3 in a pot, \$1.75 a doz pots.

Daffodils, (Von Sion), 3 in a 5-in. pot, \$1.50 to \$1.75 per doz. pots.

Azalea Mollis, 6-in. pots, 50c each.

Cash with order please. Money can be sent safely by postoffice or express money order or bank draft. All goods shipped at purchaser's risk.

**JOSEPH HEACOCK, Wyncote, Pa.**

Minneapolis.

BUSINESS FAIR BUT PRICES NOT HIGH.—  
LILIES SCARCE.—GREEKS FROM CHICAGO  
INVADE TOWN.

Trade in a general way has been very good, but prices realized have been small. Carnations are plentiful and from \$1 to \$2.50 is the price. Meteors, Bridesmaids and Brides have been in good demand but the stock is of second quality mostly. Short-stemmed Beauties are abundant but from twenty-four inches up they are limited. There is a plenty of bulbous stock, excepting Romans, on the market. There will be a shortage on Harrisii on account of Easter's early arrival and stock not being far enough advanced to force in, while of other blooming plants there will be an abundance. From all indications business will be good. We have had very spring-like weather of late and a good many are afraid that cold weather is yet to come.

Rice Brothers are stocking more in supplies, and are carrying a full commercial line now.

A good many of the Greeks of Chicago are in the city looking up the flower business. C. F. R.

ALLENTON, PA.—The greenhouse of Aaron Bauder was burned to the ground on the morning of March 6.

GALENA, ILL.—Ben. Vandervate says that he has the best stock of Easter lilies which it has ever been his fortune to possess, although the experience of some other growers has been disheartening.

THE  
MRS. E. A. NELSON

bids fair to become the Commercial standard pink carnation. It is an early, free and continuous bloomer and it is sure to do well wherever grown. Orders booked now for delivery latter part of March. For prices, see AM. FLORIST, Feb. 15.

E. A. NELSON,

3503 N. Senate Ave., INDIANAPOLIS, IND

**GANNAS** Burbank, Henderson, Mme. Crozy, F. Vaughan, P. Marquani, L. E. Bally, A. Bouvier, J. C. Vaughan, Ezandale, Souv. de Antoine Crozy, in variety, started, \$2.50 per 100.

**ALTERNANTHERAS** P. Major, red, R. C., 60c, postpaid.

### FRANK SHEARER & SON.,

[ Gardeners, BINGHAMTON, N. Y. Please mention the American Florist when writing.

Syracuse, N. Y.

WELL KNOWN GROWER HAS MORE GOOD SEEDLING CARNATIONS.—MORRIS TAKES CROWE FIXTURES.—VARIOUS NOTES OF LOCAL DOINGS.

L. E. Marquisee has received word that his Empire State carnation was granted a certificate of merit at the Madison, N. J., exhibition. Mr. Marquisee started for the Indianapolis exhibition, intending to compete for prizes there, but was delayed and unable to compete. His Empire State, however, received a certificate of merit. Mr. Marquisee has two new variegated varieties, which will be on the market in about two years. One of them, a pink on white, he has great faith in. He also has a pure salmon and a red carnation, which should cause a sensation when he places it on the market. He already has orders for several thousand of his Empire State.

Henry Morris has bought the entire stock and fixtures of Peter Crowe, of Utica, who goes out of the retail business. Mr. Morris has the mirrors, coolers and other fixtures in his store. Mr. Crowe will devote all his attention hereafter to the wholesale branch of his business.

F. W. Bannister, manager for the Valley Nursery Company, has let the contract for a new greenhouse, 10x100, and will build another in the fall. He has seven acres near Onondaga Valley, devoted to the raising of trees, shrubs, plants and greens.

P. R. Qainlan & Company have an especially fine outfit of Easter lilies and expect a good trade. Tulips, roses, violets, azaleas and carnations are in abundance. Lilies of the valley bring \$1 per dozen. The price for violets is \$2 per hundred.

Syracuse florists say that summer trade improves every year. They no longer have to make enough in winter to carry them through the year, but find that there are an increasing number of people who patronize the florists in summer.

A. J. B.

California Carnations.

Our cuttings are rooted without fire heat and are strong, hardy and well rooted. They are so far superior in every way to cuttings rooted by fire heat that they should not be mentioned in the same connection. We guarantee safe arrival and satisfaction.

QUEEN LOUISE, white.....	\$4.00	\$30.00

Lowell, Mass.

SPRING SEEMS AT HAND.—BUSINESS SATISFACTORY.—GOOD STOCK ON HAND FOR EASTER.—LILIES SCARCE.

At the present time the indications are that we will have an early spring. The tulips planted outdoors last fall are awakening from their winter sleep. The stores are having spring openings and are using many flowers in addition to plenty of palms. At the opening of the Bon Marche over 10,000 violets were given away. With the approach of Easter comes some tall thinking and planning about lilies, which are going to be scarce here this year. If the present reports are true about lilies no danger is feared about the department stores handling them. In the past they have always cut the price, which this year will be 25 cents per bud and everything counted.

Business continues to be brisk, funeral work especially. With plenty of sunshine flowers are coming in both good supply and quality. There was a very good demand for flowers on St. Patrick's day, there being a parade in town with 3,000 men in line, calling for plenty of bouquets, which necessitated some brisk hustling early in the morning.

H. B. Green, up in the Highlands, has a lot of nice salable stock ready for the rush. Down in Tewksbury, Patten & Company show some of the finest carnations ever grown. To stand elevated at one end of their 350-foot house and look down to the other end and see the bloom, is a sight long to be remembered.

At Small's they grow mignonette of excellent quality and carnations take no back seat. Tingley, with his immense supply of violets and callas, will make an impression where he starts to unload at Easter.

McManamon made a good St. Patrick's display by filling his window with shamrocks in small pots, which sold on sight. A. M.

NEWPORT, R. I.—The men employed in the greenhouses of Carl Jurgens are on strike for a nine-hour working day. Mr. Jurgens says they can come back whenever they get tired of it.

DAVENPORT, IA.—The local growers have had very fair success with their lilies this year and will have good stock for Easter. They also have plenty of callas and good showings of well-flowered plants, principally azaleas and hydrangeas.

TRADE BRISK.—MANY WEDDING AND FUNERAL ORDERS.—MILLS HAS FINE STOCK IN PRIVATE GREENHOUSES.—CLUB HEARS OF MORE PRIZES.—A VARIETY OF PERSONAL AND OTHER DOINGS.

We cannot complain of business being poor, for everyone is rushed with wedding and funeral orders. Carnations, especially since the wonderful improvements made by John H. Sievers, are more in demand than ever, notwithstanding the fact that the number of plants grown is double that of last year. Roses are more plentiful, stock very good and prices the same. Lilies are coming in a little better and prices have raised to \$3 50 to \$5 per dozen cut and \$6 in pots. Violets are too plentiful to be high priced and all bulbous stock moves at the same rate as at last report.

At D. O. Mills' private nursery things are in grand shape and our growers have to produce something extra fine in Beauties, carnations and ferns to beat them. Beauties especially are in splendid form. Some Farleyense ferns measure nearly four feet across and are the picture of health. C. Beatty is head gardener of the place and Mr. Carboni has charge of the glass houses. Mr. Mills certainly can boast of having two of the best gardeners in the state.

At the last meeting of the Pacific Coast Horticultural Society, owing to the heavy storm, very few members were present and little business was done. Some important trade papers will be read at the next meeting. Committees on the flower show reported additional prizes offered for the best seedling carnations, also a prize of \$50 by the Cox Seed and Plant Company for the best display of cut flowers.

At Schwerins' things look well again after the heavy storm. They will have their usual good stock of tulips, hyacinths, spiræas and ferns for Easter, besides carnations and roses.

Chas. Serveau has taken himself to his country home in Woodside for a little recreation and to get his full strength back for the hard work during Easter week.

Henry Wigger, for some time gardener to Mr. Whitney, in San Mateo, has resigned his position and intends to take a rest for a month or two.

H. Plath says that he will hardly have enough ferns ready for Easter but enough smilax to decorate half the churches here.

Sweet peas will hardly be seen before the middle or end of April, owing to the long cold spell we had about Christmas time.

O'Hearn, of San Mateo, has let the contract for a large, modern carnation house to a firm of San Mateo contractors.

Mrs. Gonzales, of 9 Eddy street, has sold out her share in the store to her partner. GOLDEN GATE.

ERIE, PA.—S. Alfred Baur reports that trade has been excellent all through the season and that the Easter outlook is very good.

ALL Nurserymen, Seedsmen and Florists wishing to do business with Europe should send for the

"Horticultural Advertiser."

This is the British Trade Paper, being read weekly by all the Horticultural traders; it is also taken by over 1000 of the best continental houses. Annual subscription to cover cost of postage 75c. Money orders payable at Lowdham, Notts.

Address EDITORS OF THE "H. A." Chilwell Nurseries, LOWDHAM, Notts, England.

Wheeling, W. Va.

GROWER HAS GOOD EASTER LILIES.—BULBOUS STOCK DOING WELL.—IMPROVEMENTS PLANNED FOR SUMMER.—GROWERS LOSE BY RECENT FLOODS.

Max L. Hess seems to have solved the problem, if a problem it be, of growing Harrisii. He has them once again in splendid condition and in time for his Easter trade. He has likewise a fine lot of bulbous stock of all kinds, and from the number of orders already booked will in all likelihood have no reason for complaint. Business has been unusually brisk with him all through the season, decorative work of one sort or another having been especially in demand. A glance at his general stock shows that Mr. Hess has not cultivated the habit of letting things take care of themselves.

A visit to the "Island" was in order. There I found L. A. Smith, as happy as the proverbial lark, regardless of the recent flood, which had caused him some slight loss and an unusual amount of labor. It is Mr. Smith's intention to build a warehouse especially adapted for storing plants in the event of a flood. Floods are by no means unusual in this section and the loss they entail is certainly discouraging. But the florists invariably get over such "trifles," believing in the golden rule, "Never give up."

A call at the Wheeling Greenhouses proved interesting. Under the efficient management of the genial Mr. Diekmann, things about the place are in fine condition. Bulbous stock, such as hyacinths, Von Sions, lilies, and so forth, is grown in quantity and looks well. An additional carnation house about 23x150 may be added this spring to their plant. They likewise contemplate some extensive alterations and improvements about their store on Twelfth street.

W. F. Zane & Son have likewise suffered because of the flood, but fortunately they succeeded in saving their plants and will have them in fine condition for spring sales. Mr. Zane intends rebuilding some of his houses during the coming summer. In addition to their plant trade, they have of late built up a fine business in cut flowers and design work.

Franz Laupp, the veteran florist, reports a fine trade all along the line. While growing a general stock for his retail trade Mr. Laupp is forcing a large quantity of tulips, which find a ready sale with him.

NOMIS.

### Easter Plants in Chicago.

The retail establishments in Chicago have been developing very rapidly in the last year or two and it would be difficult for any city in the Union to show handsomer places than those in which the leading western retailers now do business. The stores of Wienhoeber, Samuelson, Fleischman and Mangel may be mentioned as typical of the newer development and, whatever may have been the case in the past, there can be no doubt that this is a plant Easter. While few novelties are on view, the western storekeepers have never before gone in so heavily on blooming material and never before have they shown such choice stocks. While the azalea predominates, as it no doubt does in nine cities out of ten throughout the country, it is not by any means so much in evidence as to make the Easter stocks appear to lack variety. There are better Crimson Ramblers than there ever were before, better rhododendrons, better hydrangeas, better spiræas, better pans of bulbous material, and, in fact, better stocks throughout the list, with the single exception of the item of Easter lilies. Chicago forcers have shared the experiences of all other growers of this specialty, the longiflorums proving, in general, unsatisfactory, although there are a few very good plants. In most instances the loss was heavy, but the last few days of warm, bright weather aided remarkably in getting the remaining plants into flower. However, as a general rule, the plants are short, the foliage is much too dense for a good lily and the flowers are both few in number and poor in quality, most of them having a crimped, discolored, dried-up appearance which makes them almost unsalable. One or two growers, notably the Garfield Park Flower Company, and the Poehlmann Brothers Company, have had some choice lilies which run eight or nine blooms or buds to the stalk, but the retailers much prefer good stock with three or four well developed flowers to the stalk.

The season is certainly seeing unusual use of florists' supplies. There is at hand a greater variety of material than ever before and these plant embellishments are finding wide popularity. The only thing which seems to have dropped into disuse is the birch bark ware, it being generally regarded as too crude for the requirements of the Easter plant trade and cut flower business. Porto Rican matting easily takes the lead as a pot cover, although the finer grades of

crepe paper are largely used. Many decorators are tying ribbon bows into their plants, but those storekeepers who cater to the most critical trade are not doing this unless the customer asks it. There is a very large assortment of boxes, baskets and hampers of one sort or another for use with small plants and cut flowers. Most of these are light and airy in design and construction and the coloring is tasteful. All the retailers have filled large quantities of these for counter sales and find them very popular.

Wienhoeber has made what is probably the finest showing of Easter plants ever seen in the west, his specialty being large azaleas. He imported plants much larger than the sizes usually handled by the commercial growers and has them beautifully in flower. The large specimens are nearly all Mme. Vander Cruysen, and better plants were never seen anywhere. Many of them are grown in Columbia plant tubs and are of the regular form, with heads something like four feet across. The prices run up to \$20 each. Wienhoeber also has a number of novelties among azaleas, but he says that as a rule these fancy varieties are not dependable, that they are not free bloomers and that while success may be achieved one year, disappointment may follow for several seasons. He is showing some plants of the irregular, natural development and finds that they take better each season. He is using large quantities of Porto Rican matting on his plants and a very large proportion of cut flowers will go out in fancy baskets and hampers. Bulb pans are numerous here and are found to sell very well when properly dressed up. The good lilies came from Buettner's.

Samuelson has added greatly to his facilities since last year by the erection of his conservatory, which affords a fine opportunity for the proper display of a large line of blooming plants. He is showing everything which the market affords, from lilies, azaleas, hydrangeas, and so forth, including some good Crimson Ramblers, down to the comparatively cheap pans of blooming bulbs. While the stock is fine in every respect, it shows few novelties, such things being not to be had at home and Mr. Samuelson says that it does not to pay to bring them from the east. The window here is always the greatest attraction of the neighborhood. It is Mr. Samuelson's pride and he has the art down to a nicety. Mr. Samuelson says that Porto Rican matting is one of the best aids to the plant decorator and he finds that most

of the holiday customers appreciate the line of novelties which he is showing, such as baskets and hampers of unique design, one of the best sellers being a bird's-nest basket.

The George Wittbold Company, at its two stores, is showing a tremendous stock of Easter material, including the best acacias which the season affords, also some splendid rhododendrons and hydrangeas. They have a big stock of double tulips in pans and also several hundred of lilies, hydrangeas, oranges, primulas and Crimson Ramblers. They report that nearly every buyer chooses to pay the slight additional cost to have the plant dressed with Porto Rican matting, ribbon or crepe paper.

The Asmus Floral Company is just into its handsome new store and greenhouses and has things in very good shape, with such stock as one would expect to find in a place in which Emil Buettner is the guiding spirit. They have a stock of very good lilies. While they have no basis of comparison, they have found the early Easter buying to be all that they could expect.

Out on the west side, Halle was fortunate in picking up a nice lot of lilies, perfect plants with fine flowers, and they have made a fine display in his window. At the Schiller place, further out on Madison street, the usual large quantity of bulbous material, tulips, daffodils, hyacinths, and so forth, is in evidence, besides a good stock of lilies and more pretentious plants.

John Mangel is handicapped in his Easter business this year by lack of room to make a plant display, although he has some very good material. His store is always one of the brightest spots on State street and on cut flowers he is making his usual fine showing. Last year he had an extra store next door for his lilies, azaleas and other plants, but this season he is restricted to his own quarters for this material.

The Fleischman Floral Company has been making a very fine showing this week, although C. E. Young, the manager in charge, says that they have been handicapped to no small degree by their inability to secure the grade of lilies which they require. They have shown a nice assortment of blooming plants and have them all dressed up in pot covers of one sort or another, many of the azaleas being all but covered by crepe paper, which is also a prevailing fashion at "Moscow's," and have found that the cut flower buyers all want their purchases put up in some of the novel arrangements in the line of baskets and boxes.

Friedman has been making an elaborate Easter showing, with the place filled to overflowing with flowering plants, the best of which were rhododendrons. He went east for a novelty and procured it in the shape of some profusely bloomed double flowering cherries, which make an attractive feature in his window, dressed in white imported crepe paper.

Hauswirth is in temporary quarters this year and has no room for a large display of plants, but has some very finely flowered Crimson Ramblers. Lange has his usual good showing, including some extra azaleas.

John F. Kidwell & Brother have large displays in both their Wentworth avenue and Forty-third street stores, largely bulbous material in pans, but including some well flowered hydrangeas and good azaleas, the latter being principally Mme. Vander Cruyssen.

Smythe, out on Michigan avenue, has

had his store and conservatory filled with well flowered plants, running through the wholesaler from the bulb pans at low prices to the high grade hydrangeas, azaleas and Crimson Ramblers. He is sending out hardly anything in pots which has not the receptacle concealed in a basket or covering of some sort.

#### William Paul.

The story of the life work of William Paul is written in the rose gardens of the world. It is a worthy record of a life well spent, for this venerable rosarian has labored long and well for the improvement of the rose, of which there is at his place, Waltham Cross, Hertfordshire, England, one of the grandest collections in the world. Mr. Paul has spent half a

*William Paul*

century in his rose garden, coming into the business in youth, succeeding his father, but in these later years turning over the details of the great nursery to his son, Arthur, who is himself skilled in the craft. Some of Mr. Paul's introductions are Medea, Corinna, Enchantress, Waltham Climber, Duke of Edinburgh, Beauty of Waltham, Pride of Waltham, Star of Waltham, Princess Adelaide, Dutchess of Albany, Lord Bacon, R. D. Baxter, Brightness of Cheshunt, Brilliant, Cheshunt Scarlet, Princess Christian, Crimson Globe, Paul's Single Crimson and many more. Given to literary pursuits and possessing one of the finest libraries of botanical works in all England it is but natural that he should write of his roses, and his book, "The Rose Garden," published in 1848, has reached its ninth edition. Much might be said of his various essays, read before horticultural and scientific societies, and of his many contributions to the press, but most of these, the important ones, are embodied in "Contributions to Horticultural Literature, 1843-1892." Mr. Paul is a Fellow of the Linnean Society and one of the oldest Fellows of the Royal Horticultural Society. For many years he has been one of the principal exhibitors of roses at the British shows

and his name has also been closely connected with the production and introduction of zonal pelargoniums, hollyhocks, phloxes, camellias and other flowers.

#### The Rose Balduin.

In the issue of this journal for February 15, page 76, it is stated that, as a member of the committee on investigation of the rose heading these notes, the undersigned wrote to Mr. P. Lambert, Trier, Germany, who disseminated the Balduin, asking if he could throw any light upon the subject, because both Balduin and Helen Gould with different pedigrees appear in his catalogue, but up to that time no reply had been received from him; but a postal had been received by Dingee & Conard Company on which was stated they were distinct. March 10, however, a letter, dated February 27, from Mr. Lambert was received, and is as follows:

MR. EDWIN LONSDALE, Wyndmoor, Chestnut Hill, Phila., Pa.

DEAR SIR:—Concerning Helen Gould-Balduin, I wrote some days after my postcard was sent to The Dingee & Conard Company a letter saying that this card was sent because some of my neighbors came to say that they have found some difference between the two roses. I believe that Gould is nothing else but my Balduin, of which I had sent fifty plants and 200 budding eyes in 1898 to Myers & Samtman, Wyndmoor, Chestnut Hill, Pa. Mr. John Cook, Baltimore, Md., received Balduin earlier.

I requested The Dingee & Conard Company to show you this letter wherein I wrote that the roses must be identical.

Trusting that this may serve to the matter, I remain, yours truly, P. LAMBERT.

P. S.—Helen Gould was, when I got it, too weak to prove it exactly. I got it first as No. 1920 and I found that it was Balduin. A year later I got Helen Gould, very small plants, and so we thought it different at first.

This letter, while it does not prove that Myers & Samtman are indirectly responsible for the renaming of the rose under consideration, indicates as much, and that is the most that can be said.

Messrs. Myers & Samtman may or may not have been surprised when Mr. E. G. Asmus, in company with Mr. A. B. Scott—one of the members of the committee on investigation—recognized in their greenhouses the Balduin as Columbia, the variety he was at that time trying as a winter forcer under that provisional name, but which, after it had been discarded "as not being up to the mark as a forcing rose," as Mr. Asmus expressed the idea to the committee, was sold to Messrs. Peter Henderson & Company "under its true name, the Balduin." Messrs. Myers & Samtman, in the Florists' Exchange, innocently (!) state that "We all know that one could not call a cut rose Columbia and the bush on which it was grown Balduin." It would be interesting to know—and Messrs. Myers & Samtman could tell us if they would—what was the name of the "bush" from which the cuttings were taken that were sold by them as "their new rose Columbia" to Dingee & Conard Company. As the signs go, it looks as though the latter firm had been persuaded that they were buying a seedling rose of American origin, for here among other things is what they say in their catalogue, as follows: "Among thousands of seedling plants Fate favored this variety (Helen Gould). When it was big enough to bloom we saw it. We were so taken with its beauty and valuable characteristics that we paid seven hundred and fifty dollars (\$750) for the original stock. From the original plant the work of evolution began. From year to year its progeny increased as did our enthusiasm. We had judged it correctly," etc.

Messrs. Myers & Samtman have had

A VIEW OF THE SPRING SHOW OF THE MASSACHUSETTS HORTICULTURAL SOCIETY.

two communications in the Florists' Exchange, but in neither of which has that firm disputed a point that was made in either the original or in the supplementary reports of the committee, but have evaded the points at issue entirely. What the committee wants and what the readers of the trade papers want is more light upon the subject and less obscurity. Mr. F. P. Myers, senior member of the firm of Myers & Samtman, was consulted on three different occasions, and three letters were shown to him during the investigation, one from Mr. John Cook, of Baltimore, the other from Ernst G. Asmus, West Hoboken, N. J.; both were dated November 11, 1901. These were shown to him in the Library Room at Horticultural Hall, Broad street, Philadelphia, a day or two after they were received and during the progress of the flower show held by the Pennsylvania Horticultural Society. Both these letters have appeared in the Florists' Exchange. Another letter which he read was from Mr. P. J. Lynch, vice-president and general manager of the Dingee & Conard Company, and is dated November 26, 1901, and was read on the train on our way home from the Reading Terminal, Philadelphia, on Friday, November 29, 1901, and with your permission will quote for the benefit of your readers an extract from said letter:

Irrespective of what will be the final report of your committee, I desire to emphasize this point, that in introducing Helen Gould as a new rose we did so believing thoroughly in that fact, and we have as yet no evidence that it is not a new rose of American origin. We have exhausted our supply of interrogations on this point with Myers & Samtman, from whom we bought the rose. They have refused to answer our questions as to whether or not they secured the rose in this country or abroad. In this particular we are some-

what handicapped, owing to their inability or disinclination, as the case may be, to give us information on this point. In order to maintain our integrity as disseminators of new roses, and not old ones under new names, we believe that it will be sufficient for us to say that in the agreement entered into with Myers & Samtman, this rose was referred to as Columbia, an unregistered name used for the purpose of local identification.

Everything the committee has reported can be substantiated or corroborated, and I personally am very sorry that Myers & Samtman are making such strenuous efforts to shirk their responsibility in the matter. Such practices are baneful and far-reaching in their influences, and are liable to bring discredit and distrust upon a profession that ought to be entirely above reproach.

EDWIN LONSDALE.

#### Begonia Gloire de Lorraine.

[A paper read before the New Haven County Horticultural Society, March 4, by John Doughty.]

I have been asked to give some information regarding the culture of this charming new species of begonia. As all local growers are aware, it was practically new to florists in New Haven last year; that is, it had been grown only by the few, and that I was one of the novices makes me feel that I am not qualified to speak so fully upon the subject as it deserves to be treated; however, I will readily impart my experience for the benefit of my fellow members of this society.

At the outset I would say that I am indebted to Mr. Edwin Lonsdale, of Philadelphia, for the following information regarding Lorraine. He states: Begonia Gloire de Lorraine was the result of a cross between B. Socotrana and B. Dregei. It was sent out by Victor

Lemoine & Son, of France. The first to have it in America, so far as known, was H. H. Hunnewell, Fred. Harris, gardener, and it was exhibited by him before the Massachusetts Horticultural Society, and received a silver medal, December 4, 1897. The first time it was noticed in American horticultural literature, was January 9, 1897, by the AMERICAN FLORIST, and was mentioned therein by Mr. A. Hemsley, an English grower.

It would appear from the foregoing that we growers of New Haven have held our reputation well as being a little behind, but as we have recently awakened and discovered this society so full of vigor, let us endeavor to keep time with the progress in horticulture.

The specimen Lorraine I have placed before you this evening is one of the twelve that obtained first honors at our exhibition on November 6, 1901, and has been in flower since the end of September, or a little over five months. All our plants were grown in 5-inch pots and this plant before us was not placed in the 8-inch pan before January 23, and I do not perceive that it is benefited but very slightly by the transfer, owing most probably to the lateness of the transfer.

I find that their season for flowering is practically over by the end of February. As you will perceive there are but few more flowers thereon to expand, and the flowers are not so large and well formed as they were in midwinter.

I have here before you rooted leaf stalks with the young growth issuing from the soil. I find they root very readily from the leaf stalks, as well as young shoots two or three inches long. They require to remain in the sand in

which they are rooted for a considerable time, until they have formed minute tubers, very much resembling those of the dahlia but very irregular in outline, and when taken from the propagating sand are beautifully white. Those sufficiently advanced I have pricked out into flats, as it gives less trouble than potting singly, though as you see I potted a few. Not having had further experience in this stage of their growth we will now assume we have just received our consignment of small plants from the wholesale growers, and that it is the month of July, when we received our plants.

They were from 2-inch pots and the plants themselves little larger than the money paid for them. I knew they were begonias, because I had been told so, therefore I treated them as such, placing them in 2½-inch pots and using a compost of three-fifths decayed manure and two-fifths loam, with a little sand. They were placed upon the greenhouse bench under slight shade until growth commenced, when they received more light. They were potted into 3½-inch pots in August, and in September they were placed in 5-inch pots, in which they were sold.

The compost for the latter shift was about equal parts decayed manure and

November, for I was perfectly satisfied by the way they were growing, and decided to let well enough alone. In conclusion, I would say do not attempt forcing the growth; watch carefully the growth as it proceeds, taking care that it is being well solidified, for upon the growers' judgment all depends whether success or failure follows, bearing in mind these are the essential points, for to treat many species of plants one year as another is to count failure, the varying atmospheric conditions having a great influence upon vegetation in general.

Lastly, I would say it is not the success of any one grower being expounded to others that will assure success unto them, any more than it is the failure of the unfortunate being expounded in like manner. I therefore ask anyone who has not succeeded in growing Lorraine well to expound the treatment that we may avoid the wrong and follow the right when we know it.

#### Fine Hyacinths and Geraniums.

The accompanying illustration from a photograph of hyacinths represents the first prize group of six pans exhibited at the spring show of the Pennsylvania Horticultural Society. In my opinion

this was about as fine a lot of hyacinths as I have ever seen exhibited; the selection of varieties was excellent and the care and attention given in their cultivation very commendable. The only objection that could be urged against this lot was that the suckers were left on the plants, which detracts from the beauty of an exhibition hyacinth. The exhibitor was Francis Canning, gardener to Samuel T. Bodine, Villa Nova, Pa.

The other illustration, a group of geraniums, is interesting because it shows what a good gardener can do with this plant if he only knows how to grow them and goes at it conscientiously. William Robertson, gardener to John W. Pepper, Jenkintown, Pa., was the exhibitor of these. He has shown us in the past many fine lots of geraniums, but none that were better than the one under consideration. This exhibit was quite a feature of the show and in addition to receiving the first prize, has, I believe, been recommended by the judges for a silver medal, which I consider is no more than just and proper. G. C. W.

#### The Philadelphia Spring Exhibition.

The Pennsylvania Horticultural Society's spring show proved quite a success, although lacking much in large displays, and in spite of adverse conditions, such as a frosty opening day, and the recent severe storm. The attendance was very good, particularly in the evening, and made a pretty showing. The feature of the exhibition was the display of bulbs for prizes offered by the seedsmen, which brought out strong competition and many well grown varieties, but the thing of note was the new carnation, Adonis, from Robert Craig & Son, which won the president's prize, a cup valued at \$50, for the best carnation not disseminated. It is certainly a grand variety, leading everything in red.

The roses from the American Rose Company, Washington, including Ivory, Balduin and Alce Roosevelt, were very much admired. Mrs. Oliver Ames, from John N. May, looked even better than usual. Beauty, Liberty and Brunner were well represented. The carnation display, while not large, was interesting, but Craig's Adonis seemed to be the center of attraction.

H. A. Dreer staged a collection of plants surmounted by the now familiar Pandanus Sanderii. John Westcott and John Gaynor, gardener to John Wana-

PRIZE HYACINTHS AT PHILADELPHIA SPRING SHOW.

loam (not New Haven loam). I may here add that the manure used was from the horse barn. I never was a believer in cow manure for pot culture and I have yet to find its superiority over horse manure for any purpose save in a light sandy or gravelly garden or field.

During September and October the plants grew very rapidly, soon forming dense growth, and by the end of October were good salable plants. I do not find any more difficulty in growing Lorraine than any other begonia. No begonia will thrive in a stagnated soil or a stagnated atmosphere; therefore the plants must be carefully watered and ventilated, especially during the winter. Lorraine will bear more light than any begonia I know of under glass. My experience is that it is well suited in a night temperature of about 55°, and our house that they were flowering in was more frequently 50° at night, after cold weather set in.

The plants did not receive liquid manure more than once, that at the end of

SIX PRIZE GERANIUMS AT PHILADELPHIA SPRING SHOW.

maker, had each very attractive groups, the one from Mr. Gaynor being well set off with an interesting collection of flowering plants. Geraniums from Wm. Robertson, gardener to J. W. Pepper, were well done and were really one of the features of the show.

Amaryllises from John Thatcher were in the usual well furnished style. Mr. Thatcher is now working on a number of new seedlings which are being anxiously looked forward to. Robert Kift had a large bunch of cut *Harrisii*, and also had Easter baskets and window decorations. Rhododendrons, azaleas, spiræas, cinerarias, genistas, roses, polyanthus and pansies were all represented.

A fine vase of Barberton daisy from A. Herrington, and a table of hardy plants in bloom, such as dornicums, primulas and irises were also from Dreer. A full line of greenhouse vegetables were shown by John McCleary and Wm. Robertson.

Two specimen ferns from Thomas Long, gardener to G. W. C. Drexel, Bryn Mawr, were grand and much admired. They were *Goniophlebium subauriculatum* and *Adiantum decorum*.

FRANCIS CANNING.

#### The New Single Violet Dorsett.

P. H. Dorsett, of Garrett Park, Md., who has been very successful with violets for the past eight years, has sold his place to David Bisset, late foreman for J. R. Freeman. Mr. Dorsett has made arrangements to disseminate his new violet, to which he has given close attention for the past six years. This variety is a very valuable one, not only on account of its flowers but also for the very fine foliage, the yield of flowers and foliage being enormous. An average of eighty-one flowers have been picked from each plant thus far this season, and at the same time two fair sized houses of it have supplied enough leaves for all the other violet flowers picked, without in any way interfering with the health of the plants. The flowers have a deliciously delicate perfume, are rich, dark purple and sell as well as any other single variety. Nothing is known of the origin of this variety beyond that it was found growing in a semi-wild state in two gardens of the south, but in widely different localities. It is probably a hybrid between *Viola odorata* and one of the native species, probably *Viola papilionacea*.

P. G.

#### Notes on Aquatics.

It is most gratifying to note that with the onward march of prosperity, horticulture keeps abreast of the times. There is an increasing demand for flowers, plants and trees in all lines and for a higher grade of goods. There is, too, a very great demand for hardy plants, perennials, herbaceous plants, old-fashioned, or whatever these hardy plants may be called. The demand for this class of plants only confirms the fact that there is more care taken, more thought given to the home garden, where tender exotics are not considered indispensable to make a garden attractive and inviting. This demand will continue to grow with an ever increasing love of nature and nature's gardens and flowers. The home garden, of the cottage as well as the mansion, is receiving greater attention, and homes, too, without gardens are decorated with plants and flowers, not only at festivities of royalty, but on every-day occasions. Flowers also find their way to the sick chamber and hospital, carrying health, brightness, cheer-

fulness, pleasure and much more to the sick. Let us, and especially those that are sick and unable to visit nature's gardens, have more of them.

It is a pleasure to note the increasing numbers of rural homes under construction and the improvements of old ones, the delights of country life and the tendency toward natural gardening. The landscape is not complete without water and where there is water surely there ought to be something in the way of water gardening, and where the garden is limited water gardening may be had in miniature. To a lover of flowers all are lovely, but all flowers have their season, some sadly too short and others not in place at all times. But of water lilies it may be said none come too soon, none stay too late. They are with us as soon as winter's chilly blast is o'er, and they are still with us till winter comes again. Spring, long anticipated and delayed, is here again and preparations are made or being made for the season's planting, so there is activity all along the line.

While it is most gratifying to realize an ever increasing demand for aquatic plants it is particularly noticeable that there is little change in this line in our public parks, certainly not the progress we might expect. There are different styles of water gardening and some fine examples are seen, and fine specimens of flowers, but where is there a model water garden to be seen to-day? Facilities plenty, material abundant, our public men are too much engrossed in business, politics or what not and too niggardly to make appropriation sufficient for an enterprising man to carry out any elaborate style of gardening. I know a case where a progressive superintendent has been working four or five years to construct a water garden and who has nearly accomplished his object but has no funds to purchase stock but would gladly exchange other stock that he may the sooner attain his desired and long looked for water garden. There may be others working under similar difficulties, but it ought not to be so.

THE DORSETT VIOLET.

On the other hand many are constructing ponds, building aquatic houses, ponds or pools adjacent to buildings. These must conform to architectural designs and are consequently formal, stiff, unnatural, unsuitable in more ways than one; sometimes too deep, at other times too shallow, and in most cases too small. Yet under these conditions success is expected, however great the difficulty. It has been our desire, and we have endeavored to remedy this error in construction by inviting all persons intending planting aquatics to write us giving particulars of the proposed pond and so forth, and we gladly offer practical suggestions as to construction, selection of plants and any other information, yet in most cases the pool or fountain basin or pond is made and all ready to plant and in many cases very inadequate for the plants intended to be grown.

Water lilies or nymphæas are very strong and attractive flowers, but there is a great difference between the hardy and tender varieties in growth, size of flower and foliage, and to the ordinary observer the largest flowers and the most attractive colors make the keenest impression. These are undoubtedly the tender or tropical varieties, and should these plants have a name attached to

have more natural ponds and surrounding and not attempt too much on a limited area, but select suitable varieties in each case and if certain varieties are desired see that adequate means are allowed for perfect development.

The culture of these plants is better understood to-day than ever before, and for those desirous of obtaining knowledge in this line there are books, pamphlets, cultural notes and so forth. To those who may propose growing these charming and most fascinating flowers I would say devote all available space and if the space is limited to a few hundred square feet do not attempt to grow everything, but select suitable varieties that are most likely to give the best results. Do not plant too soon. Hardy varieties may be planted as soon as vegetation is quite active and flowering shrubs are in blossom. They may also be planted any time during the growing season, right to the end of August, but at this late date they will only establish themselves, but will be in excellent condition to start quite early the following spring.

Do not plant nelumbiums before warm, settled weather is assured, which is usually May, but no date can be stated for general guidance over so vast an area. Conditions must guide in all cases

#### Nephrolepis Exaltata Piersoni.

We have on several occasions referred to a new nephrolepis which has been attracting considerable attention for some time past at the establishment of the F. R. Pierson Company, Tarrytown, N. Y., and it affords us pleasure to present herewith an illustration of the fronds, although it must be confessed that the photograph from which the halftone is prepared does them but scant justice. We are indebted to Mr. Pierson for the following particulars regarding the plant. The fronds to which he refers arrived in excellent condition. They are very beautiful and quite distinct from anything we have seen in this line:

"It originated with us here three years ago, and was a sport from the Boston fern, showing the tendency to divide the pinnæ. The plant was carefully watched, and it has developed into this wonderful variation. As you will see from the fronds which I send, the pinnæ of the main frond subdivides, making a perfect miniature frond and producing a most graceful and beautiful effect. The group of three fronds gives a very good idea of the mossiness of the fronds, but you really would have to see a plant to appreciate the value of the variety.

"The fronds grow broad and heavy, and they increase in beauty as they develop. On account of the weight of the foliage, the plant assumes a much more graceful appearance than the Boston fern, and owing to the fullness of the fronds, even small plants are well furnished, making much more symmetrical and beautiful plants than the Boston fern. The divided pinnæ of the miniature side fronds keep growing constantly, and as they become developed they show a tendency to hang down, which greatly enhances the beauty of the plant. The fronds also show two distinct shades of green, the ends being of a lighter green, while the center and main part of the fronds show a dark, rich shade, producing a very beautiful effect. Quite a number of people have remarked upon the beauty of the plant on account of its showing the two shades of green.

"It is exactly like the Boston fern in all its characteristics, so far as growth, hardiness and general adaptability are concerned—in fact, as it is a sport from the Boston fern, it has its free-growing, hardy characteristics, but, as you will see, the Boston fern is not to be compared with it for effect, as it is a distinct thing. As some one has expressed it, there is no fern like it in cultivation. Everyone who has seen it is charmed with it. It is one of those novelties that speaks for itself. It is a novelty of a lifetime, we think. We consider it the most valuable novelty in the new plant line that has been introduced in many years, not only on account of its individuality and beauty, but on account of the fact that it appeals to everyone—people who grow house plants and florists who grow plants for sale, and it is a magnificent plant for greenhouse and conservatory decoration—in fact, it is a plant that appeals to everyone, and on that account we consider it the more valuable, because it should find a market wherever the Boston fern has been sold, and it will practically drive that variety out, as it is so much more beautiful.

"We expect to send it out in the spring of 1903. I hope that the fronds which I send you by express will reach you in good shape, and if they do, they will give you a better idea of the plant and its value than any description that I can give you by letter."

FRONDS OF NEPHROLEPIS EXALTATA PIERSONI.

them it is very likely such varieties might be added to the list another season without consideration as to their fitness for the desired place or purpose. The trouble is that few of us realize what tropical vegetation is and do not give the plants a chance to grow or to develop their true character. Let all get closer to nature,

and what is just right for one class of plants may be altogether wrong for another. Tender or tropical varieties should not be planted till early summer and the water is warm, the season varying with locality from the middle of May to the first week in June.

WM. TRICKER.

probably take well. Not as many azaleas are noticed as last year, but the quality is good and will, I think, fetch better prices. Spiræas are plentiful, as is bulbous stock. I expect quite a trade will be done in made up baskets, which are popular and seem to outsell everything else.

In cut flowers the supply will fill all orders, with possibly the exception of Beauties and Liberties. Tea roses are good, both in quality and quantity. Carnations also show up in good quantities with quality very good. Violets will have a good run and as there are plenty around there will be no worry about them.

The weather looks favorable so far and unless we have a very sudden change we will go through a hard but pleasant week. B.

#### Chicago.

EASTER WHOLESALE BUSINESS VERY LARGE BUT NOT MUCH AHEAD OF A YEAR AGO. —STOCK PROVES PLENTIFUL IN MOST LINES.—BIG CROPS AT HAND.—LAWSON CARNATION BADLY SPLIT.—A VARIETY OF LOCAL NOTES.

Writing on Friday, in the midst of the Easter rush, it seems unlikely that the season's business will largely exceed that of the splendid Easter of a year ago, although all the shipping houses have their hands so full that it is not yet possible to tell just where they are at. It is reported that a large inquiry has been made for cheap goods and that, while there are in the market many very large orders for high grade material, many of the buyers are setting their own prices and demanding nothing but good stock at lowest quoted figures. This, of course, operates to the distraction of the shipper and the close of the shipping business may see many of these orders unfilled, but there is every indication that in most lines there will be ample stock to meet reasonable requirements. The high price at which good lilies are held has operated to cut down the orders for this specialty to a point where it is probable that most of the demands can be satisfied. There may develop a shortage of first-class roses but, before the smoke has cleared away from the scene of action, it appears that there are carnations more than enough to meet requirements, although late buying may consume everything in sight. Monday morning found a scarcity of material in the market, for it was a good shipping day, but Tuesday saw a glut, which was worse on Wednesday, before the Easter shipping fairly began. Then things moved lively for a time. The receipts have been tremendously heavy in many lines, particularly long Beauties and carnations. The cuts seem to be just coming on with most of the growers and the favorable weather has operated to greatly increase the supply. While business promises to be brisk immediately following Easter, with the usual large demand from all over the country for wedding material, the cuts for the next few weeks will be very heavy here and exacting indeed must be the requirements which cannot be met in this market.

The usual meeting of the Florists' Club was held March 26, but owing to Easter trade preparations there was only a quorum present. The secretary was instructed not to notify members of the meeting of April 9 as that date immediately follows the second grand annual entertainment and ball to be given under the auspices of the club at the Masonic Temple, April 8, so that the first April

meeting will not take place. Charles Anderson has promised a paper for the second meeting, April 23.

Weiland & Risch are growing nearly five houses of the Mrs. Lawson carnation and are having a tremendous cut of as fine flowers as this variety ever produced, but they are finding the greatest fault of the sort to be its propensity to split the calyxes. They say that fully one-half and probably two-thirds of the blooms are split, despite their most careful efforts at growing. On an active market the split stock moves at half the price of the perfect blooms, but on a dull market it will not go at all.

The Chicago Carnation Company's new addition will amount to 40,000 feet of glass, the houses being detached and constructed with Garland's plates.

E. E. Pieser says that the number of ferns this market consumed for Easter is something phenomenal, running into the many hundreds of thousands.

Wittholds have a number of plants of Dreer's new fern, Cibotium Schiedei, and think highly of it.

The Kennicott Brothers Company sold 3,000 bunches of violets in one order Monday.

The grower who pickled for Easter certainly got the worst of it.

Visitors: John Boebner, Dayton, O.; F. A. Belt, Sterling, Ill.; Thos. S. Pritchard, of A. Wiegand & Son, and A. Billingsly, of Indianapolis; E. G. Hill and J. A. Evans, of Richmond; Geo. Souster, Elgin, Ill.

#### New York.

APPROACH OF EASTER BRINGS PERIOD OF QUIET.—BIG RUSH LOOKED FOR ON DAY PRECEDING FESTIVAL.—RECEIPTS TOO HEAVY TO PERMIT OF ANY CONSIDERABLE INCREASE OF VALUES.—THE LILY SITUATION.—VARIOUS NOTES.

The proximity of Easter seems to make no appreciable impression on the cut flower market, unless it be that the dullness that usually precedes a holiday is as pronounced as ever and little excitement is looked for until Saturday, when, if the weather holds good, things ought to be pretty lively. Last Saturday, the day before Palm Sunday, saw a nice little spurt in business, which was brisk while it lasted, and very welcome to all concerned. There is no marked curtailment of shipments this week and receipts of flowers of all sorts, tulips excepted, are more than enough to supply all demands. Carnations, alone, have scored an advance in value over last week but they are by no means scarce. In roses the influence of the warm weather appears in the heavier receipts of American Beauty, the liberal supply frustrating thus far any movement towards enhancing the prices. Pink roses, as a rule, have a faded appearance. Without stronger proof it will be only fair to attribute this for the present to the weather rather than to any disposition on the part of growers to hold them back for a rise in the market. It seems to be generally accepted that no advance of any account may be expected. Values on roses have held unusually well since New Year's. Of course there have been occasions when the prices were so small that even Johnnie Weir had to put on glasses to see them, but these cases were not continuous for any length of time and nothing to compare with the slumps of recent years has been experienced. Brunners are not in heavy supply, although they are usually quite a factor in the Easter cut

flower market, but Jacqs seem to be coming along fast and the quality is generally good.

The story of the cut lily market will depend mainly on the disposition of the plants. If these are cleared out early there will no doubt be a lively demand for blooms, but at present writing buyers seem in no haste to secure a supply and the feeling that there will not be enough to fill all requirements is not so strong as it was, though the product is light in comparison with what it would have been had all the bulbs flowered. Indications are for a lighter supply of violets than was anticipated, but the demand is very light also and low prices are sure to prevail. Lily of the valley is again over-plentiful.

A cable dispatch from London on Monday, March 17, announced to Alfred Dimmock, Sander & Co.'s American representative, the sad news of the death of his little daughter, aged two years. This is the second one of Mr. Dimmock's children to die during his absence from home.

Thos. W. Weathered's Sons have secured the contract to erect a fine carnation house for Jos. Fuller, Leominster, Mass., size 32x200 feet.

A. Herrmann has had his place fitted out completely with electric lights.

#### Milwaukee.

GENERALLY SATISFACTORY CONDITION OF TRADE SHOWN BY RECORDS OF COMMISSION DEALERS.—TREND OF THE TIMES.—GROWER HAS A FINE RANGE.—A NOVEL DECORATION.

The condition of the flower market is quite satisfactory, although of course there are always some grumblers. The general pulse of the flower trade is most easily gauged at a general commission house like that of Holton & Hunkel, where growers from both local and outside territory consign their output to supply the demand of all classes. The gross amount handled each week or month compared to the corresponding time of a year or two years previous tells a very interesting story. But these market reports do not inform you that older established firms which attempt to supply their stores from greenhouses managed by themselves are being crowded. Within the past three years three have sold out their stores, one more makes the change this spring and one of the principal west-siders is thinking seriously of following suit. When a storekeeper can twice a day look over the output of many growers and take his pick at prices gauged to supply and demand, he can cater to the public better than if he is chained to the product of one establishment. No ordinary concern can grow well all that a retail store may require.

A new feature here will be watched with interest. The C. C. Pollworth Company is doing a general wholesale commission business and has put up one of the largest plants of the season, certainly the largest plant in this state growing roses exclusively. The place was completed too late in the fall to be quite up to time for winter stock but at present the new spring growth is making a beautiful showing. The plant consists of six houses, each 23x256 feet, filled with Bride, Bridesmaid, Meteor, Liberty, Perle, Golden Gate and Kaiserin. Besides this rose plant, this firm still controls the Duetster place, but a short distance down the same road, where their stock of palms and ferns is kept.

Albert Hoga deserves a high compliment for the excellent lot of longiflorums he has for Easter. They are about as near perfect as can well be imagined. A batch of paeonias is also well done.

Looking over the north side of the city, we pass what was the greenhouse locality fifteen years ago, but farther out we come first to Wm. Edlfsen's establishment, the last greenhouses built by a retail florist and the first one to locate close by what is called North Milwaukee. Just beyond is the new plant put up by Nic Zweifle, a model carnation establishment. The field of carnations under the continuous roof supported by iron posts and Garland gutters is a sight well worth going a long distance to see. Mr. Zweifle's old place in the city is in good shape, as it always has been, but this large carnation plant is certainly the most perfect in Milwaukee county. He intends building more on the south this coming summer.

The Lenten season has been more busy than in other years. We are not noticing the difference that was expected. There have been so many small dinners and informal affairs, besides funeral work, that business has been good right along. Of course the favorable weather has increased the supply sometimes beyond the demand for some stock, but nothing like what might have been expected, receipts being generally well cleaned up. The wholesale market is secure in a larger number of Easter lilies than were to be had last year, but smilax is very scarce and common ferns have been held up to \$2.50 per thousand with fair indications of reaching \$3. The supply of fancy green stock, such as adiantums and asparagus is quite large.

The most noteworthy event during Lent was the decoration for the Prince Henry banquet. It was novel in arrangement and elaborate. The success of this scheme was largely due to the skill of Mr. Kuenne, manager of Holton & Hunkel's wire department.

August F. Kellner and Miss Martha Preussler were married March 22. Mr. Kellner is an all-around florist and his bride for some time had charge of a department of A. Klokner's establishment. C. B. W.

#### Orange, N. J.

OCEAN VOYAGER GIVES INTERESTING DETAILS AS TO FLOWERS SENT TO OUTGOING STEAMERS.

A letter received from Jos. B. Davis, who is one of the excursionists on the steamer Celtic which left New York in February for Palestine and Mediterranean ports, gives some interesting notes regarding the quantity of flowers sent on board the steamer when about to leave New York. Mr. Davis states that there are 1,125 persons on board and that each individual had about ten friends to see him or her off and at least one in every ten brought flowers. The flowers filled all the cabins and passageways and there were also many flowering plants, such as azaleas, included in the display. To set the tables was out of the question until the steward had tossed many of them overboard, the destruction commencing as soon as the boat was well down the bay. On the seventh day out American Beauty, Bride and Bridesmaid roses and Lawson, Roosevelt, Maceo and Glacier carnations were all in good condition, and cattleyas lasted until the sixth day. The contributions were supplied by a large number of New York florists, including Thorley, Fleisch-

man, Small, Warendorff, Christianson, Okkerse, Scallen and Stumpp, besides a number of the suburban florists.

#### Detroit.

CLUB DISCUSSES CONVENTIONS PAST AND PROSPECTIVE.—ASHEVILLE EXCITES INTEREST.—FINE PROSPECTS FOR EASTER.

The last club meeting, Wednesday evening, was well attended. Two new names were added to the roll of membership, which now numbers seventy-seven, exclusive of the honorary list. J. F. Sullivan read a paper describing his observations and impressions of his recent trip to Asheville, N. C. The remarks following indicated considerable interest and pointed to the probability of a large delegation to the convention from here, many of those present having already decided to go. A vase of the new carnation, Mrs. Potter Palmer, was on exhibition, having been sent by the Chicago Carnation Company. The specimens were very fine and elicited many favorable comments. A review of the visit to the carnation show at Indianapolis was also given by Mr. Sullivan, showing the many benefits to be derived from attendance at such exhibitions of the products of the most skillful growers.

Only the continuance of the present clear, beautiful weather is necessary to complete the conditions favorable to an Easter trade of unprecedented proportions. There will be an abundance of bulbous flowers and plants of all kinds. A fair supply of Easter lilies is visible and, while the plants are short, the foliage of most of the stock is good and the blooms fairly so. Reports indicate a general shortage of carnations and roses are in many cases off crop, Beauties decidedly so. The warm weather has faded the color of violets and diminished the size and quantity considerably but the demand will be fairly well supplied.

The many friends of Chas. Lohrman are pained to hear of the death of his wife after a very brief illness.

Frank Beard, Jas. Taylor and Jno. Dunn paid a visit to the growers of Grand Rapids last week. J. F. S.

#### Washington.

GOOD WEATHER BRINGS OUT STOCK FOR EASTER.—EVERYONE PREPARED FOR A BIG BUSINESS.—VARIOUS NOTES OF LOCAL DOINGS.

The weather being fine, with plenty of sunshine, there is a plenty of flowering stock in bloom for Easter. Hydrangeas, azaleas, Astilbe Japonica, tulips, hyacinths, lily of the valley and violets, and from all appearance roses and carnations, will be plentiful. All the florists have made preparations for a good show at their stores. Minder Brothers are cutting some fine roses, Brides, Bridesmaids, Kaiserins and Golden Gate, also carnations. Genesee is their best white. They have a number of Astilbe Japonica and azaleas. Clark Brothers have a fine showing of Carnot and Kaiserin roses in solid beds, and some fine lilacs and azaleas. The American Rose Company has hit it again this year with their lilies. Quite a number are "multiflora."

J. H. Small & Sons and Z. D. Blackstone had the bulk of the work for Dr. W. W. Johnson's funeral, a large number of designs being used, but all the florists had something to make for these obsequies.

Wm. R. Smith has been confined to the

house for the past week with lumbago, but is able to be about again.

J. Louis Loose has a fine lot of Crimson Rambler roses, azaleas and Liliun longiflorum.

George C. Shaffer will use an extra store to display his plants for Easter.

P. G.

#### Springfield, Mass.

TRADE ACTIVE AND ALL STOCK MOVING WELL.—PIERSON SENDS BIG SHIPMENT OF LILIES.—VARIOUS NOTES.

Business for the past week has been quite brisk, cut flowers of all kinds being in good demand. All florists have been quite busy with funeral work. Roses and carnations are scarce and the outlook for Easter is not very good. Bulb stock is plentiful but none going to waste. Flowering plants of all kinds are selling well, spiraea better than in former years. Lilies are plentiful and will be in grand shape for Easter. These were scarce two weeks ago here but owing to A. N. Pierson, of Cromwell, Conn., who shipped five car loads to this city March 10, there are now hundreds.

G. Stringwell, who has been with Mr. Howland, of Holyoke, has resigned his position to take charge of E. C. Mackintosh's private place in Holyoke.

Retailers are making good window displays and are showing some fine baskets, which I am sure will be sought after at the proper time.

Adams & Son have received a large shipment of roses, rhododendrons, box trees and so forth, which came through in good shape.

The Murphy Florist Company is in business difficulties. A. B.

#### Minneapolis.

TRADE BRISK AND SUPPLY SHORT OF THE DEMAND.—RETAILERS READY FOR EASTER.

Trade last week was rushing and a greater demand than the supply was noted all through the week. The dark weather which predominated shortened up stock so that large orders were filled with the best substitute that could be found. There will be a shortage of stock during Easter week and early orders will be the ones to secure their wants. This will make a greater call on the plant trade, with a fair supply of same. A call on our St. Paul friends found them prepared for a large trade. E. F. Lemke's store has been nicely redecorated. Mr. Lemke reports a good spring trade so far. Holm & Olson and L. L. May & Company are in good shape for the Easter rush.

Ralph Latham has resigned his position with Wm. Donaldson & Company to take charge of E. Nagel & Company's store.

Some very attractive decorations are observed among the trade this week and stock looks prime. C. F. R.

SAN FRANCISCO, CAL.—J. H. Sievers is making an eastern trip.

NORWICH, CONN.—The greenhouse of C. F. Jennings was burned to the ground on March 22. Mr. Jennings was burning leaves and the fire communicated to the greenhouse.

NEW ORLEANS, LA.—The Gardeners' Mutual Protective Association of New Orleans will give a grand street parade with floats decorated with vegetables and flowers on May 11, to be concluded with a festival and ball at the Southern Park.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—8 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

EASTER of 1903 falls on April 12, two  
weeks later than this year.

THE season is developing an increased  
demand for hardy herbaceous stock.

THE price of window glass in less than  
car lots has been advanced five per cent  
and another raise is expected early in  
April.

As long as the dear people have money  
to spend there is no time for sack cloth  
and ashes; Lent need be no bugaboo to  
the florists while prosperity reigns in the  
land.

It now appears, according to John  
Lewis Childs, that *Rudbeckia Golden  
Glow* was first discovered in western  
Illinois by a lady who sent it to him as a  
wild dahlia.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

To make advertising continuously  
profitable the advertiser must fill his  
orders with good stock so packed as to  
reach the buyer in good condition and  
give him the worth of his money.

### American Carnation Society.

DEPARTMENT OF REGISTRATION.

McDonald & Steele, Crawfordsville,  
Ind., register Tribe Ben Hur, a white car-  
nation, very large, perfect form; a lus-  
trous alabaster white, fine strong stem  
and growth; fragrant; a free bloomer,  
with no surplus grass.

ALBERT M. HERR, Sec'y.

### Greenhouse Building.

Los Angeles, Cal.—Howard & Smith  
one house.

Kent, O.—John Smith, lettuce house  
40x70.

Bakerstown, Pa.—Pittsburg Rose and  
Carnation Company, two Beautyhouses  
30x450.

Adams, Mass.—T. D. Brown enlarging.  
Leonminster, Mass.—Jos. Fuller, car-  
nation house 32x200.

### Bermuda Easter Lilies Scarce.

The supply of Bermuda Easter lilies,  
according to a New York dispatch of  
March 24, is scant this season. The S.  
S. Trinidad, which arrived March 23,  
did not bring a single lily from Bermuda.  
The officers said no lilies were in bloom  
on the island. Bermuda usually sends  
10,000 lilies to New York before Easter.

### Most Welcome of All.

ED. AM. FLORIST:—I enclose \$1 for next  
year's FLORIST. I have two dailies, four  
weeklies and two monthly magazines,  
but the most welcome one is the AMERI-  
CAN FLORIST. It is always read, even if  
I have time for nothing else.

C. W. SIBLEY.

Athol, Mass.

### An Easter Paean.

"Hail, gentle spring!

(We prefer hail to cyclones  
Or high water,) in tones  
Of purest affection

We announce your election

To first place in our hearts,

Dear creature of many parts

We lift up our voices and sing.

Hail, gentle spring!

True, this may be a false start.

The part

For several weeks may not be due;

Still, we hail you,

For we know

You'll not throw

Us down, but will be here

Some time this year."

### Wood Lice or Sow Bugs.

ED. AM. FLORIST:—Would you please  
inform me as to the best way to get rid  
of sow bugs? We have tried to gather  
them up on sliced potatoes but cannot  
get them fast enough. This is the first year  
I have noticed that they did any harm,  
but they are feeding on everything,  
especially seedlings. C. P. M.

To a quart of cornmeal add enough  
brown sugar to sweeten, mix well  
together and add two table-spoonfuls of  
Paris green. Moisten a little with water,  
just so it will hold together. Place the  
mixture about in small quantities, on or  
under the benches, or wherever the bugs  
may be.

### The Salvation of Lily Forcers.

I agree with George Anderson, of Phil-  
adelphia in what he says about the cause  
of the lily trouble this year, page 196,  
issue of March 8. The bulbs have been  
dug before being sufficiently matured.  
I have thrown out more than half of my  
lilies. This is certainly a very disgusting  
business. I believe our trouble with  
lilies will not cease as long as the bulb  
grower finds willing hands to take and  
pay for what he has to offer. Most of  
these men do not know the first thing  
about the requirements of a good forc-  
ing bulb, and never will. We will have to  
look for salvation at home. I believe  
a man with knowledge of the business,  
some capital and courage, could make  
good money by growing lilies in the  
United States. Some years ago I received  
500 *Lilium longiflorum* bulbs that were  
grown near New Orleans and I have  
never seen better lilies, before or since.  
Such bulbs as these could be sold for  
\$150 per thousand, and would be cheap  
in comparison with the trash we now  
receive from either Bermuda or Japan.

EMIL BUETTNER.

### The American Shamrock.

The newspapers are giving currency to  
rather a good yarn concerning our  
esteemed friend, Wm. R. Smith, chief  
of the National Botanic Garden, Wash-  
ington, D. C. It relates to supplies of sham-  
rock for members of the national legisla-  
ture on St. Patrick's day, and runneth  
thus:

Many of the members of the house made their  
appearance to-day wearing "shamrocks" in honor  
of Ireland's patron saint. That is to say, they  
thought they were wearing shamrocks, but they  
were really adorned with large leaves of water-  
cress. In anticipation of a demand for the three-

leaved emblem of Ireland, Sergeant-at-Arms  
Casson sent a page to the botanical gardens  
to-day for a suitable supply.

The page was of German descent and the super-  
intendent of the botanical gardens was born in  
the land of "Bobbie" Burns, to whose memory  
he is devoted. Whether the responsibility should  
be placed on the Teuton page or the Scotch gar-  
dener, the fact remains that instead of sham-  
rock the page returned with a large bunch of  
watercress.

The loyal sons of Ireland were justly indignant  
when they learned they were wearing a delicious  
table relish instead of the beloved shamrock, but  
finally accepted it as a substitute. Representa-  
tive Sulzer, champion of Ireland, would not be  
deceived and wore on the lapel of his coat a small  
green flag with a golden harp.

### Another New Magazine.

We are informed that Wm. Robinson,  
the well-known author of the "English  
Flower Garden," founder of the *Garden*  
and for many years its editor, intends  
publishing a monthly magazine, the  
*Garden Flora and Sylva of Northern and  
Temperate Countries*, to be devoted to  
out-of-door vegetation. The intention is  
to make it more for artistic excellence  
than for pecuniary benefit as he believes  
there is a field for and a large constituency  
of garden lovers that would appreciate  
and support the publication. Mr. Robin-  
son should know about the support end of  
the proposition and we heartily wish  
him all success in the new venture.

## OBITUARY.

JAMES PENTLAND.

James Pentland, the dean of Baltimore  
florists, passed away very suddenly in  
the small hours of the morning of  
March 19, at the venerable age of 81  
years. He was without doubt one of the  
oldest active florists in the United States  
and had been in business at his original  
location for more than half a century.  
He was born at Grey Abbey, County  
Down, in the north of Ireland, on  
October 28, 1821. His family came to  
America when the boy was eleven years  
of age, locating at Philadelphia, but  
removing to Baltimore in 1837. The lad  
had served an apprenticeship at garden-  
ing, and quickly found employment at  
Greenmount Cemetery, where he remained  
for several years. In 1849 he bought  
the property opposite the cemetery  
entrance, where he conducted the busi-  
ness until the day of his death. His prin-  
cipal stock in trade was bedding mate-  
rial and so forth, but he gave particular  
attention in the early days to garden  
roses and prior to the Civil War he was  
given credit for having the largest collec-  
tion and probably the largest output of  
plants of any florist in the country.  
Through long years of hybridization he  
evolved many good varieties, some of  
which he introduced to the trade, some  
of the best known being Dr. Kane, intro-  
duced in 1856; George Peabody, intro-  
duced in 1857, and Woodland Marguer-  
ite, introduced in 1859. Mr. Pentland  
also grew the camellia extensively and  
some of his seedlings are still in the trade.  
He was a man widely esteemed for his  
personal qualities and his conversation  
was rich in reminiscences of the notable  
events of his long career. He was a Mason  
and for thirty-three years a member of  
the Maryland Institute. He also served  
as a director of The House of Refuge and  
was a member of the House of Delegates  
in 1868. He also served one year as  
president of the Baltimore Gardeners'  
and Florists' Club. Mr. Pentland was  
thrice married and is survived by a widow  
and three children.

## Catalogues Received.

Joseph Bancroft & Son, Cedar Falls, Ia., cut flowers, seeds and plants; J. K. Alexander, East Bridgewater, Mass., dahlias; Phoenix Nursery Company, Bloomington, Ill., plants, bulbs, trees and shrubs; Bloodgood Nurseries, Flushing, N. Y., trees, shrubs and plants; Ellwanger & Barry, Rochester, N. Y., trees shrubs and plants; E. H. Krelage & Son, Haarlem, Holland, plants; J. Gammage & Sons, London, Ont., plants; P. Loef, Az. & Company, Boskoop, Holland, plants; J. Van Reisen & Son, Voorhout, Holland, bulbs and plants; Jacs. Smits, Naarden, Holland, trees and shrubs; the Acme Chemical Company, Ltd., Tonbridge, Kent, England, weed killer; John Peed & Son, London, S. E., England, plants; Walker & Pratt Manufacturing Company, Boston, Mass., boilers; Chicago House Wrecking Company, Chicago, second-hand material; Bobbink & Atkins, Rutherford, N. J., plants, trees and shrubs; John Fay Kennell, Rochester, N. Y., gladioli; Souper & Notting, Luxembourg, Grand Duchy, roses; Cotta Nursery & Orchard Company, Freeport, Ill., plants, trees, and shrubs; A. Tilton & Son, Cleveland, O., seeds; Harlan P. Kelsey, Boston, Mass., wholesale and retail plants; F. R. Pierson Company, Tarrytown-on-Hudson, N. Y., seeds, bulbs, and plants; Wm. F. Kasting, Buffalo, N. Y., cut flowers and florists' supplies; Samuel C. Moon, Morrisville, Pa., trees and shrubs; Elizabeth Nursery Company, Elizabeth, N. J., trees, shrubs and plants; J. H. Gregory & Son, Marblehead, Mass., seeds.

TUXEDO, N. Y.—The semi-monthly meeting of the Horticultural Society was held March 25, President Scharffer in the chair. One new member was elected and three applications received. It was decided to have a chrysanthemum show the first week in November. Frederick Bentley read a paper on bedding plants.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By married man, good all-around hand; eight years' with last employer, good reference. Address  
J. L., 223 E. Wood St., Norristown, Pa.

**SITUATION WANTED**—By practical florist and gardener, competent to take charge of country place; references: German; married, one child. Address  
TH H., care American Florist.

**SITUATION WANTED**—By German, age 32; single; 17 years' experience in greenhouse work; 7 years in this country; place near Chicago preferred.  
C B., care American Florist.

**SITUATION WANTED**—As foreman or all-around grower, Beauties a specialty, also other kinds, carnations, etc. Single; 24 years' experience.  
R S., care American Florist.

**SITUATION WANTED**—By landscape gardener and florist, 22 years' experience, No. 1 references, competent to take charge of first-class private place. State wages. Address  
N., care American Florist.

**SITUATION WANTED**—By A1 grower of roses and general stock; 20 years' experience in New York and Chicago, have now charge of 75,000 feet. Want A1 position in up-to-date place.  
I I., care American Florist.

**SITUATION WANTED**—By experienced florist and gardener, also designer and decorator; married, no children; would like to take charge of private or commercial place; age 29; German; best of references. Address  
J A K., care American Florist.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address  
G. FOREMAN, care P. O., Canton, O.

**SITUATION WANTED**—By good all-around florist; 18 years' experience; good grower of palms, ferns, pot plants in general and cut flowers; A1 references. Like to get position in place owner intends to sell or rent. State full particulars. Address  
A L., care Schiepan, 3455 State St., Chicago.

**SITUATION WANTED**—By a successful grower as foreman or to take charge of section, or would grow on shares. As to ability I can show stock in first-class condition. I am Beauty grower for John Muno, Chicago. Married; middle age; life experience; Chicago suburbs preferred. Address  
HENRY KRANZKE, 540 Estes Ave., Rogers Park, Chicago.

**SITUATION WANTED**—As head gardener on gentlemen's place. First class man with life experience in all the branches of horticulture; willing to work a day take charge of large place. Expert in growing bedding stock, cut flowers, landscape work; handle labor to best advantage. High wages expected. Have charge at present of private place in Colorado. Open for engagement May; German, age 36; married; best references.  
PRIVATE GARDENER care American Florist.

**WANTED**—Two men for general greenhouse work and two helpers for rose sections.  
J. F. WILCOX, Council Bluffs, Iowa.

**WANTED**—A good all-around single man; also an assistant. Good wages and steady work.  
J. F. GIBBS, Woodville, Allegheny Co., Pa.

**WANTED**—Young man with some knowledge of rose growing and greenhouse work. State wages wanted with board.  
R., care Am. Florist.

**WANTED**—Carnation grower with some knowledge of steam flitting. Good wages and steady job. Married man offered.  
SCHAFER, 277 Balmoral Ave., Chicago.

**WANTED**—If E. H. Smith, formerly of Macomb, Ill., will send address to 59 Eddy St., Fort Scott, Kan., he will hear something to his advantage.

**WANTED AT ONCE**—A good designer and good salesman; must be of pleasing address, sober and reliable. None other need apply; when answering state experience with reference.  
E. J. BOLANZ, Akron, O.

**WANTED**—Young man for general greenhouse work on commercial place; must be good on design work. Address, with references, age and salary, I R., care Eastern Office Am. Florist, 79 Milk St., Boston, Mass.

**WANTED**—Single man good grower of roses, carnations, 'mums and bedding plants; must be sober and honest; wages, \$30 per month, room and board. References required. Address  
NICHOLAS AMOS, Crestline, O.

Pittsburg.

LENT MORE ACTIVE THAN IN PREVIOUS YEARS.—GENERAL SATISFACTION AT TRADE CONDITIONS—CARNATIONS ARE SCARCE.—A VARIETY OF LOCAL NOTES OF BUSINESS AND OTHER DOINGS.

I do not think that Lent, with its customary business depression, has aroused the slightest discontent, for the Pittsburg and Allegheny florists have no reason to complain over the general condition of trade for the past season. Business activity in all lines has been great this winter, and it is fair to presume that the florists derived their share of the benefits. Some good roses are coming in, principally Brides and Bridesmaids. Meteors are small but of good color. American Beauties are scarce and not generally in demand. Sweet peas, marguerites and snapdragons are coming in very nicely and violets are fair, but the market is weak. Some azaleas have made their appearance in the stores, but are nothing extraordinary. Carnations have been fine. Goethe, Lawson and Prosperity are holding their own as to quality. Cheaper carnations are very scarce. We have no trouble disposing of the good ones, as they bring good prices and sell themselves.

A part of the business districts of the cities of Pittsburg and Allegheny suffered very greatly from the effects of the recent flood. During the flood Mrs. E. A. Williams could reach her place only by skiff or wagon. L. I. Neff, the Pittsburg Cut Flower Company and Breitenstein & Flemm, who are further up town, escaped with flooded cellars.

Blind Brothers have been sending in some fine Brides and Bridesmaids. I understand they intend erecting some new houses, growing roses and carnations only. Conrad Blind was the founder of the above establishment. He has retired from active business and is succeeded by his sons.

The Pittsburg Rose & Carnation Company, located at Bakestown, eighteen miles from Pittsburg, is meeting with excellent success and the present condition of the plants indicates that Mr. Burki's desire for quality will be realized to a very great extent.

Walter Carney, lately with the Pittsburg Cut Flower Company, has assumed the direction of L. I. Neff's new store at Homestead, Pa. Homestead is a busy town and there is no doubt but what Mr. Neff and Mr. Carney have made a good move.

James B. Murdock, of J. B. Murdock & Company, informs me that he is preparing to erect some new houses on a large place recently purchased near Washington, Pa. Mr. Murdock expects these houses to be the most complete in Pennsylvania.

Frank Schorn, of A. M. Murdock's, is the father of the finest five-months-old boy in Pittsburg, for none of the other florists has a five-months-old baby and there is therefore none to dispute.

E. L. M.

GIBSON CITY, ILL.—The Swan Peterson Floral Company has its place in good shape, with good crops and a brisk business.

MECHANICSBURG, O.—S. L. Harper is planning to rebuild his range of 5,000 feet of glass this spring, using iron posts and gutters.

PEORIA, ILL.—Fire which on March 11 completely destroyed the printing establishment of B. F. Brown & Company, brought loss to J. C. Murray, whose catalogue was in the hands of the printers.

**THE SEED TRADE.**

**AMERICAN SEED TRADE ASSOCIATION.**

J. E. NORTHERUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
Twentieth annual convention, Twin Cities, Minn., June, 1902.

**VISITED CHICAGO.**—John Lewis Childs, Floral Park, N. Y., enroute to California.

It is reported that English pea growers are soliciting contracts from American seedsmen.

**NEW YORK.**—P. J. Van Heiningen is in the city in the interests of J. Van Reisen & Son, Haarlem, and P. Loet Az. & Co., Boskoop, Holland.

A LIST of the "American Varieties of Peppers," by W. W. Tracy, has been issued by the Department of Agriculture. It will be useful to seedsmen and growers.

**W. F. JAGGERS**, of Westhampton, Long Island, just returned from Bermuda, reports lilies looking very well, though late. Stephens Bros' stock showed most and earliest flowers at that time.

**LA CROSSE, Wis**—One of the largest timber deals ever consummated here was closed March 22, when Henry A. Salzer purchased half a billion feet of standing timber located in the state of Oregon.

**ALFALFA** is attracting constantly increasing attention as a fodder crop for the bottom lands in Iowa. Twenty pounds are sown to the acre and it should not be pastured the first season. Afterward two good crops can be grown each year.

**D. M. FERRY** has purchased a twenty-acre tract of land adjoining the athletic field of the University of Michigan and deeded it to the big Ann Arbor school. It is said to be one of the most valuable individual donations the University has ever received.

**FIVE** sturdy Hollanders, who looked more like army officers than peaceful gardeners, but who claimed to be bulb growers, says the *New York Sun*, spent the latter part of a night in the police station for seeing New York by lamp-light. The judge next morning let them off with a reprimand.

**The State of Trade.**

**Iowa Seed Company, Des Moines, Ia.**—Advertising is bringing good returns this season.

**W. W. Rawson & Company, Boston.**—So far we think our mail and counter trade shows a decided increase over that of last year.

**Livingston Seed Company, Columbus, O.**—We were quite late with our catalogue this season and they were nearly all mailed out at the same time. This fact, together with the very mild weather we have had for the past two weeks, has given us a rush of orders, just at this time. We have not had time to make any comparisons with previous years. Our impression, however, is that the season, as a whole, will be a very successful one.

**L. L. May & Co., St. Paul.**—Catalogue mail trade showed an increase for January of sixty per cent over last year, for February eight per cent increase and so far in March about twenty per cent. The extremely mild weather in March may account for part of the increase but this is partially offset at least by the smaller

number of books sent out. At the present rate the season should show from twenty to twenty-five per cent increase in sales. It is too early to say much about counter sales in this section, as they do not begin until April.

**More Bad Lily Bulbs.**  
"NO BOTS AT ALL."

Seedsmen and bulb importers generally are well hardened with complaints on lilies forced the past winter. We have been favored with a copy of a quaint but forcible one, which we give verbatim below:

I am not satisfieit with them Bulbs you send me last Fall Special them Easter Lillie. I kan not get one in Blum the only a bot 3 inches heih and mostli no Bots at all if the thos Blum. that bin about July. I Baid you for 35 good Bulbi (Bermuda Longi's) that would du me more good nau than 1000 from the oder one (Jap. Longi's) you dit send me 85 but the not worth a cent.

I tell you if you dont mack them Lillies good, what I mean if you dont send me a Box of Easter Lillie I not take a oder Bulb or Seed from you.

Easter is time for a Florist wher his oht tu mak of you Dollar nau I set hier with nothing, you know that I hop I hear from you so soon as possible all I want to know yu send me a Box Lillies or not.

BAUMGARTNER.

**Alleged Cross Between Bean and Pea.**

**W. Smythe** sends us two seeds of a dwarf bean (phaseolus), and one seed of an alleged cross between the bean and a pea (pisum). We must not say that such a bi-generic cross is beyond the range of possibility, but the probabilities are that some oversight has occurred. In any case the supposed hybrid seed is very curious. The seeds of the bean are about 12 mill. long, 8 mill. wide, compressed from side to side, oblong, obtuse at both ends,

slightly kidney-shaped, chestnut-brown, shining, with a white, oblong, roundish scar or hilum, about 4 mill. long, partly surrounded by a blackish ring. The alleged hybrid seed is 11 mill. long, 9 mill. lat., greenish-yellow, oblong-ovoid, obtuse at each end, neither flattened nor kidney-shaped. The hilum is white, oblong, not surrounded by a deeper-colored ring.—*Gardener's Chronicle.*

**Hot Water Cure for Bulb Mites.**

**G. S. Saunders**, in reporting upon the richardia corms sent to a meeting of the Royal Horticultural Society's scientific committee, says that the corms were attacked by one of the "bulb mites", probably *Rhizoglyphus echinopus*; it is a very difficult pest to deal with. Water at a temperature of 115° Fah. will kill them. I should add four ounces of sulphide of potassium to every quart of water and allow the bulbs to remain in the mixture for ten minutes or a quarter of an hour. I do not imagine it would injure them in any way, the injury does not seem to have gone very far below the surface, so that it might be well to cut out the injured portion before putting them into the warm water. I should be very careful not to allow any of the earth in which such plants were grown to get upon the potting-bench, or any uncontaminated soil.—*Gardener's Magazine.*

**FLORAL PARK, N. Y**—Jerome J. Leahy, with J. R. Fuller & Co., has been seriously ill for several weeks.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
 GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
 Twenty-seventh annual convention, Milwaukee,  
 Wis., June, 1902.

PROF. J. L. BUDD, formerly of the Iowa Agricultural College at Ames, is now at San Antonio, Tex.

IRVIN INGELS, nurseryman, at La Fayette, Ill., is conducting a horticultural department in the News, published at Toulon, Ill.

AMONG desirable lawn trees there are few against which there is not a word to be said; one of these is the silver-leaved linden, *Tilia Europaea argentea*.

THE Wichita Nursery Company, of Wichita, Kans., has booked an order for 10,000 fruit trees for the Pecos Valley Orchard Company, at Roswell, N. M.

THE greatest objection to the oak as a lawn or avenue tree is its reputed slow growth, which is a libel, for they keep pace with most other species. The demand is now well up to the supply.

THE Fremont County Fruit Growers' and Dealers' Association has been incorporated at Canon City, Col., with capital stock of \$10,000. The president is John Dalziel and the secretary J. W. Work.

### The Age of Trees.

It is stated in the *Revue Horticole* that a carefully conducted series of experiments has demonstrated that it is possible to cause a branch of a tree or shrub to produce several rings in its wood in one season. It was found that checking the growth by pinching or shortening the branch resulted in the production of two rings in the wood instead of one and that by careful timing of a repetition of the operation several rings could be produced in one season. As, however, the extra rings are produced only under special and abnormal conditions these variations are not likely to occur commonly in nature and the method of determining the age of a large tree by counting the rings can be considered reasonably accurate.

### New England Park Superintendents.

The executive committee of the Association of New England Park Superintendents met at Boston on Thursday, March 27, and selected June 20 and 21 as the time of the next annual meeting of the society to be held at Boston. J. A. Pettigrew, H. E. Whiting and J. F. Shea were appointed a committee on arrangements. There were present Superintendents A. W. Smith, Portland; J. D. Fitts, Providence; Theodore Wirth, Hartford; W. H. Richardson, Concord, N. H.; H. E. Whiting, Cambridge; Wm. Jordan and G. E. Raymond, Portland park commissioners; also President J. A. Pettigrew, of Boston, and Secretary G. A. Parker, of Hartford. The party spent an enjoyable evening as the guests at the dinner of the Boston Horticultural Club.

### Moth Traps.

L. A. Goodman, secretary of the Missouri State Horticultural Society, has rendered horticulture a substantial service in collecting and publishing the opinions of experts with regard to the moth traps placed upon the market and extravagantly lauded by the inventor

some time ago. In a prefatory note Mr. Goodman says:

"I have taken pains to get all the information possible on this subject so that there need be no further question as to its failure. Facts are what we want, and when our best scientists give us such an abundance of proof for their statements we should believe their conclusions. There seems to be no end to the proof here given that for the orchardist or fruit grower, the moth traps are not only worthless, but really a detriment. We ought to learn from the experience of others and profit by it, and not go to the expense of all these experiments ourselves. I have given the names and words of our best entomologists, and the refutation of those who have either been misquoted or only partially quoted. We are sure that moth traps will not catch codling moth, curculios, gougers, flat or round-headed borers, peach borers, canker worm moth, and that they can never take the place of spraying. It is a waste of money to buy these 'traps,' and you should be convinced by the following list of names and experiments."

Prof. Lockhead, of the University of Ontario, Canada, states: "The inventor of this trap-lantern moth-catcher boasts that he has sold over 40,000 during the past season. If all these were in operation for four months, probably forty millions of decidedly beneficial insects were captured and destroyed."

Copies of the pamphlet can no doubt be had on application to Secretary L. A. Goodman, 4,000 Warwick boulevard, Kansas City, Mo.

### Kansas City.

TRADE CONDITIONS VERY SATISFACTORY.—  
 LENTEN SEASON A PROFITABLE ONE.—  
 FINE PROSPECTS FOR AUTUMN SHOW.

Trade conditions are very good here, there being an active demand through Lent, right up to the beginning of a splendid Easter business. Stock in general is looking good, but of course the local production of cut flowers is not anywhere equal to the demand and large supplies are being obtained from Chicago and other wholesale centers. In general, the experience of lily forcers here has been that of most of the other growers. A large proportion of the bulbs failed to give the results which the growers had a right to expect.

John Thorpe has been here from Chi-

cago looking up flower show matters for November 3 to 10. He and Director General Taggart are very enthusiastic for the prospects of this year's show. Arrangements are being made whereby the cash premiums to be awarded will amount to \$7,500 as against \$4,300 last year. Mr. Thorpe says that all the growers from whom he has heard are with him in this matter, and that there will be no difficulty in getting all the exhibits necessary for the best show ever held in the country.

### Newark, O.

GROWERS HAVE GOOD CUTS FOR EASTER BUT DEMAND PROMISES TO EXCEED SUPPLY.—CATALOGUE AND WHOLESALE TRADE ALSO HEAVY.

Although there is an abundance of stock in sight it is doubtful if it will suffice to go the rounds and Chicago is likely to be drawn upon, for carnations especially, for Easter. George L. Miller has his lilies in fine condition. His hyacinths, tulips, Paper Whites and Von Sions are likewise choice. Carnations and roses look well, but there are not enough of either to meet the heavy demand. It is Mr. Miller's intention to increase his facilities for growing carnations. His catalogue or mail trade this season has been heavy, surpassing his most sanguine expectations. Orders from Oklahoma, Indian Territory and New Mexico, as well as from nearer points, keep his staff quite busy. His wholesale trade has likewise increased in volume and, taken all in all, Mr. Miller has all he can possibly attend to.

At Baldwin's place things, as usual, look trim and well. Carnations and roses were never in finer condition and bulbous stock is all that could be desired. The Boston fern is one of Mr. Baldwin's specialties and these he grows in quantity for the wholesale market, one of the largest houses on the place being given to their cultivation. Wittboldii is also grown in quantity and from the numerous inquiries and orders he is receiving, one may infer that this meritorious variety is becoming more and more popular. Mr. Baldwin contemplates making some additions to his place this season.

NOMIS.

MARIETTA, O.—J. W. Smith reports Easter prospects fine. He has a good stock of lilies.

## Rhododendron Maximum and Kalmia Latifolia

The two best native Evergreen Shrubs for out-of-door ornamentation. Furnished by car load lots or in smaller quantities. Send for prices, also Special Rhododendron circulars. VINCA MINOR—10,000 3-inch clumps for sale cheap. Fine lot of general nursery stock.

Toronto.

EVERY INDICATION OF A RECORD EASTER. —PLANTS ARE PLENTIFUL BUT CUT FLOWERS WILL BE SCARCE—LILIES AVAILABLE IN LARGE QUANTITIES.—VARIOUS NOTES.

Not for many years has there been a better outlook for Easter than at present. The weather has been most favorable and should it continue so we undoubtedly will have a record business. Flowering plants were never more plentiful than at present and from the quantities of lilies, if all are sold the growers will be fortunate indeed. Already quantities are quoted at very low figures and when the loss from disease is figured in, there can be little margin. Some very good plants are seen about the different stores. Bougainvillea Sanderi, hydrangeas, both pink and pale blue; azaleas, rhododendrons, lilacs and most of the old favorite plants help to make the stores look gay. Crimson Ramblers are possibly the only variety that will be too late, and of these there are hardly a half dozen in the city. The supply of roses will not be so plentiful. For the last two weeks the demand has been so

good that there was no chance to save up and no doubt this will make the market very short. Carnations are about the same and all good flowers will find ready sale. In bulbous stock there are enormous quantities everywhere and the prices have been cut up so badly that the good customers mostly fight shy of them. This condition is due to a few growers who would rather sell to department stores than give the retailer a chance.

The regular monthly meeting of the Florists' and Gardeners' Association was held in St. George's Hall, the session being occupied with business and the rearrangement of the prize list for the chrysanthemum show which will take place the second week of November. After the usual business cards were indulged in and refreshments served.

Some of the spiræas have not done well this season, the foliage being very poor and turning brown at the edges, but some of the men are adept with the shears and they soon look as trim as the Dutchmen's palms. H. G. D.

St. Louis.

EVERY PROSPECT FOR A BIG EASTER BUSINESS.—FAVORABLE WEATHER FOR CROPS —CLUB HOLDS A ROSE SHOW.—NOTES OF DOINGS WITH THE GROWERS AND OTHERS.—INSECTS INFEST MANY PLACES.

The outlook at present is that there will be enough stock at hand for Easter if the present good weather holds. Roses are coming in very fast, but are not of the best quality. The Easter prices are in the neighborhood of \$8 to \$10. A few Beauties are to be had at from \$1.50 to \$6 per dozen, while carnations bring from \$2.50 to \$6 per hundred. There is quite a shortage at present in whites, in both roses and carnations, which is partly due to the large amount of funeral work. Violets were coming in very slow for a time, as most of those planted in the houses have stopped blooming, but the last few days have been very warm here, so that plants in cold frames are coming on very fast and several of the growers are striking it just right. Bulbous stock is looking nice for Easter and prices are fair. Mr. Gross, of Kirkwood, is cutting a splendid sweet pea which he calls Earliest of All White. It sells at \$1.50 per hundred.

The rose show which was held at the last meeting of the club was not as good as the carnation show at the February meeting. J. F. Ammann, of Edwardsville, exhibited as fine a vase of mixed roses as has ever been before the club. Mr. Halstead, of Belleville, had a very fine vase of carnations, which contained several of the leading varieties. Special notice was taken of his new white seedling, which is very fine. From the outlook of things it is hardly probable that a flower show will be held by the club this fall, but we will be ready to help anyone who wishes to undertake this work. A very interesting paper on roses was read by F. J. Fillmore.

The St. Louis Carnation Company is sending in about 3,000 carnations daily, but they do not expect much increase for the Easter trade. Last year they had a fall crop on for Easter but it will come about three weeks late this year. They have been sending in several thousand sweet peas, but this has dropped to the hundreds now and the plants are making good second growth. They had some peas in a very light house and some in one of their old houses, which is very dark. In the former they started to cut

very early and have kept it up, but in the latter the vines have made good growth and very few blooms.

Wm. Winter has just finished planting his two fine new houses with sweet peas. His carnations are looking fine, especially his Ethel Crocker, Joost, Crane and Lord. The latter he has in solid beds, and some magnificent flowers is the result. He has some 20,000 young plants that are looking fine.

Mr. Ude, Sr., will be the best off of any of the Kirkwood growers as far as violets are concerned, as he has a large number in cold frames and they will be in their height of blooming at Easter.

The Gross Floral Company has a fine looking lot of carnations, especially Mrs. Lippincott and Prosperity. They are growing some of the finest sweet peas that have been seen in this city.

Mr. Hutchins, at Kirkwood, is having quite a bit of trouble at present with aphid and thrip, but through it all he is turning out some very good blooms.

The Michel Plant and Bulb company has had some fine calla lilies and Dutch hydrangeas in pots, but all are sold, as is also most of the blooming stock.

Fred. Meinhardt's stock is reported as coming in fine. He expects to have about seventy-five per cent of his lilies in for Easter Sunday.

H. Ude's place looks nice but thrips got so bad in some parts of his place that he has planted sweet peas between the rows.

Robert Tesson says that he has a fine lot of spiræas in bloom, but his Harrisii are not very good.

Fred. Ude has just finished putting up a new boiler shed and intends to put up two new houses. R. J. M.

SYRACUSE, N. Y.—Harry Bellamy, the widely known and popular foreman for L. E. Marquisee, has the sincere sympathy of his entire acquaintanceship in the loss of his wife.

Youngstown, O.

STORY OF A VISIT TO A POPULAR FIRM.—  
GOOD STOCK IN THE GREENHOUSES AND  
A NICE BUSINESS AT THE STORE.—A  
PURCHASE TO ENLARGE FACILITIES.

The writer recently dropped down to Youngstown to see how the ex-Philadelphians, Walker & McLean, are getting along and found, as he expected, everything in good shape for a big Easter trade. On the strength of the increase of their business they have acquired more property, having recently purchased the greenhouses and ground lately owned by the firm of Hood & Cox, situated a few miles from Youngstown. The property consists of fifteen acres of land with four greenhouses, which were built last year and are practically new, about 10,000 feet in all. All the stock, consisting of plants, implements, wagons, two horses and a cow, were included in the deal. It is their intention to tear down and re-erect the houses on their Crabb Creek grounds, which will add materially to their facilities. The "farm," as they call it, will in all probability be leased out to truckers or farmers.

John Walker is erecting a modern dwelling for himself, a block or so away from the greenhouses, which will be very convenient. Heretofore he has resided in the city. Their stock generally is in good working condition. What are good of their longiflorums are looking fine, about the right height with splendid large trumpets. Their loss has been between twenty-five and thirty per cent. A batch of candidums were a novelty to behold at this season. Mr. Walker reckons they are a little out of the ordinary and may sell well. Several houses are devoted to palms, principally kentias and arecas, in all sizes from seed pans to 6-inch and 8 inch pots. Preparations are being pushed to handle a big line of spring bedding plants, there being quite a demand for that kind of stock.

Thousands of carnations are grown, both for cut flowers and plants to sell. Quite a number of seedlings are being tested with varying degrees of success. There is one, a red variety, which promises to be a good commercial sort if it holds out. A few Grevillea robusta are grown for decorative purposes, which the public seem to appreciate. A house of callas looks well and has been producing a wonderful quantity of blooms. The store end is in the hands of the genial George McLean, who shows the Youngstons how to make a store window look pretty and to manipulate flowers in a way that comes from twenty-five years' experience. He handles a large line of garden and farm seeds as well. It was tough on George at first to get on the right side of the seed business but now he can quote the genealogy of turnips and squash by the hour.

A call upon Mr. Hippard found that gentleman busy with his iron gutter and ventilating apparatus. He says the outlook for a big business this year is very encouraging, orders coming in every day.  
ECHO.

100,000 Pansies.

The Jennings' Strain, extra fine plants, all transplanted, many are fringed and curled, strong plants, \$4.00 per 1000, express; 75c per 100 mail. Large plants \$1.00 per 100, by express only. Stock the finest. Grown in cool houses. Seed, \$1.00 per pkt. Cash.

Los Angeles, Cal.

**FAVORABLE WEATHER CONDITIONS CAUSE CUT FLOWER SUPPLIES TO IMPROVE.—GROWERS TO MOVE.—VARIOUS TRADE NOTES OF INTEREST.**

The warm weather which has followed the rains has produced an abundance of flowers and it looks as though there would be no difficulty in supplying all that may possibly be required for the Easter trade, for which all are making great preparations. Carnations and narcissi are plentiful. There has been a surplus of violets, but the warm weather is shortening the crop. Centaureas and sweet peas are to be had in limited quantity. There has been a good call for ten week stocks while the shortage on carnations lasted and a few very good antirrhinums have found a ready market. Freesias are in their glory and thousands are sold daily.

The real estate boom which has been growing in this city for some months past is causing trouble to nurserymen and florists who are on rented or leased land. The Meserve Nurseries have been obliged to vacate the grounds on Pico Heights and will move the greenhouses to Burnett station, about twenty miles from the city. The property they occupy on Broadway as a sales depot has also been sold and they may be obliged to find another location for that purpose.

Howard & Smith are building another greenhouse, anticipating an increased trade in their new location at Ninth and Olive streets. They are also improving the property recently purchased on Boyle Heights, an almost frostless section of the city.

Fred. Rafferty, of Santa Ana, gives evidence of prosperity, having built an elegant residence adjoining his floral establishment. He reports an unusually heavy wholesale trade.

D. R. Woods, manager of the Woods Floral Company, Wilmington, is making a business trip to San Francisco and vicinity, looking up additional stock in specialties.

W. A. Peschelt, who has spent ten years in building up and beautifying the grounds surrounding the residence of Senator J. P. Jones, has resigned. D. R. W.

OMAHA, NEB.—J. W. and E. E. Arnold have a fine range of greenhouses, two well appointed stores and a prosperous business. They claim that their delivery wagon is the finest operated by any florist in the United States.

**BUSINESS HEAVY AND STOCK ABUNDANT.—WEATHER FAVORABLE.—BIG PROSPECTS FOR EASTER —AN AUCTION —NOTES**

Business is good and flowers plentiful. Fancy carnations are about the only flowers that are a little scarce. Roses, owing to the warm weather, are coming in abundantly. Bulbous stock is plentiful and it will take a good deal of hustling to dispose of all that will come in for Easter. Easter prices went into effect on Monday and by this method the wholesalers are trying to prevent the amount of kicks that are usually in order about a day or two before and after Easter.

The Walnut Hills Floral Bazaar has a fine display of blooming plants arranged very artistically with Porto Rican matting and gauze ribbon. Charley Jones deserves credit for the arrangement and good taste shown in bringing out the different colors.

J. A. Peterson is holding an auction sale of plants this week, having an immense amount of hybrid roses in pots, bulbous stock in pans, azaleas and baskets containing mixed plants. The bidding was quite lively.

Visitors: J. H. Sievers, San Francisco; Messrs. Draper and Clark, Greensburg, Ind.; Wm. G. Matthews, Dayton, O.; Miss Alice Barnes, Springfield, O. D.

Columbus, O.

**EASTER FINDS STOCK IN EXCELLENT SHAPE.—GOOD LILIES.—CARNATIONS IN HEAVY SUPPLY.**

Easter stock is all that could be asked, except that roses are somewhat off crop. Carnations are doing finely, with a large crop on everywhere, but indications are that they will all be taken up for Easter. Lilies are more plentiful than was expected. Harrisii are best; while longiflorum is on time it is disappointing in its number of flowers compared with Harrisii now showing an average of from five to nine flowers. Some good Harrisii were sold on our street market last week at 25 cents per good plant, but that fortunately does not regulate the market price. In the face of the high price paid for Roman hyacinth bulbs last fall there is quite a glut of this stock now, one grower reporting a loss of 8,000 spikes last week on account of overstock. Columbus florists were all very busy this week.

BURKI HAS FINE STOCK FOR EASTER.— PIONEER WHOLESALE CUT FLOWER GROWER FOR WESTERN PENNSYLVANIA.

What impresses the visitor upon first approaching Fred. Burki's place is its picturesque location. Situated upon an elevation overlooking the valley for a considerable distance, the thirty-six houses, over 100,000 feet of glass, certainly present an imposing sight. Mr. Burki, I may state at the outset, is the pioneer grower for the wholesale cut flower market in this vicinity. Of the thirty-six houses ten are devoted to carnations, ten to roses and sixteen to bulbous and miscellaneous stock. It would be needless to add that none but the best varieties of carnations are grown. In whites, White Cloud does especially well, with Flora Hill as a close second. In pinks, Lawson and Marquis vie with each other for the palm, both looking remarkably fine and yielding handsome returns. Scott and Frances Joost are still grown in quantity, the latter doing especially well. In scarlets Hector is practically the only one grown thus far, but next season will find Estelle, Crane and Mrs. Potter Palmer on the list, and Adonis as soon as stock can be procured. Prosperity does not pay for the room given it. With some florists it proves an adversity rather than prosperity. An addition to the pink varieties will be the Nelson. Mr. Burki has tested twenty-five plants and he finds it good.

Nor is he less successful with his roses and there will be a fine crop for Easter. Bulbous stock looks fine and lilies, both Harrisii and longiflorum, about 15,000 in number, are in no wise disappointing, the number of crippled or diseased plants being comparatively insignificant. That the lilies will sell goes without saying.

Last season Mr. Burki built two mammoth houses at Bakerstown, about eighteen miles from Pittsburg, especially for American Beauty roses. Two additional houses, each 30x450, will be built this spring. NOMS.

## California Carnations.

Our cuttings are rooted without fire heat and are strong, hardy and well rooted. They are so far superior in every way to cuttings rooted by fire heat that they should not be mentioned in the same connection. We guarantee safe arrival and satisfaction. Per 100 Per 1000

**Garnations, Cannas, Pelargoniums, Etc.** Send for Catalogue.  
**Nathan Smith & Son, Adrain, Mich.**

## IMPATIENS THE QUEEN

This variety we now offer for the first time, it being far ahead of any cheap blooming house plant that we know of. A grand plant for out-of-town florists.

Flowers 1¼ to 1½ inches in diameter, color a delicate satiny pink with bright carmine eye, center of petals faintly tinged with white, wonderfully profuse and of the easiest culture. Price, 2-inch pot plants, \$1.50 per doz.; \$10 00 per 100.

**CENTRAL MICHIGAN NURSERY, Kalamazoo, Mich.**

## Violets My Specialty

Good strong rooted runners of Princess of Wales and La France at \$3 per 1000; \$25 per 10,000; now ready. Also Tree Violets in 2½-in. pots and 8 to 12 inches high, ready May 1st, at \$5 per 100. Orders booked now. Cash with order.

WEATHER MOST FAVORABLE TO STOCK.—CHEAP TRADE BARRED FROM EASTER COMPETITION.—BUSINESS IN GOOD HANDS.

The weather for the past few weeks has been so favorable that there seems to be an abundance of flowers of all kinds, and the florists' windows are radiant with bloom. Some of the finest Bride and Bridesmaid roses ever produced for any market are being shown here now, Joy & Son showing some that are enormous in size, as well as perfect in shape. Violets have been somewhat more abundant, and splendid specimens of carnations are also grown. Dealers are looking forward to a splendid Easter trade. There is a fine lot of lilies on the market. The very early season cuts off the outdoor supply and the trade has nothing to fear from cheap competition.

Since the retirement of Currey & Company from business there is very much less competition, and the Joy & Son Company has matters pretty much its own way. The latter firm, which bought out Currey & Company, has torn down the greater part of the range of greenhouses, leaving only a few rose houses, which are at present producing very fine stock. As soon as the rose crop is off these, too, will be removed. Mrs. C. A. Birn, whose store is very near Joy & Son, does a nice retail cut flower business but makes no effort at growing.

Geny Brothers are enterprising young men, and have a beautiful store in the Lnlane Hotel building. They are great successs with violets, carnations and chrysanthemums, which are their specialties. They have a fine supply of Easter lilies. They grow no roses and handle very few palms. They have succeeded very well since opening an up-town store, and have been growers for many years.

There are numerous small growers here but these can hardly be said to enter into competition in the general and regular trade.

M. C. DORRIS.

CORTLAND, N. Y.—Messrs. Hopkins say that their season's addition will be about 5,000 feet of glass to their present range of 10,000 square feet.

SOUTH WEYMOUTH, MASS.—George Hollis has been raising seedling pæonias for some time and reports that he now has some promising varieties.

## SPECIAL April OFFER GERANIUMS.

BIG NURSERY A HIVE OF INDUSTRY AT THIS SEASON. — GREENHOUSE DEPARTMENT SHOWS BIG STOCK.—MANY BRANCHES OF THIS WONDERFUL BUSINESS.

A visit to the Storrs & Harrison Company is at all times interesting but most so at this season of the year, when spring shipping is in progress. The various departments are veritable hives of industry. Hundreds of men, women and boys are employed in one way or another. A look through their houses shows the plants for spring sales to be in superb condition. The endless variety that goes to make up a plant catalogue list would well nigh bewilder one. There are houses filled with geraniums, some with fuchsias, others with begonias and so on down the list, the majority of the plants being grown in 2-inch pots. A house well worthy of a good look was one filled with 44,000 Crimson Ramblers in 2-inch pots, summer struck cuttings, kept in a semi-dormant state through the winter and allowed to come along gradually with the spring. These are for planting out for own root stock, for those who prefer this kind to the grafted article.

The stock of palms, ficuses and dracaenas is looking well, but according to Robert George the demand for palms has slacked up somewhat. Several houses of hybrid roses in pots are being forced for cuttings. One crop of 100,000 has been taken off and rooted. Hybrids are much easier to root at this season of the year than in summer. A glance into one of the propagating houses proved this fact conclusively. A bench with over 50,000 were ready for potting without the sign of a yellow leaf. Mr. George says the loss is not over two per cent.

A look through the cold-storage plant is interesting and makes one wonder where such an immense number of trees and shrubs go to. Hundreds of thousands are stored away for spring delivery; 400,000 feet of lumber is consumed in the manufacture of packing cases for shipping purposes. All the boxes and packing cases are made by their own carpenters on the place. In another room a number of men and boys are employed in grafting fruit trees, and the rapidity with which this work is performed was a revelation. Off in one corner of this room two harness makers are busy making new harnesses and repairing old ones, this work also being done by their own men. In the seed department everybody is busy weighing seed, filling bags and packing orders, perfect order prevailing throughout the entire establishment.

The business so far this season is in advance of last year, which was conceded to be the banner year. ECHO.

PHILLIPSBURG, PA.—Bloom & Schnltz have opened a flower store at 39 South Main street.

Providence, R. I.

STATE HORTICULTURAL SOCIETY ENJOYING A PERIOD OF GREAT PROSPERITY—A LONG AND HONORABLE CAREER.

The Rhode Island Horticultural Society is having quite a boom. The newly elected president, Prof. W. Whitman Bailey, is very popular and his lectures and talks are interesting a large number of people, such as any society might feel proud of, and its membership has materially increased. Dr Bailey is professor of botany at Brown University and has an extensive knowledge of the flora of the country and the world. At a recent meeting of the society he exhibited about 400 plates representing the flora of the Philippines and spent a pleasant hour in giving partial histories of the flowers represented in the collection. The society is now in a prosperous condition. It is entirely free from debt and by the generosity of a friend, lately deceased, it has an invested fund. It also has the distinction, since the death of the distinguished and venerable secretary of the Massachusetts Horticultural Society, of having the oldest secretary in point of age and continuous service of any like society in New England, C. W. Smith having served fourteen years and is now serving his fifteenth year. It also has a distinguished roll of members, embracing senators and representatives in congress, judges and governors, representatives of the legal, ministerial and medical fraternity, president of and professors in colleges, business men and teachers, together with some of the brightest florists in the state. The society has had an honorable career and has had great influence in cultivating the public taste for the beautiful in nature. It holds regular monthly meetings at which subjects in the line of horticulture are discussed, and also gives several exhibitions during the year. It is not so fortunate as the Massachusetts Horticultural Society or the Worcester County Society, in having a hall of its own, but it is striving for that end. W.

PETOSKEY, MICH.—S J Long has opened a flower and candy store in the Cushman House annex.

MISSOULA, MONT.—The Missoula Nurseries, with over 50,000 feet of glass, are building two additional houses to meet the requirements of a steadily increasing business.

## The Easter Trade.

CAREFUL estimate of the business over the whole country would put the increase in Easter sales at twenty per cent above last year, although bad weather was a deterrent in many places. It is noticeable that the few shortages were purely local. There was enough stock in the country at large, both cut flowers and blooming plants. The prosperous condition of the people afforded the opportunity for slightly increased prices as compared with recent Easters, but that there is a sharply defined price line above which trade ceases to be active was again clearly demonstrated, particularly by the experience with lilies.

As to blooming plants, more were sold than ever before, lilies leading as of old, but azaleas were well cleaned up, although the supply was very heavy. Medium priced plants were most salable; only in large cities did the big specimens move well. But in the cities and the provinces, alike, bulbous material was slow until it became a case of Hobson's choice.

Violets were in excellent favor but it was the carnation which was most called for; the lily does best with the pot. The Beauty was the leader, but there were enough roses for all, if not locally, in wholesale markets, also practically every other item.

It is worthy of note that those storekeepers who are in step with the times found a nice profit in the use of baskets, pot coverings and other accessories. A number of Easter reports are presented herewith:

**BRATTLEBORO, VT.**—C. E. Allen says the Easter business was very satisfactory, with large supplies well cleaned up.

**DUBUQUE, IA.**—W. A. Harkett reports Easter a little ahead of last year, with increased call for medium priced flowering plants.

**ROCKFORD, ILL.**—Easter was about as last year, with enough cut flowers, also enough plants except lilies. Everything sold well, says C. W. Johnson.

**NEW ALBANY, IND.**—Easter trade was the best on record; everything sold out clean by Saturday night. A Rasmussen says prices were better than last year.

**BRIDGEPORT, CONN.**—There were plenty of flowering plants, plenty of violets and roses but a shortage in pinks. Horans estimate the increase in business at forty per cent.

**YORK, PA.**—Jacob Reeser says that the value of Easter sales was a little ahead of last year, and so were prices, but he could have done much more had he had the stock.

**WATERVILLE, ME.**—H. R. Mitchell says there was enough stock in all lines and a good percentage of increase. The greatest demand was for lilies and less call for other potted plants.

**DIXON, ILL.**—O. L. Baird says Easter made a new record even though there were no lilies. All flowering plants were cleaned up and all good cut flowers, including bulbous stock.

**PARKERSBURG, W. VA.**—The Easter plant sales broke all records and cut flowers were not behind. Gus Obermeyer found lilies most salable. All stock was well cleaned out.

**EVANSVILLE, IND.**—There was a little shortage on roses and carnations, all cut flowers being cleaned up. Primulas and cinerarias are reported the least salable plants by J. H. Wade & Co.

**HAMILTON, ONT.**—E. G. Brown says the business was about as usual. There was a shortage in all lines of cut flowers, but enough plants except lilies. Bulbous stock was the last to move.

**JACKSON, MISS.**—W. J. Brown finds cut flower trade on the increase; it was thirty per cent ahead of last Easter. Supplies have to come from Chicago. Roses and carnations are the best sellers.

**LINCOLN, ILL.**—W. H. Gullett & Sons say Easter trade was ten per cent ahead of last year, with plenty of everything. Lilies and pans of Dutch bulbs were most salable, carnations being the popular cut flower.

GRAND ISLAND, NEB.—Supply was large but demand about cleaned it up and Brewster & Williams report ten per cent increase in sales. Carnations led the selling, bulbous stock hanging fire.

NEW BRIGHTON, PA.—August Meyer says his Easter trade was fifty per cent heavier than a year ago. He sold out on all blooming plants and on all cut flowers without fully satisfying the demand.

UTICA, N. Y.—Wm. Mathews says that poor stock was not wanted but that good bulbous material sold well and the only shortage was on carnations. Business increased about fifteen per cent.

CONCORD, N. H.—M. M. Colby says trade was from five to ten per cent heavier than last year, prices about as usual. White azaleas short. Cut flowers a little under demand. Lilies most called for.

CHATTANOOGA, TENN.—Carnations were rather more in demand than anything else. Mrs. J. W. Crouch says there were enough plants but not enough cut flowers. Trade was fully forty per cent ahead of last year.

LIBERTY, MO.—Paul Stark says Easter trade was the best on record. What it would have been had the weather not been cold and stormy, it is hard to tell. Everything sold well except hyacinths, of which many are left.

GRAND RAPIDS, MICH.—Crabb & Hunter say abundant supplies permitted a twenty-five per cent increase without big prices. There was some bulbous stock and a few azaleas left. Beauties were the only shortage.

LANCASTER, PA.—Easter business increased ten per cent, largely accounted for by better prices. There was a shortage of stock all around. The best selling item was last year's carnation novelties, according to Albert M. Herr.

TOPEKA, KANS.—James Hayes found Easter about as last year. Lilies were the shortage in plants, although spiræas and cinerarias also sold briskly. Carnations were the cut flower shortage. Bulbous stock was almost a dead loss.

BLOOMINGTON, ILL.—J. D. Robinson says stock was better in quality than last year, with enough of both cut flowers and plants. Trade showed little increase. Lilies headed plant sales and carnations were the popular cut flower.

PITTSFIELD, MASS.—John White says all good stock was disposed of readily, but poor material was left over, there being sufficient of everything except pot lilies, and carnations and violets, to do a business twenty-five per cent larger than a year ago.

QUINCY, ILL.—Gentemann Brothers say this city never experienced such demand for cut flowers and potted plants at Easter. Everything sold out at better prices than usual. The aggregate of sales was at least twenty per cent ahead of last year.

NEW LONDON, CONN.—There was enough stock in all departments and H. H. Appledorn estimates the increase at twenty-five per cent. There was a big call for lilies, and hyacinths in pots came next. Violets and carnations were the cut flowers wanted.

MEMPHIS, TENN.—The Easter business here was about as last year, although better prices prevailed. Lilies were the only shortage, both as cut flowers and plants. Crimson Ramblers and hydrangeas sold well, also tulips in pans, but spiræas were not salable. In cut flowers, tulips and daffodils moved slowest. The Memphis Floral Company ascribes the lack of increase in business to the bad weather which prevailed during the whole week, the trade coming the last two days.

PROVIDENCE, R. I.—W. E. Chappell notes many deterrent factors, including bad weather and all sorts of stores handling plants at low prices, but results were a little ahead of last year. Cut flowers were plentiful, but more plants could have been moved.

LAWRENCE, MASS.—Sales were fifty per cent ahead of last year, with prices a little better. There were enough cut flowers but a shortage on flowering plants. Azaleas were wanted but bulbous stock sold slowly except lily plants. Pinks and violets went well.

DAVENPORT, IA.—There were enough cut flowers for Easter and enough of all plants except azaleas and Harrisii, of which a few more could have been used. Everything sold briskly and John T. Temple thinks the increase for the week about ten per cent over last year.

SAVANNAH, ILL.—J. Y. Lambert says Easter business was fully two-fifths greater than last year, mostly on cut flowers. White carnations and callas were the best sellers. Lilies were an aggravation, at least those bought in wholesale markets, poor and high priced.

MONTGOMERY, ALA.—W. B. Paterson says trade is steadily increasing; it was fifty per cent ahead of last year, with enough plants and a shortage of cut flowers. Azaleas were least called for and in cut flowers bulbous stock was little wanted, carnations most in demand.

ERIE, PA.—Easter of 1902 was the best we have ever had. Everyone cleaned out everything that was salable. S. Alfred Baur represents the increase to be twenty-five per cent. Supplies were ample, but well cleaned up. Azaleas and lilies took the lead in plants and all cut flowers sold well.

NASHVILLE, TENN.—Gony Brothers report an increase of thirty-five per cent, with large supplies in all lines, but everything well cleaned up. In plants, azaleas and lilies were wanted, in cut flowers, roses, carnations and violets, with bulbous stock doing fairly well, both in pots and cut.

PEORIA, ILL.—J. C. Murray says Easter business increases each year and this time it was nearly all spot cash, with better prices, especially on cut flowers. There was a shortage of lilies and all cut flowers sold out clean. All kinds of plants moved well, but bulbous stock was slow to move.

CAMDEN, N. J.—There was a good increase in the Easter business, C. W. Turnley estimating it at one-third. There were enough cut flowers, although all sold well, and enough plants with most dealers. Flowering material all sold briskly but decorative stock was not wanted.

PORTLAND, ME.—J. A. Dirwanger takes a pessimistic view of the situation. He thinks trade fell off fifteen per cent and says that there was enough stock left over to supply such another Easter demand. Even lilies were over-stocked. He gives no explanation for this unexampled state of affairs.

ST. PAUL, MINN.—Christ Haasen says Easter prices were rather better than a year ago and trade increased ten per cent. He says there were ample supplies of plants, except lilies, and enough roses, but not enough carnations. Lilies were most in demand among plants, but everything moved off well.

VIEW IN THE STORE OF E. WIENHOEBER, CHICAGO.

OMAHA, NEB.—Easter trade was good and on Saturday nearly all plants and cut flowers were cleaned up, but Sunday was disagreeable and little doing. S. B. Stewart estimates the increase as ten per cent, with prices a little higher than usual. There were about enough cut flowers, but more blooming plants might have been sold to advantage.

MITCHELL, S. D.—E. C. Newbury says that disagreeable weather kept trade down to about the level of last year; otherwise it would have been a record-breaker. There was enough stock in all lines, with good demand for blooming plants and none at all for palms and ferns. Lilies, carnations and roses were wanted, with no call for bulbous stock.

A GROUP OF EASTER PLANTS IN THE STORE OF ERNST WIENHOEBER, CHICAGO.

**GALESBURG, ILL.**—Easter trade was very satisfactory, certainly larger than last year and probably heavier than ever before. There were ample stocks of cut material, all home grown. Lilies were the only shortage among pot plants and I. L. Pillsbury says there were roses and carnations left unsold.

**LINCOLN, NEB.**—Trade was excellent, possibly ten per cent ahead of a year ago. There were enough plants, except lilies, and enough cut flowers, except carnations. Everything sold out clean, daffodils and spiræas being the only items which dragged. Delivery was difficult because of high winds.

**FALL RIVER, MASS.**—Easter was about as last year. C. Warburton says lilies in pots were short of the demand, but that other bulbous plants were in over-supply. Supplies of cut flowers were about right. Lilies and azaleas lead the call for plants, and violets, lilies, roses and pinks were preferred of cut flowers.

**AURORA, ILL.**—J. M. Smely says that more new faces were seen than at any previous holiday, people who bought their first flowers, and the old customers paid more cheerfully. The increase in sales was about fifteen per cent. The only shortage of plants was on lilies, which were greatly in demand, with azaleas next. Of cheaper plants, hyacinths and double tulips lead. Carnations and roses were short of the requirements. Cut tulips could not be moved.

**JACKSONVILLE, ILL.**—Jos. Heintz says that trade was one-fifth heavier than a year ago, with enough plants for the demand and some cut flowers to ship to the wholesale markets. Lilies and cinerarias were most in demand among plants, and roses, lilies, violets and carnations among cut flowers.

**ST. JOSEPH, MO.**—L. J. Stuppy says bulb pans, azaleas and plant baskets sold best. In general stock was enough to meet demands in both plants and cut flowers, violets and Beantles being about the only shortage. All good lilies sold, but the cripples were left. Trade increased considerably, probably thirty-five per cent.

**NEW HAVEN, CONN.**—The Robert Veitch Company notices an increased demand for genistas, crocuses in pans, white and blush hyacinths and everything in white or light colors. Bright-colored material sold slowly. There was an over-supply of roses. Sales increased about one-fifth, but prices were lower, if anything.

**OLEAN, N. Y.**—Easter was about as usual, with no increase in prices, enough of all plants and more cut flowers than the trade demanded. Mrs. F. H. Johnson says that five florists are too many for so small a city, that one would do nicely and two could take care of all the business, but that with five there is too much price cutting in the scramble for trade.

**NASHUA, N. H.**—August Gaedeke says the weather was all that could be desired and business all that could be attended to. The increase was thirty per cent, with about enough stock to go the rounds, both plants and cut flowers. Genistas would not move, lilies, Ramblers and azaleas wanted. Cut bulbous stock went slowly.

**TORONTO, ONT.**—J. H. Dunlop says the supply of plants was the best in years but the increase in trade used up most of them. There was an over-supply of bulbous stock but a few nicely arranged hampers of red tulips sold well. Pot lilies were the best sellers. Hyacinths in any form were not wanted. Trade increased ten per cent.

**PONTIAC, ILL.**—W. J. Miller says that last year he sold 600 carnation blooms at Easter and this year 1,200, but that does not fairly represent the business, for the general increase was not more than fifty per cent, with prices probably ten per cent higher than last year. There was enough of everything except lilies, both cut and in pots.

**HARRISBURG, PA.**—G. Hanson says business increased twenty to twenty-five per cent, with prices a little better than last year, although there were enough cut flowers and some plants left over all around. Hyacinths and azaleas sold best of plants, tulips and lilies being in least demand. Violets were wanted, but carnations and roses went slow.

ELMIRA, N. Y.—Easter prices were a little better than a year ago and H. N. Hoffman says sales aggregated twenty per cent more. There was enough of everything in the plant line, also cut flowers, except violets, which were most in demand, roses being least salable. Hyacinths in pots were in especial demand, but all good plants sold.

LITTLE ROCK, ARK.—Trade was about as last year, with a shortage of cut flowers and enough blooming plants except lilies and azaleas, although everything well in flower sold. Carnations hung fire because too high priced. Most of them came from Chicago and Tipton & Hurst say that they had some Cranes billed at 8 cents which were asleep when received.

WICHITA, KAN.—Bad weather cut into the business, but W. H. Culp says the different florists report increases of from ten to thirty per cent. In general there were enough cut flowers, but they sold out clean and plants were plentiful except lilies, which were, therefore, higher. Bulbous stock had to be worked off in assortments and there was no call for palms and ferns.

KOKOMO, IND.—W. W. Coles says trade is growing better every year. There is always a good demand for first-class stock and at fair prices. This year sales increased twenty per cent, with no better prices except on carnations. There were enough cut flowers, but not enough blooming plants. Easter lilies were most in demand, with roses and carnations leading the cut flowers.

DENVER, COL.—The Park Floral Company says that Friday's snow storm interfered with trade, but that Easter business increased ten per cent over last year. There were ample supplies of blooming plants and enough cut flowers except Beauties. High grade roses and carnations were in heavy demand, but bulbous stock sold slowly. Azaleas and lilacs were the most popular plants.

BIRMINGHAM, ALA.—There were enough plants for the Easter demand except good lilies, but on cut flowers the supply was very short. Most of the dealers here rely on Chicago for their cut flowers and the floods in Tennessee delayed shipments due to arrive here Saturday and Sunday,

until Monday morning. Probably \$600 to \$700 represents the amount of stock which came too late. Lindsay has the best local supply, cutting over 1,500 carnations and 800 roses for the Easter demand. Carnations lead and bulbous stock was least salable.

DES MOINES, IA.—Easter business was about as last year in dollars and cents, prices rather lower. There were plenty of fair lilies, good azaleas and Dutch hyacinths, with enough cut flowers for all demands. Everything sold well except baskets of assorted plants. There was no demand for lily of the valley or daffodils. W. L. Morris says better weather would have greatly improved the record.

FREDERICTON, N. B.—Weather was bad, but J. Bebbington & Son say trade increased at least twenty-five per cent. Qualities were better than usual and prices higher. There were enough plants, also enough cut flowers obtained from wholesale centers. The carnation seemed to be decidedly the most popular flower, but lilies were required for church decoration. Some good tubs of *Dentzia gracilis* sold well.

HARTFORD, CONN.—Fine weather early in the week made trade lively, but rain made delivery difficult. This is the way Geo. S. Osborne sums up the business: Increase in sales, forty per cent; prices on cut flowers much better, plants same as last year; lilies short, azaleas and lilacs about equal to demand; roses and carnations short, violets equal to demand, bulbous stock too plentiful; lilies and carnations the favorites.

DAYTON, O.—Easter brought nearly one-third increase over last year's business. Choice material sold at an advance of from twenty to thirty per cent. Supplies were just about equal to the demand, everything being well cleaned up, both plants and cut flowers. Lilies were about the only shortage. Fancy carnations and violets were most called for. J. B. Heiss says there was more pickled stock in evidence than usual and it sold very low.

FREMONT, NEB.—People seemed to want quality. Price was not so much considered as usual. Transient over-the-counter trade was the best ever known at Easter. Fine weather provided all

the stock necessary and C. H. Green thinks business increased twenty-five per cent. Lilies were about one-third higher than usual and sold well, as did callas and Dutch hyacinths, also rubbers, Boston ferns and palms. In cut flowers fancy carnations were the strong leader.

DETROIT, MICH.—J. Breitmeyer's Sons say that trade was somewhat better than a year ago, with adequate supplies of everything and a surplus of bulbous stock. They found lilies, azaleas and hyacinths most salable among plants. They note an increase each year in the call for planted baskets and flowering plants, to the detriment of all cut stock except violets and lilies, the call for which seems to increase. Their violet sales this year ran 75,000.

#### New York.

STORY OF THE EASTER TRADE—VOLUME OF BUSINESS EXCEEDS ALL RECORDS—PLANT SALES TAKE THE LEAD.—GOOD BLOOMING STOCK SHOWN EVERYWHERE.—GREAT QUANTITIES MOVED BUT SOME LEFT UNSOLD.—ALL ABOUT THE STOCK AND ITS USES.

It is gratifying to be able to record the Easter trade for 1902 as by far the greatest in New York's history. And yet, so extensive were the preparations made for it that Monday morning found the city dealers with a considerable amount of unsold stock on hand. There does not appear to have been any shortage in any staple lines, the main embarrassment in filling all orders and calls literally being the difficulty to secure enough messengers and teams when wanted. Undoubtedly the rain storm which set in on Friday afternoon and continued until Saturday noon affected seriously the aggregate of business done and had the beautiful weather of the days preceding and which prevailed Saturday evening and Sunday been uninterrupted, the amount of material left unsold would have been considerably reduced. It was a most disheartening prospect when Saturday morning broke with the dismal sound of the east wind beating the rain against the windows and nothing more welcome ever happened than when the sunlight broke through the clouds in the early afternoon and released the much needed shoppers.

ED. AM. FLORIST:—The accompanying illustration was clipped from the Philadelphia Record of March 25, and is such a faithful reproduction of a familiar scene in Philadelphia at this season that I could not refrain from sending it to you. It tells its own story of fakirs and cheap flowers. The writer has seen hundreds of just such characters lined along the curbstones on Market street, and their rivalry is both intense and amusing. OLIVER D. SCHOCK.

EASTER VIEW IN THE STORE OF J. H. SMALL &amp; SONS, NEW YORK.

This perversity in the conduct of the weather was much more serious in its effects on the cut flower trade than upon the plant traffic. The latter is now well entrenched as the main factor in the Easter business, the demand for flowers being comparatively insignificant. As for the fancy plant growers, their worries had come to a close with the delivery of the stock during the early days of the week and the conditions of the situation in the city gave them little concern. The small plant growers, however, suffered an unwelcome set-back and although they showed up bravely with their little forests of geraniums at the Canal street market in the splashing rain, long before daylight broke on Saturday morning, the fates were against them and their Easter Saturday, from which so much was expected, passed into history as a rank disappointment. Not much less was the case at the Thirty-fourth street flower market. Saturday morning should have been a big event here. The flowers showed up in abundance but buyers were almost as scarce as teeth in a hen's month.

On this page there appears a view in one of the leading Broadway establishments. This is from a photograph made on Friday afternoon and furnishes an adequate idea of what the interior of a New York store looked like when ready for the Easter business of 1902. From the highest to the lowest, in the Broadway palace and the squalid cellar or "hole-in-the-wall" alike, it was plants,

plants on all sides. In all places of any pretension it was impossible to house the stock secured and each had one or more "annexes" in neighboring vacant stores where material was stored and cared for, either before or after selling.

There is little to be said other than praise as regards the quality of the plant stock furnished. Some azaleas were in evidence that were too precocious and showed by their shedding bloom that they had seen better days. Crimson Ramblers, although some growers had them fine, were on an average inferior in quality and quantity of inflorescence; but in general it may truthfully be said that the great bulk of the plant material was ahead of that of past years and the decreased use of artificial adornment and the almost entire absence of tissue paper accessories may be credited in part to the fact that there were fewer imperfections to be covered up.

Azaleas held, as heretofore, a leading place. They were very fine and it was particularly pleasing to see a good proportion of the freely-branched specimens which are so much more beautiful than the squat, flat-topped style which our Dutch supply men take so much pride in furnishing. As to varieties there was the usual assortment, special mention here being called for only as regards the handsome pink *Haerensiana*, which was introduced last year and which is now proven to be without a rival in its class. Lilies were better on the average, than we had reason to expect and it also

transpired that there were enough of them, although at the middle of the week there was a disposition to stiffen up prices all along the line in anticipation of a famine at the finish.

The product of the bulb forcers was conspicuously good, hyacinths, daffodils and lily of the valley leading and the potted violets were also uniformly excellent, although unfortunately no one has yet discovered a way to retain the sweetness in the flowers on a violet plant after being twenty-four hours in a flower store and the odor from a window full of stale specimens will extend for a block in every direction. Lady Hume Campbell is the variety universally grown for Easter potting.

There was the usual number of genistas, lilacs, hydrangeas, rhododendrons, acacias, hybrid roses and other well-known Easter favorites, but their sale altogether would not equal in amount that of either lilies or azaleas. *Bougainvillea*, when seen in large specimens, was very showy and effective in store decoration but met rather scanty favor with the general buyer. *Boronias*, so extensively grown a few years since, were rarely seen.

The use of fancy baskets and hampers filled with assorted plants showed no diminution in the establishments patronized by wealthy buyers and many of the combinations in these affairs were beautiful examples of taste in color effects. This was the way in which many of the pretty ericas and epacris were disposed of. Combined with lily of the valley

orchids, *Adiantum Farleyense*, and such choice material, they appealed to everyone. Occasionally a cluster of cut Lawson carnations or cattleyas was introduced among the planted material but there was very little of this done.

Among the new aspirants for favor as Easter plants were seen Japanese cherries, cape jasmines, *Leptospermum* and *Schizanthus Weistoniensis*. The latter is a very profuse-flowering little plant and as made up in masses in hampers at The Rosary met with much favor, its delicately-shaded white, pink and lavender blooms being exceedingly pretty and having also good keeping qualities. The *Leptospermum* bears an abundance of white, five-petaled flowers among a myrtle-like, dark green foliage and makes up very attractively in assorted baskets. Porto Rican matting in various colors was extensively used as a covering for flower pots and in addition to the grades of ribbon generally in use a wide-meshed fish net material served effectively as a tying material.

As to the Easter cut flower trade, a very few words will suffice. There is but little left now of what was once a large and profitable business. The flower growers industriously held back their cut for a week, allowing but little to come in for several days except the stock that could not be safely retained any longer. The wholesalers put on extra help and kept open most of Friday night and all of Saturday night but the only wholesalers who found plenty to do were those who handled flowering plants—and there were several of these. A fair amount of shipping was done on Thursday and Friday. Saturday morning opened with enough American Beauties in stock from the previous day to supply a big Easter demand and mountains of everything else. On top of all this, van loads were arriving in the rain and the stock kept piling up while the retailers paid no attention whatever to the subject excepting to countermand or cut down the few advance orders they had previously given. The Greeks were welcome buyers under such conditions and carried off the Beauties by thousands but had little use for the other roses unless paid, almost, to take them out of the way. There were thousands upon thousands of Bridesmaids arriving at every wholesale establishment that had evidently not seen the light for a number of days, in all stages of bleachedness; carnations that folded their petals and went to slumber after being exposed an hour to the air, and many whose bursted calyxes told the story of the forcing they had been subjected to in order to "get them in for Easter;" violets and bulbous stock in equal profusion. Word came in from many of the violet growers increasing heavily the estimate of their afternoon shipments. With few orders and no indication of a cessation of the storm, persistent efforts were made to unload and no offer was refused. With the welcome change in the weather at noon hope began to strengthen but the only line that rallied were the violets. They came in actually by hundreds of thousands but the buyers had a capacity for them all and they sold at fair prices, proportioned to their quality. Such a display of violets was never before seen on Broadway as were worn by the ladies in the great Easter Sunday promenade on Fifth avenue. Some wore bunches of 200 or 250 at their belts. Not one carnation, not more than a few dozen roses, were seen in similar use in the course of a two hours' saunter up and down the crowded

avenue. Monday morning found the wholesale houses encumbered with roses enough, held over, to accommodate a big day's business and the wholesalers themselves weary of limb and blue as indigo, while the refrigerators in the retail stores were well filled with the flowers left unsold. Lilies cleaned up fairly well all around.

A. Rolker & Sons are moving into a new store at 31 Barclay street, one flight above Suzuki & Iida.

J. Blaauw, of Boskoop, Holland, arrived on the steamer Rotterdam, Monday, March 31.

Vaughan's Seed Store reports a good run of down-town trade in Easter flowering plants.

#### Chicago.

DETAILS OF THE EASTER BUSINESS.—AGGREGATE SOMEWHAT AHEAD OF LAST YEAR.—ROSES THE ONLY SHORT ITEM.—LILIES PROVE MORE THAN EQUAL TO DEMANDS.—PRICE TOO HIGH.—RETAILERS DO MOST BUSINESS WITH PLANTS—FORTUITOUS CIRCUMSTANCES BRING LOSS TO SEVERAL HOUSES.

In the opinion of those who make a conservative estimate of the Easter business the wholesale cut flower trade in this market increased ten to fifteen per cent, possibly a little more, over last year. There was a tremendous shipping demand and supplies in general were the largest in the history of the market. The height of the shipping period developed only one considerable shortage, that being on tea roses, on which a number of houses were compelled to cut their orders severely. The demand for choice stock cleaned up all the good roses without difficulty, but at noon Sunday there were quantities of low grade Meteors on hand. On medium length Beauties there was a shortage, but of extra long stemmed stock supplies were large; however, they cleaned up pretty well. The looked-for scarcity of Easter lilies failed to develop, the close of business Saturday night finding several thousands still unsold in the market. This experience again demonstrates the folly of putting prices up to the point which deters the placing of early orders. The average out-of-town buyer, who has been procuring his lilies in past seasons at from 10 cents to 15 cents, could not use large quantities at from 18 cents to 20 cents and ordered very conservatively, with the result that a supply very much under that of last year proved more than ample to meet all requirements. The stock averaged fairly well in quality, although the stalks were not long. Carnations were in splendid shape, with the result that buying was heavy on this item and the receipts were cleaned up in excellent shape, when one considers that the cut was phenomenally large. Violets were in heavy supply and those of good quality were well cleaned up, but the lower grades dragged somewhat and there was some loss in this item because of the unfavorable weather Sunday morning. The one thing which fared badly was bulbous material. The receipts probably totaled more than ever before in the history of this market and buying was not much heavier than usual, with the result that when the business approached a close there was scarcely a house in town which did not see the necessity of forcing sales on tulips and daffodils. Even callas shared in this unde-

sirable state of affairs and valley is still a drug. In general, however, the wholesalers are well satisfied with the results for the season. There was little pickled stock. The retail trade was large, but there are varying reports. Most of the storekeepers had stocked up heavily with blooming plants and in several cases they found themselves with more than they could move to advantage. The result was that they sought to push this branch of the business to the exclusion of cut flowers, for which they had not placed many advance orders. The result was that it somewhat reduced the local buying in the wholesale market, bringing a measure of disappointment to those who had looked for something big from the city trade. The leading retailers report active sales on most lines of blooming plants, with lilies and azaleas in the lead. The smaller dealers did a big business with tulips, daffodils and hyacinths in pots. Sunday morning's storm cut down the business usually done with Easter church goers.

After the Easter rush there was a period of quiet reaching well up to the middle of the week. The last few days have been fairly active again. The oversupply of bulbous stock has been reduced somewhat and roses are still in active demand. Carnations are moving well, but there are very large receipts and all requirements can be met if needs are made known sufficiently early in the day. The Beauty cut is heavy with several of the big growers, but it is still averaging mostly long and prices are not high on this grade. There is a marked shortening up in the available supply of smilax and those who need it for spring weddings are having to hustle, but C. A. Samuelson says that he is not looking for much locally in the way of April weddings. The society reporters on the leading morning papers tell him that not for many years have there been so few spring weddings on their lists of coming events.

On the Friday before Easter, Reinberg & Weiland delivered four cases of roses and carnations to the Adams Express Company at New Castle, Ind., and at about the same time the South Park Floral Company delivered twelve cases, containing 3,100 roses, many of them long Beauties, consigned to E. C. Amling. The stock should have reached Chicago early Saturday morning but the agent failed to put it on the train and it lay in the depot all night, reaching its destination after the Easter business was practically over. There has been considerable complaint that the express company does not give satisfactory service at New Castle and this transaction means a loss to the company which will probably be large enough to wake it up to the necessities of the situation.

The worst mishap connected with the Easter trade was one in which several of the shipping houses in this market had a share. All the stock sent out on Friday destined for Birmingham and other points in northern Alabama and Tennessee was caught in the floods which interrupted railway transportation on the L. & N. through the mountains of Tennessee, and failed to reach its destination until Monday morning. It is probable that the stock detained aggregated somewhere in the vicinity of \$1,000 and it is a loss which is attributable to no one's negligence. Stock shipped Thursday went through all right.

The Florists' Club is making every preparation for the success of the annual ball at the Masonic Temple next Tuesday evening. An excellent programme has

been prepared, including, besides the terpsichorean features, specialties by the mandolin club, Harry Brown, Hugh Wood, Hoerschler Brothers, Wm. Mack and the Misses Enders, Lauf and Lund.

The Kennicott Brothers Company says that they never before handled anything like the number of violets which came to them for Easter. One of their growers, Eli Cross, of Grand Rapids, sent them 68,000 in one day and 173,000 in the four days before Easter.

There has been a fine display of Easter lilies at Lincoln Park this week, attracting many hundreds of visitors. Fifteen hundred bulbs were potted up last winter and the assistant head gardener, A. J. Smith, says he is fairly well pleased with the results.

The Chicago Carnation Company is making preparations to open a thoroughly up-to-date retail store at the corner of Twenty-sixth street and Indiana avenue.

Wictor Brothers have thrown out stock and are replanting roses in sixteen houses. This is another firm which will go largely into Liberty this year.

C. L. Washburn leaves to-day for North Carolina to join Mrs. Washburn, who is sojourning there for her health.

Peter Reinberg filled an order last week for 25,000 violets and one yesterday for 25,000 carnations and 10,000 roses.

Mrs. E. L. Horton, of Bassett & Washburn's, was taken ill during the Easter rush and is not yet on duty.

The George Wittbold Company has potted up ten tons of cypas stems.

Visitors: A. E. Lutey, Calumet, Mich.; W. A. Chalfant, Springfield, Mo.; Myer Heller, New Castle, Ind.

#### Boston.

**EASTER BUSINESS SERIOUSLY INTERFERED WITH BY RAIN.—PLANT SALES HEAVY BUT ALL DEPARTMENTS SUFFER BY THE DOWNPOUR.—CUT FLOWER MARKET FULL TO REPLETION AND NOBODY STIRRING.**

Boston's Easter was a big one. This statement is made with the full knowledge that had Saturday been a respectable day as to weather Easter would have been much more of a comfort to many who, anticipating a big run, had made preparations which did not take into account the perverseness of the weather in March. Never before have preparations been made on such a mammoth scale. The retailers were possessed of a wild desire to secure each a few acres of flowering plants in advance and the plant growers had no objection to accommodating them, the result being that the entire stock of available plant material was placed well in advance of the big event and the retail city stores were transformed into vast gardens of brilliant color, many vacant stores being utilized to make room for the display. The confidence of the dealers was not misplaced, as it transpired, and the only reason why some establishments found their stands still occupied with unsold plants after it was all over was, unquestionably, the weather of Saturday. It rained in sheets and gusts all day till evening and then it cleared up beautifully and Sunday was one of the most perfect days ever devoted to Easter festivity. As to the stock offered, the plants were of the usual sorts which have come to be regarded as appropriate and desirable for Easter business. There were lilies by the thousand, Crimson Ramblers, Lorraine begonias, lilacs, Japanese cherries, primulas, English and

obconica; hydrangeas, acacias, genistas, heaths, pæonias, wistarias, rhododendrons, bulbous flowers, metrosideroses and most of all, azaleas in endless array and generally excellent grade. A word about the Crimson Ramblers: Most of those offered by the Boston growers were grown to bush form without any attempt at contortions in the form of crosses, baskets, peacocks, harps or other abominations and in the matter of color and size of truss, etc., were superb. Mr. Wirth, of the Hartford Park Department, who chanced to be in town, commenting upon their beauty, said that he had found the new Rambler, Dorothy Perkins, to be a good running mate for its older relative and well worthy a place in the Easter list. He also said that *Heuchera sanguinea* would some time prove a welcome addition to the standard list of Easter forcing plants.

As to the cut flower end of the business the story might be different if it had not been for that same dose of weather. The wholesalers found the shipping trade excellent and the advance orders were gratifyingly heavy. But Saturday cast a gloom over the situation in more ways than one. Seeing the prospects, the frugal retailers recalled and cancelled their orders in many cases and 10 a. m. on Saturday saw the end of enthusiasm and the beginning of demoralization. To make matters worse the growers began to disgorge the accumulations of the week, which they had been storing up in the vain belief that the goods would be worth more on Saturday than on any other day of the week. Will they ever do it again? Oh, yes, they'll do it again annually for the next hundred years, probably. American Beauty was an omnipresent commodity and the high grade, long-stemmed stock was least called for. The medium stock had the preference on all sides. Other roses were abundant in all grades and had to be sold out at low values in the end. Carnations enjoyed a tremendous call, next in activity to the lilies, but there were more than enough for all. Violets were very successful, being in great demand up to Sunday noon. Bulbous stock had a varied experience. Lily of the valley of the cheaper grades was not salable, the best quality of fancy stock selling all right. Lilies sold well up to expectations. There was a scarcity of cut blooms which it was not possible to supply fully from the plants on hand because the latter bore a great many green buds which would have been sacrificed when sold in the cut state. On Monday morning the wholesalers were found to have a considerable quantity of cut flower stock left over, but under the circumstances they, as well as most of the retailers, expressed themselves well satisfied with their Easter experience.

M. A. Patten reminds us that his Gov. Wolcott, not Lorna, took first prize at the recent exhibition here. He says that Wolcott kept so good that it was not found necessary to replenish it during the four days, while Lorna and Marquis had gone quickly to sleep.

On Easter Saturday, Ed. Welch, of Welch Brothers, had the pleasure of seeing another twelve-pound son added to his numerous family. His friends have not forgotten to congratulate him early and often ever since.

On Saturday, March 29, Miss H. T. Goessmann, of Amherst, delivered a lecture at Horticultural Hall on "Some Famous Gardens."

Visitors: Chas. Loechner, A. Dimmock and J. H. McHutchison, New York.

#### Cleveland.

**NOTABLE FEATURES OF THE EASTER BUSINESS.—WHOLESALE TRADE IN CUT FLOWERS INCREASES.—LOCALLY PLANTS HAVE THE BEST OF THE DEMAND.**

Easter proved most remarkable in several respects; first for the general excellence of the stock; second, for the phenomenal amount of business done during the few hours of bright weather on Saturday afternoon; third for the unprecedented demand for violets. A cold, drizzling rain up to Saturday morning made the outlook dubious for good business, but fortunately toward noon it cleared off and the rush came, to continue until midnight, when everything salable was cleaned up. Azaleas took the lead, with Crimson Ramblers and lilies second. Hydrangeas, spiræas and genistas did not sell quite so well. Bulbous stock went fairly well, but there were quantities left unsold, principally white tulips; the colored ones sold best. While the out of town shipping trade in cut flowers exceeded that of former years fully thirty per cent, the local retail trade for same fell off twenty-five per cent, except on violets, the demand for which was phenomenal, the supply being entirely inadequate. Lilies retailed at from 25 cents to 30 cents per flower and bud, plants with from three to five flowers having the call. Azaleas from the \$1.50 to \$3 size sold best. Ramblers ranged in price from \$1 to \$10, very few being disposed of at the later figure. Clevelanders do not take kindly to high priced goods; medium grades sell best.

The J. M. Gasser Company had an elaborate ball decoration on Thursday at the Country Club, the table decoration being very unique. Eight of the tables had baskets for centerpieces, made of Porto Rican straw and filled with Crimson Rambler roses. On the handle of each was fastened a large bow of green ribbon. The remaining eight tables had similar baskets filled with pink pelargoniums. The ball room was festooned with southern smilax, with roses entwined, while palms and huge vases of American Beauties filled the corners. The whole effect was charming and reflects great credit upon the designer, Harry Jones, who is head decorator for the company.

The Euclid avenue florists all report good business. The J. M. Gasser Company had a splendid lot of lilies, azaleas, spiræas and exceptionally fine Ramblers which sold well. Smith & Fetters had a fine display of well grown plants which sold like hot cakes. James Eadie's two stores were crowded with buyers all Saturday afternoon and at 9 p. m. was sold out of everything. Farther out Euclid avenue Adam Graham & Son reported a rushing business, having sold out completely. Their stock of hybrid roses was the best ever seen in Cleveland, especially *Magna Charta*, which averaged twenty flowers to the plant.

On Saturday morning the Sheriff street market was a great sight. As prizes were offered by the management for the most meritorious display everybody put forth his best efforts and a truly grand showing was the result. Fred. Burger captured first prize. His display consisted chiefly of Crimson Ramblers and hybrid roses which were very fine. Jno. Mollenkopf was awarded second, the third prize going to G. M. Naumann.

The craft has good cause to be thankful Easter came when it did, as the weather since has been most disagreeable, nothing but snow, rain and wind.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 12 times  
10 per cent; 24 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines *only*.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

Now, then, let's get ready for a big  
season of spring planting.

PROFITABLE prices are essential, but  
prices cease to be profitable the moment  
they are put so high that stock does not  
move.

A NOTEWORTHY feature of the Easter  
demand was the way violets sold  
throughout the country. It affords  
much encouragement to the producers.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

### Guiding Star.

The AMERICAN FLORIST is certainly a  
guiding star to the trade and no true  
florist should be without it. It is valu-  
able, instructive and beneficial to all  
who subscribe for it.

house 32x125.

Amesbury, Mass.—D. W. Worthen, one  
house.

### More About the Balduin Controversy.

ED. AM. FLORIST:—In your issue for  
March 29 is a letter from Edwin Lons-  
dale regarding the Rose Balduin. So  
much has been said on the matter that it  
seems like piling on the agony to con-  
tinue the argument, but it seems to me  
that lately the contributions on the sub-  
ject have drifted far away from the real  
crux of the situation. As it presents  
itself to me it is this: The Dingee &  
Conard Company purchased a rose  
under the name of Columbia from Myers  
& Samtman in 1899; they distributed  
that rose under a number through the  
medium of their *Success With Flowers*  
in 1900; in 1901 they offered it for sale  
under the name of Helen Gould. Myers  
& Samtman affirm that the Dingee &  
Conard Company were informed of the  
fact that a stock of the rose was in the  
hands of E. G. Asmus, and that state-  
ment I have not seen denied by the firm.  
It makes little difference to the people

who bought the rose from the Dingee &  
Conard Company what was the source  
from which they got it; they had every  
right to look to them to protect their  
interests. More than a year had elapsed  
from the time they purchased the stock  
of the rose until they offered it as Helen  
Gould, yet nowhere in their correspond-  
ence as published have they made a state-  
ment that they took the precaution to  
protect their customers by investigating  
what had become of the other stock of  
the same rose which was in the country.  
If they had taken the slightest trouble,  
they could have found out, and it would  
have prevented them from issuing the  
rose under another name than the one  
which rightfully belonged to it. If they  
had stated in their catalogue that they  
purchased the rose from Myers & Samt-  
man as "their new rose" under the name  
of Columbia, it would have enlightened  
a great many people in the trade who  
knew all about that rose. They charged  
a high price for the rose under the name  
of Helen Gould, while it could be bought  
in the country at \$6 per hundred, under  
its proper name, Balduin. This phase of  
the case, it seems to me, is the one which  
really interests the trade at large and  
really interests the people who paid their  
money for the rose under the belief that  
they were buying a new one, and that  
belief was founded upon the published  
statement of the Dingee & Conard Com-  
pany that the rose was a new variety.  
Anyone reading their advertisement  
would certainly believe that the variety  
was originated under their own eye and  
that they knew all about it, and yet, as  
ventilated, it is proven beyond dispute  
that such were not the facts in the case.

PATRICK O'MARA.

### Philadelphia.

NO WORD OF COMPLAINT AS TO EASTER  
BUSINESS.—PLANT GROWERS SOLD OUT  
CLEAN AND LARGE CUT FLOWER  
RECEIPTS MOVED BRISKLY.—MEETING  
OF THE CLUB.—ANOTHER DISCUSSION ON  
PIPE.—SOME GOOD EXHIBITS.—PENNOCK  
MAKES DEPARTURE.

All the rosy predictions that had been  
made regarding the volume of business for  
the Easter season just past seem to  
have been verified, as in most cases it has  
been a clean sweep. Wm. K. Harris, one  
of the largest growers, was completely  
cleaned out, there not being a wagon-  
load of blooming stock left on the place  
on Saturday evening. With Craig &  
Son it was almost as complete a clean  
up; scarcely anything grown for Easter  
was left. When one considers the great  
amount of stock grown by these two  
firms the demand that used it up so  
quickly seems wonderful. From all the  
other large and smaller growers much  
the same report is received; all did well  
and none of them had enough good stock  
and managed to work off their seconds  
without trouble. There was nothing  
particularly new offered; all the standard  
plants were to be seen, most of them in  
good form. Notwithstanding the dis-  
ease there was a good stock of very nice  
looking lilies which seemed to have taken  
on a new lease of life and surprised their  
owners with the way they came along  
the last two weeks. Those who were  
fortunate enough to have their lily plants  
ready and stored in a cool house for ten  
days before delivery sent in plants that  
gave the greatest satisfaction. Next to  
the lily the best sellers were the azaleas  
and Mme. Vander Cruyssen easily led in  
popular favor. Plants that retailed from  
\$3 to \$5, moved very quickly and there

were very few for sale anywhere on  
Saturday when the grand rush came.  
The stores all did exceedingly well and  
an inventory of the stock remaining on  
Monday morning was hardly worth  
making. The weather was ideal all the  
week, until Friday, which turned out  
cold and rainy. Saturday was better  
but several very heavy showers in the  
afternoon put a stop to the rush for a  
while and must have been disastrous to  
the curbstone merchants, of whom there  
were a great number, and who appear to  
have done very well even with this handi-  
cap. While there appeared a nice increase  
in the demand for plants, cut flowers  
seemed to lag a trifle, except violets,  
which were sold in great quantities, and  
the market entirely cleaned out on Satur-  
day evening. Extra choice carnations  
were offered at \$6 per hundred toward  
the last, which showed that the demand  
was not for them. All kinds of roses were  
in good supply, although a good ship-  
ping trade kept the stock moving. Beau-  
ties were quite plentiful. John Burton's  
new houses turned out 1,700 four-foot  
stemmed Beauties for the week, which  
seems a phenomenal crop from this range  
of glass. There was a good demand for  
cut lilies. S. S. Pennock handled 5,000  
flowers from one consignee on Friday  
and Saturday. Cut lilies ranged in price  
from \$12 to \$15, the majority going at  
\$12. Taken altogether it was a very  
satisfactory Easter for all concerned.  
Right now is the time to start for next  
season by writing down the impressions,  
the good and bad features of the busi-  
ness, now fresh in the memory and which,  
when referred to early next season, will  
help both grower and retailer in planning  
and laying a foundation for the better  
handling of the increased business that is  
sure to come.

There was a good attendance at the  
April meeting of the Florists' Club last  
Tuesday evening. Mr. Ford, of Ford &  
Kendig, large dealers in pipe and steam-  
fitters' supplies, was present and read a  
paper on the history of pipe making and  
a general talk on the subject followed.  
He said the great tendency of the times  
is to get everything as cheap as possi-  
ble and this reduces the quality and  
causes a lot of very inferior stock to be  
placed on the market. There was an  
exhibition of the new Philadelphia  
Rambler, an improvement on the Crim-  
son Rambler in that the flowers are a  
darker color and more double and the  
plant never mildews. Some beautiful  
new cannas were shown, which were cer-  
tainly decided novelties. They were all  
from the Conard & Jones Company, of  
West Grove.

I must not forget to mention an Easter  
opening which is to continue each season  
at S. S. Pennock's. Mr. Pennock has  
added plants to his stock and the week  
previous to Easter had specimens of all  
the plants arranged harmoniously and  
many of them decorated with mats and  
ribbons. He has every reason to be  
proud of his enterprise as his rooms were  
crowded each evening and much business  
resulted. An orchestra was present dur-  
ing the evenings and was much appre-  
ciated.

John Smith, recently of Philadelphia,  
died suddenly in a hotel in New York  
March 29, of heart failure. The deceased  
was for several years foreman for Robert  
Craig & Son and afterward went into  
partnership with Mr. Whitely and carried  
on a retail business on Sixteenth street,  
below Chestnut, with greenhouses at  
Lansdowne, Pa. A wife and three chil-  
dren survive him. K.

**SITUATIONS, WANTS, FOR SALE.**

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the **AMERICAN FLORIST** for the year 1902 is entitled to a five-line **WANT ADV.** (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—As gardener and florist, private place, married. Well up in all kinds fruits, vegetables, lawns, etc. Best references. Address J. S., care American Florist.

**SITUATION WANTED**—As foreman in commercial place to take full charge. Have 20 years' experience as grower of cut flowers and plants; practical and reliable. Best of references. GROWER, care American Florist.

**SITUATION WANTED**—By young man, age 22; competent to take charge of small place, or rose section; also designer and decorator. Want to work for honest party. Best of references. LAURIDS NEILEEN, Mankato, Minn.

Always do business, week days and every day, Sundays and holidays, all over the country, at home and abroad.

Syracuse, N. Y.

EVERY CIRCUMSTANCE FAVORABLE TO A BIG EASTER BUSINESS.—PLANTS POPULAR BUT CUT FLOWERS SOLD WELL.—NOTES OF DOINGS OF THE DEALERS.

All the conditions tending to make Easter profitable were present. The week was warm and bright, the result being that stock was plentiful and in good condition. All had splendid window displays, and there was but little desirable stock left Monday morning. The churches had more elaborate decorations than in years, palms, lilies and other plants being most used. The greatest demand was for lilies and potted plants, although cut flowers had a large sale. Lack of space in which to display stock and wait upon trade was the difficulty with which the florists had to contend.

W. S. Wheadon, of P. R. Quinlan & Company, says it was the biggest Easter his firm has ever had. The stock was good and everyone seemed to be buying flowers. Mr. Wheadon had an elaborate display, the lilies and azaleas being the special features. The walls of the store were solid masses of bloom.

Henry Morris had twelve churches to decorate and was busy every minute. In his window were beautiful baskets of ferns, lilies, azaleas, roses and carnations, masses of green forming the background. He reported that people wanted the best there was and price was no object.

Henry Burt sold more lilies and hydrangeas than anything else. Hydrangeas are especially good this year. Lilies of the valley and sweet peas were in great demand. Mr. Burt used trained Rambler roses in his display.

L. E. Marquisee did a thriving business in carnations. Peter Kay and Bannister Brothers also were well pleased with their Easter trade. A. J. B.

# Cut Adiantum

**THE SEED TRADE.**

**AMERICAN SEED TRADE ASSOCIATION.**

J. E. NORRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Twin Cities, Minn., June, 1902.

VISITED NEW YORK: W. H. Dennison, Ellisburg, N. Y.

THERE is a brisk demand for Red Wethersfield onion seed.

A FEW small lots of Alaska peas are being offered at lower rates.

VISITING CHICAGO: Jacques Courtine, representing Union Horticole, Hyeres, France.

THE Salzers advertise that they distribute about 125,000 pounds of onion seed annually.

ROCKFORD, ILL.—H. W. Buckbee is not recovering as fast as was expected from his recent injuries.

TIMOTHY seed sold at \$6.90 per hundred pounds at Chicago March 27, the highest mark for thirty years.

W. H. TILTON, formerly with John Lewis Childs, Floral Park, N. Y., is now with Vaughan's Seed Store, New York.

MATTITUCK, L. I., N. Y.—J. M. Lupton states that cabbage stocks for seeding are now being planted and that they are in very fine condition. The loss from rotting is very small and the cabbages look particularly bright and healthy.

**English Nursery and Seed Trade Association.**

The annual meeting of this association was held March 11, at the offices of the association, 30 Wood street, Cheapside, London, E. C. The officers were re-elected as follows: President, N. N. Sherwood (Hurst & Sons); treasurer, W. J. Nutting (Nutting & Sons); secretary, J. P. Worrell, 30 Wood street, Cheapside, London, E. C. The association now consists of 120 members in the United Kingdom and 37 foreign members. The objects of the association are to collect and disseminate information beneficial to members, collection of debts, investigation of bankruptcies and assignments, attending creditors' meetings, making trade inquiries and supplying status reports; members afford to each other through the secretary mutual private information as to the financial position and extent of credit which may be given.

**Montreal.**

WEATHER FAVORABLE AND EASTER LEAVES EVERYONE SATISFIED WITH TRADE.—STOCK WELL CLEANED UP IN ALL LINES.—EXPRESSIONS OF RETAILERS.

The mild and bright weather we enjoyed for the last week helped to bring stock in on time and very little was behind for Easter. Satisfaction is manifest everywhere. Although Saturday was a nasty day plants and cut flowers were disposed of very easily and the storekeepers all sold out. The plants leading in demand were lilies, spiraeas, lilies of the valley and hyacinths, with Ramblers following. In cut flowers roses, carnations, lilies of the valley and violets were the most looked for. The prices were about the same as last year. The stores in general were looking very gay on Good Friday, but it would be a task to decide which made the best show, J. Bennett, C. Campbell or S. S. Bain. Harris & Hopton, besides their own,

bought all the lilies available and had a good trade in tulips. Wilshire Brothers report only three plants left and were wishing to rest on Sunday, but funeral work had to be done. Miss I. Cairns was very busy. L. H. Goulet said it was a big day, especially on cut flowers. B. T. Greaves had a great call for lilies, and his large crop of carnations ran short.

Miss Murray had a splendid trade; her 500 western lilies went like hot cakes. Hall & Robinson disposed of all their general stock, including their beautiful Ramblers. T. Gorman did exceedingly well. P. McKenna & Son had the best stock on record, in quality as well as variety, and sold nearly out. Their lilies were the best in the city.

E. Bourbonniere did finely, especially on white flowers, and had quite a trade during the last week. C. Deloremier found the greatest call for lily of the valley in pots or cut and his lilies and hyacinths were sold without trouble. John Eddy & Son had big trade and fine carnations.

Harry Eddy, who opened a retail store on St. Catherine street for Easter, had his store filled and emptied it just as easy. He had splendid hydrangeas.

C. Deryncks, who bought a place near Mount Royal Cemetery, is going to push a general stock business, and did well at Easter. G. V.

**Augusta, Ga.**

BIG INCREASE IN EASTER SALES AS COMPARED WITH LAST YEAR.—PLANT BUSINESS OPENING BRISKLY.

There was a material increase in the demand for cut flowers for Easter trade, the increase being at least twenty-five per cent over last year, but prices ruled about the same as last season. Supply was unequal to the demand, both for cut flowers and plants in bloom. White azaleas and Lilium Harrisii were in greatest demand. Astilbe Japonica, cinerarias and callas were slow sale. In cut flowers white carnations took the lead, Kaiserin and Bride roses next, colored carnations, Bridesmaid, Golden Gate and American Beauties running a close third. Violets were not in demand as nearly every garden in this section possesses a bed of this old favorite and this season they seem to outdo themselves in blooming. Buyers are becoming more discriminating in quality every year and inferior stock cannot be palmed off on the purchaser.

The demand for palms, decorative and bedding plants is opening briskly and promises to exceed that of any other year. This would indicate that our people are paying more attention to the adornment of their houses and grounds. L. A. B.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN. R. C. BERCKMANS, Pres.; R. J. Coe, Vice-Pres. GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-seventh annual convention, Milwaukee, Wis., June, 1902.

THE condemnation proceedings of the Rio Grande Western Railway to secure a right of way through the grounds of the Utah Nursery, at Salt Lake, resulted in a judgment for \$9,678.92.

ELLWANGER & BARRY, on March 22, received an order by cablegram for the shipment of 200 fruit trees to Corea. No varieties were specified and they sent an assortment, including apple, pear, cherry and peach trees.

Pittsburg.

BIG WIND BRINGS HEAVY LOSS TO FLO-RISTIS.—GREENHOUSES COLLAPSE UNDER THE GALE.—MUCH BROKEN GLASS.—EASTER TRADE VERY SATISFACTORY.—VARIOUS NOTES.

A wind of the velocity of sixty to seventy miles an hour struck Pittsburg Sunday afternoon, doing an immense amount of damage, many florists being included among the losers. The greatest sufferer was Fred. Burki, whose plant at Bellevue is located on an elevation. One range of six houses was completely crushed and 400 boxes of glass will be required to replace the structures. The loss is estimated at \$9,000. The next sufferer was George Beckert, on Brighton road, a short distance northwest from Mr. Burki's place. This plant is reported almost a total wreck and the estimated loss more than \$5,000. Poland Brothers in the same vicinity lost two houses, about \$1,000. Henkle Brothers' place was damaged about \$300 through the wind picking up hot bed sash and driving them through the roofs of the green-houses. Breitenbaugh Brothers lost some glass, probably \$200 worth, and John Bader is shaking hands with himself because he escaped with about the same loss. Mrs. E. A. Williams, Chas. Siebert, Blind Brothers and Chas. Koenig all lost broken glass and damaged stock. At Schenley Park there was a large crowd viewing the Easter display in Philipps Conservatory when the storm struck and the crashing glass made great excitement. Hail fell here, but it did not bring much loss to nearby florists.

The trade in general is delighted with the results of the Easter business. The buying began early and continued steadily, giving an excellent opportunity to care for all customers and bringing the aggregate of sales a good deal ahead of many expectations. There was plenty of stock, but home-grown material was superior to that shipped in from the east, as it had evidently been pickled. Double violets had a remarkable run and were the principal shortage. There were big stocks of fine blooming plants of all kinds and all seemed to find a ready market. Many novelties were introduced, in the line of baskets, boxes and pot wrappings and they took well. Crimson Ramblers in trellised baskets were also new.

Thomas Ulam was fortunate in securing a vacant store-room near his for his plant display. Benj. Elliott sent some splendid Crimson Ramblers from his Cheswick houses and Chas. Koenig had fine Harrisii, even if he did lose half his bulbs. Wm. Louch sent in splendid hydrangeas and rhododendrons.

E. L. M.

Providence, R. I.

BAD WEATHER CUTS INTO EASTER BUSINESS AND LEAVES STORES OVERSTOCKED ON PLANTS—VARIOUS NOTES OF THE WEEK'S DOINGS.

Easter was preceded by almost ten days of fine weather, but Saturday's storm was disastrous. With a fair Sunday following, however, matters were straightened out somewhat and with a short supply of cut flowers we enjoyed a rush. Stock was cleaned out well, excepting bulbous material, which is always in surplus. Carnations were scarce and of medium grade. Roses were in good supply, especially out of town stock, with prices from \$5 to \$12. Violets were plentiful and poor but were in great demand. There was no shortage on lilies or azaleas. Taken altogether, business was good and a little past last year's wet weather standard. All are in the hole on plants.

T. J. Johnston imported the finest

azaleas from New York. T. O'Connor, as usual, closed his store early Saturday and added his energy to that of the greenhouse squad. Hazard, Kellar and Wood made creditable displays, although the great burden of loss in plants will fall upon the first gentleman and Mac-nair, the latter being heavily over-stocked.

Hoffman, Crawshaw and the Rhode Island Greenhouses led on azaleas, and the latter concern had a great array of quick selling hydrangeas. F. Macrea's lilies were leaders, and Almy's hyacinths were in good shape. Williams had the run on good geraniums.

One discordant note was the selling of plants to the department stores, whose advertisements were all calculated to reflect seriously upon the florists' price.

ROCKFORD, ILL.—H. O. Hinkley opened an Easter flower store on South Main street and had a good trade.

PLANT BUSINESS FAR EXCEEDS CUT FLOWER TRADE AT EASTER.—MEETING OF THE ASSOCIATION.—GOOD PLANTS IN RETAIL STORES.

While in all instances Easter trade is reported as at least equal to last year, some had the heaviest business on record. The volume of business done by our market men last Saturday was greater than ever before, consequently all are well satisfied. Blooming pot plants sold far ahead of cut flowers; bulbous stock especially was much in demand. Plants as well as cut flowers were very fine this year, as the weather during March was all that we could wish. The line of goods was much the same as in other years, novelties being conspicuous by their absence. Realizing the fact that blooming plants are the thing nowadays for Easter, stores and conservatories of retailers were stocked to overflowing with them. In many places it was a sight impressive enough to affect even a florist. A cold wave postponed its arrival until Sunday morning, which was too late to hurt the market men, but was felt by the stores, as it told on the sale of cut flowers, which as a rule is heaviest on Sunday morning.

H. Rieman had quite a lot of fine Easter stock, of Liliun longiflorum and some extra fine hybrid roses. Bertermann Brothers were strong on rhododendrons and Ramblers. A. Wiegand & Sons made a good thing of hydrangeas, which came just right and sold splendidly. These and Ramblers proved to be best in demand with them. Violets they say were leaders in cut flowers. Fred. Hakriede & Son were justly proud of their hyacinths and tulips. Philip Conway was much pleased with the geranium trade. John Heidenreich did a fine business selling bulbous stock to retailers.

At this week's meeting of the Florists' Association John Hartje received honorable mention for a vase of Ulrich Brunner and Magna Charta roses which were very fine. There were also on exhibition three plants of a rose seedling of the polyantha type, shown by Wm. Hack, the originator. The plants were in 6-inch

pots, fifteen to eighteen inches high, with five to six branches, each branch carrying a large cluster, more lengthy than round, of white double flowers, in size and shape like those of Crimson Rambler. Seen from a distance the plants resembled fine specimens of ten-week stock. A. Baur, R. McKeand and E. Rieman were appointed a committee to report on the exhibit and pronounced it a novelty of the first water, provided it proves a continuous bloomer as is claimed for it. Irvin Bertermann and H. W. Rieman made some preliminary announcements regarding the fall show. John Hartje read a paper on the ideal carnation, which was well received. R. F. Harritt was elected to membership.

H. J.

Lowell, Mass.

SATISFACTORY OUTCOME OF A WEEK OF FORTUITOUS CIRCUMSTANCES.—PLANT SALES HEAVY.—NOTES.

The week before Easter found the flower stores filled with blooming plants, while the prospect of a strike of 20,000 mill operatives threatened to tie up business, but a conference warded off this disaster and business on Saturday was the heaviest in the history of the flower

trade here. The aggregate of sales was satisfactory, although the weather was bad when the business was at its height. Lilies seemed so be a little short in stem, but the quality of bloom was fine, especially those from E. N. Pierce & Sons, at Waltham. The price was 20 cents per bloom, with everything counted, but there were no department stores handling them. Patten made an elegant showing at his branch store at Prescott and Central streets, where W. A. Waterworth and Geo. A. Sanders had charge. Business was tremendous, both there and at their regular store.

Porto Rican mats were used to great advantage on azaleas, lilies and other plants. There was a big call for hydrangeas and a few rhododendrons brought good prices. Crimson Ramblers sold well, being in good flower. Prices for 7-inch pots were \$4 to \$5 per plant. Genistas found no sale. The many other items in the plant line were cleared out after lilies were gone.

The cut flower supply was greater than the demand, bulbous stock selling best of all and violets following, with roses and carnations dragging. There was a big call for callas, with limited supply.

EASTER BUSINESS HEAVIEST ON RECORD.—PRICES BETTER THAN USUAL.—COMPARE THEM WITH EASTERN RATES.—VARIOUS NOTES.

Easter was the best in the history of the trade in this city. Business was almost double last year's record, notwithstanding the fact that prices were considerably higher and lilies scarcer than ever. A liberal supply of roses was to be had, but in the line of carnations more could have been sold if they had been to be had. Pot plants were also in good demand, lilies being first, with azaleas a close second. Spiraeas and tulips in pans, palms, lilies of the valley, primroses and Dutch hyacinths all sold well. Carnations brought from 35 cents to \$1 a dozen, tea roses from 50 cents to \$1.50. Beauties from \$1 to \$3, lilies \$5 to \$9 cut and \$12 in pots, spiraeas \$1 to \$2.50 a plant, tulips 50 cents per dozen and violets \$1 per dozen bunches, callas \$1 25 per hundred and azaleas from \$1 to \$3 per plant.

There is trouble about the joint flower show planned by the two local societies. Jealousies have arisen which threaten the success of the enterprise.

Henry Pottet has leased his place to Max Berry, of New York, who will continue on the latest eastern style.

GOLDEN GATE.

Dallas, Tex.

BUSINESS AT EASTER BREAKS ALL RECORDS—CUT FLOWERS CLEANED OUT, THEN FLOWERING PLANTS.

Easter trade in Dallas far surpassed everything in its history. The leading retail stores outside the flower trade all took on holiday dress and each tried to out-do the other. Many of the show windows of the dry goods and millinery stores were a grand sight with natural flowers and palms, with here and there a display of smilax among the Easter hats and summer goods. The flower stores were not in the least behind and all made a fine show. Cut flowers were in good supply but everything cleaned up long before closing time and late buyers had to take plants in bloom, which, too, were cleaned up by the eager purchasers, and at good prices.

The church decorations were all good, and not a church but made some kind of an effort at decoration.

Cincinnati.

EVERY BRANCH OF THE BUSINESS SATISFIED WITH THE NET RESULTS FROM EASTER TRADE.—PRICES NOT HIGH BUT SUPPLIES LARGE AND DEMAND HEAVY.

Everyone is pleased with the amount of Easter business. There were plenty of flowers of all kinds with the exception of American Beauty roses and calla lilies. The prices realized were not as good as last Easter, but the volume of business done offset this; consequently the growers and storemen came out about the same as last Easter, from a financial standpoint. The flower market was loaded with fine plants and the number of people who passed through the building was immense. At times it was impossible to wait on customers so great was the jam. The florists who were fortunate enough to have stands on the outside of the building did a better business than those on the inside. It was a pleasure to look at some of the windows of the flower stores, as our store men tried to outdo each other.

Business has held up first rate since Easter and prices realized are about the same as last week, roses \$4 to \$8, carnations \$2 to \$6, callas \$10, lilies \$15, tulips \$3 to \$4, daffodils \$3, valley, \$3 to \$4, violets 50 cents to \$1 per hundred.

George & Allan had an immense cut of flowers for Easter and it took six men four days to pack all the flowers for shipment. This firm did a tremendous business and I understand their receipts were between \$3,000 and \$4,000 for the week. D.

Nashville, Tenn.

GOOD WEATHER AND EXCELLENT STOCK MAKE EASTER BEST ON RECORD.

An ideal day and a superb stock of flowers made this one of the most successful of Easters. Good Friday was characterized by a steady and continuous down-pour, with no promise of a let up, but Saturday the sun came out genial and warm, and the florist who had felt a few hours before that disappointment was sure to be his, came out as genial as the sun and prepared for a hard day's work. By noon the beautifully decorated windows began to show the draft that had been made upon them, and by night nearly everything had been sold. There was an abundance of lilies, both plants and cut flowers, and plenty of roses. Prices were higher than last year. M. C. DORRIS.

CLOUDS CLEAR AWAY FROM THE EASTER SKIES AND STOCK IS WELL CLEARED OUT.—AGGREGATE OF SALES A LITTLE AHEAD OF LAST YEAR.—CUT FLOWERS AND BLOOMING PLANTS ON EQUAL FOOTING.

All the florists are rejoicing over the Easter business. Saturday morning brought rain and hearts were heavy, but towards noon the sun shone and the rush began. The aggregate of sales was about twelve per cent higher than last year. Probably never before at Easter has there been better stock. Roses, except Beauties, were plentiful and, though selects sold at \$4 per dozen, most of the others went at \$3. Carnations were not over-plentiful, but some splendid fancies were seen. A few Prosperity realized \$2 per dozen but the general price was \$1.50 per dozen for selects and \$1 for ordinary stock. Lily of the valley was much in demand at \$1 per dozen and violets sold at \$3 per dozen. Bulb stock was not much in demand, but lilies brought 25 cents each in the good stores. In plants we have never had a better variety and most of them sold at good prices. Crimson Ramblers were scarce but azaleas, lilacs, spiræas, rhododendrons, hydrangeas and pot lilies all sold well. Genistas were not wanted.

The stores never looked better. Dunlop had a very pretty window of two specimens Bougainvillea Sanderiana, a large vase of cymbidiums and lily of the valley. Tidy had some very select roses and plant baskets in his window, while his conservatory and store were well stocked with good plants.

W. Jay & Son had a nice display of plants and cut flowers. Their greenhouse at the end of the store was a splendid sight. J. Simmons and W. J. Lawrence had nice stock.

Thos. Plumb's new store looked well and for the short time he has been in it, is making rapid progress. H. G. D.

California Carnations.

Our cuttings are rooted without fire heat and are strong, hardy and well rooted. They are so far superior in every way to cuttings rooted by fire heat that they should not be mentioned in the same connection. We guarantee safe arrival and satisfaction.

St. Paul.

PLANT TRADE TAKES THE LEAD AT EASTER. —CUT FLOWER BUSINESS BIG BUT SHOWS NO INCREASE.—VARIOUS NOTES.

This was essentially a plant Easter and everything in that line sold, from the modest hyacinth at 25 cents per pot to azaleas at \$15 each. But the lily is the queen of Easter plants and proved her right to the title by outselling all others, prices ranging up to \$3 and \$5 each. Hybrid roses and Crimson Ramblers also sold at sight. In cut flowers there was no appreciable increase in sales over last season, though there was a heavy demand for stock all the week. In roses Meteor and Liberty seemed to be in greatest demand, showing red to be as much of an Easter color as white was a few years ago. Carnations were good sellers, while violets were eagerly sought after by all buyers. Murillo tulips well done were great sellers. In cut flowers the home supply was wholly inadequate. Large consignments were sent in from Chicago, Milwaukee, Joliet and Council Bluffs. One large consignment of carnations received by Holm & Olson was asleep when it arrived. While full reports are not yet in I think it safe to announce that this year's sales were fully fifteen per cent larger than last year.

One department store handled cut flowers, or rather one florist did business through a department store, but sales were not encouraging. FELIX.

### SPECIAL April OFFER GERANIUMS.

To reduce our stock of 100,000 plants at once, we will fill orders for the following strictly high grade varieties, true to name and first-class in every respect: extra strong top cuttings, well rooted, ready for 2 1/2-inch pots, \$1.50 per 100; \$14.00 per 1000; in Variety—S. BUSINESS AT EASTER VERY SATISFACTORY. —PLANT TRADE MAKING INROADS ON THE CUT FLOWER BUSINESS. — VIOLETS IN GREATEST DEMAND.

As if with one voice the florists of this city say that it was the best Easter in their experience. Trade was heavy during the first days of the week and the retailers generally were prepared for it with a stock of flowering plants far in excess of that of previous years, with the one exception of Easter lilies, the stock of which seemed to diminish quickly as Saturday approached. On that day the weather was fine and willing buyers thronged the stores. The most notable feature of the day's plant trade was the eagerness with which lilies were sought and the stock of them may be said to have been nearly exhausted in most places as early as noon. Azaleas sold well and pans and pots of bulbous stock moved very satisfactorily, with the possible exception of daffodils. There were some fine plants of Crimson Rambler which found ready sale. Novelties in arrangements were little attempted but Porto Rican mats and the improved florists' crepe paper and a moderate use of ribbon played a prominent part in making the various plants attractive and few higher priced plants were sold without these adornments. The anticipated scarcity of roses and carnations the first days of the week was more feared than developments warranted, as the stock was quite equal to the demand, but no surplus was heard of. Violets were fine and in sufficient quantity to meet the demand, which was very good, and with this single exception it may be said that the cut flower trade suffered some to the plain advantage of the pot plant trade.

The club meeting, Wednesday evening, was but meagerly attended, the essayist appointed for the evening not appearing. The time was spent in a general review of the Easter trade, and hearing the report of Messrs. Beard, Dunn and Taylor, of their recent trip to Grand Rapids.

J. F. S.

St. Louis.

RETAILERS HAVE BEST WEEK IN MANY YEARS AND WHOLESALE CUT FLOWER TRADE IS ACTIVE. — PLANT BUSINESS TAKES THE LEAD.

The Easter trade was the best that St. Louis retail stores have seen in quite a number of years. The plant trade, especially, was good, and all good roses and carnations that could be obtained were sold at a good price. Belleville's Easter trade was very good, as was that in the neighborhood of Kirkwood. Stock at Easter was fairly good but there were few of the extra grades and quite a little of pickled material was seen. Violets were very good, but many of them were soft and carnations were inclined to be sleepy. The wholesale prices were maintained for several days after Easter as stock was just enough to supply the demand, but there was, and is still an over-supply of bulbous stock and lily of the valley.

Easter lilies were not up to the standard of former years and some were very poor. They brought from \$12.50 to \$18 per hundred. Callas were very fine and were sold at from \$10 to \$18 a hundred.

Azaleas and Dutch hyacinths were the principal plants sold. A large number of rhododendrons were also handled.

Minneapolis.

TRADE HEAVY RIGHT THROUGH EASTER WEEK.—ROSES ALMOST THE ONLY SHORT-AGE.—GOOD WINDOW DISPLAYS.

Easter week was exceedingly busy and trade pursued a rapid pace right through. Stock in general was good, although some pickled material was received and a few shipments were refused, as goods were old and useless, which is a very provoking matter to the consumer, especially at the holidays. Roses were the scarcest article on the market, while carnations seemed about sufficient to meet demand. Roses commanded a maximum price of \$9, few being sold at less than \$6 per hundred. Carnations brought from \$3 to \$5. Harrisii sold for 25 cents a flower. Other bulbous stock went readily, both in pots and as cut flowers. Violets were scarce and a fancy price was received. There was a good plant trade.

Some of the prettiest window displays seen in this city for a long while were observed last week in the stores of Wm. Donaldson & Company, A. S. Swanson, E. Nagel & Company, Wessling, Mendenhall and a number of others. Some of the choicest blooming plants, lilies, azaleas, hybrid roses, rhododendrons and cinerarias were in each display and credit should be given those whose good taste was shown in the arrangement.

Tarrytown, N. Y.

HORTICULTURAL SOCIETY HOLDS AN INTERESTING SESSION.—FALL SHOW PLANNED.

President Wm. Scott presided at the meeting of the Tarrytown Horticultural Society, March 27. It was decided to incorporate the society. The fourth annual exhibition will be held November 11 to 13 and schedules were distributed. It was decided that a silver medal be offered for the best decorative plant not yet in commerce. Cooke & McCord donated \$25 for a special prize.

The exhibit of the evening was from Alex. E. Hogg and consisted of fine vases of American Beauty, Golden Gate and Sunset roses, and several varieties of carnations. Honorable mention was awarded.

A dozen honorary members were elected and the names of several more proposed. An essay on "Rose Culture Under Glass," was read by Percy Whitney and discussion followed. H. J. R.

CYPRESS

Green House Material

Hot Bed Sash. Red Cedar Posts.

Write for circulars or estimate.

LOCKLAND LUMBER CO., LOCKLAND, OHIO.

Please mention the American Florist when writing

IT IS just as essential in building to get good material, as it is to plant house with good stock.

You cannot get a good cut of flowers from poor plants, neither can you build a substantial house from poor material.

We have made greenhouse construction a special study.

You are welcome to the benefit of our wide experience.

Get our estimate. We can serve you better than your local mill.

JOHN MONINGER COMPANY GREENHOUSE MATERIAL

111 to 115 BLACKHAWK ST. CHICAGO ILL.

SELLING AGENTS FOR

GARLAND IRON GUTTERS.

Use our Patent IRON BENCH FITTINGS and Roof Supports.

IMPROVED VAPORIZING PANS VENTILATING

For Tobacco Extracts, Etc. Send for Circulars.

DILLER, CASKEY & CO., SUCCESSORS TO JENNINGS BROS., APPARATUS. S. W. Cor. Sixth and Berk Sts., PHILADELPHIA.

DILLON'S GREENHOUSE MFG. CO. Bloomsburg, Pa.

MANUFACTURERS OF HOT BED SASH, AIR DRIED GULF CYPRESS SASH BARS AND OTHER GREENHOUSE MATERIAL.

BUILDERS of DURABLE and PRACTICAL Greenhouses at a LOW COST.

Our descriptive circular will be ready about April 1st and will contain valuable information for every florist. Send for it. WE HAVE SOMETHING NEW TO OFFER.

USE THE THADEN WIRE TENDRILS

On Roses, Carnations and Pot Plants.

They are neat and practical. Try them on your pot plants; they will please you and your customers also.

From The Smith & Young Co., Indianapolis, Ind., February 26th, 1902: "Your Wire Tendrils proved to be very satisfactory and time saving. Our roses have a much neater appearance than in former years and we would not go back to the old way of string tying under any circumstances."

Sample package of 100 by mail 60c, or 1000 by express prepaid \$5.00. State diameter of ring desired.

H. THADEN & CO.,

472 W. Hunter Street, ATLANTA, GA.

Ormsby Ventilating Apparatus.

Under Ormsby Patent 11639.

For Greenhouses, Monitor Roofs, etc. It is the lightest, strongest, neatest, quickest and most effective device ever put upon the market. Manufactured and for sale by

M. D. VAUGHN,

Office, 413 Atlantic Ave., Boston, Mass.

THE KINNEY PUMP.

For applying liquid manure it has no equal. Sent prepaid for \$2.00.

THE HOSE CONNECTION CO., Kogston, R. I.

NIKOTEEN advertisement with text: IT COSTS 4 CENTS FOR EACH 600 FEET OF FLOOR SPACE. DOES NOT INJURE THE MOST SENSITIVE PLANTS... Kill AND SAVE the BLOODS Bugs! QUICKLY DOES IT.

NEW TRADE PAPER

"Harrison's Horticultural Advertiser of America" sent free to 5,000 leading nurserymen, seedsmen, florists, parks and dealers weekly. Lowest rates in the trade. Only 50c per inch. Liberal discounts. The very medium you want. Absolutely limited to wholesale trade. Try it.

### The Sterilization of Soil.

In the edition of the AMERICAN FLORIST for March 15, I notice an article on sterilization by "B." Your correspondent is correct in stating that my paper and talk was "from the standpoint of the lettuce grower, i. e., the man who farms under glass." I fully agree with the writer in regard to what he says about going to unnecessary expense in the treatment or prevention of diseases when there are cheaper methods in vogue. I have known for many years that freezing will kill the parasitic nematode or eel worm (*Heterodera radicicola*, Mull.) when done thoroughly, although I have seen instances where cucumber growers had attempted to apply this remedy in their houses and failed because the treatment or freezing was probably not thorough enough when applied under glass. This led me to advocate a more absolute remedy, viz., sterilization, especially in those instances where the soil is not changed and where the expense of renewal is considerable. It should be remembered that in the growing of such crops as lettuce and cucumbers the same soil generally remains in the house for years and is enriched with large amounts of manure after each crop. I know of instances where the same soil has been used for growing lettuce for twenty years and the grower held the idea, which I believe is correct, that it takes time to develop a good lettuce soil.

Since it is not desirable in every instance to remove the soil from a house and freeze it in order to kill eel worms it is practicable to sterilize. A skilled lettuce and cucumber grower informed me what it cost him to remove the soil in his house to the depth of one foot and replace it with new, and from his figures I estimated that it cost him \$37 50 per 1,000 cubic feet, and I know of instances where the cost has exceeded this. The same grower sterilized his house by the rather clumsy tile method three years ago for \$16 per 1,000 cubic feet. This house had ground beds and was utilized for lettuce and cucumbers and sterilization was for soil fungi and eel worms.

With perforated iron pipe W. W. Rawson, of Arlington, Mass., who has a large experience in sterilizing, claims it cost him \$50 to treat a house 40x300 feet, which would not be more than \$4.16 per 1,000 cubic feet. Mr. Rawson sterilized for the drop and so forth.

Both of these methods of sterilizing require considerable shoveling, which amounts to about seventy per cent of the

cost of treatment. G. M. D. Sargent, however, makes use of a method which does not require any shoveling of the soil. His sterilizer is constructed in the form of a harrow with  $\frac{3}{4}$ -inch perforated teeth one foot in length. This apparatus is about 4x8 feet in size and by loosening the soil with a fork it is easily thrust into it. Mr. Sargent sterilized a house 45x160 feet with two men in three days. Estimating the labor at \$1 50 per day, together with the amount of coal burned, it would equal \$2.60 per 1,000 cubic feet. This estimate includes the cost of labor, including a fireman, and the amount of coal burned is based on the extra amount of coal required to heat the additional water employed in sterilizing, assuming the boiler is already in operation. Also 1,000 cubic feet of soil is deducted from this house, which is utilized for walks, etc. As a matter of fact the boiler required little more attention than when ordinarily employed for heating the house, as a constant supply of water and steam was maintained with no difficulty. This house had ground beds and was devoted to lettuce and the sterilization was for the purpose of eliminating soil fungi. Assuming that the work was done when the boiler was not in operation the expense would be at the rate of \$3.46 per 1,000 cubic feet.

I consider this estimate one of the lowest yet obtained as applied to a whole house. Where the soil is removed in a house every year, as is frequently the case in florists' establishments, then the method of freezing the soil as recommended by your correspondent would be the cheapest and most efficient remedy for eel worms in northern latitudes. But since freezing fails to kill various fungi, for the control of which I have also recommended sterilization, we cannot resort to the freezing method of treatment in every instance.

In any method of treatment care should be taken in starting plants in uninfected soil, or the desired object would not be obtained, as your correspondent rightly infers. A great deal can be gained in many instances by starting the plants in sterilized soil and not attempting to treat the whole house. Such treatment accelerates germination and development of plants and is a prevention for certain kinds of damping off. The amount of soil needed for this purpose and the cost of treating the same would be in most cases insignificant. Some tobacco growers in the Connecticut valley have adopted this practice in starting their seedlings.

We have no estimate of the cost of sterilizing soils in benches but will quote a few obtained from lettuce and cucumber growers who have made use of different methods and appliances: Six houses, 36x300 feet were sterilized at the rate of \$5.92 per 1,000 cubic feet; one house 40x30 feet at the rate of \$8.33; one house 30x200 at the rate of \$11.86; one house 23x200 at the rate of \$5.00, and one house 80x250 feet at the rate of \$8.56.

In the latter instance part of this soil was sterilized twice, which perhaps added one-fourth to the cost. All of these houses were treated at a time when the greenhouse was not heated for crop production and the amount and cost of coal is included.

The variation in the price per 1,000 cubic feet is due largely to the use of different methods and appliances. The cost of treating the house 80x250 feet, was \$150. In this instance soft coal was burned at \$5 per ton and the cost of the same equaled sixty-six per cent of the total expense of treatment. The amount and cost of coal also varies with the methods used. From some reliable estimates which we have obtained we find that the cost of coal is from \$1.35 to \$2.83 per 1,000 cubic foot of soil when the boiler is used exclusively for sterilizing, and is not in use for heating the

house. In the latter instance the cost would be less, as only the extra amount of coal burned would have to be taken into consideration.

The writer is well aware that methods of treatment are sometimes utilized without regard to any particular purpose. Our aim has been to recommend this method of treatment only where we knew there is something to be gained. The thousands of healthy plants which we have seen growing in greenhouses, where before sterilization there was nothing but decay and loss, together with the amount of money which has been saved to the grower by this process, is sufficient evidence of its practicability when applied for specific purposes.

GEORGE E. STONE.

#### The Foster Fern.

Of the several new forms of the Boston fern now before the public, L. H. Foster, of Dorchester, Mass., has one of the most unusual. This is a sport of the Boston fern, discovered by Mr. Foster in November, 1900, in a bench of the older variety, with which he has long been noted for his excellent success. The accompanying illustration is from a photograph of a plant in a 12-inch pot and will give a general idea of the habit of growth. The frond was illustrated in this journal in

October, 1901. The spread of the plant shown in the present picture is over eight feet. The long, graceful fronds are described as unrolling indefinitely. The pinnae unwind as in the main frond and Mr. Foster says that he has not yet a plant which has reached its full development, although he has plants in which the older pinnae are over a foot in length, making the fronds over two feet wide, the plant concealing the pot entirely from view. Mr. Foster is preparing to introduce this novelty to the trade next fall and thinks that it can have no better endorsement than the praises it receives whenever a woman sees it. He joins with many others in the opinion that the ladies are the ones best qualified to judge and a new thing which meets with their instant approval he thinks is assured of commercial success. As a house plant this variety possesses all the attributes of its parent. Mr. Foster has bestowed upon it the name of *Nephrolepis exaltata*, "Anna Foster." It was given a certificate of merit at the Boston Co-operative Flower Growers' exhibition March 8, and by the Massachusetts Horticultural Society at its spring exhibition, March 19.

#### Retailers' Profits.

Misrepresentation and wrong conceptions of the florist and his art, in the daily press and elsewhere, have done more damage to the industry generally than any other agency. Before us lies a clipping from the *Union*, of Springfield, Mass., under date of March 25 in which the reporter, basing his conclusions on the erratic statements of some local florist, undertakes to scare the flower buyer from investing in Easter floral gifts by asserting that all material is scarce and prices will be advanced fifty per cent. That every sane florist who reads the screed knows it to be a lie does not help the situation; the mischief is done. Thus we find the florist his own worst enemy, furnishing the sensation-loving reporter with the means to do him and his profession an irreparable injury. Equally culpable is the grower who, dissatisfied with the legitimate compensations of his industry as realized through the best wholesale channels which the ingenuity and enterprise of the times have evolved, seeks to bring about a breach between the people who spend their money for flowers and the retail people whose interests are his own interests. In this connection the following letter, received under date of April 1, 1902, will no doubt prove interesting:

ED. AM. FLORIST:—I write you on a subject which I think will interest you and the trade in general.

For years from time to time it has been remarked that the retail dealer has made all the money made in the florist business; in fact it is generally understood that his sales are mostly profit, no consideration having apparently ever been given to the expense of carrying on a large establishment. Consequently the retailer has been censured for what the flower-buying public term "robbing" and no matter how reasonable flowers might be at times I have known purchasers to complain and have often wondered what it meant but have now for the first time in twenty-two years had an opportunity to find out.

I sat at a fashionable dinner table a few nights ago, and on my left sat a gentleman whom I had never met before. He was very intelligent and during the meal we conversed on almost every subject until he was attracted by the centerpiece of flowers which was composed of American Beauty roses. "What a beautiful lot of roses," he remarked, and I said, "Yes." Not knowing me he said: "They are Americans and fine ones and they must have cost a fortune," to which I again replied "Yes," and, while it was very bad form to discuss this subject at this time, I politely asked him what he thought they had cost, to which he responded that at the rate a friend of his had paid for some in Boston last

NEPHROLEPIS EXALTATA "ANNA FOSTER" IN A 12-INCH POT.

A VIEW IN THE FAMOUS GROUNDS AT DONNER'S PARK, NEAR HAMBURG GERMANY.

week, this centerpiece must have cost at least \$2.0, on an estimate of \$10 per dozen, and that the man who furnished it must have made about \$150 on it. I said that it was impossible, to which he replied: "No it is not, for I will tell you what these florists do. This friend of mine bought a dozen American Beauties and paid \$10 for them, and the husband of the lady who received them, who, it appears, grows roses for pleasure (and gain) happened to meet the donor a few days after and told him it was lovely of him to buy flowers for his wife but that he was 'sending coals to Newcastle,' as he grew roses himself, when the sender remarked: 'Had I known that in time I could have saved \$10.' The gentleman grower for pleasure remarked: 'Oh, the robbers. They only paid me 6 cents apiece for them,' thus giving the buyer at once the impression that he had actually been robbed."

Now this little circumstance throws light upon the peculiar methods of some growers of whom we have representatives in this vicinity who from time to time come to town, and, meeting flower-buyers, tell them yarns about getting 6 cents for American Beauties but not stating the length of stem or other qualities and also forget to relate how they demand and get from 50 cents to 75 cents for what a retail man has to sell again at a close margin. CHARLES THORLEY.

#### Lemoine's Hybrid Deutzias.

There have been notes in this paper from the originators, Lemoine & Sons, Nancy, France, covering this subject but it may interest some readers to have an account of the behavior of these deutzias as forcing plants in America.

Last December one each of the following varieties was potted, and came into bloom in the order given: *D. gracilis rosea* started to bloom about the first week in February, but *D. Lemoinei Boule de Neige* was only just at its best at the beginning of the second week in March, and at that date *D. gracilis rosea* still carried some good flowers.

*D. gracilis rosea* has the same habit as *D. gracilis*. It is free flowering, the

exterior of the flowers light pink, interior slightly rose tinted.

*D. gracilis campanulata* is a stronger grower than *D. gracilis*. Free flowering, the flowers are pure white, nearly half an inch in diameter and cup shaped.

*D. gracilis venusta* is more upright in habit than *D. gracilis*. Very free flowering, the flowers are pure white, nearly as large as those of *D. gracilis campanulata*. The petals are extra broad, giving the flowers the appearance of miniature azaleas.

*D. discolor grandiflora* is more upright in habit than *D. gracilis* and very free flowering. The flowers are of good size, slightly tinted rose.

*D. Lemoinei compacta* has sturdy, upright habit and is very free flowering. The flowers are pure white, the inflorescences compact and rounded.

*D. Lemoinei Boule de Neige* is of upright habit and a much stronger grower than either *D. Lemoinei* or *D. Lemoinei compacta*. It is very free flowering, the flowers cream-white, inflorescences compact and rounded.

Of the *D. Lemoinei* hybrids, *Boule de Neige* is the best. Both the individual flowers and the inflorescences are larger than either *D. Lemoinei* or *D. Lemoinei compacta*. Of the *D. gracilis* hybrids *D. gracilis campanulata* is the best, although *D. gracilis venusta* is very good. *D. discolor grandiflora* has the same petaloid filaments to the stamens as *D. discolor purpurascens*, but is not so distinct in color. *D. Lemoinei*, *D. Lemoinei compacta* and *D. Lemoinei Boule de Neige* are all hybrids of *D. gracilis* and *D. parviflora*. *D. gracilis rosea*, *D. gracilis venusta* and *D. gracilis campanulata*, are

all hybrids of *D. gracilis* and *D. discolor purpurascens*. *D. discolor grandiflora* is a hybrid of *D. discolor purpurascens* and *D. gracilis*.

The shrubs used were two years old, from the ground. After potting, about the first week in December, they were kept quite cool, under a greenhouse bench, for four weeks, then brought into a temperature of about 50° to 55° at night and 60° to 65° in the day. If they had been kept cooler as soon as they were in bloom they would have lasted, in good condition, much longer. We have not fully tested their hardiness in the open ground, but I think there is not much doubt as to hardiness in this section, Massachusetts. *D. corymbiflora* and *D. discolor purpurascens* were not hardy here. R. M.

#### A Famous German Garden.

When the ocean traveler, bound for Hamburg, after entering the mouth of the river Elbe at Cuxhaven and passing Brunshausen, Hamburg's station for her big ocean greyhounds, follows the lines of the river banks with his eyes, he will notice that the aspect of the country gradually changes from the generally low, flat formation to a more interesting and cheerful character. At Blankensee the shores draw in closer and the left bank rises to a natural elevation extending all the way up to Hamburg. He discovers along the crest, amid masses of trees, stately mansions, with wide vine-clad piazzas. Spacious lawns dotted with splendid old specimen trees and clumps of shrubbery alternate with densely wooded sections. It is here that the elite of Hamburg have their beautiful homes. Here

are the old, well-known parks of Baur, Hesse and Wright, here is Ræcker-Jenisch of orchid fame, but the most imposing of the many country seats along the Elb-Chaussee is doubtless Donner's Park, the estate of Frau Etatsraetin Donner.

To visit this park we enter through the main gate, on the Flottbecker Chaussee, and call on Garteninspector Theodor Reimers, the general superintendent. It is a stalwart horticulturist we meet, always ready to cordially receive those whom real interest and not mere idle curiosity induce to inspect the grounds. He leads us through his orchards, noted for their large collections of fancy fruit trees, grown in all forms and shapes. Here we see skillful and careful trimming and cultivating amply rewarded by heavy burdens of faultless fruit. We are shown some of the model graperies for which Hamburg has a world-wide reputation, and the herb and flower garden adjacent is another feature of interest. Dahlias with such an abundance of perfect flowers, from July until the frost sets in, command admiration, but also, by their whole appearance, give convincing evidence that the climate on the banks of the Elbe is decidedly more favorable to them than the summers on the shores of the Delaware and Hudson.

After descending a steep, densely wooded declivity we reach the hothouse department. It is only the desire to keep within the limits of a single article that causes me to refrain from going into details as to the splendid collections of orchids, nepenthes, sarracenias, palms and rare stove plants. May it suffice to say that whenever Hamburg prepares her horticultural exhibitions, no difference if local, national, or international, it is always greeted with keen satisfaction when Mr. Reimers announces his intention to appear with the treasures of Donner's Park. As a matter of course he never leaves the field of honor without a due share of prizes.

There are from eight to ten trained assistants employed in the numerous greenhouses and, needless to say, the rare opportunity for young gardeners to broaden their knowledge is a strong attraction to seek engagement and profit by the guidance of Mr. Reimers, who with pride tells us how many of his disciples occupy prominent positions all over Europe and even abroad. While engaged in an interesting talk with our host, we have taken the direction towards Villa Donner and are just crossing a creek connecting two large ponds, when curiosity is aroused by a frail looking suspension

bridge on the opposite side. Here Mr. Reimers, omitting our inquiry, turns into a walk along the shady edge of the pond. From the small island yonder white swans take to the water and with mighty strokes plow over to investigate if there is prospect of getting the customary tribute, but as soon as the meanness of the strangers becomes evident, steer toward the remotest section, thoroughly disgusted.

Walking around some trees at the next bend we find ourselves suddenly in front of the object of our former curiosity. Yet pond and bridge, while attracting a visitor to this section, only serve to make the waiting surprise complete. Stepping on the bridge our eyes dwell upon the most unexpected and for this reason not less bewitching scene. We gaze into a deep abyss. The walls of stalactite and crude stones are partly covered with moss and ferns. Here and there we see a shrub or a dwarf tree, endeavoring to take a foothold between huge rocks, and over the ledge, from the pond above, several streams of clear water are rustling down into a large pool-like basin. There is an instant of utter amazement after which we turn to Mr. Reimers who has watched us with no little joy. "Yes, it is all artificial work and entirely designed and executed by myself," and as we are walking down to the base of this masterpiece of landscape art he begins to eulogize the liberality of Frau Etatsraetin Donner, which enabled him to carry out his plans.

Villa Donner is a castle-like, gothic structure of considerable extent. With its wide, high terraces, facing the river Elbe and its elaborate, gothic flower parterre, the place outrivals many of the various princely residences of Germany. Speaking of the grounds at large, the thoughtful distribution of light and shade and the thoroughly artistic and frequently highly picturesque formation of the scenery is impressive. The age and consequently full effectiveness of the arborescence further tend to make Donner's Park a true object of study for the landscape gardener.

Hamburg in general is famed for its beautiful suburban homes. Harvestehude, Uhlenhorst and, in fact, the whole section around the tüssen Alster is noted for its model gardens. But fair as a view upon the swan-enlivened, glittering Alster sheet may be, it becomes insignificant when compared with the grandeur of the lower Elbe. The old Hamburg patricians were well aware of the advantages of the location when settling on those elevated banks. Here, from a distance just wide enough to make the noise unobtrusive, generations have enjoyed the grand, ever changing picture offered by the traffic on the channel to one of the world's first seaports. And again, those old, magnificent mansions, in their proud repose, environed by artistically moulded pleasure grounds have taught the world's travelers of the wealth and the refined and highly cultured taste of Hamburg's great financiers. The Elb-Chaussee certainly is one of those sections the old Hansa city may be justly proud of.

RICHARD ROTHE.

LAWRENCE, MASS.—A. H. Wagland has removed the Halley greenhouses recently purchased by him to the corner of Broadway and Whitman street.

QUINCY, MICH.—A. B. Cole has sold his greenhouses and stock to Van Aken Brothers, of Coldwater, and has made a year's contract with that firm for his services. The houses will be removed and re-erected at Coldwater.

VILLA DONNER AND THE FORMAL GARDEN, DONNER'S PARK, NEAR HAMBURG, GERMANY.

## CHRYSANTHEMUMS.

### PROPAGATING.

All stock plants from which you intend taking cuttings for the coming season should be in a good light house and kept free from insects. Tobacco dust will keep down aphid, black or green. If your stock is in a house you do not fumigate, a light dusting of air-slaked lime once or twice a week will keep slugs or wood lice from eating the young shoots, if you are among the unfortunates who are troubled with these pests. Plants kept over in pots or those planted in boxes, from the beds last fall, are all right. With all decayed leaves and weeds cleaned off and put on a light bench plants stored close together in boxes over winter, will give a fine lot of cuttings.

New varieties or ones you are short on should be rooted at once and planted out in a warm house as soon as well rooted in a 2-inch pot. In this way you can get up a good stock from a very few plants, and the plants so treated will make good pot plants for commercial purposes after you have taken what cuttings you want. The time for taking cuttings depends a good deal on the varieties and purposes for which they are wanted. April 1 is right for exhibition flowers of most sorts. Short-jointed, hard-wooded varieties can be propagated a month earlier. Fitzwygram, the earliest white and yellow we have, should be propagated in March, as it is necessary to use the crown bud in July to get the best results. Other early varieties for commercial flowers can be put in the sand from April 1 to May 15, according to the growth of the different varieties and size of flowers wanted.

Free growing midseason and late varieties can be started in June and July and will produce good flowers.

Do not put in weak or unhealthy cuttings. A good start is as necessary with the free growing chrysanthemum as with other plants. Chrysanthemums will root quickly in an ordinary propagating house at this season of the year. Finely sifted coal ashes make an excellent material for rooting chrysanthemums and will keep the cuttings in good shape longer than sand if you are pressed for time or room, which will delay potting off after the cuttings are rooted.

REDNAX.

### SPECIMEN PLANTS.

Specimen chrysanthemums should now be in 6-inch or 7-inch pots. Ours are in "sixes." As to whether we shall repot them before making the final shift into the blooming size depends upon press of work, but if we were in the business of exhibiting we should certainly shift them. At any rate, if "twelves" are intended, it would be better to give them a month or so, in "sevens." If it were practical I would even advise another shift, into "nines," before the final one.

Some of the best plants I have ever grown have been indifferent at this stage. They were intended originally for specimens, but, not being considered good enough when making the final selection, were potted into "nines," for decorative purposes. They made neat plants, and being scarce colors, we found it necessary to give them special attention, and they were transferred to larger pots even as late as August. They took hold quickly,

and made fine specimens. Such as these almost always break well and hold their foliage better than those that have been longer in larger sized pots. Owing to their enormous vitality, and the ease with which they may be handled, most wonderful results have been attained by those who have time to give them special care.

Very close pinching must be practiced from now onward. It is a mistake to let the shoots get long. A plant which breaks well now will be almost sure to make a good specimen. Sometimes at this stage certain varieties will make flower buds and it looks as if they would be useless, but later they will break away and if they be varieties of indispensable colors, we must persevere. As the days lengthen they will grow rapidly. Plenty of air and good light are essential. Years ago I used to put my plants, at this time into a cold frame. I don't do so now, because I haven't the convenience. When I did, I got short jointed, sturdy plants. They did not make as large specimens, and were dwarfer. It is a good practice, and I advise it. We were driven to give it up on account of the chinch bug, and the "ants cow," a root aphid, which ants "farm." We had to give up growing Chinese asters about the same time for the same reason, but lately have not been troubled.

We were very much pleased with a mixed lot of unusual varieties, grown last season for decorative purposes. They were grown in varying sizes, from 6-inch pots to 10-inch. They were not staked with a view to making trained specimens, some hardly staked at all and many were decidedly unsymmetrical. We had trained

specimens, too, and these were used singly or in separate groups where their regular outline had the best effect, but for grouping, blending of colors, in massing or with other plants, these untrained plants are unexcelled. All the types were represented, including the large Japanese form in well-known varieties. Among these Petaluma, a chrome yellow, quilled variety was conspicuous. Heron's Plume with twisted flowers, like a bundle of white paper; Shavings, odd as its name implies; Mme. Rogers, the green chrysanthemum; pompons, pompon anemones, large anemones, Chinese incurved and reflexed, and last, but not least, the Mizpahs, single flowered varieties in white, yellow and rose pink were all attractive.

T. D. HATFIELD.

## CARNATIONS.

### PREPARATION FOR FIELD PLANTING.

The time for planting carnations will soon be here and, indeed, in some sections it is already at hand, as early planting has come to be regarded as essential to success. Whenever the ground is in good condition and danger from severe frosts is over is the time to plant. If your plants have been properly hardened off there is no danger in a light frost, as the very slight injury they may receive is more than counterbalanced by the advantage gained from the early spring rains.

Preparation of the soil is largely a matter of local conditions. Where you have an abundance of room there is no method like that which might be known as the horse and harrow method. That is making the distance between the rows from twenty-four to thirty-six inches, so that a horse cultivator can be run between the rows as often as may be necessary during the summer. The best method of making the rows for planting is to throw them up six or eight inches

Where room is limited the young stock can be planted in beds three feet wide, planting them 8x10 to 10x12. The latter distance is the best, as you can then run between them both ways with a hand cultivator, cultivation being the key note to get good plants in the field.

Where it can be procured, there is nothing equal to stable manure as a fertilizer and it should be put on at the rate of from 100 to 200 tons per acre. Some saving can be made by applying it in the row, but this requires extra labor and you will want your field good and fertile for results, so that it is best to make the application of manure over the whole field.

To fertilize in the rows the best method is to furrow out the rows and then put in the manure. After this is done throw the soil back over the manure so that it is six inches above the level as previously stated. This does not put the young plants in immediate contact with the manure but as soon as the rootlets get started they will find the manure and the plants grow accordingly.

When manure is not available the next best substitute is a good ground bone, known as bone meal. Do not use bone flower. It is quicker in results but will not last the plants for their term of outdoor culture, whereas the bone meal will. This is best applied in the rows, for horse cultivation, care being used that it is not put in so heavily as to injure the plants. It is this liability of injury from commercial fertilizers that makes the manure so much better and safer to use. In using bone meal be sure and use some that you have had previous experience with, so that you can apply it intelligently. Where the beds are used for planting the manure or bone meal, of course, has to be applied to the whole bed.

Under no conditions use prepared manures or phosphates for outdoor culture. These will, under good conditions, give very good results, but with adverse

very dangerous in the hands of an inexperienced man, so if you do use them be sure and use some preparation that you have had previous experience in handling.

In plowing or digging your beds where practicable do it to a depth of ten or twelve inches but do not go into the subsoil. It is better to have but six inches of good soil than ten or twelve mixed with a poor subsoil. It should be well pulverized to its full depth so as to give the roots a nice, mellow soil, as the mechanical condition is often as important as the fertility.

It is a good plan to prepare the soil as soon as you can get into the ground, so as to be ready for planting on the first good opportunity. I have found this to pay even when in some cases we had to do the work of preparation the second time. Planting just at the right time is the watchword for April.

ALBERT M. HERR.

## THE EASTER TRADE.

The following are a number of belated Easter trade reports:

**MALDEN, MASS.**—E. A. Kelley found Easter one-fourth better than last year, prices excellent and enough stock. Carnations were particularly in demand.

**MILWAUKEE, WIS.**—J. M. Fox says that he found no scarcity of Easter lilies this season. They were not so much in demand as heretofore, except as pot plants.

**VICTORIA, B. C.**—The Easter business was about as last year. J. T. Higgins says the holiday supply is still under the demand and all stock was sold without fully meeting the call.

**OLEAN, N. Y.**—Easter weather was disagreeable but W. C. Ross reports good business. E. A. Llewellyn notes good prices. D. R. Herron cleaned up an enormous cut of carnations.

**ROCHESTER, N. Y.**—Prices were rather lower than last year, because of abundant supply, but sales increased twenty per cent. J. B. Keller says more flowering plants and violets were sold than ever before.

**VANCOUVER, B. C.**—Easter was about as usual. Lilies were not ready and carnations and roses were also scarce. Flowering plants sold well. James Pont says bulbous stock was the last to move.

**DALLAS, TEX.**—The Texas Seed & Floral Company says Easter sales increased fifty per cent, with plenty of stock. Plants sold well, especially lilies and azaleas. Lilies and carnations went best among cut flowers.

**SAVANNAH, GA.**—The loss on lilies was half, so that supplies were short at Easter. More flowering plants might have been sold, Azalea Indica going best and Azalea mollis not at all. There were enough carnations but more roses could have been sold.

**TOLEDO, O.**—Mrs. E. Suder says business was half again heavier than a year ago. There were enough plants and the home supply of cut flowers was made ample by shipments from wholesale centers. Crimson Ramblers and hydrangeas did not seem to be wanted.

**POUGHKEEPSIE, N. Y.**—Easter sales were double those of last year, reports M. J. Lynch. Violets and fancy carnations were higher than a year ago. Lilies and azaleas were wanted but there were enough of other plants. Beauties

VIEW IN ASPARAGUS HOUSE OF W. H. ELLIOTT, BRIGHTON, MASS.

higher than the level of the field and then, when planting, level them down a couple of inches with a rake. Doing this right ahead of the planter gives a nice, moist soil in which to set the plants from six to eight inches apart in the rows, according to the variety.

weather these fertilizers are often a decided detriment to healthy plant growth and therefore very unsafe to use. Where you have facilities for watering and thus in a measure control the moisture conditions of your soil, these manures can be used to good advantage, but are

THE CONSERVATORY OF BERTERMANN BROTHERS, OF INDIANAPOLIS, AT EASTER.

and violets were the popular cut flowers and the only shortage. Well grown flowering plants seemed to have the call.

**JACKSONVILLE, FLA.**—In connection with a good increase in Easter sales C. D. Mills notes a growing appreciation of and better demand for the best in flowers and plants, and a willingness to pay fair prices for them. There has been a big advance in the last five years.

**FARGO, N. D.**—Shotwell & Graver had a very good Easter, with plenty of roses and carnations but a shortage on lilies and other flowering plants. Shipping trade was bad because of floods, which cut off some towns for a week. They had some shipments caught by the freshets.

**BANGOR, ME.**—The weather spoiled the Easter business; Carl Beers says he never saw such unfavorable conditions. Lilies were fine and plentiful but there was nobody out to buy them. There was an overstock of everything. Of plants lilies were most popular, azaleas least so and of cut flowers carnations went best, bulbous stock slowest.

**OAKLAND, CAL.**—H. M. Sanborn says the lily crop was almost a failure and that the supplies of this item were sold out clean. He found the heaviest call for lilies in pots, azaleas and rhododendrons, but the plant supply was adequate. All cut flowers were in good demand and supplies short. Prices were somewhat above the usual Easter level and sales were thirty-five per cent heavier than last year.

**READING, PA.**—Prices were better than a year ago but the aggregate of sales was about the same. There was enough of everything except the lily. Next in favor was the azalea and Hoskins & Giles note that it was the large plants which sold. Roses, carnations and violets were in great demand.

**NEW ORLEANS, LA.**—The Easter increase was about fifteen per cent but U. J. Virgin says prices were about as usual except on lilies, which sold at twenty-five per cent advance. There was enough of everything, all plants except lilies being slow sale. Lilies also lead the cut flowers and Mr. Virgin found carnations least called for.

**MILWAUKEE, WIS.**—There was more call for plants than for cut flowers, but the demand for the latter was heavy. Wm. Edlefsen says the business was immense, exceeding last year by twenty-five per cent. Prices were higher than usual, but there was enough stock. He found hyacinths and azaleas very popular, and a big call for spring flowers.

**WILMINGTON, DEL.**—Prices were better than at last Easter and W. H. Vance thinks sales increased ten per cent. The shortage in cut flowers was caused by most of the growers shipping to Philadelphia. The supply of blooming plants was about right for lilies but hyacinths were in over-supply. One grower rented a store for the week and, finding himself long on hyacinths, being somewhat of a humorist, put a sign in his window "Stuck," spelling the word with the

plants, each letter a different color. Carnations were in greatest demand. The growers find their best market on the street at Easter.

**BUTTE, MONT.**—Easter brought the greatest call for carnations in the history of the trade in Butte. Law Brothers sold 4,500 over the counter and did not have near enough. More than two-thirds the cut flower supplies were shipped in. There were enough plants except lilies and Harrisii and carnations were the only items higher than a year ago. Sales increased twenty-five per cent.

**ADRIAN, MICH.**—Easter trade was twenty per cent in advance of a year ago, with ample supplies of plants and all cut flowers except carnations. Of plants the least demand was for cinerarias and the greatest for lilies. In cut flowers the least call was for bulbous stock and the greatest for carnations. Nathan Smith & Son find, by reference to last year's record; that the charge sales were in excess of cash sales, but this year it was reversed, from which they infer that the people have more ready money to invest in this class of goods.

**MORRIS, ILL.**—The receiver for the Morris Floral Company sold the plant at auction April 3, it being bid in by A. B. Hull for \$4,606.

**PROVIDENCE, R. I.**—The daily press has it that Mrs. Wm. B. Bannigan, a widow reported to be worth \$2,000,000, is to marry Timothy O'Connor the well known florist.

### The Practices of Nurserymen.

[A paper by H. J. Koehler, read before the Hartford Florists' Club, March 11, 1902.]

The only introductory remark I have to make is that I do not wish to be understood as saying that all nurserymen are frauds. I believe the standard of integrity in the nursery business to be that of the commercial world in general. Likewise evil practices are to be met with among nurserymen as well as among other business men. It is hardly necessary to say that it should be the constant endeavor of all concerned to try to eliminate these evil practices. Any further moralizing on the matter I will leave to my hearers.

The commonest form of fraud is, undoubtedly, the substitution of a different kind of plant for the one called for. This applies to all kinds of stock, but particularly to fruit trees and to roses. Such substitutions are usually the cause of loss to the buyer far in excess of the price paid for the goods. The latter is comparatively a small item in the total. If a professional fruit grower has been so defrauded he has to wait some years before he discovers the truth. The result is, his labor, time and money spent taking care of those trees is a total loss, in addition to their original cost. If an amateur has been the victim, his eager watching and nursing of his few pet roses and trees are followed by bitter disappointment.

Near the close of the packing season, when stock in a great many lines is apt to be exhausted, in some nurseries substitutions are made in the most reckless manner. I have known an order for several hundred peach trees in six varieties to be filled out of a lot containing only two varieties. When the Bismarck apple first came on the American market the stock was all very small and light, say about three feet high. One firm which had quite a number of orders for it, but did not have the stock, picked out a lot of fourth class, stunted trees from its apple blocks, regardless of the kinds, and palmed them off on their customers as the real thing.

A nurseryman once ordered several thousand roses from England to be delivered in time for the spring packing season. Among this lot were to be 1,500 Jacqs. On the strength of this he took an order for 800 Jacqs from a local firm to be supplied out of the 1,500. When the English roses arrived it was found that only 100 Jacqs had been sent instead of the 1,500, the balance having been made up of other kinds, all correctly named, however. This was a great disappointment to the importing nurseryman. Nevertheless he filled that order out of his English stock, by substitutions, of course. These English roses came done up in bundles of ten, each bundle being labeled. Now in order to carry out this fraud successfully it would not have done simply to substitute Jacq labels on the original packages of the goods for this reason: It was found impossible to make up the 800 out of one kind, as there were not that many of any one kind in the whole importation. Had the 800 been made up of a half dozen different kinds, and the packages left intact, even a person not an expert would have been very apt, in the handling, to have his suspicions aroused by the lack of uniformity in the appearance of the bundles, and so the imposition would have been discovered. To obviate this difficulty the bundles were all untied and then the roses were retied into bundles of ten, each containing a pretty even mix-

ture and bearing a Jacq label. Thus the bundles were given a uniform appearance, enough so at least, so that the deception proved a gratifying success—to the seller of the goods.

Weeping trees are sometimes seen on the market which a year or two after planting mysteriously assume an upright habit of growth. Such trees are not weepers at all, but quite ordinary ones, whose branches have been artificially forced to temporarily hold a drooping position by being tied down. Budded roses are often sent out for own root roses when the latter are distinctly called for in the order. I have heard of asparagus roots being sent out for clematis. There is quite a resemblance in the roots of these two plants.

A longer list of instances of substitution might be made, but I will now turn to other forms of imposition. Sometimes nurserymen will take orders for planting stock in the fall, which they know will not live if transplanted at that time, and which they are sure to be obliged to replace when the customer finds, the next season, that his plants are all dead. This is done in order to more quickly secure the cash than if the truth were told and the whole operation deferred until spring, and also to avoid the possible danger of losing the customer entirely, who during the winter months might change his mind in regard to the matter and not order the goods at all, some nurserymen holding to the idea that a customer ought be nailed whenever the chance offers, even if it be only once. In such cases the price charged for the goods is usually large enough so that there is still a margin of profit left after the dead plants have been replaced. Even if the transaction leaves the nurseryman financially square only, it may have served its purpose, as the nurseryman has had the use of the money.

Substitutions in such things as H. P. roses, fern-leaved and purple beeches, and so forth, whose identity is revealed the first summer after transplanting, are sometimes made with this same idea in view, that a prospective customer's good money should not be lost by owning up to the lack of such things. When the buyer comes back the next season and makes his kick, the matter is smoothed over by replacing the stock and telling him that it was not a willful substitution, but the mistake of some careless or ignorant employe. Thus it is even possible that a nurseryman might, through deception, acquire the name of being a pretty good kind of a fellow, since he has not only acknowledged his mistake but has also made it good.

Nurserymen occasionally take orders for stock and then fail to deliver it. Cases have occurred where the reason lay in the fact that after the order had been taken an opportunity offered to dispose of the goods at higher prices than those at which the goods were originally promised to the first man. In a similar case I suspected the seller of having taken an order with the idea that he would fill the order if he could, but that in any event he would prevent the other fellows from getting any part of the order for that season at least.

Once in a while a customer who is looking for a certain kind of plant is induced to visit a nursery by being told that they have there just what he wants, and that he had better go and have a look at the stock, the fact being, however, that there is not a single plant of the kind on the place. This is done merely for the purpose of getting the man to the nursery,

with the hope of selling him something else. The scheme does not always work out just that way, and the would-be customer's ire is sometimes aroused with dramatic results at having made a long journey in vain, but of course risks have to be taken now and then.

While on the subject of frauds it may not be amiss to refer to the resolute tree agent and his disappointed customer. The latter had bought a pear tree, supposedly a Bartlett, from the former. The first year it bore the buyer watched the developing fruit with great eagerness, but what was his disappointment when it proved to be not a Bartlett, but something else. Of course, he had it in for the agent, and on his next trip around demanded of him an explanation. The tree agent, one of the tough-skinned, imperturbable kind, calmly waited until the fury of his customer's wrath had expended itself, and then asked what the price was which he had charged, the matter having slipped his mind. The customer replied that it was 50 cents, whereupon the agent made the rejoinder that certainly no one could expect a 50-cent pear tree to have Bartlett pears the first time it fruited.

### Herbaceous Plant Notes.

Where the herbaceous plants have had a thorough cleaning during the fall or early winter months and the ground has been forked over at the time, the plants may be left alone for several weeks to come, excepting that the covering, if such has been applied, should be removed at once. But where the fall work has been neglected for one reason or another, the sooner we can give them a good cleaning the better. After decayed and damaged leaves and old stems have been removed, some short manure should be forked in around the roots. This is especially needed in beds or borders which have not been disturbed for several years and are closely planted. The majority of these plants are great feeders, requiring additional nourishment as the clumps enlarge year after year. If the clumps are getting too broad, or show signs of weakening in the center, then it is time to take them out to divide them, but don't cut them up too small. Generous pieces will usually bloom well the first season. Plants which send out long wiry, stems under ground, should have these unruly travellers removed when forking over the bed.

For new plantations, spring is probably the best time but planting should be done early, before much growth is made. This is the time for vigorous new root formation and when planting is done properly, every plant will grow for us now; later the sun may get too strong, the ground may dry out and a percentage of the young plants may then be lost. In borders always plant large patches of one species together; single plants, mixed up with others, are usually lost and make no show. Arrange as to height, but avoid being too formal in the arrangement. At least some of the plants near the front should be of medium height. Avoid sameness in foliage, habit and growth in neighboring groups. Have an eye to diversity in flowers as well as in leaf. Distribute early and late blooming species and varieties equally over all parts of the beds or borders.

Where herbaceous plants are employed among or in front of shrubs, the growth of the latter may in some instances indicate that there is not enough room left for the perennials and then it is advisable to do away with part of these

or all of them, for under crowded conditions we could not expect good results as to flowering or growth. Better have less flowers of good quality than a lot of poor ones.

For the florist, who grows these plants for cut flowers, rows planted in the field are most convenient and easily kept clean. Ample room is here allowed for spreading and frequent replanting is also avoided to some extent, at least with many of our hardy cut flowers this is the case. The various Japan anemones, all the irises, *Dictamnus fraxinella*, *Iberis*, *æthionemas*, *anthericums*, *aquilegias*, *Stokesia cyanea*, several of the spiræas, *platycodons*, *Clematis recta*, the *astilbes*, many *campanulas*, *dodocatheons*, *gypsophilas*, the fibrous rooted *aconitums*, *hellebores*, *pyrethrums*, *Heuchera sanguinea*, *lupinus*, *Omphalodes verna*, *pæonias*, the large flowering *papavers*, *Scabiosa Caucasica*, *statices*, *trolliuses* and *ranunculuses* may remain undisturbed in the same place for a great many years. J. B. K.

#### Chicago.

MARKET FULL OF SLUGGISH STOCK — EVERYTHING IN AMPLÉ SUPPLY AND MOST ITEMS SELLING SLOWLY.—GROWERS BEGIN TO GROWL.—BEAUTY MARKET IN A BAD WAY.—MANY FLOWERS AT THE COUNCIL MEETING—THE CLUB TRIPS THE LIGHT FANTASTIC.—STREET SALESMEN NOW HAVE STORES.—MANGEL IN NEW QUARTERS.—DOINGS HERE AND THERE AMONG THE CRAFT.

This has been a week of unusual and unwelcome quiet in the wholesale market. The local demand has been very light and shipping trade not what it usually is. There seem to be large supplies throughout the country, particularly on Beauty and tea roses, so that many outlets are shut off. While almost all lines have been overstocked, and the growers complaining, the effects of the glut have perhaps been most manifest in the Beauty market. It is seldom that there is adequate supply of this item, but for the past two or three weeks the receipts of long-stemmed material have been greatly in excess of the requirements. The result is that big buyers have been permitted to clean up to the stock at what seems ridiculously low prices. Several sales are on record where lots of from 200 to 500 have been sold at from 10 cents to 15 cents per bud and \$20 per hundred has been frequently taken on stock which a month ago was short of the supply at \$4 per dozen. While the receipts of Bride, Bridesmaid, Meteor and Golden Gate have been in excess of the requirements, they have been cleaned out fairly well, although at low average prices. The carnation receipts are heavy, and as a rule the stock is of extra quality, but it all hangs fire. However, the cuts are so heavy that the growers are getting a pretty good sum of money out of their houses. There seems to be no great over-supply of violets, although rates are low, and bulbous stock is not accumulating.

John Mangel is in his new stand at the corner of Wabash and Monroe, succeeding John C. Schubert. This is the old Gallagher stand and Mangel will do credit to the traditions of the place. His first act was to fill the windows as full as they would hold of the best cut flowers on the market.

The annual entertainment and ball of the Chicago Florists' Club at the drill hall in the Masonic Temple last Tuesday evening was one of the most successful events of the kind on record. There was

a large attendance, although the financial outcome has not yet been determined, and the vaudeville programme, by professional talent, was thoroughly enjoyed, after which came the dancing. The committee to whom credit is due for their efforts in behalf of the club was John Degnan, P. J. Hauswirth and Edw. Enders.

The street salesmen are now nearly all under cover. Several of them have very neat little stores and the rest are rapidly getting placed. But their absence from the streets in times of abundance like these is an injury to the growers, for they are not able to handle the quantity of material they used on State street. The retailers are discovering a new phase of the situation, for their customers, who would not patronize the Greek at the curbstone, will go into his store to buy of him.

Last Monday was installation night at the city council, the occasion for the annual display of flowers. As usual the "creations" were numerous and unique. Probably John Enzweiler has the credit for the most notable design. It was a full fledged warrior six feet high, of red carnations, made for Alderman Thomas Carey, of the Twenty-ninth ward, upon the order of his organization, known popularly as Carey's Indians.

Walter L. Tonner, son of John P. Tonner and for some time manager of his father's business, was married March 29, at Mont Clare, to Miss Louisa F. Clark. The home of the bride was handsomely decorated for the occasion and the ceremony was followed by a banquet to which many in the trade sat down. Mr. and Mrs. Tonner will reside at Galewood.

Luke Collins, formerly foreman for Wietor Brothers and now in charge of a section at Peter Reinberg's, has leased the Eagle range of glass south of town and will start to growing for his own account.

E. C. Amling says that he expects the South Park Floral Company's Beauty cut to increase rather than decrease, but in general the supplies of this item will shortly be greatly reduced by replanting.

The Art Floral Company was a heavy loser in a fire on Monday morning which destroyed the row of frame buildings in which their store was located, at 3907 Cottage Grove avenue.

George Reinberg is getting busy with his building operations but he is going to take his mind off of it long enough to see to the planting out of the biggest field of carnations on record.

Peter Reinberg is making a record with the size of the orders he is handling these days. Yesterday he shipped 10,000 carnations, 2,000 roses and 500 long Beauties to one buyer.

J. A. Budlong is at work upon six new houses 27x200. They are considering adding three more of the same size this season.

Lawrence Becker has opened a store at 1240 Bryn Mawr avenue, in Edgewater.

J. D. Thompson, of Joliet, left for Boston, April 10.

Visitors: Geo. M. Kellogg, Pleasant Hill, Mo.; W. A. Hartman, South Haven, Mich.

MT. CLEMENS, MICH.—Robert Klegge shipped more than 100,000 violets to Detroit, Chicago and other cities in the two days before Easter.

SAN FRANCISCO, CAL.—C. Ferrari & Son are building a new range of twelve houses, which increases their plant to about 100,000 feet of glass.

#### New York.

DEMAND VERY LIGHT AND SUPPLIES UNUSUALLY HEAVY.—BEAUTY STILL SELLING VERY LOW.—OTHER ROSE CROPS ON THE DECREASE.—CARNATIONS DO FAIRLY WELL.—VARIOUS NOTES.

Business since Easter has been exceedingly depressed. Not for a very long time has it been so difficult to adequately express in words the tremendous congestion under which the flower market is staggering and the simple impossibility of giving any but the most vague idea as to the vast disproportion between supply and demand. Ever since Easter Sunday the so-called legitimate demand has been so infinitesimal that it has been scarcely felt and the Greeks have been by far the best customers in the wholesale markets. All roses are more than plentiful, but the dark and stormy weather now prevailing encourages the hope that the product will shorten up a little. Bride and Bridesmaid roses are falling off noticeably as to quality and mildew is beginning to make its appearance. American Beauty is still selling away down, with but few buyers, and lilies and callas are in the same predicament. Carnations hold their own in price much better than any other item on the list. Violets are in lighter supply than usual at this season and returns average up fairly well. Daffodils, tulips and freesia are all in moderate supply and generally clear out at some price. There is no surplus of smilax, adiantum or good asparagus.

Chas. H. Atkins, of Madison, N. J., will deliver a lecture on the hybridization and fertilization of orchids by insects, illustrated by drawings and charts, at the next regular meeting of the New York Florists' Club Monday evening, April 14.

Sam Weisburg, who has been engaged in the flower business on Eighth avenue for many years, fell down a hatchway Friday last and was instantly killed.

W. D. Taylor was married on April 10 to Miss Jessie N. Elliott, daughter of the late William Elliott. The couple are on a bridal trip to parts unknown.

A. Herrmann has leased the floor on Thirty-fourth street to be vacated by the Flower Market on May 1 and will continue it as a flower market.

Beginning May 1 J. K. Allen's wholesale store will be open for business at 5 o'clock in the morning.

Miss Anna Clarke, daughter of Marshall Clarke, of David Clarke & Sons, died April 8.

Mr. and Mrs. S. J. Rebstock of Williams-ville, N. Y., are in the city on their honeymoon.

#### Muncie, Ind.

The Carnes greenhouses will be moved from South Walnut street two blocks south on Albany street, were the plant will be enlarged and modernized.

The Muncie Floral Company is building a branch on Kilgore avenue, opposite the cemetery, and has also opened a store at 102 South Walnut street.

Mrs. G. L. Miller, who bought the Myers greenhouses, has both places well stocked for spring. She will make some improvements in heating facilities this spring.

LACONIA, N. H.—C. P. Dow has leased and moved into a new store at 552 Main street.

WALTHAM, Mass.—H. M. Sanderson has opened a retail office for the sale of plants and cut flowers in Central block.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 12 times  
10 per cent; 24 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the Amer-  
ican Florist, regular discounts apply-  
ing only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

WINDOW BOX material will soon be in  
demand; are you ready for it?

THE question of a horticultural hall  
for London, Eng., is again up for con-  
sideration.

THE kentia will be the popular palm  
when autumn comes again. Better look  
to a supply.

GEO. M. KELLOGG says that contribu-  
tions of flowers to the hospitals in times  
of plenty have proved to be the best local  
advertising he ever did.

THE *National Window Glass Budget*  
has ascertained that stocks of window  
glass are much below normal and thinks  
that fancy prices are shortly to go into  
effect again.

THE demand for greenhouse help of all  
classes was never heavier. It is an excel-  
lent indication of prosperity in the trade,  
also a shadow of coming events in the  
line of production for next season.

It has frequently been said that there  
are never too many Beauties in the cut  
flower markets. Perhaps not, when all  
grades are considered, but in the last few  
weeks the production of extra long stem-  
med, fancy stock has been phenomenal  
and in most markets the growers have  
been disappointed with the results.

### Correction.

In the advertisement of H. H. Berger  
& Co., page 410 of our issue of April 5,  
single and double begonia tubers are  
listed as being one-half inch in size when  
the size should have been from one to  
two inches.

### Excellent Results.

ED. AM. FLORIST:—I am sending a new  
advertisement to continue for a few  
weeks. I had excellent results from my  
former adv.; sold all rooted cuttings and  
could have filled other large orders if I  
only had the stock. J. C. MURRAY.  
Peoria, Ill.

### Time to Root Araucaria Cuttings.

ED. AM. FLORIST:—I was much inter-  
ested in Mr. Taplin's recent note on the  
propagation of *Araucaria excelsa*, but  
there is one point which he unfortun-  
ately omitted and which strikes me as  
being important, it being the proper  
time at which the cuttings should be  
taken. I infer, however, that this would  
be in autumn, when the growth is mature  
and before the approach of severe freez-

ing. Perhaps Mr. Taplin will kindly  
confirm this point. I would also highly  
esteem an article from his pen on the best  
methods of treatment for *Adiantum*  
*cuneatum*. The space devoted to ques-  
tions and answers in the AMERICAN  
FLORIST I regard as being exceedingly  
interesting and instructive and I, for one,  
would like to see it more generally used.  
W. C. B.

The omission pointed out by "W. C. B."  
is a matter of some importance in the  
propagation of *araucarias* from cuttings,  
though it was an unintentional omission  
on the part of the writer. The autumn  
is the best time to put in the cuttings of  
the plants in question, not only on  
account of the growth being in better  
condition at that period but also from  
the fact that the sun is becoming weaker,  
and in consequence the *araucaria* cut-  
tings may be kept plump and fresh in the  
propagating frame without watering too  
frequently during the extended time that  
is needed for the process of callusing.  
These cuttings behave much the same as  
those of *cryptomerias* and *retinosporas*  
and, like the latter, are much easier to  
handle during the winter months than  
they are when put in during the spring.  
In a future issue, if the editor permits, I  
may offer some notes on *Adiantum*  
*cuneatum*. W. H. TAPLIN.

### Greenhouse Building.

Seattle, Wash.—Malmo & Co., range of  
houses.

Grand Rapids, Mich.—Eli Cross, one  
violet house.

Alliance, O.—L. L. Lamborn, two  
houses.

Pittsburg, Pa.—J. B. Murdoch & Co.,  
two houses 30x40.

Pleasant Hill, Mo.—Geo. M. Kellogg,  
range of 50,000 feet.

Bainbridge, N. Y.—J. L. Lindgren, one  
house.

South Natick, Mass.—John Barr, two  
carnation houses.

Philadelphia, Pa.—Geo. S. Mole, con-  
servatory.

Tapleville, Mass.—Dr. Baxton, one  
house.

### Houses For Asparagus.

ED. AM. FLORIST:—I have a piece of  
ground 105x125 which I intend to cover  
with glass the coming spring, to be  
entirely devoted to *Asparagus plumosus*  
*nanus*. I should like to be advised  
through your valuable paper as to the  
best style of houses for this purpose, also  
the best method of preparing the beds.

A. F. A.

I should build four houses about  
twenty-five feet wide and, as it is very  
important to have the strings as long as  
possible, I would prefer to build the  
houses twenty-five feet high at the ridge  
and about eighteen feet at the gutters,  
which would give an opportunity of get-  
ting long strings. The outer walls and  
ends would need to be glass to within  
three feet of the ground. I support all  
my houses on steam pipe, with walks  
overhead so that we can tie and train the  
asparagus. (See illustration on page  
430) I make my beds four feet  
wide with two-foot walks between. This  
is a convenient width for stringing and  
training the asparagus. I would advise  
making the beds one and one-half to two  
feet deep, with about one-third manure  
and leaf mould added to the soil. *Aspara-*  
*gus* planted in this way will go for a  
number of years without requiring to be  
renewed. W. H. ELLIOTT.

Boston.

HORTICULTURAL SOCIETY HAS AN EXCIT-  
ING SESSION.—NEW CONSTITUTION FAILS  
OF ADOPTION.—TRADE VERY QUIET.—  
SUPPLIES LARGE BUT QUALITIES OF THE  
BEST.—A VARIETY OF NOTES.—VISITORS.

Saturday, April 5, will long be remem-  
bered by those who witnessed the great  
struggle at Horticultural Hall over the  
adoption of the proposed new method of  
administering the affairs of the Massa-  
chusetts Horticultural Society. It was  
the culmination of a series of skirmishes  
that have taken place during recent years  
between the progressive wing of this  
noted organization, comprising the  
wealthy amateurs allied with the florist,  
plant and landscape gardener section,  
and the conservative forces, comprising  
the market gardener and fruit faction  
allied with the present officials and bene-  
ficiaries of the society. It was the most  
fiercely contested fight this dignified  
organization has ever had on its hands  
and the conservatives came off victori-  
ous, their opponents having a substan-  
tial majority but not the two-thirds vote  
necessary to secure the adoption of their  
new constitution. The purport of the  
obstruent and dilatory tactics which the  
opposition resorted to from the outset  
and the support given thereto by the  
presiding officer, who was far from  
impartial, was quickly comprehended by  
the supporters of the measure and the  
scene became one of pandemonium for  
nearly an hour and a half. Many war-  
riors whose voices have rarely been  
heard in Horticultural Hall took part in  
the fray, on both sides, among them the  
veteran W. W. Rawson, president of the  
Market Gardeners' Association, who  
with his followers undoubtedly saved  
the day for the old wing. The result  
leaves little hope for the enjoyment, in the  
immediate future, of that harmony which  
is so essential to the welfare of the society  
and the responsibility of conducting the  
affairs of the corporation under the con-  
ditions imposed by the recent removal to  
the new building, by an unprogressive  
minority out of sympathy with its sur-  
roundings, places the victors in a posi-  
tion not altogether enviable.

Business in the cut flower line has been  
very dull since Easter. Receipts of roses  
of all kinds are heavy and the quality is  
the best ever offered at this season.  
Lilies are plentiful and all bulbous stock  
is very hard to dispose of. Carnations  
are also abundant, the white ones selling  
better than the colored. Violets have  
been in excellent demand since Easter but  
are losing in quality as the season  
advances. *Smilax* is rather scarce. There  
has been a steady fall in values generally  
all through the week.

At Horticultural Hall on Saturday,  
April 5, a silver gilt medal was awarded  
to E. O. Orpet, gardener to E. V. R.  
Thayer, for *Lalio-Cattleya* G. S. Ball.  
James Garthley, gardener to H. H.  
Rogers, received a certificate of merit for  
superior culture of *Cypripedium villosum*,  
the plant exhibited bearing twenty-six  
blooms.

The auction sales are attended but  
lightly, thus far, and those who devote  
an hour or two at McCarthy's mart on  
Tuesdays or Fridays find little competi-  
tion and many bargains to snap up.

Death has taken away the wife of E. B.  
Clapp. Mrs. Clapp died on Sunday,  
April 6, after an illness of one month,  
during which she suffered greatly.

Visitors: C. B. Weathered, New York;  
E. O. Orpet, So. Lancaster; Geo. McWil-

Ham, Whitinsville; H. Thiemann, and Jos. Clark, Manchester; Timothy McCarthy, Providence, R. I.

OBITUARY.

SAMUEL DAVIDSON.

Samuel Davidson died at Troy, N. Y., on March 31, after a very brief illness with pneumonia, aged 61 years. Mr. Davidson was born at Armagh, Ireland, but has been about thirty years in this country, filling important positions as gardener with high skill. His first employment in America was with Ellwanger & Barry, Rochester, N. Y. Afterwards he took charge as head gardener for the late F. W. Farnam, Troy, N. Y., where he remained from 1873 to 1893, and then went to the estate of the late Nathan B. Warren, at Troy, where he continued in charge till Mr. Warren's death in 1898. He was an industrious, painstaking and capable man, a representative gardener in every essential.

St. Louis.

STOCK COMES IN WITH A RUSH.—MARKET OVERLOADED ON MANY LINES AND PRICES VARIABLE.—FAKIRS FROM CHICAGO DO BIG BUSINESS.

Stock is coming in quite plentifully of late, but there is still a shortage in white carnations. The bright weather that we are having is beginning to show on the amount and the quality of the stock that is sent in and as we are getting some of Chicago's street fakirs down here some very good stock is sold on the street corners. Some have been discouraged, as St. Louis prices were too high for them, but Mr. Graff, leader of the invaders, is willing to come up to our prices and do as the home fakirs are doing. He has a very good location at Sixth and Olive streets in one of the doorways of Plow's candy store and seems to be doing a big business. The prices for this week vary considerably, the best roses bringing as high as \$8, while some go at \$3. Some Golden Gate are coming in that are very fine. There seems to be more pink than any other color. Carnations are finding buyers at from \$1.50 to \$4 for fancy stock and \$5 for Prosperity. Bulbous stock is going very slowly. Violets are coming in heavily.

Mrs. H. G. Berning, who usually does the office work for her husband, was taken seriously ill just before Easter, but is now convalescent.

Ostertag Brothers have had considerable funeral work in the last week.

The sale of dormant roses has been very large this year. R. J. M.

KENT, O.—John Smith is adding to his lettuce growing facilities by the erection of a house 40x70.

GRAND RAPIDS, MICH.—Charles Chadwick shipped his Easter carnation crop to Pittsburg this year.

EVERGREEN, ALA.—E. A. Beaven, secretary of Caldwell the Woodsman Company, has been elected secretary and treasurer of the United Produce Company, a combination of the wholesale produce men of the city of Mobile for the purpose of handling the vegetable and fruit crop of the gulf coast. He will have headquarters at Mobile till September 1, when he will return to Evergreen and resume his duties with the Caldwell company.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By good all-around florist and gardener. Give particulars. W K 656 W. Van Buren St., Chicago.

SITUATION WANTED—By good all-around florist; 30 years' experience; single. All references. Address REX care American Florist.

SITUATION WANTED—By reliable all-around florist; good designer; competent to take charge; married. Best references. Please state terms. Address AYONDALE, care American Florist, Chicago.

SITUATION WANTED—By a young man as greenhouse assistant; 1 1/2 years' experience. Best of references from present employer. Please state wages when writing. Address T W H, care American Florist.

SITUATION WANTED—By competent florist and gardener, also designer and decorator. First-class commercial or private position; married. Will be at liberty April 15. GEO A. HONGSON, West Medway, Mass.

SITUATION WANTED—By experienced florist; grower of fine roses, carnations, 'mums, violets; 25 years' experience. Good designer and decorator. Best references. State highest wages. G. FLORIST, 1428 West 10th St., Canton, O.

SITUATION WANTED—By thoroughly experienced grower; would take charge of commercial place or section in first-class rose or carnation departments where good wages are paid. Address H H, care Am. Florist.

SITUATION WANTED—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

SITUATION WANTED—By a good grower of cut flowers, etc., age 33, long experience in all branches of horticulture, to take charge, or as foreman. References as to ability and character. California or Colorado preferred. Address J R C, 312 Central Ave., Minneapolis, Minn.

SITUATION WANTED—By thorough florist; grower of fine roses, carnations, 'mums, violets and plants; German, age 33; long experience in all branches of horticulture. Want position to take charge or as foreman. Good references. Address with offers, H L S, 302 Central Ave., Minneapolis, Minn.

WANTED—Good rose grower, section man, also good general grower. Address S. J. REUTER, Westerly, R. I.

WANTED AT ONCE—Sober and willing man for greenhouse work; \$20 month. Apply to OTTO HANSEN, 1056 N. 62d Av., Chicago.

WANTED—Good man for general greenhouse work. Single or married. Steady employment. J. M. SMELY, Aurora, Ill.

WANTED—One rose grower, two helpers for rose section and two for general greenhouse work. J. F. WILCOX, Council Bluffs, Iowa.

WANTED—Good plant grower. Middle aged or elderly man preferred. Permanent position. Address OHIO, care American Florist.

WANTED—A steady man for general greenhouse work. State wages expected without board. Give references. Address C. LOVERIDGE, Peoria, Ill.

WANTED—Capable man to take charge of 3000 feet general stock—or will sell right. No competition. State experience and wages wanted. W. J. OLDS, Union City, Pa.

WANTED—A good all-around florist to take charge; must be sober, industrious and reliable. State wages wanted with board and room. References. Address A G, care American Florist.

WANTED—At once, experienced man for general greenhouse work. Single man, German preferred. Wages, \$30.00 per month with room and board. References required. Address J. A. BISHOP, Lansing, Mich.

WANTED—A rose and carnation grower who understands grafting; a working manager; to the right man \$75.00 per month will be paid. Address OWNER, Station A, Lock Box No. 10, Cleveland, O.

WANTED—A reliable, sober, all-around greenhouse hand; a man willing and able to do all kinds of work. \$10 per week. 15 minutes from Philadelphia. Address HENRY J. FAUST, Merion, Montg. Co., Pa.

WANTED—To lease for not less than 3 years, by a practical grower of 20 years' experience, a place of from 5,000 to 15,000 feet of glass in good condition. West of Denver preferred. Address H C, care American Florist.

WANTED—Capable young man for general greenhouse work. One with some experience in greenhouse construction preferred. State age, experience and wages required, in first letter. ESTHERVILLE GREENHOUSES, Estherville, Iowa.

WANTED AT ONCE—A first-class rose, carnation and violet grower. Dwelling close to greenhouses and good wages to right man. Young married man preferred. Address, giving references, J. R. FREEMAN, 612 13th St. N. W., Washington, D. C.

WANTED—Gardener to care for garden, lawn and greenhouse cow and horse. Must be experienced and capable. Wages \$30 per month with board and room. Address, giving nationality, age, experience and references. G. E. DILEY, Palestine, Texas.

FOR SALE—Good second-hand greenhouse material. L. A. WHEELOCK, Ovid, Mich.

FOR SALE—6,000 feet of glass well stocked, house, etc. All O. K. and in good order. Bargain; terms easy; other business. Address Box 53, Decatur, Ill.

FOR RENT—Greenhouses and 14 acres of land with good dwelling and good water supply, without extra expense for rent. Enquire of T. H. WRIGHT & Co., Ft. Dodge, Ia.

FOR SALE—Twenty miles from Boston, five acres level, fertile land, suitable for florist or market gardener. Five minutes from station. L. G. BISSONNETTE, 1150 Columbus Ave., Boston.

FOR SALE—Dwelling and greenhouses (no stock) centrally located in city of 4,500. Long established paying business; no competition; 3,200 feet glass; cause, death of owner. Mrs. MARY BEZNER, Executrix, Jerseyville, Ill.

FOR SALE—At a bargain, greenhouses 25,000 feet of glass, land and good dwelling house, barn, etc., in best of condition and well stocked; near Chicago; owner going into other business. Address H G, care American Florist.

FOR SALE—Prosperous up-to-date retail florist business, complete, established 12 years; can show handsome profits. Engaged in another enterprise reason for selling. For full particulars address CHARLES H. FOX, 21st and Columbia Ave., Philadelphia, Pa.

\$300 Per Month.

Do you want it? If so, buy me out NOW, at your own price. Good reasons. 15,000 feet. It costs you a postal card to have particulars.

C. S. FITZSIMMONS, Lansing, Mich.

For Sale at a Bargain

Greenhouses, 25,000 square feet of glass, all in good condition and paying well; within 20 miles of Chicago. Owner is going to retire from business. Address F S, care American Florist.

Cleveland.

BAD WEATHER CUTS A HOLE IN BUSINESS SINCE EASTER.—DECORATIONS THE SAVING CLAUSE.—THE PRICES.—DOINGS OF RETAILERS AND GROWERS.

The inclemency of the weather for the past week has interfered somewhat with local business, yet the storemen have no real cause to complain. Balls, weddings and other social functions have been quite numerous and good stock has been cleaned up pretty well. All the third-class stock goes to the street fakirs, who do a rushing business when the weather permits. Shipping trade has been fairly good. The roses and carnations coming into market are, as a rule, very fine and are bringing fair prices, \$6 to \$10 per hundred for teas, and a few specials bring \$12. Carnations fetch from \$2 to \$4 per hundred, longiflorums \$10 to \$15, callas \$12, lily of the valley, \$3 to \$4. Lots of bulbous stock is on hand and sales lag somewhat. The best Murillo tulips bring \$4 per hundred.

The Grant-Wilson Company reports Easter trade as far exceeding their expectations. They are so well pleased with their new quarters on Prospect street that they have leased the adjoining store. The two stores will be connected, which will give them a total frontage of forty-four feet, with a depth of seventy-five feet, which will afford ample room for the contemplated elaborate display. Their conservatory in the rear of the store is nearing completion.

Leonard Utzinger has rebuilt his greenhouses, which were destroyed some time ago by fire. It was a hard blow to him, coming at a time when it was impossible to replace the stock lost, which comprised principally carnations. However, he takes his loss philosophically and hopes soon to regain it.

E. Hippard, of Youngstown, was a visitor in town last week and reports business booming. ECHO.

GRAND RAPIDS, MICH.—Eli Cross will invest \$800 of his violet money in a new house for increasing his output.

COLLEGE POINT, N. Y.—A fire March 26, on the premises of Frank Zimmerman, destroyed about \$500 worth of violets intended for Easter shipment to New York.

DENVER, COL.—The Denver Post in its issue of March 23 devoted one page of its colored supplement to roses, including illustrations of such varieties as Queen of Edgely, Ivory, Mrs. Oliver Ames, Dean Hole and Miss Alice Roosevelt.

LILY BULBS

Rubrum, Auratum, Album, Gigantum, Single Tiger, Double Tiger. Close rates.

Gladiolus "1900"

NOVELTY. Very showy for cut flower work and florists' window decorations. Spikes 15 inches long, very strong grower, rich red color, three white spots on lower petal. Good substance lasting well after cutting. Successive plantings of this would secure fine window show the whole season. Per 100, \$3.75.

GLADIOLUS Mixtures A good assortment.

Vaughan's Seed Store, New York, Chicago.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

AUGUST ROLKER & SONS, New York, are now located at 31 Barclay street.

VISITED PITTSBURG: A. T. Boddington, of Clucas & Boddington, New York.

W. ATLEE BURPEE & Co., had the largest mail order day in their business Monday, March 24.

VISITED CHICAGO: Frank T. Emerson, Waterloo, Neb.; B. P. Corneli, St. Louis, Mo.; C. Mertz, Brooklyn, N. Y.

PRESIDENT J. E. NORTHRUP announces that the twentieth annual convention of the American Seed Trade Association will be held at Minneapolis June 24, 25 and 26. The programme will soon be ready.

J. L. BUDD says it is only a matter of a short time when seedsmen will be growing Dwarf Essex rape on irrigated farms in southern Texas. He says that the whole cabbage family thrives surprisingly under irrigation there and that Pearl millet also seeds freely in the vicinity of San Antonio and will soon be receiving the attention of seedsmen.

The State of Trade.

Texas Seed and Floral Co., Dallas, Tex.—“January 1 we moved into our new store, corner of Elm and Ervay streets. Our retail department is 25x100 feet and our warehouse and shipping department is 50x100, two stories high, with a switch in the rear where we load and unload cars. For the last three months we have done the largest trade since we have been in business.”

Government Seed Contracts.

The contracts for the government seeds for the coming season have been let subject to the proper appropriation being made by Congress for the payment of the same. Among the seed firms receiving a goodly share of the orders were Northrup, King & Co., Minneapolis; Goodwin-Harries Co., Chicago; J. M. Thorburn & Co., New York; W. Atlee Burpee & Co., Philadelphia; Jerome B. Rice Co., Cambridge, N. Y.; F. W. Bolgiano, Washington, D. C.; T. W. Wood & Sons, Richmond, Va.; C. C. Morse & Co., Santa Clara, Cal., and smaller lots to other parties.

As showing the tendency to make changes in the list, it will be noted that the contracts were let for 84,000 pounds of cucumber seed and but 6,000 pounds of onion seed.

Philadelphia.

GOOD TRADE KEEPS STOCK MOVING.—FEW PLANTS LEFT AFTER THE EASTER RUSH.—SPRING FLOWERS FROM THE SOUTH.—ALL ABOUT PRICES—MUCH BUILDING CONTEMPLATED.—VARIOUS NOTES.

The more one hears about the Easter trade the better everybody seems to be pleased with it. Scarcely anything is left and there was difficulty getting a little stock to supply the plant demand of the past week. Azaleas were not to be had, either in or out of bud, and about the only plants obtainable were a few spiræas and lilies. Such a clean-up i

very gratifying and plans for next Easter are being laid even at this early date. There have been quite a few weddings and other events that required floral decorations and have kept the boys busy and kept the stock of flowers moving. A large out of town demand has kept the commission men busy, in many cases even into the night. Perhaps the most plentiful flower now is the southern daffodil. This is coming into the city in large quantities. The flowers are of good quality and seem to sell very well at from 50 cents to \$1 and \$2 per hundred. Prices have resumed their normal level; \$4 to \$5 per dozen buys the special Beauties; the teas sell for \$8 to \$10 for the best. All the stock coming in is of very fine quality. Carnations are moving lively at from \$2 to \$3 for the best ordinary, while the extras are held at \$4 to \$6. Violets are on the wane, although still much in demand.

There is considerable building contemplated the coming summer. Robert Scott & Son will make quite large additions. The H. A. Dreer Company will

also erect a large block of glass to house azaleas and other dormant stock. The Floral Exchange is to build another large house at Edgely, a counterpart of the one erected a year ago and which has proved satisfactory in every respect. Their new rose, Queen of Edgely, has had a great run the past season and they intend to plant it largely for next year.

Robert Craig & Son have purchased the block of ground adjoining their present property and which has been occupied by them for a long time. This will give them a full city block and should rapidly increase in value as building operations are in full swing on all sides of them.

NORWICH, CONN.—C. F. Jennings, whose greenhouses were recently burned down, has not yet decided whether he will rebuild or not.

SPRINGFIELD, MASS.—On the evening of April 4, A. F. Stevens, of Wellesley, addressed the Amateur Horticultural Society upon “Hardy Roses and Their Culture.”

JOHNSON & STOKES' SPECIAL OFFER SWEET PEAS

25 OF THE FINEST NAMED VARIETIES, AT 25 cts per pound. Per oz. 5c; ¼ lb. 10c; 5 lbs. \$1.00. (By mail 8 cts. per pound additional.)

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

R. C. BERGMANN, Pres.; R. J. COE, Vice-Pres.  
 GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
 Twenty-seventh annual convention, Milwaukee,  
 Wis., June, 1902.

IN Maine the old apple orchards are fifty-one per cent Baldwin, the new ones much less.

OF the Angouleme, one of the largest of the good pears, Ellwanger & Barry say that it attains its highest perfection worked on the quince.

PROF. WAIT, of the U. S. Department of Agriculture, has been at Alvin, Tex., investigating pear blight, where the crop has been practically a failure for the past three years.

THE Texas Nursery and Floral Company, of Sherman, Tex., has changed its name to the Texas Nursery Company and increased its capital stock from \$10,000 to \$20,000.

PROF. F. A. WAUGH, of the Vermont Agricultural College, recently delivered an address on "The Ben Davis and What it Stands For" before the Maine Pomological Society. He said that he is an old friend of the Ben Davis but that he wouldn't advise a man to grow it except for the general market, where it would go on its looks and keeping properties. He said that the market can't be spoiled, for it is the Italian fruit stand that disposes of the Ben Davis and quality cuts no figure there.

### Garden Walks.

ED. AM. FLORIST:—What would make a good walk on clay soil? Most here have gravel, but the walks hold water like a dish, and the gravel sinks into the clay; on an incline, the walks wash out. Would mixing cement, sand and gravel for top layer be advisable? If so how deeply should it be put on? C.

I should recommend cinders as a foundation and gravel (washed) on top, this to be thoroughly wet down and rolled until it forms a smooth surface. Of course, on an incline this will not stand, and if the grade is quite steep the only walk possible is one paved with cobble stone. Stones of the size of a fist or thereabouts do not make a very bad looking walk.

Another way of constructing walks on a steep grade is to put in a few steps at intervals to lessen the grade of the walk. Catch basins should be built near the steps, thereby preventing the water from rushing down the entire length of the walk. This again will necessitate drain tile to be laid as far as the grade is steep and washouts probable. The catch basins can be constructed from 6-inch or 9-inch socket sewer pipe, using a tee for the bottom piece. The best cover is the so-called Bar strainer, which can be bought to fit into the socket or bell of the pipe.

To use a layer of gravel, sand and cement on top of the walk is out of the question, as it would not stand in this latitude except if constructed on the same principle as a cement sidewalk, but such a walk would be too slippery on a steep grade unless corrugated.

Speaking of walks in general, they should only be placed where extreme necessity demands, intruding as little as possible upon the lawn. Comfort and cleanliness are the prime motives for the

existence of garden walks and their value depends entirely upon their construction, which should be such as to render them dry and clean at all seasons of the year. In this respect nothing is better than cement or asphaltum. The latter is rarely seen but I think preferable in many ways if expense is of secondary consideration. Asphalt walks are easier to walk on and less obtrusive, on account of their dark color, in the landscape. Either of this class must be corrugated if built on inclines, or they will make walking impossible in freezing weather.

Cement walks, when not built on dry sandy or gravelly land must have a foundation of not less than twelve inches of some porous material like cinders or screened coarse gravel. The concrete itself should be six inches thick, thoroughly mixed in the proportion of one part Portland cement to seven of stone. The latter may consist of limestone, granite macadam or washed coarse gravel. A top finish of from one-half to one inch thickness, consisting of three parts stone or washed gravel to one part Portland cement worked to a smooth surface completes the walk. But the construction of either asphalt or cement walks is better left to a contractor familiar with such work.

Next in durability comes macadam walks. These are constructed of broken limestone or granite. They should not be less than six inches thick and made of stone that will go through a one-inch mesh. After a thorough wetting down and rolling, a thin layer of limestone or granite screenings, or, which is cheaper and better, a little fine hill gravel is spread over the stone. This is again watered and rolled until a smooth and hard surface is obtained. A sprinkling of fine, clean lake gravel makes the walk softer to walk on and gives it a finished appearance. This class of walks will stand more or less washing, but are, as the above mentioned, also quite expensive.

The cheapest and, for all purposes except on inclines, best walks are those

built of cinders. They are dry all the year around, with a smooth and easy surface to walk on, and when covered with a thin layer of fine lake gravel have a pretty and natural appearance. But this latter covering is necessary or they will create dust in hot weather. That makes them not only undesirable but a nuisance. Where hill gravel is close at hand good walks can be constructed from this by screening it, using the coarser parts in the bottom and the finer on top. The thickness of such a walk depends entirely on the kind of subsoil, heavy clay demanding more drainage and therefore a heavier layer of the coarse material in the bottom. From six inches to ten inches should be sufficient, covering all circumstances. If the gravel contains vegetable matter it will be necessary to put a thin layer of fine washed gravel on top or the walk will become sticky in spring and fall. A thorough wetting and rolling is as necessary on this class of work as on those mentioned before.

Walks that are properly drained by porous material need very little of the usual top rounding, if any, but they must not under any circumstances be hollow in the center. To build walks entirely out of lake gravel is impossible except with some other material that acts as a binder. The coarser kinds are splendid for the bottom of the walks and the fine parts make the prettiest and most garden-like covering for any walks. In connection with asphalt and cement walks, I should have mentioned that on places where water is apt to stand during the winter months and the proper artificial drainage is impossible, they are a failure. Examples of this kind are to be found in Union Park, Chicago. JAMES JENSEN.

SAN ANTONIO, TEX.—The P. D. Hauser & Sons Floral Company has been incorporated with a capital stock of \$50,000, the incorporators being Peter D., Frank H., William T., John H. and George P. Hauser.

EASTER BUSINESS NOT HELPED BY INTERVIEWS WITH THE REPORTERS.

Easter business was the best we ever had and the price on lilies was higher, but the trade is not benefited in the least by the interviews in the daily papers in which some of the local florists have quoted top notch prices. It would be better policy to tell the newspapers how cheaply one may obtain a nice plant or bunch of flowers. There are a great many people who would like to buy a bouquet for 50 cents or \$1 at such times as Easter or any other special day, but when they read about lilies at \$4 a dozen and Beauties at \$10 a dozen they go and buy candy with the 50 cents or \$1.

GRIFFE.

Columbus, O.

EVERYONE PLEASSED WITH THE OUTCOME OF EASTER.—LARGE SUPPLIES OF STOCK WELL CLEANED UP.—PRICES GOOD.

Easter is over and another record has been broken as far as this city is concerned. The weather was anything but ideal on Saturday and Sunday. Those who could take advantage of the beautiful day on Friday to deliver plants were fortunate. There was more call for funeral work than had been experienced for years during Easter week, interfering largely with the regular Easter business. Especially was this the case on Saturday. Stock in general was good, notwithstanding the fact that some of the bulbous material and Easter lilies were a trifle too ripe on account of the warm weather. There were some good azaleas which sold readily, prices ranging from \$1.50 to \$2.50, the more expensive ones, running above fourteen to sixteen-inch crowns not selling so readily. In cut flowers there was a great demand for everything,

with prices ranging about the same as last year except on carnations, those bringing a higher price than at any previous Easter. One dollar per dozen was readily paid, while many sold at \$1.25 and \$1.50 per dozen. Most tulips brought the usual price of 75 cents per dozen, while well grown Murillos brought \$1. This favorite variety, however, must be carefully handled to be just right. As far as can be learned there was no surplus of any kind to cause a slump and growers and dealers alike are happy.

CARL.

Cincinnati.

FAVORABLE WEATHER BRINGS OUT LARGE QUANTITIES OF STOCK.—MANY LINES ARE GLUTTED.—AUCTION MOVES HARDY PLANTS.—VARIOUS NOTES.

We are now having genuine April weather and flowers of all kinds are plentiful. In fact we are having quite a glut of some kinds. The opening of a large carpet house the past week consumed about 20,000 roses, carnations and hyacinths, and several weddings helped to move considerable stock. Prices rule about the same as at last report. The demand for blooming plants is good and there is some call for palms. Smilax is getting scarce. There is an auction sale of Clematis, rhododendrons and other hardy plants going on at one of the large auction houses this week and from the number of boxes the different express wagons are hauling about the streets it appears as if there is something doing in this line.

C. L. Washburn, of Chicago, stopped over between trains on his way to Asheville Tuesday. Mr. Washburn says his firm has ten houses planted to Kaiserin roses, the demand for which last summer was simply immense.

A. Sunderbruch's Sons have their hands full this week with funeral work and wedding decorations, having three good-sized decorations in one day.

George & Allan had the decorations for the Anderson-Ellis wedding this week, which was quite a job, using considerable stock.

D.

Washington.

BUSINESS FULLY UP TO BEST PREVIOUS RECORD AT EASTER.—WEATHER NOT THE BEST.

Reports from most of the florists show that the Easter trade was as good as last year, if not better. It rained all Good Friday and Saturday morning early it looked very discouraging, but about 9 a. m. it cleared up and turned out a fine day, which brought the bulk of the trade all in a bunch. Flowering plants were more in demand than cut flowers. Violets in pots and lilies in large pans sold extra well. Wednesday and Thursday the market people made a good display, with lilies and bulbous stock, azaleas and cut flowers.

J. H. Small & Sons made a grand show with a full assortment of flowering plants and A. Gude & Brother, the American Rose Company, J. Louis Loose, Z. D. Blackstone, Geo. C. Shaffer and others made fine displays, several having extra space in which to handle the Easter business. Among the novelties were some Japanese cherries of unique shape and some Japanese maples in leaf, the latter seen at Freeman's. In one of Shaffer's windows was a plant of Euphorbia splendens trained in the shape of a crown.

P. G.

St. Joseph, Mo.

WEATHER CUTS A HOLE IN TRADE.—PLANTS POPULAR AT EASTER.—CARNATIONS POPULAR BECAUSE OF MEDIUM PRICE.

Had the weather been favorable for trade, Easter business here would have surpassed any previous season. The weather for the week up to Saturday was warm and pleasant but the last of the week brought cold, cloudy, dusty weather, which made it very unpleasant for both buyer and seller. All day Sunday the wind blew a perfect gale, with snow and dust flying from every quarter. Stores were almost deserted and overcoats and furs took the place of Easter hats and spring suits. Friday and Saturday there was good demand for potted plants in bloom. Everything nice sold, many preferring them to cut flowers, probably due to the high price of the latter. Carnations took the lead, owing to price and keeping qualities. A great many flowers were shipped in and among them were many sleepy carnations. Why the wholesalers will insist on sending out such worthless stuff is a mystery. The supply of lilies did not begin to go around, but the wholesale price was too high for retailers to handle them with profit. There were few calls for violets, lily of the valley and cut tulips. Cold, rain and snow have prevailed since Easter.

J. N. K.

ANDOVER, MASS.—Geo. Piddington, who has been in business here for a number of years, has decided to discontinue and has taken the position as gardener, in charge of the William's place, Phillips street. He will dispose of his greenhouses and contents previous to the middle of June.

Paterson, N. J.

RECENT BLOW TO CITY DOES NOT IMPAIR BUSINESS.—GROWERS AND RETAILERS REPORT GOOD SEASON.—CHANGES.

Despite the terrible fire and flood that visited this city a month ago, Easter trade was better than it has been in years. All the stores report a first-class business. Seery had a special sale of lilies all of Easter week and sold them at 10 cents per bud. He had 4,000 plants and sold out clean. The other stores all held them at from 15 cents to 20 cents per bud.

Wm. L. Hendermark has left W. E. McAllister, of Passaic, and opened a store there of his own, just in time for Easter. He reports doing a land-office business, and is fitting up a "swell" store in the old Postoffice building.

A. V. D. Snyder, of Ridgewood, reports doing the best local Easter business that he has ever enjoyed. He also shipped enormous quantities of bulbous stock to New York. He will grow more fancy carnations next year.

John Condie, formerly of Paterson, but now of Somerville, N. J., paid a visit to his old friends here at Easter time. He is looking well and reports everything in fine shape at his new place.

Trade since Easter has been fair, but mostly funeral work. SILK CITY.

Springfield, Mass.

BIG CALL FOR PLANTS AT EASTER.—VIOLETS LED THE CUT FLOWER SECTION.

Easter business was far ahead this year, although the weather was very much against us on Friday. Saturday the rush commenced and everyone's facilities were taxed to the utmost. In potted plants azaleas, rhododendrons, lilacs, Ramblers, cytiuses, acacias, spiraea, lilies, hyacinths, daffodils, tulips and valley sold well at prices ranging from \$1 to \$5, but in azaleas plants at from \$1.50 to \$3 were most sought after. In cut flowers daffodils, tulips, Narcissus poeticus and valley were equal to the demand. Roses and carnations were none too plentiful. Violets, I think, took the lead, many thousands being sold. In made up baskets some very nice work was done. Ramblers, lilies and so forth were trimmed with ribbon. All the store men report sales far ahead of last year, with an increase for potted plants in flower. Palms and ferns were not called for.

THE GOOD & REESE CO., Springfield, O.

The Largest Rose Growers in the World.

## Buffalo.

BAD WEATHER CUTS INTO FLOWER BUSINESS BUT EVERYONE SEEMS SATISFIED.—VARIOUS NOTES.

Friday and Saturday before Easter were disagreeable days, but the aggregate of Easter sales seems to have satisfied everyone in the trade. The supply of stock was equal to the demand, unless it was on violets and Meteor roses. Lily plants were plentiful, despite the early cry of scarcity, and with few exceptions the old prices prevailed. Pans of hyacinths, tulips and daffodils sold well and more expensive plants moved as briskly as could be expected, all except Rambler roses, which were not as salable as last year, nor as good in quality. The stores all made handsome window displays, Palmer, Anderson, Adams, the Rebstocks and Zimmerman making nice showings of plants and cut flowers. At the greenhouses things looked equally well and good business was reported. The market men also had a big trade and Kasting says receipts were pretty well cleaned up. Chas. H. Keitsch, at his new store, reports good business.

C. F. Christensen has been ill, but is now improving.

J. B. Weise has been in Philadelphia on a business trip.

Palmer was out with his automobile delivery again. W. A.

## Kewanee, Ill.

PROGRESSIVE FIRM PLANS EXTENSION OF ITS BUSINESS.—A NEW RANGE.

Hamilton & Plummer have enjoyed a very prosperous season and are facing a spring trade which promises to overtax their facilities. The result is that they have decided to practically double their equipment during the approaching summer. They have secured five acres of land just outside the city and here will erect a range of four large modern houses, with heating plant and accessory buildings. Here they will grow roses and a portion of the stock of miscellaneous plants. The old place in town will be devoted to carnations, palms and bedding stock and will be selling headquarters, with C. M. Hamilton doing the growing. F. W. Plummer will be in charge of the new range. It is proposed to largely extend the business, not only locally but by means of a wholesale trade in plants and rooted cuttings, and perhaps by forcing vegetables for local consumption.

## Violet Plants

Pink Ivory.

Greenhouses, HINSDALE, ILL. **BASSETT & WASHBURN,** Store, 76 Wabash Ave., CHICAGO.

## New Chrysanthemum "CREMO"

FIRST-CLASS CERTIFICATE FROM C. S. A.

The best early yellow Chrysanthemum to date; comes in with Glory of Pacific, from which it is a sport. A beautiful soft shade of yellow, the color being much more distinct than is usual with sports. It just fills a vacancy in yellow at that season.

PRICES FROM 2 1/4-INCH POTS.

35c each; \$3.00 per dozen; \$20.00 per 100.

McMILLAN & SONS,

Hudson Heights, N. J.

## ROSES

Brides and Bridesmaids, 2 1/4-in. pots at \$15 per 100. Good clean stock and well rooted.

C. S. Foote, Downers Grove, Ill.

## CARNATIONS

Rooted Cuttings of all the new 1902 and best standard varieties. Send for price list.

WILLIAM SWAYNE,

BOX 226. KENNETT SQUARE, PA.

## GERANIUM DRYDEN

The finest bedder; silver medal at Buffalo last year. \$6.00 per 100, 2 1/4-inch pots; \$3.00 per 100, rooted cuttings. Cash please.

Henry Eichholz, Waynesboro, Pa.

## BOBBINK &amp; ATKINS,

Plant and Bulb Merchants,

RUTHERFORD, N. J.

The American Florist Company's

West View Floral Co., Knightstown, Ind.

Worcester, Mass.

PLANT SALES VERY HEAVY. — LILIES GREATLY IN THE LEAD AND NOT WANTED CUT.—A FINE DECORATION.

Although we had the usual rainy Saturday before Easter, trade on the whole was considerably better than last year. The demand for lilies was greater than ever before and was almost exclusively for plants in pots. Many thousand more could be handled, but several had inferior lilies left over. Azaleas were next in demand and plenty of good plants were available; the lighter colors were most popular. Ramblers were in good supply and sold well and the same can be said of cyclamens. Acacia pubescens was to be had in limited quantity and moved quickly. In cut flowers stock was plentiful but cleaned up well, although sales were rather slow in starting. Violets and valley were used almost exclusively for street wear and large quantities were disposed of.

Lange had the Roy-Sparrell wedding, March 31, the largest of the Easter weddings. The church decorations were entirely of lilies and palms, and pink and white roses were used exclusively at the residence. H. F. A. Lange has returned after two months' hunting in North Carolina. A. H. L.

Alliance, O.

BUSINESS GOOD, BOTH AT EASTER AND SINCE.—LILIES SHOWED DISEASE.

L. L. Lamborn reports Easter trade better than in any previous year, both in his store at Canton and in Alliance. Everything sold well. Roses, carnations and bulbous stock were his principal cut flowers. In plants, lilies, azaleas, cinerarias, tulips, daffodils, hyacinths in pots and pans all sold well. Azaleas brought from \$2 to \$2.50. He had the same trouble with lilies that everybody experienced all over the country. Those that were good averaged eight to eleven flowers on a "7 to 9" bulb. He had a fine rose crop for Easter, the credit being due to the grower, Harry T. Miller. Mr. Lamborn has a plant of 30,000 feet of glass to which he intends building two additional houses each 100 feet long this summer.

Mr. Weaver, of Massilon, reports a very good Easter. He sold out of everything in the line of cut flowers and plants, realizing very good prices.

Trade has kept up very good in funeral work since Easter. LEROY.

**Pittsburg.**

TRADE QUIET AND STOCK IN OVERSUPPLY.  
—ROSES OF ALL KINDS PILING UP.—  
BLOOMING PLANTS SCARCE.—MURDOCHS  
LET CONTRACTS.—NOTES.

This has been an uneventful week, as the bad weather has taken the backbone out of trade, but the society columns of the daily papers indicate that there will be a good many "doings" between now and June. Funeral work is slack and it seems that all the stores are overstocked for the present. Cut flower stock is in excellent condition, with the exception of daffodils and tulips, which seem to be cut out. Beauties are both fine and cheap. Other roses are also good and worth the market price, and if we had two days fair weather we would easily unload our surplus. The fancy carnations are good but not plentiful. Violets are on the wane. They have done their duty well. Blooming plants were never so scarce, so soon after Easter. There is not a good azalea to be had in Pittsburg at the present time.

J. B. Murdoch & Company have awarded the contract to Lord & Burnham for the erection of two steel frame greenhouses 30x400 feet, to be built on their newly acquired land at Van Emans station. Arrangements have been completed for a switch to run from the main line of the railroad to the greenhouses.

J. B. Ferguson, the proprietor of Floral Hall, a new shop in the East End, reports that he is more than pleased with results since his opening.

The second social meeting of the Pittsburg and Allegheny Florists' Club will take place on April 15.

A. W. Smith is cutting great quantities of white and yellow marguerites.

E. L. M.

LOUISVILLE, KY.—Mrs. Charles Rayner opened a handsome retail store at 632 Fourth avenue on March 28, in time to share in the Easter business. She is working in connection with the Anchorage Rose Company and will no doubt make a fine thing out of the store.

**ECHINOCEREUS  
CAESPITOSUS.**

This Cactus is a native of Texas. It has a beautiful bloom—a pink flower. Retailers readily at 25c each including pot. We furnish with each Cactus, a carton for mailing. Can be mailed to any part of the country for 2 cents. This is a **BIG SELLER.** Write for wholesale prices.

Toronto.

TRADE ACTIVE.—ROSES PLENTIFUL.—CARNATIONS OFF CROP.—BULBOUS STOCK NEARING THE FINISH.—HORSE SHOW MAKES DEMAND.—VISITORS.

Business is again on the jump. The first few days after Easter found stock very scarce, but now roses have come on in full crop and there are plenty to go around. Society is helping to use up surplus stock. The horse show is on and creating a demand for flowers of the better grades. All stock is of good quality. Even Beauties have come around and some good ones are seen. Carnations are very scarce, being off crop with most growers, and consequently prices have gone up. Bulbous stock is about done for. The horse show colors, being yellow and blue, is causing an extra demand for daffodils. Sweet peas are good, but not near plentiful enough to supply trade. Lily of the valley is plentiful and good pansies are coming in. Blooming plants are still on the market and sell well, considering the season. Crimson Ramblers are plentiful. It is too bad they were not a fortnight earlier.

Dunlop is showing a window of hardy azaleas which, with their odd colors, are very attractive.

Visitors: Wm. F. Kasting, Buffalo; Peter Crowe, Utica, N. Y.; Geo. Fancourt, Wilkesbarre, Pa. H. G. D.

Seattle, Wash.

GROWER HAS MANY GOOD LILIES.—CHANGES IN THE TRADE.

The Easter trade was very good with all the florists. Everything in the shape of a lily was sold by noon on Saturday. The weather being bright and warm, brought out large crowds and some of the flower stores were doing business until midnight. Malmo & Company had the best and hulk of the Easter lilies. The other dealers were all short. Roses and carnations were scarce and high. Violets and bulbous flowers were plentiful. There were quite a good many H. P. roses in pots in the florists' windows. Mrs. McCoy, on Second avenue had the best window display. She reports business good at her Tacoma store also.

The Puget Sound Seed & Nursery Company has opened a branch store in Tacoma. John Dane has left this firm to go with the Washington Floral Company.

Joseph Chalmers has left the Washington Floral Company and gone to Malmo & Company, to take charge of a range of new houses they are to build.

J. C. R.

GOOD STOCK AT HAND FOR A SPLENDID EASTER TRADE.—CRAFTSMEN PLANNING MANY IMPROVEMENTS.

It is conceded on all sides that Easter business proved the heaviest in years. There was neither a scarcity nor an over-supply of stock. W. C. Rockwell reports clean sales all along the line. Bulbous stock, such as tulips and hyacinths grown in pans, took especially well, also roses and carnations. A novelty introduced this season is the neat little handle basket filled with violets and valley, which seemed to catch the popular fancy. His Crimson Ramblers and azaleas were exceptionally fine and found ready sale. As to violets, they were never in finer shape nor in larger quantity.

G. R. Oliver had more than enough to keep him moving from early morning till late at night, both on Friday and Saturday. But he braved the onslaught with the fortitude that he acquired on the battlefield some forty years ago in the defense of the Union. Since dispensing with the gun and musket Mr. Oliver has taken up the more congenial occupation of florist and has made a success of it, being a good all-around grower. His carnations, and especially the Marquis, were choice, while his bulbous stock, including lilies, could not possibly have been better. It is Mr. Oliver's intention to build an additional carnation house this spring to cover 32x125. A new shed 15x125 will also be built.

Geo. L. Graham is glad the rush is over. If there is any one variety of carnation that Mr. Graham grows better than the other, that variety is the Lawson, the blooms measuring on the average three and one-half inches, without a bursted calyx, being in crop practically all through the winter and yielding enough blooms to warrant discarding such varieties as Scott and Joost, generally grown for quantity. In whites his Queen Louise takes the lead. Lizzie McGowan still behaves splendidly and pays well. Crane is the standard red, but Estelle and Mrs. Potter Palmer will be grown next season. Next to cut flowers Mr. Graham reports a good sale of blooming plants, such as azaleas and Ramblers; tulips and hyacinths grown in pans likewise sold well. Mr. Graham will rebuild and modernize four of his carnation houses this summer.

And last, but not least, congratulations are in order, Mr. Oliver being the recipient upon the event of his recent matrimonial alliance.

NOMIS.

BELCHERTOWN, MASS.—A. B. Howard is meeting with great success in the introduction of his Star petunia, not only locally, but through leading catalogue houses.

DEALERS SURPRISED AT EXTENT OF EASTER DEMAND—FAR AHEAD OF LAST YEAR.— VISITS TO HOMES OF HYBRIDIZERS.— FLOWER FESTIVAL NEAR.

The Easter trade was exceedingly good. The retail stores had prepared for a demand equal to that of a year ago, presuming that quantity of flowers would be sufficient, but by noon on Saturday the morning's receipts had been sold and the growers were being telephoned for extra supplies. "Send everything you can cut and as soon as possible" was the general tenor of the messages. Ramblers sold at from \$2 to \$5 each, Harrisii in pots at \$2 and cut at \$1 per stem. Roses brought from \$1.50 to \$5 per dozen, carnations 50 cents per dozen, valley \$1 50 per dozen, tulips \$1.50 per dozen, violets 25 cents per bunch and callas 50 cents per dozen. All in all, the Easter business was entirely satisfactory to all concerned.

On a recent trip covering over 1,000 miles in this state your correspondent had the pleasure of seeing some of the wonderful new creations of Luther Burbank, at Santa Rosa; the finest carnations in the world at J. H. Sievers & Company's, San Francisco, and the great collection of useful and ornamental plants gathered from all parts of the world by Dr. Franceschi, at Santa Barbara. By the way, our old friend, W. H. Morse, of Santa Barbara, who produced the canna Mrs. Kate Gray, is at his old tricks and has some interesting novelties in asparagus, roses and ferns.

The next important event on the programme will be the Fiesta de las flores to be celebrated in connection with the biennial meeting of The Women's Parliament to be held in this city in May. During this time it is anticipated the demand for flowers will be enormous.

D. R. W.

ST. ELMO, TENN—Hunt & Son have had a prosperous season and are preparing to erect a new greenhouse at the entrance to Forest Hill Cemetery.

TOLEDO, O—Fire at 1 a. m. March 28 destroyed one of F. A. Imoberstag's boiler rooms and a rose house, with contents, a fine Easter crop of teas, 300 lilies and a lot of bulbous stock. The loss was about \$2,000 without insurance.

### IMPROVED VAPORIZING PANS VENTILATING

For Tobacco Extracts, Etc. Send for Circulars.

**DILLER, CASKEY & CO.,** SUCCESSORS TO JENNINGS BROS., APPARATUS.  
S. W. Cor. Sixth and Berk Sta., PHILADELPHIA.

## DILLON'S GREENHOUSE MFG. CO.

Bloomsburg, Pa.

MANUFACTURERS OF HOT BED SASH, AIR DRIED GULF CYPRESS SASH BARS AND OTHER GREENHOUSE MATERIAL.

**BUILDERS OF DURABLE and PRACTICAL Greenhouses at a LOW COST.**

Our descriptive circular will be ready about April 15 and will contain valuable information for every florist. Send for it. **WE HAVE SOMETHING NEW TO OFFER.**

**IRON RESERVOIR VASES AND Lawn Settees**  
Manufactured by McDonald Bros. COLUMBUS, O.

The Largest Manufacturers of these Goods in America. Send for Catalogue.....

## BUY SECOND HAND STEAM PIPE and Save 50 per cent.

Tel. 201-4 Richmond. JOSEPH MYERSON, 51-53 ATLANTIC AVE., BOSTON, MASS. Please mention the American Florist when writing.

**RAFFIA NATURAL COLORED**  
VAUGHAN'S SEED STORE,  
CHICAGO and NEW YORK.

Please mention the American Florist when writing.

**Nikoteen Aphis Pink It Burns**

The most convenient way of applying an insecticide ever yet devised. No pans required—No heating of irons—No trouble—Cannot injure the most sensitive blooms—Very effective. Price 60¢ per box of 12 rolls. All dealers sell it!

Skabcura Dip Co. St. Louis—Chicago.

Please mention the American Florist when writing.

## NEW TRADE PAPER

"Harrison's Horticultural Advertiser of America" sent free to 5,000 leading nurserymen, seedsmen, florists, parks and dealers weekly. Lowest rates in the trade. Only 50¢ per inch. Liberal discounts. The very medium you want. Absolutely limited to wholesale trade. Try it.

WALTER H. HARRISON, LA MOTT, PA.

Please mention the American Florist when writing.

**WILKS Hot Water Heaters.**

Best made for Greenhouses. SELF-FEEDING MAGAZINE. All Steel. Simple, strong, durable. Send for Catalog, etc. S. Wilks Manfg. Co., 53 to 55 S. Clinton St., CHICAGO.

**D. O. Cunningham Glass Co.,**

PITTSBURG, PA.

Tank Window Glass.

Hot-House Glass A Specialty.  
**FOR SALE.**

**VALUABLE IRON GUTTER PATENTS**

I hereby offer for sale the Patents covering my Wrought Iron Gutter; also the Patents covering the Gutter advertised in last week's edition of the AMERICAN FLORIST, Florists' Exchange, and the Florists' Review, by Geo. M. Garland. The increased business of the Standard Ventilating Machine demands my whole attention to its manufacture. But, as in the past I will give the gutter business its fullest share of attention until the patents are sold. Yours truly,

**E. HIPPARD, Youngstown, Ohio.**

**Sprague Smith Co.**  
PLATE AND WINDOW GLASS

Greenhouse Glass a Specialty  
205 Randolph Street, CHICAGO.

**Boilers** OF HIGH GRADE..

For GREENHOUSES.

### Notes on Palm Growing,

The experience of the past season in the palm trade, as in other branches of our business, brings to mind again the impression that has been noted from time to time, namely, that those buying plants and flowers are becoming better posted and more critical from year to year, and that well grown and well proportioned plants are those that find the steadiest demand. To grow plants of this character requires a little patience, a good deal of attention and a considerable amount of space, and when the latter item is taken into consideration, one frequently finds that the day of excessive profits is a matter of history rather than of everyday experience.

Of course we hear occasionally of some fortunate retailer who has been able to sell for \$300 some fine specimen palm for which he paid the meek and lowly grower the sum of \$100, after much persuasion, but even the retailer does not meet with those streaks of luck every day, for outside of our largest cities there is but a very limited demand for these large specimens. But there has been, for the past year at least, a comparative scarcity of large palms on the market, and apart from the item of original cost there is always some risk attached to the importation of these large plants, for one or two damaged leaves on such a plant may prevent its sale for a couple of years or more.

The original prices placed on this stock in Europe sometimes seem very attractive to the inexperienced importer, but after having added nearly or quite fifty per cent to the cost in order to cover duties, freight and all other charges, one finds that an invoice of plants may not prove so profitable as they first appeared to be. Nevertheless the importation of palms and other plants will continue in greater or less quantity until such time as the American trade can supply all sizes and species that may be called for, a condition that has not yet become apparent. But we are favored climatically for the production of fine foliage plants, just as we are for the production of superb roses and carnations, and it does not seem to be an extravagant idea to look forward to the time when we shall be able to fully supply our own markets with specimen palms, regardless of the most alluring offers of our brothers across the pond.

In the line of novelties adapted for commercial use there seems practically nothing to chronicle among palm notes,

and as a matter of fact there have been comparatively few palms introduced within the past twenty-five years, the total list of introductions in this family during that period probably not exceeding 100 species, but including within the same time one of our best and most useful trade palms in the form of Kentia Belmoreana. The seeds of this palm, by the way, seem to be averaging somewhat better in quality of late years, perhaps in part owing to more care having been exercised in the gathering and packing of the seeds, and partly due to more improved methods in planting and after-attention on the part of cultivators. And it cannot be emphasized too strongly that all palm seeds should be planted as soon as they are received from the dealer, or one has not good ground for complaint in case of failure to germinate, for when the seeds are allowed to dry out and the germ becomes shrivelled, there remains but small chance for a crop of seedlings.

Regarding kentia seeds in particular, those imported in the latter part of the summer or early in the autumn usually prove more satisfactory than those offered in the spring, though the percentage of germination varies greatly even with those imported in the fall, ranging from twenty per cent to over seventy per cent in the experience of the writer, while some over-modest growers gently murmur that they have potted off ninety per cent from a crop of kentias, but we prefer to have an affidavit with such a statement. On the whole it seems to be the better policy on the part of a small grower of palms to purchase his stock of young plants from some specialist or large dealer rather than to have space indefinitely occupied with a lot of kentia seeds from which a straggling crop of seedlings may be had during possibly two years.

The latter period may seem like an excessive time for the germination of kentia seeds, but it is correct in some instances, for in the lot in question some plants came up in about two months and the main crop was potted off within a year, but several thousand seeds that were sound at the time of potting off the main crop were replanted and ultimately germinated well, though the last of them occupied the full two years in doing so.

Seeds of latanias and arecas are generally received in the spring and, unless they have been dried out too much, will germinate quickly and generally give a good percentage of plants, provided the seeds have been properly cared for. Seeds

of seaforthias, ptychospermas and caryotas germinate quickly and seldom fail if the seeds are fresh and kept warm and moist.

A rather light and open soil is most suitable for palm seeds in general, and the seeds should be covered to a depth of half an inch in the case of small seeds like those of seaforthias or livistonas, while the larger seeds, of which the kentias may be taken as an example, may be covered to a slightly greater depth. The seed pots or pans should be placed in a house in which a steady bottom heat may be maintained, a bottom temperature of 85° being high enough for all ordinary purposes, and the seeds should always be kept moist.

In large establishments the potting off of seedling palms is largely a matter of convenience, the lack of available space sometimes preventing the potting of the seedlings at the very best time, but wherever it can be done the best practice will be found to be that of potting off a seedling palm soon after the first leaf is fully developed, or about the time the second leaf begins to push up, for when the seedlings are allowed to remain crowded in the seed pots too long they will become drawn and weak.

The grouping or making up of several palms in one pot or tub is a practice that is increasing, and there are several arguments in its favor, the first being that it is a profitable way to build up a bushy specimen in a short time, and in the second place that one may use up some lanky plants of indifferent quality by this means and still produce an attractive plant. Another argument is that many people desire a mass of green foliage rather than the perfectly graceful outline of a well grown kentia for example, and the reasonable claim of the decorator is that the compound plant or group of plants may lose two or three leaves and still be quite presentable, while the single specimen is seriously handicapped by the loss of a couple of leaves.

But a conservative opinion may be offered that from an artistic point of view any fan-leaved palm is most beautiful when grown as a single specimen, while most of the pinnate-leaved palms may be grouped several in a pot without detracting from their natural beauty.

W. H. TAPLIN.

#### Aster Troubles.

In an excellent bulletin on the troubles of China asters, Ralph E. Smith of the staff of the Hatch Experiment Station, Massachusetts Agricultural College, Amherst, Mass., gives a summary of the conditions with cultural directions as follows:

##### SUMMARY.

"The very prevalent trouble in growing China asters is due to a variety of causes. These are principally a stem rot disease or wilt, caused by a fungus, a peculiar abnormal growth the cause of which is not definitely known, and lice on the roots. Other troubles occur but are more obvious or not generally destructive.

"The stem rot disease is characterized by a wilting and final dying of affected plants accompanied by a discoloration and rotting of the stem just at the surface of the ground.

"The yellow disease appears as a spindling yellow growth of the branches and leaves and a peculiar abnormal development of the flowers. It seems to

be due to a failure in the metabolism in the leaves.

"Plants affected with root lice fail to grow and finally wilt and die. The roots are found to be covered with masses of small, bluish-colored plant lice.

"The stem rot or wilt, although first showing itself at any time during the plant's growth, appears to be contracted only in the seed bed or pricking out flats. Both this disease and the root lice may be avoided by proper methods of cultiva-

SIDE VIEW OF DOUBLE LILY.

tion. For the yellow disease no treatment is known. None of these troubles can be remedied after they have once appeared.

"Asters are also affected by a true rust of the leaves, grubs which eat the roots, and insects which eat the leaves and flowers.

##### CULTURAL DIRECTIONS.

"Start your own plants. Seed planted as late as June 1 will give an abundance of bloom before frost.

"Procure seed directly from a reliable seedman. It costs no more and is much more liable to be fresh and true to name.

"Sow the seed in the open ground at any time after the ground gets into good condition, in good soil where asters have never grown before. Fall sowing out of doors may also be practiced. For very early flowering sow in cold frames or in the greenhouse, but this, especially the latter, is much more liable to produce stem rot.

"Avoid at all times the use of soil where asters have grown before, especially where the stem rot or root lice have occurred.

"Prepare the permanent bed by working in a liberal dressing of barnyard manure during the previous fall and a light application of any good commercial fertilizer in the spring. If this is not practicable remember that as a general principle the richer the soil the better will be your asters.

"Plant if possible in moderately moist soil. This will give better growth and less trouble from grub worms.

"Beyond this it is believed that no treatment can avail for these troubles. Avoid especially damping off and root lice."

#### A Double Lily.

ED. AM. FLORIST:—I send you to-day by mail two pictures of a *Lilium longiflorum* monstrosity which appeared in our batch of "Japs" for Easter at the establishment of P. R. Quinlan & Company, Syracuse, N. Y. There is nothing wonderful so far as growing the plant is concerned, but a perfect double flower is surely worthy of note and comment. Two views are shown, a side view of the flower on the plant and a front view of the single flower, so that there can be no question. It will be noticed that the other flowers on the plant were ordinary single blooms. The double one was a beautiful flower and rivaled the finest forms of the night blooming cereus. The photographs were taken by Harry Chism of L. E. Marquisee's. B.

#### A Few Remarks About Florists.

At a meeting of the Hartford Florists' Club held April 8, Theodore Wirth gave some very sensible advice to florists in a paper under the above caption. The paper in part is reproduced herewith.

"I hope that none of my fellow craftsmen listening to what I herein say will take offense in my expressions if I am allowed to give unrestricted vent to my views, based upon personal observations made while visiting a great number of horticultural and floricultural establishments in various parts of the country, and I also hope that I will be able to prove the correctness of my theory, which is, that a large percentage of our florists are dead slow in some respects, and that against their own interest and welfare.

"We have just passed Easter and the floral displays in the show-windows and stores of our florists have been of marvelous beauty, rich in color and life, and interesting, pleasing and harmonious in artistic tasteful arrangement. The stores were crowded with plants of all varieties, yet the number of plants on exhibition was a small one in comparison with the stock needed to satisfy the demand of the public during such days. It seems to me that the natural thought of some of the buyers at such and other occasions will be that they might get a better and larger assortment of stock to select from by visiting the florists' greenhouses and that they would like to see the place

where those beautiful flowers and plants are grown.

"What a difference in appearance between the stylish, elegant, lavishly decorated store, and the disorderly, dirty, dilapidated, repulsive condition of the greenhouses and their surroundings. You have to walk between compost piles, heaps of old boxes, broken sashes, smashed flower pots; pilot your way between broken tools, piles of coal ashes and rubbish heaps, and you have to jump across ditches and wagon ruts, and if you happen to get there on a rainy day you need rubber boots or the mud will run in over the tops of your shoes. Finally you land safely in one of the houses and while there are fine flowering plants of all varieties in good condition and in abundance, your eye is detracted by the disorderly condition of everything about them, heaps of sweepings, dead wood, rotten tobacco, broken pots, and other rubbish under the benches, everything is there to spoil the good effect which the plants and flowers would otherwise have made upon the visitor, had the surroundings been what they should be and could be, orderly, neat and clean.

"Whenever I enter one of those places, I think of the hired man out on the farm, who claimed that the dirtier the pigs were kept the fatter they would grow. Now brothers of the craft, there is in my opinion no tenable excuse for the existence and maintenance of such conditions. Why cannot the compost heaps be kept out of sight, behind some screening shrubbery, for instance, or away on some neighboring lot, even if a little distance from the potting shed? Why should we permit to have refuse and rubbish lay around our places of business any more than we want it to around our living rooms and residences? Does it cost more labor to store tools and materials away in an orderly way, than to throw them in heaps in a half a dozen places? All it wants is a little system, and some grit to enforce rules, and order can be established where disorder now rules supreme.

"Having thus done away with the objectionable features, now let us put in their places some things that will attract and please. Let us make use of our front yards and all their available spots to display our art in floral decoration. Let us show the public some of our plants to their best advantage. Let us keep our greenhouses clean, presentable and inviting, and keep the approaches to them as passable as the sidewalks of the city; in other words, let us give our establishments the dignity due our noble profession. The result sure to follow will be that the public, appreciating these efforts, will begin to patronize our places, that our home sales will increase. We will save labor in the handling of stock, which otherwise we would cart first to the stores, and that with the increase in trade alone would more than pay for the labor and money spent in such improvements. Indeed, where should we expect the people whom we want to buy our plants for the decoration of their homes and gardens to go for information and object lessons, what to do and what to buy, but to our very places of business, and what do most of our places give them to-day to copy. Unsightly, disorderly, dirty yards and corners, more repulsive in some instances than their most objectionable backyards.

"Brother florists, I claim here is a great field for progressive action and commendable development of our business; let us all put the shoulder to the wheel and push out of the mud, on a clean, easy,

FRONT VIEW OF A DOUBLE FLOWER OF LILIUM LONGIFLORUM.

pleasant and attractive road. We will all benefit by it and give more satisfaction, pleasure and encouragement to our customers, whom we should treat and regard as our honored guests, worthy of our closest, courteous and most attentive consideration."

#### American Beauty as a Forcing Rose.

[A paper read before the St. Louis Florists' Club April 10, 1902, by J. F. Ammann, of Edwardsville, Ill.]

The American Beauty is certainly the most valuable if not the ideal forcing rose and I dare say there are more square feet of glass devoted to this rose than to any other one variety in this country. One gets a fair idea of the extent to which it is grown by visiting the vast rose farms in and near Chicago, at New Castle, Ind., and numerous other places where this grand rose is a specialty. My experience with American Beauty as a forcing rose has been very limited and I am, therefore, in no position to do justice to this most important subject. Nevertheless I am always willing to give others the benefit of what little knowledge I have as best I can, for I believe information of this kind, and especially the discussions following, are among the best educators we have for our grand profession.

The propagating and growing of young rose stock for planting was gone over and discussed at a previous meeting in an able essay by our friend F. J. Fillmore, who outlined what I believe to be the proper way to grow young American Beauty stock. I shall therefore begin my remarks in reference to stock that has just been planted in the benches for the winter's work, which should be as near June 1 as possible. Careful watering and frequent syringing during the hot days is an important part of the work. Staking and tying must also be attended to. A light mulch in the fall is also very beneficial.

But right here is where I want to call your attention to one of the most important features of our season's work, and that is fumigating, for I believe the neglect of this has been the direct cause of my own failure, and the failure of others with Beauties this season. We saw no

sign of green fly and therefore did not fumigate regularly. It was a great mistake, and how dearly we paid for it later on in the season, trying to get rid of that small yet most dangerous insect known to the American Beauty rose, called the thrip. I believe I could write a book in telling of all the remedies and the numerous ways we tried to rid our Beauties of this little pest. But it was all in vain. They came to stay a whole season and I am satisfied they will stay it out. And the worst of it all is that they won't stop at any common tea rose or anything else as long as they have Beauties to feast on. At least they do not do near the damage on the tea varieties.

Now about this early fumigating. We see now how comparatively easy it would have been to get rid of this pest in the early fall. In the first place, we do not care to cut flowers for market; we want to leave all the wood on to get large plants for their winter's work, and then we find also that at that time of the year flowers are very low in price and hardly worth shipping, so we could have smoked to our heart's content without doing any material damage to anything except the thrip or any other insects which we did not see at that time, for we did not take time to look. Just then no flowers were being damaged, or if there were a few we did not care, for they were so cheap. It was along in September and the fakirs were selling Beauties for 15 cents and 20 cents per dozen. We all know that if we want to see this little satan we must look for him. After having made all the attempts to murder him I have come to the conclusion that tobacco smoke is the best, and you may rest assured that this fall will not catch us napping, and I hope others will take heed of this and fumigate early and often. I have dwelt on this subject long enough to probably tire you, but I like to speak of it long and often so as to have it impressed on my own mind so strong that I will not forget it this fall.

In growing the plants of this famous rose we have been very successful also in procuring a liberal amount of flowers, of which a fair proportion were long-stemmed. Our soil is a light, sandy loam,

to which we add one-fifth well rotted cow manure and some bone meal. The American Beauty being a strong grower under good conditions is therefore a heavy feeder and we give liquid fertilizer as the days grow longer. Red spider must be guarded against by syringing on all bright days during winter and two or three times a day during warm days. Black spot is a dangerous fungus and one which this rose, as well as most hybrid teas, are more or less subject to and must be kept in check by judicious watering and constantly picking off the diseased leaves. The temperature we like to have our Beauties at is 56° to 58°. The black spot, the green fly and the red spider must be guarded against at all times and if either should appear, by the use of energy and judicious work, all of these can be overcome. But the worst of all and the one thing I claim cannot be overcome without injury to the plants is the thrip.

#### Gerbera Jamesoni.

In a recent communication to the *Gardeners' Chronicle*, from South Africa, Peter Barr writes as follows concerning this plant: "It may interest your readers to know that it grows among magnetic stones; so powerfully magnetic are these stones, that running one of them along the edge of a table, a needle will as rapidly follow. Charles Ayres, the nurseryman, of Cape Town, who some years ago sent home so many *Richardia Pentlandi*, on returning from his excursion after the above plant, was asked by the magistrate of Barberton to accompany him to the spot where the

#### A New Style Greenhouse.

The accompanying illustration affords a view in a carnation house built by the Dunkley Floral Company, Kalamazoo, Mich., being a reproduction from a recent photograph. The house was designed by the firm's manager, M. F. Kyle and erected in the place of the first two houses, built sixteen years ago, by the late Joseph Dunkley. The house is 125 feet in length, running east and west. The total width is twenty-five feet, but the roof is sectional, it being eight feet four inches from center to center of gutters. The walls are four feet high and from floor to gutters it is seven feet four inches, the gutters being supported on iron posts set in cement. The ridge is ten feet high. The house has proved very satisfactory and, the gutters being overhead, affords greater convenience for operation and a most economical arrangement of benches, the new house having one more four-foot bench than had the two old ones.

#### Bat Guano.

Hundreds of tons of bat guano have been discovered in a cave on a cliff overlooking what was once the bed of the Mississippi river, in Monroe county, Illinois, the market value of which is about \$25 a ton.

The discovery was made by George P. Boll, of No. 2615 St. Louis avenue, St. Louis, Mo., more than a year ago, since which time he has been experimenting with the value of this guano for fertilizing, as compared with that of sea fowls found on the islands of the southern seas.

was filled with bats, the entrance guarded by rattlesnakes.

The cave has been explored back 1,200 feet. The guano deposit is spread over its floor six to eight feet deep. The roof of the cave is sixty feet high in places. The deposit is waxy and oily, and looks like coffee grounds. Some of it is yellow like clay. The cave is rich in saltpetre, and was discovered while Mr. Boll was prospecting for copper. It was at one time a gathering place for Indians.

Shaw's Garden and florists of St. Louis are experimenting with the deposit discovered as a fertilizer for flowers, shrubbery, gardens and lawns.—*St. Louis Republic*.

[Numerous deposits of this kind exist in the United States, notably in the valley of the Great Salt Lake, Utah, but their commercial value is, we believe, quite uncertain.—*ED. AM. FLORIST.*]

#### A New "Fairy" Rose.

At the last meeting of the State Florists' Association of Indiana, William Hack, of Indianapolis exhibited three plants of a very pleasing seedling rose, one of which is shown in the accompanying illustration. It is in a 6-inch pot and is one of the 100 plants which constitute his stock, the variety being a seedling of the *Polyantha* rose *Miniature* and now in its fourth year. The plant is of dwarf, compact habit, bearing very few thorns. The foliage is dark green and deeply serrated. The flowers are borne in large trusses, are clear white, double and fragrant, resembling those of the *Crimson Rambler* in size and texture. The specimens shown warrant the conclusion that the variety will be an acquisition for Easter trade and, as Mr. Hack states that it is a free and continuous bloomer, it may also prove a good bedder.

H. JUNGE.

#### Impressions of a Trip to Asheville.

[An address by J. F. Sullivan, at a recent meeting of the *Detroit Florists' Club*.]

With the vision of flowers and the verdure of the trees which only the southern clime can produce in the month of March I left Detroit on a recent Monday for Asheville, N. C., to attend the meeting of the directors of the Society of American Florists.

It was, indeed, with much anxiety and interest that I undertook that journey. Anxious to contribute my humble share in the work of the society and most deeply and keenly interested in the ultimate result of the selection of Asheville as a meeting place for our next convention, and also interested personally to view with joy the "land of flowers" of which we hear so much and which it had never before been my pleasure to visit.

I watched closely for the line of demarcation between the climate of the north and that of the south until darkness overtook me at Cincinnati on the Ohio river. I had heard that the waters of the Ohio were overflowing its banks but darkness prevented me from seeing this extraordinary spectacle. The water at that time was rising two inches per hour and high water mark was momentarily expected.

Having passed through the celebrated blue grass region of Kentucky the mountainous region of that state was reached at daybreak and the scenery was grand every mile of the way. Before leaving the state and before reaching Harriman Junction, just below the Tennessee line, we had passed through twenty-seven tunnels of various lengths, the longest of

CARNATION HOUSE OF DUNKLEY FLORAL CO., KALAMAZOO, MICH.

*Gerbera Jamesoni* grew, and he collected as many as his means of transport permitted, simply pulling up the plants, and stuffing them into sacks. After several days' journey they were none the worse, and after pulling the plants to pieces, he dispatched most of them to England, along with the collection of bulbous plants, which form an item of his world-wide business."

Mr. Boll, a prospector, says this cave is on the property of George Kavanaugh, now five miles from the Mississippi river, near Glasgow City, Ill. The mouth of the cave is about twenty-five feet square and is almost 300 feet above the river level. Mr. Boll estimates that this guano deposit is more than 3,000 years old. Farmers in that section, he says, have told him that forty years ago the cave

which was, I believe, a quarter of a mile. Harriman Junction is the name of a little town of about 5,000 inhabitants at an altitude of 1,000 feet above the level of the sea and is the junction point of the Southern Railway's line to Knoxville and Asheville, the main road continuing to Chattanooga and New Orleans. About an hour's further ride brought me to Knoxville, Tenn., where to my pleasure and surprise I met our old friend J. D. Carmody, who, as you all know, is one of the directors of the Society of American Florists and was also on his way to Asheville.

I had heard of numerous disastrous washouts on the road between Knoxville and Asheville before reaching the former place, but upon reaching that place it was learned definitely that the damages to the road were so great that traffic was entirely suspended and a force of 500 men was on the repairs. To reach Asheville the only course then open to us was to proceed by way of Chattanooga, Tenn.; Atlanta, Ga., and Spartanburg, S. C., and thence north to Asheville. Our train was not due to leave until 2 o'clock in the afternoon of that day, Tuesday. We therefore had about five hours in which to see the points of interest in Knoxville.

It was not long until we found two floral establishments, the stores of Charles W. Cronch and C. L. Baum, both of whom gave us a cordial greeting and, although we did not visit his greenhouses, we learned that Mr. Cronch had quite an extensive range two miles from town, where further extensions of his plant are contemplated this summer. Mr. Baum has not been long in the business but is an ambitious, youthful fellow who did his utmost to make our stay in his town one of pleasure and interest.

Knoxville is built on the sides of two mountains, separated by the Holston river, which is spanned by a magnificent iron bridge of recent construction, reaching from the side of one mountain to that of another, and is about 200 feet above the water line. Numerous other bridges crossing the same stream were parts of many points of interest of this beautiful little town of 25,000 population so snugly situated between the rugged mountains. Quaint indeed are many of the buildings and characters to be seen here and from this point south the peculiarities of southern people, their customs and the general aspect of the country becomes distinctly defined and intensely interesting to people of the north.

We left Knoxville to continue our journey 200 miles directly south to Atlanta, Ga., and from that point to Spartanburg, S. C., thence north to Asheville, making a detour of 411 miles to reach the point of our destination. From the time we left Knoxville until we reached Atlanta, at about midnight, the rain was falling hard and to some extent the views along the way were rendered less attractive, but nevertheless the diversity of the landscape was still interesting, dotted here and there with the humble southern cabin and occasionally the more pretentious mansion of the southern planter. It was our misfortune to pass Chattanooga during the night. This town of 35,000 inhabitants is situated at an altitude of 700 feet above the level of the sea and abounds with historical points of interest connected with events of the Civil War. Here one of the national cemeteries contains the graves of over 12,000 soldiers. The famous battle fields at Mission

SEEDLING ROSE EXHIBITED AT INDIANAPOLIS BY WM. HACK.

Ridge near here, Lookout Mountain and Chickamauga are famed the world over.

Leaving Chattanooga and entering the state of Georgia our attention was centered upon the novel spectacle, to northerners, of vast cotton fields which extend to the end of one's vision on either side. Atlanta was reached about eleven o'clock at night and although this place is about 900 miles directly south from Detroit no appreciable difference in the climate was seen. This condition is accounted for by the fact that this winter was a most severely cold one in the whole south, while our latitude was favored with the mildest winter for years. About midnight we resumed our journey to Spartanburg, S. C., without incident, where we arrived at 9 o'clock next morning. This is a typical southern town of about 30,000 inhabitants. Here we again changed cars and having about one hour to wait we went to the leading hotel of the town where we had our breakfast, consisting of bacon, the customary meat of the south; fried eggs, corn cake and poor coffee.

From here we commenced the gradual ascent to the Blue Ridge and great Smoky range of mountains of North Carolina, where Asheville is situated, over 2,000 feet above the level of the sea. The anticipation of the most magnificent

part of the trip is now intensified as we gradually approach the foot of the mountains. For a few miles after leaving Spartanburg the ascent is barely perceptible but as we traversed each mile it became more and more so till a place called Melrose was reached, where another engine was attached to our train to assist in climbing the steep grades that are now before us and here, too, begins scenes among the lofty mountains that are beautiful and magnificent beyond the power of pen to describe.

The day was bright and clear, the air light and bracing, the blue sky above seemed to come nearer to us and completed a picture of magnificence which cannot soon be forgotten. Our progress was necessarily slow because of the steep grades we were now mounting. The turns and sharp curves in the track often would reveal to us the two engines ahead, puffing and exerting all their power to pull the heavy train up the grade, which was every minute getting steeper and steeper, making us think as we got higher and higher that we would sure enough be able to "tickle the angels' feet." I was never much of an admirer of mountains but the scenes hereabout soon converted me and strange, indeed, must be the person who, going through

this place, would not be over-awed by the beautiful and impressive sights he continually beholds. As the train wound around through the valleys we could occasionally see in the distance a mountain still higher than us and miles away covered with snow, while just about us and continually greeting us was beautiful green laurel that contrasted deeply with the dormant trees above.

Picture if you can how charming it must be amid such scenes when the verdure of the trees in spring or summer-time is added to its present beauty and grandeur. Here, to the delight of everyone, can be seen the noble oak trees towering far above the train with the mistletoe in abundance in plain sight and, slow as the train goes, we part with regret with recurring beautiful sights. In this sparsely inhabited district can be seen the most unpretentious cabins imaginable on the sides of the mountains, which at once suggested the thought as to where and how the occupants obtain a livelihood. Mr. Carmody thought perhaps moonshine industries were relied upon. Occasionally we could see in a deep valley below us a little settlement with fertile fields adjoining, evidently given to the growing of family vegetables and corn to supply the moonshine industries. Finally, after a journey of about 1,200 miles, we reached Asheville at 3 o'clock in the afternoon and went at once to our headquarters at the Swannanoa Hotel where the executive committee was in session.

On Wednesday evening a banquet was tendered us in the Swannanoa Hotel, at which Vice-president Deake presided, with two members of the local Board of Trade present. It was a very informal affair and the best of good humor and pleasantries prevailed, the spirits and customs of southern hospitalities being always present. At a late hour and after supper, Mr. Young, who is an Elk and proprietor of the Swannanoa Hotel, invited the whole party to Elks' Hall, where we were royally received by the local members. Mr. Carmody, I believe, was the only one of our party an Elk and it is only simple justice to these good Elks to say that never before in my life did I see a more hearty welcome and genuine good fellowship.

On Thursday afternoon the Board of Trade provided open carriages for the entire party for a ride. After a drive through Asheville we were soon at the entrance of the Vanderbilt estate, Biltmore. Not far from the entrance the palatial residence is built and stopping there a general view was taken of the country around and one's first thought is that it is no wonder this spot was selected as the abiding place of one with unlimited means. Looking off to the south could be seen Mispagh Mountain, said to be thirty miles away, intervened with numerous smaller mountains, valleys, rivers and streams, making the whole a panorama of unexcelled beauty, grandeur and magnificence. The large conservatories, where nothing was spared in the construction and appointments, were soon entered. Here Robert Bottomly, who perhaps many of you know, at least by reputation, is in charge. He received us cordially and showed us through the place.

We then resumed our journey through part of this estate of 96,000 acres. It could be observed that much of the primitive condition of the ground is being maintained, although in some places a departure is made by building dams, channels, artificial lakes and streams. A

vast arboretum is being planted with every species indigenous to that climate. It is yet only partly done and it will take many years to complete it. Of special interest to us all were the many groups of native rhododendrons in their season of blooming, along the many drives, where they are a sight of gorgeous splendor and beauty. Indeed, it would be a big undertaking to only partly describe the many scenes of interest on this vast and magnificent estate.

Our return trip to the hotel was made through different beautiful drives of this interesting little city of 15,000 inhabitants. On Friday afternoon Vice-president Deake took the party out to his

J. D. THOMPSON.

(Manipulator of the new carnation Enchantress.)

neat little greenhouse establishment, where a pleasant hour was spent, after which we proceeded up the mountain to Overlook Park, which was reached after a most interesting ride of about a half hour by trolley car on a road most of which has been recently built, Mr. Deake says, purposely for the benefit of the Society of American Florists. Higher and higher we kept going, objects in the valley below appearing smaller and smaller. Near the top of the mountain we passed through a wooded district that for a time obstructed our view below, but, still ascending, we soon emerged and reached an observation platform over 3,000 feet above the level of the sea and the sight that met our gaze there I shall never forget. Instinctively turned to the party and said: "I will go back to Detroit and with all the power that I can command I will try to persuade every member of our club to visit Asheville in August and if anyone hesitates, doubting the pleasure the visit will afford him, I will offer to pay his expenses there if, after returning to Detroit, he is not more than satisfied with the result of his trip."

My descriptive powers fail utterly to properly and fully portray the immensity, the grandeur and truly magnificent and charmingly beautiful scenes here to behold. Looking down into the valley we saw large farms that appeared as small as gardens, with the trees of diminutive size, surrounding the cozy houses, with their bright tiled roofs, and up the

sides of the mountains in the distance appear numerous hotels and summer palaces and miles still further beyond we see the snow capped mountains. Inspiring indeed is this magnificent spectacle which will never be effaced from my memory and which I hope will be the privilege and pleasure of every member of our club to enjoy next August.

As the Eastern members left for home I accompanied them the short distance from the Asheville depot to Biltmore, near where the propagating houses, cold frames and nursery grounds of the Vanderbilts are located. A Mr. Brown, a florist originally from Grand Rapids and who has lived in Asheville for the past few years and was familiar with the grounds and houses, showed me through them. Five large houses are given to the propagation of shrubbery and vines and at the time they were potting off over 100,000 hard-wood cuttings. The grounds immediately surrounding the houses were planted closely with pæonias, phloxes and trees of all kinds in various degrees of development, which, as they reach the standard nursery size, are used to plant at different places throughout the estate.

Leaving Asheville at night I was denied the further pleasure of seeing the great French Broad river along which the road from Asheville to Knoxville is built. But some of it I did see. It was peculiar as well as pleasing and beautiful almost along its entire length. The trees from either side lean over across the water as if in fond embrace. The water at most times is clear and running swiftly and the winds and turns it takes through the mountainous region make it one of the points of interest to the southern traveler. Though physically weary I never tired of feasting my eyes upon the scenes along this most beautiful river.

To describe the many other points of interest from here home would detail you too long, for they were many, but some conception of it can be had from the fact that although before leaving home I packed my grip with reading matter to while away the time, I can tell you honestly that the interest along the route was so great that I did not take a look in hand.

And now, fellow members of the club, I want to make a plea for the Society of American Florists and say that, stripped of every other consideration but loyalty to the society, you should this year more particularly than at any other time give your cheerful support to it. Many of you are now members and all of you should be. We sometimes hear one say that the proceedings of the society are easily accessible through the columns of the trade journals and they regard the \$3 dues of the society an unnecessary burden but please bear in mind that the very trade journal you so much esteem owes its very origin and growth to the society whose proceedings it conveys to its readers. The AMERICAN FLORIST was the pioneer of progressive trade literature and the willing exponent of the most advanced methods of growing plants and cut flowers and of the most improved methods of greenhouse building and heating, and its very existence and continued usefulness to the trade is traceable to the Society of American Florists' good work. There is not a florist in this country whose trade is large or small but who has been benefited directly and indirectly by the Society of American Florists.

Patrick O'Mara's success in scouring from the great carriers of the country a

reduction of twenty per cent from merchandise rates for florists was only accomplished because the great Society of American Florists was behind him in his efforts and it compelled the express companies to recognize the value and influence of the florists' industry of this country. The accomplishment of this alone is sufficient to excite the admiration of every florist of the country, large or small, and prompt him to give to the society his cheerful and generous support. If you have not already done so send without delay the \$3 dues to the secretary and join the ranks of the large delegation that I sincerely hope will and which I am very sure ought to go to Asheville, "The Land of the Sky" next August and then it can be truly said that the aims, purposes and achievements of the Society of American Florists are so valuable, praiseworthy and such a benefit to the craft that it can hold its meetings in either Asheville or any other remote part of the country and still make advances, maintain its numerical strength and usefulness and enjoy the loyal support of its members for all time to come.

#### Another Big Carnation Deal.

We have been informed of the fact that another big carnation deal has been consummated. As in the case of the Lawson, Peter Fisher, of Ellis, Mass., is a prominent figure in the transaction. The variety concerned this time is one of his seedlings, Enchantress, a beautiful light pink of the highest merit. The price paid for this new wonder is said to be much larger than that which Mr. Fisher actually received for the Lawson. The figure is \$10,000 and it has been given by the J. D. Thompson Carnation Co., of Joliet, Ill.

It will be remembered that Mr. Thompson was the first to offer anything like a sensational price for a new carnation, when he tendered Mr. Fisher \$5,000 for the stock of Lawson. It is now well known that this price was not sufficiently large to induce Mr. Fisher to part with Lawson, and that another purchaser was found who gave a larger sum for the stock of this variety. Mr. Thompson, however, may be justly regarded as the creator of high prices for new carnations. Thus again does the west set pace for the rest of the country.

Peter Fisher states that Enchantress is as free a bloomer as Lawson and superior to that variety in every other respect. It blooms earlier than Lawson, giving a stem much longer and as stiff as in that variety. The blooms average three and one-half inches in diameter and fully expanded flowers sometimes measure over four inches. The color is far deeper than Daybreak and at its best, a beautiful shade of light pink, somewhat darker toward the center. The blooms are produced on stiff stems two to three feet in length and the flower is held perfectly erect. It is decidedly in the same class as Lawson, which is the pollen parent. The keeping and shipping qualities are exceptional. Seven blooms sent from Ellis to Buffalo and back, 1,000 miles, were kept five days, then repacked and sent to Indianapolis, 1,000 miles more, kept until the second day of the exhibition. In scoring it has been awarded ninety-eight points by expert judges.

Some flowers of this new variety now on exhibition in Fleischman's Chicago store are attracting much attention. Fleischman handles the regular carnation blooms of the new proprietors of

PLACED ON THE TOMB OF WASHINGTON FOR THE GERMAN NAVY.

(Artist, J. R. Freeman, Washington, D. C.)

Enchantress, and makes rather a feature of them. The J. D. Thompson Co. will build two new houses this season, 30x300 feet, in which to grow the recent acquisition. One of the houses will be devoted to plants for blooms and the other to stock plants. One order has already been booked for 20,000 rooted cuttings of Enchantress. This concern is now western agent for Fisher's new carnations, and will grow next year the varieties Mrs. M. A. Patton, variegated; Nelson Fisher, after style of Lawson, and No. 270, a variegated form somewhat like Prosperity.

LOCAL JOTTINGS OF TRADE DOINGS.

The meeting of the New York Florists' Club on Monday evening, April 14, was well attended considering the busy season, there being forty-two members present. Committee reports showed, moreover, that practical and continuous work is being done between meetings by those entrusted with these duties. Mr. O'Mara made a brief report of progress

in the work of preparing for the joint exhibition with the Sculptors' Society at Madison Square Garden next November and announced that J. P. Cleary had been selected to superintend the trade exhibition department of that affair. Letters were read by Secretary Young stating that additional special prizes had been offered as follows: By the American Rose Co., three prizes of \$100, \$50 and \$25 for fifty blooms of Ivory rose, the plants on which flowers are grown to be purchased from the American Rose Company and no exhibitor to win more than one prize; by John N. May, three prizes, \$50, \$30 and \$20, for blooms of Mrs. Oliver Ames; by the Society of American Florists, one silver and one bronze medal for new plants or flowers of American origin; by Lawrence Hauer, \$50 for best vase of 100 carnations, one variety not yet introduced to commerce; by Henri Beaulieu, a prize of \$5 for dahlias to be exhibited at a special date in September. Mr. Traendly, on behalf of the outing committee told of the many amusement resorts visited and the decision of the committee to recommend that the club's outing take place July 7 at Wetzel's Point View Grove with a preliminary sail up the Sound on the steamer Isabella, tickets admitting lady and gentleman, and including all features, to cost \$5. This recommendation was adopted and most of those present at the meeting signed for a ticket. C. H. Atkins then proceeded to address the club, as

promised, on the subject of the cross fertilization of orchids by insects. Mr. Atkins' talk, which was illustrated by numerous drawings and paintings, was somewhat on the same lines as the lecture once given by the late Wm. Hamilton Gibson at an S. A. F. convention. He showed how, in a state of nature, most of the orchids would remain sterile were it not for the interference of moths, bees and other insects, as shown by the peculiar formation of the reproductive organs of the flowers. The diagrams illustrated how the insects, attracted by the bright colors and the nectar secreted in the flowers, are made to carry the pollen from one flower to another and the various processes were described in an entertaining manner by the lecturer, who was awarded a vote of thanks at the close.

Among the numerous seedling carnations at Dailedouze Brothers' Flathush greenhouses is a remarkable pink variety with white edged petals, which in form and character is as distinct a break from well-known forms as were Lawson and Prosperity. Its stem is very strong and rigid and it has all the good points of a winner, seemingly. Floriana has fulfilled the expectations this season and will hereafter take the place exclusively of Mrs. Jas. Dean, a variety which it rather resembles, although having a greater number of petals. The beds are a perfect sheet of color and the fragrance recalls jasmine. Dailedouzes' white sport from Mrs. Bradt is a splendid flower and a whole house of it will be grown next year. They have a number of other sports from Bradt, one bluish and two red-striped on pink ground. Among the recent introductions that have given greatest satisfaction during the past season are Prosperity, Lawson, Gelevieve Lord and Lorna. California Gold has also done splendidly and the beds are swarming with fine blooms, but the storekeepers here prefer Eldorado, and so that variety will be retained for leading yellow. Roosevelt has given good satisfaction, but Gomez will be abandoned. Elma, Hoosier Maid and Queen Louise are unsatisfactory. Flora Hill is still indispensable and, although at present badly afflicted with bacteria, is giving flowers of good quality. "She has paid her board all right" is Paul's significant comment. Dailedouze Brothers have bought the old Gard place adjoining their premises, about one and a half acres.

Ever since the middle of last week a decided improvement has been noted in the market and its tone has undergone a great change, due in part to the shortening up of crops in most lines and partly to the renewal of trade relations between the florists and the public who had, as usual, exhausted their flower-buying proclivities for the time being, in the Easter enthusiasm. Roses are beginning to show evidences of the progress of the season summerward and are, on the average, much inferior to what they have been. Lilies are very plentiful, bringing prices at wholesale that make them, everything considered, the cheapest item on the list. Violets grow rapidly smaller with the bright spring days. Carnations are generally good and hold up well in value, with immediate prospects excellent.

The Horticultural Society of New York announces an exhibition at the Botanical Garden on May 14 and 15. The prize of \$50 for the best horticultural novelty is again offered and should bring out another interesting contest. Last year

this prize was awarded to Gerbera Jamesoni. Other classes in the schedule call for displays of bulbous plants, flowering trees and shrubs, collection of ferns, orchids, palms, etc. On the afternoon of the first day Dr. Britton will exhibit a series of stereopticon slides, illustrating some of the grand plants of New Zealand. Schedules and further particulars on request to the secretary, 136 Liberty street.

There was another lively scrimmage on Twenty-eighth street on Saturday morning last, not between Greeks this time, but between a Greek and a Hebrew, in which the Greek got the worst of it. It has been pertinently remarked that there is about a cartload more of these gentlemen who would benefit by a good punching.

On May 1 the time-honored flower market will remove from the old location at the Thirty-fourth street ferry to the Coogan Building, corner of Sixth avenue and Twenty-sixth street. Frank Millang, who has been for many years a prominent adjunct of the market, will also remove to the same place.

Herbert Cummings, the young colored man who was sent by Thorley to look after the floral adornment of Prince Henry's room on the Deutschland, has

RASMUSSEN'S VENTILATOR SASH.

returned happy in the possession of a handsome gold watch and autograph letter given him by the prince in commendation of his efficiency.

The suit of Rudolph Asmus against a neighboring rubber factory for damages resulting from gas and smoke deposit on the glass of his greenhouse has been decided against him. The result is a surprise in the trade for it was believed that Mr. Asmus had a good case.

John B. Nugent and his friends appropriately celebrated his eightieth birthday last Tuesday night, and the old gentleman demonstrated his youthful vigor by dancing a jig. Mr. Nugent is still in active business as a florist and expects to continue so for years.

The papers tell of a boy who fell from a window in the elevated railway station at East Thirty-fourth street ferry and landed in a basket of roses being carried by a Long Island florist. The boy escaped with only a slight sprain, but the roses were less fortunate.

Alex. Westwood, doing business at 489 Columbus avenue, has been forced to give up and the place is being run at present by H. Griffiths, for Mr. McCauley, the mortgagee. A number of wholesalers and growers are creditors for substantial amounts.

Charles Chamberlain, the genial press agent who made so many friends at the Madison Square Garden exhibition last fall, has been elected comptroller of the

city of New Rochelle. This is a newly created office and Mr. Chamberlain will just fit it.

The Horticultural Society of New York and the American Institute Horticultural Section held a joint meeting on April 7. The relationship of birds and insects to vegetation, and American forestry were the subjects for discussion.

John H. Taylor had a horse and wagon and three blankets stolen from his stable at Bayside last Wednesday night. The thieves have not yet been located, but Mr. Taylor thinks he has some tangible clues to their identity.

The Pierson-Sefton Company has been incorporated to do business at Madison, N. J., with a capital of \$85,000. The incorporators are Paul M. Pierson, Lincoln Pierson, Wm. Sefton, L. M. Noe and Chas. S. Hunter.

Cornelia Noe, wife of Chas. A. Bruen, died at Madison, N. J., on Thursday, April 10, aged 79 years, after an illness lasting over a year and a half.

At Wm. Elliott & Sons' a litter of four pure white kittens is a recent potent attraction for admiring visitors.

Ford Brothers have put in a new front with plate glass in their store on Thirtieth street since Easter.

J. P. Cleary is working till 12 o'clock every night to keep up with the spring business.

Visitors: E. G. Hill, Richmond, Ind.; J. H. Sievers, San Francisco, Cal.

#### A New Ventilator.

Anders Rasmussen, of New Albany, Ind., who is well known in the trade as the disseminator of the white carnation, Hoosier Maid, has applied for a patent upon a ventilator which he thinks is an improvement on the apparatus now in use in greenhouses. It is a cast iron frame and sash and the sash is so closely balanced that a very long line may be attached to one machine. There are no hinges. The accompanying illustration gives an idea of the character of the device.

#### Boston.

TRADE ON ABOUT THE USUAL LEVEL FOR THE SEASON.—ROSE CUTS REDUCED.—BEAUTY RECEIPTS STILL ABOVE DEMAND.—WHITE CARNATIONS HAVE THE CALL.—MEETING OF TREE WARDENS.—VISITORS.

Business at the present time compares favorably with the corresponding period one year ago. The shipping trade holds out well and the amount of material disposed of is quite large, although prices have ruled somewhat low ever since the sudden collapse that followed Easter. Roses of all varieties are quite plentiful but the quantity is greatly reduced during the past four days and the quality generally is also on the downward path. Golden Gate is more plentiful than heretofore in this market but seems to lack cordial support and moves with difficulty. In American Beauty the number of extra quality blooms being received is much below the figures two weeks ago but there are more than enough to fill all calls, the preference going as a rule to the stock of medium grade. Queen of Edgely of extra fine grade is also coming in and with the same result. White carnations have been rather short in supply and are still none too plenty. In colors there is sufficient stock for all needs. As to violets they begin to feel the approach of warm weather and are steadily reducing in size. The cool weather of late has helped to prolong their stay but it will

take only a few hot days now to finish them for this season. Bulb flowers are not giving much trouble. Narcissi are not so badly overstocked as they were and lily of the valley is doing nicely.

On Saturday, April 12, there was a meeting of the tree wardens of Massachusetts at Horticultural Hall. The chair was occupied by Dr. H. P. Walcott. An address on "The Shade Tree Insect Problem" with stereopticon illustration was delivered by A. H. Kirkland. Other interesting speakers on a number of pertinent topics were J. H. Bardett, W. F. Gale, Allen Chamberlain, Christopher Clark, Prof. G. E. Gale and E. A. Stone.

Visitors: Winfried Rolker, New York; Martin Renkanf and Paul Berkowitz, Philadelphia; C. C. Lange, Worcester.

### Chicago.

MARKET ASSUMES MORE LIVELY ASPECT.—CUTS SLIGHTLY REDUCED AND BUYING HEAVIER.—SMILAX STILL THE ONLY SHORTAGE.—SUMMER ROSES PRETTY SURE TO BE IN DEMAND.—DOINGS OF THE GROWERS.—CLUB TO DISCUSS ROSE GROWING.—A VARIETY OF PERSONAL NOTES AND VIEWS.—VISITORS.

This week has brought renewed activity in the wholesale district. Receipts have shortened up somewhat and both shipping and city trade have been fairly active, with the result that a more hopeful atmosphere pervades the market. While receipts are still large, the early planting of rose houses is serving to reduce the cut, and with other growers the crop is going off, so that the immediate future affords a fairly satisfactory outlook. While the call for Beauties has increased but slightly, the reduced receipts are making this specialty less cumbersome and on Bride and Bridesmaid roses there is an improvement. The stock in general is extra fine, but this cannot be said of Meteor, which is mostly very short in the stem or dark colored in the bud. There are still very heavy receipts of carnations, but they are moving excellently. Good stock is the rule, but whites have decidedly the preference and every now and then it becomes impossible to fill late requirements. The violet cut is falling down, but the quality is still maintained. Lily of the valley has become somewhat less plentiful and lilies are not so frequently seen. However, most of them now coming in are very poor and their absence from the market would leave no aching void. Callas are plentiful. Sweet peas are coming in extra fine for the season and are selling up to \$1.50 per hundred. There seems to be large supplies of common ferns for so late in the season and the wholesalers are inclined to unload their stock in cold storage. Smilax is the only really scarce article. The few growers who are cutting any at all are sending in soft stock and short strings, but it sells up to \$2 per dozen.

E. E. Pieser, of the Kennicott Brothers Co., says that he thinks the man who grows roses for a summer cut is sure to come out a winner. Mr. Pieser is a believer in the "near to nature" theory of cut flower production, for he says that the man who does not force his stock, particularly for December, January and February, will get a much greater cut in the spring and summer when supplies are generally light and prices averaging good.

The Fleischman Floral Company has been displaying a vase of Peter Fisher's Enchantress carnation in their State street window this week. It is a splen-

did flower, of the Lawson type and the Daybreak color. The card on the vase says they are "sole agents."

Charles Anderson, grower for Sinner Bros., who are having fine success with roses, will read a paper descriptive of his methods at the Florists' Club meeting next Wednesday night. It is expected that some flowers of the new Gerbera Jamesoni will be on exhibition.

M. Tredup & Co., at 9201 Commercial avenue, were burned out April 11 by an incendiary fire which destroyed the Eubele block. A ten year old boy has confessed setting the fire and a number of others in the neighborhood.

Ivend Krohn has resigned at Brant & Noe's to go to Charles City, Ia., to superintend the construction of a range of greenhouses for the Sherman Nursery Company, for whom he will be foreman.

Little Holland is still sending in its boxes of bulbous stock, but the cut is light in comparison to what it was a little while ago. Mr. Garland says it has been a very good season for him.

John P. Risch says that during the past two or three weeks the market has looked seriously like a state of overproduction, but he looks for smaller cuts and better prices directly.

J. G. Johnson and Miss May Jackson were married April 9, John Mangel serving as best man. Mr. and Mrs. Johnson are now in the south on a wedding trip.

Bassett & Washburn are beginning to cut from their roses for summer bloom, including excellent Pres. Carnot and short stock of the Marquise Litta.

A. Lange had for Easter some of the largest and best azaleas ever offered in this city. He also had one order for 100 boxes of flowers at \$5 each.

The Chicago Retail Florists' Protective Association, organized two months ago, will hold its next meeting Friday, April 25, at Handel Hall.

The Poehlmann brothers are pushing their building operations and are working up large quantities of young stock in chrysanthemums.

Most of the growers are hard at work on the task of planting out carnations, although there are still light frosts.

Bentley & Company expect to have their three new rose houses at New Castle ready to plant within two weeks.

Wietor Brothers are planting a house of La France roses. It is an item not to be had in this market this year.

J. B. Deamud reports that business since Easter has been better than in any previous year of his experience.

Mr. and Mrs. C. L. Washburn are at Lynn, N. C., but expect to be home the latter part of next week.

E. C. Amling says he thinks the shipping trade was never better at this season of the year.

M. Winandy has his place in fine shape, all the visitors speaking of the health of his stock.

Ed. Bentley has recovered from a two weeks' illness.

Arbutus made its appearance at Hunt's April 15.

Visitors: A. E. Lutey, Calumet, Mich.; W. L. Morris, Des Moines, Ia.; Miles Meidam, Appleton, Wis.

### Seedy Season.

Sandy—"So you call dat a real spring suit?"

Cinders—"Sure! Don't you see how seedy it is?"—*Chicago Daily News.*

BEWARE of the palm swindler and others of that ilk.

### Philadelphia.

TRADE FAIRLY ACTIVE.—GOOD DEMAND FOR DECORATIONS AND FOR FUNERAL FLOWERS.—STOCK GOOD.—ALL ABOUT SUPPLY AND PRICES.—GOOD CALL FOR POTTED PLANTS.—SEED HOUSES BEHIND ON ORDERS.—MEETING OF HORTICULTURAL SOCIETY.

Business has been moving along with considerable life the past week, there being many weddings requiring quite elaborate decorations. Private theatricals and a goodly lot of flowers for the great Reaper kept everybody busy. The stock coming in is of the best, carnations and roses being particularly fine. Sweet peas are much in demand, as are also all the "spring" flowers. Prices are much the same as last week: Beauties, specials, \$4; teas, \$8 to \$10; Liberties, \$10 to \$15; carnations, \$2 to \$4, for Joost, Melba, Hill and Crocker; White Cloud, Lawson, Bradt and Prosperity \$4 to \$6. Prosperity now has a fine color and would be grand with a little more silica in the stem. Sweet peas range from 60 cents to \$1 per hundred, nearly all Blanche Ferry as yet. Violets are still with us, very nice doubles selling for 75 cents per hundred. Bernheimer has a late lot of California that are fine; 50 cents per hundred is the price. Valley sells well at \$3 to \$4 per hundred. Southern daffodils are still plentiful and large quantities are sold on the streets and a good many of the finer sorts in the stores; prices range from 50 cents to \$2 per hundred.

There appears to be a good demand for blooming plants and hydrangeas, daisies, spiraeas, lilies and rhododendrons are selling well. R. Craig & Son are sending in some nice rhododendrons, neat shaped plants and well flowered. John Westcott has a nice lot of English primroses which go quickly. There is also a good demand for pansy plants and button daisies. These latter sell for \$4 per hundred. Japanese maples in pots also appear to be selling well. They are certainly very pretty. A large lot of Japanese plants were offered at auction the past week. A company of Japanese merchants appears to be making a business of importing and growing on plants for such sales. Many of the plants are quite large and generally bring good prices at auction.

The seedsmen are head over heels with orders and can scarcely get caught up. W. Atlee Burpee and W. H. Maule both claim that this year's business is a record breaker, which statement will also hold good with the H. A. Dreer Company and H. F. Michell, all the firms claiming to be away behind with orders.

The April meeting of the Pennsylvania Horticultural Society was very interesting. A talk on ferns illustrated by blackboard drawings and sketches by Mr. McFarland was listened to with great attention. There was also an exhibit of some well grown plants.

Visitors: A. Leuthy, Boston; John H. Seivers, San Francisco.

K.

### Thank You, Sir!

ED. AM. FLORIST:—I enclose \$1 for renewal of subscription. Your paper is still the best of all. A. J. FISH.

New Bedford, Mass.

THE official classification of the St. Louis World's Fair gives to horticulture seven groups and thirty-one classes, covering the whole subject.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—8 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THERE is some inquiry for cacti for  
bedding purposes.

THE novelty men are finding it quite  
difficult to move along with the times.

THE price of glass advanced fifteen per  
cent in the past week and a further rise  
is likely soon.

THE grower, however good, is working  
at a big disadvantage if his houses are  
not modern in every respect.

WE find from the *Gardening World*  
that the Azores ship large (?) quantities  
of lily bulbs to America. Cannot Brother  
Fraser supply the figures?

AN improved form of *Lilium candidum*  
would make a desirable addition to our  
list of forcing bulbs, although the plant  
is now exceedingly useful in this way.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

IT is frequently better to replace old-  
fashioned greenhouses, defective in equip-  
ment, with new and improved structures  
than to increase the glass area, even  
where the additional houses are up-to-  
date.

WITH the large area devoted to the  
carnation this season, it was predicted  
by many that the flower would lose  
somewhat in popularity, but this expecta-  
tion has not been borne out by the  
facts to date.

WE are in receipt of a photograph  
showing an unusually fine house of Lady  
Hume Campbell violets at the greenhouse  
establishment of J. R. Freeman, of Wash-  
ington, D. C. The picture, unfortunately,  
is not suitable for reproduction.

### Lilium Candidum For Easter.

ED. AM. FLORIST:—Our mode of hand-  
ling *Lilium candidum* this season, when  
we had them all in just right for Easter,  
was as follows: We received the bulbs  
about the middle of September and potted  
them at once into 6-inch pots with good  
rose soil. The pots were placed along  
the walks under the carnation benches  
and allowed to remain there until the  
bulbs were well rooted and had started  
about three inches. Then the plants  
were removed to a bench in a light house  
with a night temperature of 60°. Here  
they remained until they were finished.  
In order to keep them clean we plunged  
them in tobacco stems.

JOHN WALKER.

### Can't Do Without It.

Send me along your latest "Florists'  
Directory." It's one of those things you  
can't do without. Wm. SCOTT.  
Buffalo, N. Y.

### Greenhouse Building.

San Francisco, Cal.—H. Plath, four  
houses 25x100. C. Ferrari & Son, twelve  
houses.

St. Cloud, Minn.—Kindler Floral Co.,  
house 15x65.

Brampton, Ont.—Wm. Fendley, range  
of houses.

Des Moines, Ia.—W. L. Morris, range  
of houses.

Appleton, Wis.—W. H. Rogers, three  
houses.

Seabright, N. J.—Frank McMahan, car-  
nation house 22x150.

Little Silver, N. J.—D. Dean, rose house  
34x150.

Madison, N. J.—L. A. Noc, six Beauty  
houses.

Murray Hill, N. J.—L. B. Coddington,  
two rose houses.

Woonsocket, R. I.—T. W. Greene, one  
house.

### "Fumigation Methods."

Fumigation has come to be looked  
upon as a necessity second only to  
light, heat and moisture in the culti-  
vation of plants with greatest success.  
With all that has appeared in print  
on modern methods, it has remained for  
Prof. Willis G. Johnson to put in neat  
and accessible form a practical treatise  
and timely work on cheap and effective  
means of destroying pests in greenhouses  
and other places. The book, "Fumigation  
Methods," contains 313 pages and eighty-  
two original illustrations, mostly from  
photographs by the author, and covers  
the whole subject, from fumigation to keep  
down insect pests in greenhouses to the  
methods employed to rid nursery stock  
and orchards of San Jose scale. Prof.  
Johnson formerly occupied the chair of  
entomology and invertebrate zoology at  
the Maryland Agricultural College and  
was State Entomologist. He is well  
known for his experiments with fumi-  
gants, particularly hydrocyanic gas,  
and has frequently lectured before flor-  
ists' clubs. Send us \$1 for a copy.

### Trend of the Times.

George M. Kellogg, of Pleasant Hill,  
Mo., than whom there is no more mild  
mannered nor astute philosopher in the  
flower trade, holds advanced ideas as to  
the trend of the times. He foresees that  
now, while the production is no more  
than keeping pace with the demand, the  
tendency is for the grower to sell his own  
stock, at wholesale at present, but he has  
it figured down that before very long it  
will be necessary for the grower to retail,  
to sell direct to the consumer, in order to  
take out a profit. In this connection he  
points to Chicago, where Emil Buettner has  
already established his own retail outlet  
and where the Chicago Carnation Com-  
pany plans the same departure. Mr.  
Kellogg says that he, too, proposes to be  
prepared when the time comes that every  
grower must "scratch his own back" and  
has organized a retail department in con-  
nection with his wholesale business at  
Kansas City. The local retailers protested  
at the announcement, but they became re-  
conciled when they found that Mr.  
Kellogg maintains good retail prices and  
is always ready to let the wholesale buy-  
ers have anything unsold, protecting  
them in the division of the stock in times

of short supply. Now Mr. Kellogg pro-  
poses to erect a new store in Kansas  
City, making the retail feature promi-  
nent, and is planning to open a high class  
retail place in St. Louis next fall.

It is pretty well understood that since  
Chicago curbstone dealers are out of  
business a good deal of the surplus in  
that market on Fridays has been going  
to a couple of Kansas City department  
stores, where on Saturday it is sold prac-  
tically at cost. Some Kansas City  
retailers take exception to this, but Mr.  
Kellogg hasn't noticed any of his cus-  
tomers patronizing the department store  
flower counter, and he believes that when  
these sales stop, which they must as soon  
as the Chicago market gets short again,  
there will have been a demand for flowers  
created among a new class, who will  
then patronize the flower stores, even if  
at slight additional expense, particularly  
after they find that the retailer's stock  
is worth more than the difference in price  
between it and that in the hurly-burly.

### Cleaning Glass.

ED. AM. FLORIST:—We have some old  
houses to tear down this spring and wish  
to use the glass for a new structure for  
chrysanthemums. But the glass is badly  
discolored by greasy smoke. Please give  
us a formula for cleaning such glass.

L. B.

Soak the glass for a few hours in a  
strong lye water, made either from wood  
ashes or concentrated lye. The soot will  
then readily wash off.

L. R. TAFT.

### Piping a Carnation House.

ED. AM. FLORIST:—I am preparing to  
build a modern carnation house 30x200,  
near Pittsburg, and would like some  
advice as to piping. The house will  
stand alone, with a row of lights around  
the sides, and will be heated with steam  
from a boiler in a pit. There will be four  
five-foot benches, with walks around the  
outside of the house. My idea is to use  
2-inch overhead flow and 1½-inch  
returns. Will one flow be sufficient, and  
how many lines of returns will be needed?  
Should all the returns be under the  
benches or should some be on the side-  
walls?

C. C.

It will be best to use two 2-inch or one  
2½-inch flow and ten 1½-inch returns.  
One or two of the returns should be on  
the walls and the others should be dis-  
tributed under the benches.

L. R. TAFT.

### Best Glazing Material.

ED. AM. FLORIST:—What do you con-  
sider best and cheapest for glazing hot  
bed sash and greenhouses? I have used  
common putty and liquid putty, but have  
had no experience with mastic or other  
preparations.

J. W. T.

The best putty is never cheapest in its  
first cost, although it may be in the end.  
For greenhouse work about five per cent  
of white lead should be added to ordinary  
putty. Especially if used in a liquid form,  
the putty should be thoroughly mixed  
and free from lumps and on this account  
the especially prepared greenhouse putty  
has much merit. The same is true of  
mastic, which is particularly valuable  
for patching up old roofs and for use on  
hot bed sash. Mastic, Twemlow's  
English glazing putty and other brands  
of greenhouse putty seem to be of a semi-  
clastic nature and are as a rule more  
durable than ordinary putty.

L. R. TAFT.

## Practices of Wholesale Plantmen.

ED. AM. FLORIST:—I have followed with much interest the various complaints which have been made from time to time of wholesalers sending cut flowers to consumers or those outside the trade in the different cities. As yet I have not seen the practices of the plantmen spoken of. An Ohio firm, however, sends a so-called wholesale catalogue to the retail plantmen and at the very same time this list is put into the hands of bankers, hardware dealers and various parties. I saw a bill from this concern for goods sold outside the trade: Roses at \$3 per hundred; cannas at \$5. What is the retail plantman going to do? Can he pay express charges, stand losses, guarantee the stock and live? I do not think he can. I would like to find out if this custom of the so-called wholesale houses is general or if the case mentioned is an exception.

F. J. U.

Anniston, Ala.

## The Rot of Callas.

ED. AM. FLORIST:—We have been having trouble with our callas. Many of them have rotted off at the top of the bulb. What is the cause and remedy?

J. Y. L.

In a former issue, replying to a similar query, one of our contributors said: "Your calla appears to be affected with a bacterial disease closely related to one which attacks hyacinths and often causes serious trouble. The disease attacks the upper part of the tuber, which begins to decay, as well as the rootlets leading from it and also the bases of the leaves. The only remedial measure that we can suggest is to exercise care in watering so that the ground may be kept dry as possible consistent with good growth. The diseased plants should be destroyed, but in case the diseased area is limited it might be cut out. It is possible that the application of liquid manure to the callas in question may have aided in the spread of the disease."

## Trouble With Boughten Plants.

ED. AM. FLORIST:—Last fall I purchased some field-grown carnation plants, White Cloud and Gomez. They were fine looking plants on arrival and we benched them in the same house with home-grown plants. All were treated alike. Shortly the White Cloud began to wither and die; not one survived and many of the Gomez died and those which were left produced no good flowers, while our own plants did splendidly. What could have been the trouble?

J. Y. L.

There are so many things that may have been the trouble that it is almost impossible to answer the question, but from the inquiry one might infer that the plants were over-heated in the boxes, not sufficient to show when first planted but enough to develop the fungus that eventually carried them off. The moral is to grow your own plants. I suppose that lots of shipped field-grown plants give good results but many of them do not and where it is practicable to grow your own plants that is the proper thing to do.

ALBERT M. HERR.

## OBITUARY.

THOMAS F. DELAHUNT.

Thomas F. Delahunt, of Chester, Pa., was killed April 10 by an electric shock while using a telephone. Mr. Delahunt's

attention was attracted by a peculiar noise at the 'phone and he pulled down the receiver, using both hands. As he did so he received a shock, but was able to stagger back a few steps, when he fell into the arms of William Dempster and Horace Lynch. Mr. Delahunt was a widower, age 36 years.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—Good all around man desires position in floral store or with grower in or near Chicago. Single, sober, American, NEWTON BADGER, 2225 Cottage Grove Av., Chi.

**SITUATION WANTED**—By reliable all-around florist; good designer; competent to take charge; married. Best references. Please state terms. Address AYONDALE, care American Florist, Chicago.

**SITUATION WANTED**—By German, 32, single, 17 years' experience in greenhouse work cut flowers and pot plants. 7 years in this country. Good references; able to take charge. Please state wages. C B, care American Florist.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

**WANTED**—First-class man for wholesale flower house. H F C, care American Florist.

**WANTED**—Competent cut flower grower. State wages, experience and age. Address VIRGO, care American Florist.

**WANTED**—One rose grower, two helpers for rose section and two for general greenhouse work. J. F. WILCOX, Council Bluffs, Iowa.

**WANTED**—An all around florist; good grower of roses, carnations and 'mums; state wages. Write at once. MUNCIE FLORAL CO., Muncie, Ind.

**WANTED**—At once an experienced florist, German or French preferred. State wages wanted with board. JACOB THOMANN, Rochester, N. Y.

**WANTED**—Capable man to take charge of 3000 feet general stock—or will sell right. No competition. State experience and wages wanted. W. J. OLDS, Union City, Pa.

**WANTED**—Man who can grow carnations, roses and general stock. Send reference and wages expected. Steady place year around. J. E. YEATS, Champaign, Ill.

**WANTED**—Two men in commercial place; must be experienced in bedding stock; good wages to right men. J. F. KIDWELL & Bro. 3806 Wentworth Ave., Chicago.

**WANTED**—Sober man to take a section of new Beauty and rose houses. Wages to start \$15.00 a week. Send your references. Address SUPT. THIESS FLORAL CO., Denver, Colo.

**WANTED**—Man with good general knowledge of plant growing. Middle aged man preferred. For the right man a permanent position with good pay. Address Ohio, care Am. Florist.

**WANTED**—A first-class Beauty grower, married man preferred. Will pay good wages to right man. If satisfactory will give full charge of establishment. JNO. MUNO, 51 Wabash Ave., Chicago.

**WANTED**—To lease for not less than 3 years, by a practical grower of 20 years' experience, a place of from 5,000 to 15,000 feet of glass in good condition. West of Denver preferred. Address H C, care American Florist.

**WANTED**—Capable young man for general greenhouse work. One with some experience in greenhouse construction preferred. State age, experience and wages required, in first letter. ESTHERVILLE GREENHOUSES, Estherville, Iowa.

**WANTED AT ONCE**—A first-class rose, carnation and violet grower. Dwelling close to greenhouses and good wages to right man. Young married man preferred. Address, giving references, J. R. FREEMAN, 612 13th St. N. W., Washington, D. C.

**WANTED**—Gardener to care for garden, lawn and greenhouse, cow and horse. Must be experienced and capable. Wages \$30 per month with board and room. Address, giving nationality, age, experience and references. G. E. DILEY, Palestine, Texas.

**FOR SALE**—Good second-hand greenhouse material. L. A. WHEELLOCK, Ovid, Mich.

**FOR SALE**—Prosperous, up-to-date, growing florist business; established 12 years. Address for particulars, Mrs. S. N. ALKIRE, Greenview, Ill.

**FOR SALE**—6,000 feet of glass well stocked, house, etc. All O. K. and in good order. Bargain; terms easy; other business. Address Box 53, Decatur, Ill.

**FOR RENT**—Greenhouses and 14 acres of land with good dwelling and good water supply, without extra expense for rent. Enquire of T. H. WRIGHT & Co., Ft. Dodge, Ia.

**FOR SALE**—Twenty miles from Boston, five acres level, fertile land, suitable for florist or market gardener. Five minutes from station. L. G. BRISONNETTE, 1150 Columbus Ave., Boston.

**FOR SALE**—At a bargain, greenhouses 25,000 feet of glass, land and good dwelling house, barn, etc., in best of condition and well stocked; near Chicago; owner going into other business. Address H G, care American Florist.

**FOR SALE**—A well established up-to-date florist and garden business in a wide awake western city. This will pay you to investigate, if you are looking up a business for profit. Full particulars. Address T. L. EAGLE, Pittsburg, Kan.

**FOR SALE**—25,000 feet of glass; established 15 years. 8 miles from city hall, Chicago, dwelling house, barn, wagons, tools, etc., all complete and at a bargain. Right man could make price asked in one year. Address CHICAGO, care American Florist.

**FOR SALE**—Greenhouses in full operation, mostly carnations; 12,000 feet of glass, near station inside of Chicago limit. Good soil plenty of young stock for planting out. Must be sold at once—very cheap. address E H, care American Florist, Chicago.

**\$300 Per Month.**

Do you want it? If so, buy me out NOW, at your own price. Good reasons. 15,000 feet. It costs you a postal card to have particulars.

C. S. FITZSIMMONS, Lansing, Mich.

**For Sale at a Bargain**

Greenhouses, 25,000 square feet of glass, all in good condition and paying well; within 20 miles of Chicago. Owner is going to retire from business. Address F S, care American Florist.

**GREENHOUSE FOR SALE.**

Built for Carnations in summer of 1900 of Cypress, benches 1½-inch hemlock well furnished with everything needed; is 20 feet long, 20 feet wide. Also fine 2-story dwelling house and all 12 rooms heated with hot water and hot air—fine bath room with hot and cold water. One of the best locations in center of town. Good stable, stone cellar with cement bottom. Address S. W. P., P. O. Box 18, Billerica, Mass.

Montreal.

CLUB AMENDS CONSTITUTION AND PLANS EUCHRE PARTY.—STOCK SCARCE.—PARTICULAR CALL FOR FUNERAL FLOWERS.—PERSONAL AND TRADE DOINGS.

The last meeting of the Montreal Gardeners' and Florists' Club was rather poorly attended, considering the importance of the business to be transacted. The constitution was amended so that now any active member, upon the payment of \$25, shall be entitled to a life membership. Jno. Prescott spoke in favor of having a mixed euchre party in the near future, and another suggestion was that we should hold a euchre party in the Chicagonian style. At the close of business William Hall read a paper upon his experience in carnation growing. It is the general opinion that the Provincial Government will grant us \$250 a year to be used for our annual chrysanthemum show.

Owing to the dark weather we have had for the last couple of weeks and to the brisk demand for cut flowers, mostly white, the supply is inadequate as to roses and carnations. The quality in general is fairly good and cut bulbous stock is easier than ever.

The Mount Royal Cemetery will improve the landscaping of the entrance of the cemetery by removing the old greenhouses and replacing them with up to date ones.

Hall & Robinson are adding 10,000 feet of glass to their growing establishment. They will erect one carnation house and one for miscellaneous stock.

Jos. Bennett shakes hands with himself when he sees his fine lot of Schizanthus Wisetonensis and cleriaras.

P. McKenna & Son are putting up a big rose house. G. V.

ERIE, PA.—The S. Alfred Baur Company has been incorporated with a capital of \$100,000.

GRAND RAPIDS, MICH.—Samuel Perry, well known as a lettuce grower, is building a big house for the forcing of asparagus.

ST. CLOUD, MINN.—The Kindler Floral Company is adding a greenhouse 15x65 and a boiler room and potting shed 8x15 feet.

HOLYOKE, MASS.—At the last meeting of the Horticultural Society, G. W. Thorniley, of Northampton, read a paper on "Popular Plants Suitable for House Culture."

LILY BULBS

Rubrum, Auratum, Album, Giganteum, Single Tiger, Double Tiger. Close rates.

Gladiolus "1900"

NOVELTY. Very showy for cut flower work and florists' window decorations. Spikes 15 inches long, very strong grower, rich red color, three white spots on lower petal. Good substance lasting well after cutting. Successive plantings of this would secure fine window show the whole season. Per 100, \$3.75.

GLADIOLUS Mixtures A good assortment.

Vaughan's Seed Store, New York, Chicago.

**THE SEED TRADE.**

**AMERICAN SEED TRADE ASSOCIATION.**  
 J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Secy and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

VISITED CHICAGO: A. J. Brown, of Grand Rapids, Mich.

JOHN LEWIS CHILDS, of Floral Park, N. Y., visited Santa Rosa, Cal., April 8.

THE LEONARD SEED COMPANY, of Chicago, has contracted with the farmers at Wausaukee, Wis., for 500 acres of peas.

THE mail order business, says Miss C. H. Lippincott, of Minneapolis, is already a third larger than for this time last year.

J. E. NORTHRUP, of Northrup, King & Company, Minneapolis, reports that the demand for flower seeds is fully twenty-five per cent larger than last year.

The Nebraska contract garden seed growers report big advance orders and say the available acreage is being rapidly taken up, the farmers holding out for pretty stiff prices.

C. N. PAGE, of the Iowa Seed Company, has bought a thirteen-acre tract in Des Moines, Ia., and will convert it into a park. He expects ultimately to have his residence in this place.

EVERETT B. CLARK and family, of Milford, Conn., have the sympathy of the trade in the loss of Herbert A. Clark, who died last week. He was a promising young member of the Everett B. Clark Company. Funeral services were held April 10.

THE Sioux City Nursery and Seed Company, Sioux City, Ia., will not have to remove its plant because of the purchase made by the Omaha railroad, as the seed company still has 100 feet of ground left. On this space an elevator will be erected and other improvements made.

James Sproule.

A few days ago we were pleased to receive a letter from James Sproule, whom many of our readers will recall in connection with the trade in California. Mr. Sproule will also be remembered as the author of that phrase to which he gave expression in September, 1898, when he said: "This seems to be a season of growth depression the world over." We made some comment upon this at the time, as follows:

"This seems to be a season of growth depression the world over," says James Sproule, the San Francisco seedsman. "Growth depression" is a good phrase. We have needed this; it appeals to him who grows and the seedsman who contracts; it is also full of meaning. The coining of such a fitting expression is a recompense these troublesome times. And why should it not prove useful to the flower grower? For example: It shrinks the roses to half a crop at Christmas; it blights big batches of Harrisii; carnations won't open, or prematurely go to sleep; Beauties, under its baneful influence, abort, with insignificant stems and poor foliage. Need we illustrate further? "Growth depression" explains so many things, it must have come to stay.

Mr. Sproule is at present located in Yukon Territory, where he is engaged "in a try for gold more directly than through the medium of flower specialization."

MECHANICSBURG, PA.—H. Gronheck will shortly remove his greenhouses to South Walnut street, his present location being in demand for residence purposes.

**The Lily Troubles.**

The troubles with Bermuda and Japanese lilies have been so thoroughly discussed and the remarks of E. H. Michell, A. N. Pierson and others have so fully covered the case that I am unable to add anything to the knowledge of the matter. They have voiced my own experience. Anton Then, of Chicago, thought he had them this time. So did I, but fifty per cent still remain to tantalize us at least until the middle of June.

The Harrisii did not show so much so-called disease as last year. I don't want to put my foot in the lily mess, but can mention that early last August we were in receipt of some Harrisii just as in walked a traveling salesman who could tell diseased bulbs from sound ones.

From a case he sorted out twenty-five sound and twenty-five unsound ones. They were carefully labeled and grown with the rest. Three of his sound ones failed to start at all and there are still nine of them left among the lame, halt and the blind. Among the twenty-five picked out as diseased there was positively no difference, so it leaves little faith with me on that score.

I have made up my mind to grow them colder after potting another season, to see if that will suit the critters better, adding heat when stronger light comes in January. B.

PAWTUCKET, R. I.—The Pollard brothers, William H. and Wright, have bought out the business of Mrs. Helen Johnson.

## THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.  
R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
Twenty-seventh annual convention, Milwaukee,  
Wis., June, 1902.

VISITED CHICAGO: L. Z. Endtz and M. J. Rosbergen, of Boskoop, Holland.

IN Rhode Island, the Greening apple of that name is said to have a representation of less than one per cent in the orchards of the state.

C. E. ARNOLD, of Arnold, Me., advocates Ben Davis or Stark apples for Penobscot county. He says that if the day comes when they are not wanted they can be top grafted.

THE best and hardy variety of the pear Besi de la Motte is said to be that introduced by the late Henry Avery near Burlington, Ia., many years ago. It is a little later than Kieffer but the fruit is of better quality. Prof. J. L. Budd says that the Besi de la Motte grown in Ohio does not seem to be identical.

HEMLOCK LAKE, which furnishes the water supply for the city of Rochester, is to be beautified by the planting of a belt of evergreens around its shores. The city already owns about 1,000 acres of land around the lake. The first planting, the present spring, will comprise about 10,000 young white pine, Scotch pine, hemlock and balsam fir, and the work will be continued yearly until the lake is entirely surrounded by an evergreen forest. Besides adding to the beauty of the reservation, it is also claimed that the use of evergreens exclusively under such conditions is conducive to the purity of the water, as the leaves do not get blown into the water to decay there as is the case with forests of deciduous trees every autumn.

### Library of Park Literature.

George A. Parker, superintendent of Kency Park, Hartford, Conn., has been collecting and compiling park reports and valuable park statistics for a number of years and now possesses what is unquestionably the most extensive special library of this class of literature in the world. Mr. Parker is an enthusiast in this sort of work, which is indeed, a labor of love, his only object in getting together this vast amount of material being the ambition to preserve it in such a complete and practical shape that it shall be readily available for reference or educational uses. The library, which is rapidly growing, now almost fills two large rooms. Everything is classified in the most systematic manner. Painstaking industry and a rare aptitude for such methodical work are plainly evident. Mr. Parker is chairman of the committee of the American Park and Outdoor Art Association on Park Census and is also secretary of the Association of New England Park Superintendents.

### How to Remove Roots From Sewer Pipe.

There have been many questions asked by engineers and superintendents about how to get rid of stoppages in small sewers caused by roots and other foreign matter. Little or nothing has been written about how to remedy this trouble. About five years ago I accepted the position of superintendent for a suburban land improvement company, says Thomas Strouse in the *Municipal Journal* and

Engineer, and during the first year I encountered quite a good deal of trouble with our sewers getting choked. The sewer line was laid with six-inch terra cotta pipe for about six miles in length, with but very few manholes, and each time it got choked we had to dig up the roads to find the trouble, which was generally caused by roots growing in through the joints of the pipe. This digging was rather expensive, especially in the winter, our sewer being from five to fifteen feet deep. Besides it took quite a little time to open it.

I consulted several engineers in reference to some remedy to get rid of this trouble, but all suggested the only remedy would be to relay the sewer. To save this great expense I began to experiment, endeavoring to get some new tool which would clean out the sewer without digging up the streets. I constructed manholes every five or six hundred feet, then made the necessary tools to clean them out. These cost about fifty or sixty dollars for the complete set. I then had the whole line thoroughly cleaned which took four men about two weeks. By going over our line twice a year I find that we can keep the sewer in good condition. The device is simple and inexpensive and does the work very well. This same tool can be made to clean out any small sewer from four to ten inches in size. It is almost impossible to lay pipe with a cement joint that will keep out these very small fibrous roots. They are not any thicker than a needle when they enter, but when once in and fed by the sewerage, they grow quite rapidly until they fill the pipe up.

### Columbus, O.

A BUNCH OF TRADE JOTTINGS OF VARYING LOCAL INTEREST.

Siebert Brothers, who are building a nice range of modern houses on West Fifth avenue, have them ready for glazing. The carpenter work and painting is done and it will be but a short time when they will be ready for business.

There is still some bulbous stock in the market and it is finding plenty of purchasers. Roses and carnations are also holding out well, the stock being in better condition now than at this time a year ago.

Miss Hellenthal, who for several years conducted a cut flower store on South High street, has given up her up-town space and located temporarily at her father's establishment on Moler road.

John J. Dreher, formerly with Gus. Drobisch, is now superintendent of public parks, having been appointed by the mayor and council.

Miss Jones is cutting some fine sweet peas and reports other stock doing very well. CARL.

PITTSBURG, PA.—Chas. M. Schwab is building two conservatories and Mr. Westinghouse and Thomas Park, each ranges of conservatories.

BINGHAMTON, N. Y.—W. F. Schmeiske, formerly with B. Dorrance, at Dorrance-ton, Pa., has taken the position of foreman in charge of the greenhouses of W. H. Graham.

LOS ANGELES, CAL.—Morris Goldenson says that cut flowers were short of the demand at Easter but that he has not heard any complaint that there were not enough blooming plants.

DES MOINES, IA.—W. L. Morris has leased a tract of land at Thirty-fifth and Ingersoll avenue, on which he will erect a new range of greenhouses, necessitated by increasing business.

TOLEDO, O.—George Bayer will enlarge his plant this season and has given an order to A. Dietsch & Co., Chicago, for four of their patent short-roofed houses 450 feet long. Three houses are to be fourteen feet wide and one fifteen feet four inches. It will be practically one house, the gutters and side walls seven feet high. The side walls will have four feet of glass and each side will have a line of ventilators, making six ventilators in a width of fifty-seven feet.

**STEPHEN CRANE, Proprietor of Norwich Nurseries, NORWICH, CONN.**

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Theodore Larg.

Capt. Theodore Lang, whose portrait we present, is one of the most enthusiastic members of the New York bowling fraternity. His record score is 273, made about five years ago. His average in twenty-seven consecutive league games rolled this spring is 165. Mr. Lang challenges any individual, a bona fide florist connected with any florists' bowling team, to roll for a purse of \$25, best six out of eleven games, and he does not bar Philadelphia, even.

At Flatbush.

Last Thursday night was an unusually quiet one at the bowling alleys, there being but five members present. Louis Schmutz, who generally contributes so liberally to the merriment of these meetings, was laid up with a lively case of rheumatism. Below are the scores:

Player	1st	2d	3d	4th
H. Dailledouze	133	178	126	173
Riley	172	168	159	162
E. Dailledouze	184	130	139	132
Wocker	111	117	132	142
Paul Dailledouze	125	117	124	132

At New York.

The New York Florists' Bowling Club met at the Arlington alleys on Monday afternoon, April 14, the evening of that day being reserved for the regular meeting of the Florists' Club. The treasurer reported a revival in interest as evidenced by the present very satisfactory balance in the treasury. Complimentary tickets for the tenth anniversary and ball of the Arlington Bowling League were distributed to each member. The ball will take place on Wednesday evening, April 23, at Arlington Hall. Scores were recorded as follows:

Player	1st	2d	3d	4th
Hafner	177	155	190	166
Thielmann	186	166	164	180
Burns	167	162	158	175
Siebrecht	177	149	157	157
Herrington	143	98	120	99
Duckham	120	177	120	135
Butterfield	139	122	163	174
Traendly		100	99	97
Stewart		109	111	116

At Jamestown, N. Y.

The contest for the Broadhead cup closes May 15. There have been seven nights' play thus far and at the sixth session the rose growers were 283 pins ahead but at the last meeting they were beaten 233, as will be seen by the following score, and now the carnation men are only fifty pins to the bad:

St. Louis.

CLUB HOLDS MONTHLY MEETING.—DIGESTS TWO ESSAYS—WHOLESALE MARKET SHOWS LITTLE CHANGE.—VARIOUS NOTES.

The monthly meeting of the St. Louis Florists' Club was held April 10 and, although the attendance was not large, much interest was shown. The World's Fair business was finished up and cleared off the slate. Two essays were read, one on the American Beauty rose by Fred. Ammann, of Edwardsville, Ill., who is known as the "Perle King," the other by Rudolph J. Mohr on the early history and classification of the sweet pea. Mr. Ammann's paper provoked considerable

THEODORE LANG.  
(Captain New York Florists' Bowling Club.)

discussion. Very fine vases of roses and carnations were exhibited by Mr. Fillmore. His Marquis are especially good.

The market is about the same as last week except that carnations are a little more plentiful, but roses and violets remain the same. Some bulbous stock is shortening up. Narcissus poeticus is coming in large quantities but there is not a very large demand for them and such is also the case with the jonquils and calla lilies. Southern lilacs are coming up now and bring \$3 to \$4 per hundred sprays.

James Gurney is preparing to plant a rose garden at Tower Grove Park, modeled after the one at Washington Park, Chicago. It will cover an acre of ground and several thousand plants will be required. The beds will be irregular in shape and the walks will be sod.

Henry Braun, formerly with C. C. Sanders, has started in business at 4821 Easton avenue. It will be called the West End Flower Store.

The F. J. Foster Floral Company has been incorporated with a capital stock of \$2,000 by F. J. Foster, Maidie F. Foster and John B. Carroll.

Andrew Peterson, of Paxton, Ill., is in the city, visiting the growers and taking orders for his new geranium, A. H. Trego.

Foster has opened a temporary flower store at Sixth and Olive streets.

R. J. M.

MERIDEN, CONN.—Frank H. Lowe has opened a new place on Oak street.

# The Chicago Market

When a buyer wants to be sure of getting his order filled he sends it to the Kennicott Bros. Co., for this house is the one which, with largest resources, is conceded to best reflect market conditions. Here stock is to be had if anywhere in this market and here, too, one is sure of the right treatment if supplies are large. No need to look for price lists before ordering, for Kennicotts always bill everything at prevailing market rates at hour of shipment, regardless of quoted prices. It gives every out of town buyer just the same results as though he bought over the counter.

Just at this time supplies are large in most lines. There are few items which cannot be supplied at short notice, but it is always best to get orders in as far as possible in advance of train time. That gives a chance to get the stock in from a grower if the day's buying has happened to run heavy on one item, as it often does, say on white carnations or any one of a dozen other things.

Kennicott Bros. Co. has practically unlimited resources. With ample capital to carry on their business they are able to carry a big line of buyers and pay all growers every Monday morning. They represent more glass than any house west of New York, if not more than any other house in the country, and handle more flowers the season through. You can get here all the staples and all the season's specialties, both the first cut and the last. Paeonias in the spring are one of their specialties and they handle more of them than all the rest of Chicago put together.

This house has been in the wholesale cut flower business for 22 years and with good stock, right prices, careful packing and prompt service, with every accommodation to buyers, has built up the largest shipping trade in Chicago. With abundant supplies at hand, now is the time for new buyers.

## KENNICOTT BROS. CO.

# CUT CARNATIONS.

The splendid blooms we are cutting at the present time beat anything we have ever had the pleasure of cutting before. Great big perfect flowers on strong 3-foot stems.

## OUR STOCK SHIPS and KEEPS

The following select varieties are bred that way: **Mrs. Potter Palmer**, scarlet; **Her Majesty**, white; **Roosevelt**, crimson; **Marshall Field and Prosperity**, variegated; **Higinbotham**, **Marquis** and **Lawson**, pink. Try a shipment of these, we will guarantee you a genuine agreeable surprise. They are without doubt **Balm for Sore Eyes**.

If you feel under the weather, they act as a tonic and fix you right up. If you cannot do business yourself, they will do it for you, as they sell on sight. We are also cutting a fine lot of the more medium grades, such as **NORWAY**, **BON HOMME**, **BRADT**, **JOOST**, **MACEO**, **ESTELLE**, etc. Write or wire your order in. Say about what price you wish to pay and we'll surely please you. We want you to see what we have got.

Detroit.

BUSINESS PRINCIPALLY FUNERAL WORK.—ROSES PLENTIFUL BUT CARNATIONS SCARCE.—A BACKWARD SEASON.—CLUB MEETING.—VARIOUS TRADE DOINGS.

Trade since Easter has maintained an even trend without incident. There has been a noticeable absence of wedding and other events calling for the extensive use of flowers, the greater part of the business being funeral work. The weather has been constantly cold and unseasonable and little progress has been made in outside spring work but active preparations for carnation planting are now to be seen at many places. Bulbous stock is fast disappearing, while the supply of roses is being daily increased and the quality improving. American Beauties, which were for some time quite scarce, are now much more plentiful and selling well although at somewhat easier prices. Carnations continue scarce although the quality is generally fine. Violets are much improved by the continued cool weather and promise to be with us for quite a while yet.

The club meeting last Wednesday evening was well attended. E. H. Smith read a paper on the growing of plants for Easter. It was well received and an interesting discussion followed. John Dunn gave a report of his recent trip to Grand Rapids. At the next meeting, May 7. Eugene Oestreicher, of Mt. Clemens, will read a paper on "Troubles and Trials of the Florists' Employee."

The Painesville Floral Company is the latest addition to the retail stores here, located at 118 Michigan avenue. J. F. McHugh, the proprietor, has handled nursery stock in this vicinity for the past twelve years.

Miss Anna J. Schulte will remove from her present location on Woodward avenue to 59 Michigan avenue about May 1.

Thos. F. Browne was last week elected supervisor of Greenfield township, where he resides.

Visitors: Mr. Smith, of Smith & Fetters, Cleveland; Geo. A. Heintz, Toledo; Mr. Ford, of New York; J. A. Bissinger, Lansing, Mich. J. F. S.

Louisville, Ky.

Jacob Schulz rented a vacant store on a corner and had a grand display of blooming plants and did a land office business for Easter. He had the finest lot of plants of his own growing ever shown in the city.

Louis Kirch and C. H. Kunzman, the carnation specialists, have had fine cuts of late and got good prices, especially at Easter.

Nanz & Neuner report catalogue trade better than for the last ten years, and some very heavy orders are coming in.

F. Walker & Company have had a beautiful display of plants at their store and city conservatory.

Wm. Mann, the calla specialist, has had a large supply, but none to wholesale.

Wood & Stubbs, a new seed firm here, are now running two large stores. H. G. W.

DAYTON, O.—John Fine received tidings April 10 of the sudden death of his aged father at College Hill, Cincinnati.

DENVER, COL.—The Thiess Floral Company has been incorporated by Frank P. Gegenbach, Charles J. Thiess and Seymour D. Van Meter. The capital stock is \$5,000.

WE HAVE OUR USUAL STOCK OF FINE

AMERICAN BEAUTY PLANTS.

JOHN BURTON, Chestnut Hill, Phila. Pa.

Am. Beauties ROOTED CUTTINGS \$25.00 PER 1000.

This stock is free from spot, thoroughly rooted and first class in every respect.

VISIT TO THE QUINLAN PLACE.—LARGEST IN CENTRAL NEW YORK.—GOOD STOCK FOR RETAIL.—MORRIS MAKES NEW WREATHS.—AT THE PARKS.—OTHER NOTES.

P. R. Quinlan & Company have thirty-one greenhouses that cover seven acres of ground on West Genesee street. The business was started in 1830, going through several hands to those of Smith & Powell, from whom P. R. Quinlan & Company purchased it. The plant is now the most extensive between New York and Buffalo. P. R. Quinlan being away most of the time on other business, the management of the greenhouses falls upon his brother, William Quinlan. Their florists are some of the best known in the country, among them being R. H. C. Bard, the rose grower. The company grows almost entirely for its own retail store, which is managed by W. S. Wheadon. The company has nine houses of roses, 18x125 feet, and nine houses of carnations, 15x125 feet. American Beauty is especially fine at present. Several houses are devoted to ornamental plants and ferns, and there are two houses of smilax. The house of asparagus is in especially good condition. This is the most popular green for weddings. The company has a quantity of orange plants which are in bloom and are in demand for weddings. The small stock all looks well.

Henry Morris has been making some new wreaths, having leucothoe on one side and lavender hyacinths on the other. For funeral work they are very popular. Mr. Morris has a window of genista, which is just coming in. He has a large space devoted to outdoor stock at his Elmwood greenhouses. He will have an excellent stock of paeonias, asters, Spanish and German irises and all hardy plants. Mr. Morris notes that his summer trade increases each year.

David Campbell, superintendent of the city parks, is planning extensive improvements this summer. The city parks have an area of 400 acres. A fine show of aquatic plants is to be made in Onondaga Park. The public greenhouses are located at Burnet Park. There are nearly 100,000 pots of bedding plants.

Thomas Bishop, formerly superintendent of parks, has been appointed assistant superintendent of Oakwood Cemetery, the largest and oldest cemetery in the city. A. J. B.

GRAND HAVEN, MICH.

# New Chrysanthemum "CREMO"

FIRST-CLASS CERTIFICATE FROM C. S. A.

The best early yellow Chrysanthemum to date; comes in with Glory of Pacific, from which it is a sport. A beautiful soft shade of yellow, the color being much more distinct than is usual with sports. It just fills a vacancy in yellow at that season.

PRICES FROM 2 1/4-INCH POTS.

35c each; \$3.00 per dozen; \$20.00 per 100.

**McMILLAN & SONS,** Hudson Heights, N. J.

## A. W. SMITH'S MOON VINES, IPOMOEA NOCTIFLORA,

Now ready. Earliest moon vine grown, flowers pure white, look like wax and large as a saucer. I have a full supply of these vines, which are ever in great demand. 2 1/4-in. pots, \$5.00; 4-in. pots ready May 1, from \$8.00 to \$10.00 per 100.

**GODFREY ASCHMANN,**  
1012 ONTARIO ST. PHILADELPHIA.

## SURPLUS VINCA VARIEGATA VINES

400 4-inch pots, \$8.00 per hundred.  
(No other sizes.)

**WM. A. CLARK & SON,**  
Cash or C. O. D. 44 Boyd St., Waterlawn, N. Y.

# ROSES! ROSES!

Roses from 2-inch pots, your selection of varieties for 50 cents per dozen; \$2.50 per 100; and \$22.50 per 1000. You can select 25 at hundred rates, or 250 at thousand rates. Our selection of varieties, \$2.25 per 100, or \$20.00 per 1000.

We are headquarters for Roses. Our sales this year of rose plants will be upwards of 3,000,000, an easy amount to say, but not so easy to handle, get ready for sale and pack for shipment. We sell each year, more roses than any three firms in the world. Patrons who buy our roses, become permanent customers, for they grow and bloom. If you have never tried our stock, you had better begin now.

GOOD WEATHER BRINGS IMPROVEMENT IN TRADE.—OPERA MAKES SOCIAL ACTIVITY.—GOOD STOCK MUCH IN EVIDENCE.—CLUB HAS A SOCIAL.—PERSONAL MENTION.

Our wish for good weather has been gratified and its effect on business has been what we expected. Stock is scarce, White flowers especially are in demand. Funeral work is the dominant factor in this week's business. There has been a great run on violets this week, due to the appearance of the Metropolitan Opera Company. This same feature is the cause for many luncheons and dinners during the week. The quality of stock of all kinds is very fine. The excellent color of the roses and their fine stems give great satisfaction. Carnations are scarce, white particularly so. Breitenstein & Flemm last Tuesday showed a window of the different shades of pink carnations, which was very attractive.

The Pittsburg and Allegheny Florists' and Gardeners' Club held its monthly social meeting on Tuesday, April 15, at the new headquarters on Sixth avenue. The attendance was not as large as expected but those present had lots of fun.

Wm. Lauch, of Knoxville, and Fred. M. Bissner, of Garrick, are displaying some fine geraniums. Very few have come into the market as yet.

John M. Foss is delighted with his stock of hardy roses. He looks forward to a successful season in bedding plants.

Ben. L. Elliott, of Cheswick, is having great success with his house of Lawson carnations.

George Elliott, of the Elliott nurseries, is doing a great business in his line.

E. L. M.

**Providence, R. I.**

THE RETAILERS DISCUSS METHODS OF MEETING DEPARTMENT STORE COMPETITION—VARIOUS NOTES.

The Florists' Club held an open meeting last week to consider the question of department store competition. A noticeable harmony of action was observed throughout the evening, and while all present could not conscientiously take sides against "outside competition," there was enough said and done to show that many had put on their "thinking caps" and would profit by the discussion. It is an old question but is provocative of much discussion, and when settled will be settled right.

J. H. Cushing will give the flower business his entire attention next season.

Business is satisfactory, stock being scarce, but enough to fill orders.

The old Edgewood greenhouses have been torn down.

M. M.

# Imported Bulbs for Florists' Forcing

Send Us Your List for Pricing.

Our arrangements for high grade bulbs of *Lilium Harrisii*, French Romans, Paper White Grandiflora, Callas, Japan Longiflorum, London Market Valley, and picked bulbs of all Dutch Hyacinths, Tulips, Narcissus and Spiraea are unexcelled.

Bulbs secured from us will be subject to careful inspection and approval on arrival, and if in any way unsatisfactory, will be made good at once.

By combining your order for a full line of this stock with us, you get each in season and all at the closest cost for high grade stock. Economy in car-load freight shipments and large importations supply half our profits.

Write for Prices before closing any forcing stock orders.

HORSE SHOW MAKES BUSINESS FOR LEADING DECORATORS.—CYMBIDIUMS SERVE FOR MANY JOBS.—VIOLET GROWER PROSPERS.—CLUB TO BE "AT HOME."

The horse show, which is a greater success each year, was instrumental in giving some of the florists the busiest week they have had lately. Many of the smaller stores report a poor week, but the many banquets and dinner parties used up quantities of good flowers, American Beauty, lily of the valley and violets being most asked for. Several orchid decorations were made, a lot of Cymbidium Lowianum having done service at four different dinners. When it gets down to this, that flowers can be used to good advantage three or four times over, they are certainly merchandise. Roses were never better than at present. They are also plentiful and were lowered to \$8 per hundred this week. Carnations still experience a good demand and are consequently scarce. A few good Prosperity are around. Lily of the valley is scarce. Violets have seen their finish and sweet peas are very slow in coming in.

Wm. Fendley, of Brampton, was a visitor, who expressed himself well pleased with the past season. He is the leading violet grower in this vicinity and they did so well for him this season that he has purchased fourteen acres of ground adjoining his present property and is making preparations to put up several new houses at once.

Instead of the regular monthly meeting of the Florists' Club there will be an "at home" held in St. George's Hall on Monday, April 21. There will be a concert, after which will come dancing and refreshments. All members and friends are requested to try and make this evening a success. H. G. D.

DAVENPORT, IA.—In November, 1899, Chas. Dannacher sold out to Otto Klingbiel, taking notes for a portion of the purchase price. Now he seeks the appointment of a receiver, claiming that Mr. Klingbiel is preparing to build a place of his own and stock it out of the old property.

San Francisco.

GROWERS HOLD AN ENTERTAINING SESSION.—ESSAYS ARE INTERESTING.—INDEPENDENT MID-SUMMER SHOW PLANNED.—BUSINESS HOLDS FAIRLY ACTIVE.—AN ADDITION.

The Pacific Coast Horticultural Society held a very interesting meeting on the evening of April 5, there being fifty-five members present. A paper was read by John Atkinson, on conifers and their uses in this section. This was the second essay presented before the club, the first, on growing carnations for the San Francisco market, having been read at a previous session by C.H. Fick. Both papers were well received and will be followed by others. The committee on flower show reported that negotiations with the State Floral Society are off and was authorized to proceed with an independent show for August. Four new members were proposed and songs and story telling followed adjournment.

Business since Easter is keeping up pretty well and stock is just equal to the demand. The prices are still up on carnations but roses have experienced a little drop and lilies are down to from \$1.50 to \$2.50 per dozen stalks. Some outdoor sweet peas are making their appearance and bring \$3 per dozen bunches of fifty. Violets are getting scarcer and another week will very likely see the last of them for this season.

H. Plath has invested in more land adjoining his already extensive nursery, on which will be erected four new houses 25x100 to be stocked with smilax, asparagus, ferns and palms.

Among recent visitors was C. W. Scott, of Vaughan's, Chicago.

GOLDEN GATE.

Washington, D. C.

Trade has been fairly good since Easter and most of the florists are busy with decorations for weddings and receptions and with funeral work. Stock is quite plentiful in general. The violet supply has been a little ahead of the demand, but they are looking fine for this season. Roses are in excellent condition. Carnations are not enough for the demand. The weather is cool and is retarding outdoor work. P. G.

SANTA ANA, CAL.—P. H. Dorsett, of the U. S. Department of Agriculture, has removed from Garrett Park, Md., and will reside here permanently.

Down "Injeanny" Way.

The first "boomers" to arrive for the Indiana republican state convention came from New Castle yesterday, says the Indianapolis Journal, and they are here in the interests of Thomas B. Millikan, candidate for state treasurer. The delegation is headed by Myer Heller, president of the South Park Floral Company, of New Castle. The delegation brought with it a vase of magnificent American Beauty roses, which President Heller presented to the Columbia Club. The vase occupies a prominent place in the office of the club. "These are a Millikan offering," remarked Mr. Heller, pointing to the dozens of red beauties. The roses hang from five-foot stems and the odor from them gives the office a most delightful perfume. It seems that the soil in and about New Castle is particularly adapted to the growth of roses. "We have got six acres of roses," said Mr. Heller, "and 75,000 growing plants. Forty-five thousand of these are American Beauties. We clip perhaps 10,000 roses each day." The roses presented the Columbia Club are a duplicate of the bunch that drew the first prize at the Kansas City flower show some months ago, which was a national affair. Mr. Heller started a modest little conservatory at New Castle seven years ago, and since then three other floral firms have come down from Chicago and settled there. Mr. Heller is just now experimenting with a yellow rose, which he thinks will be perfect. "Did you ever realize," he said, "how few real yellow roses can be found?" Heller is looking about for a name for his new rose, which he says will be as grand as the American Beauty in its general formation. He will be pleased if some one will suggest a suitable name for the rose. The name American Lady has already been suggested, but the company has not yet decided to adopt it. Some one suggested the American Queen, having in mind Charles Dana Gibson's picture of the American society girl, but Mr. Heller says there is already a rose of that name.

**DORSETT'S SINGLE VIOLET**

See American Florist, March 29, page 361.

For texture, quality and stability of the leaf, for bunching flowers this violet is unequalled. The flowers are medium size, of a rich dark violet color, and have a delightful delicate odor. The plants are vigorous, and under normal conditions are disease resistant. With good treatment will guarantee 98 per cent of stock to grow.

Having purchased the greenhouses and stock of Mr. P. H. Dorsett at Garrett Park, Maryland, I am prepared to furnish rooted crowns, for immediate delivery, at \$5.00 per 100, or \$40.00 per 1000. Sand-rooted cuttings, for delivery after May 1, \$6.00 per 100, \$45.00 per 1000; 2 1/2-inch pots, after May 1, \$7.00 per 100.

DAVID BISSET, GARRETT PARK, MD.

Y.** Please mention the American Florist when writing.

Cincinnati.

BUSINESS NOT DULL BUT STOCK IN SERIOUS OVER-SUPPLY.—MUCH OF THE RECEIPTS GO TO THE BARREL.—GOOD DESIGNS.—NOTES.

We are now having a glut of flowers and prices are very low. The wholesale houses at times do not know what to do with all the stock coming in and vast quantities find their way to the barrel. It cannot be said that business is bad, but there is not near enough done to consume one-half of the flowers received.

Last Saturday one of the finest cafes in this country was opened and nearly every florist made a design or two for the event. An open umbrella from Hardesty and an open fan from Gardner were two of the most conspicuous and best gotten up designs in the lot.

Jacob Meier, of the Clifton Rose Company, has sued Leopold Kleybolte for an accounting and Judge Hollister has appointed Albert Sunderbruch to act as receiver for the concern.

Miss Ada Kresken has been exceptionally busy of late with funeral work. Miss Kresken is one of the best flower workers in the city. D.

Minneapolis.

TRADE STEADY.—PLENTY OF GOOD STOCK.—VIOLETS AND BULBOUS FLOWERS GONE.—VARIOUS NOTES.

Business has been steady, with a fair demand and plenty of first-class goods to fill orders. Roses and carnations are abundant, with fair prices for both, as the bulbous stock is more or less cut out, and the call is for teas and carnations. Violets are about out of the market, the stock being thrown out to make space for spring bedding material.

A large consignment of Caladium esculentum and tuberose bulbs has recently been received from the south by Grinnell, Collins & Company, wholesale commission merchants.

C. F. Rice is away on a two weeks trip in the north woods, on a recreation tour. C. F. R.

SPECIAL April OFFER GERANIUMS.

To reduce our stock of 100,000 plants at once, we will fill orders for the following strictly high grade varieties, true to name and first-class in every respect: extra strong 1-p cuttings, \$14.00 per 1000; ready for 2 1/4-inch pots, \$1.50 per 100; \$4.00 per 1000; in Variety—S. A. Nutt (best crimson b-d-der), E. G. Hill, F. Perkins, Beaute Poitevine, Mme. Bruant, Dutchess of Orleans, La Favorite, J. M. Garr, Snow Drift, Thos. Meehan, Alphonse Riccard, L. P. Morton, Athlete, J. J. Harrison, E. Kelway, Mme. Jaulin.

Double Fringed Petunias.

If you want Petunias, we have them and can supply any quantity. Ten novelties selected from Henderson's and Dreer's latest sets, plenty of white, labeled. Extra strong rooted cuttings. SPECIAL PRICE, \$1.00 per 100; \$8.00 per 1000. 500 at 1000 rate.

Smilax, strong seedlings ready for 2-inch pots, \$5.00 per 100; \$4.00 per 1000. CASH WITH ORDER.

The W. T. Buckley Plant Co., Springfield, Ill.

STOCKS.

Ten Weeks, out of 2 1/4 in. \$2.00 per 100; \$15 per 1000. Salvia, 2 1/4-inch, \$2.00 per 100. Giant Alyssum, 2 1/4-inch, \$2.00 per 100. Sweet Williams, 1 year old plants, \$2.00 per 100; \$15.00 per 1000. Forget-Me-Not, 2 1/4-inch, in bloom, \$1.50 per 100. Vinca Variegata, rooted cuttings, \$1.00 per 100.

J. G. SCHMIDT, Bristol, Pa.

Plant and Rooted Cutting List

VENERABLE FLORIST CELEBRATES WEDDING ANNIVERSARY.—MANY CRAFTSMEN PRESENT.—CARNATIONS IN THE FIELD.—STATE OF TRADE.

Mr. and Mrs. Martinetz, of Lakewood, tendered a reception to a number of their florist friends and others Tuesday evening last, the occasion being their thirty-fifth wedding anniversary. Among those present were Mr. and Mrs. H. A. Hart, Mr. and Mrs. A. Graham, Mr. and Mrs. August Schmitt, Mr. and Mrs. Chas. Gibson and Dr. and Mrs. Hintzman. The couple were the recipients of hearty congratulations from their host of friends. Mr. Martinetz has the distinction of being one of the pioneer florists of Cleveland, having embarked in the business back in the early sixties, finally locating on the place he now occupies, the soil of which he found to be particularly adapted for grape culture, which fact induced him after a time to relinquish his floral business and enter into the business of growing grapes on a large scale for the production of wine. The business prospered to such an extent that he can now boast of having one of the finest wine cellars in Ohio. In connection with his wine business he conducts a successful country road house.

The advent of good weather has caused a number of the growers to start carnation planting. The J. M. Gasser Company has almost finished planting a field of 100,000 plants. The planting season this year is about one week ahead of last year.

Business has been steady the past week, no surplus of good stock on hand. Prices range about the same as at last report. ECHO.

DULUTH, MINN.—W. W. Seekins was adjudged bankrupt April 7. A meeting of the creditors is called for April 22.

APPLETON, WIS.—The Rogers Greenhouses are to be enlarged by the addition of two houses, 23x125 and one 23x100, one for roses, the others for carnations. A Chicago firm has the order for the cypress.

Cost of Greenhouses.

ED. AM. FLORIST:—I propose to build a greenhouse plant of five houses 15x150 for carnations and one 25x150, one half of which is to be used for bedding plants, and so forth, the other half, separated by a glass partition, to be used for palms. Will you please advise me as to the approximate cost of such a place complete, using "Dutch" roof construction and 3½-inch or 4-inch flues for heating? It will be a steam boiler with no dome, tapped for 3½-inch flows and returns, one main feed and one main return pipe for each house. The fire and heat goes under the belly of the boiler and back through the flues and up the stack. The whole will be bricked in. Will such a boiler be practical and economical and what will be the cost of same set up hauling charges not included (second hand good condition)? Will a tubular boiler 16 feet by 4 feet be sufficient? I figure that I will need about 6,000 linear feet of 3½ inch flues. The place will be built near Chicago and I expect to build it myself with the aid of my two growers and a greenhouse carpenter. VAN.

The plan which accompanied this letter showed five houses 15x150 feet and one house 25x150 feet. The houses would probably cost \$5,000 to \$6,000 exclusive of labor. The boiler described is of ample size and would answer well for heating the houses with hot water, which I infer is the method proposed. The amount of piping mentioned is approximately correct. It will be best to use two flows and returns for the 25-foot house. The boiler should be tapped for two 5-inch flows and two returns of the same size. One suitable for the purpose would probably cost from \$300 to \$500, according to its condition when set up.

L. R. TAFT.

BALLSTON SPA, N. Y.—Myron Paddock is planning the enlargement of his place this season.

LENOX, MASS.—At the April meeting of the Lenox Horticultural Society Robert Simpson, of Clifton, N. J., read an exceedingly interesting paper on rose growing. A fine vase of American Beauty was shown by Mr. Butts, for Mr. Philcocks, and was awarded a diploma.

SPRAY MIXTURES

**RIPPLEY'S**  
**Spraying Mixtures**

undeniably constitute the best, simplest and most reliable form in which to buy spray material. They are put up in cans and bottles, in the most concentrated form and need only to be mixed with water and they are ready for use. As they are all liquid in form there can be no precipitation or settling to the bottom. They always remain in solution and there is no consequent danger of burning foliage and injuring plants, vines, trees, etc. Sold by dealers and agents.

Use Rippley's Prepared Spraying Mixtures and Rippley's Spray Calendar and Make a Success of Spraying. Our Calendar tells when to spray and what solution to use on the various Trees, Plants, Vegetables, Cotton, Tobacco, etc.

Write at once for catalog of Spraying Mixtures, Sprayers and Breeders Supplies. Order early.

Lowell, Mass.

TRADE REASONABLY SATISFACTORY.—CARNATIONS ABOUT THE ONLY SHORTAGE — LILIES GO AT CHEAP PRICES.—VARIOUS NOTES OF LOCAL INTEREST.

Business has been pretty fair considering that a holiday has just been passed and that there has not been any great amount of funeral work lately. The supply of flowers is in good shape, except carnations, of which there is a scarcity, and the price continues to hold up. With roses it is another question. They can be bought at almost any price. Choice Brides and Bridesmaids can be had at from \$6 to \$8 per hundred, and for funeral work for from \$2 to \$3. Roses this winter have not sold as well as in former years. A few good Brunners are coming in and sell quite well at \$3 per dozen. Customers seem to have got tired of Meteors. Liberties have been scarce here this season. Pierson supplied us last year. Bulbous stock seems to be on the wane. Never was there a year when so much yellow was pushed out to customers as this. They are complaining, saying they have seen enough to last them a long time. Lilies, if one can use a large quantity, sell as low as \$3 per hundred, and in some cases find no buyers at that price. Frame violets are now coming in and are quite a change. May flowers from the wilds of New Hampshire have made their appearance and at 25 cents per bunch of thirty-five flowers the demand is greater than the supply at present. A. M.

LEXINGTON, VA.—H. P. Rhodes, fancy grocer and cut flower dealer, has made an assignment to D. E. Witt; assets \$300; liabilities \$600.

**A Coil Boiler.**

ED. AM. FLORIST:—We are planning to build a brick furnace inside of which there will be 150 feet of 1 1/4-inch pipe for heating water to heat a house 20x150 feet. We also wish to utilize the heat from the flue pipe. Do you think such an apparatus can be built, and how? We have tried it on a small scale and find that one foot of pipe inside the furnace will heat fifty feet of pipe outside. A. P. C.

Combination hot water and flue furnaces are seldom satisfactory. If anything of the kind is to be used, it will be better to get a saddle boiler, such as is made by some leading makers. If a coil boiler is to be made, it will be more satisfactory if 100 feet of 2-inch pipe are used instead of 150 feet of 1 1/4-inch. L. R. TAFT.

**A Question of Piping.**

ED. AM. FLORIST:—In writing to you at this time we ask advice with regard to heating a forcing house. We have a space of sixteen feet between two houses 100 feet long. We intend to take the walls away between the two houses after covering the space with glass. The present houses are 25x100 feet, amply heated to maintain a temperature of 55° when the weather is 10° below zero. The question is how many return pipes will be needed to give the same temperature in the new house. We have a hot water system and the new house will be close to the boilers. E. L. C.

With ten 2-inch pipes there should be no difficulty in maintaining the desired temperature, while nine would give good results. L. R. T.

The Highest award at the New York Carnation Show was given to a man who has forty-three (43) of our Automatic Ventilators. Our Ventilators are at work in the Central Park Conservatories, New York.

Prevents Mildew  
Operates to perfection in catchy weather.

Commercial growers use them largely.

The Automatic Ventilator does its own thinking.

Saves all labor.  
Improves the growth of plants.  
Especially good for Roses.  
Will last a lifetime and soon pay for themselves.  
The Automatic Ventilator ventilates as necessity requires.

**CYPRESS**

**Green House Material**

Hot Bed Sash. Red Cedar Posts.

Write for circulars or estimate.

LOCKLAND LUMBER CO.,  
LOCKLAND, OHIO.

POSSIBLY you have heard of Cypress material that failed to last. Such Cypress invariably is furnished by parties who have no knowledge of the peculiar requirements of greenhouse material. We have made greenhouse construction a special study. Our lumber is selected with the greatest of care, our material is guaranteed perfect and strictly up-to-date. Write us, when next you want material.

IT PAYS TO PAY FOR QUALITY

JOHN MONINGER COMPANY.  
GREENHOUSE MATERIAL  
111 to 115 BLACKHAWK ST. CHICAGO ILL.  
SELLING AGENTS FOR  
GARLAND IRON GUTTERS.

CLEAR CYPRESS ABSOLUTELY FREE OF SAP

**RIPPLEY'S IMPROVED 1902 COMPRESSED AIR SPRAYERS**  
have fine Vermorel Spray Nozzle; made of heavy copper and galvanized steel; has safety valve. Strongly riveted and double seamed. Guaranteed to be as represented and to be the strongest sprayer manufactured. Fine for spraying young orchards. Trees 25 feet high by using extension pole. Exterminating insects from vegetables, spraying gardens, washing buggies. Fine for whitewashing buildings, etc. Made in two sizes, 4 and 6 gallons. 4 Gal. Galv., \$5; 6 Gal. copper, \$7. Fine brass pump fitted on outside. Solution easily agitated. We also sell large orchard sprayers. 6 Gal. Galvanized, \$5.50, 6 Gal. Copper, \$8.00. Send to-day for our Sprayer and Breeder Supply Catalog. Agents Wanted. Rippley Hdw. Co., Box 19, Grattico, Ill.

**GARLAND'S IRON GUTTER**

No Ice. No Breakage Of Glass.

This Gutter will save money in cost of construction.

GEO. M. GARLAND, DES PLAINES, ILL.

# THOS. W. WEATHERED'S SONS,

HORTICULTURAL ARCHITECTS AND BUILDERS AND MANUFACTURERS OF HEATING AND VENTILATING APPARATUS.

THE ABOVE ILLUSTRATES OUR IRON CONSTRUCTION WITH IRON GUTTER, MADE IN LENGTHS UP TO 25 FEET. FROM A PHOTOGRAPH OF THE CRESSBROOK GREENHOUSES, FALL RIVER, MASS.

# High Grade Heaters

(ALL CAST IRON.)

In our **STANDARD BOILERS** the castings containing water have numerous shallow chambers that hang over the fire and immediately receive all heat and allow none to pass wasted to the chimney. The Boiler contains only three cored castings and is quickly erected.

## NO WATER CASTINGS

Are exposed to outside air, but protected by cast iron asbestos lining casing which effectually prevents the radiation of the heat and causes the water chambers to be entirely surrounded by the heat.

## SIMPLICITY OF OPERATION

WITH ENORMOUS EFFICIENCY IS THE CLAIM WE MAKE FOR THIS BOILER.

P. B. MAGRANE, Florist, Lynn, Mass., says:

"Your Standard Hot Water Boiler No. 32 is all that you recommend it to be. It does the work for me nicely that other boilers have failed to do. It heats a greenhouse 80x18 and also a large two-story barn and makes them quite comfortable in the coldest weather. I highly recommend it to any one as a first-class heater both from point of efficiency and economy."

We make a special price on the first Boiler going to a place where we have none in use.

Our Catalogue B contains information valuable to Florists and will be sent with prices on application.

### More About Pipe.

[A paper by A. E. Ford, read before the Florists' Club of Philadelphia, April 1, 1902.]

Your genial secretary in extending his official invitation was kind enough to originate the title "More About Pipe," but failed to advise on what point you wished for more information than you now possess. I am, therefore, led to conjecture that you may possibly desire to have the benefit of what knowledge I may have gained of both the manufacture and vending of wrought pipe, and will govern myself accordingly.

The manufacture of wrought pipe, while being of special interest to those who are identified with its production and sale, is of more than passing moment to Philadelphians, for the reason that it was in this city that the first machine-made pipe was manufactured in America, under patents secured from England, about the year 1835, an industry that afterwards had an enormous development and became a prominent feature in the business of this great industrial city. Prior to the time stated, pipe had been made by hand in England and here and was necessarily very expensive, so that when gas was first introduced into Philadelphia, old gun-barrels were used as a substitute until the supply became exhausted.

With regard to the original makers of wrought pipe in this country there seems to be some uncertainty, the claim having been made by Samuel Griffith, who had a furnace on the site of what is now 27 North Seventh street, and by Morris, Tasker & Morris, who were located at Third and Pear streets, where they carried on a toundry business and made a specialty of the manufacture of stoves, ranges, heaters, etc. It is no province of mine to endeavor to establish as to which of these claims was correct, but as Mr. Griffith never reached a point much beyond his original venture, and Morris, Tasker & Company expanded to such an extent as to become at one time the absolute controllers of the pipe industry, I shall deal with that firm in making further comparisons.

It is, of course, understood that all wrought pipe made and used at the time mentioned was iron and "butt welded," the commercial lengths being about twelve feet, and the gross product of this infant industry about ten tons per week. And in order to protect same in a measure from foreign competition, it was decided to adopt a different standard of threads to be known as the "American

gauge," which at this day necessitates our makers using the English threads on all pipe intended for export. From this small beginning has grown up one of the great industries of this country which gives us a practical illustration of our marvelous industrial growth, which does now and will still further in the future enable us to dominate the markets of the world. The present production of wrought tubular goods in America is not less than 5,000 tons per day, a capacity which equals at least that of England and Germany combined.

Where the original range of sizes was from 1/2-inch to 1-inch we now manufacture from 1/2-inch to 30 inch, the larger sizes being "lap welded" instead of "butt welded." The growth has, of course, been gradual and much of it has been attained since the introduction of steel as a factor in pipe making, which was first done successfully in 1885 by F. J. Hearne, at Wheeling, W. Va., this gentleman now being the President of the National Tube Company, which is one of the constituent companies of the United States Steel Corporation. This innovation you will readily understand was vigorously combatted by the makers of iron pipe, but slowly but surely steel has forced its way until it is to-day more of a king in the industrial world than cotton ever was.

I think, gentlemen, I have now reached the point which I understand was the subject of former discussion and possibly differences of opinion, and I wish to say that any sentiments which I may express simply represent my individual experience and judgment. To my mind there is no question that iron pipe as originally made from "A1" quality of pig iron was for some purposes superior to the present soft steel article manufactured by the Bessemer process, but unfortunately, commercial conditions have made it impossible to procure such pipe except at a price which would be practically prohibitive to the ordinary user, and we, therefore, have to choose between a so-called wrought iron pipe, which is manufactured largely from scrap iron, and which frequently contains a mixture of hard steel which unfits it for many uses, particularly when you have to cut it up, and a pipe of pure steel.

In making this statement relative to iron pipe you will understand that I am making no charge of any unfairness on the part of the manufacturers, as it is absolutely necessary for them to bring the cost of their product down to a point where they can make such selling prices

as will enable them to compete with the cheaper article. In other words, it has become a choice largely between good steel pipe and uncertain iron pipe, and my individual leaning is towards the former. Even if it were possible to get the kind of iron pipe "our fathers used," there would still be many uses for which steel would be preferable, particularly where tensile strength is to be considered. To more readily understand the differences between iron and steel pipe, it might possibly be well to explain tersely the difference in their production.

In making iron pipe originally a high grade of pig iron was used, same being "puddled" by hand labor into what is termed "muck bar." This is then piled into faggots, which in turn are rolled into sheets of the proper diameter for each size, the term for which is "pipe skelp." This skelp is then brought to the welding furnaces and brought to a finished condition.

The difference in making steel pipe is, of course, in the processes previous to its reaching the welding furnaces, where the work is practically the same. The steel

question an open one. There is another point in this connection, which, while it may not specially interest the members of this club, is an important one to the users of wrought pipe, and that is the matter of electrolysis. While I have no special data on this subject, I have heard it stated, without contradiction, that wrought steel pipe will show less impairment from electrical action than wrought or cast iron pipe.

In conclusion, gentlemen, I think that the efforts of the future will not be with a desire to make iron pipe to compete with steel at the expense of the quality of the former, but rather to so improve the quality of the steel product as to make it equal in every respect to the iron pipe which was formerly made under more favorable conditions than now exist, leaving iron pipe to occupy the same comparative position relative to steel pipe, as other iron products do to similar articles of steel.

I am glad to have been with you to-night, and if I have in any way contributed to your entertainment, or to your fund of information, the knowledge

of that fact will be ample compensation. I thank you very much for your kind attention and courtesy, and am ready to submit to the ordeal which I have been informed is awaiting me.

#### Cactus Bedding.

The bedding which attracted the greatest attention in Fairmount Park, Philadelphia last summer was the cactus bedding at the east end of Horticultural Hall. There were four beds around a larger, nearly circular one in the center. The tall specimens were placed rather close together, but sufficiently far apart so that each retained its individuality. They were set in a mosaic of alternantheras, echeverias and sedums. Agaves and aloes were also used and gave a variety that added greatly to the general effect. The popularity of this bedding was such that the vicinity was so crowded on all fair days, particularly on Sunday, that police officers were required to keep the people moving. K.

#### Successful Rose Growing.

[A paper by Gustave Emil Anderson, read before the Chicago Florists' Club, April 23, 1902.]

To grow good roses we must start with good young stock and good soil. The soil, I believe, should be prepared during the fall, put up in heaps, say about eighteen inches high, then six inches of cow manure and then another twelve to eighteen inches of soil, with a layer of manure on top, then left during the winter until the frost is out, when it should be turned over and broken up. Then the soil is ready for use.

When throwing out the old plants the benches should be cleaned off and a good coat of hot lime wash applied to the boards, unless tile is used in the benches. Then all dirt and rubbish should be cleaned from underneath the benches. Then we are ready for wheeling in the soil, which is quite a tiresome job (but we may live to see the automobile used for that purpose). The soil should be well chopped up when leveled off on the benches, and then comes the planting. The plants should be well watered in the morning, so that every plant is wet through; in case a few should be dry they should be set aside or dipped in a bucket of water. Then plant fifteen inches apart for Brides, Bridesmaids, Meteors, Golden

CACTUS BEDDING IN FAIRMOUNT PARK, PHILADELPHIA.

process of to-day has simply changed the manufacture of the raw material from hand labor to a mechanical manipulation of the original melting stock, the only difference being that the steel ingot is cast and consequently devoid of the fiber which you find in iron.

The steel pipe, owing to this process, has much more tensile strength than iron, and is, therefore, much more suitable for high pressure work. Iron pipe, when made as it should be, is undoubtedly more ductile than steel as made at present, but it, as claimed, there is at least two-thirds scrap placed in the puddling furnace, the result must be a bar which is hard and ununiform, in consequence of which the skelp of which this pipe is made does not possess the ductile and welding qualities which formerly distinguished the iron pipe.

I have not touched on the matter of corrosion because that becomes at times a matter largely of local conditions. I have seen cases where iron pipe did not give as good satisfaction as steel, and others where the reverse was the case, so that I think it is only fair to leave that

CACTUS BEDS AT FAIRMOUNT PARK, PHILADELPHIA.

CACTUS BEDDING IN FRONT OF HORTICULTURAL HALL, FAIRMOUNT PARK, PHILADELPHIA, IN 1901.

Gates and Kaiserins. Beauties require eighteen inches apart to give necessary air circulation around the plants throughout the season. Press the soil down firmly around the plants, and give a good watering but only around the plants, not watering the whole bed. After this syringe the plants one or two times a day, according to the weather. Water only when the plants are dry.

In about two or three weeks the weeds are up and the grower must go over the benches and loosen the soil. The plants will now show good growth and will take a little more water, but water only around the plants for at least two months. Cut all buds off with two to three leaves. Now give a good watering all over the benches and get ready to stake and tie. By this time, if flowers are wanted, the buds can be left on but be careful in cutting the flowers not to cut the plants into the bones. Give all the air possible and the ventilators must be strictly attended to. Open the ventilators a little at a time and lower the same way; if opened the whole way at once and closed again in the same fashion mildew will soon appear.

During hot weather the walks in the greenhouse should be dampened to keep the air moist around the plants. Fumigate on any cold, cloudy evening to keep down the aphids, but do not fumigate too heavily; open the ventilators about two or three hours after if the temperature is too high. Keep the soil worked up and attend to the tying. As soon as the nights get chilly make a little fire and turn on a steam pipe, putting a little sulphur on the pipe. Then be very careful about the ventilation. Do not close down the houses in order to save a few shovelfuls of coal, but leave a crack of

air on all night. Do not dampen the walks any more and syringe only on bright sunny days. Examine the soil before watering and let the plants get on the dry side; then water thoroughly.

Some growers cut out all the blind wood in the fall, but I think that it is wrong, as the days are getting shorter, with little or no sunshine, not much air can be given and the plants seem to lose part of their life. Therefore the wood should be left on the plants to help keep the roots active. As long as there is good root action there is life and growth.

Those houses that were planted before June would stand a light mulching of well rotted cow manure about September 1. Those planted later, I think, are better off with a scattering of bone meal about October 1. I do not believe in mulching with cow manure during the short days as the manure will keep the soil in a sour, soggy condition for several days after each watering. If manure water is obtainable, I think once every two weeks is not too often to apply it if the plants are in a good, vigorous growth. Bone meal, wood ashes and lime are good during midwinter, but must be used with judgment. About the middle of January the days are beginning to get longer and brighter and a light mulching of manure can then be put on, unless manure water is used.

Fumigating should be attended to every week. There is quite a difference of opinion about fumigating Brides and Bridesmaids. Some growers fumigate in the morning, as the Bridesmaids have a tendency to lose their color, but I think that is a big mistake, because I have found that the flowers cut right after the fumigating will keep that nasty odor of tobacco smoke for some time and the

customers, as a rule, have a habit of putting the flowers up to their noses as soon as they get hold of them. They want the fragrance as well as the flower. I have found, by fumigating in the evening, when I watered, the buds being tight, that toward morning the smoke has disappeared and the flowers have gradually opened, the fragrance is there and they lose very little of their color.

Another important thing is to have a good night fireman as soon as fire is needed. Many good rose houses get checked the first few cool nights, and it often takes a good while before they start out again. Many old growers who ought to know better let their rose houses drop down to between 40° and 50°, and I have seen the plants in the morning as wet from moisture as if they were being syringed, and yet I was told that it would do the plants good to get them hardened off. It will pay any grower to get a fireman that knows how to fire; not one who is a good coal shoveler, but one who knows how to keep a steady fire and an even temperature in the houses. Most of the greenhouse firemen like to stuff the boiler as full of coal as they can and then lie down for awhile, and keep that up through the night, sometimes never to look into the houses. Such a man will damage the stock and burn coal for many times the amount that it would take to pay a good man who knows how to fire and keep the temperature right in the houses and there would be less of sickly plants and crippled flowers.

CRESTON, IA. — The Creston Greenhouses, I. C. Hon, manager, are being enlarged by the addition of two houses 20x80.

*Adiantum Cuneatum.*

It has been suggested that some notes relative to the culture of this very useful fern would be acceptable to some of the readers of the AMERICAN FLORIST, and while such an article may not possess the merit of entire novelty, yet it is written in the hope that it may prove useful to various inquirers.

To begin at the bottom of the subject, the spores or seeds should be the first consideration, and these should be secured as soon as possible if it is proposed to grow a stock for next winter. As a matter of fact, the spores should

small panes of glass and also well shaded from the sun with papers or muslin.

With proper care the seedlings will appear in two to three weeks, and at the end of six weeks to two months may be large enough to be separated into small patches and transplanted by the aid of a small flat stick to other pots or pans that have been prepared in much the same way as the original seed pots, and in which the transplanted patches of prothallia, as the young ferns in their first stage are termed, will have more space to develop.

Some growers allow the young ferns

to remain in these pots after transplanting until they are large enough to be handled for potting, while others prefer to make a second transplanting before potting, the latter method being probably more economical, though occupying more time. When large enough to be handled conveniently the seedlings are potted off into 2½-inch pots, and to facilitate this operation the soil used should be passed through a fine sieve, the young plants being set away in the greenhouse and watered without delay after potting, and should also be protected from the sun and air by covering with papers for a week, it being also understood that at this stage of the proceedings the greenhouse in which the plants are placed should also be shaded.

From this time forward it is largely a matter of ordinary routine in regard to repotting before the plants get too much starved, the shifts depending upon the use to which the plants are to be put, but care should be exercised in the watering of newly potted adiantums, for, while they should not be permitted to get very dry at any time, yet the soil should not be made too wet before the plants are established in it. In regard to soil this adiantum is not very particular, and a good loam enriched with about one-sixth of dry cow manure will be found satisfactory, for most ferns take to this fertilizer quite kindly provided it is not fresh and rank. Rubbed through a sieve with 1-inch mesh and mixed in about the proportions noted above it usually works very well.

After the adiantums are established they will require an abundance of fresh air, and this should be regulated in accordance with the wind, airing freely all night throughout the warm weather and continuing the night ventilation until the weather becomes too cold to keep a night temperature of 60° to 62° with air on. During the summer shading will be needed over the adiantums, but from November 1 to March 1 they will do without, and will keep in better

ADIANTUM CUNEATUM AND A. CUNEATUM ROENBECKII.

have been sown earlier than this to get the best results, preferably about the beginning of January.

The spores should be sown in pots or small pans, 6-inch pots being frequently used for this purpose, the pots having a good layer of coarse drainage material in the bottom, either crocks or cinders, and then being filled nearly to the top with finely sifted soil, a peaty mixture being frequently, though not necessarily, used for this operation, and the soil pressed down smoothly and firmly in the pots until the surface of the soil is about half an inch below the top of the pot. The pots are then thoroughly watered, and should be allowed to drain for a time before the spores are sown, this watering being intended to suffice until the spores are germinated, if possible. All future waterings of the seed pots should be done from the bottom by immersing the lower part of the pot in a bucket of water and keeping it there long enough to moisten the soil without applying any water to the top.

The spores should be evenly dusted over the surface of the soil, and from the fact that the spores are extremely fine and light it is advisable that this be done in a place that is reasonably free from draughts. The seed pots are then plunged in sand, ashes, or other moisture retaining substance in a warm greenhouse, or placed in a propagating frame if this is convenient, the pots being covered with

ADIANTUM CUNEATUM.

WINDOW DISPLAY OF JOHN COOMBS, HARTFORD, CONN.

condition for general use than when they are too heavily shaded.

If it is desired to grow adiantums for cutting it is the better plan to plant them out on a bench rather than to grow them in pots, and a good method for such a crop would be as follows: Use a bench the bottom of which is sufficiently open to allow good drainage, and in a house that is reasonably free from drip. Fill the bench to a depth of six inches with similar soil to that suggested for pot culture, but using in the bottom of the bench some rough, fibrous soil such as chopped sod in order to keep the drainage open. Plant out strong and healthy 3-inch pot plants, placing them from one foot to fifteen inches apart, planting them firmly and watering in fairly well, but after this watering it is well not to water too freely until the plants begin to grow, for if the bed becomes soggy and sour the plants will not make a good start.

Shade the house moderately and ventilate as recommended for the pot plants, and such a bed should give a good lot of fronds during the following winter, and ought to continue to produce profitably for two or three years if given a good top-dressing of new soil each year, and also have all dead fronds and rubbish removed from time to time.

There should not be much trouble from insects among the adiantums, the worst pest being the common snail, which has a most voracious appetite for young fern fronds. Pulverized camphor, or pulverized moth balls sprinkled among the plants in moderate quantities will drive out most of the snails, and unless used in profusion will do no injury to the plants. Green aphids will sometimes appear on the

young growth of the adiantums, but is readily disposed of by the use of nicotine vapor carefully applied.

For pot culture it is best to secure the true form of *A. cuneatum* if possible, for much of the stock sent out of late years as *A. cuneatum* is in reality the variety of this species named *A. Roenbeckii*, the latter being less compact than the type, having smaller pinnæ and producing a longer frond. For cut fronds it is perhaps immaterial which form is grown, but as a pot plant the true *A. cuneatum* is superior. The distinction between these two forms is shown with some degree of clearness in the accompanying illustration, in which the forms in question are exhibited side by side, and while it is not so marked a difference as would be noticed in the habit of two plants of corresponding size set up together, yet the difference is quite worthy of note.

W. H. TAPLIN.

#### A Handsome Window.

John Coombs has been attracting much attention to his store at Hartford, Conn., by his fine window display, a photograph of which is herewith reproduced. This is a view taken just after Easter, after the flowering plants had been well cleaned out. During Easter week, underneath the arches, each side was banked solid with lilies and beneath the center arch were azaleas, making a very pretty effect and one which without doubt did much to stimulate trade. The leading retailers throughout the country are coming more and more to recognize the value of tasteful display in winning patronage. It is the man with the handsome wagon and the profusely decorated

show window who is getting the cream of the trade, for he is the one who is talked about by the people, and there is no such advertising for a retail business of any character as the voice of the people. But taste must dictate, for over-display is ostentation, which is not inviting, and the embellishment of the salesroom and show window must be in keeping with the capital of the concern; it should be just one step in advance of the development of the business.

#### Roses In Chicago Parks.

The past winter was a very favorable one for outdoor roses, notwithstanding that it was a long, cold one. Those in the rose garden on the Wooded Island in Jackson Park, Chicago, and in the new rose garden in Washington Park, have wintered splendidly. It was, indeed, a pleasure to find upon uncovering them this spring, the stems green to the tops. The covering was removed March 20, just before a severe cold spell, but they were not injured in the least, owing, no doubt, to their dormant condition. Right here is a very important point which seems to me should always be kept in mind in caring for outdoor roses, or any other outdoor plants. It is not the extreme cold, but the sudden change from heat to cold which does all of the mischief. The wood should have become thoroughly ripened before the covering is put on in the fall, and then covered with just enough leaves or manure to keep them from sudden changes of temperature, for if the roses become too warm the sap will begin to flow, and when the next cold snap comes great damage usually results.

I had not intended to refer at this time to the winter care of roses, but having in mind several failures resulting from this cause I think it might be a good thing to note for those who have had poor success in bringing their plants through the winter. Covering, pruning and watering are the three important factors. Without careful attention to these, I do not believe it possible for anyone to have even fair success in this vicinity with outdoor roses. Many persons who purchase and plant roses and other hardy plants are disappointed with results simply because they do not realize that in order to succeed, they must give them careful attention during the winter months.

In some eastern and southern states roses are as common as lilacs, while around Chicago they are looked upon by flower lovers as a luxury. This would not be so if our amateur growers would only remember that they must give their plants cultivation, care and attention. Otherwise the money and time extended in planting them is wasted, for are there not many hardy plants which certainly require less attention than do the roses? On the other hand, when such beautiful and tender roses as Ulrich Brunner, Mrs. John Laing, John Hopper and even La France can be successfully wintered with a little work, it seems to me that almost anyone would be well repaid for the little inconvenience necessary to success.

I do not believe that there will ever be a flower to take the place of the rose. When people who can afford it will pay in the winter time from \$3 to \$15 for a dozen fine rose blooms there must be something about these flowers which elevates them in the estimation of most people, and I believe if the roses were as

noted for the easy culture of flowers Chicago is a long way from the first.

The following kinds of roses may be considered perfectly reliable and have stood the test of our Chicago winters for a number of years, with protection: Gloire de Margottin, Louis Van Houtte, Prince Camille de Rohan, Mme. Geo. Bruant, Mrs. John Laing, Ulrich Brunner, Alfred Colomb, Marshall P. Wilder, Anne de Diesbach, Mabel Morrison, Baroness Rothschild, Gen. Jacqueminot, Earl of Dufferin, Grace Darling, Victor Verdier, Fisher Holmes, Paeonia, Magna Charta, John Hopper, Mme. Plantier and La France.

Dependable moss roses are Blanche Moreau, Crimson Globe, John Cranston, Countesse de Murinais, Luxembourg, Henry Martin and Princess Adelaide.

All of the forgoing kinds, and many more, may be seen at the new rose garden in Washington Park and all are expected to be in bloom by June 10. The Jackson Park rose garden does not contain quite as many varieties, but the plants are exceptionally fine this season.

EDWIN A. KANST.

#### The Chicago Exhibition.

Preparations for the November exhibition at Chicago are watched with interest, for it is to be a joint affair of the Chrysanthemum Society of America and the Horticultural Society of Chicago, the first step toward a national chrysanthemum exhibition. The showing of chrysanthemums, both cut blooms and plants, will be under the auspices of the national body, the local society concerning itself with the miscellaneous plants, the carnation and rose displays, the floral arrangements and other features. For twenty-

classes for twelve blooms the premiums are \$6 and \$4. In all these classes only varieties certificated by the C. S. of A. subsequent to 1897 are admissible. There is a class for 100 blooms, one or more varieties and colors, arrangement as well as quality to count, in which the three premiums aggregate \$130, and \$75 is set aside for vases of 100 blooms in which no flower is to exceed four inches in diameter. There is liberal provision for anemone and pompon varieties and collections of French and English sorts will be given classes. There are six classes for new varieties, exhibits to be eligible for certificates, also to the competition for the S. A. F. silver and bronze medals. The premiums for chrysanthemum plants already announced amount to \$465.

In miscellaneous plants \$85 is offered for three standard geraniums, \$65 for fifteen geraniums in not over 10 inch pots, \$40 for the best collection of orchids, \$60 for the best collection of ferns, \$50 for six araucarias, \$50 for three cosmos, \$30 for five Gloire de Lorraine begonias, \$140 for collection of stove plants and \$60 for best display of flowering plants other than chrysanthemums, while the miscellaneous plant premiums aggregate \$734.

In roses the best fifty Beauties will receive \$40, with \$25 for second and \$15 for third premiums. For seventy-five Liberty the two premiums amount to \$60 and for 100 Golden Gate, Bride, Bridesmaid and Kaiserin the premiums are \$32 in each class. There are also classes for forty blooms with premiums of \$6 and \$3 and a silver cup is offered for a new rose. In carnations there are thirty-one classes with premiums of \$4 and \$2 and ten classes for 100 blooms with premiums of \$10 and \$7, besides classes for seedlings.

There are many special premiums and others will be announced later. Those who wish copies of the preliminary premium list can procure them by addressing the assistant secretary of the Horticultural Society, Edwin A. Kanst, 5700 Cottage Grove avenue, Chicago.

#### Planting Out Dahlias.

Dahlia roots can now be planted safely over the greater part of the country, although it is better not to plant too early. We always get much better results from roots planted between May 15 and June 1 than from those planted earlier. Where it is possible it is much better to make at least two plantings.

The soil is of little importance, as dahlias, like corn or potatoes, will grow well anywhere if given sufficient nourishment and good culture. Of great importance, however, is the condition of the soil. My preference is a good heavy sod, with no manure, except a little pure bone meal. Too much manure has always been the chief source of failure in growing dahlias, especially when planted early. If sod land is not available, any soil will answer, but it should be thoroughly prepared and a light dressing of bone meal applied.

The objection to using land too rich is that the plants become overgrown and are soft, with the result of blasted buds and small or one-sided flowers. The chief object in dahlia growing is to get fine flowers and lots of them. This we have always done by getting the bloom on small, well-grown plants and when the plants are once blooming well we feed

DENDROBIUM NOBILE WITH 1,300 FLOWERS.

(Grown by Wm. McAllister, gardener to Mrs. J. C. Whitin, Whitinsville, Mass.)

scarce in the summer as they are in the winter most people would not accept a substitute, and that those who can afford it would buy them in preference to others. Chicago is called the Garden City and she deserves that name from the love which all Chicagoans have for trees, plants and flowers—if it were not so how could she maintain her right to be called that name?—for of all the cities

five blooms of chrysanthemums the premiums will be \$15 and \$12, there being two classes for yellow and two for pink, Major Bonnaffon and Vivand-Morel being used as color standards in the same fashion that Scott has been long used as the color line in classes for pink carnations. The same color division will apply to classes for six blooms, where the premiums are \$3 and \$2. In the

them heavily to produce the large, long-stemmed flowers.

Selection of varieties is very important although not so much so as some years ago, because growers and dealers have become more interested and consequently better educated in dahlias. In ordering dahlias from any reliable house and asking for the best for any particular purpose, one is pretty sure to get what he wants. Roots that are wanted for later planting should be kept in a cool place sufficiently dry to keep them dormant.

I would caution every one against planting too closely. The rows should not be closer than four feet and if the soil is rich, still farther apart. Eighteen inches to two feet apart in the rows, according to variety, is plenty close, while three to four feet is required on heavy soil if specimen plants are wanted. By planting too closely less flowers will be had than if planted the proper distance, and the quality will suffer also.

Dahlia plants raised from cuttings will in most cases give equally as good results as roots and in some cases much better. These can be set at any time after it is safe to plant out tomatoes and will require only the same good treatment necessary for all plants.

It is best to divide large roots before planting but, whether this is done or not, too many shoots should not be allowed to remain. For best results not more than two shoots should be allowed from each root, while one is better.

W. P. PEACOCK.

#### Plants in Design Work.

While the use of plants in filling baskets has received considerable attention of late, there need be no alarm among cut flower producers that the practice will become general and result in injury to the cut flower interests. It should be the aim of every florist to produce effects not only beautiful but which shall be reasonably durable, but too few of them realize the opportunities which the use of growing plants afford to endanger the usefulness of cut stock in floral pieces. Still there is a continually increasing use of small plants in such arrangements, not only in baskets and so forth, but in wreaths, pillows and the general run of funeral pieces. Such pieces are a novelty and take well, for one reason because the man who has begun to use plants, only through the demand made for something durable, is compelled to allow each plant to assert its individuality because he cannot chop them up. We are beginning to learn that when we cut up stock and use it in the ordinary way, we not only render it more perishable but we fail to make it look natural. On the other hand, the arrangement of potted plants often leaves something to be desired. It needs the finishing touch of a little cut stock.

Small ferns have been used for these arrangements, but not to the extent they should be and not as large in size as is advisable. There is usually a prejudice against old clumps of adiantum, but where they are divided and started in 3-inch and 4 inch pots they produce long-stemmed fronds as well as some shorter ones. *Euonymus variegatus* is as easily grown as English ivy, and with its long, drooping branches of white and green it is invaluable. These and other plants should be arranged for now, so as to receive their spring and early summer growth in the pots. Florists who have greenhouses cannot afford to neglect this provision.

WREATH LARGELY COMPOSED OF PLANTS FROM POTS.

The accompanying illustration shows a wreath made in this way. The pots of adiantum and baby primrose were packed with moss, covering one-half, while the other half was of euonymuses, with the large fronds of *Cibotium* fastened in with rubber-capped glass tubes filled with water. The camellias and lily of the valley and one spray of orchids (*Vanda*) were fastened on toothpicks, as was the *Asparagus decumbens*, which is a good keeper. The packing of these plants with moss is easily and quickly done and you will be surprised often to see how well they look before the finishing touches are put on. C. B. W.

#### New York.

HOT WAVE RESULTS IN PRECIPITATE DECLINE IN GRADES AND PRICES.—ROSES SUFFER WORST.—CARNATIONS DO BEST.—OUTDOOR BULBOUS STOCK PILES UP.—ARBUTUS IS WELCOMED.—OUTING COMMITTEE HAS TICKETS READY.—VARIOUS NOTES OF LOCAL AND PERSONAL DOINGS.

The hot weather arrived at New York on schedule time and with the thermometer at 90° in the shade the effect on cut

flower production and cut flower sales can be easily imagined. Roses went downward with a rush, downward in quality and downward in demand. Violets went to pieces completely and bulbous material from outdoors came piling into the market. Cooler weather is already in sight at time of writing, with the prospect of a considerably reduced cut in greenhouse material. Carnations, on the whole, have been doing very well, and so has lily of the valley, but the outdoor crop of the latter is now due and values will suffer, as usual. Lilies are still very plentiful. Sweet peas are coming in quite heavily and are selling lower. Trailing arbutus is a favorite stock with the street vendors just now, who are glad to take these favorite spring flowers instead of violets for corsage wear.

The outing excursion committee announce that they will have tickets for sale on and after Monday, April 28, to members of the New York Florists' Club who propose going to Witzel's Point Grove on July 7. The steamer *Isabel*, which leaves the dock at foot of East Thirty-first street, has been chartered.

Louis Schmutz, who has been confined

to his castle in Flatbush for the past two months with a stubborn attack of rheumatism, is once more able to get out.

Julius Roehrs is laid up at his home in Rutherford, the result of falling from a trolley car near his residence. His injury is not considered serious, however.

Mrs. L. Wheeler, wife of the popular manager of Vaughan's Seed Store, has fully recovered from her recent illness.

A. J. Gattman is about to open a branch store at 49 Broad street, between Exchange Place and Beaver street.

The Rider-Ericsson Company has removed from Cortlandt street to 35 Warren street.

Alfred Gibbons, brother of Henry W. Gibbons, is now with the Gilbert Elliott law firm.

Young & Nugent have erected two attractive signs over their new extension.

Chas. Loechner sailed for Europe April 22, on the Kaiser Wilhelm.

Visitor: A. Fahrenwold, Roslyn, Pa.

### Chicago.

LARGE SUPPLIES OF STOCK WELL CLEANED UP.—SHIPPING TRADE BRISK.—GREATEST ACTIVITY AT THE ENDS OF THE WEEKS.—HOT WEATHER MAKES FLOWERS SOFT.—SPRING FLOWERS IN FROM THE SOUTH.—LOCAL RETAILERS NOT VERY BUSY.—FLEISCHMAN DENIES A RUMOR.—CLUB HOLDS INTERESTING SESSION.—WASHBURN PRAISES ASHEVILLE TRIP.—DOINGS OF GROWERS AND RETAILERS.

The market situation continues fairly satisfactory. While there have been large supplies of stock for the past two or three weeks, things have been cleaned up in pretty good shape right along. It has come to pass that the middle of the week is quiet, as regularly as the weeks come 'round, with increasing activity toward Saturday and decreasing demands with Tuesday. Shipping trade consumed everything in sight up to Monday and has been cleaning things out well in the last day or two. The extreme heat Monday and Tuesday caused a surplus of soft flowers, particularly roses, which popped open so quickly under the influence of the unexpected hot weather that the greenhouse men were unable to catch them in time. This wide open stock, of course, was moved with difficulty, at very low prices if at all. Since the rain Tuesday night conditions have been more normal, although there are still large supplies of roses and colored carnations. The particular demand has been for white flowers, especially white carnations, and on these it has been impossible to supply all orders. Red and pink have been above the demand and selling very cheaply in large lots. There is not much bulbous stock in the market, except callas and Harrisii. Of these two latter items there have been more than the market could assimilate. Violets come along as usual, while the quality continues good in spite of the warm weather, and they are selling fairly well. There is an active demand for greens, but all calls are supplied, smilax having become more plentiful than last week. This commodity is so easily shipped from a distance that the report of scarcity in this market invariably means large receipts within the next two or three days. Local trade has not been particularly good since Easter and various causes are assigned, Samuelson attributing it to the fact that fashionable people are leaving the city earlier and earlier each season; in fact it is noted that the houses of some of the best flower buyers

in the city have been closed most of the time the last year.

There was a good attendance at the Florists' Club meeting April 23. Routine business having been disposed of G. E. Anderson presented his paper on rose culture, which will be found elsewhere in this issue. In the discussion which followed Frank Bentley advocated aphid punk for fumigation in preference to tobacco stems, the latter having a tendency to bleach the flowers. Several speakers complained of the short stems of Liberty, and President E. F. Winterson declared that for a considerable time past the wholesalers had not been able to meet the demand for blooms of this variety with good stems. George Collins, grower for Peter Reinberg, said Liberty is a grand rose and he will grow more of it next season. He prefers grafted plants. Bentley & Co. exhibited a fine vase of American Beauty roses, and vases of Golden Gate, Bride and Bridesmaid from Sinner Bros., were of high quality. The prizes of the evening were awarded the exhibitors in the order named. The Chicago Carnation Co. displayed a large vase of very handsome blooms of Mrs. Potter Palmer carnation. A vase of flowers of the Barberton daisy, Gerbera Jamesoni, from A. Herrington, Madison, N. J., attracted marked attention and many of those present predicted that the plant would prove a valuable acquisition.

Fleischman has had a very handsome vase of Mrs. Potter Palmer carnation in his window this week, where it attracted much attention from fashionable ladies. In this connection a letter received from Joseph Fleischman, president of the corporation, may be of interest. He says: "Rumors have been circulated to the effect that we intend discontinuing our business at 181 and 183 State street. I wish to contradict such rumors as being untrue. It certainly must be known by this time that the success of the business is without question and we hope to continue to do business at the old stand for a long period."

Albert Fuchs has taken out building permits for three big apartment houses on the north side, the estimated cost of which is \$90,000. Since Mr. Fuchs' retirement from the florist business and his European trip he has been touring the country as manager for his wife, Fannie Reichter-Fuchs, the virtuoso, and it seems that music must have paid.

C. L. Washburn and Mrs. Washburn reached home Tuesday evening from North Carolina. Mr. Washburn says that Asheville is certainly one of the most beautiful spots he has ever visited and that aside from every other consideration the scenery there will amply compensate one for attending the S. A. F. meeting next August.

John Mangel is redecorating his new store in the height of modern fashion. He says that up to the time alterations were begun trade was practically as heavy as it has recently been at his State street corner, and the rent in the new stand is so much less that it makes him smile at the contrast.

Peter Reinberg shipped out 10,000 carnations, 2,000 roses and 300 long Beauties to one customer yesterday, but this is nothing unusual for them. Several times recently they have sent out 25,000 carnations, 10,000 roses and 500 long Beauties on one order.

Henry Phillip is approaching the end of his first season as a rose grower, and has met with such excellent success that he is putting up two more houses 30x200 at his place at Rogers Park, to be planted

with Meteors. John Muno, his father-in-law, sells his cut.

H. C. Rowe, until recently with J. C. Schubert & Co., has opened a very neat store at 35 Monroe street, almost across the street from Mangel, only a few doors from A. Lange and just around the corner from Fleischman.

Charles P. Hughes has resigned his position at Deamud's and will now devote his attention to the development of the home greenhouse business at Hillsdale, Mich.

Frank Garland is planning to plant Norway carnation for best white next year. He says that his smilax house has been one of his best money makers this season.

Wietor Brothers will plant a couple of houses with Ivory rose this year and have 5,000 young plants in fine shape and ready for the bench.

The growers have all been busy planting carnations since Tuesday evening's rain, although it was not quite as heavy as they wished.

The South Water street produce commission men are handling more or less spring flowers from the south, at so much a box.

Kennicott Bros. Company says that the first arbutus was snapped up eagerly but that now only the choice stock moves well.

Reinberg & Weiland are sending up a very nice cut of Beauties from New Castle these days.

The McKellar & Winterson Company is receiving some fine double narcissi.

Visitors: J. H. Sievers, San Francisco; L. C. Chapin, Lincoln, Neb.

### Boston.

FLOWER BUYERS REFUSE TO PAY FOR FANCY GOODS.—MEDIUM GRADES LARGELY PREFERRED.—TOO MANY GOOD ROSES AND NO SURPLUS OF CHEAPER STOCK.—SPRING MAKES ITS APPEARANCE IN THE PARKS.—EARLY BLOOMERS ARE OUT.—HIGHWAYMEN ARE ACTIVE.—VARIOUS NOTES.

The most noticeable feature of the present condition of the flower trade is the widespread discrimination in favor of the medium grades of roses as compared with the fancy selected stock. The large proportion of the latter on the market and the light demand therefor would seem to indicate that the rose growers are actually getting "ahead of the game" and that the cultural abilities of the commercial growers are outstripping the intelligent appreciation of the common people. The demand in the aggregate is good and doubtless more money is being exchanged for flower product than ever before under corresponding circumstances, but, whether in local or out-of-town trade, it is very marked—this disproportionate demand for medium grade roses, and the curbstone peddlers go even further and display an insatiate appetite for the lowest grade goods, notably Meteor and Liberty, the color of which seems to be a winning card in the present frame of mind of the buyers. Carnations enjoy a normal demand and violets, although in imminent danger of annihilation by warm weather, are still doing nicely. In bulbous material lily of the valley is the only item holding its own.

Spring is coming on apace and with the earliest season for many years on their hands the nurserymen and seedsmen are making an unprecedented hustle. The parks and boulevards are beginning

to look very attractive already, forsythias, magnolias and Prunus tomentosa being in full flower, and Prunus pendula, Pyrus Japonica and other early subjects are ready to burst into bloom. Mr. Pettigrew has made some very extensive plantations of English and American beeches, oaks and cedars. The general idea of the park planting is to have the borders pretty thickly wooded, leaving the meadows entirely open. For fringing the woodlands many cornuses, red buds and sassafras have been used. Where oaks, beeches or other permanent trees have been planted they have been thickly interspersed with birches, etc., as "nurse trees." The public garden is ablaze with numerous gay beds of tulips, hyacinths, daffodils, daisies, pansies, etc., and the walks are crowded daily with admiring throngs.

There appears to be an epidemic of robberies and assaults here at present. On Monday evening Joseph Gleason, of the Schlegel & Fottler Co., was sandbagged and badly hurt in front of the Northern Union Station. On Friday of last week Lawrence Cotter was "touched" for \$132, and it is reported that Bert. Pierce, of Waverley, was also a recent victim.

W. E. Doyle will do business, during the summer, only at his Boylston street store. The building on Tremont street in which he has been located for many years is to be torn down. In the fall he will open a fine establishment at the corner of Beacon street and Tremont place.

G. C. Eldering, of W. J. Eldering & Son, formerly Eldering Bros., is in town interviewing the dealers on the subject of Dutch bulbs and incidentally making friends for the new firm by his suave manner.

Lawrence Cotter has resigned his position at the Whitton place and will give his attention hereafter exclusively to the Galvin Greenhouses which he leased some months ago.

W. A. Prosser rejoices in the acquisition of a son and heir. William, Jr., arrived April 17.

John H. Cox has taken a position with Aitken & Co., at Springfield, Mass.

Visitors: C. H. Joosten, New York; Walter Mott, Jamestown, N. Y.

#### Philadelphia.

CUT FLOWER STOCK ABOUT AT THE AVERAGE FOR THE SEASON.—HEAT INCREASES CUT AT EXPENSE OF QUALITY.—PRICES DROP A NOTCH.—GREEN GOODS FROM THE SOUTH.—TRADE STIMULATED BY SPRING WEDDINGS.—BULBS IN CITY PARKS.—PALM GROWERS BUSY.

The stock of cut flowers now coming in is about the average of that generally seen at this season. Beauties are in full supply; in fact, there are more than the market will take handily and \$3 per dozen is now the price of the specials, but anything like a quantity can be bought for much less. Bridesmaids and Brides range from \$8 to \$10 per hundred, but to get the better price the stock must be first class. Kaisers are looking up and some very nice flowers have been seen the past week. Carnations are still fine, although the light pinks show the effects of the strong sun and are commencing to bleach out a trifle. Prices hold well; \$2.50 to \$4 is the price for good stock. Lawson is now exceptionally fine, better than it has been all winter. Violets are almost over. What are coming in now are very sweet; 50 cents to 75 cents is the price. Valley is in good demand at

from \$3 to \$4. A. Pennock, of Lansdowne, has a brand that is hard to beat. It stands stiff and erect until it is done for, while that of so many growers soon gets soft and wilts badly if exposed to a draft or in a warm room. Hartley, of Chestnut Hill, has some nice snapdragon which adds variety and sells well at 50 cents per dozen sprays. Business still keeps up, there being a good many weddings. The past few days have been unusually warm, the glass registering above 60° all night and getting well up above 80° through the day. This is a record-breaker for April in this locality.

Some good Asparagus plumosus is now shipped here from the south; in fact, from as far down as Florida. So we are told by S. S. Pennock, who handles it. We see no reason why this business will not increase, and if it does it will settle the question of the green goods supply, as going over a 100-foot house, picking one spray at a time, is not to be compared to a man with a sickle in a three-acre field. Smilax has been very scarce lately. Would not this grow outside as well? The present price is 20 cents to 25 cents for short strings.

The public city squares have been resplendent the past week with their displays of hyacinths and tulips. The blooms are certainly fine and attract great attention. H. F. Michell has supplied the bulbs the past few seasons and they are certainly a credit.

There has been quite a movement in palms the past two weeks, all the large growers having shipped a great deal of stock. In some cases this has gone to fill up the spaces in the houses made by the sales of Easter stock. K.

#### Cleveland.

TRADE HOLDS UP IN SPITE OF COMPETITION OF CHEAP SALES.—FAKIRS MAY PROVE AN EDUCATOR.—STOCK GOOD BUT CARNATION CUT FALLING DOWN.—MUCH STOCK GOING INTO THE FIELDS.—SEEDSMEN VERY BUSY.—NOTES.

Business still maintains its old-time swing and everything is moving along nicely. While the demand is steady, a great many flowers, principally roses and carnations, and good ones, too, find their way into the street fakirs' hands. Yet, for all the grumbling one hears, no appreciable harm is done by these gentry, even if they do sell good roses six for a quarter. In fact, the writer is inclined to believe they are educators, like Wanamaker, of Philadelphia. When Wanamaker started to sell flowers a great howl went up from the Philadelphia store men. Wild claims were made that their business would be ruined, prices would be cut so it would be impossible to meet the ruinous competition. But, lo and behold, the Philadelphians are selling more plants and cut flowers now than they ever did and getting just as good prices, if not better. It is just the same way in Cleveland. The more the street fakir sells the greater the demand in the stores. The people are becoming more and more educated to the love of flowers, and when they cannot get them on the streets they invariably patronize the stores. So, taking it all in all, the street fakir in time may prove a blessing in disguise. The quality of the stock coming into market is all that can be desired. Carnations are becoming a little scarce, owing, I suppose, to a good many florists making room for spring stock. Single violets are about over and the double ones coming in from other states are losing size and color. Out-

door bulbous stock is becoming plentiful. Large quantities of single Von Sion and Golden Spar are coming in. Tulips will be with us in a few days.

Carnation planting is under full swing now and if one may judge from the quantities being planted a large increase in the cut flower production may be looked for next season. The fine weather has started the building bee buzzing, and when one florist happens to meet another the first question is, "How many geraniums will you have for Decoration day?" and the next one, "How many feet of glass are you going to put up this year?" And so it goes, from year to year, with the end not yet in sight.

The seedsmen all report a great rush in the seed line. Nothing like it was ever known in Cleveland. Mr. Brinker, in his remarks before the Florists' Club recently, said some lines of seed were sold out entirely over a month ago. He claims it is all due to the prosperous condition of the people throughout the country and that farmers and truckers are making preparations for a record breaking season of prosperity.

A most unique floral design was executed by one of our leading concerns this week. To the designer and the party ordering it, it proved a gratifying success, but to the uninitiated it was a mystery. It was a section of water pipe. ECHO.

#### St. Louis.

TRADE SHOWS LITTLE CHANGE.—STOCK PLENTIFUL AND PRICES VARIABLE.—BEAUTIES BRING GOOD FIGURE.—FINE SWEET PEAS.—ENGLEMANN BOTANICAL CLUB CONDUCTING A SEED DISTRIBUTION.—PRIZES FOR YOUNG GARDENERS.

The market is very much the same as last week, except that stock is a little more plentiful. The prices vary some, roses running from \$8 for the best down to \$1, or even less when sold in large quantities. Some very fine American Beauties are coming in and bring as high as \$3 to \$4 per dozen, but considerable short stock is also to be had at a low figure. Pink carnations are more plentiful than other colors and there is just about enough white to supply the market. Violets are beginning to get shabby and will not last much longer. As roses and carnations are so cheap there is practically no call for bulbous stock. Some very fine sweet peas are being sent in now by H. Ude, for which as high as \$1 to \$1.50 per hundred is received. Sweet peas are running very irregular in quality.

The seed distribution that the Englemann Botanical Club has started is becoming quite an important adjunct towards beautifying the city. There has been sold to the school children some 30,000 packets of flower seed up to date and as many more are expected to be sold before May 15. The club has prepared an envelope with the names of sixteen different kinds of flowers that are easily grown and they ask 1 cent for this envelope and 2 cents a package for the seed. On the back of the envelopes are instructions for planting a garden. The club expects to sell about 100,000 packets this year before the season closes. A number of diplomas will be given in the fall to the children who have kept their gardens the best and are to be signed by the mayor and Dr. Wm. Trelease, the honorary president of the club.

Mrs. H. G. Berning is back at her desk again and is looking considerably better than she has for some time. R. J. M.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

WE are in receipt of a box of excellent  
arbutus (*Epigaea repens*) from C. W. Sib-  
ley, Athol, Mass.

THE hail losses have not been heavy  
thus far this season, but last year the  
Hail Association met its heaviest claims  
in June.

SOME pansy blooms received from I.  
E. Coburn, Everett, Mass., are of high  
quality, showing great variety of color-  
ing.

THE Belgian window glass blowers are  
on strike, home production is not ahead  
of the demand, there are small reserve  
stocks and further advances in prices are  
assured.

### The Best Out.

ED. AM. FLORIST:—Your style of set-  
ting up advs. is the best out. Thanks  
for your attention.

H. H. BERGER & Co.

New York.

### Another Double Lily.

ED. AM. FLORIST:—I noticed in the last  
issue of your paper a picture of a double  
longiflorum. We have the same thing  
at present on our place. It is a perfectly  
double flower, almost as large again as  
the ordinary bell. One can expect almost  
anything from the "Japs" this season.

ISAAC KENNEDY.

### A Correction.

ED. AM. FLORIST:—I see that in print-  
ing my paper in a recent issue you have  
given it the title "Practices of Nursery-  
men." This conveys an impression which  
I did not intend. The title as I had it  
was "Various Fraudulent Practices I  
Have Encountered in the Nursery Trade."

H. J. KOEHLER.

### Large Pipes for Steam.

ED. AM. FLORIST:—We are planning  
the erection of a three-quarter-span house,  
17x140, east and west. We have on  
hand a lot of 3-inch pipe. Could it be  
used for steam, using one flow overhead,  
as necessitated by the fall, with the  
returns under the benches? If it can be  
used, how many pipes will be needed?

C. & A.

Large pipe is less economical than the  
smaller sizes, but this might be more  
than counterbalanced by the saving in  
the cost of the piping. In addition to  
the flow pipe, two or three returns  
should be used, according to the temper-  
ature desired.

L. R. TAFT.

### Size of Flow Pipe.

ED. AM. FLORIST:—How large a main  
flow pipe would be required to supply  
steam to a range of 30,000 square feet  
of glass, the boilers being 400 feet from  
the greenhouses and carrying five and  
ten pounds pressure respectively? A tem-  
perature of 60° is required in zero  
weather.

R.

If used at the pressure named a 6-inch  
main would be needed, but if the boilers  
are safe to carry forty or fifty pounds  
pressure a 4 inch main would answer.  
After reaching the houses the steam pres-  
sure could be reduced to from one to five  
pounds according to the weather.

L. R. TAFT.

### Greenhouse Building.

So. Sudbury, Mass.—H. H. Rogers,  
range of carnation houses.

Baldwinsville, Mass.—W. P. Lund,  
cucumber house 20x130.

Red Bank, N. J.—J. H. Becker, range of  
vegetable houses.

Concord, N. H.—Boston & Maine Rail-  
road, propagating house.

Media, Pa.—Miss Phoebe Baker, house  
22x140.

Phillipston, Mass.—Chas. H. Stewart,  
house 50 feet long.

Weymouth, Mass.—John Streiferd, one  
house.

Montrose, Mass.—N. F. McCarthy,  
house 40x500.

Doylestown, Pa.—John Andre, two  
houses.

Benton Harbor, Mich.—Eldred, Sykes  
Company, three houses 14x50.

Jamestown, N. Y.—Lakeview Rose Gar-  
dens, six 330-foot houses; one 250-foot  
house.

### Size of Boiler.

ED. AM. FLORIST:—What size of boiler,  
how long and how wide, will be required  
to heat a range of four cut flower houses  
15x120 in Ontario. How many tubes  
should the boiler contain? Should they  
be 2-inch or 3 inch?

B. B.

The data furnished is not sufficient to  
admit of very close figuring as even  
though the length and width of the  
houses is given they might vary fifteen to  
twenty per cent in the amount of glass  
they contain. There might be an even  
greater difference in the heat required  
according to the kind of crop to be  
grown. However, it is not likely that any  
of the houses will require more than 600  
square feet of radiation and on that basis  
it would be safe to select a thirty horse-  
power boiler. This should have a length  
of ten feet and a diameter of three and  
one-half feet, and would contain about  
forty 3-inch flues.

L. R. TAFT.

### Wants Convention in California.

H. H. Lilienthal, state vice-president of  
the Society of American Florists for  
California announces an increase in the  
membership of the organization since  
January 1. The aggregate increase in  
California for that time is over 300 per  
cent.

He has addressed an official circular  
letter to the leading growers and dealers  
throughout the state advising united  
action and closer co-operation among all  
engaged in the production and sale of  
horticultural commodities.

The circular calls attention to the  
necessity of co-operation among raisers  
of flowers, plants and bulbs and refers to  
the work accomplished by the Society of  
American Florists in its eighteen years

of existence. Mr. Lilienthal seeks to  
induce the national organization to  
hold its annual convention in his  
state with the view of "giving greater  
prominence to California's generous  
endowments as a prolific seed, vine,  
fruit, floral and horticultural region."

### Begonia Gloire de Lorraine.

ED. AM. FLORIST:—We have good suc-  
cess with most flowering plants, such as  
cyclamens, cinerarias, genistas, primulas  
and begonias, but Begonia Gloire de Lor-  
raine does not seem to thrive with me.  
It is shy with wood but is fairly well  
flowered. Could you give me a hint or  
two as to soil, temperature and propaga-  
tion, whether cuttings or divisions? Would  
the muck from a peat bog and fine  
charcoal be good for them?

B.

Begonia Gloire de Lorraine "does not  
seem to thrive" during February and  
March, and even during April, with most  
people. During these months it makes  
little growth but an abundance of flow-  
ers. No nice young growth can be  
obtained for propagating until May and  
June. At this season the plants begin to  
grow from the bottom and these young  
tops root very readily in May and June  
and, under proper conditions, grow rap-  
idly through June, July, August, September  
and October. A cutting struck in June if  
kept shifted as required during the sum-  
mer will be a fine, bushy plant in a 6 inch  
pot by the first of November, at which  
time the plants begin to set buds and  
become one mass of flowers by the end of  
November and continue in this abundant  
bloom through the holidays and up until  
the first of March. We use ordinary rose  
soil for them, with the addition of one-  
eighth well-rotted leaf mould. We shade  
them slightly during the hot weather  
and give them an abundance of air during  
the summer months. During the winter  
we keep them in a night temperature of  
about 60°. We do not think muck from  
a peat bog good material for them, but  
charcoal either used as drainage or mixed  
in the soil would be all right.

ROBERT CRAIG.

### Blight in Geraniums.

ED. AM. FLORIST:—In the latter part of  
last summer my geraniums in two large  
beds were attacked by a blight, double  
and single Gen. Grant the worst, and  
S. A. Nutt considerably, so I had a  
poor lot of cuttings last fall, but they  
recovered nicely in the house. Now I  
have about 250 in 4 inch pots, very  
thrifty looking, but the blight is showing  
again on a few plants, which I have sepa-  
rated from the rest. As I need the stock  
badly I am alarmed and would be very  
glad indeed to learn of a remedy. The  
temperature is 50° at night, with 10° to  
15° higher in the daytime. The gerani-  
ums are in a corner of a 100 foot house,  
with carnations on the same bench.  
Scott and Crane are fine but Meteor,  
Mrs. Lawson and Armazindy make a  
poorer show. There's also a little patch  
of Campbell violets in the house, just 100  
plants, from which I picked from Novem-  
ber to March 1, 5,300 flowers, and the  
crop promises to continue well into the  
spring. I have not much experience at  
violet growing but I think this is doing  
pretty well.

J. C.

The afflicted geraniums are attacked  
with a lungus growth, judging by the  
description given. Geraniums in widely  
separated sections of the country have  
been affected with this same disease. It  
is the opinion of those having had this

trouble that the only way to get rid of it is to destroy all plants infected and use new stock. I would advise the use of Bordeaux mixture as a trial if it is deemed best to attempt to clean the affected plants. Personally I have little faith in anything being done to rid the plants of the disease. We have had stock shipped to us diseased as mentioned above but we always destroy or return the same to the shippers. E. G. HILL.

[The foregoing answer applies also to the query and samples forwarded by "G. T. W."—Ed.]

**SITUATIONS, WANTS, FOR SALE.**

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By thoroughly experienced rose and carnation grower, capable of taking charge. Married, good references. Address F. MILLS, Menlo Park, Cal.

**SITUATION WANTED**—Steady, by sober industrious man, 11 years in America, grower of cut flowers, plants, etc. Address, with offer, WILL, care American Florist.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

**SITUATION WANTED**—By a competent florist; grower of first-class roses, carnations, 'mums, violets and general greenhouse plants; 25 years' experience. Want position as foreman. Can manage men with success. Best of references; strictly temperate; expect good wages. Address C. H. W., care American Florist.

**WANTED**—Florist for general greenhouse work. Good wages. Address FRANK BEU, 2780 N. 40th Ave., Chicago.

**WANTED**—Young man to learn greenhouse business or one with slight experience. GASKILL'S GREENHOUSES, Warren, Ohio.

**WANTED**—One rose grower, two helpers for rose section and two for general greenhouse work. J. F. WILCOX, Council Bluffs, Iowa.

**WANTED**—Rose and carnation grower and one good designer and decorator. State experience and wages. W. A. DUKE, Danville, Ill.

**WANTED**—Experienced assistant gardener for all-around work. State wages wanted with board. J. GEIST, 84 Grove street, Melrose, Mass.

**WANTED**—Capable man to take charge of 3000 feet general stock—or will sell right. No competition. State experience and wages wanted. W. J. OLDS, Union City, Pa.

**WANTED AT ONCE**—Capable man for general greenhouse work. Must be experienced; \$20 month with board. Steady place. In Illinois. W. T. A., care American Florist.

**WANTED**—At once an experienced all-around florist; German preferred; \$30 per month with board. Mrs. CHAS. DUNTZE, 1989 Madison Ave., Memphis, Tenn.

**WANTED**—Competent man for store. Good decorator and designer. Send references and state wages. Address CENTRAL GREENHOUSES, Sandusky, O.

**WANTED**—A good florist to grow roses, carnations, 'mums and general stock. \$30 00 per month; board and room. State age and references. C. HUMFELD, Clay Center, Kans.

**WANTED**—First-class rose grower to take charge of section. Best references required as to ability, character and sobriety. State wages expected when writing. J. HENRY BARTRAM, Box 5, Lansdowne, Pa.

**WANTED**—A first-class Beauty grower, married man preferred. Will pay good wages to right man. If satisfactory will give full charge of establishment. JNO. MUNO, 51 Wabash Ave., Chicago.

**WANTED**—Rose and carnation grower, to take charge of 20,000 feet of glass. Must be well recommended. State wages wanted with board and washing, also age. Address JOHN L. WYLAND, De Haven, Pa.

**WANTED**—A good man for my retail store. Must be a good sale-man and designer and of pleasing address. References wanted; in answering state experience and wages expected. Address E. J. BOLANZ, Akron, O.

**WANTED**—To lease for not less than 3 years, by a practical grower of 20 years' experience, a place of from 5,000 to 15,000 feet of glass in good condition. West of Denver preferred. Address H. C., care American Florist.

**WANTED AT ONCE**—A first-class rose, carnation and violet grower. Dwelling close to greenhouses and good wages to right man. Young married man preferred. Address, giving references, J. R. FREEMAN, 612 13th St. N. W., Washington, D. C.

**WANTED**—Competent store man to take charge of a first-class store. Must have the very best of references as to ability and qualifications. Address, stating salary expected, THE GRANT-WILSON FLORAL CO., 480 Prospect St., Cleveland, O.

**WANTED**—Gardener to care for garden, lawn and greenhouse, cow and horse. Must be experienced and capable. Wages \$30 per month with board and room. Address, giving nationality, age, experience and references. G. E. DILEY, Palestine, Texas.

**WANTED**—Greenhouse assistant, some experience with bedding; wages \$20 per month with board and room. Must be steady and reliable. A good place for right man. Answer at once with full particulars. Address H. LORIN GEORGE, Pittsburg, Pa.

**WANTED**—We have a good chance for a thorough, first-class grower who wants to enter business for himself, to take charge of a new range of glass devoted to growing roses, carnations and palms for the retail store. This will bear close investigation. Address G. W., care American Florist.

**WANTED**—Florist to take charge of 10,000 feet glass. Must understand roses, carnations and general greenhouse stock. State wages expected and give references. This will lead to further advancement, as new block of houses are soon to be erected. Party must be able to come at once. Address THE GRANT-WILSON FLORAL CO., 606 Jennings Ave., Cleveland, O.

**FOR SALE**—Good second-hand greenhouse material. L. A. WHELOCK, Ovid, Mich.

**FOR SALE**—Prosperous, up-to-date, growing florist business; established 12 years. Address for particulars, Mrs. S. N. ALKIRE, Greenvlew, Ill.

**FOR SALE**—6,000 feet of glass well stocked, house, etc. All O. K. and in good order. Bargain; terms easy; other business. Address Box 53, Decatur, Ill.

**FOR RENT**—Greenhouses and 14 acres of land with good dwelling and good water supply, without extra expense for rent. Enquire of T. H. WRIGHT & Co., Ft. Dodge, Ia.

**FOR SALE**—Twenty miles from Boston, five acres level, fertile land, suitable for florist or market gardener. Five minutes from station. L. G. BISSETT, 1150 Columbus Ave., Boston.

**FOR SALE**—At a bargain, greenhouses, 25,000 feet of glass, land and good dwelling house, barn, etc., in best of condition and well stocked; near Chicago; owner going into other business. Address H. G., care American Florist.

**FOR SALE**—A well established up-to-date florist and garden business in a wide awake western city. This will pay you to investigate, if you are looking up a business for profit. Full particulars. Address T. L. BAOLE, Pittsburg, Kan.

**FOR SALE**—25,000 feet of glass; established 15 years, 8 miles from city hall, Chicago, dwelling house, barn, wagons, tools, etc., all complete and at a bargain. Right man could make price asked in one year. Address CHICAGO, care American Florist.

**FOR SALE**—Greenhouses in full operation, mostly carnations; 12,000 feet of glass, near station inside of Chicago limit. Good soil, plenty of young stock for planting out. Must be sold at once—very cheap. Address E. H., care American Florist, Chicago.

**FOR SALE**—Florist's business. Well established and doing a good retail business. Located in one of Chicago's wealthiest suburbs; 25,000 feet of glass well stocked for spring sales. For full particulars and price address E., care American Florist, Chicago.

**FOR RENT**—A prosperous retail and wholesale business; new houses complete; 15,000 feet of glass, 16x24; one acre of land, and dwelling; rent \$50 per month; opposite Woodmere Cemetery gates; one mile from Detroit, Mich. Address ANTON KAER, Woodmere P. O., Mich.

**FOR SALE OR RENT**—6000 feet of glass, hot water heat; own water works; sale for all you can grow. Quick buyer can double price asked for stock in sixty days; terms easy; no triflers. For particulars Address

J. G. REYNOLDS & SON, 261 W. Pulkeney street, Corning N. Y.

**FOR SALE**—Greenhouse property, situated within four miles of Boston Cut Flower Market, 5 minutes to R. R. Station and within 100 feet of two lines of electric cars. The property consists of 39,000 sq. ft. of land and contains one house 27x185 feet and one house 17x185 feet, 16x21 glass; both heated by a 35 H. P. steam boiler. Also one house 22x100 feet, heated by hot water. All the houses are well stocked with carnations, ferns, dracaenas and a large assortment of bedding plants. About all the stock sold at retail. For information, apply to GEO. A. SUTHERLAND, 34 Hawley St., Boston.

**A RARE OPPORTUNITY FOR THE RIGHT MAN.**

Greenhouse establishment doing prosperous local retail and wholesale business in thickly settled, wealthy community. Owner forced by ill health to retire from active work, will sell or lease, or arrange for profit sharing with competent manager. Address W. J. STEWART, 79 Milk Street, Boston, Mass.

**WANTED** A first-class store man. The advertiser wishes to open a first class store in one of our largest and most progressive cities, and would like to correspond with a competent florist who would like to invest a corresponding amount of capital. This is a No. 1 chance for the right man. Address, stating qualifications and the amount of capital you would be able to invest. F. C., care American Florist.

**\$300 Per Month.**

Do you want it? If so, buy me out NOW, at your own price. Good reasons. 15,000 feet. It costs you a postal card to have particulars.

C. S. FITZSIMMONS, Lansing, Mich.

**For Sale at a Bargain**

Greenhouses, 25,000 square feet of glass, all in good condition and paying well; within 20 miles of Chicago. Owner is going to retire from business. Address F. S., care American Florist.

**GREENHOUSE FOR SALE.**

Built for Carnations in summer of 1900 of Cypress, benches 14-inch hemlock well furnished with everything needed; is 20 feet long, 20 feet wide. Also fine 2-story dwelling house and ell—12 rooms heated with hot water and hot air—fine bath room with hot and cold water. One of the best locations in center of town. Good stable, stone cellar with cement bottom. Address S. W. P., P. O. Box 18, Billerica, Mass.

**FOR SALE** Business including two new greenhouses, 50x25 feet, well stocked with all kinds of plants. Houses are built in the latest and most improved styles. Store fixtures including an elegant soda fountain and all pertaining to it. Stock of palms and confectionery, chairs and tables for ice-cream parlor. Right in the heart of the business portion of city. Established 5 years. Am the only one in the business here—population 40,000. Reasons for selling, I want to go west to friends. Write for particulars. L. O'Sullivan, West Superior, Wis.

If you want to get the want you want to get, you want to get your want ad into the

**AMERICAN FLORIST**

Try it now.

Every advertisement represents a genuine want. It pays to answer them.

**LILY BULBS**

Rubrum, Auratum, Album, Giganteum, Single Tiger, Double Tiger. Close rates.

**Gladiolus "1900"**

**NOVELTY.** Very showy for cut flower work and florists' window decorations. Spikes 15 inches long, very strong grower, rich red color, three white spots on lower petal. Good substance lasting well after cutting. Successive plantings of this would secure fine window show the whole season. Per 100, \$3.75.

**GLADIOLUS Mixtures** A good assortment.

Vaughan's Seed Store, New York. Chicago.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHERUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

FRENCH bulbs are still reported firm in price.

NEBRASKA seed growers report their acreage well taken up.

ONION sets are pretty well cleaned up and demand is very slow.

H. W. BUCKBEE, of Rockford, Ill., is now progressing favorably and able to be out on fine days.

NEW YORK.—H. Weezenaar, representing De Nijs Bros., Hillegom, Holland, sailed for home April 19.

ARNOLD RINGIER, of W. W. Barnard & Co., Chicago, is on the Pacific coast, in California and Washington.

L. A. BUDLONG and Mrs. Budlong, of Chicago, have returned from a two months' sojourn in Cuba and Florida.

NEW YORK:—Chas. Loechner, with Suzuki & Iida, sailed on the Kaiser Wilhelm April 22 for a trip to England.

DRY weather with high winds has damaged some of the onion set fields near Chicago. Seed is mostly in the ground.

J. BOLGIANO & SON, Baltimore, Md., whose firm was for eighty-four years at 28 S. Calvert street, have removed to Light and Lombard streets. The change was caused by the necessity for larger quarters. The business was established in 1818 by Samuel Ault & Sons, and was conducted under that name until 1838, when the present name was substituted.

A Question of Policy.

EO. AM. FLORIST:—I wish to erect a range of six greenhouses, each 21x100, even span, running east and west, using 16x24 inch glass, for carnations and roses. For this purpose I can buy an acre of land for \$400. There is also for sale a range of about 25,000 square feet of glass, built in patchwork fashion, which is to be had for \$2,500, including a quite new eighty horse-power boiler, piping and a pump for watering, but only a little poor stock. Now, would it be advisable to buy the acre of land and build a new plant or buy the second-hand houses and rebuild after modern fashion? What would be the average cost to rebuild these houses, using about one-half the glass, which is 16x24, and buying all the other building materials, except the boiler, piping and pump? If I build entirely new on the acre piece what are the six houses likely to cost? At which end of the range should the boiler be placed? How soon should work begin on such a range of houses to have them ready for planting for this season?

H. J. H.

In determining the value of the old range everything depends on the condition of the glass, piping, pump, ventilating apparatus and boiler, but in fair condition they might be estimated at one-half the value of new material. In this case they would be worth nearly as much as is asked for the entire range, while there should be enough of other salvage to pay the cost of taking down the houses. This estimate is made on the supposition that all of this material could be used in

the new houses, but as the new houses are but little more than one-half as large as the old ones, only a portion of the glass and piping would be needed and the boiler and pump would be considerably larger than would be required. Moreover, new materials could be purchased for the small range for what the old boiler, piping, pump, etc., would cost in the old one, and unless the new range is to approach the size of the old one it will be better to purchase new material throughout. Even though the old houses are purchased, all wood work in the walls and roof should be new cypress.

There is such a variation in the price of glass and pipe as well as of labor that no definite amount can be given for the cost of the new houses, but it would probably range between \$7,500 and \$9,000, or aside from the pump, boiler, piping, glass and ventilating apparatus it will be \$5,500 to \$6,500.

The northeast corner of the range will be a good location for the boiler house. For houses 200 feet or more in length, it is a good plan to have the boiler house at the middle of the north side of the range. Nearly all dealers in greenhouse

materials are full of orders, and it will be a quick job if completed in three months from the time the order is given. Even now, this will bring it rather late for roses, but it would answer for most other crops.  
 L. R. TAFT.

Denver.

FLOWER SHOW PLANNED FOR EARLY MAY.—PARK PAVILION TO BE THE SCENE.—LIBERAL PREMIUMS.

From May 1 to May 4 inclusive, the Denver Floral club, comprising the florists of the city and twenty-four donating members, will hold a spring flower show at City Park. A. J. Graham, superintendent of the park, is managing the affair, but all communications should be sent to Secretary F. T. Rushmore, at the City Park greenhouses.

Former flower shows have been handicapped by lack of space in which to accommodate the crowds. This year, however, two large tents will be erected on each side of the pavilion.

The premium list, now ready for distribution, forecasts the finest flower show in the west. There are 143 classes and numerous liberal prizes.

Special OFFER NEW CROP FLOWER SEEDS

Crown at our Floracraft Trail Grounds. For several years we have made a specialty of growing Salvia, Clematis Paniculata, Balsam, Aster, etc., and now have a small surplus to dispose of at the following low prices:

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSEYMEN. R. C. BERGMANS, Pres.; R. J. COE, Vice-Pres. GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-seventh annual convention, Milwaukee, Wis., June, 1902.

NICHOLS & LORTON, of Davenport, Ia., report the heaviest spring shipments on record.

THERE is said to be a shortage of nursery stock in the west. The Colorado nurseries report a demand from Wyoming which they cannot fill.

THE department of forestry at Yale College, New Haven, Conn., is engaged in planting a large number of young elms in various portions of the college grounds. Some of the older trees which had outlived their usefulness have been removed.

A PLANTATION of about 6,000 young pines set out on the town common at Brunswick, Maine, last year, has made a good growth and it is estimated that not more than about ten per cent of those planted failed to become established. It is planned to set out a number of young oaks among the pines.

THE Napa Valley Nursery Company has been incorporated at San Jose, Cal., with a capital of \$15,000 by John Ames, president and manager; Leonard Coates, William Fisher and others. The company will have 85,000 grafted vines and 150,000 other vines for next season, as well as 250,000 fruit trees.

LAST fall J. & W. Hopkins imported some holly, in the usual condition of that commonly used for Christmas decoration, through the port of Port Townsend, Wash., and the collector of customs there assessed duty at twenty-five per cent under the paragraph covering "stocks, cuttings, seedlings." On April 12 the General Appraisers sustained the importers' protest and admitted the holly free of duty as "unmanufactured vegetable substances not otherwise provided for."

AMBITIOUS plans are being perfected for the sixth annual meeting of the American Park and Outdoor Art Association, which is to be held in Boston, August 5 to 7, 1902. Many noted speakers upon pertinent subjects have already promised to participate in the meetings. On one day a special meeting of park commissioners and others interested in park work will be held. G. A. Parker, chairman of the Park Census committee, has charge of the arrangements for the park meeting and expects to have 200 or more commissioners in attendance. Many outings and excursions among the numerous places of interest in and about Boston are planned. Among the local hosts will be the Massachusetts Horticultural Society, the Massachusetts Forestry Association, the Appalachian Mountain Club, the Boston Society of Architects, the Twentieth Century Club, the Boston and Metropolitan Park Commissions, and the Horticultural Club of Boston.

JAMESTOWN, N. Y.—The Lakeview Rose Gardens are to be enlarged again this year by the addition of seven houses, six of them 330 feet long and the other 250 feet. The business has been very large during the past season, the demand for carnations having been particularly heavy. But both A. N. Broadhead and the superintendent, C. H. Roney, expect next year to be better than the present one.

A. S.

At Philadelphia.

There is still a lively interest taken in the sport, the alleys being patronized by the regulars once or twice a week and the usual matinee crowd of the veterans and associate members almost every afternoon. Some very good scores are made in the friendly contests that take place, for as soon as enough to form sides are present a match is started and, as good, careful bowling is required to win, these practice games help up the averages. Nothing has as yet been done toward selecting the team for the national contest, but the material is here for a very fair team and can soon be gotten together. We saw that fine picture of Capt. Lang; it does not flatter him one bit and his average of 165 shows that he is a worker as well. That \$25 "def," however, shows a little fluntness about the chest, and as Philadelphia is to have a chance at it, we should like to see a contest arranged, as we have in mind at least two of the "B. F." variety that would stand a good chance of pocketing the coin. K.

BATAVIA, N. Y.—Thomas McGuire, florist for the western division of the New York Central, has over 60,000 plants ready to put out at the various stations in his territory.

Orange, N. J.

EUROPEAN TOURIST WRITES INTERESTINGLY OF THINGS HORTICULTURAL.—EXUBERANCE OF NATURE CREDITED FOR DISPLAY.

Letters received from J. B. Davis, who is now probably on the Atlantic returning from the "Celtic" cruise, indicate that Mr. Davis has been keeping his eyes open, horticulturally, and will have some interesting narratives to relate on his return. He says that of the flowers put on board the steamer when leaving New York the carnations Lawson and Marquis proved to be the best keepers. At Madiera in February he found hyacinths, freezias, callas and amaryllises blooming in the open border and bougainvilleas, lantanas and camellias also in great abundance, with nasturtiums, vincas and oxalises growing as rank weeds everywhere. At none of the stops made at Mediterranean points did he see any evidences of skillful culture, the luxuriance of the flora being due wholly to the climate and the exuberance of growth, making one long for the land where good gardening prevails and a landscape that is not a tangle.

At Liverpool Mr. Davis found the market filled with narcissi, a large proportion of which came from France. He noted at the Botanical Gardens at Wavetree Park a particularly fine display of seedling hybrid amaryllises, 2,000 bulbs in bloom. He was particularly interested to see at Stratford on Avon, where some old buildings have been cleared away, in the design to preserve Shakespeare's birthplace, the garden devoted to a Shakespeare flower garden, containing all the flowers mentioned in Shakespeare's plays.

ROCHESTER, N. Y.—J. B. Keller and the Salter Brothers called on Mayer Rodenheck, April 14, to urge that the street vendors of flowers be no longer permitted to compete with tax payers who are engaged in the flower and plant business.

CORRESPONDENCE SOLICITED.

Boston Ferns

Fine, strong, young plants, \$3.00 per 100; \$27.50 per 1000.

Edwin Lonsdale, Wyndmoor, Chestnut Hill, Pa.

The Chicago Market.

Spring flowers have arrived and supplement an already ample supply of the staple articles. There is always a welcome for the first flowers of spring, and they are in all the florists' windows, making trade-winning displays, for the lady who has worn violets all season is ready for a bunch of arbutus and, too, she likes the novelty of a bowl of lilacs on the dining table.

While the spring flowers are popular, there is still a good call for the staples, Roses, Carnations and the other all-season items, with a particular call for funeral and wedding flowers. White carnations are not always to be had on short notice, but people are getting out of the notion that nothing but white will do for a funeral. For grown people, they are using many colored flowers, and for middle aged to elderly folks they use strong colors, as for instance, the many American Beauty, Meteor and red carnation designs sent to President McKinley's funeral.

There are plenty of roses and colored carnations, also tulips, jonquils, daffs, valley, violets, callas and Easter lilies. Prices are not high on any item, but stock is moving briskly. It is a time when buyers can handle good quantities to a profit, for they can get good stock in any line.

In buying at Kennicott's it isn't necessary to consult the price list before ordering, for this house always bills everything at prevailing market rates. That is the only way to do, and in fact it has come to be regarded as one of the secrets of Kennicott's influence in this market. There isn't any danger of an out-of-town buyer getting "roasted" on prices in this market, at least not more than once, for if any other house roasts him it only serves to teach him to stick close to Kennicott's, where he always gets billed just what the city retailer pays for the same grade of stock. Kennicott's do the biggest shipping business in the west, probably the biggest in the country.

KENNICOTT BROS. CO.

# ROSES! ROSES!

We are headquarters for Roses. Our sales this year of rose plants will be upwards of 3,000,000, an easy amount to say, but not so easy to handle, get ready for sale and pack for shipment. We sell each year, more roses than any three firms in the world. Patrons who buy our roses, become permanent customers, for they grow and bloom. If you have never tried our stock, you had better begin now.

Roses from 2-inch pots, your selection of varieties for 50 cents per dozen; \$2.50 per 100; and \$22.50 per 1000. You can select 25 at hundred rates, or 250 at thousand rates. Our selection of varieties, \$2.25 per 100, or \$20.00 per 1000.

The Largest  
Rose Growers  
in the World

San Francisco.

SOCIETIES DISAGREE ON THE MANAGEMENT OF THE MAY EXHIBITION.—HORTICULTURISTS WITHDRAW AND PLAN SHOW OF THEIR OWN.—DEATH OF MRS. CLACK.—STATE OF TRADE.

A serious disagreement has arisen between the California State Floral Society and the Pacific Coast Horticultural Society over the arrangements which are being made for the flower show May 22 to 24. The ladies of the State Floral Society claim that the men of the Horticultural Society are imbued with a commercial spirit, while the men declare that Mrs. John R. Martin of the Floral Society wants to run things. As a result the horticulturists have withdrawn their support from the exhibition, which will now be conducted entirely by the Floral Society, and at a recent meeting the Horticultural Society decided to hold a show of its own August 15 and 16, at which date the city will be full of visitors because of the Knights of Pythias meeting. Almost every grower is a working member of the society, which practically assures the success of the exhibition.

Business has slackened a little and the prices all around have come down somewhat. Carnations are more plentiful than ever, spring crops coming in with everybody. Roses are also plentiful and well colored, but with the exception of Kaiserin, Mme. Testout and Pres. Carnot the buds are small. Sweet peas are coming in a little more plentifully but are still away up in price. Lilies are hard to sell and violets are no longer to be had.

Sidney Clack has the sympathy of the community in the loss of his wife, who died April 14 at the age of 51 years. Mr. and Mrs. Clack were married in New York and six years later removed to Chicago, where they lived four or five years, going thence to Monterey, where Mr. Clack was head gardener at the Hotel Del Monte. For the past six or seven years he has been in business for himself at Menlo Park.

GOLDEN GATE.

St. Paul.

BUSINESS BRISK BUT CUT FLOWER SUPPLIES ARE LARGE AND WHOLESALE PRICES ARE ON THE DECLINE.—BEDDING STOCK OCCUPIES ATTENTION.—DOINGS IN THE PARKS.—VARIOUS NOTES.

Trade has been quite active and everybody is kept busy. Roses and carnations are plentiful and wholesale prices have dropped accordingly. Funeral work has been in good demand, and country trade fairly good. Violets are seen no more and bulbous stock is becoming quite scarce. L. L. May & Company are carrying valley pips and Japanese lily bulbs in cold storage for early fall and winter forcing. The growers are busy shifting small plants and spreading out their annual crops of bedding stock. While there is a good demand for this class of stock the low prices at which it is sold leave but a little margin of profit to the growers and none at all to the storemen. There certainly is much more profit in growing roses, carnations and violets for their blooms than in geraniums, cannas, heliotropes, coleus and so forth, but how often we see the former neglected for the sake of the latter.

The annual report of Superintendent Nusabaumer, of the City Parks, has been issued and is most interesting. Among other items 1,652 trees and shrubs were planted during the year. Four acres of ground were planted to nursery stock, which was grown from seed and cuttings. In all 112,000 trees were planted in their permanent location. Flower beds were planted and maintained in twenty-two different parks, the total number of plants handled and planted being 238,892, including 127 varieties. The city greenhouses are overflowing with bedding stock, while nearly 200 hot beds are in use outside. The park work has given an impetus to the beautifying of private grounds and indirectly benefited the florists.

A recent caller was Lloyd Vaughan, of E. H. Hunt's, Chicago. FELIX.

New Chrysanthemum "CREMO"

FIRST-CLASS CERTIFICATE FROM C. S. A.

The best early yellow Chrysanthemum to date; comes in with Glory of Pacific, from which it is a sport. A beautiful soft shade of yellow, the color being much more distinct than is usual with sports. It just fills a vacancy in yellow at that season.

PRICES FROM 2 1/4-INCH POTS.

# Carnation Floriana

We believe this to be the best pink carnation introduced to date, was disseminated in the spring of 1901 by originators, Messrs. Fillow & Banks. Price, \$6.00 per 100; \$50.00 per 1000. 50 at 100 rate, 500 at 1000 rate. Less than 50, 8c each.

**DAILLEDOUZE BROS.** Carnation and Chrysanthemum Specialists, FLATBUSH, BROOKLYN, N. Y.

Please mention the American Florist when writing.

Pittsburg.

TRADE TAKES AN UNEXPECTED BUT NOT UNWELCOME SPURT.—GOOD PROSPECT FOR CONTINUED ACTIVITY.—SPRING BUSINESS ALREADY AT HAND.—A GOOD CARNATION.—VARIOUS NOTES.

Things are certainly coming our way this week. Luncheons, dinners, weddings and funerals, coupled with transient trade, go to make up the order of business for the week. This period of excessive activity is not usual of course, but nevertheless is very welcome. The outlook for a continuance of brisk business is favorable. Market places and stores are beginning to wear their spring garb, for blooming plants are arriving in quantity and sell rapidly. We are highly pleased with the condition of the roses, for all are unusually fine. High grade and high priced carnations are plentiful enough, but good whites and cheaper pinks are very scarce. The Goethe carnation is in great demand. I have not noticed any reference to it in the trade papers. It is a shell pink, about the same shade as Morning Glory, but quite distinct. The bloom is large and the stem strong. It is very useful in center pieces.

Wm. Fitzsimons, at Randolph & McClements', has been suffering from a severe attack of rheumatism. He will be out next week after an absence of two months from duty.

The Pennsylvania Reform School, Robt. Gonderman, foreman, has decided to build a palm house 60x70 feet.

Charles Koenig, of Etna, is growing some fine roses. He is very successful with Liberty.

Alexander R. Peacock is to erect a private conservatory, also a special house for orchids. E. L. M.

DANVILLE, KY.—C. M. Harbison says that in his neighborhood the buds on peaches, pears and cherries are killed. The severe weather of December is thought to have been the cause. Mr. Harbison combines the florist, nursery and orchard business.

## The Sensational New Rose for 1902. MRS. OLIVER AMES.

For description, prices, etc., see Trade List.

Henry A. Trask, Editor of "North American," says in a letter dated Feb. 19th, 1902. The box of roses arrived safely last Saturday afternoon. Please accept my thanks. To my mind they are the realization of the ideal. Yours very truly, H. A. TRASK, Editor.

**\$100.00 IS OFFERED IN PRIZES** for Cut Flowers of this Rose at Madison Square Show next fall.

**CHRYSANTHEMUMS** Some new European varieties of sterling merit, the stock of which we control for the American Market, and also all the cream of last year's new European varieties, and all the New American varieties of this season's introduction; for those contemplating growing for the shows next fall the above will prove winners.

**JOHN N. MAY, Summit, N. J.**

New Orleans.

SPRING PLANT TRADE EXCELLENT.—INCREASED QUANTITIES OF MATERIAL OFFERED BUT ALL MOVED AT GOOD PRICES.—NO ACTIVITY IN THE HORTICULTURAL SOCIETY.

Our spring sales have been very good and every florist ought to be satisfied with the business done since the opening of the season. There was a time when the French market was the only place where flowers were sold in any quantity, but now at every small market you find stands with flowers, and judging by the amount sold, also by the street peddlers, you must conclude that the florist business is in a fair way of prosperity. Prices were good. Geraniums were offered in quantity, but not in excess and not to overstock the market, and good plants were sold at from \$2 to \$2 50 a dozen.

The meetings of our society have been very quiet lately. A few words were said about another show, but losing money, as we have been doing, is not encouraging and the matter has been dropped for the present.

M. M. L.

Warren, O.

A steer ran into A. T. Hoyt's greenhouse, breaking benches and plants, and after inspecting the heating apparatus and doing \$50 damage walked over the boiler on a 12-inch plank and departed via the back door. Hoyt seems to get more experiences than most florists.

John Adgate is going to build two more houses for carnations and roses this summer.

W. Mabees has gone to New Castle, Pa., to work for Fisher Brothers.

A.

LINCOLN, NEB.—Chapin Brothers will move into a new store at 127 South Thirteenth street May 10.

100,000 GIANT PANSIES

**GEO. M. EMMANS, NEWTON, N. J.**

**DORSETT'S VIOLET SINGLE VIOLET**

See American Florist, March 29, page 361. For texture, quality and stability of the leaf, for bunching flowers this violet is unequalled. The flowers are medium size, of a rich dark violet color, and have a delightful delicate odor. The plants are vigorous, and under normal conditions are disease resistant. With good treatment will guarantee 95 per cent of stock to grow. Having purchased the greenhouses and stock of Mr. P. H. Dorsett at Garrett Park, Maryland, I am prepared to furnish rooted crowns, for immediate delivery, at \$5.00 per 100, or \$40.00 per 1000. Sand-rooted cuttings, for delivery after May 1, \$6.00 per 100, \$45.00 per 1000; 2 1/2-inch pots, after May 1, \$7.00 per 100.  
**DAVID BISSET, GARRETT PARK, MD.**

Washington.

MANY FLORISTS CONTRIBUTE TO SUCCESS OF MASONIC FAIR.—TRADE FAIR AND STOCK PLENTIFUL.—NOTES OF DECORATIONS.

The great Masonic fair is on at Convention Hall. J. H. Small & Sons, A. Gude & Bro., Z. D. Blackstone and others decorated booths and donated plants. Otto Bauer and the American Rose Company also contributed to the affair and among those from out of town who sent plants or flowers are L. Dupuy, White Stone, N. Y.; A. Schulthies, College Point, L. I.; G. Schubert, West Hoboken; C. Zeller & Son and L. Schmutz, Brooklyn; L. J. Kreshover, Jno. Young, Thos. Young, Traendly & Schenck, New York; Robert Craig, W. K. Harris, W. F. Dreer, Jacob Becker and S. S. Pennock, Philadelphia; Jos. Heacock, Wyncote, and others. H. Bayersdorfer, A. Herrmann and Ed. Jansen also contributed.

Trade is only fair but stock in general is plentiful, especially roses. A. Gude & Brother and J. Louis Loose are making a fine display with American Beauty. At the funeral of Major O. L. Pruden, who had been on duty at the White House twenty-nine years, a number of fine floral tributes were seen.

J. H. Small & Sons had the decorations for the dinner and reception given by Mr. and Mrs. George Westinghouse, at Homewood, Pittsburgh, April 16 and 17. The decorations consisted of pink roses and lily of the valley. The ceiling and mirrors were decorated with asparagus. The American Rose Company used the Alice Roosevelt rose exclusively in the decorations at the Metropolitan Club for Col. Haywood's party. P. G.

BENTON HARBOR, MICH.—The Eldred, Sykes Company is going into the greenhouse business here, building three houses 14x50.

XENIA, O.—J. J. Lampert recently had a nice wedding decoration to put up at Western Star, in Summit county, for the Harris-Taylor nuptials.

## THE Gardeners' Chronicle.

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been for over SIXTY YEARS the LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4.20 per year. Remittances to be made payable to H. G. COVE.

OFFICE:

41 Wellington St., Covent Garden, London, England.

American Florist Ads. always do business, Every day in the week, all over the country, At Home and Abroad.

**Toronto.**

BOTH LOCAL AND SHIPPING TRADE ACTIVE.—GOOD STOCK WELL CLEANED OUT.—STOCK PLENTIFUL AND QUALITIES AVERAGE HIGH.—CLUB HAS A SOCIABLE.—EXCELLENT HYDRANGEAS.

Business continues good, both local and shipping orders being quite in advance of last week. The weather lately has been ideal for roses and they are plentiful and good. St. George's day created an increased demand for red. Carnations are scarce, especially white, but the quality still holds up. Harrisii and callas are plentiful but moving nicely and the demand for the remnants in bulbous stock is about equal to the supply. Sweet peas are getting better and, I am pleased to note, more plentiful. Good white stocks and antirrhinums meet with ready sale. Adiantum and Asparagus plumosus are more plentiful, but smilax is still very scarce.

The "at home" given by the Florists' Club in St. George's Hall was poorly attended, but those who were there had enthusiasm enough for treble their number. The programme was good, the refreshments wholesome and the floor in elegant shape for dancing, and those who remained for this latter spectacle were treated to some rare fun.

Grobba & Wandrey are sending in some good hydrangeas, which are quite an acquisition to the retailers.

Visitors: A. M. Stuart, New York; Henry Ward, Detroit; Samuel Jordan, Peterboro; Miss Townsend, Hamilton.

BUSINESS REMAINS BRISK AND ALL GOOD STOCK IS WELL CLEANED UP.—VARIOUS JOTTINGS OF DOINGS AMONG THE CRAFTSMEN.

Business continues good, with all available stock finding a ready market. Carnations hold up well in price for good quality, although roses have gone down a trifle. Violets are still good and bring 50 cents per hundred. Hoffman, J. Macrae and Williams bring in regular cuts of tulips. The suburban florists are complaining of the "crape chaser" and it is probable the matter will be discussed at a meeting at an early date.

It is reported that Mr. Svensson has withdrawn from the management of the Shepard Company's flower department and that the company has discontinued that line.

Theo. Peterson, of the Hogg Greenhouses, is out with a new delivery wagon and also has a new cash register.

Wm. Appleton complains of being too busy for comfort. A lot of lawn work is the cause.

Macnair has improved the exterior of his store by painting it an olive green. Johnston Brothers are extolling the merits of their new \$200 cash register.

T. J. Johnston is debating the advisability of resuming the use of arc lights.

C. Wagner, the nurseryman, has been on the sick list for a long while.

Martin Edmonds, of Bristol, is sending a fine cut of spiraea to the city.

Howard Almy is out again after his long illness with rheumatism. M. M.

St. JOSEPH, Mo.—The local growers are enjoying a brisk shipping trade to the small towns of Missouri, Kansas and Nebraska. It is a business constantly increasing and is estimated to be forty per cent ahead of last year.

CYPRESS

Green House Material

Hot Bed Sash. Red Cedar Posts.

Write for circulars or estimate.

LOCKLAND LUMBER CO., LOCKLAND, OHIO.

LOWEST RATES TO EASTERN POINTS

will always apply via the Nickel Plate Road and its eastern connections to all points in New York, New England and the eastern states. Three daily trains to Ft. Wayne, Findlay, Cleveland, Erie, Buffalo, New York and Boston. Standard equipment on all trains. Meals served in dining cars, on American club plan, at prices to suit passenger, from 35c to \$1.00 per meal. For particulars call on or address John Y. Calahan, General Agent, 111 Adams St., Chicago. Depot, Fifth Ave. and Harrison St.

Use our Patent IRON BENCH FITTINGS and Roof Supports.

IMPROVED VAPORIZING PANS VENTILATING APPARATUS. For Tobacco Extracts, Etc. Send for Circulars. SUCCESSORS TO MILLER, CASKEY & CO., JENNING'S BROS., 8. W. Cor. Sixth and Berk Sts., PHILADELPHIA.

DILLON'S GREENHOUSE MFG. CO. Bloomsburg, Pa. MANUFACTURERS OF HOT BED SASH, AIR DRIED GULF CYPRESS SASH BARS AND OTHER GREENHOUSE MATERIAL.

BUILDERS of DURABLE and PRACTICAL Greenhouses at a LOW COST. Our descriptive circular will be ready about April 15th and will contain valuable information for every florist. Send for it. WE HAVE SOMETHING NEW TO OFFER.

GARLAND'S IRON GUTTER

No Ice. No Breakage Of Glass.

This Gutter will save money in cost of construction.

ESTABLISHED 1866 EMIL STEFFENS SUCC. TO M. STEFFENS AND STEFFENS BROS. MANUFACTURER OF

"BLACK DEATH" (POWDER) TO EAT THEREOF IS TO DIE.

BUG KILLER and FERTILIZER. Three years of unprecedented success wherever introduced all over the United States has proved "BLACK DEATH" to be a cheap and absolute annihilator of all insects, bugs or beetles that prey on vegetation, foliage and flowers. See what Peter Reinberg said in this paper, Feb. 8. Other strong endorsements sent on receipt of postal card.

Western Sales Agency, 235 Franklin St., Chicago. S. D. STRYKER, Agent. HANDLED BY SEEDSMEN.

KROESCHELL BROS. CO. IMPROVED Greenhouse Boiler, 45 Erie St., CHICAGO.

Boilers made of the best of material, shell, firebox sheets and heads of steel, water space all around (front, sides and back). Write for information.

GALVANIZED WIRE—AT BARGAIN PRICES.

Fifty car loads of new galvanized wire, in short lengths, never used. Comes from 6 to 12 gauge. Put up 100 lbs. to a coil and only one size wire to each bundle. Prices range from \$1.40 to \$1.90 per 100 pounds. Our Free Catalogue No. 47 for the asking. We handle all kinds of supplies from Sheriff's and Receiver's Sale. Chicago House Wrecking Co., West 35th and Iron Sts., Chicago.

American Florist Advt.

Reach all the Trade.

FOR SALE. VALUABLE IRON GUTTER PATENTS

I hereby offer for sale the Patents covering my Wrought Iron Gutter; also the Patents covering the Gutter advertised in last week's edition of the AMERICAN FLORIST, Florists' Exchange, and the Florists' Review, by Geo. M. Garland.

The increased business of the Standard Ventilating Machine demands my whole attention to its manufacture. But, as in the past I will give the gutter business its fullest share of attention until the patents are sold. Yours truly,

E. HIPPARD, Youngstown, Ohio.

The Art ...of Floral Arrangement

The only special newspaper in the world for floral arrangement.

**WILKS Hot Water Heaters.**

Best made for Greenhouses. SELF-FEEDING MAGAZINE. All Steel. Simple, strong, durable. Send for Catalog, etc. S. Wilks Manfg. Co., 53 to 55 S. Clinton St., CHICAGO.

The Highest award at the New York Carnation Show was given to a man who has forty-three (43) of our Automatic Ventilators. Our Ventilators are at work in the Central Park Conservatories, New York.

Prevents Mildew  
Operates to perfection in catchy weather.  
Commercial growers use them largely.  
The Automatic Ventilator does its own thinking.

Saves all labor.  
Improves the growth of plants.  
Especially good for Roses.  
Will last a lifetime and soon pay for themselves.  
The Automatic Ventilator ventilates as necessity requires.

**The Standard**

The lightest running, most rapid and powerful ventilating machinery in the market.

**Duplex Gutters,**

Made of wrought or cast iron with self adjusting sash bar clips. The only Drip Proof Metal Gutter offered to the Public. Send for my catalogue free.

**E. Hippard,**  
Youngstown, O.

**THE CHADBORN PATENT AUTOMATIC VENTILATOR**

For Greenhouses, and also Temperature Regulator for Radiators.

CHADBORN MFG. CO., NEWBURG, N. Y. BUFFALO, N. Y., March 28, 1902.  
Gentlemen:—Your Automatic Ventilator was installed in one of my houses in January. It has answered every purpose for which it is designed. In a large establishment it must be a great saving of labor; and it does its work accurately. Wishing you the success you deserve, I am  
Very truly yours,  
WILLIAM SCOTT.

Manufactured by THE CHADBORN MFG. CO., Broadway and High Streets, Newburg, N. Y.

Our Illustrated Catalogue, Prices, Etc., is yours for the asking.

WE VENTILATED THE NORTH CONSERVATORY AT THE PAN-AMERICAN EXPOSITION AND TOOK THE GOLD MEDAL.

THE "NEW DEPARTURE" VENTILATING APPLIANCE  
This is a funny looking thing but it will do the work easier and cost less than any other apparatus on earth or any other place. Send for a descriptive circular to

### Notes on Aquatics.

The season for planting aquatics having arrived, everything should now be in readiness. All repairs to natural ponds made necessary by severe winter weather, or by the incursion of muskrats, should be completed. In most sections it will be possible to ascertain the condition of the stock carried over, as the warm weather experienced of late will have stimulated active growth and lily pads are to be seen on the surface of the water. Where new work is being carried out it will be important to attend to marginal planting as the season is advancing, and late planted stock will require careful atten-

tion. After the severe winter we have just passed through, it is most gratifying to note the condition of the bamboos. In some instances, where much exposed, the leaves are sear and dried up, but without exception they are all alive and showing signs of growth. It was a deplorable sight to see these noble grasses almost level to the ground when coated, as they were, with ice, and surprising to see them assume their natural position after relieved of the weight, and suffering no damage. They grow in height, beauty and attractiveness every season and are increasing in popularity. Do not fail to include these with the other hardy grasses, arundos and so forth in connection with planting the margin or surroundings of the pond or water garden, also such bushes as *Cephalanthes occidentalis*, *Spiraea opulifolia* and *andromeda* in variety.

In shallow water *Typha latifolia* is always at home and is worthy of a position in the best regulated water garden, as are many of our native grasses, flags and so forth. One of the most charming aquatic plants in connection with typha, or cat-tails, is *Lythrum roseum*. These should be planted in masses to secure the best effect, and where there is ample space hibiscuses in variety should be planted, if not already naturalized, also *Iris pseudoacorus* and *Lobelia cardinalis*.

Where space is limited and plants grown in boxes or tubs it will be necessary to replant, first renewing the soil. When planting select three or four of the strongest crowns which will, in all probability, give the finest and best flowers. Do not consider that because they did so well last year they will do equally as well this year. The condition of plants grown in tubs or boxes must not be compared with plants growing in a

natural pond or even planted out in an artificial pond. It will be well to look over all stock and in cases where new ponds were planted two or three years ago it may be necessary to do some thinning out, as all nymphæas, given a fair condition to develop, will, in limited quarters, soon become crowded. The result will be smaller flowers, and where hunched together the leaves instead of floating on the surface will stand out of the water. These are liable to be attacked by red spider and thrips, causing disfigurement to the pond as well as the loss of flowers.

It may be considered quite safe in any section to plant or transplant hardy nymphæas, but bear in mind that while hardy nymphæas may be transplanted from now until the end of August, to obtain the best results the first season, plant as early as is practicable. Mistakes are made occasionally by beginners, and others not well versed with the different varieties, in selecting both hardy and tender nymphæas, also nelumbiums, and having them shipped early. It follows that one or the other will suffer. If hardy nymphæas are purchased and shipped early, say in April, and tender varieties and nelumbiums are included in the same order and no instructions given as to time or date of shipment, the whole order would doubtless be filled. If the party receiving the goods has a greenhouse or other means whereby the tender varieties and nelumbiums could be protected until it was safe to plant out of doors, the plants might be saved and give every satisfaction, but without these accessories the plants would perish save in southern states.

It is folly to plant too early, especially nelumbiums, although they are hardy, and buyers of aquatics requiring both hardy and tender varieties will do well if they wish all at one time to wait until it is safe to plant nelumbiums or tender nymphæas and include the hardy ones with them, instead of including the tender with the hardy when it is safe only to plant the hardy. As a rule May is the best time to transplant nelumbiums although in southern states April may be as good. It is safer to leave the transplanting of these until the first leaves appear on the surface of the water.

May is the month for planting nelumbiums but it is difficult to fix a date; seasons are early or late, floods may interfere with digging and even a snow storm may cause serious inconvenience, as it did in the western states last year.

Those securing tubers in April and starting them indoors will doubtless gain on those planting tubers out in May. Our season is none too long, even for nelumbiums. While writing on nelumbiums I would mention a case that recently came into my observation. A novice becoming interested in aquatics, had a pond stocked with various nymphæas and nelumbiums. The pond, in due time was filled with the nelumbiums. Believing there was money in it, he has this season determined to get some cash returns from his pond and has offered the different varieties by name for sale. When asked how he could determine one variety from another in the condition of tubers, he blandly replied that he could tell them by feeling.

I am under the impression that sports occur among lotuses but I am not prepared to assert it as a fact at present. I know it requires vigilance and care to keep a number of varieties distinct and true to name. It is also more difficult to keep nymphæas, especially hardy varieties, true to name. I have no suspected sport here but the greatest difficulty is when a hybrid, or cross-fertilized form, produces seed, as the seedlings rarely correspond with the parent plant and here I beg to state there are spurious forms of *Nymphaea odorata Caroliniana*. The true form is scarce and entirely different from that offered by a western grower, although I presume that this particular person has no doubt that his stock is the true form. All water lilies are good flowers, but if every seedling is worthy of a specific name we shall soon have them by the thousands and it will be necessary to establish a committee to gauge these seedlings, so as to prevent them from getting into commerce or making our catalogues too bulky.

WM. TRICKER.

#### Herbaceous Plant Notes.

All stock in the herbaceous grounds came safely through the winter. Very few, even of the doubtfully hardy species

any dividing and replanting and we did not care to risk late planting, but now we have been at this job for several weeks, taking up one or two varieties at a time from the borders and, after cutting them up, replanting them in newly spaded and manured ground before they have time to wilt.

Where there is a large and varied collection, you must be constantly on the lookout unless you have two or three reliable men, who have had several years experience in digging and dividing herbaceous plants. Otherwise you cannot leave them a minute alone. They may destroy, spoil or tramp on one of your most valued treasures while you are gone.

In digging up, they may shove in the spade slantingly and cut off the fleshy tap root of a rare alpine or they may cut half the fibers of a shallow rooting species by inserting the spade too near the collar of the plant. If they are not familiar with the habit of each species or variety, you have to tell them: "Now go deep down with your spade," or "now be careful, the roots are very brittle, handle them very carefully," and so forth.

The mixing of varieties similar in growth, must also be guarded against and when you dig up several of the same species your men are rarely to be trusted in the matter. With things that are grown in large quantity, it is different, but there are hundreds of species and varieties which are only grown by the dozen or even in less numbers and here is where you have to exercise care to guard against mistakes and mixtures.

On the whole the spring has been very favorable for transplanting herbaceous stock. Frost was out of the ground in March and the soil in working order soon after snow disappeared. Since then we have had pleasant but cool weather, so that plants have not made much top growth and can yet be safely transplanted.

But after all we have really quite a

purple, rose and red varieties are a mass of bloom. *Erythroniums*, white, purple and rose are at their best. *Omphalodes verna* has opened its first sky blue, forget-me-not-like flowers.

*Phlox sabulata* in seven or eight various colored varieties is beginning to show up well. *Iberis saxatile*, *I. sempervirens* and *I. sempervirens fl. pl.*, are a mass of white. *Hepaticas* are in full bloom. The megaseas show their pink spikes. *Daphne cneorum* is also beginning. *Primulas* are nearly all out. *Anriculas* have opened the first flowers. The dwarf *Iris pumila* is out for a week now.

*Pulmonarias* and *martensias* are grand. *M. Sibirica*, I want to mention here, is superior to *M. Virglnica* with us. *Genista sagittalis*, the low, prostrate, spreading plant, has been a mass of gold for some days past and will surely continue for a month to come. *Sanguinarias* show up well in the rockery. *Waldsteinia fragarioides* is well furnished with its yellow strawberry-like flower clusters. The *adonis* is still in good form, though it was in bloom at the end of March.

*Claytonia Virginica* shows its pinkish drooping flowerheads. *Draba aizoides*, on the rocks, is full of yellow sprays. *Anemone nemorosa* and its pretty double form are both out in the shady nooks and the tallest of all is the yellow, poppy-like *stylaphorum*, a common but nevertheless a very ornamental early blooming plant.

Six or eight different species of violets are fully out, with more to come in a few days, and the trilliums are also there. So flowers are not scarce in the herbaceous border, though it is early in the season and *hyacinths* and *tulips* have hardly begun to make an appearance and yet we can find but very few places where these early spring flowers have been introduced.

J. B. K.

## WITH THE GROWERS.

J. A. BUDLONG, CHICAGO, ILL.

The pursuit of happiness in this world is, after all, largely a matter of dollars and cents. It is possible to be cheerful on an empty pocketbook, but it requires an optimistic temperament. For this reason, to the majority of us the choice of a vocation is a matter of much moment, attended with far reaching consequences. So it was with the elderly gentleman in the group on this page, but to the younger man it came largely as a matter of course, and the lusty lad in the center, while he may have other aspirations at the moment, can hardly escape the consequence of representing the third generation of the Budlong family, for is it not written that the sins of the father shall be visited upon the children even to the third and the fourth generation? Doubtless this applies when a man establishes a successful greenhouse industry.

J. A. Budlong was born at Providence, R. I., sixty-one years ago and now seldom misses his annual visit to the family seat. He came to Chicago in 1862, engaging in business with his brother, L. A. Budlong, in market gardening, the growing of onion sets, also building up one of the largest pickle factories in the country, but since he engaged in cut flower growing Mr. Budlong says that he hasn't found a profit in pickling. It was fifteen years ago that he built modest greenhouses at Bowmanville and conducted them along unpretentious lines until about five years ago, when, with the assistance of his only son, the business was considerably enlarged. Mr. Budlong is one of those upon whom the

A. H. Budlong.

Kenneth Budlong.

J. A. Budlong.

THREE GENERATIONS OF THE BUDLONG FAMILY.

have suffered and none were lost, though no covering of any description was applied. I am not in favor of protecting established plants, as I have stated often before. Too frequently they are smothered by the material used as covering. We could not find time early last fall to do

number of spring flowers fully out in bloom. *Arabis alhida*, *A. alhida fl. pl.*, *A. alpina*, *A. alpina variegata* and *A. lucida* are splendidly out. *Caltha palustris monstrosa fl. pl.* shows quite a number of its large, deep golden yellow, densely double flowers. *Anbretias* in lilac, blue,

SIDE HILL GREENHOUSE OF A. L. THORNE, FLUSHING, LONG ISLAND, NEW YORK.

cares of business rest lightly but there is not a more vigorous man in the trade, no matter what his years. Athletic in every fiber of his body, it is his pleasure to take long bicycle tours and his leisure is always spent in some way which contributes to his physical enjoyment.

A. H. Budlong, more familiarly known as B. rt., was born in Chicago, the year before the fire. He was brought up in the garden and about the greenhouses and as soon as he had completed his course in the commercial college was taken into the business, somewhat against his will, although he says he certainly has now no cause to regret the choice that was made for him. He was married in 1892 and has two bright children, Kenneth, aged nine, whose striking resemblance to his father is shown in the picture, being in direct line for a course in rose growing and greenhouse management. The place now has 125,000 feet of glass, much of it having been built since a wholesale store was opened at 37 Randolph street, where the cut of some twenty-five consignors is also handled. Glass to the extent of 50,000 feet is being added this year.

Six new connected rose houses are now well along toward completion. These are 27x200, built with Garland's iron gutter and posts, without purlin posts, 1 inch pipe being used for purlins, braced by a wire truss which runs through the range. There are no posts in the houses, except the gutter posts. The ventilation is all on the north side of the ridge, each alternate sash lifting from the top, the others from the bottom, which insures ventilation in all kinds of weather. These houses each have four five-foot benches, with 20-inch walks. An unusual feature here is that the 2x6 stringers for the benches are lengthways of the house, with bottom boards crossways. This permits the bench posts to be six or seven feet apart, instead of two and one-half to three feet. The glass is 16x18 and the bars are sixteen feet on the south side and fourteen feet on the north, the gutters six feet, the ridge thirteen.

In these new houses the two center benches are to be planted with Beauty, the side benches with Bride. Beauty is

always one of the greatest successes here but last fall thrip got in and a very great deal of hard work has failed to eradicate the pest. It has meant much loss, and this season strong fumigation with tobacco, which Mr. Budlong thinks is the only preventive, will be continued from the time the plants are housed until it becomes no longer safe. Three times as many Brides and Bridesmaids will be planted as last year and Meteor will be more largely grown, as it is done to perfection. Liberty is to be discarded, but its space is to be given to Ivory. Mr. Budlong is a believer in carrying over rose stock but the exigencies of building require that the whole place be replanted with young stock this year. They have been propagating roses with fine results, of 250,000 Beauty cuttings at least ninety-five per cent having rooted. They have sold faster than they would root and this has grown to be an important part of the business.

The greatest departure of the season will be the erection of three houses 27x200 for carnations, all efforts for some years having been centered on rose growing. These houses will be identical with the rose houses and will be planted to such sorts as Hill, Triumph, Lawson, Crane and Peru.

All this big range will be heated from a central boiler plant, the present battery of three eighty-five and two fifty horse-power boilers being supplemented by one of 200 horse-power under which a Jones underfeed stoker will likely be operated. The extreme distance of piping from the boiler will be 500 feet. In the new range there will be three feed pipes across the ends of the houses, with a valve on each. These will supply the pipes under the benches, all of which will be flows and without valves. These pipes empty into three returns along the far end of the range.

#### A Side-Hill House in Flushing.

The accompanying illustration gives an exterior view of a portion of the greenhouses of A. L. Thorne, at Flushing, Long Island, an establishment which enjoys an enviable reputation in the New

York market for the quality of the roses and carnations grown therein. As will be seen, the house is built on a moderately steep side-hill, facing nearly south. Mr. Thorne, who is a very observant and methodical gentleman, states that he considers this side-hill house the most economical as to cost of heating, in his establishment, the coal used for a given area being twenty-five per cent less than that used in his top-hill houses. The top range is heated by four No. 57 Hitchings boilers, and the range here illustrated, by two No. 57 and one No. 58. He attributes this saving mainly to the manner in which the side-hill house is protected from the north and west winds. The house is divided by a glass partition running north and south. In the smaller division, 40x150, are American Beauties. There are two ventilators in the roof here and one under the lower bench. The larger division, 60x167, is devoted to Bride and Bridesmaid roses. Here are three ventilators in the roof. From this house Mr. Thorne states that, when in crop, he cuts from 800 to 2,000 flowers daily. The entire length of the house is 317 feet and no difficulty has been experienced in keeping a uniform temperature throughout.

## CHRYSANTHEMUMS.

### PROPAGATING.

It is now time to put in cuttings of all varieties that are wanted for planting out in June. If the stock plants have not been neglected they will at this time be producing some fine cuttings, which will root readily. They will require close attention to prevent them wilting and will take a spraying two or three times a day. The best place to root chrysanthemums at this season is a north-side propagating house, using fresh, clean, sharp sand. Keep the cuttings shaded, also the temperature of the house a little close for a few days. After they have commenced to root ventilate more freely but guard against all draughts. Pot the young stock as soon as possible after it is well rooted, and after they take hold of the soil give as light and cool a place as you can.

Early propagated stock which has been potted a few weeks will be growing rapidly now and must not be neglected. If they require it shift up into larger pots. The general routine of the work in caring for chrysanthemums for the next few weeks will be to figure up enough stock of the right varieties for your requirements and to see that the plants are kept free of insects, also that they do not suffer for want of water or by overcrowding. Artificial heat can be dispensed with altogether now and a crack of ventilation left on all night, which will give the plants a sturdy, vigorous growth, also a constitution fit to stand the strain of work later on.

#### THE BEST CHRYSANTHEMUMS.

ED. AM. FLORIST:—What are the best chrysanthemums to grow for exhibition, also best for standards? I should be pleased if you would give me instructions how to proceed. The plants I have are in 3-inch pots. Will they make plants large enough for the fall exhibitions?  
J. W. S.

The best chrysanthemums to grow into bush specimens for exhibition are varieties with a dwarf, stocky habit like Ivory, W. H. Lincoln, Henry Hurrell, Mutual Friend, Mrs. Henry Robinson, Mme. F. Perrin, Geo. W. Childs and Col. D. Appleton. Among the best for standards are Niveus, Mayflower, Golden Wedding, Georgianna Pitcher, Hicks Arnold, Mrs. S. T. Mardock and Geo. W. Childs. Plants in 3-inch pots at this time are too small to make very large specimens for this season. The best thing to do with plants of that size now is to pot them along as fast as they require it, giving them every encouragement by paying strict attention to watering, airing and topping, figuring on giving them the final shift about the middle of July. They can be worked up into nice specimens in 8-inch pots and with some of the most vigorous possibly in 10-inch. I

would not advise "J. W. S." to try and do much in the standard line with plants in 3-inch pots at this time. They should by now be at least two feet high; more would be better. It will therefore be much cheaper for "J. W. S." to let some one else grow the standards for this season and then make an earlier start another year. October and November is a good time to get them started. Grow them along till about three feet high, then pinch the tops out and also remove the side shoots except about six or eight at the top of the plant, which should be allowed to grow to form the head, they in turn being pinched back as required.

#### FROM CUTTINGS TO CUT BLOOMS.

ED. AM. FLORIST:—I should be pleased to have you outline for me the culture of Glory of Pacific and Polly Rose chrysanthemums from the cuttings to the cut bloom.  
R. L.

Glory of Pacific and its sport, Polly Rose, are very useful early chrysanthemums, but their season is rather short, and this should be taken into consideration when planting them. It is a good time to start the cuttings from now up till the first of June. They are both very vigorous growers and will go right ahead from the start. In planting you will have to figure to set them about six inches apart each way on account of their heavy foliage. They easily might take more room than that, but I doubt if it would pay. Like a good many varieties with heavy foliage they will sometimes wilt badly during excessively hot weather, especially if the beds are allowed to get too wet. In such instances it is best to keep the soil a little dry, making up for it by extra syringing and dampening the walks. Outside of this they will take the same treatment as other commercial varieties and in taking the buds we have had the best results from the crowns, taken about August 15.

CHAS. W. JOHNSON.

#### Railroad Fares to Asheville.

The railroads represented in the South-eastern Passenger Association have agreed to a special rate of one fare for the round trip to Asheville and return from all points in their territory for the S. A. F. convention next August. This covers all the territory east of the Mississippi, and south of the Ohio river to Cincinnati and a line drawn therefrom through White Sulphur Springs and Washington.

This is the lowest rate of transportation ever conceded to the society and should insure a very large attendance from that section of the country. The railroads participating in this agreement are the following:

Alabama Great Southern Railroad,  
Alabama & Vicksburg Railway,  
Atlantic Coast Line Railroad,  
Atlanta, Knoxville & Northern Railway,  
Atlantic, Valdosta & Western Railway,  
Atlantic & Birmingham Railroad,  
Baltimore & Ohio Southwestern Railroad,  
Central of Georgia Railway,  
Charleston & Western Carolina Railway,  
Cincinnati & New Orleans & Texas Pacific Railway,  
Florida East Coast Railway,  
Frisco System (K. C. M. & B. R. R.),  
Georgia Railroad,  
Georgia Southern & Florida Railway,  
Illinois Central Railroad,  
Jacksonville & Southwestern Railroad,  
Louisville & Nashville Railroad,  
Macon, Dublin & Savannah Railroad,  
Macon & Birmingham Railway,  
Mobile & Ohio Railroad,  
Nashville, Chattanooga & St. Louis Railway,  
New Orleans & Northeastern Railroad,  
Norfolk & Western Railway,  
Plant System of Railways,  
Richmond, Fredericksburg & Potomac Railroad,  
Southern Railway,  
The West Point Route (A. & W. P. R. R. & W. Ry. of Ala.)  
Tifton & Northeastern Railroad,  
Tifton, Thomasville & Gulf Railway,  
Washington Southern Railway,  
Western & Atlantic Railroad,  
Wrightsville & Teonille Railroad,  
Yazoo & Mississippi Valley Railroad.

For the Trunk Line, New England, Central and Western Committees' territories rates have not yet been fixed, but for such part of the journey as comes within southeastern control, passengers from other jurisdictions are assured of a fare based upon the rate above given and as soon as anything more definite has been agreed upon, prompt announcement of same will be made.

WM. J. STEWART, Sec'y.

#### American Carnation Society.

Reports of the Indianapolis meeting of the society will be ready for distribution early in May. These will be sent to all paid up members and to any who may join the society during the coming year. Membership costs \$2 per annum and this amount is to be sent the secretary if you wish to join.

#### DEPARTMENT OF REGISTRATION.

Peter Fisher, Ellis, Mass., registers Enchantress, a beautiful shade of light pink, deepening toward the center, similar to but far ahead of Daybreak at its very best. In size and substance it is as far ahead of that grand old variety as Lawson was in its class at the time of its introduction. The plant is a splendid grower, of vigorous constitution, ideal habit and a very early, free and continuous bloomer. Blooms are of fine form, the guard petals being wide and well arranged. The center is full and well built up. The calyx does not burst and the blooms run three and one-half inches to four inches in diameter. The stem is two to three feet, strong and stiff and supports the flower perfectly erect. Easily the greatest advance in its color to date.

ARRANGEMENT OF FLOWERS AND FOLIAGE.

It is in the same class as Lawson, its pollen parent, but ahead of that variety in form, size of bloom, length of stem, productiveness and early blooming. It is of easy cultivation, a splendid propagator, shipper and keeper.

ALBERT M. HERR, Sec'y.

#### A Well Grown Cyclamen.

The accompanying illustration is from a photograph of a cyclamen grown by Frank Sladen, gardener to George W. Fifield, Lowell, Mass. Mr. Sladen's cultural methods are simple. He sows the seeds in pans and when the plants are up pricks them off into flats filled with light loam, leaf mold and sand. The young plants are kept in the house, with plenty of air in favorable weather. After the first potting they are shifted twice, as they require it, a little extra manure being added to the soil each time. The final shift brings them to 7-inch pots. When they begin to set buds a little manure water is given once a week.

#### Boston.

BREEZY NARRATIVE OF THE SEASON'S HAPPENINGS AT THE HUB AND IN ITS VICINITY—OUTDOOR FLORAL DISPLAY—CITY RETAILERS REPORT NOTHING DOING BUT LOCAL MEN FIND THEMSELVES OVER RUN WITH PLANTING ORDERS—GARDENER TAKES UP COMMERCIAL PURSUITS—VISITORS AND OTHER NOTES.

Boston is at present experiencing the delights of an early and very exuberant spring. Everybody who can is out of doors enjoying the feast of color and fragrance. The gardens are glowing with yellow forsythias, scarlet pyruses, gorgeous magnolias, feathery spiræas and brilliant tulips, daffodils and hyacinths. The soft green of young foliage is everywhere and the air is redolent with the odor of cherry blossoms. It is not surprising, under such conditions, that the theater of floral interest should shift from the confines of the flower store to the enticing landscape of woodland, park and garden and that the city dealer, on being pressed for news to help fill out the weekly budget of the industrious scribe, has to confess that he finds himself entirely destitute.

Of course, there are weddings, engagements, deaths and an occasional dinner where flowers in greater or less quantity are demanded and the frequent transatlantic steamer departures with which this port is now favored add to the opportunities for the city florist to eke out a living, and the curbstone broker stands ever-ready to barter on the daily shipments of greenhouse product which arrive in augmented bulk at the wholesale houses, but the grower, although insistent as ever in regard to the market value of his product, finds his thoughts turning seriously to the problems raised by the approach of the planting season and the annually recurring question of whether to build or not to build, while, if he is engaged in local retail trade, he finds himself literally swamped with the stupendous demand for shrubs, plants and shade trees which the prevailing revival in garden taste has brought forth. Whatever may be the lot of the city florist, his suburban brother certainly realizes that there is no such thing as rest in these hustling spring weeks and goes to bed when the day is ended, weary in body and mind, and the clubs and other prized "functions" of a social nature are forgotten and must get along as best they can without him.

CYCLAMEN GROWN BY FRANK SLADEN, LOWELL, MASS.

This latter observation was inspired by the absence of more than one-half of the members at the meeting of the Horticultural Club last Thursday night despite the fact that it was known that the always-popular M. H. Norton was to preside, and also by a visit to the nurseries of R. & J. Fairquhar & Co., at Roslindale, where brother Wm. Donald, erstwhile a private gardener of wide renown, but now manager of the greenhouse and nursery end of that enterprising firm, is learning, as so many private gardeners yearn to learn, just where the fun comes in of being a commercial man and how it feels as compared with the fun of winning medals at the exhibitions, and it is no wonder that his features wear a puzzled intensity of expression that speaks for itself. But the stock speaks for itself, too, and the two long greenhouses are filled to overflowing with a tremendous variety of bedding material and the acres of nursery, frames and storage sheds are equally expressive of prosperity and skillful management.

Visitors from afar have not been numerous the past week. S. S. Pennock's earnest representative, E. J. Fancourt, favored us with a brief call and reported business in the ribbon department excellent all along the line except in Boston, and our esteemed contemporary, J. Austin Shaw, also favored us with a call, which we unfortunately missed. A valued friend whom we used to welcome with pleasure every spring as a worthy exponent of Emerald Isle enterprise, Hugh Dickson, writes from Belfast that he is now married and settled down for life and, with the added cares of a new branch establishment at Dublin, thinks he may never see "the States" again. As a stand-off to this dispiriting intelligence comes the news that Boston is to be honored next week with a visit from George C. Watson, with order book in hand, also incidentally his ginger jar, pepper pot and various other characteristic accessories.

Knowing the value of discretion we shall treat him with deference, feed him on beans and other delicacies and be careful not to jar him.

George A. Sutherland has taken advantage of a vacant store adjoining his establishment on Hawley street and has filled it up with the largest stock of metal wreaths, porcelain flowers and other manufactured material of this class ever displayed in Boston. As Decoration day now looms up in the near future and the unusually forward season may cause the usual supply of spring blossoms to fall short, George sees prospects ahead of a big trade in these artificial goods.

The daily papers report another "hold up" in which Stephen Geary, a gardener of Bangor, Me., now employed at Winthrop, was the victim. He was struck on the head with a black-jack and robbed of \$5, all the money he had. His assailants were two colored men, one of whom was promptly captured by the police.

#### New York.

TRADE NOT HEAVY AND SUPPLIES ALL THAT MARKET CAN ASSIMILATE AT LOW PRICES.—OUTDOOR FLOWERS FROM SOUTH FIND WELCOME.—CARNATIONS HAVE THE ADVANTAGE OF ROSES IN RECEPTION BY BUYERS.—CLUB MUST MOVE.—A VARIETY OF TRADE AND PERSONAL DOINGS.

Last week's report of the state of the cut flower trade would fit this present week as well. We have not the extreme hot weather, and much-needed showers have intervened, but the conditions of supply and demand have not changed materially. Outdoor lilacs are being brought from the south in large quantities and, being popular, are sold readily by all grades of florists to all classes of people. Daffodils from the open ground are also crowding in and have settled the market for the indoor goods, excepting

in the case of some of the very choice varieties. Violets, as a rule, are valueless. Roses are abundant in all grades, as are also carnations, but the latter seem to have the advantage somewhat. Lilies are very abundant. This fact came in fortunately for Alex. McConnell, who on April 29 had a big wedding decoration at the Church of the Heavenly Rest, in which millionaire Ziegler's daughter was the bride and in which the extensive decoration of chancel and aisles was almost exclusively of lilies and palms. Steamer trade is fully up to the average for the date.

The New York Florists' Club has been notified that the Elks' Hall, where they met for a number of years, will not be available for their use any longer. A special meeting was called for last Monday evening, at which it was decided to leave to the officers of the club the selection of a new headquarters.

The new Cut Flower Exchange opened at 5 a. m. May 1, amid most auspicious circumstances. There was a large crowd present and all were highly pleased with the surroundings and location. The hall is very spacious and light.

A new double pink geranium, very floriferous and of excellent habit has been put on the market by J. M. Horsburgh, of Elizabeth, N. J., under the name of Harriet Cleary. J. P. Cleary is duly elated thereat.

George Saltford has written a handbook for beginners in violet culture to be published next week by the Violet Culture Company. The title is, "How to Make Money Growing Violets."

Clueas & Boddington are moving to more commodious quarters at 812 and 814 Greenwich street. C. H. Joosten is also changing his address from 85 Dey street to 178 Chambers street.

Julius Roehrs has just received from Germany a choice piece of marble statuary in recognition of his approaching silver wedding anniversary.

Rovatzos & Moltz have opened a wholesale store at 6 West Twenty-sixth street, opposite the entrance to the Exchange.

George Saltford is fitting up and is about to open a cut flower commission house at 46 West Twenty-ninth street.

W. H. Kay has removed from 42 Dey street to 244 Fulton street, where he will occupy the entire building.

Visitors: G. C. Watson, Philadelphia; Arthur Cowee, Berlin, N. Y.; J. T. Buterworth, South Framingham, Mass.

#### Gleanings of Greater Gotham.

Recorded in the phonograph.—William Elliott: "The beef trust might pinch the inwards of some less unfortunates; it's not the case with us. The Hollanders were overgenerous with their consignments, insomuch that it kept us guessing where we were going to find a market for 200 cases of roses and conifers. Have overcome the obstacle and cleaned up a profit that is satisfactory to both sides of the house."

Henri Beaulieu: "My pansies, Madame Perret, were awarded a gold medal at the Pan-American to Mr. Wm. Scott; the seeds were supplied by me. Please be sure to tell it in the AMERICAN FLORIST."

Charlie Carlin: "Whene'er I take my walks abroad, how many things I see."

Billie Bogart: "I was always good looking and always expect to be."

Enchantress to Lawson: "Don't be so puffed up."

Johnnie Weir: "I'm worse than a Greek, if there's any money to be made at it."

President Sheridan: "Please put that motion in writing."

Frank Traendly: (sotto voce) "Anything doing?"

#### Chicago.

TRADE ACTIVE AND SUPPLY AND DEMAND WELL BALANCED—BUSINESS DOWN TO A STEADY SPRING LEVEL.—SUPPLY SHORTENED BY REPLANTING AND OTHER CAUSES.—BIG HAIL STORM WRECKS GREENHOUSES AT BLUE ISLAND.—NOTES OF THE LOSSES.—NOTES OF DOINGS OF GROWERS AND OTHERS.

A feeling of general satisfaction with trade conditions prevails in the wholesale market. In the last ten days supplies have continued to decline, while demands increased until the ratio between them has assumed an excellent balance. Beauties are going off crop with most of the large producers and supplies are not now unwieldy, with the prospect of \$4 for long-stemmed stock before many days. There is a good deal of the very short material but it is moving at fair prices. Brides and Bridesmaids are of good quality for the season, although the latter are losing somewhat in color. Meteor, with many growers, is showing marked improvement. The Liberty cuts are coming on and Kaiserin is beginning to make its appearance. There are still a great many carnations, but those of shipping grade are none too plentiful. Whites continue to lead the demand, but reds are also frequently called for. Violets are about out of the market and bulbous stock is seldom seen, except belated Easter lilies and callas, which continue to be plentiful. The first outdoor tulips are at hand. Lily of the valley has shortened up decidedly and better prices are being realized. Smilax is selling well, but there is enough for all requirements. Asparagus is not very good, as a rule, but there is lots of it. There seems a very good prospect for at least an ample supply of greens next season, for several big growers are enlarging their capacity in this direction.

The most destructive hail storm which has been known in this section in many years swept over Blue Island on the afternoon of April 25. The stones were heavy enough to break all greenhouse glass in their path and the wind was so strong that it added to the breakage. The heaviest loser was Bryfogle, the vegetable grower, who will need upwards of 800 boxes of 16x24 glass to repair the houses. This means a loss of more than \$4,000, to say nothing of the injury to the stock, which was very great. Heim Brothers lost 600 boxes of glass, and a great deal of the stock was cut to pieces and rendered valueless. The same story is told of H & R. Hilmers, where 300 boxes of glass were broken. W. F. Hennig, who has just started in business, lost 100 boxes, under which were 2,000 fine geraniums in 4-inch pots and other bedding plants which were practically ruined.

Wietor Brothers are preparing to bench 50,000 chrysanthemums for fall, their list of varieties running the whole course of the early to late sorts of recent introduction. They have also bought 3,000 Harrisii and longiflorum hulbs for next spring's forcing.

Kennicott Brothers Company got into their additional space this week, their room being enlarged some thirty percent by the removal of a partition in the

building. During the summer the place will be remodeled and the facilities much improved.

Luke Collins has taken possession of the Paterson place, formerly occupied by Ed. Eagle, and is preparing to relay the glass on a couple of the houses, the rest of the place being in very fair shape. Mr. Eagle is now in a new place farther south.

The tulips at Lincoln Park have been in bloom this week. The authorities are evidently buying a very inferior grade of hulbs now, the plants being very uneven. Many of the beds are empty.

H. Basuke, at Bowmanville, has had fine success this season with carried-over Beauties. He had a fine crop for Christmas and has another good cut on now. Randall handles it.

The Adam Schillo Lumber Company has been organized by the heirs of Adam Schillo, from whom many of the local greenhouse people have been buying their lumber.

We are informed by the J. D. Thompson Carnation Company that blooms of their new variety, Enchantress, will not be ready for exhibition before October 1.

During the hail storm of April 25 Mrs. Bryfogle, of Blue Island, was thrown from her buggy in a runaway and slightly injured.

Mrs. Warren, who has conducted the Klunder place on Michigan avenue since the old gentleman's death, is looking for a purchaser.

There will be thousands of visitors at the parks tomorrow and during the next few days, for the tulip displays are at their best.

Bassett & Washburn are glazing a new house 35x300 and 20 feet to the ridge, which is to be devoted to asparagus.

O. P. Bassett, Mrs. Bassett and her mother went to West Baden Tuesday evening for the usual ten days' stay.

Paul Kopanka has gone to Kansas City to become foreman for George M. Kellogg, at Pleasant Hills, Mo.

E. A. Asmus & Co. have their place in good running order now and report a steadily increasing business.

The annual spring picnic of the employes of Vaughan's Seed Store will take place May 11.

Visitors: C. A. Dutton, Holland, Mich.; H. B. Blaisdell, Bradford, Ill.

#### Philadelphia.

WONDERFULLY HEAVY CUT OF BEAUTIES.—QUALITY EXCELLENT AND PRICES VERY LOW—OTHER STOCK ALSO PLENTIFUL BUT WELL CONSUMED.—BEDDING PLANTMEN HAVE ALL THEY CAN DO.—STOCK ALREADY EXHAUSTED IN MANY LINES.—NOTES OF VARIOUS DOINGS OF MEN OF THE TRADE.

This is Beauty weather and the quantity of this rose now coming in completely dwarfs all the other varieties. All the shipping boxes are pressed into service and still there are not enough and in some cases they are carried in bundles. The quality of the stock is excellent, when the quantity is considered. One grower sent in 1,300 blooms for one day's cut. Prices are away down; \$1.50 per dozen will buy a fine grade of extra long-stemmed stock and, as the fakirs are seen on the busy corners in the shopping districts, with great armloads of just such stock, calling out "15 cents, two for a quarter," some idea may be had as to what they pay. Bridesmaids and Brides are also plentiful, but the

market seems to take the bulk of the stock without trouble; \$6 to \$10 is the price. Robt. Scott & Son are sending in some well colored Scott roses. It is a pity this variety does not have a longer stem, as it is a beautiful flower of perfect form and color when half to full blown. We hope to see more of it next season. Carnations are good and plentiful; \$2 will now buy very fine stock, but a few fancies still fetch \$3 to \$4, although the demand for these is light. This week will wind up the violets. The streets are now lined with lilac and spring blossoms, which sell well.

The bedding plant men are now very busy. Geraniums, particularly, are moving very quickly and all classes of this stock is in great demand. Good roses are scarce, the most of the stock being too small to suit fastidious customers who want an effect at once and are willing to pay for it. Rhododendrons are also in great demand. H. Waterer is sold out and says he had to refuse orders for over a thousand plants, as he could not get the stock to supply them.

M. Rice, of M. Rice & Co., sailed for Europe last Saturday. Mr. Rice says he finds it pays to go to the European markets and look the goods over personally and in this way get next to the novelties that may be offering. His firm report the best business in their history the past year.

Mr. and Mrs. Robert Crawford celebrated the twenty-fifth anniversary of their wedding last Friday evening. Their many friends gathered to extend their congratulations. The house was handsomely decorated and all present enjoyed themselves hugely.

H. Bayersdorfer has a scheme to centralize the wholesale business, both of cut flowers and florists' supplies, that if he could bring it about would certainly revolutionize things. We wish him success, but—

Robt. Craig & Son have just received a large importation of bay trees, which carried very well. They are handling thousands of rooted carnation cuttings; in fact, they never had such a demand.

Pennock Brothers have had a pretty window decoration of apple blossoms. Two large trunks and limbs of apple trees were covered with the branches in bottles of water.

Joseph Heacock reports an immense sale of young Beauties and could have sold thousands more if he had room to handle the young stock.

Geo. C. Watson is off on a trip to Boston and vicinity. K.

#### Cleveland.

CLUB HOLDS WELL ATTENDED SESSION.—INTEREST IN THE QUESTIONS AND DISCUSSIONS.—ABOUT THE LILY TROUBLES—THE BEST BEDDING GERANIUMS.—OTHER BEDDING PLANTS.—TRADE STILL ACTIVE ON CUT FLOWERS—VARIOUS NOTES.

The regular meeting of the club was held April 28, with the attendance beyond the average. It is very gratifying to note the increased interest taken in these meetings. Out of the question box came a query from A. Schmitt: Is there such a lily as longiflorum "multiflorum" and what is meant by calling a lily that only produces from one to three flowers to a stalk "multiflorum?" The question remained unanswered, but in the discussion which followed Adam Graham expressed the opinion that the bulbs shipped to this country from Japan are in a great measure seedlings collected in a haphazard way by the natives, sold to

the dealers, who bundle them into boxes, ship them to this and other countries labeled to suit the purchaser, "multiflorum," "giganteum," "eximum," or any other old "mum." In his opinion this state of affairs will continue until the business of lily growing in Japan is taken in hand by thoroughly practical men and a process of weeding out practiced until nothing but the best strain remains in cultivation. Not until then need we expect relief from the lily trouble. It is a commendable fact that the Harrisii growers of Bermuda are working on these lines at present, as a marked improvement has been noticed in the bulbs from Bermuda this season. A further improvement is promised for next year. It is to be hoped the promises will be fulfilled and the Harrisii in time restored to its former glory.

In geraniums, Mr. Schmitt says the new variety, Jean Viand, is a decided acquisition to the bedding list. Nutt and Hederant are considered among the best of the older varieties. There is an opening for a good white one. Wm. Hart said Hederant, or double Grant, as some call it, requires a heavy soil to grow it to perfection. Planted in light soil it has a tendency to rust. There was a diversity of opinion concerning heliotrope as a bedding plant, Mr. Brinker claiming the demand is increasing for this old-time favorite, while others thought there was a decline in the demand for heliotropes, fuchsias and ivy geraniums.

The stores still continue to do a good business and prices remain about the same, with some slight variations. Sweet peas are becoming plentiful. Carnations still continue scarce. Smilax has shortened up and good stock is hard to get; plenty of adiantum is to be had.

Mr. Cushman, of Sylvania, O., honorary member and ex-president of the Cleveland Florists' Club, was in town last week looking very happy. It is a daughter.

Mrs. S. A. E. Lyman, of the Essex Greenhouses, is sending in some extra fine snapdragons.

R. Hoffman, of Miles avenue, reports business good. ECHO.

#### Waterbury, Conn.

NOTES OF A VISIT TO A SUCCESSFUL GROWER.—HEAVY CUT OF HIGH GRADE ROSES—EXPERIENCE WITH THE NEWER CARNATIONS.—NOTES OF OTHER DOINGS.

It is evident from the widespread discussion of the superiority of grafted roses over those on their own roots, that the former will be largely planted this coming season. All through the New England states the grafted rose practically holds sway, having displaced the own root stock at the ratio of at least three to one. A. Dallas, who is not only a practical grower, but a man endowed with business acumen as well, has kept a record for the past few years, showing the yield of two rose houses, each 20x150. Thus his book shows that from October 1, 1901, up to March 1, 1902, his cut amounted to 62,194, all first-class roses, such as would bring in the open market \$8 per hundred. These are actual figures and speak for themselves. Aside from all other considerations, having equipped his houses with solid beds, he finds no need of replacing his plants every summer. On the contrary, the difference between four-year-old plants and young stock, as I observed at his own place, seems to be in favor of the former. Thus considerable is saved in labor and expense.

Four houses, each 20x150, are given to

carnations and one of equal dimensions to smilax, asparagus and miscellaneous plants. Among the pinks Marquis most decidedly takes the lead and, in Mr. Dallas' opinion, one would have to seek high and low to find its equal. Frances Joost, Genevieve Lord and the old James Dean are likewise behaving splendidly, while Lawson, like everywhere else, stands without a peer. Morning Glory is away ahead of Daybreak, and, though comparatively small, it has certainly proved a most desirable and paying variety. Cressbrook and Nelson will be added to the list of pinks next season. In reds Crane and Jubilee are the only two, both doing well, while in whites Queen Louise holds first place, with White Cloud and Flora Hill as close seconds. Bradt is the only fancy.

Under the supervision of foreman Carl Bjorklund things about the establishment are in the pink of condition. Neatness and order are not the least attractive features about the place. At the Union street establishment, where the store is located, palms and ferns are grown in quantity. Business has been exceptionally good all through the season and the spring season bids fair to prove a record breaker. NOMIS.

#### Tarrytown, N. Y.

HORTICULTURAL SOCIETY HOLDS INTERESTING MEETING.—MEMBERSHIP LIST GROWING STEADILY AND RAPIDLY.

The regular meeting of the Tarrytown Horticultural Society was held on April 24. President Wm. Scott in the chair. The following were proposed for membership: H. H. Rayner, Tarrytown; Wm. Hasting, of Tuxedo Park; Robert Borcham, of Ardsley, and Henry Kastberg, of Dobbs Ferry. The following were elected to membership: Edward Cosgrove, Henry Harms and James Ballantyne, and to honorary membership, W. R. Cobb, Tarrytown, and N. E. Sands, of Ardsley. It was decided to hold a show in June and the arrangements were referred to the executive committee. The schedules for the November show are now ready and will be sent on application to the secretary, E. W. Newbrand, Tarrytown.

An essay was read by Wm. Gomersall, of Fishkill, entitled "Our Outdoor Fruits," and after discussion a vote of thanks was given Mr. Gomersall. A. J. R.

#### Allentown, Pa.

GROWER STARTS WITH FOUR MODEL HOUSES.—WILL GROW FOR WHOLESALE.

John F. Horn, when he concluded to move into his own place, built, to start with, three carnation houses each 20x300 and one rose house 25x140. These are built in the best possible way and equipped with all the modern appliances. Besides his retail trade, which is large, Mr. Horn intends growing for the wholesale market as well. The best standard varieties and a few of the novelties of this year's introduction will constitute the carnation stock to be grown next season. NOMIS.

CRETE, ILL.—Gottwald Heinrich has opened a store at Chicago Heights, with Miss Anna Brockman in charge.

ALBANY, N. Y.—The partnership heretofore existing under the name of Woodward, Sherman & Eberle was dissolved April 25 by mutual consent. The business will be continued by Frank A. Sherman and Frederick W. Eberle, under the name of Sherman & Eberle.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

MORE grafted roses will be planted this  
spring than ever before, particularly in  
the west.

WE are in receipt of some good blooms  
of marguerites and spikes of stocks from  
N Greivelding.

THERE was never greater demand for  
competent growers and it certainly  
apells higher wages for first-class men.

A NEAT and salable window box is  
made of inch boards covered with rough  
bark, bound by half round, bark covered  
strips at the corners.

THE number of legitimate "want"  
advertisements in a publication is always  
a good indication of the way that paper  
is read by the people.

DESPITE the fact that many growers  
have met with little success in growing  
Liberty, plants of this rose are the most  
readily salable item in the list of young  
stock

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

CONTRIBUTIONS to our columns are  
welcomed, but correspondents must not  
fail to sign their full name. There is no  
other place but the waste basket for  
unsigned manuscript.

### Hail Insurance.

There was a severe hail storm at Blue  
Island, Ill., last week. Ten of the hail  
stones weighed one pound and it may be  
easily imagined that they made consider-  
able havoc with greenhouse property.  
The losses to local florists, estimated on  
a strictly conservative basis, were about  
as follows: Heim Bros, \$5,000; H. & R.  
Hilmers, \$2,000; Mrs. Bryfogle, (market  
gardening) \$6,500; W. F. Hennig, \$700.  
There are a couple of other smaller  
florists at Blue Island, whose losses we  
could not ascertain. As a matter of  
information it may be stated here that  
most of the glass on the establishment  
of Heim Brothers was 16x24, double  
thick. Three-fourths of these panes were  
broken. One or two old houses were  
glazed with single thick glass and prac-  
tically every pane was broken.

Not one of these concerns carried hail  
insurance. The lesson is obvious, and  
every greenhouseman throughout the  
country will do well to take it to him-  
self. Write at once to John G. Esler,  
Saddle River, N. J., and tell him to insure  
your greenhouses.

### It Did the Business.

ED. AM. FLORIST:—Enclosed is \$1 to  
pay for our one-inch advertisement  
"Fifty Thousand Rose Plants." It  
appeared only once but it did the busi-  
ness; sold all our plants.  
Fostoria, O. FOSTORIA FLORAL Co.

### Plant Exhibits at Asheville.

ED. AM. FLORIST:—Our Auditorium is  
completed and the grounds are ready for  
planting. If any florist wishes to exhibit  
growing plants of any kind at the August  
S. A. F. meeting, I will be glad to plant  
and care for a limited number free of all  
charge except the freight or express on  
same.  
J. W. C. DEAKE.

Asheville, N. C.

### The Lily Question.

Elsewhere in this issue we print part  
of a letter from Japan bearing on the  
*Lilium longiflorum* question and appar-  
ently confirming the views taken in recent  
articles which have appeared in the  
AMERICAN FLORIST. It would seem that  
the fierce competition here and in Japan  
has caused the importers of these bulbs  
to overlook the primary rights of buyers  
to receive true stock fully matured and  
in condition to produce first-class results  
if properly handled. There is a moral  
question involved here. No self-respect-  
ing nurseryman will dig a deciduous tree  
in leaf or allow it to be dug except in the  
presence of the man who is to use it and  
who takes the risk himself after a full  
explanation.

### Greenhouse Building.

Mason City, Ia.—Wheeler Floral Com-  
pany, two houses 20x42; one 25x42.

Creston, Ia.—Floral Park Greenhouses,  
two houses 20x80.

Warren, O.—John Adgate, two houses.  
Manchester, Mass.—Philip Dexter, con-  
servatory 135 feet long.

Beverly Cove, Mass.—Geo. E. Ward,  
range of houses.

Edgely, Pa.—Floral Exchange, rose  
house 63x307.

West Medway, Mass.—Albert Smith,  
cucumber house. Chas. M. Smith, cucum-  
ber house.

Hartland, Me.—H. C. Fuller, one house  
Yonkers, N. Y.—S. Untermeyer, range  
of conservatories.

Orange, N. J.—B. N. French, house  
12x70. E. Van Gasbeck, house 12x57.

Brooklyn, N. Y.—P. McGowan, con-  
servatory.

### Chrysanthemum Society of America.

The action taken by those members of  
the Chrysanthemum Society of America,  
who met at Indianapolis in February,  
should be endorsed by and receive the  
hearty support of all who grow the  
chrysanthemum, for there is much good  
work awaiting the doing in the chrysa-  
themum field. The interest in the chrysa-  
themum is extensive and assuredly  
will be long sustained; since the popular  
regard for the flower has grown to such  
an extent it will always be in large  
demand in its season. The record of  
work performed by the C. S. of A. from  
its inception to date, though falling  
short of what might be expected in vol-  
ume and comprehensiveness, is at least  
satisfactory in its efficiency, and the bene-  
fits arising therefrom have accrued to  
the growers.

The action above mentioned, of hold-  
ing an exhibition in chrysanthemum

time, should arouse widespread general  
interest. The Horticultural Society of  
Chicago has made the exhibition an  
assured fact, and it now behooves chrysa-  
themum growers to try and make the  
show in Chicago next November the  
greatest and most complete chrysanthe-  
mum exhibition ever yet held. A prelim-  
inary list of premiums has been issued.  
It contains fifty-one classes for chrysa-  
themum flowers and plants. Copies of  
the list can be obtained on application  
to Edwin Lonsdale, Wyndmoor, Pa., or  
E. A. Kanst, 5700 Cottage Grove avenue,  
Chicago, Ill.

This exhibition will certainly bring  
together a large number who are spe-  
cially interested in the chrysanthemum,  
and it would seem eminently fitting to  
further signalize the occasion by holding  
a chrysanthemum convention at the  
same time and place; for, as before said,  
there is work to be done, and it can best  
be accomplished when there is a large  
"community of interests" gathered  
together.

Reviewing the work that has been  
accomplished by the society, we are con-  
fronted with the fact that it has been  
mainly along commercial lines. Coinci-  
dent with this work we have seen com-  
mercial standards of excellence materi-  
ally advanced. We have also seen the  
chrysaathemum as an exhibition flower  
successfully exploited and brought to a  
surpassing degree of excellence. A con-  
tinuance of this is most desirable, but a  
society organized in the interests of a  
particular flower should take cognizance  
of all its types and forms. The time will  
be opportune in Chicago next November.  
Shall we avail ourselves of it?

A. HERRINGTON, Pres.

## OBITUARY.

CHARLES E. KIRKHAM.

Charles E. Kirkham, aged about fifty  
years, of Petersburg, Va., dropped dead,  
April 22, at the office of the Southern  
Express Company. Death resulted from  
heart trouble. He is survived by a  
widow. The deceased was a member of  
member of A. P. Hill Camp of Confedera-  
te Veterans.

JOHN BAHL.

In the death of John Bahla, who passed  
away on April 20, Cleveland lost one of  
its pioneer florists. Coming from the  
northern part of Germany, he started in  
Cleveland as private gardener to Dr.  
Schenck. This position he resigned and  
started into the commercial line on St.  
Clair street, where he conducted a suc-  
cessful business for over forty years. His  
kindly disposition won for him a host of  
friends. He is survived by a daughter.

J. STERLING MORTON.

The death, at River Forest, Ill., April  
28, of J. Sterling Morton, Secretary of  
Agriculture in President Cleveland's second  
cabinet, will be mourned both by  
those who enjoyed his personal friend-  
ship and by all who admire manly virtue  
and robust integrity in public life. By  
nature a controversialist, Mr. Morton's  
whole public career was one of straight  
steering against obstacles. He was  
unalterably opposed to the free distribu-  
tion of seeds by the government and  
found himself out of harmony with con-  
gress. "Plant trees" was the motto  
printed on his private stationery and he  
will long be remembered as the founder  
of Arbor day. Mr. Morton was born in  
Adams, N. Y., April 22, 1832, but his  
parents, descended from Puritan stock,

early removed to Monroe, Mich. Here the boy attended school, going thence to the University of Michigan and to Union College, New York. In 1855, the year following his graduation, he married and located in Nebraska, being identified with the territorial history of that commonwealth and a candidate at its first gubernatorial election, losing by an irregularity because of which 160 votes were thrown out. Mr. Morton was frequently pointed to as the representative farmer; certain it is that he was the friend of the tiller of the soil, the horticulturist, the gardener and the florist.

**SITUATIONS, WANTS, FOR SALE.**

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—Steady, by sober industrious man, 11 years in America, grower of cut flowers, plants, etc. Address, with offer, WILL, care American Florist.

**SITUATION WANTED**—In retail florist store; 16 years' experience in leading New York establishment. First-class references. Address E G, 59 West 29th St., New York.

**SITUATION WANTED**—As foreman and grower of cut flowers and plants. Have been foreman with prominent florists around Chicago for a number of years. Address FLORIST, Box 51, Hinsdale, Ill.

**SITUATION WANTED**—By practical florist, 23 years' experience with palms, ferns, orchids, blooming and forcing plants. Good designer, decorator and salesman. Private or commercial place. Address O F, care American Florist.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

**SITUATION WANTED**—By good all-around man, 33 years of age, single, 18 years' experience in all branches—lawn, greenhouses, roses, shrubs, trees, etc. Private place preferred; best of references from America and Germany. Address S L, care American Florist.

**SITUATION WANTED**—By a competent florist; grower of first-class roses, carnations, 'mums, violets and general greenhouse plants; 25 years' experience. Want position as foreman. Can manage men with success. Best of references; strictly temperate; expect good wages. Address C H W, care American Florist.

**SITUATION WANTED**—By single, middle aged man, as gardener and florist, on private place or otherwise; honest, and competent to produce wonderful results at the least expense. A fair salary and permanent place. Will go anywhere. Address for particulars, stating best wages paid. S S, care American Florist, Chicago.

**WANTED**—A good greenhouse hand; wages \$20 00 to \$25.00 per month with board. W. L. SMITH, Aurora, Ill.

**WANTED TO BUY**—Greenhouses with dwelling and good soil. Have \$1000 to \$1200 cash. Address H H, care American Florist.

**WANTED**—Rose and carnation grower and one good designer and decorator. State experience and wages. W. A. DUKE, Danville, Ill.

**WANTED**—To lease, within 50 miles of Chicago, a place of 5,000 to 15,000 feet of glass in first-class condition. Address C W, care American Florist.

**WANTED**—A good florist to grow roses, carnations, 'mums and general stock. \$30 00 per month; board and room. State age and references. C. HUMFELD, Clay Center, Kans.

**WANTED**—A smart young man with some experience in greenhouse work. State wages expected without board. Give references. Address GIBSON BROS., Newport, R. I.

**WANTED**—A first-class Beauty grower, married man preferred. Will pay good wages to right man. If satisfactory will give full charge of establishment. JNO. MUNO, 51 Wabash Ave., Chicago.

**WANTED**—Rose and carnation grower, to take charge of 20,000 feet of glass. Must be well recommended. State wages wanted with board and washing, also age. Address JOHN L. WYLAND, De Haven, Pa.

**WANTED**—Competent store man to take charge of a first-class store. Must have the very best of references as to ability and qualifications. Address, stating salary expected, THE GRANT-WILSON FLORAL CO., 480 Prospect St., Cleveland, O.

**WANTED**—First-class rose grower to take charge of section. Best references required as to ability, character and sobriety. State wages expected when writing. Address THE J. A. BUDLONG & SON CO., 171 Canal street, Providence, R. I.

**WANTED**—We have a good chance for a thorough, first-class grower who wants to enter business for himself, to take charge of a new range of glass devoted to growing roses, carnations and palms for the retail store. This will bear close investigation. Address G W, care American Florist.

**WANTED AT ONCE**—A florist and gardener, to take charge of four houses, each 50x20 feet, and small garden. Must understand growing 'mums, roses and carnations. Married man preferred; \$39 per month and board, or house and fuel furnished. Address MT. STERLING FLORAL CO., Mt. Sterling, Ky.

**WANTED**—Florist to take charge of 10,000 feet glass. Must understand roses, carnations and general greenhouse stock. State wages expected and give references. This will lead to further advancement, as new block of houses are soon to be erected. Party must be able to come at once. Address THE GRANT-WILSON FLORAL CO., 606 Jennings Ave., Cleveland, O.

**FOR SALE**—Good second-hand greenhouse material. L. A. WHELOCK, Ovid, Mich.

**FOR SALE**—Bargain; 3,000 feet second-hand glass 16x24, double thick. Address R C, care American Florist.

**FOR SALE**—Prosperous, up-to-date, growing florist business; established 12 years. Address for particulars, Mrs. S. N. ALKIRE, Greenview, Ill.

**FOR SALE**—6,000 feet of glass well stocked, house, etc. All O. K. and in good order. Bargain; terms easy; other business. Address Box 53, Decatur, Ill.

**FOR RENT**—Greenhouses and 14 acres of land with good dwelling and good water supply, without extra expense for rent. Enquire of T. H. WRIGHT & Co., Ft. Dodge, Ia.

**FOR SALE**—Three greenhouses, 7-room dwelling, stable, 7,000 bedding plants, etc. Illness cause of sel'ng. Good home trade. Address Mrs. K. HARRIE DANE, Winchester, Mass.

**FOR SALE**—Fine store fully equipped for retail florist; doing good business; will be sold at great sacrifice on account of death of partner. For particulars, call at 2202 Michigan Ave., Chicago.

**FOR SALE**—At a bargain, greenhouses, 25,000 feet of glass, land and good dwelling house, barn, etc., in best of condition and well stocked; near Chicago; owner going into other business. Address H G, care American Florist.

**FOR SALE**—25,000 feet of glass; established 15 years, 8 miles from city hall, Chicago, dwelling house, barn, wagons, tools, etc., all complete and at a bargain. Right man could make price asked in one year. Address CHICAGO, care American Florist.

**FOR SALE**—Florist's business. Well established and doing a good retail business. Located in one of Chicago's wealthiest suburbs; 25,000 feet of glass well stocked for spring sales. For full particulars and price address E, care American Florist, Chicago.

**FOR RENT**—A prosperous retail and wholesale business; new houses complete; 15,000 feet of glass, 16x24; one acre of land, and dwelling; rent \$20 per month; opposite Woodmere Cemetery gates; one mile from Detroit, Mich. Address ANTON KAIBER, Woodmere P. O., Mich.

**WANTED, Rose Growers**

Good wages and a desirable position for competent and faithful men. SOUTH PARK FLORAL CO., NEW CASTLE, INDIANA.

**FOR SALE OR RENT**—6 000 feet of glass, hot water heat; own water works; sale for all you can grow. Quick buyer can double price asked for stock in sixty days; terms easy; no triflers. For particulars Address

J. G. REYNOLDS & SON, 261 W. Putney street, Corning, N. Y.

**Position Wanted as MANAGER OR FOREMAN**

on commercial place. Wholesale or retail. References of the highest quality. M. BLOY, 212 Woodlawn Ave., Buffalo, N. Y.

**WANTED.**

At once, a man who can grow roses, carnations, 'mums and general stock. Send references and wages expected. Steady place the year round.

CHRISTIAN DEHN, Saratoga, N. Y.

**WANTED**

A first-class store man. The advertiser wishes to open a first class store in one of our largest and most progressive cities, and would like to correspond with a competent florist who would like to invest a corresponding amount of capital. This is a No. 1 chance for the right man. Address, stating qualifications and the amount of capital you would be able to invest. F C, care American Florist.

**WANTED**

ROSE PROPAGATOR of more than ordinary SKILL. Must be thoroughly competent with cuttings and in root grafting; should understand hybridizing, crossing, etc. Useless to apply unless you have long experience and can show a successful record. Position permanent to man who can fill it. State wages expected, age, married or single, full particulars as to experience and furnish references. California Rose Co., Los Angeles, Cal.

**\$300 Per Month.**

Do you want it? If so, buy me out NOW, at your own price. Good reasons, 15,000 feet. It costs you a postal card to have particulars.

C. S. FITZSIMMONS, Lansing, Mich.

**For Sale at a Bargain**

Greenhouses, 25,000 square feet of glass, all in good condition and paying well; within 20 miles of Chicago. Owner is going to retire from business. Address F S, care American Florist.

**FOR SALE**

Business including two new greenhouses, 59x25 feet, well stocked with all kinds of plants. Houses are built in the latest and most improved styles. Store fixtures including an elegant soda fountain and all pertaining to it. Stock of palms and confectionery, chairs and tables for ice cream parlor. Right in the heart of the business portion of city. Established 5 years. Am the only one in the business here—population 40,000. Reasons for selling, I want to go west to friends. Write for particulars. L. O'Sullivan, West Superior, Wis.

If you want to get the want you want to get, you want to get your want ad into the

**THE SEED TRADE.**

**AMERICAN SEED TRADE ASSOCIATION.**

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

A. H. GOODWIN, of the Goodwin, Harris Company, Chicago, is making a California trip.

THE SIOUX CITY Seed and Nursery Company, of Sioux City, Ia., has contracted for the raising of 1,000 acres of beans in the vicinity of Cass City, Mich.

THE DALLAS, Tex., News claims that that city handled last year 25,000 pounds of turnip seed, 100 cars sorghum seed, 100 cars of seed oats, besides a general line of field seeds, potatoes, onion sets, etc.

PRIVATE advices from Holland, dated April 14, contain the following: "The outlook is for a medium crop of tulips, frosts and cold having done them harm. Hyacinths and narcissi are in fair condition."

WE understand that the Brown Bag-Filling Machine Company, Fitchburg, Mass., will do the packing of free seeds under the new government contract and that Mr. Phillips, of Toledo, Ohio, will superintend the work.

**Theodosia B. Shepherd Company.**

The Theodosia B. Shepherd Company has filed articles of incorporation with the county clerk, capital stock \$30,000, all of which has been subscribed. It is incorporated to grow, buy and sell all kinds of plants, seeds, bulbs, trees and nursery stock, etc. The directors for the ensuing year are Theodosia B. Shepherd, 160 shares; W. E. Shepherd, 67 shares; Myrtle Shepherd, Lloyd Shepherd, 74 shares; Edith Shepherd Kelsey, 1 share; Margaret Shepherd Oaks, 1 share.

**The Hyacinth Situation.**

In its issue of April 1, the *Bulletin*, a French horticultural publication, has the following regarding the hyacinth situation, more especially that of the south of France:

The ruling prices in the south of France for white hyacinths are very high, too high in fact. The florists who force them will, to our notion, not find any profit in them. It is to be regretted that the prices are neither reasonable nor justified. In acting thus the growers will work against their interests. We knew from good authority that the large buyers of bulbs are looking for a plant which will supplant the Roman hyacinth and secure for them a reasonable profit. In Holland, on the contrary, the hyacinths are very cheap this year. The prices are at least one-third lower than those of last year. White tulips are perhaps a little higher in price.

**Japanese Longiflorum Lilies.**

A long-time resident of Japan writes, March 31, as follows, in a private letter answering an inquiry from a gentleman much interested in the growing of lilies under glass:

"I am in receipt of your favor of the 6th ult. and note your remarks as to the general dissatisfaction with the growing stock of *Lilium longiflorum* now under glass in your own country. I have anticipated this complaint for the last two or three years and have expressed my opinion to my constituents on several occasions. The remedy is not far to seek.

"My experience in bulb growing and shipping for the last forty years leads me to the conclusion that they are lifted

much too early. It has resulted from the suicidal rivalry existing between two firms, one a Japanese firm, and the other a German one. Previous to the last three or four years longiflorums were not lifted before the middle of August, which is none too soon. From that date until the end of October is the proper time for lifting, but when these firms were cutting one another for the American business each firm was anxious to get its first shipment off before the other and so it has been going on until last year, when the bulbs were dug up in the middle of July, packed immediately and shipped.

"Now, for your information I would tell you that at this time of the year the bulbs are in a growing condition, full of sap, and the stems green and it goes without saying that having to cut off these

green stems and hurriedly packing the bulbs before ever they have been allowed to develop the embryo buds for the next season's growth, naturally a failure takes place in the following season's growth, whereas, if a bulb is allowed to shed its stem and develop buds in embryo, or properly speaking, when the bulb is ripe, produces the best result after its next planting. They get these goods early in your market but I will go so far as to say that if you received longiflorum in September or October you would be able to get them forward by Easter and they would produce fine strong plants with abundance of bloom."

DOYLESTOWN, PA.—John Andre is adding two houses to his establishment on the lower state road.

**Special OFFER** Pæonias, Cycas and Asparagus Plu. Seed

Asparagus Plumosus Nanus, per 100 seeds, 85c; per 1000 seeds, \$7.50.

CORRESPONDENCE SOLICITED.

### CROWDED FOR ROOM?

You want to buy Roses now, but are crowded for room. Why not place your order now with **Geo. A. Kuhl** and have them grown into 3-in. for May or June delivery. We believe in shifting Young Roses often. All stock offered in 2½-in. has been shifted from 2-in. and is equal to most stock advertised as 3-in., and when we send it out is well established. Our varieties, Meteors, Brides, Maids, Perles, La France, Kaiserin, Woottons, Belle Siebrecht, Pres. Carnot, Golden Gate, Am. Beauties, and Liberty. Write us at **Pekin, Ill.**

## Imported Bulbs for Florists' Forcing

Send Us Your List for Pricing.

Our arrangements for high grade bulbs of *Lilium Harrisii*, French Romans, Paper White Grandiflora, Callas, Japan Longiflorum, London Market Valley, and picked bulbs of all Dutch Hyacinths, Tulips, Narcissus and *Spiræa* are unexcelled.

Bulbs secured from us will be subject to careful inspection and approval on arrival, and if in any way unsatisfactory, will be made good at once.

By combining your order for a full line of this stock with us, you get each in season and all at the closest cost for high grade stock. Economy in car-load freight shipments and large importations supply half our profits.

Write for Prices before closing any forcing stock orders.

**VAUGHAN'S SEED STORE,**

Crozy, Black Prince, Burbank, Henderson, \$2.00 per 100. **Hollyhocks**, Allegheny strain, \$2.50 per 100. Cash please. **Shellroad Greenhouse Co., Grange P. O., Baltimore, Md.**

TELL THEM WHERE YOU SAW THE AD.

**THE NURSERY TRADE.**

**AM. ASSOCIATION OF NURSERYMEN.**  
 R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
 GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
 Twenty-seventh annual convention, Milwaukee,  
 Wis., June 11-13, 1902.

It is stated that Northern Spy apple trees are very scarce.

JESSE E. WRIGHT, foreman for the J. Wragg & Sons Company, Waukeg, Ia., is dead.

At Fredonia, N. Y., it is reported that an aggregate of 300 acres of grape cuttings are being put in by five nursery firms.

THE property known as High Rock in Lynn, Mass., has been purchased by the city and will be devoted to park purposes.

A NOTABLE addition to the park reservations of Troy, N. Y., has been made in the securing of Warren Hill, the price paid therefor being \$110,000. The property includes seventy acres, upon which are two elegant buildings. The location is elevated and affords a magnificent outlook.

GEORGE C. SEAGER, secretary of the American Association of Nurserymen, is out with his circular announcing a fare and one-third rate to Milwaukee for the twenty-sixth annual convention, to be held June 11 to 13, at the Plankinton House. Among the speakers announced are L. H. Bailey, N. H. Albaugh and A. Willis.

P. J. BERCKMANS says that all stock intended for long journeys must be thoroughly defoliated and hardened. Trees should be taken up without mutilating the roots and no branches or roots cut. Puddle the entire tree in stiff clay and let it dry and pack in tight cases lined with building paper. Use dry moss and charcoal and pack the cases very tight. Mr. Berckmans says that packed in this manner they have had stock in transit over four months and ninety per cent of it grew after planting.

**Columbus, O.**

CUT FLOWER BUSINESS ACTIVE AND SPRING BUSINESS OPENING BRISKLY.—VARIOUS NOTES OF LOCAL CONDITIONS.

Business is still very brisk and all the firms report being very busy filling orders and preparing for the spring bedding trade. Quite a few are still holding their best roses at \$1.50 per dozen and carnations at 75 cents per dozen. Some postals are being received from Cleveland, Chicago and other points offering strong inducements to encourage bargain sales on certain days, claiming the over-production in those cities will enable them to quote prices to suit. The demand still continues for Crimson Ramblers which seem to be in good supply. Stock in general is holding out well in quality and in fair supply, with the exception of smilax, which is short and scarce. Among carnations Marquis is the leader just now, for the cut from this variety is fine everywhere. Outdoor planting of young carnations is about done and we are having rain enough to save them. Palms for store openings have been in great demand but by most of the growers this is considered a "thank you" job, since the price paid does not justify one when the injury to the stock is taken into consideration.

Geo. L. Miller, of Newark, was in Columbus this week and reports a larger shipping business than in any previous year. CARL.

**Indianapolis.**

SEVERE STORM DAMAGES GREENHOUSES.—THE PRINCIPAL LOSERS.—TRADE CONDITIONS FAVORABLE.—VARIOUS NOTES.

A heavy windstorm recently swept over this vicinity, doing much damage. At Mr. Edward's place two greenhouses, one 20x100, the other 12x100, were completely wrecked. E. A. Nelson had several ventilators blown off and the gable of one of his new houses crushed in. Other florists escaped with slight damages.

Since the good rains everything out-

side has improved wonderfully. Huntington & Page, one of the largest growers of onions, reports prospects very bright.

Ralph Richardson, a young florist well known in Indiana, took strychnine a few days since.

The Smith & Young Company is breaking ground for a new rose house.

Herbert Bertermann was married to Miss Pearl Holt April 23.

Visitors: John H. Sievers, San Francisco; Myer Heller, New Castle; C. A. Rieman, Connersville. H. J.

CORFU, N. Y.—William Scott has broken ground for his season's addition, six houses 20x150, which will be rushed to completion, for the rose stock is at hand with which they are to be planted.

Cincinnati.

BUSINESS QUIET AND CUTS HEAVY.—MUCH STOCK GOES TO THE BARREL.—CLIFTON COMPANY TO PAY IN FULL.—NEW GROWING ESTABLISHMENT RUMORED.—A GOOD YEAR.

Trade is rather quiet for this season of the year and we are having our spring glut of flowers and a good many find their way to the barrel. A little funeral work is about all that moves the flowers at present, there being no weddings or decorations of any kind worthy of mention. Smilax and asparagus are growing scarce and no doubt as soon as ferns are used up there will be quite a run on the same.

It has been stated by good authority that several wealthy men of this city intend to form a stock company to grow and sell choice cut flowers and plants for the local trade. Probably they are anxious to find out what it costs to produce these articles.

Gus. Adrian, Carl Schweizer and Fred. Gear acted as appraisers of the stock of the Clifton Rose Company, which went into the hands of a receiver some time ago. All the accounts owed by the company will be paid in full.

The Board of Directors of the Cincinnati Cut Flower Company held its annual meeting last week. Wm. Mann, the secretary, reports an increase of twenty per cent in the volume of business done over last year.

The bedding season is close at hand and all the growers handling this class of goods are in work up to their necks. D.

Lowell, Mass.

CUT FLOWER TRADE HOLDS FAIR FOR THE SEASON.—STOCK PLENTIFUL EXCEPT CARNATIONS.—BEDDING PLANT BUSINESS BEGINS WITH A RUSH.—NOTES.

Business continues to keep up in pretty good shape. There has been considerable funeral work, with a spring wedding now and then to help out. The weather the past week has been very warm, causing flowers to bloom a little more freely. At the present time there is a good supply of stock, except carnations, which seem to be limited. Good blooms of the up-to-date varieties are fetching from \$4 to \$6 per hundred. Everybody is preparing for Memorial day, which is not far distant. Violets are of the past. Sweet peas are coming in, but at present the demand for them is greater than the supply; they sell for 25 cents per dozen. Some snapdragons of excellent quality are being sent in, which take the place of stocks, which are all gone for the present.

On Saturday, April 26, Patten had a very pretty decoration at the Rogers Hall school. The mantel in the spacious parlors was backed with adiantum and Balduin roses, with a fringe of yellow marguerites, which created much comment.

The spring trade has opened with a rush. Great is the activity seen at some of the greenhouses, getting their bedding plants into shape, also getting ready to plant out carnations. A. M.

PORTLAND, ORE.—C. W. Scott, representing Vaughan's Seed Store, has been calling on the trade here this week.

CRESTON, IA.—I. C. Hon is resigning his position as manager for the Creston Greenhouses June 1 to engage in business for himself under the name of the Moral Park Greenhouses, building two houses as a starter.

The Chicago Market.

It has been a long time since the Kennicott Brothers Company has had occasion to complain of poor business. Of course there is a day occasionally that seems like the Fourth of July, but it's only by contrast with the day before, which seemed like Christmas, and the day to follow usually looks something like Easter in the amount of flowers handled. It is remarkable the amount of stock received, graded, cared for and sold (most of it shipped) in this house every day. Representing, as the Kennicotts do, more growers than any house in the west, and growers of all classes, from the man who grows a specialty and does it well, to the man whose houses shelter every plant known to the cut flower trade, they receive daily such varied quantities of stock as would pass the comprehension of one not familiar with the conditions of the Chicago market.

Where all this material goes to is a puzzle to those who have not seen the expressmen carrying away the boxes with the Kennicott label, and the city buyers who throng the place in the early morning, and again in the afternoon, for it is well understood by the city retailers now, as well as the country florists, that "when you can't get it anywhere else go to Kennicott's."

But there is just one distinction between the city and the country buyer at Kennicott's. That is that the country buyer takes first place. If stock is scarce, flowers are set aside to fill all country orders before anything is sold to the city trade. The out of town man must not be disappointed, for he relies on Kennicott's.

Perhaps that is one of the greatest reasons why their shipping trade has grown steadily, year by year.

But there is another strong point which appeals to the out of town buyer. He likes to know that he is paying Chicago market rates. This he knows when he sends his order to Kennicott's. No need to look for price lists, for the ticket shows just what the city man is paying for the same grade of stock at the hour of shipment.

# "Indispensable"

This is the only word which describes the American Florist Company's Directory, just out. This book, 418 pages of facts tersely told, is issued annually and is an aid to business and money making which no wholesaler or traveling salesman can afford to be without. It contains the name of every Florist, Nurseryman and Seedsman, arranged both by states and towns and alphabetically; and new lists of Gardeners or Superintendents of private estates, Experiment Station Horticulturists, Landscape Architects and Horticultural Supply Concerns. It will save many times its cost by enabling you to cover America with your catalogue and at the same time waste no printed matter or postage on dead names.

St. Louis.

MARKET HEAVILY STOCKED.—MEDIUM AND LOW GRADES PREDOMINATE.—ENGELMANN CLUB HAS AN INTERESTING SESSION.

The last meeting of the Engelmann Botanical Club was held on Monday evening with thirty-five members present. Mr. Lnke gave a very interesting talk on annuals, especially the sixteen used in the distribution envelopes, and also showed the seeds in small bottles. He was followed by Miss Teppin, who made some very interesting remarks about the value of the hyacinth bean as a vine and covering plant and also described the best way for amateurs to grow pansies, advising that they either start them in the fall or buy plants from florists. P. T. Barnes followed and made the suggestion of growing gourds and pumpkins for covering porches. The seed committee reported that about 35,000 packets of seed had been distributed and that 25,000 more would be sent out in the next week.

Stock is considerably more plentiful this week but there is still very little first-class material. The roses that are coming in run from \$6 to \$8 for the very best. Carnations bring \$2.50 for the fancies. Carnations are very plentiful this week but there is not an over-supply of white. Some very fine White Cloud and Marquis, with a few Prosperity, are seen. Sweet peas are coming in heavily and the general run of them do not bring over 50 cents to 75 cents per hundred. Lilacs are still bringing \$3 to \$5 per hundred sprays and quite a number have been used. R. J. M.

LENOX, MASS.—C. W. Ward, of Queens, N. Y., who had arranged to deliver an illustrated lecture on "The Improvement of Carnations in America," before the last meeting of the Horticultural Society, was prevented from so doing, important business matters making his presence necessary in West Virginia on that day. Mr. Ward will deliver his lecture to the society at some future date.

# LAST CALL CARNATIONS

GRAND HAVEN, MICH.**

Dallas, Tex.

TRADE HEAVY BECAUSE OF MANY VISITORS IN TOWN.—CUT FLOWERS GO WELL.—MUCH FUNERAL WORK.—CARNATIONS FOR NEXT SEASON.—NOTES.

The past week has been a busy one for the florists. The reunion of the old confederates, held in this city, brought fully 200,000 strangers to town and the many receptions, halls, operas and other attractions gave all hands plenty to do in decorations and the cut flower line. The week ended with the funeral of Philip Sanger, one of our most prominent and highly esteemed merchants. Fully 200 designs were furnished for the occasion and it required four large wagons to haul them to the grave. The store men estimate the investment in flowers for this occasion at from \$1,400 to \$1,600.

All of the craft report general business as good. Every home is a bower of bloom here, the roses are in full bloom now and a car ride through any of our streets will convince the most skeptical that Dallas is truly the home of the rose. People generally take a great pride in their homes, and the well kept lawns, and abundant show of flowers surely speaks well for their taste.

All hands with the Haskell Avenue Floral Company are busy getting stock in shape for fall planting. They are growing 20,000 carnations in 4-inch pots for early planting, and 30,000 in the field for late planting. The season is so hot here in September that it is a difficult thing to plant from the open field in that month, but from pots the stock moves along with no check.

F. W. Beach is making preparations to take a trip north in a few weeks to see what he can find in new plants, and at the same time have a little rest, after a year's hard work. Mr. Miller will, in all probability, accompany him.

LONE STAR.

WAUKESHA, Wis.—Robert Schneck, formerly of Milwaukee, has removed here and is building two houses which he expects to have completed June 1.

## Late Prices.

**CARNATIONS** Prosperity and Roosevelt at \$3.50 per 100.

ALWAYS mention the AMERICAN FLORIST when writing to advertisers.

**IMPATIENS THE QUEEN**

This variety we now offer for the first time, it being far ahead of any cheap blooming house plant that we know of. A grand plant for out-of-town florists.  
Flowers 1 1/4 to 1 1/2 in. in diameter, color a delicate satiny pink with bright carmine eye, center of petals faintly tinged with white, wonderfully profuse and of the easiest culture. Price, 2-inch pot plants, \$1.50 per doz.; \$10.00 per 100.

Syracuse, N. Y.

GROWER HAS MANY NOTEWORTHY CARNATION SEEDLINGS.—BEDDING PLANT SEASON OPENING.—DOINGS OF VARYING INTEREST.

L. E. Marquisee has one of the finest plants in the state. He is working up a nice stock of Empire State, which is to be introduced in 1903. Mr. Marquisee has several seedlings and some of them are beauties. One which is not named is a pure scarlet in color and from three to four inches in diameter. It is well built up in the center and the calyx is perfect. The edges are heavily serrated and the stem is very long and wiry. He also has a rather flat carnation of a beautiful crimson. Another is a pure salmon with no harsh shade and well formed. There is also a white penciled with pink and another one which is dark red. None of these have been named and will probably not be until near the time when the cuttings are to be put on the market.

Quinlan & Company report that the season for bedding plants is opening with a large demand for pansies and verbenas. The former bring 40 cents and latter \$1. Mr. Wheadon expects to have a better summer trade this year than ever before.

The Auburn City Railway Company is planning to make extensive improvements at Lakeside Park this summer and will put in new flower beds, shrubbery and California privet hedge.

A movement is being made here to get the school children interested in growing flowers and several thousand packets of seeds have been distributed among them.

Henry Morris had a magnificent palm decoration for the recent musical festival.

A. J. B.

Washington.

C. Schellhorn has let the contract for a new dwelling to cost \$3,500 at his place at Good Hope. The material is already on the ground. He also contemplates building another rose house 25x150, like the one he built last year, from which he has cut a large quantity of roses.

Trade shows little change notwithstanding the fact that flowers are plentiful and cheap.

P. G.

MEADVILLE, PA.—Geo. W. Haas & Son report that business so far this year is better than that of last year for the same period.

Los Angeles, Cal.

SUPPLY CONSIDERABLY AHEAD OF DEMAND SINCE EASTER.—ACTIVE PERIOD PREDICTED.—LOW PRICES FOR STOCK FOR PARADE DECORATIONS.—SEVERAL BUSINESS CHANGES.—NOTES OF VARYING TRADE INTEREST.

Since Easter trade has been unusually quiet and the supply of cut flowers has greatly exceeded the demand. This condition is explained by those who are interested to the effect that most society events are being arranged to take place during the biennial meeting of the Parliament of Women's Clubs, which will be held here from May 1 to 10. This, together with the annual fiesta de las flores, lasting for three days, will consume an enormous quantity of stock. For the floral parade on May 2 the liberal prizes have induced many to enter the competition, but there is really no profit in supplying flowers for this kind of work. The retailers try to decline orders for this decorating and the growers quote prices that scarcely pay for picking and packing the flowers. Carnations are freely offered at \$5 per thousand and other stock at proportionately low rates. The redeeming feature of the whole affair is that it advertises the city and brings visitors who are willing to pay good prices at other times.

Chas. Winsel, for a number of years chief gardener for the Southern Pacific Railroad in this vicinity, has purchased and taken charge of the business of The Brose-Fleur Seed and Plant Company. Jas. Cruikshank has been appointed to the position made vacant by the resignation of Mr. Winsel.

J. W. Woltskill, of Redondo Beach, after having grown carnations there for a dozen years, is removing to this city. Under the management of George Watson the new place on Boyle Heights is being planted mainly to carnations. Mr. Woltskill hopes to avoid serious frosts in his new location.

The Redondo Floral Company's new greenhouses at Redondo Beach are ready for the glass. I understand up-to-date eastern methods will be in vogue there.

Miss Harriett Goodin has charge of the principal decorations for the women's parliament. D. R. W.

YONKERS, N. Y.—Samuel Untermyer is planning a very fine range of private greenhouses. One house is to be 45x200, one 20x100, one 12x100 and one 12x25.

**THE Gardeners' Chronicle.**

A Weekly Illustrated Journal.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been FOR OVER SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4 20 per year. Remittances to be made payable to H. G. COVE.

OFFICE: 41 Wellington St., Covent Garden, London, England.

# THOS. W. WEATHERED'S SONS,

HORTICULTURAL ARCHITECTS AND BUILDERS AND MANUFACTURERS OF HEATING AND VENTILATING APPARATUS.

THE ABOVE ILLUSTRATES OUR IRON CONSTRUCTION WITH IRON CUTTER, MADE IN LENGTHS UP TO 25 FEET. FROM A PHOTOGRAPH OF THE CRESSBROOK GREENHOUSES, FALL RIVER, MASS.

For further information address

**THOS. W. WEATHERED'S SONS, 56 Marion St., New York.**

## THE NEW CAST IRON VENTILATOR

Patent Applied For.

The sash being perfectly balanced you can open the sash on houses up to 1000 feet long with one machine. No header bars. No hinges to rust. Will last a lifetime. The price is within the reach of all. Send for descriptive circular.

A. RASMUSSEN, NEW ALBANY, IND.

## The Art ...of Floral Arrangement

The only special newspaper in the world for floral arrangement.

200 ILLUSTRATIONS ANNUALLY.

Specimen number free.  
Subscription, \$2.40 yearly.

BINDEKUNST-VERLAG  
J. OLBERTZ, ERFURT, GERMANY.

### "BLACK DEATH" (POWDER)

TO EAT THEREOF IS TO DIE.

**BUG KILLER and FERTILIZER.** Three years of unprecedented success wherever introduced all over the United States has proved "BLACK DEATH" to be a cheap and absolute annihilator of all insects, bugs or beetles that prey on vegetation, foliage and flowers. See what Peter Reinberg said in this paper, Feb. 8. Other strong indorsements sent on receipt of postal card.

Western Sales Agency, 235 Franklin St., Chicago.  
HANDLED BY SEEDSMEN. S. D. STRYKER, Agent.

### RIPPLEY'S

IMPROVED 1902  
COMPRESSED AIR SPRAYERS

have fine Vermorel Spray Nozzle; made of heavy copper and galvanized steel; has safety valve. Strongly riveted and double seamed. Guaranteed to be as represented and to be the strongest sprayer manufactured. Fine for spraying young orchards. Trees 20 feet high by using extension pole. Exterminating insects from vegetables, spraying gardens, washing buggies. Fine for whitewashing buildings, etc. Made in two sizes, 4 and 5 gallons. 4 Gal. Galv., \$5; 4 Gal. copper, \$7. Fine brass pump fitted on outside. Solution easily agitated. We also sell large orchard sprayers. 5 Gal. Galvanized, \$5.50, 5 Gal. Copper, \$8.00. Send to-day for our Sprayer and Breeder Supply Catalog. Agents Wanted.

Rippley Hdw. Co., Box 18, Grafton, Ill.

## NIKOTEEN

IT COSTS 4 CENTS FOR EACH 600 FEET OF FLOOR SPACE

DOES NOT INJURE THE MOST SENSITIVE PLANTS - ENDORSED BY PROMINENT FLORISTS - USED FOR FUMIGATION OR SPRAYING INDOORS OR OUT - 200 LBS. OF TOBACCO IN ONE PINT OF NIKOTEEN - SOLD BY SEEDSMEN - CIRCULAR FREE - SKABCURA DIP CO. CHICAGO.

### Kill AND SAVE THE BLOODS Bugs!

QUICKLY DOES IT.

### LOWEST RATES TO EASTERN POINTS

will always apply via the Nickel Plate Road and its eastern connections to all points in New York, New England and the eastern states. Three daily trains to Ft. Wayne, Findlay, Cleveland, Erie, Buffalo, New York and Boston. Standard equipment on all trains. Meals served in dining cars, on American club plan, at prices to suit passenger, from 35c to \$1.00 per meal. For particulars call on or address John Y. Calahan, General Agent, 111 Adams St., Chicago. Depot, Fifth Ave. and Harrison St.

## REED & KELLER,

122 & 119 W. 25th St., NEW YORK, N. Y.

MANUFACTURERS OF  
**FLORISTS' WIRE DESIGNS.**  
IMPORTERS AND DEALERS IN  
FLORISTS' SUPPLIES.  
Galax Leaves and all Decorative Greens.

## American Florists

Always do business,  
Week days and every day  
Sundays and holidays,  
All over the country,  
At home and abroad.

**Pittsburg.**

TRADE ACTIVE IN THE CUT FLOWER DEPARTMENT AND PLANTERS ARE RUSHED.—NEW FIRM OF GROWERS TO START IN OHIO.—VARIOUS NOTES OF LOCAL DOINGS.

We are remarkably busy for the season, cut flower trade being very active and everyone has all he wants to do, so that there is not a word of complaint heard anywhere. We have been pleased at the condition of Bridesmaids and Brides for the past few weeks, but they now seem to be getting dreamy and ragged. Jacqs, Bon Silenes and Perles are fairly good. Beauties are excellent in quality and reasonable in price. Both sweet peas and yellow daisies are superfine. Harrisii lilies are sick looking and are too high in price. Carnations are fairly plentiful, with the exception of whites. Asparagus and smilax are much improved in quality and supply. We have many occasions to use good ivy leaves. Home growers evidently do not care to give them the room and it is necessary for us to send east to get them. Lilies of the valley seem to be the unanimous selection for bridal bouquets and the market is just suited to meet this kind of a demand.

Fred. Burki had one of his fine wagons completely demolished a few days ago. The horses attached to an ice wagon became frightened and ran away, striking Mr. Burki's wagon. His horses and driver escaped injury.

Harry Graves and Otto Reisch, of Randolph & McClements', have arranged to construct a range of houses at Beloit, Ohio. The houses will be 20x150 feet and roses and carnations will be their specialty.

The Pittsburg and Allegheny Florists' and Gardeners' Club will have its next business meeting on Tuesday, May 6. A large meeting is hoped for and some interesting matters will be discussed.

J. B. Murdoch & Company report that their nursery department sales greatly exceed their expectations. E. L. M.

View of a piece of ground 40 ft. respectively 41 ft. 6 in. in width, covered by one roof (old style), and also by three sections of our Patent "Short-Roof" Construction. Compare headroom over benches and number of supports.

### Greenhouse Culture of *Lilium Candidum*.

There are but two lilies, of the many species, that are grown in pots for winter flowers, mainly because none others succeed so well as do *Lilium candidum* and varieties of *L. longiflorum* grown in this manner. *Lilium candidum* is largely grown by some florists but not by nearly so many now as it used to be. It is still a leader for all decorative purposes and design work when it can be had, being admirably adapted to this purpose.

It is not difficult to successfully grow the plant. The method employed by a great many who grow it largely and well is to pot the bulbs in 6-inch or 7-inch pots just as soon as they are received, the earlier the better, using a rich lively loam and avoiding fresh manures. Plunge the pots up to the rims in a frame of spent hops, ashes or any other material at hand. Their annual autumn growth will soon begin, when water should be freely given and growth encouraged as much as possible, which will continue until the ground is frozen.

On the approach of frost, cover with dry leaves or straw, and cover the frames with sash or shutters, using great care to exclude heat which might stimulate untimely growth. As this growth made early in the fall in a measure is essential to their flowering well during the season, they must not be allowed heavy freezing, so that the condition may be such that the pots can be got into the house during the winter. They can be brought in at any time after having a slight rest. It is better not to start them too soon. About January 1 would be time enough and then on in succession.

It is quite essential for them to have plenty of light and air, and they should be grown in a cool greenhouse. If crowded or grown warm they will become weak and spindly and quickly become a prey to all insects, besides spoiling the beauty of one of the finest lilies grown. A house with a temperature of 60° by day and 40° by night, will bring them into bloom in about ten weeks. They can be brought along in less time, but at the expense of both plant and flower.

If good home bulbs can be had they are preferable to imported ones, as the latter quite often are injured in transit by heating. Another reason for this is that all vegetation in this country is more rapid than in France, where these bulbs are principally grown for the American market. Here the bulbs have

a much longer rest and develop their growth in a much shorter period. The consequence is the bulbs grown here will come into flower much sooner after being brought into the house from the frames than those from foreign countries.

While this is the best method of growing them, the common one is to take the bulbs as imported and pot them, from October 1 to December 1, plunging them in the same manner and in all respects the same way. Of course, this does not give the bulbs time to fill the pots with roots or to make the preliminary or fall growth so essential to their flowering and perfect development. If a florist grows his own bulbs they can be potted up August 1 and they will soon commence their season's work.

What soils do lilies require or in what kind do they succeed best? This question is frequently asked and to many it seems a vital point. My opinion, based on years of experience, is that the condition of the soil is of more importance than its character, and it is upon the former that success largely depends. I have grown lilies in every kind of soil, from the lightest sand to the heaviest clay, and have met both success and failure in all their various characters. My preference is for a light to medium loam, because in it propagation is more rapid and in almost every case perfect flowers are the result of perfect development of the plant. Should I not have such a soil, I plant in whatever I can get, knowing full well that the soil that will produce good garden and field crops will also produce good lilies.

It is a great mistake to think that each and every plant must have a certain soil of specific character in which to grow in order to have perfect development. It is true that any plant will do well in a soil congenial to it or one similar to that in its native habitat, but it is equally true that it will do well in other soils, where other conditions are favorable. Plants do not live on soil; they live in the soil. It is their home. The soil contains certain elementary substances that contribute to the growth of plants. The atmosphere contains an equal number. The two acting together make the plant. These conditions in any given locality always exist; consequently, whether you have a clay or a sandy soil you will have in the atmosphere conditions favorable to it, so in either case the results will be the same. In one case you will have to use more labor and, on the other hand, more manure to accomplish the same purpose.

The mission of the bulb is to sustain the plant until there is root and leaf development sufficient to carry on the work. The bulb is simply a storehouse of food laid up by the plant one year for the commencement of its labors the next. The plant derives its sustenance far away from the bulb and will increase in size and strength in proportion to the amount of food in store for it, until it has reached its maximum growth. If a good, strong, healthy bulb is planted in a rich soil, a correspondingly strong plant will result which, in its turn, will make a number of strong bulbs for the perpetuation of the species. It is quite important to have the soil above the bulb as it is below, as most lilies seed near the surface through their many rootlets, thrown out from the stem, just above the bulb. The pots should be well drained.

Soon after flowering the pots can be put in any out of the way place, either in a cool shed or under the benches, there to remain until the bulbs are planted out in the field in spring, for future use. There they should be liberally treated, both in plant food and cultivation. Bulbs that have been forced in the greenhouse should have a rest of at least two years and those contemplating growing them should have a double supply, so that they would only draw from the ones that have been in the field for two years.

C. H. RONEY.

AURORA, ILL.—J. M. Smely has had a good season and is contemplating adding to his glass. He says spring work promises well.

#### Tribulations of the Florist's Employee.

[A synopsis of the paper by Eugene Oestreicher, of Mt. Clemens, Mich., read before the Detroit Florists' Club May 7, 1902.]

My subject is a rather hard one but, in the first place, I think that we employes would have no troubles whatever and be as happy as larks if it were not for the employers. They certainly make all our troubles. Suppose we start at the beginning. When the apprentice comes on the place he is considered of little use, which is all right for six months or a year, but after that give him some kind of a show. In this business, as we all know, a person must learn more by observing than by simply being shown or told. If he is not observant by nature, why, he would better direct his path to some other enterprise.

Now, in order to be brief, let us say that the apprentice has proved to be honest, capable and faithful. I think it would be well for the employer to advance him accordingly, thereby promoting the interest of the employe as well as his own. Otherwise he goes out into the world. Right here his tribulations begin. No matter where we go, we find that every employer has ways different from others, on which he insists. Therefore it is a necessity that the grower learn the peculiarities of his employer and conform to them. Once together it takes time for the employe to get acquainted with the nature of the soil, the water and in fact the whole surroundings. After all these points are well impressed upon the former's mind, it is in order for the employer to judge and treat the man accordingly.

In my opinion I think it best for an owner to divide his place into sections, and have a good man for each. If the place is small, divide into two sections, and so on, arranging it so that each person has enough and not too much to do. By so doing, all the stock is properly gone over every morning and treated as it ought to be; the cutting is done in good season, for the section man knows exactly what is fit to cut. This also applies to the watering. One man watering one day, and another man the next, makes a longer and more uncertain job of it, but this applies more to roses than either carnations, violets or chrysanthemums.

Now why, if these ways and plans are adopted, should there be any trouble? Bat right here it comes in. A section man's stock may be doing nicely when the employer or manager takes it into his head to do a little bossing. The grower must, with a smiling face, in order to keep peace, follow orders but take the consequences if things go amiss, for I have, during my travels, run across men, proprietors, managers and foremen, who professed to be florists, but did not have enough practical knowledge to deserve that name. Such men are likely to take the credit when things go well but shirk the blame when there is trouble. The grower is discredited among those who only hear one side of the story and finally he gets his "vacation."

Employers should take an interest in their employes and show appreciation for what may be worthy of it. They will find that a kind word now and then will go a long way in holding the interest taken in the business by the help. A person cannot do his best work for another's interest if he feels that the boss thinks, "Well, I do my share by paying him his wages." Then there is another point. If a grower promises to pay a man every so often he should do so and not make it a business of paying a little now and then. Bat of course we employes understand, or ought to, that the necessary cash does not hang on every bush.

For the employer's side of the question I want to say that I don't think much of a man who simply works for pay day, a "clock watcher" who may start sharp on time but is sure to quit when the closing hour strikes. Neither do I believe an employe should be expected to do more than is reasonable. Pressure often necessitates that a person work overtime, and he should be willing to do it, but he does not feel as if it should be a daily occurrence, especially when he gets no compensation for overtime. I have in mind a man who worked his help pretty steady all day at the wheelbarrow and after supper the employe chanced to see a newspaper and stopped to glance it over. It was only a minute before the employer came along and remarked: "Have you time to read a paper? I haven't!" Pleasant, wasn't it?

Then again, one runs across the place where an employe must sleep in the boiler shed, potting shed or any old corner and be ever ready for duty. This is bad enough on a full stomach, but when it comes to the way some people feed their help, well, it accounts for the fact that some florists are always needing men. But the greenhouse business, as you are all well aware, has made great headway in the past few years and the condition of the employe is steadily improving. In general he is well housed, well fed and fairly well paid but I dare say that there are not enough persons learning the business in a thorough manner, in proportion to the glass put up,

WREATH OF LEUCOTHOE, HYACINTHS AND ROSES.

(Artist, Henry Morris, of Syracuse, N. Y.)

# THE S. A. F. AND THE SOUTHLAND.

## ASHEVILLE, THE CONVENTION CITY.

It appears that the northern idea of Asheville is somewhat indistinct and undefined. The S. A. F. convention of 1902 will not be held in a typical southern city, nor is that section of country at all like the sunny south, as most northern people picture in their imagination. Asheville is over 2,000 feet above sea level and fully 300 miles from salt water. We are on a broad plateau in the Blue Ridge mountains, the spot made famous as the "land of the sky." We have no sandy lands up here, neither do we grow cotton or cane. We have cold weather in winter and warm weather in summer, the same as you have in Chicago and New York, but we don't go to such extremes. The climate is equable and delightful, the nights are always cool and our hotels are patronized by the best class of pleasure seekers, both summer and winter. Our principal products are corn, wheat, oats and tobacco.

There are three commercial and one semi-commercial florists' establishments in Asheville. The Battery Park greenhouses have about 4,000 feet of glass, where they grow the bedding and decorative plants used in and around the Battery Park Hotel, besides some roses and carnations and very fine violets for the trade. Paul Embler is in charge of this place. E. E. Brown is proprietor of the Brownhurst Greenhouses on Oak street. He has about 6,000 feet of glass and grows a full line of bedding plants, also roses, carnations and violets.

Connelly's is a private place of about 4,000 feet of glass, but the gardener, Ernest Kerstein, sells what the family does not use. He grows carnations, bedding and pot plants and also the best violets ever seen in this city. The Idlewild Floral Company has 13,000 feet of glass, three houses of carnations, one of roses and two of miscellaneous stock. Some violets are grown in frames. They have quite a shipping trade with near-by towns, especially in South Carolina.

Another point of interest which will be shown S. A. F. visitors is the Biltmore nursery, about two miles south of town. Here are propagated all the plants used on the Vanderbilt estate, and also for sale. It is a very extensive establishment. Of course it is understood that this is a resort town and that our trade depends

almost entirely on visitors. In fact, Asheville without the health and pleasure seekers would be nothing but a mountain village.

As to what the florists of this section will do for the success of the S. A. F. convention, remains to be seen. It is yet too early to prophecy, but I believe that there will be a large increase of membership from the south. I have not learned positively that any from this section will make displays in the trade exhibition, but I think that we may depend on the Berckmans Company, of Augusta, and on James M. Lamb, of Fayetteville, to

south, and rapid improvement has been seen in the last few years. It is about 225 miles southeast of Asheville and the principal sea port south of Norfolk, with steamer lines to the seaboard cities and New York, also to Europe.

There are four florists in Savannah. Gus. Kiesling, who grows mostly pot plants and makes up funeral designs. He has no store in town and sells everything at retail from the greenhouses. The next is George Wagner, who has a store in the city and sells his products there. He grows pot plants and cut flowers and makes violets a specialty. A. C. Oelschig has one of the largest ranges of glass in the city and makes a specialty of rubber plants, of which he produces about 20,000 yearly, shipping them out of the city. He also does a general retail business, making up floral designs and doing a great deal of decorating. He has the contract by the year to furnish all the decorations in the De Soto Hotel, the largest in the city, a commodating 500 guests.

John Wolf is the youngest and one of the most progressive florists in the south. He is 31 years of age and has been in business only since 1895, starting with his few dollars of capital invested in hotbed sash. From this small beginning he has built up an establishment of 22,000 square feet of glass. He grows large quantities of bedding plants and also considerable quantities of cut flowers. Carnations are his specialty and of these the northern visitors will find many well-known varieties. Mr. Wolf,

thinks White Cloud the finest white carnation yet produced, and he grows them all to good advantage. He also grows American Beauty, La France, Perle, Wootton and Kaiserin among roses. Another of his specialties is lily of the valley, of which he has forced this season about 30,000 pips, shipping the stock mostly to near-by towns. This fall he will have about 4,000 chrysanthemums, 3,000 of which will be grown to single stem, and the remainder in 6-inch and 7 inch pots.

Mr. Wolf believes that bringing the S. A. F. convention to Asheville will increase the southern membership, and he has set the example by forwarding his membership fee to Secretary Stewart. All the florists of Savannah will be at Asheville.

ROSE HOUSE OF JOHN WOLF, AT SAVANNAH, GA.

JOHN WOLF, OF SAVANNAH, GA., IN HIS CHRYSANTHEMUM HOUSE.

show us something of their specialties. We are making every preparation for a large attendance at the convention and can assure every member of the society that he will be amply repaid for coming here in August. J. W. C. DRAKE.

## THE FLORISTS OF SAVANNAH.

Many northern florists who visit Asheville at convention time will undoubtedly take occasion to make a trip through contiguous territory in the south. This will bring them to Savannah, a typical southern city of 65,000 population, of whom about 40,000 are white, the others negroes. While Savannah was a metropolis in antebellum days, it is showing the progressive spirit of the new

### Spraying Outfit for Florists.

The appalling injury to fruit and shade trees in recent years by the attacks of destructive insects and the widespread agitation as to ways and means for subduing these pests opens the way for at least one enterprising florist in each community to add a safe and profitable department to his business. That an outfit similar to the one illustrated here-with will quickly pay for itself as soon as tree owners learn the value of its work cannot be doubted and several florists in the vicinity of Boston have already taken steps to equip themselves with complete spraying machinery preparatory to installing the new department of insect destruction as a regular branch of their business.

The outfit shown in the illustration is the one in use in the Boston park department and was constructed under the direction of Superintendent Pettigrew. The intent is to secure a solid stream that will break into spray at a distance of twenty-five to thirty feet away from the nozzle. This machine will operate three of such streams but two are as many as can be conveniently worked, as trees are not usually found within con-

ditions were furnished by the Chas. J. Jager Company, Boston. The tank was made by park department carpenters and cost \$70, and the apparatus was put up by the park machinists. The hose connections are at the rear, so arranged that the couplings can be easily reached by a hoseman standing either on the ground or on top of the tank. The safety rail around the tank is provided with hooks for carrying ladders."

This machine would operate ten or twelve of the ordinary Vermorel spraying nozzles, but of course their use from one tank would be impossible—work could not be found for them to do. The majority of trees in streets and gardens can be reached from the ground, by the use of such power sprays as represented in our illustration, and the remainder from a location probably thirty or forty feet up in the body of the tree. The machine, when pressed a little, is capable of throwing a stream sixty feet high.

### About Injurious Fungi.

When the rose grower notices the edges of the younger leaves of his plants curling and blister-like elevations appear-

ing, usually covered with a powdery substance, he knows that mildew is at work and proceeds forthwith to produce sulphur fumes in the house. Black spot may also appear and knowing that sulphur is not efficient here, he picks up all leaves that have fallen, removes affected ones from the plant and burns them, as well as ordering a general cleaning up about the houses. The remedies are sufficient. The diseases, however, are merely checked, not eradicated. No amount of fumigation will restore the shrunken, mildewed leaf or remove the black spots. These and numerous other diseases are the work of fungi and, while experienced florists are well acquainted with the cause and remedies, not all have stopped to investigate the "why."

A fungus is a plant, a plant without leaves, stems, flowers or seeds, but none the less a plant. A more important point of difference is the absence of chlorophyll in the fungus. Chlorophyll is the green substance found in the cells of higher plants, which enables them to transform the inorganic elements of air and soil into organic elements—plant tissues. As chlorophyll is the only known substance that will accomplish this, it follows that fungi must depend upon organic substances (plant tissues) for their existence. The various mushrooms and toadstools are fungi and, while these may appear to spring from the ground, they are always nourished by decaying organic matter present in the soil. Every plant affected with a fungus bears within its tissues millions of these microscopic plants, parasites, sucking its life blood.

The principal parts of a fungus plant are the hyphae and spores. The former are delicate, thread-like organs which grow either singly or in bundles, penetrating the tissues of the affected (host) plants and not only appropriate the food of the host, but cause a breaking down of the cells. Collectively the threads are termed the mycelium. This is the vegetative or growing portion of the fungus and corresponds to the stems and roots of higher plants. The spores are minute, dust-like bodies usually appearing on the surface of the affected plant. These spores perform the office of seeds and under proper conditions germinate and send filaments into the tissues of the

APPARATUS BUILT FOR SPRAYING IN BOSTON PARKS.

venient distance for three nozzles, with a machine that covers the ground so rapidly. The solid stream recommended may be somewhat wasteful of the spraying solution but the saving in time and labor will more than offset this loss. Mr. Pettigrew furnishes the following specifications of construction and cost of his outfit:

"Rectangular tank, made of 2-inch clear cypress. The dimensions are 12 1/2 feet by 35 inches by 1.45 feet. The capacity is 470 gallons. Mounted on common utility wagon drawn by horses. Engine and pump mounted on tank. The engine is one and one-half horse-power Fairbanks Morse, gasoline, No. 12835, with both ignitors; special tank base; six cell Acme dry battery; water tank and full equipment. The cost was \$160. The pump is 2 1/2 x 3 inches, figure 50, triplex, No. 12222, with special bronze plungers. Fitted with air chamber, and coupled to engine by a 5 inch Moore & White friction coupling with lever straps. The cost, including coupling, was \$172.75. The engine and pump are guaranteed to deliver, continuously, twelve gallons per minute, against a pressure of 110 pounds per square inch. The engine, pump and

plants on which they alight and thus perpetuate the species.

Fungi are of two kinds, those that feed on dead or decaying organic matter, like mushrooms, and those that feed on the living tissue of plants. The first named are termed saprophytes, the second, parasites. The parasitic fungi, at least those that concern the florist, may be classified first as "surface" fungi, or those that develop mainly on the surface of the host plant, sending short, root-like hyphæ through the epidermis or skin of the leaf to serve as feeders, as the mildew of the rose, the powdery substance on the leaves being evidence that these parasitic plants have matured and formed their fruits (spores) which may now be dislodged by syringing or other means and fall upon healthy tissue to begin afresh.

In the treatment of diseases of this class it will be evident that a thorough application of some fungicide, as sulphur fumes or a solution of liver of sulphur, the parasites being almost wholly exposed to its action, may be destroyed. In the second class, represented by the black spot of roses, the various spot diseases of violets and other plants as well as the carnation rust, the parasitic plants develop almost wholly within the tissues of the host plants, merely sending short branches to the surface, bearing the spores. These diseases then are more than "skin deep" and when they have once obtained a foothold, may not be eradicated by any amount of spraying any more than typhoid fever or smallpox may be eradicated by drugs. The remedy, if any, must be preventive in either case. The prevention may lie in maintaining

the plants or individuals in a high state of health or vigor, thus enabling them to withstand the disease, or else in the application of some substance that will prevent the entrance of the disease.

In the case of plants, this is accomplished by timely applications of Bordeaux mixture, carbonate of copper solutions or other fungicides to prevent the germination or growth of the spores that alight on the plants.

Spraying, however, is not in general favor with florists, nor indeed is it either necessary or desirable as a rule. We have well nigh absolute control over the conditions of heat and moisture at least, if not of light, and we should aim to make these conditions fit the plants.

Prof. Galloway in his excellent work on violet culture says: "Theoretically it will be understood that if the needs of the plant and the environment were exactly balanced, perfect growth would result. \* \* \* We cannot of course reach this ideal, but we can approximate it."

Too much moisture with a high temperature in the rose house, causes a rapid, soft growth; when this is checked by sudden changes, the ever-present spores of mildew find congenial and non-resistant medium on which to work and the disease is established.

The punctures on the leaves of carnation plants caused by insects, allow of the entrance of the spores of various diseases. Softening of the foliage of violets by tobacco smoke or water fits them for the ready reception of spot. It is probable that any cause that leads to the softening of the outer layers of the stems of carnation plants permits the

entrance of the mycelium of the fungus causing stem rot.

A close, moist atmosphere in the propagating house furnishes favorable conditions for the growth of the various fungi causing the damping off of cuttings. The spores or germs of the bacterial disease causing the black rot of geranium cuttings (and sometimes of mature plants) are ever present on the plants awaiting favorable conditions for development.

FREDERIC CRANFIELD.

## CARNATIONS.

### THE SEASON'S SUCCESSES.

Some last impressions as to the merits of the different varieties under trial the past winter, by various growers from different sections, together with their ideas as to the cause of success or failure of certain varieties would be of incalculable benefit to us for next winter's culture. Personally I have had but a few varieties under culture the past winter but in order to start the ball rolling will give my own experiences.

In white my signal success was with Queen Louise. It began flowering early in September and has not known a lazy moment since that time. The blooms have been the equal of White Cloud in size, substance and stem, in fact, better than I have ever been able to do that variety. The calyxes have not split to any extent, less than ten per cent, and altogether it is the best white I have tried for a number of years and shall be my main dependence for next winter's cut. I attribute my success with this variety to the fact that I grew it in a very stiff soil

with plenty of cow manure added and no other fertilizer, with the night temperature at as near 50° as possible.

Lorna up to January 15 was as fine a lot of grass as I have grown for some years. After that date it began to make some flowers and for February and March was very productive. The flowers were ideal in almost every respect and for the grower who can get it into full bloom for the holidays it is certainly a grand variety. My failure with this variety is an open question. It may be that benches instead of solid beds would have given better results, or possibly it did not like the stiff soil I used.

In pink Ethel Crocker is, of course, head and shoulders above every other variety, but as there seems to be but a half dozen growers in the country who can handle this variety it is hardly to be taken into consideration. Next to Crocker I find Dorothy a good and profitable sort. Early in the season it did not give so much promise, as the flowers were not my ideal, but with the season's returns before me it shows up much better and also shows that there is no use in any one grower thinking his idea of an ideal carnation is the correct one. The deep fibrillation, which was an objectionable feature to my mind, seems to be an object of beauty to others, and from every other point it is a good variety to grow. The flowers improve every day for a week after being cut, if they are cut as soon as open. The stem is about right for gracefulness and, like Queen Louise, the variety is always in bloom from September to July. It seems to require no special treatment, except to be pretty well led, and the temperature kept below rather than above 50°.

Genevieve Lord, in my solid beds, has proven a failure, as, beyond the fact that I get very good flowers on very good stems, their number is not nearly enough to make it a paying variety. A few Irene at the end of a house, with no particular treatment, gave a fair number of moderately good flowers and it certainly fulfils the claims of its introducers as to keeping qualities. It might be a valuable sort for some of the growers who have trouble in getting their flowers to market in good shape, and for long distance shipments.

Of light pinks I had but one on actual trial, and that was Morning Glory, a medium-sized flower but with an ideal stem and in point of early and continuous blooming it pretty nearly fills the bill. It is not a good keeper and has to be cut as soon as open in order to reach the market in its best shape. This was, perhaps, the fault of being grown too warm, as there was but a portion of a house. Next winter, with a full house of it, the temperature will be kept to 45° or lower and pretty liberal feeding given.

Elma is a fine large flower but grown in a cool end of the house, with not the best of light, it did not make a good stem nor enough flowers, nor did it keep any better than Morning Glory. With Mrs. Higginbotham for next winter and Enchantress to follow, it will hardly pay to experiment much in an attempt to get either of the above two to perfection.

Estelle so nearly fills the bill for scarlet that there is no need of any other unless longer stems are wanted, and then Crane can be grown. Estelle seems to give best results planted early, given good liberal feeding and a temperature of 50° to 55°. Adonis will of course supersede all others of its color but Estelle will be grown for some years by the man who wants quantity of bloom at a minimum expense.

Golden Beauty may not be the ideal yellow in every respect but the flower is so near old Buttercup with the habit 200 per cent better that it may be one of those that last. It seems to do well with any sort of treatment if kept at a temperature of 50°.

Gov. Roosevelt so well meets requirements among crimsones that there really seems no need of a better one for several years to come. It is productive from early in the season until late, and the flower is perfect in form, the stem perfect in strength and its keeping qualities far beyond the average. With liberal feeding and a temperature of 45° this variety seems to give the best results.

The only fancy sort on trial was Prosperity and it certainly is true to its classification from every point of view, grown, as I attempted to grow it, on solid beds in a temperature of 50°. It gave a small crop of flowers, pure white in the early fall and then produced nothing but growth until the first of April, with a full crop under way now. If I could get the crop that is coming now for the winter months it would pay, but with an average of less than a dozen flowers per week from 750 good, healthy plants from October 15 to April 1 there is no profit in it. Possibly grown on a bench it might have shown very different results. As a flower it certainly is worth the trouble of a little experimenting to get it to pay and next winter I shall try a few under different processes.

My successes are Queen Louise, Crocker, Dorothy, Morning Glory, Estelle and Roosevelt, not a very big list but one figured from a "dollar and cents" point of view. While I am as great a carnation enthusiast as the next one, they have got to pay me in dollars and cents if I am to continue in the business of growing them.

ALBERT M. HERR.

#### Chicago.

SPRING GLUT IS ON.—OUTDOOR MATERIAL FLOODS THE MARKET.—LILAC IN UNWIELDY QUANTITIES.—ROSES SHOW THE EFFECT OF WARM SUN.—MUCH GRADING NECESSARY.—CARNATIONS HARD TO MOVE.—RATES VERY LOW ON CLEAN-UP SALES.—STREET SALESMEN MISSED.—COMPARATIVELY FEW FLOWERS FOR PALMER FUNERAL.—PEONIA SEASON EARLY.—DEATHS IN THE TRADE.—DOINGS OF WHOLESALERS, GROWERS AND OTHERS.

Following a week of very good business has come the spring glut. It began on Monday morning and the end is not yet in sight. The turn to warm and bright weather has been largely responsible for the prevailing state of affairs, for all kinds of stock have come along at a pace which has been completely beyond the possibilities of the market. Shipping trade has fallen off, for all the outside points are supplied with outdoor spring flowers, and local buying has been very light for some time past. With the warm weather came a deluge of outdoor material from the south. Seldom have heavier shipments of lilac been received than in the past week. It has come almost by carloads and, where the first lilac met with excellent sale, the vast accumulation of the last few days has been practically immovable. In a great many instances it has not even realized express charges. All the other spring flowers have been in similarly augmented supply and they have crowded roses and carnations to the wall. Where it looked last week as though Beauties were shortening up sufficiently to warrant an early

increase in prices, they are now again so plentiful that they are well sold at considerably lower figures than have recently been quoted. The stock requires a great deal of grading to get out shipping material and these selected goods still bring fair prices, but the average is very low. The same may be said of all roses. The cuts have increased materially and qualities are deteriorating, so that things are about down to the summer level. Selected roses still bring from \$4 to \$6 per hundred, but the balance of the stock has to be jobbed off at any price it will bring. There are literally wagon loads of carnations in the market, a very large proportion of which are first-class stock; but they do not sell. The demand is not sufficient to consume anything like the quantity received in the last few days. The result is that clean-up sales of left over material are being made at from 10 cents to 15 cents a bunch. It is in this particular that the street fakirs are missed. Favored by such weather as that of the past few days, there is practically no limit to the amount of material they could sell on State street, but, while most of them are well situated in small or temporary stores, they cannot handle anything like the quantity of stock now that they are compelled to draw their customers indoors. There are still considerable quantities of bulbous stock about, because the outdoor cut is on, and there are, too, big supplies of violets and pansies which are difficult to move. The green goods market is also easier, smilax being fairly plentiful, adiantum likewise, and asparagus selling well, particularly Sprenger. The turn to cold Friday has served to shorten up supplies somewhat and restore normal conditions.

The leading retailers were mostly disappointed in the business created by the funeral of Potter Palmer, on Wednesday morning. Mr. Palmer was one of Chicago's pioneers, one of her best known and wealthiest citizens, and it was to have been expected that the floral tributes at the obsequies would make an extraordinary showing but, the family did not encourage a lavish display and the flowers were not numerous, although some very good work was done. Fleischman had the family order and made a very handsome casket cover, among other things. Friedman made a piece for Marshall Field, but Wienhoeber had rather the largest share of the work, being located near the Palmer residence. It was all work which required the very highest grade of stock but the quantity consumed made no appreciable impression on the supply in the market.

In an appreciative account of the J. D. Thompson Carnation Company and the new variety (Echaatress) recently acquired by that concern, we find the following, from the *Mercantile and Financial Times* of April 26: "The J. D. Thompson Carnation Company, by virtue of its strong financial stability and unsurpassed facilities for cultivation, occupies a position of conceded supremacy in the world of horticulture, and its newly acquired possession is merely a feature in a notable career. Moreover a notable element to the success of the organization is contributed by the capable judgment and rare discrimination of its president, Mr. John Lambert."

A. Kennicott says that the peonias are fully ten days earlier than usual this year. At his son's place at Carbondale they were cutting 300 dozen a day at the end of this week and next week they expect to be sending in at the rate of a

thousand dozen a day. The early blooms are very fine. At Mr. Kennicott's home place at The Grove the season is even earlier relatively than it is at Carbondale. It will necessitate carrying the stock a little longer than usual in cold storage.

E. A. Kanst announces that the American Rose Company, of Washington, D. C., has offered three prizes, \$100, \$50 and \$25, to be competed for at the autumn show of the Horticultural Society, for fifty cut blooms of the Ivory rose. It is required that the blooms be exhibited by the grower and must be from plants purchased from the American Rose Company or authorized agents.

Ernst Hertel died Sunday, May 4, at the family residence at 150 Clybourn avenue. He was 57 years of age, and the husband of Mrs. Auguste Hertel, under whose name they have conducted a very prosperous retail business. Peter Reinberg sent a handsome wreath to the funeral on Wednesday. Mrs. Hertel expects to continue the business as heretofore.

Louis Gregor, who was a partner of A. B. Everett in the Harms Park Floral Company, cut his throat with an ink eraser in the Wrightwood avenue station of the Northwestern Elevated Railroad last Saturday morning after having made an unsuccessful attempt to jump in front of a moving train.

The next meeting of the Florists' Club will be held May 14. It is expected that a paper will be presented on garden plants and spring planting and efforts are being made to get together a display of plants suitable for window boxes.

Geo. Reinberg has his new range of houses almost completed. The carnations are all in the field, many hundreds of thousands of them, and rose planting is progressing rapidly. His place is in very nice shape this spring.

E. E. Pieser says that the wreath is the fashionable floral design just now. He reports the call for frames for wreaths to be practically equal to the combined sale for all other designs in their wire department.

The Chicago office of the White Enamel Refrigerator Company is now located at 1260 Old Colony building. They are selling a great many florists refrigerators.

At E. H. Hunt's they say it is remarkable the way the carnation has sold all through the season. Its popularity seems steadily increasing.

Leonard Kill celebrated his thirtieth birthday anniversary May 7 and had the assistance of a party of friends at his home in the evening.

E. C. Amling is receiving some very fine cattleyas, C. Mossiae and C. Mendelii. They were in great demand for the Palmer funeral.

C. Paasch has sold his Lincoln avenue property to Neilsen & Son, but will continue his retail store at 224 Clybourn avenue.

The picnic of the employes of Vaughan's Seed Store has been postponed on account of the cooler weather.

Peter Reinberg has planted out eleven acres of carnations and has the stock for two acres more.

Reinberg & Weiland are sending up large quantities of sweet peas from New Castle.

Kennicott Bros. Company received the first pæonias of the season May 3.

C. W. Scott, of Vaughan's, is at home from a trip to the Pacific coast.

Visitors: A. C. Brown, Springfield, Ill.; J. A. Pettigrew, Boston; Alfred Dimmock, St. Albans, Eng.

#### Philadelphia.

CUT FLOWER TRADE BEGINS TO SHOW EFFECT OF DEPARTURE OF THE ARISTOCRACY TO SUMMER HOMES.—BEDDING PLANT BUSINESS EXCEPTIONALLY HEAVY.—ALL ABOUT THE PRICES.—THE CLUB MEETING.—SMOKERS PLANNED.—SILVER CUP SHOWN.—VARIOUS NOTES OF LOCAL DOINGS.

The May meeting of the Florists' Club had a rather slim attendance. Even the essayist of the evening failed to put in an appearance. A representative of one of the railroads to Asheville was present and spoke of how his company would care for the delegates if they would come their way. The fare from Washington round trip would be \$14, which, with the regular ten day round trip ticket from this city to the capital, \$6, would make the entire fare only \$20. The train leaving here Sunday evening will land passengers in Asheville the next afternoon. Adolph Fahrenwold placed on exhibition the Lord & Burnham \$250 challenge silver cup that he won at the national rose show in New York last March. It was much admired and will adorn the cases of the club, along with the other trophies for a little time. Mr. Fahrenwold thinks our meetings are not lively enough and moved that each one, or nearly all, adjourn into a smoker, which was endorsed by the club, and from now on things are to be different. As George C. Watson was absent in Boston the essay committee decided that for next meeting we are to have "What I saw about Boston," by the "sage of the Ginger Jar."

In the retail cut flower stores trade has commenced to fall off as already the shutters in the residence districts are beginning to go up and country homes are being occupied for the summer. Cut flowers are plentiful, Beauties being very much in evidence. They have to be sold and as a consequence the prices range low; \$1.50 to \$2.50 is the price for the specials. Teas are quoted at from \$4 to \$8. Carnations are still in fair demand but the prices are getting lower, as there are more coming in than the market will take; \$1.50 to \$2 per hundred is the price, with a very few bringing \$3. Violets have gone at last. Sweet peas now cut quite a figure and sell well, at from 50 cents to 75 cents per hundred for the pink and \$1 to \$1.50 for the white. Good outdoor valley is in and sells for from \$1 to \$2 per hundred.

The jobbing gardeners and bedding plant men are still at it all day and far into the night, trying to catch up with their orders. Prices for bedding plants are about as follows: Geraniums in 4-inch pots bring \$7 per hundred, with a few asking \$8. All other 4-inch stock runs about the same. Geraniums, fuchsias and so forth in 6 inch pots range from \$2 to \$2.40 per dozen. Plants in 2½ inch and 3-inch pots bring from \$3 to \$4 per hundred. Own root rose bushes in from 6-inch to 8-inch pots range from 20 cents to 40 cents each. Harris has some very choice Crimson Ramblers just coming in that sell at from 50 cents to \$1 each.

Harry Bayersdorfer saw a prospective customer the other day. He had a bundle of flowers and a package of moss and wanted a wire frame. He was scared out when asked if he was in the trade, as Harry says it is a rule of the house never to sell to anyone outside of the trade.

John Westcott and George C. Watson were both missed at the club meeting. John was at Waretown, where the fish-

ing season will soon open, and George is looking up his customers in Boston.

Now is the time to give orders for bulbs for fall delivery and don't fail to impress it on the mind of the dealer that the bulbs must be in a thoroughly ripened condition before they are shipped.

#### New York.

TRADE SITUATION REMAINS WITHOUT CHANGE.—STOCK MOVING SLOWLY.—PEAS AND VALLEY THE MOST LIVELY ITEMS ON THE LIST.—FLORICULTURE LOSES A FRIEND IN THE DEATH OF CONGRESSMAN CUMMINGS.—NOTES OF PERSONAL AND TRADE DOINGS.

The late Amos J. Cummings was a great lover of flowers and was very fond of the society of flower cultivators. He was a staunch friend of the Society of American Florists and when that organization applied for a national charter he took the matter up with characteristic zeal and the assistance rendered by him in securing this, almost the last piece of legislation to which President McKinley affixed his signature, was indispensable. Recognizing the indebtedness of the florists of the United States to Mr. Cummings it was thought fitting that the S. A. F. should be represented by a floral tribute and so a handsome standing anchor was sent with the card of the national society attached. W. R. Smith, who was a devoted friend of the deceased congressman, came on from Washington with the funeral party.

The situation in the general cut flower trade remains about the same as last reported, certainly not improved and if changed at all it is for the worse. The strongest items on the list are lily of the valley and sweet peas, both of these moving in fairly satisfactory manner. Weddings are unpopular in May and so this very useful outlet for choice flower stock is not available at present but the steamer trade makes up in part for the loss. Outdoor lilac is a popular flower on the street but the quantity being received is hardly sufficient to affect the general flower demand to any great extent.

The New York Florists' Club will hold its regular meeting on Monday evening, May 12, notwithstanding that it is temporarily homeless. Unless the trustees shall have succeeded in securing a new meeting hall in the meantime the meeting will probably be held in the store of President Sheridan, 39 West Twenty-eighth street.

W. H. Gunther is having his store at 30 West Twenty-ninth street remodeled and an entire new front put in. It will be a great improvement and will afford a much larger area.

Geo. Golsner, of College Point, is bringing in a heavy crop of very nice Ulrich Brunner roses at present.

THE American Association of Botanists will hold its annual convention at Pittsburgh June 28 to July 3.

MASON CITY, IA.—A. L. Wheeler, of the Wheeler Floral Company, is planning to add to his facilities this season by building three new houses, two 20x42 and one 25x42.

SPRINGFIELD, MASS.—Business the past week has been rather slow. There has been very little doing in funeral work and very little in society. Aitken had two wedding decorations the last week and has a good one booked for the coming week.

A. B.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—8 times, 5 per cent; 13 times  
10 per cent; 28 times, 20 per cent;  
52 times, 30 per cent.

Cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THE price of glass has been advanced  
again about ten per cent, within the  
week.

ROSE growers are replanting at least  
a portion of their houses earlier and  
earlier each year.

THE death of Eugene Verdier, the well  
known French rose grower, is announced.  
He was 75 years of age.

THE Florists' Hail Association is rapidly  
approaching the 16,000,000 feet  
mark and is paying losses with its usual  
promptness.

THE Massachusetts Horticultural Soci-  
ety has assets of \$840,283.37, according  
to the annual report of Treasurer Charles  
E. Richardson, just issued.

WHILE the anticipated demand for  
bedding plants, particularly geraniums,  
is developing, don't put the prices so  
high that customers will hesitate.

THE Yellow Timothy Eaton chrysan-  
themum is the equal of its parent in bold  
decorative effect and a high commercial  
standing as a cut flower is predicted  
for it.

IT is a good time now to root crotons,  
just before you stop firing. Queen Vic-  
toria, Baroness Rothschild, Andreanum  
and Fasciatus are among the best all-  
around sorts.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

AMONG the meritorious novelties is an  
ever-blooming and ever-fruiting straw-  
berry. Robert Craig, who is growing  
it, recommends it, pot grown, as an  
effective center piece for a dish of straw-  
berries on the table.

### Gerbera Jamesoni.

There have been many inquiries with  
regard to the cut blooms of Gerbera  
Jamesoni, but A. Herrington, of Florham  
Farms, Madison, N. J., who has quite  
a large stock of the Barberton daisy in  
cultivation, says that he has not sold  
any flowers, although a leading New  
York retailer offered him \$25 per hun-  
dred for all his cut. The flowers have  
thus far been used for exhibitions at the  
various florists' clubs. Mr. Herrington  
raised about 4,000 young plants last  
year and sold them to the H. A. Dreer  
Company, of Philadelphia, who will also  
get this season's lot of young stock.

### The Only Way.

ED. AM. FLORIST:—Enclosed is my  
renewal of subscription. Reading your  
paper is about the only way I can keep  
up with the times. WM. WEAVER.  
So. McAlister, I. T.

### Greenhouse Building.

East Mansfield, Mass.—W. A. Staples,  
two vegetable houses 150 feet long.

Waukesha, Wis.—Robt. Schneck, two  
houses.

Milwaukee, Wis.—H. W. Koerner,  
range of houses.

Ilion, N. Y.—Hakes & Son, house  
15x100.

Fall River, Mass.—L. J. Lawton, house  
19x50.

Edgewater Park, N. J.—Jos. Gill, con-  
servatory 21x60, one 15x50.

Montgomery, Ala.—St. Joseph's Col-  
lege, conservatory 20x50.

Altoona, Pa.—Myers Bros., range of  
houses.

Butler, Pa.—Mrs. Holt, one house.

Burnham, Me.—Fred. Fletcher, one  
house.

### To Destroy Slugs or Snails.

ED. AM. FLORIST:—Can you tell me  
how to destroy slugs, or snails, as some  
growers call them? They look some-  
thing like snails but have no shell.

N. E. B.

One of our readers states that he keeps  
toads in his greenhouses to keep down  
snails and other night raiding pests;  
another scatters lettuce leaves, sliced  
potatoes or sliced apples about the  
benches and catches the snails while feed-  
ing after dark, or under the bait the next  
morning, another uses bran as bait, plac-  
ing it about on pieces of board, and  
another finds that camphor balls, such  
as are used for keeping moths out of gar-  
ments, scattered about among the plants  
will either kill the snails or drive them  
away.

### Carnations for Indoor Summer Culture.

ED. AM. FLORIST:—Of these carnations,  
White Cloud, Flora Hill, G. H. Crane,  
America, Mrs. Lawson, Frances Joost  
and Marquis, which will do best planted  
in the house in June? G. F. M.

If I had this list to select from my per-  
sonal experience would make me decide  
on The Marquis, for I firmly believe that  
this is the only way to get the best results  
out of this carnation, which, if given  
proper attention, will produce fancy,  
high grade flowers clear through the sea-  
son. After Marquis I would recommend  
Mrs. Lawson, which is also a good one  
for this purpose. Of the other varieties  
Flora Hill is a good white for early work  
from the first of March on, but it is  
rapidly being outclassed. The same can  
be said of nearly all the other varieties.  
I would therefore advise the Marquis and  
Mrs. T. W. Lawson as the most suitable  
for indoor culture.

CHAS. W. JOHNSON.

### The Street Stands.

Newspaper stands at street corners are  
a public accommodation. So are flower  
stands. There is no other civilized com-  
munity which prohibits flower-selling  
wherever their sale violates no public  
right. The little flower shows of even  
the moldy cities of old Mexico are among  
their most precious charms. The flower  
markets of London, Paris, Vienna,

Berlin, of every cultivated municipality  
in old world or new, constitute an index  
to the taste and refinement of the people.  
Only crudity, avarice or corruption can  
wish to rob the streets of Chicago of the  
enlivening dashes of color which little  
flower shows lend to our begrimed thor-  
oughfares. The florists ought to wel-  
come, not to oppose, the curbstome  
flower sales. Taste for flowers grows  
with familiarity. Every florist will find  
his counter trade increased by the curb-  
stone sales.—Chicago Chronicle.

### Cutting Back Solanums.

ED. AM. FLORIST:—I have some Jeru-  
salem cherries (solanums) left over from  
Christmas. The plants are in 5-inch  
pots, and if cut back low, I wish to know  
whether they will branch and produce  
enough berries to be salable for next sea-  
son, either planted out or grown on in  
pots? SUBSCRIBER.

The solanums in question may be cut  
back as suggested, and after they start  
to grow may be planted outdoors for  
the summer, where they will make much  
better progress than would be made in  
pots. It is probable, however, that  
young stock of this season's crop will  
prove more satisfactory than the plants  
that have been cut back, and I should pre-  
fer to depend on the young plants from the  
fact that they will grow away more  
freely, are less liable to become infested  
with insects, and will probably lift in  
better shape in the autumn.

W. H. TAPLIN.

### Foliage of Violets Turning Yellow.

ED. AM. FLORIST:—I send you by mail  
under separate cover a violet plant which  
within the past month has turned almost  
yellow. Out of 1,500 plants, about  
twenty-five are starting to turn yellow.  
All the plants have been grown some-  
what on the dry side. Please state  
cause and remedy. E. E. P.

A careful examination of the plants  
sent in by "E. E. P." show a little bud  
nematode and a great deal of botrytis,  
or bud or heart rot. It is not probable,  
however, that the botrytis has anything  
to do with the yellowing, which is prob-  
ably due to some unfavorable soil condi-  
tion. However, not enough soil was  
attached to the roots of the plants to  
enable us to judge anything in regard to  
its favorable or unfavorable condition.  
A lack of iron will cause yellowing, as  
will also an excess of lime or other alkali-  
line salts. If "E. E. P." will furnish a  
detailed statement relative to soil and  
other conditions it is possible that the  
trouble can be diagnosed.

ALBERT F. WOODS.

### Best Carnations.

ED. AM. FLORIST:—I am building a  
house 16x60 for carnations and, as I am  
a young man of little experience in this  
branch, I should be pleased to have your  
advice as to the best sorts, red, white,  
pink, yellow and striped, as all-around  
winter bloomers to grow in Arkansas in  
a temperature of from 56° to 60°.

J. H. K.

I would suggest as the best varieties  
for a beginner in most sections of the  
country, and I presume this would cover  
Arkansas, for pink, Frances Joost and  
Mrs. Lawson; for white, Queen Louise  
and Lorna; for red, G. H. Crane; for  
striped, Mrs. Bradt, and for yellow no  
one knows, as they are all an experiment  
up to this date, with the odds in favor of

Golden Beauty. These are, with the majority of growers, fairly sure of success and there is less risk in handling these varieties than some of those that might be termed higher class. When it comes to making a selection of the latter class there is no one grower can give intelligent advice to another, for it is entirely a matter of experiment with each grower as to what will pay in his soil and for his market.

ALBERT M. HERR.

#### Damping Off of Lettuce.

ED. AM. FLORIST.—I have some Boston Market lettuce planted in cold frames during March and now nearly ready to cut, but they are damping off, at the root, just above the soil. I enriched the frames last fall with pure, well rotted cow manure, adding a little air-slaked lime. Can you tell me the cause of the trouble?

ALEXANDRIA.

There are a number of diseases of lettuce known under the general term of "damping off" diseases, but from the information contained in the query I would judge that the disease referred to by "Alexandria" is the one properly called "damping off." It is caused by the attack of a fungus, which grows most rapidly in a moist, warm atmosphere, and is particularly encouraged by watering the plants in the evening, as there is then very little ventilation during the night. This fungus is quite abundant in many of our soils, and needs only suitable conditions in order to attack the plant.

We cannot suggest any very practicable remedy, but it is well known that steam sterilization of the soil will largely prevent it, where this may be done with profit. It is a matter of some expense to sterilize all the soil which may be used in a lettuce bed, but some of our growers are adopting this method as the only safe plan when once the houses and soil have become infested with this fungus parasite. It has been supposed that air-slaked lime is also a remedy for this disease, but we have found it to be only partially successful.

B. M. DUGGAN.

#### Honoring the Dead.

In this country it is customary to honor the dead by placing flowers on the graves. In China a plate of rice is used instead of flowers, and this led to a rather interesting piece of repartee recently between a British tar and a Chinaman. Noticing the latter putting a pan of rice on a friend's grave, the tar inquired when the man was likely to come up and eat it. This query elicited a reply to the effect that the man would come up and eat his rice at the same time that the man came up to smell the flowers which the tar was in the act of depositing on an adjoining grave.—*Gardening World.*

#### SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By competent florist, as grower of cut flowers, palms, ferns and orchids; 21 years' experience; private or commercial; married. Florist, care Am. Florist.

**SITUATION WANTED**—As foreman and grower of cut flowers and plants. Have been foreman with prominent florists around Chicago for a number of years. Address Florist, Box 54, Hinsdale, Ill.

**SITUATION WANTED**—By rose and carnation grower, to take charge of section; 10 years' experience; married; 25 years of age. Ohio or Illinois preferred. State wages when answering. Address Grower, care American Florist.

**SITUATION WANTED**—By practical florist and gardener; can grow roses, carnations, 'mums, violets and all kinds of bedding plants; 11 years' experience; private place preferred. Best of references. Address S H, care Am. Florist.

**SITUATION WANTED**—By a good, practical florist; 20 years' experience growing roses, carnations, chrysanthemums, etc., pot plants, design work; married. Good references. W. F. NORTH, 4849 Chestnut St., Philadelphia.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

The price of rape seed is lower now.

VISITED CHICAGO: G. C. Eldering, of W. J. Eldering & Son, Overveen, Holland.

ONION set fields about Chicago have improved with the recent damp and cooler weather.

THE banner day of the season at Vaughan's Seed Store, Chicago, was Saturday, May 3.

THE scarcity of good seed corn seems to have caused buyers to cover their needs early, the demand having slackened.

REPORTS reach us to the effect that the white Roman hyacinths show disease and that prices have advanced considerably.

THE catalogue mail trade was not quite up to the mark during April. The average of this branch of the business, taking the season as a whole, is reported generally satisfactory.

A. DIMMOCK, the genial representative of Sander & Co., informs us that an eastern grower has a new giant form of the common calla which will cause a sensation when introduced.

THE business of the Missouri Valley Seed Company, St. Joseph, Mo., demands more spacious quarters and plans are being drawn for a four or five story building with all modern improvements.

NOT many onion sets were carried over, but at no time during the season were prices over \$1.75 to \$2, while at the close the figures went down to about the moderate rates of January, \$1.40 to \$1.65.

ADVICES of April 29, from Bermuda, show that the appearance of the lily fields is much better than for seven years. If a repetition of the dry weather of last May and June is not experienced, a crop of good bulbs is anticipated, but not a very large one on account of the small quantity of stock planted.

Japanese Longiflorum Lilies.

Concerning the forcing of these bulbs, to which some reference was made in our issue of May 3, pages 548 and 554, two vital questions are before the florist grower. First, will the digging of the bulbs only when fully ripened in Japan insure certain freedom from blind, crippled, stunted or diseased plants, if rightly grown? Second, will this delay for the natural ripening of the bulbs be overcome by more rapid growth later and secure Easter results?

It will be a great financial loss to the florists of this country if either of these questions be decided in the negative.

American Seed Trade Association.

J. E. Northrup, president of the American Seed Trade Association, and L. L. May, of St. Paul, met with Chairman Wallace G. Nye, of the Commercial Club convention committee, May 3, to consider arrangements for the national convention of that body, which will be held in Minneapolis, July 24 to 26. An

attendance of about 150 members is expected.

Mr. May wishes that they be given a day in St. Paul during their visit, where they will be entertained as his guests. Mr. Northrup and the club convention committee will arrange later for their entertainment while in Minneapolis.

Minneapolis.

BUSINESS CONTINUES FAIR AND STOCK PLENTIFUL.—MARKET CLEARING UP WELL EACH DAY.

Trade in general has not shown much change in the past week, there being no social functions of note except on Wednesday, April 23, the Pillsbury-Ayer wedding which was a very elaborate affair, and called for many of the choicest blooms. Stock is averaging good, considering the season of year, and demand is fairly brisk. Tea roses are bringing from \$2 to \$4, and \$6 for the select, while Liberty is commanding as high as \$8 per hundred. Carnations average from \$1.50 to \$2.50 per hundred and quality could be better. Bulbous stock is not in surplus, and sells out clean. Good Beauties are scarce, while from the looks of the few Greek flower stands, the short stock is plentiful.

The new ice box recently erected by Wm. Donaldson & Company is the finest we have seen. It is 20x6x9 in dimen-

sions, having solid glass doors and French bevel mirrors. The ice, of which it holds three tons, is manufactured on the place. C. F. R.

Santa Ana, Cal.

UNITED STATES TAKES UP THE WORK OF STUDYING PLANT DISEASES AND CROP IMPROVEMENT ON THE PACIFIC COAST.

The United States Department of Agriculture, Bureau of Plant Industry, of which Prof. B. T. Galloway is chief, has undertaken the study and treatment of the more important diseases affecting the crops of the southwest and the improvement of fruits, flowers and vegetables by cross-fertilization, selection, budding, grafting and pruning. To this end the Pacific Coast Laboratory has been established here with Prof. Newton B. Pierce in charge and P. H. Dorsett assistant. In addition to vegetable pathological and physiological investigations they will concern themselves with the introduction and test of rare and valuable seeds and plants from other countries.

TIFFIN, O.—Lewis Ullrich is preparing to build a new office at his greenhouse and otherwise improve his facilities.

ONEIDA, N. Y.—J. C. Grems is building an addition 14x40 feet at his greenhouse on Spring street. It is for rose growing.

HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.

## THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.  
R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
Twenty-seventh annual convention, Milwaukee,  
Wis., June 11-13, 1902.

THIS has been the best season on record for the sale of ornamental nursery stock.

STOCKS of cherry trees have seldom been so completely exhausted as at present, according to western nurserymen.

THE U. S. Agricultural Department is encouraging the planting of *Catalpa speciosa* in the west, largely because of its rapid growth.

THE Boston park department is using Bowker's Disparin largely in its spraying work in combatting insect enemies, particularly the elm leaf beetle.

L. A. GOODMAN, secretary, in the May 1 crop report of the Missouri State Horticultural Society, estimates apples as promising sixty per cent of a crop. The summer meeting of the society will be held at Edon, June 10-12.

P. S. PETERSON, of Chicago, has conveyed to his son, William A. Peterson, for a nominal consideration sixty acres of land at the southeast corner of Bryn Mawr avenue and North Fortieth avenue, contiguous to Rose Hill Nurseries. The revenue stamps affixed to the instrument indicate a value of \$122,500.

THE city of Cambridge, Mass., spent on its park system during the year 1901, \$136,270 29. The report of the commission recently issued emphasizes the fact that Cambridge has, as yet, no ready access to any portion of the state reservations or neighboring Boston park system, although Cambridge has spent more money on public reservations than any other city in the district, excepting Boston.

Boston.

CUT FLOWER INDUSTRY LANGUISES.—ALL STOCK HARD TO MOVE.—CARNATIONS THE ONLY ITEM IN ANY SORT OF A DEMAND.—OUTDOOR WORK VERY HEAVY.—AUCTION SALES NOT BRISK.—NOTES OF PERSONAL AND OTHER DOINGS.

The cut flower business seems to have been brought up with a short turn since the first of May. Whatever may be the reason, certain it is that the atmosphere has suffered a big drop in the vicinity of the markets and wholesale houses and if it were not that we yet have Decoration day and the weddings and commencements of June still on the list it might easily be believed that the end of the season had come. A certain wholesaler on being asked a question as to the state of the market this week replied vigorously thus: "I'll tell you just how it is: The Beauty can't walk; the Queen of Edgely has a sore foot; the other roses have got it in the neck; violets are a dead issue; smilax, which went at a 2:10 gait two weeks ago, can't trot a mile an hour to-day and the only thing in the field that is holding its own is the carnation, so what are you going to do about it?" Roses in several varieties are beginning to come in now from the cold houses. They are sturdy and make the stock that has been steaming over the pipes all winter look very careworn indeed. The plant trade continues to monopolize the attention of the suburban brethren and is very brisk in all departments. At the auction sales, however, there is considerable difficulty experienced in placing the heavy consign-

ments of Holland tree and shrub stock that are received.

The report of the treasurer of the Massachusetts Horticultural Society, just received, for 1901, shows that the net surplus of the society amounts to \$789,728 94, of which \$515,997 36 represents the valuation of the real estate estimated on a very conservative basis.

Harry Green, who keeps a flower stand at the entrance to Music Hall, is credited with having made a sensational capture of an athletic thief who bolted with a tray of diamonds from a Tremont street jewelry store last Saturday.

John Woodbury, secretary of the Metropolitan Park Commission, delivered an interesting lecture at the Boston public library last Monday evening on the subject of water parks.

Edwin Ginn has purchased the beautiful estate at Winchester, known as Rangleley for the sum of \$160,000 and will have it developed into a public park.

J. A. Pettigrew has gone on a visit for about ten days to Chicago.

Cincinnati.

STOCK PLENTIFUL BUT NOT OF HIGH QUALITY.—TRADE FAIRLY ACTIVE.—DOINGS OF GROWERS AND OTHERS.—VARIOUS NOTES.

Business, considering the very warm weather for the past week, is good and stock is plentiful, but deteriorating in quality. Roses are beginning to come smaller and the same may be said of carnations. Sweet peas are coming in more abundantly. There are plenty of long-florum lilies around town, which, owing to funeral work, clean up pretty well every day.

Mrs. H. A. Kresken and her daughter, Ada, are arranging their affairs with the intention of taking a trip to Europe this summer. Mrs. Kresken's health is not the best and the doctor says a rest is what she needs.

A call at Gus. Adrian's shows his place to be in fine shape, with an elegant stock of bedding plants. He is having plans made for a fine new dwelling, which he contemplates erecting this summer.

Our genial park superintendent, B. P. Critchell, is receiving a great deal of favorable comment in the daily press these days. Be careful "B. P." or Chief Deitsch will grow green with envy.

Miss Cronin, of Covington, is contemplating a trip to Paris this summer.

D.

SPRINGFIELD, MASS.—On May 2 F. Schuyler Mathews addressed the Amateur Horticultural Society on "Harmony of Color Among Flowers." It is Mr. Mathews' color chart which is the standard of color for the florists of both the United States and Europe. The chart is published by the American Florist Company.

PROVIDENCE, R. I.—S. H. Manchester, Farquhar Macrae, N. D. Pierce, F. P. Hunt, Wm. Hill and J. E. C. Farnham are the exhibition committee of the Rhode Island Horticultural Society, which has just issued premium lists for the June rose and strawberry show and the chrysanthemum show November 13 and 14. The latter exhibition will include carnations, orchids and miscellaneous plants, also fruits, fresh and preserved.

**CLEMATIS Large Flowering**  
in 10 choice kinds, two year, pot-grown, in assortment, not too many of one kind. \$2.00 per dozen; \$16.00 per 100.

## OUR PASTIMES.

Announcements of coming contests or other events of interest to our howling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kilt, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

## At New York.

The regular practice games of the bowling club last Monday evening resulted as follows:

Player	1st	2d	3d	4th	5th
Hafner.....	174	174	165	146	157
Siebrecht.....	156	128	140	131	141
Lang.....	170	199	191	180	168
Burns.....	112	172	193	155	175
Thielmann.....	137	164	167	153	167
Traendly.....	147	116	163	125	137
Smith.....	112	110	99	147	
Elliott.....	96	114	150	154	

Frank Traendly offered a handsome gold pin as a prize for the best aggregate scores in the last three games rolled, each player being given a handicap according to his known proficiency. The result, with the handicaps added, was as follows, Mr. Burns, who had a handicap of fifteen pins for the three games, winning out by only one pin:

Burns.....	538	Thielmann.....	487
Lang.....	537	Traendly.....	470
Hafner.....	498	Siebrecht.....	457
Elliott.....	493	Smith.....	386

## Detroit.

TRADE SHOWS NO UNUSUAL FEATURE.—INDUSTRY NOW ABOUT AT THE SUMMER LEVEL.—OUTDOOR TRADE HEAVY.—DOINGS AT BELLE ISLE.—VARIOUS MATTERS OF INTEREST TO THE CRAFT.

No extraordinary feature is apparent in trade at the present time. An abundance of roses, which are good, is everywhere to be seen, while carnations are still considerably off crop, but those available are of excellent quality and no reduction of price on them is yet felt. The approaching warm weather is fast diminishing the supply as well as the size of violets and very little bulbous stock is now to be had. Smilax is very scarce and has been for some time past. Interest is daily increasing in outdoor planting and an increased demand for small shrubbery and perennial stock is very noticeable. Bedding plant trade is expected to be better this season than ever before.

The new horticultural building and aquarium to cost \$150,000 is being built on Belle Isle. Three houses were erected last fall each 20x100 feet and three more are to be built during the coming summer each 20x125 feet. The Yarian system of heating will be adopted for the whole place. Already 40,000 plants are ready to be planted throughout the park system, exclusive of 400,000 pansies, the most of which are being planted on Belle Isle.

The club meeting Wednesday evening was well attended, the keenest interest being shown by all in a paper read by E. Oestreicher on "Trials and Troubles of the Florist's Employee." A lively discussion followed, participated in by many of those present, both employers and employes.

Fred. Lempke, son of F. W. Lempke, the Moran street florist, died Sunday morning of appendicitis. The deceased was 29 years of age. His body was cremated Wednesday. The Florists' Club, of which he was a member, adopted suitable resolutions and sent an offering of flowers to the family.

Charles Distelrath, who has been employed by different florists of the city for the past eight years has purchased a piece of ground near Mt. Olivet cemetery where he will soon erect greenhouses. As there are no other florists in that vicinity his prospects for trade there seem very bright.

Hugo Schroeter goes to New York this week to enter the employ of H. A. Siebrecht & Son's retail department.

## Cleveland.

GOOD WEATHER FAVORS THE CARNATIONS FRESHLY PLANTED IN THE FIELD—ALL THOUGHTS NOW CENTERED ON SPRING STOCK.—BUILDING OPERATIONS WELL UNDER WAY.

Practically all the carnation planting is over and everybody feels happy, as the past week has been a favorable one for young plants, with plenty of warm rains to help them. All thoughts and energies are at present concentrated on spring stock. Easter coming as early as it did, gave the plantmen a chance to get their stock in good condition for spring sales. Graham, Hart, Schmitt and F. Anl have exceptionally fine lots of spring stock, especially geraniums. Hart has his usual supply of his famous 5-inch plants which readily bring \$2 50 per dozen at retail. He considers Mme. Barney and Edith Perkins two of the best pinks for bedding. Edith Perkins does best in a heavy clay loam. Barney is just the opposite, requiring a very light soil to make it do well.

Building has commenced in earnest. The J. M. Gasser Company has the posts up for six houses, four 300 feet long, one 200 feet and one 150 feet. The F. R. Williams Company has started to remodel a number of its old houses. Others are waiting until after Memorial day to start in.

ECHO.

## Washington.

PLANS OF AN ALEXANDRIA CROWER.—NEW HOUSES.—TRADE FAIR AND STOCK PLENTIFUL.

C. Ponnet & Company, of Alexandria, Va., have opened a store, the first one in Alexandria, at 529 King street, and have had a fairly good trade this spring. At the greenhouses, 2012 Duke street, they have a fine stock of young roses for planting in the houses. They will use this year about 4,000 Bride, Bridesmaid, Golden Gate and Mme. Chateauay. They are making preparations to build four new houses, two 25x112 and two 10x112, having the glass already on hand.

Trade is fairly good and stock plentiful, especially carnations and sweet peas. Some of the florists made quite a number of fine designs for the funeral services at the capitol for the late Hon. A. J. Cummings. There was quite an array of flowers.

P. G.

STOCKBRIDGE, MASS.—The Laurel Hill Nurseries, encouraged by the widespread demand experienced this spring, will go heavily into the best novelties in pæonias, irises, pyrethrums and other specially desirable hardy perennials and choice native shrubbery.

WEST CHICAGO, ILL.—Otto Haupt, gardener for the Northwestern, is practicing a new style of gardening along the road's right of way just outside of Chicago. Lawns being made over the embankments on both sides of the track and vines are being planted to cover the fence.

## The Chicago Market.

Warm weather has brought on abundant supplies of seasonable stock and the market is somewhat unsettled in consequence, but trade is good and those who cannot afford to be disappointed are advised to send their orders to the Kennicott Bros. Co. Their resources are the greatest in the market and they never disappoint if the order reaches them enough ahead of train time to let them get the box to the depot.

It is remarkable the way the shipping business in this market has grown the past few years. It is so big that all the express companies have special wagons to handle the flower shipments and hundreds of boxes go out each day. The Kennicott's were the pioneers in this trade and have always done the largest share of the shipping business. They began by seeing that every customer got satisfaction on every order; seeing in the first place that nothing went amiss and being prompt to make it right if anything unpreventable happened. That's the policy that built up their business and it's the policy that keeps it up.

Another thing is that the Kennicott's always bill stock at market rates. If the market weakens they give out of town customers the benefit, no matter what the price list may say. For that reason it hardly pays for them to issue a price list; buyers don't look for it, for they know that the stock will come billed at the same rate paid by city retailers for the same grade of goods.

Spring is always one of the Kennicott's busiest seasons. The receipts of roses and carnations are tremendous then and spring flowers, too, are a big item. Through long years they have come to be regarded as PÆONIA headquarters, and this is always an important flower for Decoration Day, June weddings and school closings. The pæonias have already begun coming in in small quantities, and in a few days there will be plenty of them. You can order pæonias of Kennicott's right up to Fourth of July and always get prime stock. It promises to be better this year than usual.

Westerly, R. I.

REUTER PLACE ONE OF MANY INTERESTS.—  
CARNATIONS NOW THE PRINCIPAL CROP.—  
GOOD GROWERS IN CHARGE.—A BRANCH  
IN CONNECTICUT.

S. J. Reuter's greenhouse establishment has been considerably enlarged since I last visited it, some two years ago. A modern range of some forty houses is, indeed, an interesting place to visit. What is especially noteworthy is the perfect system and order obtaining throughout, every section being under the care of a competent man. Thus G. A. Koenig, for a number of years with Nanz & Neuner, of Louisville, Ky., takes charge of the rose houses, while Jos. Renard, a skilled grower from Chester county, Pa., presides over the carnation range, the result being splendid stock and in paying quantity. While roses were always Mr. Reuter's specialty and while still devoting eight large houses to their cultivation, carnations constitute the bulk of the stock grown. Twenty-five houses are given to this flower and a finer, cleaner or more vigorous stock it would be hard to find. I need not enumerate the varieties grown; suffice it to say that no hack numbers are found here. Mr. Reuter's own seedling, the one he purchased from J. Pond, of Foxborough, Mass., the introducer of the well known Mrs. Fisher carnation, promises to attract a deal of attention next season, when it will be put on the market. Lillian Pond is a fine commercial variety, the flowers being of a pure, glistening white, averaging three inches in size, with a fine stem, fragrant, early and continuous. Like Mrs. Fisher, one of its parents, it is a fine bloomer in the field and will yield quantities all through the summer months.

The Spaulding greenhouses at New London, Conn., since they came into the possession of Mr. Reuter, have been somewhat remodeled and improved. W. S. Phelps, of South Framingham, Mass., has charge of the place and things about the establishment show the result of good care. A fine and well appointed flower store at Main and State streets is one of Mr. Reuter's additional acquisitions. NOMIS.

LAKE GENEVA, Wis.—George L. Holmes has left here for Monticello, Ill., where he will take charge of R. Allerton's place.

MILWAUKEE, Wis.—Herman W. Koerner, 1175 Kinnickinnic avenue, has bought fifteen acres of land about two and one-half miles west of the city and will at once begin the erection of a large range of glass for roses and carnations. He also intends growing ornamental nursery stock, hardy perennials and so forth.

## Orchids!

Arrived in excellent condition: Cattleya Skinneri, Peristeria elata (Holy Ghost Orchid), also Cattleya Dowiana and a number of Dendrobiums. Write for our illustrated and descriptive catalogue of orchids.

San Francisco.

STOCK VERY PLENTIFUL AND PRICES GENERALLY LOW.—BUSINESS STILL FAIR.—NOTES OF VARIOUS DOINGS AMONG THE GROWERS AND RETAILERS.

Continued warm weather is bringing along the spring crops and flowers are now to be had in any quantity and at any price. White carnations, especially, have dropped in price and can be bought for from 10 cents to 20 cents per dozen. Scott and Portia are the same, but fancies continue at from 35 cents to 50 cents per dozen. Roses are also plentiful but the chances are that both these items will be scarce for Memorial day. Sweet peas have held their price at from \$2 to \$2.50 per dozen bunches of seventy-five flowers, and lilies have gone up a little, to \$2.50 per dozen stalks. Business continues to be good.

The Misses Warren had the decoration for the wedding of Miss Huntington and G. B. Perkins, more than 100 dozen stalks of lilies being used, besides thousands of carnations, roses and other flowers.

Ferrari Brothers have finished their new range of eight houses and commenced to stock them with roses and carnations. Of the latter Estelle, Lawson and Queen Louise will be planted largely.

Mr. Shanahan is around again. He has been laid up with appendicitis for about four weeks. The firm has been quite busy with funeral work for the late Mrs. Tevis.

John Carlson, who has been conducting a jobbing garden business combined with a flower store and nurseries on Fillmore street, intends to sell out and retire.

Matraia & Company were very busy this last week with funeral and wedding orders.

P. Fagoni has started a flower store on Fourth street. GOLDEN GATE.

MONTREAL, ONT.—The Gardeners' and Florists' Club has removed its headquarters from the Natural History building to the Alexander rooms, 2204 St. Catherine street, where meetings will be held in future on the first and third Monday of each month. W. H. Horobin is secretary.

**1-Year-Old Bench Beauty Plants \$50.00 PER 1000.**

Have been one year on bench. Perfectly healthy stock, guaranteed to be satisfactory in every respect. Special care given to dampening and mousing of roots for shipment. Only a few of them left. Also the following 2½ inch Rose plants, fully as good as any we have ever sent out:

METEOR, \$2.50 per 100; \$20.00 per 1000.  
MAIDS, 3.00 per 100; 25.00 per 1000.

**J. A. BUDLONG,**  
37-39 Randolph St. CHICAGO.

**CUT FLOWER**

Dahlias, all field roots, two new kinds: **Emperor**, the darkest cut Dahlia in trade, and **Giant**, the finest Cactus up to date. The flowers are 7 to 8 inches in diameter, color black, on very strong stems, each kind \$1.50 per doz. 100 fine cut Dahlias for \$1.00, all named and the best in the trade. **Cannas**, Mme. Crozy, Black Prince, Borbank, Henderson, \$2.00 per 100. **Hollyhocks**, Allegheny strain, \$2.50 per 100. Cash please. **Shallroad Greenhouse Co.**, Grange P. O., Baltimore, Md.

**Plant Now LILY of the VALLEY**

**FOR JUNE WEDDINGS.** Select Valley Pips from Cold Storage, properly packed and thoroughly frozen, \$13.00 per case of 1000. These were put up specially for the benefit of my out-of-town customers and can be shipped at once. Original cases of 2500, \$31.25; \$1.50 per 100.

**H. N. BRUNS, 1409-1911 W. Madison St., CHICAGO.**

**25,000 Verbenas** In Bud and Bloom  
2 1-2-in. pots, \$2.50 per 100; \$20 per 1000; 3-in., \$3.50 per 100; 1000, \$30.

**LAUREL HILL NURSERIES,**  
STOCKBRIDGE, MASS.  
Importers and Growers of Choice Trees, Shrubs and Hardy Perennials.

**FUMIGATION METHODS**

By **PROF. W. G. JOHNSON**

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

**FRUIT GROWERS AND NURSERYMEN** owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

**GARDENERS AND FLORISTS** have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

**MILLERS AND GRAIN DEALERS** have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

**FARMERS OF THE COUNTRY** have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

**COLLEGE AND STATION WORKERS** will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

**AMERICAN FLORIST CO.**  
324 Dearborn St. CHICAGO, ILL.

**THE KINNEY PUMP.**  
For applying liquid manure it has no equal. Sent prepaid for \$2.00.  
**THE HOSE CONNECTION CO., Kingston, R. I.**  
Mention the American Florist when writing.

OUR DIRECTORY FOR 1902 WILL BE MAILED TO YOU PROMPTLY UPON APPLICATION. PRICE TWO DOLLARS.

Toronto.

TRADE LETS UP WITH THE ADVENT OF SPRING.—QUALITY OF STOCK DETERIORATING.—MARKET FULL OF GERANIUMS.—SEEDSMEN BUSY.

Business has fallen off considerably the past week. Something in the atmosphere seems to have affected all customers at the same time and orders are scarce. Bridesmaids and Brides are hardly as good as a week ago but Meteors and Perles are decidedly better, the former being much larger and of a very rich color. Morgan and Hoste are also of good quality and Beauties are more plentiful than at any time since last season. The heavy run on carnations is letting up a little, but whites are still in great demand and likely to remain so for the summer. Bulbous stock is not in heavy supply but the outdoor varieties will soon be with us. Harrisii and callas are plentiful and the green goods question is easing.

St. Lawrence Market is again seen in its coat of many colors, as supplied by the gardeners. The last few days of fine weather have been very favorable and sales are increasing accordingly. A record season is anticipated by those in a position to know.

The seedsmen report very heavy sales. J. A. Simmers and the Steele Briggs Company are both working nights, trying to catch up with orders. Simmers has shipped a car load of seeds to different gardeners at Prince Edward Island.

Jay & Son have secured a ten years lease on their Spadina avenue store and will do considerable remodeling.

H. G. D.

EAST ST. LOUIS, ILL.—August Mirring is increasing his facilities by adding new glass. He is having a prosperous season.

SPRINGFIELD, MASS.—Ex-mayor D. O. Gilmore has offered to build and present to the city a fine conservatory. The proposition was made to the park commissioners through Superintendent C. E. Ladd. The park commissioners are to select the site whereon it will be erected.

## BURBANK'S Shasta Daisy

The coming cut flower and pot plant; nice to follow 'Mums. Plants each 50c; 5 for \$1.50; 10 for \$2.50; 25 for \$5.00.

## 125,000 ASTER PLANTS

Best florist's cut flower varieties; all transplanted. Strong plants, bushy roots; sure to please you.

ASTERS, Hohenzollern, pure white, delicate rose and red (Roemer's), last year novelty, grandest aster to date. Mammoth size, 7 inches across, double to center, resembling a large Japanese chrysanthemum, unsurpassed for cutting or bedding plants, branching, with strong stems 18 to 20 inches long, 70c per 100; \$6.00 per 1000.

Queen of the Market, white, red, pink and mixed.

Florists' Upright Branching, outer petals recurved, center petals incurved, superb cut flower, pure white, daybreak pink, fiery scarlet and lavender.

Late Branching or Semple's, white, rose pink, lavender, red and mixed.

All the above are the best money makers for florists, strong, healthy plants, assorted to suit, 50c per 100; \$4.00 per 1000. Express prepaid for cash with order.

DES MOINES PLANT CO.,

38th St., Des Moines, Iowa.

# IMPATIENS THE QUEEN

This variety we now offer for the first time, it being far ahead of any cheap blooming house plant that we know of. A grand plant for out-of-town florists.

Flowers 1¼ to 1½ inches in diameter, color a delicate satiny pink with bright carmine eye, center of petals faintly tinged with white, wonderfully profuse and of the easiest culture. Price, 2-inch pot plants, \$1.50 per doz.; \$10.00 per 100.

CENTRAL MICHIGAN NURSERY, Kalamazoo, Mich.

Please mention the American Florist when writing.

**Pittsburg.**

TRADE FALLS OFF A LITTLE BUT STOCK STILL MOVES WELL.—BEDDING STOCK ABUNDANT AND IN DEMAND.—VARIOUS NOTES OF INTEREST IN THE TRADE.

Business has fallen off a little from last week but not enough to make it unsatisfactory. Crab apple blossoms and dogwood make the stores look springlike and attractive. The market places are literally jammed with bedding plants of every kind and color. The sidewalks in front of the Allegheny market are covered with thousands of bedding plants and the public appreciates these refreshing displays, for many expressions of pleasure are heard regarding them. The condition of roses is only fair. Bridesmaids and Brides are fair one day and correspondingly poor the next. American Beauties are perfect in bloom, stem and foliage but they lack color, as they always do in the summer time. In carnations Lawson, Prosperity, Hector, White Cloud, Marquis, Joost, Morning Glory and Scott are especially excellent and are selling well. We have some call for white sweet peas but they are difficult to secure. Several growers have reported that they will be very scarce by reason of the tendency of the foliage to rust.

The Pittsburg Cut Flower Company reports that they are doing an extraordinary shipping business, especially through western Pennsylvania, eastern Ohio and Virginia.

George James Burki, foster son of Fred. Burki, died of appendicitis after a surgical operation on Wednesday, May 5, aged 26 years. A wife and child survive him.

Another great wind and hail storm passed over Pittsburg and Allegheny on last Friday but the florists escaped damage, except at a few private places.

Burglars entered the home of W. B. Flemm last Friday night and secured a fine gold watch and some trinkets.

L. I. Neff intends adding three new houses to his plant at Aspinwall.  
E. L. M.

WATERTOWN, CONN.—Otto F. Roeske has sold his greenhouses and part of the real estate to his brother, Henry, who will take possession at once.

# "Indispensable"

This is the only word which describes the American Florist Company's Directory, just out. This book, 418 pages of facts tersely told, is issued annually and is an aid to business and money making which no wholesaler or traveling salesman can afford to be without. It contains the name of every Florist, Nurseryman and Seedsman, arranged both by states and towns and alphabetically; and new lists of Gardeners or Superintendents of private estates, Experiment Station Horticulturists, Landscape Architects and Horticultural Supply Concerns. It will save many times its cost by enabling you to cover America with your catalogue and at the same time waste no printed matter or postage on dead names.

**AMBITIOUS PLANS FOR THIS YEAR'S FLOWER SHOW.—JUDGES FROM THE EAST.—BIG SUM IN PRIZE MONEY.—SEASON SATISFACTORY TO THE TRADE.**

Flower show preparations are already well under way. The management has been determined upon, if, indeed, there was any question about it, for the staff is the same as made the big success last year, and the work on the premium list is already well along. F. J. Taggart is stirring up the publicity end and John Thorpe is looking after exhibits. It is reported that Mr. Thorpe declined an offer of the management of the New York show in October to return to his duties here. Mr. Taggart has announced the judges to be John Young, secretary of the New York Florists' Club; Edwin Lonsdale, secretary of the Florists' Club of Philadelphia and of the Chrysanthemum Society of America, and E. A. Kanst, assistant secretary of the Horticultural Society of Chicago. The latter was one of last year's judges. The plans contemplate more than \$7,000 in premiums for the regular classes and a large sum in special prizes.

Trade is continuing good with the down town retailers, while those florists on the outskirts have all they can do in the way of planting. The year has been a very good one here and, while those who are looking for trouble can always find cause for complaint, everyone has reason to be satisfied with trade conditions in general.

**GRAFTON, ILL.**—The Rippley Hardware Company says that its sales of sprayers, spraying material and whitewashing machines have this year been double what they were in 1901. They are shipping their goods not only to all parts of the United States but to many foreign countries.

Nashville, Tenn.

STOCK IN PROFUSION—PRICES LOW BUT QUALITIES GOOD—RACES MAKE CALL FOR FLOWERS.—CURREY OF BIRMINGHAM OPENS BRANCH STORE.

The exceedingly hot weather has warned the flower man that the dull days of summer will soon be upon us—when the city will be almost depopulated and trade very slow. Last week the races, which were turned into regular society events, helped out some, and there was a fairly good demand for flowers. The out of door flowers are coming in now in great profusion, and just a few days ago lilies of the valley were wholesaled at 25 cents per hundred, most excellent stock, too, with a much sweeter perfume than the forced valley. Pæonias, snowballs, irises and other spring flowers are blooming profusely, and, as they are cheap, are sold readily. Growers are making active preparations for their field-grown summer stock, which is a much greater problem than the growing of winter stock.

George R. Currey, who is in the flower business in Birmingham, has opened a branch establishment in this city. He is located at Bloomstein's drug store, one of the most popular corners in the heart of the city. He will do a general floral business. He will not attempt to grow flowers, merely keeping sufficient glass to store palms for decorative work. He is a brother of A. B. Currey and was at one time a partner in the old Currey firm. The new store will be called simply "Currey's." M. C. DORRIS.

### International Plant Breeding Conference.

The council of the Horticultural Society of New York announces that it has completed arrangements for the holding of an International Conference on Plant Breeding and Hybridization in the fall of the present year, the dates selected being September 30, October 1 and 2.

Acting under the instruction of the society at its annual meeting in May, 1901, the chairman of the council addressed letters of enquiry to prominent scientific societies and individuals interested in progressive horticulture, both at home and abroad, to all the agricultural experiment stations in America, the United States Department of Agriculture and the Minister of Agriculture for the Dominion of Canada, in order to enlist a wide-spread support and to ascertain views as to the most convenient date for the attendance of the majority of those interested. The responses were unanimously in favor of holding such a conference and the dates announced were finally selected by the conference committee, consisting of Dr. N. L. Britton, chairman; Dr. F. M. Hexamer, J. de Wolf, H. A. Siebrecht and Leonard Barron, secretary.

By the co-operation of the American Institute of the city of New York, it is arranged to hold the sessions of the conference in the lecture hall of the Berkeley Lyceum building, 19-21 West Forty-fourth street, New York city.

This conference will provide for the reading and discussion of papers, and the discussion of special topics pertaining to the subject of plant breeding and hybridizing. Arrangements are being made for the publication of a complete report of the papers and discussions in book form under the auspices of the society.

In connection with the conference there will be an exhibition of hybrid plants and their products, and of the related literature, to which everyone is invited to contribute. Awards of the society in the form of medals, diplomas and certificates may be made to exhibits of plants and plant products of hybrid origin illustrating some particular plant or plant industry.

It is further proposed to add to the interest of the gathering by making arrangements to visit points of interest in the neighborhood; and for the convenience of visiting delegates suitable hotel headquarters will be arranged near the conference hall.

The active support of the following

institutions has been promised and delegates appointed to attend the conference: Bureau of Plant Industry, United States Department of Agriculture; Department of Agriculture, Dominion of Canada; Royal Horticultural Society of England, American Pomological Society, Massachusetts Horticultural Society, Pennsylvania Horticultural Society, Society of American Florists, American Institute of the City of New York, New York Botanical Garden, School of Practical Agriculture and Horticulture, American Pharmacological Society, Torrey Botanical Club, New York Florists' Club, Colleges and Experiment Stations of the United States.

### PRELIMINARY ANNOUNCEMENT OF PAPERS PROMISED.

Results of Hybridization and Plant Breeding in Canada. (Illustrated by specimens). William Saunders, Director of the Central Experimental Farm, Ottawa, Canada.

Notes on Plant Breeding in California, E. J. Wickson, Horticulturist, Agricultural Experiment Station, University of California.

Plant Breeding in New Jersey. (Illustrated by specimens). B. D. Halsted, Professor of Botany in Rutgers College, New Brunswick, N. J.

The Wild Hybrids of the North American Flora. (Illustrated by specimens of the parents and progeny). David George, Museum Aid, New York Botanic Garden.

An Address, L. H. Bailey, Horticulturist, Cornell University, Ithaca, N. Y.

Plant Breeding work in Germany, J. C. Whitten, Horticulturist, Columbia University (now in Germany).

Cereal Breeding in Kansas, H. F. Roberts, Botanist, State College, Manhattan, Kansas.

Recent Experiments in Hybridization, by C. F. Hurst, England.

Selection vs. Hybridism, F. W. Burbidge, Dublin, Ireland.

Individual Prepotency, Will W. Tracy, Detroit, Mich.

Cytological Aspects of Hybrids, W. A. Cannon, Columbia University, New York City.

Correlation Between Different Parts of the Plant in Form, Color and Other Characteristics. (Illustrated by specimens). S. A. Beach, Horticulturist, New York State Experiment Station, Geneva, N. Y.

Variations in Hybrids Not Appearing in the First Generation, but Later, E. S. Goff, Horticulturist, Agricultural Experiment Station, University of Wisconsin.

Some Possibilities, C. L. Allen, New York.

Crossing Species of Salix, S. W. Fletcher, Washington.

Hybridizing Gladiolus Species, (illustrated), W. Van Fleet, Little Silver, N. J.

Notes on Breeding Hardy Apples, John Craig, Ithaca, N. Y.

The Everbearing Strawberry, H. de Vilmorin, Paris.

Breeding of Native Northwestern Fruits, N. E. Hansen, Brookings, S. D.

The Muskmelon, F. W. Rane, Durham, N. H.

Seedlings of the Native Plums, E. S. Goff, Horticulturist, Madison, Wis.

Results in the Breeding of Species of Ricinus, E. Mead Wilcox, Botanist, Oklahoma Agricultural Experiment Station.

On Orchid Hybrids, (illustrated by specimens of the parents and progeny). Oakes Ames, Ames Botanical Laboratory, North Easton, Mass.

Hybrid Beans, R. A. Emerson, Horticulturist, Agricultural Experiment Station, University of Nebraska.

Hybrid Plums, F. A. Waugh, Horticulturist, Vermont Agricultural Experiment Station.

Cross Breeding of Cinchonas, H. H. Rusby, Botanist, College of Pharmacy, New York.

Breeding Florists' Flowers. (a) E. G. Hill, Richmond, Ind. (b) C. W. Ward, Queens, L. I., N. Y. (c) A. Wintzer, West Grove, Pa.

Study of the Variations in the Second Generation of Berberis Hybrids, C. E. Saunders, Ottawa, Can.

The committee has the assurance of other papers, of which the exact titles have not yet been submitted, including contributions from Luther Burbank, Santa Rosa, Cal., and Herbert J. Webber, Plant Breeding Laboratory, Washington, D. C., and others.

LEONARD BARRON, Sec'y.

## CARNATIONS.

### THE SEASON'S SUCCESSES.

In white Lorna is a very large flower with a weak stem for the size of the flower. We shall grow it again and try to get stronger stems. White Cloud has done exceptionally well and is our principal white variety.

In pink Marquis has been very successful in light pink, while for dark pink Mrs. Lawson has been the best carnation we ever grew. It seems to be right at home in our soil, producing an abundance of extra fancy blooms all the time. For a very light pink we grow Morning Glory. This variety has produced very steadily all season and no split or poor flowers. It has proved one of our best selling varieties.

For reds our best early is America, then Crane, and Red Bradt for Christmas and midwinter. Red Bradt is very much like Mrs. Lawson with us, as it takes to our soil in great shape, producing an extra large flower and plenty of them. We have not seen any red that is its equal for size and good keeping qualities.

The variegated varieties have been in better demand this season than ever before, Prosperity, of course, leading. It has produced very well with us and we shall plant some 7,000 or 8,000 next season. It requires special culture and care and responds to such treatment with grand flowers. If grown in an indifferent manner we notice it produces very poor and few flowers. Mrs. Bradt has done fully as well as the previous

year and in our estimation it is a standard fancy variety.

In yellow Gold Nugget is the best in our soil and for maroon there is nothing equal to Maceo. The flowers are of good size and abundantly produced. We have had the most successful season in quality of flowers that we have yet experienced since growing carnations.

BASSETT & WASHBURN.

### THE DETAILS OF FIELD CULTURE.

The carnations in the field will need constant attention to see that none of the little details of field culture are missed, as it pays far better to give them the attention they need in the field, and have good plants to house, than to neglect them almost entirely in the field and then spend money, time and fertilizers to get them to produce a fair return in the house. The time given in the field is that which forms the character and constitution of a carnation plant and with proper

THE LATE MICHAEL J. LYNCH.

(See page 615.)

attention here good results in the way of flowers come as a natural sequence. A good plant will produce good flowers under ordinary culture and with a good plant and the good culture we now give our carnations there is no reason why we should not be on top of the pile when it comes to marketing our flowers.

Cultivation is the important factor in getting good plants in the field and should be followed up after every rain and, if rains are far between, it can even be done to advantage once or twice between rains. The great object of cultivation is, of course, to keep the top of the soil loose and in such condition that the air can penetrate it, while capillary attraction draws up the water from the subsoil in dry weather to keep the plants growing along nicely. Although it seems, at first sight, like a contradiction, this loose soil on the top acts in the capacity of a mulch and prevents too rapid evaporation from the soil underneath.

There can be no set rules laid down for cultivation as different soils require different treatment. Some growers advocate going over the patch at regular intervals, but the only custom I can follow is to go over the patch after every rain, so that there is no chance for the formation of a crust on the soil. When there is no rain

for a lengthy period we have to leave our soil alone, after having once loosened the top, as it is naturally loose and porous and constant cultivation would give us a dry mulch on top so deep that it would affect the roots of the plants, and we would be in danger of cultivating our plants to death.

Next in importance to cultivation in the field is the topping of the plants and to do this work properly requires a familiarity with the habits of the different varieties. Those which can be classed as late varieties should not be topped too early in the season; in fact, not before they show signs of a bud, as this will often start them off with a good cluster of branches around the base of the plant, instead of starting one or two shoots into vigorous growth, as will be the case if they are topped very small. The strongest of these side shoots can be topped again during the season and the likelihood is that you will have a plant to house in such shape that it will throw five or six flowers by January 1, and that is the point you are aiming for. With a fair percentage of the flowers produced by January 1 the balance of the season will take care of itself and produce its proper quota of flowers.

Early flowering varieties can be topped early and often but care must be used so that you do not have the plants in such a shape that they will produce a crop of flowers in the fall and then be off crop for the holidays. Even with the early housing we now practice those branches that produce flowers for the holidays are formed in the field and, while it is hardly feasible to count your Christmas crop of flowers on the plants in the field, that crop can to a certain extent be controlled by intelligent topping, followed up, of course, by intelligent culture after the plants are housed.

The details of field culture are variable and consist for the most part of the men who do the topping keeping their eyes open for little things such as a broken branch to be cut off, a diseased plant to be pulled out, a plant laying over on its side to be straightened up, a plant with the heart washed full of soil to be cleaned up and put into shape, and a hundred and one such things, all of which are minor in themselves but in the aggregate mean quite a difference in profits.

In advising the pulling out of diseased plants I do not want to be understood as advising the pulling out of everything that shows some slight disease in the shape of rust or bacteriosis. Where either of these diseases are very bad, with no prospects of improvement in the plant, it is, of course, as well to pull them out and throw them off the field. Under no consideration allow these diseased plants to lay on the field. All of our best new varieties reach us with more or less rust on them, but no wise grower will consider this in the shape of a disease; he now looks on it as a necessary evil, to be kept in check by good cultural methods. Plants showing the least sign of stem rot, either the dry rot which affects the branches of the plants, one by one, until the plant is dead, or that rot which affects the stem between the top and root, should be pulled out at once and burned, as we do not want either of these fungi on any portion of our plants, either outdoors or in the greenhouses.

ALBERT M. HERR

### CARNATION GROWING IN CALIFORNIA.

At a recent meeting of the Pacific Coast Horticultural Society Charles F. Fick detailed the methods in vogue in the

WEDDING DECORATION AT PARKER HOUSE, BOSTON, MASS.

(Artist, Henry Collins.)

vicinity of San Francisco. He spoke as follows:

I am hardly fitted for the honor of addressing this society on the methods of growing carnations for the San Francisco market since there are quite a number of growers who are also members of this society who produce better carnations than I ever have. But I will do my best at describing my methods

To begin with the cuttings, we fill the bench with from two to two and one-half inches of good, sharp river sand well tamped down and soaked with water. I then take my cuttings from the base of a flowering shoot. I generally gather about 200 or 300 at a time, pull off the lower leaflets and cut straight below that joint. After all are finished I start at once putting them in the sand. I always start on the left end of the bench and work to the right, first cutting a line one-half inch deep in the sand with an old knife which I hold against a lath, and put the cuttings in that cut one-half inch apart. After the first line is finished I press the sand down firmly, take the lath, lay it against the finished line and cut another line. I keep on that way until all are in and then give the bench another good soaking, which will level the sand and settle the cuttings. If I have not enough cuttings to finish out a line I place a label next to the last cutting and mark same with the next variety and date of putting in sand.

I have no bottom heat, only enough to heat the house, which, by the way, is a lean-to on a rose house facing south. No sun gets into that house in the winter months. Otherwise the cuttings should

certainly be shaded with newspapers or some other light material. Sprinkle lightly once in a while but only on warm days. I keep the heat between 50° and 56° if possible, airing a little if above 56° and applying steam heat if below 50°.

The cuttings will be well rooted in from four to five weeks and I take them out immediately, planting them in boxes three inches deep filled with good sandy loam and a sprinkling of bone meal but no other fertilizer. The young shoots are set two inches apart each way and left in these boxes until planting out time comes, which will be at the end of March or the beginning of April. I place them in the carnation house and shade them with newspapers for about three days, from 10 until 3 o'clock, if the sun is out, otherwise not at all. I give the ground where they are to be planted two plowings, one in the fall, followed by a good coat of manure, and another plowing and harrowing just before planting. This will leave the ground in first-class condition to produce good stocky plants by August.

I plant in rows twelve inches apart each way, watering as fast as one row is finished. I like to plant as early as possible, so the young plants will get the benefit of the late rains. I keep the ground well cultivated and free from all weeds during the four months the plants are in the field and water as often as once a week during June and July, always giving a light hoeing after each sprinkling to keep the ground loose. As soon as the young plants have a height of six inches I break the tops off to make them break out from the sides and bottom and

keep on plucking back until ready to go in the house.

In the meantime I prepare my carnation houses for replanting. I take off all wire and strings, pull out the old plants and burn them, take the old soil all out and give each house a good sulphuring, which I do by taking three 5-inch pots full of sulphur, placing one in the middle and one about thirty feet from each end, of the house, closing all ventilators and doors before lighting the sulphur. The fumes of this will kill all animal and vegetable matter that may be left in the house. The next day I give a good airing, sweep and wash off the benches and rake out all refuse. It is then time to give all rough wood a good coat of lime wash, the bars and planed wood being gone over with white lead every other year.

Then I bring in my soil, which I have piled up in the fall and mixed with about one-fifth of well rotted stable manure and turned over twice, giving it a sprinkling of bone meal when taking it into the house. My benches hold five inches of soil and are four feet wide. When the house is filled I give it all a good soaking and wait two or three days before planting. Before I start to plant I rake off the bench and make a line by pulling a planting rope from one end to the other. I make five rows, keeping the outside rows four inches away from the board. I will also mention that I have the house well shaded with yellow clay-water. This is easily washed off at any time, without breaking any glass.

When the plants are taken from the field the ground should not be too dry,

as the roots are easily broken off. To this end I give a sprinkling two or three days before taking the plants up. I leave but very little soil on the roots, as they are easier handled and take hold quicker in the benches. I plant about fifty at a time and water at once to settle the soil around the roots and keep them from wilting. We try to set the plants about one inch higher than they were in the field to prevent stem rot. I plant, according to variety, eight or ten inches apart and pinch back all buds that happen to be on. For the next week I give only overhead sprinkling twice a day and keep walks well dampened.

From then on I water when needed and syringe overhead, but only in the morning and in clear weather, to give the plants a chance to dry off before night. I keep ventilation on day and night until the nights get too cool, when the thermometer outside drops below 50°. In cloudy or rainy weather I apply a little heat with a little air on to keep dampness out. Keep on giving more heat as needed and try to keep the temperature in the house at 54° or 56° at night and 75° in the daytime, with ventilators wide open in bright weather. I never give any top dressing, using liquid fertilizer well along in January and then only thin and once a week.

I give my houses a good smoking with tobacco stems once a week after the flowers are all cut. This will keep greenfly and red spider in check. We water always between the plants and never sprinkle overhead in December, January and February. When the sun is getting higher in March I commence again with sprinkling and apply heat only toward morning if needed. If the weather should get very warm I give a little light shading with clay and water. I also give liquid manure from then on once a week, a little stronger than before, and water is

rot should be pulled out and burned and avoid taking cuttings affected with any disease.

#### A Private Establishment.

One of the finest, best equipped and best managed private places in the west is that of J. J. Hill, the St. Paul railroad magnate, presided over by A. Hallstrom. Altogether there is about 15 000 square feet of glass, there being four or five houses varying in size and shape and built without much regard for uniformity.

The crowning effort in the building line was realized last summer when the latest addition was erected. This house is 29x84 in dimensions, divided into six equal compartments. The frame, posts, trusses, sash bars and gutters are steel. Double thick 16x20 butted glass is employed. The bench supports are made of steel and the benches of sandstone grooved and pierced with holes at intervals so as to secure perfect drainage. A complete system of piping for hot water heat gives absolute control of the heating in each compartment. The walks are constructed of sandstone and cement, and the whole house has an air of cleanliness not often found in a greenhouse.

All kinds of plants are grown in this house or set of houses, but the finest of all were the hybrid roses in 5-inch to 7-inch pots, carrying from twenty to thirty-five buds and blossoms. The varieties noted were Ulrich Brunner, Magna Charta, Mrs. John Laing, Paul Neyron, and Gen. Jacqueminot. Crimson Rambler and Dorothy Perkins are also grown, and the latter is considered by Mr. Hallstrom one of the finest pot plants ever introduced. In the rose houses there are Bridesmaid, Bride, Souvenir de Wootton, American Beauty, Golden Gate, a few Balduin, some President Carnot, Mme. Testout and Meteor.

A house of orchids appears in fine condition and gives promise of blooms later on. Some extra fine cattleyas and dendrobies were noted. Some very fine specimen plants of Cyclamen Papilio, pelargoniums, marguerites, Cineraria stellata, auracarias, latanias and so forth are shown.

It had never before occurred to the writer that such an establishment requires harder work and more use of brains than the ordinary commercial establishment of ten times its proportions, but the multifarious duties of growing everything in limited space and having something new and pleasing for each member of the family presents more obstacles than those in commercial establishments for cut flowers and plants. This is certainly a model establishment and Mr. Hallstrom deserves great praise for his wise management of it.

FBLIX.

## ROSES.

### THE CARE OF YOUNG STOCK.

Do not slight your young stock of roses now that Memorial day draws near. We will all be very busy but it will not do to neglect the stock upon which we must depend next winter.

There is always a strong tendency to do away with the night fireman too early, or if you have no fireman, to shut off the boilers. This is a mistake. At this time of the year there are a great many chances to get an attack of mildew on account of sudden changes in temperature, but if you keep the steam going much trouble will be avoided. Bear in mind that the coldest time in the day, at all seasons, is about 5 o'clock in the morning, and if you start the fire in the evening and leave it, you are not very liable to have any heat in the pipes at that hour.

All of the stock should be shifted into 3-inch pots, at least, by this time. Do not let them get pot bound, but keep them in a growing condition and give all the air possible. The more you harden your stock by giving plenty of air the less liable it is to take mildew and black spot. The pipes should be kept painted with a thin layer of sulphur and occasionally the bellows should be used to blow the sulphur through the houses.

The disbudding should be attended to thoroughly. Do not wait until the buds show color, but pinch back, to the second eye at least, as soon as they begin to swell. I have seen much better results by disbudding on soft growth than by waiting for the wood to harden.

If you have grafted stock they should be gone over frequently and all of the Manetti shoots cut off; also examine every union and see that the binding is not cutting into the wood; if it is it should be cut loose. I think it a very good plan to stake all of the grafted stock, as by so doing you will be better able to syringe thoroughly without breaking off the graft.

Watch the Liberty very carefully as it is more susceptible to red spider and black spot, and when disbudding do not forget to pinch back several eyes. If this is not done you are very liable to get a great deal of short growth, which will produce only short-stemmed flowers. The Liberty should be pinched back harder than any of the other varieties in order to give satisfaction. The proper disbudding of this variety is one of the most important things necessary to its success.

If you grow Golden Gate you are very

VIEW IN THE GREENHOUSES OF JAMES J. HILL, ST. PAUL, MINN.

needed more from now on. One item I forgot to mention before is disbudding. This should be attended to continually.

Should black spot appear on the plants, the leaves should be picked off at once and burned or the disease will spread over the whole house. The same may be said of rust. Plants affected with stem

The variations are all looking fine and though but few of each variety are grown, and all in the same house, they all seem to thrive with equal freedom and vigor. Lawson, Prosperity, Bradt, Marquis, Mary Wood, Crane, White Cloud and other new and choice sorts are grown.

GREENHOUSES AND GARDEN OF JAMES J. HILL, ST. PAUL, MINN.

liable to have plants which throw a little too much brush. If so it will be well to look them over occasionally and cut this all out and induce stronger breaks.

During the spring and summer the young stock needs its full share of attention and whenever it is neglected the plants give evidence of it later. Treat them well now and later on they will show their appreciation and you will be thankful.

R. I.

#### Mushroom Culture in France.

Nearly all the mushrooms consumed in Paris are grown in the disused quarries which honeycomb the country to the south of the city, more particularly in the neighborhood of Sceaux. Some of these excavations, writes Consul-General John K. Gowdy in response to numerous requests from cultivators in the United States, are of enormous extent and might properly be called, in certain instances, mines, for they have horizontal galleries, or levels, at various depths; but usually they have only one gallery, some 300 yards to half a mile in length and are from thirty to 150 feet below the surface. These galleries are generally from seven to ten feet in height, though occasionally so low that a man can scarcely stand upright in them. They are in most cases wide enough for two rows of beds, with a footway eighteen inches wide down the middle.

These old quarries are chosen for mushroom culture for three reasons: (1) Because mushrooms can be grown in them all the year around. (2) Because they can be had cheap, the rental of one of these galleries with space for a double row of beds being only 15 centimes (3 cents) per running meter (1.1 yards). (3) Because the mushrooms are believed

to be superior in flavor to those grown in the open air. American gourmets, however, generally prefer the uncultivated mushrooms, and perhaps the Parisians would if they had more opportunities for making a comparison between them. From two and one-half to three tons of these cave-grown mushrooms are sent to market every day, and the total value of the trade is about \$3,000,000 a year.

The grower first procures a quantity of horse manure. The large growers generally contract with cab and omnibus proprietors, carriers, and carmen, there being a belief that the dung of strong animals in constant work is better than that of hacks and hunters, which do little or light work. Moreover, in well-kept stables there is too large a proportion of clean straw with the manure, and this is quite useless to the mushroom grower, although he does not object to a certain proportion of wheat straw (not exceeding fifty per cent) if it is sufficiently dirty, trodden, and steeped in urine. Sometimes the grower will arrange to take all the sweepings of a large stable, paying 6 francs (\$1.15) per month per horse; sometimes the manure is bought by the cubic meter or cartload, the average price being \$1 per cubic meter (35.3 cubic feet).

The manure is unloaded in a shady place, as near the mouth of the shaft leading to the quarry as possible. Many growers prepare a wooden frame of variable size, according to the heap to be treated, having the sides fifty inches high. This does not appear to be absolutely necessary, but probably facilitates the process of fermentation. The manure is shaken up and then pressed down with a fork, and the box is filled level with the top. The heap is then watered with a large watering pot.

Fermentation soon begins and a thermometer thrust into the heap on the sixth day will mark a temperature of over 150° Fah. After eight or nine days the frame is removed and the heap turned over, the portion in the middle being brought to the sides, and vice versa. The frame is then put back, and the heaps watered again, but less copiously. Eight or nine days later, the process is repeated for the third and last time, and, after remaining another week or so, the heap is ready for the mushroom beds. The temperature has then fallen to from 86° to 100° Fah., and the manure is brown, moist and does not soil the hands when touched. It has also lost about twenty-five per cent of its bulk and does not fill the frame to a height of more than three feet. The total time occupied in the preparation of the manure has been from twenty-four to thirty days.

The manure is then thrown, or lowered in baskets, down the shaft and conveyed in narrow wheelbarrows to the part of the "cave" where the beds are to be made. The shapes of the beds vary according to the grower's fancy or prejudices, but they are rarely flat. If away from the wall they are often made roof-shaped, or if against the wall, of the form of a lean-to roof. If space has to be economized, and the height of the cave permits, stakes are driven into the wall of the gallery, boards laid across them, and a mound made on the boards. Sugar-loaf mounds are also made in odd corners, and sometimes a cask will be sawn in two and the halves filled with compost. This last, however, is rarely used except to grow specimens for exhibition at shows.

The beds are still too hot to use, but if the gallery is not far below the surface and is well ventilated they soon cool

down to the required temperature, between 60° and 65° Fah. If they do not, a stake is thrust into the mound and raised a few inches, admitting the cool air.

Dampness is not prejudicial; in fact, if the galleries are dry, watering is required before the mushrooms begin to grow, but not afterwards. On the big farms a well is often dug in the gallery; but in the small farms, or where this is not practicable, the following simple but ingenious plan is used: A tank is placed at the mouth of the shaft and filled; one end of a thick string or loosely twisted cord is placed in the water and the other end lowered down the shaft and suspended over a tank at the bottom. The water passes along the string by capillary attraction and drips into the bottom tank.

The beds are now ready for sowing. A bed that is in full bearing is pulled to pieces, and bits of it are inserted into holes dibbled in the new beds; or a portion of an old bed from the previous season (for the spawn will keep indefinitely) which has been pressed is used. A piece of this "cake," when examined will be found to have a number of white thread-like filaments running through it. Portions of this cake (4x2 inches, or so) are stuck into holes in the new beds, some eighteen inches apart and covered. At the end of eight to twelve days they are uncovered, and if the filaments are found to have spread to the surrounding soil the cake is taken out and thrown away; if not, the "mise" (or cake) is left for a few days longer, or a fresh piece inserted. If the mise has taken, in twenty or twenty-five days these white filaments will be found diffused through the whole bed.

The bed is then lightly beaten with the hand and covered with the soil in which the mushrooms are to be grown. This may be anything that is not clayey; in stone quarries the dust of the stones is often used, or sand will do. If ordinary soil is employed, a hole is dug in a field or garden, the earth taken from the bottom and sifted from clods and stones. The object of taking the earth from deep down is to prevent the seeds of plants being transported. The mound is covered to the depth of an inch or so, and the surface beaten flat with a board or wooden shovel.

In from twenty to thirty-five days the mushrooms begin to appear, singly or in clumps. Small, white granulations first appear at the base of the bed, and a few days later the whole surface is covered with fungi. They are considered ready to be picked when the cup has left the stem by about half an inch and are gathered by gently screwing them round and round till the stem comes out. The beds will continue bearing for four months and in that time will produce six pounds of mushrooms to the square yard.

The mushrooms when gathered are sorted according to color and size and are sold at from 10 cents to 20 cents (50 centimes to 1 franc) per pound; but the price, of course, is subject to fluctuations.

The mushroom grower has not many enemies to contend with, and only one of these is serious. Two forms of parasitic mold, known as the "green" and the "soft"—possibly only different stages of the same disease—attack the mushrooms, but do little harm, the crops being grown and gathered so quickly. Rats and mice and slugs and snails are easily poisoned or got rid of, but the only enemy to be feared is a dipterous insect of the genus *sciara*, smaller than the common housefly,

and perhaps identical with the small fly often found on old cheese. This fly breeds in such quantities that the candles carried by the men who tend the beds are often extinguished by them. In the full-grown state this fly does little or no harm, but its larvæ infest the beds and walls and destroy the mushrooms before they appear above the ground. After a season of four or five months the beds produce little, and the growers say they are exhausted and must rest for six or eight months; at the end of that time the beds bear as well as ever, and many naturalists assert that the so-called exhaustion is nothing of the kind, but is the work of these maggots. When the galleries are closed for some months the flies and maggots die, and work can be resumed. It has been proposed to get rid of this pest by burning sulphur, or by the fumes of sulphide of carbon, or some other agent, but the growers prefer the old method.

The profit of mushroom growing is fairly good, as the following figures will show. Cost per square yard: Manure, 10 cents; labor, 20 cents; rent, 2 cents; total 32 cents. Receipts per square yard: Six pounds mushrooms, 90 cents; spent manure, 5 cents; total, 95 cents.

At home our growers would no doubt take means to destroy the insect and thus secure crops all the year round. If this could be done, the profits might be estimated at nearly \$2 per square yard.

I have described the method of cultivation at some length, as the French growers assert that even a temporary departure from any of the rules will cause a failure of the crop. It remains only to be added that the galleries should not be lighted (mushrooms grow best in the dark) and should be kept scrupulously clean.

#### Dahlias For Cut Flowers.

In my remarks on dahlias in a recent issue I mentioned that the question of varieties is not now of first importance to the trade generally because growers and dealers have become better acquainted with the varieties and their characteristics. This applies to dahlias for general purposes, such as bedding, general collections, specimen plants, home bouquets, exhibition and so forth, but every rule has its exceptions, and, with dahlias, the exception is as to varieties for commercial cut flowers.

For this purpose a dahlia must be of good form, have long stems, good bright color, keep well after cutting, bear shipping in good condition, and to be profitable it must be a fairly good bloomer. I say a fairly good bloomer because a superb flower bringing \$3 to \$5, and sometimes even \$10 per hundred, for we sold dahlias last year wholesale at 10 cents each, is profitable with five to ten blooms per plant.

The price for cut dahlias a few years ago was 50 cents to \$1 per hundred blooms, with only *Nymphæa* selling for \$2. Now these cheap flowers are out of date. The average price for first-class cut dahlia blooms last year was \$2 per hundred, with special varieties running on up to \$3, \$4, \$5 and \$10 per hundred. S. S. Pennock, of Philadelphia, sold thousands of Clifford W. Bruton, yellow, at \$30 per thousand and selected May Lomas and Grand Duke Alexis for \$5 per hundred.

*Nymphæa* and A. D. Livoni, pink; Storm King, Perle and Henry Patrick, white; Queen of Yellows, Red Hussar, Wm. Agnew and Lyndhurst, red, all sold for \$2 per hundred blooms. Claribel,

purple, sold at \$1.50 to \$2.50 per hundred, according to length of stems.

These varieties are the ones that best answer the commercial requirements and can be procured from the trade generally. Twentieth Century, the orchid single, sold wholesale at \$4 per hundred in Philadelphia last year, and as it is a good bloomer is one of the most profitable to grow.

W. P. PEACOCK.

#### The New York Exhibition.

The third annual meeting and exhibition of the Horticultural Society of New York was held at Bronx Park on Wednesday afternoon, May 14. At the business session the entire old board of officers was re-elected with the exception of four members of the council, three of whom were dropped because the charter recently obtained reduces the number of councilors from thirty-three to thirty, and one of whom was replaced by T. A. Havemeyer. The report of the secretary showed a balance of \$950 in the permanent fund and a total membership of 201, an increase of seventy members during the year. A very interesting lecture on "Features of the New Zealand Flora" was delivered by Dr. N. L. Britton and illustrated by stereopticon slides supplied by L. Cockayne, government botanist of New Zealand.

The exhibition held in the Museum building brought out some excellent groups of shrub bloom and decorative greenhouse plants. Siebrecht & Sons were the largest contributors, their display comprising stove and greenhouse plants in variety in which the anthuriums were especially conspicuous, rhododendrons, mollis azaleas, etc. Frank Wienberg sent large groups of alpine and rocky plants, succulents, begonias, etc., H. T. Clinkaberry rare orchids, W. H. S. Wood shrub bloom and the Bedford Agassiz Association wild flowers.

The main interest centered in the competition for the prize of \$50 for the best horticultural novelty. The entries were as follows: J. H. Troy, dwarf growing ivy from the Caucasian mountains; R. & J. Farquhar & Co., Boston, climbing rose The Farquhar; H. A. Clinkaberry, *Zygopetalum Roeblingianum* (rostratum × *Gauthierii*); L. H. Foster, *Nephrolepis Fosteriana*; F. R. Pierson Co., *Nephrolepis Piersonii* and John Lewis Childs, *Tritonia crocata*. The coveted award fell to the Pierson fern, which was recently illustrated and described in these columns.

#### "Red Devil" Lawn Mowers.

A citizen of "slow Philadelphia" now uses an automobile lawn mower! It is P. A. B. Widener, who, no doubt, found the "red devil" of Paris so fascinating that he decided to put one to the hitherto tedious and unexciting process of shaving a lawn. A close shave at lightning speed leads us to wonder how soon the tree pruners of the rich will fit about their tree-tops in Santos-Dumont flying machines!—*Newspaper Clipping.*

WORCESTER, MASS.—O. B. Hadwen has offered to the city of Worcester a gift of a fifty-acre tract of land on the shores of Curtis pond for a public park, stipulating that it shall be given the name of Hadwen park.

MILWAUKEE, WIS.—Chas. Burmelster is building four 160-foot houses, using the Dietsch patent construction. Nic. Zweifel is building a rose house 30x200, and the C. C. Pollworth Company one of the same size.

A CROSS PRINCIPALLY GLOXINIAS AND BEGONIAS.

## New York.

MAY MEETING OF THE CLUB.—MANY MATTERS OF INTEREST.—EXHIBITION PLANS.—GOOD THINGS ON EXHIBITION.—PHILADELPHIAN TALKS OF THE DEVELOPMENT OF THE BUSINESS—EVERYONE SHOULD HELP THE SHOWS.—MARKET STILL INACTIVE.—LARGE SUPPLIES THE RULE.—VARIOUS NOTES OF DOINGS OF INTEREST.

The May meeting of the New York Florists' Club was held at the store of President Sheridan, no satisfactory club room having been found thus far. There were about thirty members present. Robert Craig, of Philadelphia, was a visitor. On the table were some very fine pansies from H. Beaulieu, and a remarkable diminutive ivy from the Caucasian mountains, shown by J. H. Troy. On recommendation of the officers of the club H. A. Bunyard was unanimously elected to serve as superintendent of the Madison Square Garden exhibition next fall. A letter from Edwin Lonsdale offering the American Rose Company's special prizes for exhibits of blooms of the new Ivory rose was pre-

sented. An invitation was received from the Horticultural Society of New York to attend the third annual meeting and exhibition of that society. Secretary W. J. Stewart, of the S. A. F., asked the approval of the club for the removal of the inscription from the flag presented by the club to the national society at the convention of 1888 and same was granted. S. L. Butterfield was appointed to succeed Wm. Plumb as a trustee. The judges, Messrs. O'Mara, Cook and Burnham, recommended the award of a certificate to Mr. Troy for his dwarf ivy and honorable mention to Mr. Beaulieu for Mme. Perret pansies. The matter of transportation to Asheville came up and the president was authorized to appoint a committee to take charge. Mr. Craig, being called up, made a cheery little talk on the development of the floral business within the past thirty-five years, relating some of the history of the introduction of the American Beauty rose and asserting that there is more glass, more capital and more men employed to-day in the production of this one speciality than there was devoted to all branches of commercial floriculture at the time

American Beauty was introduced. He remarked the vast proportions to which the cut flower commission business had attained since its humble beginning not so very long ago, and recalled some of his experiences in the old times, when the present conveniences in the floral trade were unknown. Referring to the matter of exhibitions he argued that all should do something to help awaken a general interest, even if at a sacrifice, and that we all owe something to our business, which, as a matter of conscience and duty, we should not withhold.

The flower market is in a state of collapse this week. Whether it will revive again this season is doubtful. The only element that can put life and activity into it will be the cutting off of the greater part of the supply. The product in all lines far exceeds any outlet that can be provided for it. Violets are finished and so are freesias, Roman hyacinths and most of the tulips and daffodils, but the receipts of sweet peas, pansies, daisies and similar material fully offset the gain. Carnations have felt the pressure, as well as everything else, and much unsold stock is in evidence in the wholesale establishments, the quality being generally inferior. Twelve dollars a hundred is about the best price obtainable for the finest American Beauty roses and all other grades are away down. Outdoor lily of the valley has pushed the indoor product to the wall for the time being and brings about the same price per thousand as the forced stock has been bringing per hundred. Decoration day never makes much of a stir in this market, so there is no apparent prospect for improvement in general conditions until growers begin to throw out their stock and prepare for replanting.

Irises and gladioli side by side in the same window with chrysanthemums, and outdoor lilacs not far away, furnish an interesting object lesson as to the extent to which commercial floriculture has managed to reverse the seasons and furnish practically anything and everything at any time of the year. Violets alone seem to baffle those who would produce them in summertime, but who can say that this also will not be accomplished in the near future. Perhaps, however, the day is not far distant when the public, wearied of the surfeit of unseasonable things, will turn its fancy to greater simplicity in flower selection and decline to accept chrysanthemums in spring or forsythias in the fall.

The committee of the New York Florists' Club in charge of the outing to Witzel's Grove, announces that they will get up a beautiful souvenir programme for that event. Special premiums are solicited from the patrons of the organization, for the various athletic events, such as baseball between the married and single men, the East Side and the West Side; fat mens' race, boys' race, girls' race, sack race, etc., and same will be duly displayed in the souvenir programme. Address H. A. Bunyard, 38 West Twenty-eighth street.

Frequenters of the Cut Flower Exchange will be pained to learn that Miss Theresa Devitt, sister-in-law to Frank Millang, who has been employed for the past four years at Mr. Millang's counter in the flower market, died of heart failure on the morning of Tuesday, May 13. Miss Devitt was a very capable as well as a very attractive young lady and was held in high esteem. Her age was 23 years.

The opening of a new play at several theatres Monday night furnished an opportunity for quite a display of floral.

gifts to popular performers. M. Bowe made a big ship of roses for Cherry Simpson, at Daly's. It was six feet long. A floral automobile went from the same artist to Miss Haynes, at the Garrick. This was of pink roses entirely.

The Harriet Cleary geranium seems to take the fancy of the frequenters of Cleary's auction room. The variety was raised by J. M. Horsburgh, of Elizabeth. The color of the flower trusses closely approaches that of the Lawson carnation.

Dunne & Company show some mammoth cacti, four and five feet tall, from Arizona, which attract considerable notice from passers. There is quite a demand for these for decorative beds about summer hotels and such places.

George Saltford has his new place of business on Twenty-ninth street all finished and it looks very attractive. The walls and ceiling are appropriately covered with paper adorned with clusters of purple violets.

Julius Lang is receiving quantities daily of purple, white and yellow Spanish irises which are among the prettiest of the seasonable flowers in the market and find a ready sale among the high-class stores.

The 5 a. m. rule at the Cut Flower Exchange causes more or less dissatisfaction and a large number of the stall holders have signed for a change to 6 a. m., as the opening hour for the market.

Pat. Smith, John I. Raynor's foreman, has acquired a new dignity since the coming last Thursday of a daughter to his home. Ten pounds, he says.

Alexander Wallace, who has been quite ill with appendicitis for some time, is sufficiently recovered to be able to come to business for a few hours daily.

H. Beaulieu has received news of the death of Mme. Perret, the originator of the pansy that bears her name.

L. J. Kreshover is preparing to open a stand in the Flower Exchange for the sale of general florists' supplies.

The Kervan Company will remove about May 24 to 20 West Twenty-seventh street.

H. A. Siebrecht has just returned from a business trip to the Berkshires in Massachusetts.

Thos. Young, Sr., is reported as very low and small hopes for recovery this time.

Geo. M. Stump is booked to sail on the Kaiser Wilhelm der Grosse on June 17.

Visitors: Robt. Craig and Geo. C. Watson, Philadelphia; Wm. Donald, Roslindale, Mass.

#### Minneapolis.

TRADE BETTER THAN WAS ANTICIPATED.—BEAUTIES THE ONLY SHORTAGE.—NOTES OF VARIOUS DOINGS.

The demand for flowers the last seven days has been somewhat brisk, more so than was anticipated. Stock in general is plentiful, excepting Beauties, which have been short, with a brisk call. Tea roses and carnations can be secured in quantities. The blooms are excellent and good prices are realized for the stock sold. The heaviest trade has been on funeral orders, thereby cleaning up the white flowers.

At Anoka, Minn., D. O. Pratt's new range is about completed, and will make one of the finest plants in the northwest. William Desmond has taken charge.

R. Will is bringing to market excellent blooms of Crane, Joost, White Cloud and Bradt carnations. He has his young stock all planted in the field. C. F. R.

#### Chicago.

MARKET STILL OVERLOADED IN SPITE OF THE COOLER WEATHER.—MUCH GRADING NECESSARY IN ROSE STOCKS.—BEAUTIES MOVING BEST OF ALL.—MANY GOOD CARNATIONS AND OLD SORTS DO NOT MOVE.—TONS OF LOCAL LILAC.—SPRING FLOWERS LIKELY TO BE GONE BY MEMORIAL DAY.—THE MATTER OF FLOWERS AT COMMENCEMENTS.—DOINGS OF GROWERS, RETAILERS AND OTHERS.—NOTES.

Cooler weather has undoubtedly helped the market situation this week, but the improvement has been in such slight degree that many wholesalers declare there has been none at all. The receipts are still far in advance of the possibilities of satisfactory consumption and the only item which is moving with any degree of activity is Beauties. Many growers are throwing out the old plants and with others the cut is coming off, so that supplies are not so large on this item as they are on many others. Of tea roses there is decidedly more than can be placed to advantage. The stock is soft and it requires so much grading to get out shipping qualities that the better end of the cut brings fair prices, but the great proportion which will not ship can be moved only for little or nothing. There are such large receipts of first-class carnations that those growers of the old-time sorts are left practically without a market. The up-to-date novelties have the call on whatever demand there is, and are making fairly satisfactory returns, but the other grades are selling for whatever the buyers are willing to pay. Paonias are coming in at an unprecedented rate for so early in the season and are popular with the buyers, although not selling any too briskly. There are large receipts, also, of outdoor tulips, and everything else for that matter. There are simply cartloads of lilac, the local cut being now on, and it simply will not move at all. The only redeeming feature in the situation is that the outdoor flowers seem likely to be pretty well out of the way by Memorial day. At present shipping trade is only moderately active and local buying very dull.

A committee of the Retail Florists' Protective Association and the Wholesale Cut Flower Association interviewed Superintendent Cooley last Monday in the matter of the use of flowers at the June commencements. The prohibitive order of the School Board cut a big hole in the flower trade last year, and it is the earnest wish of everyone identified with the industry that the order be rescinded. Professor Cooley does not see the matter in the same light as the florists and is largely responsible for the Board's position, but he arranged that the trade associations meet the School Board next Thursday afternoon, May 22, to state their case. In the meantime it would be influential if the retailers' customers, particularly the poorer ones, were encouraged to write to Professor Cooley or any member of the Board, saying that they would like the privilege of sending flowers or other gifts to graduates at the commencement exercises.

Some of the best longiflorum lilies of the season are now coming in. Frank Garland has some excellent ones, and Bassett & Washburn are cutting lilies as good as ever offered in the market. The bulbs were bought under the somewhat impressive name of *Lilium longiflorum multiflorum giganteum*. They seem worthy of the appellation, but the flowers can't be had for Easter.

The supply of ferns from last year's stock seems to be well cleaned up. Of the several millions put in cold storage last fall, very few are left, and of these some lots are coming out in poor shape. The coarse Michigan ferns are arriving and some stock is coming up from Alabama, better than that from Michigan, but these ferns are all soft and slow to move while the Berkshire stock is to be had.

Owing to the light attendance at the meeting of the Florists' Club May 14, no business was transacted. John Hoeft, of Park Ridge, brought along some extra good blooms of Triumph and Flora Hill carnations for exhibition. The entertainment committee is making arrangements for a ladies' night, when cards will be a feature.

There is a prospect that the curbstone salesmen will be back at work shortly, for the city authorities have permitted the newsboys to return to their street stands and Mayor Harrison is quoted as saying that there shall be no favoritism in the matter of street privileges.

The grounds around E. G. Uihlein's city residence, 34 Ewing Place, have been very attractive recently with flowering plants, including six *Magnolia Soulangeana*, twenty-five *Azalea mollis* (standards), 500 hyacinths, 2,000 tulips and 7,000 crocus.

Peter Reinberg has shipped or planted the last of his carnation cuttings. Archie Spencer says that this season's sales of rose and carnation cuttings and rose plants will run very close to a million, a most prodigious number.

The Ernst Wienhoeber Floral Company was incorporated this week by Ernst Wienhoeber, Helena Wienhoeber and George W. Wienhoeber. The capital stock is \$25,000.

August Jurgens has the sympathy of the trade in the loss of one of his six-months-old boy twins, who died Wednesday. Interment was at Concordia Cemetery on Friday.

S. Mulr says that the season for outdoor work promises to be the best on record, but the cool weather lately has somewhat retarded business.

A. C. Brown, of Springfield, has been in town this week, participating in the big golf tournament at Wheaton, making some good scores.

Some of the big growers have been helping out the sufferers in the recent big hail storm at Blue Island by donations of young stock.

M. D. Young, of Dayton, O., was in town this week on his way to Denver, where he has bought an interest in a business.

Kennicotts say that though prices average low the receipts are so heavy that sales foot up well above a year ago.

The McKellar & Winterson Company is figuring on good Memorial day trade. The supply business is already brisk.

Joe Curran, the popular manager at Friedman's, is rejoicing in the birth of a daughter.

E. C. Amling says he looks for a steadily improving market for the next few weeks.

C. W. Northrup, of La Grange, is sending in the finest outdoor tulips of the season.

J. B. Deamud has returned from a few days visit to his farm near Saginaw, Mich.

C. H. Fisk, of A. L. Randall's, made a trip to the Twin Cities last week.

Visitors: Chas. Loveridge, Peoria; J. A. Evans, Richmond, Ind.

## Boston.

SEASON OF PLANTING NURSERY STOCK PROLONGED BY COOL WEATHER.—PYRUSES AT THE ARBORETUM ARE IN THEIR PRIME.—WHOLESALE MARKET OYERBURDENED.—SURPLUS IN NEARLY EVERY LINE OF CUT FLOWERS.—MEMORIAL DAY LOOKED FORWARD TO.—GOOD DEMAND EXPECTED.—VARIOUS NOTES.

The cool weather of the past two weeks has been a great help to the nurserymen, retarding growth and giving them a longer season than was anticipated. Flowering trees and shrubs are still, however, from one to two weeks ahead of the average spring. The frosts which are reported as doing so much damage in other localities have not injured anything in this vicinity and the gardens are very gay with late tulips, spiræas, Japan quince and other seasonable things. Apple trees, wistarias, red buds and so forth are just in their prime. The pyruses at the Arnold Arboretum are well worth a visit. Among the newer sorts is one from Russia flowering now for the first time. It rejoices in the fierce name of *Pyrus Niederswetzkyana*. Its flowers are remarkably large and of a much darker pink than ever before known. *Pyrus Toringo atrosanguinea* is one of the prettiest bloomers in the collection. Nothing can excel, however, the grace and delicacy of Mr. Dawson's seedling variety of *Pyrus baccata*, known as the Hillside variety. Among the prunuses there are several very showy subjects, one of the best being *Prunus orthosepala*, a native of Kansas, which is a veritable cloud of white at present. *Fothergilla major*, formerly known as *F. alnifolia*, is now covered with its fragrant, tufted spheres of white.

Embarrassed with an unprecedentedly stagnant market for the season and a very bountiful supply in all lines of material, the cut flower dealer in this town has had a most uncomfortable time of it during the past week and there is little in the indications as to the immediate future to reassure anybody. Decoration day will, of course, soon become a very interesting subject and there is a likelihood that that occasion may see some tall scrambling, as the season is so advanced in this neighborhood that the usual supply of outdoor shrub and herbaceous bloom which is so much in request for Memorial day work will be all past and gone and buyers will be forced to take the exotic material at an enhanced price. So wholesalers and growers are looking forward with confidence to a very prosperous business from their standpoint. At present the price of roses in all varieties is very low and the surplus above the meager quantity called for has to be unloaded at whatever the street men choose to offer. Violets are finished up for the season. Bulbous stock is also about at an end.

At the exhibition in Horticultural Hall on Saturday, May 10, R. & J. Farquhar & Company showed plants in bloom of the new Farquhar rose and received therefor a silver gilt medal. This rose, which was raised by Jackson Dawson, is the result of a cross between *Rosa Wichuraiana* and *Crimson Rambler*. It is of similar habit to the latter but the deep pink flowers are larger and it has a slight fragrance. Other interesting exhibits were some splendid *calceolarias* from Mrs. B. P. Cheney and Geo. F. Fabyan, orchids from J. E. Rothwell and a miscellaneous display of tulips, pansies and other spring flowers from several contributors.

E. J. Welch and Geo. A. Sutherland, who have both been on the sick list for some time, are out and about once more.

Chas. Ingram is in daily with a big shipment of fine lilies to Welch Bros.

Visitors: C. B. Weathered, New York; Geo. C. Watson, Philadelphia.

## St. Louis.

TRADE DULL AND STOCK VERY PLENTIFUL.—GOOD GRADES MOVE FAIRLY WELL.—THE PRICES.—MEETING OF THE CLUB.—PLANS FOR THE JUNE SESSION.—MANY ESSAYS TO BE READ.—BEDDING PLANT TRADE THE BEST ON RECORD.—NO PROBABILITY OF A SURPLUS.

The market at St. Louis is very uncertain and nothing definite can be said concerning it. Good stock is not over plentiful and brings fairly good prices, but the greater part of the flowers sent in are of second grade. As high as \$5 per hundred is received for the choicest roses, while \$2 is the best price for carnations. Prosperity brings a little higher. Some Beauties are sent in; \$3 per dozen is the highest and some are sold as low as 50 cents per dozen. Carnations run as low as 50 cents per hundred in small lots and much lower when sold in quantity. A few pæonias, principally red, are being sent in and bring \$4 to \$5. Sweet peas are coming in quite plentifully but are not exceptionally fine. Lily of the valley is still to be had for \$3 per hundred spikes. Some irises, which are very fine, are sent in but there is not a very large demand for them. Street fakirs are doing a rushing business in carnations at two dozen for 15 cents and better ones at two dozen for 25 cents, but one of our retail stores still gets from \$1 to \$1.50 per dozen for carnations. Why can we not all do this?

The St. Louis Florists' Club met May 8 and though the attendance was very small a very enjoyable afternoon was spent. It was decided to accept the invitation of Dr. A. S. Halstead to meet at the Commercial Club rooms June 18 as we did last year and after the meeting to have a light lunch and bowling. In connection with the meeting a smoker will be held and all are asked to attend as the subject of a picnic will be discussed and other things for the welfare of the club. There are two essays due for this meeting, one by Fred. C. Weber on "Decorations and Designs for General Commercial Purposes" and one by Carl Beyer on "Ferns and Other Greens for the Trade." Besides these are those that were to have been read at the May meeting, one by Otto Koenig on "Care of Bedding Plants," and one by Robt. Tesson on "New Forcing Roses for the Trade." One of the questions discussed at the May meeting was the hybridizing of geraniums. Julius Schray has done some of this work but as yet nothing special has resulted from it. Dr. Halstead has a new Queen of the West. It is a cross between that variety and J. M. Gaar, a variegated. It has inherited all of the good qualities of the Queen of the West, but differs from this variety in that it is pale cerise.

The plant trade has been very good this spring, in fact better than for quite a number of years. There is not likely to be a very big surplus on hand, as there has been for the last few summers. Pape & Bergstermann have quite a fine lot of bedding stock that is being sold off very fast. They are also having quite a bit funeral and cut flower trade of late.

A meeting of the Engelmann Botanical Club was held Monday evening with forty

members present. The tree committee reported that their bulletin was out and that they are trying to organize the block committees in different sections of the city. It was reported that over 65,000 packages of flower seeds had been sold.

Jno. Burke has given up his store on Washington avenue and intends to put in his whole time at his Grand avenue store, which will be remodeled to increase his display room.

Visitors: Wm. Trillow, Chicago; Martin Reukauf, Philadelphia; J. J. Van Waveren, Hillegom, Holland. R. J. M.

## Philadelphia.

ALL STOCK PLENTIFUL.—MUCH OUTDOOR BLOOM IN EVIDENCE.—BEAUTIES STILL IN HEAVY CROP.—TRADE FAIRLY ACTIVE AND PROSPECTS GOOD.—ALL ABOUT THE PRICES.—VARIOUS NOTES OF PERSONAL AND TRADE DOINGS.

Flowers are plentiful, particularly shrubbery bloom from the nurseries, which can now be had in almost any quantity and which help out many a decoration. All sorts of greenhouse stock is also in full supply, particularly Beauty roses, which are still blooming freely, cuts of 1,000 or more a day from a single grower being common. S. S. Pennock takes pride in an unsolicited testimonial which he received from a Pittsburg house to which he shipped last week one order of 2,500 blooms, all long-stemmed. They arrived in perfect order and were most satisfactory in every respect. Prices on choice stock are very low, ranging from \$1.50 to \$3 per dozen. Special teas move well at from \$6 to \$8 per hundred. George Anderson is cutting some good Carnots, which help out the variety in the rose line. Carnations are still fine. Joost still leads in the pink, with Melba a good second. This latter variety must not be lost sight of, as it keeps well up to the front and there are few better. Craig & Son are carrying some good Roosevelt. Prices range from \$1.50 to \$2.50 and a few at \$3 per hundred. Sweet peas are moving lively at from 50 cents to 75 cents per hundred. A few centaureas have been coming in but are not to be had in any quantity. W. K. Harris and Robt. Scott & Son are sending in fine gardenias, but the price is now 25 cents and below. The common cornflower is also seen at \$1 per hundred. Business is very fair for the season and while the stock of weddings is slightly off, it promises to boom up again in a couple of weeks and this, together with the school commencements, will keep things lively for a while.

We had the pleasure of shaking Karl Muller by the hand the other day. In a month or so he will reach the 90-year mark. With the exception of a little rheumatism his health is excellent. He is still active and is about the greenhouses every day. He has a bright, genial disposition and is a great lover of cacti and new plants.

Eugene Bernheimer is now handling some fine Golden Gates from the Edgely nurseries. He is well satisfied with the past season's business, which is the best on record for his house. K.

SINCE 1887 the park commissioners of Concord, N. H., have received and expended a total of \$43,465, of which \$40,000 was regular appropriations and the balance private gifts. The city also expended \$5,350 for land added to White and Rollins parks.

## THE AMERICAN FLORIST

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines *only*.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

GLASS men say this is as good a time  
as any to buy at bottom prices.

THE pæonia as a cut flower has met  
with increased popularity each year.

NEVER before were there so many car-  
nation plants in the fields as at the  
present.

THE cool, rainy weather over a large  
area of the country has delayed the bed-  
ding plant trade.

A NUMBER of growers are now bench-  
ing Mrs. Lawson carnation for a trial of  
indoor summer culture.

WE are in receipt of the report of the  
tenth annual meeting of the American  
Carnation Society, held at Indianapolis  
last February.

W. J. GODFREY, of Exmouth, Devon,  
Eng., has issued a fine lithograph show-  
ing life size blooms of four of his splendid  
new chrysanthemums.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

THE experiment stations throughout  
the country could render valuable assist-  
ance to our numerous horticultural socie-  
ties by making periodical displays of  
injurious insects, in their various stages  
of development, at the frequent exhibi-  
tions.

Another.

ED. AM. FLORIST:—Enclosed is a money  
order for the renewal of my subscription.  
I cannot get along without the AMERICAN  
FLORIST. HAMPTON HUFF.

Walla Walla, Wash.

Warning.

ED. AM. FLORIST:—I wish to warn the  
florists of the country against a man  
who went by the name of Fred. Smith  
here in Omaha. He is a florist, about 32  
years of age, German, and says he has  
been in Brazil for three years, gathering  
orchids, also that he has been employed  
on some prominent eastern places. He  
appears to be a good, pleasant worker  
but he only works long enough in a place  
to gain the confidence of the proprietor  
and go out collecting. He reports that  
the customers don't pay, keeps the cash  
and finally leaves town. In that way  
he swindled about a dozen Omaha people.

LEWIS HENDERSON,  
Sec'y Nebraska Florists' Society.

DEPARTMENT OF PLANT REGISTRATION.

J. M. Horsburgh, Elizabeth, N. J., reg-  
isters zonal geranium Harriet Cleary.  
Bruant type, color cerise pink; trusses  
large and round, on good stems; foliage  
light green with a very faint zone; vig-  
orous and free-flowering.

R & J. Farquhar & Co., Boston, Mass.,  
register climbing rose The Farquhar.  
R. Wichuraiana × Crimson Rambler,  
raised by Jackson Dawson. Flowers  
bright rose, slightly fragrant, in clusters  
similar to Crimson Rambler but indi-  
vidual blooms larger and more double.  
Foliage dark green and glossy, larger  
than that of Wichuraiana, persistent and  
almost evergreen.

WM. J. STEWART, Sec'y.

Pruning Hardy Rhododendrons.

ED. AM. FLORIST:—Should hardy rho-  
dodendrons be manured in the fall or  
spring, and when is the proper time to  
prune them? I have been informed that  
the fall is better, and again, just after  
they are done flowering. As there seems  
to be such a variance of opinion, I would  
be pleased to hear from some authorita-  
tive source. J. W. B.

If it is desired to shorten in straggling  
growths and thicken up the plant,  
spring is the proper time and the cut-  
back wood should be, syringed frequently  
and kept moist to encourage the forma-  
tion of new leaf buds. The best time to  
manure rhododendrons is just as they  
are about to make their young growth.  
The best mulch for rhododendrons, how-  
ever, is a good bed of leaves about a foot  
deep, applied every fall, which should  
never be disturbed afterward but allowed  
to decay. This is the only manure we  
give them. JACKSON DAWSON.

Cleveland.

TRADE ACTIVE AND AHEAD OF PREVIOUS  
YEARS.—LARGE CALL FOR FUNERAL  
FLOWERS.—STOCK PLENTIFUL AND MOST  
OF IT GOOD.—SEVERE FALL IN TEMPERA-  
TURE DOES NOT HARM STOCK IN FIELDS.  
—JOTTINGS OF DOINGS OF VARIOUS GROW-  
ERS.

Business for the past week has been  
very satisfactory. The volume of sales  
during the first half of this month is  
largely in excess of former years. A  
number of prominent members of the  
community have crossed "the great  
divide," hence an exceedingly large  
demand for floral tributes. The "please  
omit flowers" is not so much in evidence  
in Cleveland as in some cities in the east.  
June promises to be a record breaker,  
judging from the number of orders com-  
ing in for weddings and other social  
functions of a high order. All flowering

stock coming in is exceptionally good,  
roses in particular. Carnations seem to  
be more plentiful. Outdoor bulbous  
stock is about done for. Outdoor valley  
is coming in. Lilacs are in abundance,  
with the quality fairly good. Pæonias  
have not made their appearance yet. The  
severe weather of the past week proved  
detrimental to their development. On  
Saturday, May 10, a heavy snowstorm  
struck us, completely covering the ground,  
the worst experienced at this season for  
the past sixteen years. No perceptible  
damage, though, resulted to vegetation.

Sweet peas are very much in evidence.  
Considerable grumbling is heard about  
Early Blanche Ferry, fully two-thirds of  
the flowers being a dull, streaky pink,  
not at all a desirable color and hard to  
dispose of at any price. Who is to blame  
for this, the grower or the seedsman, or  
is the variety deteriorating? The com-  
plaint seems to be quite general.

It is a pleasure to walk through August  
Schmitt's place in Glenville, everything is  
so neat and orderly. One sees upon  
entering the shed in a conspicuous place  
the following sign: "A place for every-  
thing and everything in its place." From  
the general appearance of the establish-  
ment the old maxim is lived up to. His  
spring stock is up to its usual standard  
of excellence. A large batch of hydran-  
geas look very promising for Memorial  
day. No waste corners are to be seen  
here.

Fred. Aul was wearing a satisfied smile  
when visited, having just completed  
twenty-four large designs for one funeral.  
Business is rushing with him. He has  
obtained the contract to furnish and  
plant all the bedding stock for the Glen-  
ville Driving Park, which will net him a  
neat sum. He is going to repair and  
repaint his entire plant this year.

James Eadie would like to dispose of  
his St. Clair street property. The pres-  
ent location is becoming unsuitable for  
rose growing purposes, hence his desire  
to move to some location where he could  
procure the proper conditions.

The club held its regular meeting Mon-  
day evening and elected J. G. Schuman a  
member. Mr. Schuman is manager for  
the Essex Greenhouses, Coe Ridge, O.

The Bate Bros. have under construc-  
tion a new house 20x30 for Brides and  
Bridesmaids. Echo.

## OBITUARY.

DAVID CLIFFE.

David Cliffe, one of the pioneer florists  
of Germantown, died May 6, at St.  
Joseph's Hospital, Philadelphia. Mr.  
Cliffe was born sixty years ago in Delph,  
Yorkshire, England, and came to this  
country thirty-three years ago, when he  
went into business as a florist near Dan-  
ville, Pa. Twenty years ago he removed  
to Philadelphia and established the  
greenhouses at Johnson street and Ger-  
mantown avenue, which he conducted  
until his death. He was first married in  
England, but his wife died five years ago.  
By this marriage three sons survive.  
Three years ago Mr. Cliffe married Miss  
Beatrice Holm, of West Philadelphia,  
who also survives. Mr. Cliffe had been  
a sufferer from diabetes for several  
months. Some few weeks ago he acci-  
dentally ran a nail into his left foot, and  
his diabetic condition eventually caused  
gangrene to develop. He was then taken  
to St. Joseph's Hospital, where it was  
found necessary to amputate the left leg  
on April 30.

M. J. LYNCH.

Michael J. Lynch, one of the best known business men of Poughkeepsie, N. Y., and widely known in the trade, died on the evening of May 12, at 8 o'clock, after a long illness, in which he battled bravely against the inevitable, throat and lung difficulty proving fatal. It was known that he was very ill, but the announcement of his death will be both a surprise and a shock to his many friends. Mr. Lynch was truly a self-made man, and his success in life represents a triumph over obstacles which have crushed many a one before him. He was born in Ireland, in the County Limerick, in 1846. He was one of five children of Matthew and Margaret Fitzgerald Lynch. His father was a gardener by occupation, and he died when Mr. Lynch was six months old. In 1848, in the great tide of immigration from Ireland, the widowed mother came to America with her baby. But two years later they returned to Ireland, where Mr. Lynch remained until he was 18 years old, leaving school at the age of 11. At that early age he was engaged by the Earl of Clare, whose estate lay on the river Shandon, to work on the farm and in the garden. He came to America in 1864, bringing with him his mother and his brother Thomas. After various vicissitudes he obtained his footing and was at different times employed by W. H. Aspinwall, at Tarrytown, on what is now the Rockefeller place, and Colonel Babbitt, of Newton, N. J., where he laid out extensive grounds and established greenhouses which attracted wide attention to his skill. He located in Dutchess county in 1868, as head gardener for William B. Dinsmore, at Staatsburg. Two years later he removed to Poughkeepsie where he commenced the business in which he became so well known. He began in a small way with one greenhouse, 12x50 feet, but he built up a fine range of glass, a big business and a valuable estate. In 1870 Mr. Lynch was married to Catherine Powers, of Rhinebeck. Their children are Thomas and John, associated with their father in business; Mary, Margaret, who died at the age of 16; James and Kate. Mr. Lynch was a man whose citizenship took the form of civic pride, and he made it his business to be interested in and informed upon local affairs. He was a member of the S. A. F. and some of his closest friends were his trade associates.

DENVER, COL.—E. W. Davies, for eight years florist at the City Park, has resigned to take charge of affairs at the greenhouses of Dayies Brothers at South Denver.

BUTLER, PA.—Miss E. M. Holt has rented the greenhouses at Kane, Pa., to G. H. Linfoot and is beginning the erection here of a range of about 10,000 feet of glass, to be used mostly for carnations.

KNOXVILLE, TENN.—C. W. Crouch made some very large and handsome funeral pieces for Col. C. C. Howell, who died at Phoenix, Arizona, but was brought to Mt. Vernon, O., for interment.

WASHINGTON, PA.—On May 1 Joseph H. Seaman purchased of the I. Shelby Crall estate their branch store located in this city. Mr. Seaman has had charge of this store for the past four years and is thoroughly acquainted with the trade, and no doubt will make a success of the business.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

**SITUATION WANTED**—By intelligent young man, experienced in decorative plants, where he can learn designing, decorating, etc. Address C. A., Box 200, Saltillo, Pa.

## THE SEED TRADE.

### AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHRUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

LARGE field pumpkin is one of the latest short items.

GROWERS of Roman hyacinths in southern France are asking an advance of 15 francs per 1,000.

SEED pea crops in general are looking well. In some sections the early sowings are backward, owing to continued cool weather.

J. MARTENS, the well-known lily of the valley grower and dealer, of Hamburg, Germany, is making his second tour of the United States, the first having been made several years ago.

VISITED CHICAGO: C. C. Massie and W. H. Crossland, of Northrup, King & Co., Minneapolis, Minn.; John R. Condon, with H. W. Buckbee, Rockford, Ill.; J. J. Van Waveren, Hillegom, Holland; W. R. Roach, Cambridge, N. Y.

### American Seed Trade Association.

In the last issue of the AMERICAN FLORIST appeared an item referring to the date of the annual meeting of the American Seed Trade Association as "July 24, 25 and 26." This should have read June 24, 25 and 26. Readers will kindly note the correction.

Prospects point to this meeting being largely attended and one of unusual interest. A very interesting programme has been prepared, and the subjects under discussion will be of importance to the trade. Secretary Wilson, of the Department of Agriculture, and Dr. B. T. Galoway, Chief of the Bureau of Plant Industry, have accepted invitations to be present and will address the association on matters pertaining to the government seed distribution. It is the expressed wish of the officials of the department to make its work in the distribution of seeds a benefit to the seed trade, and I believe that this meeting will prove very helpful towards promoting and securing a better understanding between the Department of Agriculture and the seed trade.

Part of one day will be devoted to St. Paul, and at Minneapolis arrangements have been made for a visit to historic Minnehaha Falls, a moonlight excursion on Lake Minnetonka, etc.

We are already assured of a one and one-third fare for the round trip between Chicago and Minneapolis, and it is expected that a one and one-third rate will be made from all parts of the country for the round trip. Announcement of this will be made later.

Assurances have been received from many who have never met with the association before that they will be present on this occasion. The meeting will be held at the West Hotel. Rates on the American plan \$3 a day, including room without bath, \$3.50 and upwards for rooms with bath. I shall be glad to attend to the requests of those wishing reservations made, or to give such further information as may be desired. Members of the seed trade and those in collateral lines, such as lithographers, bag makers, etc., will all be cordially welcome to Minneapolis.

J. E. NORTHRUP,  
 Pres. Am. Seed Trade Ass'n.

### Columbus, O.

COLD DAMP WEATHER CHECKS THE RUSH FOR BEDDING STOCK.—OUTDOOR FLOWERS PLENTIFUL.—ROSES MILDEWED.—NOTES.

Cold weather has put a damper on the demand for bedding plants. While little damage was done to the stock already planted out, there was some frost reported in this locality. Many of the cut roses are showing strong evidence of the mildew, not unusual for this season of the year. Some beautiful table decorations have been made during the last week out of our own wild violet, of which this country produces an abundance, a dark blue variety. Lilac is about done for and all the boys are keeping an eye on their crop of pæonias for Memorial day.

Sherman Stephens reports an unusual demand for pansies this season, but, like many of us, allowed mildew to attack

his fine roses in the rush of other business. Very few pink or white geraniums are grown and, judging from the demand again this season for reds, there will be still less another season.

Gus. Drobish reports quite a run on herbaceous stock, of which he has the best collection in the city. **CARL.**

GRAND HAVEN, MICH.—George Hancock & Son are preparing to rebuild several houses and thoroughly modernize their place.

LENOX, MASS.—At the regular meeting of the Horticultural Society on May 3 Ed. Norman exhibited very fine flowers of *Cypripedium Mastersianum*. Mr. Norman also gave an account of a recent visit to Summit, N. J., and a glowing description of the new rose Mrs. Oliver Ames as seen growing there.

## SOW ENGLAND'S PRIZE STRAINS CALCEOLARIA, CINERARIA AND CHINESE PRIMROSE.

## THE NURSERY TRADE.

### AM. ASSOCIATION OF NURSERYMEN.

R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres.  
 GEORGE C. SEAGER, Rochester, N. Y., Sec'y.  
 Twenty-seventh annual convention, Milwaukee,  
 Wis., June 11-13, 1902.

THE elm trees along Michigan avenue, one of the finest boulevards in Chicago, are being replaced by poplars. It is said that there was too much smoke for the elms.

THE Main State Pomological Society is holding horticultural schools in various rural communities, the first purposes of which are to interest school children in the study of plant life.

THE park commissioners of Springfield, Mass., have organized for the year with C. E. Mackintosh as chairman and D. Hartnett clerk, and will meet regularly on the first and third Mondays of each month.

WALTER MULFORD, the Connecticut state forester, has been inspecting many tracts of land which have been offered for sale for the purposes of a state park. An initial purchase for a reservation for the practical demonstration of scientific forestry will probably be made not later than July.

THE growth of the business of Thomas Meehan & Sons has made it necessary to establish a complete office at their Dreshertown, Pa., nurseries. This will be under the direct charge of Thomas B. Meehan, who will devote his entire energies to the wholesale branch of the business. The innovation will be made July 1.

MILWAUKEE is one of the most beautiful of the cities in which the American Association of Nurserymen has ever met and, coming at the close of a very busy business period, the central location promises to result in an unusually large attendance. Professor L. H. Bailey promises to be on hand to make an address.

THE Botanical Society of Western Pennsylvania has had a meeting at Carnegie Institute, Pittsburg, to make preliminary arrangements for the reception and entertainment of the members of the American Association of Botanists, of whom some 600 to 1,000 are expected to be in attendance at the annual convention in that city June 28 to July 3.

"THE nursery trade in the south is good," says N. W. Hale, of the Knoxville Nursery Company. "This makes the third year of a general fruit crop throughout all the territory canvassed by retail nurserymen, which includes about twenty states. The country generally is in good shape, farmers gradually progressing, and in my judgment the nursery trade is on the eve of a great boom in the south."

### Toronto.

TRADE TAKES OF RENEWED ACTIVITY AND STOCK SHORTENS UP.—LARGE CALL FOR FUNERAL FLOWERS AND WHITE STOCK SCARCE—VARIOUS NOTES OF LOCAL AND TRADE DOINGS.

Business has braced up considerably the past week and, now that the growers are replanting, stock is shortening up. Beauties are again not near enough to go around. Other varieties are a little more plentiful and still of good quality. Carnations are scarce, especially white, which are gathered up quickly. The many orders for funeral work keep lilies and other light-colored stock well used up.

The decoration of the Batoche monument in Queen's Park, under the auspices of the Northwest Field Force, took place last Saturday and many floral tributes were donated by the different military organizations, giving the florists a busy day. Among the private contributors were J. H. Danlop, S. Tidy & Son and the Dale estate, Brampton.

The tulip beds in the city parks and gardens are a blaze of color and many good varieties are seen, which are appreciated by the citizens. Each year a larger quantity of bulbs are planted and those planted at the Parliament grounds are a credit to any city. Simmers & Company supplied the bulbs.

Arthur Frost, who had the freeze-out last winter, is again marketing good small stock. His callas, sweet peas, swainsonia and white stocks are especially good.

J. Gard is sending in some good colored sweet peas. H. G. D.

### Fall River.

THE DISSEMINATOR OF CRESSBROOK HAS A GOOD WHITE SEEDLING.—ENLARGED PLANT IN VERY GOOD SHAPE.

Although a novice at handling seedlings, Mr. Warburton has certainly introduced Cressbrook like a veteran, having made ample preparation to grow enough stock and to meet all comers. A white one may be next in order, although it must undergo another year's test. A stroll through the houses and a glance at the general stock proved interesting. Everything about the establishment looks clean, thrifty and vigorous, showing the result of the best care and attention. Since my last visit, over a year ago, the place has been considerably enlarged, three modern houses each 25x100 having been added to the range. Ten houses, comprising 35,000 feet of glass, are now included in Mr. Warburton's establishment. NOMIS.

# QUEEN OF CARNATIONS

All others pay homage to

# ENCHANTRESS

Light pink, deepening  
toward center,  
deeper than  
Daybreak at its best

Originated by  
PETER FISHER.  
An advance on its pol-  
len parent, the Lawson.

**L**ARGEST AND BEST CARNATION ever offered to the trade. Pays more per square foot of bench space than any Carnation in commerce. Blooms average 3 1-2 inches in diameter, over 4 inches when fully developed. Calyx never bursts. Delivery commencing January 15, 1903. Orders for over 100,000 already booked. Books closed for January delivery. If you wish February delivery do not delay sending in your orders. Price list of rooted cuttings—per dozen, \$3; per 100, \$12; per 1000, \$100; 2,500 at \$95 per 1000; 5,000 at \$90 per 1000; 10,000 at \$80 per 1000.

## J. D. Thompson Carnation Co.

JOLIET, ILLINOIS.

## OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and cycling readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

## At New York.

An enjoyable session of the bowling club was held on Monday afternoon, May 12, at which the following scores were recorded. Mr. Lang's challenge has not yet been taken up, even by the Philadelphians.

Player	1st	2d	3d	4th
Butterfield.....	148	130	151	136
Siebrecht.....	175	136	141	142
Burns.....	158	181	157	181
Lang.....	180	156	163	160
Shaw.....	157	139	113	99

## At Flatbush.

The bowlers have moved for the summer season to the up-stairs alleys. Last Thursday evening, being their first experience on these highly-polished alleys, the scores made on that occasion were mostly in the two figure class and we refrain from putting them in type out of regard for the participants. Louis Schmutz made his first appearance for many weeks. H. A. Bunyard was a visitor and industriously distributed placards and tickets for the approaching excursion of the New York Florists' Club.

## Buffalo.

WEATHER NOT FAVORABLE TO CUT FLOWER SALES AND STOCK PLENTIFUL — BIG CALL FOR BEDDING PLANTS.—MANY WINDOW BOXES AND LAWN VASES TO BE FILLED.—NOTES.

With weather rather on the cold side, the influence has not been in favor of the sale of flowers. Every store is selling cheap roses and some have had carnations as low as 19 cents a dozen. Good Bridesmaids and Brides sell at from \$1.50 to \$2 per dozen and Beauties at from \$6 to \$9 per dozen at retail. Good window displays are common now, owing to the large supply of stock. At the greenhouses everyone is busy now booking spring orders for bedding stock and the lawn vases so popular in our city. Veranda boxes have their usual call this year, as last. Flower beds in the parks are now fine with tulips, while many vases on private property are temporarily filled with pansies, which look fine.

The park commissioners are working hard to get the North Park grounds in shape again after the tear-up for the Pan-American. Strong efforts were made to have the electric tower placed at the front but the price asked for it and the expense of maintaining it were too great.

The next big demand for flowers will be for Memorial day. School commencements next month will call for a fine lot of roses, as orders are now coming in for them. Mrs. Bradt carnations are fine, but Marquis is not keeping very well. All other varieties are very good.

S. A. Anderson is very busy stocking up his greenhouses lately acquired from F. Katoll, on Linwood avenue, in the finest residence part of the city. W. A. Adams now has charge at Mr. Anderson's store at 440 Main street.

J. N. Rebstock expects to make some big changes in his Elmwood avenue houses and office this summer.

Several weddings lately have called forth a number of decorations, but none very elaborate. A very large wedding is booked for next month.

Palmer & Son have not started the alterations in their new store as yet.

Visitors: E. R. Fry, Rochester; S. B. Smiley, Lancaster. BISON.

## Bowling Green, Ky.

NEW CONCERN INCORPORATED TO BUILD UP A LARGE PLANT AND FLOWER BUSINESS.

The Burdell Floral Company has filed articles of incorporation, with a paid in capital of \$2,500. The incorporators are R. W. Burdell, C. J. Burdell, F. S. Burdell and J. M. Sterrett. Officers are as follow: President, R. W. Burdell; manager, C. J. Burdell, secretary and treasurer, F. S. Burdell.

The company has bought the Hills property, consisting of about four acres, on the Cemetery pike, and will put up a large greenhouse and raise cut flowers and plants on a large scale and will establish a store in the city at which they will do a general florist business. They expect to do a big out of town business and ship their stock all over the country.

MARYVILLE, Mo.—C. K. Hollied has been very busy preparing to move his houses to get more room and to add another house 20x80.

UTICA, N. Y.—At the annual meeting of the Utica Florists' Club held this week the following officers were elected: President, Frank J. Baker; vice-president, Wm. P. Pfeifer; treasurer, Chas. F. Seitzer; secretary, J. C. Spencer.

PATERSON, N. J.—On a recent evening a man was loitering about the new home of Edw. Seecy, into which they had only moved that day, and when Mrs. Seecy was alone attempted to gain admission. She fired a revolver to scare him away and Mr. Seecy, returning at the moment, grappled with the fellow and held him until the police arrived.

SYOSSET, N. Y.—The Nassau County Horticultural and Agricultural Society has been organized by a number of residents and land owners of Nassau Heights and Syosset, Long Island. The first exhibition under the auspices of this association will be given next October, when a prize schedule aggregating nearly \$1,000 is contemplated.

## Carnation Floriana.

We believe this to be the best pink carnation introduced to date, was disseminated in the spring of 1901 by originators, Messrs. Fillow & Banks. Price, \$2 per 100; \$50 per 1000. 50 at 100 rate, 500 at 1000 rate. Less than 50, 8c each.

TRADE MOSTLY IN THE LINE OF FUNERAL FLOWERS—SOME GOOD WORK REQUIRED.—NOTES.

Trade has fallen off somewhat the last week and with the exception of funeral work there has been very little doing. With the congressional party that attended the funerals of Congressmen Otey and Salmon, A. Gude & Brother sent a man to look after the flowers. A large number of fine designs were made for Admiral Sampson's funeral. Several fine large wreaths were noted, made of Liberty roses, lily of the valley and cat-tle-yas. One wreath was made solid of lily of the valley. It took two large wagons to carry the flowers to Arlington Cemetery. The weather is keeping very cool and cloudy, which suits German irises very nicely and they are making a fine show. P. G.

Peoria, Ill.

GROWERS BUSY PLANTING STOCK IN THE FIELD.—MANY BUILDING FOR CARNATIONS—TRADE GOOD.

Everyone in the florist line has been very busy planting out carnations and other stock the last month. Bedding plants are selling well, although the weather has not been very favorable.

Henry Baer, who has been with C. Loveridge since leaving Murray's, has started to build his new range of houses, which is to be 50x200 for carnations only.

C. Loveridge will build one house 25x125 for carnations and one house 10x125 for propagating.

Juergens will replace two of his old houses with one modern house, using Garland iron gutters.

Everyone reports trade good, and plenty of stock. L.

CHATTANOOGA, TENN.—On May 6 this city was treated to a flower parade which eclipsed all its predecessors not so much in the number of decorated vehicles as in the profusion, but good taste, with which the flowers were used.

# Asparagus PLUMOSUS NANUS....

Syracuse, N. Y.

HEAVY FROST DOES MUCH DAMAGE TO EARLY STOCK.—TEMPERATURE FOUR DEGREES BELOW FREEZING.—TRADE INJURED BY UNSEASONABLE WEATHER.

Central New York was visited Friday and Saturday nights by two of the heaviest frosts that have ever been known so late in the year. The result is that florists who had anything outdoors lost heavily and fruit growers and nurserymen are out thousands of dollars. The temperature in some places reached as low as 28° and pans left outdoors had ice in them a quarter of an inch thick. Much damage was done to flowers and shrubbery. Many had a good growth of pæonias but they wilted and turned black. Every one who had tobacco planted says it will be a total loss.

Henry Morris was fortunate in not having much stock outdoors, as were also P. R. Quinlan & Company and Henry Burt. May 20, they think, is early enough to put out tender stock and they were right this year. The cold weather has ruined the plant trade for the past week, and has made all business rather dull. There are no weddings to speak of during the month of May and but few social events.

A novelty which Henry Morris has displayed in his windows is *Metrosideros floribunda*. It is not a particularly salable plant, but makes a good display and attracts considerable attention when tastefully arranged.

There are some very fine hydrangeas in the market. The majority of the local florists offer them at this time of the year, preferring it to the Easter season for this plant. A. J. B.

Monongahela, Pa.

Beginning with May 1 the business of the late I. Shelby Crall will be continued by the sons, Charles S. and James S. Crall, and H. M. Griffith, son-in-law, under the firm name of I. Shelby Crall, seedsman and florist. Practically there is no change, except that Mr. Griffith represents his wife's interest in the estate, the sons having been connected with the business for the past twenty and fifteen years respectively. C.

# Giant Cactus,

4 to 5 feet high, 10 to 14 inches in diameter. Grand specimens of these sensational decorative plants.

## FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLERS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for gophers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is complete in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

TRADE ON THE DECLINE AND CUT FLOWERS ACCUMULATING.—QUALITIES DETERIORATING.—CLUB PLANS JUNE EXHIBITION.—NOTES OF VARIOUS DOINGS.

Business continues on its downward course but this is the first poor week in several months. Stock is piling up and prices are going down. Low prices are no inducement to buy. Bridesmaids and Brides look as though they were sorry they came and Beauties, Jacqs, Perles and Bon Silenes are the standard of excellence. Yellow daisies are exceptionally fine. Carnations are still up to the standard and a little cheaper in price. The demand for palms has begun and the stores seem well stocked with them. They are selling rapidly and bringing good prices.

The city comptroller has refused to sign the warrant for salary of Elmer E. Siebert, recently appointed superintendent of Highland Park. Lack of knowledge and ability to perform the duties required are the comptroller's reasons. Mr. Siebert has never before held a position in this profession.

The Pittsburg and Allegheny Florists' Club is perfecting details for a flower show in the latter part of June. The show last year was very successful. This year the exhibition will require a much larger hall and much better lighting arrangements.

Randolph & McClements exhibited 3,000 American Beauties in their windows and store last Friday. They were used Saturday at a dinner given to C. M. Schwab, president of the United States Steel Corporation.

David Geddes has succeeded Mrs. E. A. Williams at her South Side store. Mrs. Williams will devote her time to her handsome Penn avenue store.

On Friday night a heavy frost occurred in this section. The temperature fell to 10° but no loss is reported among the growers.

Thomas M. Ulam and Jennie P. Myers were united in marriage on Wednesday, April 30. E. L. M.

NEW ULAM, MINN.—C. H. Boock has a large spring stock and is preparing for a big trade. He has found business good all season.

DES MOINES PLANT CO.,

38th St., Des Moines, Iowa.

## IMPATIENS THE QUEEN

This variety we now offer for the first time, it being far ahead of any cheap blooming house plant that we know of. A grand plant for out-of-town florists.

Flowers 1¼ to 1½ inches in diameter, color a delicate satiny pink with bright carmine eye, center of petals faintly tinged with white, wonderfully profuse and of the easiest culture. Price, 2-inch pot plants, \$1.50 per doz.; \$10.00 per 100.

CENTRAL MICHIGAN NURSERY, Kalamazoo, Mich.

Please mention the American Florist when writing.

## Cincinnati.

PETERSON HAS LARGE AREA OF OUTDOOR STOCK FOR CUT FLOWERS.—FINE YOUNG STOCK UNDER WAY.—MEETING OF THE SOCIETY.—DIRECTORS NOMINATED.

J. A. Peterson has been hustling the past week to get his asters planted. He has about 15,000 as nice plants to set out as one will see in a long while. A look around the place convinces the visitor that Mr. Peterson has not been asleep, for a field of 50,000 lily of the valley, an acre of irises, another of pæonias and tree pæonias, a large tract of dahlias, with an abundance of hardy roses and a big lot of Crimson Ramblers, induces one to believe that Mr. Peterson is certain of a large cut of outdoor stock. A house of Pandanus Veitchii, with fine color, are just ready for a shift. One of Mr. Peterson's hobbies is Begonia Gloire de Lorraine and he has thousands of small plants in thumb pots. His carnations for this time of the year are throwing some fine blooms, especially Mrs. Bradt and Marquis. A couple of the men were transplanting the cyclamens into 4-inch pots and they are the best around this city.

The meeting of the Florists' Society Saturday night was the best attended for a year. The following names were placed in nomination for directors for the ensuing year: Geo. Bartlett, Wm. Murphy, R. Witterstaetter, Ben. George, Frank Ball, E. G. Gillett, George Murphy, W. K. Partridge, J. W. Rodgers and Wm. Schuman, five to be elected. The polls will be open from 9:30 p. m., Saturday, June 14. Already applications are being received for the summer outdoor meetings. Chas. Pommert, of Amelia, O., gets the July meeting at his place, and Will Murphy the August meeting, at least that is what the society voted for Saturday night. D.

PORTCHESTER, N. Y.—The Westchester Gardeners' Association meets here the fourth Saturday in each month. The officers are Fred. Fremd, president; John Shore, vice-president; Wm. Smith, treasurer, and Geo. Draycott, Rye, secretary. The membership is now seventy-eight and a show is proposed for next fall. At the April meeting President Fremd gave an account of his recent visit to Florida; the May meeting will be utilized for a discussion on outdoor shrubs by Vice-President Shore, J. F. Williams and others, and for the June meeting Japanese stock will be the subject.

Nashua, N. H.

LOCAL TRADESPEOPLE SAY IMPROVEMENT IS THE ORDER OF THE DAY.—GOOD STOCK IN EVIDENCE.—NEW CARNATIONS TO BE EXTENSIVELY PLANTED NEXT FALL.

Improvements of one sort or another have been going on at the two leading floral establishments here and, after the spring rush is over, additional betterments will be the order of the day. George E. Buxton will extend one of his carnation houses about fifty feet, and while at it will give his entire place some overhauling. Mr. Buxton, while growing a general stock for his retail trade, pays especial attention to carnations, of which he has four large houses. That he grows them well may be inferred from the fact of his Bradt taking twice in succession the first prize at the Boston flower market. In fact, his Bradts are conceded to be the finest in New England. Other varieties do equally well with him. Lawson and Marquis are his leading pinks. Crane and Judge Hoitt, the latter a seedling of his own, a shade lighter than Crane, are grown for red. Governor Roosevelt, as a crimson, is without a peer, and White Cloud, in his opinion, is the only one to depend upon for quantity in midwinter, when the demand for high grade whites by far exceeds the supply. Quite a number of this year's introduction will be housed this fall, among them being Gov. Wolcott, Higinbotham, Harry Fenn, J. H. Manley, Cressbrook, Floriana and Fair Maid. With an array like this there need be no scarcity of high grade flowers at Buxton's the coming season.

At August Gaedeke & Company's, things, as usual, look in the pink of condition, both roses and carnations being all that one could possibly desire. Like everywhere else the Lawson takes the lead as a pink, although Joost is behaving splendidly, making up in quantity what it lacks in size. Mr. Gaedeke has been especially successful with his Begonia Gloire de Lorraine for the past two seasons, producing as fine specimens as one could find anywhere and finding a ready market for in Boston, where good stock is sought and well paid for. It is his intention to grow a larger quantity this season for his retail trade as well as for the wholesale market.

Both G. E. Buxton and A. Gaedeke & Company report a fine trade all along with a rush. NOMIS.

Lowell, Mass.

EARLY SPRING GIVES PLACE TO COLDSNAP.  
—MUCH OUTDOOR STOCK INJURED BY  
FROST.—CUT FLOWER BUSINESS LIGHT.  
—PRICES TAKE A DROP—VARIOUS NOTES  
OF LOCAL AND TRADE DOINGS

After a week of spring-like weather the temperature dropped so low that it played havoc with stock outdoors. On the night of May 11 we had a frost that killed all the asparagus of the truck growers and caused the greenhouse men to rekindle their fires. Business that started in with a boom at the first of the month has taken a tumble with the temperature and there is little doing, scarcely any funeral work being called for. With no business in the cut flower trade, prices have dropped, especially on carnations, which seem to be in abundant supply at present. Good blooms can be bought for \$1.50 per hundred, quite a drop from \$3 per hundred about a week ago. Memorial day always makes a brisk demand here for the cheaper and indestructible goods and these are now being shown in store windows.

The supply of sweet peas is so large that the prices realized are not good, blooms of good quality selling for 40 cents per hundred, and even lower than that in large quantities.

Pansies, myosotis and daisies in baskets, eight plants to a basket, sell well for 25 cents, but some of the price places have them marked 15 cents per basket.

Collins & Company are erecting two fifty-foot houses on Rogers street. They will grow violets for the Lowell market next winter.

It will not be very long before there will be an automobile in Lowell, delivering flowers, if present reports are true.

M. A. Patten and mother went Monday to South Waterboro, Me., to attend a funeral.

Allan Pierce was in town last week.

## CARNATIONS.

THE SEASON'S SUCCESSSES.

Carnations as a rule started to bloom late last season in western Pennsylvania, why I can only guess. Joost was the first to start, not forgetting Dorothy, which is profitable, though not as good a flower as Joost with me.

In white, Cloud leads, Norway being rather slow and not pure white. Lawson paid me best of all pinks. Hector is still a good red with me, although I am going to try two other reds the coming season.

Morning Glory is a good light pink, free, good stem, pleasing color, although only medium in size. Prosperity came too slow to pay to grow many after this.

F. BURKI.

In common with many other Indiana growers we have had both White Cloud and Norway during the past season. White Cloud has done well with us and we still have to see one which will displace it. Norway made flowers early in the fall, then went to pieces and has never recovered. We were not able to get stock of Lorna for the past season but shall try it next winter. We shall also try Queen Louise, which I think is a good one, from what I have seen of it.

In reds we have been growing G. H. Crane and America. The latter is not so good as Crane, which gave us good flowers all winter and is still at it. America has not done nearly so well and we shall be contented with Crane until after Adonis has become available.

Our pinks this season were Genevieve Lord, Mrs. Lawson, Marquis and Dorothy. Lord gave us a number of flowers in the fall and spring, with good color but poor form, and we shall not grow it again. Lawson's only fault is its bursting so badly in midwinter; we cannot do without it. I think that if we grew Marquis indoors all summer it would give us more flowers and stiffer stems than we get from field-grown plants. We shall try it next winter, for the quality and color of the flowers make the plant deserving of further test.

Dorothy is certainly a success and making a reputation for itself as a money maker. I have not heard of many who cannot handle this variety. It blooms from September until time to replant the houses. We benched 7,000 Dorothy last season and shall grow the same number next winter.

Roosevelt is the only dark red that will occupy any space in our establishment next season. We shall plant more of this variety than last year. Our Prosperity have not given enough flowers to pay for benchroom, but we shall grow a few next season, for it is well worth further trial.

This narrows our list down considerably for next winter. Besides those merely grown for trial, including several new ones, we shall have only White Cloud, Lorna, Queen Louise, Crane, Dorothy, Lawson, Marquis and Roosevelt.

CHAS. KNOPP.

Owing to the extreme difference in climate it is doubtful whether our experience with carnations here in Colorado is likely to benefit those east of the Missouri river. Our soil, too, is peculiar, the rainfall being so meager that a sod is not formed and the soil is consequently almost entirely decomposed mineral, unlike that wonderful soil around Chicago. We get slender, wiry stems. We may some day learn the secrets of this soil so as to secure the rank, luxuriant growth obtained by the aldermanic Andrew at Hinsdale, but I am not sanguine.

So far Lawson, Norway and Genevieve Lord are the only carnations with stems uniformly strong enough to hold the flower erect. Lawson is the most productive and the most satisfactory carnation we have ever grown; and when I say most productive I mean it has produced more flowers to the plant than any other we have ever grown, not barring Scott or Maceo. Long life to Peter Fisher! May he live to give us many more as good as Lawson and Enchantress.

We have this season grown thirteen varieties and on May 1 they ranked in the following order as to number of blooms produced. Lawson, Maceo, Lorna, Marquis, Roosevelt, White Cloud, Norway, Crane, Olympia, Hill, Lord, Estelle and Prosperity. In point of money produced they stood Lawson, Lorna, Marquis, Maceo, Prosperity, Roosevelt, Norway, Olympia, White Cloud, Crane, Lord, Hill and Estelle. We shall only plant two of these largely the coming season, Lawson and Lorna.

Our store complains that Marquis goes to sleep too quickly. We shall try Floriana and Dorothy. We consider Genevieve Lord a seductive maiden, always charming, always holding out alluring prospects and sure to separate us from our money. Maceo and Crane will be

replaced by seedlings of our own. We shall try Gov. Wolcott rather heavily, as Lorna's stem is not strong enough. Norway has been too slow and has been a dirty pink a large part of the time.

We shall let Hill and White Cloud go with our blessing for the good they have done. Hill is a good flower and on a fine stem, but too shy, while White Cloud is not really first-class for more than a third of the season. We shall have Crane grown for us on contract, paying 3 cents the season through, as that is cheaper than we have been growing them, and scarlet we must have.

Estelle has hardly had a fair trial, as our plants were small when benched in the fall, but it trailed along in the rear all the season and was shut out by the distance flag. It will not start on this track again. A large number of the blooms were single and the stems were short. Prosperity, being a novelty, averaged twice as much per bloom as Crane or Lord and so made a fair showing. We shall grow few, if any, next season, though we hate to drop it; but it is dollars we are after.

Our experience with Lorna is the reverse of Mr. Herr's. Lorna began early and kept at it in good style up to the end of March. Since then lots of grass and few blooms. In number of blooms cut our four leaders January 1 were in this order: Maceo, Lawson, Roosevelt, Marquis. February 1, Maceo, Lorna, Marquis, Lawson. March 1, Maceo, Lorna, Lawson, Marquis. April 1, same as March 1. May 1, Lawson, Maceo, Lorna, Marquis. We have grown Marquis since it was sent out and it has never been late in coming into bloom, as is so often said to be the case in the east.

Everyone should keep a record of the cut from each variety. I recently asked our foreman and our carnation man to name our three most productive carnations and neither of them named more than one correctly. I doubt whether many growers will guess better than that.

J. A. VALENTINE.

Referring to the different varieties of carnations which we have grown the past season, and those which we will grow the coming winter, would say that we keep a record of all varieties which we grow, as to the number of blooms cut and exactly what they are sold for. In this way when it is time to decide what stock we wish to reserve for our own use, we refer to our record book, but pay no attention to the quantity of blooms given, but as to which variety has paid the most per square foot, and, if we are growing two or three different whites, the one that has paid us the most up to February 1 per square foot is the one we will use for the next season, discarding all others.

Owing to late construction this past season all our plants were benched very late. For fancy, Prosperity takes the lead, and should be grown at a temperature of about 52°. We benched same October 8 and commenced picking blooms December 9. If benched in July they will undoubtedly come into bloom early, so as to be in full crop for Christmas. Gov. Roosevelt seems to be the leading crimson. It is not quite as free as Gen. Maceo, but produces well-formed flowers on much longer stems, and should be grown at a temperature of 52°. This, we consider the best crimson to date.

G. H. Crane seems to be the best scarlet so far, and should be grown at a temperature of 52°, but Apollo will be our leading scarlet for next season. Mrs.

Geo. M. Bradt has done well with us the past season, and should be grown at a temperature of 50°, but we shall discard this entirely next season and grow Peter Fisher's new seedling, Mrs. M. A. Patten, instead. This will give more blooms than any standard variety and, in my judgment, is the best variegated in sight.

Mrs. Lawson is yet to be beaten in its color. It should be grown at a temperature of from 55° to 56°. We find if the temperature does not vary that the percentage of split calyxes is very small. Of Golden Beauty we had very few plants, less than 400, the plants being small, and they were benched October 10. They made rapid growth, however, producing large flowers on long, stiff stems. We consider it much better than Gold Nugget

THE LATE H. H. HUNNEWELL.  
(See page 653.)

or Eldorado, and it will be our yellow for next season. This variety seems to have been overlooked by most of the florists, but, in my opinion, it is the best yellow to date, being as free a bloomer as other standard varieties. It should be grown at a temperature from 50° to 52°. Gen. Maceo is a free bloomer and should be grown at a temperature of 48°, but will be discarded. Eldorado should be grown at 48° to 50°, but will not fill the bill.

Marquis has done well with us during the past season, blooming continuously. It should be grown at a temperature of from 48° to 50°. There seems to be a good deal of complaint about this variety not being a good shipper, but we have experienced no difficulty in this respect. The blooms should be allowed to remain upon the plants until fully developed before being picked; if not, they will invariably go to sleep the next day. Morning Glory is the leading light pink, giving large blooms on long, stiff stems, and should be grown at a temperature of 52°. This we will discard entirely, as we will grow Enchantress.

For white, we had three varieties, Norway, which should be grown at a temperature of from 50° to 52°; Lorna, 48° to 50°, and White Cloud, 48°. We consider Lorna an improvement over White Cloud. We benched 4,000 White Cloud on September 25 and commenced picking

blooms November 12, and up to the present time we have picked 60,000 blooms from the 4,000 plants, and we will pick 40,000 more by July 1. Gov. Wolcott, however, will be our main white for next season, and should be grown at a temperature of from 52° to 54°. During the winter weather, on the above varieties, the day temperature should not be allowed to run over 60° to 62°.

The following we consider the fancy varieties, and the ones we will grow next season: Light pink, Enchantress; crimson, Gov. Roosevelt, Harry Fenn; scarlet, Apollo, J. H. Manley, Estelle; white, Gov. Wolcott; pink, Mrs. Lawson, Nelson Fisher (Peter Fisher's), Marquis; yellow, Golden Beauty; variegated, Mrs. M. A. Patten (Peter Fisher's), Prosperity.

J. D. THOMPSON.

White Cloud we still regard as the leading and most profitable fancy white. When well grown it is as large and as fine a white, through the cool season, as has been produced. But it is not good either early or late in the season. Glacier will be grown more extensively the coming winter. It produces short stems early in the season, but the flowers are perfect in form and color, a fine lustrous white. It does not make as long a stem as others at any time of the season, but produces a large quantity of bloom and will do on a side bench, if it can get no better quarters. It never bursts.

Lorna is grown in small quantity. It produces fine stems and flowers early in the season, better stems and flowers than White Cloud, but is not so prolific. It is less likely to split than White Cloud. Norway will be discarded. It produces good stems and some flowers, but the color is muddy, many flowers inferior in form and size. Flora Hill must be discarded. It never has produced a clear color with us, splits badly and is not prolific. It must be a good keeper and shipper as it sells better at commission houses than better flowers of other varieties of the same color.

Lawson is fine in midseason. As with others, it throws short stems in the fall, but from November 1 to May 1 it is in continuous bloom, and of fine color; after that it burns badly. Thrip are very fond of it. If grown cool it splits badly; needs 55° to do its best. We shall grow it in increased quantity.

Triumph is our best shipper, keeper and producer in pink. It is fine early, mid-season and late. Some high class retailers, customers of ours, prefer Triumph to Lawson, at the same price. It is somewhat subject to disease, but is being propagated out of it. Joost produces in such abundance and the color is so evenly diffused, all over both sides of the petals, that it is regarded as valuable, notwithstanding its small size and short stem, about eighteen inches.

Morning Glory must be retained for its color. Marquis is fine, but too late and looks sleepy. Dorothy gives us some discolored flowers. We think we must give it a little more warmth. It is a good producer, keeps and ships well, and while not at its best an ideal color, it will more than cover the field heretofore held by Scott, which must be discarded.

Crocker has not yet proven profitable with us. We will try it again, give it a lighter soil and warmer quarters. Others succeed with it, why not the other? It is certainly worth trying for. Genevieve Lord is still on the boards, but I can't

A FIELD OF OALLAS IN CALIFORNIA.

tel why it has never produced much but grass, and is low grade at its best in this vicinity.

If our patch of Irene is a sample of what it has done elsewhere it will not be heard from next season. Not over twenty per cent of the flowers are salable although it seems to grow and flower well. Elma does not succeed with us. Both plants and flowers are poor.

Crane is still the leader in red, on account of productiveness and color. Estelle will be planted largely. Its color is magnificent, stems strong and straight. Our plants were small and have not grown large. It is a very much improved Jubilee. The latter will be discarded, principally for the fault of throwing a large percentage of malformed, discolored or single flowers, which we have been unable to propagate away from.

Bradt is as good as ever. Prosperity has not been profitable, but will be tried on a larger scale with hope of better results.

W. J. VESEY.

#### Orchids For Florists' Use.

[A paper by R. Karlstrom, read before a recent meeting of the Hartford Florists' Club.]

In the past, when the demand for choice flowers in variety was not so great as it is to-day, most of our orchids belonged to private individuals and consequently few flowers found their way to the flower stores or came before the general public. The price also was beyond reach and, although they were much admired

for their beauty, it seemed that they never would become popular, for the supply was limited. The grower would not invest capital, or spend much of his time on a plant for which he thought there was no wide market. Difficulty was also experienced in finding persons competent to grow these little known plants. The grower must, therefore, personally take charge or entrust his comparatively large investment in the hands of an inexperienced or incompetent assistant. The retail merchant or storekeeper was equally careful in buying flowers he had small chances of selling, or to take an order for goods he was not sure to be able to supply.

But times have changed in the last ten years. It is hard to say where we are going to stop. Plants of the various orchids number well up in the millions; flowers are cut and sold in great numbers, at a profit to the growers of tens of thousands of dollars, and still the demand is ever increasing. But plants can never be cheaper, or the supply, I believe, more abundant than at the present time. Here are a few reasons: Orchids cannot be propagated by cuttings to overproduction, as is the case with most other plants. It is a very slow process indeed to propagate them by division, and it takes several years for most of them to attain their flowering period from seeds. We must, therefore, depend almost entirely on importations from the native growing places. But even there he supply is getting smaller year by

year, and it is, perhaps, but a question of time when it will become altogether exhausted. The immediate cause, is the thoughtless destruction by orchid collectors, the cutting down of the forests, and the needs of the ever-increasing population in the districts.

On the strength of this we may, therefore, say that an overproduction of this interesting and beautiful genera is next to impossible. The opportunity for the orchid grower was never better than it is to-day. The demand is always increasing and the supply nearly always limited. Orchid growing has become a trade of no mean reputation. Years ago when I was a little more closely connected with the commercial world than I am now, there were more than 10,000 *Cattleya Trianae* and as many *Cypripedium insigne* sold in Greater New York every year, and all those were grown in the vicinity of New York city. New York, however, is not the only city with a demand for orchids, and the New Yorkers are not the only ones who can grow them. No, the field is open, over this whole broad land.

We have a long list of varieties, equally as good as *Cattleya Trianae* and *Cypripedium insigne*, only waiting to be introduced, and when that is done I am positive they will be appreciated by the intelligent flower loving public. In making up a collection it is, of course, necessary to choose such plants or varieties which promise to bloom through the whole, or greater part of their respective blooming seasons.

The flowers of the cattleya are, as we all know, large and very beautiful, and especially *C. labiata* gives us an abundance of flowers almost the year around. This flower is always in demand and ought to be grown more extensively than it is to-day. Next comes *C. Percivaliana*, with a little smaller flower than the preceding. This species comes in just between *C. labiata* and *C. Trianae* and is therefore well worth growing, but in smaller quantity. *C. Trianae* is one of the most useful and I think one of the most extensively grown of all the cattleyas. With very little forcing it will bloom from Christmas to the middle of March, or even later, when it will be succeeded by *C. Gaskelliana*.

Next in turn comes *C. Mendellii*, closely followed by *C. Mossiae*. When the last named ones bloom, orchid flowers do not as a rule find as ready a sale, and it is therefore well to grow them in smaller quantities. During the rest of the year, July and the beginning of August, we have the gigantic *C. Warszewiczii* and *C. Eldorado*. It will be seen that it is possible to have cattleyas in bloom during the entire year. With the exception of *C. Eldorado*, which must have more heat and moisture than the rest, they can all be grown at a winter temperature of 55° to 60°. This may go up to 70° or a little more in the daytime, but necessitates, of course, ventilation in clear weather. It is necessary to employ two or more houses for the culture; thereby making it possible to force on or hold back certain plants for certain occasions

and also to prolong the blooming period of the species.

The dendrobiums provide us many beautiful species worthy of general culture for the trade. *D. formosum* and *D. Phalanopsis* are two of the best warm-house species. The first named, not unlike a large white cattleya, blooms during the fore-winter. The other, with smaller, white, pink or rose-colored flowers, on long stems, in rich profusion, blooms from October to May. It pays well to grow these two varieties in large numbers.

*Dendrobium Wardianum*, with its white, yellow, brown and rose-colored bunches of flowers, and *D. nobile*, with rose-colored blossoms, are two very distinct, useful and desirable kinds. They need very nearly the same treatment, plenty of heat and moisture during the summer and a cool and dry place during their resting season in winter. Those four kinds are the best and cheapest for commercial purposes, although there are many others which may be grown with profit, for instance, *D. crepidatum*, *D. crassinode*, *D. Devonianum*, *D. densiflorum*, *D. fimbriatum*, *D. thyrsoiflorum* and others.

*Vanda acerulea* is very useful for winter cutting, producing long-branched flower stalks with delicate lavender-blue flowers. Because of its color it is very valuable for commercial purposes, it being the only one of its shade. The temperature in the *Cattleya labiata* house is just right for the vanda, which succeeds best if grown in baskets suspended from the roof,

thereby also economizing room, so much needed for other things.

*Lælia anceps*, *L. albida* and *L. autumnalis*, all Mexican species, are rich flowering, salable sorts, which can be grown to advantage in baskets. They demand a moderate temperature, and therefore succeed well in the coolest part of the cattleya house.

*Cymbidium eburneum* is a fine white flower of good substance and blooms in rich profusion. No doubt this will become very valuable when better known. It has not yet been grown commercially to a very great extent. It wants a modest, airy temperature and plenty of moisture about the roots.

*Cœlogyne cristata* is a very fine white flower, with a yellow center. It is said of this orchid that it has not given full satisfaction. My experience has been that if grown rather cool and not allowed to become too wet, it will bloom freely, and its right place is with the cypripediums. It is valuable for table decorations and keeps, when cut, for a long time.

The phalanopsis family contains several splendid species, all worthy of commercial culture and paying well when a warm, moist and in all respects suitable house is provided. *P. Schilleriana*, *P. amabilis* and *P. Stuartiana* are among the best.

*Lycaste Skianeri* is the best of its class, and good for the local market, but easily spoiled in the packing. Because of its easy culture, it has been called the "amateur's favorite."

*Odontoglossum crispum* gives us the most varieties for the commercial market and is therefore the best. I am sorry to say that this noble plant has often been found difficult to handle. It grows wild on a very high elevation of the Andes, where the atmosphere is damp and the temperature seldom rises above 60°. This, its natural climate, is hard to imitate and the plants suffer therefore from our hot summers. It is clear that a special house should be provided for this plant. Face it north, shade it from the sun, keep it moist, with low temperature and your plants will succeed admirably. *Odontoglossum grande* is another good kind, with very large yellow and brown flowers. The market is, as yet, limited to a certain extent, but it is worthy of culture for variety.

*Miltonia Roezlii* is a very desirable sort, for which good prices are obtained. It wants plenty of moisture about the roots and a warmer temperature than the majority of its relatives. The flowers are very large and effective, almost pure white, with purple and yellow towards the bottom.

*Oncidium varicosum* and its varieties are all good fall-flowering kinds. The flowers are produced on long, overhanging branching shoots, not unlike a gigantic adiantum frond. *O. splendidum* and *O. tigrinum* are valuable for the late winter months, with their large yellow and brown flowers. They will, like *O. varicosum*, grow well with the cattleyas during their growing period, but want a long rest in a cool house when their flowering period is over.

The cypripedium is easier to propagate by division and seeds than most other orchids. We have at the present time only a few varieties of commercial value. *C. insigne*, *C. barbatum*, *C. callosum*, *C. Boxalli*, *C. villosum* and *C. Lawrenceanum* are among the best. Here is a great field open for the thoughtful and skillful hybridist, who may be sure of success, in view of the splendid results already obtained. Some of the hybrids

BEGONIA BUISSON ROSE.

HAIL-WRECKED GREENHOUSE OF HEIM BROS., BLUE ISLAND, ILL.

are costly in themselves but mother plants can always be had at moderate cost, and after a few years hundreds of growths may be had at little trouble and small outlay.

A noted orchid expert once exclaimed: "Just fancy a house full of *Cypripedium Morganæ*," which is a cross between *C. superbiens* and *C. Stonei*. Just think of it, with its long robust stems, each one crowned with three or four indescribably beautiful flowers, and that will give us some idea of what might be accomplished.

Although most of our orchids, with few exceptions, may be grown in almost any greenhouse, it is claimed by orchid experts that a full span house from the north to the south is best. It should be constructed so that the water from the outside may easily run off and all drip by condensation during the winter be prevented. A three-quarter-span house to the south is sometimes used, but these become too hot and more ventilation must be given. This in turn exhausts the moisture so necessary for successful orchid culture.

In conclusion I wish to say to the retail florist, always try to keep a few orchids in a conspicuous place in your store, and show them to your customers, and by having different kinds from time to time I am sure the public in general will soon become interested, and you will build up a trade equally profitable to yourself, the grower and the flower loving public.

#### Two New Begonias.

The two new begonias herewith illustrated are being distributed this season by Victor Lemoine, of Nancy, France, to whom we are indebted for the pictures and descriptive particulars.

##### BEGONIA PERLE LORRAINE.

*Begonia polyantha* crossed by *B. dædalea*, a winter-flowering, foliage variety, has given us this novelty which may be truly called a pearl. The plant often reaches a height of three feet or over, with branches as thick as the finger, very much thickened at the joints. The stems are of a bronze green color, branching naturally from the axils of the leaves. The leaves are of medium width, oblique,

a little longer and more uniform than those of *B. dædalea* and of a beautiful emerald green, dotted and spotted with black on the upper surface, clear green, stained with rose on the under surface. It flowers in early January in loose panicles of thirty or forty two-petaled flowers, white or delicately shaded with rosy pink, remaining on the plant in good condition for over a month. When the flowers are fully developed the plant appears as if covered with a mantle of snow. The flowering season lasts from early January until the end of April. This plant has the exceptional merit of uniting grand flowering qualities with beautiful foliage and by the persistence and long season of its bloom bids fair to equal *B. Gloire de Lorraine* in popular favor.

##### BEGONIA BUISSON ROSE.

This is a hybrid of *Begonia diversifolia*, which flowers all summer in the full sun,

crossed by *B. polyantha*, which is a winter flowering variety. It has a large fleshy rhizome and grows to a height of not over two feet, flowering about the end of August in the open ground. If lifted in the fall and placed in the greenhouse it continues in flower up to January. The branches are of medium diameter, thickening somewhat at the joints. The leaves are small, narrow, strongly oblique, clear green in color, sometimes bordered with rose. It flowers as freely as *B. diversifolia*, the flowers appearing in clusters of three or four from the axils of the leaves. The male flowers have five large petals of the same shape and color as the female plant, carmine rose with yellow anthers. The plant is excellent for pot culture and valuable for blooming in the houses when the tuberous varieties are gone, during the chrysanthemum season.

#### Hail's Destructiveness.

The accompanying illustration shows a section of one of the greenhouses of Heim Bros., Blue Island, Ill., which was wrecked by hail April 25. This was not an antiquated structure with the old-fashioned thin glass. It was a new house built last year in modern style and glazed with new 16x24 double A glass. The reader will do well to reflect upon what a similar disaster would mean to him. We cannot regulate or predict these hail storms, but every greenhouse-man can prepare for them by joining the Florists' Hail Association. John G. Esler, Saddle River, N. J., is the secretary.

#### English Plant Notes.

The Royal Horticultural Society's fortnightly meetings at London attract a great number of visitors, and exhibitors are also more numerous than formerly. It is quite evident that these meetings are becoming more and more important and a great center of interest to all connected with horticulture. At one time it was suggested that these meetings should be confined to the consideration of new or special subjects only, but it was found difficult to draw the line. At present we get a really good flower show every fort-

BEGONIA PERLE LORRAINE.

night and if space would allow the display at most meetings would be even greater. That a new hall is of far greater importance than a new garden is now recognized by many who formerly were much in favor of the garden.

Hardy deciduous flowering shrubs have again been very prominent. Standard wistarias were seen in fine form at a recent meeting, also laburnums, crataeguses, double cherries and other things. In grouping these standards have a fine effect, but at present they have not come into such general use as they deserve. No doubt we shall see more of them in the future than we have in the past.

Of new roses Lady Roberts is a most promising variety and should prove a leading market sort. Queen Alexandra, which Messrs. Veitch & Sons showed so well last summer, does not appear to force so well as Crimson Rambler. It may do better with some, but those which I have seen growing side by side with Ramblers have not done so well, the flowers being small and thin and not of a good color.

Daffodils have been very prominent and new varieties numerous. The new white trumpet variety, Peter Barr, is

certainly the gem of the season, and a most perfect flower. King Alfred is a grand yellow, Glory of Noordijgh, an immense flower of the bicolor section, and Queen Emma is another grand new variety of the same section. Of other promising varieties noted Weardale Perfection, Lucifer, Queen Alexandra, Lady Audrey, Beauty and Cormorant were among the best.

Hippeastrums have been very good this season and some new varieties of great merit have been exhibited. They are not everybody's flower perhaps, but those who make a specialty of them find they are much appreciated by visitors. During the past few years they have done them well at the Royal Gardens, Kew, and Mr. Watson, the curator, tells me that there are few flowering plants that attract more attention from visitors than a group of these showy flowers. At the time of my visit a few weeks ago there was a fine lot in the show house and Mr. Watson showed me what they had for succession. These are grown in a department not open to the general public. I may say it would be difficult to find a more promising lot of plants.

The flowering house at Kew is always

interesting, and since they have kept the various subjects in groups it gives a better effect than when dotted about. Cinerarias were best represented, both in the wester florists' varieties and in the cruenta, or stellata, type. These tall, loose-growing forms are now very popular. In begonias there were some examples of the old *B. manicata* and other allied species, *B. Verschaffeltii* being particularly fine, with large leaves, and the tall spikes of bloom of a deeper pink; *B. hydrocotylifolia* and *B. pruinata*, pure white, with closer trusses of bloom; these are all worth attention. Mr. Watson has given a good deal of attention to the species of begonias and has shown that some of the older species under good treatment are well worthy of attention and equally valuable as decorative plants.

For some time cut blooms of orchids have been fairly plentiful in market, but pot plants are not often seen this season. However, there have been a good many well flowered dendrobiums in 5-inch pots. I do not know what prices they brought, but being packed in boxes, a dozen plants in each, would suggest that prices would not be prohibitive. Growers generally complain of dull trade, though all are looking forward to having a busy time when the coronation festivities begin. Roses and lily of the valley seem likely to be most in demand, but as floral decorations will be carried out more extensively than ever before there will be a big demand for all useful material. In bedding, red, white and blue will be the prevailing colors, and emblematic designs in carpet bedding will be a great feature, especially in the public parks. H.

#### Shrubby Spiræas for Forcing.

For some years now we have been accustomed to force *Spiræa confusa* or *media* for the greenhouse early in the year, and very pretty it is under such conditions, the slender wiry shoots, glaucous green leaves, and flattened clusters of white flowers, plentifully produced, forming a pleasing feature, says a correspondent of the *Garden*. Though one of the best it is by no means the only species suitable for this treatment, as *Spiræa Van Houttei*, a hybrid between *S. media* and *S. trilobata*, is as good. This spiræa (*Van Houttei*) is one of the most beautiful of all the outdoor spiræas, but it too often falls a victim to spring frosts to attain a high position here, though in the United States of America it is regarded as one of the finest members of the genus.

*S. prunifolia flore-pleno* flowers naturally early in the season, hence it may be readily forced. It is, however of large growth, and is only effective in the shape of a fair sized bush, but in that state is delightful, the long, slender, arching shoots being studded for a considerable portion of their length with rounded clusters of pretty, rosette-like blossoms, which are of the purest white, and in direct contrast to the dark colored bark. As there is only one other double-flowered spiræa of the shrubby section (*S. Reevesiana flore-pleno*), the species under notice attracts attention from that circumstance alone. As a shrub in the open ground, *S. prunifolia flore-pleno* is delightful when wreathed with flowers in the spring, while the leaves in autumn die off brightly tinted with scarlet. Within the last three or four years *S. arguta* has made great headway in popular favor as an outdoor shrub, and it is also equally valuable for flowering

DEFOLIATED FLOWERING SPRAY OF POLYGONUM OUSPIDATUM.

LILY OF THE VALLEY PIPS GROWN BY GROBBA &amp; WANDREY, MIMICO, ONT.

under glass. It forms a freely branched bush from three feet to four feet high, while the thin wiry twigs of the preceding year's growth, on which the blossoms are borne, are gracefully arched. The flowers themselves are pure white, and arranged in flattened clusters. The roots are of a free and tufted nature, hence the plants can be lifted and potted with but little check. *S. arguta* is of hybrid origin, the parents being *S. multiflora* and *S. Thunbergi*. All the spiræas enumerated above can be obtained cheaply from most nurseries.

#### Canadian Lily of the Valley Pips.

The picture shows a clump of lily of the valley pips as grown by Grobba & Wandrey, of Mimico, Ont. These pips were planted three years ago and the picture shows for itself what the plants have done in that time. Considerable of this lily of the valley has been forced the past season and it produced a well filled spike with bells a little larger than on the imported stock. H. G. D.

#### A Useful Perennial.

Bailey's Cyclopedic sanctions the name which Willem H. de Vriese gave to the subject of this note, *Polygonum Sieboldi*, but it is everywhere known in the trade as *Polygonum cuspidatum*, Siebold & Zuccarini. It is a strong, handsome bushy perennial, the stalks dying to the ground in winter, but the plant is hardy, for it has withstood winters in which the pæonia has suffered. The stalks are from three to five feet in good soil, and the stems very graceful. For backgrounds in many situations it is more ornamental than shrubbery. *Polygonum cuspidatum* increases rapidly by its underground stems or suckers and for this reason it should not be put in small beds where less vigorous growers are expected to thrive. It is a fine subject when given room to shift for itself. The spring growth is rapid and the blooming period is in July, August and September. The flowers are white, resembling *Spiræa Japonica*, and are numerous, along the stem between the leaves. The sprays are

useful for florists' work after being defoliated. The flowers last well in water and may be utilized attractively in many ways. The spray shown in the illustration was four feet long.

C. B. W.

#### Killing Weeds.

The best way to kill weeds is to dig them up with the hoe. In the case of quack grass it is safe also to put the weed in a blazing fire after it is dug up.

A good many men have worried their heads over the invention of a chemical weed killer. If one could take some agreeable medicine for weeds, as he does for ague or that spring feeling, it would be a great relief from hoeing and plowing.

The botanist of the Vermont Experiment Station, who is an expert in such matters, says this sort of medicine will work in some cases. Gravel walks, drives and tennis courts, for instance, can be kept free from weeds by the use of cer-

tain chemicals. Compounds containing arsenic seem to be far superior to other chemicals. The trials made at the Vermont station have included salt, copper sulphate, potassium sulphid, kerosene, carbolic acid, sulphuric acid.

The arsenical compounds tested were as follows, named in the order of their merit: Henderson's fluid weed destroyer, arseniate of soda, Smith's weed killer, arsenical-sal-soda mixture. In choosing between these, cost, convenience and effectiveness are to be considered. The cost is as follows, using eight gallons to the square rod: Henderson's weed destroyer, 40 cents to the square rod; arseniate of soda, cost 11 cents a square rod; arsenical-sal-soda mixture, 8 cents a square rod.

The arseniate of soda seems to be best for general use, especially when the expense is considered. For killing weeds in lawns or similar places where it is desired that useful plants shall occupy the treated soil as soon as possible thereafter, crude carbolic acid is the most generally useful chemical, since it is prompt in its action, and does not permanently poison the soil. Sulphuric acid comes next, but it is less penetrating. Its only advantage as compared with carbolic acid is that it is not malodorous. Common salt is inferior to any of the above chemicals for miscellaneous weed killing.

#### Greenhouse Building on the Coast.

The florists of the Pacific Coast are enjoying a period of prosperity in keeping with the eastern craftsmen and are keeping in perfect step with the times. Not in many years has so much greenhouse building been under way, and in general the houses are modern in character and conveniences. The industry is developing rapidly in the west and supply has not been up to the demand. Notes of some of those who are enlarging their facilities follow:

The Redondo Floral Co., of Los Angeles, is building three houses 20x210 for roses, carnations and bulbous stock. The place is about fifteen miles from Los Angeles, at Redondo, reached by a railroad owned by the same people. A. F. Borden is the manager. It is the first time roses and carnations have been tried under glass here to any extent and Mr. Borden has engaged Mr. Turner, formerly with the

POLYGONUM CUSPIDATUM IN THE BORDER.

J. M. Gasser Co., at Cleveland, to conduct the experiment. All the stock, too, has come from the east. Martin Wolfskill, at Redondo, is also building three houses and expects to put them in carnations.

At San Francisco, Ferrari Brothers, who are very much up to date, are building a range of twelve houses each 20x200 feet, making one of the largest places on the coast. They grow mostly for wholesale trade and produce roses, carnations and bulbous stock of best grade.

Louis Chiappari, who is classed as "a good fellow" by his contemporaries, is enlarging his place by building ten houses 20x110. He will also rebuild two houses. Mr. Chiappari, who is one of the oldest florists in San Francisco, grows a general stock and disposes of most of it at wholesale.

F. Gonzalez, of San Francisco, is building two houses 18x150. He gives most of his space to ferns and general plants and will use the new space for bulbous stock.

Serveau Bros., of San Francisco, are adding two houses. They are growers of a general stock and also produce large quantities of ferns, especially *Adiantum cuneatum*. They have a fine retail trade at their store on California street.

C. W. S.

## CHRYSANTHEMUMS.

### SPECIMEN PLANTS.

Our plants are now in 8-inch pots, and about the middle of June they will go into 10-inch and 12-inch sizes. Some of the newer varieties, which came in April, are a stage behind. The most promising of these we have put into 6-inch pots and by frequent shifts they will make good specimens. "Tens" will be their final size. In all our shifts, we calculate to have the soil rich enough, and do not use any stimulants until the plants are well advanced, say in August.

Plants which have not been put into intermediate sizes, and are now in "sixes" and "sevens," may go into "tens" at any time. We take extra care in our soil and potting at the final stage. We prefer a light loam; the plants are easier to manage. In heavy soil, when they get root-bound they often become water-logged, a most dangerous condition. When using heavy soil, we have had water stand in the pots for an hour or longer, and have had to bore holes in the sides near the bases to relieve them.

Old mortar rubbish is a very good ingredient for lightening the soil, furnishing at the same time a necessary food constituent. In a light soil air-slaked lime will answer this purpose equally well. In using charcoal, we prefer to place a layer over the crocks, which acts partly as drainage and as a filter. Any plants which happen to be dry at potting time are soaked and, if this is done thoroughly, no watering will be necessary for several days beyond enough to settle the soil. It is easy to give too much water at the outset.

Pinching must continue. No shoots must be allowed to get hard. They always break better when soft, besides, they are kept dwarfer. Pinching should always be done with the object of getting a well-balanced foundation. We must not be discouraged because some varieties will persist in making flower buds; they will grow out of it.

Black aphid and thrip must be followed up. Some tobacco compounds, with dissolved soap as an auxiliary, we have

found effective. Mealy bug sometimes becomes a nuisance, especially late in the season, when it gathers about the flower buds. We have kept our stock comparatively clear of fungoid diseases, by weeding out varieties liable and promptly burning them. We have used sulpho-naphthol, a tablespoonful to a gallon, with very good results. But no matter what we do, an affected plant will remain so through the season; probably the only benefit we obtain, is keeping other plants free. T. D. HATFIELD.

### New Jersey Floricultural Society.

At the monthly meeting of this society at Orange, N. J., on May 5, J. B. Davis entertained the members with an informal talk on his recent trip to the Mediterranean and Egypt, and the exhibition of over 100 photographs of scenes he had visited. In Constantinople he was impressed, he said, with the cypresses, in Palestine, the olives, and throughout this entire region, the palms. Other noticeable features of the gardens were the sycamore fig, introduced from India and a variety of eucalyptus from Australia, used as shade trees, also mulberry, acacia, tamarisk and ficus and among cultivated flowers he enumerated roses, freesia, clerodendron, camellia, genista, hibiscus and so forth, all grown in the open.

In Constantinople the only attempt at gardening observable was in the case of shrubbery used as a screen in connection with high walls and at Maderia, Gibraltar and Malta there was entire absence of skillful cultivation as it is understood in this country, while in Algiers it is seen only in connection with the country residences of foreigners. In Egypt an erroneous idea that Nile mud would grow anything had led to much disappointment in cultural enterprise and where any gardening is attempted most of the labor is confined to irrigation, the channels for which disfigure the heds and give an unfavorable impression to eyes accustomed to trim neatness.

He was glad to note, however, that throughout the Orient a general awakening in regard to municipal improvement is in progress. The public parks in many cities are tastefully ornamented with statuary and fountains and imported trees are made use of in an attempt at effect in landscape adornment. In point of scenery and pictorial effect the parks of Rome and Naples take the lead, while in cultivation the advantage is held by Monte Carlo. In Greece large sums are being expended in an effort to restore the artistic surroundings of antiquity. Around the Acropolis and in the restoration of the Stadium a million dollars have been spent, the gift of one man. The university and museum have park surroundings and where the closeness of the houses forbids the luxury of a courtyard the flower love of the people is evinced in the use of balcony gardens.

Organized flower trade is in evidence in Cairo, the season being, however, very short during which there are any social affairs calling for the use of flowers. There are five establishments all with attractive window displays, where carnations, roses and violets are obtainable and this is the only place on the southern Mediterranean where an American is reminded of home.

ELGIN, ILL.—George Souster reports this a most active season, with bedding out under full headway.

## WITH THE GROWERS.

WILL & SON, MINNEAPOLIS, MINN.

People in general are not apt to look to the northwest for a model in greenhouse building or modes of culture, but we believe that right here in Minnesota we have one of the finest carnation establishments of the country. I refer to the new range of Fred. Will & Son, erected the past summer and located just outside Minneapolis city limits.

This firm has been in the business for a number of years in a small way, and last summer erected the present range of six houses each 28x110 feet, containing in the aggregate 22,500 square feet of glass. Unfortunately a heavy hail storm broke nearly half the glass as soon as laid and just when they were ready to plant the carnations. Their plants in the field were nearly ruined, but the best were saved, new plants obtained and the houses planted late in the season. To-day they are a mass of buds and bloom and the finest lot of plants to be seen anywhere in the vicinity.

The varieties grown are Lawson, Guardian Angel, Marquis, Mrs. Joost, Mrs. Bradt, Crane, White Cloud, Lorna, Norway and a few Chicago. Next season's planting will include all of the above and in addition Queen Louise, Mrs. Potter Palmer and Gold Nugget. Prosperity seems to be a dismal failure here, where all the other varieties are doing so nicely. The bench of Lawson is a wonder. Guardian Angel has done nobly and is profitable. Marquis is most beautiful as well as prolific and will be largely planted again. Mrs. Joost has done very well. Mrs. Bradt is a nice bloomer and profitable if the demand were only larger. Crane is the standard red and White Cloud the standard white.

A large boiler room and cooling room occupy the basement, which is cemented throughout. The gutters are all drained into a cistern. A nearby brook supplies water to the boilers, while a gasoline engine pumps it for sprinkling purposes. Forty acres of land adjoining the greenhouses give ample room for expansion.

Several hundred pæonias have been planted with the idea of supplying the market with cut blooms, for which there is a good demand during the season.

FELIX.

### Herbaceous Plant Notes.

For several days after the late severe May frosts many of our spring flowering hardy plants looked as if their beauty had been destroyed for the season, but most all of them recovered and are now blooming freely as ever. The expanded flowers of irises turned black and we feared that the buds also had been destroyed, but were agreeably surprised to see them come out in fine shape, so that no signs of any damage are visible to-day.

The aubretias lost all their flowers for a time, but are a mass of color again. The dwarf phloxes do not show now that all their bloom had turned brown at the time; flowers are so thick on them that hardly a sprig of green is visible. *P. divaricata*, the blue phlox, has come out since. *Doronicums* are again in fine shape, and *epimediums*, though some of their soft young foliage suffered and is disfigured, are blooming profusely.

The arabis in open sunny spots was about past its best when the frosts occurred, and although they still bear a good many flowers on the tips of the stems, their efforts to conceal the effects

AN ANCHOR MADE FROM MISCELLANEOUS MATERIAL.

of the freeze are not very successful, but in more sheltered situations they are still good. I should mention here that *A. albida* fl. pl. in exposed, sunny positions has not lost a single petal and is as thickly covered with bloom now as ever. It is a few days later than the single varieties, opens out slowly, but the flowers seem to last much longer.

The plants acted in the same way last year, flowering two to three weeks after all other varieties had finished. The flowers are borne on stouter and more branchy stems, forming compact little panicles of miniature, stock-like, very double flowers and are very attractive. When better known, this plant will undoubtedly become a universal favorite, not only because it is such a persistent bloomer, but on account of its neat, compact habit. The stems do not shoot up, showing unsightly seed pods, the side branches, with their flowers, hide the main stems effectually and, aside from this, each individual flower lasts at least

twice as long as they do in the single species, thus giving the impression of a still more profuse bloomer, though in reality the singles may perfect almost double the number of flowers on a stem. It is a good thing, one of those which we may recommend without the slightest hesitation.

*Vesicaria articulata* is fully out now, a mass of golden yellow, *erysimums* are at their height and *Cheiranthus alpinus* is very showy, with its larger flowers of the same color. All three grow luxuriantly in very dry spots. The first and last named are very serviceable as cut flowers.

*Aquilegia flabellata* was the first of the family to show up. The substantial flowers may not be as graceful as the slender-stemmed and long-spurred species, which come on later, but I always admired its stout, compact habit and also the waxy perfect-shaped flowers, which appear so very early in the sea-

*Corydalis lutea* lost all its flower spikes by the late frosts, but the damage is not noticeable now. *Dicentra formosa* and the dwarf *D. eximea* were struck by the same misfortune but recovered speedily. *Arenaria grandiflora* and *A. montana* have opened their first large white flowers on the young branchlets rambling over stones in the rockery; in the field, in common soil, it seems to be a trifle later.

*Anemone nemorosa* and *A. nemorosa* fl. pl. were not hurt by the freeze; both are still blooming as profusely as ever and the dwarf *Myosotis rupicola*, the Swiss alpine perennial forget-me-not, continues in excellent shape. Its large, yellow-eyed flowers of deepest sky blue seem to delight in the cool atmosphere.

*Stellaria Holostea* is fully in bloom and so are the various varieties of *Ajuga reptans*, the candytufts and the blue and white *Viola cornuta*, *Polemonium reptans* and the large, saucer-shaped *P. Richardsonii*, together with the graceful *P. dissectum* are out. The other taller varieties and species will follow in a few days. Some of the primulas are now past their best, but auriculas are still in excellent condition and have done better this season than ever before.

The trolliuses did not mind the frost. The dwarfest of them, *T. patulus*, pale straw-color, comes out earliest and is a profuse bloomer. The darkest orange of all, to my knowledge, is *T. Japonicus*, a very large flower and easily managed. Among the armerias I ought to mention the dwarf *A. juncea*. In color it rivals the deep pink *A. Lauchiana*, flowerheads fully as large as in that variety.

*Helianthemums* are flowering profusely now, and *linums*, and *centaureas* in blue, white, pink and lilac are well out. *Cerastiums* and *Anemone sylvestris* are fine. Among the alyssums *A. serpyllifolium* is noticeable from far off. It looks like a yellow sheet spread over the ground. *Mertensia Sibirica* is hardly in full bloom yet, while *M. Virginica* is about past with us.

The dwarf, loose spiked *Veronica Chamædris* is a most attractive little plant for the rockery or border, being so early. *Dodocatheons* are furnished with numerous large, compact heads of flowers. They will retain their beauty much longer in a partially shady position. The *anchusas* are also out. *A. Barrelieri* is probably the neatest among them, being rather free and dwarfier in habit.

J. B. K.

#### French Growers Lose Money.

With regard to the state of the flower trade in France a correspondent familiar with the situation in the vicinity of Paris writes:

There has been a glut of flowers and florists' plants on the market throughout the winter in consequence of the mild weather, and prices ruled pretty low. The flower forcers around Paris are far from having made any money. Forced lilacs could not be disposed of at a higher price than 25 cents per bunch of twelve panicles, and when we consider that from two to three shrubs, worth over 25 cents, are required to produce these twelve panicles, the forcing can only have resulted in a loss. The same is true of the rose forcers, who at best sold their finest flowers at from \$2.50 to \$2.80 per dozen.

PORT HURON, MICH.—C. W. Asman has opened his new flower store on Huron avenue.

## Chicago.

HOT WEATHER AT THE BEGINNING OF THE WEEK BRINGS A DELUGE OF STOCK.—EVERY ITEM IN OVERSUPPLY.—QUALITIES DETERIORATE AND VALUES BADLY UNSETTLED.—A CHANGE TO COOL MIGHT MEAN A SHORTAGE.—THE QUESTION OF NECESSITY OF STREET SALESMEN.—MANGEL HAS FINE STORE.—OUTDOOR WORK PROGRESSING.—VARIOUS NOTES.

Seldom if ever has this market been in so deplorable a condition as at present. Never were receipts heavier, seldom was buying more listless and rarely have values been so unsettled as at the present time. There is quite a little shipping business, but it isn't the comfort in time of need which it usually is, for stock has so deteriorated in quality under the influence of midsummer temperature that it is difficult to give satisfaction to buyers at a distance. Not only does it require much careful sorting to pick out material which will stand a night's journey, but the price affords dissatisfaction to the buyer; he thinks it should be lower with a glutted market. The matter of fact is that in each thousand roses there are 100 worth good money, 200 salable at a cheap price and 700 which can scarcely be moved at all. The growers complain at the averages. Some of the wholesalers charge the overburdened state of the market to the absence of the curbstone salesman. Archie Spencer says that those whose efforts resulted in ousting the fakirs argued to the wholesalers that it would make no difference whether they sold all the cut or half of it for the same money, but it seems to work out that the best end of the cut sells for less than it did before and the balance doesn't move at all. On the other hand E. E. Pieser says he thinks the absence of the Greeks from the streets makes little difference. They are nearly all located in some sort of nook or corner and buying about as much as ever. He thinks this is just a spring shower of flowers, one of those sudden downpours which come with the first hot days of summer, and that the business skies will soon clear. Certain it is that a turn to cold, such as would not be unusual at the season, would shorten the cuts materially, for the hot days have rushed out the buds and most of the stock coming in is either very tight or very open. A cool wave of several days' duration would be not unlikely to see a pretty bare market for Memorial day. For the time being, however, everything is as badly overstocked as are the tea roses. Beauties are crowding the ice boxes and the counters are loaded down with carnations. Sweet peas are proportionately abundant and many of them are very good. Swainsona is cheap and outdoor valley, also. The only item which is not suffering greatly is the pæonia, for a good many of these are being carefully wrapped up and put in the freezer. They will make their reappearance after the crop is off. Lilac is at an end and so is outdoor bulbous stock.

A committee representing the wholesale and retail florists waited on the school-management committee of the Board of Education May 22 to urge that the measure prohibiting the use of flowers in the public schools be rescinded. The effort met with but little success, so far as the present season is concerned, but E. G. Coolcy, superintendent of schools, explained that the order of last year was misinterpreted, as it does not prohibit the use of flowers in the schools. The idea appears to be to escape, on the part of the attendants, the small amount

of work involved in the delivery of the flowers to individual pupils and to prevent the jealousy which it is said arises when the children of the wealthy receive elaborate bouquets while those of the poorer classes are remembered with comparatively inferior flowers and fewer of them. The friends of the pupils may supply as many flowers and plants as they like for general display in the schools during the exercises and the pupils are permitted to wear flowers.

John Mangel has wrought a transformation in his new Wabash avenue place. The interior has been embellished with excellent taste and the place is full of well arranged plants which overflow upon the sidewalk, two fine bay trees standing at the carpeted steps. Mangel says that he doesn't have quite as many customers as at the old stand at State and Washington but that it is a better class of trade.

Outside work has taken a spurt this week and much bedding has been done. There promises to again be a shortage of good geraniums and \$8 per hundred is the wholesale price for anything worth having.

One of Amling's growers sent in a big Boston fern this week, one of the finest seen in town. Mangel has it now in his display, with a sign on it: "The new Boston fern. Isn't it a beauty?"

The ferns will be all out of storage by Decoration day. A good many of the cases still remaining are opening up in bad shape and the loss is cutting a hole in the profits.

The third annual spring encampment of the employes of Vaughan's Seed Store will be held at Western Springs, May 25. The train will leave the Union depot at 11:40 a. m.

The Kroeschell Brothers Company will supply and do the fitting of the heating apparatus for the Thompson Carnation Company's new houses.

It was a graceful act on the part of many of the local growers to tender the Blue Island victims of hail fresh supplies of stock.

While the weather lately has been bad for cut flowers, it has been fine for stock in the fields and everything is doing nicely.

E. C. Beatty, of Oil City, Pa., was a visitor this week, returning from Arizona, where he had been on a business trip.

Cape jasmines are coming in but have not found much favor this week. They will doubtless be in demand for Memorial day.

O. W. Frese says that not since the memory of man runneth not to the contrary has the market been so dull.

From the amount of aster seed sold this spring there should be no shortage of these flowers this summer.

N. J. Wietor has been in Wisconsin on a fishing trip and had his usual good luck.

Wietor Brothers are already cutting a few Beauties from young stock.

J. N. Jakobsen is now with E. J. Taylor, at Southport, Conn.

Andrew Miller is in California for his health.

Visitors: Geo. Souster, Elgin, Ill.; J. J. Van Leuven, Brighton, Mich.; C. L. Niednager, Evansville, Ind.; G. W. Martin, St. Elmo, Ill.

DAYTON, O.—The Miami Floral Company has been incorporated to do business here. The capital stock is \$5,000 and Charles E. Pease is back of the enterprise.

## New York.

TRADE STILL DULL.—RECRIPIS CONTINUE LARGE IN ALL LINES.—BEAUTIES DOING BETTER THAN LAST WEEK.—OTHER ROSESSUFFER.—CARNATIONS EXCELLENT IN QUALITY.—PLANTS AT BOTANICAL GARDEN SHOW MUCH IMPROVEMENT IN A YEAR.—PARKER HAS NEW DEVICES.—VARIOUS TRADE NOTES.

This week it is again the same old story of little doing. The retail cut flower trade is fair in spots, but the production at present is so heavy and there are so many wholesale markets among which the demand has to be divided that the wholesale trade seems to be almost at a standstill and the receiving and housing of the flowers furnishes the only incentive to activity. American Beauty roses are doing somewhat better than they did last week but small roses are to be had very cheap. The local supply of lilac is at an end and, pretty as it is, nobody seem sorry. Carnations continue plentiful and good, with no advance in value. Field grown lily of the valley is at its height and of good quality. Sweet peas sell well and average as fine as ever offered in this market. Snowballs are now in, following closely upon the lilacs. They are fully a week ahead of their usual time.

The members of the craft were pained to hear of a serious accident which befell Louis Schmutz, of Flatbush, on Wednesday evening. He was struck by a runaway team, both legs being broken and other serious injuries inflicted. He is an active participant in all the social affairs of the Flatbush boys and is one of the most popular of the coterie. He had only last week made his re-appearance at the weekly bowling matches after a long absence occasioned by a severe attack of rheumatism. After the accident he was removed to the Brooklyn hospital. His condition was pronounced precarious, but if well-wishes are of any avail his recovery will be rapid.

Visitors to the New York Botanical Gardens last week, on the occasion of the annual meeting of the Horticultural Society of New York, especially those who attended the meeting one year ago, were impressed with the greatly improved condition of the plants in the big conservatories. Last year many expressed disappointment at the showing made but on this occasion nothing but the most favorable comment was heard on all sides. The collections have increased greatly and considering the short time they have been under care here the plants are in excellent health and promise.

Theron Parker, the inventor of the Model carnation support, is now located at Harrison, N. J., in partnership with Mr. Bruen, of Madison, the firm name being Parker & Bruen. Mr. Parker has further displayed his ingenuity in a glazing point of improved pattern, which he is now putting on the market and for which a patent was granted May 6. A tomato support similar in design to the extension carnation support and a folding pea trellis are among the other specialties which the company will manufacture.

Frank Millaug, Chas. Smith, Bonnot Brothers and W. H. Siebrecht have a continuous line of ice compartments and tables extending the entire length of one side of the Cut Flower Exchange. It is a very busy section of the market, not only in the early morning but during a good part of the day as well.

Margaret Kazis, 446 Columbus avenue, has been granted a discharge in bankruptcy; liabilities, \$5,735.

## Philadelphia.

CUT FLOWER TRADE ON THE DECLINE AND STOCK ACCUMULATING.—BEAUTIES IN HEAVY SUPPLY.—ALL ABOUT PREVAILING PRICES—ROSES IN POTS ARE SCARCE.—WANAMAKER HAS A SALE.—WHAT THE GROWERS ARE DOING WITH ROSES.—MEETING OF HORTICULTURAL SOCIETY.—PERSONAL AND TRADE DOINGS.

Business in the stores is falling off quite perceptibly. There is plenty of stock of good quality, although Brides and Bridesmaids are beginning to show the effects of the long season. Beauties are as plentiful as ever. Joseph Heacock says his houses never looked better for this season of the year. He says that red spider is the worst enemy of this rose, particularly in the spring months. He fights it from the cutting bed on, for if it ever gets a good hold it will interfere seriously with the crop. Prices range as follows: Beauties, \$1.50 to \$2 per dozen; Brides and Bridesmaids \$6 to \$8 per hundred; Liberty \$6 to \$10. Carnations which are still good, and plentiful, bring \$1.50 and \$2; cornflowers \$1 per hundred; sweet peas 35 cents to 75 cents per hundred; white and lavender centaurea 50 cents per dozen. Pæonias are in and sell for from 50 cents to 75 cents per dozen for the red varieties; in fact, this is now about the only color. Scott and Harris are both sending in gardenias; \$12.50 is the price.

George C. Watson has returned from Boston and his manly bosom is a trifle more prominent in consequence. What he found out will be told in his own inimitable style at the next meeting of the club. He did say that the Philadelphia club's efforts to settle the name of the Baldwin rose resulted in the Waban Conservatories selling all the available plants they had, which will be one atom of comfort for the committee, although they had no such intention in view. The Floral Exchange benched a few hundred of this rose last fall and are now cutting some very nice stock. The rose stocks for the coming season will be much the same as last, as most growers are duplicating their present assortment of varieties. Some will discard Liberty, while others will try it, being spurred on by the success of a few who seem to understand its nature. With Messrs. Mortenson and Fahrenwold, each of whom have had great success with Liberty, it will be planted again and in larger quantities. There will also be more Golden Gates, as with some growers it is quite profitable and quite a demand has been worked up for good blooms.

Roses in pots are scarce, that is, plants of any size. Robert Craig & Son, who are large growers and dealers, say they are at their wits end to get decent stock for their orders. Colflesh, Becker and Meckey, make a specialty of pot roses and are now all sold out of their large sizes. There are still some good Ramblers about, Harris having a fine lot. Wanamaker's department store had a sale of Ramblers last week, their price for strong 7-inch pot plants being 75 cents each. Their advertisement spoke of a large grower being "caught between seasons," consequently the sacrifice.

Professor Stewardson Brown, the botanist of the Pennsylvania Horticultural Society, delivered an address at the meeting last Tuesday evening on the influence of environment on plant variation, which was very interesting and instructive. The new fern, *Nephrolepis "Anna Foster,"* was exhibited by L. H.

Foster, of Boston. The variety is very distinct and beautiful. It seems a trifle more delicate than the Boston fern, but looks like a very fine thing and likely to prove a good commercial variety. There were also exhibited some very fine shrubby and hybrid calceolarias.

Robt. Craig stated at the last meeting of the Horticultural Society that the American Rose Society will hold its annual meeting in connection with the spring exhibition of the society next year, this being the first meeting that has been held outside of New York.

The rhododendrons in the park will be at their best for the next two weeks and will amply repay a visit.

Bedding stock is moving very lively and the prospect for a clean-up is very encouraging. K.

## Boston.

CUT FLOWER TRADE STILL STAGNANT AND VALUES VERY UNCERTAIN.—CHOICE CARNATIONS BRING ONLY LOW FIGURES—GOOD SUMMER ROSES—WONDERFUL DISPLAY OF LILIES AT THE ARBORETUM—SEASON STILL FAR IN ADVANCE OF OTHER YEARS.—VARIOUS TRADE DOINGS.

The sluggishness reported last week still prevails in the cut flower trade and is as pronounced as it is unusual for this season of the year. The most noticeable thing in the wholesale market, next to the general dullness of everything, is the quality of the carnations, that is the best ones. There are all grades of carnations and some lots are as disreputable looking as anything ever seen in this market, but, on the other hand, the fancy sorts are incomparably fine in every point; prize winners they would be at any exhibition, but their beauty seems wasted under prevailing conditions, for buyers are found with difficulty and it is impossible to get an adequate price for them. Roses do not hold out so well in quality and are selling very low in every instance. The summer favorites, Kaiserin and Carnot, are in evidence, quality all right if there were only some eager buyers. By this time next week, however, the tune will be changed and the Decoration day rush will be as pronounced as the present torpidity.

Everybody who comes to Boston at this particular season with any horticultural aspirations, finds a Mecca at the Arnold Arboretum. The present week is the gala week of the year, for the famed lilacs, of which nearly 150 species and varieties are represented, are at their best. The display is worth traveling many miles to see. Other show subjects now blooming are the dogwoods, white and pink, the honeysuckles, hawthorns and many of the pyruses. Azalea Vaseyii is already past its best and the mollis and hardy Indica varieties are opening fast, the rhododendrons being the next in line. These latter as well as some of the early roses promise to be in bloom for Decoration day, an unusual circumstance.

The first pond lilies of the season made their appearance at Welch Brothers' this week.

Visitors: Timothy McCarthy, Providence, R. I.; H. S. DeForest, New York; Wm. Griffin, Thompson, Conn.; Julius Roehrs, Jr., Rutherford, N. Y.

CANONSBURG, PA.—J. B. Mardock & Co., of Pittsburg, have bought a farm here of 185 acres, paying \$40,000. They will proceed with the erection of a range of rose and carnation houses to cost \$25,000.

## Meetings of Florists' Clubs.

The accompanying list gives the cities in which there are active florists' clubs. Following the name of the club is the place of meeting, the day of meeting, the hour and the name and address of the secretary:

BALTIMORE, MD.—Gardeners' Club of Baltimore, Royal Arcadium building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1440 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wienhoeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. Geo. S. Bartlett, Sec'y, 113 East Second street.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 244 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodcliffe, Lake avenue, Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month, at 8 p. m. F. T. Rushmore, Sec'y, 2316 Franklin street.

DES MOINES, IA.—Des Moines Florists' Club, at various florists' establishments. Last Monday of each month, at 8 p. m. J. T. D. Fulmer, Sec'y, 702 Walnut street, Des Moines.

DETROIT, MICH.—Detroit Florists' Club, Cowie Building, Farran and Gratiot avenue. First and third Wednesday of each month, at 8 p. m. J. F. Sullivan, Sec'y, 214 Woodward avenue.

HARTFORD, CONN.—Hartford Florists' Club. Second and fourth Tuesday of each month at 8 p. m. J. F. Coombs, Sec'y, 688 Main street.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, Commercial Club rooms, Indianapolis. First Tuesday of each month, at 8 p. m. H. Junge, Sec'y, 456 E. Washington street, Indianapolis.

MILWAUKEE, WIS.—Milwaukee Florists' Bowling Club, Plankinton House. Thursday evenings at 8 p. m. C. C. Pollworth, Sec'y, 137 Oneida street.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Alexandria rooms, 2304 St. Catherine street. First and third Monday of each month. W. H. Horobin, Sec'y, 23 Closse street.

NEW YORK, N. Y.—New York Florists' Club, Elk's Hall, 19 West Twenty-seventh street. Second Monday of each month, at 7:30 p. m. John Young, Sec'y, 51 West Twenty-eighth street, New York.

OMAHA, NEB.—Nebraska and Iowa Florists' Society, Fuller's Hall, Fourteenth and Douglas streets. Second Thursday in each month at 8 p. m. Louis Henderson, Sec'y, 1519 Farnam street, Omaha.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce. First Tuesday of each month, at 8 p. m. Edwin Lonsdale, Sec'y, Wyndmoor, Philadelphia, Pa.

PITTSBURG, PA.—Pittsburg and Allegheny Florists' and Gardeners' Club, at rooms of Pittsburg Cut Flower Co., 504 Liberty street. Second Thursday of each month, at 8 p. m. T. P. Langhans, Sec'y, 504 Liberty street, Pittsburg.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 95 Westminster street, Providence. Second Thursday of each month, at 8 p. m. Alexander Rennie, Sec'y, 41 Washington street, Providence.

RICHMOND, IND.—Richmond Florists' Club, Commercial Club rooms. First and third Friday of each month. H. C. Chessmann, Sec'y.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday and third Monday of each month. Thos. H. Munroe, Sec'y.

ST. LOUIS, MO.—St. Louis Florists' Club, Odd Fellows Hall No. 2, Ninth and Olive streets. Second Thursday of each month, at 8 p. m. Emil Schray, Sec'y, 4101 Pennsylvania avenue, St. Louis.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association, St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. W. C. Jay, Sec'y, 438 Spadina avenue.

UTICA, N. Y.—Utica Florists' Club, 183 Genesee street. First Thursday of each month at 8 p. m. J. C. Spencer, Sec'y.

WEST HOBOKEN, N. J.—North Hudson Florists' Club, store of H. C. Steinhoff, Hudson boulevard, West Hoboken. First Tuesday of each month, at 8 p. m. Geo. F. Korge Sec'y, 616 Washington street, Hoboken.

## THE AMERICAN FLORIST

SEVENTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.  
Subscriptions accepted only from those  
in the trade.

Advertisements on all except cover pages,  
10 Cents a Line, Agate; \$1.00 per inch.  
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-  
tions, as follows—6 times, 5 per cent; 13 times  
10 per cent; 26 times, 20 per cent;  
52 times, 30 per cent.

cover space sold only on yearly contract at  
\$1.00 per inch, net, in the case of the two  
front pages, regular discounts ap-  
plying only to the back pages.

The Advertising Department of the AMERICAN  
FLORIST is for Florists, Seedsmen and Nurserymen  
and dealers in wares pertaining to those lines only.  
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to  
secure insertion in the issue for the following  
Saturday. Address

AMERICAN FLORIST CO., Chicago.

THE bedding plant trade is coming  
fully up to expectations.

PROSPERITY has brought the best price  
all season in all the carnation markets.

THIS is a good time to put the green-  
houses in shape for next season's work.

FROM the number of stems now being  
started it doesn't look as if the cycas was  
losing in popularity.

POSSIBLY there are better window box  
and lawn vase vines than the vinca, but  
the buying public doesn't think so.

SCHIZANTHUS WISBTONENSIS, says a  
competent English authority, is one of  
the best novelties in the way of annuals  
sent out in recent years.

HE is taking an unnecessary risk who  
leaves his glass wholly unprotected from  
breakage by hail. The only sure protec-  
tion is an insurance policy in the Hail  
Association.

THE mailing label on your paper shows  
when your subscription expires; when  
you send your renewal note that the  
date changes within two weeks; it will  
serve as your receipt.

THE present status of the American  
Beauty in regard to supply and demand  
is occasioning undue perturbation; it is  
faring better than any of the staples in  
this period of unusual oversupply  
throughout almost the entire country.

### Greenhouse Building.

Union City, Tenn.—Mrs. I. S. Brown,  
conservatory.

Shadland, Tenn.—G. R. Underwood,  
conservatory.

Whiteville, Mass.—Albert Burt, one  
house.

Randolph, Vt.—Burnell & Totman,  
enlarging.

Edgewater Park, N. J.—Joseph Gill,  
three houses.

Grandville, Mich.—George Conklin,  
three houses.

### Strength of Black Pipe.

ED. AM. FLORIST.—I would like to ask  
through your paper if the common 1-inch  
black iron pipe is strong enough to sup-  
port a greenhouse bench four feet wide  
with six inches of soil in the bench?

P. M. K.

When the soil is to be more than four  
inches deep the horizontal piping should  
be 1½-inch and the vertical supports,  
which should be 1-inch, should not be  
more than four feet apart each way.

L. R. TAFT.

### They Like Our Style.

AM. FLORIST Co.—We wish to congrat-  
ulate you upon the style in which you set  
up our advertisement in your last issue.  
We are very much pleased with same and  
think it a very fine one.

J. D. THOMPSON CARNATION Co.

### Special Notice.

Memorial day, May 30, falls on Fri-  
day. In order that our subscribers may  
receive their paper at the usual time it is  
necessary that the AMERICAN FLORIST  
go to press on Thursday night, twenty-  
four hours earlier than usual. Corre-  
spondents and advertisers will please  
take note.

### Piping a House.

ED. AM. FLORIST.—I am building a  
house 24x64 feet, short span to the  
south, rafters fourteen and sixteen feet,  
side walls five and one-half feet, double  
boarded and paper between the boards.  
I want to heat with hot water. How  
many 2-inch pipes will it require to keep  
the temperature at 50° in zero weather?

C. L. A.

The house can be heated by means of  
three or four 2 inch flow pipes, and  
enough returns to make thirteen in all.  
Another way would be to use three  
2½-inch flow pipes and nine 2-inch  
returns.

L. R. TAFT.

### Treatment For Bougainvillea Sanderiana.

ED. AM. FLORIST.—Having some fine  
plants of Bougainvillea glabra San-  
deriana in 4-inch pots left unsold, I would  
like to know the treatment to make  
them good plants for next Easter.

A. B. G.

I have been successful in producing fine  
bougainvilleas for Easter by the follow-  
ing method: Plant them out in the open  
ground any time during May, where  
they will get the full sunshine and nature  
will take care of them till autumn. Then,  
at the approach of frost, lift and pot  
them and put them into a greenhouse  
where the temperature can be kept at  
from 40° to 50°. About six or eight  
weeks before Easter raise the tempera-  
ture from 40° to 65° to 75°. Some growers  
never plant them out in the open ground  
but grow them in pots all summer, with  
the same treatment during the winter as  
above stated, and they are successful, too.

WM. K. HARRIS.

### Society of American Florists.

#### TRADE EXHIBITION.

By vote of the executive board, Ameri-  
can growers of any forcing bulbs, plants  
or seeds hitherto supplied mainly from  
foreign sources, or dealers controlling  
stocks of such goods, are invited to send  
samples of their product to the trade  
exhibition at Asheville, N. C., August 19-  
22, 1902, where they will be given space  
free of charge, provided that they then  
become the property of the society for  
testing purposes as to their forcing qual-  
ities, results of said testing to be pub-  
lished the following season. Please make  
entries with the secretary, Wm. J. Stew-  
art, 79 Milk street, Boston, Mass.

#### DEPARTMENT OF PLANT REGISTRATION.

C. S. FitzSimmons, Lansing, Mich.,  
registers rose Queen Madge. Sport from  
Kaiserin Augusta Victoria, in 1896.  
Color, true Papa Gontier in the bud,  
becoming lighter and brighter until the

petals fall, without discoloring. Form  
of bud similar to Kaiserin. Foliage also  
like that of parent but of heavier sub-  
stance. Fragrance with an added spice  
and foliage has a perceptible sweet-brlar  
odor. Stems stiff and of good length. A  
free-blooming, all-season forcing rose,  
grown in Bridesmaid temperature.

WM. J. STEWART, Sec'y.

### Galvanized Steam Pipe.

ED. AM. FLORIST.—Is there any objec-  
tion to the use of galvanized pipe for  
steam heating, apart from the increased  
cost? Would it last longer and radiate  
heat as well as common black pipe?  
What is the galvanizing substance com-  
posed of and how is it put on? R. H.

In addition to the cost, which is usually  
about fifty per cent higher than that of  
black pipe, galvanized pipe does not radi-  
ate heat as well. Were the two of about  
the same price the last objection named  
would not be sufficient to offset the  
advantage from the increased durability,  
but on the other hand common black  
pipe that is occasionally painted will last  
for many years under fairly good condi-  
tions and at the usual prices will be found  
more desirable. Black pipe is galvanized  
by dipping it into melted zinc after it has  
been freed from dirt and oil by means of  
acids.

L. R. TAFT.

### Alteration to Greenhouses.

ED. AM. FLORIST.—My greenhouse is  
24x120 feet, with a lean-to along the  
west seventy feet, with the partition  
once dividing it from the main house  
since removed. By the rebuilding of a  
house on the adjoining lot about twenty  
to twenty-five feet of the east end of the  
house is now shaded, so that the stock  
does not do well there, and I am thinking  
of taking down that portion of the house  
and re-erecting it, with some addition,  
beside the remaining portion. In the old  
section there are four benches, those to the  
north raised a few inches above the others,  
with a good deal of waste space in the  
lean-to. A man in whose judgment I have  
confidence says to bring the four benches  
down to a level, widening them and put-  
ting one in the lean-to; then to build an  
even-span house to the north. The line  
of sun over the south house will not reach  
all of the proposed new house at noon in  
winter, but after two o'clock would  
strike the whole side of the roof of the  
addition, for the houses run a little south  
of east to west. Another party advises  
me that it is immaterial about rearrang-  
ing the benches in the old house but says  
to, instead of building a long house par-  
allel to it, build short ones at almost  
right angles, that is, running north and  
south. I would have room for four or  
five such houses about thirty feet long.  
It is said that such houses would be bet-  
ter for my use than one large one, as they  
could be piped separately and each car-  
ried at any desired temperature. It is  
also suggested that if I decide to build  
the two parallel attached houses, I make  
the south slope of the new one rather  
steeper than even span. As I have no  
money with which to experiment I should  
be pleased to have an expert opinion on  
the several plans.

J. L. H.

The plan first mentioned seems the bet-  
ter of the two, as three or four houses  
thirty feet in length will cost considerably  
more than one house of equal capacity,  
especially as by the latter method it is  
proposed to extend the roof of the new  
houses over upon the roof of the present  
house. The valleys thus formed will be

expensive to build and maintain, and will be troublesome by causing shade and drip. If the new house is to be used for plants that will be injured by partial shade during the morning, it will be possible to place it eight feet away from the old house and still make it twenty-four feet wide. Under the conditions named an even span will be satisfactory, although a short span on either side would give good results. L. R. TAFT.

## OBITUARY.

C. H. DOWNIE.

C. H. Downie, who had charge of the grass and clover seed department of Peter Henderson & Co., New York, died May 19, after only a fortnight's illness. He was forty-five years of age and a native of Scotland. We understand he was formerly connected with the firm of Downie, Laird & Laing, of Edinburgh, now conducted, we believe, under the title of John Downie.

H. H. HUNNEWELL.

H. H. Hunnewell, proprietor of the beautiful gardens at Wellesley, Mass., died on Tuesday, May 20, at the ripe age of 92 years. Mr. Hunnewell was born in Watertown, Mass. At the age of 25 he became a partner in the Paris banking house of Welles & Co., where he resided for some fifteen years, returning to America to establish the firm of H. H. Hunnewell & Sons, since which time he has been a prominent factor in the financial and horticultural progress of Boston, although one of the most unassuming of men. He was a man of scholarly and literary tastes, fond of outdoor life and horticultural pursuits, generous, charitable and always public-spirited. He was an active member of the Massachusetts Horticultural Society for about fifty years, and during most of that period served the society in various official capacities. He gave generously and established several funds, the income from which is to be devoted perpetually to the cause of horticultural advancement. He retired from active duty as an officer of this organization in December, 1900. The beautiful estate at Wellesley is the most famed private place in America and no visit to Boston from distant places has been considered complete without a trip to that lovely spot. Its charms were the joint product of Mr. Hunnewell and his talented gardener, F. L. Harris, who also not long since found it necessary to lay down the cares of active work because of growing infirmities. In 1890, when the Society of American Florists visited Boston, one of the most delightful events of that occasion was an afternoon spent as the guests of Mr. Hunnewell at Wellesley, viewing the wonderful Italian garden and enjoying the manifold charms of sylvan scenery and landscape effect with which the place abounds. The immediate cause of Mr. Hunnewell's death was heart disease, but he has been feeble ever since an attack of pneumonia which he had about a year and a half ago. Up to that time he enjoyed uninterrupted good health.

WARE, MASS.—R. W. Cornish has sold out his flower business to Chas. F. Clark.

SEYMOUR, CONN.—Chas. F. Doll, who has conducted a greenhouse business here for many years will retire from the florist trade June 1.

## SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

**SITUATION WANTED**—By professional florist and gardener, capable of taking charge. W. K. 698 Van Buren street, Chicago.

**SITUATION WANTED**—By good grower for the retail trade; 14 years' experience; single; age 34. Illinois preferred. Wages \$30 and board. Address. RETAIL, care American Florist.

**SITUATION WANTED**—As foreman and grower of cut flowers and plants. Have been foreman with prominent florists around Chicago for a number of years. Address FLORIST, Box 54, Hinsdale, Ill.

**SITUATION WANTED**—As manager or working foreman on up-to-date rose growing establishment by very successful grower, capable of taking charge and understands handling of help. Address C F J, care American Florist.

**SITUATION WANTED**—By June 1st; practical florist; German, age 25 years, single; 14 years' experience with palms, ferns, forcing stock, bedding plants and cut flowers. Private or commercial place near Chicago preferred. Address C J, American Florist, Chicago.

**SITUATION WANTED**—As foreman by thoroughly practical florist. Good decorator, designer, etc. Grower of No. 1 roses, carnations and 'mums. First-class commercial or private position. Good wages expected. Address G. FOREMAN, care P. O., Canton, O.

Springfield, Mass.

TRADE SHOWS THE ACCUSTOMED SLACKENING GAIT AT THE SEASON.—VARIOUS NOTES OF INTEREST.

Business is slacking up, although there are no complaints heard, as all look forward to a quiet period at this time of the year. There are enough cut flowers to meet all demands, and of fair quality. We are getting some fine weather, but a little cool at night, making night firing necessary. Rain is needed badly in this section, for vegetation is showing the effects of drought. Bedding stock is selling very satisfactorily and the next two weeks will see the greater part of planting done. Pansies are about over and have sold well this season.

Adams & Sons report large sales of nursery stock, getting through with very few complaints. Gilbert, of Homer street, also reports increase for nursery stock and sales this season very satisfactory. A. B.

GRANDVILLE, MICH.—George Conklin has bought five acres of land of the Conklin estate and is building three greenhouses and a fine residence. He will grow carnations, violets and chrysanthemums.

PORTLAND, ME.—The greenhouses and salesroom on Congress street occupied for a number of years by E. J. Harmon, are being demolished to make way for a new hotel. Mr. Harmon will locate in a new building on the opposite side of the street.

# GLADIOLUS BULBS

**Closing Prices..**

7,000, in separate colors, 1st size, at \$12.50 per 1000.

10,000 High Grade Mixtures, for cut flowers, 1st size, at \$10 per 1000.

8,000, good mixed, 1st size, at \$7.50 per 1000.

Novelty, No. "1900," \$4.00 per 100.

## THE SEED TRADE.

### AMERICAN SEED TRADE ASSOCIATION.

J. E. NORTHERUP, Pres.; S. F. LEONARD, Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.  
 Twentieth annual convention, Minneapolis, Minn., June 24-26, 1902.

VISITED NEW YORK: John Deguan, of Chicago.

A. H. GOODWIN, of the Goodwin, Harries Co., Chicago, has returned from California.

VISITED CHICAGO.—A. J. Pieters, botanist in charge of seed laboratory, Department of Agriculture, Washington, D. C., returning from a trip to California, where he has been inspecting the crops of the seed growers.

It is reported that the New York Market Gardeners' Association has brought suit against Messrs. Landreth and Burpee in connection with statements made in print regarding the seed distribution of 1901.

ONION set fields at points on and near the Missouri river were damaged by winds early in the season. Some replanting has been done so far with satisfactory results. Hail, however, has done considerable damage in some places.

THE recent rains have flooded the level and heavy ground in the trucking districts about Chicago so that it has been impossible for some days to get on to the ground for weeding. The extra work which will be needed later may exceed the value of the crop, as it now stands.

### The Roman Hyacinth Situation.

Our correspondent, "Parisian," writes as follows with regard to the condition of the French Roman hyacinth bulbs May 9:

"I should have liked to write a few words concerning the Roman hyacinths, which are interesting so many of your readers, but the conditions in the growing region are just now rather unsettled. The late rains seem to have injured the crop and fears are now expressed that the bulbs will not be so fine as last season. Whether, as predicted, disease will further reduce the amount of available bulbs remains to be seen and can be ascertained only next month when potting the bulbs. In the light of such conditions many growers prefer to await the result of the harvest in the hope of getting a better price, rather than sell at present, except at a good advance on the syndicate's first quotation."

### The Bermuda Bulb Crop.

A well informed Bermuda correspondent writes under date of May 14 concerning the bulb crop as follows:

"I was much interested in your report upon the deformed Easter lilies, namely, Japanese, and your favorable comment upon the improved condition of the Bermuda Easter lily forced in America during the last season. I am not surprised at the fate of the Japanese stock grown in Bermuda.

"Every effort is being made here to further improve the healthy condition of the planting stock, that the bulbs exported may be all that could be desired, and to increase the number grown. The condition of the lily is far away better than it has been for years, and while the quantity reaped per area

will be much heavier, the acreage planted is far less, and I think the quantity that we will be able to ship will be about the same as last year."

### California Seed Crops.

The latest reports on the California seed crops are, briefly, as follows:

Celery—The outlook is fairly good.

Carrot—Acreage larger and the crop in general good.

Radish—Just blossoming and prospects fine if louse and frost do not trouble them.

Lettuce—Acreage reported reduced; excellent stand of plants; flowering time the critical period.

Onion—Fair acreage; looking well May 10; no blight or serious trouble, some spots too wet; critical period from this date to July 1.

Sweet peas—Acreage reduced; plants growing too slowly.

### The French Seed Crops.

Paris, May 9, 1902.—The season, from the seedsman's point of view, is at an end. The wholesale business in the fall was very brisk. Owing to the mild winter which we have had, (with the exception of some very hard frost in the early part of February) the retail orders came in more freely and earlier than usual. From early in February to the end of April it required increased forces to keep pace with the orders and taking everything into account (short crops and high prices) the seed business has been very prosperous. It is noticeable that when we have fine, sunny weather in February the retail dealers may expect a good season. When on the contrary the ground is snow clad in that month, people little think of ordering seed and when the inclement weather lasts into March, some customers consider that it is rather late to sow certain classes of seeds and it is so much lost for the dealer. Early seasons are therefore always desirable.

For nearly ten years we have not seen so many leading articles exhausted or the stocks so very low as they are at this writing. This is specially true of the radish, carrot and turnip shaped beet seeds. Germany having had a very poor crop of carrot seeds last year, imported large quantities from France. The radish crop has been very indifferent throughout Europe and there is nothing left. Early peas have all been disposed of at very high prices and the leading turnips are sold out. The trade in grass seeds, too, has been very brisk. The crop of alfalfa and clovers having been very short in France, fine qualities of domestic seeds were very scarce and sold at remunerative prices. All good stocks of nearly every class of seeds having been cleared up, we now require one or two full crops to replenish our warehouses and especially to check the pretensions of the growers, which, with another short crop, would be almost unbearable.

The advance on radish seeds is quite fifty per cent and the dealers who accepted contracts at from 45 to 50 shillings per hundredweight will either lose money or not be in a position to place the contracts with the growers. The outlook for a pretty good crop of beets, carrots, mangels, swedes and turnips is so far hopeful. The transplanting of the spring radishes will soon begin and, contrary to what happened last season, no difficulty will be encountered through lack of moisture in

the ground. In fact we have had too much rain and not enough sun lately and should the weather conditions not soon change and take a drier and warmer turn a good deal of injury may result from that source. Our barleys are beaten down flat; the wheats are too leafy (all straw) and many fields have to be turned over. Even in some of the growing districts of southern France the continuous and excessive rains have worked mischief in flooding many fields devoted to seed crops. The crop of cabbages suffered last fall through the inclement weather conditions, but the plants which withstood them are just now in a promising condition. At any rate that crop is not expected to be over one-half or two-thirds of an average and prices will again rule high next season. Spinach, onion, parsley, lettuce and celery are so far all looking well, with the exception of the Paris Golden Yellow and White Plume celeries, which, as poor seeders, are always scarce.

But the crops are not warehoused yet. The incessant, soaking rains which we have had for several weeks have not alone been harmful to agriculture; we have had of late days a considerable fall in the temperature, followed in some parts of our country by hail and snow storms. In the aggregate the temperature has been for several days 10° centigrade below the normal at this time of the year. From various parts of France we hear that the beans and potatoes, which showed already well above the ground, have been frozen; from Normandy, the cider region, it is reported that the apple crop may be considered as greatly impaired; even in the southern part of France they are not better off and many crops seem to have suffered a good deal. The good fruit prospect which continued to the end of April has been sadly marred. In the face of the discouraging temperature which is prevailing at this writing, the prospect with many crops is a matter of conjecture, but the injury already done in some districts is serious. PARISIAN.

### Hail.

SHELDON, IA.—There was heavy hail here May 3 and John Christiany, proprietor of the Sheldon Greenhouses was a heavy loser. Over 2,000 square feet of glass was broken and the damage to the stock was large.

LYNCHBURG, VA.—On April 29 there was a severe hail storm here which caught two of the four florists in the locality. Harry R. Brown lost sixty or seventy boxes of 14x14 glass and A. Brosch suffered to the extent of thirty or forty boxes, part of it 12x14 and part 8x10. Neither party had insurance.

### New Orleans.

The New Orleans Horticultural Society held its regular meeting May 15, with President James A. Newsham in the chair. The following committee was appointed to arrange for the anniversary trip to Grand Isle: D. Newsham, C. R. Panter and C. Eble. A communication was read urging the society to send a good representation to the convention of the Society of American Florists at Asheville, N. C.

NEW DURHAM, N. J.—Adam Steiger was brought before Recorder Pullis on Tuesday, charged by a lot-owner at Flower Hill Cemetery, with taking floral designs from graves.

# No Pots==No Coal==No Glass!

## A WORD TO THE WISE: Make Money When You Can.

Here are two propositions either of which is certain to work and give large returns to the Florist who Reads and IS KEEN ENOUGH TO CATCH ON.

**FIRST==Buy 1,000 CANNAS, Dormant Roots, costing \$12.50, returns (conservative estimate) \$150.00.**

**HOW?** Our price is less than 1/2 cent per eye, which eyes will make plants under simple treatment in about three weeks that bring at Auction 5c and commonly 10c each. There never was enough to meet the demand—Nur Ced. Think it over, but don't think too long; chance will slide by.

**SECOND==Buy 1 Box (300 BULBS) for \$18 Cold Storage Lilium Longiflorum, Returns (Conservative Estimate) in 3 months, \$120.**

Planted now outside should average at least four blooms to the bulb and flower in August when white lily flowers are in great demand by seashore hotels and other festive resorts, and readily sell wholesale from 10c to 20c per bud. Our Retarded or Cold Storage L. Longiflorum bulbs (owing to our secret method of storage) are as perfect to-day as when they reached us from Japan in November last, and are guaranteed to be in first-class condition before shipping.

**CANNAS** Price of Dormant Roots \$1.50 per 100; \$12.50 per 1000

Large Pieces Three and More Eyes. No less than 250 sold at 1000 rates. You can select an assortment of kinds to this number and get 1000 rates. **Queen Charlotte**, red, deep golden edging; **Shenandoah**, dark foliage, pink flowers; **Chas. Henderson** crimson, compact habit; **Peachblow**, white, changing to rose; **Morning Star**, yellow, with red spots; **Alsace**, creamy white; **Austria**, clear golden yellow; **Burbank**, rich yellow; **Italia**, orange scarlet; very broad, golden yellow border. **PLANTS** of above varieties and others from flats, now ready, 50c per doz; \$3 per 100; \$25 per 1000.

**COLD STORAGE OR RETARDED Lilium Longiflorum**

The retarding of Lilium Longiflorum bulbs in cold storage with us is no longer an experiment, but an unqualified success. Do not confuse these with some old left-over stock that may be offered cheap elsewhere, which would only lead to disappointment, and be dear at any price. Our bulbs are imported and packed specially for Cold Storage and we are the pioneers in this line. Price of cold storage Lilium Longiflorum Bulbs for delivery any time of the year. 7 to 9-in. bulbs, 300 in a box, \$1 per doz; \$7 50 per 100; \$60 per 1000. One whole box sold at 1000 rate.

**IRIS (FLEUR DE LIS) JAPAN or Kaempferi**, original imported clumps, 24 distinct named kinds. Per doz, \$1.00; per 100, \$7.50.

**CLUCAS & BODDINGTON CO.,** 812-814 GREENWICH ST. Tel. 4390-Spring, NEW YORK CITY.

Importers, Exporters and Growers' Agents of Seeds, Bulbs and Plants.

## DREER'S OFFER OF CANNAS

The following varieties can be supplied in strong plants from 3-inch pots, well established, for quick effect, \$5.00 per 100; \$40.00 per 1000.

- ALSACE**, sulphur changing to white, 4 1/2 feet.
- BRONZE SEEDLING**, rich bronze foliage, currant red flowers, one of the best dark-leaved varieties, 4 1/2 feet.
- LURAY**, pleasing deep rosy pink, 4 feet.
- MME. CROZY**, standard gilt edge, red, 4 feet.
- MLLE. BERAT**, the best pink bedder, 4 feet.
- ROBERT CHRISTIE**, bright orange red, fine, 4 1/2 feet.
- SOUV. de ANTOINE CROZY**, intense scarlet crimson, rich golden yellow edge.
- SOUV. du PRESIDENT CARNOT**, vermilion scarlet with bronze foliage, 6 feet.
- SOUV. de MME. LEONIE VIENNOT**, carmine with yellow edge, a fine bedder, 4 feet.
- WILHELM BOFINGER**, rich scarlet overlaid orange, very bright, 5 feet.

**HENRY A. DREER, 714 Chestnut St., PHILADELPHIA, PA.**

## ROSE PLANTS

2 1/2-inch Rose plants, fully as good as any we have ever sent out:

- METEOR**, \$2.50 per 100; \$20.00 per 1000.
- MAIDS**, 3.00 per 100; 25.00 per 1000.

**J. A. BUDLONG,** 37-39 Randolph St. CHICAGO.

## Plant Now LILY of the VALLEY

**FOR JUNE WEDDINGS.** Select Valley Pips from Cold Storage, properly packed and thoroughly frozen, \$13.00 per case of 1000. These were put up specially for the benefit of my out-of-town customers and can be shipped at once. Original cases of 2500, \$31.25; \$1.50 per 100.

**H. N. BRUNS, 1409-1911 W. Madison St., CHICAGO.**

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN. R. C. BERCKMANS, Pres.; R. J. COE, Vice-Pres. GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-seventh annual convention, Milwaukee, Wis., June 11-13, 1902.

THE nurserymen will have a big convention at Milwaukee next month.

THE requirements in peach trees in the south this season were too much for the supply.

CONDITIONS in the nursery trade are such as to warrant the expectation of well maintained prices for the next year or two.

It is likely that the prices of cherry trees will recede from the present high level because of the very large planting of Mahaleb in the west this spring.

THE Winchester Nursery Company, of Winchester, Va., has been incorporated with capital stock of \$50,000. The plan is to grow nursery stock on a largescale.

THE sudden turn to warm weather all over the country has put an end to the late, desultory planting and brought the finish to the biggest season generally the nurserymen have ever known.

THE demand for apple seedlings this year was rather more than the big western growers could supply, but A. L. Brooke, of North Topeka, Kans., says that in spite of this the plant of seeds has not been as heavy as usual this spring.

PROF. JOHN CRAIG, of Cornell University, says that the severe frosts of May 8 and 9 in New York have changed the promising outlook for a fruit crop to one which is altogether problematical. Particularly is this true in the central part of the state. Peaches and plums have been badly injured. In the lake region the injury is much less severe.

THE Boston Common Society furnishes the following interesting information regarding some of the ancient trees upon that reservation. The first row of trees along the Tremont street mall was planted in 1725, the second row in 1734, and the third row in 1784. The Beacon street mall was laid out about 1816, the Charles street mall about 1824 and the Boylston street mall about 1836. Of the trees which formed the first and second rows along Tremont street, none now remain, the last having been removed when the subway was built.

At New York.

The customary friendly rivalry on the alleys last Monday night was intensified by the presence of D. T. Connor, of Philadelphia, who, as the scores show, had no difficulty in finding the right rut in the alleys and making frequent trouble for the center pin. Scores were recorded as follows:

Player	1st	2d	3d	4th
Siebrecht.....	144	146	158	132
Lang.....	175	165	183	161
Burns.....	140	161	166	188
Hafner.....	165	176	168	184
Bunyard.....	109	105	106	143
Traendly.....	153	180	147	180
Shaw.....	136	93		
Connor.....	153	180	147	

Bowling at Philadelphia.

The balls and pins are still keeping up a merry rattle on the club alleys. The usual matinee crowd is in evidence in the afternoons. The large number of associate members of the club help to swell these afternoon seances, the proportion of florists being about one to four. In the evenings about twice a week some of the faithful are generally to be found, keeping in form or striving not to get too far away. Scores run about the same, ranging from 150 to 175 for the first twelve to fifteen men in the monthly averages.

The dinner of the bowling league of this city in whose tournament the Florists won the first prize the past winter, held last week, was a most enjoyable affair. Capt. Moss, of the team, was presented with the trophy, a grand affair, something similar to the Evans prize, being a trifle different and more slender in shape, and is mounted on a metal base. It is a beauty and helps to make the case in the clubroom, which, by the way, is getting crowded, more attractive. The first team and the Friday-nighters are to have a "go" on Thursday evening, and there is no end to the things they are going to do to one another. May they both get satisfaction. K.

**I**T IS our aim to make our place at all times the most reliable source of supply in Chicago. We have large resources at all seasons, for Decoration Day shall be particularly well equipped, and expect to be able to take care of all comers. Among other items we shall have:

**Beauties** We have all season handled the cut of 45,000 Beauty Plants and they are now in heavy crop. Plenty long stems. Good quality for the time of year.

**Paeonias** This is a favorite flower for Decoration Day. Big show for little money. We expect to have enough for all. White, pink, red. Best sorts.

**Tea Roses** Our growers are sending in heavy cuts. Maids, good color; Meteor, fine; stock a little soft, but averaging up well with the best now in market.

**Carnations** All the latest varieties in good supply. Color holding well, fine stems. A very good grade of goods for the prices quoted.

**Valley and Orchids** We have choice Valley all the year around. Send to us for Cattleyas when you have a nice job on.
